## NOTICE.

COMMERCIAL HISTORY AND REVIEW OF 1874. As part of an early number of the Economist, we shall, in continuation of the Series commenced with 1863, issue a Supplement under the above title, containing a careful Digest of the leading Merchants and Brokers' Circulars in the different branches of Trade, Returns of Prices, Accounts of the Banks of England and France, Appendices relating to special subjects of Mercantile Interest connected with the year, &c.; the objects of the Supplement being to place in possession of our readers a Commercial History of 1874 worthy of preservation and adapted for reference.

On December 26 was Published No. 12, Vol. IV., New Series, Price 1s 4d; by post, 1s 6d, THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for December gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c.

A FINANCIAL RECORD OF THE MONTH;
New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies.
New Companies and New Capital. Prices made up to December 23.

Advantage.

Advertisements for the next number, to be published on January 30, must be sent, to insure insertion, on or before January 28.

OFFICE-340 Strand.

FOUR PER

AFTER the full manner in which we discussed the reduc tion of the rate of discount by the Bank of England last week, we have little to say on the second reduction made this week. The two must stand or fall together: if the Bank were right in making one, they were right in making the other; and if wrong in making one, wrong in making the other. And if they were right, very soon they ought to make further reductions on the same principle.

reductions on the same principle.

It is a mistake to suppose that when money and business are in the state in which they for the moment are, the reduction in their rate of discount will bring any additional bills to the Bank of England. Money is very plentiful, bills are in comparison very scarce, and when that is the case the bill brokers and the Joint Stock Banks always underbid the Bank of England. They give interest for their money, and therefore must employ it. The Bank of England gives no interest, and need be far less anxious on the subject. And as in all such cases the business is carried away by the keenest all such cases the business is carried away by the keenest competitor, all which the Bank can do is to reduce their rate of discount till bullion is exported, till their reserve is diminished, and till the quantity of money seeking employ-ment is so far lessened that holders of bills and other borrowers must come to the Bank. Till their reserve is thus run down, no reduction in the rate of discount will bring them any increase in their disount business which is worth taking into

The simple question, therefore, to be considered in such a juncture as the present is the sufficiency or insufficiency of the Bank reserve, and on this subject we have nothing now to add to that which we have said so frequently. We cannot think that reserve enough. Indeed, we do not see on what principle the present policy of the Bank of England is to be defended. We can quite understand that the directors should say, "Our Bank is only a Joint Stock Bank, like the London and Westminster or the Union. We shall only keep the reserve they keep; we have only our Proprietors to look to; we shall try to make a dividend like theirs." But the Bank of England does not do this. It keeps more than four times as much as it would keep if it only held the same proportion of reserve to liability as the London and Westminster, and beans idle that large sum and diminishes its proposition. times as much as it would keep if it only held the same proportion of reserve to liability as the London and Westminster, and keeps idle that large sum, and diminishes its proprietors' dividend in proportion. On this principle their policy is, therefore, excessively faulty. On the other hand, it would be quite intelligible, and, we think, quite correct in the Bank to say, "We carry on an "entirely distinct business from other Joint Stock or private Banks, We are the Bankers' bank; they are not. We hold "the ultimate reserve of the country; they do not. As a duty of our position we must maintain a banking reserve equal to "the purposes for which such a reserve is kept—especially we must keep one large enough to sustain credit and confidence." But on this principle the present policy of the Bank is equally faulty, because they continually run down their banking reserve so low that the public become apprehensive, a slight perturbation is caused, and then, by the most stringent steps, the reserve has to be augmented again. If any considerable adverse event happened in the interval, and before the reserve was so augmented, there would be a panic. On this principle, therefore, the present policy of the Bank is as faulty as on the other. That policy is in truth one of those unhappy mean terms which combine the defects of both extremes—it sacrifices the interest of the Bank proprietors' but does not secure the safety of the public. but does not secure the safety of the public.

## MR GLADSTONE'S RESIGNATION.

In one respect Mr Gladstone is unique. Many statesmen have written books in retirement, and some have ostentatiously commended it. But ordinarily those books are tame and those commendations forced. Now that they feel no longer the excitement of the Senate or of office all else seems tasteless to them, and you can trace that languor in every phrase they utter. But no one can say this of Mr Gladstone. writings in retirement may or may not be too many; they may or may not be models of style; but no one can say that they do not show the keenest interest in their subjects. If he writes in the "Quarterly," you wonder at the unusual vigour of the anonymous contributor; if he writes on the "Vatican Decrees," you admire the minute research and the zeal of disputation which no divine can surpass. In Homeric criticism his eagerness is almost greater: it has long been said of him that he "cared as much about the sons of Priam as if they had votes on a division"; and, in fact, he can pursue, with elastic energy, inquiries which most bookworms would call tedious. And in all this exceptional earnestness there is not a vestige of affectation. It is the simple expression of an intense nature, which singular to say is both variable and concentrated, which pours itself in a hundred pursuits, but which for the time being is absorbed in each.

This is the real explanation of Mr Gladstone's resignation. He can withdraw into comparative retirement, because he can be absorbingly occupied in retirement. If he hears from a distance the din of Parliamentary battle, he is not over-powered with melancholy musing; his compensations are at hand; his study is no place of calm to him, for it is alive with "hot thought" and rings with controversies for which he cares.

That Mr Gladstone has judged wisely for himself in resigning the leadership of the Liberal party we cannot doubt. There can be little pleasure in leading that party in its present state, and there must be much vexation. It will be impossible to please everybody, and easy not to please any-body. The toil of attending Parliament merely to "watch "the proceedings;" to sit opposite to a Government in anxious hope that it may make some mistake, and with little to say if it does not; to detect errors in figures and poke amendments into clauses, -is an excellent training for young members, but a dismal employment for a finished statesman. In Mr Gladstone's case it would be particularly melancholy, for it would be a striking contrast to his own Government. After just having achieved much of which even those who question the policy do not doubt the greatness, it would be pitiable to be occupied for session after session in framing minute criticism on measures of which those who approve the

object cannot deny the mediocrity.

The task would be the less pleasing because it is a kind of Parliamentary work, probably the only kind, for which Mr Gladstone is not well fitted. In framing or explaining great measues, in great replies-in short, in all first-class combats-he is without a rival in our time; Lord Russell, no partial judge, seems to think, without a rival during his immense Parliamentary experience. But exactly the qualities which fit Mr Gladstone for these great combats unfit him for much small work. He is not a man to hold, as the lawyers say, a "watching brief." The best requisites for that task are—first, taciturnity, so as not to be hurried into premature objection; and next, a light way of handling small objections, so as not to make too much, and yet to make enough of them. But no one would praise Mr Gladstone for

these gifts; he has greater ones, but he has not these.

If anything could incline a statesman in Mr Gladstone's place to resign the leadership of the Liberal party, we should say that it would be the speeches which have been made during the recess by liberal members. At first sight these speeches all look complimentary, for they are unanimous in professions of allegiance; but when carefully examined their purport is less pleasing, for most of the speakers expect their fealty to be recompensed, and to be recompensed by the achievement of an impossible task. The Liberal party is, by admission, divided: what some wish others reject; what some think an indispensable good others think an irreparable calamity. And many expect Mr Gladstone to discover the word of the enigma—the measure which is to bring them together. But he cannot do so at this moment, nor can anyone else. Such measures must "grow;" they cannot be made. A new race of ideas must be formed. Long controversies

and many agitations will be necessary before the Liberal party will be united upon a single plan, and before the nation will be prepared to accept it of them.

For himself therefore, as we believe, Mr Gladstone has judged wisely. What will be the effect of that decision on the Liberal party is another question. For the moment it will, we cannot doubt, be unfavourable. In the first place the party will lose the enormous advantage of being led by a man of genius. Indeed it seems as if genius would soon be banished from practical statesmanship. If anything should happen to the present Prime Minister, and if Mr Gladstone persoveres in retiring, two great parties in the State will be left with what in the cotton market would be called "best middling" statesmen and with no others. And we believe that the effect will be to make politics as a study less elevating and less instructive to the English people than they have been used to find it. The spectacle of the contentions of first-rate men on subjects which the many care for is the best and almost the only way of bringing home to the many what high mental ability really is, and how completely they are themselves destitute of it. What such men do by intentional benefit is less instructive than that which they confer by the unintentional spectacle of what they are. This, it appears likely, we may before long much want. As a contemporary of Pitt and Fox said when they had passed away, "We are left with pigmies whom we know to be pigmies, because we have "measured them with giants."

The want of an intellectual bond in the Liberal party will also be much more felt now that Mr Gladstone has retired than it was before. The allegiance paid to him might often be, perhaps often was, hollow; still it was an allegiance. The consequent tie might be a frail tie, still it was a tie which there is nothing to replace. There is no one whom all sides of the Liberal party can even profess to reverence in the same way. Between the two extremes of the party—between men like Mr Chamberlain and men like Lord Cardwell—how weak is now the bond, and how wide is now the contrast.

The most pleasant aspect of the subject is that, though Mr Gladstone retires from the leadership of the Liberals, he does not retire from Parliament or from public life. We shall sfill be instructed by his occasional efforts, though not, as we have for so many years been, by his daily and constant efforts. And this will be a considerable compensation, especially as compared with the times most recent. It is impossible not to imagine that a nature at once so eager and so peculiar as Mr Gladstone's must have suffered much in fulfilling a representative function as a party leader. He must have had to suppress much he would have said if he had been left unshackled, and have said much that he did say in a different way. It must have been painful to think that common people had a kind of veto on his words; that they had a kind of right to say, "Our " leader ought not to say that; we ought not to be bound by " this sort of thing." And as so often happens in a struggle against nature, we think Mr Gladstone not unfrequently overdid what was necessary. We should be inclined to say that throughout very many of his speeches while Minister there was, notwithstanding their other great merits, a want of the idiosyncratic and individual charm to which we are used. The Minister was great, but the man, such as we had known him for years, and as doubtiess he still is, seemed somehow disguised and eclipsed. From all hindrance of this sort we shall now be freed. Parliament will again have the most chosen thoughts of the most peculiar statesman of the age uttered not only in most eloquent but in most characteristic words, and it will be a great refreshment.

## PRINCE BISMARCK AND SPAIN. WE have seldom read an aunouncement with more astonishment than that which the Times made on Tuesday, apparently on authority, as to Prince Bismarck's views in relation to the recognition of the new Government in Spain. "We have reason to believe," it writes, "that Prince Bismarck has caused "it to be intimated to the Spanish Government that Germany " will defer her recognition of the new King of Spain until "the Government acting provisionally in his name has "repealed the decree suspending the publication of two "Protestant journals, and has permitted the re-opening of a "Protestant chapel at Cadiz." If the Times' reason for its belief was as good as it evidently thought it, this is a new

apple of discord which Prince Bismarck has cast into Europe.

It is difficult to conceive a worse principle to lay down than that any European power should regulate its recognition of another power by the wisdom or folly, the agreeableness or disagreeableness of the latter's internal statesman-ship. If we were to omit to recognise a Government till its policy became, in our view, reasonable and wise, we should probably recognise very few Governments indeed, and moreover what Governments we might choose to recognise would depend not so much on their absolute wisdom, as on the fastidiousness and fancifulness of the Foreign Office of the moment. Once let it be granted that we have a right to make conditions as to the national policy of a State before we trust its Government as the proper representative of its people, and the question of recognition becomes a question of political taste; and as it is useless disputing about tastes, there would be no ground of reproach against Russia for not recognising [Turkey, or against England, during the régime of slavery, for not recognising the United States. Indeed, if it is in any sense reasonable for Germany to defer her recognition of the new Government in Spain till the Protestant religion enjoys full liberty again, no one can deny that it would be quite as reasonable for Spain to defer her recognition of Germany till the Roman Catholic religion enjoys full liberty again. If the Pope were to write to the Catholic powers, begging them to withdraw their recognition of Germany till the Roman Catholic faith should cease to be persecuted in Germany, Prince Bismarck would write a despatch that would be quite sublime in its common-sense wrath, and we should all of us read it and admire it, and wonder that even the Pope should have given Prince Bismarck the chance of so easily showing up the imbecility of ecclesiastical ideas. But we must say that if he has really given the instructions conveyed in the Times, he has laid himself open to as much remark as that to which, in the case supposed, the Pope would have exposed himself. Of course, as there are real reasons for doubting the strength and permanence of the new régime in Spain, there is nothing absurd in itself in the delay of the recognition. But the reason assigned for that delay is quite as absurd as the reason which we have supposed the Pope to assign for asking atholic Governments to withdraw their recognition of Germany. In fact, all that the excuse really means, when stripped of mere outside, is this: "We wont admit that your Government really acts for Spain until it ceases to approve an in-"ternal policy which is vexatious and irritating to us." would be just as reasonable to tell Spain she should not be recognised till she had accepted financial reciprocity with Germany, or enacted a Spanish edition of the Falck laws, or agreed to support the Prussian policy for the election of the next Pope, or promised to adopt any other of Prince Bismarck's favourite recipes for promoting the peace of Europe and the predominance of Germany.

The truth is that the recognition of a new Government by other Governments generally means, and always ought to mean this, and this only: that the Government in question is really strong enough and stable enough to act on behalf of the country, with such authority and such power to compel obedience as Governments ought to exert. If that be so, then the only effect of not recognising such a Government is to introduce an unwarrantable confusion into the dealings between the two nations. If you decline to recognise the real manager of a company, you cannot transact the business which may arise between you and that company in the ordinary way; and you induce other people, moreover, to suppose that the manager of that company has not the authority and position which ought to belong to a manager. Precisely similar is the result of not recognising a Government which is really governing, and the only one which is really governing, the nation. It prevents the commercial and other social transactions between the two nations from taking place under the most regular and satisfactory conditions, and being protected by the full guarantees of civilised European habits, and it induces other Governments to treat with needless distrust and suspicion a Government which is thus openly ignored by a powerful State. The sole justifiable reason for refusing to recognise a Government is that that Government does not really enforce order and wield authority. When that is so, when there are several competitors for the functions of Government, or when, though there are no other competitors, the Government of the moment has so little real control of the people that it is

defied with impunity and can look only for a short life, it is right, as well as inevitable, for settled Governments to withhold their recognition till some authority emerges from the chaos with adequate claims on their respect. By recognising every ephemeral power that chooses to call itself a Government, foreign States might be drawn into the unpleasant position of receiving injuries and grievances from a power quite too weak to be called to account; nay, so weak that it may have disappeared long before any indemnity can be demanded from it. And worse, an appearance of recognition might lead other States into treating it with a confidence that it did not deserve. For this reason it has been the wholesome practice of all self-respecting Governments to await the signs of real power—the evidence of adequate political responsibility—before entering into relations with new-born or revolutionary Governments.

No doubt, however, there have been occasional instances in which the withdrawal of political recognition has been used as a kind of diplomatic penalty, or mode of indicating quasibelligerence, in the case of petty States which have acted in a way displeasing to the Government which thus withdrew their That, as it seems to us, unless really meant as the preliminary of war, is a very unwise sort of proceeding, borrowed, without any justification, from the rules which guide the intercourse of society. Now it is all very well for individuals who do not like each other to break off intercourse with each other, and to cease from signs of mutual recognition. That affects no one but themselves; and as formal social relations without good feeling at the bottom of them are of little value to any one, there can be no reason at all why people who do not think well of each other should not choose to meet as strangers, if they prefer it. But when the interruption of diplomatic relations is used as a sort of secondary penalty for an unscrupulous little Government, a great deal of harm is done to a great many people of both nations who are entirely innocent of the offence given, and yet who are very seldom likely to have any power to remove the cause of the offence. As a rule, too, a great deal more suffering is inflicted on the citizens of the more powerful than on those of the less powerful State, for the former are left entirely unprotected in a little country which has not sufficient self-respect to treat them generously, while the latter are pretty sure not to suffer, even though they visit the land of their opponent, since a larger view of right and a more permanent standard of civil justice protects them from any petty revenge. It seems to us, therefore, that the plan of withdrawing envoys simply as a mode of saying, "You have "offended me, and are acting like a State of no principle and "no breeding," is a thoroughly vicious one. It punishes the wrong people, when it punishes any one at all, and leaves the offending State at even greater liberty to follow its own caprices than before.

