On the evening, about the middle of February in the saloon of Clark & Woods, Latimer became involved in a discussion on the right of foreigners to vote, and during the discussion he animadverted somewhat severely upon American character and customs, when he was knocked down by Gloster, who was present. Latimer continued his remarks and was again knocked down, he making no show of resistance. Soon after this, having in the meantime indulged in more liquor, Latimer approached Col. White and charged him with being the cause of his having received a black eye. The Colonel was a professional gambler, a Kentuckian by birth, and a man of fine physique and polished manners, who had the reputation of having upon more than one occasion "winged his man." The tone used by Latimer was highly insulting, and the Colonel immediately knocked him down. This was on Saturday night. On the following morning Gloster went to Latimer, begged his pardon, and they parted apparently good friends. On Monday morning, a note was received by Col. White from Latimer asking for the satisfaction usual among gentlemen. The challenge was accepted, and weapons—rifles, at one hundred yards—agreed upon, the time being set for the next morning. Gloster acted as the friend of Col. White, Latimer being also provided with a friend who acted as his second. At 3 o'clock on the morning of the intended meeting, the two principals were arrested and held to bail. This however, only resulted in changing the place of meeting from Wisconsin to Iowa Territory. Promptly to the hour all were on hand, and the principals posted. At this juncture, Samuel Morris, an Acting Constable of the county, James F. Chapman, Justice of the Peace, Maj. John R. Coons, and one or two others appeared upon the scene to assert the majesty of the law and act as peacemakers. Being worthy citizens and men of honor, averse to all such bloody proceedings, they went earnestly to work to stop the combat and succeeded. After much solicitation, both parties agreed to refer the dispute to a committee, who after a review of the case, decided that it was a misunderstanding all around, and no apologies were necessary on either side. The reconciliation having been effected, they returned to town and all might have been well had not malicious busybodies whispered in the besotted ear of Latimer that Gloster had further intentions against his person. Maddened with the fumes of the poisonous liquor, each day added to his frenzy until the erstwhile talented gentleman was reduced to an irresponsible maniac. On the night preceding the fatal encounter, Latimer was again informed that Gloster had used menacing language against him. In the state of delirium which then enveloped him, this was like touching a match to powder, and after passing a sleepless night, Latimer armed himself with a Bowie knife and two horse pistols, one of which, in his deranged condition of mind, he loaded with powder and the other with ball and sallied forth to met his foe. Intercepting Gloster as he was going to breakfast, he fired at him once, but as the pistol was only loaded with powder it simply burned and blackened his face. Gloster cried that he was unarmed and asked his antagonist not to kill him, and the latter told him to go and arm himself. Gloster hastily withdrew, and some time afterward re-appeared armed with a double-barreled shotgun. Latimer had been impatiently awaiting his return, whittling a pine stick with a Bowie knife in the meantime, and as his eye caught sight of the man approaching with the gun in his hand advanced with raised pistol. His gait, however, was unsteady, and his aim uncertain. Gloster cocked his gun and raised it to his shoulder, but retreated step by step until he came to an open culvert where the branch runs near the corner of Lewis' store. Here he stopped and warned Latimer and his friends that if he advanced a step nearer he would fire. The words were unheeded, and a second later, poor Latimer lay weltering in his gore. Samuel Wilson who was his friend and intimate, and who, during the morning had made several unsuccessful attempts to dissuade him from his purpose, received him in his arms as he fell and conveyed him to a place near by where he expired. The authorities were strongly censured for not preventing this untimely meeting. Gloster surrendered himself to the officers, and, upon examination, was acquitted on the ground of self-defense. He remained but a short time in Potosi after the commission of the deed, and died a few years later in Chicago. The pistols used upon the occasion were preserved by a citizen of Potosi, and one of them still remains in his possession. The other was donated to a California emigrant and by him lost in the country of gold. They were savage and formidable looking instruments.

DE LASSEAUX MURDER.

A few months after the murder of Latimer, namely, in April, 1845, occurred another murder, the murderer and his victim residing at Beetown. The ownership of a certain lot was claimed by two parties—Brewer, a miner, and a companion; and De Lasseaux, the owner of a smelting furnace in that vicinity, he also being engaged in trade at that point. De Lasseaux had fenced up the lot in question, and the day on which the murder occurred, had started to remove some rails from the ground. This Brewer had forbidden him to do. As De Lasseaux approached the lot, Brewer seized a rifle which he had concealed in the limekiln near which he was standing, and, as he did so, the gun, which was at half cock, went off. De Lasseaux was a large, powerful man, of whom the other stood much in awe, and supposing that this accidental discharge of the gun would be taken as an excuse for an attack, he did not wait to see if his surmise should prove true, but, shifting the gun in his hand, he brought it down on the head of the unfortunate man, knocking him down. Brewer then drew a long knife he had upon his person and stabbed De Lasseaux in a savage manner, from the effects of which he died in a short time.

Brewer was immediately arrested. The court had barely closed its spring session, Judge Dunn not having left Lancaster. The grand jury was summoned to return, a true bill was found, and the trial commenced. The result, under the popular feeling—which, owing to the general lawlessness which had seemed lately to develop, ran high—was a foregone conclusion, and the unfortunate victim to an insane craving for vengeance was sentenced to expiate his crime upon the gallows, and his execution took place a few weeks later. The gallows was erected a little to the northeast of the village, and up to a recent date the posts were still to be seen, but were dug up afterward by future owners of the ground. Brewer's claim that his gun went off accidentally on the fatal day, was not very generally received. Some time after his execution, the person to whom the gun had been given by him was hunting in the woods, when, on two different occasions, the weapon was discharged at half-cock, showing, when too late, that the unfortunate man spoke the truth.

JORDAN MURDER.

The most diabolically cold-blooded and brutal murder that ever occurred in Grant County was perpetrated June 15, 1868, by William Kidd, of Glenn Haven, who at that date killed Catharine Jordan, of the same place. Kidd and his victim had been brought up together, being children of farmers in the neighborhood, and for some years he had been paying to Miss Jordan considerable attention, and, to all appearances, was deeply in love with the young lady. This affection, however, was not by any means mutual, and Kidd had threatened to take her life if she did not marry him. Nothing more was heard of it until on the evening of the 15th of June, when Kidd drove over from Cassville with a two-horse carriage to the residence of Mr. Samuel McIvor, where Miss Jordan was stopping. He remained talking with the young lady for an hour and a half, when she was finally induced to get in the carriage and take a ride with him. This was the last that was seen of the girl until the next morning, when her mutilated body was found by a neighbor, looking for his cattle, near the farm of Mr. Mark Scott, of Glen Haven. Her throat was gashed from ear to ear, while the hands and arms were cut and bruised badly, giving evidence of the terrible struggle which must have taken place between the murderer and his victim. It was afterward discovered that Kidd, after committing the dastardly crime, had driven his team to his father's stable, hitched them, saddled a horse of his own and rode to Boscobel, where he left his horse and left for parts unknown.

The news of this horrible event fled like wildfire, and public feeling was lashed into the fiercest waves of excitement, which drowned every feeling but the one for vengeance on the murderer. The citizens of Bloomington and Glen Haven offered a reward of \$550 for his arrest, and to this was added \$500 by the county and \$500 additional by the State, making \$1,550. To this was added \$250 offered by the citizens of Fennimore, making \$1,800 in all. No traces of the ruffianly fiend were found, until, in October of the same year, he was captured in Nobles

County, Minn., by J. T. Deleware, formerly of Glen Haven, but at the time a resident at Omaha, Neb., and Frank Winship, of Sioux City. During the interval elapsing between the commission of the deed and his capture, Kidd had been rambling around through Illinois, Iowa and Minnesota, where he was engaged with a companion, whose acquaintance he had made, in trapping, when the pursuers closed in on him. He confessed the whole of his crime to one of his captors the first night after his arrest, saying after they left the house he had drove on for some ways, and had stopped his horses near a ravine, and, turning them across the road, had drawn his revolver and asked his companion to shoot him. This she of course refused, at the same time demanding his intentions, saying she was afraid of him. He then took out a knife, and Miss Jordan cried out, "My God! William, are you going to cut my throat?" To this the fiendish wretch replied in the affirmative, and endeavored to accomplish his designs. The girl resisted stoutly, but he finally wrenched the knife from her hand and succeeded in effecting his purpose. This portion of his fiendish story was told with a cold-blooded particularity horrible in its coolness. After being satisfied that life was extinct, Kidd alighted from the carriage, intending to throw the body in some sink hole, but the horses started, and he thought some one was coming, so, leaving the remains in the road, he jumped to the seat and drove hastily away. The reason given by the murderer for his hellish act was that he was in misery for fear she might marry some other person—his excuses being as feeble as his crime was dastardly.

The murderer cheated the law by taking a dose of poison while on the cars on his way to Grant County. His body was brought to Lancaster and identified, after which it was buried, and the crime passed into the dim region of remembrances.

HARNEY MURDER.

The southern portion of the county was the scene of an atrocious murder in 1865, which stirred the social strata of that section to its very depths. On Monday, September 25, of that year, Dr. Harney, an old resident of Fair Play, in a fit of passion shot and trampled to death his step-daughter, besides inflicting serious injuries upon his wife, the murdered woman's mother. His victim was the daughter of Mrs. Harney by a former marriage, and had been brought up in the family. Several years previous to the tragedy, she had been married to Joseph Hunsaker, who, at the time of the fatal affair, was in Idaho. Some few months previous, Mrs. Hunsaker had expressed a desire to keep house by herself, and accordingly had moved into a house opposite the Harney residence. This move had been strenuously opposed by Dr. Harney, who upon finding that remonstrances were of no avail, and that the move had been made, forbade any of the family associating or having any communication with Mrs. Hunsaker. This command was not heeded by Mrs. Harney, except to choose such time for visiting her daughter as when the doctor was not about the premises. It was claimed by the friends of Dr. Harney that his naturally choleric temper had been augmented for some time previous to the fatal day by troubles with his head, and that arrangements had been made for his starting on a tour of travel, accompanied by some one of the members of his family. Be this as it may, on the day of the tragedy, while Mrs. Harney was out making calls with a lady boarding at Mrs. Hunsaker's, the doctor acted in a most unaccountable manner in following them from place to place, finally waiting for his wife on her return, and following her into the house, where he instantly knocked the unsuspecting woman down with the butt of a revolver he carried. Mrs. Harney screamed for help, and Ellen Harney, her step-daughter, hurried upon the scene, and seizing the infuriated man compelled him to desist from his work.

Upon the first outcry, Mrs. Hunsaker, who had been sitting on the steps of her house with her friend, started to run over, expressing herself as fearful that the doctor was attacking her mother. She stopped suddenly, afraid that he would kill her if she appeared before him, but her friend thought otherwise, and Mrs. Hunsaker rushed on and into the house where she found her mother lying on the floor. Hardly had she sank by her side before the now doubly-influriated man threw her to the floor and stamped and trampled on the unresisting woman, frac-

turing her skull in several places, and ending his diabolical work by sending a ball through her brain, killing her instantly. During this terrible scene his daughter Ellen had been trying with the terror of despair to prevent the consummation of his murderous intents. As the murderer attacked the daughter, Mrs. Harney struggled to her feet and ran into the street crying for help. The doctor tore himself away from his daughter and started in pursuit, and fired two shots at the fleeing woman, happily without effect. He had just caught up with her, and was about to again begin an attack with the butt of his revolver, when it was wrenched from him by his son Harrison, who took his mother to the house. The murderer passed through the room where the lifeless body of his victim lay, making some bitter remark, and, securing a lancet, attempted to cut his own throat. In this, however, he was not successful, and although when afterward confined in jail at Lancaster, he tore the bandages off in order to bleed to death, his wounds finally healed, and he was tried, convicted and sentenced to State Prison for life. Mrs. Harney also recovered from her injuries, leaving only one victim to the insane fury of the murderer. The excitement created in the immediate neighborhood of the place where the crime was committed knew no bounds. During the summer of 1880, a petition was circulated for the pardon of the doctor, but the result of the petition is as yet unknown.

HAGGERTY MURDER.

By far the most horrible crime ever committed in the limits of Grant County was the murder of the Haggerty family, near Lancaster, in December, 1868, by Andrew Thompson, a paragon of the woman. The first acquaintance of the parties dated back to ten years previous to the date of the murder. At that time, John Haggerty kept a saloon at Bull's Head, some six and a half miles west of McGregor. At the breaking-out of the war, Haggerty enlisted, and Thompson continued his visits to the place, finally becoming criminally intimate with the woman. Upon the return of the husband from the war, he was not long in finding out the exact status of affairs, and he soon after left for California, leaving his family to shift for themselves. A child was the result of this intimacy, which was killed by the mother, Thompson being accessory to the murder. The saloon was then sold out, and the woman with her children moved into a little house on Thompson's farm, but did not remain here long before they again were moved to McGregor, where they remained until December, 1868, when, yielding to the importunities of the woman, Thompson took her and the children in a covered sleigh, and started on the journey which was to end in a crime the like of which is hardly surpassed in all the criminal annals of the country. Crossing the river at McGregor, they came down through Grant County, passing down through Bridgeport, Patch Grove, Bloomington, North Andover, Cassville, Beetown and Lancaster. At the latter place, the family, consisting of Mrs. Haggerty, her daughter and two sons, were last seen alive. In a confession made after his conviction and sentence, Thompson referred to the motive of the trip as being a desire to find some place where he and the woman could live together without disturbance, but as he himself acknowledged having previously tried to get rid of her, it is extremely probable that the trip was undertaken with the intention of ridding himself once and for all of this encumbrance by fair means or foul. This belief is strengthened by numerous incidents and circumstances observed by persons in the places through which he passed.

After a week's absence, Thompson returned to his family in Clayton County, Iowa, but gave no explanation of his absence or where he had been. May 29, of the following year, trunks and other articles were discovered by some fishermen in a slough near Prairie du Chien, and a few days later the corpses of Mrs. Haggerty, her daughter and the two boys were discovered in the river near Cassville. On the 2d day of June, a warrant was issued for Thompson's arrest, but upon the approach of the Sheriff, his "man" escaped to the woods near his farmhouse, and eluded for a short time the officer of the law. But not for long, as the woods were soon alive with infuriated men armed with guns, and who were only too ready to use them. This brought the fiend to a realizing sense of his danger, and he came out of his hiding-place and gave himself up to the Sheriff. After some debate as to jurisdiction, his trial took place in Iowa,

resulting in his conviction. He was sentenced to be hung September 9, 1869, but the execution was postponed, pending a settlement of some question of jurisdiction by the Supreme Court, and his sentence was afterward changed to life imprisonment in the Penitentiary. During this interval, Thompson wrote out and published a confession, in which he claimed that the girl Anna had been sick when they started from McGregor, and at Lancaster he wished to remain all night and save the girl from the exposure of camping out, as they had heretofore done since leaving McGregor. To this Mrs. Haggerty objected, charging him with being desirous of delay so that his family might overtake them, and give him an excuse for deserting her and returning home. They accordingly made a start, but had not gone more than about a mile beyond Lancaster on the road to Platteville, and were just on the brow of the hill south of Pigeon Creek, when the boys cried out that Anna had fainted. Her mother threw snow in her face and chafed her hands, and thus brought her to. Thompson again urged a return to Lancaster, but the woman would hear none of it, and they proceeded on toward Platteville, until they reached the timber, about four miles from Lancaster, when they turned off the road, and drove into the woods, intending to encamp for the night. They had hardly stopped before Mrs. Haggerty informed him that the girl was dead, and upon examination he found it to be so. The woman then insisted that they must dig a grave and bury the body, but to this Thompson objected, saying they must go back to Lancaster, as, if the body was found buried there without a coffin they would be arrested for murder. The woman said that if they returned they would be detained, and have to give an account of themselves, when Thompson's people would hear of it and follow him. The discussion ended by the latter announcing his intention of going back, when his par amour seized a hammer, and saying, "I'll have your life first," struck him on the neck and shoulder. This enraged him, and he snatched the hammer from her, and in turn struck her several blows on the head. Realizing, however, what he had done, he endeavored to apologize for his harshness, but although the woman stopped her cries for the time, she motioned him away. Just then sleighs were heard approaching from the direction of Platteville, and voices of their occupants were heard chatting and laughing. It being a still night, the sleighs were not so near as was at first supposed, but as they approached, the woman re-doubled her cries, which he begged her to stop but to no purpose. The suspicious light in which he would be placed should his position there be discovered, with a dead girl in the sleigh, and the woman and two boys screaming as if in mortal terror, Thompson claims at once crossed his mind, and he picked up a feather bed that lay at his feet, and threw it over them. The woman struggled and threw it off, screaming louder than ever, so that if the sleighing party had not been so boisterous themselves they must have heard them. He then seized the bed and put it over them again, and held it down until the struggles ceased. As soon as the sleighs, which traveled leisurely, had passed, he pulled it off, but no one spoke or made any noise. He lighted the lantern and looked at them, shook them, and then the truth dawned upon his mind—they were dead. He sat down stupefied by the crime he had committed, and remained uncertain what to do for some time. Then the thought that he must conceal what he had done seized him, and he started for Beetown, near which he had observed some mineral holes, in which he thought he might hide the bodies. He drove back through Lancaster, lost his way, and stopped to procure directions, and having driven for hours with his ghastly freight, came to the mineral holes, but found them too shallow for his purpose. He then determined to go on to Cassville, and hide the evidences of his crime in the river. Again he had some difficulty in finding the road, and it was not until nearly daylight that he passed through Cassville. Making his way to the river, he threw the bodies in, and then, driving a short distance further, he burned his sleigh cover to destroy the identity of his outfit. He then drove rapidly toward Prairie du Chien, and near that place put the baggage of the murdered family into the river, and then made his way home. How much of truth there is in Thompson's narrative is hard to decide. Whether the murders were committed as he relates, or whether, as many believed, they were taken to the river and then murdered while under the influence of opiates, will never be known. The terrible experiences of that awful night will remain a sealed book. But justice was not to be thwarted, and Andrew Thompson now undergoes the punishment inflicted for his horrible crime.

KILLING OF MILAS K. YOUNG.

One of the most inhuman of the many diabolical crimes that has marked the pages of Grant County history was the murder of the Hon. Milas K. Young, by his son, in May, 1875, near Glen Haven. The causes leading to the commission of the crime dated back some time previous to that date. Albert Young, the murderer, had been engaged in business at Glen Haven, and, through various causes, was unsuccessful. Mr. Young indorsed his notes for some time, but then refused to do so any longer. Albert then resorted to extensive forgeries in order to keep himself above water. These forgeries included the names of friends as well as his father. He also obtained control of the title to the homestead, and was endeavoring to raise \$2,500 by a mortgage on the place. In the meantime, he attempted to drive his father off from the farm. In this quarrel the young man had the sympathy of his mother, between whom and her husband there had existed a coolness for years, there being at the time a lawsuit pending between them in regard to the title to the farm. In a collision between father and son, the former was injured by an ax in the hands of his offspring, but this wound was claimed by the latter to be accidental, and by many, cognizant of the facts, so accepted. At length, Mr. Young learned of the forgeries and sent word to his attorneys to have the forger arrested. Previous to this he had expressed to some of his neighbors the fear that his life was in danger, but these fears were regarded as groundless, and Mr. Young continued to remain at the homestead. By some means, Albert Young learned of the danger in which he stood, and Friday, May 14, early in the forenoon, he came into the yard surrounding the house and sat down on a cart, occupying his time with whittling, evidently waiting for his father to come out. The latter was in his room lying down, with the door locked. After waiting in this manner for some time, the young fiend, it would seem, could no longer control his desire for revenge, and he entered the house and inquired of a servant where his father was, and upon receiving the reply that he was asleep in his room, Albert went to the door and threw himself against it with a view of forcibly entering the room. This he partly succeeded in doing, when the noise awoke his parent, who jumped from the bed and ran out of a door leading from his bedroom on the east side of the house. His pursuer then turned and hastened to the front door and met Mr. Young as he came around the house, drawing a revolver as he did so. He commenced firing and discharged four shots, two of which took effect upon his victim. The latter also drew a revolver and fired once at his unnatural son, the bullet grazing his abdomen and inflicting a painful, but no wise dangerous wound. But determined that his victim should not escape, the young ruffian seized a hatchet and rushed upon the fatally-wounded man and dealt him several crushing blows upon the head, breaking the skull in a ghastly manner.

Several neighbors heard the cries of the wounded man, and hastened at once to the spot, but did not arrive until the murderer had finished his work and started to make his escape. He ran west to a grove standing some sixty yards away, and there stopped to examine his own wound. The hasty examination appeared to produce the impression that he was seriously, if not fatally, wounded, and, reloading his revolver, he placed it to his head and sent his blood-stained soul into the presence of its Maker.

Mr. Young was picked up by his neighbors and carried into the house and laid on the bed from which he had fled but a few moments before. He lingered in great pain until the Sunday following, when death came to his relief, and he passed through the doors into the great hereafter.

The excitement in the community was intense, the murdered man had been universally respected wherever known, and his sudden and horrible death aroused all the indignation lying dormant in the breasts of the citizens of that section. Had it not been for a few of the more conservative among them, there is no doubt but the stern rule of a mob would soon have reduced everything about the scene of the tragedy to ruins; as it was, the body of the murderer was refused burial in the village cemetery, and was quietly interred upon the farm. Of the murdered man, the following testimony was borne by the papers of that date:

“Milas K. Young had a reputation as wide as his adopted State. His form graced our legislative halls during the years from 1862 to 1865. Intelligent, faithful, earnest, his constituents felt that their interests and their welfare were wisely understood and well defended by him. Endowed with a laudable ambition and great mental energy, he early became a leader among his fellow-citizens, capable of molding and guiding public opinion. With wide sympathies and views, he felt a deep interest in all public questions, especially those that concerned the profession that he had chosen. To increase the quantity and quality of the productions of the soil; to provide for his fellow-farmers competing markets for their productions, were the problems he most studied. It was this devotion that gave him such a strong hold on the esteem of the farming class with whose interests his inclinations and tastes were identified.”

CHAPTER V.

UNITED STATES LAND DISTRICTS—EARLY HIGHWAYS AND FERRIES—RAILROADS IN GRANT COUNTY
—TELEGRAPH LINE—CENSUS OF GRANT COUNTY—AGRICULTURAL ASSOCIATION.

UNITED STATES LAND DISTRICTS.

A great amount of the public land in Wisconsin had been surveyed by the latter part of 1833, and this fact being reported by the Surveyor General, two land districts were created by an act of Congress approved June 26, 1834. These districts embraced all the land north of the State of Illinois, west of Lake Michigan, south and southeast of the Wisconsin and Fox Rivers, included in what was then the Territory of Michigan. This area was divided in twain by a north-and-south line at right angles from the base line to the Wisconsin River, between Ranges 8 and 9, east of the Fourth Principal Meridian. All east of that line was called the Green Bay Land District; all west, the Wisconsin Land District. The land office of the Western District was established at Mineral Point, and of the Eastern District at Green Bay. Grant County, then forming the western portion of Iowa County, was included in the Mineral Point District.

In October, 1834, the first public sale of lands in the present confines of Grant County, was held at Mineral Point, and a second sale took place at the same point in November, 1835. Within the Western or Mineral Point District, lay the great lead region, whose wealth had, for several years, been attracting miners by the hundred from every section. In accordance with the policy outlined by the Government, those lands known to contain mineral were reserved from sale. By an act of Congress of June 15, 1836, the Milwaukee Land District was created out of the southern portion of the Green Bay District. The land office for the new district was located at Milwaukee, where, in the spring of 1839, the first public sale of lands in this district was held. These lands had been surveyed after the lands which had been offered for sale at Mineral Point and Green Bay.

By a provision in the act of Congress creating the Green Bay and Wisconsin Land Districts, these districts were to embrace the country north of the Wisconsin and Fox Rivers, whenever the Indian title to the same should become extinguished. By a treaty made with the Winnebago Indians November 1, 1837, all lands belonging to that tribe east of the Mississippi River were ceded to the United States. This cession put the General Government in possession of land north of the Wisconsin, and the limits of the land districts were extended to the new territory which was ordered to be surveyed, the survey being finished in 1845. All of this territory, with the exception of the reserved mineral lands was open to entry at \$1.25 per acre. This reservation of the mineral lands from entry was afterward a large-sized bone of contention between miners and the Government, and terminated in these lands being offered for sale in 1847; a history of these troubles will be found in another portion of the work. In 1842, the land office was removed to Muscoda, where it remained a number of months, when it was again returned to Mineral Point. The little log "seven-by-nine" structure which served as Uncle Sam's domicile, while exchanging land for cash at Muscoda, was still standing up to a recent date.

EARLY HIGHWAYS AND FERRIES.

Means of communicating with different parts of the country are early recognized by dwellers in any section as something indispensable. The savage denizen of the forests, as yet uninitiated into the mysteries of wheeled vehicles, depending mainly upon the means of locomotion furnished him by nature, or at the best, employing for long stages of travel that much-abused, much-enduring beast the "Indian pony," needed but a narrow pathway known in

early parlance as a "trail." These arteries linking the different villages one to another, furnishing alike means for the solitary traveler, the hunting party, or the hideous, bedaubed warriors intent upon plunder and scalps, to attain their different ends, and was deemed quite sufficient by the first inhabitants of the soil. These trails were only wide enough for one person, making "Indian file" always the order of march, a phrase that was long remembered by settlers and their descendants. To the early white men, but little removed from his Indian companions in point of civilization, the Indian trail furnished ample means for pursuing his desire for pelts and pelf, and he gave but little heed to any improvement in this direction. Hence, when the early pioneers, those men of brawn and muscle, whose strong arms and stout hearts were to make a pathway that should serve as an entering-wedge for the advancing civilization made their appearance. They found slow travel along winding trails, or, slower but much more pleasant, drifting down the sparkling streams, the only mode of reaching the point which was to be their future home.

As in all other portions of the country so it was in Grant County, trails crossing and recrossing led in every direction, but of genuine highways, broad and passable, there were none. What were put down on the early survey as roads were, with one or two exceptions, only an enlarged edition of these trails. A road was early inaugurated from Galena to Mineral Point and Dodgeville, that passed up through the present townships of Hazel Green and Smelser, leaving the latter township in the northeast quarter of Section 12. This road running almost wholly through a prairie country, was passable for teams from the beginning of settlement, but can hardly be classed as a properly laid out road. Other trails, or so-called roads, were, as has been stated, numerous. Upon the earliest surveys of the county, these connecting links are laid down as extending between Galena and Prairie du Chien, Cassville and Prairie du Chien and between Cassville and Galena, this latter road following the ridge for a portion of its length down through the southern portion of the present township of Lancaster. Another road properly so called led from the Western Paris, then an embryo city, and, as after circumstances proved, destined to remain such, to Galena, and another from this place to Potosi. Besides these a "mail trail" connected Prairie du Chien, Cassville and Gibraltar with Galena.

Upon the transfer of this Western Territory to the United States, the chain of posts at Green Bay, "the Portage" and Prairie du Chien was established. For a time the Fox and Wisconsin Rivers were depended upon to furnish means of communication between the posts, but the long winters and inconvenience attending this absolute dependence upon this water-way, led the Government to decide upon the construction of a road between these places, and thus it comes that the first regularly built highway in Grant County was the military road constructed at Government expense.

Early in 1835, Lewis Cass, then Secretary of War, issued orders to open, lay out, and properly construct a road between Fort Howard and Fort Crawford, by the way of Fond du Lac and Fort Winnebago. These being the "piping times of peace," the Government in a truly economical vein determined to use the muscle and intelligence encased in United States uniforms in its construction. Accordingly the soldiers at Fort Crawford were ordered to construct that portion of the road lying between Prairie du Chien and the "Portage." Those stationed at Fort Winnebago were to build the portion extending from the "Portage" to Fond du Lac, while the remainder of the distance from the latter place to Green Bay was put into the hands of the military stationed at Fort Howard for construction. The soldiers stationed at these three posts were under the command of Brig. Gen. George Mercer Broke, and composed the Fifth Regiment of the standing army. The road was laid out by Lieut. Centre and James Duane Doty. Mr. Doty's assistance was secured, as he was much better acquainted with the route over which the road was to pass, than any other man in the Territory.

The road itself was an extremely crude affair. Through timbered country a track about two rods wide was cut and mile-stakes set up. On the prairie, mile-stakes were also set up and small mounds erected. Over marshy places, a "corduroy road" of logs, overlaid with dirt was built, and any one whose way has led them at any time of life over one of these abominations, can easily conjecture the torture and speed to be gotten out of this illusory phantom misnamed a road.

It was, however, a shade better than no road at all, and in a fashion answered its purpose for some years. It passed through Grant County along what is now known as "Military Ridge." From the Blue Mounds it followed the old Indian trail to the northwest of Lake Mendota, and thence via Fort Winnebago, Waupan and Fond du Lac to its eastern terminus, Fort Howard. For many years it was quite a well-traveled road, owing to the scarcity of other lines of travel, but as the country filled up and other roads better and more direct between different points were constructed, this highway fell into disuse.

First and last, a considerable sum of money was laid out on this "connecting link," as will be seen by the following report made by Capt. T. J. Cram to Congress, September 1, 1839. In this report the Captain says:

"Commencing at Prairie du Chien and running east as far as to the Blue Mounds, this road is laid on the ridge dividing the waters flowing toward the north from those flowing toward the south. At the Blue Mounds, this dividing ridge deflects toward the northeast, and continues on this course to within about four miles of Fort Winnebago, where it is lost in a summit level denominated 'the Portage.' This remarkable summit is one among a few others of similar character in our country, possessing the property of dividing the waters flowing into the Gulf of Mexico from those flowing into the Gulf of St. Lawrence. The part of the road from Fort Crawford to 'the Portage,' a distance of about one hundred and fifteen miles, will need the sum of \$5,700 to be expended, chiefly in the repairs and construction of small bridges and the opening of ditches, which are not only necessary to the immediate use of the road, but also to the preservation of the road itself. The construction of a safe and permanent road across 'the portage,' for about four miles, will require the sum of \$5,995. Owing to the periodical overflowing of this summit level, the road across it is rendered utterly impassable, and continues so for several days at a time, amounting to some weeks during each year. At such time, the United States mail and travelers to Fort Winnebago are obliged to be taken around on a circuitous route of about fifteen miles, crossing a lake on the way, in order to reach the desired point, and it is not unfrequently the case that the unwary traveler is led into the middle of 'the portage' before he becomes fully apprised of his danger, when, all of a sudden, his horses are mired in the midst of a flood of water, from which he finds it impossible to extricate his team, and might perish in sight of the fort but for the assistance of the soldiers, who come off in canoes to his rescue. A thorough and critical examination has been made, with a view of constructing a road around the portage. It is found, however, that the cost of such construction, besides an increase of distance and the inconvenience of a ferry, would quite equal the cost of making the present road good and safe at all times.

"The sum required to complete the construction of the part of the road between Fort Winnebago and the south end of Lake Winnebago, a distance of about sixty miles, is \$6,320. The land in the vicinity of this portion of the road is of good quality, and similar in most respects to that described elsewhere in this report. From the south end of Lake Winnebago to within about six miles of Fort Howard, at Green Bay, the road is exceedingly bad, and the cost of transportation over it is a heavy tax upon the settlers, and tends greatly to retard the settlement of the whole tract of country between Green Bay and the Wisconsin River."

In conclusion, the Captain adds:

"The cost of constructing the road from Fond du Lac to Green Bay, about fifty-six miles, would be \$17,292, to be expended in bridging, ditching, and filling the wet places with durable materials, all of which exist in abundance on the road. Thus, the whole sum required to complete the construction of the military road from Fort Crawford, by Fort Winnebago to Fort Howard, the extent of about two hundred and thirty-five miles, amounts to \$35,267. This sum, with strict economy in adopting the most simple kind of construction, would not more than cover the cost of completing this road, which, in a military point of view, is of unquestionable importance, connecting, as it does, a chain of military posts, which the safety of the people of Wisconsin and the north part of Illinois will require to be maintained for some years to come."

At the second session of the Territorial Legislature, the necessity for more convenient thoroughfares of travel, is shown by numerous acts locating roads in different portions of the State. But one road, however, was provided for in Grant County, the Council and House of Representatives enacting, "That Jonathan Craig, William Davidson and Stewart McKee are hereby appointed Commissioners to locate and establish a Territorial road from Osceola, in the county of Grant, to Belmont, in the county of Iowa, by way of Platteville. The Commissioners, or a majority of them, shall meet at Platteville, on or before the first Monday of August next, and proceed to the discharge of the duties assigned them by this act, according to the provisions of the act regulating the mode of laying out Territorial roads, passed at the last session of the Legislative Assembly.

"SECTION 2. The County Commissioners of the counties of Grant and Iowa, shall audit and pay the expenses in their respective proportion to the amount of the road laid out by each. The Commissioners shall receive each \$3 per day for the time necessarily employed in the discharge of the duties assigned them by this act."

This was the first Territorial road laid out in Grant County. Previous to this, however, Daniel Burt, an early settler, who had located in the present township of Waterloo, on the Grant River, and erected a mill, had opened several roads, one eleven miles in length, to Cassville, one eight miles to Potosi, another to Beetown, eight miles in length, and still another to Hurricane Corners, six miles away.

Perhaps no better illustration of the difficulties and inconveniences which beset the path of the early pioneers, in attempting to get from one point to another, can be given than the following: Soon after Mr. Burt's settlement at his new home the supply of food ran short, and, failing to receive any from St. Louis as he had expected, started for Paris, on the Platte, the nearest point at which provisions could be purchased. To reach that place with a team, it was necessary to take a circuitous route, first to McCartney's, eight miles, then to Beetown, thence to Lancaster, and from there on to Potosi and Paris. His starting-point had been only eight miles from Potosi, but there was no road between the two points, and Mr. Burt was therefore obliged to perform a roundabout journey of forty-four miles to reach his destination, which, but for lack of a short stretch of road, would have been only a short trip of twelve miles. He arrived at his destination, and returned as far as a cabin situated on the present site of Potosi, where he stopped overnight. In the morning, a start was made for home, through the timber, over a route that had never before been traveled by man or beast. Mr. Burt was accompanied by a man to drive, while he himself selected the route and cut away the trees. They reached Boice Creek, about half way, by 10 o'clock, and with but little difficulty. At that point they met with a formidable obstruction. The Mississippi was high, and the water covered the bottoms of the creek a quarter of a mile to the depth of eighteen inches; and in the channel of the creek, some forty to forty-five feet wide, the water was ten feet deep. The wagon was a new one and the box was reasonably tight. After caulking up some of the open places with leaves, the wagon was placed on the verge of the perpendicular bank with the provisions aboard to be forced by the driver into the channel when all was ready. Mr. Burt then swam the horses over the creek and placed them in readiness with whiffletrees and chain attached; he then cut a grape vine and fastened one end of it to the pole of the wagon, and took the other end in his teeth. Having swam the length of the vine, he ordered his companion to force the wagon into the creek, which he did, and this odd craft, floating with its load in fine shape, was towed by Mr. Burt across the stream until it reached the opposite side, when the horses were hitched on and all brought safely over the bottom. The bluff was then ascended without difficulty, and they arrived opposite their home about 1 o'clock. Here another obstruction was met. For some distance either way the bluff was steep and rocky. A point where timber had been rolled down was selected, the inclination being about thirty degrees from perpendicular. All the wheels were chained, and a tree, fifteen inches in diameter and with a wide expansive top, was felled, and chained to the hind axle-tree. Thus fixed, the descent was made in fine shape, and the cargo was safely landed.

After the organization of the county, among the first acts of the County Commissioners was the meeting of this demand for inter-county communication. At a meeting of this body, held May 4, 1838, M. De Tandebartz—better known as Detantabar—presented a petition for the laying-out of a road between Platteville and Paris, on the Platte River, notice having previously been published and no objections raised. Ralph Carver, James Gilmore and James H. Dixon were appointed Commissioners to locate a road in accordance with the request of the petitioner, upon the latter's depositing the sum of \$25, as required by law.

At the same meeting, the same person presented a second petition, signed by himself and others, asking for a road from Lancaster to Galena, Ill., via Paris, said road to run to State line. James Bonham, Jonathan Craig and Enos P. Wood, were appointed as a commission to lay out the wished-for road, as soon as the petitioners should deposit \$30.

Still another petition was presented by Asa E. Hough, for a road from Cassville "by the best and most practicable route via La Fayette, on toward Galena, to the State line of Illinois." Elias Dean, Orris McCartney and Benjamin Kilbourn were appointed Commissioners to lay out this road, the applicants being first required to deposit the sum of \$36.

The list ends with a petition presented by Daniel R. Burt, the settler whose adventures are chronicled above, praying for the location of a road from Cassville, via Burt's Mills, "to the most eligible point in the Snake Diggings by the most practicable and best route." The petitioner's cry was granted upon the deposit of \$15, and a commission, consisting of Isaac Dodge, F. A. Sprague and E. P. Wood, was appointed to locate the wished-for road. With the opening of the country, as the years wore on, new thoroughfares were opened, until now every district and farmhouse has its connection with the main arteries, and the difficulties, not to say dangers, surrounding travel in the early days of settlement, are only remembered, as are other tales of pioneer experiences, in a traditional and fragmentary way.

Ferries.—While the early Indian, from the very necessities of the case, was obliged to establish trails as means of communication with his neighbors, he was far from perceiving the necessity of providing permanent means of crossing the streams, numerous or otherwise, which might intersect these forest pathways. He considered himself fortunate if a stray canoe should happen to furnish the means of a dry and convenient passage across the brawling obstructor, but if this was absent, the copper-colored inhabitant, not being troubled with that superabundance of clothing rendered necessary by modern civilization, plunged in, and stoutly breasted the miniature waves or swift-sweeping currents, and, with a few muscular strokes, landed on the opposite shore, and pursued his way without giving a second thought to his interceptor. In this, the first explorers of the country, and those who visited it later on, were fain to follow the example of their dusky companions and predecessors, and it was a number of years before ferries, with their rude but safe appliances for conveying the traveler dryshod over the larger streams, were established. Gradually, however, as settlers began to come in, and the inconvenience of a cold bath, not to mention the great disadvantages of swimming cattle and himself, soon brought about a new order of things in the shape of fixed ferries at certain accessible points. The construction of the military road in 1835 brought in its train the establishment of the first legally authorized ferry, at the point where the military road crossed the river. This ferry was run by a Canadian Frenchman by the name of Jean Brunet, a shrewd, hard-working, enterprising representative of that class without whose aid the great Northwest country might have lain many years longer, covered with the darkness of uncertain tradition. By means of a flat-boat propelled by poles, oars, or transferred from point to point by means of ropes, as occasion served, Brunet was wont to convey the early settler, the wandering hunter, or detachment of troops, across the broad bosom of the Wisconsin. On the north shore of the river the ferryman had erected a comfortable stone house, one of the first erected in this western country, and combined the avocation of tiller of the soil with that of ferryman. Brunet was succeeded by Jean Barrette, who bought out the original proprietor, and so satisfactorily had the ferry been conducted that, upon the second session of the Legislature, in the latter part of 1837, the early legislators granted to Barrette, his heirs and assigns, permission "to establish and keep a ferry across the Wisconsin

River at that place where the military road running from Prairie du Chien to Fort Winnebago crosses said river, for the term of ten years from and after the passage of this act." Section second of the same act provided, "that no district, county, or Board of County Commissioners shall have power to grant license to any person to establish a ferry across said river within one mile immediately above or immediately below the place aforesaid."

The ferry landing upon the Grant County side of the river was between a quarter and a half mile below the present bridge.

At the same session an act was passed authorizing "William Walker and Joseph H. D. Street, their heirs and assigns to establish and keep a ferry across the Mississippi River at Cassville, in Grant County, and for one-fourth of a mile below and one-fourth of a mile above said town, to the west bank of said river, and for one mile below the mouth of Turkey River, for the term of ten years from and after the passage of this act; provided, said Walker and Street shall keep, or cause to be kept, a good and sufficient horse or steam ferry-boat, at the place aforesaid, for the safe conveyance of passengers, horses, cattle or hogs across said stream without delay; and provided, also, that said ferry, when so established, shall be subject to the same laws, and under the same restrictions as other ferries are, or may hereafter be, in this Territory."

Still another act granted the required authority to James P. Cox and Justus Parsons to establish a ferry across the Grant and Mississippi Rivers, at Parson's Landing, in the county of Dubuque, to the town of Osceola, in Grant County.

This act was confirmed at a meeting of the Board of County Commissioners, held April 2, 1838, when it was "Ordered that license to keep a ferry across the rivers of Grant and Mississippi issue to James P. Cox and Justus Parsons, at the following place: From J. P. Cox's landing, Osceola, to Jones' Island, and from said island to Parsons' Landing west of the Mississippi River, and at the following rates of ferriage, viz.: Ferrying a person from Osceola to said island, 18 $\frac{3}{4}$ cents; each head of neat cattle, 16 $\frac{3}{4}$ cents; each hog, 4 cents; each sheep, 3 cents. For carriages of all kinds, 8 $\frac{1}{2}$ cents each wheel; double the foregoing rates for crossing the Mississippi River from said island to said Parsons' Landing, and for crossing both the rivers around the island, quadruple the sum for crossing the Grant."

These ferries were soon after established, and furnished means for crossing their respective streams for many years. Through the interior of the county but few ferries were known, fords taking their place until the advent of that emblem of civilization—the bridge. Near Paris, at an early date, a ferry had been established across the Platte, under private auspices. At certain seasons of the year, these fords were extremely treacherous and unsafe, owing to the swiftness of the currents of the streams, and numerous accidents combining in rare instances a distressing loss of life told of the dangers lurking in the riotous depths of these on-rushing waters. Soon, however, with the advent of properly laid out roads came the accompaniment of bridges, and only the remembrances of the lurking dangers in the silent depths remained to haunt the spot.

RAILROADS IN GRANT COUNTY.

Probably no section of the Western country has had more projected railroads to the square mile, compared with the actual railroad facilities, than Grant County. Local lines and trunk lines have been from the earliest times almost annually projected in all parts of the county, running in all conceivable directions, and with varied termini. "Great expectations" might well be the characteristic applied to the railroad interests of Grant County. As a matter of fact, until within two years previous to this writing the larger part of the county has been left without railroad connection.

As early as 1836, a railroad was chartered in the county. Early in the session of the first Territorial Legislature an act was passed incorporating the "Belmont & Dubuque Railroad Company." Section 8 of this act gave the company power "to construct a single or double track railroad from the town of Belmont, in Iowa County, to the nearest and most eligible point on the Mississippi River within the Territory; and they shall have power to extend the railroad

if they shall deem it expedient, from Belmont to Mineral Point, and from thence to Dodgeville in the said county of Iowa, with power to transport, take and carry property by the power and force of steam, of animals, or of any other mechanical or other power, or of any combination of them; and they shall also have power to make, construct and erect such warehouses, toll-houses, carriages, cars, and all other works and appendages necessary for the convenience of said company in the use of said railroad." In a subsequent section it is "*Provided*, that the toll on any species of property shall not exceed fifteen cents per ton per mile, nor upon any passengers more than six cents each per mile." This was the second road chartered in the State, the first being the La Fontaine Railroad Company, to run from La Fontaine, on the Fox River, to Winnebago City.

The incorporators of the Belmont & Dubuque Railroad were John Atchinson, Francis K. O'Ferrall, William I. Madden, James Gilmore, John Foley, Charles Bracken, Richard McKinn, Robert McPherson and Paschall Bequette. This road was never built.

The next railroad of which historic mention is made, was one agitated in 1843 and 1844. It had more important termini than the first one—no less, in fact, than Lake Michigan and the Pacific Ocean. It was proposed by Ira Whitney, of New York, as a part of a trans-continental route, intended to afford a means of reaching Oregon, a section then coming into notice. Aid was solicited from Congress, but the project was never carried out, or even begun.

In 1843-44, the subject of a road from Grant County to the lake was warmly agitated, the object being to afford a means of transit for the vast quantities of lead ore then being mined in this section. Galena, however, opposed the road, thinking it would interfere with her jobbing trade. Potosi was anxious for the road. A committee was appointed, of which Maj. G. M. Price, of Cassville, was Chairman, to report to the House of Representatives the practicability and expediency of the construction of a road from Potosi to Lake Michigan. The road was projected on two routes, one to run up the hollow at Potosi and pass near Lancaster and Fennimore; the other nearer Platteville; and \$20,000 per mile was thought to be a liberal estimate for building. The income was estimated to be $5\frac{1}{2}$ per cent upon the investment.

In 1845, a continuous line of railroad from Maine to the Mississippi was talked of, and in that connection a road from Chicago to Galena was proposed, of which Potosi was to have a branch. The outcome of this effort was the "Galena & Chicago" Railroad, but it did not enter Grant County.

The same year a project was formed for an immense system of railroads to be concentrated at Pensacola, Fla., of which the Illinois Central (as now built) was to be a part; and it was to be extended north through Potosi.

In 1847, a company was chartered to construct a railroad from Lake Michigan "to the Mississippi, in the county of Grant." Among the charter members were J. H. Rountree and Samuel Wilson. In 1849, the terminus was fixed at Cassville, and William Prideaux, M. K. Young, and C. L. La Grave added to the commission.

The Milwaukee & Waukesha Company was authorized, in 1848, to extend its road to the Mississippi, in Grant County. In 1850, its name was changed to the Milwaukee & Mississippi, and enthusiasm ran very high. Meetings were held along the line, and J. T. Mills wrote from Madison that upward of \$600,000 had been subscribed, and it was proposed to loan out the school fund to the enterprise. The road was contracted to Waukesha, including T rails and equipment, at \$11,350 per mile. As the terminus was to be at or near the northern limits of Grant County, the people took a deep interest in it, as affording the first means of outlet for their products. It was to run through Dodgeville, and under that expectation the "Potosi & Dodgeville" road secured a charter, intending to form a connection with the road at Dodgeville. At this period the lead mines were at the zenith of their production; the extent of the underground wealth was vastly exaggerated, while the discovery had been made that the surface, so long supposed to be comparatively unproductive, was valuable for agricultural purposes. Hence, the residents considered that they were soon to be in the very center of travel and of population. It was confidently expected and predicted that the "future metropolis of the Mis-

Mississippi" would lie within the limits, or close upon the confines of Grant County. The Milwaukee *Commercial Advertiser*, in speaking of the above-mentioned road, said, in July, 1851: "The rush of business and travel through this great artery of communication and trade, will scarcely find its parallel in the West, if in any portion of the United States."

The *Herald* of March 27, 1851, announced that books of subscription to the capital stock of the Potosi & Dodgeville Railroad would be opened at Potosi, Platteville and Lancaster, as required by the act. April 24, the Potosi *Republican* stated that 400 shares had been taken in that place up to that time. During that year, and the early part of 1852, meetings were held at various places in the county, in the interest of the projected line. In October, 1851, a meeting was held at Lancaster, Judge M. M. Jackson Chairman and J. Allen Barber Secretary. The speakers and all present united in the opinion that immediate steps should be taken toward organizing the company; and Mr. B. F. Woods was appointed to solicit subscriptions to the stock. December 11, 1851, a meeting was held at the Methodist Church, Potosi, to awaken popular interest. F. H. Bonham was President and George H. Stuntz Secretary. Messrs. Bonham, Vance and Block were appointed to canvass their respective neighborhoods to secure subscriptions to the stock. December 20, 1851, another meeting was held at the same place to complete the subscription to 1,000 shares of stock in this road, the same having been nearly subscribed previously. February 17, 1852, another meeting was held at Potosi at which a resolution was passed instructing the commissioners of the projected line to correspond with the directors of the Milwaukee & Mississippi Railroad and of the Galena & Chicago Railroad for the purpose of obtaining their views and intentions regarding a consolidation with the proposed road. The road, however, never proceeded further than this, owing to a change of route in the Milwaukee & Mississippi Railroad, by which it terminated at Prairie du Chien instead of in Grant County as called for by the charter. In 1852, the "Southern Wisconsin Railroad" was projected and chartered; and in November of that year a survey was made from Janesville to Dubuque, the route running as follows: Beginning at Dubuque, up the river on the west, to Eagle Point, crossing the Mississippi a little below the place where a lithograph or imaginary city was laid out in 1835 or 1836, on Section 20, Township 1, Range 2; thence northwest along the east bank of said river to Sinipee, on Section 7; thence northeast to Gilmore's farm, and the place known as "Bulgero," on the Platteville and Galena road; thence east toward Janesville. The intention of the company was to let the contracts at once, and it is stated that the route of descent to the Mississippi was by easier grades and with less expense than by any route above Dubuque. August 24, 1853, an election was held in the town of Potosi, on the question of taking stock in the proposed road, on condition that the company would extend a branch to that place. The amount of stock to be subscribed was \$50,000, and the vote resulted as follows:

For the Railroad.....	297
Against.....	85
Majority for.....	212

During September Judge Jackson canvassed portions of the county, for the purpose of obtaining subscriptions to stock. The Potosi people claimed that both their location and harbor facilities would bear favorable comparison with any point on the western limits of Wisconsin; that a harbor might be made on Grant River, by means of a canal, equal or superior to that of Galena or Dubuque. It was predicted that the canal once opened to the Mississippi, upper river boats would be constantly coming in in search of passengers and freight; and if Potosi was a railroad terminus, it would monopolize trade from Galena, Cassville and Prairie du Chien. As to the site for a city, the Potosi *Republican* claimed that the "Hollow" was "sufficient in extent to accommodate any reasonable population that might wish to 'borough' here together," say forty or fifty thousand. It was also contemplated to form a connection with the Illinois Central at Dunleith, which was then in course of construction, a distance of only fifteen miles from Potosi. Neither of these roads however were built. During the latter part of 1880. the Chicago.

Milwaukee & St. Paul Railroad, the present proprietor of the former "Milwaukee & Mississippi," graded the line to Gratiot on the Mineral Point Railroad, which, as well as the Platteville & Calamine, it had recently acquired by purchase, with the intention, which will very probably be realized, of continuing the line thus formed from Milwaukee via Janesville and Monroe, to Platteville, and from the latter place to Dubuque, possibly upon the very route surveyed nearly thirty years previous.

All the agitation has resulted in nothing, and until 1854, the inhabitants of Grant County were a long distance from the pathway of the iron horse. In October of that year, however, the Illinois Central Railroad was opened to Galena, which being the principal market, both of supply and shipment for Grant County, and only six hours distant from its center, the event was looked upon with great interest by the people of the county, being the first rail communication available to them. For two years it continued to be the only outlet. In 1852, the Madison & Prairie du Chien Railroad had been incorporated, to run along the northern boundary of the county; in 1853, it was consolidated with the Milwaukee & Mississippi Company, and, during 1854-55, the construction of the road was proceeded with. It ran westward from Madison, entering the valley of the Wisconsin at Mazomanie, and Grant County at Muscoda, running within its borders to Woodman, a distance of twenty-two miles. In September, 1856, the road-bed was completed to the Grant County line, and, on the 1st of October, the cars entered the county at Muscoda, which was the first visit of the iron horse to Grant County.

In 1853, the Western Wisconsin Railroad & Mining Company was authorized to construct a railroad from Hazel Green to Prairie du Chien. Its Grant County Commissioners were N. Dewey, B. C. Eastman, J. Allen Barber, D. R. Burt, J. H. Rountree, Jefferson Crawford, John Edmonds and Charles McCoy.

In 1854, the Potosi & Dodgeville Company was authorized to extend its road through Cassville, N. Dewey, D. McKee and others being made Commissioners.

In 1856, the Arena & Dubuque Railroad proposed to build a road between the points mentioned. G. Messersmith, J. H. Rountree, N. H. Virgin and D. Banfill were members. Platteville proposed to aid this road to the amount of \$100,000.

In 1856, the Northern Pacific Railroad Company was chartered. The head of Lake Superior, and any point on the west side of the Mississippi not south of Wisconsin, were to be its starting points. Among the incorporators were William Hull, J. Allen Barber and Nelson Dewey.

In 1856, the Legislature chartered the Muscoda & State Line Railroad, to run on the Fourth Principal Meridian. It was said that Galena was ready to help it with her capital; Platteville was pledged for a considerable amount, and the farmers along the line would push it to completion. The road as projected was never built.

In 1857, the Western Wisconsin Railroad was incorporated, to run from below Jamestown to Prairie du Chien. W. E. Parish, B. Hutchinson, Nelson Dewey, S. E. Lewis, O. Cole, J. A. Barber, N. W. Kendall and A. W. Ewing were the organizers.

The Platteville & Calamine Railroad was incorporated March 15, 1861. The incorporators were M. M. Cothren, D. W. Jones, Hanmer Robbins, E. Bayley, Samuel Moore, John H. Rountree, Noah Virgin, Nelson Dewey and others. The capital stock was \$500,000, and authority was given in the charter to construct a road from Platteville to Calamine. In 1863, the charter was amended so as to authorize the extension of the road to the Mississippi, and to Monroe. It was intended as a link in a chain connecting Milwaukee and Dubuque. In September, 1863, meetings were held in Milwaukee, Dubuque and other places along the line, at which a good deal of interest was manifested, and the result was a subscription to the stock of the road by the various towns. In the latter part of 1866, the people of Platteville became thoroughly awakened in regard to the building of this road, which would give them connection with the Mineral Point road, running through La Fayette County to Warren, in Illinois, on the Illinois Central. In January, 1867, a bill was introduced into the Assembly by Hon. Hanmer Robbins, of Platteville, authorizing the people of that place, Lima and Harrison to

W. H. Lester,

LANCASTER.

vote aid to the Platteville & Calamine Railroad, on condition that the cars should run through to Platteville by September 1, 1868. At the same session a bill was passed authorizing the Milwaukee & Prairie du Chien road to continue their Southern Wisconsin branch from Monroe to Dubuque. This road would have run nine miles south of Platteville, and was opposed by the people of that village. The opposition in fact was so great that it gave rise to "the great struggle in the Legislature" of that year. After it became a law, the opposition immediately applied to the courts to enjoin action under it, claiming it unconstitutional. The court sustained the opposition in part, which prevented the consolidation with any road west of the Mississippi.

In August, 1867, the people of Platteville, Elk Grove and Kendall subscribed stock to the amount of \$270,000, in the Platteville & Calamine Railroad. In the latter part of 1869, the work was so far advanced that the road-bed was graded, and the iron had begun to be laid, and it was finally opened to Platteville July 1, 1870, and of this road the *Witness* said: "The road was built most of the way through a section of country, the citizens of which gave it no encouragement, and nearly without aid, except what the people of Platteville and Mr. Beecher, proprietor of the Mineral Point Railroad gave."

During the years of 1863 and 1864 several roads were planned, but ended with the planning.

In 1865, M. K. Young, C. L. La Grave, S. E. Lewis and others procured a charter to construct the Dunleith & St. Croix Railroad. It would have passed through Jamestown, Paris, Waterloo, Potosi, Cassville, Glen Haven, Bloomington and Wyalusing. It is said that one or two members rode into the Legislature on this road, but this was the only riding done upon it.

The Oshkosh & Mississippi Railroad Company was chartered in 1866, to build a road from Oshkosh to any point on the Mississippi or any point on the State line in Grant County. Among its incorporators Hanmer Robbins, W. W. Field and Addison Burr. In 1868, a route was surveyed from Fennimore to some point opposite Guttenberg, Iowa, two miles below Glen Haven. The routes to the Mississippi were all too steep, except by the valley of Sandy Creek, which enters the Mississippi three miles below Glen Haven. Some of the towns appropriated money to pay for these surveys. It was expected that twenty miles of this road (the Oshkosh & Mississippi) would soon be running, and that work would soon be begun on the west end. The road had been projected in 1866, to run in a southwesterly course from Oshkosh to the Mississippi, with the object of affording a connection between the vast lumber interests and iron mines of the northeastern part of the State and the Mississippi River, and would give Grant County an outlet in both directions.

January 28, 1868, the *Herald* said: "About one year ago we deemed it possible that Grant County might fall heir to several railroads, one centrally through the county; another along the Mississippi, another from Mineral Point north by way of Muscoda; a fourth, the Platteville & Calamine, and perhaps a fifth, the Southern Wisconsin; all in addition to the Milwaukee & Prairie du Chien."

In 1868, an act was passed in the Legislature authorizing the towns of Blue River Valley to vote aid to a branch road from some point on the Milwaukee & Prairie du Chien road, to Montfort or Wingville.

In 1869, Nelson Dewey, William Humphrey, H. A. W. McNair, W. P. Dewey, J. C. Holloway, D. T. Parker, B. M. Coates, W. W. Field and W. O. Thomas formed the Military Ridge & Grant County Railroad Company, to construct a road from the northeast side of the county through Fennimore, Lancaster and Cassville to McGregor.

The Wisconsin & Dubuque Railroad Company was organized in 1869, to construct a road from Shullsburg through Grant County, to the famous fatal "point on the Mississippi."

In 1870, the Dubuque, Platteville & Milwaukee Company (formerly the Plattville & Calamine) was authorized to extend its road to the mouth of the Platte, and thence to Cassville, and connect with the Military Ridge Railroad.

In 1871, another company was chartered to construct a railway from Dunleith along the river shore, through Potosi and Cassville to St. Croix. The same year the Eastern & Mississippi Company was organized, to construct a road from Shullsburg to the Mississippi.

In 1871, it was proposed to extend the Mineral Point road northwest to the Mississippi, thence to Tomah, making a through line from St. Paul to Chicago, nearly sixty miles shorter than any other. October 20, 1871, an election was held in Potosi on the question of voting aid to the Dubuque, Platteville & Milwaukee Railroad, the vote standing sixty-one majority in favor of aid to the extent of \$40,000; at that time there had been voted by towns along the line, the amount of \$120,000, and with the sum raised and expended by Platteville, the amount of \$240,000. The "Wisconsin Midland Railroad" was organized under the general laws of 1872 with the same object as the previously projected "Oshkosh & Mississippi Railroad," the route being from Oshkosh through Portage to Arena, then to Mineral Point, Platteville and Dubuque. In 1873, the company issued its prospectus, and some enthusiasm prevailed along the line.

The "Galena & Southern Wisconsin Narrow-Gauge Railroad" was projected in 1871. It was a Galena institution, originated by capitalists of that city, with a view of drawing to it the trade of the fertile region of the east half of Grant, and the west half of Iowa and La Fayette Counties, to the Wisconsin River. Surveys were made during 1871, and the route reported as feasible.

In May, 1872, the contract was let for building the road from Galena to Fennimore, to be completed as far as Belmont the same year. On November 14, an election was held in Platteville to vote on the question of taking sufficient stock to induce the company to build it by way of that village, which was not at first intended. The proposition was carried by a vote of two to one, assuring the building of the road to Platteville. Work was carried on during the summer and fall. During that year, officers of the road visited the towns asking subscriptions of stock. The terminus of the road was to be at Cassville. In the fall of 1874, the road had been graded and bridged to Platteville, and the iron and material was on hand to place the road in running order. Under the agreement by which Platteville had been induced to aid this project, the road was to be in running order in one year's time from the time such aid was voted; an extension had, however, been granted until the 1st of January, 1875. At that date, the first train ran into Platteville, but the rails had been hastily laid without any attention being paid to ballasting or security, and as soon as the train had been run out, the track was taken up and relaid later in a substantial manner and in the May or June following, the trains commenced running with regularity.

During 1873, the project of the "Chicago & Tomah Narrow-Gauge Railroad" was agitated. Meetings were held at various points and petitions of tax-payers in favor of aid were filed, which, by August 14, amounted to over \$100,000 in the county; a meeting held in Lancaster in June was favorable to voting \$100,000; a vote in Fennimore, July 10, resulted in the defeat of any aid by fourteen votes; on this account, a proposition of the company to Lancaster was withdrawn and no vote was ordered.

In 1872, a route had been surveyed from Lancaster to connect with the road up the Kickapoo. But the project seems to have blown over for the time. In January, 1875, Lancaster had another severe attack of the railroad fever. A meeting was held January 16, largely attended, which voted unanimously in favor of a 5-per-cent tax on the assessed valuation, provided a road was brought to Lancaster from any point. Some favored connection with Dubuque, others with Platteville and Galena. Enthusiastic meetings were held at Potosi and Ellenboro, also February 11 at Dubuque, attended by delegates from Lancaster and Potosi, at which resolutions were adopted favoring railroad connection by any feasible route with Grant County. A ponton bridge was to be built at Dubuque, and the road run from Lancaster to Potosi and so to Dunleith. A meeting was held early in the spring at Lancaster. H. A. Moore was authorized to employ a competent engineer to survey a route from Lancaster to Platteville, ascertain the cost and report. A company was organized under the State law known as the Lancaster, Platteville & Dubuque Railroad Company, capital \$300,000. A survey was made and several routes to

Platteville found practicable. The company was chartered and organized as the "Grant County Railroad Company," President, A. A. Moore; Vice President, Addison Burr; Treasurer, John Schreiner; Secretary, John G. Clark. Much discussion followed, and many projects were started through the summer of 1875. The Dubuque people were expected to assist, it was proposed that the road should be built to Specht's Ferry, and a tracked barge be put on the ferry, and a third rail on the road from there to Dubuque so that narrow-gauge cars could be run through. A special election was held at Lancaster, November 2, 1875, to vote on a proposition of the Grant County Railroad Company to build a road to Platteville on receipt of bonds for 5 per cent of the town valuation, viz., \$43,000, the same not to be delivered till the road should be ready for the cars, and stock to be issued for the amount of the bonds. The result was 320 to 78 in favor of the proposition. During the winter and spring (1876), meetings were held and the enthusiasm continued. At a meeting February 25, it was voted that books of subscription be opened, and the Dunleith route be chosen, and Potosi asked to join hands. April 10, a meeting was held at Lancaster, and the Platteville route advocated; \$80,000 to \$100,000 would be required, of which \$15,000 was subscribed at once. June 6, an election was held in Liberty to vote on aiding this road to the amount of \$5,350 (2½ per cent on the town valuation) which resulted in the defeat of the proposal. Whether this vote cast a wet blanket upon the whole scheme or not, certain it is that all the projects under consideration shared the fate of their predecessors, and Lancaster became discouraged in regard to its prospects of ever having railroad communication with the outside world. Up to the close of 1877, out of all the efforts that had been made for nearly forty years, the only result was a few miles of the Milwaukee & Prairie du Chien road, along the eastern part of the north line of the county; a still fewer number of miles of the Platteville & Calamine road, and the small end of the Galena & Southern Wisconsin Narrow-Gauge terminating at Platteville, and as the railroad-building era seemed to have passed, it was not supposed that any would ever be built. Matters remained thus for a year or two, when D. K. W. Williams, President of the Chicago & Tomah Railroad Company, again appeared upon the scene early in 1878. In March, he published a pamphlet or prospectus, in which the cost of construction was estimated at a trifle over \$6,000 per mile, including rolling stock, which would be less than one-quarter the average *debt* of railroads in Wisconsin.

May 1, a large meeting was held at the court house, to consider a direct proposition from the Chicago & Tomah Railroad Company, namely: That if the town of Lancaster would vote a 5-per-cent aid (to wit: a subscription to first mortgage bonds to amount of \$42,000), the whole amount of bonds not to exceed \$5,000 per mile, the company would complete said road from a connection with the Milwaukee & St. Paul Railroad to Lancaster on or before November 1, 1878. The sense of the meeting was favorable to accepting the proposition; the necessary legal steps were taken, both in Lancaster and the towns between that and the Wisconsin River; Liberty and Fennimore also voted aid sufficient to make up a subscription of \$5,000 per mile, and by May 16, the railroad force was actively at work in the county; and with such expedition was the work pushed that, although the cars were not running from Woodman to Lancaster by November 1, they did actually enter the town January 1, 1879, and thus the only successful attempt was made to penetrate with a railroad the interior of Grant County.

During 1879 and the first part of 1880, this company made efforts to continue their road from Fennimore east to Wingville, and thence to Madison, along the Military Ridge; and also from Wingville southward toward Freeport, the original destination of the road. In 1880, the Chicago & Northwestern Company purchased the Galena & Southern Wisconsin Narrow Gauge, which was then being extended northward from Platteville toward the Wisconsin River; and very soon after, also purchased the Chicago & Tomah. The termini of the two roads were, at that time, only a few miles apart, and the gap was soon filled up by the Northwestern Company, and trains were run from Galena to Lancaster, thus giving the interior of the county an outlet in a southerly direction. The intention of the Northwestern Company is to change the gauge to a standard

1881; and an extension will probably be built westward from Lancaster, toward the Mississippi, to command the trade of the fertile region around Bloomington known as Blake's Prairie.

TELEGRAPH LINE.

In 1849, visions began to flash with a rosy radiance through the minds of sundry residents of the county, as in misty, prophetic dreams, they seemed to stand on the brink of a rich vista, down which their glances rested on the bright and pleasing picture of Grant County as the disseminator of news for the teeming thousands and unborn millions. All this upon the word of one Henry O'Reilly, who held or pretended to hold, a patent for an improved system of Morse telegraphy. The bright and finely-spun rails on which passed, with the rapidity of thought, the chained lightning, carrying the news of weal or woe, should, said Mr. O'Reilly, be at once erected, and the county take a proud stand in the van of civilization, provided the inhabitants of the region would co-operate with him in the role of benefactors of mankind and advancers of the county's interests. The role of benefactor is ever an enticing one, and what wonder that the investors were numerous. A line was erected from Dubuque to Potosi, from that point to Lancaster, thence on to Platteville, and finally terminating at Mineral Point. The line was opened in November, 1849, and communications opened with the outside world. Mr. O'Reilly passed under a cloud and went into bankruptcy, while his deluded victims struggled manfully to continue to operate their new toy with wavering success for a few months longer. In May, 1850, the *Grant County Herald* proposed that thirty-eight subscribers take one copy more of the paper, paying in advance, in which case the telegraph line would be sustained. This last effort, however, came to naught, and a short time later, the "connecting link" yielded up the ghost; as the wires were of galvanized iron, numerous thoughtful dwellers along the line, daily cogitating on the bankruptcy of the affair, and consequent waste of good material, concluded that the wires would serve as excellent and indestructible clothes lines, and to this day pieces of the Grant County Telegraph Line may be seen doing duty in the lower and useful domestic scale of supporting the week's washing. This experiment is believed to have cost the investors between \$6,000 and \$8,000.

CENSUS OF GRANT COUNTY.

Population.—In 1836, the number of residents of this county was 1,643. The early Territorial Legislature soon after its organization, ordered that a census be taken throughout the Territory. By these returns, it was shown that Grant County then had a population of 2,763. The census of 1840 showed 3,926. In 1842, this had increased to 5,937. Four years later, in 1846 the population was found to have more than doubled itself, the county then containing residents to the number of 12,034. One year later, this had dropped away to 11,720. At the Governmental census in 1850, the returns for the county showed 16,169 for its population. From that time on, censuses have been taken every five years, by which Grant County shows the following steady increase: 1855, 23,170; 1860, 31,207; 1865, 33,618; 1870, 37,975; 1875, 39,086. From various causes, but principally owing to the fact that Grant County's population has ever been composed in a large per cent of miners, whom "fresh fields and pastures new" in other localities will call in that direction, the census returns for 1880 show a slight percentage of loss, the present population being reported as 37,852.

HISTORY OF GRANT COUNTY.

Assessment Rolls.—Following are the abstracts of the assessment rolls of the several cities, villages and townships of Grant County, as returned to the County Clerk for the year 1880:

TOWNS.	HORSES.		NEAT CATTLE.		MULES AND ASSES.		SHEEP AND LAMBS.		SWINE.		WAGONS, CARRIAGES & SADDLES.		WATCHES AND MELODIONS.		SHARES OF BANK STOCK.		Value of Merchants' and Manufacturers' Stock.	Value of all other Personal Property.	Total Value of all Personal Property as aforesaid.	Number of Acres of Land.	Value of aforesaid Acres of Land.	Value of City and Village Lots.

The vote of Grant County at the different gubernatorial elections since the admission of the State into the Union, is as follows :

1849—Nelson Dewey, Democrat, 1,030 ; Alexander L. Collins, Whig, 1,103 ; Warren Chase, Free-Soil, 16.

1851—L. J. Farwell, Whig, 1,026 ; A. J. Upham, Democrat, 985.

1853—E. D. Holton, Abolition, 1,026 ; William A. Barstow, Democrat, 988 ; Henry S. Baird, Whig, 195.

1855—Coles Basford, Republican, 1,581 ; William A. Barstow, Democrat, 1,145.

1857—James B. Cross, Democrat, 1,260 ; Alexander W. Randall, Republican, 1,681.

1859—Alexander W. Randall, Republican, 2,496 ; H. C. Hobart, Democrat, 1,715.

1861—Lewis P. Harvey, Republican, 2,907 ; Benjamin Furgeson, Democrat, 741.

1863—James T. Lewis, Republican, 3,404 ; Henry L. Palmer, Democrat, 1,313.

1865—Lucius Fairchild, Republican, 2,577 ; H. C. Hobart, Democrat, 1,131.

1867—Lucius Fairchild, Republican, 3,093 ; J. J. Tallmadge, Democrat, 1,649.

1869—Lucius Fairchild, Republican, 4,404 ; Charles D. Robinson, Democrat, 1,476.

1871—C. C. Washburn, Republican, 3,154 ; James R. Doolittle, Democrat, 1,971.

1873—C. C. Washburn, Republican, 2,405 ; William R. Taylor, 2,104 ; Scattering, 1.

1875—William R. Taylor, Democrat, 2,318 ; Harrison Ludington, Republican, 3,182.

1877—William E. Smith, Republican, 2,630; James Mallory, Democrat, 1,938.

1879—William E. Smith, Republican, 3,111; James E. Jenkins, Democrat, 1,703; Col. May, Greenback, 625.

The Presidential vote, for the same period, has been as follows:

1848—Zachary Taylor, Whig, 1,649; Lewis Cass, Democrat, 1,148; Martin Van Buren, Free-Soil, 144.

1852—Winfield Scott, Whig, 1,341; Franklin Pierce, Democrat, 1,379; John P. Hale, Free-Soil, 129.

1856—John C. Fremont, Republican, 2,809; James Buchanan, Democrat, 1,419; Millard Fillmore, American, 186.

1860—Abraham Lincoln, Republican, 3,579; Stephen A. Douglass, Democrat, 1,922; John Breckenridge, Ultra Democrat, 33.

1864—Abraham Lincoln, Republican, 3,247; George B. McClellan, Democrat, 1,561.

1868—Ulysses S. Grant, Republican, 4,640; Horatio Seymour, Democrat, 2,071.

1872—Ulysses S. Grant, Republican, 4,307; Horace Greeley, Liberal, 2,319.

1876—Rutherford B. Hayes, Republican, 4,723; Samuel J. Tilden, Democrat, 3,108.

1880—James A. Garfield, 4,654; Winfield S. Hancock, 3,038; James Weaver, 179.

AGRICULTURAL ASSOCIATION.

November 6, 1855, a meeting was held at Beetown for the purpose of organizing a society which should be known as the Grant County Agricultural Society. Mr. J. E. Dodge was elected Chairman, and John Dodge, Secretary of the meeting.

On motion of Mr. James Prideaux, a resolution was passed averring the expediency of such an organization. A constitution was then presented and adopted, after which the following officers were elected: President, J. E. Dodge; Vice Presidents, William Humphrey and Edmund Harelson; Secretary, John Dodge; Executive Committee, Henry Patch, Sr., George Morris, William Carter, E. Kilby and Dr. Young. The first fair under the auspices of the new society was held at Lancaster, October 7, 8, 1856. Premiums on stock and farm produce, to the amount of \$69, were offered at this meeting. Since that date a fair has been held annually at Lancaster, generally during the latter part of September. The fair grounds lie about a half-mile east of the city on a high, commanding site, and, from its dryness and general location, is well adapted for this purpose. This tract was purchased by the society, and fitted up especially for exhibition purposes. The leading men of the county have taken considerable interest in the association, and its list of life-members has numbered among the roll many of the illustrious names of the county whose bearers have passed on before.

The business of the association is managed by a board comprising the President, Vice President, Secretary and Treasurer, and the Executive Committee. All the officers are chosen annually on the second day of the fair. The present officers are President, L. M. Okey, of Cassville; L. J. Arthur, of Lancaster, Secretary; Executive Committee.

CHAPTER VI.

PERSONAL REMINISCENCES.

The following interesting sketches were prepared by the pioneers whose names appear at the beginning of each paper, and are descriptive of early experiences, privations and successes incident to those times :

BY JAMES GRUSHONG.

It was in the spring of 1826 that I started from Missouri for the newly discovered mines near Galena. The country was then uninhabited, only few places showing evidences of the previous presence of the white man. From the lower rapids to Rock Island there were no signs of settlement. At the latter place there was a fort garrisoned with United States troops. From Rock Island again to Galena there stretched out on either side a wilderness broken only by the numerous Indian towns which lined the west or Iowa side. Those little docks with their long piles of wood which are now so numerous along the great river's banks were then unknown; and the means of obtaining the supply of wood needed for the steamer's furnaces was as primitive as the country itself. Fifteen axes were included in the list of necessaries needed by the steamer, and when fuel run short the boat would be "laid to" alongside one of the numerous islands that dotted the bosom of this broad estuary, and fifteen pairs of stout arms would bring the ashes in crashing ruins at the feet of the choppers. These trees would then be cut into two or three lengths and rolled onto the lower deck, where they would be worked up more at leisure as the boat proceeded up the stream.

On arriving at Galena, we found that present thriving city to contain only three houses, and a smelting furnace, owned and run by a man named Comstock. It was an old-fashioned log furnace, but little better than the earlier furnaces in use by the Indians. All the land was owned by the government, who stood ready to give lots to any one who would occupy. In case mineral was found it had to be delivered to a licensed smelter, who was supposed to turn over to the government the sixteenth then demanded as rent for the land. A strong suspicion grew up among the miners in after times that these agents did not allow the government to benefit much by this tax, and as the mines became filled with the miners from all quarters, this practice of paying government rent was more honored in the breach than in the observance.

As I have said when I first arrived at Galena, there were but few residents there; in fact, they might almost have been counted on your fingers, but during the year a great immigration set in that soon built up the town.

Just about the time of my arrival the Hard Scrabble mines had began to show indisputable signs of heavy leads of ore, and accompanied by Henry W. Hodges, Thomas Shanley, Eli Perkins and Kidge Williams, I started for these mines. After having first obtained the following permit :

James Grushong is hereby permitted to dig or mine on United States land which is not leased or otherwise rightfully occupied. He is not to set fire to the prairie grass or woods, and deliver his mineral to a licensed smelter and comply with all regulations. CHARLES SMITH, Acting Agent and Superintendent Lead Mines, Fevre River.

FEVRE RIVER, April 30, 1826.

There were no teams in the country, or at least none that we could get, therefore we procured a pirogue and loaded it with provisions, including a barrel of pickled pork and a barrel of

flour, and started for the Hard Scrabble. Arriving there we found two or three cabins, in one of which were John Ewin, McKnight and Steve Thrasher. Another was occupied by a Frenchman, who was married to a Menomonee squaw, and speaking of the Frenchman reminds me of a joke he played on some Indian friends who had come to pay him a visit. Having first worked upon their imaginations until they were fully inoculated with the belief that the whites were conspiring to attack and massacre them, and had hid themselves in a hazel thicket near by, the Frenchman came to the miners' cabins and induced us to come over and furnish the grand finale to the plot. Accordingly, armed with a few fowling pieces, unloaded save with powder, we crept to the thicket where the Indians were lying in a tremor of fear and excitement. With a yell and a discharge of firearms we broke in upon them. Our yell was nothing to theirs, as with a bound like a frightened deer, each one of the crowd broke from the covert and struck out in a bee-line for Galena, fully persuaded that their pursuers were close on their track. Some of them did not stop running until they got to Galena, where they reported the other portion of the party massacred by the miners. They found out their mistake afterward, while we all had a hearty laugh over their scare. Although they learned of the trick that had been played, they were too thoroughly frightened ever to return.

I remained mining with fair success at the Hard Scrabble until September, when I returned down the river. Light-draft steamers, capable of running at all times of the year, whether the river was high or low, were then unknown. The few boats running could only ply between the up-river places during the high water of spring and early fall. Consequently my companions and myself secured a pirogue and started down the river. We passed canoes without number, laden with corn and Indians, but they were peaceably inclined, as in fact were all the Indians in early times, their weaknesses being whisky and tobacco. The last part of our trip we were without provisions for two days and nights, and got nothing until we reached "White's," at the head of the rapids, where we obtained a "square" meal, that tasted extremely good after our long fast.

I came back in the spring accompanied by my brother, and started mining on the Coon Branch of the Fevre River, now included in La Fayette County. While here the Winnebago scare broke out. One night we were awakened about 12 o'clock by a great noise, cattle lowing, dogs barking, and a terrible racket generally, and upon turning out in the morning, found it was settlers fleeing from the Indians. Not being particularly frightened ourselves, we remained where we were, and continued raising mineral, and soon after the country quieted down, with the surrender of Red Bird and We-kaw, and settlers gradually returned to their homes.

When coming up the next spring I took the land route. There were eight of us in the party. We were obliged to head all the rivers, as we did not care to expose ourselves to an involuntary bath in attempting to ford them. Not a house was seen from the foot of the lower rapids until we reached Apple River. Previous to reaching the Apple our provisions ran low, and for a two days' stretch we were obliged to tighten our belts, as the only way of counteracting the gnawings which beset us in that portion of our anatomy, which should have been filled with something more substantial. At Apple River we found a sort of tavern kept by a landlady. Upon reaching it one of the party went in and ordered dinner for sixteen persons. The meal was prepared, and after we had filed in and taken our seats, the landlady instituted inquiries as to the whereabouts of the other eight. We told her that we thought those present could do ample justice to the preparations which had been made, and if anything was left we would institute a search for the others. The landlady saw the joke, and it is needless to say that there was no reason to look for any more of the party. The meal was disposed of by those present.

This season my brother and myself went on a prospecting tour up to the Pekatic. On our return trip in the fall we passed over the present site of Lancaster, where no indications of the present village were visible, the only inhabitants being wolves, deer and other wild animals. We crossed over what is now known as Boice's Prairie, and while looking for a place to camp for the night, we heard a dog bark, and upon following up the sound, found a cabin inhabited by a man named Allen and his wife. Allen's father also lived with them. From the appearances

about the house, I should think they must have come there at least a year before, although I do not recollect whether we asked them the question. The men were engaged in mining. Further on down the Platte, my brother's horse was bitten by a rattlesnake while we were following a path through the woods. We killed the snake, and feeling sure the path must lead to a cabin somewhere, I told him to take my horse, ride on, and get some sage tea and sweet milk if he could; he was gone some time, but came back with the tea and milk. In the meanwhile the horse had swollen to an enormous size, but we dosed him with the sage tea and the milk. The tea did its work, as I felt sure it would, and by sundown the horse was able to move, and we started on for the Menomonee diggings. I did not go to the cabin where my brother got the sage, but it was situated on the Platte, and they must have been living there a year or more.

In 1832, during the Black Hawk war, I was at Coon's Branch, about two miles from Hazel Green. There was a great excitement, and companies were formed for defense against the Indians. Two men were needed at Hazel Green to make out the complement necessary to draw arms and equipments. My partner and myself enlisted, but did not do any fighting, as the company was not ordered out, and all through the trouble we continued our work on the Branch, and raised 47,000 pounds of mineral out of a hole we only paid \$40 for. The Indians were pretty thick, and frequently we would not see white men for a week. A Mr. Cottell was my partner here. I went back to Missouri again, and, in the spring of 1833, I came back. During the winter following, I and my brother mined again on Coon Branch, and raised 40,000 of mineral. I went back and returned in 1836 to Galena, and brought up a considerable number of cattle and horses. When I got to Galena, I had about \$100 in "wild-cat" money, and while fooling around there, lost my pocket book. I went to Farnsworth & Furguson, and told them I was broke, and they let me have \$50. I then helped my folks, who were on the way to the Hurricane, up as far as Hazel Green. There I determined to get that money back some way, and so went to prospect for a lead. I took an auger and went out, and the first hole I dug into I raised a chunk weighing 100 pounds. We took out 15,000, and then sold it out. I struck another lead and raised considerable mineral out of it, and then let my brother have it, and he raised 60,000 out of it, and, in three months after I left Galena, I had \$500 ahead. We went to the Hurricane district in 1836. I think Harvey Bonham went there in 1833. I know he was there some time before we came, as sixteen of his hogs strayed down near us, weighing about 120 pounds apiece. I bought them for \$60. I had to pay \$1 a bushel for corn that winter for them, and my brother thought it was a poor transaction; but the next fall pork went up to \$10 a hundred and I had 1,000 pounds to sell off from this drove, besides what we wanted for our own use.

There were but few families in that section then; but little farming had been done. People were just beginning to find out that they could raise good crops in this country. Deer, wolves and wild-cats were plenty in those days. I have seen, often, droves of from thirty to forty head of deer running through the woods. Wild bees were also numerous. Bee-trees could be found most anywhere in the woods. A bee-hunter who came here in early times found seventy-five bee-trees in the woods west of Lancaster, between there and Beetown, which he afterward sold for a horse. Although others were not quite so lucky as this, still no one had to go long without honey, if they cared to look up the trees.

In 1839, myself, Joe Bonham and Gen. Brown struck the Pigeon Diggings. The first hole I sunk I struck mineral in good sized chunks. I first sunk a claim on the old Bonham range. There has probably been 3,000,000 pounds of mineral taken out since. George Cox, of Lancaster, and a man named McMillan owned two forties, and George Jones, with a partner, struck a good lead on it, but kept it covered up for awhile. Finally, I secured a sixth interest for \$300, after some dickering. The lead was as good as I expected. At one time we had 300,000 pounds of mineral on the ground that we had raised out of this lead. We raised 18,000 pounds one day with five or six hands. Mineral then averaged about \$16 a thousand. Altogether a million and a half pounds were raised from this lead. Among other lodes of importance there is the Black lode, owned by Maj. Anderson, Clark and Roundtree, which turned out about

300,000 pounds. Bonham and McDonald struck one that turned out 500,000; and I struck another that turned out 300,000.

Of the early settlement in other parts of the county, I cannot say much. I know, however, that Tom Himer was at Cassville as early as 1824. He and some others went with some horses up to the Selkirk settlement, and on his return down the river, he stopped at Cassville, and remained a short time. He lived in a cabin formerly built by a Frenchman. Himer afterward came to the Hazel Green diggings.

In 1836, when I was up through there, Price was keeping a store in the new settlement, and Mr. Ramsey was working a farm a short distance out. We bought some corn of his raising at that time. A Mr. Forbes was also there keeping a tavern.

In the early part of the settlement of the county, the in-comers were miners almost without exception, but in the years along about 1840, and later, bona fide settlers began to arrive, although it was a long time before their work began to show. The change in the aspect of the country between the time I landed from the old pirogue at Hard Scrabble and the county as it stands to-day is almost beyond belief. But all must yield to the law of progress.

BY COL. JOSEPH DICKSON, IN 1855.

My parents were natives of Pennsylvania, and emigrated to and settled in St. Clair County, Ill., in the year 1802, where I was born January 28, 1805. That county was then a frontier region and but sparsely inhabited, except a small district of country on the American Bottom, settled mostly by French people.

In the year 1818, my father and family moved to within nine miles of where Springfield, the present capital of the State, was afterward located, where I assisted my father in building the first white man's log cabin in Sangamon County, where I remained until the spring of 1827, when I emigrated with many other young adventurers to what was then called the Fever River Lead Mines, making the journey from Keokuk, on the Lower Mississippi Rapids, on foot through an entirely uninhabited wilderness, packing my provisions and blankets, in the month of March.

I spent the first summer in mining until the 15th of August, when I commenced improving a farm one and a half miles south of where Platteville is now situated. The next spring I plowed up twenty acres of prairie land, and planted and raised a crop of corn that season, which I think was the first field of corn raised in what is now Grant County. I continued to carry on farming until the spring of 1832, when I exchanged it for mining.

The Black Hawk war commenced in the month of May, when, on the first intelligence of hostilities by the Indians, I joined a mounted company of volunteers raised at Platteville. At the organization, I was selected Orderly Sergeant in John A. Rountree's company; and in that capacity I served one month, when, in consequence of the absence of the Captain, I was chosen to command the company, and thus served about one month. Then, by the order of Col. Dodge, I took command of a spy company, and continued in that capacity in front of the army during the chases to Rock River, Fort Winnebago and to the Wisconsin Heights; and, at the latter place I, with my spy company, commenced the attack on a band of Indians who were kept in the rear of the retreating Indian army, and chased them to the main body of Indians, when we were fired at several times but without injury, and I returned to the advancing army without loss or injury to my command.

After the battle of the Wisconsin Heights, and the army was supplied with provisions, we again pursued the Indian trail, and I took the lead with my company and followed to the Bad Ax River, by command of Gen. Atkinson. At the Bad Ax I discovered the evening before the battle, the trail of Black Hawk with a party of about forty Indians, who had left the main trail and gone up the river, which fact I reported to the Commanding General. On the next morning, my company encountered and engaged a company of Indians at a place near to where I had the evening before discovered the trail of Black Hawk and his party. During the battle that ensued, my command killed fourteen Indians, and, after a short time, say an hour's engagement, Gen. Dodge with his force, and Gen. Atkinson with his regular army, arrived at the place

where I had engaged this party, consisting of about forty Indians; and, about the time of their arrival, we had killed and dispersed the whole party. The main body of the enemy had gone down the river, after they had entered on the River bottom. I pursued with my command, passing Gen. Henry's brigade formed on the Mississippi bottom; I crossed the slough and engaged a squad of Indians, who were making preparations to cross the river, after which we were fired upon, and returned the fire of several bands or squads of Indians, before the army arrived. I and several of my men were wounded before the other troops came up.

After the battle was over, I was taken with others on board of a steamer, which came along soon after, to Prairie du Chien, where I was properly cared for and my wounds received suitable attention. Since which I have spent a short period in Illinois, and the balance of the time to the present I have devoted myself to agricultural pursuits on my farm, four miles southwest of Platteville.

BY ORRIS MCCARTNEY.

"I was born in Harford, Washington Co., N. Y., May 9, 1794; started West in 1817; got as far as Bristol, Ontario County, and went to New Connecticut in 1818; then bought a farm at \$400, raised a crop, land title bad, lost my money and land; then went to Delaware, Delaware Co., Ohio, got the ague, and left in 1819; drove a two-horse team for a man to Illinois—600 miles; stopped at Milton, Madison County, January 8, 1820; was in Illinois drifting about several years; was twice elected Sheriff of Schuyler County, Ill., and served about three years; then resigned and came to the lead mines; fell in with Maj. Rountree, and we came together in 1827; was married to Eliza Barber, near Jacksonville, November 12, 1826; in 1828, settled at Beetown, bought part of the Bee Lead for \$500, from which Beetown took its name. This lead was found by Cyrus Alexander, Tom Crocker, Jim Meredith and Curtis Cadwell, while out looking for bees. Finding a large, hollow, upturned maple-tree, they looked under the roots, and saw a chunk of mineral which weighed 425 pounds. About the same time, Tom Cegar and Ben Stout found another lead on Bushnell's land. The Indian troubles began soon after. In June, 1828, sold out, and removed in August to farm near Cassville, where I have stayed ever since, except during the Indian difficulties; traded lead for a six-horse team, hauled 100,000 mineral to Cassville; Judge Lawyer built the first furnace, and Tom 'G. Hawley built the first house in Cassville. Arthur L. Johnson came in 1828, and built a log furnace, and put up a store in Beetown, but the mineral soon gave out, and the miners went to Mineral Point and Dodgeville. Moved temporarily to Belmont in 1829, stayed four months; hauled rails to fence seventy-five acres; returned to Cassville farm in fall, having raised a crop of corn. Hodges and Shanley built a log warehouse at Cassville in the year 1828. Christmas of 1830, my house was burned and all with it; the first ball at Cassville same time.

"The Indian alarms began in 1831, and in 1832 came the Black Hawk war. We all went into fort at Cassville; sent my family to Illinois July 4, 1832, to be safe from Indians. The Indian war then lasted four months.

"In 1828, Tom Cegar, Nahem Dudley and Ben Stout settled at Lancaster. William Morrison settled on the Morrison place that year, and H. C. Bushnell settled on what is now the Gulick place; Hodges and Shanley built on the prairie near Lancaster in 1831.

"Guy Hackett had a furnace near the double log cabin at Muscalonge, in 1828; he broke, and returned to Illinois and died. De Tantabar settled at Paris in 1826 or 1827. [1828—Ed.] St. John found mineral and the den of snakes, which gave to Potosi its first name of Snake Hollow, in 1831." [Other authorities place this discovery in 1833.—Ed.]

BY W. DAVIDSON.

In the spring of 1828, I arrived at Galena, situated on what was then called Fevre River—the Indian name of which was then said to be Ope-a Le-pee. At that time, Galena was submerged by the river, and presented rather a dull prospect; but I thought of an old adage, "keep a stiff lip and a light toe nail, and you may come out yet;" and so I have—at the middle of the horn. I then became acquainted with a few men in Galena, who afterward

proved to be friends indeed. After looking around a few days and making many inquiries, Yankee-like, I commenced digging at Scrabble—since called Hazel Green. I started a prospect hole, expecting to find a mineral lode in a few days; but I found out that success was not so much in hard labor as in good luck; and being a stranger, if I discovered a lode, the country was then staked off in what was called mineral lots, agreeable to the mining regulations, I would either have to fight my way through fifty claimants or be swindled out of my prospect.

After a few months labor in that way, and finding nothing, I started to view what was then called Sugar Creek Diggings. T. D. Potts had then made what was considered a valuable discovery; but I thought differently, and so it turned out. The first night on our journey we reached Col. W. S. Hamilton's diggings. He had made a valuable discovery; it is now Wiota—so named by the Colonel himself. We then started for the Blue Mounds and spent the night with Col. E. Brigham; he had made what was then considered, as it has since proved to be, a valuable discovery. He treated us very kindly and told us "our hats were chalked." We then went to what was called the Cole, Downing & Dudley Diggings, then supposed to be proven for four million pounds of mineral, but they did not turn off more than half that amount. Mineral was then low in price. We then went to John Messersmith's diggings; his prospect was fine. We got there the best dinner I had met with in the country. At that time, owing to the low price of mineral, and living some distance from market, and having a large family to provide for, Mr. Messersmith was only able to secure a comfortable support for his family. Times have since changed, the old man and his boys persevered, and have been well repaid for their enterprise. We next went on to the Dodgeville diggings, and there found a town, as it was then called, with five or six cabins, and in three of them "rot-gut" whisky and poor tobacco were sold; since then quite a village has grown into existence there.

We then journeyed to what is called Mineral Point, which there went by the name of Little Shake Rag. After looking round the various diggings, I returned to Scrabble and moved my provisions, tools and furniture, consisting of blankets, spider, frying-pan, etc., into the neighborhood of Little Shake Rag; I found that neighborhood staked off; and after spending three weeks or a month, and not getting permission to dig where I wished, I pulled up stakes and moved off. My next mining was in the neighborhood of the old Buck lead, near Galena, but meeting with the same luck as formerly, I moved into the vicinity of the Finney patch, which was discovered in the fall of 1828 by men of the name of Clark, who sold to Finney four-fifths and to one Williams the other fifth. Finney afterward swindled the men out of some \$250 he was to have paid them in July, 1830. I struck a vein of mineral that yielded 97,000 pounds, and paid one-third for ground rent. This was the custom when you dug on a lot where mineral had been raised and sold. Part of that mineral I sold at \$7, and the next spring I sold the last 50,000 at \$12 per 1,000. The next fall we struck a vein that turned off 600,000 of mineral that brought \$18 per 1,000; and in the spring of 1839 I struck another vein, south of the second, that turned out 405,000. The range altogether produced over two millions of mineral. The old Finney patch turned off 2,000,000 more, and good diggings there still.

In May, 1832, I bought a horse and rigging, and rode as a volunteer, serving in Dodge's squadron during the Black Hawk war. During that campaign I saw more of human nature than I had before in several years. We had many difficulties to encounter, of which a majority of the present population can form but a faint conception. But to return to my occupation. I have done what no other man has done in these mines. I have worked on one mineral lot for seventeen years and worked in the ground all that time; blasting occasionally, winter and summer, and never used an air pipe. I have been well paid for my labor; having toiled late and early—no eight hours have answered me for a day's work. After the sales of the reserved land I moved to my present residence to watch my timber and dig mineral in the winter. Unless some unforeseen occurrence should take place, I expect to end my days in Wisconsin.

BY SAMUEL DRUEN.

I came to Grant county on the 20th of April, 1832, passing my first night on Wisconsin soil at Sinsinawa Mound, where some two or three cabins had been erected. The next morning I learned that a party of U. S. Surveyors had made rich discoveries of lead ore at Potosi, and started thither at once, having neither track nor path to follow or guide me. I crossed Big Platte River at its confluence with Little Platte, a place known as Paris, composed of a smelting establishment and a small store, owned by a Mr. DeTantabar.

Proceeding on my way, I came to a place where a dozen men or so busily engaged in building a cabin—the first white man's structure ever erected on the site of Potosi, and the property of Messrs. Ham and DeTantabar, the former of whom, I believe resides at Dubuque at the present time. A number of us pitched our tent and went to work. Potosi grew, and its population, mostly miners, rapidly increased. By the first of June there were upward of a hundred persons in the place—the square, I might almost say, of the original number I found there on the 21st of April preceding.

All went on prosperously until one night about 11 o'clock, when a man rode wildly into camp bearing the news of Stillman's defeat by the Indians at Rock River. We were all badly scared, turned tail and fled, some toward Galena, some toward Jamestown, and some toward Platte. Only two men had the courage to stand their ground and risk their scalps. The next day we recovered from our fright, assembled in considerable force, and held a sort of council of war. Some were for building a fort right there in the diggings, others thought it would be rather a good thing to go to Galena. Hearing that a company was organizing at Cassville, three others and myself set out for that town at once. Where British Hollow now stands we found a cabin occupied by Terrence Cail, his wife, and three children, and at Hurricane the shanty of Messrs. Hodges and Shanley stood open to receive us. Then on we went, across the hills and far away fording Grant River and entering Beetown, then comprising only about three cabins, all told and inhabited principally by an elderly gentleman named Arthur. Had the place and its surroundings looked a little more flowery, we should have set it down as the spot where Mr. Tennyson's Arthur went to heal him of his grievous wound :

"The island valley of Avillion,
Where falls not hail, or rain, or any snow,
Nor ever wind blows loudly; but it lies
Deep-meadowed, happy, fair with orchard-lawns,
And bowery hollows crowned with summer's sea."

At Cassville we found Capt. Price building a fort and organizing a company of soldiers. Upon telling him what we came for, he desired to know whether we would or could do any fighting. We said "Take off your coat and let's have a round." He said he guessed he'd take us anyhow. So we were mustered in at once and forthwith put on duty. Our company were known as Rangers, and were employed in "ranging" the country between Grant River and the Wisconsin, a tract which we traversed a great many times and whereon we killed eight or ten Indians and made twelve or fifteen prisoners.

When the strife was over and the smoke of peace rose from all that region, which was in September, of the same year, we returned to Potosi and resumed our picks and gads and shovels as though we had not been off making history at all, but had only gone a-fishing or had been fooling around for our health, as it were.

Late in the fall of 1832, reports reached us of rich and remarkable mineral discoveries at Dubuque. I was lured thither, of course, but the weather being bitter cold, and houses rather scarce, I made my way back to Potosi with as little delay as possible. In February of the next year, the Government sent soldiers to Dubuque to keep miners from working on the mineral lands there until after the ratification of a certain treaty with the Indians. This was done about that time, and work in the mines went on as usual.

At the time of which I write, farming was hardly thought of in Grant County, though the attention of many was beginning to turn toward the pursuit. Several persons were breaking

ground for farms at Boice Prairie, preparing to get their means of sustenance at the surface of the earth instead of delving for it wearily toward the center. Corn and potatoes were about the only crops raised, though it was seriously feared that the latter could never be brought to maturity in a climate like this. The cultivation of wheat and oats came afterward, and proved encouragingly successful. Oats then cost \$1 a bushel, corn 75 cents. Pork and flour were shipped to us from below somewhere, the latter cost us \$18 per barrel and the former \$28. The first steamboat in spring was always eagerly looked for, our provisions usually running rather short before the close of those long and dreary winters. Game, however, was abundant at that time, and fortunately for us we could generally depend in part upon that source for a supply of excellent meat.

Some time in the fall of 1833, I went to Platteville, where I found only about two or three rude structures called houses. Maj. Rountree and family were there, James R. Vineyard and family, and a Mr. Phelps. There may have been others, but if so I am unable to recall them now.

It was in 1834, I think, that Mr. Aaron Boice built the first house ever erected on the present site of Lancaster. (This was built by Nahem Dudley.—ED.) This stood near the Big Spring, and hard by the spot where now the woolen mill stands.

The first store ever started in Potosi was opened there by Messrs. Wheeler & Price in the fall of 1832. Five years later, in 1837, James R. Vineyard and one or two others engaged in mercantile pursuits at British Hollow. About this time Mr. DeTantabar had a store and smelting works at Paris, a point on Platte River, frequently visited by the largest Mississippi River steamboats. In 1841, Mr. DeTantabar became involved, and failed in business. This so discouraged him that he willfully sought his own salvation by means of a rope. And from that fatal day an evil genius seemed to brood over Paris, exerting a mysterious and uncanny influence which has brought about desolation and decay, and has obliterated almost every trace of what was once a flourishing village.

In 1837, the famous "Long Range" was discovered at Potosi, and flush were the times in those diggings then. There was incessant wrangling in regard to the ownership of this range, making black eyes and broken heads matters of common occurrence. A notorious character known as Jim Crow was then in his prime—the best man, in fact, on the ranch, who could "lam any galoot" in the diggings. Three men were hired to shoot Jim at sight. The assassins went to their victim's stopping-place with the fatal weapon concealed under a cloak. They accomplished their work, were arrested and sent to Prairie du Chien for safe keeping. Some time after they were released on bail and returned to Potosi, where they devoted themselves with great assiduity to drinking, gaming and the kindred vices, proving a greater terror to the community than Jim Crow had ever been. They kept right on in their wicked course until ordered to leave the country by the people of Potosi, Boice Prairie and British Hollow. They departed and after they were out of the way, Mr. Harper, a merchant at Potosi, was arrested, tried, and proved guilty, his own clerk convicting him, of loading the pistol with which Jim Crow had been murdered. He was given two days to settle his affairs and leave the country, which he did, glad to get away so easily. The same day, we sent two other men across the river with orders never to return, and Potosi breathed freely for a time.

BY HAWKINS TAYLOR.

Hearing of the discoveries made at Snake Hollow in 1832, I, with others, started for that point; we stayed one night at Gilmore, a few miles from Sinsinawa Mound. The next day all got to the mines and went into camp, and I found everybody my friend, and there never was a happier set than we miners were. We had little shanties made of logs, generally split and covered with the bark, and we had bunks two stories high. Our bed and covering was a thick Mexican blanket, but what good, sound sleep did we have! Not a trouble on our minds; not one of us who was not confident of striking a lead very soon. Each had a tin cup, and we had a common coffee pot; our meat was mess pork and we made our own bread. The fare, without

variations, was coffee, bread and meat. In one hut there were four of us, which was the rule generally. These huts were scattered for a mile along this branch. All told, there were about sixty miners in the camp, and of the whole lot there was but a single quarrelsome man, by the name of Malony, an Irishman, and his spite was against Free Williams, but Free didn't scare. In the midst of our happiness, news came to us about 6 o'clock one evening, that the Indians had defeated Stillman on Rock River, and were then making their way toward the Mississippi, and would, most likely, pass down the Platte and rob the stores of DeTantibar at his town, and Loring Wheeler, at Gibraltar, and also take in our camp. Cox, then Sheriff of the county (Iowa), had sent a messenger from Mineral Point to give us the warning. Within ten minutes of the time the news came to our camp, more than forty miners were at Maj. Anderson's camp. The Major had been an old Indian fighter, and with one accord, we went to him to be our commander and adviser. There were some fifteen or twenty Irish in the camp that had come from Galena in skiffs and a pirogue; they had brought their provisions and tools this way, and when the alarm was given they naturally went for the vessels, that were in a branch of the river about a mile from camp. Malony, the bully, got behind, and the last of the party had got out into the stream before he got to the river, but he jumped in and was barely saved from drowning. Free Williams joined Stephenson's company of dragoons and made a brave soldier. By morning our party had dwindled down to thirteen; we then went to the Platte, to DeTantibar's, and a man by the name of Cornwall, a Virginian, and I went down to Wheeler's (now, if alive, living in De Witt); Wheeler "had a horse and joined the dragoons." Finding that the Indians were in no hurry to come our way, we went back to the diggings. I have no record of the names, and forty-odd years is a long time to recollect, but we had with us then Maj. Anderson, a man by the name of Hillis, Ham and his nephew Thieskill, Tennesseans; a man by the name of Cook from Mississippi; Cornwall and Nehemiah Dudley from Vermont. Nehemiah was the ugliest man I think I ever saw, but, notwithstanding the antipathy that was then universal in the Mississippi Valley against Yankees, we all liked Dudley. I have never heard of him since I left the Mississippi, but I have often thought of him. These are all I can recollect, but I think there were eleven or thirteen of us. We built a block-house of large hewn logs, and kept a supply of provisions on hand in case of an attack by the Indians. We mined through the day and slept in our block-house at night. The block-house was on the high ground north of the ranche, and I understood some years ago that there was a Catholic Church near by, and that the old shanty that I had lived in was standing near the church. In 1828, the miners had crossed over the river, and back of Dubuque; had been very successful in finding lead, so much so that they built a smelting furnace on the island; but the Indians complained to the Government and troops were sent who drove off the miners, and an officer and a few men were stationed across the river on the Illinois side, under the bluff, to keep the miners from trespassing on the Indians. These troops were withdrawn when the Indian war commenced, and as there were several fine leads that had been opened in 1828, we concluded to make a raid on them while the Indians were absent, and to that end Ham, Cook, Dudley, as I recollect, made one party, and Cornwall and myself another, and we went down the river in skiffs, taking our provisions and tools. We all stopped with the old man Jordon, who had the ferry across the river. At that time, his ferry facilities were a flat-boat that would take one wagon and team of two horses, and half a dozen Indian canoes. Jordon's house or tavern was a double-log house with a passage in the middle, and a supply of outhouses, and was on the side bank a few hundred yards from the river. The scenes of my after career were laid wholly in Iowa.

BY MRS. R. CHAMBERS.

My father, Edward P. Coombs, first came to the West from Fayette County, Penn., in the spring of 1834; at that time, Wisconsin was almost an unknown region. He first worked at Mineral Point, but, during the summer, looked out and bought his future home in what is now the southwest part of Lancaster, on Section 29, I think. That fall, he returned to Pennsylvania, bringing with him some of the products of the new country, among which was onions raised from

P. B. McJurye

MUSCODA.

seed—something that was unknown in his old home. In the spring of the following year (1835), he moved his wife and family, consisting of six children, two boys and four girls, to their new home. Six weeks were occupied in the journey from Pennsylvania to what is known as Hurricane Grove. While they were waiting for a boat at St. Louis, the celebrated chief Black Hawk arrived at that city with a number of his followers on a steamer. On arriving at Cassville, my father left his family there while he went ahead to procure teams to transport them and their effects the remainder of the distance. He soon returned with some of his neighbors with their ox-teams, and in these they set out for the new home. Two days were occupied in making the journey of less than twenty miles, all hands staying over the night of the 1st day of May at the cabin of Silas Burt in Old Beetown. They found these early settlers very kind and hospitable. Upon arriving in the Hurricane, they went to live in the cabin of Martin Bonham until their own was erected. Young Bonham was a young, unmarried man, keeping at the time a "bachelor" establishment, and when he heard that there were girls in the family that had just arrived, he said he hardly knew which way to run, his clothes were so ragged. However, he concluded to come in from the field where he was, and, until the day of his death, the family found him ever a kind neighbor and friend. Little did we children know in those times of toys or playthings, one china doll dressed in silk and hung up in state was all I remember seeing, and that was, of course, too good to be used on any occasion. When our parents went to town they would bring us a treat—some green apples which were an object of much curiosity. One thing that made a lasting impression on my childish mind was a storm that occurred in the summer of 1844 or 1845, I think. It came up so suddenly that those who were any distance from home did not have time to get there. My brother was plowing in the field when he perceived it coming and unhitched his horse and started for the house, but was forced to abandon the attempt and seek shelter under a strawstack, from which shelter he saw the roof of the stable carried away. The rain poured in torrents, and terrific flashes of lightning and peals of thunder rent to air. It seemed as if the wind would sweep everything before it. My married sister was alone in her home when the roof of the house was taken off, and she was left standing in the middle of the floor, and the rain pouring in torrents around her. When the storm had abated, we counted from our window thirteen trees that had been leveled, and I think the woods in that vicinity will still bear traces of the great storm.

My father was by trade both a carpenter and a blacksmith, and, when he came to Wisconsin, he found employment for a share of the time in making chairs, tables, bedsteads, coffins, and, in fact, everything in this line needed by settlers in a new country. To-day, after the lapse of more than thirty years since his death, we find specimens of his handiwork. He had served for a time in the war of 1812, and contracted a disease from which he never recovered, although he was never a pensioner. He died in March, 1849, but from the ravages of another disease than this.

In 1849, began the great Californian exodus from this county. A few went out in the spring, scouts as it were of the hundreds and thousands that were to follow. The next spring, the excitement ran still higher; young men were getting their traps together, loading their covered wagons, to which were hitched two, four or six horses, or oxen, as the case might be, and setting off for their five months' trip across the plains. The excitement continued for several years, until it was dreaded to see spring come, as it seemed as if every one who could would go; at times it was doubtful what we would do for inhabitants, so great was the exodus. In the spring of 1854, the writer, being duly commissioned by J. C. Cover, the Town Superintendent, began a new career as teacher. My first school was in District No. 5, Town of Lancaster, where I had twelve pupils, and received \$10.50 per month, boarding myself. Of those twelve pupils, one, Francis M. Irish, is dead. The remainder are, I think, all living. Six of the boys were soldiers in the war for the Union. Five returned to their homes when peace was declared. Three of the girls became teachers.

Of our family of ten children, seven are now living. My mother, eighty-one years of age, is living with my brother in Hurricane Grove.

BY IRA W. BRUNSON.

I was born in Sing Sing, N. Y., May 3, 1805; raised in Danbury, Conn. In 1827, moved to Columbus, Ohio, where I engaged in the hatters' business—being a hatter by trade—which I stopped in 1835. In the early part of 1836, left Columbus and came to Wisconsin, in company with my brother Alfred, and Henry Patch, in a keel-boat, down the Ohio and up the Mississippi Rivers; landed at Prairie du Chien.

That fall, in September, I returned to Ohio, in the stage, to settle up my business; returned to Wisconsin on horseback, in the winter. Left Columbus the latter part of January; the mud, at that time, was about knee-deep to a horse. Arriving at Fort Wayne, snow was fifteen inches; at South Bend, it was again bare ground; at Michigan City, snow was two feet deep; at Chicago, it was once more bare ground. I crossed Rock River at Rockford, Ill., on the ice; stayed over night at the Twelve-Mile-Grove. The only house was a cabin, with neither chink nor daub. In the morning I started north, intending to reach Freeport and stay overnight.

Came to a house when the sun was about an hour high, and inquired the way to Mineral Point; was told to go to the mill and stop overnight, which was about three miles' distance. On reaching the mill, I found it to be a saw-mill, but could find no house. I wandered about in search of a house until it commenced getting dark. I could see a dark-looking place; thinking it was a grove—houses were then built in or near groves—I started for it, but on reaching the place found neither house nor road; concluded I would be obliged to stay out all night, and started off in the northern direction, the wind being in the northeast. I kept the right cheek against the wind, so that I would keep the same course. Traveled until I reached a large creek, which, being open, and not knowing anything as to its depth, did not dare to push my horse into it, and concluded to stay overnight there. I turned my horse loose, that he might feed upon the grass above the snow, the snow being about one and one-half feet deep. I then made a path about a rod long, between two trees, and walked to and fro; not having anything of which I could make a fire, had to keep moving. After walking some time, I began to get tired, and laid myself down, resting my head upon my saddle; for fear of falling asleep, I took a chew of tobacco. I soon fell asleep. I dreamed I was drinking beer, and I then swallowed my tobacco, and I awoke. I felt sure had it not been for the tobacco I never would have awoke.

I again took the path and again walked to and fro, and watched to see the sun rise, so as to point my compass. At daylight, I found that a gang of wolves were near at hand. Taking my bearings, I found I was on the edge of the prairie and timber land, and about six miles west of the Pecatonica. I then mounted my horse and started east; after I had gone about three miles, I found the road, and then started north. Arrived at the grist-mill and house about 11 o'clock, and after eating dinner started for Mineral Point.

Toward evening, I arrived at a house, and wanted to stop overnight, but was not allowed to stay. I, however, obtained a place to remain about a mile farther on. Next night I stayed at a miner's cabin, on Peddler's Creek, now known as Linden, and the next night arrived at Henry Patch's.

In the following spring, in 1837, opened a store at Cassville, in company with a man named Sellars, and remained there until a house was built at Lancaster by James Bonham, on the same lot now occupied by Burr's store; moved my goods and started the first store in Lancaster. About the same time, Maj. Price sent out goods by George Cox, and commenced a merchandise business in a log building with frame attachment, near the big spring; he also was Postmaster. I continued in the merchandise business until 1839.

William Richards kept the first boarding-house in a log-house built by Boice, who formerly owned the land where Lancaster now stands, and sold the same to Maj. Price, who laid out the town of Lancaster.

While he was keeping there, a quarrel arose between him (Richards) and the boarders. The boarders all left, and employed a Frenchman to do their cooking, and had their kitchen beside a log near where the Phelps House now stands; had their dining-room in a small frame building,

on a lot where George Ryland's bank is standing now. Richards afterward moved back to Cassville on his farm. They lived in that way for two or three weeks, not a lady in the town. My brother Alfred and his wife, on their way between Platteville and Prairie du Chien, had broken his wagon, and were obliged to stay overnight, his wife being the only woman in town. In the meantime, Richards was succeeded by Capt. Reed.

The first court held in the county was held in Cassville, in the first of 1837. Judge Dunn was Judge of the court; John Fletcher was Clerk. The second court was held in the same building that we used as a dining-room.

The first road in Grant County [Laid out by the county.—Ed.] was laid in June, 1838; Commissioners, J. Allen Barber, James Bonham and myself; Jared Warner, Surveyor; was laid from Brunet's Ferry, on the Wisconsin, to Platteville. Second road in the same year from Cassville to Platteville, by the way of Hurricane Grove; I was one of the Commissioners. The first assessment in collecting taxes was known as the "tax sale of 1838." In 1839, they found in what is called the Burlington Statute that the law had been changed, forbidding the employment of the Sheriff or Deputy Sheriff in collecting the taxes, and authorized the County Commissioners to appoint a Collector. About the 1st of December, in 1839, the County Commissioners appointed me Collector in the county, which business I commenced to perform immediately; although cold winter and short days, I made my return in time. The next year, at election, I was elected by the people, and served three years in succession.

Judge Haywood was County Treasurer; Nelson Dewey, Clerk of County Commissioners. I made my returns to Judge Haywood. The county taxes were collected by a County Collector for eight or ten years, until the State Government came into operation and town system was adopted. The fees of the County Collector (while I was Collector) were 5 per cent for collecting and 5 per cent for advertising delinquent lands, and 25 cents for each certificate of sale. In 1840, the fees amounted to \$1,400 or \$1,500.

The first celebration on July 4, that was held in the county (if not in the State), was held at Cassville in 1837. Maj. Anderson was President of the occasion, and I had the honor of being Vice President. [This is meant as the first public celebration. Maj. Rountree had celebrated Independence Day in 1827, as mentioned in another place.—Ed.] T. P. Burnette delivered an oration, which was re-published in the *Herald* a few years ago.

The first Convention held in the State was held at Madison, in the summer of 1838. Maj. John H. Rountree, of Platteville, and Orris McCartney, of Cassville, and myself, went as delegates from Grant County, traveling there and back on horseback.

Grant County, like all other new counties, was in the habit of making a non-resident landholder pay well for the Government; they would assess non-resident land about double that of resident. I have known of land belonging to residents being assessed at \$2.50 and non-residents at \$5, both pieces lying side by side.

People were generally free-hearted and liberal. If a traveler should come to a miner's cabin or any house and not find any one at home, and he should go in and eat what he wanted, there would be nothing thought of it. For instance: I came to Tom Parish's, who kept a tavern in what is now known as Wingville, just at nightfall. In the morning, I asked what the "bill was." He replied, "I never charge my neighbors anything;" my home was over twenty-seven miles from there.

In the early settlement of Wisconsin, there was a gang of desperadoes in and about Snake Hollow (now known as Potosi), who gave tone to the character of the whole country. A dispute arose between Samuel B. Roundtree and William Clark and their crowd on one side, and Moor and Watson on the other, respecting the right of a mineral lot. It first began with a law-suit, and then Moor and Watson gave James Crow, another hard character, what they called a "fighting interest" in the lead. Roundtree and Clark were rather afraid to attack Crow themselves; they accordingly employed three men to dispose of him. One night Jim Crow was in a grocery in the upper part of the hollow; Evans, Cooley and Derrich came up from the lower end of the hollow on horseback, and leaving their horses at the door of the grocery, went in,

took a drink, saw Jim Crow standing at the fire-place as they again went out the door. Evans turned, holding the door partly open, drew a pistol, fired at his victim, the ball passing through his body, and he fell dead. They jumped on their horses with a loud yell, and went down the hollow again. They were finally captured and brought to Lancaster. The examination commenced in the afternoon before Squire Dewey in a log building standing opposite the present site of the Mansion House barn. The building being two stories high, the examination was held up stairs, [afterward changed to down stairs—Ed]. The Sheriff had a guard of about twenty men stationed there on the stairs (they were under my charge and armed with rifles), with orders that no one should go up only as they were summoned. The court continued all night, and the next day about noon they were committed to jail by Squire Dewey. Not knowing that the Sheriff would receive them without an order from Judge Dunn, I started out to Elk Grove to obtain an order to the Crawford County Sheriff. At the same time, Roundtree's lawyers sent to a man to get a writ of habeas corpus from Judge Dunn; we went together. I obtained the order, and the other man the writ of habeas corpus to bring the prisoner there before Judge Dunn. The prisoners were brought before Judge Dunn and were admitted to bail of \$2,000 to appear at court. After that, the people were exasperated at seeing murderers running at liberty. They (the people), raised a company of about two hundred men, well armed, and gave orders to Roundtree, Clark and all concerned in it to leave the country forthwith, or they should be lashed to a log and sent down the Mississippi River.

When the court met again, the prisoners did not appear. A motion was made to take judgment against the bail, but Judge Dunn said that if the people arose and drove them away, the bail could not be held responsible. None of them dared make their appearance for a long time. I afterward heard that Roundtree died in a hovel in Fair Play. I believe that all engaged in the killing of Jim Crow came to some bad end.

BY T. M. FULLERTON.

I arrived from Missouri, in Grant county, on Sunday morning, July 22, 1837. We slept on the bank of the Mississippi River at the mouth of Platte River the previous night. What is now Potosi was the point we were aiming to reach. The place was known throughout the mines as "Snake Hollow." Among the first discoveries of mineral was a rich deposit in a cave, on the west side of a ravine two miles in length. Several thousands of pounds of this mineral was white as chalk, and very pure, resembling chalk, except in its remarkable weight. In exploring this cave, the miners, in winter, discovered many snakes in a torpid condition; hence the name given to this locality. In 1837, a few houses had been erected at the mouth of the "hollow" and named La Fayette. Nearly a mile further north, another group of shanties was called "The Hollow," and afterward Van Buren, which was the name of the post office. About a mile further north was the "Head of the Hollow," afterward known as Jackson. These three parts were, by Legislative act, in 1839-40, called Potosi, and the post office so named. Southeast of La Fayette nearly a mile, opposite the mouth of the Grant River, and being the ferry landing on the Wisconsin side, began to be a village called Osceola.

My destination at first was La Fayette, where I was selling a small stock of goods on commission. There was a similar establishment up in the hollow. But the inhabitants were chiefly adventurers engaged in mining, and except such things as they needed there was little call for merchandise, there being but a half-dozen or so of families in the southern part of the county. As a matter of course the society was rough, and morals were almost dispensed with. Drinking, gambling, stabbing and shooting were far too common, and "Snake Hollow" became throughout the mines notorious for its wickedness.

In 1837, there was, between "The Hollow" and "The Head of the Hollow," a small log Catholic chapel, the only evidence of Christianity to be found there. A priest resided there, and his little plantation bell called his people to occasional worship. During that year, Rev. John Crummer, an Irishman, came once or twice to preach the Gospel as the Methodists understand it. He was the regular "circuit rider" on a circuit embracing all of Wisconsin west and

south of Blue Mounds. The preaching-place was a very small miner's cabin in which the family ate, slept and lived. The room did not exceed twelve by fourteen feet in size. The congregations were able to get in and room to spare. In August, 1838, the Illinois Conference sent Rev. Isaac I. Stewart to the Platteville Circuit, which embraced all of Grant and parts of other counties. During the spring of 1839, Rev. James G. Whitford, just returned from the Indian Mission at Caposia, now in Minnesota, came as Mr. Stewart's assistant. In the latter part of that year a class was formed, consisting of Thomas Clayton, Leader, Thomas J. Crockwell, Local Preachers; John Crockwell, Catherine C. Crockwell, George Medeira and wife, James R. Short and wife, and Jonah Pedlar and wife. They had been members before coming to the place. A weekly prayer-meeting was established, and preaching was had once a fortnight, all in the small residence of J. R. Short.

In the conference year of 1839-40, Rev. H. W. Reed was in charge of the circuit, and Mr. Whitford continued as assistant. They had thirty-two regular preaching-places in four weeks. In December, 1839, we began a Sabbath school, the first, I think, in Grant county. We had procured a log house for meeting purposes, about fourteen by sixteen feet in size, formerly used as a drinking saloon, and the scene of several stabbing and shooting affrays. It became our chapel for several years, and was the spiritual birthplace of many sinful souls. On the 2d of January, 1840, Messrs. Reed and Whitford began special revival services, assisted sometimes by neighboring local preachers. It was my good fortune to be the first fruits of that revival. During the three weeks the meeting continued, forty-two were converted and joined the class of Methodists already organized. The awakening was general and the reformation of the place was very marked. The influence did not stop with the meeting, but continued for more than a year. During the summer of 1840 Rev. James Gallaher, an Evangelist, formerly Pastor of a Presbyterian Church in Cincinnati, Ohio, held a series of meetings, and organized a Presbyterian Church, but left them without a Pastor, and they soon began to decline.

Out of the Methodist revival several went out to preach. Robert Langley, a tailor, intemperate and profane, was reformed and converted. He subsequently became a member of the conference, did good service in the itinerant ranks, and died in the ministry at Reedsburg, August 16, 1874.

William Vance was our chief infidel, being a correspondent of infidel papers and a lecturer of his neighbors. He did all he could for two weeks to hinder the revival, but finally yielded to his convictions, was converted and preached several years as an itinerant. He went South and I lost track of him.

James W. Simpson went among the Chippewa Indians as a teacher, intending to be a missionary, but was thwarted in some cherished purpose, became a trader with the Indians at St. Paul, and gave up all pretensions to piety, dying some ten years ago.

This writer, after fifteen months of activity in church work at Potosi, went to Iowa County in March, 1841, and became a "circuit rider," continuing, with two interruptions for a short time, to this day.

Before leaving Potosi, arrangements were well on the way for building a Methodist Church, which was completed and occupied soon after.

On the 10th of October, 1840, the first temperance society was organized, called the "Snake Hollow Grant County Temperance Society." The pledge adopted was:

"We will neither drink nor make use of any ardent spirits or alcoholic liquors, unless for medicinal purposes in cases of sickness, believing ardent spirits are of no benefit to man in his daily pursuits of life; we will, therefore, discountenance, and, so far as lies in our power, prohibit the use of them in our respective places of residence." Nineteen signatures were appended. The officers were: William G. Thompson, President; William Drake, Vice President; Lansing D. Lewis, Corresponding Secretary; John H. Dodson, Recording Secretary; and Robert Langley, Treasurer.

The annual meeting was held in just three months, January 11, 1841. There were then one hundred and two members. The officers then elected, were Hon. James P. Cox, President;

George Madeira, Vice President; T. M. Fullerton, Secretary; R. Langley, Treasurer; C. C. Drake, T. J. Crockwell and Simon E. Lewis, Managers.

Although we had no vote in the Presidential election of 1840, excitement ran high, and "Tippecanoe and Tyler, too," was a thrilling watchword. George Madeira had recently come to the place with a stock of goods. He purchased and moved his family into a small log house, but proceeded to build a good frame residence on the same lot. Into this he had just moved when the convention nominated Harrison for the Presidency. Immediately he had his carpenters enlarge the door of the old log house to six feet in width. A fence board was used for a latch extending clear across the door, and six inches beyond it. To this was attached a three-quarter-inch rope, going through the door, and a block of wood four inches square, and ten inches long, fastened on the outer end of the rope. On the walls outside were stretched all the coon-skins he could procure. Then he moved his furniture and family back to the log cabin, and lived there till after election. This illustrates the feeling on one side with the "latch string always out," and the other side was equally enthusiastic.

This Madeira was a very excitable man. In 1830, he lived in a miner's hut a mile or more south of Mineral Point, where, in a fit of jealousy, aggravated with liquor, he mortally stabbed a worthy young man with a penknife. He was arrested in Galena, and was the first man ever put in jail there, as stated in the weekly *Gazette* of that city, February 18, 1881. He was indicted at Mineral Point for murder, the indictment quashed on some technicality, and never renewed. While living in Potosi, he was an active and useful member of the Methodist Church, a very kind and benevolent man. But his excitable nature sometimes led him into rash acts, causing him much sorrow, and not a little expense. When I left that village for an itinerant life, meaning to go afoot for want of means to buy a horse, he presented me with one, saddled and bridled, saying, "Take him in the name of the Lord," and accompanying me out of town on another horse, with blessings.

During the first three years of my residence in Wisconsin, the frost, in September, killed all the corn and other late crops. The seed was from the South, and not acclimated. It was a universal belief that the country was "too cold for corn." No one claiming that fruit could be raised here, could obtain credit for sanity. Again, it was the general opinion that the country would never be settled, except by transient miners, because fuel and building material could never be obtained, except by importing. These current beliefs came fresh to me, when, after forty years' absence, I passed over the prairies of 1837, and found the orchards bending under their thousands of bushels of apples, the corn like the plentiful years of Egypt, and the farmers *consuming* wood to get it out of the way of the plow.

SHULLSBURG, Wis., February 23, 1881.

BY J. W. SEATON.

It was in the month of July, in the year 1847, that a Northern Lake boat, "bearing Cæsar and his fortunes," and a few less distinguished personages, landed in the city of Milwaukee. The shore was reached by a broad plank—uncarpeted—being shoved out into the sand. Down this, one by one, the passengers filed, and through the deep, burning sand, carpet-sack in hand (grip-sacks were undeveloped), for half a mile or more, the few passengers made their way to the limits of the city (it was quite a limited city then), and sought the accommodation of a first-class hotel. They found one. It consisted of a long, one-and-a-half story frame building with a porch in front, and chairs ranged thereon for the accommodation of guests. The fare was beef-steak, boiled potatoes with the jackets on, coffee, warm biscuits of a saffron hue and an alkaline flavor, all placed on the center of a long table, within reach of the most modest guest, which was "Cæsar." They were disposed of with a relish, however, and perhaps went as far to satisfy the inner man as the sumptuous bills of fare which are now served from the sideboards of the New-hall and the Plankinton. Rest for the weary was provided up one flight of stairs, on beds of straw duly separated by board partitions. Dizzy dormitories on sixth and seventh story floors were not reached by elevators on this occasion, and, when morn broke in the east, you did not

look out like an angel from mansions in the skies, to take observations of the waking world, and then descend, like a miner down a shaft, to the common level of mortals. None of these conditions existed. But one day and one night of this delectable, primitive city life sufficed for a lifetime, and, in a two-horse hack, with a jovial companion of lesser note than the writer considered himself at that time, but who has since managed to "climb the steep where Fame's high temple shines afar"—the Hon. Orsamus Cole, Chief Justice of the Supreme Court—we set out in search of green fields and fresher pastures, over farmless prairies, around the margins of charming lakes, which in their undisturbed repose, and the cool quiet shade of the old oak openings which lined their borders, seemed an epitome of the "Saint's Rest"—through fenceless valley's and over the brow of treeless hills, we reach at length, on the second day out, the gallant young city of Madison, the capitol of the State. *Stat umbra et preterea nihil.* An unpretentious hotel situated near the foot of Lake street, wearing the modest title of "Lake House," gave us of its cheer, which was a repetition of the Milwaukee sort, with the addition of broiled prairie chicken and fried fresh fish. It enjoyed also the more exalted honor of being the headquarters of His Excellency, Gov. Henry Dodge, who was then in the zenith of his power. It was here he gave the famous reception to the German Count, displaying a hunting knife and a pair of horse pistols as the insignia of his rank and badge of his office. The city boasted of two other hotels of about the same magnitude and style of architecture as the Lake House; the one standing near the present site of the Vilas House, kept by Robert Lansing, and the other the notorious "American," which stood on the corner to the north of the park. These, with the old capitol, which looked more like a prison house of the Dark Ages than the capitol of a civilized State in the nineteenth century, and perhaps a hundred or more private residences, environed with hazel-bushes and the primitive oak groves—no house as yet being erected west of the grounds reserved for the public park—comprised all there was of this now beautiful inland city. Even then it was an enchanting spot. Nature, in one of her most wanton moods, seemed to have lavished here her fairest charms and most seductive smiles. Lakes, groves, and undulating hills all conspired to captivate the senses, and lead the adorer to exclaim in his heart,

"These are thy glorious works, Parent of Good!
Almighty! thine this everlasting frame,
Thus wondrous fair!"

Here were landscapes and pictures of loveliness, unapproachable in their design, perfect in their execution, painted by the hand which had long since designed the blue canons of the skies, and painted the starry galleries of the heavens.

Leaving this paradise of places, where reason and the charms of nature invited us to stay and make our fame and fortune (if such a thing were possible), we resumed once more our journey westward, and soon were approaching the lofty summits of the Blue Mound. Arriving at the old home of Ebenezer Brigham, which stood a short distance from the public highway, in all its original simplicity—a double log cabin of the Southern type—we partook of a choice meal of venison and pastry, supplemented by other rare dainties of a well-spread Western table, which we have ever since held in grateful remembrance. Here for the first time, I met the hero of Pecatonica, Gov. Henry Dodge, who, in company with Judge and Frank Dunn, was on his way to Madison, the latter to attend a session of the Supreme Court, of which the Judge, in Territorial days, was Chief Justice. The stockade near the Mound, called "Mound Fort," was still standing about a mile and a half south of Brigham's house, and could be seen from it, excited the most lively emotions in my young and enthusiastic mind. Here was one of the strongholds of the early settlers, where they had brought their wives and children, to protect them against the wily assaults of the renowned chief of the Sacs and Foxes and his followers—Black Hawk and his warriors. In this neighborhood the blood-thirsty savages had murdered a member of Brigham's family. It was in the sight of this Fort two of its inmates, who were out reconnoitering, had been surrounded by the lurking enemy, killed and horribly mutilated, in the presence of their companions, and which deed of atrocity had led to the relentless punishment

which Gen. Dodge and his command soon after gave them at the famous battle of the Pecatonica, where, out of a band of seventeen warriors, not a red-skin was left to tell the tale. All were killed. It was to this fort the young Hall girls, after a month's wandering and captivity, were brought in a most destitute and forlorn condition, and where they were so kindly received and treated by the ladies of the Fort. The scene of these cruelties and war-like exploits made a deep and lasting impression upon my mind at the time, as well as the wide, romantic view of the surrounding country, which these lofty summits enables the eye of the traveler to obtain. From here onward we came in contact with the old-time mode of transportation of lead across the State to the lake ports—three and four yoke of cattle attached to a heavy wagon—the “prairie schooners” of early times—which made their regular monthly voyages to and from the lakes and mines—taking out their cargo of pig lead, and returning with merchandise and family stores. It was a slow but sure and profitable business. In driving these teams many a Yankee boy learned forcible expressions and expletives which he never dreamed before were in the English language. Passing through the already important and wealthy mining villages of Dodgeville, Mineral Point and of Platteville, all then flourishing places and deserving of mention, we reach, at last, the brow of the hill where the road descends into this ancient burg—Potosi. What a view is here again presented! Before you, to the southward and westward, is a prospect the most beautiful which can be imagined. It is not in your immediate presence, in superlative languages, sublime, illimitable, immense; it is rather quiet, impressive, peculiar. To the right and left are gentle, undulating slopes, clothed in emerald green of waving oaks, mark the northern limits of the long, deep and sinuous ravine you are about to enter. Its trailing course, as it presented itself to the early settler, winding in dark and dismal folds to the river, begot the name of “Snake Hollow,” by which sobriquet it was long known among the miners. On either hand burst forth two large and never-failing springs of limpid water, which form the source of the beautiful stream called by the harsh, ill-sounding pseudonym of “Snake Hollow Branch.” All the diminutive streams in the mining region which *branch* out from and supply the larger water-courses are known by this peculiar, and I may say, appropriate appellation. Hence we have “Rigsby Branch,” “Dry Hollow Branch,” “Long Branch,” “Eayres' Branch,” and many other branches, all tributary to the Grant and Platte Rivers, which course through the town in nearly every direction, furnishing pure and living water to almost every farm. None of them are sluggish in their movement, but go rippling and bounding down to mingle with the great Father of Waters; and to their purifying influence more than any other causes, may we justly attribute the continued exemption of this town from malarial and other diseases, so destructive to human life and happiness in many Western towns.

The moisture with which they continually supplied the earth and air were also productive of a heavy growth of forest trees which are still numerous, and which, fifty years ago, shaded nearly every rod of ground within the borders of the town with their dark, dense foliage. And it is to these huge trees, many of them the slow growth of centuries, more than the products of the mines, rich and valuable as they have been, Potosi has derived a preponderant share of its wealth and prosperity. Chopping and boating cord-wood and timber to the Dubuque market has for years been a lucrative business, and many of our prominent citizens have derived therefrom a respectable independence, a fact which can be said of but very few who have delved and wasted their lives in the lead mines.

But to return to the brow of the hill, where like De Soto, I gazed for the first time upon the broad, matchless and almost boundless valley of the Mississippi, where sweeps its mighty waters to the ocean. It was standing upon this elevation, looking over and beyond the little valley in my immediate presence into the vast and almost measureless valley beyond, that I became impressed with the greatness and grandeur of the country I had reached. There, almost at my very feet, flowed the world's most magnificent river. There, within reach of my vision, clearly defined by the shores of this mighty stream, were the eastern boundaries of an empire yet to be. The Great West, with its vast prairies, its arid plains, its streams and mountains, its wooded hills and valleys, its “boundless contiguity of shade,” yet uninhabited and

unexplored by the foot of civilized man, stretching onward and onward to the far limits of a continent, presented itself to my mind, and I shrunk into nothingness, and was ready to exclaim in the language of the Psalmist "What is man that thou art mindful of him or the Son of Man that thou visitest him." Surely, thought I, here is a region so far-reaching in its limits, so wild and weird in its aspect, so much beyond the necessities of the present civilization that centuries must elapse before the broad acres of its prairies will be needed to supply the wants of man, and generations must expire before the solitude of its woods and streams shall be broken up or re-echo to the sound of the woodman's ax.

At this date, 1847, Potosi was second to no other town in the county. Her miners were prosperous, her mechanics were profitably employed, her merchants were doing an increasing and extensive business both in the wholesale and retail trade. Lancaster, Wingville, Beetown, the Hurricane and all surrounding points came here to purchase their supplies. Steamboats left the landing weekly, freighted with lead and brought back in return the necessaries and luxuries of life, as whisky, bacon, flour, staple groceries and dry goods. A printing office whence issued the *Potosi Republican* (whereof your humble servant was proprietor and editor, and weekly expounded good, sound, Democratic doctrine) was here sustained and shed its benign influence over the darker portions of the county; four lawyers, Cole & Biddlecome, the former now Chief Justice of the Supreme Court, and the latter one of the brightest intellects and most promising young men the State could boast, who since pursued his profession in St. Louis and died in Florida; Judge Cyrus K. Lord and Hon. William Hull, both residents at the present time of La Crosse, where they still pursue their honorable profession. Judge Lord was Receiver of the Land Office at that point, holding his appointment from President Franklin Pierce, and William Hull distinguished himself in the Legislature during the term of Gov. Bashford's administration as the popular Speaker of the House; closing his political career, he located at La Crosse and became the attorney of Commodore Davidson's Northern Line of Boats, which position he still holds. The medical profession was eminently represented by such skilled practitioners as Dr. Carlos M. Hewitt, now a respected citizen of Boscobel, but whose failing health has prohibited him for several years from active practice. Drs. Bennett Armstrong, George W. Bicknell and John Creighton, all of whom are now dead, and a few years later, Dr. Taylor L. Graham, who still resides and pursues his profession among us.

Among the principal merchants at that period, who were engaged in active business, were Solon M. Langworthy, now of the city of Dubuque, a son of old Dr. Langworthy, an early pioneer of the mines. Donald A. McKenzie, a Scotchman by birth, boasting Highland blood, who came from St. Louis about the year 1840, entered into the lead and mercantile business and established a character for honesty and fair dealing which became proverbial. He subsequently entered into partnership with Julius Augustine and James Garmick, doing business under the firm name of McKenzie, Augustine & Co. The firm was dissolved in the spring of 1855, Mr. McKenzie removing to Dubuque and Mr. Garmick to Dunleith, where, for a few years, they were connected with the Dubuque & Dunleith Ferry Company, Mr. McKenzie for many years being the trusted and efficient clerk of the company. The members of this firm are now all dead, Mr. Garmick having become an invalid and cripple several years before his death from a railroad accident, suffering the loss of his right arm. He was a good citizen, and an intelligent, worthy man.

Samuel Wilson, a native of County Down, Ireland, was another leading merchant. He came to Potosi about the year 1840, from the city of Galena, where he had previously been in business, and engaged at first as a clerk in the store of D. A. McKenzie. Subsequently purchasing the stock of Lawther & Dyer, who removed to Dubuque, he commenced business for himself, and continued it until the summer of 1857, when his active and busy career was brought to an untimely end, and he passed from the busy walks of life to the cold and silent grave. Mr. Wilson was a fine man, correct and expert in all his business transactions, and the soul of honor. His memory is yet cherished by all who knew him, and none pass his marble monument in our village cemetery without mentioning his manly virtues, and paying a

tribute to his genial qualities and kindly heart. While residing in Galena, he became acquainted with and married Elizabeth Carpenter, an estimable lady, and a step-daughter of Gov. Briggs, late of Andrew, Iowa. Mrs. Wilson remained in widowhood for a number of years after the death of her husband, and then was re-married to a Col. Cobb, a gentleman who resided a short time during the war in Potosi. They soon afterward disposed of their pleasant home here, and went to reside at Farmington, Mo., the place whence the Colonel had migrated during the troublesome times. Both have since passed to their long repose. Dr. George M. Wilson, an only son, survives them, and is practicing medicine in Missouri.

Another merchant of note was the late Simon E. Lewis, who passed from the scenes of life in July, 1874. He was probably the shrewdest, most energetic and successful of all who were here engaged in business at an early day, securing by his industry, tact and enterprise an ample fortune, which his children now enjoy. Mr. L. was born in Austria, on the Upper Danube; leaving his native country while yet a young man, to seek and carve out for himself a name and fortune in a strange land, which the limited opportunities and over-crowded state of affairs denied to him and others like him in his own land. Landing in the New World alone and almost penniless, he makes his way westward to the then almost frontier of civilization, and takes up his residence at Bowling Green, Mo., where the natural avocation of his people leads him to engage in the mercantile business. From the beginning, he is a prosperous and rising man. Learning of the fortunes being so readily made in the Upper Lead Mines, he closes his small establishment in Bowling Green, and the spring of 1840 finds him domiciled in Potosi, selling large quantities of supplies to the miners and neighboring farmers, who were then struggling in the swaddling clothes worn by all settlers in a new country—scarcely able to live and gain a foothold on the soil. Of course they needed credit, and Mr. Lewis soon became abundantly able and freely gave them all the credit their circumstances required. He thus secured a large and profitable trade, and became well and widely known to all the leading men of the county. About the year 1847, Mr. Lewis was joined by a younger brother, Mr. John P. Lewis, and for several years thereafter the business was conducted in the firm name of John P. Lewis & Co. Other partners succeeded, and branches of their growing business were established at Wingville, Lancaster and British Hollow. He purchased the interest of Julius Augustine in the steam saw-mill located at the mouth of the Hollow, erected by Messrs. Kinney & Augustine, in the year 1853, which for many years did a large and profitable business, and was a partner in the saw-mill and mercantile business, the firm being known as Kinney & Co., until a few months before his death. In the year 1857, he was elected to and held the responsible office of County Treasurer, discharging its duties in a creditable and efficient manner. Mr. Lewis was long known in this community, and exerted a large influence in the business circles as well as over the political and social interests of the town. His second son, George H. Lewis, succeeded him in the mercantile business. His amiable widow remains upon the homestead, while the other members of his family are Dr. John S. Lewis, of Dubuque, Iowa; Josephine McKee, the wife of John McKee, a well-known citizen of Leavenworth, Kan.; Eugene H. Lewis, a promising young lawyer of New York City—a junior partner in the law firm of Chamberlin, Carter & Hornblower—the first-named individual being the late notorious carpet-bag Governor of Georgia, and T. G. Lewis, a student of Beloit College, Wis. Cyrena, his eldest daughter, and wife of Dr. Taylor L. Graham, died a few years since, and sleeps beside the affectionate father whom she loved so well in life, in the old Van Buren Cemetery, on the ridge west of the village.

Celestine Kaltenbach was then, as now, Postmaster, which position he has held for the past forty-three years almost continuously, being the oldest Postmaster in the State. He received his first appointment from Amos Kendall, August 28, 1838, under the administration of President Van Buren, and has discharged its onerous duties so faithfully and well, that no administration has seen fit to remove him. He is a worthy man and good citizen, besides being a prominent merchant of forty years' standing; has held several offices of trust and responsibility in school, church and town. In former years, no man exercised a wider or more salutary influence,

over the community, and especially his own countrymen, than did Celestine Kaltenbach. He is still spared in the vigor of health, and in the enjoyment of happiness, surrounded by his estimable wife and children, a worthy and well-preserved monument of early life in the mines.

There were many others doing business here worthy of extended notice, but space forbids other than a brief reference to their names—all of whom, or nearly all, are now out of active business, have removed from the place or been gathered in by the Great Reaper. To close the list, I will simply mention the names of those most familiar to my memory: Haines & Hollub, I. G. Ury, Langworthy & Williams, Block & Kaltenbach—the senior member of the firm being Elias Block, now a wealthy banker in San Francisco, who was succeeded in business by his brother, Hyman E. Block, who married the eldest daughter of his partner and became an active and influential citizen of the town (now a prominent commission merchant of St Louis), Mr. A. B. Southworth (a relative of the celebrated novelist, Emma D. E. N. Southworth), tinsmith and dealer in stoves. He closed business here about the year 1850. Mr. S. afterward located in San Francisco, where he accumulated a large fortune in the lumber trade. Bicknell & Armstrong kept a drug store; and there were the usual number of shops, saloons and other places of resort which constituted a well-regulated mining town. Samuel Vance and his brother James conducted a thriving business in general merchandise at British Hollow, where was also the old brewery and several saloons in full blast, furnishing potations to the thirsty and thrifty English miners of that village. A small store was kept by Edward Lafont at Rockville, and another by Harrison Pauley. At the German settlement, Peter Zeng and Peter Ort, brothers-in-law, supplied their freshly-arrived Teutonic brethren with their native beverage, and, in generous mugs, made them forget their exile and "Fatherland." Old Peter Zeng, who has now reached his fourscore years, is yet hale and hearty, and walks as sprightly as of yore. He was the first German who located in the settlement—now fifty years ago—and began the building of a town by the erection of a small log house. Others soon followed, and the settlement bids fair to become as famous as "fair Bingen on the Rhine." The mines were flourishing, buildings sprang up on every side, a church soon followed, and the sweet tones of its vesper bells soon greeted the ear and told the listening world a Christian people here had come to dwell. The old church building is now converted into a Sisters' school, while a new and more stately edifice, one of the finest in the State, supplants the old, and rears its lofty spire amid the sunny clouds. And Peter has lived to see this wonderful change; and now, with his "ault frau," contented and happy, blessed with plenty and surrounded by his children and grandchildren in untold numbers, awaits the coming of that time, when, together they shall "wrap the drapery of the couch about them and lie down to pleasant dreams."

In those days, dancing parties were of frequent occurrence in the settlement and were greatly enjoyed by young and old of all classes, creeds and countries. The "sound of revelry by night" and the sweet tones of the violin, with clarionet accompaniment, as executed by John Guion, Von Bernard Marcus and his brother musicians, and as it comes gently floating down on the stream of time, is still ringing in my ears! Oh, those delicious sounds!

" 'Twas music in the sinner's ear—
'Twas life and health and peace."

Nor were these gay waltzing parties without their little episodes. Rude barbarians from the surrounding neighborhood often crept in to disturb those who had met to smile upon the pretty German girls and enjoy the fleeting moments as they passed. And when there was too much malt in the brew, as sometimes happened, black eyes and broken noses were the consequence.

On one memorable occasion, a fracas of this kind happened at a gathering of this kind, when a tenderfoot, unused to border scenes and Western customs would have imagined the innocents were all about to be slaughtered.

Sam and Henry Redman were wild boys living in the vicinity, and when under the influence of liquor, had no respect for the civilities of life. They were present, as they had often been before—dressed after a peculiar fashion of their own, wearing red flannel shirts, open at the collar, and without coat or vest. Around their loins was girt a miner's belt in which each

carried a large hunting knife, ready to flay a deer or scalp a man as the occasion might present. The girls "swung to their partners" and whirled in the giddy evolutions of the waltz; while the strong, but gentle arms which encompassed their lovely forms, were ever ready to fell with ponderous blows him who dared to supplant them in the smiles of these angelic objects of their adoration.

"Love framed with mirth a gay, fantastic round;"

they smiled, perspired, and told the measure of their love with laughing eye and gentle pressure of the hand, when all at once the scene was changed. Big, loud, unmentionable oaths flew thick and fast and the place became suddenly blue with the profanity of the intruders. The girls, panting, trembling, and in utter dismay, fled from the room and were as quickly followed by their more courageous but not less discomfited companions. The candles were extinguished and for the nonce darkness brooded over the scene. The Redmans had sprung a *coup d'état* and were the sole possessors of the place. They whooped, hallowed, danced, and sung their ribald songs and on the light being restored, revealed their brandishing their gleaming knives in the air; while, at intervals, with fiendish grin and lurid oaths, they would drive their glittering points into the rough logs as if pinioning to the walls the victims of their hate. After a time—when fear of sudden danger had subsided—some of the bolder of the German boys ventured to return and remonstrate with the outlaws—the outrage was condoned—a truce agreed upon—the Redmans were invited out to partake of a fresh glass of lager—the dance went on and once more "peace reigned in Warsaw."

A brawl or a personal encounter with the roughs who frequented the dancing parties which constitutes one of the chief amusements in the early settlement of the town, was no uncommon occurrence and often ended with serious results to some of the parties engaged.

But I pass to other and more important matters. Among the smelters of that day I remember William T. Ennor, Joseph Pettey and Albert W. Emery, of British Hollow, and William Lightfoot and Thomas Pallier, of Potosi, only two of whom, Joseph Pettey and A. W. Emery are still living. The mining interest greatly declined after the discovery of gold in California, and the five years succeeding 1849 saw the lead mines of Wisconsin almost depleted of its mining population. Some returned in after years to explore their abandoned diggings, but mining as a source of wealth and employment has never regained its former importance.

James Alderson, during the fifties, made the first improvement upon the old mode of mining with windlass and tub, by the appliance of steam power and machinery and going beneath the water for the shining ore. He mined at "Adney Patch" near British Hollow, and succeeded in raising large quantities of mineral. This gave a new impetus to the business and attracted capitalists, in search of profitable investments, to the mines. A company organized in Pittsburgh, attracted thither through their agents, purchased the Alderson diggings; ran them for a few years with moderate success, when, tiring of their bonanza they re-sold to James Alderson & Co., who, after expending many thousand dollars in machinery and sinking shafts here and at other points, abandoned their works as unprofitable. Another company called the Graham Mining Company, organized in Milwaukee, and of which Hon. J. C. Hathaway, now of Beetown, was agent, purchased from Gov. Dewey, in the sixties, a tract of mining land supposed to be rich in lead ore, known as Preston Point, and commenced mining operations and continued with varied success down to the year 1879, when they, too, suspended operations and sold their lands for a mere nominal sum, having sunk not less than \$50,000 in the enterprise. Practical miners were always of the opinion this company did not mine with that judgment which is the result of long acquaintance with mining operations, and hence their failure. Drifts, or tunnels, were run into the hill, for many hundreds of yards; the workmen tediously and expensively cutting their way through solid rock at a cost of \$3 to \$5 per lineal foot, to drain the main crevices of water and thus be enabled to reach and unearth the large mineral deposits there contained. They succeeded partially in removing the surface water, but never came upon any remunerative beds of ore. Their failure was a disappointment not only to themselves, but the community at large, who still believe untold wealth lies imbedded in our bluffs and hills; and that at no very distant

day, its sources will be reached, their treasures revealed, and the glittering ore in untold million pounds reward the skill of man.

About the year 1850, or perhaps earlier, the great railroad projects leading out from the lake shore westward to the Mississippi, were being much discussed both through the public press and in business circles. The Galena & Chicago Union Railroad was the first to start the grand race for the banks of the Mississippi, which, after crossing Rock River in the year 1851, reaching Galena, where it remained a short time, in the year 1853, and was continued some time during the year 1855. Dubuque was made the western terminus of the road mainly through the efforts of Hon. George W. Jones, then the accomplished Senator from Iowa. Milwaukee, fully awake to the importance of railroad communication with the growing West, was making strenuous efforts to anticipate her more fortunate rival, Chicago, and reach first, with the iron horse what was regarded then as the *ultima thule* of trade—the banks of the Mississippi River.

The unparalleled immigration to and rapid settlement of Minnesota at this time gave the Upper Mississippi an importance unequalled in the history of the world. Everything and everybody seemed to be moving toward St. Paul and intermediate points; during the summers from 1850 down to as late as 1858, the splendid steamers of the packet companies were thronged with passengers and loaded to the guards with freight all bound northward to this new country, whose salubrious climate and prolific soil have not disappointed their then most glowing anticipations. Milwaukee, young, moneyless, and sinewless as she was, bent all the energies of an indomitable will to this great task and commenced grading and laying the iron track toward the setting sun.

Potosi, alive to the importance of securing the western terminus of this road, commenced a railroad project with the view of meeting the eastern road half way and escorting the iron horse to the river. Meetings were held, speeches were made, articles written and published in the columns of the Potosi *Republican*, Lancaster *Herald* and other local papers, all lauding the enterprise and expatiating upon the benefits to be derived therefrom. By the united efforts of William R. Biddlecome and Robert M. Briggs, the members of the Legislature from the Potosi and Beetown districts, a charter was secured and the Potosi & Dodgeville Railroad Company became one of the most important institutions of the land. Briggs secured his election by promising his constituents it should be built by the way of Beetown with a double track "like two rows of brass buttons on a double-breasted vest." The books were opened and many shares of stock subscribed, but it is needless to add, the project was beaten by our more enterprising neighbors in the north part of the county, who mortgaged their farms for stock, and thus secured the location of the road in the Wisconsin Valley.

BY DANIEL R. BURT.

I first came to the country in 1835, after having made my location at Lancaster, or near where Lancaster now is situated; in 1835, I left that point in company with Lucius Ashley for the object of finding a water-power on Grant River to be used for manufacturing lumber for the improvement of the country, and where, if required, it could be shipped by water to any point on the Mississippi. We left with a horse on the 10th of December, 1835, the snow about four inches deep. Learning that it would be difficult to obtain forage for the horse, we left it with Mr. Fitzgerald, then living some three miles from Lancaster, on the Boice Prairie, and thence proceeded through the Platte timber, and examined the Platte River. Not being satisfied with the Platte, concluded to examine Grant, commencing our examination at the point where now stands the warehouse on Grant Slough, following it up to the first fall or rapid water, now Burton, where I subsequently built the afore-mentioned mills. We spent some two hours in searching for section lines without success, and darkness began to settle down upon us, and having eaten our last rations at breakfast, though we had killed a fine turkey, concluded we must try to find our way back to the point where we left our horse, having been three days out traveling over a portion of the country never before seen by either of us, without a track or trace of civilized man to guide us. Our three days of travel had led us to almost every point of the compass, zigzag, circuitous and of all directions. Ashley declared he had no opinion of the proper course to be

taken and that I must pilot; accepting the proffered berth, we commenced our journey over a country broken up by deep ravines, and covered with timber of which we had never before seen, or without any guide to direct us. We had not traveled half a mile before the darkness and brush compelled a halt; breaking up some fine brush to lay my head upon for the night, the snow four inches deep and without anything to eat since morning, I laid myself down to rest for the night, leaving Ashley on guard-duty some twenty feet from me with a double-barrel rifle, and a small fire we had improvised, with instructions to awaken me at 12 o'clock to relieve him. It commenced snowing about this time and was quite dark. The wolves having scented our turkey and our fire, approached rather unpleasantly near with their hideous howlings, and awakened Ashley's attention, if not his admiration, of their music, interesting him so deeply that he declined to be relieved through the night. Tying a handkerchief over my face, with a heavy overcoat and other heavy clothing, I slept through very comfortably, the snow having fallen about four inches through the night and covering me to that depth. I was not in the least disturbed in my sleep; with a large tree at my head, a large cudgel at my side, and a revolver in my pocket and Ashley on guard as above stated. The wolves parted company with us before morning; as soon as the day appeared clearly, we commenced our journey for the point we had left our horse, distant, as subsequent examinations have shown to have been about ten miles; the snow continuing to fall we reached that point at 9:45 o'clock, coming out of the timber directly on a line from the point of starting from the house. I cannot describe, the force that directed my course during the time and distance of this walk of ten miles, being on a direct line turning neither to the right or left to avoid obstructions, or to accommodate by the topography of the country, I have said I could not describe the force that directed this journey, though I have an opinion, which, without demonstration, remains only an opinion. Be pleased to allow me briefly to notice two other incidents similar, if not parallel. I drove into the Territory of Wisconsin in June, 1836, a span of horses which were used and kept at my place at Waterloo through the summer and winter of that season. In the spring of 1837, after the feed became good, while ranging on the river bottoms, about the 15th of May they disappeared; after hunting for them two days without success, I became impressed that they had left for Tecumseh, Mich., from whence they had been driven a year before. I commenced my journey and hunt four days after they had been seen traveling, as near as I could judge, a direct course to the point named, a distance of sixteen miles, without any road, through an unsettled country; I crossed Little Platte, north of Platteville, there being a cabin at the ford, and the first one seen thus far on my route. I learned that my horses had preceded me three days, stopping but a short time and traveling East, I continued on stopping overnight at Belmont; starting early I continued my journey as near the same direction as possible, crossing the Pecatonica River; about eight miles further on I met two gentlemen of whom I learned that the horses had passed their cabin one-half mile distant about four hours in advance of me, and I became hopeful and pressed on, eight miles further, I came on my horses, caught them and commenced my return well satisfied, giving me food for reflection to determine how it was possible to strike their trails, lose it again, and then again and again lose and strike it, and at last ride directly on them, passing over an unsettled country and without roads, a distance between forty and fifty miles of a wilderness. Again, in June, 1840, I hired this same team to Samuel Ashley to make the journey to Milwaukee, returning by Chicago; on his return stopping overnight eight miles east of Freeport. In the morning the horses were missing from the stable in a manner to impress him they were stolen. He spent three days in a fruitless search through the country and returned leaving all at the place named. I listened and carefully noted every circumstance of their loss and came to the conclusion that the horses were not stolen. I left the next morning for Freeport, and reached the house he had put up at about 1 o'clock the next day, examined the stable and the surrounding country; spent an hour to determine what course to take, concluding at last to follow up a small river, as it was called then by the name of Yellow River, coming down from the west-by-south, and every mile I traveled became more impressed that I should find my horses. The first cabin that I passed in a distance of six miles,

was off my route about one-fourth of a mile, and standing on an eminence. On approaching, I was impressed that I should learn something from my horses there. I rode up and meeting a man at the door, made the inquiry about the horses, and if any had been seen; he requested me to describe my horses, and when they had strayed; I did so quite minutely, and as soon through, he replied, "your horses are in my stable," where I found them, took possession and returned again well satisfied. I have given you one incident, showing the rude manner of crossing streams under pressing and difficult circumstances. It became necessary to communicate with the miners, who had lately settled at Snake Hollow; about the first of August, 1836, S. Ashley and myself left for that purpose, traveling the divide between Grant and the Mississippi, reaching Grant near where the ferry is now kept. The water, too deep to ford and about twelve rods wide, presented rather an unpleasant obstruction; but the river must be crossed; we improvised a rude raft from a drift-pile, tied the logs together with grape vines, fastening another vine to the head of the raft, Ashley being properly seated with gun, ammunition and my clothes, I swam in and taking the grape vine between my teeth, commenced towing the raft, Ashley and his goods, he sitting as an impression figurehead to the craft, and safely and dryly landing, and in a few moments shot and killed a large buck weighing upward of 200 pounds. I must give an incident in connection with an Indian of the Pottawatomie tribe. Subsequently to the first time I was visiting the place, to find section lines to enable me to locate for the mill, I was traveling on the ice of the river, and at some distance ahead I discovered a movement that impressed me that it was an Indian endeavoring to keep the tree between me and himself; I had no arms but a small revolver. I soon discovered that it was an Indian with a gun; on approaching opposite the tree he left it and came down on to the river, and walked with me about one mile; when approaching a tree near the river, he sprang upon the bank placing the tree between me and him; I did not feel overly comfortable until I had passed out of the range of his rifle, occasionally looking over my shoulder with peculiar feelings during the time. The next October, I met him again, took him home with me, kept him overnight and treated him friendly and kindly, and in two weeks he came back with his family, hunting and spending the winter near me. I purchased all the meat and fowl of him at 1 cent a pound. He remained off and on for three or four years; he was sometimes threatened by the hunters if he did not leave, but always came to me for protection. Usually having six or eight men working for me, he felt quite safe. He called himself Monamonquett. For a few of the first years of my residence at that place, it was splendid hunting and fishing; I have often seen herds of thirty deer feeding at a time, not sixty rods from the house, and in the winter when chopping timber between Grant and the Mississippi, the deer would feed on the tops of the fallen timber, often in herds of twenty. You could meet with flocks of turkeys, from ten to forty, by traveling a short distance in the timber.

There have been many large fish stories told, but never in quantity and ease of catching have I ever heard anything equal to the demonstrated facts presented for the first years of my settlement. With a seine of twenty feet in length, I have caught a wagon load in thirty minutes and some of them weighing thirty pounds; from the ford up to the dam the river would be literally filled with fish. To throw a stone into the river at the point named, it would seldom fail of killing one or more, and by striking a spear into the water, not aiming at any, you would bring out from one to three fish. I spent twenty-two years at Waterloo, the largest portion of them were prolific with wild and exciting scenes, with pressing business bringing excitement and happiness, and, at this time, casting the vision backward over seventy-eight years, I consider this period of twenty-two years, the happiest portion of my life, and since removing to this place, East Dubuque, I have spent a portion of each year at that place. I have sold all of the 5,000 acres once owned in Grant County, with the exception of something over 200 acres, and have now retired from business.

SOME OF GRANT COUNTY'S ILLUSTRIOUS DEAD.

JAMES GATES PERCIVAL.

This celebrated poet, whose works have given pleasure to so many of his fellow-creatures, was born in Kensington Parish, in the town of Berlin, Conn., as he quaintly gives it, "Tuesday forenoon, September 15, 1795." The poet traced his descent, on his father's side, "to James Percival, who, about 1706, moved from Barnstable, Massachusetts Colony, to East Haddam, Conn. He married the daughter of the celebrated Leydan Pastor, John Robinson. In England, the family may be directly traced to the Barons of the time of William the Conqueror."

James Percival's boyhood was passed in this quiet eddy out of the busy current of worldly life, where he early became noted for his precociousness as well as for his quiet demeanor, which drew him entirely away from the usual boyish sports. "At this time, he lived," said an intimate friend, "in in a world of his own—an ideal world. He knew and cared very little respecting the real world of mankind. His cast of mind was highly imaginative."

In January, 1807, James suffered a severe loss in the death of his father, and shortly afterward, James and another brother were placed under the charge of their uncle, Rev. Seth Hart, who kept a private boarding school at Hempstead, L. I. Here he remained a year, when he was placed under the tuition of the Rev. Israel B. Woodward, of Wolcott, a town adjacent to Kensington; from here he again returned to Hempstead, and it was during this second stay that he gave vent to his feelings in poetry. After having spent the usual three years in preparing for college, in the early autumn of 1810, he entered as a member of the Freshman Class at Yale. Upon graduating, young Percival returned to Kensington, and, after some deliberation, determined to commence the study of medicine, being drawn thereto both by the example of his father and, in a secondary way, by an interest in botany. He wavered between this and the law for several years, finally returning to his first choice, and completed his studies with Dr. Ives, at New Haven. "He had already acquired a wide reputation as a prodigy of learning, and for his facility in acquiring knowledge. When it was known that he had applied for a medical degree, there was considerable excitement about his examination. No one of the Medical Board dared to ask him questions out of his own province; and they examined him for several hours, trying, if possible, to exhaust his knowledge. But he came out triumphantly from the ordeal; and it was said at the time that no student had ever been proved with such severe tests, and none had ever passed so brilliant an examination."

After taking his degree, Percival was engaged for a time as private tutor, and as a lecturer, in the Medical College, on Anatomy. About this time he became, also, interested in the study of language, and afterward spent some time with the Indians. He then commenced the practice of his profession at Kensington, but the prevalence of an alarming and malignant fever soon after his arrival, the mortality occurring so preyed upon him that he then and there gave up his practice.

In 1821, Percival launched his craft upon the uneasy and uncertain sea of letters. In this year, he published a "small, dingy-looking 18mo of 346 pages, containing the first part of his Prometheus;" and a number of other forms. Its reception was most flattering. The title-page bore the following extract from Southey:

"Go, little book; from this, my solitude,
I cast thee upon the waters—go thy ways;
And if, as I believe, thy vein be good,
The world may find thee after certain days."

Percival's name had already preceded him, and, in a quiet way, the whole edition was sold in a little over a year from the date of publication. A little later, while engaged as Curator of the Botanical Garden just formed by Dr. Ives, he was seized with the typhoid fever, and, upon his recovery, he accepted an invitation to accompany a botanical lecturer named Whitlow, to Charleston, S. C. Here he soon separated from his companion and remained in the city until March, 1822, when he returned to New York. During this time he published the first number

Geo. R. Frank

MUSCODA.

of his "Clio," which was issued by the Babcocks in January, 1822; besides this, he employed his pen in versification for the daily press. The new volume was well received and added much to the author's previous reputation.

Of Percival's manners and presence at this time, the following account is given: "He is cold and diffident in his manners, yet steadfast in his feelings, frank and candid in the expression of his opinions, and particularly averse to display and noisy approbation. * * * His passion for study, and the reserve and timidity of manner which characterizes him in mixed company, may naturally lead common observers to suppose he has little aptitude for social intercourse, and little delight in it. But this opinion is incorrect. * * * His range of topics extends to every department in morals, science, politics, history, taste and literature. On points on which he differs from others, he can be approached without the danger of offending even his strong sensibility. Arguments he seems to hear and weigh with much consideration, but his own opinions he maintains with great firmness. He rarely ventures mere assertions, and few, perhaps, are more uniformly in the habit of maintaining their opinions by particular facts and strenuous and elaborate reasonings. One peculiarity may be observed in his manner of conversation, and that is, when he approaches a subject, he enters deeply into it, views it on every side, and pursues it till exhausted, if it be exhaustible."

In August, 1822, the second number of "Clio" was issued from the press of his friend Converse, of New Haven. In November of the same year, the second part of Prometheus was published by A. H. Maltby, of New Haven. Speaking of this poem, the poet Whittier said, in 1830, in the *New England Weekly Review*: "God pity the man who does not love the poetry of Percival. He is a genius of nature's making. * * * His Prometheus is a noble poem. There is no affectedness about it—all is grand and darkly majestic."

In February, 1823, Percival assumed the editorship of the *Connecticut Herald*, a weekly journal, which position he retained but for a short time. Through the earnest efforts of personal friends, Percival received the appointment early in 1824, of Post Surgeon at West Point, but, at his own request, was soon after transferred to Boston. His connection with the Government did not last long, and, until 1835, Percival was engaged in different literary undertakings. In May of the above year, Dr. Percival and Prof. Charles W. Sheppard were appointed by Gov. Edwards, of Connecticut, to make a geological survey of the State. It was during the progress of this survey, that the Doctor was mistaken by the keeper of a country inn for a vagrant, and accosted him sharply as such. "But as the Doctor was leaving his door, a distinguished citizen of a neighboring town drove up and grasped the Doctor's hand with all possible expressions of cordiality and respect. The astonished landlord seeing that he had made a ridiculous blunder, apologized and retired." This work occupied his attention until 1842, his report even in the abridged form in which it was finally published, far surpassing anything that had been attempted in other States.

The last volume of poems published by Percival was in 1843, when "The Dream of a Day" and other poems were issued. This was a 16mo of 270 pages; this was his last poetical venture. His last published poem singularly enough was in German, and written for and published in the *Wisconsin Staats Zeitung*. It was entitled "Der Deutsche Patriot."

Dr. Percival's love of geology had begun as early as 1815, and never abated. The attention which his report on the geological formations of Connecticut attracted, drew the public eye in his direction, and established him as an authority on this subject. "In 1853, he was engaged by the Hon. F. C. Phelps, President of the American Mining Company, to demonstrate the truth of certain theories concerning the lead mines in Illinois and Wisconsin. He succeeded in establishing the very important fact that the mineral extended several hundred feet below the surface of the earth; and it was thought that his investigations had added at least \$1,000,000 to the value of that region. He also advised the use of machinery in the drainage of the mineral lands." In a letter written from Hazel Green in 1853, Dr. Percival gave the following example of the mining dialect of the time:

"I was staked on a prospect, and, after prospecting several days, I struck a lead and raised a lot of bully mineral, but it was only a bunch in a chimney without any opening; so I petered out and a sucker jumped me."

After these explorations had been completed, Dr. Percival returned to the East. During the year 1853, a law had been passed by the Legislature providing for a geological survey of the State. Under this law, Mr. Edward Daniels, then a young man, had been appointed as State Geologist. But those interested in the mining interests of the State, desired that the survey should be conducted by Percival, feeling that the work if carried out by him would result in a much greater benefit to the State. Mr. Daniels also acquiesced in this opinion, and accordingly Gov. Barstow was requested to give the appointment to Percival, which was done.

It is needless to say that the result justified the expectations. Among the miners, Percival was regarded as an authority whose opinions were not only not to be disputed, but were absolutely perfect and unassailable. His commission was received August 12, 1854, and Percival immediately commenced his work. In the introduction to his first report published in 1855, he says of this work: "I have visited during this season all the considerable diggings, from the south line of the State, to a line drawn from east to west north of Cassville, Beetown, Potosi, Platteville, Mineral Point, Yellow Stone and Exeter, and from the Mississippi to the east part of Green County. Some of the least important diggings, within these limits, may have escaped my notice, but I have endeavored to make such an examination of those I have visited, as my limited time would allow."

The report which follows was (*vide* a letter from Mr. Edward Hunter) written entirely without notes or memoranda, in a little room fitted up for the geologist at the capital, a striking illustration of the marvelous memory possessed by this wonderful man. The next season the Doctor continued his explorations, but, upon his return to his home at Hazel Green in December, he was attacked by an illness which brought his eventful life to a close on the morning of Friday, May 22, 1856. He was buried according to his wish, at Hazel Green, the Rev. T. N. Benedict, of Galena, conducting the funeral services according to the form of the Episcopal worship.

Those who knew Percival during his residence in Wisconsin became warmly attached to him. Col. E. A. Calkins in an address delivered before the State Historical Society, thus speaks of his appearance at this time: "The most of us that knew Dr. Percival, did not know him till he came to the West. He was then far past his prime. He walked with his head bent, his eyes cast downward, and with slow and uncertain step. Those of our citizens who often saw him will not soon forget his aspect of poverty, almost of squalor—his tattered gray coat, his patched pants (the repairs the work of his own hand) and his weather-beaten, glazed cap with ear pieces of sheepskin, the wooly side in. The frontier inhabitants of the State knew him familiarly as 'old stone-breaker.'" Among those who knew him, however, and knowing could appreciate his great worth, Percival received every attention. Mr. Edward Hunter, Private Secretary to Gov. Barstow at that time, says: "I became comparatively intimate with him (Percival), and often when I was alone in the office he would enter in his quiet and subdued manner and stand by my desk by the hour—I very seldom could induce him to sit—and, from the rich stores of his mind, on whatever subject I could get him to speak, hold me a willing captive, perfectly enchanted, until some one would dissolve the spell by entering the room, when the Doctor would drop his head, become instantly silent, and glide away."

Dr. Percival's linguistic attainments were as remarkable as his other marvelous stores of knowledge. Besides reading and teaching most of the modern languages of Europe, he was a delver into Slavonic lore, having an intimate acquaintance with no less than six of these tongues. In religious belief, the Doctor approached very near to the Unitarian standpoint.

His fondness for children is mentioned by Dr. Jenckes, with whom he resided at Hazel Green, in the following words:

"His affection for children, especially those he fancied, was frequently shown by his kind attention to their wants, and great solicitude for their welfare. Many a time he took them in his buggy and would ride two or three miles for their diversion, evidently enjoying himself as

much as his little companions. His sincerity and child-like simplicity, caused their attachment to be mutual."

He died as he had lived, simple, unaffected and untouched by the busy, bustling cares of the great world to whose needs and artificial wants he had ever been a stranger. His loss was widely noticed by the press, and many societies of which he was a member, together with the Wisconsin State Historical Society, united in reverent testimonials to his worth. In person, Percival was somewhat below the medium height, and rather slight and frail. His countenance was indicative of his extreme sensitiveness and timidity; pale and almost bloodless; the eye blue, with an unusually large iris, which, when kindled with animation, shone with an entrancing brilliancy. The nose rather prominent and finely chiseled, though inclined slightly to a Roman in outline; while the forehead high, broad and swelling out grandly at the temples, marked the noble intellect there enthroned.

Although a linguist of the first rank as a botanist and geologist, standing foremost among those of his time, Percival's name will be borne down to future ages upon the car of the muses. As a poet Percival will always be best remembered.

MAJ. JOHN R. COONS.

BY J. W. SEATON.

While the evidences of hopes deferred and visions ruptured were only too numerous during the early settlement of the new diggings, still all who came and went out from the mines were not failures. Many succeeded in business beyond their most sanguine expectations and others arose from the humble occupation of miners to fill the most responsible and exalted positions in the land. Many were in affluent circumstances and from the first ranks of society and came here for the purpose of extending their business and adding to their wealth.

A well preserved and fine example of the latter class who engaged my respect and admiration, thirty years ago, was Maj. John R. Coons—a man who derived his patent of nobility from the hand of nature. He hailed from the "Blue Grass State"—the land of Henry Clay, of Prentice, the Breckenridges, the Marshalls—those men of giant intellect and universal fame, the home of heroes and some of the fairest specimens of the "gentler sex" that ever came from the hand of a Divine Creator. Springing from such a source, the Major was no exception to his race, or disparagement to his kind. His gentlemanly bearing—his pleasing conversation—his generous nature and abiding friendship—bespoke the true Kentuckian—and the truer man. He was no adventurer or common fortune-hunter, but with good business qualification, a sound constitution, and a will to encounter and overcome all difficulties, he sought to win his way by true merit and probity alone. Coming to St. Louis in 1808 while yet a boy and while it was but a small French village, his chances for an education were limited, though he became an adept in penmanship, a good calculator, and stored his mind with useful miscellaneous reading. The French *patois* of the place he spoke with the glibness and familiarity of his mother tongue. At this time the old French *habitues* who were gathered in and around St. Louis and Carondelet, in their modes of living, habits, customs and social intercourse, were a peculiar people, and in all things a law unto themselves. Hunting and fishing was their chief employment in summer, and the winter season was one unbroken round of gayety and fun. The sound of the festive violin filled the air; and the Creole girls, dressed in their gauzy robes of pink and white tarlatans, the sweet carnation of the rose glowing on their warm, olive cheeks, and love beaming from every nook and corner of their "soft, dark eyes," moved with angelic grace through the "mystic mazes of the dance" and led captive many a willing heart. The quaint gable roofs of their houses—their vine-covered balconies and jessamine wreathed windows that greeted the first glow of morning and around which tenderly lingered the last beam of the evening sun, reminded the elders of the sunnier skies of their once beloved France, and made the life of the younger float like an idyl set to the sweet, monotonous melody of whispering trees and the still music of the ceaseless flow of the mighty river. In heavenly scenes like these, what cared they for the grosser things of life? The earth, air and waters yielded the supplies of nature without

coaxing or cultivation; and Eden, before the fall, was not a happier place—"Mirth, with thee I mean to live" was their motto and they forgot it not. Little dreamed these light-hearted, fun-loving Frenchmen of the great change that was so soon to be wrought in their vine-covered gardens and primitive cabins. And yet many of them are still living, to look abroad upon a vast city, its streets surging with the ever restless throng of trade and the mighty river, on whose beautiful moon-lit banks they danced the gay quadrille, converted into the mart of a continent and the highway of a nation's commerce. Gigantic steamers now moor in the place of the frail bark canoe and rough bateaux, in which the hardy *voyageurs* of fifty years since, pursued their dangerous travels; the lightning-winged train usurps the paths of the patient mule across the plain, instead of peltries and robes from the mountains, bringing the exhaustless treasures of a then unknown land, and teas, spices and the golden products of Far Cathay. Such has been the change witnessed by a generation still living, and in place of the rude hamlet, a city has sprung up, rivaling in wealth, influence, potency and *importance*, many of the most renowned cities of the old world. While a young man dwelling here, Maj. Coons witnessed these gay scenes and the rapid changes taking place around him, and became imbued with the spirit and enterprise of its people. For a long period the American Fur Company made St. Louis one of the principal points of its extensive business; and from here in the spring, annually went forth the long wagon trains of supplies, to the plains, the mountains, the head-waters of the majestic rivers that lave this inland city, to the remote trading-point of Santa Fe, and returned again in the fall, laden with fur, peltries, silver and the rich spoils their emissaries had gathered in.

Of this wealthy and widely influential company the Major became a trusted employe, and, in the year 1827, was sent to the Upper Lead Mines and assigned to a clerkship with Gratiot, Choteaux & Co., a branch of this famous house, located at Gratiot Grove, Wis. Their business was smelting, selling goods and trading with the Indians for furs and Uncle Sam's annuities, and no doubt, at this period of uncertain values, it was found a very profitable one.

Nothing occurred to interrupt their prosperous trade until the spring of 1832, when rumors of an advance of the warlike Sauk (or Sac) Indians, up the valley of the Rock River, became rife in the settlements, and soon culminated in the Black Hawk war. At this critical juncture, no one knowing the magnitude or proximity of the danger that surrounded them, the peaceful pursuits were neglected, and every precaution for safety and defense was taken. Block-houses were constructed, forts built and the women and children hustled into them, and the men organized and armed, ready at a moment's warning to ward off or go in the pursuit of the wily foe. In all these preparations and forays, Maj. Coons took an active part, and, although his valorous deeds were not recorded in every bulletin from the field of battle, as were those of some others less worthy, his services were untiring and highly appreciated by his superiors. His family being removed to safer quarters, the house they occupied at Old Shullsburg—a strongly built log house one and a half stories high—was converted into a place of defense and garrisoned with soldiers. When peace was restored, the family returned, and his eldest son, Henry (the amiable and gentlemanly Town Clerk of Potosi), well remembers playing soldier when a boy and shooting out of the port-holes from the chamber. He was braver then than he is now. Several guns were left by its heroic defenders, and, in handling them afterward, one was accidentally discharged, the contents going through the floor and lodging in the bed beneath, luckily unoccupied, or Henry might have become a "poor motherless boy" for his carelessness.

Maj. Coons was one of a detachment sent out by Col. Gratiot in search of the Hall girls, two beautiful young ladies who were spared at the dreadful massacre of their father's family and neighbors, on Rock River. They were taken captives by one of Black Hawk's roving bands, and a reward of \$2,000 being offered for their rescue, by Gen. Atkinson, they were afterward brought in to the fort at Blue Mounds, by three Winnebago Indians, who received the reward, but being suspected as spies, were ordered from the fort and to proceed at once north of the Wisconsin. The girls were in a most destitute and forlorn condition, but received the warm sympathy of the ladies in the fort, by whom they were properly clothed and soon after restored to their friends.

Peace being finally restored by the capture of Black Hawk and the destruction of his band at the bloody battle of Bad Ax, Maj. Coons was relieved from further duty and returned to private life. He soon after obtained what was called a "smelter's grant" from the Government and removed to Dubuque, which, though not open to settlement, was fast being filled up with miners, tradesmen and adventurers. He built his furnace on the Catfish, near the present site of the Rockdale Mills. Here he enjoyed the confidence of the miners, and did a lucrative business, though paying thousands of dollars to the Government in the shape of rent. His tax rule was afterward reversed and the money refunded, but unfortunately for the Major, he did not give the matter his prompt attention, and to the extent of his loss the Government profiteth.

Belmont, the once famous capital of Wisconsin, next attracted his attention, and here we find him running one of the largest dry goods stocks in the West. During his absence from home, on one occasion, his shrewd and far-sighted wife, took it into her head to visit the land office at Mineral Point, and when the Major returned he found himself the owner of some of the finest farming lands in this section of the country. The strangulation of the young city in its infancy, by the removal of the seat of government to Madison, blighted its future hopes, and determined the Major to find a place of brighter prospects and more commercial importance. That place was Potosi. And thither he came, like Joseph of old, out of the land of Egypt, with his family and his fortune. Hooper, Peck & Scales were then heavily engaged in the mercantile business at Galena, and with them an alliance was formed and a branch house established, under the firm name of Coons, Wooley & Co., in that part of the village of Potosi then and still known as Lafayette. Here, in 1836, the Major erected the first frame store building in Potosi, shipping the material for its construction from Cincinnati by the way of the Ohio River. It stood immediately above the residence of the late James F. Chapman, though now reduced to the menial grade of horse stable on the farm of Nick Bonn. Its internal arrangements and finish were a marvel of beauty and elegance. Piles of valuable goods adorned its shelves and counters, and its capacious cellar and wareroom were plethoric with staple groceries and choice liquors. But, alas! for things material as well as things spiritual! The disease of debt was already fastened upon the vitals of the parent house, and the offspring was not exempt from its taint. The credit system predicated upon the inflated, worthless currency of the Illinois banks, had collapsed. Gen. Jackson had issued his famous specie circular, and down to this rock basis all must come. No man or firm in business could withstand the wild tempest of bankruptcy and disaster that swept through the length and breadth of the land. All toppled and many went down. Hooper, Peck & Scales tried to weather the storm, but it was of no use. The proud firm and its dependencies were taken from their anchored foundations, twirled in the air, and dropped in one common wreck. Some of the members emerged from the ruins with a few dislocated joints and bruised limbs, but poor Maj. Coons was a cripple for life, and almost a penniless man. He never overcame the shock or recovered from the deep injuries. Quietly and unostentatiously, he pursued the even tenor of his life, gaining, as best he could, a livelihood and an education for his little family—till, wearied at last with the unequal struggle, he bent his proud form and "slept with his fathers." Well do I remember the hour and the event; and when they told me the old man had passed from his humble home to his heavenly rest, I said within myself, It is well—a true, a warm and generous heart hath ceased to beat; a kind, a just and upright soul has burst the prison bars of death, overcome the rough and rugged storms of life, and found a shelter in a happier home.

"Methinks I hear the parting spirit say
It is a dread, an awful thing to die."

Oh! no, it cannot be. No vain regrets; no sorrowing words e'er linger round the dying lips; no tears bedew the eyelids of the dead. Affection, love, forgiveness, faith and hope the faltering voice and failing breadth alone imparts; and on the marble cheek the smile of love and hope immortal reigns. And so he died. Twenty years—swift, fleeting, ever-hurrying years of time, have fled since then, and still in loving hearts his memory lives embalmed. Although he sleeps within a lonely dell, far from the busy walks and strife of men, the wild rose blooms around his

grave; the feathered tribes of spring pour forth their sweetest notes, and come to build their nests amid the quiet trees; the dews of Heaven fall gently o'er the springing grass and budding flowers; he hears, he heeds, he knows it not; yet, from this lonely bivouac of the dead comes forth the fragrance of a noble life, and sheds its hallowed influence around the name, the grave of John B. Coons.

M. DE TANTABARATZ AND THE DESERTED VILLAGE.

BY J. W. SEATON.

Paris, not the brilliant metropolis of France—the city of prisons and palaces—renowned for its gay boulevards and dark Rues—the mistress of fashion and the mother of communism—but its namesake on the Platte, the little waif that perished in its infancy thirty years ago. It was, and still remains, a strange, sequestered spot. Its site was a point where, through pine crowned hills and widening meadow bottoms, the Big Platte joins its main tributary of the same name with the diminutive prefix. Here, their confluent waters reflecting the dark foliage of the native trees which cover its green banks, and casting the shadows of the high, receding bluffs far up the slope on either side, mingle in silence, and in those days formed a channel sufficiently wide and deep to float the largest craft that ever came up from the Mississippi, the distance of five miles below.

This virgin purity is disturbed and the calm shadows broken by the sharp prow of a heavy boat that makes its way slowly up the placid waters of the united river. The squirrel with noisy chatter makes a scampering retreat to the safe security of a lofty tree, and from its tall tower scans with curious eye this unwonted presence. The birds flutter, astonished and amazed, to a neighboring thicket. This intrusion is unparalleled.

Tou Le Jon contemplates with a smile these retreats of the animal kingdom before his presence, and moves on up the river till he comes to the place of its separation. Casting off a line and making it fast to a large cottonwood, the boat's crew go ashore, and while they are engaged in preparing their first meal in the wood, Tou Le Jon has surveyed the ground, mapped out the place, and commenced the work of founding a city. A few months pass, a clearing has been made, streets, public squares and grand avenues have been staked off and defined, a log shanty or two has been built and Paris on the Platte has become an historical fact.

From this date, 1828, we mark its rise, progress and decline, comprising a period of barely two decades. Tou Le Jon has money, and, under the quickening influence, Paris soon grows into respectable proportions and notoriety. A smelting furnace, a store, a two-story frame hotel, a public boarding-house, built from hewn logs, with a long porch in front, were among the few noticeable buildings first erected. If some ancient survivor of the place should chance to read this sketch, and take exceptions to its topography, I beg leave to remind him here that all history is involved more or less in doubt or obscurity, and when it depends upon oral traditions for facts, a few discrepancies and achronisms are unavoidable, however much the writer may aim at accuracy and truth. There are but few living now who have carried the early history and events of the mines so freshly in their memory that they can relate them with any degree of certainty, or without committing some serious mis-statements as to time, place and persons.

Coming down to the year 1830, I find the name of De Tantabaratz, (sometimes called Detan and Detantebar for short) has usurped the place of and overshadowed all others in the history of Paris. He was the Napoleon of his time, whose single name involved the history of all others, and gives form and luster to the age in which he lived. He was a young man from St. Louis, and came as an assistant clerk in the establishment of Tou Le Jon. He had not been long there when he arose to be chief manager, and soon succeeded to the control and ownership of the whole concern. Enterprising, prompt, active, generous to a fault, and possessed of an unlimited credit both in Galena and St. Louis, he apparently prospered, and under his sway Paris flourished and became a lively prospective city. The peculiarities and generousities of the man soon became proverbial throughout the mines, and the influx of trade, pleasure, amusements and business centered around his name. At balls and parties, horse-races and public gatherings

Detan was seen to put in an early appearance, and was a bright, particular star upon the occasion until (as it sometimes happened) he got a little obscured by too much wine. Then some friendly hand would put him in his little "bunk" and "nature's sweet restorer, balmy sleep," would soon make all things fair and lovely. The ladies smiled in his presence and courted his company, because they saw husband, home and family joys reflected in his countenance, and the men did the same for the more potent reason that he was a whole-souled, jolly, good fellow, from whom they could get the loan of a dollar, a suit of clothes or a mining "stake" on credit. At this time, David G. Bates was well-known throughout the mines as a wealthy, influential citizen of Galena. He was the owner of much valuable property, made advances on lead, operated a furnace, ran a store, and was regarded as one of the solid men of the place. In the usual course of business, Detan became intimately acquainted with him, and as acquaintance often ripens into confidence, the two were soon upon the most confidential business terms. Bates was a money-lender upon occasion, and Detan often had occasion for the use of large sums of money. While everything remained smooth and promising, Bates advanced him freely. But there is a tide in the affairs of men which, if not wholly scanned, leaves them night and day on the shores of poverty. It was likely to be so in the case of our hero Frenchman and Bates, as a careful man began to look after him and his affairs. This led to a coolness between them, an altercation followed, and finally open hostilities. The *casus belli* is not apparent at this distance of time, and I will not attempt to explain it, but it was given on the part of the Frenchman, and resented by his quondam friend and backer. Bates, being a man of Southern birth and education, could only be governed in the settlement of the dispute between them by the rules governing all Southern gentlemen, laid down in the code of honor. Accordingly, he challenged De Tantabar to mortal combat. The latter readily accepted the challenge, thinking, no doubt, thereby to cancel a debt of honor and an honorable debt at one and the same time. He knew nothing, however, about the use of the chivalrous weapon, the pistol, but had handled the broadsword and was skilled in the art of its use. He had served in the Horse Guards of Napoleon in some of his later campaigns—had fought at Wagram, Austerlitz and Waterloo, and cloven the head of many a luckless grenadier. So for that matter was not afraid to fence with Harry Lorraquer, and could thrust with the deadly accuracy of a Spanish guerrilla. Being the challenged party, the choice of weapons was left to him and he chose, as may readily be supposed, his favorite one, limiting the fight to broadswords on horseback at close quarters; the place of meeting to be on the banks of the Fevre River, somewhere near the site of the present woolen-mills. The affair soon became public, and was bruited over the whole mines. The belligerents were both men of reputed wealth and standing, and one at least a known professional in the *Code Duello*, therefore it created at once a widespread sensation, and a decided interest was immediately manifest on all sides.

There being no penal or other law in force at this time to prevent these bloody encounters, no place of private meeting was selected and no secrecy enjoined. All was done openly and above board. Here and there squads of men might be seen openly discussing the cause of the quarrel, the right and wrong of the issue, the knowledge each was supposed to have in the handling of weapons, the chances of either's success in winging or killing his antagonist were talked about as a matter of common sport, and each arranged himself upon the side as he happened to be friend or foe. The nearest and only law official in the mines at this time was Hugh R. Colter, late Probate Judge of Grant County, and he was only a Justice of the Peace, holding a commission from Gov. Lewis Cass, of Michigan, his court (if it had reached that dignity) being held at White Oak Springs. His business was to call a jury to settle mining claims, make collections, hold inquests on mysteriously dead men, and attend to such other matters as might afford a liberal compensation for the small amount of legal stock kept on hand. Police and other preservers of the public peace being a figment of a more recent civilization, were then unknown and unneeded. Cabin doors were never locked, and petit larceny was a crime that could not be committed, as every man was at liberty to walk in and help himself to whatever could be found or his necessities might require. But to return to my legend. There was

no law in these days that white men were bound to respect but the law of right and justice, and woe betide the man who violated its provisions or undertook to intercept its execution. Consequently the preparations for the meeting to adjust the difficulties in this case were uninterrupted.

From the bottom of an old sea-chest, Detantabar draws forth the jeweled relic of his young valor, which he has religiously kept and guarded all these days, and as he draws the gleaming blade from the sheath, and remembers the blood which he has scrupulously wiped from its shining surface in former times, his black eye kindles, the warm red blood goes bounding through his veins, and once more he is anxious for the fray.

On this memorable occasion, Free Williams (who does not know Free? a living archæological monument of the mines standing in Ellenboro) espouses the cause of the French; becomes the friend and adviser of Detantabar; and in this connection has given his name to posterity if not to immortality—*Sic itur astra*. He immediately puts his principal in training, but after a few passes (in which Free uses an imaginary sword in shape of a walking-stick and becomes *hors de combat*), Free satisfies himself of Detan's ability to cope with his adversary in the coming struggle and rests upon his laurels.

On a cold, bleak, windy morning in the month of April, in the year 1830, "two horsemen might have been seen" riding leisurely along toward the village of Galena. The mud was very deep, and, as yet, the plank road leading out to the Four Mile House had not been built; and, for that matter, the Four Mile House. In the absence of the latter, and the lack of definite information as to the number and distance of "cool springs," the riders would frequently halt by the wayside and refresh themselves from a willow-covered flask that each in addition to the other means of defense, carried in a deep side pocket. The one of medium stature and heavy set, sparkling black eyes, aquiline nose and ruddy complexion, is none other than the hero of the coming fight—Monsieur De Tantabaratz, of Paris, *Sieur le Platte*. He rides his horse like one accustomed to the saddle, sitting erect and adjusting himself gracefully and easily to the movements of his animal as she moves forward at a gentle pace. The other, mounted on a similar colored animal, which he bestrides with the freedom of a moss trooper of the last century, when scouring the borders for the King's red coats, is no other than our friend Free Williams, of Ellenboro. No sword was attached to his thigh, though the strict laws of duelling demand that the second should be armed in like manner to his principal. But Free was never a cavalryman in Napoleon's army; he had only been a scout in the Black Hawk war—and that happened two years later—and he had not yet received his sword. In this dilemma, he did, as every brave and sensible man has done before and since, the next best thing. He armed himself with a couple of huge navy pistols which he had borrowed from an old salt, and which were now gracefully swinging from the horn of his saddle. Behind him were fastened a pair of large saddlebags, containing—well, no matter what; the true Missourian on horseback always carries this truly convenient receptacle of miscellaneous plunder. He can't ride without it. It would despoil the seat of his cogitations and upset the equilibrium of his quadruped. Thus mounted and equipped, the twain enter Galena, and, riding up in front of Billy Bennett's hotel, where a large crowd have already assembled, report themselves ready for business. Both dismount, and, throwing their bridles to the bystanders, enter the nearest saloon and call for Bourbon straight. Having thus in a degree fortified the inner man and lifted their spirits to an elevation above the fear of danger, they remounted their horses and rode off, accompanied by the crowd, to the field of honor, where an equal number of spectators have already collected. Leaving his principal in charge of friends, Free advances to the front. He takes in the situation at a glance, draws from the right hand holster one of his "man-killers," loaded to the guard with buckshot, swings it above his head as he brings his fiery charger to a pose upon his hind legs, and proclaims from his stentorian lungs that the time has arrived when there must either be a fight or a foot race. Bust, the second of Bates, who is already in waiting, responds to the call and announces the presence of his principal, but protests against the barbarity of using cold steel when the pistol is the only authorized and legitimate weapon used between gentlemen upon such occasions.

Free don't see it in that light, and takes a big oath that he will blow them all to H—(arper's Ferry) and back again if they do not immediately set up their man and let Detan hack him down like a dog. It is a perilous moment. Bates and his friends, however, are not to be inveigled into so unequal a contest as is now clearly presented before them. They see "death in the pot"—and in the cool, quiet reserve of the Frenchman, and the glittering steel that he knows well how to wield, a disgraceful disarmament in the first encounter, ugly gaping wounds and perhaps death and the grave. To one, however brave and undaunted in the presence of danger, these thoughts, when he himself is the subject of them, produce a subduing influence. It was so now. The friends of Bates come to his rescue and solicit a conference. It is granted. The belligerents are brought together, mutual explanations follow; the offensive language is withdrawn, and the maudlin crowd who had come to witness the fun, disappointed and chagrined at the unexpected and pacific turn of events, like "my Uncle Toby," utter a curse on all cowards in general, and Bates and Detan in particular, then adjourn to Patrick Connor's saloon on the levee, to slake their sorrows in the Lethean draught.

Having thus honorably vindicated himself in this delicate affair, in which he displayed a remarkable degree of coolness and self-possession, Detan, accompanied by his ever-faithful valet, returned triumphantly to his home on the Platte. His fame now grew brighter than ever, and wherever his name was mentioned, it was always with that due reverence that attaches to manly bearing and undisputed courage.

Confidence was again fully restored in his business relations, and, for a number of years, Paris continued to grow and flourish. A catastrophe, however, was fast approaching that was to extinguish its name and fame forever. The year 1837 was one memorable in the history of the county for financial ruin and devastation. All classes were more or less involved, the business of the country, East and West, being transacted upon a credit basis. This being removed by the effects of the famous specie circular, and the removal of the Government deposits from the banks under the administration and bold action of Gen. Jackson, depression, failures and calamities followed in rapid succession. From this time forward, Paris began to show signs of weakness and decay. Potosi, which had first started at La Fayette, on the banks of the Grant River, had shot up like a meteor to the "Head of the Hollow," and in prosperity was now rivaling and bidding fair to become a bigger city than Dubuque. The Sun of another Austerlitz was now about to set on another Frenchman besides Napoleon, and with a weakness that once manifested itself in the mind of the great Emperor, De Tantabaratz, knowing the desperate condition of his affairs, and seeing no escape from the disgrace of failure and the horrors of consequent poverty, contemplated that act of self-destruction, attributed then as a disease of the French nation, but now thoroughly Americanized and fearfully prevalent in the land, which, in the summer of 1842, he carried into execution in a peculiarly sad and fearful manner. Desmoulie (called Demoole), a silvery-headed old man who had come, too, from the vine-clad hills of France, with his pockets full of *Louis d'Ors*, was regarded as a solvent partner in the firm of De Tantabaratz, and through his means the credit of the firm was long sustained. Among others, a Galena merchant, named Hempstead, having made some heavy advances on lead, came up one day for the purpose of investigating matters, and, if possible, securing himself from the probable contingency of loss. He broached the subject to De Tantabaratz in a manner at once opprobrious and insulting, and finally, in direct language, accused him of falsehood. The delicate feelings of the noble-minded Frenchman were deeply hurt—too deeply for resentment. He merely replied, "Mr. Hempstead, you are the first man that ever accused me of falsehood and you shall be the last." He came to Potosi, purchased a rope and some tall candles at a store, passed out, and was seen no more—alive.

His mysterious disappearance excited the deepest concern; some alleged that he had absconded with a fabulous sum of money and gone to France; others, that he had been foully dealt with, while yet others charitably suggested that he had gone to St. Louis on urgent business, got on a spree, and would soon return. Time sped on, and there came no knowledge of his whereabouts.

To the west of the present road leading from Potosi to Galena, not far from Archer's Ferry, there is a deep, dark ravine extending up a mile or so in view of the bluffs that front upon the river. It is still, as it was then, a dismal, unfrequented place. God's sunlight never reaches it, no cheering ray ever penetrates within its gloomy precincts. Led by that mysterious or unseen power that brings to light the hidden crimes of human life, and often unveils the secret of the murderer's heart, a hunter, bewildered on his way, found himself within this wild and cheerless place. As he hurries along half-alarmed and wholly bewildered, he sees, or imagines he sees, the body of a man suspended from the elbow of a deformed tree. Fully convinced that it is no phantom of the brain, he recovers his courage and advances nearer to the swinging body. Dissolution already marred the face, yet he could not be mistaken—the form, the well-known garments, so neatly folded and laid aside. It was, indeed, poor "De Tantabar." He had seen no escape from the scorn that follows blasted greatness, and here, amid the stern rocks and silent woods, he had launched his bark into the sea of eternity.

From that time, an evil genius seemed to hover over the city on the Platte. Gradually it was outstripped by its younger and enterprising rivals, and fell into decay. To-day its deserted houses stand solitary and forsaken—a roosting-place for "bats and owls," while the fateful shades

"Glimmer as funeral lamps,
Amid the chills and damps
Of the vast plain where Death encamps."

ASA EDGERTON HOUGH.

Mr. Hough, who takes rank as one of the oldest pioneers of Grant County, was born at Lebaun, N. H., that old Granite State whose noble sons are to be found in every portion of the Union. He received a fair education, and, at an early age, entered the counting-room of Benjamin Dodd & Co., of Boston, at that day large merchants and extensive ship-owners. At the age of eighteen, young Hough was sent out as supercargo of one of the vessels belonging to the firm. At the age of twenty-four, he was a Master, and, in this capacity, followed the sea for two years, when he went to Washington and engaged in mercantile pursuits, which he followed with success for two years longer, when a fire not only burned up all he had, but left him many thousand dollars in debt. During his residence in Washington, he had succeeded in making friends of many of the leading statesmen of the day, among them, Clay, Webster, Calhoun, Benton, Van Buren and Gen. Jackson. After the fire, he immediately took his family, consisting of his young wife and son, and came to St. Louis. The contracts for supplying the military posts on the Upper Mississippi being then advertised, he put in bids and secured most of them for the posts of Fort Armstrong, Rock Island; Fort Crawford, Prairie du Chien; and Fort Snelling, then just being built. Steamboating was then a new business on the Upper Mississippi. Mr. Hough, however, chartered the steamer Rover, a boat of eighty or ninety tons measurement, but considered a first-class boat for that day, and, with a couple of barges, transported the supplies to these forts, taking back lead from Galena. In a few months he found himself out of debt, and with sufficient cash to again start in business, which he did in St. Louis. He remained in that city until the year 1827, when, in company with other gentlemen, he came up the river to Galena in a pirogue, and afterward started a smelting furnace at a place he named Gibraltar, on the Platte, and set men at work clearing away the ground preparatory to the erection of a saw-mill, which he built in 1828-29; the first mill, probably, ever built by private persons in the present State of Wisconsin. The same year, a post office was established at and known as Gibraltar, it being the only one between Galena and Prairie du Chien for many years. In 1832, Mr. Hough took part in the Black Hawk war, and was at the battle of Bad Ax. He continued in the smelting business until 1834, when he closed up this branch of his undertakings, and moved his family to his mill where he resided until 1845, the year before his death, when he removed to Potosi, where he died in 1846.

Mr. Hough was a man of more than ordinary intelligence. He had a passion for books, was a close student, and became a fine scholar. He was a man of medium stature but of com-

manding presence, and his opinions were always listened to with respect. In business, he was a straightforward, open man. He had little patience with what are generally known as sharp traders, and abominated a falsehood. Politically, he was a Whig, and, like most Whigs of the day, became almost sick when he heard, through the old-fashioned, slow mail-coach, that Pennsylvania had gone against Mr. Clay, and that James K. Polk was elected to the Presidency. Mr. Hough was a man of strong opinions, but of generous and charitable impulses; a man of remarkable polish, and easy, graceful manners, he held fast to his own opinions while treating those of others with respect, and held his friends with hooks of steel. Among the latter was Gov. Duane Doty.

During the years that Mr. Hough resided at his mill, he became an extensive hog and cattle breeder, and much of the fine stock in Southwestern Wisconsin can still be traced to his herds. He also was a careful student of the leading agricultural journals, and sent for seeds, and experimented with them, and thus introduced those most desirable in the country. He was among the first to introduce and successfully cultivate the Bowles' dent corn. At that day corn-raising in Grant County was looked upon as more uncertain than it is at present in Minnesota. When Mr. Hough came West, Dubuque, as a promising town, was unknown; to-day, his remains rest quietly in the elegant cemetery at that city.

JEHIEL H. HYDE, M. D.

Although not one of the "old settlers" of Grant County in the stricter sense of the term, Dr. Hyde was so prominently identified with it for some fifteen years as to entitle his name to a place among those who have made their mark upon its society and institutions. He was a son of Luther Hyde, of Highgate, Vt., well known to many of the citizens of Grant County, who were formerly from that vicinity, and was born at Fairfield, in that State, July 29, 1812. His early life was spent upon a farm until he arrived at a proper age to pursue his studies, in preparation for professional life, for which he was always designed.

Turning his attention to the profession of medicine, he studied with Dr. Hall, of St. Albans, and attended medical lectures at the Vermont Academy of Medicine at Burlington, and was graduated at the University of Vermont in 1834. He commenced his practice at Hardwick, Vt., but soon afterward removed to Michigan. Here he was one of the pioneers, and endured the hardships and privations incident to the settlement of a new country in those days—remote from the appliances of our modern civilization, and subject to the influence of the malarial diseases for which that State at that stage of its settlement was noted. Here he pursued the practice of his profession for a number of years, and in 1839 married Sarah A. Bennett, of Leona, Mich.

Finding that his constitution could not withstand the climatic influences, he returned, in 1840, to his native State and practiced his profession at St. Albans and across Lake Champlain, at Potsdam, N. Y., for some nine years, his health becoming re-established. In 1855, he came to Lancaster on a tour of inspection, and a visit to his brother, already resident in that village. His professional services were at once in demand, even before he decided to settle here, which he did soon after, and speedily established a high professional reputation and a lucrative practice. For many years Dr. Hyde was the leading surgeon of the large territory embraced in the limits of Grant County, and was often called upon to perform difficult operations, or to meet his professional brethren in consultation, in every part of the county. The roads were at that time in a very imperfect condition; many miles of those he was compelled to travel at all hours of the day and night were mere paths through the woods. With such a practice, under such circumstances, exposure was inevitable, and in time led to the development of the hereditary disease which finally terminated his life—pulmonary consumption. In 1867, his health began to fail and in the following year he removed to Minneapolis, Minn., where he spent a year, in hopes that the change of climate would prove beneficial in arresting the progress of the disease from which he was suffering. Finding that his hopes were not realized, he returned to Lancaster in the spring of 1869 and purchased a residence, which, however, he occupied but a few

months before his disease had run its course, and on December 7, 1869, he was called hence. He left no children, his immediate family consisting only of his widow and her niece, who had been adopted as a daughter. A number of his brother's family connections, however, are still resident in Lancaster and other parts of the county.

Dr. Hyde was in the front rank of his profession in Wisconsin, his surgical skill being perhaps unexcelled by that of any physician in the State. During the war he was employed in the Provost Marshal's Department at Prairie du Chien, in which capacity his thorough anatomical knowledge was of much service to the Government. He has appointed by the Commissioner of Pensions to the position of Examining Surgeon, which position he held until physical inability compelled his resignation.

Dr. Hyde was a high Mason, having attained to the Royal Arch degree and perhaps higher, and was well skilled in the mysteries of that fraternity and of high repute as a Master of the craft, having held the position of Master of Lancaster Lodge No. 20 for twelve years. The high estimation in which he was held by his brother Masons was well shown by the Platteville, Potosi, Beetown and Lancaster Lodges, and Grant Chapter of Royal Arch Masons, which, notwithstanding very unfavorable weather, attended his funeral in bodies, as also did many brethren from other parts of the county, and interred his remains with the impressive ceremonies of their order.

THOMAS PENDLETON BURNETT.

