

# U.S. CANDIDATES MAKE LAST-HOUR APPEALS

## DEATHS RESULT FROM FIGHT OF KLAN IN OHIO

### Four Opponents of K.K.K. Shot From Automobiles in Town of Niles

Governor of State Requested to Send Troops to Keep Order There

Niles, Ohio, Nov. 1.—Three men were shot this afternoon in the third outbreak of the day in the community strife raging about a parade of the Ku Klux Klan scheduled for 2 o'clock. John Mahone, Dominick Terese and Arthur Davis, all members of the Knights of the Flaming Circle, opposed the Klan, were shot from an automobile about half a mile from a city ball park at which several hundred Klansmen had assembled for the parade.

### HEARD OVER TELEPHONE

Youngstown, Ohio, Nov. 1.—Reports here are that two men were killed in Niles this afternoon after an outbreak in which three men were shot. Firing could be heard over the telephone, it was said. The two men killed were said to have been members of the Flaming Circle.

### BALDWIN HAS 410 IN PARTY IN COMMONS

With But Two Seats to Report All Others in House Number 203

London, Nov. 1.—The standing of the parties in the new House of Commons, with two constituencies to be heard from, is: Conservatives, 410; Labor, 152; Liberals, 40; other parties, 11.

### LEADERS' FORTUNES

Although the casualties in the membership of the old parties were heavy, remarkable few prominent men were stricken in the battle.

### MASTERSMAN DEFEATED

Charles Mastersman, former Liberal Minister, who was defeated in the Tisbury Division of Wiltshire, which he had represented in Parliament, in some ways was a junior copy of the traditional Gladstonian from hence, undoubtedly clever, but possessing no personal magnetism.

### SEELY'S FUTURE

Major-General J. E. B. Seely, Liberal member for the Isle of Wight in the last Parliament but defeated by the Conservative, Capt. Peter D. (Continued on page 2)

### STORM CAUSE OF DAMAGE IN FRANCE

Raged Along Western Coast; Telephone Communication With Spain Suspended

Paris, Nov. 1.—Several days of seasonably mild and rainy weather terminated yesterday in a tempest of unusual violence, which did much damage along the Channel and Atlantic coasts. Fishing boats were ordered to remain in port and many coastwise services were suspended.

### TRAIN STRUCK AUTO AND TWO MEN AND WOMAN WERE KILLED

Long Beach, N.Y., Nov. 1.—Three persons were killed and two were probably fatally injured early today when a Long Island Railway train struck an automobile at a crossing near here. After hurling the machine eighty feet, the train jumped the track and tore up fifty feet of rail.

### NEW BRUNSWICK SESSION

St. John, N.B., Nov. 1.—There will be no general election in New Brunswick until after the session of the Legislature, which will be held in the latter part of February or early in March, according to an announcement made by Premier P. J. Veniot.

## EIGHT CANDIDATES FOR PRESIDENCY OF UNITED STATES

With the British general election a matter of history, the next major election on which the interest of the world will centre, will be the presidential contest in the United States next Tuesday. The great volume of newspaper space devoted to them might seem to indicate it, but Coolidge, Davis and La Follette are not the only three candidates for the highest position in the republic. There are five others. Their names have not engaged the attention of prognosticators, authoritative and otherwise, because the only certainty of the contest seems to be that no one of these five will be elected. Their platforms demand such things as abolition of private schools, single tax, confiscation of all liquor and a revolution that would create a soviet form of government.

## MACKENZIE BILL WOULD CUT B.C. RACE SEASON IN HALF

Legislation which would have the effect of cutting British Columbia's racing season in half will be introduced at the forthcoming session of the Legislature by Capt. Ian Mackenzie, Liberal member for Vancouver. The Mackenzie bill will provide that the season at all tracks in the Province must not exceed one week in a year. At present each track is allowed to hold races for two weeks during the year. Capt. Mackenzie's decision to introduce this measure follows a vigorous agitation to curb the present expenditure of large sums of money on race track gambling. Business men generally now believe that this season's racing, extending over ten weeks, seriously interfered with business by turning a large amount of money out of the channels of ordinary trade into the pari-mutuel machine.

Various matters to be brought before the Legislature were discussed at the Liberal caucus when it continued its session here this morning. Leading Vancouver members having returned to the mainland last night for the week-end, to-day's session, it is understood, was devoted chiefly to a discussion of problems affecting outlying districts.

## GIANT CRACKERS DISTURB DYING HOURS OF PATIENT

### One Man Knocked Under Car Wheels as He Dodges Giant Firecracker

Police Powerless in Face of Worst Disorders For Several Years

Bedlam run riot afflicted the city last night as if in challenge to the creation of the special police reserves. Cannonades of firecrackers resounded from the city's heart to its uttermost limits. Gates disappeared in scores. Flag poles acquired all manner of fantastic ornaments. The Halloween Police fizzled out, and roving bands of boys between the ages of ten and twenty paraded city streets bent on mischief.

### HIT BY MOTOR

Skipping out of the way of a giant cracker thrown by boys on Craigflower Road near Pine Street at 9 p.m., Duncan Stewart, 516 Wilson Street, was knocked down by a passing motor car and rendered unconscious. (Continued on page 2)

## FEDERAL CABINET SOON TO CONSIDER FREIGHT RATES

Winnipeg, Nov. 1.—Representations made by Winnipeg citizens and organizations regarding the Crow's Nest freight rate situation will be "carefully considered by the Cabinet" on the Prime Minister's return to Ottawa. This was the statement made by Premier King in a telegram to-day to a local committee which sought an interview with him on his way east and suggested also that a deputation wait on the Cabinet in the capital.

## LIQUOR BOARD MEMBERS GIVEN NEW POSITIONS

Members of the Liquor Control Board, whose resignations were asked by Attorney-General Manson yesterday, have been offered positions on the staff of the liquor administration under Hugh Davidson, the new liquor commissioner. It was made known officially to-day.

### HIT BY MOTOR

Skipping out of the way of a giant cracker thrown by boys on Craigflower Road near Pine Street at 9 p.m., Duncan Stewart, 516 Wilson Street, was knocked down by a passing motor car and rendered unconscious. (Continued on page 2)

## HUGH DAVIDSON STATES COURSE IS QUITE CLEAR

### New Liquor Commissioner of British Columbia Speaks of Duties

Declares Provincial Act Will Be Administered in All Its Details

Vancouver, Nov. 1.—"I am not in the habit of saying what I will do, but I try to go ahead and do what work is set before me. That is about the situation with regard to my new duties as commissioner to administer the Government Liquor Act of the Province. I can say there is no politics in this. My friends know I work hard, and I may add that I usually go home tired. It is my intention to administer the duties imposed on me as commissioner under the Government Liquor Act. That is as far as I can go in a public statement at this time. It is a big job, and I realize it."

### Even With Blackburn Rovers at 1-1; Other Old Country Football Games

London, Nov. 1.—League football games played to-day resulted as follows:

- ENGLISH LEAGUE—FIRST DIVISION: Birmingham 1, Blackburn Rovers 1. Bolton 4, Arsenal 1. Burnley 1, Sheffield 1. Cardiff-Liverpool, postponed. Everton 0, Bury 0. Leeds United 2, West Ham 1. Notts County 2, Manchester 0. Preston 0, Newcastle 1. Sunderland 2, Notts Forest 1. Tottenham 1, Aston Villa 2. West Bromwich 1, Huddersfield 0.
- SECOND DIVISION: Chelsea 1, Hull City 0. Clapton 0, South Shields 0. Coventry City 2, Middlesbrough 2. Crystal Palace 2, Derby 0. Leicester 2, Wolverhampton 0. Manchester U. 2, Fulham 0. Oldham 2, Port Vale 0. The Wednesday 3, Bradford City 3. Southampton 2, Blackpool 1. Stockport 1, Portsmouth 2. Stoke 1, Barnsley 1.
- THIRD DIVISION: Southern Section: Aberdeen 2, Exeter City 1. Bournemouth 1, Northampton 2. (Continued on page 2)

## U.S. Submarine in Pearl Harbor After Day on Coral Reef

Honolulu, Nov. 1.—The United States submarine R-1, which ran aground on a soft coral reef at the entrance to Honolulu Harbor on Thursday night, was refloated and docked at Pearl Harbor last night.

## AGED EMPLOYEES OF CANADA ARE RETIRED

Ottawa, Nov. 1.—With the Calder Act officially ended last night and the resultant retiring of several hundred civil servants, amazing cases of longevity were disclosed. One woman more than ninety had been scrubbing Government floors since Confederation days. New floors had been laid to replace those worn out, but still she remained.

## VOLCANIC EXPLOSION ON SEA BOTTOM IN ORIENTAL AREA REPORTED BY SAILORS

Tokyo, Nov. 1.—A large volcanic explosion occurred on the sea bottom near the Ryusama Islands, between Formosa, and the Loochoo Islands, according to a report published by the Central Meteorological Observatory of Japan.

## STRATAGEMS OLD AND NEW USED AS ELECTION CONTEST IN U.S. DRAWS TO ITS END

### Radio Called to Aid Candidates Whose Names Will Appear on Ballots on Tuesday Next; Majority of Principals in Contest Are East of Mississippi To-day; Coolidge and Davis to Give Radio Speeches Monday Night

New York, Nov. 1.—The great political classic of 1924 in the United States is approaching the day of decision in a shower of sharp words and a fog of rival predictions.

In the final stages it has brought into play all the old familiar stratagems modernized to fit an age of radio, movies and senatorial investigations and laid on a scale to appeal to every remote subdivision of the ever-growing electorate.

### CHARGE OF MURDER LAID IN VANCOUVER

J. O'Grady, Private Detective, to Appear For Preliminary Hearing

Vancouver, Nov. 1.—Following a conference of police officials this morning, a charge of murder was laid against John O'Grady as a result of the death of Mrs. Violet Carr. O'Grady operates a private detective agency and is a member of a member of the city police force.

### NEW POWER LINE BROUGHT IN USE

City Linked up to Jordan River Plant by Two Transmission Lines

The second electric transmission line from Jordan River to Brentwood, by way of Goldstream where it connects with the existing line, will be in service by about noon to-morrow. The necessary adjustments were being made to-day.

### REPUBLICAN FUND LARGEST

The final figures on campaign contributions have not become a matter of record, but to date the Republican total stands far in the lead, approaching \$4,000,000.

### VALERA IS GIVEN ONE-MONTH TERM

Sentenced in Belfast For Attempting to Address Londonderry Meeting

Belfast, Nov. 1.—Eamonn de Valera, the republican leader, was sentenced in the Court of Second Division to-day to one month's imprisonment.

### LOS ANGELES MAN ACCUSED OF KILLING

Los Angeles, Nov. 1.—Peter A. Sarriella, forty, a fruit dealer, was shot and killed here this morning when, according to W. S. Daniels, who is under arrest charged with the slaying, he insisted upon forcing his way into Daniels' home, where the latter was entertaining a party of men and women. Daniels gave himself up after the shooting.

### KILLED ON HIGHWAY

Hamilton, Ont., Nov. 1.—The body of George Sheppard, twenty, was found on the Dundas Highway near Waterford last night. He is believed to have been struck by an automobile as he walked toward the village.

### PNEUMONIC PLAGUE IN LOS ANGELES

Ten Deaths Followed Funeral of Woman; Several Persons in Low State

Los Angeles, Nov. 1.—Among twenty persons stricken here in the past two weeks with a malady tentatively diagnosed as pneumonic plague, the death list was eleven to-day and small hope was held out for the recovery of several of the others.

### Earth Shocks Were Recorded in U.S.

Washington, Nov. 1.—An earthquake of moderate intensity was recorded this morning on the seismograph of Georgetown. To-day it began at 12:02 a.m. and lasted until 1 o'clock, with the maximum between 12:14 and 12:17. The centre was estimated to be 1,300 miles from Washington.

Republican Fund in U.S. is \$3,742,962

Chicago, Nov. 1.—Contributions to the Republican campaign fund made through the National Committee aggregated \$3,742,962 up to yesterday, according to an official report presented to Chairman Borah of the Senate campaign fund investigating committee by William V. Hodges, the Republican National Treasurer.

RADIO DEATH

London, Nov. 1.—Edward Elliott, a carman of Blythe, drove his car under a radio aerial, causing his chin to be crushed and his chest to be pierced by the wire and his fatal radio fatality.

NEW REPARATIONS OFFICIAL IN CHARGE

S. Parker Gilbert Now Agent-General For Payments in Europe

Berlin, Nov. 1.—Owen D. Young yesterday formally turned over the office of Agent-General for Reparation Payments to S. Parker Gilbert, formerly Assistant Secretary of the United States Treasury. Last night Mr. Young gathered around him a formal farewell dinner thirty of the executive members of the Agent-General's organization. To-day he left for London and thence sail for the United States.

As proof of his statement that the Daves plan was operating smoothly and as evidence of his faith in its ultimate success, Mr. Young displayed a brand new ten-mark German bank note, it being No. 2 of the Reichsbank's new issue of gold currency. No. 1 of the present issue is held by Dr. Hjalmar Schacht, president of the Reichsbank and German Currency Commissioner.

Mr. Young's optimism was coupled with evident joy over once again being a free agent after ten months of wrestling with the reparations problem. His contract with German officials was further served to stabilize his reparations plan, with which he has been more actively identified than any of the numerous international experts.

OPTIMISM VOICED

"To the newspapermen, who sought a farewell prediction as to the future development of the reparations issue, Mr. Young's reply was one replete with optimism.

WATCH REPAIRING

Bring your watch to STODARD'S (Opp. David Spencer's) American Wristwatches Cleaned, \$1.00 American Balance Staffs, \$2.50 American Balance Jewels, \$2.50 The above prices are for American watches. J. L. MCKIE GENERAL INTERMEDIARY

Body of Late M.P.P.-elect Will be Laid to Rest Tomorrow

Vancouver, Nov. 1.—The body of John J. McKie, M.P.P.-elect for Grand Forks, one of the victims of the explosion on the Kettle Valley train, arrived in Vancouver at 10:30 this morning.

Arrangements have been made for a funeral service to be held at 2:30 p.m. Sunday in the First Presbyterian Church, corner of Gore and Hastings Streets, under the auspices of Vimy Lodge No. 87 A.F. & A.M.

GIANT CRACKERS DISTURB DYMING HOURS OF PATIENT

(Continued on page 1)

BOY POLICE

The Hallow'een police, ninety-five boys from ten years of age up, made one report during the evening. It was this: "Hallow'een police were being thrown, by whom, and with what object."

Traditional with the season smaller boys made a house to house canvass for apples. If none were forthcoming the youngsters deposited a firecracker in thanks, and ran. Much of the fun was innocent and harmless, but a great deal of active property damage was done.

There are upwards of thirty gates listed missing in one report at police headquarters alone this morning. The list is growing at the rate of about two gates and an ash can per minute.

As usual the boyish pranks at the schools make lots of trouble for the janitors. It was reported from Margaret Jenkins School to-day that a gate had been taken to the top of the school flagpole, tied there, and labelled with a milk sign.

At Quana Street School the winter supply of fuel had been used as a screen for a number of gates, which were carefully concealed within the firwood that had been removed from its regular place, and stacked at the doorway of the school.

NATURALIZATION FEES

Ottawa, Nov. 1 (Canadian Press).—It costs more to become a British subject in Canada than it used to. The fees payable on the issuing of a naturalization certificate have been increased by Order-in-Council. Fees that were \$3 and \$5, on the recommendation of the Secretary of State.

TENDERS

Tenders are invited for transportation of about 12 pupils from Atkins Road, near Island Highway, to Craigflower School and return. Lowest or any tender not necessarily accepted. Replies to be in by noon, November 11, 1924, marked Tender for Transportation.

P. L. RAWLINS, Secretary, Board of School Trustees of Saanich.

PRIVATE BILL NOTICES

Notice is hereby given that an application will be made to the Legislative Assembly of the Province of British Columbia at its next session by the Corporation of the City of Victoria for an Act (No. 1924), providing for the following matters, and giving to the said Corporation and the Municipality thereof the following powers, namely:

- 1. Enabling the Council to exchange tax sale lands for other lands, and providing that all lands received in exchange shall be deemed tax sale lands for all purposes, said powers to be retroactive from January 1, 1923.
2. Enabling the Council by-law:
(a) To impose and collect license fees from any person or persons owning or driving any motor vehicle or vehicles for hire a sum not exceeding \$25.00 for every 6 months for each vehicle having a seating capacity of more than 1 passenger.
(b) To authorize the regulation and inspection of electric and other wiring, and the collection of fees for cost of inspection and to require wiring permits to be obtained and returned by contractors or owners before commencement of wiring installation.
(c) To enable Council to enter into agreements with any person or corporation fixing upon a definite sum as annual assessment of any improvements, same to be subject to approval of electors provided under Section 211 of the "Municipal Act."

NEW SYSTEM OF FAT REDUCTION

Here is a new way for all fat people to reduce. A new way to rid yourself of fat, to get rid of the extra pounds of fat which makes you miserable. Why should you let yourself go, resigning yourself to the fat which makes you miserable? Marmola Prescription Tablets you can become slender again! Thousands of men and women each year regain healthy, slender figures this way. You can take off your excess fat in the most pleasant manner. No need for violent exercises or starvation diets. Just take one small Marmola Prescription Tablet after each meal and before going to bed. In a very short time your fatty flesh will begin to disappear and soon you will become the proud possessor of a slender, shapely figure. You will never be admired as long as you are fat—for fat people are always looked upon as unattractive. Marmola Prescription Tablets will begin to work any more. One of the foremost physicians of his time discovered the Marmola Prescription for fat reduction and he also conceived the idea of putting it up in the convenient tablet form, and the price—only one to your druggist and get a box. Or, if you prefer, send the price—only one to the Marmola Company, General Motors Building, Detroit, Mich., and a box will always be glad that you have used them successfully. (Adv.)

BALDWIN HAS 410 IN PARTY IN COMMONS

(Continued from page 1)

Macdonald, former Canadian barrister of the Inner Temple, has long been restless in the Liberal fold and it is not unlikely that he may turn up in the Conservative ranks.

Miss Margaret Bondfield, Parliamentary Secretary to the Minister of Labor in the Macdonald Government, first woman Minister in the present Government, and labor member of the last House for Northampton, who met defeat Wednesday, can return, if she chooses, to her former position of chief woman officer of the National Union of General Workers, but it is understood she has received tempting offers to lecture in the United States and elsewhere.

Regret is expressed over the disappearance from the House of Mrs. Margaret Wintringham, who was the second woman member of the House ever elected. Mrs. Wintringham impressed Parliament with her capacity for steady attendance and work.

CONSTITUENCY FOR ASQUITH A Conservative evening newspaper submits a suggestion from a correspondent to the effect that the failure of the Conservatives of Paisley to support H. H. Asquith, the Liberal leader, against the candidature, former party should remove the stain by offering the former Liberal Premier the opportunity of returning to Britain, which would be possible for a proud and sensitive man to accept.

Presumably the proposal means that Mrs. Dawson, who should oppose Mr. Asquith's return at the first favorable opportunity for him to offer himself at a by-election.

CHARGE OF MURDER LAID IN VANCOUVER

(Continued from page 1)

Asked if she had drunk out of a small glass she said she had not. With regard to any bichloride of mercury tablets which she had, she said she kept them in her own apartment and had none with her that night. Asked if anybody had a key to her suite, she said that O'Grady sometimes had the key.

MONEY DEALINGS Questioned as to financial dealings with O'Grady, Mrs. Carr mentioned several sums of money which she had given him, amounting to about \$2,000 in all.

Her purse, after her arrival at the hospital, revealed she had only \$7.50 cash in it, after paying for the ambulance. When questioned as to how much she had in her purse on the night she went to O'Grady's she said there should have been about \$300 still there.

A small attache case in which were a dozen bichloride of mercury, which was handed to the driver of the ambulance by O'Grady when Mrs. Carr was taken to the hospital, also was produced at the inquest.

O'GRADY'S TESTIMONY

In a voluntary statement, O'Grady denied it was his glass or that he had seen it in his apartment before that night.

O'Grady told Mrs. Carr's visit to his apartment. He said she did not appear to have been drinking, but complained of pains in her head. She produced three bottles of beer, he said, which she had brought with her, and they had talked as they drank it. It was then he said that Mrs. Carr told him she was going to kill herself. She had asked him for the return of a revolver which she

PHYSICIAN CALLED

He said Mrs. Carr had lain down on the couch, and he believed she had brought the small glass in her handbag. He had seen no money in her purse that night, he said. He admitted the dead woman had at one time given him \$1,000, but said she had returned half of it. He said Mrs. Carr was in the habit of betting heavily on horse races and had advertised for a woman to help her.

Dr. Welch, who attended the woman from the time of her admittance to the hospital until her death, October 30, testified that she had died of poisoning. He said her condition had been very serious throughout her entire illness, but that her mental condition was perfectly clear.

Dr. W. Hunter, who performed the autopsy, said death was due to mercurial poisoning.

HUGH DAVIDSON STATES COURSE IS QUITE CLEAR

(Continued from page 1)

from Victoria to Vancouver, the new commissioner said he had no intention to make any change. He was not "in harness" yet, and it would take him some time to familiarize himself with the details of the position.

FOR GOVERNMENT DECISION

Mr. Davidson said the subject of the glass was a question for the Government to decide. "My duties are altogether administrative," he continued, "and I cannot give out as to the length of time the three former commissioners would carry on."

ELECTION CAMPAIGN IN U.S. DRAWS TO CLOSE

(Continued from page 1)

had to take a back seat from the start and seems likely not to come into its own in the way of national attention until the returns begin to roll in on Tuesday night. Interest in it has been further localized by a number of local candidates.

SENATORS TO BE CHOSEN

The entire membership of the House, thirty-four senators are to be chosen Tuesday—enough to upset the present slender Republican majority. The House will then turn to the Democrats.

NEW YORK, Nov. 1.—While the national election campaign has failed to provide any major issues for the voters, many have witnessed bitter fights on state issues. The following gives a summary of the situation existing in some states on the eve of the election.

INDIANS—THE KU KLUX KLAN IS THE DOMINANT NOTE IN POPULAR DISCUSSION

of state issues. The Republican candidate, former Governor, and barred as a candidate by impeachment, conducted a speaking campaign for his wife after the State Supreme Court had held she was eligible for office.

INQUEST TO-DAY INTO EXPLOSION IN RAILWAY CAR

Inquest on Deaths of Veregin, McKie and Others Continued at Grand Forks

Reported Hindu Was Seen in Nelson Carrying Grip With Great Care

Nelson, B.C., Nov. 1.—A Hindu seen handling a grip very gingerly when heaving the 'Crow's Nest' steamer boat here Tuesday night, the night before the explosion in the Kettle Valley Railway car near Parkton, which resulted in nine deaths, has started talk of another explanation for the tragedy than the suggested infernal machine. Woodmen and miners from time to time are known to convey explosives in this fashion. The Hindu in the hospital here had two clocks in a grip, they claim, and was handling it carefully. The supposed dead Hindu at Grand Forks, however, might fill this description.

C. B. Hamilton, K.C. of Nelson, local C.P.R. counsel, has gone to Grand Forks to attend the inquest there to-day.

The alarm clock believed to have formed part of the bomb which killed nine, including Peter Veregin and J. L. McKie, M.P.P.-elect, in an explosion on Wednesday on the Coast-Kootenay train, was a home-made manufacture, according to information from the provincial police.

It was reported that at one of the stations before Parkton was reached two suspicious characters were noticed by passengers walking along the platform looking into the windows of the various coaches. One of the men was said to have boarded the train.

The bodies of three victims of the explosion will be buried in Vancouver. These are the remains of John McKie, W. J. Armstrong and H. K. Fawcett.

FAIR DECISION ON FREIGHT RATES IS PREMIER'S PROMISE

Government Will Not Overrule Will of the People Declares King

Says Commission Plan Best Way of Handling so Vast a Problem

Medicine Hat, Alta., Nov. 1.—Premier King, speaking here last night, referred to the 'Crow's Nest' freight rates. He said that in his opinion the only way to make the rates fair to all throughout so vast a country as Canada was through the agency of a tribunal, but he did not for one moment believe the Government would overrule the will of the people with regard to them, even though a decision of that tribunal was involved. He asserted that those present raved out for everybody affected by the agreement, but as he was a member of the Cabinet, it would be improper to make any statement of anything that had transpired in that council or in the House of Commons. However, his hearers could rest assured the Government would be fair to its people.

NO JAPANESE COLONY NEAR MEXICAN LINE Lower California Governor Says None Will be Started Near Mexicali Mexicali, Nov. 1.—Colonization of Lower California, Mexico, by Japanese or any other foreigners is declared impossible under the existing laws of Mexico in a bulletin made public here to-day by Governor Abelardo Rodriguez of the Northern District of Lower California. The bulletin, which devotes the greater portion of its space to a denial of recent reports of a contemplated Japanese colonization in Lower California, quotes the Secretary of Exterior Relations at Mexico City to the effect that the Mexican Federal law prevents the colonization of foreigners either near the sea coast or the international boundary line. Though not stated in the bulletin, it was announced that the distance which a colony must locate

### SUCCESSFUL DANCE HELD AT SIDNEY

Special to The Times  
Sidney, Nov. 1.—The Council of the Board of Trade will hold a special meeting in Wesley Hall on Tuesday evening at 8 o'clock.

A most enjoyable and successful dance was given in Berquist Hall by the Sidney Social Club on Thursday evening. The hall was very prettily decorated with Hallowe'en colors and black cats. A ghost stood by the fireplace. About seventy people were present. Mr. McKay acted as floor manager. Music was supplied by Wilson's orchestra, which was exceptionally good. This is a new orchestra organized by four young people in Sidney, three of them still being at school. They are highly to be congratulated on their venture. Ted Wilson and Walter Lind play the violin, Raymond Brethour the drums, and Adeline Crossley the piano. Supper was in charge of Mrs. A. Critchley, assisted by Mrs. McKay and Mr. and Mrs. Lidgate. The supper tables were decorated with yellow dahlias.

### BOARD DISCUSSES MANY SUBJECTS

Duncan, Oct. 31.—The regular meeting of the Council of the Board of Trade was held on Wednesday evening, the President, Dr. D. E. Kerr, in the chair. Those present were Messrs. C. Wallich, Joseph Rade, H. R. Gray, T. Pitt, O. T. Smythe, W. McCuish, E. W. Neel, A. H. Peterson, S. R. Kirkham, W. C. Tanner, H. F. Trevoist and Hugh Savage.

The President reported that the resolution passed at the last meeting as to the annexing of a road along the river had been withheld, owing to the fact that a great deal of feeling had been aroused in regard to it. Mr. Copeman accordingly spoke at some length drawing special attention to the inference compliance with such a resolution would mean, with the private rights of riparian owners, and consequent depreciation of property, and fully explained the position.

Later on, at the meeting, it having been resolved that the matter should be re-opened, O. T. Smythe, the mover of the original resolution, replied to Mr. Copeman's remarks, and moved an amended resolution, which however was not seconded. The resolution was spoken to by Messrs. Rade, Neel, Prevost, Kirkham, Wallich and Savage, and it was ultimately decided that the whole matter should be left on the table indefinitely.