In regard to Spain, we cannot but feel that almost all the European powers, except, perhaps, Russia, have acted without sufficient regard to principle. They waited to recognise the new Government till it should prove itself to be fairly established, but actually recognised it for a very insufficient cause at a very unfortunate moment, when it was just tottering to its fall; whereas it is at least possible that if they had recognised it soorer the moral support gained would have given the Republic a chance of permanence, which, in fact, it never had. As a rule, England has been very chary of recognising a new Government that does not show ample signs of gaining the support of the whole nation. The Confederate Government of the Southern States was never recognised by us. It was very long before we recognised the Governments of the South American Republics. And if we had acted on the same principle this time, we certainly should not have recognised the Government of Marshal Serrano at a time when he was confessedly acting without the concurrence of the popular power, and when he represented a hybrid kind of Governpower, and when he represented a hybrid kind of Government without any constitutional type, and was obstinately assailed from the Northern provinces by the army of a pretender. There was a better case for acknowledging the Government before the Cortes was dissolved than there has ever been since. But on the traditional policy of Great Britain there has never been any good case at all—least of all at the moment when the irritation of Prussia at the execution of Captain Schmidt set the example, which England and France somewhat meekly and incoherantly followed. and France somewhat meekly and incoherently followed. it has proved, we have made a signal blunder by recognising

a purely provisional Government on the very eve of its decease. Russia, who stood aloof, was, in fact, far better justified in her action than we who tendered our moral support too late to be useful to the Spanish Government, too soon to be safe as regards our own dignity. There is something to be said for early recognition of such provisional Governments on the theory—a very doubtful one—that this sort of sympathy or moral support tends to strengthen the weak hands and feeble knees of a new Power. There is much more to be said for judging of the solidity of a Government by its power to restore order and to stamp out internal opposition; but the Powers which recognised Marshal Serrano's Government went by neither test. They were not in time to lend it a new prestige at the moment when it had most chance of popularity. They had, too, no sort of evidence of true stability, and so it happens that within a few months of our act of recognition we have to consider the whole subject again.

But whatever principle our Government may choose to adopt, at least let it not commit the fatal error of which Germany is said to have set the example—of letting any political tastes of our own decide us in tendering or withholding our recognition. If that practice is once to begin, there will be no end to the follies and caprices into which it will lead European States. We might as well withdraw our Ambassador from Constantinople till the Sultan puts down polygamy, as make it a reason for ignoring the Government of Spain that it is silly and bigoted enough to prohibit Protestantism. If that sort of test is to prevail, we shall soon have every strong government trying to rule indirectly over one or more weak governments, by specifying an internal policy which shall be the sole condition of its favour. A more mischievous division of power and responsibility, a more shocking moral anarchy, than such a system would lead to, it is hardly in human power adequately to conceive.

## THE GOLD MOVEMENTS OF THE LAST THREE YEARS.

In the end of 1872 and beginning of 1873 we published a series of articles on the production, movement, and coinage of gold throughout the world during the years 1848-71. Our main object was to collect the official data on the subject, and give accurate and exhaustive figures as far as they went, with but little attempt to make estimates as to what was less known. Without continuing the work in its entirety, for which the requisite official figures are not yet accessible, we now propose to give an account of the principal changes during the last three years. Our work, as it happened, terminated at an interesting period-almost at the beginning of the great movements which the indemnity payments from France to Germany and the introduction of a gold coinage into Germany have occasioned. What has been the production during this abnormal period, as compared with the previous years since 1848, and how and from what sources have the new demands been met 8

The first question is that of the production, and though our tables are necessarily incomplete, we think there is prima facie evidence that the former level of production has not been maintained. Dealing with the principal sources of supply in the same way as formerly, we find the total estimate for the three years to be 56,140,000l, or on the average 18,713,000l a year. Completing by this means a table which we embodied in our article of 3rd August, 1872, we obtain the following result:—

7	man .				
				A	nnual Average.
	1713				£
	Production,	3	years,	1849-51	9,278,000
	-	5	-	1852-56	29,176,000
	-	5	-	1857-61	22,930,000
	-	5	-	1862-66	20,611,000
	-	5	-	1867-71	20,211,000
	-	3	-	1872-74	18,713,000

This is a most striking confirmation of what has gradually come to be the belief among the most careful observers,\* that the maximum effect on prices of the Californian and Australian gold discoveries had been produced by the year 1857. Since that period at least the production in the chief mining regions has either been stationary or has tended to fall off,

and any such change would naturally assist in the appreciation of gold, or in preventing its farther depreciation.

This conclusion, we think, may be practically relied upon, in spite of some obvious qualifications which must be taken account of in considering the figures. Thus the figures of the Russian production are only an estimate, and the amount may really have been more. The actual total officially returned for 1872 was 2,330 poods, which would give a value for that year of 4,771,000l; and this rate of production, which shows a great increase upon any year for which we had official figures when we last wrote, may have since continued, though we cannot say without having a later return. It is also to be observed that the average of the last three years is reduced by a curious falling off in the year 1872, and that there has since been a recovery. These qualifications, however, do not alter the fact that for the last few years production has not been at all what it was in former years, and that both Australia and the United States do not readily maintain their former rate of production.

It is also fair to observe that the United States Commissioner of Mining Statistics, in the Appendix to the last Mint Report, estimates the production of gold in the United States uniformly two or three millions a year higher than the amount of the "deposits of gold of domestic production at "the mints of the United States," which we have taken as an authentic record. The Commissioner, however, does not show in detail how his estimate is made up, and for purposes of comparison between one period and another it is, of course, more convenient to continue the set of figures which we have formerly used.

Inquiring what has become of this product, and employing our former method, we think it is not difficult to trace the signs of pressure which the new great demand for Germany has made upon the diminished supply. One of the most interesting facts is the great reduction in the excess of the imports over the exports into this country. As we showed in the article of 3rd August, 1872, above referred to, this excess amounted to five millions annually on the average between 1858 and 1871, and in most years there was a considerable excess; the only exceptions being—1860, when the exports were 3,057,000l in excess; 1861, when the excess of imports was only 926,000l; and 1871, when the German demand was already being felt, and when the excess of imports fell to 915,000l. Since 1872 the course of the trade had been:—

Market St.	Imports.		Exports.		Excess of Imports.		Excess of Exports.
1872	18,338,000	***	19,749,000	***	***	***	1,411,000
1873	20,610,000		19,071,000		1,539,000	***	
1874	16,743,000		10,642,000		6,101,000	***	***

Thus the average excess of the imports for the three years is about two millions a year, and if 1871 were included, it would be still less. The average besides only becomes as large as it is in consequence of the very great excess of last year, which has evidently been rendered necessary by the previous exhaustion of stocks, and was not sufficient to prevent the bank rate rising to 5 and 6 per cent. The facts are one more proof that a certain amount of new gold is required annually for England as for other countries, in order to meet the wants of an increasing population, which also grows wealthier individually each year, and that failure or difficulty in supplying these wants results in money market stringencies.

Another interesting fact is that Germany, and latterly France, have evidently absorbed the larger part of the available supply from the production above recorded; and that the distant countries which we provide with a gold currency have, like ourselves, been stinted in their supplies. The amount of this available supply may be estimated at about 36,000,000*l* out of the above 56,140,000*l*. The two items of the Russian production and the coinage at the Sydney mints may, for this purpose, be left out of view. Either the Russian production has been left at home or has gone direct to Germany, so that no part has come into the general bullion market, and the coinages at the Australian mints are either not exported, or, so far as exported, are included in the imports into the United Kingdom. We have, therefore, only the import from Australia, amounting to 22,000,000*l* in three years, and the production in America, amounting to 14,000,000*l*, to deal with. And this estimate of the American production, it may be remarked, corresponds very closely with what has actually come from America to the London money market in the period.

<sup>\*</sup> See Letter by Mr Jevons in Economist May 8, 1869.

Excess of Imports of Gold from United States over Exports-

10.01	Excess of					
1.00		Imports.		Exports.		Imports.
1872 1878 1874	*****************	8,148,000 3,174,000 4,509,000	******	2,417,000 9,000	*****	8,148,000 757,000 4,500,000
		15,831,000		2,426,000		13,405,000

The available new supply coming to England has thus been 36,000,000*l* in the three years, and deducting six millions as having been absorbed in England, there remain thirty millions for disposal to other quarters.

Of this sum Germany has received about one-half directly, in addition to any other amounts which it may have received from Russia or elsewhere, without resorting in any way to the London money market. The particulars are as follows:—
IMPORTS and EXPORTS of GOLD from and to GERMANN in 1872-4.

IMPORTS and EXPO	Imports.	Leeve 3	Exports.		Excess of Exports.	
1872	454,000		8,152,000	*****	7,698,000	
1873	119,000	******	7,262,000	*****	7,143,000

5,024,000 ... 8,368,000 ... ... ... 3,344,000 Adding this 3,000,000l to the above 15,000,000l for Germany, we find that the "continent," principally France and Germany, has absorbed 18,000,000l since the beginning of The history is also very clearly shown in the figures. What Germany received was in the years 1872 and 1873, France and Belgium then losing a part of their stock; but during 1874 the tide was turned, Germany receiving nothing and France getting back what it had previously sent as well as a portion of the new supply. The international movement has really been greater than this, France having directly supplied the German demand to a large extent at first, and having last year received back large sums either directly or via Belgium from Germany. But any surplus which France spared had, of course, to be made good out of the new production before the normal state of things was restored, and the aggregate demand on account of the new German coinage during the last three years may thus be fixed at the above sum of 18,000,000l. Perhaps there will be some surprise at the amount being so small, considering that the German new coinage has altogether been 55,000,000%. But the explanais very simple. Germany in 1871 had already taken away about 8,000,000l from the London market, and there has also been a considerable recoinage, while it has no doubt absorbed smaller amounts from adjacent countries. The fact of the smallness of the extra demand which the German coinage has caused during the last three years is, however, of the utmost significance. Nothing more has been required to produce the stringencies with which we are all familiar.

Deducting the above supply of eighteen millions to the continent from the available surplus of thirty millions, we have 12,000,000l still to deal with. This is all the sum which has really gone on balance in the three years to the non-producing countries, or about 4,000,000l a year. Into the details of the disposal of this sum we do not enter, pending the publication of the annual statement of the Board of Trade and other statistics which we formerly made use of in elucidating this topic. All that need be noticed at present is that "Portugal, Spain, and the Canaries" absorb about half the amount, and that only the remainder has been dispersed about the rest of the world. In other words, the supply has been obviously stinted everywhere, and there can

be no stock in any quarter to be drawn upon.

The present position of the gold question is thus a very simple one. The annual production of all the mining regions

which are worth reckoning is at the outside about 20,000,000%. But in this sum the Bussian production is reckened at about a fourth or fifth, and this does not really come into the general market of the world, being either retained in Russia itself to support the paper circulation, or absorbed in Germany, without fully supplying the extraordinary demand for that quarter. Of the 15,000,000*l* a year, again, which appears to be generally available, the annual supply necessary for England alone is 5,000,000l; for France, on a specie basis, to which it is now returning, it was always more than that, or say 8,000,000l; and at least 5,000,000l was required for the other countries which we coin for. This makes 18,000,000/ a year, and how is the amount to be supplied even without an extra demand for Germany, and without any resumption of specie payments in the United States? At some point or other, we venture to say, the pressure in the money market must again become severe; or one of the great gold-using countries must abandon its standard, or the supply from the mines must be increased; and the chances, we fear, are altogether against the occurrence of either of the two latter alternatives.

I.—ESTIMATED PRODUCTION of GOLD in 1871, 1872, and 1873, in continuation of Table II., p. 956 of Economist, of August 3, 1872.

		Net Imports from Australi into United Kingdom.†		Coinage of Sydney and Melbourne Mints.;		Deposits of Gold at United States Mint.		Production in Russia.*		Total.

### SIR STAFFORD NORTHCOTE AND THE RAILWAY PASSENGER DUTY DEPUTATION.

THE Chancellor of the Exchequer is greatly to be commended, we think, for the firmness and clearness of his replies to the deputation which waited on him on Wednesday on the subject of the railway passenger duty. As we have pointed out from time to time, the powerful railway interest has done its best to raise a great clamour against the duty, and has made the very most of every minor grievance involved in it; the Chancellor of the Exchequer's duty to defend a good tax has thus been rendered as difficult as possible. But this difficult duty is ably and courageously discharged by Sir Stafford Northcote, and he is entitled to the thanks of the public for so doing.

His speech, in reply to the deputation, fully disposes of the chief fallacies which the agitators against the duty indulge The Inland Revenue, in the first place, has not been putting the law into stricter operation than formerly as regards third-class trains. The department has always made the claim; the companies have always been aware of it; and if the department has now pressed the matter more than it used to do, it is only because of the increased importance of the amount in dispute to the revenue. It is impossible, therefore, to charge the department with permitting the matter to remain in abeyance, and then suddenly subjecting suppose was not going to be made.

In the second place, a good reason had arisen for construing strictly the original exemption of third-class trains. "Exemp-"tions," as he pointed out, "are always very inconvenient "adjuncts to any financial arrangements, and lead to confusion and difficulty after a time." In the present case the exemption was granted to facilitate and encourage third-class pa senger trains—trains which it was supposed would not be profitable; but third-class traffic has developed, and has proved to be a source of considerable profit to companies, in fact, in many cases, one of the most paying portions of their business. The reason for the exemption had thus "di-"minished," as he mildly puts it, and he "did not know" that there was the same necessity for continuing the exemption. It is obviously impossible for the companies to answer this argument. However anomalous it may be that they should be asked to pay duty on third-class trains, which are more beneficial to the public than the trains on which they do not pay, the anomaly arises from the fact of there being an exemption of any sort, and we must not give up a good tax because it is not quite symmetrical.

The third point on which the Chancellor of the Exchequer touched was the argument that the passenger duty should be taken off because the horse duty and other taxes on loco-motion had been abolished. We have often explained how different railways are from other forms of locomotion, because they are "monopolies," and how unlikely it is that they are hurt generally by the competition they profess to complain of; but the Chancellor of the Exchequer's account of the matter in detail is most interesting. As regards the horse-duty in particular, he pointed out that the companies were all gainers directly by the abolition of the duty, as they Indirectly, are the employers of a great number of horses. also, the companies had probably gained by its abolition, and by the abolition of the duty on carriages, &c., because people had been encouraged to hire conveyances to and from stations. "I very much doubt," he said, "whether it would be found, "taking the railways generally throughout the country, that "the removal of the tax on other forms of locomotion has "brought about any kind of competition to hurt the rail-" ways nearly as much as increased facilities for travelling " have benefited them."

Having said this much in defence of the duty generally, the Chancellor of the Exchequer had, of course, no difficulty in making a concession in the special case of the Metropolitan and Suburban Railways, which are, in appearance at least, exposed to steamboat, omnibus, and tramway car competition, as other railways are not exposed. This case he admits is one for inquiry, and the matter will be inquired into. But the Chancellor is in no way committed, and whatever he does will not infringe the principle upon which the duty generally is defended.

The speech of the Chancellor of the Exchequer was incidentally valuable for a reference to the coming budget prospects. "We do not think," he said, "there is much "probability of our being this year in a position to repeal such a duty as this." This sentence is quite sufficient to confirm the inference which has been generally drawn from the inelasticity of the revenue during the present year, and the circumstance that considerable portions of the remissions in last year's budget do not take effect until the next financial The Chancellor of the Exchequer virtually tells us already that there will be no surplus to speak of to give away.

### BUSINESS NOTES.

SPECIE PAYMENTS IN AMERICA.—A telegram from New York published yesterday intimates that President Grant has given his approval to the Bill for resuming specie payments which we referred to last week. He has also communicated to Congress a message recommending farther legislation with a view to enable the Treasury to accumulate a sufficient stock of coin for the intended resumption, and to provide for the gradual reduction of the present premium on gold. The examination of the scheme which has now become law may thus become a matter of interest, and it will be all the more

the companies to a demand which they were entitled to | singular a measure, and characteristic of peculiarities in American Government, if it should be found, as the President's message would lead us to infer, that resumption has been ordered for a given date, and the requisite measures to save the Government from having its notes protested on its being done have not been passed. It is most unsafe, however, to base comments in such matters on mere telegraphic summaries, and we need only note at present the fact of a measure to resume specie payments having actually become law in America.