Mr. Burnett was born in Pittsylvania County, Va., September 3, 1800, and was reared from early childhood on a farm in Bourbon or Spencer County, Kentucky. During this time, he obtained such instruction as he could by the aid of an academy and private instruction from neighboring gentlemen, laboring with his own hands, and afterward teaching, to acquire the means of support while prosecuting his studies. "While reading law, he was favored with some minor offices, such as Constable, Deputy Sheriff, Sheriff, etc., from the fees of which he derived a scanty means of support." Soon after his admission to the bar, he settled at Paris, Ky., where, in the practice of his profession, he is said to have been brought in contact, and often into professional collision, with some of the ablest lawyers in that State. For two years he filled the office of District Attorney. After the accession of Gen. Jackson to the Presidency in 1828, Mr. Burnett, who had been a warm partisan of the General, received October 15, 1829, the appointment of Sub-Agent in the Indian Department, to reside at Prairie du Chien. An accident which occurred soon after, when he was laboring with characteristic zeal and courage to resist the progress of an extensive fire at Paris, and which resulted in crushing one of his legs, confining him to his bed or his room for seven months, and leaving him a cripple for life, determined him to accept the appointment, far as it was below his hopes, rather than attempt to regain his practice after his long illness; and a severe domestic misfortune aided in procuring this decision. Arriving at Prairie du Chien in June, 1830, he found "but two or three American families in the place, except in the garrison at Fort Crawford. The major part of the inhabitants, four hundred in number, were Canadian French and half-breeds, who spoke only French with some Indian languages, all of which were to him unknown tongues." Mr. Burnett was at first disappointed in the country, the people, and the duties of his office, but upon better acquaintance became strongly attached to them all. To the employments of his agency—the salary of which was only \$500—he was permitted to add the practice of his profession, in which he soon obtained some business, including suits prosecuted in behalf of the Government. In 1834, his connection with the Indian Agency ceased, and he devoted himself more completely to the practice of his profession. Some question having been made as to the existence of a vacancy in the office of District Judge, on account of the alleged non-residence of Judge Irwin, Mr. Burnett's appointment to the office was strongly urged upon the President; but the latter did not recognize the existence of a vacancy. In January, 1835, Mr. Burnett was appointed by Gov. Mason, of Michigan Territory, District Attorney for the counties of Crawford, Iowa, Dubuque and Des Moines; and he attended the summer terms of the courts in those counties; but finding it "inconvenient and unpleasant," tendered his resignation to Gov. Mason, Sep-

tember 10, 1835. In October following, he was elected to the Legislative Council of Michigan Territory, which was appointed to meet at Green Bay, and, on the meeting of the Council in December, he was chosen its President; but the meeting, which was of doubtful legal validity, was a practical failure. Congress was, however, memorialized at this session in favor of a speedy organization of the Territory of Wisconsin; and a memorial to the President of the United States in reference to the offices of the contemplated Territory, urged upon him the appointment of its own citizens in preference to persons from other parts of the country. As it was understood that Gen. Dodge would be appointed Governor, Mr. Burnett was urged as a suitable person for the office of Secretary. "If the Secretaryship could not be obtained," we are told, "Mr. Burnett desired a Judgeship;" that is, he desired to be appointed one of the Judges of the Supreme Court of the Territory, and his friends in Congress, Col. Richard M. Johnson, of Kentucky, and Col. George W. Jones, then Delegate from Michigan Territory, and through their influence Senators Benton and Linn, of Missouri, and Senators Wright and Tallmadge, of New York, earnestly, though unsuccessfully, sought to secure his appointment to one of the two offices named. About the same period, Mr. Burnett is said to have become a member of the Four Lake Company, organized under the lead of Gov. Mason and Mr. Doty, for the purpose of laying out a city in the Four Lake region, which should become the capital of the new Territory.

By the appointment of members of the First Legislative Assembly of the new Territory, as made by Gov. Dodge, upon the basis of a census taken in 1836, Crawford was allowed two members of the House of Representatives, but no member of the Council. The people of that county claimed that, under the organic act, each county was entitled to be represented in each House; and Mr. Burnett was unanimously elected by them to be a member of the Council. The full number of members authorized by law had, however, been chosen in other counties, pursuant to the Governor's appointment and proclamation, and very naturally Mr. Burnett's election was not certified by the Governor, nor was he admitted to the seat he claimed. During that session of the Legislative Assembly, Mr. Burnett was nominated by the Governor, and confirmed by the Council, as District Attorney for Crawford County, but this was done without his knowledge, and he subsequently declined the appointment, on the ground that the Council "was not legally organized, and that it had not therefore the lawful authority to perform any valid and binding act." This characteristic protest echoed the displeasure of Crawford County at the failure of Gov. Dodge to give them a representation in the Council. Whatever may have been the merits of their claim, it is needless to add that the objection of Mr. Burnett, if sound, would have been fatal to the validity of all acts passed by the First Legislative Assembly, which have, nevertheless, always been treated by the courts as valid. Upon the organization of the Territorial Supreme Court in December, 1836, on the motion of D. G. Fenton, Esq., Mr. Burnett was appointed as its official reporter, a position which he held until his death, some ten years later. The decisions of this court to the close of the term of 1840, were prepared by Mr. Burnett, and published in 1841 by the direction of the Legislature, as an appendix to a volume containing the acts of a regular and a special session of the Legislature. The decisions of 1842 and 1843 were published by Mr. Burnett in a separate volume in 1844.

In 1837, he had removed from Prairie du Chien to Cassville, in Grant County, and subsequently moved to a farm in Mount Hope, on the line of the old military road from Fort Crawford to Fort Winnebago, which he had selected and embellished with taste and care for his permanent home, and to which he had given the name of "The Hermitage." Field, garden and lawn were already taking shape under his eye and hand. A dwelling of stone was planned to take the place of the comfortable log cabin, which had been erected for temporary occupancy. In the winter of 1844-45, and again the succeeding year, Mr. Burnett had served in the Territorial Legislature as a member of the House of Representatives from Grant County, and upon the election of delegates to the first Constitutional Convention in 1846, he was chosen as one of the county's representatives in that body. Mr. Burnett had been confined at his home by disease for some months before the meeting of the Convention in October, and it was not until

the 14th of that month that he took his seat. He was assigned a position as a member of the Committee on Corporations, where he served for about three weeks. October 25, he was recalled to his home by the intelligence of the alarming illness of his wife from typhoid fever. A wagon-ride of eighty-five miles, commenced after an exhaustive day's work, brought him to his home, only to be himself struck down with the fever. Himself, his wife and his aged mother, who had recently come from Kentucky to spend her last days with him, lay prostrated by the same disease, under the same roof and within hearing of each other. "The mother died on the 1st of November, the husband and the wife on the 5th, and on the 7th of that month, when the evening shadows fell on 'The Hermitage,' the bodies of the three reposed side by side, 'in a beautiful grave at the head of the garden,' " in a spot that the owner had chosen as the burial-place of the family.

On the 10th of November, his colleague, Hon. J. Allen Barber, announced Mr. Burnett's death to the Convention. That body, thereupon, adopted resolutions of condolence, respect and sympathy, to go into mourning by wearing crape on the left arm of each member for thirty days, and adjourned over one day out of respect to the memory of their deceased brother.

Mr. Burnett had acquired great prominence during his comparatively brief career. He was a worthy and valued citizen, eminently gifted, intelligent and useful. "His death created a profound and painful sensation over the entire Northwest, where he had been so well and favorably known."

CHAPTER VII.

GRANT COUNTY WAR HISTORY.

GENERAL HISTORY—SAVING THE COLORS—COMPANY C, SECOND WISCONSIN VOLUNTEERS—THE DRAFT—SKETCHES OF THE REGIMENTS—ROSTER—SOLDIERS MONUMENT.

GENERAL HISTORY.

Old Grant is proud of her war record, and well she may be; but before proceeding to the stirring events of those perilous years commencing at Sumter, April, 1861, and ending at Richmond in April, 1865, it is necessary to review briefly the political history of this section for the years preceding. Originally settled by natives of the Southern and Southwestern States, Grant county followed during the period of early political warfare the logical sequence of this emigration and was politically Democratic. Free-Soilism and later Abolitionism, met with a chilling reception, those of that stripe of opinion, whatever they might think, indulging but seldom in the liberty of free speech on their new-born creed. Gradually the tide began to turn. At the Presidential election of 1852, the vote of Grant County stood Scott (Whig), 1,341; Pierce (Dem.) 1,379; a majority for the latter of 38 in a vote of 2,720.

Between this election and the Presidential election succeeding it, was born the Republican party. The first vote of the new party being just *eighteen* in the whole county. Grant County began to feel the pressure of the new dispensation. She shook off the thralldom that had bound so many millions in the dust for ages, and at the election of 1856 rolled up a majority of 1,204 for John C. Fremont, the Presidential nominee of the young party, out of a total vote of 4,404, the returns showing Fremont, 2,809; Buchanan, 1,419; Fillmore, 1,866. Still the light continued to spread. The new party repulsed, but victorious even in defeat, gathered itself for the second attack upon the rock-rooted sophisms and enormities behind which the monster idol, slavery, stood entrenched. Again the battle of the ballot-box is fought and Grant County returns a majority for Lincoln, the "rail-splitter of Illinois," of 1,955, out of a total vote of 5,534. Lincoln receiving 3,579 votes; Douglass, 1,922; Breckenridge, the candidate of the Southern Slaveholders, 33, and right here is found the secret, if secret it be, of that later outpouring which made "Old Grant" one vast camp.

At this time, however, the witches' kettle which was so soon to send its boiling hell-broth of treason in a blasting flood over the land was as yet only simmering. The plans of the conspirators had not been perfected to that later ripeness which came so near accomplishing the task to which traitors had set themselves, of rending the glorious old Union in sunder, where-with they could patch up, for a time, at least, a slave empire around the Mexican Gulf, with the North as a dependent tributary. With cool calculation and a hypocritical knavery never excelled and rarely equaled, the leaders in the damnable plot laid their wires and quietly prepared for the rise of the curtain upon the first act of the terrible drama, which was to hold the boards for four long, weary years. Confident of their power, steadfast believers in the moral, physical, and intellectual supremacy of the South, the traitor council fondly expected that this, the first act, would also be the last. Blind in their self-conceit, puffed up by the power which they felt, even now, almost within their grasp, the would-be destroyers of the republic of Washington, Jefferson, Adams, and the fathers, failed signally in their estimate of the Northern people.

The proper moment having arrived, South Carolina led the way by the passage of a formal act of secession on the 20th of December, 1860, followed by the seizure of the forts, arsenals and other property of the nation within the State. This action was speedily followed by

other States of the South, and the North awoke to the stern fact that Rebellion, gaunt, fierce, and grim, stalked with traitorous feet through the length and breadth of the land.

Carolina's action had not gone unnoticed; although deaf, the North was not blind, and at the session of the different Legislatures in 1861, resolutions more or less strong told the temper behind. At the session of the Wisconsin Legislature on the 9th day of January, resolutions denouncing the action of South Carolina and offering to the President "men and money" as might be required "to uphold the authority of the Federal Government," were adopted and preparations made for the struggle which the more prophetic saw standing in the pathway of the future.

On the 14th of April, 1861, was received the news of the fall of Sumter and as one man the whole North sprang to arms. The nation was in danger. The Union assailed by vandal hands, and on all sides was heard but one cry—the cry to be led against the traitor bands who had thus dared to dim the luster of our star-flecked banner.

President Lincoln issued his call for 75,000 men on Monday, April, 15, and it was followed by Gov. Randall the next day, by a proclamation to the people of Wisconsin, authorizing enlistments.

Previous to the breaking-out of the war, a military company had been in existence, of which George B. Ryland—now Senator Ryland—was Captain, his First Lieutenant being John B. Callis. Immediately upon the reception of the President's call for troops, Richard Carter, a resident of Lancaster, but at the time serving as a clerk in the Legislature, started for home bearing the notice to Capt. Ryland that his company would be accepted for service. Stopping at Boscobel, Carter met Lieut. C. K. Dean, and that gentleman caused the circulation of notices of the call throughout the county, while his informant proceeded to Lancaster. Many of Capt. Ryland's company were not prepared to leave their homes and business at such short notice, and though that organization served somewhat as a nucleus around which to gather the in-coming volunteers, the companies that were afterward formed were organized upon a separate basis. The news thus reached Lancaster on the 18th of April, or two days after Gov. Randall had issued his proclamation. The whole county was at once ablaze with excitement, and by Saturday the 20th, men enough had been enrolled to form the required company. The question soon resolved itself down, not to can we get men enough, but whether we will have a place for all the men we get.

A meeting was called at the court house at Lancaster, Saturday evening, April 20, to take action for the support and protection of the families of those who enlisted. The court house was full to overflowing. J. Allen Barber was called to the chair, and a series of spirited resolutions adopted. A committee, consisting of Ed Lowry, A. Burr and James Jones was appointed to raise money for the support of the families of the enlisted men and for other war purposes. Speeches were made by Judge J. T. Mills and D. McKee, the latter in behalf of the volunteers. A handsome rosette was then presented to the first enlisted man from Lancaster, this distinction falling upon George L. Hyde. He also, probably, has the honor of being the first enlisted man from Grant County.

It was necessary that all should report at Boscobel early Monday morning. Accordingly, volunteers from different parts of the county centered at Lancaster, meeting there at noon on Sunday, the 21st of April.

At 12 o'clock, the roll of the drum called those who had enlisted from Lancaster to "fall in," and they were then joined by the recruits from other towns, when they all marched together to the Congregational Church, where a short service was held by Rev. Mr. Eaton, after which they dispersed for dinner. The freedom of the city had been voted to the volunteers during their stay, and all joined in honoring the brave men who were about to set forth from Old Grant for the support of the nation. In the afternoon, they were taken in wagons from Lancaster to Boscobel.

At the latter place, on Monday morning, April 22, one week from the time of President Lincoln's proclamation, the first company of Grant County volunteers was organized, at 9

A. V. Virginia

LT. COL. 33RD REGT. WIS. VOL. INFY.

PLATTEVILLE

o'clock in the forenoon, by the election of the following officers: Captain, David McKee; First Lieutenant, C. K. Dean; Ensign, William Booth. At 12 o'clock, the Governor telegraphed Capt. McKee that his company was accepted, and must be ready to start at a moment's notice, to which the latter replied, "Old Grant is ready."

By 5 o'clock of the same afternoon, enough names had been enrolled to form another company, and notice of this fact was at once telegraphed to Gov. Randall. His Excellency replied that the company would be officially received when properly organized by the election of officers, although Grant was really entitled to but one company under the ratio. "But," added the Governor, "as Old Grant seldom asks for favors, and never asks for anything but what is right, she is entitled to double glory and honors; let the second company be ready." And at 9 o'clock Tuesday morning, the second company of Grant County volunteers was organized. The officers chosen were: Captain, G. W. Limbocker; First Lieutenant, William Britton; Ensign, J. Bently.

Monday morning, May 5, Capt. McKee's company left Boscobel for Madison, where they were afterward assigned to the Second Wisconsin Volunteer Infantry. The first call had been for three months, but the strength of the rebellion was already beginning to be felt, and the members of the Second were informed that they were to be now mustered in for three years. One hour was given the companies to decide, all those not willing to enlist for this period were allowed to go. One entire company of the Second melted away under this refining process. The "Grant County Grays" lost thirteen men, standing second best out of all the companies composing the regiment, and was the first company mustered in, taking regimental position as Company C, and the color company of the regiment. As this was the pioneer company from the county, its experiences are here briefly noted.

On the 20th of June, the regiment left for Washington, and was the first body of three years' men to arrive at Washington. At Harrisburg, the regiment received its arms. Of the march through Baltimore, at that time apparently a solid den of secession sympathizers, the following account is given by a correspondent of the *Grant County Herald*: "We arrived at Baltimore about 11 o'clock at night, and after forming in line marched through the city in columns of sections for one and a half miles, the sidewalks being lined with people, including many of the most respectably dressed and behaved ladies. Before leaving Harrisburg, our guns had been loaded with ball and buck-shot, and at the Maryland line were capped and half-cocked, ready for instant use. The plug-uglies were all on hand, watching for a chance to wreak their vengeance upon us. We were continually insulted and tantalized by them during the entire march. They cheered for Jeff Davis and his brother gallows-birds, fired two pistol shots at or near us to provoke a collision, but we marched straight on, not a word being said save the words of command. They finally left us near the Washington depot, evidently not liking our firmness and determined aspect. I hear, through Lieut. Gov. Noble, that the general opinion among them was expressed by a secessionist there something like this: 'We could have whipped out any regiment that has gone through here except the Wisconsin Second, etc. We were all anxious and ready to pitch into them. * * The fall of one man would have been sufficient, orders or no orders.'"

On the 2d of July, the regiment was ordered to Fort Corcoran, on the Fairfax road, where they were brigaded with three New York regiments, under Col. (now Gen.) Sherman, and on the 16th, when the movement on Manassas was made, were attached to Gen. Tyler's division, by whom the enemy was engaged at Blackburn's Ford on Bull Run. Returning to camp, the regiment lay in bivouac until the night of the 20th, when they were ordered to prepare two days' rations and march in the morning. The battle of Bull Run, which resulted so disastrously to the Federal forces, had been in progress but a short time when Sherman's brigade came upon the field. The regiment was soon ordered to storm a battery which the rebels had protected by a strong force of infantry. Of this attack the following description is given: "The regiment advanced so near the battery that they were not affected by the artillery, and commenced pouring in a murderous fire. The enemy displayed a Union flag, and the cry was raised

that they were firing on their friends. This mistake was corrected by their officers, when they again began their deadly work. The position occupied by the enemy was alive with men, and a stream of fire poured from the whole line. The boys of the Second Wisconsin stood this fire for some minutes, returning it steadily and with terrible effect, when they fell back a short distance, firing as they went. Rallying again, they rushed back and poured three or four rounds into their opponents. About this time, the regiments in the rear fired a volley into the Second which occasioned its retreat to the road." The Second here became mixed up with other regiments. An attempt was made to rally them, which was partially successful, but the rout then commenced, sweeping the Second away in its hideous flood.

SAVING THE COLORS.

During the panic that ensued throughout the army, the regiment became detached into scattered groups. Just here one of the members of Company C—George L. Hyde—was wounded in the mouth by a ball which passed through the neck. Lieut. Dean and Orderly Gibson assisted him to a place of comparative safety. James Gow, Color Sergeant of the company, hearing of his friend's condition, and being an exceptionally powerful man, went to his assistance, leaving the colors in charge of George Stephenson, a member of Company C, from Beeton, who found it difficult to keep up with the rest and retain the flag. He was charged by some cavalry, but managed to put a fence between him and them. Seeing his danger and the impending disgrace from the loss of the colors, Richard Carter, one of the musicians, and his brother, George B. Carter, threw away their instruments, secured a rifle each and a few cartridges, and "rallied 'round the flag." After four or five attempts to increase their number in the presence of the enemy, a dozen or more of their comrades came to their assistance, and together they beat the cavalry back and secured their flag, and marched on to the vicinity of Centerville, where they found Capt. McKee and also Capts. Strong and Stevens, with a few men. This increased their force to about sixty, and, with colors flying, they marched from Centerville in good order, and were molested no more until they reached Arlington Heights. Stephenson's after career is thus mentioned in "Quiner's Military History:" "Private Robert Stephenson, of Company C, Second Wisconsin, who carried off the regimental flag on the first Bull Run battle-field, and bore it on the 29th and 30th of August, 1862, on the same bloody field, sprang from his bed in the field hospital at Antietam when he heard the skirmishing on the morning of the 17th, and pushed on alone to find his regiment. It was under fire. He reported himself to his Captain, saying, 'Captain, I am with you to the last,' and took the colors, which he held until he was shot down with seven bullets. Corporal Holloway was mortally wounded at the same time. When discovered after the battle, their bodies were found with their heads resting on their knapsacks."

On the 23d, two days after the battle of Bull Run, the regiment went into camp near Fort Corcoran, where they remained until August 27, when they were transferred from Gen. Sherman's command to that of Brig. Gen. Rufus King, which afterward consisted of the Second, Sixth and Seventh Wisconsin and Nineteenth Indiana Regiments, and was known as the "Iron Brigade." Thus organized, they crossed the Potomac on the 5th of September, and, after assisting in the construction of Fort Marcy, re-crossed the river, and, October 5, went into winter quarters at Fort Tillinghast, on Arlington Heights, Va. Here they remained until March 10, 1862, when they took part in the battle of Manassas. Nothing of great importance occurred until the forenoon of the 28th of August. They were marching on the Warrenton Turnpike, near Gainesville, on this morning, when they met the enemy and fought the battle of Gainesville. Of this battle, where the brigade earned the title of "Iron Brigade of the West," we take the following from the author quoted heretofore: "This was one of the bloodiest battles of the war, and was fought by the 'Iron Brigade' alone, only receiving aid when the heaviest fighting was over. While marching toward Centerville, a battery of the enemy opened on the brigade, when the Second Regiment was ordered to face to the left and march obliquely to the rear and take the enemy in the flank. As they rose on an intervening hill, a severe fire was

opened upon them on the right flank by the rebel infantry. The left wing was advanced to bring the regiment facing the enemy, when the fire was returned, and, for fifteen minutes, a tremendous storm of shot was kept up by the contending forces, a brigade of the enemy being engaged by the Second Wisconsin. The Second held its ground, when the Nineteenth Indiana came up on its left. The enemy were re-enforced, and the Sixth and Seventh Wisconsin went into line, and the whole brigade continued the fight until darkness put an end to the contest." Among the rebel forces engaged was the famous 'Stonewall Brigade,' which had never before had to fall back. The casualties were frightful. Company C suffered severely. The field officers of the Seventh were all wounded, and the command of the regiment devolved upon Capt. Callis. The brigade remained on the field removing the wounded until about midnight, when they were ordered to retreat to Manassas Junction." Full many a quiet Wisconsin homestead will have cause ever to remember the battle of Gainesville.

On the 29th, the regiment was engaged on the battle-field of Bull Run as support to a battery, the Second and Seventh Regiments being temporarily consolidated. On the retreat of the army after the battle of the 30th, the "Iron Brigade" acted as rear guard, covering the retreat, the Second being the last regiment to cross the Stone Bridge. Retiring with the rest of the army, the Second went into camp at Upton's Hill, near Washington, on the 2d of September.

The Second Regiment also participated in the movements of the army under the command of Gen. McClellan, and on the 14th of September, with the remainder of the brigade, was assigned the duty of storming Turner's Pass, of South Mountain, where the enemy was strongly posted in a gorge. They were routed and driven from the pass with heavy loss. At the battle of Antietam, which occurred three days later, the Second went into the fight with 150 men and lost 91. This battle was always considered as one of the bloodiest of the war, and for the bravery and endurance shown by the "Iron Brigade" that day, Gen. McClellan pronounced them equal to the best troops in the world. The regiment, with the brigade to which it was attached, participated in the battle of Fredericksburg, but, aside from a little skirmishing, did not become engaged with the enemy. During the winter, the Second was engaged in several profitable expeditions in Virginia, under Col. Fairchild. July 1, 1863, after marching 160 miles through Virginia and Maryland, they found themselves near Gettysburg.

The Second, having that day the head of the column, were the first to meet the enemy. Orders were received to support Buford's cavalry. Coming to the brow of a hill, behind which a strong body of the enemy were posted, the Second received a volley that cut down thirty per cent of their numbers. But, nothing daunted, they dashed upon the enemy's center, and crushed it, checking the rebel advance. At the end of this day's fight but two officers and two men were all that were left unharmed in Company C. At this date the loss of the Second Regiment in killed, wounded and missing amounted to 652. The next year the "Iron Brigade" participated in the battles of the Wilderness and Spottsylvania Court House, after which the Second Regiment, having been reduced to less than 100 men, was detailed as provost guard to the Fourth Division, Fifth Army Corps. The battle-scarred members of the regiment followed the destinies of that division in the great movement to the left, arriving June 6, at Bottom's Bridge, on the Chickahominy, where they remained until the expiration of their term of service. Those absent on detached service were recalled, and June 11, 1864, the regiment took its departure for home, arriving in Madison on the 18th. There they were received by the citizens, and a splendid collation served in the park. The last company was mustered out on the 2d of July, 1864.

Below is given the complete record of Company C, the pioneer company from Grant County, from the date of their enlistment until discharged, June 1864.

COMPANY C, SECOND WISCONSIN VOLUNTEERS.

Commissioned Officers.—David McKee, Captain, discharged March 28, 1862, for the purpose of accepting a commission as Lieutenant Colonel of Fifteenth Wisconsin Volunteers; killed at Murfreesboro.

C. K. Dean, First Lieutenant, appointed Adjutant of Second Wisconsin Volunteers, June 15, 1861.

William Booth, Second Lieutenant, promoted to First Lieutenant, Company C, Second Wisconsin Volunteers, February 28, 1862; resigned January, 1863.

Sergeants.—First, Richard E. Carter, transferred to regimental band June 18, 1861.

Second, George W. Gibson, appointed First Sergeant June 18, 1861; promoted to Second Lieutenant, February 28, 1862, vice Booth, promoted to Captain, March 28, 1862; wounded.

Third, Frank Neavill, appointed First Sergeant February 28, 1862, vice Gibson, promoted; killed at the battle of Gainesville August 28, 1862.

Fourth, Levi Showalter, appointed First Sergeant August 28, 1862, vice Neavill, killed; promoted to Second Lieutenant January 3, 1863; wounded.

Fifth, Asa B. Griswold, appointed Sergeant Major August 18, 1861; died in hospital October 11, 1861.

Corporals.—First, Thomas Barnett, Sergeant, June 18, 1861, vice Carter, transferred; discharged September 22, 1862; received appointment as Second Lieutenant, in Company C, Twenty-fifth Wisconsin Volunteers.

Second, Sam'l Booth, appointed Sergeant March 28, 1862, vice Kellogg, promoted; wounded.

Third, Henry R. Neavill; killed at battle of Antietam September 17, 1862.

Fourth, George Holloway; killed at battle of Antietam September 17, 1862.

Fifth, George L. Hyde, discharged October 13, 1861; reason, gunshot wound.

Sixth, Alpheus Currant, reduced to the ranks at his own request March, 1862; re-enlisted as a veteran volunteer.

Seventh, Belknap Fuqua; died in prison at Richmond of wounds received at Bull Run July 21, 1861.

Eighth, Spencer M. Train, appointed Sergeant October 9, 1862, vice Liscum, promoted; died August 25, 1863, of wounds received at Gettysburg July 1, 1863.

Privates—Richard Armstrong; Martin J. Barnhisel, died October 8, 1862, of wounds received at Gainesville August 28, 1862; Joseph Brown, killed in the battle of Gainesville August 28, 1862; John L. Bower, lost arm in the battle of Gainesville August 28, 1862, discharged October 3, 1862; John H. Durgess, died in the hospital at Alexandria, Va., July 22, 1862; George Beasley, killed in the battle of Antietam September 17, 1862; Calvin M. Brooks, wounded; Joseph Bock, discharged May 28, 1863; reason, gunshot wound; Matthias Baker, wounded; William E. Bouldin, wounded; Louis Budler, discharged December 3, 1862; reason, gunshot wound received at Gainesville August 28, 1862; D. L. Barton, killed at battle of Gettysburg July 1, 1863; James H. Branham, lost arm at the battle of Gainesville August 28, 1862; discharged December 30, 1862; George Booth, discharged January 17, 1863; Jonathan Booth, discharged May 29, 1862, disability; Frederick Burmaster, discharged January 3, 1863; reason, gunshot wound received at the battle of Gainesville August 28, 1862; Thomas S. Brookins, transposed to the Veteran Reserved Corps March 22, 1864; Thomas D. Cox, killed at the battle of Bull Run July 21, 1861; George B. Carter, transferred to the regimental band June 18, 1861; Andrew J. Curtis, discharged January 16, 1863; reason, gunshot wound received at the battle of Gainesville August 28, 1862; William S. Crosley, promoted to Corporal September 18, 1862, appointed Sergeant July 1, 1863, transferred to the Invalid Corps December 12, 1863, died December 16, 1863; Michael Cook, promoted to Corporal June, 1862, died September 16, 1862, of wounds received at battle of Gainesville August 28, 1862; James F. Chase, wounded; George Coullard; William Y. Cunningham, appointed Corporal September, 1862, taken prisoner at Gettysburg July 1, 1863; reported dead; John Coonce, transferred to the Invalid Corps July 1, 1863; wounded; John Cahill, discharged January 17, 1863, reason, gunshot wound received at Gainesville August 28, 1862; Theodore B. Day, transferred to the Invalid Corps for reason of a gunshot wound received at the battle of Gainesville August 28, 1862; John Doyle, re-enlisted as a veteran volunteer February 22, 1864; William R. Doty, deserted while in action, July 21, 1861; Jefferson C. Dillon, promoted to Corporal August, 1863; appointed Sergeant December 31, 1863; wounded; Daniel Eldred, re-enlisted as a veteran volunteer February 22, 1864; Henry Evan; George W. Fritz, promoted to Corporal Sep-

tember 17, 1862; appointed Sergeant July 1, 1863; supposed to have been killed at the battle of the Wilderness Ridge May 5, 1864; John Fry; William M. Foster, discharged October 25, 1862; reason, gunshot wound received at Gainesville August 28, 1862; William Frawley, wounded; William J. Gleason; Casper Gadiant; James Gow, appointed Color Sergeant August, 1861; appointed First Sergeant June 3, 1863; killed at the battle of Gettysburg July 1, 1863; Richard Graves, wounded; Charles A. Garvin, wounded; transferred to the Invalid Corps; David Gudger, promoted to Corporal January, 1863; killed at the battle of Gettysburg July 1, 1863; George B. Hyde, promoted to Corporal June, 1862; died September 10, 1862, of wounds received at Gainesville August 28, 1862; Charles Hilgers, transferred to the Invalid Corps February 15, 1864; reason, gunshot wound received at the battle of Gettysburg July 1, 1863; Benjamin F. Hyde, transferred to the Invalid Corps November 28, 1863; James Hughes, promoted to Corporal May, 1862; discharged January 23, 1863; reason, gunshot wound received at battle of Gainesville August 28, 1862; George T. Jones, discharged August 26, 1861, for disability; Edward P. Kellogg, appointed Sergeant February 28, 1862, vice Gibson promoted; appointed Second Lieutenant March 28, 1862, vice Gibson promoted; died September 9, 1862 of wounds received at the battle of Gainesville, August 28, 1862; Valorous F. Kinney, discharged August 24, 1863; reason, gunshot wound received at Gettysburg July 1, 1863; Otto Ludwig, killed at the battle of Gettysburg July 1, 1863; Frank H. Liscum, appointed Corporal June 28, 1861; appointed Sergeant October 9, 1862; Second Lieutenant October 21, 1862, vice Kellogg, deceased; appointed First Lieutenant January 3, 1863, vice Booth discharged; wounded; Louis Lafont, died June 9, 1863, by broken neck; R. H. McKinsie, killed at the battle of Antietam September 7, 1862; John W. Miles, re-enlisted as veteran volunteer March 10, 1864; Charles Manning, transferred to the Invalid Corps, July 1, 1863; reason, gunshot wound; Henry Miller, discharged November, 21, 1861, for disability; E. K. McCord, discharged October 15, 1861, for disability; Spencer Mead, discharged November 24, 1862; reason, gunshot wound received at Gainesville August 28, 1862; George W. Nevans, discharged March 21, 1863; reason, wound received at the battle of Gainesville August 28, 1862; Henry W. Northup, wounded; Frank Nichols; James H. Neavill; F. Pittygrove, wounded; Robert S. Pittinger, killed at the battle of Gainesville, August 28, 1862; Samuel Peyton, discharged May 6, 1863; reason, wounds received at the battle of Gainesville, August 28, 1862; Alson Parody, discharged Feb. 11, 1864; reason, wounds received at Gettysburg July 1, 1863; Fritz Reckler, wounded; William B. Reed, discharged January, 1863, for reason of wounds received at the battle of Gainesville August 28, 1862; John W. Raines, discharged November 30, 1862, for reason of wounds received at the battle of Gainesville August 28, 1862; Henry Rhode, re-enlisted as veteran volunteer; R. J. Simpson, killed at the battle of Antietam September 17, 1863; George A. Stephenson; David Strong, discharged March, 1862, on account of disability; J. H. Stubbs, appointed Corporal July 1, 1863; Joseph Schilling, wounded; John Schmidt, killed at the battle of Gainesville August 28, 1862; R. S. Stevenson, killed at the battle of Antietam September 17, 1862; Samuel Sprague, appointed Corporal July 1, 1863; wounded; W. H. Snodgrass, appointed Corporal November, 1863; wounded; John St. John, died October 8, 1862, of wounds received at the battle of Gainesville August 28, 1862; Albert W. Speas, died in hospital April 23, 1862, of small-pox; Newton Wilcox, killed at the battle of Gainesville August 28, 1862; George M. Wilson, appointed Corporal September 17, 1862; discharged January 6, 1863, on account of wound received at the battle of Antietam September 17, 1862; Philo B. Wright, appointed Corporal January, 1863; appointed Color Sergeant June 28, 1863; appointed First Sergeant, vice Gow, killed July 1, 1863; discharged May 25, 1864; Orlando Waldorf, appointed Corporal January, 1863, and Sergeant July 1, 1863; wounded; Welland Weibel, died in prison at Richmond, Va., of wounds received at the battle of Bull Run July 21, 1861; Francis M. Waldorf, died December 13, 1862, of typhoid fever; Albert Waldorf, died November 26, 1862, of wounds received at the battle of Gainesville August 28, 1862; Oscar Wilcox, discharged November 15, 1863, for disability.

Recruits—William A. Ewing, killed at the battle of Gettysburg July 1, 1863; A. H. Barber, wounded at the battle of Antietam; discharged May 15, 1863; John Bower, discharged December 12, 1862, for disability; C. L. Black, discharged May 30, 1862, for disability; E. K. Housley, died May 16, 1862, of typhoid fever; James W. Hyde, died of wounds received at Spottsylvania Court House.

In the meantime, Grant County, with an ardor hardly equaled and never surpassed in any section of the State, was preparing her bravest and best and sending them forth to battle, by hundreds and thousands.

On the day of the departure of Capt. McKee's company for Madison, the second company (Capt. Limbocker's) was presented with an elegant flag by the ladies of Platteville. This company soon after left for Fond du Lac, where it was mustered into the Third Regiment Wisconsin Volunteers.

Still they came, and the war fever raged with unabated violence throughout the county. Every hamlet had it, every family. The only question was, How soon can we go? Then came the President's call for more troops, and company after company was organized in such rapid succession that the historian of these late days finds it difficult to keep up with the swift march of events at this period. The "Union Guards," which had been organized at Lancaster immediately after the departure of Capt. McKee's company, organized for active service and elected the following officers: Captain, J. B. Callis; First Lieutenant, S. Woodhouse; Second Lieutenant, H. F. Young. At Platteville another company had been organized under command of Capt. Nasmith; still another had been organized at Fennimore by a combination of parts of Wingville and Fennimore companies, and Capt. Mark Finnicum elected Captain. These three companies left for Madison in August and were mustered into the Seventh Regiment Wisconsin Volunteers. Rev. Capt. Palmer's company, from Lancaster, and a second organized at Platteville, with Capt. C. F. Overton in command, were ordered to Milwaukee and assigned to the Tenth Regiment Wisconsin Volunteers, and went into camp at Camp Holton. The Sixth Regiment contained also a goodly number of Grant County men. So grand had been the patriotic outpouring from this county, that, by the latter part of September, 1861, "Old Grant" had furnished over one thousand men to help save the Union.

July 1, 1862, another call for 300,000 troops was issued by the President. Nobly did the county respond to this call, notwithstanding that recruits had been going forward in almost a steady stream to fill up the depleted ranks of the old regiments, and that 1,447 men had already been sent out, or nearly a twentieth part of the entire population of the county. No sooner was it known that the country was in need of more defenders than every nerve was strained to fill the quota under the new call.

On the night of August 9, a monster mass meeting was held at Lancaster, which was participated in by a number of the surrounding towns. Senator Virgin was chosen Chairman and the usual resolutions passed, among others one requesting the Supervisors of the county to raise by tax the sum of \$5,000, to be used in rendering assistance to the families of enlisted men. The members of the County Board being present, assembled after the meeting, and passed the following resolution:

Resolved, That this Board of Supervisors will order levied at their November session this year, a special county tax, not to exceed one and a quarter mills on the dollar of taxable property of the county, amounting to about \$5,000. Said sum so raised shall be applied to assist in the support of the families of men who have volunteered, or may hereafter volunteer, leaving no male member of their family at home over the age of eighteen, to take care of such families of volunteers, and such families being in absolute need of assistance; also, to assist such families as have been deprived of their head (husband or father) by the accidents of war, leaving no one on whom the family can rely for support; and in no case can such relief exceed the sum of \$5 per month pay to any family.

Eight companies were soon reported full or nearly so, namely: McDermott's, Farquharson's, Scott's, Swan's, Nash's, Harlocker's, Earnhardt's and Frank's. It was proposed to organize a Grant County regiment, but owing to the shortness of the time, this project was not carried out. Of the above companies, McDermott's was mustered into the Twentieth Regiment, at Madison, forming Company C of that organization, Harlocker's making Company I of the

same; Farquharson's, Scott's, Swann's and Nash's into the Twenty-fifth, making Companies C, E, H and I respectively, while the remaining companies—Earnhardt's and Frank's, with another company formed under Capt. Burdick—were mustered into the Thirty-third Regiment, forming Companies D, B and G. These full companies, together with other enlistments, brought the number of volunteers sent from Grant County up to over twenty-two hundred, or about one-fifteenth of its entire population.

Hon. J. L. Pickard, State Superintendent of Public Instruction, at the commencement of recruiting under this call, had authorized Lieut. Col. Nasmith, of the Twenty-fifth Regiment, to draw on him for \$100, to be used for the benefit of the sick and wounded of the first company raised in Grant County for that regiment. Capt. Swan's "Potosi Badgers" carried off the prize, being just four hours ahead of a company organized at Platteville under the efforts of Messrs. Scott and Smelker.

In addition to the above-mentioned companies, a cavalry company had been organized by Capt. R. R. Wood, at Patch Grove, in the latter part of 1861, which company was ordered into camp at Milwaukee, where it was mustered into the Second Regiment Wisconsin Cavalry, forming Company A of the regiment.

Still the call came for more troops, draining the country of its bone and sinew. During the dark days of 1863-64, Grant County continued to send squad after squad of recruits to fill up the ranks of the depleted regiments at the front.

Nor were the boys at the front neglected. Soldiers' Aid Societies were organized in every city, village and township, the ladies, God bless them, vieing with each other in their efforts to alleviate, in such a manner as possible, the trials and privations of the county's representatives down in Dixie. Many a soldier boy's heart has jumped with joy, as boxes laden with warm clothing, pocket comforts, or delicacies to which he had long been a stranger, came fresh from the far-off Northern home, accompanied by the kind wishes and sweet sympathy of the loving hearts waiting and watching "for the return of peace." The story of women in the war can never be told, for every one of the gentler sex who, through active, untiring exertions in behalf of the brave soldier boys, has had her name high blazoned on the tablets of fame; there are hundreds, thousands of earnest workers, whose exertions were just as untiring, whose work was pursued with the same patriotic energy, yet whose deeds remain untold, and their lives unsung, and remembered only by the weary hearts whose sufferings were relieved, and their arm made stronger to strike for the Union, by the humble efforts of these unknown Sisters of Charity, whose church was their country, and whose charge included in its far-sweeping confines, every defender of the assailed Union. Again, rises the cry, echoed in every soldier's heart, "God bless the women of the war."

Upon the organization of the Forty-first Regiment—one hundred day men—in 1864, Grant was represented by one company, under the command of Capt. P. J. Schlosser.

This was followed soon after by two more companies, the first under the command of Capt. Likens, being mustered in as Company H, of the Forty-third; the second, Capt. C. H. Baxter, was assigned to the Forty-seventh, making Company K, of that regiment.

Thus nobly did Old Grant respond to the repeated calls for National defenders. Never looking back or counting the consequences, until the once populous county began to show serious evidences of this steady drain. A single evidence of this unhesitating outpouring, is taken from the *Herald* of September 6, 1864, which, speaking of the town of Paris, says: "This town polled one hundred and one votes in 1860, and spared eighty-seven volunteers previous to the 500,000 call. Under the last call, upon which the draft is pending, seventeen more have volunteered for other towns, making one hundred and four in all. There are left in the town three single men and twenty-nine married men; all between the ages of twenty and forty-five. Of those left, at least seven are unfit for duty, leaving but twenty-five able-bodied men in the town. The draft quota of that town is seven or eight, or about one-third of what is left."

As it was with Paris, so it was in every section of the county. The country is in danger! was the rallying cry, and never was it raised in vain. To-day Grant County has the proud

honor of heading the list of counties of this State in the furnishing of men for the suppression of the rebellion.

THE DRAFT.

Following upon the heels of the President's second call for 300,000 men, in 1862, came another call for 300,000 drafted militia from those districts which could not at once raise volunteers enough to fill their quota under both calls. The time allowed for enlistments was so short that the last call was virtually an order for a draft forthwith. The State was divided into districts coinciding with the Congressional Districts, with a Commissioner and Surgeon for each district. The Commissioner for the Third, in which was included Grant County, was Stephen O. Paine, of Platteville, the examining Surgeon being Dr. J. W. Hyde, of Lancaster. The enrollment of those liable to draft in the different counties was placed in the hands of the Sheriff of each county; this enrollment was to be finished by the 1st of September. The quota of Grant County up to and under these calls was 1714, or 505 above the number enlisted. Spurred by the necessity of avoiding, if possible, compulsory service, the county responded, by raising volunteers to the number of 500, over and above the quota called for, and thus put all danger of this and supposably a future draft out of the question. Speaking of this wonderful success in securing enlistments, the *Herald* of August 28, 1862, says: "We have already furnished in Grant County about 500 men above our full quota, and so gone beyond the possibility of draft for the future. Grant County is, therefore, a safe place of refuge for those who fear a draft, just as safe as Canada, although we do not wish this statement to be taken as an invitation for all sneaks to make this county their asylum, we need hundreds of laborers here; our lead mines are nearly deserted; labor must be very dear, and the profits of capital and labor heavy for some months."

On the 3d of March, 1863, Congress passed the act, afterward known as the "Conscription Act," providing for the enrollment and drafting of all able-bodied males between the ages of twenty and forty-five. The States were divided into districts, over each of which was placed a Provost Marshal. Grant County, under this arrangement, came within the limits of the Third District of Wisconsin. The Marshal of this district was Captain, afterward Col. J. L. Clark, of Lancaster, whose headquarters were at Prairie du Chien.

October 17, 1863, came a call for 300,000, but neither under this nor subsequent calls did the draft bear down with any degree of severity upon the county generally, although a few towns which failed to avail themselves of the opportunity offered to obtain men to fill their quota, by paying local bounties, had to feel the sting of the dreaded draft within their borders. The status of each town in the county in January, 1865, under the calls of February 1, March 14, June 15 and December 19, 1864, was as follows:

Previous to these calls, the county had furnished nearly 2,000 men to stem the tide of rebellious treason, thus making her offering, up to the 1st of January, 1865, some 4,000, and of this great number but an infinitesimal portion were conscripts, the remainder being volunteers who had left the plow, the forge, the mine, the store, in response to the call of their threatened country. Yet the *Herald*, in its issue of February 21, 1865, says: "About 510 volunteers will be raised in Grant County pending this draft. The average local bounty paid to each is about \$300." It will thus be seen that "Old Grant" furnished to save the Union over 4,500 men, or about three-fifths of the male population of the county at that time, not allowing for those whose disabilities would exempt them from service. A prouder record can no county show. The muster-out rolls of Grant County Volunteers were obtained from Madison, and by order of the Board of Supervisors passed at the December session, 1866, they were ordered framed and hung in the court house of the county, there to serve as a reminder of the valor of "Old Grant."

Grant County paid out for war purposes, \$336,062.46. This large sum does not include sums paid out by private subscription.

SKETCHES OF THE REGIMENTS.

Third Regiment.—The Third Wisconsin Volunteer Infantry was organized at Camp Hamilton, Fond du Lac, in June, 1861, and was mustered into the United States service on the 29th of the same month. In this regiment was Capt. Limbocker's company, Company F, the second company organized in Grant County. It was officered as follows: Captain, G. W. Limbocker; First Lieutenant, E. J. Bentley, Lieut. Britton having resigned soon after the organization of the company; Second Lieutenant, E. J. Mecker. On the 12th of July, 1861, the regiment left the State for Maryland. Here they remained until the following spring, with no incidents of note happening aside from the capture of the "bogus" Legislature, in September, as it was about to convene for the purpose of passing an ordinance of secession.

In the spring, the regiment was attached to the Second Brigade of Williams' division of Gen. Bank's army corps, and joined in the march up the Shenandoah Valley. In the retreat that followed soon after, the Third brought up the rear as the column passed the Potomac. The Third took a prominent part in the battle of Cedar Mountain and suffered severely. Company F lost here, killed or died of wounds—Privates, Eaton W. Butler, Andrew Craig and Frank Darling; wounded—Corporals, A. A. Budd and Clay A. Fisher; Privates, James Holmes, S. H. Marvin, James Kelly, George Kalb, John W. Wian, Jonas Classor, Nelson Powell and D. P. David.

In the organization of the army by Gen. McClellan, Gen. Banks' troops were transferred to the Twelfth Corps. The Third, as a component part of Gordon's brigade, took part in the battle of Antietam that followed soon after. Here the regiment marched through a bit of woods, and forming in line of battle, advanced to the attack. Coming up a rise of ground, they were met with a terrible fire of grape and cannister that mowed ghastly swaths in their ranks. The regiment, however, stood its ground, and poured in its fire with deadly effect until the enemy retired. The Third commenced the action with 345 men; when it ceased firing it numbered

* Dashes preceding figures in this column indicate deficiencies.

less than 50. The losses of Company F in this engagement were: Killed or died of wounds—Privates, Thomas J. Duncan and John Olson. Wounded—Sergeants, S. Bartholomew and W. A. Beebe; Corporals, F. W. Basford, A. Spooner and F. M. Castley; Privates, J. G. Harsberger, John Kalb, James Murphy, Richard Nolten, George Hall, A. George, R. Fulton, Leon Beau-prey and William Holmes.

After Antietam, the regiment was engaged in various duties on the Upper Potomac, until in December it joined the army at Falmouth. In the April following, the Third took part in the operations of Gen. Hooker at Chancellorsville. On the 1st of May, while on picket, the regiment was attacked by the enemy in force, when it took position behind a fence, which position it retained during the day. The regiment continued to take a part in the battles of the succeeding days, and on the withdrawal of Gen. Hooker's forces, was in the rear-guard covering the retreat. The casualties in the battles ending May 6, were, in Company F. Wounded—Sergeant, Orlando Thomas; Corporal, Richard Medley; Privates, Henry Parker, Nelson Powell, William Holmes, George Kalb and John Childers.

On the 16th of June, the regiment rejoined the Twelfth Corps, from which they had been separated for a short time, and took part in the advance to Gettysburg. In this battle they were employed principally in skirmishing, and, with the exception of a brush on the 3d of July, they were not engaged with the enemy. Their loss in killed at this battle was Thomas Barton and William Wagner, both of Company F.

The Third, after joining in the pursuit of Lee's retreating forces as far as the Rappahannock, was ordered to New York City, to aid in enforcing the draft, returning soon afterward. The Twelfth Corps was now transferred to the Army of the Cumberland, and arrived at Stevenson, Ala., in October, where the regiment was employed guarding railroads until the 21st of December, when, the greater part having re-enlisted as veterans, under orders from the War Department, the Veteran Third left for Wisconsin four days later on a furlough.

February, 1864, found them again at the front, in Tennessee, where they were joined by recruits, which increased the regimental strength to 575 men. When the Army of the Cumberland was re-organized, the Third was placed in the Second Brigade of the First Division, under command of Gen. Ruger, their former Colonel, their army corps being the Twentieth, formed from the consolidation of the Eleventh and Twelfth. The regiment joined its brigade in Georgia May 8, and on the 15th took part in the battle of Resaca. The rebels retreated during the night, but were again met on the 25th, near Dallas, where a stubborn fight ensued, in which the Third again signally distinguished itself. The casualties in these engagements for Company F were: Killed or died of wounds—Sergt. Francis M. Costly, Capt. J. W. Hunter; wounded—Sergt. Samuel Bartholomew; Privates William Holmes and Philander Tucker. The Third afterward took part in the advance upon Atlanta, and accompanied Sherman on his celebrated march to the sea. They were present at Raleigh at the surrender of the rebel army, and then marched for Washington, where they participated in the grand review of Sherman's army. From here, part of the regiment, whose term of service expired before the 1st of October, left for Madison. The remainder of the regiment was consolidated with other regiments and sent to Louisville, Ky., where they remained until the 21st of July, when they started for home, arriving in Madison the 23d. They were there paid off and mustered out.

Seventh Regiment.—Immediately upon the departure of the first companies from Grant County, measures were taken to organize others. In every section of the county companies or portions of companies might be seen earnestly perfecting themselves in the duty of a soldier. Three full companies, Capt. Callis', of Lancaster, Capt. Nasmith's, of Platteville, and Capt. Finnicum's—the product of a union of the Wingville and Fennimore companies—were, by the last of July, ready for active service. The Legislature, at an extra session in May, 1861, had authorized the Governor to receive into the service two more regiments in addition to the six already organized, and under the authority of this act the Seventh and Eighth Regiments were organized, and the three Grant County companies were ordered to report at Madison, where they were mustered into the United States service as component parts of the Seventh

Regiment Wisconsin Volunteers—a body which has the proud, yet sad honor of having lost more men killed and wounded during the war than any other regiment from the State. This was in August. These companies formed C, F, and H Companies in the regimental organization, being officered as follows: Company C, Captain, Samuel Nasmith; First Lieutenant, A. R. Bushnell; Second Lieutenant, E. A. Andrews. Company F, Captain, John B. Callis; First Lieutenant, Samuel Woodhouse; Second Lieutenant, Henry F. Young. Company H, Captain, Mark Finnicum; First Lieutenant, C. M. H. Meyer; Second Lieutenant, Robert Palmer.

The regiment remained in camp until the 21st of September when they left the State for Washington. Commenting on their departure, the *Journal*, of current date, said: "The Seventh is almost entitled to be called a Grant County regiment, from the very large number of men contributed to it from that portion of the State. Three of the best companies are from Grant, namely: Capt. John B. Callis' company, numbering 116 men; Capt. Nasmith's, numbering 106; and Capt. Finnicum's, numbering 105—in all 327 first-class, hardy, intelligent men. Besides these there are forty other volunteers from Grant County in the regiment, enlisted and given over to other companies that were not full." The Seventh everywhere en route attracted marked attention for its soldierly bearing and fine appearance, much of the praise being showered down upon the heads of "Old Grant's" representatives. The Seventh reached Washington the 26th of September and joined the brigade then organized by Gen. Rufus King, of Wisconsin, a body afterward the pride of the Nation and known as the "Iron Brigade of the West," mention of which has been previously made under the head of Second Regiment History. They were afterward encamped at Chain Bridge, the Seventh having the post of honor as the advance regiment of the brigade. Here they remained but a short time, when the brigade, having been assigned to Gen. McDowell's division, they went into camp at Fort Tillinghast, near the Arlington House. In March, 1862, the Seventh, with the remainder of the brigade, took part in the advance on Manassas. Returning with the remainder of the army, the Seventh was engaged in minor duties, changing location frequently. They took part in the movement on Fredericksburg a little later, Company C being ordered over the river to guard the south end of the railroad bridge erected by the Union forces. In July, the Seventh formed part of an expedition under command of Gen. Gibbon to Orange Court House. This march told terribly on all participating in it the heat being intense, companies and regiments succumbed to the torrid atmosphere, until barely a corporal's guard would be left to a company, or a company to a regiment. Nothing of moment occurred on the march, a light skirmish with the enemy's cavalry being all the encounter in which the command was engaged. The brigade afterward took part in Gen. Pope's retreat and then moved to Sulphur Springs, and thence to Buckland Mills, and on the 28th encountered the enemy at the bloody battle of Gainesville. The brigade at the time was moving along in easy marching order, when the presence of the enemy was announced by a shell sent from a point of woods beyond. The Second Wisconsin was ordered forward to take the battery—as it was supposed to be—but found upon nearing the woods that the enemy was in force. The Seventh was then pushed forward to the assistance of the Second and thrown into position on the right of the latter. Finding that their position was not the most effective that could be chosen the regiment changed front and assumed a position nearer the enemy at the foot of a hill. From this the enemy made three attempts to dislodge them, being repulsed with great loss each time. All of the field officers of the regiment were wounded and carried from the field. Lieut. Col. Hamilton, remaining until the battle was over when he was obliged by the loss of blood to go to the hospital and the command of the regiment devolved upon Capt. Callis. The report of this officer speaks as follows of this battle and that of the 30th. "The regiment was not engaged on the 29th, but on the 30th it became apparent that we must renew the attack and the decimated condition of the Seventh and Second Wisconsin Regiments suggested the propriety of consolidating the two. * * * * Our loss was heavy, but not so heavy as on the 28th. The whole affair of the 28th and 30th was conducted with as much coolness on the part of officers and men of the Seventh, Second and Sixth Wisconsin Regiments as though they were

on an ordinary drill." The casualties in the Grant County companies for these battles was as follows: Company C, killed, Thomas B. Sutton, Fred Nordorf. Wounded, Corporals William P. Durley, Truman Quimby; Privates Herman Radkil, John C. Bold, John L. Eastman. Missing, Rolland Williams, John J. Geyer, Edward Eason. Company F—killed, Sergt. Lewis W. Stevens, Corporals Edward S. McDowell and William A. Miles; Privates Harry Kentner and Herbert Roberts. Wounded, Capt. John B. Callis, slight, Sergt. A. R. McCartney; Corporals C. Giles Parker, William A. Smith and Francis A. Boynton; Privates C. B. Bishop, George Eustis, Perry Gilbert, W. H. Miles, John Marlow, Newton McPhail, Julius B. Nickerson, Danford Rector, William R. Ray, Lyman Carrier and John Lepla. Missing, Thos. McKee, Edward F. McDonald, Henry Rupkee. Company H—killed, Luther A. Schnee and W. G. M. Scott. Wounded, Corporals Nathaniel Johnson, John Monteith and Jasper Randolph; Privates Robert J. Cutts, John Dillon, Francis Kearney, Martin Moore, John B. Murphy, Alonzo Springer, George M. Steele, Albert M. Steele, John Schultz, Joshua Thompson, Lucius Eastman, Silas Streeter, Benjamin Rice, Laman Russell, Samuel K. Potts.

In these battles the Seventh lost 250 men only a few were missing; "which," in the language of a correspondent writing at the time, "indicates that they stood up to the work without flinching."

The battle of South Mountain followed soon after. To the "Iron Brigade" was assigned the duty in this day's fight of carrying the gap in which the enemy was posted in force. Of the part taken by the Seventh in the battle the following, condensed from the report of the commanding officer of the regiment, Capt. J. B. Callis, will give a brief but adequate account:

"About 4 o'clock on the evening of September 14, the Seventh Regiment was ordered forward through a corn-field, on the right of the pike running through the gap in the mountain. A hot skirmish-fire ensued, our skirmishers driving those of the enemy until his fire was so strong that the skirmishers could go no farther.

"I then received orders to advance the Seventh in line of battle. We advanced until the regiment was within less than a hundred yards of the enemy, receiving only an occasional shot, when suddenly they opened a most destructive enfilading fire from a stone wall on our left, woods on our right, and a direct fire from a stone wall in our front. This lasted for some fifteen minutes, when the Sixth double-quickened in at our right, and the Second doing the same at our left, leaving us to contend only with the direct fire in our front. We fought until our cartridges gave out, and were ordered to hold the ground at the point of the bayonet. The enemy advanced on us, but we made a charge upon them, when they 'skedaddled.' We held the ground until 11 o'clock at night, when we were relieved by Gen. Gorman's brigade. Our men all fought nobly and desperately. Company F was commanded by Sergt. William E. Sloat, Company I by Sergt. Prutezman, and Company B by Sergt. Weeks—afterward Captain. Great credit is due these men for the manner in which they conducted themselves as line officers."

The losses of Companies C, F and H at South Mountain were as follows: Company C—killed or died of wounds, Privates Wallace Holmes and W. B. Newcomb; wounded, Corporals W. P. Durley, John Attyer, J. L. Rewey and Edwin Wheeler; Privates D. C. Ashmere, D. H. Bryant, William Brestall, Malcolm Ray, Theodore W. Snelker and George Wells. Company F—killed or died of wounds, Privates Henry O. Kanmp, John L. Marks, George F. Halbert, J. A. Simpkins, George W. Cooley and James Clark; wounded, Lieut. John W. McKinsie; Corporals P. J. Schlosser and William A. Smith; Privates George Atkinson, Henry Black, Jacob A. Drew, Milo Dexter, George A. Henderson, Fletcher S. Kidd, Alexander Lewis, R. B. Pierce and Thomas Price. Company H—killed or died of wounds, Privates Benjamin Burton and John B. Matthews; wounded, Sergt. William L. Jacobs; Corporal James H. Brunemer; Privates John Andrews, Isaac Coates, Henry Freundner, Joseph Heathercock, Stanbury Hitchcock, S. K. Potts, Luman Russell, John Todd, Frederick Thies, Newton B. Wood, Nicholas Heler and John Steers.

The position at South Mountain was evacuated by the enemy during the night, and McClellan's troops again came up with him on the 16th, strongly posted on Antietam

Creek. The part enacted by the Seventh in this bloody conflict is pictured by a correspondent of the *State Journal*, in a letter written some time afterward, in which he says: "Those who witnessed that fearful conflict on the plains of Antietam will remember the conspicuous part acted by the Seventh, in changing front twice while under a galling fire, and thereby saving the celebrated Battery B, Fourth United States Artillery, belonging to the Western Brigade, from being captured. In Gen. Gibbon's report of the battle of Antietam, he says great credit is due to Capt. Callis, Acting Colonel of the Seventh, for the manner in which he maneuvered his regiment during the battle, and Capt. Callis, in his official report, pays a well-deserved compliment to Capt. Richardson and Gordon for their gallantry and efficient services. Through the memorable battles of August 30, September 14, 15, 16 and 17, the Seventh valiantly sustained the reputation which our Western soldiers have so nobly gained by their power of endurance and heroic deeds." The casualties at this battle were: Company C—killed or died of wounds, Private Albert Stout; wounded, Privates A. Erb, J. Howard, H. Rewey and W. L. McKinney; Company F—killed or died of wounds, Privates Wesley Craig, Louis Kuntz, George F. Halbert and James A. Simpkins; wounded, Private John Runnion. Company H—killed or died of wounds, Sergt. Samuel Montieth; wounded, Private William Salmon.

In December, the Seventh formed a part of Burnside's forces in the famous attack upon Fredericksburg, but aside from light skirmishes, had no encounter with the enemy. For four days, however, they were exposed to a heavy artillery fire, more trying to the morale and steadiness of troops than the hottest engagement. During this winter Capt. Callis, who upon the resignation of Maj. Bill, had been promoted as Major of the Seventh, was made Lieutenant Colonel, vice Hamilton resigned, Capt. Finnicum being advanced to the position of Major. The Seventh took an active part in Hooker's campaign, and at Fitzhugh Crossing maintained their former high reputation. Col. W. W. Robinson reported as follows to Gov. Salomen, the report bearing date of May 12: "Lieut. Col. John B. Callis and Maj. Finnicum rendered efficient assistance in crossing the river and storming the enemy's works; their coolness, promptness and efficiency, during the seven days under fire, show them to be officers to be depended on in any position." As with officers so it was with men. Company C 1st Second Lieut. W. O. Topping, killed; Company F, Private William Ross, killed, and Private William Hayden, wounded.

The division remained entrenched in this position until the 2d of May, and then recrossed the river. This was done in daylight under the guns of the enemy, the Iron Brigade bringing up the rear, the Seventh, as usual, in the post of honor, five companies of that regiment being left to support the pickets, in retiring. In June the Seventh took part in a reconnoissance toward Culpeper Court House. They then crossed to the north side of the Rappahannock, and rejoined the brigade which was then on its way, in conjunction with the rest of the army, to intercept Gen. Lee, on that great raid which came so near proving fatal to the Union cause. They met him, as is well known, at the little village of Gettysburg, where was fought July 1-3 what was undoubtedly the pivotal battle of the war. The troops on this march suffered much from dusty roads and hot weather, but all discomforts were forgotten when they arrived in the vicinity of the enemy.

Gen. Reynolds' corps was ordered to move to Gettysburg on the 1st of July, Wadworth's division being in advance. Buford's cavalry was already engaged with the enemy, opposing their advance. The "Iron Brigade" led the advance of Wadsworth's division, and, entering a field a short distance to the left of Gettysburg Seminary, they advanced up the slope, the Second and Seventh in the lead. Arriving on the brow of the hill, they were confronted by a strong force of the enemy. The Seventh was with unloaded guns. The order to charge was given, and away they went, depending upon cold steel. Their rushing charge was irresistible. Backward they drove the rebels across the Run, and into their works, where they captured the greater portion of Archer's brigade. The remainder, in attempting to regain their own forces in the rear, were surrounded in a railroad cut, and captured by the Sixth Wisconsin. The Seventh, with the remainder of the brigade, fell back, soon after, across Marsh Creek. Early in the afternoon, they were attacked by the enemy in force, and after stubbornly continuing the

fight until the enemy was lapping well around their flanks, they were forced to retire, leaving a number of their comrades and officers, among them Lieut. Col. Callis, on the field. They retired to Cemetery Hill, and took position near the top of the hill, where they threw up breastworks. In the battles of the 2d and 3d, the Seventh was supporting a battery where they were exposed to a heavy artillery fire, but did not become engaged with the enemy's infantry.

The casualties in this battle were as follows: Lieut. Col. Callis, wounded severely. Killed or died of wounds: Company C, Sergeant, George W. Lean; Private, William Hull. Wounded: Corporal, William Beazly; Privates, Isaac McCallister, Lewis Winans, J. W. Enloe, August Erb, J. C. Bolds, James Armstrong. Company F, killed or died of wounds: Privates, Phillip Bennett and T. H. V. Darnell. Wounded: Second Lieutenant, A. A. Kidd; Corporals, William R. Ray, John S. Schloesser, John Blackburn and John Bronson; Privates, Thomas Garvey, Isaac Rayner, Danford Rector and J. N. Carrier. Company H, killed or died of wounds: Privates, John J. Mitchner and John M. Steers. Wounded: Privates, Nicholas Heber, William A. Clark, Joseph J. Clark, John McLimans, John Schutz and William Tulke. Among those taken prisoners were Capt. Nat. Robbins of Company H, who was kept a prisoner nearly to the close of the war. The regiment numbered 302 when it went into action, and came out with 137. After the battle, the regiment started with the brigade in pursuit of the enemy, and passed on through Warrenton to Rappahannock Station, reaching Pony Mountain on September 17, where the brigade was presented with a very beautiful flag on this the anniversary day of Antietam. In the subsequent retrograde movement of Gen. Meade, the Seventh lost thirty men, taken prisoners. During the balance of the year, but little was accomplished. In December, 211 of the Seventh having re-enlisted as veterans, the regiment was constituted a veteran regiment, and the men granted the usual furlough.

At the opening of the campaign in May, 1864, the "Iron Brigade" broke camp on the 4th of that month and reached the Old Wilderness Tavern at dusk, encountering the enemy further on, in position. And the command was ordered to advance through a heavy growth of pine and underbrush, and, after a transient success, were forced back by the superior number of the enemy. The density of the woods occasioned great difficulty in getting out, and the Wisconsin regiments, especially, suffered heavily. In this first attack upon the enemy's line, the colors of the Forty-eighth Virginia were captured by Corporal George A. Smith, of Company H, Seventh Regiment. The battle was resumed at daybreak on the succeeding day. In the grand charge which occurred at the beginning of this day's fight, the Seventh had the honor of being the only regiment that succeeded in holding, for a short time, the enemy's first line of breastworks. In the last assault upon the enemy's position, such losses occurred as to place Col. Robinson of the Seventh in command of the brigade and Lieut. Col. Finnicum in command of the regiment.

On the 9th, a body of sharpshooters, which had established themselves within a short distance of the Union breastworks, were driven out by a company of the Seventh. In the fighting on the 12th, the Seventh was the first regiment to relieve Hancock's Corps, then holding the first line of the enemy's intrenchments, they themselves soon after being relieved by a Michigan regiment. In the remaining battles of the Wilderness, the Seventh bore a prominent part.

The casualties for this campaign were: Company C—Killed or died of wounds, Capt. Jefferson Newman, Sergt. George Mitchell, Privates James Armstrong, William Carpenter, S. D. Hurst, Ezekiel Parker and David H. Bryant; wounded, Second Lieut. J. H. Holcomb, Sergt. H. Rewey, Corp. J. J. Stout, Privates D. Augustine, C. G. Bell, J. C. Bold, Fred Miller, John W. Robinson, Irvin C. Smelker, W. T. Tallada, Jacob Rice, W. J. Wynand, W. J. Wood and William Eustis. Company F—Killed or died of wounds, Privates Peter Francis, Henry S. Sprague and George Cormick; wounded, Capt. H. F. Young, First Lieut. William E. Sloat, Lieut. A. A. Kidd, Corps. W. R. Ray, J. C. Reamer and N. Bradbury, Privates George Atkinson, J. C. Bradley, Andrew Bishop, C. B. Bishop, Bruce Brian, Harvey Bonham, Thomas Blunt, Webster Cook, C. F. Chipman, James Endicott, James Evans, John Folk, Perry Gilbert, B. F. Hayden, A. M. Hutchinson, Theodore Kinney, M. McHugh, J. Rice, H. Rupke, J. S. Taylor,

L. Taylor, A. C. Morse, A. Conhor, Thomas Riley, C. Alexander and Richard Fourra. Company H—Killed or died of wounds, Corps. Timothy Kelleher, Robert J. Cutts, Edward Carver and George A. Smith, Privates James Andrews, S. Hitchcock, Hiram Kerney, Fred Murden, John Wright, Thomas Adams and James Fulks; wounded, Privates Curtis Chandler, John Bowden, F. M. Dillon, Chauncey Hitchcock, John Shultis, Mark Smith, John R. Arms, James Bishop and John McCubbin.

Lieut. Col. Finnicum was also wounded at the Wilderness.

On the 12th of June, the "Iron Brigade" crossed the Chickahominy and proceeded to the vicinity of Petersburg. On the 18th, they moved against the enemy's fortifications on the west side of the Norfolk & Petersburg Railroad, the Seventh on the right of the brigade. In the afternoon, they advanced against the works of the enemy, under a galling fire. Owing to the hesitancy of the line on their left, the Seventh were obliged to come to a halt within a hundred yards of the enemy's works. In the meanwhile, the regiment was without connecting line on its left, that line having found shelter in a ravine. The ground was held under these disadvantages for an hour and a half, during which they suffered badly from the enemy's fire. The only shelter they received was from a slight slope of the ground in front of them. The Union batteries were firing over the heads of the Seventh, in order to prevent the enemy from leaving his works, and, in consequence of the lowness of the object aimed at, many shells fell in close proximity to the regiment. With the aid of a few shovels, aided by plates and bayonets, the men endeavored to throw up a line of breastworks. Maj. Richardson ran the gantlet of fire and reported the condition of the regiment at headquarters, but his application for succor was without success—relief could only be afforded by a general assault. Before the impromptu works were finished, the enemy advanced to within seventy-five yards of their left flank, and, at the same time, a heavy skirmish line marched by the right flank from the rear of the rebel line on the left of the regiment and directly in their rear, being covered by a hill. Part of the Seventh opened fire on the left and part faced to the rear and delivered their fire on the rebel skirmish line. Thus fighting, so long as a chance remained of holding the ground, the Seventh was finally compelled to fall back to the right and rear through a terrible fire, and in the end occupy nearly the same position from which they had started in the morning. Lieut. Col. Finnicum commanding the regiment, spoke in highly complimentary terms of Maj. Richardson and the officers of the line, and paid a well-merited tribute to the dogged bravery of the whole regiment.

The loss from this seemingly mistaken move was as follows: Company C—Killed or died of wounds, Privates George Will and William Howard; wounded, Sergt. W. Beasley, Privates James Hedges, John Cavanaugh and R. M. Nixon. Company F—Killed or died of wounds, Sergt. C. G. Parker, Corporal John D. Runnion, Privates Martin Calvert and William B. Pauley; wounded, Privates F. A. Boynton, George Eustice, Thomas Blunt, Henry P. Green, A. C. Morse, J. R. Miles, Joseph Storehouse and Orrin Weymouth. Company F—Killed or died of wounds, Second Lieut. Thomas Tanner, Corporal George Page, Private James Bishop; wounded, First Lieut. Charles Fulks, Privates James Chapman, Livingston Wagers and Silas Streeter.

On the 3d of August, Lieut. Col. Finnicum was promoted as Colonel, and Maj. Richardson as Lieutenant Colonel of the Seventh.

The regiment remained in the front line on the left of Petersburg until August 18, and then marched to the Yellow House. Here, in an attack upon the Union forces by Gen. Mahone, the Seventh occupied the right of the skirmish line. The enemy succeeded in breaking the line to the left of the Seventh, and, in the fight that ensued, the regiment captured twenty-six prisoners, being fortunate enough not to lose a single man. The Seventh rejoined the brigade on the 20th on the west side of the railroad, where breastworks were thrown up. Here they were attacked the next day by the enemy, but the onslaught was gallantly repulsed, the Seventh capturing the colors of the Sixteenth Mississippi in the melee. During the remainder of the fall and early winter, the Seventh was engaged in routine siege duties. On the 29th of December, Lieut. Col. Richardson was promoted to the colonelcy of the regiment. February 6, the

brigade took part in the engagement at Dabney's Mill, where the Seventh fought with their usual valor. The losses in these fights were as follows: Company C—Killed or died of wounds, Private Alvah E. Daggett; wounded, Private W. R. Glenn. Company F—Wounded, Corporal George Atkinson. Company H—Killed or died of wounds, Private John Wanyack; wounded, First Lieut. S. C. Alexander, Privates Thomas Howard and E. L. Riley.

In the middle of February, the brigade was ordered to Baltimore, but this order, so far as it related to the Sixth and Seventh Wisconsin Regiments, was afterward countermanded, and they were re-organized as the "First Provisional Brigade," under command of Col. Kellogg, of the Sixth.

On the 29th of March, the Seventh took part in the action near Boydstown Plank Road, where they ably sustained their former reputation.

On the 1st of April the regiment participated in the battle of Five Forks. Quiner, speaking of this encounter, thus notices the action of the Seventh on that day: "In the afternoon the Seventh Regiment occupied the advanced line on the left of the brigade with the Sixth Wisconsin on the right. Companies B and E of the Seventh, were deployed as skirmishers, covering the brigade front. Advancing in line of battle the enemy's advance was driven through the woods back upon their intrenchments at Five Forks. Gen. Sheridan ordered Col. Richardson to move over the enemy's works, which the gallant Colonel obeyed, wheeling to the right and charging the enemy through the open field, driving them through the woods, following their retreating columns, and again charging them through a second open field. Night coming on, the brigade fell back two miles and went into position behind the breastworks captured from the enemy. On the second, the brigade continued the advance, and found the enemy intrenched further on. The Seventh was deployed as skirmishers and ordered to cover the whole line of battle. The enemy retreating again, the pursuit was resumed, marching by day and night, working to throw up breastworks until the 9th of April, when the Seventh had the pleasure and proud satisfaction of being in "at the death," and assisting in the capture of Gen. Lee's army at Appomattox Court House. Col. Kellogg, in his report, after complimenting regimental and line officers of the Seventh and Sixth, made special mention of the following members of the Seventh for marked valor and daring courage: Color Sergt. George W. Davis, of Company C, for gallant conduct in carrying the regimental standard into the thickest of the fight, nothing daunted by the iron hail or glittering steel; also, Sergt. Maj. Booth; Sergt. John Harrison, of Company E; Sergt. Hugh Evans, of Company G; Sergt. Albert O'Conner, of Company A, and Sergt. William H. Sickles, Company B. In this campaign the following losses were reported:

Company C—Killed or died of wounds: Private, John Larnek. Wounded: Corporal, John W. Robinson; Privates, Nehemiah Leech and Arch Van Allen. Company F—Killed or died of wounds: Sergeant, Isaac Ream; Corporal, Thomas Blunt; Privates, Frank Geneva and Joseph Wilkinson. Wounded: Lieutenant, Jesse M. Roberts; Sergeant, Nathan Bradbury; Corporal, Thomas W. Reilly; Private, Simon Heinrich. Company H—Killed or died of wounds: Private, Jacob Johnson; wounded, Corporals, William Costley and Lewis H. Thomas; Privates, Edwin Angelo, John R. Ames, Charles Sawyer and D. A. McLinn.

After Gen. Lee's surrender, the Seventh went into camp at Black and White's Station, where they remained until ordered to Washington to participate in the grand review of May 23, and remained there until the 17th of June, when they were ordered to Louisville, Ky. Here the Seventh was assigned to the First Brigade of Gen. Morrow's "Provisional Division," remaining until July 2, when they were mustered out and started for home, arriving at Madison on the 5th of the same month, where they were received by the State authorities, paid off and the regiment formally disbanded, closing the eventful history of what was, undoubtedly, one of the finest regiments in the service. By way of postscript, it might be added that Col. Richardson, for gallant and meritorious services in the final operations around Petersburg, and especially at Five Forks, was brevetted Brigadier General. Lieut. Col. Callis, after recovering in a measure, from his wound, and though still carrying rebel lead in his lungs, returned to the front

H. Hargraves

LANCASTER.

and was appointed Colonel of the Seventh Veteran Reserves, and Superintendent of the War Department, where he served with distinction and honor. He was brevetted Brigadier General for distinguished and meritorious services March 13, 1865. He was afterward in command of the Northern District of Alabama, and was from there elected to serve as Representative from that district in the Fortieth Congress, where the General had the honor of introducing the first "Ku Klux bill," designed to protect the suffering freedmen from the tender mercies of these midnight marauders and assassins.

Tenth Regiment.—The Tenth was organized at Camp Holton, Milwaukee, and mustered into the service of the United States October 14, 1861. The companies from Grant County in this regiment were Company F, Capt. Palmer, raised in the southern part of the county, and Company I, Capt. Overton, raised at Platteville. The officers of the former company were Capt. William H. Palmer, First Lieutenant; Edward D. Lowry, Second Lieutenant; Armisted C. Brown. Of the latter: Captain, C. T. Overton; First Lieutenant, Harvey H. Fairchild; Second Lieutenant, John Small.

The regiment was sent first to Kentucky after leaving the State. They were here engaged in guarding railroads for a short time, when they were assigned to Col. Sill's Brigade, Third Division. The tenth formed part of the column that moved north to Murfreesboro.

On the 5th of April, the regiment resumed its march as far as Huntsville, where they remained engaged as railroad guard until the retrograde movement, caused by Bragg's invasion of Kentucky, was commenced, when the Tenth acted as rear-guard. The casualties in this campaign are reported as follows: Company I—killed, Privates, Thomas Denlan, G. W. Hancock and Henry Reed. Company F—Private, Thomas Helgus, died of wounds. Company I—Private, Richard White, August 23.

The Tenth was soon after transferred to Col. Harris' brigade in Gen. Rosseau's division, and there took part in the battle of Chaplin Hills. Here they signalized themselves by their bravery in defending Simmons' battery, holding their ground against the enemy until supported by the Thirty-eighth Indiana. Their ammunition was exhausted, and the cartridge-boxes of the wounded and dead used, and for a half-hour previous to the coming of their support this stubborn band of heroes held their position with bull-dog pertinacity without a cartridge. Forty-one bullets passed through the regimental colors, and two through the staff, and it was the Sixth Color Corporal that finally bore them in triumph off the field. The list of killed and wounded was as follows: Company F—Killed or died of wounds, Corporals, Philip L. Glover and Abner M. Dodge; Privates, David E. Lumpkins, Mark C. Bowen, William P. Eagers, Marcus L. Gleason, Frank M. Shoemaker and Robert Jarrett. Company F—Wounded, Sergt. James Killgore; Privates, Benjamin Bass, John Singer, Daniel Boyle, J. D. Costello, J. M. T. Lathain, D. B. Robinson, William Pierce and B. B. Taft. After taking part in Rosseau's advance near Murfreesboro, where private R. F. Crosby, of Company F, was wounded, the regiment went into camp where it remained until June. In the re-organization of the army the Tenth was included in the First Brigade of the First Division, Fourteenth Corps, under Gen. Thomas. Under this leader, the regiment participated in the battle of Chickamauga. On the second day's fight, after numerous vicissitudes, the Tenth found themselves late in the afternoon compelled to fall back with the rest of the brigade. No rallying-point being obtainable, the Tenth Regiment made for a point where they supposed they would find the Union forces in position, but, contrary to expectation, ran upon the rebel line. Here they were quickly surrounded, and the entire regiment, or what remained of it, with the exception of Company G, which was guarding a supply-train, consisting of twelve officers and one hundred and eleven men, fell into the hands of the enemy. On the morning of the 21st, the regiment numbered three officers and twenty-six men, but, although obliged to surrender, the regiment had nobly sustained its reputation for bravery. The casualties reported were: Company F—Killed and died of wounds, Lieut. Robert Rennie, Sergt. P. H. Northey; Private Thomas M. Jewell. Company F—Wounded, Corporal S. Harklerood; Privates, A. S. Tarcott, E. M. Donell, J. E. Strong, J. J. Crosby and B. P. Taft. Company F—Made prisoners, Sergt. Bratnober; Corporals P. Cahill and A. Gattwells; Privates H. Schlosser, J.

J. Shoemaker, W. Pierce, E. B. Tyler and R. Langstaff. Company I, Capt. Perry, Lieuts. Fairchild and Butler; Sergts. W. Felson, M. Colligan, W. M. Bush and D. T. Parish; Corporals B. Bower, T. Curtis and C. Fish; Privates J. H. Trevis, H. H. Winter, R. W. Randall, W. Richards, D. Eastman, J. Wall, William Reines, H. Talbott, H. Shrigley and F. Grosch.

The remnant of the regiment remained in camp at Chattanooga employed in guard and other duties, where it remained during the winter, with the exceptions of taking part in the assault on Mission Ridge, and a feint on Dalton, Ga. Eighty-five recruits joined the regiment in 1864, which, with Company G, and the few remaining after Chickamauga, made a small command that participated in the stirring events of that section until October 16, when the recruits and veterans were united with the Twenty-first by order of the War Department, the remainder starting northward and arriving at Milwaukee on the 25th of the same month, where they were mustered out of the service.

Those who were taken prisoners at Chickamauga remained in rebel prisons for thirteen months, many of them falling victims to the atrocities of the prison-pens at Salisbury, Millen and Andersonville.

Twenty-fifth.—This regiment was organized in September, 1862, under the call of July 1 for 300,000 additional troops. The companies assigned to this regiment rendezvoused at Camp Salomon, La Crosse, and were mustered into the United States service on the 14th of the following month. In this regiment were the following companies from Grant County: C, E, H and I. Of these, Company C, Capt. Farquharson, was organized at Lancaster; Company E, Capt. Scott, was organized about Platteville; Company H, Capt. Swan, at Potosi; and Company I, Capt. Nash, in the vicinity of Sinsinawa Mound. The company commissioned officers were: Company C—Captain, H. D. Farquharson; First Lieutenant, L. S. Mason; Second Lieutenant, Thomas Barnett. Company E—Captain, John G. Scott; First Lieutenant, John W. Smelker; Second Lieutenant, John M. Shaw. Company H—Captain, Ziba S. Swan; First Lieutenant, Charles F. Olmstead; Second Lieutenant, Henry C. Wise. Company I—Captain, Robert Nash; First Lieutenant, Daniel N. Smalley; Second Lieutenant, John F. Richards.

On the 19th of October, the regiment left the State for St. Paul, to assist in quelling the Indian insurrection. Capt. Nasmith, formerly of Company C, of the Seventh, had received the appointment of Lieutenant Colonel of the Twenty-fifth.

Arriving at St. Paul, part of the regiment under Lieut. Col. Nasmith was sent to Sauk Center and places in that vicinity, while the remainder, under command of Col. Montgomery, was sent to New Ulm and that section of the State. Here they remained, with no incidents of a striking nature, until the latter part of November, when they received orders to return to Winona, and thence to La Crosse and Camp Randall. In February, 1863, the Twenty-fifth left the State for the South, reporting first at Cairo, and from there moving to Columbus, Ky. Here it was attached to the Sixteenth Army Corps, under Gen. Hurlburt. In April, the regiment was sent to resist Marmaduke's attack on Cape Girardeau, but their aid was not needed, and they returned to Columbus and their regular routine of picket duty. In the latter part of May, the Twenty-fifth proceeded down the Mississippi to Young's Point, and thence up the Yazoo River to Satartia, where they went into camp and were assigned to a brigade which was placed under the command of Col. Montgomery, in Kimball's Provisional Division. June 16, the Twenty-fifth left this position and proceeded to Snyder's Bluff, where they formed part of the force surrounding Vicksburg. Here they remained, with occasional change in the shape of short but futile expeditions against the enemy, until the 25th of July. The position occupied by the regiment was extremely unhealthy, and the sick list showed a footing of 500 men at one time, and very few of what were left were fit for duty.

On July 26, the regiment left Snyder's Bluff and moved up the Mississippi River to Helena, where it was detached from the brigade and assigned to provost guard duty. Col. Montgomery was placed in command of the post. Here almost the entire regiment was placed in the hospital. The excessive sickness which the Twenty-fifth suffered was charged to

former rapid marching and excessive heat. At one time, only fifteen men were reported fit for duty in the whole regiment, and only two Captains—Farquharson and Gordon—the former being in command of the regiment, and the latter acting as Provost Marshal. Lieut. Col. Nasmith and Maj. Rusk were absent, sick. The former afterward succumbed to the disease which had fastened itself upon him, and died at his home in Platteville in the August following. Maj. Rusk being advanced to the Lieutenant Colonelcy.

The regiment left Helena in February and moved down to Vicksburg, where they joined Gen. Sherman's Meridian expedition, and did good service in inflicting serious damage on rebel property. March 13 the Twenty-fifth—the division to which it was attached—proceeded up the Mississippi to Cairo, and thence up the Tennessee to Waterloo, Ala., from which place they marched via Florence, Athens and Mooresville, to Decatur, Ala., where they joined the other division of the Sixteenth Corps under Gen. Dodge. In May, the Twenty-fifth proceeded to Chattanooga to join the forces of Gen. Sherman. Here they, as a portion of the Sixteenth Army Corps, formed part of the Army of the Tennessee under Gen. McPherson. The Twenty-fifth took part in both advances on Resaca. In the engagement of the 13th, the regiment was in the front line as a support to a battery; on the succeeding day, they, late in the afternoon, joined the Fifteenth Army Corps for an attack upon the enemy's works on the extreme left. The Twenty-fifth signalized itself that day by charging across an open plain to relieve the Thirtieth Iowa, which had run out of ammunition. Here, despite the fact that the enemy charged fiercely three successive times, they held the crest of the hill and repulsed each attack with heavy loss to their assailants. During this encounter, Company C was absent on picket duty, but their adventures in endeavoring to find their regiment were fully as exciting to the participants as adventures that have found their way into chronicles of the time. During the night the regiment threw up a slight breastwork, from behind which they engaged in skirmishes the next day. The gallant action of the Twenty-fifth on the 14th, received most flattering notice from Brig. Gen. Wood, who was in command of the Fifteenth Corps. The loss during these engagements was reported as follows: Company C—Killed or died of wounds, Private B. Seitz; wounded, Private, J. W. Tuckwood. Company E—Wounded, Privates M. Cornell, E. H. Moore, Charles Richey and Patrick Henry. Company H—Killed or died of wounds, Sergt. Thomas H. Clark; wounded, Privates Joseph School and Bartholomew Stoll.

The regiment joined in the pursuit of the enemy, and from May 27 to May 31, the casualties were Company I—killed, Private S. Taylor; Company E—Wounded, Private Emory Blanchard; Company H, Private Dewald Garner. Still onward went the Twenty-fifth, taking part in Gen. Sherman's flank movement to drive the enemy from Allatoona. The regiment moved to the left, and took position near the Big Sandy, where it remained until June 10, when it again moved southward against the enemy's lines, between Pine and Kenesaw Mountains. Here they were occupied in throwing up defenses and skirmishing. On the 15th, five companies of the Twenty-fifth, with companies from New York and Ohio regiments, deployed as skirmishers and attacked the enemy's rifle-pits at Peach Orchard, carrying them and taking a number of prisoners. The loss was: Company I—killed, Corporal Joseph Nelson; wounded, Corporal William Longbotham; Privates, Wilkins, William Swansey, Henry Drink and John Loffelholz. On the enemy retiring his lines, the Twenty-fifth, with the remainder of the division, advanced nearer Kenesaw Mountain. On the 3d of July, the army, or that portion in front of Kenesaw, began to move to the right and left. At Nickajack Creek, the Sixteenth Corps had a heavy skirmish with the enemy. On the 9th, this corps moved to the rear, and, after marching and countermarching, the brigade appeared within three miles of Atlanta, but was on the succeeding day ordered back to guard the flanks covering the trains. On the day following, July 22, they were attacked by two divisions of Wheeler's dismounted cavalry. Col. Montgomery, with Companies B, E, F and I, and four companies of the Sixty-second Ohio, were ordered out to ascertain the position of the enemy. The road up which the skirmishers advanced was bordered on the one side by a swamp, narrow but impassable, while on the other, a deep, miry ditch presented itself. Some distance from the swamp, Company F and an Ohio company, under command of

Lieut. Col. Rusk, met the enemy, and were driven down the road to the reserve. The enemy now advanced in strong force, and Col. Montgomery moved the reserve by the left flank, and, in attempting to pass the ditch, his horse sank in the mire and the Colonel was wounded and captured. Lieut. Col. Rusk, after holding the enemy in check for some time, was forced back, and in the retreat barely escaped capture. The force was obliged, however, to fall back through the town, but finally the enemy was checked and the trains saved. The loss to Grant County companies was as follows: Company C—Wounded, Sergt. Z. Thomas; Privates, C. C. Coates, Charles Croft, Newton Doty, Isaac O. Murray, Charles O. Jones, Henry Julius and Warren D. Wordon. Company E—Killed, Second Lieut. William H. Quibble; Corporal William H. Bailey; Privates, Marion High, Ransom J. Bartle, Thomas C. Dougherty, John Grover, George Lafollet and Charles Rickey; wounded, Sergt. B. F. Bailey; Corporal George Douglass; Privates, George M. Thomas, Fred Stanover, Benjamin C. Durley, J. N. Clifton, W. T. Long, J. M. Rosey, Jacob Eiserman and Elias Worley. Company H—Killed, Private Howard Finley; wounded, Privates B. Stell and Robert Crouch. Company I—Wounded, Privates S. P. Muffley, Sylvester Woody and Patrick Kees. Twenty-five men from the Twenty-fifth were also reported missing. The regiment soon after moved to the works before Atlanta, and remained engaged in camp duty and siege work until October, participating in a few skirmishes, and losing in wounded: Company C—Corporal J. T. Wilkinson and Private D. Scribner. Company E—Corporal Edward Bentley; Privates Jacob Eiserman, James R. Hudson and Jacob Shafer. Company H—Sergt. Edward McTael. Company I—Corporal Levi Pretts and Private John Loffelholz. In October, the Twenty-fifth took part in the pursuit of Hood, and then returned to Atlanta, where preparations were in progress for that march which was to remain ever among the movements of the war the most prominent—"the march to the sea." Upon leaving Atlanta, on the 15th of November, the Twenty-fifth acted as train guard as far as Monticello. On the 20th, they were relieved from that duty and joined the brigade. From this point the regiment was engaged in destroying railroad, and foraging. Upon arriving at Toombsboro, they were detailed as ponton guard, the Engineer Corps being placed under command of Lieut. Col. Rusk. The enemy was again encountered December 9, but retired without offering battle. On the succeeding day, the regiment came upon the enemy's breastworks, but found, after advancing within several hundred yards of them, that a dirty bit of swamp lay between. They, however, held their position until relieved by the Fourteenth Army Corps the following day; the loss was one killed, Louis Buchacher, of Company H. On they went, resting for short spells, and again taking up their line of march, skirmishing, marching, defending important positions, but always pressing forward. In this manner, they passed down through the remainder of Georgia through Savannah, which was presented as a Christmas gift to President Lincoln by Gen. Sherman, and proceeded to Beaufort, where they encamped early in January, 1865.

On January 13, the march through the Carolinas commenced, and the regiment crossed the Pocotaligo on pontons and bivouacked within one mile of the fort, which the enemy evacuated during the night.

On the Salkahatchie River the Twenty-fifth met the enemy and routed him from a temporary breastwork. This was on January 20. February 2, four companies, C, E, I and K, were advanced under command of Lieut. Col. Rusk, as skirmishers. The swamp through which they were obliged to advance, though not touched by rebel hands, was amply fortified by nature. Cypress limbs projected in the most unexpected places, while the treacherous miry bottom would admit the unwary skirmisher anywhere from ankle to hip. To add to the delights of soldiering in this particular instance, the way was impeded with a species of brush which seemingly grew thorns and nothing else. One officer remarked in proof of the insinuating proclivities of these brush, that he went in with a handsome dress-coat, and came out in a roundabout; the remainder was retained to remember him by. The objective point was a rebel battery on the opposite side of the main channel of the river. The covering of the bridge having been torn up by the rebels, and timbers carefully set corner-ways, the chance of crossing seemed reduced to the minimum, especially as the river was too deep to ford, and the enemy had trained a battery

in position to sweep the road. In this dilemma, two trees, from whose roots the dirt had been washed away by the current, causing them to lean across the stream, were discovered by Capt. Farquharson, in command of the advance skirmish line. Obtaining an ax, a few blows on the landward side parted the retaining roots and, presto! and an excellent bridge was provided. Over this improvised structure the whole brigade passed that night, and, flanking the rebel battery, compelled it to "pull up" to avoid capture, and the brigade passed on, driving the enemy from the high ground and opening a road for the advancing army. Among the minor incidents of the Salkahatchie troubles might be mentioned two that would bring to Grant County veterans a vivid remembrance of the scene. The rebel battery, trained as it was on the road over which the troops were passing, was doing much damage. When it occurred on an enterprising Badger, named Clough, a member of Company C—who, as the skirmish line advanced, had found himself close by the dismantled bridge—that a cypress on the opposite bank afforded a peculiarly enviable position from which to pick of the gunners of the battery. Whether he swam the river or crawled over on the sharp-edged stringers of the bridge, was not known, but suddenly the attention of his comrades was called to the fact that Clough was across, and from cover of the cypress coolly blazing away at the "rebs." Here he remained until he had expended on the enemy 300 rounds of ammunition. As his position was only secure so long as he kept under cover of his cypress defenses, Badger's stock of ammunition was kept up by supplies from his friends "across the water," who continued to toss cartridges over until darkness prevented the marksman from doing further service, and allowed of his safe retreat.

Still another serves to illustrate the fund of dry humor and promptness to act in any and all emergencies, which characterized not only these, but all members of "Sherman's boys." The General in command of the brigade, Mower, had advanced to the front of the skirmish line, anxious to ascertain if the main channel of the Salkahatchie had been reached. Its depth, as has been seen, presented an obstacle to the further advance of the army. The General, deceived by the appearance of the stream, held the opinion that it was fordable, a point which was disputed in an emphatic manner by the Captain in command of the skirmish line. "I think, Captain, the stream can be forded," finally replied Gen. Mower, closing the conversation. During the discussion, Private Lowry, of Company C, Twenty-fifth Wisconsin, had been standing near. As the words passed the mouth of his General, equipped as he was, and musket in hand, Lowry sprang into the river and swam to the center of the channel. Reaching this point, he extended his gun at arm's length above his head, and with the cry, "Oh, yes, General, this can be forded!" sank, gun and all, out of sight. It is needless to say that the General reversed his decision. At this point Company I lost Sergt. William Tomlinson, killed.

On the 9th of the same month the enemy were again encountered, at South Edisto. Here the Twenty-fifth led the advance, and swinging around through a swamp threw a ponton bridge across the stream, and, advancing through mud and water, charged the enemy's works and dislodged him. At this point the men suffered severely from cold, their clothes freezing on them until, in the language of a participant, "they rattled like sheet iron," as they walked. Reaching Columbia, they served for a short time as provost guard, but were soon after ordered to Wilkes' Mills, on Juniper Creek, where they were employed in grinding corn for the division until March, when they proceeded forward. On the 15th, at South River, the regiment again was in the advance, and with other forces again charged the rebels, routed them, and secured a safe passage for the army over the river. In the attack on Goldsboro, the Twenty-fifth acted as a support to the forces charging the enemy's works, and, on March 23, they crossed the Neuse River and entered the city. Arriving at Raleigh on the 14th of April, upon the surrender of Johnston's army, the regiment joined the line moving northward, reaching Richmond May 13, and Washington on the 24th of the same month, where they participated in the grand review of Sherman's army. They then went into camp at Crystal Springs, where the regiment was mustered out June 7, and started for Wisconsin, arriving at Madison on the 11th of the month. They were then paid off and disbanded.

Thirty-third.—This regiment was organized at Camp Utley, Racine, in the fall of 1862. Col. Jonathan B. Moore, formerly Sheriff of Grant County, had been appointed to the com-

mand of the regiment and Horatio A. Virgin received a commission as Major in the same. This action of the Governor was viewed with the greatest approbation, being considered as a recognition of Grant County's services which had previous to this time been entirely ignored, but two field officers having been allowed to this county—Lieut. Col. McKee and Lieut. Col. Nasmith—which had sent out over two full regiments. In the Thirty-third went three companies from Grant. Frank's, Earnhart's and Burdick's. Besides these full companies, Company A, Capt. Moore, was made up in a great measure of Grant County men that had been enlisted by George B. Carter, who went out with the company as First Lieutenant.

The other companies in regimental organization became Companies B, D and G, with officers as follows: Company B, Captain, George R. Frank; First Lieutenant, George Haw; Second Lieutenant, Andrew Burchard. Company D, Captain, William S. Earnhart; First Lieutenant, Uriah F. Briggs; Second Lieutenant, Noble L. Warner. Company G, Captain, Frank B. Burdick; First Lieutenant, George E. Harrington; Second Lieutenant, Elliot N. Liscom.

The regiment was mustered into the United States service October 18, 1862. Leaving the State the succeeding month, they proceeded down the Mississippi to Memphis, where they were assigned to a brigade in Gen. Lawman's division, Gen. Sherman's wing of the "Army of the Tennessee." Col. Moore was here placed in command of the brigade, the command of the regiment falling upon Lieut. Col. Lovell. After participating in the movement toward Jackson, Miss., the regiment returned to Memphis, where it was transferred to the Fourth Division, at the request of Gen. Lawman, who had been ordered to take command of that branch of the army. This division was afterward transferred to Gen. Hurlburt's Sixteenth Army Corps. In April, 1863, the regiment formed part of the force that marched on Coldwater. Company B had one wounded on this expedition, Sergt. Bliss, other companies escaping unscathed. On the 25th of May they took position in the lines investing Vicksburg. On the 30th of June, Company D, forty men under Capt. Warner, supported by Company F and two companies from an Illinois regiment, moved forward under a heavy fire from the enemy's main works, and took possession of the rebel rifle-pits under one of their strong forts. Capt. Warner soon after stormed the top of the hill, drove the enemy back and took possession of the pits. They afterward were obliged to fall back, being exposed to enfilading fire at short range, but the position was again re-taken the next evening. Capts. Warner and Carter with eighty men from the Thirty-third, and assisted by an Illinois regiment, obtained a position so near the enemy, that making a sudden charge they took the rebels by surprise and the hill-top was soon secured in such shape as to resist all attempts of the enemy to dislodge the gallant Thirty-third. This point was afterward relinquished by other troops, but again re-taken by Companies C and H supported by companies A, D, E.

The casualties during the siege were: Company B—Killed or died of wounds, Private Absalom Barger; wounded, Privates Samuel Armstrong and Peter Fillmore. Company D—wounded, Private George H. Farman.

The Thirty-third, after the surrender of Vicksburg, took part in the second attack upon Jackson and the "Meridian expedition" of Gen. Sherman. On the 9th of March, 1864, they joined the "Red River Expedition" and took part in the numerous encounters of that march. After the battle of Pleasant Hill, special mention was made of Sergt. Ewbank, of Company D, who, with his platoon, rendered effective service at this fight. At the battle of Simmsport Eugene M. Clayman, of Company B, was killed. Soon after they reached the mouth of the river and proceeded up the Mississippi to Vicksburg. During this campaign, Maj. Virgin was in command of the regiment. Col. Moore being in command of the division. The 22d of June the regiment accompanied Gen. Smith on his march into Mississippi. At the bloody battle of Tupelo, the Thirty-third held the extreme right of the front line and especially distinguished itself for conspicuous gallantry. The losses during this expedition were as follows: Company G—Killed or died of wounds, Private James Coleman. Wounded, Privates W. W. Bruce and August Jacob. Company D—Wounded, Corporals Lewis Billings and Ira W. Tracy; Privates Horatio

G. Atwood, Rufus J. Allen and George H. Farman. During the fall the regiment was engaged in a wearisome campaign in Arkansas and on the 30th of November, having been ordered to Nashville to re-enforce Gen. Thomas, they arrived at that city. The record of the regiment from this time is comprised principally of uninteresting movements and a few minor skirmishes, until in March, 1865, they joined in the attack upon Spanish Fort. The fort was evacuated by the enemy on the night of April 8, and on the morning of the 9th the Thirty-third entered the fort, being the first regiment to do so. There they captured two Napoleon guns and a number of prisoners. Following is given a list of casualties around Mobile: Company D—Killed or died of wounds, Corporal M. C. Pember. Wounded, Sergts. John Leighton and James Delevan; Privates D. S. Barlow, John Martin and Richard Lander. Company B—wounded, Private John Andrews. After the surrender of the city of Mobile, the Thirty-third moved to Montgomery, Ala., and did guard and picket duty until they were ordered to Vicksburg to be mustered out, at which place they arrived on July 31. Here the regiment was mustered out and started for Madison, where in August it was formally disbanded. At this time the *State Journal* speaking of this regiment said: "Few of our regiments have seen more or severer service than the Thirty-third, and its record is untarnished by any cowardly or dishonorable action."

Forty-first.—The Forty-first Infantry was organized at Madison, and mustered into the United States service at Camp Randall, under the call for one hundred day troops. In this regiment Grant County was represented by one field officer, Maj. D. Gray Purman, and Company A., Capt. Schlosser. The officers of this company were: Captain, Peter J. Schlosser; First Lieutenant, John Grindell; Second Lieutenant, George L. Hyde. The Forty-first left the State June 15, 1864, and proceeded to Memphis, where, in conjunction with the Thirty-ninth, also one hundred day men, it was assigned to the Third Brigade, and was placed on picket and guard duty, relieving the veteran regiments, who were then sent to the front. Here the Forty-first remained until their time of service expired, meeting the enemy in force but once, when, in August, Forrest's cavalry made a dash into Memphis. On this occasion, though taken by surprise, the regiment behaved with great coolness and bravery.

Their term of service having expired, they returned home, and were mustered out of service in September. Their services, with that of the other hundred day troops, was handsomely acknowledged by President Lincoln, who, in addition, directed the War Department to cause a certificate of their services to be delivered to officers and men. These certificates were gotten up in handsome shape on parchment, and afterward distributed through the State Adjutant General's office.

Forty-Third.—This regiment was recruited under the call of July, 1864, and left the State for Nashville, Tenn., in October of the same year. Company H, of this regiment was from Grant County, being officered as follows: Captain, William W. Likens, First Lieutenant, Elijah Lyon; Second Lieutenant, Thomas O. Russell. Arriving at Nashville, the regiment, under orders, proceeded by rail to Johnsonville, on the Tennessee River, where it encamped, on October 15. This place was an important depot for supplies, and was the terminus of the military railroad from Nashville. At the time, this important point was menaced by the approach of the forces under Gen. Hood. The enemy, on the 4th of November, posted themselves on the opposite bank of the Tennessee and opened fire, but came no nearer. The Forty-third remained at Johnsonville until November 30, and then marched by way of Waverly, through an almost unbroken wilderness, to Clarksville, on the Cumberland River, where it arrived on the 4th of December. Remaining until the 28th, they moved up the Cumberland River to Nashville. On the 1st of January they left Nashville, and moved to Dechard, Tenn., by rail, where six companies went into camp, and four companies, under command of Maj. Brightman, were detached to guard Elk River bridge. Here they remained engaged in provost and guard duty on the line of the Nashville and Chattanooga Railroad. In the beginning of June they returned to Nashville, and were mustered out of the service, soon after returning to Milwaukee, where they were disbanded.

Forty-Fourth.—The Forty-fourth Regiment of Wisconsin Volunteers was organized under the call of July, 1864, and a portion of the companies belonging to the regiment were sent forward during early fall to reenforce Gen. Thomas at Nashville. The remaining companies joined their comrades at that point, in February, 1865, where the regiment was first formally organized. Grant County was represented in this regiment by Company K, officered as follows: Captain, William H. Beebe; First Lieutenant, Arch. W. Bell; Second Lieutenant, William H. Peckham. This company was organized in the vicinity of Platteville. The regiment, after its organization, was employed in post and guard duty at Nashville. They remained here until March, when they proceeded to Eastport, Miss., and after remaining a short time, returned to Nashville, and on the 3d of April proceeded to Paducah, Ky., where they were employed in picket duty until the 28th of August. They were then mustered out of the service. The regiment left Paducah on the 30th of the month, and on the 2d of September, arrived at Madison, where they were paid off and disbanded.

Forty-seventh.—In this regiment was Capt. Baxter's company, organized in Grant County, its officers being as follows: Captain, Charles H. Baxter; First Lieutenant, John Grindell; Second Lieutenant, Edwin Bliss. The company made Company K of the regimental organization. The regiment left the State in February, 1865, and proceeded to Louisville. Soon after they were ordered to Nashville, and thence to Tullahoma, at the junction of the McMinnville & Manchester Railroad with the Nashville & Chattanooga Railroad. Here they were employed in guard duty until the latter part of August, when they returned to Nashville, where they were mustered out, and returned to Wisconsin, arriving at Madison on the 8th of September, where they were paid off and disbanded.

Fiftieth.—This regiment was recruited and organized under the superintendence of Col. John G. Clark, of Lancaster. Col. Clark had gone out early in the war as Quartermaster of the Fifth, serving with honor to himself and benefit to his regiment. Upon the passage of the conscription act in 1863, Quartermaster Clark had been appointed Provost Marshal of the Third Wisconsin District, as stated heretofore, with headquarters at Prairie du Chien. At this post he remained until the beginning of 1865, when he received a commission as Colonel of the Fiftieth Wisconsin Volunteer Infantry. This regiment was made up from different portions of the State, Grant County sending a portion of Company H, the officers being as follows: Captain, Charles H. Cox; First Lieutenant, John C. Cover; Second Lieutenant, Jerome White. Besides this company, there were many others of Grant County's representatives scattered through the regiment. The Fiftieth left the State by companies in the latter part of March and the beginning of April, 1865, and proceeded to St. Louis, where they went into quarters at Benton Barracks. The regiment was afterward divided over the State of Missouri, engaged in guard and picket duty. Col. Clark was placed in command of the district about Jefferson City, with headquarters finally at that place. From here the regiment was sent to Kansas City, and from there to Fort Leavenworth. There the Fiftieth assisted in quelling a mutiny which broke out in the Sixth Virginia, and spread through other regiments clamoring to be mustered out. For their action at this time the following complimentary acknowledgment was transmitted to the commanding officer by Brig. Gen. Stalbrand, commanding the division: "With the most unqualified pleasure, I accord to yourself and your regiment the well-deserved merit of full and unalloyed subordination, the steadiness and devotion to duty so unmistakably exhibited by your command, tells the observing that care and skill in his functions have been exercised by the commander. May you long have the pleasure of controlling and perfecting an organization so promising." During the succeeding fall, the regiment was ordered to Fort Rice, Dakota Territory, where Col. Clark was placed in command of the post. The Fiftieth remained here until the summer of the succeeding year, when they were ordered to Madison, and mustered out June 14, 1866.

Second Cavalry.—During the fall of 1861, a company for the cavalry was organized in and about Patch Grove, by Rev. R. R. Wood. They were ordered to rendezvous at Milwaukee, and accordingly on Monday, December 23, they took their departure for that city. Previous

to their departure, the company was presented with two flags, after which, in the evening, they were entertained at a concert given by the local talent of Patch Grove. The next morning the command was up bright and early and took up their line of march for Bridgeport, where they took the cars for their place of destination. They went into quarters at Camp Washburn, and were afterward mustered into the United States service as Company C, Second Wisconsin Cavalry. On the 24th of March, the regiment left the State for St. Louis. Company C was officered as follows: Captain, Reuben R. Wood; First Lieutenant, Myron W. Wood; Second Lieutenant, Daniel L. Riley. Upon the arrival of the regiment in St. Louis, they went into quarters at Benton Barracks, where they drew their horses and were fully equipped for the field. On the 15th of May, the first battalion left St. Louis and proceeded to Jefferson City, followed on the 19th by the second and third battalions. In June following, the regiment was divided, the first battalion remaining in Missouri, while the second and third battalions took up their line of march for Batesville, on the White River, Arkansas, where they joined the forces of Gen. Curtis. There the two battalions were assigned to a brigade, of which Col. Washburn had been placed in command. On the 14th, the regiment was assigned to escort duty to a train loaded with provisions for Gen. Curtis' army, which left Springfield on the 14th. On the 16th, Col. Washburn joined them with a battalion of the Tenth Illinois Cavalry. The train extended ten miles in length, and the utmost vigilance was needed to prevent capture from the heavy force of rebels who hung upon its flanks. But the train was brought through to Augusta without the loss of a man, and having in their possession 150 prisoners, which they had taken on the march. On June 5, 1862, Col. Washburn was appointed Brigadier General. On the 8th of July, the Second Cavalry took part in the battle of Cotton Plant, destroying two ferry-boats and taking several prisoners. They then moved on to Helena, where they remained until January, 1863, engaged in scouting and other duties. The Second while at this point, in November, took part in a raid into Mississippi, striking the enemy's communications in the rear of Abbeville, and compelling him to retreat from his position in the front of Gen. Grant's forces.

Early in February, 1863, the Second and Third Battalions received orders to report to Maj. Gen. Hamilton, Department Commander at Memphis. Here they remained until April, when they were engaged in the action at Coldwater, doing good service. After this battle, a detachment of Company C was sent forward under the command of Lieut. Riley, to ascertain the whereabouts of Gen. Smith, who was to co-operate with Col. Bryant's force, but returned without finding him. Soon after, it was ascertained that a large number of horses and mules on their way south for the rebel army, were to cross the Coldwater. Lieut. Riley was allowed the privilege of attempting their capture. This he successfully accomplished, bringing back, beside sixty or seventy head of horses and mules, much miscellaneous property. On the 13th of June, the regiment reported to Gen. Washburn, at Snyder's Bluff, on the Yazoo River, where they were employed in scouting up to July 4. After making several minor changes, they were, on 7th, assigned to Gen. Sherman's expedition en route for Jackson, Miss. During the second day of the march, they had a sharp brush with the enemy. Arriving at Jackson, they formed part of the force dispatched to Canton; near that place they encountered the enemy, but during the night, he retreated without venturing anything further than a smart skirmish. The 26th found them again in camp near Vicksburg. During the winter of 1863-64, the Second Cavalry remained encamped at Red Bone Church. In March, 1874, the veterans of the regiment were allowed a furlough, and returned to Wisconsin, returning in May. In September, the first battalion, which, up to this time, had been engaged in guard and scouting duty in Missouri, rejoined the remainder of the regiment at Vicksburg. On the 2d of December, 1864, Lieut. Col. Dale with 250 men of the Second Cavalry, encountered a heavy force of the enemy on the Vicksburg road near Yazoo City. After a short encounter, the enemy appeared in such force as to flank the little command, and, after twice beating back his charges, the Second was obliged to retire. The casualties in Company C were as follows: Wounded: Privates, A. M. Parker and Richard Ladd. Twenty-seven of the command were taken prisoners. Later in the month, the regi-

ment was engaged near Memphis in scouting. In April they were assigned to the duty of protecting citizens from the attacks of bushwhackers and returned rebel soldiers, and remained so engaged until June, when they were ordered to report to Gen. Sheridan, at Alexandria, La. On the 3d of July, such of the officers and men whose terms expired on or before the 1st of October, 1865, were mustered out. The remainder of the regiment proceeded to Hampstead, Texas, remaining at that place until October, when they commenced their march to Austin. At that point, on the 15th of the month they were mustered out. They then started for home, marching on foot to Brennan, one hundred miles, and reached Madison on December 11, 1865, where they were paid off and the regiment disbanded.

ROSTER OF VOLUNTEERS.

AS TAKEN FROM THE ADJUTANT GENERAL'S BOOKS, MADISON, WIS.

TOWN OF LANCASTER.

Second Infantry—Co. B—Peter Schildgen. Co. C—James Gilligan, William Foster, John Frey, Asa Griswold, Alson Parody, Jonathan Booth, Joseph Brown, Frank Liscum, David Strong, Theodore Day, C. H. McCord, B. F. Hyde, George B. Hyde, William B. Reed, John Doyle, Hamilton Barber, J. Walter Hyde, John Raines, George Beasby, John Willis, Andrew J. Curtis, James Gow, David Gudger, George L. Hyde, J. Dillon, Thomas Cox. Co. G—Dan O'Brien, Peter Stilgren.

Third Infantry—Co. F—R. F. McGonegal. Co. K—William Hubbell.

Fifth Infantry—Sergeant Major, Richard Carter; Quartermaster, John G. Clark. Co. I—Janet Spencer, Charles Langridge.

Sixth Infantry—Co. C—Charles E. White.

Seventh Infantry—Co. C—William Powers. Co. F—Benjamin Hayden, Eugene Sloat, George Halbert, Charles Living, John Folks, Justus Pointer, Henry Ruppe, James Tralver, Peter Cameron, Peter Schlosser, John Schlosser, John Johnson, Andrew Meeker, Capt. J. B. Callis. Co. H—John Draggis, James Andrews; Chaplain, S. W. Eaton.

Ninth Infantry—Co. E—Frederick Kuhn.

Tenth Infantry—Co. F—William Rothchild, Thomas Hollister, Capt. W. H. Palmer, Milton Showalter, James Strong, Victor E. Strong, Henry Northey, H. G. Tabler, John Singer, Dan Doyle, Robert Richardson, J. S. Cummins, Ed. D. Lowry, C. C. Morse, Alexander Pollock.

Twelfth Infantry—Co. K—William A. Curry.

Fifteenth Infantry—Lieut. Col. David McKee.

Sixteenth Infantry—Co. C—John Salmon.

Eighteenth Infantry—Co. A—John Sturgeon, James Sturgeon, Frank Wilkinson.

Nineteenth Infantry—Co. I—Robert F. Banta.

Twentieth Infantry—Co. C—Mirza Skinner, S. W. Rogers, A. H. Blackman, Jacob Harmess. Co. I—Rufus M. Day.

Twenty-fifth Infantry—Co. D—Daniel Decker, Lucien Parce, William Kritzer, Capt. H. D. Farquharson, Peter Henkle, John T. Wilkinson, John H. Wellstampt, John H. Dougherty, A. Van Allen, Peter Leser, Joel Breese, George B. Sprague, Robert E. Hyde, John D. Tobler, John Woolstenholme, John Barnett, C. H. Baxter, George M. Francis, L. A. Brethapt, William H. Croft, David Schriener, Herman Cook, Dan F. Pierce, J. Allen Barber, Henry J. Hayden, James Hayden, J. N. Sprague, Nathan

Shoemaker, Joseph Morrison, Robert Irvin, Alexander Irvin, Albert Burks, Burton Sumner. Co. H—J. Pittman Cox, William Waddell, Isaac Greenwood, Oscar Lisharness, Anton Knapp, Dewall Garner.

Fifth Cavalry—Co. G—Philo Huntley, Wilson Lowery, Abner Larabee.

GRANT COUNTY SOLDIERS' MONUMENT.

Hardly had the heroes of old Grant commenced that baptism of blood through which the national life was to be saved, than thoughtful hearts at home began to take into consideration the ways and means for procuring some memorial of these services, which should keep green for coming ages the names of those who had given their lives for their country's good, and that those who remained might forever enjoy the blessings of that Union which their fathers had founded.

In a communication addressed to the *Grant County Herald*, and published in that paper September 16, 1862, Mr. George R. Laughton, of Platteville, proposed that steps be at once taken for the erection of a monument to the heroic dead of Grant County. This was the first known instance wherein anything of the kind had been proposed in any State of the Union. The first plan contemplated a single shaft of white marble, fifteen to seventeen feet high, four to six feet square at the base, and surmounted by eagle, flag and other military emblems. The project met, as might have been supposed, with universal approval. Committees were appointed to collect money for this object, and numerous subscriptions were taken. The first cost of the monument was estimated at about \$2,500.

At the meeting of the Board of Supervisors, in January, 1863, P. Hoyt, Potosi; A. Burr, Lancaster; J. Basford, Tafton; Cole & Seaton, Boscobel, and G. R. Laughton, Platteville, were recognized as a committee for receiving subscriptions, and the Board, at this meeting, granted them permission to erect the proposed memorial upon any portion of the court house square which they might select for that purpose. By February, 1863, the amounts pledged

had reached the sum of \$700. The work for the succeeding two years progressed but slowly. The exigencies of the war demanded the popular attention, and money, for the time being, was diverted to the payment of bounties, rather than the building of monuments. Not that the subject was any less dear to the public heart, but it was first necessary to determine the fact as to whether we were to have a nation.

In April, 1866, the monument received a fresh impetus, when, at a special session of the County Board, the following action was taken: "It is hereby ordered and determined by the Board of Supervisors of Grant County that George R. Laughton, Philetus Hoyt, Luther Basford and Addison Burr be, and they are hereby, appointed a committee to superintend the erection of the soldiers' monument, to be erected at Lancaster, and to expend for that purpose any moneys that may hereafter be appropriated by the County of Grant for that purpose, under the provisions of an act of the Legislature of 1866. The said committee are authorized and empowered to make any and all needful contracts necessary for the erection and completion of said monument, at the expense of Grant County."

Previous to this date, a contract had been made with S. D. Wright, of Whitewater, to furnish the monument—the shaft and marble columns to be of Vermont white marble, with pedestals and sub-base of Joliet stone, the price being \$5,000. It being found, however, that it would be almost, if not quite, impossible to raise this amount by private subscription, an appeal was made to the County Board, which at once responded as above. At another meeting, held July 9, 1866, the Board appropriated the sum of \$4,469.63 to be paid to S. D. Wright, the contractor for the monument, and \$3,200 of the county orders were afterward issued at the same meeting, to the said Wright, \$3,000 payable May 1, 1867. At the meeting of the Board in November, 1866, \$800 was appropriated for the purpose of completing the soldiers' monument, and at the same time it was "*Ordered*, that Addison Burr, Esq., have the charge and care of the monument and grounds adjacent thereto, and that he be, and is hereby, authorized to take all necessary means, legal or otherwise, to protect the same from being marred or otherwise defaced. At the same time, July 4, 1867, was set as the day for the formal dedication of the same, committees appointed, and invitations ordered issued. About the same time, the monument arrived, and was set up on the site chosen in the northeast portion of the court house square.

The whole cost of the monument, according to the report made by the committee appointed by the board to that body was \$6,486.37, to which was added for evergreens and grading \$70.70, making a total of \$6,557.07. Of this amount, \$1,319.57 was raised by private subscription, and the remainder, \$5,237.50 was paid by the county through a tax ordered for that purpose, as stated heretofore.

The monument stands in the northeast corner of the court house square, and consists of a center square obelisk, of white marble, with base and sub-base, the whole surmounted by a sculptured eagle perched on a globe, and holding a laurel wreath in his beak. This central shaft is five feet square at the base, and twenty-six feet in height. On the east side, surrounded by a wreath, is the inscription:

"Dedicated to the memory of the brave soldiers of Grant County, who fell in defense of universal liberty, in the great rebellion of A. D. 1861. This marble contains their names, the many bloody battle-fields of the South contain their ashes. their memory is forever enshrined in the memory of their countrymen." Above this are cannon, flags and an anchor.

On the north side, is the following inscription:

"We hereby resolve that these honored dead shall not have died in vain; that this nation, under God, shall have a new birth, and that the government of the people shall not perish from the earth."

Over this is the anchor of hope resting on the Bible, garlanded. On the west side, beneath an inverted sword, is the inscription:

"Go, stranger, to your country tell
For her we fought; we're buried where we fell."

On the South side, beneath a hand holding a chain and several shackles, is the following from the emancipation proclamation :

“ I do hereby declare that all persons held as slaves are and henceforth shall be free.”

Around this central obelisk, at a suitable distance, are square marble cenotaphs, each surmounted by a fine capital, on which is carved a marble cannon, pointing outward, as if to defend the memory of the dead warriors from all aspersions, and on these tablets are inscribed the names of 750 men, including all from this county, in some sixty organizations of this and other States, served as soldiers of the Republic, and died in battle or from disease or wounds received while in the Union service. The largest number, about 160, are from the Twenty-fifth, a great portion of which regiment was recruited in this county. The whole is inclosed by a fence of chain hung on marble posts, set in a stone wall inclosing a well-kept grass plot. On the day of the dedication, the columns were dedicated with wreaths of evergreens and flowers, and several of the old banners under which the veterans had fought.

July 4, 1867, the monument was formally dedicated, with appropriate ceremonies. Lancaster was filled to overflowing with citizens from every part of the county, who came to assist in this tribute of love and respect for the memory of the county's fallen heroes.

After an eloquent speech by the Hon. Matt H. Carpenter, that eloquent giant, whose loss Wisconsin mourns, Gov. Fairchild stepped forward and delivered the following dedicatory address :

MY FRIENDS—We are here to-day, this day sacred as the anniversary of our national birth, dearer than ever before, charged with a solemn duty. We are here to dedicate this monument to the memory of friends and comrades who gave their lives for the nation's life. Dying for the nation, those departed heroes died for each of us, that the priceless legacy which our fathers handed down to us might be transmitted undiminished to coming generations.

Hundreds of you within the sound of my voice were the immediate comrades upon the field of those to whose memory this tablet is erected; they were your brothers-in-arms during the long, weary years of a bloody war, through which you passed; with you they shared in the glory of triumph; with you they shared the bitterness of defeat. Many of you dampened with your own blood the same fields where they went down to death, thus cementing the brotherly love which has bound you to one another.

What we say and do here to-day, will, when a few short years shall have passed, be scarcely remembered; but the deeds which this monument is to commemorate will last until history is dead and the works of man is forgotten. Your children will recount these deeds to their children's children, and thus they will be perpetuated forever, serving to stir those who shall come after us, and inherit the legacy of freedom now perfect, to valorous love of country.

To lose friends by death is the greatest of all human afflictions, and we mourn for them, refusing to be comforted until time has healed somewhat the wounds and softened our sorrow. These soldiers were happy, while on earth, in the possession of friends almost without number. There were father, mother, brother, sister, and perhaps wife and children. Father, mother, would you call back your son to life, the son you loved so dearly? Sister, brother, would you summon again to your side the companion of your childhood? Wife, children, would you bring him you loved so fondly from his glorious grave, if that bringing back from death would undo all he has done for his country? Would you again see our Republic standing upon a volcano whose fires burned bright and dangerous beneath? Could you stop the life-blood swiftly flowing from father, brother, husband, son, would you do so if to stop that current were to seal our nation's doom? I see the answer in your faces. No, you would not. You now know that he lived not in vain, died not in vain. He left his impress upon the page of history; a bloody page it was, but one which will affect the world for good to the latest generation. To those who passed through the fiery ordeal, shoulder to shoulder with these dead comrades, and, though maimed and stricken, were by a kind Providence permitted to return to their homes, I ask the same question. Would you cripples, whom I see before me, recall the lost leg or arm—would you who suffer with no hope of cure in this world, recall your lost health if such recalling would in the least imperil your beloved country? Would you not rather sacrifice that other good leg or arm? Would you not rather again brave the dangers of war with shattered health? Would you not rather let your blood flow like water—flow even to death? The flash of each veteran's eye gives the answer.

Let the trumpet and drum sound the call to arms for the defense of freedom, and the men of this vast assemblage would “fall in” without a murmur, and again march forth to battle.

The drum and trumpet will not sound that call, my friends. The victory has been won, and well won. The fruits of that victory are now being garnered up in freedom's storehouse, and, thank God, the people have willed that none shall be lost.

Many of the names I read upon this monument were those of my intimate comrades in the field. Many of them I knew intimately and loved dearly. I have called those names often from the muster-roll of their regiment. They have been honorably mustered out of this earthly service. Their work is done: their memory and the result of their valor only remains to us. They have been mustered into that other service whose terms run throughout all eternity. Let us hope that their names are borne upon the muster-rolls of heaven.

"Ye dead heroes,
Yon, faithful herald's blazon'd stone,
With mournful pride shall tell,
When many a vanquished age hath flown,
The story how ye fell;
Nor wreck, nor change, nor winter's blight,
Nor time's remorseless doom,
Shall mar one ray of glory's light
That glides your deathless tomb."

In the name of the people of Grant County, who have erected this marble pile in honor of their services and in commemoration of their death; in the name of the State of Wisconsin, whose sons they were; in the name of our country, for whose preservation they fought and died, and whose gratitude is all their earthly reward; and in the name of the Great Creator of the Universe, to whom all hearts, nations and people of right belong, and to whom only the greatness of their sacrifices is fully known, we dedicate this monument to the memory of those whose names are inscribed thereon.

At the close of Gov. Fairchild's address, the dedication ceremony took place. A company of the Grand Army of the Republic, under the command of Sergt. Maj. J. Alford, with reversed arms, and bearing the drooping banner of the Twenty-fifth, which some of them had borne on the bloody field, marched slowly around the monument. An ode composed for the occasion by A. W. Barber, was then sung by the vast assemblage, and this was followed by a funeral salute of musketry, after which the services closed with an appropriate and touching prayer by the Rev. Mr. Eaton, of Lancaster, who served for three years faithfully, and with honor as Chaplain of the Seventh Wisconsin, in the Iron Brigade.

Previous to the dedication, Contractor Wright had sent one of his workmen from White-water, who added several names to the long list already inscribed on the roll of honor. Below is given this roll in its entirety:

Second Regiment.—Co. A—William E. Chase, John Humphray. Co. B—Charles C. Bushee. Co. C—Thomas D. Cox, Joseph Brown, David Gudger, James Walter Hyde, Robert J. Simpson, George W. Holloway, John Schmidt, Sergt. Frank Neavil, R. S. Stevenson, Ephraim R. Housley, Belknap Fuqua, M. J. Barnhiel, William T. Crossley, George N. Fritz, Lewis La Fonta, Newton Wilcox, Francis M. Waldorf, Albert W. Spease, Philander H. Philbrick, James Gow, Sergt. Maj. Asa B. Griswold, George B. Hyde, George Beasley, Robert S. Pittinger, R. H. McKinney, Daniel Burton, Henry R. Neavil, John H. Burgess, Otto W. Ludwig, S. M. Train. William Cunningham, Michael Cook, Lieut. E. P. Kellogg, John St. John, Weiland Weibel, Albert Waldorf, William R. Ewing, Isaac H. McDonald. Co. G—John P. Schildgen.

Third Regiment.—Co. F—F. M. Costley, John T. Gaston, Theodore F. Schnee, Sergt. Ethan W. Butler, Henry W. Gallop, Andrew Craig, Thomas Duncan, John Oleson, Christian Munson, George Sinnott, Thomas Barton, Ezekiel Parker, John Manion, Richard Nolton, William Wagner, Robert S. Allen. Co. I—Lieut. A. N. Reed, Richard Folts, Giles L. Harrison, Lewis Hoag. Co. K—William H. Hubbell.

Fourth Regiment.—Co. D—Julius M. Jones. Co. Unknown—John Gard.

Fifth Regiment.—Co. D—Charles Kuemmerle. Co. I—Thomas Adkins, Aaron Case. Co. H—Sergt. Frank A. Moore.

Sixth Regiment.—Co. A—Ignatz Winkler. Co. C—Sylvester Russell, Ferdinand Eversal, Albert P. Sprague, Alexander Tulley, Homer Lillie, Cuyler Babcock, Lyman Shelton, Stephen S. Vesper, William Hickok. Co. D—John Fry. Co. H—John H. Adama. Co. K—Leonard Nettleton, William Holloway, Anthony Frembsgen. Co. Unknown—George W. Earle, William Tisdale.

Seventh Regiment.—Co. C—Capt Jeff. Newman, Lieut. W. O. Topping, Sergt. William Beazley, Sergt. G. W. Sain, Corp. Edward Easen, Corp. Henry Inman, Corp. G. W. Beazley, Corp. George Will, Corp. Jacob Rice, William P. Lamb, Thomas B. Sutton, John L. Eastman, George Mitchell, Alonzo Ruasell, David H. Bryant, William H. Hull, W. B. Newcome, Hiram Hamilton, William Howarth, Wallace Holmes, George W. Fortner, Henry Cook, Madison Ray, David H. Link, L. D. Herst, William Calvert, Fulton Holmes, John Danner, Alfred Stout, Jacob H. Rihl, Ezekiel M. Parker, James Armstrong, John F. Haney, W. T. McKinney, John C. Palmer, James Sutton. Co. D—John Remberger, Francis M. Bull, Samuel Richmond. Co. F—Sergt. Calvin G. Parker, Sergt. Isaac C. Reamer, Corp. W. N. Miles, Corp. T. W. Blunt, Newton McFail, Herbert Roberts, James H. Ellis, George F. Halbert, Thomas H. B. Darnelle, Philip Bennetts, George W. Cooley, James Gilligan, O'Harrison Kentner, Louis Kuntz, John J. Schloesser, Orlando W. Atwood, John L. Marks, Robert Blakesley, James A. Simpkins, Henry L. Sprague, James A. Clark, Edward S. McDowell, Warren W. Whitney, Joseph Wilkinson, Lewis C. Spease, Lewis W. Stephens, Adelbert Stately, Henry A. Komp, Martin Calvert, James A. Evans, William B. Pauley, John Leaulpa, Lorenzo Taylor, John G. Runyan, Wesley Craig, George Cornique, George W. Eagle. Co. H—Jerome Gillott, Eli Hitchcock, Stanbury Hitchcock, Millard A. Hudson, Jacob Johnson, John F. Mitchner, Martin Moore, John B. Matthews, T. D. Mundon, William Miller, John Schultz, Luther Schnee, Harlan Pike, Lieut. T. W. Thomas, Corp. Tim. Kelleher, George Page, Hiram Kearney, Edward Carver, George A. Smith, James Andrews, Joseph F. Pryor, Robert Allen, Thomas Adams, Benjamin Burton, Alfred Church, James Bishop, George W. Dillon, Lucius Eastman, James Fulks, Weber F. Gates, Alonzo Springer, John Turnby, Sumter West, John Wanyack, John Wright, William Smith, Stephen Howard, Hugh Kerney, W. G. M. Scott, John M. Steers. Co. K—George Simonds, Elisha H. Oviatt, Corp. C. R. Garner, Lysander J. McFarlane, Fred J. Garner.

Eighth Regiment.—Co. F—Wellington K. Forshay, Adney Griffin, Joseph Flint, William Walford.

- Ninth Regiment.*—Co. K—Joseph Miller, Herman Greener, August Matchin. Co. E—Jacob Becker.
- Tenth Regiment.*—Co. F—Sergt. R. Northey, Sergt. Harlow H. Bowan, Corp. Abram M. Dodge, Corp. Philip L. Glover, O. M. Painter, William R. Ayers, W. W. Parker, Robert Jarrett, William Freworthy, Gorham Alexander, Cyrus Bowen, Leroy W. Williams. Co. G—F. M. Shoemaker, Theodore Hilgers, Robert Langstaff, Thomas M. Jewell, Adolphus Turcott. Co. I—Frederick Groesch, Frederick Kleider, David Winnebrenner, Adam Wood. Co. F—Marcus C. Bowen, Marcus L. Gleason, David C. Lumpkin. Co. I—William Nichols, Frederick Shaffer, Albert McClurg, Hiram Shrigley, Thomas Durlin, Orville D. Eastman, John T. Hudson, Henry Reed, Benjamin F. Bowmer, George W. Moore, George Schad, Joseph E. Holmes, Ames Ray, Richard White, George Schaffer, Edward Piddington, George A. Shaffer. Co. K—James Crawford.
- Eleventh Regiment.*—Co. H—David I. Washburn, Orrison Washburn. Co. D—D. W. Shaw.
- Twelfth Regiment.*—Co. K—Lieut. Almon E. Chandler, Lieut. Isaac W. Walker, F. W. Tracey, Sylvester R. Walker, Edgar Wood, Andrew F. Palmer, Andrew Erickson, Samuel Howard, Caleb B. Clark, Jr., Andrew J. Burnett, Charles H. Thompson, La Fayette Miller, Charles S. Taylor, Salmon C. Peckham, Henry R. Munn, William W. Blanchard.
- Fourteenth Regiment.*—Co. K—Ferdinand St. John, J. F. Hill, John Blower.

GEOGRAPHICAL.

Within the confines of Lancaster are embraced Townships 4 and 5 north, of Range 3 west of the Fourth Principal Meridian. It is bounded on the north by the west half of Fennimore town, which, with Lancaster, forms the only double town in the county; on the east by Liberty and Ellenboro; on the south by Potosi, and on the west by Beetown and Little Grant. It includes within its borders some of the best farming land in the county, the wealth of the town being rather on the surface than beneath, as has been the case in many other towns.

The site of the present city of Lancaster was originally, before the advent of the white man, a beautifully-rounded knoll, covered with low brush at intervals, through which forest trees, singly or in groves, spread their sheltering branches. At the foot of this knoll bubbled forth a limpid spring, clear as the purest crystal, into whose sandy depths, in all probability, many a dusky face had looked, and upon its glittering surface had reflected back the swarthy countenance, hideous with war paint, or stained with the dust and heat of the chase. Past this spring poured a brawling brook, fed by this and lesser neighboring fountains.

Here, quietly sleeping away the summer day, it witnessed, in the year of our Lord 1828, the commencement of a new era in its life, as the white man settled upon the banks near its golden bed and began the erection of a habitation.

FIRST SETTLERS.

These new-comers were Nahem Dudley, Tom Segar and Ben Stout, who, in thus locating, became unconsciously the first settlers of Lancaster. There is no evidence to show that Segar and Stout remained longer than to assist their comrade in the erection of his cabin, or perhaps a short time thereafter, and then departed for other sections where "mineral," then the "particular vanity" of early settlers, was to be discovered in better quantity than there were any signs of its being found here. Dudley remained a year or two and sold out to Aaron Boice. He then went to mining in different sections, finally settling near Beetown, where he gave his name to a cave, supposably discovered by him, and thence to the "Dudley Cave Range," a range well known to miners. Dudley died in 1845 at Muscalunge. In this same year, namely, 1828, William L. Morrison moved into the township and located on what afterward became the northwest quarter of the northeast quarter of Section 36, where he resided for many years. Henry C. Bushnell and family also came to the hollow now known by his name and located near the upper spring on the site occupied by Mr. Weaver. Here he erected a modest cabin of rough, unhewn logs, chinked and mud plastered, a portion of which remained until a late date. During the Black Hawk troubles, these settlers took refuge in the block-houses at Cassville and Prairie du Chien, but upon the settlement of the difficulty and defeat of Black Hawk, they returned to their deserted homes, and again took up their work of reducing the wilderness to subjection, and placing it under the dominion of man.

Aaron Boice, who gave his name to the fertile prairie stretching away to the southward

engaged in working a farm near Cassville. Although classed as a farmer, his domain would hardly be envied by the masters of the soil of the present day. At that time, the richness of Grant County soil still remained an unknown quantity, and Boice was well contented with a few acres. A portion of his "farm" occupied the spot afterward chosen as a site for a court house, and there are those yet living who have seen the different crops, corn, wheat, and even the pungent onion, growing luxuriantly on the very spot where justice is now dispensed and litigants wrangle.

In November, 1834, Boice entered his "claim," which, in surveyor's parlance, was the east half of the southeast quarter of Section 3, Town 4 north, of Range 3 west of the Fourth Principal Meridian. In August, 1836, Maj. G. M. Price entered the west half of the southeast quarter of the same section, which, together, formed the site of the village of Lancaster later on.

In the meantime the country about this central point had been slowly receiving new acquisitions until at the opening of 1836 there were, besides those already mentioned, Henry Hodges and Thomas Shanley, who had come to the country at an early date, finally settling about three miles southwest of what afterward became the village, in 1831. Here Shanley erected a large double cabin, which served for many years as a shelter and place of refuge for many a new emigrant, until he could erect a habitation for the family that accompanied him. No two names are better known in the early history of this section than the two given above. They came originally from Missouri and left their mark upon the early institutions of the county. Mr. Shanley also served as a Representative in the three sessions of the first Territorial Legislature for the western portion of Iowa County, in which the present territory of Grant was then included. In the Hurricane neighborhood were Joseph, Martin, and Harvey Bonham, who came in 1834. Lawson and Ruvel Morrell had also settled in this section early in the thirties. North of Boice's Henry Wood had located; while on what is now familiarly known as "Boice Prairie," a number of settlers had already made their appearance, including Edmund and Elijah Harelson, who came in 1832 or 1833; Colter Salmon and James Boice, a Mr. Warfield, and Mr. Joseph McKinney, who came in the spring of 1835. West of the present city, between Lancaster and Little Grant, James Bonham had located. Dr. A. M. Morrow had also, in 1835, entered a quarter-section of land southwest of town. This is the site now known as the "Rhodes place." In the same year, Abram Miller had located on Pigeon Creek, where he erected the second mill in the county, and Edward Coombs located a homestead in the Hurricane.

In the above category is comprised, in all probability, the names of all the settlers at that time in what afterward became Lancaster.

THE COUNTY SEAT.

At the first session of the Territorial Legislature—as has been noted elsewhere—the present county of Grant was formed, and Commissioners appointed to locate the county seat.

Anticipatory to such action on the part of the Legislature, Maj. Price had purchased from Aaron Boice the land entered by him, and commenced preparations for laying out a town. In opposition to this move on the part of Maj. Price, Edmund Harelson and Maj. J. H. Rountree, who had entered a goodly amount of land in the south of the township, platted and laid out a town just north of the town line, and near the present stone schoolhouse, rather east of that building, and near a large spring, which has since disappeared. The town was named, several lots were sold, so promising did the prospects appear, but they were taken back afterward and the money refunded. Finding this would not do, another attempt was made to have the county seat located on the claim entered by Thomas Elliott, who had settled east of the present city, in 1836 (his name was omitted in the list of settlers). This was claimed as the geographical center of the county. Long and earnest the battle of towns raged, until finally Maj. Price carried the day and the present site was chosen, to the disgust of disappointed aspirants. Surveyors were set at work, the village platted, and the plat recorded in May, 1837. In this plat, recorded in the old volume of deeds, the present public square is laid out, with the following acknowledgment:

I, Orris McCartney, Justice of the Peace, of Grant County, do hereby certify that G. M. Price has acknowledged the above plat, and all the publick ground set forth in the above plat, shall and still remain as such, and I want the same recorded as such.

This May 1st, 1837.

ORRIS MCCARTNEY,

Justice of the Peace, Lancaster, W. T.

The only building at that time in the newly baptized seat of justice was the cabin of Aaron Boice. He soon after left for Texas, where, it was rumored, he met his death at the hands of the Indians in that section. The name Lancaster was chosen for the new town by a relative of Maj. Price, who had emigrated from Lancaster, Penn., and wishing to retain a remembrance of the Eastern land far away, induced his relative to adopt this name.

EARLY BUILDINGS.

Immediately after the selection of this as the county seat, work was commenced upon the court house, which was finished the succeeding year. A log store was erected during the year—1837—and occupied by Mr. Ira Brunson, with a stock of goods such as is usually kept in a frontier establishment. A log building with a frame annex was put up by Maj. Price about eight rods northwest of the "big spring," and into this he moved a stock of goods similar to that included in the store owned by Mr. Brunson, and put the same in charge of George Cox and John S. Fletcher. As mortals must eat to live, Mr. Richards had opened a boarding house yept in the all-covering language of the day "Tavern;" and here the hungry gathered for a time until boarders and landlord fell out, and an opposition house was started by the former. A lachrymose Frenchman by the name of James Jetty, was engaged to do the cooking, his kitchen being located under the lee of a log lying where the Phelps House now stands, the dining-room being a frame building lately erected by George Cox, and afterward used as a court house. Under this *regime* they remained for some time, the greatest objection being that Jetty would occasionally "weep into the soup-kettle." The spell was broken by the arrival of Capt. Robert Reed and his wife, who took the Boice cabin, vacated by Richards, and in the language of a later writer "initiated the emigrants into the mysteries of pudding and blackberry pies." Reed was a character in his way, "Old Human Nature" was the sobriquet bestowed on him by his intimates and accepted by the subject of it. He was social and hospitable, with a true English face, brown and ruddy, with ample room for a large mouth, which made sad ravages over the moon-like countenance. He was afterward made Sheriff, and then moved to Clayton County, Iowa, where he died some years ago.

Among other new-comers this year, were J. Allen Barber and Richard Ranes and wife, who afterward became Mrs. Berks. The latter couple occupied a log dwelling where Nathan's store now stands.

FIRST COURT.

In the fall of this year the first term of court ever held in Lancaster was held in the frame structure erected by George H. Cox, and which stood nearly on the site now occupied by the bank building. Here Judge Dunn dispensed justice and gave the law to the assembled multitudes.

Early in the spring of 1838, Harvey Pepper and wife moved into the village from the Pigeon, and in the fall put up an addition to the frame structure used the year before for a court house and opened a boarding house. This, for the time being was the Palais Royal of Lancaster. Dr. Hill, who had married a daughter of Capt. Reed, moved from Beetown to Lancaster and built a small frame house on the corner, where Jetty had wept and served the delicacies of the season, beside the now historical log. Among other arrivals this year were Nelson Dewey, who arrived from Cassville in the spring, and T. M. Barber.

The other buildings erected during 1838 were a two-story frame on the southwest corner of Maple and Monroe streets, the site being now occupied by the store of W. P. Green; a two-story log house was also built opposite the present Mansion House stables, and in this building was held the examination of the murderers of "Jim Crow" that year. Mention of this murder is made in its proper place and it is only necessary to add here that the event caused

quite a furor in the little town, which was filled with people from the surrounding country. So dense was the crowd in attendance that Squire Dewey, before whom the examination took place, thought best to move down stairs, as a precautionary measure. Justice Bonham was associated with Justice Dewey, and the building was guarded with armed men under command of Ira Brunson.

The following year, 1839, was marked by no incidents of note; but few new arrivals were noticed. John P. Tower, or "Dick" Tower, as he was then known, came and erected a building on the northeast corner of Maple and Monroe streets, on the site now occupied by the residence of Gen. J. B. Callis. This building was opened as an inn, Mr. Scott being the first landlord. Ellison McGee also put up a small log house, where the frame dwelling occupied by Mrs. Reed now stands. Upon their retirement from the excitements of hotel life, Capt. Reed and wife had taken up their residence with Dr. Hill. One morning, as the family were breakfasting, a bolt of lightning struck the house at one end, and passing down through the room, where they were sitting, demolished the clock standing on the mantle-piece, throwing the glass in every direction, cutting the inmates, but doing no other damage. Capt. Reed was, at the time of the shock, holding out his cup for more coffee, when the concussion of the air took both cup and coffee-pot from the hands of the holders, and swept them out through the open door, landing them in the garden, in a bed of peas. The Captain, not to be discomfited in such a manner, secured the coffee-pot, and had the satisfaction of enjoying a second cup of the brown nectar. This was the first accident that happened to the inhabitants of the little town.

In 1840, Harvey Pepper erected a brick building, in which he kept a hotel. Daniel Banfill was the builder, he having returned to Lancaster early in the year from the East. Daniel McAuley also had a log house in which he resided, and which stood on the spot now occupied by Webber's shoe store. Among the new arrivals were Martin Teal and Samuel Tompkins. Price's store had been discontinued, owing to a lack of customers, and the stock owned by Ira Brunson was sold to Harvey Pepper, who thus combined the trades of landlord and store-keeper. To this he added that of Sheriff, having been elected some time previously.

THE FIRST POSTMASTER

of the new town had been George H. Cox, who was appointed in 1838. The office was handed over to John S. Fletcher the following year, who held the office until some time during 1840. He carried the mail in his hat, the post office being the point where John Fletcher happened for the moment to be resting. This moveable office might have proved somewhat of an inconvenience to the citizens, had it not been for Fletcher's well-known indolence, which prevented him from moving oftener than circumstances actually compelled him. As for making any returns to the authorities at Washington, that was not to be thought of for a moment. The manual labor was too great. This dereliction was duly noticed by the postal authorities, and warnings repeatedly sent that a new leaf must be turned over in the way of running the office. Fletcher stood this indirect attack for some time, and then gathering up all the way bills that had been accumulating for the time he had held the office, sent them to Postmaster General Kendall, with the request that as he had plenty of time he might "make out his bill," and send it to Fletcher, "and he would pay it." The latter was not troubled with any more mail matter.

In 1841, the only thing in the way of improvements was the erection of a two-story frame building on the present site of the Phelps House. This was built by Daniel Banfill, and opened by him as a hotel as soon as it was finished, his family having arrived during the year. The memory of "Old Ban" was long held in grateful remembrance by the hungry multitudes who were wont to crowd the portals of the old hotel. He moved afterward to Potosi, where he build another hotel, that still retains his name, and in which he died some years later. He was a model landlord and a worthy representative of the advancing civilization.

In 1842, James M. Otis, who had arrived in the young town, opened a store in the Morrell building, on the corner of Maple and Monroe streets. During this year genial Harvey Pepper paid the debt of nature, being cut off in his prime. He was, as we have seen, one of the first

settlers in Lancaster, and filled a large place in the earlier vistas of the new town. "He was," in the language of the writer already quoted, "a man obliging, talkative and active, but one who took the world easy," and who, in the hurly-burly of his busy life, "hardly knew when he was called upon to hang a man, whether he was acting in the capacity of Sheriff or landlord, and when he called a witness to come into Court, to the third repetition of the name, would add, "come into your dinner," instead of "come into Court." He will be long remembered by the older settlers for his kindness and unselfish interest in the welfare of guests and neighbors. He left a wife and several children, Mrs. Pepper afterward marrying Mr. L. O. Shrader, and has ever since resided in Lancaster. The hotel was continued for some time under other proprietors, but was soon sold to James M. Otis, who converted it into a store.

Upon Mr. Pepper's death, Mr. Scott, who had been keeping the house on the corner of Maple and Monroe streets, took charge of Mr. Pepper's house, and Mr. Benjamin Forbes, who had lately arrived from Cassville, took the house vacated by Mr. Scott.

THE VILLAGE GROWS.

The year 1843 saw numerous changes and improvements. James M. Otis opened an extensive stock of merchandise in his new store, the first general and complete stock that had been opened. In these early times the bulk of the goods were brought across the country from Milwaukee by teams. Heavy goods, such as hardware and the like, was generally purchased in St. Louis, and brought up the river as far as Potosi, from which point it was hauled by teams to Lancaster. Groceries were also sometimes purchased at the same place, but all dry goods and fancy articles came from Milwaukee.

The country, in the meantime, had been settling up round about Lancaster, but owing to the superior attractions offered at Potosi and Platteville, these points for many years had absorbed all the trade; but the entering wedge was drove this year, which soon opened the channel, and this trade began gradually to return to its legitimate center. T. M. Barber, together with James Ward, opened a second store during the year, in the building formerly occupied by Mr. Otis.

Early in the spring the *Herald* was started in the Boice cabin, and began its task of opening the road for advancing civilization.

Quite a wave of excitement was created by the removal of Mr. James Otis from the Postmastership this year. Otis had proved a most efficient Postmaster, but, unlike those at the present day, when such affairs are managed much better, he was not in accord with the Administration. Notice had been sent by the Territorial Delegate to the citizens to recommend some one for the place, and a petition asking for the re-appointment of Otis was returned; but, in spite of all efforts, Ben Forbes was commissioned and took charge of the office late in the year.

Messrs. J. Allen Barber and Nelson Dewey had opened a law office and commenced a partnership at this date, which, in after times, became historical.

As an evidence of the rapidity with which news traveled in those days, an early issue of the *Herald* states that, "Our express papers from New York, Philadelphia and Boston frequently reach us in nine days."

The name of L. O. Shrader appears this year appended to legal notices as Clerk of the Court, he having arrived somewhat earlier.

In the "Hurricane" neighborhood, C. M. Hewitt and Darius Banbridge had assumed charge of the health of that section, and hoisted their shingle as duly qualified physicians. In September of this year, however, Dr. Hewitt removed to Potosi. The *Herald* also notices this year an excellent crop of wheat raised on the farm of Judge Dunn, at Elk Grove. The variety was "red chaff," and the yield over forty bushels to the acre.

During the year, a tri-weekly stage line was started between Lancaster and Platteville by H. Messmore.

In December, Barber & Ward removed their stock of goods into a new frame building

month, Mr. A. Crosby opened a tailor-shop in a building standing a few rods north of the present Mansion House.

Among other arrivals this year was that of J. T. Mills, the well known Judge, whose fame is as wide-spread as the State. As he himself says, the accommodations were not palatial, his lodgings being in "the south wing of John Fletcher's house, which room was located over a pond of water." This year appears to have been a starting-point for Lancaster in the race for prominence.

The succeeding one of 1844 was marked with but few incidents of note. Dr. M. Wainright came in May and located his office opposite the Lancaster House; here he also kept a small stock of drugs. Another line of stages, making weekly trips, and plying between Platteville and Cassville, gave Lancaster additional connective facilities, east and west. The card of James M. Goodhue, afterward widely known as editor of the *Herald* and other papers, appears in the columns of the former paper in May.

The year 1845 shows something of the march of improvement. In August, Barber & Ward moved into their new store, near the corner of Maple and Monroe streets. George H. Cox also erected the building, at present known as the Mansion House; during the season. In November, William Hodge opened a tailor-shop in the rear of Otis' store. Early in the year, Dr. Cowles had located in the new town, having his office at Banfield's Hotel.

FIRST FIRE.

During the month of December, the first fire known to the young town occurred. Just before the holidays, the hotel run by Mr. Ben Forbes, standing on the corner now occupied by Gen. Callis' residence, caught fire and burned to the ground. So swift was its destruction, that many of the boarders were obliged to leap from the second-story windows upon beds previously thrown out upon the ground. The colored woman, who served as cook and general assistant, had been doing "an ironing" during the forepart of the night, and it was supposed that a defect in the flue allowed some sparks to escape in the attic of the building, where were stored a winter's supply of provisions and sundries, lately brought from Galena; among these supplies were several bundles of brooms, and it is supposed that these furnished the material which started the destructive blaze. Certain it is that the fire caught in the attic, and soon the whole building was in ruins. But very little was saved, aside from clothing. After this fire, Mr. Forbes removed to Iowa, where he had a land claim, and soon after opened another hotel in an adjoining village, in which business he was engaged at the time of his death, that occurred many years later.

The succeeding year, 1846, witnessed a few additions to the population and business houses of Lancaster. John Alcorn came during the summer prepared by his trade, he being a carpenter and joiner, to house all other new-comers comfortably, while A. S. Berryhill opened a much-needed institution—a saddler-shop—in the building adjoining the storeroom of Mr. James Otis. Dr. Wood also made his appearance this year, locating on the site where Dr. T. M. Barber's residence now stands. J. M. Ward succeeded Ben C. Forbes as Postmaster. John M. Otis opened a store in November, and the following month John Boright opened a blacksmith and wagon shop; his shop and house were on the lot south of Judge Mills, now owned by Mr. John Wright, and on which his ice-house now stands. The following year, W. W. Kendall and D. T. Parker purchased the stock of merchandise of T. M. Barber, continuing in trade at the same stand. Thomas Scott started a saddler's shop in June, just east of the store of James M. Otis. Drs. Wood and Rickey also formed a partnership which continued until the following year.

Mr. T. M. Barber succeeded James M. Ward in charge of the post office, the latter taking his departure, and some years later became Superintendent of the Ohio & Mississippi Railroad.

Up to the beginning of 1848, but three stores of any moment were to be found in Lancaster. Potosi, on the contrary, was not only well supplied, but did an extensive jobbing business, while Beetown had several stores carrying extensive stocks. The result of this weighting the

wheel of traffic so to one side was shown in the fact that the majority of the trading was done at these places; even those living within a few miles of Lancaster preferred to go where they could have a larger stock to select from. Again, transportation facilities were such that merchants were unable to take the produce brought in by the farmers and handle it successfully, owing to difficulties in transportation. Added to all this, there was the remaining disadvantage of the credit system. Through several years a constant stream of intimations to pay up is poured forth through the columns of the *Herald*, though Lancaster merchants were by no means the only sufferers from this lack of promptitude on the part of debtors.

In the fall of this year, Andrew Barnett purchased Banfill's hotel, having previously kept what is now known as the Lancaster House. Extensive additions have been made to the house since that time. The original nucleus of this building was a long, rambling shell built by Ben C. Forbes for a bowling alley.

In the year 1848, the town of Lancaster included within its limits 496 males and 437 females, or 933 in all. From the proportion it will be surmised that bachelors were scarce in those times. The *Herald* of May 20, 1848, says: "Lancaster contains more capital than almost any village of its size. Every habitable roof covers one or more families. Our chief want is tenements for families who wish to move into town. If buildings could be had, our population would be doubled in a few months. Many buildings are in process of construction, but not half as many as are now required. All our house-builders are employed and more are wanted."

A new Baptist Church had also been commenced this year—the same one that is now standing—while stores and dwellings, says the chronicle, were ready to be built as soon as the brick could be burned.

The year also marked the advent of Lancaster's first circus, with its motley garbs and tinsel wonders.

During the summer, the partnership heretofore existing between Drs. Wood and Rickey had been dissolved, and the latter opened a drug store, north of the court house, soon after. The improvements made throughout the village were of a nature to justify the fondest hopes of those deeply interested in the prosperity of the burg that now seemed advancing with rapid strides on the high road to prosperity.

The year 1848 closed, as has been seen, with clear skies and a promise of renewed prosperity. These auspicious omens continued during the opening of the succeeding year, but, as spring advanced, came rumors from the far-off West of discoveries which rivaled the world-renowned dreams of the "Arabian Nights." The seat of the golden god had been discovered by adventurous prospectors, and the East was moving west to pay homage at his throne, bowing themselves as slaves, trusting to his generosity to unearth the glittering treasure that lay hidden in "the deep places" to the aching, thirsting eyes of these frantic followers. This, however, was but the first wave of the on-coming tide that was later to engulf the many thousands in the mad rush for wealth, to be flung back, bruised, bleeding and poverty-cursed, to drag out a lingering existence in penury and want.

A strong wave of immigration set in this year toward Lancaster and its surrounding country, which more than compensated for the gold worshipers who left for the gleaming sands of California. Mr. T. M. Barber having finished his new brick store (the same now occupied by Ivey & Webb), moved in a stock of goods in the early part of the year and opened the "Ready-pay Store." John M. Otis also moved his stock back to the old brick store on the corner. Kendall & Parker still continued to occupy their old stand, the latter attending besides to the duties connected with the Postmastership; and in June Dr. Wood moved his stock of drugs into a building one door east of the above firm. The *Herald*, in the same month, noticing the position and advantages of the village, called attention to the fact they had "no shoemaker," with an added hint that a mechanic of that kind would have a paying monopoly. The hint was taken, and the following month P. Darcey announced himself as prepared to furnish soles to such as stood in need thereof: his shop stood just beyond "the saloon." Among other changes this

year, William McAuley took the "Grant County House," Charles Blanford started in business as a blacksmith opposite the Telegraph House, and John M. Coombs opened a gunshop on Cherry street, south of the "Grant County House."

In November, the much-wished-for but hardly expected telegraph line was put in running order and an office opened, with Jo Barnett as operator. This office was located in the Telegraph House, and the line was continued in operation until the following year when it succumbed to a lack of business; assessments became too heavy and dividends too light, and Lancaster was again without communication with the outside world. A history of this line, however, is given elsewhere.

If the year 1850 was to be given a distinctive appellation, it would be "the year of casualties." The earlier part, however, gave no sign of the events that were to mark the later part of the season. During the spring, the wants of the ladies of Lancaster were recognized, by the opening of a millinery store by Mrs. Rynerson.

A slightly increased outflow toward the Western Slope was noticeable, as the fever of speculation increased in height, giving premonition of the greater outpouring that was to come.

In June that much-dreaded disease, the small-pox, made its appearance in the county, causing a feeling of apprehension at Lancaster; but the village happily passed by the outskirts of the danger, no cases appearing within its confines. During this same month, the Wisconsin House passed into the hands of Myron Tuttle. A new addition was made to Lancaster's industries by the opening of a carriage and wagon manufactory by Charles Ashley. John M. Otis left for Wyoming during the summer, and later in the year, Kendall & Parker having dissolved partnership, Dwight Parker, in November, removed his stock to the store formerly occupied by Otis, on the corner of Maple and Madison streets.

The yield of grain and farm produce this year had been most abundant, when rumors—at first whispered with bated breath, then repeated in a louder key—told of the approach of that ravaging monster, cholera, whose ghostly feet were swiftly covering the distance that intervened between his stronghold at the South and the new country lying further up along the "Father of Waters." Towns in nearly every section were being depopulated, the inhabitants fleeing in every direction to escape the chill fingers of the fierce monster. Lancaster, after taking all the precautions possible, silently, and almost breathlessly, awaited the verdict which at length came, and the village was safe—for this year at least. During the month of August, a heavy thunderstorm passed over the town and seriously damaged one or two buildings. A shaft of lightning struck the spire of the Baptist Church, and, passing down through and on the timbers, reached a ladder which had been left against the building, and then followed this to the ground. The steeple was badly shattered, and many panes of glass broken in the building. The residence of Dr. Roberts, corner of Adams and Cherry streets, was also touched by the erratic and destructive fluid. Mrs. Roberts was alone with her children at the time, but fortunately they escaped unhurt, the building itself being but little injured. In December, the Grant County House passed into the hands of Reuben Thomas.

Among the early sports of the new country, which at times afforded much amusement, was bear and dog fights. The *modus operandi* of the affair was to chain bruin to a stout post with a chain a few rods in length, and then gather in all the dogs possible, when the performance would at once begin. The victory, however, was invariably with bruin, as one cuff from his unwieldy paw was generally enough for the fiercest canine, who thereafter was only too glad to keep out of reach of the muscular boxer. The entertainment continued so long as dogs could be found to continue the show. A performance of this kind was advertised for Christmas Day of this year, and resulted as usual, after which followed the inevitable resort to the hotel bar for liquid refreshment, but, in the language of one of the early settlers, "the whisky was better then than now," and only the best of humor was the result of these bacchanalian revivals.

Notwithstanding the fact that Lancaster, with other towns of the county, was beginning to suffer considerably from the constantly increasing exodus to California, quite a little advancement was made during the year 1851. The Methodist and Congregational denominations com-

menced the erection of places of worship, both of which were dedicated before the close of the year, although the Congregational Church was not completed until later. In addition to this, the Baptist Church was completed, it having remained in an unfinished state up to this time. Among the business changes was the association of Mr. John Alcorn as a partner of T. M. Barber in the "Ready-Pay Store," while early in the year Mr. R. H. Finkland had opened a cabinet-shop north of the court house. As soon as the weather would admit, the usual spring emigration to California commenced. T. M. Barber, J. B. Callis, Robert Allenworth and Wells Huston, with a number of others from the surrounding country, started on the six months' trip that was to land them in the region of the glittering phantom.

Heavy storms prevailed during the month of June; the house of J. R. Shipley was struck by lightning, and so heavy were the rains at times, that "every street had a mill privilege on it." During the summer, F. P. Liscum & Co. commenced a general merchandise business in the store formerly occupied by N. W. Kendall. In the month of October, the Wisconsin House passed into the hands of Myron W. Wood, who retained it for many years. Two subjects made their appearance this year that continued to exert a disturbing influence upon Lancaster thought and aspirations, at intervals, for many years after. The first of these was the division of the county, which excited a somewhat bitter debate, but ended in smoke. The second, which became a chronic disease in this section, was the railroad fever that raged with much severity during the latter part of the year. Nothing, however, came of it, as has been noted in another portion of this work, and the year closed leaving Lancaster in much the same position as at its opening, aside from the few public buildings noticed above.

The year 1852 witnessed the height of the California fever. As early as January, Charles Ashley commenced advertising teams to take passengers through to the Western Slope for \$125. The inflated stories of the untold wealth only awaiting the coming of the adventurer to yield itself a willing captive to his pick and shovel, were doing their work; farms were disposed of by the frantic enthusiasts; in other cases, mortgaged, in order to furnish their owners with means to reach the wonderful El Dorado. Monday and Tuesday, April 12 and 13, was the day set for the departure of the emigrants, and about fifty persons gathered in the streets of the village to embark in the long voyage. They were accompanied by their friends, and amid the cheers of the crowd, they weighed anchor and set sail, some to remain in the land of promise, a few to secure that wealth so bountifully promised, the majority to wander back by twos and threes, to again take up the old life where they had dropped it for the delusive yellow demon. The wolves had become so troublesome of late years, notwithstanding the settlement of the country, that the settlers found it necessary to organize hunts for the purpose of exterminating these pests; so bold had they become, that it was no uncommon sight to witness two or three of these long-legged denizens of the forest come quietly down the hill to the east of town—now covered with dwellings—and, after refreshing themselves at the "big spring," and performing a duett or trio, as the case might be, for the benefit of the citizens of the village, saunter back to their bushy retreat. And still the tide of emigration continued to ebb and flow. The *Herald* of May 19, took occasion to say, editorially, that "In the last week or two we notice a good many strange faces about Lancaster. A shoemaker, blacksmith and wagon-maker have just set up in business. Boss carpenters are equal to the demand—in their own opinion—but a few more ought to come in for sake of competition." The want, at this time, appeared to be a tailor, barber, chairmaker and saddler. In this month, another fire occurred in the village, the burned building being a barn belonging to Gov. Dewey; the cause of the fire was unknown. Notwithstanding the fact that the attention of Grant County settlers was being turned more and more to the tilling of the soil, it is noted that "more than 2,000 barrels of flour had been brought to Potosi from other States within the year, to feed the people of Grant County." During the latter part of the year, the returning tide of lucky and disappointed gold-seekers began to show itself in occasional arrivals, and by this time many had come in looking for homes, giving the town quite a motley appearance. In July, Dr. Ladd, Prof. Sweet, C. C. Childs and J. I. Pickard met at the Methodist Church and organized forty teachers into a

"Normal school" for instruction in teaching; corresponding to the teachers' institutes held at the present day, during the summer; Lancaster High School was also started through the efforts of some of the leading citizens. Guyler K. Thomas added another to the list of Lancaster business houses, by opening a hardware store on the south side of Maple street, just east of the *Herald* office. That journal, later in the year, commenting on the business of the town, informs all whom it may concern: "We want a drug store in the village. A room can now be had, and the opening is excellent for drugs, paints, dyes and notions." Early in the winter, Lancaster was visited with the small-pox, but through energetic measures at once taken to stamp it out, it made but little progress, and the alarm felt at the first reports speedily subsided.

An inventory of the business houses of Lancaster, in 1853, would have shown the following: Dwight T. Parker, who occupied a store on the site at present occupied by Howe & Baxter; Alcorn & Barber, in the brick store now occupied by Ivey & Webb; G. Maiben, in the building now used by John P. Lewis; T. P. Liscum & Co., who occupied a frame building standing about where the store of William Baxter now stands. The hotels were four in number—Banfill's, located on the present site of the Phelps House; the Lancaster House, at that time comprising the north portion of the present building; the Mansion House, and the Wisconsin House, kept by Myron W. Wood, which building is now occupied by Mr. McCoy as a residence. These, with the log building on the corner of Madison and Maple streets, used as an office by Barber & Lowry, the small frame building standing on the present site of Johnson's brick, and used by the *Herald* as an office, together with some twenty or thirty frame and log structures used as residences, comprised the village of Lancaster as it was at this time. During the year T. M. Barber sold out his interest in the Ready-Pay Store to Mr. Benner, and he in turn disposed of it to Mr. Alcorn, leaving the latter as sole proprietor.

During the month of September, the neighborhood to the west of the village was intensely excited over the reported loss of a little three-year-old daughter of Mr. Bark. When last seen she had been seen playing around an open well, and fears were at first entertained that she had fallen into it, but as search developed the fact that this surmise was untrue, the male inhabitants of the neighborhood turned out en masse to search for the lost child. After a two days' search she was found sitting in the shade of a tree on a high bluff, only a half mile from the house. The population of Lancaster Township at this time was, according to the *Herald*, "about one thousand, one-third of that number being residents of the village." The principal wants at this time were "a drug store and a saddler shop."

The next year, 1854,—shows no incidents especially noticeable. The tide of emigration had been stopped and had already begun to return upon itself. The citizens of the village had begun to awake the necessity of seeing that Lancaster was well supplied with workers in every kind of industry, which induced the *Herald* to say in its issue of June 26: "The country demands all branches of trade to be kept well supplied so they can give all their patronage to Lancaster, or else go elsewhere. It is one of the best locations in the State for a cooper; there are several merchant mills within reasonable bounds; also plenty of walnut, cherry, maple and pine lumber for building, as well as blue limestone. Brick within one mile of town." For the working of this lumber product there were at that time two saw-mills within the town limits. The year witnessed a second small-pox scare, which for a time stagnated trade and created somewhat of a panic in the village; but, happily, it yielded to the energetic treatment meted out to it. Several deaths occurred from the loathsome disease, but at no time did it approach an epidemic. During the month of June the dread cholera fiend had again made its appearance, and the two first cases proved fatal; other cases made their appearance afterward. The excitement was intense; the streets of the village were deserted, so great was the fear of this fearful scourge felt by the inhabitants of the surrounding country; eight or ten deaths occurred in rapid succession. The only physician of the town was prostrated under the burden of care and work. When everything seemed so dark, succor and relief arrived through the action of two public-spirited citizens—Judge McGonigal and J. Allen Barber. The former had been through the cholera season of 1850 at Wingville, and became aware of the potent influ-

John G. Clark

LANCASTER.

ence of certain remedies in coercing the cholera demon into silence. Starting at the first house they met in which the dread disease was working its fearful work, they rolled up their sleeves and commenced operations. Right manfully did they contest the possession of the young life with the demon, and at length were granted the happiness of knowing that their efforts were not in vain; the *regime* of king cholera was broken, others coming to their assistance as nurses. This Spartan band continued their labors without abatement until the plague was stayed, and the village could once more breathe freely.

Among new-comers in business were George Ryland & Co., who opened a store of general merchandise in the post-office building, north of the court house. The first-named member of this firm had arrived in Lancaster some time before. S. Hyde & Co. also started a blacksmithing establishment in the latter part of the year.

The year 1855 marked many improvements in the village, and showed it had about recovered from the set-back caused by the western exodus some years before. Early in January the contract for building a new schoolhouse was let to Thomas Walker for \$2,375, the building to be of brick and two stories high. In the same month, James Black started in business in the old "Telegraph House." Heretofore much trouble had been experienced in securing land in the village and immediately adjoining. The *Herald*, commenting on this early in the year, said: "Soon after Lancaster was made a county seat, speculators entered all the good lands in the vicinity, and held them at prices beyond the reach of the incoming emigrants. In 1854, they became alarmed and sold at from \$4 to \$10 per acre. In 1855, all lands in the vicinity are owned by actual residents. This spirit of speculation," adds the *Herald*, "left Lancaster behind in mercantile and business interests, and it must take some time to come up. Last year many wanted to build in Lancaster as well as in the vicinity, but it was impossible to procure material and workmen, hence it was deferred to another season. It is to be regretted that this prospective demand for building was not seen as clearly a year or two ago as at present, as then Lancaster would be in a fair way to add to her population and wealth fourfold by next fall."

In May, F. P. Liscum resigned the Postmastership, and G. W. Ryland was appointed in his place. Many new business firms are announced this year, among them that of Messrs. Howe & Baxter, who purchased Alcorn's store, enlarged the stock and commenced business in July. During the preceding month a movement had been made looking to the organization of a stock company with a capital of \$8,000, to build a steam mill in Lancaster.

The population of Lancaster June 1, this year, was 275 families; 846 white males, 768 white females, 6 colored males, 2 colored females, 2 insane (females), 86 bachelors, and 364 persons of foreign birth. Total population 1,614 white and 8 colored—1,622 in all. "This," it is added, "does not include those who board in families." In August, Colter & Bradshaw opened the much-needed drug store, and the succeeding month J. B. Callis and John Pepper commenced a general merchandise business in the store occupied in early times by T. M. Barber, on the corner of Monroe and Madison streets. Among the improvements mentioned this year was a residence erected by Judge Colter, a store erected by Dwight Parker, and a large warehouse put up by Mr. Ryland. In December, Daniel Banfill sold the Mansion House to L. A. Hyde, who had lately arrived from Vermont, and who remained proprietor of this famous hostelry until his death. The high rate at which property was held around the court house caused the town "to move down toward Judge Colter's spring," the business center at this time being in the neighborhood of the newly erected Methodist Church. The emigration had consisted this year principally of men with families, who came looking for homes, although the greater part of this emigration went to the country around rather than remaining in the village itself.

The year 1856 was in the main a repetition of the preceding year. In February, a destructive fire occurred, by which the store occupied by Callis & Pepper was entirely destroyed. The fire was supposed to have originated in a room over the store used as an office and bedroom.

immediately with the work of clearing away the ruins and the erection of a new building on the same site, which was ready for occupancy in April. The new schoolhouse was also finished early in the year. Mr. George H. Cox was appointed Postmaster in August. A steam saw-mill was among the new additions to Lancaster business enterprises this year, erected by Messrs. Griswold & Meyer in the fall, the intention being to add to it the machinery necessary for the manufacture of flour after awhile. In November, the railroad through the northeastern portion of the county was completed and opened for traffic. A tri-weekly stage line, operated by Elliot A. Liscum, gave Lancaster a connection with this "iron highway" at Boscobel. Late in the fall, the small-pox again made its appearance, and three deaths from this disease occurred in a very short time. It did not, however, succeed in obtaining a general hold on the community, and the excitement over its appearance soon subsided. There were numerous accessions to the population of the village during the year, and the country in the immediate vicinity was benefited by the overflow. The succeeding year, 1857, witnessed that great upheaval of values known as the "panic of '57," which reduced so many from affluence to beggary, and blotted out forever many a well-known business. As to the causes which led to this convulsion, it is not necessary, neither does it come within the province of this article to speak. Lancaster, in common with nearly all towns in the lead region, suffered but little from the unsettlement of values which was the prevailing character of the fatal year. The causes of Lancaster's exemption from any bad effects of this year are assignable, undoubtedly, to several causes: First, the only money known in the lead district was gold and silver. At quite an early date, when the stability of the numerous "wild-cat" banks, then for the first time showing themselves, began to be questioned, the miners had determined to take nothing in payment for mineral but "hard money," and as it afterward appeared, this measure, more than anything else, was the most effective barrier against the wave of bankruptcy and ruin that swept over the land. Then the Territory now embraced in the present State of Minnesota was receiving its first influx of emigrants, who had to be supplied, as well as their stock, with food, and where would they be so apt to go for these supplies as to the country lying nearest to them, thus keeping up prices and furnishing the farmers of Grant County with an excellent market for their surplus beef, pork and grain during the panic year, and the seasons just succeeding it. By the time this source of revenue began to fall off, owing to the fact that the new settlers were now in position, not only to provide food for themselves but furnish a surplus for export, prosperity was again reaching its golden wings over the country, and the balance of trade was thus sustained to the manifest benefit of Lancaster, which was thus relieved from the serious setbacks that characterized the history of many other towns at this period.

In the years succeeding 1857, and previous to the war, an apathy appears to have settled over Lancaster, but few houses were erected, and emigration was at a stand-still. The only thing that remained in a state of activity were the wolves, which had again become extremely troublesome. During the month of January, Mr. W. T. Patton, a resident of Ellenboro, while returning home from Lancaster one evening, in the latter part of the month, was met on the road by five large wolves, who seemed bent on attack. Mr. Patton happened to have in his hand an ax handle, which he had purchased at Lancaster, and with this, and by putting on a bold front, he was able to beat off the four-footed desperadoes and continued on his way, congratulating himself on his narrow escape. In 1860, the log house known in local parlance as the "block-house," and one of the most interesting relics of the first settlement of the village, was demolished to make room for the advance of modern improvements, which in this case was exemplified by a large and commodious frame structure, erected by Mr. Addison Burr. The old building had witnessed many turns of the Lancastrian kaleidoscope. First serving as a store, the earliest to open in the village, it was afterward the center of legal lore and judicial learning as the office of Barber & Dewey, for many years the only law firm in the new town. The senior member of this noted firm continued to occupy it as an office until its demolition. Could the log walls have spoken, many a weird tale would they have told.

THE WAR PERIOD.

The beginning of the war opened up a new era for Lancaster. The spirit of speculation which it engendered and the rise in the price of farm products, soon put farmers in an easier position than they had known for many years. As the development and prosperity of any place is dependent in a great measure on the prosperity of the farming community in its immediate vicinity, so Lancaster at once felt the effect of this expansion, and began in its turn to expand in size and mercantile importance. Despite the fact that seemingly every energy was being strained to send troops into the field, many buildings were erected, and many of the finest structures of which the city now boasts, date from the period during or just anterior to the war. When white-winged Peace once more settled over the land, and the bone and sinew which had been drained from all occupations to supply food for the demon-like destructibles in the field had been returned to its legitimate channels, the high tide of prosperity seemed to have come. During this period, Lancaster advanced with rapid strides.

In March, 1872, a disastrous fire destroyed what was known as "Callis Corner," and at one time threatened to sweep the street. The fire was discovered about 10 P. M., in the roof of a building used partly as a barber-shop by Max Nobis, and was supposed to have started from a defective flue. The loss footed up some \$6,000 on stock, besides the buildings. The disaster was but temporary; new and handsomer buildings took the place of those destroyed, and the corner once more resumed its old-time business popularity. A serious drawback to Lancaster's advancement with the same rapidity that characterized other sections, was a lack of railroad facilities. Many were the schemes proposed to obviate and remove this stumbling-block, and finally, in 1879, the advent of the narrow-gauge road placed the city in easy communication with the outside world, and allowed Lancaster merchants to compete with the business men of other towns with some show of success, and without having to pay extensive transportation fees. As the terminus of the road, the city to day enjoys exceptional privileges, more than equal to the drawback under which it labored in earlier times. Lancaster of to-day contains six stores, doing an extensive merchandising business, three hardware stores, two drug stores, two jewelry stores, two furniture stores, three general stores, one tailor shop, four hotels, one news room, two millinery establishments, three confectionery and notion stores, one bakery, two barber-shops, four blacksmith-shops, two wagon manufactories one woolen-mill and two livery stables. It is steadily growing, the growth being not of the mushroom order, "which to-day is, and tomorrow is cast into the fire," but one that has a solid basis of need, and which will undoubtedly increase in the same steady ratio as the years roll on. The population of the city, according to the last census, was 1,044, but the actual population already has gone much beyond this limit. As the center of a rich and productive country, Lancaster's future is extremely promising.

TOWN AND VILLAGE GOVERNMENT.

Lancaster was first organized into a town at the special session of the County Board in 1848, the first election being held at the court house in the spring of 1849. This commencement of township government is thus quaintly narrated in the old record :

Be it remembered that at a general town election, for the election of county officers, had at the court house in the township of Lancaster, in the county of Grant, in the State of Wisconsin (being the first election for such township or town officers in said town), there being no Supervisor of said township to preside as moderator at said town meeting; and the hour for opening of the polls having arrived, the moderator stated to the said town meeting the business to be transacted, and the order in which business would be entertained as follows :

First—the election of three Supervisors, one of whom to be designated as Chairman; second—one Town Clerk; third—one Treasurer; fourth—one Assessor; fifth—one Superintendent of Common Schools; sixth—four Justices of the Peace; seventh—to elect from one to three Constables, as the meeting may determine; also to elect one Overseer of Roads for each road district.

To adopt rules and regulations for ascertaining the sufficiency of all fence in such town, and for determining the time and manner in which cattle, horses, sheep or swine shall be permitted to run on highways; and for impounding cattle.

To determine the amount of money to be raised for the support of schools, for the contingent expenses of such town, for the support of roads and bridges in said town, and also for the support of the poor in said town for the ensuing year.

To take measure and give directions for the exercise of the corporate powers of said town. Then, on motion,

It was unanimously voted that all officers of said town, required by law to be chosen by ballot, be named in one ballot; and the offices to which such persons are intended to be chosen designated upon one ballot. On motion,

It was also unanimously voted by said town meeting that there shall be elected for said town three Constables. After which the said town meeting agreed to go into an election for town officers as the law requires.

The first meeting of the Town Board was held May 1, 1849.

The township organization answered all purposes until 1836, when a majority of the citizens demanding the incorporation of Lancaster as a village, Hon. J. Allen Barber, then member of the Assembly, drew up a charter, which passed both Houses of the Legislature, and Lancaster took upon itself village honors. The incorporated village embraced one and a half miles square of territory. This charter continued in existence until 1869, when it was repealed, and one more ample in its powers granted by the Legislature of that year in its place. Under this charter the village remained until, by an act of the Legislature of 1878, Lancaster was incorporated as a city.

The charter under which the incorporation was effected, provides for one Mayor, four Alderman, who together constitute the Common Council; one Police Justice "and such other elective officers, except President and Trustees, as it is now lawfully provided such village shall elect." Elections were to be held the first Monday of May in each year.

The powers and duties of Aldermen and Mayor were to be the same as those before performed by the President and Trustees of the village, except that the Police Justice, in addition to his jurisdiction in cases arising under the charter, should have the same jurisdiction as other Justices. The relations between the city and the township of Lancaster were the same as those heretofore existing between the village and the township, namely, that the city should belong to the township as part and parcel thereof, except for municipal purposes. The first election under the new charter was held May 6, 1878. Below is given a roster of the town, village and city officers from the formation of the township up to the present time.

OFFICIAL ROSTER.

1849—Supervisors, J. Allen Barber, Chairman, N. M. Bonham, Abner Dyer; Town Clerk, Joseph C. Cover; Treasurer, Arthur W. Worth; Assessor, Charles Blanford; Superintendent of Schools, H. H. Lewis; Constables, Dexter Ward, James Haire and William Walker; Justices of the Peace, Philo J. Adams, Francis H. Bonham, H. S. Liscum, W. T. Decker. Philo J. Adams and F. H. Bonham were drawn for the long term.

1850—Supervisors, J. Allen Barber, Chairman, Abner Dyer, Thomas Shanley; Clerk, Stephen Mahood; Treasurer, Charles Blanford; Assessor, Jesse Miles, Sr.; Superintendent of Schools, John D. Wood; Justices of the Peace, John S. Fletcher, Andrew Barnett; Constables, Dexter Ward, S. A. Quincy, William Walker.

1851—Supervisors, William N. Reed, Chairman, Thomas Shanley, Thomas Weir; Clerk, John D. Wood; Treasurer, Philo J. Adams; Assessor, Stephen Mahood; Superintendent of Schools, J. C. Cover; Justices of the Peace, Andrew Barnett, H. S. Liscum; Constables, Dexter Ward, James N. Borah, G. B. McCord.

1852—Supervisors, James Barnett, Chairman, Joseph Bonham, John B. Gillespie; Clerk, F. P. Liscum; Treasurer, Frederick B. Phelps; Assessor, Stephen Mahood; Superintendent

of Schools, Robert Children; Justices of the Peace, F. H. Bonham, Hugh R. Colter, Stephen Mahood—to fill vacancy; Constables, Patrick Dancey, Dexter Ward, Lewis Laughlin.

1854—Supervisors, Nelson Dewey, Chairman, Joseph Bonham, Abner Dyer; Clerk, Stephen Mahood; Treasurer, John B. Callis; Assessor, H. S. Liscom; Superintendent of Schools, J. C. Cover; Justices of the Peace, Stephen Mahood, Dexter Ward; Constables, W. H. Foster—only one Constable elected this year.

1855—Supervisors, J. Allen Barber, Chairman, Philip Kelts, Edmund Harelson; Clerk, Stephen Mahood; Treasurer, John B. Callis; Superintendent of Schools, William A. Holmes; Assessor, Andrew Barnett; Justices of the Peace, Joseph Bonham, George W. Luse; Constables, Jared Barnett, Elliot H. Liscum. Two Constables were elected this year.

1856—Supervisors, J. Allen Barber, Chairman, Edmund Harelson, Philip Kelts; Clerk, Stephen Mahood; Treasurer, John B. Callis; Assessor, William N. Reed; Superintendent of Schools, J. C. Cover; Justices of the Peace, Wood R. Beach, Stephen Mahood, Francis H. Bonham—elected to fill vacancy; Constables, Elliot H. Liscum, John Pepper. Stephen Mahood being afterward unable to serve as Town Clerk, by reason of sickness, William E. Carter was appointed by the Board in his place.

VILLAGE OFFICERS.

1856—President, J. Allen Barber; Trustees, John G. Clark, M. M. Ziegler and D. T. Parker; Treasurer, M. M. Wood; Marshal, Dexter Ward; Assessor, George Howe; Clerk, appointed by the Board of Trustees, William E. Carter.

1857—President, J. H. Hyde; Trustees, D. H. Budd, Charles Langridge and James Barnett; Treasurer, George W. Ryland; Assessor, Stephen Mahood; Marshal, W. H. S. Palmer; Clerk, William E. Carter.

1858—President, L. O. Shrader; Trustees, John B. Callis, Charles Langridge, O. B. Phelps; Treasurer, George W. Ryland; Assessor, Stephen Mahood; Marshal, John Pepper. O. B. Phelps refused to qualify as Trustee, and E. G. Beckwith was elected in his place. Clerk, William E. Carter. He was removed for non-attendance in September, and L. J. Woolley appointed in his place.

1859—President, J. C. Holloway; Trustees, Charles Langridge, William Alcorn and George W. Ryland; Treasurer, D. H. Budd; Assessor, Stephen Mahood; Marshal, John B. Callis; Clerk, L. J. Woolley.

1860—President, J. Allen Barber; Trustees, George H. Cox, Anthony Crosby and L. A. Hyde; Treasurer, M. M. Ziegler; Assessor, Hiram Baxter; Marshal, John B. Callis; Clerk, L. O. Shrader.

1861—President, J. Allen Barber; Trustees, George H. Cox, F. P. Liscum, Joseph Barnett; Treasurer, D. H. Budd; Marshal, John B. Callis; Assessor, William McGonigal; Clerk, L. O. Shrader.

1862—President, J. Allen Barber; Trustees, Harrison Redding, George H. Cox and George W. Ryland; Treasurer, D. H. Budd; Assessor, W. N. Reed; Marshal, Thomas Gow; Clerk, J. W. Blanding.

There is a break in the records from the above date to 1867, during which there is no trace of the officers elected.

1867—President, J. C. Cover; Trustees, J. H. Hyde, J. W. Blanding and A. J. Fox; Clerk, Joseph Bock.

1868—President, J. W. Blanding; Trustees, H. J. Fox, Fred B. Phelps, J. W. Angell; Treasurer, John P. Lewis; Assessor, William H. Foster; Marshal, David Cutshaw; Clerk, Joseph Bock.

1869—President, P. H. Parsons; Trustees, Lewis Holloway, William Alcorn, V. F. Kinney, H. Reading. [From this date, and under the new charter, the Treasurer, Marshal and Clerk were appointed by the board, and the President also performed the duties of Police Jus-

1870—President, George W. Ryland; Trustees, Henry Fox, John B. Turley, Lewis Holloway, Henry Muesse; Treasurer, D. H. Budd; Marshal, Dexter Ward; Clerk, A. P. Thompson; Street Commissioner, George Harton.

1871—President, George W. Ryland; Trustees, Henry Fox, Henry Muesse, Lewis Holloway, W. M. Powers; Treasurer, D. H. Budd; Marshal, Dexter Ward; Clerk, David Schreiner; Street Commissioner, Joseph Joey.

1872—President, Henry Muesse; Trustees, R. E. Murphy, M. M. Zeigler, W. W. Robe, R. S. Hoskins; Treasurer, D. H. Budd; Marshal, Philip Kelts; Clerk, P. H. Parsons; Street Commissioner, H. B. Fisher.

1873—President, William McGonigal; Trustees, Lewis Holloway, C. H. Baxter, W. W. Robe, H. B. Fisher; Treasurer, D. H. Budd; Clerk, A. R. McCartney; Street Commissioner, William Richardson; Marshal, Charles Bennetts.

1874—President, A. Burr; Trustees, P. H. Parsons, C. H. Baxter, V. F. Kinney, H. B. Fisher; Treasurer, D. H. Budd; Marshal, Thomas R. Chesebro; Clerk, R. E. McCoy; Street Commissioner, Franklin Halbert.

1875—President, J. Allen Barber; Trustees, Franklin Halbert, Lewis Holloway, John Schreiner, Henry Muesse; Supervisor, George Clementson; Treasurer, Richard Meyer; Clerk, A. Michaelis; Street Commissioner and Marshal, S. Mitchell.

1876—President, J. Allen Barber; Trustees, John Schreiner, John Woollenholme, Henry Muesse, Frank Halbert; Supervisor, George Clementson; Treasurer, Richard Meyer; Clerk, A. Michaelis; Marshal, S. Mitchell; Street Commissioner, Franklin Halbert.

1877—President, J. Allen Barber; Trustees, David Schreiner, W. H. Haines, John Oswald, William Richardson; Supervisor, George Clementson; Treasurer, Richard Meyer; Clerk, A. Michaelis; Street Commissioner, John Oswald; Marshal, S. Mitchell.

CITY OFFICERS.

1878—Mayor, A. R. Bushnell; Aldermen, James Woodhouse, George D. Utt, James Kilbourn, Joseph Nathan; Justice of the Peace, James A. Jones; Supervisor, George Clementson. (Clerk, Treasurer and Marshal appointed). Clerk, Aug. Michaelis; Treasurer, Richard Meyer; Marshal, S. Mitchell.

1879—Mayor, George Clementson; Aldermen, F. B. Phelps, A. H. Barber, Henry Muesse, Alexander Ivey; Police Justice, A. L. Burke; Supervisor, George Clementson; Clerk, Charles Orton; Treasurer, Richard Meyer; Marshal, H. P. Green.

1880—Mayor, John B. Clark; Aldermen, Lewis Holloway, W. T. Orton, William P. Stone, Herman Buchner; Clerk, Aug. Michaelis; Treasurer, Richard Meyer; Marshal, George Griffin.

1881—Mayor, John B. Clark; Aldermen, William P. Stone, Herman Buchner; W. F. Orton, Lewis Holloway. The two last named declined to qualify; John P. Lewis and John Street were appointed by the remaining members of the Council, in accordance with a provision of the city charter. Treasurer, Richard Meyer; Clerk, Aug. Michaelis; Marshal, S. Mitchell.

LANCASTER PRESS.

Grant County Herald.—This paper was started early in the spring of 1843, the first number being issued March 18, of that year. The causes which led to its inception and subsequent birth were those usual to enterprises of this nature in newly settled regions, namely, a desire to keep the world informed of the existence of such a place as Grant County, and a growing demand for a ready means for giving notice to the different parties interested in the numerous cases of litigation continually arising. Therefore, early in the year above named Messrs. J. Allen Barber, Nelson Dewey and Daniel Banfill joined together and purchased a press and type in Dubuque, brought it to Lancaster, and as given above, the first number of the *Grant County Herald* was issued, the first issue being printed in an "annex" to the old Boice cabin. This

building had witnessed before this, many changes in Lancaster history and its rough-hewn walls had in turn resounded to the ring of the pioneer's genial laugh, the soft whispers of womanly voices, and, later on, to the merry rattle of knives and forks as under the *regimes* of Richards and Capt. Reed, the founders of Lancaster had proved themselves valiant "trencher men." Now its cobwebbed ceilings were to resound to the click of the mysterious types and the soft rumble of the hand press, as the bed traveled back and forth to transfer to the white paper the condensed intelligence that had been gathered in the forms beneath the powerful platen. The first to furnish shelter, the old cabin was now to be the *entrepot* for the little sheet that was, in another decade or two, to wield an influence equal to that of any journal in the State. The first issue contained the brains of Lenhart O. Schrader and the muscular power of C. Mallet and Thomas Keeling, the former being the editor and the latter compositors. Mallet and Keeling were both of French descent and much inclined to interviews with the flowing bowl, but by their acquaintance with the "types" were thus unconsciously immortalized as the issuers of the first copy of the *Herald*.

A stock company had been formed, in fact the three gentlemen above named as the purchasers of the press and material, were merely acting as agents for their associates, Messrs. Price, McCartney & Rountree, all together making the *Herald* Company. The paper was shortly after its birth transferred to C. Mallet & Co., who were allowed to gradually buy up all the stock paying for the same in advertising. The editorship of the paper passed into the hands of H. A. Wiltse, one of the brightest lights of the galaxy, who through their labors in this position, have enthroned the *Herald* as one of the household gods of this and adjoining sections. Under his management the paper began to assume something of importance, and its columns became a valuable repository of lore—mineral, agricultural and statistical—which makes the early files of this paper particularly valuable to him who would cultivate an intimate acquaintance with the resources and developments of this early period. October 21, 1843, Mallet retired from the paper, having disposed of his interest to J. D. Spaulding, Mr. Wiltse remaining in the editorial chair. The paper remained as it had been from the commencement, a five-column folio. In April, 1844, Mr. Wiltse severed his connection with the *Herald* and took up his former duties as surveyor, removing in time, to the State of Iowa, where he entered the Surveyor General's office at Dubuque. He was afterward made Surveyor General, but resigned the position to commence the practice of law, in which profession he rose to a high rank before his death, which occurred a few years ago. During the year and a half following Mr. Wiltse's retirement the rapier-like wit and subtle reasoning of J. T. Mills is mingled with the scathing sarcasm and flashing arguments of James M. Goodhue. Mr. Spaulding, more ambitious than his predecessors, aimed to make the *Herald* a State paper, and changed the name from the *Grant County Herald* to the *Wisconsin Herald*, and at the commencement of 1845 he added one column to its size, making it a six instead of a five column folio. In August of this year, James M. Goodhue, whose genius had shone forth so conspicuously during the past months, was associated with Spaulding in the publication of the paper, and took his seat in the editorial chair. In expressing his purposes on taking the helm, Goodhue said: "To be useful the press must be unshackled. * * * The press is the great fountain through which mind is ever pouring forth freshness, vitality and power. It is with such views of this subject that the editors of the *Herald* call upon their patrons to sustain them in a full, fair, untrammelled expression of thoughts and opinions. Our opinions will not always coincide with those of all our readers. Men do not all think by the rule of three. * * * * The editor who pens every paragraph in constant fear of 'stop my paper' is a mere 'toad under a harrow.' We have no fears of this kind for we well know the intelligence of our readers, and that if we write honestly, fearlessly and vigorously, they will pardon us if we do not always write wisely." In a later issue, notice is given that at the commencement of a new volume a change will be made in "plan, purpose and character of the paper," looking toward an active partisanship, the *Herald* having heretofore remained neutral on the principal absorbing questions of the day. The shadows thus cast before, were followed by four years of flashing editorials, each line of which was pregnant

with life and thought. Ever given to the Donnybrook Fair maxim of "When you see a head hit it," Goodhue allowed no chance to escape, whereby he could apply his peculiar gifts. No wrong to go unscathed, or chicanary to pursue its course unmasked; brilliant but erratic, his course was not such as was likely to advance the financial side of the balance, however high might go the admiration for the brilliant talents displayed weekly through the columns of the young journal. At the end of August, Goodhue had become sole proprietor of the *Herald* and so continued until the spring of 1849. He then sold out to J. L. Marsh and took the old press, which had been replaced by one of a more improved pattern, and removed to St. Paul, where he founded the *St. Paul Pioneer*. To this old press quite a history is attached. It was originally purchased for the Dubuque *Visitor*, the first paper published in Iowa; then brought to Lancaster, it served, as has been seen, to "work off" the *Herald*; then served to give the first impressions to the first paper in the Territory of Minnesota, and was again sold, in 1858, to start afresh upon its wanderings, after twenty-two years of service. It went to Dakota and was used to print the *Dakota Democrat*, the first paper printed in that Territory, where it remained in active service until the Sioux outbreak of 1862, when the outfit, including the old Smith press, was captured by the United States troops from the Indians in a running fight, but the old press had done its last work. It was so broken up as to be no further use.

Goodhue's St. Paul venture was first christened the *Epistle of St. Paul*, but the name being objected to by some of the proprietor's friends, it was changed to the *St. Paul Pioneer*, and thus remained until consolidated with the *Press* a few years ago, forming the *Pioneer-Press* of to-day.

Mr. Goodhue, afterward christened Colonel, continued as publisher of the *Pioneer* until August, 1852, when he passed on before to the other world. The *Grant County Herald*, then published by J. C. Cover, at this time gave the following estimate of this remarkable man: "Col. Goodhue was a lawyer by profession, but soon after his arrival in Wisconsin, he purchased an interest in the *Herald*, after which he gave up the practice of law. Here in Lancaster, he commenced his editorial career, and here, during a three-years' experience, he perfected his extraordinary talents, and laid the plans which ultimately secured for him unbounded notoriety. In a pecuniary sense, he was remarkably successful; having commenced without a dollar, he amassed a fair fortune within the few years of his editorial career. He united, in person, all the elements necessary to success in life. His intellectual countenance, when roused, betrayed that bitter sarcasm which distinguished him as a writer; but when composed, as strongly exhibited the wit that beamed through his humorous articles. The world was the seminary of his learning from which he gleaned the myriads of thoughts and expressions never before entertained or uttered by living mortal. Col. Goodhue will be a loss to the editorial fraternity, for he dared to lead in what the majority have not nerve to do—in exposing the errors of the many, the recklessness of the great, and the crimes of the high. All evil-doers were chastised alike, for he had no mercy to spare for any."

Goodhue was succeeded in the proprietorship of the *Herald* by J. L. Marsh, who, being of a conservative, quiet temperament, trimmed his sails more carefully to the different winds, and so managed to keep his craft afloat and with provisions enough to carry the crew so long as they remained aboard. He remained at the helm until June 19, 1851, when he was succeeded by the firm of Cover & Shrader. The retiring editor afterward founded the *Independent American*, at Platteville, and, after numerous newspaper adventures, settled in Sheboygan, Wis., having first purchased the *Sheboygan Herald*, which he continued to edit many years. Mr. Marsh is at present Postmaster in Sheboygan. When the new firm came into power, the subscription list numbered 261 names, but, owing to "certain unpopular sentiments held by the editor," the list fell to forty names in a short time; but others rallied to the support of the paper, and, two years later, the *Herald* had 600 subscribers. The firm of Cover & Shrader continued as publishers of the *Grant County Herald* until January 1, 1853. At that date, Mr. Shrader retired from the partnership, his place being filled by Mr. Goldsmith. The *Herald* now began to make rapid strides toward the golden shores of prosperity. The editors were fully alive to the needs

of the county, and, by ably written and timely articles, aimed to attract a goodly share of the western tide of immigration into this southwestern corner of the State. Speaking of their aims and purposes in this and other lines of thought, the *Herald* of July 3, 1854, says: "Our purposes from the first have been just three; no more, no less. To tell our readers what they ought to be told; to tell them what they want to be told; and, thirdly, to make money. We care little for party measures or professions, since the thing professed ever fails of success however warm and numerous its advocates. We are tired of professions—men we have confidence in; therefore, we shall be the advocate of men, since good men rarely ever profess much, but act out what they believe right, regardless of party or party favors. 'Men, not measures' is our political rule of faith, and if men generally adhered to it, we'll be bound their will be oftener respected in the legislative halls and councils." As the firm became later on interested in other ventures, the editorship devolved more and more upon Mr. J. C. Cover, and hardly could the mantle of responsibility have fallen on better shoulders. Under his hand, the *Herald* became the exponent of the most advanced ideas of political thought. In fact, J. C. Cover, J. Allen Barber and Judge Mills are charged with "having made Grant County radical in politics." Certainly the first-named of the triumvirate did his share, and history shows that the other triumvirs were not behind in the good work. In 1859, Mr. Goldsmith withdrew from the partnership, leaving Mr. Cover as sole proprietor. The *Herald* had already increased in strength until it was "a power in the land and" a welcome visitor to the numerous homes in Grant County, many of which had been established through the means of articles setting forth the beauties and wealth of this southwestern portion of the State. At the beginning of the new volume in the above year, the editor gave forth another article of editorial faith, by giving notice that, "we shall not intentionally, nor for had motives, advocate a wrong, even though such wrong be popular and sanctioned by party, church or friends." In the stormy days just preceding and during the opening of the war, the position of the *Herald* could not be mistaken. Its clear, ringing editorials, gave signs of the true metal underneath, as its editor worked night and day, by pen, tongue and example, to uphold the Nation, in those dark days of uncertainty. It was the *Herald* that chronicled the names of Grant's representatives as they came pouring forth to do battle for the Union. It was the *Herald* that, through the forethought and kindness of its ruling spirit, reached them far down in Dixie, bringing tidings of friends and home, and it was the *Herald* that bore, only too often, the tale of woe to the suffering and stricken parents, sisters and brothers, of the news of the son and brother's martyrdom on the altar of his country. To those that came back, the old familiar journal was more a necessity than ever. What wonder then that its subscription lists assumed plethoric proportions, or that its interest was not bounded by mere county lines, but reached out even into the whole State.

March 5, 1867, John Cover was associated with Mr. Cover. Sr. as assistant editor of the *Herald*, and in June of the same year the proprietor gave evidence of his willingness to keep abreast of the march of modern improvements and demands, by increasing the *Herald* to an eight-column folio, and putting in a power press, which gave increased facilities for expeditious printing and handling of the steadily increasing issue. No further changes were made until December 29, 1868, when notice was given, editorially, that henceforth the business portion of the *Herald* would be transferred to John Cover, who, on January 1, would lease the paper for an indefinite period; the editorial columns remaining in charge of Mr. J. C. Cover. July 27, 1869, the former assumed editorial, as well as business control of the paper. Upon assuming control, the new editor says: "No changes will be made in the aims and politics of the *Herald*. It will be our aim to publish an useful paper, in which the sentiments are radical and progressive, not only in politics but in all things—a paper devoted to the public interests and general good." In the previous issue the retiring editor, Mr. J. C. Cover, had severed the editorial link which, for the past few months, served to bind him to that journal, which he could with right claim as the child of his own intellectuality, the offspring of his active brain. In his valedictory, Mr. Cover referred to the past as follows: "With the present number of the *Herald* closes our editorial connection therewith for the present possibly for all time. During

our connection with the *Herald*, nearly half our life, as its editor and proprietor, we have aimed less to please the public than to benefit the people. We have not been a neutral editor upon any public issue. * * * * In resigning the place, we feel that we have not disgraced it by pandering to any man or faction, nor catered to wealth or power. * * *

* * * * As to our past action in political party affairs, we have from necessity acted in a positive and commanding manner. In these matters we have aimed at the best for the people, very often in such view opposing our own choice, and acting in opposition to our own interest. We have erred at times, but in all such cases have endeavored subsequently to more than undo injuries. We are still indebted to some persons for errors, and shall not rest well till such debts are paid with interest.

"Long years we felt that upon the abolition of slavery, and the establishment of the perfect political freedom and equality of all men, there would follow but little else to excite our anxiety in politics. Our utmost editorial abilities were bent and exhausted in that great object, and now the country is a free country. All parties cannot henceforth fail to be true to democracy and equality, not from choice perhaps, but because they cannot help it. * * * It may be our lot to again, sometime, resume the charge we now surrender, but this is not the intention. In our future life, abroad and at home, and however employed, our old readers will be much of the time present in mind."

Mr. Cover had been appointed during the spring of 1869, Consul to Fayal, in the Azore Islands, and after some delay, sailed for his new post of duty in December of that year. He was suffering from poor health at the time of his departure, but it was hoped that the genial climate of these Islands would recruit the enfeebled frame. Such proved not to be the case. Mr. Cover sailed in June of 1872, by the packet ship plying between these Islands and the United States. for home, but died en route on the 4th of July.

After the death of Mr. J. C. Cover, the *Herald* passed into the hands of his son John Cover, who had taken charge of the paper as heretofore stated in 1869. He continued as sole editor and publisher until December, 1876, when a partnership was formed with Edward Pollock, which lasted until December, 1877, when Mr. Cover withdrew, leaving Mr. Pollock as proprietor. He continued in this capacity until January 1, 1881, when the *Herald* passed into the hands of its present proprietors, Messrs. Cover & Farquharson, under whose careful manipulation the journal is fast assuming its old-time popularity and influence. Mr. Cover is a Lancaster boy, son of the former proprietor of the paper. He received a collegiate education at the State University was employed for a long time as stenographic reporter for the Fifth Judicial District, and later as Private Secretary to Senator Cameron, at Washington. He brings to his work a mind fresh and active, besides being well versed in the wants and needs of journalism through association as assistant editor of journals in Wisconsin and the Far West. Capt. Farquharson, or "Cap. Ferg," a sobriquet which has almost become a household word in Southwestern Wisconsin, is a printer by trade, having served his time at "the case" at a time when memory runneth not back thereto, and at the breaking-out of the rebellion was employed as foreman on the *Herald*. Dropping the composing stick, he seized the musket and marched to the defense of his imperiled country. Having been associated with a military organization previous to the war he was elected Captain of his company, which formed Company C of the Twenty-fifth Regiment Wisconsin Volunteers, serving with honor throughout the war, and only returning when the peace dove flashed her snowy wings over the land. He located at Boscobel, where he soon after purchased the *Boscobel Dial*, then a staggering sheet of limited circulation. Under his skillful management this journal was brought up to its present stable and influential position. As a job printer, "Cap. Ferg" stands without a peer in the State, and under his eye the *Herald* job rooms are becoming rapidly noted for the excellence of the work turned out therefrom. The *Herald*, under its present management, is again, as in former times, radical in politics, always to be found in the front rank, fighting for freedom and equality of all classes, whatever their race or color. Among the many characteristics of the *Herald*, none were more prominent in its younger days than its moving proclivities. Franklin has said that "seven removes are as bad

as a fire," yet in its thirty-eight years of existence this paper has almost reached the Frank-
linian limit, though each time has come up fresher and more smiling than ever.

Soon after its beginning, the *Herald* establishment was moved into the frame structure first
used as a court house, about where the bank building now stands. From there it was moved to
the upper story of Pepper's building. In May, 1850, the office was again moved into "a
new building first used by P. J. Adams as a carpenter-shop" adjoining the court house square.
With the issue of May 8, 1851, the paper suspended publication for a short time owing to the
proprietor having to vacate his present premises, and the non-completion of the new office. This
was completed in time for issuing the paper May 29, after an interval of three weeks. The
new office was in the rear of Dwight T. Parker's store, and within a few feet of its former loca-
tion. There it remained until September, 1852, when a new removal was made to an office "on
the sunny side of the street and opposite to nowhere." This appeared to be the last upheaval.
Finally, however, upon the erection of the Ryland Block, on the corner of Maple and Madison
street, large and commodious office rooms were offered in the second story of this building, which
were accepted, and here the *Herald* seems located "for good and for aye" after its numerous
wanderings.

Grant County Democrat.—The lack of any medium through which to promulgate Demo-
cratic principles and party policy, and the large number of that line of faith living within the
confines of Grant County, led to the establishment of the *Grant County Democrat*, early in
1870, by Messrs. R. B. Rice and Bishop. The *Democrat* office was in the third story of the
Crabtree Block, now the Horstmann House. The existence of this journal extended over but a
brief period when its life was squelched, and it succumbed to the inevitable and gave up the
ghost. The press and material served afterward as the foundation of the *Advocate*, started a
few years later.

Grant County Advocate.—This journal first saw the light in May, 1873, and was then
known as the *West Grant Advocate*, being published at Bloomington. C. N. Holford was the
founder. A year later, J. J. Clifton was associated with him in the publication, and, in October
of the same year, the place of publication was removed to Lancaster and the name of the paper
changed to the *Grant County Advocate*. Hitherto it had remained neutral on all political ques-
tions, but it now came out conservatively Democratic, the first number being published at the
new location October 14. The publishers at this time were C. N. Holford and P. Bartley. Jan-
uary 20, 1875, A. Reifstick was associated with the above named, and a company formed under
the name of the "Advocate Publishing Company." The *Advocate* was published under this
management until the following May, when, with the issue of May 19, C. N. Holford and his
erstwhile partner, Bartley, withdrew, and the publication was continued under the proprietor-
ship of Mr. A. Reifstick. The paper, under this management, continued a brief but brilliant
career. It was continued under the Democratic banner until 1876, when a "flop" was made to
the Republican side. This move estranged, as a matter of course, those of its former political
faith, while its orthodoxy was viewed with suspicion and distrust by those whom it would have
secured. Under these disastrous circumstances the *Advocate* struggled for awhile, when it closed
its checkered career January 1, 1877. A half-sheet was issued from another office for one week
afterward, but it was the post mortem throes of the dying spirit, and the conviction was unwillingly
forced upon even the mind of its indomitable editor that the *Advocate* was no more.