The President reported that he had invited the Knights of Pythias to hold their convention in Duncan next year and his action was approved.

### MANAIMO NEWS

Special to The Times  
Manaimo, B.C., Oct. 31.—The members of the M.R. Club held a most successful Hallowe'en Party in the St. John Ambulance Hall Thursday evening. The hall was tastefully decorated for the occasion. About one hundred and thirty couples were present and made the affair a success. During the course

### RESULTS OF POLLING IN CONSTITUENCIES IN BRITISH ELECTION

London, Nov. 1.—Results of the polling in constituencies in the British general election were:

**HYDRO-ELECTRIC**  
W. C. Tanner reported his interview with the North Cowichan District Council on the subject of the hydro-electric installation, the result of which has already appeared in the Press. He thought the matter one deserving the fullest consideration and Alderman Smythe, speaking for the City Council, stated that the Council had just engaged the services of an expert, who would investigate and advise the Council at an early date, and the President assured the members of the Council that the Board of Trade was entirely with them in any action which would benefit the District, and would co-operate in their endeavours.

The President reported a visit to Victoria, with other members of the Council, and an interview with the Chamber of Commerce, when the delegates' report of their tour through the Island was discussed. It had been arranged that the meetings of representatives of the Associated Boards of Vancouver Island, should be held in Duncan on Nov. 5.

It was resolved that Messrs. Kirkham and McCuish should make all necessary arrangements for the visit. The President expressed the hope that the Board would make it convenient to attend.

A cheque for fifty dollars was signed, the Board's promised donation to the prize fund for district exhibits at the Fall Fair.

**NATURALISTS' CLUB OF COWICHAN HELD MEETING**  
Special to The Times  
Duncan, B.C., Oct. 29.—About forty people attended the meeting which was held on Thursday evening to commence the session of the Cowichan Field Naturalists' Club. A report of the season's work was given and specimens of shells were shown by Mrs. Geo. Henderson and Mr. Collard, butterflies and moths by Mr. A. W. Hinchman and Mr. G. C. Day and botanical specimens by Miss Wright and Mrs. Leather. Two of those shown by Mrs. Leather are new to the district.

Archdeacon H. A. Collison gave a most interesting lecture on "The Northern Indian in his native environment," dealing chiefly with the Indian as a hunter twenty or thirty years ago.

Delicious refreshments were served under the direction of Mrs. Dawson-Thomas.

UP TO US

SOME PEOPLE SEEM TO imagine that a magic wand will produce a crop of factory chimneys over night.

The public has it in its power to hurry the day of greater industrial prosperity in Victoria by doing a little bit of stocktaking on its own account and governing itself by the lesson it should teach.

When all this has been faithfully carried out it should be possible for the people to look forward to a better administration of the law than has been the case hitherto.

The Government should pat itself on the back at the prospect of getting rid of a heavy load. It is necessary, however, for the people to realize that theirs is now and always has been the prime obligation.

Neither free nor "controlled" Commissioner or board can be a success unless there shall be a sentiment abroad which is at least sympathetic with the task which has to be performed.

There is too much tendency to see how things can be not done and altogether too little determination to reverse the order. It is not to say that this condition is peculiar to Victoria; but it is a fact that a good deal of the remedy for a complaint about which one is hearing a good deal these days lies very near at hand and could be applied with excellent effect with comparative ease.

It is not necessary to go far to find examples of a profitable application of this principle. Three years ago a few businessmen in the city of Kamloops conceived the idea that a surplus tomato crop could be utilized to advantage if it could be canned.

Business for the first year was modest in volume but economically profitable. Twelve months afterwards more acreage was brought under cultivation and there was a handsome profit at the end of the season.

Here comes the interesting feature of this rapid expansion. Only about half the orders could be filled, in spite of the fact that the capacity of the plant had been doubled early this year, because the Kamloops product had so firmly established itself in the wholesale market of the Province in three short years that the demand for what is known as the semi-ripe tomato took too much of the crop which would otherwise have gone to satisfy orders for the preserved commodity.

Just what Mr. Coolidge means by his proposal to subject the Republican doctrine to a liberalization process is not apparent at this distance. We take it that he proposes to marry some of the Democratic tenets to the less compromising outlook of the Party now in office.

THE NEW POLICY

TIME ALONE WILL REVEAL the effect of the change which the Government has made in the Department of the public service which is responsible for the administration of the liquor law of the Province.

Now that the Government has announced a new policy, however, it must adopt a new attitude to the liquor question. It must get as far

away from the business as it can get. If it is satisfied that the new Commissioner is the right man for the job, it must give him an absolute free hand. Lack of complete power by the Board which has just received its marching orders has undoubtedly been responsible for many of the difficulties with which the Attorney-General has been wrestling with commendable resolution. It was handicapped from the first; it never had a chance. There should be no repetition of the old order.

Let it also be clearly understood that the general public will frown upon anything short of a complete divorce of the liquor business as such from that of governing the Province. A free hand for the new Commissioner also means that he should direct the purchase as well as the sale of supplies.

When all this has been faithfully carried out it should be possible for the people to look forward to a better administration of the law than has been the case hitherto. The Government should pat itself on the back at the prospect of getting rid of a heavy load. It is necessary, however, for the people to realize that theirs is now and always has been the prime obligation.

Neither free nor "controlled" Commissioner or board can be a success unless there shall be a sentiment abroad which is at least sympathetic with the task which has to be performed.

There is too much tendency to see how things can be not done and altogether too little determination to reverse the order. It is not to say that this condition is peculiar to Victoria; but it is a fact that a good deal of the remedy for a complaint about which one is hearing a good deal these days lies very near at hand and could be applied with excellent effect with comparative ease.

It is not necessary to go far to find examples of a profitable application of this principle. Three years ago a few businessmen in the city of Kamloops conceived the idea that a surplus tomato crop could be utilized to advantage if it could be canned.

Business for the first year was modest in volume but economically profitable. Twelve months afterwards more acreage was brought under cultivation and there was a handsome profit at the end of the season.

Here comes the interesting feature of this rapid expansion. Only about half the orders could be filled, in spite of the fact that the capacity of the plant had been doubled early this year, because the Kamloops product had so firmly established itself in the wholesale market of the Province in three short years that the demand for what is known as the semi-ripe tomato took too much of the crop which would otherwise have gone to satisfy orders for the preserved commodity.

Just what Mr. Coolidge means by his proposal to subject the Republican doctrine to a liberalization process is not apparent at this distance. We take it that he proposes to marry some of the Democratic tenets to the less compromising outlook of the Party now in office.

In this regard the people of the United States and beyond American borders would wait and see what effect the President's endorsement by the people would have upon this seemingly magnanimous gesture towards his major political opponents before appraising its value.

Mr. Coolidge is still opposed to any suggestion that his country should give up much of its aloofness to matters of foreign concern. Such pleasant smiles as he has bestowed upon a World Court were not calculated to offend even the most susceptible of his supporters.

Mr. Coolidge is still opposed to any suggestion that his country should give up much of its aloofness to matters of foreign concern. Such pleasant smiles as he has bestowed upon a World Court were not calculated to offend even the most susceptible of his supporters.

Now that the Government has announced a new policy, however, it must adopt a new attitude to the liquor question. It must get as far

from the political point of view; and the developments of the last twelve months in the international field have undoubtedly worn down some of the rough edges which the Wilsonian ideal raised in Republican camps. None the less Mr. Coolidge has the advantage.

That advantage, strangely enough, may have been increased by the entrance of the picturesque and breezy gentleman from Wisconsin. Senator La Follette is the radical contrast to the safety of Coolidge. At another time it might have done serious damage to the Republican fortunes; but third parties are not being regarded as anything approaching a blessing these days; the lesson of Britain is not a good omen for the Senator.

At the same time it is quite possible that he will attract sufficient support to render the election by the College impossible. He has invaded the ranks of both parties. Meanwhile our neighbors are getting ready to have a sigh of relief from the surfeit of politics which they have suffered for several months.

Mr. Baldwin will soon find out that stability is not a synonym for tranquility.

"How I Won, or Back in the Fold," by Winston Spencer Churchill will no doubt be one of the forthcoming political novels.

The whole of the Liberal contingent in the British House of Commons could ride down to Westminster in the Lake Hill bus if they did not object to a little crowding.

WORDS OF WISE MEN: If you are your own master, what kind of servant do you own? To a philosopher, no circumstance, however, trifling, is too minute.

For the sake of gaining to-day, do not throw away to-morrow for ever.

How many good but mistaken friends love to tell us what martyrs they are! They are the cause, not the effect of freedom.

Don't grumble at the things you can't help. There is no need to grumble at the others.

Live in the present so that you will be ready for the future.

Other People's Views: Letters addressed to the Editor and intended for publication must be clearly and legibly written.

A WORTHY OBJECT: To the Editor—In view of the fact that Armistice Day is again approaching, I think it is important to direct the attention of the citizens of Victoria and adjoining districts to the work of the Armistice Period Committee.

INDIVIDUALS WITH BETTING propensities would put their money on Coolidge if they were certain that the La Follette vote would not prevent the President from getting 266 out of the 531 votes which the Electoral College distributes to the state representatives.

Next Tuesday: Mr. Coolidge is still opposed to any suggestion that his country should give up much of its aloofness to matters of foreign concern.

DR. FRANK CRANE

ON

"On Going to School"

RECENTLY several million children started to school.

This imposing event in our national history took place without any advertising or blowing of horns. It is the most significant thing that has happened of recent date.

It has more influence upon the future than anything that is taking place just now in politics. These children now going to school will be running affairs in business and in statehood in the future years.

There are thousands of people throughout the South who do not go to school at all and thousands in our great cities who attend part time. Our school facilities are inadequate and the whole business has not received enough public attention to secure a better quality of teachers.

The country is not yet awakened to the importance of the school teacher. We are accustomed to saying that the public school is the most vital thing in our possession and to brag a good deal about Americans all having the opportunity to attend. But the question has never yet been taken seriously enough.

Education is the principal business of a nation. A Minister of Education should have his seat in the cabinet and we should recognize the training of the young as our most important business.

That generation needs to go to school. There is no greater crime that can be committed against a boy or a girl than to deprive such a one of proper training for the time is rapidly coming when the untrained man will be crowded out of the earth.

Education is the principal business of a nation. A Minister of Education should have his seat in the cabinet and we should recognize the training of the young as our most important business.

Who's Who in History To-day: CHARLES II King of Spain, died on Nov. 1, 1700. He was the last of the Hapsburg line in Spain, and his death was followed by the War of the Spanish Succession.

WILLIAM M. CHASE American painter of portraits, still life, and landscapes, was born on Nov. 1, 1849. After achieving success as a portrait-painter, he went to Germany, where he renewed his studies for six years. He received many honors at home and abroad.

ALEXANDER III Emperor of Russia, died on Nov. 1, 1894. He continued the reactionary policy of his father, Alexander II. A famine occurred throughout Russia during his reign.

The WEATHER: Daily Bulletin Prepared by the Victoria Meteorological Department.

Victoria, Nov. 1.—5 a.m.—The barometer is falling on the coast and unsettled weather is becoming general over the Province. The temperatures continue to fall in the prairies.

Reports: Victoria—Barometer, 29.98; temperature, maximum yesterday, 53; minimum, 46; wind, 28 miles E.; rain, .41; weather, cloudy.

## HALLOWE'EN DANCE BRILLIANT SUCCESS

Press Club Hosts to Nine Hundred at Empress Hotel Last Night

Black cats, pumpkins, grinning skeletons, witches astride broomsticks and all the other "spooky" features associated with Halloween were in evidence at the ball given at the Empress Hotel last evening under the auspices of the Victoria Press Club. Nine hundred guests, many of them in costume, entered with enthusiasm into the fun of the occasion which proved in general very gay and enjoyable, as the Valentine dance which last February firmly established the club's reputation as successful hosts.

The first-entrance entered the ballroom to the dim light emanating from illuminated "punks" and a huge black cat whose eyes gleamed wickedly, while a witch sending over a cauldron muttered incantations anent "bubble, bubble, toil and trouble."

The ballroom, writing-room had been effectively decorated for the occasion with Halloween colors of orange and black, white a medley of grinning black cats stalked around the walls. In one corner a huge poster displayed a witch astride a broomstick accompanied by her "T. T. Liar," a black cat. Novel lighting effects added to the gaiety of the occasion, while at midnight two skeletons stalked among the dancers and a galaxy of black cats "moonwalked" and gambled in the general frolic, and in the ballroom, Oscar's orchestra had charge of the music, while Hunt's aggregation of musicians performed in the writing-room. So excited was the crowd's appetite for dances refused to be assuaged and the dance was in consequence prolonged until nearly 3 a.m.

During the evening a delicious supper was served in the dining-room, three sittings being necessary to accommodate the big crowd.

## CHAPTER BAZAAR

Florence Nightingale Chapter, I.O.D.E., Plans Ambitious Affair For November 8

The annual bazaar of the Florence Nightingale Chapter, I.O.D.E., will be held Saturday, November 8, in the hall lately vacated by Forrester's Paint Shop, 1423 Douglas Street, with a wonderful variety of useful and artistic novelties suitable for Christmas gifts. The general convenor is Mrs. Harry Catterall, and stalls will be under the following conveners: Fancy work, Mrs. F. J. Gorman; Hosiery, Mrs. Gorman; Mrs. Surphils; baby stall, Mrs. J. Baker; Mrs. W. Acton; Mrs. E. W. Turner; Mrs. Fred Bayliss; Mrs. Turner; Mrs. Westcott; doll clothes, Mrs. H. K. Prior; Mrs. Geo. Mellor; home-made candy, Mrs. George Lillis; home cooking, Mrs. K. Symons; Mrs. Stewart Clark; and a Mother Goose for the kiddies convener Mrs. H. R. McDonald; Mrs. J. P. McDonald; afternoon tea, Mrs. Rita Smith; Mrs. Hjalop and Mrs. Peacock.

There will be a number of guessing contests among them a wonderful Christmas cake donated by Mrs. Jas. Baker; also a beautiful basket of candy donated by Mrs. Mellor.

Authors' Club—On Monday evening, November 3, at 8 o'clock, in the Victoria, the regular meeting of the Victoria and Islands branch, Canadian Authors' Association, will be held. The speaker for the evening, Rev. Father, A. Asselin, Wood, has chosen for his subject, "The Thirteenth Century."

Lady Douglas Chapter—The Lady Douglas Chapter, I.O.D.E., will hold its monthly meeting on Monday at 2:30 in the Victoria Club. Arrangements will be completed for the entertainment to be held at the Empress Hotel ballroom on November 19. Tea will be served during afternoon and all members are urged to make a special effort to attend.

Illustrated Lecture—On Tuesday, November 4, an illustrated lecture will be given on "One Hundred Years of Victoria," by Rev. W. J. Sipprell, D.D., in the Metropolitan Church. Special musical numbers have been provided. The views are of exceptional educational value and will be a great insight into the great missionary enterprises.

## IN WOMAN'S MAIN SOCIAL AND PERSONAL

Mr. F. Fowler of Winnipeg is on a visit to Victoria.

Mrs. G. C. Lowe of Hastings, New Zealand, reached Victoria yesterday.

Mr. D. C. Smith of Auckland, New Zealand, arrived in Victoria yesterday.

Mrs. Henry Rochford of Stewart, formerly of Victoria, is visiting in Vancouver as the guest of relatives.

Mrs. W. J. R. Beech will hold her post-nuptial receptions on Wednesday and Thursday next at her home, 70 Lamson Street.

Mrs. Kingsbury, Swinerton Avenue, Esquimalt, is removing next week to her new home at 607 St. Patrick Street, Oak Bay.

Mr. Vic E. Andrew of the New Westminster Columbian staff, was among the out-of-town guests at the Press Club ball last evening.

Mr. William Georgeon of Calgary arrived in Victoria yesterday to spend a short visit with his family, who are residing in Oak Bay.

Mrs. J. H. Hughes of Tenayson Avenue has returned from Janesville, Wisconsin, where she has been visiting her brother the last five months.

Miss C. L. Williams, who for the past five months has been visiting with relatives in Toledo and Edmonton, returned to Victoria this morning.

Mrs. Sherwood Herchmer, after spending a few days in Victoria with her sister, Mrs. H. Herchmer and Mrs. Gourlay, has left for her home in Fernie.

Mrs. Harry Briggs entertained at her home in Hampshire Road on Friday evening with two tables of bridge, complimentary to Mrs. H. A. Jackson.

Mr. E. T. Fitzsimmons, after spending a few days in Victoria with his parents, Mr. and Mrs. Talford Fitzsimmons, has left for his home in Calgary.

Mr. Charles Blomfield of the South Pacific Engineers, U.S.A., formerly of Victoria, who has been visiting his sister, Mrs. Thornton of Fernwood Road, and Mrs. Downey of Deep Cove, has returned to Kirkford, Oregon.

Mrs. C. N. Gowen, Oak Bay, is leaving shortly for Seattle to visit her sister, Mrs. Edgar Ames, prior to her departure for Mexico, where she will be spending a year with her son-in-law and daughter, Mr. and Mrs. T. Patton of Mexico City.

An engagement of interest to her many Victoria friends has just been announced, that of Miss Dorothy Isabel Loughheed, only daughter of Sir Louis and Lady Loughheed of Calgary, to Mr. Nolan L. Hussey, youngest son of Mr. and Mrs. D. G. Hussey of St. Louis, Mo. The marriage will take place on Saturday.

Mrs. J. W. Ennos, entertained at two tables of bridge at her home on Rockland Avenue yesterday afternoon when her guests included Mrs. E. Todd, Mrs. A. D. Bechtel, E. Thomas, Mrs. George Johnston, Mrs. Mitchell, Mrs. B. S. Heisterman, Mrs. H. J. Wilson and Miss Gladys Irving.

The weekly "danzants" which proved such a popular social feature of past Winter seasons will be resumed at the Empress Hotel on Saturday next. A special orchestra has been engaged to play for these delightful little informal affairs which prove so important a part in the Winter social schedule.

Miss Jane Warner, who is leaving shortly for Edmonton, was the guest of honor at a dinner party given at the Union Club last evening by Miss Dorothy Holt, Mr. and Mrs. A. W. Harey, Mrs. H. J. King, Mrs. M. Louise Campbell, Miss Anna McBride, Messrs. Alex and Bert McPhillips, R. Wilson, Harry Crane and Ronald Buchanan.

Mrs. A. B. Macdonald, Vancouver, entertained at a smart dinner in long and Mrs. J. H. King of Ottawa, and Mrs. Macdonald's mother, Mrs. W. Lane Holmes of Victoria. Tall red roses and lighted tapers of the table, where Mrs. Murray Lay and Mrs. Sidney Jenkins presided over the tea cups.

Miss Marquita Nichol entertained a number of guests at a house last evening, the affair taking the form of a masquerade dance. Dancing to the strains of Heaton's orchestra took place in the ballroom, which was appropriately decorated and lighted, while in the billiard room an apple-pie, distorting mirrors, and other whimsical features added to the merriment of the occasion.

The employees of the architects' branch of the Dominion Department of Public Works, numbering about eighty-five, have presented Mr. William Henderson, resident architect, with a beautifully executed illuminated memorial, setting forth their esteem and good wishes on his retirement from the public service after more than fifty years with the Dominion Government. The presentation took place last evening.

The Halloween dance held in the Harmony Hall, Friday evening, under the auspices of the Daughters of the Empire, Lodge Primrose, No. 23, was a very jolly affair. Crowds of laughing people, many of them in fancy dress, danced to the strains of the orchestra. The decorations, kindly left up from the Princess Alexandra Lodge dance the night before, added to the charm of the scene. Refreshments were served by merry maidens in orange aprons.

Mrs. F. H. Codville entertained at a party at her home on Newport Avenue for her son, Master Jimmy Codville, and his guests, including the traditional Halloween games and included the Misses Nixon, Edwards, Jane Goodie, Audrey Homer Dixon, Cecily Holt, Janet and Jane MacCallum, Kathleen and Margot Greer, Barbara Cockburn, and Masters

Edwards, Peter Cockburn, "Bubbles" Holmes, Patrick Lawrence, Sandro Bullock-Webster, "Sandy" Hunter, John Book, Jimmy Greer and Ian MacPherson.

Friends of Mr. and Mrs. George Hardy gave them a delightful surprise at their home on McPherson Avenue last week. A most enjoyable time was spent and the evening went off so quickly in a good selection of games, cards and a dainty buffet supper was served at 11.50 p.m. and dancing was indulged in until the early hours of next morning.

Those of the family, including Mrs. W. Chandler, Mr. E. Chandler, Mrs. Collister, Miss B. Charles and Master Charles, Mr. and Mrs. Louisa, Mrs. G. Lewis, Miss G. Lewis, and Mrs. C. Teasdale, Miss Jean Teasdale, Master Teasdale, Mr. and Mrs. A. Young, Master L. Young.

Mrs. George S. Stevenson, Point Grey, Vancouver, was hostess at a tea recently in honor of her daughters, Mrs. Charles Hall of Toronto, Mrs. Eugene Lepard of Buffalo and Mrs. Cyril Paxton of Victoria.

Those who have been visiting here for the past month. The table, centred with a basket of cosmos and Autumn foliage, was presided over by Mrs. Paxton, assisted by Mrs. Edna, Mrs. J. E. Stevenson, Mrs. George Stevenson, Mrs. Gilbert Saunders, Mrs. F. D. Boyer, Mrs. Reginald Desjarlais, Mrs. E. H. Mullett, Mrs. H. O. McDonald, Mrs. Hockridge, Mrs. W. E. Archer, Mrs. Watt, Mrs. J. E. Paxton and Miss Mary Stevenson.

The Halloween masquerade dance, held last evening by Princess Alexandra Lodge, No. 18, Daughters of England, proved a very popular event, attracting about one hundred guests. The music was so good that could be desired. The hall was very prettily decorated for the occasion in black and yellow.

The grand march took place at ten o'clock, when the judges, W. D. Sisters, Smiley, Goodwin, Mr. Bridges awarded the prizes to the bride and groom, Mrs. Spaven and Mrs. Fetch. There were some fine dances included in the evening. The refreshment committee provided a very dainty supper. The dance was held under the social auspices of Sister Smith and her committee. Mr. E. Maynard made a very capable M.C.

This afternoon Miss Betty Kirk was hostess at a smart tea given at her home on St. Charles Street in honor of Miss Agnes McLean of Toronto, who is the guest of her aunt, Mrs. C. P. Hill. At the tea hour Miss Dorothy Holt and Miss Jane Warner, assisted by the hostess, the dances included Miss Agnes McLean, Miss Marjorie Oates, the Misses Betty and Lucy Bryden, Miss Marquita Nichol, Miss Lorna Lewis, Miss Helen Forman, Miss Kathleen Clay, Miss Phyllis Henderson, the Misses Anna and Edna Stevenson, Miss Louise Campbell, Miss Katharine Fraser, Miss Katharine-Ross, Miss Marion Wilson, Miss Jane Warner, Miss Dorothy Holt, Miss Lorna Lewis, Miss Helen Forman, Miss Lenore Hyndman, Miss Janet Lang, Miss Jean Harvey and Miss Dorothy Holmes.

A Halloween party was held last night at the home of Mrs. Hillside Avenue, in honor of Miss Margaret Moore. Artistic decorations were used and dancing, games and music were provided to pass the time quickly. The guests included Lillian Lanson, Mildred and Gerlie Milby, as the Halloween sisters; Vera Moore, a Turbentine sister; Dorothy Sherret, as a twin; Doris Dumbleton as a night; Jean Squarbriggs as a little girl; Ruth Rivers as a Pierrette; Adele Harey, Lawrence, Margaret Moore as a Spanish dancer; Catherine McGregor, Ethel Moore as a Pierrette; Alva Ball, Mary Donaghy; Bert Mary, Jack Short, Dan Plater, Ed Moore, Neil E. Griffin, Pierrot; Geo. Smith, Orion McGary, J. Four acres, Geo. Rogers, V. Coulter, S. Westendale as a lady; Lawrence Westendale and Harold Foster.

A most enjoyable fancy dress Halloween dance was given by Mr. George Summerfield in honor of Mrs. Leonard Barnes at the home of Mrs. Leonard Barnes at the North Park Street, Thursday evening. The dance and supper room both were beautifully decorated in spooky style. The joint hostesses, Mrs. Barnes and Mrs. E. Summerfield were ably assisted by Mrs. Abercrombie and Mrs. Garret, the supper and music were provided by the yellow chrysanthemums and floral pots, black and yellow streamers, floating witches and cats, etc. The guests included the Misses Ida Hellybur, May Tielbury, Nettie Parritt, Mary Williamson, Connie Rivers, Ruth Rivers, Ada Jewsbury, Evelyn Irvine, Dot Wilson, Minnie Salveson, Madeline Hanson, Gertrude Scholefield, Marjorie Warriner, Opal Day, G. O'Neil, Grace Curran, Zetta Foster, Chrissy Helm, Mrs. Summerfield, Mrs. Atkinson, Mrs. Garret, Mrs. Abercrombie, Mrs. Barnes; Messrs. Leonard Barnes, George Gordon Harvey, Geo. Brinkman, Charlie Hunt, Tommy Hunt, Earl Pierce, Roy Storey, Wilfrid Summerfield, George Summerfield, Parquhar, Lawrence Westendale, Don McDiarmid, Len West, G. Richard, J. Wilson, Robert Abercrombie, and the party breaking up in the wee hours of the morning.

The silver tea was held yesterday afternoon at the home of Mrs. Sweeney, Trutch Street, for the funds of the Catholic Women's League, was an unqualified success. The rooms were suitably decorated with chrysanthemums and late Autumn flowers. The dining-room was bright with all the traditional Halloween decorations. The table being daintily arranged by Mrs. Kenneth Hughes, who with Mrs. C. D. Macdonald presided over the coffee and tea. An attractive Christmas cake, given by Mrs. J. D. Hunter, was raffie off during the afternoon, the winner being G. B. Martin. The musical programme was charmingly contributed by Mrs. Gourlay, Mrs. Styles, Selhi and Madame Crawford, vocalists, and Mrs. Crawford Fennell at the piano. Miss Adam also gave an impromptu piano solo.

## MISS ETHEL HARDIE MARRIED TO-DAY

Popular Esquimalt Teacher Weds A. Tanner of Coquitlam

A very pretty wedding took place at St. Paul's Church, Esquimalt, this afternoon at 2.30, when Rev. F. C. Chapman united in marriage Ethel M., only daughter of Mr. and Mrs. Gordon H. Hardie, Canteen Road, Esquimalt, and Mr. Aubrey Tanner, of Coquitlam, B.C.

Given in marriage by her father, the bride looked very smart in a tailored costume of navy blue cloth, with which was worn a hat to match and grey furs. A colonial bouquet of Opuntia roses and violets completed the bridal attire.

Miss Janet Wilde, in a navy blue costume with hat to match, carrying a colonial bouquet of similar flowers, acted as bridesmaid. The groom was supported by the bride's brother, Mr. Dudley R. Hardie.