> THE REDUCTION OF JOINT STOCK BANK DIVIDENDS. The chairman of the Union Bank of London, at the shareholders' meeting on Wednesday, fully confirmed the explana-tion which we gave last week of the causes of the somewhat diminished dividend of the London Joint Stock Banks during the past half-year, as compared with the corresponding half-year of 1873. He stated that "the general restriction and contraction of business both in England and on the con-"tinent, and the difficulty of obtaining bills, had been a "matter of common knowledge during the last six months. "It was therefore no matter of surprise that this bank, in common with other London banks, did not show such a "large accumulation of profits as formerly. The directors had "declared the best dividend which they considered prudent; "this was the half-year, and the board had deferred the "consideration of a bonus until the yearly meeting in July, "when the accounts of the entire 12 months would be before "them. The restriction of business was not the only cause which had led to reduced profits; the rate of dis-"count, as fixed by the Bank of England, had con-"tributed to the same result. The practice of all "banks was to follow the rate of discount fixed by the "Bank of England within certain limits, and so long as the "Bank of England rate was in unison with the outside "market, all went well; but when the Bank of England, in "order to protect their reserves of bullion against foreign "drain, and not from any causes connected with home trade, put up the rate to 5 per cent., then this bank, in unison with other banks, paid 4 per cent. for deposits, the result " under such circumstances being that they were practically paying more for deposits than they were able to get for dis counting bills of exchange. For the first half-year of 1874 "the Union Bank paid 112,245l for interest due on deposits "and current accounts. Last half-year they paid 126,000l, or an increase of 14,000l. The bank had been bleeding at " both ends: they had paid larger interest on deposits, and re-"ceived lesser percentages from discounting." No explanation could be more explicit than this, and it tends to show, we think, what we pointed out last week, how keen the banks and all other interest-giving lenders must be to keep up their rates for discount in such circumstances, although they do not succeed perfectly in so doing, and how powerful, therefore, is the maintenance of a high rate by the Bank of England, even when the open market rate is considerably under it. The latter rate continues higher than it would otherwise be, and that is a great deal gained.

THE INCREASED PRODUCTION OF IRON.—An interesting fact has been stated by the Darlington correspondent of the Times with reference to the production of pig iron last year in the North of England. "The Ironmasters' Association returns "for the North of England," he says, "were issued on Satur-" day, from which it appears that there was a larger produc-"tion of pig iron during last year than in any previous year. "The make of pig iron during 1874 reached the large total of " 2,001,233 tons, nearly one-third of the product of the whole " of the United Kingdom. The make during 1873 was slightly " below two millions of tons. The return would have shown " a much larger total for last year had not the furnaces been "starved for long periods during the Durham Colliery strike" and the North Yorkshire ironstone strike." In other words, the capacity of producing iron in the North of England is now such that, notwithstanding serious interruptions and want of full employment at any time, the quantity actually produced last year was larger than it ever had been. The fact is a good illustration of a phrase which occurs frequently in Tooke's History of Prices—an increasing supply outrunning an increasing demand. Nothing is more puzzling sometimes than to explain a depression of trade statistically. In spite of general talk of dulness and trade losses, the figures may

show progress year by year, and how can trade be very dull if this is the case? But the question is really one of relation, and if the supply only outruns the demand, possibly to a very slight extent, a great fall in price and loss of profit must ensue at that moment, although there is a subsequent recovery, and the trade year by year shows a steady augmentation. In the iron trade at present, however, the increased capacity of supply, which is of course effective on price as well as the actual production, appears to be enormous. In the same paragraph, from which we quote the above remark, it is stated: "The total number of blast "furnaces added during the last year was 16, and as each "furnace turns out alone 300 tons of pig iron per week, it "will be at once seen that the foundation is laid for a con-"siderably enlarged production, should a revival of trade "demand it. At present, however, 30 furnaces are out of blast, out of a total of 155; while seven only were out of blast 12 months since, out of a total of 139. Eleven new furnaces are in course of construction." And this is in regard to a portion only of the area of the iron industry throughout the country There can be no room for wonder throughout the country There can be no room for wonder therefore at the great fall in price in the iron trade which the past year has witnessed. The excessive price of former years, as all previous experience taught us to believe, was due to a very small margin of demand outrunning the supply, and the subsequent large increase in the capacity of production may well cause dulness and declining prices, although the demand itself, when a long period is considered, is found to be at or near the former level. The panic in the iron and coal trades two years ago is now shown to have been most unnecessary.

As has so often happened before, the excessive price has worked its own cure, bringing new capital and labour into the trades, and so producing, in conjunction with other causes, the present phenomena of dulness, and a return to nearly the same level of wages as that which prevailed before the recent rise began.

THE COPPER TRADE.—A statistical summary of the position of the copper trade, about which some discussion has been entered into, is published by Messrs James and Shakspeare. More than a month ago we referred to the figures collected by these gentlemen,\* as showing, this year, increased deliveries to consumers as compared with former years. And for the past twelve months the average monthly deliveries of foreign copper are now found to have been 5,472 tons; in 1873, 4,722 tone; in 1872, 3,998 tons; and in 1871, 5,282 tons. The demand has clearly revived in 1874, although it does not follow that the increase has gone into consumption. With this reservation the total apparent consumption of copper is arrived at by a calculation of the variations of production, imports, stocks, and deliveries, and for 1874 amounted to 89,691 tons, 78,079 tons in 1873, 69,291 tons in 1872, and 83,781 tons in 1871. The annual report of Messrs Vivian, Younger, and Bond alludes to this improved statistical summary as explaining the sudden advance of price, which gave rise to fears of unwholesome speculative inflation. Speculation for the rise no doubt existed largely towards the end of last year, as was shown by the immediate fall of price when the money market became difficult, but it rested on signs of reviving demand such as were to be expected in all those trades lately under the influence of depression and conomy of stocks.

THE ARGENTINE TELEGRAMS.—We have received the following communication from Reuter's Telegram Company with reference to the Argentine telegrams, whose correctness we disputed last week :-

TO THE EDITOR OF THE ECONOMIST. SIR,—With reference to the article published in your impression of the 9th inst., headed "The False Argentine Telegrams," I beg to state that with the exception of the one dated Buenos Ayres, 21st Nov., none of the messages cited by you emanated from this office. This Buenos Ayres telegram, intended to be of a reassuring character, can easily be misinterpreted when placed, as in your article, in juxtaposition with alarming reports for which we are not responsible.—I am, Sir, your obedient Servant,

FREDERICK J. GRIFFITES, Secretary.

The following latter is also published in Thursday's Times The following letter is also published in Thursday's Times on the same subject :-

SIR,—Having noticed in a number of the Economist an article on telegrams respecting the revolution in the Argentine Republic, and in which the accuracy of some telegrams furnished to your journal by the

Agencia Americana is called in question, and reflections thrown on the daily papers for not ascertaining the true facts of the case, I at once applied to the European director for information as to the truth of the allegations in the Economist, and I beg to communicate his reply to your paper. "With reference," he writes, "to the article in the Economist, I have to inform you that the Board has already found it necessary to dismiss their agent at Montevideo for having abused the confidence placed in his impartiality, the Board having become convinced that he did not confine himself solely to reporting facts, but that he on several occasions telegraphed as facts what were only reports current at Montevideo. As the company had hitherto had perfect confidence in their agent at Montevideo, it was only after the lapse of some time that they discovered that he was not acting with the strict impartiality which the directors required, but on ascertaining this they at once dismissed him." at once dismissed him.

I may say that, on the whole, the telegrams were substantially correct. This company was the first to communicate the news of the revolt to the London Press, and the directors incurred very heavy expenses with the telegrams from the River Plate. The directors, moreover, had no interest whatever in prepagating false statements. On the contrary, as they were commencing operations in Europe, it was clearly to their advantage to maintain the strict impartiality which has gained for them the confidence of both the Brazilian Press and public. I distinctly refused to permit the telegrams to be delayed. which has gained for them the confidence of both the Brazilian Press and public. I distinctly refused to permit the telegrams to be delayed for Stock-Exchange purposes, and I need scarcely add that I communicated the telegrams to your journal in perfect good faith, as I never doubted for a moment that they were quite correct.

I hope the foregoing explanations will prove sufficient, and remain yours obediently,

Agencia Americana Telegraphica, 22 Lime street,

London, Jan. 13.

We think it will be evident from these explanationsthough they are given rather tardily, as we first called attention to the subject on the 19th ult.—that our criticism has done some good, and that on a future occasion the transmission of similar misleading telegrams from any quarter will be more strictly checked. As regards the share of Reuter's Company in the matter, we think they will perceive on referring back to the newspapers in which the telegrams appeared, that they were inserted in such a way as at least to give some excuse for the the impression that they were "Reuter's Telegrams," although the agency of the "Agencia Americana Telegraphica" was additionally acknowledged. We are glad to have given Reuter's Company an opportunity of explanation, but the effect of it clearly is to increase the responsibility of the newspapers who are responsible for the publication, and against whom, and not the telegraphic agencies, our observations were directed.

## THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Revenue during the nine days ending January 9, as compared with the corresponding ten days of last year :-

	Receipts 9 Days End		Corresponding 10 Days of	
	Jan. 9.		1874.	
Customs	455,000	*****	503,000

exhibits the following changes : -INCREASE. 14,217,480 francs

6,617,202 Treasury account ..... Private deposits ..... Cash ..... Discounts ..... 15,437,184

The diminution in the discounts is about equally divided between the Paris office and the branches. Those entries are, between the Paris office and the branches. Those entries are, however, exceeded in amount by the withdrawals both from the Treasury account and the private deposits, and the circulation has increased by over 14 millions. The reduction in the reserve of specie has almost ceased, and is under two millions

this week.

Money for discounts is less rare on the open market, but without any change in the rates, commercial paper only finding buyers at from 3½ to 3½. Bankers' paper is demanded at 3½, and paper of the haute banque at 3½. Exchange on London is weaker, and bills at sight are 2 centimes lower, at 25f 16c. Long paper is also neglected since the reduction of the Bank of England rate, 25f 23c being now the outside price obtained; short paper varies from 25f 12½ to 17½. Berlin long is quoted 121½, and short 121½, at three months, per 100 marks. The difference of ½ between the long and the short is due to the discount at Berlin being higher than the fixed rate of 4 per cent. allowed for the days matured. The exchange at Berlin on Paris is 81 marks 40 per 100 francs at 8 days. Amsterdam is again demanded, and obtains 211½ short and 211½ long the 100 florins, at three months. Atasterdam on Paris 46 fl 85 short per 100 francs. Brussels firm at ½ premium. Italy at sight 9¾ discount. Italy on Paris 110½. Italy at sight 93 discount. Italy on Paris 1102.

The market for Rente has presented only unimportant variations during the week. Speculative business is dull, but prices are maintained by the cash purchases, those through the receivers-general of taxes having amounted in the week ending yesterday to 647,000f of Rente, or double the amount taken in the preceding week. The reduction of the Bank of England rate to-day has also given additional firmness to the market. The Spanish funds are flat, and have receded from 24 to 23 for the Exterior. Italian also has been less buoyant, but after falling to 66f 25c, has recovered 10 centimes. Turkish have shown more firmness; the Five per Cents. at one moment reached 43f 10c, but although that price has not been maintained, there is an advance of 85 centimes in the week. Ottoman bonds have also improved; the 1869 to 286f, or a gain of 7f 25c, and the 1873 to 267f 50c, or 3f higher in the week. The reaction in Ottoman Bank shares is checked, and they have recovered 3f 75c, at 675f. Egyptian bonds are The market for Rente has presented only unimportant the week. The reaction in Ottoman Bank shares is checked, and they have recovered 3f 75c, at 675f. Egyptian bonds are still rising; the 1870 have gained 10f, at 410f, and the 1873 3f 75c, at 393f 75c. Bank of France shares have improved 30f, and Credit Mobilier have taken a fresh start, rising 16f in the week. Franco-Hollandaise Bank Shares have gained 10f 75c, at 538f 75c. The returns of the great railway companies show a deficit in the 51st week of 1874 of 865,600f, compared with the same week in 1873; but this falling off was due to the traffic being impeded by the snow. With the exception of the Western line, railway shares snow. With the exception of the Western line, railway sh snow. With the exception of the Western line, railway shares have maintained their prices, or have improved; Northern have gained 23f 75c, some demands having been induced by reports that progress has been made in the preliminary steps for the tunnel under the channel. Paris to Mediterranean shares have also gained 8f 75c, nothwithstanding the loss in the receipts of a sum of 400,000f. Suez Canal Shares, after approaching nearly to par, underwent a small reaction, but are still 15f higher than last Thursday. Messageries Shares are 2f 50c better, at 560f. Transatlantic are stationary, at 213f 75c. Subjoined are to-day's prices for the account:

88,402,047f. As the aid from the Bank of France is only to be afforded in the event of the deficit not being made up by the creation of new resources, the Minister announces his plan for raising the income to the level of the expenditure, so that he raising the income to the level of the expenditure, so that he may dispense with the assistance of the Bank. At present, however, it appears more than probable that M. Mathieu Bodet will not be in office to carry out his scheme, and that the Assembly will never have to pronounce on it, unless it should be taken up by his successor. But even should his plan never get beyond the preliminary stage of a projet, it is worth recording, if only as an incident in the financial history of France. The Minister has evidently remarked the reluctance of the Assembly to create new taxes, and the difficulty of overcoming the resistance of the classes whose

interests would suffer from the establishment of any new impost. Therefore, taking warning by the failure of his predecessors, he now proposes to raise a sum of over 93 millions of francs, without the invention of any new tax, but solely by augmentations or revisions of existing taxes, or by the abolition of privileges or exemptions hitherto accorded. If the whole of the Minister's plan were voted, and put in execution from the 1st April, it would produce in the nine months of the present year in round numbers, a sum of 604 millions. tion from the 1st April, it would produce in the nine months of the present year, in round numbers, a sum of 69½ millions, or sufficient to cover the deficit of 64 millions, and leave a surplus of 5½ millions; while in 1876, the 93 millions the augmentations would produce would leave a surplus of 4½ millions instead of a deficit of 88½. In that case the 80 millions of advances to be obtained from the Bank of France would be carried to the credit of the liquidation account (for reconstituting the armament, fortifications, &c., lost or destroyed during the war), and of which the resources will be exhausted from the year 1876.

To describe fully the means by which the Minister proposes to obtain the 93 millions of new revenue, it would be necessary To describe fully the means by which the Minister proposes to obtain the 93 millions of new revenue, it would be necessary to enter into technical details for which space is wanting, and I can only give a brief outline of his system. Indirect taxes or excise duties are to furnish 42½ millions, of which a great part falls on wines and spirits. Hitherto the deficits of the clearings on the entries in the bonding warehouses had not been charged with duty, or had been charged only at the lowest tariffs—that of wines or spirits in the wood. They will in future be charged at the highest rate of duty. The Minister believes that those deficits are caused by irregularities which should be rather visited by a penalty on the bonders than become a source of profit to them. The trade licence is also to be extended to dealers whose only place of business is in the docks, and who had hitherto been exempt. From those two sources a sum of 5 millions of francs is expected. Dealers whose warehouses are bonded had been allowed a reduction of 3 per cent. for waste and family consumption, but they are now to be deprived of that privilege, which had not been accorded to those who pay the duties on receipt of their merchandise, and which is a sort of premium to the dealers who cause the greatest risks to the Treasury, and impose on it the greatest expense for supervision. This reform is to produce a sum of 3,400,000f. The alcoholic strength of wines above which the surtax is levied is to be reduced from 15 degrees to 12; the benefit will be a sum of 6,600,000f. The is to produce a sum of 3,400,000f. The alcoholic strength of wines above which the surtax is levied is to be reduced from 15 degrees to 12; the benefit will be a sum of 6,600,000f. The suppression of the exemption from duty of certain kinds of vinegar, 2,500,000f. A revision of the beer tax; the exercice of distilleries and sugar refineries (manufacture in bond); a monopoly of the manufacture of dynamite—a preparation of nitro-glycerine; and an increased vigilance on the part of the excise officers, by an increase of the staff, are set down at a lump sum of 25 millions, but the report does not give particulars. The next chapter of augmentations is in the registration dues, for a total sum of 24,639,000f. Increased severity in the application of the law, and a retro-active power of taxing property, the value of which has been dissimulated in deeds of sale or exchange, is estimated to yield 4 millions; an extension of the duty on the registration of donations of real property, 1 million; an increase from 20 to 25 times the annual return of lands in estimating their 20 to 25 times the annual return of lands in estimating their value for the payment of the succession dues, 11,164,000f; other revisions of the registration dues on transfers and successions, value for the payment of the succession dues, 11,164,000f; other revisions of the registration dues on transfers and successions, 3,675,000f; application of the tax of three per cent. on interests and dividends of stocks and shares, to the premiums on reimbursement of the lottery prizes, 1 million; a tax of one per cent. on the premiums of life assurances, 1 million; extension of the 10 centimes receipt stamp for sums above 10 francs, to dividends of Rente and the payment of direct taxes, 2 millions. Customs duties are to produce 17,341,485f, of which 2 millions is by the repression of frauds and increased vigilance in the collection; 12,341,485f by the extension of the additional tenths to duties until now exempt, and 3 millions by the abolition of discount on cash payments of duties, and the charging of interests on payments of duties, and the charging of interests on payments of duties in arrear. Direct taxes are to yield an extra 8,660,000f by the addition of ten centimes per franc to the Mobilier tax in the rent of houses and apartments, and to the tax on doors and windows, or 8,310,000f; and by the suppression of the exemption from the 43 centimes per franc additional allowed to certain classes of trade licences. The above are all the augmentations to be applied for the present. The Minister proposes to present a Bill to extend the Foncier tax to waste lands brought under cultivation since the last cadastral survey, but as the produce for the first year would be absorbed by the expenses, he does not comprise it in the resources for 1876; a Bill to extend the direct taxes to Algeria is already before the Council of State, but this law, if voted, would only take effect in 1880. He also announces a reform in the service of pensions, which are increasing in an alarming manner; the civil and military pensions for 1875 amount to 109 millions, which is 25 millions more than in 1870, and a further augmentation is demanded for 1876.