Grant County Argus.—Previous to the final throes of dissolution that closed the career of
the *Advocate*, C. N. Holford, who, since the dissolution of the Advocate Printing Company, had
served as foreman of that journal, withdrew from that position and started, in 1876, in the
second story of the building now occupied by Mr. Jones as a drug store, the *Grant County*
Argus. In politics it inclined to the Greenback theories, which were at that time arousing the
attention of the country. In 1878, the *Argus* was purchased by Messrs. Reifstick & Martin.
This partnership did not last very long, and Mr. Reifstick withdrew. Under the editorship of Mr.
Martin the publication was continued until the first of 1880, when the press and material were
transferred to Prairie du Chien, where its publication was continued for some time, but with this

SCHOOLS.

The first school in Lancaster was started in 1841, the old cabin first occupied by G. M. Price as a store being used as the schoolhouse. The school was started by some of the early settlers, and was supported mainly by voluntary contributions. The teacher was Miss Jane Ayers, then from Rockville, now Mrs. Trethuic, and for many years a resident of Lancaster. This first educational venture continued through the period of several terms. After its discontinuance, Francis Rigeaud opened a school in the northwest room of the court house, and a second school was taught in a building situated in Bushnell Hollow. Rigeaud was an old French soldier, and continued his embryo academy until the erection of the first schoolhouse in 1843. Under the laws, as then existing, the County Commissioners had power to lay off or subdivide their districts into school districts. This had been done in the district in which Lancaster was contained. The first attempts to furnish educational facilities for Lancaster youth had only shown the need for some regularly organized school, therefore, J. Allen Barber, Nelson Dewey and Daniel Banfill, as a School Board, proceeded with the erection of a schoolhouse for this district. The movement at first met with considerable opposition, and many were the volleys fired at the heads of the devoted trio. The building once completed, however, and its necessity being more generally recognized, the assailants were turned into admirers, and praise took the place of invective. The name of the first monarch who mounted the rude throne in this institution of learning has faded away into the mystic region of forgetfulness. Soon, however, the rule and rod passed into the hands of J. T. Mills, then a new-comer into the village. Having been educated at an institution of learning in Illinois and graduated under the eye of Dr. Edward Beecher, the new teacher was thought to be well enough versed in "readin', writin' and cipherin'," to undertake the task of bringing up the young Westerners in the educational way in which they should go. He was possessed, moreover, of something better than this, a qualification of which his patrons were unaware, namely, an understanding which could reach out beyond the narrow boundaries limited by set rules and render light the dark places, making easy the way by removing the hideous huggears and puzzling intricacies which beset education in early times. It was soon found that the young teacher was the right man in the right place. So well had he succeed that he was unanimously chosen for a second term, and J. C. Cover was associated with him in the growing school. As tradition hath it, "Mills was to do the teaching and Cover the licking." Then for the first time the old system and the new met, and, as might have been foreseen (as never yet was one body known to travel in the same orbit simultaneously with another), the two systems gave forth a jarring sound which threatened annihilation of the whole educational plan. Each was a master of his system, and each thought his the best. Harmony was restored by an agreement that each should teach a week about, and, under this arrangement, those interested had a chance to compare both systems, ending at length in a victory of the new faith over the old. This building continued the seat of learning in Lancaster for many years, alternated with "select schools," which were started under first one teacher and then another. Lancaster became, in fact, divided into two hostile camps, one favoring the ordinary public school system as in vogue among the Eastern States, and the opposing hosts wishing the educational privileges transferred to an "academy" or "high school."

In 1852, the latter class proved their faith by their works, and started a school in the Congregational Church, under the supervision of Mr. Demarist, who came well recommended as an educator. The Trustees of this institution were Daniel R. Burt, Nelson Dewey, J. Allen Barber and J. T. Mills. This school continued with varying success under different teachers until the advent of Mr. Page, now Judge Page, of Austin, Minn., whose attempted assassination some time ago created such a furor throughout that and adjoining States. Under Mr. Page, the school reached the acme of its power and influence. The gentleman, while enforcing a strict discipline that reduced the pupil almost to a mere machine, moving at the command of its master, forced his scholars along the road of learning at a pace hitherto unknown in educational annals. So successful were his efforts that early in 1858 a meeting was held in the office of

Barber & Lowry for the purpose of considering the proposition of building an academy. The decision was in the affirmative, stock was placed at \$10 per share, and \$1,200 were subscribed and one-quarter paid within a week. The building was to be 25x40 feet in size, two stories high, with accommodations for 125 scholars. It was completed and opened in August, 1858, Mr. Page being the Principal. This gentleman soon after took his departure, owing to disagreements which arose between him and some of his principal patrons, and the "Institute" was continued until the completion of the present school building in 1870, when that, with its graded system, took the place of the former, and the "Institute" was discontinued. The building was transformed into a dwelling-house and remains standing, used for that purpose, on the corner of Oak and Monroe streets.

In the meantime, the advocates of the common-school system had not remained idle. The old schoolhouse in the north part of the village had been outgrown, and at a meeting of the citizens of the village, held at the schoolhouse October 24, 1854, it was determined, though not without some opposition, to build a new school building, the structure to be of brick, two stories high, 26x46 feet. The site selected was the present school lot in the south part of the village. The old schoolhouse, which had witnessed the *regimes* of J. T. Mills, J. C. Cover, John G. Clark and other instructors of the young idea, when the salary amounted to the munificent sum of \$10 per month, and the privilege of "boarding 'round," was condemned to be sold, and sold it was to a Mr. Palmer for \$305, and by him converted into a dwelling-house; it was later on purchased by Judge McGonigal, and is still in use as a portion of the Judge's residence.

The new schoolhouse was built by Messrs. Sherman & Walker, and finished in the early part of 1856. It was 50x35 feet in size, two stories high, and intended to furnish accommodation for 250 to 300 scholars. The upper and lower rooms were well lighted, desks well arranged, and in all respects what well-ordered school-rooms should be. The cost of building and plat was \$3,000. This building was in turn outgrown, and in 1868, a larger and more imposing house was erected at a cost of about \$15,000. It was already completed, and but a few days were to elapse before it was to be teeming with life. June 13, 1868, a terrible gale swept over Lancaster, and among the first fruits of its fury was the new schoolhouse, which was tumbled into a heap of ruins. The cause of its succumbing so quickly to the gale was attributed, in a great measure, to defective construction. However, the damage had been done, and the only thing remaining was to remedy it as speedily and in the best manner possible. Opinion was divided as to the best course to pursue. The district was already encumbered with a heavy debt, the result of erecting the wrecked building, and under the circumstances many thought it best to purchase the old Congregational Church, then for sale, and fit it up for school purposes. The opponents of this way of thinking argued that it would be better to go on as they had begun, and erect a building which would be sufficient for many years to come, besides being an ornament to the town. At a meeting held for the purpose of deciding the question, the latter class was found to be in the majority. Contracts were accordingly let, after plans and specifications prepared by the building committee which had been appointed, and the present school building was the result. Its valuation, *vide* report of County Superintendent of 1880, is \$20,800. The school combines both a graded and high school, the latter being erected at a school meeting held July, 1875. The high school proper employs the services of the Principal and one assistant. The graded department comprises four distinct grades—primary, second primary, intermediate and grammar grades. The whole number of teachers employed, including the Principal, is six. The present Principal is Prof. R. L. Reed, receiving a salary of \$1,000 per annum. School matters are under the control of a school board of three members, one member being elected every year, and holding office for three years. The present board comprises Capt. A. R. Bushnell, Moderator; Mr. James A. Jones, Treasurer; and Mr. John P. Lewis, Clerk. In regard to school attendance, Lancaster Township, according to the report quoted above, stands second in the county, Platteville ranking as first.

RELIGIOUS.

Methodist Church.—The first religious services ever held within the present limits of Lancaster, were undoubtedly held by itinerant preachers of this denomination. Judge J. T. Mills speaks of witnessing a service held in a cabin in Bushnell Hollow, northwest of town, the audience consisting of a half-dozen miners or wandering adventurers, the date being shortly after the platting of the village. This fugitive service may possibly have been followed by others, but the first notice of Methodism in a regular form in Lancaster, is found in the report of a Quarterly Conference held at Fennimore early in 1849, the church being at that time evidently connected with Fennimore. The first Quarterly Conference held in Lancaster was convened October 21, 1849, Rev. Elmore Yocum being the Presiding Elder, and Rev. Benjamin Close the preacher in charge. A resolution was moved and carried to build a parsonage at Lancaster; Benjamin Close, Benjamin E. Quincey and Martin Teal being appointed as a building committee. The first Board of Trustees elected comprised the following names: James Henderson, Charles W. Long, A. E. Kilby, Joseph McKinney. This movement appears to have resulted in nothing, as in 1850, is found notice of another effort to go on with this building. Rev. Mr. Close remained until the fall of 1850, when he was succeeded by Rev. J. W. Putnam, who, however, left before his year was up, Rev. Henry Wood taking his place January 18, 1851, for a few months. During this winter, efforts were made to commence the erection of a church building, and successfully, as the new church was commenced and completed the same year, and November 16, was dedicated to the worship of God. The house was 42x26 feet in size on the ground floor, and cost \$800. At this time a debt of \$400 still remained unpaid. Mr. Brooks, of Lawrence University, Appleton, Wis., was present on the occasion to take part in the services, and assumed the responsibility of lifting this load. The first collection made amounted to \$50; another was immediately ordered, resulting in the raising of \$350, or enough in addition to the first to pay the whole debt, leaving the church without any embarrassing load of this kind to carry. In addition to this amount, \$100 of "Telegraph stock" was subscribed. This pioneer church stood on the corner of Maple and Adams streets, and was used by the congregation until the completion of their present church in 1877. It still remains in the old position, being used at present as a carriage repository.

In March, 1851, Rev. A. H. Walters had succeeded Rev. Mr. Wood, remaining until 1852, when Rev. M. Osborne took charge of the young society. A glimpse of early Methodism as it appeared at this period, is given somewhat later by one who was acquainted with its workings, evidently Mr. Osborne. He says: "My first visit to Lancaster was in 1852. At that early period, the new church building was just completed, through the efforts of my predecessor. My field of missionary labor embraced Lancaster, Boice Prairie, Little Grant, Shanley's, Waterloo and a part of Fennimore. At all of these, save the home appointments, we had no church buildings, and we held our regular church services in log and frame school-houses, which would be often filled to overflowing by settlers from half a score of miles about.

"Such home-like welcomes as we had then will never be forgotten, and the names of such men as Kilby, Quincey, McKinney, Kitts, Loney, Guilliford and others, cannot be recalled without pleasure. During 1854-55, my field of labor was Patch Grove, where our regular preaching places were Patch Grove, Millville, Blake's Prairie, Mount Hope—then known as Whitesides—and Wyalusing. Henry Patch then kept the Patch Grove House. The Methodist parsonage, Dr. Chamber's, Col. Finn's, J. G. Ury's, Osborne's, Brunson's and one or two other families, constituted what was then called Patch Grove Village. Bloomington was not then heard of, with other villages now in existence. At Montfort one found a vast territory of country uninhabited, but a very paradise among the desirable places this side of heaven. At that time there was no farm house directly on the National road from Wingville west to Fennimore Grove, though on either side the Dinsdales and others had settled and were opening farms. South of Wingville, midway between it and Clifton, stood the house of G. Bunker, visible for miles around, and ensconced in the valleys were the homes of Keith, Taylor and others.

“Clifton was considered the Goshen of the surrounding country. Ministers and others found a warm welcome at such homes as J. F. Brown's, Clayton's, Clifton's, Shipley's, Howdel's and Bosye's. The old 'rock church'—one of the first erected in Grant County—was a fine structure for the times. Mineral was found in considerable abundance near the church, but the most extensive mining was done in and near Wingville, which consisted of a dilapidated church on the hill, a small parsonage, stores kept by Clayborne Chandler, S. D. Green, Jenks, Bell & Thomas, and one or two others. The Stephens House and Ledbetter Hotel were the only places of entertainment. East of Wingville for ten miles, there were no farms directly on the main road, if Parmalay's is excepted, whose house was in a beautiful grove nearly half a mile from the road. Comfort, Armfield, Lincoln and others had settled on their prairie farms, and were just beginning a new life in the beautiful country.” To these and others of that ilk was the early itinerant indebted for that bounteous entertainment which was ever ready whenever he might appear.

In 1852, Rev. W. M. Osborne filled the pulpit, followed in October, 1853, by the Rev. John Hooper. In 1854, Rev. A. H. Walters was returned and remained two years, when Rev. E. Tasker assumed the pastorate, remaining until July, 1858. At that time he was succeeded by the Rev. C. P. Hackney, who served as Pastor one year and a half, delivering his charge over to the Rev. R. R. Wood, in December, 1859. The growth of the church in the meantime had been slow, but not marked by fluctuations that showed later on. Rev. Mr. Wood was followed in 1861 by Rev. Matthew Dinsdale, who remained until September, 1862. At the conference that year, Rev. R. Dudgeon was appointed to succeed Mr. Dinsdale, and remained one year. In 1863, Rev. E. Buck came, remaining the conference year. The ultra opinions held by this gentleman on the great issues then being put to the test of battle, caused a sad falling off in the church membership, a blow which was felt for many years afterward. Mr. Buck was succeeded by Rev. C. Cook, who remained in charge of the congregation until 1868, when he was followed by the Rev. James Simms. His pastorate extended over the three years next ensuing. The conference of 1871 returned Rev. Anthony D. Dexter to the charge. He was succeeded in 1874 by the Rev. A. W. Cummings. During the pastorate of this gentleman, the present church building was erected, a substantial and commodious structure, standing on the corner of Cherry and Monroe streets. The building was ready for dedication late in 1877, but, with a spirit worthy of imitation, the society decided not to formally dedicate the building until the debt then resting upon it was paid, and the church as a consequence remains undedicated up to the present time, although but a very small portion of the original debt remains. Mr. Cummings was succeeded by the Rev. G. W. L. Brown, who remained until 1879, when he was succeeded by the Rev. C. Cook, the present Pastor. The present officary of the church is as follows: Pastor, C. Cook; Trustees, James Woodhouse, R. L. Hoskins, Stephen Vivian, J. E. McKinney, John Willis, B. E. Quincey, Alexander Ivey; Secretary and Treasurer, Alexander Ivey.

Congregational Church.—This church was organized in the court house on the 21st day of May, 1843, by Rev. J. L. Stevens. The membership was, at this date, limited to seven. Judge Mills and wife, Mrs. Rebecca Mills, Mr. Daniel McAuley and wife, Mr. Dexter Ward and wife and Miss Mary Ward. Of these early members, Judge Mills, Mr. and Mrs. Ward and Miss Mary Ward, now married and living elsewhere, remain. When first organized, the church was Presbyterian, but was changed some years later to a Congregational Church. Mr. Stevens remained for some time in charge of the little flock, meetings being held in the court house, and oftener in a vacant log cabin, then standing in Bushnell Hollow. In this structure, the first prayer meeting was held, and the Sunday school organized. Upon the erection of the school-house in 1843, this was used as a place of worship on the Sabbath Day until the erection of the first church.

The first regularly established minister was Rev. R. Carver, who came in 1844, and remained as Pastor until December, 1845. He was succeeded by Rev. O. Littlejohn, who remained as spiritual head of the church from August, 1845, until January, 1847, when he was

succeeded by Rev. S. Eaton. The first election of Trustees of the new society took place in 1850. J. T. Mills was chosen Clerk of the board, but aside from this, not much is known of this early body, as the earlier records of the church were lost through some dereliction on the part of those having them in charge. But in this same year, subscriptions were solicited for the purpose of erecting a new church; at this time, Sunday school was held in the old schoolhouse, a portion of which is now used as a dwelling by Judge McGonigal. Owing to the absence of the Pastor, work on the new edifice was not begun until the following season, when it was inclosed and plastered, and with the aid of seats temporarily obtained from a church at Potosi, and a pulpit furnished by the Platteville Church, the building was fitted for occupancy as a place of worship, and consecrated December 2, 1851. This church was situated on Lots 1 and 2 of Block 29, on the corner of Cherry and Adams streets. It was a modest structure forty feet in length by thirty in width, and cost \$700; the builder was E. B. Tenney. The interior was completed at a later period, and an addition of twenty feet was made to the front of the building in 1860.

This place of worship was retained until the erection of the present edifice occupied by the society.

In 1862, Rev. Mr. Eaton was commissioned Chaplain of the Seventh Wisconsin Regiment, which was composed in a great measure of Grant County representatives. Mr. Eaton went at once to the front, where the regiment was engaged in watching and fighting the rebels. From this time on, he remained at his post until the close of the war, and many a wounded soldier boy has reason to bless the Chaplain of the Seventh Wisconsin; so faithful was the reverend gentleman in his work, that he was heartily spoken of by officers and men as "the best Chaplain in the army." During his absence, the pulpit was filled by the Rev. Mr. Maiben.

In 1871, it was decided to erect a new and more commodious structure, better fitted for the growing needs of the society, and, August 19 of that year, the corner stone of the new building was laid with imposing ceremonies. Under this block, on which was to rise the imposing pile, was deposited a history of the Congregational Church in Wisconsin, in two volumes, last issues of the county papers, cereals and seeds, and a sketch of the history of the church. After the ceremonies were over, the group was photographed by Vanderwall. The site selected for the edifice was that known as the Dewey lot, on the corner of Madison and Cherry streets.

It was not until 1873 that the building was ready for occupancy. On Sunday, July 17 of this year, the church was formally dedicated to the worship of God. Rev. C. H. Richards, of Madison, delivered the sermon, the remainder of the exercises being conducted by the resident Pastors of the Congregational and Methodist Churches. Previous to the formal dedication, an appeal was made to the audience for subscriptions to pay off the debt of several thousand dollars that still remained, and \$2,000 was thus obtained. The contractors and builders were Messrs. Alcorn & Muesse, the plans and specifications being furnished by C. W. Shinn, of Springfield, Ill., and the cost of the building was \$12,650. The edifice is of the style known as the pointed gothic, and is 50x85 feet outside; height to cornice, twenty-two feet, with height to upper ceiling, thirty-two feet. The main spire is 100 feet in height, ornamented with beltings of cut stone.

The auditorium is 40x80 feet, from which is taken a "social room," 20x40 feet. This room is separated from the auditorium proper by sliding partitions and doors, which are so arranged that they can be lowered to the basement when occasion requires, thus throwing the whole together in one room. Over this "social room" is a gallery of the same dimensions as the room itself. Admittance is gained by two entrances on the east side of the building, and one on the north. In addition to these, there is an entrance direct into the Pastor's retiring room.

The interior is very tastefully decorated in a cool gray, slightly bordering on the blue, while the roof is checked off into large squares by the timbers supporting it, that are thus called into play as a portion of the decoration; these are grained in a dark oak, while the squares show a gray tone somewhat warmer in color than the side walls. The general effect is quiet but

LANCASTER.

pleasing. The pulpit stands in an arched recess, on either hand of which are other and smaller arches—that to the right of the pulpit being used for the choir, the congregation being thus able to “face the music” without the trouble that is necessary so to do in many churches. An immense chandelier, with numerous side lights—both the present of Gen. J. B. Callis—furnishes the light necessary when occasion requires, while the room is well warmed by two furnaces in the basement.

Upon the completion of the new church, the old building was sold to Mr. E. H. Borah for \$700, and was raised, another story added underneath, and now serves as a dwelling and shop.

A debt of a few thousand dollars still remained, but, through the active exertions of the church members, together with aid furnished by outside parties, the debt was lifted, and, December 26, 1879, the society stood free from debt and in possession of a church edifice such as they might well view with pride.

The present officary of the church is as follows: Pastor, Rev. S. Eaton; Deacons, Mr. George Howe and J. H. Jones; Trustees, J. H. Jones, George Howe, S. H. Farnsworth, B. White, Charles H. Baxter; Secretary, T. A. Burr; Treasurer, J. H. Howe.

Baptist Church.—In accordance with a notice previously given, a meeting was held at the court house November 29, 1844, for the purpose of forming a Baptist Church. D. Banbridge was appointed Moderator, and J. Miles Clerk, after which it was resolved “that we form ourselves into a church, to be designated as the Baptist Church of Lancaster. The resolution was carried unanimously, and signed by George McFarlin, Martha McFarlin, Israel Miles, Evan Miles, Reuben Miles, Isaac F. Miles, Caroline Woods, Mehala Miles, Jesse Miles and Sarah Miles. At a subsequent meeting, held November 16, 1844, the members of the young body “agreed to meet the citizens of Lancaster to deliberate on the subject of building a house of worship.” Jesse Miles, William N. Reed and Evan Miles were the first Church Trustees, elected November 19. At a meeting, held December 14, William Reed was elected Church Clerk, and the Trustees appointed a committee to confer with the citizens, to co-operate with them in building a Baptist Church. The first Deacon was George McFarlin, elected April 15, 1845, and in August of the same year Jesse Miles, William Paddock and William N. Reed were appointed as a committee to purchase Lots 4 and 5 of Block 22, for a site for the proposed church.

Up to February, 1846, Elder Miles had served as Pastor of the little body, but at that time a call was extended to Rev. Mr. Chapin to serve as Pastor for one year, and he accepting, commenced his work in June. The Baptist organization at this time, being the strongest in the place, the citizens had offered to co-operate with the congregation in erecting a church, deeming it necessary that the village should contain at least one house of worship, and by the beginning of 1847, \$900 had been subscribed. A building society had been formed, and Nelson Dewey, Alfred Miles, J. C. Cover, H. L. Liscum and James M. Otis elected Trustees. As such they also acted as a Building Committee, and July, 1847, there being \$1,015 available, the contract was let to Jacob Gow for building the foundation, the price to be paid being \$188. This work was finished by the spring of 1848, when the contract for the erection of the church building was let to James M. Otis for \$1,100, the building to be finished by November the same year. This was not done, however, and it was several years before the house was ready for occupancy. The public services of the society were held in the meantime in the court house, and occasionally in the schoolhouse in the north part of town. Mr. Chapin remained until 1851, when he was succeeded by Rev. D. Matlock, who remained until 1853.

July 4, 1852, the church was ready for occupancy and was dedicated upon that day. Upon Mr. Matlock's resignation, a call was extended to Rev. E. M. Lewis, which was accepted, and he commenced his pastorate in July, 1854, remaining until early in the summer of 1856. The church then remained without a Pastor until January, 1858, when Rev. E. B. Hatch came for a short period, extending to November of the same year. His successor was Rev. D. Matlock, who took charge of the congregation for the second time in 1862. Mr. Matlock's pastorate extended over a period of two years, when the church was again left pastorless. In 1869, Rev.

Wade accepted the charge of the society for a short time, but resigned in December of the same year. Since the departure of Mr. Wade, the church has been without any regular Pastor. Occasional services have been held upon the occasion of visits from outside clergymen, but, owing to the deterioration of the church, through emigration and death, there can hardly be said to be an organized body at present existing. During 1868, repairs were made upon the church, which placed it in good order, but to-day it stands quiet and alone gazing out upon the west, a memorial of the early days of Lancaster. Its ultimate fate is uncertain, but, as one of the oldest structures still remaining in the city, it should, and doubtless will, be preserved as a relic of the olden times.

Emanuel Episcopal Church.—About the year 1852, Mrs. Horner, wife of the celebrated Prof. Horner, the anatomist, of Philadelphia, sent the sum of \$602 to Lancaster to aid in the erection of an Episcopal Church at this place. The cause of the good lady's thus interesting herself in the matter was, presumably, owing to the fact that her daughter had removed about that time to Lancaster Township with her husband, Mr. William Horner, and was then living here. March 27, 1852, at a meeting held in the office of Messrs. Barber & Lowry, the parish was formally organized under the name of "Westwood Parish," and Wardens and Vestry elected as follows: Senior Warden, Nelson Dewey; Junior Warden, William Horner; Vestrymen—John Welsh, Alexander Calder, Samuel Rowden, Andrew Barnett, J. Allen Barber, Dwight T. Parker. D. T. Parker was chosen Treasurer, and J. Allen Barber, Secretary. It not being deemed advisable at that time to proceed with the erection of a church edifice, the money then on hand was let upon good security, and for a period of six years, the new church existed only in the hopes of a few ardent churchmen.

August 2, 1858, a meeting of the Wardens and Vestrymen of "Westwood Parish" was held at the office of Barber & Lowry, and after ascertaining the amount of money then at their disposal—which had in the interval accumulated to \$954.32—decided to proceed with the erection of the proposed church. J. Allen Barber, Samuel Rowden and Alexander Calder were, by resolution, constituted a building committee, and empowered to let the contract for the new edifice. Rev. Ebenezer Williams, at this time officiating at Wingville, preached occasionally for a time in the church when finished, and services were also held by Bishop Kemper and others. Services had, also, previous to the erection of the new building, been held in the little school-house, in the north part of the village. From causes at this late date unknown, the movement suffered another relapse, and it was not until May 8, 1865, that the parish was organized on a stable foundation. Its name was then changed, at the suggestion of Mrs. Lewis Hoyt, a lady who took a deep interest in the infant parish, to "Emanuel Parish." This organization was effected by Charles H. Rice. The first Wardens and Vestry of the Emanuel Parish were: Senior Warden, H. B. Fisher; Junior Warden, Richard Meyer; Vestrymen—Thomas Langridge, J. Thornton, James F. Rhodes, Samuel F. Clise, William Carter, Sr., William Pitt Dewey, J. H. Hyde, Allen R. Bushnell. Mr. Rice remained but a short time. In 1866, Rev. Francis Moore assumed the rectorship of the parish, under whose ministration the young church made a rapid and vigorous advancement. In October, 1868, Mr. Moore left for Missouri. For an interval of four years, the church was without a Rector. October, 1872, Rev. Mr. Moore returned to the parish, remaining until June 15, 1873. Upon his departure, the parish remained without a Pastor until 1875. In August of that year, a call was extended to the Rev. S. S. Burleson, which was accepted in October, and on the first Sunday in Advent, the reverend gentleman assumed pastoral charge. The succeeding year, the present rectory was built, being ready for occupancy in December. Rev. Mr. Burleson remained until the spring of 1880, being the first Rector whose duties had been confined to Lancaster. His resignation had been tendered in October, but circumstances prevented his departure until the spring of 1880, as above mentioned. During the summer of the same year, a call was extended to the Rev. Lewis Cloak, the present Rector, who took charge of the Parish August 15. The present officary of the church is as follows: Senior Warden, Thomas Langridge; Junior Warden, Charles Langridge, Sr.; Vestrymen—Dr. James Brown, Mr. H. B. Fisher, Henry Muesse, P. H. Parsons, James F. Rhodes, G. D. Streeter. Mr. P. H. Parson is also Secretary and Treasurer.

St. Clement's Catholic Church.—This congregation was originally under the charge of the Pastor of Potosi Parish as a mission. The present church was erected in 1859, under the superintendence and through the efforts of Rev. Father Gibson, then Pastor at Potosi. The first resident Pastor at Lancaster was the Rev. Father Thomas Hodnett, who came in 1870. He remained until October, 1873, when he was succeeded by the Rev. Father R. J. Scott. In 1876, Rev. Father Hugo Victor took charge of the parish, remaining until April 10, 1877, when he was transferred to other fields of labor, being followed in the pastorate by the Rev. Father Peter Schwieger, the present priest in charge. The parish was first known as St. Bartholomew, but there being one parish of that name in this section, it was changed by the Bishop to St. Clement's, which name it at present retains.

CEMETERY.

The first burial-place in Lancaster was a plat of ground just south of the Episcopal Church, this in time passing into a *quasi* private depository for the dead. In August, 1855, a meeting was held for the purpose of taking steps toward purchasing land for cemetery purposes. Judge McGonigal was chosen Chairman and J. Allen Barber Secretary. The name chosen for the organization was the "Lancaster Cemetery Association." The management was intrusted to three trustees, the first board comprising J. Allen Barber, Ovid B. Phelps and Myron W. Wood. Five acres of land were purchased south of town, on the site now occupied by Mr. Charles Langridge. The drainage facilities were, however, soon found to be inadequate to keep water from settling in the graves, which forced an abandonment of the proposed plan, and the movement dissolved in thin air. A year or two later—the deed bearing date of October, 1857—William McGonigal, Theodore Barber, George Howe and James Barnett purchased an acre of ground southeast of the village, on the farm owned by J. Allen Barber. In May, 1863, these original owners deeded the land to the Trustees of the village of Lancaster for a cemetery; additions were made at different times to the first purchase, until now there are included in the cemetery limits about five acres, which is laid out into burial lots, and from its sightly and beautiful location forms one of the most pleasing "cities of the dead" in the county. Upon the merging of the village into a city the property passed into the hands of the city government, the Council having full control of it at present.

MASONIC ORDERS.

Lancaster Lodge, U. D., was organized in the year 1847, with the following list of officers: E. P. Wood, Master; H. R. Colter, S. W.; J. K. Rickey, J. W.; J. S. Fletcher, Sec.; James McKinzie, Treas.; John Barnett, S. D.; B. Bunton, J. D.; Jacob Gow, Tiler. On the 10th of December, 1848, the charter was granted by the Grand Lodge, Lancaster Lodge taking rank as No. 20 in the list of lodges in the State. In the year 1853, so many members had departed for California, that the lodge had to suspend work, and the charter was surrendered to the Grand Lodge, June 16, 1853. On the 13th of June, 1855, the charter was restored by order of the Grand Lodge, and Lancaster Lodge, No. 20, was re-organized and her officers installed by G. M. H. M. Billings, since which time the Lodge has regularly continued its work. The following order was made by the Grand Lodge restoring the charter:

I hereby certify that at a grand annual communication of the Grand Lodge of Wisconsin, on the 13th day of June, 1855, the following resolution was adopted:

Resolved, That the charter of Lancaster Lodge, No. 20, together with the jewels and furniture of said Lodge, be restored to said Lodge, and that said Lancaster Lodge, No. 20, shall resume its rank and priority according to its number on the registry of the Grand Lodge of Wisconsin.

Certified by me, June 15, 1855, at Milwaukee.

WILLIAM R. SMITH,

Grand Secretary of the Grand Lodge of Wisconsin.

The present officers are as follows: R. B. Showalter, W. M.; T. F. Baldwin, S. W.; C. T. Langridge, J. W.; Joseph Bock, Sec.; J. P. Lewis, Treas.; George E. Budd, S. D.; A. E. Hyde, J. D.; J. B. Bradbury, Tiler. The lodge membership is sixty-one.

Grant Chapter, No. 27, R. A. M., was instituted February 27, 1866, and at present num-

bers thirty-five members, with the following list of officers: George E. Budd, H. P.; William McGonigal, K.; J. G. Clark, S.; John P. Lewis, R. A. C.; T. F. Baldwin, C. H.

I. O. O. F.

Mississippi Valley Lodge, No. 86.—Under a dispensation from the Grand Master of the Grand Lodge of the State of Wisconsin, Mississippi Valley Lodge, No. 86, I. O. O. F. was instituted November 28, 1855, by Bro. J. W. Van Orman, District Department Grand Master; the following brothers constituting the charter members; C. S. Babcock, G. W. Ryland, Richard Drane, John Pepper, Joel Manning. Bro. A. H. Walters was initiated the same evening, and appointed Chaplain of the lodge. Babcock was elected and installed N. G.; Ryland, V. G.; Drane, R. Sec.; Pepper, Per. Sec., and Manning, Treasurer. Bro. Babcock having offended against the laws of the order, was, on March 25, 1857, for good cause, expelled from the order, and at the January session of 1871 of the Grand Lodge of Wisconsin, upon application of Mississippi Valley Lodge, the name of Babcock was expunged from the charter of the latter lodge, and the charter re-issued with the name of Bro. Alcorn substituted as a charter member in the place of Babcock. The lodge after its beginning increased and prospered in membership, so that in 1862 it had some thirty-eight members. At the breaking-out of the war, the younger members and some of the older ones responded to their country's call, and went forth to fight its battles. During that long struggle, the lodge almost ceased to exist, but after the termination of the war, the lodge was revived and placed upon a firm basis, and has since been in good working order. Up to 1880, there had been received into the lodge 132 members, of which 106 were admitted by initiation, twenty-four by card, and two as ancient members. The lodge membership at that date was forty-six.

Of the dead, but not forgotten, there are five: Edward Coumbe, died September 26, 1856; S. F. Clise, February 16, 1868; Simon E. Lewis, May 14, 1874; J. C. Cover, died at sea, July 4, 1872; Thomas Wier, February 12, 1879. In August, 1869, six members of the Mississippi Valley Lodge withdrew by card to institute a German branch of the order. Of the charter members, but two remain, Messrs. Ryland and Alcorn. Bro. Drane is land commissioner of a Southwestern railroad, and resides in St. Joe, Mo. Bro. Pepper resides at Boscobel, and Bro. Manning is dead. The lodge is in a strong and prosperous condition, and with long years of usefulness before it.

Hoffnung Lodge, No. 172.—This lodge was organized in 1869. Several of the German members of the Mississippi Valley Lodge upon returning from the celebration of the fiftieth anniversary of the I. O. O. F. at Dubuque, in April, of that year, conceived the idea of organizing a German Lodge at Lancaster. These three members, J. A. Boerner, Charles Heinze and Anton Schmitt, were joined in their plan by Messrs. Joseph and Jacob Nathan and Louis Gelbach. These six accordingly made application to their lodge for cards of withdrawal, which were granted them. Under a dispensation from the Grand Lodge of Wisconsin, the above-named as charter members, instituted Hoffnung Lodge, No. 172, November 4, 1869. The name of the lodge—Hope—in the language of the lodge historian, “was chosen because they had nothing in sight to encourage their undertaking but the hope that good men would join them.” This hope might not seem unreasonable, in view of the fact that the population in the neighborhood of Lancaster has a large German element in its composition, but the new lodge remained for some time seemingly at a standstill. The same historian says, “Many a long evening these men sat in a hall decorated with regalia and surrounded by furniture belonging to their mother lodge.” On the 20th of January, 1870, a charter was granted to the Hoffnung Lodge by the Grand Lodge of Wisconsin. On the first term, April 1, 1870, Hoffnung Lodge consisted of thirteen members with \$25.15 in the treasury. “This,” says the historian, “was not very encouraging, but they had faith in their cause, and, in a few years, they saw that their labor and perseverance rewarded with unexpected success.” On July 1, 1879, Hoffnung Lodge had eighty-nine names on its list of membership, eight of these were admitted by card, and eighty-one regularly admitted. During the existence of the lodge to that time, eight members had withdrawn by

card, one had died, and sixteen had left in other ways, leaving the lodge possessed at that time of sixty-three members of good standing. Both lodges occupy a fine hall in Alcorn's Block on Maple street, which was inaugurated with impressive ceremonies.

FIRE COMPANY.

Several heavy fires that had occurred in Lancaster and surrounding towns aroused the citizens to the danger constantly threatening the village, unprovided as they then were with no means of quenching the ravages of the fire fiend should he show himself. The feeling progressed so far that in the early summer of 1873, a hand engine, the present one, was purchased. A fire company was organized July 24, the same year, Mr. L. Holloway being elected Foreman, Robert Brookér, First Assistant, and John M. Hurley, Second Assistant. The company, when thoroughly organized, numbered between forty and fifty members. A feeling of apathy having showed itself among the citizens in regard to the requirements of the company, the latter, in the spring of 1880, dissolved by consent, and turned the engine, apparatus and uniforms over to the city, leaving Lancaster plus an engine and minus a company, in which state fire matters have remained since.

BUSINESS INTERESTS.

Lancaster Woolen Mill.—This institution at present comprises in itself all the manufacturing interests to which Lancaster is now heir. In 1865, Douglas Oliver had erected at North Andover, in the town of Glen Haven, a flouring mill. To the machinery necessary for that business; he soon afterward added one set of machinery for the manufacture of woolen cloth. The business not being of a nature to warrant his continuing in that location, he gave up his mill and came to Lancaster, where he interested many of the leading citizens of this village in the subject of woolen goods to such an extent that a stock company was formed for the prosecution of that branch of industry. In the spring of 1868, grounds were purchased, including the "big spring" in the lower and east portion of the village and work commenced. In July of the same year, the buildings were finished and much of the machinery put in, including that which had formerly been used in Oliver's mill at North Andover. To this was added another "set" of the latest and most improved pattern, and early in the fall some of the machinery was started. A few first-class hands were brought from New England, under whose tuition were placed girls for instruction in the mysteries of cloth-making. The cost of the mill was about \$30,000, it being calculated for forty operatives and with a capacity for using about 100,000 pounds of wool.

June 20, 1869, a quorum of the stockholders met at the office of J. Allen Barber and adopted articles of association under the name of the Lancaster Woolen Mill Company. J. C. Holloway, Addison Burr, D. Oliver, Henry Fox and Jacob Nathan were elected as a board of directors for the ensuing year. Addison Burr was elected President, George W. Ryland, Treasurer, and Richard Meyer, Secretary.

The first superintendent of the mill was a man named Fuller, who, however, was discharged after a few months' trial. He turned out to be a deceiving illusion, his talents being decidedly phantom-like in their nature. After his dismissal, the company concluded to take the running of the mill into their own hands. Henry Fox was placed in charge, and the books and accounts were intrusted to the charge of T. A. Burr. In this manner the mill was operated for something over a year, when it was found that assessments rather than dividends was the rule, and difficulties ensued which resulted in the sale of the property under a mortgage. It was bid in by some of the heaviest stockholders, and then rented to Messrs. Gledhill and Walker, who retained possession about a twelvemonth, and then gave it up. Messrs. J. C. Holloway and Mr. Clise then hired the premises, and was run by these gentleman in partnership about six months, when Mr. Clise retired, and Mr. Holloway continued the mill in operation to the end of the year.

The mill remained idle from this date until its purchase by its present owners, Street Bros., Marshall & Co., in May, 1880. The mill was thoroughly overhauled by this firm, and new and

improved machinery introduced, until it was placed on a par with the best mills in the State. The advent of railroad facilities has done much to solve the problem as to whether the venture will ultimately prove a success, the scale inclining under the present management to the winning side. In the absence of all other manufacturing interests, Lancaster has to hope for a successful pursuit of this branch of industry within its limits.

Bank.—December, 1861, Messrs. Ryland & Holloway commenced a private banking and exchange business, on the corner of Maple and Madison streets. May, 1871, the business was removed to its present quarters, in a plain but commodious brick building, on Maple street, between Madison and Monroe streets. The bank capital at this time was \$10,000. In January, 1875, the junior member of the firm withdrew, Mr. Ryland continuing the business alone. No further change was made until October, 1880, when Mr. Richard Meyer and Mr. Meyer, Jr., were united with Mr. Ryland in business. The capital of the bank was increased to \$20,000, the firm name being George W. Ryland & Co. As a means of furnishing the citizens of Lancaster and vicinity with a ready and secure agent in financial transactions, the benefits of the institution have been felt from the first. The senior members of the present firm are well known as gentlemen of unimpeachable business integrity and financial ability; the junior member affable and business-like to all, has already established himself in the good graces of the bank's patrons. The bank stands to-day among the foremost of such institutions in the county, and is extending its business relations in fast-widening circles throughout central Grant.

STORMS.

Lancaster and the vicinity has been visited early and late by several severe storms, which have done more or less damage. The most important of these destroyers was the hurricane of 1824, which gave the name to the strip of country southeast of Lancaster, nothing of any distinctness is known, as at that period the western portion was uninhabited, with the exception of a white man named Hamer, who claimed to have witnessed the commencement of the whirlwind at Cassville, where he was living at the time. But wherever may have been its starting-point, whether witnessed or unwitnessed by mortal eyes, the fact that there had a hurricane passed through this section was plainly evident to the early settlers in that region. The great forest giants were tossed and thrown about as with a Titan's hand—piled tier upon tier in inextricable confusion—so that it was many years before the country could be brought under the dominion of man, and even to this day signs of the great storm may be found by the close observer.

The storm of 1868, which visited Lancaster, while it did not reach the power and fury of either its predecessor or the terrible fury of 1876, was still the means of doing considerable damage. It was, however, more in the nature of a high wind blowing steady, but with great violence. The public school building had just been completed at a cost of \$15,000, and a few days more would have been filled with childish life. Fortunately, this dreaded sacrifice was not added to the damage done. As it was, the roof of the building was torn off, and the walls parted in a dozen places, making a total wreck of what had been but a few moments before a beautiful and imposing structure. Other buildings in the city were unroofed, and much damage done, but nothing to compare with the destruction of the first-named property.

LOCATION.

Platteville is one of the southeasterly towns of Grant County, as also one of the more highly cultivated and prosperous, with abundant resources, both vegetable and mineral; is bounded on the north by the town of Lima, on the east by La Fayette County, on the south by Smelser, and on the west by Harrison, and contains a total of 23,040 acres of land, fairly divided into prairie and timber. It is well watered by Little Platte River and its branches, Block-House Creek and other streams furnishing superior water-power, which has been successfully employed in operating mills, etc. The Galena & Southwestern and Chicago, Milwaukee & St. Paul Railroads, enter the township from opposite points, and converging at the city of Platteville afford ample facilities for communicating with all points immediate and remote, and are of incalculable value to farmers, merchants and the world at large as mediums of exchange and mutual benefits.

EARLY SETTLEMENT.

The first settlement made in this township—indeed, in the county—for the settlement of what subsequently became Grant County was commenced on the present site of Platteville City—was begun in the spring of 1827. Fifty and four years ago the foundations of a new empire had been laid in the almost undiscovered lands of the Northwest, which have since blossomed into a more than perfect realization of what was hoped for by its founders. These were composed of men who were the natural architects of success; not men who, like chameleons, only reflect and have no positive coloring of their own; but as Saul among his brethren stood head and shoulders above them, so stood these pioneers as compared with succeeding generations. Many of them are dead, but their works live after them. Rest well, grand old men who have dropped like grains of "good corn" and lie "warm in your earthly beds!"

In November, 1827, John H. Rountree, still a prominent and distinguished resident of the township, accompanied by Maj. J. B. Campbell and two men named William Ruby and John McWilliams, made his advent into future Platteville, attracted thither by the opportunities he had ascertained only awaited the hand of industry and enterprise to pluck without resistance. The previous spring it might be interpolated. Mr. Rountree had satisfied himself of these facts and began negotiating for the purchase of a claim owned by one Emanuel Medcalf, who discovered its value some time before while prospecting for mineral. After several attempts to effect its purchase which had failed to culminate, Messrs. Rountree and Campbell accomplished their object, paying for the title \$3,600; contingently upon its equaling moderate expectations, and at the period indicated, came into the territory to test its value and identify themselves with the development of this portion of the "lead mines." These adventurous comers knew that, with patient watch and untiring diligence they would reap a generous reward, and having erected a sod cabin twelve feet square on the branch about two hundred yards southeast of Mr. Rountree's present mansion, corner of Pine and Lydia streets, began working the claim as the

breath of advancing winter made them to realize that the fall with all its glories had vanished, to be laid in the great storehouse of the past. Through storm and sunshine, when the icy air swept down the valley of the branch chilling all before its way, these four men toiled on from early to late hoping and thinking that, with the dawn of spring, their labors, their enterprise and their patience would be rewarded. So hoped and thought Columbus as he lay at anchor among the drifting seaweed and waited for the dawn of day. Nor was he disappointed, nor were the toilers in the lead discovered by Emanuel Medcalf, doomed to failure. Before the wandering snow flakes, sweet and silent messengers from a sinless region, had ceased to fall and kiss the earth's brown breast with their soft white lips, the toilers had laid up a hundred-fold of the treasure gathered with the "pick and gad." In truth, the results which attended the efforts of this quartette who first came to Platteville Township are said to have been of the most generous character. But there was no furnace nearer than Gratiot's Grove or Galena in which the raw material could be rendered a marketable commodity, and until one was built the mineral was stalled up awaiting its completion.

During the inhospitable winter of 1827-28, there were but few arrivals of men who became settlers. A limited number of huts, of the most primitive description and conveniences, skirted the incline, upon which the Gates House has since been erected, put up by an invoice of careless, quixotic, wandering miners, who tarried but long enough to prospect, yet not sufficiently long to realize, and went hence in search of more inviting if less hospitable scenes. That is, when the ice and snow, in which the hills and vales were wrapped, yielded place to the sunlight and affection of returning spring. With the arrival of that season, Messrs. Rountree and Campbell began the building of a rude log furnace, and hurried the same so effectually that its completion was announced before summer. It was located in the Rountree tract, in sight of the habitation of these gentlemen, on a line between Mr. Rountree's present residence and Virgin's mill. They also put up what, for those times, was known as a commodious and pretentious domicile, on their tract, now opposite the foot of Oak street. It was a single story double log house, with a long hallway running down the middle, and adapted to the uses of a caravansary, for the accommodation of men employed by the parties operating the mine. Here came that spring Frederick Holman and family, accompanied by James R. Vineyard. Mr. Holman's family consisted of himself, wife and four children. He became landlord of the boarding-house, and Mrs. Holman was the second lady, it is believed, who came into the township, Mrs. Medcalf and Mrs. Lewis, her daughter, being the first of the opposite sex to locate in these comparatively unknown wilds of the time mentioned. The same spring a Mr. Jones escorted his wife and three young ladies of venturesome temperament into the Territory, and, putting up a log cabin near where Mr. Potter now lives on Water street, were enrolled as among the pioneer residents of the vicinity. Jacob Hoosier settled one mile south of the present city, where he still lives. There were some others came in about this time, though the number was exceedingly limited, and could be expressed without exhaustive numerical faculties. Among these were Joseph H. Dixon, who, with a younger brother, settled on a tract of land about one and a half miles south of the subsequent city, and made the first attempts of farming undertaken in the township, if not in the county. They plowed up ten acres of prairie, sowed it to corn, cultivated the latter until it grew yellow in the sunlight, when it was sold to J. H. Rountree, and sufficient was realized unto the producers to enable them to repeat their experiment with increased profit. The old farm, it is said, on which these early labors were expended, has passed through a varied experience, and is still made to pay tribute to the necessities of mankind. Col. Dixon died a number of years ago, since when his widow became Mrs. Enoch Robinson, and a resident of the southwestern portion of the town, where she still remains.

This year was rather noted in connection with great endeavors besides those mentioned. On March 30, Mr. Rountree established the first store in the town. It was located near where he lived, and contained the usual stock of dry goods, groceries and provisions, obtained in St. Louis and shipped to their final destination via Galena. The business was transacted on a credit basis, and the distinction between *meum* and *tuum* in the obligations thus imposed was as

defined and sacredly observed as in portions of the country where sustained by the majesty of the law.

In October, 1827, the settlement was called Platte River and continued under that title until April 7, 1828, when the name was changed to Lebanon, by which it was known until May 20, of the same year, when Platteville was substituted and still obtains. From records beyond dispute it appears that the following were residents of the vicinage at that date, in addition to those named: A. and W. Daugherty, Samuel Kirkpatrick, A. L. Orden, Alexander Willard, B. B. Lawless, John Wellmaker, Waller Rowen, William Morrison, Joseph Brammer, M. M. Woodbridge, Jesse Harrison, Benjamin James, Frederick Reamer, Isaac Yoakum, Thomas Densen, Israel Mitchell, Robert Roper, James R. Vineyard and William B. Vineyard.

FIRST MARRIAGE.

In September, 1828, occurred the first marriage in the town, the contracting parties being James R. Vineyard and Miss Mary Jones. A minister from Galena officiated, but beyond the ceremony there was nothing to interest or entertain the contracted social world established at that day in this vicinity. Previous to this event, and on August 7, 1828, Maj. Rountree was married, at Galena, to Miss Mary Grace Mitchell.

FIRST ELECTION.

The same fall an election was held in Platteville, the voters depositing their ballots for State officers of Illinois. During its progress, a squad of men residing at Elk Grove and Benton visited the polls for the purpose of exercising their prerogative as citizens and, what is not an unusual circumstance upon similar occasions to-day, became pugnaciously inebriated. The result was a row, which ended in a drawn battle, with the manor born, as it were, retaining possession of the field.

The improvements this year were limited to those already mentioned, namely, the furnace, Holman's boarding-house, Rountree's cabin and store house, Jones' cabin and one other, inhabited by miners. The Finney patch and Meeker diggings were discovered and worked, and the furnace which began operations in May, smelted mineral for miners working within a radius of twelve miles. Prairie fires in the spring and fall were the only sources of excitement, the Indians having ceased to be the cause of apprehension or amusement. A scattering few belonging to the Winnebago tribe wandered aimlessly and harmlessly about the country and pitched a camp upon the banks of the Little Platte in the vicinity of which they hunted and fished, or enjoyed their *dolce far niente*, afar from the haunts of semi-civilization. Churches and schools were blessings that had thus far failed to materialize. Possibly some peripatetic Wesleyan or Calvinist, who combined both professions, may have "joined issue" with ignorance and sin, but according to the most authentic, at the same time reliable, reports, the bliss of the former remained undisturbed and the latter's presence unrebuked.

The winter of 1828-29 was mild and open, and work was prosecuted without interruption. A moderate degree of prosperity had accompanied the efforts of those who were employed the previous years, and continued in service during those succeeding, and, as a consequence, there were fewer of the trials incident to hardships indigenous to a new country than in other portions of the lead mines less remote from the humanizing as also tempting influences here wanting. Early in the spring, Pierre Teller, with his family, settled two miles southwest of the present city, and he was followed by others during the same year. Among these, were included William and Daniel Richards, the former with his family, and establishing homes in the vicinity of Teller's settlement. Thomas Cruson, William Davidson, Thomas Hugill, probably E. M. Orn, Benjamin Good, Benjamin Green, all with domestic dependents, and the usual run of sucker miners came into the township in this year. The former named remained, but the suckers following the habits of their finny namesakes, returned whence they came with the frost. This year, a man named Meredith became involved in a fracas with miners in the southwestern portion of the township; and received injuries which caused his death, said to be the first death happening in

the township. The fact, however, is a mooted question, that distinguished honor being by some awarded to a young man who resided in a miner's hut near the Teller cabin. He was taken sick, it is said, with one of the malarial diseases peculiar to the times and place, and before another spring's violets colored the withered grass of the prairies, a mound was raised in the old cemetery near Virgin's Mill, another soul was beside the still waters. His name was not preserved, and, with his fame, is denied to posterity.

FIRST POST OFFICE.

The most prominent events described as of record in 1829 was the agricultural beginnings made by Scott Kirkpatrick, and the opening of a post office at Rountree's store. Kirkpatrick came here in 1828, and procuring land east of the village site, plowed up ten acres and planted it in corn. The postal facilities were established at Platteville, so named, as already stated, by Mr. Rountree in 1828, Platte River being the derivation, and that gentleman appointed the Government official. This he did until October, when further honors were buckled upon his back, and he was obliged to divide his duties as Postmaster with those of Justice of the Peace, he being the first who served in either capacity in the township. There were mineral discoveries made this year also, chiefly in the vicinity of those already developed.

The year 1830 was marked by no event worthy of preservation on tablets of stone or memory. Nothing is remembered to have occurred calculated to electrify the world or paralyze the nation, save and except the birth of a daughter to James Vineyard and wife, which cheerful episode is claimed as the first to take place in the town. The young lady was christened Jane, and successfully passing through the ages of childhood, youth and felicitous maidenhood, was married in 1851, and removed to California with her husband, where Iris, of the ancients, clipped the golden lock of life that the spirit thus disencumbered might plume its wings for flight to the beautiful shore. The population in 1830 would not exceed forty, it is said, in the township. There were but two farms—one opened by Dixon, and the other by Kirkpatrick—but purchased that year by Mr. Rountree for a consideration of \$150. Mining and smelting was carried on with remunerative results, and provisions and other necessaries could be obtained only at St. Louis. As yet mills and other conveniences of life, which succeeding years compelled the development of, were unknown factors in the sum of human experience in the wilderness. As the year advanced, the absence of many features, which subsequently contributed to the prosperity of the mines, was seriously felt, and produced an effect upon the community which, if not entirely cheerless, was not altogether rose-colored. With the winter came comparatively hard times, depreciation in the price of mineral, scarcity of supplies, and few if any accessions to the population. This condition of affairs was continued into 1832, when the number of inhabitants is quoted as at no time having exceeded a hundred, including women and children. In the spring of the latter year, a Methodist minister named Robinson, attached to the Indiana Conference, made a visit to Platteville, and formed a class composed of J. H. Rountree and wife, William B. Vineyard and wife, who settled in the country a few weeks previous, and a very few others, from which sprang the Methodist Church, one of the most flourishing and the oldest religious organizations in either the present city or county. During the war, services were irregular; but in the fall, the Rev. John T. Mitchell succeeded Mr. Robinson, and formed a circuit made up of Platteville, Mineral Point, Galena and Gratiot's Grove.

INDIAN TROUBLES.

Early in April, 1832, news reached Platteville that the Indians had commenced hostilities, and were camped on Rock River, near Dixon, preparing for a campaign of extermination against the whites. As all are aware, this was the prelude to the Black Hawk war. Gen. Dodge made requisitions upon all the settlements for troops, in response to which one company was organized at Platteville by J. H. Rountree, who commanded, composed of the following: George Robison and J. P. Cox, Lieutenants; J. H. Dixon, Cleland McMurry, Hiram Wells, Thomas Brooks, William Davidson, Irwin O'Hara, Frederick Holman, John Henderson, Allen Carpen-

ter, James Hopkins, A. Raskell, William Dean, Charles Lewis, John Van Wagoner, W. H. Farmer, Edward James, Verni Dawson, George Rosamire, Thomas Fitzpatrick, William Carpenter, Missouri Dixon, J. B. Lavine, D. McGaws, B. H. Duncan, John Barns, James Kaney, J. Sturtevant, Thomas Ion, Abram Travis and Daniel McMullen, Privates. This company was mustered into the service, and, after brief halts at Blue Mounds and Mineral Point, participated in the battles of Wisconsin Heights and Bad Ax, after which it was disbanded. For the purpose of more effectually furnishing a defense for those remaining behind, a stockade and block-house was erected. The combination was located on the property of Mr. Rountree, diagonally opposite the present site of the Gates House, and abundantly fulfilled its object. The stockade was circular in form, about 100 feet in diameter, and the block-house full twenty feet square. A squad of volunteers, under the command of Capt. Irvin O'Hara, manned its defenses, and defied the "wily foe," which, happily for those who composed it, remained at a distance from the outer walls of the fortress. With the close of hostilities, the people resumed the arts of peace. Swords were turned into plows and picks, and spears into pruning hooks, and through their agency was the attempt once more made to woo and win that fickle dame, called Fortune. The outlook was far from encouraging. When the war opened, as has already been hinted, lead and other products, upon the sale of which the people depended for support, was low, and the necessaries of life correspondingly high. Apprehension of the Indians and bounden fears of the future impelled a number to resign their possessions and citizenship and seek more congenial localities. There was no work of moment begun or concluded this year. The causes of progress and civilization, touched by the hand of an enemy, had shrunk before the advance of war and become the burial places of bright hopes, high ambitions and dead affections, over which bitter disappointments, unyielding griefs and sorrowful memories were erected as monuments. In 1833, but very few, who had left the town, returned, and still fewer came to identify themselves with its success.

FIRST CHURCH AND SCHOOLHOUSE.

In the spring of this or the following year, a building was erected on Section 16, to be used as a school and church. It was of logs, small and without ornament or finish, but the first in the township or county, and second in the State, especially for school purposes, the buildings at Prairie du Chien and Winnebago having preceded it a few months. The year 1834 ushered in better times. With what proved to be the dawn of happier days, the pioneers closed the eyes of the dead past, straightened its rigid limbs, and drawing the white sheet of oblivion over the pale corpse, left it to desolation and forgetfulness. The storm had passed away, the sun of promise shone out with glorious brightness, and the fierce winds of discouragement were hushed, while a rainbow of surpassing beauty sprang from the clouds and arched above the horizon of the future. In October, the land office was opened at Mineral Point, and occasioned no inconsiderable interest to be manifested in all sections of the country affected by its location. Very many hastened to the Point from Platteville, and large purchases were made by those who had anticipated the event, and entered lands during prior years. In adjoining counties trouble was experienced between settlers and new-comers, the latter largely made up of speculators and adventurers, growing out of disputes involving the question of title to lands claimed by actual settlers, but purchased as an investment by those who visited the sales on speculative business. In the town of Platteville, there was a commendable absence of this feature of pioneer life. No fierce discussions succeeded the purchase of land within its territory, no "wars or rumors of wars" besieged vendees, and no judicial arbitrament was necessary to define or quiet a title. Notwithstanding the inducements offered for immigration to the town, the arrivals for this and many subsequent years were by no means as large as were anticipated or deserved. Yet many came in, through whose brawn, industry and enterprise, mines were made to pay tribute to the wealth of the country, wild wastes transformed into productive farms, and puny settlements to extend their limits and graduate into towns and cities. When Themistocles was asked to play upon a musical instrument, he replied, "I cannot fiddle, but I can make a wilderness a great city," and

the men of whom mention is made as the architects of civilization in Platteville, were counterparts of Themistocles.

The settlers who came in during 1834 were in part made up of Henry Snowden, Richard Waller, Robert Chapman, Benjamin Farmer, T. R. Hugill, Miles Vineyard, Lorenzo Bevans, Richard Huntington, Robert Bonson, Richard Bonson, Samuel Moore and some others, not to omit mention of the arrival of a delegation of Cornish miners who came also this year, some of whose names are cited in the above list. The year, while not one of boundless prosperity, had, nevertheless, attended the town with a complement of encouragement, and with little to mourn as it paused upon the threshold of departure to contemplate its career, passed silently on the tide of time to the kingdom of obscurity.

What was true in 1835 in regard to the accession of inhabitants, the acquisition of wealth, the improvement of the town and the employment of auxiliaries to the promotion of any of these agencies as means to the development and building-up of the country, applies also to the years that followed in its wake for almost a decade. A saw-mill, begun by Mr. Rountree the year previous, was finished and commenced operations in 1836. It was located on Section 9, and was the first of its kind established in the town. Richard Huntington opened a farm on Section 24, which is now occupied by his son; a man by the name of Carpenter also cultivated property lying in Section 12. Hon. Edward Eastabrook came in this year and located, as also did Robert Myers, J. Chalders, Thomas Lewis, Edward Hugill, D. Crockett, Thomas Rowe, James Bonson, George Snowden, Miss Ann Snowden (now Mrs. Samuel Moore), and probably a few others, nearly all bringing their families with them.

AN EARLY TRAGEDY.

During the summer, a tragedy occurred on the farm of Benjamin Good, located in the northeastern portion of the town, which occasioned more than a passing excitement. It seems that an adopted son of Mr. Good was in the timber searching for cattle which had strayed away, when he was accosted by a lad of his own age and challenged to fight. While the altercation was in progress the former was assaulted and received injuries which resulted fatally within a week. The young murderer, whose name cannot be ascertained, was apprehended and taken to Mineral Point, where he was locked up. While thus in the toils, he succeeded by strategy in eluding the vigilance of the bailiff during the day, and could nowhere be found, although a vigorous search was instituted. It was afterward learned that upon his enlargement he dropped into an abandoned mineral hole near the jail, where he remained until after sundown, and, emerging therefrom in the darkness of the night, made his way through the country to Southern Illinois. No effort was made to procure his return, and, when last heard from, he was a resident of "Egypt."

PATRIOTISM IN 1836.

Residents of the town celebrated the anniversary of American independence in 1836, with ceremonies both tempting and patriotic, in a grove on the edge of the village. Here a stand was erected, from which either S. O. Paine or Lorenzo Bevans orated; the Declaration was read, and the company feasted on the barbecued carcass of an ox, with the attendant vegetable and inebriating condiments. With the conclusion of the exercises and after the dinner had been discussed, a minor number of the celebrants, bubbling over with their love of the ardent, forgot country, the battle of Lexington and associations suggested by the day, and became vociferously intoxicated. Some of them mounted the festal board, along which they pranced furiously, sending the dishes in one direction, the crowd in another, and creating a commotion that can only be compared to an Indian stampede. After prolonging this token of their appreciation until its variety lost its spice, the chief actors retired behind the scenes to recuperate, and the audience, encouraged at the prospect, resumed their more appropriate enjoyments.

HARD TIMES.

In 1837, as will be remembered, a financial panic swept over the country and left its mark upon the commercial world so pronouncedly that its effects were experienced for years afterward.

The residents of Platteville, while only remotely affected by the visitation, were sensibly aware of its presence by the absence of mediums of exchange, and the high price at which commodities were held. There were few provisions, cereals or vegetables then raised in the town or county, and the people dependent upon foreign sources of supply were in nearly every instance compelled to pay cash for their purchases. To do this was not always possible; lead was low, and in little demand, and the consequence was that some hardships and privations, though no suffering, was experienced. There were no improvements to speak of, of a private character, completed or even projected that year. In February, the county was organized, but this advance accomplished no change for the better. There was but one schoolhouse, and the educational opportunities were limited to about three months during the year. Among the cheerful evidences that the citizens still lived was the building and dedication of the first church edifice in this portion of the State. It was of frame, and considered for the times a pattern of architectural perfection and elegant accommodations; occupying a prominent point of observation on Main street, it was the cynosure of admiration for citizens, and inquiry by strangers for many years. After serving its purposes for a continued period, the old church was removed to give place to a brick block, now in part occupied by Sanford & Chase, and the Rev. Wellington Weigley, who preached the dedicatory sermon, long since become a resident of Chicago, where he abandoned the "cloth," and pleads for the forgiveness of sinners for the more lucrative returns incident to an appearance before temporal courts with pleas in abatement and avoidance.

There was nothing beyond the ordinary rules of life occurring during the ensuing years (until the Mexican war) deserving of special mention. There were occasional arrivals of immigrants, who came into the promised land eloquent with hope and happiness, and laid broad the foundations upon which superstructures of prosperity and felicity have since been erected. There were occasional departures, too. Some wandered off to the more distant frontier; while on some, Death daguerreotyped a smile as he gave life to another angel. Up to 1840, the trust and confidence of man, in these regions remote from business centers, and in the honor and integrity of his neighbor, was as complete and unchangeable as the deductions of a mathematical problem. A man's word was, in those days, his certificate of character, and honesty a vital element in his composition. There were few cases of felony, and tribunals for the adjudication of criminal presentations were not esteemed as indispensable branches of government. By that year, schools had found abiding-places in the township, and the Gospel was "preached to the multitude." Postal and traveling facilities had advanced in a wonderful ratio during the thirteen years of the township's occupation, and communication was enjoyed with friends and the public at intervals remarked for their brevity. Stages then ran from Galena to Madison via Platteville, Mineral Point, etc., conducted by Frink & Walker, and afforded accommodations comfortable if not luxurious. By that year, the lands in the town were all taken up and owned, mostly by occupants. Indeed, the sum of human happiness, as compared with what it had been in the earlier days of the venture, was an aggregation of features that defied discord and affliction. After this period, accessions to the population included representatives of a type of civilization found in thickly inhabited districts, where good and bad are commingled indiscriminately. As a result, to express it in the language of one who was prominently identified with the body politic at the time, "there was more hustling than before, and miners, instead of leaving their mineral scattered about indifferently, never dared to leave any out after dark." Mining remained in the van of occupations until the discovery of gold in California. Agriculture was not so much employed as a means of livelihood even after that date. It required continued labor, and content with small returns, to become a farmer in those days. The improvements in farm machinery, which have since contributed so effectively to the breaking-up of the prairies, the cultivation of the soil and harvesting of the products were unknown quantities at the time of which mention is here made. Since that period, however, as is universally known, the population has become numerous, the absence of the unknown quantities supplied, and the wastes and "barrens" been made to blossom as the rose.

On the breaking-out of the Mexican war, the town had become an important and wealthy constituent of Grant County, in all respects mentioned, as also politically. In that behalf, it

was about evenly divided between Whigs and Federalists, with a preponderance in favor of the former. In June, 1846, Gov. Dodge issued his proclamation, directing the enlistment of one regiment of infantry for service in Mexico, to which, however, no response is on record as having been made by Platteville residents. Wirom Knowlton, of the city, raised a company, of which he was appointed Captain, with Joseph Morrill and Charles Brisbois as Lieutenants. It was composed of men hailing from all parts of the county, and was ordered to Fort Crawford to do duty in place of regulars who had been transferred across the Rio Grande; but beyond a few comparatively insignificant skirmishes with impertinent Indians, no brows were bound with victorious wreaths, or bruised arms hung up for monuments to the prowess and patriotism of volunteers from Platteville. With the success of the Americans, Peace followed, and spreading its spotless wings over the scenes of war and desolation, inspired the victorious forces with ambitions appropriate and deserving of education.

THE CALIFORNIA FEVER.

About this time, gold was discovered in California, and there are very many still living, who not only remember and participated in the excitement that greeted the news, but were drafted into the army of argonauts which marched thither. The miners employed in digging throughout the township with one accord abandoned their "leads," eager to be piloted over the prairie, across the desert and through the canon, that they might snuff the salt air of the Western Ocean, and drag up the hidden wealth reserved for soldiers of fortune beneath the soil of a land that was kissed by her sparkling waters. The miners were not alone in their determination either. Representatives from every profession and occupation joined the column hastening from the Atlantic to the Pacific, leaving the marks of their bivouacs on the way in graves and skeletons, and "blazing" trees on the route, which guided the advance of succeeding years in the contest for supremacy between civilization and barbarism. Yet the community survived the inroads made upon its resources—the township prospered—sleeping quietly under its great trees, and smiling with an air of perfect content upon those who abandoned its advantages in their pursuit of wealth, so few of whom wrested their object from its secret hiding-places. Among those who went out to seek fortune in that far-off region were Curtis Barker, James R. Vineyard, William B. Vineyard, Thomas Cruson, Dr. John Bevans, W. B. Bevans, C. D. Bevans, R. T. Verran, Jackson Basye, William Gross, Joseph Fink, Edmund T. Locke, Octavius Hollman, John Hollman, Fisher Bayley, T. J. Colburn, Adolphus Holliday, D. and M. Comstock, Charles Wright, E. M. Orn, Michael and John Stephens (twins, still living at an advanced age), T. Stephens, Henry Eastman, C. and T. Eastman, Robert Snowden, Milo Jones, Benjamin Green, James Moore and a large number of others, whose identity has been forgotten. Of those who went out, about sixty per cent returned, while a large proportion removed on the Pacific Coasts, and the remainder either died en route or subsequent to their arrival. When the excitement, consequent upon the prevalence of the gold fever was at its height, the township was organized under and by notice of an act of the Legislature, and placed under a form of municipal government adapted thereto. For the past thirty years, the township has made steady progress in all directions that would either mold the intelligence of citizens, or master the development of material resources. Yet in the haste to become prosperous, the pioneers and their descendants realized the fact that "man lives not by bread alone," and subscribed to the support of schools and churches, the base of civilization and democracy, for the education of the soul and mind. Including the city of Platteville, there is a total of twelve churches in the township, enjoying a generous support, and wielding an extended influence. It also sustains six schools, exclusive of three in the city, for which an annual tax of about three mills is assessed, producing an income of nearly \$1,100, expended in their support. Up to 1850 say, the mines, as has been already stated, were vigorously and successfully worked. Two blast furnaces were required to prepare the mineral for market, and these were constantly employed. With the departure of gold seekers, mining diminished rapidly, and has never resumed its former prominence. One furnace was abandoned and fell into decay, while that run by Straw & Spensley

is only worked about half-time. The mines in the Davidson estate, and those discovered three years ago on the Robbins property, principally furnishing the raw material. Agriculturally, the town made steady advance, though with not that gratifying progress which began in 1861, and continued until 1865, when all the arable land within its limits was taken up and cultivated with profit.

When the war between the sections became an established fact, when the unity of the Federal compact was assailed, and dissolution, anarchy and ruin impended, the town sent among the first of Wisconsin soldiers into the field to repel the enemy and maintain the laws. Through the contest her citizens responded to each levy made upon them for men and money, until before justice was satisfied, before mercy was content, 500 soldiers and \$25,000 were contributed and subscribed, that the star-lit folds of the National ensign should float aloft for the "Bonnie Blue Flag." After the war, the soldier died, the citizen was born again, and the heart that throbbed with the hot fever of battle, beat as gently as when in boyhood's happy day; the child gazed into the near heaven of eyes, that were long since palsied by death.

The half-century, through the good and evil of which the town has lived, is filled with reminiscences to the manor born that rush upon the soul as a mighty torrent, over which a cloud has burst. They see the country a trackless wilderness, filled with danger, disease and death. They see the savage foe that once inhabited the wooded fastnesses, rioting in the ruin of settlers' homes with barbaric joy. They see him put to flight, dispersed, wiped out, and in his stead appears the videttes of civilization, the advance of that grand army of pioneers that joined issue with the prairies and the forests, and prevailed against them. They see the relics of another race and another age dissolve from view as bubbles upon the water. Huts and cabins give place to commodious mansions, forests to smiling fields. The prairies have become farms whereon the waving grain grows yellow in the sunlight, and the voice of the reapers is heard as they harvest the crop, before the noiseless snow wanders downward from the veiled heavens and wraps in folds of white the autumn leaves and stocks. But few remain of those who came in the flush of youth and health and hope to battle with the foes of life and happiness in a new country. Some, long before the morning of life had reached its meridian, fell by the wayside and were heard of no more; some had almost reached the haven of their hopes, but, like a ship dashed against an unknown breaker, went down to death and left no record of their departure. Many of them died poor, none of them died rich, but all have left behind them a legacy of noble lives. Lessons of patience in suffering, hopes in adversity and confidence and trust, where no sunbeams lighted up their pathway. All of them failed to win, with charming endeavors, the fickle goddess, Fortune, but all of them conquered in the battle of life, and stepped forth from the ranks of men, Christians and heroes.

TOWN OFFICERS.

- 1849—Benjamin C. Eastman, Chairman; George W. Lakin and J. N. Jones, Supervisors.
 1850—John H. Rountree, Chairman; Stephen O. Paine and John H. Durley, Supervisors.
 1851—Charles W. Wright, Chairman; Joel Potter and James Durley, Supervisors.
 1852—Charles W. Wright, Chairman; Titus Hayes and N. W. Bass, Supervisors.
 1853—H. Hurlbut, Chairman; H. Hutchins and Edward Eastabrook, Supervisors.
 1854—John H. Rountree, Chairman; H. Hutchins and Thomas Chapman, Supervisors.
 1855—J. H. Rountree, Chairman; N. H. Virgin and Joseph Robinson, Supervisors.
 1856—John H. Rountree, Chairman; J. F. Kirkpatrick and George J. Coates, Supervisors.
 1857—N. H. Virgin, Chairman; J. F. Kirkpatrick and John Stephens, Supervisors.
 1858—Samuel Moore, Chairman; S. O. Paine and John Stephens, Supervisors.
 1859—Julius Augustine, Chairman; J. F. Kirkpatrick and John Stephens, Supervisors.
 1860—Allen R. Bushnell, Chairman; George R. Laughton and Calvin Russell, Supervisors.

1861—Edward M. Hoyt, Chairman; John Huntington and Henry C. Lane, Supervisors.

1862—John H. Rountree, Chairman; Thomas Chapman and Isaac Hodges, Supervisors.

1863—John F. Kirkpatrick, Chairman; Thomas Robinson and Henry C. Miller, Supervisors.

1864—Isaac Hodges, Chairman; Calvin Russell and Thomas Chapman, Supervisors.

1865—Isaac Hodges, Chairman; Joseph Robinson and Carston Hanners, Supervisors.

1866—Isaac Hodges, Chairman; Peter Pitts and Carston Hanners, Supervisors.

1867-68—Isaac Hodges, Chairman; J. F. Kirkpatrick and Peter Pitts, Supervisors.

1869—Isaac Hodges, Chairman; Peter Pitts and Carston Hanners, Supervisors.

1870-71—N. W. Bass, Chairman; Robert Neely and Christian Grusse, Supervisors.

1872—N. W. Bass, Chairman; Robert Neely and H. S. Rountree, Supervisors.

1873—N. W. Bass, Chairman; Christian Grusse and Francis Rowe, Sr., Supervisors.

1874 to 1879, inclusive—N. W. Bass, Chairman; Peter Pitts and Thomas Chapman, Supervisors.

1880—John McArthur, Chairman; George C. Huntington and William Pruessing, Supervisors.

1881—John McArthur, Chairman; Frank E. Huntington and William Pruessing, Supervisors.

Clerks.—R. Hodgson, 1849; Thomas Eastman, 1850-51; B. F. Wyne, 1852-57; A. R. Bushnell, 1858; B. F. Wyne, 1859-64; Milton Graham, 1865-66; Charles W. Hill, 1867-68; W. H. Beebe, 1869; Joel C. Squires, 1870; E. A. Andrews, 1871; J. C. Squires, 1872-73; R. J. Huntington, 1874; C. W. Hill, 1875-79; W. R. Laughton, 1880-81.

Superintendent of Schools.—J. L. Pickard, 1849; Samuel F. Cleveland, 1850; J. J. Pelatour, 1851; Titus Hayes, 1852; Hanmer Robbins, 1853; Thomas Perry, 1854-55; Hanmer Robbins, 1856-61. No return for 1862 or subsequently.

Assessors.—S. F. Cleveland, 1849; Robert Neely, 1850; Thomas Hugill, 1851; Thomas Chapman, 1852; George R. Laughton, 1853; H. Hurlbut, 1854; H. G. Stiles, 1855; J. B. Penn, 1856-58; Thomas Reuder, 1859; J. W. Rewey, 1860; J. B. Penn, 1861-62; Henry G. Stiles, 1863-64-65; J. H. Evans, 1866-67; A. J. McCarn, one year; Thomas Chapman, two years; and O. A. Boynton, three years from 1868; A. J. McCarn declining to serve, C. T. Overton appointed in his stead; James Durlley, 1869-70; Thomas Jenkins, 1871-72-73-74-75; E. Vanderbie, 1876-77-78-79; Thomas Jenkins, Jr., 1880-81.

Treasurer and Collector.—William H. Zenor, 1849; A. C. Inman, 1850-51; Jonathan B. Moore, 1852; William Butler, 1853; J. Miner, 1854; Leonard Coates, 1855; Thomas Chapman, 1856-57; F. E. Palmer, 1858; Frederick Hollman, 1859; E. T. Mears, 1860; Judson H. Holcomb, 1861; L. M. Devendorf, 1862; Engel Vanderbie, 1863-64; J. H. Holcomb, 1865; John Grindell, 1866; Joseph Meinhart, 1867; Henry Rewey, 1868; Herman Buchner, 1869-70; R. Longhenry, 1871-72-73; J. H. Holcomb, 1874-75-76; C. G. Doels, 1877-88; H. C. Lane, 1879; J. N. McGranahan, 1880; J. H. Holcomb, 1881.

Justices of the Peace.—Bennett Atwood, A. C. Inman, S. O. Paine and Harrison Bell, 1849; S. O. Paine and A. C. Inman, 1850; W. H. Chapman and J. W. Vanorman, 1851; S. O. Paine and C. C. Clinton, 1852; W. H. Chapman and B. F. Wyne, 1853; F. Hollman and J. W. Vanorman, 1854; B. F. Wyne and I. S. Clark, 1855; no return for 1856; B. F. Wyne, H. G. Stiles and W. H. Chapman, 1857; A. R. Bushnell and N. Goodrich, 1858; B. F. Wyne and W. H. Chapman, 1859; Allen R. Bushnell and N. Goodrich, 1860; B. F. Wyne, E. A. Andrews and Frederick Hollman, 1861; F. Hollman, J. H. Evans and W. H. Chapman, 1862; B. F. Wyne and John D. Wood, 1863; F. Hollman and W. H. Chapin, 1864; Milton Graham and B. F. Wyne, 1865; Frederick Hollman and John Bender, 1866; B. F. Wyne and C. W. Hill, 1867; E. A. Andrews and A. W. Bell, 1868; B. F. Wyne and S. O. Payne, 1869; Joel C. Squires and E. A. Andrews, 1870; B. F. Wyne and Augustus Michael, 1871; C. Hiners and J. C. Squires, E. Vanderbie to fill vacancy, 1872; B. F. Wyne and W. H. Beebe, 1873; R. J. Huntington and C. W. Hill, 1874; B. F. Wyne and W. H.

J. A. Morgan

PLATTEVILLE.

Beebe, 1875; C. W. Hill and R. J. Huntington, 1876; B. F. Wyne and Charles Weitenhiller, 1877; C. G. Marshall and C. W. Hill, 1878; B. F. Wyne and C. Weitenhiller, 1879; W. R. Loughton and Thomas Jenkins, Jr., 1880; Dennis J. Gardner and Charles Weitenhiller, 1881.

Constables.—J. B. Moore, 1849 to 1852 inclusive; T. R. Hugill, 1853 to 1856 inclusive; William Butler, 1857; E. W. Covell and Hudson Thomas, 1858; Hudson Thomas and T. R. Hugill, 1859; A. K. Young and J. H. Holcomb, 1860; J. H. Holcomb and T. R. Hugill, 1861; A. K. Young and C. W. Hill, 1862; C. W. Hill and J. W. Rewey, 1863; J. W. Rewey and E. G. Beckwith, 1864; E. Stephens and W. P. Durley, 1865; W. P. Durley and John Williams, 1866; A. K. Young and T. W. Smelker, 1867; T. W. Smelker, Henry Neihls and P. D. Hendershott, 1868; H. Neihls, P. D. Hendershott and G. D. Streeter, 1869; H. Nehls, Thomas Gardner and S. J. Hutchins, 1870; T. R. Hugill, P. D. Hendershott and J. Alford, 1871; T. R. Hugill and Thomas Gardner, 1872; T. R. Hugill and J. H. Holcomb, 1873; James Dodge, Joseph Meinhardt and N. Bradbury, 1874; N. Bradbury and S. B. Spencer, 1875; John Cavanaugh, John T. Davidson and James Hammond, 1876; John Cavanaugh, J. L. Rewey and John P. Sampson, 1877; John Cavanaugh, J. L. Rewey and S. C. Stephens, 1878-79; J. L. Rewey, W. H. Bishop and E. J. Bentley, 1880; John Fawcett, E. J. Bentley and W. H. Bishop, 1881.

Sealer of Weights and Measures.—John N. Jones, 1850; Samuel Moore, 1855; Edwin McHoyt, 1860; A. J. McCarn, 1861-62; James Dodge, 1863; H. M. Gribble, 1864; F. R. Chase, 1865; A. J. McCarn, 1866-67; Samuel Stern, 1868; N. Messersmith, 1869; Thomas White, 1870; A. J. McCarn, 1871-72; J. H. Evans, 1873; no returns for 1874; E. H. Doscher, 1875; F. R. Chase, 1876, 1877 and 1878; E. H. Doscher, 1879.

Town Agent.—N. W. Bass, 1874, 1875, 1876, 1877 and 1878.

CITY OF PLATTEVILLE.

The city of Platteville is situated in the heart of the lead mining region, surrounded by a beautiful and fertile agricultural country. The city is irregularly laid out, yet with considerable taste, though it bears the appearance, as is claimed by some writers on the subject, of having sprung up of its own accord. Its irregular character is accounted for in part by the fact that in early days it was a mining settlement, and in surveying the streets it was necessary to respect the rights of miners who owned mineral shafts on its present site, which were subsequently filled up.

MAKING THE VILLAGE.

In 1835, Maj. J. H. Rountree, to whom the present generation is indebted for the growth and prosperity that for a half a century has attended Grant County, Platteville Township and city, caused the survey of the southeastern portion of the present city. Thomas Hugill ran the lines and laid off nineteen lots. At the conclusion of his work, operations were suspended, to be resumed when the entire city was surveyed and platted, and lots became accessible to purchase.

At that day there were no improvements of any kind on the present site. The little cabin of Miles M. Vineyard occupied a limited portion on the slope south by east of where the Gates House now is, and the improvements made by Mr. Rountree on his farm. Richard Waller owned a cabin near Hawley's factory of to-day; the Rountree furnace on Mineral street; the schoolhouse and church on Section 16; and miners' cabins located at large in the direction of the mill subsequently erected by N. H. Virgin and others, embraced the improvements made within sight of the prospective village. Upon the completion of the survey, Maj. Rountree put up a frame store at the corner where the post office now is, the lumber for which was obtained at McKee's mill in the southeast corner of Harrison Township. That fall a grocery was established on Grocery street by William Miller, whose stock in trade was made up of bibulous compounds. Robert Chapman erected a blacksmith-shop on the corner of Main and Oak streets, and one or two small cabins sprang up near the Branch. These were all the improvements

completed before winter. Among the citizens who were then or afterward became prominent, were Maj. Rountree, J. R. Vineyard, W. Vineyard, M. M. Vineyard, Samuel Moore, Henry Snowden, Richard Waller, Joseph Chalders, J. W. Woodcock, W. W. Barstow, Robert Chapman, Irving O'Hara, William Martin, Thomas Lewis and John Wiley.

In this year occurred the first marriage celebrated in the future city, being that of George Rosemeyer and Fanny Jones, Maj. Rountree, in his capacity of Justice of the Peace, officiating. There was no merry-making, the usual incident to modern weddings; the happy couple took no note of such formalities, but subsided into practical life, without the attendant concomitants of wine, cake, etc.

The spring of 1836 was without features of importance; if there was any of more than passing consequence, they have escaped without having been placed on record. Early in the spring, Maj. Rountree built a hotel, the first in the town, on the corner opposite the post office, where it was known for many years as the "Blundell House," of which William Blundell was the landlord. It afterward became the Adams House, and, during the small-pox epidemic of 1843, was the scene of a number of fatal cases. The same season, James W. Woodcock opened a grocery on Grocery street; one or two log residences were located on Mineral street; James Eastabrook made him a home on Market street; Samuel Mitchell came into the settlement and put up a frame house on Main street, where O. C. Griswold now lives; the Rev. James Mitchell erected a residence on Main street, where John Grendell now resides; and these constituted the buildings which found an abiding-place during this year.

John Barstow was the village carpenter; Samuel Moore and Robert Chapman, the village blacksmiths; Drs. Locey and John Bevans diagnosed diseases and prescribed remedies; the Rev. James Mitchell divided his time between commercial pursuits and preaching the Gospel, and is said to have been not only eloquent and persuasive, but capable of sustaining his position in arguments, to which the exciting times occasionally gave birth, when he was almost overwhelmingly convincing. On one occasion, the threat of a citizen to shoot him on sight was brought to his notice a short time before it was necessary for him to enter the pulpit. Thereupon he procured a pair of dueling pistols, and, placing them along side the cushion on the reading desk, promulgated his knowledge of the fate reserved for his acceptance, and that he was prepared to join issue without unnecessary delay. There was a notable absence of lawyers up to this time, and for some years after. The inhabitants usually settled their disputes by arbitration or according to more effective modes of action. In the first place, they were, as a rule, composed of men who rarely failed to requite their promises and discharge their obligations. Theft was almost unknown, and refusals to abide by the terms of a contract were of exceptional infrequency. As illustrative of this, the following is related: During the forties, a citizen of the town, who was working a lead in the vicinity, failed to realize his hopes before his exchequer became exhausted, and, in a condition of mind pardonably discouraging, he visited the store of Samuel Moore, and related his grievances to the proprietor. The lead was there; he knew it, and if he could obtain the means to enable him to prosecute his search to a finality, he would be richly rewarded.

"Well, what do you want?" interrogated Mr. Moore.

"I want powder, fuse; my tools are worn out, and my family is in want of necessaries," he replied.

"You can have them," responded Mr. Moore, and availing himself of the accommodation, resumed work. In about thirty days he "struck it big," and the first thing he did after making a sale was to liquidate the liability he had been permitted by Mr. Moore to undertake.

Nor was this all. Some months after, his benefactor was on the eve of visiting St. Louis to lay in his stock, when the successful miner called, and after inquiring as to his financial needs, insisted upon Mr. Moore's acceptance of a large sum of money, to be taken out in trade. Of such material was the early citizens of Platteville composed.

The supplies of groceries and edibles were then obtained at St. Louis; those of dry goods and notions at New York. The former came by boat to Galena, thence overland to Platteville. The latter, however, were shipped to their destination via New Orleans, thence to St. Louis and home.

The amusements were of the most primitive and limited character, being made up of dances, sociables and card-playing; and although the games of poker, seven-up and whist were never without patrons, gambling was as a rule rarely indulged. Occasionally a "sport" would put in an appearance, and hiring a saloon for a certain period, set up his game and gather in what he was able to bet on faro, roulette and other ventures. But as stated, gambling was not of so universal a character as in the mining regions elsewhere.

In the spring of 1837, the population of the future city was estimated at about 200, including women and children. The Methodist Church, on Main street, the first exclusively church edifice erected in the city, was commenced this season. Benjamin and Sanford Farmer built and opened a saloon this year on the corner of Main and Third streets; Sylvester Gridley put up a store and residence on the present site of I. Hodges' bank, and these, with a few cabins and tents scattered about the city at long intervals, comprehended the list of improvements. During 1838-39, the village seems to have progressed but indifferently. The hard times, failure of banks in Illinois, scarcity of money and other causes, combined to delay either emigration or the expression of enterprise. But some came in and identified themselves with the town, and though the outlook was far from cheerful they remained, and, taking the tide of affairs at its ebb, rolled on to glory and fortune.

While material interests may have lagged, the same cannot be said of those relating to religious and educational affairs. Schools had been established, the academy had been incorporated, and a subscription made for the erection of a building, and in these and some other respects a steady advance is said to have been witnessed. The early pioneers, though as a rule uneducated, evidenced a commendable interest in the cause of learning, and a determination to supply their descendants with that to which themselves had been comparative strangers. To the influences exerted at this early day was the superior reputation of Platteville as an educational center to be attributed, for twenty-five years ago, it was known all over the State, and so pronounced was the reputation it had acquired in that behalf in 1866, that the city was made the point for the location of a State Normal School, which is now one of the most prominent and highly prized of the Normal Schools in the country.

The fall of 1838 is represented to have been unprecedentedly dry. In consequence of this steamboats found it extremely difficult to pass the rapids on the Mississippi River, and the inhabitants of Platteville could only obtain their supplies of coffee, whisky, sugar and tobacco at great cost. In the year, 1839, the *Northern Badger*, the first paper in the city, was established. The paper was a stock concern, and owed its origin to Maj. Rountree, who procured the press and type in St. Louis. In the following year the Academy was organized; in 1842, A. M. Dixon was employed as principal at an annual compensation of \$500, and he, it is said, gave the cause of education its first enthusiastic impulse. The first lawyer to settle professionally in Platteville came also in 1839. He was Wirom Knowlton, who was converted during the small-pox epidemic of 1843, and expecting to die caused his coffin to be made by one of the carpenters, and handsomely trimmed and stuffed, so that no delay might prevent the immediate interment of his remains. But he survived an attack of the disease, commanded a company during the Mexican war, and lived for many years, notwithstanding the premonitory admonitions which, as he supposed, enveloped him with the pustules. Of the remaining counselors, advocates and lawyers who flourished here in early days, B. C. Eastman, Lorenzo Bevans and George W. Lakin came in 1840; James M. Goodhue, afterward publisher of the *Herald* and *St. Paul Pioneer*, delayed his arrival until 1842, while S. O. Paine and C. K. Lord came still later. The early physicians, it may here be observed, were Drs. Bevans, Russell and Basye, of the regular school, and J. C. Campbell, who killed or cured with lobelia and steam.

Thus, practically, was the condition of affairs with the dawn of 1840. For the reasons cited, the growth of the city had been backward, and the improvements, both in point of numbers and quality, were of the most limited and inexpensive character. Main street, as compared with its present prosperity, bore the appearance of desertion. True, buildings, or rather

cabins, lined that thoroughfare, but no more equaled the number or graceful attractions of those at present enrolled than an oleaginous Numidian is to be compared to the Phryne of Praxiteles.

Among the merchants who were present, prominent and prosperous at the beginning of this decade were O'Hara & Hopper, on Grocery street, the third door from the corner of Main; J. S. and S. Bass, on Mineral street, opposite the City Park, Sylvester Gridley, where Hodges bank now is; L. W. Link, French & Baker, and D. & N. Kendall, all on Grocery street. The Platteville Hotel was built this year by William Martin, and Dr. Deffenbacher's present residence, corner of Mineral and Bonson street, materialized. But as already hinted, building was confined to very few undertakings. This rule prevailed also during the year 1841. Notwithstanding that the village was duly incorporated that year, and enjoyed the services of such distinguished ministers as the Revs. James and Samuel Mitchell, B. T. Kavanagh, Rufus Spaulding and Elder Weed; the lawyers, doctors and merchants have already been mentioned, but it should not be omitted that Ezra Adams, John Bevans and French & Mitton kept hotels; Messrs. C. K. Lord, Durley and Colter officiated as Justices of the Peace, while O'Hara & Hopper, Carson & Morrison, the Vineyards and David Seeley were smelters.

Among the residents of that day who have since become famous, was Mrs. E. D. E. N. Southworth, the authoress, who resided with her husband on Second street in the city. The couple had come into the country some months previous, but failing to secure a living, had been furnished with means by his relatives to return whence he came; but he was indisposed to do this, and with the fund subscribed to procure his departure, together with some further assistance from other sources, he established himself as a tinner in the old log schoolhouse. Success attended his efforts, when he moved on to Second street, invented a patent lamp, made considerable money, with which he removed to New York, where he deserted his wife, who had recourse to the "pen," and wrote "The Deserted Wife" and other tales, while he wandered amid the vine-clad hills and sunny vales of California. In time he returned to learn that she was "famous," wealthy, and a resident of Boston, which rejoiced his soul exceedingly (as he was impecunious) and hastening to her domicile he made overtures for a reconciliation, but this accomplished no results, and he went back to California where he died.

In 1842, James and Samuel Moore, Isaac Hodges, E. Bayley and John Kemler were added to the commercial responsibilities of the town.

On the night of January 29, 1843, occurred the first fire which visited the village. Late in 1842, John H. Nichols, a resident of Southport, on Lake Michigan, consigned a stock of goods to Platteville, and opened a store in the frame house of Maj. Rountree, where the post office now is. George Laughton, still a resident of the city, was placed in charge and slept in the store. Between 1 and 2 o'clock on the morning in question, Mr. Laughton was aroused by the cry of fire, and narrowly escaped destruction with the premises. An examination into the causes of the conflagration, induced the belief that it was the work of an incendiary, and the indignation consequent upon this supposition created the most intense excitement. On the following day a public meeting was convened in the village, at which resolutions condemnatory of the alleged act were adopted, and threats of lynching the supposedly guilty party indulged. This calamity was prevented, however, and the circumstance was, in time, lost sight of in the whirl of events.

This was a year of notable events. On February 4, James Paul, accompanied by a half-breed, made a trip to Ontonagon, a distance of 300 miles, over a comparatively trackless wilderness for the purpose of claiming what has since become celebrated in the history of the copper regions, as "Copper Rock," located in Michigan on the shores of Lake Superior. James R. Vineyard, James Hammonds and Grosevenor proceeded thither also, by the lake route, and the little company collected from Platteville held the fort until dispossessed of their possession by the United States forces, and for a valuable consideration.

The winter was remarkably prolonged and severe, succeeded by a spring both unprecedented and alarming. It was changeable and complex as the variations of a kaleidoscope. On the 22d of February, the mercury in the thermometer was frozen, and blizzard blasts ranged

over the prairies, down this street and then down that, tweaking noses and pulling ears, and completely paralyzing the business and other interests of the community. In April, the snow disappeared, and was succeeded by falls of rain and peals of thunder, the like of which had never been previously experienced. During one of these storms, a wedding party was overtaken on the ridge, near the present residence of Hanmer Robbins. Thinking to secure protection, the prospective bride and groom, with their guests, took refuge beneath the wagon, and narrowly escaped drowning. They succeeded in reaching the Platteville Hotel, however, where the services of a Justice were procured, the twain consolidated, and the storm was forgotten in the festivities which followed.

In those days "charivaris" were vouchsafed newly married men and women, which were provocative of emphatic profanity in some cases, and often taxed the patience of performers. The last of these happened about 1843 or 1844, when a Mr. Shinn was married to the sister of Dr. Clark. The bridal couple went to Dubuque on their wedding trip, and while absent arrangements were completed for greeting their return with a vociferous welcome. They managed to avoid the preliminaries concluded upon, and gain the bride's home by a back way, before the minstrels were aware of their presence in the village. When this fact was brought to the knowledge of the artists engaged, they became furious, and proceeding to the residence of those immediately interested, where they set up such an orchestra of discordant arrangements that the entire town was attracted to the scene. But Shinn and the madame refused to be admonished by these hints, and laughed at the efforts of their persecutors. The latter determined to conquer, redoubled their efforts, and prolonged the contest until, at the expiration of a fortnight, the bride and groom admitted defeat, and paid for the price of their capitulation a generous supper.

FIRST BRICK BUILDING.

In the summer of 1843, Maj. Rountree erected the first brick building in the village. The brick were molded and burned on the west side of the Lancaster road, a short distance from the town. The lime was manufactured in the vicinity, and the sand procured at Platte River. The building still stands, being now occupied in part by Mr. Wyne as a bookstore, and in part by the post office.

The Fourth of July was celebrated this year with impressive ceremonies, at the old academy. George R. Laughton read the Declaration, and Jonathan M. Goodhue orated. The crowd was large, and the exercises rapturously applauded by all present except a lank, lean and hungry looking farmer named Fillebrown, who protested against the reader of the "Charter of American Liberties," because he was a Briton. But the protest was suppressed, and not allowed to diminish from the pleasures of the day, which were concluded with a picnic at Platte Mound.

SMALL-POX EPIDEMIC.

In December following, the small-pox broke out in the village, and, before the physicians were able to agree as to the exact nature of the malady, an epidemic succeeded. It was believed to have been imported hither from Milwaukee by a merchant of Platteville, whose clothing had become impregnated with the seeds of disease while in the former city. A son of James McKernan, who resided with his parents at the corner of Second and Mineral streets, was the first case, and died before remedies could be prescribed for his convalescence. Miles M. Vineyard was among the next cases, and he, too, died. He resided at the Platteville Hotel, and, after his death, the coffin was brought down stairs into the hall of that house, when Mrs. Vineyard, the widow, insisted it should be opened. This was done, notwithstanding the protests of those present, and the virulence of the disease dates from this point, it is claimed.

During this period, the doctors in the village were debating the facts in the cases daily occurring, and, being divided in opinion, but little progress was made toward its treatment. Dexter Castle insisted that it was the unmistakable confluent small-pox; Dr. Basye, that it was varioloid; Dr. Clark, that it was a new type of eruption, while Drs. Bevans and Campbell remained undecided in the premises. While they were discussing the facts, however, the disease spread

with discouraging rapidity and remediless violence. The city became panic-stricken, and to add to the gloom and distress which hung like palls above its prospects, was quarantined against by surrounding municipalities. At this point, the citizens convened, and, determining to take charge of affairs themselves, directed that all within the town limits should be vaccinated, and inaugurated other measures for the public welfare, including the appointment of a committee composed of A. S. Bennett, "Doc" Simmons, George R. Laughton, James McKernay and two others, whose names are forgotten. Their duties were to visit and care for the sick, bury the dead, etc., and were fortunate in discharging the same without becoming subjects for the physician or undertaker. The population of the village at that time was about five hundred, of whom two hundred and twenty-six were attacked, and of these eleven per cent, at least, fell victims; whole families were swept off, and the survivors of the terrible experience recall its scenes with feelings of horror. The epidemic prevailed during December, 1843, and January and February, 1844.

Some time after the disease had abated, Mr. I. Hodges and G. R. Laughton engaged Dexter Palmer to drive them to Galena. They arrived at their destination late in the afternoon, when they put up at the American Hotel, of which A. Rossette was proprietor. During the evening, David Seeley and J. Allen Barber began to joke them at the danger that was entailed to the town by their presence, and created the most wide-spread and indignant excitement. When the Plattevillians retired, the ladies in the hotel attended upon Mr. Rossette in a body and demanded their expulsion. This summary process was postponed until morning, when Mr. Hodges, upon descending to the first floor, was confronted by the Boniface with a request to "March right on, Mr. Hodges; you don't owe me anything, but please vacate at once." The gentleman addressed appreciated the situation of affairs, and, rousing Mr. Laughton from his morning nap, both procured breakfast at a cellar restaurant, which was hurriedly eaten, after which the team and driver were placed in readiness, and the party slid out of town in time to avoid the vengeance of a mob, which had gathered in the meantime and threatened dire results.

With the opening of spring, emigrants and "suckers" came in together and prepared to remain as long as the climate continued genial. The canvass held for appointment to office this year was quite exciting, and many a hand-to-hand contest resulted as the outgrowth of differences of opinion. William B. Vineyard was recommended for Sheriff against E. S. Baker, and their friends were not only ardent and aggressive, but inclined to be pugnacious, in which latter particular the candidates themselves were not averse to taking a hand. After a heated struggle, during which James R. Vineyard and Wilson engaged in a struggle for physical supremacy, neither prevailing, however, Baker secured the prize, and his friends proceeded to Platte Mound, under the leadership of Hammer Robbins, and announced the result to the residents of Lancaster by an immense bonfire.

THE BEVANS LEAD.

In July of this year, Lorenzo Bevans discovered a lead in Maj. Rountree's land south of the present site of the stone schoolhouse, which not only enriched himself, but profitted the general public. The history of Mr. Bevans' labors, in what proved to be a lucky find, is tinged with a color of romance rarely experienced without the pages of fiction. It seems that he had been working the lead for some months, meeting with returns the reverse of encouraging, but still confident of the existence of large quantities of mineral. He finally became absolutely impoverished, without means to procure the necessaries of life for his family, or material indispensable to the prosecution of his labors. These latter were supplied by a generous-minded merchant, as also the means to hire an assistant for a limited period. On the day he tapped his "bonanza," he had paid the hired man until noon, which exhausted his exchequer, but suggested that he remain until evening and receive his pay out of the proceeds of the day's labor.

The "hand" consented, and after their noon lunch the twain re-commenced work in the shaft with redoubled energy—the one in the desperate hope of realizing his cherished object; the other by the knowledge that his rewards would be measured by the quantity of mineral his industry would aid him in bringing to the surface. While pegging away, along about 2 o'clock on the afternoon of a sultry day in July, Mr. Bevans suddenly thrust his pick into the clay

bank, which lined the avenue wherein he was at work, which being withdrawn, developed such positive evidence of the existence of wealth as to cause him to labor with increased diligence, conscious that he had at last reached the acme of his ambitions. A few strokes of the pick and shovels of clay, encrusted with ore, cast one side, at length displayed a vein of mineral, in comparison with which all previously discovered in the vicinity had been insignificant rather than inferior. Further labors served to dissolve all doubts regarding the enormous value of the lead. His patience, perseverance and abiding faith in his judgment had been more than required.

Within one hour after the first discovery of lead was made, many tons of mineral were raised, and the embryo city was alive with excitement. Nearly every one became cognizant of the facts, and nearly every one hurried to the scene, bent on ascertaining for himself and herself, for the multitude was made up of men, women and children, the truth concerning the things whereof they had been informed. Before an hour had elapsed, Mr. Bevans was offered \$50 for an interest in his mine, which was soon increased to treble that amount, but both offers were refused. During the afternoon, Hanmer Robbins sought to purchase a share in the venture for \$500, which was declined, and when the men ceased operations at evening, that gentleman was intent on buying a moiety for the consideration of \$1,000, without results. Upward of two millions pounds of ore were taken from the lead which was discharged in 1845, not before the fortunate discoverer had become rich, as also his friends and the merchants in the village from its profits.

This discovery gave an impetus to mining, and many were the attempts made to duplicate Bevans' experience. The population of the town, which was quoted at 800 in 1844, visibly appreciated in 1845, by the influx of miners, attracted thither by news of his luck. But no other discoveries of importance succeeded their coming, and the number of inhabitants dwindled proportionately, leaving as a residuum only the best classes, whose efforts aided in the substantial growth of the vicinity, and the development of its resources.

In 1845, the brick block of E. Bayley on Main street was erected, the two brick school-houses in North and South Platteville commenced, and the brick Methodist Church decided upon. It was begun late in that year or early in 1846, and completed before the spring of 1847. Morally and educationally, the village surpassed expectations or comparison with surrounding towns. The academy built four years previous was conducted in a manner that attracted a generous patronage, and schools for the education of youth of more callow experience than those for whose improvement the academy was designed were springing up in various localities. Commercially, too, the village evidenced a spirit of progress, both permanent and gratifying, and through succeeding years has maintained a prominence special and deserved. Considerable of the uncertain classes, here to-day and there to-morrow, had given place to a class of people who are invaluable to progressive communities. Farming in the surrounding country was revived and carried forward with increased vigor. This condition of affairs continued until flattering reports from the Lake Superior copper mines, combined with the Mexican war, served to drain the village of many of its more enterprising citizens. July 4, 1847, was observed by a dinner in the public square, to which the patriotic, as also the liberally disposed toward the Presbyterian Church, then in progress of building, were invited and came in large numbers. On October 30, of the same year, a concert was given in the church edifice to defray the cost of pews and the purchase of an æolian for the same religious society. As an item of interest to those who attended, the programme is submitted as follows: Voluntary; Hymn, tune, "Josiah," from the "Sacred Harmony;" Overture, from the French Boreldieu; Anthem, "Blessed are they that dwell in Thy house;" song, "The Irish Emigrant's Lament," Mr. Laugh-ton; quartet, "The Wild Rose," Miss E. Wiley, Miss M. Durley, J. W. Stewart and J. Durley; song, "There's a good time coming, boys," Ben C. Eastman, Esq.; Quartet, "Sweet the hour when free from labor," Misses M. and H. Durley, and Messrs. Colburn and Eastman; song, "And they lifted up their voice and wept again," E. W. Prentiss, of Hazel Green; glee, "He who trusts in ladies fair," Messrs. Prentice, Stewart, Colburn and J. C. Eastman;

Hymn, tune, "Palestine;" duet, "Now at moonlight's fairy hour," Miss M. Durley and Mr. Prentiss; Anthem, "Jerusalem, my glorious home."

Part second was made up of solos by J. C. Eastman, E. W. Prentiss and Mr. Stewart; duet by Miss Wiley and Mr. Prentiss; quartets by Mrs. Bancroft, Misses Durley and Wiley, and Messrs. T. Eastman, Covell, Stewart and Durley, in addition to hymnals and instrumental music on the aeolian. The concert netted \$120, and provided means for the purposes mentioned.

The Mexican war came on about this period, but few residents of Platteville or vicinity being persuaded to enlist. It is estimated that from twelve to fifteen recruits were obtained in this township, in no comparison with the number who went to California two years later, which is said to have been upward of 200, and whose departure unquestionably retarded the growth of the city, diminished the volume of business for many years, and worked an injury to material prospects scarcely short of permanent.

PLATTEVILLE IN 1850.

In 1850, the population of the city is stated as nearly 1,500, an increase of nearly 100 per cent in about four years. There were three churches, the Methodist, Primitive Methodist and Congregational, and quite a number of merchants, prominent among whom were I. Hodges, Moore & Lane, E. Bayley, John Kemler, Mrs. Gridley and Dennis Clark. This year, the Hon. Benjamin C. Eastman was elected to Congress, the first and only Congressman Platteville ever furnished. The ensuing five years were dull, without any enlivening features to ripple the current of daily events. Along in 1855, however, business began to revive, a great many people came in from the East and large amounts of money were invested in public lands. Buildings, too, were erected, and the Clinton House, erected at the corner of Main and Oak streets in 1846, ceased to be among the more prominent structures of that thoroughfare. Prior to the panic of 1857, farming began to revive and attracted the attention of husbandmen at the East and in Europe; as a consequent, Ohio, Pennsylvania and New York furnished a large number of settlers, while Germany sent hither representatives of Teutonic thrift and industry, who have aided in the building up of the city, for most of them settled in the city and have become among its most substantial residents. The panic above referred to produced an effect in Platteville similar to that experienced all over the country. Times were hard and money scarce, notwithstanding which there were but few failures among the commercial circles. The campaign preceding the war was characterized by the absence of that rancor and fierce partisanship to be observed in some parts of the country, and previous to the commencement of actual hostilities, though there may have existed a difference of opinion as to where blame for the trouble rested, when the firing upon Fort Sumter inaugurated the trouble, there was no one who held back his tribute and support from the cause.

DURING WAR TIMES.

Meetings were held all through the war for the purpose of encouraging enlistments and raising funds, and from the first meeting convened opposite the Tyler House, in April, 1861, which was addressed by Maj. Rountree, N. H. Virgin, Hanmer Robbins and W. E. Carter, and when the first recruit, Billy Britton, enlisted, to the day when Lee surrendered, there was no holding back nor absence of patriotism on the part of citizens to promote success.

After the war, the village grew gradually, and improvements succeeded the rude structures improvised in the early days of the settlement for business and residence purposes. In 1849, the precinct of Platteville was changed into the town of Platteville, with Benjamin C. Eastman Chairman; railroad enterprises were projected upon numerous occasions, having Platteville for their base of operations or objective point, but all proved failures, and nothing more than speculation was indulged by enterprising citizens until 1867. In that year, individuals subscribed stock to the amount of \$50,000, which was supplemented by subscriptions to the extent of \$60,000, made by the town for the construction of a railroad from Calamine. In 1869, the town subscribed \$60,000 additional stock, for which bonds were issued, payable in twenty

annual installments, with interest at the rate of 7 per cent per annum. The following year, the road was completed, and has since been in operation.

THE PRESENT CONDITION.

In 1872, Platteville subscribed \$32,000 to aid in building the narrow-gauge railroad, which has also been an outlet for the city and adjacent country since, and with these facilities the means of communication with distant points have been reliable and uninterrupted.

The city has been visited by two destructive conflagrations, one on the night of June 10, 1870, in which the Tyler House, Hodges' bank burned, involving a loss of \$12,000; the other two years later, when the balance of the property contiguous to the site of the fire in 1872, was burned, entailing damages estimated at \$12,000. Both blocks, however, have been rebuilt, and a reliable fire organization has been substituted for the "bucket brigade," providing security against a repetition of these calamities.

On March 4, 1880, an act providing for the chartering of the city of Platteville was approved, and to-day the city, with a population of 2,685, distances her rivals throughout the county in her religious, educational, social and commercial interests and enterprises.

By act of the Legislature approved February 19, 1871, all that part of Section 15, in Township No. 3, of Range No. 1 west of the Fourth Principal Meridian, in the county of Grant, was appropriated to and thereafter known and distinguished as the town of Platteville.

The roster is incomplete, owing to the absence of records. March 4, 1880, the city was duly incorporated, and the following officers elected, who are still in service.

OFFICIAL ROSTER.

Mayor, H. J. Traber, 1880-81; Aldermen, R. W. Laughton, G. W. Eastman, T. Jenkins, Jr., W. Meyer, Sr., N. Bevers and F. Libert, 1880-81; Clerk and Police Justice, W. R. Laughton, 1880-81; Treasurer, W. S. Northrop, 1880-81; Supervisor, Hanmer Robbins, 1880-81; Surveyor, J. C. Squires, 1880-81; Weigher, O. A. Boynton, 1880-81; Street Commissioner, Curtis Barker, 1880-81; Marshal, J. L. Rewey, 1880-81.

The officers under village organization and previous were as follows:

1845—Samuel Moore, President.

1846—Samuel Moore, President; Henry Snowden, J. H. Watts, William G. Spencer, S. N. Jones and Robert Chapman, Trustees.

1847—The board of the previous year held over.

1848—G. W. Lakin, President; S. Hawley, P. Stone, Thomas Stephens, N. Hutchins, H. C. Lane and Joel Potter, Trustees.

1849—S. O. Paine, President; N. Hutchins, N. Messersmith, T. Stephens, G. Hawley, H. C. Lane and H. Bell, Trustees.

1850—S. O. Paine, President; J. M. Alford, N. Messersmith, James Durley, E. J. Madison, P. B. McEntire and D. W. Clark, Trustees.

1851—A. C. Inman, President; H. Hurlbut, P. B. McEntire, Noah Hutchins, James Durley, Nicholas Messersmith and D. W. Clark, Trustees. Leonard Coates elected President, September 22, 1851, vice A. C. Inman, deceased.

1852—Leonard Coates, President; Isaac Hodges, J. Pickard, William Grindell, John Kemler, H. C. Lane and N. Goodrich, Trustees.

1853—John Bevans, President; Joel Potter, William Grindell, H. Hurlbut, R. Snowden, Isaac Hodges and John Kemler, Trustees.

1854—John Bevans, President; H. C. Lane, E. Vanderbie, H. Bell, G. Hawley, J. T. Kirkpatrick and J. S. Marsh, Trustees.

1855—Samuel Moore, President; J. M. Alford, J. T. Hancock, Calvin Russell, Elijah Bayley, Daniel Richards and William Butler, Trustees.

1856—Noah Hutchins, President; Frederick Hollman, George Hammons, Bennet Atwood, E. H. Stowell, Daniel Richards and Nehemiah Goodrich, Trustees.

1857—N. H. Virgin, President; O. A. Boynton, William Grindell, F. Frederick, Thomas Bender, John Kemler and Noah Hutchins, Trustees.

1858—Samuel Mitchell, President; Leonard Coates, J. Potter, Jacob Cramer, B. F. Chase, W. V. Murphy and James Kelly, Trustees.

1859—O. A. Boynton, President; Samuel Block, William Grindell, James C. Wright, Jacob Cramer, John Smelker and Samuel Nasmith, Trustees.

1860—Nelson Dewey, President; Samuel Block, Samuel Nasmith, George S. Hammond, Henry Spink, Joel Potter and Henry A. Miller, Trustees.

1861—Nelson Dewey, President; Samuel Nasmith, Joel Potter, John H. Rountree, W. G. Babcock, Jacob Cramer and F. Frederick, Trustees.

1862—John H. Rountree, President; Joel Potter, W. G. Babcock, E. Vanderbie, S. Block, N. Stork and L. Coates, Trustees.

1863—Noah Hutchins, President; J. F. Kirkpatrick, Henry C. Miller, Leonard Coates, Engel Vanderbie, William Grindell and L. L. Goodell, Trustees.

1864—John H. Rountree, President; Leonard Coates, Charles G. Marshal, William Grindell, E. Vanderbie, Joel Potter and Nicholas Stark, Trustees.

1865—S. O. Paine, President; N. Hutchins, E. Vanderbie, R. Straw, N. Stark, W. Parmell and S. M. Devendorf, Trustees.

1866—S. O. Paine, President; N. Hutchins, E. Vanderbie, Joel Potter, James V. Hollman, Richard Straw and Henry Hoyt, Trustees.

1867—J. H. Rountree, President; J. V. Hollman, Conrad Ketler, J. B. Penn, J. W. Smelker, Alexander Butler and H. Spink, Trustees.

1868—E. Vanderbie, President; N. Hutchins, Joseph Minehardt, John Kemler, Richard Straw, Michael Stephens and Samuel Block, Trustees.

1869—E. Vanderbie, President; S. M. Devendorf, Joel Potter, F. R. Chase, Richard Straw, A. Ketler, J. Minehardt, Trustees.

1870—J. H. Evans, President; F. R. Chase, Curtis Barker, John Huntington, Joseph Minehardt, Conrad Ketler and J. B. Penn, Trustees.

1871—J. B. Penn, President; A. W. Bell, J. Huntington, C. Witenheller, Thomas Jenkins, Samuel Block and John Kemler, Trustees.

1872—N. H. Virgin, President; C. Ketler, J. Kemler, L. J. Washburn, T. Jenkins, E. Bayley and R. Shaw, Trustees.

1873—N. H. Virgin, President; J. Kemler, C. Ketler, T. Jenkins, L. J. Washburn, J. B. Penn and R. Straw, Trustees.

1874—N. H. Virgin, President; Thomas Jenkins, N. Hutchins, Conrad Ketler, C. Heners, J. B. Penn and R. Straw, Trustees.

1875—N. H. Virgin, President; Thomas Jenkins, J. B. Penn, C. Heners, C. Ketler, R. Straw and N. Hutchins, Trustees.

Treasurers—Robert Chapman, 1845, 1846, 1847; Isaac Hodges, 1848, 1849, 1850, 1851; Samuel Moore, 1852; Leonard Coates, 1853; R. W. Stevenson, 1854; Manville Comstock, 1855; H. A. Chase, 1856; William Butler, 1857; E. W. Covill, 1858; J. F. Kirkpatrick, 1859; Samuel Block, 1860.

Clerks.—J. L. Marsh, 1845, 1846, 1847; J. C. Eastman, 1848; William Zenor, 1849; R. Hodgson, 1850; Thomas Eastman, 1851; J. W. Van Orman, 1852, 1853; B. F. Wyne, 1854; James Durley, 1855; B. F. Wyne, 1856, 1857, 1858, 1859, 1860, 1861, 1862.

Collectors.—A. C. Inman, 1848; R. Hodgson, 1849; A. C. Inman, 1850; no returns for 1851 or 1852; T. R. Chesebro, 1853; R. W. Stevenson, 1854; H. Bell, 1855; H. A. Chase, 1856-57; E. W. Covill, 1858; J. F. Kirkpatrick, 1859; Samuel Block, 1860.

Assessors.—A. M. Holliday, 1848-49; A. C. Inman, 1850; J. C. Campbell, William V. Murphy and Abel Conner, 1851; S. F. Cleveland, John Bayley and Isaac Richards, 1852; J. S. Clark, O. A. Boynton and W. D. Mitchell, 1853; C. T. Overton, 1854; H. Bell, 1855; George W. Henry, 1856-57; William H. Howard, 1858; B. F. Wyne, 1859; B. F. Wyne, 1860.

Constables.—A. C. Inman, 1848; William Zenor, 1849; J. B. Moore, 1850; Richard Hodgson, 1851; Thomas Chesebro, 1852; T. R. Hugill, 1853; R. W. Stevenson, 1854; no returns for 1855; H. A. Chase, 1856; William Butler, 1857; E. W. Covill, 1858; P. D. Hendershot, 1859; A. R. Young, 1860.

Marshals.—A. C. Inman, 1846-47; J. Grumley, 1848; no returns for 1849, 1850, 1851, 1852, 1853 or 1854; Manville Comstock, 1855; H. A. Chase, 1856; William Butler, 1857; E. W. Covill, 1858; P. D. Hendershot, 1859; A. R. Young, 1860.

Supervisors.—J. H. Evans, 1870-71; J. H. Rountree, 1872; E. Bayley, 1873, 1874 and 1875.

Weighmaster.—J. H. Parnell, 1874.

THE FIRE DEPARTMENT.

Previous to the extended and disastrous conflagration, which swept over a portion of the city on the night of April 15, 1874, the elements were stayed by more primitive means than those which have since obtained. That event, however, impressed citizens with the necessity for adequate means of protection, and, soon after its occurrence, a paper signed by sixty business men, called for a meeting to convene at Thomas Hall with a view to organized action. The meeting was largely attended, with Gideon Hawley presiding, and A. W. Bell acting as Secretary. The inadequate means at command to cope with fire was fully discussed, and various plans suggested to remedy the evil. Finally, Messrs. H. H. Virgin, A. L. Brown, W. H. Beebe, H. J. Traber and James S. Hammond, were appointed a committee for the purpose of taking the steps necessary to organize a hook and ladder company.

On the 6th of May following, this committee met at the office of the town clerk, and drew upon an application to the Town Board, which was numerously signed for the formation of the organization. This was submitted on the following day, and notice was served upon the applicants to meet at the Town Clerk's office on the 18th of the same month for organization. At that meeting, A. L. Brown occupied the chair; W. H. Beebe officiated as Secretary, and the company was organized by the election of the following officers: H. J. Traber, Foreman; H. H. Virgin and John Grindell, Assistants; A. W. Bell, Secretary, and Thomas Shepherd, Treasurer.

The truck was built by Alexander Butler, of Platteville, and cost \$300. It is nearly twenty-four feet in length, supplied with windlasses, spring bells, etc., and securely mounted. The company also has the tackle, apparel and furniture indispensable to its line of business, is composed of seventy men, and officered as follows: H. J. Traber, Foreman; F. W. Newton and John Spink, Assistants; J. F. Funston, Secretary, and Thomas Shepherd, Treasurer.

Mound City Engine Company No. 1.—Soon after the organization of the hook and ladder company was completed, many citizens, realizing that the interests at stake were not entirely covered by the efforts thus far put forth, proposed the establishment of an engine company, and proceeded to effect arrangements looking to that end. In the fall, these efforts produced results, and secured the organization of the Mound City Engine Company with thirty members, and John Grindell as Foreman. Immediately, the organization crystallized into shape, the company purchased a "chemical" in Chicago, of power and excellence, and have since been prepared to cope with the most formidable of enemies to prosperity and happiness. The present officers are James McCoy, Foreman; H. S. Vaughn and Horace Chase, Assistants; W. Grindell, Treasurer; J. Maloney, Secretary.

In the meantime, the fire department was regularly established as one of the departments of the city, and the following officers elected: Alexander Butler, Chief; H. J. Traber and H. G. Chase, Assistants; John Grindell, Treasurer, and W. J. Funston, Secretary.

The department at present is composed of 140 men, embracing the best element of the city, on the alert for danger, and ever ready to encounter its suppression, free from the evils incident to more metropolitan organizations, and receiving, as it deserves, the confidence and support of a community for the protection of whose property "the boys" have volunteered. The present

officers are Alexander Butler, Chief; H. J. Traber and J. B. McCoy, Assistants; E. F. Newton, Treasurer, and Max Stickle, Secretary.

The department own property valued at \$3,000. Elections are held annually, and meetings convene monthly.

The Mound City Engine Band, made up of members of the Mound City Engine Company, was organized February 15, 1880, with twelve members and the following officers: Augustus Schmidt, President and Leader; W. F. Grindell, Secretary and Treasurer.

Since that date, some changes have occurred in the personnel of the organization, which is constituted at present as follows: A. Schmidt, President and Leader; W. F. Grindell, Secretary; David Grindell, Treasurer; H. Cowduroy, B Cornet; A. Martin, Baritone; C. Mansfield, Second Tenor; George Alcock, First Alto; M. Stevens, Second Alto; William Mann and Oscar Henning, Bass; M. Rose and C. B. Goldwood, Drums.

Meetings are held three times each week, and the society owns property valued at \$300.

The Platteville Hook and Ladder Band.—As the name indicates, the composition of this musical society are representatives of the Hook and Ladder Company of the city of Platteville. It was organized in June, 1879, with H. C. King as President and Leader; E. J. Bentley, Treasurer, and W. J. Funston, Secretary, with a full complement of performers.

The association at present consists of H. C. King, President and Performer on B Flat Cornet Solo; Eugene Spencer, Leader; Lyman Spencer, Treasurer and Alto; J. H. Parnell, Secretary and Tenor; George Hutchins and A. Grindell, First and Second Alto; B. C. Eastman, Clarinet; A. Martin, Trombone; William Topps, B Flat Cornet; Elmer Thomas, Bass; James Hammond and James Washburn, Drums.

The society meets twice each week, and estimates the value of their property at \$525.

EDUCATIONAL.

The reader is already familiar with the opposition manifested by the Indians to the occupation of the lead mines by the whites. This opposition first evidenced itself as early as 1822, when the hostilities of the savages prevented operations in that region. Then came the Winnebago war, followed by the Black Hawk war, in which the red man was practically annihilated, and peace, with its blessings, first began to be a source of profit and enjoyment.

In the meantime, prominent villages were located and built up near valuable openings in the mines, and a number of the most useful citizens had arrived with the miners, all of whom employed their best efforts to the establishment of that system of education which has since so successfully obtained. Among these were Gov. Dodge, who urged the adoption of a public school system; Hon. John H. Rountree, who aided materially in opening the first schools in the southwestern portion of the State, including Platteville Academy, now a State Normal School; Gen. Charles Bracken, who first introduced a bill in the Territorial Legislature to create a common school fund; and Col. Daniel M. Parkinson, who was Chairman of the Assembly committee which made the earliest inquiries into the expediency of establishing common schools in the State.

In Mineral Point, in July, 1830, was built the first schoolhouse in the lead district. It was constructed of logs, and, when not occupied by the school, furnished accommodations for a Justice's Court and church.

The second school in the Mineral District was built in June, 1834, on the east side of Section 16, now a part of the city of Platteville. It was built by subscription, through the efforts of Maj. Rountree and others. It was of hewn logs, one story high, 18x20 feet in dimensions, and presided over by Samuel Huntington, a pioneer teacher, who drifted into the country from no one knows where, and disappeared no one knows how. Here came the children of pioneer families for miles around, including those of the Rountree, Reily, Snowden, Waller, Vineyard, Holman and Chalders families, about twenty-five all told, and here the preceptor divided his time between the cause of education and search for mineral. He was about forty years of age, eccentric, exacting, but not severe, and though he taught about two years, at \$3 per capita per

quarter, the parents of those in attendance were accustomed to argue themselves into the conclusion that his efforts would have proved more satisfactory had he paid more attention to instruction, and less to the discovery of "rich leads." The school was discontinued at this point upon his departure, and resumed in a house to the rear of the present Deffenbacher lot, north of Mineral street, where Dr. A. T. Locey gathered about forty pupils, who were taught in the main by his sister, Miss Locey. In May, 1837, Hanmer Robbins opened a school in a log house south of the present Congregational Church site. His pupils embraced among others, H. S. and Ellen Rountree, Miss Locey, two daughters of Thomas Render, a son and daughter of Richard Waller, and Henry Snowden, the children of James Durley, the children of James Vineyard, and others, about sixty all told. The branches taught were the ordinary elementary studies. The same was paid for at the rate of \$4.50 for a term of sixteen weeks, and success attended his efforts. He remained here, and in the Methodist Church, until the spring of 1839.

In February of that year, Maj. Rountree, who was a member of the Territorial Council, introduced a bill providing for the incorporation of the "Platteville Academy." The bill was passed, and A. M. Dixon came hither from Bond County, Ill., to take charge. Some say the institution was opened in the basement of the Methodist Church, under the care of Mr. Dixon, where it remained until its removal to the building erected for academic purposes, in 1841, in the northern part of the city. Others insist that he began teaching in his private residence, still standing at the corner of Main and Court streets, when he was assisted by his wife, which was attended by the children of Henry Snowden, Maj. Rountree, J. R. and W. B. Vineyard, N. H. Virgin, J. B. McCord, Robert Dixon, a sister of Samuel Moore, and others. At all events, the academy was established in the basement of the Methodist Church until the limited quarters there necessitated its removal. In about 1841, John Myers, assisted by a man named Byerly and others, prepared the frame for the new academy building, and during that year completed the structure. It was 40x60, two stories high, containing two school apartments, and was presided over by Prof. Carrier, when it was completed and furnished. School was taught there until about 1853, when the stone edifice was finished and occupied.

The basement of the Methodist Church continued to furnish room for educational purposes after the removal of the academy, the Rev. Mr. Nolon and possibly some other educators officiating as Principals for some years. In 1845, when it was decided to erect the brick Methodist Church on the site of the present edifice of that denomination, Maj. Rountree made some changes in the interior arrangements which permitted its utilization for school purposes, and Prof. Carrier was placed at the head. In 1845-46 Miss Annette L. Godell taught in the basement of the church, and a Mr. Burk, who subsequently went to California, occupied the auditorium in a similar capacity. In 1846, the brick schoolhouse still standing on Pine street was built, and is resorted to as the first building erected in this section of the county as a common school. The same year, it is thought, the north brick school was built and similarly appropriated, and these were the only edifices for the purposes indicated which had been erected up to the date of the admission of Wisconsin as a State.

With the adoption of the constitution the several counties in the State, as is well known, were divided into school districts and provision made for their support. Up to this time the cause of education was committed to the care of private corporations and individuals. No one was obliged to countenance schools nor contribute to their support and but for the presence of an enlightened public sentiment in that behalf this civilizing influence would not have accomplished the results cited. For in addition to the efforts made by Maj. Rountree and others, children's education in place of being neglected was provided for. Instead of allowing them to run wild in the sunshine, they were gathered into impromptu kindergartens and taught the primary principles by Mrs. H. A. Nixon, Miss Julia Bevans and others. The admission of the State added an impetus to material interests and gave birth to measures for advancing the State, educating the youth and developing sources of information and wealth which have obtained so satisfactorily since. Prominent among these was the increased provision made for and the in-

creased interest manifested in the education of the youth of both sexes. The academy became an object of special and specific interest, and its curriculum was sought to be availed of by students from nearly every point to which it was accessible, while the common schools in the present city designated severally as districts number four and five, were crowded for room.

Mr. Magoon had in the meantime succeeded Prof. Carrier as Principal of the academy, and the latter had in turn yielded place to J. L. Pickard. Under the administration of that gentleman, the need of additional room became so pressing that the academy directory decided upon the building of the stone premises now in part occupied by the Normal School. Land was procured, contracts made, and other arrangements completed early in 1852, and on the 5th of July of that year the corner-stone of the edifice was laid with appropriate ceremonies. Maj. J. H. Rountree presided and had charge of the arrangements, the address being delivered by W. R. Biddlecome. The box inclosed in the stone contained a copy of the charter and subscription book, names of the Trustees and building committee, a history of the academy, a copy of the *Independent American*, and a map of Wisconsin. Work on the building was prosecuted with vigor, and its completion for occupation reached early during the following year. For nearly fifteen years this building was occupied as the Platteville Academy, and under the administrations of J. L. Pickard, A. K. Johnson and George M. Guernsey, became the *Alma Mater* of an alumni both numerous, progressive and of extended reputation. In 1866, it was transferred to the State for normal school purposes, and has since been and will doubtless continue to remain in that capacity for decades to come.

The city, as above stated, was divided into two districts when the constitution was adopted, which lasted until about 1857, when the same were consolidated. In the spring of the latter year it was decided to erect another schoolhouse, and a discussion occurred between the citizens of North and South Platteville regarding its location. The committee after almost endless examination, inquiry and debate, decided to purchase a lot of Maj. Rountree, at the east end of Main street, and contracted for the building of what has since been known as the "stone schoolhouse." The foundations were laid the same year, and the walls run up, but it remained unoccupied until 1860, when only the first stories were rendered inhabitable.

The result of this decision of the committee was to again divide the city into two districts, and inspire the erection of a second schoolhouse of brick, on Rountree, near the corner of Rebecca street. Both were completed and furnished in 1863, at a total cost of \$12,000, and have since furnished the necessary accommodations for the education of Platteville youth.

The stone schoolhouse contains five departments—two primary, two intermediate, and high, requiring the services of five teachers, enjoying an average daily attendance of three hundred pupils, and requiring an annual outlay of \$2,600.

The brick or North District Schoolhouse has four departments, furnishing employment to four teachers, by whom an average daily attendance of two hundred and twenty-five pupils is taught, at an annual cost of \$2,000.

The schools are under the supervision of a County Superintendent and School Board, consisting of one Director, Treasurer and Clerk for each district. The terms are co-incident with those of the Normal School, and examinations for promotion are held at the close of each. The officers of the North District School are William Meyer, Director; H. C. Sanford, Treasurer, and J. H. Holcomb, Clerk. Of the South District, L. N. Washburn, Director; William Grindell, Treasurer, and B. F. Wyne, Clerk.

It may be of interest to the reader to add that the old frame academy building subsequently became a Presbyterian Church, in which the Rev. Mr. Bradford expounded the doctrine for some time; the old South Brick Schoolhouse still stands, adjoining the residence of Alexander Butler, southwest of the Masonic Hall, and the old North Brick Schoolhouse, corner of Lewis and Third streets, was, until his death, the homestead of the late E. Vanderbie.

The Methodist Church and schoolhouse still survives the rush of worlds also, on the very spot of its origin, to the rear of the brick block on Main street, in part occupied by Sanford & Chase.

The Normal School.—The Normal School system first came to Wisconsin during its Territorial existence from the East, and found expression in the Constitutional Convention of 1846. The subject was, however, but superficially referred to, and not until two years later did the idea crystallize into shape. In the constitution of that year, an article was incorporated providing for the creation of “a separate fund called the school-fund, the interest of which, and all other revenues derived from the school lands” to be applied “to the support and maintenance of common schools in each school district, and the purchase of suitable libraries and apparatus therefor.” The residue to be appropriated to the support and maintenance of academies and Normal schools, with suitable libraries, apparatus, etc. In January, 1849, the Regents of the State University established a Normal department, but the ordinance providing therefor remained inoperative, owing to a lack of funds. Various efforts were made during succeeding years by those friendly to the cause of education to adopt means by which Normal schools might become established, without results. In 1857, the Hon. J. Allen Barber introduced a bill into the Senate to “create and establish a literature fund from the proceeds of the sale of swamp lands.” At the same session, a bill was introduced into the House by the Hon. L. J. Evans “to establish a Normal School and Teachers’ Institute.” Both bills were referred to a special committee which reported a substitute providing “That the income of 25 per cent of the proceeds arising from the sale of swamp and overflowed lands should be appropriated to Normal Institutes and Academies under the supervision and direction of a Board of Regents of Normal Schools appointed in pursuance of a provision of that act.” The act passed and became a law, from whence sprang the present Normal school system in Wisconsin. In 1865, the Legislature adopted an act providing a much more liberal endowment for Normal instruction and devoting it distinctively to the establishment and support of Normal schools. The swamp lands and swamp land funds were divided into equal parts, one of which constituted the Normal School Fund. Upon the passage of the act, proposals were invited for extending aid in the establishment of these schools, and different localities began at once to press their claims. In July of the year in which this act was passed, the trustees of the academy of Platteville convened and decided to offer the academy building grounds to the State for Normal school purposes for a consideration of \$25,000, the State to assume an indebtedness of \$4,000 which was due from the corporation. On the 19th of August following, a meeting of the citizens of Platteville was held for the purpose of examining into the merits of the undertaking, and ascertaining what inducements could be offered the Regency to establish the school in this city. The subject was thoroughly discussed by those in attendance, but no conclusion reached prior to adjournment. On the 26th of the same month, another meeting was held at which N. H. Virgin presided, and the Board of Trustees of the Academy was authorized to offer the academy property for Normal school purposes at a fixed price, the citizens of Platteville assuming all liabilities, except the amount due the State, and three days later, a resolution was adopted providing for the levy of a tax to liquidate the liabilities proposed to be assessed. In September of the same year, the Board of Normal Regents met at Madison and appointed a committee consisting of C. C. Sholes, J. G. McMynn and W. E. Smith to visit and examine the various sites proffered for the venture, and at this point those interested were obliged to contain themselves in patience until a report could be submitted.

For many weeks occupied by this committee in an inspection of the advantages and inducements offered by rival municipalities for the location of the school, Plattevillians were fed on hope and faith, a rather unsatisfactory diet; but all that was reserved to their disposal. Finally, on the 29th of November, the committee reached this city, and met the citizens on the evening of that day in the hall of the academy. The Hon. Hanmer Robbins was chairman of the meeting, and the subject which had convened the assemblage was exhaustively debated by those in attendance. Nothing was decided upon, however. Through that year, and the opening month of 1866, there was little to encourage, less to enthuse the hopes of those who had by patient watch and constant effort endeavored to secure the assignment of the business in hand to Platteville. On the 23d of February, 1866, a meeting was held in Platteville, at which G. K. Shaw

presided, and it was resolved to petition the Legislature to pass an act directing the Town Clerk to insert on the town tax roll a sum sufficient to meet the outstanding obligations of the academy and leave a surplus of \$5,000 to be appropriated by the Board of Regents of the Normal School for building purposes. Five days later, the board voted to locate the schools at Platteville and Whitewater. On the 2d of May following, the transfer of titles to sites, etc., were completed, and the building committee was instructed to proceed with building the necessary improvements.

According to announcement, the school opened on Tuesday, October 9, 1866, the exercises being attended by a large number of ladies and gentlemen of Platteville and the surrounding country, old students of the academy and others. The ceremonies were opened with prayer by the Rev. Mr. Mather, after which Prof. C. H. Allen was then introduced, and made a few earnest remarks on the responsibility he had assumed as Principal, and his hopes for the success of his labors. Hon. J. L. Pickard followed in an address full of feeling, and abounding in practical observations. At the conclusion of his remarks, occurred a most pleasing and gratifying episode. A covered stand was brought forward, and Mr. W. E. Carter, addressing Hon. Hanmer Robbins, presented him with an elegant set of silver service, consisting of a coffee urn, castor and cake basket, as a slight testimonial of the appreciation of citizens for his services in procuring the location of the Normal School at Platteville.

The recipient returned thanks in an appropriate speech, in which he complimented the people of Platteville upon their labors in the same behalf, without which he could have accomplished nothing.

After the singing of the doxology by the Glee Club, and benediction by the Rev. Mr. Pond, the meeting was adjourned until evening, when the exercises concluded with a re-union supper.

The regular course was commenced on the following day, under the administration of Prof. Charles H. Allen as Principal, assisted by Jacob Wernli, George M. Guernsey, Professor of Mathematics; Fanny S. Joslyn, Instructor in History, Geography and Physiology; Esther M. Sprague, Principal of the Model Department, with Henry Triganowan, Janitor.

During this term, 60 pupils were enrolled in the Normal Department; 14, in the Preparatory Class, and 38 in the Model School; and, during the year first following, there were in attendance, for some part of the year, 219 students, exclusive of the Model School.

This unexpectedly large attendance necessitated the increase of accommodations, and, before the dawn of 1867, a new wing of dimensions sufficiently commodious to supply the existing demands was commenced. Its completion, however, was delayed until 1868, when the finishing touches were added, and the whole turned over to the school authorities. The cost of the improvement was \$20,000, and the dedication occurred on the 10th of September, 1868, at which an address was delivered by State Superintendent Craig, followed with speeches by the Hon. J. H. Rountree, the Hon. Hanmer Robbins, the Rev. Messrs. Parmelee and Pond, Mr. J. C. Cover, Prof. Allen, and Gen. Grant. At that time, the buildings consisted of one main stone edifice, three stories high, fronting forty feet to the south, and seventy feet to the north; west of this was a building, also of stone, two stories high and 40x60, connected with the main building by a stone corridor 32x40, and three stories high. They were of a blue limestone, based well, substantially built, well lighted and ventilated, and thoroughly heated.

The course prescribed by the board is designed to meet the wants of those teachers, who, possessing the necessary scholastic acquirements, yet feel the need of professional training. It consists of a rapid review of the various subjects taught in common schools, with lectures upon the best methods of teaching the same; upon the organization, classification and government of schools; and upon the school law. The elementary course is to fit students to become teachers in the common schools of the State, and consists of a thorough drill in the studies pursued, experimental lectures on methods of instruction and practice in the Model School. The advanced course is designed to fit teachers for the higher departments of graded schools in the State.

These ideas were embodied in the course begun at Platteville, and, in June, 1869, that school graduated its first class, the first of a Normal school in Wisconsin, and was composed of Lewis Funk, Melvin Grigsby, Andrew J. Hutton, Richard H. Jones, James Roit, Edward H.

Edward Cronin M.D.

PLATTEVILLE.

Sprague, Ella Marshall and Alvena E. Schroeder. The school remained under the care of Prof. Allen until July, 1870, when he resigned, and Edwin A. Charlton became his successor, and changes were made in the other departments, as also in the courses of study adopted in 1868. This latter was further altered at the annual meeting in July, 1874, when two courses of study were decided upon to be known as the "Elementary Course," requiring two years to complete, and the "Advanced Course," requiring four years to complete.

In 1873, it again became necessary to increase the accommodation facilities, and a two-story stone addition 26x40, occupying the west front of the corridor, was completed and occupied. This improvement was made at a cost of \$2,200.

From the inauguration of the system, the character of the common schools has been elevated and improved in every particular, to which the influence of the Normal School may be made to reach. The course of study pursued by Normal pupils makes them acquainted with the subject of school economy, and, to some extent, qualifies them to suggest and make such improvements in school appliances as may increase the possibilities of effective work. In short, the Normal School has become an educational center, from which is disseminated information bearing upon the conditions that make a good school possible. In addition to improving the school accommodations, it gives more stability to the profession of teaching, and, in every way, contributes to the means of education available to the student in a degree both gratifying and liberal.

As is known, the Platteville Normal School is accessible to candidates from all parts of the State. Each Assembly District in the State is entitled to eight representatives, and, in case vacancies exist in the representation to which each Assembly District is entitled, such vacancy may be filled by the President and Board of Regents. The candidate is nominated by the County or City Superintendent, must be of sound bodily health and of good moral character, and sustain a satisfactory examination in the branches required by law for a third-grade certificate. These preliminaries being complied with he becomes a student, and, upon the completion of the prescribed course, is entitled to a diploma and the privileges of teaching.

The Normal School at Platteville is to-day considered one of the most valuable adjuncts to the science of education to be found in the West. Improvements are constantly projected and completed, and, at the opening of the fall term, a kindergarten will have been provided, for which an addition to the Main street front was finished during the summer, at a cost of \$20,000. The corps of teachers embraces among the most accomplished and experienced, the discipline is superior, and all things combine to render it all that is claimed.

Since the organization, 684 ladies and 574 gentlemen have been enrolled in the Normal Department; 959 ladies and 1,036 gentlemen in the Training Department; and a total of 172 of both sexes have graduated.

Prof. Charlton remained as Principal until 1879, when he was succeeded by D. McGregor, who has since directed its affairs. The school is divided into six departments: Kindergarten, Primary, Intermediate, Grammar, Preparatory and Normal, requiring a regular force of thirteen teachers and an expenditure of about \$14,000 for its support.

The scholastic year is divided into three terms, the first beginning on the first Tuesday of September and continuing sixteen weeks, the second term commencing on the first Tuesday in January and lasting twelve weeks, and the third commencing on the second Tuesday in April and expiring in June.

The present class consists of 475 students, and the value of the school property is quoted at \$65,000.

THE POST OFFICE.

On March 10, 1829, William T. Barry, Postmaster General of the United States, appointed Maj. Rountree Postmaster at Platteville, and on October 10, of the same year, opened the office in a house within the grounds then and since occupied by this gentleman for residence purposes. There were no mail carriers in those days, and it was only when the Postmaster, or some of his servants visited Galena, that letters were obtained and transported to their addressed in Platteville and vicinity. In 1831, the mail was carried from Galena to Prairie du Chien, in a wagon

via Platteville, twice each week, and was succeeded in 1832 by mail from Platteville to Mineral Point at stated periods. This continued until 1870, when the advent of railroads placed Platteville in more immediate and frequent communication with the outside world.

In 1835, the office was removed from the residence of Maj. Rountree to his store, corner of Third and Main streets, the Major discharging the duties of his position until 1838, when he was elected to the Territorial Council and resigned, to be succeeded by N. W. Kendall, who located the office in his store on Grocery street. He was followed by Sylvester Gridley, who was appointed about 1841, and had the office in his store, where Hodges' Bank now is. Thomas Eastman was the next recipient of executive confidence, serving the public in premises near the present site of Wright's drug store until about 1849. At that time, Dr. James Russell accepted the trust, in a building near Sickles' cigar store. Dr. G. W. Eastman was the next incumbent. The office under his administration being where Hooper's drug store now is, and whence H. Hulburt, Dr. Eastman's successor, removed it to Rountree's Block, corner of Main and Bonson streets. In 1857 Maj. Rountree was appointed, remaining in office until 1861, when he was relieved by James Kelly, who in turn yielded precedence to B. F. Wyne in 1865. That gentleman is still in charge. During the earlier portion of his term of office he occupied the present site of Sickles' cigar store, but in 1879 he moved it to the corner of Main and Third streets, where it still remains, in the first brick building erected in Platteville, and on the same corner to which it had been moved from Maj. Rountree's residence forty-four years previous.

THE PRESS.

Grant County Witness.—The history of journalism in Grant County found expression first in Platteville, at which point the publication of the *Northern Badger* was commenced on Friday July 30, 1840. The paper was a folio of twenty columns, printed in brier and containing a large amount of general information. For many seasons previous, the absence of a newspaper had been noted. It was a matter of surprise that a section of the country with soil, climate, mineral wealth, and other features of excellence rarely paralleled should have so long remained without a press to make known its advantages and sustain its interests. Thomas Eastman, the editor and publisher, designed it to be a concise review of passing events. The political complexion of the paper would take the hue of all parties, and the useful and agreeable would be so united as to insure for it a welcome reception in the family circle. The first numbers contained Congressional and Legislative proceedings; news from different portions of the country and county; a brief epitome of local intelligence, including the announcements that Dr. A. Hill, of La Fayette, Thomas P. Burnett, Dr. Crockwell, Miles Hollingsworth, Cyrus K. Lord and Samuel Lewis were candidates for the Territorial Legislature; Darius Bainbridge, Stewart McKee, of Platte Mills, Robert Langley, of Van Buren, and Norman McLeod for County Commissioners; Ira W. Brunson for the office of Collector of taxes, and William McAuley for the office of Treasurer. Under the caption of "The Broken Head," the *Badger* is "happy to hear from high authority that William Rogers is entirely out of danger, and able to walk out; he could even attend to his labors, but his medical attendant deems labor too early as yet. The legal proceedings, however, are going on, and should the person aggrieved think proper to prosecute the action, in the name of the people, or try a civil suit for damages, the case must come before a jury. If we might offer a word of advice, we would say, keep the case out of court. We have understood, however, that a gentleman of great legal ability has been spoken of as likely to be retained for the defense. Should the case take such a direction, it is probable that our young but highly gifted townsman, B. C. Eastman, will have an opportunity of entering the forensic arena with a veteran adversary in a highly interesting suit. That he will be retained in the pending trial, we infer from the very deep impression he has made on the public mind by his efforts in the preliminary investigation before the Justice's Court." The local department also contained an editorial brevity on "Our Southern Boundary," a notice of "Dr. Burhaus' lectures on the Science of Phrenology," the Illinois election returns, Indiana and Missouri election news, and other notes and comments of great interest and moment to

readers of those days. The advertisements comprehended the Sheriff's "*venditioni exponas*," by Harvey Pepper, Sheriff; B. Roulette, lime dealer; Miss Longsdon, pianoforte teacher; S. McKee, lumber dealer; J. Reynard, tailor; Ben C. Eastman, attorney at law; W. G. Spencer, boot and shoe maker; one or two guardians' notices, and the markets. The miscellanics were made up of a dolorous poem in iambics, under the title "Requiem," and beginning, "I see thee still," running through four verses; "Washington's Ancestors; Aaron Burr; Steam Navigation; A Brave Soldier and Shin-Plasters." The fourth page was also devoted to advertising the prospectuses of the *Northern Badger*, the Philadelphia *Saturday Courier* and *Brother Jonathan*, "the largest and most beautiful newspaper in America," in addition to the arrival of the mails in Platteville, and New York prices current.

Such, imperfectly, is a description of the first newspaper published in Grant County. It was conceived and brought forth in Platteville, where its infancy was rocked, and where it grew in strength and character under the influences of encouragement and genial surroundings. According to all accounts, for the records are missing, it had run the gantlet of a cheerful experience, had put off its swaddling clothes, and become garbed in apparel, mechanically speaking, of the latest and most improved design, when it sickened, and before the remedies usually provided upon occasions of a similarly critical period could produce an effect, stiffened in death. But as the "form" of the journalistic infant lay at its home in the village of Platteville, where it had begun life with such bright promises for the future, its senses closed to the world whence it was passing. A new dispensation, metaphorically speaking, opened the door of the apartment, and, gliding to its bedside, pressed its lips upon the pallid brow, over which the death damp was gathering, and as silently passed out to take up the "stick" and "rule" of its predecessor, and furnish the world and all that therein is with news and notes, under the name of the *Independent American and General Advertiser*. This was commenced as the indirect successor to the *Badger*, early in the year 1845. J. L. Marsh, at present a member of the Fourth Estate at Sheboygan, directing its policy, molding its education, furnishing its mental and substantial resources, and doing all things needful for its advancement and independence. The *Wisconsin Whig*, however, was the immediate successor to the *Badger*, lasting but a short time, and was followed by the *Wisconsin Register*, equally short lived.

In appearance, the *American and Advertiser*, typographically speaking, was a decided improvement over that of the *Badger*. The print was clear, the paper of a superior quality, and very much that had been wanting in the latter was supplied. Every policy that could in any way contribute to the welfare of the Northwest or development of its resources was advocated by Mr. Marsh, and a system of internal improvements for more accessible communication with other portions of the country was urged upon the attention of his readers. The enterprise and spirit of Plattevillians was commended, and such allocutions as the editor promulgated, designed for the encouragement of those who, by their labors and examples, sought to build up the town and its vicinage, thereby promoting the growth and importance of the communities contiguous thereto, fell not upon stony ground. About this time, the system of telegraphy, which has since so universally obtained, was just coming into experimental use, and this, too, was availed of to add to the quantity of information furnished. Mr. Marsh conducted the paper alone until January 14, 1848, when E. F. Bayley became associated, and the firm was afterward known as "Marsh & Bayley." This arrangement created, no change was observed from the course previously pursued. Every exertion was made to render the *American* worthy of patronage, which was as liberally extended as under the former *regime*. These gentlemen remained in charge until 1849, when the paper suspended, and so continued until September 13, 1851, when J. L. Marsh resumed its publication, in outward appearance entirely changed, but the same in principle as when he first launched his journalistic bark upon the tide of time—*independent*.

Typographically, the new issue was a superior specimen of mechanical art, and from his office, in the third story of Moore & Hodges' block, the editor was accustomed to commune with his constituency in a manner both frank and dignified. On the 17th of September, 1852, was

commenced the seventh volume of the journal, still under the editorship of J. L. Marsh, and with increased facilities for consulting the wants of advertisers and subscribers. This and the succeeding volume were edited by Mr. Marsh, but with the opening of the ninth volume, Harlon M. Page greets the reader as editor, and Page & Chatterton, proprietors. Under their administration, the *Independent American*, while not presuming to rival cotemporary dailies, in the extent and variety of foreign and general intelligence, furnished to its readers, in a condensed form, a summary of the world's news. To this was added, for the benefit of farmers and business men, an accurate report of the markets and matters of interest to the commercial and agricultural communities from whom its support was obtained. In politics, the paper remained independent. The firm of Page & Chatterton remained as the published owners of the paper until January 11, 1856, when H. M. Page succeeded to the partnership, and discharged the duties incident thereto, in conjunction with those of editor. This move, it appears, had been for some time in contemplation prior to its being consummated. The expenses of publishing a paper in those days were heavy, and the tight times which are known to have existed about this time greatly augmented an outlay that was disproportioned to the income. These considerations prompted the centering of the responsibilities, which were undertaken by Mr. Page, who promised to maintain the standard of excellence which had been attained as the result of the efforts of himself and Mr. Chatterton. Mr. Page remained in the harness, so to speak, until October 30, 1857, enduring many trials, experiencing few triumphs, when he laid down the editorial pen, and in a few plain words, expressed his reasons for suspending the further publication of the *American*. A period of nearly two years elapsed before further effort was made to establish a weekly journal in Platteville, but on the 26th of May, 1859, the *Grant County Witness* was issued, and has since been attended with a success reasonably gratifying. The venture was first undertaken by Israel Sanderson, who announced his reasons for starting a paper, and the character that the same would bear before the public. It would bear testimony of occurring facts; labor to advance the principles set forth in the National and State Republican platforms; protest against the authority of Congress to give legal existence to slavery in the Territories; maintain the doctrine asserted by the Supreme Court of Wisconsin on the question of State Rights, and advocate the right and reprove the wrong wherever seen. The paper was a seven-column folio, neat in its make-up, containing choice selections of miscellaneous reading, crisp editorials, brief and to the point localisms, and a large number of advertisements. The first eight numbers of the *Witness* were issued from Lancaster, but on July 14, following its establishment, the office was removed to Platteville, as the prospect of self-supporting was considered more gratifying at the latter point than at Lancaster. A year's experience established the truth of this conclusion. By hard labor and close attention to business, a corresponding liberality on the part of the public was begot, and the fact that a paper could be sustained in Platteville was settled beyond a peradventure. For upward of three years, Mr. Sanderson realized this experience.

At the expiration of that period, or on May 8, 1862, he entered into an arrangement with George K. Shaw and Daniel E. Bockius, of Galena, who assumed the management himself, acting as assistant publisher, rendering, as occasion required, such assistance as was deemed necessary. The firm was afterward known as "Shaw & Bockius." During the period when Mr. Sanderson catered to the intellectual appetite of his readers, the *Witness* never failed weekly to visit the homes of subscribers, bringing entertainment and instruction. This, too, at times when business interests had been subjected to great hardships, and suffered therefrom. But the paper passed successfully through these crises, and at the date of its transfer was yielding fair profits to its publishers. Under such auspices, and with such advantages, did Messrs. Shaw & Bockius commence the race with cotemporaries. It was at the most exciting period of the war, but the policy of these gentlemen was such as to commend their efforts to a generous patronage, which was continued during their joint and several management of the enterprise. The partnership lasted until November 5, 1863, when the name of Daniel E. Bockius disappeared from the editorial page. On the 31st of December of the same year, Mr.

Shaw sold out his interest to F. S. Houghawont, who assumed charge on the following day, and began its publication after completing a number of improvements, etc. His lease of authority, however, was short-lived, for with the issue of April 7, 1864, Mr. Houghawont closed his connection with the *Witness*, which reverted to George K. Shaw, from whom the former obtained title in December previous. The new lease of life obtained under the tutorship of Mr. Shaw was both prolonged and mutually beneficial. For upward of five years he had control of its editorial columns, making the paper a respectable and flourishing institution, especially during the gloomy years of the war, and when business stagnation held out no inducements to persevere in the walks of professional life. Mr. Shaw did persevere, however; and by his efforts contributed to swell the population and resources of the county until February 28, 1867. At that date, a sale of the *Witness* was effected to M. P. Rindlaub, for three years previous editor of the *Herald*, at Lancaster; an experienced newspaper man, a practical printer and a gentleman fully appreciating the expectations borne of the successions. For some time prior to his assuming control, the *Witness* had abandoned its independent policy, and came out Republican in politics of the strictest sect. The innovation thus established was adopted by Mr. Rindlaub, and in his views of the situation as set forth in the editorial columns, the syllabus of his predecessor was intensified rather than diminished. In the campaign of 1868, he supported Grant for President, and contributed in a marked degree toward the molding of public opinion in that direction in Grant County. In the winter of 1871-72, Mr. Rindlaub enlarged the *Witness* to its present size, procured a new dress, and completed other improvements, which have been annually added to from time to time, as the necessity occurred, until to-day the paper, which began with so little pretension nearly twenty-five years ago, ranks second to no journal in the State in its influence and character; not alone as the formulator of public opinion and the conservator of public morality, but also as a dignified witness of passing events and the unprejudiced advocate of equal rights to all men.

Der Correspondent—A German weekly issued on Thursdays, and enjoying a rapidly increasing prosperity. In the fall of 1879, Herman Melster, an enterprising and ambitious journalist, previous to that date connected with the *Herald* and *Seebote*, of Milwaukee, conceived the idea of establishing a German paper in Wisconsin, outside the territory tributary to Milwaukee, as the source of all that is good, true and beautiful in knowledge and art. He canvassed the State with care, and finally deciding upon Platteville as a point furnishing the most available advantages for the establishment of a German paper, located here and, on October 19 of that year, in conjunction with Ferdinand Remshogue, issued the first number of *Der Correspondent*. The paper was then, and still is, a folio of eight columns to the page, well printed, attractively made up, and presenting all the features of excellence necessary to success.

The partnership continued until December 18, 1880, when it was dissolved, Mr. Remshogue retiring, since which period Mr. Melster has conducted the enterprise without assistance, and is succeeding beyond his most sanguine expectations.

The *Correspondent* is the only paper printed in the tongue of the "Faderland" in Southwestern Wisconsin, and is steadily becoming a power in the community as the formulator of public opinion and conservator of the sentiment of equal and exact justice to all men. Politically, it is independent, strictly so, without preference for or prejudice toward either of the contesting parties, and, while this is strictly true, the promulgation of an opinion through the columns of the *Correspondent*, from its office on Grocery street, has not been altogether unproductive of results in the politics of the city.

The present circulation is stated at 600, and the value of the enterprise at \$1,000.

BANKS.

I. Hodges' Bank—Organized in 1846 by I. Hodges and L. McCarn, who commenced business in premises on Main street now occupied by the store of D. Wilson. The firm remained here until the spring of 1870, when the building was materially damaged by fire, and they removed to the building at present used as the post office, corner of Main and Third

streets. The same fall, they erected the commodious brick building on the opposite corner of the same thoroughfares, where the business has since been carried on. In March, 1873, Mr. McCarn died, when the firm was re-organized with I. Hodges and O. S. Griswold; this continued until January 1, 1880, when Mr. Griswold retired, since which date Mr. Hodges has operated alone.

The business is that of general banking and exchange, and aggregates \$2,000,000 annually.

W. S. Northrop & Co.—Composed of W. S. Northrop and George W. Eastman, bankers and dealers in exchange, Government securities, etc.; was organized April 1, 1880, and are engaged in a large and rapidly increasing business, amounting to \$1,500,000 per year, principally with the farmers of the township and merchants in the city of Platteville.

SECRET SOCIETIES.

Melody Lodge, No. 2, A., F. & A. M.—The second lodge of Masons established in the present State of Wisconsin was organized on the 15th of February, 1843, with the following members and officers: John Bevans; B. T. Kavanaugh, W. M.; Hugh R. Colter, S. W.; W. C. Fillebrown, J. W.; Servis W. Link, Secretary; J. H. Rountree, Treasurer; Rufus Spaulding, S. D.; John W. Wiley, J. D., and David Rich, Tiler.

The organization was completed, and for nearly a year the lodge worked under a dispensation granted by the Grand Lodge of the State of Missouri. Meetings were convened at first in the hall of the old academy building, but this was only for a short time. The same year, a log building erected by Samuel Moore and brother, on the east side of the public square, was purchased and reconstructed so as to serve the purposes of a Masonic temple. The building still stands, occupying the southwest corner of Block 44, at the corner of Mineral and Bonson streets.

Almost from the start, the lodge prospered; in point of membership and influence, it was rapidly becoming a power in the community, as also of the craft. As a result, the "temple" improvised out of the unpretentious log cabin became of too contracted dimensions and limited resources, and in the winter of 1846, the question of constructing a hall was agitated. This agitation was continuous and earnest, culminating in a decision to erect a building that has since been utilized as the meeting-place for both Masons and Odd Fellows. Samuel Moore, W. G. Spencer and Joel C. Squires were appointed a building committee; a lot was selected at the corner of Court and Pine streets, contracts were concluded with H. R. Beebe, and the cornerstone was laid with impressive and appropriate ceremonies about June 24, 1846. From this time forward, work was diligently prosecuted under the superintendence of Samuel Moore, and during the same year the building was completed and dedicated.

It is of brick, 24x40, the hall being 24x32, handsomely finished and ornamented, costing a total of \$2,200. The upper floor has been used by the Masons, while the first story has been appropriated to the occupation of Odd Fellows, a German Society and other fraternities.

The Lodge worked under the dispensation and charter obtained from the Grand Lodge of Missouri, until January 17, 1844, when it was re-organized, and a charter issued by the Grand Lodge of Wisconsin, with the following officers: Benjamin C. Eastman, W. M.; Lewis W. Link, S. W., and Bennett Atwood, J. W., under the jurisdiction of which it has since worked.

The present membership is about ninety-one, making a total of 308 persons admitted to the lodge, either by initiation or otherwise since its organization. The value of lodge property is quoted at \$4,000, and the present officers are Duncan McGregor, W. M.; W. B. Wyne, S. W.; J. B. McCoy, J. W.; J. H. Evans, Treasurer; A. L. Brown, Secretary; J. McGranahan, S. D.; A. C. Hawley, J. D.; I. M. Gear, Tiler.

Washington Chapter, No. 2, R. A. M.—On or about the 14th of August, 1844, a dispensation was received from the General Grand Chapter of the United States, directed to B. T. Kavanaugh, Moses Meeker, Marcus Wainwright, Ephraim F. Ogden, Thomas C. Legate, William R. Smith, Eleazer Smith, Hugh R. Colter and Charles Knight. The dispensation was to con-

tinue in force for a brief period, and under its authority B. F. Kavanaugh became High Priest, Moses Meeker, King, with Marcus Wainwright, Scribe.

On September 13, 1844, the General Grand Chapter of the United States issued a charter, and, on February 13, 1850, delegates from Milwaukee Chapter, No. 1, Washington Chapter, No. 2, and Southport Chapter, No. 3, convened at Madison for the purpose of organizing a Grand Chapter of Wisconsin, authority for the same having been granted by the Grand Chapter of the United States.

A session of several weeks was held in completing arrangements. The meetings of the chapter, from its organization in the first instance to the present time, have been held in Masonic Hall, at Platteville, on the second Tuesday of each month.

The chapter is at present in a highly prosperous condition, having a membership of seventy-five of the craft and the following officers: John Grindell, High Priest; J. H. Evans, King; and H. H. Virgin, Scribe.

Lilly of the Mound Lodge, I. O. O. F.—One of the oldest lodges in the Northwest, and the sixth in order of precedence in the State, was incorporated January 6, 1846, under a dispensation granted by the Grand Lodge of the United States to the following petitioners: Edward Symmes, J. L. Marsh, A. M. Holliday, J. W. Basye, H. L. Bevans and A. S. Bennett. The lodge was instituted by John G. Potts, and all the above-named gentlemen, constituent members, are deceased, except J. L. Marsh, of Sheboygan. Meetings were convened in the lower story of Masonic Hall, corner of Court House and Pine streets, where, during the period the lodge was working under the dispensation, forty-eight candidates were admitted to membership, and the following served as pioneer officers: J. W. Basye, N. G.; E. Symmes, V. G.; A. M. Holliday, R. S.; J. L. Marsh, P. S.; I. Hodges, Treas.

On the 1st of February, 1848, a charter was granted by the Grand Lodge of the State, to R. Chapman, N. H. Virgin, R. Milton, John N. Jones, A. M. Holliday and Noah Hutchins, with the following officers: N. H. Virgin, N. G.; A. M. Holliday, V. G.; J. N. Jones, R. S.; Robert Milton, P. S., and N. Hutchins, Treas. The society remained in the Masonic Hall until 1858, when it procured accommodations in the third story of James Kellogg's building, corner of Main and Pine streets, which were fitted up and furnished at a cost of \$1,800, and have since been occupied.

The present membership is stated as numbering fifty-five of the craft; the value of lodge property at \$1,200; and the officers to be William Grindell, N. G.; J. L. Nye, V. G.; Philip Eden, R. S.; H. J. Traber, P. S.; and Charles G. Marshall, Treas. Meetings are held weekly, on Friday evenings.

Platteville Encampment, No. 47, I. O. O. F.—was instituted December 6, 1871, under a dispensation granted upon application of Patriarchs B. F. Chase, John Grindell, J. L. Nye, Alexander Butler, B. F. Dugdale, J. M. Guernsey, S. M. Tracy and E. M. Wilson. The first officers were: William Grindell, C. P.; C. H. Nye, H. P.; F. K. Chase, S. W.; S. M. Tracy, Scribe; and Alexander Butler, Treasurer.

The present membership is twenty, and the encampment has a capital of say \$200; with the following officers: H. H. Wright, C. P.; William Grindell, H. P.; T. D. Bass, S. W.; Joseph Weston, Scribe; and C. G. Marshall, Treasurer.

Meetings are held semi-monthly, on the first and third Mondays.

Badger Lodge, No. 6, A. O. N. W.—was organized April 16, 1877, with the subjoined members and officers: W. H. Beebe, G. D. Streeter, E. R. Frederick, A. T. Davidson, H. J. Traber, J. H. Parnell, T. J. Hooper, J. C. Hooper, H. H. Virgin, A. F. Buss, J. T. Munger, H. D. Thiele and G. C. Handy; H. H. Virgin, P. M. W.; G. T. Streeter, M. W.; H. J. Traber, Overseer; J. C. Hooper, Foreman; H. D. Thiele, Financier; W. H. Beeber, Recorder.

The lodge now has thirty-seven members, with the following officers, and meets every Thursday evening in lower Masonic Hall, corner of Pine and Court House streets: Edward Frederick, P. M. W.; H. J. Traber, M. W.; J. T. Davidson, Overseer; Stephen Alger, Foreman; W. Cowduroy, Financier; A. J. Buss, Recorder; and John H. Parnell, Guide.

OTHER SOCIETIES.

The Young Men's Library Association.—A society for social and intellectual improvement composed of the young men and older residents of the city of Platteville, was organized early in the year 1868, and has attained a liberal growth and prosperity. By an act of the Legislature approved February 22, of the same year, A. J. McCarn, John E. Gurley, Richard Carter, Charles H. Allen, A. W. Bell, W. H. Bebee, George B. Carter, J. H. Evans, M. P. Rinlaub, George W. Eastman, Frank A. Hawley, Fay R. Chase, and W. E. Carter, were declared to be a body corporate under the title above designated, with the privileges and immunities appertaining thereto. Immediately upon the passage of the act of incorporation, the association duly organized by the election of W. E. Carter as President, A. J. McCarn, Treasurer, and J. H. Jones, Secretary; 110 shares of stock were disposed of and paid for, a library room was established at the residence of E. W. Thomas; Miss Thomas was appointed Librarian and the collation of books and articles of interest to the literary inclined commenced. This labor has been prosecuted with such vigor and so advantageously that at present the association control a total of 1,300 volumes, the selections embracing the choicest productions of the best authors of fiction, history, philosophy, poetry and the arts, in addition to standard authorities and reference books on these subjects. In addition to these advantages the association has recently provided an annual course of lectures on various subjects, and by this and other means been enabled to contribute to the education and edification of an appreciative and intelligent constituency. The labors of the members have not been without results, as is evidenced by the support extended their efforts and the society promises to fully realize the most sanguine expectations of its founders.

Meetings are held annually on the fourth Monday in January, and the present officers are: J. V. Hollman, President; E. J. Buck and D. McGregor, Vice Presidents; O. F. Griswold, Treasurer and W. B. Wyne, Secretary, with F. A. Chase, M. Sickle, H. J. Traber and W. S. Northrop, Board of Directors.

The Young Men's Catholic Association of Platteville—An association of recent date, composed of the younger members of St. Mary's Church, with the object of promoting literary tastes, Christian virtues and total abstinence from intoxicating drinks. It was organized April 3, 1881, with a membership of fifty, and the following officers, who are still serving, elected: J. C. Cleary, President; J. V. Gardner, Vice President; John J. Barden, Secretary, and E. Schlater, Treasurer, with the Rev. W. G. Miller as Spiritual Director.

Meetings are held alternate Sabbath evenings in the rooms of the Reform Club, the exercises consisting of debates, essays and *brochures* of a literary character.

The Platteville Reform Club.—On the 29th of July, 1877, a movement in behalf of temperance reform was inaugurated at the Congregational Church in Platteville, under the management of Jacob H. Hoffstiller, of Sterling, Ill., and H. W. Rowell, of Rockford, in the same State, both zealous agitators in the cause and reformed inebriates. From this sprang the present club, which was organized August 7 following, at a meeting held for that purpose, at which a committee consisting of W. H. Deffenbacher, J. D. Alford, Silas W. Traber, William Jones and Silas W. Streeter was appointed, by whom a constitution and by-laws were prepared, and the same adopted at a subsequent meeting, when the following officers were elected: A. L. Brown, President; Charles Potter, Vice President; J. H. Robertson, Secretary; B. A. Jacobs, Treasurer, and J. W. Smelker, Chaplain; George B. Carter, Bryon O'Neil and William Martin, Executive Committee; G. D. Streeter, E. J. Bentley and R. J. Huntington, Grievance Committee.

At present, the membership of the club is stated at 200. Meetings are convened weekly, and the following are the officers: A. L. Brown, President; L. J. Washburn, Vice President; J. A. Calason, Secretary; J. P. Sampson, Treasurer, and S. Haw, Chaplain; James Dyer, John Cavanaugh and William Cox, Executive Committee.

Platteville Loan and Building Association.—An association, for the purpose of affording members an opportunity for the safe investment of their savings, facilitate the acquisition of

homes, and for other purposes specified in the charter. It was incorporated under the laws of Wisconsin in May, 1876, by Alexander Butler, H. J. Traber, Hanmer Robbins, W. H. Beebe and A. W. Bell. The officers elected at the first meeting were Hanmer Robbins, President; E. F. Newton, Vice President; C. W. Hill, Secretary, and H. J. Traber, Treasurer. To become a member ownership of stock is necessary, paid for in monthly installments, and thus far 500 shares have been issued.

At present, the association possesses a membership of 200; controls \$16,000 invested in first mortgages on real estate, and has \$536 in cash.

Meetings are convened annually on the third Wednesday in May for the election of officers, and monthly on the third Wednesday for the transaction of routine business.

The present officers are Hanmer Robbins, President; E. F. Newton, Vice President; G. M. Guernsey, Secretary, and H. J. Traber, Treasurer.

Legal Benevolent Society.—An association of Germans organized in March, 1867, as the name would indicate, for benevolent purposes, by Conrad Sander, Hans Spalth, Henry C. Miller, Ernst Johnson, Christian Fosz, Christian Peterson and Henry Fosz. The initiation fee was placed at \$8, and the annual dues at \$6. Members receive \$4 per week during sickness, and upon their death in addition to \$40 for funeral expenses, the widow was paid \$4 per month for herself, and \$1 each for children under fourteen years of age for the same length of time. But these regulations have since been changed, the widow or family of deceased now receiving \$500 in lieu of monthly allowances. At first the society held meetings in a hall in Rountree's building on Main street; but of late years their convocations have assembled in the Masonic Hall. The charter officers were Hans Spalth, Baron; Ernst Johnson, Vice Baron; Conrad Sander, Treasurer, and Henry C. Miller, Secretary. The present officers are Conrad Sander, Baron; Christain Fosz, Vice President; Jacob Karman, Treasurer, and Henry Meilhopf, Secretary.

MANUFACTORIES.

Laftin & Rand Powder Company.—The manufacture of gunpowder was commenced in a primitive way during the reign of Edward III, of England, about 1345, but not thoroughly established until the reign of Queen Elizabeth, when the improved art was brought from Flanders by Evelyns. Some authors contend, however, that Bartholobus Schwartz discovered this explosive in the year 1320, and that it was used by the Venetians during a war with the Genoese in the years immediately succeeding. George Evelyn, grandfather of the celebrated Sir John, had mills at Long Dulton, near Kingston, in Surrey, and at Leigh Place, near Godstone, in the same county, and these seem to have been the first of any importance in the British kingdom.

The manufacture of gunpowder in the United States is nearly as old as the Constitution, and is chiefly confined to the Northern and Middle States. In the fall of 1848, F. A. Stowell and E. H. Stowell, accompanied by D. Marble, wandered West from the "stern and rock-bound coast" of Maine, in search of fortune and its inseparable companion happiness, believed to be hidden with the fountain of youth among the hills and vales, landscaped on the hither side of the Alleghenies. They visited Platteville, and after examining the advantages of a position with a view to that end, decided to locate a powder-mill. After some negotiation, the property formerly known as "Griffith's saw-mill," on the Little Platte, about one and a half miles northwest of the present city, was purchased as a site, upon which buildings were erected, and the mill fairly put in operation during the summer of 1849. The improvements completed by these gentlemen were, from all accounts, of rather limited capacity, sufficient, however, to perform the work necessary, and nothing beyond the daily routine is supposed to have occurred until the summer of the year following. One day in July, J. R. Marble, who was employed in the packing-house, contracted an engagement with Dr. Hayes and the Misses Vineyard for an afternoon's ride, and proceeded to the mills for the purpose of concluding some work upon which he had been employed prior to his accepting the invitation. The day is represented to have been the exact counterpart of a day in April. The sun shone brilliantly at times; at times obscured by clouds from which a passing shower would be distilled, lasting but an instant, when they would once

more open as the gates of paradise, amid which the god of day, smiling through tears, was revealed, and causing the foliage of trees that lined the village streets to sparkle in regal magnificence. Suddenly, and without any premonitory sign, a dull, smothered, as it were half-suppressed report, like the mutterings of distant thunder, was heard, and the residents, for miles around, instinctively knew that an accident had happened at the mills. A multitude of citizens hurried to the scene, and realized the truth of their apprehensions in the destruction of the packing-house, the debris of which was scattered far and wide, as also were the remains of the unfortunate victim, who was within the walls of the structure, when the accident occurred. A few fragments of his mutilated anatomy were gathered together and decently interred; the premises were rebuilt, and business resumed by the surviving partners. They remained in charge until the fall of 1854; neither accident nor incident happening during that period to disturb the usual current of events; when E. Bayley purchased a half-interest in the venture, the success of which had by this time become assured. He retained the control of his moiety until the following spring, when a sale was affected, and the firm was known as Stowell, Turck & Co., being composed of E. and F. Stowell, and Solomon and John Turck. Some years later, Dwight Laffin, S. H. Laffin, F. Laffin and Solomon A. Smith purchased control; and, in January, 1867, the Laffin & Smith Powder Company succeeded to the ownership. This continued until 1869, when the Smith Powder Company and the Laffin Powder Company consolidated, and the establishment has since been conducted as the Laffin & Rand Powder Company, being composed of the Laffin brothers, A. T. Rand, Sol A. Smith, Jr., the Smith heirs, and S. and J. Turck, with A. T. Rand, as President; Edward Greene, Secretary and Treasurer; and E. F. Newton, Superintendent.

The company now own a tract of 175 acres, of low, seemingly unreclaimed land, rather thickly overgrown with trees and tangled vines, one of those neglected spots where everything has so long been permitted to have its own way that even a bold cultivation might well pause before it in despair. A rank vegetation overspreads the valley, for the place is a valley of awful possibilities, in savage exuberance, defiant almost of human efforts to accomplish its subjugation. Trees innumerable cluster along the banks of the Little Platte, which creeps its way sluggishly to the Father of Waters. Occasional oaks and sycamores display their superiority, while here and there green foliage of a cedar or pine crowds its way upward into the sunlight, rejoicing in its privilege and in its thrift. Bushes flourish in impenetrable masses underneath, while overhead vines are interlaced and clamber from tree to tree in vigorous luxuriance, reveling in the enjoyment of weaving their fantastic draperies undisturbed. Scattered about the valley with an air of carelessness, as it were, but really with an eye to security, are the buildings wherein the destructive combustible is "incorporated, pressed, corned, dried," and made ready for market. The buildings are low, unpretentious structures, built as cheaply as comports with durability and convenience, partially of brick and partially of frame, and bearing the impress of the business for which they have been erected in the sooty stains traced upon their sides. At a distance from these are the furnaces for the manufacture of coal; near by is the superintendent's office, past which a roadway meanders to the river, over the hills, out into the sunlight, to the city. Near the banks of the river stands the engine house, and equi-distant between the cylinder mills is a stone building where the steam is distributed to run the machinery, dry the powder, and for other purposes. Taken altogether, the place, if failing to present an altogether forsaken appearance, would hardly be selected as the scene of a picnic or hustings.

The gunpowder manufactured by this company contains 75 per cent of niter, 14 per cent of charcoal and 11 per cent of brimstone, and the preparation and mixing of these ingredients require a knowledge, judgment and caution almost equal to that employed in the presentation of an intricate chancery plea. The charcoal is distilled from willow and what is known as the "Quaking Aspen," which is readily obtained in the vicinity, stripped of its bark and corded up to undergo a process of seasoning. This requires several months, and the supply constantly on hand can be easily measured. When the seasoning is concluded, immense quantities of it are taken to the furnaces and stacked within the retorts, each 12x14, constructed of brick, with apertures in the side, through which the steam and smoke escape. The fires are then lighted,

and the mass is left to burn slowly until it is sufficiently baked, when the drafts are closed and sealed, and the "grist" remains until it is required at the mills.

The refinery is of frame, 20x30, containing the constituent parts of powder, i. e., charcoal, niter and brimstone, and is also used for weighing the same and tempering the saltpeter. This latter, as is well known, is peculiarly susceptible to moisture, and until this dampness is eliminated, the essential feature of gunpowder cannot be ground, or incorporated with the charcoal and sulphur. To overcome such an immeasurable impediment, an adjoining building is supplied with a furnace, upon which rests a huge iron pan 6x12, capable of accommodating one thousand pounds of niter. In this the latter is placed, where it is stirred and manipulated for a certain length of time, when every particle of saltpeter is cleansed and dried ready for weighing. These preliminaries having been disposed of, the component parts are carefully weighed in canvas bags, placed on a car, which moves noiselessly over a narrow-gauge railroad track to the cylinder rooms, distant fully a quarter of a mile from the furnaces and refinery.

The cylinder mills are two in number, each one-story frames, 20x30, and are really the most dangerous points that can be encountered by a visitor to the works. Each of these mills contain ten cylinders $2\frac{1}{2}$ x7, and containing sufficient power in the composition for the destruction of a city. In these cylinders the incorporation or thorough pulverization and mixture of the ingredients is accomplished. The manner of doing this is as follows: Each of the cylinders is charged with four hundred pounds of the composition and set in motion, revolving at the rate of fourteen revolutions per minute, and running from forty to fifty hours. The composition is crushed by means of two hundred and fifty pounds of copper bullets, which, falling from side to side with the composition at each revolution of the cylinder, resolves it into dust fine as flour. By the old process of "crushing," wheels were employed, and two hours only were occupied in its incorporation. But if left ten minutes longer than long enough, the rollers, instead of traveling over the mass as they should, were apt to push it along in front until at last the iron roller would strike the iron bed, when there is a noise and the mill "went up." The process in use by the Laffin & Rand Company avoids this imminent danger; and, while, as the Superintendent observed, danger at the works was measured by the proximity of objects and the curious to the cylinder mills, the same is by no means as unavoidable as formerly. When the composition has been ground up and thoroughly incorporated as described, it is removed from the cylinders and placed in tubs preparatory to removal to the pressing rooms, distant about one thousand feet. Cars are the means of conveyance employed, not only here, but in communication with the graining, drying and packing departments. The powder, when taken from the cylinders, is exceedingly fine, of a uniform dark-gray color, and free from glittering particles of sulphur, or specks of any sort.

The pressing room is also of frame, of dimensions similar to the cylinder mills, furnished with an hydrostatic press of great strength and power. Here the crushed powder is pressed into cakes in the following manner: The operator takes a copper sheet about two feet square and a piece of canvas of the same size, a quantity of powder about an inch in depth, shaped and measured by a wooden frame, is laid upon the canvas, then another canvas and another copper, and so on, the process being repeated until a mountain of powder sandwiches at least three feet in height is produced, when the operator, finishing with a copper sheet, pushes the frame upon which this pile rests carefully until it stands directly beneath a screw of the hydrostatic press which is set in motion, and so continues until resistance of the mass beneath exceeds the power brought to bear upon it, when the press becomes motionless; in a few moments, however, the settling of the powder relieves the pressure, when the power again becomes preponderant, and the screw makes another turn or two with a slow, grinding, painful sound, suggestive of the instruments torture the Inquisition gave birth to. This alternation of rest and motion continues for about two hours, when, every particle of resistance having been crushed out, the power is relieved by reversing the motion of the press and sliding the frame back to its first position. The copper sheet is raised from the top, the canvas stripped away, and the first layer of powder taken out in a thin, solid cake, technically known as press-cake. The operation of pressing preserves the powder and prevents

its deterioration. The power of gunpowder, assert works on the subject, depends upon the rapid evolution of certain gases from it while in course of combustion, and the effort of these gases to escape from the gun-chamber where they are combined is what carries the ball to its mark; the more rapid the combustion, the greater evolution of gas at a given instant, and mill-cake powder burns as much more rapidly than pressed powder as shavings do than a block of wood. From the press-room the cake is taken to the graining house.

The graining house is at the usual distance from the remaining buildings, and is supplied with ten cylinders with a capacity of twenty-five kegs of powder each. Upon the cake reaching this department, it is subjected to a grinding process, being run through cog-wheels supplied for that purpose, which, with the cylinders, are propelled by water-power. From between these cog-wheels, the powder falls upon a horizontal wire screen, to which a constant lateral motion is imparted, so that the finer particles are shaken through upon an apron which carries them in one direction, while the coarser ones remaining upon the screen are thrown off and submitted to another crushing process. They are then placed in the cylinders, which are revolved in a moderately swift manner, resulting in a certain degree of polish to the powder, the abrasion of the sharp corners and edges of the grains fitting it for closer packing, and more direct contact when fired. It is then run through a separator to size and graduate the grain, placed in barrels and wheeled to the drying room on the extreme point of the semi-circle in the form of which the buildings are ranged.

The drying room is of brick, 20x40, where the powder receives its finishing touches, and from the excessive heat necessary to that end, the explosive does not seem half as dangerous a substance, after all, as most people think. Here it is arranged in wooden trays, with paste-board bottoms, ranged in layers eight or ten feet high, and for seventy hours undergoes a seasoning process, through the agency of hot air generated by a furnace located some yards distant. By this means the last particle of moisture is eliminated, the saltpeter and sulphur are reduced to fusion, and the grain is protected from attracting moisture, even in a very humid atmosphere. In addition, the strength of the combustible is increased and its energy improved. When the drying is completed, the powder is run into kegs, labeled, conveyed to the magazine, a mile off, in covered wagons, where it is kept in stock, as a marketable commodity.

Accidents.—In so critical an enterprise, a description of which, imperfect though it may be, is submitted, the public will appreciate the fact that accidents are not altogether unavoidable. That they have not been more numerous and disastrous, is due almost entirely to the care taken and diligence exercised for their prevention. The workmen are men of experience and judgment, and not only their comfort but their safety demands the caution characteristic of their service. For example, every particle of powder must be removed from their person and clothing before running the chance of ordinary life at home, and every one of them takes a thorough bath, and changes every article of clothing, before leaving the mills at night. Their working clothes never leave the mills at all, and their home-clothes never come any further than the wash-house. Their shoes are without iron pegs, the "tools" used are selected because of their safety, and all things combine to render the hazardous undertaking as devoid of danger as possible. Yet in spite of these attempts at prevention, accidents have occurred.

The first has already been noticed, and the second occurred on the night of Monday, November 7, 1870. This occurred in the cylinder mill. Materials for about 200 kegs of powder were in the cylinders, and with the exception of the water-wheel and a portion of the flume, not a vestige of the building or machinery was left. The charred fragments were thrown in every direction, and many of the copper balls in the cylinders were found a mile away. In one of the workshops a clock was hanging against the side of the building, secured by an iron strip. The explosion caused it to tilt forward, and stop at the hour the explosion is supposed to have occurred—a quarter past 10. The damage sustained was estimated at \$5,000. There was no loss of life.

On Friday morning, February 8, 1877, the coining mill blew up instantly, killing Mr. John Stout, who was therein at work. At the time there was in the neighborhood of 250

kegs of powder in the department, a great deal of it, however, in cakes and slightly damp. No one knows how the powder ignited, as there was no fire about the building. E. F. Newton, Superintendent of the works, and David Griffin, foreman of the mills, were on the ground, but cannot account for the calamity. They first saw a light flash through the windows and cracks of the mill, followed by a succession of explosions, a few seconds later. The sides of the building were blown out, the roof distributed around promiscuously, but, strange to say, the machinery remained standing just as it belonged, and continued operations until the water gate was shut down. The body of Mr. Stout was found outside of the mill, partly lying in the water, with every particle of clothing stripped from him, except his stockings and boots. His hair was singed off, his ears shriveled up, and the general appearance of the body as though it had been roasted. Loss to building and materials quoted at \$3,000.

On November 8, 1877, the press mill blew up, and James N. McGranahan, who was washing in the bath house, narrowly escaped death by plunging into the mill-race. As it was, however, he sustained serious injuries, but recovered and resumed labors at the mill. The loss to the company by this explosion was \$2,000.

On Monday evening, September 16, 1878, the most serious explosion of any that had previously been experienced, occurred. It was so loud and startling that many citizens of Platteville thought it had occurred on their own premises. They were not long in determining the cause, for soon a dense black cloud of smoke rose up over the powder mills. Hundreds of citizens, and also many from the surrounding country, flocked to the scene of the explosion. The dry and packing house, containing 900 kegs or about 22,500 pounds of powder was found to be a total wreck; scarcely a stone or a piece of timber of which it was constructed, including the foundation, was to be found on the place where it had stood. All the buildings belonging to the company were more or less injured, and the wash-house, house for drying lumber, keg factory, coining mill, old keg factory, old sorting room and store room were completely destroyed. One of the cylinder mills was considerably damaged, also the press and saltpeter houses. The coining mill, standing at least 200 yards from the dry-house, was nearly as badly damaged as it was at the time it exploded, and Mr. Stout was killed. The wash-house stood about 300 feet from the dry-house, and was knocked to pieces. Here is where Mr. James McGranahan, the same who was so badly injured when the press exploded the previous winter, was at this time. He was stripped, taking his usual bath after his day's work. His cries were heard, and those who happened to be in the vicinity rushed to his rescue. He was so completely buried in the debris that it was with difficulty he was taken out. He was very badly cut upon the head and shoulders, and sustained bad wounds on the thigh. Daniel Schaffer, in company with some other workmen, were at work near the coining mill. While the building was all knocked to pieces none of them were injured. Mr. Tappes was with his team near the charcoal towers. The horses were stunned so that they fell down and the wagon was upset. Jacob Kramer was in the old store house, and is somewhat injured about the shoulder. Henry Dobson, the engineer, was in his house just across the Platte, about 200 yards from the dry-house. His wife had just awakened him to eat his supper, previous to taking his place at the engine for the night, and he was seated at the table when the explosion took place. He was thrown completely out of the chair to the floor. His wife was in the next room and she was thrown to the floor. The house was badly riddled, the windows being all blown out and the plastering knocked from the walls and ceiling. One large rock, weighing about one hundred pounds, was thrown so that it entered the side of the house, just below the window, and, striking the floor, bounding so that it went out at the other side of the house near the ceiling, and dropping about fifty feet from the house. The bedstead was broken, and the chair which had been vacated a moment before by Mrs. Dobson was shivered to pieces. George Dobson was in a building a few rods from his father's residence painting kegs. The side of the building was blown out, and the paint-keg tipped over on him, completely covering the side of his face. The trees for several hundred yards were stripped of their leaves, and one tree which stood more than one hundred yards from the building was blown up. Daniel Schaffer lived in the large white house on the hill, not more than 400 yards

from the scene of the explosion, and the windows and doors were nearly all blown out. Some of the furniture was moved and much of the plastering knocked off. A number of window panes were broken in Mr. Colman's house, also in Mr. Gollmer's house. The chimney on B. A. Jacob's house, nearly half a mile from the mills, was knocked down. A telegram was received the same evening from Warren, forty miles distant, inquiring whether the powder mills had not exploded, the shock, no doubt, being heard and felt at that place. The cause of the explosion is not known. Mr. Smith, who works in the packing house, had left it just an hour before, and stated that everything was all right when he left.

The loss to the property was \$10,000. Just previous to the explosion, J. L. Rewey, in company with Mr. Frank Newton, the superintendent (to whom the writer hereby tenders his acknowledgments for courtesy and a safe conduct), had been inspecting the works and were resting at the office. "There," observed Mr. Newton, "you've seen all there is to a powder-mill except an explosion, but if you desire one I've only to know it to ring up the curtain." Before Mr. Rewey was able to respond, the explosion occurred, but, aside from a severe shock, he escaped injury.

The investment is regarded as representing a valuation of \$25,000. A superintendent and sixteen men are necessary to the proper conduct of the mills, requiring an expenditure of \$1,000 per month for wages alone, and forty thousand pounds of powder are turned out in the same period.

The present officers are: Solomon Turck, President; A. W. Higgins, Secretary; Edward Greene, Treasurer; R. H. Collier, manager of this department, and E. F. Newton, superintendent. The company have also works at Kingston, Newbury and Schaghticoke, New York; Wayne, N. J., and at Pottsville, Scranton and Carbondale, Penn.

Alexander Butler's Carriage and Wagon Factory—Is located at the corner of Pine and Third streets, and an establishment wielding an important influence in the prosperity of the city. Prior to 1850, a mechanic named Mahaffey carried on a wagon-maker and repair shop in a small frame building near the site of the present brick structure. How long he had been there at the date of which mention is made, or the extent of business transacted by him, is not only not of record, but beyond the memory of the proverbial oldest inhabitant. Along in 1851 or 1852, Calvin Russell purchased Mahaffey's investment and good will and succeeded to the business. During his ownership, he erected the frame building now occupied as a paint-shop, opposite the brick structure, employed eight hands and worked up a prosperous trade, his manufacture, it is said, consisting of two hundred vehicles annually. In 1863, Alexander Butler, who had been for some years in the employ of Mr. Russell, purchased his employer's interest, and has since managed the enterprise. After six years of diligent enterprise, Mr. Butler found the premises transferred to him as too small to accommodate the demands of his increasing business, and, in August, 1869, he contracted for the edifice, which at present is devoted to the manufacture of stock. It is of brick, forty feet square, two stories high, and furnished with machinery and appliances adapted to the line of business carried on within its limits. It cost a total of \$3,000, and fully meets the requirements its erection was intended to provide. Mr. Butler is largely engaged in manufacturing running gear of all descriptions, as also in repairing, and when running to its full capacity his manufactory requires the services of ten hands, turns out 175 vehicles annually and does business to the amount of \$25,000 per year.

Hawley & Son Carriage Factory.—The present flourishing business conducted by these gentlemen originated with the senior partner nearly forty years ago, when, as a member of the firm of Lane & Hawley, he began the business of framing wagons and sleighs on Main street, in the village of Platteville, where P. D. Hendershot's harness-shop now is. As can readily be imagined, elegance of design and finish in those days yielded precedence to strength and durability, and the fact that settlers and miners, as also those who "teamed" over the unbroken prairies or almost impassable roads, realized their demands in that behalf, is to be found in the success which is said to have attended their efforts. The firm continued in existence until the spring of 1847, when P. B. McEntire purchased the interest of Mr. Lane, and was substituted

in his stead in the management of the concern. When the negotiations in this behalf were concluded as cited, the improvements of the firm, which have since their erection supplied every demand, were contracted for, and in the following year became a part and parcel of improvements then made in the growing and prosperous village. The main building is of brick, 24x30 feet, two stories high, and, with the additions made in 1859-69, presents an appearance both attractive and convenient. In 1855, Mr. Hawley acquired title to McEntire's moiety by purchase, and for twelve years carried on the business *solus*. In 1867, F. A. Hawley was admitted to an interest, the facilities for manufacture were increased, and business appreciated proportionately. The latter is still a partner in the enterprise, and, in 1871, took charge of a branch house established during that year at McGregor, Iowa, at an expense of \$12,000. The manufacture of the firm embraces every description of wheeled conveyance, from a light trotting wagon to a mineral "float," and when operated to its full limit furnishes employment to thirty-three hands, and enjoys a trade represented as worth \$30,000 per annum, in all sections of this portion of the State.

Genesee Mill was built in the spring of 1857, by N. H. Virgin, and is located on the Little Platte, two miles from the city, by the road hence to Lancaster. Joseph Teasdale was associated with Mr. Virgin in the undertaking, and the premises were of the same dimensions, capacity and power, as the mill on Rountree's Branch, save that it was supplied with three runs of stone. In 1864, Julius Augustine purchased the interest of Mr. Virgin in the premises for \$7,500, conducting it until 1869, during which interim he became sole owner. In the latter year, he sold to Stephen Carhart for \$10,000, who run the mill a year, when it passed into the control of Burley Jacobs. That gentleman completed some improvements, and managed the concern until 1879, when it was sold under foreclosure proceedings, J. C. Holloway being the vendee. Since this transfer, the establishment has been operated at intervals, but is now idle, and is for sale.

Virgin's Flour Mills—Located on the road from Platteville to Galena, and in sight of the former city, were established in the fall of 1838 by the organization of a firm for that purpose, composed of J. H. Rountree, N. H. Virgin and Neeley Gray. Previous to that year, the inhabitants of the country comprehended within the limits of Platteville Township and the territory contiguous thereto were, in a large measure, dependent upon the product of a mill of limited capacity, at a distance of seven miles from Platteville settlement, operated by Stewart McKee. In the spring of 1839, Rountree, Virgin & Gray began the building of their mill with materials hewed out in the woods the previous winter. But slow progress was made during the summer and fall, and work probably suspended during the winter. At all events, the structure was not completed until the spring of 1840, and operations were postponed until fall, it being late in September before they began grinding corn. The building then was of frame, 36x40, three stories high, and supplied with two runs of stone driven by an overshot water-wheel. The capacity was 150 bushels every twenty-four hours. In 1843, Mr. Rountree withdrew, and the firm became Virgin & Gray, and so continued until 1849, when Mr. Gray retired and Mr. Virgin succeeded to the entire ownership. The old mill served the purposes for which it was erected for nearly a quarter of a century, or until 1863, when it was razed and the present edifice erected in its stead. It is of the same dimensions, power and capacity as its predecessor, owned and operated by N. H. Virgin, and cost, with improvements made upon the original design, a matter of \$10,000. The mill is worked continuously, requiring the services of two men, with an extended trade throughout Platteville and adjacent townships, and is valued at \$25,000.

The McKee Mills—An old landmark which flourished when the genial climate, fertile soil, virgin forests, lovely streams and majestic hills of Grant County first furnished a rich and varied feast to the enterprising settler who came to avail himself of such privileges. In 1833, Stewart McKee, an energetic Irishman, visited the present city of Platteville, designing to locate a mill site and establish a residence. His trade was that of a millwright, in which capacity he was employed by the Gratiots and others of St. Louis and vicinity. Immediately prior to his advent into Grant County, he erected a mill at Shoal Creek, Ill., for the Rev. Samuel

Mitchell, father-in-law of Maj. Rountree, and upon his arrival in Platteville was aided by that gentleman in selecting a mill site on the Little Platte, at a point in what is now Harrison Township, about five miles southwest of the city. This being accomplished, McKee "put his shoulder to the wheel," and, before the season of winter had come with its mantle of spotless white, erected a saw-mill of limited dimensions and measured capacity, and began operations. At the time of which mention is made, settlers who had fled before the advance of Black Hawk into the wilderness, and emigrants who were attracted hither by the promise held out in the lead mines, as also in the waste of prairie lands, began to "come in," and McKee was kept constantly busy in supplying the demand for lumber from all portions of the Territory. The frame "shanty" and cabin, the "chinks" of which were filled with "mother earth," have long since given place to the luxurious farmhouse or the elegant villa, from a design by architects of national repute; the people who gave them birth alone remain. They have won the heritage they to-day enjoy, and cultivating it with industry and wisdom, yet find time to legislate for the common weal and protect the common interests. The men of the type of McKee, who first settled in what crystallized into Grant County, are familiar to posterity as examples of virtue and ambition worthy of emulation. Men who, in war and peace, have been prominent, who have attained distinction in the camp and council, and whose reputations, too universal for appropriation by county or State, have long since become national.

In 1834, the existence of McKee's mill had been disseminated to the furthest inhabited point of Iowa Territory, and his services were employed day and night to supply the wants of miners, farmers, builders and all others who began or contemplated improvements. Among the works that this mill furnished material for was the old capitol building at Belmont, the first frame building erected in Platteville, and those which followed in its wake. In 1836, Mr. McKee increased the capacity of the mill and supplied it with a "corn-cracker," and added the manufacture of "grits" and corn meal to that of lumber. About this time, he leased the property for one year to Adams & Co., which firm did an immense business, but, at the expiration of that period, resumed control and maintained the same until 1858.

During his early residence, the health of Mrs. McKee was precarious, and she returned to St. Louis to die. Prior to 1840, he married the Widow Deselhorst, of Elk Grove, but, it is reported, separated from her, and in after years made another matrimonial venture with happier results.

In 1858, or thereabouts, he discontinued his connection with the mill, which he disposed of to George Marshall, and returned to St. Louis, but subsequently removed on to a farm near Belleville, Ill., where he died, it is believed, ten years ago. His family, as editors, army officers, and in other lines of life, have acquired a reputation throughout the West, and the name in Grant County will ever be associated with the old mill on the Little Platte.

The last one to operate the undertaking is believed to have been a man named Zimmers, as lessee. But this was many years ago. Since then, the mill has gone on its pilgrimage to oblivion. Those who founded and supported it—very many of them, indeed—with tired lids and weary frames, have floated calmly out on the ocean of rest. The youth of to-day, standing in the Louvre, can gaze upon the Venus of Milo with feelings of rapture, but the old settler looks back on the old mill as the wanderer recurs to pleasant pastures and sweet waters, and while they live, that pilgrimage will never reach its destination. The ruins still survive the hand of Time, being located on lands owned by R. Wilmers, in Section 24, and, though covered with the growth of rank vegetation and rapidly obscuring from sight, will always be remembered and referred to as "an old landmark" worthy of a better fate.

Bass' Mill is located on the Little Platte, about three miles from the city in a south-westerly direction, where it was built by N. W. Bass in the fall of 1847. It is of frame, 30x40, two and one-half stories high, and was erected at a cost estimated at \$4,500. In the day of its building, mills that would furnish the luxury of bolted flour to consumers were limited in number throughout this portion of the State. McKee's corn-cracker on the Platte further south still afforded accommodations, but the Bass mill was, comparatively speaking, a "new dispensa-

W. P. Rindlaub

PLATTEVILLE.

tion" to farmers and producers in Grant County. The machinery, which has since been exchanged for that more modern, was brought from New Orleans, and was cumbersome, inelegant and imperfect, though the culmination of mechanical skill for the times in which it was constructed.

Mr. Bass operated the mills for many years, and the two runs of stone with which the premises are equipped furnished the immediate necessity, at least, with their supplies of flour and meal. In time, it came into the possession of Henry Pearce, who directed its interests for a season, when the mill was returned to its founder, who still owns it, though the same is rented and operated by F. C. Folts. During the fall of 1880, the old machinery was removed and that of the latest and most improved pattern substituted and other changes completed, which have enhanced the value of the property.

The present capacity is estimated at 160 bushels of grain per diem.

J. Cheever's Mill.—Located on the old Potosi road, though within the limits of the city of Platteville, was commenced by Mr. Cheever, in September, 1859, and completed during the following May. Originally it was 32x18 and two stories high, but in 1865, an addition 14x32, and in 1866, a further addition 8x32 was completed, making the improvements commodious and convenient, and costing, altogether, between \$3,000 and \$4,000.

As first furnished, the mill was supplied with two runs of stone, but at present, its capacity in that connection is reduced one-half, and will now grind fifty bushels of wheat or corn daily. In April, 1881, the premises which include the mill proper and forty-three acres of ground were sold to H. B. Phillips, of Independence, Iowa, for \$2,000, since which date, the vendee has operated them.

Platteville Woolen Mills.—This property, which is located at some distance from the city, was originally owned by Fairchild & Davis, and was, with a saw-mill, burned early in the sixties, and re-erected in 1865, by N. W. Bass, who has been a resident of Grant County since 1865, and owns 378 acres of ground in connection with the mill.

The premises are of frame, supported by a stone foundation, and are supplied with every requirement of the business. The manufacture includes all grades of woollens, blankets, flannels, etc., and disposes of his product through agents in the surrounding country. Eight hands are employed in the manufacture at weekly wages of not less than \$100; his annual sales aggregate \$25,000, and the investment represents a valuation of \$15,000.

Snowden's Foundry and Machine Shop—Located on Second street, between Rountree and Cedar streets, where it was erected in 1849, by R. & G. Snowden, and is claimed as the pioneer foundry of this portion of the Northwest, there being nothing of the kind at Dubuque, and but one of extremely limited resources then carried on at Galena. There was need of such an establishment in Platteville at the time, and this need was supplied by the Snowden Brothers in the building of their business headquarters. The premises are of brick, 25x36, one story high, and, though apparently of measured capacities, has been found equal to every requirement. The business comprehends the building of steam engines, water-wheels, both turbine and over-shot, mining and other pumps, patterns, mill, house and general building castings, etc., and furnishes employment to five hands when worked to its extreme limit. The trade now is confined to Grant and adjoining counties, being principally of a local character, but notwithstanding, this is valued at \$12,000. In former times and before mechanical enterprises found expression in neighboring towns and cities, the "Snowden Foundry" was known from Milwaukee to St. Paul, and its capacity taxed to the utmost, but since then, new dispensations have come in and taken root, its business, as stated, is of a local nature.

R. Straw & Co., Furnace.—One of the oldest furnaces in the county is located on the Dubuque road, in the southwestern portion of the city, and is in constant operation. It was first built in the spring of 1838, by Leonard Coates and James Vineyard, who were prominently identified with the early settlement of Platteville, and closely allied with the several improvements in the present city each successive season gave birth to. The furnace was 20x40 in dimensions, supplied with one shaft and capable of smelting two "shifts" of mineral per day.

It was constantly resorted to by miners, and its fires, like those in the temple of Vesta, were never permitted to become extinguished—that is, precious seldom. Coates & Vineyard carried on the business of smelting at this furnace for about four years, when they disposed of their respective interests to O'Hara & Hopper, for a consideration of \$4,000, and relinquished the pursuit of wealth by that route. The vendees took possession and conducted operations until say, 1846, at the expiration of which period they in turn sold to Leonard Coates, Robert Chapman and Henry Snowden, the latter, however, never becoming actively interested. These gentlemen made some radical improvements in the building, and increased its capacity by the erection of a second shaft, at a cost of \$1,500. The new firm, with these increased facilities for the convenience of miners and the public, attracted a large patronage, and in the four years during which they had charge, did an immense business. In 1848, Mr. Coates assumed entire ownership and charge of the venture, which he ran until 1851, when the title to the premises became vested in Straw, Spensley & Staley, who paid \$1,800 for the privilege. Later the junior partner met his death by accident, and Straw & Spensley succeeded to his interest, becoming sole owners, so remaining up to the present time.

The furnace, is at present operated, possesses a capacity for two shifts, or sixty pigs of lead, each weighing seventy-two pounds, and requires the services of two men to conduct successfully.

The weekly yield is three hundred and fifty pigs of lead, which are consigned to Chicago, and the value of the investment, with improvements and appurtenances, is estimated at \$5,000.

Rickard's Machine Shop.—Located at the east end of Mineral street, where it is conducted by John and David Rickard, the manufacture embracing machinery and the line of articles usual to the business. The firm began operation about 1860, on Furnace, near Mineral street, under the name of Rickard & Son, when they engaged in jobbing, the building of engines, saw machines, fan blowers, turning lathes, etc., and there continued until 1874. In that year, the name of the firm was changed to the present style, and the foundry was removed to its present locality. When running to its full capacity, the firm employs four hands, at a weekly compensation of about \$60, and does business annually estimated at \$2,500. Lately it has been engaged in the manufacture of the Gratiot Patent Heater, invented by a resident of Platteville, and designed to draw the moisture of wheat from the kernel to the surface, rendering the flour less liable to deterioration, and enhancing the value of the bran. The firm turn out an average of fifteen of these machines weekly.

The Platteville Brick Yard.—Located in the northeast part of the city, where it was established by W. & J. Grindell during the summer of 1874, who have since conducted the business. At the time designated, these gentlemen leased three acres of ground and began the manufacture of brick of the ordinary and superior grades. So great grew the demand for their product that they were obliged to increase their facilities with succeeding seasons, until the business has grown to be one of the larger and more prominent in the city and vicinity. The season properly begins on the 1st of May, and closes about the 1st of October. During that period, a total of not less than three-quarters of a million of brick are molded, seasoned, burned and made ready for market, requiring the services of sixteen men, at a weekly compensation of \$150, and producing an annual net return of \$2,500. The yard is supplied with the most improved machinery employed, and every care is taken to make the article offered for sale, particularly the pressed qualities, of an order that shall procure an extended patronage. The custom of the firm is principally to be found in Platteville, but the ensuing season facilities will be completed for influencing a more extended trade. The investment represents a valuation of \$4,500.

Platteville Butter Tub Manufactory—Was established by A. Potter in March, 1870, at its present location on Elm street, between Main and Pine, where he employed six hands, and placed 24,000 tubs on the market annually. Since that date, rival manufactories have been opened in various parts of the West, dividing the trade and diminishing the volume of business disposed of by Mr. Potter. At present he employs but two hands, and his custom is principally made up of buyers resident in Grant County.

The Platteville Brewery—Was first built by Dennis Centliver about 1868, who maintained the ownership of the property until 1871, when it came into the possession of John Kemler through foreclosure proceedings. Almost as soon as title had been vested in the purchaser, and in September of the same year, the premises were destroyed by fire, entailing serious loss. In 1872, the building proper was rebuilt. It is of stone, fifty-six feet square, two stories high, and supplied with every convenience required for the preparation of malt liquors. Attached to the main building is a one-story stone ice-house 26x56, and within the brewery property a two-story and basement barn 20x30, also a brick dwelling of the same dimensions, two stories high, the improvements thus made costing in the aggregate \$25,000.