Following the bridal party up the aisle as special guests of honor, were twelve young girls, former pupils of the bride.

At the conclusion of the service a reception was held at the home of the bride's parents on the Canteen Road. Later in the afternoon Mrs. Tanner left for a motor trip up the island, and on their return will leave for Coquitlam, where they will reside in future.

## V.O.N. MUST COLLECT \$5,000 FOR WORK

Nurses Made 720 Visits Monthly Last Year; Assistance Needed

The V.O.N. requires to collect \$5,000 this Autumn as the general public will perceive upon reading the accompanying figures. Except for \$175 this year's tag day this organization has not made any direct appeal to the public since 1921, although it participated in the Community Chest, receiving \$1,400.

The Order can depend upon the following yearly grants:

City, for T.B. nurse	\$1,000.00
City, for general fund	500.00
Province, for general fund	500.00
Oak Bay	200.00
Esquimalt	50.00
Total	\$2,250.00

The average expense per month is \$615, of which more than \$500 is paid in salaries to four nurses; collections from patients average \$175. Collections from patients to nurses who know conditions of home and ability of patient to pay.

It is not generally realized that the V.O.N. nurses are not only visiting among the poor but are ready to attend at any house where a nurse is required for a small fee. The past year averaged 720 a month and at least half of these were free.

## ORPHANS ENJOY HALLOWE'EN PARTY

Miss Mary Spencer Arranged Delightful Affair For Kiddies

Halloween was appropriately celebrated at the B.C. Protestant Orphanage last evening, the little inmates thoroughly enjoying the happy occasion. Early in the afternoon Miss Mary Spencer arrived with games of all sorts and artistic decorations for the rooms. With the assistance of the staff the supper tables were soon gay with brightly colored fantastic black cats and witches on broomsticks added to the enjoyment of all present. Fancy caps of varied patterns were given to all the children and as supper progressed the refreshments dear to the hearts of children were lavishly provided, and before retiring to the playroom Miss Spencer distributed candies to each boy and girl.

At 7.30 Rev. C. M. Tate appeared on the scene and delighted everyone with an illustrated talk on the Indians of the Province. The slides were artistic and entertaining, and Mr. Tate's bright comments appealed to all. Mr. Bryant kindly assisted in operating the lantern, and promised to bring some comic pictures at a future time for the entertainment of the boys and girls.

Mrs. Hiscock, president of the "Ladies' committee, thanked Rev. Mr. Tate and Mr. Bryant for their kind-

## MISS ETHEL HARDIE MARRIED TO-DAY

Popular Esquimalt Teacher Weds A. Tanner of Coquitlam

A very pretty wedding took place at St. Paul's Church, Esquimalt, this afternoon at 2.30, when Rev. F. C. Chapman united in marriage Ethel M., only daughter of Mr. and Mrs. Gordon H. Hardie, Canteen Road, Esquimalt, and Mr. Aubrey Tanner, of Coquitlam, B.C.

Given in marriage by her father, the bride looked very smart in a tailored costume of navy blue cloth, with which was worn a hat to match and grey furs. A colonial bouquet of Opuntia roses and violets completed the bridal attire.

Miss Janet Wilde, in a navy blue costume with hat to match, carrying a colonial bouquet of similar flowers, acted as bridesmaid. The groom was supported by the bride's brother, Mr. Dudley R. Hardie.

Following the bridal party up the aisle as special guests of honor, were twelve young girls, former pupils of the bride.

At the conclusion of the service a reception was held at the home of the bride's parents on the Canteen Road. Later in the afternoon Mrs. Tanner left for a motor trip up the island, and on their return will leave for Coquitlam, where they will reside in future.

## WOMEN'S CANADIAN CLUB

Mrs. C. A. Lucas, Superintendent of the Spanish Health Centre, who recently returned from a trip to England, will be the speaker at the regular meeting of the Women's Canadian Club on Tuesday, November 4, at 2.45 in the Empress Hotel. Mrs. Lucas is a charming speaker and her address should have a wide appeal. Mr. J. J. Matheson will be the soloist.

ness and the children gave three rousing cheers for the gentlemen, showing their whole-hearted appreciation of the entertainment. An ice cream was served at the conclusion of the lantern lecture, and after that games of all kinds were indulged in. Miniature billiards, indoor golf, ping pong, bobbing for apples and various other amusements were kept up until bedtime brought the happy time to a close. A vote of thanks on behalf of the ladies' committee and the staff was passed, and the children gave Miss Spencer three ringing cheers for the wonderful party she had arranged for them.

Held Lucky Numbers—At the bazaar held recently by the Victoria Women's Institute, the lucky numbers were held by the following ladies: Quilt, Mrs. Boothe of Esquimalt; candy basket, Mrs. Louis Schmelz; cake, Mrs. J. H. Lawrence. The social meeting of the Victoria Women's Institute will be held in their rooms, Surrey Block, Yates Street, on Friday, November 7, at 2.30. A good musical programme is being prepared by the following ladies: Madeline Crocker, Urquhart, F. Campbell and Harrison, by whom tea will be served also.

FISHING CRAFT IS BURNED AT SEA ON SECOND TRIP OUT

Elsie, Suspected as Rum-Runner, Was Fishing Craft

Seattle, Nov. 1.—Instead of a speed marvel designed for carrying liquor to Seattle from British Columbia and west points, the \$50,000 gas boat, Elsie, which burned and sank off Partridge Island Wednesday morning, was an innocent fishing craft with a fourteen-mile gait, it developed since her loss.

Further was asserted by persons who ought to know that the Elsie, concerning whose ownership and use federal officials did considerable speculating while she was being built, does not belong to Roy Olmstead.

These details were brought out when preliminary steps were taken to collect \$40,000 insurance policies on the Elsie.

Amplifying the terse wreck report filed with the customs, P. L. Grainger, 533 North 72nd Street, signed a five-page bill of protest, in which details of the occurrence that resulted in loss of the craft were set forth.

Further was asserted by persons who ought to know that the Elsie, concerning whose ownership and use federal officials did considerable speculating while she was being built, does not belong to Roy Olmstead.

Derelict Launch Still a Mystery

No further reports as to the identity of the gasoline launch sighted near Nanaimo, bottom up, towards, have been received here, but the matter is being investigated.

The reports that several launches brought in concerning the derelict caused considerable alarm here and elsewhere along the coast, for there are many fishermen whose whereabouts are uncertain and their friends and relatives have not heard from them for several days.

VESSEL CAPTURED AS CREW REFUSE TO OBEY ORDERS

Coastguard Boat Grabs Valuable Prize; Deckhands

New York, Nov. 1.—Four starving sailors, who said they had been abandoned into the Rum Row service, compelled a reluctant skipper, Michael Gillian, of Halifax, to surrender to the coastguard cutter Gresham yesterday the natty two-masted Dorothy M. Smart of Newfoundland and her cargo of barrels.

SEATTLE SHIPPING

Seattle, Nov. 1.—Publicly-owned terminals at Seattle for September, 1924, produced a total revenue of \$123,960.67, compared with \$115,381.93 for the same month last year, according to a financial report of the port of Seattle made public yesterday.

Replacing the steamship Manila Maru, which is to be operated in an around-the-world service, the steamship Yokko Maru, a chartered vessel, is to arrive here November 25 from the Orient.

With a full cargo of freight, including materials for the Alaska railroad, as well as sacked coal for Southeastern and Southwestern Alaska ports, the steamship Nabesna departed north yesterday in the service of the Alaska Steamship Company.

The change in the name of the line means that in future the trans-pacific steamships of the President class will be known as vessels of the American-Oriental Mail Service.

The ships in the coastal trade, flying from here to San Francisco, however, in the change of the name of the ocean line a distinct division between the two ship services is drawn.

SEATTLE SHIPPING

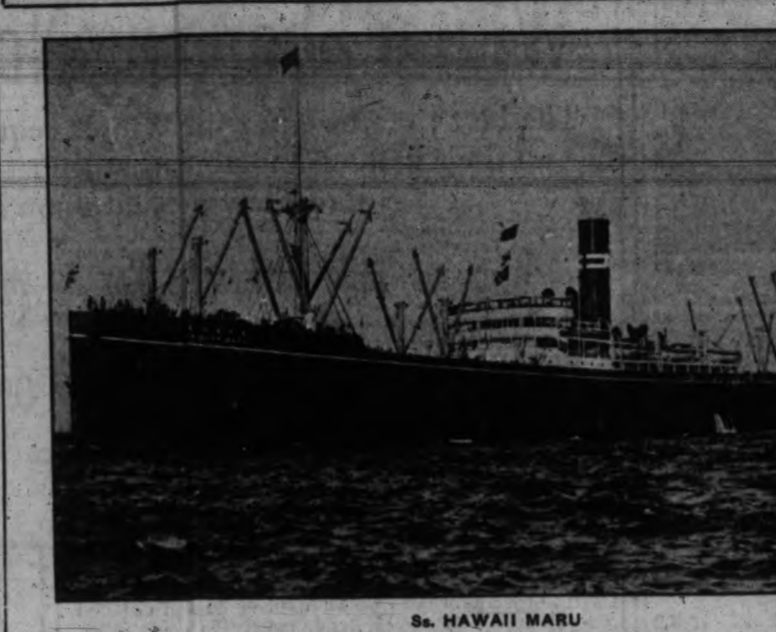

Seattle, Nov. 1.—Movement of cargoes from Puget Sound is increasing on the coast, with continued improvement in the California lumber market, shipping officials said yesterday.

Three vessels operating in the joint service of the Royal Mail Packet Company and the Holland-American line are to reach Seattle tomorrow.

After taking shipments from the disabled power schooner Apollo at Unalakleet, Alaska, the steamship Cordova, the Alaska Steamship Company, continued her voyage from Seattle to Nome, Alaska, on Thursday, according to word received here yesterday by wireless.

Funeral service for Capt. H. H. MacDonald, president of the Skegitt River Steamship and Navigation Company, who died Wednesday at Mount Vernon, Washington, is to be held here Monday afternoon, with interment here.

JAPANESE SHIP CARRIES MILLIONS IN SILK

One of three vessels due next Thursday with \$8,000,000 cargo beneath her hatches and many tons for this port.

SHIPPING BOARD DECIDES ON NEW NAME FOR LINE

Washington, Nov. 1.—The United States Shipping Board assigned the trade name of the American-Oriental Mail Service to the Admiral-Oriental line service between Puget Sound and the Far East.

W. N. Allan, manager of the local branch for the Admiral Line, stated to The Times this morning that a complete surprise to him, the move was more than a possibility.

“Owing to the great amount of uncertainty and indecision that would arise out of the changing of the name of the company, and the changes which would have to be made in printing on stationery, signs, advertisements and various other printed matter, it was not thought advisable, at first, that the change in name should be made. However, it is possible that this has been done, and although we, here, have heard nothing of it, probably true,” Mr. Allan said.

The change in the name of the line means that in future the trans-pacific steamships of the President class will be known as vessels of the American-Oriental Mail Service.

The ships in the coastal trade, flying from here to San Francisco, however, in the change of the name of the ocean line a distinct division between the two ship services is drawn.

Seattle, Nov. 1.—Movement of cargoes from Puget Sound is increasing on the coast, with continued improvement in the California lumber market, shipping officials said yesterday.

Three vessels operating in the joint service of the Royal Mail Packet Company and the Holland-American line are to reach Seattle tomorrow.

After taking shipments from the disabled power schooner Apollo at Unalakleet, Alaska, the steamship Cordova, the Alaska Steamship Company, continued her voyage from Seattle to Nome, Alaska, on Thursday, according to word received here yesterday by wireless.

Funeral service for Capt. H. H. MacDonald, president of the Skegitt River Steamship and Navigation Company, who died Wednesday at Mount Vernon, Washington, is to be held here Monday afternoon, with interment here.

In accordance with the custom of the Pacific Steamship Company, the recently damaged coastwise liner H. P. Alexander is not to resume service for two or three months, due to heavy weather preventing her from making her regular express train speed schedule.

Fire Destroys Passenger Ship

New Orleans, La., Nov. 1.—The steamship Yamalo of the Cuyamel Fruit Company has been destroyed by fire at Bluefields, Nicaragua, according to a message received at the offices of the company here today. All passengers had gone ashore and the crew escaped without injury.

The Canadian Winner of the Canadian Government Merchant Marine service docked here last night to load approximately half a million feet of lumber for the Orient.

The Canadian Winner is the second of the Government vessels to make the direct Oriental trip. This vessel was preceded by the Canadian Spinner. Both ships loaded lumber for the East at this port.

The Winner arrived here last night and at 11:45 o'clock made fast at Ogden Point.

Portland, Nov. 1.—The steam schooner Trinidad, which had been drifting off the Oregon coast for the last two days with a broken rudder, was taken in tow at 9:30 o'clock last night by the motorship Douglas, according to a radio dispatch received at the radio station at North Head.

SHIP AGROUND IN LAKE SUPERIOR AND CREW TO BE RESCUED

Port Arthur, Ont., Nov. 1.—The Great Lakes Transportation Company's steamer Glenlyon, Captain Taylor, ran aground on Menageet Island, fifty-six miles from here, at 1 a.m. today. The Glenlyon is carrying 145,000 bushels of wheat and left Port Arthur Thursday night.

According to wireless messages, the ship is badly shaggy. A tug has been sent out to take off the crew.

LOADING LUMBER FOR CHINA PORT

Canadian Winner Will Load 500,000 Feet For Shanghai Here

The Canadian Winner of the Canadian Government Merchant Marine service docked here last night to load approximately half a million feet of lumber for the Orient.

INBOUND VESSELS BRING RICH CARGO

Three Ships Arrive Here Next Thursday With \$13,000,000 in Holds

Thursday of next week will be a busy day for Victoria's waterfront if the steamships due here arrive according to their schedules. There are three vessels due from the Orient, the President Jefferson, the Hawaii Maru and the Toyama Maru.

Aboard the three ships are valuable cargoes. Totaled, the cargo is worth approximately \$13,000,000. They will leave a portion of this freight here and then proceed to Seattle and other mainland points to unload and reload for Orient ports again.

The President Jefferson has a cargo valued at more than \$5,000,000, including raw silk, silk goods and general Oriental freight. She is a vessel of the Admiral Oriental Line.

The Hawaii Maru, of the Osaka Shosen Kaisha fleet, has raw silk and silk goods to the value of about \$6,000,000 in her holds.

The Toyama Maru, of the Nippon Yusen Kaisha, another big firm of Japanese operators, carries a large but less valuable cargo of Oriental freight worth over \$2,000,000.

The tonnage of the freight in the holds of these vessels is large. But it is also apparent that the Japanese liners are concerned. First one vessel did some months ago, before Japan shippers began a boycott of American steamships.

But the Admiral ships are still getting a good share of the silk trade. N.Y.K. and O.S.K. ships make about an even break so far as silk shipments are concerned.

ROB COFFEE VACUUM PACKED Kept fresh in the Vacuum Tin

thirty-one permits in October, 1923, valued at \$39,417. The latter figure, it should be explained, includes the repairs to the Government Lumber Warehouse, and the Christ Church Memorial Hall.

YOUR HEALTH WHY A BREAST TUMOR NEEDS A DOCTOR'S WISE ATTENTION

Every woman dreads any symptom relating to the breast. Whether it be pain, tenderness or pressure, or the presence of a lump or swelling, there is the fear that cancer or some other dreadful thing has come to end happiness and life.

The fact is that most of these fears are needless. The breast is so delicate in its structure, it is not to be wondered at that symptoms of one sort or another are common to one.

When it comes to breast tumors it is but rarely that a doctor says surgery is necessary. If you have a lump in that region you may go to your doctor, confident that he will advise you just as kindly and considerately as he would his own wife or daughter.

If you have gone to him immediately on the discovery of the trouble, the operation, should one be necessary, will be a simple affair. Perhaps it is so trifling it can be done under local anesthesia.

If you could only know what terrible results have come from the foolish fear to tell the doctor, you would not hesitate a minute to get expert advice. This is why I urge you to give early attention to pain or swelling.

If the symptom comes from a temporary and unimportant cause, it will disappear speedily of its own accord. If the symptom comes from some serious cause, no local application will relieve it.

With no desire to frighten or disturb you, I must insist that breast tumors need professional attention. If for no other reason than to relieve your own anxiety, you should talk with your friend, the doctor.

Hockey World Is Starting to Buzz in East and West

Western Canada League Awaiting Release of Schedule; Players Signing

Annual Meeting of the National League Set For To-morrow; Developments Expected

Buzzings in the hockey world are becoming more pronounced. With the advent of November and the rapid approach of the time when the hockey players will be summoned to report at their respective training camps...

There is one piece of news that the fans want to see and that is the schedule of the Western Canada Hockey League. If Kenny McEneaney, manager of the Edmonton Eskimos, would only find his way back from the frozen wastes of the Arctic and say what he thinks about the schedule everything would be all right...

The schedule was accepted by five of the clubs several weeks ago, but McKenzie is still out on a fur-trading trip and as a result no action can be taken. There is no doubt but that he will agree to the draft, but until he places his signature to the agreement President Richardson will not take a chance on releasing it.

Developments are expected in regard to the Cougars within the next week. The contract was mailed by Manager Lester Patrick ten days ago, and answers should be coming back very soon.

The great hinges on the action to be taken by Frank Boucher and Frank Foyston. The former has stated that he will not come to the West this year, but the latter is talking of retiring. An effort is being made to arrange a trade for Boucher, while Foyston may come when the time is right.

Montreal, Nov. 1.—National Hockey League managers are beginning to gather for the annual meeting of the organization to be held Sunday. Charles A. Clark, manager of the admitted Boston club, being the out-of-town arrival.

Sunday morning the directors of the old four-club league will meet in preliminary meeting, and this will be followed in the afternoon by a conference of the new league.

Montreal, Nov. 1.—Danton Scott, former youthful professional hockey player of the Toronto St. Pats, has been signed for the National Hockey League this year.

Calgary, Nov. 1.—The management of the Calgary Tigers announced that signed contracts for the 1924-25 hockey season have been returned by Hal Winkler, "Red" Nutton, "Bobby" Berrall, Morris, "Spunk" Sparrow, "Cully" Wilson, Eddie Oatman and "Dug" Mackie.

Harry Oliver and Herb Gardner have accepted terms, but their contracts have not been returned yet. Winkler, Sparrow and Mackie are the newcomers. The first two being purchased by Edmonton, while Mackie played defence for Bellevue.

Eddie Oatman, club coach and playing manager, wired President Johnston the other day that he would go into Winnipeg from St. Paul very shortly, and would make all the necessary arrangements to open up the training camp. The term will be brief enough, just a week being at the boys' disposal to get under way. Mr. Johnston instructed Oatman to proceed to Winnipeg and have everything ready for the start. While Oatman is the only place that has signed the "Tigers" for exhibition games yet, it is understood that steps are being taken to place them in Toronto and Hamilton.

AFTER JIM RILEY The Calgary club still entertains hope that Jimmy Riley, Seattle star left winger, will arrange to get away from his business on the coast and play with the Tigers this winter. He will let the management know by the first of the week, and if everything is O.K. transportation will be rushed through.

MAY GO TO TIGERS

Chatting Catcher Is Now a Thing of Past in Baseball

JIM RILEY

It is possible that Jim Riley may see his way clear to join the Calgary Tigers for the hockey campaign. Jim did not intend to play this year owing to his business connections in the southern states, but when on a visit to the coast this fall it was suggested that he come back and finish off his career in Calgary where he started out. Riley is now considering the matter and may sign. He has gone south to see if he can arrange his business. If he goes to Calgary a trade will be made by the Patricks and one of their men will come to the coast.

To-day's Eastern Football To See Thrilling Games

Hamilton by Beating Argos Can Win Title; McGill Has Chance at Queen's

Toronto, Nov. 1.—Three of the senior teams engaged in the four games in Eastern Canada to-day must win or bid good-bye to their championship chances for another year.

McGill's chances are attracting more interest than the average. The three teams who have their backs to the wall are Argos in the Interprovincial, Hamilton Rowing Club in the Ontario Union, The Argos entertain Hamilton Tigers, 1923 champions and present leaders of the union in this city.

Canadian champions, in Kingston, while Hamilton Rowing Club face Varsity in the first senior O.R.F.U. game of the season in Hamilton.

OUTSTANDING GAME The Argo-Tiger game is the outstanding one. Tigers have won their four previous starts, while Argos have lost one of their three starts.

Taking things all in all, to-day's games are the present with possibilities, both of the present and of the future.

Calgary, Nov. 1.—Calgary has visions of landing its first senior rugby championship in five years here on Saturday afternoon, when the local fifteen oppose University of Alberta in the final game of the season.

Proceedings against Firpo, which were pushed by Canon Chase in an effort to have the South American deported cost the Federal Government about \$10,000 in time and effort, according to Immigration Commissioner Curran at Ellis Island.

St. Mark's Opens Carpet Bowling Season on Monday

St. Mark's boasts of the original Carpet Bowling Club West of Winnipeg. It is a fascinating and inexpensive pastime for those who are not seeking strenuous exercise. The season opens at St. Mark's Hall, Crowdsdale, on Monday, November 3, at 3 p.m. A hearty invitation is extended to new members. Information can be obtained by phoning 449412.

Chatting Catcher Is Now a Thing of Past in Baseball

Time Was When One of Backstop's Best Assets Was a Good Line of Talk

Causes Trouble as Instance By Outbreak in Detroit During Past Season

The chattering catcher is fast dying out in major league ball. Not so many years ago a strong paucity of lungs and penetrating voice were two valuable catching assets. To-day the catchers are more mechanical. Aside from a few words of encouragement to their pitchers, their line of talk is much the same, perhaps a trifle stereotyped.

Catchers do it because they are expected to. It was considerably different in the old days. Then the catchers regarded their ability to orate as one of their best bits.

There is nothing that will keep a batter from concentrating as much as an interesting line of chatter. I have seen many a surprising bit of strategy pulled through the ability of some catcher to have the batter, in a pinch, start telling the story of his life.

STREET WAS CHATTERBOX Charley Street, the original catcher of the famous battery of Johnson and Street, was a great example of the talkative catcher. Street started chattering the start of a game and kept at it continuously, directing his vocal efforts in every direction.

To the ball players he was known only by the nickname of "Gabby." Very appropriate. The way Walter Johnson used to bait the batters when he was at the top of his game enabled Street to make fine use of his line of conversation. Walter used to say that Street engaged the batter in conversation and he turned his head and would throw his fast ball by him.

The talkative catcher has many opportunities to worry the batter. Some of his staff is serious, just as often as it is of the humorous nature. The big idea seems to be keep saying something.

Incidentally, it is a very easy matter for a few bantering words to create much confusion. For example this year's riot at Detroit.

REMARKABLE CHARACTER Rickey is one of the most remarkable characters in baseball. He started as a minor league catcher in the Texas League and his career includes college football coach, college baseball coach, business manager, club president, vice-president and manager.

Originally an American League product, Rickey was ousted as manager of the Cincinnati Reds following the close of the 1915 season when his club was purchased by the St. Louis Federal interests.

MANAGER SIX YEARS Rickey then decided to pilot his own club and he put on the managerial spangles in 1918.

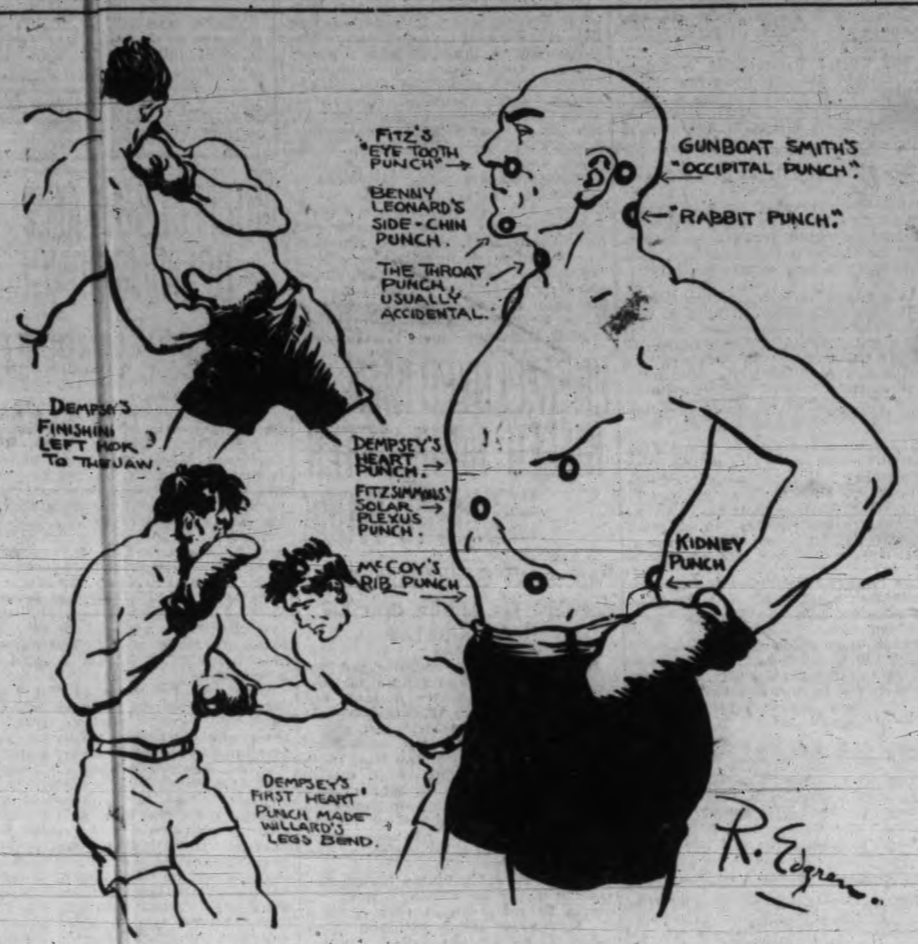

He realizes that he must rebuild his organization which in 1921 and 1922 gave the Giants stiff competition for the pennant. This year it dropped out of sight early and has been in the second division all season.

GOODRICH A WINNER New York, Nov. 1.—Jimmy Goodrich of Buffalo, won a decision over Larry Conroy of Trenton, in a ten-round bout here last night.

Considering his skill as a mascot, it seems strange that Goodrich did not get a share of the Washington team's divvy.

Jack Renault is distributing pictures of himself and a horse as proof that he was with the Canadian Mounted. The horse really looks the part, too.

Different Kinds of Knockout Punches

May Quit Manager Role and Take to Road As a Scout

B. Rickey, of St. Louis Cardinals, Thinks Getting Men Is Big Job

How important are the managerial duties? Especially when compared with those of the magnate—the man who assembles the players and organizes the club?

Any way, Rickey has hinted that he will resign as manager of the Cardinals during the winter and devote his entire time as discoverer of material with which to develop his National League baseball machine.

REMARKABLE CHARACTER Rickey is one of the most remarkable characters in baseball. He started as a minor league catcher in the Texas League and his career includes college football coach, college baseball coach, business manager, club president, vice-president and manager.

Originally an American League product, Rickey was ousted as manager of the Cincinnati Reds following the close of the 1915 season when his club was purchased by the St. Louis Federal interests.