The publishers of twenty-eight Paris financial journals further augmentation is demanded for 1876.

The publishers of twenty-eight Paris financial journals

have appeared before the Tribunal of Correctional Police for infringements of the law of 1863, which prohibits the insertion of any notices or advertisements of foreign lottery loans for which authorisation has not been granted in France. The infraction consisted in the publication of the results of the drawings for prizes of the Ottoman railway bonds. Already in May, 1873, and in January of last year, notices of the illegality of such announcements were issued by the Government, and for a short time these announcements ceased, but as they have been since resumed in defiance of the warning, the Public Prosecutor instituted proceedings against the journals which published them. In principle, lotteries, or drawings with prizes, are prohibited, and in the few cases in which they have been permitted—for Credit Foncier, City of Paris, and Suez Canal bonds—a Bill in the Assembly has been necessary, but in no case has permission been granted for foreign lotteries of the kind. Judgment in this prosecution will be given to-day.

The subscription for 200,000 Credit Foncier bonds opened last week was more than covered. The demands for fully paid-up bonds not liable to reduction were for 158,000.

The price and date of the new city of Paris loan are not yet announced, but some business has already been done in the new bonds at 6f to 7f premium, whatever the rate of issue may be. The bonds of 1865, which are of the same type and interest as those about to be created, are at 481f 25c.

M. Emile Pereire died in Paris a few days back. He was the founder of the Paristo St. Germain railway, the first line of rail-

M. Emile Pereire died in Paris a few days back. He was the founder of the Paris to St. Germain railway, the first line of railway constructed in France. He was also director of the Northern railway during its construction, and with his brother, M. Isaac Pereire, who survives him, created the Southern railway. He also took a leading part in many other great undertakings, including the Credit Mobilier and Société Immobiliere; but the discredit into which these last companies have fallen, and for which he was in a great measure responsible, caused his many other great services to France to be forgotten, and cast a shade on a long career of usefulness. Northern railway during its construction, and with his brother

The following are the latest quotations of the produce markets at Havre per 50 kilos (1 cwt), duty paid:—
COTTON.—The Syndicate of brokers, in revising the price current at the end of last week, raised the United States sorts from one to two francs, leaving the others without change. The present rates are:— New Orleans low middling, 96f; good ordinary, 90f; Georgia, 90f and 85f; Pernambuco, fair, 91f; Sorocaba, 89f; Omrawuttee good fair, 62f; Tinnevelly, 65f; Bengal, 50f. Sales last week, 14,218 bales; importations, 20,240 bales. Stock, 114,050 bales, of which 37,640 from the United States, against 89,800 and 35,090 at same date last year.

## GERMANY AND AUSTRIA.

(FROM OUR OWN CORRESPONDENT.)

VIENNA, Jan. 12, 1874.

VIENNA, Jan. 12, 1874.

Our public is entirely engrossed by the cause celebre of the last crisis, the proceedings against the ex-director of the Lemberg-Cernowitz' Railway, Herr Ofenheim, Ritter of Pont-Euxine. This case is, so to say, a typical representation of the goings on during the great period of speculation, which is being played off before our eyes. The cross-questioning with which the President puzzles the accused, the battle between the accusing and defending parties, spreads itself far beyond the walls of the house of justice. The principal accusations in this case are the following:

In the treaty with the late Mr Brassey in London, which Herr Ofenheim signed in the name of the new railway company, he stipulated that 190,000/ should be paid to Mr Brassey for immediate expenses, almost all of which he addivided with the other five owners of the railway concession. Among them numbers the ex-Minister, Dr Giskra. In the business of expropriation he is supposed to have kept a sum of 12,000/ for himself. In another treaty with the same railway-works undertaker he promises to procure 360,000 railway sleepers, and he is said to have gained 6,834/ by them. The reward for all these and other advantages granted to him by Mr Brassey consisted in a "décharge" given to the builder, without the knowledge of the Council of Administration, and although he knew how defective the construction of the whole railway line was. By this last act he caused the tion, and although he knew how defective the construction of the whole railway line was. By this last act he caused the company a loss of 333,767!. Besides that he is accused of

F. MAY, Chief Cashier.

having put 4,249l into his pocket when he bought the "rolling stock" for the company. Then come four more points, which accuse Ofenheim of having enriched himself at the expense of his company.

The misdeed for which Ofenheim has to be judged brings a punishment of 5 to 16 years' imprisonment with it in the Austrian penal code. From the dimensions which the proceedings have taken, the verdict will probably not be given before the end of the month.

During these last days an association for the Promotion of Economical Legislation (under the name of "Gesellschaft Oesterreichischer Volkswirthe") has constituted itself in this city, and has already been approved of by the Government. A great number of distinguished men from the law, from the administration, from the universities, the press, from commerce and industry, have promised to take part in the association. It is organised after the fashion of the "Congress of German Economists" and the "British Association for the Promotion of Social Science," and intends to analyse questions of importance in economical reform for the benefit of the Austrian Reichsrath, whose economical powers are not great, and besides that to help to spread sound economical principles. The Austrian Legislature has a number of highly-important questions in political economy to decide upon in the course of the next year.

In the German Empire a great change has taken place since the 1st of January. The new mark valuation has been introduced; all business men have had their hands full of work to change their books. Besides that, a great many obligations and shares have been newly printed. The banks have to change their notes, which from 1876 bear their nominal value in marks. The most difficulties caused by the change took place at the post offices, where new stamps were issued. In Frankfort and some other places slight distributed to the place of the places to the post of the places to the places to the places to the places. turbances took place because the time given for changing the stamps had been very short, and the places where this could be done were very few indeed. The Director of the Imperial Post has taken advantage of this occasion to cleanse the German language of the outlandish terms it used in post business, most of which were badly spelt and badly pronounced French, Italian, or Latin words. He has substituted new, entirely German, expressions for them, which of course give rise to a great many mistakes, and are a rich mine of wit to our humorous newspapers.

In Berlin the German Reichstag is again assembled, and has taken up a Bill relating to the Civil Marriage Law. The Bank Commission is occupied with the new Bank Bill, of which I have spoken in my former letter. To complete my statements as to the re-partition of 380 millions of marks of notes not represented by gold, which are to be taxed at 1 per cent., I annex the following list:—

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1865, a deficiency of 3,663,443l; in 1872, an excess of 8,408,088l; in 1873, an excess of 1,327,526l; and in 1874, an excess of 3,639,930l. In 1875, there is a deficiency of 4,324,783l.

In 1865, the Bank rate was reduced \( \frac{1}{3} \) per cent., a too rapid fall being considered unadvisable owing to the demand for money which was still apparent in Paris. All the stock markets continued firm, the chief favour of investors being shown towards foreign Government securities.

In 1872, much foreign money was lying here. A sudden withdrawal for Holland and expected demands for Germany caused the market to become dearer.

In 1873, the prices of public securities were supported by the re-investment of dividends, but speculative sales had been largely pressed, in order both to secure profits already made, and to guard against a shock to trade which numerous failures, strikes, and high prices appeared to foreshadow.

In 1874, the abundance of money continuing, a fresh reduction in the Bank rate was made, but long-dated bills were discounted only at rates \( \frac{1}{2} \) per cent. higher than those charged for two or three months' bills. The Bank rate in Calcutta was 9\( \frac{1}{2} \) per cent. The stock markets were flat. The Egyptian syndicate for the first half of the 1873 loan had

DISCOUNT AND MONEY MARKET .- A fresh fall in the value of money, like what occurred last week, has again taken place. Early in the week the current open market rate had fallen to 33, or 14 under Bank rate, and by Wednesday there was a general expectation of an immediate reduction, at least to  $4\frac{1}{2}$  per cent. On Thursday a reduction to 4 per cent. was announced, and as the scarcity of bills is as great as ever, this has immediately been followed by a farther lowering of the open market terms. This afternoon the current quotation for 3 months' bank bills is only 3\frac{1}{2} per cent., while there are occasional transactions for very short advances on picked bills at a fractionally lower rate, and the rate for money at call on English Government Securities is 3 per cent. It is noticeable, however, that the rates for longdated bills are not falling in proportion to the rates for bills under three months, and the greater abundance of short money is thus an indication of a general belief that values are about the lowest, and that the tendency will very soon again be towards firmness.

In support of the latter opinion it is observed that the reduction which has already occurred has been accompanied by a relapse of the Paris and Brussels Exchanges and a revived demand for gold for export to the continent, which is quite sufficient to absorb most of the bar gold and American coin arriving, the amounts not being large. The Bank reserve is still by no means large, and a very small drain would speedily reproduce the difficulties of last November, when rather serious apprehensions began to be felt about the state of the reserve, and the Bank had the utmost difficulty in forcing the open market rates to follow it. The only incidents of the week favouring the prospect of a low value being maintained for some time are a reduction of its rate by the Bank of Prussia from 6 to 5 percent., and a similar reduction by the Frankfort Bank from 5 to 41 per cent., but this does not alter the fact that the serious competition for the small floating supply of bullion comes from Paris, and that the Bank of Prussia must shortly retrace its steps if the newly-coined gold is not to slip The main features of the situation are still what they were before the rise to 4 per cent. last October, and in view of the scarcity of gold everywhere, and the possibility at any moment of considerable demands, the prudence of keeping a much larger reserve than is now kept must be obvious.

The changes in the Bank return for the week are mainly connected with the payment of the dividends and the subsequent repayments to the Bank, and the usual return of coin and notes from the country at this season. As regards the former, the public deposits show a decrease of 1,120,000%, the private deposits a decrease of 819,000l, and the private securities a decrease of 2,368,000l. As regards the latter, the decrease of the circulation is 331,000*l*, the increase in the bullion is 148,000*l* (of which only 10,000*l* is from abroad), and the consequent increase in the reserve is 479,000%. The proportion of reserve to liabilities has, however, risen from 38 to 45 per cent., in consequence of the diminution of deposits; and this change, though of no material consequence with reference to the peculiar liabilities for which the reserve is kept, has probably influenced the Bank directors in the reduction which has been made.

We subjoin our usual quotations for mercantile paper having various periods to run :-

Bank Rate. Open Market.
Per Cent. Per Cent.

On Monday the Bank of Prussia reduced its rate from 6 to 5 per cent., and from 7 to 6 per cent. for advances.

THE STOCK MARKETS .- The course of business this week has been of a somewhat varied kind. The recent rise has evidently led to considerable realisations, so that the markets generally are not nearly so well supported or so steady as they ere a week ago, although the process of re-investing after the dividends has begun, and the better descriptions of securities continue extremely scarce. The preponderating tendencies are still towards improvement, assisted by the low rates at which money for loans is offered, but there has not been the former result of an almost universal, however moderate, advance, sustained and continued all through the week. At the same time some special circumstances acting on particular markets have assisted a special advance, this feature being especially noticeable in home railways, where the scarcity of stock at the settlement, the somewhat less disappointing traffics than had been expected, and a great increase in the Brighton dividend for the past half-year produced a general rally, to which a fall in Great Western stock has formed almost the only exception. Bank and miscellaneous shares have continued in good demand almost all through the week, and amongst the latter finance companies' shares appear to have generally improved, the circumstances of last year having been specially favourable to the lending companies which have large capital of their own to employ. To-day the unsteadiness of the markets has continued, and they leave off generally rather dull in tone.

ENGLISH GOVERNMENT SECURITIES.—In this department there has been no fresh advance, but a slight decline, owing to the usual disposition to realise immediately after the dividends, so that the fall in the value of money has little effect.

COLONIAL GOVERNMENT SECURITIES .- Mauritius, 1895-6,

have advanced 1; Natal 5 per cent., 1.

FOREIGN GOVERNMENT SECURITIES .- The mixed character of the business going on during the week has been especially shown here, the realisations, however, taking place mainly in what are known as the speculative stocks. Spanish have been especially weak after their recent great advance, and Egyptian, which have lately appeared the most solid market, have also been depressed by realisations, principally, it is stated, on Alexandrian account. Turkish, which hardly shared in the recent advance in consequence of the check given by adverse reports respecting the financial management of the Government since the last loan, have also failed to recover materially, in spite of strong buying from Paris, whence a great deal of the recent buying in almost all the speculative stocks, except Egyptian, has come. It is certainly one of the strongest signs of the financial strength which the French people are now exhibiting that their purchases of foreign stocks should have been so large as they have been lately, without turning the exchange against them to any material extent; but as the buying has been so largely speculative, and that of very doubtful securities, it is not surprising that difficulties should already be experienced by speculators in carrying on the movement for an advance. The continuance of the Ministerial crisis in Paris is also an additional difficulty in their way, and the weakness thus imparted to the Paris market is, of course, reflected in the prices here of those securities which have been bought on Paris account. To-day there have been renewed sales in almost all the speculative securities in this market, and the tone at the close is dull. It has been intimated that a new Brazilian 5 per cent. loan for

5,000,000l will be introduced next week by Messrs Rothschild

at the price of 96.

With regard to the evident difficulties which have arisen in Turkish financial affairs, we are led to believe that in addition to numerous breaches of the spirit of the engagements, which the Turkish Government came under last year as the only possible way out of its embarrassments, it may soon be found to have committed, or seriously intended to commit, a breach of the letter of the same engagements, which would be very serious. There has been a question, in fact, whether the promise made last year, to let the enlarged Ottoman Bank collect the whole revenues of the Empire, and reserve out of them in the first place the amount required for the service of the debt, is to be kept or not. We were extremely doubtful ourselves whether this promise was at any time of much value to the bondholders, because if the Government became embarrassed and had no money for the usual service of the State, it must have broken the engagement to pay the debt interest first; the bank in the last resort could have no power to prevent it. But the Turkish Government, it is to be feared, has displayed the utmost reluctance to bind itself in detail so as even to give the engagement an appearance of being kept. The result is not unlikely to be a very serious outery against it. Those who subscribed to the last loan on the faith of the above specific promises, may justly say they have been grossly deceived. Perhaps they were very foolish to believe the promises at all, but the outcry will be justly raised all the same, and it will be a fresh blow to Turkish credit at the very time the waste of former periods is being renewed, so that the necessity for new loans may shortly again be felt,

ENGLISH RAILWAYS.—The advance here was very decided and general early in the week, consequent on the scarcity of stock at the settlement, the anticipation of rather favourable traffies for most of the lines, and the declaration of the Brighton dividend at 6½ per cent. The South-Eastern dividend at the same rate as last year was also considered not unfavourable. Subsequently, however, the tone in several cases changed, particularly in Great Western, where the week's traffic return showed a large decrease, and there are now the most gloomy anticipations with reference to the half-year's dividend. To-day the flatness in Great Western Stock has

been continued,, only a fractional recovery for the day having occurred, and the market has also been weakened by reports of an accident on the North Western Bailway, which proved to have been exaggerated.