In the fall of 1875, the premises were sold to Richard Briscoe and H. F. Rehmsted, who managed the enterprise until 1878. During that year, Briscoe failed to execute certain provisions contained in the bill of sale, when Mr. Kemler was placed in charge as Receiver, and ultimately resumed the ownership of a moiety in the property, which is valued at about \$20,000.

When run to its full capacity, eight men are employed, at a monthly compensation of \$350. At present the establishment turns out 1,600 barrels of beer per annum.

ELEVATORS.

P. C. Hawley & Co., Elevator—Also located opposite the depot of the Milwaukee & St. Paul Road depot was erected in 1870 by G. Hawley, and first operated by the firm of Hawley & Benedict. At the expiration of two years the firm name was changed to Hawley, Benedict & Co. This firm maintained possession one year, and were succeeded by Hawley & Shepherd, and they in turn by Hawley & Miles. In 1879, A. C. & H. G. Hawley became the owners, and have since conducted the business under the firm name above cited. Their consignments are not less than 150 car loads of grain per annum; also handling salt, hides, pelts, etc.

The firm does a large business, and operates the elevators at Lancaster, Fennimore and Livingston in addition to those at Platteville.

Moore's Elevator—Opposite the depot of the Milwaukee & St. Paul Railway was erected by S. Moore in 1870, and is constantly occupied. The building is of frame, 40x50, three stories high, with a capacity for 15,000 bushels of grain, and cost \$4,000. At present it is occupied by Thomas Shepherd, lessee, whose business aggregates \$20,000 annually.

N. H. Virgin & Son, Elevators—At the west end of Main street, opposite the Chicago, Milwaukee & St. Paul Railway depot, was erected in 1870 to supply a growing demand for accommodations incident to the transportation of grain and other commodities. It is of frame, 36x48, and forty feet high; cost \$5,000, and possesses a capacity for 15,000 bushels of grain. The value of business annually transacted is quoted at \$25,000.

RELIGIOUS.

Platteville M. E. Church.—According to all accounts, there could have been no appointment or circuit that would have reached Platteville prior to 1827. In the fall of 1828, John Dew was sent from the Illinois Conference to Galena. But how far into the surrounding country he extended his services there is no means of determining. In 1829, the Galena mission was in the care of the Rev. Benjamin Stephenson; in 1830 and 1831, under that of the Rev. Smith L. Robinson, and, in 1832, under that of the Rev. John L. Mitchell. For these four years Peter Cartwright was the Presiding Elder, but never visited this part of his district.

It is believed, however, that in the spring of 1832, Maj. J. H. Rountree and wife and W. B. Vineyard and wife met in the log cabin which stood at the lower end of Maj. Rountree's grounds, and organized the first Methodist class established in Platteville Township. The name of the Pastor who addressed this limited assemblage during the spring was Rev. Smith L. Robinson; but, upon the breaking-out of the Black Hawk war, services were suspended, and this Pastor who had been assigned to duty in the lead mines returned whence he came. At that time the Indiana Conference embraced Indiana, Illinois, Iowa, Michigan and Minnesota Territory, and the circuit riders assigned to duty in this section supplied the lead mines on both sides of the

Mississippi River. Early in the fall of 1832, the Rev. John T. Mitchell, was sent to fill the appointment made vacant by the retirement of the Pastor referred to, and services were held at occasional intervals in the log hut, and so continued for some months. He was returned the following year, accompanied by the Rev. Barton Randall, and meetings were resumed.

When the log schoolhouse and church, erected on Section 16, was completed, services were held there, the Rountree, Coleman, Snowden, Vineyard, Waller, Orn and Hugill families, etc., constituting the congregation, presided over by the Revs. Hooper Crews, Lorenzo Bevans, James Mitchell, J. Hadley and other divines. During the winter of 1836-37, the village made rapid strides in wealth and population, the congregation increased in membership, and the necessity of a more commodious house of worship became imperative. In response to these demands, a house, which had been erected for residence purposes near the present site of the Congregational Church, was secured and adapted to religious uses. In the spring of the latter year, the Pastor succeeded in raising a fund of \$1,200, designed for the erection of an edifice to be known as the Methodist Church, and work on the same was commenced in May or June. By September, it was completed, and, before the close of fall, its dedication celebrated, the Rev. Wellington Wigley preaching the sermon. The church was of frame, of architectural proportions, 30x40 in dimensions, with a seating capacity of three hundred. The basement was devoted to educational purposes, and also formed the location of the first academy in Wisconsin. For upward of ten years, the Word of God was preached in this building, which sheltered all who applied during its existence as a church. To-day it is an adjunct, a property-room, to the brick block on Main street, occupied in part by Sanford & Chase. Its original cost was \$2,600. Along in 1845, the society began the erection of a brick church at the corner of Main and Chestnut streets. The building of this house of worship, as also its arrangement and accommodations, was conducted under the supervision of the Rev. Samuel Mitchell, and was complete in all its details. In dimensions, it is 40x50, one story high, decorated with a handsome and lofty steeple, in which a "curfew bell" rang out its notes of warning on each recurring Sabbath and feast day; chimes for the quick and a requiem for the dead of the growing town. During its life of thirty years many were enrolled as members, of whom the world was not worthy, many who might otherwise have been strewn with the wrecks of men who have been driven upon the rocks. In 1877, the question of erecting a new edifice was again mooted, and decided in the affirmative. The Rev. G. W. Case, Pastor in charge, Maj. J. H. Rountree and Capt. John Grindell were appointed a building committee, and empowered to procure plans and contract for the same. In pursuance of such authority the committee visited Oregon, Ill., and after a thorough investigation into the merits of designs submitted, decided to adopt that of a church there located, the plans being altered to conform to improvements suggested by those immediately interested in securing a house of worship in all particulars appropriate. The old house was demolished, the congregation meanwhile (until the lecture-room was completed) attending services holden in the stone schoolhouse, and, in July, 1877, the corner-stone of the new edifice was laid, the Rev. Messrs. Benson and Knox officiating. That fall the lecture-room was prepared for divine service, and the building roofed. In the winter and through the ensuing summer, work was carried on in the auditorium so that a completion was reached in the fall of 1878, and, on Thanksgiving Day of that year, the dedication was had, the Rev. Dr. Hatfield, of Chicago, preaching the sermon. The building is of brick, with a frontage of sixty feet on Main street, and ninety feet on Chestnut street. It is in the Queen Anne style of architecture, with two towers, one of which is about seventy and the other about one hundred and forty feet from the pavement to the final end. The walls of the auditorium are wainscotted in alternate panels of white and gray, the ceilings painted in artistic designs, and handsomely decorated. The woodwork is appropriately finished in a manner both neat and plain, and the capacity of the church is estimated at one thousand. The building is practically fire-proof, every precaution having been taken in the plans to avoid liability to conflagrations; is lighted by gas manufactured on the premises, and heated by furnace, which renders the temperature equable and pleasant. In one of the towers is located a clock manufactured by the American Clock Company, at a cost of \$1,025; and the structure, built with a view to strength, beauty,

convenience and perfect adaptation to the purposes intended, will be a monument to the taste and liberality of the congregation in the generations to come. The interior is lighted by six memorial windows as follows: One at the southern front to the memory of Mrs. Mary Grace Rountree, by the family of the lady; two at the eastern front, one being a token of affection to the Rev. Samuel Mitchell and wife Eleanor, contributed by J. H. Rountree, J. S. and the Rev. J. F. Mitchell, of Ohio, and John T. Hancock, of Dubuque; the other to Frederick V. Holman and wife, the donation of James Holman, son of decedents; a memorial to Mr. and Mrs. David Cook, also to Mrs. Hannah Howdell and Mr. and Mrs. John McMurty. The two latter fronting to the west.

The following is an imperfect list of the Presiding Elders and ministers who have officiated on the Platteville Circuit since 1840: H. W. Reid, Presiding Elder; Pastor to be supplied; 1841—H. W. Reid, Presiding Elder; Solomon Stebbins; 1842—B. F. Kavanaugh, Presiding Elder; Charles N. Wayar, Rufus J. Harvey; 1843—B. F. Kavanaugh, Presiding Elder; no supply stated; 1844—B. F. Kavanaugh, Presiding Elder; J. G. Whitford; 1845—Henry Summer, Presiding Elder; N. P. Heath; 1846-47—Henry Summer, Presiding Elder.

In 1848, the Wisconsin Conference was organized, and in 1852 the Platteville District. Henry Summer was Presiding Elder, and in 1849 Henry Yocum succeeded, remaining in position during 1850 and 1851; 1853—Samuel C. Thomas, Presiding Elder; W. Wilcox; 1854—Samuel C. Thomas, Presiding Elder; to be supplied; 1855—Eli C. Jones, Presiding Elder; J. M. Stagg; 1856-57—Eli C. Jones, Presiding Elder; James Lawson; 1858—Eli C. Jones, Presiding Elder; Enoch Tasker; 1859-61—W. Wilcox, Presiding Elder; E. Tasker, J. Aspenwall, Edwin Buck; 1862-65—J. C. Aspenwall, Presiding Elder; Edwin Buck, James Lawson; 1866-69—Enoch Tasker, Presiding Elder; P. S. Mather, John Knibbs; 1870-72—William Haw, Presiding Elder; John Knibbs, W. H. Palmer; 1874-77—P. S. Mather, Presiding Elder; A. D. Dexter, G. W. Case; 1878-80—William Hamilton, Presiding Elder: G. W. Case, Henry Goodsell.

The present congregation is stated at about 200, and the value of church property at \$16,000.

Primitive Methodist Church—Was organized in Platteville, as near as can be determined, during the year 1847, through the efforts and earnestness of the Rev. Mr. Lazembee, a pious member of the church, aided by the following, who constituted the original society in Platteville: John Trenary, Henry Snowden and family, Mark Waters and wife, John Chapman, Mrs. Verran, John Clayton, Mrs. Mary Bronson and a limited number possibly, at present forgotten. Services at first were attended at Shullsburg, and it was not until the building of a church edifice, located then, as now, near the corner of Cedar and Second streets, was completed, that the same were established in this city. Between 1850 and 1860, the society increased rapidly in numbers, and compelled the enlargement of the premises, which are now about thirty-five feet square, built of brick, one story high, and capable of comfortably accommodating a congregation of 200 worshippers. The society at present embraces about 100 members, owns property, including a parsonage, estimated to be worth \$2,000; and has supported the following Pastors: The Revs. Frederick Dobson, John Sharpe, Charles Dawson, Charles Doughty, George Wells, Henry Lees, Christopher Hendra, Joseph Hewett, John Harrington and James Arnold, the present officiant.

The German Methodist Church—Was organized in the year 1848, under the pastorship of the Rev. H. Whithorne. During the following year, a frame edifice for public worship was erected near the corner of Cedar and Second streets, at a cost of \$500, the lot having been donated by Maj. Rountree. In 1862, the premises were sold to the Christian denomination for \$500, and a new church built at the corner of Furnace and House streets, costing \$3,300, exclusive of the price of the lot, for which L. Coates was paid \$500, where services have since been held. The constituent members were John Spink, Rebecca Spink, A. H. Spink, Meta Spink, John F. Nehls, E. F. Nehls, Nicholas Nehls, Anna Nehls and Henning Nehls, Minnie Wellers, Dietrich Boldt and Helena Boldt, Henning Rige, Nicholas Niehaus and some others.

The present congregation numbers 126 communicants. The church property is valued at \$6,000, and the following pastors have officiated: The Revs. John Braener, F. Hemz, L. Kunz, Henry Voshall, C. Schuler, John L. Schaefer, R. Fregenbaum, F. Rinder, Charles Weinreich, E. Felzner, P. Hellwey, F. Fischer, C. Hess, F. Schmidt, J. Schmidt and C. C. Miller.

The Platteville Free Methodist Church—Originally a part of the Mount Valley Conference, was organized as a separate charge in June, 1871, by the Rev. Lewis Bailey, assisted by the Rev. G. C. Caffee, who were the founders of the society in Platteville. The pioneer members included William Hart and wife, Mrs. Lininger, Lizzie Capels, John Capels and some few others, whose names have either been omitted on the roll of membership, or are forgotten by those identified with the primary efforts undertaken by those mentioned to secure the establishment of the sect in this vicinity. At first services were held in the usual place of resort for congregations without local habitations—the schoolhouse—and were there conducted for the period of about one year. In 1872, however, means were provided for the purpose, and a commodious frame church edifice was erected on Cedar street, between Hickory and Chestnut streets, which has since been occupied. It contains accommodations for 300 worshipers, and cost, furnished, a total of \$1,000. Since the date when the society first manifested its presence in Platteville, it has increased by annual accessions until to-day. The congregation numbers 150 communicants, with church property valued at not less than \$1,000, and is considered as in a gratifying and flourishing condition. The following Pastors have officiated since the society was organized: The Revs. C. E. Coffee, C. E. Harroun, James Scott, John Murray, E. Z. Thwing, L. Whitney and D. M. Sinclair, at present in charge.

Trinity Episcopal Church.—For some years prior to 1862, the limited number of Episcopalians residing in Platteville and the vicinity were dependent upon services at Lancaster and other points, or upon the offices of transient ministers of that faith. This unsatisfactory condition of affairs lasted without interruption or variation until the year above indicated, when the Rev. L. C. Millette visited Platteville, where he established a mission and laid the foundations of the present prosperous parish. At that time there were but two adult communicants of the faith in the village—George R. Laughton, who has lived to see the charge of which he was in part the custodian appreciate from small beginnings, in wealth and influence, and Miss Wilhelmina Hooper, who long since took on the pale seal of the master of mortality and became precious dust beneath the turf. These three Christians were the nucleus about which gathered a congregation measured in numbers, but not in ardor or diligence, assembling weekly in schoolhouses and the residences of members of the flock for worship and communion. This continued for about one year, when the rock schoolhouse was secured for their occupation, and members convened there until the church at the corner of Chestnut and Market streets was taken possession of. The initiatory steps looking to the erection of this edifice were taken as early as 1863 by Mr. H. Kimball, whose endeavors to procure subscriptions in that behalf within the parish not proving satisfactory, went East and raised the necessary funds. In the same year, the Rev. Mr. Millette yielded possession of the charge to the Rev. C. H. Rice, who remained until November, 1864, subsequent to which date the congregation was, in a measure, limited in its regular services, owing to the inability to secure a permanent incumbent. In 1865, the building of the church was commenced and prosecuted without delay until its completion was accomplished in 1868. The Rev. Frances Moore succeeded to the vacancy created by the resignation of the Rev. Mr. Rice, and exercised a large degree of influence in building up the church and promoting the cause in which he labored. Up to 1867, a debt of \$12,000 prevented the consecration of the church. This debt, however, was liquidated on Easter Sunday of that year, and in August following the services of consecration were formally celebrated, the Rt. Rev. William E. Armitage preaching the dedicatory sermon. Soon after, the church was again left without a Rector, and no settled services were enjoyed until June 24, 1868, when the Rev. S. W. Frisbe accepted a call and took charge of the parish, which was finally organized and admitted into union with Convention under his administration.

From this last-named date the career of Trinity has been such as to gratify its constituency and commend its labors. The services have been continuous and uninterrupted and the congregation increasing and select. The church edifice is an architectural ornament to the city, and attracts admiration for its symmetry, absence of ornamentation and appropriate furnishings. It is of brick, fashioned after old gothic styles, 40x70, one story high, surmounted by a handsomely proportioned steeple, and cost, complete, not less than \$15,000. It possesses a seating capacity of 250, and enjoys a weekly attendance of nearly that number. In 1871, the congregation erected a parsonage costing \$1,800, and with the church property represents a present valuation of \$12,000.

The following Rectors have served since the Rev. S. W. Frisbe retired: The Rev. James S. McGowan, from July, 1869, to July, 1873; C. A. Canfield, from February 23, 1874, to July, 1876; and Samuel D. Pulford (the present incumbent) from November 7, 1876.

The Congregational Church of Platteville.—This is one of the oldest religious organizations in this State, having been established over forty years ago. It was organized under the Presbyterian form of government, August 17, 1839, and consisted of nine members. During that year, the congregation was without stated preaching and destitute of any convenient place of worship. In August, 1840, the Rev. Solomon Chaffee began supplying the pulpit alternate Sabbaths with the Mineral Point Presbyterian Church. About the same time, the Rev. James Gallaher, a well-known evangelist, labored for a short time with the church, and under his administration about thirty were added to the membership. During the autumn and winter of 1840-41, arrangements were made for the erection of a building to serve as a place of worship, and also as an academy. A school was at once opened in the second story, the first story being occupied as a place of worship. The Rev. A. M. Dixon succeeded the Rev. Mr. Chaffee, and supplied the pulpit from the close of the latter's labors until November, 1842, when the Rev. E. G. Bradford accepted an invitation to labor with the church. His labors ceased early in 1844. In the summer of that year, the Rev. J. D. Stevens was installed as Pastor, and continued his labors for nearly three years. During this year, arrangements of a preliminary character were completed for the erection of a permanent church edifice. The two lots upon which the present house stands were purchased, and, in 1845, the second home of the church was commenced. This was so far completed as to be dedicated to the worship of God December 20, 1846. In the summer of 1847, the Rev. John Lewis accepted a call of the church, and, on September 1, commenced his long and successful pastorate. In July, 1849 (the way having been prepared by a special act of the State Legislature), the church, by a unanimous vote, changed its name and form of government from Presbyterian to Congregational. Three seasons of very general revivals—in the years 1849, 1851 and 1855—were enjoyed, and contributed largely to the growth of the church and success of the cause—this, too, notwithstanding the ministry of Mr. Lewis was interrupted by ill health. So pronounced did this become, that, in October, 1858, he felt obliged to resign his pastorate, which the church declined to accept, but consented to a recess of one year, hoping that at the expiration of that period he would be able to resume his labors. During his absence, the pulpit was supplied by the Rev. D. W. Pickard. The Pastor's health continued to decline, and, in 1860, he again tendered his resignation, which, with great regret, was accepted by the church. Five months later, he died, sending from his death-bed this last message to his people: "Remember the words that I spoke unto you while I was yet with you." During 1860, the Rev. Charles Jones occupied the pulpit, occasional supplies only being obtained until October, 1861, when a call was extended to the Rev. J. E. Pond, who accepted, and began his labors in December following. In 1868, the second church building was taken down and the present commodious, symmetrical, durable and handsomely finished church of brick was completed, after plans prepared by George Nettleton, of Janesville, at a cost of \$11,000. This house was dedicated July 19, 1869, the Rev. Dr. Whiting, of Dubuque, preaching the dedicatory sermon from Exodus, xxv, 3: "Let them make me a sanctuary, that I may dwell among them." At the close of the sermon, the debt was taken in hand, and in less than an hour's time, through the efforts of the Pastor and others, was liquidated. In the after-

noon, Dr. Whiting preached upon the strength and beauty which are in God's sanctuary, and with earnest prayer, the congregation uniting, the house was set apart to the sacred services of God. The church, under Mr. Pond's ministry, enjoyed a steady and uniform prosperity, and continued until 1872, when he tendered his resignation, which was accepted in September of that year. In November following, the church invited Rev. A. P. Johnson, of Woodstock, Ill., to act as Pastor for six months. The relationship has been maintained ever since that time to the present date. Upward of 700 names have been enrolled upon the register of the church, out of which number nine have entered the Gospel ministry, as follows: Alvin M. Dixon, Truman M. Douglas, Arthur D. Laughlin, Robert L. McCord, John D. McCord, David Mitchell, Samuel Mitchell, Daniel W. Pickard and Adrian Van Vliet. The church now numbers 228 members, and owns property (including a parsonage purchased in 1880 for \$1,800) representing a valuation of \$13,000.

St. Mary's Catholic Church.—There seems to have been no effort to establish the Catholic sect in Platteville until about the year 1842, although there were a few scattering members of the church in Platteville and vicinity, principally composed of miners. In the fall of 1842, the Rev. James Causse undertook to establish a mission, and said mass in the houses of John Morrison, Bernhard McKerney and John Micka. So successful were the efforts he put forth that a church was commenced the same year, and completed in the spring of 1843, but its dedication was postponed until 1844, in the meantime mass being said and services held in the houses of communicants, principal among which, in addition to those cited, were David Gardner, Edward Dorsey and Frank Fies. The church was of frame, 24x36, and its erection was promoted by contributions from many non-Catholic residents, Mr. John H. Rountree donating the lot. The leading members of the congregation that season were: John Micka and family, Bernhard McKerney and family, John Morrison and family, Edward Dorsey, David Gardner, Michael Maher, Peter Carroll, Frank Fies, Patrick Bannagan, Anthony Hallagan, Mr. Droulette, Phillip Reilly, Mrs. Pitts, Patrick McMahan, Cornelius and Joseph Schutner, Casper Hermann, the McGovern brothers, the Henessey brothers, Owen Gallagher, James McLaughlin, James Savage, Patrick O'Malley and some others. The church was a mission attached to Potosi and Mineral Point for some years, but finally became an independent parish. In the summer of 1870, it was decided to build a new edifice, and in the spring of 1871, the foundations were commenced. May 13 of that year the corner-stone was laid with appropriate ceremonies, the Rev. P. H. Albricht preaching the sermon. On November 21, following, the dedication occurred, the Rt. Rev. Bishop Henni officiating, since when it has been occupied as a house of worship. The building is 40x80, of brick, with a capacity for 400 auditors, and cost \$10,000. The present congregation numbers 100 families. The property, including the cemetery and parsonage, is valued at \$12,000, and the following prelates have had charge of the Parish: The Revs. James Causse, Father Doherty, Francis de Vivaldi, Martin Hobbes, M. W. Gibson, P. A. Vorssen, Charles Exel, Joseph Prasch, M. J. Joerger, Philip Albricht, J. M. Cleary, J. Gruemer and W. Miller at present officiating.

The Church of Christ.—Located at the corner of Cedar and Second streets, and owned by the society known as Disciples of Christ, which was first organized in Platteville under the labors of J. P. Lancaster during the year 1847. The society was then composed of James Campbell, M. D., wife and mother, William Tibboot and wife, J. W. Smelker and wife, Mr. Whitaker and wife, Mr. Chatfield and wife, L. H. Wannemaker and wife, and some others, these latter being added to the congregation between the years 1847 and 1854.

In 1865, the present church edifice was purchased for \$500, the congregation previous to that date worshipping at various accessible points, including the houses of members, stone schoolhouse, etc. The present value of church property is stated at \$600, and the following ministers have served since the organization: The Rev. J. P. Lancaster, Calvin Smith, Mr. Dixon, Charles Levan, John Sweeney, William Sweeney, Henry Exley, E. C. T. Bennett, C. J. Mortimer, Mr. Searls and Mr. Monroe.

J. W. Smelker has been acting Elder, and John Robertson acting Deacon, since 1865.

The German Evangelical Lutheran Church of Platteville.—The German population of Platteville became numerous at an early day. Most of them were Lutherans, and in the absence of a church attended services at the German Presbyterian Church. In 1855, H. Martens, A. Groath, Messrs. Knebs, Gilbert, Johnson, Mehren and others extended a call to the Rev. S. Fritschel, which was accepted, and services regularly held thereafter until the completion of the church edifice, in the brick schoolhouse. In 1856, a meeting of the congregation was held to make arrangements for the erection of a house of worship, at which Henry Carl donated two lots on "Dutch Hill," upon which the building was put, the same being dedicated in the spring of 1857, the Rev. Mr. Grossmann, of Iowa, officiating. The building is of brick, 30x50, with a capacity for one hundred and fifty worshippers, and cost \$2,800. In the spring of 1857, the Pastor in charge accepted a call to Detroit, and was succeeded by the Rev. Mr. Burk. That gentleman, however, rendered himself unpopular by his advocacy of the "private confession of sins" and the use of a form of absolution which gave universal offense. For these reasons, a part of the congregation withdrew its support and absented itself until the arrival of the Rev. C. Starck, who was substituted for the Rev. Burk.

This trouble caused a division of the church, eight families who supported the latter gentleman withdrawing and erecting a church edifice, on the lot opposite the old church.

In the spring of 1859, the congregation procured the erection of a parsonage, and, in 1862, the Rev. Dr. Neumann was elected to the pastorate, occasioned by the resignation of Dr. Starck, who moved to La Crosse, and remained until 1868, when he retired, and after three months, during which the church was without a minister, the Rev. Dr. Bartlett was installed. He remained only six months, when, developing signs of insanity, which subsequently manifested themselves so pronouncedly as to require the restraint of the victim, he, too, was retired, and the Rev. Mr. Thiele took his place. From September, 1869, till July, 1870, the church was closed, but during the latter month once more opened under the pastorate of the Rev. Mr. Reichenbecker, who remained until the spring of 1876, being a man of the greatest energy and supported by a strong party. At this date some trouble was experienced, and the church united with the Evangelical Lutheran Church of America. The Rev. Mr. Severingham, President of the Wartburg Synod, arriving in Chicago in March of that year, came to Platteville, re-organized the congregation, and influenced the selection of the Rev. J. Salinger, a member of the Lutheran Synod of Canada, who responded, and remained in charge four years, going hence to Washington. The Rev. C. Starck was elected his successor, and returned to a field of labor he occupied acceptably twenty-one years previous. In the twenty-five years during which the church has obtained in Platteville, 826 persons have been baptized; 382 confirmed, 161 couples married, and 166 funerals have occurred. The sacrament has been administered to 8,760 members during that period, and the congregation has contributed a total of \$20,000 for church purposes.

St. Paul's Evangelical Lutheran Church—Was first organized April 17, 1876, by the Rev. E. Naltz, then Vicar of the Wisconsin Synod, who held services in the rock schoolhouse on Main street. The congregation, up to that date, had been identified with the German Lutheran Church of Platteville, in which a difference of opinion was caused, on account of what was considered by some the support of inconsistent doctrines. This caused a separation of the congregation, the dissenters establishing the present society. A constitution was adopted, which was signed by about thirty-five members, and the following Trustees were elected: R. Barzmann, W. Goeke, J. H. Wiese, N. Besers, A. Beutz and F. Goeke. On May 14, 1876, it was resolved to erect a church edifice, and work thereon was commenced immediately. So vigorously was the same prosecuted, that its completion was reached early in the ensuing fall, followed by the dedication, which occurred October 14, of the same year, when services were conducted by the Revs. Ungredt and Stregenmeier. The edifice is located on Broad street, is of frame 60x36, sixteen feet high, handsomely finished and cost \$4,000. Previous to this and in July, the congregation was incorporated, and the Rev. L. Jaeger was ordained Pastor. He remained in charge until August, 1878, when failing health compelled his resignation, and he was succeeded

by the Rev. E. Hoyer, who is now in charge. The congregation at present numbers sixty voters, and the value of church property is quoted at upward of \$4,000.

A portion of the building is occupied as a parish school, which enjoys an average attendance of fifty-five scholars, but the congregation has in contemplation the erection of a parsonage and schoolhouse during the present year.

German Presbyterian Church—Located at the corner of Green and Cedar streets, was organized during 1850 as the German Evangelical Church of Platteville, but subsequently received the title by which it is now known. The original members were, in part, as follows: J. J. Brodbeck, Augusta Brodbeck, Maria Brucker, John Valentine Carl, Maria M. Carl, C. N. Doscher and family, Catharine M. Fert, John P. Kolb and family, Valentine Fitz and family, Heinrich Landsberg, Christian Schlegel and family, and others, and the same year the present church edifice was erected with the Rev. John Bantly as Pastor. The church has, from its foundation, constantly held up the Bible as the standard of truth, and advocated the lessons taught in the Heidelberg and Westminster Catechisms. At present, the church is in a flourishing condition, with a numerous congregation, and owning property valued at several thousand dollars. The following Pastors have occupied its pulpit since the resignation of the Rev. Mr. Bantly: The Revs. Jacob Schwarz, John Van Derlass, John Fenchud, John Grab, and Joseph Wittenberger, at present officiating.

The Platteville Cemetery Association.—Every day comes the sad intelligence that some loved one has put off the mortal life and gone to dwell in the realms of everlasting bliss. Every day a flower is plucked from some sunny home, a jewel snatched from some treasure of love. Every day from the summer fields of life a harvester disappears; every day a sentinel falls at his post, and his funeral train winds like a wintry shadow along the street. A young girl, perhaps, pure as the bridal wreath that clasps her forehead, is stricken down at the altar, and from the aisles of the temple is borne to the slumberer's gardens. A strong man clothed in the garb of victory falls to dust as the pæan sounds from his lips. An aged patriarch bowed down with years and pain sinks into his dreamless sleep as he looks out upon the horizon of the future for the coming of the angel host. Each day some pearl drops from the jeweled thread of friendship; some lyre to which we have listened with ecstatic pleasure is hushed forever. But wise is he who mourns not the pearl and music lost, for life with him shall pass away gently as an eastern shadow from the hills, and death prove a triumph and a gain.

The first cemetery of Platteville was laid out on land donated by Maj. Rountree and N. H. Virgin, south of the Virgin mill, on a line between Sections 15 and 16. The first burial was that of a young man whose name is forgotten, who died in a miner's cabin, on the Rountree branch, as early as 1829. Here for many years were the dead of Platteville laid. The gentle babe, sinless as an angel; the ambitious youth, hopeful and generous, whose path was hemmed with flowers; some aged soldier whose cheerful cry in the sieges and struggles of the past was missed from the bivouac of life, was laid to rest here. During the small-pox epidemic of 1843, the soil of this primitive graveyard was flung upon the form of him or her who had been touched by the icy breath of Azrael the dark-winged, and dreamed no more save in the strength of that promise, "Ye shall live again." In time, the four acres set apart for sacred purposes became occupied with the bodies of those who have gone before, and in about 1850 the grounds were deeded to the village upon the condition that the municipality should care for it forever.

It is handsomely laid out, and bears upon it the impress of care and affection in the monuments that have been erected to commemorate departed worth, in the flowers that deck the hillocks there, in the visitations of friends to the graves of those who shall be awakened at the first call of the herald angels to the flush of that summer which is eternal in the balm-breathing gardens of God.

On September 15, 1855, the present Platteville Cemetery Association was organized by William Butler, John Lewis, Henry C. Lane, Isaac S. Clark, Homer Perry, N. Messersmith, James Kelley, William Woods, J. L. Pickard, J. Alford, Homer Page, N. Goodrich, James Durley and P. D. Hendershot. At a subsequent meeting, John Lewis was elected President,

V. P. Eastman, Treasurer, and I. S. Clark, Secretary, with the following Board of Trustees : N. Goodrich and J. L. Pickard, one year ; H. C. Lane and H. Perry to serve two years, and J. Lewis and William Butler, three years. A tract of land comprehending ten acres was obtained on Section 16, west of the city, and landscaped and laid out in lots, drives, avenues and walks, the same handsomely adorned, and presenting a rare picture of art and nature exquisitely combined. Here, since the organization of this association, have occurred the burials of those who died in Platteville and vicinity.

The present officers are J. H. Bevans, J. H. McArthur, F. R. Chase, G. M. Gurnsey, W. H. Behn and H. C. Lane, Board of Trustees, with F. R. Chase, President, J. H. McArthur, Secretary, and J. M. Gurnsey, Treasurer.

CHAPTER X.

HAZEL GREEN.

PERCIVAL—AN ERA OF PROSPERITY—VILLAGE ROSTER—THE STORM-CLOUD EUROCLYDON—THE SCHOOLS—THE POST OFFICE—CHURCHES—HZAEL GREEN CEMETERY—SECRET SOCIETIES—THE HAZEL GREEN BAND—LIGHTCAP'S MILL.

LOCATION.

The only municipal corporation of importance and influence in the town of Hazel Green owes its settlement, building up, progress and wealth to the lead mines, the early source of all advancement and centralization of resources in this portion of the country.

Old men still live in this quiet inland village, which has been the scene of so much of interest and so much of horror, who recall the day when the present site was a trackless plain. Old men, whose thin soft hair is white as snow, and whose cheeks are furrowed with care-written lines, recur to the days long since mingled with thoughts of the dim gone-by, as dreams canopied o'er with the golden gleams and shimmering glows of happy memories. They reflect upon the scenes which came and vanished like a wreath of mist at eve, during the earlier days of their experience, before youth yielded place to manhood, and perchance mourned their departure, for youth is an age that is too precious to last; time will not row back for them, and to-day they look away to that opposite shore, in the fond belief that these dreams may be once more realized in the beyond. The seeds of success which were sown in those days grew down the aisles of the future, and have shed a beautiful light upon age. Loved faces will greet the transition to the home above, sweet words will welcome their coming, and the fruition of childhood's dreams and prayers will circle old age with their halos of splendor, when those that are left have run their race, and the world for them is rolled up like a scroll.

SETTLEMENT.

The earliest settlements made in present Hazel Green were effected at the lead mines, in the vicinity of the village, and reference to them must be superficially indulged, prefatory to a history of the settlement made in the village itself. As early as 1825, it is thought, miners had begun their explorations in its immediate neighborhood, and discovered evidences of wealth which settled their doubts as to remaining. As a rule, they were of that class of men of unsettled, indecisive character, disposed to roam and romance, rather than to remain at any designated point. To some of them the pseudonym of "sucker" was applied, as indicative of their inclination to come hither in the spring and remain until the frosts of November chilled their energies, when they departed and were heard of no more in this section. Others, after meeting with but measured success, became discouraged, and sought encouragement elsewhere, and others, though meeting with success, yielded to nomadic characteristics, and vanished as silently and mysteriously as they had made their advent.

HARD SCRABBLE.

In those days, the territory surrounding present Hazel Green was known as "Hard Scrabble," and arose from what is represented to have been a desperate contest for the possession of a mine, not unfrequent at the time of which mention is here made. This took place, it is said, in 1825, at a point on the Branch, some distance beyond the Catholic Church erected in 1846,

between James Hardy and Moses Meeker, in which the former was victorious. Those conversant with the melee denominated it the Hardy Scrape, whence it degenerated into "Hard Scrabble," under which it became famous throughout the lead mines, and was so known officially until 1838, when a post office was located at the present village, and a name appropriate, as also more in harmony with the surroundings, given to the infant settlement. Hard Scrabble, however, is still applied by many who flourished when the township was known as such, and decline to be governed by the changed order of affairs.

FIRST WHITE WOMAN.

During 1825 or 1826, a Mr. Adney came in from the East, and settled upon a claim in Section 13. His daughter, who married Mr. Dixon, of Platteville, in early days, is said to have been the first female to appear in this vicinity. William Billings also came with Mr. Adney. The latter remained some time, and, in 1827, disposed of his claim to a Mr. Floyd, who, in turn, sold to Lewis Curtis. This gentleman brought his family here in 1828. Previous to that year, the Wolcott and Townsend families became residents. In 1826 or 1827, Christian Ebersold settled near the village, and, during 1828 or 1829, erected

THE FIRST LOG HOUSE

on the site of Hazel Green. The logs were obtained from land now owned by Mrs. Andrews, and hauled to their place of delivery by Mr. Curtis. The house was near the present residence of John Gribble; it was sixteen feet square, and built by Wolcott, Townsend and Billings. The country was prairie, except occasional patches of hazel bush, and the cost of the premises can be imagined when the difficulty of procuring lumber, or rather timber, is measured. However, the house was completed, and stood for many years the mark and model of its time. Between this year and 1830, comparatively few settlers, to be considered under the head of permanent, were identified with the body politic.

In addition to those already mentioned, there were others who came to stay, and did remain until the murder of Lovell and Maxley at Sinsinawa Mound, in 1832, created an epidemic of terror among the large proportion, who fled to Galena. Among those who came in was Gen. G. W. Jones, now a resident of Dubuque; Mr. Gregoire, his brother-in-law; William Bernhouse, Capt. Charles McCoy, Oliver and Heile Rice and some others, who settled at points distant from, as also contiguous to, the village.

FIRST AGRICULTURISTS.

In 1831, the price of mineral depreciated to a ruinous extent, and materially diminished the number engaged in mining. As a rule, some interest began to be manifested in agricultural pursuits, and this year the Curtis brothers, whose father, as has been stated, had entered a claim of 160 acres of land in Section 13, began the cultivation of forty acres of the tract. They run, or claim to, the first furrow in Hazel Green Township, and planted wheat, corn and oats. The crop was disposed of—the wheat for seed and the corn and oats at Galena.

From 1830 to 1838, the arrivals included Jefferson Crawford, who became one of the most prominent and prosperous mine operators, W. E. Dudley, John Cottle, Orville Cottle, John Edwards, Robert Young, J. M. Chandler, Hiram Weatherbee, Otis B. Peck, Allen Preston, John Hinch, Kibbe and the thousand and one miners, smelters, traders, adventurers and *oi polloi*, whose footprints in the sands of the times have been obliterated by the current of weightier matters incident to building up and developing a new country.

The Black Hawk war produced an effect upon Hard Scrabble and its surroundings, similar to that experienced elsewhere in other sections, the prosperity of which was embarrassed by its existence. Large numbers of the inhabitants removed to Galena, and but a minimum proportion of these returned when the brows of the soldiers were bound with victorious wreaths, and their arms were hung up as monuments to their prowess and achievements. A company composed of miners and settlers was enlisted and commanded by Capt. Charles McCoy. A log fort was built around the Ebersol mansion, garrisoned by this company, which, after a brief stay there,

however, proceeded to Galena, leaving the prospective village without defense. But happily the savages neglected Hazel Green in their route to the Rock River, and beyond the murders at Sinsinawa Mound, above referred to, no levies either upon the lives or property of settlers were undertaken. After the war and return of those who had gone out in pursuit of the enemy or places of safety returned, others came on their first trip to the lead mines, and interests for a time dead were wakened into new life. Hiel and Oliver Rice opened a farm between Hazel Green and the Mound; P. P. Patterson, a farm on Section 14, and P. P. Stone a similar venture north of the State line. Mining was prosecuted with renewed diligence, and many of the leads discovered during this period became sources of infinite profit to subsequent owners. In fact it might be said that the labors employed, enterprise of settlers, and gratifying results which attended the undertakings inaugurated in the years immediately succeeding the victory at Bad Ax are in a very great measure prime factors in all successes which have since been attained hereabouts. At an earlier day, roads had been improvised out of the Indian trails from Hazel Green to Galena and Platteville, and as there were no mills in the vicinity, or depositories for the sale of edibles, those who were prevented from "raising" their own "hog and hominy" obtained these indispensables at one of the settlements mentioned, neither of which, however, were as advanced in the scale of populousness or thrift as they have since become.

ESTABLISHMENT OF THE VILLAGE.

Early in the year 1838, the preliminary steps toward the establishing of the present village, by the location of a post office, of which Jefferson Crawford was made Postmaster, and named Hazel Green at the suggestion of Capt. McCoy. Soon after, Samuel C. Wiltse surveyed lands located in the upper part of town belonging to R. R. Young and Allen Preston, and laid it off into village lots. This was followed by the survey of a tract in lower town, owned by John Edwards, which was similarly platted.

EARLY EVENTS.

At that time, the improvements in the established village were limited in number, and of the most unpretentious description. Beyond the houses previously erected by Christian Ebersold and John Edwards, and the saloon of Otis B. Peck, in one of the latter's tenements, there was nothing to indicate the existence even of a settlement. Miners' cabins occupied the ravine near the village, but were not within its corporate limits. This year, however, some building was commenced and completed, but no very general system of improvements was undertaken. Preston & Chandler erected a frame house on the present site of the Crawford Block, and occupied the premises as a saloon and bowling alley. It was known as the "Light House," and is said to have been the scene of many an occurrence calculated to excite the mirthful if not the intellectual. Allen Preston, one of the proprietors, also erected a frame residence adjoining. Ezra Dorman came into the village this year from Jamestown, and built a frame store north of the Edwards' House. R. R. Young erected a story and a half frame on the ground now occupied by the "Empire House." He opened it as a hotel, the first in the village, and it still does duty as part of the Empire. Thenceforward, but little advance was made, either in the additions to the population or attractions of the surroundings. Mining continued to be the chief occupation, and little was done in any of the channels of business but with special reference to this industry. In 1843, the population is estimated to have been about 200, and the buildings barely sufficient for the accommodation of this number. There was no physician in the vicinity—no churches—and clergymen and schoolmasters were unknown factors of the period. But from this date on, until the discoveries of gold in California, the village built up rapidly. The stores in 1843 were but two in number, maintained by Orville B. Cottle and Ezra Dorman respectively. William Brubaker carried on a blacksmith-shop opposite the Edwards homestead, and there were some other trifling ventures, which totalized the manufacturing and commercial interests of the place.

In 1844, the prominent arrivals included Louis Rood, George Babcock and Alden Adams, the latter being the founder and landlord of the Empire House at a subsequent date. Dr. Brid-

den, the first physician to settle in the village, came this year, and built a house in the lower town. James A. Jones, now a resident of Lancaster, was enrolled among the citizens of Hazel Green, in 1844. A man named Rand was also enumerated on the census list, and became a resident of lower town, when he built a residence near that of Dr. Bridden. Peter Brown and Robert Frazer (the latter the inventor of Frazer's axle grease), erected the building on Main street, now occupied by Hon. H. D. York, and opened a store for the sale of miscellanies within its walls. In addition to these, a large number of Cornish miners arrived from England, and settled upon the branch, where they labored until the discovery of gold on the Pacific Coast, when they joined in the tide of emigration which tended in that direction. From 1844 until 1855, the mines are represented to have been more vigorously worked and productive of greater yields than at any time before or since. As a result, money was plenty, times flourishing, and gambling and drinking universal. A schoolhouse was built in 1844, a one-story frame, on East Main street, where it stood until blown down in the tornado of 1876. At the house of John Hinch occasional services were had by the Catholics, and this was the only attempt made to cultivate the religious element up to that period, although the Rev. S. Barnes, who came in 1843, and resided in a house adjoining Gribble's store, made efforts to obtain a hearing at long intervals. Sometimes an itinerant would pass this way and tarry for a season; but it was not until two years later that an edifice, especially dedicated to the worship of God, was provided. Upon one occasion, a colporteur of the Mormon faith made his appearance in the village, and, being unable to obtain other quarters, took possession of the "Light House" bar-room, and began an exhortation, using one of the tables ordinarily devoted to poker and "old sledge" as a pulpit. There was quite a company present at the time engaged in their favorite amusement, many of whom abandoned their games and became listeners. The congregation, improvised from this crowd in the pursuit of fortune, included, among others, Col. Streeter, a huge Mississippi "sport," probably "Patch Eye John, Bloody Kentuck and Bullet Neck Green," a trinity of adventurers, who had been thus designated in the mines, all of whom not only paid the most respectful attention themselves, but enforced a proper degree of decorum among the motley crowd, while the Mormon expatiated upon the faith professed by Joseph Smith and his followers. After the benediction had been pronounced, Col. Streeter observed that the laborer was worthy of his hire, and proceeded to take up a collection. Those present generally responded, and the Colonel handed the Mormon the results, with the suggestion that "it was a bigger Jack pot than had been staked during the day."

An old settler and prominent citizen, who first landed in Hazel Green in these flush times, arrived on Sunday, and was impressed by what he saw that the place was the residence of very many men bad as the emigrant from Bitter Creek, whose exploits have become the subject of a poetic fiction. After procuring a boarding-house, he relates, he sauntered down town, intent on seeing the sights, and brought up opposite the "Light House," but just as he was decided upon entering, his progress was embargoed by the forcible exit of a "Bloody Kentuck," minus one sleeve of an overcoat, which garment was, with its wearer, in a condition of almost hopeless destruction. It appears that him of the euphonious nomenclature had been detected while endeavoring to cheat at cards, and ejected from the house without regard for comfort or elegance.

While there was a promiscuous crowd, composed of nearly all nationalities and nearly every feature of character, collected at Hazel Green as elsewhere in the mines, there seems to have been less of crime than one would suppose. There was considerable trouble among those who lived by their wits, but the pistol was hardly ever resorted to, and bloodshed was limited to that following a knock-down, drag-out affair, such as are indigenous to every newly-settled region where men are often measured by their excesses rather than the absence of them.

In 1845, the Empire House was built. Ezra Dorman put up a store, and John Gribble, who came in 1840, a residence, both in Lower Town. Lewis Rood laid out the north end of the village into lots, and called it "Rood's Addition." He also erected two houses in that portion of the town, both of which still stand, owned by John Triganza. About this time, the Richards Brothers erected the stone house in the lower portion of the village, which was blown

down during the tornado of 1876, burying an entire family beneath the ruins. School was still carried on in the frame house erected the previous year and occupied on Sundays by the Methodists, the Presbyterians, under the care of a Rev. Mr. Lewis, worshipping in the Empire House, and the Catholics still celebrating mass at the house of Mr. Hinch. The following year, the Catholics and Presbyterians began the building of church edifices, and John Edwards completed the first brick residence in the village or vicinity. It was located on his farm at the edge of the village, and still stands a monument to the enterprise of its founder. Building this year is said to have been quite general, the improvements being made up of stores and residences. Daniel Brewster opened a store opposite the "Light House" and built a residence on the site now occupied with the dwelling of Mrs. Allison; the Rev. Robert Langley built where Roberts' wagon-shop now is; William Warner, the present residence of Dr. J. L. Jenckes. The Wisconsin House, opposite the Empire, was put up in 1846; it, too, still stands, the private residence for many years of the late Jefferson Crawford, and now in possession of his heirs.

In 1847, the old stone store razed in the tornado was built by John Edwards, and, until its destruction, was the abiding place of Masonic and other secret orders. Nearly all the residences which were erected in Rood's Addition went up about this time, and Lewisburg, a town of great ambition, but slender prospects, was beginning to come into notice. This projected municipality was surveyed and platted in 1846 by Henry C. Wiltse, on the Curtis farm, a mile north of Hazel Green, and named after Lewis Curtis, who will be remembered as an arrival here in 1827. It was thought that the enterprise might, in time, either neutralize the influence and importance of Hazel Green, or become a valuable addition to that place. Lots were laid out, streets designated and named, and other improvements proposed, but they were never realized, nor were the ambitions of its founders; the village that was to be failed to attract visitors; investments were never made; plans in embryo were never born, and the undertaking fell through, the land being once more utilized for agricultural rather than speculative purposes.

Notwithstanding the Mexican war excitement influenced many residents of Hazel Green, including, among others, Amon Miller, James Kilgore, John Zenssler, Thomas Sheridan, Thomas Hitchcock, Orville Cottle, and a number whose names have been forgotten, to enlist, the growth of the village was not retarded, and improvements were continued, so that in 1849, when the California fever broke out all over the country, and raged with epidemic violence in the "lead mines," Hazel Green was decidedly flourishing, pretentious in appearance, and comparatively populous. With the announcement of the existence of wealth across the continent, the bone and sinew of this section lent a willing ear to the reports, and, having realized a confirmation of what they heard, girded up their portables and joined the army of miners which crossed the plains, and became pioneers in the new El Dorado. The force which was recruited in Hazel Green included Joseph Harris, J. S. Williams, James Wells, James Blight, Thomas Edwards, Joseph Johns, James Johns, Peter Skinner, Bennett Andrew, James Gleason and others. All of these mentioned succeeded in their object and returned independent.

THE VILLAGE IN 1850.

In 1850, the village contained a population estimated at 600; there were eight stores within its corporate limits, four hotels, four churches, one school, and other evidences of enlightenment and enterprise. From the beginning of this decade until 1853, the town is represented as being "dead." The levies made upon its population had affected that class of citizens who contribute to the cultivation of systems and education of classes as agencies for the development and promotion of latent wealth. These departures limited the town's prosperity, retarded its growth, and unquestionably resolving it into a comparatively quiescent corporation. The first era in the life of the town, it may be said, was closed in 1850, and, for three years, the prospects of a revival were far from enticing, but at the expiration of that period, combinations and circumstances conspired to give a new lease of life, and the last stage of prosperity, it is said, was decidedly more gratifying than the first. Those who had gone to California returned with substantial results of their labors, and became ambitious to excel in agricultural pursuits, as

John J. Postel

MUSCODA.

they had succeeded in mining. As a consequence, investments were made in lands in the vicinity of the village, and some of the most productive farms of to-day were first opened at that time. In addition to this, discoveries made of new mines, and prospective enterprises contemplated by corporations at the East, gave an impetus to that industry. Among these was the American Mining Company, which had been largely engaged in operating in the vicinity of Sinsinawa Mound. Early in 1853, the company commissioned its Western representative, William Warner, to investigate the mineral resources of Hazel Green Township, and if the same were found to be as it was believed they were, the company designed entering upon a lease of about 1,500 acres belonging to Jefferson Crawford and Abigail Curtis, erect two engines, each of 250 horsepower, and thoroughly drain the lands, preparatory to mining to an extent not previously thought of. Mr. Warner, accordingly, visited Hazel Green, accompanied by James G. Percival, the poet, author and geologist, and began the discharge of his duties, Mr. Percival being employed to demonstrate certain theories upon mining. After several months' devotion to the subject, Dr. Percival closed his labors with an able and elaborate report, favorable to deep mining, and to the use of machinery to be operated in the drainage of mineral lands in this locality. This paper is said to have been a most valuable contribution to science, and of great practical utility to the mining interests of the State.

DR. JAMES G. PERCIVAL.

The occasion is here taken to relate briefly of Dr. Percival's residence in Hazel Green, whose death in the hospitable home of Dr. Jenckes, with whom he resided, elicited very general and extended notices from the press of this country and Europe. At the bar, in the pulpit and amid the walks of philosophy and science, tributes were paid to his genius, his virtues and his literary fame.

Previous to the labors of Mr. Percival for the American Mining Company, the Legislature of Wisconsin adopted a law providing for the geological and mineralogical survey of the State, at an annual expense of not more than \$2,500, and to commence in the lead mining district. Under this law Edward Daniels was appointed State Geologist by Gov. Farwell, and began the discharge of the trust while Mr. Percival was investigating for the mining company. Upon the completion of his labors, many of those interested in mining felt anxious that the State geological survey should be conducted by that gentleman, believing that if made by one so competent and so eminent in his profession it would be of great practical benefit to the public. A request to this effect was therefore preferred to Gov. Barstow by the prominent citizens and land-owners of the State, and Dr. Percival was appointed, and entered upon the discharge of his duties August 12, 1854.

An acquaintance, admirer and friend of the dead poet, speaking of his life and habits at this period, says: "He entered upon his new field of labor in the mines with much zeal and pleasure, which seemed to increase with the prosecution of his researches, whether viewing the rocky bluff of a stream or examining the debris from some mineral range, with the view of deducing some facts connected with industrial science for the benefit of mining. His ardor and earnestness in the discharge of his duties were intense, and hardly ever until the fading hours admonished him the day for toil was ended would he turn his steps homeward. This unflagging devotion to the love of work and the consequent exposure therefrom probably was the leading cause of his last illness. However eccentric or forbidding Dr. Percival appeared to outside observers, in the private social circle he was full of cheer and mirth, his utterances often sparkling with wit and wisdom.

"There were occasional intervals of a few days that an unpleasant restraint seemed to rest upon him—probably produced by ill-health—at other times his intellectual powers would, apparently, exercise free scope in the domain of thought, then (if he felt communicative) to sit in his presence and 'drink at the fountain' was an inspiring pleasure that few men have ever been able to impart. The true and beautiful were real existences with him. Nothing short of a clear and correct knowledge of everything worthy of investigation would satisfy him.

“Whether botanizing a flower or placing a piece of rock in its proper geological order, the utmost care and accuracy was exercised. Neither was his intellectual greatness and power confined to geology and poetry, but embraced a variety of subjects. We relate the following incident as an illustration: During the earlier years of Thomas H. Benton’s Senatorial career, while addressing the Senate upon a measure of importance, he eloquently portrayed the future of his country, predicting that at no very remote time a railroad would span the Continent, built as a necessity for the wants of the millions yet to people the vast area west of the Mississippi. Upon reading that speech, Percival (at his home in New Haven) opened a drawer and took therefrom a previously written article upon the feasibility of a highway across the Rocky Mountains, and the duty of the Government to construct it, expressing the strongest conviction that the topography of the country was feasible for a railroad that would ere long be needed to facilitate the commerce of the country. He at once forwarded the document to the Missouri Senator, who, after reading it, arose in the Senate and paid Percival a handsome compliment, at the same time asking permission to have it read to the Senate, which was granted; but in those days even Senators deemed such projects Utopian, visionary.

“Percival’s knowledge of the geography and topography of the country was characterized by the same thoroughness that entered into other fields of study and research.

“It is a matter of fact, recorded in his biography, we think, that he wrote no poetry for a number of years previous to coming West. But the Muse had not departed—was only held in reserve—as the following incident will testify. While surveying the mining land near Sinsinawa Mound for the American Mining Company, in the year 1853, Percival was lodging for the time at one of the early-built hotels in Fairplay in which the sleeping apartments were partitioned with boards with a narrow hall extending the entire length of the building. In those days the boarders, mostly miners, were not governed by any rules of custom for time of repose, but were in the habit of wending their way up the stair-case and along the dark hall at all hours of night. The noise was quite annoying to the Doctor. Wishing in some way to enter his protest against such disorder and confusion, he took a pencil and slip of paper from his pocket, and, while waiting for breakfast, wrote a caustic poem in Greek, which, during the day he read to two or three of his friends, also its translation in English. While not very severe on the landlord, the house and boarders were neatly ‘done up.’ Another anecdote illustrating his character: After writing a preliminary report of his survey of the Hazel Green Lead Mines to the President of the American Mining Company, he submitted it through the general agent of said company, William Warner, Esq. Mr. W., who was a highly educated gentleman, suggested a change of a single word, substituting another that he deemed the better. Percival insisted upon the correctness of the word as he had used it. Remonstrance proved unavailing. The definitions of words and their proper use in sentences were to him positive things, and, after writing an important document, he could not admit it contained mistakes.

“While prosecuting his researches he was taken ill, and what was at first thought to be a mild attack of intermittent, resulted, after many days, in defiance of medical skill, in his death. He died on the 2d of May, 1856, in the second story front room of Dr. Jenckes’ residence, Hazel Green, surrounded by kind friends, who tenderly and affectionately ministered to his temporal wants, and closed his eyes forever at the dawn of the day, as the sun was just rising and threw a flood of golden light over the scene. He was buried on the following Sabbath in the village churchyard, where his grave can be seen to-day without ‘storied urn’ to detail the virtues of him who sleeps beneath the sod, the sleep of sanctified rest. But the memory of his worth, like moonbeams on the stormy sea, has doubtless lighted up many a darkened heart, and lent to the gloom surrounding a checkered life a beauty so sad, so sweet, that one would not, if he could, dispel the darkness which enshrouds it.”

AN ERA OF PROSPERITY.

The effect of these undertakings was such that improvements in the village were frequent and of an expensive character. Faherty’s Block, Crawford’s Block, Dr. McBreen’s and other

commodious and handsome residences which dot the village landscape to-day were put up during this era of prosperity and promise. Suddenly, it might be said, the mining company abandoned operations. Investments by that corporation elsewhere failing to realize compelled their suspension, and permanently prevented the consummation of their projects at Hazel Green. The result was that the promise held out to the village through their efforts was only in part fulfilled. The hope of becoming a city gradually began to fade, and until the panic of 1857 was resolved into complete disappointment. During the war, Hazel Green furnished her full quota, and until 1876 nothing occurred to disturb the serenity of this quiet hamlet, or inspire the residents with feelings of other than content that the lines of their lives had been cast in so pleasant a place.

VILLAGE ROSTER.

1869—J. M. Chandler, President; Joseph Clementson, R. D. Roberts, Charles Schabacker, J. L. Crawford, B. Cornelison and William Allen, Trustees.

1870—Joseph Clementson, President; Conrad Genz, Henry Magor, W. R. Jackson, Josiah Thomas, James Johns and Jacob Steppee, Trustees.

1871—George Brodrick, President; Solomon Hotteral, Matthew Thompson, J. H. Gribble, J. F. Walsh, John Kohl and Philip Sullivan, Trustees.

1872—George Brodrick, President; Washington Nolond, William Allen, James Johns, J. F. Walsh, T. W. Summersides and Edward O'Neil, Trustees.

1873—George Brodrick, President; T. W. Summersides, Edward O'Neil, Joseph Clementson, J. F. Walsh, Arthur Gribble and Horace Curtis, Trustees.

1874—George Brodrick, President; Edward Thompson, Edward O'Neil, J. F. Walsh, Charles Schabacker, B. Cornelison and W. R. Jackson, Trustees.

1875—Joseph Clementson, President; Edward Thompson, Edward O'Neil, Henry Magor, Conrad Genz, Charles Schabacker and J. R. Fisk, Trustees.

1876—Joseph Clementson, President; John Looney, Edward Thompson, J. F. Eastman, Josiah Thomas and J. R. Fisk, Trustees.

1877—Mathew Thompson, President; Ellis Wynne, James McBrien, Henry Magor, William R. Jackson, Christian Andrew and George Brodrick, Trustees.

1878—Mathew Thompson, President; Ellis Wynne, W. R. Jackson, John Gribble, James McBrien, Thomas Andrew and Philip Sullivan, Trustees.

1879—George Brodrick, President; John Cox, W. R. Jackson, J. Johns, William Chandler, Richard Williams and C. Andrew, Trustees.

1880—George Brodrick, President; Richard Williams, Jefferson Crawford, John Cox, William Harvey, James Gribble and Edward Thompson, Trustees.

1881—Re-organized under the statutes of 1880—Josiah Thomas, Police Justice; Edward O'Neil, Justice of the Peace.

Clerks.—John Chandler, 1869–80.

Marshals.—William Chandler, 1869; T. W. Seals, 1870; William Chandler, 1871–74; Thomas Anthony, 1875; John Treganza, 1876; John Treganza, Jr., 1877–78; F. M. Chandler, 1879–80.

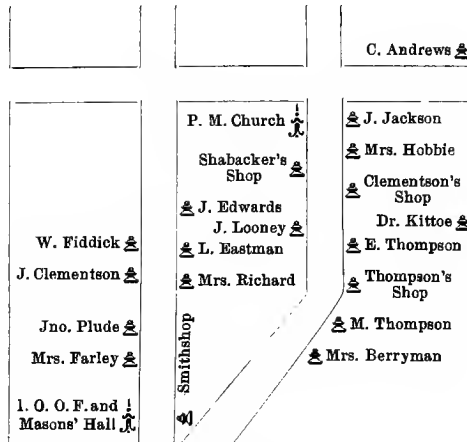

Treasurers.—Henry Magor, 1869; J. L. Crawford, 1870; Solomon Hatheral, 1871; T. W. Summersides, 1872–73; Edward O'Neil, 1874–75; Josiah Thomas, 1876; William R. Jackson, 1877–79; John Birkett, 1880.

Justices of the Peace.—J. F. Eastman, 1877; Josiah Thomas, 1881.

THE STORM CLOUD EUROCLYDON.

On the 10th of March, 1876, the village was visited by a tornado, one of the most terrific and destructive, both as to life and property, the annals of calamity record. It at least worked the most terrible havoc ever enacted by the elements in Grant County. Fire and water here have never caused such fearful devastation. There is no place in Grant County where fire or water could so suddenly destroy life and property as the winds did on that Friday in the

village of Hazel Green. It is rare indeed that an earthquake or the eruption of a volcano so swiftly and so completely obliterates collective habitations of men. Great earthquakes usually give warning, and people can get out of their houses and away where they may not be crushed by falling rocks or timbers. One may flee from the flowing lava of a volcano, but before such a tornado one is ready to exclaim like the Psalmist concerning Deity, "Whither shall I go from thy spirit, or flee from thy presence?" There is no place of escape and safety. We are accustomed to think of our homes and lives as safer than those of people who inhabit districts where earthquakes and volcanic fires are of frequent occurrence, but the visitor to such scenes as Hazel Green once presented, if he has to run the gantlet of some one of these destructive causes, will choose any of them in preference to the tornado. This much we have said by way of attempt to prepare the mind of the reader to realize the power of the wind to destroy. Every one knows that the wind can blow down fences or upset houses, but it is difficult for one to believe, who has never seen, that it can lift heavy timbers, large animals, and even large rocks, and carry them about as it does feathers. On a gusty day, when the streets are dry, we see the wind filling the air with dust, leaves and dry dirt, but one who has never seen cannot easily imagine that it will plow up a pasture until every foot of the ground is turned up and black as field fresh plowed, and spatters of soft mud from the size of a drop of rain up to the size of your hat are taken from all over its surface and dashed down in other places like rain and hail. This was done by the Hazel Green tornado before it reached the village. How it does is something of a mystery. Such storms are whirls. They are the same as little whirlwinds we frequently see in summer, making traveling spirals of the road dust, and which have strength, perhaps, to carry your hat; but the tornado compared with these is as the elephant to the ant. It performs marvelous little feats as well as great ones. It will take brittle sticks that with your hands you could not push through a card board without breaking, and drive them eight or ten inches into the hard earth. It will drive sticks and boards three to four feet into the ground where with an ax or mall you could not drive them a foot without battering them to chips. This, it does on the principle that will carry a tallow candle through a thick board when shot from a gun. But we must more particularly describe the Hazel Green tornado and its path.

[The above diagram will serve a purpose, though inaccurate. The up and down streets should point a little to northwest and southeast. The cross street is the one named Sixth street on the county map.]

On Friday, March 10, between 4 and 5 o'clock in the afternoon, many persons in the village saw the storm coming. A dark and threatening cloud was seen due west, over Sinsinawa Mound. At first it appeared to course toward the southeast. About three miles southwest of Hazel Green this cloud met with another, which had been approaching toward the northeast.

The two combined soon appeared to reach from earth to heaven, and the thick black clouds were seen to roll in and out of each other like the black smoke from a smoke-stack, supposing that to be as large as a mountain. The roar of the storm could be distinctly heard. Mr. J. S. Crawford described the sound as of a mighty grinding of timbers. To Mr. Magor the sound was like a heavy storm on the sea-shore. If one can imagine an instrument that works something like a syringe, as large as the circle of the tornado, and which, as it travels, sucks up trees, houses and patches of earth, whirling them around with the velocity of a discharged cannon ball, he may imagine the noise made by the tornado. As it advanced it cut down everything in its way. Ponderous bodies were sucked up hundreds of feet into the air. If you fill a funnel with water and let the water run out of it while in a circular motion, a hole will be formed down through the middle of the water, through which the air passes upward. The whirling motion of a tornado acts in the same way. It tends to create a vacuum in its center, and at that point could lift very heavy bodies. This tornado cut a path about 150 yards wide, its path being as curtly marked along its edges as the track of a reaper in a field of grain. Many who saw it coming fled to their cellars, and some were saved in that way. Near the village it twisted a grove of small timber into withes. It took a northeasterly course through the south half of the town. A line drawn from James Edwards' house to Chris. Andrews' will define the northwest edge of the track, and a line from just south of the Masonic Hall to Mrs. Berryman's house will define its southeast edge to those acquainted in the village. Within these limits everything was destroyed. John Fink's house was the first in the track. It was uprooted and its occupants not injured. The Masonic and Odd Fellows' Hall, a large building with stone walls two feet thick, was pulled down to heaps of stones. No vestige of its north wall remained, and the heap of stones left no appearance of ever having had any arrangement of man. Parts of the other walls were left standing. The inside of the building was utterly wrecked; much of it, including the lodge furniture, was carried away. Next north of this building was Mrs. Farley's. It was carried away bodily, with all its contents, from over the heads of two occupants. They had retreated to the cellar and were not hurt. The next house north was owned by Mr. Schabacker, and occupied by Fred. Plude. The house was torn entirely away, and a child of Mrs. Plude's had an arm broken. Next north of this was Mr. Joseph Clementson's residence. Its room was carried away and the frame pulled to pieces, though left partly standing. Mrs. Clementson and daughter were in it and escaped uninjured. Mr. William Fiddick's house next north was carried away entirely, hurting only a child, whose head was severely cut.

Going back to the south side of the swath of destruction, and on the east side of West street, the large snath shop which stood within the junction of the two streets was razed to the ground. Next north of it was the stone residence of Mrs. Richards. It was a very heavy and strong structure, the walls nearly two feet thick. The roof was lifted off, the partitions torn to pieces, and the heavy rock gables fell inside. The walls up to the gables were left standing, but warped out of shape. Eight persons were in a room in the north end of the building. Four of them were instantly killed, namely: Mrs. Elizabeth Richards, her daughter Lizzie, aged about 15, Mrs. T. H. Edwards, daughter-in-law of Mrs. Richards, and a child of Mrs. Edwards. They were killed by the heavy gable falling upon them. They were on the side of the room away from the wall, but the floor gave way on that side, and its joists resting against the end wall, allowed the rocks to fall upon the bodies, crushing some of them to shapeless masses. Mrs. Thomas Magor and child, and two others, were in the room, and, protected by the slanting floor, were unhurt. Some of them crouched under a piano, which also afforded some protection. Johnson Richards, aged 18, was in a hay loft back of the house, and was killed. Thomas Magor was in the same stable below, and had his face badly cut. The stable was shattered to pieces, and a trotting horse owned by Thomas Magor killed. Across an alley north of the Richards House was that of L. S. Eastman. It was a frame house, and most of it was blown off the floors, the rest shaken to destruction. The family were all in it and received no injury. The next house north was James Edwards'. It was entirely demolished and its inmates

not seriously hurt. On the west side of the next street east—Main street—John Looney's house is first in the order we follow. It was lifted entire, and dashed down in a direction the reverse of that of the storm. Mrs. Looney was found lying on the wrecked floor of Mr. Eastman's house, which was thirty or forty yards west of Mr. Looney's. She died within two hours. Charles Schabacker's smith shop, a large, new and very strong building, next north, was dashed to fragments. The men at work in it escaped. The Primitive Methodist Church was the next building north. It was pulled into sections and dashed to the ground.

Returning south to the east side of this street, Mrs. Berryman's house was the first nearly destroyed; its roof was blown off. North of it was Matthew Thompson's large two-story house. It was lifted off its foundation and turned nearly quartering around, where it lodged against trees. The roof was carried away and the house was otherwise badly damaged. Of the four persons in it, one was hurt—not badly. Edward Thompson's furniture store stood just north. It was a large building, well filled with furniture. The building and contents were all blown away as chaff—some fragments being found miles distant. The work-shop back of it was totally destroyed. Edward Thompson's house, the next north, a large, new building, was lifted from its foundation, not even a floor left, and scattered to the winds in splinters. A son and daughter, Edward and Emma, were carried a square's distance and injured, but not dangerously. Next north of this was Joseph Clementson's carriage-shop; it was formerly the Congregational Church, and was large and strong. There were new buggies and carriages in it that had never been on the road. The building and contents, down to the floor, were all swept away. Mr. Clementson was in it. He was found lying with a heavy timber resting on his body, and his right leg broken below the knee. Mr. Mason was in the shop and was injured some on the head. Mrs. Hobbie's house comes next; it was a good two-story house. The east wing was torn away and destroyed, and the main building was banged up until nearly a wreck, by other timbers driven against it. The next north was Joseph Jackson's house. It was blown entirely off the floor and dashed to pieces against Mrs. Hobbie's house. Seven persons were in it. Among them, none were reported injured except Mrs. Jackson, who was seriously hurt. One son, Alfred, aged 14, was in Mrs. Hobbie's barn milking her cow, which he had engaged to do while she was in Lancaster attending court. The unfortunate boy there found instant death. Northeast from Mr. Jackson's house, on the cross street, Christian Andrew's house was unroofed. East of the last-named row of dwellings, there were no others until we come to Dr. Kittoe's, some 200 yards distant. It stood there for awhile a picture of ruin. The falling and whirling timbers from other buildings are driven into it from every direction. It was unroofed and shivered and had the appearance of being ready to fall to fragments. It was partially protected by trees, and served the good purpose of saving his family from injury. A hundred feet east of his house stood his barn, in which he had two horses and a couple of tons of hay. The whole establishment was lifted sixty or seventy feet up and carried northwest about 150 feet, where the building came down in fragments. The horses were thrown about 100 feet further in the same direction, and found dead. Thence on, the storm had an open field until it reached the cemetery. Mr. R. G. Magor's fine brick residence was barely out of its range. He looked upon the black and mountainous besom of destruction as it approached, and must have thought what an infinitely little creature man is with all his boasted inventions and power to destroy. A mile further, in Scrabble Hollow, Mr. Brewer's house was in the track of the whirlwind. He saw it coming, and thoughtfully took his family into a root-house, made in the side of a hill. In a few minutes, his house was among the other splinters and timbers whirling in through the air. Another mile further and the residence of Thomas Allen was in its path. The house was carried backward 100 yards and dashed to pieces. Mr. Allen was fatally injured. He lived barely long enough to inquire concerning his family, of those who found him. A son, William, was killed. Mrs. Allen was dangerously hurt. James Allen had an arm broken and was otherwise injured. Hannah Allen was badly bruised. Here ends the most heart-rending part of this horror. We worry and work our lives away over property, and when it comes in comparison with life, it is nothing. Some will even laugh that they have es-

aped with their lives. So in Hazel Green may be seen people whose all of worldly goods were in an instant picked up and made like kindling-wood, even their papers, their money and clothing lost in the wanton winds, yet these same people were happy as any you will meet; but those who lost near and dear relatives were sad indeed. Some seemed to feel that even the good God had signified a determination to tear from them all upon which the heart places affection.

Besides the buildings named as totally destroyed, there were many other barns, stables and outbuildings blown away. With the houses went also the furniture and clothing. Along the track of the destroyer for miles the fields were covered with splinters, boards, scantlings, shingles, carpets, bedding, clothing, lace curtains, window blinds and shutters, bottoms of chairs and other pieces of furniture, rims, spokes and other pieces of huggy wheels, pieces of coffins, tin gutters and everything conceivable as material or contents of a house. The houses were so effectually torn to pieces that it cannot be told to what house pieces found belonged. Trees that were not themselves injured were full of the evidences of destruction. Up in their branches were many articles of apparel, and beds and carpets. Among the debris in and near the village, were dead horses, cattle, hogs, cats and chickens. It is estimated that over fifty head of horses and cattle were killed. There were also many other houses damaged. Scantlings and boards were driven into the roofs and sides of houses out of the whirlwind's path with such force that they would go through like an arrow through paper. The houses standing were smeared with mud until they looked like the ground. Many fences were down; windows were broken. With the storm was very little rain. The black cloud was composed of mud and dirt. Great trees, some of which were solid oaks eighteen inches in diameter, were twisted off and went sailing through the air. In this account we have aimed to exaggerate nothing. Distances are guessed at, and some may be too great, others too small. As to the havoc, if any reader saw it, after reading this account he will say we have not half done it justice. No one can fully believe in such stories without seeing for himself.

The scene at the residence of T. H. Edwards, where lay the remains of five persons, two, the wife and infant child of Mr. Edwards; his mother, Mrs. Richards, and his half-brother and half-sister, Johnson Richards and Lizzie Richards, is described as having been most horrible. Mrs. R. and daughter lay side by side, covered with a sheet red with their life's blood. On the opposite side of the room were the mother, Mrs. Edwards, and her child, both still in the embrace of death. To the left of the door, and upon a couch, reposed the lifeless body of Johnson Richards, whose face scarcely bore the imprint of death. The scene was the most heart-rending ever witnessed. The agonized husband, father, son and brother was the picture of despair, and while looking upon the faces of those near and dear, whose lips were sealed to him forever, the trembling frame, falling tears and deep-drawn sighs spoke in tones that could not be misunderstood, of the agony which filled his heart. In another house near by, lay the remains of young Jackson, and still farther away, Allen and boy, the prop and idol of the family. Providence never visited a village with a worse affliction, and strong, indeed, must he be in the faith who could fold his hands resignedly, and exclaim, "He doeth all things well."

A public meeting of the citizens was held at Crawford's Hall about 9 o'clock in the evening of the same day, to take into consideration the overwhelming disaster which had overtaken the village, and to devise ways and means of relieving the distressed. Mr. John L. Crawford was called to the chair, and Mr. Robert Hayes elected Secretary.

On motion, a police committee was appointed, and the following-named gentlemen selected to draw up a detailed statement of the losses occasioned by the whirlwind: Rev. Lawson, John L. Crawford, John Muffet, Robert Hayes and Thomas Anthony.

On motion, the following aid committee was selected by the chair: John Muffet, John Cox, William Jeffrey, William Allen and Edward O'Neill.

The following is a correct list of the dead and wounded:

Killed—Mrs. E. Richards, Johnson Richards, aged eighteen years; Lizzie Richards, aged sixteen; Mrs. T. H. Edwards and child, Alfred Jackson, aged fourteen; Thomas Allen and son, and Mrs. John Loony.

Injured—Joseph Clementson, leg broken; Edward Thompson, hip injured; child of Frederick Plude, arm broken; Amanda Morcom, head cut; Thomas Magor, badly cut about the face; Mrs. Tregoning, arm injured; Joseph Mason, slight injury on the head; child of William Fiddick, head cut; Dora Thompson, arm injured; Mrs. Joseph Jackson, injured badly; Mrs. Fairly, leg injured; Mrs. James Edwards, face hurt; James Treganza, injured slightly; Frank Thompson, head and arm bruised; Miss Eliza Rodda, badly injured.

The total losses are as follows:

J. F. Eastman, barn.....	\$400
Chris. Nolte, barn.....	200
Dr. Kittoe, house and barn.....	2,000
Mrs. E. Richards, house and barn.....	2,500
Richards estate, stone building.....	2,000
Total.....	\$7,100

The partial losses:

J. Treganza, house and barn.....	\$150
Richard Tregoning, house and barn.....	250
Primitive Church parsonage.....	100
James Austin, dwelling.....	100
Charles Schabacker, dwelling.....	100
Joseph Johns, dwelling.....	200
Mrs. Necollins, dwelling.....	100
Dr. Egloff, dwelling.....	100
John Gribble, barn.....	200
M. Chandler, dwelling.....
Arthur Gribble, dwelling.....
W. Allen, dwelling.....	100
Mrs. Fsirley, dwelling.....	1,000
Fred Plude, dwelling.....	600
Joseph Clemenson, dwelling and shop.....	4,000
William Fiddick, dwelling.....	600
George Wasley, dwelling.....	600
Levi Eastman, dwelling.....	1,500
James Mason, picture gallery.....	250
Mrs. Oats, dwelling.....	750
Mattie Thompson, dwelling.....	2,500
M. & E. Thompson, furniture-shop.....	4,000
Edward Thompson, dwelling.....	2,000
John Looney, dwelling.....	1,000
Charles Schabacks, blacksmith-shop.....	2,000
Primitive Church.....	2,000
Joseph Jackson, dwelling.....	1,500
Kit Andrews, dwelling.....	700
Mrs. Hobbie, dwelling.....	1,200
Mrs. McClay, dwelling.....	100
Henry Drink, dwelling.....	100
Total.....	\$27,000

Making a total loss of \$36,000.

Incidents.—Only two of Mr. Edward Thompson's family were in the house, a son and daughter. The family was in the central part of the dwelling, into which they repaired at the approach of the storm. As the house commenced swaying, the crockery was sliding from the shelves, and the young man, while preventing its falling, was, with the young lady, in an instant whirled through the north window, and both carried over an orchard in a circuit of 200 yards in a southeasterly direction, landing against the fragments of Dr. Kittoe's dwelling. Both were severely bruised, but recovered. Mr. Thompson left his furniture room and clung to a tree; soon apprehending great danger, he abandoned the tree for another. Upon this attempt, he was dashed forcibly against the tree, breaking the upper part of his hip-bone, and otherwise receiving internal injuries. He was confined to his bed, but was able in a few days to be around.

A little son of Thomas Magor, three years old, had hold of his grandmother's hand (Mrs. Richards, who was killed). In an instant he was thrown under the piano, where it afterward

appeared the large family dog had secreted himself for safety. In a moment's time the space was completely filled with mortar and rubbish. The dog soon dug his way out, the little fellow crawling through the same aperture in a decidedly cool manner, although nearly suffocated.

Willie Fiddick, about ten years old, was thrown from the rear room of the house (where the entire family were) into the street. Upon recovery, and seeing no home to go to, inquired lustily of every passer by, "Where are my folks?" He was so begrimed and blackened no one recognized him. Soon his father came along, and Willie made the same inquiry. His father asked him his name, neither recognizing the other. The faces of all the victims of the tornado were smeared with a material akin to stove blacking, and about as difficult to remove.

Mrs. Tregoning was in a small barn milking. The barn and cow were lifted and carried out of sight, leaving the lady and her pail all safe.

Mr. Brewer, whose family occupied the old Furnace House across the Scrabble Branch, had just reached home from the Diggings. Seeing the danger, he rapidly crowded his children and wife into an outer root-house. As he reached the doorway of the root-house, his dwelling entirely disappeared in the whirlwind, breaking it into ten thousand fragments. Mr. B. had been using nitro-glycerine four or five years, and, as he remarked to the writer of this some months before, lived almost constantly with thoughts of danger. To this probably may be attributed the safety of his large family.

Scores of incidents might be related in connection with this calamity.

Many families that lived outside the path of the cyclone feared its approach, and, in fright and amazement, performed ludicrous things. The shattered fragments and rubbish were soon cleared away and the village has somewhat regained its former appearance.

Could the solemn pageant of the Sabbath morning following the disaster, whose line of coffins and weeping mourners, be obliterated from memory, cheerfulness and hope would brighten all.

IMPRESSIONS AFTER VIEWING THE DESOLATION AT HAZEL GREEN.

The head must bow.
A spirit fleet, with accent sweet,
Whispered to me (I know not how),
In mildest strain, but language plain,
The head must bow.

The wisest sage, hoary with age,
The king in power, at the appointed hour,
Is not set free from heaven's decree,
The head must bow.

Parental years of life appear
To those above in strongest love,
With sorrowing pain we yield their gain;
They hold the prize beyond the skies.
The head must bow.

The youth amazed and trembling gazed;
The affrighted maid the scene surveyed,
The loving wife with feeble strife,
The babe caressed upon the breast,
Yield the last breath in the storm of death.
The head must bow.

What hopes and fears—what joys and tears—
What scenes of life in doubtful strife
In the dark shade are forever laid.
The head must bow.

But in quick time another clime,
Another shore with no tempest roar,
All shall behold—the young and old.
The head must bow.

Oh! glorious day, no sunset ray
 Shall fall upon thy horizon;
 But in bright spheres, bereft of tears,
 Those gone before to the shining shore
 Shall greet above, with hearts of love,
 The happy throng in gleeful song,
 After the head shall bow.

HAZEL GREEN, Wis.

The funerals of the victims took place on the Sunday following, and for many months thereafter the entire community was in mourning.

THE SCHOOLS.

The cause of education found an early and, it may be added, substantial support in the village of Hazel Green. Not only have public places of learning been liberally sustained, but private enterprises extended a gratifying support. In the fall of 1843, John Smith, at present engaged as mail contractor between Hazel Green and Cuba City, opened a school in a frame house on Lower Main street, built and furnished by public subscription. His roster of pupils was made up of scholars from all parts of the present township, and the course of study such as found favor from its simplicity forty years ago.

Mr. Smith remained in charge during the winter, but as soon as spring warned miners and farmers of the necessity for them to be up and doing, a vacation followed, and no summer school was taught. The following fall, a Mr. Bingham wielded the ferrule, and impressed "students" with the important relations borne by reading, writing and arithmetic to their civilization, remaining in charge until after the holidays, when he resigned, the vacancy thus created being filled by the appointment of H. D. York, still a resident of the village. Mrs. Jane Clark taught the summer school, and was succeeded by James A. Jones, now of Lancaster, who officiated two years in the capacity of pedagogue, when he gave place to Leroy Lockwood.

In 1849, the county was divided into townships, and school districts organized. At that time, there were two schools in operation in the village; one on Lower Main street, already mentioned, and one in the frame building immediately north of the Crawford residence. H. D. York was appointed Town Superintendent, and every means that would promote the plans agreed upon were adopted. As a result, success has been one of the important features of the system in Hazel Green, which to-day is unsurpassed by that utilized in any other portion of the county.

These buildings supplied all demands until 1853, when enlarged facilities became necessary, and the present brick structure was erected. It is two stories high, 40x70, containing four departments, and cost \$6,000.

In March, 1856, the Hazel Green Collegiate Institute was established by the Rev. J. Loughron, A. M., and for several years it occupied an enviable reputation among the educational interests of the Northwest. The design of the institute was to secure the advantages of a thorough training, and to give ladies and gentlemen desiring to teach an opportunity of special improvement. The institute was graded, and included primary, academic (two grades), collegiate and seminary, requiring seven years to complete. Dr. Loughron opened his institute in the Crawford Block, in the fall of 1856, assisted by I. H. Miller, Professor of Mathematics; Mrs. Mary L. Culver, engaged in the academic department; Miss Almira A. Culver, in the preparatory school; and Miss Delia C. Sanford, Teacher of Music; and that year 129 students of both sexes matriculated. The succeeding year opened auspiciously, but the panic and sequent evils prevented a full enjoyment of the hopes ventured in behalf of the institute, which was continued until the war broke out, when it was suspended, and has never been revived.

The present school employs four teachers, and is under the direction of a Board of Directors, consisting of George Broderick, Richard Pearce and John Cox. The course ranges from primary to high, requiring six years to complete, and requires an annual expenditure of \$2,000 to carry on.

THE POST OFFICE.

The post office at Hazel Green is among the oldest in the county, having been established when there was no mail service, and when letters were received at the office as the convenience of carriers consented.

It was first opened in 1838, with Jefferson Chandler, as Postmaster, "holding court," and conducting his official duties at Cottle's store in the lower town. Mr. Crawford, it is thought, remained in charge for nearly eight years, when Allen Preston was appointed his successor, and a tri-weekly mail was run from Galena to Mineral Point, via Hazel Green, Platteville, etc. The office was, during this and the administration of Dr. Mills, maintained in the Wisconsin House. James Jones was the next Postmaster, followed by J. M. Chandler, who was appointed in 1852, and retired in 1861; until 1855, the office was in a building near Johnson Stephen's store; in that year it was removed to Crawford's Block, where it has since remained. Jefferson Crawford succeeded Mr. Chandler, serving until his death, when his place was filled by J. L. Crawford, decedent's son, who remained in charge until 1866. Josiah Thomas was appointed to the trust in that year, and is still in charge.

CHURCHES.

St. Francis' Catholic Church.—In about 1845, the Rev. Father Samuel Mozzuchelli, identified with the cause of religion and morality throughout the lead mines for years previous, as also subsequent to that date, held the first Catholic services in the immediate vicinity of Hazel Green, at Hinch's house, below the village site, where a mission had been established. The congregation was composed of the families of M. Heffron, Sylvester Bryon, Patrick Murphy, Michael Flynn, John Fraerty, J. V. Donohoo, Charles and Timothy Breen, Patrick Bryan, Thomas Nean and some others, chiefly composed of miners. For over a year the society worshiped thus, meanwhile making arrangements for the erection of a church edifice, which culminated in 1846, when the brick church still standing and occupied at the north end of Main street was commenced. For one year labor was employed without any cessation, and, in 1847, its completion was reached and dedication celebrated under the auspices of Bishop Henni, of Milwaukee.

The building, as stated, is of brick, 30x50, one story high, with a capacity of seating a congregation of 250, and cost a total of about \$1,500, the principal portion of which was raised by subscription among residents of Hazel Green Township and vicinity. The Rev. Samuel Mozzuchelli remained as Pastor until his removal to Beetown, assisted by the Rev. Francis Mozzuchelli, a nephew, and succeeded in building up a congregation estimated at not less than 300 communicants. In 1851, St. Rose Church was built in Smelser Township, which had the effect, it is thought, of diminishing the number of attendants, and in some degree weakening the influence exerted by St. Francis. Be this as it may, however, when Father Mazzuchelli retired, the church became a mission belonging to the Mound, and services were conducted by prelates resident at Sinsinawa. This was continued until about 1866, when the Dominicans ceased their labors here and the Rev. Father Prendergast was assigned to the charge. From that date up to June, 1880, the parish remained several, presided over at intervals by the Rev. Fathers Berkhauser, James Staley, Ambrun, Cleary, Cliber, Allbright, Zara and J. F. O'Neill, the latter dissolving his connection with the church at the time above indicated, since when it has been again a mission.

At present, the church property—which includes a parsonage built in 1869, and cemetery grounds purchased in 1874—is valued at \$3,000; the congregation numbers thirty families.

Christ Church.—An Episcopal Mission formally located in 1875, though services had been held in Hazel Green as early as 1856, when the Rev. T. N. Benedict, Rector of Grace Church, Galena, visited the village and conducted.

In the fall of 1875, Dr. Kirby Kiltoe, a pioneer resident of the town, appealed to Bishop E. R. Welles, D. D., to organize a society in Hazel Green. In response to this application,

the Rev. C. H. Canfield, the minister in charge of the parish of Platteville, visited Hazel Green on alternate Tuesdays, and preached, Dr. Keltoe officiating in a diaconate capacity on Sundays. The 5th of March, 1876, witnessed the final meeting of the congregation, for on the succeeding Friday came that terrible visitation, the tornado, which created such havoc and destruction throughout one portion, at least, of this quiet village. Dr. Kiltoe removed to Darlington, the members, so to speak, of the society separated, and, from the date last mentioned, until 1878, no services of the Episcopal faith were held in Hazel Green. In June of that year, the Rev. George H. Drewe, a graduate of the University of Oxford, England, was sent to the village and resumed work in the cause, Crawford Hall and the German Presbyterian Church furnishing accommodations for the purposes of an auditorium. In October of the same year, a building, which had previously been occupied as a bowling alley, was rented and adapted to church uses at a cost of \$500, wherein regular services were held by Dr. Drewe, and where, a year later, Bishop Welles administered the rite of confirmation to twelve candidates.

During 1879, the Pastor and congregation made strenuous efforts to procure the subscription of a fund for building the present edifice, and before the close of that annual had completed arrangements for so doing.

The church was finished early in 1880, and dedicated on St. Matthew's Day, Right Rev. Bishop Welles officiating. It is of frame, 40x24, handsomely arranged and finished in pine, elaborately furnished, and possesses capacity for seating one hundred and fifty worshipers. Its cost was estimated at \$800. The Rev. George H. Drewe is Pastor, and the congregation numbers fourteen communicants.

The Primitive Methodist Church.—Previous to 1861, the congregation which that year became attached to the Rocky Ford Circuit of the Primitive Methodist sect was identified with and a portion of the Methodist Episcopal Church of Hazel Green. Ruling in the general work of the church, however, caused dissatisfaction therein, and culminated in separation, which found expression in the establishment of the society under consideration. The members who withdrew were Thomas Andrews, Samuel Andrews, Robert Andrews, Christopher Andrews, John Cox, John Martin, George Broderick, William Berryman, Peter Trenartha, Andrew Pierce, Joseph Johns, James Johns, James T. Taylor, Thomas Stillman, Richard Tregonning, and some others.

Upon the completion of their organization, the society purchased the edifice which had been erected by the Christian denomination some years previous, and called the Rev. Henry Lees as Pastor. Here they worshiped until the tornado of 1876, which put a period to their local habitation, and for a season they were without an edifice. The premises were rebuilt, however, without delay, and have since furnished ample accommodations. The church is 30x45, occupying the old site. Will seat three hundred and fifty, and cost \$1,500.

The Pastors who have officiated have been the Revs. Charles Dawson, Joseph Hewitt, James Alderson, Jasper P. Sparrow, John Hernden, John Johns, W. J. C. Bond, J. Harrington and Thomas Jarvis, the present incumbent.

The congregation numbers eighty, and church property is valued at \$2,000.

Methodist Episcopal Church.—This society was organized in 1845, by people of various denominations in the vicinity who were without a regular place of worship, but their names, together with that of the Pastor, are lost to posterity, the records of the church having been lost in the tornado of 1876. The first place of worship was in the old schoolhouse below the present residence of Edward Williams, which was retained until 1849. In that year, through the labors and contributions of the Rev. John Williams, Robert Langley and others, the present church edifice was built at a cost variously estimated at from \$1,300 to \$2,000. Here the Rev. Frank Smith labored zealously for the promotion and elevation of the church, the first of a line of servants of God who have shed a luster upon the course and worked the salvation of the multitude.

In 1856, so generous had become the congregation in point of numbers, that it was found necessary to enlarge the auditorium of the church, which was accomplished the same year by the

addition of a twenty-foot building to the original premises, at a cost of \$800, making the edifice 30x66, sufficiently commodious to comfortably seat a congregation of three hundred and sixty. Since that date, the church has answered the purposes for which it was built, to the fullest extent.

The present congregation numbers 200. The church property is valued at \$1,700, and the following ministers have served since 1860: The Revs. J. I. Williams, P. S. Mathers, M. Dinsdale, John Knibbs, A. W. Cummings, William Sturgis, P. E. Knox, W. Hall, J. Lawson, A. J. Davis and S. S. Benedict.

The German Presbyterian Church.—This society was organized about 1852, when a meeting of German Calvinists was held in the schoolhouse at the lower end of town. Here the congregation worshiped until 1854, when the present church edifice east of the Episcopal Church was built and dedicated, the sermon being preached by the Rev. John Bently. The church is 24x36, of frame, with a capacity of about two hundred, and cost \$500.

From its organization the society has prospered, and is, to-day, attended by a large congregation exclusive of members. The present communicants include forty persons; the church property is valued at \$500, and the following Pastors have served since its foundation: The Revs. John Bently, James Renskers, Jacob J. Schwartz, John Van Derloss, Bernard Van Derlos, Gottfried Moer, John Levier, Jacob Stark, Joseph Steinhardt, Mitchell Biddle and Joseph Weittenberger, the present incumbent.

HAZEL GREEN CEMETERY

was laid out in the early days of the village, on lands donated by Preston & Young about the year 1844. The first adult buried there is reported to have been Lewis Curtis, one of the oldest settlers in the township. His funeral took place May 31, 1845, the Rev. Avatus Kent, of Galena, officiating, and the pall-bearers being John Edwards, Hiram Weatherbee, Jefferson Crawford, P. P. Patterson, Capt. De Selhorst, of Elk Grove, and James Gilman, of Jamestown, since which solemn event many of those who attended have, too, been laid beneath the daisies. Plague, pestilence and the tornado have each swept through the ranks of life since that day, and stricken down the loved of earth.

The grounds, while by no means demonstrative, are calculated to attract by the simplicity of the surroundings, the quiet ornamentation of the grounds, and the severe style of the entablature, realizing to its fullest extent the immortal picture traced by Thomas Gray.

Many indeed, since the sod of that pioneer was first turned in this sacred spot, have been touched by the Master of mortality and laid within its reverent precincts, who, with the forefathers of the hamlet, sleep and await alike the hour when time, uniting with eternity, shall summon them to plead before that bar whence there is no appeal.

Among the distinguished dead who lie buried there is James Gates Percival. He is sleeping in the lot of his friend and patron, Dr. Jenckes, and visitors to Hazel Green are pointed out the grave of the author, the scholar, the poet and the Christian. He went the way of all flesh at an age when men of his mold could not be easily spared, and created a vacancy that has never been filled. But he left behind him the memory of generous deeds, and a goodness of heart that can never be forgotten by acquaintances and friends who recognized his possession of those qualities which render mankind more charitable, more considerate and more sympathetic to those who fall by the wayside in the checkered aisles of life. He needs no other monument.

In 1852, a re-survey of the cemetery was had, and an addition of three acres made, which was divided into 165 lots, nearly all of which are owned in the village. The grounds were formerly in charge of a committee, but this has been abandoned, and now a sexton only is considered indispensable in their management.

“ Can storied urn or animated bust,
Back to its mansion call the fleeting breath?
Can honor's voice provoke the silent dust?
Or flattery soothe the dull, cold ear of death? ”

SECRET SOCIETIES.

Simsinawa Lodge, No. 16, I. O. O. F.—Was first chartered May 4, 1847, with the following membership: N. Hennip, William Brunt, E. W. Prentiss, G. E. Skinner, Charles G. Goff, Sylvanus Jessup and W. H. Suttle. The meetings were held in lodge room in what was known as the "old Rock Store," which was occupied by the craft conjointly with the Masonic fraternity until its destruction by the tornado in 1876. By this calamity the society lost everything, including its charter, records, regalia, etc., and was assisted in its efforts to re-organize by sister lodges throughout the State. This was finally accomplished, including the issue of a new charter, and in conjunction with the Masons, they purchased the Crosby store of George Broderick for \$2,500, where they have since met.

The present officers are: George Birkett, N. G.; James H. Mills, V. G.; J. H. Gribble and J. H. Cox, Secretaries; and John Birkett, Treasurer.

The present membership is fifty-five; meetings are held weekly on Saturday nights, and the lodge property is valued at \$3,000.

Hazel Green Lodge, No. 43, A., F. & A. M.—This lodge was organized under a dispensation granted December 1, 1852. On June 14 of the following year, a charter was granted with P. H. Sain, W. M.; L. D. Phillips, S. W.; James Ormiston, J. W.; T. W. Nash, Treasurer; John O'Connor, Secretary; B. Wilcox, William Dinwiddie and D. Styles, charter members.

The lodge met in the old stone store until its destruction by the tornado in 1876, when they became part occupants of the Crosby store purchased of George Broderick, in company with the Odd Fellows, where they have since convened.

The present officers are: John Birkett, W. M.; Edward Thompson, S. W.; John Williams, J. W.; James Edwards, S. D.; W. T. Andrews, J. D.; Thomas Nash, Secretary; R. D. Roberts, Treasurer; and John Kohl, Tiler.

The present membership is 56, and meetings are held on Friday evenings, on or before the full moon.

Rechabite Lodge, No. 53, I. O. G. T.—Was first organized October 10, 1860, and is to-day one of the most prosperous and successful temperance societies in the Northwest. The organization was effected under and by virtue of the provisions of a charter granted to Miss Lizzie Shyham, Mrs. Frances Shabacker, Charles Shabacker, D. G. Purman, F. A. Thompson, M. J. Skinner, John R. Ralph, F. C. Frebil, Chester Cole and Robert Dobson. Of these D. G. Purman was W. C. T.; Miss Lizzie Shelham, W. C. T.; Mrs. Frances Shabacker, Treasurer; M. J. Skinner and F. A. Thompson, Secretaries; F. C. Frebil, Chaplain; and John R. Ralph, Marshal.

Meetings were held in the old stone store, and so continued until 1876, when the destruction of that rendezvous of Templars, Masons and Odd Fellows compelled the securement of other quarters, and Stone's store was procured, which has since been occupied.

The present membership is stated at 100. The present officers are: William Fern, W. C. T.; Miss Jennie Cox, W. V. T.; John Fern, Treasurer; Edward Thompson, Miss Ruba York and Miss Minnie Thomas, Secretaries; the Rev. T. S. Benedict, Chaplain; Frank Fern, Marshal; and Josiah Thomas, Representative to the Grand Lodge.

Meetings are convened weekly, and the value of lodge property is estimated at \$300.

THE HAZEL GREEN BAND

was organized August 25, 1880, and has attained a degree of prominence and favor rarely accorded associations of similar objects and experience. The officers then, as now, as also the members, were J. J. Crawford, President and Leader; George Mills, Treasurer, and E. D. F. Morcom, Secretary. J. J. Crawford, F. G. Thompson, William Andrews, Thomas Williams, Jefferson Crawford, Roy Williams, John H. Thomas, Thomas Simmons, Christian Andrews, E. D. F. Morcom and Frank Fern.

Frank Thompson, Jefferson Crawford and Edward O'Neill, Band Committee.

The property of the organization is valued at \$250, and meetings are held semi-weekly for practice.

LIGHTCAP'S MILL,

located about two miles west of Hazel Green, is one of the most extensive establishments of the kind in Grant County. The mill is of stone, the main building 32x54, and four stories high, with an addition 40x18, one story high. The undertaking was commenced in May, 1847, when the digging of the race was begun and completed in March, 1848, at a cost of \$11,000.

The mill proper contains three run of buhrs, with a capacity for grinding forty barrels of flour per day, and is valued, with the land immediately contiguous, at \$30,000.

CHAPTER XI.

POTOSI.

LOCATION—ORIGIN OF THE VILLAGE—THE SETTLEMENT OF THE VILLAGE—WILLIS St JOHN—THE POSTMASTER—FIRST BIRTH—EARLY LIFE IN THE MINES—MURDERS—POTOSI RECEIVES ITS NAME—A DUEL—INCORPORATION OF THE VILLAGE—THE EARLY MINING INTERESTS—THE SCHOOLS—THE PRESS—THE VILLAGE POST OFFICE—RELIGIOUS—BUSINESS ENTERPRISES—SOCIETIES—CEMETERIES—ADJOINING SETTLEMENTS—DUTCH HOLLOW—BRITISH HOLLOW—ROCKVILLE.

LOCATION.

Preliminary reference to the early settlement and progress of Potosi Village must necessarily be made to the town of which the village is to-day the prime factor. The town of Potosi is bounded on the north by Lancaster, on the east by the towns of Harrison and Paris, on the south by the Mississippi River, and the west, partly by that highway, and partly by Waterloo. It is centrally located in Grant County, with an area comprising 34,109 acres, of an assessed valuation, in 1880, of \$362,887.

ORIGIN OF THE VILLAGE.

Section 34 upon which the village is located was donated by an act of Congress, approved June 15, 1844, to the State, for the purpose of improving Grant River. This was further provided for by subsequent legislation, and Nelson Dewey, Henry L. Massey and James E. Freeman were appointed Commissioners to survey the same. The survey was completed by James E. Freeman and Henry L. Wiltse (the latter subsequently becoming Surveyor General in the Land Office at Dubuque), the sub division appropriated into in and out lots, the former containing two and one-half acres each, while the latter were each sixty-six feet front, by 120 feet deep. The survey was completed and filed in the office of the Register of Deeds of Grant County, June 19, 1845, and deeds issued to purchasers by Gov. Henry Dodge, attested by John Catlin, Secretary of State, the proceeds being used in the construction of a canal from the Mississippi to the Grant River. The work has remained uncompleted, however, owing to the exhaustion of the fund, and has never been of much practical utility to the town, save for tugs and wood-boats, and some other purposes during high water.

The lower part of the village, comprising the section whereon Hail's brewery is now situated, called Van Buren, with Lafayette still southward on the left bank of Grant River, previous to the building up of Potosi proper, were the principal business portions of the town. The former place is known as the "Van Buren Entry," having been originally entered by Joseph Wooley and Robert Templeton prior to 1849. It was reserved from sale for a time by the Government on account of being mineral lands; but, as the story goes, witnesses were hired to go over it blindfolded, then taken to the land-office and sworn that they had been all over the ground and could see no mineral. This may or may not be true, but the sections were never of any great moment as mining ground, and the Government lost nothing in the sale of these rough and broken points.

The surface of the town, it may be said, is mostly of a rough, broken character, being traversed by many deep ravines or hollows, which debouch into the valleys of the Grant and Platte rivers. The best arable land constitutes the southern part of Boice Prairie. The soil is a rich gray loam, well adapted to the growth of corn, as also the principal cereals, and being embedded upon a substratum of clay, retains its moisture for a great length of time in dry seasons. Along the bluffs of the Mississippi, and upon the farms which reach out to the borders of Grant and

D. W. Carley M.D.

BOSCOBEL.

Platte Rivers, a new industry is rapidly obtaining in the cultivation of the grape, and wine of native manufacture bids fair to take the place of New England hard cider and beer of Bavarian hops.

The earliest settlement is believed to have taken place a brief space of time anterior to the Black Hawk war. Those who came in those days were men of heroic mold, and stood out from the common race of mortals like the inscription over the door of John Knox's residence at Neth-erbow. Some came into this section before the war—

“Cast ashore from Pleasure's boistering surge,
And left to rot and molder in the winds and rains of heaven.”

But all who came and went out from the mines were not failures. Many succeeded in business beyond their most sanguine expectations, and others arose from the humble occupation of miners to fill the most responsible and exalted positions in the land. Many were in affluent circumstances and from the first ranks of society, and came here for the purpose of extending their business and adding to their wealth. In early days, as all are aware, before the cry of war and blood rang out upon the frontier scenes of this yet undeveloped territory, the surveyors surveying in Wisconsin discovered lead on a branch about two miles from the Mississippi River where Potosi is located. The excitement in Galena was then very great for what was called the new discovery, and a party that had got acquainted started at once for the new El Dorado. Of the party was Sam Druen, as good a fellow as one ever knew, subsequently rich and living at Beetown. Druen's case fully illustrated that a stone lying still will gather moss, and no man is worthier than Sam to have moss all over him of the richest kind.

THE SETTLEMENT OF THE VILLAGE

was not delayed beyond the close of the war, when its ravines and uplands were covered with unbroken forests of oak trees, interspersed here and there with groves of the stately elm on the bottoms and along the margin of the streams, spreading out their huge branches, affording a delicious shade to the sturdy pioneer and his way-worn family. A few sporadic members of the birch, maple, cottonwood and other deciduous trees were found scattered here and there, while upon the summits and steep acclivities of the bluffs were to be seen a few stray wanderers from the perennial tribes, waving their dark green cones above the castellated rocks like the plumes of giant sentinels upon the battlements of Nature's walls. Beneath these solitary shades, and guarded by these lone naiad sentinels of the wood and stream, slept in tumuli and grassy mounds a strange and long-forgotten race of warriors. Here in the gray dawn of the world's existence, long before the light of its present civilization had reached this land, had dwelt a race of Anaks, possessed of a knowledge of the arts and sciences, played their brief part in the drama of human life, then laid them down in their last sleep, slumbering on till the wave of oblivion had passed over them, and blotted from the records of earth every evidence of their existence, save these green mounds and moldering bones beneath. But the Mound-Builders, who, though the earliest settlers, are left quietly reposing in the bosom of mother earth, “to dumb forgetfulness a prey.”

Next “in the course of human events” comes the red man of the forest, who is passed by, however, as a thief and a wanderer, and finally came into the country the progenitors of those who are here to-day. In the summer of 1832, days after peace followed in the wake of the victory at Bad Ax, Willis St. John and Isaac Whitaker, the latter accompanied by his wife, the first white woman in Potosi Village or township. Two adventurous pioneersmen made their way hither, and, discovering the mineral cave in Snake Hollow, whence the latter took its name, decided to remain and pursue their way to glory and to fortune.

It should, however, be observed that mineral had been discovered by hunters in 1829, when “float” was found in the roots of a tree that had been blown down by the wind on the hill opposite the new Catholic Church; also that a hut had been erected in the same year at the mouth of the Hollow by Tom Hymer. But owing to Indian troubles and other exigencies,

no permanent establishment was established in the vicinity of Potosi Village until the advent of St. John and Whitaker. Speaking of

WILLIS ST. JOHN,

an important factor in the sum of events in Potosi, the Hon. J. W. Seaton, says: "He was a man of athletic build, of fine form, and though advanced in years and broken in health at the time I knew him, the indomitable energy of his nature was unquenched, and would show itself in the strong sententious language that expressed the independence of his thoughts and the energy of that will which laughed at the difficulties that subdue and conquer weaker minds. Of his early life and personal history previous to his entrance to the mines, I am uninformed. He was among the very first that reached 'Snake Hollow,' as the Potosi mines were then called, and, by a lucky turn in Fortune's wheel, he was one of the first she smiled upon, and the place where she opened up her glittering treasures to his wondering gaze is still known as 'St. John's cave.'" It is said to have turned out a million of mineral, but that is a 'big pile,' and some allowance must be made for the authority of the story and the number of times it has been told. At all events it proved a valuable lode, and has been profitably worked down to a recent date. Its site is near the summit of the bluff opposite the place where the Catholic Church now stands. On the opposite side of the road, he built what was known as an 'ash furnace,' and did his own smelting. He was soon enabled to purchase real estate and other valuable property, and was long esteemed for his great generosity, kindness and manly traits of character. The Methodist preachers, who follow in the wake of civilization, soon found him out, and they never lacked for their favorite dish—yellow-legged chicken—while his roost was full. They taught him, too, their favorite texts, 'God loveth the cheerful giver,' 'Cast your bread upon the water,' etc., and St. John was the man ever ready to practice all good precepts. Through his instrumentality the Methodist Episcopal Church at Van Buren was built, and the quarterly dues of the local preachers and Elders were promptly met; and all went smoothly on till there came a crisis in the monetary affairs of the State Bank of Illinois. This, with other reverses of fortune, crushed the old man with its accumulated weight of trouble, and he never rose again. I have often listened to his sad story, which he would repeat with thrilling effect, and wondered at the mysterious Providence that could thus cast him off. He felt keenly the loss of the property that once gave him influence and position, but more keenly the cold shoulder and averted looks of those whom he had once befriended. Poverty, with all its deprivations, he could endure, but the neglect of those who should have given him succor in the hour of need, galled his high spirit and made him curse the race of man. He was warm and genial in his friendships, but bitter in his hates and scathing in his imprecations. For years the shadow of his once strong frame might have been seen moving slowly and sadly about our streets—a wronged and ruined man—emaciated by disease and only awaiting the end he knew was drawing nigh.

'One morn I missed him on the 'custom'd hill,
Nor up the lawn nor at the wood was he.'

"St. John was at rest. The spirit of a good and just man had returned to God who gave it." That year 1832, Whitaker and his wife lived in a cabin he built on the present Lewis farm. There was then no Potosi; the only objective point to speculators and the "spring run" was Oceola, some miles distant from Snake Hollow. During that and subsequent years the number and prominence of arrivals was both limited and of a pro forma character; among the first were Ruel Morrill and Sam Druen, already mentioned, and some others unknown to the present generation. In the spring of 1835, the miners began to flock in with regularity and charming frequency to those who were ambitious for their aid and muscular prowess. Among these were Joe Wooley, Bob Templeton, W. T. Ennor, Bill Clark, Myron Harper (who became one of the first merchants in the settlement, and kept a store on the present site of Joe Schneider's residence in Potosi), John Lyons and family, David Gillispie and family, William Woods, Theodore Barber, (now of Lancaster), William Gary, S. B. Chase,

David Goodrich and some few others who located at what subsequently became Van Buren, which then for the first time put in its appearance as the rival of Osceola. The latter had received as accessions during 1832-33, Elisha Brock, Tarleton T. Brock, Judge J. P. Cox, Peleg Hull, Mrs. Floyd, Terrence Coyle, Peter Coyle, etc. The latter was a noted character in his day, and founded the first store, which followed Van Buren in the direction of Potosi. He also arose to the dignity of a Justice of the Peace, and upon one occasion his court was honored by the presence of two distinguished barristers, the Hon. William Hull and Judge Ford. The defendant let fall some observation which suggested a lack of respect to His Honor, when the latter pulled his nose and afterward greased it with a burning candle, remarking that he would teach him to respect the court. Coyle was a keen, shrewd and intelligent man. He subsequently went to the Missouri mines, and died at Neosho.

The discovery of the cave, it might be said indeed soon peopled the ridges and hollows with miners intent upon their search for the precious ore. Many were successful—fortunes were made and spent in a day's race with time—and the towns succeeding weeks gave birth to were ruled by the magic of the mines.

THE POSTMASTER.

In the fall of 1835, C. Kaltenbach, who has been Postmaster at Potosi continuously for forty-four years, came to the village with his wife, and settled permanently on the site of Hail's brewery. In the following winter, or early the succeeding spring, occurred the first death, that of a miner, whose name is forgotten, but who was buried at the mouth of the Hollow. That spring, the vicinity of Potosi for miles around was peopled with miners. Life was, at best, in those days, nothing if not rapid, eccentric, strange, of a capacity for unlimited results, if unlimited opportunities could be afforded. Men and women and youths, fresh from the kindly influence and sacred association of home, came in, wrestled for a brief season and were heard of no more, or went back to the Lares and Penates of their lives, armored and cuirassed for struggles with poverty and oppression.

FIRST BIRTH.

On December 20, 1835, Mary, a daughter, was born to C. and Louise Kaltenbach—the first birth in the future village. She grew to young ladyhood, when she became Mrs. Hyman Block, and going with her husband to St. Louis, still is a prosperous resident of that city.

EARLY LIFE IN THE MINES.

The spring of 1836 opened auspiciously, and brought with it many additions to the population of Van Buren and La Fayette, the rival of that municipality. James F. Chapman and his family came in that season, as also did Brayton Bushee, with his family. The former took possession of the log house erected by Peleg Hull, while the latter secured quarters at another home equally hospitable. Among the others who came this year were George Maderie, Simpson and Tyre Oldham, John and Ira Dodson, all of whom united their fortunes with those of the village of Van Buren. In addition to these, Andrew J. Green, Anthony G. Street, a "sport," James Threlfeld, Patrick McKenny, Thomas Mudd, Richard Wilmers, William Casey, Alexander Walker, Alexander Polkenhorn, Owen McLaughlin and others identified themselves with other portions of the vicinage. Long Range and other very prominent leads were discovered that year, and life bore its most cheerful colors. The old Bell tavern was elevated into prominence this year, being built by Mrs. Fulton, and conducted by a man named Kibbe, a shiftless character, who abandoned his wife and "slid off" to escape others to whom he had confessed obligations. It was a story and a half log, containing a "big" fire-place, and surmounted by a "big" bell that discoursed most eloquently. These were the beginning of flush times in the mines, and these flush times were not infrequently the causes of wild lives of dissipation, and many from them descended to want and woe and death.

dollars; their successors millions. They were the occupants of a cabin at the head of the Hollow, relates an observer of their ways, wherein upon one day Thomas Moore was found in his straw bunk stretched in the arms of death. A deal table, a chair, and the garments worn by deceased, hanging by his side, bespoke at once the poverty and wants of the aged friends. A little company of associates gathered at the cabin, upon a Sabbath Day in early spring, a few brief words closed the ceremonies at the grave, and his poor companion returned to his cheerless cabin, where after spending a few days in mourning for "Master Moore," he too wearied of his lonely life, and laying down upon his pallet of straw a generous spirit, but one who had been afforded generous opportunities, fled to the mansions of rest.

In 1837, Osceola was practically dead, and Van Buren and La Fayette left to battle each other alone. The arrivals were the most numerous of any that had succeeded the foundings of corporate existence in this vicinity. Work was carried on with gratifying results in the mines, but improvements were not of a character correspondingly felicitous. W. A. Coons, John Van Dyke, Joseph Hall and others were among the prominent arrivals. John R. Coons established the firm afterward known as Coons, Wooley & Co., at La Fayette; Cook & Brennenman opened a store at the same place, as also did Brayton Bushee and Millechop & Co.; David T. Anderson and H. C. Green pleaded law; C. D. Crockwell, M. D., and Allen Hill, M. D., mixed pills, and the daily lives of men of influence and men of brawn were made up of cock-fighting, horse-racing, dog-baiting and hunting ducks. This continued through the season or until the panic of that year became an established fact, and dissipated the remembrance of days that were gone in pleasure, and profitless. The next year the largest and most elegant commercial establishments that had been raised up to that time were built in La Fayette, which was at this period the landing-place for steamboats upon which the lead from neighboring mines was shipped to market. Van Buren, however, had the post office. These houses included stores by Bushee, Coons, Wooley & Co., Millichops & Co., Snaer & Long's Hotel, Mr. Craigs store-house, Coons' dwelling and other places of note which have long since yielded to the inevitable. Big lodes were discovered, too, that year, and during the winter dealers ran out of whisky.

MURDERS.

In addition to these experiences two murders occurred. James Short was murdered by a man named Gardner, and his body thrown over the bluff where it was discovered weeks after by Crows, secured and buried. The murderer was apprehended at Jacksonville, Ill., three year after, and hanged for the murder of one Miles, confessing on the scaffold that he had "crooked" Jimmy Short. The other murder was that of Jim Crow and caused the most intense excitement.

POTOSI RECEIVES ITS NAME.

Cabins were accumulating at Van Buren, La Fayette, and at the head of the hollow since known as Potosi. In 1839, a meeting was held at the former place to procure the consolidation of these three places, and the concentration of business at one of them. The convention is represented as having been largely attended, and the question lucidly discussed. But after a free and frequent canvass of the situation, the head of the hollow bore off the palm of victory, and was named Potosi. Another authority insists that this is all unworthy of belief or reputation. He states that the town of Potosi followed the moves made by miners toward Dutch Hollow, and one of the first to appreciate the necessity for change was Owen McLaughlin, in whose saloon Jim Crow danced his final bar.

Immigration in 1839 was immense, coming chiefly from Missouri and Illinois. Among these were S. E. Lewis, J. D. Merritt, William Hewitt, Robert Porter, Henry Webster, William McDaniel, Ezra Hall, Hiram Hallowell, Isaac Martin, William Hosmer, William Kinney, Alfred Kinney, with their families; Samuel Yenawine, Thomas Harrison, Thomas Smith, Myron Patterson, C. C. Drake, Cornelius Kennedy, a Revolutionary soldier and the first pedagogue in the village; Briar Davis, Charles Davis, Newton Morris and some others. The improvements included storehouses by J. F. Chapman and S. E. Lewis; a dwelling by J. D. Merritt. The

Methodist Church, etc., and the village began to bear the appearance of life and activity it soon after bore for a period of nearly ten years.

In 1840, after it became evident that the movement made to establish Potosi would not fail of accomplishment, buildings went up rapidly, and improvements were projected and concluded by way of intimating earnestness in the cause with few delays. Woods & Massey opened a store in the building adjoining that in which Jim Crow was shot, and the succeeding year Langworthy & Massey erected a frame building for commercial purposes, which is still standing. In 1841, brick was substituted in some cases for frame in Potosi, when Solon M. Langworthy built a residence of that material, now owned and occupied by George Kinney.

During that year the present Banfil House was commenced by Cox & Groshong, but its completion was delayed until 1842, when it was in part occupied by Buchanan's saloon, and, in part, by the boarding-house of James Hudson. At this period there were two stores remaining in La Fayette, those of Brayton Bushee and D. A. McKenzie, and that of George Maderie in Van Buren, the balance of the commercial world having located at Potosi and represented by Langworthy & Massey, S. E. Lewis & Co., Lawther & Dyer, I. G. Ury and Mr. Brenneman. The improvements in both the former places ceased, while those in Potosi continued though with less frequency than during the year previous. In 1841, James White, who came to the region in 1836, erected a stone house for blacksmithing purposes, which was this year, i. e., 1842, remodeled and made a residence of. John Simplot built a brick house on Main street, now used as a harness-shop, and some other building was commenced and completed in 1843, when the Wisconsin House, now the residence of the Hon. J. W. Seaton, the brick building now used as the post office was erected by Henderson & Bell, and Dr. Hewett's brick dwelling, were added to the architectural features of the village.

A DUEL.

About this time an exciting and fatal duel was fought by residents of Potosi, which is briefly referred to here because of its local significance. One evening in the month of February, 1845, Charles Latimer, an Englishman of brilliant but erratic character, was seated in Clark & Wood's saloon in a condition of inebriety, which found expression in a song the sentiment of which was that the "lion was the king of beasts," whether haired or feathered. The saloon was filled with the usual number of customers at the time, many of whom were admirers of the "noble bird," who took immediate umbrage at the affront offered. Col. White, a Kentuckian by birth, and a man of accomplished education and manners, demanded an apology which was refused, when the Colonel challenged Latimer, who accepted, the terms being rifles at a hundred yards, on the Mississippi, opposite Weld's Landing, at 6 o'clock on the following morning. The meeting was had as arranged, Latimer attended by Deacon Kaltenback, and White by a Kentuckian named Gloucester, but as the principals were placed, Sam Morris, an acting Constable, James F. Chapman, Justice of the Peace, and Maj. John R. Coons, accompanied by others, appeared upon the scene and negotiated a settlement without an exchange of shots. The party returned to Potosi, where Latimer drank himself into a condition of mind where revenge became the predominant motive. The succeeding morning, he appeared on the street with two revolvers, one only of which was loaded, and perceiving Gloucester, the friend of Col. White, opened fire. The weapon happened to be the one that was loaded only with powder, and Gloucester demanded a "square deal," alleging he was unarmed. "Go and arm yourself then," replied Latimer. "for, by God, one of us must die." This the prospective victim did, and returned to discover his intended murderer whittling a stick with his bowie knife. Latimer rushed upon Gloucester, who retreated until his further progress was stayed, when he warned the Englishman to halt, and failing, fired upon him when the latter fell dead in the arms of Samuel Wilson, his friend, who had during the morning made unsuccessful efforts to dissuade him from his purpose.

Gloucester surrendered himself to the authorities, was tried and acquitted on the ground that he acted in self-defense, and removed to Chicago, where he subsequently died.

INCORPORATION OF THE VILLAGE.

During 1845, Potosi became an incorporated village. At that time it contained three churches—Catholic, Methodist and Presbyterian—the two latter of brick, the former of frame, well sustained schools, St. Mathew's Female Seminary, under the direction of the Sisters of Charity of the Blessed Virgin; a male academy, in connection with the Catholic Church, under the direction of James Ryan, formerly Professor of Mathematics at St. Vincent's Academy, Cape Girardeau, 2 lawyers, 3 magistrates, 3 physicians, 2 drug stores, 8 dry goods stores, 3 taverns, 1 watchmaker, 2 saddlers, 1 stove merchant, 1 fanning-mill maker, 1 chairmaker, 4 cabinet-maker's shops, 2 wagon-makers' shops, 2 bakers, 2 copper and tinsmiths, 2 milliners and dressmakers, 1 tan-yard, 2 tailors, 3 blacksmiths, 2 butchers, 1 dentist, 25 joiners, 12 masons, 1 confectionery, 6 groceries, a Masonic Lodge and Odd Fellows' Lodge, 1 painter, 1 livery stable, 2 brick-yards, 1 barber and 4 lead furnaces. The population was estimated at about 1,300, including 292 children between the ages of four and sixteen years, and a total vote of 400.

THE EARLY MINING INTERESTS.

The furnaces were run night and day, and were begun as early as 1834, when Willis St. John established a "log contrivance" in the hollow opposite the cave. This was followed by the furnace erected by Wooly, Ham & Spensley, on Rigsby's Branch. The same firm built the first blast furnace on the site of that erected at this time on Rigsby's Branch in 1837, which, in 1845, was owned and operated by Petty, Lightfoot & Pallisier. The French furnace erected by Francis Cholvin, in 1839, and the Snowden furnace, were also worked at the time mentioned.

At this time, the prominent residents in the village included the Hons. William Hull, T. J. Emmerson and C. K. Lord, Dr. G. N. Bicknell and family, Edwin Bicknell and family, Miss Emeline Fisher, subsequently prominently identified with educational interests, Dr. Bennett Armstrong, D. A. McKinzey, Samuel Wilson, Samuel Vance, William Lightfoot, T. and J. Pallisier, Joel Peddler, Martin Ennor, William McCulloch, L. D. Lewis, Thomas J. Kerling, A. B. Southworth, John P. Lewis, Levi Brown, Celestine Kaltenbach, James Wolfolk, Allen Wolfolk, John Swale, C. Smith, T. D. Connor, C. G. Hanscomb, T. W. Lakin, John Sweeney, Connors Sweeney, with many others.

In 1839, the village was visited by an epidemic of malarial fever, which carried off a large number, and again, in 1852, by the cholera. This latter experience is said to have been both extensive and fatal beyond the epidemic of 1839, and many a man who had led desperate charges across the treacherous days of that year, went down in the contest of 1852. Fear inspired all, and, notwithstanding the constant presence of that foe to health and care and humanity, many survived the calamitous occurrence through the Samaritan agencies employed for its alleviation. Men and women went about, it is said, with their lives in hand, ready to offer help—the consolations of prayer—to aid convalescence or shun for the tomb one who had made a pillow of his trials, and laid down to that eternal rest.

During the epidemic not less than thirty lives were lost out of a materially diminished number by removals, to an extent readily appreciated when it is told that every one who was able to do so left Potosi during previous years for California, and when the epidemic threatened, those left behind sought safety elsewhere.

From 1845 to 1850, little if any building was done, and beyond the erection of the Henderson Block, a handsome three-story brick edifice, put up in 1847, or thereabouts, no improvements of other than a transitory character were undertaken. Yet business, it seemed, increased, and everything accessible to predicate an opinion upon lent to the conclusion that Potosi had but scarcely entered upon the first quarter of success. Commercial transactions involving millions annually lent themselves to promote a healthy growth; mining, with apparently inexhaustible resources, was as popular as it seemed twenty years previous. The promise of more than successful rivalry to Dubuque, on the western shore of the Father of Waters, was hourly being realized. Farming, too, contributed to swell the universal prosper-

ty of the country, and the causes of education and morality had been substituted for the imperfect systems of law and order which had obtained in years gone by.

But while this outward semblance of the landscape was cheering, there was that behind the glitter and color of finish indicating the life of the village, so to speak, as a finished poem. Converted from a sort of wild life on the edge of a wilderness to a musical, rythmical arrangement, with apparently endless sources of variety, it was soon to become as a tale that is told, and devoid of interest. The cause of this was due almost entirely to the California gold mines, which attracted the millions from the eastern confines of the Rocky Mountains, who toiled through sunshine and shadow, to attain their wish in other lands, and revel in pleasures of other climes. To very many, like the Prophet of old, the sight of the promised land was lenient them. Many laid down and died as its limits were revealed to their excited and fevered gaze. Some few reached the El Dorado of their hopes, a very few were successful, and all were disappointed.

When the news reached Potosi of the existence of these rich deposits, it found a population made up of promiscuous nationalities and characteristics. The largest proportion of them had been identified with mining and mining interests almost from their birth, and with the announcement that hidden wealth accessible to the quality of skill which furnished a comfortable living here awaited their undertakings, a panic was created in the Potosi mines, the like of which cannot be conceived. Age forgot its crutch, labor its task, and all who were able to tuck under their sandals preparatory to flight thither did so, and left. After the first rush had spent its force, the village began a new lease of existence, and began once more to prosper. At this juncture, cheering accounts reached those left behind of the prosperity of those who had gone, and a second exodus occurred which completely paralyzed trade and business, from the effects of which recovery is not visible to-day. Thence forward, Potosi lost the coign of vantage she had held for nearly twenty years. Dubuque observing the advantage that might accrue by the exercise of enterprise, undertook a manifestation of that element, and has since become what it was thought Potosi ultimately would be, previous to the California fever.

From 1855 to 1860, nothing was lacking to attract patronage to Snake Hollow, but without results. Then the war broke out, and a passing excitement usurped the place of complete quiescence, which existed. Potosi responded to such calls as were made upon her resources by the authorities, watched the chances of success, mourned defeat, rejoiced at victory, and welcomed the return of those who went out to fight from her households. Then came silence once more. Last year an unusual activity was taken in business, and considerable enterprise was manifested by her citizens. A number of improvements were completed, and considerable building concluded, and the citizens and those who visit this vale of pleasure and quiet wherein the lines of Potosi's life are laid, contemplate a future for the village that is not without promise.

The incorporation of the village was repealed early during the fifties, and the Clerk's book has disappeared, hence no official record of the village could be obtained.

THE SCHOOLS.

The minds of citizens were exercised at an early day on the subject of education, and no pains were spared to provide this element of civilization for the youth of both sexes after the weightier matters of the law had been taken care of. Had this been wanting, however, the advent at an early day of some settlers who appreciated the force of that argument, the premises and conclusion of which is "we must educate; we must educate" would have prevailed to prevent laches in this behalf.

The first school of which there is any record of having been opened was that commenced in 1838 in a log cabin at La Fayette, when Cornelius Kennedy, a Revolutionary soldier and a martinet educator, began the art with a limited number of scholars, composed in part of H. B. Coons, Samuel Coons, John Coons, Mary Coons, George Langley, Amanda Bushee, William W. Forbes, Harriet Forbes and John Long. Mr. Kennedy taught the requisite number of

terms for which he engaged and retired from active service, so far as can be ascertained, with the good wishes of all immediately interested.

In 1839, a pedagogue named Eayers came into the country from the East and introduced himself as a candidate for public favor and patronage as "a school teacher." He opened for instruction in a miner's cabin under the hill at Van Buren and succeeded in maintaining order, as also in the propagation, for some months.

Early in 1840, C. C. Drake dismounted from the stage and took up the birch as a public educator in Van Buren, where he remained, it is thought, for the period of six months, when he removed to the Bull's tavern in La Fayette, in which historic premises he concluded his noviate as a teacher within the vicinity of Potosi. His absence was supplied meanwhile by a Mr. Johnson, in whose care and under whose direction a school was prepared for in a house that was built for and occupied, at one time during its probably checkered experience, as Clark & Wood's saloon. Following Drake came C. S. D. Crockwell in the old log Methodist Church, who in turn yielded place to Miss Emeline Fisher. The next school heard of was located in an unpretentious log cabin of limited dimensions at the head of the hollow, which was presided over by Edward Story and his successors with varying results until 1846, when the brick school house in the hollow was completed at a cost of \$1,500; and a brother of Angus Cameron, the present Senator of Wisconsin in the Congress of the United States, accepted charge of the trust.

Along about 1845, the Sisters of Charity of the Blessed Virgin opened a school in the Catholic parsonage adjoining the church of that denomination, and for several years afforded superior facilities to an average daily attendance of scholars quoted at about 56.

In 1847, the Hon. J. W. Seaton, who has since resided in Potosi, came here and identified himself prominently with the material interests of the home of his adoption, making that of furnishing the most complete system of education available at the time an important feature. The same year he was placed in charge of the brick school and for two years directed its success and prosperity with unswerving fidelity. He retired in 1849 to enter upon the discharge of his duties as an attorney, and the schools have since endeavored to maintain the high order of scholarship, discipline and excellence which he established.

Up to the building of the brick schoolhouse in 1846, it is thought the schools taught in Potosi were those of a private character, and carried on under private auspices and by private subscriptions. With that event, however, this system no longer generally obtained, and was succeeded by the system provided for by legislative enactment.

The little brick did excellent service, it is said, from the days when rugged youth inhaled the dreamy air of idleness within its walls, to those when village Hampdens and future legislators and statesmen first comprehended the rule of three behind its portals. But schools, like men, arrive at an age when their usefulness is past, and, like men, they are cast aside as the phantom of an hour, to sparkle in the sunlight of a more prosperous candidate.

This was the experience of the little old brick, which was vacated in 1867, when the new schoolhouse on North East street was completed and publicly dedicated to the cause for which the inconveniences of its honored but cramped predecessor necessitated its building. The new house is of brick, two stories high, of convenient dimensions, containing three departments, and cost a total of \$7,500.

In the departments of primary, intermediate and high, requiring three years to complete, a student can obtain an education that will fit him or her for any position in life where modest merit always commands an audience. The school year consists of two terms, attended by monthly and terminal examinations, enjoys an average daily attendance of 160 pupils, and requires an annual outlay of \$1,300 in the liquidation of obligations thus incurred.

It is under the control of three teachers, who are jointly and severally responsible to a Board of Trustees, at present composed of John A. Nevill, E. S. Rockwell and W. H. Hunt.

THE PRESS.

The Potosi Republican.—During the month of May, 1847, the absence of a weekly paper in the then thriving village was supplied by the issue of the *Republican*. It was a folio, with seven columns to the page, politically Democratic, and conceived and brought forth at a time when its necessity was sufficiently apparent to justify the venture. Its success is said to have been instant and general, but the sequel of its birth was not equal to the promise that even imported.

The paper, it is said, was ably edited by the Hon. J. M. Denton, by Seaton & McKee, by Seaton & Paul, and others, and with the exodus of miners and others to California—a period running through the years 1849–52, interest in the enterprise began to wane, and after enduring a checkered experience until 1855, when it was overtaken by the calamity of suspension and disappeared from view.

Potosi Signal.—Was established by David & Robert McKee, sons of Stewart McKee, who built the McKee Mills, and the first number issued on the 13th of July, 1852, from an office in the Langworthy building. The founders procured their material at St. Louis, whence came the printers and other auxiliaries indispensable to a newspaper office. It was edited by the McKee Brothers for a brief period, then by McKee & Seaton, and by others, and still enjoys the reputation of having been the brightest, spiciest, newsiest paper ever published in the lead mines. After a year, the experiment was found to be a losing one, when the publication of the *Signal* was abandoned, the materials removed to Shullsburg, and the *Shullsburg Chronicle* quickened into life.

As with the *Republican*, no files remain of the *Signal* accessible to examination.

THE VILLAGE POST OFFICE.

This usual and indispensable adjunct to village life has enjoyed a continued and happy existence, having been established for nearly half a century and free from the official and other annoyances peculiar to public service. Its history is brief, and can be told without exhaustive verbiage. The office was established in 1837, half way between the Head of the Hollow and Van Buren, where it remained nine months, under the administration of Peter Coyle. At the expiration of that period, Celestine Kaltenbach was appointed, and removed the office to Van Buren. He has now been in the service for forty-three years, and has followed the drifting changes of the tide from Van Buren to La Fayette, to Potosi with his charge, and is at present located in one of the brick buildings erected on Main street in 1843, where he will remain until his terms of office are finished, and his record is certified to the Great Master.

RELIGIOUS.

The Methodist Church was established in 1839, and after thirty years' labors yielded to the inevitable about ten years ago. In 1839, a class was formed in La Fayette, composed of Thomas Clayton, leader; with Thomas J. Crockwell, John Crockwell, Catharine C. Crockwell, George Maderie and wife, James R. Short and wife, and John Peddler and wife, as members. Weekly prayer meeting was established, and semi-monthly preaching enjoyed for some time in the small residence of J. R. Short. Finally, a log meeting-house was erected, and served its purpose until 1845. During that year a brick structure erected for Mormon purposes, in the Hollow, was purchased and removed up town, where it was occupied for five years. In 1850, the edifice now known as a Temperance Hall was built, and up to early in the seventies was known as the Methodist Church. At that period, however, or rather in 1877, the cause of Wesleyanism in Potosi, which had for some years previous been on the wane, failed to rally, and yielded up the ghost. The church was sold, and the sect has no existence now.

St. Thomas' Catholic Church.—The first Catholic society organized in Potosi bears date some time in the year 1837. Early in that season Celestine Kaltenbach and family, Peter Coyle and family, Michael Lawler and family, John Tobin and family, and some few others,

communicants or the Church of Rome, established a beginning and heard mass in the residences of the several members. This was continued until 1838, when a small, inconvenient log church, on the site of the present church, was completed at a cost of \$500, and taken possession of and used without formal consecration. For a period the congregation was compelled to depend upon the services of missionary evangelists, but upon the completion of the church as mentioned, the Rev. Father Caussi was ordered hither, where he remained until 1852 in the discharge of his sacred offices.

During his administration the capacity of the edifice was sorely taxed, so large became his parish; and in 1847 the present handsomely proportioned and furnished brick church was built, a large and commodious brick parsonage adjoining having been finished in 1845. The church is 36x56, surmounted by a stately steeple, and cost, with the parsonage, a total of \$11,000.

The church was solemnly dedicated to the service of God by the Rt. Rev. Bishop Henni, Bishop of the Diocese, and has since been so appropriated. After the Rev. Father Caussi resigned his pastorate, he was succeeded by the following prelates, though the church is now dependent upon mission services: Father Gibson, the Rev. Joseph Albert, Father Nurts, Thomas Hodnet, William Bernard, and J. C. Devine, who died in the service in 1880.

The church property is valued at \$10,000, and the congregation about one hundred families.

The First Congregational Church.—This society was organized as the first Presbyterian Church of Potosi, on December 20, 1840, and under the direction of the Rev. S. Chaffee. Owing to some unexplained and unexplainable, not less lamentable fact, no record of the success or failure of these Calvinists is preserved, and hence the historian is denied the pleasure of such presentation. The last Pastors who served were the Rev. James F. Mitchell, who came September 1, 1872, and resigned August, 1874; the Rev. N. Mayne from November, 1874, until 1875. He was followed by the Rev. D. W. Gilmor, under whose pastorate, and, on Tuesday, February 29, 1876, the church was formally changed from Presbyterian with forty-four members. Mr. Gilmor was retained until August, 1872, working with success in his chosen labor, when he resigned to accept a call elsewhere. On the 19th of October of the same year, the Rev. J. A. Ball took charge, and is still in the service.

The present congregation numbers forty-seven communicants, and the church property represents a valuation of \$2,000.

It is proper to add that the Waterloo Church is an offshoot of the Potosi Congregational Church, having been organized June 14, 1875, with sixteen members, and yet prospers.

BUSINESS ENTERPRISES.

Potosi Flouring Mills.—The solitary manufacturing establishment in the village was established August 19, 1879, by C. Peacock and G. G. Bonns and is proving a valuable investment. Kaltenbach's building opposite the Banfil House was reconstructed by these gentlemen and stocked with machinery, including four run of buhrs, one set of crushers, two separators, etc., together with an engine of forty horse power, at a total cost of \$5,000.

The capacity of the mill is fifty barrels of flour per diem and one bushel of feed per minute. The firm manufactures all grades of flour, as also patent and fancy patent and do a business of \$45,000 per year.

The Potosi Brewery.—Located one mile west of the village, was erected in 1855 by Gabriel Hail, who came to America from Memmingin, Bavaria, and was a well known and influential citizen of Potosi for the period of a quarter of a century. The premises are of stone, two stories high, and furnished with cellars, coolers and equipments for the manufacture of beer unsurpassed in the West. The brewery costs \$10,000, and has, since the death of its founder, been operated by the heirs.

When running to its full capacity, eight men are employed at a weekly compensation of \$50, and the annual business is estimated at \$10,000.

SOCIETIES.

Mendota Lodge, A. O. M.—A temperance organization chartered on the 9th of June, 1877, by the Grand Lodge of Wisconsin, and organized by Grand Sachem Morrell, with twenty members and the following officers: H. G. Green, Sachem; Mrs. D. Banfill, Queen; William Gibson, Prophet; Mrs. George Lewis, Priestess; E. J. Bilderback, Writer; Mrs. Eliza Kendrick, Treasurer, and William Mains, Guide.

Meetings were held at regular intervals up to 1878 in Lower Masonic Hall; during that year the order purchased the vacant Methodist Church for \$225, and have convened since that event in the hall last designated.

The present members number 25. Meetings are held weekly on Saturday nights, and the present officers are: John A. Nevill, Sachem; Mrs. David Burch, Queen; Rev. J. A. Ball, Prophet; Mrs. D. Banfill, Priestess; Mrs. George Lewis, Treasurer; Willis Rockwell, Writer; Miss Lottie Goodrich, Guide. Lodge property is valued at \$500.

Warren Lodge, No. 4, F. & A. M.—The records of this lodge show that the first meeting of the order held in Potosi was on the 20th of October, 1844, to take into consideration the propriety of organizing a subordinate lodge. Enos G. Wood was chosen Chairman, and J. D. Spaulding, Secretary.

The first regular communication was designated "Warren Lodge of Ancient York Masons," and was held in a room or place over Coons & Wooley's store in La Fayette, on the 2d of May, 1844. It was held under a dispensation from the Grand Lodge of the Territory, signed by B. F. Kavanaugh, Grand Master, attested by Ben C. Eastman, Grand Scribe.

The following officers were appointed: Bro. Enos P. Wood, W. M.; Bro. Marcus Wainwright, S. W.; Simon E. Lewis, J. W. The by-laws of Melody Lodge, No. 2, were adopted for their government, and the following subordinate officers elected: Bro. Thomas J. Taylor, Treas.; Bro. George Maderie, Sec.; Bro. S. B. Keene, S. D.; Bro. D. W. Hall, J. D.; Bros. Samuel Alexander and Myron Patterson, Stewards; and Bro. John R. Seaton, Tiler. The following are the names of brethren present in addition to the officers elect: William H. Wood, H. R. Coulter and John R. Spaulding.

Terrence Clark and Thomas Palliser were the first candidates for admission, and were received under a dispensation from the Grand Lodge.

The lodge continued working under this dispensation until January 10, 1845, when it was fully organized under a charter from the Grand Lodge of the State, and on the 24th of the same month, the first regular officers of the lodge were installed by Grand Master B. T. Kavanaugh, and Asa E. Hough, Acting Deputy Grand Marshal, as follows: George W. Bicknell, W. M.; H. R. Coulter, S. W.; George Maderie, J. W.; Thomas Palliser, Treas.; William H. Wood, Sec.; Simon E. Lewis, S. D.; D. W. Hall, J. D.; J. H. Barnett, Tiler. At this communication Bros. Robert Templeton and D. A. McKenzie were passed to the degree of Fellowcrafts.

During the year 1845, Bros. Joseph Petty, James F. Chapman, Lewis Reynolds, Gendower M. Price, Joseph Woolley, Cyrus K. Lord, William McDaniel, and many other well-known citizens of the county, made application for admission to the lodge, and were raised to the sublime degree of Master Masons.

In June, of the same year, a contract was made with the I. O. O. F. for an undivided half interest of their hall, and thereafter the lodge held its monthly meetings in the building which they still occupy.

Of the charter members, and those who were connected with the lodge during the first year, none are now living, if we except Joseph Petty, the present Superintendent of the County Poor Farm, and Judge C. K. Lord, of La Crosse. All have taken their last dimit of earthly things, and gone, as we cherish the hope, to become true and faithful communicants of the Celestial Lodge above.

Only a few members of Warren Lodge were engaged in the recent war, as most of them were of that age, at the commencement of the rebellion, when the infirmities of human life forbid

active military service, notwithstanding their loyalty and devotion to the cause of the Union was ever manifest by their good words and works; and while the young men fought the battles of their country, the old men contributed, with open heart and hand, to the support of their poor, distressed brethren, their widows and orphans.

Three of its present membership were in the military service, viz.: John Liken (since dead), John D. Canfield and Robert H. Kendrick, the latter of whom has served several terms as Master of the Lodge since the close of the war. Mr. Kendrick enlisted as a private in Company H, Twenty-fifth Regiment Wisconsin Volunteers, August 12, 1862, and was elected Second Corporal. The company left immediately for the regiment, which was ordered to Minnesota to quell the Indian disturbances. After scouting two or three months on the frontiers, they prepared to go into winter quarters, building log and sod cabins, and supplying themselves with potatoes and other vegetables from the abandoned farms of the settlers. They had scarcely got in their winter's supplies, however, when they were ordered to report at Madison, and from there were ordered South in the vicinity of Vicksburg. Midsummer of the next year found them on the Yazoo Bottoms, where all were soon taken sick and many died. On the death of First Lieutenant Wise, Mr. K. was promoted to the office made vacant, and served in this capacity until the close of the war. He was captured by the enemy at Atlanta, Ga., on the 22d of July, 1864, and taken to Macon, where he remained a close prisoner for two months. From here he was removed to Charleston, S. C., where he was kept in close confinement two months longer. While here, in company with five hundred other officers who were prisoners, he was placed under the fire of Foster's guns to prevent our fleet from shelling the city. He was next removed to Columbia and placed in a State asylum, called by our boys "Camp Sorghum," to commemorate the fact that all the prisoners were fed on corn meal and sorghum molasses; thence they were taken to "Camp Bacon" (so-called from another memorable fact that it was the first place they had tasted bacon in four months), at Charlotte, N. C. On the 5th of March, 1865, he was exchanged, and returned home the mere wreck and shadow of a man. Mr. Kendrick was a true and faithful soldier, as he is a man and Mason.

The present membership is forty. The present officers are: William Honnse, W. M.; James Bradbury, S. W.; John Chester, J. W.; George Kinney, Treas.; J. W. Seaton, Sec.; R. H. Kendrick, S. D.; Lafe Casbey, J. D., and William Palliser, Tiler.

CEMETERIES.

There are three cemeteries in the vicinity of Potosi, two belonging to the Catholic Church and one known as the Protestant cemetery.

All are held sacred in the eyes of the world, all contain the loved emblems of mortality, who, if the teachings of inspiration are accepted as the true faith, wait for those that are left behind, on the shores of the beautiful river. They are appropriately laid out, handsomely ornamented with shrubberies and flowers, and evince a taste in their picturesqueness and surroundings, at once happy and appropriate.

ADJOINING SETTLEMENTS.

Supplementary, and it might be added tributary to Potosi Village, are points of settlement contiguous thereto, though their race with prosperity was decided years ago. Among these are Dutch Hollow, a mile to the east of Potosi, British Hollow and Rockville to the northeast, distant a mile and a half and three miles respectively.

DUTCH HOLLOW.

This is a pleasant settlement largely composed of Germans, as its nomenclature would indicate, containing a number of residences, a school and St. Andrew's Church.

In 1845, a Catholic society was established in this vicinity, which was the germ of the present large congregation. The society was organized by Father Andrew Tusch, to whose diligence and labors the subsequent success observable was mainly due.

In 1846, with the aid of his congregation, and subscriptions obtained from the piously inclined he erected a brick church edifice, and for thirty years worshiped with his people therein. In 1851, Father Tusch resigned his pastorate, and was succeeded by Father Nicholas Thiele. In 1876, the erection of the present edifice was commenced, and labor expended thereon until its completion. The building is of brick, 48x110, and surmounted by a steeple 135 feet from the ground. It is one of the most commodious and elegant houses of worship of any denomination in the county, and cost a total of \$25,000 before its dedication, which occurred in 1877.

Dutch Hollow is the scene of no inconsiderable thrift, peculiar to the character of the inhabitants, and is a pleasing spot for business or residence purposes.

BRITISH HOLLOW.

British Hollow was among the earliest settlements in the county, and where Thomas Hyme erected his cabin within its present precincts in 1827. Subsequently there was a large influx of emigration of miners, who developed the wealth of the region, and contributed to whatever prosperity that has survived its flush of youth, so to speak.

The village proper was brought first into prominence through the efforts and enterprise of J. R. Vineyard, James Lancaster, Edward Thwaites, R. Urvine and others, and while containing several stores, a hotel, etc., has lost its prestige as a town these many years. It is supplied with a school and Methodist Church, which, with business transacted annually of but limited proportions, are the chief points of interest to residents and strangers.

The Methodist Episcopal Church—Is a handsome frame, about 25x30 in dimensions, with a capacity for 200, and was built in 1859, at a cost of \$600. It is attached to the Georgetown Circuit, and services are held there semi-monthly, under the pastorate of the Rev. T. J. Lewis.

The congregation is estimated to number about forty.

The system of schools in use here is the same as that established throughout the county. The school edifice, however, is one of the most commodious, architecturally handsome and otherwise attractive in this portion of the State. The main building is composed of stone, 27x36 completely furnished, and was erected in 1868, at a cost of \$1,200. The addition is also of stone 21x30 and was erected as a primary department in 1875, costing an amount similar to that paid for the main building.

The course of instruction is complete, with a view to affording desirable opportunities for the acquisition of an education. It enjoys an average daily attendance of thirty, and \$400 is expended annually in its support.

ROCKVILLE.

This village, situated three and a half miles from Potosi, nine miles from Lancaster, an ten miles from Platteville was located about 1850, when the post office was removed hither from Pin Hook.

The early settlers in this vicinity include the Hon. A. W. Emery, who came to the vicinity in 1832; Jacob Dawson, in about 1840; Samuel Druen in about 1830; D. C. Phillips, the discoverer and operator of "Phillip's Range," in 1844; Joel Stephens, and Birch and Chestnut in 1845; Thomas Carthew, Edward Ivy, Andrew Jackson, James Jackson, Hudd Smith and Bradley in 1847, and some others. The village was, in those days, the center of a mining region of vast resources, and to-day is made up of one store, a tavern, school, two churches and about one dozen residences.

The School—Was erected in 1872, at a cost of \$2,600. It is of frame 26x36, and contains a primary and grammar department, giving employment to two teachers, and has an average attendance of eighty pupils.

It is under the control of a Board of Directors, consisting of John Carthew, Joseph Walker and Samuel Stephens, and requires an annual expenditure of \$600.

The Methodist Episcopal Church—Was erected in 1854, is attached to the Georgetown Circuit, and enjoys a liberal attendance upon days when services are held by the Rev. T. J. Lewis.

German Presbyterian Church—Was organized by the Germans and Americans about 1850. The organization as thus constituted, continued for a number of years, when a separation occurred, the Germans affecting a separate organization. The church is of brick, of limited dimensions, and handsomely situated on the brow of a hill. The congregation at present numbers forty-three members, the church property is valued at \$1,000, and the following Pastors have served since its foundation: The Revs. John Beully, J. Liesfeld, J. Burk and A. C. Stark.

Rockwell Lodge, No. 356, I. O. G. T.—Was organized February 22, 1881, with twenty members and the following officers: J. C. Emery, W. C. T.; Miss Ellen Carthew, W. V. T.; Miss Mary A. Kitto, W. C.; T. H. Carthew, W. S.; Miss Julia Curnow, W. A. S.; Miss Maggie L. Phillips, W. F. S.; Miss Abbie Dawton, W. T.; John Druan, W. M. The present membership is stated at thirty-seven; meetings are convened weekly on Saturday evenings, and the present officers are B. F. Likens, W. C. T.; Miss Ellen Carthew, W. V. T.; T. H. Carthew, W. R. S.; Miss Maggie L. Phillips, W. F. S.; Miss Maty A. Kitto, W. C.; Miss Abbie Dawton, W. T.; John Druan, W. M.

St. Andrew's Catholic Benevolent Society was organized February 28, 1875, by the Rev. N. A. Thill. The first officers were: William Mechler, President; Anton Zeller, Vice President; Theo. Mikesch, Secretary; John P. Friesen, Treasurer; W. Schmitz, Marshal; C. Simon, Assistant Marshal. Present officers are: H. B. Uppena, President; B. Marino, Vice President; Rev. J. A. Dries, Secretary; B. H. Uppena, Treasurer; William Schmitz, Marshal; William Mechler, Banner-bearer. The society is in a prosperous condition.

CHAPTER XII.

BOSCOBEL.

EARLY SETTLEMENT—THE FIRST FIRE—THE WAR—MUNICIPAL MATTERS—TOWN OFFICERS—VILLAGE OFFICERS—CITY OFFICERS—FIRE DEPARTMENT—WISCONSIN RIVER BRIDGE—ARTESIAN WELL—SCHOOLS—POST OFFICE—THE PRESS—CHURCHES—HOTELS—MASONIC ORDERS—I. O. O. F.—A. O. U. W.—TEMPERANCE ORGANIZATIONS—CEMETERY—BOSCOBEL AGRICULTURAL AND DRIVING ASSOCIATION—BAND—MANUFACTURERS—BRICK YARDS—ELEVATORS—TROUT POND.

EARLY SETTLEMENT.

The ancient Norman nobility of England were wont to refer to the peers and nobles created by Edward IV and his predecessor as the "new men." The same appellation might have been applied to this city by some of the old settled towns of the county; but, to carry the application further, as the "new men" of "Merrie England," despite the sneers and contemptuous frowns of their older brethren, continued to grow and flourish, until, among the "bows and bills" of Barnet, the older chivalry went down under the flashing swords, amid the cries "make way for the new men," so the "new village" has not only distanced the majority of its competitors, but has, as it rose higher in reputation, population and business prosperity, witnessed the decay and almost living death of those which at its birth were themselves flourishing and prosperous towns.

The first actual resident in the present town, at least so far as known, was one Thomas Sanders, who came to this portion of the county from Galena, Ill., in 1846, and built him a hut on what is now Block 6, of Boscobel proper. This he occupied with a partner named Asa Wood, and together they engaged in getting out logs on the river bottom adjoining, which they afterward rafted down the river to the mills below. The name of Sanders is kept prominently before the citizens of the town by the little stream that careers and gurgles through the city, furnishing a constant supply of living water. The first actual settler is not so easily ascertained. Among those here at an early date were John Newberry and a widow lady named Powell. The former occupied the place afterward purchased in 1878 by Mr. W. McCord, while Mrs. Powell had located on the southwest quarter of Section 35. In 1847, a settler by the name of Wayne came in, but, as there is no record of him later, it is probable he did not remain very long. In March, 1848, Mr. McCord and family came and located on their present farm. The succeeding spring Joshua Brindley arrived with his family and settled a short distance from McCord. He, two years later, bought the claim of Charles Bailey, on Section 35, half a mile southeast of the town, upon which he moved, within the limits embraced in the present city. A. E. Hall had a claim, situated near the site of the present depot, and was the first actual settler on the site of the present city.

At this time, and for a half-score of years later, what afterward became Boscobel was a part of Marion, and was a wild plain, given over mainly to the forest denizens and their aboriginal companions, whenever the latter saw fit to wander in this direction. Even as late as 1855 and 1856, deer, in droves of a dozen or more, would cross the river and stray, with wondering eyes, to the edge of the new settlement, probably puzzling over this unwonted activity, ready to fly upon the slightest provocation to the shaded hillside coverts. This north country was at that time hovering between the two poles of prosperity and semi-oblivion. The problem of its future existence was finally solved, as has been many others, by those linked bands of iron and steel, which have, for the past half-century, solved so many of a similar nature. The Milwaukee & Mississippi Railroad, as first designed, would have left Boscobel nameless and undisturbed to fight out alone its destiny. But the guiding spirits of the enterprise saw fit to change their plans, and the future of Boscobel was assured.

In 1853, previous to the advent of the road, the following families were living in the limits of the present town: A. E. Hall, Joshua Brindley, Mrs. S. Powell, W. McCord, all living on land as given above; Matt Ward, on Section 34, southwest quarter; Mark and William Bailey, on the northeast quarter of Section 35; George W. Crandall, on the southeast quarter of Section 36; Mrs. Craig, on the southwest quarter of Section 24, and Abner Petty on the south half of Section 13.

The greater portion of the land in this vicinity was then Government property, which afterward, under the graduation established by the Government, became subject to entry at 50 cents per acre. The roads were few, little traveled, and in that condition so peculiar to all new countries, which renders the life of the traveler anything but comfortable as he progresses over them.

A saw-mill of limited capacity, erected by Mr. Bull, was in existence, located on Crooked Creek—a stream whose erratic wanderings suggested its distinctive title—three-fourths of a mile below McCord's; but of grist-mills there were none within the proverbial "Sabbath-day's journey." As a means of crossing the river a ferry had been established, operated by M. Woodard and D. Thompson, opposite Section 14, to Georgetown, now without ferry or building, and those not caring to avail themselves of this means were obliged to traverse eight miles of sandy, snaggy roads in reaching Boydtown.

The land on which the city stands was purchased in 1854, by C. K. Dean, Adam E. Ray, Henry M. Ray and E. H. Brodhead, and the station located the same year. At this time the site was occupied by a beautiful grove of oak trees. A party of railroad magnates, with their friends, came over the road on a tour of inspection, during the year, and took carriages from Muscoda, proceeding by these conveyances to Prairie du Chien, returning in the same manner. Among the party was Gen. Rufus King, then editor of the Milwaukee *Sentinel*. Upon his return, Mr. King referred in the most flattering terms to the new station, speaking of it as Boscobel, the name being said to have its derivation from the words "bosc," wood, and "belle," beautiful. However this may be, the name, once given was accepted, and retained to the present day. In this year, Dr. Blanchard and Moors Rice figure among the prominent additions to the population of the embryo town, and the year immediately succeeding, C. K. Dean, John Mortimer and William S. Coates, with their families, settled in what was to be their future home. In the latter part of this year, the near approach of the railroad drew attention to the town, and several parties came in to stay, among them Mr. John Ruka, who put up a board shanty and built a blacksmith-shop, where he practiced his trade, just west of the present residence of Dr. Carley. James Dickerson had already put up a small frame building, in which a limited stock of goods served to dignify the institution by the name of store. Mr. Dickerson had been omitted among the early arrivals, as had also Mr. Horace Watkins, who came probably as early as 1855 and took up a claim on the river bottom, on which his dwelling is still standing.

Boscobel was platted early in 1856, and the lots put on sale this year.

The site, now so densely populated, was originally a portion of farms owned by Joshua Brindley and A. E. Hall, and did duty as a corn-field, the street now known as Wisconsin avenue having been laid out through it in 1856. Even up to the very settlement of the town, the golden ears hung thick in the fields.

Among the arrivals for 1856 were Dr. J. O. Beals, who dealt out quinine and blue pills to the inhabitants; J. C. Stevenson, Charles Contoit, Elder Moorehouse (who opened a small, very small, drug store), J. R. Muffley, and others, whose names have drifted away into the great Lethæan sea.

The advent of the snorting, puffing, sizzling iron horse, as the old year was wrapping itself in its furry mantle of snow, gave Boscobel a heavy impetus which soon developed its good results by the rapid influx which characterized the following years. The first agent of the company at this point was John Mortimer.

By 1858, village lots that a few years before had been wild prairie land, purchasable at 50 cents per acre, were selling readily at \$100 and \$200 each. The town, as originally projected, would have occupied the ground northwest of the railroad track, but, with the usual perversity

C. H. Dean

BOSCOBEL

of new settlements, it persisted in overlapping the original boundary line, and stretching away to the south and east, where four-fifths of the city lies to-day.

THE FIRST FIRE.

In April of this year (1858) occurred the first fire in the village, the Barnett House, occupying the present site of the Betts House, going up in smoke. This hostelry, which had been erected late in 1856, by Mr. Andrew Barnett, had become so important a part of the village comity that its loss was severely felt. Preparations were immediately made for the erection of another in its place, which, upon its completion, was occupied by Mr. Barnett.

During the years 1858, 1859 and 1860, the village advanced with strides only equaled by the gigantic "seven-leagued boots" of nursery tales. Up to this time, the village and adjacent country had formed a constituent part of Marion town, but, in 1859, it had been set off into a separate town, to be called Boscobel, the first town officers, being elected in the spring of 1860. Hardly had the young town settled its new honors upon its shoulders, before it was called upon, with other corporate bodies throughout the county, to deal with the war fiend, whose loathesome wings were flapping with a fierce threatening throughout the land.

THE WAR.

On April 16, 1861, a call for volunteers was circulated by C. K. Dean, while in the other portions of the county there was "hurrying to and fro," all of which resulted in the organization in the main street of Boscobel, on the morning of April 21, of two companies of volunteers, the first to be organized in Grant County. During the long, weary years of the war, Boscobel stood nobly for the preservation of the Union. The history of these dark days has been written elsewhere. It is sufficient that representatives of the village were to be found on every field, pouring out their blood like water in the defense of that star-flecked banner, whose folds guaranteed liberty and equal rights to all.

Full well did she respond to all calls for funds, either to make comfortable those who had been left as a precious legacy by father or husband who had gone down in the mad rush of battle, or to pay bounties to those volunteering for the preservation of the country so dearly loved by all. The amount of money raised during these years, for war purposes, by Boscobel, was about \$8,000.

During these years the town continued to advance, steadily, if not as rapidly as its most ardent supporters might have wished. In the year 1864, village honors were conferred upon the thriving burg by the Legislature, a charter being granted at that time. The population at this period numbered about twelve hundred.

When the return of peace had brought back to the thriving village the many brawny arms and stout hearts whose place for four years had been at the front, business industries once more livened up, the busy hum resounded from every workshop, and the village took a sudden and well-sustained stride on the road of commercial prosperity. The years from 1867 to 1870 witnessed many improvements in the way of handsome business blocks and substantial buildings. Many, in fact the most, of the buildings now ornamenting the main artery of Boscobel—Wisconsin avenue—with their architectural proportions, date their conception and execution back to these years. The panic years of 1873-77 were felt, with their depressing effects, in Boscobel as well as in other cities in the country. Yet, notwithstanding these influences, the little municipality did not hesitate to take upon itself the burden of debt which, in prosperous times, might well have made an older and wealthier community hold back in doubt, fearful of the consequences. Yet, without flinching, Boscobel went sturdily forward with the construction of a bridge across the Wisconsin River, which was to cost, as time rolled on, the sum of nearly \$45,000. In order to enable them to do this, the citizens petitioned the Legislature for a city charter, which was accorded them by the Legislature of 1873.

The flood tide in population of the village was reached in 1875, when the number of in-

habitants allotted to the city by the census of that year was something over sixteen hundred souls. The census of 1880 showed a slight diminution in this number.

Whatever might be the characteristic of the population, the business interests of the city, owing to the public-spirited, enlightened, and far-seeing policy adopted by the municipality from the beginning, showed no signs of falling off; on the contrary, the horizon was brightening with each succeeding year. The large extent of territory on the opposite side of the river, the trade of which is brought, not only figuratively but literally to the doors of Boscobel's merchants, by means of the link whose wooden spans connect the north and south shores of the broad Wisconsin.

The city itself is one of the handsomest places in the county, if not in the State. Embowered in trees, it lies on the broad plain encircled in a loving embrace by the beautiful bluffs, a priceless jewel in an emerald setting.

The Boscobel of to-day contains among its business interests three general stores, carrying heavy stocks; one clothing and shoe store, four hardware stores, two drug stores, two grocery stores, distinctively such; four restaurants, five millinery establishments, three tailors, four shoemaker shops, three harness shops, three butcher shops, six hotels, ten saloons, and three dress-making establishments. Besides the list as given above, there are three wagon and carriage manufacturers, one brick-yard, one carding and spinning establishment, the latter manufacturing an excellent article of yarn that finds a ready sale; one flouring-mill, one cigar factory, two furniture stores, three livery stables, one cooper shop, two stave factories, two banks, one photograph gallery, three jewelry stores and one lumber yard, operated by J. H. Sarles, and doing a heavy business, having branches at Muscoda, Woodman and Fennimore.

In the professional branches are found six law firms and three physicians.

Among other industries which add to the wealth of the city is the "bee business" which occupies the attention of three different operators, strained honey being the principal article of export. This, with the addition of three elevator firms, whose warehouses have a combined capacity of 25,000 or 30,000 bushels, completes the complement of the city's industries.

MUNICIPAL MATTERS.

As has been stated, Boscobel was set off from the town of Marion in the month of November, 1859, by the County Board. The first town meeting was held at the Walker House, April 3, 1860, at which time and place occurred the first election of town officers. The first meeting of the Town Board was held April 10, at the office of George Hartshorn.

The rapid growth of the settlement early brought about a wish for incorporation as a village, as conducive to the best interests of all concerned. In the Legislature of 1864, a petition for incorporation was presented by a member from this district, the petitioners' cry for incorporation being granted in an act passed in the following March. The corporate limits of the village embraced Section 22, the west half of Section 26, all of the east half of Section 27 that lies in Grant County, the northeast quarter of Section 34, and the northwest quarter of Section 35, or about one-fourth part of the town of Boscobel.

This charter, with its attending powers, which were quite ample, was deemed sufficient until it was found necessary, in order to complete the bridge across the Wisconsin, to assume a bonded indebtedness. This, however, could only be done in a corporate capacity under a city charter. A charter was accordingly drawn, and through the efforts of John Monteith in the office of Hazelton & Provis, Boscobel was incorporated as a city, by the Legislature of 1873, the act bearing date March 15. This charter continued the boundaries in force under the old village charter, provided for the division of the city into four wards, for the election of Mayor, four Aldermen, Assessor, Treasurer, Clerk, two Justices of the Peace, one Constable or Marshal, and such other officers as the Mayor and Aldermen should ordain. By an amendment of 1880, the Clerk was appointed by the Council. The charter is quite ample in its powers, as was the village charter before it.

Under this charter the city has continued its corporate existence up to the present time. Below is given a list of town, village and city officers from the first organization of the town :

TOWN OFFICERS.

1860—Supervisors, J. A. Houghtaling, Chairman, William S. Coates, Francis McSpaden; Clerk, George Han; Treasurer, R. J. Hildebrand; Assessor, George B. Shipley; Superintendent of Schools, A. S. Sampson; Justices of the Peace, Mark Bailey, Ephraim Moody; Constables, George L. Bowen, H. B. Gleason, Richard Frankland.

1861—Supervisors, John Pepper, Chairman, Gustavius Guentzel, Conrad Fritz; Clerk, J. W. Quackenbosh; Treasurer, R. J. Hildebrand; Assessor, A. W. Ray; Superintendent of Schools, Albert Sampson; Justices of the Peace, Andrew McFall, Martin DeWitt, Peter Rae (to fill vacancy); Constables, G. L. Bowen, J. J. Button, Jonathan Walker.

1862—Supervisors, Conrad Fritz, Chairman, Joseph Molle, E. Halloran; Clerk, William F. Crawford; Treasurer, John F. Shipley; Assessor, J. A. Houghtaling; Justices of the Peace, Peter Rae, George Cole; Constables, George W. Kendall, J. J. Button, Charles Contoit.

1863—Supervisors, D. T. Parker, Chairman, J. H. Sarles, James Barnett; Clerk, I. M. Richmond; Treasurer, John Pepper; Assessor, Asa W. Ray; Justices of the Peace, L. J. Woolley, O. M. Graves; Constables, W. W. Watkins, Robert P. Clyde, Martin De Witt.

VILLAGE OFFICERS.

Election held second Monday of March, 1864.

1864—President, D. T. Parker; Trustees, A. Ransom, J. R. Muffley, D. G. Seaton; Police Justice, G. W. Limbocker. (Clerk, Constable, Treasurer and Street Commissioner were appointed by the board.) Clerk, George C. Hazelton; Treasurer, G. Guentzel; Constable, Seth D. Curry; Street Commissioner, S. F. Watkins.

1865—President, John H. Sarles; Trustees, Alfred Palmer, T. Carrier, G. W. Cowan; Police Justice, Martin De Witt; Clerk, G. C. Hazelton; Treasurer, G. Guentzel; Constable, W. W. Watkins.

1866—President, E. DeLap; Trustees, L. Anshutz, John Kelty, O. W. Graves; Police Justice, G. Scott; Clerk, L. J. Woolley, Treasurer, ———; Constable, A. A. Petty.

1867—President, G. C. Hazelton; Trustees, Terrence Carrier, G. Guentzel, John Pepper; Police Justice, J. D. Meeker; Clerk, G. W. Limbocker; Treasurer, J. D. Meeker; Marshal, Arnold Petty.

1868—President, John H. Sarles; Trustees, G. W. Cowan, M. A. Sawyer, G. Guentzel; Police Justice, G. W. Limbocker; Clerk, G. W. Limbocker; Treasurer, J. D. Meeker; Marshal, ———.

1869—President, John Pepper; Trustees, E. Meyer, T. Carrier, G. W. Parker; Police Justice, G. W. Limbocker; Clerk, G. W. Limbocker; Treasurer, J. D. Meeker; Marshal, A. A. Petty.

1870—(Election May 2)—President, Terrence Carrier; Trustees, E. Meyer, R. S. Lathrop, D. W. Carley, L. G. Armstrong; Marshal, John Kelty; Clerk, G. W. Limbocker; Treasurer, J. D. Meeker; Supervisor, W. W. Field.

1871—President, Alfred Palmer; Trustees, C. J. Molle, G. W. Cowan, Austin Ransom, J. P. Willis; Marshal, John Kelty; Supervisor, W. W. Field; Clerk, G. W. Limbocker; Treasurer, J. D. Meeker.

1872—President, James Barnett; Trustees, Harvey Clark, Austin Dexter, R. S. Lathrop, Josiah Thompson; Marshal, S. D. Curry; Supervisor, B. M. Coates; Clerk, G. W. Limbocker; Treasurer, J. D. Meeker.

1873—City incorporated March 12, 1873.

CITY OFFICERS.

1873—Mayor, James Bennett; Alderman, First Ward, Charles McWilliams; Second Ward, Henry Taylor; Third Ward, Henry Nelson; Fourth Ward, John Pepper; Marshal, John Kelty; Treasurer, J. D. Meeker; Assessor, M. F. Crouch; Justices of the Peace, Jacob McLaughlin, Benjamin Shearer; Clerk (appointed), C. H. Contoit.

First meeting of the City Council was held at the city hall on Friday evening, April 4.

1874—Mayor, G. W. Parker; Alderman, First Ward, Gustave Meyer; Second Ward, J. P. Willis; Third Ward, A. McKinney; Fourth Ward, L. Ruka; Marshal, S. D. Curry; Treasurer, L. P. Lesler; Assessor, G. R. Frank; Clerk, C. H. Contoit.

1875—Mayor, James Barnett; Alderman, First Ward, Harvey Clark; Second Ward, J. R. Muffley; Third Ward, G. W. Cowan; Fourth Ward, L. Ruka; Justices of the Peace, M. DeWitt, J. McLaughlin; Treasurer, John Pepper; Marshal, John Kelty; Clerk, C. H. Contoit; Street Commissioner, O. P. Knowlton.

1876—Mayor, G. Meyer; Alderman, First Ward, G. F. Hildebrand; Second Ward, George Cannon; Third Ward, A. M. McKinney; Fourth Ward, M. Ableiter; Treasurer, William Thompson; Marshal, J. P. Willis; Clerk, C. H. Contoit; Street Commissioner, O. P. Knowlton; City Attorney, A. Provis.

1877—Mayor, B. M. Coates; Aldermen, First Ward, W. Thompson; Second Ward, George Cannon; Third Ward, Com. Rogers; Fourth Ward, M. Ableiter; Treasurer, T. Kronshage; Marshal, John Kelty; Justices of the Peace, M. DeWitt, J. McLaughlin; Clerk, H. W. Favor; Street Commissioner, S. F. Watkins; City Attorney, A. Provis; Bridge Commissioner, E. C. Meyer.

1878—Mayor, John H. Sarles; Aldermen, First Ward, M. B. Pittman; Second Ward, John Kelty; Third Ward, Henry Nelson; Fourth Ward, Leo Anshutz; Treasurer, T. Kronshage; Marshal, D. C. Perigo; Clerk, H. W. Favor; Street Commissioner, J. P. Willis; City Attorney, T. J. Brooks; Bridge Commissioner, A. Dexter.

1879—Mayor, T. N. Hubbell; Aldermen, First Ward, O. P. Knowlton; Second Ward, William Stoddart; Third Ward, C. Parce; Fourth Ward, G. Guentzel; Treasurer, T. Kronshage; Marshal, J. F. Woodard; Justices of the Peace, M. De Witt, J. McLaughlin; Clerk, H. W. Favor; City Attorney, William Dutcher; Street Commissioner, John Kelty; Bridge Commissioner, A. Dexter.

1880—Mayor, T. N. Hubbell; Aldermen, First Ward, William Thompson, 1 year; Harvey Clark, 2 years; Second Ward, F. Scheinpflug, 2 years; Edwin Pike, 1 year; Third Ward, D. Lenahan, 2 years; C. Parce, 1 year; Fourth Ward, J. Ruka, 2 years; A. J. Pipkin, 1 year; Treasurer, T. Kronshage; Marshal, John Kelty; Clerk, H. W. Favor; Street Commissioner, John Kelty; Bridge Commissioner, A. Dexter; City Attorney, John D. Wilson.

1881—Mayor, T. N. Hubbell; Aldermen, First Ward, T. J. Brooks; Second Ward, E. Pike; Third Ward, C. Parce; Fourth Ward, M. Ableiter; Treasurer, T. Kronshage; Marshal, John Kelty; Clerk, H. W. Favor; Street Commissioner, John Kelty; Bridge Commissioner, A. Dexter; City Attorney, John D. Wilson; Justices of the Peace, J. C. Richardson, J. McLaughlin.

FIRE DEPARTMENT.

Numerous fires, at an early date, had brought the citizens of Boscobel to such a realizing sense of their need for protection against this destroying element, that when, in 1867, parties at Madison offered the village a good hand-engine at an extremely low figure, Mr. G. W. Cowan was authorized to go to Madison, examine the machine, and if in good shape to buy it. Under these instructions, the engine was purchased at a cost of \$300. Quite a little history attached to this fire queller. It had originally been brought from Fortress Monroe to Madison and stationed at Camp Randall. Upon the breaking-up of this post at the close of the war, the engine, with other Government property, was sold at public sale, and bought by the parties who sold it to this village. Public expectation was considerably disappointed in the appearance of their

new protector, and for the year succeeding the purchase, the engine was allowed to lie neglected and disused. In the year 1868, the village authorities put in hydrants along the race running through the city, and prepared for any emergency that might arise. The burning of the Catlin House and the brewery in this year, and within several months of each other, gave the friends of the abused engine a chance to show its powers, the result being a slight rise in opinions as to its merits. In January, 1869, three buildings standing just north of the Carrier House went up in smoke. Had it not been for the services rendered by the much-abused engine, the Carrier House and adjacent buildings would, undoubtedly, have followed suit. The erstwhile disgraced machine was now in high favor, and steps were immediately taken for the organization of companies for protection against the fire-fiend. The ruins were still smoldering, when, on Monday evening, January 25, a meeting was held at McSpaden's Hall, preparatory to organizing an Engine and Hook and Ladder Company. Mr. Ed Meyer was chosen Chairman, and J. T. Shipley, Secretary. After it had been "moved and carried to form engine and hook and ladder companies," F. McSpaden was elected Foreman of the former, and A. Bobel of the latter. A committee was then appointed to draft constitution and by-laws, when the companies adjourned; the engine company to January 27, and the hook and ladder company to January 28.

At the first-named date, the engine company met and appointed a committee of three to "procure a name" for the company. Their report was made at a subsequent meeting, the name fixed upon being "Protection Engine Company No. 1." The officers elected at the meeting of January 27 were as follows: Foreman, W. H. Rose; First Assistant Foreman, Capt. Farquharson; Second Assistant Foreman, W. W. Watkins; Secretary, O. E. Comstock; Treasurer, J. H. Sarles. The present officers of this company are: Foreman, W. H. Rose; First Assistant Foreman, Theo. Kronshage; Second Assistant Foreman, E. Brookens; Secretary, H. W. Favor; Treasurer, Leo Anshutz.

Hook and Ladder Company.—At the adjourned meeting held January 28, this company finished its formal organization, by electing officers as follows: First Assistant Foreman, George Scripture; Second Assistant Foreman, John Kelty; Secretary, L. G. Armstrong; Treasurer, Robert Anderson. Twenty-eight members formed the company at this time. At an adjourned meeting held February 4, the name of Boscobel Hook and Ladder Company No. 1 was adopted, and the number of members fixed at thirty, as a maximum. This limit has since been abolished, there being at present no restriction to the membership. The officers are: Foreman, A. Bobel; First Assistant Foreman, C. P. Flinn; Second Assistant Foreman, N. Ellingsen; Secretary, L. B. Ruka; Treasurer, G. Meyer; Hose Captain, A. McKinney; Assistant, D. Ricks.

Soon after the organization of the department, or in the summer of 1869, a second-hand engine, somewhat larger than their first purchase, was offered to Boscobel authorities by parties who had purchased it at a foreclosure sale in Guttenberg, Iowa. This engine, like its mate, had come from Madison, from which city it had been sold to the Guttenberg authorities with the result as above. The engine, with hose, hook and ladder cart and appurtenances, was offered to Boscobel for the sum of \$500. The offer was accepted and Boscobel thus placed in possession of two first-class engines of their kind. The new purchase was handed over to the company then organized, and was afterward known as Engine No. 1. It was made at Providence, R. I., and has a ten-inch pump. The old engine was laid up in ordinary until the organization of the second fire company, when it was transferred to them. It has a seven-inch pump, and was manufactured at Rochester, N. Y.

During the summer of 1869, No. 1 Engine House was erected. On the first floor of this structure, Engine No. 1 and the hook and ladder trucks—each in separate apartments—find lodgment. The upper story is used as a city hall, while the basement serves for the purpose of a city "bastile."

Rough and Ready, No. 2.—In accordance with a call issued by G. W. Cowan and J. W. Watson, a meeting was held September 8, 1870, for the organization of a second engine company. Eighteen names were attached to the company's rolls, the officers being: Foreman, G.

W. Cowan; First Assistant Foreman, J. W. Watson; Second Assistant Foreman, A. M. McKinney; Treasurer, Austin Dexter; Secretary, John Classon. The name chosen for the company was "Rough and Ready Engine Company, No. 2." October 30, 1876, a hose company was organized from the members of the organization, A. M. McKinney being elected Captain and John Ricks, Assistant. The present officers are: Foreman, Thomas Crinklow; First Assistant Foreman, Charles Ricks; Second Assistant Foreman, T. Cliff; Secretary, S. Bartholomew. No. 2's engine house was erected in the fall of 1870, soon after the organization of the company, upon Lot 4, of Block 30, being just north of Mr. Cowan's machine shop. In 1879, it was removed to its present location on Superior street.

The department was formally organized as such under an ordinance passed in January, 1874, creating and regulating this branch of the city government. Mr. G. W. Cowan was elected the first Chief Engineer under this ordinance, serving two years, when he was followed by Gustave Meyer, who served a few months, when he was elected Mayor, and T. N. Hubbell was elected to fill the vacancy. He was re-elected, serving until 1879, when he took the Mayor's chair, and was succeeded by T. M. Wells, the present Chief.

Although residing in comparatively a small city, the fire department of Boscobel have ample facilities for proving their efficiency and the metal of which they were made. The result has been most satisfactory, but few towns in the State being possessed of a better organized or more willing band of fire-fighters.

In April, 1858, the inhabitants of the then growing village first formed the acquaintance of the red destroyer, who made his first visitation upon Barnett's Hotel, standing on the present site of the Carrier House. The work was thorough, the house proving a total loss. The next fire of any importance was the burning of the house of Mr. Frank Lewis, in 1863.

The village then had a rest from any disastrous blazes until 1868, when, ere the year had come to an end, three fires had told the inhabitants that they were yet at the mercy of the destroyer. By the first of these, the Catlin House, together with its barns, was burned. At this fire, the old No. 2 engine was used for the first time. A few months later, Ziegelmaier & Biederman's brewery burned to the ground.

These fires were succeeded by the conflagration of January, 1869, mentioned in another place, which resulted in the organization of an efficient fire department. The next great fire came with the burning of the depot August 30, 1870, when, besides this building, Palmer's warehouse, with a large amount of grain, was licked up by the flames. Several other buildings narrowly escaped destruction, being saved only through the strenuous exertions of the department.

From this date, although often called out by small blazes, and once to quell the flames at Ziegelmaier's brewery, the city was visited by no very damaging fire until July 7, 1877, when McSpaden's elevator took fire, and, despite all exertions of the firemen, burned to the ground. September 22 of the same year, the Heim stave factory went up in smoke.

The following year, "Thompson's Corner," Oak street and Wisconsin avenue, was visited by the touch of the fire fiend, and two buildings, with their contents, totally destroyed. During 1880, a large barn and contents, belonging to Parker, Hilderbrand & Co., was consumed. The last ravages of the fire fiend showed themselves January 7, 1881, when the Central House, located in the center of the city, caught fire from causes unknown, and before the fire was under control the house had been completely gutted. Owing to the severe cold weather, the water froze in the couplings and rendered the engines, after a short time, perfectly useless. This closes the list of conflagrations up to the present time.

The fire department, at present, consists of about 100 men; they having, *vide* the last report of the Chief Engineer, 1,000 feet of hose, for which they have two hose carts. Two engines, both hand, and a hook and ladder truck, well supplied with saving appurtenances, complete the outfit.

WISCONSIN RIVER BRIDGE.

Among the many improvements which Boscobel views with a just pride, none occupy so prominent a place in the minds of the city's inhabitants as the bridge spanning the Wisconsin

opposite this city and connecting the trade of that adjoining section with the commercial interests of this place. The situation of Boscobel upon the extreme northern edge of the county, and lying adjacent to a large and growing section of country in Crawford County, forced upon Boscobel's citizens at an early date the necessity of providing a ready means of crossing the river, in order to attract trade from that direction. The war-trumpet had hardly ceased to sound before plans were on foot looking to a consummation of this object. In 1868, a long roadway leading across what is known as "the slew" was built, consisting of earthwork and piling. A good avenue was thus furnished to the river, the crossing of which was effected by means of a ferry. This, however, was seen to be but an imperfect solution of the problem. Constant agitation soon brought the minds of the tax-payers to a feeling that nothing but a bridge would suffice. In 1871, a commissioner was appointed to confer with towns on the other side of the river to see what could be done, but nothing seems to have come of the conference. The stubborn fact was finally forced upon the then village that if a bridge was to be built, Boscobel would have to build it. In order, however, to build the wished-for bridge, it was necessary to have money, and to raise this most effectually and easily, bonds were necessary. Only cities could assume bonded indebtedness, hence Boscobel must become a city. Accordingly, in 1873, the appropriate charter was granted by the Legislature, and at the same time an act was passed granting the new city authority to build a bridge across the Wisconsin and providing for the issuing of bonds in payment of the same. Bonds were afterward issued to the amount of \$30,000, and the contract for a good substantial structure across the river let to a Mr. Pertell, of Milwaukee, for the sum of \$22,000, work being soon after commenced. This was a heavy debt for a city of something over 1,000 inhabitants to assume, but true grit and business shrewdness were back of the movement. Not only was the contract price absorbed in the erection, but extras to the amount of between \$3,000 and \$4,000 were allowed. The cost of the original "dump" had been \$12,000, making the total cost of the structure and avenues nearly \$38,000. The bonds in payment for the bridge were for five, ten and fifteen years. The five-year bonds were promptly met and accruing interest paid as soon as due. The revenues, which became from the first an important feature, furnished each year a respectable sum to be used in payment of interest or bonds.

The *Dial* of April 10, 1874, speaking of the completion of the structure, says: "The new bridge across the Wisconsin River at this place is now completed, although the time allowed in the contract has some time yet to run. It is 700 feet in length, and is supported by close piling covered with plank and filled with rock. Huge ice-breakers protect it from damage in the spring. Near the north end is the draw, which is 150 feet in length. Its capacity is 78,000 pounds to the moving foot, though to break it would require six times that weight. The lumber used on this bridge is from Green Bay, while the iron is from Pittsburgh. The total cost of the structure is \$26,000 in city bonds, issued through the First National Bank of this city. In regard to toll, we copy a section of the law authorizing the city of Boscobel to bridge the Wisconsin River:

"SECTION 4. All funds arising from tolls or from the use of said bridge shall be paid over to the Treasurer of the city of Boscobel, at least once in each month, and shall be kept by him separate and apart from all other funds, and shall not be paid out except upon orders drawn upon that specific fund. The funds arising from the toll or the use of such bridge, after paying for the care and maintenance thereof, shall be applied as follows: First, to pay the interest upon said city bonds, and thereafter to redeem said bonds as fast as said funds will allow."

The bridge is 655 feet in length, comprising draw 150 feet, covered bridge 405 feet, and approaches 100 feet. During 1879-80, much of the piling across "the slew" was replaced with earth and a substantial bridge put in over this stagnant arm of the river, leaving this portion of the work 477 feet in length. The "dump" proper is 2,025 feet in length, making all told 4,157 feet as the total length of the bridge and approaches. These last improvements cost the city about \$6,500, making the whole cost foot up in the neighborhood of \$45,000, exclusive of interest paid on the bridge bonds, which in itself amounts to no inconsiderable sum. The result in a business point of view has been eminently satisfactory.

ARTESIAN WELL.

Desiring to reach a spot from which a constant supply of living, sparkling water could be safely counted on at all times, an association was organized to attempt the consummation of this wish through the means of an artesian well. The organization took on the semblance of a stock company, with shares at \$10 each. In 1876, work was commenced, and carried forward during this year and the succeeding one, when, at a depth of nearly 1,000 feet, a flinty rock was struck that put a stop to further operations, water, at the close of the work, coming to within fourteen feet of the surface. In 1881, the stockholders turned the ground over to the city, upon the condition that it should be devoted to park purposes.

SCHOOLS.

The original and earliest seat of educational interests in this section was a log building standing near Bull's saw-mill, and, in fact, forming one of the mill annexes, serving as a school-room during the day, and a lodging place at night. The ruler best remembered in this little kingdom was a female pedagogue, by name Lucinda Beaudine. The educational advantages offered were of the most limited kind, owing to numerous causes, prominent among which were the somnolent qualities developed by the lady. These qualities were the result of too much of what was known in olden times as "sparkin'." Girls, it is explained by one of the early attendants at this pioneer school, were scarce in those times, and Lucinda was, as a consequence, in great demand, first with one of the country beaux and then another. Midnight vigils and early rising are certain in time to produce a greater or less degree of somnolence, and the present was no exception to the rule. Therefore, while Miss Beaudine slumbered, her young pupils availed themselves of the opportunity afforded, and indulged their propensities for immoderate bathing or other congenial pursuits, until the sharp rat-a-tat on the door-casing told that a spirit of wakefulness obtained in the school-room, when a resumption of duties would follow. How long this school was continued is not known, probably only for a short time, as early in 1851, a small frame building, originally intended for a dwelling-house, standing near the present residence of Mr. Bachmann, was made to do duty as a seat of learning under the rule of Mrs. Ed Rogers, who, in consequence of certain difficulties with Mr. Rogers, had separated from him, and took up the role of teacher to provide the necessities of life. If the tales told of the different modes by which this "pedagoguess" enforced discipline in her little realm are true, her rule ought, in the interests of humanity, to have been a short one.

The school was, however, soon after transferred to an old log structure, standing on a hill near Dennis' Mill, which also had been built for a dwelling; but, at the time at which we have arrived, was used promiscuously as a schoolhouse and church. Upon its vacancy by the educational and religious interests, the building was diverted to its original purpose, and occupied by Jacob Ostrander as a residence. The first building erected for the sole purpose of being used for school purposes was a log structure put up in 1852 or 1853, still remembered by those who came in at an early date, and standing near the present cemetery gates, as one authority has it, or included within the outer limits of the fair ground, according to the evidence of another. While the exact spot hallowed by its presence may not be exactly ascertainable, it is sufficient for present purposes that the building was there, and takes rank as the first regularly built schoolhouse in this section. Here Mrs. Richards, Miss Ann Partlow, Mr. John Dougherty and others held rule until the erection of other buildings in the village better adapted for the use intended.

The first school building to be erected in the present city was the one familiarly known as the "Belfry School," which was put up in 1858 or 1859. The first "wielder of the birch" in this structure was a Mr. Glazier, followed by Major Frank. A few years after, the front portion of the present "High School" building was erected, which formed the entire school establishment until 1867, when the old Methodist Church was purchased, at a cost of \$800, and used as a primary schoolhouse. In 1876 and 1877, other additions were made to the building by extending the high school building to double its original length and erecting a small frame struct-

ure, similar in size to the original primary building. And the buildings, as thus remodeled and added to, form the present school buildings of the district.

Boscobel town and city are included in one district, which also takes in a slice from the northern portion of the town of Marion. The amount raised annually for school purposes approximates \$3,000. The school is graded into seven departments, namely, First, Second and Third Primary; First and Second Intermediate, Grammar grades and High School. The grades below the high school have each one teacher. The high school is under the immediate charge of the Principal, who has one assistant. This higher branch was established under the high school law of 1875, Prof. John Brindley being the first Principal. The first class graduated the following year, the graduating exercises being held in Ruka's Hall, June 22, 1876. The class numbered eight, and the following programme was presented: Music. Prayer by Dr. Stoddart. Essay, "Sunshine and Shadow," Laura B. Pepper. Essay, "Electricity," Kate M. Sarles. Music. Essay, "Mental Culture," Alice A. Simpkins. Oration, "The Men we Need," Herbert L. Partridge. Essay, "Tears," Alice Carrier. Music. Essay, "Past, Present and Future," Lillian A. Limbocker. Essay, "Deeds not Words," Jennie Chandler. Oration, "Young America," Fred Carley. Music. Presentation of Diplomas. Benediction. The number of pupils in attendance in all departments was, a few years ago, as high 700, but, from various causes, this number has been greatly scaled down since that time. The schools are under the charge of a School Board consisting of three members, those at present serving in that capacity being T. J. Brooks, Director; G. W. Parker, Treasurer; T. Kronshage, Clerk. The graduating class for 1881 consisted of six, this being the third class which has been graduated since the organization of the High School Department.

POST OFFICE.

The first official distributor of Uncle Sam's mail matter known to Boscobel was Mr. James M. Dickerson, who was duly commissioned as Postmaster in 1855, the office being established at his store, then situated near the present site of N. B. Miller's premises on Block 34. For the two years succeeding, Mr. Dickerson continued to act in this capacity. He was followed in 1857, by Mr. O. P. Knowlton. The latter was continued in the position of Postmaster during Buchanan's administration. May 1, 1861, Mr. J. M. Dickerson was again commissioned as Postmaster, the office then being located in the building now used by F. G. Eisfelder. He continued to fill the office from this time until his death, in November, 1875, in a manner that gave universal satisfaction. After the decease of Mr. Dickerson, Mrs. Dickerson was continued as Postmistress, her commission bearing date from January, 1876. Early in 1880, the office passed into the hands of William E. De Lap, the present Postmaster, who was commissioned January 13 of that year.

This branch of governmental economy has, from the first, evinced a decidedly roving and unsettled propensity, that prevented it from remaining at rest any great period of time. Judging from the list of places enumerated, it must be as free from moss as the "rolling stone" of the old proverb. Prominent among the sites occupied, besides those already enumerated, were McSpaden's block, Ruka's building, the "Rock" building (now occupied by J. T. Shipley), not to mention several other less prominent places. In March, 1881, the office was removed to the commodious and comfortable room in Bobel's block, where it is at present located.

BOSCOBEL PRESS.

The earliest record of a newspaper in Boscobel is in 1859. In December of that year, George W. Limbocher and A. J. Partridge established the Boscobel *Democrat*, as editors and proprietors. In politics, it advocated the principles of the party whose name it bore, although it was not "peculiarly a Democratic paper," but as the publishers said in their introductory: "We do not believe in little country papers dabbling in politics. The citizens of Grant County want a good, local paper, and such it will be our aim to make the *Democrat*." The prospectus of the Boscobel *Democrat* contained the following: "Five years ago, the place where Boscobel

now stands, was but little better than a howling wilderness. At that time, there were but three houses within a circuit of three miles. The bear and deer ranged free. Now we have a number of taverns, stores and artisan shops of nearly every trade, which go to make up a prosperous and thriving village." The paper had a hard time of it until May, 1860, when it was announced that it would be suspended temporarily, and resume publication at Lancaster. The proprietors changed their minds, however, and disposed of the materials in the office to Messrs. J. P. Hubbard and S. P. Dempsey who established the *Boscobel Express*. The *Express* was a six-column paper, Republican in politics. Adversity followed this enterprise, and within a year and one month, Mr. Hubbard retired from the concern, Mr. Horace Norton succeeding, the firm name then becoming Norton & Dempsey. In the issue of the *Express* for December 26, 1861, an announcement appeared that Mr. Dempsey had retired, and Mr. Norton would continue the paper. The last number of the *Boscobel Express* was published January 2, 1862. December 18, 1862, L. R. Train issued a four-column half sheet called the *Boscobellian*, and on December 27, 1862, appeared the *National Broad Axe*, by L. R. Train, a seven-column folio, Republican in politics and bearing as its platform "The Star Spangled Banner." Conforming himself to the feeling of the times, the editor of the *Broad Axe* in his first issue said: "The *Broad Axe* will be a champion of law and order. The law of the hell-hounds of secession is FORCE, which breeds disorder." This was issued as a specimen number, and from January 8, 1863, the paper was issued regularly. In the following April, Mr. L. M. Andrews became associated in the *Broad Axe*, and the firm name was Train & Andrews, which firm continued until March 10, 1864, when N. B. Moody purchased Andrews' interest. August 10, 1864, Mr. Train retired from the paper, and Mr. Moody assumed sole control of the same. On the 24th day of the same month, Mr. Moody enlisted, and, on leaving for the front, left the paper with S. S. Train, who attended to the business until December 21, 1865, when he became sole proprietor. From a lack support, the *Broad Axe* closed its existence May 31, 1866.

Boscobel Argus.—Mr. C. Lahman commenced the publication of the *Argus* February 24, 1863. The sheet was a seven-column folio, Democratic in politics. The paper had a precarious career of about nine months, when like many others, it had to succumb to the inevitable. The *Appeal* was first published January 1, 1867, W. H. Bennett editor and proprietor. First started as a six-column folio, Republican in politics, and enlarged to seven columns January 29, 1868, with "patent insides." On October 24, 1868, Mr. Bennett retired from the *Appeal*, being succeeded by the Appeal Printing Company. In February, 1869, the name of the paper was changed to the *Boscobel Journal*, the Journal Printing Company publishers, and W. H. H. Beadle as editor. Beadle withdrew April 24, 1869, and was succeeded by Mr. T. W. Bishop, December 14, 1869, who continued the publication of the *Journal* until August, 1870, when the material of the office was purchased by R. B. Rice and T. W. Bishop and removed to Lancaster. Upon the suspension of the *Journal*, Boscobel was left without a newspaper until December 25, 1872, when the *Boscobel Dial* was issued by Messrs. Walworth & Son, C. B. Walworth publisher. The *Dial* was a seven-column folio, Republican in politics, published on the auxiliary plan. Walworth & Son continued the *Dial* until January 2, 1874, when Mr. C. Burton purchased the business and carried it on until September 10, 1875, when it passed into the hands of the present proprietor Capt. H. D. Farguharson. The *Dial* was enlarged to an eight-column folio, December 24, 1875.

CHURCHES.

Congregational Church.—This church was organized August 2, 1857, in the old Milwaukee & Mississippi depot, through the efforts of Rev. A. A. Overton. The following persons were united by letter in its organization: Moses Rice, John Tyler, A. D. Allen, William Beals, Clarisa P. Rice, Myra A. Rice, Lucy M. Rice, Marcia Carley and Betsey Kellogg. At this meeting, Moses Rice was appointed as a delegate to the Congregational Convention of the State. The earlier meetings of the congregation were held at the depot. The church grew stronger with years, and August 5, 1860, notice having been previously given according to the statute of the State, the church met and elected the following persons as Trustees: Hezekiah Kellogg,

for the term of three years; Job Leffley, for two years, and James Lucas for one year. The gentlemen forming the first Board of Trustees for the young society.

Up to the middle of the year 1863, the congregation were without a church home. With this fact in view, their Pastor, the Rev. Mr. Overton, assisted by some of the members, proceeded with the work of soliciting subscriptions for the purpose of erecting a house of worship. So far, and with such success had their labors progressed, that by 1863, enough was in hand to warrant a commencement. The lots on which the church was afterward erected were donated to the society by Mr. John Mortimer. The church—the same with some enlargements is still standing—was first opened for public worship July 12, 1863, the sermon on this day being delivered by the Rev. D. Cleary, of Beloit. The new edifice was not dedicated until in January, 1864, when the dedicatory sermon was by the Rev. Mr. Taylor, of Madison. From the founding of the church until this time, Rev. Mr. Overton had ministered to the spiritual wants of the congregation, devoting one-half of his time to Boscobel, and the remaining portion to Avoca. Mr. Overton was succeeded by Rev. Mr. Melvin. This Pastor was the first engaged exclusively by the church, whose growing needs demanded the whole time of a Pastor. Mr. Melvin remained one year, when he was succeeded by Rev. B. King, who took up his labors with the church in 1864, and continued as Pastor until 1866. For the year succeeding his departure, the congregation was without a spiritual guide. In 1867, the deficiency was supplied, and Rev. William Stoddart, Sr., commenced his labors with the congregation in the relation of Pastor, a connection that remained unbroken during thirteen years.

The church, as originally built, was 40x32, but as years rolled on, it was found too small for the growing needs of the society, and in 1867 or 1868, was enlarged to its present size, 60x32, twenty feet having been added to the rear. In July, 1879, during the prevalence of a heavy thunder shower, the church was struck by lightning, and damaged to the extent of about \$200. The repairing of the damages inflicted caused an interval of nearly six months to intervene ere regular church services could again be holden in the building. Dr. Stoddart severed his connection as Pastor of the congregation in 1880. The same year, Rev. E. C. Steckel received an invitation to assume Pastoral charge of the church, which invitation was accepted, and his labors have continued up the present date.

At different times in the history of the church, a burden of debt has seemed to paralyze for a time the energies of all, but these incumbrances have been successfully and successively removed, and to-day, the church stands free from all debt. In connection with the church, there is a flourishing Sunday school of over two hundred scholars, divided into twenty-three classes. The school has a membership in the Home Missionary Society, and enjoys the enviable pleasure of being out of debt and having money in the treasury.

The present value of the church property is \$2,000. The officary being as follows: Deacons, J. R. Muffley and J. B. Ricks; Clerk and Treasurer, Mrs. L. G. Armstrong; Pastor, E. C. Steckel. The total number of members received into the church since its organization is 202, of which eighteen have passed over the shining river to the world beyond, and fifty-seven have been given letters to other churches, leaving a present membership of about one hundred and twenty active members.

Methodist Episcopal Church.—Early in the year 1855, the few members of this faith then residing in Boscobel or contiguous sections gathered together at the residence of Mr. James M. Dickerson, where they listened to the principles of Christianity as they were inculcated by the Rev. Mr. Buck, the minister who at that time included Boscobel in his circuit. The following year, the little class held their meetings in the depot. Upon the organization of the Congregational congregation in 1857, the two societies used the depot on alternate Sundays. In the meantime, the Rev. Mr. McMullen had succeeded Mr. Buck. During the pastorate of Rev. Mr. Irish, a year later, the Methodist society held services in the old log schoolhouse, standing near the present cemetery. Rev. C. Cook followed Mr. Irish as Pastor of the young church, preaching a few times in the old schoolhouse, when the church building in process of erection was completed, and the society was no longer homeless. This was in 1861. Among the earlier

members of the church were Mrs. Susan Dickerson, who was prominently connected with the church from its organization until the time of her death; A. Ransom, Eliza Ransom, George Hall and Mrs. Hall, "Father" Irish and Mrs. Irish.

This house of worship was used for the six years next succeeding, when the necessity of a larger church was forced prominently upon the minds of the members, and steps were accordingly taken to erect a structure in accordance with the needs of the society. A church edifice, 30x60, was erected during 1867, at a cost of about \$3,000. Of this amount some \$1,000 was raised by subscription, while the old church building was sold to the city for school purposes, the consideration being \$800. Other sources furnished additional sums, so that upon the dedication of the structure, the debt had been scaled down to \$350. In the meantime, Rev. Mr. Cook had been succeeded by other Pastors—Rev. Z. S. Hurd being the Pastor at the time the new church was completed, and remained in charge one year. The church records are sadly lacking in statistical matter, there being an entire absence of anything in the shape of records for several years, but the following list of Pastors is in the main correct from Mr. Hurd's pastorate, following whom came Rev. Mr. Buck for eighteen months; Rev. Mr. Cooley, several months; Rev. C. P. Hackney, three years; W. W. Wheaton, one year; A. W. Cummings, one year; J. C. Aspenwall, one year; W. H. Cheynoweth, one year; George W. Nuzam, two years; George Haigh, who remained a few months; John Allison, one year and eight months; and the present Pastor, who has been in charge one year.

During its existence, the church has suffered much from removals of members, but at present has a membership of sixty, is free from debt and in a prosperous condition. Connected with the church work is a flourishing Sunday school, numbering sixty scholars. The present church officary is as follows: Pastor, T. M. Evans; Trustees, Joel Cramer, G. A. Christ, H. Hummel and M. D. Tillotson. The estimated value of the church property is \$2,000.

Baptist Church.—The organization of this church was effected in 1869, with a membership of seven, as follows: J. Flint, Alethed Flint, Deacon, and Mrs. Bailey, Lewis Cobb, Mrs. Carpenter and Clara Jones. During the succeeding year, a protracted meeting held in Pittman's Hall, by Elder Phillips, added quite a number to the young organization. Soon after, Rev. Mr. Prouty was invited to the pastorate, and commenced his labors. During Rev. Prouty's pastorate, the church still standing on Mary street was built at a cost of about \$1,500. Of this amount, \$500 had been contributed by the Missionary Society located in New York, and an equal amount had been raised by subscription. A debt of about \$500 was therefore left hanging over the congregation, which continued clinging to the organization. Rev. Prouty's pastorate extended over a period of seven years. Upon his departure, the Missionary Society of Chicago sent out Rev. Mr. Rermott to take charge of the little flock. This gentleman remained about a year and a half, during which period, by strenuous exertions, the incumbrances on the church property were lifted, and the congregation stood forth free from debt. At present, the church is without a Pastor. The membership is in the neighborhood of forty, the present Trustees being O. A. Rice, Frank Davidson and L. J. Woolley. From its organization, the church has kept up with punctual regularity its weekly prayer-meetings and covenant meetings once a month. A flourishing Sunday school furnishes a means of inculcating Christian doctrines to the younger members of the church, and testifies to the interest taken in church matters by old and young alike.

Lutheran Church.—Through the efforts of Rev. E. Wachtel and other prominent members of the Lutheran faith in Boscobel, the Lutheran congregation was organized February 23, 1867. The original members were as follows: Leo Anschutz, John Ruka, Louis Ruka, G. Guentzel, Phillip Hirschmann, John C. Krueel, George A. Krueel, Adam Krueel, John Sanger, Fritz Scheinpfluge, John Martin, John Boldt and William Seaman. The first officers of the society were: President, J. C. Krueel; Secretary, Leo Anschutz; Treasurer, G. Guentzel. Phillip Hirschmann was elected Elder. Steps were immediately taken for the erection of a house of worship, and a building, 24x40 feet, standing on the corner of Mary and Church streets, was soon after completed at a cost of \$1,300. One lot of the ground occupied by the church pro-

erty was donated to the society by Dwight T. Parker, Sr., the remaining lot was afterward purchased of Mrs. Dwight T. Parker. A parsonage was also erected at a cost of \$1,500; and, in 1880, a small school building was added at a cost of \$250, making the value of the church property at present about \$3,000. Rev. Wachtel remained as Pastor only a few months, and was succeeded later by Rev. John List, whose pastorate extended over the succeeding four years. Rev. Hirschmann took charge of the congregation upon the retirement of Rev. List and remained one year; when he was followed by Rev. Helbig, who began his work with this congregation in 1874, continuing six years, endearing himself to the church, and doing a good work for the Master. His successor was the Rev. Muchmann, who still continues to serve in the pastoral office. The present officary of the church is: Pastor, Rev. Muchmann; Trustees, G. Guentzel, John Boldt, Ed Weideranders. The membership is 126.

Catholic Church.—The first meetings of this society were held in an old log cabin situated just north of the railroad. From this time on, services were held at various houses until 1872, when the church now standing was erected. The cost of this building was to be in the neighborhood of \$2,300, had the original plans been carried out. The church, however, was never completed as originally provided. The lots on which the building stands were obtained from the late deceased Hon. J. Allen Barber. The first Pastor to officiate in the new church was Rev. Father Cleary, who remained in charge of the church for a short time. His successors have been Rev. Fathers McMahon, Stelle, and the present Pastor, Father Schroudenbach. The exact dates of the arrivals and departures of the different Pastors is non-obtainable, owing to a deficiency in the records. Owing to general financial difficulties, the organization has been seriously handicapped in their work, but it is hoped that the future will be brighter than the past.

HOTELS.

The first institution having for its avowed object the sustenance of the inner man was opened by one Curtis, in the year 1856. The site of this first hotel was the second story of a warehouse building put up by Florence Liscum that year. The lower floor was meant for ordinary warehouse purposes. This for the time being was the only "hotel" of which the new settlement could boast, and continued to furnish food to the hungry and rest to the weary traveler for some six months, when "mine host" Curtis retired to the walks of private life. Succeeding this crude attempt came the Barnett House in the latter part of 1856, where, under the *regime* of "Andy" Barnett, most genial of landlords, the stranger was taken in and cared for in a manner that soon raised the reputation of this caravansary to the highest rounds of the ladder of famous county inns. In April, 1858, this house caught fire, and, despite all exertions, burned to the ground. For the time being, the Philbrick House, occupying the building still standing on the corner of Wisconsin avenue and La Belle street, and kept by a widow lady of the above name, caught the diverted channel of boarders and guests who had formerly made the "Barnett" their headquarters, and did a thriving business until the completion of the new building, erected upon the ruins of the burned hotel. The new structure was somewhat enlarged in size, and was opened again in 1859 by Mr. Barnett & Son, the latter selling out to Mr. John Pepper. They disposed of it, after a short time to other parties, the business finally falling into the hands of Mr. James Barnett, under whose *regime* the "Barnett" acquired a reputation that was State rather than local. After Mr. Barnett's retirement, the caravansary passed through different hands until it finally came under the supervision of Mr. Carrier, by whom the building was raised and one story added underneath, the name at the same time being changed to the "Carrier House," by which appellation it was known for many years. The house is at present in the hands of Mrs. J. A. Betts, and ranks among the first of Boscobel's hotels.

Prominent among the hotels of a later date, is the Central, which was erected in 1873 by Mr. A. Bobel, and opened the same year by Mr. James Barnett, who continued as landlord for the succeeding five years, when Mr. Bobel himself took the house, and ran it until January 7, 1881, when it was destroyed by fire, the interior being completely gutted, only the huge stone walls having been left standing. With an energy deserving of the highest commendation, Mr.

Bobel immediately set to work clearing away the debris preparatory to rebuilding. The new Central was completed by spring, and re-opened after being refurnished and refitted in the most approved style. The house is under the charge of Mr. Bobel himself, and takes a high rank among the hotels of Southwestern Wisconsin.

Among other hotels to which Boscobel has at various times fallen heir is the Boscobel House, on the corner of Wisconsin avenue and Bluff street, which was erected in 1857 by Hall Brothers. Its immediate predecessor was a building in process of erection for tavern purposes, the material being a compressed brick made of lime and sand, of which the patentees expected great things. But the floods descended and the winds blew and beat upon that house, the result being that the structure was soon progressing in a thick, mortar stream down the street, carrying with it the air castles of the founders. The Boscobel House still remains standing and in use as a hotel, being at present under the proprietorship of J. Crowley.