Rugby Players Are In Critical Shape Following Games

Toronto, Nov. 1.—Sheridan and Burns, members of the De La Salle Rugby team are in hospital suffering from concussion of the brain received in a rugby game with University of Toronto schools yesterday.

McTigue Fails to Apply For License in New York State

New York, Nov. 1.—Mike McTigue, heavyweight champion of the world, who had declared his intention of demanding a license yesterday from the state athletic commission, and of suing the body for \$25,000 if it should reject his application, did not appear before the commission.

Seals' Skipper May Go to Cincinnati to Replace J. Daubert

San Francisco, Nov. 1.—Jack Hendricks, manager of the Cincinnati National League Baseball Club, was yesterday to dicker for the services of Bert Ellison, manager of the San Francisco club, who is wanted to take the place of Jake Daubert, who was yesterday a local challenger by the commission, to the first chance at his title.

AMERICAN TEAM LEADS

Chicago, Nov. 1.—Horan and Walther, American team, had a comfortable lead in both mileage and points as the six-day international bike race drew to a close to-day.

HOPPE TO PLAY SHAFER

Chicago, Nov. 1.—Willie Hoppe yesterday accepted the challenge of "Young" Jake Schaffer to play him two matches for the \$2,200 billiard championship of 3,200 points each in eight blocks of 400 points.

UPLANDS GOLF

Following is the draw for the ladies' monthly medal competition of the Uplands Golf Club to be played at Uplands to-morrow: Mrs. Heppburn vs. Mrs. Geiger, Mrs. Fairbairn vs. Mrs. Nickerson, Miss Wolfenden vs. Mrs. Sanders, Miss Maxwell vs. Mrs. Wilding.

The Greatest Knockout Punches Are Explained

Bog Edgren Tells of Paralyzing Blows Used by Champions of Present and Past; Fitzsimmons' Solar Plexus Blow Was His Speciality, While Dempsey Hit to Heart and then to Chin; Jeffries Used Jab and Right to Jaw

BY R. EDGREN

Benny Leonard says the best "knockout spot" is the chin, but the blow must land on either side to be effective. A blow delivered from squarely in front is simply a hard jar cushioned by the jaws on both sides.

Jack Dempsey, the greatest hitting heavyweight of this time, and shock king of them all so far as ring history goes back, hits anywhere along the angle of the jaw bone to get the twisting jar. He doesn't have to land cleanly on the side of the point of the chin to drop his man.

Fitzsimmons got the solar plexus punch through the advice of Mike Donovan. When Fitz was middleweight champion he traveled around the country meeting all comers in a show. Fitz was rough. He thought it a great joke to hit the big fellows on the chin and see their heads bounce on the floor.

Fulton was knocked out in fourteen and three fifth seconds—a world's record among first class heavyweights.

That heart punch, as used by fighters without Dempsey's terrific hitting power, only weakens a boxer gradually, and many blows through many rounds are needed to wear him down so that I can hook the left to his jaw. If these two punches go in-right they are enough. I got Fulton that way—hit him over the heart.

It was a knockout, but as he caved in I had time to hook the left to the side of his jaw, and that knocked his head over just in range of a short straight right, so I tipped him that too. Probably any one of the three would have won, but the combination made sure of it.

FITZSIMMONS NOT PARTICULAR Berlenbach, one of the most noted knockouts of recent years, isn't particular. His notion is to club the other bird anywhere on the side of the head, preferably somewhere below the forehead, and let him fall. He has a wicked thump on his left hand. He isn't a quick thinker and he leaves big openings and takes chances without losing Dempsey's eye and lighting his brain for a defence, but he has a big slam in either hand, particularly the left—He is likely to knock out anybody at any time.

USE ANY OPENINGS Pancho Villa and Mickey Walker are both fast boxers and hard hitters with either hand, using any opening they see. Harry Greb just hits every where above the belt and from any angle, wearing his man down and going for general results without much science. Probably he thinks it is foolish to study the weaknesses of his rivals and place punches accordingly.

Lacrosse League Invited to Return to Amateur Circle Toronto, Nov. 1.—Fred Johnston was re-elected by acclamation as president of the Amateur Athletic Union of Canada at its annual meeting last night. A motion was passed to appoint a committee to study the weaknesses of the Ontario Lacrosse Association which broke off its affiliation and also a committee to arrange peace among the rival swimming associations.

FEATHERWEIGHT TOURNAMENT New York, Nov. 1.—The six principals in the featherweight elimination tournament to determine a successor to Johnny Dundee, who voluntarily relinquished his title to the state athletic commission, signed contracts yesterday for the tournament at Madison Square Garden Friday, November 21. Drawings will be made at 3 o'clock in the afternoon at 3 o'clock in the presence of newspapermen. The semi-final of the tournament will be held within a three week period after the semi-final.

FITZ AND HIS NEW TOY Kid McCoey, who liked to figure out damaging blows and who invented the "corkscrew punch" that twisted and tore the biceps of Jerry's cheek bones, had a neat and effective body punch. McCoey liked to win by making the other fellow quit. His body punch was delivered just below the edge of the floating rib driving them together sharply and causing a pain that made the victim think he was being badly injured, and incidentally causing a momentary weakening of pressure on the heart, and it was not a dangerous blow, but useful in wearing his man down.

McTigue failed to apply for a license in New York State. He had declared his intention of demanding a license yesterday from the state athletic commission, and of suing the body for \$25,000 if it should reject his application, but he did not appear before the commission.

Seals' skipper may go to Cincinnati to replace J. Daubert. Jack Hendricks, manager of the Cincinnati National League Baseball Club, was yesterday to dicker for the services of Bert Ellison, manager of the San Francisco club, who is wanted to take the place of Jake Daubert, who was yesterday a local challenger by the commission, to the first chance at his title.

## HOW BLACK WOLF CAME TO BE MEMBER OF PICTURE COMPANY

A mass of black, tangled beard covered his face, his eyes were bleary and he uttered strange oaths as he hobbled into Sundown Camp, where "Sundown" to be shown at the Capitol Theatre next week, was being filmed on the Texas prairie. Seeking out Earl Hudson, supervisor of the First National production, he hoarsely asked for a job.

"How much do you want a week?" Hudson asked.

"About \$2,000—or maybe \$30 and chuck," replied the stranger, scratching a tousled head.

"That's Black Wolf," whispered a cowboy nearby. "He's plain dumb, but he knows how to tell weather. Black Wolf was hired—at his latter figure. Anybody who can foretell weather without a slip is worth a million a year to a motion picture producer."

### AT THE THEATRE

Dominion—"Captain Blood," Coliseum—"The Monkey's Paw," Columbia—"George Washington, Jr.," Capitol—"Single Wives."

## WHERE TRUTH PROVID TO BE MORE THAN BEST

The beautiful estate of Mr. Charles Hastings, a multi-millionaire, was utilized for filming most of the outdoor scenes in "George Washington, Jr.," the latest vehicle of Wesley Barry, to be shown at the Columbia Theatre to-day.

The estate lies in the Sierra Madre hills about twenty-five miles from Los Angeles, and covers some forty-two acres. It is beautifully laid out with a large outdoor swimming tank near the house. It was around this tank that most of the swimming "shots" were taken. The continuity of this screen version of George M. Cohan's stage success called for a swimming contest between Wesley Barry and Edward Phillips.

### Learn to Dance In Private

THOSE WHO WANT TO REALLY DANCE WELL—in the smartest New York or London manner—will find my Studio a revelation in dancing instruction. I endeavor always to produce all that's most vital and beautiful in your waits and fox trot interpretations. You can learn to become a graceful, accomplished dancer in a few strictly private lessons. Commence now and become an adept by Christmas.

LEARN FROM AN EXPERT TO BE AN EXPERT

## DANTE'S "INFERNO" WILL BE PRESENTED AT THE COLISEUM

Two separate and distinct phases of the motion picture art demonstrated in "Dante's Inferno," the William Fox version of the famed allegory, now being shown at the Coliseum. One phase is sheer nerve-rending drama of the kind every motion picture devotee loves, and the other is fantasy, which is all too scarce on the screen to-day.

Most of the importations have had the appeal of indolent amours, as in the case of the translated "Fata Morgana," or of intrinsic spectacle and tremendous publicity, as the "Chaux-Souris."

Mme. Simone comes quietly with a repertoire of classical plays, having its appeal largely limited to those New York, Nov. 1.—The French players and Mme. Simone are offering Broadway its most European, its most conservative and perhaps its most polished performance.

## PLAYHOUSE THEATRE OFFERS TO PATRONS "CAPT. FLY-BY-NIGHT"

Johnston McCulley, in whose famous story, "The Mark of Zorro," Douglas Fairbanks achieved one of his greatest successes, has had another of his thrilling fiction tales made into a picture on the screen. It is "Captain Fly-By-Night," in which Johnnie Walker makes his bow as a full-fledged star under the direction of P.H.O. The picture is now showing at the Playhouse Theatre.

## CORINNE GRIFFITH IS BEST DRESSED STAR IN FILMDOM

Paris sets milady's styles for all the world with the exception of Hollywood. The picture colony looks to Corinne Griffith, the famous First National star, to show it which way the fashion straws blow. On and off the screen Miss Griffith has the distinction of being Filmdom's best dressed actress. In "Single Wives," a story of society, which is now being shown at the Capitol Theatre, Miss Griffith is seen in no less than eleven different gowns, every one of which was designed by this talented young woman.

## "CAPTAIN BLOOD" IS SHOWING FOR LAST TIME AT DOMINION

Otto Matiesen, who portrays Chief Justice Jeffreys in Raphael Sabatini's famous love story, "Captain Blood," which is now showing at the Dominion, has the distinction of playing the same role in another of Sabatini's stories, "Scaramouche." He is regarded as a typical Jeffreys, and his role has become as familiar to him as his own. Mr. Matiesen has appeared in "The Thief" and "The Dangerous Maid."

## GRADES OF WHEAT ARE SET BY BOARD

Standards for This Year's Crop Decided at Meeting in Winnipeg

Winnipeg, Nov. 1.—The Western Grain Standards Board, at its annual meeting here, set the commercial grades of wheat as Nos. 4, 5 and 6, which will be the basis upon which this year's crop will be marketed. Lowering to some extent the standards of these grades as compared with last year. Very careful consideration was given to the matter, but it was believed to be as lenient as possible in favor of the western producers without damaging the reputation of Canadian wheat in so far as grading is concerned.

## MURDER VERDICT IS GIVEN IN TACOMA

Tacoma, Nov. 1.—Richard Conner was found guilty of murder in the first degree, without capital punishment, by a jury here last night on the charge of murdering his wife, Pearl Conner, on the Camp Lewis reservation last May. The verdict of the jury was returned in four hours from the time the case was given to it for consideration.

## DIED OF PNEUMONIA

Toronto, Nov. 1.—The will of Jacob Gehring, who died Thursday night following a short illness, during which he refused to have medical attention, asked that his body be handed over to a school of anatomy, Gehring believing he was suffering from diabetes, and that research work in the interest of diabetes would benefit by his investigation. The coroner revealed that death was a result of pneumonia, and that Gehring was not suffering from diabetes.

## THE C.M.R. DINNER

The committee arranging the 2nd C.M.R. dinner in Vancouver have already received word from many parts of the Province indicating that a large attendance is assured. The G.W.V.A. auditorium has been secured for Saturday, November 1, at 7:30 p.m., and from the material offered a good programme will be presented.

New York, Nov. 1.—The French players and Mme. Simone are offering Broadway its most European, its most conservative and perhaps its most polished performance.

Most of the importations have had the appeal of indolent amours, as in the case of the translated "Fata Morgana," or of intrinsic spectacle and tremendous publicity, as the "Chaux-Souris."

Mme. Simone comes quietly with a repertoire of classical plays, having its appeal largely limited to those

Margaret Anglin, the Canadian actress, and Wilfrid Favard will be united in the same company after years of separation when they take Zoe Akin's "Footloose" on a tour of the South. The play was presented five years ago in New York and ran five or six months.

who speak French or to those craving to do the correct thing socially. Her season is announced to be of short duration, but there is great reason why it should be cordially received.

Rosland's "L'Aiglon" opened the season, with the programme calling for Brando's "Naked," "Madame Sans-Gene," "Camille," "Amoureuse" and "Phedre."

Sarah Bernhardt created "L'Aiglon" nearly a quarter-of-a-century ago, and it is therefore a difficult path to follow, even for Mme. Simone, introduced as "France's foremost actress."

Mme. Simone is not mimicking any other actress in her role. She puts her sympathetic and forceful personality into an individualistic conception.

Especially memorable scenes, made so by the effective handling of the actors, are the self-disclosure of the old serenade, Flambeau, as one Napoleon's veterans, and Metternich's tirade at L'Aiglon before the mirror.

As French as the Frenchiest of Parisian farces is the sophisticated "Firebrand," by an American, Edwin Justin Mayer.

Benvenuto Cellini is the leading figure, set in authentic history but entertaining rather than didactic. Joseph Schildkraut plays the role with his customary efficiency, approaching much more nearly to lead interest than most supporting actors.

Age Frank Morgan as the duke and Nana Bryant as the duchess. Cellini trades his wife to the duke to avoid execution, but immediately gets in trouble with the duchess, with whom he was playing a "great lover." There are complications galore, agile subterfuges, balcony romances, and numerous lines which skate over this ice safely only by reason of skilful handling.

Florence Reed, who plays bad women as well as any actress on the boards, has the role of a very noble and long suffering creature in "Ashes," which probably affords her the worst vehicle of her career.

The play is badly written and insincere and deserves a speedy sentence to the store house, but there are two or three times when Miss Reed gets meat out of the meagre morsel, and convince you that you haven't been mistaken about her ability heretofore.

"Ashes" is the story of an actress who finds it difficult to be a good wife, a good mother and a good Cleopatra at one and the same time. She wants to specialize on motherhood and does some very effective weeping for a child just outside the wings, but her husband insists on making a tragedienne of her. Hence the ashes.

## DINNER IN HONOR OF DR. K. C. MACDONALD

Liberals of North Okanagan Paid Tributes to Late Provincial Secretary

Armstrong, B.C., Nov. 1.—Liberals of the northern part of the North Okanagan riding crowded the Okanagan Hotel in Armstrong to the doors last night on the occasion of a complimentary dinner to Dr. K. C. MacDonald, late Provincial Secretary.

Dr. MacDonald, replying to the toast to his health and a presentation, said he was sure that forty-eight hours after the election the riding realized the injustice done to him and would have reversed it. He desired to adopt for himself the words of Sir Richard Barton: "Fight on my men, fight on, I will lay me down and bleed awhile, then will I rise and fight again."

## MENNONITES ARE TO TAKE PRAIRIE FARMS

People Who Came to Ontario From Russia to Move West

Elmira, Ont., Nov. 1.—There is great interest throughout Waterloo County over a large transaction which has just been completed in the lands of the Mennonite people of Saskatchewan, by which 60,000 acres have been sold by Mennonites who are colonizing in Mexico to Heath Jones, an English capitalist, who intends to resell this land in small blocks to the Russian Mennonites who have recently come to this country, many of whom are now in this district and other parts of Waterloo County.

The intention is that many of these people will go west in the Spring and take up this land for themselves, it being resold to them at reasonable rates.

## PRAIRIE TOWN CASE HEARD IN OTTAWA

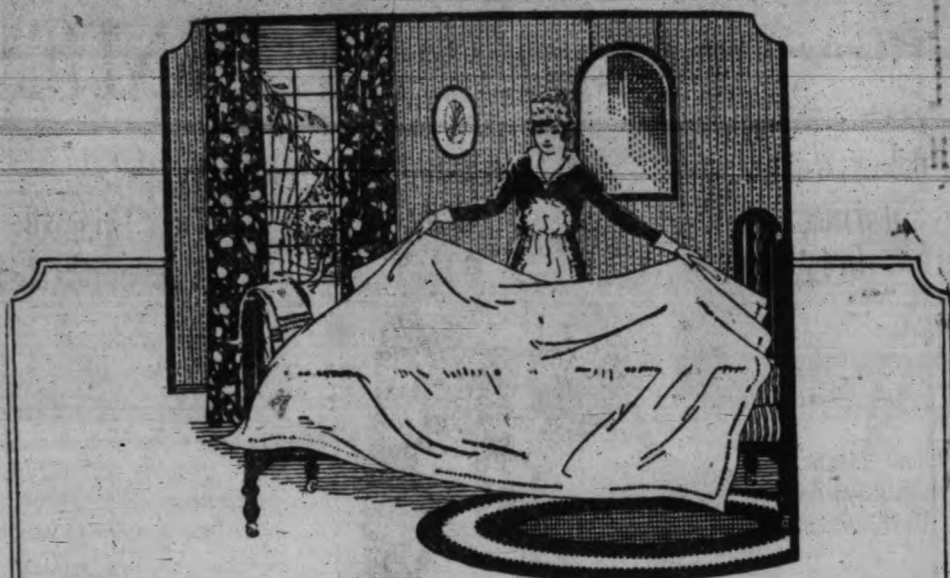

Ottawa, Nov. 1.—Judgment was reserved in the Supreme Court of Canada yesterday in the case of the Canadian Order of Chosen Friends against the Local Government Board of Saskatchewan and the town of Humboldt.

The town had been in financial difficulties and the Local Government Board had made an order purporting to adjust the affairs of the town. The Order of Chosen Friends, holding debentures of the town and being dissatisfied with the order, appealed against it on the grounds of lack and excess of jurisdiction of the local board, to the Court of Appeal of Saskatchewan. The Court of Appeal, on the ground that it had no jurisdiction to hear the appeal of the Chosen Friends from the order of the Local Government Board, dismissed the case.

## COURT WHIST TOTALS

Results in the court whist tournament held by the A.O.F. for the month of October are as follows:

Club	Won	Lost
Court Maple Leaf	2	0
Court Camosun	2	0
Court Northern Light	1	1
Court Victoria	1	1
Court Triumph	0	2
Court Vancouver	0	2

## Snowy Bed Linen—fragrantly clean

HOW sweet and wholesome is that welcome sense of fragrance which comes from well washed linen. How refreshing it is to lie between clean sheets, to rest one's head on a snow-white pillow case; to breathe deeply in an atmosphere of purity; to feel and to know that the things around you are absolutely clean.

To bring about this refreshing sense in the mind of guest or family is a triumph well worth the attention of any housewife. It is best accomplished by using Sunlight Soap.

To get bed clothes snowy white it is not necessary to boil them or rub holes on the wash board. The sure power of Sunlight Soap itself extracts every trace of soil while the things are soaking. In the rinse it all comes away—all the dirt and every particle of soapy matter, leaving not gray-whiteness, not yellow-whiteness, but snowy white purity and cleanliness.

## MILITARY ORDERS

12th SIEGE BATTERY, C.A.

Battery orders by Major G. G. Aitken, M.C., commanding, Victoria, B.C., October 31.

Parades of the battery will take place on Tuesdays, November 4, and on succeeding Tuesdays until further notice.

Time—Assembly will take place sharply at 1:55 p.m.

Right Section under command of Capt. Everall. Left Section under command of Lieut. Woodhouse.

The following is the schedule arranged for the battery activity preceding Christmas:

Nov. 4—Physical training and P.T. games and swimming instruction.

Nov. 18—Physical training and P.T. games and boxing instruction.

Nov. 25—Physical training and P.T. games and basketball challenge game and shooting.

Dec. 2—Physical training and P.T. games and swimming instruction.

Dec. 9—Physical training and P.T. games and shooting (miniature range) competition.

Dec. 16—Physical training and P.T. games and boxing instruction.

Dec. 23—Turkey shoot.

Dress—Muff. If possible please bring "gyms" shoes.

Note—Each member of the battery is especially requested to be present. A special invitation is extended to

## CANADIAN LEGION

The general meeting of members will be held on Wednesday, November 5, at 8 o'clock. The meeting will be followed by a smoking concert. A large attendance of members is requested.

# Home Lighting Contest Begins today

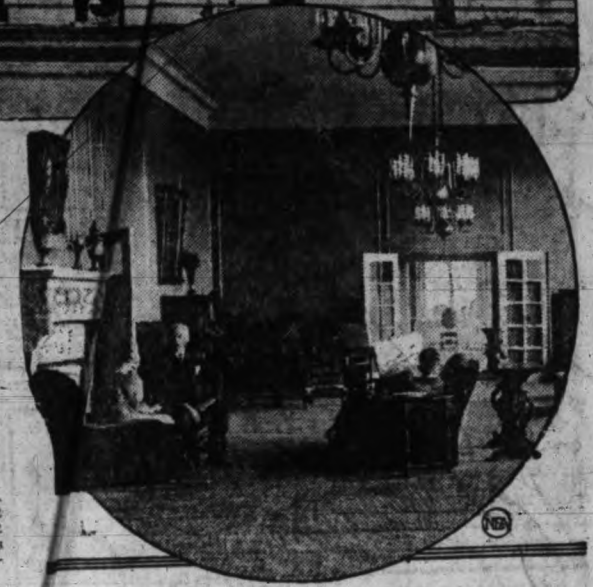

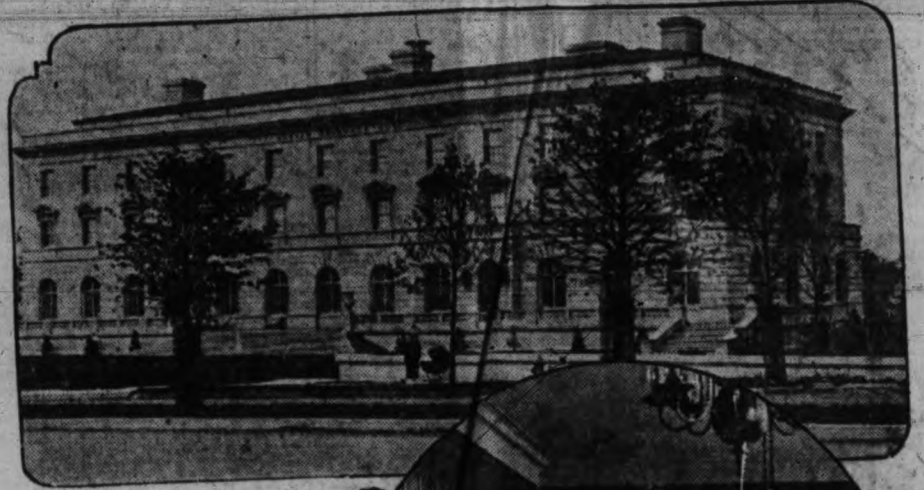

- THIS is the day to enter the Home Lighting Contest. Here is the way to do it!
1. Get an announcement folder and registration card from the Contest Headquarters at the B.C. Electric Offices or from any of the electrical stores in town.
  2. Read the folder carefully and decide if you want to enter the contest.
  3. Fill out a registration card and you will then be given a Home Lighting Primer.
  4. Study the Primer carefully and follow the directions contained therein.

- ### International Prizes
- First Prize—\$15,000 Model Electrical Home (To be built on lot provided by winner)
- Two Second Prizes—1 Boy—1 Girl \$1200 (Available in America or Canadian College or University of accepted standard)
- Two Third Prizes—1 Boy—1 Girl \$600 (Available in America or Canadian College or University of accepted standard)
- Two Fourth Prizes—1 Boy—1 Girl \$400 (Available in America or Canadian College or University of accepted standard)
- Two Fifth Prizes—1 Boy—1 Girl \$300 (Available in America or Canadian College or University of accepted standard)
- Two Sixth Prizes—1 Boy—1 Girl \$200 (Available in America or Canadian College or University of accepted standard)
- ### Canadian National Prizes
- Two First Prizes—1 Boy, 1 Girl, \$600 SCHOLARSHIPS, each in Canadian college or university.
- Two Second Prizes—1 Boy, 1 Girl, \$300 SCHOLARSHIPS, each in Canadian college or university.
- Two Third Prizes—1 Boy, 1 Girl, \$200 SCHOLARSHIPS, each in Canadian college or university.
- ### Victoria and District Prizes BOYS
- Radio Set or Bicycle  
Set of Tools  
Kodak  
Tennis Racquet  
Hifle  
Wrist Watch  
Fishing Rod  
Fountain Pen  
Electric Soldering Iron  
Student's Lamp  
Hockey Skates
- ### GIRLS
- Silverware or Bicycle  
Traveling Bag  
Toilet Set  
Wrist Watch  
Umbrella  
China  
Fountain Pen  
Houdour Lamp  
Vanity Case  
Electric Curling Iron  
Handbag  
Electric Iron

# MOST EXCLUSIVE CLUB IS BEQUEATHED AS BANKRUPT MILLIONAIRES' SHELTER

The Freedman Club for Bankrupt Millionaires (above) and a Corner of One of the Luxurious Reception Rooms

**NEW YORK, Oct. 25.**—To live in the most exclusive club, one must be past 63 years of age. Have known wealth and luxury but, through ill fortune, have been reduced to poverty. Must have had, in addition to wealth, refined surroundings. Must be absolutely without money, with no place to turn. Must be married, preferably to the partner of wealth and adversity, as all the quarters for single folk are gone. The club charges no dues. Admission is free, and members do not pay for their board and lodging. **THIRTY SELECTED** Thousands have sought admission. Only thirty have been taken in. Most of the applicants who failed did not meet the requirements of culture, as all members must fit into the environment. And the environment is a million dollar palace, more gorgeous than the most exclusive clubs and hotels, as sumptuous as any millionaire's estate. It is possibly the most astounding heritage ever left—the gift of the late Andrew Freedman to the "indigent rich." Freedman was a multi-millionaire. In his declining years he was at

times beset by a fear that suddenly he might lose his fortune. And then there would be no "indigent rich" to take care of him. Freedman was a multi-millionaire. In his declining years he was at times beset by a fear that suddenly he might lose his fortune. And then there would be no "indigent rich" to take care of him. Freedman was a multi-millionaire. In his declining years he was at times beset by a fear that suddenly he might lose his fortune. And then there would be no "indigent rich" to take care of him.

They, of all poor folk, were the most unfortunate, in his opinion. There were homes for the poor of all sorts and conditions, but how could persons of culture, refinement, aristocratic tastes and habits adjust themselves to ordinary retreats?

Only the most exclusive and elegant surroundings could make this class of person feel at ease. They had a deeper pride; they suffered more in want, Freedman believed.

**EVERY LUXURY** And when he died he left \$4,000,000 for the establishment of a palatial mansion to house the poor little once-rich. He emphasized that they must have every luxury. To date \$1,000,000 has been spent on the equipment of this home, which resembles a millionaire club more than anything else.

Applicants are put through the most rigorous questionnaire and their stories carefully checked. They must fill blanks telling how they came to lose their fortunes; where they have lived; what sources of income they have; the extent of their fortune—a dozen other things. Those who have been plunged from poverty into an elegance beyond their fondest dreams, still rub their eyes and wonder when they will awaken.