The Metropolitan Railway dividend has also been announced at the rate of 3 per cent. per annum, as compared with 2 per

cent. per annum a year ago.

The Manchester, Sheffield, and Lincolnshire dividend is announced at 8 per cent. per annum, being at the same rate as a year ago, and carrying forward 2,400l, against 1,600l last

The report of the Brighton Company has been issued this ening and shows the gross traffic to have been 916,000l during the half-year, as compared with 876,000l in the corresponding half-year of 1873—an increase of 40,000l. In spite of a slight increase in the train mileage, the expenditure has also fallen in the same period from 422,000l to 410,000l, a decrease of 12,000t, making altogether an addition of 52,000t to the amount available for dividend on ordinary stock. decrease in expenditure is mainly under the head of locomotive power, where the reduction is from 153,000l to 138,000l, or 15,000l. There is also a reduction of 4,000l in the expenditure on permanent way. The net aggregate reduction of expenditure is diminished, however, to 12,000l by an increase in other items.

The following shows the principal changes for the week in the quotations of ordinary stocks, comparing the latest

JOINT STOCK BANKS .- The following have advanced :-Chartered of India, Australia, and China, 1; New Zealand, 1; National of New Zealand, 1; Oriental, 1; Anglo-Austrian, 1; Anglo-Californian, 1; Mercantile of the River Plate, 1. On the other side, Anglo-Egyptian are 1 lower; Anglo-Foreign, 1.

TELEGRAPHS.—There has been a considerable improvement in the value of these shares on the whole. Anglo-American are 1 higher for the week; Newfoundland, 1; Brazilian Submarine,  $\frac{3}{4}$ ; Cuba Preference,  $\frac{1}{4}$ ; West India and Panama,  $\frac{1}{4}$ ; Hooper's Works, 1; India Rubber Works, 1 $\frac{1}{2}$ .

MINES.—In the foreign mining maket, Cape Copper have advanced \( \frac{1}{2} \); Colorado, \( \frac{1}{2} \); New Quebrada, \( \frac{1}{2} \); Richmond, \( \frac{1}{2} \). On the other side, New Zealand Kapanga Golden have fallen 3.

MISCELLANEOUS. - Among bonds, &c., American Investment have advanced 2. Share Investment have fallen 1; Railway Share Trust, 1. Among financial companies' shares, General Credit have advanced 3; Imperial Certificates, 4; Standard, 3. National Discount have fallen \(\frac{1}{4}\); and United Discount, \(\frac{1}{4}\).

Assam Tea are 2 higher; London General Omnibus, 3. The following have fallen:-Nantyglo and Blaina Iron, 2; New Sharlston, 1; Scottish Australian Investment, 15; General Steam, 1; London and Oriental Steam, 1.

BULLION.—The following is taken from the circular of Messrs Pixley and Abell on the transactions in bullion during the week :-

-A sudden fall in the exchanges produced such a demand for Gold.—A sudden fall in the exchanges produced such a demand for gold for the continent that, with the exception of an influx of 40,000/ of sovereigns, the Bank has received none of this week's arrivals. Existing orders are likely, we think, to absorb any amounts that may immediately come to hand. We have received from America 420,000/, from the Cape 5,000/, from the West Indies 26,500/, and from the Brazils 51,000/, being a total of 502,500/ for the week. 20,000/ in sovereigns has been withdrawn from the Bank for transmission to Lisbon.

Silver—Owing to an increased demand and compressing absorbed of

Silver.—Owing to an increased demand and comparative absence of supplies, the market has improved, and some transactions have taken place at 57\(^2\)d per ox., at which rate the bars by the Liguria have been sold. We have received during the week 10,000\(^1\) from New York, 23,600\(^1\) from the West Indies, and 65,000\(^1\) from the Pacific. The Peninsular and Oriental steamer takes 327,750\(^1\) to India, including 300,000\(^1\) on German account.

Maying Pollars—A slightly better demand arose for this coin and

Mexican Dollars.—A slightly better demand arose for this coin, and for those which were ready for shipment yesterday 56\frac{1}{2}d per oz was obtained. The West India steamer has brought 16,000%. The P. and O. steamer takes out 87,960% for China and the Straits. The average price of Mexican dollars for the past year, 1874, was 56\frac{1}{2}d per oz.

Exchange on India for Banks' drafts at 60 days' sight is 18 10\frac{1}{2}d per

Quotations for Bullion.—Gold — Bar gold, 77s 9d per oz std; ditto, fine, 77s 9d per oz std; ditto refineable, 77s 11d per oz std; South American doubleons, 73s 8d per oz; United States gold coin, 76s 3½d per oz. Silver—Bar silver, fine, 4s 9¾d per oz std, last price; ditto,

containing 5 grains gold, 4s 1016d per oz std, ditto; Mexican Dollars,

According to the Gazette return of this evening the movement in the precious metals during the week ended Jan. 12 has been as follows:—Gold — import, 300,080l; export, 117,962l. Silver-import, 368,725l; export, 128,830l. No bullion movements were reported at the Bank to-day.

## NOTICES AND REPORTS.

### STOCKS.

Japanese Government Customs' 1 oan for 1,000,000l.—The half-yearly interest on the above bonds, due on 1st February next, will be paid on that or any succeeding day at the counting-house of Messrs J. Henry Schröder and Co., 145 Leadenhall street, between the hours of 10 and 2 o'clock. The coupons must be left for examination three clear days before applying for payment.

Spanish—New Loan for about 1,100,000l.—A 9 per cent. loan for 27,500,000 pesetas (about 1,100,000l) has been brought out at Amsterdam, through the agency of the Banque de Paris. The issue price is 921 per cent., and the proceeds of the stamp duties are offered as security. The interest is parable quarterly. payable quarterly.

## RAILWAY COMPANIES.

Central Railroad of New Jersey Consolidated Mortgage 7 per Cent. Dollar Bonds.—Messrs Brown, Shipley, and Co. invite applications for 600,000l, in \$1,000 bonds, at the price of 190l applications for 600,000l, in \$1,000 bonds, at the price of 190l per bond, or 95 per cent., redeemable 1st July, 1899. Principal and interest are payable at the company's offices in New York, in United States currency. It is mentioned that the estimated net earnings of the line for 1874 were 866,000l, and after payment of the last quarterly dividend there remained about 234,000l to the credit of profit and loss account. The interest on the bonds is payable quarterly.

Dublin and Drogheda—Dublin and Belfast Junction.—At meetings of the shareholders of both these companies, resolutions were unanimously adopted confirming the arrangements for

were unanimously adopted confirming the arrangements for the amalgamation of the companies entered into a few weeks

the amalgamation of the companies entered into a lew weeks ago by the boards of directors.

London, Brighton, and South Coast.—It is announced that the accounts for the half-year ended 31st December show a balance which will admit of a dividend of 3l 5s per cent. (6½ per cent. per annum), leaving a balance of about 3,500l to be carried forward. This makes 4 per cent. for the year. At this time

last year the dividend was at the rate of 5 per cent, per annum.

Londonderry and Enniskillen.—The report recommends the usual preference dividends, together with 10 per cent. on account of arrears on the C Stock, leaving the arrears on that stock 70 per cent.

London and Greenwich.—At the meeting a dividend at the rate of 11 7s 6d per cent. for the half-year was declared.

Metropolitan.—At the meeting the following Bill before Parliament will be considered:—"A Bill to authorise the Metropolitan Railway Company to construct railways between Addate and Bow, with a branch to the East London Railway, and for other purposes." and for other purposes.

Metropolitan.—A dividend for the past half-year is announced at the rate of 3 per cent. per annum, as compared with 2 per cent. a year ago.

Porto Alegre and New Hamburg (Brazilian) Railway 7 per Cent, Mortgage Debentures.—The directors invite applications for 45,000l, in 7 per cent. debentures, at the price of 97, repayable at par at the end of three years. The issue will rank after the present debenture debt of 90,000l, and, it is stated, will constitute a first charge upon the undertaking, including the 7 per cent. interest guaranteed by the Province of Sao Pedro do Rio Grande do Sul (Brazil), on an outlay of 202,500l. It is mentioned that only 64 miles of the line remains to be completed.

South-Eastern.—The dividend is recommended at the rate of 6½ per cent. per annum, being the same as at this time the last two years. The distribution on the Deferred Stock will be at the rate of 7 per cent. per annum.

### BANKS.

BANKS.

Alliance.—The half-yearly report states that the net profits have amounted to 30,636l, which, with the balance brought forward, represents a total of 44,311l. Out of this it is recommended that 32,000l be paid as a dividend at the rate of 8 per cent. per annum; that 1,783l be placed to the reserve fund; and 10,528l be carried forward. A further sum of 8,216l has been realised from the assets of the old bank, and with this and the above amount the reserve fund will be increased to 180,000l. 180,000l.

Birmingham Joint Stock .- A dividend has been declared at the rate of 20 per cent. per annum, free of income-tax.

Central of London.—An available balance is shown of 10,884l, and a dividend is recommended at the rate of 8 per cent. per annum (the same as at the corresponding period last year), the addition of 3,500*l* to reserve, making it 20,000*l*, and the balance of 3,384*l* (including rebate) to be carried forward.

City Bank.—A dividend is recommended at the rate of 10 per cent. per annum, free of income-tax, carrying forward 3,900l. At the corresponding period last year the dividend was at the same rate, and 10,000l was added to reserve.

Consolidated Bank.-A dividend is recommended at the rate of 10 per cent. per annum, 5,961*l* is carried forward, and the reserve fund is raised to 112,000*l*. At the corresponding period last year a dividend at the same rate was declared, 13,300*l* was added to reserve, and 5,450*l* carried forward.

Consolidated .- At a meeting a dividend at the rate of 10 per cent. per annum was declared, carrying forward 5,961l and adding 5,425l to the reserve fund. After that appropriation, and including interest, the reserve fund stands at 112,000l. The net profits for the six months amounted to 45,594l.

Exchange and Discount (Leeds) .- A dividend is recommended at the rate of 12½ per cent. per annum, free of income tax, for the past half-year. The reserve fund is increased to 35,000l, and 33l is carried forward.

Manchester and County.—Including 4,077l brought forward, there is a sum of 70,092l to be appropriated. Of this, it is proposed to add 15,000l to reserve, thus raised to 345,000l, to pay a dividend at the rate of 15 per cent. per annum, which, with income tax, will absorb 50,062l, and carry forward 5,031l.

North-Western.—The net profits of the year, added to 1,637l brought forward, amount to 41,851l, from which, deducting the dividend paid in July, there remains now available 27,354l, which it is proposed to appropriate as follows:—To dividend

the dividend paid in July, there remains now available 27,354l, which it is proposed to appropriate as follows:—To dividend at the rate of 7 per cent. per annum (free of income-tax), 14,175l; to reserve (thereby increased to 100,000l), 10,000l; and to directors' remuneration, 2,000l; leaving 1,179l.

Nottingham Joint Stock.—The net profits for the year ended 31st December were 12,676l, including 1,932l brought forward. A dividend at the rate of 12 per cent. per annum for the half-year is recommended (making, with the interim dividend at the previous half-year, 84 per cent, for the year), leaving the previous half-year,  $8\frac{1}{2}$  per cent. for the year), leaving 3,275*l* to be added to reserve, which, with the 725*l* premium on shares issued during the year, will stand at 31,000*l*, and 1,302*l* to be carried forward.

Staffordshire Joint Stock.—A dividend has been declared for the half-year ended 31st December at the rate of 10 per cent. per annum, carrying 8,000l to reserve, which now amounts to 60,000l.

[CONTINUED FROM PAGE 70.]

Union of Australia.—The net profit for the half-year amounted to 105,472l. Out of this a dividend of 1l 15s per share has been declared, with a bonus of 5s, being together at the rate of 16 per cent. per annum, leaving 5,472l to be carried forward.

Union of Liverpool.—A dividend is announced at the rate of 10 per cent. per annum, together with a dividend at the same rate on an additional capital of 2l 10s 6d per share, transferred from the reserve surplus fund.

Union of London.—The net profits for the six months, including 21,836l brought forward, were 136,810l, and a dividend has been declared at the rate of 15 per cent. per annum, carrying forward 32,185l. The deposits on the 31st December were 14,122,111l, and the discounts 12,727,579l.

Wilts and Dorset.—The directors have declared a dividend at

Wilts and Dorset.—The directors have declared a dividend at the rate of 24 per cent. for the half-year, making, with the Midsummer dividend of 20 per cent., a distribution for 1874

of 22 per cent.

New Bank of Bombay.—An interim dividend at the rate of 5 per cent. per annum is announced; and 11,500l is carried

ASSURANCE COMPANIES

British and Foreign Marine,—A further dividend of 2s per share and a bonus of 4s per share (both free of income tax) is announced, making 15 per cent. for the year, carrying forward 13,344l.

European Assurance.—The death of the arbitrator. Lord Romilly, has necessitated the postponement of the adjudication of claims against the Phoenix Life Assurance Company; the English Widows' Fund and General Life Assurance Association; the English and Irish Church and University Association; the English and Irish Church and University Assurance Society; the British Provident Life and Fire Assurance Society; and the Waterloo Life, Education, Casualty, and Self Relief Assurance Company.

Lancashire Fire and Life.—A dividend has been declared at the rate of 20 per cent. for the half-year ended Dec. 31, making with the training land and dividend has been declared at the rate of 20 per cent.

making, with that paid in July, a dividend for 1874 of 171 per

London and Provincial Marine,—The usual interest at the rate of 10 per cent. per annum will be paid, free of income tax.

Norwich Union Fire.—At the annual meeting a dividend was declared at the rate of 20l per share, 30l paid. The dividend was accordingly at the rate of 66 per cent. per annum.

Ocean Marine.—At the meeting on 2nd July a dividend will be recommended of 5s per share.

Union Marine.—The directors have agreed to recommend a dividend of 5s per share.

Thames and Mersey Marine.—The usual dividend on account of 2s per share, being at the rate of 10 per cent. per annum, has been declared, free of income tax, for the half-year ended Dec. 31. Dec. 31.

FINANCE, CREDIT. AND DISCOUNT COMPANIES. General Credit and Discount.—The report states that there is left a balance of 211,600l profit. This the directors propose to appropriate as follows:—150,000l to dividend at the rate of 10 per cent. for the year, of which 37,500l was paid in July as interim dividend; 40,000l to reserve; 21,600l 6s 9d to be

carried forward to next account.

National Discount.—A dividend is recommended at the rate of 13 per cent. per annum, free of income tax, against 15 per cent. at the corresponding period of last year.

Standard Discount.—The report shows an available balance of 19,397l, which is to be appropriated as follows:—5,025l to a dividend of 12 research dividend of 12 per cent, per annum, free of income tax, for the past six months; 6,500l in reduction of purchase of business; and 5,439l to be carried forward to next account.

United Discount Corporation.—The directors have resolved to declare an interim dividend of 5 per cent., placing 10,000l to reserve, and carrying forward 1,919l 3s 2d to next account.

MISCELLANEOUS COMPANIES.

African Barter, Limited.—Creditors are requested to send in their claims by 15th April. Anglo-Mexican Mint.—It is notified that the second instal-

ment of 5l per share, being the remaining half of the entire capital, will be returned to the proprietors on the 3rd prox.

Consolidated Land and Investment Corporation, Limited.—
Capital, 100,000l, in 10l shares. The undertaking is formed to purchase freehold, leasehold, and other estates, and to let and resell them; also to make advances on mortgages, and

receive money on deposit or debentures.

Eupion Fuel and Gas, Limited.—Creditors are requested to send in their claims by 27th February.

Fore Street Warehouse.—The available balance for the half-year ended 31st Dec. was 31,869l, out of which it was recommended that 31,500l should be appropaiated to a dividend of 21s per shore free of income tax or at the rate of 15 per cent 21s per share, free of income tax, or at the rate of 15 per cent.

per annum, leaving 369l.