The Muffly House, on Oak street, was erected during the war period, or rather, started then and constructed piecemeal by future owners. It came into the hands of the present owner in 1873, by whom the name was changed as above.

The City Hotel, kept by D. Lennahan west of the depot, is a farmers' hotel of moderate capacity, that does a thriving business in its particular line.

The Catlin House, standing near the present City Hall building, was, during the war period, a prominent candidate for public favor, but disappeared in smoke during 1868, and was not again rebuilt. Other and smaller houses of entertainment there may have been, but the comparatively unimportant part they played in the development of the city has not marked them for special notice.

MASONIC ORDERS.

The first lodge of Masons to be organized in Boscobel, was Beautiful Grove Lodge, No. 101, which was instituted during the year. The first workings of the lodge was under a dispensation, the charter not being granted until some time after. This early organization included such names as those of Messrs. Palmer, Grey, Wayne, Hartshorn, Stephenson, Mortimer, Limbocker, R. J. Hildebrand and others, whose names have escaped the memories of those still present as residents of the city. Owing to internal difficulties, the lodge charter was surrendered December 23, 1863. The meetings had been held over the store of Fette Meyer & Co., occupying the building now used by Sawyer & Favor's drug store. The Masters of the lodge so far as can be recalled, were Mr. John Mortimer, George Hall, Jehial Stephenson, George Hartshorn.

For the three years succeeding the suspension of operations by the Beautiful Grove Lodge, Masonry at Boscobel was at a stand still. Late in the year 1866, endeavors were made to organize a second lodge, the prime mover in the work being Charles F. Kimball, through whose exertions and those of others, a dispensation was granted, and a lodge gotten in running order early in the spring following. The lodge charter was not received until June 11, 1867, the charter members being C. F. Kimball, G. W. Cowan, L. G. Armstrong, M. A. Sawyer, Charles McWilliams, M. B. Pittman, Joel Cramer, J. M. Calloway, P. S. Dusenbery, Lewis Kimball, Jr., and Theodore Kirkpatrick. Of this list, Mr. C. F. Kimball is now a resident of Pontiac, Mich.; Messrs. Cowan, Armstrong, Sawyer, McWilliams, Pittman and Cramer are residents of Boscobel; J. M. Calloway is located at Millet, Wis., and the abiding place of Messrs. Dusenbery, Lewis, Kimball and Kirkpatrick is unknown. The name of this lodge was Grant Lodge, No. 169, the name being taken from the county cognomen. The first meetings were held in rooms over Knowlton & McLaughlin's store. In the fall of 1867, Mr. McSpaden built the block still standing near the Betts House, and the lodge secured rooms in the third story of this building. Here they remained for some years, when a desire was expressed on the part of a majority of the members to coalesce with the Odd Fellows Lodge, and jointly occupy one lodge-room. This was done, and for five years, the lodge meetings were held over Shieipfluge's store, at the end of this time, it was decided to return to their former hall in the McSpaden Block, where they at present occupy a fine suite of rooms on the third floor.

The first lodge officers were W. M., C. F. Kimball; S. W., G. W. Cowan; J. W., L. G. Armstrong. The list of Masters from that time to the present contains the names of Cowan, Armstrong, Limbocher, Rice, Hubbell, Adams and Willoughby. The membership at present is sixty-two, with the following list of officers: W. M., S. R. Willoughby; S. W., W. E. De Lap; J. W., J. D. Wilson; Treas., M. A. Sawyer; Sec., T. N. Hubbell; S. D., F. C. Muffley; J. D., H. W. Favor; Tiler, A. Alden.

Royal Arch Masons.—Boscobel Chapter, No. 52, was instituted March 3, 1877, and the first regular meeting held March 13. The charter members were S. J. Brooks, F. B. Burdick, Charles McWilliams, D. C. Perigo, W. E. Gates, A. J. McCarn, S. C. McDonald, V. Millet and G. W. Nuzam. The first officers elected were H. P., S. J. Brooks; K., T. B. Burdick; S., C. McWilliams. The present membership of the chapter is thirty-six, meetings being held the second and fourth Fridays of each month in the Masonic Hall. The officers are H. P., M. A. Sawyer; K., D. C. Perigo; S., G. W. Parker.

Knights Templar, Commandery No. 15.—The dispensation for this order was granted February 7, 1880, to S. J. Brooks, L. F. S. Viele, Thomas McWilliams, L. G. Armstrong, M. A. Sawyer, S. R. Willoughby, J. C. Richardson, William McWilliams, M. B. Pittman, S. C. McDonald, N. L. James, O. P. Underwood, H. E. Lindsay and J. Pugh. The Commandery was instituted by John W. Woodhull, Grand Commander, assisted by the Grand Commandery of Wisconsin, November 10, 1880, under charter dated October 21, 1880. The first list of officers was as follows; T. J. Brooks, E. C.; L. F. S. Viele, Gen.; Thomas McWilliams, C. G.; William McWilliams, Prelate; M. A. Sawyer, S. W.; S. R. Willoughby, J. W.; C. McWilliams, Rec.; W. E. De Lap, Treas.; J. C. Richardson, Std. B.; L. G. Armstrong, Sd. B.; M. B. Pittman, Warder; J. H. Clark, Jr., Sent.; Guards, Ed Meyer, G. W. Parker, O. P. Underwood. The same list of officers obtained under the dispensation. The Commandery then numbering twenty members attended the Grand Triennial Conclave held at Chicago in August, 1880. This is the only Commandery with the confines of the county, and, in fact, with the exception of the Commandery established at Mineral Point, the only one within the southwestern portion of the State. The limits of the territory over which the Commandery wields authority in its particular sphere is defined by a mean line between Boscobel and La Crosse, Madison and Mineral Point on the north, east and south, while on the west it is bounded by the Mississippi River. The present membership is thirty-five. Regular meetings being held on the first and third Fridays of each month at the Masonic Hall.

Council.—Boscobel Council, No. 51, was organized February 24, 1881. It has a present membership of thirty, with the following officers: M. A. Sawyer, T. J. M.; D. C. Perigo, D. M.; George W. Parker, P. C. W.

The number of thirty-second degree members is six, as follows: T. J. Brooks, Thomas McWilliams, L. F. S. Viele, C. S. Williams, M. B. Pittman, William McWilliams. To this list many other names are shortly to be added.

I. O. O. F.

Beautiful Grove Lodge, No. 122.—This lodge was instituted February 26, 1867, as the result of the direct efforts of H. W. Favor and George P. Smith. Grand Master C. C. Cheney, of Janesville, assisted by members from the Mississippi Valley Lodge, No. 86, of Lancaster, assisted at the christening ceremonies of this new addition to the great family of Odd Fellowship. The charter members were as follows: William Northey, Philip Kelts, James Kelts, John Pepper and George P. Smith. H. W. Favor was debarred the pleasure of being enrolled as one of the charter members, owing to non-arrival of his card from the New Hampshire Lodge to which he had formerly belonged. The first officers elected were N. G., Philip Kelts; V. G., G. P. Smith; R. S., Jacob McLaughlin; Treasurer, John Pepper; W., H. W. Favor; Conductor, G. C. Hazelton; I. G., R. E. Kimball.

Beautiful Grove Lodge grew and flourished apace, and in time became the fountain-head of many lodges instituted in different parts of the county. Lincoln Lodge, No. 176, of Mount

Hope; Bloomington Lodge, No. 159, of Bloomington; Harmonia Lodge, of Boscobel, now merged again into the parent lodge, and Richwood Lodge, of Richwood, were each and all instituted by members of Beautiful Grove Lodge, bearing cards from the same.

The number of members admitted since the organization is 167. Of this membership ten have been removed by death, eighty-five have withdrawn by card or been dropped, while seventy-two still remain to continue the good work inculcated by the teachings of the lodge.

The different degrees have received the following recognition: Initiatory degree, eight; Degree of Friendship, twelve; Brotherly Love, seven; Degree of Truth, twenty-three; number of Past Grands, twenty-two. The lodge at present is in a flourishing condition with a surplus of \$525 in the treasury.

The officers for the term ending June 30, 1881, are N. G., George W. Kendall; V. G., J. W. Fritz; Secretary, Nels Ellenson; Treasurer, H. W. Favor; W., Jacob Christ; Conductor, Frank A. Rowe; I. G., Philip Kelts, O. G., L. M. Wells; District Deputy G. M., H. W. Favor. Trustees, Andrew Olsen, Philip Kelts, John Pepper. The regular night of meeting is Tuesday of each week, the hall of the society being situated in Walker's Block opposite the Betts House.

A. O. U. W.

Charity Lodge, No. 9—Instituted May 11, 1877, by J. I. M. Chrissinger, Deputy G. M., of Wisconsin, assisted by William Stoddart, Jr., of Anamosa, Iowa. The charter members were L. G. Armstrong, H. W. Favor, L. P. Lesler, J. D. Wilson, R. J. Arthur, R. C. Stephens, Henry Walter, J. P. Miller, B. Kronshage, T. M. Crinklaw, A. G. Meyer, S. D. Curry, H. R. Flory, William Wagner, John Pepper and A. T. Phillips. The first officers were H. W. Favor, P. M. W.; J. D. Wilson, M. W.; S. D. Curry, G. F.; T. M. Crinklaw, O.; A. G. Meyer, G.; H. Walter, Recorder; B. Kronshage, Financier; M. A. Sawyer, Receiver; William Wagner, I. W.; H. R. Flory, O. W. Trustees, J. P. Miller, L. G. Armstrong, L. P. Lesler. First Lodge Deputy, H. W. Favor. The lodge has, since its beginning, received forty-one members, of these six have withdrawn, leaving a present membership of thirty-five. The officers for the term ending June 30, are as follows: Trustees, H. R. Flory, W. J. F. Nanert, M. Ableiter; P. M. W., W. J. F. Nanert; M. W., Anton Rieren; G. F., S. Anderson; O. S. D. Curry; G., A. Case; Recorder, H. W. Favor; Financier, R. J. Arthur; Receiver, T. N. Hubbell; I. W., H. R. Flory; O. W., G. Guentzel; Lodge Deputy, H. W. Favor.

TEMPERANCE ORGANIZATIONS.

Temple of Honor.—The present lodge of this order was instituted February 16, 1877, by R. B. Rice, Deputy G. C. T. The charter members were J. H. Sarles, O. E. Miller, Dwight F. Parker, Jr., C. Barnett, William Muffley, B. S. Burdick, Henry Walter, Frank Parker, Peter Miller, S. R. Willoughby, Rev. George Nuzam, Alex Provis, H. D. Farquharson, D. G. Bliss, C. Cook, F. Rowe, C. J. Dickerson, A. Nixon, H. W. Hubbell, D. O. Pickard, George Rice, M. E. Rice, A. N. Cook, James Bailey, William Parnell and J. E. Duncan. Following the organization, the following officers were elected: W. C. T., J. H. Sarles; V. T., O. E. Miller; R. S., D. T. Parker, Jr.; Assistant Recorder, C. Barnett; Financial Recorder, B. B. Surdick; Usher, Henry Watter; Deputy Usher, Frank Parker; W. G., P. Miller; W. S., S. R. Willoughby; P. C. T., George Nuzam; Temple Deputy, Alex Provis. The total number of members received within the lodge since its organization has been 150. The lodge, although it has suffered somewhat in time past from various causes, is at present in a prosperous condition. The list of officers now serving is W. C. T., V. J. Kratochwill; W. V. T., F. Stephens; Worthy Recorder, C. R. Garrett; Worthy Assistant Recorder, J. Benoy; Treasurer, A. Dexter; Chaplain, F. M. Evans; Usher, George Sanger; Deputy Usher, M. E. Crouch; W. G., H. Hummel; W. S., F. Reiger; Temple Deputy, R. C. Stephens. The lodge holds regular weekly meetings in their hall, corner of Wisconsin avenue and Bluff street.

Independent Order of Good Templars.—Forest City Lodge, 303, was instituted February 10, 1875, with thirty-seven charter members, by Hon. James Ross, of Madison, Wis. The

J. B. Moore

MUSCODA.

officers first chosen were, W. C. T., Henry Reynolds; V. T., Mrs. J. P. Willis; Rec. Sec., J. L. Stuart; Asst. Sec., Mamie Rice; Fin. Sec., Frank Fish; Treas., Debbie Sarles; M., Arthur Hixon; Asst. M., Mattie Barnett; I. G., Kate Sarles; O. G., Abner Clark; Lodge Deputy, Andrew McFall.

The lodge has received over two hundred members since its organization, but the present list of active members is much below this number, owing to withdrawals and the violation of the pledge by some of the members. The lodge at the present time is out of debt and in a prosperous condition. The officary is as follows: W. C. T., R. C. Stephens; W. V. T., Debbie Sarles; Chaplain, Mrs. Wadsworth; Sec., Rev. T. M. Evans; Fin. Sec., G. A. Christ; Treasurer, Mrs. R. C. Stephens; Marshal, T. D. Wadsworth; Asst. Marshal, Jennie Chandler; I. G., Mamie Davy; O. G., Pearl Devoe; Lodge Deputy, Kate M. Curry.

December 31, 1875, the Boscobel Juvenile Temple was instituted under the auspices of the Good Templar Lodge, Lillie Robinson, G. W. J. S., officiating at the initiatory services. This band of young templars has continued up to the present time. Its condition is as flourishing as its most earnest supporters could wish, and is doing a good work in inculcating, at an early age, the principles of soberness and temperance upon the little folks of the city.

Other societies were organized for the benefit of the juvenile portion of the population, some even bearing date previous to those already mentioned. The first of these, called the Band of Hope, was organized, April 24, 1866, with Rev. M. Morehouse as Superintendent; Mrs. M. M. Jones, Assistant Superintendent, and Miss Emma Smith, Secretary; and had a membership of over one hundred. Another society, called the "Gem Temperance Army," was organized December, 1872, with twenty-two charter members, but was afterward merged into a second Band of Hope, and as such continued for a time. Ribbon Lodges have also seen a fleeting life, but the principal and effective organizations are as above.

CEMETERY.

To the southeast of the city, occupying a slightly position on a spur of the bluffs surrounding it, and the white shafts standing forth in harmonious contrast to the green slopes above and beyond lies the final resting-place of those who have passed over in hope.

The northern portion of this burial plot was purchased in the fall of 1856, from Mr. Joshua Brindley, who is now numbered among its quiet residents. This original tract comprised five acres, the price paid being \$50. It was platted the following spring into lots 20x22 feet. An additional tract of four acres just adjoining it on the south was secured, the compensation being \$00. This, too, was platted, and made ready for sale.

The original purchase had been made by the Town Board of Marion, and upon the separation of the two towns, in 1859, the cemetery was transferred to the Town Board of Boscobel, with whom all control is at present, and has been from the first, vested. The amounts received for the sale of lots is employed in the improvement and beautifying of the cemetery, although the small amount received prohibits any extensive work in this direction. Beautifully situated, it needs but little of man's art to add to its natural gifts. Calm and quiet it stands with kindly arms silently guarding the precious clay intrusted to the cool and sheltering beds within its gates.

BOSCOBEL AGRICULTURAL AND DRIVING ASSOCIATION.

This association, whose fine annual exhibitions reflect upon the stockholders primarily, and incidentally upon the city, was organized in 1874. In May of that year, a meeting was held to take into consideration the advisability of forming an association of this nature, ending in Messrs. John Pepper, G. F. Hilderbrand and Ed Meyer being appointed as a committee to solicit subscriptions to stock.

June 17, a second meeting was held, when the committee made a report, the result being so satisfactory that it was decided to go on with the movement, and, as a first step, those present formally organized as a society and elected the following officers: President, B. M. Coates;

Vice President, George C. Hazleton; Secretary, T. J. Brooks; Treasurer, John Pepper. An Executive Committee was appointed, consisting of Ed Meyer, G. F. Hilderbrand and Charles McWilliams, with the President, Vice President, Secretary and Treasurer as *ex officio* members. The articles of incorporation were not adopted until August 26, the incorporators being B. M. Coates, George C. Hazleton, F. J. Brooks, John Pepper, Ed Meyer, C. McWilliams, M. B. Pitman, J. H. Sarles, H. Dunkleff, G. F. Hilderbrand, J. N. Comstock, John Buka, A. Bobel, N. P. Miller, Henry Bugbee.

In the meantime, the association had purchased a tract of land just south of the city, containing thirty-six acres, and known as the Powell estate. Around this they erect a high board fence, and commenced the work of preparing a track, erection of suitable buildings, etc. The track, when finished, was pronounced the best half-mile track in the State by competent judges, and horsemen generally have indorsed this opinion. The first fair under the auspices of the association was held October 7-9 of the same year, and was an immense success, giving the society a good "send-off" from the first. This tidal wave of prosperity has continued, with slight drawbacks, up to the present, placing the society upon a foundation most enviable as far as regards stability and sound financial footing. No organization of this kind in the State has been so liberal in premiums and inducements for exhibitors, the consequence being that each class is always well filled, while the races attract some of the best trotting stock in the country. The present officers of the association are—President, George F. Hilderbrand; Vice President, Thomas Tormey; Secretary, T. J. Brooks; Treasurer, Theodore Kronshage; Executive Committee, George F. Hilderbrand, Thomas Tormey, Theodore Kronshage, T. J. Brooks, Ed Meyer, Jacob Scott, Myron Whitcomb. During 1880, the society disposed of eight acres of land lying on the south side of their original purchase, the buyer being Mr. A. Bobel, and the consideration \$400. This leaves them with twenty-eight acres lying contiguous to the city, easy of access by pedestrians as well as others, and in such shape as to be best adapted for the needs and designs of the association.

BOSCABEL LIGHT GUARD BAND.

This organization came into existence May 7, 1879. Previous to this time, other bands had been organized, breathed their brief existence, and then succumbed to disintegrating influences. The present organization numbers twelve members, and has a musical reputation which many older societies might envy. In September, 1880, a tasty and beautiful uniform was procured by the band, which adds much to their appearance when on the street. This expense was met without trouble, as have been all other expenses. The society is now, as it has been from the first, in an extremely prosperous condition.

MANUFACTORIES.

Boscobel Hoop Pole Company.—This company was organized in 1872, and included the firms of Hilderbrand & Co., Meyer Brothers and M. B. Pittman. The principal articles manufactured by the firm are tight-barrel staves and hoops, although the dealings of the firm extends to hoop poles, railroad ties and cordwood. The business of the firm is quite extensive, furnishing employment for twenty-five men. The number of hoop-poles received averages 2,500,000 annually, while the railroad ties number 75,000. Tight-barrel staves are manufactured at the rate of 200,000 per year, the most improved machinery being used in the works of the company. The business of the company is under the charge of William Rose, who has occupied the position of Superintendent since the commencement of business in 1872.

Carriage and Wagon Manufactory.—These extensive works, operated by Ruka Brothers, were opened in the year 1879. In connection with the business is a foundry and machine shop. The firm manufactures everything in the shape of wheeled vehicles, from a hand-barrow to a fine carriage. The establishment occupies the services of from thirteen to seventeen hands, and the works are under the immediate superintendence of Mr. John Ruka. The manufactory proper occupies a building 130x60 feet in extent, two stories high, and work has already com-

menced on a large warehouse for finished work that will be completed during the summer, and will cover a ground area 60x60 feet, and be 24 feet in height. New and improved machinery has been lately introduced for bending woodwork, which is profitably employed not only in material designed for the firm, but outside parties as well. The different rooms are as follows: Foundry, 40x28; blacksmith shop, 40x50; wagon shop, 22x50; paint room, 22x50; machine room, 40x50. In addition are two dry-houses, one 28x40, and the other 40x50. A ready market is found for the manufactures of the firm, the annual production averaging about two hundred wheeled vehicles, beside other smaller productions. The business is on the increase, and bids fair to soon become one of the largest establishments of the kind in Western Wisconsin.

Stave Factory.—This factory, established by Mr. William McWilliams in 1877, is situated just across the river from the city. The factory proper was a two-story building, 46x24 in size, with an engine room adjoining 12x40 feet.

In January, 1879, the factory was destroyed by fire, supposed to be the work of an incendiary. The loss was estimated at \$5,100, on which was an insurance of \$3,270. With characteristic energy, the proprietor commenced clearing away the debris, preparatory to rebuilding, ere the ruins had ceased smoking. In six weeks the buildings were again up, and work again resumed. The *Dial*, speaking of this establishment at this time, says, speaking of the new and improved machinery in use: "The heading saw is a Trevor machine, Law's patent, capable of sawing twenty-one cords of bolts per day of ten hours. The stave machine is the improved Champion, manufactured by Gerlach & Co., Cleveland, and has a forty-six inch cut, with a capacity of eleven cords of bolts per day. The superiority of these saws consists in that the bolts do not have to be put through the steaming process. The boiler used is of forty-horse power, and the engine of twenty-horse power."

Night and day gangs keep the mill in constant operation, thirty-two men and two teams being necessary for the operating of the factory. About 1,000,000 staves and headings were manufactured last year. A car is loaded daily from this factory. All kinds of tight-barrel cooperage are manufactured by Mr. McWilliams.

BRICK YARDS.

Comstock's.—The first brick yard to be opened in Boscobel was started by Hiram Comstock, on the farm now owned by Mrs. Patrick Enright, on Sander's Creek, as early as 1854. This yard was in operation until 1867. From eight to ten workmen found employment here during the season. The last year of Mr. Comstock's proprietorship, about two hundred thousand brick were made in the yard. J. L. Taylor run the yard for the two years succeeding Mr. Comstock's withdrawal, employing eight men, but was finally obliged to suspend operations, owing to a fall in the market and consequent lack of sales. The first brick house erected in Boscobel was built by Alvan Wood, from brick furnished by this yard. The house is still standing, as the residence of Mr. George Smith, Sr.

Bell's.—During the year 1867, Mr. Bell operated a yard south of J. L. Taylor's residence. During the year in which it was in operation, some three hundred thousand brick were manufactured, but becoming involved in financial difficulties, the proprietor was obliged to discontinue work.

Taylor's.—Orton Taylor started a brick yard in 1874, on land now owned by J. B. Ricks, which closed its work after a two years' trial, during which some five hundred thousand brick were manufactured.

Ruka Bros.—The only yard now in operation is that of Messrs. Louis and John Ruka, situated just south of the city. This yard was opened in 1879, with a capacity of two hundred thousand brick annually. From year to year the yard has been enlarged and the force increased until now the product could be easily forced up to more than nominal amount, should the occasion require. The bed of clay in which they are working is found from eighteen to thirty inches under the surface, but rather shallow, there being according to best estimates a fear that a few years longer will cause it to disappear altogether in this particular locality. Yet there is no

danger of a scarcity of raw material as a clayey range is said to extend around the bench of land south of the city.

ELEVATORS.

Thompson Bros.—The elevator now used by this firm was originally built by Asa Rae, about the year 1858, for a mill and chair factory. It was purchased by the present proprietors in 1869, and has since been operated by them. The building is 30x50 feet, thirty in height with a capacity of 10,000 bushels.

Parker, Hilderbrand & Co.—This elevator was built in 1863, by D. T. Parker, Sr., and two years later passed into the hands of the above firm, by whom it has been run since that time. The elevator proper is a building 34x46, and has a capacity of 10,000 bushels, the power for elevating purposes being furnished by a six-horse power engine.

Meyer Bros.—The building now used by this firm was built by Fette, Meyer & Co, about 1856, is 20x30 feet and twenty feet high, and has a capacity of about six thousand bushels. The power for operating this warehouse is furnished as is the case with the establishment of Thompson Bros., by horses.

TROUT POND.

Among the numerous industries to which Boscobel has fallen heir, one remains, the mention of which has a peculiar fascination to a vast majority of readers. The short monosyllabic word, "trout," has a magic effect upon the representative of the male sex, be he young or old. Artificial breeding of trout has been among the most prominent of the latter industries now coming to the front, and the trout ponds of Mr. A. Palmer at this point are possessed of a reputation hardly bounded by State or sectional lines. Mr. Palmer is an ardent pisciculturist, having been engaged in the breeding of trout so early as 1864, when he started a trout pond on Sander's Creek. This venture did not realize expectations, owing to a scarcity of water, and was soon after given up. In 1866, Mr. Palmer built his present pond on Crooked Creek, one mile south of the city. Here, with a constant supply of living water and the experience which each year adds to, he has brought to a successful and satisfactory issue what was at one time an interesting experiment, namely, the question as to the feasibility of raising these speckled beauties with profit. The pond was stocked at starting with three hundred breeding trout, from which the proprietor succeeded in raising about five thousand young trout the first year. This successful beginning has been followed by other moves equally successful. Mr. Palmer has turned in every spring from 10,000 to 20,000 fry, while his annual sales for food has averaged 2,000 pounds.

The usual hatch is about two hundred thousand trout in a season; of these, some are sold, and those remaining, which are not wanted to stock the pond, are put in different brooks. Eggs have been sold from this pond to almost every State and Territory in the Northwest, and in addition a large quantity have been sent to the Sandwich Islands. The largest shipment of eggs amounted to 50,000. Of this large number thus shipped, about ninety per cent are found to hatch out in good shape.

During the years in which Mr. Palmer has been engaged in pisciculture he has experimented with various other kinds of fish, including land-locked, Atlantic and Pacific salmon, but found that the result was not commensurate to the time and trouble expended. About \$5,000 has been expended upon the present pond, chiefly in experimental tests as to the best methods of raising this much-called-for representative of the finny tribe.

On the subject of trout-raising, Mr. Palmer gives his testimony that "the farmer can raise trout in proportion to the spring water he has, and can raise them cheaper than any other meat food, as a limited number of trout will live in pure water on the insects breeding in it." In the meantime, the brooks and water-ways of Grant County have been stocked and re-stocked, much to the pleasure of the ardent disciples of Isaac Walton.

CHAPTER XIII.

MUSCODA.

EARLY SETTLEMENT—TOWN ORGANIZATION—MUSCODA BRIDGE—POST OFFICE—SCHOOLS—CHURCHES—SOCIETIES—THE PRESS—ELEVATORS—HOTELS.

EARLY SETTLEMENT.

The town of Muscoda, occupying the extreme northeast corner of the county, claims a priority in history which is ante-dated by but few of the corporate divisions of the county. Tradition hath it that the feet of the first explorers, who, with dauntless hearts, penetrated the mysterious wilderness, and with unswerving faith pushed the sharp prow of their birch canoe through the lapping waters of the beautiful "Ouisconsin," that the feet of these explorers pressed the soil of the present town at a date cotemporaneous with their first appearance in search of the great river of which such wonderful tales had been told them by the dusky aborigines. Yet all this is mere tradition. The probabilities are that the excellent landing-place afforded at this point might have attracted the attention of Marquette, Joliet, or, later on, Hennepin; but there is nothing in the writings of these explorers or their biographers that places the fact even within the widest boundary of certainty.

A second tradition, of a more recent period, gives to the plain stretching away on either side the name of "English prairie," so named, says the legend, from the fact that a number of English families settled here at as early a date as 1812 or thereabouts, but were subsequently massacred by the Indians. This too, must, however, be relegated to the region of myths for want of corroboratory testimony.

The first authentic knowledge possessed of any actual residents at this point gives this honor to parties by the name of Armstrong, who had a trading-post here, probably at a date immediately succeeding the Black Hawk war. But it is not until 1835 that the present town of Muscoda begins to take form and substance. During this year, Col. William S. Hamilton came in and erected a diamond blast furnace near what is now the intersection of Main and Seventh streets. The excellent landing-place and favorable facilities afforded for shipment appear to have induced this movement on the part of the Colonel. It did not, however, prove to be a paying investment, and was subsequently abandoned. The chimneys of the old furnace were standing so late as 1847, and the antiquarian of to-day may even still discover traces of the foundation near the river bank. The new settlement, as it appeared a few years later, is thus described by Mr. Charles Rodolf, at present living at Muscoda, enjoying the blessings of a green old age near the scene of his early hardships and trials:

"In 1838, I went to English Prairie, now Muscoda, at the solicitation of Col. W. S. Hamilton. I hauled and purchased lead ore for him that summer at Peddler's Creek, Centerville, and Upper Diggings. The lead, when smelted, was then shipped from Muscoda to Galena, via the Wisconsin and Mississippi Rivers, a steamboat coming up regularly every week. At that time, the Wisconsin contained at least a third more water than now.

"The men employed by the Colonel about the furnace were mostly Frenchmen.

"Prominent among the interests that gathered around the furnace at this time or a little later was the land office, which was removed here from Mineral Point. Albert Paris was Register, and Levi Sterling Receiver. William Garland kept a small lumber-yard and also ran a boarding-house. Thomas J. Parrish had a store which was in charge of Edward Beouchard. A blacksmith-shop was run by Hardin Moore, while a second hotel and boarding-house was kept by W. S. Booth. There were at that time a great many Indians—Winnebagoes—near and at

Muscoda, and I remember many evenings noticing some of the younger squaws sitting on the river bank singing Indian and French melodies. I remember one time, one Indian sold to F. J. Parrish one musk-rat skin for corn fifteen times. Parrish bought the skin of the Indian and threw it into a loft, and went for a few ears of corn. In the meantime, the Indian stole the skin and put it under his coat, so when Parrish returned he sold it to him again. This was repeated several times, Parrish each time going for corn, which was carried away each time by a squaw. Parrish all the time thought he was making a good trade.

"The Indians were very peaceable. At one time, Humphrey A. Springer and myself had taken an old deserted Indian farm, as a claim, near the mouth of the Baraboo River. We occupied the house and made some improvements, and I had traded here with the Indians. One day a person, part Indian and part French, came with about thirty Indians to drive us away. He told me that we had to leave, and that he had come by order of Capt. Low, of Portage, to lock up the house—peaceably, if possible, with force if we did not submit to his order. My friend, not understanding French, was perfectly astonished to see me take my double-barrel gun, cock it, hold it before the leader's head, and make him leave the house walking before me about one hundred and fifty yards across the creek, myself holding a bead on him till out of reach. Springer, during this time, had seized a rifle and covered me in the rear, afraid that some of the Indians would step up behind and tomahawk me; but I knew the Indian character too well, and feared no trouble. The Indians stood perfectly quiet, looking on, till I returned; then they fairly danced a war dance around me, and I had to mount my pony and ride to their camp near the river, where they extended their hospitality to me.

"There was no further endeavor made to drive us off, and the Indians were afterward quite friendly. Springer always took pride in narrating the 'daring exploit,' as he called it.

"We had that summer (1838) some very eminent visitors at the Prairie, being Mrs. Alexander Hamilton and Mrs. Halle, wife and daughter of the great Gen. Alexander Hamilton, of Revolutionary fame, and also mother and sister to William S. Hamilton. They were delighted and pleased with our western prairies, as also with the Wisconsin River."

The same gentleman speaks as follows of the appearance of Southwestern Wisconsin, as it appeared to view in the early days of settlement.

"I came to the Territory of Wisconsin, then Michigan Territory, in the summer of the year 1834, and located near Fort Hamilton, now Wiota. This was one of the largest settlements at that time, containing stores and smelting furnaces for lead ore, belonging to Col. William S. Hamilton.

"The county at that period was full of fine game—plenty of deer, some elk, wild turkeys, grouse, prairie chickens, pheasants, quails, pigeons, wild geese and ducks. The prairies were full of prairie wolves, the timber of raccoons, wild-cats and lynxes, also once in a while a bear. The wolves were not dangerous, though in the winter of 1836-37, I was followed by a drove of them for about twelve miles, from near Gratiot's Grove till I reached the Pecatonica. The night was dark and they rushed several times near the wagon, but by swinging my whip at them I caused them to retreat. Their howling music could be heard every evening, and sometimes in the daytime. In winter on the prairie, from Fennimore to Peddler's Creek, they could be seen in groups of from three to six almost every day, but as the county became settled they disappeared, as has nearly all the other game of which we have spoken.

"In the summer of 1836, I visited, for the first time, Wingville. Thomas J. Parrish, Esq., was the principal owner and business man of that part of the county. He had, considering the times, good buildings—dwellings and store, also a water blast furnace, to smelt lead ore—and was smelting and sending a great quantity of lead to Galena. Mineral at that time was worth from \$8 to \$10 per thousand at Wingville, while pork was \$27, and flour \$15 per barrel; so it took about 3,000 pounds of mineral to buy one barrel of pork, or about 2,000 pounds to buy one barrel of flour. But the miners seemed to do well, and always had a little leisure and money for a quiet game.

"In the summer of 1838, I was frequently at Centerville. This village was one half in

the county of Grant and one half in the county of Iowa. The county line was in the middle of its principal street. I was hauling mineral ore from there to English Prairie, now Muscoda. That summer there were a great many miners there, and some very good diggings being worked. Frank Kirkpatrick and William S. Madden sold their diggings for \$10,000 to Thomas J. Parrish. Capt. Wohn and partners worked a good diggings. Hohlsauser & Co., H. M. Billings, and Hollenbeck & Underwood all had valuable diggings. There were two stores there at that time; one kept by Thomas J. Parrish, and the other by Prentice as agent for other parties. There were also two hotels and boarding-houses, one kept by J. D. Parrish, and the other by Mrs. H. Townsend. The lead ore was bought by Moses M. Meeker, who had a large furnace on Blue River, about one mile from Centerville. Thomas J. Parrish bought ore also for his furnace at Wingville, about four miles from Centerville, and William S. Hamilton bought it for his furnace at English Prairie, now Muscoda, about eighteen miles from Centerville.

"In 1842, I moved to Centerville, opened a store and purchased one-half interest in the Billings & Hollenbeck diggings. A store previous to mine was kept there by William Garland and Hugh McCracken. Saloons were kept by Ambrose Parrish and William Popejoy. In the summer of 1843, considerable float diggings were discovered, and a large number of miners came there, who camped that summer and fall in wagons and tents around the diggings. Business was lively of all kinds; sportsmen came from all parts of the country.

"I rented the furnace of Thomas J. Parrish, at Wingville, that summer, and sent my lead to Potosi. After I quit smelting, I sent for two years considerable mineral or lead ore to Potosi, to Thomas Palliser and Frank Cholvin. During this time Joel Landrum, Esq., and myself attended to all the legal business. In 1847, I left Centerville, moved my store and house to Highland, then Franklin, in Iowa County, on wheels, which were made purposely, to which I had twenty yoke of oxen hitched."

The first attempt at corporate improvements was made by Thomas J. Parrish, Charles Bracken, Col. Nichols and others. This portion of the village now known as "Lower Town," was included in that section bounded by Wisconsin avenue and Division street, but the date of the platting is uncertain, the probable time being somewhere early in the forties.

In 1847, the settlement contained about fifty inhabitants, and numbered in its confines the following buildings: The residence of Thomas J. Parrish, "Billy" Garland's hotel, a second institution of the same kind kept by L. J. D. Parrish, the residence of Mr. Prater, which was occupied by himself and a Spaniard, and the old log building once occupied by the land office, and at this time used as a store. All of these buildings were, with the exception of the *ci-devant* land office, large double log cabins, built after the Kentucky pattern, and one of which (Prater's) still remains, a perpetual reminder of the days gone by.

By 1853, the population had crept up to the neighborhood of two hundred, and the settlement boasted of two good general stores—one run by S. A. Quincy, and the other by Messrs. Palmer & Ward, Mr. Palmer at present being a resident of Boscobel. During the year, Mr. Jonathan B. Moore brought in a stock of goods and opened a third store. The buildings occupied by these establishments are still standing in Lower Town, the names of the proprietors standing out on the weather-beaten fronts in fast-fading characters. During the season, P. B. McIntyre and Charles Wright put up a building and commenced the manufacture of wagons and plows, at the same time attending to the needs of the equines in the way of shoes.

In the year following, the minds of the inhabitants were occupied with the premonitory shadows that told of the swift approach of the new railway, although it was not until two years later that its actual entrance was made into the town of Muscoda. This road, as projected, passed about three-fourths of a mile to the eastward of the original village. During 1855, the land now included within the upper town was purchased by James Moore and C. K. Dean from the former proprietors, who resided at Galena. They afterward disposed of a portion of their purchase to a syndicate comprising B. H. Edgerton, Judge Jackson and H. E. Dawson. The town was then platted and lots placed on sale, but from numerous causes, prominent among which was a defect in the titles of partition, the city became such only on paper, and the territory

finally, a decade later, passed into the hands of Gen. Jonathan B. Moore. Many improvements had, however, marked the progress of the village up to this date. During the year 1856, J. B. Gailer & Co. erected a steam saw-mill, which they afterward sold to Bull Bros., and, some years later, it succumbed to the ravages of the fire fiend. In 1858, James Moore erected a steam flouring mill in the village. The mill was operated for some years, when the machinery was sold and removed to other localities. During the month of October, 1856, the railroad made its appearance in the village, and the shrill whistle announced that the little municipality was in direct communication with civilization.

In 1858, the Catholic denomination erected the first church in the new town, and the year following the improvements included a second steam saw-mill, which was built by O. C. Denny and partner. This too, in a few years, was numbered with the things that were, having been disposed of to other parties and by them moved away.

Up to the year 1868, but little advancement had been made in the upper town, the houses then comprising it being almost computable on the fingers of one hand. This year, Gen. Moore commenced the erection of a bridge across the Wisconsin, at a point just above Wisconsin avenue; the structure was completed the same year, the first team passing over it September 16. The effect of this enterprise on the part of Gen. Moore was speedily seen. New life seemed infused into the stagnant town; houses and business blocks began to show their proportions against the sky, and, in a few years, a lively little town stood out in bold relief upon the broad prairie.

A steady and healthy growth has characterized the village from this time forward, drawing, as it does, not only from the country about it, but reaching out to the wide district on the opposite side of the river, making the prospects for the future fully as bright, and, in a certain sense, possessed of a much more rosy radiance, than those of the past.

TOWN ORGANIZATION.

By an act of the County Board, passed at the session of 1851, it was enacted that Townships 8 and 9, and the north half of Township 7, of Range 1 west, shall constitute a separate town by the name of Muscoda, and the first town meeting shall be held at the house of James Moore. In accordance with the above, the first election in the new town was held at the Wisconsin House, kept by Mr. Moore, on Tuesday, the 6th of April, 1852. Mr. Alfred Palmer was appointed Chairman, with William A. Moncrief, Jesse Locke and A. J. Thompson as Inspectors. The number of votes cast at this election was 117. Muscoda has, up to the present time, remained unincorporated, either as village or city; and, from outward appearances, it has no reason to regret the course thus marked out.

Below is given a roster of the Supervisors and Clerks from the organization of the town up to the present date:

1852—Supervisors, James Moore, Chairman, A. Dickenson, Edward Dorsey; Clerk, A. J. Thompson; Treasurer, A. Dickinson; Assessor, James Moore; Justices of the Peace, R. Barnes, E. Dorsey, W. G. Spencer and James Moore; School Superintendent, A. J. Thompson.

1853—Supervisors, James Moore, Chairman, A. Dickenson, Thomas Waters; Clerk, J. B. Moore.

1854—Supervisors, James Moore, Chairman, Charles Wright, Thomas Waters; Clerk, George R. Frank.

1855—Supervisors, James Moore, Chairman, Charles Wright, John Burris; Clerk, Franklin Z. Hicks.

1856—Supervisors, James Moore, Chairman, George R. Frank, John Burris; Clerk, R. V. Alexander.

1857—Supervisors, J. W. Blanding, Chairman, B. M. Coates, George Keck; Clerk, J. McLaughlin.

1858—Supervisors, James Moore, Chairman, Joseph Boggy, E. Dunstan; Clerk, James S. Featherby.

- 1859—Supervisors, James Moore, Chairman, J. B. Winter, B. Fayant; Clerk, Samuel B. Elston.
- 1860—Supervisors, W. W. Dimock, Chairman, C. W. Wright, B. Fayant; Clerk, J. W. Blanding.
- 1861—Supervisors, W. W. Dimock, Chairman, C. W. Wright, Peter Schmidt; Clerk, Ralph Carver.
- 1862—Supervisors, W. W. Dimock, Chairman, P. B. McIntyre, Samuel Bull; Clerk, Ralph Carver.
- 1863—Supervisors, J. B. McIntyre, Chairman, John Smalley, J. B. Winter; Clerk, W. W. Dimock.
- 1864—Record has been destroyed.
- 1865—Supervisors, S. C. McDonald, Chairman, Royal Wright, Joseph Boggy; Clerk, A. R. Tyler.
- 1866—Supervisors, S. C. McDonald, Chairman, Henry Fessel, Royal Wright; Clerk, Ralph Carver.
- 1867—Supervisors, S. C. McDonald, Chairman, J. B. McIntyre, Henry Fessel; Clerk, Ralph Carver.
- 1868—Supervisors, John Smalley, Chairman, Royal Wright, Peter Schmidt; Clerk, Ralph Carver.
- 1869—Supervisors, O. C. Denney, Chairman, Henry Tessel, Thomas J. Graham; Clerk, Ralph Carver.
- 1870—Supervisors, P. B. McIntyre, Chairman, Joseph Meier, Joseph Komers; Clerk, Charles D. Alexander.
- 1871—Supervisors, Thomas J. Graham, Chairman, Joseph Stork, John Garland; Clerk, John Hendricks.
- 1872—Supervisors, Jacob Bremmer, Chairman, Henry McNelly, Henry Fessel; Clerk, Joseph Meier.
- 1873—Supervisors, Charles G. Rodolf, Chairman, Henry Fessel, P. B. McIntyre; Clerk, L. Scofield.
- 1874—Supervisors, Charles G. Rodolf, Chairman, Jacob Ritzie, Joseph Meier; Clerk, P. J. Schaefer.
- 1875—Supervisors, Charles G. Rodolf, Chairman, Jacob Ritzie, Joseph Meier; Clerk, P. J. Schaefer.
- 1876—Supervisors, Charles G. Rodolf, Chairman, Frank Kolman, W. W. McKittrick; Clerk, P. J. Schaefer.
- 1877—Supervisors, Charles G. Rodolf, Chairman, W. W. McKittrick, Thomas J. Graham; Clerk, P. J. Schaefer.
- 1878—Supervisors, Jacob Bremmer, Chairman, P. B. McIntyre, John Kolars, Jr.; Clerk, P. J. Schaefer.
- 1879—Supervisors, Jacob Bremmer, Chairman, James A. Black, P. B. McIntyre; Clerk, F. L. Doubrava.
- 1880—Supervisors, Jacob Bremmer, Chairman, Moritz Honer, A. C. V. Elston; Clerk, F. L. Doubrava.
- 1881—Supervisors, C. G. Rodolf, Chairman, J. D. Pfisterer, Jacob Chesick; Clerk, Fred W. Schmitt; Treasurer, Peter J. Schafer; Assessor, I. J. Wright; Justices of the Peace, G. L. Schlump, W. S. Manning; Constables, George Britthauer, J. E. Peebles, Joe Stork.

MUSCODA BRIDGE.

This structure which has done so much for Muscoda in a commercial point of view, owes its conception and erection to the stirring enterprise of Gen. Jonathan B. Moore. As stated heretofore, the bridge was erected during 1868, and the beneficial results which were expected to accrue to the village, were apparent from the first. Starting from the southern abutment,

the first portion reached is the draw, 140 feet in length, the channel of the river at this point diverging to this shore, and, therefore, determining the position of the draw. Beyond this comes the bridge proper, with two spans, of 150 feet, or 300 in all, succeeding which, is the pile bridge, which spans the islands formed at this point, and the slough; this portion of the structure is 1,272 feet in length, making the total length of the bridge 1,712 feet. The cost of this improvement was \$24,000. Previous to the erection of the bridge, Muscoda drew but little from the opposite side of the river, and the yearly exports of grain during this period amounted to but a few thousand bushels. Now between 150,000 and 200,000 bushels are shipped from this point annually. In every way, the bridge must be considered a most prominent factor in the advancement and success of Muscoda.

POST OFFICE.

The first post office at Muscoda was established in 1839, W. S. Hamilton being commissioned as Postmaster, probably retaining the office during his continuance at this point. The names of those who served in the capacity of mail distributors, for the years succeeding Col. Hamilton's departure, have escaped the memory of those acquainted with the early history of the place. The mail at this early opening of the post office was carried by Edward Beouchard. In 1849, the post office was kept in a building about a block of Garland's Hotel, but the name of the guiding spirit of the mail-bags is buried in the dim sea of forgetfulness.

In 1850, James Moore was commissioned as Postmaster, the office being in his store at lower town. Three years later, he resigned the position in favor of F. Z. Hicks, who held the office until 1855. From that date until 1861, T. R. Chesebro distributed the mail as Uncle Sam's agent. He was succeeded by J. L. Marsh, who remained in charge of the office until he joined the army in September, 1862. After the resignation of Mr. Marsh, the duties were transferred to Mrs. E. Harris, who continued as Postmistress until her death some few years later. At Mrs. Harris' decease, she was succeeded by her daughter Annie; she, however, being unable to attend to the growing duties of the office, resigned in favor of A. R. Tyler, who handled the mails until July 12, 1868, when the post office, together with all the records was destroyed by fire.

During the year, Ralph Carver was appointed to succeed Tyler, and continued as Postmaster for nine years succeeding. In March, 1877, he turned the office over to Frank A. David, the present agent for Uncle Sam, whose rule is spoken of in terms of heartiest satisfaction. The office is situated at present in the stone block owned by Gen. Moore, on Wisconsin avenue.

SCHOOLS.

It would appear that educational advantages were afforded to the youth of the new settlement at an extremely early date. In 1839, a school was started over which Allan Booyer wielded the birch, and initiated the youthful idea into its first acquaintance with the "rule of three" and minor mysteries. Unfortunately those who followed this pioneer master, have failed to have their names recorded in the memories of those still living. The school year at this time was a very short one, consisting generally of a few months' school during the summer, the teachers being mainly of the gentler sex, who could get along on a smaller stipend than their masculine compeers, besides taking more kindly to the pleasures of "boarding 'round." The first schoolhouse was a log building, built by Col. Hamilton in 1854, Charles W. Wright doing the carpenter work. George R. Frank taught the first school in this building, which was subsequently disposed of the Methodist Episcopal society, who still own it as a church. The present schoolhouse was built in 1860, the dimensions of which are 30x60, and cost \$2,500. High school was organized in 1877, and the rules and regulations governing it were adopted February 22, 1878. The first board consisted of J. B. McIntyre, P. A. Daggett and O. P. Manlove, and H. R. Smith was the first Principal. July 14, 1879, the voters of the village changed this from a town high school to a district high school. Only one class, consisting of Donald McDonald and Mary Garland have graduated from this school, they graduating in 1880.

The report for the school year commencing in 1878 and ending in 1879, shows the whole number enrolled to be fifty-seven, and the whole number of days' attendance 7,462, and the report for the school year commencing in 1880 and ending in 1881, shows the whole number enrolled to be seventy-one, and the whole number of days' attendance 5,499.

CHURCHES.

Catholic Church.—The first services of this denomination were held in 1855, at the house of Mr. Bartholomew Fayant, by Rev. Father Conrad, who came from Cross Plains for that purpose. The first congregation consisted of sixteen or eighteen families. This was for several years only a missionary station. Rev. Sebastian Seif following Father Conrad as missionary, and continued to hold services in private houses as had been the practice heretofore.

During the year 1858, the erection of the church still used by the congregation was conceived in the minds of several of the most active members, prominent among whom were Valentine and Solomon Schneider, Peter Aesch and Mr. Remi. The architect was Joseph Child. Mr. Dimock donated two lots to the congregation provided they would finish the church by a certain time, which was done. The corner-stone was laid July 8, 1858, and work begun on the superstructure. During the fall of this year, Father Seif was succeeded by Father Winehardt who had formerly been stationed at Sauk City. Work on the new church was pushed as fast as possible, but services continued to be held at different places in the settlement. Even so late as June, 1859, Father Weinhardt held service in the schoolhouse now used by the Methodist denomination, and christened eleven children. November 30, 1859, the church was ready for occupancy, mass being said in the new building by Father Winehardt at that date. This Father remained in charge for eleven years, when he was followed by Rev. Alouis Heller, who was the first resident Pastor. Father Heller remained two years. His successor was Rev. Father Cleary, who remained but a short time. Rev. Father Weidlech then took charge of the church, remaining about two years. During 1870, a parsonage had been built at a cost of about \$1,000. Upon the departure of Father Weidlech, Rev. Father Raess came for a short time, but was succeeded by Father Rademacher, who remained as Pastor until 1878. From his departure until 1880, the church was attended as a mission from Highland, by the same Father. August 23, 1880, Rev. Father Winehardt returned again to the church, which he re-organized and placed on a solid footing, and still remains as Pastor. Included in his labors are the churches at Boscobel and Avoca. The church building is a plain, but substantial structure, 50x32 feet in size, and with the priest's house makes an excellent establishment. The work on these buildings was contributed in a great measure by the members of the congregation.

Congregational Church.—The history of this church dates back to 1856, but owing to the fact that no records for this period were kept, or, if kept, have since been lost or destroyed, the date of organization with sundry other matters of importance are wrapt in the shadowy cloak of forgetfulness. The society at this time was very weak. The first Pastor was the Rev. A. A. Overton, who commenced his labors with the young society in this year. Among the prominent members of the early organization were Mrs. B. M. Coates, Mrs. Farnsworth and Mrs. Col. Moore. Rev. Mr. Overton continued as Pastor for three years, when he removed to Avoca. The society was thus left pastorless, and meetings were discontinued until the arrival of Rev. Mr. Laughlin, who, however, remained but a short time, when the church was again without a Pastor. Under these dispiriting influences disintegration set in with the result that in the course of years the membership was reduced to the minimum.

In 1869, interest was re-awakened, the church revived, and steps were taken to re-organize the society. The movements thus inaugurated were successfully carried out. Rev. Mr. Jones was sent out as Pastor, but remained only a portion of the year. In 1870, Rev. M. Jamson commenced his labors as Pastor, continuing as such for the period of five years. This reverend gentleman was much respected and esteemed by his flock, and it was with feelings of the deepest regret that they were induced to consent to his departure for another field of labor. His successor was Rev. Mr. Curtis, who remained with the church one year. At the expiration of this

time, Rev. A. A. Overton returned again to the congregation, which he had assisted in organizing so many years before. He remained as Pastor three years, being succeeded, in 1879, by the Rev. George Heigh. Under the energetic work of this Pastor, the church was for the two years of his stay advanced in a most gratifying manner. During the early portion of 1881, Mr. Heigh severed his connection with this society, since which time it has been without a Pastor. Services are held as occasion serves in the M. E. Church, or the Lutheran Church.

M. E. Church.—In January, 1865, Rev. Austin became the spiritual guide of the church, and remained one year, to be succeeded by Rev. Brainard, who acted in the capacity of Pastor for three years, endearing himself to his congregation. He remained the full length of time allowed by the M. E. Church, and, after he left, the pulpit remained unoccupied until the coming of Rev. Smith about the year 1870.

Rev. Smith continued as Pastor for two years, and was succeeded by the Rev. Mr. Jones, who remained about six months, when Rev. Mr. Irish completed his year.

The church was without the guidance of a Pastor for over four years from this date. This lapse was broken when Rev. Waldron was sent to act as Pastor for two years. Rev. Mr. Tree-water was the next Pastor, and remained two years up to 1881, when Rev. Mr. Smith was again sent to assume charge of the church, and is the present Pastor, holding meetings every alternate week in the old schoolhouse, purchased by the society, for a comparatively small sum of money, from the town at the time of the erection of a larger school building in 1860.

Lutheran Church.—The first meetings of this society were held by the Rev. Winter. The first place of worship was situated about five miles south of the village, the land on which the church and school stood, at this time, being the gift of Rev. Winter. Under his fostering care the congregation grew quite prosperous, and it was with feelings of unfeigned regret that they witnessed his departure to another field of labor. In 1869, the idea was conceived of moving the church to Muscoda. The plan met with favor, and land was purchased for a small sum and the present church building, 30x50 feet, was erected in 1870, at a cost of \$1,500.

Rev. Zwolanck was the first Pastor in the new location, serving for one year, when he was succeeded by the Rev. Remi, whose pastorate extended over a period of three years, during which time the church enjoyed a season of great prosperity. After the departure of Rev. Remi, the society was without a Pastor until 1877. This year, the Rev. Andewood was secured, and who has remained the spiritual guide of the little flock up to the present time.

SOCIETIES.

Orion Lodge, No. 70, A., F. & A. M., of Richmond, now Orion, Richland Co., received its dispensation to work from Grand Master Henry M. Billings, at Highland, Iowa Co., June 26, 1855. The dispensation was granted to D. L. Downs, as W. M.; J. T. Barnes, S. W., and Levi Houts, J. W. The lodge was regularly instituted June 12, 1856, and Messrs. Downs, Barnes and Houts were the first officers.

The lodge remained at Orion and prospered, but was transferred to Muscoda March 20, 1875, when the name of the lodge was changed to Muscoda Lodge, No. 70. This was approved by J. P. C. Cottrill, Grand Master of Wisconsin, April 6, 1875. The lodge hold their regular meetings the first and third Saturdays of each month. The present membership is twenty-eight. The officers are P. A. Daggett, W. M.; A. C. V. Elston, S. W.; S. Wentworth, J. W.; S. C. McDonald, Sec'y; John Young, Treas.; John Swingle, S. D.; M. Briggs, J. D.

Muscoda Lodge, No. 58, A., F. & A. M., received its dispensation from the Grand Lodge of the State of Wisconsin March, 1854, and on June 12, 1855, a charter was granted authorizing J. B. Moore, as W. M.; A. A. Overton, S. W.; William G. Spencer, J. W. This lodge had a membership of nineteen, and continued to hold meetings until the 7th day of January, 1868, when the lodge notified the Grand Master of the State that the members had voted to surrender the charter, which was done June 18, 1868. The officers who were in office at the time of disbandment were S. C. McDonald, W. M.; A. R. Tyler, S. W.; O. P. Underwood, J. W.; Ralph Carver, Sec'y; John Smalley, Treas.

I. O. O. F.—On the 12th day of June, 1855, Deputy G. M. Stewart instituted Eureka Lodge, No. 73, by the authority of a charter granted by L. H. Kellogg, Grand Master of the State of Wisconsin, to C. G. Rodolf, N. G.; R. V. Alexander, V. G.; T. J. Graham, P. Sec'y; O. P. Underwood, Sec'y; A. Palmer, Treas. The charter members were A. Palmer, C. G. Rodolf, William N. Mongrief, O. P. Underwood, Richard V. Alexander and Thomas J. Graham. The present membership is thirty-three, and the members are divided as follows: Initiation members, five; members of the Degree of Friendship, five; members of the Degree of Truth, two; members of the Degree of Brotherly Love, twenty-one. Eleven of the members have attained the sublime position of Past Grand.

The lodge hold their meetings in Col. Moore's stone block, on Saturday evenings. The present set of officers are C. G. Rodolf, N. G.; Joseph Graham, V. G.; John Steward, Treas.; William Wilson, Sec'y; J. C. West, Warden; O. C. Deney, Conductor. The present Trustees are O. C. Deney, P. A. Daggett and William Wilsey.

THE PRESS.

Muscoda News.—The initial number of the *News* was put forth December 4, 1874, the proprietors and publishers being H. W. Glasier and Charles H. Darlington. This partnership continued but a brief space of time, and January 1, 1875, Mr. Darlington purchased his partner's interest and remained sole proprietor. The *News* was at this time, and has since remained a five-column quarto, neatly printed, and containing the latest local intelligence. During the campaign of 1876, a Republican campaign sheet sailing under the title of the *Skirmisher*, compelled the suspension of the regular publication May 1, 1877. From this date up to the 1st of September following, the *News* remained inert and lifeless, but at this date publication was resumed, and since continued without a break.

April 1, 1861, the paper passed into the hands of S. C. McDonald, under whose management it has been considerably improved, both in appearance and in the matter contained in its pages. It already has a circulation of over five hundred, and bids fair to far exceed this ere many months have passed. In politics the *News* is consistently and uncompromisingly Republican.

Western Advance.—During the Presidential campaign of 1880, a small sheet with the above name was published in the interest of the Democratic party by Mr. Satterlee. The necessity which gave birth the venture having passed, it was discontinued under the pressure of financial embarrassments.

ELEVATORS.

Graham & Bremmer.—The main elevator used by this firm was erected in 1868, it being the first institution of the kind to be built in the village. The building is 22x60 feet in size and two stories high, a six-horse power engine furnishing the power for elevating purposes. In addition to this elevator, the same firm lease a second warehouse, 30x50 feet in size and two stories in height, the structure being known as the "Klengelschmidt warehouse."

McKittrick & Sons.—This elevator was erected in 1872, and is 24x24 feet in ground dimensions, and thirty feet high; in addition, it has two wings, one 24x24 and the second 24x30. The capacity of the building is about 16,000 bushels of grain.

Steam Planing-mill.—This mill, owned and operated by Messrs. Grote & Umbarger, is a two-story frame structure, 22x60 feet in dimensions. All kinds of turning, matching and scroll-sawing are done here, in addition to which the firm manufactures the "Creamery Churn." The motive power is furnished by a ten-horse power engine, and the property has an estimated valuation of \$3,000.

HOTELS.

The first hotel in Muscoda was a small one-story-and-a-half log building, built by L. J. D. Parrish in 1840. Mr. Parrish run this hotel until 1851, when he disposed of it to Jesse Locke, and it was then used by him as a dwelling house. James Moore built the second hotel in 1848.

This was subsequently leased to one Potter, who ran it until 1860, when Hiram Wilsey purchased it and kept it for a short time only, disposing of it to Frank Neff. After operating it for some time, Mr. Neff moved it to its present location, and sold it to John P. Krause. Michael Meyer subsequently purchased and enlarged it, and is still its owner and proprietor.

The next hotel was erected in 1851 by William Salman, who disposed of it the next year to Allanson Dickinson. S. B. Ellston purchased it in 1855, and, in 1869, moved it to where it now stands and sold it to J. D. Pfeisterer, who has enlarged and operated it up to the present time.

In the fall of 1856, John Smalley erected a two-story frame building, which he run as a hotel until 1874, when it was moved to give room for his present elegant and commodious brick structure, which in size is 100x100, and three stories high. On the first floor is a bank, the office, sample room, dining room, kitchen, etc., while in the second and third stories is an elegant hall, 30x60, together with three parlors and forty sleeping rooms. This building is substantially constructed, representing a total cost of \$20,000, and would be an ornament to any city.

CHAPTER XIV.

TOWN OF BLOOMINGTON.

EARLY SETTLEMENT—TOWN OFFICERS—VILLAGE OFFICERS—SCHOOLS AND CHURCHES—THE PRESS—BLOOMINGTON BANK—I. O. O. F.—I. O. G. T.—BLAKE'S PRAIRIE AGRICULTURAL SOCIETY.

EARLY SETTLEMENT.

This township is bounded on the north by Wyalusing and Patch Grove, on the east by Little Grant and Beetown, on the south by Beetown and Glen Haven, and on the west extends to the Mississippi River, being in form one of the most irregular townships in the county. It contains within its limits 24,787 acres of land, something over one-half of which are under cultivation. The population of the township consists of many different nationalities, including Americans, English, Germans, Norwegians, French, Swedes and Irish.

The lands of the township are mostly high uplands, interspersed irregularly by "hollows," in one of which the village of Bloomington is located. In the north portion of the township the prairie predominates, and, as a consequence, these portions are highly arable, producing an ample variety of crops, including wheat, oats, corn, rye, barley, flax, hops and potatoes.

The first person to settle in this section, and from whom the broad plateau took its name, was Page Blake, who came about 1831, or possibly a year earlier, and built his cabin on what is now Section 17, Township 5, Range 5. From him the country about took the name of "Blake's Prairie," which appellation it has in a measure retained until the present day.

The first settler on the site of the present village was Mr. Enos P. Finn, who built a cabin on the land afterward covered by the waters of the mill-pond, in 1841. About the same time, a settler named Philemlee located over the brow of the hill in the east part of the present village. A little further to the east, Amos Franklin located and built a cabin the next year. The first grain raised in this immediate section was undoubtedly the crop of Indian corn raised by Mr. Finn the year after his arrival. Four or five acres were planted "upon the sod," and a bountiful yield was the result. Mr. Finn was a carpenter by trade, and being obliged to be away much of the time, thus leaving Mrs. Finn without companion or company in his absence, they removed after a short residence here to the vicinity of Patch Grove. Both Philemlee and Franklin also left "the hollow," and from this time until the advent of D. W. Taft, in 1850, it remained silent and deserted. The land occupied by the present village was entered by Richard J. Shipley in 1850, consisting of the southeast quarter of the northeast quarter of Section 26, Town 5, Range 5 west. Mr. Finn had previously entered, in 1841, the northwest quarter of the northeast quarter. Shipley soon after sold his entry to Messrs. Taft and Schuyler. The last-named party sold his interest to his partner, D. W. Taft, who immediately commenced the erection of a flouring-mill. The first building to be erected was a board shanty which stood north of the present hotel, and was used as a boarding-house for the mechanics at work upon the mill. The presiding genius over this commissary department was a man named Mackintosh. In 1852, the house standing west of the mill, and now occupied by Mrs. Strong, was erected and used as a boarding and dwelling house by Mr. Taft, Mackintosh still remaining in charge of the boarding department. The contemplated improvements, of which the mill was evidently only the advance guard, quickly attracted settlers to the new place, and, in 1852, Ira Stockwell, the first village blacksmith, built a house on the corner of what is now Canal and Congress streets. Stockwell's shop was built soon after, and stood in the rear of his dwelling, on Congress street. Mr. Jesse Brooks, present Town Clerk, assisted at the baptism of the new town by doing the mason work or plastering of the "mill house." The mill was finished and ready for operation by the summer of 1853, William C. Warwick being the first miller. During the following year,

the mill received a new set of buhrs, when it was spoken of as "one of the best equiped merchant and custom mills in the West." In 1854, also, the first store was opened by Benham & Glines in a one-story-and-a-half frame structure that was erected on the corner now occupied by the Bloomington House. The building remained standing until it was retired to make room for the hotel. The village was platted and surveyed in the year following, C. W. Hayden being the surveyor.

The presence of the mill, furnishing as it did a ready market for the grain raised in the country adjoining, pushed the new village along with rapid strides when compared with the tortoise growth which usually was the characteristic of towns dependent solely upon the products of the soil for support. In 1859, William H. Brown moved his store from Patch Grove to its newly-fledged rival. The store was first located on Congress street, north of Canal street, about two blocks; Mr. Brown's brother was associated with him in business soon afterward, and, in course of time, the building was removed to its present location on Canal street. Previous to Mr. Brown's arrival, F. A. Savage had started a store in the building just north of the mill, placing it in charge of his brother, Mr. Harry Savage. The settlers up to 1856, as related in a sketch of the town published some years ago, were D. W. Taft, P. C. Schuyler, J. L. Benham, Albert Glines, E. Mount, E. P. Finn, Mr. Mackintosh, Ira Stockwell, J. W. Brackett, John Collier, J. C. Trainer, Dr. Brooks, Dr. Allen, Prof. Allen, Smith Brown, L. Osborne, Orrin Wilson and a few others.

In this same year, Prof. M. T. Allen, by birth a South Carolinian, commenced the agitation of a project that in after-times did more than anything else to build up and further the growth of the new town. This scheme shortly afterward blossomed out into the "Tafton Collegiate Seminary," but was first opened in January, 1857, by Prof. Allen, as the "Blake's Prairie Institute." About this time, Mr. Cole moved his store from Beetown to the village, and located on Congress street, above Canal, but did not open any stock, using the upper portion of the building for a dwelling. Many residences had also been built—Elijah Mount's, still standing, one by E. W. Bowers, still standing on Canal street; C. Trainer had also opened a second blacksmith-shop and built himself a dwelling; Elder Lewis also had a residence further up on the hill north of the present business portion. A Mr. Northup also had a boarding-house on the present site of Mr. L. S. Osborne's residence. Elder Lewis' modest dwelling was located on the site now occupied by the handsome residence of Mr. James Ballentine. Up to this time, the new town had remained in Patch Grove Township. In 1859, by the action of the County Board, it was detached from that township, and the present township formed under the name of Lander. This name which was bestowed on the town by Henry Patch, was changed almost immediately to Tafton, by which name it was known until 1867, when the name of the township was again changed to Bloomington by an act of the Legislature, which has remained its distinctive title up to the present time.

The first election and town meeting was ordered to be held at the "red schoolhouse;" and here, in the spring of 1860, the following officers were elected: Supervisors, B. F. Hilton, Chairman, William Whellan and Horace J. Lord; Town Clerk, Dr. R. Brooks; Treasurer, Isaac L. Benham; Assessor, A. C. Stiles; Town Superintendent of Schools, Cyrus Sargeant; Justices, Samuel Tracy, Robert A. Lumpkin, William Halford; Constables, Sargent Brasee, Jeff. Handy, Albert Francis.

The growth of the village continued to be steady, even if at times somewhat slow. The mill property had passed into the hands of Cyrus Sargeant, and through him under the management of Woodhouse & Thomas. Under the charge of these gentlemen, it became a valuable adjunct to the growth of the village by making a ready market for the large amount of grain then being grown in the township. Trade naturally flowed into this direction, and new business houses sprang up one after another, nearly all of which remain till the present time.

Of accidents or visits from the scourges that had made such havoc in other sections, Bloomington, or Tafton, as it was then known, was comparatively free. Of the former class, there had been two examples in the early days of the town. The first, which startled the steady-

L. Armstrong M.D.

BOSCOBEL.

going citizens, came near having a disastrous ending. The firm of Benham & Glines had been succeeded by Benham & Osborne, the senior partner of which one winter's day was called upon for some machine oil. This, unfortunately, was contained in a can similar in size and shape to the can which held powder, the store being, as was customary in those days, one of those all-embracing affairs where anything, from a needle to a horse and dray, was to be had. Mr. Benham seized, as he supposed, the oil can, but finding the oil would not run, sat it upon the stove in the store to warm. Taking it up in a few moments, he turned the can up to see if the oil would run, when there poured forth a stream of powder, followed by a blinding flash and a loud report, which brought those in the vicinity quickly to the scene. A strange sight met their eyes; the front of the store was shattered and torn as if it had been the target for a heavy bombardment; the force of the concussion had lifted the plates which supported the rafters, and displaced them several inches, besides raising the studding from the floor, while the innocent cause of the disaster lay blinded and senseless on the floor. He was carried to his home, where it was found that the sight of one eye would be permanently destroyed, but from other effects of the explosion he soon recovered.

The second affair of the kind followed only a short time later, at a donation party given to Elder Lewis, in the "mill-house." While all were assembled on the upper floor, engaged in conversation and the harmless sports characteristic of these gatherings in early days, the floor suddenly gave way in the center, forming a gigantic mill-hopper, down which the assembled throng were thrown helter-skelter to the floor below. The tables that had been in preparation for the coming meal saved the victims of the accident from anything worse than a few contusions and a bad scare. The oyster soup was also placed *hors du combat* by the introduction of a foreign substance, but aside from a few trifles of this nature, the damages were merely nominal, and the incident was afterward productive of more mirth than grief.

During the years of the war, the town seemed to show no signs of standing still, but, on the contrary, appeared to put on new life. In the years succeeding the war, when the prices of farm products began to decline, bringing as it did disastrous consequences to those who had not been wise enough to foresee the inevitable result, and so trim their sails as not to feel the full effects of the blow, Bloomington, for the first time since its first settlement, showed signs of going backward. With the re-adjustment of values, prosperity again shone bright and fair upon the village, which once more resumed its growth, which has been steady and without incident up to the present time.

As regards this steady progress, with hardly a perceptible drawback, the history of Bloomington is somewhat peculiar. Probably no town in the southwestern portion of the State can show so spontaneous a growth. This is due in a great measure to the fertile country that surrounds it on every side, possessed of a soil which will rank in productiveness with that of any portion of the State. Bloomington is in the center of a gold mine, but the precious metal lies on the top of the ground, and not underneath. Bloomington at present contains four general merchandise stores, one co-operative store, formerly a grange store, one drug-store, two hardware stores, two butcher-shops, three shoemakers, two saddler-shops, three blacksmith-shops, one wagon-shop, one confectionery store, six milliners' shops, four saloons, one bank, one paper, the Bloomington *Record*, and one machine-shop.

Up to the year 1880, Bloomington had remained unincorporated. In the fall of that year, a meeting was held in the *Record* office, for the purpose of considering the question of incorporating the village. Mr. Samuel Woodhouse was chosen Chairman, and Mr. Jesse Brooks Secretary. After some desultory talk, a committee of five was appointed to take the initiatory steps toward incorporation. A petition was prepared and forwarded to Judge Cothorn, Judge of the District, and a charter was granted by him. The first election was held under this charter November 22, 1880. Below is given a list of town and village officers, from the organization of the town to the present time :

TOWN OFFICERS.

1860—Supervisors, B. F. Hilton, Chairman, William Whellan, Horace Lord; Clerk, Roswell Brooks; Treasurer, J. L. Benham; Assessor, A. C. Stiles; Superintendent of Schools, Cyrus Sargeant; Justices of the Peace, Samuel Tracy, P. A. Simpkin, William Holford, Isaac Lander; Constables, S. Breeze, Jeff. Handy, A. Frances, J. W. Brackett.

1861—Supervisors, J. L. Murphy, Chairman, H. Lord, William Whellan; Clerk, R. Brooks; Treasurer, J. W. Brackett; Assessor, George Hazard; Superintendent of Schools, C. C. Tobie; Justices of the Peace, William Holford, S. A. Taylor, I. C. Lander, to fill a vacancy; Constables, S. Breeze, James Wellware, George Wellware.

1862—Supervisors, J. T. Murphy, Chairman, G. W. Harger, G. W. Fennel; Clerk, S. A. Campbell; Treasurer, A. Francis; Assessor, Henry Lord; Justices of the Peace, William Whellans, A. C. Stiles, G. H. Chambers, to fill vacancy; Constables, A. Breeze, J. Burton, G. Batie.

1863—Supervisors, William Whellans, Chairman, G. W. Fennel, I. C. Turner; Clerk, S. A. Campbell; Treasurer, A. Francis; Assessor, Samuel Tracy; Justices of the Peace, G. H. Chambers, George Engle; Constables, T. Osborne, G. Balie, J. Handy.

1864—Supervisors, J. T. Murphy, Chairman, Henry Ford, M. Woods; Clerk, G. H. Chambers; Treasurer, George Engle; Assessor, A. C. Stiles; Justices of the Peace, George Engle, G. H. Chambers; Constables, T. Osborne, William Johnston, J. Handy.

1865—Supervisors—J. L. Murphy, Chairman, H. Ford, M. Woods; Clerk, G. H. Chambers; Treasurer, George Engle; Assessor, A. C. Stiles; Justices of the Peace, George Engle, G. H. Chambers; Constables, T. Osborne, William Johnston, J. Handy.

1866—Supervisors, G. Harger, Chairman, A. Francis, W. B. Slocum; Clerk, L. Brown; Treasurer, J. Woodhouse; Assessor, A. C. Stiles; Justices of the Peace, G. W. Chambers, L. R. Bingham (A. C. Stiles, to fill vacancy); Constables, T. Osborne, A. Green, J. Burton.

1867—Supervisors, J. T. Murphy, Chairman, H. Lord, A. Francis; Clerk, Levi Brown; Treasurer, James Woodhouse; Assessor, A. C. Stiles; Justices of the Peace, George Chambers, D. E. Wilson, George Fennel; Constables, T. Osborne, J. Handy, George Lee.

1868—Supervisors, Henry Lord, Chairman, George Fennel, A. Francis; Clerk, Jesse Brooks; Treasurer, James Woodhouse; Assessor, George Harger; Justices of the Peace, Horace Lord, J. C. Orr; Constables, T. Osborne, J. Burton, E. Briggs.

1869—Supervisors, Henry Lord, Chairman, A. Francis, George Fennel; Clerk, A. S. Osborne; Treasurer, D. F. Brown; Assessor, J. W. Brackett; Justices of the Peace, Jesse Brooks, James Kenyon; Constables, J. Batie, D. R. Allen, J. Stone.

1870—Supervisors, G. H. Chambers, Chairman, W. H. Harvey; Clerk, A. C. Morse; Treasurer, George Nevins; Assessor, George Hazard; Justices of the Peace, G. H. Chambers, J. T. Murphy; Constables, B. Ellidge, James Burton.

1871—Supervisors, Henry Lord, Chairman, Charles Thomas, James Kenyon; Clerk, A. C. Morse; Treasurer, D. D. Brown; Assessor, George A. Hazard; Justices of the Peace, Jesse Brooks, James Kenyon (George Fennel, to fill vacancy); Constables, B. Ellidge, G. Lumpkins, E. Merrill, A. M. Cilley.

1872—Supervisors, Henry Lord, Chairman, George H. Greer, George Fennel; Clerk, A. C. Morse; Treasurer, D. F. Brown; Assessor, George Hazard; Justices of the Peace, J. W. Brackett, Homer Beardsley (J. T. Murphy, to fill vacancy); Constables, L. Sawyer, William Bennetts, William Peck.

1873—Supervisors, D. F. Brown, Chairman, A. Handy, James Kenyon; Clerk, C. M. Morse; Treasurer, F. L. Green; Assessor, J. W. Brackett; Justices of the Peace, Jesse Brooks, J. F. Murphy; Constables, L. Sawyer, T. Osborne, M. Scott, W. Peck.

1874—Supervisors, D. F. Brown, Chairman, James Kenyon, A. Handy; Clerk, C. N. Holford; Treasurer, F. Greer; Justices of the Peace, E. S. Tubbs, L. D. Holford; Constables, J. R. Carroll, J. Dodge, William Peck, Charles Stone.

1875—Supervisors, G. W. Fennel, Chairman, William Howard, James Kenyon; Clerk, Jesse Brooks; Treasurer, A. Johnston; Assessor, J. C. Orr; Justices of the Peace, William Batie, J. W. Graves; Constables, M. V. Bennetts, J. R. Carroll, C. J. Woodan, William Peck.

1876—Supervisors, W. B. Clark, Chairman, James Kenyon, J. Schreiner; Clerk, Jesse Brooks; Treasurer, L. Woodhouse; Assessor, A. Osborne; Justices of the Peace, Jesse Brooks, C. J. Wood, two years; E. J. Tubbs, James Kenyon, one year; Constables, L. Sawyer, F. Murphy, J. R. Carroll.

1877—Supervisors, W. B. Clark, Chairman, William Whellan, Charles W. Wheeler; Clerk, Jesse Brooks; Treasurer, L. Woodhouse; Assessor, Henry Lord; Justices of the Peace, F. Vanderhoff, A. C. Tubbs; Constables, J. R. Carroll, F. Handy, E. P. Finney.

1878—Supervisors, W. B. Clark, Chairman, James Kenyon, Henry Lord; Clerk, Jesse Brooks; Treasurer, L. Woodhouse; Assessor, John Brackett; Justices of the Peace, Jesse Brooks, C. J. Wood (John Beely, to fill vacancy); Constables, L. Sawyer, J. R. Carroll, F. Handy.

1879—Supervisors, W. B. Clark, Chairman, Henry Lord, James Kenyon; Clerk, Jesse Brooks; Treasurer, L. Woodhouse; Assessor, George A. Hazard; Justices of the Peace, F. Vanderhoff, George W. Fennel; Constables, F. Hill, J. R. Carroll, L. Sawyer.

1880—Supervisors, W. B. Clark, Chairman, James Kenyon, Henry Lord; Clerk, Jesse Brooks; Treasurer, L. Woodhouse; Assessor, M. Cilley; Justices of the Peace, C. J. Woodhouse, Jesse Brooks, long term, Charles Stone, E. D. Orr, short term; Constables, J. R. Carroll, L. G. Sawyer, W. Lee.

1881—Supervisors, George W. Fennel, Chairman, Henry Lord, James Kenyon; Clerk, Jesse Brooks; Treasurer, W. E. Brown; Assessor, J. P. Jenkins; Justices of the Peace, C. W. Stone, George Miller; Constables, D. Meuer, L. Sawyer, J. R. Carroll.

VILLAGE OFFICERS.

Officers elected November 22, 1880—President, William Batie; Trustees, C. M. Morse, U. F. Briggs, George Mount, L. Hoskins, D. F. Brown, F. Greer; Treasurer, Herman Enke; Clerk, G. B. Sprague; Police Justice, C. J. Woodward; Justice of the Peace, George Chambers; Marshal, J. Sawyer; Constable, Henry Heiner; Supervisor, W. B. Clark.

1881—President, William Batie; Trustees, D. F. Brown, Linn Hoskins, George Chambers, U. F. Briggs, G. N. Nevins, George Hazard; Clerk, George Sprague; Treasurer, Herman Enke; Police Justice, C. J. Woodward; Justice of the Peace, Otis Weld; Marshal James Sprague; Constable, Charles Briggs; Supervisor, P. Bartley.

SCHOOLS AND CHURCHES.

The first school district in what is now the township of Bloomington was organized in the year 1844. The first schoolhouse built in the township was built in District No. 4, and was a log structure. The building at this point was afterward known, and is yet, as the "old red schoolhouse," and could its old walls speak they would have many a wondrous tale to pass in slow procession before the astonished listener. The first teacher to hold rule on the wooden throne and deal out "birchings" and learning with impartial hand was D. Angerlist. The schoolhouse first used by the children of the young village was located about three-fourths of a mile west of the village, but, in 1857, it was moved into town and placed on the site of the present one, where it remained until outgrown by the rapidly advancing tide of emigration flowing into the new town, where the present building—a plain stone structure, two stories in height with accommodations for one hundred and fifty pupils—was erected at a cost of between \$6,000 and \$7,000. The number of children of school age in the township is 433, of which number, 208, or nearly one-half, reside within the confines of District No. 1. The present school is classed as a graded school, employing three teachers. A portion of the old schoolhouse still remains, serving as the rear portion of Mr. Max Kolb's residence.

Tafton Collegiate Seminary.—As has been seen, the higher institution of learning at Bloomington was the Blake's Prairie Institute, opened by Rev. M. T. Allen, M. A., in the early part of January, 1857. The school afterward passed under the charge of Prof. Parsons and Mrs. Parsons, both of whom had achieved a high reputation as educators. The school was first held in the Cole Building, on Congress street. The Trustees of the school, however, did not allow it to remain here for any great length of time, but, recognizing the advantages that would undoubtedly accrue to the village by the establishment of such a seat of learning as was plainly possible with Prof. Parsons, as its guiding spirit, commenced the erection of a two-story frame structure that was afterward, for many years, known as the academy. Upon its completion, the school was removed to this location, and had soon established a reputation that was much more than local. Students flocked in from every quarter, the academy having at one time an attendance of over two hundred. This added in attracting attention to the village. The English branches, mathematics and languages were taught at the academy, employing several teachers in addition to Mr. Parsons and wife. Unfortunately, just at the time the institution was at its zenith of excellence, differences broke out between the Professor and his supporters, which resulted in the former retiring from the Principalship. Mrs. Parsons continued in charge for a short time, when she in turn retired. Prof. Parsons afterward left Bloomington and took charge of the schools at Dubuque, going from there to Freeport, where he remained for some time, being at present engaged in the insurance business at Detroit, Mich. After Mrs. Parsons, came a succession of teachers who taught for a short period each, including Messrs. Lukens, Brooks and others. The building remained standing on the original site until 1873, when it was purchased by the Congregational society and remodeled for church purposes. It now serves as the abiding-place of the First Congregational society of Bloomington.

First Congregational Church—This church was organized on the 10th of April, 1847, at Patch Grove, in the house of Hugh Garside, consisting of fourteen members. The organizers were the Revs. O. Littlefield and J. D. Stevens. Mr. Littlefield became the first Pastor, preaching half the time at Beetown. He remained until February, 1849. During the months next following, the church was without a Pastor, but in November the church extended an invitation to Rev. C. W. Monroe, of Boston, a young man in the ministry; December 25, he was ordained. A parsonage was in process of construction, but the building went so slow that Mr. Monroe took it into his own hands and held it as his own property. Rev. Mr. Monroe left in 1850, and for about a year the church was without a Pastor. During this interval, the Rev. S. W. Eaton, of Lancaster, looked after the spiritual needs of the little flock. In October, 1851, Rev. Ira Tracy became Pastor at a salary of \$400. Mr. Tracy first preached at Patch Grove and the "Red Schoolhouse" alternately, but afterward changed so as to include other points. In 1855, the question of erecting a church building was taken up and a site selected a mile and a half south of the present village of Bloomington. The congregation was aided by private subscriptions and supplies from the Congregational Building Fund, the cost of the building being \$1,400. April, 1856, Rev. Mr. Tracy took his departure, going to Spring Valley, Minn., where he remained until his health failed. August of the same year Rev. A. M. Dixon commenced his pastorate, the church membership at this time being about fifty. During the nine years of Mr. Dixon's stay, this membership was doubled. Following Rev. Mr. Dixon came Revs. George Smith, William A. Lyman, Julian Dixon and A. E. Tracy. Nine members of the church entered the army; seven returned; two, Charles Bingham and Ira Tracy, Jr., remained behind awaiting the great reveille. Rev. Mr. Dixon's efforts were heartily seconded by faithful workers, and, during his pastorate, Sabbath schools were established at Beetown, Patch Grove and Glen Haven.

During the winter of 1865-66, the church extended a call to Rev. C. T. Melvin, which was accepted. About this time, the congregation was strengthened by the addition of several members previously connected with the Scotch Presbyterian Church of Canada. In June, 1866, Rev. A. A. Young became the Pastor of the church, remaining five years. He was aided during the last part of his ministry by the Rev. W. H. Marble.

At its first organization, the church had been called the First Presbyterian, but this name had soon after been changed to Blake's Prairie Congregational Church. During the pastorate of Mr. Young, the name was again changed to the First Congregational Church of Tafton. Rev. Mr. Young closed his labors May 20, 1871, and the church was without a Pastor for a little over a year. In June, 1872, the Rev. David Wirt received a unanimous call, which was accepted, and the reverend gentleman remained one year as Pastor. During this year, it was determined that the well-being of the church demanded that it should have one organized center at Bloomington and another on the prairie. The old academy was purchased and remodeled and improved at a cost of \$1,160, and at the same time another church edifice was erected on the prairie; the Bloomington Church was dedicated August 24, 1873; at that time there was a deficit of \$600, but of this amount \$512 were pledged at this time. The second church was dedicated October 12, 1873. During this same year, Rev. Charles Willey came to the pastorate and remained as Pastor for two years, during which time, twenty were received into the church. The first Sabbath in November, 1875, Rev. Smith Norton occupied the pulpit in both churches, and the week following the Rev. Ira Tracy, former Pastor, passed on to the shore beyond.

Mr. Norton remained six months, during which time ten members joined the church. In June, 1876, Rev. R. L. Cheney came and was ordained in the October following, and has since remained in the pastorate of this church. The present officary of the church is as follows: Pastor, Rev. R. L. Cheney; Deacons, J. A. Kilbourn, L. C. Newcomb, J. W. Stone, William Whellans, B. Beardsley; Clerk and Treasurer, O. W. Graves. Society officers: Trustees, C. R. Newcomb, S. McIvor, B. Beardsley, M. Scott; Clerk, C. R. Newcomb.

Baptist Church.—As the Beetown and Bloomington Baptist Churches are one and the same, the early history of the church and its beginning will be found in another place connected with the Beetown history. This organization was effected June 21, 1845, and it continued as a branch church until January 2, 1847, when a council was convened at Beetown, of which Elder J. P. Parsons was Moderator, and Elder William Stillwell was Clerk. The church organized as a separate church, with Elder Chapin as Pastor. Elder Chapin continued to divide his time between Beetown and Lancaster until November 30, 1850, when he accepted a call to devote his whole labor to the newer organization. He remained until the close of the following year, when he tendered his resignation, which was accepted with much regret. During his pastorate, meetings had been held alternately between Beetown and the "Red Schoolhouse." In 1852, Rev. D. Matlock preached alternately at Lancaster and at Beetown, and at the close of his labors Elder Miles preached for the church six months. He was followed by Rev. William Wallace. In May, 1855, Rev. E. M. Lewis was called to preach one-half the time. Previous to this, a revival added seventeen to the church. An attempt was made during this year to erect a church, but the project came to naught. In the spring of 1857, a series of meetings was held at Tafton, then a rising village, and the church removed to that place. In 1858, Elder Lewis severed his connection with the church. The congregation remained without a Pastor until April, 1859, when F. G. Thearle, a licentiate of the Darlington Church, assumed pastoral care in accordance with a call that had been extended to him. He devoted a portion of his time to the church at Wyalusing, but in October was ordained as Pastor. The name of the church was changed in this year from Beetown Baptist Church to Tafton Baptist Church, and work was commenced on a new church building, and completed some time after in 1863. Elder Thearle remained until 1864, when he was succeeded by Elder B. Law, who remained until April, 1867. The church was again without a Pastor until 1869, when Elder W. T. Hill took charge of the congregation, devoting a portion of his time to Wyalusing. Elder Hill resigned in August, 1870, his resignation was not acted upon until March, 1871, and in May he closed his labors. April, 1872, Rev. G. F. Strong was called to the pastorate, and, accepting, began his labors in May; they were cut short by his untimely death in September of the same year. In November, J. C. Webb preached for a few Sabbaths, and was asked to continue six months, and, in December, was asked to continue one year, he having been ordained in October by a council called for the purpose. Elder Webb closed his work in June, 1874, and the same month

an invitation was extended to Elder G. D. Stevens, who accepted the invitation, and has continued as Pastor up to the present time.

The present officers of the church are as follows: Pastor, G. D. Stevens; Deacons, James L. Woodruff, Homer Beardsley, Peter N. Thornton; Clerk, Homer Beardsley. The Deacons also act as Trustees of the Church.

Methodist Episcopal Church.—The first Methodist class was organized in the fall of 1857, and consisted of H. K. Wells, Mrs. Wells, Jeremiah Gee, Mrs. Gee, Mr. and Mrs. L. S. Osborne, Miss Annette Wilson, Miss Minnie Gordon, Mrs. N. Wilder, Luke Parsons and William Crosley. H. K. Wells was class-leader. Service was held every two weeks, the new organization being attached to Patch Grove. The ministers having the little flock under their care were the Rev. W. F. DeLapp and Rev. Knibbs, who were associated together on the circuit. Mr. De Lapp was followed by Rev. C. Cook in the spring of 1859, who had associated with him Rev. Alfred Brunson, followed in the fall of the same year by Rev. C. P. Hackney. In the fall of 1860, Rev. R. R. Wood succeeded Rev. Mr. Cook, and was, in 1862, followed by Rev. W. F. De Lapp, who returned for a second time. He remained two years, and was succeeded, in 1864, by Rev. E. S. Bunce. In 1866, Z. S. Hurd came to the circuit, remaining one year, when he was succeeded by Rev. W. H. Kellogg. Rev. C. Bushby took charge of the circuit in 1868. Up to this time, the congregation had been without a church. The first meetings had been held in the old schoolhouse, and, after the erection of the Baptist Church, service had been held there for a few times, and afterward Brown's Hall had been leased for the use of the church. In 1868, however, the present church building was erected, and the congregation, after numerous vicissitudes, at last was vouchsafed a permanent abiding-place. Rev. Mr. Bushby remained three years, and was followed, in 1871, by the Rev. J. D. Brothers, who also served a term of three years. In 1874, Rev. E. M. McGinley came to the charge, followed, in 1875, by Rev. D. L. Hubbard. In 1876, the church, expressing a desire for the services of Rev. R. Hoskins, then at Bloomington, with the permission of Rev. Mr. Hubbard and the Presiding Elder of the district, Mr. Hoskins took charge of the church, being the first resident Pastor. The church was, in 1877, separated from Patch Grove and organized as a distinct body, Rev. James Ward being appointed to the new charge. Rev. Mr. Hoskins afterward sailed for India as a missionary. Rev. Mr. Ward was followed in the fall of 1878 by Rev. A. Charles, who remained as Pastor until 1880, when he was succeeded by Rev. J. C. Lawson. Previous to his coming, Mr. Lawson had announced himself as willing to serve as missionary to the far-off east, and soon after his arrival at Bloomington notice was received by him that his offer had been accepted, which necessitated his severing his connection with his charge, leaving the church for the present without a Pastor. The present officers of the church are: Trustees, L. S. Osborne and J. D. Clayton; a vacancy exists caused by the death of Mr. Milo Higgins, who formed the third member of the board; Secretary, L. S. Osborne.

THE PRESS.

Bloomington Record.—The initial number of the *Record* was printed July 15, 1880, Mr. C. J. Glasier being the editor and proprietor. The paper was issued as an eight-column folio, which size it has since retained. Mr. Glasier has served his time at the "case," and for a time, with his sister, had charge of the *Richland Observer*. By perseverance and good management, he has placed the *Record* upon a stable footing, and, although a comparatively new venture, it has evidently "come to stay." The *Record* is conservatively Republican in politics, and furnishes for the citizens of Blake's Prairie just what they need in the shape of a bright local paper.

In conjunction with the Bloomington press must be mentioned the *West Grant Advocate*, which was started at Bloomington some years ago, and then transferred to Lancaster, where it ended its existence with the new year of 1877. The type and other material, after many changes and vicissitudes, now assist in heralding the news to Bloomingtonians through the columns of the *Record*.

BLOOMINGTON BANK.

This institution first opened its doors as a financial agency for the people of Bloomington and surrounding country in 1871. The bank was then located over Greer's store, in the building now occupied by Mr. Stanley. Humphrey & Clark, William Humphrey and W. B. Clark, were the incorporators. In 1873, a more suitable and commodious building was erected on Canal street, into which the bank was moved the same year. In this building it has since remained. A simple private banking business is all that the proprietors aspire to at present, and in the line chosen they have been eminently successful, commanding the respect and confidence of all their numerous patrons.

I. O. O. F.

Bloomington Lodge, No. 159, I. O. O. F.—Was instituted December 9, 1868. The charter members were T. J. Brooks, E. Mount, Jesse Brooks, F. F. Grant, George W. Nevins and Alonzo Wilson. The lodge was instituted by D. D. G. M. H. Favor, of Boscobel. The first initiates were Brothers S. Woodhouse, D. L. Riley, I. McWilliams, G. W. Harger, C. R. Thomas, Robert Hicks and L. Hoskins. As ancients, Alfred Green, John Woodhouse, H. N. Johnson, M. Hadley and J. H. Sneclode. Of the first elective officers, T. J. Brooks has ceased to be a member. Brother Mount has long since slept the sleep that knows no waking. Brother F. F. Grant remains and also Mr. Jesse Brooks. Of the first initiates three have ceased to be members, but all are living. Of those who first joined as A. O., Brother John Woodhouse has joined that lodge whose Master's rulings have no mistakes. Brothers Grant, Kidd and Nevins were the first on whom degrees were conferred; Brothers Grant, Hadley and Riley constituted the first committee to draft a constitution and by-laws. The second elective officers were Brothers Mount, N. G.; M. Hadley, V. G.; C. R. Thomas, R. G.; and R. Hicks, Treasurer. The Secretaries, with rare exceptions, have succeeded to the V. G.'s Chair, and, with more rare exceptions, the V. G.'s to the N. G.'s Chair. The receipts of the lodge for the first term amounted to \$468.12, and the expenditures to \$372.23.

One of the most pleasant and profitable features of the institution has been the Rebecca meetings. The tact and taste of the Daughters of Rebecca in the management of these social gatherings, together with the intellectual treats occasionally given by them, will long be remembered by those present.

Thus, from small beginnings, has Lodge No. 159 raised itself to a commanding position morally, socially, numerically and pecuniarily. The lodge has at present sixty-two members in good standing, and the Rebeccas twenty-six members.

I. O. G. T.

The first lodge of Good Templars was organized in Bloomington, or Tafton, as it was then known, December 9, 1859. During the continuance of the "Academy," the lodge prospered and flourished, having a strong membership, and exerted a powerful influence for good. Upon the downfall of the institution of learning, the lodge also felt the blighting influences, and about ten years after its first organization, yielded up the ghost. An effort was made some time after to resuscitate it, and for nearly a year the lodge struggled on, but the powers that were proved in the end too strong, and it was numbered among the things of the past. A lodge of the Sons of Temperance followed in course of time, but it had no stable foundation, and in turn succumbed. The present lodge was organized August 29, 1879, when the following officers were installed: R. W. C., Rev. Alfred Charles; W. V., E. J. M. Newcomb; W. C., Rev. R. L. Cheney; F. S., Mary Halford; Rec. Sec., L. S. Osborne; Asst., W. L. Osborne; Treas., Mrs. Mary Clayton; W. M., Harry Grant; J. G., Nellie Osborne; Sent., Thomas Smith; Lodge Deputy, William Burnetts. At the same date, a lodge of Juvenile Templars was started, with a goodly membership. The present officers of the lodge (May, 1881) are R. W. C., Rev. R. L. Cheney; W. V., Mrs. Mary Clayton; W. C., Mrs. Grant; Sec., M. M. Osborne; F.

Sec., J. D. Clayton; Marshal, Minor Perrin; J. G., Mrs. Sabin; Lodge Deputy, L. S. Osborne.

BLAKE'S PRAIRIE AGRICULTURAL SOCIETY.

August 1, 1868, a meeting was held at Brown's Hall, to consider the advisability of organizing a fair association. Mr. George Ballentine was chosen Chairman, and Mr. Jesse Brooks, Secretary. After appointing a committee to draft a constitution and by-laws, the meeting adjourned to August 15, at the same place. At this adjourned meeting, the following resolution was adopted:

Resolved, That we deem it advisable to organize an agricultural society, and to hold an industrial fair the coming fall; to open books for membership at one dollar annually, or ten dollars for life, and that the name thereof be called "The Blake's Prairie Agricultural Society," the first fair to be held in the village of Bloomington, on the 16th and 17th days of September.

Officers were then elected as follows: President, William Humphrey; Vice Presidents, James Milner, John Batie; Treasurer, D. F. Brown; Cor. Secretary, Jesse Brooks; Executive Committee, J. M. Hickok, R. Glenn, R. Newman, L. M. Okey, A. A. Bennett. The society, since its organization, has held an annual fair, having leased a tract of ground immediately adjacent to the village. The present officers are: President, James Kenyon; Vice Presidents, N. Austin, J. A. Davis; Secretary, F. Greer; Treasurer, G. Sprague; Executive Committee, P. Thornton, W. Howard, J. M. Kilborn, George Whiteside, J. Honefal, J. S. Moore, A. M. Cilley, R. A. Welsh, A. B. Gates, H. F. Young.

CHAPTER XV.

TOWNS AND VILLAGES.

VILLAGE OF JAMESTOWN—VILLAGE OF GEORGETOWN—VILLAGE OF BIG PATCH—ELMO STATION
—CUBA CITY—VILLAGE OF FAIR PLAY—CASSVILLE.

VILLAGE OF JAMESTOWN,

in the town of Jamestown, being located in the northeastern portion thereof, distant three miles from Fair Play and four miles from Georgetown to the north, is an unpretentious village, quietly nestling among the hills and valleys, which relieve the monotony of the scenery in that section of the county.

This portion of the town was settled as early as 1827, when James Boyce made the first discovery of mineral in the center of what afterward became Section 12, one quarter of a mile from the village site. James Gilmore and family came in the same year and opened a farm near the present village, the first in this portion of the township. A large number of discoveries of leads, the McKnight mine on the Joseph Pinch farm among the rest, were made during 1827, and as a result, the old settlers say that miners swarmed into the vicinity and began prospecting. Many were successful; a larger number failed in their objects, and but very few of those who came permanently identified themselves with the town. Those who came were mostly from Vinegar Hill, Hard Scrabble, Shullsburg, and other points, whence they returned when it was certain they had been unable to improve their prospects at home. In addition to this fact, a law was passed during the winter of 1827-28 placing a tariff on lead, to take effect in June of the latter year. Prior to that date, immense quantities of mineral were gotten out, and with shipments of lead from Spain, so reduced the price of the commodity as to entail loss upon all who engaged in mining. At this the prospectors abandoned Jamestown as a field of operations; the discoveries made prior to this calamity were worked out, but no new ones sought for.

During 1828, Silas Brooks settled on the village site, as also did Benjamin Kilbourn, the latter opening a farm eight years later, which is now on the confines of South Jamestown.

The Black Hawk war, a few years later later, diminished the population and confirmed the section in no small degree to the absence of a prosperity that was visible at other points in the county less advantageously located. There were no troubles during its continuance, and no recruits entered the service from future Jamestown. But all residents left the vicinity and hurried to Galena and elsewhere for protection, very few beyond those already mentioned returning when the war was over. From this date on until after the completion of the railroad from the lakes to the Mississippi, remarked one of those who came in 1827, there was no emigration to speak of, and a village was regarded as beyond the range of possibilities. Nevertheless, within five years after the battle of the Bad Ax, enterprising prospectors visited the mines and began the building of what subsequently gravitated into a post office known as Centerville, afterward as Jamestown.

It is thought that Thomas Webb became a citizen of the future village as early as 1838, though it is contended that he postponed the conferment of this distinguished honor until some years later. At all events, he put up the first house in the village as late as 1840. It was of logs, still standing, and with improvements and additions subsequently made, has since become the homestead of Warden Anderson, a merchant in North Jamestown.

About the same time, or, perhaps a year later, James Gilmore built on his farm, a short distance north of Mr. Webb's residence, and Henry Van Vleck erected a cottage to the south of Webb's. A year later, or in 1844, Sylvester Gridley, a merchant of Platteville, subsequently opened the first store in the place, locating it across the street from the Webb place, from

which it might be said all improvements of that time seemed "to Orient." In 1845, the house now owned by Silas Brooks was built, and the following year H. H. Howe erected the commodious frame on the Stage road to Platteville, still standing and known as the "Jamestown Hotel." Mr. Howe designed the premises for caravansary purposes, and as travel at that time was regular and generous, his accommodations were not unfrequently taxed, though the building was what is known as a "double building" two and one-half stories high. The same year John Matthews and Abraham Wood built a large frame house on the west end of the Cape & Taylor lot, which was considered one of the most elaborate and roomy in this portion of the county, and gained for its projectors the fullest meed of praise as citizens of enterprise and character, calculated to inspire the citizens with a noble ambition, and whose labors and improvements would enhance the value of property by the attraction of capital and other material aids in that behalf. From this date to 1850 there was very little building, and with the exception of a brick residence put up on the present site of James Sheffield's house, and some other improvements of minor detail, nothing was done.

In 1850, people began to build on the line between Sections 1 and 12, about where (and further south) South Jamestown or "Puckerville" rose up. The same year Thomas Beasley established a home as also did N. Ritchie, both houses being located west of the Webb premises. Between that and 1860, a parsonage for the Methodist minister was built; James Mackay, erected a dwelling house, which, with other less important ventures, are all that has since been accomplished save the erection of the Congregational and Lutheran Churches, and the school-house.

Prior to the war a log cabin stood on the Fair Play road nearly opposite the present store of Louis Reifsteck. At that time, as also to-day, the residents of Jamestown proper refused to permit the sale of liquor within their bailiwick, and to escape the penalty for a violation of this prohibition a grocery was opened in the log house, and the "forbidden fruit" dealt over the counter to all who applied without regard to race, sex or existing condition. Soon after, Decatur Peyton put up a residence on the highway and lived there for a number of years, and during the sixties, James Floyd built the "Jamestown House" on the site of the log dram-shop. In time, Mr. Peyton vacated his residence, which was changed to the "Union Hotel," and swelled the places of entertainment to be found in "Puckerville" by the addition of one. Mr. Reifsteck built a large frame structure in which he opened a store, one or two residences lined the streets, a blacksmith and wagon shop was erected, and South Jamestown, in place of existing on the map only, became an established fact.

North and South Jamestown to-day contain two church edifices and three congregations, one schoolhouse, two general stores, one blacksmith-shop, and a population of one hundred and fifty.

Educational.—There seems to be some dispute as to when the first school was opened, some arguing that it was early in 1840, and others contending that this important event did not come to pass until some years later. All agree, however, that its location was on the White place west of Jamestown, where it was maintained until the convenience of patrons compelled its removal to a more central locality. Thereupon it was drawn over to South Jamestown and set up where it served its purposes until 1875. In that year a new schoolhouse was substituted and is still used. It is of frame, two stories high, furnished with every convenience, and cost \$700.

At present one teacher is employed, the average daily attendance of pupils being about thirty, and the annual expense of conducting the institution not less than \$350.

The School Board as at present constituted, is Frank Lester, Director; Peter Bench, Clerk, and Louis Reifsteck, Treasurer.

The Post Office—Was first established in 1838, it is thought, and Centerville designated on the route as the name by which it should be known. After a brief experience it was discontinued and for some time citizens were obliged to depend upon other depots for mail facilities.

During the service of Gen. G. W. Jones as Representative in Congress, the office was re-established at his instance, though under the name in now bears. During the interval, "Cen-

terville" was donated to another point, and upon the resumption of communication with the outside world it was called "Jamestown" after James Gilmore, then, as under the former regime, Postmaster.

At present the mail facilities are full and complete, and the following gentlemen have served as Postmasters at intervals: James Gilmore, Benjamin Kilbourn, Chauncey Skinner, James Collegan, and Warden Anderson, the present official.

The Congregational Society—Was first organized at Fair Play in 1843, and at one time was prominent and influential in that vicinity. In subsequent years the society built a frame church at Fair Play and remained as occupants until 1858, when the congregation removed to Jamestown, leaving its edifice to the use and occupation of the Methodist Episcopal and Primitives. The same year the handsome frame church near the Jamestown Hotel was built and dedicated and has until within a year been occupied on alternate Sabbaths by the Methodists. The building is 32x35, with a capacity for seating about 200 auditors, and cost \$900.

During the past year, the society has been without a pastor and services have been discontinued temporarily.

The society numbers twenty members, the church property is valued at \$1,000 and the following pastors have severally served since 1843: The Rev. J. C. Holbrook, Mr. Dixon, Loran Robbins, William Hassell, Mr. Strong, William Stoddard and Nicholas Mayne.

The Jamestown Lutheran Church.—This society was organized in 1862 and composed of Louis Reifsteck and family; George Heffner and family; Anton Weighle and family; George and John Leben and families; August and Bernard Eckert and families; Schultz and family; John Hoffman and family and some others.

Services at first were held in the residences of members, and so continued until 1868, when the present frame church of the association was erected in South Jamestown, and has since been occupied. It is 20x30, will seat upward of 150 worshipers and cost \$1,200.

The congregation now numbers 40 families, and services are conducted by missionaries assigned from the Lutheran College at Dubuque.

The Jamestown Cemetery Association.—A society for the providing of lots for the burial of the dead was organized in 1840, it is thought, and originally owned two acres of land to the south of the village, most of which since that date has been disposed of to purchasers. The grounds are appropriately laid out, handsomely planted with flowers, shrubberies and ornamental trees, and decorated with a number of elaborately sculptured monuments.

The affairs of the association are intrusted to a Board of Directors, at present composed of Frank Lester, Rufus Hannum, Edward Burns, Louis Reifsteck and Benjamin Kilbourn.

The Jamestown Methodist Episcopal Church—Was organized during 1847, through the efforts of the Rev. Mr. Smith, a traveling evangelist, and has steadily though slowly grown in numbers and influence. The class was at first composed of communicants from the surrounding country, including William P. Cline and wife, Jacob Cline and wife, Harrison Cline and wife, Benjamin Peck and wife, Peter Saddler and wife, Milo Higgins and wife, Isaac Williams and wife and some few others, and services were had in what was known as the "Puckerville School-house," where the society remained until 1860. In the meantime, the Congregationalists had erected the handsome frame church, at present belonging to that denomination, and, in the year mentioned, permission was accorded the Methodists to occupy the same on alternate Sabbaths, which privilege was availed of, and is still indulged.

The present membership is said to be about thirty, and the following Pastors have officiated in its pulpit:

The Revs. Mr. Smith, Robert Langley, John Murrish, William Sommersides, John Bean, Mr. Bunce, Stephen Pike, John Trezgedar, William Cook, James Simms, William Howarth, Mr. Jefferson, William Sheppard and T. J. Lewis, at present in charge.

VILLAGE OF GEORGETOWN.

This village was, until 1870, known as the village of Smelser, and is located in the southern portion of the township of that name, among the later settled of the townships in Grant County. Who came into the vicinity in advance of all others cannot be correctly stated. Big Patch and Sheet Leads, located in the vicinity, attracted the usual compliment of miners, and, while a limited number still remain, the great majority have gone the way of all miners, i. e., to California and other points, where the pursuit of gold is attended with more remunerative results than delving for lead mineral.

Among those who arrived here at an early day, and settled near the present village, was William Bowmer, who, it is thought, came in 1828; J. M. Smelser, who came in 1833, and settled on Section 22; Lysander Gilmore, who arrived the same year, as also did Hamilton Gilmore, the former securing a claim on Section 34, and the latter on Section 33; D. B. Patterson, an arrival of 1836; Hugh Patterson, who came at an earlier date; George E. Cabanis, who came in 1838; William and James Brandon and P. J. Neal; Jonas Jones, who made his advent in 1843; George Wineman, who settled on Section 27, in 1845, and some others, whose names cannot be recalled.

Though the arrivals were reasonably numerous, improvements on the present village site were proportionately slow, and the precedent thus established has obtained to the present day; yet, Georgetown is pleasantly located, handsomely laid out and as handsomely built. In these respects it is surpassed by no village in the county. The houses are homes of comfort and independence, and give to the village an appearance of elegance and taste seldom witnessed in the make-up of Western villages.

The first house erected was of log, a story and a half high, the main building being 15x20, with an "L" 12x14 of frame attached. This was in 1848, and George Wineman still living, was the architect and builder. In the log house he opened a store the same year, for the sale of notions, varieties, etc., which is now recurred to as the first commercial venture in the village. The log and its frame addition have long since been torn down, and their absence supplied by the tasty frame residence of Mr. Wineman, which occupies their site, on the present corner of Main and Water streets. For upward of a year, this was the solitary house on the prairie; the advance guard as it were, of the improvements which were to follow fast, and follow faster within the ensuing ten years. The "store" gradually became known throughout this portion of the township and as a place of resort so popular that, one year later, a post office was established there, and Mr. Wineman appointed to take charge of the office.

Soon after, settlers began to leave their distant homes and crowd closer together in the present village. Late in 1849, Mr. Wineman sold an acre of ground adjoining his store to Jared Todd, who erected a frame house on his purchase, 16x20, and established the pioneer blacksmith-shop of the village therein. In time, the vendor became the vendee of the premises, and the improvements, after having been moved uncerimoniously about the village limits, were returned to the spot upon which they originated, and are now occupied by Michael Oakleaf.

The additions to the population, however, were slow, and the buildings put up for residence, mechanical or commercial purposes, proportionately dilatory. In 1850, S. H. Sheffield built opposite the present corner of Main and Church streets, after which, nothing was done until two years later, or in 1852. This year a one story and a half frame house ornamented Lot 2, on Section 28, through the efforts and enterprise of Alfred Bray; the schoolhouse was also built in 1852, and still stands diagonally opposite the Arcade Hotel. It was used as a schoolhouse until 1859, when it was sold at auction to William Peters and John Wilkinson, Jr., but subsequently changed hands, and now does duty as a dwelling. The following year, what is known as the "Nash House," occupied by Capt. Robert Nash, was added to the village improvements, George Wineman building the same, and occupied by Peter Walker as a store, the first after that of Mr. Wineman above mentioned, known in the vicinity. In the same year, John Hopkins built the house now owned and occupied by Hiram Gilmore.

The year 1854 was a year of rest and relaxation, so to speak, as far as building is concerned; there was neither anything completed or projected during that season. In 1855, and until 1858, there was but one building erected, namely, that on North Main street for the occupation of the Rev. Charles Levan, a minister of the Christian denomination, who organized the Christian society in Smelser. The house is now owned and occupied by Columbus Hyde. During 1858, another store was provided for the patronage of villagers and residents of the surrounding country; it was built by Pearl and Speer Spencer, who subsequently sold out to William Peters. The building occupied by them was afterward sold to Brandon & Jeffrey, and is used by that firm as a warehouse.

Previous to the war, Isaac Dodson erected a blacksmith and wagon shop on North Main street; Thomas Ulmer built at the corner of Water street and Cabanis avenue, and Andrew Gregg put up the story-and-a-half frame now occupied by the store of J. H. Cabanis. These constituted the improvements made in the village from 1848 to 1860. In 1861, the war broke out, and all operations designed to benefit the corporation and enhance the value of property were practically suspended. The population at this time did not exceed fifty, including men, women and children, and from this limited capacity to furnish recruits, eight soldiers shouldered their guns and represented the infant town in the armies of the North. When the war closed, the task of improving the village was resumed, and, between 1865 and 1880, some of the most prominent and faultlessly constructed buildings were erected. These included the two churches, the Odd Fellows' Hall, Cabanis' store, Wilson's Hotel, the residences of John Huntington, Dr. Oettiker and others, etc., etc.

The village was surveyed and laid on the 18th of May, 1870, by Joseph Allen, on Sections 21, 22, 27 and 28, the land therein being owned originally by J. M. Smelser, J. H. Cabanis, George Wineman and Alfred Bary. These sections were divided into four blocks, comprehending a total of forty-one lots, and divided by Main and East streets and Cabanis avenue, running north and south, and Water, Brady and Church streets, running east and west.

The village now contains 1 drug store, 1 millinery store, 1 blacksmith, cooper, wagon, harness, and shoe shop, 1 physician, 1 school, 1 hotel, 2 stores, 2 churches, and a population of 125 souls. Within the past fourteen years, or in the fall of 1867, the name was changed to Georgetown, by which it has since been known as a quiet, unpretentious inland village, attractive alike to the man of moderate means who is ambitious to secure a home, as also to the more wealthy citizen anxious to retire from the active scenes of life.

The Post Office was established in 1849, in the log cabin of George Wineman with that gentleman as Postmaster. Since that date it has occupied various sites in the village (always prominent), and is now in the store of J. H. Cabanis.

Mail facilities are ample and regular, and the following gentlemen have been the recipients of Executive confidence in addition to Mr. Wineman: Robert Nash, Frank Dirigley, Robert Wilson and James H. Cabanis.

Educational.—The first school taught in Smelser Township was that taught by D. B. Patterson, in a log schoolhouse built in the spring of 1836, near the future village of Smelser. The first school taught in the present village site was, in 1848, where George Dirigley officiated as teacher, and the following were among his pupils: J. H. Cabanis, J. N. Cabanis, John, Ellen and Hannah Richards, Henry, Mathew, Maria and Mary Calhoun, Emily Simmons, John and Frank Brandon, Elizabeth and Susan Smelser, Mary and William Forqueran, Sylvester Campbell, Preston Bray and others. The same year, the schoolhouse was burned down and the pupils were then taught in private houses. This lasted until 1852, when the schoolhouse, now a residence opposite the Arcade Hotel, was built and taken possession of, remaining in the service until 1860. That year the present house was built, and has since been occupied. It is of frame, 28x40, and cost \$700.

At present, one teacher is employed; the average daily attendance is thirty pupils, and the annual expense \$400.

The Board as now constituted is made up of Isaac Williams, Director; D. T. Nichols, Treasurer, and H. Gilmore, Clerk.

Georgetown M. E. Church.—The first Methodist services held in the township were in the residence of a Mr. Morgan, the Rev. Mr. Quigley, now an attorney of Galena, officiating as Pastor. The church in Georgetown was organized under the auspices of the Rev. John Murrish in 1855, and consisted of but few members, among whom were John Richards and family, John Hopkins and family and Mrs. Hannah Brandon. Services were first held in the schoolhouse, which was so used until 1860, when the congregation removed to the new schoolhouse, where it remained seven years.

In 1867, the present frame church edifice was built at a cost of \$1,400 and upward, and has since been occupied. It will seat 300, and is handsomely finished.

The present number of communicants is quoted at 50, and the following pastors, the same who have served at Jamestown, have been assigned to Georgetown: The Revs. William Sommersides, John Bean, Mr. Bunce, Stephen Pike, John Truzadar, William Cook, James Simms, William Howarth, William Sheppard, and T. J. Lewis, at present occupying the pulpit.

The value of church property is about \$1,200.

The Christian Church—Was organized in 1853 by the Rev. Charles Levan and the following members: Hugh Calhoun and wife; Mr. Farquaran and wife; James Plunkett and wife; C. Y. Otwell and wife and Miss Fanny Pretts.

The congregation worshiped in the schoolhouses until 1867, when the Christian Church on Main street was built and is now in use as it has been from that date. It is of frame, 27x40, will seat an audience of 250 and cost about \$1,500.

The present membership is about twenty-five, and the following ministers have served since the church was organized: The Revs. Charles Levan, Daniel Howe, Henry Exley, George Sweeney, John Henry, Mr. Warmoth, William Sweeney, E. Searls and Mr. Monroe, the present incumbent.

The value of church property is \$1,200.

Georgetown Lodge, No. 39, I. O. G. T.—Was first organized in 1868 and re-organized December 17, 1870, with fifteen members and the following officers: J. O. Luce, W. C. T.; Miss Annie Brandon, W. V. T.; George S. Cooper, Chaplain; Miss Amanda Nichols, W. S.; Miss C. E. Hightshoe, W. C.; and John R. Jones, F. S.

The society meets regularly in Brandon & Jeffreys' Hall and is in a flourishing condition. At present its roster of membership contains forty-three names, officered as follows; Miss Annie Brandon, W. C. T.; Miss Fannie Becket, W. V. T.; Charles F. Wineman, R. S.; Benjamin F. Luce, F. S.; Miss Esther Kay, W. T.; Miss Ella Brandon, Chaplain.

Morning Star Lodge, No. 185, I. O. O. F.—Was organized December 8, 1871, under and by the provisions of a charter granted to Thomas Thomas, H. W. Smith, B. F. Saltzman, W. J. H. Newton, J. M. Quick, William Kay and William Lee Valley by the Grand Lodge of Wisconsin.

Meetings were regularly convened in a hall over Brandon & Jeffreys' Hall and continued to be held here until 1873. In that year the craft erected Odd Fellows' Hall, a commodious frame, 26x40, occupied in part by the Odd Fellows and Masons and in part as the town office, at a cost of \$1,100, and has since met here.

The present membership is stated at twenty-six, the value of lodge property at \$1,000 and the officers as follows: William Kay, N. G.; Edward Lorey, V. G.; B. F. Saltzman, Treasurer; and H. Gilmore, Secretary.

Georgetown Lodge, No. 185, A., F. & A. M.—Was chartered June 15, 1872, under a dispensation granted to twelve members and the following officers, bearing date October 18, 1871: Peter Heil, W. M.; R. L. Wilson, S. W.; William Thomas, J. W.; James O. Luce, Secretary; and John Eplett, Treasurer.

Meetings were first held in Brandon & Jeffreys' Hall until the completion of the Masonic building, when the lodge was removed thither and has since convened there.

The present membership is thirty, the value of lodge property quoted at \$250 and the officers: John M. Quick, W. M.; Dr. James Oettiker, S. W.; Albert Launver, J. W.; John Eplett, Secretary; and Ernest Bernsheive, Treasurer.

Meetings are held semi-monthly on the first and third Saturday evenings.

Smelser Cemetery was established years ago, before the village of Georgetown had been conceived in the minds of its founders. It consisted of a tract of land lying to the north of the present town less than a mile, donated by J. W. Smelser and Hugh Laird. The first burial within its sacred limits is a question of doubt. Whether it was a man from Elk Grove in the employ of Mr. Smelser, who was frozen to death, or whether it was Col. De Long, father-in-law of Mr. Smelser, cannot be determined at the present day. But since that event many a forefather of the town has been laid in this narrow cell, a prey to dim forgetfulness and cherished memories.

GEORGETOWN CEMETERY.

The Association was organized April 5, 1877. The cemetery grounds have only recently been regularly laid out and their decoration begun, but in time, from their natural advantages and the care bestowed upon their adornment, they will undoubtedly come to compare favorably with those which show the handiwork of years and care.

The present Board of Trustees consists of B. F. Saltzman, Obadiah Smelser, D. T. Nichols, Cook Jones, James Ladd and Nadab Eastman.

VILLAGE OF BIG PATCH,

a village of about sixty inhabitants is situated partly in Section 3 and partly in Section 4 in the northern part of Smelser Township. At one time it was known as Kaysville, but was subsequently changed to "Big Patch," after a prominent mine in the vicinity, discovered by Fitz & Javrow it is supposed, and worked by the flock of miners who came into the country at a very early period of the county's settlement, or about 1832.

The first settlements made in the vicinity of the present village were those of John Harnes, who, it is believed, made his appearance there in 1835, and his brother Diederick, who followed John the succeeding spring. Soon after, William Cormack and Hardin Butler kept them company, as also did Thomas Row, the latter opening up the first farm in this portion of the county, and to him and William Kay is the present village indebted for whatever of prosperity or development has since attended its history.

In 1836, Thomas Robinson, Stephen Lloyd, James Gillis, Henry French and George E. Cabanis passed through this section en route to the Blue River, and were entertained at the cabin of Hardin Butler. Upon their arrival at Blue River, they succeeded in securing a lease of lands upon which to prospect, and sunk a shaft. After laboring diligently for weeks in the pursuit of treasure without results, one by one gave up the undertaking and returned whence they came. Mr. Cabanis reached Big Patch, mentally confident that he had thrown away the opportunity of his life for the acquisition of wealth, and while moodily reflecting upon the uncertainties of the future and the eccentricities of fortune, was nearly paralyzed at the announcement made by an arrival that "some Dutchmen had struck the biggest lead of the year at Blue River, in a shaft sunk by four — fools who had quit when they were within eight inches of a 2,000-pound nugget." Mr. Cabanis relates that he knew to whom the stranger referred in his remarks, and although he said nothing at the time, he has never since ceased condemning his hasty action of forty-seven years ago.

William Spencer settled near the village in 1847, Stephen Dinsdale in 1840, and many others whose nomadic instincts and unsettled ways of life led them to wander elsewhere instead of remaining to take the tide of fortune at its flood. In 1841, William Kay opened a store, the first in the neighborhood, built a mill, and engaged in smelting. Previous to this, however, the number of inhabitants had been increased by the arrivals of Dr. J. C. Campbell, John Spink, John Clayton, and some others, whose numbers had the effect of resolving the widely separated

neighbors into an ambitious corporation, as it were. In 1843, John Walker, T. M. Robinson, probably Thomas Booth, etc., settled near the village. In 1845, George E. Cabanis, who had immigrated into the vicinity ten years previous, and had returned to Illinois, came back with his family. John Wilkinson, too, settled in the present village, also William Fortney, and others. This year Thomas Brooks died, the first death in this portion of the township of which there is any authentic record.

The following years were not marked by the arrival of prominent citizens or large delegations, neither were improvements of a character to encourage the hope that a town would ever be built on the banks of the Branch. In 1846, Kay's store, mill and farmhouse, Row's farmhouse, and Joshua Yeadon's blacksmith-shop, were the only buildings for miles around; and it was not until 1849 that the first overture toward establishing a village on the present site was made. This was done by James Rawson and Charles Butler, who built a grocery and house of entertainment on the Platteville and Dubuque road. The house still stands, devoted to its original uses, upon the very spot of its origin.

Years before this a school had been established, churches had been organized, and some efforts to create a community of feeling if not of *acquets* and *gams*, had succeeded in manifesting their existence. These influences had a tendency to concentrate the number of inhabitants who desired to avail themselves of the advantages offered by the agencies cited, and as a consequence, houses were built up nearer together than upon farms separated by sections of land. Residences attracted manufacturers to some extent, and shops of mechanics went up in the neighborhood, while a store was established to supply families with commodities it would otherwise have been impossible to procure nearer than Platteville. It should also be observed that a mill had been established at an early day by William Kay and added its influence to the surroundings. In short, a village was established almost before its residents became aware of this distinguished fact, but being without the mining district after its location, and the competition of surrounding villages more favorably situated, Big Patch has failed to improve with age, either in its personal appearance, if one may borrow a term, or in the number of its inhabitants. It is pleasantly situated, however, surrounded by a rich agricultural region, and as a quiet, unpretentious, cheerful place, for a quiet, unpretentious, cheerful citizen to locate, it offers superior inducements.

Educational.—The first school taught in Big Patch was in a log house located one quarter of a mile below the store, the product of a "building bee," in which George E. Cabanis, William Fortney, William Kay, Joshua Yeadon, William Spencer and John Wilkinson were the moving spirits. Joseph Thompson was the teacher, whose pupils were made up of the children of the above-named gentlemen, with others in the neighborhood.

This was in 1846, and the school was continued in the log edifice one year, when it was removed to a house near the mill-pond, used by George H. Frank as a blacksmith-shop. The next school was taught in a house erected by the Sons of Temperance on the Cabanis farm, where the village first began to draw public funds, which were used in part payment for the tuition of scholars, the balance being paid by the parents. In this school taught George Frank, H. B. Harvey and Linus Boscorn, and from school graduated students who have since been quoted among the most prominent and influential citizens in this portion of the county.

In 1860, the School Trustees purchased the old Methodist Church, and removed it to Section 2, about one and a quarter miles east of the village, where it was retained for a number of years, and finally succeeded by a new edifice, which has since been used.

At present, one teacher is employed to teach an average daily attendance of forty pupils; the cost of supporting the school is \$250 per annum, and the Board is composed of John Vine, Director; Henry Kettler, Treasurer, and Simon Harker, Clerk.

Big Patch Methodist Episcopal Church.—The first Methodist Episcopal class organized in Big Patch was during the year 1856, and consisted of Mrs. George E. Cabanis, Mrs. John Wilkinson, Maj. M. M. Griffith and wife, John Wilkinson, Mrs. Hannah Buxton and George Thomas.

The first services were conducted in the old schoolhouse, located on the Cabanis farm, which the congregation subsequently purchased, and, removing it to front the Platteville road, made the services more accessible to those who attended public worship.

In 1874, the old church was disposed of, and the present edifice erected. It is of frame, 28x36 feet, located on the edge of the village, with a seating capacity of 200, and cost \$1,200, complete. The present congregation numbers 150, and the following Pastors have served since the organization: The Revs. John Triunby, William Sommersides, John Bean, Stephen Pike, Mr. Bunce, John Trezedar, William Cook, James Simons, William Howard, William Sheppard and T. J. Lewis.

The church property is estimated as worth \$1,300.

The Primitive Church—Was organized in 1845, under the Rev. Mr. Hobson, and a large membership, including William Kay and wife, Isaiah Gill, Thomas Raw and wife, John Clayton and wife, Mrs. John Booth, Mrs. John Wilkinson, Mrs. G. E. Cabanis, Levi Eastman and wife, Mrs. John Walker and many others.

The first place of worship was the residence of Mr. Kay, which was so used for a number of years, or until about 1850. About that time, the congregation erected a plain frame building near the center of the village, which was used for sacred purposes until 1874, when it was sold to George Fox, and has since been utilized as a blacksmith-shop. Its absence was supplied the same year, however, by the handsome frame structure since employed, which occupies the old site, and is certainly one of the most attractive church edifices in this portion of the county. It is 30x40 feet, will comfortably accommodate an audience of 300, and cost a total of \$1,600.

The present congregation numbers 125, and the ministers following have had charge at intervals: The Revs. Mr. Hodson, Joseph Hewett, James Alderson, Mr. Lasonby, George Wells, William Tompkins, T. A. Cliff, J. Dawson, Henry Lees, Christopher Hendry, Thomas Doly, John Harrington and J. Arnold.

The property is valued at \$1,500.

Big Patch Mills—A short distance west of the village have been in service since 1846, when they were erected by William Kay and supplied with one run of buhrs, with which he did the mill work of the neighborhood for a period of ten years. In 1856 or 1857, Mr. Kay sold the investment to David Wilkinson, who enlarged its capacity, and, in 1868, further augmented its resources by the introduction of a steam engine.

The mill now contains two run of stone, one for flour and one for feed, possesses a capacity of turning out twenty-five barrels of flour daily, and does a business of \$12,000 per annum.

The value of the property is stated at \$8,000.

Big Patch Cemetery—Is adjacent to the Primitive Methodist Church edifice, and on lands donated for burial purposes by William Kay and Gen. Dennison, say in 1849, when a cemetery association was organized, of which William Kay, John Clayton, Levi Eastman and Thomas Raw were the Trustees.

The first burial, however, occurred four years previous, or in the spring of 1845, the mortal remains laid in this consecrated spot, at that time, being those of John Booth, an early settler, who resided on the edge of the village.

Subsequent to the organization of the association, the cemetery was surveyed and platted by Charles Doty, and laid out with tasteful regard to beauty and attraction. The grounds contain a large number of imposing and elaborately sculptured monuments, and is appropriately planted with flowers, shrubberies and forest trees.

The Post Office—Was first established in Big Patch during the year 1858. Anterior to that time, mail facilities were limited to Galena and Platteville. David Wilkinson was appointed Postmaster, when the office was located, and has since survived the efforts of rivals to supersede him.

In addition to the villages of Georgetown and Big Patch, the town of Smelser is the *locum in tenens* of three villages, namely, Elmo, St. Rose and Cuba City, the outgrowth of which are due to the building of the Galena & Southwestern Railroad, the route of which, from Galena to

Woodman, courses near the Eastern boundary line of Smelser. Though deriving their importance almost entirely from the fact they are railroad stations and shipping-points for the country immediately tributary thereto, they manifest the presence among their inhabitants of no inconsiderable amount of enterprise. The improvements, though limited, are substantial, and schools of a superior order, with churches that bear the impress of congregational character, in their dimensions and finish, dot the prairie landscape with commendable frequency.

ELMO STATION.

Up to the year 1854, the present village site was farming lands, the arable acres of which, rich in the sunshine and shadow, teemed with abundant crops, causing the husbandman to rejoice when the harvest was laid by, and the tanned reapers, when the fields were lying brown and bare, to pause and inhale the dreamy air in the russet season of the year.

During that year, however, Emanuel Whitham, an enterprising cultivator, erected what was then, and still is known as the "Junction House," a huge frame structure at the crossing of the road to Galena and Mineral Point. It was used as a tavern, and furnished accommodations for man and beast when the highways of the country were crowded with the "prairie schooner" and other conveyances of emigrants on their journey to the far West. For three years this was the solitary domicile or improvement in the vicinity. It still stands, its uses unchanged, its accommodations yet accessible. This was the only building erected for three years next succeeding in the vicinity. In 1857, Mr. Whitham built a residence opposite the present station building, that has also survived the rush of events and progress. No other improvements were either projected or completed, anterior to the survey and grading of the railroad.

When it became evident that a railroad was to be built, there was no inconsiderable excitement occasioned, and the prospect of a village at this point influenced the conclusion that land owners thereabouts would be greatly profited as a consequent. In the summer of 1874, Mr. Whitham caused a survey of the village site, appropriating forty acres for that purpose, and laying the same off into 200 lots; the same year the depot grounds were donated by D. J. Weatherby, and in the summer of 1875, the station was built. The same year, J. S. White erected the store still occupied as such, opposite the depot, and the next season the post office was located in the depot with T. H. Leslie, who also carried a stock of goods there, as Postmaster. These improvements were followed by the building of a harness-shop by James Welch; a blacksmith-shop by Robert Whitham, and residences by Robert Whitham, T. L. Leslie, Ephraim Hough and Emanuel Whitham, Jr. Since this epoch in the history of Elmo, improvements have ceased to be things of beauty, or joys of even passing significance. They still constitute the village proper, and will so continue until a day when rapid increase of population necessitates a provision for its accommodation.

The post office is located in White's store; churches are sought at other accessible points, and the school patronized is in the township of Elk Grove, La Fayette Co., a short distance from Elmo.

ST. ROSE STATION.

Equidistant between Cuba City and Elmo, and the eldest of the three, is St. Rose, so named by the Rev. Father Samuel Mozzuchelli, thirty-two years ago, when he purchased land and founded St. Rose Church. The first settlers in the vicinity were J. V. Donohoo, John O'Niell and Joseph Banfield. In 1853, Mark Lukey kept tavern in the brick house near the railroad crossing. The railroad was surveyed through here in 1870, graded in 1872, and its building commenced two years later. In December, 1874, J. V. Donohoo set apart ten acres of land on Section 25 for village purposes, and caused it to be laid out into lots upon the express understanding that St. Rose should be the only station between Platteville and Benton, Mathew Murphy of the latter place acting as the surveyor. When the road was completed and the too confiding property owner realized the utter unreliability of railway capitalists, he vacated the premises, not before he had sold one lot, however, Thomas Murry being the fortunate purchaser, for the consideration of \$100.

The improvements in the prospective village had all been completed before the same was laid, and consisted of a store, hotel, wagon and blacksmith shop, and these, with the station, the residence of Thomas Murry and that of J. V. Donohoo, erected in 1880, constitute all that have been made since 1849, except the church near by.

St. Rose Catholic Church—Located one-quarter of a mile west of the village, was first built in 1851, on land purchased of Levi Eastman, by Father Samuel Mazzuchelli in September, 1849. This church was of brick, 30x20, and cost \$900. Father Mazzuchelli remained in charge until his removal to Benton, after which it came under the care of the Dominican Fathers at Sinsinawa Mound, and so continued until the surrender of the college at Sinsinawa by that organization.

During the winter of 1856, St. Rose Church was irreparably injured by the severe frosts, and, in 1859, the edifice was torn down, when the present frame church, 30x60, was erected upon its site at a cost of \$1,200, and blessed and dedicated in November, 1861.

The present membership is made up of thirty-nine families, and the following Pastors have served since the present church was built: The Rev. Fathers M. B. Fortune, —. Prendergast, P. Allbright, J. M. Cleary, T. O'Neill and W. Miller.

CUBA CITY.

The largest and most prosperous railroad station in Smelser is twelve miles south of Platteville, and a point at which a large business in shipping is annually transacted.

The first settler in the vicinity of whom there is any authentic record was "Jack" Debord, who came during 1846 and built his house on the identical spot now occupied by the depot. Isaac Nichols made his advent about the same year, and put up a residence half a mile south-east of the village. In 1851, or thereabouts, the Davis family emigrated to Smelser from the East, and building the Western Hotel, still standing, kept tavern until 1858. In that year a man named Blodgett succeeded to the proprietary interest, and after a year's experience transferred his title to William Miller. In 1863, Robert Packard a "sucker teamster," who was wont to drive a team of six horses with one line, resigned his role as equestrian director, and purchasing the hotel, divided his time between farming and duties incident to the life of Boniface.

Prior to this time, S. A. Craiglaw had bought out "Jack" Debord, and in 1870, Packard sold his property and appurtenances to William Stephens. Soon after this event the railroad was surveyed, the track laid, and in 1875 Stephens & Craiglaw ex-appropriated seventy acres of land and caused the same to be defined by metes and bounds for village purposes. This tract was accordingly divided into twenty-nine blocks, and subdivided into 422 lots. Space was designated for depot and park purposes, the latter in the square bounded by Washington, Jefferson, Madison and Clay streets, and other improvements were contemplated on paper.

Immediately succeeding these arrangements a sale of lots was had, at which 150 were disposed of, and two weeks later a second sale was the means of disposing of fifty additional lots.

About this time the village *in futuro* was known as Uba City, so described by M. Y. Johnston, of Galena, but since changed to avoid a conflict of post office names; but it was not until a year later, when the railroad began its "daily wanderings," that the village began to be built up. To William and Thomas Mitchell belongs the honor of erecting the first building, it being a wagon-maker's shop. The same year Mrs. J. G. Schmole put up a store, the first in the village. These were followed by the building of the depot accommodations, residences, the church, the schoolhouse, and other improvements until to-day Cuba City is graced with two stores, one church, one schoolhouse, one blacksmith's and one wagon-maker's shop, a population of 120, and an active business interest. The annual shipments from this point are quoted at 200 car-loads each of grain and stock, and 25 car-loads of produce. The annual business is estimated at \$40,000.

Educational.—Previous to 1878, pupils from Cuba City attended school at District No. 9. By that year, however, the increase in numbers required more accessible and convenient quar-

ters, to supply which the present school edifice to the south of the village was erected, at a cost of \$1,200, and has since been used.

It is of frame, 28x48, two stories high, and though a graded school, but one teacher is employed at present. The average daily attendance is eighty scholars, and the cost of running the school is \$700 per annum.

Free Methodist Church—Was built in 1877 to accommodate members of that sect who had theretofore been obliged to worship elsewhere. The building is of frame, 24x36, and cost \$700. Services are conducted every alternate Sunday by the Rev. Mr. St. Clair, and alternate Sundays by the Methodist Episcopal denomination, led by the Rev. T. J. Lewis.

The church is attached to the Platteville Circuit, and the congregation includes fifty communicants.

Three-quarters of a mile south of the village the Methodist Episcopalians support a church, erected seven years ago. The congregation is stated at forty members, and the Rev. Mr. Simms preaches alternate Sundays.

The post office is located in the depot buildings, and John Stevens is Postmaster.

VILLAGE OF FAIR PLAY.

Fair Play, the remains of a village once promising, not to say prosperous, is located in the Southeastern portion of the town of Jamestown, contiguous to Dubuque, Galena, Platteville and other portions of the county, and easily accessible. As a business point the trade upon which was depended to build up and enrich the village departed materially with the miners when the latter removed to California. Since that hegira it has been diminishing steadily until to-day one store will more than amply supply the citizens and farmers in that vicinity, though in number there are two.

As, in other portions of the county, mining, which at one time existed as the principal feature of the inhabitants and source of wealth for all, is now almost totally abandoned. But few are engaged in its pursuit, and even these few are said to be conquering only a precarious victory. The village, however, is in the center of a rich agricultural region, near to St. Clara Academy, one of the most renowned, substantial and excellent institutions of learning in the West, and with these redeeming features to commend this portion of the county Fair Play must always occupy a position which, if spared from annihilation as a village, it will also be preserved from the cares and annoyances incident to overgrown and thickly inhabited municipalities.

The first settlement made in the village is said to have been that of John Roddam, who came in about 1838 and erected his cabin within the present metes and bounds of Fair Play. Others passed through this vicinity, it is believed, at a period anterior to 1838; indeed settlements had been made in that portion of the township by Gen. G. W. Jones at Sinsinawa Mound and others at other points. A fort had been erected during the Black Hawk war at the mound and two unwary and defenseless citizens had been killed and scalped by the wily savages immediately previous to the commencement of hostilities. But no settler had established himself on the present village site, so far as can be ascertained, until the roving Roddam came with his family and described the architectural outlines of a cabin within the then comparatively trackless waste of wilderness.

How he employed his time, or what the extent of his improvements were, or whether during his almost exclusive occupation of the territory, he was the objective point of attack by Indians or the *hoi polloi*, who were then beginning to make their advent into the country, is not of record. All that seems to be known is the fact that he settled in Fair Play during 1838, and was living in his cabin two years later, when Charles Bainbridge, then living at Vinegar Hill, discovered Mr. Roddam's presence while prospecting in the vicinity in search of a place to enter his claim and begin farming. He succeeded in this object, and procuring a tract of land near the village, erected a cabin a short distance west of his present residence, where he has become a prosperous agriculturist. His house is now within the village limits. That fall, George Este erected a cabin on the present site of Allinson's Hotel, and there were a number of other build-

ings put up, but they have disappeared or been succeeded by others until at this date they have departed from the minds and memories of those alone who, it would be supposed, were conversant with the facts.

About this time, miners who had exhausted other leads, or tired of other scenes, wandered into Fair Play and began to sound the depths of mother earth in their search for mineral. From their subsequent labors it is apparent that the initial efforts put forth in 1840 must have proved remunerative. At all events, with the dawn of 1841 there was a large influx of miners into the vicinity, and a mining town, with all that the term implies, sprang into existence. The hollow along which the village was afterward built represented the encampment of an army, relates one who was there at the time. The array of tents was continuous and the lives led therein peculiar to the checkered experiences everywhere in the lead mines to be observed. Drinking, gambling, quarrelling and bloodshed were scenes to be daily witnessed, and so universal finally became the reputation of Fair Play as a "hard town" that to live in it or its vicinity peaceably was esteemed an accomplishment of wonderful power.

In 1841, the mine, which subsequently gave the village its title, was discovered. It seems that a party of honest prospectors had at last "struck it big," and were preparing to work the "lead" with the utmost diligence, confident of the returns that would attend their undertaking. This came to the knowledge of a number of characters in the mines, who, by the way, were the attendant concomitants of rich discoveries at any point in the mines, when prospects of unusual richness were discovered, who determined to dispossess the lawful owners, and laid their plans accordingly. When these were about to be put in execution, the discoverers of the mine ascertained how the case presented itself, and evinced a determination to repel invasion and maintain their rights at all hazards. In the meantime, the facts in the case had been generally promulgated, and, at the appointed hour, a large number of knights of the "pick and gad" were on board to witness the eviction, or take part in the trouble which impended. Before the commencement of hostilities, and almost as the assault was about to be made, some conservative members of the crowd present called for a parley, and one of the speakers in his remarks dwelt eloquently on the spirit of equity which existed in the breast of every American. "Let us have fair play," he concluded, "and render unto Cæsar the things that are Cæsar's." The result was an arbitration of the question, which was decided in favor of the original holders of the mine, to which the name of "Fair Play" was given, and when, later on, a village was improvised in the hollow, the same appellation was addressed to the settlement. This year, the "Ten Strike," so called because of the number of men engaged in its first discovery, and the "Journey" ranges, brought to light by Sample Journey and Henry Gilbert, also became prominent. As a consequence, the immigration into Fair Play, as has already been stated, was very large; but, as a rule, composed of miners, men without stability, and who were valueless as an element in the perfecting of improvements, establishment of schools, or as the auxiliaries in any particular, in the advancement and development of a section. From 1841 to 1845, the buildings were mostly made up of hotels, groceries, etc., with one or two stores engaged in legitimate traffic to interrupt the monotony of the street. A school was started about 1843, and has been continued under successive administrations up to the present day. A church had been built by subscription, and some other agencies of civilization had been employed, and not without effect, though the inhabitants were of the type, indigenous, it might be said, to a mining town, where law and order were subservient to the inclinations and impulses of the people. In 1845, the population was estimated at 500. Allinson's tavern had been built by that year, and occupied its present site, with Henry Gilbert as landlord. An old tavern stood where the American House now stands, then owned by Edward Sloan. Chisholm's grocery stood directly opposite, and was the scene of many a bloody encounter and hair-breadth escape, even during the heat of battle. John Barton occupied a building on the north side of the street, and the old frame schoolhouse filled the gap between the tavern and Bainbridge's residence. J. B. Johnson, the successor of a Mr. Lewis, with Alfred Woods, kept the only stores in the place. Dr. Sampson was the only available physician, and, though there were a number of barristers on the ground, Amasa Cobb, who subsequently

became a member of Congress, and prominently identified with politics, was the most fortunate of all in procuring and disposing of cases. His first case is said to have been the defense of a preacher, who was charged with swindling in a horse-trade. The parson was acquitted, and the following winter his daughter married a resident of the vicinity, upon which occasion Amasa Cobb led a band of, 350 charivari serenaders. He is now Chief Justice of the Supreme Court of Nebraska.

About this time a disturbance arose regarding title to the possession of a prospect at South Diggings, two miles southeast of Fair Play, between a number of Irish and others of different nationalities. It was finally agreed that the difficulty should be settled by an Irishman named Claffey, and a miner named Rountree, entering the lists from the opposing forces. Rountree was gaffed with spurs, and not only used them so vigorously, but "gouged" so viciously as to enrage the friends of Claffey, who broke into the ring and administered a severe punishment before any interference could prevent it. A riot then appeared imminent, but was prevented through the influence of the more influential present, and bloodshed was thereby avoided.

In 1846, Fair Play was the scene of an immense gathering attracted by the prospect of a duel between two well-known citizens, Henry Ray and Conrad Burns, growing out of a dispute between them relative to a division of the proceeds of a mine near Lewisburg, a mile north of Hazel Green. After some altercation, Ray challenged Burns, who accepted, naming rifles at forty paces. He was known to be a dead shot, and, to make assurance doubly sure, passed the time intervening between the acceptance and the meeting in testing his skill at every distance and under all circumstances. On the day fixed, the principals appeared upon the ground on the ridge a short distance northeast of Fair Play, accompanied by John Rountree and James McCoy, their seconds. Ray had made his will and parted from his family under distressing circumstances, and was naturally affected by the surroundings. Burns was as cool as the proverbial cucumber on a day in December. By this time, mutual friends realizing the desperate strait to which the contestants were reduced, sought to accomplish a reconciliation. Ray, who was large and of a highly nervous temperament, was willing to accept any reasonable settlement, but Burns had come to fight, and refused to be placated on any other terms than an apology. Under the circumstances, Mr. Ray feeling that he had unintentionally wronged his adversary, so stated, and peace was declared.

Such were some of the incidents connected with the early settlement of Fair Play. This number could be multiplied without exhausting the supply, for in those days all men went prepared, and, if affronted in good name or estate, the law was rarely referred to as a remedy. In 1849, the California fever carried off large numbers of miners, none of whom, with rare exceptions, re-visited the scenes of their earlier days, and recalled the critical times during which they lived on the very spot of their origin.

From this time forth the period in the progress and improvement of the village remained fixed and immovable. Nothing out of the ordinary run of events (save the war) has occurred to disturb the current of its daily life, and it remains as it was begun forty years ago, a village under the hills, quiet, healthy, its inhabitants prospering in their daily avocations, regarding their homes with pride and the outside world beautiful in proportion as it remains at a distance.

When the war broke out, Fair Play did her part in the furnishing of men and supplies, and during that period, B. Cornelisen erected the first and only brick edifice in the place. It is a commodious structure, and was used as a hotel; this use is still maintained, it being known as the "Wisconsin House," with M. Calvert as landlord.

Schools.—The first school in the village was started about 1843, in an old and comfortless frame house which stood near the site of that at present appropriated to similar uses. James Johnson, a store-keeper, was the first teacher, and his roster of pupils included the children of Robert Hannum; John, James and William Nelson; John Huston; John and William Clise; John and Viola Smead and some others. Mr. Johnson continued in the service for some time, and the old building was used as a schoolhouse until 1851, when the present structure was erected. It is of frame, 26x36, with a capacity for fifty scholars, and cost \$600.

At present, one teacher only is employed, and the school has an annual average attendance of thirty pupils.

It is conducted at a yearly cost of \$350, and is under the control of a board, consisting of S. Sampson, Edward Cary and John Webber.

Churches.—There is but one church edifice in the village, that erected early in the forties through the liberality of Benjamin Kilbourn and others. Although the product of subscriptions made by men of all denominations, the premises were donated to the Presbyterians, whence they passed into the hands of the Methodist Episcopal sect, then to the Primitives, under whose control the church now is. Services are conducted semi-monthly, the Rev. Mr. Jarvis, of Hazel Green, officiating.

Jamestown Lodge, No. 43, I. O. O. F.—Was first organized in February, 1850, Dr. Mills, Samuel Verden, Henry Van Vleck, James Saddler and H. H. Horn being the charter members and officers. At first the lodge met in Howe's Hall at Jamestown, but during the war the number diminished, and meetings were suspended. In October, 1869, a new charter was issued, and the lodge has prospered with each succeeding year.

In 1878, it erected a handsome two-story frame lodge-room, 28x40, at a cost of \$650, and its local habitation is now established in the village of Fair Play.

The membership is quoted at 20; the value of lodge property, \$1,000; meetings are convened every Saturday night, and the officers at present are George E. Black, N. G.; John Lenster, V. G.; R. M. Henderson, Treasurer, and William Pallett, Secretary.

Sweet Hope Lodge, No. 40, I. O. G. T.—Was organized during the winter of 1865, with a membership of twenty, and has since been in the enjoyment of a prosperous and useful career. In 1866, the society erected a lodge room opposite the village school premises, at a cost of \$350, and since that date have met regularly in their own official residence.

The present membership is said to be nearly fifty, and the present officers are S. Sampson, W. C. T.; Miss Lydia Doyle, W. V. T.; Miss A. Hunsacker, W. T.; Charles Sampson, W. S., and George Bashbridge, W. C.

Meetings are convened weekly on Wednesday evenings.

The Post Office—Was established during the year 1843, with Alfred Wood as Postmaster, and has been continuously operated up to the present day. Mr. Wood, it is believed, was followed by Matthew Van Vleck and others, including B. Cornelison, S. Sampson, etc., the latter being the present incumbent. Communication is had daily with Chicago, Dubuque and other distant points, as also with neighboring towns and villages.

St. Clara Academy.—One of the most celebrated schools in the United States is located in Jamestown Township, two miles east of Fair Play, and enjoys a reputation as universal and substantial as that of the State itself. It was founded by Father Samuel Mazzuchelli, an eminent prelate identified with the cause of Christianity in the West from its birth in that section, and esteemed by his cotemporaries and succeeding generations not less for his piety and goodness of heart than for his enterprise and liberality.

Thirty and seven years ago, in an almost trackless wilderness, with little to inspire and less to encourage, Father Mazzuchelli laid the foundation of an institution already famous as the *alma mater* of scholars of both sexes, who, since their graduation, have contributed to the enlightenment of the world, the domestic fireside, and the building-up of a higher order of civilization than that which previously existed.

In 1844, Father Mazzuchelli began the negotiations for the property on which the Academy is now situated. It occupies one of the most beautiful and picturesque sites in the State, and its extensive grounds, with their beautiful adornments and surroundings, seem to breathe the air of peaceful seclusion, which ever exerts so powerful an influence over the moral, physical and intellectual life.

At the time of which mention is made, the grounds belonged to Gen. G. W. Jones, now of Dubuque, Iowa, and consisted of about 300 acres. Father Mazzuchelli desired to obtain them for the establishment of a home for the missionaries of the Order of St. Dominic, a relig-

ious order now of six hundred years standing, which has given so many saints to the church, and which has been approved and confirmed by the most eminent Popes who have directed the affairs of the Roman Church.

These negotiations culminated in the purchase of the property, and, on October 3, 1844, the deed of transfer was executed at Galena.

The following year, a church, which had occupied a site in the vicinity, was taken down and removed to the mound, where it was rebuilt, christened St. Dominic Church, and dedicated to the service of God by Rt. Rev. Bishop Henni, the Rev. Father Mazzuchelli saying mass upon the occasion.

In 1846, a college was established by the order, the east end of the present stone structure and the former residence of Gen. Jones being utilized to collegiate purposes. In 1849, Father Mazzuchelli transferred the property to the Dominican Fathers of St. Rose Convent in Kentucky, and going to Benton, La Fayette County, began the building-up of the present academy, which was duly chartered three years later.

The college was continued until 1867, when the Dominican Fathers disposed of their property to W. and J. Ryan, of Galena, for \$30,000, and returned to Kentucky. Thereupon the Sisters of the Third Order of St. Dominic came from Benton, and, purchasing the improvements with 250 acres of ground from the Messrs. Ryan, formally established the academy. Since they have had charge, the old buildings have been entirely remodeled and improved and new buildings added, including the exhibition hall, at a cost of not less than \$30,000. During the current year, so contracted had the old quarters become that it was found necessary to again enlarge, and the Sisters completed the building of a structure which, for the purposes mentioned, is unsurpassed by any similar undertaking in the country. It is of brick, 60x112, three stories high, like the remainder of the buildings owned by the order, heated by steam and furnished with every available improvement that will, even remotely, contribute to the comfort and health of the pupils or their faculty in the acquisition of knowledge. It cost a total of not less than \$50,000, and with the improvements and grounds, the latter, aggregating 340 acres, will make a total representing \$500,000 in value.

The school occupies a position for health and other excellences unrivaled by those of any similar undertaking. Almost at the base of that celebrated landmark, Sinsinawa Mound, yet sufficiently elevated to command a view of the country for miles around, its location is no less desirable from a sanitary point of view, than for other reasons, which will readily suggest themselves. The course of study requires an attendance of four years, of three terms each, and the curriculum embraces the substantial and elegant branches of English and foreign literature. In addition to these, facilities for securing a musical education are complete and unsurpassed, and, with the numberless accessories commanded by the academy its value as an institution of learning cannot be too highly estimated.

During the scholastic year of 1880 and 1881, seventy young lady pupils were enrolled upon the roster of daily attendants. The business of the academy is managed by Mother Emily (assisted by a corps of teachers), a lady possessing innumerable accomplishments and remarkable executive ability, and the institution is not only an honor to the county but to the cause of education and the constituency which extends its support.

CASSVILLE.

The first mention made of the present site of Cassville is by Mr. Shaw, a boatman on the Mississippi, who stopped at this point to bargain for a freight of lead ore on his trips down the river between 1816 and 1820. It would seem from this that there were habitations here at that time of French and Indians, but, as Shaw was obliged to go to Fever River for his lading, the probabilities are equally strong that no mining that could be dignified by the name was done here at that time. The next few years the place was undoubtedly deserted, as Mr. Thomas Hymer, as related by Mr. James Grushong, stopped at Cassville for some time in 1824, on his return from a trip to the Selkirk Settlement, occupying a deserted cabin, there being no other occupants

there at that time. The first signs of settlement came in 1827. Mr. Orris McCartney in his recollections, says: The first furnace was built at Cassville by Judge Sawyer; Tom G. Hawley built the first house at the same time. The next link in the chain of evidence is furnished by Mr. Levi Gilbert, who came to Cassville in 1827, and states that Judge Sawyer erected his furnace that year, and "was to give a free Fourth of July dinner, but hearing of Indian troubles decamped July 3." These statements place the probable date of settlement in that year.

The following year quite a number of new ones came in, among them Orris McCartney and Alexander Ramsay; Henry Hodges and Thomas Shanley are also reported as coming this year. Those who came, however, did not remain long at this time with the exception of Mr. Ramsey. Between this date and 1831, but very little is known of the young settlement. In the last-named year, Maj. Glendower M. Price arrived at the little settlement with his young bride, and bringing with him an extensive line of goods, with which he opened the first store in Cassville, in a building on the bank of the river standing on the present site of Grimm's warehouse. The log dwelling house of Maj. Price stood on the ground now occupied by Geyer's warehouse, while between them stood afterward the "block-house" that served as a place of refuge for so many early settlers during the troubles of 1832.

The following description of early life in Cassville, by Mrs. A. J. Long, will present to the reader's mind in vivid colors the scene as it appeared to Maj. Price and his newly-wedded bride upon their arrival in 1831:

"Going West was not then what it is now. The trip that is now made in a few days, then took months of travel by steam, canal and stage. The boat in which they ascended the Mississippi lay six weeks on the rapids. It was the old Science, the first that landed at Cassville. There were in the place a few log dwellings, and one building put up for a store, on the shelves of which was soon arranged the stock of goods which had been brought on from Philadelphia. The country was yet in its primeval wilderness. Lancaster, the county seat of Grant County, was, at that time, not thought of, while between Cassville and Prairie du Chien there was but two or three farms. To the young and beautiful wife, fresh from the city, the wild, free life, with the grand and imposing scenery, had a charm that could not be furnished by city life. The bright, new dream was soon to be dispelled by the breaking-out of the Black Hawk war, which turned the previous enjoyment into a feeling of anxiety as the dangers that surrounded the young settlement became apparent. Maj. Price was one of the early pioneers to whom the friendly Indians looked for protection during the troubles of 1832. They stood in mortal fear of the Sacs and Foxes. Maj. Price, having on one occasion been called to Prairie du Chien on business, left his wife in charge of the block-house which had been erected. Into this all the women and children, except Mrs. P., crowded at the least approach of danger. Late in the evening, of the day on which Maj. P. left home, there was heard by the whites and Indians a long, low whistle peculiar to the hostile Indians. There was an instant stampede and the little fort was soon full. The poor, frightened Indians came crowding around 'Capt. Price' (as they loved to call Mrs. Price), begging her to protect them from their foes, not thinking of her own danger. She let them in, and barred her doors and windows, and there, in her big log kitchen, she counted upward of fifty Indians, men, women and children; but, before midnight, they were relieved of their fear. The whistling had been done by a mischievous fellow, who wanted to see how the people would act in case of an attack. All was explained to the frightened savages, and they were prevailed upon to vacate Mrs. P.'s kitchen and return to their wigwams. It would have been a hard task, had not the scouts come in and reported the hostile Indians at least twenty-five miles distant.

"At another time during the war, when Maj. P. was from home, the alarm was given that a large body of Indians were preparing to surprise them the next night. Not knowing what would become of them with so few protectors, Mrs. P. wrote an order to the commanding officer at Prairie du Chien for more soldiers, and ordered a man to mount a swift horse and set out immediately. All night long the lady walked the floor, her mind harassed by fear of the Indians, and chagrin lest it was a false alarm. Early the next day the soldiers arrived with one of their superior officers. Mrs. P. had found out by this time that it was a false alarm, and

made every apology for causing the officer and his soldiers so much trouble. But he would not listen to her, telling her that her courage and forethought alone would have saved the helpless inhabitants from certain death.

"Often, when a little girl, have I heard one of those pioneers (Maj. Anderson) tell the following incident: There were a small number of Sac Indians and whites, who accidentally came across each other near the Wisconsin River. The order was given to shoot all men, women and children. Among others, he himself shot a boy about ten years old who was eating honey with a spoon out of a hollow tree. He shot off the boy's hand which held the spoon. As soon as the spoon fell, the boy picked it up with the left hand and again commenced eating honey, taking no notice whatever of the mangled arm.

"In the month of June, 1834, Mrs. Price's sister and husband and two children arrived in Cassville, direct from Philadelphia. The husband and wife were very young. The oldest child two years, and the youngest (your humble servant) just three months. It was 10 o'clock in the forenoon when the boat landed. Mrs. Forbes and her husband and children were met on the sandy shore by Maj. Price, who was quite surprised to see them, they not being expected until fall. 'How surprised sister Harriet will be,' said Mrs. Forbes. 'Indeed she will,' said the Major. Mrs. Forbes's attention was arrested by a queer looking figure advancing toward her. It was a woman dressed rather plain, in fact, quite common, barefooted, and with a tin pan held over her head. Mrs. Forbes stood perfectly still thinking she saw a crazy woman. The woman still advancing sideways, with her hand held over her brow the better to see the strangers. Presently she threw down the pan, and starting on a run to her own house, crying out, 'My sister Anna has come! Anna has come!' Presently her excitement cooled down, and she went to meet her sister and almost smothered her and the little ones with kisses. After the first greetings were over her sister said, 'Do the ladies in the West wear tin pans on their heads in place of bonnets, as I saw you.' 'Oh, no, I was going to gather greens for dinner.' Walking into the parlor, Mrs. Price introduced her sister to the visitors, who were present, they almost forgetting to acknowledge the introduction, so busy were they gazing at the pretty young lady dressed in the latest style.

"Presently dinner was announced. The table was set in the big log kitchen. When they were all seated, the next thing to notice was the bill of fare. This Mrs. Forbes did, and the result was as follows: Bacon and greens, bread and butter. She was highly amused at this company dinner, but soon found it was about all the country afforded. Butter was \$1 per pound, and eggs 50 cents per dozen.

"'Didn't you get homesick before you got acquainted with your neighbors?' asked Mrs. Forbes, after their guests had gone. 'Not much, old Macwa and I were such good friends.' 'Who is that?' said her sister. 'Oh, he is only a tame bear we got of the Indians. He and I go walking up the river bank every day. A few days since we went to walk on the river bank. I was in no hurry to race as usual with him, so concluded to take my own time. After awhile we started, and he, in his glee, caught hold of my dress, and before I was aware of it, away he flew with the whole skirt of my dress fluttering in the breeze as he ran.'

"Next morning after breakfast Mrs. Price sat her churn, filled with cream, on the porch, intending to churn at once. She stopped to say a few words to her sister, when she heard a queer sound, and running to the door she saw Mackwa with the churn turned over and he lapping up the rich cream as fast as he could, while his head and shoulders were covered with it; he had eaten out of the churn as long as he could reach it, and when he could not reach it any longer he turned it over on the floor.

"Another day some clabbered milk was given to the bear. Now Mackwa was very fond of clabber; while he was eating, a little pig came to help him; he caught the pig in his paws. Mrs. Price heard the pig squeal and ran to the rescue, but it was too late. The squeels came fainter and fainter from poor piggy, till Mackwa, satisfied that the pig would do no harm, laid it down and went on with his clabber.

"Soon after the close of the war, an old Indian chief, War Eagle by name, came to see Maj. Price, bringing his grandson, a little four-year-old, with him. The chief soon made known by signs and broken English, that he wanted to sell the child, and the old man's price for his grandson was just two bottles of whisky. And he actually sold him to the Major for the whisky.

"Wisconsin must have been colder then than now, for I have heard more than one pioneer say, that the coffee which would be spilled in the saucer would freeze hard before the family were through with breakfast, and with great blazing fires at that. People used fire-places, there were no stoves in the country then. Provisions were scarce forty years ago. They could only get sour flour and tainted pork, and had to pay \$30 per barrel at that.

"Mrs. Price's sister was so afraid of Indians when she first came West, that she would fairly scream at first sight of one. But before the year passed, she often went into the country to spend the day, leaving the baby (the writer of this) in charge of an Indian woman, whom she well knew, would spend the day in all probability in a wigwam with her Indian friends. The presence of the soldiery at Prairie du Chien was needed for a long time, and, being acquainted with Maj. Price, were always invited to the latter's table whenever they chanced to be in Cassville. Upon one visit of this kind, Mrs. Price, having no girl, waited upon the table herself. One of the military gentlemen, being young, good-looking and vain, endeavored to make the acquaintance of the pretty waiter girl, and in order to further his desires, displayed a splendid gold ring which he wore, in as conspicuous a manner as possible behind his chair whenever the *ci devant* waiter girl passed near him. Fortunately for his equanimity, he never found out that the lady to whom he displayed his egotism and ring was Mrs. Price herself. At another time, a fine-looking officer called to see Maj. Price. Mrs. Price, again having no hired help, was busily engaged scrubbing her kitchen. The officer knocked at the door and asked if the Major was at home. He was not, and so the gentleman was informed. 'Is Mrs. Price at home?' was the next question. Not wishing to be known, as she was looking so badly, the instant reply was, 'No, sir.'

"'Well, what may your name be?' was the next remark.

"'Peggy, sir.'

"'Well, Peggy, you are a denced nice girl, anyway.'

"The officer walked out, but soon returned to make more minute inquiries, and by way of recompensing Peggy for hindering the scrubbing, offered her a kiss and a large apple. She declined the kiss but accepted the apple. Frequently during her husband's absence, Mrs. Price was obliged to run into the store (which stood close to the dwelling-house), by the back door, to wait on some rustic neighbor who could not wait till the Major's return. She was called to open the store a few moments after the officer stepped out. Among others, the officer lounged into the store. Directly a neighbor came in and said, 'Good morning, Mrs. Price, I would like to get some nails.'

"Mrs. Price's face turned scarlet. The officer looked at her a moment, and then went to her and asked her why she called herself Peggy. She told him it was because she was looking so badly. Every apology was made that could be, she readily excusing him, declaring that she ought not to have misled him.

"This same pioneer aunt is an old lady now. She is living in Missouri. She went there four years prior to the breaking-out of the rebellion, and as a matter of course, passed through trials at the time of the war. Being a strong Union woman, she often had trouble with the rebels, but she stood firm and came out all right. Hers has been a life filled with stirring events; a true pioneer life. May peace and quiet crown her declining years, and blessings be in store for her for the untold good she has done for many poor suffering ones."

Among those who came about this time were Col. Landers, Mr. Rich Ray and William W. Weyman. Ray had entered or pre-empted the southwest quarter of Section 20. Col. Landers had a claim at the mouth of the hollow. Maj. Price, after his coming had pre-empted and entered Section 29. The most of the above-named had gone away by 1836, which date marked the first "boom" felt by Cassville. As has been stated elsewhere, Southwestern Wisconsin

had, at this time, "great expectations" in regard to securing the capital of the territory within its borders, making each little burg for the time being a center of interest and a prominent factor in the solution of the new problem. Added to this was an era of speculation the like of which has not since, nor is it likely ever will be, seen in this country. Under these circumstances, a partnership or company organization was formed between several Albany and New York gentlemen, who purchased the Ray and Price pre-emptions, with the exception of three lots reserved by the latter where his store and dwelling stood, and commenced the village of Cassville.

Prominent in the plans of improvement was the erection of a mammoth hotel, which the proprietors fondly hoped would shortly furnish quarters to numerous honorables and all the hangers-on and officials which usually do congregate in State and Territorial capitals such as it was then expected Cassville soon would be. Under these circumstances, the Denniston House was commenced in the spring of 1836. It was located upon what was known as the Price pre-emption, the Ray pre-emption being at that time in litigation. But few buildings stood at time upon the site of the present village. Opposite the present residence of Dr. Cronin stood a tavern erected years before, and at this time kept by Capt. Estes and Capt. Reed. This, with the buildings of Maj. Price and a few other log cabins used for different purposes, were the only signs of a town then showing up. The new building was pushed forward during the year. By the next year the wing had been completed, and the main part well advanced. Cassville had, however, failed to secure either territorial or county honors, and following upon this came the panic of 1837, which for many years paralyzed the industries of the country, and put an effectual stop to all improvement. The property afterward became the bone of much contention between the proprietors, which effectually prevented any settlement in the new town. In 1838, Mr. Luther Basford erected a dwelling in the town followed shortly by others. Among the early experiences in the young town, Mr. Basford relates the following: "The only law we had in those days (1836-37) was that dispensed by Judge Lynch's court. While at work upon the hotel, a discharged soldier was employed to cook for the company's hands. One evening it was discovered that some clothing, together with a razor, had been stolen from one of the men. Suspicion fell upon the cook, and a committee was appointed to examine his effects, the result being a confirmation of the suspicions by a discovery of the stolen goods. A court was organized, the man furnished with counsel, and a fair trial was given him. After hearing all the evidence in the case, the jury pronounced the prisoner guilty, and he was sentenced to receive twelve lashes on the bare back, the lashes to be laid on by the man owning the property stolen. After receiving his punishment, the fellow was ordered to leave town, which hint he was not slow in taking, and that was the last we ever saw of him. Another case came up soon after, where we had the satisfaction of meeting out justice to a different kind of an offender. This man was a drunken, worthless scamp who lived upon his wife's earnings, and pursued a systematic course of brutality toward her. One Sunday evening we were startled by cries of 'Murder!' proceeding from the cabin occupied by them. Upon reaching the house, we found the fellow engaged in beating his wife in a brutal manner. We did not stop to inquire further, but took the ruffian out, thrust a rail between his legs, and treated him to a free ride about town. Having punished him in this manner for a time, we then took him to the Furnace Branch, which was covered with a thin coating of ice, and 'dipped' him several times, after which it was suggested that his room was better than his company, and if he had any regard for his health he would get out of town as soon as possible, and not again return under a promise of a repetition of the same treatment with variations. He left and that was the last we ever saw of him."

Among those who erected cabins about the same time as Mr. Basford, were Messrs. Manahan and McNamee. A few others came in, increasing the list slowly, but a blight seemed to have settled over the place; the streets became filled with dog-fennel instead of being worn by the feet of tradesmen and customers. Says one early settler: "In 1842, the only path in the place was from Richard Hamer's store to his house." A new era soon opened up, and the next year a change for the better was noticeable. A correspondent of the *Grant County Herald*, speaking this year (1843) of Cassville and its prospects past, present and future, says:

"Cassville owes its existence to the stirring enterprise and memorable folly of 1836. It is situated in Section 20, Township 3 north, of Range 5 west, upon the bank of the Mississippi, upon a point entirely free from islands, and upon the margin of a beautiful plain nearly half a mile in width, and bordering the river for miles. This plain, which rises just sufficiently above the river to afford the utmost facilities of a landing, and be at the same time forever guarded against the possibilities of inundation, appears to the eye a perfect flat, but in reality rises to a very considerable, though an extremely uniform grade. The plain is terminated with a bluff of singular variety and beauty. Considered vertically, it presents three sections entirely different from each other, and remarkable for the extent to which this difference is preserved. The first section, rising to an angle of about fifty degrees, and to a height of seventy or eighty, is entirely grass-covered and appears from the town a surface of almost exact uniformity. The next is a belt of rock forty or fifty feet in width, varying only from a perpendicular elevation by a gradual falling back of the successive strata. The last section, which varies from fifty to one hundred and twenty-five feet in height, makes up a community of scenery at once noble and enchanting. Connect this scenery with the broad unruffled river, the bright foliage with which the extensive bottom bordering its opposite shore, is covered, all richly and harmoniously blended, and we have before us a site over which no point upon the Mississippi is at liberty to boast.

"The village commenced in 1836, declined in 1837, and was nearly deserted in 1838. It has revived this year, and is now speedily and steadily filling up, already numbering a population of 125. The town comprises twenty-five good dwelling-houses, and several stores and offices, exclusive of a building erected by the proprietors of the town, and by them designed for a place of entertainment. The dimensions of the wing of this mansion, composed of wood, are 26x60, three stories in height. The main building, of brick, is 50x55, five stories high, its stateliness comporting well with the grand scenery about."

Notwithstanding the confident tone of the above, the growth of the town was very slow from this time forward until 1855. The wildness of the country about gave rise to numerous adventures with the wild-eyed denizens of the forest, one of which is thus related by Mr. Daniel R. Burt, one of the early pioneers: "I often had occasion," says Mr. Burt, "to pass from one settlement to another, frequently in the night, and on such occasions it was not unusual to have the company of several wolves. When on horseback, armed with a pistol and club, it was not difficult to keep them at a proper distance, but when on foot and alone, with no fire-arms, they were not pleasant companions, as I can attest from an experience in the winter of 1838. At that time the snow was about eighteen inches deep, having a sleet crust over it of sufficient strength to bear the weight of a man. I happened to be at McCartney's, near Cassville, and pressing business with a man by the name of Thompson, residing not far from the present village of Patch Grove, forced me to travel over the intervening distance late in the winter's day. It was in fact about dusk when I commenced my journey, and I had not traveled over two miles before I came upon two large gray wolves, that appeared more fond of my company than I was of theirs. They continued to follow me, keeping from fifteen to twenty yards in my rear, with no signs of withdrawing. I unfortunately had no fire-arms, my only weapons being a dirk-knife with a five-inch blade, and a stout stick. These I carried ready for instant service, and thus we traveled over the hard white crust, the wolves keeping about the distance named above. Occasionally I would turn on them with my knife and club and a yell that would not have disgraced a Sioux Indian, when they would retreat for a short distance, but as soon as I turned they would turn also, and again follow me. At times, however, when I passed over inclinations so great that I could not keep my feet, these white-teethed howlers would rush up on me, sometimes coming within five or six yards before I could regain my footing, when they would again retreat. I took pains after one or two experiences of this kind, to avoid ground of this nature, although it carried me somewhat from my course. I found, much to my pleasure that my repeated assaults was telling on my adversaries, and as discovered they were losing courage I regained mine and turned on them the more frequently. After having

followed me a distance of some seven miles, they gradually allowed the distance between us to increase until finally we parted company for good, much to my relief, and I reached my destination without further annoyance. The honor of a repetition of an escort of this kind was never coveted. Having passed the greater portion of my life upon the frontier, I have always regarded this as the most thrilling of my experiences."

The town continued to lay under the ban of litigation until the year 1856, when the "Brunson interest" was purchased by ex-Gov. Dewey, who proceeded with customary energy to build up the stagnant village. A correspondent, writing of the rapid progress made this and the succeeding years, said: "Until July, 1855, no title could be secured to town lots, and all building improvements were hardly contemplated until after that time. The amount of money expended on improvements during the last year is not a small item for a town no larger than this. In the course of the past fifteen months, we have expended \$65,000." Another writer at a later date, says: "The population in May, 1855, was 149. In December, 1856, it was 421. The original cost of the Denniston House was \$45,000. Gov. Dewey put on it \$15,000. In 1856, the town had three stores, three hotels, three saloons, three blacksmith-shops, one wagon-shop, two cooper-shops, two shoe-shops, and two tailor-shops, one hardware store, one cabinet-shop, and several carpenter and joiner shops. About \$6,000 has been expended upon the levee. In 1858, the population numbered over 600. The township was quite large, polling 330 votes. There were three mercantile firms doing a business of \$200,000 annually, three large warehouses, a smelting furnace, a steam saw-mill, cutting at the rate of 10,000 feet per day, a brewery, and fifty other buildings. But one church, (Catholic, built early that year), and two hotels besides the Denniston."

From this period on, the growth of the village has been steady, though at times, quite slow. It is a favorite shipping point for a large section, and at present contains two excellent general merchandise stores, and four others of lesser capacity, four blacksmith and wagon shops, two tailor-shops, one bakery, one saddler's shop, two milliner's shops, five saloons, one furniture-shop, one hardware store, two boot and shoe stores, besides a steam saw-mill. For many years Cassville included among its business institutions a brewery, but lately this has not been operated. The health of the village is cared for by two physicians, both of the old school style of practice. The first man of medicine to locate in the town, when in its infancy, was Dr. Hull, who afterward removed to Potosi, where he died.

SCHOOLS AND CHURCHES.

Catholic Church.—This church was erected early in 1858, services, previous to its erection, being held in the schoolhouse. The building was not fully completed until a later date. The first priest in charge of the parish was Father Powers. Upon his retirement, Father Zuiber followed as priest in charge. In 1872, owing to the long distance many of the members had to come to attend divine worship, a division movement was inaugurated, which resulted in a church being built on "the ridge," in that year. The year following, the congregation divided, those living near the newly-built church attending divine worship thereafter at that place. The present Pastor of the church at Cassville is the Rev. Father Gardhaus.

Baptist Church.—December 1, 1875, the first organization of the present Baptist Church was effected. The original members were Mr. D. B. Stevens, Mrs. D. B. Stevens, Mrs. M. Stevens, Mrs. Pugh, Mrs. Anton Engels, Mr. F. W. Bartlett, Miss Alice Cannon, Miss Annie Crouch, Miss Lucy Bishell. The first officers elected were: Deacon, D. B. Stevens; Clerk, F. W. Bartlett; Treasurer, D. B. Stevens. From the date of organization up to 1880, the Sabbath services were held in the basement rooms of the Denniston House. In the above year, work was commenced upon the present church edifice, a plain but neat building of red brick. Operations were carried rapidly forward, and October 2 and 3, 1880, the dedication ceremonies took place. The first Pastor was the Rev. Stevens, of Bloomington, who served as such until the fall of 1880. The present Pastor is the Rev. William Clack, of Prairie du Chien, who divides his time between that charge and Cassville.

The officary at present is as follows : Pastor, Rev. William Clack ; Trustees, Nelson Dewey, Samuel Okey, D. B. Stevens, F. W. Bartlett, Anton Engels ; Deacon, D. B. Stevens.

Educational.—The first schoolhouse was built on Section 16 previous to 1836. It was built of logs after the style of these earlier institutions of learning. Split “puncheons” formed the floor, the ragged edges of which left full many a crack through which the summer breezes could whistle. The first teacher whose name still lingers in the hearts of the earlier settlers is Miss Elizabeth Walker. To this lady there happened during her occupancy of the rude educational throne an experience at once startling and nearly fatal. Through one of the numerous cracks in the puncheon floor Miss Walker dropped her thimble. Stretching down her hand to recover it, she was suddenly bitten twice by a rattlesnake. Realizing at once her danger, she started for the village, where medical treatment was at once brought into requisition, with the result that the lady’s life was saved. Not caring for any further incidents of this kind, the floor was torn up by the settlers, and the venomous reptile killed in his hiding-place. School was also held in the “Council House,” a building erected by the company for town purposes previous to the building of the “Yellow Schoolhouse” in 1845. This building, which stood one block north of the Denniston House, served for many years as the guiding road to the mysteries of hidden learning. In 1860, the village had outgrown this modest structure, and the main portion of the present building was erected. This in turn was found too cramped quarters for the fast-coming youngsters, and some years later an addition was built, which, when completed, furnished Cassville with one of the finest school buildings in the county. Three teachers are at present employed, the Principal being Mr. Knapp.

TOWN ORGANIZATION.

Cassville was organized as a town in 1849, it being one of the original towns of the county. It at that time embraced, besides its present limits, the town of Glen Haven. In 1859, it was divided, the present town of Glen Haven being set off as a new town, leaving Cassville’s boundaries as at present defined. The first town-meeting was held at the Cassville House, on Tuesday, May 3, 1849. J. M. Scott was elected Chairman, and E. H. Gleason, Secretary. On motion, the Chair appointed a committee of five, namely, Oris McCartney, I. C. Lander, E. H. Gleason, Luther Basford, and A. D. Ramsey, to make nominations for the several town offices, who, after being out a short time, selected a list of officers to be voted for. James M. Scott, Lewis Reynolds, and J. McDonald, were appointed Inspectors ; and E. H. Gleason, with H. G. Patrick, Clerks. Below is given a list of town officers from this date up to the present time :

1849—Supervisors, Oris McCartney, Chairman, M. K. Young, John Dodge ; Clerk, G. M. Price ; Treasurer, C. A. La Grave ; Superintendent of Schools, William Pollock ; Assessor, A. D. Ramsey ; Justices of the Peace, C. L. La Grave, I. C. Lander, James M. Scott, G. M. Price ; Constables, William Winney, Samuel Winsor, Samuel Becket, J. M. Castner.

1850—Supervisors, L. Basford, Chairman, J. Dodge, C. L. La Grave ; Clerk, G. M. Price ; Treasurer, James M. Scott ; Assessor, S. Higgins ; Superintendent of Schools, J. Dodge ; Justices of the Peace, G. M. Price, H. H. Ray ; Constables, Charles Wamsley, W. Pollock, J. Scott, W. J. Winney.

1851—Supervisors, C. A. La Grave, Chairman, L. S. Reynolds, T. C. Scott ; Clerk, A. A. Bennett ; Treasurer, James M. Scott ; Assessor, Oris McCartney ; Superintendent of Schools, M. K. Young ; Justices of the Peace, C. A. La Grave, H. Catlin (E. Kidd, to fill vacancy) ; Constables, Charles Wamsley, S. Winsor, W. J. Winney.

1852—Supervisors, Thomas C. Scott, Chairman, L. S. Reynolds, Thomas Rogers ; Clerk, A. A. Bennett ; Treasurer, L. Basford ; Assessor, Oris McCartney ; Superintendent of Schools, M. K. Young ; Justices of the Peace, William Curtis, H. B. Goodman (A. A. Bennett, to fill vacancy) ; Constables, Charles Wamsley, W. Winney, William Frashier.

1853—Supervisors, John D. Harp, Chairman, W. M. Scott, Thomas Rogers ; Clerk, A. A. Bennett ; Treasurer, L. Basford ; Assessor, Oris McCartney ; Justices of the Peace, C. L.

La Grave, L. S. Reynolds, A. A. Bennett; Constables, J. H. Crawford, W. J. Winney, Charles Wamsley.

1854—Supervisors, John D. Harp, Chairman, M. M. Scott, D. Tarter; Clerk, A. A. Bennett; Treasurer, L. Basford; Assessor, Orris McCartney; Superintendent of Schools, Douglas Oliver; Justices of the Peace, J. D. Harp, Orris McCartney; Constables, W. J. Winney, C. Wamsley.

1855—Supervisors, J. D. Harp, Chairman, D. Tarter, W. J. Winney; Clerk, William Curtis; Treasurer, N. Goodenough; Assessor, M. M. Scott; Superintendent of Schools, A. A. Bennett; Justices of the Peace, C. L. La Grave, A. A. Bennett; Constables, M. Metcalf, J. Browning, W. J. Winney.

1856—Supervisors, John D. Harp, Chairman, W. J. Winney, Henry Burgess; Clerk, William Curtis; Treasurer, N. Goodenough; Assessor, Orris McCartney; Superintendent of Schools, M. K. Young; Justices of the Peace, J. D. Harp, Orris McCartney (J. H. C. Snelode, to fill vacancy); Constables, M. Metcalf, T. C. Sovereign.

1857—Supervisors, William P. Dewey, Chairman, Henry Burgess, Mat. Metcalf; Clerk, R. Thomas; Treasurer, William Curtis; Assessor, John Coombs; Superintendent of Schools, M. K. Young; Justices of the Peace, William P. Dewey, A. A. Bennett (H. Burgess, to fill vacancy); Constables, M. Metcalf, H. W. Palmer, William Clement.

1858—Supervisors, William P. Dewey, Chairman, Henry Burgess, E. A. Kidd; Clerk, L. S. Mason; Treasurer, W. Curtis; Assessor, John D. Harp; Superintendent of Schools, L. S. Mason, Justices of the Peace, J. D. Harp, Henry Burgess; Constables, W. A. Brenner, Mat. Metcalf, William Clement.

1859—Supervisors, John D. Harp, Chairman, W. J. Winney, L. M. Okey; Clerk, L. S. Mason (remainder of record missing).

1860—Supervisors, William P. Dewey, Chairman, John Geiger, Enoch Groom; Clerk, L. S. Mason; Treasurer, Sam Morris; Assessor, Henry Burgess; Superintendent of Schools, A. R. McCartney; Justices of the Peace, Henry Burgess, F. M. Waldorf; Constables, John H. Dickenson, Jonas Halstead, Henry Hanger.

1861—Supervisors, William P. Dewey, Chairman, John Geiger, Enoch Groom; Clerk, L. S. Mason; Treasurer, J. H. C. Snelode; Assessor, James Wilson, Jr.; Superintendent of Schools, H. E. Young; Justices of the Peace, C. D. Frankenfeld, F. M. Waldorf; Constables, W. B. Morgan, William Maywald, Henry Hauger.

1862—Supervisors, Henry Burgess, Chairman, Thomas Grattan, William Schmitz; Clerk, L. S. Mason; Treasurer, J. H. C. Snelode; Assessor, H. Burgess; Justices of the Peace, H. Burgess, C. R. Smith, L. M. Okey; Constables, H. Grimm, W. E. Groom, A. King.

1863—Supervisors, Nelson Dewey, Chairman, John Geiger, Enoch Groom; Clerk, J. H. C. Snelode; Treasurer, C. L. Lagrave; Assessor, H. H. Ray; Justices of the Peace, L. M. Okey, J. H. C. Snelode; Constables, H. Grimm, H. Hauger, W. E. Groom.

1864—Supervisors, Nelson Dewey, Chairman, J. Geiger, Enoch Groom; Clerk, J. H. C. Snelode; Treasurer, C. L. Lagrave; Assessor, Thomas Grattan; Justices of the Peace, Henry Burgess, Aug. Taggart; Constables, H. Grimm, W. E. Groom, H. Hauger.

1865—Supervisors, Nelson Dewey, Chairman, J. Geiger, Enoch Groom; Clerk, J. H. C. Snelode; Treasurer, C. L. Lagrave; Assessor, J. D. Harp; Justices of the Peace, L. M. Okey, J. D. Harp; Constables, H. Grimm, Henry Seipp, W. F. Rice.

1866—Supervisors, Nelson Dewey, Chairman, J. Geiger, E. Groom; Clerk, J. H. C. Snelode; Treasurer, John Bernhard; Assessor, J. D. Harp; Justices of the Peace, H. Burgess, L. S. Mason; Constables, Henry Seipp, W. F. Rice, C. Brown.

1867—Supervisors, Nelson Dewey, Chairman, H. Burgess, J. Geiger; Clerk, L. S. Mason; Treasurer, John Bernhard; Assessor, J. D. Harp; Justices of the Peace, J. D. Harp, L. M. Okey, Fred Neife (to fill vacancy); Constables, H. Seipp, Otto Korschbaum, P. Baumgartner.

1868—Supervisors, Nelson Dewey, Chairman, W. M. Larnard, H. Seipp; Clerk, F. P.

Liscum; Treasurer, J. Bernhard; Assessor, J. D. Harp; Justices of the Peace, H. Burgess, J. Frohmann; Constables, A. Petermann, S. Adrian, W. F. Rice.

1869—Supervisors, Nelson Dewey, Chairman, H. Seipp, W. M. Larnard; Clerk, F. P. Liscum; Treasurer, Julius Baumgartner; Assessor, J. D. Harp; Justices of the Peace, James R. Bark, L. M. Okey; Constables, A. Petermann, H. Hauger, John Plimpton.

1870—Supervisors, John Geiger, Chairman, Orris McCartney, John Bernhard; Clerk, Henry Burgess; Treasurer, J. Baumgartner; Assessor, J. D. Harp; Justices of the Peace, H. Burgess, J. Frohmann; Constables, P. Baumgartner, C. Keirschbaum, J. Plimpton.

1871—Supervisors, H. Grimm, Chairman, O. B. McCartney, J. Bernhard; Clerk, H. Burgess; Treasurer, E. C. Forbes; Assessor, J. D. Harp; Justices of the Peace, J. D. Harp, L. M. Okey; Constables, P. Baumgartner, A. Grimm, H. Seipp.

1872—Supervisors, H. Grimm, Chairman, O. B. McCartney, Charles Kleinpell; Clerk, H. Burgess; Treasurer, E. C. Forbes; Assessor, J. D. Harp; Justices of the Peace, O. B. McCartney, R. Thomas; Constables, John Engler, John Plimpton, A. Key.

1873—Supervisors, H. Grimm, Chairman, O. B. McCartney, C. Kleinpell; Clerk, H. Burgess; Treasurer, A. Grimm; Assessor, J. D. Harp; Justices of the Peace, J. D. Harp, H. Burgess; Constable, W. F. Rice, A. Key, W. Derisch.

1874—Supervisors, H. Grimm, Chairman, C. Kleinpell, L. M. Okey; Clerk, H. Burgess; Treasurer, A. Grimm; Assessor, J. D. Harp; Justices of the Peace, J. H. C. Sneclode, William Klinkhammer; Constables, A. Key, John Engler, J. Plimpton.

1875—Supervisors, H. Grimm, Chairman, L. M. Okey, H. Abrath; Clerk, H. Burgess; Treasurer, A. Grimm; Assessor, J. D. Harp; Justices of the Peace, H. Burgess, G. H. Groom; Constables, T. Teasdale, W. F. Rice, G. Shrader.

1876—Supervisors, H. Grimm, Chairman, H. Seipp, H. Hanger; Clerk, H. Burgess; Treasurer, A. Grimm; Assessor, J. D. Harp; Justices of the Peace, J. H. C. Sneclode, William Klinkhammer; Constables, T. Teasdale, J. B. Ortscheid, W. F. Rice.

1877—Supervisors, H. Grimm, Chairman, L. M. Okey; Enoch Groom; Clerk, H. Burgess; Treasurer, A. Grimm; Assessor, J. D. Harp; Justices of the Peace, H. Burgess, G. H. Groom; Herman Seipp (to fill vacancy); Constables, J. B. Ortscheid, T. Teasdale, J. Gedartz.

1878—Supervisors, H. Grimm, Chairman, E. Groom, L. M. Okey; Clerk, H. Burgess; Treasurer, A. Grimm; Assessor, J. D. Harp; Justices of the Peace, J. H. C. Sneclode, H. Hauger; Constables, J. B. Ortscheid, T. J. Ishmael, W. T. Rice.

1879—Supervisors, H. Grimm, L. M. Okey, E. Groom; Clerk, H. Burgess; Treasurer, A. Grimm; Assessor, J. D. Harp; Justices of the Peace, H. Burgess, G. H. Groom, H. Seipp (to fill vacancy); Constables, J. B. Ortscheid, L. J. Ishmael, Joseph Barrow.

1880—Supervisors, H. Grimm, Chairman, L. M. Okey, E. Groom; Clerk, H. Burgess; Treasurer, A. Grimm; Assessor, J. D. Harp; Justices of the Peace, H. Seipp, J. B. Ortscheid; Constables, Joseph Barrow, William McCarnish, J. L. Finley.

1881—Supervisors, H. Grimm, Chairman, L. M. Okey, E. Groom; Clerk, H. Burgess; Treasurer, A. Grimm; Assessor, J. D. Harp; Justices of the Peace, H. Burgess, J. D. Harp; Constables, Joseph Barrow, W. Williams, Mat. Adrian.

CHAPTER XVI.

TOWNS AND VILLAGES—CONCLUDED.

BEETOWN—MOUNT HOPE—PATCH GROVE—FENNIMORE—VILLAGE OF MONTFORT—WYALUSING—
GLEN HAVEN—MILLVILLE—BLUE RIVER STATION.

BEETOWN.

This town dates back in antiquity to a date when the Indians and their French allies roamed through this southwestern region. That mineral had been found on the bluffs of Grant River at an extremely early date is proven by the remains of their rude smelting works that were plainly visible up to a date within the memory of the present generation. The first knowledge of Beetown as a fixed place of abode for any number of people was in the early part of 1827, when James Meredith, Curtis Caldwell, Thomas Crocker and Cyrus Alexander stumbled across evidences of mineral at the foot of a large, hollow bee-tree that had been blown down by some of the storms passing over that section. Upon closer examination a nugget of mineral weighing 425 pounds is said to have been discovered. However this may be, the lead thus discovered was known from this time forth as the "bee lead," and proved among the richest of the many rich discoveries in this section. During the early attempts at mining, this lead caved in and killed a workman by the name of Jack Dowling. His body was dug out and buried on the ridge west of the diggings. His coffin was split "puncheons," laid in the grave. The grave was discovered accidentally in 1852, but all that could then be seen was the fast decaying "puncheons" and moldering bones.

During the "Winnebago fuss" the mines were deserted and left to care for themselves; as the excitement died away greed for gain proved stronger than fears of "Injun," and parties began to straggle back. During the fall of 1827, Henry C. Bushnell settled at Muscalunge with his newly married bride. Mr. Bushnell had been in that section earlier in the year, and, having become impressed with the beauty and richness of the country, married and immediately returned to begin his new home in the wilderness. Here he erected a log cabin, the threshold of which—a broad flat stone—can still be seen imbedded in the soil a few feet above the gate leading to the residence of Hon. O. C. Hathaway. A short distance away, Mr. Bushnell erected a log blacksmith-shop, which is still standing, though exhibiting the marks of time on its rude walls. To Mr. and Mrs. Bushnell was born the succeeding year the first white child born in the county—Dorethy J. Bushnell. This same year George Hacket built a furnace near Muscalunge and commenced smelting. He also had diggings on the stream known as Hacket's Branch. In 1828, Mr. Bushnell removed with his family to Lancaster, and settled at what has since been known as "Bushnell Hollow." In the same year, Mr. Solomon Arthur and wife came to Beetown from Vermont and located there, the first actual settlers Beetown had known. Mr. Arthur had reached Chicago in the fall of the preceding year; but meeting Gen. Cass at that point, who was advising people to put themselves under the protection of the fort, remained there until spring. In three days after his arrival he had his log cabin rolled up, and here he lived until his death, which occurred in 1846 or 1847. For five years, Mrs. Arthur was the only white woman in Beetown, her nearest neighbor being six or seven miles distant. She was often compelled to subsist on parched corn, and would spend many days and nights alone, with no companion but the house-dog.

Quite a number of adventurers came in the spring of 1828, with them Mr. A. L. Johnson, from Baltimore. He brought in a stock of goods, opened a store, and, in company with Mr. Arthur, built a log smelting furnace. At the same time came Capt. Robert Reed and Dr. Hill, afterward residents of Lancaster; Messrs. Snyder, Fuller and Robert Dougherty, from

Baltimore; also James Walsh, who started the first blacksmith-shop, but all left in the fall. Orris McCartney was also among the new-comers in the spring of 1828, but in the fall moved out to and settled on his farm near Cassville, then a small settlement. From this time until the close of the Black Hawk war, hardly a half-dozen persons made their appearance at Beetown. Occasionally some one would come in from Galena, Prairie du Chien, or some other settlement, stay a few days and then leave.

During the Black Hawk war excitement, Mr. Arthur, having first sent his wife to the block-house at Cassville, remained on his claim, continuing the cultivation of his little patch of ground. Now and then an Indian would appear upon the horizon, when Mr. Arthur would retire to an improvised fort, a drift in a hill near by, and, rifle in hand, stand prepared to give the dusky intruder anything but a hospitable reception should he venture upon a closer acquaintance. Mr. Arthur was a genuine pioneer, one of those hardy sons of adventure through whose daring and labors the boundaries of the nation have been continually advanced, until it now incloses with a glorious civilization nearly every rood of land from the Atlantic to the Pacific. He was buried at his death under the shade of four oaks in the Beetown Cemetery, a little northwest of the village. Mrs. Arthur continued to live in the old cabin until 1851, when her death occurred.

After the close of the Black Hawk war, and no further danger was to be apprehended, emigrants began to come in in large numbers. James Prideaux and wife came to Beetown in 1834. Matthew Edwards and his wife were the next settlers, and were guests, by invitation, with Capt. Estes and other miners at an Independence dinner given by James Prideaux on July 4, 1835. Mr. Edwards opened a hotel, and also dealt in groceries and miners' supplies. After this date the population of Beetown increased rapidly. In the year 1840, an itinerant preacher of the Methodist Episcopal Church, held the first service in the village, in a cabin east of the town. The following year the Methodists organized the first church, under the instrumentality of Rev. Mr. Hulburt, and the same year the first school was opened, the teacher being Edward Walker. The foundation of this old schoolhouse can be still distinguished in a field at the rear of Mr. Hathaway's house. In 1843, William B. Brown opened a store with a general assortment of goods, his example being followed by Mr. Samuel Alex, but with a smaller stock. The post office was first established at the new village this year, and Mr. Alex was appointed Postmaster.

Heretofore dependence had been placed upon the old smelting furnace erected by Arthur and Johnston, but this year Mr. De Lasseaux erected another and larger one. De Lasseaux was a Frenchman, whose reputation among the miners for liberality and fair dealing was most excellent; many was the poor adventurer, if tradition speaks correctly, whom De Lasseaux "grub-staked," taking his chances on the luck attending the prospector for his remuneration. He was murdered a few years later by a miner named Brewer, as related in another portion of this work. A Galena paper in this same year, speaking of the rapidly growing place, said: "Beetown embraces 880 acres of mineral reserve lands, 760 acres of which have been leased to ten individual firms as follows: Arthur & St. John, 160; Brewer, 80; Days, 160; Shebles, 80; Dudley, 40; Busbnell, 80; Edwards, 80; Bonham, 80." The price of mineral was at this time averaging \$14.50 per thousand. Beetown had up to this time been solely a mining town, and although this has been the case in a great measure up to the present time, still the settling-up of the country to the west from this time on until along in the fifties, when new towns sprang up further west, gave an impetus to business which, for a time, made Beetown only second to Potosi in importance.

The year 1845 witnessed the establishment of the Baptist and Congregational congregations in the village. The records of the former show that on the 21st day of June, 1845, "A meeting was held at the schoolhouse for the purpose of forming a branch of the Lancaster Church, and the following persons were enrolled: William Paddock, Loamir Paddock, and Aloyra Paddock, Moses Cooley, by letter, Samuel Newick, Belinda Woodruff and Betsy Cooley, by the same method, and Sister Bacon, by confession." William Paddock was

elected Deacon, and Samuel Newick, Clerk. This church was organized under the supervision of Elder J. Miles, of Lancaster. The Congregational Church was organized by Rev. Mr. Chaffee. In 1844, Timothy and Cyrus Barr erected a store and put in a heavier stock of goods than had been carried heretofore. The advent of merchants after this being very rapid. Succeeding the Barr Brothers came Gleason & Kirkpatrick, Dennis Warren, E. W. Pelton, B. Rounds, H. C. Marsh, Mr. Crocker, Mr. Phelps, Goodpell Lampson, William Cole, John Welsh, D. Stewart, J. H. Brown, John B. Turley and some others. A little later Beetown commanded the trade as far north as the Wisconsin River, and west nearly, if not quite, to the Mississippi. In 1845, the first Sunday school had been started, under the supervision of Sarah B. Marsh, Charles Hood and Samuel Newick; but it was not until 1847 that the first church was erected. It was constructed under the direction of Rev. Mr. Littlefield, of Lancaster, and was to be free to the different denominations and for town purposes. The election to choose delegates to the constitutional convention was held September 7, 1846.

The first election held in the township to organize under the State constitution was held in April, 1849. At this meeting, Silas Burt was chosen Moderator, and R. M. Briggs was elected Clerk. The whole number of votes cast was one hundred and twenty-four; and the following town officers elected: Supervisors—John B. Turley, Chairman: James L. Woodruff, James Prideaux; Town Clerk—Robert M. Briggs; Treasurer—Silas Burt; Assessor—William Ainsbury; Superintendent of Schools—William Holford; Justices of the Peace—A. O. Coates, William McDonald, John Welsh, William Holford; Constables—A. P. Stephens, Daniel Derring, Chauncy Underwood; Sealer of Weights and Measures—Charles Hood.

The greatest period of Beetown's prosperity was undoubtedly those years just preceding the Mexican war. That outbreak drew away many of the adventurous spirits to the land of the Montezumas, and made the first break in the chain of circumstances that had served to bring the thriving village into the prominent position which it then occupied.

October 28, 1849, a strange phenomena of nature, denominated the "dark day," made its appearance. About half-past 1 in the afternoon the sky became suddenly so dark that it required lights in order to proceed with household duties. The appearance outside was somewhat similar to that upon an eclipse of the sun.

The following year was the fearful cholera year, and Beetown was to suffer terrible ravages from the dread fiend. Without previous warning this grim ogre, dark and horrible, made his appearance Saturday, August 31, and within one short week, forty-two deaths had occurred, out of a population of less than four hundred. A few hours served in most cases to hurry the victim through the different stages of the disease. Streets were deserted, and the terrified inhabitants escaped as soon as possible from the dangerous vicinity. Some remained, caring for the sick and burying the dead, who were hurriedly enveloped in rude coffins and consigned hastily to the grave. Among these good samaritans was Capt. Du Bois, who, meeting a minister making his way village-ward after the disappearance of the disease, suggested to him that his oratorical efforts would be too late for some of Beetown's citizens, who, "when dying, like rotten sheep, could not have a prayer said over them."

Hardly had the village time to recuperate from the visitation of one destroyer before it was called to make good the ravages of another. During the early summer of 1851, heavy rains had occurred, which raised the rivers and all their branches to a height before unknown. In Beetown, the event of this season was always afterward known as the "great flood." A vivid description of this disaster was given in a letter to the *Herald* the morning following the occurrence. The writer says: "Our town this morning presents a distressing appearance. Last night, at 12 o'clock, the water commenced to run through the town, tearing up bridges, carrying off platforms, filling cellars and houses, and hurling large rocks through the streets as though they were so many corks. Hough's saddler-shop was loosened from its foundations, carried down some thirty-five or forty feet and deposited in the road. A granary belonging to John B. Turley was also carried into the street. The bowling-alley attached to the Else House was torn up and entirely swept away, and the livery stable belonging to the Meyers estate was under-

mined so that the building swung back eight or ten feet. Cole's warehouse is a perfect wreck; not even the foundation can be seen, and the ruins lay strewn along the road to Smith's furnace. The house occupied by Widow Hammonds is entirely destroyed, the inmates barely escaping with their lives. Just as they passed out the gate, the building fell.

"Hardly a building in town escaped injury. Almost every ground floor was flooded, and small articles of furniture were met at every step. The gardens are entirely ruined; such a thing as a fence is not to be seen. Lots which yesterday were covered with luxuriant garden vegetables, this morning are paved with rock. The loss is about \$3,000."

Beetown had at this time seven stores, three blacksmith shops, one clothing establishment, one tavern, one saloon, two schoolhouses and one church. The village had suffered severely from the exodus to California, and was to lose many more from the same cause. Beetown, in fact, appears to have suffered more than any other town in the county in this respect. For a few years after this wave had begun to return upon itself, and before the towns springing up farther west had begun to assume importance, Beetown continued to hold its own, but the tide had turned; the flood tide was passed, and now came the ebb. In 1867, the Graham Mining Company made a large purchase of land at Muscalonge, and began operations on an extended scale, employing a large number of men. The company was composed of A. C. May, Marshall & Ilsey, J. C. Spencer and E. H. Goodrich. Mr. O. C. Hathaway was placed in charge as Superintendent. The company continued mining operations until 1877, during which period they raised 3,719,289 pounds of mineral. At the above date, Mr. Hathaway purchased the company's interest, since which time the mines have been operated by him alone. Another firm doing a large mining business is Atkinson & Peacock, who commenced operations previous to 1860. The product of the mines operated by this firm for the past decade has been about 800,000 pounds of mineral.

The Beetown of to-day is, however, but a shadow of the former mighty substance. Being essentially a mining town, it at all times depended upon its mining industries for support, after the withdrawal of its trade by the growth of other towns. The mines of this district are mentioned in another portion of this work, hence it is only necessary to say here that their product from the time of the first discovery up to the year 1876, was estimated at 1,000,000 pounds per annum. At present the mines are yielding probably as much, if not more, mineral than any other mines in the county. The present population of Beetown, according to the last census of 1880, is 1,530.

A Masonic lodge was organized in 1860, with a fair list of charter members: The first officers were: Dr. Millard, M.; James Turley, S. W.; Michael Burns, J. W.; Wood R. Beach, Secretary. Following Dr. Millard came Josiah Halls as Master, who was succeeded by Hon. O. C. Hathaway. The present list of membership contains sixty names, with the following officers: O. C. Hathaway, M.; Samuel Burch, S. W.; C. Hutchinson, J. W.; C. Arthur, Secretary; P. Stephens, Treasurer.

The Baptist society was organized, as before stated, in 1845, but was afterward removed to Bloomington, as will be seen in the history of that town.

Beetown Methodist Church.—This church was organized, as stated before, in 1841, being the principal charge of what has always been known as the "Beetown Circuit." At the meeting of the last conference, no pastor was appointed to the circuit, the different appointments being supplied by Mr. Jackson, a local preacher.

MOUNT HOPE.

The first settler within the limits of the present town of Mount Hope was the Hon. Thomas P. Burnett. As early as 1836, Mr. Burnett had entered the east half of the northeast and southeast quarters of Section 19, Township 6, Range 4 west. Other entries had added much to the original purchase, and, in 1840, Mr. Burnett erected a double log cabin and began the task of improving his new farm. The spot chosen by him was enthusiastically spoken of as "one of the most lovely on the Military Road," that great thoroughfare of the Southwest. The place occu-

pied a high ridge and contained a judicious distribution of timbered and prairie land. Here Mr. Burnett indulged his taste for agriculture and horticulture until the wilderness began to "blossom as a rose." "Orchard, garden and lawns," were arranged with great taste and beauty, while the thorough management that characterized every detail of this beautiful place was shown even in the neatly trimmed shrubs and trees. The stock, cattle and horses, were of the best improved breeds, while the latest and best agricultural implements were always to be found upon this model farm. From the midst of this scene of beauty, and while engaged in planning the erection of a spacious stone mansion, the proprietor was suddenly called away in 1846. The log house is still standing occupied by others.

The next settler was Mr. Ira D. Brunson, who settled upon his present farm in 1841, and the year following Mr. Whitesides located upon the military road and opened a stopping-place that was favorably known to travelers in that section for many years.

Mount Hope was originally an integral part of Patch Grove, and it was not until 1865, that it was erected into its present town limits, when, at an adjourned meeting, held in January of that year, the division was made that placed Mount Hope among the towns of the county. The present village was commenced in 1856. William Whitesides, Thomas Taylor and William Harlocker were the founders, the two first-named gentlemen giving 20 acres, and the last named 12 acres of land, for the purpose of making a town. This land was donated to the Trustees of the Brunson Institute, in order that, through the sale of lots, enough money could be raised to erect an educational institution bearing the above name. Subscriptions were also taken, and work immediately begun upon the foundation. The land on which the building site had been originally selected was found to be mortgaged when considerable advancement had been made. But, upon this discovery, a new site was chosen and work went on slowly.

The first house in the village was erected by W. H. Gilliard, in 1856. Mr. Gilliard also erected a blacksmith-shop the same year. The first trading done in the new burg was by Jonathan Heberlin, who opened a small stock in his house during the fall of 1857. Soon afterward, another trading establishment was started by Herman Clark. The village progressed but slowly until war times; the only houses previous to that date being the residences of Mr. Gilliard, Heberlin, Dr. Clark and Bluford Stone.

During the years of the war, the basement story of the institute had been built, and, in the years just succeeding the great struggle, the remainder of the building was erected. Hardly had it been completed when in some unaccountable manner it took fire and burned down, at once dashing the hopes of its projectors to the ground. The building had been insured by the ladies' society for \$1,800. Such part of the money as was left after paying debts and expenses was afterward given by the Trustees to the district to assist in erecting a high school building, which was done, and Mount Hope now rejoices in a most excellent school. Merchants had gradually come in; Humphrey & Whitesides being among the first. A. B. Linn followed soon after. About 1867, Oswald, Nathan & Co., commenced business and continued for some time. In May of this year the town was platted and laid out.