For their mansion-home covers an entire block on an exclusive New York drive. There is a huge, marble-tiled piazza and a series of reception rooms such as may be found in royal castles. Furnishings were collected and placed by interior decorating experts. Card rooms, billiard rooms, smoking rooms, dining rooms, bedrooms, with private baths, refrigerating systems, laundries, vacuum cleaning plant, workroom and storeroom, balconies and foyers and high-priced chefs, especially selected menus—anything and everything is there for the modern Aladdin, and with the most luxurious appointments.

An expert hotel man conducts the place at a high class club. The "guests," as they are called, are chiefly lawyers, brokers, business men, judges and other professional men who have lost their fortunes on the market, in a bank crash, or through poor investments.

**NEW APPLE**—On the Woodlands farm of George C. Atkins, near Brantford, Ont., noted for its scientific fruit raising, an apple seedling is being developed which is supposed to be a cross between a snow and a spy and is practically free from scab. Mr. Atkins, shown above, is a graduate of Columbia University, and for many years a prominent New York corporation lawyer. Now he is an authority on the growing, marketing and handling of fruit.

**OLD BUT ACTIVE**—To reach the age of 100 is a great achievement. To be active at this age and conduct a productive business is even a greater feat. Charles Quick, maker of racing saddles of Vancouver, B.C., has just begun his 104th year. He looks hardly sixty. Quick was born in England. He is given credit for inventing the ordinary sewing needle with an eye in the end. He was at the Willows during the race meets at Victoria this year.

**SILENT BILL JOINS THE GANG**—Everywhere you turn in Central Park, New York City, you see a statue. But there's always room for one more. Here's the latest arrival, "William the Silent," a replica of the statue at The Hague.

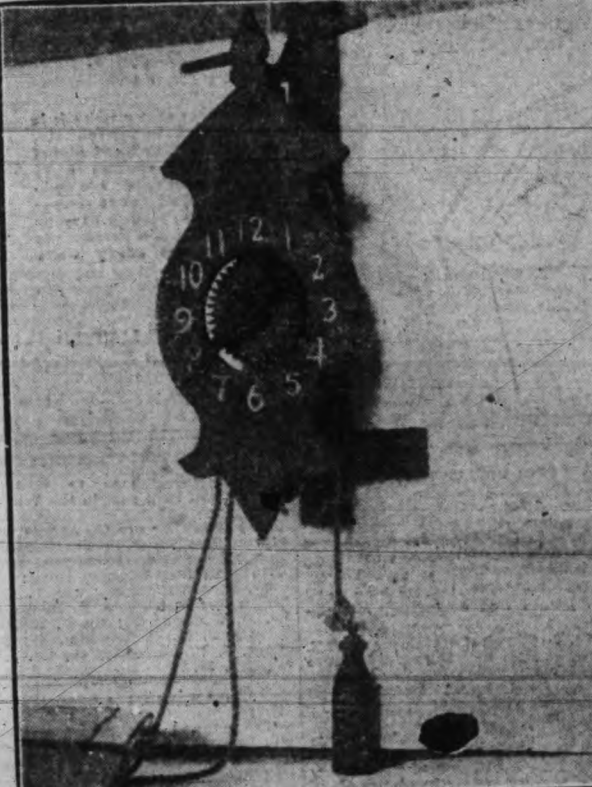

**NOW I'LL TELL ONE**—What was it that Al Jolson (right) told Cal Coolidge and John Drew that made them laugh so? Probably something about his Tennessee mammy or Alabama where the birds sing. At any rate, the president held up a cabinet meeting half an hour while he was entertained by a group of New York actors at the White House.

**HER MARK**—Gail Curci cuts her initials in a tree in Green Park during her recent visit to London.

**FUR IS ALIVE**—The cold weather will not have much effect on Miss Lucille Vaughan of Lawrence, Kas. This winter she will wear her pet fox around her neck and to from the University of Kansas, where she is a student.

**ANTIQUE**—What is thought to be an excellent imitation of an old Dutch clock, dating back to about 1670, was discovered in a unique way, by R. H. Leeson of Cookstown, firmly imbedded in a piece of soft coal in his cellar. The frame work and cords are in excellent repair. On the face is the inscription: "Columbus, anno 1492."

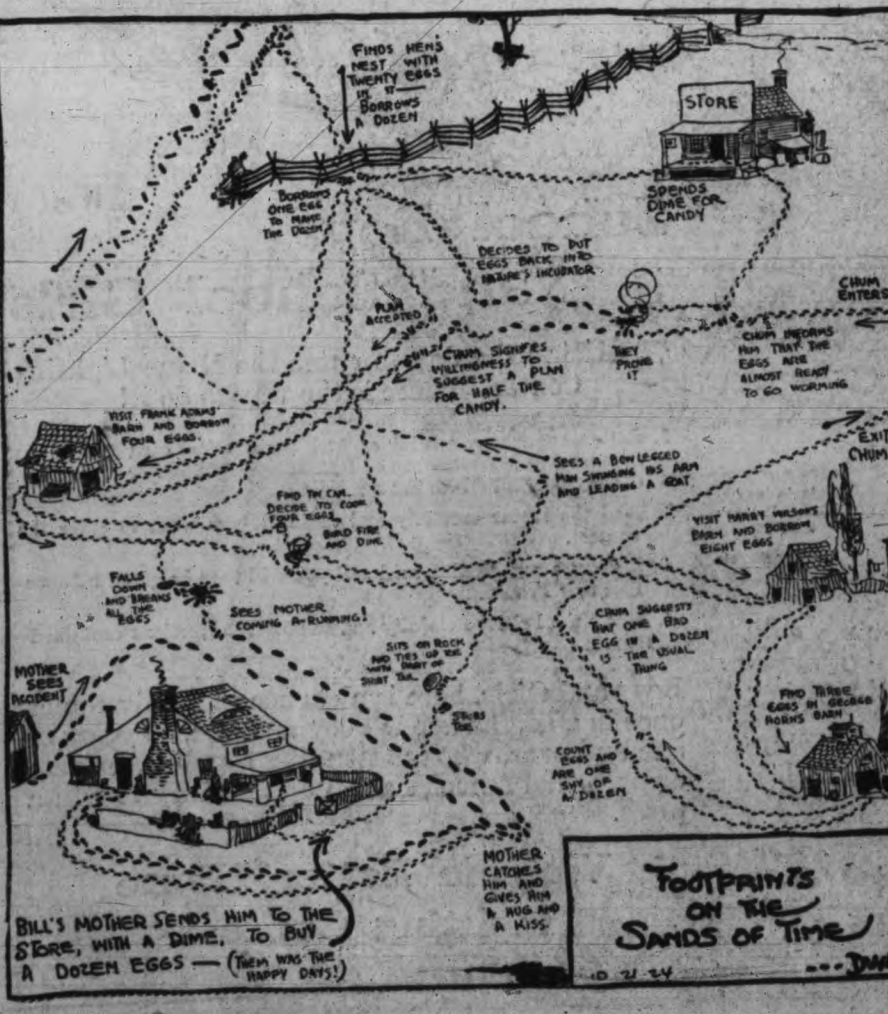

**SAFETY RAZORS' ANCESTORS**—Here are shown the oldest razors in the world, found by the joint expedition of the University Museum, Philadelphia, and the British Museum, London. They were found at Ur of the Chaldees, Babylonia. Two razors were chipped from obsidian and are more than 6,000 years old. They were found in the graves of the Sumerians.

**SAILS**—Mrs. Esme Magann, who with her mother, Mrs. Plunkett Magann, sailed with the Prince's party on the Olympic. Mrs. Magann was several times a dance partner of the Prince's during his stay in Canada.

## SCHOOL DAYS By DWIG

**FROM CO-ED TO GLOBE-TROTTER**—World wanderer returns. The photograph shows Miss Helen Pulling of Windsor and Miss Nora Gray of sixty-nine Oriole Road, Toronto, former U. of T. co-eds, photographed on-board the Italian liner, "Giuseppe Verdi" on their return to America, after an extended tour of Europe via liner, train, motor, gondola and aeroplane.

**IN WITH 'VAGS'**—Peter Smith and Aemillus Jarvis coming back to the Toronto jail, after having spent the morning at the city hall where they had their photos and finger prints taken. They traveled from the City Hall cells to the jail in the police wagon in the company of a vagrant just leaving the wagon with his hand on the door.

VICTORIA, B.C., SATURDAY, NOVEMBER 1, 1924

# COURTENAY IS CENTRE OF RICH FARMING AREA

## Dairying, Logging, Potato Cultivation Important Industries

### COURTENAY PRESENTS CASE OF GREATEST USE MADE OF LUXURIANCE OF NATURE

Dairy Farming Has Been Chief Industry for Many Years and Comox Creamery is Fine Example of Agricultural Organization

In a recent speech of Right Hon. Mackenzie King at Cumberland he said that all wealth was based on the products of agriculture, mines and fisheries. This being accepted as an economic fact then there is no doubt of the future of the wide district that is now tributary to the town of Courtenay.

When Reginald Pidecock, the founder of Courtenay, first came into the district by way of a canoe from Nanaimo he found a wide valley bordering on the Courtenay River so

full of fish and game that it justified its name in the Esquimalt dialect of Comuckthwey, meaning "plenty," which abbreviated and anglicized, stands to-day as Comox. This valley was dotted with groves of cottonwood and alder, above which, on the benches, grew the more sombre conifers—the giant Douglas fir. On the flats, at the mouth of the river, then unprotected from the sea, could be found dense flocks of ducks, brant, and more rarely, swans. It was certainly a land of plenty that the first white settlers found themselves.

#### DAIRYING PROSPERITY

Almost from the first the Comox Valley became identified with dairying and the Jersey breed. The late William Lewis imported the first pure-bred Jerseys from California and Alec Urquhart adopted the little cows as his own, and, wherever dairymen meet the name of Alec Urquhart is known. To-day at Glenurquhart Farm, his son, W. A. Urquhart, is worthily upholding the family tradition. A year ago he won the first, second and third prizes for the bull having the five highest-producing daughters. And that indeed is the keynote of the Comox dairying industry—the farmers do not breed for show, but for production, and they get it. Twenty-three years ago the farmers of the valley found that peddling their butter to the Cumberland miners was a tedious and unremunerative business and the Comox Creamery was founded. W. J. Carroll made their first churn of butter and he is still there, and R. U. Hurford has been connected with the organization since 1905, either as secretary or president. It grew slowly, but last year's turnover was \$200,000 and its patrons embracing an area as far as Alberni on one side to Hornby Island on the other, number 283. They produced 206,329 pounds of the famous Comox butter last year, and that is not all they do. They are the organizing centre for the poultrymen, potato-growers and fruit-growers, and are wholesalers for the farmers in all these things. They also make a fine brand of ice-cream. The creamery now has built up for shareholders an investment of nearly a hundred thousand dollars. Dairying is certainly the staple in the agricultural bill of fare, and the cream cheque distributed monthly may not be as large as the farmer would like it but it is regular and it is certain, which is more than can be said of some other lines.

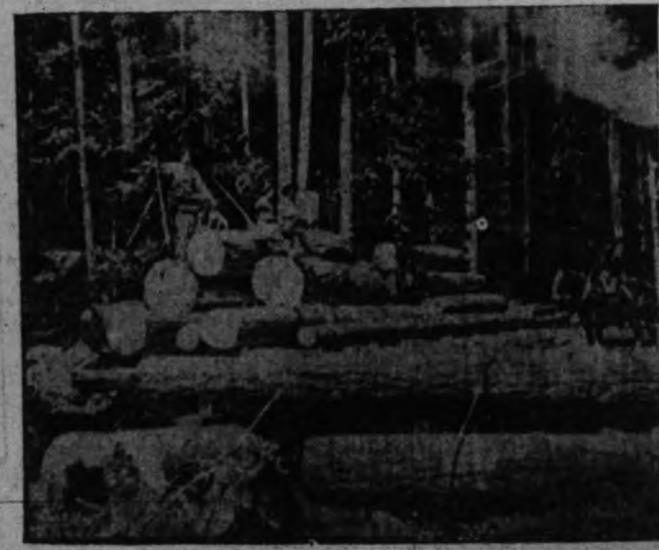

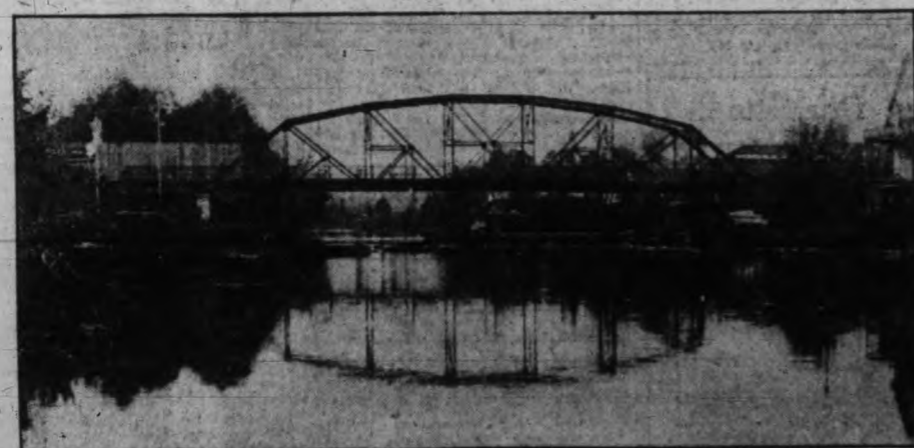

#### POTATO CULTIVATION

Of other branches of farming certainly the potato offers the most promise. Two years ago the Comox potato won the provincial cup at Grand Forks, and the quality and quantity handled is increasing rapidly every year. As to marketing the experience is that if properly graded there is no great difficulty, there being a good local market in the mines of Cumberland and the logging camps of the district, while year by year more are being exported to lower island points. The flocks of sheep, too, are growing in number, the many acres of seeded-down and logged off land providing them with beautiful and cheap pasturage.

#### LOGGING SITUATION

Yet there are many months when the farmer with only a few acres cleared would be hard pushed to make a living if he did not have work in the logging camps to fall back on. The Comox Logging and Railway

Company, with its headquarters at Headquarters, twelve miles out of Courtenay, recruits its best loggers from the brown and silver of the pioneer farmers of the valley. The Comox Logging Company, cutting between eighty and ninety-million feet a year, runs long trains of logs through Courtenay to their booming ground near Royston, and they have distributed over their vari-

### VALLEY CITY AVOIDS LIABILITIES INCURRED BY MANY MUNICIPALITIES

Is Fortunate Both in Water Supply and in Lighting Service; New Post Office to Afford Facilities for Dominion Officials

Upper—Two views of Courtenay.  
Second row—Right, Comox Wharf; left, New Post Office.  
Third row—Right, Union Bay Cakes Ovens; left, New Courtenay Bridge.  
Lower—Left, Comox Creamery; right, Logging Scene.

There are few municipalities in British Columbia with a healthier balance sheet than that of Courtenay. It was too young a town—only incorporated in 1915—to be caught in the disastrous pre-war real estate boom although its influence is seen in the extent of the acreage taken in, 800 acres in all. It acquired its own electric light plant in 1918, buying out a private company and the profits from this plant has done much to keep down the mill rate since. The power is purchased from the Canadian Collieries, Limited, at its Puntledge plant, and the city has a franchise for a wide district. It has twenty miles of line in the district, and the property is valued at \$50,000. The system is continually being expanded as new sections are received from new sections. It runs twelve miles out to Headquarters, where the machine shops and settlement of the Comox Logging Company is all driven by the city's power, and with the light and telephone the farmers' wives in the vicinity of Courtenay are spared many of the drudgeries and discomforts that ordinarily attend rural life.

#### WATER SUPPLY

In 1921 the city put in its own water supply, piping it from Brown's River, a mountain stream fed by the snows and glaciers of the Beaufort Range, its purity is unassailable, and during the dry Summer and Fall of the past two or three years it has never been necessary to put any restrictions on its use. It was put in at a cost to the city of over a hundred thousand dollars, but consumers have gradually grown in number until to-day it is almost providing revenue sufficient to pay interest and sinking fund on its bond issue; and the system being one of gravity flow the cost of maintenance is negligible. In spite of the heavy bond issues necessary to provide the public utilities and to maintain the eight-roomed public school and staff, it has been possible with the aid of the handsome surplus from the electric light plant to keep the mill rate down. Last year it was 27¢. This Fall there has been more building of homes in progress within the municipality than since 1920, when the many ex-service men who came into the valley created a boom on a small scale. Tenders are now being called for a new post office in which also will be placed the office of an inspector of customs. There is to-day in Courtenay no public building provided by the Dominion Government here. Years ago money was voted for a post office but there was some dispute about a site and the appropriation was allowed to lapse; now, after much perseverance on the part of A. W. Neill, M.P., a handsome building of dressed stone and brick is to be erected at an ultimate cost of \$36,000.

### Courtenay Well Supplied With Transportation

Very few rural districts have better transportation facilities than Courtenay for taking the products of the farm, the mine, the forest and the fisheries to market. There is a daily train service on the E. & N. railway, and three freight trains a week from Victoria and way points. By water C. P. R. boats call twice a week at Comox, Union Bay and other points, and during the last year there has developed a very promising freight service on the Courtenay River. The Vancouver-Courtenay Transportation Company, headquarters at Bidwell Street, Vancouver, has run a scow up the Courtenay River for the past twelve months to the government wharf and has taken back farm produce and other merchandise of the valley. The freight to be thus obtained by the water route has responded so remarkably to the expansion of water-route facilities that the Dominion Government is now thinking seriously of dredging a five-foot channel up to the government wharf, a project which the Victoria Chamber of Commerce is pledged to support. At the present time boats can only get up at high tide, but with the five-foot channel, boats of much larger draft could come up at half tide. Recent borings and soundings taken by the Dominion Government engineers have shown that dredging can be undertaken under the most favorable circumstances since only sand and gravel were encountered.

# NEW GIANT AIR TRANSPORTS MOVE AWAY

## RICH AND POOR SING APPEAL AT ST. PAUL'S

Choir of 2,000 From All Ranks Fit Old Folksongs to Modern Tunes

Peers to Join Dock Laborers in Battle of Apathy Towards Church

London, Nov. 1.—An attempt to cure the "apathy of men toward the Church" is to be made in the near future, when a choir, composed of 2,000 men, will sing old folksongs to the words of modern hymns at St. Paul's Cathedral. The service to be held at the same time will be for men only, and peers, dock laborers and actors—men in every walk of life—are to be included in the huge choir.

Most of the tunes which will be used during this unusual mass are melodies picked up by the late Baring-Gould, author of several hymns, among them "Onward, Christian Soldiers," during his wanderings about Europe. He found these tunes in the Basque country, Bavaria, Corsica and Brittany, and some of them actually were associated with religious services, others being tunes used for centuries at village fairs. Some of the old Basque tunes date back to the seventh century, and are particularly suitable for congregational singing.

## Canada Minister Attends Portsmouth Naval Unveiling

London, Nov. 1.—Hon. E. M. MacDonald, Canadian Minister of Defence, was present when the Duke of York unveiled the Naval Memorial here. The memorial is one of three erected by the Imperial War Graves Commission to commemorate the losses at sea by the Royal Navy and sister services.

The memorial is a fine piece of Portland stone and stands some 100 feet high. The design represents a column at top of which are four bronze figures, representing the four winds, the column being topped by a copper sphere. Round the base are thirty-two large bronze panels, on which are recorded the names of the missing from the manning ports concerned.

The Portsmouth memorial commemorates approximately 3,700 officers and men.

## Ancient Egyptians Used Hip Flasks; Had Strong Beer

London, Nov. 1.—That the hip-pocket flask is no modern invention is proved by an exhibit which the British Museum has acquired. This is a round, flattened flask, that was used more than 3,000 years ago—that is to say about 1275 B.C.—an ancient flask and some other interesting relics, which tell tales of merry drinkers of ancient Egypt, will be on exhibition here shortly.

The beer really was strong in those days. Written testimony to that effect, by some one who drank it, is among the relics. The fragments of a beer vessel has boldly painted legends on it, the inscriptions being written in a form of shorthand adapted to represent pictures of early hieroglyphic writing.

There is a picture of a jar with three strokes—to indicate there were more than one jar. Then comes a circle representing knowledge, with a pair of hands turned down—meaning "nothing doing." After that is a chicken, which is the sign of an Egyptian sound, and finally there is an eye, denoting wakefulness.

Officials at the museum translate this riddle as meaning literally "beer which ignores dreams"—in other words, beer which is so strong that it induces deep and undisturbed sleep.

Beer was a common drink among people of that time, as was in England of the Middle Ages. However, no trace of liquid has ever been found in these ancient jars or bottles. Although it is known the ancient Egyptians left these filled, their pottery was not airtight, consequently whatever it contained simply evaporated.

## King's Dog Again Gnaws Bones With New False Teeth

London, Nov. 1.—By British law, dogs are entitled to "the first bite"—that is to say, they must be allowed to have bitten more than one person before they can be legally adjudged vicious and dangerous. But how will the law apply in case the dog is equipped with false teeth?

Fitting Fido with new sets of teeth has become a practicable operation. It was inaugurated by Professor F. T. G. Hobday, honorary secretary of the King George, who eighteen months ago was appealed to on behalf of an aged Schipperke, which had lost all his teeth. Impressions were taken of his mouth and a set of false teeth fitted with springs and wires as in human dentistry.

The animal finally was equipped with new ivory, the cutting edges reinforced with platinum foil and gold solder. He was then reintroduced to his daily mutton chop. According to Dr. Hobday, the dog attacked the bone with as much vigor as when he had his original teeth.

## HOW BOLSHIEVİK BOGEY WAS PLAYED UP BEFORE THE BRITISH ELECTORS

### BOLSHIEVİK, BOLSHIEVİK, Where have you been? Over to England Where the REDS are still green.

The Conservative party in Great Britain, during its successful campaign which finished Wednesday, made a great effort to make the Soviet treaties and the proposed loan to Russia the dominant issue. One of the most effective of the Conservative posters is shown above. Judging from the size of the Conservative majority, nothing in the way of effectiveness was lacking in the campaign.

## BACK IN OLD LONDON IN A MILD OCTOBER; BIG TOWN'S GOSSIP

By Pantou House

LONDON, Oct. 26.—London, even as parts of Canada, has been enjoying a second Spring in this mild month of October. But the brightness of October is but an afterglow before the darkness of night—Winter, as a Times correspondent says.

Birds are acknowledging the vernal freshness in Autumn by making the mornings sweet with song. The second flowering of primroses and violets in city gardens only slightly exaggerates the revival of wild blossom in the stubble-fields. A whole posy of May and June blossoms can be picked in the second week of October, in the half-ploughed cornfields. Poppies have flung out three-heads instead of one.

Hazel-nuts are plentiful but small and often hollow; while many clusters hang dead or half-formed. This is the history of a Spring of promise and a degenerate Summer. Acorns are also small but numerous.

Richness of the blackberries is the strangest—for this bramble blooms latest of all wild fruits; and its berries have grown sweet and juicy since July's tempests.

Just as the fresher mornings seem thrilled with a breath from Spring, so is the contrast between this Autumn's wealth of achievement and the red leaf decay insistent. The red fruit speaks of accomplishment; the red leaf decay of dissolution, and both are inherent in Autumn's splendor. One dying plant makes a prop for another.

The anti-climax is brief in England after the splendor is gone; the last red oak leaves whirl over; the yellow crabs fall for the deer and the days lengthen fast—while new tufts shoot green in the hedge-rows.

"SEEING THE LIONS"

People still talk of coming to London "to see the lions," meaning to see the sights, and do not know that the phrase belongs to a time when all strangers went to see the King's Beasts in the Tower of London as a matter of duty. Where the Lion Gate, from which a stone bridge led over the moat to the Lion Tower, which with the Middle Tower formed an island in the Moat. The Lion Tower consisted of a ring of walls enclosing a pit, on which the animals' cages abutted. The "Master of the King's Beasts and Apes" had a dwelling close by.

For nearly 600 years—from 1235 to 1854—London's Zoo was at the Tower. The collection began with a present of three leopards, sent to King Henry III. in 1235 by the Emperor Frederick II. In complimentary allusion to the leopards seen, to this day on the royal coat of arms. In the same year a present of a white bear was received from Norway, and accounts are still preserved dealing with the creature's expenses. Fourpence a day (equivalent to several shillings in modern money) was allowed for its food, and other items provided from the King's private purse were a muzzle, an iron chain, and a "long and strong cord to hold him when a lion, a tiger, a lynx, an English wolf (who must have been about the size of his race), a porcupine and an eagle. But the lions who gave their name to the menagerie were always its leading feature, and in the eighteenth century there were as many as eleven. The present Zoological Gardens took over the last of them in 1854.

ANOTHER "LION"

Little more than a hundred years ago, one of the "lions" of London was a mental hospital! The Lions, the Toms (in the Abbey) and Bedlam were considered, even in the eighteenth century, to make up a suitable programme for three lads on a visit to the capital. People went to Bethlehem Hospital in Moorfields, to see the lunatics in exactly the same spirit in which they went to see the wild beasts in the Tower, and about the only restriction on visitors' movements was that they were not allowed to take strong drink or tobacco to the patients. Even so humane and enlightened a person as Dr. Johnson was not too sensitive to walk through the wards, and as for Pepys (who notes that he stepped into Bedlam, and saw several poor miserable creatures in chains, one of them mad with making verses) it does not seem to have occurred to that genial soul and determined sight-seer that there was anything objectionable about the show—though he describes the then popular sport of bear-baiting as "a rude and nasty pleasure."

(Concluded on page 19)

## ALL TO FLY IN 25 YEARS. SAYS PROF. LOW

### But Machines of Future Will Be Different From Clumsy Air Busses of To-day

### Average Man Will Be Able to Buy Cheap Plane and Learn to Drive Quickly

London, November 1.—"The young man of twenty-five years hence will be ashamed to confess he cannot fly, but his machine will bear little resemblance to the best air busses of to-day. While admiring our courage, he will wax sarcastic over our feeble efforts."

This is the opinion of Professor A. M. Low, after witnessing the light aeroplane trials at Lympne. Professor Low was a major in the Royal Air Force during the war, in charge of experimental work, so therefore is qualified to express an opinion.

"The fact is," says the professor, "the trials of the light aeroplanes have shown up its shortcomings in a rather brutal way. The present day 'glider' is noisy, dirty, uncomfortable, dangerous, grossly unreliable and far from foolproof. All this will have to be changed before flying becomes popular."

"England is not conveniently flat, and our weather conditions are not verily troublesome; indeed, on an average gusty day, it is a moot point whether the over-loaded, under-engined plane of to-day, is not considerably more dangerous than the old type on which pilots used to practice in 1916."

"Therefore, to pretend that in the immediate future the average man will be able to buy a cheap plane learn to fly in a week and thoroughly enjoy himself, is so ridiculous that it does real harm to a movement which deserves every encouragement."

Professor Low believes that the future lies with what he calls a motor-plane—a combined aeroplane and motor-car.

"The busy man ought to be able to drive his plane to an open space suitable for taking-off, not keep a car for transporting and hire a lorry for transporting his plane. "On the homeward journey he must be able to land from the air in his garden in the heart of the city, or else to drive home, plane and all, when he has landed outside the city. "When that day comes we shall have solved the problem of popular aviation, but if it is to come there must be plenty of hard work and keen elimination."