Globe Telegraph and Trust.—Payment of the following interim dividends is announced:—3s per share upon the preference shares, being at the rate of 6 per cent. per annum, and 2s per share upon the ordinary shares, making, with previous

quarterly payments, a dividend at the rate of 5 per cent. per

International Financial Society.—The net available balance for the year 1874 is 51,851l, out of which a dividend is recommended at the rate of 5 per cent. per annum, leaving, after the addition of 10,000l to reserve, 4,351l to be carried forward. During the year further progress has been made in the realisation of the company's investments, and negotiations are pending for more important liquidations.

Jorehaut Tea.—The Company have declared an interim dividend of 10 per cent., against 7 per cent. at the corresponding

period of last year.

London and St. Katherine Docks.—The directors recommend a dividend at the rate of 4 per cent. per annum for the half-year, carrying 16,347l to reserve.

Mauritius Land Credit and Agency.—A meeting is convened

Mauritius Land Credit and Agency.—A meeting is convened for the 26th instant, when a resolution will be proposed in favour of increasing the capital from 250,000l to 500,000l by

the issue of 25,000 new shares of 10l each.

Metropolitan and Provincial Artisans' Dwellings, Limited. Capital, 100,000l, in 5l shares. It is proposed to acquire land, and erect thereon dwellings for the labouring classes. It is mentioned that an estate of about 27 acres has been secured at Beckton, with the view of providing accommodation (stated to be much needed) for those employed in the gasworks and other factories there.

Peel River Land and Mineral.—From the annual report, it appears that the net income amounted to 28,818l, and the amount to credit of the reserve fund is 2,766l. After deducting the interim dividend of 2½ per cent. paid in July, there is a balance of 16,584 for the payment of a second dividend

of  $2\frac{1}{2}$  per cent., making 5 per cent. for the year.

Regent's Canal.—A meeting is called for the 27th inst., to confirm an agreement for the purchase and improvement of the Regent's Canal and Dock, and the connection of the Limehouse Dock and Basin with the existing railway systems.

Welsh Woollen Manufacturing.—A dividend is recommended.

Welsh Woollen Manufacturing.—A dividend is recommended at the rate of 6 per cent. per annum for the half-year, making, with the interim dividend, 6½ per cent. for the year, free of income tax. It is mentioned that the business has progressed, but the production has been impeded by the difficulties which have taken place in fitting up the new mill.

West of England Fire-Clay, Bitumen, and Chymical Company, Limited.—Capital to the amount of 200,000l, in 5l shares, is offered for subscription. The prospectus states that its principal business consists in the adaptation of a new chemical treatment to the various metallic ores of Devon and Cornwall.

MINING COMPANIES

MINING COMPANIES. West Chiverton Mining.—The quarterly meeting showed a balance against the mine of 6,044l. A call of 1l per share

was made.

Colorado Terrible Mining.—The directors have resolved to pay a dividend of 4s per share.

## The Commercial Times.

POST OFFICE ANNOUNCEMENTS.

Notwithstanding the repeated notices issued by this department, a very large number of newspapers, addressed to places abroad, is still put into the post daily bearing postage stemps insufficient in amount for their prepayment, and such newspapers are, in most cases, necessarily detained. Upon a great proportion of these papers, less than a single rate of postage (and, indeed, in many cases only a halfpenny) is prepaid. Others bear stamps equivalent in amount to one rate of postage only, although, being above four ounces in weight, they are liable to two, and, occasionally, to three rates of postage. Newspapers for places abroad are also frequently stopped in consequence of being posted more than eight days after the date of publication. Such newspapers can only be forwarded as book-packets, and prepaid as such. Public attention is again called to this subject, with a view of averting the disappointment occasioned by the non-arrival of newspapers at their destination. Notwithstanding the repeated notices issued by this department,

their destination.

It seems to be but imperfectly understood that there is no legal way of sending a letter, which is not wholly printed, through the post for a postage of a halfpenny, except by means of a post card. A notion appears to prevail that, because a post card, which is open to inspection, may have a letter written upon it, any card whatever, and even any piece of paper, if only it be placed in an open wrapper, may be sent through the post with a letter written upon it for a postage of a halfpenny. It seems necessary, therefore, to explain, for the guidance of the public—1. That the letter rate of postage must be propaid for any communication of the nature of a letter, not wholly printed, whether it be placed in a closed envelope or in an open cover, unless a post card be used for the purpose, or unless the letter be a circular letter, according to the definition of a circular contained in the British Postal Guide. 2. That cards having merely a halfpenny adhesive stamp affixed to them must not bear any communication of the nature of a letter, unless it be wholly printed, or unless it be a circular letter. Large numbers of letters, not being circular letters, are from time to time found in halfpenny wrappers, contrary to the express provisions of the book post; and, as the officers of the department are instructed to surcharge all euch letters with additional postage, it will save not only trouble to the Post Office but annoyance to the public, if care be taken

always to pay letter postage for letters other than circular letters, un-

always to pay letter postage for letters other than circular letters, unless they be written on post cards.

It is observed that the envelopes frequently used for letters and packets sent through the post are unfit for the purpose, causing damage to the correspondence. The public therefore are urgently recommended always to use strong envelopes, which, in case of bulky or very heavy letters, should be made of linen. This caution has become the more necessary since, owing to the late large reduction in the rate of postage, many more bulky and heavy letters and packets are now sent through the post than formerly.

## COMMERCIAL EPITOME.

FRIDAY NIGHT

Short time and low wages are not in every branch charac teristic of trade, although great slackness is reported in the iron and chemical manufactures. It appears, indeed, from the outcry in Manchester and elsewhere against the operation of the new Factory Act, that quite the reverse of a depressed labour market exists in the textile manufacturing districts; employment is limited, not by a reduction of demand for labour, but by the number of hours during which operatives may lawfully work; and wages are stated to be in consequence reduced by 5 per cent in some cases. Strikes being threatened lawfully work; and wages are stated to be in consequence reduced by 5 per cent. in some cases. Strikes being threatened, spinners have found it advantageous to make good the difference rather than risk a temporary stoppage of production. All this looks like anything but depressed manufacturing trade, and the more cheerful reports from the various markets for textile goods tend to something quite like an actual revival. The New York dry goods manufacturers have given up their agreement to work short time with the end of last year; their stocks are stated to be low, raw materials cheap, and wages 30 per cent. lower than the previous highest point; as stocks amongst retailers in America are also believed to be small, prospects there are improving. Wages, in fact, have not yet in all branches of trade completely followed the descent of prices, but where raw material has reached a safe level its of prices, but where raw material has reached a safe level its cheapness places manufacturers in a good position.

Mild weather has continued this week to restrain the demand for grain in the markets and ports, and a further decline has occurred in the value of wheat. Speculation in decline has occurred in the value of wheat. Speculation in cargoes for forward delivery is extremely small, owing to the large supplies due from America within a few months. What is called the chapter of accidents is very little relied on this season to change the apparent abundance into possible scarcity, and although the supplies immediately in view are but moderate, and stocks in granary small, yet the prospect of steady prices with the present temperature are so poor as to repress purchases on all sides. In the meanwhile, shipments are approaching more freely, notwithstanding the dull tendency in wheat, and the consumption of feeding-stuffs is also lessened by the continued absence of frost.

lessened by the continued absence of frost.

The price of cotton has again advanced this week. At Liverpool there has on some days been a large demand, on

others a renewal of sales, but always a large business; cotton to arrive growing again gradually dearer after some inde-cision early in the week. Brazilian cotton has been the subconsiderable transactions, and the London market for East Indian shows firmness with more activity latterly. The continued firmness in the value of the raw material is reflected in the price of yarns and goods at Manchester, but business is reported quieter than last week. Producers, it appears, have taken the precaution to raise their quotations in view of a dearer cotton market, and confidence in the stability. a dearer cotton market, and confidence in the stability of those quotations is not sufficiently firm among purchasers to lead to much business. The Eastern markets remain unprofitable to shippers except for specific orders received. The cotton receipts, which by their smallness have caused prices to rise so strongly this month, are not in all quarters looked upon as likely to continue long on the same reduced scale.

The return to mild weather since the opening of the new year has allowed the consumption of wool to drop off in certain fabrics suitable to the previous severity; little business is reported at Bradford notwithstanding the easy state of the money market, and prices in London are barely firm. The postponement of further colonial wool sales until February 23rd probably has some influence in sustaining prices, but no great confidence exists in anything like a rise on present values until the commencement of a vigorous new-season trade values until the commencement of a vigorous new-season trade in the manufacturing districts. Up to the present the orders secured in the home branch are generally stated to be unsatisfactory, the American demand is subsiding, and exporters are holding off for lower quotations, with occasional success in both the yarn and piece markets. Advices from Australia are rather favourable to a clip equal to last year's, and only in Queensland was the weather dry. The state of American trade in dry goods, which is looked forward to as likely soon to improve, will this year have considerable influence on the quantity of wool shipped to London.

Trade in the iron manufacturing districts remains dull.

Trade in the iron manufacturing districts remains dull. No reduction in the quotations of leading firms took place at the quarterly meetings; but buyers are holding off with a view to obtaining reductions when the price of coal comes down. The departure of severe weather leads to the entertainment of hopes that this will soon be the case, and a fall of as much as 1l per ton is talked of. The tendency meanwhile in manufactured iron is downwards, but pig iron in South Staffordshire is firm, although in other districts unsettled. The wages of ironstone miners and colliers in the North are threatened with a downward. North are threatened with a decrease. In South Wales large sections of the colliers are still on strike, and a general lock-out is contemplated next week, as a means of bringing the

whole district to a common level.

The markets for colonial and imported produce are steady on the whole, the easier rates for money as yet producing little speculative excitement. There is a tendency in the sugar market to fall, but it is generally resisted, and a fair demand has existed for floating cargoes. Plantation Ceylon coffee has been chiefly dealt in, at a recovery from the lowest prices of last week. Ten has been bought for immediate use; large arrivals continue to press upon the market. There is now a fair demand for cocoa. Rice steady without much activity. Saltpetre rather easier. A good business is reported in oils. Tallow quiet. Copper has fallen in value, and remains dull. Straits tin has recovered after considerable depression.

## EXTRACTS FROM TRADE CIRCULARS.

(From the Cotton Circular of the Imperial Ottoman Bank, dated Alexandria, January 2.)—We have again had a quiet week in cotton. The market is weak with prices still in favour of buyers, but there is not sufficient change to make it worth while altering our quotations. During this month we shall have the Greek Christmas and the Arab Bairam holidays. The latter exists from the 16th to the 21st inst., when there will be little or no business, and we may expect smaller arrivals.

(From Messrs Ch. Balme and Co.'s Wool Report, dated January 11.)—Since the opening of the new year there has been a small private inquiry for wool, which, however, has been chiefly confined to special descriptions. The recent severity of the weather has, no doubt, exercised a beneficial influence in stimulating the sale and consumption of several varieties of woollen goods, and the postponement of the February sales until the 23rd of the month, will leave a rather longe terval than usual for dealing with the existing stock of raw material in the hands of the trade. Very little of the new clip has, so far, arrived, and the quantities reported to date amount to 53,298 bales.

amount to 53,298 bales.

(From Messrs A. C. Stewart and Co.'s Cape Wool Circular, dated Port Elizaleth, December 10.)—A brisk business has been done since the date of our last circular, and good parcels of all descriptions have been quitted without any difficulty on arrival. We have had very heavy rains lately, and transport has been impeded by bad roads and bridgeless rivers, so that stocks have been light. We shall, however, probably receive a good quantity before the end of the year. Grease—Full

grown, superior, 8½d to 9d. Fleecewashed—Superior, clean, long stapled, 15½d to 16½d. Snow White—Prime Uitenhage scoured, 24d to 25d; inferiors, 18d to 19d.

(From Messrs Jackson and Till's Monthly Rice Circular, dated January 8.)—Our market has considerably improved since the date of our previous circular, when prices were almost at the lowest point. With a better demand from millers, supported by speculative purchases, prices rapidly rose from 9d to 1s per cwt for old crop cargoes and spot soft grain. During the holidays, as usual, a general cessation of business occurred, but since the opening of the new year transactions have been renewed to a fair extent at fully previous rates. New crop rice for spring shipment has shown no change, some few sales having passed at 9s for Rangoon, open charter, and 8s 6d to 8s 7½d for Necrancie. The first samples of new Askoolie and new table have been received, and appear of an average character; some sales of the former appear of an average character; some sales of the former have been made at 10s per cwt for arrival. A rather better demand for old table on the spot has prevailed, resulting in business at 3d to 6d advance. The quantity now afloat for Europe is 27,509 tons, against 59,455 tons, and the stock here s 48,983 tons, against 45,880 tons last year.

## THE COTTON TRADE.

[Our usual Liverpool report not having arrived at the time of going to press, it is omitted this week.—Ed. Econ.]

LONDON.-JANUARY 14.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

The market opened quietly, but has since become very firm, and closes with a good inquiry both on the spot and for arrival. Quotations show generally an advance of \$\frac{1}{2}\$d per lb.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, Jan. 14.—During the past week our market has been very strong in tone, and a fair business has been transacted at the full rates of last week. At the same time any attempt at a substantial advance at once checks business. In cloth a good fair business has been concluded in most staple makes, but in most cases the prices accepted have been those quoted at the modest point of the market. Yarns for export have moved steadily at old rates, and in the home trade a fair business has been transacted without advance in value. a fair business has been transacted without advance in value.

BEADFOED.—Notwithstanding the reduction in the Bank rate, the market is quieter. Previous rates are maintained with firmness. In the yarn market the steadiness of prices which recently prevailed is hardly maintained. Manufacturers take orders at very unremunerative rates, in order to keep their machinery running. Stocks are not large, and prices are unchanged.

Nottingham.—A slight improvement is perceptible in some branches of the lace trade, but, taken as a whole, business is still by no means active. Orders have been received for cotton goods for home consumption.

BIRMINGHAM.—At the principal quarterly meeting of the ironmasters of South Staffordshire and East Worcestershire, there was a large muster of the trade. As at Wolverhampton on the previous day, the makers of branded iron decided to make no change in the price of finished iron, which remains therefore on the basis of 10l 10s to 11l 12s 6d. The effect was to deter purchasers, and merchants who had come to the meeting with good specifications left without placing them, in the conviction that prices could not be maintained; but makers declare that iron cannot be produced at a profit for less money than they are asking until coal comes down. In some cases ironmasters are fairly off for orders, more especially for sheets, but the majority of the makers, both of branded and unbranded iron, are badly in want of trade. Towards the close of the market unmarked iron was rather easier, but no change was made by leading firms.

LEEDS.—There was only a small attendance of either mer-chants or manufacturers. The weather was very unfavourable for the judging of the new shades which are being brought out for the spring trade. In these there is not much novelty, but checks and plaids will be the leading styles. Wool is very firm in price. Stocks are very low in the cloth halls.

ROCHDALE.—The market has been only a quiet one, but no

worse than is generally looked for at the beginning of the new year. Local merchants are hoping for a reduction in the price of the raw material, and manufacturers will not take any lower prices than those which have been usual for the last six months. Wool keeps very firm in price, but there is little

Dunder.—There has been rather more inquiry for flax on the spot, as some consumers are now requiring to sort their stocks. Advices from the foreign markets continue very firm. The demand for linens continues fair, and manufacturers are generally pretty well supplied with orders. For jute goods the inquiry is still rather weak.

Belfast.—The general condition of the staple trade presents a favourable aspect, and the hopes of improvement indulged in a few weeks back seem to have been realised. On the whole, there is a better feeling throughout the trade, and a larger amount of business in both cloth and yarns has been transacted during the past week. In bleached goods most of the home-trade houses are doing very fairly. Better reports are coming from the continent and the West Indian and South American markets.

Middlessorough.—The quarterly meeting passed off

South American markets.

MIDDLESBOROUGH.—The quarterly meeting passed off quietly. There was little demand for iron, the unsettled aspect of the market lately noticeable being still a leading feature. Rates of pig iron were, if anything, lower than last week. The ironstone mine owners decided to reduce their men, but the amount has not been agreed upon as yet. The ironmasters are also considering the question of reducing blast furnacemen. The returns of makers' stocks show an increase of 29,155 tons for December, which acted rather as a deadweight upon the market. There was not much inquiry for manufactured iron, and the rail trade is still very low, with few inquiries. with few inquiries.