A peculiar and distinguishing trait in this village is the strict adherence to temperance principles, which has marked its policy from the start, there having never been a saloon opened within its borders. Upon the retirement of Oswald, Nathan & Co., their store building was sold to the society of Odd Fellows, who occupy the upper hall as a place of meeting. The store is occupied at present by Mr. R. G. Humphrey as a general merchandise store. Besides Mr. Humphrey's, there are two other stores run by Mr. A. B. Linn and Mr. J. B. Fox. Besides these business establishments, the village contains one steam saw-mill, two blacksmith-shops, one shoemaker and one carriage-maker. One physician, Dr. Sloat, attends to the health of the community. The town contains six school districts with five schoolhouses.

The first town meeting was held at the schoolhouse in the village, April 4, 1865, at which time the first town officers were elected. The first meeting of the Town Board was held April 13, 1865. Below is given a complete roster of the town officers from that date up to the present:

OFFICERS.

1865—Supervisors, Ira W. Brunson, Chairman; Warren Courtwright, George Rouse; Clerk, J. B. Linn; Treasurer, Theodore Taylor; Assessor, J. B. Linn; Justices, J. B. Linn, Allen Garvin, S. L. Stratton.

1866—Supervisors, George Rouse, Chairman; Warren Courtwright, Samuel Braudt; Clerk, C. A. Garvin; Treasurer, Theodore Taylor; Assessor, Michael McNaimee; Justices, William Harlocker, Michael McNaimee, S. L. Stratton, B. F. Loomis; Constables, Richard Keating and Amos Hazen.

1867—Supervisors, Ezra Abraham, Chairman; S. Braudt, L. A. Townsend; Clerk, Charles Soward; Treasurer, Theodore Taylor; Assessor, J. A. Kingsley; Justices, Johnson Casler and D. D. Snider; Constables, A. Hazen, R. E. Rouse, James Whiteside.

1868—Supervisors, Ezra Abraham, Chairman; Reuben Cooley, L. A. Townsend; Clerk, Charles Soward; Treasurer, Theodore Taylor; Assessor, William Harlocker; Justices, C. F. Falley, George Evans and B. L. Loomis; Constables, H. Harlocker, R. E. Rouse.

1869—Supervisors, Israel Miles, Chairman; Westley Crow, R. Cooley; Clerk, A. J. Smith; Treasurer, Theodore Taylor; Assessor, M. McNaimee; Justices, M. McNaimee, D. Weaver, B. L. Loomis; Constables, H. H. Harlocker, R. Keating, A. L. Stratton.

1870—Supervisors, I. Miles, Chairman; R. Cooley, W. Crow; Clerk, C. W. Grimesey; Treasurer, Theodore Taylor; Assessor, M. McNaimee; Justices, J. B. Fox, E. Abraham, B. L. Loomis; Constables, J. H. Clark, R. Keating.

1871—Supervisors, E. Abraham, Chairman; J. Casler, R. Cooley; Clerk, C. W. Grimesey; Treasurer, J. J. Oswald; Assessor, J. G. White; Justices, B. L. Loomis, M. McNaimee, J. C. Williams; Constables, J. H. Clark, A. Hazen, A. L. Stratton.

1872—Supervisors, E. Abraham, Chairman; R. Cooley, J. Casler; Clerk, J. C. Williams; Treasurer, J. J. Oswald; Assessor, I. Miles; Justices, J. C. Williams, I. Miles, D. D. Snider; Constables, J. H. Clark, William Weaver.

1873—Supervisors, R. Cooley, Chairman; W. Crow, E. Y. Ousley; Clerk, C. Storm; Treasurer, B. L. Loomis; Assessor, D. W. Grimesey; Justices, I. Miles, John Taylor; Constable, William Keating.

1874—Supervisors, R. G. Humphrey, Chairman; W. Crow, J. Scanlan; Clerk, C. Storm; Treasurer, P. L. Loomis; Assessor, J. G. White; Justices of the Peace, I. Miles, John Taylor; Constable, William Keating.

1875—Supervisors, D. D. Snider, Chairman; R. M. Day, J. Casler; Clerk, C. Storm; Treasurer, B. L. Loomis; Assessor, William Chisholm; Justices of the Peace, B. L. Loomis, C. Storm, I. W. Brunson; Constables, J. H. Clark, William Keating.

1876—Supervisors, D. D. Snider, Chairman; R. M. Day, J. Casler; Clerk, William Taylor; Treasurer, B. L. Loomis; Assessor, William Chisholm; Justices of the Peace, John Taylor, Ira W. Brunson; Constables, William Keating, John Lawless.

1877—Supervisors, E. Abraham, Chairman; John McKichan, R. Cooley; Clerk, A. H. Mumford; Treasurer, B. L. Loomis; Assessor, William Chisholm; Justices of the Peace, R. G. Humphrey, B. L. Loomis; Constable, James Clark.

1878—Supervisors, E. Abraham, Chairman; J. McKichan, R. M. Day; Clerk, William E. Sloat; Treasurer, B. L. Loomis; Assessor, William Chisholm; Justices of the Peace, I. W. Brunson, J. A. Walsh; Constables, R. Cooley, A. B. Linn, Charles Crow, W. L. Taylor.

1879—Supervisors, I. W. Brunson, Chairman; E. Abraham, J. G. Harschberger; Clerk, William E. Sloat; Treasurer, B. L. Loomis; Assessor, William Mulrooney; Justices of the Peace, B. L. Loomis, R. G. Humphrey; Constables, Ora Loomis, G. Lambert.

1880—W. A. Gilliard, Chairman; J. McKichan, George Whitesides; Clerk, W. L. Taylor; Treasurer, B. L. Loomis; Assessor, William Mulrooney; Justices of the Peace, I. W. Brunson, J. Scanlan; Constables, Ora Loomis, D. B. Brunson.

1881—Supervisors, John McKichan, Chairman; George Whiteside, J. W. Alexander;

Clerk, W. E. Sloat ; Treasurer, J. J. Harschberger ; Assessor, William Mulrooney ; Justices of the Peace, B. L. Loomis, R. G. Humphrey, I. W. Brunson, J. Scanlan ; Constables, D. B. Brunson, G. W. Gilliard, J. L. Loomis, William Calkin.

PATCH GROVE.

This town, as at present constituted, embraces portions of Townships 5 and 6, Range 5 west, and is in area somewhat less than a Congressional township. It is surrounded by the towns of Millville, Mt. Hope, Little Grant, Bloomington and Wyalusing. Patch Grove, when first apportioned off as a township, contained much more territory, as will be seen by the following taken from the records of the Board of Supervisors for the extra session of 1848, when it was enacted that "all that district of country in Grant County embraced in Townships 6 and 7 north, of Range 4 west ; also Townships 5, 6 and 7 north, of Range 5 west ; also Townships 5 and 6 north, of Range 6 ; also fractional Townships 5 and 6 north, of Range 7 west of the Fourth Principal Meridian, shall constitute a separate township, to be called Patch Grove." This territory has since been changed and divided, until it has assumed its present shape and proportions.

The first settler in the original township of Patch Grove was Page Blake, from whom the prairie stretching away to the north and west took its name, and mention of whom has been made in the Bloomington history, as well as other places in this work. The first settlers in the present township were Moses Hicklin and John Thompson. The former had been living at Cassville, and at the termination of the Black Hawk war moved out onto the prairie, where he located a claim, on which he resided up to the time of his death. John Thompson was formerly a soldier stationed at Prairie du Chien. He left the army at the close of this struggle, and came to settle upon this broad, fertile prairie. In 1835, Charles Blunt came, and afterward settled on Section 17. At that time the only houses between Blunt and Wingville were Hicklin's, Thompson's and the cabin of Ben Forbes, who was located on the farm at present occupied by James Davis.

In 1836, Mr. Henry Patch arrived in company with Messrs. Alfred and Ira Brunson. The former remained and first settled in a small log cabin by the spring, just west of the present village. The next year he commenced the erection of that famous double cabin which has furnished shelter for so many weary heads and tired feet. This stood on the west half of the southwest quarter of Section 4, Town 5, Range 5, and was finished the same year, although not occupied until the year following. Around the house were a few trees, and the place became known as Patch's Grove, and as such was erected into a post office about the time it was occupied by Patch, he himself being the first Postmaster. Previous to this time, the settlers on the prairie had been obliged to go to Prairie du Chien for mail. Ephraim Hall also settled on the Forbes claim about this time, the latter having returned to Cassville. William and James Humphrey followed in 1838, the former locating on his present place. John Scott was also numbered among the early comers. In 1842, Enos P. Finn, now a resident of Bloomington, moved from his first location, near the site of that village, and took up a cabin near Hall's.

Up to this time, there had been no signs or evidences of establishing a village. Patch's was simply a stopping-place for those traveling through the country on business or pleasure, there being but very few of the latter, however. Kind and genial, the soul of honesty and honor, "Uncle Henry" served as a general depository, both of news and valuables. His hearty welcome to the sojourner within his gates was of a kind to make him at once at home, certain that in this kindly landlord he could put all faith and trust. Hon. Henry Merrill, in his reminiscences, thus speaks of an early visit paid to "Uncle Henry:"

"After visiting Mineral Point, I called on my friend, N. Goodle, at Elk Grove, and then rode on to the furnace of Tom Parish, a very genial man. Spending a short time with him, I pushed on, and it became very dark, and traveling on an Indian trail so dark I could not see it, but let my horse take his own course. Finally, I brought up to a fence, and following it I came to a house where I was to stay, at Patch's Grove. I got into very good quarters, Mr. Patch

being very sociable, as most people were in those days, for they were glad to get the news, as probably they had no mails oftener than once a month (Patch Grove at this time depended on Prairie du Chien for mail.—ED.), and neighbors being few and far between. After conversing a long time, he wanted to know what State I came from, for, he said, he could generally tell, but in my case he could not make it out. When I told him I was from New York, he said he thought so, as that was the only State that puzzled him. The next morning, I followed a road to a ferry across the Wisconsin, and then pushed on three miles to Fort Crawford."

The first house built in the present village of Patch Grove was erected by Mr. Enos P. Finn in 1843. It was a frame structure afterward used as a tavern by James Forshay, and kept as such by him for many years. It is still standing in the south part of the village, west of the Wisconsin House, a well-worn relic whose sunken lines and weather-beaten walls carry the memory back through the long vista, to the time when the present populous prairies were an abode for wolves and foxes. The land on which the west half of the village stands was entered by Robert C. Orr, and by him was sold to Enos P. Finn; this was the east half of the north-east quarter of Section 4; among the articles of dicker in the trade is mentioned an "old gray mare," which was transferred to Mr. Orr; whether she proved afterward "the better horse," is not stated. This land was laid out into village lots by Mr. Finn, but the plot was never recorded. The first shop in the new village was a smithy built by Francis Brady, who started in business on the ground now occupied by the Wisconsin House, soon after the laying out of the town.

The first store was started by I. G. Ury, who purchased a lot and erected a building on the ground now occupied by the store of J. J. Humphrey, in 1848. Mr. Luther Brown, who came soon after the laying out of the town, thus speaks of the young settlement: "When I came to Patch Grove in 1846, there were then living in the town Henry Patch, Charles Blunt, Hiram Brunson, Joshua Bidwell, J. M. Dickenson, S. H. Goodman, John Thompson, Moses Hicklin, James and William Humphrey, James and Alexander Paul, George and David Ballentine, George Pike, Hugh Garside, John Wilson, Henry Adams, Thomas Nagle, E. P. Finn and Francis Brady. In those early times, when we wanted 'store goods,' we went to Beetown, a drive of ten miles across the unbroken prairies." To the names of those who came in at a comparatively early date must be added that of Dr. Chambers, the first physician in the town, who came in 1842.

Among the early trials of the settlers in this section was the long distances which they were obliged to traverse in order to get to mill. At first, Galena was the nearest point where the early pioneer could get his "grist" ground, and the erection of Burt's Mill, with its facilities for manufacturing a certain kind of flour was mentioned as a subject of thanksgiving, albeit the distance to be traversed to reach this new mill aggregated forty miles, taking the early settler from three to four days to accomplish the journey there and back. This mill and Virgin's, at Platteville, was the mealy Mecca of pioneers for many years. Finally, as years passed, the erection of mills nearer, obviated this necessity of long drives and wasted time. The post office was established in 1838, in Patch's new cabin, that gentleman being the first Postmaster. The office was first known as Patch's Grove. After a time, the spirit of modern improvement took possession of the inhabitants, and the name was changed to Urskine, but, owing to the immense trouble caused by the change, the original name was resumed again, and as such it has remained up to the present date. These were the days when letters coming over three hundred miles were charged up to the receiver at the rate of 25 cents per letter. "Uncle Henry" remained in charge of the office for many years, and was succeeded by Mr. Paul. The office was moved for the convenience of the villagers, from Mr. Patch's double cabin to the store of I. G. Ury, soon after the latter started in business. A second store was opened about 1850 by the Green Bros. & Fay, of Prairie du Chien, and Smith Brown placed in charge. This new business place stood on the opposite corner to Ury's establishment, on the site now occupied by the store of Robert Collier.

The new village went for a time, among those acquainted with its existence, by the euphonic name of "Finntown," but the eternal fitness of things was better observed by afterward

bestowing upon it the distinctive appellation applied to the post office, namely, Patch's Grove, or as it is now known, Patch Grove.

Scattering houses began to tell of incoming residents, and in 1857, Coddington and Thomas started a third store. The same year, Mr. Ury retired from business, disposing of his stock to Mr. A. Paul. About this time, the village was at the zenith of its prosperity. During the year 1855, Volney Osborn had erected several houses on the land east of the main street. These filled up rapidly, and besides the stores already mentioned, the town was possessed of one boot and shoe shop, run by Robert Collier, the present enterprising merchant, several blacksmith shops, and three saloons. Business was brisk, and everything seemed to denote an excellent future for the village. During 1859, Volney Osborn surveyed and platted the land owned by him on the east side of the principal street. This is the first recorded plat of Patch Grove, and is marked on the maps as the "original village," although the first commencement was some years earlier. The surveyor's work was done by L. P. Stringham, and the plat recorded June 4, 1859. A few years later, much of the village property fell into the hands of minor heirs, rendering it impossible to get a perfect title, thus preventing those who wished to locate in Patch Grove from carrying out their original intention. This, with other causes, operated against the prosperity of this village, and to the advantage of its young rival a few miles to the southward; since this time, the older buildings have been replaced by newer and finer structures, but as said before, the business portion of the town has not been enlarged. At present, the village contains four general merchandise stores, being Alexander Paul's, at the north side of the village, where Mr. Paul a few years ago erected a large and commodious brick store; J. J. Humphreys occupying the site of the store erected by I. G. Ury in 1848, which store was burned down; Robert Collier's, situated on the site of Fay's former store, and that of Hope & Woodhouse, near the center of the village. Besides these establishments, there are two wagon-shops, two blacksmith-shops, one shoemaker's shop, a harness-shop, and a few scattering shops, and an excellent hotel, the Wisconsin House.

A steam flouring-mill was started in 1872, by Messrs. Paul, Scott and Hicklin. Owing to the almost total failure of the wheat crop in the immediate vicinity caused by the ravages of the chinch-bug, the mill did not prove the success it otherwise might have been. It is at present leased to Mr. Fred. Claur, who runs it as a custom mill.

The first school taught in the township of Patch Grove was taught by Miss Almira Brunson in the newly erected cabin of Mr. Henry Patch, in 1838. It was a private school, and had an attendance of about fifteen scholars. It did not continue long, as the house was soon taken for a family residence, and used as such until within the past year. It still stands there on the old site, a monument to the hardy pioneers of long ago. The second school and the first "free school" was taught a few years later by Mrs. Roxina Blunt, in her house, two miles southwest of the present village, twelve or fifteen scholars being in attendance. The first school building was built of logs and ornamented with a sod chimney, and stood in a ravine northeast of town. It was built by private subscription and served for several years as the fountain of learning, to whose flowery banks the youth of the neighborhood were brought to imbibe that mystic knowledge of "readin', writin' and cipherin'" considered indispensable. The first teacher to hold sway in this rude institution of learning was Miss Minerva Warner, and among those who followed her were Miss Nancy Durley, of Platteville, and Miss Danley, of Prairie du Chien. In 1844, a new schoolhouse was erected on the northeast corner of Mr. Bradley's farm, now owned by Mr. McNamara, where it remained until 1848, when it was moved into the village, which had then begun to assume something of importance. The old schoolhouse still remains, although long since deserted for newer quarters, standing in a decayed condition opposite the store of Mr. Alexander Paul, at the north end of the village.

Patch Grove Academy.—This institution of learning was started in 1861, the building being erected by private subscription. This was about the period that marked the decay of the "Tafton Seminary," and it was hoped by the incorporators of the new enterprise to transfer the prestige which had marked the old seminary to the younger, and at the same time give the youth

of the neighborhood such educational advantages as would obviate the necessity of sending them away from home to finish their education. The academy was a fine looking two-story brick structure, standing on a slight rise of ground on the west side of the village, up which a pleasant lane led to the school-grounds. The first Board of Trustees comprised the following: A. Paul, William Humphrey, J. Warner, Thomas Nagle, G. Forshay, James Paul, Henry Patch, S. S. Bradley, John Woffenden. The first principal was William B. Clark, at present engaged in the banking business at Bloomington. He had as assistant Mrs. Newcomb, while the musical department was under the charge of Miss Newcomb. Under Mr. Clark's administration, the school seemed in a fair way to fulfill all the expectations of its friends and patrons, but upon the departure of this gentleman, the school speedily began to show signs of degeneracy, and in a short time afterward the academy as such was numbered among the things that were. A few years ago, the building was leased by the district, and since that time has been run in conjunction with the school building erected near it by the district as a graded school, the latter containing the primary department with one teacher, while the intermediate and grammar grades are confined to the academy building, presided over by the principal and one assistant. This arrangement furnishes ample accommodation for all the children in the district with educational advantages equal to the best.

As has been seen, the town of Patch Grove was created by the Board of Supervisors at the special session held in 1848, and included, besides the present township of Patch Grove, the present township of Mount Hope, Woodman, Millville, Wyalusing, and the greater part of the present township of Bloomington. The first township election was held at the old schoolhouse, noticed as still standing in the north part of the village, April 3, 1849. At the town meeting held the same day Hiram Bronson was elected Moderator or Chairman, and Thomas Nagle, Clerk. By-laws were passed for the government of the new township regulating the running at large of stock and care of fences; also laws regulating the marking of stock. The Town Clerk was also ordered to provide himself with books for recording the town business, marks of stock, etc.

The officers elected at this date were: Supervisors—Jared Warner, Chairman, George Ballentine and J. C. Orr; Treasurer, James Humphrey; Clerk, Thomas Nagle; Superintendent of Schools, C. C. Drake; Assessor, Austin Lord; Justices of the Peace, William Kidd, Jr., Daniel Andrews, James H. Newbury, A. A. Franklin; Constables, J. P. Stewart Alfred Drake, H. Lord. At the town meeting, George Pike, C. P. Smith, E. P. Finn, Thomas Nagle, Hiram Delap and William Whitesides were elected as Road Overseers, while William Whitesides, Moses Hicklin, Norman Washburn, John Lawless and Homer Lord, were appointed to the office of Fence Viewers.

May 8, the Justices held a meeting and balloted for the long and short term. William Kidd, Jr., and James H. Newbury, each were retained for the long term, Daniel Andrews and Amos A. Franklin being obliged to remain content with a short term as dispensers of justice.

The first meeting of the Board of Supervisors, for the town, was held May 12, 1849, when the town was divided into seven road districts and nine school districts. September 27, 1852, the population of the township had so increased that it was found necessary to create three polling-places, which was done as follows: The first to be the usual polling-place, "the schoolhouse near the residence of J. M. Dickinson, in the village," with one at the schoolhouse in the village of Millville, and "one at the 'red schoolhouse,' so called, in what is called the Orr settlement in the south part of town."

The boundaries of Patch Grove were somewhat curtailed in 1853, by the erection of Millville Township on the north; and more so the succeeding year, by the creation of Wyalusing on the west. Another re-adjustment of boundaries was rendered necessary in 1859, by the creation of the town of Lander—now Bloomington—by the County Board, since which time Patch Grove has remained at its present dimensions.

Following is a roster of the town officers from 1850 up to the present time:

1850—Supervisors, Jared Warner, Chairman, George Ballentine, Joseph C. Orr; Clerk, Thomas D. Nagle; Treasurer, James Humphrey; Assessor, James Murphy; Superintendent

of Common Schools, C. C. Drake; Justices of the Peace, A. A. Franklin, Daniel Andrews, Benjamin Brown (to fill vacancy); Constables, I. Stewart and Horace Lord.

1851—Supervisors, Henry Patch, Chairman, D. Andrews, George Ballentine; Clerk, O. Gulick; Assessor, J. T. Murphy; Treasurer, James Humphrey; Superintendent of Schools, C. C. Drake; Justices of the Peace, William Kidd, Jr., P. Alby; Constables, P. C. Barrett, S. Harrison and Robert Burce.

1852—Supervisors, J. Warner, Chairman, George Ballentine, Moses Hicklin; Clerk, James Paul; Treasurer, James Humphrey; Assessor, J. C. Orr; Superintendent of Schools, C. C. Drake; Justices of the Peace, A. A. Franklin and D. Andrews; Constables, A. Francis and D. Henshaw.

1853—Supervisors, D. Andrews, Chairman, Haines Fitch, P. Palmer; Clerk, James Paul; Treasurer, Henry Patch; Assessor, J. T. Murphy; Justices of the Peace, William Jacobs, Joseph Horsfall; Constables, T. W. Smith, A. Francis and G. A. Bottom.

1854—Supervisors, J. T. Murphy, Chairman, George Engle, Robert Glen; Clerk, J. Bolles; Treasurer, Henry Patch; Assessor, H. Lord; Justices of the Peace, James T. Murphy and J. W. Graves; Constables, R. Lumpkins, L. Folsom and T. W. Smith.

1855—Supervisors, J. T. Murphy, Chairman, Benjamin Briggs, George Eagle; Clerk, D. Andrews; Treasurer, Henry Patch; Assessor, A. C. Stiles; Superintendent of Schools, A. A. Franklin; Justices of the Peace, James T. Humphrey, Henry Patch (to fill vacancy, A. A. Franklin); Constables, R. A. Lumpkins, William Young, L. Folsom.

1856—Supervisors, J. T. Murphy, Chairman, George Engle, J. W. Brackett; Clerk, Jesse Brooks; Treasurer, D. Andrews; Assessor, J. W. Blanding; Superintendent of Schools, A. A. Franklin; Justices of the Peace, J. W. Brackett, D. Andrews; Constables, W. Buchanan, Henry Lord, A. Francis.

1857—Supervisors, J. T. Murphy, Chairman, George Engle, Henry F. Young; Clerk, W. Brown; Treasurer, Daniel Andrews; Assessor, J. C. Orr; Justices of the Peace, J. T. Murphy, Henry Patch; Constables, Reed Patch, Benjamin Cooper, A. Francis.

1858—Supervisors, J. C. Orr, Chairman, George W. Lee, Henry Patch; Clerk, Waldo Brown; Treasurer, James Humphrey; Assessor, J. T. Murphy; Superintendent of Schools, T. S. Osborn; Justices of the Peace, H. H. Reynolds, Samuel Tracy; Constables, A. Osborn, William Martin, A. Francis. Mr. Humphrey resigned the Treasurership, December 20, and William Halford was appointed to serve out the unexpired term.

1859—Supervisors, Henry Patch, H. J. Lord, George Engle; Clerk, A. H. Fitch; Treasurer, J. T. Humphrey; Assessor, William Fitch; Superintendent of Schools, Cyrus Sargeant; Justices of the Peace, Henry Patch, S. A. Taylor; Constables, Thomas Coddington, A. Francis, S. Brazee.

1860—Supervisors, Henry Patch, Chairman, William Fitch, William Humphrey; Clerk, L. Brown; Treasurer, J. D. Clayton; Assessor, Jared Warner; Superintendent of Schools, James Curtis; Justices of the Peace, J. M. Dickenson and James Paul (to fill vacancy, Levi Brown); Constables, John Day, Anson B. Lynn, E. W. Rice.

1861—Supervisors, William Humphrey, Chairman, John Lewis, W. Brown; Clerk, Thomas D. Nagle; Treasurer, Thomas Coddington; Assessor, Levi Brown; Justices of the Peace, Henry Patch and William Alexander; Constables, L. Halford, A. B. Lynn, Dennis Rooney.

1862—Supervisors, Henry Patch, Chairman, William Humphrey, John Lewis; Clerk, Thomas D. Nagle; Treasurer, J. D. Clayton; Assessor, Levi Brown; Justices of the Peace, James Paul, J. M. Dickenson; Constables, John Brock, A. Lynn, H. W. Patch.

1863—Supervisors, Henry Patch, Chairman, William Humphrey, John Lewis; Clerk, Thomas D. Nagle; Treasurer, John D. Clayton; Assessor, Levi Brown; Justices of the Peace, Henry Patch (Harris Fitch, to fill vacancy); Constables, A. H. Lyman, A. B. Lyman, Edward Garside, C. H. Polly.

1864—Supervisors, Levi Brown, Chairman, William Humphrey, John Lewis; Clerk, Thomas D. Nagle; Treasurer, Alexander Paul; Assessor, Levi Brown; Justices of the Peace, Levi Brown, R. R. Wood; Constables, A. B. Lynn, A. H. Lyman, C. H. Polly.

1865—Supervisors, Henry Patch, Chairman, William Humphrey, John Lewis; Clerk, Thomas D. Nagle; Treasurer, A. Paul; Assessor, Henry Patch; Justices of the Peace, Henry Patch, Luther Brown; Constables, Jared Warner, J. A. Childs, J. W. Bidewell.

1866—Supervisors, Henry Patch, Chairman, William Humphrey, George Ballentine; Clerk, Thomas D. Nagle; Treasurer, A. Paul; Assessor, W. S. Brown; Justices of the Peace, G. Forshay, D. E. Riley; Constables, William Patterson, A. H. Lyman, A. C. Louks.

1867—Supervisors, William Humphrey, Chairman, James Paul, J. D. Clayton; Clerk, Thomas D. Nagle; Treasurer, A. Paul; Assessor, J. M. Dickenson; Justices of the Peace, H. C. Manard, George Ballentine; Constables, H. W. Patch, C. H. Polly.

1868—Supervisors, Jared Warner, Chairman, J. M. Dickenson, William Humphrey; Clerk, Thomas D. Nagle; Treasurer, A. Paul; Assessor, J. M. Dickenson; Justices of the Peace, G. W. Pike, J. M. Dickenson; Constables, L. Folsom, S. D. Bean.

1869—Supervisors, Jared Warner, Chairman, William Humphrey, J. A. Davis; Clerk, Thomas D. Nagle; Treasurer, A. Paul; Assessor, J. M. Dickenson; Justices of the Peace, Charles Brown, H. W. Patch; Constables, Benjamin Jones, D. Smith, S. D. Bean.

1870—Supervisors, George Ballentine, Chairman, G. Forshay, Thomas D. Nagle; Clerk, Charles Brown; Treasurer, J. C. Scott; Assessor, J. M. Ballentine; Justices of the Peace, J. Woffenden, J. D. McDuffee; Constables, Charles Cory, Chauncy Green.

1871—Supervisors, Jared Warner, Chairman, G. Forshay, John Hicklin; Clerk, C. E. Rice; Treasurer, J. C. Scott; Assessor, James Paul; Justices of the Peace, E. Patch, J. M. Dickenson, J. D. McDuffee, J. D. Clayton; Constable, C. A. Green, P. Peisley.

1872—Supervisors, Jared Warner, Chairman, G. Forshay, J. Hicklin; Clerk, C. E. Rice; Treasurer, J. C. Scott; Assessor, J. M. Dickenson; Justices of the Peace, J. A. Davis, C. E. Brown; Constables, P. L. Peisley, L. Munson, S. D. Bean.

1873—Supervisors—Haines Fitch, Chairman, J. Lewis, G. Forshay; Clerk, A. Curtis; Treasurer, J. C. Scott; Assessor, Thomas D. Nagle; Justices of the Peace, J. M. Dickenson, Luther Brown; Constables, C. Green, Ed. Dickenson, S. D. Bean.

1874—Supervisors, George Ballentine, Chairman, G. Forshay, S. A. Hatch; Clerk, A. Curtis; Treasurer, J. C. Scott; Assessor, Thomas D. Nagle; Justices of the Peace, O. P. Wetmore, J. Woffenden; Constables, S. D. Bean, E. Green, Ed. Dickenson.

1875—Supervisors, J. C. Scott, Chairman, William Lewis, E. H. Garside; Clerk, J. A. Curtis; Treasurer, J. B. Cory; Assessor, Thomas D. Nagle; Justices of the Peace, J. E. Taylor, Thomas D. Nagle; Constables, Ed. Dickenson, S. D. Bean, W. O. Goodman, O. P. Parker.

1876—Supervisors, George Ballentine, Chairman, S. A. Hatch, G. Forshay; Clerk, J. A. Curtis; Treasurer, John Hicklin; Assessor, Jared Warner; Justices of the Peace, E. H. Garside, J. A. Davis; Constables, Charles Parish, William Prior.

1877—Supervisors, George Ballentine, Chairman, G. Forshay, S. A. Hatch; Clerk, J. Bidewell; Treasurer, John Hicklin; Assessor, John Lawless; Justices of the Peace, G. Forshay, W. Hicklin; Constables, William Prior, Charles Parish, C. Green.

1878—Supervisors, George Ballentine, Chairman, G. Forshay, S. A. Hatch; Clerk, J. W. Bidewell; Treasurer, John Hicklin; Assessor, J. A. Curtis; Justices of the Peace, J. A. Davis, John Jones; Constables, L. Munson, C. Parish, R. Newberry.

1879—Supervisors—J. A. Davis, Chairman, James Hicklin, James Cary, Jr.; Clerk, J. W. Bidewell; Treasurer, Jared Warner; Assessor, J. A. Curtis; Justices of the Peace, G. Forshay (to fill vacancy, W. Hicklin); Constables, M. Richards, C. H. Parish, R. Newberry.

1880—Supervisors, Read Patch, Chairman, John Cary, G. Forshay; Clerk, J. C. Scott; Treasurer, A. Paul; Assessor, W. O. Goodman; Justices of the Peace, A. F. Smith, George Ballentine, Edward Kerr, George Calvert; Constables, C. W. Parish, C. Ladd, Ed. Dickenson.

1881—Supervisors, John Cary, Jr., Chairman, John Hicklin, Pat Morkin; Clerk, Arthur Rice; Treasurer, E. Patch; Assessor, E. Kerr; Justices of the Peace, J. A. Davis, S. A. Hatch, H. F. Young, W. Quick; Constables, Ed. Dickenson, L. H. Munson, Charles Parish, H. L. Wetmore.

FENNIMORE.

This town owes its name to a settler, who, at the time of the breaking-out of the Black Hawk war, was living on Section 22, Town 6, Range 2 west of the Fourth Principal Meridian. He disappeared during this struggle and was not again heard from. In 1837, a Mr. Palmer settled on Fennimore's old claim, but left after remaining a short time. In 1838, John Robinson, Sr., settled on Section 34, Town 6, Range 2. John Switzer, John Dillon, John McReynolds and Henry Meeker settled in the year 1843. The first German settlers were Sigmund Stuart, who came in 1845, and John Nauert and George Bohl, who arrived in 1846. The organization of the town of Fennimore took place in 1849, embracing at that time the territory of the present towns of Fennimore, Marion, Hickory Grove, Woodman, Boscobel, Waterstown and part of Muscoda. The first town meeting was held on the 3d day of April, 1849, on Section 7, Town 6, Range 2 west, and the following officers elected: Supervisor, Lester Pratt, M. D., Chairman, Solomon C. Peckham and John Switzer; Clerk, John A. Shearer; Assessor, H. A. W. McNair; Treasurer, Philo A. Dempsey; Superintendent of Schools, John A. Shearer; Justice of the Peace, Charles W. Loney; Constable, Robert Munns. Chester Pratt, as Chairman, in 1849 received \$10 for his services, and H. A. W. McNair, as Assessor, who had to tramp all over the above designated territory, \$9.

At the present date, Fennimore embraces Township 6, Range 2, and Township 6, Range 3. The first Justice of the Peace, James Russell, was appointed by the Governor of the Territory. The first elected by the people was Charles W. Loney, elected as above. The first religious organization was formed in 1844 by Rev. Elder Allen, the class consisting of three—John Switzer, Philo Dempsey and Mrs. Dempsey. The first marriage celebrated was that of Elijah Goodrich and Allemina Russell, in 1847, the magistrate performing the ceremony being Justice Russell, nicknamed the "Chief Justice."

The first school district was organized on the 7th day of April, 1849, and the first school was taught by William R. Dixon, on Section 7, Township 6, Range 2, in 1847, or two years previous to the organization of the school district.

Fennimore is at present divided into twelve whole and eight joint school districts, and contains fifteen schoolhouses. The village of Fennimore Center was laid out in 1868. Previous to this, or in July, 1862, the first house had been moved to the "Center" by Mr. John G. Perkins. Fennimore Center contains two churches, one Methodist Episcopal, and organized as early as 1849; the other, Advent. There is also a church at Mount Ida, in this township. The village comprises in its limits three general merchandise stores, doing a good business, two blacksmith and wagon shops, one harness-shop, two shoe-shops, one hotel, two saloons, and has two physicians. In 1879, the building of the narrow gauge railroad through from Woodman to Lancaster, and passing through Fennimore, gave added importance to the village, and, surrounded as it is by a good farming country, Fennimore Center is situated in a most favorable position for advancement in the future.

VILLAGE OF MONTFORT.

A pleasant village, born about the time Wisconsin was admitted into the Union; occupies a portion of Sections 24 and 25, in the eastern portion of Wingville Township. Located partly on a hillside sloping to the south, with a generous growth of forest trees behind, and partly along the limits of a ravine which stretches off to the west and is lost in the timber. Montfort presents the appearance of having flourished at a time when fortune was in her more genial mood. And, from all accounts, this presumption of fact is not without foundation. Its earliest settlement dates back to the days when "leads" and "ranges" were blessings, the departure of which long since brightened their former existence. The title page, so to speak, to the history of the more prosperous days of the present town, when it was known as "Wingville," may be read in the substantial improvements completed under a former regime. In those days, it is said, a well-filled wallet was essential to a comfortable existence; one who neglected to put

money in his purse eventually came to be, in an algebraic sense, worse off than nothing, and his transpositions and relations in the equation of life were always indicated by the *minus* symbol. But not so with Wingville, when stage-coaches were the world and "whips" the potentates; when guests of inns within its present limits sat by blazing hickory fires in old arm chairs and reflected upon the probable results of a "lead" sunk in the valley. Nor were they guests who tore up to the door, mounted on high-mettled racers covered with foam, to demand of the landlord brandy and water in stern accents. The town was the scene of many a struggle for supremacy with the wealth of mineral hidden beneath the rock-ribbed hills, and the horny-handed sons of toil who wrested prosperity from their depths were the guests of the log tavern, and the founders of the village. Substantial of nature and character, they imparted that element to the buildings which formed the nucleus of Montfort, and the preface to a history of its future growth.

The first efforts toward the establishment of a settlement where Montfort now stands were made, it is said, by Thomas Parish, who came into the country in the fall of 1827, and erected a cabin on the branch of Blue River, northwest of the present village. He was followed the ensuing season by others of his family, and miners generally, who located and worked out considerable mineral from leads which led into ranges that have since become celebrated for the amount of ore they have produced. It must here be observed that considerable difficulty was experienced in the procuring of reliable data regarding the early founding of this portion of the township, also with reference to the improvements completed in the village proper. The cabin of Thomas Parish was the first, presumably at least, that can be recalled; the next was the fort which stood near the Methodist Church, and the third, also erected by Mr. Parish, was the old log tavern, raised into position about the same time, as a "halting-place" for soldiers en route from Fort Crawford to Portage. During the Black Hawk war, the fort was invested with troops, says current rumor, but the officer in command, as also the composition of the company, cannot be recalled even by those from whom such uncertain accounts have been obtained. After the war, the value of the mines, it is said, was thoroughly tested by prospectors and adventurers, who remained in the neighborhood toiling and triumphing, completing improvements, which are still visible in portions of the village, until the discovery of gold in California precipitated the exodus from the lead mines, with which all are familiar, and from which the country was years in recovering. Early in the forties some ventured into this portion of the county, and, remaining, became identified with its growth and the development of its resources during that and subsequent decades. Among these were Judge William McGonigal, now of Lancaster; James Griswold, Dr. Rickey, Jacob Benner, a Mr. Crippen, John Shepherd, Asaph Leadbetter and some others, but it was not until 1848 that efforts were formally made to lay off a village and begin the race with rivals for precedence. True, the subject had been mooted for some little time, and the desire to eclipse Centerville, distant three miles, and now celebrated as the center of zinc mines, from which mineral in paying quantities is daily being taken, found frequent expression, but no decisive action was taken in that behalf until the year above designated.

On the 3d of April, 1848, Ben C. Eastman, of Platteville, who was interested in the ownership of lands in the vicinity of Wingville, caused a survey to be made of the northeast corner of Section 25, for himself, and as the attorney in fact of Francis J. Dunn, and laid off for village purposes. The plat occupied five acres of ground, which were subdivided into twenty-eight lots, fronting on Main and Center streets.

At that time, the improvements of the village, which was thenceforward known by its present title, consisted of the Washington Hotel, a rude structure, conducted by Jacob Benner on the present site of the Frankland House; the old log tavern on the Leadbetter farm (still standing, by the way), presided over by James Basye and Claiborne Chandler; a miner's cabin standing north of the Washington Hotel, occupied by Thomas Hitchcock, John Milburn, William Hudson and William Ballard; a miner's cabin at the south end of the same caravansary, occupied by William Kinney, Daniel Thorp, and one named Landrum.

The same year, or early in the spring of 1849, John Shepherd procured a survey of eight acres of land, and divided the same out into ten lots, the dimensions of some of which described nearly an acre of ground. Previous to that episode in the history of Montfort, an enterprising settler by the name of Henry Pohun built a store south of Edward Bell's present store, and Levi Sloan a saloon, in the same direction. Judge McGonigal resided north of the Washington Hotel, and was engaged in commercial ventures with Levi Sloan, who lived in a house standing on the lot west of the present post office site. This year, as has already been stated, miners left in large numbers and emigrated to California. The Leadbetter, Shepherd and other ranges were abandoned, and the laborers therein rushed to the fields of famine and gold on the shores of the Pacific. The same year witnessed a limited number of improvements in the village. Mr. Bouchard, of Mineral Point, erected a grocery, where G. Hess now lives; William Ballard a domicile on Shepherd's Addition, on the present site of J. T. Taylor's residence, and Samuel Stephens, of Potosi, a house on the site of that occupied by A. Mathews.

During 1850, no improvements of note were either projected or completed. The miners had nearly all left the vicinity, and with a population of not more than 150 souls, and little to encourage them, the year passed without any evidence of enterprise being manifested. Added to this deplorable condition of affairs, the cholera broke out on the 24th of June, and the village became a veritable Golgotha. It seems that a number of immigrants were passing through the village, and among them was one who, in the light of subsequent events it was concluded, was suffering from an attack of the Asiatic enemy of mankind. The resident of a house which was built for a store, and stood on the corner of Leadbetter's garden, whose name is forgotten, endeavored to minister to the invalid immigrant, and was soon after taken down. He was attended by a man named Starms, but died the same night, his attendant and the latter's child following in his wake almost before the body of the first victim had become stiffened in death. The bodies were interred on the hill opposite Leadbetter's farm, where they were left to await the summons of the resurrection morn. McMurtry and Isaac Goodin were the next fatal cases, notwithstanding the attentions of Drs. Hamilton and Moffatt, of Highland; also of Dr. Sibley, of Dodgeville. By this time the inhabitants became panic stricken and fled for their lives, some going to Mineral Point, some to Dodgeville and some to Mifflin. Those who were unable to flee were cared for by the physicians who could be procured, and nursed into health or shrouded for the tomb by those who remained, who were limited to William Ballard, John Adney, D. Gard, R. Duncan, Tom Kelly, Mr. Bouchard and a German named Fick. The epidemic lasted fully a month, and yielded only when a lack of material prevented its continuance, but not before it had sickened and paid the debt of nature, including Dr. Sibley, who was taken with the preliminary symptoms while en route to his home in Dodgeville and died before the remedies available could effect a change for the better.

From 1851 to 1855, there was comparatively no building or improving, but four houses having been erected during that period, according to the statements of the "oldest inhabitants." These were raised in Shepherd's Addition, by Thomas Kirkpatrick and Mr. Laird. Two years prior to this, another addition had been made to the village, it being that of Asaph Leadbetter, who laid out eighteen and nineteen one-hundredths acres of land in Sections 24 and 35, which were subdivided into eleven blocks, with a total of eighty lots. But this produced no visible effect upon the lack of enterprise or change in the absence of improvements, as the ensuing five years were as unproductive of results in this connection as the preceding semi-decade appears to have been.

During the war, the village furnished its quota of troops and means necessary for the suppression of the "rebellion," and sought by every means at the disposal of its inhabitants to contribute aid and comfort to the cause of the Union and the enforcement of the laws.

During the past twenty years, the enterprise of the citizens has not been altogether demonstrated by the erection of architectural monuments to perpetuate their fame, but sufficient improvements have gone forward to completion to evidence the existence of such enterprise as is developed by opportunity.

During the period mentioned, houses devoted to residence and commercial purposes have been completed and occupied by S. B. Green, G. Hess, J. A. Thomas, John Tucker, James Gaston, William Stephens, Elijah McDonald, George Kendrick, etc. A new schoolhouse has supplied the place of that formerly employed, a Methodist Church built and furnished, a railroad built and in operation, and some other material results accomplished, that have added to the wealth and beauty of the village and the surrounding country. On the 23d of November, 1879, the Narrow Gauge was finished and the running of trains begun. One year later, the depot building was completed, and with each succeeding month since, the shipments of grain, produce and stock have increased in a most gratifying degree.

The village, with a population estimated at upward of 200, contains a complement of stores, shops, etc., a well-sustained school, one church and three hotels, while the professions are ably represented, and good order is invariably maintained. It is the center of a rich farming land, and the point of shipment for vast quantities of zinc ore obtained in the mines at Centerville, three miles distant. Taken as a whole, Montford is the residence of an industrious, thriving community, with many features of interest to commend it as a place of temporary sojourn or permanent residence to the traveler and settler.

Educational.—The village of Montford, from small beginnings and limited opportunities for the availment of its youth, to-day is unsurpassed by any town of its population in the county, in the facilities afforded for the procurement of a substantial and practical education. And it might be said, in addition, that this desideratum is valued and appreciated by those upon whom its benefits are sought to be conferred.

The first school taught in the neighborhood of the present village was opened in 1848 by David Bunyan, in a log cabin which stood near Dr. Dewitt's present residence. Here were gathered the children, also those of more mature years, from the adjacent country, ambitious to become familiar with the rudiments of learning. Mr. Bunyan remained in charge a year, it is believed, when he vacated the position, and was succeeded by "old man" Petello, who taught in the same place, and with a success, it is said, commensurate with his efforts, which were determined and energetic.

Along in 1850, the school was removed to the "old fort house," as it was called, where a Mr. Edrington illustrated the beauties and advantages of an education, followed by John Adney and others in the same laudable undertaking. In 1855, a frame schoolhouse 18x22, was built on a lot in Leadbetter's Addition, and was constantly occupied for nearly a quarter of a century, John Adney, Robert Gill, Smith Johnson, Mary Clark, Mrs. S. T. Yorke, Mrs. Lord and others officiating as teachers. This building, after its abandonment for school purposes, was devoted to other uses until 1879, when it was torn down.

In 1870, the increasing attendance of pupils, which each succeeding year subsequent to the war witnessed, necessitated other arrangements, and, with a view to provide for the then existing emergencies, it was decided to erect a graded school of sufficient dimensions to meet all demands for the future. The present handsome frame structure in the eastern part of the village was planned, contracted for and built, its completion being reached during the same year. It is of frame, 28x60, two stories high, containing two departments and supplied with every accessory that will, in any way, contribute to the success of the cause. Its cost, exclusive of the furniture and equipments, was \$3,500.

Ordinarily, two teachers are employed, but at present, the services of one only are necessary. The average attendance of pupils is about 100 daily, and the cost of conducting the school, \$600 per annum.

The present board is made up of Robert Chandler, Director; E. Carrington, Treasurer, and W. A. Thompson, Clerk.

Religious.—Religious services of the Methodist faith were held in early days in the log tavern adjoining the Leadbetter farm, being used for sacred, as also caravansary purposes. Afterward, church was had in private residences, the old fort, and finally, in the several school-houses which have been raised in the village. This was the case until the present Methodist

Church edifice was erected some years ago, since when, it has been occupied for church purposes. The Rev. J. V. Bachman is the Pastor at present in charge.

Montfort Cemetery Association—Was organized in June, 1858, when G. Hess, W. O. Thomas, S. D. Green and Edward Bell were elected Trustees. Soon after, they purchased half an acre of ground from Peter Dewill, which was laid out, fenced and otherwise prepared for burial purposes.

The first interment made in these grounds, was that of Margaret, wife of F. McSpaden, her funeral occurring on the 21st of June, 1858. Since that event, numerous "storied urns" and marble headstones have been raised above the verdure and blossoms, to mark the spot where loved ones sleep, awaiting the summons that shall quicken them into life once more, on the shores of the Beautiful River.

During late years, the association has made additions to the original tract, and concluded needed improvements. The affairs of the cemetery are intrusted to a Board of Trustees composed of G. Hess, E. Carrington and G. T. Kendrick.

The Post Office.—The first attempt at supplying the inhabitants of Montfort and the surrounding country with mail facilities was during the year 1828, or thereabouts, when Daniel Durnell carried the mail from Mineral Point to Blue River, the post office at the latter point being Centerville. In time the same was changed to Montfort, where it was located under the care of D. S. Benner, it is believed, or Robert Langley. In 1854, S. D. Green succeeded to the trust, establishing the office in his store, where he continued to discharge the duties of the office until 1863. In that year, W. O. Thomas was appointed and served two years, when Mr. Green again took charge, remaining the recipient of Executive confidence four years. At the expiration of that period, W. O. Thomas was once more invested with authority, which he exercised until his death in 1873, since which event J. A. Thomas has officiated.

A daily mail from Galena, Woodman and Muscoda is distributed at the Montfort office.

The Montfort Independent—A folio of twenty-eight columns, edited and published by W. A. Thompson, was born March 31, 1881, and though yet an infant gives promise of strength and influence with each succeeding number. Personally, politically, and as the medium for a dissemination of news, the paper, as its title would indicate, aims to cultivate the independent features of journalism, and as such has become a many-winged messenger to the homes of subscribers, exerting a general influence, and imparting useful and beneficent knowledge of men and measures.

With the issue of May 26, 1881, the name of the paper was changed to that of the Montfort and Fennimore *Independent*, the design being to extend the benefits of its publication to the flourishing village of Fennimore.

The paper is issued weekly on Thursdays, enjoys a circulation of 500 copies, and is valued at \$1,000.

Montfort Lodge, No. 107, I. O. G. T.—Was first organized December 15, 1873, and was conducted until July 31, 1880, when it lapsed and was reduced to a condition of quiescence that at the time seemed hopeless. Meetings had been convened at irregular intervals in the hall over the People's Store during its earlier experience, but the attendance gradually diminished, the spirit of temperance seemed to have departed, and, as already stated, they were finally abandoned entirely.

During the succeeding winter, however, the question of a revival of the Lodge was agitated, and the desire that the same should be accomplished found frequent expression. Finally a meeting was convened at the Methodist Church, on the evening of February 19, 1881, at which the initiatory steps to resume service were taken, culminating in the re-organization of the Lodge with twenty-two members, and the following officers: J. A. Jeffrey, W. C. T.; Miss Delia Parish, W. V. T.; Louis Grossenburg and Miss Etta Hess, Secretaries; Miss Anna Boulder, Treasurer; Frank Bell, Marshal; Miss Nellie Bernard, Guard; Benjamin Jenkins, Sentinel; R. H. Palmer, Chaplain, and W. J. Gordon, P. W. C. T.

Since that date, the Lodge has increased its membership to fifty, and meetings are held weekly, on Saturday nights, in the hall of Bunt's Building.

The present officers are: J. A. Jeffrey, W. C. T.; Miss Anna Straw, W. V. T.; Jasper Palmer and Miss Etta Hess, Secretaries; Miss Allie Bachman, W. T.; F. Parish, W. M.; C. James, W. C., and Miss Jennie Bernard and G. G. Palmer, Guards.

Ferrin Lodge, No. 165, A., F. & A. M.—During the year 1866, upon the petition of S. A. Ferrin, M. D., and others, of the village of Montfort and vicinity, a dispensation was granted under and by which the present lodge was worked. This continued for the space of a year, at the conclusion of which period the lodge was duly organized under a charter bearing date June 11, 1867, with the following officers: S. A. Ferrin, W. M.; E. T. Comfort, S. W.; G. Hess, J. W.; James Chandler, Secretary; Edward Bell, Treasurer; Samuel Taylor, S. D.; Marion Sylvester, J. D., and Martin Van Buren, Tiler.

Regular meetings were convened in the second story of a vacant building in the western part of the village, where proceedings were conducted until 1869. In October of that year, the society erected a hall on Main street, which was completed and dedicated the same year, and has since been occupied. The building is of frame, 20x40, with a hall 20x33, substantially constructed and handsomely furnished, and cost a total of \$1,500.

The present membership numbers forty-seven, and the official roster is made up of: D. T. Stephens, W. M.; O. P. Comfort, S. W.; George P. Smith, J. W.; O. P. David, Treasurer; James S. Chandler, Secretary; W. H. Van Dusen, S. D.; John Bideg, J. D., and J. H. Lincoln, Tiler.

Meetings are held monthly on the Saturday nearest the full moon, and the property of the Lodge is valued at \$700.

WYALUSING.

Early in the forties, the chances afforded for a good landing-place at the point occupied by the village of Wyalusing attracted the attention of parties interested in the building up of the county, and predicating their expectation on the fact that, with an exceptionally good landing, they might attract trade in that direction and gradually build up a thriving town, E. P. Finn, James M. Otis and L. O. Schrader became the possessors of eighty acres of land, situated just above the present village. Here they laid out a village, and waited for purchasers of town lots. That others had thought this a good point, at least for the manufacture of logs and cordwood, was evinced by a solitary cabin, which remained there as a reminder of those whose feet had pressed the soil before. The first settler in the village was Mr. Cranston, who was donated a lot by the proprietors, on the understanding that he was to keep a house of entertainment for those happening in this section. The scheme proved not so successful in practice as in theory. Like many other schemes, it looked well on paper, but that was the only place where it did look well. The property passed into different hands until it reached those of Mr. N. W. Kendall. The latter gentleman erected a saw-mill at this point, and, together with Charles Blanford and Robert Glenn, surveyed and platted the village of Wyalusing, in July, 1856. From the elaborate character of the plat, it was evident that great expectations lingered in the minds of the proprietors. In the meantime, Mr. John Otis had opened a store in the new town, and trade was being slowly attracted in that direction. A large stone warehouse was in process of erection, and the fates seemed propitious for an extensive trading-post, when the iron rails were laid, linking the eastern and western portions of the State, and Wyalusing, with its proprietors, suffered a crushing set-back. Although it staggered bravely on for a time, the place never recovered, and gradually began to settle back to its original status. To-day it is but a feeble reminder of "what might have been."

In 1854, the town of Wyalusing was erected from Patch Grove, and the first election was held April 3, 1855, when the following officers were chosen: Supervisors, Joakim Gulick, Chairman, Robert Glenn, H. R. Miles; Clerk, S. H. Seaman; Treasurer, N. W. Kendall; Assessor, W. P. Stephenson; Superintendent of Schools, David Brodt; Justices of the Peace, R. Jacobs, long term, S. Brodt, Charles Blanford, short term; Constables, J. Brodt, B. Y. Griffen, W. H. Harvey. The present officers of the town are as follows: Supervisors, Edwin Glenn, Chairman, H. Strong, Lewis Glass; Clerk, L. Wellard; Treasurer, A. Calkins; As-

essor, David Brodt; Justices of the Peace, J. A. Harford, William Kern, long term, J. A. Bradley, L. Jacobs, short term; Constables, A. Shrake, J. Vanamee, J. B. Palmer.

GLEN HAVEN.

The history of this town is included in the history of Cassville up to the year 1859, when the latter town was divided into two parts on the township line, separating Townships 3 and 4. To the northern portion the name of Glen Haven was given. The earliest settler in the town of Glen Haven was A. D. Ramsey, one of the earliest of the little band of pioneers who opened up the hidden riches of Grant County. Some years later on he was joined in the present town limits by James C. Orr, who entered the farm, on which he afterward resided, in 1836; and Richard Ray, who came later. From the latter, the present site of the village took the name of "Ray's Landing," by which name it was known up to the birth of the new burg. One by one other settlers began to come in, until the settler's cabin peeped forth from its woody covert, or stood outlined against the prairie sky in every direction.

As early as 1850, a log warehouse was erected on the bank of the broad river that washes the western coast of the town. Mr. Jesse Brooks, now of Bloomington, then teaching school in the Ray Schoolhouse, assisted at the raising. This starting post in the village history was erected by Dr. Grinter and Mr. George Burroughs, the latter afterward erecting a frame dwelling-house about one-fourth of a mile below the present village, near the river, where he resided for many years.

The village itself was laid out in the year 1857, by a company of six gentlemen—C. P. Goodrich, D. P. Grinter, M. H. Hayes, J. B. Sargent, R. Noble and George Burroughs. Two of these, as has been seen, had already struck the entering wedge. A steam saw-mill was erected this year, and a few dwelling-houses. A small store, the first in the town, was opened by Ed Palmer, but it soon gave way to others keeping more extensive stocks. The succeeding year a number of new buildings were added. The old log warehouse had disappeared, and in its place soon appeared a substantial frame building, large and commodious, at present used by Mr. William Tate. Among those who figured in mercantile pursuits in early times, were Messrs. Boylan and Oliver, who opened larger stocks in their respective establishments than had been brought before the people of this section heretofore. They were followed ere many years had elapsed, by the firm of Scott & Basford. The village in the meantime had continued on in a steady growth, accumulating to itself buildings and population. It became an important point for shipment of stock and farm produce generally. The mill, which had been erected by Mr. Sargent was first run by Mr. McIntosh, but the building was afterward torn down, and the machinery taken away. After the storm clouds of war had swept over the country and given way to the clear and broadening horizon of peace, a second mill was erected and fitted up with the most improved machinery with a view of making this an important manufacturing point, but it was found to be a non-paying investment, and a few years ago the machinery was sold and removed to other points, while the building passed into the hands of Messrs. Basford & Humphrey, and by them is now used as a warehouse.

July 3, 1874, a destructive conflagration destroyed one-half the village, and only, by the most strenuous exertions on the part of the citizens was the remaining portion saved. The fire first broke out in a stone building standing on the present site of Dr. Grinter's warehouse. A strong southwest wind fanned the flames and they swept rapidly on, licking up the buildings standing in its pathway until, with the best portion of the village in ruins, its work was at length stayed. This was a hard blow to the thriving town, but with characteristic energy the inhabitants set to work to replace the burnt buildings with others, and better, and to the visitor to to-day a single dismantled shell tells of the ravages of the red-tongued flames. The village at present contains three stores, two carrying extensive and well-selected stocks, two blacksmith and wagon shops, two hotels of medium capacity, one shoemaker, two physicians, three warehouse firms and other minor industries.

The first schoolhouse in the town was the old Ray Schoolhouse, where in early times,

under the regimes of Mr. Jesse Brooks, David Brown and other teachers the younger inhabitants climbed the rude ascents that led to the mount of learning.

The first school taught in the village was held in an old frame building, then and now the property of Dr. D. P. Grinter. The present school building was erected about 1868, and so far furnishes ample facilities for the intellectual advancement of the youth of the village, under the guidance of Mr. Hendershot.

Of churches, Glen Haven, the village proper, can boast of but one—Roman Catholic—which is a substantial structure, standing on a gentle rise of ground on the north of the village. Services are held by a priest from abroad.

A lodge of the I. O. G. T. was organized December 26, 1876, the charter members being C. C. Basford, Mrs. Ocea Basford, Mrs. M. Scott, Mrs. Lizzie Basford, Mr. A. Humphrey, William Weaks, M. C. Weaks, G. W. Taylor, E. M. Winslow, Mrs. L. Grinter, A. Weaks, J. Burroughs, W. J. Winney, E. Barr, Mrs. A. Barr, Mrs. J. Humphrey. This organization was not very long-lived, and, April 6, 1878, the present lodge of Ancient Order of Mendotas was organized by Grand Sachem P. Bartley, of Bloomington, and the following officers elected: W. J. Winney, W. S.; A. Scott, W. Q.; George Taylor, W. P.; L. Burton, P.; E. M. Curtiss, W. W.; Lizzie Basford, W. T.; Lucy Thomas, W. G. The present officers are F. Weiland, W. S.; W. Kidd, W. Q.; Mrs. L. Grinter, W. T.; P. D. Hendershot, W. W.; Rosa Hampton, P.; William Dortham, W. P.; Mrs. A. M. Knapp, W. G.

The town of Glen Haven was set off by the County Board in 1859, and the first town meeting was held in the "Yellow Schoolhouse," April 3, 1860. The first meeting of the Town Board was held at the same place, April 7, the same year. The following is a complete roster of the town officers from the town organization to the present date:

1860—Supervisors, A. A. Bennett, Chairman, A. D. Ramsey, Joseph Werry; Clerk, William Tate; Treasurer, Henry Schneider; Assessor, Matthew Metcalf; Superintendent of Schools, James M. Scott; Justices of the Peace, George Burroughs, A. A. Bennett, D. Oliver, L. S. Reynolds; Constables, F. R. Delaware, Ed Doughty, Ed Bownas.

1861—Supervisors, A. A. Bennett, Chairman, A. D. Ramsey, William Harkins; Clerk, William Tate; Treasurer, E. A. Kidd; Assessor, M. Metcalf; Superintendent of Schools, James M. Scott; Justices of the Peace, D. Oliver, L. S. Reynolds; Constables, J. L. Kauffman, J. Ackerman, Ed Doughty.

1862—Supervisors, A. A. Bennett, Chairman, A. D. Ramsey, William Harkins; Clerk, William Tate; Treasurer, E. A. Kidd; Assessor, William Curtis; Justices of the Peace, George Burroughs, A. A. Bennett; Constables, E. Doughty, F. R. Delaware, J. L. Kauffman.

1863—Supervisors, A. A. Bennett, Chairman, A. D. Ramsey, J. Ackerman; Clerk, William Tate; Treasurer, James M. Scott; Assessor, William Curtiss; Justices of the Peace, P. Harkins, L. S. Reynolds; Constables, J. Ackerman, Joseph Werry.

1864—Supervisors, E. A. Kidd, Chairman, A. D. Ramsey, J. Ackerman; Clerk, James M. Scott; Treasurer, M. Metcalf; Assessor, E. A. Kidd; Justices of the Peace, George Burroughs, William Curtis; Constables, George Henderson, J. Ackermann, E. S. Tuttle.

1865—Supervisors—A. A. Bennett, Chairman, John Ryan, John Ackerman; Clerk, William Tate; Treasurer, William Curtis; Assessor, William Curtis; Justices of the Peace, L. Reynolds, Peter Thornton; Constables, J. Ackerman, A. J. Vedder, M. Dolphin.

1866—Supervisors, A. A. Bennett, Chairman, J. Ackerman, John Ryan; Clerk, William Tate; Assessor, William Curtis; Treasurer, James C. Orr; Justices of the Peace, George Burroughs, A. A. Bennett, J. Johnson (to fill vacancy). Constables, J. Ackerman, William Hawks, Levi Sixbey.

1867—Supervisors, E. A. Kidd, Chairman, Jacob Ackerman, John Ackerman; Clerk, William Tate; Treasurer, E. W. Banks; Assessor, William Curtis; Justices of the Peace, L. S. Reynolds, J. Johnson; Constables, L. Sixbey, A. Meyers, William Keinbrough.

1868—Supervisors, E. A. Kidd, Chairman, John Ackerman, E. Wood; Clerk, William Tate; Treasurer, A. A. Kidd; Assessor, William Curtis; Justices of the Peace, William Curtis,

William Tate, A. J. Long (to fill vacancy). Constables, A. Ortscheid, J. Grandrath, William Keinbrough.

1869—Supervisors, E. A. Kidd, Chairman, John Ackerman, John Ryan; Clerk, William Tate; Treasurer, A. A. Kidd; Assessor, William Curtis; Justices of the Peace, J. Johnson, L. S. Reynolds; Constables, William Bateman, A. Ortscheid, J. Grandrath.

1870—Supervisors—A. A. Bennett, Chairman, James C. Orr, John Ackerman; Clerk, William Tate; Treasurer, J. S. Kauffman; Assessor, J. Ryan; Justices of the Peace, A. A. Bennett, William Tate (C. Heilermann to fill vacancy); Constables, William Bateman, William Weaks, A. Ortscheid.

1871—Supervisors, A. A. Bennett, John Ackerman, James C. Orr; Clerk, William Curtis; Treasurer, J. S. Kauffman; Assessor, J. Ryan; Justices of the Peace, Luther Basford, Ira S. Bennett; Constables, W. Bateman, C. V. Royster, Joseph Bowers.

1872—Supervisors, William Curtis, Chairman, Ed Bownas, Jacob Kuenster; Clerk, William Tate; Treasurer, J. S. Kidd; Assessor, J. Ryan; Justices of the Peace, William Tate, J. S. Kauffman; Constables, William Bateman, C. W. Bushnell, Richard Kidd.

1873—Supervisors—D. P. Grinter, Chairman, Charles Heilermann, Andrew Meyers; Clerk, William Tate; Treasurer, J. S. Kidd; Assessor, J. Ryan; Justices of the Peace, Luther Basford, J. Ryan (E. Wood to fill vacancy); Constables, Richard A. Kidd, C. W. Bushnell, Jac Ackerman.

1874—Supervisors, D. P. Grinter, Chairman, Charles Heilermann, Andrew Myers; Clerk, William Tate; Treasurer, Joseph S. Kidd; Assessor, John Ryan; Justices of the Peace, William Curtis, A. J. Long; Constables, R. A. Kidd, William Bateman, C. W. Bushnell.

1875—Supervisors, D. P. Grinter, A. Myers, C. Heilermann; Clerk, William Tate; Treasurer, A. Humphrey; Assessor, W. J. Winney; Justices of the Peace, J. Ryan, W. N. Ramsey; Constables, R. A. Kidd, M. Kidd, A. Ortscheid.

1876—Supervisors, J. Ryan, Chairman, J. S. Kidd, Jacob Ackerman; Clerk, William Tate; Treasurer, C. Peacock; Assessor, William Curtis; Justices of the Peace, C. Schwaller, W. A. Sprague; Constables, R. A. Kidd, G. Myers, Jac Lepper.

1877—Supervisors, J. Ryan, Chairman, J. S. Kidd, Jacob Ackerman; Clerk, William Tate; Treasurer, C. Peacock; Assessor, William Curtis; Justices of the Peace, J. Ryan, W. N. Ramsey; Constables, R. A. Kidd, G. Myers, J. Lepper.

1878—Supervisors, Joseph S. Kidd, Chairman, William Wildman, Jacob Ackerman; Clerk, William Tate; Treasurer, Anton Vogt; Assessor, William Curtis; Justices of the Peace, W. A. Sprague, S. Chandler; Constables, A. Ortscheid, Robert Wood, James Burton.

1879—Supervisors—Joseph S. Kidd, Chairman, Jacob Ackerman, William Wildman; Clerk, William Tate; Treasurer, Anton Vogt; Assessor, William Curtis; Justices of the Peace, J. Ryan, W. N. Ramsey (A. H. Bennett to fill vacancy); Constables, Robert Wood, Henry Schrader, C. Brookens.

1880—Supervisors, Joseph S. Kidd, Chairman, William Wildman, Jacob Ackerman; Clerk, William Tate; Treasurer, Anton Vogt; Assessor, William Curtis; Justices of the Peace, W. A. Sprague, A. H. Bennett; Constables, H. Shrader, Thomas Mernangh, Ben Mueller.

1881—Supervisors, Joseph S. Kidd, Chairman, William Wildman, Jacob Ackerman; Clerk, William Tate; Treasurer, W. N. Ramsey; Assessor, John Dolphin; Justices of the Peace, James Wildman, William Ramsey; Constables, John Curry, Thomas Myers, Ben Mueller.

TOWN OF MILLVILLE.

This town was first settled by Elihu Warner, Jared Warner, Henry Foster and Isaac Revel, who came with their families in April, 1838, from Ohio, by the Ohio, Mississippi and Wisconsin Rivers, in a large keel-boat. Elihu Warner brought with him a house all framed and ready for erection. This pioneer cabin was principally black walnut, and was put up on Section 26. It is still standing. William Kidd came from Ohio in 1844 and located on Section 2, Town-

ship 6, Range 5 west, and Norman Washburn settled on Section 1, Township 6, Range 5 west, in 1846. Joseph Horsfall came from Ohio in 1849, and settled on Section 2, Township 6, Range 5 west, locating at this time only 40 acres of land. He is still living on this same location, and owns and operates about 400 acres.

This, of course, is not a complete list of those who settled here during these years, as some have died, others have moved away, and their names have dropped from the page of public existence and the memories of their pioneer associates.

The first saw-mill was built by Jared Warner, on Section 34, in 1840. This was intended merely for custom-work. The dimensions was 20x40, with a capacity of about 1,000 feet of lumber per day. The first flouring-mill was erected by William Kidd, in 1844, on Section 2. During this same year, Jared Warner built a second saw-mill, near the site of his first one, of larger dimensions and with a capacity of between 2,000 and 3,000 feet of lumber per day. In 1845, C. C. Drake, a son-in-law of Elihu Warner, erected a chair and bedstead factory, and, for a few years, carried on an extensive business. Joseph Horsfall built a woolen mill in 1850, the dimensions being 16x44. This was torn down and a new one erected in 1866, the main building being 32x44, with two wings 15x24 each. This was entirely consumed by fire in 1869. Not in the least disheartened by his comparatively heavy loss, Mr. Horsfall erected his third mill in 1871. His misfortunes, however, did not cease here, as this mill was carried away and destroyed by a freshet in 1876; but, with renewed energy and perseverance, he constructed his fourth and present mill during the same year, its dimensions being 20x30.

The first school was taught in the summer of 1847, in a room in the dwelling-house of Jared Warner, by Cassanna McDonald (afterward the wife of William Kidd, Jr.). The first schoolhouse was erected in the fall of 1848, by subscription, and is still used for school purposes in District No. 1. There is at present only one whole and two joint school districts in the town.

The first store was opened by Jared Warner in 1849, but was run by him only a short time, and a second one opened by Henry Horsfall in 1855. During this year, also, one Manchester purchased the property of Elihu Warner, and established a horse ferry across the Wisconsin River. This he kept in active operation until 1851, when his ferry-boat sunk and he then disposed of the property to George Schlund, who ran the ferry until 1865, when it was discontinued.

In the year 1853, the present Methodist, and only church in the town, was erected on Section 35, and was dedicated during the same year, Rev. Alfred Bronson delivering the dedicatory sermon. Prior to the building of this church, however, meetings of the society were held as far back as 1845-46, at the dwelling of William Kidd, Jr., and at the schoolhouse, the ministers being J. H. Penman, Enoch Tasker, Frank Smith and a few others.

The post office was established in 1855, with C. C. Drake as Postmaster. He was succeeded by William Kidd, Jr. Mr. Kidd's death occurred soon afterward and his wife succeeded him, and held the position until 1867, when Joseph Horsfall, the present incumbent, was appointed.

The town name (Millville) originated from the number of mills that were built at an early day, and which have been referred to above. The town, as it was first organized in 1853, comprised, in addition to its present limits, a portion of the present town of Patch Grove, the upper half of the present town of Wyalusing and the whole of the present towns of Mount Hope and Woodman.

In 1854, Wyalusing was set off from Millville and Patch Grove by the County Board of Supervisors. In 1859, still another change took place, and Millville then included Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11 and 12, of Township 6, Range 4 west. In 1864, Mount Hope and Woodman were set off from Millville, reducing it to its present limits.

It is bounded on the north by the Wisconsin River, on the east by portions of the towns of Mount Hope and Woodman, on the south by Patch Grove, and on the west by a portion of the town of Wyalusing. It now comprises Sections 25, 26, 35 and 36 of Township 7, Range 5

west, and Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17 and 18 of Township 6, Range 5 west.

The first election was held in the spring of 1854, at which time the whole number of votes cast was 105, and the following officers were elected: Jared Warner, Chairman, J. A. Kingsley, Charles Blandford, Supervisors; Waldo Brown, Superintendent of Schools; R. Burrows, Clerk; James Ballantine, Treasurer; Justus M. Dickinson, Assessor; Preserved Albee, John B. Lynn, Justices of the Peace; David Brandt, Anson B. Lynn, Constables.

The following is a complete list of the officials from the organization of the town to date:

1855—Jared Warner, Chairman, Justus M. Dickinson, J. J. Snider, Supervisors; Orra Garvin, Superintendent of Schools; R. Burrows, Clerk; James Ballantine, Treasurer; M. W. Vanansdale, Assessor; Joseph Horsfall, J. A. Kingsley, Justices of the Peace; Anson B. Lynn, C. W. De Lap, H. L. Foster, Constables.

1856—William Kidd, Jr., Chairman, Elijah Patch, William Herlocker, Supervisors; William J. Quick, Superintendent of Schools; C. W. Gulick, Clerk; Ira W. Bronson, Treasurer; M. W. Vanansdale, Assessor; J. G. Bishop, Samuel Braudt, Justus M. Dickinson, Justices of the Peace; C. W. De Lap, Johnson Casler, James Hicklin, Constables.

1857—Jared Warner, Chairman, George Ballantine, Allen Garvin, Supervisors; William J. Quick, Superintendent of Schools; Thomas Nagle, Clerk; James Ballantine, Treasurer; William Whiteside, Assessor; P. Albee, John B. Lynn, Joseph Horsfall, Justices of the Peace; Silas B. Simpkins, Byron B. Bishop, Constables.

1858—George Ballantine, Chairman, William Humphrey, C. F. Hopkins, Supervisors; William J. Quick, Superintendent of Schools; Thomas Nagle, Clerk; William Kidd, Jr., Treasurer; William Whiteside, Assessor; Charles Lester, B. L. Loomis, Justices of the Peace; Silas B. Simpkins, H. W. Gilliard, Dennis Sheedy, Constables.

1859—Levi Brown, Chairman, J. A. Kingsley, John B. Lynn, Supervisors; William J. Quick, Superintendent of Schools; Thomas Nagle, Clerk; William Kidd, Jr., Treasurer; James Weeks, Assessor; John B. Lynn, S. A. Quincy, Justices of the Peace; Allen Garvin, Alfred Bronson, Cornelius B. Nice, Constables.

1860—Joseph Horsfall, Chairman, S. L. Stratton, James Trainer, Supervisors; Allanons Lester, Superintendent of Schools; T. S. Carmody, Clerk; William Kidd, Jr., Treasurer; James Weeks, Assessor; Michael McNamee, Robert Harrower, Justices of the Peace; Richard Keating, William Whiteside, J. W. Kelly, Constables.

1861—Joseph Horsfall, Chairman, James Trainer, R. G. Humphrey, Supervisors; George R. Garvin, Superintendent of Schools; T. S. Carmody, Clerk; William Kidd, Jr., Treasurer; Michael McNamee, Assessor; C. W. Grimacey, John B. Lynn, Justices of the Peace; Richard Keating, Joseph Tomlinson, Silas B. Simpkins, Constables.

1862—Joseph Horsfall, Chairman, R. G. Humphrey, Patrick Coyne, Supervisors; T. S. Carmody, Clerk; William Kidd, Jr., Treasurer; John Chisholm, Assessor; Robert Harrower, John Chisholm, G. W. Washburn, Justices of the Peace; Richard Keating, Joshua Gould, Constables.

1863—Joseph Horsfall, Chairman, Patrick Coyne, R. G. Humphrey, Supervisors; A. J. Smith, Clerk; Theodore Taylor, Treasurer; John B. Lynn, Assessor; John B. Lynn, T. S. Sampson, Justices of the Peace; H. W. Gilliard, C. W. Grimacey, Constables.

1864—Joseph Horsfall, Chairman, D. D. Snider, Isaac H. Gibbons, Supervisors; A. J. Smith, Clerk; Samuel Braudt, Treasurer; T. S. Sampson, Assessor; T. S. Sampson, S. L. Stratton, Geo. Winsworth, Justices of the Peace; Geo. Harmon, F. W. Austin, Constables.

1865—Joseph Horsfall, Chairman, Almond Foster, Cornelius Nice, Supervisors; J. G. Bishop, Clerk; George Winsworth, Treasurer; C. W. Grimacey, Assessor; George Winsworth, D. H. Ballou, Justices of the Peace; J. G. Bishop, O. L. Hart, A. L. Foster, Constables.

1866—G. H. Washburn, Chairman, Lewis E. Dewey, A. R. Foster, Supervisors; A. H. Mumford, Clerk; George Winsworth, Treasurer; C. W. Grimacey, Assessor; D. H. Ballou, Robert Wiseman, Justices of the Peace; Franklin Austin, D. H. McKey, Constables.

1867—G. H. Washburn, Chairman, A. R. Foster, Lewis E. Dewey, Supervisors; A. H. Mumford, Clerk; George Winsworth, Treasurer; C. W. Grimacy, Assessor; C. W. Grimacey, George Winsworth, Justices of the Peace; Franklin Austin, George Couillard, Constables.

1868—George H. Washburn, Chairman, A. R. Foster, Lewis E. Dewey, Supervisors; E. I. Kidd, Clerk; George Winsworth, Treasurer; A. H. Mumford, Assessor; A. R. Foster, Edward Wiseman, Justices of the Peace; R. H. De Lap, Jerome Perry, Constables.

1869—Edward Wiseman, Chairman, J. S. Markham, I. H. Gibbons, Supervisors; E. I. Kidd, Clerk; A. H. Mumford, Assessor; I. H. Gibbons, Treasurer; Joseph Horsfall, B. H. Tripp, A. R. Foster, Edward Wiseman, Justices of the Peace; Jerome Perry, R. H. De Lap, Constables.

1870—Joseph Horsfall, Chairman, J. S. Markham, Lewis E. Dewey, Supervisors; E. I. Kidd, Clerk; I. H. Gibbons, Treasurer; A. H. Mumford, Assessor; E. I. Kidd, J. Creager, R. R. Spraggon, A. R. Foster, Justices of the Peace; E. A. Hackett, G. H. Foster, Constables.

1871—E. I. Kidd, Chairman, Lewis E. Dewey, J. Creager, Supervisors; A. H. Mumford, Clerk; I. H. Gibbons, Treasurer; A. R. Foster, Assessor; R. R. Spraggon, James Foster, Justices of the Peace; E. A. Hackett, Jerome Perry, Constables.

1872—E. I. Kidd, Chairman, Lewis E. Dewey, A. R. Foster, Supervisors; F. S. Kidd, Clerk; I. H. Gibbons, Treasurer; William Horsfall, Assessor; A. R. Foster, Jacob Creager, Justices of the Peace; George H. Foster, Edward Beitler, Constables.

1873—Joseph Horsfall, Chairman, Jerome Perry, A. R. Foster, Supervisors; A. H. Mumford, Clerk; Lewis Beitler, Treasurer; William Horsfall, Assessor; Edward Wiseman, Joseph Horsfall, Justices of the Peace; George H. Foster, Jerome Perry, Constables.

1874—Joseph Horsfall, Chairman, Joseph Beadle, Lewis E. Dewey, Supervisors; A. H. Mumford, Clerk; Jacob Creager, Treasurer; William Horsfall, Assessor; Jacob Creager, A. R. Foster, Justices of the Peace; Edward Beitler, George H. Foster, Constables.

1874—E. I. Kidd, Chairman, A. R. Foster, Lewis E. Dewey, Supervisors; A. H. Mumford, Clerk; Jacob Creager, Treasurer; William Horsfall, Assessor; Joseph Horsfall, A. R. Foster, Justices of the Peace; Jefferson Day, Samuel Goan, Constables.

1876—E. I. Kidd, Chairman, Lewis E. Dewey, James Beadle, Supervisors; D. F. Horsfall, Clerk; James Horsfall, Treasurer; William Horsfall, Assessor; ———, ———, Justices of the Peace; ———, ———, Constables.

1877—E. I. Kidd, Chairman, Lewis E. Dewey, James Beadle, Supervisors; D. F. Horsfall, Clerk; Joseph Horsfall, Treasurer; Jerome Perry, Assessor; Joseph Horsfall, Jerome Perry, Justices of the Peace; Edward Hall, Constable.

1878—E. I. Kidd, Chairman, Lewis E. Dewey, James Beadle, Supervisors; D. F. Horsfall, Clerk; Joseph Horsfall, Treasurer; Jerome Perry, Assessor; S. F. Hart, Henry Taylor, Justices of the Peace; Edward Hall, Edward Beitler, Constables.

1879—E. I. Kidd, Chairman, Lewis E. Dewey, James Beadle, Supervisors; D. F. Horsfall, Clerk; I. H. Gibbons, Treasurer; T. B. Anderson, Assessor; Joseph Horsfall, Jerome Perry, Henry Taylor, Justices of the Peace; Luther Perry, Edward Beitler, Edward Hall, A. Koschkee, Constables.

1880—E. I. Kidd, Chairman, J. H. Taylor, James Beadle, Supervisors; D. F. Horsfall, Clerk; I. H. Gibbons, Treasurer; T. B. Anderson, Assessor; Jerome Perry, J. H. Taylor, Justices of the Peace; Edward Hall, William Posten, Edward Beitler, Constables.

1881—E. I. Kidd, Chairman, Lewis E. Dewey, James Beadle, Supervisors; D. F. Horsfall, Clerk; I. H. Gibbons, Treasurer; T. B. Anderson, Assessor; Joseph Horsfall, Jerome Perry, Justices of the Peace; William Posten, Constable.

WOODMAN.

This town originally belonged to Millville, but was set off in 1864 by the County Board of Supervisors. The first settler was Joseph Thurnby, who located on Section 34, Township 7, Range 4 west, in 1842. The first school was taught by Ira Philipps, in 1858, in a room at his

house. The first schoolhouse was built in 1860, in what is now School District No. 5. Edward McDowell taught the first school in this building in the winter of 1864-65.

The history of the town of Woodman is the history of the village of Woodman, and may be found therein.

In 1864, Ralph Smith and Cyrus Woodman laid out a village on Sections 13 and 14, to which was given the name of Woodman. The first settlers in the village were Charles Smith and Mr. J. Lindig, who located in the spring of 1864. The first house was erected this year by Ralph Smith, as a residence for his son Charles, the carpenter work being done by T. S. Sampson. The post office was established also during that year, with S. S. Hills as Postmaster. At this time it was kept in the railroad depot, which had been erected in the fall of the same year. Thomas Clapp succeeded to the Postmastership, and he in turn was followed by L. M. Culver, the office in the meantime being kept in a warehouse. Cyrus Ransom subsequently became Postmaster, and the office was removed to his shoe-shop. Mr. Ransom was followed by J. L. Parker, and the office again removed this time to his store. It was kept here until the present incumbent, James A. Faris, received his appointment, since which time it has been kept at his store.

The first stores were built in 1863, by John H. Barnett, T. N. Hubbell and Julius Lindig. The first school taught in the village was by Louise Rittenhouse, in the summer of 1864, in a room containing but one window, in the second story of a warehouse. The "Northey House," which was built during that year for a store building, was subsequently purchased for \$800 for school purposes.

The first warehouse was built by George Campbell in 1864, with a capacity for about 5,000 bushels.

In 1866, Israel Miles purchased a building which had been erected by A. S. Young in 1864, and fitted it up and kept the first hotel in the village of Woodman. This was subsequently disposed of to its present owner, James A. Faris. Nathan Schreiner & Co., in 1869, erected a warehouse 30x50, with a capacity of 10,000 bushels, and a cost of \$2,000.

The first death in the village was that of a little girl, daughter of George Campbell, in the fall of 1864.

An enumeration of the inhabitants of the town of Woodman, taken June 1, 1865, the year following its organization, made the total population 517, of which number 260 were males and 257 females, and the total foreign population 105.

The school report for 1880 shows the whole number of schoolhouses in the town to be five, with a cash value of \$1,300, and capable of accommodating 233 pupils, and the total number of children in the town over four and under twenty to be 265; of which number 122 are males and 143 females. Of this number, 204 attended the schools during the year.

In 1878, a large fire occurred in the village of Woodman, when the railroad depot, a warehouse owned by John Plankington, the post office building and store owned by J. L. Parker, the saloon and residence of John Murphy, the residence and wagon-shop of M. B. Clark, and a shoe store owned by I. W. Dexter, were burned down, causing a total loss of \$5,500, with no insurance except \$2,200 on the store building and stock of J. L. Parker.

In April, 1879, the first work was done in the town of Woodman, on the Chicago & Tomah Narrow Gauge Railway, at what is known as "Connely's Cut." This road was finished to Lancaster in the following January. In 1880, it was purchased by the Chicago & Northwestern Railroad Company, and has since been operated by them.

The first town meeting for the town of Woodman was held at the railroad depot April 4, 1865, and the following is a list of the votes polled: John B. Murphy, Moses Garvin, Thomas W. Clapp, George Withington, S. H. Bishop, S. H. Foster, Daniel Roseman, George Younglove, David Terrell, Robert Stimpson, John Scanlon, Patrick Coyne, James E. Taylor, Thomas Parland, J. C. Wood, Joseph Carter, Jedediah Canfield, William Stimpson, James Ellis, Thomas Corcoran, Hugh Quinn, Daniel Dietrich, J. W. Rockwell, John Roseman, James Trainer, Perry Swartz, A. R. Gleason, William Mooney, Aslay Olsen, Thomas Hanley, John

Schuppner, John Martin, Louis Ruka, Joshua S. Gould, Orlin Garvin, Joseph Turnby, William Parland, Chauncey Bangs, George Brown, Michael Friar, Almiren Hackett, T. N. Hubbell, Cyrus Ranson, Andrew Walton, Thomas S. Sampson, John Decker, S. S. Hills, George Linale, Arthur Murphy, W. T. Richards, Jacob Sanger, S. W. Townsend, Edward Murphy, William A. McKinney, William Northey, James H. Lent, John Anderson, H. R. Miles, W. S. O'Brien and C. R. Smith. Of these, Daniel Roseman, Robert Stimpson, J. C. Wood, James Ellis, Thomas Corcoran, Hugh Quinn, John Roseman, James Trainer, William Mooney, Thomas Hanley, Orlin Garvin, William Parland, George Brown, Michael Friar and S. W. Townsend are still residents of the town. At this election, John Decker, Andrew Walton and T. N. Hubbell were appointed Inspectors, Thomas S. Sampson and Henry R. Miles, Clerks, and the following officers were elected: Thomas S. Sampson, Chairman, S. H. Bishop, Patrick Coyne, Supervisors; Thomas W. Clapp, Clerk; G. Prior, Treasurer; Orlin Garvin, Assessor; S. H. Bishop, Andrew Walton, James Trainer, Justices of the Peace; James H. Lent, A. R. Gleason, Chauncey Bangs, D. Roseman, Constables. The following is a list of the town officers from organization to date:

1866—T. N. Hubbell, Chairman (resigned, and H. R. Miles appointed), Patrick Coyne, S. H. Bishop, Supervisors; George W. Anderson, Clerk; Louis Ruka, Treasurer; Chauncey Bangs, Assessor; James Trainer, H. Rankin, Justices of the Peace; James Lewis, Daniel Decker, J. B. Murphy, Samuel Neely, Constables.

1867—M. B. Clark, Chairman, John Sanger, Patrick Coyne, Supervisors; Henry A. Miles, Clerk (resigned, and L. M. Culver, appointed); George R. Garvin, Treasurer; S. A. Quincy, Assessor; D. H. Ballou, Chauncey Bangs, Samuel Neely, Justices of the Peace; E. N. Garvin, Richard H. Foster, Sylvester Keys, T. B. Anderson, Constables.

1868—J. F. Thompson, Chairman (removed from town, and John Murray appointed), Michael Friar, John Schuppner, Supervisors; T. N. Hubbell, Clerk; John L. Parker, Treasurer; Orlin Garvin, Assessor; George Brown, John L. Parker, Daniel Trum, Justices of the Peace; Samuel Adkins, John Schuppner, Richard Foster, Constables.

1869—T. N. Hubbell, Chairman, A. Lynett, James Connelly, Supervisors; L. M. Culver, Clerk; J. L. Parker, Treasurer; Chauncey Bangs, Assessor; M. B. Clark, John Sanger, Justices of the Peace; L. D. Adkins, J. C. Wood, J. B. Murphy, James Scott, Constables.

1870—T. N. Hubbell, Chairman, George Brown, Daniel Roseman, Supervisors; H. F. Walton, Clerk; John L. Parker, Treasurer; J. A. Faris, Assessor; John L. Parker, J. E. Taylor, James Trainer, Justices of the Peace; L. D. Adkins, Abraham Adkins, H. A. Taylor, Thomas Hanley, Constables.

1871—George Brown, Chairman, Orlin Garvin, John Martin, Supervisors; H. F. Walton, Clerk; John L. Parker, Treasurer; James Faris, Assessor; M. B. Clark, Thomas Garvey, Justices of the Peace; Lewis Adkins, George A. Lance, Peter Morgan, Samuel Neely, Constables.

1872—George Brown, Chairman, Orlin Garvin, John Sanger, Supervisors; H. F. Walton, Clerk; John L. Parker, Treasurer; James A. Faris, Assessor; John L. Parker, J. W. Horsfall, Justices of the Peace; George A. Lance, James E. Taylor, James Williamson, Constables.

1873—George Brown, Chairman, Orlin Garvin, John Sanger, Supervisors; H. F. Walton, Clerk; J. L. Parker, Treasurer; James A. Faris, Assessor; D. H. Ballou, J. W. Horsfall, J. J. Dodds, Justices of the Peace; William Tennant, J. Williamson, William Vince, Constables.

1874—George Brown, Chairman, Daniel Roseman, Orlin Garvin, Supervisors; H. F. Walton, Clerk; John L. Parker, Treasurer; James A. Faris, Assessor; John L. Parker, William Vince, Justices of the Peace; James Milborn, James Williamson, Constables.

1875—George Brown, Chairman, Alex Lynett, Daniel Roseman, Supervisors; F. E. Fitch, Clerk; John L. Parker, Treasurer; James A. Faris, Assessor; John Horsfall, D. H. Ballou, J. J. Dodds, Justices of the Peace; J. Williamson, William Vince, William Tennant, J. Randall, Constables.

1876—George Brown, Chairman, Orlin Garvin, Daniel Roseman, Supervisors; H. F.

Walton, Clerk; John L. Parker, Treasurer; James A. Faris, Assessor; John L. Parker, J. J. Scanlon, Justices of the Peace; Lewis Adkins, George Potts, Constables.

1877—George Brown, Chairman, Alex Lynett, J. F. Sanger, Supervisors; T. S. Richards, Clerk; John L. Parker, Treasurer; James A. Faris, Assessor; M. H. Dunn, John L. Parker, J. J. Quinn, Constables.

1878—George Brown, Chairman, J. J. Scanlon, Orlin Garvin, Supervisors; T. S. Richards, Clerk; F. E. Fitch, Treasurer; James A. Faris, Assessor; J. J. Scanlon, Justice of the Peace; William Tennant, Constable.

1879—George Brown, Chairman, Patrick Glynn, Orlin Garvin, Supervisors; H. F. Walton, Clerk; James Ellis, Treasurer; James A. Faris, Assessor; D. H. Ballow, John Quinn, J. W. Horsfall, Justices of the Peace; Leander Knox, William Tennant, Constables.

1880—James A. Faris, Chairman, Patrick Glynn, John Martin, Jr., Supervisors; H. F. Walton, Clerk; John Sanger, Treasurer; John R. Murphy, Assessor; ————, Justices of the Peace; ————, Constables.

1881—James A. Faris, Chairman, Patrick Glynn, John Martin, Jr., Supervisors; H. F. Walton, Clerk; John Sanger, Treasurer; John R. Murphy, Assessor; D. H. Ballou, Justice of the Peace; John McGeary, Constable.

BLUE RIVER STATION.

Several years after the completion of the Milwaukee & Mississippi Railroad, a flag station was inaugurated at this point. This was afterward made a regular stopping-place, and depot buildings erected about 1866. The first permanent settler at this stopping-place was Joseph Elliott, who came in 1862, and erected a residence and store building, both being under the same roof. This was the only building in the place, with the exception of a section house, until the coming of Mr. D. Perigo, in 1863, who erected a house and started a store. He purchased the land immediately adjoining the station, and laid it off in village lots the following year, Noah Titus being the Surveyor. This same year, Gus Matthews, now of Wingville, came and put up a house. Soon after his arrival, Mr. Perigo succeeded in having the new settlement placed among the list of post offices, he being appointed the first Postmaster; he resigned a few years afterward in favor of Charles S. Taylor, who succeeded him as proprietor of the store. Upon Taylor's departure, the office again fell to Mr. Perigo, who kept it until his resignation in favor of William Northey. About the time of Mr. Perigo's sale of his stock to Charles Taylor, A. B. Miller put up a store, and still is in trade. D. C. Perigo was the first station agent, holding the position until 1869, when William Northey took charge of the company's interests. He remained until 1879, when he was succeeded by D. A. Taylor, the present agent.

The first school in the place was taught by Mrs. Ed Carroll in a little building standing east of the station and just south of the track. The building has since been torn down. The first and only schoolhouse was built in 1866, the first teacher being Eleanor Bailey.

There is but one church organization in the village, the Methodist, among the Pastors of which are found the names of Revs. Sackett, McMillen, Smith, St. John, Hurd, Snodgrass and Rev. Cliff, the present Pastor.

A lodge of the Sons of Temperance was established here February 2, 1873, with about twenty charter members. William McMullen was elected Patriarch, and Andrew Harris, Division Deputy. The lodge, after an existence of five years, surrendered its charter in 1878.

In the spring of 1878, a lodge of Good Templars was organized at Blue River, but, after a brief struggle against dispiriting influences, it gave up the ghost. March 18, 1881, Blue River Lodge No. 381, and the second lodge of the order, was organized by J. T. Cleghorn, S. D., and at present is in a fair condition, meetings being held in the schoolhouse.

CHAPTER XVII.

DISTINGUISHED DEAD.*

HON. J. ALLEN BARBER.

BY C. K. DEAN.

Perhaps, the leading events of Mr. Barber's life are as correctly and fully summed up in the Wisconsin Volume of *The United States Biographical Dictionary*, of 1877, as we are able to give at present writing. We therefore copy them here :

"Joel Allen Barber, son of Joel and Aseneth Meloin Barber, is a native of Vermont, and was born at Georgia, Franklin County, January 17, 1809. His great grandfather was from England, and settled at Canton, Conn. His mother was of Welsh descent, and her father was a Captain in the Revolutionary army, serving through the war. Young Barber farmed till his eighteenth year, when he entered the Georgia Academy, and fitted for college; entered the University of Vermont in the summer of 1829; left at the end of two and a half years, determined to carve a career for himself. Read law with Hon. George P. Marsh, of Burlington; was admitted to the bar in Prince George's County, Md., in 1834, after teaching school there two years. He returned to Vermont and practiced at Fairfield until 1837, settling, in September of that year, at Lancaster, Wis. Here he has been in the practice for forty years, at times mingling land operations with legal business, but not enough to interfere with his profession. His legal knowledge is sound and extensive; he has a high standing as a criminal lawyer, and, in all respects, has long been an honor to the profession.

"During the forty years that Mr. Barber has been a resident of Grant County, he has held some official position two-thirds of the time. He was on the County Board of Supervisors several years, and its Chairman five; was County Clerk four years; District Attorney three terms; three terms member of the Lower House of the Legislature; one term in the State Senate, and a member in the Forty-second and Forty-third Congresses. In the House of Representatives, he was on the Committee on War Claims and Revision of the Statutes. He seldom spoke, but was an indefatigable worker.

"Originally Mr. Barber was a Whig of "Free-soil" tendencies, and naturally identified himself with the Republican party, to which he has steadfastly adhered.

"Mr. Barber has abilities fitting him for any office in the gift of the people of Wisconsin; is a man of solid character as well as intellectual qualities, and is one of those statesmen whose records were an honor to a State."

The foregoing appears at the head of an obituary article in the *Grant County Herald*, of June 30, 1881, furnished to that paper by Judge J. T. Mills, of Lancaster, which, by its original matter following the above, pays a very high and just tribute to the personal worth of Mr. Barber, in accordance with the writer's own knowledge, entirely supported by the popular judgment.

Mr. Barber died at his residence in Lancaster at 2 o'clock A. M., June 28, 1881, of *peritonitis*, after a painful illness of one week. His burial followed in the afternoon of the 29th, amid manifest expressions of deep-seated and general sorrow, the pall-bearers being Judge M. M. Cothren, of Mineral Point; Ex-M. C., H. S. Magoon, of Darlington; Hons. William E. Carter and A. W. Bell, of Platteville; John G. Clark, of Lancaster, and C. K. Dean, of Bos-cobel.

The press, local and in many cases remote and general, at once gave evidence of the high estimation in which the deceased was held, both in public and private life; which tributes, though they will fail to reach the consciousness of him whose virtues they commemorate, may yet tend in some degree to assuage the grief of those who live to mourn his loss.

*The sketches herein contained were received too late for insertion in proper chapter.

Gathering sheaves of testimonial from this wide field of obituary harvest, we shall find that J. Allen Barber, at the time of his death, and for many years prior thereto, had few equals in those qualities deemed essential in the institution of the highest manhood, or in the estate of the good and useful citizen. From these concurring evidences, there may truthfully be added to the record already given; that, though frequently honored with high political station, he had an intense dislike to all office-begging, and scrupulously avoided contaminating himself by this popular, and it is much to be regretted, profitable vice, one moment in advance of a strong and well-defined popular sentiment running in his behalf; that he was a friend and supporter of all rational public enterprises; a free giver in charity, and as a creditor to worthy but unfortunate debtors, a marvel of indulgence.

And it may also be added that he was possessed of rare attainment in ancient and modern lore, and kept pace with all the developments of scientific research; and was a man who held his family endeared to him by the ties of affection, constancy, kindness and liberality. We are able readily to understand how, by virtue of his correct personal habits, his professional honesty and fidelity, his love of liberty and regard for public justice, and his impatient hatred of every grade of meanness and corruption, he early won and lastingly held the esteem of all good citizens having knowledge of his virtues.

One, to have seen him in his most noble carriage, had but to hear him in conversation among friends; or pleading at the bar; or, more conspicuously still, addressing a popular assembly on matters touching the rights of any oppressed person, however humble, or of masses of people, or, touching the maintenance of the honor and integrity of the Union. Then the ordinarily hidden impulses of his nature would become strikingly manifest in his earnestness of speech and gesticulation, set off by the glow of his highly intellectual features.

This exalted trait in Mr. Barber's character is further shown—æsthetically in this case—by the designs and inscriptions embellishing that excellent work of art and patriotism, the soldier's monument, standing in the court house square at Lancaster, as he was one of the committee who had this matter in charge when this work was done in 1867, his associates being Addison Burr, of Lancaster; George R. Laughton, of Platteville; J. C. Cover and Judge J. T. Mills, of Lancaster. The broken shackle, token of four and one-half millions of slaves made free; the declaratory mandate of President Lincoln's Emancipation Proclamation, that timely, giant stroke of a noble pen, which gives to this token its mighty significance, engraved upon the marble faces of Grant County's most honorable memento, speak also as well of the loyalty and humanitarian impulses of all the several members of this citizen committee.

True history, especially of a personal nature, affords grand incentives to all laudable ambition, and in this view it is not an unreasonable hope that the youth who may hereafter have their lots cast in Grant County, on reading this history of one of its earliest settlers, and learning to what high degree of merit and esteem he managed to attain by his own unaided efforts within this field of labor, mainly, will find herein a fresh and an abiding incentive to highest possible endeavors in the way of usefulness and good citizenship, within and for the advantage of this same field of labor.

JOSEPH C. COVER.

Joseph C. Cover was born at Smithville, Fayette Co., Penn., February 1, 1819. From his childhood, Mr. Cover became attached to books, receiving this inclination from his mother, who was a great reader. His father possessed tastes directly opposite, and his son speaks of him as an inveterate hunter and lover of nature, often visiting the Alleghanies, living there alone days at a time, feasting on game and what wild fruits these mountains supplied. The subject of this sketch had an only brother, John, who was full of adventure, and when California became a part of the United States, he rushed to that region with the thousands that love of gold or novelty drew to that favored clime. Unfortunately he went into business at Panama, took the Chagres fever and died there in 1852, in his thirtieth year.

Mr. Cover migrated to Wisconsin and reached Grant County in April, 1846. He had a

good common school and academic education, was a rapid thinker, and capable of reducing his thoughts to writing with great facility—with such a talent and with a deep interest in the political issues of the times, a pretty wide acquaintance with the leading men, and an industrious reader of their speeches, it was very natural for Mr. Cover, then a young man, to find his way into a printing office, read the exchanges, and write occasional articles for the press. It was such tastes that finally determined the course of his future life. A young man to become successful must discover his adaptation. We cannot make farmers, lawyers, doctors, merchants and editors to order. Failure or half success will balk a young man till he finds the theater of activity for which nature intended him. Mr. Cover was not adapted to a trading mercantile life, and a generous nature could hardly exact the payment of a debt, when the debtor complained of hard times. A feeble constitution unfitted him for pursuits requiring great physical exertion. His scholarship and tact would have secured him an honorable position as a teacher. He could not brook the confinement. In 1851, Mr. Cover purchased the *Herald* office and paper of J. L. Marsh, Esq., and as editor of that paper found a position and employment adapted to his tastes, and giving free scope to his mental activity. It would be no disparagement to other journals to affirm that no paper in the western part of the State has exerted a wider influence on public opinion than this sheet so long as Mr. Cover was its active editor. Mr. Cover was a member of the original Liberty party, and voted for James G. Birney in 1844. Both the political parties were astonished at the persistence, strength, intellectual power and purpose of this strange party that threatened the extinction of one or both the then existing organizations. The Whig party was disintegrated after the defeat of Gen. Scott, and the Republican party was organized in 1856, inheriting the zeal and purposes of the Liberty party, but with larger national aims, embracing an entire programme of policy applicable to all branches of the government and all needed reforms. The columns of the *Grant County Herald* at that period showed abundant evidence of the industry, faithfulness and zeal of its editor in the cause of universal freedom. The Know-Nothing party soon disappeared with the organization of the Republican party. The Republican party by insisting on the rights of human nature, equal rights without regard to race or color, removed to a great extent the narrow prejudices which were the Know-Nothing stock in trade. The editor of the *Herald* saw the inconsistency between Know-Nothingism and Abolitionism, and claims that political rights belonging to manhood could not be forfeited by the accident of birth. The editor of the *Herald* not only endeavored to teach anti-slavery to its readers; he was always observant of public opinion. He became a personal acquaintance of almost every old settler in the county, and took an interest in horticulture as devoted as that of the "white-coated philosopher." He and his partner, N. C. Goldsmith, were the founders of the first successful nursery in this part of the country.

He wrote incessantly, not only for his paper, but essays, arguments, letters, addressed to his fellow-citizens on all sorts of topics, wherever there was a desire to interchange opinion. Perhaps in half the dwellings in the county there are yet seen written pages that testify to the interest that Mr. Cover felt in the welfare of his fellow-citizens, in the dissemination of his opinions.

His active years were devoted to his country's welfare in the moments of its greatest peril. Like all the old Abolitionists, he entertained a deep-seated religious faith that the historical intent and purpose of the war was the annihilation of the curse and crime of African slavery. He never faltered. Physically unable to shoulder the musket himself, his son, who had attained to manhood's estate, represented him in the chances of war. The pathetic and trustful remarks he published in the *Herald* when the young soldier bid him adieu, perhaps forever, expressed the feelings of many a parental heart in those cruel times.

But continuous labor for a quarter of a century, extending through the excitements, hopes, fears and anxieties of the rebellion, told heavily on Mr. Cover's health and spirits. A re-action and physical prostration followed; he needed repose. He expressed himself to a friend that the tone of his system must be restored, or he must die. It was for this purpose that he

resigned the editorial chair and accepted the consulship at Fayal. For several months after his arrival at Fayal, Mr. Cover continued to improve in health, but the second year of his residence the effect of the climate upon his system seemed to have become neutralized, and he again began to lose ground. In June, 1872, he sailed in the barque *Fredonia*, for Boston. His health seemed no worse during the first part of the voyage, and he varied the monotony of the voyage with the companionship of books. The final dissolution came suddenly and without warning, on the morning of the 4th of July, and the tired soul passed on to join the early friends gone before.

HON. CHARLES DUNN.

Although not a resident of Grant County for many years previous to his death, the name of Judge Dunn is so indelibly connected with the early annals of the county as to claim a loving remembrance in the chapter of distinguished dead.

Charles Dunn was born in Bullet County, Ky., December 28, 1799. His father was from Dublin, Ireland, and his mother, Amy Burks, was a native of Virginia. After having received a collegiate education at the best institutions of learning in that State, he commenced reading law with Mr. Worden Pope, of Louisville, continuing his studies with Mr. John Pope, of Frankfort. In 1819, he removed to Illinois, and finished his legal studies with Hon. Nathaniel Pope, then United States District Judge for Illinois, and the following year was admitted to the bar. He commenced the practice of his profession in Jonesboro, Ill., and was married in 1821, to Miss Mary Shrader, of Missouri, the beginning of a companionship extending over fifty-one years. Four sons and one daughter—Mrs. Gov. Dewey—were the fruits of this union.

The young barrister was soon after appointed Chief Clerk of the Illinois House of Representatives, and in 1829 was appointed by Gov. Edwards Acting Commissioner of the Illinois and Michigan Canal, and, with his associates, surveyed and platted the first town of Chicago, the Commissioners superintending the first sale of lots in 1829. The sales were continued during the two succeeding years.

In 1832, Mr. Dunn entered the service, and was engaged during the Black Hawk war as Captain of a company he raised in Pope County, Ill. Capt. Dunn was severely, and it was thought mortally, wounded in what is now called the town of Dunn, in that county, by a cowardly sentinel, whom he, as officer of the day, was proceeding to relieve. There were three in the company—Capt. Dunn, the Sergeant of the Guard and the relief. When, as they approached the sentinel on duty, in his terror forgetting the customary challenge, fired at the group at a distance of about ten paces, severely wounding Capt. Dunn in the groin. He was taken to Fort Dixon, where he remained until the close of the war.

He served a short time as Assistant Paymaster, and then resumed the practice of his profession. In 1835, he was elected a member of the Illinois House of Representatives, and served during the session as Chairman of the Judiciary Committee.

In 1836, upon the formation of the Territory of Wisconsin, Judge Dunn was appointed Chief Justice of the Territory, his associates being Judge Irvin and Judge Frazier, the latter being shortly after followed by Judge Miller. The bench, as thus composed, remained unchanged until the admission of the State into the Union in 1848. Judge Dunn was always esteemed a sound lawyer and upright judge; he was a man of dignified appearance, and was generally acceptable to the bar and the people of the Territory. His duties were quite onerous, as, during the greater portion of the time he was on the bench, his district was the most populous and important in the Territory, and produced the largest amount of litigation. But, notwithstanding all this, Judge Dunn performed his judicial duties with "ability, fidelity and integrity."

Of the convention which framed the constitution of the State Judge Dunn was a member, he being made President, *pro tem.*, in the organization of the convention, and afterward appointed Chairman of the Judiciary Committee. He took a leading part in the proceedings of that body, and his counsel was influential in shaping many of the provisions of the organic law of our State. As a speaker, he was concise and clear. "There was no eloquence in his manner of speaking, but his argument was strong and convincing. His speeches in this body were

frequent but never long. He was always heard with pleasure, and generally with profit by members of the convention."

During the sessions of 1853, 1854, 1855 and 1856, Judge Dunn represented La Fayette County in the State Senate, serving as Chairman a portion of the time on the Judiciary Committee. In 1856, the Judge was a candidate for Congress against C. C. Washburn, and he was also a candidate for the State Senate in 1870 against Hon. H. S. Magoon, who was elected.

In politics, Judge Dunn was always an able and true Democrat. A native of Kentucky, he retained Southern ideas of the slavery question, and opposed the Republican organization with all his power. While he was firm in his political faith, he treated his opponents with respect and fairness. In social life Judge Dunn was highly respected, and possessed qualities that rendered him very attractive and popular with his acquaintances. He was pleasant and instructive in conversation, and dignified and courteous at all times. He was without personal eccentricities, yet unlike other men. For years he continued to reside in the old capitol building at Belmont, the original capital of what are now four different States. His home was surrounded with extensive shrubbery and an excellent flower garden. With these, his books and his family, he passed his time, when not absent on professional business. He kept his body strong by constant exercise, spending much time with his gun, remaining for days in the woods, camping out in the autumn months. His annual deer-hunt was never adjourned, no matter what stood in the way. He kept his heart young by sunshine and regulated ambition. Judge Dunn was always averse to money-making outside of his profession, his usual remark being, "I tell you, my dear sir, these money-makers are not happy; my little fees are sufficient to supply my wants, if my friends would not forget to pay me what they borrow." Judge Dunn died on the 7th day of April, 1872, in the seventy-second year of his age, at the residence of his sister, Mrs. David W. Jones, of Mineral Point. At the time of his death, he was the oldest member of the legal profession in the State, and was actively engaged in practice to the last.

At a meeting of the members of the bar of the Supreme Court, resolutions expressive of the extreme respect and reverence and esteem felt by all for their departed brother were passed, followed by addresses by leading members. At a meeting of the bar of the State, the Hon. E. G. Ryan (so soon to join his great cotemporary) said: "It was Judge Dunn's lot in life to fill many stations, professional and lay, executive, legislative and judicial. So far as I know or have been able to learn, these sought him rather than he them. He certainly intruded himself into none of them. There was a modesty in the man which was rare in its generation. I think that his own estimate of his own powers was below, not above the estimate of all who knew him well. And he was a thoroughly earnest man. He filled all his offices with a singular fidelity and zeal, as if each in its turn were the chief end of his life. To say that he filled them with ability would be faint praise. He did not achieve success in them by just escaping failure. He was a faithful officer; his offices were never below him, but he was always above them. None of them gave opportunity of showing all that he was, of calling out the strength that was in him. They were all respectable, some of them were high. But his intellect, his culture, his general capacity, towered far above any station he ever occupied. We mourn for the untried powers which die out of the world with the young. Let us mourn for the world when it suffers great powers to die, unused in its service with the old.

"In his life Judge Dunn saw many men around him reach stations which he did not reach. Some of them rose worthily and usefully. Some rose only to show their own unfitness. With like pliancy or like artifice he, too, might have risen where his inferiors rose. But he was above these, and, standing below on the solid level of his own life and character, he ranked the superior of the most and the equal of any of his cotemporaries. He might have ennobled many positions filled by them—none of them could have ennobled him.

"His character was solid, strong and resolute, but not stern or harsh. His stronger qualities were softened by great sense of humor and great kindness of heart. He was generous and trustful to a fault. His foibles, for, like all born of woman, he had them, all arose from his genial character, the warmth of his heart and the kindness of his temper. Strong in character

among the strongest, he was, in carriage and manner, gentle among the gentlest. His culture was of a high order in and out of his profession. His knowledge of men and things, of the world and its ways, was profound. There were singularly combined in him the sagacity of a man of the world and the personal simplicity of a child. His sense of self-respect was unerring, and never deserted, never betrayed him. It is little to say that he was the soul of honor. He could be nothing that is false or mean. He did not know what treason was. That which he believed, that which he loved, that to which he gave his faith, were parts of himself. He could not desert faith, or friend, or duty, without betraying his own life. Dishonor in him would have been moral suicide."

Hon. George B. Smith said, in a few remarks, "On the formation of our State government, he retired from the bench, and, from that time to his death, he was engaged in the practice of his profession. His high character as a jurist secured for him an extensive practice in the western part of the State, and his benevolent and pure character made him, at all times and in all respects, the counselor and friend of a large circle of acquaintances. Although he died in the fullness of years, he died deeply regretted by all who knew him."

To conclude, in the language of another biographer, "He was endowed with moral and physical courage in a high degree; he was polite and condescending but no compromiser. For one-half of a century he has made history.

"Like a shadow thrown
Softly and sweetly from a passing cloud,
Death fell upon him."

JARED WARNER

was born in Canfield, Ohio, on December 6, 1811. He removed, with his father's family, to this county in the year 1838, where they made the first settlement in Millville, and built their first shelter on the banks of the Wisconsin River. They were towed up the Mississippi in a keel-boat, with several other families. These came not to make a fortune by speculating, or mining, or hunting, or gambling. They were among the first families that came to this new country to live here, to stay here, to die here. The school of "suckers" ascended the river in the spring, but swam south before winter. These families came here to make farms, build mills, and to test the fertility of our soil and its capacity to support a permanent population. That dull metal, known as "lead," has the honor of turning the attention of the enterprising classes in every part of the United States to the then Territory of Wisconsin. The idea of converting our great natural meadows into corn and wheat fields and spreading them out into a vast agricultural region, was hardly regarded as probable or possible. But cabins began to make their appearance, and small inclosures ran out into the prairies from thicket and grove; there were beaten paths to the nearest spring; attempts were made to cultivate the apple and even the peach. The sod dug-outs and pole shanties were supplanted by more pretentious cabins, and the cheerful word "home" found its way in ordinary conversation. Mr. Warner and his father built the first pine saw-mill in this county, as we are informed. The small stream that discharges into the Wisconsin in the town of Millville became the center of a large business. Here Mr. Warner, then a young man, engaged in the lumber business without a rival, and few houses were built in that part of the country at that time that had not some of its material from his manufacture. He loved business activity—it was a necessity of his nature, and he had less delight in making money than in the pleasures of employment and the perfection of machinery. The cunning handiwork of the inventor always attracted his study and admiration. Mr. Warner was too much of a student, too fervently attached to ideas and opinions ever to become a millionaire. Having secured what he thought was a competency, he abandoned his saw-mills, settled in Patch Grove, where he bought a fine tract of land, built a comfortable house, improved a neat but not extensive farm and superintended its cultivation till the season before his death. Here he enjoyed years of comparative leisure, read books, periodicals and newspapers on all sorts of subjects, and developed those mental traits and speculative opinions that will

cause his name to be remembered long after his lumbering and farming are forgotten. Boldly asserting the most unpopular opinions and advocating them with original arguments and illustrations, he compelled his oponents to read and study like himself, so that there are few neighborhoods anywhere to be found where the arguments for and against revealed religion, involving every branch of human knowledge, are more generally understood and examined. The majority of men and women must ever dissent from many of Mr. Warner's views on political and religious subjects; still he believed them to be better adapted to further human happiness than any other, and, when satisfied of the sincerity of the heart, we should pardon the aberrations of the head.

Mr. Warner had been a great sufferer for several months before his death, but seemed desirous of concealing, as far as possible, his failing condition. He had been much in public life; a member of the Legislature, often in the County Board. He was Collector of Taxes in his town at the time of his death. In this business his intimate friends discovered his memory began to fail. He was original in his modes of doing business. He believed men were more likely to pay a debt when not bound to it by mortgages and securities. He often lent money without even a note of hand, making a memorandum of it in his account book. At his death some of his loans had been forgotten, but those he had accommodated readily come forward and told what they owed. On the day he died, he was observed in the morning to be writing on a sheet of paper. He placed this paper in an atlas, where it was accidently found afterward. He then went to his barn, about one hundred yards distant from the house, to turn out his horse and cow. Mrs. Warner, knowing his custom was to walk every day down to the post office and through the village, thought nothing of his absence. At dinner time it was found he had not visited Mr. Paul's. Miss Weed, who was then living in the family, immediately ran down to the barn. Mr. Warner was lying on some hay as if asleep. She attempted to arouse him. She stepped back affrighted. Jared Warner was dead!

Mr. Warner thought an obligatory will might cause contention. The paper he had written in the forenoon was found to contain his wishes in reference to the division of his property.

And such was the effect of this simple writing, that his wife and children all met together at his house, in obedience to his injunction, and by solemn writing and deeds divided their inheritance precisely as he advised.

Thus passed away one of the most remarkable men known on the roll of the old settlers of Grant County.

JOSEPH C. ORR.

Joseph Crain Orr, one of the earliest settlers in the county, was born at Cincinnati, Ohio, May 30, 1802. He was the eldest child of James Orr, who was born in Lancaster County, Penn., September 4, 1772.

The early years of his life were passed at Franklin, Ohio, where he received a common-school education, and learned the tanner's trade. In 1826, he was married to Miss Levillette Dearth, at Springboro, Ohio. Ten children, eight of whom are now living, were the fruit of this long and happy union. Soon after his marriage, Mr. Orr emigrated to Michigan City, Ind. He was one of the first settlers in that place. He helped lay out the city, and built its first house.

In 1836, he came to Grant County, Wis., where he entered and improved a farm on Blake's Prairie. Here three years afterward he removed his family, and here continued to reside till his death, April 11, 1881, a period of forty-five years. Mr. Orr will long be remembered in the community in which he for so many years resided. His was a strong, and in many respects peculiar character. Self-contained and taciturn almost to eccentricity, cautious and conservative to the last degree, he possessed remarkable clearness of judgment and great firmness of will.

By nature silent and reserved, he mingled little in society; in manners quiet and unobtrusive, he neither sought nor desired notoriety or influence. But to character such as his,

influence always comes. By deeds rather than by words, he impressed upon the community in which he lived for almost half a century, the abiding lessons of a singularly pure and honest life. In his personal affairs, his cautious prudence, his broad good sense, resolute will and sterling integrity brought abundant success.

Too modest to seek political distinction, his practical knowledge of and sympathy with the public wants, and above all his uncompromising fidelity to every trust, brought him, in the early days of the county, into prominent notice. He was one of the Commissioners that first laid out most of the county roads, and at different times was a member of the County Board of Supervisors.

Of good laws and good order he was the cordial supporter. In education he took a personal active interest. The schoolhouse and the university found in him a ready friend and patron. Though he never obtruded his personal views upon strangers, and rarely engaged in political discussions, upon all matters of public interest he held clear, intelligent and well-grounded opinions. In every cause he espoused, truth and right were the criterion of his choice, the end of his effort.

In his domestic relations he was peculiarly happy. He was the kindest and most indulgent husband and parent. His large family of children, save one, who died in the war of the rebellion, grew to honorable manhood, and settled in life almost within sight of the paternal roof. His wife, the faithful companion of his long life, was his companion as well in death. Surviving him but a few weeks, she was laid by his side ere the grass was green upon his burial-place.

HON. BEN C. EASTMAN.

Among the distinguished coterie whose names grace the pages of the early history of the county, and by whose talents and ability Grant County was pushed to the front rank almost from the beginning of its settlement, none filled a larger space than Mr. Eastman. The son of Hon. Samuel Eastman and Jane Eastman, he was born at Strong, Franklin County, Me., October 24, 1812. He received, as he advanced in years, a common school and academic education, after which he turned his thoughts to the legal profession, and commenced the study of law with Judge Emmons, of Hollowell, Me., afterward completing his studies with Judge Hall of New York. In 1838, he left the East for the new Territory of Wisconsin, stopping first at Green Bay, where he entered into a law partnership with Morgan L. Martin. The succeeding year, Mr. Eastman removed to Grant County, locating at Platteville, which remained his home from that time until the date of his death, February 2, 1857.

As a lawyer, Mr. Eastman exhibited marked abilities, ranking among the foremost of that bar which was rarely equaled and never excelled in the State.

Political questions were viewed by Mr. Eastman from a Democratic standpoint, and his marked abilities were recognized by that party, resulting in his election as a member of the Thirty-second Congress for the Second District. Upon the expiration of his term he was honored by a re-election, and faithfully did he protect the interests confided to his care by his constituents. At the close of his second term Mr. Eastman retired to private life, and, although an active participant in political matters and occupying a prominent position in the county, he accepted no further official position, but devoted the years previous to his death to his practice and attention to private interests.

Mr. Eastman married Miss Charlotte L. Snoall, of Hollowell, Me., who remained to mourn his early death. Though cut off in his prime, and just as the county of his adoption was entering upon its fullest prosperity, he had still left his imprint upon the pages of its history, which will ever remain as long as Grant County continues as an integral portion of this great State.

LANCASTER.

REV. EVAN ARTHUR, died at Beetown, March 21, 1881, in the 65th year of his age. He was born in Wales, and came to the United States about 1833, at the age of 18, and soon became a master workman in the iron rolling mills of Pennsylvania; afterward was Superintendent of several mills in other States. He traveled considerable, residing in and traveling over thirteen different States. He came to Grant Co. in 1850, and settled at Cassville, where, in 1851, he lost his wife, Martha Arthur; soon thereafter he moved into the town of Beetown, where he has ever since resided. He united, when a mere boy, with the church, and, for the last quarter of a century at least, has been an active Christian worker and a consistent member of the Methodist Church, saying, just before his death, "My peace has been made with God for many years." Wherever known he was universally respected as one of God's noblemen. By his death the county loses an old, respectable citizen. He left eight children.

L. J. ARTHUR, of Lancaster (son of Rev. Evan Arthur), attorney at law and Notary Public; was born near Dubuque, Iowa, June 29, 1850; came to Grant Co. in 1851, and settled at Cassville; he has resided in said county ever since. He graduated at the Platteville Normal School in 1871; during the following winter, he was Principal of the Potosi Graded School, and, during the next succeeding two years, was Principal of the Cassville Graded Schools; in 1875, he graduated in the Wisconsin University Law School, and has been practicing law at Lancaster, Wis.; he was a candidate for District Attorney in 1880. Was married, June 6, 1878, to Miss Emma Ziegler, daughter of M. M. Ziegler, of Lancaster. Mr. Arthur is a self-made man, having borrowed money and schooled himself, both in the normal and the law school; friends, who knew him from childhood, lent him money on his own note, when he was only 16 to 18 years old, thus furnishing him the means to educate himself. He now has an elegant home, and has a good law practice and is in fair circumstances. He is known as an earnest temperance man and temperance worker; his example and success are well worth the consideration of young men.

WILLIAM ALCORN, carpenter, Lancaster; a native of Ireland; he came to New York in 1833, and remained there until 1845, when he came to Grant Co., where he has since resided and worked at his trade. He was married, in 1849, to Miss Miram Lockhardt, a native of Indiana. Mr. Alcorn has been, for over twenty-five years, a member of the I. O. O. F.; he is a member of the Grand Encampment, and has passed all the chairs of the subordinate lodge. They have had ten children, eight of whom (four sons and four daughters) are living.

GORHAM ALEXANDER (deceased); a native of Jefferson Co., N. Y.; he came to Grant Co. in 1840, and located in Beetown; Sept. 4, 1861, he enlisted in Co. F, 10th W. V. I.; he was taken sick while in service, removed to a hospital in Nashville, where he remained a short time, and was then taken to the hospital at Louisville, Ky., where he died in January, 1863. He was married, in 1846, to Miss Emily Ward, a native of Vermont, and left four sons and five daughters. Mrs. Alexander resides on a farm on Sec. 13; P. O. Liberty Ridge.

CHARLES H. ANGUS, farmer, Sec. 30; P. O. Lancaster; he was born in Montgomery

of Lancaster. In January, 1863, he enlisted in Co. K, 47th W. V. I., and served about eight months, when he was discharged from the hospital on account of disability. They have five children—John D., Ed W., Charles B., George P. and Laura C. Mrs. Angus is a member of the Congregational Church. Mr. A. is a member of the I. O. O. F., and in politics a Republican.

ALFRED E. AUSTIN, farmer, Sec. 2; P. O. Lancaster; born in town of Lancaster, Wis., Oct. 30, 1858; went to Iowa in 1878, returned in 1880; owns 118 acres of land, with a fine large house and barn; is a stock-raiser. His sister keeps house for him. In politics a Democrat. His parents were Henry and Mary Austin, natives of England.

HENRY AUSTIN, farmer; P. O. Lancaster; was born at Terickenham, Middlesex, England, Nov. 20, 1821. He left London March 21, 1846, in the ship Mediator; landed at New York City May 4, 1846, after a pleasant trip of six weeks; after a short stay in the city, he started for Detroit, Mich., intending to enter the nearest Government land to the city; he found 80 acres, which he entered; this was at Flat Rock; built the first home in America, where he remained five years, then, on account of the fever and ague being so bad, he sold and removed to Wisconsin in the year 1851, near Lancaster, and bought 40 acres of improved land of Myron Tuttle, an old settler, which place he has added to until he now owns 501 acres of land, with a fine brick house, 22x22, with good barn, 20x20, stable, 18x30—a fine home, made mostly by his own industry; he is quite extensively engaged in the stock business and grazing, as his farm is adapted to that line; also in the creamery business, and has made it a success. His first wife, Miss Eliza Children, was born at Bethnal Green, London, April 17, 1825, and married at St. George's Church, Southwark, London, Jan. 19, 1841, died at Lancaster, Grant Co., Wis., Nov. 10, 1855; by this union there were five children—Eliza, born at Hanworth, Middlesex, England, Jan. 14, 1842; Henry, born at same place Oct. 27, 1843, now residing in Appington, Butler Co., Iowa, as is also William, who was born at the same place Feb. 6, 1846; Jane was born in Michigan, July 30, 1848, died at Lancaster, Wis., March 23, 1853; Arthur G., born in Wisconsin Sept. 30, 1854, died at Walla Walla, Washington Territory, Sept. 8, 1878; his second wife, Mary Ann Penrice, a native of Accrington, Lancashire, Eng., born Dec. 18, 1841; came to America with her parents about thirty years ago; settled at Milwaukee, Wis.; they now live at Eskridge, Kan.; married Jan. 10, 1858; they have seven children—Alfred E., born Oct. 30, 1858; Walter A., March 20, 1860; Charles F., March 22, 1862, died November, 1876; Reuben A., born Sept. 27, 1864; Ellen A., Dec. 16, 1866; Edwin J., May 7, 1869; Mable A., July 19, 1877. In politics, Democrat; in religion, Swedenborgian. Has been Clerk of School District No. 3 two years.

J. H. BALDWIN, watchmaker and jeweler; commenced business Dec. 5, 1879, with an assortment of jewelry, clocks, watches, plated and silverware; his business has increased, and he carries at present a \$2,500 stock. Mr. Baldwin learned his trade in Illinois, where he was engaged in business with his brother for ten years. He is a native of Ohio, born near Cleveland Nov. 18, 1848; a son of A. S. and M. J. (Harding) Baldwin. His early life was spent on a farm.

JARED E. BARNETT, proprietor of stage and express line; commenced this business in 1868, succeeding his brother, Thomas Barnett; he is a native of Jefferson Co., Penn., born Feb. 25, 1831; in 1847, he came to Lancaster with his parents; his father built the Telegraph House in 1848, and kept it until 1852, when he exchanged it for the hotel where the Phelps House now stands, and long known as "Barnett Corner." His mother dying, his father abandoned the hotel, and, in September, 1863, died, at the age of 66. Mr. Barnett was married, July 8, 1856, to Miss Harriet Fisher, daughter of Herman and Mira (Elderkin) Fisher; they have three sons and four daughters—Nellie, Mira, Mary, Harry, Fred, Hattie and Ralph.

J. O. BARTLETT, proprietor of restaurant and confectionery store; opened his store in the spring of 1876, first in John Larkin's building; in the winter of 1878, he moved to his present store in the Henry Remeyer building. Mr. Bartlett has been a shoemaker in Lancaster since June, 1869, carrying on both branches of business until January, 1880, when failing health compelled him to lay aside shoemaking. He was born in New Hampshire Oct. 15, 1824, a son of Daniel W. Bartlett. He was married in New London, N. H., in May, 1850, to Miss Elizabeth Haines; they have two sons and a daughter—Victor L., George E. and Belle.

C. H. BAXTER, of the firm of Howe & Baxter, general merchants; is a native of New York, and was born in Stillwater, Saratoga Co., Nov. 15, 1841; he came with his parents in 1857, and they located in Grant Co.; in August, 1860, he entered the store of George Howe as clerk, and remained until the fall of 1862, when he entered the army, enlisting as private in Co. C, 25th W. V. I.; he was taken sick on the Yazoo River and discharged; he afterward raised a company which became Co. K, 47th W.

V. I., and was commissioned Captain and was sent to the Department of Middle Tennessee, with headquarters at Tullahoma, and, by order of Gen. Thomas, he became Chief of Ordnance Department, Middle Tennessee, on the staff of Gen. Vaneleve and Gen. Milroy, and served in that position until the end of the war. After his return from the service he became a partner of Mr. Howe, and since then has been successfully engaged in mercantile business here. Mr. Baxter has served as Chairman of the Republican County Central Committee of Grant Co. for the past five years; has also served as member of the Town Board; he was elected the first President of the Veteran Soldiers Association, of Grant Co., and was re-elected to the same position. Mr. Baxter was united in marriage, Feb. 20, 1865, to Miss Maria Howe, daughter of George Howe, an old and honored merchant of Lancaster. Mr. and Mrs. Baxter have two children—George Howe and Laura.

THOMAS BEETHAM, farmer, Sec. 9; P. O. Lancaster; owns 400 acres land, valued at \$20 per acre; born in Yorkshire, England, in 1843; came to America in 1849, and located in Janesville; came to this county in 1857; settled on present farm in 1872. Married Annie Dyer, a native of this county; have four children—John, Jessie, Nellie and Frank.

RICHARD BENNETT (retired); a native of Cornwall, England, born Sept. 20, 1813; he came to America April 10, 1847, landing in New York; June 10, 1848, he came to Grant Co.; he was engaged in mining most of the time up to 1870, since which time he has turned his attention to farming, with his son, but has lately retired from active business. He was married, June 8, 1833, to Miss Mary Vincent, also a native of Cornwall; they have had nine children—Ann (married), Eliza (married), Charles, Mary S. (married), Philip D. (deceased), Elizabeth (married), Sarah (married) and Ann (married). The son, Philip, enlisted in Co. F, 7th W. V. I., and was wounded July 1, 1863; he died July 5, 1863, at the battle of Gettysburg. Mr. and Mrs. Bennett are members of the Congregational Church.

LEWIS A. BEISTHAUPT, farmer, Secs. 27 and 34; P. O. Lancaster; he is a native of Ohio; came to Grant Co. in 1860; he enlisted in August, 1862, in Co. C, 25th W. V. I., and served until the close of the war. He was married, Oct. 11, 1859, to Miss Martha A. Strong; they have five sons and a daughter. The family are members of the Congregational Church. Owns 125 acres of land.

JOSEPH BOCK, of the firm of Bock & Schreiner, abstracts; was born in the province of Alsace, Germany; received a partly collegiate education; emigrated in 1857, and after a few months residence at St. Louis, settled at Cassville, in this county, the same year. Enlisted as a private in Co. C, 2d W. V. I., April 19, 1861; took part in the battle of first Bull Run, the skirmishes near Gordonsville, Va., near Richmond Railway and along Rappahannock, Va.; was wounded in both thighs at the battle of Gainesville, Va., Aug. 28, 1862; participated in Burnside's mud march against Fredericksburg; his wounds opened in 1863 and prevented farther active service, and he was mustered out of service in 1864. In 1865, he was elected Register of Deeds for Grant Co., and held that office until 1869, when he engaged in his present business and has the only set of abstract books of Grant Co. Mr. Bock was elected Representative to the State Legislature, and served during the sessions of 1876-77.

David Schreiner, of the firm of Bock & Schreiner; is a native of Hesse-Darmstadt, Germany, and was born Dec. 21, 1842; emigrated to America, and came to Wisconsin in 1855, and settled in Grant Co.; during the war, he enlisted in August, 1862, in Co. C, 25th W. V. I.; was slightly wounded at Decatur, Ga., and was severely wounded in front of Atlanta, August, 1864, losing the left arm; served until June, 1865; in 1869, he was elected Clerk of the courts, and held that office eight years; has held the office of Town Treasurer and Town Clerk, and is now Justice of the Peace. In May, 1869, he was married to Miss Clara Stelzner, from Indiana; they have two children—Laura and Ethelinda.

ALEXANDER G. BONHAM, Sec. 30; P. O. Hurricane Grove; owns 170 acres of land valued at \$40 per acre; born in Pike Co., Mo., in 1823, came to Wisconsin in 1834; settled on his present farm in 1848. Married Elizabeth Kilby, a native of Lincoln Co., Mo., and they have six children—Charles O., Lemuel E., Lenora, Lura, Laura and Mable. Mr. B. has been a member of the Town Board, and has also held the office of Justice.

FRANCIS H. BONHAM, farmer, Sec. 34; P. O. Lancaster; has 160 acres and 40 acres of timber in Harrison; was born Sept. 11, 1806, in Wythe Co., Va., son of Nehemiah and Isabella (Scott) Bonham. Mr. B. came to Grant Co. in 1827, and made several trips to Virginia, and in 1840 brought his family and settled at Hurricane Grove, and engaged in mining until 1844, when he removed to his farm where he has since made his home. On Dec. 23, 1830, he was married by Rev. Mr. Watters, in Pike Co., Mo., to Mary Ann, daughter of William and Lucy (Oglesby) Nevel, of Shelby Co., Ky., where she was born May 24, 1812; they had nine children—Euphemia J., now Mrs. D. D. Utt seven children.

William N., married Lizzie Parker, of Salem, Oregon, where they now reside, with three children; Matilda I., now wife of Samuel J. Shelton, of Salem, Oregon; Calvin R., married Anna Myers, of Salem, Oregon, he having previously married Sophronia Sears; Charles W., married Dolly Parker, of Canyon City, Oregon, has two children; Mary F., wife of Reuben G. Brooks, of Vermont, now at Hopkinton, Iowa, one child; Martha Ann, wife of C. M. Jackson; Lenora, wife of Mark Baldwin, died in the spring of 1878; James H. (his second son), died March 12, 1860, at 22 years of age. Mr. Bonham is a Protestant; in politics is a Republican, and participated in the meeting when the Republican party was organized in Grant Co.; he has in his possession a sword brought to America by his great-great-grandfather over 200 hundred years ago (he having been an officer in the British navy); the father of Mr. B. was an officer in the war of 1812. Mr. B. is a hearty, jovial old gentleman, and has for twenty years held the office of Justice of the Peace and several other offices, and states that when he settled here, there were no houses between his place and Lancaster, and that he cut the first tree to make the Lancaster road, and that there were only three or four houses on the Potosi road, $7\frac{1}{2}$ miles, and says he has been frequently in the sugar camp of old Black Hawk. Mr. and Mrs. B. celebrated their golden wedding, and received a number of very fine presents, a very fine easy chair from the "Potosi delegation," a \$20 gold piece, etc.

EDMOND H. BORAH, farmer, Sec. 23; P. O. Lancaster; was born in Kentucky June 2, 1820, of German parentage, who came to Wisconsin in early times. Mr. Borah after coming to Wisconsin worked by the month, then by his labors accumulated a farm of 200 acres of land; he then went to California, was very successful; he then returned to Wisconsin, traded for 300 acres of land, nicely improved by his own industry; he has been engaged in the stock business for about eight years; he is now in Kaosas, where he owns 580 acres of land on the Kansas Pacific R. R. His wife was Sarah M. Kilbey, who was born in Wisconsin, Dec. 29, 1836; they married Sept. 16, 1853; they have four children—Kilbey H., born Dec. 29, 1855; Adolph D., July 2, 1857; Nettie, Sept. 16, 1862; Georgie, March 1, 1868. Mrs. B.'s father was born in North Carolina, in 1806; came to Wisconsin in 1832; died in 1876; her mother, Rhoda Parsons, a native of Virginia, now 76 years of age, residing now at Hurricane Corners.

HENRY BRINKMAN, Sec. 28; P. O. Hurricane Grove; owns 80 acres of land, valued at \$40 per acre; born in Germany in 1829; came to America in 1857, and settled in this county; in 1865, he settled on his present farm. Married Sophia Kuhn, a native of Germany; they have nine children—Mary Lizzie, Fred. H., Clara, Edward, William, Annie M., Albert, Ellen Nettie and Fanny Eve.

ALLEN RALPH BUSHNELL, of Lancaster, of the firm of Bushnell, Clark & Watkins, lawyers, was born on his father's farm on West street, in the town of Hartford, Trumbull Co., Ohio, July 18, 1833. His father, Dr. George W. Bushnell, now over 80 years of age, and possessed of remarkable vigor, still lives on the old farm upon which he settled, then in the dense woods, in 1824; he is a native of Connecticut, as was also his wife, Sally Bates, now deceased, Mr. B.'s mother. Mr. B.'s early life was that of the usual farmer's boy, going to district school summer and winter term, until big enough to help on the farm, and then working on the farm through the farming season, and going to school winters. When 14 years of age, the Hartford High School was started, and he put in a few terms there. Here the intention of becoming a lawyer was formed. His school education was completed at Oberlin and Hiram Colleges, where he pursued a special course of study to fit himself for that profession, teaching school winters to help pay expenses. In the fall of 1852 he came to Wisconsin, and taught school that winter at Block House Branch, near Platteville. The following spring he went back to Ohio and resumed his studies until the fall of 1854, when he returned to Platteville, and has ever since then made Grant Co. his home. He studied law with Judge Stephen O. Paine, at Platteville, was admitted to the bar of the Fifth Judicial Circuit in the fall of 1857, and on December 1 of the same year, opened an office, and commenced the practice of his profession at Platteville. In the fall of 1860, he was elected District Attorney of Grant Co. On the breaking-out of the rebellion, he resigned that office and enlisted as a private in the "Platteville Guards" Company, which on going into Camp Randall in the summer of 1861. was made Co. C, 7th W. V. I., and elected him its 1st Lieutenant, S. J. Nasmith, an old soldier of the Mexican war, being made Captain. He served with his regiment in the Iron Brigade, mostly in Virginia; was in various battles and skirmishes; was promoted to Captain in 1862, and discharged for disability in 1863. On returning to Platteville, he in the winter of 1863-64 resumed the practice of law. On the election of the Hon. J. T. Mills to the position of Circuit Judge, on his invitation, he removed to Lancaster, occupied his law office, closed up Judge Mills' legal business, and has continued the practice of his profession there ever since. In 1867, he took into partnership in law practice, Col. John G. Clark. R. A. Watkins, Esq., was added to this firm Jan. 1, 1880, forming the present firm. Mr. B. was married in 1867, to Miss Laura F. Burr (daughter of Addison Burr, Esq., and his wife Martha Barber, of Lan-

caster), by whom he had three children, only one of whom, his daughter Mabel, is now living; Laura died in 1873. In 1875, he was married again to Miss Mary F. Sherman (daughter of Cyrus Sherman, deceased, and his wife, Fanny Barber, of Lancaster), his present wife, by whom he has had one son who died in infancy. Mr. B. has paid little attention to politics, but was a member of the Legislature of 1872. On the erection of the "village" into the "City of Lancaster" in 1878, he was elected its first Mayor. His residence is pleasantly situated in the northwest quarter of the city, on Bushnell street, and the northern continuation of Madison street.

COL. JOHN G. CLARK, attorney at law, of the firm of Bushnell, Clark & Watkins, was born in Morgan Co., Ill., July 31, 1825; he came to Wisconsin first in 1837; subsequently resided in Missouri several years. In 1847, he graduated from Illinois College, and returned to Wisconsin and engaged in mining; from 1849 to 1853 inclusive, he was employed in surveying Government lands in Wisconsin, Minnesota, Iowa and Missouri, and became familiar with all the hardships and exposures of such a life, surveying during that time perhaps as much land as any man in the State. In the fall of 1853, he was appointed Deputy Clerk of the Circuit Court of Grant County; in 1854, he was elected Clerk of that Court, and was re-elected in 1856, and again in 1858, to the same office, and in 1860, was elected to the Legislature. On the breaking-out of the rebellion, he went into camp with Co. C, 2d W. V. I., intending to go into the field with that regiment, but was prevented by a call of an extra session of the Legislature; on its adjournment, he entered the military service as Lieutenant and Quartermaster of the 5th W. V. I., and was with that regiment in all its campaigns until May, 1863, when he was commissioned Captain and Provost Marshal of the Third District of Wisconsin; in February, 1865, he was commissioned Colonel of the 50th W. V. I., and was sent to Missouri and placed in command of the First Subdistrict, composed of some half dozen counties, with headquarters at Jefferson City, till in July, when he was sent to Kansas, and for the first time was in command of his whole regiment; subsequently, he and his command were sent to the Upper Missouri among the Indians, where they remained till June, 1866; his regiment scouted over Missouri among the bushwhackers, and at Fort Leavenworth at the time of the mutiny, demonstrated that it was among the most reliable in the service; he keenly felt that the 50th was abused, and that insubordination was rewarded when mutinous regiments were mustered out before their term of service had expired, and it was sent out on the plains, where it could not by any possibility be discharged till long after. He was admitted to the bar in 1861, but did not commence practice till 1867. He has held many minor offices, such as Chairman of the Town Board, County Board, and Mayor of the city; was Chairman when the railroad was built, and was prominent in devising the ways and means, and in assuming the responsibilities that insured its construction; he has been active in advancing the interests of his locality in educational matters, and was instrumental in securing the erection of perhaps the best school-house in the State for the money expended in its construction. In 1874, he was a prominent candidate for Congress from this District, and again in 1880, but had his name withdrawn. He is connected with the Masonic order, and has served his lodge ten years as Master; he is also identified with the Odd Fellows; in 1878, he was Grand Master of the order in this State, and is now Grand Representative to the Sovereign Grand Lodge, re-elected in June, 1881. He was united in marriage, Feb. 19, 1852, to Miss Minerva A. Pepper, a native of Mineral Point, daughter of Harvey Pepper; they have one daughter—Alice, now Mrs. E. R. Tiel, of California—and one son—William Harvey Clark, now in Lancaster.

P. A. CLARKE, M. D., physician and surgeon, is a native of Newport, R. I., and was born Jan. 8, 1827. Received his education in New York State; studied medicine and attended lectures at Yale College and at the State University of Michigan, and graduated at Albany Medical College in June, 1854. After practicing medicine at Galena for one year came to Dunleith, Ill., where he continued practice until 1868, when he came to Lancaster, and since then has successfully practiced his profession here. In 1856, Dr. Clarke was united in marriage to Miss Mary A. Little, a native of Fairplay, Wis., and daughter of Dr. George Little. Dr. and Mrs. Clarke have two sons—George W., attending professional school in Dubuque; William H., attending the State University.

GEORGE CLEMENTSON, attorney at law, is a native of England, and was born March 13, 1842. His parents came to this country in 1849; came West to Wisconsin the same year, and located in Grant Co.; grew up and received his education in this State. Read law here and completed his law studies at the State University of Michigan; was admitted to the bar in March, 1868; after his admission, he engaged in the practice of law. In November, 1869, he associated with Hon. Allen Barber, and since then he has successfully practiced his profession in this and adjoining counties, and the firm of Barber & Clementson has a leading position as members of the bar in this section of the State. In the fall of 1868, was elected District Attorney, and held that office for four years. Since then he has

been repeatedly solicited to accept of the nomination for office, but has steadily refused, preferring to devote all of his time to the interests of his profession. He was united in marriage, May 10, 1869, to Miss Mary Burr, a native of Vermont; they have four children—George B., Joseph A., Martha and Bessie.

J. ALLEN COOMBS, farmer and carpenter, Sec. 31; P. O. Lancaster; a native of Grant Co., son of Ed. P. and Nancy Coombs, who came to Grant Co. in 1836, from Pennsylvania; his father died in 1849. In August, 1864, enlisted in the army; he served until July, 1866. In April, 1867, he was married to Miss Almira Morrell, native of Grant Co., a daughter of Ruel Morrell. They have three children—Alfred, Ed. C. and Millicent.

CALVIN CURRY, farmer, Sec. 35; P. O. Lancaster. He was born in Butler Co., Ohio, Nov. 2, 1797. He came to what was then called New Diggings, but now La Fayette Co., in May, 1833, and lived there for several years; he then went to Jo Daviess Co., Ill., where he remained until 1855, and then came to Grant Co. He was married in 1821, to Miss Jane Danile, a native of Indiana. They have five daughters and four sons living, and have thirty-two grandchildren and thirty great-grandchildren.

JACOB DIXON, blacksmith, opened his present shop in May, 1880. He came to Lancaster in November, 1873, and worked for D. H. Budd one year and a half, when Dixon & Co. bought out the business of wagon and carriage making and general blacksmithing. The firm names were Dixon, Hurley & Stewart; they did a prosperous business for two years, when, by mutual consent, the firm was dissolved, and business closed. Mr. Dixon then worked for John Pollock, and remained with him until he established his present business; he is also agent for farming machinery. A native of Fulton Co., N. Y.; born Sept. 25, 1827; son of Baltes Dixon. He spent the early years of his life on the farm, and at the age of 17 commenced to learn his trade. In 1848, he was married to Hannah Ellsworth of same county; she died March 23, 1862. In 1863, he was married to Miss Mary Jane Barney; they have two sons and two daughters—Walter R., Anna Lucretia, Jacob Jr., and Goldie, an infant daughter.

THOMAS DUNCALE, farmer, Sec. 17; P. O. Lancaster. Owns 140 acres of land, valued at \$20 per acre. Born in London, England, in 1831. Came to America in 1866; located on present farm in 1874. Married Ann Jackson, a native of Cheshire, England, and they have six children—Thomas, Samuel, Mary, Walter, Halford and Susan.

W. P. DURLEY, Register of Deeds of Grant Co.; is a native of the State of Indiana; was born Oct. 12, 1830. When he was only 4 years of age his parents came West to this Territory and settled in this county, about six miles southwest of Platteville, on the "Little Platte;" they were among the earliest settlers in this section of the State; they lived near an Indian sugar camp and Indian burying-ground—the Indians used to camp near there. Mr. Durley was raised on a farm, and in Platteville, and, after reaching manhood, engaged in mining. When the war broke out he enlisted, in 1861, in Co. C, 7th W. V. I. He was severely wounded in the battle of South Mountain, Sept. 14, 1862; was also wounded at the battle of Gainesville, Va., Aug. 29, 1862, and was discharged March 19, 1863, on account of wounds received in action. Was elected Register of deeds for Grant Co., in 1876, and was re-elected in 1878, and again re-elected in 1880. Was united in marriage July 4, 1865, to Miss Harriet A. Hoadley, a native of Grant Co. They have four children—George H., Robert H., Jennie M., Linda May.

WILLIAM J. DYER, farmer, Sec. 10; P. O. Lancaster; owns 80 acres of land, valued at \$25 per acre. He was born in this county in 1846. In 1869, he settled on this farm. He married Sarah E. Borah, also a native of this county. They have three children—William, Ruby and Laura. Mr. Dyer enlisted in Co. K, 47th W. V. I., in 1865, and was discharged in the same year.

REV. S. W. EATON, Pastor of Congregational Church; is a native of Framingham, Middlesex Co., Mass., and was born Dec. 25, 1820; he grew up to manhood in that State. After receiving his preparatory education, he entered Yale College and graduated in Class of 1842; pursued his theological studies in Yale Theological Seminary and in Union Theological Seminary, New York City, and was ordained Jan. 28, 1848. He came West to Wisconsin in 1846 (while it was yet a Territory in October, 1846), and accepted a call to become Pastor of the Congregational Church of Lancaster, Jan. 1, 1847, and since then, for a period of over one-third of a century, he has served as the faithful, acceptable Pastor of this church. In 1856, he took a vacation on account of ill health and went abroad, spending a part of the year in Europe. In 1862, he was Chaplain of the 7th W. V. I., and remained in the service three years until the close of the war, and was at Appomattox Court House at the final surrender. During his absence, the church had no settled Pastor; in fact, Dr. Eaton was the first Pastor of the church and its only one, and this church was his first charge and his only one; and there are very few churches in this country where the relations between Pastor and people have been so pleasant and undisturbed for so great a length of time. On the 20th of May,

1847, Dr. Eaton was united in marriage to Miss Catharine E. Demorest, a native of the city of New York. They have four sons—James Demorest, Pastor Congregational Church, Bound Book, N. J.; Edward Dwight, Pastor Congregational Church, Oak Park, Ill.; Samuel Lewis, physician; Charles Woodhull, physician, Des Moines, Iowa.

SAMUEL H. FARNSWORTH, farmer; P. O. Lancaster; residence one mile east of the court house. A native of New York; born March 3, 1813, in Clinton Co., a son of Phillip and P. (Parsons) Farnsworth. His father was a native of Vermont, and his mother of Long Island. They lived sixty-seven years together on the same farm, his father dying at the age of 93, and his mother at 87. Mr. Farnsworth is the fourth child of nine children. He spent the earlier years of his life on the farm, and resided seven years in Franklin Co. He was married in Clinton Co., Feb. 19, 1837, to Miss Cynthia Hazen. They came to Lancaster in June, 1858; lived in the village four years, and then moved on to his farm, which he had purchased on his arrival. They have six children living—Charles, George, Mary, Zeruah, Lillie, Nathan. His sons, Charles and George, were volunteers in the war of the rebellion. Charles went to the front as a private, on account of disability was discharged; re-enlisted in the cavalry, going as Second Lieutenant, returned First Lieutenant. George served three years a private, participating in sixteen engagements. They are now engaged in railroading as engineers. His wife died May 19, 1878, aged 60 years.

CORYDON FITZGERALD, farmer, Sec. 21; P. O. Lancaster; a native of Grant Co. In January, 1865, he enlisted in Co. K, 47th W. V. I., and served until the close of the war. Feb. 23, 1873, he was married to Miss Hattie Green, also a native of Grant Co., town of Fennimore. They have a son and three daughters. In politics, Mr. Fitzgerald is a Republican.

OLIVER P. GARDNER, farmer, Sec. 21; P. O. Lancaster. Owns 40 acres of land, valued at \$50 per acre. Born in Kentucky, in 1824. Came to Wisconsin in 1837; located on his farm in 1871. Married Lucy Ann Vedder, a native of New York, and they have four children—Lovilla J., Abby Ellen, Effie J. and Allen Eugene. Mr. Gardner enlisted in Co. H, 25th W. V. I., in 1862, and was discharged in 1865.

BENJAMIN GARNER, farmer, Sec. 36; P. O. Lancaster. Born in Huntingdon Co., Penn., May 10, 1826. Came to Wisconsin in 1850; bought 100 acres, now owns 217 acres of land, improved, with good brick house, two stories, 24x30, with wing 24x26; barn, 57x26; crib, 24x22; carriage house and other good outbuildings. Enlisted in 1861, in the 20th W. V. I., Co. E; mustered out in 1865. His wife, Catharine Sork, born in Blair Co., Penn., July 23, 1826. They were married in 1846; they have nine children—Solomon, born in October, 1847; died Aug. 24, 1854; Reuben, born Nov. 27, 18—; died Aug. 25, 1854; Mary Ann, born Feb. 23, 1854; died Aug. 27, 1854; Benjamin, born Oct. 1, 1855 (in Nebraska); William, born Feb. 27, 1838; died Aug. 20, 1859; Levi, born April 14, 1860; Lizzie, born May 14, 1863; Sarah J., born June 8, 1866; Matilda, born Aug. 22, 1871; died Aug. 27, 1873. In politics, Republican. A Presbyterian and Elder. Has been Treasurer and Director of schools.

LEWIS GELBACH, farmer, Sec. 30; P. O. Hurricane Grove. Owns 180 acres of land, valued at \$40 per acre. Born in Prussia in 1833. Came to America in 1846, and settled in Pennsylvania; came to Wisconsin in 1857, and located in Lancaster where he lived until 1869, when he removed to this farm. He married Sophia Napp, a native of the same place, and they have eight children—John, Charles, William, George, Mary, Nettie, Frederick and Ida.

CHARLES GOVIER, farmer, Sec. 7; P. O. Lancaster. Owns 360 acres of land, valued at \$25 per acre. Born in England in 1834. Came to America in 1855, and settled in Illinois; located on present farm in 1870. Married Belle Atkins, a native of England, and they have five children—Ellen, Linda, Edwin, Fred and Rolla.

GEORGE GRAY, proprietor of Grant Mills; P. O. Lancaster. Born in Scotland in 1830. Came to America in 1848, and located in New York State, where he remained three years, and then he came West and located in Iowa; came to Grant Co. in 1870, and purchased the Grant Co. Mill, farm and water-power. Has always followed milling, learned the trade in the old country. He has all the improved machinery, and makes a No. 1 flour; has a good water-power, and keeps everything in good shape. The mill is located on the "Big Grant," three miles from Lancaster, does mostly custom work. Mr. Gray is a bachelor, of a happy disposition, taking great comfort in his business, and among his stock. Republican in politics.

S. R. GREENE, proprietor of livery stable, Lancaster. Commenced business in April, 1879, buying out J. Kilbourn, keeps fourteen horses, and does a prosperous business. Mr. Greene is a native of

Potosi, Grant Co., a son of A. J. and Sarah (Lyons) Greene. Mr. Greene attended the schools of Potosi, which he left at the age of 15, and went into the stage business. Having a natural taste for horses, he continued in the business, and, in 1870, commenced running a daily stage-line from Potosi to Dubuque until 1873, when the C. C. & D. & M. R. R., was completed to Spechts' Ferry. Having been taken in by his brother as a partner, they then ran a daily stage from Specht's Ferry to Lancaster, which they afterward discontinued and bought the stable in Lancaster in December, 1878. Mr. Greene was married April 22, 1879.

HENRY P. GREENE, grocer and stationer. Is a native of Wisconsin, and was born in Grant Co., Sept. 6, 1847. During the war, he entered the army; enlisted in Co. F, 7th W. V. I.; was severely wounded, and lost his arm at the battle of Petersburg, and remained in the service until discharged in New York City in April, 1865. In 1878, he engaged in his present business. Was united in marriage September 17, 1880, to Miss Florence Nathan.

JAMES M. HAMMEN, farmer and proprietor of the Lancaster mill, which was erected in 1860, Sec. 28; P. O. Lancaster. Born in this county in 1838; settled on his present farm in 1879. Married Myra Moore, a native of New York, and they have four children—Eugene, Jennie, Clara and Charles. Mr. H. enlisted in Co. A, 2d Iowa V. C., in 1861, and resigned in 1862; was Quartermaster of regiment.

HENKEL & WENZEL, proprietors of saloon and restaurant. This business was established in December, 1874, in their own building, which was constructed the same year.

Peter Henkel is a native of Germany, born March 8, 1840, a son of Henry and Mary (Fritz) Henkel, who both died in Germany. He came to Lancaster direct, arriving there June 15, 1858; he was engaged in farming until August, 1862, when he volunteered as a private in Co. C, 25th W. I. V., Capt. Ferguson. He went to the front in Minnesota, where he was detailed to watch the Indians; afterward sent to Cairo, and thence to Vicksburg, where they joined the army; he served until the close of the war, and was mustered out in the summer of 1865. Nov. 20, 1868, he was married to Miss Louisa Barmann; they have one son, Louis H.

John J. Wenzel, of this firm, is a native of Germany, born March 3, 1841, a son of Conrad and Margaret (Werth) Wenzel, who came to the United States in the summer of 1848, settling in Delaware, where they lived eight years. In the spring of 1857, they moved to Grant Co., settling on a farm four miles from Lancaster. John J., the subject of this sketch, spent the earlier years of his life on the farm, which he left in 1871, and came to Lancaster, where he and his father opened a saloon. In February, 1862, he was married to Miss Christina Trump, daughter of Henry Highstreet, of Pennsylvania, a native of Switzerland. Mr. Wenzel was elected Constable in Liberty, and is a member of the I. O. O. F. The family are members of the Evangelical Church.

C. W. HILL, Clerk of the Board of Supervisors of Grant Co., is a native of Ulster Co., N. Y. Came West to Wisconsin and located in Grant Co., at Platteville, in February, 1856; engaged as clerk in store: held the office of Justice of the Peace for eight years, and was also Town Clerk for a number of years: was elected Clerk of the Board of Supervisors of this county in November, 1880. In 1860, Mr. Hill was united in marriage to Miss Julia Shaffer, of Platteville; they have two children—one son, Charles, and one daughter, Flora.

LEWIS HOLLOWAY, farmer; has been a resident of Grant Co. since 1863. A native of Livingston Co., N. Y., born Sept. 30, 1832, a son of John and Lucy Burt Holloway, both natives of Massachusetts, of English descent. He was married to Miss Cornelia Stone, of Troy, Mich., Oct. 24, 1855, a daughter of William and Harriet Morris Stone. He came West in the spring of 1863, and purchased 1,000 acres of wild prairie land, two miles south of Lancaster, breaking 400 acres the first season, 130 of which he planted to wheat, and received a crop of 3,200 bushels, which he sold for \$2.10 per bushel. His farm cost him \$13,000, nearly one half of which he paid with his first years' crop. After five years he sold his land for \$40 per acre, to George Stewart and Edward McKinney. Mr. Holloway is a cattle dealer, having followed it twenty years. He bought his present home and farm of 340 acres in 1871. He has for several years been Alderman, and is at present.

GEORGE HOWE, senior member of the firm of Howe & Baxter, general merchants. Is a native of Clinton Co., N. Y., and was born at Plattsburg May 24, 1809; he grew up and received his education there. After reaching manhood he was united in marriage, December 14, 1831, to Miss Maria Farnsworth, a native of that county; she died June 4, 1847. Two years later, on the 7th of March, 1849, was united in marriage to Miss Martha J. Cole, a native of that State. They came to Wisconsin and located in Grant Co., at Lancaster, May 8, 1855, and Mr. Howe engaged in mercantile business, the firm

being Howe & Barber; after one year the firm became Howe & Burr; after two years Mr. Burr retired, and Mr. Howe successfully continued the business until after the war, when Mr. Baxter became interested in the business with him. Mr. Howe has been successfully engaged in business here over a quarter of a century, and has built up an enviable reputation as a merchant. Has one daughter, Mrs. C. H. Baxter, of this place; had one daughter, Laura, who died in Dundee, Ill., Jan. 10, 1855.

HENDERSON HULFERTZ, farmer, Sec. 17; P. O. Lancaster; is a son of Edward Hulfertz, born in Richland Co., Ohio, in 1848; came to Wisconsin with his parents when 8 years of age, locating at Lancaster; lived with his parents until 25 years old; since his arrival here he has made Lancaster his home; he has a beautiful farm of 330 acres; is still single.

AUGUSTUS HUNTEMER, manufacturer, cooper and dealer in hoop-poles, barrels, firkins, kegs, etc. Is a native of Wisconsin, and was born in the town of Potosi, Grant Co., Aug. 28, 1847; he grew up in this county and learned the trade of cooper in Galena. In 1868, he engaged in business in Potosi, and remained there until 1874; came to Lancaster and established his present business in 1875. From a small beginning he has, by industry and good management, built up a large trade, his business the past year amounting to over \$20,000; he ships his goods to Chicago and other places. He was united in marriage, Aug. 9, 1870, to Miss Mary Dolan, a native of Potosi, Grant Co., Wis.

J. M. HURLEY, wagon-maker, in the employ of Charles Bettz, for whom he commenced work in February, 1876; he learned the trade with J. C. Herbert and D. H. Budd, of Lancaster, with whom he worked three and a half years. He commenced business for himself Aug. 15, 1874, and remained in business until December, 1876, under the firm name of J. Dixon & Co.; they did a prosperous business of about \$4,000 per annum. Mr. Hurley is a native of Ireland, born April 26, 1845, a son of Thomas and Catharine Fauning Hurley; he came to the United States an infant, in 1846, with his parents. They lived in New York, Pennsylvania and New Jersey, finally settling in Galena, Ill., where his father died in September, 1854, and his mother is now living in Nebraska. He was married Dec. 24, 1865, to Miss Margaret A. Carroll, a native of Ireland.

A. E. HYDE, proprietor of the Mansion House, Lancaster, became proprietor of this house in the spring of 1875, but has been identified with it since 1855. When a lad his father, Allen Hyde, bought the property and continued as proprietor of the hotel up to the time of his death, which occurred Jan. 11, 1861; his older brother, Jehial Hyde, then became proprietor, and was succeeded by Ira A. Bellows, who ran it for ten years. Mr. Hyde is the fifth son and sixth child of L. A. and Mary Miller Hyde, born in Vermont, July 22, 1848; he came to Lancaster at the age of 7, with his parents. He was married in Galesburg, Ill., April 15, 1875, to Miss Kate K. Garvey, daughter of Mrs. E. Dumbrille; they have one daughter, Mary Elizabeth, and have buried one, Anna Isabella.

GEORGE B. HYDE, proprietor of the machine-shop; commenced business in August, 1875; he learned his trade in Indianapolis; he not only served an apprenticeship, but has a natural taste for mechanics; was born in Pottsdam, N. Y., Sept. 19, 1851, a son of H. H. and Martha P. (Elderkin) Hyde; he came West with his parents in 1855. Feb. 24, 1874, he was married to Miss Alice L. Green. They have three children—Martha, Nellie and Augustus.

MRS. MARY HYDE, widow of Luther A. Hyde, who was a native of Vermont, born February 15, 1810. They were married February 15, 1832, at St. Armand; they lived in Vermont until December, 1855, when they came to Lancaster. Mr. Hyde ran the Mansion House up to the time of his death, which occurred Jan. 11, 1861; he left three children, a daughter and two sons—Helen M., now Mrs. Bellows, of Lancaster; C. J. and A. E., the latter proprietor of the Mansion House at present. Mrs. Hyde has lost four children—Margaret Isabella, died in Vermont, April 26, 1851; James Walter, who enlisted in the army, was wounded at the battle of the Wilderness and died in Philadelphia, in 1864; Henry Allen, enlisted in May, 1864, died Sept. 24, 1864; George Luther, another who responded to his country's call, and was wounded at the battle of Bull Run, came home and died Oct. 28, 1864.

IVEY & WEBB, merchants, Lancaster; this house was established at this location in February, 1879; they carry a complete stock of dry goods, hats, caps, boots and shoes, clothing, groceries, etc.; stock ranges from \$5,000 to \$9,000; their annual trade reaches \$30,000 and is increasing; this house was established in May, 1866, at British Hollow under the firm name of Wilson & Ivey; in 1868, Mr. Ivey bought his partner's interest and continued the business alone two years, when he took in William E. Webb; in February, 1879, they bought their present store which was opened by Mr. Ivey, Mr.

Webb remaining at the old store until it could be closed out; in September, 1880, Mr. Webb joined his partner in Lancaster.

Alexander Ivey is a native of England, born in County Cornwall March 10, 1837, a son of Joseph and Miriam Endey Ivey, who moved to America in the summer of 1837, and lived in New York City six years, when his father, a miner by trade, was killed by the caving in of a mine, his mother subsequently marrying Josiah T. Tremullen; they moved to West Virginia, afterward to North Carolina, and in 1846, to Grant Co., Wis.; his mother died in 1849. He followed mining until the war broke out when he volunteered as a private in September, 1861, in Co. D, 7th W. V. I., Capt. E. F. Giles; he went out as a private and returned a Sergeant, having lost one leg at the battle of Gettysburg. He was married March 4, 1865, to Miss Anna Eustice, of British Hollow, daughter of George Eustice; they have four sons and a daughter, Miriam P., Joseph E., George Earl, Alexander and W. Leroy; he was elected Town Clerk at Potosi in 1865, and was County Treasurer for Grant Co. four years from 1875 to 1879, and a member of the City Council in 1879.

W. E. Webb, a native of Wisconsin, born in British Hollow, Grant Co., March 9, 1848, a son of John and Dorothy Dunstone Webb, both natives of Cornwall, England, who came to the United States in 1845, and direct to Grant Co. Mr. Webb followed mining from the time he left school at the age of 14 until he embarked in the mercantile business. He was married to Miss Martha Nicholls, born in Wales, a daughter of William and Ann Wilcox Nicholls; they have three sons—Frank, Walter and William.

THOMAS JERRETT, Sec. 8; P. O. Lancaster; owns 160 acres of land, valued at \$18 per acre; born in Devonshire, England, in 1823, came to America in 1851, and located in Canada, removed to Wisconsin in 1867. Married Ellen Murphy, a native of Ireland, who died in 1869; four children were the result of this union—George, Eliza, Mary and Ann.

JOHN JESIDE, merchant tailor, Lancaster; commenced this business in 1876 with a stock of clothing, and employing but one man; he now carries a stock ranging from \$8,000 to \$12,000, and employs three workmen; Mr. Jeside is a native of Germany, born Feb. 6, 1848, a son of John and Elizabeth Jeside. John, Jr., commenced to learn his trade in Germany, and came to Lancaster direct in March, 1867; he was then 19 years of age, and engaged as tailor for John Beig, with whom he remained one year, and was one year with H. Cook; he was afterward for seven years in the employ of Ed Hyde, when he commenced business for himself. He was married, Oct. 9, 1871, to Miss A. Beorner, daughter of John A. Beorner; she died May 30, 1872; he was again married, Oct. 10, 1874, to Miss Henrietta Henkel, daughter of Henry Henkel, of Ellenboro; they have one son living, Oscar. Mr. Jeside is a member of the Odd Fellows, Lodge No. 172, and an officer in the same.

J. A. JONES, druggist, Lancaster. Established this business in May, 1851, at Hazel Green, in the south part of Grant Co. He commenced with but \$200 cash capital, buying out the drug house of Dr. C. A. Mills, and commenced business under the firm name of Jones & Kibbe. At the end of six months Mr. Kibbe retired, and Mr. Jones continued until September, 1857, when he closed out. Having been a conveyancer, he continued in that occupation until elected County Treasurer in the fall of 1858, which office he held four years, and then bought an interest in the dry goods house of George Howe. Continued business under the firm name of Howe & Jones two years, when he again entered the drug business in the fall of 1866, which he has since successfully continued. Mr. Jones was born in Westmoreland Co., Penn., Sept. 1, 1818, a son of John and Elizabeth (George) Jones. He came to Wisconsin in the spring of 1844, and settled in the south part of Grant Co., where he followed mining and school-teaching. He was married Nov. 1, 1849, to Miss Theda B. Culver, daughter of Samuel Culver; she died in August, 1862. Was again married, March 2, 1864, to Emily J. Wight, of Dubuque.

HENRY JUDD, farmer, Sec. 27; P. O. Lancaster. Owns 120 acres of land, valued at \$20 per acre. Born in Genesee Co., N. Y., in 1844. Came to Wisconsin in 1868, and settled in Jamestown, this county; located on present farm in 1880. Married Ella Patterson, a native of this county. They have three children—Burton, LeRoy and Cornelia. Mr. Judd enlisted in Co. I, 6th U. S. C., in 1861, and was discharged in 1864. Was engaged in twenty-eight battles, being all that his regiment participated in.

HON. H. S. KEENE, farmer, Sec. 30; P. O. Lancaster. Owns 100 acres of land, valued at \$40 per acre. Born in Elk Grove, La Fayette Co., Wis. He came to this county with his parents when he was 1 year old, and they settled on the farm, where he now resides. Mr. Keene has been a teacher for many years, but, for the last few years, his attention has been turned to farming. He was married to Minnie Arnold, a native of Indiana. They have four children—Walter A., Mand M., Bruce L. and Gertrude A.

ROBERT A. KILBOURN, deceased. A native of Ohio. He came to Grant Co. in the spring of 1837, and was engaged in mining for a number of years, when he commenced farming, which he continued up to the time of his death, which occurred May 12, 1875. He was married March 26, 1836, to Miss Laura Hannum, a native of New York State. They have three children still living—James M., Myra and Anna. He and his wife were members of the Congregational Church. Mrs. Kilbourn still resides in the village of Lancaster.

JOHN F. LANE, Sheriff of Grant Co. Is a native of Lower Canada, and was born Dec. 27, 1832. He came to Wisconsin before reaching manhood, and settled in Grant Co. When the war broke out, he enlisted May 20, 1861, in Co. I, 3d W. V. I., and was transferred to Co. G, 1st United States Engineers, and served until the battle of Chancellorsville, when he returned to his old regiment, and was severely wounded in that battle. He afterward entered the secret service under Col. Baker, and served in Capt. Pott's division until the close of the war. In the fall of 1880, he was elected Sheriff of this county. In the fall of 1874, Mr. Lane married Miss Florence Sheffield, a native of Grant Co. They have two children—Effie and Ernest; they have lost one son, Harry.

LOU P. LESLER, County Treasurer. Is a native of Grant Co., and was born Nov. 8, 1844. He grew up and attended school here, and, in 1859, entered a store in Boscobel as clerk. Upon the breaking out of the war, he enlisted when only 17 years old, in the 2d W. V. I., but was rejected, and again entered a store in Boscobel. In May, 1864, he enlisted in the 41st regiment, hundred-day troops. Has held the office of Town Treasurer several terms. Was elected Treasurer of Grant Co., in November, 1878, and was again re-elected to the same position in the fall of 1880, by the largest majority of any one on the ticket. In 1875, was married to Miss Eda A. Meyer from Boscobel; they have one son, Leo Paul.

WILLIAM L. McCORD, farmer, Sec. 12; P. O. Lancaster. Was born in town of Ellenboro, Grant Co., Wis., Feb. 8, 1847. He went to the oil regions where he remained twelve years, then returned to Wisconsin; rented land for about four years; then bought 160 acres of land with fine house, 16x32, with wing, 18x40, main part two stories; barn 30x40, 16-foot corners, basement, stable; a well-improved place. His wife, M. Emma Crabtree, born in Harrison, Grant Co., Wis., Feb. 23, 1855; they married Feb. 21, 1877; they have two children—Eula E., born Nov. 6, 1877; Laura E., born April 1, 1879. In politics, Democrat. Religion, Episcopal. Member of I. O. O. F., Lodge No. —. What he has made by his own industry. Mrs. McCord was a daughter of John Crabtree, deceased, who was born in England May 31, 1818. Came to America in 1840; located in Fair Play, engaged in smelting and mining; died Nov. 8, 1868. Her mother was Alice Mills, a native of England, born May 30, 1819, and married in the old country in the year 1837. They had a family of eleven children, eight are now living. Mrs. Crabtree resides with her daughter, Mrs. McCord.

JOHN McCORMICK, farmer and dealer in stock and agricultural machinery, Lancaster. A native of Grant Co. He was married Nov. 29, 1876, to Miss Kittie Scott; she was born in Waukegan, Ill. They have two children—Margaret A. and Mary E.

JUDGE WILLIAM McGONIGAL, Lancaster. Is a native of Tennessee, and was born in Hawkios Co., March 14, 1814. He came to Wisconsin Territory in June, 1836, and located in La Fayette Co., at White Oak Springs, and engaged in mining. Was one of the early settlers in the State. Continued mining through the different sections of the lead mining region fourteen years. Came to Lancaster Jan. 1, 1853, and since then has resided here. In 1849, he was elected Representative to the State Legislature. In 1852, was elected Sheriff of the county, and, in 1854, was elected Register of Deeds. In 1857, he was elected County Judge, and, since then for a period of twenty-four years, he has continuously held that position. In 1846, was married to Miss Ros. Ann Logsdon, a native of Kentucky. They have four children—Olive, William F., James M., Mattie C.

J. J. McKENZIE, farmer, Sec. 30; P. O. Lancaster. Owns 500 acres. Was born in Morgan Co., Ky. In the fall of 1839, he left his native place and went to Edgar Co., Ill., where he remained during the winter, and the next year, in July, 1840, came to Grant Co., where he has since lived. In the spring of 1850, he made a trip across the plains to California, where he was engaged in the mines three years. He was married in 1856, to Miss Susanna J. Halferty, a native of Richland Co., Ohio. They have three sons and two daughters—Frank, William, Ben, Kate and Fanny.

JOSEPH McKINNEY, retired farmer, Lancaster. Born in 1802, a native of Rockingham Co., N. C. Came to Wisconsin in 1835, and located in Lancaster, Grant Co., where he has remained with the exception of four years, when he went to Texas. Always been engaged in farming. Married in 1825,

to Miss Susan Overby, a native of North Carolina, by whom he had thirteen children, nine of whom are living. Married a second time in 1852, to Mrs. Anna Robbins; by her, he has four children, three of whom are living. Are members of M. E. Church, of which church Mr. McKinney has been Deacon for forty years; one of the oldest living settlers in Grant Co., and was considered one of the best farmers in the county. Is an honorable and exemplary man. Democratic in politics.

GEORGE MARKS, brick-mason, Lancaster. A native of Vermont, born Nov. 11, 1837. He came West in November, 1869. In the spring of 1870, he came to Lancaster. Mr. Marks was married March 25, 1862, in Colechester, Vt., to Miss Sophrana N. Spear. They have three sons—Walter, George M. and Arthur.

GEORGE W. MARLOW, farmer, Sec. 31; P. O. Hurricane Grove. Owns 87 acres of land, valued at \$30 per acre. Born on this farm in 1842. Married Angeline Druen, a native of this county. They have five children—George C., Clara B., Louison, Vernon and John. In 1861, Mr. M. enlisted in Co. C, 2d W. V. I., and discharged in 1862.

RICHARD MEYER, banker, Lancaster; was born in Westphalia, a province of Germany, in 1817. His earlier education was conducted at a private school in Hamburg. Upon its completion, young Meyer was transferred to a desk in a large banking and shipping house at Libau, Russia, where he remained twelve years. At the expiration of this time, he was promoted to the charge of the office of Harrison, Winans & Eastwick, the great American railway contractors, then located at St. Petersburg. Upon the close of their contracts, and return to America, in 1850, Mr. Meyer accompanied them, and established himself in Philadelphia. Ill health soon after demanded a change of residence, and, heeding the warnings, Mr. Meyer started for the West, coming at once to Grant Co., and making his headquarters at Lancaster in 1857. This afterward became his permanent home. Mr. Meyer has been connected with his present business since 1867.

GEORGE MUESSE, contractor and builder, dealer in lumber, Lancaster. Is a native of Germany; emigrated to America in 1848, with his brother, and learned the trade of carpenter and joiner in Philadelphia. He came to Grant Co. in 1859, and remained one year, then returned to Pennsylvania. In 1870, he came to Lancaster, and since then has been engaged in building. In 1879, he also engaged in the lumber business, and is building up a good trade. He holds the office of City Weighmaster. In July, 1863, Mr. Muesse married Mrs. Elizabeth Humrichhouse, a native of Germany. They have seven children—Annie E., George H., Lizzie, Carrie M., Fred W., Edward C., Charlie L.

HENRY MUESSE, contractor and builder and dealer in lumber, Lancaster. Is a native of Germany; was born in in Prussia June 22, 1836. Emigrated to America in 1848. Learned the trade of carpenter and joiner in Philadelphia. Came to Wisconsin in 1855, and settled in Lancaster, and began working at his trade; and since then, for the past twenty-six years, he has been successfully engaged in contracting and building, and has done a large business. In 1875, established the lumber business, and has a good trade. He has served as Police Justice and member of the Town Board. Was united in marriage to Miss Eliza Reynolds, a native of London, England, Oct. 15, 1860. They have six children—Olive, John, Hattie, Harry, Frank, Susie.

JACOB NATHAN, Lancaster, a native of Prussia, born June 12, 1810, a son of Isaac and Susan (Leopold) Nathan. Was married July 25, 1835; he came to the United States in 1849, and settled in Lancaster, where he followed butchering and peddling his meats; was also engaged in mining during the first four years. They have five children living—Joseph, Sophia (now Mrs. John Schriener), Henrietta (widow of John Woolstenholme), Amelia (now Mrs. John G. Oswald), and Adolph. Mr. Nathan is a member of I. O. O. F.

NATHAN, SCHREINER & CO., dealers in general merchandise and live stock, Lancaster. This house was established in 1860, by J. Nathan; in 1862, the firm became J. Nathan & Son, and, in 1864, Nathan, Schreiner & Co. The same year dry goods, clothing, hats, caps, boots and shoes were added to the line of groceries. In 1865, J. Nathan retiring, he was succeeded by his son, Joseph Nathan. This house is the largest in the city, and does an annual trade of \$75,000; they built their present store in 1867; employ a full force of eight men; they also handle live stock, cattle, hogs and sheep; ship to Chicago and Milwaukee, their receipts reaching \$200,000 per annum.

Adolph Nathan, of this firm, is a native of Prussia, born May 8, 1844, a son of Jacob and Helen (Sheuer) Nathan, who moved to St. Louis in the winter of 1849, where they lived about six months; in the spring of 1850, they moved to Lancaster. Adolph went to Chicago to Commercial College, and, in 1863, volunteered in the 41st W. V. I., one hundred days, United States service; he was detailed as a

Special Order Clerk, under Gen. Washburn. October 18, 1865, he was married in New York to Miss Rosa Schreiber, daughter of Louis Schreiber; they have one son and one daughter, Louis, aged 12, and Jeannett, an infant. Mr. Nathan was Financial Agent of the Chicago & Tomah Railway from 1878 to 1880; was General Freight Agent, Auditor and Treasurer.

John Schreiner is a native of Germany, born Jan. 27, 1835; he came to the United States, and direct to Grant Co., in 1853. He was married Oct. 25, 1855, in Lancaster, to Miss Sophia Nathan; they have seven children living, four sons and three daughters—Ellen K., Elizabeth Anna, Adolph J., Emma, Frank, Edmund A. and Herbert E.

NATHAN & WOOLSTENHOLME, dealers in general merchandise, Lancaster, commenced business in the fall of 1869, with a \$2,000 stock and small capital of about \$1,500, doing a trade the first year of about \$2,500; their business has since increased threefold. Joseph Woolstenholme, of this firm, is a native of Lancaster, Grant Co., born Nov. 1, 1860, son of John W. and Annetta Nathan Woolstenholme; his father was born in Philadelphia, of English parentage, and his mother was born in Germany. He has always been engaged in this business. A graduate of Lancaster High School.

John Woolstenholme, deceased, was born in Philadelphia, Penn., in 1836, where he lived until 14 years of age, when he moved with his father, William Woolstenholme, to Grant Co., and settled on Fennimore Prairie in 1850. He followed farming until 26 years of age, when he enlisted as a private in the 25th W. V. I., Co. C, Capt. H. D. Ferguson; he served one year, when he was discharged on account of disability. He returned home, and, in 1868, was engaged in building the company's store, in company with Mr. Nathan, which they occupied till his death, which occurred Aug. 20, 1880. His wife survives him, and the business is still continued, his sons representing him.

Jacob Woolstenholme, Lancaster, a native of Philadelphia, Penn., where he was born May 27, 1838. His father came to Grant Co. in 1843, and still resides there; his brother John died Aug. 20, 1880, in Lancaster, leaving a wife and four children.

THOMAS ORTON, Lancaster, grain buyer, in the employ of F. W. Strong, has been with this firm since March, 1879. He is a native of London, England, born July 20, 1854; came to America with his parents in February, 1863, and settled in Lancaster; his father was a publisher and bookbinder, and died two weeks after his arrival; his mother died April 17, 1880. Dec. 9, 1878, he was married to Miss Lizzie Adams, of British Hollow.

P. H. PARSONS, Town Collector, is a native of Plattsburg, Clinton Co., N. Y.; grew up and received his education in that State. In 1852, went to California, and was engaged in mining, mercantile business and teaching, until 1866, when he came to Grant Co. He had held the office of Deputy County Clerk for some years, also Justice of the Peace, and, for the past two years has held the office of Town Collector. In 1844, Mr. Parsons was united in marriage to Miss Delia J. Phelps, a native of Vermont. They have one son, Fred B., living in Denver, Colo.

BENJAMIN E. QUINCY, Sec. 29; P. O. Lancaster; owns 221 acres of land, valued at \$23 per acre; born in Chittenden Co., Vt., in 1820; came to Wisconsin in 1844, and located on present farm. Married Mary E. Stone, a native of the same county. They have five children—Merton E., Lucia E., Frank S., Fred H. and Charles B. Are members of the M. E. Church.

HENRY RESSMEYER, harness-maker, Lancaster; commenced this business in the spring of 1873, commencing in a small way, renting a shop and doing all of his own work; in the fall of 1878, he bought his present shop, and now carries a stock of about \$1,000, employing two men; he is a native Germany, born April 19, 1849, a son of John Henry and Dorotha (Donnenberg) Ressmeyer, who came to the United States in the fall of 1840; his father died in Du Page Co., Ill., Sept. 20, 1862, and his mother died in Grant Co., March 2, 1879. Mr. R. was married in Liberty, Grant Co., Sept. 16, 1877, to Miss Maggie Heiliger, daughter of Joseph and Maggie (Miller) Heiliger. They have two sons—William, born Sept. 28, 1878, and Fred, Oct. 3, 1880. Mr. Ressmeyer is an active member of the I. O. O. F.

ORA C. RICHARDS, Deputy Sheriff, Lancaster; is a native of the town of Fennimore, began life as a farmer, following that business until 14 years of age; he then attended school in Boscobel for about four years, and made rapid progress; at the age of 18 years, he was appointed Deputy Sheriff of Grant Co., and now holds the same position for the fifth year, being appointed in 1877.

GEORGE W. RYLAND, banker, Lancaster; was born in Selbysport, Alleghany Co., Md., Dec. 10, 1827. He received a common-school education. In 1853, he came to Wisconsin, locating at Lancaster; he was engaged in commercial pursuits, and, during Lincoln's and Johnson's Administrations, he served as Postmaster. He was Chairman of the Town Board from 1870 to 1877, and of the County Board five

years. In 1872, he was sent as a delegate to the Republican National Convention, held at Philadelphia. In 1879, he was elected State Senator by a large majority over his two competitors. In 1867, he engaged in the banking and exchange business, and is, to-day, the senior member of the firm of Ryland & Co., bankers.

MISS BARBARA SCHLOSSER, milliner, Lancaster; commenced business in the spring of 1868, in partnership with Miss Anna Finney; after one year, Miss Finney retired and Miss Schlosser has since continued alone; she carries a stock of nearly \$1,000 during the busy season; Miss Schlosser is a native of Germany, born near the city of Cologne, a daughter of Henry J. and Catherine (Schaeffer) Schlosser; her parents came to the United States in 1849, and lived in Racine nearly three years, when they settled on a farm near Lancaster where they died, her mother, June 7, 1857, and her father, Feb. 12, 1859, aged respectively 42 and 48. She has four brothers living; her brother John who enlisted in the 8th W. V. I., died in Andersonville Prison from starvation, after many months' suffering, having been taken a prisoner at the battle of Gettysburg; another brother, Henry, of the 2d W. V. C., of congestive chills after a severe campaign, Aug. 4, 1864.

ANTON SCHMITT, proprietor of the Phelps House; was born Nov. 4, 1830, in the village of Dexbach, Grand Duchy of Hesse Darmstadt, Germany. He was married to Miss Elizabeth Briel of the same place, who was born March 15, 1829; they emigrated to this country in 1854, and came to Lancaster June 10, the same year. Mr. Schmitt is a farmer and miller by trade; he bought a farm in Section 2, town of Beetown, on which he lived until April, 1855, when he purchased of J. Allen Barber a grist-mill and farm in the town of Lancaster, called Grant Mills, which he operated and tilled the farm until 1869, when owing to poor health he sold the mill and moved to the village of Lancaster; in 1870, he engaged in the general merchandise trade, which business he carried on in Lancaster and Fennimore until January, 1876; in 1870, he bought 28 acres of land in the village of Lancaster on which he built a dwelling house and other improvements, planted a vineyard of 2 acres, orchard and small fruit, which he has cultivated successfully in connection with his other business; is one of the first and most successful grape and small fruit growers in this part of the county. Has six children—Louise, born in Germany, Dec. 20, 1852, now living in Dutch Flat, Cal., married to J. E. Knott; Caroline, Aug. 18, 1855; Carl, April 20, 1857, died Jan. 2, 1870; Adolph, born April 25, 1859; Amelia, Jan. 12, 1861; Elizabeth, March 20, 1863; Veronica, Oct. 8, 1865; the four daughters and one son are assisting their parents in their present occupation. Mr. Schmitt has passed all the chairs in the I. O. O. F., and has been a member of the lodge for twenty years; always been in active business life, and self-made.

REV. PETER SCHWAIGER, is a native of Bavaria, Germany, and was born at Schweinkofen April 28, 1838; received his education there and studied five years in Bavaria; emigrated to America in September, 1858, studied in Westmoreland, Penn., then came to Milwaukee where he completed his studies at St. Francis' Seminary and was ordained in that city in 1863, his first pastorate was in Washington Co.; he has served acceptably as Pastor in the counties of Sheboygan, Dane and Racine, and was appointed Pastor of his present church in 1877.

MRS. FANNY SHERMAN, Lancaster; widow of Cyrus Sherman, both natives of Franklin Co., Vt. Mrs. Sherman was born April 29, 1822; a daughter of Hon. Jed Barber, a native of Connecticut, and for many years Judge of the Circuit and Probate Court, he came to Lancaster in 1856, and died there at the age of 87. Her mother also died in Lancaster, at 80 years of age. Mrs. Sherman was married, June 18, 1849, they moved to Lancaster in 1854, and he died Dec. 29, 1860, leaving three sons and a daughter.

WILLIAM SMITH (deceased), was born in England in 1828. Came to Grant Co. in 1852, and located four miles west of Lancaster; purchased and moved on the homestead, where his widow and family now live, in 1865. He died in 1868. He always followed farming, and built around him a large property, which he made by hard work and economy; was an exemplary and honest man, and his loss was not only felt by the family, but the community at large. The farm consists of 240 acres, beautifully located one and one-half miles from Lancaster, with the best of improvements. The family consists of four sons and two daughters. Charles and James remain at home working the farm and raising and fattening stock in partnership. They are good business men, both unmarried. William Smith was a prominent member of the A., F. & A. M.

WILLIAM STARR, wagon-maker, Lancaster. Has been a resident of Lancaster since May, 1866, coming here at the age of 17 from Clinton Co., N. Y., where he was born Dec. 25, 1838, a son of Lewis and Mary A. (Curry) Starr. His father is still living in Clinton Co. Mr. Starr worked for D. H. Budd nearly seventeen years, commencing when a boy. He was one of the firm of J. Hough & Co., which

was established in August, 1874, and continued until January, 1880. He was married, May 5, 1860, to Miss Mary Maines. They have a daughter and three sons—Fanny L., Daniel H., J. L. and Walter E.

GEORGE STEWART, farmer; P. O. Lancaster. A native of Perthshire in the highlands of Scotland; born Jan. 1, 1820, a son of Thomas and Anna (Melrose) Stewart. He left his native land at the age of 14, and came to Canada West, where he lived eight years engaged in farming. In 1847, he was married in Rochester, N. Y., to Miss Eliza Morrow, a daughter of John and Jane Higgins Morrow, natives of Ireland; she was born April 18, 1826, in Dublin. Mr. Stewart came West to Lancaster and worked several years for J. Holloway. In the spring of 1862, he bought 80 acres three miles south of Lancaster, on which he remained seven years, and then, in 1868, sold the 80 and purchased 400 acres from Lewis Holloway. He has been a successful farmer, and now owns one of the best farms in the county—320 acres prairie land and 80 acres of timber, valued at \$20,000. They have a son and five daughters—Jane, Robert, Ellen, Catharine, Mary and Lucy.

STREET BROS., MARSHALL & CO., proprietors of the Lancaster Woolen Mills. This firm was established in May, 1880, succeeding the Lancaster Woolen Mill Co., by whom the mill had been built in 1869. The present firm was organized with ample means. The members are R. R. Street, J. A. Street, E. Street and H. L. Marshall. This is a two-set mill with eight broad looms of the Crompton pattern, three of which are of new design, run by steam-power. The factory is a four-story and attic frame-and-stone structure, 60x40, with office, dye-house, boiler-room and other necessary additions. It has been thoroughly refitted and furnished with the latest improved machinery by this firm. They employ a force of thirty men. The capacity of engine is 25-horse power, and the water-power used in the mill is from the never-failing fountain at which most of the early settlers used to resort for their water—a spring of historic note. H. L. Marshall, salesman for the house, has his headquarters at No. 184 Washington street, Chicago. They make a specialty of fine black-worsted finish cassimere, and extra-fine twilled flannels, one brand of which is rarely ever made of equal weight in the Northwest.

GAY D. STREETER, livery sale stable; is a native of Ontario Co., N. Y., and was born June 22, 1833; came West in 1851, and came to Grant Co. in 1866; engaged in hotel business and auctioneering. In 1878, was elected Sheriff of Grant Co., and held that office two years, being the only Democrat ever elected since the county was organized. In 1857, he was united in marriage to Miss Maria E. Adams, a native of Saratoga Co., N. Y. They have seven children—Clara, Kate, Edward, Cora, Harry, Nora and Bertha.

HENRY TIMM, farmer, Sec. 19; P. O. Hurricane Grove; owns 119 acres of land, valued at \$15 per acre; born in Prussia in 1838; came to America in 1863, and located in New York. Three years later, he removed to Wisconsin. He married Caroline Brinkman, a native of Germany. They have one child—Johnny. They are members of the Presbyterian Church.

JAMES TRELOAR, farmer, Sec. 29; P. O. Lancaster; owns 200 acres of land, valued at \$30 per acre; born in England in 1820; came to America in 1847, and settled on this farm. Mr. Treloar has been twice married, first to Mary Cock, a native of England. They had eight children, six of whom are living—James, Mary, William, Grace, Margaret and John (who died in April, 1860). Mr. Treloar's second marriage was to Frances Ellis, a native of Kentucky. They have three children—Lora, Thomas and Minnie.

THOMAS TURNER, farmer, Sec. 11; P. O. Lancaster; was born in Canada April 16, 1837. He came to the State of New York in 1850; worked on a farm by the month; then removed to Burlington, Vt., where he remained one year; then to Wisconsin in 1856; worked by the month until 1864; then rented land for three years of J. A. Barber, when he then bought 80 acres with a fine large two-story house 32x42 feet, a nice place. His wife, Catharine Frawley, a native of Grant Co., Wis., was born in 1844. Her parents came to this county in an early day, and are old settlers in Potosi. She was married March 29, 1844. They have three children—Frank, born Dec. 29, 1865; Mary, born Aug. 16, 1867; Annie, born Sept. 22, 1873. He also owns 40 acres of land in Ellenboro, Sec. 17. What he has is by his own industry and labor.

F. VAN DEWALL, photograph artist; is a native of England, and was born in the city of London Oct. 28, 1821. He grew up there, and served an apprenticeship of seven years as mechanical engineer. He emigrated to America in 1845, and came West to Wisconsin in the same year, and located in Grant Co.; entered some land, and began making a farm. In 1861, he established his present business in Lancaster, and, for the past twenty years, has continued the business here, taking all kinds of portraits, from miniature to life size, and is the oldest artist in this section of the State. In 1852, he was united in

marriage to Miss Ann Russell, from Ohio. They have seven children—William, Frank, Emma, Mary, George, Carrie and Walter.

WILLIAM WALKER, farmer on Secs. 15, 16 and 25; owns 700 acres of land. He was born in Ireland, and, in his 16th year, left his native land for America. In May, 1840, he landed in Grant Co., Wis., without means. He has since resided there, and by industry has accumulated a comfortable property. He was married in 1852, to Miss Emma Rawden, a native of England. They have five sons and two daughters.

DEXTER WARD, carpenter and builder, Lancaster; was born in Chittenden, Vt. He came to Walworth Co., Wis., in 1842, and Feb. 8, 1843, came to Grant Co. He was married, Feb. 8, 1835, to Miss Cecilia Ward, a native of Georgia, Vt. They have had five children—William W., Henry A., Eleanor M., Adeline S. (deceased) and Mary M. He was elected Constable in 1857, and re-elected, and served five years. He was Deputy Sheriff four years under Mathew Woods; also Deputy Sheriff under George R. Stuntz for two years, and in 1855-56, was Under Sheriff under Lorenzo Preston. In 1857-58, he was elected Sheriff of the county, and in 1861-62, was again Under Sheriff under Goodnough.

F. WEDHASE, harness-maker and carriage-trimmer; is a native of Germany, and was born in Prussia Feb. 5, 1823; grew up and learned the trade of carriage-trimmer; after the revolution, he emigrated to America in 1849, and the following year came west to Dubuque and entered the employ of L. D. Randall & Co., and was engaged in carriage trimming for that firm for fifteen years; he made the first top buggy ever made in Dubuque. He came to Lancaster and established his present business in 1869, and is the oldest harness-maker in Lancaster. In 1852, he married Augusta Koch, from St. Louis; they have eight children—Frank, in Dakota; Lizzie, in Boscobel; Fanny, in Dakota; John, Clara, Ida, Della and Fred.

JAMES WENZEL, painter, Lancaster; commenced this business in Lancaster, in 1871, beginning with Pravis & Bushnell; in February, 1875, he opened a shop, buying out his employer; he does sign and house painting, and employs two men. Mr. Wenzel was born in Delaware, Feb. 27, 1852, a son of Conrad and Margaret (Weeth) Wenzel, both natives of Germany, who came to the United States in 1847; they moved to Liberty, Grant Co., in 1857, and to Lancaster in 1870. Mr. Wenzel was married in July, 1875, to Miss Alice Orton, daughter of Charles and Mary (Willard) Orton.

JAMES WOODHOUSE, furniture manufacturer and dealer, Lancaster; established this business in the fall of 1878 with about \$1,000 capital invested. A native of Pennsylvania, born July 5, 1834, in Pottsville, a son of John and Ann (Newton) Woodhouse, both from Staffordshire, England; they came from England to Pennsylvania in 1826, bringing with them four daughters and five sons; from Pennsylvania they moved to Putosi, Grant Co., Wis., in 1836, and have since died. Mr. Woodhouse was married Feb. 13, 1858, to Miss S. J. Huey, daughter of Joseph Huey, who died in the army during the rebellion. Mr. W. enlisted in August, 1862, as private in Co. I, 20th W. V. I., he was in active service until December of the same year, when he was wounded at the battle of Prairie Grove, Ark., by a gunshot which caused the loss of his right leg, was in the hospital until March, 1863, when he was discharged and returned to Grant Co.; from April, 1863, to January, 1869, he was employed in a plow-shop. He was elected Register of Deeds in the fall of 1865, and filled that office acceptably for eight years. Mr. and Mrs. Woodhouse have two sons and three daughters, Laura, Mary L., William, Eugene and Nettie.

PLATTEVILLE.

JOHN ALDERSON, was born July 8, 1811, in Muker Parish, Yorkshire, England, has been practical miner since he was 9 years of age. In 1840, he brought his family to the United States, landing at New Orleans, and coming thence up the Mississippi to Galena, locating at New Diggings, La Fayette Co., he spent fourteen years in the mines in that vicinity; in 1855, he bought and settled upon his present farm, this has been managed by his sons to a great extent, while he continued mining; has 117½ acres and good improvements. He married in her native Parish of Marsden, Lancaster, Miss Margaret Anforth; they have four children—James, Elizabeth, Ralph and Mary; the two eldest were born in England, and Ralph and Mary in Wisconsin. Mr. Alderson is a good type of the hardy and energetic English miner; he was the discoverer of the noted Champion mine at New Diggings, and has also found other leads of a less important character.

J. H. BALLARD, dealer in butter, eggs, hides, etc., Platteville; member of the firm of Ballard & Co.; is a native of Kane Co., Ill., born in 1848; came to Darlington, Wis., in 1875, and was in business there till August, 1879, since which time he has been living in Platteville. He was married in 1880, in Platteville, to Miss E. M. Carpenter, of that place. In 1859, he went to California and was here about four years. He enlisted in 1861 in the 7th Cal. V. I., Co. E. but was discharged on account of sickness before going into the service. His father, Charles Ballard, was a native of Vermont.

N. W. BASS, builder and proprietor of the Valley Mills and the Platteville Woolen Mills; is a native of Barron Co., Ky.; when he was an infant his parents removed to Indiana; he came from Rock Island Co., Ill., to Platteville in 1847, and that fall began preparations for building the mill on the Little Platte, which was completed in 1848; it is best known as the old Bass Mill; he kept it in operation about fifteen years, and still owns it. The Platteville Woolen Mills were built in 1865. (See history of Platteville.)

ELIJAH BAYLEY (deceased), was born Aug. 2, 1811, at Massena, St. Lawrence Co., N. Y.; he was one of a family of ten children, of whom he was the seventh; the first twenty-five years of his life was spent at or near his native place; in 1836, he came West and spent about three years in the vicinity of Davenport, and Rock Island, Ill., teaching a portion of the time and making occasional trips South for his health; from Rock Island he came to Galena, where he was engaged as clerk in the confectionery establishment of D. A. Barrows for about three years; in 1841, one of the creditors of E. B. Kimball, of St. Louis, failed, and the stock goods came back into Mr. Kimball's hands; at the suggestion of Mr. Barrows, the goods were entrusted to Mr. Bayley to be taken to some of the mining towns to be disposed of. He selected Platteville as the most favorable point for that purpose, and his success was such that further shipments were made, and a partnership was formed between himself and Mr. Kimball, which lasted till 1852, when Mr. Bayley purchased Mr. Kimball's interest in the business for \$30,000; his success continued, and, in 1861, immediately after the death of Mr. Hammond, with whom he had for some time been associated in business, he closed up his affairs as a merchant, and lived in retirement till his death, which occurred Dec. 25, 1878. Mr. Bayley's first wife, to whom he was married in 1844, was Miss Caroline J. Bevans; she died in 1868, leaving three children, one son and two daughters: the son—Leslie F., born April 13, 1850, and died March 5, 1870; Nora L., is now Mrs. D. B. Jones, of Chicago, and Annie S. at home.

HAYDEN H. BEEBE, blacksmith; was born in Platteville June 6, 1849; learned his trade with Butler & Cowley, of Platteville, and has been in business for himself since 1875; in November, 1874, he married Miss Jennie Hoskins, of Platteville, and has two children—Edith Mazette and Julius De Leslie. His father, William Beebe, was a native of Genesee Co., N. Y.; came to Platteville in the spring of 1845, and is still living in the city.

ARCHIE W. BELL, attorney at law, Platteville; is a native of Salem, Columbiana Co., Ohio, born in 1840. His father, Christopher Bell, came to Wisconsin with his family in 1846, and has been a resident of Platteville ever since. He is now hale and hearty, at the age of 74. Mr. Bell studied law in Platteville with Judge S. O. Paine; was admitted to the bar in 1864, and has practiced in Platteville ever since, except when in the army. In January and February, 1865, he with Capt. W. H. Beebe, raised a company for the 44th W. V. I., and he went out as 1st Lieutenant of Co. K, and served till 1865. He was married in Platteville in 1862, to Mary E. Robinson, and has three children living.

ANSON BENNETT, Sections 1, 12, 2, etc.; P. O. Platteville; was born in Franklin Co., Vt., in 1812. He resided in the Green Mountain State until the fall of 1836, when he came to Platteville, coming by the way of the Erie and Ohio Canals, Ohio River and the Mississippi to Galena, thence on the 1st of November, to Platteville. Here he hired out to the veteran pioneer, Maj. J. H. Rountree, and continued in his employ five and a half years. He then bought 80 acres of the Major, and began making improvements upon it. In April, 1850, he married Elvira Jones, born in Oswego Co., N. Y., in 1812; she came West in 1847. Mr. Bennett is a leading member of the Free Methodist Church of Platteville. He now owns 381 acres, a fit reward for the thirty-seven years of toil expended upon the soil of Wisconsin. Mr. and Mrs. Bennett have six children—Martha E. (Mrs. W. Davis), Susan E., Charles Lyman, Nelson J., Orrin J. and Annie May. Charles L. married Mary E. Aikins, of Platteville.

E. J. BENTLEY, liveryman, has been a resident of Platteville since September, 1853. He was born in Yorkshire, England, Dec. 26, 1836; came to America in 1851, and worked in Elk Grove, La Fayette Co., Wis., till he came to Platteville in 1853. He attended school at the Platteville Academy five winters, working at surveying during the summers, and followed that of teaching till the war broke out. April 1, 1861, he enlisted under the three months' call for troops, and was the second man in Platteville to enlist. He went with the 3d W. V. I., Co. F, and was in the service till August, 1863, when he was discharged. He was with his regiment during the whole time they were out. After leaving the army, he engaged in the livery business, which he has continued up to the present time. He was married Feb. 25, 1864, in Platteville, to Louisa Cheever, and has two children—Charles and Clara. Was Deputy Sheriff fourteen months under Sheriff Streeter.

ALLEN BIRKETT, deceased, was born in Goole, Yorkshire, England, in 1817. He married Sarah Cooper, also of Goole, and came in 1848 to America. He settled in Platteville, where he died May 10, 1869. His widow now resides with her brother-in-law, George Huntington, Esq., of Platteville.

M. A. BISHOP, Platteville, of the Wright House, was born in Huron Co., Ohio, where his parents, Alonzo and Louisa Bishop, settled in 1840, coming from the State of New York. The brothers M. A. and W. H. Bishop removed to Arena, Wis., and came from there to Platteville. The former leased the Wright House in November, 1877, and his popular management has largely increased the custom of this always first-class hotel. His brother has a livery of from fourteen to eighteen horses, and both working in harmony are doing a good, live business.

DAVID BLOCK, Platteville, merchant; was born in Baden, Germany, in 1818. Came to America in 1853, and has resided in Grant Co. ever since, most of the time in Platteville. Was never married, and has been in the mercantile business since 1866. He was in the military service in Germany about three years, and participated in three battles, in one of which, in 1848, he was wounded, depriving him of the sight of one eye, and nearly depriving him of the sense of hearing.

O. A. BOYNTON, liveryman, Platteville; was born in 1818, in Grafton Co., N. H. Was educated at Haverhill. Married Oct. 5, 1840, in Detroit, Mich., to Miss Elizabeth A. Clark, of that place. Came to Wisconsin the 1st of November following, and has been a resident of Platteville since that time. He first engaged in the boot and shoe business, which he followed about three years; then traveled selling dry goods till the spring of 1846, when he went into the livery business and also kept the Platteville Hotel till 1853. He continued the livery business till 1863; then sold out and followed farming till 1872, when he again went into the livery business, and has continued it up to the present time. His wife died Aug. 12, 1880, leaving four children, having lost three before her death. The oldest daughter, Mary, is now the wife of C. M. Henderson, of Platteville; Eugene R. is single and living in Nevada; Ida E. and Louis A., at home. Mr. Boynton has been a member of the Village Board three years, and President of the Board one year.

E. J. BUCK, M. D., Platteville; is a native of Franklin Co., Mass.; was born in the town of Heath in 1828. When 6 years of age his father, Erastus Buck, removed to Livingston Co., N. Y., where he is still living at the age of 84. Dr. Buck was educated in Livingston Co., and graduated from Jefferson Medical College of Philadelphia, in the spring of 1854. He at once commenced the practice of his profession at Towlesville, Steuben Co., N. Y., where he remained till the fall of 1856, when he came to Wisconsin and practiced in Westfield, Marquette Co., till the war broke out in 1861. He was a member of the Wisconsin Legislature in the winter of 1860–61, and attended the extra session in June of 1861. In the spring of 1861, he assisted in raising a company of sharpshooters, and enlisted as a private; was appointed 1st Lieutenant but resigned, and the following fall was appointed Assistant Surgeon of the 18th

W. V. I. Soon after the battle of Shiloh, in which he was engaged, he was promoted to the position of Surgeon, in which capacity he served till the close of the war, and after the first year was one of the "board of operators" of his command. In August, 1868, he came to Platteville, and has practiced in that city since. He was married in 1866, at Beaver Dam, Wis., to Sarah E. Trask, a native of Maine, and has five children, all at home.

A. J. BUSS, marble dealer, Platteville. Has been in his present business in Platteville since the spring of 1870. He was born in Erie Co., N. Y., six miles east of Buffalo in 1847. His father, Abram Buss, came to Wisconsin with his family in 1854 or thereabouts, and settled in La Fayette Co., where he resided till 1873; then removed to Darlington, Wis., and remained there till his death Nov. 26, 1877, at the age of 72. Mrs. Buss died about seven months previous at the age of 73. Mr. Buss learned his trade in Mineral Point, and worked there till he came to Platteville. He was married in Platteville, Aug. 18, 1874, to Miss Hattie E. Loofbourrow, and has two children—Mabel and Nellie.

ALEXANDER BUTLER, wagon and carriage maker, Platteville; has been a resident of Platteville since September, 1854. He was born in Moon, Allegheny Co., Penn., in 1832. He went to Ohio in 1852, and lived in Lima, Allen Co., till he came to Platteville in 1854. He learned his trade before he left Pennsylvania, and has always worked at the business since. In addition to his carriage making, he is now engaged in selling farming implements in company with H. J. Traber, of Platteville. He has been twice a member of the City Council, and has been chief of the fire department ever since its organization in 1874, and was one of the charter members of the hook and ladder company. He was married in Platteville Jan. 1, 1855, and has six children.