## Generator Too Big To Enter Building

London, Nov. 1.—You may drive a generator to the power house, but you cannot make him shrink.

A sixty-five-ton generator was moved from Birmingham to the Marylebone Power Station. The two hills it had to climb were productive of real spectacles, with police to keep the crowd back, wagons to spread the sand, and camera-men to take moving pictures. With tremendous care and effort it was got right to the door of the power-station, when it was found that there was but an eight of an inch to spare on either side. Workmen chipped away the stone of the gateway, and the generator is now warming up to its daily duties.

## Royal Trio Becomes Quartette

London, Nov. 1.—The royal party which was seen in the park yesterday, was a quartette, as the addition of the Duke of York to the King, Queen and Prince of Wales, made it so.

The Duke of York, who was seen in the park yesterday, was a quartette, as the addition of the Duke of York to the King, Queen and Prince of Wales, made it so.

## The Monsters Bring Reserves in a Hurry

Above—A Vickers-Vanguard aerial troop transport capable of carrying twenty-two men and two pilots. Below—A Vickers-Vernon troop transport capable of carrying twelve men and two pilots. A squadron of these carried a British force into Mesopotamia, breaking up a native rebellion in half an hour.

## FLATS PLANNED IN LONDON COLD STORAGE SPACE

### Meat Dealers Offer to Convert Refrigerators Because of Apartment Shortage

London, Nov. 1.—An interesting sidelight has been thrown on the housing shortage in London by the proposal just made by big meat dealers here to turn some of the space normally used for cold storage into apartments. Various reasons are brought forward to explain this state of things. Chief of these is the increased demand for chilled meats rather than for frozen meats.

Butchers say chilled meat calls for a temperature of thirty degrees, while frozen meat requires a temperature of twelve to sixteen degrees. Chilled beef is not put in cold storage in London, but goes direct from the dock to the markets, or to the retailer.

Then, too, the Continental countries are beginning to take a great deal more meat from London, the amount of chilled meat exported to the Continent in two years having risen from 8,340 cwt. to 35,270 cwt. Consequently, the cold storage firms here are finding less and less call upon their space. Some of them complain that not one-tenth of their space is filled.

Still another factor influencing the amount of frozen meat stored here is the storage charge, which is three to four times as high as prevails on the other side of the Channel. It is said that if the importer knows he is (Concluded on page 19)

Troops Boarding a Vickers Aerial Transport

## TRIALS PROMISE 50-CENT FLIGHT BETWEEN ENGLAND AND FRANCE

London, Nov. 1.—From England to France for fifty cents—that is likely to be the outcome of recent trials of light airplane clubs, as the outcome of the two-seater dual control airplane competition at Lympne, when a number of baby planes of varying designs proved thoroughly efficient.

At the moment, however, the British railway and steamship companies are not getting too excited over the prospect of airplane competition on Continental routes, and do not anticipate that the thousands of holiday makers who now make the trip will be converted to aerial travel for many years to come.

## New Steel House Built in a Day

London, Nov. 1.—A steel house was built in a day at Glasgow for the committee who are investigating methods of mass building of houses for the Minister of Health.

The sections for the steel house were examined, and in an hour and a half the walls were up, floors laid and the roof nearly completed. The house was practically complete by five o'clock. Under ordinary circumstances, however, it would take fourteen or fifteen days to complete a steel house down to the last detail.

## 1,000 H.P. Plane For 2,000-Mile Non-stop Flight

London, Nov. 1.—A great all-metal plane, driven by three 1,000 horsepower Napier engines, capable of a 2,000 mile non-stop flight, will be constructed for the All-Red Empire Route.

This is the London-Cairo trip, with a relay at Malta, worked with two planes of the type described above. By this means passengers and mail can be laid down at Cairo thirty-one hours after leaving London, including a one-hour stop-over at Malta to change planes.

## BIG VICKERS PLANES ABLE TO CARRY COMPANIES

### British Feat Opens up Whole New Vista For Army Authorities

### Accomplishment Adds Enormously to Effectiveness of Forces in War

## Troublesome Natives in Distant Deserts Quelled in Short Order

LONDON, Nov. 1.—Aerial transportation of troops loaded with machine guns and accomplished safely, swiftly and comfortably!

It is no longer a theory. It is an accomplished fact. Britain has done it.

The war and air ministries do not beat the big drum about it. They don't advertise it. But the feat has been pulled off so many times now that the war-making powers of Britain no longer look upon it as an unusual thing.

As soon as airplanes were built which flew safely to Paris from London and vice versa, carrying six or eight passengers, the airplane men and the army got busy with pencil and paper and began planning troop-carriers.

Theoretically there was nothing to prevent the dream being carried into execution. But paper theories are often hard to carry into actual fact. In this case, however, it was done easily.

The great Vickers company constructed airplanes that could carry twelve passengers and two pilots. And the army bought them so promptly that England was able to give wild tribes in Mesopotamia the surprise of their lives.

REVOLT WAS SHORT

Natives were rebelling against British authority and were making themselves very troublesome. They felt safe because there were no railways on the rampage and motor transport was difficult if not all but impossible.

But one fine morning two big squadrons of troop-carriers came roaring down into the desert country with a company or so of British troops. They had plenty of machine guns with them. That particular rebellion died in about thirty minutes.

For army authorities all over the world it opened a new vista.

The troop carriers are not only useful in deserts and plains where there are no railways, but likewise are of enormous potential value in a war such as the last great one. There were many instances where the allied line was thinly held by troops and where it was next to impossible to reinforce them quickly on account of congestion on the railways and the roadways. An ample supply of troop-carrying airplanes would have made the difference between victory and defeat.

Encouraged by success of the Vernons the Vickers interests have turned out the biggest troop-carrier yet built. It is known as the Vickers-Vanguard. It carries twenty-two troops and two air pilots.

Its power is supplied by two Rolls-Royce Condor engines, each of 575 horsepower. Its type is that of a twin tractor biplane-landplane. It has an enclosed cabin for its passengers, which looks very much like the inside of a London bus, with the addition of a washroom for travellers.

CARRIES TWENTY-FOUR MEN

The over-all length is fifty-three feet and the height seventeen feet, three inches. The machine itself, plus the water she carries, weighs 16,919 pounds. It carries a load of 280 gallons of petrol and eighteen gallons of oil.

In addition to the weight of two pilots and twenty-two troops, it carries 650 pounds of baggage and 103 pounds of sundries. So that in all, when loaded, the weight is nearly nine tons.

The machine is made in the main of spruce and elm. The full maximum speed is about 100 miles an hour. The minimum is forty-seven. It can cruise a lot of 400 miles. This type of machine has not yet been used by the army. One of them is shortly to be tested in the passenger service by the Imperial Airways Company.

Theoretically there is nothing to prevent the building of airplanes carrying 200 to 300 troops, but aeronautical authorities here don't think it will ever be attempted.

To begin with one huge machine of this kind would cost as much as ten of the Vickers-Vanguard type. If anything gets out of whack with such a huge machine, it is a serious loss. If anything goes wrong with one or two of the smaller machines, there are still the other eight or nine to give active service to the army.

John Coleman, of Salisbury, Wiltshire, built and furnished a little bungalow complete with a legacy he inherited. Then he advertised at a cost of two shillings for a wife to share it with him, and in less than two weeks he had two hundred answers. He narrowed his choice to two, between whom he still wavers. The landlord of the village inn has a room decked out for the bride.

John's daily rejections became of so much interest that The London dailies published them under the heading, "The Matrimony Stakes." A girl from Harlesden, and one from Fulham, both London suburbs, have survived the semi-finals, and the Harlesden girl is favorite.

# AUTOMOBILE NEWS

## BOULEVARD STOP SYSTEM BRINGS TRAFFIC CHANGES

### Drivers Enter Main Streets in Low Gear is Advocated

The rapid spread of the "boulevard stop" system of regulating traffic in cities has served to emphasize the importance and advantages to the driver of quick getaway and ease of gear-changes.

Many cities have passed these ordinances, which require that every car, before entering a "main thoroughfare" shall come to a dead stop and then proceed at a speed slow enough to permit its being brought to a standstill within its own length. The result is to speed up traffic on the through streets, as

well as to decrease the risk of accidents caused by drivers rushing out of side streets without proper regard for approaching vehicles.

In most cities the ordinance is strictly enforced, penalties being exacted for violations even when the driver coming out of the cross street can see clearly that there is no traffic on the main highway.

Drivers on the side streets, in effect, are compelled to enter a main thoroughfare in low gear, with the result that many motorists are learning for the first time the value of being able to shift quickly and surely, as it is of advantage to shift into low gear even before the car has made its momentary stop.

There has been some objection to the new regulation, principally from drivers who have found that, though they may have been driving cars for years, they really never have learned how to shift from high or intermediate to low.

"Now, boys," said the schoolmaster, "the word novelté means a short tale." You may now write in your copy-books a sentence containing the word.

## COLD WINS WARMS MOTOR OWNER THAT DANGER THREATENS

### Expert Gives Advice as to Method of Keeping Radiator From Freezing

Now that the season of the year is approaching when motorists must take care that their radiators shall not freeze, timely advice from men who know is most appreciated. This advice, sent specially to The Times, warns motorists what not to use in trying to keep their radiators in a liquid form.

Question—Would you consider it dangerous to use kerosene in the radiator of an automobile to prevent freezing in winter?

Answer—The United States of America Bureau of Standards Bulletin L.C. 28 has this to say re kerosene as an anti-freeze agent:

"Kerosene has a lower freezing point and higher boiling point than water, but the inflammability of its vapor makes it dangerous to use, and the high and uncertain boiling point might lead to the serious over-heating of the engine, or even to the melting of the solder in the radiator. It has a marked solvent action on rubber parts. These facts would seem to clearly indicate that this material should not be used."

Question—What is the difference between Denatured and Wood Alcohol as regards Anti-Freeze?

Answer—The United States of America Bureau of Standards Bulletin L.C. 28 has this to say re Wood Alcohol:

"The alcohol solutions do not exert a greater corrosive action than water alone. This can be predicted from theoretical considerations and is well established in practice. However, wood alcohol sometimes contains free acid, such as acetic acid, which is objectionable, and for this reason wood alcohol should not be used unless it is known to be free from acids."

Get the best and be sure you can have your mixture tested for freezing resistance whenever necessary. It is very important to be able to test your mixture of alcohol and water—otherwise you run chances of having a weakened mixture in the cooling system just when it should be strong.

This is the advice and the warning of George Kaestner, manager of the Freezer Alcohol Development Department, Canadian Industrial Alcohol Company, Limited.

## OAKLANDS AGENT

W. D. TAIT

One of the members of the firm of Tait & McRae, dealers in used and new cars, agents for the Oaklands, one of the most attractive machines on the market, who looks forward to one of the best years for automobile sales in the history of Victoria.

## France Making Bid For Speed Title of World

### Egyptian Sportsman Wants to See U. S. Record Shattered

Paris, Nov. 1.—France is preparing to send to America a racer equipped with the mission of bringing back the world's short-distance speed record.

This record, now held by Tommy Milton, is 156.4 miles an hour, established in his sixteen-cylinder Duesenberg at Daytona Beach. To make such a short stretch at a faster clip, M. Moglia, connected with the Biallot, and the Talbot-Darracq companies in France, has designed a 400-horsepower car, built solely for speed, to the order of M. Djelaladdin, an Egyptian sportsman, who will accompany the car to America.

Beside the high speed feature, the

car will show a new way to reduce weight. With the standard fifty-six inch tread in front there will be only a thirty-seven inch tread in the rear, and the differential will be eliminated.

At the same time, use of aluminum water jackets and the same metal at other advantageous points will reduce the weight of the car to a minimum.

The engine will be an eight, in two castings of four each. Each cylinder will have a carburetor and a supercharger to permit of full fuel supply at the highest possible speeds.

And streamlining on it has been developed to the ultimate.

## OAKLAND'S AGENT LOOKS FORWARD TO BANNER YEAR

### W. D. Tait Tells of Hopes For 1925 in Automobile Trade Here

D. D. Tait, of the firm of Tait, McRae, agents here and whose garage and offices are at 325 Yates street, has been in business in this city since 1919. For one year Mr. Tait has been in independent work of his own, but in 1920 joined forces with Mr. McRae, and the two have since carried on their business with rather outstanding success.

"The sales for the line of motor which my firm carries," said Mr. Tait to The Times yesterday, "has proved very satisfactory during the past year. Mr. McRae and I have been well pleased with the success of the season. I can safely say that the sales have been very good, indeed. What is more, there is every prospect of a great and encouraging improvement in the new year and through the months to come."

The garage of Tait and McRae is one of the most modern and well-equipped in the city. The expert mechanical staff carries on electrical and engine work of all sorts. W. Burley is the chief of this department and a more reliable and trusty mechanic with the business at his finger-tips and perfect supervision over the men under him, could not be found.

### REPAIR ANYTHING

Mr. McRae himself is the chief of the sales staff. The firm operates on wide policies, selling and buying cars, and carrying a complete stock of parts.

"Yes," said Mr. Tait, "I guess we can outfit everything in the line of new rubber. But we do not carry tires."

"We have every faith in the future of Victoria," Mr. Tait continued, "and the growth of the city and the continued prosperity of the place from a business point of view. I think that automobile men here are agreed that 1925 promises to be one of the banner years, so far as we are concerned. All the garages report good sales and excellent returns on their investments. Automobiles are one form of real estate which is readily sold in this city."

### OAKLAND'S POPULARITY

The new Oakland car has created quite a sensation in the Canadian and American motor market this year. The machine, artistically designed and colored, equipped with balloon tires and w. s. tires, built by the most exacting driver, has created a decidedly favorable impression wherever it has been put on exhibition.

The new Nash series has proved an exception to the rule in its reputation of these cars; in fact, the sale has been highly ranked, perhaps, as compared with the other cities of the continent.

Indications pointing to a record-breaking volume of sales are seen by E. H. McCarthy, general sales manager of the Nash Motors Company, in making public the fact that Nash now has more orders than it can handle before at this time of year. "Not only does the volume of orders for the new Advanced Six and Special Six exceed any previous September, but the company's history," says Mr. McCarthy, "but it also surpasses any single month of the last six months period of all previous years."

"The reason," he recorded, "is the new Nash series by the public has been highly gratifying, even greatly exceeding the factory's expectations. Since the new Nash lines were announced, requests for information about the Nash franchise and actual applications for territory have been received from 378 competitive dealers in all parts of the United States. We have every reason to be optimistic at this time and look forward to excellent business the rest of the year. As far as Nash is concerned, the big season is on in full swing and the problem now is to supply the demand. The Kenosha factory is rapidly reaching the point of peak production and it will not be long before that stage has been attained. Our records show that the demand has been increasing constantly since the introduction of the new line and there is no reason to believe that it will not continue for an indefinite period. Consequently we are preparing to respond to the full limit by taking whatever steps may be necessary to increase our production."

"Orders for the Nash Special Six series made at Milwaukee also are exceptionally heavy, but because of the tremendous task of changing the plants over for a six-cylinder production from a four basis, the Milwaukee production naturally will be slower to reach its full capacity; operations there, however, are being stepped up to meet heavy demand."

"Is Mr. Hutchinson at home?" inquired a caller. "Which one?" asked the parlormaid. "There are two brothers living here."

For a moment the caller looked puzzled; then he had an idea. "The one who has a sister in Boston," he replied.

## AUTOS STILL ON INCREASE IN UNITED STATES

### Figures For Month Past Rose Twenty Per Cent in Total Output

New York, Nov. 1.—Automobiles registered in the various states in the first six months of 1924 numbered 25,552,477, an increase of 20 per cent, over the same period for last year, according to figures of the United States Bureau of Public Roads. In the six months 13,645,726 passenger cars were registered, 1,331,405 motor trucks, and 74,946 taxis, busses and cars for hire. It is estimated that before the end of the year the total number of all classes of cars in use on the streets and highways of this country will exceed 15,000,000.

In each of four states more than a million motor vehicles were registered from January 1 to July 1, 1924. New York leads with 1,232,362; California comes second, with 1,184,015; Ohio, third, with 1,150,000; and Pennsylvania, fourth, with 1,085,285.

Illinois will no doubt pass into the million class for the first time before the end of the year. In the first six months of this year registration in that state totalled 986,480 cars.

Total receipts from registration fees, licenses and permits amounted to \$199,472,682; and from the gasoline tax in 26 states, \$32,430,400. It is expected that the receipts from registrations, license fees, etc., will exceed \$225,000,000 before the end of the year, and that the receipts from the gasoline tax will more than double, thus making a grand total of about \$290,000,000, or an increase over last year of approximately \$65,000,000.

These funds do not include personal property taxes on automobiles, which are levied in 35 states, the receipts from which are generally used for local purposes. The large bulk of the receipts from motor vehicle registration fees and taxes is expended under the direction of the state highway departments, and in most of the states the money is utilized for maintenance.

### ENORMOUS TAXES

Of the local amount received from registration fees, licenses, and permits, \$162,911,584 is available for state highway work, while \$20,965,581 derived from the gasoline tax is available for the same purpose, thus indicating that about \$48,000,000 collected by the states from motor vehicle taxes and fees is turned back to the cities, counties and townships for local use.

In the amount of motor vehicle registration fees and taxes collected from motorists, Pennsylvania heads the list with \$23,086,412; New York comes second with \$20,197,362; California third with \$11,794,076; Michigan fourth with \$10,950,353; Illinois fifth with \$10,690,508 and Ohio sixth with \$10,509,216.

"How long is it going to take to get through with this case?" the client, who was under suspicion of house-breaking, "Well," replied the young barrister, thoughtfully, "it'll take me about two weeks, but I'm afraid it's going to take you about four years."

She (after spending the evening with neighbors): "I think the Smythes are an ideal couple—they think alike about everything." He. "Yes, but I notice she always thinks first."

## Drastic Laws in New York Finish Drunken Drivers

### New York, Nov. 1.—Any person convicted of driving an automobile while intoxicated will be unable to obtain a new license within a year.

Charles A. Harnett, Commissioner of Motor Vehicles, said recently, "The new law prescribes that such an offender loses his license upon conviction and the issuance of another is entirely within the discretion of Mr. Harnett's bureau."

"In no case," Mr. Harnett continued, "would I give the matter even the slightest favorable consideration until the person convicted presented to me a communication in writing from the judge or magistrate before whom the case had been heard and the revocation made, reciting special circumstances seemingly warranting a restoration and a recommendation from the judge or magistrate that the license be restored. Even then, I do not say that

I would act in accordance with the recommendation. "With this policy carefully adhered to, the probability of second offenders incurring a compulsory jail sentence is materially lessened, in the elimination of the drunkest drivers we need the co-operation of the motorist—public as much as in any other phase of motor vehicle law enforcement, or more. No person with a conscience and with any regard for human life will attempt the operation of a motor vehicle while intoxicated."

## Our Automobile AND HOW TO CARE FOR IT

By E. H. Scott

### What Do You Know About Four Wheel Brakes?

Brakes on all four wheels have been used on European cars for a number of years, but it is only within the last two or three years that they have been adopted to any extent on American automobiles. They are now fitted as standard equipment on most cars that do not as yet fit them as standard.

A few weeks ago the writer carried out a series of tests to find out just what difference there was between a car braked on all four wheels and one that used rear brakes only. These tests were made to enable me to reply to numerous readers who have written asking for this information.

The first series of tests were carried out on a dry concrete highway and consisted of stops while traveling at various speeds. A marker was set up at the side of the road and an observer gave the writer the signal when exactly opposite this marker, then the brakes were applied. The tests were made first at 10 miles an hour then at 20, 30 and 40 miles an hour, using brakes on all four wheels. The front wheel brakes were then disconnected and stops were made at the same speeds using the brakes on the rear wheels only.

It was found that the average stop at 10 miles an hour with four wheel brakes was 5 ft. 6 ins., while rear wheel brakes required 9 ft. At 20 miles an hour the four wheel brakes pulled us up within 22 ft. while it required 36 ft. to do it with rear wheel brakes only. At 30 miles an hour, four wheel brakes brought the car to a standstill within 51 ft. while rear wheel brakes took 80 ft. At 40 miles an hour, four wheel brakes stopped the car within 85 ft. while rear wheel brakes took 140 ft. From these figures you can see that four wheel brakes will stop a car in just about two-thirds the distance it is possible to stop in when using rear wheel brakes only.

Under ordinary driving conditions rear wheel brakes are perfectly satisfactory, but when the necessity arises to make a sudden, quick stop or where the road is very greasy foot wheel brakes give you just the margin of safety you need to prevent an accident. Say you are traveling at 20 miles an hour and a child suddenly starts to cross the road a few yards in front of you, with four wheel brakes you can bring your car to a standstill within a little more than two car lengths, whereas with brakes on the rear wheels only, it takes over three lengths to pull up in.

The second series of tests were made on a greasy stretch of road and these were very interesting. As you probably know if your car is equipped with brakes on the rear wheels only you require to apply them very gently to avoid skidding. I already knew from experience that it was practically impossible to make a car skid when it is handled properly and has four wheel brakes that were properly adjusted. This was the first time, however, that I had deliberately made tests at varying speeds. The tests were started at 10 miles an hour and went on up to 40 miles an hour. At all speeds up to 30 miles there was no sign of a skid. At 40 miles an hour a very slight skid started when the brakes were applied but this was very easily corrected.

To test the effect of front wheel brakes on the steering, a test was made at 30 miles an hour, the hands being taken off the steering wheel as soon as the brakes were applied. The only effect noticed was that we stopped about 4 ft. nearer the side of the road than we were when we started to apply the brakes. Another test was made by taking a corner while traveling at 25 miles an hour then applying the brakes just as the corner was being rounded. This had absolutely no effect on the steering. These two tests appear to prove that the effect of the front wheel brakes have no noticeable effect on the steering.

One advantage of four wheel brakes that will be appreciated by the average owner is the fact that they require adjusting only at long intervals as the wear on the brake lining is divided between four brake bands instead of two.

### TESTING FOUR WHEEL BRAKES

### SIGNAL WAS GIVEN WHEN DIRECTLY OPPOSITE MARKER, THEN DISTANCE MEASURED FROM IT TO POINT WHERE CAR STOPPED.

### TESTING EFFECT OF FOUR WHEEL BRAKES ON STEERING

### HANDS WERE TAKEN OFF STEERING WHEEL AND BRAKES APPLIED AT 30 MILES AN HOUR.

## STEADY DEMAND FOR NASH CARS

### E. H. McCarthy Says Indications Point to Sale Record

Indications pointing to a record-breaking volume of sales are seen by E. H. McCarthy, general sales manager of the Nash Motors Company, in making public the fact that Nash now has more orders than it can handle before at this time of year. "Not only does the volume of orders for the new Advanced Six and Special Six exceed any previous September, but the company's history," says Mr. McCarthy, "but it also surpasses any single month of the last six months period of all previous years."

"The reason," he recorded, "is the new Nash series by the public has been highly gratifying, even greatly exceeding the factory's expectations. Since the new Nash lines were announced, requests for information about the Nash franchise and actual applications for territory have been received from 378 competitive dealers in all parts of the United States. We have every reason to be optimistic at this time and look forward to excellent business the rest of the year. As far as Nash is concerned, the big season is on in full swing and the problem now is to supply the demand. The Kenosha factory is rapidly reaching the point of peak production and it will not be long before that stage has been attained. Our records show that the demand has been increasing constantly since the introduction of the new line and there is no reason to believe that it will not continue for an indefinite period. Consequently we are preparing to respond to the full limit by taking whatever steps may be necessary to increase our production."

"Orders for the Nash Special Six series made at Milwaukee also are exceptionally heavy, but because of the tremendous task of changing the plants over for a six-cylinder production from a four basis, the Milwaukee production naturally will be slower to reach its full capacity; operations there, however, are being stepped up to meet heavy demand."

"Is Mr. Hutchinson at home?" inquired a caller. "Which one?" asked the parlormaid. "There are two brothers living here."

For a moment the caller looked puzzled; then he had an idea. "The one who has a sister in Boston," he replied.

# BIG, STRONG, SILENT MEN

But the new M.P.P.'s will be less big, less strong, less silent after they have absorbed some of the higher education of politics

"A politician," remarked Ciero Blopp, who knows more about politicians than they know themselves, "a politician is like an iceberg."

"An iceberg?" asked David Wobble, M.P.P. elect, who had come to seek pre-essional advice from his great mentor.

"Yes, an iceberg," replied Mr. Blopp, rubbing his nose with an expression of vast vision. "Most of him, you see, is under the surface. And," he added, glancing at Alderman Wobble's bulk, which has developed considerably since he was elected, "the more I see of politicians, the more favorable do I regard this arrangement."

"However, you will be the only new member of the House so ignorant that you don't know that a dozen other thirsty gentlemen probably have drunk out of the same glass that the page boy brings in sparkling and deceptive on a silver plate. They're coming in droves, these baby members, from the Great Open Spaces where men are men—and that is all; from the Great Open Spaces and bringing a considerable portion of their native territory under their broad-brimmed hats. And by the time they have been whipped into shape so that they don't call the Premier by his first name in the House the great electorate will yawn lazily and heave them back into their native Far Beyond."

### DEEP LEARNING

"In the meantime you gentlemen who have not yet grown your political whiskers have got to be educated from the ground up and from

a speech. But if you can just learn when not to speak—or, better still, not to speak at all—why, then, sir, you can get by without appearing any more idiotic than usual. There's many a man with a head as empty as an election promise who has gained a reputation for unequalled wisdom by imitating the homely virtues of the oyster. The strength of your Strong Silent Men in politics, indeed, usually does not extend north of their collar buttons.

### WATCH THE PREMIER

"However, as I was saying, the experienced member will keep his weather eye cocked on the Premier. So long as the Premier is busy with his letters and his mid-afternoon peppermint then you may talk on with comparative safety. Just as soon as the Premier shakes himself down into his chair, however, and folds his hands across his bosom and stares up at the ceiling as if he was afraid

carefully away in your pocket, leave them on the desk of one of the boys on the other side of the House and vote just the way the lobbyists don't want you to."

## IN FIELD AND WOODLAND NATURE NOTES

BY ROBERT CONNELL

In Memoriam Chas. F. Newcombe, M.D.