## CORN.

## AMERICAN GRAIN AND FLOUR MARKETS. YORK-December 31

We have had a quiet market for flour the past week, and prices have been barely supported. The local trade, as usual in the holiday season, has been quiet, and shippers have not been able to operate with their customary freedom, owing to the scarcity and higher rates of ocean freights, yet holders have not been inclined to make reductions in prices in order to effect sales. Receipts at the Western markets have fallen off, and the stock here proves to be the smallest in many years, or only about a quarter million barrels. The wheat market has been fairly active, the export demand proving quite steady and more urgent, notwithstanding the higher rates current for ocean freights; and with receipts at the West showing a considerable falling off, holders have been inclined to insist upon more money. Indian corn was, early in the week, considerably depressed by large supplies of new. The feature of the market this week, however, is a speculation in old Western mixed in store, beginning at 95c on Monday, continuing at 96c on Tuesday, and 97c on Wednesday, but closing yesterday quiet, and scarcely so firm. There has been some advance in oats, the result of a speculative movement, which, though not active, develops much strength. Receipts by rail are, however, very fair, and the consumption quite moderate. We have had a quiet market for flour the past week, and rices have been barely supported. The local trade, as usual quite moderate.

## LONDON MARKETS.

## STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The heaviness noticed in the wheat trade last week has further increased from the influence of continual mild weafurther increased from the influence of continual mild weather, and sales have been difficult to effect even at reduced rates. The quantity of English wheat sent forward has not varied much from the preceding week, nor have the foreign imports materially enlarged, but the supplies have proved more than adequate to the present restrictive demand. The English wheat has been for the most part in poor condition, which tended to increase the depression, and a decline of fully 2s per quarter has taken place on the bulk of the transactions. The few really dry samples prime sold without much change. Prime old foreion descriptions, which are relatively scarce, have not been pressed for sale; but new wheats, and more especially the commoner qualities, have given way fully 2s per qr, both for spot parcels and coast cargoes. The quantity of wheat on passage is 1,674,500 qrs, being about the same as at this time last year. From the continent the reports show very little change in From the continent the reports show very little change in values, but at New York freights have declined, and shipments have slightly extended, whilst the quantity of wheat in sight has also rather increased. With heavy stocks and the prolonged dulness, flour has receded 1s per barrel and sack in the principal markets of the United Kingdom, and at this the principal markets of the United Kingdom, and at this decline sales are still upon a very moderate scale. Malting barley meets less inquiry, but sustains its value. Grinding qualities, of which the supplies on passage, although somewhat reduced, still amount to 101 cargoes, against 37 cargoes in the corresponding period last year, have fairly maintained late quotations. The ports of Morocco being open after the lengthened prohibition of exports, beans have been purchased more energially and the market is weaker. open after the lengthened prohibition of exports, beans have been purchased more sparingly, and the market is weaker. Both English and foreign are about 1s per quarter cheaper for parcels here. For arrival there are few buyers, except at a greater reduction. Peas meet a quiet sale at unchanged value. Oats have arrived in moderate quantity only, and have cleared off readily at about 6d per quarter advance on the week. Maize, ex ship, is held for previous rates, but the market is without activity. The quantity on passage is 137,790 quarters, and floating parcels are easier to buy.

## COLONIAL AND FOREIGN PRODUCE MARKETS. TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAT'S MARKETS HER POSTSCRIPT

MINCING LANE, FRIDAY MORNING.

Sugar.—There has been more inquiry for refining qualities, and further cargoes, chiefly foreign, have sold for the United Kingdom. Prices are about the same as last week. The demand for beet sugar Prices are about the same as last week. The demand for beet sugar-has also rather improved, with firmer quotations for delivery. Transactions in West India to yesterday amounted to 1,683 casks, the bulk of that quantity consisting of working descriptions. Crystalised Demerara by auction realised steady rates, from 25s to 26s per cwt for middling to good yellow. A steady business has been done in low brown East India sorts by private contract, and there are buyers of Jaggery on former terms. A cargo of China imported in 1873 was offered by auction yesterday, and chiefly bought in. The stock of sugar in the chief ports of the United Kingdom at the close of last week was estimated at about 164,000 tons, against 196,000 tons last year, and 150,500 in 1872. Deliveries will from this time increase, as the refiners are now at work.

Mayorities—The public sales have comprised 9.510 been the bulk of

Mauritius.—The public sales have comprised 9,819 bags, the bulk of which quantity sold: soft brown, 19s to 21s; grey and yellow, 21s to 23s; soft grainy grey and white, 23s 6d to 25s 6d; crystalised yellow 24s to 25s.

Jaggery. — About 4,500 bags have sold on the spot at 16s 6d; 100 tons to arrive, spring shipment, at 15s 9d.

Penang.—700 ags brown reported at 17s 6d.

Manila.—3,000 bags common clayed at 19s: 3,900 bags Ilo Ilo at 17s; and 800 bags sun dried, in public sale at 20s 6d.

Saigon.-729 bags low soft, pasty brown, withdrawn above the value.

China.—10,798 bags brown were withdrawn above the value, 10 barrels 292 bags China refined part sold; soft yellowish white, 25s to 25s 6d; yellow syrups, 20s 6d to 21s.

Java.—About 12,000 bags syrups, ex last week's sale, have sold at 16s 3d to 16s 6d.

Cargoes.—A small cargo of 2,750 bags Mauritius, No. 15, at 26s 3d; one of 510 tons Java, No. 15, at 26s 3d; one of 4,600 bags Pernams at 22s 3d; one of Bahia at 21s, all for the United Kingdom.

Beet.—2,106 bags by auction chiefly sold; Belgian, 91 to 91.87, 24s 6d to 25s; French 88 per cent. quoted 22s 6d to 22s 7½d per cwt for delivery.

Refined.—The market has been without animation here, but Clyde crushed in steady demand, and contracts have again been made in Say's Paris loaves for early delivery at 30s per cwt.

Molasses.—30 puncheons Demerara reported at 14s per cwt.

Rum.—Several sales have been effected in Demerara at full rates from 2s 1d to 2s 3d for good to fine. Some other West India at 1s 8d for pale quality. 300 casks Mauritius at 1s 6d to 1s 6gd per proof gallon. The demand for Jamaica continues steady.

Cocoa.—The first sales of the year have gone flatly, and 1,623 bags Trinidad only partly sold at about previous rates; the lower qualities from 40s to 46s; and middling to fine at 50s to 86s. 150 bags Grenada were bought in, two lots good selling at 53s to 55s. 1,553 bags Guayaquil part sold at 41s to 44s. 483 bags other Foreign only partly found buyers; Bahia, 45s to 46s 6d; Caracas, 70s per cwt. Some business reported in the lower sorts of Guayaquil by private contract.

Coffee.—There has been a good and general demand for plantation Ceylon at 2s to 3s recovery on the lowest rates of last week, fine colory of the new crop showing the greatest rise. 1,868 casks 135 barrels 780 bags by auction all found buyers: grey and pale, low middling to

bold, 93s to 101s; colory, lew middling to middling, 98s to 102s; good to fine bold, 102s 6d to 110s 6d. 573 bags native found buyers; very good ordinary yellowish, 86s; good beld, 85s; small, 81s 6d. 521 cases 1,525 bags East India of last year's import; rather small to middling colory including Naidoobatum, 96s to 101s 6d; beld up to 104s 6d; superior native Mysore, 90s; beld, 91s 6d to 95s; small in proportion. 570 bags Manila were taken in at 86s to 86s 6d. 48 bags Singapore sold at 75s 6d for low brown. 101 bags African taken in at 73s. 104 barrels 1,037 bags Jamaica went at 80s to 89s for ordinary to fine ordinary. Brazil is unsettled. 2,698 bags Rio were bought in. 1,193 bags other foreign sold as follows: New Granada, 80s to 96s; Guatimala ordinary. Brazil is unsettled. 2,698 bags Rio were bought in. 2,100 bags other foreign sold as follows: New Granada, 80s to 96s; Guatimala and Central American, 77s to 95s; washed Bahia, 88s to 91s. A good business has been done by private contract. Superior quality Rio sold at 91s per cwt.

TEA.—The trade have bought rather largely, having allowed their stocks to run down to a low point, but the quantity in first hands is still remarkably heavy, and further arrivals have taken place. Most grades of congou from about 1 sto 1 s 4d per 1 b have attracted the chief attention of buyers. Fine remain quiet. 11,286 packages by auction to yesterday went at rather uneven prices. Some low black leaf congou was cheap. Moyune green barely up to last week's quotations. Scented teas are without improvement. The quantity of Indian tea by auction has again been large, viz., 7,505 packages to yesterday. The demand was steady, and the bulk of that quantity sold rather under last week's rates. Assam Company's growths met with fair competition.

REG.—A firm market for parcels on the spot and floating cargoes. About 2,900 tons new Burmah have sold for spring shipment at rather under last week's rates, including Rangoon at 8s 9d to 8s 10½d; Necrancie Arracan at 8s 6d. About 700 tons Ballam sold to arrive, at 9s 10½d to 10s; some good white at 12s 6d. 100 tons Madras at 9s 3d ex quay. Transactions on the spot have not exceeded 15,000 bags; Madras at 9s to 10s; white Bengal, 10s 3d: Rangoon, 9s 6d, and Japan 10s 44d per cwt. Japan 10s 41d per cwt.

SAGO.—963 bags part sold at easier rates: small, 17s to 17s 6d; good bold, 17s 6d to 18s per cwt.

SAGO FLOUR.—300 bags Singapore was taken in at 14s 6d

TAPICCA.—328 bags Singapore only partly realised 2½d per lb for

fine quality.
PEARL TAPIOCA

fine quality.

PEARL TAPICCA.—355 bags sold at 21s 6d to 22s for medium, with a few lots very bold of inferior colour at 18s 6d to 19s per cwt.

BLACK PEPPER.—The market has been quiet, and prices of Penang are rather easier. 2,117 bags Singapore only partly found buyers at 6d to 6½d for greyish to good. 235 bags Penang part sold at 5½d to 5½d for low and good quality. 132 bags Tellicherry realised 6½d for greyish Aleppy. Some business was done in Penang for arrival last week at 5½d.

WHITE PEPPER.—At a decline of about \$\frac{1}{2}\text{d}\$ there has been rather more demand. The stock continues large. 1,367 bags Singapore offered yesterday about two-thirds sold from 8\frac{1}{2}\text{d}\$ to 8\frac{1}{2}\text{d}\$ per 1b for common to

yesterday about two-thirds sold from 8\frac{1}{2}d to 8\frac{1}{2}d per 1b for common to superior bold quality.

Other Spice —252 packages nutmegs by auction sold at rather lower rates for shipping sorts, and at the former value for medium to bold. Penang brown small, 2s 8d to 2s 11d; vdry small and shrivelled, 2s 4d to 2s 5d; 78 to 71's, 3s 8d to 3s 9d; 65's, 4s 3d; limed small, 2s 2d to 2s 7d; ditto defective, 1s 3d. Small rough brown Batavia, 103's, at 2s 10d. 56 cases Penang and Singapore mace part found buyers at rather higher rates: middling, 3s 3d to 3s 4d; low to good ordinary (slightly mouldy), at 2s 8d to 3s 1d; chips, 1s 10d to 2s. 56 bales Zanzibar cloves were withdrawn above the value. 5 cases Penang were taken in at 2s 3d per lb. 138 bags coarse cassia bark from Bombay sold at 18s. 325 cases Cochin ginger partly sold at 92s to 97s 6d for fair to good scraped; 82s for ordinary, and 81s for rough. 196 bags East India part sold: low hard Rangoon, 40s; Calcutta, smooth coated, 60s. 83 barrels Jamaica were chiefly bought in. A few lots middling sold at 90s per cwt. 1,422 bags pimento chiefly sold at 3\frac{1}{2}d to 3\frac{1}{2}d per 1b for ordinary to good, being steady rates.

Sattpetre.—During the week about 2,000 bags Bengal have sold at rather lower rates: refraction 6\frac{1}{4} to 4\frac{1}{4}, 21s to 21s 6d; 13 to 12, at 19s 6d per cwt. The market is now quiet.

Cochineal.—The first sales this year were held on Wednesday, but the daward have not inversed. 969 here Tenariffo part sold at easier

19s 6d per cwt. The market is now quiet.

COCHINEAL.—The first sales this year were held on Wednesday, but the demand has not improved. 969 bags Teneriffe part sold at easier rates: silver, 1s 9d to 2s 1d; black at a range of 1s 9d to 2s 1dd. 118 bags Honduras: silvers, 1s 9d to 2s 2d. 239 bags Mexican: silvers, 1s 8d to 1s 9d; black, 1s 10d to 2s 2d per lb.

INDIGO.—Declarations for the sales, which commence on Monday, now amount to 9,750 chests.

now amount to 9,750 chests.

Other Drysaltery Goods.—At the public sales this week 56 bales Bengal safflower were chiefly bought in. A few lots broken sold at 65s. 747 bags Madras were bought in at 24s. 232 cases China galls part sold at 56s. There is a firm market for gambier, with some few sales at 26s 6d ex quay. No change in cutch. Myrabolanes part sold at 9s 3d to 11s per cwt.

Shellac.—518 chests by auction part sold: O C C garnet block at 7l 15s to 8l 17s 6d. Superior native orange sold at 12l to 12l 5s, being 7s 6d to 10s lower. By private contract a parcel of A C garnet sold at 11l 2s 6d per cwt.

Sticklac.—238 boxes Siam part found buyers at 5l 2s 6d to 5l 15s per cwt.

METALS.—The partial improvement in prices of last week has not been maintained, and the leading markets remain quiet, the further reduction upon the Bank rate failing to stimulate speculation. Yesterday Chili copper had fallen to 821 10s to 831 for good ordinary. Last sales of Walaroo were at 931 to 941. Lead can be bought rather under the late highest quotations. Nothing of importance has transpired in spelter. 160 tons Lendon rolled zinc by auction yesterday rather more than half sold, at 281 12s 6d to 281 15s. Scotch pig iron has declined 2s 6d. This morning 74s 6d is the price. Straits tin has fallen about 2l. During the week a good business reported at 94l to 94l 10s; to arrive, 93l. Sales of Australian, 92l to 93l per ton. The official quotations of Staffordshire iron are maintained.

JUIN.—At the public sales the demand was as usual very slow, but nearly half of 12,230 bales sold at and afterwards. The market is steady by private contract with moderate transactions, and about 7,000 bales were reported to yesterday at 11/10s to 17/; slso 4,000 bales to arrive. The quantity of Jute affeat to Dundee continues large.

LINERED.—A good demand for cargoes. Some of Azov off coast have sold at 56s to 56s 3d. For spring shipment, 55s paid. Sales of Calcutta to arrive at 58s 9d to 59s. On the spot, 59s 9d to 60s paid, and for Bombay, 60s 6d to 61s per quarter.

Petroleum On.—Sales of fair extent reported at 9½d, and a shade less with short prompt. Up to 9½d per gallon paid under special conditions, or for favourite brands. Stock, 103,000 barrels.

Spirits Turpentine quiet. American: sales at 26s 6d to 26s 9d. Quotations for next two months, 27s 3d per cwt.

Oils.—Several sales have been effected in clive during the week at firm prices, including Mogadore at 40/10s. The same now held at 41/. Sperm oil is worth 105/, the refiners have advanced their price of bagged oil. Pale Southern whale scarce, and quoted 35/to 36/ per tun. Other kinds quiet. Linseed oil, after receding to 25/10s, afterwards became firmer, holders asking 25/15s. New three months, 26/10s, with a steady market. The same may be said of English brown rape, which is rather dearer, viz., 30/15s on the spot; for delivery in the middle months of the year, 31/; last four, 31/10s to 32/. The market for cocoa-nut is rather better, but no change in quotations from last week. Palm dull. Fine Lagos, 35/. Lard oil scarce, and commands 72/ per tun on the spot.

Tallow.—The supply of Colonial does not increase. Russian is dull

72/ per tun on the spot.

TALLOW.—The supply of Colonial does not increase. Russian is dull and rather lower, viz., new Petersburg 46s 6d to 46s 9d; March, 47s 3d to 47s 6d; old, on the spot, 45s 6d per cwt.