VALENTINE CARL, farmer; P. O. Platteville; was born in December, 1824, near the historic town of Sarbruck, in Rhenish Prussia. Up to the age of 14, he was in school; then for a year in a blacksmith-shop. He came to America in 1840; landed at New Orleans; thence came to Platteville. For twenty years, he followed mining in various parts of Grant Co.; then settled on his present 123 acres. He married Mary Klebenstein, who was also born near Sarbruck, and came to America in 1845, landing at New York City. They were married in Platteville, and have seven children—Mary, Louisa, Margaret, Annie, John, George and Katie, all born on the homestead farm, as were two deceased children. Mr. Carl and wife belong to the Old-School Presbyterian Church, of which he has been a Trustee.

W. E. CARTER, attorney at law, and senior member of the law firm of Carter, Carter & Cleary, Platteville; is a native of Sussex, England; born in November, 1833; came to America in the spring of 1850, and settled in Lancaster, Grant Co., Wis., where he read law with J. Allen Barber, and was admitted to the bar in the fall of 1856. In January, 1861, he came to Platteville, and went into partnership with the late Stephen O. Paine, with whom he was associated till the death of Mr. Paine. He then took his brother, George B. Carter, into partnership with him, and Jan. 1, 1881, took in the junior member of the firm—T. L. Cleary. Mr. Carter represented his district in the State Legislature three consecutive terms—in 1877, 1878 and 1879—and is at present a member of the Board of Regents for the State University.

THOMAS CHAPMAN, Platteville; was born in Huby, East Ridney, of Yorkshire, England, March 27, 1815; came to America in 1838, reaching Platteville July 25, without a dollar in his pocket. He spent the first winter at mining; then rented a farm for five years; began \$500 in debt, and at the end of two years began the butchering business, which he carried on together with his farming until the expiration of the lease. Mr. Chapman is the veteran butcher of Grant Co., he having followed the business steadily from 1841 to 1874. John Watkinson was his first partner. In 1853, he formed a partnership with J. F. Kirkpatrick, which partnership he continued up to the retirement of both from business. Mr. Chapman is the owner of several farms—one of 340, and one of 140 acres in Platteville, 80 in Smelser, 160 in La Fayette Co., 160 in Iowa Co., 240 in Kossuth and Wright Counties, Iowa, and a farm of 140 acres, part in Platteville and part in Harrison. He married Sarah Kay, who died leaving four children—Robert, Elizabeth A., Mary J. and Sarah M., the latter died in 1880. The second wife, nee Elizabeth Richards, died also, leaving four children—Sarah M., John, William and Nora. All the children were born in Platteville. The present Mrs. Chapman was Mrs. Fannie S., widow of John Bonson, one of the pioneer settlers of Platteville. Mr. Chapman served one year as Assessor of his town; Treasurer two years, and Supervisor six years. He is a member of the Primitive Methodist Church, and is a Freemason. His home is now outside the city limits of Platteville, where he has 13 acres, in addition to the hundreds mentioned above.

EDWARD CHAPPELL, retired farmer, Platteville; was born in November, 1813, in Camborne, Cornwall, England, where his younger days were spent at mining. In 1839, he came with his

family to America, and spent a number of years in the coal and iron mines of Pennsylvania. Later, he was one of the owners of a Greencastle, Pennsylvania, foundry, and, still later, interested himself in farming. In 1856, he sold his farm, and came West, purchasing of J. C. Wright the splendid 270-acre farm, which he still owns. It was a prairie farm, under improvement, though Mr. Chappell has since erected a new house upon it, and is located partly in Smelser and partly in Elk Grove. Since 1876, he has been a resident of Platteville. His wife was formerly Eliza Pearce, of Illogen Parish, Cornwall. They have eleven children—Edward, born in England, Mary J. (Mrs. James Ivey), John M., William C., Ann E. (Mrs. John Rogers), Sarah (Mrs. Abel Gill), Gilbert, Alfred P., James R., Thomas L. and Anna M. Eight of the children were born in Pennsylvania, and the two youngest on the Elk Grove homestead. The eldest daughter resides near Parkersburg, Iowa, and six of the others are on farms of their own in Taylor Co., Iowa. Edward is farming in Elk Grove, and Thomas is on the old farm. John M. is also a farmer in that town. The children and grandchildren of Mr. and Mrs. Edward Chappell number about sixty. Mr. Chappell is a Democrat, and served five terms as Chairman of Elk Grove. Is a member, with his wife and most of his children, of the M. E. Church.

F. R. CHASE, merchant, and member of the firm of Sanford & Chase, Platteville; is a native of Niagara Co., N. Y.; was born in 1833. In 1834, his parents removed to Trumbull Co., Ohio, and came from there to Platteville in 1855, where they continued to reside till their death. F. R. Chase was engaged in the drug business in Platteville from 1861 to 1865, then sold out in 1867, went into general merchandising, in company with R. C. Sanford, which he has continued up to the present time. He was married in 1862, in Whitehall, Ill., to Miss Jennie McCollister, and has three children—Albert, Mary and Jennie. He has been Alderman two terms.

LEONARD COATES, one of the representative pioneers of Platteville, was born Aug. 8, 1814, in Yorkshire, England. Here he spent his early life in the mines. In May, 1836, he came to the United States, arriving June 26, 1836, in Platteville. Beginning as a miner on his own account, he followed it until 1838, when he and James Vineyard built a furnace on the Rountree Branch. This furnace they operated three years, at the end of which time Mr. Coates took a contract by which he "cleaned up" the old furnaces of Thomas Perrish, on the Blue River; also did some mining at Centerville and Franklin; returning in 1841 to Platteville, he engaged in mining until the fall of 1844, when, in company with Robert Chapman, he re-purchased the old Vineyard-Coates furnace. During 1847 Mr. Coates operated the Shullsburg furnace, then owned by himself and partner. The partnership was dissolved in 1848, although Mr. Coates continued smelting until in 1873. He was conspicuous in securing railroad privileges to Platteville, and has ever been in the foremost ranks of its most public-spirited citizens, having served as Mayor and City Treasurer. His elegant brick residence was completed in 1870, it making a most pleasant resting-place for one like him, who has spent a long and active life in the turmoil of the business of this nineteenth century. He married Jan. 2, 1852, Miss Caroline Gear. She was born in Columbus, Ohio, and has been a resident of Platteville since 1840. Their only child, Lucy A., born in Platteville, is the wife of W. H. Diffenbacher. Mr. and Mrs. Coates united with the Platteville M. E. Church in 1857, since which time Mr. C. has been class-leader almost without interruption.

T. J. COLBURN, born Oct. 28, 1825, in Orange Co., N. Y.; early in life he lost his father, the widow and mother removing to Chittenden Co., Vt. Here T. J. Colburn received his schooling, and grew to man's estate. In February, 1845, he came to Platteville and engaged in farming until 1851, then went overland to California. Here he sought the smiles of the golden goddess until 1853, then sailed for Australia. In the spring of 1854, he shipped from Australia to Peru, where he did his first work as a carpenter. Upon his return to Platteville, in the summer of 1855, he again took up the plane and saw, working as a carpenter until his second visit to California in 1861. He mined gold in that State and Nevada until his final return to Platteville in the fall of 1864; worked at his trade until 1872, then removed to his pleasant suburban home. He has 14 acres, and is engaged in small fruit culture and in raising poultry. He has also a desirable house and lot in the city. He has been a member of the Platteville Congregational Church for many years, and a member of the choir since his first settlement there. In 1870, he was, by the Board of Regents, appointed Professor of Music in the Platteville Normal School, and filled that position three years. He married Miss Margie, daughter of Paul Jeardoe, a pioneer settler in Platteville, where she was born. They have six children—Willis P., Mabel, Margie, Philip, Olive L. and Roy, all born in Platteville. Mrs. Colburn is also a member of the Congressional Church, her father now residing in Lima.

WILLIAM COWDUROY, dealer in general merchandise, Platteville, was born in London, England, in 1836; came to America when only 15 years of age, landing in New York

City, in the spring of 1851, without a single friend or acquaintance in that city. He soon obtained employment as a clerk at \$5 a month and board, but soon had his wages raised to \$13 per month. He remained there till 1853, then came to Wisconsin and resided in Platteville till the spring of 1856, when he went to La Crosse, Wis., and stayed till the spring of 1859. He then went to St. Louis, Mo., and was in the State and County Assessors' Office till 1861. He then returned to Platteville, with his family, and was in the Pay Department of the Missouri State Militia about one year, since which time he has been in business in Platteville. He was married in Platteville, in September, 1857, to Miss Lizzie Elgar, a native of London, England. She died May 21, 1879, leaving two children—Lizzie and Harry. His second wife, to whom he was married in October, 1880, was Miss Lizzie Campbell, of Platteville.

EDWARD CRONIN, M. D., Platteville; is a Pennsylvanian by birth, having been born in the city of Philadelphia Feb. 22, 1812; his earlier years were passed in that city. Arriving at the proper age, he entered the freshman class of the University of Pennsylvania, where he graduated in the literary department in 1842. Upon leaving the University, young Cronin immediately commenced the study of medicine with Prof. John K. Mitchell, of Jefferson Medical College. In 1844, the young student formed one of the graduating class at the above-named college, coming forth a full-fledged M. D. After receiving his diploma, Dr. Cronin started for the West, rightly conjecturing that the star of empire was setting in that direction. He first settled in Platteville, where he continued in practice until 1850, when attracted, as were others, by the golden tales of California, he started for the Western Slope. Reaching Sacramento during the terrible cholera epidemic, when the citizens were dying off at the rate of four or five hundred a week, the young physician turned his attention to the work in hand, remaining in attendance at the hospitals until the terrible scourge had passed over. He then went further up the country to the Frazier River, where, upon the north fork of this stream, he afterward discovered what turned out to be two good claims. He remained here until 1853, when he returned to "the States" and settled at Galena, where he remained until 1860, when he returned to Philadelphia and attended lectures at Jefferson College, during the winter of 1860-61. He then changed his residence to Platteville, where he remained until 1864. The year following found him practicing in Philadelphia. In 1867, the Doctor returned to the West and located at Mineral Point, including Platteville in his ride. In 1872, he changed his residence to Platteville, where he has since been engaged in practice. The services of Dr. Cronin are by no means confined to a local area, but the circuit of his labors extends far out into adjoining sections.

EDWARD DAVIS, Sr., blacksmith, Platteville; was born in Flintshire, North Wales, in February, 1826; son of Robert Davis; he learned his trade in Wales, and came to America in 1849 from Manchester, England, where he had been living about eight years, and has been in Platteville ever since he emigrated; he worked four and a half years in the plow-shop of Joel Potter, and since that has been in business for himself. He was married in Manchester, England, to Margaret Roberts, who died in Platteville, leaving four children—Euna (now Mrs. Samuel Jones, of Platteville), Elizabeth and Adeline at home, and Edward, Jr., who was married, Dec. 25, 1879, to Miss Inez, daughter of Stephen Dunbar, a merchant of Monticello, Green Co., Wis.; they have one child, Iva Gretta. Edward, Jr., learned his trade with his father and is now in partnership with him, firm of Davis & Son.

W. H. DIFFENBACHER, dentist, Platteville; is a native of Crawford Co., Penn., born in 1836; studied dentistry with his uncle, David Diffenbacher, in his native county, from 1855 till 1858, then came to Platteville and has practiced there since. He was married in 1861, in Platteville, to Miss Ella Coates, and has had seven children, only two of whom—Genevieve and Lillian—are now living; they lost five sons—Harry, aged 8 years; Freddie, 8 months; Leonard, 9 months; Willie, 9 years, and Eddie 14, the last two in September, 1879, of diphtheria, Eddie on the 23d and Willie on the 24th, and they were both buried on the 25th, which was the nineteenth anniversary of their marriage. His father, Frederick Diffenbacher, was in the mercantile business in Meadville, Penn., and W. H. clerked in his store from the time he was 8 years of age till he commenced studying dentistry. Mr. Diffenbacher, Sr. removed to Peru, Ill., in 1861; went from there to Boone Co., Iowa, and died there in 1868.

GEORGE DYSON, retired, Platteville; was born in 1826, in Meltham, Yorkshire, England; earned his trade of stone-mason in his native place. He came to America in 1848, residing in the New England States until 1850; that year he came to Platteville, and for eight years worked at his trade; he then began farming, and continued it until 1871, then spent a year in the village of Platteville; he then pent three years on a farm of 240 acres which he now owns, in Lima; since 1874, he has resided in the city, where he owns two houses and lots. He married Miss Sarah Brown, a native of Lockwood, England; their only child, a son—Nathaniel—born in Meltham, Yorkshire, is now in Washington Territory. Mr. Dyson has served on the Village, Town and County Boards; is a member, with his wife, of the P. M. Church of Platteville.

DR. GEORGE W. EASTMAN, Platteville; the son of Hon. Samuel Eastman and Jane Eastman, was born in Strong, Franklin Co., Me., March 29, 1824; as a lad he received a good common-school education, afterward attending an academy, and, at the proper time, entered Dartmouth College, from which he graduated, in the medical class, in 1844. In the spring of 1850, the young doctor turned his face toward the setting sun and located at Platteville, which place has since been his home. In the year 1852, he was united in marriage to Miss Anna S. Monroe, of Boston; they have three children—Jessie, Mary G. and Julia. During the war of the rebellion, Dr. Eastman was commissioned Surgeon of the 16th W. V. I., in which capacity he served one year, when he was appointed Medical Inspector of the Seventeenth Army Corps; this office he held for the two years succeeding, making a total of three years' service, when he returned and once more resumed the practice of his profession at his old home.

JONATHAN H. EVANS, Platteville; was born near Philadelphia, Penn., Oct. 29, 1830; served an apprenticeship as printer in the office of *The Cumberland Valley Whig*, at Shippensburg, Penn.; emigrated with his father to Wisconsin in May, 1846, and settled on a farm in the town of Kendall, La Fayette Co.; attended the Platteville Academy 1851–52, teaching a country school during the winter; in the fall of 1852 entered the store of Samuel Moore as salesman. Married Miss Sarah Kilbourne of Columbus, Ohio, Nov. 7, 1855; was elected Register of Deeds of Grant Co., serving two terms, from January, 1857, to January, 1861; was with the Army of the Tennessee during the Rebellion, serving as sutler of the 33d W. V. I. Since 1864 he has been engaged in the mercantile business in Platteville. In 1869, was elected County Supervisor, representing the towns of Hazel Green, Smelser and Platteville; was elected President of the Board of Trustees of the village of Platteville, in 1870, and in 1870–71 represented said village in the County Board of Supervisors; in February, 1872, was appointed by Gov. Washburn member of the Board of Regents of Normal Schools, and successively re-appointed by Gov. Taylor in 1875, by Gov. Smith in 1878 and 1881; was elected Vice President of the Board in 1877, and, upon the death of President Starr in 1879, succeeded to the Presidency, to which position he has since been twice elected. Mr. Evans has devoted some attention to the study of natural science, and has a fine collection of minerals and fossils in the State Normal School at Platteville; is a member of the "Illinois Natural History Society" and the "Wisconsin Humane Society." He is a zealous member of the Masonic Order; was made a Master Mason and member of Melody Lodge at Platteville Feb. 22, 1854; received the Royal Arch degrees in June following, and the degree of Knight Templar at Madison, Wis., February, 1872. The fraternity has honored him with many marks of confidence, as he has served in nearly all the offices of the local orders, and has, at different times, been a delegate to the Grand Lodge, Grand Chapter and Grand Commandery of the State. He represented the Royal Arch Masons of Wisconsin in the General Grand Chapter held at Baltimore, Md., in 1871, and at Nashville, Tenn., in 1874; has been continuously for the past fourteen years an officer of the Grand Chapter of the State, and during the years 1874–75 was honored with the highest position within the gift of the order by being elected Grand High Priest. He has been for the past six years the accredited Masonic representative to the Royal Arch Masons of Wisconsin from the Masons of Kentucky, South Carolina and New Jersey. As a citizen, Mr. Evans is distinguished as a type of the Christian gentleman who, scrupulously exact in all his dealings, generous to the poor and considerate to the unfortunate, will ever be esteemed in his public capacity, and valued as the conservator of that which is equitable in the private walks of life.

J. C. FLANAGAN, grocer, Platteville; is a native of Huntingdon Co., Penn., born in 1838, and came to Platteville in 1862; he enlisted in February, 1863, in Co. K, 44th W. V. I., and served till the close of the war as Sergeant of the company; after his return from the army he worked at blacksmithing three years and at painting about six years; since April, 1875, he has been engaged in the grocery business. He was married in 1868 to Miss Mary R. Covell, daughter of E. W. Covell, a native of Madison Co., N. Y., who came to Platteville in 1842, and resided there till his death, Aug. 28, 1878, at the age of 66. Mrs. Covell, whose maiden name was Rebecca Kendall, is still living in Platteville at the age of 75. Mr. Flanagan has three children—Jennie B., Susie C. and George L.; one son, Carlos, died Feb. 5, 1877, at the age of 4 months.

E. R. FRIEDRICH, harness-maker and member of the firm of H. C. Doscher & Co., Platteville; was born in St. Clair Co., Ill., in 1843; his father, Ferdinand Friedrich, was a native of Germany, and came to America and settled in Illinois; then came to Wisconsin, and has been a resident of Platteville ever since. E. R. Friedrich learned his trade in Highland, Iowa Co., Wis., and commenced business for himself in Platteville, in 1868, in company with Michael Oswald, with whom he continued a year and a half; then bought out his partner, and run the business alone till January, 1876, then sold out

to H. C. Doscher, and bought in again in 1876; he enlisted Aug. 15, 1862, in the 27th W. V. I., Co. G, and was in the service till September, 1874, and was with his regiment the whole time. He was married in October, 1864, in Highland, Iowa Co., Wis., to Maria J. Fry, and has two children living—Edward Ferdinand and Gustave Ernest, and lost one son—Otto, who died March 3, 1880, aged 5 years. Mr. Friedrich has been a member of the Village Board two years in succession.

W. J. FUNSTON, dentist; was born in Coshocton Co., Ohio, in 1840; when an infant his parents removed to Jefferson Co., Ohio, where he was brought up. He enlisted there in August, 1862, in the 52d O. V. I., Co. E, as a private, and was in the service till the close of the war; he was with his company about six months, and was then detailed as Adjutant's clerk, and acted in that capacity till the close of the war. He studied dentistry before the war with Dr. John McKinley, of Uhrichsville, Ohio; after the war, he practiced about six months in Plattsburg, Mo., after spending a few months in Ohio, then came to Wisconsin and spent a short time with his parents in Richland Co.; came to Platteville in December, 1866, and has practiced there since, except from December, 1873, till April, 1874, he spent in California practicing a part of the time in San Francisco.

DAVID GARDNER, one of the now deceased pioneers of Grant Co., was born March 4, 1816, in County Meath, Ireland. When in his 17th year, he came to America, and spent some years in various Eastern and Southern States. During the Seminole Indian war, he was in New Orleans; in 1840, he reached Galena, and soon after made his first visit to Platteville and vicinity. Here he worked in the "leads" about the Whig settlement, and spent one winter in a cabin built where Straw & Co.'s furnace now is. He was one of the discoverers of the old "Boots" range of mineral, which famous deposit is still being worked, and a branch of it on his own farm by his own sons. He married in Galena, Mary Murphey, who survives him. He died Nov. 1, 1876, leaving seven children—John M., David P., James V., Mary E., Dennis J., Bridget and Cecilia, all born on the old homestead farm. Mr. Gardner settled upon this farm as early as 1843, and here the widow and three eldest sons have a good home. The youngest son is now reading law in the office of the Hon. W. E. Carter, of Platteville. Mr. Gardner was a steady and industrious farmer and miner, and a man who is remembered by many old friends and neighbors.

D. E. GARDNER, Professor of Mathematics and Music in the State Normal School at Platteville, was born in Adams, Jefferson Co., N. Y., in 1837. He was educated in his native State, and commenced teaching in a private school in Jefferson Co. when 20 years of age, and continued in that three years; he was then Professor of Mathematics in Hungerford Collegiate Institute, at Adams, N. Y., for five years, from the time it was established till it was burned in 1867; he then came West, and for six years was Superintendent of Schools and Principal of the High School at Neenah, Wis., and in the fall of 1874 was elected to his present position. He was married in 1864, at Adams, N. Y., to Miss Ella Underwood Brown, of that place, and has two children—Bertha Lucile and Mabel Pauline.

JOHN G. GILLHAM, Platteville; born Dec. 22, 1819, in Madison Co., Ill.; son of Charles and Clarinda Gillham; who settled in Grant Co. in 1835. The sons of Charles Gillham engaged in mining at Big Patch, J. G. Gillham following the "diggings" and farming until 1850, when he went to California, and for two years sought his fortunes in the gold mines; returning, he began farming near Belmont, Wis. In 1862, he made a second visit to the Pacific Slope; on his return in 1863, he sold his Belmont farm, and settled in Platteville. The summer of 1864 was spent by him in the United States service, as a Private in the 41st W. V. I., he returning on sick leave shortly before the final discharge of his regiment. He settled in his present pleasant home in 1872. J. G. Patterson, a former owner of the property, had established a nursery here, which has secured to Mr. Gillham an unusually large, fine orchard, besides other fruit and ornamental trees. He married Miss Mary L., daughter of Ashahel and Eliza Hagggett; she was born April 25, 1829. An adopted daughter of Mr. and Mrs. Gillham is now the wife of Frank White, of Lancaster. Mr. and Mrs. Gillham belong to the M. E. Church of Platteville. The father, Charles Gillham, died on the day of the capitulation of Gen. Lee, in April, 1865. Mrs. Charles Gillham died Sept. 28, 1879.

REV. HENRY GOODSSELL, Pastor of the M. E. Church, Platteville; was born in Sussex, England, in February, 1841, in the parish of Ewhurst; son of John and Mary (Jarman) Goodsell. When 17 years of age, he left home and friends to seek his fortune in the New World. He remained a few months in Oneida Co., N. Y., then made his way to Lena, Ill., where he soon obtained employment. In 1862, he left Illinois for Minnesota, and entered Hamlin University, at Red Wing, where he worked for his board, and pursued his studies till 1866, finishing a scientific course in that year. Immediately after graduating, he entered the ministry of the M. E. Church, in the Minnesota Conference, and was first

stationed at Mazeppa, Goodhue Co., Minn., where he remained three years; he was then in Lark City, Wabasha Co., Minn., two years; when returned to Goodhue Co., was stationed at Zambrotta three years. He came to Wisconsin in 1875, preached in Hudson one year, Prescott, Pierce Co., three years, and came to Platteville in the fall of 1879. He was married in St. Peters, Minn., Oct. 4, 1869, to Miss Sarah, daughter of Rev. C. H. Savage, of the Minnesota M. E. Conference. She was a native of Highland Co., Ohio. They have three children—Julia, Glenn and Guy.

JOHN GRINDELL, cabinet-maker, Platteville, was born in Canada in 1828; came to Wisconsin in 1849, and settled in Platteville. In the spring of 1850 he went to California, returning to Platteville in the summer of 1852. In 1864, he enlisted in the 41st W. V. I. (100-day men) and went out as First Lieutenant of Co. A, and in February, 1865, enlisted in the 47th W. V. I., and served till the close of the war as First Lieutenant. He was married in the fall of 1852, to Miss Susan Cook, daughter of David Cook, of Beetown; has had six children—Ada J., John H., Albert J., Daniel E., Susan May (deceased) and Arthur B. He has been Town Treasurer, and was President of the Village Board in 1879.

WILLIAM GRINDELL, cabinet-maker; Platteville; was born in Canada in 1820; came to Buffalo, N. Y., and learned his trade, and in 1845 came to Platteville, where he has been in business ever since. He was on the School Board of Platteville about thirty years in succession, and has been on the Village Board several terms; his first wife, to whom he was married in Buffalo, N. Y., in 1843, was Miss Lydia Cook, she died in 1855, and in 1857 he married Miss Margaret McMurry, of Platteville, he has nine children living, three sons by the first wife, and three sons and three daughters by the second wife. One daughter, Miss Lillie Grindell, is Assistant Teacher in the Rock Graded School of Platteville; she was educated at the Normal School, of Platteville, and commenced teaching in 1877; the first year at Ellenboro, Grant Co., then one year in Dodgeville, and is now on the second year in her present position.

GEORGE M. GUERNSEY, life and fire insurance agent, Platteville; was born in Tioga Co., Penn., in the village of Tioga, Oct. 4, 1828; son of Levi B. Guernsey, who was a native of Amenia, Dutchess Co., N. Y.; Mr. Guernsey came to Wisconsin in 1858, and taught school in Milton, Rock Co., two years; in 1860, he came to Platteville and took charge of the Platteville Academy, which he conducted about seven years, till it was changed to a Normal School and was Professor of Mathematics in that school about one year, and since 1868 has been in his present business; he was County Superintendent of Schools from 1874 to 1878; he was married in 1856, in Pennsylvania, to Miss M. J. Roach, and has two children living—Tommy and Maude.

GIDEON HAWLEY, carriage manufacturer and grain dealer, Platteville; is one of the earliest settlers in Southwest Wisconsin, his father, Aaron Hawley, was a native of Vermont; he went to Illinois at an early day and from there to Wisconsin in 1827, and settled in what is now Grotiot, La Fayette Co., his family joining him in 1828; he was killed in the Black Hawk war in 1832, and his family returned to Sangamon Co., Ill., near Springfield, where they remained till 1836, and then came back to La Fayette Co., Wis. Gideon Hawley was born in 1822, in Sangamon Co., Ill.; learned the carriage maker's trade in La Fayette Co., Wis., commencing at the age of 18; came to Platteville in the spring of 1846, and has been engaged in carriage making there ever since, except a year on a farm near Platteville, in 1868, he added grain dealing to his other business and still continues it—or rather that part of the business is carried on by his sons under the firm name of T. C. Hawley & Co. Mr. Hawley was married in 1843, in Dubuque, Iowa, to Miss Sarah Y. Clark, of that place, and has had nine children, four of whom are still living—Frank A., Albert C., Theophilus C. and Harry G. Lost five—Newton and Perry (twins), Jessie B. and two died in infancy.

G. A. HELLBERG, cooper, Platteville; was born Dec. 4, 1837, in Jönköping, Sweden. He learned his trade in Sweden of his father, who was a cooper, and left home when not quite 16 years old; he worked in Stockholm and Göthoborg, Sweden, Fredrickshull, Norway, and Abo in Finland, Russia. He was a member of a military organization called the "Free-Will Sharpshooters," and was a Corporal at the time he left Sweden; while there, he took the sixth Government prize for sharp shooting in a company of 450 men; he belonged to one of the oldest families in Sweden; held the office of Poor Master for two years, and was Secretary of the Workingmen's Association, and Captain in the Fire Department of his native village; came to America in 1867, worked a few months in Chicago, and about one year in Rockford, Ill.; came to Darlington, Wis., in 1869, and to Platteville in 1870; does brewery work and all kinds of first-class work. He was married in 1860, in Sweden, to Anna Maria Wallender, and has three children—Gustaf Syver, Anna Alfrida and Hedwig Maria.

PHILIP D. HENDERSHOT, Sr., saddler and harness-maker, Platteville; was born in Smoky Hollow, Canada, 1822; learned his trade in Canada, serving four and a half years; came to Platt-

in April, 1846, and has followed the business there ever since; he made the first saddle and the first trunk ever made in Grant Co., and also made the first Scotch horse-collar in the State of Wisconsin, while in Millwaukee on his way to Platteville. He was married in St. Thomas, London District, Canada West, in 1844, to Miss Sarah, daughter of Henry Buchanan, and has five children living—James, Rachel, Sylvester, Philip D. and Sarah; Rachel is now the wife of R. R. David, of Ortonville, Minn., and the sons all living in Platteville; the eldest son James, was in the army during the last seventeen months of the war, in Co. A, 50th W. V. I.; he is married to Miss Laura E. Squires, of Platteville, and Sylvester to Miss Mary Conly, of Mifflin, Iowa Co. Mr. Hendershot has been engaged in farming and mining in addition to his other business most of the time since he has been in Platteville, and now owns a farm of 30 acres adjoining the city plat; he has been School Director and Marshal of the village, and was a mail contractor for about nine years.

G. C. HENDY, merchant, Platteville; is a native of Dodgeville, Wis., born in 1847. His father, Samuel Hendy, was born in Cornwall, England, Parish of Breage, in February, 1820, son of James and Priscilla (Thomas) Hendy. His mother, whose maiden name was Ann Shepherd, was born in March, 1820, also in Cornwall, England, Parish of Mullion, daughter of Thomas and Ann (Mitchell) Shepherd. Mr. Hendy, Sr., came to America in June, 1842, and resided in Dodgeville, Wis., from that time till 1866, since which time he has resided in Platteville; soon after coming to Platteville, he bought out the bookstore of McCurn & Griswold, which he carried on till 1874 in company with his son. G. C. Hendy then sold out to his partner and retired from business; since which time the present proprietor has carried on the business alone. G. C. Hendy was married in 1877, to Miss Julia, daughter of John Kemler, Esq., one of the pioneers of Platteville, and has two children—John Kemler and Clarence Augustus.

CARSTEN HINNERS, retired farmer; born in Weddenwarden, Hanover, Jan. 13, 1825. His early life was spent on a farm; in 1844, he came to America, landing at New Orleans; he came by way of St. Louis and Galena to Grant Co.; his first work here was for D. Harms, of Smelser, and for seven years he worked in that vicinity, he then bought a farm on the school section, town of Belmont, La Fayette Co., and became the first settler on the school section; in the spring of 1863, he sold the farm and came to Platteville where he built a most pleasant home. He married Dora Wicters in his and her native village, they have no children. Mr. Hinners is a Democrat, and served three years each on both the town and village boards. Is a member, with his wife, of the German Methodist Church, of which he is steward (verwalter). A brother of Mr. Hinners named Nicholas, died in Germany, leaving two sons—Henry and Frederic, both of whom are with the family of their uncle, though the former is in a Belmont store; their father spent several years of his life in South Carolina.

THOMAS J. HOOPER, druggist, Platteville; was born Jan. 15, 1839, in Cornwall, England. His father, Thomas Hooper, emigrated to America in the summer of 1845, with his family, and settled in Platteville, where he resided till his death in March, 1861, at the age of 56. Mrs. Hooper was born in 1807, and is still living with her children. Thomas J. was married in Platteville in September, 1866, to Miss Mary Wright, who is a native of Platteville, and daughter of James C. Wright, one of the earliest settlers in La Fayette Co., Wis. Mr. Hooper has been engaged in the drug business ever since his marriage. Has one child—Hattie.

JACOB HOOSER, Sr., Platteville; one of the earliest of Grant Co.'s pioneer settlers, was born Oct. 25, 1807, in Lancaster Co., Penn. His father, Jacob F., a blacksmith, soon after took his family to St. Louis. On July 15, 1828, young Hooser arrived in Galena, Ill., then comprising the U. S. warehouse, a store and Jonathan Meeker's furnace. Four days later, Mr. Hooser came to Platteville. Here he met J. H. Rountree, and was by him employed to burn a quantity of charcoal, and to do sundry jobs of blacksmithing. During the summer of 1829, Mr. Hooser opened up a farm on the Pecatonica River. The next year was spent at mining in "Jimtown." In the spring of 1831, he bought out the claim of a miner, which purchase gave him 160 acres, 80 of which he still owns. At the outbreak of the Black Hawk war, he assisted in the building of a stockade on the present farm of Mr. Roseleib, then owned and occupied by E. M. Orrin. Early in the summer of 1832, Mr. Hooser went to Galena, where he earned good wages at shoeing horses during the Indian war. On the surrender of Black Hawk, Mr. H. again sought his Platteville farm, where he has since resided. He married, near Eddyville, Ill., Elizabeth Knotts, who died Feb. 14, 1865, leaving three children—Justus D., Jacob and Amanda E. The present Mrs. Hooser was Mary Bennett, and by her he has three children—Marietta, Lester M. and Archie B. The 160 acres before mentioned, was bought of the Government, at the first land sale ever held at Mineral Point.

JUSTUS D. HOOSER, Platteville; eldest son of Jacob Hooser, Sr., was the third white child born in Platteville, March 12, 1832, on the farm where his father now resides. His early life was spent in this town. In 1850, he went to California, where he spent seven years in the gold mines. On his return in 1858, he settled on 76 acres of his present farm, to which he afterward added 100 acres. He married Mrs. Harriet Clark. Her parents were early settlers in Smelser, where her father built his stone house by moonlight, wheeling the material from a distance of half a mile. He was a stone-mason by trade, and was busily employed each and every day in building the houses of his neighbors, so that his own work must be done "after business hours." Mrs. Hooser married in England George E. Clark, who died in Grass Valley, Cal. His only son is James M. Clark. Mr. and Mrs. Hooser have five children—Joseph, Butcher, Elizabeth, Jacob W. and Justus D., all born on the Platteville homestead.

REV. EDWARD HOYER, Pastor of the Evangelical Lutheran St. Paul's Church, of Platteville; was born in Hamburg, Germany, in 1853. When 11 years of age, his parents emigrated to America, and settled in Monroe Co., Wis. His father, Rev. August Hoyer, is now Pastor of the Lutheran Church of Princeton, Wis. Rev. Edward Hoyer is a graduate of the Northwestern University, of Watertown, Wis., Class of 1873. He is also a graduate of Concordia Seminary, of St. Louis, Mo., Class of 1876. He immediately entered the ministry, and was located at Manchester, Green Lake Co., Wis., till October, 1878, since which time he has been in Platteville. He was married in November, 1878, in Spring Valley, Minn., to Miss Mary Kiesel, and has one son—Arthur.

GEORGE HUNTINGTON, farmer, Sec. 22; P. O. Platteville; was born Jan. 10, 1811, in Yorkshire, England, where his early life was spent as a farm laborer. He came to America in 1845, with his wife (formerly Ann Cooper) and three sons. Both Mr. and Mrs. Huntington were born near Goole, Yorkshire. He located in Platteville, where he resided until 1852, when he went with his family to California. Since his return, in 1856, he has resided on his present farm, now comprising 240 acres. There are now five children—James, John, George, Dennis and Thomas; the two youngest were born in Platteville.

JOHN HUNTINGTON, Platteville. Born in Goole, Yorkshire, England, May 1, 1803. His wife was Mary Hatfield, who was born April 30, 1811, in Laxton, Yorkshire, England; married March 24, 1831, and their bridal tour was to their future home in America. Up to 1837, their home was Pittsburgh, Penn. In the spring of 1837, they came to Platteville, where he bought 160 acres of his present farm; only 17 acres were broken, and on this was a small log cabin in which the young couple began life in Badgerdom. It was replaced in 1859, by the substantial brick farmhouse, now occupied by a son. Mr. Huntington has been a lifelong and most successful farmer. He now owns 680 acres of splendid land under cultivation, besides 120 acres of timber. Since October, 1869, Mr. Huntington has resided in the city of Platteville. Mr. and Mrs. Huntington have had ten children—William H., Anne, Mary A., Sarah, Elizabeth, Maria, John P., Thomas T., Lydia J. and George R.; William H. died Aug. 13, 1861; Anne died July 3, 1835; Sarah died July 9, 1847, and Thomas, Oct. 9, 1855.

RICHARD HUNTINGTON, deceased; was the first of the Huntington brothers to settle in Grant Co. He was born Aug. 1, 1804, in Swinefleet, Yorkshire, England, and came to America in 1830, locating at Pittsburgh, Penn. He remained there until 1835, when he came to Platteville; it was then a small collection of miners' log huts, and had but recently received the name of Platteville. In the spring of 1836, he made what was then known as a "squatter's claim" of part of the present estate; this land he bought of the Government on its coming into market. He began here in a primitive log house, which was replaced in 1857, by the present roomy and substantial brick farmhouse. His first wife, nee Mary Myers, died in the fall of 1846, leaving four children—William M., Robert M., Richard J., and Lydia A. On the 22d of April, 1847, he married Miss Lucy Colburn; she is of the old Puritan stock, and was born in Chittenden Co., Vt., but was reared and educated in and near Burlington, Vt.; 1845, was the date of her settlement in Platteville. Mr. Huntington was a life-long and most successful farmer. He took pride in his beautiful prairie farm, and made such additions as to leave a large estate to his posterity. He was a prominent and honored member of the P. M. Church, and was a man of kindly and benevolent convictions. He died April 28, 1871. Few of the pioneers of Platteville could count more real friends, and none could have left a place more difficult to fill. By his second marriage, he had six children—Mary E., Frank E., Laura M., Samuel W. and Carrie E. Charles W. died May 11, 1864. Since 1879, his widow and youngest daughter, now Mrs. J. H. Spink, have resided in the city of Platteville. Mrs. Huntington is a member of the M. E. Church.

A. J. HUTTON, conductor of institutes for the State Normal School of Platteville, is a native of Dunfermline, Scotland; born in 1846. When 11 years of age, his parents emigrated to America and

settled in Portage Co., Wis., where they still reside. Prof. Hutton was educated at the Platteville Normal School, graduating in 1869, being a member of the first graduating class. In the fall of 1869, he went to Augusta, Eau Claire Co., Wis., and taught in the public school one year; then returned to Platteville, and for one year was Principal of the Academic Department of the State Normal School. He then returned to Eau Claire, and was Principal of the West Side Schools of that place till the fall of 1879, since which time he has been in his present position. He was married in July, 1872, in Platteville, to Miss Kate McGregor, of that place, and sister of President McGregor of the Normal School. Has three children—Emily, Margaret and James.

JAMES IVEY, farmer; P. O. Platteville; was born April 20, 1816, in Camborne, Cornwall, England. His occupation in early life was that of tin dresser. He married, in his and her native parish, Mary Ann Eudey, by whom he has nine children—James A., Honor A. (Mrs. L. D. Culver), Jennie (Mrs. Alexander Thomas), Elizabeth (Mrs. John Carhart), Edward M., M. Julia, Benjamin F., Rosina and Nellie; the eldest was born in Camborne, and all the others in Grant Co. The parents came to America and located at Lancaster in 1845, Mr. Ivey working in the Pigeon and Rockville diggings; at the latter point he erected one of the very first framed houses, and for a time worked in the furnace of Squire Emery. In 1855, he bought a farm on Sec. 2, town of Harrison, having spent the preceding year in California. In 1872, he came to present location in Platteville; here he has in all 202 acres. At one time, while in Harrison, Mr. Ivey had nine children of "school age," i. e., from 4 to 20 years. His eldest son served under Gen. Thomas in his Tennessee campaign of 1864-65.

THOMAS JENKINS, miner; was born in Cornwall, England, June 26, 1832, in the parish of Kenwyn, and received a common-school and academic education in England. His father, Benjamin Jenkins, went to Brazil, South America, with his family in 1837, and was engaged in mining there till 1842, then returned to England. He came to the United States in 1848 and settled in Platteville, where he was engaged in mining till 1851, when he went to California, returning to Wisconsin in 1857; went again to California, overland, in 1861, and from there to Montana in 1866. He returned to Platteville in 1868, and has resided there since. He was married in 1858, in Dodgeville, Wis., to Miss Sheba Martin, daughter of William Martin, of that place, and has four children living—Bennie, Ida, Nettie and Mary. Mr. Jenkins was a member of the Village Board of Platteville six years in succession from 1870, and was Assessor five years of the time; he represented his district in the Legislature of 1874, and is at present a member of the City Council.

THOMAS JENKINS, farmer; is a native of Cornwall, England; born in 1833, in the parish of St. Agnes, son of Nicholas Jenkins came to America in 1848, leaving England on the 6th of April, arrived in Mineral Point, Wis., on the 10th of June; he engaged in mining there till April 1, 1849, then came to Platteville April 15, 1852; he started for California and returned June 3, 1857. In 1862, he went again to California and from there to Montana, returning to Platteville in 1868, where he has since resided; he was married in Platteville Dec. 24, 1859, to Miss Elizabeth Enner, who died in April, 1860. His second wife, to whom he was married Jan. 5, 1871, was Mrs. Eliza A. Daney, daughter of William Martin, of Dodgeville, who was also from Cornwall, England; she was the widow of Joseph J. Daney, a native of Mineral Point, Wis., who died in Platteville October, 1869, leaving three children—Nora A., Joseph E. and Frank S. Mr. Jenkins has three children by the second marriage, Orville M., Clarence P. and Cora A.

W. T. JENNINGS, teacher, Principal of the Rock Graded School of Platteville; was born in Keweenaw Co., Mich., in 1858. His father, William Jennings, was a native of Cornwall, England, and came to America in 1848. He settled in Hazel Green, Grant Co., Wis., and in September, 1850, he married Miss Elizabeth Collins, also a native of Cornwall, England, who came to America in 1848. Immediately after marriage, he removed to the copper regions of Michigan and was engaged in mining there till his death June 17, 1860, by the falling of earth and rock where he was engaged in blasting. After his death, Mrs. Jennings returned to Hazel Green, where she resided about four years, then returned to Michigan for about the same length of time. In December, 1868, she married William Trewartha, who died in 1871; since her second marriage she has resided in Grant County, and since August, 1877, in Platteville. William T. Jennings was educated at the High School in Hazel Green and the Normal School at Platteville, graduating from the Normal in June, 1878, since which time he has been teaching, and has been in his present situation since April, 1880; he also taught winters from 1874 to 1878. He has one brother John, and one sister, Mary Ann, now Mrs. Joseph Thomas, of Michigan.

JESSE S. JONES, Platteville; was born in 1823, in Orange Co., N. Y.; from there he removed to Ohio, thence, in 1847, to Grant Co., Wis. In early life he learned the trade of leather-dress-

ing, and followed it until he came to Wisconsin; his first enterprise was to open a small store in Wingville, groceries, notions, etc.; he then began mining in Iowa Co., struck some rich diggings and cleared about \$1,000; in 1849, he was one of the first to discover the rich "New California Diggings;" here he had a large business, with varied success, but finally met with some serious losses, though he still owns a fine quarter-section of land in that vicinity; while he was a resident of Clifton, he was the first Town Clerk elected, and afterward served a number of terms as Chairman, etc.; in 1865, he came to Platteville and bought his present homestead; here he has erected substantial buildings, and laid out and planted his grounds in a most tasteful manner, making his one of the most elegant suburban homes in the city. His wife was Miss Elizabeth, a daughter of F. C. Kirkpatrick, of the early pioneers of Grant Co.; they have several children. For a number of years after coming to Platteville, Mr. Jones was actively engaged in the milk business, supplying city customers, but has relinquished the work; he has 60 acres, twenty of which are in the corporation, and this land gives him ample facilities to indulge his fancy for rearing fine stock; he has of late devoted much attention to the breeding of fine horses; his pride is the Black Hawk, Reliable, a magnificent type of that famous family of horses; his weight is 1,750 lbs., and, as a writer in the *Chicago Field* says, is tremendously built, with immense sloping shoulders, strong limbs, round barrel and deep, powerful chest; his owner considers him the best living type of Tyler's old Black Hawk; he shows a three-minute gait, with no training whatever. Another of Mr. Jones' favorites is Tartar, a splendid horse, directly descended from Royal George, and showing many of the best points of that regal line of trotters.

OBED C. JONES, Sec. 6; P. O. Platteville; was born March 23, 1810, in Trumbull Co., Ohio, where his early life was spent; at 15, he went to Oswego Co., N. Y., but afterward returned to Ohio; in 1837, he went to Hancock Co., Ill., spent a year and then came to Platteville; Obed King was then the only settler at "Whig;" after a short stay he returned to Illinois, and, the next year, brought his family to Harrison for permanent settlement; locating on what is now the Levi Bushnell farm; he followed his trade of carpenter, and worked at millwrighting for many years; during 1839, he put the screening and bolting apparatus into the historic old McKee Mill. Mr. Jones has owned three different farms, and spent 1868 and 1869 in the city of Platteville; in 1870, he settled on his present farm of 160 acres. He married, in Hartford, Trumbull Co., Ohio, July 20, 1834, Miss Ursula Miner, who was born Jan. 27, 1818, in Hartford, Conn. Her parents located as early as 1820, in Ohio, where she grew to womanhood. Mr. and Mrs. Jones have six living children—Pluma A. (born in Vernon, Trumbull Co., Ohio), Albert H., Maria A., Celia J., Julia A. and Mollie E., all born in Harrison. Julius M. Jones enlisted in the 4th W. V. I., and died of typhoid fever on the banks of the Potomac, Dec. 2, 1861. Albert served three years with the 35th W. V. I., and was with Sherman on his march to the sea and through the Carolinas. Besides J. M. this pioneer couple have lost five children—Ursula J., aged 16; Calvin R., aged 19; Lura L., aged 9; Elluna L. aged 9, and an infant. Mr. Jones is a member of the Christian Church and is a Republican; he served ten years as a Justice of the Peace, and is well and widely known as a well-posted old settler.

SAMUEL M. JONES, wagon and plow maker, Platteville; was born in Pembrokehire, South Wales, Oct. 27, 1840; son of David Jones, who came to America in 1852, and settled in Mifflin, Iowa Co., Wis., where he resided till his death in 1860. Samuel M. learned his trade with Gideon Hawley, of Platteville, and has been in business for himself since 1867; was in company with Edward Davis seven or eight years, and a member of the firm of Potter & Jones about three years. He was married, in May, 1867, to Miss Emma Davis, daughter of Edward Davis, of Platteville, and has six children—Fannie, Samuel E., Lina, Emma, Nora and Thomas.

JACOB KARMANN, manufacturer and dealer in boots and shoes, Platteville; was born in Prussia in 1841; he learned his trade in the old country, and came to America in 1866; he lived one year in Pottsville, Penn., and a few months in Galena, Ill., and has been in Platteville since 1867. In 1868, he married Miss Sophia Kabele, and has seven children—Jacob, Peter, George, Mary Elizabeth, Anna Lena, Magdalena Catharine and Bertha Wilhelmina.

JOHN KEMLER, retired merchant, Platteville; has been a resident of Platteville since January, 1844, and was in the mercantile business from that time up to 1871; he was born in Hanover, Germany, in 1818, and came to America in 1837; he spent one summer in New York City, then went to Savannah, Ga., and resided there two years, being one year overseer on a plantation. He came to Galena, Ill., in the spring of 1842, and was there till the fall of 1843; then went to Germany and was married in 1844 to Miss Maggie A. Meyer, of Hanover; then returned to America and settled in Platteville, as before stated. Mr. Kemler has four children, all living in Platteville. His oldest daughter, Minnie, is now the wife of H. P.

Schroder; Julia is now Mrs. Geo. Handy; A. W. Kemler married, and in the mercantile business of the firm of Huntington & Kemler, and James C., who is clerking for his brother. Mr. Kemler spent the summer of 1866 in Germany, being accompanied by his wife and daughter Julia; was Village Trustee for several years.

J. F. KIRKPATRICK, Platteville; is of Scotch descent, his ancestors having been banished to South Carolina and Georgia during the religious troubles in the middle of the last century. His grandfather, with six stalwart brothers, fought under Washington and Marion for freedom and revenge upon the mother country. All returned in safety, except the grandsire of Mr. Kirkpatrick, who was foully murdered by Tories. All were over six feet in height, and enlisted from Georgia. The father of Mr. Kirkpatrick, with two brothers, came from Georgia to what is now Madison Co., Ill., in 1800. He was the father of eight sons, of whom John F. was born Sept. 8, 1811. Five of the sons came to the lead regions of Illinois and Wisconsin. J. F. Kirkpatrick came to Belmont Mounds early in 1832 and planted a crop of corn; then came the Indian scare and subsequent war, in which Mr. Kirkpatrick took an active part as one of Capt. Craig's company. Returning to the north of Platteville that fall, he discovered the "Burying Ground Diggings." He married, near Washburn, Mary J. Basey, who died, as did her four children. The present Mrs. Kirkpatrick was Mary Ellen Somers, born in Clarke Co., Ind.; they have five children—Henrietta (Mrs. George Brunskill), Emma A. (Mrs. Jas. Stevens), Anne, Ella May and Clyde, all born in Platteville. Since 1838, Mr. Kirkpatrick has resided in Platteville. Here he was eight or ten years in mercantile business, and for twenty-two years in the butchering business. Mr. Kirkpatrick has served for many years on both the town and village boards.

HENRY C. LANE, retired, Platteville; was born Sept. 19, 1819, in Hartford, Trumbull Co., Ohio. In early life, he learned the trade of blacksmith, which trade he began soon after his arrival in Platteville in the spring of 1840. A log shop, on the present site of Hendershott's store, was the scene of his first labors here. He worked for and boarded with Samuel Moore for a time. In 1842, he built a frame house—part of which is still standing in the rear of Hendershott's store—and the same year bought the log shop of Mr. Moore. In August, 1843, he married, in Ohio, Miss Alvira Holcomb, who was born in Broome Co., N. Y., but reared in Ohio. She has vivid and amusing memories of their "wedding tour," notably the journey through the then new and primitive Southern Wisconsin. Milwaukee was a hamlet with two small hotels, so crowded that the landlord was obliged to dislodge certain guests, in order to accommodate them. He said the routed sleepers had "gone to bed early, any way." The young couple began in the before-mentioned frame house, which was their home until 1847, when Mr. Lane bought out Judge Inman. Thus they lived in what is now a part of the Wright House until 1856 or 1857, when they took possession of the large and pleasantly located residence previously built, and now occupied by them. Mr. Lane has taken much pride in laying out and planting his grounds, and has a beautiful place. He carried on blacksmithing and the hardware business until 1867, building for a shop the present store of Mrs. Block. It was then the best blacksmith-shop in Wisconsin. L. N. Devendorf and himself built their store, and Mr. Lane has built and remodeled other structures in this city. Mr. and Mrs. Lane have four children—Maria, Etta, Gulana and Jessie, all born in Platteville, and all married and settled in homes of their own.

GEORGE R. LAUGHTON, retired, Platteville; has been a citizen of Platteville since Dec. 25, 1842. He was born in London, England, in 1820; came to America with his parents in 1835; lived in New York City and Monroe Co., N. Y., till 1842, when he came to Wisconsin, and located in Platteville. He was engaged in merchandising in Brockport, N. Y., three years, and two years in Clarkston, same county, previous to his coming to Wisconsin. He followed the same business in Platteville till 1846, then engaged in farming two miles out of the village till 1873, when he retired from active business, and came to Platteville to reside. He is at present a member of the City Council, and was one year Supervisor while living in the town. He was married in Platteville in 1844, to Miss Mildred M. Durley of that place, and has had seven children, five of whom are still living, four of them sons, whose average weight is 250 pounds, none of them weighing less than 200, and all in good health. Mr. Laughton was the originator and promotor of the erection of the Grant County Soldiers' Monument at Lancaster, which was the first of the kind erected in the United States.

ISAAC LORD (deceased); was born in Parsonsfield, Me., in 1803. He was engaged in the boot and shoe business in Maine, and came from there to Platteville in 1839. He was married, in 1843, in Elizabeth, Ill., to Miss Emaline Morton, daughter of Chester Morton, a native of Massachusetts. Soon after his marriage, Mr. Lord purchased land in Platteville and vicinity, and also in La Fayette Co., and in the spring of 1854, he went on a farm at what is called the West Plat Mound, and was engaged in

farming there till the fall of 1870; then removed to the village of Platteville, where he resided till his death, Aug. 16, 1877. He left two children—Isabel, now Mrs. Minard Mills, of Plymouth Co., Iowa, and Purl, who is reading law with S. W. Bell.

WILLIAM LONG, farmer; P. O. Platteville; a very early settler of Platteville; was born Jan. 30, 1815, in Grayson Co., Va. His father was a Virginian, and his mother a native of Tennessee. To the latter State they removed soon after his birth. Grown to manhood here, he mounted his horse in 1834, and rode across the country to Platteville; engaged in mining until 1853, when he settled where he now is. Has 40 acres, originally timbered. His wife was Susan Gregory, born in Tennessee, and reared in Marion Co., Mo. They have eleven living children.

J. B. McCOY, dealer in live stock; P. O. Platteville; was born in Peoria, Ill., in 1839; came to Platteville in 1860, and attended the Platteville Academy till 1862. In August, 1862, he enlisted in Co. E, 25th W. V. I., and served as a private about sixteen months, when he received a First Lieutenant's commission, and served in that capacity till the close of the war. In 1874, he was elected Sheriff of Grant Co. on the Republican ticket, and served one term. In May, 1866, he married Miss Flora S., daughter of Milton Graham, of Platteville, and has had four children. His two oldest—Charles Graham, aged 12, and James Lester, aged 8, died of diphtheria in the fall of 1878; has two living—George F. and Milton Clay.

JAMES N. McGRANAHAN was born in Salem, Mercer Co., Penn., Dec. 15, 1841. Ten years later, his parents, A. J. and R. J. McGranahan, came to Iowa Co., Wis.; lived three years on a farm near Mineral Point, and a year in the Wyoming Valley. Owing to ill health, the father returned with his family to Pennsylvania, and stayed there three years. The family then returned, and lived for a time near Gratiot and Red Rock; then went to Fennimore, and, four years later, settled on the farm in Lancaster, where the old couple now reside. In January, 1865, J. N. McGranahan enlisted in Co. K, 47th W. V. I.; served nine months, and was honorably discharged with his regiment. He then spent two years with his parents, and, in 1867, married Mary Orton. She was born on the Strand, in London, and was the daughter of a business man of that metropolis, who made a voyage to Australia, and around the globe, taking his family with him. After a somewhat brief experience on rented farms, Mr. McGranahan came to Platteville, and, after a winter at mining, he entered the employ of the Laffin & Rand Powder Co. Mr. McGranahan seems to bear a charmed life as a brief recital of his many close and almost miraculous escapes will show. In his younger life, while in La Fayette Co., Wis., he was nearly crushed to death by a runaway steer, the brute so managing his stampede as to drag the boy after him, and finally fell upon him. His second accident overtook him while he was crossing some slippery timbers in constructing a dam. He was a powerful young fellow, and was carrying a very heavy beam, the end of which struck him full in the face as he went down, and, of course, drove him to the bottom of the deep stream. During his six years' service with the powder company, he was thrice in imminent danger. At the first explosion, Feb. 16, 1877, he sprang from one of the buildings just as the roof was blown from the "corn- ing" works, yet escaped the hail of falling missiles. In September of the next year, the packing works exploded. He, at the time, was washing himself in a building prepared for the use of the employers. He was entirely nude, and when found was under a mass of debris with his shoulders and lower limbs literally stuck full of bits of glass. He now bears the scars of innumerable wounds and cuts. The roof of the wash-house and the broken windows did the business for him. When the press works exploded, in November, 1877, he jumped into the creek, and thus extinguished his blazing and most inflammable garments, which had caught from the explosion. Few men would have had the presence of mind he displayed in closing eyes and mouth, and making the plunge as he did. The surface of the water was strewn with broken timbers, etc., yet he was not hit, and, in spite of his many adventures and "close calls," he is to-day a sound man. In the spring of 1880, he was elected Town Treasurer, and, in the fall following, was appointed Janitor of the Normal School building. Mr. and Mrs. McGranahan have a son Ralph, born in Platteville. Mr. McGranahan has a house and lot in the city, though living in the school building, in order that his duties may be fulfilled.

DUNCAN MCGREGOR, President of the State Normal School at Platteville, is a native of Perthshire, Scotland; born in 1836; was educated at Perth Academy, University and King's College, Aberdeen, Scotland, and Lawrence University, at Appleton, Wis., graduating from the latter place in 1862. He came to America in 1857, taught school in Waupaca Co., Wis., three winters—1858, 1859 and 1860—and was Principal of the High School at Waupaca from 1860 to 1864. In August of that year he raised a company in Waupaca, and was mustered into the service as Captain of Co. A, 42d W. V. I., and served till the close of the war; was one year Principal of the Waupaca High School after the

war. In 1867, he was elected to the Professorship of Mathematics, in the State Normal School at Platteville, which position he occupied for six years, and was then Professor of Theory and Practice of Teaching, and conductor of institutes for six years longer. In January, 1879, he was elected to his present position, which he has occupied since. He was married in 1865 to Miss Annie Bowman, of Waupaca, and has four children—Alice, Grace, Libbie and Jessie.

JAMES MCKERNAN, saloon-keeper; has been a resident of Platteville since May 10, 1841. He went to California in 1851, and returned the same year; went again in 1862, and returned in 1863. He was born in Canada, and when about a year old his father, Bernard McKernan, removed to Rochester, N. Y., where he resided about six years, then returned to Canada, and lived six years. Only about six miles from Detroit, Mich. He went from there to Freeport, Ill., and thence to Platteville in 1841, and died there in 1871. James was married in 1839, in Joliet, Ill., to Mary Ann McCauley, and has five children—James, Laura Ann (now Mrs. Thomas Leahy), Charles, Lillie and Mary Ann.

JOHN MICKA, farmer; P. O. Platteville; was born Nov. 12, 1809, in Rhenish Prussia, where he spent his early life as a stone cutter. Here he married Catherine Boscha, who was born Aug. 5, 1814. They were wedded Feb. 24, 1834, and came to America and Grant Co. in 1841. During the first seven years, Mr. Micka was a lead miner, and then began on his 120-acre farm, half a mile north of the city of Platteville. Mr. and Mrs. Micka have had twelve children—Catherine, Mary, John, Margaret (deceased), Henry, Augustus, Sylvester, Joseph, Frank, Herman, George and Abbie. The four eldest were born in Germany, and the others in Platteville. This family are and have been active and influential members of St. Mary's Roman Catholic Church, Platteville, Mr. Micka donating liberally toward the erection of the church. Himself, wife and children are lovers of music and good singers. He and his sons Herman, George and Frank, have been members of the choir, of which Miss Abbie is now leader and organist.

REV. CHARLES C. MILLER, Pastor of the German M. E. Church of Platteville, was born in Quincy, Ill. His father, Michael Miller, was a native of Alsace, Germany, and came to America in 1830 or 1831. He lived in New York City till 1835, then went to Quincy, Ill., and now lives in Lincoln, Neb. Charles C. Miller was educated in Quincy, Ill.; was in the mercantile business in Bushnell, Ill., six years, and five years in Freeport, and entered the ministry in 1878. He was married in Freeport, Ill., in 1873, to Miss Lizzie Wenzel, and has five children—Arthur Wenzel, Edward Funk, Ida May, Clarence Wesley and Benjamin Philip. His first charge was Lena, Ill., and he came from there to Platteville in October, 1880. In February, 1864, he enlisted in the 151st Ill. V. I., Co. C, as a private, and served till the close of the war.

REV. W. G. MILLER, Rector of St. Mary's Church of Platteville, was born in Racine, Wis., and educated at St. Francis' Seminary, near Milwaukee, and ordained in 1872. He spent a few months in Milwaukee after his ordination; then was two years in Sun Prairie, and in July, 1874, assumed charge of the Church of St. Mary's of the Lake, in Westport, Dane Co., Wis., and also St. John's Church of Wauwaukee. He was transferred to his present charge in September, 1880.

HERMANN MELSTER, editor and proprietor of the Platteville *Correspondent*, is of German parentage, and was born in 1857 in Milwaukee, Wis. Here he received a good education in both German and English, and, in 1871, entered the office of the *Herold*. Beginning newspaper life thus early, he has since followed it, filling various positions on the *Seebote*, the *Freidenker* and the *Banner und Volksfreund*, of Milwaukee. He has also been employed on the German papers of Indianapolis, and was, for a time, foreman in the job office of the St. Paul, Minn., *Volkszeitung*. Returning to his native city, he remained until the fall of 1879, then came to Platteville. In company with Ferd. Reinshagen, he established the *Correspondent*, the first issue bearing date Oct. 9, 1879. On the 18th of December, 1880, Mr. Melster bought out the interest of his partner, and has since managed this, the only German newspaper in Southwest Wisconsin, alone. It is a four-page eight-column weekly, independent in politics, and devoted to the best interests of this part of the State; circulation at this time 550, and constantly increasing.

WILLIAM MEYER, Sr., Platteville, was born Sept. 22, 1828, in Sulz, Wurtemberg. In early life he learned harness-making, and during the revolution of 1848-50, he served as a soldier in the Fourth Wurtemberg Regiment. In 1852, he came to America; landed at New Orleans, and then came up the Father of Waters to Galena, thence to Platteville, where he entered the employ of Mr. Lambert, a harness-maker. During the civil war, he formed a partnership with Miner Burwell in the harness business. At the death of Mr. B., a year later, Mr. Meyer bought out the heirs, and conducted the business alone, until he in turn sold out to his son and son-in-law, Dec. 15, 1877. He owns 9 acres in the

city and farms in a small way; is also one of the Board of Alderman, elected in the spring of 1880, and a member of the German Presbyterian Church, of which he has been an Elder for three years past. His first wife was Frederika Kohler, born in his native village. She died in November, 1870, leaving five children—William, Rosa, John, Samuel and Martha. By the present wife, *née* Pauline Geyer, he has a son—George. The eldest son is in partnership with Peter Pitts, Jr., they having bought out the father in the harness business. The second son is in the shop with them, while the three youngest children are with the father, whose name heads this sketch.

SAMUEL MOORE, Platteville. Mr. Moore was born near Mt. Vernon, Ind., Nov. 19, 1814; he came from Kentucky stock, his parents having removed from that State to Indiana some time previous to his birth. He remained at Mt. Vernon until he had attained his 20th year, obtaining a good common-school education, and afterward learning the trade of gunsmith, besides attaining a proficiency in iron-working, which stood him in good stead when, later, he came to the then Territory of Michigan; this move was made in the spring of the year 1834. Young Moore came at once to what is now known as Grant Co., and located at Platteville, and, during the several decades which have blazed forth and burned for their brief space then faded away only to be forgotten, Mr. Moore has remained a resident of this, the first place of his selection. Young Moore at once started in business, opening a blacksmith-shop, which trade he practiced for the seven years following; ill health caused an abandonment of this trade, and, in 1843, he engaged in the mercantile business; from this time until 1860, Mr. Moore's store was one of the prominent institutions of the kind in the town; Mr. Moore's attention had been early attracted toward manufacturing, and previous to that date, namely, in 1854, he had started a linseed oil mill with fiber works in connection, near the site of his present hotel; in order to devote more attention to this business, he closed out his stock of goods and devoted his whole time to his manufacturing interests; in 1862, after closing out these interests, Mr. Moore was elected County Treasurer, which position he held two terms, giving most general satisfaction, and retiring with honor at the expiration of his second term. Hardly had he shaken off the cares of office before, in connection with Mr. Hamner Robbins, he entered upon the work that resulted in bringing the present "broad gauge" road into Platteville, and giving that village for the first time, after the failure of many schemes, railroad communication with the outside world. To Mr. Moore and his co-worker belongs the honor of having accomplished a seeming impossibility. The first moneys needed in the early beginnings of this line were furnished by these two gentlemen. For the six years following, Mr. Moore was closely connected with the line, but, at the close of that time, injuries which he had received necessitated his withdrawal from active business. Upon the recovery of Mr. Moore from his injuries, some years later, he devoted his time to the supervision of his own private matters until October, 1880, when he took possession of the Gates House, which hotel is owned by him, and is at present engaged in the congenial task of landlord.

But few men now living in Grant Co. can show a longer continuous residence in the county, and, as one of the "old residents," Mr. Moore takes a deep pride and interest in everything bearing on the county's welfare. In addition to his service as County Treasurer, he was twice elected President of the village of Platteville, and twice Chairman of the Town Board of Supervisors. In 1837, Mr. Moore was united in marriage to Miss Ann Snowden, of England; three children were the fruit of this union, one son and two daughters, of whom but one daughter (Mr. McCarn) is still living.

JOHN MYERS, was born July 22, 1807, in Westmoreland, England, where he served an apprenticeship as a carpenter. He came to America and located in Buffalo, N. Y., in 1832. Here he married Anne Smith. Up to 1837 he worked at his trade, on both the American and Canadian sides of the Niagara River, building vessels for the lake trade. The year 1837 found him in Platteville, and late in that year he helped build the old M. E. Church, the first erected in Grant County. Part of the old edifice is now in use by Maj. J. H. Rountree, as an office. It was built by subscription, and was the second M. E. Church built in Southwestern Wisconsin, that erected in 1834, at Mineral Point, only preceding it. Mr. Myers also worked at the old Platteville Academy. In 1849, he located where he now is, and, in company with George R. Laughton, built a carding mill, which he operated about ten years. His wife died Feb. 3, 1859, and in 1864 he married Hannah Beckett, who was born in Canton, St. Lawrence Co., N. Y. She came from the Western Reserve, Ohio, to Wisconsin in 1853. Mr. Myers has followed his trade faithfully, and still takes pride in his work.

ROBERT NEELY, Platteville; was born July 11, 1815, in Westmoreland Co., Penn.; in 1821, his parents, David and Jane (Fether) Neely, removed and settled in Mercer Co., Penn.; grown to manhood here, Robert went to Ohio and resided there between three and four years; he then taught a term of school near his old home and decided to come to the lead regions; in May, 1839, he reached Bur-

lington, Iowa; and soon after made a claim forty miles to the west of that town. Owing to the fact that the land came into market almost immediately after, he was compelled to relinquish his claim and come to Wisconsin. His friend, Horace Earle, had accompanied him from the East, and the two came to Platteville together. They soon secured a wood-cutting contract on what is now Mr. Neely's farm, it then being a smelting survey reserved by the government. They boarded in a cabin with several other bachelors, said hut then standing a short distance from where Mr. N. has since built his barn. Finally, Mr. Neely made a "claim" here, erected a better habitation and caused the coming of his aged parents, though he then looked upon this as only a temporary stopping-place. Yet as he plowed and sowed, built and planted, his affections centered around the lowly house where his parents were so contentedly dwelling. He married Miss Helen M., daughter of B. F. and Mary F. (Robinson) Chase; she is a descendant on her mother's side of one of Vermont's first Governors, and was born in Middleport, N. J. B. F. Chase afterward removed his family to Ohio, where she engaged in teaching prior to her marriage. Since that event, which occurred in August, 1849, in Salem, Penn., Mr. and Mrs. Neely have resided on this picturesque farm, Mr. N. having purchased it at the U. S. land sale held in 1848 at Mineral Point. His father, who had in his younger days served with Mad Anthony Wayne, died here in his 85th year. The aged mother also passed her last days here. Mr. and Mrs. Neely are members of the Platteville Congregational Church, of which he has been a Deacon for the past twenty years. They have seven children—Henry, Mary F., Kate M., Helen S., Fannie L., Robert S. and Benjamin P. All were born and educated in Platteville.

E. F. NEWTON, superintendent of Laffin & Rand's Powder Works, Platteville; is a son of Edward and Mary Newton, who came in an early day to Dubuque, Iowa, from Maryland. E. F. Newton was born in Dubuque June 11, 1840. Two years later his father died, and the wife followed him when E. F. was about 15 years of age. Thus thrown upon his own resources, he returned to Maryland, and clerked in a Baltimore hardware store until he was 21; in 1862, he entered the employ of the powder manufacturing company, and served both as clerk and traveling salesman for nine years. He was appointed to his present position in 1871. Married Miss Susan Shafer, of Illinois, by whom he has a son—Charles Newton, born in Platteville.

JAMES NICHOLS, was born June 2, 1815, in Reen, Paranzatatoe, Cornwall, Eng.; he learned the trade of wagon-maker in his youth; in 1842, he counted as one of the "Stephens colony" that emigrated from Merry England and located in Platteville; Mr. Nichols' first work here was building the law office of Eastman & Lakin during 1842; he also worked on the old M. E. parsonage and the Rountree bridge, across the Platte, besides the Campbell Hotel and the M. E. Church; for about four years he had a shop and made wagons here; in 1844, he married Mary A. Stephens, a first cousin; she died in October, 1853, leaving two children—John A., who died when he was about 23 years years of age, and A. J., who died Dec. 29, 1859; Mr. Nichols left for California in April, 1852, and was four months crossing the plains with an ox team; he employed himself at gold mining and in working at his trade until May, 1854, when he again arrived in Platteville; his two motherless boys were with their grandparents. Feb. 5, 1855, he married Mary J. Rundell, who was born in Little Pethick, Cornwall, Nov. 14, 1831; she came to America in 1853; after the marriage, Mr. N. spent about ten years on a farm in Platteville, and two years on a farm in Mifflin, Iowa Co.; in 1867, he came to the then village of Platteville and bought a lot of Maj. J. H. Rountree, building and planning his own house, which makes a most pleasant home for his wife and himself. Both are members of the P. M. Church. He still enjoys an occasional day's work with his tools, and is the picture of the healthy and stalwart sons of old England; his parents, James and Jane (Stephens) Nichols, came to Platteville from England in 1848, and both died here.

W. S. NORTHRUP, banker and member of the firm of Northrup & Co., Platteville; was born in Rutland Co., Vt., in 1850; came to Platteville in 1874, and, from that time until 1878, was in the bank of S. Hodges & Co.; he was then in business for himself in Belmont about one and a half years, and formed the present partnership in April, 1880. He was married, Oct. 10, 1878, to Mary G., daughter of Dr. G. W. Eastman, of Platteville. Mr. Northrup is the present City Treasurer.

CHARLES H. NYE, Director of the Model School of the State Normal School, of Platteville, was born in 1835, in Somerset Co., Me.; was educated at the Waterville Classical Institute, and commenced teaching in his native State in 1855; came from there to Grant Co., Wis., in the fall of 1857; he first settled in Hazel Green and taught school there about six years; in August, 1864, he enlisted in the 43d W. V. L., and went out as Quartermaster Sergeant, and was in the service till the close of the war. There were nine boys in his father's family and seven of them were in the army at the same time, four

from Maine and three from Wisconsin; two of them never came back. Newell D. Nye was in a Maine regiment, and was killed at the battle of Port Hudson, and George W. Nye, also in a Maine regiment, was killed at the battle of Chantilly, Va. In the fall of 1865, Mr. Nye came to Platteville, and was Principal of the "Rock Graded School" from that time until 1873, when he accepted the position of Principal of the Grammar Department of the State Normal School, and, in the fall of 1873, was transferred to his present position. He was married, in Platteville, in 1860, to Miss Flora A. Tyler, and has five children, three sons and two daughters.

J. L. NYE, photographic artist, Platteville; is a native of Maine, born in Fairfield, Somerset Co., in 1842; he enlisted, Aug. 5, 1861, in the 7th Me. V. I. Co. E, and served as a private two years in that regiment, when he was given a Second Lieutenant's commission in Co. E, 9th U. S. Vols., and served one year in that capacity; he was in ten engagements while in the 7th Me. Regiment, and was at the siege of Port Hudson with the 9th. After he left the army he returned to Maine, and from there came to Platteville, in November, 1865, where he has been engaged in his present business ever since. He married Miss Kate Tyler, of Platteville, in 1867, and has two children—George N. and Mabel.

J. H. PARNELL, Platteville; is a son of William Parnell, of England, who emigrated in 1842, locating in Galena, Ill., where J. H. Parnell was born in 1844; three years later the family came to Grant Co., where the mother died and the father still resides. His son, our subject, married Miss Mary J., daughter of Thomas Chapman, Esq., of Platteville; they have three children—Jesse Lee, Lillie May and Carrie Edwards, all born in Platteville. From 1862 until 1874, Mr. Parnell was in the mercantile business here; he then began his present business of receiving, feeding and weighing live stock for farmers, drovers, and all who wish such accommodation; he has convenient buildings, yards, etc., and has established a good trade; it was first begun by Chapman & Kirkpatrick. Mr. Parnell is a member of the Platteville Hook and Ladder Co., and of the A. O. U. W.

JACOB B. PENN, retired, Platteville, Wis.; born in Patrick Co., Va., in 1818; when only 3 or 4 years of age his father, Abraham Penn, removed to Christian Co., Ky., where young Penn was brought up; in the spring of 1839 he left Kentucky, and spent the summer in Illinois and Missouri, then came to the mines in Grant Co., Wis., the next fall, and to Platteville in the fall of 1840; he was engaged in mining in Grant Co. till 1850, then went to California and followed the same business till 1852, when he returned to Grant Co., and bought a farm two and one-half miles east of Platteville; he followed farming till 1866, then sold out and engaged in the hardware business in Platteville, in company with L. M. Devendorf, firm of Devendorf & Penn, which he continued till April, 1877, since which time he has been out of business; he was married in Platteville in 1849, to Samantha Collins, of Jamestown, Grant Co.; his first wife was a lady of the same name, married in Missouri in 1846; has no children living.

HENRY J. PERRY, Sec. 3; P. O. Platteville; was born September, 1834, in Carnarvonshire, Wales, where his father, John Perry, died two years later; the mother and eight children came to America in 1846, and located in Oneida Co., N. Y.; H. J. Perry spent several years in New York City; then, going to Princeton, N. J., he married Maggie Blair, and after a residence of ten years there went to Pennsylvania, where he spent a year; in 1866, he came to Platteville and bought his present farm; he now owns eighty-five acres in the homestead, and eighty in Lima; has no children; member of the Baptist Church; the mother of Mr. Perry is one of the oldest persons now living in Grant Co.; she is in her 89th year and, though helpless, has a clear mind.

HOMER PERRY was born in Hartford, Trumbull Co., Ohio, Feb. 18, 1821; received a good common-school education and grew to manhood on a farm; on the 13th of April, 1849, he reached Platteville, and during the winter of 1849-50 taught school in the Johnson District; up to 1873 he hardly missed teaching a single winter; his work was almost entirely done in the city and town of Platteville; Ex-Gov. Dewey, Geo. S. Hammond and himself constituted the district board when the brick schoolhouse was built; Mr. Perry served twice as town superintendent of schools, and is everywhere well known as the veteran teacher, and a man ever ready to advance the interests of education; he married, Dec. 31, 1853, Miss Julia, daughter of Col. Joseph Dickson; they have three children—George H., Nannie E. and Susie M., all born in Platteville; since the marriage Mr. Perry has resided in the pleasant home he then built on the outskirts of Platteville. Col. Dickson, a settler of 1827 in Grant Co., won his title in the Black Hawk war. He was wounded at the battle of Bad Ax, and was, in consequence, a life pensioner.

CHARLES POTTER, deceased, was a native of Brighton, Beaver Co., Penn.; Feb. 11, 1837, came to Platteville with his parents when 7 years old; he worked with his father, Joel Potter, in

his plow-shop, and was in partnership with him under the firm name of J. Potter & Son, till the death of his father in 1874, and the last three years of his life was in partnership with Samuel M. Jones, firm, Potter & Jones. Mr. Potter's death occurred Dec. 18, 1880; he left one son, Charles A., born Sept. 14, 1868. He was married Sept. 30, 1863, to Miss Annie E. Foshay, who survives him; she was born in Sing Sing, N. Y., Dec. 31, 1843, daughter of Garrett Foshay, who came to Wisconsin in May, 1854, and still lives at Patch's Grove, Grant Co.

JOEL POTTER, deceased; was a native of Plymouth, Litchfield Co., Conn., born in 1807. He was married in 1829, to Miss Mary Payne, who was born in Vernon, Tolland Co., Conn., in 1806. Came to Schuyler Co., Ill., in 1837, and from there to Platteville in November, 1844. Immediately after coming to Platteville, he started a plow-shop in the village, which was the first shop of the kind in Wisconsin west of Madison; he continued that business till his death March 29, 1874. The oldest daughter, Mary, died in August, 1847, aged 17; Seth died in California in 1851, aged 19; Hattie was married to A. Y. Felton, and died Feb. 14, 1874; Charles died Dec. 18, 1880, and Julia in 1846, 3 years old; John now lives in Eagan, Dakota, and Henry is in the mercantile business at Lake Benton, Minn. Mrs. Potter is the only one left of a family of six, four brothers and two sisters, and she is doing her own work and living alone, at 75 years of age.

PHILLIP REILLY, a veteran farmer and miner of Platteville, was born in 1804, in County Cavan, Ireland, where his early life was spent on his father's farm. He came in 1841, to America, and worked in the mines and on the canals of New York and Pennsylvania until 1843, when he came to Platteville; worked the first year near this town, and, in the summer of 1844, went to Lancaster and worked in the Pigeon Diggings until 1845, since which time he has resided in the town of Platteville. Settled on his present farm in 1857; built in 1877, a large and elegant house two stories high, the main building being 18x28; wing, 16x18. Since 1860, Mr. Reilly has done but little mining. He married in New York City Mary McGovern, of County Cavan, Ireland; she came to America in 1843, and is the mother of four living children—Frank, Phillip, Edwin and Kate, all born in Platteville, as were four children now deceased. The family belong to the Roman Catholic Church, Platteville.

THOMAS REILLY, farmer, Sec. 28; P. O. Platteville; was born in 1815, in Ireland, where his early life was spent on a farm. Came to America in 1843, and came from Pennsylvania to Platteville in 1847. Engaged in farming and mining in this town up to 1858, when he purchased 80 acres of his present farm of Mr. Tollman; later he bought out the Richard Bonson farm, one of the first settled here, and has since made additional purchases; he now owns 250 acres. The farm was originally timbered, and the old Bonson log house (which still stands near Mr. Reilly's substantial frame residence) was, when built, one of the best in the town. Mr. Reilly married Mary Reilly, of his and her native county; they have four living children—James, Jane (Mrs. Connell, of Platteville), John and Mary A.; they also lost a daughter—Lauretta. The family belong to the Catholic Church of Platteville. The record of Mr. Reilly is one of steady, honorable and rapid progress. He owns the farms of two of the pioneers who preceded him in settlement, yet began with little or nothing, except a strong arm and a resolve to win a home and competence for his family.

HENRY REWEY, retired farmer, Platteville; was born in Stockbridge, Mass., July 9, 1805. Up to the age of 15, his life was spent on a farm. He then with a brother, interested himself in the wool-carding business, and eventually became the owner of a factory near the line of Tompkins and Tioga Cos., N. Y. He married, Sept. 27, 1832, Mary Wiltse, who was born Nov. 29, 1810, in Saratoga, Saratoga Co., N. Y. They came West in 1844, locating on a new farm in Lima, Grant Co., Wis. The 160 acres cost him \$320; half of this farm he cleared and improved. In 1860, he removed his family to a farm in Mifflin, Iowa Co., where they resided four years. Since 1864, he has resided near the city of Platteville, owning three lots of respectively 6, 15 and 20 acres about the place. Mr. and Mrs. Rewey have five stalwart sons to perpetuate the family name. The eldest, Addison, is now farming in Lima; Jefferson W., one of the foremost business men and farmers of Iowa Co., has represented the Southern District of that county several terms in the State Legislature. A station on the new Chicago & Tomah Railroad was named in his honor. Jasper L. now resides in Platteville, and is Deputy Sheriff of Grant Co.; he was born Aug. 18, 1837, in Tioga Co., N. Y., and married Susan Galbreth; he served during the rebellion in the 7th W. V. I., and was wounded. M. Freeman is now in the hotel business at Rewey Station; he is also Overseer of the Iowa Co. Poor Farm. Jay, the youngest son, was born Dec. 3, 1852, in Lima; married Albina Trowbridge, of Darlington, and is with his parents in their Platteville home; he now owns 80 acres of the old Lima farm; the average weight of the five brothers is from 180 to 190 pounds. All are like the father, Republican in politics. Henry

Rewey enlisted in Co. C, 7th W. V. I.; was twice wounded, and removing to Nebraska, died there in November, 1874; he left a wife (nee Abbie Moore) and a little daughter, now with her grandparents.

DANIEL RICHARDS is one of the real pioneers of the county; born April 15, 1807, in Broome Co., N. Y., he accompanied his parents on their removal to Jacksonville, Ill., in 1823; four years later, he came to Galena, Ill., and began mining. The year 1829 was the date of his settlement in Grant County, it then being an integral part of the Northwest Territory of Michigan. He, with a brother, William T. Richards, made their home one and a half miles southwest of Platteville, and engaged in teaming, hauling "mineral" to the furnaces and lead to Galena. In 1834, Mr. Richards married Mrs. Lucretia (Curtis) Davis and located in Cassville; here he followed farming about 14 years, at the end of which time he removed to Hazel Green; seven years of mining here were followed by his final settlement in his present and pleasant, though secluded and quiet home. Mr. and Mrs. Richards have four living children—Ruth S., wife of J. D. Babcock; Harriet P., Mrs. W. H. Dobson (both of Lincoln, Nebraska); Emma, Mrs. Daniel Spaugey, of Kansas, and Abigail C., now the widow of the brave Fred T. Bachelor, who perished in the Andersonville Prison pen. He was a volunteer in the 25th W. V. I. George C Richards, one of the then deceased children of Daniel Richards, also died in the Union army, the others were Daniel and an infant. Mrs. Richards also lost a daughter, Ann E., by her deceased husband.

GEORGE E. RICHARDS, M. D.; was born in 1852 in Pittsfield, Mass.; when young, his parents removed to Illinois, resided a short time in Springfield and went from there to Amboy, where they still reside. The doctor was educated at Amboy, Ill., and Pittsfield, Mass., and is a graduate of Hahnemann Medical College of Chicago. He practiced in Ottawa, Ill., till June, 1880, since which time he has practiced in Platteville. He was married in Amboy, Ill., April 25, 1877, to Miss Estelle Badger, daughter of Simon Badger, Esq., a prominent citizen of that place.

E. RIEGE, merchant, is a native of Hanover, Germany, born in 1837; he came to America in 1856, and was engaged in the mercantile business in New York City for five years; came to Wisconsin in 1861, and commenced business in Platteville in April, 1862, and has followed it ever since. He now owns four stores on Main street, and carries on a general and clothing store himself, the other two being rented; he also owns a brick dwelling, where he resides. He was married in 1863, in Platteville, to Katie Dascher and has had eight children, four of whom are now living.

HANMER ROBBINS, farmer; was born in the town of Deerfield, Oneida Co., N. Y., Dec. 11, 1815. In addition to a common-school education, he attended Hobert Hall Institute, alternating his attending school falls with working on farm summers and teaching winters, during 1834, 1835 and 1836. In May, 1837, he came to Platteville, Wis., and, in June, was teaching the village school, which school he continued to teach for the following two years; then followed mining for about eight years; then, meanwhile, having bought a farm near the village, he engaged in farming, which occupation he still follows; he went to California in 1850, and returned in 1852. He was married June 1, 1847, to Miss A. L. Goodell, of Clinton, Oneida Co., N. Y. They have had seven children, four of whom are still living—Fanny, now Mrs. Gray, of Madison; Thomas, Roderick and George. Mr. R. was Town Superintendent of Schools, from 1854 to 1860; was elected to the State Legislature for the years 1857, 1858, 1861, 1864, 1866, 1867 and 1868, and was Chairman of the Committee on Education during four of the seven years. He was Chairman of that Committee in 1858, when the State University of Wisconsin was re-organized and women admitted to the University. He was a member of the State Board of Regents for Normal Schools ten years, and was mainly instrumental in securing the law establishing several Normal schools instead of only one, as well as in securing the location of the first State Normal School at Platteville. He was President of the D., P. & M. R. R., from its first inception until it was bought by the C., M. & St. P. R. R., in 1880; also General Manager during its construction.

JOHN ROBERTSON, photographer and proprietor of "Robertson's Art Gallery," is a native of Stirling, Scotland, born in 1824; he came to America in the spring of 1852, stopping in Canada a few months; he came on to Wisconsin and settled in Beloit the next fall. He was there engaged in the jewelry business, which he had learned in Scotland, till September, 1854, then removed to Lancaster, Grant Co., and carried on the same business there till October, 1858, since which time he has been in business in Platteville. He learned photography soon after coming to Platteville, and has been engaged in the business ever since, and also owns a jewelry store, carried on by his two sons, Robert B. and David B. He was married in Scotland to Miss Mary Black, who died in the spring of 1860, leaving four children—Robert B., Jane W. and David B., who are still living, and an infant who died a few months after its mother. He was married the second time in Platteville, Nov. 20, 1862, to Alice G. Armstrong, by whom he has had six children—John, Willie, Arthur, Mary (deceased), Allie and Pearl Athol.

ENOCH ROBINSON, farmer and miner ; P. O. Platteville ; was born Oct. 7, 1813, in Monroe Co., Ill., where he spent his early life on a farm. His father, a Pennsylvanian, and his mother, a Virginian, were among the earliest settlers of Illinois. The father, David Robinson, went to Galena in 1827. Both father and son were in that then new mining settlement at the time of Stillman's defeat. They afterward engaged in mining at Menomonee ; assisted in building the block-house at the Sinsinawa Mounds, and to bury the murdered Boxley and Thompson, who were victims of the Indians. Since the Black Hawk war, Mr. Robinson has worked at mining in Platteville (1840), Fair Play, Menomonee, Beetown, on the site of Warren, Ill., and at Hazel Green, where he remained fourteen years. He was the discoverer of the Robinson Lead at Platteville. On Oct. 13, 1872, he married Mrs. Mary Dickson, widow of Col. Joseph Dickson ; she was born Mary 17, 1820, at Prairie du Chien, Wis. ; her father was Maj. William D. Adney of the U. S. Regular Army, and her mother's maiden name was Julia Fisher. The latter died in Galena, and Maj. Adney married again, Catharine Hoffman, who still resides at Dunleith, Ill. Maj. Adney was the finder of the Adney Lead at Hazel Green, and died Sept. 9, 1832, in the town of Platteville. His daughter, Mary, married Col. Dickson, when she was in her 13th year, and bore him eleven children, eight still survive, namely, Julia A., Samuel T., Susan C., Maggie C., Joseph H., John A., William H. and Josiah P. ; those deceased are Sylvester C., George W. and Sarah J. All were born in the town of Platteville, where Col. Dickson settled in August, 1827. He broke about 20 acres of raw prairie on what is now the Roseleib farm, and, in the spring of 1828, planted what is thought to have been the first field of corn in Wisconsin grown by a white farmer. He commanded a spy company during the Black Hawk war, served with distinguished bravery and efficiency, and was severely wounded by the Indians at the battle of Bad Ax. He died Feb. 28, 1871, on his farm, four miles southwest of Platteville. This farm is now the home of Mr. and Mrs. Robinson ; here Mr. Robinson continues mining, for which fascinating occupation he has acquired a strong passion during his forty years' experience at it in Wisconsin.

JOSEPH ROBINSON ; P. O. Platteville ; born Jan. 1, 1821, in Yorkshire, England, where his early life was spent as a farm servant. He married Hannah Bratton, and, in the spring of 1841, left for America. At the end of a tedious three-months' voyage, he found himself on the borders of Grant Co., which has since been his home. Forty acres of his present farm he bought of the U. S. Government, it having been reserved as mineral land. His brother, Thomas Robinson, also bought 40 acres, and both erected log cabins, which stood somewhat nearer the "Branch" than do the substantial brick structures which replaced them. His 40 acres was the site of the block-house built by the settlers during the Black Hawk war, and Mr. R. well remembers plowing over the old rifle-pits. He was one of the leading spirits in the founding of the "Block-House Branch" P. M. Church, of which he for several years officiated as local Elder. Mr. Robinson has buried two wives, and has ten living children ; two of his sons, John W. and Joseph S., were among the defenders of the Union who went out from the Badger State. Mr. Robinson has 270 acres on Secs. 25 and 36.

THOMAS ROBINSON, Secs. 25 and 36 ; P. O. Platteville ; born in April, 1816, in Yorkshire, England. He came to the United State and Grant Co. in 1841 ; with him were his father, M. W. Robinson, his brother, Joseph and wife, and his brother-in-law, William Hilton, a lad of 14 (see sketch of Joseph Robinson). In place of the log house of forty years ago, Mr. Robinson has a capacious brick farm house, with farm buildings to correspond. The original 40 acres has increased to 255. He married Ann Hilton, a native of Massingham, Lincolnshire, England. They have had nine children—Sarah, Jane, Mary, Thomas, George H., Charles W., James R., Amelia and John M. All were born on the Platteville farm except the eldest ; she married James Huntington, and died at his home in Seymour, La Fayette Co., Wis. Mr. Robinson was with his brother, Joseph, and a few of his neighbors, among the founders of the local P. M. Church.

WILLIAM ROBINSON, retired farmer, Platteville ; was born in Yorkshire, England, Sept. 22, 1811. His early and subsequent life was spent as a farmer. In 1834, he came to the United States and located in Ohio. In the summer of 1836, he came via the Ohio and Mississippi Rivers to Grant Co., which has since been his home. Three days after his arrival, he bought team and wagon, and for a year or more hauled lead to, and supplies from, Galena. He then rented a farm for a time, and, in 1838, bought of James Vineyard 160 acres of his present farm. He was at this time in partnership with a brother, John Robinson, and the log house in which they kept bachelor's hall stood on the site of William Robinson's substantial brick farmhouse of to-day. Mr. Robinson married Mary S. McBride, whose father was one of the garrison of Fort Crawford when it, Green Bay and Fort Winnebago were the only footholds of white men in Wisconsin ; she died in 1867, leaving eight children—Sarah, Jane, William J., Rosanna, Richard H., Lena and Emma. The present Mrs. Robinson was Miss Jane Blaylock, who was born in

Platteville, where her father settled in 1836. By her Mr. Robiusion has three children—Benjamin S., Nora A. and Ida R. Rosanna Robinson died about two years after the death of her mother, at the age of 21. Richard H. is now in the butchering business in Charles City, Iowa. The eldest son is on the splendid 350-acre farm, his father having resided for the past fourteen years in the city of Platteville. Mr. Robinson is a man who has become wealthy through his own exertions, he having earned every dollar and every acre.

CHARLES ROSELIP, P. O. Platteville; is the owner of one of the oldest and best farms of Grant Co.; it is also historic, as it was here that Col. Joseph Dickson, the first owner, planted, in the year 1828, the first crop of corn grown by an Anglo-Saxon farmer in Wisconsin. Col. Dickson disposed of the farm to Judge E. M. Orme, who erected a small house and made other slight improvements. In 1848, John Roselip, a Prussian emigrant, bought the place of the Judge; he was the father of Charles Roselip, who was born Jan. 14, 1840, in Prussia; the son has owned the farm since 1865; beginning fifteen years ago with 140 acres of the original 160, he has added 40 acres, grubbed and broken 70 acres, erected, in 1875, a 30x40 feet basement barn, and, in 1877, built a tasteful frame farmhouse. The old farm, originally prairie with the exception of a few acres, is now in a splendid state of cultivation, and the buildings are in striking contrast to those standing here during the Black Hawk war. Mr. Roselip married Miss Anna, daughter of A. S. Lothman, of Platteville; she was a native of Hanover, and came to this country when she was about 15 years of age; they have six children—John A. M., Lizzie, Minnie C., Charles H., Ellen C. and William D., all born in Platteville except the eldest. Mr. Roselip spent 1864-65 in the gold region of Montana.

HON. JOHN HAWKINS ROUNTREE, Platteville; the ancestral record of this eminent and venerable pioneer settler of Grant Co. is as follows: His great-grandfather, Randall Rountree, emigrated from Ireland in 1720 and settled in Virginia, where he resided until his death; his grandfather, Thomas Rountree, moved from Virginia to the vicinity of the Mammoth Cave, Warren Co., Ky., with his family, in 1795, where he remained until he died; John Rountree, his father, also settled in the same place, which was his place of residence until his decease; in this same locality John H. Rountree was born March 24, 1805; the education received by "the Major" at this period he himself describes as "very common-school," the schoolhouse being one of those primitive affairs so common in earlier times, composed of unhewn logs, with holes cut for windows, while a broad fire-place, with its huge open chimney, furnished the heat for the room in frosty weather; Maj. Rountree moved from Kentucky to Hillsboro, Montgomery Co., Ill., in February, 1824, where he was appointed as Deputy Sheriff, and served as such until he reached his 21st year, when he was elected Sheriff, an office that he held until his resignation upon his return from his trip to Wisconsin in 1827; May 24 of this year, he reached New Diggings (now a portion of La Fayette Co.), and afterward came to Platteville, then just coming into notice; there he has since resided, a period of 54 years. Aug. 7, 1828, Maj. Rountree was married to Mary Grace Mitchell, of Galena, Ill., and the next day, with his bride, moved to his log cabin in Wisconsin; Mrs. Rountree died in 1837; Sept. 3, 1839, he was again married, to Miss Lydia H. Southworth, of Platteville; after a long and pleasant companionship, extending over nearly a half century, this lady passed on before, her death occurring June 16, 1881. The numerous positions held by Maj. Rountree are the best evidence of his high standing among his neighbors for the numerous decades hidden beneath the swiftly-revolving wheel of Time; in May, 1826, he was commissioned as Major of Illinois Militia, and the same year elected Sheriff of Montgomery Co., in the same State; in 1829, he was appointed Postmaster at Platteville, and was several times re-appointed; also the same year appointed and commissioned Justice of the Peace for Iowa Co., Michigan Ter., of which Wisconsin then formed a part; in 1832, he was elected Captain of a company of mounted volunteers enlisted by him to serve in the Black Hawk war; in 1834, he was appointed Chief Justice of the County Court of Iowa Co., by the Governor of Michigan, which position he held until the Territory of Wisconsin was organized in 1836; in 1837, he was appointed Judge of Probate of Grant Co., which was organized that year; in 1839, he was commissioned as Aid to the Governor, with the rank of Colonel; in 1838, he was elected a member of the Territorial Council for four years, and, in 1842, was re-elected to the same position; in 1847, he was elected a member of the Constitutional Convention, serving in that body on the Committee on General Provisions, which embraced a large number of the most important articles under consideration, as well as upon several select committees; in 1850, Maj. Rountree was elected to the State Senate, and the following year was appointed a Regent of the State University; in 1853, he was appointed Major General of Militia of the Second District of Wisconsin; in 1857, he was appointed Postmaster of Platteville; in 1863, was elected Member of Assembly, and, in 1866, was again elected to the State Senate—thus having served in the Territorial and State Legislatures

longer than any other citizen. This lengthy recital of honors and official positions bears upon its face the highest testimonial that could be furnished of the unbounded esteem and confidence of the communities in which he has lived; in the sterling worth, integrity and ability of this veteran representative of pioneer times. When he first entered the present State, it was divided into two counties, and contained but a few thousand inhabitants, scattered over the vast territory; to-day it numbers its inhabitants by the hundreds of thousands. Maj. Rountree has been the witness of the growth of a new empire; took part in an Indian war; has seen the aboriginal inhabitants pushed back, foot by foot, until they now possess hardly a rood of land which they can call their own; he has seen the commencement, growth and prosperity or obliteration of every city and village, with the exception of two or three military posts, in the State—all the improvements, indeed, that in fifty years have converted a great and uncivilized wilderness into a series of powerful States; in his own immediate vicinity, the change has been no less great; in place of the rude miner's cabin is seen the stately mansion; the few hundred seekers seeking after mineral have been swallowed up in the many thousands whose cozy farmhouses dot the landscape in every direction. To but a few has such an experience been vouchsafed; Gen. Rountree may well be regarded as a landmark between the past and the present—one who has lived over the whole term of our local history, and served as a prominent factor in making it.

WILLIAM RUNDSELL, Secs. 12 and 13; P. O. Platteville; was born in Cornwall, England, where he learned the trade of carpenter and joiner. He came to America and Grant Co. in 1848, in company with his brothers Samuel and Thomas; Mr. Rundell assisted in building the Waters School-house on the Lancaster road, and private houses in the vicinity; he rented a farm for one year, and, in 1853, settled on part of his present farm; he now has 201 acres, on which, in 1869, he erected a tasteful and substantial farmhouse, which was planned by himself and family. His first wife, Elizabeth Roberts, of Cornwall, died, leaving a son—Hercules O., born April 18, 1855, and William R., who died at the age of 29, in Kansas. The present wife, Elizabeth (Hooper) Rundell, was born in Parran, Cornwall; by her he has two children—Jennie May, born Jan. 31, 1871, and Alden T., born April 29, 1876; all the children were born in Platteville. Mr. Rundell is a member of the P. M. Church.

T. SCHNITZLER, fire and accident insurance agent, Platteville; is a native of De Pere, Wis., born in 1855; came to Platteville in the winter of 1876, and engaged in the confectionery business, which he still continues. He was married in October, 1877, in Platteville, to Miss Anna, daughter of Engle Vandellire, one of the early settlers of Platteville, who died Jan. 29, 1880; he had been engaged in the insurance business for the last ten years of his life, and, at his death, Mr. Schnitzler succeeded him in that business.

H. P. SCHRODER, merchant, Platteville; has been in business in Platteville since March, 1870, in his present location, where he keeps a general store; he is a native of Prussia, born in 1838. In 1846, his parents came to America and settled in La Fayette Co., Wis., in 1847; he left home in 1851, and went to St. Paul, Minn., where he remained till the spring of 1862, then went to California and remained there till 1869; he then returned to Wisconsin, and has been a resident of Platteville since that time. He was married, in Platteville, in the spring of 1870, to Miss Minnie C., daughter of John Kenler, of that place. His father, Peter Schroder, went to California in 1849, and died there in the winter of 1851. Mrs. Schroder is still living in Platteville.

S. SICKLE, cigar manufacturer, Platteville; was born in Treves, Germany, Oct. 18, 1818; came to America in 1852 and lived two years in Buffalo, N. Y., and eighteen years in Detroit, Mich., most of the time in the mercantile and tobacco business; came to Platteville in 1873, and has been in his present business since that time; he is also in the wholesale and retail tobacco trade in company with his son Max, firm S. Sickle & Son. Mr. Sickle was married, in Detroit, Mich., in 1854, to Mrs. Frederica Marcus, daughter of M. Rosenbaum; she was a native of Sternberg, Germany. Max Sickle was born in Detroit, Mich., in 1860, and has been in partnership with his father in the tobacco business since May, 1880; he has been Secretary of the Fire Department of Platteville since April 26, 1880, and was Secretary of the engine company about four years.

HERRMANN SIEMERS, of the firm of Siemers & Thiele, saloon-keepers, Platteville; was born in Pupsen, Germany; came to America in 1865; lived nine months in New York City, then went to Cincinnati, Ohio, and came from there to Platteville in 1868; worked three and a half months on a farm, and has been in his present business since. In November, 1872, he was married, in Lyons, Iowa, to Lena Kuhl, and has three children—Mary, Julia and Frederick.

THOMAS SHEPHERD, deceased; was born in Yorkshire, England, 1806; married Agnes Hoe, a native of Westmoreland, England; they came in 1850, to America, with ten children, and located

on a farm owned by Maj. Rountree. The Shepherd homestead originally of 160 acres was then purchased; Mr. Shepherd did good work here clearing and improving; in 1857, he built the substantial stone house, now making a good home for his family; he subsequently sold all except 84 acres; at his death, June 31, 1862, he left his widow and the ten children namely: Allen, Mary, Anthony, Agnes, Thomas, Betsy, Isabella, Hannah, William and Joseph; Mary is in Otisville, Iowa, and William in Oakdale, Neb.; all the others are now in the city and town of Platteville; the family are members of the P. M. Church.

JOHN SPEAR, retired farmer, Platteville; was born Sept. 25, 1806, in Little Petherick, Cornwall, England; in early life he served an apprenticeship as a carpenter and joiner; going to London, he worked fourteen years at his trade. In this metropolis of the world, he also married Anne Roberts, who was of Probus Parish, Cornwall; both their children, John R. and Annie R. were born in London. The family came to America and to Platteville in 1851; the journey from New York was a long and tedious one, via the Hudson River and great lakes to Milwaukee; they first located on the present farm of William Rundell; remained two years, then came to Platteville and spent a couple of years; then for six years they were on a farm in British Hollow, town of Potosi; afterward they resided and farmed in the towns of Lancaster and Benton; in March, 1876, the ill health of young Spear caused the final removal and settlement of the family in Platteville; they still own a considerable amount of land in this county. Mr. Spear, Sr., made a most enjoyable visit to his native land in the fall of 1880, and takes pleasure in describing the progress and power of Merry England, as well as the changes made in thirty years.

MASON SPENSLEY, Platteville; was born Jan. 14, 1815, in Yorkshire, England; came to America in 1841, and located in the Catfish Mining Settlement near Dubuque, Iowa; here he was employed both as a miner and smelter; in 1850, he formed a partnership with Richard Straw, Ralph Spensley and Thomas Staley; the firm rented the old furnace of Bell & Co., on the Big Platte River; in 1852, Ralph Spensley withdrew, the remaining partners removing to Platteville; here in 1855 or 1856, Mr. Staley met an accidental death. Messrs. Spensley and Straw have since continued the business; their blast furnace was purchased of L. Coates; from 700,000 to 1,100,000 pounds of lead are annually produced. Mr. Spensley married Frances A. Taylor, a native of Knox Co., Ind., where her parents both died in her infancy; an aunt brought her to Dubuque when she was 9 years of age. Mr. and Mrs. Spensley have nine children—James T., Rosa, Frances A., John T., Maggie, Richard, Mary, Allie and Cora.

REV. C. STARCK, Pastor of the First Evangelical Lutheran Church of Platteville; is a native of Erfurt, Germany, born in 1824; he was educated and entered the ministry in Germany, and came to America in 1851; came to Platteville in 1857, and remained till 1862; in 1871, he went to Louisville, Ky., and was professor in a high school there two years, then accepted a pastorate at Springfield, Ill., and remained there till the spring of 1880, when he was recalled to Platteville; he was for many years one of the Directors of Carthage Lutheran College of Illinois, and is at present, President of the Wartburg Synod of the E. L. Church.

J. J. STEPHENS, Secs. 2 and 3; P. O. Platteville; was born in Peyrdinzabuloe, Cornwall, England, Feb. 3, 1825. His father, James Stephens, came to America and settled in Grant Co., in 1840, bringing with him his sons Thomas and J. J. The mother and the remainder of the children came with the "Stephens Colony" in 1842. The brothers, Thomas and J. J., dug several wells, and helped build the dam for Virgin's mill, as their first work. The father and sons continued mining and farming here up to the removal of the brothers to California in 1852. J. J. returned in 1853, and located on a farm east of Platteville, where he remained eleven years. He then bought the Ed Thomas estate of 195 acres, which is now his home. He married, Jan. 25, 1845, Miss Jane, daughter of Michael Stephens. They have eight children—James H., Selinda, Charles A., Almon M., Sidney A., Olive N., Harlen K. and Fannie L., all born in Platteville. They lost two infant sons. Mr. Stephens is independent in politics, and the family attend the P. M. Church. Besides the Thomas farm, he owns 146½ acres of timber and pasture in Lima, and also a house and lot in Platteville.

JOHN STEPHENS, farmer; was born in the Parish of Peyrdinzabuloe, Cornwall, England, Nov. 11, 1797. He came to Platteville, Wis., in 1841, and took up a farm near town, now within the city limits. His twin brother, Michael, came over the next year with all the other brothers but one, and his brothers-in-law and their families, fifty-two persons in all, and all settled in the vicinity of Platteville. All the Stephens brothers were married in the same parish church in England, and now, all the sisters and sisters-in-law are buried side-by-side in the cemetery at Platteville. John Stephens was married Jan. 22, 1826, to Miss Catharine Repper; she died at Platteville; they have had seven children—Ann, now Mrs.

William Laughton; Catharine, who died in 1864; Elizabeth, now Mrs. H. H. Jacobs; Thomas, living in Placerville, Cal.; Jane, now Mrs. Walsh, also in California; John R., living at Yankton, Dak.; Mary L., now Mrs. Hockett. Mr. Stephens had a stroke of paralysis in 1879, since which, he has not been able to attend actively to business, and his daughter, Mrs. Jacobs, has moved back to the old homestead, where he lives with her. Mr. Stephens has been a member of the Town Board of Platteville several terms, and has held other town offices.

W. C. STEPHENS, Platteville, is a son of Michael and Mary (Conlin) Stephens. He is one of ten children, and was born Oct. 22, 1820, in Peyrdinzabuloe Parish, Cornwall, England. His father was born same place Nov. 11, 1797. In June, 1842, no less than forty-nine members of this historic family arrived in Platteville, and it was the settled home of the different branches of the family until the outbreak of the California gold fever in 1850-51. In 1852, Michael Stephens and his sons went to California, remaining until 1853. W. C. Stephens built, in 1844, a frame house near his present residence, and a family is now sheltered under the same shingles he laid thirty-six years ago. The pleasant home which his family now enjoy is the result of his own handiwork, he having accustomed himself to the use of carpenter's tools from boyhood. Mr. Stephens has a 146-acre farm on Secs. 1 and 12 in Platteville, which was his home for twenty years. He married, March 28, 1842, in England, Miss Ann Mitchell, of his native Parish. They have four children—Mary A., Allie, George and Amo, all born in Platteville. Mr. Stephens is a Republican, and is with his wife a member of the P. M. Church. His aged father is a twin brother of John Stephens, and both are wonderfully well-preserved specimens of the hardy and stalwart men who have so proudly and successfully carried old England's flag around the globe.

F. STINGLE, merchant tailor and dealer in ready-made clothing, gents' furnishing goods, hats, caps, boots, shoes, etc., is a native of Bohemia, Austria; born in 1841; came to America in September, 1865; lived in Milwaukee nearly one year, then went to Monroe, Green Co., Wis.; was in business there till September, 1875, since which time he has been in business in Platteville; was married in Monroe to Miss Augusta Roth, and has three sons—Benjamin, Leopold and Emanuel.

RICHARD STRAW, of R. Straw & Co., smelters, was born Feb. 15, 1817, in Derbyshire, England. He came to America in 1828, with his father, residing in New York, New Jersey and Pennsylvania until 1834 when he came to Dubuque, Iowa. Here he engaged in mining and teaming. In 1840, he came to Hazel Green, Wis., and engaged in mining; ten years later he formed a partnership with Messrs. Mason and Ralph Spensley and Thomas Staley, and began the smelting business, which he has since followed (see sketch of Mason Spensley). Mr. Straw married Mary Place, of Yorkshire, England, by whom he has six children—Hannah, Mary A., Anne, Margaret, Carrie and Richard. Anne and Margaret were born in Montford, Grant Co., and the others in Platteville. Mr. Straw is a Republican, and a member with his family of the M. E. Church. He has served many years on both the town and village boards.

HENRY THIELE, member of the firm of Siemers & Thiele, saloon-keepers, was born in Hanover, Germany, in 1840; came to America in 1866, lived in Cincinnati, Ohio, nine months, and came to Platteville in August, 1867; has been in his present business since 1868; he was married in Platteville in 1868, to Dora Pranga, and has two children living—Harry and Mary; lost one, August, who died when 3 years old in 1874.

E. W. THOMAS, retired, was born in Salem, Mass., in 1802; removed to Ohio in 1844; lived in Ashland Co., till 1851, and came from there to Grant Co., Wis., where he has since resided; he followed farming two miles north of the village till 1865, and since then has lived in the city; he in company with his son, Hudson, built what is known as Thomas' Block, in which Thomas Hall is located, completing it in 1871; he was married in Madison Co., N. Y., in 1825 to Polly Bacon, daughter of James Bacon, and has six children—Mary, Hudson, Huron, Homer, Martha and Hadley; Hudson enlisted in 1863, in the 33d W. V. I., and served as Second Lieutenant of Co. A till the close of the war; he is now living in Lyon Co., Minn. Huron was in the 25th W. V. I., Co. E, enlisted in 1862, and was Sergeant of his company; went with Sherman to the sea, and was discharged on account of sickness at Savannah, Ga.

H. J. TRABER, Mayor of Platteville, was born in Albany Co., N. Y., Nov. 9, 1833; when 17 years of age he left home and went on a whaling voyage in the ship Montezuma, Capt. Williams, of New London, Conn.; they sailed on the 15th of July, 1850, and returned on the 15th of May, 1853, crossed the equator seven times on the voyage, and visited during the time, the Azore Islands, St. Paul's Island, New Zealand, East Cape, in Russian America, Sandwich Islands, King Mills Group, La Drone

Islands, Tibita, and thence around Cape Horn, home; he soon after made a voyage to Liverpool, Eng., then returned to America, and visited Bath, Me., Boston, Mass., and then went to Chesapeake Bay, Portsmouth, N. H., and back to Albany; in the spring of 1855 he sailed to Buffalo, N. Y., and followed the lakes till July of that year, when he landed at Chicago on the 9th and came to Platteville July 16, and has been a resident of the city since that time; Aug. 14, 1862, he enlisted in Co. A, 33d W. V. I. as a private and was in the service three years; in September, 1864, he was transferred to Co. H of the same regiment as Second Lieutenant, and had command of his company from that time till the close of the war; he was in twenty-one engagements during his term of service and was never wounded and was never a day off duty; he is the present Mayor of Platteville, elected in April, 1880; he was married in 1859, in Lancaster, Wis., to Miss Sarah Kines, and has had four children, three of whom are living.

AMBROSE TREGANOWAN, farmer, Sec. 6; P. O. Platteville; was born March, 1810, in Fryock, Cornwall, England, where his early life was spent in the mines. In 1840, he came to America, and began work in the Virginia coal mines. This came near being his last work in this world, as he was nearly crushed to death by being drawn from the shaft against some timbers overhead by a thirty horse power engine. For months, it was thought he could not live, and it was years before he was able to work. However, he came to America again in 1846, and lived in Platteville until 1850, when he went to California. Nine months later, he returned, and settled on his present farm in 1853. He has 80 acres. His first wife, Peggy Mitchell, died in England. He then married in Platteville Ellen Stephens, who died thirteen months later. The present Mrs. Treganowan was Catharine Potbour, born in Trumbull Co., Ohio. He has no children, but in spite of his many misfortunes preserves a warm heart and generous nature.

JOHN TRENARY, farmer, Secs. 12 and 13; P. O. Platteville; born July 10, 1809, in Redruth, Cornwall, England. His early life was spent in the interests of his father's large mercantile and other business. He came to America in 1840, kept the old Blue Run tavern for a time, and, in 1843, came to Platteville, where he engaged in mining and auctioneering. His first wife, formerly Eliza Pollard, of Redruth, died in 1847, leaving four children—Eliza, now in Kewaunee, Ill.; John, a Methodist Episcopal preacher; Ellen, now residing at Big Patch, and an infant that died three months after the mother. In 1848, taking his three surviving children, he returned to England, where he remained eighteen months. Marrying Clarissa Lory, of Elstone, Cornwall, he brought her and the children to Platteville, and settled on a farm adjoining the one he now owns. Mr. Trenary now has 175 acres in the home farm, and 40 of timber in Lima. He was one of the founders of the Primitive Methodist Church, of Platteville. For more than twenty years, he has been Class-Leader and Sabbath School Superintendent. Mrs. Trenary has been a member for twenty-five years. They have ten children—Charles, Edwin, Carlin, Nelson, Eldred, Sarah, Lucy, Rosina, Albert and Eli.

HON. NOAH H. VIRGIN, Platteville, one of the pioneers of Grant Co.; was born in Fayette Co., Penn., Dec. 6, 1812, son of Eli and Nacka (Hyatte) Virgin. When 6 years of age, his father died, and a few years after his mother married Col. Heaton, of Fayette Co., who owned a flouring mill and a woolen factory, in which young Virgin worked for some time, then learned the millwright's trade of his brother-in-law, Isaac Hill, of Greene Co., Penn. He came to Wisconsin in 1835, and worked at his trade in different places until April, 1836, when he came to Platteville, where he has resided since that time. He, in company with John H. Rountree and Neely Gray, built the Platteville flouring mill, which was completed in 1840, and was the first flouring mill built in Platteville. He afterward bought out his partners, and has owned and run the mill himself up to the present time. Since 1870, he has been engaged in grain dealing in company with his son, Col. Horatio Virgin, in addition to his other business. Mr. Virgin was a member of the Assembly in the last Territorial Legislature in 1847, and also the first State Legislature in 1848, and again in 1855. He also served two consecutive terms in the State Senate, ending in 1861. He commenced political life as a Whig; was a Republican from 1854 till 1864, and since that time has acted with the Democrats. In 1866, Mr. Virgin was a candidate for Congress from this district, against Amasa Cobb, who was elected. On the 15th of January, 1839, he was united in marriage with Mrs. Pamela E. Adams, daughter of Rev. Bartholomew Weed, of Platteville, and has had eight children, four of whom are still living—Horatio H., living in Platteville; Emma, now Mrs. George H. Laughton, of Chicago; Mary, now Mrs. William Laughton, of Platteville, and Eugene, the youngest, living in Platteville. His eldest son, Col. H. H. Virgin, was born in the village of Platteville April 9, 1840, and grew up to manhood in his native village. In April, 1861, he enlisted under the three months' call, and was assigned to the 7th Regiment, but did not go out of the State. The next October, he was appointed Aid on the Governor's staff with the rank of Colonel, and, on the 18th of December following, was appointed

Battalion Adjutant of the 2d Wisconsin Cavalry (1st Battalion), and assigned to duty under Gen. Schofield in Missouri, in the spring of 1862. On the 30th of August, 1862, he was commissioned Major of the 33d W. V. I., and, after March 1, 1864, had command of the regiment till the close of the war, being in command in every engagement except three, while he was with the regiment. He was temporarily in command of a brigade in the battle of Yellow Bayou, on the Red River expedition. After the battle of Nashville, he held a Lieutenant Colonel's commission till the close of the war, and was then brevetted Colonel. During his term of service, he was in forty-two engagements, and never received a scratch, though he had three horses shot under him, and on one occasion a ball passed through the top of his boot, and on another he had a lock of hair shot off just above his ear, cutting a hole through the rim of his hat. After the close of the war, he was three years in the corn business in St. Louis, and two years in the grain business in Booneville, Mo. In 1870, he returned to Platteville, Wis.; built a warehouse, and since that time has been engaged in buying grain, in company with his father, under the firm name of N. H. Virgin & Son. Jan. 1, 1874, he was married to Miss Annie E. Kane, of Dodgeville, Wis.

CHARLES WEITTENHILLER, manufacturer of cooperage; was born in 1844 in Bavaria, Germany; came to America in 1853 with his parents and settled in Platteville, where they still reside. Learned his trade of his father, Sebastian Weittenheiller, who carried on the same business in Platteville till 1864. Charles Weittenhiller enlisted in February, 1864, in the 25th W. V. I., Company B., and was in the service till the close of the war. On the 22d of July, 1864, he was taken prisoner at Decatur, Ga., and was two months in Andersonville Prison, before he was discharged. He has been in business since 1867. He was married in 1867, in Platteville, to Miss Jennie Marshall, daughter of E. H. Marshall, and has four children—Cora, Addie, Marenus and Charles; has been Justice of the Peace for the last four years, and was on the Village Board one year.

SEBASTIAN WEITTENHILLER, Sections 5, 7 and 8; P. O. Platteville; was born April 7, 1824, in Eichseichstadt, Bavaria. Here in his and her native village, he married Annie Schiell, born Jan. 16, 1822. He came to America in 1849, spent eighteen months in New York, then came to Galena, and, after visiting Iowa, came in May, 1853, to Platteville. His wife came from Germany in November of the same year. Mr. W. had learned the cooper's trade in Rochester, N. Y., and for eleven years followed it in Platteville; in 1864, he bought his present 164 acre farm, and has since lived upon it. Mr. and Mrs. Weittenhiller have nine living children—Charles, Mary, Annie, Conrad, Emil, Phillip, Lena, Jennie and Etta. They also lost five children, one of whom met an accidental death by the falling of a horse. The family are Presbyterians.

PETER WENTZ, southwest quarter Sec. 3; P. O. Platteville; born July, 1814, in Scheresfeldt, Bavaria, where he married Sarah Miller; his early life was spent at farming and coal mining. In 1854, he brought his family to the United States, spent eighteen months in Pennsylvania, then came to Platteville where he first bought 10 acres which he sold. Next he bought 40 acres on Sec. 3, which he sold in 1877, and that year bought his present 160-acre farm of I. Penberthy. Mr. and Mrs. Wentz have four children—Barbara, Sarah, Charlotta and Christian, all four in Bavaria; the only son, born March 23, 1852, married Mary Linden, who was born in Potosi, Grant County, Wis.

D. B. WILKINSON, retired farmer; P. O. Platteville; was born Oct. 7, 1823, in Owersby, Lincolnshire, England; he spent his early life as a farmer. Married Elizabeth Marshall, who was born March 24, 1823, in Storton-by-Stow, Lincolnshire. They came to America and located in Cayuga Co., N. Y., in 1846. Later, Mr. Wilkinson purchased a farm in Oswego Co., N. Y. In 1850, they came to Wisconsin and located on a new wild farm in the Whig Settlement, Grant Co. Beginning with 40 acres and a log house. Mr. Wilkinson made steady progress toward better things, and more of them, increasing both his farm and home in size. The homestead of 200 acres is now in charge of his only son, Robert W. He was less than two years old when the parents came to the United States. His wife, nee Frances McRundell, of Fennimore, Grant Co., Wis., is the mother of three children—Lillie E., Flora B. and Lulu M. Since 1868, D. B. Wilkinson and wife have resided in the city of Platteville. He was, in former years, a most successful miner, he having discovered some of the rich "diggings" in Whig, one of these yielded him \$1,000 net profit.

DAVID WILSON, dealer in fruit, fancy groceries and confectionery, Platteville; was born in Oswego Co., N. Y., in 1826; came to Wisconsin in 1844, and settled in Platteville; learned the jewelry business in New York City of Wilson Brothers, 460 Maiden Lane; was there two years previous to coming to Wisconsin. He was married in Potosi, Grant Co., in 1848, to Miss Mary Ann Sturgeon; he lived about a year in Platteville after marriage, then went to Canada with his family, where he remained about a year and a half, and then returned to Platteville; in 1854, he went to Richland Co., Wis., and com-

enced clearing up a farm; his wife died there Nov. 8, 1856, and he soon after returned to Platteville; he ran a peddling wagon about a year, then went to Reedsburg, Sauk Co., Wis., and was engaged in the jewelry business about a year; was in the same business in New Lisbon, Juneau Co., four or five years, and Elkhorn one year; he then kept hotel in Trempealeau one year, and boarding-house in Winona, Minn., year and a half; he then went to Preston, Minn., and ran a jewelry store three years; from there he went to Fountain, on the S. M. R. R., and built the first hotel in the place in November, 1869; this was called the "Wilson House," and he kept it till it was burned down in November, 1872; he then returned to Platteville and bought what was called "Hodges' old stand," and carried on the grocery and fruit business till he was burned out again in April, 1874; he rebuilt the same fall, and kept a city restaurant about three years, and since that has been engaged in his present business; his second wife, to whom he was married in New Lisbon, Wis., Oct. 28, 1857, was Mary Judd; she died Sept. 11, 1878, and he was again married Aug. 20, 1879, to Mrs. Helen Lewis, widow of J. H. Lewis, one of the early settlers of Platteville; has four children, all by his first wife.

A. D. WONZOR, born in Aurelia, Can.; came to Platteville in 1867, and, in September of that year, opened business as a barber in the basement of the old Tyler House; a year later he removed to a room over Wright's drug store, and, after four years, to the present Riege store; here he operated until 1876, when he purchased and located in his present building, on Main street; here he has a large and well appointed shop, and the three chairs are well patronized; he is eminently the barber of Platteville; his wife is an adept at the manufacture of hairwork, and keeps in stock everything that the ladies desire in that line of rolls, puffs, switches, etc., etc. Mr. Wonzor likewise has rooms devoted to the dyeing of clothing which has proven a most remunerative business; as his means have increased he has gratified his love for fine and fast horses; was at one time the owner of Wild Rose, a 2:35 trotter which was won by her trainer in Milwaukee during the State Fair of 1868; Tyler's Black Hawk, one of his best horses, died on his hands in 1878. He now owns a Black Hawk mare, "Creole;" time 2:45, and a noble stallion of the English coach, and Morgan stock, called Black Prince; he is a fleet and powerful horse; his pride now, however, is Bay Charlie, which beautiful horse he purchased in March, 1880; Bay Charlie trots in 2:35, and has beaten many of the best steppers of Dubuque; his sire, Patchen, Jr., had a record of 2:27½, and a half brother; Sam Purdy went in 2:20½; he is a mahogany bay, with black points, mane and tail; weight, 1,050 pounds.

B. F. WYNE, Postmaster; was born in Adair Co., Ky., in 1818; came to Illinois in 1837 and settled in McComb, McDonough Co., where he engaged in the jewelry business which he continued in that and Schuyler Co. till 1848; in October of that year he came to Platteville and carried on the same business till April, 1864, when he received the appointment of Postmaster, and has held that office ever since; he held the office of Justice of the Peace twenty-five years, resigning in 1880; he was also Town and Village Clerk for about fifteen years. He was married in 1846, in Rushville, Ill., to Miss Cynthia Potter, a native of Connecticut, and has had nine children, seven of whom are still living.

V. H. YOUNG, photographic artist, Platteville; was born July 19, 1848, in the town of Lima, Grant Co., Wis. His father, Dr. B. F. Young, was a native of New York; he came to Wisconsin in the winter of 1845, and settled in Lima, his family coming in the spring of 1846; he practiced medicine in Lima and vicinity till his death, which occurred March 6, 1862, at the age of 45. Mrs. Young, whose maiden name was M. A. Barstow, daughter of Joseph Barstow, is still living in Lincoln Co., Dak. Dr. Young was a graduate of Cleveland Medical College, and attended medical lectures at Cincinnati, Ohio. He was married in Trumbull Co., Ohio, where he practiced his profession before coming to Wisconsin. V. H. Young learned photographing in Webster City, Iowa, commencing in July, 1871; he worked in various places in Wisconsin, Illinois and Michigan, and finally located in Lincoln, Neb., in February, 1872; he remained there till October, 1877, then went to Webster City, Iowa, and from there to Platteville in 1879; the first three years of his stay in Lincoln, he was in partnership with J. W. Chase, formerly of Chicago, firm of Young & Chase, and since he came to Platteville, has been in company with John Robertson. Dr. Young was married in Ludington, Mich., Jan. 28, 1872, to Miss Louisa Voigt, and has two children—Virgil Herbert and Winnefred Louise.

TOWN OF BOSCOBEL.

SEVER ANDERSON, boots and shoes, Boscobel; born in Norway. In 1870, came to Madison, Wis., followed this trade, which he learned in Norway, commencing at the age of 15 years. In 1872, came to Boscobel and opened this shop. Married in 1871, to Rhoda Davison; she was born in Norway. They have four children, two sons and two daughters. He is a member of the United Workers; member of the Fire Department and member of the Lutheran Church.

L. G. ARMSTRONG, M. D., born March 7, 1834, in Cortlandville, Cortland Co., N. Y., where he resided with his parents until 5 years old, when the family removed to Groton in Tompkins Co., from there to Whitewater, Wis., in 1845, and in true pioneer style laid his claim, and began opening up a farm, where "the whole time" was occupied in driving breaking-team, building fence and opening stone quarries. In 1852, he entered the State University at Madison, where in due course of time he began the study of medicine, with Prof. S. P. Lathrop as his preceptor, where he remained as much of the time as his means would admit. To recuperate his purse, school-teaching was just to his hand, not neglecting to board around among the scholars. In the early part of 1856, he went to Chicago, where he placed himself under the special care of Profs. Davis and Evans, who furnished him odd jobs of nursing their patients for ready cash. At the commencement of Rush Medical College, February, 1858, he graduated in a class of thirty-one, receiving the first honors of the class in surgery, and second honors in theory and practice of medicine. During the spring of 1858, he went to Palmyra, Wis., and opened an office for the practice of his chosen profession, where he remained until April, 1860, when he came to Fennimore and opened an office on the Military Road, one and a half miles northwest of the present village. In January, 1861, he was married to Miss S. D. Bond, of Milton, Wis., and after the burning of the Gillman Hotel, at which he lost every particle of property he had accumulated, he began housekeeping in the little cottage by the roadside, remaining here faithful to his business until August, 1862, when he volunteered as Second Asst. Surg. of the 8th W. V. I., and was assigned to duty at Corinth, Miss., in care of "wounded rebs." The arduous duties of the position, together with the unsanitary surroundings soon so much reduced his physical condition as to oblige a return to the North to recuperate his strength. After a year he was again able to take the field, this time as First Asst. Surg. of the 6th W. V. I., in the old "Iron Brigade," near White House Landing, in Virginia. Continuing with the regiment until the organization of the 48th Wisconsin, of which he was commissioned as full Surgeon, doing duty with the regiment as Surgeon through all the time the regiment was in the field, and, in addition to his other duties, filling the position of Post Surgeon, at Fort Scott, Kas., until he received orders to disband the hospital and proceed to the plains to establish a line of hospitals along the Arkansas River, extending from Fort Zarah to Fort Dodge. After the regiment was mustered out of service, he was retained with a detachment of regular troops at Fort Larned, Kan., until relieved in February, 1866. March 5, 1866, he opened an office in Boscobel, for the practice of his profession among his old friends and neighbors, where he has continued without interruption to the present time, building up a first-class practice as a surgeon and physician. In the social circle and the private family, he has many characteristics which are too well known to the inhabitants of Grant County to require any eulogy from the present historian.

LEONARD BIEDERMANN, farmer, Sec. 35; P. O. Boscobel; born in Austria. In 1848, he came to America, locating in Clayton Co., Iowa, where, for seven years, he followed the butcher business. In 1855, he came to Prairie du Chien, and, for two years, engaged in the same trade. In 1857, he came to Boscobel and engaged in the saloon and butcher business for six years; then built the first brewery, which has since burned, and for the past six years he has been farming. He owns 86 acres of land. When he landed in America he had only \$1, and all he possesses he has made by industry and perseverance. He is in fact a self-made man. He was married in 1854, to Christina Krout, who was born in Wurtemberg, Germany. They have nine children—six sons and three daughters.

A. BOBEL, proprietor Central House, Boscobel; born in Hesse-Cassel, Germany. In 1853, came to Ohio, the following year to Milwaukee; was clerk in a stove store; from 1856 to 1861, in the wholesale grocery business; then came to Boscobel and started a saloon, afterward opened a small tavern; he enlarged the house from time to time; he then built his hotel known as the Central House, the finest in the county; it was burned Jan. 7, 1881, but was immediately rebuilt. All of this property Mr. Bobel

was acquired since coming to the State. Married March 3, 1856. Mrs. Bobel was born in Germany. They have six children, three sons and three daughters.

DR. D. W. CARLEY, physician and surgeon, Boscobel; born in Otsego Co., N. Y. At the age of 22, commenced the study of medicine with Dr. Charles M. Turner, Tompkins Co., N. Y.; graduated at Rush Medical College, Chicago, in 1856. He then came to Platteville and formed a partnership with John D. Wood; they continued about six months. In 1857, came to Boscobel. Was commissioned, in 1862, 2d Assistant Surgeon of the 33d W. V. I.; held this position till February, 1864, when he resigned on account of ill health; returned to Boscobel, where he has since been engaged at his profession.

T. CARRIER, firm of Carrier & Co., hardware; born in Chittenden Co., Vt.; when a boy he came with his father to Ohio; October, 1848, came to Jefferson Co., Wis.; here he followed the wagon-making business for five years; in 1854 came to Grant Co., engaged in farming about four years; in 1858 came to Boscobel, started a wagon-shop which he afterward traded for a hotel, run it about eleven years; was elected Sheriff in 1853, served two years; in 1875, he established the present business; has been Chairman and President of the City Board. Married, in 1852, to Amelia Powers; she was born in Gardner, Me.; they have three daughters.

ALANSON CASE, meat-market, Boscobel; is a native of Lorain Co., Ohio; worked on a farm with his father until about the age of 18, when he came to Racine Co., Wis.; continued farming here about five years, then returned to Lorain Co.; bought a steam saw-mill which he run several years; he then came to Crawford Co., Wis., and bought a farm of 120 acres, improved and afterward sold; then went to Pittsburgh, Penn.; remained about two years; in 1875, returned to Crawford Co., bought and improved his present farm, consisting of 120 acres; October, 1880, he removed to Boscobel and opened his meat-market; has been Chairman of the town of Marietta, Crawford Co.; was the first Treasurer of the town of Union; is a member of the Odd Fellows and United Workmen. Married, in 1844, to Miss Eunice Kenny; she was born in New York; they have four sons.

HARVEY CLARK, groceries, etc., Boscobel; born in Steuben Co., N. Y.; came to Richland Co., Wis., in 1856; followed the carpenter trade eight years, then came to Boscobel and continued the carpenter business till 1862, when he enlisted in the fall in Co. C, 20th W. V. I.; served about four months; was discharged on account of physical disability, then returned to Boscobel; soon after went East, where he remained about two years; in 1864, he returned to Boscobel, continued the carpenter trade till the spring of 1875; he then opened a drug store, continued it about four years; February, 1880, started his present business. Married, in 1854, to Eliza J. Skiff, of Yates Co., N. Y.; they have four children—two sons and two daughters.

BENJAMIN M. COATES, deceased. He was born in New Harmony, Ind., in 1819; in about 1837 came to Platteville, followed mining several years, removed to Beetown and continued mining; in 1849, went to California; returned in the winter of 1853, and, in company with Samuel Moore, built a linseed oil mill; ran it about eighteen months, then sold out his interest to Mr. Moore; went to Muscoda, engaged in merchandising with Jonathan Moore; they continued about two years, when he sold out to Mr. Moore, and opened another store; this he carried on till 1863, when he came to Boscobel and commenced business, the firm being Palmer & Coates; they closed out their business about 1866; since then he has been engaged in banking here till his death, which occurred Aug. 27, 1880. He has held the office of Internal Revenue Collector about three years; was member of the Assembly during 1869 and 1874. Married Miss Mildred La Follette March, 1854; she was born in Cincinnati, Ohio; have one daughter—Mrs. Parr.

WILLIAM S. COATES, farmer, Sec. 34; P. O. Boscobel; born in Philadelphia, Penn., but removed when a child with his parents to Indiana, where he engaged in farming. In 1836, came to Platteville, Wis., and there followed farming and mining until 1856, when he moved here, where he has always resided since. Owns 120 acres of land, all the improvements upon which have been made by himself. Has been a member of the Town Board several years, and has held a number of school offices. Was married in 1842 to Miss Cynthia Cain; she was born in Tennessee. They have five children—two sons and three daughters; Jefferson, the eldest son, died Jan. 27, 1880, aged 37 years.

M. F. CROUCH, farmer; P. O. Boscobel; born in Chautauqua Co., N. Y., in 1823; followed farming there till 1856, when he came to Grant Co.; settled on a farm at Potosi. In 1864, removed to Fennimore and continued farming there. He owns a farm of 160 acres, also property in Boscobel. He has always been connected with school interests since coming to this county; when in Fennimore he was Justice of the Peace two years. In 1869, he removed to Boscobel where he has since resided. Married

in 1842 to Miss M. H. Hogle; she was born in Genesee Co., N. Y. They have seven children, five sons and two daughters.

CHARLES K. DEAN, farmer, Sec. 36; P. O. Boscobel. Mr. Dean was born in Glastonbury, Hartford Co., Conn., Sept. 29, 1820. November, 1844, he came to the West and made Michigan his first stopping-place. The year following, he came to Walworth Co., Wis., where he bought and improved a farm in this county, and remained there until 1848, when he returned to the Eastern States. Ill health admonished him to again try the Western air, and he returned to his Walworth County farm in 1851. He soon after engaged with the Milwaukee & Prairie du Chien—or, as it was then known—Milwaukee & Mississippi Railroad, and first entered Grant County as an employe of this road in the fall of 1853. During 1853 and 1854, Mr. Dean was engaged with others in the preliminary survey, and location of the road between Madison and Prairie du Chien; while engaged here he worked the right of way, descriptions and platting of the same. In 1855, he was made Division Engineer of construction from Muscoda to Woodman bridge, his residence at this time being in the "Hall House" situated on the present site of the city of Boscobel, and for some time himself and Mrs. Dean were the only inhabitants of this site. In company with others, Mr. Dean selected a location for a railroad station, and purchased 240 acres of land covering a portion of the ground now occupied by the city. In 1856, he severed his connection with the company, and removed to his present farm on the southwest quarter of Section 36, where he again engaged in the occupation of farming. This farm, so beautifully situated, encircled by the verdured hills, has been his residence up to the present time. While Boscobel yet formed a part of Marion Town, namely, from April, 1857, to the same month in 1858, Mr. Dean served as Chairman of the Town Board of Supervisors, and since the erection of Boscobel into a separate town, he has served twice as Assessor, and once as Chairman of the Town Board. Mr. Dean was elected to the Legislature of 1858, which had in charge the investigation of the La Crosse Land Grant Corruption, and the revision of the statutes. Of late years, Mr. Dean has resolutely set his face against all tenders of office, preferring to remain one of the sovereigns, rather than seek the brief bubble fame, as a servant of the sovereigns. On the 21st of April, 1861, two companies of troops were organized at Boscobel, both of which Mr. Dean had been instrumental in organizing, and of the first he was almost unanimously chosen First Lieutenant. This company subsequently became Company C, 2d W. V. I. Lieut. Dean served as Adjutant of the regiment at the battle of Bull Run, and continued to serve in this capacity until honorably discharged, May 18, 1863. At Beverly Ford, August 11, 1862, Lieut. Dean was taken prisoner, and together with Pope's officers, was given a taste of rebel prison regime during a month's confinement at the renowned Libby Prison at Richmond. Mr. Dean has been a frequent contributor to different journals on a variety of subjects. Detesting the abominations in high places, which have become so prevalent during this latter portion of the nineteenth century, his trenchant pen has always been among the first to prick these unsavory bubbles as they appear. Although denied the advantages of a liberal education when young, Mr. Dean has always been a close student, which in turn has brought him to a liberty of thought that, however, is the result of well-grounded convictions. Possibly he may be impolitic, speaking after a worldly fashion, in this independence which leads him to a free and vigorous expression of his sentiments upon all subjects of popular interest. It is one of Mr. Dean's well-grounded articles of belief, however, that mental independence is the best expression of true manhood. Among other bits from his facile pen, is the following sentiment inscribed originally in a young lady's album: "Goleconda gems; gems dug from the earth wheresoever found, are bought and sold for money, but no number of them can give luster to the mind. Ignorance and vice personified, may wear them. The inbred jewels of the mind: Virtue, affection, constancy and sympathy, best exemplified in the life of a true woman, are priceless gems resplendent in a priceless setting."

W. E. DeLAP, Postmaster, Boscobel. Is a native of Monroe, Wis.; came to Boscobel about 1860; was employed as clerk in a dry goods store from 1871 to 1879, when he received the appointment as Postmaster. Married in 1875 to Miss Amelia Taylor; the lady being a resident of Platteville, Wis. They have one son.

MRS. C. H. DICKERSON, notions, toys, etc., Boscobel; is a native of Somerset Co., Penn.; at the age of 8 years, she came with her parents to Platteville; soon after her marriage, which occurred in 1853, they came to Boscobel. Her husband soon after received the appointment of Postmaster, which position he held about fifteen years; he died Nov. 10, 1876, aged 49 years. After his death, Mrs. D. held this office about four years. They have had seven children—five sons and two daughters.

H. W. FAVOR, of the firm of Sawyer & Favor, drugs, books, paints, oils and fancy groceries, Boscobel; was born in Bristol, N. H.; worked on a farm till about the age of 16; then was employed as

clerk in a store about eleven years; then followed the clothing business about three years; in 1863, he came to Boscobel; engaged in the produce business several years, then opened a grocery with Mr. Smith; continued this two or three years; in 1870, he, with Mr. Sawyer, established this business. Is City Clerk; has held this office three or four years. He was married in 1860 to Miss T. H. Gage, of Enfield, N. H.; she was born in Nashua, N. H.; they have one daughter.

GEORGE COCHRANE HAZELTON was born in Chester, Rockingham Co., N. H., Jan. 3, 1833. He came of good stock, his father, William Hazelton, tracing his descent back through many generations of English ancestry. His mother, Mercy J. Cochrane, comes of an old and noted Scotch family. The homestead in which he was born had been in the possession of their family for three generations. His father was, for many years, a merchant, but finally turned his attention exclusively to the farm, and there raised a family of six children, of whom George Cochrane was the fifth. Up to his sixteenth year the life of George was that of a New England farmer boy. There was plenty of hard work during the summer, and the district school and chores during the long, cold winters. As was the case in such New England homes, politics was always a subject of family debate, and our young lad listened to his father and mother and the elder brothers as they discussed the questions of the National bank, the tariff and free trade, which was soon to be supplemented by that more absorbing topic—the anti-slavery agitation. In these family debates, the mother always took a leading part. At that time she was noted for the keen interest she took in public affairs, and now, at the ripe age of eighty-two years, she possesses all her faculties intact, and keeps herself well informed on the issues of the day.

The elder Hazelton was a Henry Clay Whig, and a Republican by natural inheritance, when that party came into existence; and he cherished its principles to the day of his death. In this wide-awake and intelligent New England family, George naturally grew up a firm believer in the equal rights of all men, and with decided convictions as to the wisdom of the policy of protection for American labor.

When he was sixteen years old, he entered an academic school at Derry, N. H. Here he prepared himself for college at Dummer Academy, in Oldtown, near Newburyport, Mass., under the instruction of Prof. Henshaw, who was afterward so well known in connection with Rutgers' College, in New Jersey. There was no royal road to learning for the sons of this New Hampshire farmer. A home he could give them. In all other respects they must make their own way in the world; and George soon knew what it was to teach school in country districts, and board around. By this, and similar means, he educated himself; and so well was he prepared, that he entered the sophomore instead of the freshman class of Union College, at Schenectady, N. Y. Here, he had for President of the Faculty the venerable and celebrated Doctor Nott. And here, as in other places, he supported himself until he graduated in 1858. In the same year he was admitted to the bar at Malone, N. Y. One of the curious incidents of political life in our country is to be found in the fact that Judge James, a member of the 47th Congress from New York, was one of the four judges before whom young Hazelton appeared at Malone for examination. It is needless to say that the veteran lawyer from the Empire State and the rising young advocate from the West are warm friends.

After being admitted to the bar, with the exception of a few months spent in the Treasury Department at Washington, D. C., he practiced law at Amsterdam and Schenectady, N. Y., until the autumn of 1863, when he decided to settle in the West. His elder brothers, William and Gerry W. Hazelton, the present United States District Attorney for Milwaukee, had settled in Wisconsin some year previous. To be in their vicinity was the principal reason of his settling, in September, 1863, at Boscobel, in Grant County, Wis., where he has since resided. If there is any one trait that pre-eminently marks the character of Mr. Hazelton, it is self-reliance. Our great philosopher, Emerson, in his essay on this admirable trait of American character, says: "A sturdy lad from New Hampshire or Vermont, who, in turn, tries all the professions, who teams it, farms it, peddles, keeps school, preaches, edits a newspaper, goes to Congress, buys a township, and so forth, in successive years, and always, like a cat, falls on his feet, is worth a hundred of these city dolls. He walks abreast with his days, and feels no shame in not studying a profession, for he does not postpone his life, but lives already. He has not one chance, but a hundred chances."

Mr. Hazelton was all this, and more, for he had the profession which he had struggled to obtain, and which he still loves. With a firm faith in his capacity to make his way upward and onward in life upon his own individual merits, and having decided, in September, 1863, where his home was to be, in the following November, poor as he was in this world's goods, but rich in more than "a hundred chances," he wedded Ellen Van Antwerp, of Schenectady, N. Y., an accomplished lady, who has been to him a helpmeet in the highest and truest sense of the word. Four children have blessed this union, two of whom—

the eldest boy, Harry, and the only girl, Alice—are deceased. George and John Hampdon still live to cheer the home and bless the hearts of their parents.

Having decided on a home, and found a wife to preside over it, the self-reliant young lawyer went to work to win that which he came to Wisconsin for—a place among men. There were no shilly-shally efforts, but direct, forcible work. He had his chosen profession. He was a born orator. The country debating schools and the college lyceums always had special attractions for him. In his new home, these natural gifts were soon brought into full play. In November, 1864, he was elected District Attorney for Grant County, and, in 1866, was re-elected for the second term. Nor did this rapid progress cease here, for we find him elected to the State Senate, in 1867, and he was chosen President *pro tempore* of that body. He was again re-elected to the Senate in 1869. Feeling that he must gain a more solid reputation in his profession, we find him, at the expiration of his last term in the State Senate, giving five years of close and diligent attention to the practice of law in the State and United States Courts. Here he soon became known as one of the leading lawyers of Wisconsin. His success as a jury lawyer was most marked, and soon gained him an extensive practice and a wide experience.

If he was anything, he was an active and ardent Republican. Each recurring canvass found him vigorously engaged. The result was that he was again called upon to represent his fellow-citizens, this time in the National Legislature, being elected to the Forty-fifth Congress, in November, 1876. He entered Congress at a time when he found himself numbered among the Republican minority. This was peculiarly unfortunate, for the Democratic majority, through their committees prepared and controlled all legislation, and never willingly allowed any Republican to do any work, or take any part that would test either his ability to work, his knowledge of politics, or his skill in debate. His real public life commenced under these adverse circumstances. But he was not thus to be repressed. Whenever opportunity offered, his readiness and ability to state a point with rare terseness and force soon began to command the attention of the House. Such was the state of affairs with him when he was re-nominated in 1878. The leading question in the Third Wisconsin District was finance. Briefly stated, it was this: Shall the Nation have an honest dollar and keep faith with its creditors, or shall we enter upon another era of paper money inflation. All of Mr. Hazelton's convictions as to what was not only the best policy, but the soundest politics, made him believe that a speedy return to specie payments was the only sure road to future national prosperity. Although a majority of the voters of his district seemed against him, he never wavered for an instant. He was re-nominated in 1878, and at once took the stump on the Republican financial platform. Both Greenbackers and Democrats united to beat him, and it was only by the most persuasive speeches and untiring labor that he overcame the majority, and was re-elected to the Forty-sixth Congress.

In the first session of this Congress he had his first opportunity to show the real quality of his intellect. In February, 1879, when the majority were openly threatening the immediate repeal of the reconstruction measures, he delivered a speech on the "Powers of Government," in which he not only exhibited a thorough knowledge of the legal and political phases of the question, but a boldness of thought in applying principles that clearly showed that he had been a close student of our political history. In the following April, when the same majority were attempting to impede the resumption of specie payments, he spoke on the subject of the National Banks. This speech, made in favor of honest money and national good faith, was one of his greatest efforts. It attracted much attention at the time, and was widely published and commented upon in the daily press. His efforts during this session ranked him among the best orators in the House, and, in the autumn of that year, he was invited to go to California and assist in the canvass in that State. The election was for members of Congress, and it was regarded as the test case of the coming national campaign of 1880. The Republicans carried the State, and no one man from outside of it contributed more to that success than Mr. Hazelton. He has, if any man has, the courage of his convictions. He was invited to deliver an address at the famous Arlington cemetery, on Decoration Day, 1880. Here he made a wide departure from the usual line of thought followed by most speakers on similar occasions. He said that we had apologized long enough for conquering the rebellion, and then he told the assembled veterans that the Union soldiers, living and dead, in putting down the rebellion had accomplished a work such as had never been accomplished before. This speech was also published in the daily press, and Union soldiers all over the land spoke of it in the warmest terms. The soldiers have in him a warm and energetic friend, and as more than a score of grateful pensioners can testify, and whether as a member of the committee on invalid pensions, or in helping along a case delayed in the pension office, he omits no effort to see that justice is done. In 1880, he was re-nominated for the third time, and most triumphantly re-elected, his majority ranking among the highest ever given for any man since the close of the rebellion.

In a consideration of his marked traits of character: He did not die young; he is strong in his likes and dislikes, and often frankness itself in expressing them; he sometimes wounds the feelings of sensitive people, not that he would wrong any one, but being a man of positive convictions, and of a most sanguine temperament, he is almost the ideal of a "blunt man," and speaks just as he thinks. In a word, he has that good, but very impolitic habit of saying "yes," or "no," at once. Such a man must, at times, wound his friends and embitter those whom political and other reasons have made his enemies. But once let him see that he has been wrong, and, like all men of his temperament, he is the first to acknowledge his error. Nor does he cherish animosity toward political opponents in his own party. When once a struggle has been ended in caucus or convention, if he and his friends have been defeated, it is the end of the battle with him, no matter what personal interests may have been at stake, and he is one of the first to hold out his hand, and say, "All, right, boys; we did our best to beat you, but now we are with you." When he says this, it means no half-hearted work either. On the other hand he possesses, in the highest degree, the power of attaching men to him. Often has he been heard to speak, in the warmest terms, and with real emotion, of the many helpful and faithful friends he has found since his home has been in Wisconsin. "Whatever of success I have had," said he, "I owe to them." That his energy and ability as a lawyer and a man of politics, his fidelity to his principles and to his friends, are known and appreciated by those who are best acquainted with him, is shown by the fact that they have steadily called him to higher and more important duties. He is now in the prime of his mental power.

DR. C. M. HEWITT, physician and surgeon, Boscobel; is a native of Oneida Co., N. Y.; when a boy, he commenced the study of medicine with his uncle in Batavia, N. Y.; he afterward came to Canada and continued his course of studies with Dr. Merrick about three years; studied with Dr. Nash about two years; he then came to Detroit and continued his studies under the supervision of Dr. Stephen Henry; graduated in the winter of 1838-39, at the College of Physicians at the New York University; he then returned to Canada and commenced the practice of his profession at Port Rowen and St. Thomas; continued about two years; in 1841, came to Grand Detour, Ill.; thence to Grant Co., Wis.; in 1859, he removed to Boscobel; he has practiced in Lancaster, Potosi and other places in this county; he is the oldest practicing physician in Grant Co. He was one of the School Commissioners whose duties were examining school teachers, etc. He was married in 1840 to Miss Lizzie Nash; she was born in Chautauqua Co., N. Y.

GEORGE F. HILDEBRAND, firm of Parker, Hildebrand & Co., general merchandise, Boscobel; is a native of Prussia; in 1856, came to Waukesha, Wis.; in 1858, came to Boscobel; was employed as book-keeper for Dwight T. Parker; held this position five or six years; he was then admitted as a partner into the firm of Parker, Hildebrand & Pepper; this firm continued some years, when George W. Parker bought out Mr. Pepper's interest; since then the firm has been Parker, Hildebrand & Co. This firm carries on the largest business of any house in the county; their sales are over \$120,000 a year.

T. N. HUBBELL, firm of Ritter & Hubbell, hardware, Boscobel. The subject of this sketch is a native of Columbus, Franklin Co., Ohio; when a boy, he came to Bloomington, Ill.; afterward removed to Pana, Ill.; he secured the position as expressman with Valentine's Express, running between Cairo and St. Louis; he continued with this company until they retired from business; he then returned to Bloomington and engaged in the hotel business both there and at Pana; in about 1859, came to Lancaster, Wis., and engaged in general merchandise business; he also opened the first store in Woodman, which he carried on for several years; in 1874, he came to Boscobel and entered upon his present business; when in Woodman he was Chairman of the town about four years; also held the office of Town Clerk; since coming to Boscobel he has held various offices; among others was Chief Engineer of the Fire Department four years, and Chairman of the Town Board; he is now Mayor of the city, having been elected in 1879; re-elected in 1880; he was one of the five members who served on the County Board under the old law. Married, October, 1856, to Miss E. A. Ritter; she was born in Salem, Ohio; they have one son, now assisting his father in his business.

DR. W. T. HURD, dentist, Boscobel; was born in Wiotia, Wis.; in 1871, he came to Madison, and entered the profession of dental surgery, studying with Drs. Hurd & Chittenden; graduated in 1874 at the State Dental Association of Milwaukee; practiced with Dr. Enos one year in Milwaukee; in 1876, he came to Boscobel and at once established himself in business, and has been a resident here since; he is the only resident dentist in the city.

V. J. KBATOCHWILL, boots and shoes, Boscobel; was born in Austria; in 1856, came to Muscoda, Wis.; there he commenced to learn this trade in 1857 with C. J. Molle; he came to Boscobel July 30, 1860, with Mr. Molle, and finished learning his trade; he worked for Mr. Molle four-

teen years ; this gentleman died in 1872, when Mr. K. bought out the business ; he was clerk in the sutler's department during the war in 1863-64. He is a member of the Odd Fellows and Temple of Honor. Married in 1866 to Elizabeth Weibel, who was born in Switzerland ; they have six children, five sons and one daughter.

C. McWILLIAMS, firm of Pittman & McWilliams, drugs and groceries, Boscobel ; is a native of Ireland ; came to Eagle, Wis., in 1859 ; clerked in a drug and hardware store about two years ; in the spring of 1866 he came to Boscobel and commenced this business ; they carry a stock of about \$8,000, doing a trade of about \$30,000 per year. Married, in 1865, to Miss Maggie E. Haslehurst ; she was born in New York ; they had three children, two living ; lost George in 1870, aged 3 years.

EDWARD MEYER, firm of Meyer Bros., general merchandise, Boscobel ; is a native of Westphalia, Germany ; came to Waukesha Co., Wis., in 1848, with his parents ; followed farming till 1859, when he came to Boscobel ; was employed as clerk with Fleete, Meyer & Co., who had opened their store in 1858, and was one of the first stores started here ; this business was succeeded to by Meyer, Hildebrand & Co., in 1862 ; they continued this business till 1866, when it was changed to Meyer Bros. ; they carry a stock of about \$20,000 ; their sales amount to about \$75,000 per year ; has been chairman of the town ; married in 1867 to Miss Josephine Horn ; she was born in New York ; they have four children, three sons and one daughter.

N. B. MILLER, restaurant and saloon, Boscobel ; born in Livingston Co., N. Y. ; followed farming till 1858, when he came to Ohio and worked at the daguerrean business about eight months ; in the fall of 1858 came to Lancaster ; worked at the same business there till the spring of 1861 ; then started a grocery ; firm of Barnett & Miller ; they continued about six months, when Mr. Miller bought out the business and continued it till July, 1863, when he sold out and removed to Boscobel and commenced this business ; he owns this and other property in town, all of which he has acquired since coming to Grant County ; married in 1864 to Helen M. Petty ; she was born in Ohio ; they have one son—Nathan G.

DWIGHT T. PARKER, deceased ; he was born in Malone, N. Y., Dec. 1, 1821 ; in about 1843, came to Lancaster, Wis. ; followed mining and taught school a short time ; he then, in company with Mr. Kendall, opened a store, which they carried on several years ; in 1857, he removed to Boscobel opened a general store, which is now operated under the firm name of Parker, Hildebrand & Co., and is probably the largest in the county ; he died in 1871, aged 49 years ; he organized and was President of the First National Bank ; he was always successful in all his business engagements, and at his death left property valued at over \$200,000, all of this he acquired since coming to this county ; he married Miss Mary E. Schrader, December, 1848 ; she was born in Vandalia, Ill. ; have four children three sons and one daughter.

GEORGE W. PARKER, firm of Parker, Hildebrand & Co., general merchandise, Boscobel ; born in Franklin County, Vt. ; came to Lancaster, Wis., in 1856 ; was employed as clerk in his brother's store, Dwight T. Parker, who had established business there in about 1843 ; removed his store to Boscobel, in 1857 ; in 1860, they opened a branch store at Wauzeka, continued it about five years, when they closed out this business ; he then bought an interest in the business at Boscobel, since then has been connected with this firm ; they are probably doing the largest business of any in the county ; their sales amount to about \$120,000 per year ; has been Chairman of the Town, and Mayor ; married in 1872 to Miss Ida Cannon ; she was born in Logansport, Ind. ; they have one daughter.

JOHN PEPPER, live stock, Boscobel ; born in Mineral Point ; when about 2 years old came with his parents to Lancaster. His father soon after was elected Sheriff, and held this office two terms. He also opened a hotel and ran it till his death, which occurred in 1842. At the age of 15 he was employed as clerk for D. T. Parker ; held this position five years. In 1854 he went to California ; remained a few months, returned to Lancaster and started business with Col. John B. Callis ; carried this on about two years. Mr. Parker then opened a store at Boscobel, and retained the services of Mr. Pepper to close out his business at Lancaster. He came to Boscobel in 1859, and bought the Barnett House ; ran it about six months. Soon after he and Mr. Hildebrand bought two-thirds interest in this store. The firm became Parker, Hildebrand & Pepper ; continued until 1865. He then engaged in live stock and grain a short time ; Jan. 1, 1869, was employed at book-keeping for Parker, Hildebrand & Co. ; held this position till 1873. He then resumed the grain and live-stock trade, which he continued till April 1, 1879, when he sold out his warehouse to Parker, Hildebrand & Co. Since then he has been engaged in the live stock business.

A. J. PIPKEN, banker, successor to First National Bank, Boscobel, is a native of Union Co., Ill.; commenced reading law in 1857, with the Hon. John Dougherty, of Union Co.; graduated in Lexington, Ky., in 1858; came to Watertown, Monroe Co., Ill., in 1860, and opened a law office, which he continued about eighteen months, then went to Chicago in 1865; went to Milwaukee and engaged in the wholesale grocery trade; afterward transacted a merchandise brokerage business; continued till 1876, when he came to Boscobel, and soon after entered his present business, which he has since continued; married in 1875 to Miss Mary L., daughter of Dwight T. Parker, deceased, President of First National Bank, Boscobel. She was born in Lancaster, Wis.

J. B. RICKS, farmer; P. O. Boscobel; born near the city of New York. In 1852, he came to Platteville, Wis., where he followed farming. In 1853, he came to the town of Marion, and bought 176 acres of land, which he improved. He enlisted in 1861 in Co. K, 12th W. V. I., and served to the end of the war; was in the siege of Vicksburg, Sherman's march to the sea, Peach Tree Creek, Stone Mountain, Jonesboro and others. He came to Boscobel in 1871, and owns his residence property with ten acres of ground, and other property. All of this he has acquired since coming to Grant County. He has been Chairman of the town of Marion four years, and Town Superintendent of Schools of Marion one year; married March 20, 1860, to Miss Myra A. Rice, who is a native of Massachusetts. They have three children—two sons and one daughter.

LEONARD SALZGABER, farmer and dairyman, Sec. 35; P. O. Boscobel; was born in Baden, Germany, where he worked in an oil mill for five years. He came to America in 1862, landing at New York May 27; he went from New York to Canada, where he remained until October, when he came to Chicago, thence to Boscobel in 1867, and has since been engaged in farming; he owns 35 acres of good land, which he has been enabled to purchase by industry and perseverance; married in 1868 to Margaretta Rean, who is a native of Hesse-Darmstadt. They have six children—three boys and three girls.

M. A. SAWYER, of the firm of Sawyer & Favor, drugs, books and fancy groceries, Boscobel; is a native of Vermont; when a child, he came with his parents to New Hampshire; clerked in a drug store in Meridith and in Concord, N. H., several years; in 1858, he opened a drug store in Bristol, N. H.; continued it till September, 1860, when he sold out and went to New Orleans; remained about six months; at the breaking-out of the war, he returned to New Hampshire, and was appointed Hospital Steward in the 3d N. H. V. I.; in 1863, he came to Milwaukee, where he remained till the following February; he then went to Louisiana and engaged in raising sugar and cotton, having, in company with others, leased a Government plantation, employing about seventy hands; they continued this about two years; in August, 1866, he came to Boscobel and bought an interest with Mr. Mortimer in the drug business; Mr. Mortimer died soon after; the firm then changed to Sawyer & Ames; afterward to Pittman & Sawyer, which continued till May, 1870, when he sold out to Mr. McWilliams; in September, 1870, the firm of Sawyer & Favor was established. He was married July 1, 1865, to Anna M. Prescott; she was born in New Hampshire; they have one daughter.

FRED SCHAEMPFLUG, furniture dealer, Boscobel; born in Prussia; came to Baltimore, Md., in 1854; thence to Cincinnati; in 1856, went to Milwaukee; followed the mason trade there about five years, having learned this trade in Prussia; in 1861, came to Boscobel; has followed this trade more or less since coming here; in 1867, he established his furniture store, which he still continues; carries a stock of about \$1,000; his sales amount to about \$6,000 per year. Is a member of the Lutheran Church. He was married in 1861 to Lizzie Martin; she was born in Germany; they have three children—one son and two daughters. He owns his store, also his residence and other property in town.

GEORGE SMITH, Jr., livery, Boscobel; was born in Prairie du Chien, Wis. When a child, he came to Dane Co., Wis., and at the age of 10 years, came to Boscobel, where he worked for his father in the livery business until 1875, when he commenced business for himself. He first bought a watch for \$3; this he traded for a cutter; he then traded the cutter for a harness; then bought a buggy, and so continued until he has accumulated considerable livery stock. He now owns nine horses and seven buggies and wagons, and is considered the leading livery-man of the town.

E. O. SPIEGELBERG, firm of Spiegelberg Brothers & Co., general merchandise, Boscobel. Is a native of Saxony; came to Portage, Wis., in the fall of 1869. Since the age of 12, he has followed this line of business. In 1877, the firm came to Boscobel; they opened with a stock of about \$7,000; now are carrying about double this amount; their sales amount to about \$40,000 a year. Married in 1877 to Miss M. Schumacher; she was born in Germany. They have one son. Charles Werner, a mem-

ber of this firm, was born in Saxon Weimer, Germany; came to Portage, Wis., in 1868; he has followed the brewing business about twelve years; he also came to Boscobel in 1877. Married in 1871 to Bertha Schirschwitz; she was born in Prussia. They have three children, one son and two daughters.

REV. E. C. STICKEL, Pastor Congregational Church, Boscobel; is a native of York Co., Penn.; received a regular college course at Amherst, Mass.; graduated in 1874 at the Andover Theological Seminary; intervening this time taught school, and was appointed Superintendent of Public Schools in Selma, Ala.; served two years; then Professor of Latin in Tallmadge College one year; was Pastor of the First Congregational Church, Montgomery, Ala., about three years; in 1878, came to Mazomanie, Wis.; supplied the pulpit in the absence of the regular Pastor two years; February, 1880, came to Boscobel, and became Pastor of the Congregational Church. Married in 1874, to Miss Loretta R. Chamberlin; she was born in Michigan. They have one daughter. Mrs. Stickel is a music teacher and portrait painter.

M. D. TILLOTSON, Cashier Exchange Bank of Boscobel; is a native of Genesee Co., N. Y. When a child, he came to Michigan, where he received his education, and in 1867, he came to Chicago, and engaged in the banking business until 1875, when he removed to Boscobel, and was appointed Cashier of the First National Bank. This position he held until 1878, when the bank dissolved. Then the Exchange Bank of Boscobel was organized, and he was appointed Cashier, which position he now holds. Married in September, 1868, to Miss Mary Burchard; she was born in Michigan. They have two children, one son and one daughter.

T. D. WADSWORTH, agent Chicago, Milwaukee & St. Paul R. R., Boscobel; is a native of Hartford Co., Conn.; at about the age of 19, commenced studying medicine; graduated from the Twenty-third Street Homœopathic College, New York City, in 1866; went to St. Louis in 1868, commenced practicing his profession; went to Chicago in 1871, and continued practicing till 1877, when he secured a position with the St. Paul R. R. Co.; July, 1879, came to Boscobel and assumed his present position. He was appointed Superintendent of Ventilation of the State House at Springfield, Ill., and delivered lectures on Pathology in the Missouri Homœopathical Medical College; he also started and conducted a free dispensary at St. Louis, Mo. Married, in 1866, to Miss Carrie A. Peck, of Warren, Trumbull Co., Ohio; they have four children—three daughters and one son.

S. R. WILLOUGHBY, Principal of public schools, Boscobel; is a native of La Fayette Co., Wis.; followed farming, afterward painting; in about 1872, commenced teaching school in Crawford Co.; in 1873, he was appointed Principal of the grammar school; taught about four years; in the fall of 1878, was appointed Principal of the Boscobel High School, which position he now holds.

GEORGE ZIEGELMAIER, brewer, Boscobel; is a native of Wurtemberg, Germany; worked at the baking and milling business for about three and a half years in the old country. July 2, 1854, he came thence to New Hartford, Conn., where the first year he engaged in farming, and the second year in the milling business. In 1856, he came to Crawford Co., and engaged in farming for one year, and moved thence to McGregor, Iowa, and followed the bakery business. In November, 1857, came to Boscobel and commenced the bakery and saloon business. In 1859, returned to McGregor and re-engaged in the bakery business. In 1866, returned here and bought out the first brewery, which burned, then rebuilt, and has continued since. He was married in June, 1860, to Sarah Koss; she was born in Mecklenburg; they have four sons and three daughters.

TOWN OF MARION.

A. J. BARTHOLOMEW, farmer, Sec. 26; P. O. Boscobel. Born in Brown Co., Ohio; when about 6 years old, came to Rush Co., Ind., with his parents; remained there about six years, then came to Illinois, followed farming; about five years later, came to Highland, Iowa Co., where he remained farming about four years. In 1850, he went to California, followed mining there about fifteen years. There he enlisted, in 1861, in Co. B, 4th Cal. V. I.; served three years. In 1865, came to Boscobel; removed to his present farm in 1866. Owns 245 acres of land. Is a member of the Odd Fellows. Married in 1866, to Miss Mary L. Watrous; she was born in Ohio. They have six children—four sons and two daughters.

C. A. BLANCHARD, farmer, Sec. 35; P. O. Boscobel. Is a native of Morris Co., N. J., but was raised principally in Essex Co., N. Y. After the death of his parents, he went to Connecticut and finished his education. Came to Vinegar Hill, Jo Daviess Co., Ill., in 1846, and remained two years. In 1848, he came to the place where he is now located. During 1844 and 1845, he clerked in a feed and grocery store in New York. In 1846, he went to New Orleans and engaged in getting out ship-timber. In May of the same year, he came to Galena and went to mining. He owns about 250 acres of land, and has cleared it up himself. Has held nearly every town office. Married in 1854, to Miss Martha E. Fitch, who was born in Michigan. They have three children, two sons and one daughter.

FRED BOEBEL, farmer, Sec. 20; P. O. Boscobel. Born in Baden, Germany, March 28, 1829; came to America in 1853, remaining in Ulster Co., N. Y., about six months; he then came to Grant Co., where he has since lived. He owns 240 acres of land; he has cleared and improved this farm, with a barn costing about \$700; his house cost about \$600. All of this property he has earned since coming here. Married in 1857, to Miss Elizabeth Shide; she was born in Baden; had six children, three living—one daughter and two sons.

PETER BOEBEL, farmer, Sec. 5; P. O. Boscobel. Born in Baden, Germany; came to Ulster Co., N. Y., in 1854; worked there at the stone-mason trade two years—the trade he learned in Baden. In 1856, came to Grant Co., where he has since resided. Owns 430 acres of land, which he has improved with a good barn costing about \$800, and other improvements. Member of the Presbyterian Church. Married in 1865, to Katherine Brechler; she was born in Baden. They have six children—five sons and one daughter.

FRED GADE, farmer, Sec. 24; P. O. Boscobel; is a native of Mecklenberg, and, when in Prussia, followed the milling trade for ten years, and at Mecklenberg four years, and fifteen years he followed farming; in 1874, he came to Clayton, Iowa, and, in 1875, came to the town of Marion; here he engaged in milling running the Red Mill, now known as the Marion Center Mill, for four years, then went to farming. Owns 200 acres of land. He was married in 1859 to Miss Mena Hagen, who was a native of the same place.

SEBASTIAN HELLER, farmer, Sec. 22; P. O. Boscobel; born in 1832 in Baden, Germany; in 1853, came to Ulster Co., N. Y., where he remained two years, then came to the town of Marion, Grant Co., where he has since resided. He now owns 120 acres of land; this he has acquired by his industry since coming here. Married, in 1866, to Mary Henkel; she was born in Hesse-Darmstadt, Germany; they have eight children—four sons and four daughters.

GEORGE HENKEL, farmer, Sec. 21; P. O. Boscobel; born in Hesse-Darmstadt, Germany, May 5, 1824; he worked at the mason trade about twelve years before coming to this country; in 1851, came to Pennsylvania; also followed this trade there about four years; in 1855, came to Lancaster, Wis.; worked at this business one year, when he removed to his present farm. Owns 366 acres; he has improved this farm, with a substantial barn, cost about \$800; his residence cost about \$600; has been assessor one year, member of the Town Board seventeen years; is Town Treasurer; has held this office the past eleven years; is also a member of the School Board. Married, in 1855, to Anna Weirich; she was born in Hesse-Darmstadt, Germany; they have six children—four sons and two daughters. Are members of the Presbyterian Church.

CHRISTOPHER HINN, proprietor of Marion Center Mill, Sec. 11; P. O. Boscobel; is a native of Grant Co., and has always resided in the county; until 1879, he was engaged in farming, and

tock charge of the mill in 1880; his brother Charles is part owner, and, in connection with the mill, they have a well-improved farm of 105 acres. Was elected to the office of Town Clerk in 1880. In 1879, he was married to Miss Nettie Hill, who was born in the town of Liberty; they have one son—George Albert.

JOSEPH HINN, farmer, Sec. 22; P. O. Boscobel; born in Baden, Germany; came to Kings-ton, N. Y., in 1849; worked in stone quarries there about five years; in 1854, came to Grant County, where he has since resided, and followed farming; he owns 200 acres of land, 130 acres of this he has improved, and has made all he is worth since coming to America. Married in 1853 to Katharine Breehler; she was born in Baden; they have ten children—five sons and five daughters.

CHARLES MUELLER, farmer, Sec. 24; P. O. Boscobel; is a native of town of Marion; was born in 1860; his father is one of the old settlers of this county, having come here in about 1850, and settled in this locality; they own 200 acres of land. Charles lives on and manages the farm, where he was born.

ALFRED PALMER, farmer and trout culturist, Sec. 2; P. O. Boscobel; born in Christian County, Ky. When a boy, he came with his parents to Illinois. In 1837, he came to Dubuque, Iowa; in 1839, he came to Grant County and has been a resident of this and Iowa County since. He has been engaged in the merchandising business in Grant and Iowa Counties about thirty years. In 1870, he closed out his business and removed to his present farm; he owns in all about 400 acres; his principal occupation being breeding fish. For the past seventeen years he has been experimenting in trout culture; his is the oldest private fishery in the world; his ponds cover, in the aggregate, about one acre, consisting of nine ponds. He was one of five who were elected members of the County Board during that organization, and has held other minor offices.

W. W. PRATT, farmer, Sec. 11; P. O. Boscobel; is a native of Mulberry, Vt.; when a boy, came with his parents to New York State, where he remained farming till the age of 22 years; in 1857, came to Grant Co., Wis.; since coming here he has been to Utah, Salt Lake and California. Owns 255 acres land; these improvements he has made since coming here; has been six years Clerk of the School District. Married in 1852 to Mrs. Minerva A. Blair; have three children.

WILLIAM REEVE, farmer, Sec. 35; P. O. Boscobel; born in England; came to America in 1855, and located in Huron Co., Ohio, where he remained about two years; in 1857, he came West to Grant Co., Wis., and engaged in farming; he owns 110 acres of land, the improvements upon which were made entirely by himself. He married in 1852 to Miss Ann Fear, who was also born in England. They have six children—one son and five daughters.

MATHEW RIORDAN, farmer, Sec. 17; P. O. Woodman; born in Ireland; came to Boston, Mass., in 1850, thence to Maine; here he remained about six months, then came to Milwaukee; there he followed teaming about sixteen years, and hauled the first grain there that was hauled by team; in about 1866 he came to this farm; owns 440 acres, with a very comfortable house and other improvements; all this property he has accumulated since coming to Wisconsin, and is a self-made man. Married in 1847 to Mary Lynch; she was born in Ireland; they have eight children—four sons and four daughters.

FRED. SCHWAB, farmer; Sec. 15; P. O. Boscobel; born in Baden, Germany, in 1831; came to America in 1867, and to Grant Co., Wis., where he has since lived; in 1877, removed to his present farm; owns 140 acres of land. Married in 1859 to Catharine Heller; she was born in Baden; they have two children—Louis and Lena.

E. B. SMITH, farmer; Sec. 30; P. O. Boscobel; born in Erie Co., Penn.; at the age of 12 he came with his parents to Grant Co., where he has since resided, coming here in 1846; they are among the oldest settlers in the county. Enlisted in 1862 in Co. C, 20th W. V. I.; served till the end of the war; participated in the battles of Prairie Grove, Ark., Vicksburg, Brownsville, Texas, Yazoo City, Mobile, Ala., and others; has been to California, and has traveled over most of the Western country; he own 280 acres of land. Married in 1866, to Miss Mary Cliager; they have five children—one son and four daughters.

WILLIAM C. SNOW, manager Fair Flouring Mills, Sec. 2; P. O. Boscobel; born in the town of Wingville, Grant Co., Wis.; lived there till 1867, then moved to the town of Boscobel, and attended school, receiving a good business education; then moved to the town of Marion and engaged in the milling business, under his father's instruction, for seven years. For the past year, he has been renting the mill of his father, and managing the business himself. The mill was built in 1863, has one run

of stone, and cost \$6,000. In 1880, he was married to Miss Maggie Lull, who was born in Grant Co., Wis.

GEORGE TUFFLEY, farmer, Sec. 11; P. O. Boscobel; born in Warwickshire, England; while in the old world worked at the gun-maker's trade for about eighteen years. He was apprenticed to the trade at the age of 14 years; worked for the East India Co. and in the Tower of London, making muskets and small arms generally for the use of the army. In 1850, he came to America and located at Platteville, Grant Co., Wis., and there followed his trade. He came down from Portage to Galena on the first boat that ever came down the Missouri River. Remained at Platteville five years; from there he came to the town of Marion, June 1, 1855, and located on the farm where he now lives. He owns 340 acres of land, 175 acres of which is improved; all improvements have been made by him personally. Has held office of Chairman of Town Board, Clerk, State Enumerator, and, in 1880, United States Enumerator of Census; has been Justice of the Peace several years, and member of the School Board and Director. Was married June 27, 1842, to Miss Mary Darby, who was born in the same county; has five children—three sons and two daughters. Enlisted in 1861 in Co. K, 12th W. V. I.; served through his enlistment, which was three years; after receiving his discharge, he went to Indianapolis and was employed at the arsenal repairing guns, etc. Participated in the sieges of Vicksburg, Atlanta, battle of Peach Orchard and innumerable skirmishes.

OLE O. ULUE, farmer, Sec. 1; P. O. Boscobel; born in Norway; came to Manitowoc Co., Wis., in 1866, where he lived one year; then came to Dane Co., and remained two years; in 1869, came to Grant Co., where he has since lived, and followed farming; he owns 80 acres of land—this he has acquired since coming to Wisconsin. Married, in 1873, to Mary Halverson; she is a native of Norway; they have five children—four sons and one daughter.

PAUL WELLNER, farmer; Sec. 29; P. O. Boscobel; born in Wurtemberg, Germany. Came to America in 1849; worked in various parts of the country in stone quarries, railroads and canals about five years; came to Crawford Co. in 1854; in 1864 to his present farm; owns 320 acres land; all improvements have been made by himself and son. Married in 1862 to Margaretta Henkel. They have five children—three sons and two daughters.

CHARLES ZIMMERMAN, farmer, Sec. 16; P. O. Boscobel; born in Baden in Germany, in 1828. He lived there till 22 years of age, and followed the vocation of stone cutter. Came to this country and located in Ulster Co., N. Y., remaining there six years, following this trade. He then moved to Grant Co., entering a farm from the Government, where he lived four years. In 1860, he came to his present location. He owns 305 acres of land, of which 110 are improved. He has held the office of School Treasurer three years. Was married in 1854 to Miss Mary E. Buchler, who is a native also of Baden. They have nine children—four sons and five daughters.

TOWN OF POTOSI.

REV. JOHN A. BALL, Congregational Minister, Potosi; was born at Schuylerville, Saratoga Co., N. Y., Nov. 13, 1837. Son of D. S. and Fanny (*nee* Dewey) Ball. Married in Tioga Co., N. Y., Nov. 3, 1867, by Rev. S. Johnson, to Amelia, daughter of Enoch and Lucy Hooker, of Newark Valley, Tioga Co., N. Y. Has four children—Frederick H., George Dessick, Lillian Dewey, Florence A. Graduated at Brockport, N. Y., 1860; enlisted in 85th O. V. I. as Corporal; re-enlisted in 3d N. Y. V. I.; served two years, and was transferred by promotion to Second Lieutenant to 127th U. S. C. T.; served nine months and was discharged in Texas. Mr. Ball's grandfather (John Ball) was a Lieutenant in the Revolutionary war, and afterward a member of the New York Legislature. He was a son of Eliphalet Ball, who was a graduate of Yale College, and a member of New Haven College; founder of Ballston Spa, N. Y., and a second cousin of Mary Ball, the mother of George Washington. After Mr. Ball's promotion, he commanded the company and post at Ft. Isabel, Tex., and served in Ohio, Kentucky, Alabama, at siege of Charlestown, S. C., and in the series of engagements about Richmond and Fitchburg, Va., and also at Fortress Monroe. The mother of Mrs. Ball (Lucy Brewster Hooker) was a descendant of William Brewster, a member of the Plymouth colony; her father was a descendant of Rev. Thomas Hooker, who led the colony that settled Hartford, Conn., and his father served in war of 1812.

E. W. BRIGGS, farmer and miner, Sec. 12; P. O. Rockville; born at Waterloo, Monroe Co., Ill., June 3, 1838. Son of Maquis D. and Mary D. (Gillman) Briggs; came to Grant Co. with parents at two months of age. In March, 1854, went to Eldorado Co., Cal.; followed mining three years with indifferent success; returned to California three years later, and remained seven years mining, with good luck. Married July 3, 1858, by James Seaton, Esq., of Potosi, to Orilla, daughter of James and Emily (Clark) Jackson; she was born Feb. 17, 1842. Had no children, but has adopted several. Owns 40 acres of land.

SAMUEL A. CALEY, farmer; P. O. Lancaster; born in Lancaster Co., Penn., April 9, 1836; son of Samuel and Catharine Caley; was wagon making in Platteville three years, and, in 1861, enlisted in the 47th W. V. I., and served two and a half years. March 2, 1862, was married by Frank H. Bonham to Angeline, daughter of Caleb and Nancy (Coombs) Taylor, and had seven children—Samuel L., born Dec. 2, 1867; Clara M., April 23, 1872; Oscar C., Feb. 10, 1876; Balorus, Oct. 6, 1878; George E., Feb. 20, 1864 (died March 30, 1865); William A., born Aug. 21, 1866 (died July 21, 1868); Lewis F., March 8, 1868 (died Aug. 20, 1870). He settled in Decatur Co., Kan., in 1878. Is a Republican.

GEORGE P. B. CAMPBELL, carpenter and lumberman; P. O. Lancaster; born in Indiana July 18, 1835; son of George and Rachel (Preston) Campbell, who came to Grant Co. in July, 1844; settled at Waterloo two years, Potosi one year and Lancaster two years; then bought the mill business established in 1854 by Mr. Irish, and afterward owned by Hampton & Walker in 1866. The mill runs seven months of the year with eighteen-foot head, and will cut 2,000 feet in ten hours. Mr. C. was three years in the 25th W. V. I., and draws a pension. He has been Constable several years, and is a Democrat. He was married March 13, 1853, to Sarah Taylor, of Potosi, who died July 3, 1877, leaving eight children—Amanda, wife of Robert Greener, of Minnesota; has two children—Prudence E. and John; Frank and Sarah are twins; Sarah is wife of Henry Foster, of Minnesota; Henry A. and German W. His second marriage was on Aug. 20, 1879, to Sarah L., daughter of Oliver F. and Jane Ann Keene, of Little Grant. She was born Jan. 13, 1860, and has one son—Preston A., born July 9, 1880; owns 3½ acres of land, house and saw-mill.

RUSSELL CARDEY, farmer, Sec. 9; P. O. Potosi; born in Tioga Co., N. Y., May 8, 1817; son of John and Jane C. (Stephenson) Cardey; came to Galena, Ill., in 1839, and three years after to this place; owns 100 acres of land. He was married, Aug. 25, 1842, at Hamburg, Erie Co., N. Y., by William Hamilton, to Meroy A., daughter of Aaron and Jane (Slater) Hampton, who was born July 16, 1813, in New Jersey. Their children are George W., who married Regina Roesch, and has four children—Clara, Laura, Albert and Herbert; Helen J. married Philip Roesch, and has four children—William R., Ida, Ella and Roy. Mr. Cardey is a Republican and Methodist, and was in the patriot war. When he settled here, his nearest neighbor was one mile, and the next seven miles away. He also states that a bear drove his pigs from the pen, and he shot three rifle balls (using a shot gun) into the brute, and the next morning found him and took him home.

JOHN CARTHEW, Postmaster at Rockville, and member of the firm of John Carthew & Bro. (Thomas H. Carthew). The parents of Mr. Carthew—John and Eliza (Nanc) Carthew—were natives of Cornwall, England, and emigrated to America in 1833. Mr. John Carthew was married in 1875, to Frances Jones, of Potosi, and has two children—Raymond J. and Harry. He assumed the position he now fills, and started a general grocery store, in 1856. In 1867 to 1870, he served with distinction in the Legislature—he being a staunch Republican, and the district largely Democratic.

JOHN D. CENFIELD, farmer, Sec. 27; P. O. Potosi. Born May 6, 1838, in Switzerland; son of John Louis and Frances (Bulomy) Cenfield; came to Buffalo, N. Y., in 1856, and, after one year, went to Watertown, Wis.; then to this place. Owns 100 acres of land. Married, May 16, 1871, by Rev. Nicholas Mayne, to Mary Isabel Williams. (See B. F. Williams.) Has five children—Anna Janette, born March 14, 1872; John David, Nov. 7, 1873; Eugene Nathan, Jan. 17, 1876; Rhoda Grigsby, July Frank Henry, Dec. 12, 1880. Mr. Cenfield was three years in Co. H, 25th W. V. I. He started for Pike's Peak April 10, 1860, prospecting one year, and came home in December of the same year. In 1866, started on another mining tour, and arrived in Colorado in May, and returned to Potosi in November, 1870, having crossed the plains about fourteen times in his travels.

JACOB DAWSON, farmer, Sec. 12; P. O. Rockville. Has 400 acres and some mineral land. Born Jan. 1, 1823, in Clark Co., Ky., son of John and Drusilla (Judy) Dawson; came here in 1847, from Rollo Co., Mo., and, in 1852, settled on this section; followed mining some years. Married, May 11, 1852, by Esq. Lord, to Lydia, daughter of John and Lydia (Stephenson) Fuqua. Had eleven

children—John H., born Aug. 23, 1854; married Etta Ashhart, and is in California; has one son, Willie, born Nov. 11, 1850. Sophia C., born Oct. 18, 1855; Lizzie J., Feb. 11, 1857; Abbie, April 1, 1858, (teaching school at Rockville); Martha E., March 16, 1862; Lucy A., Dec. 11, 1866; Mahala, July 2, 1868; Effie U., Sept. 28, 1873. Libbie Ann, born March 10, 1853; died Dec. 9, 1853. Mary, born Jan. 24, 1860; died Oct. 17, 1864. Jacob Grant, born Jan. 12, 1864; died April 16, 1865. Mr. Dawson is not an office-seeker, but has held several offices in the county. Is a Democrat. His father was a soldier in 1812.

JOSEPH A. DREIS (Reverend Father); P. O. Potosi. Was born in Milwaukee Dec. 7, 1849, son of Philip and Catharine (Pfeil) Dreis, formerly of Nassau and Baden, Prussia. His parents now reside in Milwaukee; has three brothers—Henry, Antony and Philip; also, three sisters. Henry is now at St. Francis' Seminary. There he, also, fitted himself for the Church; orders conferred Dec. 17, 1872, by Archbishop Henni. At present, in charge of St. Thomas' Church of Potosi, and St. Andrew's at St. Andrew's (formerly known as "Dutch Hollow"), where he resides, both churches embracing 1,000 to 1,100 members. St. Andrew's Church was organized in 1846, with seven families as members, and Father Tusck in charge. The corner-stone of a new church building was laid Oct. 13, 1875, and is now completed and out of debt, and is one of the finest inland churches in the State; cash subscriptions of \$20,000 were made, and voluntary labor to the amount of \$10,000 more finished the church and school-house; and the Sisters of St. Francis occupy a substantial residence, being a part of the church property. Father Nicholas Thile, Superintendent. Construction, dimensions of building, as follows: Size, 46x110; height of wall, 30 feet; height of tower, 130 feet; foundation, 9 feet high and 3 feet thick; chapel, in the basement; 3 bells, weighing 400, 700, 1,200 pounds.

ALBERT W. EMERY, farmer and smelter; P. O. Rockville; has 600 acres of land, some of it mineral; also has residence at British Hollow, where he sometimes resides; was born Feb. 24, 1816, near Warrenton, Va.; son of Wm. and Ann (Brooks) Emery; his grandfather was English and his grandmother German; he came to Grant Co., Nov. 31, 1839, having located at Galena and Dubuque a short time; was married March 23, 1843, by Cyrus K. Lord, Esq., of Potosi, to Eliza, daughter of John and Mary (Thomas) Nichols, who was born Aug. 29, 1822; had three girls and two boys, of whom three are now living—Elizabeth Ann, Vergenia (Jennie) wife of Theodore T. Kinney, of Potosi; they have one child, Frances. Mr. Emery has been in office most of the time since residing here, on Town Board twelve years, County Commissioner several years, and Magistrate several terms, and in 1857 and 1858 represented his district in the Legislature. When he came here there were but very few settlers in Potosi—Chapman, Coyle, McDonald, Brock, Maderina, John and James Hull, and a few others. His son, Albert, died in 1877, aged 24 years, and William died in 1875, aged nine years. The grandfather of Mr. Emery died at the age of 97 years, having been wounded in the Revolution. The father of Mr. E. was in war of 1812 and assisted to defend the city of Washington at the time it was burned by the English, he being under command of Gen. Barney; he died at the age of 85 years.

J. C. EMERY, farmer, Sec. 13; P. O. Rockville; son of Rev. Edward and Margaret (Endecott) Emery, now of Lancaster, Wis.; married, Nov. 10, 1878, by Rev. Edward Emery, to Abigail, daughter of John and Maria Chester, of Harrison, born Nov. 10, 1856; has a son, Edward Chester, born Sept. 20, 1879; has one brother and five sisters; works the farm with his brother, J. T. Emery, who was born May 22, 1855, and is unmarried; has 75 acres of land.

JOSEPH GERHARDS; P. O. Dana, by whom he has five children—three sons and two daughters. Robert, the oldest son, assists his father in the business; Sylvia, the oldest daughter, is a teacher in the graded school, commencing at the age of 16 years. Mrs. Hoskins is a member of the M. E. Church. Mr. Hoskins is a member of the I. O. O. F., has passed all the chairs and been delegate to the Grand Lodge; is one of the oldest business men in Bloomington; carries a very large stock of furniture, and makes a specialty of undertaking; has three warehouses full of goods; handles one of the largest trades in the county. By strict attention to business and fair dealing, he has been successful and justly merits the confidence of the people.

JAMES KENYON, Sec. 6; P. O. Bloomington; owns 167 acres land; born in New Jersey in 1805; came to Wisconsin in 1863, and located at Bridgeport two years; later, he removed to his present farm. Married Lucinda Cady, a native of New York; they have four children—Caleb, Alpha, Sarah Ann and Elizabeth A. Mr. Kenyon has been a member of the Town Board nine years.

Z. LYONS, farmer and stock-grower, Sec. 22; P. O. Bloomington; born in New Jersey in 1813; came to Wisconsin in 1833, and located in Grant County, near where he still lives. It was then known as Blake's Prairie; has a beautiful farm of 200 acres, one mile west of Bloomington, adapted to stock and grain; he has held the office of Supervisor and various school offices; has a family consisting of wife and eight children, six sons and two daughters; four of his sons were in the army; two served three years in the 33d W. V. I.; one served one year in the 45th W. V. I., and James served one year in the 35th W. V. I., and died at New Orleans. Mr. Lyons is the oldest settler living in the western part of Grant County, passed through all the hardships incident to an early pioneer life, and by hard work and good management has built around him a large property.

HENRY LORD, Sec. 29; P. O. Bloomington; owns 168 acres land, valued at \$50 per acre; born in Vermont in 1829; came to Wisconsin 1845 and settled in Beetown; located on his present farm two years later. Was married to Sarah M. Billings, a native of New York; they have two children—Thomas and Henry. Mr. L. has been Chairman of Town Board several terms.

GEORGE W. LYONS, Sec. 27; P. O. Bloomington; owns 80 acres land, valued at \$40 per acre; born in this town in 1839; located on his present farm in 1870. Married Eliza A. Mickle, a native of Indiana; they have five children—Joseph, Minnie, Emma, Edward and Elsie.

JACOB MARTIN, Sec. 20; P. O. Bloomington; owns 360 acres land, valued at \$40 per acre; born in Pulaski Co., Va., in 1818; came to Wisconsin in 1847 and located in this county; settled on this farm in 1851. Married Mary Ann Key, a native of Wisconsin; they have two children—Orlo and Alta.

RICHARD MORRISSEY, Sec. 5; P. O. Bloomington; owns 400 acres land, valued at \$40 per acre; born in Ireland in 1840; came to America in 1857, and in 1858 settled on his present farm. Married Mary A. Hawks, a native of Ireland; they have four children—Delbert, William, Addie and Myrtle.

J. T. MURPHY, Sec. 21; P. O. Bloomington; owns 200 acres of land, valued at \$45 per acre; born in Indiana in 1818; came to Wisconsin in 1835, and settled in this county in 1845. He located on this farm, and married Sarah Cantrell, a native of Indiana. They have four children—Frank, Warren, Virgil and Dora. Mr. Murphy has been Chairman of the Town Board, and also Town Treasurer.

C. M. MORSE, of the hardware firm of Woodhouse & Morse, Bloomington; born in Ohio in 1844, and came to Wisconsin in 1856; located in Bloomington, Grant Co. He enlisted in 1864 in Co. H, 1st Wisconsin Heavy Artillery, and mustered out June 26, 1865; was with the artillery all through its maneuvers. He learned the trade of tinner in Wisconsin. He was married, in Bloomington, in 1869, to Miss Serena Woodhouse, by whom he has four daughters. Is a member of the I. O. O. F.; passed all the chairs, and been representative to the Grand Lodge. The firm are doing a good business; work three men, and there square manner of doing business has gained for them a large trade, which they justly merit.

GEORGE W. NEVINS, Postmaster, Bloomington; born in New York in 1840; came to Bloomington in the fall of 1859; enlisted in the spring of 1861, and left Bloomington the 17th day of

April in Co. C, 2d W. V. I.; discharged in the spring of 1863; wounded at the battle of Gainesville, Va., the 28th of August, 1862; was with the regiment all through, up to the time of being wounded; appointed Postmaster in 1870, which office he has held creditably ever since. He was married, in Bloomington, in 1863, to Miss Rachael J. Bresee, a native of Wisconsin, by whom he has five children—four sons and one daughter. Has passed all the chairs in the I. O. O. F. and in the Encampment; also member of R. A. M. and A., F. & A. M. Has held the office of District School Clerk for six consecutive years; always been in active life, and is a self-made man. Republican in politics.

GEORGE NASH, Sec. 20; P. O. Glen Haven; owns 360 acres of land, valued at \$25 per acre; born in England in 1836; came to America in 1866, and located on the present farm. He married Ellen Clifton, a native of England, and they have three children—Fannie E., Annie Nora and George H.

L. S. OSBORN, Bloomington, of the firm of Osborn & Cobb, dealers in dry goods, groceries, drugs, hats, caps, boots and shoes, etc.; was born in Ohio in 1829; came to Wisconsin in 1856, and located at Bloomington; engaged in mercantile business; been selling goods for over thirty years; has held the office of County Superintendent in an early day. He was educated in Ohio; was married, in that State, in 1855, to Miss Mary A. Wilson, a native of Ohio, by whom he has one son and one daughter. They are members of the M. E. Church. Mr. Osborn is a member of A., F. & A. M. and I. O. G. T. He has always been in active life, and made what he has by his own industry; has taken an active part in school affairs and matters pertaining to the welfare of the town. His business increased from the start, and always had a good trade.

AUGUST PLONDKE, farmer; P. O. Clayton; owns 500 acres of land, valued at \$15 per acre; born in Prussia in 1824; came to America in 1851; settled in Grant Co. in 1856; married Augusta Kuehler, a native of Germany, and they have five children—Bertha, Loussia, Louis, Charles and Fred.

W. H. PECK, farmer, Sec. 20; P. O. Bloomington; owns 160 acres of land, valued at \$40 per acre. Born on this farm in 1839; married Mary Stewart, a native of Canada; they have four children—Mattie, Ettie, Bessie and Mary.

O. P. SALA, M. D., Bloomington. Born in Grant Co. Dec. 22, 1845; a son of E. M. Sala, M. D. (deceased), who was one of the oldest doctors of Grant Co.; O. P.'s father and grandfather were physicians, and, from a small boy, it was his aim to be a physician; he always attended his father in his practice and read medical books, and thus fitted himself for college; graduated at Keokuk Medical College in 1867, and commenced practice at once at Franklin Center, Lee Co., Iowa; he established himself at Bloomington in 1869. The Doctor enlisted, when a boy of 15 years of age, in 1861, in Co. A, 1st Iowa V. C.; was mustered out in 1866; re-enlisted during the war, and was sent through Texas with Gen. Custer; Co. A was Gen. Custer's body-guard; he was with the regiment all through the war; was mustered out at Austin, Tex. In 1867, he was married to Miss Mary J. Stewart, of Iowa, by whom he has four sons; Mrs. Sala died Nov. 14, 1880. He is a member of the I. O. O. F.; is Past Grand, and has passed all the chairs. The Doctor has a continually growing practice, which he justly merits. His father, E. M. Sala, was born in Lancaster, Penn., Oct. 15, 1815; the family of which he was one removed to the State of Ohio a few days after his birth; when he was old enough, he was clerk in his father's drug store until the age of 21, when he attended medical college at Louisville, Ky., where he graduated and received his diploma. He was married to Miss Susan Schelenberger in 1839, and removed to West Point, Iowa, where he practiced his profession until the year 1845, when he removed to Beetown, Wis., where he remained until 1857; during the cholera in Beetown, his services cannot be forgotten by those who knew him; from Beetown he removed to Ashley, Mo., where he remained for two years, and from there he returned to West Point, where he remained for fifteen years; from there he removed to Patch Grove, Wis., where he remained for about two years; thence he went to Dallas, Tex., where he remained about seven months, when he returned to Rock Island, Ill., where he lived for some time, when he returned to Beetown, Wis., where he remained till his death. Dr. Sala was a member of the Masonic fraternity for some thirty years; among his Masonic brethren he was looked upon as a true and upright Mason; he was always ready and at his post in time of need; he always met his brethren upon the level, acted with them by the plumb, and parted with them upon the square; he died Nov. 15, 1880.

CYRUS SARGENT, farmer and capitalist; P. O. Bloomington. A native of Ludlow, Vt.; a son of John Sargent and Mary Stone, of Vermont; came to Wisconsin in 1852, and located in Grant Co., where he has since remained. He is one of the largest land-owners and farmers in Wisconsin, owning about one hundred farms, besides large tracts of land in Iowa and California; is also a large stock-owner in the Bloomington Farmers' Fire Insurance Co. Mr. Sargent is an exemplary, honest man, and has amassed

a large fortune by close attention to business and economy. His residence is one and a half miles west of Bloomington.

JACOB SCHREINER, farmer, Sec. 34; P. O. Bloomington; owns 160 acres of land, valued at \$45 per acre. Born in Germany in 1838; came to America in 1854, and settled in this county; in 1868, he located on his present farm. Married Mary A. Miller, a native of Ohio; they have two children—Albert and William. In 1861, Mr. S. enlisted in Co. M, 4th Mo. V. C., and was discharged in 1864.

SAMUEL SCOTT, farmer, Sec. 20; P. O. Bloomington; owns 560 acres of land, valued at \$20 per acre. Born in Butler Co., Ohio, in 1811; came to Wisconsin in June, 1844, and settled for a short time in Cassville: in the fall of the same year, he removed to his present farm. Married Louisa Jackson, a native of Fairfield Co., Conn., born in 1818; they have ten children—Ann Maria, Caroline E., Marshall J., Ella F., Mark M., Mary L., Amelia M., Alice L., Sadie B. and Walter J. Mr. and Mrs. Scott are members of the M. E. Church.

FRANK J. SCHELL, boot and shoe dealer and manufacturer, Bloomington. Born in Baden in 1827; came to America in 1854, and located in Rochester, N. Y., where he remained two years; came to Madison, Wis., in 1856, and remained a short time, and then moved to Prairie du Chien; came to Patch Grove, Grant Co., where he remained until 1872, when he moved to Bloomington, and established the present business. Was married in Prairie du Chien in 1857, to Miss Mary C. Fagg, a native of Holland, by whom he has six children, three sons and three daughters. Learned his trade when a boy in the old country, and has always followed the same with the exception of the time he was in the army in the old country, and in the late rebellion. Was in the Revolution in 1848, in the old country, and, after it was over, was court-martialed and sentenced to be shot, the death sentence was commuted to State's prison for life; he was in State's prison four and one half years, and was reprieved by leaving the country. Enlisted in 1862, in Co. D, 33d W. V. I.; discharged in 1863; was with the regiment all through, up to the time of discharge. A prominent member of I. O. O. F.; passed all the chairs in the Encampment. Was one of the originators of the Library Association of Bloomington. Is one of the oldest German settlers living in Bloomington; reads a great deal, and is well informed on all subjects. Two of his daughters are successful teachers; one son in business in Minnesota, and one son clerking in Madison.

ALBERT SKELLENGER, Sec. 5; P. O. Bloomington; owns 160 acres of land, valued at \$40 per acre; born in Jefferson Co., N. Y., in 1805; came to Wisconsin, in 1845, and settled in Beetown. In 1878, he located on his present farm; he has lived in various places in the county, and has spent two years in California. He was married to Persis Butterfield, a native of New York; they have four children—Jesse, Cordelia, Albert and Sarah Ann.

REV. G. D. STEVENS, Pastor of the Baptist Church, Bloomington. Born in Oxford Co., Me., in 1838, where he received an academic education; came West in 1864, and located in Richland Center, where he was Principal of the high school for six years. Ordained in the spring of 1871, and moved to Bloomington in 1872, where he has preached ever since; has also had charge of the Baptist Church of Cassville for five years.

W. O. STEPHENS, dealer in wines and liquors, and proprietor of billiard hall, Bloomington; was born at Beetown in 1855; son of Philander Stephens; his mother's name was Matilda Eldridge; he has always lived in Grant Co., Wis. He was married in 1879 to Miss Libbie Henry, a native of Iowa; by this union they have one son. Was on a farm until 1876, when he engaged in the present business; has always been in active business life; what he has made by his own efforts.

DAVID TAYLOR, farmer, and agent for wind engines, farm machinery, etc., Sec. 27; P. O. Bloomington. Owns 160 acres of land, valued at \$40 per acre. Born in England in 1835; came to America in 1855, and settled in Ohio; settled on his present farm in 1868. Married Rebecca Saben, a native of England. They have five children—W. C., G. E., M. M., J. F. and A. F.

A. C. TUBBS, Sec. 29; P. O. Bloomington; owns 272 acres of land, valued at \$50 per acre. Born in Meigs Co., Ohio, in 1842; came to Wisconsin in 1855, and located in Dane Co.; in 1868, he settled on his present farm. Married Hattie Smith, a native of New York; they have three children—Minnie, Lulu and Clara.

E. S. TUBBS, Sec. 29; P. O. Bloomington; owns 180 acres of land, valued at \$40 per acre. Born in Meigs Co., Ohio, in 1829; came to Wisconsin in 1873, and located on present farm. Married Sarah J. McConkey, a native of Ohio; they have six children—Alwilda, Marilla, Augusta, Roxie, Grant and Sherman. Mr. T. has been Justice three years.

DANIEL TAYLOR, Sec. 26; P. O. Glen Haven. Owns 160 acres of land, valued at \$25 per acre. Born in England in 1832; came to America in 1855, and located in Ohio; removed to his farm in 1866. Married Susan Cox, a native of England; they have three children—Henry John, Walter E. and Rena Ann.

C. R. THOMAS, manager of the Co-operative Association, Bloomington, established in 1877. Trade has gradually increased, and the plan has proved a success. Mr. Thomas was born in Pike Co., Ill., in 1838; came to Wisconsin, in 1843, with his parents, farmers; followed milling previous to engaging in the mercantile business. He is a member of the I. O. O. F., Lodge; has passed all of the chairs; member of the Encampment. Married in 1864, to Miss Lydia A. Huey, a native of Grant Co., by whom there are five children, one son and four daughters; all residing in Bloomington. Always been an active business man; made all he has by his own endeavors. Received a common-school education. In an early day his mother, Sarah G. Thomas, deceased, was the first school-teacher in the settlement; John H. Thomas, his father, is still living.

CHARLES WOODHOUSE, Sec. 4; P. O. Bloomington. Owns 320 acres of land, valued at \$30 per acre. Born on this farm in 1855. Married Julia Garner, a native of Beetown; they have one child—Archie G.

R. S. WILSON, Sec. 33; P. O. Bloomington. Owns 120 acres of land, valued at \$45 per acre. Born in South Carolina in 1835; came to Wisconsin in 1860, and settled on present farm. Married Margaret Wilson, a native of Illinois; they have three children—John, Edna and James.

PETER WOODHOUSE, retired capitalist, Bloomington; born in England in 1824; a son of John Woodhouse and Ann Newton; came to America with parents in 1830, and located in Pennsylvania; came to Wisconsin in 1838, and located in Potosi, Grant Co., where he lived four years; moved to Beetown in 1842, where he remained until 1849, when he moved to Bloomington, where he has since lived. Engaged in mining and farming in an early day, and of late years has been engaged in loaning money and speculating. Married in 1857 to Miss Rachael Lyons, a native of England, by whom he has four children living, one son and three daughters, all living in Bloomington. Six Woodhouse brothers came to Grant Co., four of whom are living, all prosperous business men. They are among the pioneers of the county, and passed through many hardships in an early day. Peter Woodhouse is a good business man, and by strict attention to business has built himself a large estate. He is ever ready to help in matters pertaining to the welfare of the town.

W. C. WARWICK, miller, Bloomington; born in Butler Co., Ohio; came to Wisconsin in 1845; located in Bloomington, Grant Co., where he has since resided; learned the trade of miller when a boy, in Ohio; he was the first miller in this part of county. Married in Ohio, in 1843, to Miss N. A. Longfellow, second cousin to the poet. By this union there were nine children, six sons and three daughters; three children in Lyons Co., Iowa, the others in this county. What he has made was by his own industry in the business of milling and farming. He is one of the oldest settlers in this county. Member of the Order of P. of H.

C. W. WHEELER, retired merchant, Bloomington. A native of Massachusetts; born in 1823; came to Wisconsin in 1858, and located in Palmyra, Wis., where he engaged in the mercantile business; came to Bloomington in 1863, and established in mercantile business in 1866, which he continued until 1880, when he sold out; he learned trade of merchant in Massachusetts. Has been on Board of Supervisors, and held school offices; is a member of A., F. & A. M.

SAMUEL WOODHOUSE, retired merchant and capitalist, Bloomington; born in 1819 in Schuylkill Co., Penn.; a son of John Woodhouse and Ann Newton; came with parents to Wisconsin in 1837, and settled in Potosi, Grant Co., where he remained until 1839, when he moved to Beetown. In an early day was engaged in farming and mining; moved to Bloomington in 1862, and started the hotel which he managed until 1865; he also owned and run the Bloomington flouring-mill successfully for ten years, besides being engaged in the hardware business. Mr. Woodhouse has owned and built since he lived in Bloomington \$35,000 worth of property. He still owns the brick block; the lower part is used for hardware by his son and son-in-law, and the hall is occupied by the I. O. O. F., besides other valuable real estate. Mr. Woodhouse was all through the Mexican war, and enlisted in late war in 1861 as First Lieutenant, 7th W. V. I., Co. F; mustered out in 1862. Was married in Beetown, in the fall of 1848, to Miss Mary Baker, a native of New Jersey, by whom he has five children, three sons and two daughters—Mary L., the oldest daughter, now Mrs. C. M. Morse, hardware merchant, of Bloomington; Martha, now Mrs. John Wright, Jr., of Lancaster; the oldest son, Clinton, has succeeded his father in hardware

business; two youngest sons remain at home. Has passed all the chairs in the I. O. O. F., as well as Encampment. He is a self-made man, of cheerful disposition, and after passing through all the hardships of a pioneer life, richly deserves his pleasant home. Republican in politics.

SIMON WOODHOUSE, proprietor of the Bloomington Hotel, good sample rooms and livery; born in Staffordshire, England, in 1821; a son of John Woodhouse and Ann Newton; came to America when a boy with parents, and located in Pennsylvania; came to Wisconsin in 1837, and located in Grant Co., and engaged in mining, farming and hotel-keeping; established the Bloomington Hotel in 1866, which he has managed successfully ever since. Enlisted in the army August, 1861, as a Corporal, Co. F, 7th W. V. I. He is an enterprising man, cheerful and obliging. Six brothers came together to Grant Co., four of whom are living, and all successful business men.