I am constrained this week to begin with a few personal notes about the late Dr. Newcombe. Not a whit do I exaggerate when I say that in him Victoria has lost a great naturalist. His services to the science of ornithology were indeed great and in their nature attracted the chief attention. His familiarity with the Indians of the North Pacific coast has been a rare and interesting thing that I brought to the notice of the world, and his advice and assistance were constantly sought. But his services in the field of ornithology were equally great, though perhaps not so generally familiar. Over and over again the finder of some unusual or rare plant received his kindly and ever-ready help. Only a few weeks ago he was one of a party which accompanied me to the locality on Sooke River, where I had been searching for a rare and puzzling fern, and in a letter to-day I received word that the news of an identification of it confirming his own signature was a pleasure to him shortly before his death. I shall always remember his keen interest in that day's expedition and expression of pleasure at his ability to be with us. It was indeed his own presence that made the day memorable. His library of works on natural history was always a wonder to me, and he would be glad to take an infinitude of pains to help the solution of some knotty problem. One of the chief characteristics that struck me in his was his wonderfully buoyant and boylike mind, always alert and keen, and full of fresh interest. One of my earliest recollections of my intercourse with him is of walking through the outskirts of the city taken that he might show me some of the evidences of raised beaches. He had a short article on them in the Ottawa Naturalist, but he had found other traces, and these he wished me to see. Any such thing that I brought to his notice he would take early steps to investigate for himself, the most sincere form of interest. His words of encouragement were in themselves an inspiration to the younger men, and they were backed by constant acts of kindness. Simple and unpretentious in manner, he was the most delightful of men to hear your plans and talk them over. He gave an impulse to the study of natural history which was not only buoyant and boylike in mood, but by his relations with individuals. Of late years increasing deafness made meetings practically impossible for him. Nature makes a remarkable provision for the leaf's fall. When its work is over a row of cells at the base of the stalk breaks down, thus enabling the leaf to break off gently with no violence of rupture. In the case of the horse-chestnut and similar leaves the leaflets also part in like manner from the summit of the stem and leave behind the little scar of each. Even when fallen all the green of the leaf is not lost, for the veins remain as tokens of Summer's glory, while in the general yellow may be described spots of crimson. The striking contrast between the flat splash and dots of varied hues. Speaking of color, although the weather is fast becoming unseasonably gloomy, I found two beautiful orb-weavers the other day. Their large bodies were of a rich dark brown, almost claret colored, and on this foundation was a pattern of exquisite silver spots. Unlike the ones I have before described these were smooth and their outlook was in a neatly woven reticulated. They both had their nest set in the same gorse bush.

## STEPHEN LEACOCK

Little Glimpses of the Future in America

Where Things Will Eventually Head In Unless Headed Off

### The Final Solution of the Transportation Problem

(An Extract from The New York Daily Press of 1930)

RESUMPTION OF THE MAIL COACH SERVICE

We are happy to announce to our readers that the mail coach service between New York City and Philadelphia, which has been temporarily suspended since 1840, is to be resumed this week. By a fortunate chance the well-known and highly popular coach, the Martin Van Buren, has been discovered still in her yard, where she was placed when she was set aside pending the experimental use of the railway, which has proved such a costly failure.

Under the new arrangement, passengers booked for Philadelphia are guaranteed of departure and arrival at the hour specified. Subject only to the hazards of the weather, the Martin Van Buren will leave her livery stable at the corner of Wall Street and the Albany Post Road at or about daybreak on the morning of every Monday. This commodious coach has accommodations for six inside and ten outside passengers.

There is ample accommodation in the boot for all parcels and personal luggage. Passengers desirous of occupying a room in herby assured that the Metropolitan Guarantee Company will see that he leaves the room, either alive or dead, at the break of the day following his occupancy.

(5) Answer from the Soakus Hotel Company, Mr. Eatanything.

### Improving the Immigration Laws Keep on

(Extract from an article in a National Encyclopedia of 1915, entitled, "Deportation, Rise and Growth of")

The practice of deportation first originated in the years of the Great War. It was first applied to the Reds or Radicals. It proved an immediate success. The demand at once arose for the deportation of other classes of the community. The deportation of the Socialists

and the Syndicalists was carried out in the years 1915-1920. The next deportation was that of the Great population of Paterson, New Jersey. A slight opposition was raised in the press at the time, but the improved attitude of the city of Paterson for the inhabitants was the result of the deportation.

The decision followed the deportation of the Osteopaths, the Chiropractors and the Homoeopaths. The movement now assumed a racial or ethnographic character. In spite of furious opposition it was decided to deport the Irish and to insist, on the Supreme Court where, after the dynamiting of three of the justices, the survivors held that the plea of the Irish was good.

A similar claim raised by the Greek fruit sellers (see under Peanuts) was held void. The movement now assumed a distinctly religious character. The deportation of the Presbyterians may be said to have marked an epoch. All those who witnessed their departure from New York harbor, when a hundred pipers played the "March No More" for a hundred days of bagpipes, felt that they never wanted to go through such an experience again (see under Music, Definition of).

This deportation was followed by that of the Mayflower Society, the Sons and Daughters of the Revolution, the Mexican War Veterans and other bodies whose existence had become a national danger.

By the "British Lecture" Habit Grows

(Items from a New York Daily of 1933)

King George V lectured to a fair-sized audience at the Prince's Theatre yesterday afternoon. The King's delivery is quite good and the comments on his personality are quite encouraging. Interviewed at the Billmore Hotel, King George expressed his surprise, and pleasure at the size of America, for which he prophesies a bright future.

Binghamton, N.Y., May 2.—Mr. Lloyd George and Mr. George Clemenceau, former Premiers of two of the signatory powers, have made a favorable impression here with their Readings from the Treaty of Versailles.

The British Ambassador has been accorded for the Summer season work of the Orpheum Circuit. His plat-form work in his first appearance at March Chunk, Pa., is pronounced decidedly good. His work will do volume.

much to create a better feeling between Singapore and Siam.

(Copyright, 1924, by Metropolitan Newspaper Service; Arrangement with Dodd, Mead & Co.)

## RADIO AND LIGHT WAVES SIMILAR

Radio Waves or Rays Actually Light Waves; Radio Has Great Penetrating Power

The so-called radio wave, or ray, is actually a light wave. This was proved by the German physicist, Hertz, the first demonstrated, in 1887, that it was possible to project electrical waves in air. Hertz discovered this fact in a rather accidental way when he was able to produce waves—Hertzian waves, they were then called—in air, he did not know what kind of waves they were, but he was sure that they were of a different kind from the ordinary light waves, and on account of this he called them "radio waves."

Hertz found that he could reflect, focus and refract these waves exactly as could be done with ordinary visible light waves. Also, he measured the velocity of the electrical waves and found that it was the same as the velocity of light waves. His electrical waves were, Hertz found, the difference in their wavelength, but he found that the color of light has a different wave length from every other color. Hertz concluded that the waves he was producing were of a different color from the ordinary light waves, and on account of this he called them "radio waves."

There is another difference between the radio wave and the ordinary visible light wave, that is, while penetrating power; that is, while the radio wave will go through glass and like substances, the radio wave will go through everything that is made of matter, but it is not reflected, refracted and focused.

When the radio wave is reflected, it is reflected in a different way from the ordinary light wave. It is reflected in a different way from the ordinary light wave. It is reflected in a different way from the ordinary light wave.

When the radio wave is refracted, it is refracted in a different way from the ordinary light wave. It is refracted in a different way from the ordinary light wave.

When the radio wave is focused, it is focused in a different way from the ordinary light wave. It is focused in a different way from the ordinary light wave.

When the radio wave is reflected, it is reflected in a different way from the ordinary light wave. It is reflected in a different way from the ordinary light wave.

When the radio wave is refracted, it is refracted in a different way from the ordinary light wave. It is refracted in a different way from the ordinary light wave.

When the radio wave is focused, it is focused in a different way from the ordinary light wave. It is focused in a different way from the ordinary light wave.

When the radio wave is reflected, it is reflected in a different way from the ordinary light wave. It is reflected in a different way from the ordinary light wave.

When the radio wave is refracted, it is refracted in a different way from the ordinary light wave. It is refracted in a different way from the ordinary light wave.

When the radio wave is focused, it is focused in a different way from the ordinary light wave. It is focused in a different way from the ordinary light wave.

When the radio wave is reflected, it is reflected in a different way from the ordinary light wave. It is reflected in a different way from the ordinary light wave.

When the radio wave is refracted, it is refracted in a different way from the ordinary light wave. It is refracted in a different way from the ordinary light wave.

## October Day Below Mount Douglas

Pheasants, Oaks and Chickadees

By ROBERT CONNELL

### WAYSIDE CHATS

Not least among the pleasures of the pedestrian are those casual chats which now and then come in his way. They differ, of course, quite markedly from the conversation of the road which he shares with his companions on the highway, and they are of a different order of interest.

With him the talk is by the way, no matter how diverse the subjects, follows a predetermined path. Given "and" "or" follows as a matter of course. Such talking is of a restful kind. No rude shocks disturb the gentle flow. Your companion knows the bent of your mind, as you know that of his. But there are chance meetings of the roadside that impart to the bent of your mind as they occur chiefly at a spore of life. They occur only when one is alone. Just ahead in the field under a man follows his team up and down the good brown path. He is but a figure in the landscape, or rather he and his horse make but one. The field is a smaller one and a few minutes takes him from one end to the other. It is longer than it requires to make him turn at the end. So it easily happens that the old cedar tree and the old oak tree meet as you pass. He remarks that the woodpecker at such civility you must needs stop for it is unusual; generally a nod or a monosyllabic "good morning" is all. This man, however, has a different way of recognizing the signal for a rest and chat. As you might easily guess, he comes from the prairies. He remarks that the woodpecker at such civility you must needs stop for it is unusual; generally a nod or a monosyllabic "good morning" is all. This man, however, has a different way of recognizing the signal for a rest and chat. As you might easily guess, he comes from the prairies. He remarks that the woodpecker at such civility you must needs stop for it is unusual; generally a nod or a monosyllabic "good morning" is all. This man, however, has a different way of recognizing the signal for a rest and chat. As you might easily guess, he comes from the prairies. He remarks that the woodpecker at such civility you must needs stop for it is unusual; generally a nod or a monosyllabic "good morning" is all. This man, however, has a different way of recognizing the signal for a rest and chat. As you might easily guess, he comes from the prairies. # A PAGE OF INTEREST TO CHILDREN

## CHILD'S STORY OF THE HUMAN RACE By Uncle Ray

How would you like to live in the cellar? I'm certain you wouldn't like it for long.

The Franks had cellars under their huts, and many families spent part of their time during the winter months under ground!

Their houses were not very well built. The chill winds of winter came through the logs or woven wigs. That is why the family went into the large holes dug beneath the huts.

There were no window panes to let light in the cellars. The dwellers probably got most of their light from torches. No doubt there were a few small holes which let in fresh air.

Fires were built in this lowly home. The women spent their time spinning thread, weaving cloth or sewing. Sometimes they cooked.

The men lay beside the fire, sleeping a great deal of the time. While awake, they talked to one another, drank beer, and gambled.

Ah, yes, they gambled! It seems to men were ever more fond of gambling than those rough Franks. They gambled away their cattle and sheep, their spears and shields. It is said they even risked their wives' and

heavy. They had to be laid on stands while being played. The player needed all his strength to get up a good big breath to blow.

**A KING WHO TRIED**

A palace, a bed, a pillow and paper!

It was morning. In the bed lay King Charles the Great, a large man who stood more than six feet when walking around. He had an earnest look on his face. Suddenly he sat up. Reaching under his pillow, he pulled forth the paper and placed it on his knees over a small flat board. Pen and ink were on a chair by the bedside.

The king picked up the pen, dipped it, and began to make marks on the paper. For a while he made figures and smiled as he saw he was able both to add and subtract.

Then the smile passed away.

"I must quit this now," he said, he thought aloud. "I know full well that I can do the numbers, but how about the letters? Ah, yes, I must get at the letters!"

Charles then began to form the "o," the "m," and whatever other letters came into his head. He did this

A two-wheeled carriage in Frankland many years ago.

a disgrace for a man to ride in a "pleasure-carriage." In the end carriages went out of fashion for men. Women, on the other hand, kept up their use. Our picture shows a woman being driven in a two-wheeled carriage.

driven in a two-wheeled carriage. This picture was made more than a thousand years ago. The woman was probably the wife of some noble. The driver holds an odd-looking whip.

Some carriages were four-wheeled. Mules and oxen were driven as well as horses.

**THE "PAINTED PEOPLE"**

"The Painted People!" That is what a Greek named Pytheas called the people of Britain when he sailed back home, many years ago.

The Greeks in that ship had visited Great Britain only a little while, but long enough to learn that the people of Britain painted their faces. So they were called "Pretzians," which meant "Painted People."

Later, they were called Britanni or Britons.

The Britons soon forgot about the Greeks. They went on with their savage lives.

For almost three hundred years all went well. Then came the soldiers of Rome, led by Julius Caesar. They fought the Britons and stayed for some years on the southern part of the island. Then they withdrew to France (then called Gaul).

A century later, the Romans came back. This time, they were prepared to stay. The Britons fought them,

Remains of the Wall of Hadrian

but were beaten. Some of them fled to Scotland, Wales or Ireland. Others stayed in the part of the island called to us in the names of certain English cities, such as Lancaster.

Perhaps the most famous thing done by the Romans was the building of the "Wall of Hadrian."

During his reign, the Romans in Britain built a great wall just south of Scotland. This wall stretched from one side of the country to the other. It was built at a spot where England is very narrow, and was about seventy miles long.

The Wall of Hadrian was built of stone. It was about three times as high as a man. It was eight feet thick. In front was a ditch.

The Romans built this wall so they would not have to worry so much about the people in Scotland. They were afraid the savage Britons

Round Table." He was supposed to have fought against the Franks.

As a matter of fact, the British chief who did win a big victory against the Franks seems to have been named Ambrosius Aurelianus.

The Angles, Jutes and Saxons won control of England. They killed many of the Britons. Some of them married Britons.

The part of Britain which these tribes conquered was named after the Angles. It was called Anglaland. Later it was called England or England.

## BEDTIME STORY Uncle Wiggily Beats His Drum

Copyright, 1924, by McClure News-Paper Syndicate

(By Howard R. Garis)

"Do you think you will be afraid to stay alone in the bungalow, while I go down to the seven and eight cent store and get me some new diamond earrings?" asked Nurse Jane Fuzzy Wuzzy one day.

"Afraid to stay here alone?" inquired Uncle Wiggily, who had a little cold and couldn't go out looking for an adventure. "Why should I be afraid, Nurse Jane? Haven't I fine drum to beat, and scare away the bad chaps?"

"Yes, I know you have a drum," spoke Nurse Jane. "But you might fall inside it, as you did while you were making it, and Uncle Butter had to help you out."

I told you that story last night, if you will kindly remember.

"Oh, I'm not going to fall in my drum this time," laughed the rabbit. "And if any of the bad chaps come, while you are gone, and want to nibble my ears I'll beat a rub-a-dub-dub, make them think soldiers are coming to shoot them, and away they'll run—I mean the bad chaps will run."

"I hope so," spoke the muskrat lady. She put on her new chicken feather dress and hurried off to the seven and eight cent store. Uncle Wiggily took his barrel drum from beneath the piano, where it had been sleeping all night. The rabbit gentleman took Nurse Jane's potato masher from the kitchen.

"Now I'm all ready to beat my drum if bad animals come," he said as he sat himself down in an easy chair.

All of a sudden there was a noise at the back door.

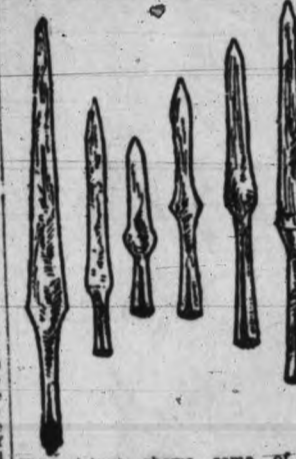

"Oh, maybe that's the Bob Cat!" thought Uncle Wiggily, "he beat his drum." "Boom! Boom! Boomity-oom-oom!"

"Hurray! Hurray!" cried a jolly voice. "Are you having a soldier parade, Uncle Wiggily?" and in ran Jackie Bow Wow, the puppy dog boy.

"Oh, ho!" chuckled the rabbit. "I thought you were a bad chap, so I beat my drum."

"Please let me drum a little," barked Jackie, so Uncle Wiggily did. Pretty soon there was a noise at the front door.

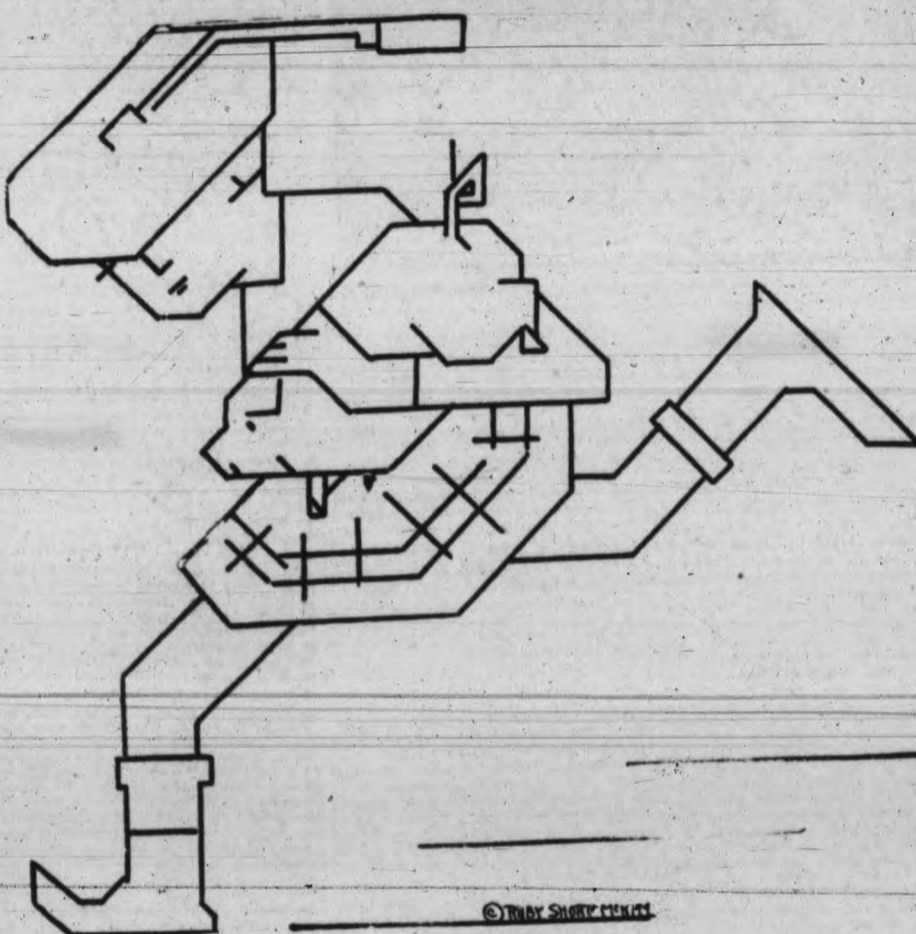

"Beat the drum hard, Jackie! This may be a bad chap!" shouted Uncle

## FEATURES FOR SMALLER FOLKS

### The Nursery Rhyme Quiltie

**No. 11**

Tom, Tom, the piper's son,  
Stole a pig and away did run.  
The pig got loose, and killed a rooster,  
And Tom was put in a calaboose.

Because Tom, Tom's father was a piper, I imagine that they were Scotch. Maybe when Tom, Tom grows up he'll have a pipe too, and never, never steal pigs or anything again. I wonder how your quilt is

### WANDERERS RETURN FROM FROZEN NORTH

Mankind, with few exceptions, is a stay-at-home creature. Lions roam the jungle and make their homes a temporary affair. Panthers follow their prey through the woods from place to place without stopping very long in one spot. Birds fly long distances to take advantage of the seasons. Wild ducks, now with us again, travel in regular channels, flying north or south as the seasons advance.

The sharpening-cold of the northland sends them scurrying south to latitudes where the cold is not so intense as to freeze the water over. Storms drive them inland to lakes and streams. In summer they are to be found far north, back in the land of cold, for they are cold-weather birds, intended by nature for such a life and given plenty of warm, downy feathers to withstand the chill.

Any day now hundreds of wild ducks may be seen in local waters and at many inland lakes. They will be here until January, or a few weeks later, and then off again. If they could be marked so that we should know them again it would be found that hundreds of miles lie between here and the next resting place.

They travel that distance in large flocks, seemingly guided by a faultless instinct which tells them just when to fly south and when to fly north, to find a temperature they like. Many other birds do the same thing. Thus Nature provides for the comfort of her feathered denizens.

The schoolmistress was about to dismiss the class for the holidays.

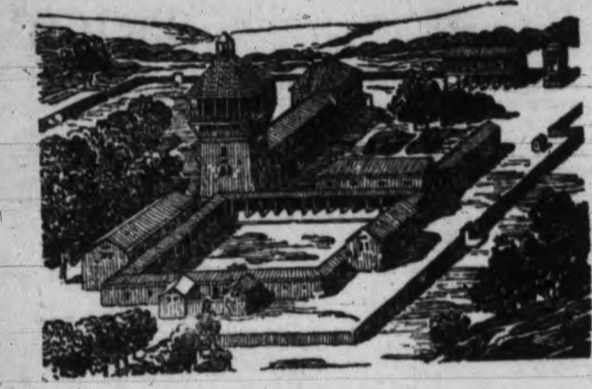

"Now, children," she said, "I hope that you will have a very pleasant time, and what is more important, that you will come back with a bit of sense in your heads."

Promptly came the chorus of voices "Same to you, miss."

edge to hold firmly and then lay a ruler along the lines and trace carefully. This will transfer the pattern onto the muslin block. Then you can outline stitch the lines on the muslin and have the pattern in hand. Remember there are twenty drawings in all, and you will want every one to make your quilt complete, so be careful not to lose a single one.

"The Government of the Province issues free, at the Parliament Buildings, a directory of products manufactured in British Columbia, which will help you. Ask for it."

Further particulars may be had from the company at telephone 7669.

A group of houses and barns used by Franks

children on the way dice fell! In some cases, it appears, they let themselves go into slavery because they had lost a game.

The men did not like common work. We can be sure they scorned and children had to do the chores. We can picture in our minds boys creeping out of the hot cellar on bitter cold days to feed the horses, cows and chickens. Now and then men went outside to hunt.

On mild winter days, the family must have moved to the hut above. It was no great fun to stay down in that ugly cellar. What joy must have been in the hearts of all when spring came back to earth! The trees and the outdoors could then be lived once more.

When the tribes moved into Italy, France, and England, they built better homes. The warmer climate of the southland meant that they did not need to live in cellars any more.

The Franks sometimes lived in groups of houses with a very high house at the centre. Such a group is pictured.

### FLUTES AND TRUMPETS

Do you suppose the Franks liked music?

I should say they did! In the time of Charles the Great, someone made a list of the musical instruments used in the country. There were twenty-four kinds. These were played at all manner of times.

Making sounds by blowing was a favorite way. For such sounds, flutes, trumpets and horns were used.

There were all sorts of flutes. The Romans found many of them in Greece and brought them back to the west of Europe. The Gauls learned to use them. Later on the Franks came down, settled with the Gauls, and learned to use the flute.

Of course there was the common straight flute, with small holes on the outside and a large hollow in the centre.

More interesting was the double-flute. It had two hollow parts, one longer than the other. The shorter part made a shrill sound. The longer one made low or "bassy" notes.

There was also a flute with seven tubes. This was sometimes called "Pan's pipes," because of the story that it was invented by the Greek god, Pan.

Trumpets had long been used by tribes of the northland. The Franks were fond of the trumpet because it made such a loud noise.

Some trumpets were very long and

This picture was made during the Middle Ages. It shows a lord kneeling before King Charles.

### Contest For Junior Citizens

A knowledge of the city in which you live and in its industries is essential in an unique contest now opened by the Canadian Puget Sound Lumber and Timber Company Limited, at the foot of Discovery Street, being sure that your name, age and address, school and class number appear on back of map.

"Competition closes December 10, 1924.

"Maps to be judged for Completeness, Correctness, Neatness.

"Students under twelve years—First prize, \$7.50; second prize, \$4.00; and three \$1.00 prizes.

"Students twelve years and over—First prize, \$10.00; second prize, \$5.00; and eight \$1.00 prizes.

"Competition results will be announced in the daily papers and in windows of Dignon Printing Company

### Last Week's Who

THE TORTOISE

Who is it gnaws right through a tree, industrious as he can be? Who takes some mud and builds a dam. Then goes and digs in like a clam?

### Chinchilla, the Mexican

This Mexican child,

### Little Folks' Limerick

A Mexican lad named Chinchilla. Raised beans to make our vanilla: One day he went wild,

This picture was made many years ago. It will give you an idea of the "Pipes of Pan," a kind of flute which was very well liked

### CARRIAGES IN FRANKLAND

In the time of Charles the Great, there were several kinds of families in Frankland.

There were Gauls, native to the country. Others were Roman, who had conquered the Gauls. Still others were Franks, who had won power over both.

Then of course there were mixed families—Gauls married to Romans, Franks to Gauls, Romans to Franks.

I am speaking of this now to explain a difference of opinion about carriages.

The Romans and Gauls were in the habit of using carriages very often before the Franks came. The Franks were Germans, hard and rough from their life in the wilds. They liked to ride on horseback, but thought it

In ran Jackie Bow Wow.

Wiggily. But it was only Tommie Kat, who came to borrow some milk for his mother to make a strawberry long cake.

"Let me beat the drum," mewed Tommie. So he and Jackie took turns beating the drum, while Uncle Wiggily looked on and twinkling his pink nose jolly like.

All of a sudden, in through the window crawled the Skilley Scallery Alligator with the double jointed tail.

"Gurra! Gurra!" cried the Gator. "I came to get Uncle Wiggily! I want him to come to my surprise party!"

"Don't go to his surprise party, Uncle Wiggily!" barked Jackie. "He'll nibble your ears! Don't you go!"

"I'm not going!" laughed the bunny. Then, taking the potato masher he banged the barrel drum as hard as he could. "Boom! Boom! Bang! Crash! Bang!" rumbled the drum.

"Oh, dear me!" It's thundering! It's going to rain. I haven't any umbrellas and I'm afraid of thunder and lightning and I don't want to get rained on!" howled the Gator, who couldn't see very well, and who didn't notice Uncle Wiggily beating the drum.

"Boom! Boom!" rolled out the sound.

"Oh, I must get home before the storm!" cried the Gator, and out of the window he flopped and away he waddled.

"Ha! Ha!" laughed Jackie and Tommie.

"Ho! Ho!" shouted Uncle Wiggily. "My drum rolled the bad chap!"

So everything happened for the best, you see, and the broom does not laugh at the dusting brush, for having such a little short tail for a handle, I'll tell you next about Uncle Wiggily's grape juice.

Wall Street TO-DAY

Last Minute News on Stocks and Financial Affairs

VICTORY OUTLOOK FOR REPUBLICANS SEND STOCKS UP

New York, Nov. 1.—(By R. P. Clark & Co.)—Activity was more pronounced to-day as the breadth of the market broadened. Some new high prices were registered since the fresh upward movement developed, particularly in the industrial quarter. For some time back it has been quite popular amongst the professional element to initiate bearish efforts, with the result that a good-sized short interest was built up. The strength of the market in the last few sessions has caused a retirement of contracts by shorts, in addition to what can be said a moderate increase in this outside buying power has been attracted. The general run of expressions with reference to the oil industry continues to take on a more optimistic tenor, and this is pretty well reflected in the better prices prevailing for oil shares. Advances at the weekend indicate that operations are increasing in the steel business and the same applies to the domestic cotton textile trade. The effect of the recent election results in Great Britain are looked upon as being rather striking. The indications for the present time are that the price level may be further advanced.