### POSTSCRIPT. FRIDA! EVENING.

Sugan.—Crystalised Demerara met a good demand, at rather higher SUGAR.—Crystalised Demerara met a good demand, at rather higher rates. Several parcels by auction sold at 24s 6d to 26s; fine white, 28s to 28s 6d; yellow in bags, including Berbice, 25s 6d to 27s. Sales of West India to-day 620 casks, for the week 2,503 casks, 258 casks Trinidad concrete were withdrawn at 21s. 1,801 bags Peruvian bought in. 2,003 bags Jaggery, 4,950 bags Manila, and 388 bags native Madras of old import withdrawn. 235 casks grocery Porto Rico sold steadily at 23s 6d to 26s 6d.

Steadily at 23s 6d to 26s 6d.

COFFEE.—418 casks 18 barrels 49 bags plantation Ceylon found steady buyers at fully yesterday's advance. Of 198 bags native, one lot sold realised 94s 6d; the remainder bought in. 133 barrels 319 bags Jamaica sold at 81s to 87s 6d: 875 bags African were chiefly bought in at 74s to 75s. 643 bags Manila part sold at 85s. 1,166 bags Rio were chiefly withdrawn. One lot washed sold at 95s. 206 bags Guatimala realised

drawn. One lot washed sold at 95s. 206 bags Guatimala realised 89s 6d to 95s.

RICE.—160 bags Madras to arrive sold at 9s 3d per cwt ex quay.

SHELLAC.—930 chests went at about yesterday's decline, and about 300 chests sold. A C garnet, 10l 15s; good to fine native orange, 12l 2s 6d to 13l. Fine orange went at 15l per cwt.

DRYSALTERY GOODS.—319 bales Bengal safflower part sold at rather lower rates from 2l 15s to 4l 17s 6d. 121 boxes fair quality cutch

sold at 30s per cwt.

METALS.—Scotch pig iron, 74s to 74s 3d cash. Farther sales of Chiii

METALS.—Scotch pig iron, 74s to 74s 3d cash. Further sales of Unitibars at the previous reduction.

ORS.—About 600 packages cocoa-nut oil by auction to-day were chiefly bought in or withdrawn. A few lots Ceylon sold at 38l per tun.

TALLOW.—Town, 45s. Foreign remains dull. At auction, 1,007 casks Australian barely half sold at about last Friday's rates, range 37s 6d to 44e for low to fine (mutton). 51 casks East India sold at 40s to 42s 9d, 55 casks East India vegetable at 45s 6d to 46s, 42 casks town melted at 42s 3d to 42s 6d per cwf. casks town melted at 42s 3d to 42s 6d per cwt.

## ADDITIONAL NOTICES.

DRY FAULT.—Currants show a slight advance in provincial middle-class fruit; but business is limited to export orders, the trade having no present need to purchase. The deliveries are steadily progressing and arrivals are small. Valencias are entirely neglected, although an attempt to promote business was made by public sales. Sultanas are and arrivals are small. Vatercias are entirely regisered, atthough an attempt to promote business was made by public sales. Sultanas are dull but held firmly, as, though the stock is heavy, it is all held in London, and very few are coming forward. Muscatels are going slowly into consumption, but stock is limited and cannot be replenished, COLONIAL WOOL.—Market firm, with a little inquiry. ENGLISH WOOL.—A steady business, prices unchanged.

FLAX.—Market quiet.

HEMP.—Market steady at the quotations.

Silk.—Market firm, but little doing pending preparations for most week's public sales,

s.—All seeds are held firmly, and prices tend upwards. TOBACCO.—The market for United States tobacco continues very quiet, and the total sales of the week sum up but a trifling total. Manufacturers continue to hold off from purchasing to any great extent, and holders are equally unwilling to enter upon large sales, in the hope of higher prices further on. In substitutes there has only been a small business, owing to the limited stock in the market, and in segar tobacco the supply is much under the demand.

LEATHER.—The supply of fresh leather at Leadenhall on Tuesday was again lessened by the bad weather for drying, but the attended of buyers, partly also occasioned by the very wet weather, was small. There was again an active demand for good English butts about 1815

The transactions fall short of the expectations of the season, but the stocks are limited and prices well supported.

METROPOLITAN CATTLE MARKET.

Monday, Jan. 11.—The total imports of foreign stock into London last week consisted of 3,312 head. In the corresponding week last year we received 3,695; in 1873, 7,659; in 1872, 7,054; in 1871, 2,508; and in 1870, 4,011 head.

A dull trade has pervaded the market to-day. Supplies have not been extensive, but they have been equal to requirements, sales throughout progressing slowly. The receipts of beasts from our own grazing districts have been only moderate. The demand generally has been quiet at about the rates previously current for the best stocks. The primest Scots and crosses have been disposed of at 6s 2d to 6s 4d per 8 lbs. From Norfolk, Suffolk, Essex, and Cambridgeshire we have received about 1,400, from Lincolnshire about 50, from other parts of England about 300, from Sectland 131, and from Ireland 42 head. The foreign side of the market has been more freely supplied with beasts; there have been about 600 Dutch and 120 Spanish. The trade has ruled quiet at the rates previously current. With sheep the market has been only moderately supplied. The trade has remained quiet and without feature at about late prices. For the best Downs and half-breds 6s 6d to 6s 8d per 8 lbs has been paid. Calves have been purchased to a moderate extent at previous quotations. At Deptford there have been 130 French beasts.

## LIVERPOOL MARKETS.

## WOOL.

(FROM OUR OWN CORRESPONDENT.)
JANUARY 14.—A fair amount of business has been done this week in clothing descriptions, as also a little in useful Levant classes, at rather hardening rates. The first series of East India wools will be held hardening rates. The first series of East India wools will be held here from the 19th to 22nd inst., and the quantity to be offered will be about 11,500 bales.

## The Gazette.

## Tuesday, January 12. BANKRUPTS.

Charles Smith, Culmore road, Old Kent road. George Burgess, Ramsgate, bank manager. James Edward Gale, Rock Ferry, Cheshire. Aaron Maunder, Launceston, Cornwall, watchmaker.

Richard Pritt, Preston, corn miller's assistant.
Charles Thompson, West Hartlepcol, grocer.
SCOTCH SEQUESTRATION.

John Watson, Glasgow, plumber.

## THE GAZETTE OF LAST NIGHT. BANKRUPTS.

BANKRUPTS.

### WHITE ZINC PAINT HUBBUCK'S PATENT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper in use than White Lead

Each Cask of Pure White Zinc is stamped-" HUBBUCK'S, LONDON, PATENT."

HUBBUCK'S PALE BOILED OIL

Being much purer than raw linseed oil, is the only boiled oil that can be used for White and delicate coloured Paints. It dries quick and hard, never blisters, and is more durable.

HUBBUCK'S ANTI-OXIDATION COMPOSITION

For Coating Iron and Wood Ships' Bottoms: a preservative against fouling and corr
This composition is ready for immediate use, and obviates the waste of carrying
unmixed Paints, Oils, Driers, &c. It is also applicable to all
the purposes of other Paints.

HUBBUCK'S WHITE LEAD COLOURS OUT

HUBBUCK'S WHITE LEAD, COLOURS, OILS, AND VARNISHES
Are the best and therefore the Cheapest, and are properly packed for Exportation
to all Climates.

THOMAS HUBBUCK AND SON, 24 LIME STREET, LONDON

## BROWN & POLSON'S CORN FLOUR

Has nearly Twenty Years' Pre-eminent Reputation.

Every Genuine Packet bears the Fac-simile Signatures-

Sohit Brown

## WHOLESALE, EXPORT, AND FURNISHING IRONMONGERS.

ESTABLISHED

DEANE'S.

A.D. 1700.

REPORT OF THE DIRECTORS
Submitted to the Shareholders at the Third Ordinary
General Meeting, held at the Terminus Hetel, Cancon
street, E.C., on Friday, the 15th day of January, 1976.
The directors have pleasure in laying before the
Shareholders the blance-sheet of the Company, and
profit and loss account for the six months enoing 31st
December, 1874.
Such accounts show a gross profit of £34.175 18c 4d.

Shareholders the bitane-sheet of the Company, allat profit and loss account for the six months enoing 31st December, 1874

Such accounts show a gross profit of £34,175 18s 4d (including £5,637 19s 10d brought forward from last half-year), which, after paying current expenses, directors' remuneration, allowing for had debts, and deducting £10,338 19s 11d rebate of interest on bills discounted not yet due, leaves an availabe balance of £19,397 7s 9d

The above balance the Directors ree mmend should be appropriated as follows, viz.:—£5,025 in payment of a Dividend at the rate of 12 per cost. per annum, free of income tax, on the paid-up capital of the Company for the six months ending 31st December, 1874, and £8,500 in reduction of purchase of business; and they recommend that, after deducting, according to the Articles of Association, the stipulated percentages to the vendors and the directors, the balance, £5,438 12s 0d, be carried forward to next secount.

In accordance with the Articles of Association, one of the directors, Sir Sills John Gibbons, Bart., retires, but, being eligible, offers binnelf for re-election.

Massirs Cooper Brothers and Co., the Auditors appointed by the shareholders at the last Ordinary General Meeting, retire, but are eligible for re-election, and offer themselves accordingly.—By order of the Board,

BERNARD GILPIN, Secretary.

January 13th, 1875.

January 13th, 1875.

CENTRAL RAILROAD COMPANY OF NEW JERSEY CONSOLIBORDS.

OCOMPANY OF (NEW JERSEY CONSOLIDATED MORTGAGE SEVEN PER CENT. DOLLAR BONDS.

Payable 1869.

Dividends payable quarterly, 1st January, April, Jaly, and October.

Bonds of 1,000 dols each, to bearer or registered.

Mesers BROWN, SHIPLEY, and Co. are prenared to receive SUBSCRIPTIONS for THREE MILLION DOLLARS of the above named BONDS, at the price of 26 per cent. (4s per dollar), or £190 per Bond.

The main line and branches of the Central Railroad of New Jersey were, at the date of the last report, about 282 miles in length. Starting from Jersey City, the main line runs to Phillipsburg (both in the State of New Jersey a distance of about 74 miles. From Phillipsburg the line extends, by lease of the Lehigh and Susquehanna Railroad, up the Lehigh Valley, and across the mountain range into the Wyoming Valley.

The Central Railroad of New Jersey also owns and works more than 20,000 acres of coal lands, securing a constant and increasing business for the road.

In a circular recently issued by the Directors to the sharsholders, the results of the four years' operations ending 31st December, 1973, are thus referred to:—

"It will be observed by examining the printed reports annually made to the stockholders, that in those four years the Company have risen from simple carriers of other people's coal, over a railway of 75 miles long, with an equipment calculated for that distance alone, into the uwners or controllers of 180 miles of main road, with numerous branches, reaching from the seaboard to the finest centres of anthractic coal; the whole fully equipped with the best rolling stock in the most perfect order; and also that they have become the owners of a controlling interest in an immense body of coal lands, fully competent to supply them with transportation for centuries to come, independent of ell other interests."

From the same circular the following particulars of five years' operations are abstracted:—

Receipts. Expenses. Earnings.

dols

dols

4,305,514 2,512,217 1,381,397,681

remained to the credit of profit and 1000 mechanisms.

1,171,000 dols.

Since 1862 the Company have paid dividends of 8 and 10 per co-t. per annum on the common stock (which amounts to 20,000,000 dols), except in 1869, when the net profits were spent on new equipment. The shares sell at over par on the New York Stock Evolunce.

shares sell at over par on the rewards and from Exchange.

The Directors, in order to establish a fund from which to meet the outstanding debt at maturity, to complete the substitution of steel rails for from, to provide additional tracks on parts of the road, new wharves, shops, and equipment, and generally to meet the increasing business of the Company, have executed a Consolidated Mortgage for 25,000,000 dols, secured upon all their roads, whether mais line or branches, terminal stations, station houses, shops, equipment, and appurtenances.

and appurtenances.

The Consolidated Mortgage expressly provides that of the total issue of 25,000,000 dollars Bonds under it, a sufficient amount shall be kept in hand to meet the existing debt of the Company, about 12,000,000 dols. There were sold in New York last autumn 5,000,000 dols. The Bonds now offered are a part of the remaining 8,000,000 dols.

The Bonds are for 1,000 dole each bearing 7 per cent

The Bonds now offered are a part of the remaining 8,000,000 dols.

The Bonds are for 1,000 dols each, bearing 7 per cent. Interest; principal and interest payable in United States currency, at the Company's Office in New York, free of all State and United States taxes. The Bonds mature en the let of July, 1899, and can be made to bearer, or registered in a name, at the option of the owner. The dividends are payable quarterly, on the 1st January, April, July, and October. At the present exchange of about 5.45 dols per £ sterling, 70 dols in currency (the annual interest of each Bond) are equal to £12 16s 10d, which is 62 per cent. on the cost, at £190.

The price at which the Bonds are now offered for subscription is about the equiva'ent of the price at which they are currently dealt in on the New York Stock Exchange.

Whenever the United States resume specie payments the annual income from each 1,000 dol Bond will be about £14 5s 10d (70 dols at 4s 1d), which is equal to 72 per cent. per annum on the cost at £190 per Bond. Applications must be made on the form annexed.

Of the price of £190 per Bond, £10 per Bond is to be paid on application, and the balance of £180 on the 13th of February, when the Bonds will be ready for delivery. Founder's court, Lothbury, January 12th, 1875.

No.—
To Messrs Brown, Shipley, and Co., Founder's court,
Lothbury, E.C.

## L'ECONOMISTE FRANCAIS,

### HEBDOMADAIRE. JOURNAL

REDACTEUR EN CHEF-M. PAUL LEROY-BRAULDEU.

PRINCIPAUX COLLABORATEURS-MM. MICHEL CHEVALIER, WOLOWSKI, ARMAND HUSSON, LEONCE DE LAVERGRE, Membres de (l'Institut), Clement Juglar, Maurice Block, de Malarce, Michel Alcan, etc.

L'ECONOMISTE FRANCAIS, fondé depuis quinze mois, traite toutes les questions économiques et administratives, budgets, impôts, douanes marine, colonies, régime des chemins de fer, questions monétaires, progrès industriels, questions sociales, instruction publique, statistique, etc.

Il reproduit les discussions de la Société d'Economie Politique de Paris et el analyse les travaux de la Société des Ingénieurs Civils, de la Société de Legislation comparée, de la Société d'Encouragement pour l'Industrie Nationale, des Chambres de Commerce et des Chambres Syndicales de l'Industrie Parisienne.

Il contient des correspondances des principaux pays de l'Europe et de l'Amérique.

A la suite de sa partie économique, L'ECONOMISTE FRANCAIS publie une partie commerciale très-étendue et une partie financière.

L'ECONOMISTE FRANCAIS a déjà acquis une situation considérable en France et à l'Etranger. Dans une des dernières et importantes séances de l'Assemblée Nationale, un député bien connu, M. Leurent, citait L'ECONOMISTE FRANCAIS, en l'appelant "un Journal dont tout le monde reconnaît l'autorité et le mérite." (Voir le discours de M. Leurent sur la Dissolution, dans le Journal Officiel du 30 Juillet 1874.)

On s'abonne au bureau de L'ECONOMISTE FRANCAIS, 17, rue du faubourg Montmartre, à Paris; chez Delizy, Davies, and Co., 1 Cecil street, Strand, a Londres, et chez tous les principaux libraires

Prix de l'abonnement: France-40 francs par an, 20 francs pour 6 mois. Pour l'Etranger, le port en plus.

Les abonnements partent du 1er et du 15 de chaque mois.

mission is.

HOLLOWAY'S OINTMENT AND PILLS.—Chest Preservatives.—At all seasons of the year the rate of mortality from diseases of the lungs is very great. Holloway's ointment well rubbed upon the chest, aided by his pils, errests all mischief. These cleaning medicaments exercise a most salutary and restorative influence over the entire contents of the pectoral cavity. Air tubes, nerves, blood vessels, and all other tissues feel their wholesomely protective power, more particularly in their thoroughly purifying betavenous and arterial blood by promoting the free circulation of air. Neither ointment nor pills contain any noxious ingredient whatever, but their baleamic nature nourishes rather than irritates the system, and kindly subdues all untoward symptoms, till all is well once more.