GRAIN MARKETS TAKE BEAR TREND

Chicago, Nov. 1.—(By R. P. Clark & Co.)—Wheat: The big receipts of wheat which did not improve the trade a great deal and the export business was not active are becoming oppressive now that there is a lull in foreign buyers, there is a diminution of outside speculative interest. Cables were 1/2 to 3/4 higher from Liverpool. Argentine news was conflicting with further reports of a discouraging character. However, some of the news items were specially influential and the prices dragged largely on account of the drying movement and the prices dragged. Corn: Sold off following a steady opening, the declines in small grains causing a more bearish local sentiment, while the wheat market dealt profit taking early in the week by buyers. Taking all the discouraging influences into consideration, corn held fairly well. Oats: With heavy stocks and heavy receipts, oats lack any bullish inspiration of their own and with their grain weather, a little help on the bull side is needed. The demand for big fall out of rye, while there was little export business to help the bulls. Receipts were fair and export sales light.

Wholesale Trade Good in B.C., Reports Show

Winnipeg, Nov. 1.—The weekly trade report of the Canadian Credit Men's Trust Association Ltd., states that Wholesale and retail sales continue satisfactory. Collections fair. Montreal—Boots and shoes fairly steady. Dry goods show very little increase in volume. Groceries a little more favorable than previous reports with a slight increase being reported. Hardware conditions just about the same. Collections fair. Toronto—Industry and general business show slight improvement. Fair volume of business being transacted in the wholesale lines, but little change reported in the retail sales. Collections fair. Halifax—Wholesale trade steady, no material change expected till colder weather. Retail business fair. Collections fair. Regina—Wholesale trade holding up good. Retail trade improving gradually. Collections fair to good. Saskatoon—Both wholesale and retail conditions generally continue satisfactory and slight improvement is being felt, particularly by the retail trade. Edmonton—Returns from crop are reported fairly good in this district and business is expected to pick up considerably as the season advances. British Columbia—Wholesale trade reported good improvement shown in the retail trade. Collections good.

Northern Pacific Earnings Better

New York, Nov. 1.—Railroad earnings and the Northern Pacific net income for 1924 will be around \$6 a share, compared with \$5.22 in 1923, owing to usual heavy fourth-quarter traffic which invariably supplies the road with a substantial portion of its annual net income. October earnings are expected to attain the levels of October, 1923, when gross returns aggregated nearly \$11,000,000 and net exceeded \$3,400,000. Net for the nine months of the year was about \$6,400,000, after all charges. Make that property desirable, then advertise it, and you'll find that desirable tenant.

NEW YORK STOCKS

NEW YORK STOCK EXCHANGE, NOVEMBER 1, 1924

Table of New York Stock Exchange prices for various stocks including Alcoa, Am. Sugar, Am. Tobacco, etc.

WINNIPEG GRAIN

Table of Winnipeg Grain prices for Wheat, Oats, and Corn.

Montreal Stocks

Table of Montreal Stock prices for various companies.

VICTORY BONDS

Table of Victory Bond prices for various denominations.

Edmonton District Gets Heavy Snow

Winnipeg, Nov. 1.—To-day's weather report shows Regina clear; light snow; 18; Winnipeg, cloudy, 30; Calgary, little snow, 32. The Edmonton district reports five inches of snow during the last two days. There was cooler weather over the United States grain belt, with temperatures running 35 to 50. COW CAUSED DEATH Sydney, N.S., Nov. 1.—Joseph Fortune, negro, of Stirling, Glouce Bay, thirty-five, lost his life, and Malcolm MacDonald, white, also of Glouce Bay, was taken to his home suffering from severe injuries as a result of an accident near here last night, when their automobile struck a cow and turned on its side. Two other men escaped injury. The cow was killed.

Days of Cheap Gas In U.S. Passing

New York, Nov. 1.—Indications point to the fact that the motorist will not be able to buy gasoline much longer at prices generally prevalent, according to the schedule of the Brookline Economic Service. The price is dependent on the crude oil market, and it is pointed out that prices of crude oil have reached such a low point that reductions are hardly to be expected in face of a decline in production.

TO-DAY'S EXCHANGE

Table of exchange rates for various countries including Great Britain, Italy, Belgium, etc.

15,000 NEW HOUSES

London, Nov. 1.—Fifteen hundred concrete houses are to be erected for the City of Leicester. A London construction firm has secured the contract; 750 to be built with partners at about \$2,500 each the other 750 to be the non-partner type at about \$2,350 each, and 1,000 for the city of Birmingham. This is perhaps the best proof of the practicality of this form of construction, an Englishman's invention. A wall cavity of two inches is continuous in the construction, even through the angles; that is, the right-hand walls will have a hollow centre two inches wide, free from any interruptions. The only skilled men employed in the filling of these cavities are the foremen and supervising staff, all the rest being unskilled laborers.

BACK IN OLD LONDON IN A MILD OCTOBER; BIG TOWN'S GOSSIP

Readers of William de Morgan's novel "Alce for Short" will remember that the modern Bedlam (Bethlem Royal Hospital) at Lambeth is one of the finest mental hospitals in the world. It is the child of a charity founded in 1247 by Simon Fitz Mary, sheriff of the City of London, in token of his gratitude for his deliverance from the Saracens when fighting in the Holy Land. COACH TO BRIGHTON Canadian visitors who want to recapture the "Dickens atmosphere" will be able to do so very soon, by taking a passage on the coach which is about to run from London to Brighton, three days a week. Starting from the "White Horse Cellars" in Piccadilly, (the jumping-off place of the old mail-coach service to the west of England), it will do the trip in seven hours. Seven teams will do the journey, changing at the same places as in the old coaching days.

KING'S BARBER

Charles Jasche, who was King Edward's barber for ten years, and who has been cutting the hair and shaving the chins of the British aristocracy for nearly forty years, has just closed down his famous shop in Regent Street, on account of the rebuilding operations there. His saloon, known as the "House of Lords," was patronized by all manner of celebrities, from the Prince of Wales downwards. Visitors from overseas used to make a beeline for the chair with the brass plate that recorded the Prince's first visit. Mr. Jasche attended King Edward and trimmed his hair and beard on the very day before his death. When the Court was at Sandringham he would go there every Sunday; when it was at Balmoral, he journeyed there every ten days. He went to India in the "Renown" with King George, and sailed in the "Ophir" in her cruise of 1901.

MONEY IN GRAIN

Buyers have immediate option on 10,000 bushels of wheat or corn. No further risk. A movement to take \$200,000 in cash, etc. FREE MARKET LETTER. Investors Daily, S.W. Branch, Dept. 7-19, 1016 Bismarck Ave., Kansas City, Mo.

TAX REDUCTIONS IN CANADA CUT DOWN REVENUE

Ottawa, Nov. 1.—Collections of customs and excise revenue during the seven months ended yesterday were \$36,079,616 less than in the same seven months last year. The largest decrease was in excise taxes, this accounting for \$24,922,254; customs import duties show a decrease of \$9,292,794; excise duties of \$1,747,404 and sundry collections of \$6,193. The decreases are largely attributable to reductions in taxation and import duties made in the last budget. Total customs and excise revenue for the seven months ending to-day was \$143,302,216, as against \$173,381,932 in the seven months of last year.

NEW YORK COTTON

Table of New York Cotton prices for various grades.

FLATS PLANNED IN LONDON COLD STORAGE SPACE

Not going to sell for three months, it would pay him to send the meat to the City of Leicester, and then bring it back when he is ready to sell. Dealers say that the buildings which are now used for warehouse purposes easily could be converted into up-to-date apartments and thus serve two purposes—re-employment in rent, and also give homes to some of the many hundreds of families now clamoring for room.

EXTENSION OF TIME

Notice is hereby given that the time for the receipt of tenders for Two Steel Floating Docks for the New York Dock at Esquimaux, B.C., is extended to Thursday, December 4, 1924.

### ASPIRIN

Insist on BAYER TABLETS OF ASPIRIN  
Unless you see the "Bayer Cross" on tablets you are not getting the genuine Bayer product proved safe by millions and prescribed by physicians 24 years for

Colds Headache Neuralgia Lumbago  
Pain Toothache Neuritis Rheumatism

Safe Accept only "Bayer" package which contains proven directions.  
Handy "Bayer" boxes of 12 tablets  
Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monosodium Salicylate (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

### BEEKEEPERS TO MEET

The annual meeting of the Vancouver Island Beekeepers' Association will be held in the committee room of the Chamber of Commerce on Wednesday, November 5, at 2:30

o'clock. The election of officers for the coming year will take place.

Particulars as to membership may be obtained from the Honorable secretary, Mrs. F. A. Greenwood, R.M.D. 2, Victoria, or to Dominion Experimental Farm, Sidney, the headquarters of the association.

### PRAIRIE DELEGATIONS HEARD BY PREMIER

#### King Also Attended Dinners And Addressed Meeting in Medicine Hat

Medicine Hat Alta., Nov. 1.—Premier King and his party spent a busy day in Medicine Hat Friday receiving various delegations and attending dinners tendered during the day by the Chamber of Commerce, the Liberal Association and the Methodist Men's Club.

The City Council asked the Premier for restoration of the Crow's Nest Pass freight rates and extension of the Canadian National Railway line into the city, the grading of which was completed about ten years ago.

**FOR THE FARMERS**

A particularly important phase of relief in the dry area was advocated by a delegation of farmers who asked consideration of a plan to install a Government plant at Medicine Hat for cleaning wheat in transit East.

At present the wheat is cleaned at the head of the Great Lakes and the screenings shipped back to the West for stock food at a prohibitive cost. The saving of the freight charges would make the screenings available to the drought-stricken area and solve a big problem for the cattlemen.

The Chamber of Commerce asked consideration for the oil drillers in a less generous regulations and in the removal of the duty upon the drilling machinery.

Last night the Premier addressed a mass meeting of citizens.

### INDIAN GHOST HAUNTED CAMPERS

#### Curious Story From Northern B.C. of Nocturnal Noises

Prince Rupert, Nov. 1.—A ghost story is being told at the local office of the Provincial Public Works Department.

A crew of seven men working on the Kitwanga-Kitseukia trail about five miles west of Kitseukia on the south side of the Skeena River had encamped on an old Indian grave site. The first night at 8 o'clock there came a noise, "whish, whish, whish," followed by a definite tramping and rattling and repeated at regular intervals. Thinking that it might be caused in the stillness of the night by a bush-rat at his business, a search was made with lanterns, but it was fruitless.

Returning to their tents, the men again heard the same disturbance, in a regular manner. It kept up until 3 a.m. and, the otherwise, the little sleep was enjoyed. The next morning a search was made for tracks for some marauder of the wilds, but none were found.

The next night the noise started up promptly at 8 o'clock and kept up again until 2 o'clock. At the fourth night, it still going in the same way. Having thus taken on the aspect of something really super-natural and mysterious, there was a good deal of anxiety, and the camp had to be moved. Then it was heard no more and sleep came to the worried ears.

While it was suggested that the mysterious noise might have been occasioned by some earth disturbance or even such a thing as radio static in the air, the men were unwilling to accept this explanation for that. The accepted belief, which will not be abandoned until it may be really proved otherwise, is that the grave of some old Red Indian who in this manner voiced his objection to a desecration to his last resting place.

### WEATHER CHANGES IN BRITAIN ARE STUDIED

London, Nov. 1.—Englishmen of a scientific turn of mind are seeking an explanation for the progressively worst climate of the last few years, and are wondering if they can blame it on a shift in the Gulf Stream, following disclosures that the water of the English Channel has fallen steadily in temperature since 1921.

Charges made from observations taken at the Plymouth station of the Marine Biological Association show that the water of the channel reached their highest average temperature in 1921 and that the average has since fallen a few degrees each year.

### Vancouver Island Egg-Laying Contest

Week No. 52, Ending Oct. 29, 1924  
Conducted by the Dominion Experimental Station, Sidney (Registration)

The following table gives the production for the individual birds for the week under columns numbering 1 to 16. "W" gives the total weekly pen production and column "T" the total number of eggs for the pen to date. The difference between the weekly total and the records of the individual birds is the result of eggs laid on the floor.

### HIGH GRAIN TOTAL REACHED IN MONTH

#### Over 27,570,000 Bushels Loaded in Western Canada in September

Winnipeg, Nov. 1.—More than 20,000 cars of grain, with an approximate total of 27,570,000 bushels, were loaded at points on the Canadian National Railway in Western Canada during October, according to monthly grain figures issued last here. This is considered heavy loading in view of the very unfavorable weather conditions during the early part of the month, when rain put a complete stop to harvesting and threshing operations for some time.

At the same time the amount of grain in storage at all points on the Canadian National Western lines increased by nearly 8,000,000 bushels.

A total of 31,629 cars containing 42,400,000 bushels of grain were loaded during the period September 30 to October 29.

During the latter part of the month just closed movement to the head of the lakes assumed the proportions of last year's heavy shipments, the daily average of cars received being almost 1,000. Loadings to Vancouver during the month were heavier than those of last year—a total of 626 cars having been delivered at the Pacific coast terminal during the period.

### EVENTS TO COME

The monthly meeting of the Esquimalt Chapter, I.O.G.E., will be held on Monday at the home of Miss Meyer, Esquimalt Ward.

A meeting of Ward Five, Saanich Ratepayers' Association, will be held in Prospect Lake School on Monday, November 3, at 8 p.m. Mrs. Lucas, superintendent of the Health Centre, will speak on the work and activities of the Health Centre generally and of its value to the taxpayers. Anyone interested in the Ratepayers' Association or in the conduct of the Health Centre is cordially invited.

Manipulative adjustments assist nature to establish health. See H. Milne, Mecano-Therapist, 407 Union Bank Building.

### LABORITE WON ON FOURTH RECOUNT

#### Unusual Incident in West Leeds Followed Polling in British Election

London, Nov. 1 (Canadian Press cable)—In an election characterized by so much vituperation and open violence as that of October 29, it is agreeable to contemplate the closing incident in West Leeds, where four recounts of the ballots were necessary to settle the question as to whether T. W. Stamford, Labor member in the last Parliament, or Captain A. F. Renton, Conservative, was elected.

The first recount gave Stamford a majority of three votes over Captain Renton. The second recount gave the Labor man a majority of only one. The third recount resulted the same way. Thereupon Captain Renton announced he would accept the fourth recount as final. This again gave the Labor candidate a majority of three and Captain Renton heartily congratulated Stamford on his victory.

"He is a gentleman and a sportsman," said Captain Renton about his Labor opponent.

### Liberal Elected in Edmonton Contest

Edmonton, Nov. 1.—When the final count in the provincial by-election held here Monday last was completed late yesterday afternoon, W. T. Henry, Liberal, emerged victorious by a majority of twenty-four over A. F. Ewing, Conservative. The Conservative candidate asked for a recount, and W. A. Jackman, returning officer, declined to make an official declaration until such time as that recount has been completed.

The total figures were, Henry, 5,472; Ewing, 5,448.

A lovely soft figured lining in splendid color combinations, selling at a very special price; 40 inches wide.

### New Legal Move in the Small Will Case

Toronto, Nov. 1.—G. T. Walsh, acting for Florence and Gertrude Small, sisters of the late Ambrose J. Small, appeared before Mr. Justice Lennox yesterday and obtained leave to bring a motion next Friday to compel Mrs. Theresa Small, the widow, to carry out the terms of settlement of the estate as approved by Mr. Justice Lennox.

Under the settlement of the action brought by the Misses Small to question the validity of the will put forward by Mrs. Small, each of the sisters was to have received for life the interest on \$100,000, the principal of which was to have been paid into court. It is claimed this has not been done.

# THE GUMPS

-SIDNEY SMITH-

STATION P. D. Q. -  
THE NEXT NUMBER ON  
THE PROGRAM -

DON'T FORGET CHESTER IS WAITING TO HEAR FROM YOU - FOR THE THREE BEST LETTERS RECEIVED HE WILL SEND A BEAUTIFUL PRESENT TO THREE LUCKY BOYS OR GIRLS - ADDRESS YOUR LETTER TO CHESTER GUMP, CARE OF THIS PAPER -

IT'S ALL O.K.

I HOPE I HEAR MY PAPA -

THIS RECEIVING SET WILL PICK UP ANY STATION IN THE WORLD - YOUR DADDY IS GOING TO BROADCAST THE CLOSING SPEECH OF HIS PRESIDENTIAL CAMPAIGN TODAY AND I HOPE WE SHALL BE ABLE TO HEAR HIM -

IT WOULD MAKE ME HAPPY IF I COULD HEAR HIM -

THIS WILL BE A NOTABLE DAY IN ANDY GUMP'S CAREER AND I HOPE STATIC DOES NOT PREVENT US FROM HEARING HIM ALTHOUGH HE IS THOUSANDS OF MILES AWAY -

OH BOY - I HOPE STATIC WILL BE NICE JUST THIS ONCE -

LONDON, ENGLAND, NOW BROADCASTING - LORD RASPBERRY'S SPEECH BEFORE THE HOUSE OF - B-2 222-22 -

I AM TRYING TO PICK UP STATION W.G.N. AT CHICAGO -

I DON'T WANT TO HEAR ANY LORDS OR DUKES - I WANT TO HEAR MY PAPA -

DARLING, I AM GROWING - CUCKOO - SILVER & THREADS AMONG THE CLANG - SHINE UPON - THIS IS STATION X.Y.Z.

I SEEM TO BE GETTING SEVERAL STATIONS AT THE SAME TIME -

I WISH THE SINGERS AND CUCKOOS WOULD KEEP STILL - I WANT TO HEAR MY PAPA -

THIS IS W.G.N., THE CHICAGO TRIBUNE BROADCASTING STATION AT CHICAGO -

HURRAH! NOW I'LL HEAR MY DADDY TALK - OH UNCLE - PLEASE TELL THEM TO HURRY -

THE NEXT NUMBER ON OUR PROGRAM WILL BE THE HONORABLE ANDREW GUMP, THE MAN WHO IS 100% FOR THE PEOPLE - HE WILL TALK TO YOU ABOUT HIS POLICIES - STAND BY, PLEASE -

YOU MUST BE QUIET - I DON'T WANT TO MISS A WORD -

I'LL BE AS SILENT AS A TONGUE-TIED CLAM -

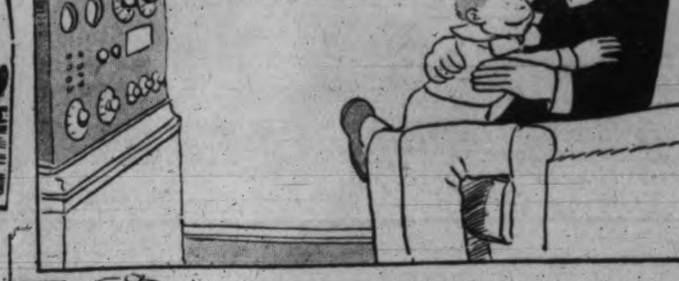

MY DEAR FRIENDS - ON THE EVE OF A GLORIOUS VICTORY I TAKE THE AIR TO THANK YOU ONE AND ALL FOR THE VOTES YOU ARE GOING TO GIVE ME ON ELECTION DAY - PRIVATE REPORTS FROM MY MANAGERS THROUGHOUT THE COUNTRY HAVE CONVINCED ME THAT I WILL BE ELECTED BY THE LARGEST VOTE EVER GIVEN TO A CANDIDATE IN THIS COUNTRY -

IN SPITE OF BITTER OPPOSITION FROM WELL-OILED MACHINES I AM GOING INTO THE FINAL DAYS OF MY CAMPAIGN WITH SUPREME CONFIDENCE IN THE GOOD SENSE OF THE AMERICAN PEOPLE - ALTHOUGH MY OPPONENTS HAVE SPENT MONEY LIKE WATER TRYING TO BRING ABOUT MY DEFEAT ON ELECTION DAY THE MIGHTY VOICE OF THE PLAIN PEOPLE WILL CONVINCE THEM THAT TRYING TO BEAT ANDY GUMP IS JUST LIKE TRYING TO DENY AN ANVIL WITH A CREAM PUFF -

I WANT TO THANK YOU FOR THE MAGNIFICENT VICTORY I AM ABOUT TO ACHIEVE AND YOU CAN FEEL THAT WHEN YOU CAST YOUR BALLOT FOR ME ON ELECTION DAY YOU ARE FIRING A BULLET THAT WILL HELP WIN THE BATTLE THAT BRINGS BACK PROSPERITY AND FREEDOM TO THE PLAIN PEOPLE - AGAIN I THANK YOU ONE AND ALL FOR YOUR LOYAL SUPPORT -

AFTER YOUR FATHER IS ELECTED AND YOU GO TO LIVE IN THE WHITE-HOUSE AT WASHINGTON I HOPE YOU WON'T FORGET ALL ABOUT YOUR POOR LONELY OLD UNCLE -

I WON'T EVER, EVER FORGET YOU, UNCLE BIM - I'LL ASK MY FATHER TO GIVE YOU A NICE JOB AS GENERAL OR SOMETHING -

WHEN I GROW UP TO BE A GREAT BIG MAN LIKE MY FATHER I'M GOING TO BE A PRESIDENT TOO - AND I'LL PASS A LAW CLOSING SCHOOLS EVERY DAY EXCEPT FRIDAY AND I'LL GIVE AWAY BOXES OF CANDY TO BOYS AND GIRLS WHO BUY ONE CENT STAMPS - AND ALL THE POOR LITTLE CHILDREN WHO HAVE NO ONE TO BUY TOYS CAN GET ALL THE TOYS THEY WANT FROM THE GOVERNMENT, FREE OF CHARGE - I'LL BET ALL THE KIDS WILL BE HAPPY WHEN I AM PRESIDENT OF THE U.S.A.

"HEY! EDDIE! THAT SCHEME  
WORKED FINE ON  
MY DAD!  
Too!"

"I THINK YOU'RE BIG ENOUGH  
THIS YEAR TO TEND THE  
FURNACE."

"COME DOWN HERE NOW  
AND I'LL SHOW YOU  
ALL ABOUT IT."

"REMEMBER NOW, UP  
EARLY IN THE MORNING  
AND ON THE  
JOB."

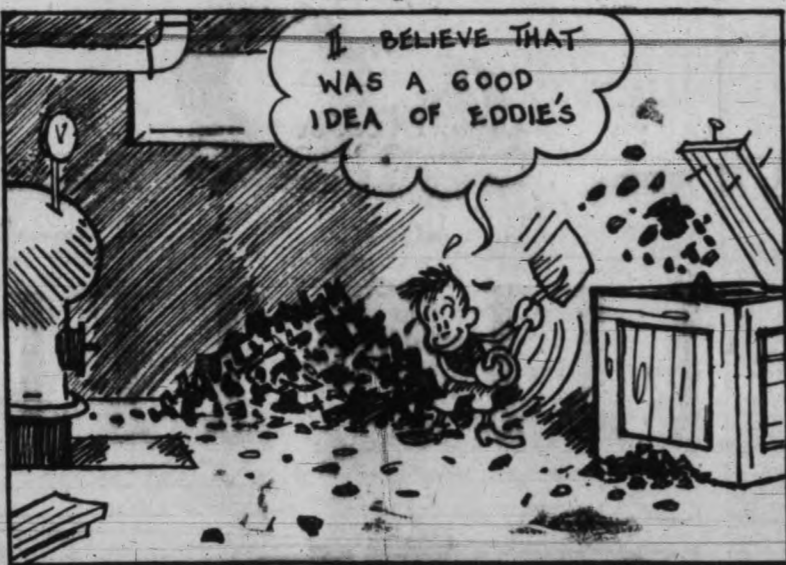

"HEY! YOU! GET UP AND  
HUSTLE DOWN TO  
THAT FURNACE!"

"THAT'S A TOUGH JOB, GITTIN'  
UP EVERY MORNING TO  
FIX A FURNACE. BUT I  
KNOW HOW YOU KIN GIT  
OUT OF IT: IT WORKED FINE  
ON MY DAD...."

"I BELIEVE THAT  
WAS A GOOD  
IDEA OF EDDIE'S"

"I'LL LEAVE THIS MUCH  
OUT AND CLOSE DOWN  
THE TOP OF THAT  
BOX...."

"WOT!  
WE NEED COAL  
ALREADY!"

"IT CAN'T BE  
POSSIBLE."

"THE TROUBLE IS THAT THIS  
KID HAS BURNED UP A  
MONTH'S SUPPLY OF COAL  
IN ABOUT THREE DAYS!"

"YOU STAY AWAY FROM  
THAT FURNACE! I'LL TEND  
TO IT MYSELF AFTER  
THIS."

# REG'LAR FELLERS

by Gene Byrnes

LOOK WHAT I GOT!!! THIRTY-FI' CENTS FOR A EXTER SPECIAL CHALKLIT ICE CREAM SODA! HONEST! MOM EVEN GAVE ME A NOTE SO THE MAN WOULDN' SKIN ME!

A THIRTY-FI' CENT ONE

YOU COULDN EAT A WHOLE THIRTY-FI' CENT CHALKLIT ICE CREAM SODA BY YOURSELF! GIVIS SOME WILL YA?

YOU'LL GET SICK AN' MAYBE DIE IF YOU TRY TO EAT THAT ALL BY YOURSELF! LET ME DO YOU A FAVOR AN' HELP YOU EAT IT!

HA HA!

I'LL GIVE YOU A NICKEL IF YOU TELL THE MAN TO BRING TWO SPOONS WITH THE SODA.

I'LL GIVE YOU A NICKEL AN' THESE JELLY BEANS FOR HALF OF THE SODA!

HOW MUCH WILL YOU GIMME FOR THE WHOLE THING?

I'LL GIVE YOU A NICKEL AN' THESE JELLY BEANS AN' THIS KNIFE WITH NO BLADES AN' A JUMBO LOLLYPOP

AWRIGHT! I'LL TAKE IT!

AIN'TCHA GONNA GIVE ME ANY?

MISER! GONNA EAT IT ALL BY HISSELF!

OH WHATTA BIG PIG!

BEAT IT!

LOOKA ALL THE ICE CREAM HES PUTTIN' IN!

OH! WHAT I COULD DO TO THAT!

THE MAN'S READIN THE NOTE!

DRUGS

HOW'S THAT FOR A SODA?

FINE! GREAT! WONNERFUL! IT'S THE BEST SODA I EVER TASTED IN MY WHOLE LIFE!

WHAT DID IT SAY ON THE NOTE MISTER? TO PUT IN A WHOLE LOTTA EXTER ICE CREAM OR SUMPTHIN'?

HERE! READ IT!

HORRORS

WHERE'S JIMMIE?

HE RAN AWAY LIKE A STEAM INJIN WHEN YOU WENT IN FOR THE SODA!

DRUGS

JUS' WAIT'LL I KETCH HIM! LOOK WHAT IT SAID ON THE NOTE!

LET'S SEE

LET ME SEE TOO!

I WANNA SEE!

Dr. Caputo

Would you kindly fix up an extra large dose of castor oil in a chocolate ice cream soda for the bears.

Thanks you very much

Mrs. Sliger