OTIS WELD, harness-maker, Bloomington; born in Massachusetts in 1829; came to Grant Co. in 1862, and established the present business; learned his trade in Massachusetts previous to settling in Grant Co. He was in business in Iowa for two years; was married, in 1855, in Iowa, to Miss Isabella Anderson; she was born in Edinburgh, Scotland, in 1829; came to America in 1832, and located in New York City; was there at the time of the great fire. Mr. and Mrs. Weld are members of the Congregational Church. Her mother is still living in Dubuque, Iowa. Is the oldest business man in Bloomington.

C. J. WOODWARD, Justice of the Peace and Police Justice, Bloomington; a native of Franklin Co., Mass.; born in 1831; came West in 1867, and located in Wyalusing, Grant Co., where he worked as a mason; learned his trade in the East; moved to Bloomington in 1871. He was married, in Massachusetts, to Miss Lucy A. Hamilton, a native of Stockbridge, Mass., by whom he has two daughters. Enlisted as First Lieutenant in the 10th Mass. V. I., in 1861, and resigned July, 1862. In 1864, he enlisted in the one hundred day call as Captain in Co. K, 60th Mass. V. I. Is about building a store and dwelling on the opposite corner from the hotel. Is a member of I. O. O. F.

TOWN OF LIMA.

J. H. ALLEN, of the firm of Allen & Son, merchants, Washburn; was born in Etna, La Fayette Co., Wis., Sept. 22, 1858. Engaged as clerk for Mr. Buchan, at Benton; afterward for Godfrey & Bros., druggists at Benton. Attended Commercial College at Dubuque; graduated in 1876; came to Washburn in August, 1879, and engaged in business. In politics, Republican.

S. T. BASYE, retired; P. O. Washburn; was born in Illinois, near Jacksonville, Oct. 24, 1826; came to Wisconsin in 1836, with his parents, who died in Grant Co.; bought 40 acres of land in 1847, and farmed three years, then sold and engaged in teaming for seven years in Platteville; then bought 160 acres of land; there he remained for twelve years, when he sold and engaged in business in Washburn, and continued until 1878. His wife, Mary E. Hull, a native of New York, born Feb. 15, 1829, came to Wisconsin in 1846, with her parents; her father died in Wisconsin; her mother resides with a son in Illinois at the age of 88. They were married in 1847; they have four children—Fannie A., now Mrs. J. A. Brown, of Richland Co., Wis.; Ella S., deceased; Ida May, now Mrs. F. W. Cushman; Hattie F., deceased. Owns 200 acres of land, also town property. Member of I. O. O. F., and Past D. D. G. M.; also a Good Templar. Has been Clerk eight years, and is now holding the office. Taught school two winters. Member of the Methodist Church (Recording Steward). In politics, Republican. Delegate to the Lay Conference, held at La Crosse in October, 1879. A man generally interested in the moral affairs of the community; also Notary Public for six years.

WILLIAM CLIFTON, farmer, Sec. 2; P. O. Washburn; was born in St. Charles Co., Mo., May 23, 1817. His father removed to Callaway Co., Mo., soon after, and resided there until William was about 13 years old, when he moved back to St. Charles. He came to Grant Co., Wis., in 1834, being attracted by the lead mines, and followed mining about ten years; then combined farming with mining. He first settled on a farm a little north of his present home; this he soon exchanged for his present farm, now containing 144 acres; this farm, originally mostly heavily-timbered, had been somewhat improved before he bought it, a few acres being cleared and a stone house built, but his own toil and skill have brought farm and buildings to their present state. Large quantities of lead mineral have been mined on the farm, and a quarry of limestone opened, from which large quantities of excellent lime have been burned. He was married July 21, 1839, to Miss Frances Ann Basye, second daughter of Dr. J. J. Basye, the pioneer physi-

cian and minister of Platteville. They have had twelve children, five of whom are still living—E. W., J. Newton, Rev. J. Theodore (now Pastor of the Third Congregational Church, St. Louis, Mo.), Rev. Joseph J., of the Rock River M. E. Conference, Ill., and Carrie (now Mrs. Arnett). Their youngest daughter, Anna Belle (Mrs. Hoppin), died recently at La Crosse, leaving a little girl, which the fond grandparents accept as a loving legacy and solace in their declining years, bringing to them unwonted sunshine and gladness. Mr. and Mrs. C. are among the oldest members of the M. E. Church in this section of the country. Mr. C. has served on the Town Board of Clifton and Lima, principally as Chairman, many years, and is very much esteemed by all who know him.

DAVID CONDRY, farmer, Sec. 20; P. O. Platteville; was born in Pennsylvania Jan. 16, 1834; removed to Wayne Co., Ohio, with his parents; to Wisconsin Dec. 8, 1870. Owns 60 acres of land, made part of the improvements. His wife, Sarah Homer, was born in Mercer Co., Ohio, Oct. 4, 1842. Married May 4, 1865; they have seven children—Mary J., born Feb. 26, 1867; William E., born Oct. 19, 1868; Charles F., born Feb. 22, 1870; Emma R., born May 11, 1872; David H., born March 11, 1874; Henry F., born Sept. 2, 1876; Robert Roy, born June 15, 1879. In politics, Republican. Owns one-third interest in steam saw-mill in company with T. Calloway and Robert Hale, located in Ellenboro, Grant Co.

SHERMAN COOLEY, farmer, Sec. 30; P. O. Platteville; was born in Connecticut March 14, 1876; emigrated to Trumbull Co., Ohio, in 1832; to Belmont, La Fayette Co., Wis., in 1857; then to Grant County, August, 1870; bought 55 acres, now owns 100 acres of land with fine improvements; house 18x24, wing, 16x24, two stories; barn 34x40, 16-foot posts, basement stable. His wife, Diana Day, a native of Vermont, born Aug. 9, 1811. Married at Granby, Conn., Oct. 4, 1830; they have had eight children—Mary J., now Mrs. Everett, resides in Trumbull Co., Ohio; Franklin B. left home 1861 for Colorado, remaining in Nevada about ten years, since which time they have not heard from him; Rhoda L., now Mrs. G. S. Whiteher; Roswall D., carrying on the farm; was born Feb. 21, 1838; his wife, Mary J. Kile, born in Canada, Feb. 15, 1843; married April 15, 1874 in Nebraska; they have two children—Carrie and Edward L. Richard S. residing in Waverly, Neb.; Alfred S., residing in Lincoln, Neb.; Timothy M., residing in Lincoln, Neb., engaged with an engineering party; Lewis E., general merchant, Cobb, Iowa Co., Wis. In politics, Democrat; in religion, Free-Thinker; has held the office of Justice of Peace in Ohio and La Fayette Co., Wis.; has held the school offices in this district. Oct. 4, 1880, there were seventeen grandchildren, five great-grandchildren. The *Grant County Witness* says of their golden wedding:

“On Monday, the 4th inst., one of those anniversaries occurred, which but few ever see, the celebration of the fiftieth year of their married life. Yet this event was duly celebrated in Lima, Monday. At 1 o'clock P. M., the hour fixed, there assembled the following persons of the family and invited guests: Uncle Morgan Cooley, of Granby, Conn., a brother some eight years younger than Sherman and the jolliest old Yankee that ever hailed from the ancient lands of the Pequods and Mohegans. He knows all the genealogy of the Cooley and Holcomb family back, away back in the history of Connecticut, well not exactly to Adam, but to the Big Injun, who was scalped in the Fairfield Swamp, in 1764; and if they had any humorous or amusing characteristics, or if any event occurred in their career on which to found a good story, ‘Uncle Morgan’ remembers it; G. S. Whiteher and family, whose wife was the eldest of their children present; R. D. Cooley, wife and two children, of Waverly, Neb.; Alfred S. Cooley, wife and three children, of Eagle, Neb.; L. E. Cooley, wife and child, of Cross Plains, Wis.; Mr. William Beebe and wife; Mr. Lane and wife; J. H. Holcomb and wife, the last three named are cousins to the Cooleys, their mother having been a Holcomb; Mr. E. P. Dickinson, wife and Miss Ina Dickinson; Mr. John Burney and wife, Miss Lima Burney; Miss Ella Dougherty.

“The best of feeling prevailed. Pap Cooley’s face was all over smiles, and Mother Cooley seemed equally happy, while Uncle Morgan, humorous and joyous, told some of his queerest stories. ‘I tell you I was there,’ said he, ‘and, Diana, I thought you was the purtiest gal that ever went into the Granby Meetin’ House. I was at the wedding, I know how they were dressed. Sherman wore a swallow tailed coat, a bell crowned plug hat, and I suppose the accompanying costume of that ancient time. Mrs. Lane says ‘the bride wore a drab colored silk dress, a white belt around the waist, a sash attached, a deep ruffle around the neck and a white silk head-dress.’

“The belt referred to she wore as ornaments on the present occasion, it having turned a golden color by the fifty years intervened.

“It was a joyous occasion, and why should it not be? There is a proverb that ‘It is our privilege to enjoy ourselves in this world, and that if we do not it is our own fault.’ No use of putting on a long

face, and always be in the straight jacket of restraint considering this life a probationary state, making a hell of earth, as Byron says, to merit heaven; living with elongated faces as though the grave was photographed before us, with hell in the background, but let us rather make the best of that which we are sure of, and enjoy ourselves in this world; why, a person can experience plenty of enjoyment after they are fifty years old. I have a strong belief and an abiding faith that there is lots of fun in this vale of tears yet, and expect to see plenty of it or, to say the least, my hopes are very buoyant on that point.

"The cat that sits in the corner and washes its face with its paw and purrs is a better type of happiness than the old cat under the stove, that lays and burns its back, and yeaws and spits at every one that passes. Let us, then, be contented and happy, enjoying ourselves, and those around us will be more likely to, as our course of action on this point is reciprocal and mutual. Fifty years of married life, a half a century, of mutual cares and joys, reciprocal in its experiences for better or worse, happy in the love and society and friendship of their family, and more happy if that life has been agreeable in the society of each other. And as time moves us along as it surely will to last scenes, as life's milestones fly past more rapidly, as the loom of land on the other shore rises to view, our affections, our friendships will be nearer, purer and truer. No jealousies which the aggressiveness of earlier life begets and fosters, when our old heads whiten, our thoughts rise to a higher and more dignified sphere, and we realize the fact that we are friends—we are brethren. How much more firm and enduring than the friendship, the attachment between husband and wife, considering the relation, its fruits, its consequences. If they have endeavored to make each other happy, to please each other, then will they be pleased in each other's society. For the philosophy is based on reciprocal mutuality. And they can look back on the past, so well expressed by Burns.

"There were four of their children present with their families. The eldest daughter, Mrs. Mary Everett, of Cortland, Trumbull Co., Ohio; Richard and Timothy Cooley, of Nebraska, were absent."

JOHN S. DEITZMAN, Sec. 13; P. O. Washburn; was born May 12, 1844, in Pennsylvania; came with his parents to Wisconsin in 1848; settled in the town of Mifflin; at the age of 21 years he left home and worked out, driving team for \$18 per month, then rented a farm and commenced for himself, and continued to rent land for four years, then bought the farm where he now lives, which originally contained 186 acres, but has added to it until he now owns 400 acres; 300 is under cultivation and 100 in timber. Was married to Sarah Ann Miller April 9, 1865, who was born in Sullivan Co., Ind., March 25, 1839; they have eight children, viz., Anderson B., Charles W., Rosa A., Alice M., Elmer F., John A., Perley E., Lula S. Mr. Deitzman has been a member of the School Board eight years; has been a dealer in live stock, and is at present raising and feeding stock on his farm.

E. P. DICKINSON, Sec. 31; P. O. Platteville; was born May 26, 1819, in the town of Johnson, Trumbull Co., Ohio; in early life, he followed the trade of carpenter and joiner; in 1845, he came to Wisconsin, locating on a farm in Harrison. Three years later, he settled in Lima, where he has owned several different farms; has resided on his present farm of 80 acres since 1853; also owns about 100 acres in Ellenboro; was Treasurer of the town of Lima eighteen years, and served twice as Assessor and four or five years as Chairman of the Board of Supervisors; until 1868, he worked more or less at his trade. He married, in Trumbull Co., Ohio, Faney S. Whitcher, who was born in Lisbon, Grafton Co., N. H.; when she was 10 years of age, her people settled in Michigan, and later removed to Ohio. Mr. and Mrs. Dickinson have nine children—Elizabeth, John, Loraine, Samuel, Phebe J., William, Everett, Ina and Charles; four of these, Loraine, Elizabeth, Samuel and Everett, are in the San Juan Valley, Cal.; William is in Arizona, John in Nebraska and the others in Lima.

GEORGE DAILY, wagon-maker, Washburn; was born in Dauphin Co., Penn., Aug. 3, 1826; came to Wisconsin in 1857; resided in Lancaster about seventeen years, then came to Washburn; owns 80 acres of land. His wife, Adelia Carrie, was born in Trumbull Co., Ohio, May 30, 1833; married Oct. 28, 1848; they had eight children—Eleanor, Albert, Isabel, Lewis, Martha (deceased), George, Lyman, Cyrus. In politics, Republican; in religion, a liberal believer.

PERRY FRUIT; P. O. Washburn; was born in Madison Co., Ill., Oct. 26, 1819; continued to live there until 1846, when he came to Grant Co. and bought the farm he now resides upon of the Government, built a home, and has lived here ever since. He was married to Miss Matilda Lampkin, of Madison Co., Ill., in 1841; they have six children living—I. I. (who graduated at the Platteville Normal School and is now practicing law at La Crosse), Nancy Ellen (now Mrs. A. E. Rundell), Martha G. (now Mrs. Brazelle), Henry D. (also a lawyer), Julia N. (now Mrs. E. A. Biddick), and James P., living at home. Mr. Fruit owns about 600 acres of good farming land as the reward of many years of honest toil. He is one of the pioneer members of the M. E. Church here. Assisted in building the first church in the town

of Clifton. Is a staunch temperance man and member of the Good Templars, and has been a member of the Town Board many years.

EDWARD FOULKS (deceased); was born Feb. 14, 1812, in Wales; at 16, he came to America and began work on the Pennsylvania railroads and canals; in 1835, he came to Wisconsin and engaged in the mines about Dodgeville and Mifflin, being one of the first Welsh settlers in what is now Iowa Co.; about 1845, he came to Lima and settled on the farm where he died Dec. 15, 1876. His wife was formerly Ann Burney; they were married in Lima, she having come here in 1845, from Pickaway Co., Ohio, her birthplace; they had seven children—Mary, George, Thomas, Sarah, Ellen, Emma and Ida, all born in Lima. Mr. Foulks was a hard-working and upright man, who earned and left a good farm and home.

SAMUEL FRAIZER, Sec. 19; P. O. Platteville; was born Jan. 27, 1822, in York Co., Penn.; nine years later, his parents removed with him to Wayne Co., Ohio; from there with a brother—William Fraizer—he came to Apple River in 1843; spent eighteen months in the mines and returned to Ohio. In her native county (Wayne), he married Elizabeth Burns, and with her and two children he again came to Wisconsin, in 1851, locating upon his present farm of 141 acres, which he had purchased while in Ohio. The small log cabin stood upon the only cleared acre, and into this Mr. Fraizer moved his family. The thirty years spent here have not been wasted, as may be seen by the homelike farmhouse and capacious barn, surrounded by the well-tilled fields, once a forest. Mrs. Fraizer died Oct. 17, 1865, in Ohio; she left six children—Hector V., Mary E., John J., William C., Thomas J. and Frank E. The present Mrs. Fraizer was Mary J. McClurg, born in Ellenboro, and a daughter of William McClurg, who lives on an adjoining farm in Lima. Mr. and Mrs. Fraizer have four children—Millie M., Louis E., Daisy and Samuel F. The two oldest of the ten children were born in Wayne Co., Ohio, and the others on the Lima homestead. Mr. F. is a Republican, and has been Justice of the Peace, Supervisor, etc.

MILLER FISH, farmer, Sec. 30; P. O. Platteville; was born in Connecticut Aug. 20, 1818. Came to Wisconsin in 1855; a carpenter by trade; bought 40 acres of land; now owns 95 acres and works at his trade. His first wife, Celistra Pritchard, was born in Connecticut in 1816. Married in 1843, died in 1862. They had three children—Colinus, who enlisted in Co. I, 10th W. V. I., in October, 1861; taken prisoner at the battle of Chickamauga; taken to Libby; then to Andersonville, and escaped twice, but was recaptured by hounds when nearly in the Union lines; released from Salisbury Prison at the close of the war. Anson H., in Crawford Co., Wis.; Mary, now Mrs. Meekin Marshall, in Iowa Co. Second wife was Elizabeth Evans, who was born in Ohio in 1828. Married in 1863; they had two children—Samuel E., and Elizabeth J., deceased. In politics, Republican. In religion, liberal believer. Has been Clerk and Director of Schools. The second wife had two children by a former marriage—Eva, deceased, and Joseph, at home.

WILLIAM N. GLENN; P. O. Washburn; was born in Cleveland Co., N. C., Oct. 9, 1816; lived there until he was about 11 years old, when his family moved to Bond Co., Ill., where he lived many years. Here he married Miss Cynthia J. McCracken, whose people moved from Tennessee to Bond Co. Mr. G. has followed farming all his life, and when he came to this county, in 1856, rented the place he now owns for three years; then resided on a place near by, but, for the last seventeen years, has owned the farm he now resides on, consisting of 80 acres, west one-half southeast one-quarter Sec. 13. The farm was originally heavily timbered, but there was about 30 acres cleared when he first rented the place. He has cleared the remainder himself. Mr. and Mrs. G. have had eleven children, seven of whom are now living—Sarah, Washington R., Martha, Eli B., Charlotte V., Philip Lincoln and Cynthia E. Mr. G. has been a member of the M. E. Church for forty-eight years, a local minister for twenty-five years; assisted in forming the M. E. Church in Washburn, and has been a Trustee most of the time since. He has been an active temperance man, uniting with the Washingtonians, Sons of Temperance, Good Templars and Blue-Ribbon men, giving his influence and active sympathy to every effort made to stay the tide of intemperance and promote the cause of sobriety and total abstinence in the community where he lives.

ROBERT C. HALE, Sec. 29; P. O. Platteville; is a son of John and Isabella (McColloch) Hale (see sketch of John Hale); was born March 28, 1848, in Hazel Green, Grant Co., Wis.; came to Lima in 1850, and has since resided here; was for a number of years on a small farm on Sec. 20, and located where he now is in 1873. He married Mrs. Hannah M. (Condry) Reed; she was born in Wayne Co., Ohio, and came to Grant Co. in 1871, with her former husband, William Reed, who died a year later, leaving an only son, James Reed. Mr. and Mrs. Hale have three children—William T., John J. and Jessie May, all born in Lima. Mr. Hale is one of the three owners of a recently purchased portable steam saw-mill, and is at present engaged in operating it in the heavily-timbered districts of Grant Co.

JOHN HALE, Sec. 28 ; P. O. Platteville ; was born March 4, 1815, in Somersetshire, England ; came to America in 1840 ; landed at New York City ; spent some time in the Pennsylvania and Ohio coal mines, and six months in St. Louis. He married at Cannellton, Ind., Isabella McColloch, and, in the spring of 1842, came to Hazel Green, and engaged in mining there until he came to Lima in 1850. Here he bought his present 80-acre homestead farm, then in a state of nature. The first year was spent in a log cabin surrounded by the dense growth of oak, hickory, etc., which originally covered his and all the adjoining land. He has cleared 65 acres of this, and, besides, owns 70 acres on Sec. 29. Mrs. Hale died July 14, 1864, leaving nine children—John P., Margaret C., Robert C., Sarah A., Elizabeth J., Lafayette, Alvin, George T. and Jacob A. The present Mrs. Hale was Sarah M., daughter of Jacob and Sarah Quick ; she was born Jan. 9, 1815, in Neversiock, Sullivan Co., N. Y. Jan. 7, 1834, she married in Caroline Tompkins Co., N. Y., G. A. Graham, who was born June 25, 1815. They removed to Illinois, and, in 1835, came to Platteville, camping-out the night of July 4, 1835, near the site of the city. Mr. Graham went to California in 1849, and died there. He was one of the earliest settlers in Lima, and left six children—Robert, Alexander, William, Maria L., Emma M. and Sarah A. ; Mary J. died before her father went to California. Mr. and Mrs. Hale have a most pleasant home, and look back to pioneer days as times when hardships and privations were cheerfully borne that such a home might be finally secured.

PAUL JEARDON, farmer, Sec. 28 ; P. O. Platteville ; was born at Vincennes, Ind., Feb. 7, 1819 ; emigrated to Platteville, Wis., in 1841 ; a blacksmith by trade, which he continued to follow ; he then removed to Dodgeville in 1847, and remained until 1862, when he entered Co. C, as 31st W. V. I., as private, and elected to First Lieutenant ; mustered out in 1865 ; returned to Platteville, and bought and now owns 140 acres of land ; was burned out Nov. 30, 1871, he then built a fine stone house, and has a beautiful home. His wife, Jane Nettle, was born at Liverpool, England, Feb. 9, 1827 ; came to America with her parents, who settled near Pottsville, Penn., in 1834 ; started for Mineral Point ; her father died at St. Louis, Mo., where the family remained until the next spring, when they came on to the Point, then to Belmont, then to Platteville. They married in 1845 ; they have had thirteen children—Maggie, born Jan. 12, 1846, and now Mrs. Colman ; Richard, born Jan. 10, 1848, freight conductor on the Chicago & Alton R. R., in Missouri ; Frank Preston, born July 1, 1850 ; Charles A., born May 21, 1852 ; Eva J., born June 26, 1854 ; Louis, born July 10, 1856, in Colorado on the railroad as fireman ; Stephen N., born July 24, 1858, in Nebraska ; Kate L., born Sept. 9, 1860 ; Jessie J., Feb. 20, 1863 ; Allen W., born April 1, 1866 ; Lucy A., born Jan. 4, 1869 ; Paul H., born Nov. 16, 1871 ; Helen N., born Dec. 11, 1875. In politics, Republican. In religion, Congregational, is Deacon. Has been Treasurer and Clerk and Director of School ; also Good Templar.

FARNAM JOHNSON (deceased) ; was born in New Jersey Dec. 12, 1802. In 1827, he came to the lead diggings about "Hardscrabble" (Hazel Green), and spent the summer there and at Sinsinawa Mounds. In 1828, he came to Platteville, and began hauling lead for Maj. Rountree ; he was known to have hauled some of the heaviest loads that ever left the place, and was a most expert driver of oxen. During the Black Hawk war, he served with credit, and later went to the Fevre River lead mines. In 1835, he married, at Old Belmont, Miss Amanda Eastman ; she was born May 12, 1812, near Delaware, N. Y. ; her early life was spent in Ohio and Indiana. In 1830, her parents, Moses and Elizabeth Eastman, settled at Belmont ; they were among those who "forted" at Elk Grove during the summer of 1832. After his marriage, Mr. Johnson spent three years on a farm near Horseshoe Bend, Fevre River. In the summer of 1838, he bought of Elijah Mayfield 240 acres, which is still in the family ; during the fall, his wife and himself erected a log house ; apertures for windows and doors were sawed out with a crosscut saw. Mr. Johnson standing on the inside and she outside ; this house stood on the site of that now occupied by Henry W. Johnson, and was torn down to make room for it when the latter married Maria Quimby, of Etna, Wis. Farnam Johnson and wife resided on this farm from Christmas, 1838, until his death, July 6, 1879. He left five children—Mary (Mrs. John Wallace) ; Elizabeth (Mrs. George Clemmer) ; Nancy (now the widow of J. W. Humiston, drowned June 27, 1878, in the Gulf of Mexico) ; Henry W. and Warren ; Henry W. enlisted Aug. 11, 1862, in Co. E, 25th W. V. I. ; served in the Sioux war in Minnesota, through the siege of Vicksburg, and fought under Sherman to Atlanta ; thence marched with him through Georgia and the Carolinas. He was discharged with the regiment June 21, 1865. Is now on the homestead, containing in all 390 acres ; Warren Johnson is also here, as is the widowed mother. The former married Phebe J. Dickinson, of Lima. Mrs. Johnson is the picture of a brave old pioneer lady, and enjoys the comforts of a well-earned home.

F. W. KIRKPATRICK (deceased) ; was born in Madison Co., Ill., Dec. 8, 1808. Went with his brother Jesse to Galena, Ill., in 1826, and in 1827, came to Platteville, Wis. Engaged in min-

ing and smelting lead for ten years; then went to Lake Superior and worked in copper mines; from there went to Missouri; then came back to Wisconsin; stayed here two years and then went to Pike's Peak for one year, after which he returned to Wisconsin, and lived here until his death. Was married to Ann R. Hamilton March 12, 1851, who was born April 14, 1824, at Springfield, Ill.; have had four children, of whom only one is living—Mary Alice, who married Maxwell Fawcett, and now lives at Emporia, Kan.; those deceased are Sarah J., twin sister to Mary A., Francis and Lillian; the two latter are buried at Rock Church Cemetery, and Sarah was buried near St. Louis. F. W. Kirkpatrick died April 2, 1863, and was buried in Rock Church Cemetery. His wife lived for fifteen months after her marriage at Wingville, then moved on to the place where she now lives, and has resided there ever since with the exception of four years when she lived in Kansas. She is a member of the M. E. Church. The homestead contains 140 acres of land.

VALENTINE KRAMER, Sec. 4; P. O. Platteville; was born Feb. 8, 1820, in Prussia; came to America in 1841, landed at New Orleans; spent a winter in the mines at French Village, Ill., and in March, 1842, reached Platteville; engaged in mining at Big Patch, Dodgeville and Bectown; in 1847, he bought 80 acres of his present farm; it was timbered openings, with only log buildings upon it; has cleared some, and added 160 acres, part of which was improved before his purchase. He married Catharine Wonn, of Prussia, in August, 1847; they have eight children—Maggie, Mary, Henry, Valentine, Fannie, Minnie, John and William; all were born in Lima, as was Louisa, who died when 24 years of age. The family belong to the Lutheran Church.

A. V. KNAPP, farmer, Sec. 31; P. O. Platteville; was born in Seneca Co., N. Y., June 27, 1832; came to Wisconsin in 1854; engaged in farming east of Lancaster in 1865; removed to his present place; now owns 260 acres of land; enlisted October, 1861, in the 10th W. V. I., Co. F, as private; mustered out December, 1863, as 2d Lieutenant; member of Good Templars' Lodge. His wife, Laura C. Woldorf, was born in Harrison, Grant Co., Jan. 27, 1844; married Oct. 4, 1864; they have eight children—Fred W., born July 2, 1865; Frank S., Feb. 16, 1867; Sidney D. B., July 23, 1869; Clara L., Oct. 16, 1870; Charles D., Feb. 16, 1873; Jessie E., July 2, 1875; Horace H., Feb. 26, 1877; Arthur V., June 2, 1880, died Dec. 19, 1880.

THOMAS MCKOWN, blacksmith, Washburn; was born in Pittsburgh, Penn., Feb. 1, 1847; learned the trade of blacksmith at Wheeling, Va., then removed to Keokuk, Iowa, was engaged by the United States on the Government works; came to Wisconsin March 22, 1876, and worked for Mr. Harris; enlisted in the 129th Ohio V. I. His wife, Sarah Harsha, was born in Mifflin, Iowa Co., in 1856; married in 1872; they have three children—Elmer, Delia F., Herbert. In politics, Republican; a liberal believer.

WILLIAM McCLURG, Sec. 19; P. O. Platteville; born Aug. 6, 1812, in Mercer Co., Penn. Married Miss Ann Manson, who was born March 7, 1817, in Venango Co., Penn. Engaged in farming until he came to Wisconsin, which was in 1843; they came via the Ohio and Mississippi to Galena, thence to "Whig," where they wintered; the next spring he took up land on Buckwheat Ridge, and was there five years; afterward rented farms for a time, and, in 1843, settled on his present farm of 43 acres; the log house and surrounding forest have given place to cultivated fields and a pleasant frame house. Mr. and Mrs. McClurg have three children—Mary Jane, now Mrs. Samuel Fraizer; James A. and Henry; the two eldest were born in Ellenboro, and the youngest in Lima. Mr. and Mrs. McClurg belong to the Christian Church of Platteville.

JOSEPH O. McREYNOLDS, Sec. 13; P. O. Washburn; was born March 14, 1826, in Bond Co., Ill.; left there with his parents in 1836, and came to Wisconsin and settled on the farm known as the Conklin farm; took poultry and produce to Old Belmont, where the first Legislature was then in session; bought the farm he now lives from the Government; owns 140 acres of land; held office on Town Board in 1879, and has been on School Board thirteen years. Was married to Sarah Glenn, July 18, 1858; have seven children living and two deceased—the former named Walter E., William S., Jessie G., May C., Arthur V., Bertie L., Ethel M.; the latter named Clara E., Joseph L., both buried in the family cemetery on the place. The stone house which they occupy was built on the site where the old log cabin stood which his parents lived in, and has always been a landmark for travelers. He is a member of the Masonic order at Mifflin Lodge, and also belongs to Lodge No. 28, I. O. O. F. When Mr. McR. first came to Platteville, there was only one store kept by Maj. Rountree, and a blacksmith-shop.

JOHN McCLURG, Sec. 19; P. O. Platteville; born in Salem, Mercer Co., Penn., Nov. 16, 1803. Married Miss Jane Manson, of Venango Co., Penn., and came in 1844, to Wisconsin; in May of

that year, they began in a log cabin in the timber that then covered his farm of 60 acres. Mrs. McClurg died Oct. 27, 1856, leaving seven children—Henry, James, Louisa, Martin, Margaret, Albert and John; the two youngest were born in Lima, and the others in Pennsylvania; Louisa is now in Missouri; Henry in Washington Territory, while John is in Highland, Iowa Co.; Albert McClurg died in the Union service, and James, pressed into the rebel army, was killed by his own men. The second wife, formerly Hannah Klingensmith, died Aug. 11, 1879. Mr. McClurg now leases his farm, and will probably spend the remainder of his days here. He is a member of the Baptist Church.

GEORGE MARTIN, farmer, Sec. 7; P. O. Platteville; was born in Grant Co., Wis.; has always been on the farm; now owns 80 acres of land. His wife, Sarah Chilson, was born in Adams Co., Ill.; her parents were old settlers in Wisconsin; her father died in 1869; her mother is now living in Liberty, Grant Co., Wis. Married, Christmas, 1876. In politics, Republican; in religion, believer.

J. W. MORRISON, Sec. 17; P. O. Platteville; was born in New Windsor, Orange Co., N. Y., in 1839; he resided as a farmer in his native county until 1855, then came to Wisconsin, and located on a farm in Iowa Co.; in 1858, he came from there to Lima; in August, 1864, he enlisted in Co. B, 43d W. V. I., and served ten months, or until the rebellion succumbed; in the spring of 1866, he settled on his present farm of 73 acres. He married Miss Caroline, daughter of Luke Moses; she was born in Trumbull Co., Ohio, from whence her people came to Lima in 1855. Mr. and Mrs. Morrison have three children—Wm. E., Carrie W. and J. Percy, all born in Lima, where the parents were married. Mr. Morrison has for the past six years been Town Treasurer of Lima.

ELIAS MEDLEY, Sec. 17; P. O. Platteville; was born in 1810, in Trumbull Co., Ohio. Married Margaret A. Espy, who was born in 1810, in Camberland Co., Penn.; in 1846, they came via the Ohio and Mississippi Rivers to Grant Co.; they began in a log house on 80 acres of the present 200-acre farm. They have seven children—Philo H., a twenty years' resident of California; Cornelia, now Mrs. J. Carson, of Kansas; Robert E. and Alfred, now of Lima; Thos. Jefferson, now in Texas; Jane E., wife of Peter Klingensmith, of Lima, and Mary A., now Mrs. H. C. Haskell, of Lima. Mr. Medley has been a life-long farmer, and is now in broken health, partially caused by the labors and hardships incurred by all early settlers in timbered regions.

LUKE MOSES, deceased; was born in the year 1805, in Canaan, Conn.; when a young man, he removed to Ohio, and married in Hartland, Trumbull Co., Olive Dickenson; she was born Dec. 1, 1810, in Cornwall, Conn., and was 6 months of age when her parents removed to Ohio. Mr. and Mrs. Moses came to Lima in 1855, and settled on the farm where he died May 2, 1861; he left two children—Martin and Caroline. Mr. Moses was an upright Christian citizen, who lived enjoying the confidence of his fellows, and who died enjoying faith in the final reward of his Maker. His aged widow, still in full possession of her faculties, now resides with her only son, who inherited the homestead.

NELSON NEWMAN, Sec. 1; P. O. Washburn; miller; was born in Madison Co., Ill., March 15, 1830; left there with his parents in 1837, and came to Lima, Wis., where they built the first grist-mill in the town in 1840, and built the second mill in the village of Washburn in 1846; ran this till the spring of 1868, when he removed to the site he is now on and built the mill which is now run by the firm of Newman & Wagner. Nelson was married to Louisa Melvin, Dec. 23, 1858; she was born in town of Smelser, Wis., November, 1841. They have six children living—Alice, Jessie, Jefferson, Inez, Frank R., Louisa G. and one deceased, Wilber, who died in 1864 and was buried in Washburn Cemetery. Mr. Newman has been on School Board fifteen years, and on Town Board one year; is also a Mason, of Melody Lodge, Platteville, and is a member of I. O. O. F., Washburn Lodge, No. 128. He is now extensively engaged in raising stock.

A. M. STEEL, farmer, Sec. 22; P. O. Platteville; was born March 8, 1830; came to Wisconsin in 1850, now owns 120 acres of land on which he has made the improvements; his wife was Miss Burney, afterward Mrs. Evans, a native of Wayne Co., Ohio; they married in 1862. In politics a Republican; in religion, Methodist. Has been Clerk and Director of Schools, also Assessor and Pathmaster.

LYBORN WELLS; P. O. Washburn; was born March 12, 1825, in Burlington Co., N. J. His father and mother died when he was 15 years old, and he was left alone to look out for himself; went to Harper's Ferry, on the Potomac River, and worked on the Baltimore & Ohio Railroad for two years, then came to Chicago, and from there to Joliet and worked at the carpenter's trade for the winter, and after that came to Mifflin, Wis., and engaged in mining till the spring of 1850, then went to California and returned in 1852, but went back and stayed one year more; then came back to Mifflin and bought 310 acres of land from the Morehead estate, and farmed it one year, sold it and bought the Morehead Saw-

mill, on Little Platte River, in town of Lima, and run it four years, after which, bought 160 acres of land from Gov. Dewey; remained there two years, and then removed to Washburn, and has lived there since, except two years that he kept a Grange store in Platteville. Was married in 1854 to Emma Pullen, who was born in New Jersey Oct. 3, 1836; have five children—Lorenda, Allan V., Leslie K., May C., Charles. Mr. Wells was Justice of the Peace for three years, also Assessor three years; he kept a store in Washburn at the same time he was farming, and his son Allan was Postmaster.

GEORGE S. WHITCHER, farmer and dairyman, of Lima; P. O. Platteville; was born in Bath, Grafton Co., N. H., May 4, 1830; four years later, his parents removed to Michigan, then went to Ohio, then to Wisconsin in 1845. They located on a timbered farm in Ellenboro. Grown to manhood here, G. S. Whitcher, in 1850, went to California, and was there about six years. During this time, his parents had settled where he now lives in Lima. In 1859, he married Rhoda Cooley, a native of Johnson, Trumbull Co., Ohio. His father died in 1871 on the farm, and the widowed mother in 1875, in Platteville. Mr. and Mrs. Whitcher have five children—John F., Fannie L., Lee, Nora A. and George S., all born in what is now the cheese-factory, then the home of their parents. Mr. Whitcher has a fine farm of 393 acres, originally timbered land, that is fast proving itself equal to the best grass-producing lands of Central New York. He has a herd of twenty or more milch cows, with much other stock, and very large and well arranged barns. In the spring of 1880, he fitted up a cheese-factory, the only one in his town. It has proven a successful venture, and it is his intention to use the milk of 300 cows during the season of 1881; 125 cows furnished the milk for the 23,000 pounds of cheese made here in 1880. Mr. Whitcher has added a new boiler, pump, etc., and evidently means to do a good business.

EDWARD M. WOODARD, Sections 20 and 21; P. O. Platteville; born March 27, 1817, in Steuben Co., N. Y., where he was, in early life, a day laborer. He became cooper's apprentice in Trumbull Co., Ohio, where he settled in 1844; ten years later, he came to Lima and settled on 10 acres of timbered land. He began with scarcely a dollar, and has literally hewed out of the original timber of Lima, a farm of 310 acres. He married Sarah Hake, who was born near Little York, Penn. The two eldest children—John W. and William W., were born in Trumbull Co., Ohio; the others—Elizabeth, Mary, Minerva, Albert, Wilson, Rhoda and Phebe were all born in Lima, where all now live, except Mary, who resides in Ohio. Mr. and Mrs. Woodard have lost four children.

ELISHA WAGNER, of the Washburn Mills. The subject of this sketch was born in Ohio Oct. 9, 1819; emigrated to Wisconsin in 1852; bought 160 acres of land in Clifton; sold and bought a half interest in the mill; also owns 100 acres of land. The mill is one of the best in the county. His wife, Sarah Taylor, was born in Lancashire, England, Aug. 15, 1814; emigrated to America in 1817, with her parents, who located in Ohio, and died there; they were married Feb. 19, 1844; she died April 10, 1878, and left five children—Charles Wesley, born in Ohio Dec. 11, 1846; miller by trade, and employed in the Washburn Mills; William Thomas, born in Ohio Aug. 22, 1848, and now in Kansas; Margaret Elizabeth, Sarah Ann, Mary E. In politics, Republican; religion, Methodist for forty-one years, and held the the offices of Steward, Class Leader and Trustee. Has been Pathmaster, District Treasurer; was Assessor in Ohio. They have a granddaughter, Tillie Draper, who resides with them.

F. G. WOODRUFF, farmer and broom-maker, Sec. 32; P. O. Platteville; was born in Chango Co., N. Y., in 1831; came to Wisconsin in 1844; owns 80 acres of land. His wife, Elizabeth Calloway, was born in Cornwall, England, in 1838; married May, 1860. They have five children—Albert, born Feb. 16, 1861; Eva, June 13, 1862; Elsie, Oct. 9, 1863; Lovillia, Aug. 7, 1864; Jesse, July 20, 1876. In politics, Republican; in religion, liberal believer. Has been School Director, Clerk and Pathmaster. His father died January, 1866; his mother January, 1871.

TOWN OF MUSCODA.

PHILLIP BETINGER, was born in Germany in 1832, where he was educated, and learned the mason trade; came to America in 1850, locating at Galena, Ill.; remaining there six months, came to this county. In 1863, he enlisted in the 2d Wisconsin Battery, and served with them until the close of the war, and mustered out with them in Milwaukee. His home has been in this county since he first came.

MAX BERGMULLER, farmer; P. O. Muscoda; farm contains 80 acres, and is located in Sec. 8, in this town; residence in the village. He was born in Bavaria in 1833, where he was educated, and learned the tanner's trade. After learning his trade, he traveled quite extensively through Europe during six years, working at his trade in different places. He is a son of Simon and Madelina Bergmuller, natives of Bavaria. He came to America in 1853, stopping a few weeks in Milwaukee, and working for Pfuster & Vogle at his trade, then came to Muscoda and bought the farm which he now owns. He enlisted November, 1863, in the 2d Wisconsin Battery, which was attached to the Army of the Potomac. He served with them until the close of the war, and was mustered out at Milwaukee in 1865. In 1856, he married Miss Christina Neff, by whom he has five children, four girls and one son—Ludwig—twenty years old, who assists his father on the farm.

JOHN BIRK, farmer, Secs. 25 and 36; P. O. Muscoda; owns 200 acres of land; was born in Prussia near the Rhine in 1811 (the country then belonged to France); was a son of John and Mary Thomas, who were natives of the same place; he learned the tailor's trade with his father, and worked at it until 21 years old, when he engaged in farming; he came to America in 1853, and located in Mahoning Co., Ohio, where for four years he engaged in coal mining; in July, 1865, he came to Muscoda and bought the farm where he now lives. He was married in the old country in 1839, to Miss Louisa Heints. They had three children, two came to this country with him; she died in 1845; in 1846, he again married Miss Margaret Baker, by whom he had one child born in the old country, and eleven in this; one son, Peter, enlisted in the 15th Ohio Battery, and served with it during the war, participating in fourteen battles, he was but a little over 14 years old when he enlisted. Mr. Birk has been an energetic, successful business man.

JAMES A. BLACK, Muscoda; was born in Montgomery Co., Va., in 1837, on the farm of his parents, Alexander and Elizabeth (McDonald) Black, who were both natives of Virginia, and whose ancestors were among the earliest settlers of that State; his great-grandfather was born in the North of Ireland, but emigrated to Virginia when quite young. Mr. Black came to this State with his parents in 1854; they bought and located upon a farm in Richland Co., where his father died in 1874, aged 74, being born in 1800; his mother died six years later, 1880, also 74 years of age. Mr. Black engaged in farming and milling in Richland Co., and during the year 1871, built the Ithaca Mills, which he conducted for eight years, which he then exchanged for a farm in this town, upon which he moved and lived for two years, when he moved his family to this village. Mr. Black has always been in active life, and has accumulated an estate by his own persevering industry.

G. BOCK, farmer, Sec. 33; P. O. Muscoda; was born in 1830 in Germany; son of Sebastian and Magtelina Bock; came to the United States in 1852; located in Pennsylvania for one year; then removed to Illinois, remaining but a short time, after which he came to Grant Co., Wis., in 1855. He married, in 1860, Christena Ramma, daughter of Mickle and Catharine Ramma, by whom he has had eleven children—Joseph V., Lina, Mary N., Catharina, Elizabeth, John, Mattilda, Anna, Emmie, Ida and Otto. He has been School Director three terms, and Road Overseer one term. In politics, he is a Democrat, and in religion, a Roman Catholic. He owns 200 acres of land.

JACOB BREMMER, of the firm of Graham & Bremmer; was born in Prussia on the Rhine in 1842, and came to America with his parents July, 1847; in 1848, they located at Mineral Point; in 1866, he came to Muscoda and embarked in the mercantile business and in buying grain, stock and all kinds of produce; in 1870, he built a steam elevator. He was married in Muscoda in 1867 to Miss Matilda Drone; they have four children—three sons and one daughter. They are members of the Roman Catholic Church. He has held several town offices, and is a successful business man, and self-made.

THOMAS R. CHESEBRO, Superintendent of toll bridge over the Wisconsin River, Muscodia; was born in Stonington, Conn., Dec. 19, 1825; came to Platteville, Wis., in September, 1836; his first business education commenced with Isaac Hodges, at Platteville; first came to Muscodia in 1855, and engaged in the mercantile business until 1861, when he was appointed Under Sheriff, which position he held four years; was then appointed Postmaster at Lancaster, which position he filled creditably for almost seven years; returned again to Muscodia in 1873, and was appointed Superintendent of the toll bridge, which position he still holds; in an early day, he volunteered to go to the Mexican war, and was changed into the Dodge Guards to gather Indians, guard and remove them; this was in 1847; was in the 41st W. V. I., Co. A; enlisted in 1863 in the 100-day service, was mustered out at expiration of time. Married in 1850, to Miss Eliza J. Wiley, a native of Pennsylvania, by whom he has one son. Mr. Chesebro is a prominent member of I. O. O. F., an active citizen in all matters pertaining to the welfare of the community; outspoken and honorable in his dealings; what he has made was by his own personal industry.

P. A. DAGGETT & SON, loan and insurance agency, Muscodia. Pliny A. Daggett was born in Massachusetts in 1843; came direct to Wisconsin in 1856, and located in Iowa Co., where he engaged in farming up to the time of moving to Muscodia, and engaging in the insurance business, which was in 1873. His business has gradually increased to its present mammoth proportions, viz., \$10,000 per year. His duties became so arduous, he was obliged to take his son, Floyd L. Daggett, into partnership with him in 1880. They represent twelve of the best fire and life insurance companies in the county, and make a specialty of loans on farm mortgages. By square dealing and strict attention to business they justly merit their constantly increasing business. P. A. Daggett was married in Iowa Co., to Miss Margaretta L. Floyd. Her father was one of the earliest settlers of Iowa Co., having moved there in 1832. They have one son—Floyd L., born in December, 1862. He has held the office of Assessor for two years; was the clerk of the first high school in Muscodia, and took an active part in organizing the same. Is a member of A., F. & A. M., of which lodge he is Master for the second term. Is also a member of the I. O. O. F., and was installed as Noble Grand Jan. 14, 1881. He has always taken an active part in all matters pertaining to the welfare of the place. He is Democratic in politics; is a self-made man.

CHARLES H. DARLINGTON came to Muscodia from Illinois in November, 1874, and, in partnership with H. W. Glasier, then a resident here, issued the first number of a four-column quarto (neutral in politics), the *Muscodia News*, on December 5. On the 1st of January, 1876, Mr. Glasier sold his interest. In August, 1876, the *Skirmisher*, a small campaign paper of editorial matter, was begun, and continued through twelve issues. About November was begun an educational journal, the *Educator*, which reached a circulation of nearly five hundred. March 1, 1877, the *News* was enlarged to a seven-column folio; May 1, 1877, it was suspended, and July 4, the *Educator* made its last appearance. September 1, publication of the *News* was resumed (a Republican paper), four column folio, printed at home. In January, 1878, the form was altered to a six column folio, and Christmas Day, 1880, it was first issued as a five column quarto.

FRANK A. DAVID, of the firm of David & Woodward, druggists, Muscodia; was born in Iowa Co. in 1855; is a son of Isaac David and Cecelia Rouark, who were among the early settlers of Iowa Co. He learned the trade of druggist, and was educated at Platteville; established his present business in 1874; was appointed Pastmaster in 1876, just at the age of 21 years, and has held the office acceptably to the public ever since. In 1875, he was married to Miss Ella Jameson, of Rock Co., by whom he has one daughter. Mr. David is a staunch Republican, enterprising, and a first-class business man. The firm carry a large stock of drugs, groceries, and, in fact, everything that is called for, making a specialty of wall paper, etc.

P. J. DELANEY, saloon and billiard hall, Muscodia; born in Ireland, County Wexford, in 1836; came from the old country in 1853, and located in Janesville, Wis.; came to Grant Co. in 1859, and located in Muscodia. He was in the employ of the Milwaukee & St. Paul Railroad previous to starting the present business, which he established in 1871. In 1859, he was married to Miss Katherine James, a native of Ireland, by whom he has three children—two sons and one daughter—all living at home. The family are all members of the Roman Catholic Church of Muscodia. Mr. Delaney has always been a hard worker, and has built up around him a nice property, and has a flourishing business.

A. C. VANDERWATER ELSTON, of the firm of Elston & McIntyre, general store, and dealers in live stock, railroad ties, etc., Muscodia; was born in Unionville, Orange Co., N. Y., Sept. 9, 1845. He is a son of S. B. and Hannah E. Myers, both natives of New York, and whose ancestors were among the earliest settlers of that State. In 1855, they came to Muscodia, where he bought the Wisconsin House, and kept the hotel for fifteen years; then bought a farm in the town of Eagle, Richland Co.,

and retired from the hotel business. He died in the war of 1879. H. C. V. Elston came to Muscoda with his parents in 1855, and lived with them until 1863, when he engaged as clerk in the store of McDonald & Graham, where he was employed four years, when he went to Chicago, and took a course in the Commercial College of Bryant & Stratton; returned to the employ of McDonald & Graham, where he remained until the spring of 1867, when he engaged with the Merchants' Union Express Co. at Milwaukee as private secretary for the General Manager, H. B. Honsdale. Returning to Muscoda November of the year, he went into business as partner with Peter B. McIntyre. The copartnership continued for ten years, under the firm name of McIntyre & Elston, when Mr. McIntyre retired from the firm, transferring his interest to his son, since which time the firm has been McIntyre & Elston. He was married, Dec. 16, 1864, to Miss Juliana Lane, who was born in Platteville, and a daughter of Henry C. Lane, who came to Platteville from Warren, Ohio, in 1837, first engaging in blacksmithing, after the hardware business. He retired from business thirteen years ago. Mr. E. has two children—one boy and one girl. He has always been in active business life, and accumulated his estate by his own persevering industry.

GEORGE R. FRANK, Muscoda; was born in the town of Gray, Cumberland Co., Me., May 2, 1824. Attended the common school, also the high school at Gray's Corner and Westbrook Seminary; taught school four winters in Maine, commencing at 17 years of age. Left home in March, 1845, went to Boston; thence to Buffalo, N. Y., and, in September, to Chicago; thence to Galena, and from there to Benton, La Fayette Co., and taught school during the winter. In the spring of 1846, came to Grant Co., and engaged in teaching, speculating and farming till 1875, and then purchased a farm just over the line in Iowa Co. Has a farm of about 500 acres, and is engaged in stock-raising. In 1848, married Matilda Price in the town of Harrison, Grant Co.; she was born in Indiana, and came to Grant Co., with her parents, in 1836, when she was but 6 years old; her parents, Zachariah Price and Elizabeth Price, live at Mankato, Minn., and are engaged in farming. Have seven children—Alpheus E., attorney, Deadwood, Dak.; Charles E., broker, Virginia City, Nev.; Florence C., wife of Charles J. McKittrick, merchant, Muscoda; Noma E., William E., George E. and Freddie are living at home. Has held the offices of Town Clerk, Town Superintendent of Schools, Justice of the Peace, Town Supervisor and member of the County Board of Supervisors. Has been Deputy U. S. Marshal, Deputy U. S. Collector and Assistant Assessor of Internal Revenue. In August, 1862, raised Co. B, of the 33d W. V. I.; was chosen Captain and commissioned Aug. 16, 1862, and served three years; was commissioned Major of the regiment Feb. 4, 1865, and mustered in as such at Spanish Fort, Ala., April 5, to take effect March 2, 1865; was in all the battles and skirmishes in which the regiment was engaged, including the battle of Coldwater, siege of Vicksburg, Red River expedition, battle of Tupelo, battle of Nashville and siege of Spanish Fort; was in the charge that broke the rebel line in the first day's fight at Nashville; was wounded while leading the advance on Spanish Fort. His father Alpheus Frank, died in Portland, at the residence of his daughter Mrs. Eliza Haskell. He was one of the substantial farmers of Gray, a man of the strictest integrity, of quiet and unassuming manner, and was held in high esteem by a large circle of friends and acquaintances. He passed his life in Gray, and there reared a large family.

VICTOR FAYANT, of the firm of Fayant & Happler, Muscoda; carrying on butchering business; was born at Tallahassee, Fla., in 1840. He is a son of Bartholomew and Elizabeth Becker, who were natives of France; when 2 years old, he moved with his parents to New York, and afterward to Schuylar Co., Penn. During the winter of 1857 and 1858, they came to Muscoda. He was married in 1865, to Miss Eleanor Sterling; they have six children.

GEORGE F. GAY, physician and surgeon; was born in Clayton Co., Iowa, May 12, 1848; is a son of John M. Gay, deceased, who first saw the light in the Shenandoah Valley, in Rockbridge Co., Va. He was by profession a civil engineer, and finished his education in Richmond, Va., during the years 1816, 1817 and 1818, and was employed by the Government twenty-five years, during that time surveying nearly all of the Northwestern country. His ancestors were natives of the North of Ireland, and three brothers—John, James and Robert—emigrated to America in the year 1730; they landed in Philadelphia, and settled as farmers in the interior of Pennsylvania, where they remained until the year 1740, when they moved to Virginia and settled on the north bank of the James River. The descendants took an active part in the Revolutionary war, and the father of John Gay was commissioned a Lieutenant at the commencement of the war, and served until its close. John Gay, although he was born, lived and educated in a slave State, was a decided Abolitionist, and strongly advocated those principles. He was an exemplary Christian, and for fifty years was a Ruling Elder in the Congregational Church; he died in February, 1878, at the ripe age of 81. He served in the Black Hawk war with the rank of Major, and fought by the side of Abraham Lincoln (who held the rank of Captain), at the battle of Bad Ax. He and Mr. Lincoln

were warm personal friends for many years. His wife's maiden name was Sarah Thomas; her ancestors had lived in Virginia for several generations; she also was born in Roekbridge Co., Va. Dr. George F. Gay, at the age of 10, came with his parents to Crawford Co., Wis.; where he remained for ten years, when he commenced the study of medicine. He graduated at Rush Medical College, Chicago, Ill., with the class of 1875 and 1876; after graduation he located at Bloomington, where he practiced his profession for three years, and married Miss Minerva Woodhouse. He came to Museoda in March, 1880, where he has since practiced his profession.

JOHN GEYER, physieian and surgeon, Museoda; born in Austria July 31, 1846; he is a son of Lorenzo and Anna (Krater) Geyer, both natives of Austria. He received his preliminary education in the old country, and pursued his medical studies at the College of Physicians and Surgeons in New York City, and graduated at Wooster University, Cleveland, Ohio, Feb. 24, 1876. He first located, after graduating, at Allegheny City, and remained there until 1878, when he moved to Lawrence, Mass., where he engaged in his profession until 1880, when he came to this State, and located at Platteville, remaining there but a short time, when he came to Museoda. He came to America in 1866. He was married in May, 1870, to Miss Lina B. Mueller, of Pittsburgh, Penn., her father being an old physician there, and with whom the subject of this biography was associated for six years previous to his graduation. They have three children—one boy and two girls.

T. J. GRAHAM, of the firm of Graham & Bremmer, general merchants, grain and live stock dealers, Museoda; was born in New York State in 1832, and came to Wisconsin in 1836 with parents, who located at Platteville, Grant Co.; he first worked on a farm and then went to California in 1849, and afterward returned to Richland County; came to Museoda in 1864, and established the mercantile business, which he has followed so successfully. In 1853, he was married to Miss Mary E. Sharpe, a native of Indiana, by whom he has four children—two sons and two daughters. He has been Chairman of the Town Board and was in Legislature in 1877; is a prominent member of A. F. & A. M.; has been a merchant for thirty consecutive years, and what he has made was by his own hard work. The firm do the largest business on the line, running three warehouses besides their large store and stock business.

HERMAN C. GROTE, of the firm of Grote & Unbrager, planing-mill and manufacturer of all kinds of furniture, Museoda; was born in Westphalia, Prussia, Oct. 6, 1830, where he was educated. He came to America in 1847, and located first in Milwaukee, where he worked for Mr. Schenek at the furniture business (who is now in the same business in Milwaukee), three weeks for 95 cents; he then went to Galena, Ill., where he learned the trade of cabinet-making and turning, remaining there until 1854, when he came to this State and located in Platteville, where he worked at his trade, and in February, 1855, he came to Muscoda and established the cabinet and turning business. He married in 1854, at Platteville, Miss. Jane Mann, a native of England. They have seven children; the oldest son is now engaged in the carpenter trade at Viroqua.

THOMAS HARKINS, physician and surgeon, Museoda; is a son of William and Axye Rosenerans, who were natives of Susquehanna Co., Penn., where Thomas was born. His father was a drover, which was his principal business; was also engaged in farming. The Doctor spent his childhood under the paternal roof, and read medicine with Dr. Partridge, of Montrose, Susquehanna Co., Penn., and graduated at the old Jefferson Medical College of Philadelphia, which was established by William Penn. In 1850, he came to this State, and located at Hudson, St. Croix Co., and engaged in practice with Dr. R. Hayt, where he remained until November, 1854. His health failing, he came to Lancaster, Grant Co., where he followed his profession until the spring of 1856, when he came to Museoda. In the fall of 1864, he enlisted as high private in the 44th W. V. I.; the following March, was promoted to Surgeon of the regiment, with the rank of Captain, and was mustered out with the regiment Aug. 28, 1865. In 1866, he located at Highland, Iowa Co., and resumed practice, where he remained until 1874, when he started on a tour through the West, and traveled through Kansas, the Indian Territory, Arkansas, Missouri, and for six weeks through New Mexico, returning to Museoda in 1880, and resumed practice.

MORITZ HONER, farmer; P. O. Museoda; owns 240 acres of land on Sec. 22, also 40 acres timber. He was born in Wurtemberg, Germany, in 1832, where he was educated, and learned the trade of shoemaker, at which he worked eighteen years before coming to this country. His father's name was John, who was born in the same town, and trade that of shoemaker. His mother's maiden name was Mary Schmidt, who was also a native of the same town. Moritz Honer came to America in 1857; he worked at his trade a few months in Milwaukee, then came to Museoda, and worked at his trade seven months; then went to Avoca, and established business for himself, which he conducted for eight years,

when he bought the farm upon which he now lives. He has served the town as Supervisor, School Commissioner and Road Commissioner. He was married October, 1858, to Miss Adeline Paffenrath, who was a native of Germany, and by whom he has nine children—four boys and five girls—all living at home. Has always been in active life, and accumulated an estate by his own persevering efforts and industry.

ABRAHAM JACKSON, teamster; P. O. Muscoda; was born Feb. 25, 1833, in Lancashire, England. He is a son of John and Sarah Jackson. His parents came to the United States when he was but 14 years of age, locating at Ft. Winnebago, Columbia Co., Wis., where Mr. Jackson remained fifteen years. He then lived in Vernon Co. for one year, going thence to Castle Rock, Grant Co., where he lived until 1881. He then came to Muscoda, where he lives at present. He was married, in 1864, to Amelia Bowden, daughter of John and Mary Bowden. In politics, Mr. Jackson is a Republican.

NELSON A. McCALLISTER, general hardware store and dealer in agricultural implements, Muscoda; born in Putman Co., Ohio, and came to Wisconsin with his parents in 1850. They located on a farm in the town of Pulaski, Iowa Co., where his parents now live. He came to Muscoda in 1869, and established his present business. He enlisted Aug. 14, 1862, in Co. A, 33d W. V. I.; served with the regiment during its term of service, and mustered out with them at Vicksburg Aug. 9, 1865.

ALFRED J. McCARN & CO., bankers, established 1874. Alfred J. McCarn was born in Wayne Co., N. Y., March 27, 1838; is a son of James and Margaret Failing, both natives of New York State, and whose ancestors settled in the State near New York City, before the Revolutionary war. The great-grandfather of Alfred J. belonged to the New York militia when the Revolutionary war commenced, and fought for the cause of American independence. In 1856, the family moved to Davenport, Iowa, where Alfred remained until the autumn of 1857, when he came to Platteville and engaged as clerk in the Bank of Grant Co. (which was one of the old State banks), which position he held until 1860, when he bought a small book store, and engaged in the book and stationery business. He enlisted April 21, 1861, in three months' service; the company not being accepted unless for three years, he returned again to business, and again enlisted Aug. 14, 1862, in Co. A, 33d W. V. I., and was appointed Quartermaster Sergeant, in which capacity he served until February, 1865, when he was promoted to Quartermaster of the regiment. He was mustered out with the regiment at Vicksburg, Aug. 9 1865. He was married in January, 1868, to Olive McGonigal, a native of this county, by whom he has two children—one boy and one girl. His father was born in February, 1801, and died near Anamosa, Iowa, October, 1880.

S. C. McDONALD, of the firm of Swingle & McDonald, dealers in hoop-poles, shaved hoops and box-straps, Muscoda; was born in New York in 1831; came to Wisconsin in 1855, and located in Grant Co.; built fifteen miles of the railroad west of Muscoda in 1856 and 1857. Has held office of Chairman of the town for three terms; Justice of the Peace at present, and Town Clerk one year; had charge of railroad, buying wood and ties, up to the time it changed hands. He was married in 1854, to Miss Elizabeth Hopkinson, a native of New York, by whom he has two sons, one in the St. Paul railroad office at St. Paul, Minn., and the other is attending school at Madison. He is a prominent member of the A., F. & A. M., an active business man, and has always been identified with matters pertaining to the welfare of the place. The firm ship five million hoops and poles per year, mostly to the Minneapolis mills. It is one of the main industries of the place.

PETER B. McINTYRE, stock-dealer, Muscoda; born in Bucks Co., Penn., July 8, 1819; when 4 years of age, he moved with his parents to Ithaca, N. Y., where they remained until 1832, when his father died; the family then moved to Warren, Trumbull Co., Ohio. In 1844, he came to Platteville, Grant Co., where he engaged in blacksmithing, having learned the trade at Warren, Ohio, remained there two years, and returned to Warren, Ohio, and married Miss Martha A. Elston, the 4th of June, 1846; returning the same year to Platteville, established the blacksmithing business in company with George Hawley, engaged in the business five years; then came to Muscoda and started a livery stable, which he conducted three years, and sold the business to William Johnson; during that time he had established a blacksmith and wagon shop, which, in connection with his brother, John B., he conducted three years, and retired from the business and engaged in farming, in which he continued until 1867, when he opened a general store at Muscoda, the old town by the river, which he conducted in connection with his farm. In 1867, he took his nephew, A. C. V. Elston, into partnership in the store, which they continued until 1877, when he gave his interest to his son and only child, Robert B., and the firm name was changed from McIntyre & Elston to Elston & McIntyre. Mr. McIntyre then retired and turned his attention to deal-

ing in stock, his present occupation. He has held nearly all of the town offices, and has been a respected and successful business man in the community in which he lives.

WILLIAM W. McKITTRICK & SON, general store, dry goods, groceries, hats and caps, etc., Muscoda; was born in Morgan Co., Ohio, May 10, 1828; is a son of William and Alice Funda; his father, a native of Pennsylvania, a farmer; William was educated and lived on the farm until 1855, when he came to this State and located at Springville, Vernon Co., where for two years he worked in the flouring-mill of Graham & Sons, and then moved to Crawford Co., and bought a farm, where he lived until the spring of 1865, when he sold his farm and moved with his family to Missouri. In the spring of 1866, owing to ill health of his family, he sold out and came to Muscoda and established his present business, and erected the building which he now occupies. In 1868, he built a warehouse, and, in 1871, an elevator; since that time, has engaged in grain and live-stock trade. In 1850, he married Miss Mary A. Crider, a native of Ohio; they have three sons and a daughter living. His sons assist in the business; has always been in active life, and accumulated his property by his persevering industry. In addition to his business he owns two farms, one (of 160 acres) in Castle Rock, Grant Co., and one (of 136 acres) in Eagle, Richland Co., both of which are worked under his personal supervision.

H. F. McNELLY, attorney at law and Notary Public, Front street, rear of printing office, Muscoda; was born in Richland Co. in 1854; is a son of Henry McNelly, M. D., of Muscoda; received his education at Madison, and established himself in present business in September, 1877; practices in the whole district, which includes five counties, and also in Supreme Court; the youngest attorney in Grant Co.; is a member of the I. O. O. F., has passed all the chairs, at present Past Grand; has always been in active life, and is a self-made man.

MASSMANN BROTHERS, engaged in blacksmithing, wagon and carriage manufacturing, Muscoda; Henry, the oldest, was born in Pomerania, Prussia, June 16, 1842; is a son of Ernst and Lina (Wedon) Massmann, both natives of Prussia, where his father engaged in farming; Henry learned his trade in the old country, and came to America in 1869, and stopped first in Muscoda, afterward worked at his trade in Richland Center, Prairie du Chien and Chicago; returning to Muscoda, established their present business in connection with his brother and Mr. Schumaker. He married in 1875, Miss Caroline Schumaker, a native of Germany, by whom he has five children—four girls and one boy. Ernst Massmann was born in Pomerania, Dec. 25, 1844, where he also learned the trade; he was three years in the army, from 1865 to 1868; came to America with his brother. Was married in 1873, to Louisa Rux, by whom he has one boy; his wife died Dec. 5, 1874. On Nov. 30, 1876, he married Marie Mueller, by whom he has three girls.

FRANTZ X. MARKT, farmer and stock-raiser, Secs. 31 and 36; P. O. Muscoda; was born in Wurtemberg March 11, 1819; he is a son of Joseph and Cresinsia (Blessing) Markt; his father's occupation was that of cooper and brewer, and for six years was brewer for King Wilhelm First. Mr. Markt lived with his parents until he was 14 years old, when he was apprenticed to learn the trade of clock-maker; after he had learned the trade, he commenced business for himself, and traveled through Austria, Italy and Switzerland, selling his goods; the first clock he sold, he made himself, it was in twelve pieces, and he traveled some 200 miles before he made the sale, and finally sold it near the Austrian line for \$1.20; his clocks were called the Schwabswald clocks; that was his first start in the business; he made his own goods and peddled them himself, conveying them upon his back and selling them for \$1.26 each; he came to America in 1840, locating first in Jersey, remaining a short time he went to Pennsylvania; not finding employment at his trade, he engaged to work on the Baltimore & Ohio Canal, which was then being built; he afterward moved to Center Co., Penn., where he was employed for four years as a hostler. In 1845, he was married to Miss Katie Fletcher, whose ancestors were among the early settlers of Pennsylvania, and participated in the Revolutionary war; in the fall of 1846, they came to this State, and located at Mineral Point, where, during the winter, he engaged in watch and clock repairing; during the year 1847, he located on the land upon which he now lives; he has held the office of Justice of the Peace, and also been a member of the Town Board; they have had ten children, seven of whom are living, and five married, the two youngest; Charles and Amanda, live at home. Mr. Markt has been a very persevering, energetic, industrious man, and accumulated an estate through his own personal efforts.

OLIVER P. MANLOVE, farmer and stock-raiser, Sec. 22; P. O. Muscoda; was born in Russell, Ill., Sept. 12, 1831, and was one of the first children born in that village; he is a son of Moses and Elizabeth (Huff) Manlove, who died at the age of 28, in the year 1841. His father is now living and is 76 years of age. He is a native of North Carolina, and located in Illinois in 1824 and engaged in

farming and milling. He moved his family to this town, and entered the land upon which he now lives with his son Oliver, and where Oliver has always lived, with the exception of about six years. In 1854, he went overland to California, being five months on the road; during his sojourn there he was engaged in mining. He returned in 1857, and came by water, taking passage in the *Central America*, which was wrecked during the passage, off Cape Hatteras, having on board some five hundred passengers, only forty-nine of whom were saved, and they were fortunately picked up by the Norwegian bark *Hellm*, loaded with logwood, and bound for Falmouth, England; Mr. Manlove was one of the forty-nine that were saved. The *Central America* was commanded by Lieut. Herndon, who refused to leave his ship and sank with her, and has been greatly commended for his bravery. Mr. Manlove entered the army in December, 1863, and was assigned to Co. H, 37th W. V. I., participating in the battles of the regiment until the close of the war; was taken prisoner at the blowing up of the rebel fort in front of Petersburg, July 30, 1864. He has engaged somewhat in literary pursuits, and has contributed to several journals, among which are the *Waverly Magazine* and *New York Weekly*. He was married, Nov. 3, 1867, to Miss Carrie Carell, by whom he has two boys—Norman C., the oldest, aged 11, and Howard P., aged 4. Has served the town as Assessor two years.

GEN. J. B. MOORE, Muscoda. Gen. Moore was born in Posey Co., Ind., March 14, 1825. His early years were passed in the place of his birth. In 1837, his parents removed to what was then the Territory of Wisconsin, settling near Muscoda. During his youth, he received a common-school education, completing his studies at the Platteville Academy during the years 1843–44. In 1853, Mr. Moore opened a store at Muscoda, and continued in mercantile pursuits for some time. He served in the Legislature of 1860 as member of the Assembly for his district, and, the succeeding year, was elected Sheriff of Grant Co., making one of the most popular officials that had held that office. During this interval, the great war of the rebellion had broken out. Recruiting had been actively going on from the first throughout the county; and, at one time, it was intended to form a Grant County Regiment, to be composed, rank, file and field officers, of the inhabitants of this county. Prominent among those whose names were mentioned for appointments in the proposed regiment was Sheriff Moore. Circumstances prevented the consummation of the project; but, upon the formation of the 33d W. V. I., the colonelcy was tendered to Mr. Moore, and accepted by him, the commission bearing the date of Aug. 30, 1862. On the 8th of September, he was commissioned Post Commandant at Camp Utley, Racine, at which place the companies composing the Forty-third were ordered to report. Col. Moore took command of the post on the 29th of September, and commenced at once preparing his regiment for the field. The regiment soon after left for the South, and, upon arriving at Memphis, Tenn., Col. Moore was detached from his regiment, and assigned to the command of the Third Brigade. Upon the transfer of the Thirty-third to the Fourth Division, at the request of Gen. Lawman, Col. Moore once more assumed command of his regiment. In March, 1864, Col. Moore was ordered to assume command of the First Brigade of Gen. Kilby Smith's Division of the Seventeenth Army Corps. With his brigade, Col. Moore took part in the ill-fated Red River expedition of that year. Upon the organization of the detachment of the Army of the Tennessee in December, 1864, Col. Moore was assigned to the command of the Third Division. In the January following, he was relieved from the command upon the return of Gen. Kilby Smith. In the order announcing the change, the Commanding General took occasion to say: "In relieving Col. Moore, the Major General Commanding desires to express his high appreciation of the able, thorough and soldierly manner with which he has executed the trust confided to him in this command." He was, however, soon after returned to the command of his old division. On the 17th of August, Col. Moore was relieved by Gen. Carr, the former being assigned to the command of the First Brigade. While in command of this brigade, he took part in the attack on Mobile and Spanish Fort, leading the charge against the latter in person. A little later, he was ordered to Vicksburg, where he was mustered out Aug. 9, 1865. During his term of service, Col. Moore participated in three sieges, nine battles and eleven skirmishes. He was twice commissioned Brevet Brigadier General. The first commission bearing date April 7, 1865, for gallantry at the battle of Nashville, where he commanded the Third Division Detachment of the Army of the Tennessee. The second commission bore date April 9, 1866, being issued "for faithful and meritorious services during the campaign against the city of Mobile and its defenses." Upon his return from the South, Gen. Moore located at Muscoda, where he soon after erected the bridge across the Wisconsin River at that point, an undertaking which marked the turning-point in Muscoda's commercial history. Gen. Moore is at present the owner of a large amount of real estate, in and about Muscoda, which, with operating of his bridge occupies the greater portion of his time. In the political questions of the day, the General takes a deep interest, being a thorough and consistent Republican. Endowed with a kindly, generous nature, affable and public spirited, Gen. Moore is a noticeable figure among the many prominent men of Grant Co.

WILLIAM NORTHEY; P. O. Muscoda; farmer of 360 acres in Sec. 14; he was born in Cornwall, England, Feb. 19, 1836; he is a son of Robert and Martha Edwards, both natives of Cornwall; he came to America with his parents in 1840; they located at Greenville, Mercer Co., Penn., where his father engaged in farming and copper mining. They remained there until 1854, when they came to this State. William, preceding them two years, had entered some land in the town of Millville, upon which they located. His father died in 1856, and his mother in 1859. William engaged in the butchering business at Platteville until 1859, when he went to Lancaster and kept the old United States Hotel; also carried on the butcher and provision business there until 1863, when he went to Woodman in the employ of the old Milwaukee & Mississippi Railroad; he remained there one year and went to Boscobel, where he was employed by the Milwaukee & Prairie du Chien Railroad as telegraph operator; was also express agent; remained there until 1869, when he came to Blue River, where he was station agent and operator until Dec. 7, 1879, when he resigned and took charge of the farm where he now lives. He was married, Feb. 2, 1851, to Miss Martha J. Simpkins, a native of Pennsylvania, by whom he has six children; she died May 20, 1868. On Oct. 6, 1869, he married Miss Cornelia Simpkins, by whom he has six children, in all eight boys and four girls; one son and one daughter are married. His oldest son, Louis Henry, is in the employ of the Chicago, Milwaukee & St. Paul Railroad, as clerk and operator at Minneapolis. Thomas C. is in Nebraska, engaged in farming. While living in Waterstown, was twice Chairman of the Town Board.

DR. JOSEPH E. PEBBLES, surgeon and mechanical dentist, Muscoda, was born in Cortland Co., N. Y., in 1846. Graduated at New York College of Dental Surgery, in 1873, and established practice at Marathon, Cortland Co., N. Y., where he remained until he came to this State, in 1875, and located at Spring Green, remaining there until he came to Muscoda. He is a practical engineer, also pattern maker, in fact, a natural-born mechanic. He did the fancy woodwork for the bank in the Smalley House, also made the patterns for the lathes for the new building of the Elgin Watch Factory. Enlisted Sept. 14, 1864, in Co. G, 185th N. Y. I., joined the Army of the Potomac and was first engaged in the battle at Hatber's Run, and was wounded in the arm; the ball still remains in his arm. Participated with the regiment in nine engagements, and mustered out with them at Syracuse, N. Y., at the close of the war. He is a son of Joseph C. and Diana Campbell Peebles; his father was a native of Vermont, and mother of New York. He was married April 15, 1866, to Elizabeth T. Gray, of Cortland Co., N. Y., by whom he has two sons.

JOHN D. PFLEISTERER, owner and proprietor St. Charles Hotel, corner Wisconsin and Walnut streets, Muscoda, was born in Wurtemberg in 1831. He is a son of Philip and Catherine Mueller Pfeisterer, both natives of Germany. His father was a soldier under Napoleon during the campaign in Russia, with the rank of a non-commissioned officer. John D. was educated and learned the butcher's trade in his native place; he came to America in 1852, and located in Cincinnati, where he remained two years, then came to Champaign Co., Ill., where he worked for Frank Cass, farmer and stock-raiser, for ten years; then he came to Muscoda in 1865, and bought the old Muscoda Brewery, and carried on the business until 1869, when he sold the brewery to John Postel, and bought the hotel he now occupies. In 1857, he married Miss Elizabeth Hus, by whom he had three children, who are all deceased, and his wife died in 1863. The same year he married Miss Anna Meyer, a native of Bohemia, by whom he has one girl. He has always been in active life, and accumulated by his own economy and industry.

JOHN J. POSTEL, brewer, Muscoda, born in Florida in 1842. Came to Wisconsin in 1857 and located in Muscoda, purchased the brewery in 1869, and remodeled the same. Has worked the business up to one of the main industries of the town; employs seven men, and ships beer all over the western portion of the State. Enlisted in 1861 in the 14th W. V. I., Co. K; mustered out as a Captain in 1865, at the close of the war. Married, in 1865, to Miss Mary Smith, a native of Wisconsin, by whom he has six children—two sons and four daughters. Is a good business man, and has built around him a large property, and justly deserves his increasing business.

MICHAEL REMY, farmer; P. O. Muscoda; born in Luxemburg, April 15, 1817, where he was educated and learned the trade of stone-cutter and mason; is a son of Peter and Anna Remy, both natives of Luxemburg. His father carried on the cooper, grocery and saloon business. Michael came to this State, and located at Mineral Point in 1852, where he worked at his trade of stone-cutting and mason until 1857, when he bought 300 acres of land in Sec. 30, town of Muscoda, which has been his home ever since. Feb. 2, 1862, he enlisted in Co. I, 19th W. V. I., Capt. Rawley, of Oshkosh, commanding the company. They joined the 9th Corps, commanded by Gens. Butler and Gady; served until

the close of the war, and mustered out with the regiment. His health became impaired by exposure and hardships. He was married, Aug. 14, 1841, to Katrina Herbert, also a native of Luxemburg, by whom he has had eight children—one son and five daughters—two of the girls deceased.

JOSEPH ROGGY, saloon, Front street, Muscoda; was born in Bavaria in 1818; came to America in 1851, and located in Muscoda. He built and run successfully for sixteen years the first brewery in Muscoda; learned the trade of brewer in the old country. He was married the first time to Miss Barbara Renkberg, in 1846, by whom he had two children—one son and one daughter—and for his second wife he married Miss Lena Oswald, a native of Germany, married in Muscoda in 1853. He was in the army in the old country six years. The family are members of the German Lutheran Church; has been on the side board two terms. He is the oldest German settler living in Muscoda.

CHARLES RODOLF, Muscoda; was born at Zurzach, in the canton of Aargau, Switzerland, in the year 1818; his early education was received here; at the age of 11, he attended the high school in his native town, and when 16 years age, commenced the study of law with his uncle, Henry Rodolf; two years later, young Charles quitted Switzerland, sailing for the new land of promise, America; he landed at New Orleans in December, 1833, and immediately took passage up the river for St. Louis; arriving at that city, he attended school for a short time, when he made a second move, coming to Wisconsin and locating at Wiota, La Fayette Co., where he commenced farming during the year 1834; in 1837, young Rodolf went to Muscoda, then a small settlement of a few houses, and engaged with Col. William S. Hamilton, the then proprietor of the place; he remained here eight months, during which time he devoted his leisure moments to reading law; returning to his farm, he engaged in agricultural pursuits until 1840, when he removed to Mineral Point, taking an interest in a store with his brother, Theodore Rodolf; two years later, Mr. Rodolf opened a store of his own at Centerville, and commenced operations in mining for lead, and the succeeding year ran a smelting furnace at Wingville; about this time, he began to put his legal knowledge to the proof by engaging in mineral cases before the Justices' courts; in 1852, Mr. Rodolf purchased the Eagle Mills and moved to Richland Co.; this same year he was admitted to the bar; up to 1858, he remained a citizen of this county, engaging in various mercantile pursuits; the year succeeding his removal (1853), Mr. Rodolf was elected Chairman of the Board of Supervisors for Richland Co., a most flattering testimonial of the confidence and esteem he had in so short a time inculcated in the minds of his neighbors and constituents; previous to his removal from Iowa Co., he had been elected to the Assembly from the Northern District of Iowa Co.; in 1858, he was again returned to the same body, this time from Richland Co., and, during the years 1859-60, he served as State Senator for the Fifteenth District, comprising the counties of Iowa and Richland; in 1864, Mr. Rodolf was nominated for member of Congress from the Third District on the Democratic ticket, but was not elected; the later fortunes of Mr. Rodolf were cast in Muscoda, at which village he continued the mercantile business until 1876, and where he has since resided; in 1875, he was elected Chairman of the Town Board, which position he held with credit to himself and advantage to the town until 1879; he was re-elected again the present year to the same position.

JOHN C. SCHAEFER, Jr., retired farmer, Muscoda; was born in Prussia Dec. 29, 1811. He is a son of John C. and Anna Klin Schaefer. His father's business was raising grapes and making wine. He received his education in his native town, and worked for his father until 25 years old, when he established the same business for himself, which he conducted for ten years. He also served two years in the army in the old country. He came to America in 1847, and located in this county, and engaged in farming until 1875, when he retired and came to Muscoda to live. He was married, Feb. 7, 1837, to Miss Anna Margaret Meyer, a native of Germany. Peter Schaefer, a son of John C., was born in Iowa Co. in 1849. He lived with his parents until he was 12 years old. He then engaged as clerk in a general store for Mr. Daniel Zimas in 1867. He came to Muscoda, and clerked for McKittrick & Son five years; then engaged in his present business, selling agricultural implements. He was married, Nov. 21, 1872, to Miss Mary Stedle. They have five children. He has been Town Clerk seven terms, and member of the Board two years.

GEORGE J. SCHULZ, blacksmith, wagon manufacturer and general repairer of machinery, Muscoda; born in Bavaria on the Rhine in 1849; came to America in 1864, and located at Burlington, Iowa; came to Muscoda in 1869, and established his present business in 1872; learned his trade in the old country with his father, who was a first-class mechanic. His business has gradually increased from the start, and he has taken his brother in as a partner, who has charge of the wagon-making department. The firm name will be Schulz Brothers. George J. was married, in Muscoda, in 1872, to Miss Elizabeth

Michael, a native of Pennsylvania, by whom he has three children—one son and two daughters. He is a first-class mechanic, and has worked himself up from a poor boy, now owning his own place of business.

JOHN SMALLEY, proprietor of the Smalley House, Muscoda; born in England in 1828; came with his parents to America in 1838, and settled in Pennsylvania; came to Wisconsin in December, 1855, and located at Muscoda, where he has since resided. In 1856, he opened the "Smalley House;" in 1874, he built the present hotel, the largest brick hotel west of Madison, on the Prairie Du Chien Division, and also one of the best managed hotels on the line, and a general resort for traveling men. In 1855, he was married to Miss Mary Carroll, a native of Pennsylvania, by whom he has one son, now in the employ of the railroad at Milwaukee. Mr. Smalley has held the office of Town Treasurer, and also Chairman of the Town Board. He is a man that can be depended upon in every sense of the word.

LAUREN L. THURBER, station agent for C., M. & St. P. R. R., Muscoda; has been employed fourteen years in the same capacity by the same road; he was born in Door Village, Ind., Jan. 17, 1841, where he was educated and learned the trade of mason; he is a son of Nathaniel and Sarah Leland Thurber, who were natives of Vermont; they came to this State in 1857 and settled upon a farm in the town of Pulaski, Iowa Co. The subject of this sketch came two years later, and joined his parents on the farm. In August, 1861, he enlisted in Co. C, 20th W. V. L.; was with the regiment during its term of service, participating in all the engagements, and mustered out with them at Madison in August, 1863. May 6, 1866, he married Miss Anna Soper, by whom he has three children, all boys.

PARKER C. UNDERWOOD, Muscoda; was born in Delaware Co., N. Y., Feb. 3, 1803; he is a son of Dr. Oliver Underwood and Jemima Parker; Parker C. lived in the State of New York until September, 1834, when he came West and located at Buffalo Grove, Ill.; the following year, he came to Mineral Point, Iowa Co., Wis., and his home has been in Iowa Co. since that time; he engaged in mining lead ore at what they called Upper Mines; he sold his ore to Col. W. S. Hamilton, who had smelting works at Wiota, in what is now La Fayette Co.; his first sale of ore was 50,000 lbs., at \$20 per 1,000 lbs.; it was the first ore sold; he then sold out his interest in the mines, and went to what is now called Centerville, and discovered what is now called the Drybone and Black Jack Vein, which yields zinc ore; the place was then known as the Underwood & Billings Diggings, he having given Mr. Billings an interest in the mine; he remained in the mines about three years, then engaged some in farming. He was elected Constable, also Under Sheriff of Iowa Co., which then embraced what is now Grant, Richland and La Fayette Cos. He was married. March 11, 1824, to Miss Anna Parker, a native of New York State; she died in 1848; they had four sons; the two oldest, Joseph and Oliver P., are living on the old homestead, in Iowa Co.; Madison, the third son, died Dec. 8, 1880; Irving, the youngest, entered the army, and was wounded at the battle of Pittsburg Landing, and killed at the battle of Corinth.

MATHIAS VIKTORA, saloon, Muscoda; was born in Austria in 1850; in 1855, came to America with his parents and located with them in the town of Blue River, Grant Co., where they engaged in farming until 1876, when they moved to Muscoda and established the present business. He is a son of Wenzel and Rosa Knutz, both natives of Austria, where his father engaged in farming; his mother died in 1867. He was married in February, 1877, to Miss Caroline Bettinger.

REV. F. X. WEINHART, Muscoda; born in Austria in 1828, a son of Anthony Weinhart, who is still living in the old country. Father Weinhart received his education in Austria, and came to America as a theologian in 1852; was ordained as a Catholic Priest in 1855, and has had great success in establishing and organizing congregations. In 1856, he started and built his first church in Greenfield, Milwaukee Co., viz., "Holy Sacrament." The second one at Franklin, Milwaukee Co., in 1857, viz., "Sacred Heart of Jesus and Mary;" he also established the "St. Aloisius" Church at Sauk City; at Avoca, "St. Joseph's;" at Highland, the German Roman Catholic Church, which was dedicated in 1864, and the church at Muscoda in 1859; at present he has charge of two congregations, the one at Avoca, and the church at Muscoda; he moved to Muscoda permanently in 1880. He was permanently located at Mineral Point for the term of eight years, and also at Highland for the same length of time; he has been in the ministry continually from the time he was ordained, with the exception of the trip he took to Europe, to see his aged father. He established two churches in Richland County, one of which was named "St. Anthony," after his father, and the other "St. Mary." He is the only one living of the three Priests that started the seminary in 1854 and 1855 at Milwaukee. His present congregation at Muscoda only numbered sixteen families in the start, and he said mass in the schoolhouse at first, and then in a wagon-shop, using the workbench as an altar; it is now in flourishing condition, numbering ninety-four families. He has wonderful executive abilities, and is thought highly of by the whole community.

JACOB YOUNG, farmer; P. O. Muscoda; owns 200 acres land on Sections 15 and 16; was born in Bavaria Jan. 23, 1842; he is a son of John and Margaret Smith, both natives of Bavaria, where his father engaged in the several occupations of farmer, miller and paymaster of railroad. Father died in the old country in 1858; mother still living in this town. Jacob Young came to America in 1858, and located first in Potosi, afterward moved to his present location. Enlisted Sept. 10, 1861, in Company D, 7th W. V. I., for three years. The regiment was attached to 1st Brigade, 1st Division, 1st Army Corps, Army of the Potomac. He participated in all the battles of the regiment previous to the battle of the Wilderness, except South Mountain and Antietam. May 5, 1864, he was shot through the right lung at the battle of the Wilderness and taken prisoner, and lay in the field hospital thirty-one days, when he was sent to Andersonville; was a prisoner nine months, and was one of the first 1,800 exchanged. He re-enlisted with the regiment the same day its first term of service expired for three years longer. Dec. 28, 1863, they were then stationed at Culpeper, Va. They served until the war closed and was mustered out in August, 1865. He was discharged on account of disability June 10, 1865. After the war, he spent three years on the plains for his health. He was married Nov. 22, 1868, to Miss Harriet Markt, by whom he has two boys and one girl.

JOHN ZWOLANEK, physician and minister, Muscoda; was born in Bohemia in 1815, and educated in a literary course, in Hungary, and graduated in medicine at Vienna. He practiced medicine eleven years in the old country, and came to America in 1853, and located at St. Philip, Texas, where he remained five years, and he followed his profession, that of minister and physician; then he came to Port Washington, Ohio, where he pursued his vocation four years; from there he went to Indiana, where he remained two years and then came to Fond du Lac, this State, and from there to Muscoda in 1868, where he has remained and pursued his vocation to the present time.

TOWN OF PATCH GROVE.

LUTHER BROWN, Patch Grove. Mr. Brown, who ranks among the pioneer settlers of Grant County, was born May 21, 1796, at Canterbury, Conn. Like other youth of those early times, he assisted upon the farm, occasionally attending school until his scholastic attainments were such that farm work occupied only the summer months, while the winter was devoted to school-teaching. This programme obtained until Mr. Brown had reached the age of 30, when he concluded to try his luck in the Far West. At that time, the pioneer adventurer needed not to go further than Ohio, the main portion of which was but little better than a wilderness. Mr. Brown settled near Ellsworth, Mahoning Co., in the above State, and began the task of converting 100 acres of heavy timber-land into a tract fit for cultivation. While here, he married Miss Fitch, daughter of Deacon Daniel Fitch, who proved a worthy helpmeet. From here, after a severe and wearisome struggle with nature's giants, Mr. Brown removed with his family to the Territory of Wisconsin, and settled upon the broad opens of "Blake's Prairie," within the confines of Patch Grove. The village at this time was hardly known, and the present populous, smiling section knew but a few settlers, and these far between. Here Mr. Brown has continued to reside, and where he has raised a family of twelve children, seven of whom are now living, and have families of their own. Mr. Brown is now in his 85th year, and a link between the past and the present, and takes an active interest in everything connected with the county of which he has been so long an honored citizen.

LEWIS BETLER, Sec. 24; P. O. Mt. Hope; owns 240 acres land, valued at \$15 per acre; born in Pennsylvania in 1841; came to Wisconsin in 1855; he settled on this farm in 1869. He has served the town in different offices a number of times. He was married, in 1841, to Miss Sarah Eastman, a native of Indiana, by whom he had thirteen children; six boys and three girls are now living. Asbury, the oldest, enlisted in the 3d W. V. C., in which he served until the close of the war, participating in all the battles of the regiment. John, Jr., was also in the same regiment, but was discharged for disability. Stephen also enlisted and served his country until the close of the war. Mrs. Burris came to Wisconsin with her parents in 1837. Her brother assisted in surveying the State. Her family on both sides were among the earliest settlers of this country, and fought in the Revolutionary war.

ULYSSUS M. HUNGERFORD, farmer; P. O. Blue River; a son of Isaiah and Elizabeth Hutchinson, natives of Connecticut, but located at Livonia, Livingston Co., N. Y., where Ulysses was born April 12, 1834, where he was educated; learned the carpenter trade with his father; came to Illinois in March, 1854, and located at Kankakee; the following year came to this State, locating on Sauk Prairie, Dane Co.; the following spring he moved to Crawford Co., entering forty acres of land; remained there one and a half years; he then came to this town and engaged as a farm hand until the breaking-out of the war; Dec. 28, 1863, he enlisted in the 6th Wisconsin Light Artillery (Burnett's Battery); he served

with the battery until the close of the war, and was mustered out with them at Madison in July, 1865; he had four brothers in the service; Eugene, the oldest, enlisted while attending the University at Madison, in 1861, in the 5th W. V. I., participating in all the battles with the regiment until May 3, 1863, when he was killed while storming the heights at Fredericksburg; Edwin enlisted in August, 1862, and died in the hospital at Corinth Nov. 9, 1862; Thomas J. enlisted in the 6th Wisconsin Artillery Oct. 1, 1861, when the battery was organized, and was in active service until his term of enlistment expired, in October, 1864, when he came home. Addison enlisted in 1864 in the 47th W. V. I., and served until the close of the war. At the close of the war, Ulyssus moved upon the farm where he now lives. He married Miss Sarah Carson, who was a native of Indiana, and came to this State with her parents in 1854. He has always been in active life, and accumulated an estate through his personal industry.

JAMES B. HOMEWOOD, farmer; P. O. Blue River; was born in Kent, Eng., June 12, 1829; he is a son of Edward and Elizabeth (Buss) Homewood; came to America in 1842, locating at Summit Co., Ohio; remaining one year, he returned to Chautauqua Co., N. Y., where he engaged in farming; came to Wisconsin in 1867, and bought the farm upon which he now lives. He was married in the State of New York, in 1859, to Miss Sarah Galoway, who was born in Ireland, but came to America when 10 years old; they have five children living—four sons and one daughter. Mr. Homewood has always been a persevering, industrious man, and a much-respected citizen.

HENRY LEE, farmer; P. O. Blue River; was born in Yorkshire, Eng., in 1818; he is a son of John and Harriet Wright, who were natives of the same place, and engaged in manufacturing britannia ware. Mr. Lee came to America with his parents when 2 years old (1820), and located in New Jersey, where he was educated and learned the business of britannia ware manufacturing, which his father engaged in there; when 21 years of age, he went to Newark, N. J., and in connection with his brother established a manufactory of German silver ware; he engaged in it two years; the business not paying, they abandoned it, and for eleven years engaged in making trunk rivets, afterward engaging in the grocery business three years; in 1856, he sold his business and came West, and bought a farm in De Kalb Co., Ill., where he remained seven years, then came to this town and engaged in farming. He was married, Jan. 29, 1846, to Miss Juliet Stevenson, of New Jersey; they have seven children living in this State. Mr. Lee is a member of the Methodist Episcopal Church; his ancestors have been members of the same body almost since Wesley's time. Mr. Lee is, and always has been, a strong advocate of temperance.

JOEL LEE, farmer; P. O. Blue River; born in Huron Co., Penn., in 1832; son of Vernon and Polly Barton, natives of Pennsylvania; they moved to Illinois in 1839, and located in Kane Co. Mr. Lee came to this State in 1855, and located near where he now lives. Married, in 1857, to Miss Jane Bennett, a native of New York State, by whom he has four sons and five daughters. He bought the farm where he now lives in 1868. Has been Treasurer of Waterstown four years.

ANDERSON B. MILLER, general store, Blue River Station; was born in Oldham Co., Ky., July 19, 1815; he is a son of John (a native of Virginia) and Nancy Blevens, a native of Kentucky, where they were farmers. Anderson lived in Kentucky with his parents until 1832, when he went to Sullivan Co., Ind., and learned the potter's trade, and worked at it eighteen months. In March, 1839, he married Elizabeth Clerk, a native of Kentucky, and carried on the potter's business until the spring of 1848, when he moved his family to this State and located in Lost Grove, Iowa Co., and engaged in farming; remained there four years, then moved to Richwood, Richland Co., where he bought a timber farm, which he cleared off by persevering industry, where he lived until 1862, when he sold out and bought a farm in Mifflin, which he sold in 1868, and moved to Blue River and established his present business. They have had six children; two boys and two girls have died. Alonzo C., the oldest, enlisted in Co. H, 11th W. V. I., and was discharged for disability, and died at St. Louis while on his way home.

RANDALL MURLEY, retired farmer; P. O. Boschoel; he is a son of John and Catherine Farrell, natives of Ireland, where he was born in 1818; he came to America in 1842, and located at Rochester, N. Y., and lived in Monroe and Ontario Cos. until coming West; in 1851, he came to the town where he now lives and bought the farm he now owns. He married, just before leaving Ireland in 1842, Miss Julia Herlahe, a native of Ireland. They have five children living. He was born in County Kerry and his wife in County Cork.

CALVIN B. PHILLIPS, farmer, Secs. 12 and 13; P. O. Blue River; owns 240 acres of land. He is a son of Mathia and Hannah Buckman, his father a native of Maine and his mother of Connecticut. Mr. Phillips was born in Dutchess Co., N. Y., in July, 1821; he went to Ohio with his parents in 1837; they located at Dorset, Ashtabula Co., where his father engaged in blacksmithing, and Calvin B. learned the trade of carpenter and joiner, which he followed until 1854, when he came to this State and

located in the town of Orion, Richland Co., where he bought a farm of 120 acres and lived there until 1876, when he exchanged it for the farm he now owns. He was married, in 1849, to Miss Mary D. Johnson, a native of Ohio, by whom he had nine children, eight of whom are living. Mr. Phillips served under Gen. Scott during the Mexican war.

JOHN L. RAMSOUR, farmer; P. O. Blue River; was born in North Carolina in 1818. His parents were natives of the same State. The family emigrated to Missouri in 1839, where his parents died; in 1842, he came to this State, locating at "Root Diggings," near Platteville; he followed mining for fourteen years, when he bought the farm upon which he now lives. He was married, in 1842, to Miss Cassinda Brown, who was a native of Kentucky. They have raised three children, all of whom are living in this State.

JAMES REED, farmer; P. O. Blue River; land located in Secs. 11, 12 and 13; he was born in Ireland in 1829, and is the son of Andrew and Elizabeth Bower, natives of Ireland; he came to America in 1853, and located at Lake Champlain, where he remained three years; then came to Lancaster, where he engaged as farm hand to Mr. Fred Phelps, afterward coming to Waterstown; has been in his present location twelve years. He married Miss Elizabeth Zemmitzka Jan. 14, 1863. They have eight children.

DAVID A. TAYLOR, Station Agent C., M. & St. P. R. R., Blue River; he was born in Platteville Oct. 22, 1851; he is a son of J. L. Taylor and Catherine Mather, a native of Canada and his father of Virginia. His ancestors were among the early settlers of that State. They (parents) moved to New York State and settled near Buffalo, where he engaged in farming; they came to Wisconsin in 1840, and located upon a farm near Platteville; his home has been in this county ever since; afterward moved to Blake's Prairie, which was his home until 1865, when he moved to Muscoda. He was in the late war; lost a leg at the battle of the Wilderness, where he was taken prisoner, and was in the field hospital one month and eleven days, when he was recaptured. David Taylor has been in the employ of the St. Paul road some five years. Married, Nov. 8, 1871, to Miss Susan Northey, by whom he has one daughter, born July 25, 1872, named Alta.

TOWN OF CASSVILLE.

F. BINKERT, dealer in dry goods, groceries and live stock, Cassville; was born in Baden March 27, 1828; came to Cassville in 1854; located in Pennsylvania, town of Economy, in 1856; went to Warren Co., Penn., in 1857, to St. Louis in the fall, then to Wisconsin in 1861; located at Hazel Green, Grant Co.; then to Clayton Co., Iowa, in the mines; in 1874, to Cassville and engaged in business. L. Le Grave for three years; then with John Geiger until 1873. He then bought out the stock, and engaged for himself March 1, 1878; the firm has been Klindt, Geiger & Co. His wife, Ida Sager, a

native of Mecklinburg, Germany, came to America with her parents in 1863. Her mother is deceased; her father resides in Cassville. They were married April 1, 1875, and have one child—Gusta A., born March 24, 1878. In politics, he is a Republican; was a member of the Assembly in 1880. In religion, Liberal believer. He has been a Good Templar.

F. P. LISCOMB (deceased); was born in Vermont Aug. 28, 1830; came to Illinois in 1847 with his parents. His father now resides in Kansas; his mother died at Lancaster in 1857. They came to Wisconsin in 1845; settled in Lancaster, where he first was a clerk in a store, and afterward in the mercantile business; also Postmaster about 1853. They removed to Cassville in 1865; in the fall engaged in clerking for Geiger, also Reinke. He died Sept. 25, 1878. In politics, he was a Democrat; was Town Clerk. In religion, Methodist; was a member of A., F. & A. M.; also Worthy Master of Lancaster Lodge. His wife, Harriett M. McCartney, a native of Cassville; was born March 25, 1835. They were married July 6, 1857. By this union there were two children—Frank Emmett, born Oct. 13, 1858; William, born Feb. 7, 1860; died March, 1860. They own town property, and 300 acres of farm land. Mr. L., his father, was a native of New York; his mother from Vermont. They came to Wisconsin in 1827; settled at Cassville; both buried in this vicinity.

HENRY MILLER, proprietor of hotel and stable, Cassville; was born in Prussia April 24, 1836; came to America in 1855, direct to Wisconsin; bought 40 acres of land, and rented 200 until 1861. He then enlisted in Co. C, 2d W. V. I., Sept. 26, 1861; was in the first battle of Bull Run; wounded and discharged; returned to Cassville; went to mining; then bought 40 acres of land, and continued until 1866. He then went to Iowa, and engaged in teaching school in the country and at Garnaville; then returned to Cassville in 1879, on a farm until June, 1880; then in to the hotel. He owns the property. In politics, Republican; in religion, Catholic. His wife, Mary Serg, was born in Millville, Grant Co., Wis., Nov. 13, 1844. They were married in 1863; they have three children—Louisa, born Jan. 17, 1873; Laura, born Feb. 22, 1875; Henry, born Jan. 19, 1879.

LEWIS M. OAKLEY, farmer, Sec. 13; was born in Monroe Co., Ohio; son of Henry and Minerva Oakley; came to Wisconsin with his family in 1849. He was married to Caroline Titus in 1844; their children are Samuel W., born in 1846; Minerva, born in 1848; William F., born in 1850; Lewis, born in 1853. Has been a member of the Board of Supervisors, and an acting Justice of the Peace a number of times. In politics, a Republican.

JOHN B. ORTSCHSIS, baker and confectioner and notions, Cassville; was born at Alsace, France, Dec. 2, 1842; came to America, in 1857, with his mother and sister. His father died in the old country. Two brothers had come before this time, and are living at Cassville. He was engaged in attending school, and worked on a farm until 1859. He went to Galena to learn the trade with Jacob Sutter. He then went on a steamboat one year; then to Dubuque; finished the trade; then went to Lansing, Iowa; then returned to Dubuque. He enlisted in the 12th Iowa V. I. in 1862; but they would not receive him. He came to Cassville in 1864, and engaged in the saloon business in 1865, and then returned to Dubuque. His wife, Catharine Zeng, was born at Potosi, Grant Co., April 28, 1843. They were married in 1864; they have nine children—Edward P., Harry B., Mary Annie, William B., Bearnhart, Josephine C., Magalena, Maggie and Louisa. In politics, Republican; is Justice of the Peace; has been Road Overseer and Constable; owns town property.

OTTO REINKE, dealer in general merchandise, Cassville; was born in Mecklinburg, Germany, Sept. 17, 1827; came to America Dec. 18, 1849, landed at New York; then went to Waterstown and clerked in a store; in 1851, went to St. Louis and clerked in a Main street store until 1857; in the spring, he came to Cassville; was in the store of Raffan & Geiger, continued until 1860; engaged in business for himself with William F. and O. B. McCartney. William F. is now a successful business man in Denver, Colo.; O. B., deceased. Continued until 1865, when he was in company with Gov. Dewey until 1873, when Mr. Reinke bought out the business. His wife, Martha Garner, was born at Apple River, Jo Daviess Co., Ill., Aug. 27, 1837. Married Jan. 12, 1862; they have seven children—Alto, born Feb. 11, 1863, died April 20, 1866; Mattie, born Nov. 2, 1864; Fredrick, July 30, 1867; Benno, Sept. 18, 1869, died Jan. 16, 1873; George, born Oct. 5, 1872; Otilie, Aug. 21, 1874; Grittie, April 22, 1879. In politics, Republican; was Postmaster from 1861 to 1871; has been Clerk and Treasurer of Schools. In religion, raised a Lutheran. His father was a minister of that denomination, and died in the old country in 1878. Mr. R. owns 40 acres of land, also town property.

D. B. STEVENS, of the firm of Stevens & Bartlett, proprietors of steam saw-mill, Cassville; was born at Oxford, Me., Jan. 24, 1837; came to Wisconsin in 1856, when he arrived at Prairie du Chien,

he only had 50 cents in cash; his trunk he took upon his shoulders to the store of Pettons; he then engaged in driving oxen in the spring; he then located in Bloomington, Grant Co., Wis.; worked at the trade of carpenter, teaching school in the winter; he then removed to Beetown in 1861, worked at his trade until 1865, when he bought the Cassville steam saw-mill. His wife, Mary Rockeffler, was born in Connecticut, in November, 1842; came to Wisconsin in 1855, with her parents, who now reside at Beetown. They married March 4, 1862; they have six children—George L., born Nov. 10, 1863, now attending the Normal School at Platteville; Willard L., born Sept. 10, 1865; Frank J., Aug. 17, 1869, now at school at Lancaster; Charles D., March 23, 1872; Mary B., Nov. 6, 1877; Lucy B., Oct. 10, 1878. In religion, a Baptist, and to his constant and persistent efforts the Cassville Baptists are indebted for their neat little church; he is also the Superintendent of the Sunday school. In politics, a Republican; a member of Beetown Lodge of A., F. & A. M. The firm own 1,000 acres of land in Clayton Co., Iowa, and a fine residence in Cassville.

WILLIAM SCHMITZ, saloon, restaurant and stabling, Cassville; was born in Prussia Sept. 14, 1830; came to America in 1850; settled at Galena, learned the trade of tinsmith; engaged in business at Galena with M. Gribbs; then went to Dubuque, where he remained until 1855; he came to Cassville and engaged in the hardware business; then built the Cassville brewery, and continued to run that until he sold to Hugo Grimm of St. Louis; then started the present business in his own house July 24, 1880, also owns a farm of 60 acres. His wife, Sebbila Dresen, was born in Prussia in 1852; came to America in 1868; they married April 13, 1871; they have five children—Otto C., born at Cassville March 13, 1872; William M., Oct. 7, 1873; Christ H., Oct. 5, 1875; Henry, Dec. 3, 1877; Frank E., June 16, 1880. In politics, Republican; member of Town Board. In religion, Catholic; a member of the Union League. While firing an anvil during the early part of the war, he came near being killed by the bursting of an anvil. His brother Peter was in the 25th W. V. L., and died in the war; he is buried at Cassville; William erected a beautiful monument to his memory—a worthy tribute to a fallen hero.

JOHN H. C. SNECLODE, insurance and collecting agency, Cassville; born on the Baltic April 14, 1821; in 1841, was in the employ of the Kiel & Altoona R. R., and continued until the great fire in Heinburg, in 1842, when he came to Baltimore, Md.; remained six months, when he returned to Holstein, and was put in the regular army, where he remained ten weeks, when he deserted and came to America, landed in New York; then to Canada in the fall of 1843; in the spring of 1844, went to Michigan, there engaged in carpentering, when he arrived there his trunk was empty, the last penny gone, but, being a good draftsman he soon received the best of wages; in the fall of 1844, he went to Galena, Ill., where he remained until 1846; the times being very dull and no money, he enlisted for the Mexican war with Capt. Crow, afterward Dr. Crow, of Galena; served until the close of the war, when he returned and worked at various occupations; until 1849, he was engaged on the steamer Yankee of the St. Paul and St. Louis line; in 1850, he came to Cassville and worked at his trade, some of the finest buildings in the city were built by him. In 1857, he was engaged in farming, but made a failure; he returned to his trade. Now owns 320 acres of land on Sec. 27, also town property. His first wife, Jane Va Ansdall, of Holland, deceased, was born in Ohio, in November, 1833; moved to Wisconsin in 1845. Married March 16, 1856, died July 2, 1871; by this union there were five children—Annie, now Mrs. McCormick; Catherine, born in 1861, died in 1863; Ester, born in October, 1864, died Jan. 28, 1871; Margaret, born in March, 1868; Cornelia, born September, 1870, died in June, 1871. Second wife, Amelia Phetteplace, born in Illinois, in February, 1847. Married in September, 1873; no children. In politics, Republican, and one of the little band that, in 1854, organized the party in this county at Lancaster, John H. Rountree, Chairman; John G. Clark, Secretary. He was raised a Lutheran. Has held the office of Justice of the Peace, Town Clerk, Treasurer, Notary Public. A Mason, and belongs to the Chapter at Lancaster; I. O. O. F. Lodge at Bloomington. Gives considerable attention to surveying in Iowa and Wisconsin.

TOWN OF FENNIMORE.

O. L. BERRY, farmer, Sec. 33; P. O. Fennimore; was born in Norway in 1816; came to the United States in 1843; first settled in Iowa Co., Wis.; came to Grant Co. in 1848, and settled on his present farm, the greater part of which was Government land. Mr. Berry is, to the best of his knowledge, the first Norwegian settler of Grant Co. His wife was Mary Fingerson, born in Norway Nov. 4, 1824; he came to this country with her brother, Andrew Fingerson, in 1849; he is now a resident of Iowa Co. Mr. Berry and wife have eight children—Lena, Mary, Lewis, Christina, Anna, Ada, Frederick and Ella. Farm contains 240 acres.

W. L. BROWN, M. D., physician and surgeon, Fennimore; a native of Michigan; he finished his literary course of study at Albion, Mich., and entered the college at Ann Arbor, where he commenced his medical course, afterward graduating at Bennett College, Chicago, in 1874; he commenced practice the same year at Reading, Mich., coming to Grant Co. in July, 1880, where he is now engaged in practice. Sept. 28, 1875, he was married to Miss Mary Peterson, a native of Hillsdale, Mich. They have two sons.

A. B. BAILEY, clerk, Preston; son of Mark Bailey, who was born in Ohio; he came to Grant Co. from Indiana about 1848, and settled in Boscobel; he settled in the town of Mt. Ida in 1876. He died in March, 1880. Mr. Bailey has two brothers—Seth G. and Nathan L.; they reside at the homestead. He was married to Tillie Rogers, daughter of Seth W. Rogers; they have one child—Mark.

LEWIS J. BERRY, farmer, Sec. 12.; P. O. Preston; born in Norway in 1836; he came to America with his father's family in 1852; parents settled in the town of Christiana, Dane Co., Wis., where they lived three years. His father removed to Grant Co. in 1855; he entered the farm which Lewis J. now owns in the fall of 1854. Father died in the fall of 1870; mother is still living. Parents had five children when they came to this country, two of whom, Louis J. and Anna (now Mrs. Ronning), are living; Benjamin, born in 1842, enlisted in October, 1862, in Co. G, 33d W. V. I.; he died at Jefferson Barracks, near St. Louis, in January, 1863. Mr. Berry was married to Lena Gilbertson, daughter of Nels Gilbertson, who came to this country from Norway in 1860. Have five children—Julia, Benjamin, Thomas, Cornelius and Gustave A. Farm contains 250 acres.

JACOB BAUMGARTNER, farmer, Sec. 5; P. O. Fennimore; born in Bavaria, Germany, Nov. 26, 1830; he emigrated to America with his father in June, 1850; they came directly to Wisconsin, first to Milwaukee, thence to Jefferson Co., thence to Cassville, Grant Co. July 19, 1850. Mr. Baumgartner went to St. Louis in the fall of that year, where he worked in a tannery; he learned his trade, that of a dyer, in Germany; he returned to Cassville in May, 1851, and worked for Thomas Scott, near Cassville; he returned to St. Louis in August of that year; in March, 1852, he came back to Cassville; he left Grant Co. again, and engaged to work for Freeman Harmony, near Janesville, as a farm hand. He was married, Oct. 23, 1852, to Mary Winterling, born in Bavaria, and came to this country with her parents in 1848, and settled in Jefferson Co. Mr. Baumgartner settled in the town of Fennimore, Sec. 3, where he lived a short time; settled on his present farm May 5, 1855; he has 377 acres of land; is engaged in grain and stock raising. Has had nine children, seven of whom are living—Louise, Nelson, Leo, Peter, Frank, Wilhelm and Cora. Mr. Baumgartner possesses much valuable information regarding the history of Grant Co. for the last thirty years. He is not only a careful observer and in possession of an excellent memory, but has also practiced the keeping of a diary, noting current events at the time of their occurrence. Both himself and wife are numbered among the most intelligent people of Grant Co.

A. B. CLARK, farmer, Sec. 7; P. O. Fennimore, Grant Co.; was born in Onondaga Co., N. Y., in 1816; removed with his parents to Erie Co., Penn., when 5 years of age. Was married to Fidelia Eaton in 1840, and emigrated to Linn Co., Iowa, in 1850. By this marriage had two children—James L., who died of disease in the army; Mary L., deceased. Mrs. Clark died in 1843, and in the same year Mr. Clark was again married to Annie Mann, who was born in Greene Co., Penn., in 1826. Mr. Clark has by his second marriage ten children—John W., who is married and resides in Fennimore; Nancy Jane, who married N. Wood and resides in Ida Co., Iowa; Rachel E.; Trifosia, married to C. Demsey; Aloia A., married to R. Demsey; Warren, married and lives in Fennimore; Walter, Olive, Charlotte and

George W. Mr. Clark is an active Republican, and is strongly backed in the principle by his good wife. He owns a valuable farm of over 200 acres, under thorough cultivation.

JOHN DINSDALE, farmer, Sec. 25 ; P. O. Fennimore ; born in Yorkshire, England, in November, 1825, where he was married to Tirzäh Chapman. They emigrated to Wisconsin via New Orleans, and up the Mississippi River to Galena, and thence to Grant Co.; left Liverpool Feb. 22, 1849, and reached Grant Co. on the 7th of May. In May, 1850, he entered 80 acres in Sec. 36, town of Fennimore, which is a part of his present farm of 400 acres; he built a log house on his first 80 acres, where he lived eighteen years, when he built his present residence; he is engaged in general farming and stock-raising. His present wife was Miss Grace M. Eddy. He had twelve children by first wife, eleven of whom are living—Elizabeth, James, Isabella M., Zipporah, B. C., Dorothy, Alice, Hattie, Abbie, Matthew E. (deceased), Mary A. and Tirzah C. By present wife—Eddy (deceased), Ella T. and Grace A. His son James met with rather a singular incident about 1860, when he was 12 years of age. A bald eagle of immense size came down upon his father's farm and attacked a flock of geese. After a severe contest with a plucky gander, the eagle was finally dispatched by James with a club. James graduated at Rush Medical College, Chicago; is now practicing medicine at Soldiers' Grove, Crawford Co.

HENRY A. DANKLEFF, farmer, Sec. 21 ; P. O. Fennimore; born in Denmark in 1832; when 16 years of age he went to sea as a ship carpenter; he came to New York City about 1850, after which he sailed on American vessels for several years; he left the sea about 1855; he then went to Milwaukee, where he remained one summer; thence to Michigan, where he remained about two years; then came to Wisconsin in the spring of 1857; he lost in Michigan what he had accumulated, and came to Grant Co. He settled on his present farm in the spring of 1868; his farm contains 230 acres; has also 160 acres on Sec. 13; his farm has fine improvements, all of which he has made himself. His wife was Ann C. Johnson, daughter of Peter Johnson, who came from Norway to this country about 1850; they have four children—Sarena, Matilda, Charles and Henry.

PHILO DEMPSEY, retired farmer; P. O. Fennimore; is one of the early settlers of the town of Fennimore; was born in the town of Brutus, Cuyuga Co., N. Y., June 24, 1814; he removed to Alleghany Co. in 1831; in 1844, came to the town of Fennimore, and entered a farm in Sec. 13; this farm he still owns. His wife was Miss Lydia Walker, born in Massachusetts in August, 1820. Her father removed his family to Grant Co. in 1844, but he first came to the county in 1840. Mr. Dempsey's parents died at his residence in Fennimore. Mrs. Dempsey's father died in California; her mother died in Grant Co. Mr. and Mrs. Dempsey have had six children, five of whom are living—George P., Silas H., Charles S., Robert W. and Similde; lost fifth child, Mary Edna. George P., now a resident of Mason City, Iowa, was a member of Co. K, 12th W. V. I.; enlisted in fall of 1861; veteranized at the expiration of his time, three years, and served till nearly the close of the war, when he was discharged for disability. Silas and Charles were members of 38th W. V. I.; the latter was severely wounded, losing a part of one hand. Mr. Dempsey was the first Town Treasurer of Fennimore; was member of Town Board twelve years; Chairman of Board one term.

B. C. DINSDALE, farmer, Sec. 25 ; P. O. Preston; son of Mr. John Dinsdale; born at the homestead in the town of Fennimore in 1854. His wife was Miss Emma Thompson, daughter of Mr. Edward Thompson, an early settler of Hazel Green.

H. H. EARL, Postmaster at Fennimore; a native of Portage Co., Ohio; he came West in 1838, and located in Salem Co., Ill.; in 1848, he returned to his native place, and in 1850 came to Grant Co. where he has since resided; in 1870, he was elected Justice of the Peace, and held that office for nine years; in April, 1875, he received the appointment of Postmaster, which office he has since held. He is married and has had ten children, only four of whom are living—Samuel Armstrong, son by former marriage; Nancy, now Mrs. Loney; Olie, now Mrs. Lewis; and William.

J. A. FARNHAM, druggist, Fennimore; born in Greene Co., N. Y., in June, 1853; he removed with his parents to Elgin, Ill., about 1866; he came to Fennimore and engaged in his present business in October, 1878. His wife was Miss Ada Coleman.

P. H. FINNEGAN, farmer, Sec. 27 ; P. O. Fennimore; son of Michael Finnegan, who came from Ireland to this country about 1845; he lived in Carroll Co., Ind., for some time, when he removed to Will Co., Ill.; he came to Wisconsin with his family about 1854, and settled in the town of Liberty, Grant Co.; he is still a resident of that town. P. H. was born in Ireland in 1842. His wife was Miss Agnes Robinson, daughter of John Robinson; they have six children—Emma, Mary, George, Albert, Julia and Robert. Mr. Finnegan was Assessor of the town of Fennimore for 1879 and 1880.

ANDREW GOVIER, merchant tailor, Fennimore; he was born in Devonshire, England; came to Grant Co. in August, 1862. He was married in 1855 to Miss Mary Sanders, also a native of England. She died Oct. 2, 1864, leaving four children, two sons and two daughters—Anna E., Emma, John and George. He was married a second time, Dec. 25, 1866, to Mrs. Elizabeth Tobler, widow of John D. Tobler, who died in the army; she has a son by her former husband, John O. Tobler. They have four children—Ida L., William E., Grant and Albert.

WILLIAM GILLMAN, farmer, Sec. 23; P. O. Fennimore; a native of New Hampshire. Went with his parents to Vermont when 9 years of age, remained there until 1857, when he came West to Grant Co. Located on his present farm in 1867. He has been a member of the Town Board, and served two years as Justice of the Peace. He was married to Miss Julia A. Dexter, a native of Massachusetts. They have three sons and three daughters.

WILLIAM A. GRISWOLD, farmer and stock-dealer, P. O. Fennimore; was born in Essex Co., N. Y., February, 1826. He went to Reading, Penn., when a young man, where he learned his trade, that of machinist. He was connected with the machine-shops of the Philadelphia & Reading R. R. Co. for about seven years. He afterward went to Plattsburg, N. Y., where he was foreman of the shops of the Plattsburg & Montreal R. R. Co., and afterward to La Porte, Ind. He came to Lancaster, Grant Co., in 1856, where he and Richard Meyer built a saw-mill. He operated this mill for several years. In 1862, he went to Pittsburgh, Penn., and engaged as foreman of machinery in the construction of the light-draft monitors, Umpqua and Manayunk; was afterward connected with the construction of the Chicago Water Works. He purchased his present farm of 240 acres in 1872, and is now engaged principally in the stock business. His wife was Miss Harriet Meyer, born in St. Petersburg, Russia; she came to the United States in 1848; of German parentage. Her father was a sea captain, and owner of a line of vessels, which plied between Russia and England. Mrs. Griswold is a cultured lady, speaking Russian, German, French and the English languages; she was educated in Russia, where she learned to speak the English language. Mr. and Mrs. Griswold have four children—Ira W., born in 1855, at Plattsburg; J. Lily, born in 1857, at Lancaster; Mary H. and Joseph N., born in 1870.

GEORGE H. HORTON, farmer, Sec. 17; P. O. Fennimore; was born in New Hampshire Feb. 16, 1835; came to Wisconsin in 1857, and settled in Grant Co. Was married to Mary A. Switzer in 1861. Mr. Horton enlisted in Co. K, 47th W. V. I., in 1865, and went South with the regiment, and was in active service until the close of the rebellion; was honorably discharged, and returned to a farmer's life. Mrs. Horton was born in Grant Co., Wis., in 1844; they have four living children—George, G., Charles A., Frank S. and Clyde S. He has always been identified with the Republican party, and has filled various town offices; has been Assessor of his town and Justice of the Peace, and owns a valuable farm of 290 acres, well improved.

C. W. HINES, ticket agent, telegraph operator and express agent at Fennimore, for the Milwaukee & Madison Branch of the N. W. R. R. Co. A native of Elgin, Ill. He took charge of this office Jan. 1, 1881.

CHARLES WARREN LONEY, Fennimore. (Autobiography.) I was born Aug. 21 1808, in the town of Franklin, Ross Co., Ohio; was brought up in a Methodist family, and taught to believe that it is wrong to break the Sabbath, or to attend church festivals; I embraced religion in Indiana in 1834, and joined the Methodist Church. Was married, June 3, 1832, to Mary Switzer; removed with my family to the Territory of Wisconsin in October, 1846, and bought land and settled in the town of Fennimore, Grant Co.; for personal abuse by those who should have been my friends, and for corruptions in the church, I called for and obtained a letter of recommendation from said church in 1871; in 1875, myself and wife presented our letters to the United Brethren in Christ, which church holds the same doctrines as regards the conditions of salvation, and have some church rules that I esteem more highly and vital importance in a religious view of the matter. This church is also more strict in the observance of their church discipline. These are some of the causes which led me to leave the M. E. Church and join the United Brethren. The love for and the tenacity with which the former church clings to Freemasonry and other minor secret organizations, its organs, its church festivals and its church music all tend to deprive it of the power for usefulness which it formerly possessed. There is no man or woman that can be a true follower of the Savior, and at the same time deny Him. With regard to politics, I always voted with the old Whig party while that party existed, and since its disorganization have voted with the Republican party. I was elected a Justice of the Peace in the town of Fennimore in 1847, and re-elected each succeeding two years for sixteen years. I taught the second term of school taught in the town in the winter of 1847-48. Mr. R. Dixon taught the first term the previous winter.

I was elected Town Superintendent of Schools in 1849, and again in 1852 and 1853; was elected Town Clerk in 1865, and re-elected annually for sixteen years in succession. I have tried different occupations for a livelihood, but have never made much money at anything, but have always endeavored to deal honestly with all with whom I have done business. We have had four children, all born in Indiana, three of whom are living—Mary Ann (now Mrs. Mumms), Charles W. and Wm. H.

WILLIAM MARSDEN, farmer, Sec. 27; P. O. Fennimore; son of Henry Marsden, who was born in Yorkshire, Eng., in 1806. He emigrated to Wisconsin with his family in 1842, and settled in Waukesha Co. the following spring. In 1853, he settled in the town of Liberty, Grant Co., where he died in November, 1880. Had five children, all born in England, and all of whom are living—Mrs. Rebecca Rook, Thomas, William, Mrs. Jane Thomas and John; the last two live in Kansas. William was born Jan. 1, 1838; settled where he now lives in 1863. He was married to Jane Warne; they have five children—John, William, George, Anna and Frank; his farm contains 160 acres. Mr. Marsden is the present Treasurer of the town of Fennimore; he has held that office for three years.

JOHN MONTEITH, farmer, Sec. 22; P. O. Fennimore; son of Andrew Monteith; born in Wigtonshire, Scotland, in 1829; he came to the United States in 1850; he lived for a time in the State of Vermont; thence to Western New York; he went to Indiana in 1851; he passed the winter of 1851–52 in Texas; in the spring of 1852, he came to Grant Co. and settled in the town of Liberty. He went to California in the winter of 1853–54; returned in the fall of 1857. His wife was Miss Elizabeth Dinsdale, daughter of John Dinsdale; they have three children—Willie, Bertha and Cornelia; lost one son, their third child. Settled on present farm in 1866; has 320 acres of land. Mr. Monteith is one of the present members of the Town Board; was Chairman of board for three years; he was a soldier in the war for the Union; he enlisted in August, 1861, in the 7th W. V. I.; served about two years, and was discharged for disability; he participated in several severe engagements, including Gainesville and Second Bull Run.

GEORGE MOODY, stone-mason, Fennimore; son of Isaiah Moody, one of the early settlers of Grant Co., who settled in the town of Smelser and went to California in 1849, where he still lives. George was born in the town of Smelser in 1847. His mother died when he was an infant. He has always resided in Grant Co. Has one brother, Sylvester, living in Grant Co.

H. A. W. McNAIR, farmer, Sec. 30; P. O. Fennimore; is one of the prominent early settlers of Grant Co.; he was born in Lincoln Co., N. C., in 1818. His parents, natives of South Carolina, were of Scotch descent. He removed with his father's family to Bond Co., Ill., about 1820, where his mother died. Mr. McNair was on what is now the town of Fennimore in April, 1842; he removed here permanently in 1846. His father, with his family, came at the same time. He entered his present home in 1849, but had occupied the place since the spring of the previous year. James McNair, a brother, settled at the same time on an adjoining farm; he is now a resident of the town of Mt. Ida. John McNair, the father of the subject of this sketch, died at the residence of his son in 1858. Parents had five children, two of whom died in Illinois. The third child, Matilda, resides with her brother James. Mr. McNair was married to Mary Dorland, born in Pennsylvania; they have two children—Fred W., born in December, 1862, and Bessie, April, 1864; lost two youngest children, a son and daughter. Mr. McNair was a member of the Legislature three terms, 1859, 1867 and 1870; he was County Surveyor in 1861 and 1864.

E. H. MOORE, stone-mason and plasterer, Sec. 18; P. O. Fennimore; was born in Camden Co., N. J., Nov. 11, 1837; removed with his parents to Indiana in 1840; had a liberal education in the public schools; removed to Wisconsin in 1856 and settled in Fennimore, Grant Co. He married Mrs. Elmyria Eaton, daughter of David Hood, of Venango Co., Penn., Jan. 27, 1861. Mrs. Moore first married Clark Eaton, March 2, 1853, who died in 1860. Mrs. Moore has two daughters by her first husband—Mary, aged 26 years, who has followed teaching for ten years; Melissa, wife of Rev. A. J. Hood, of this county. By her second marriage Mrs. Moore has one child—Alferetta, aged 19 years, a dressmaker. Mr. Moore enlisted in Co. E, 25th W. V. I., Jan. 4, 1864, and was in active service until the close of the war; was honorably discharged. Is a member of the United Brethren Church, and is an active Republican in his town.

JOSEPH MORRISON, farmer, Sec. 7; P. O. Fennimore; was born in the Province of Ontario, Canada, July 28, 1833; removed to Illinois in 1851, and to Grant Co., Wis., September, 1858. Mr. Morrison enlisted in Co. C, 25th W. V. I., Aug. 12, 1862; was in active service with his regiment until the close of the rebellion; was honorably discharged. He was married, Dec. 25, 1866, to Catherine E. Smith. Mrs. Morrison was born in Lake Co., Ind., in 1847. They have five children—Sarah C.,

Joseph L., George W., Frank E. and Margaret. Mr. M. is an active Republican; has been Deputy Sheriff and Constable. Owns 100 acres of valuable land.

CONRAD NAPP, farmer, Sec. 29; P. O. Fennimore; was born in Rhine Province, Germany, Oct. 15, 1829. His father, with his family, emigrated to Wisconsin in the fall of 1846, and settled in Hurricane Grove, Grant Co. He now resides at Cassville. His parents had nine children when they came to this country, six sons and three daughters, all of whom are now living except one daughter. Mr. Napp was married to Elizabeth Brek, daughter of Philip Brek, who emigrated from Germany to Grant Co. in 1848. Mr. and Mrs. Napp have nine children—Elizabeth, Mary M., Conrad, Charles, Carrie, Emma, John C., David and Mattie. His farm contains 340 acres. Is a member of the Presbyterian Church.

T. POPEJAY, proprietor of meat market at Fennimore; a native of Fayette Co., Ohio. He came to Grant Co. in 1836, and was one of the earliest settlers. In September, 1842, he was married to Miss Mary Tindal. She died in 1844, leaving one daughter—Alice. He was married a second time, in 1859, to Miss Sarah T. Kelley. They have a son and daughter—Terrance and Stella D.

JOHN G. PERKINS, farmer, Secs. 18 and 19; P. O. Fennimore; a native of Vermont; born in 1827. He came to Grant Co., and located on the farm where he now lives, and built the first house in the village of Fennimore Center. He has resided here for the last twenty-three years, and, during that time, has held the offices of Constable, Assessor and District Clerk. He was married, in 1849, to Miss Elzina E. Gillman, a native of Vermont. They have three sons.

W. H. PEDICORD, manufacturer of harnesses and saddles, Fennimore; born in Vanwert Co., Ohio. He came to Grant Co. in November, 1878, and established his present business the same year. He was married, Oct. 14, 1879, to Miss Mary Shiffman, a native of Grant Co. They have one daughter, Marcia. Members of the M. E. Church. Mr. Pedicord is a member of the I. O. O. F.

D. O. PICKARD, M. D., Fennimore; born in Northern Ohio, October, 1837. His parents afterward removed to Michigan, and came to Stephenson Co., Ill., in 1838. When 18 years of age, the Doctor went to Minnesota, where he lived till 1861, when he enlisted in the 2d U. S. Sharpshooters, organized by Col. Berdan. He re-enlisted, in 1864, as Hospital Steward and medical student. During his service in the army, he participated in many important battles and campaigns. His regiment was disbanded just before the close of the war, and he was discharged as a supernumerary. He continued the study of medicine after the close of the war. He took his first course of lectures at Charity College, Cleveland, Ohio; graduated, in 1879, at the Detroit Medical College. He began practice at Richland Center, Richland Co., Wis., where he lived three years; thence to Boscobel, where he was in practice seven years. He came to Fennimore in March, 1879. His wife was Miss Ida McClain, daughter of John McClain, and adopted daughter of Alfred Palmer, of Boscobel.

JUDSON PERKINS, proprietor of Railroad House, Fennimore; born in Rutland Co., Vt., in 1840. He came to Fennimore from Vermont, in February, 1866. He was engaged for a time in farming, afterward, in buying and shipping horses to Boston, Mass. He has been connected with the railroad for several years; built his hotel in 1880. His wife was Cornelia Clark, born in Vermont. His parents, Amasa and Lucy Perkins, came to Fennimore about 1864. They are now deceased.

DWIGHT TIMOTHY PARKER, Sr., deceased, was born Dec. 21, 1821, in the village of Malone, N. Y. When a mere child, his parents removed to Georgia, Franklin Co., Vt., on the shores of that beautiful and historic lake—Champlain. Enos, his father, a pious, industrious and highly respected citizen, was one of the pioneers of that region, and possessed much of that ambitious spirit and determination which so signally characterized his son in after years; he departed this life only some sixteen months previous to the demise of his son Dwight, in the 76th year of his age. Mary Todd, the mother, whose death occurred during her son's infancy, was a sister to the late Dr. John Todd, a devout Christian, warm-hearted and noble, and a woman of rare intelligence. Here on the farm, near Georgia Plains, where the rising sun appears among the grand old mountains, and sinks serenely behind the little lake, Dwight T. Parker, Sr., was reared. Assisting his father in the fields during the summer months, he was taught that lesson of industry, perseverance and frugality that was never to be forgotten. In the winter he trudged wearily through the deep snows of Northern Vermont to and from the simple district school, where he learned the rudiments of figures, in which he afterward proved himself so thoroughly proficient. For several years after his majority, a desire grew upon him for more of fame and worldly goods than seemed likely to be acquired among the hills and densely populated regions of old Vermont. Thus, in the year 1843, he emigrated westward, his objective point being Wisconsin, then

a Territory. Arriving here, his first stop was made at Watertown, penniless and among strangers. From here he journeyed, principally on foot, to Lancaster, Grant Co., having been prompted thither with an eye to mining, then the principal vocation in that section, arriving there with but a small bundle of clothing and \$12 in money, which constituted his entire worldly effects. Nothing daunted, he struck out for the mining business, but not having had sufficient experience, he met with poor success, and consequently pursued that occupation for only a brief period. The *Boscobel Journal* of 1870-71, in biographical sketches of his life, speaks of Mr. Parker as follows: "Coming to Lancaster, he sought, by working at whatever chanced to yield a return, to add to his greatly reduced purse, and we are told that while stopping with a distant relation, some question came up as to his poverty, and with a voice full of resolution, he replied that he would yet be at the top of the ladder. He took the job of digging for a mill a short distance from here, and by working night and day, completed his task, whereby he earned \$50 in less than a week. We give this instance as illustrative of the indomitable will and wonderful power of endurance which he possessed. And it was by this industrious spirit, perseverance and economy that he has secured for his family a competency. * * * * Abandoning the pick and shovel

for the book and rod, we next find him 'teaching the young idea how to shoot' in one of our smaller country towns. In 1848, we first hear of him in the mercantile business, as one of the firm of Kendall & Parker, located at Lancaster." Dec. 27, of this year, Mr. Parker was married to Miss Mary E., daughter of Lenhart O. Shrader, a man quite prominent in his time, whose sister, Mary E., was the estimable wife of Hon. Charles Dunn, first Chief Justice of Wisconsin, and afterward Judge of the 5th Wisconsin Circuit, and mother of Mrs. ex-Gov. Nelson Dewey, of this State. By this union four children were born, all of whom, together with the mother, are living—the eldest, a daughter, May Louise, and three sons, Dwight Timothy, Frank Arunah and Charles Dewey. The daughter, a woman of culture and refinement, and graduate both of music and letters, receiving instructions in the former at Rockford Female Seminary, and in the latter at Milwaukee Female College; was married in February, 1875, to Andrew J. Pipkin, at present a banker and prominent citizen of Boscobel. The eldest son, Dwight, Jr., an industrious, frugal and temperate young man, inheriting many of the father's excellent qualities, though "but 22 years of age, has," says a correspondent of the *Chicago Tribune* of 1879, "shown himself to be one of the best business men in the county." For several years prior to 1876, he pursued studies at Beloit College and the State University. In January, 1879, he was elected Vice President, and shortly afterward became President of the First National Bank of Boscobel, an institution founded by his father, and of which he was principal owner and President; but now in voluntary liquidation. Thus Dwight, Sr., was its first, and Dwight, Jr., its last presiding officer. Oct. 13, 1880, he was married to Cora B. Anderson, of Ripon, Wis. He resides on his fine stock farm in Fennimore. Frank A., the second son, 22 years of age, for some time attended school at Poughkeepsie, N. Y., and afterward, owing somewhat to ill health, visited Colorado; he is at present in New Orleans. Frank is a young man of excellent habits, and possessing great pride of character. The third and youngest son, Charles D., now in his 19th year, resides with his mother at Boscobel, at ending school. He, too, is a youth of bright prospects and fair promise.

In 1850, Mr. Parker bought the entire interest of his partner, Kendall, and for seven years stood alone, when, in 1857, discontinuing shortly afterward his Lancaster interest, he opened a branch store at Boscobel, calling it the "People's Store," a name that soon became nearly as familiar to the people of northern Grant and Crawford Counties as their own. He was really the founder and most prominent business man of the latter place, at the time of his death (1871) an enterprising village of about 1,500 inhabitants. "Up to five years ago," again quoting the *Journal*, "Mr. Parker's time and fortune were mainly devoted to merchandising, in which, with speculating in live-stock and grain, he was always successful. During the last five years, still furnishing capital for three stores, located at Boscobel, Wauzeka and Fennimore, Mr. Parker's time has been devoted mainly to farming and stock-raising. He is the owner of about 4,300 acres of wood and tillable land in this county." Speaking of his home farm, the *Prairie du Chien Courier*, in its obituary notice of Mr. Parker, says: "Though he was a successful merchant, he was equally as successful an agriculturist; he was a great lover of fine stock, and many of the most pleasant hours of his life were spent on his large farm. His stock farm, the largest in Grant Co., is situated in the town of Fennimore, about fourteen miles southward from Boscobel, and embraces nearly a score of eighties of the choicest lands in the State, 1,000 acres of which, in a body, are under an excellent state of cultivation, and the remainder heavily timbered land, a feature extremely important in connection with so large a farm. Here he put the best stock that could be found; and through a complete knowledge of the business, aided by a good judgment and well-directed energy, he became one of the most thorough and prosperous farmers in Wisconsin. This induced the members of the Grant County Agri-

cultural Society to elect him their President, a position which he filled for three years, and with great ability." Speaking of him at home on his farm, the *Journal* again remarks: "Mr. Parker, ever ready with his fine conversational powers, and a mind well filled with all there is good of poetry or prose, will keep his guest a willing listener for hours to his quotations from Burns and Saxe, giving the peculiar dialect of the former to perfection. * * * Of surety, Mr. Parker is peculiarly blest with a helpmate, one who has been chiefly instrumental by saving what he has by persevering industry secured. Mr. Parker is as liberal as hospitable; we could enumerate many instances of his generosity had we the time and space." Suffice to say, though a member of no religious denomination, he was a man of high moral character, and bequeathed, in several instances, sites for the erection of church edifices, in addition to liberal support otherwise; he gave generously for educational purposes, and those in adversity always found in him a friend and sympathizer. Mr. Parker was by far the heaviest real estate owner in Boscobel, being the possessor of at least a dozen buildings, and lots innumerable. In 1869, he erected here the largest and finest store building in Grant County; occupied after its completion by Parker, Hildebrand & Co.—Mr. Parker as the senior partner—a firm then doing the heaviest mercantile business in Southwestern Wisconsin. The last important business movement in which Mr. Parker distinguished himself was the establishment of the First National Bank of Boscobel, but a few weeks prior to his death, of which, as we have said, he was principal owner and President. The *Courier*, in its obituary notice of him, again adds: "He was a successful man in almost every enterprise he undertook, and at once gained the fullest confidence of his friends and patrons by his integrity and close attention to business. The hundreds with whom he was connected in business relations bear testimony to his just, honorable and generous dealings. He was singularly devoid of ostentation. Nothing was needed to secure his respect and confidence, but honesty and industry; and for nothing had he greater contempt than idleness and affectation." Having thus given an outline of Mr. Parker's life, brief mention will be made of his last moments and death. When, on the 19th day of May, 1871, after many months of suffering caused by a tumor, the result of an accident some two years previous, he was informed that there were no hopes of his recovery, he expressed no surprise, but regretted exceedingly that he might not be spared to see his children, whom he as fondly loved as ever did a parent, grown to honorable manhood and womanhood, under the guidance and protection of a father's loving hand. Thus, at 6:15 P. M., on the 21st day of May, 1871, his useful life went out, while yet "in the full strength of years;" and, to still more sadden the scene, at that period of the year when nature appears at her best, having but barely assumed that rich and perfect verdancy that so pleases life, as to cause not only the winged creatures to respond in sweetest notes and creation in general to acknowledge in their respective ways, the beauties of the Creator, but man himself to proclaim life, even at its worst, well worth the living.

THOMAS A. PALLETT, farmer, Sec. 25; P. O. Preston; born in England in 1828. His parents emigrated to the United States in 1840, and settled in Lee Co., Iowa. In 1847, Mr. Pallett went to St. Louis, where he learned the trade of a millwright, and lived about three years. He came to Grant Co. in 1850, and settled in the town of Jamestown; settled on his present farm of 160 acres in 1873. He was married to Elecia Dean, daughter of Mandley Dean. She was born in Pennsylvania in 1841, and removed to Grant Co. from Ohio in 1848. Her parents now live in the town of Ellenboro, Grant Co. Mr. Pallett's parents settled in Grant Co., town of Jamestown, in 1848. They are now deceased. Mr. Pallett's children are Thomas M., born in 1865, William, born in 1867; Lettie, born in 1869, and Mary E., born in 1875. Mr. Pallett built a flouring-mill in the town of Jamestown in 1860, which he owned and operated for thirteen years. He settled on his present farm in 1873, and engaged in farming.

ALLEN PRITCHETT, grocer and restaurant-keeper, Fennimore. He was born in Fennimore, Grant Co., Wis., in 1848, and has been a resident of the above town up to the present date. He married Alice Day in the year 1871. Mrs. Pritchett is also a native of Fennimore, Grant Co., Wis. They have four children—Elmer, Glenn, Burt and Mabel. Mr. Pritchett is a prominent citizen of the village of Fennimore.

JOHN ROBINSON, Jr., farmer, Sec. 27; P. O. Fennimore; son of John Robinson, Sr. (deceased), one of the earliest settlers of Grant Co., who was born in Manchester, England, in 1809, and came to the United States when a young man. He resided on Long Island for some time, where he was married to Catharine Coil. They came to Galena, Ill., about 1836, and soon after went to what is now Iowa Co., Wis., making him one of the early pioneers of the State. He came to what is now the town of Wingville, Grant Co., about 1840, where he rented a farm for two or three years. He then settled in the town of Fennimore, where he resided till his death, which occurred in 1872. He was a soldier in the war

of the rebellion; enlisted, in 1861, in the 7th W. V. I., and was discharged the following year for disability. His death resulted from the bite of a rattlesnake. He had five children, who grew to maturity—George, born in 1839, enlisted in the 20th W. V. I., and died near Springfield, Mo., during the war, of typhoid fever; Mary, now Mrs. Even E. Johnson; Frank, John and Agnes. John was born in the town of Fennimore, Dec. 25, 1845, and married Mariette Byerly. They have three children—Ann Etta, Bertha and Pearl.

LEANDER C. ROGERS, farmer and thresher; P. O. Fennimore; son of Joseph G. Rogers. He was born in the town of Middlesex, Yates Co., N. Y., in 1833. He came to Waukesha Co., Wis., in 1842. In November, 1852, he came to Grant Co. with his father. The latter, at that time, entered a quarter section of land in the town of North Lancaster, where his father settled in 1856, and where he resided till his death. Leander C. came to Grant Co. permanently in 1854, and entered quarter of Sec. 25, in what is now the town of Mount Ida. He has been a resident of this county since that time. He settled in the village of Fennimore in the spring of 1874. He was married to Emily A. Luse, born in Pennsylvania. They have three children—Seth C., Gra C. and Edna C.

CRAVEN SHUTTLEWORTH, merchant, Fennimore; born in Yorkshire, England, in 1825; came to the United States in 1856; lived in Madison about one year; thence to Crawford Co., where he engaged in farming; thence to Grant Co., and purchased 80 acres of land in the town of Fennimore, Sec. 29, from Frederick Bronson, of New York City. He engaged in the mercantile business in Fennimore in the spring of 1875. He married, in England, Nancy Kaley, born in Yorkshire. They have six sons and two daughters—Job, Ellen, Farrand, Fred, Willie, Craven, Ina and Maggie.

CLYDE R. SHOWALTER, teacher of high school, Fennimore; son of John Showalter, who was born in Pennsylvania in 1833, and came to Lancaster when a young man. He married Phebe Roberts, who was born in Kentucky, and came to Grant Co. in 1840. They had two children—Clyde and Portia. Mr. John Showalter enlisted on the breaking out of the rebellion, in the 2d Wisconsin Cavalry; served three years, and re-enlisted for the war. He died from disease contracted in the army in June, 1865. Clyde graduated at the State Normal School at Platteville, in 1879.

MELFORD P. SMITH, farmer, Sec. 31; P. O. Fennimore; was born in Wayne Co., Penn., in 1829. He was married in Pennsylvania to Ada Adams, daughter of David Adams. In the spring of 1853, he removed to Oswego, Kendall Co., Ill. In the fall of that year, he came to Grant Co., and settled on his present farm. Has three children—Ira, Charles and Ida. The last two are students of the State Normal School at Platteville. His farm contains 160 acres; the farm was State land, and contained no improvements when he purchased it. He is one of the prominent early settlers of Grant Co. He came here poor, and by honest industry has secured a competency. Has been honored with most of the town offices for a series of years; was Treasurer nine years, Town Clerk seven years, and still holds that office; was Assessor six years, also Justice of the Peace several years.

JOSHUA SANDERS, farmer, Sec. 36; P. O. Fennimore; born in Devonshire, England, in 1837. Emigrated to Illinois and settled at Freeport about 1849; his father resided at Freeport for some time, when he removed to Crawford Co., Wis.; he now lives in the State of Iowa. Joshua came to Wisconsin about 1859, but soon after went to Missouri; he returned to Wisconsin in 1861, and settled on his present farm. His wife was Mary Shultz, daughter of Jacob Shultz. They have seven children—Rella J., Minnie M., Caroline B., Eliza M., Nellie G., Tirzah and an infant. Has 75 acres of land.

I. W. SWITZER, farmer, Sec. 8; son of John Switzer, one of the earliest settlers of Grant Co.; Mr. John Switzer was born in Virginia Feb. 20, 1803; his parents removed to the Territory of Ohio, when he was 3 years of age, and afterward to Indiana. He came to Grant Co. in 1840, and settled on Sec. 8, town of Fennimore. He was married March 1, 1842, to Mary A. C. Dillon, born in Missouri. Mr. John Switzer died Jan. 11, 1863. Mrs. Switzer still resides at the homestead. Her children are Mary A., born Sept. 17, 1844; I. W., Dec. 5, 1846; Sarah E., Aug. 11, 1849; Eliza, July 30, 1853; Stella, Oct. 8, 1858, and Ada, April 7, 1861. The children were all born at the homestead. I. W. was married to Pora, daughter of Mr. John Dinsdale; they have two children—Myrta and Bertram.

THOMAS TORMEY, farmer and stock-raiser, Sec. 26; P. O. Fennimore; was born in County Westmeath, Ireland, on Christmas, December, 1826. He emigrated to this country with his father's family when he was 20 years of age. His mother died at sea on the passage to this country. His father brought three children with him from Ireland; the oldest son had come over in 1835. The family lived for a few months in the city of Lowell, Mass., where Thomas learned the business of slating.

The family came to the town of Highland, Iowa Co., in May, 1848, where the father died December, 1849. Thomas Tormey was married in Iowa Co. July 8, 1850, to Honora Norris. She was born in Ireland; she died July 27, 1872. His present wife was Margaret Lawless, born at Patch Grove, Grant Co., October, 1842; had eight children by first marriage—two sons and six daughters, all residents of Grant Co.; has three children by his present wife—one son and two daughters. He is one of the most prominent stock-dealers of Grant Co.; is an extensive land owner—has 720 acres in town of Fennimore, and 320 acres in town of Liberty. He has been Chairman of Town Board three years.

WILLIAM WEAVER, manufacturer of boots and shoes, Fennimore; he was born in Niagara Co., N. Y.; came to Grant Co. in March, 1873, and in the spring of 1875, established his present business; Aug. 20, 1862, he enlisted in Co. F, 33d W. V. I., and served until the close of the war. In 1867, he was married to Miss Sarah A. Daniels, a native of Allegany Co., N. Y.; they have two sons and two daughters.

JACOB WOLF, M. D., Fennimore; born in Wurtemberg, Germany; graduated at Tubingen University; he occupied the position of physician and surgeon in the German army for five years; He came to the United States in 1868; he located in Crawford Co., Ohio, where he practiced about nine years; located in Fennimore in August, 1879. He was married, Sept. 20, 1879, to Anna Youss, born in Germany; they have two sons and two daughters. The Doctor is a prominent member of the I. O. O. F.; also of the United Workmen.

PHILANDER WRIGHT, retired; Fennimore; born in the town of Belcher, Hampden Co., Mass., in 1818; lived in Massachusetts till 1835, when he removed with his father to Pennsylvania; his mother died when he was about 14 years of age; came to Grant Co. in 1847, and settled in the town of Fennimore; has been a resident of this town since that time, except one year spent in Lancaster. His wife was Sarah Cramer, daughter of Enos and Anna Cramer, born in Wayne Co., Penn.; they have had seven children, six of whom are living—J. N., Joel W., Charles O., Albert C., Mary E. and Roland N.; lost first child, Esther Ann.

JONATHAN WALKER, farmer, Sec. 30; P. O. Fennimore; he is a son of Joseph Walker, who was born in the State of Massachusetts; he moved to the State of New York, and thence to Michigan; he came with his family to Grant Co. while the State was yet a Territory, and settled in the town of Fennimore; he died in the fall of 1880; had five sons and two daughters, four sons and one daughter still living. Jonathan was born in the State of New York, August, 1833; came to Wisconsin with his parents. He married Louisa Eldred, who died in January, 1877; has ten children—five sons and five daughters. Mr. Walker enlisted in the 33d W. V. I., served till the close of the war; settled on present farm in the spring of 1871; farm contains 285 acres of land.

H. H. WEFEL, farmer and stock-raiser, Sec. 19; P. O. Fennimore; was born in Hanover, Germany, in 1837; came to the United States in 1853; lived in Richmond, Ind., about one year, thence to Cincinnati, Ohio, for about three years, afterward to Kentucky; came to Grant Co. in the spring of 1859, and purchased his present farm; has fine improvements, all of which he made himself; his farm contains 320 acres; has also a farm of 400 acres in Worth Co., Iowa. His wife was Mary Plobet, born in Indiana; they have three children. Mr. Wefel is one of the successful farmers of the town of Fennimore.

TOWN OF WINGVILLE.

REV. JOHN B. BACHMAN, Pastor of M. E. Church, Montfort; was born at Millheim, Center Co., Penn., Sept. 22, 1828. His father died when he was 18 years of age. He came to Green Co., Wis., in the spring of 1848; attended school at the Green County Seminary for three years; was afterward a teacher in that institution for three years; entered the ministry in 1857; has had charge of churches at Oregon, Dane Co., two years; Lodi, Columbia Co., two years; Mauston, Juneau Co.; Portage City; returned to Oregon; Baraboo one year; returned to Lodi. He was then Presiding Elder of Kilbourn City District from 1868 to 1872; returned to Mauston, Sparta, Eau Claire, Reedsburg, Black Earth, Fayette; came to Montfort Oct. 1, 1880. His wife was Miss Eliza J. Field, born in Ontario Co., N. Y.; they have two children—E. Walton, born in August, 1854, now a student of the Medical Department of Wisconsin State University, and Allie, born October, 1863.

EDWARD BELL, merchant, Montfort; was born in England in 1816. He was married in 1838 to Mary Walker (born in England, in the fall of 1816); they emigrated to the United States in 1839, and settled in Platteville, where he had charge of a saw-mill for about one year, then removed to Potosi, where he lived two or three years engaged in smelting ore, then returned to Platteville and engaged in farming; afterward to the town of Smelser for five years; returned to Potosi; came to Montfort October, 1851; he took charge of a furnace for Lewis & Palliser about two years, then engaged for about a year in mining, after which he entered the mercantile business. Has had ten children, four of whom are living—Margaret (now Mrs. James Chandler), Mary E. (now Mrs. James M. Gaston), George S. and William M. John enlisted in 1862 in the 20th W. V. I. and went into camp with the regiment at Madison; he was soon after taken sick of typhoid fever, came home and died of that disease. Two other sons, William and Henry, contracted the same disease, and the three brothers died within a few weeks of one another. Charles, another son, died during the same year. Lost two other children—Beatrice and Thomas.

JOHN BOWERS, farmer, Sec. 14; P. O. Montfort; was born in Wurtemberg, Germany, in 1835; came to the United States in 1854, lived one year in the State of New York and then went to Galena, Ill., where he lived several years. He then went to Platteville, where he was married to Charlotte Williams, born in Cornwall, England, and daughter of Thomas Williams, who came to Grant Co. in 1847. Have seven children—John Albert, Rosena, James, William S., Franklin J., Elizabeth A. and Minnie. Settled on present farm from Iowa Co., in 1878.

D. M. BILLINGS, farmer, Sec. 20; P. O. Montfort; son of Henry M. Billings, who emigrated from Vermont to Mineral Point, Wis., in 1834; removed to Centerville about 1835, and engaged in mining, where he lived till 1847, when he removed to the town of Eden, Iowa Co., where he resided till his death, February, 1861. His mother, Mrs. Ann Billings, resides at the homestead in Iowa Co. D. M. was born in Iowa Co., October, 1849. Married Margaret Greene, daughter of S. D. Greene. Has four children—Minnie, Frank, Fred and Mabel. Located where he now lives in the spring of 1878. Mr. Billings was formerly engaged in the mercantile business, Montfort.

JOSEPH P. CHANDLER, farmer, Sec. 22; P. O. Montfort; son of Clayborn Chandler. (See biography of James S. Chandler.) Was born in Monticello, Lewis Co., Mo., August, 1840; came to the Territory of Wisconsin with his father's family. He was married to Louisa, daughter of Daniel Thomas, who came to Grant Co. from Pennsylvania, in 1859. Mr. and Mrs. Chandler have ten children, five sons and five daughters—Frank, Fred, May, Thomas, Josie, Lizzie, Hattie, Clayborn, Clara and Henry. Lost two children. Mr. Chandler settled on his present farm of 260 acres in the fall of 1861.

ELISHA CARRINGTON, farmer; P. O. Montfort; born in the town of Bristol, Ontario Co., N. Y., in 1832; his father died when he was an infant; when 10 years of age, he removed with his mother to the State of Ohio, but he returned to the State of New York in the spring of 1849; he went back to Ohio in 1851; he came to Grant Co. in 1852; he removed to Iowa Co. in March, 1866, where he lived about two years; he then settled in the town of Clifton, Grant Co.; he has been a resident of Iowa and Grant Counties since he first came to Wisconsin; he settled in the village of Montfort Dec. 24, 1877. He was married to Caroline, daughter of Adam Keith; her father came to Grant Co. about 1847; he now lives in Nebraska. Mr. and Mrs. Carrington have ten children, four sons and six daughters—Gertrude L., Ella J., Jane L., William G., Adam M., Henrietta K., Elisha L., Bertha D. and Mabel S. Mr. Carrington is the present Town Treasurer of Wingville; he was Chairman of the Town Board of Clifton two years, and of the town of Wingville in 1880.

JAMES S. CHANDLER, Montfort; son of Clayborn and Mary J. Chandler; father was born in Boone Co., Ky.; he removed to Missouri, where he married; he came to Grant Co. with his family in the fall of 1844, and located at Potosi, where he lived for some time, and then returned to Missouri; returned to Wisconsin with his family in 1847, and settled in the town of Highland, Iowa Co., where he lived two years, and then settled in the town of Wingville; he was engaged in the mercantile business in Montfort from 1850 until 1856, then removed to Minnesota; was absent about three years, when he returned to Grant Co.; he died at Boscobel in 1863; James S. was born in Lewis Co., Mo., in 1835; in 1850, when only 15 years of age, he went by the overland route to California; was absent about three years. He was married to Margaret A. Bell, a daughter of Edward Bell; she was born in Grant Co.

MRS. MARGARET CHANEY, Centerville, Iowa Co.; widow of Ezekiel Chaney, who was born in Kentucky about 1820; his parents emigrated to Illinois when he was a boy; he came at an early day to the mining regions of this part of the State of Wisconsin. He was married in Iowa Co. to

Mrs. John Russell, formerly Miss Hughes. Mr. Chaney followed the occupation of mining for many years. He enlisted in 1861 in the 11th W. V. I.; was severely wounded at the siege of Vicksburg, and died at Memphis, Tenn., in the fall of 1863. Mrs. Chaney has three children by her first husband; she had five by second marriage, four of whom are living—William H., Lewis, Isabelle and Clara; all born in Iowa Co.; William H. was born at Centerville in 1855.

THOMAS J. DAVIS, hardware merchant, Montfort; son of Benjamin J. Davis, who settled in Iowa Co. about 1844; his parents were natives of Wales; they settled in the town of Ridgeway, from the State of Ohio; Thomas was born in the town of Ridgeway in 1852; he engaged in the hardware business with his brother Daniel in the village of Arena, Iowa Co.; afterward engaged in teaching several terms of school; he came to Montfort and engaged in his present business Nov. 14, 1878.

ALEXANDER DUNCAN, harness-maker, Montfort; born in Aberdeen, Scotland, in 1830; his parents emigrated to Canada in 1836, and to Lockport, Will Co., Ill., about 1839, to Racine Co., Wis., about 1842, and to Iowa Co. about 1847; in the summer of 1849, Mr. Duncan was engaged as raftman on the Wisconsin River, where he had the misfortune to lose his left leg, having it crushed between a raft and the rocks at Conit's Rapids; this misfortune induced him to learn his trade, that of harness-making; he was engaged as an apprentice at Galena, Ill., and at Dodgeville, Wis.; he came to Montfort in May, 1870, and took charge of a harness-shop; he bought the business in December, 1880. He married Mrs. Frances R. Shaddock, daughter of Richard H. Palmer. Mr. Palmer is one of the earliest pioneers of Wisconsin; he was born in Halifax Co., Va., in 1805; he went to Galeoa, Ill., in 1826; settled near Platteville, Grant Co., in 1830; afterward removed to La Fayette Co., thence to Dubuque, afterward to Jo Daviess Co., Ill.; he came to Montfort in 1851, and was a soldier in the Black Hawk war; has been engaged in mining the most of his life; has been married twice; had ten children by first wife and one by second; has five children living. Mr. and Mrs. Duncan have two children—George and Francis A. Mrs. Duncan has three children by first marriage—Eva, William and Lucretia.

G. W. DAVIS, harness-maker, Montfort; son of R. J. Davis, of Iowa Co.; he was born in the town of Ridgeway, Iowa Co., in 1856; he served his apprenticeship with Mr. M. C. Meffert, of Arena, Wis.; he engaged in business at Lime Springs, Iowa, in 1877; came to Montfort in December, 1880; his wife was Kate E. Wilson, daughter of Job Wilson, of Iowa Co.

DR. PETER DE WITT, Montfort; born in New Jersey in 1804; he removed to the State of Ohio when about 14 years of age, with his parents; he came to Wisconsin in the summer of 1852, and settled in the town of Kendall, La Fayette Co.; he came to Montfort in November, 1856; he was engaged in the practice of medicine for twenty-five years. He was married in Ohio to Levina Bowles; they have five children—Elizabeth, Joseph M., Mary A., Thomas, born in Ohio in 1834; John, born in 1836; enlisted in the 6th Mo. V. C. in 1861, and served till the close of the war as First Lieutenant; he was assassinated at Matamoras, Mexico, in 1866; Isaac, born in 1843; enlisted in the 20th W. V. I. in 1862; he participated in a number of important campaigns and battles; was at the siege and surrender of Vicksburg; at Spanish Fort and Fort Morgan, etc.; he served till the close of the war. Dr. De Witt's present wife was Mrs. Sarah Morrill.

ROBERT DIGGLE, farmer, Sec. 23; P. O. Montfort; born in England in 1826; he emigrated to Philadelphia in August, 1854, where he was engaged in the calico print works of that city, which business he had learned in England. He came to Grant Co. in October, 1869, and settled on his present farm. He was married in England to Betsey Whittaker, who died in Philadelphia; his present wife was Mrs. Sarah Shapcott, formerly Miss Powell, born in Somersetshire, England, about 1822. Mr. Diggle had six children by his first marriage, four of whom are living, viz.: Joseph, James, George and John. Mrs. Diggle has four sons by her first marriage—William, John, Henry and Richard. Mr. D.'s farm contains 160 acres. He and wife are members of the Advent Church.

JOHN DUNN, P. O. Muscoda; son of Judge Dunn; a native of Illinois, born Feb. 14, 1824; he came to this State with his parents in 1837, and located with them at Oak Grove, La Fayette Co., where he engaged in farming and field-surveying for three years; in 1850, he made a trip to California (overland route), and remained there ten years; the first year he engaged in mining, and the succeeding years in stock-raising; on his return to this State, he bought a farm in the town of Wingville, which he still owns and manages. He was married in 1860 to Miss Elizabeth Howard, a native of Illinois; they have five sons and four daughters; the two oldest sons are in Kansas, engaged in stock-raising; the remaining children are at home.

HENRY EASTMAN, banker and lumber dealer, Montfort; born in Canada in 1830; he came to Wisconsin with his parents (the latter now deceased) in the fall of 1845, and settled in the town of Smelser, Grant Co.; he went to California via the isthmus in 1849, and engaged in mining, where he stayed two years; he then engaged in business in Guttenburg, Iowa, for one and a half years; thence to Galena, Ill., where he engaged in the lumber trade, where he remained about six years; he then removed to Jackson Co., Wis., and engaged in the manufacture of lumber, where he stayed about four years, when he returned to Grant Co. and located at Hazel Green, where he kept hotel; he came to Montfort in 1863. Was married to Mary Honeywell; they have four children—Mortoo H., Maggie, Cora B. and Orval B.

LEROY ELLIS, farmer, Sec. 23; P. O. Montfort; born in Perry Co., Ohio, in 1835; he was brought up in Washington Co., in that State; he went to Indiana in 1854, but returned to Ohio the following year; he removed to Richland Co. in 1856, where he stayed one year; thence to Iowa Co., where he lived till 1861, when he enlisted in the 3d W. V. I.; served two years, when he was discharged for disability; he returned to Iowa Co. and was married to Mary A. Culbertson, born in Iowa Co.; they have four children—Frank B., George R., Jennie May and Mary L. Mr. Ellis bought his present farm in April, 1880.

CHRISTOPHER FRANKLAND, proprietor of Frankland House, Montfort; was born in Yorkshire, England, in 1825; he came to the United States in 1849 and settled in the village of Jefferson, town of Hazel Green, Grant Co., thence to Fairview, in the same town, and engaged in mining; he first came to Montfort in 1853, where he was engaged in work for a time in the furnace; he returned to Fairview in 1854 and engaged in butchering; thence to the town of Benton, La Fayette Co., where he lived about seven years, engaged in farming and butchering; he then purchased a hotel in the town of New Diggings; afterward to the village of Benton, where he purchased and kept the United States House; thence to Montfort in April, 1874, and purchased his present hotel of J. S. Chandler; was also engaged in butchering for two years. He was married in Yorkshire, to Miss Elizabeth Hird; they have eight children, six sons and two daughters—John (now in Colorado), Elizabeth (now Mrs. James Bunt, of Montfort), Jane A. (now Mrs. James Hoskin, of Benton), Edward, James, Samuel, Christopher and William.

E. W. FOWLER, proprietor of saloon, Montfort; was born in Sussex Co., N. J.; brought up in Susquehanna Co., Penn.; he came to Grant Co. and settled at Boscobel, and engaged in his present occupation; he came to Montfort July, 1880. Married Rosalie L. Stephens.

JAMES GASTON, farmer, Sec. 28; P. O. Montfort; was born in Chester Co., Penn., in 1815; his parents died when he was a child; he removed to Champaign Co., Ohio, when 21 years of age; he came to Grant Co. in 1847, and settled in the northeast part of Fennimore; he settled on his present farm in 1850, which he purchased of Washington Bennett, the original settler. He was married in Ohio, to Ellen Chapman, who was born in 1819. Mr. Gaston's farm contains 240 acres. He and wife are members of the Methodist Episcopal Church.

GOTTFRIED HESS, wagon manufacturer; was born in Prussia, Germany, in 1824; he came to the United States in 1850; he lived a few months in Pittsburgh, Penn., thence to Milwaukee, where he lived till the spring of 1851, when he came to Grant Co. Mr. Hess entered the Prussian army in 1846, and served about four years; he enlisted Jan. 11, 1865, in the 44th W. V. I., and served until the close of the war; he was a non-commissioned officer in both the Prussian and Union armies. He was married to Lucinda Schree, born in Pennsylvania in 1834; they have four children—Lucelia, George, Eta and Ellen.

REV. NELSON A. HITCHCOCK, minister of the Second Advent Christian Conference, Montfort; born in Windsor Co., Vt., July 9, 1812; when he was about 5 years of age, he removed with his parents to Otsego Co., N. Y.; in 1822, removed to Oneida Co.; in 1828, he removed with his father's family to the town of Mexico, Oswego Co. Here he was married in 1833 to Matilda Avery, born in the State of New York. He began his ministry in 1832, as an exhorter among the Methodist people; in 1836, owing to doctrinal differences, he separated from the Methodist denomination and joined the New York Central Christian Conference; in 1843, he began preaching the doctrines of the Second Advent Church, which resulted in his separating from the Christian Conference. He removed to Milwaukee in July, 1846; he preached there for a time, where he established a church; he has been preaching at different points in Wisconsin and Illinois since that time, though owing to declining health, he discontinued regular preaching in 1873; he settled in Fennimore in that year; came to Montfort in May, 1879. He has five children—Martha M. Miller, whose first husband—Willard W. Shepard—was killed at the battle of Pea Ridge; Mary M. Parker; Philo, now Pastor of a Second Advent Church at Mifflin; William A.; and Alvirus N., Pastor of the Congregational Church at Mazomanie; has lost three children.

MRS. NANCY J. HYDE, Montfort; widow of the late David Hyde, who was born in the State of Connecticut in 1797; when he was 9 years of age, his parents removed to the State of New York, where he was married to Martha Cowan, who died in the State of New York; he afterward came to the State of Wisconsin and settled in the town of Mifflin, Iowa Co., where he was married to the subject of this sketch, then Nancy J. Lightner; they were married in 1865; came to Montfort in December, 1873, where Mr. Hyde died in 1875. Mrs. Hyde was born in Huntingdon Co., Penn., in September, 1825; she was married to Mr. Joseph P. Brought, who died in Pennsylvania; she has one son by her first marriage—William M. Brought; she had one daughter by her second marriage—Rachel S. Hyde, who died in 1876, in her tenth year; four children of Mr. Hyde by his first marriage are living. Mrs. Hyde is a member of the M. E. Church

GEORGE HELLER, farmer and miner, Sec. 13; P. O. Montfort; son of Matthew Heller, who emigrated from Germany to Iowa Co. in 1841 and settled in the town of Highland, where he still lives; George was born in Germany in December, 1838. He was married to Nancy Parish; has two children—Victor and Nancy.

MARIDA HOWARD, barber, Montfort; born in Louisville, Ky., Sept. 27, 1853; he came to Platteville, Wis., in 1865, where he learned his trade, and where he lived until he came to Montfort May 17, 1878.

GEORGE W. KENDRICK, Montfort; born in Frederick Co., Va., in 1819; he came to Wisconsin in the fall of 1845; he lived in the town of Mifflin, Iowa Co., till the following year, when he engaged to work on a farm in the town of Clifton, Grant Co. He was married to Sarah A. Tucker in the spring of 1847; she died in the spring of 1862; his second wife was Catharine Herman; he has three children—Sarah J., Edward J. and Eleanor A. His father, George Kendrick, was also a native of Frederick Co., Va., and a soldier in the war of 1812; he came to Grant Co. in 1848, and died of cholera soon after. Mr. Kendrick's present wife was Miss Pamela Messersmith, born in Alton, Ill., in 1824; married to Mr. Kendrick in October, 1877; her father, John Messersmith, was born in Pennsylvania in 1790, where he was married to Elizabeth Schell; he went to Galena, Ill., in the spring of 1827, and located near Dodgeville in the fall of that year, where he removed his family from Galena in the fall of 1828; he located a farm here, and also engaged in the business of mining and smelting; he was at one time the owner of valuable mining lands; he died on his farm in the fall of 1855; his wife died in Madison in 1876, in her 84th year. Mr. M. had ten children—four sons and six daughters; four daughters and one son are still living—Henry, resides in Jasper Co., Mo.; Mary, now Mrs. William H. Virgin; Pamela, now Mrs. Kendrick; Matilda; Charlotte, now Mrs. Davis, resides in Missouri; names of children deceased are John, George, William, Eliza and Jane.

DAVID KITCH, farmer, Sec. 22; P. O. Montfort; born in Mercer Co., Penn., in 1830. His father, Martin Kitch, died when he was an infant. His mother afterward married Mr. McLimans. The family emigrated to the Territory of Wisconsin in May, 1845; they reached Galena on the 2d of May of that year, and Willow Springs, Iowa Co., Wis., on the 9th of that month, and settled near Mineral Point in the fall of that year; the family afterward settled in the town of Fennimore; his mother now lives in that village. Mr. McLimans died in the fall of 1877. Mr. Kitch has been resident of Grant and Iowa Cos. since 1845. He was married to Sylvia Merritt, daughter of Aaron and Isabel, born in Trumbull Co., Ohio, in 1826; she came to Wisconsin in 1849. They have had four children, two of whom are living—Frank L. and Minnie I.; children deceased are Martin, an infant, and Milton, who was married to Fanny Welles, and died February, 1880, leaving a widow and one child—Fred M. Mr. Kitch's farm contains 120 acres.

JOSEPH H. LINCOLN, wagon-maker and blacksmith, Montfort; born in Chester Co., Penn., in 1827. He came to Wisconsin with his parents, who settled in Platteville in June, 1844. His father was Ezariah Lincoln; parents now deceased; they had seven children, four sons and three daughters; the sons and one daughter are still living. Mr. Lincoln came to Montfort, and engaged in business in 1851. He was married to Margaret Laird, daughter of Thomas Laird; she died May, 1870. He has three children—Mary E., Eva O., Ezariah T.; lost one child.

MRS. ELIZABETH LAIRD, widow of Thomas Laird, who was born in Ireland Nov. 15, 1815. He emigrated with his parents to Philadelphia, when a child, and where he resided till he had reached manhood. He was married to Mrs. Laird, then Elizabeth Twining, daughter of John Twining, born in Bucks Co., Penn., May 2, 1819. They were married July 23, 1835. About 1835, they removed to Delaware, where Mr. Laird was engaged in a cotton factory; they removed to Illinois

about 1842; they settled at Galena in 1844, and came to Grant Co. about 1846; settled in Wingville about 1850. Mr. Laird was engaged in various occupations. He died in 1877. Mrs. Laird has three sons and five daughters—Sarah (now Mrs. Ira Scofield), Nancy (now Mrs. Thomas DeWitt), Sophrona, Susan (now Mrs. Robert Moran), Thomas, Jessie F., Fremont and Seward. Thomas was born in Wingville October, 1853; is engaged in civil engineering. Mrs. Laird has lost five children; all died in infancy except Mrs. Thomas Lincoln.

MRS. ANN LEADBETTER, Montfort; was born in Butler Co., near Cincinnati, Ohio, in 1814. She removed to what is now Peoria, Ill., in 1827, and thence to Galena the following year. She is one of the few early settlers remaining whose memories date back to years preceding the noted Black Hawk war, and who remember vividly the stirring events of that period. She was married in 1828, near Galena, to Mr. Samuel Moore. They came to Grant Co. in 1848. Her second husband, Mr. Leadbetter, died in California. She has seven children—Nancy Jane Moore, Eugene Moore, Alexander Moore and Susan Moore (now Mrs. Parish); by second marriage—Martha, Lucretia and Asopheena.

EDWARD B. MONTEITH, farmer, Sec. 30; P. O. Montfort; was born in Wigtonshire, Scotland, March, 1822; is a brother of Mr. John Monteith, of the town of Fennimore. He came to the United States in 1848; he lived in Vermont for about three years, thence to Janesville, Wis., where he lived about three years. Is a stone-mason by trade. He came to Platteville in 1854, and was employed in the building of the State Normal School building of that village. He settled on a farm in the town of Liberty; came to his present location March, 1869, which he purchased of Mr. James McCubben. Mrs. Monteith was born in 1823. They have seven children—Elizabeth (now Mrs. Jacob Smith), Jessie (now Mrs. Alexander Smith), James R., Isabel (now Mrs. Walter Smith), Martha J. (now Mrs. James Preston), Mary A., Margaret E. (now Mrs. Miles Helm). Mr. Monteith's farm contains about 400 acres.

JAMES R. MONTEITH, farmer, Sec. 19; P. O. Montfort; son of Edward B. Monteith; born in Janesville, Wis., in 1853. Married Lizzie A. Borger, daughter of Daniel Borger; she was born in Wisconsin; they have four children—Margaret A., Nettie A., James I. and Llewellyn C. His farm contains 80 acres.

ALONZO D. MILLS, farmer, Sec. 15; P. O. Montfort; was born in the town of Batavia, Genesee Co., N. Y., in 1812; his parents removed to the State of Illinois when he was a child; he came to Mineral Point in the then Territory of Wisconsin in 1837; the following year he settled at Centerville, where he lived about eight years; he then settled on his present farm, where he has since resided; has been twice married. His first wife was Miss Emily Jane Townsend, whom he married at Centerville; she was born in Wisconsin. His present wife was Mary E. Denson, born in Ireland; has had fifteen children—seven sons and five daughters are living. Mr. Mills was appointed Justice of the Peace by Gov. Dodge when Wisconsin was yet a Territory; he has held that office for about twenty years.

AUGUSTUS MATTHEWS, station agent, Montfort; was born in Washington Co., Ohio; he came to Richland Co., Wis., from Morgan Co., Ohio, in March, 1857; he resided in Richland Co. till 1862; he then removed to Blue River Station, on the Madison & Prairie du Chien Railroad, where he resided till June, 1880, when he assumed his present position. He was married to Elizabeth Boswell, born in Ohio, of Quaker parentage; they have four children—Ella (now telegraph operator and book-keeper at the station), Clara, Althea and Edward E.

HENRY E. MOORE, Montfort; born in the town of Mifflin, Iowa Co., March, 1845; son of Daniel B. Moore, a native of Kentucky, one of the early settlers of Iowa Co. He settled in the town of Mifflin, where he resided till his death, which occurred in the fall of 1845; Mr. Moore's mother, now Mrs. Orrin Goodrich, was America Parish, daughter of Levi Parish; parents had nine children, seven of whom are living; Henry E. entered the army as teanster in 1864 and served about six months; his first wife was Mary Blackney; present wife was Susan Nolan; has five children by first wife—Levi, John, Henry, Adelaide and Samuel; one by present wife—Maud.

THOMAS S. PRESTON, Sec. 28; P. O. Preston; born in Grant Co. in 1857; his farm contains 240 acres; he is the son of Matthew Preston, one of the prominent farmers of the town of Fennimore; born in Yorkshire, Eng., in 1829. Married to Elizabeth Little, also born in Yorkshire, Eng.; emigrated to the United States in March, 1851; first settled in Sec. 18, town of Wingville, where he resided till 1861, when he settled in the town of Fennimore, where he now resides; his farm contains 440 acres, with fine improvements, all of which he made himself. Mr. Preston lost his first wife in 1865; he returned to England in 1868 and married his present wife, Abigail I. Hazeltine; he has six children by first marriage—Jane, James, Thomas, John, Margaret and Matthew; has seven children by present marriage—Lizzie, Charles, Albert, Wesley, Mary, Fred and Eli.

HENRY PARISH, miner and farmer, Sec. 12; P. O. Montfort; born in Grant Co. about 1843; his father, Dawson Parish, was one of the earliest settlers of Grant Co.; he was married to Alice Russell, born at Sauk City, Wis., in 1846; they have three children—Jennie B., Walter and Leo R. A sad accident occurred to the family of Mr. Parish Aug. 3, 1880. Two bright and promising boys of Mr. and Mrs. Parish—Loren R. and William H., aged respectively 11½ and 9½ years, on the morning of the day mentioned, started for Mineral Point with a wagon-load of mineral, called black-jack; by some unknown cause the wagon was capsized, and the boys were buried beneath the heavy metal, and, when found, life was extinct.

JAMES PETTYJOHN, miller at Blue River Mills; son of Garrison and Martha Pettyjohn. His father is a native of Georgia, his mother of the State of Illinois; they came to the Territory of Wisconsin about 1840. They were married at Platteville. His parents were residents of Grant and Iowa Cos. until they removed to Minnesota in the spring of 1880. His parents have six children—James, Flora, Adda, Reuben, Frank and George. James was born in Iowa Co. in 1853. He learned his trade at Liberty Mills, near Lancaster.

WILLIAM STEVENS, Montfort; was born in Cornwall, England, October, 1797; he was brought up to various occupations, including mining, smelting, etc.; was engaged in Belgium at the business of smelting for a time. He was married, in Cornwall, to Jane Mann; emigrated to Wisconsin in 1843; came first to Hazel Green, thence to Benton, in what is now La Fayette Co. In the spring of 1846, he returned to Cornwall and brought over his family, consisting of his wife and ten children; he settled near Benton and engaged in mining; he resided in Benton about ten years; he then removed to Dodgeville, where he lived many years engaged in farming; he settled permanently in Montfort about 1867; he purchased the Wingville Hotel when he resided in Benton, which he owned for many years. Mr. Stevens was engaged in mining, more or less, until 1876, and still owns valuable mining interests. His first wife died in Dodgeville; his present wife was Mrs. Enoch Bernard; her maiden name was Emily De Witt, daughter of Isaac De Witt. Mr. Stevens had thirteen children by his first wife, ten of whom are living, six sons and four daughters; has three children by his present wife, two sons and one daughter. Mrs. Stevens had seven children by her first marriage, five of whom are living. Mr. Stevens, though now in his 84th year, retains much of the vigor of his earlier life; he possesses, naturally, an iron constitution. Has always been a hard-working man, and has had many narrow escapes incident to his long life as a miner. He is possessed of many remarkable anecdotes of his pioneer life. He has crossed the Atlantic five times.

GEORGE P. SMITH, carpenter and builder, Montfort; son of George Smith, who resides on Sec. 20. George Smith was born in Alsace, then a province of France, now belonging to Germany, Jan. 17, 1813; came to America about 1839; he lived in Buffalo for a time, thence to Michigan City, Ind.; here he was engaged for some time in driving stage between Michigan City and Chicago; afterward removed to Hickory Point, Ind., and engaged in farming; was also engaged for a time on a canal, near Joliet; lived in Indiana until 1866, when he came to Wisconsin and settled where he now lives. He was married in Indiana to Rebecca M. Goodrich; has five children—J. W., Caroline Wayne, Sarah C. Brown, Catharine E. Morrison and George P.; the latter was born in Lake Co., Ind., in 1850; came to Wisconsin with his parents. He was married to Harriet Mills, daughter of A. D. Mills; has four children—Bertha M., Minnie E., and Ada M. and Addie B., twins.

JACOB SCHMITTEN, tailor, Montfort; was born in the city of Cologne, Prussia, on the Rhine, April 20, 1837; he came to the United States March 28, 1866; he learned his trade at Cologne; he settled at Green Bay, Wis., where he was married to Catherine Mans; she died at Green Bay. Mr. Schmittten went to Milwaukee in 1873, where he worked at his trade and was married to Josephine Frattinger; he lived in Milwaukee about five years, when he removed to Platteville, where his wife died Jan. 2, 1879. He located in Montfort in 1880. Has two children by his first wife—Anna C. and John P.; two by his second wife—Edward and Mary E.

JOHN A. THOMAS, druggist and Postmaster, Montfort; was born in Franklin Co., Penn., in 1844; his father died in Pennsylvania; John A. came to Wisconsin in 1860, though his mother, with the remainder of her family, had come to Grant Co. several years previous to that time. He was Register of Deeds for the years 1861 and 1862. He enlisted in the 31st W. V. I., and served three years. Was for seven or eight years a resident of Lancaster; he settled permanently in Montfort in 1873; in 1874, commenced business here under the firm name of Thomas & Billings; bought his partner's interest in the business in 1875; was appointed Postmaster February, 1873. He was married to Miss Lucelia Hess,

born in Montfort; they have two children—Frank and Fern. Mr. Thomas is the present Town Clerk of Wingville; has held that office for three years.

JAMES T. TAYLOR, furniture dealer and undertaker, Montfort; born in England in 1826; he emigrated to New York City, in December, 1846, thence to Bristol, Conn., and engaged in copper mining, thence to New Jersey, where he was also engaged in mining, thence to Hatfield, Mass., in 1848, where he stayed one year, and had charge of a mine; he went to Hazel Green, Grant Co., in April, 1849, which he made his home till the fall of 1865; in the fall of 1868, he came to Montfort, and engaged in his present business. His first wife was Miss Ann Wills, born in England; they were married at Hazel Green in September, 1849; she died Nov. 17, 1872. His second wife was Sophia George, who died April 14, 1879; he has seven children by first marriage—John W., Abbie A., Margaret, S. H., S. J., Mary T. and Lilly G.; his two oldest sons J. W. and S. H., reside at Linden, Iowa Co.; the former is a lawyer and banker of that place, and the latter a law student. Mr. Taylor has been a teacher of vocal music for many years; has taught singing schools at various points in both Iowa and Grant Counties. He is a member of the M. E. Church.

WILLIAM A. THOMPSON, clerk for Mr. Schenk, Montfort; born at Sun Prairie, Dane Co., June, 1853; his parents were natives of Scotland; he was engaged in teaching school in Dodgeville for three years, has also taught in Grant Co.; he came to Montfort, May, 1880. He was married to Hannah Bennett, daughter of Matthew Bennett; they have two children—Frankie and Gordon.

SAMUEL T. TUCKER, blacksmith, Montfort; born at Quincy, Ill., Jan. 1, 1832; came to Wisconsin in 1837, and settled in Grant Co., but the family returned to Illinois the following year, where his father died; his mother and family returned soon after the death of his father, and settled in the town of Lima, Grant Co.; his mother died in 1846. She was married, after the death of Mr. Tucker, to Mr. Boshford; she had five children by first marriage, and two children by second marriage. Mr. Samuel T. Tucker was married to Frances R. Hamilton; they have eight children, two sons and six daughters. Mr. Tucker came to Montfort in October, 1853.

JOHN THOMSON, retired farmer, Sec. 25; P. O. Montfort; was born in Scotland July 7, 1794; he came to America in 1832; he was for several years engaged in gold mining in the Eastern part of Virginia; he removed from Virginia to Illinois where he resided about three years; he came to Wisconsin and settled near Platteville in 1840, and engaged in farming; he settled on his present farm about 1847. He was married in Scotland to Mary Nes, they lived together fifty-five years; she died November 10, 1875; has had five children, four of whom are living—David (resides in California), Thomas (deceased), Grace (widow of James Sandemon), Mary (now Mrs. Henry Gilfrey), and Margaret (now Mrs. Robert Chandler).

THOMAS A. THOMPSON, carpenter and builder, Montfort; born in Canada near the Vermont line in 1840; his father died in Canada; his mother afterward married Mr. William Cook, and removed to Illinois about 1855; they came to Grant Co. about 1856, and settled in Clifton, where his mother still resides; her husband, Mr. Cook, was a soldier in the army during the rebellion, and died of disease contracted while in the service; Thomas is the only child of his mother living by her first husband; she has six children by her second husband. Thomas came to Grant Co. in 1868, from Plattsburg, N. Y. He was married to Jennie Row; has three children—Alymer, Frank and Albert S.; he learned his trade in Boston, where he worked about six years; his father was a native of Scotland, his mother of Canada.

GREENBERRY THOMPSON, farmer, Sec. 10; P. O. Montfort; was born in Jackson Co., Ill., Jan. 15, 1815; his parents removed to Arkansas when he was a child, but afterward returned to Illinois, where they resided till their decease; he was one of the early settlers of Grant Co.; came to the county in April, 1846, and settled where he now lives about 1848. He was married in Illinois to Charlotte Henderson, born in Jackson Co., Ill.; they have eight children—General Marion, Jefferson Lafayette, William Spencer, Serena, Sophronia, Ephraim, Olive and Emma; lost one daughter.

THOMAS THOMAS, Sr., P. O. Preston; was born in Bristol, England, County of Gloucester, May 26, 1808. His father and mother were Welsh, and removed to Cowbridge, a small inland town in Glamorganshire, South Wales, the place of their nativity. When he was a child 9 months old, he was brought up and remained in this town until he left for America on board the Nestor, of Plymouth, Capt. Smith, and set sail from Newport, in Monmouthshire, South Wales, bound for Philadelphia, and arrived there on the 1st of May, after a voyage of seven weeks. He was 22 years of age at the time; remained in Pennsylvania, and worked in the coal mines in Pottsville about three years, an employment

which he had not been accustomed to follow. The mine he worked in is the one that has been on fire for the last forty years. About this time, he heard of the lead mines, in what was then called Michigan Territory; and, in company with a Mr. Williams, left Pottsville for Galena, which was what was then supposed to be the chief town in the mining district. They reached Pittsburgh by going afoot; traveled 350 miles, averaging thirty-five miles a day. They took a steamer from Pittsburgh to Louisville, and thence to St. Louis. There they took passage on board the Winnebago, a boat that plied between St. Louis and Galena. The boat was detained by an accident to the machinery at the Rapids; and, while lying still, passing boats informed them of the Indian excitement near Galena. Part of the passengers returned; but they went on to Galena in the steamer Olive Branch, arriving there May 5. Mr. Thomas hired out to a Mr. Streeter, at \$20 per month and board, to work a mine he owned on Fever River, near White Oak Springs. After he had worked three days for him, he advanced him \$40, to send for his family, consisting of a wife and one child, which, with what he had left with her, was sufficient to bring them to him by stage and cabin passage. After working for Mr. Streeter awhile, he went into partnership with Morgan Lewis, a native of Wales, to pre-empt some land. He and his family and Mr. Lewis left Galena with two yoke of oxen, two cows, a plow and the necessary implements for farming purposes, with as much provision as would last them four or five months. On the road, they were informed by a Mr. Mayfield of the timber and prairie, where he now resides. As Mr. Mayfield had already claimed this land, he resigned it to them for a mere trifle. Mr. Lewis had a mortal hatred of Indians, owing to some of his friends on Fox River being killed by them. He would never give an Indian anything to eat, even if he knew that a morsel would save a whole tribe from death.

Mr. Thomas relates the following about their Indian troubles:

We were now among them—had cut hay and built a cabin. I treated them with civility; but Lewis was opposed to this, and frequently gave them just cause for resentment. I was gathering some withered grass that I had cut for feathers to fill a bed-tick, when an Indian accosted me, and, pointing to our cabin, put his finger to his mouth, and signified by his gestures that he wished me to give him something to eat. He stood west of me a few paces, and I, supposing that their village was at Fennimore, pointed with my pitchfork in that direction, signifying as best I could that he must go to his own wigwam for what he wanted to eat. He supposed that I threatened him with my fork, and cocked his rifle. I then stuck the fork in the ground, and went good naturedly toward him, offering him my hand, which he rejected with disdain, presenting a visage haughty and severe. He turned and left me. It was not in my nature to refuse his request, had I not been instructed by Lewis, who said that if we were kind to them once they would expect us to be so every day. I admired the haughty bearing and noble spirit of the Indian, and had a great desire to see how they lived in their villages with their families. I did not anticipate trouble on account of what had passed; did not mention it to Lewis, as I wished him to accompany me to their village. It was Sunday morning, and we started in search of them; but took the wrong direction. When we were returning about 5 o'clock, I made for the cabin, and Lewis for the timber, in search of the oxen. When I was about 200 yards from the house, I met the same Indian I had seen on Saturday. His face was painted black as tar. I spoke kindly to him, and he nodded, I thought, in the same kindly spirit. He took his knife from its pouch, and drew the back of it across the back of his own neck, and said in English these words, 'Squaw one papoose kill wicked Sioux!' I understood him to mean that his wife and child had been murdered by an Indian of that tribe. Just at this moment, a pig, the only one we had, ran by. He appeared excited; was about to take aim. I struck the end of the barrel gently with my hand to turn it aside from the mark. This made him mad. He stepped back a few paces, and shot the hog near the heart, and killed it! I could not help myself, so I pocketed the affront and left him. When I got to the house, I learned that he had been there the greater part of the day. He helped himself to what he wanted to eat. He had gone to the cradle several times, and appeared either to pity or admire the baby. I apprehended no danger; got something to eat, and chopped firewood till it was nearly dark, when I heard Lewis running toward the house. He at the same time gave us to understand we were about to be murdered. * * * * * We were surrounded by fire and cheered by Indian yells, who were made joyful by seeing our dismay. We could see them plainly by the light of the fire they had kindled. They were many—we but two—with only one gun. The vegetation was waist high in the timber—rank and dry—there being no cattle to impede its growth, so that the fire leaped from tree to tree, and presented a picture worthy in every sense of the infernal regions. Here Lewis disappeared, and left us to what he supposed to be our fate. I would certainly have followed his example, had I been at liberty like him. He believed our case was hopeless, or he would not have acted thus, for he had in his bosom the heart of a man. In about an hour and a half from this, perhaps 12 o'clock in the night, it became evident to us that it was not the intention of the Indians to put us to death; and, supposing the fire would burn up all we had, I carried our trunks to a clear spot over which the fire had already passed unnoticed by our enemies. We shouldered the best of our clothing; tied the baby on my wife's back with a blanket, and left for Fennimore Grove, a distance of six miles. Here we found the Indians acting as they had done with us, so we started in the morning for what is now called Linden, in an ox cart. We missed the road, as it snowed about six inches, and we made our bed under the cart, and arrived at Linden about 10 o'clock in the morning.

Mr. Thomas worked in the diggings three years; then purchased 160 acres of land, the same where he had previously lived. When he returned, he found Morgan Lewis living in the cabin where he continued to live all alone for twenty years. Mr. Thomas' children are Thomas, born in Pennsylvania and

Mary Ann, Tanner, Elizabeth, Susie, Abner, Sarah, Lewis, Benjamin and Mark, all born in Wisconsin. Tanner and Lewis were in the 7th W. V. I., and belonged to the Iron Brigade. Tanner fought in every battle in which the Seventh was engaged. He re-enlisted as a veteran, and was pierced by a minie ball in the forehead, while leading Co. A in a charge at Petersburg, Va., June 18, 1864, in his 26th year. He was Second Lieutenant of Co. H, but commanded Co. A in this battle.

Col. Finnicum in his letter on Tanner's death says :

As it was God's will that he should fall, his State can chronicle his name among the bravest and most devoted of her patriots, who have fallen in this mighty contest for the principles involved ; and you can have the cheering intelligence that notwithstanding all the temptations of vice thrown around the soldier, he never swerved from the path of rectitude and right, and died in the Christian's hope.

Lewis enlisted with Tanner Jan. 1, 1864, and was shot through the right lung in April, when Lee surrendered to Gen. Grant, and has a pension. The ball went clear through, within one and a quarter inches of his back bone, and he is, and will always be, troubled with his lung. Abner raised a company of 100-day men, and was Lieutenant in Memphis under Gen. Washburn.

THOMAS THOMAS, Jr., Sec. 31, son of Thomas Thomas, Sr., was born in Pottsville, Penn., in 1833 ; his first wife was Elizabeth Dinsdale ; his present wife was Mary Heatbcote. Had seven children by first wife, three of whom are living, Mary, Helen and Anna ; has three children by present wife—Orville H., Mattie and Nellie. His farm contains 240 acres. Mr. Thomas has been Justice of the Peace several terms.

W. H. VAN DUSEN, M. D., Montfort, son of Dr. Harmon Van Dusen, who came to Millwaukce about 1848, and to Mineral Point, Iowa County, the following year, where he was engaged in the practice of medicine for over thirty years ; he still resides at Mineral Point. Dr. W. H. Van Dusen was born in Onondaga, N. Y., July 3, 1847. He read medicine with his father, and graduated at the Miami Medical College, at Cincinnati, March, 1869. Began the practice of medicine at Mineral Point, thence to Linden, Iowa County. He located at Montfort in 1873. He was married to Elsie H. Montgomery, born in Galena, Ill. They have three children, Harmon L., born April 15, 1873 ; Anna M., born March 11, 1877 ; and Frank W., born April 2, 1878 ; lost second child, Clarence, born July 30, 1875, died Feb. 14, 1877.

CHARLES G. VAN BUREN, merchant, firm of Johnson & Van Buren, Montfort. He was born in St. Lawrence Co., N. Y., in 1837 ; he came to Wisconsin in January, 1860. He lived in Iowa County until 1869, when he removed to Castle Rock, and engaged in the mercantile business. The above mentioned firm still continue the business at Castle Rock, Mr. Johnson having charge of the store at that place. They opened their store in Montfort in 1874. Mr. Van Buren removed here in the spring of 1879. He was married to Frances Leggett, born at Mineral Point. They have two children—Jesse M. and Florence.

WILLIAM J. WEBBER, farmer, Sec. 29 ; P. O. Montfort, was born in England in 1840 ; came to Wisconsin from England, October, 1859 ; came to Mineral Point, where he attended school the following winter. Enlisted at Mineral Point in 1862, in Co. E, 30th W. V. I. ; he served two years and three months, when he was discharged for disability. He was married to Mrs. Josephine Kelvey, daughter of Xavier and Josephine Wachtler. She was born at Vicksburg, Tenn, in 1841. Her parents were early settlers of Grant County. Mr. and Mrs. Webber have five children—Clara A., William, Leon, George and Josephine ; Mrs. Webber has two children by her first marriage—John and Edmund. Mr. Webber's farm contains 275 acres.

TOWN OF CLIFTON.

JOHN ALLEN, farmer, Sec. 16 ; P. O. Martinville ; was born in Cheshire, England, July 21, 1821 ; came to America in 1856, and settled in the town of Clifton, Grant Co., Wis., on Sec. 14 ; farmed there two years, and on S. Millard's farm three years, and then bought the place where he now lives from J. Allen Barber, in 1861, and has lived there ever since. Was married to Harriet Hough, in Church of England, England, by Rev. Pierunes ; have seven children living—Elizabeth, John, James, William, Charles, Joseph N., George A. ; also two deceased—William and George, the former buried in England, the latter in Rock Church Cemetery, Clifton. John Allen owns 161 acres of land, and has been a member of the town board two years. His son, William, has been a Good Templar seven years. There is a breastwork thrown up on his farm, about one hundred rods long, which was evidently used in battle in early times.

JOSEPH ALLEN, Livingston, dealer in general merchandise and live stock ; was born in Cheshire, England, Oct. 3, 1843 ; came with his parents to America in 1854, and settled in the town of Clifton, where he helped his father on the farm until 21 years of age, at which time he went to farming for himself ; farmed for six years, and, in 1871, started a store in Martinville and stayed there until the spring of 1880, when he moved the storehouse and stock to Livingston, and occupied it until September, when he built the store he is now in, which was the second store in the town. Was married to Agnes Watson, at the City Hotel in Mineral Point, March 21, 1870 ; she is the daughter of Jonathan Watson, town of Lima ; they have four children—Mary Jane, Frank E., George H. and Nellie. Has held the office of Town Treasurer five years ; is a member of the Masonic Order at Montfort, Lodge 165.

JOHN ALLEN, Martinville ; was born at Cheshire, England, Sept. 26, 1845. His father, William Allen, removed to Clifton, Grant Co., Wis., in April, 1854, and settled on Sec. 14, and owns 280 acres where he resides. John Allen commenced business for himself in October, 1872, as a farmer, but soon went into partnership with his brother Joseph in the mercantile business, also in buying and shipping stock, in which they have shown great enterprise. Mr. A. was married, April, 23, 1879, to Miss C. K. Hartsook, who was born in Berrien. Berrien Co., Mich., Sept. 2, 1854. They have one child—Dora Frances.

WILLIAM ALLEN, Sec. 14 ; P. O. Livingston ; was born in Cheshire, England, Jan. 31, 1819 ; was a farmer there until 1854, when he came to America and settled in the town of Clifton, Wis., on Sec. 24, owned by Isaac Burton ; lived there two years and then bought the place where he now lives ; owns 280 acres of land on Secs. 13 and 14 ; has held the office of School Clerk six years. Was married to Mary Hough, Nov. 15, 1840, at Prestbury, in Cheshire, England. She was born July 1, 1820, in Cheshire, England. Mr. Allen and wife lived in the little log cabin, which still stands on the place, until 1863, when they built the house which they now occupy ; they have had ten children, of whom seven are living—Joseph, John, Kate P., George, Elizabeth, Sarah and James ; the deceased are William, Mary Jane and John ; the first two are buried in Rock Church Cemetery, John was buried in England. Joseph married Agnes Watson. John married C. E. Hartsook. Kate married John Porson. George married Martha Fieldhouse, and Eliza married Joseph Biddick. All are now living in the town of Clifton.

WILLIAM ANDREW, Sec. 22 ; P. O. Livingston ; was born in England June 16, 1819 ; was engaged in mining lead there until 1843, when he left England and went to St. Louis ; left there in 1844 and settled in the town of Clifton, where he followed mining until 1874 ; bought the farm he now lives on from J. T. Brown, and has 400 acres of land ; has also 360 acres in the town of Lima, on Secs. 6, 7 and 8 ; also, 175 acres in Waterloo. Is engaged in raising fine stock on his farm. Married Anna Pierson, in Buffalo, N. Y., in 1848 ; she was born in England in 1826 ; have had eleven children of whom ten are living—Martha, James, Mary, Jane, Sarah Rosie, William W., George Albert, John Joseph, Lily May, Phoebe, and Anna, who died in Yankton, Dak. He has been a liberal contributor to all charitable purposes. Was Chairman of the Town Board of Clifton for one year, was also School Clerk, and was one of the founders of the first school in the town.

PETER BIDDICK (deceased) ; was born in Cornwall, Eng., in Parish of St. Issey ; was a carpenter by trade, and worked in London twelve years at his trade ; left England in 1852 and came to America ; landed in New York City, and worked at his trade for six months there, and then came to Platteville, Wis., and worked as a carpenter for two years ; rented the farm where Mahlon Fawcett now lives, and lost his first wife, Hannah Watson, there, whom he married in England in the year 1846, and

who had five children, of which four are living—Maria, George R., Gideon J. and John T., and one deceased, William, who died May 25, 1875; buried at Platteville; Hannah, his wife, died April 20, 1856; after her death he left the farm and moved to Iowa Co. for one year, then bought a farm from the Government, and, on March 2, 1857, married his second wife, Catherine Rundell, who was born May 3, 1819, and by whom there are two children—Fred and Irene. Was a member of the Primitive Methodist Church at Platteville, and was also a member of Manchester Unity in England; he died March 17, 1878, and was buried in Platteville Cemetery; left to his estate 319 acres of land; the family live on the farm on Sec. 1, which John T. and Gideon rent from the estate. Gideon is a member of the Masonic Order at Wingville, Lodge No. 134.

BENJAMIN BOURRET, Sec. 26; P. O. Livingston; was born in Iowa Co., Wis., Dec. 26, 1846; left there with his parents when 6 years of age, and came to town of Clifton and settled on the farm where he now lives; has lived there ever since except the year 1877, when he lived at Belmont and kept the United States Hotel; his father died at home June 22, 1868, and was buried at Platteville, in the old cemetery; his mother was born July 26, 1814, and had thirteen children, of whom nine are living—Mary S., Frances, Peter, Benjamin, Michael, Josephine, Eli, John L., Henry; the names of those deceased are Matilda, Lewis, Aurilla and Joseph. Benjamin took charge of the farm after his father died, and now owns half of 160 acres. Was married, June 6, 1876, to Martha J. Power, in Shullsburg, Wis.; have two children—Addie May and Eugene. Benjamin is a member of the I. O. O. F., Washburn Lodge, No. 228, and has passed through all the offices in the lodge.

GILBERT H. BUNKER, Sec. 14; P. O. Martinville; born in Chenango Co., N. Y., Nov. 10, 1820, and, in 1838, went to Pennsylvania to his parents; worked there with his father one year; in 1839, went to Winnebago Co., Ill. and settled on farm; left there in May, 1851, and came to Wisconsin, and settled in the town of Clifton; bought 160 acres of land from Adam Keith, who bought it from the Government; sold his farm to Nelson Millard in 1870, and bought from Adam Keith the farm known as the Shipley farm; has lived there since except five years, when he lived in Muscoda, engaged in the drug and stationery business. He was married to Nancy Keith in 1846, who is now 53 years old; both are members of the M. E. Church; he has been class-leader for twenty years, and is still a leading worker of the church; is also a member of the Town Board; have four children living—Sarah A., Ellen L., Henry J. and Scott. Sarah was married to Joseph Doran, who lives in Virginia. Ellen L. married Dr. F. D. Stonard, who died Dec. 19, 1880; Henry J. married Sarah A. Fischer, and lives in Martinville.

JANE M. CLIFTON, Sec. 14; P. O. Martinville; born in Chenango Co., N. Y., Jan. 1, 1831; left there in 1838, and settled in Coles Co., Ill., on farm with her parents; came to town of Clifton in 1844; in 1856, settled on the farm where she now lives. Was married to G. T. L. Clifton, in 1846, by Rev. Ross J. Perry; her husband died in the house where she now lives, Sept. 8, 1872, of consumption, and was buried in the Rock Church Cemetery; he was a local preacher in the M. E. Church for twenty years. Mrs. C. is also a member of that church; she has now 97 acres of land, and built the house they now live in, about ten rods from the old log cabin; has had nine children—Elmore T., James, Lewis D., Curtis, living; Sarah E., Elias, Ora Ann, Nelson A., Eddie E., deceased, all buried in Rock Church Cemetery.

ADAM COOK, Sec. 2; P. O. Livingston; was born in Ireland in 1825; came to America in 1833, and stopped in Illinois for one year, and then came to the town of Clifton, Wis., and settled on the place where he now lives; bought 135 acres from land agent at Mineral Point. Was married at the age of 18 to Nancy Thatcher in Canada, by whom there are seven children—Benjamin, Samantha, Levi, Rachael, Cecelia, Elizabeth, Ira; was divorced in 1879, and was married to Mrs. Ellenor Bayley May 2, 1880, who was born in Watertown, Jefferson Co., N. Y., July 7, 1849, and came West with her parents and settled at Lancaster; she has four children by her first husband and two by her second—Frank M. and Murtel F. Mr. Cook was in the French war in Canada at the age of 14, and was also in the late war eight months in the 47th W. V. I. Mrs. Cook is a Baptist.

Sanderman was married to Martha Thomson at her father's house; they had ten children, of whom eight are living—Hannah, Sarah A., John P., Martha E., Maria J., August, Adeline, Ruth; the deceased are Jonathan and Mary E., both buried in Rock Church Cemetery; his wife Martha, died April 1, 1866, after which he married Sarah Manning in 1868, who died July 26, 1880; was buried in Calvary Church Cemetery; he built the first house in that locality; bought the second reaper that was brought on the prairie, and went to Dubuque for it; has three daughters married, Hannah married Robert Watson, Sarah married Richard Hammon, and Elizabeth married William Warne.

GEORGE SHIPLEY, Sec. 11; P. O. Martinville; born in Ohio Oct. 9, 1829; left Ohio October, 1851, and arrived at Martinville the last of November in the same year, and located on what is now known as Bunker farm; then went back to Ohio in 1853; stayed two years; then returned to Martinville and stayed three months; went back again to Ohio; stayed two years, and the third time returned to Martinville, and has been on the farm where he now resides ever since. He has 95 acres of land, which he bought from his brother, who bought it from Isaac David, who was the original settler of the land. George Shipley was married to Priscilla Johnson in 1856. She was born in Lancaster Co., Penn., in 1834. They have five children—Sarah Jane, George Johnson, William Francis, Susan Ann and Mary Frances. He has been a member of the M. E. Church since 1848; his wife also member of same since

1853. He is a member of the Good Templar's Society at Martinville, and has been a member of School Board for nine years. He is now Steward of the M. E. Church.

MRS. FRANCES THOMPSON, Sec. 24; P. O. Livingston; was born in Lancashire, England, July 7, 1826. She left England in 1845, and came to America. The first night in Wisconsin, she stayed at Milwaukee, and went out to North Prairie the next day, and slept in a barn that night. She stayed at that place one year, and then went to Mifflin, which was then called Black Jack. Worked there in a hotel about six months, after which came to the town of Clifton, and settled on the farm where she now lives. She was married to William Thompson, by Squire Hollman, of Platteville, in a log cabin on Sec. 23, Dec. 24, 1846. He died April 15, 1869, and was buried in the Rock Church Cemetery. He located the joint district school on his farm; was a member of Crow Branch School Board four years, and bought the first reaper used on the prairie, for which he went to Milwaukee. Mrs. Thompson has had eight children, of which five are living—William, Susan, John, Caroline and Frances. The deceased are Hannah, Mary Ann and Timothy, all buried in Rock Church Cemetery. Mrs. Thompson is a member of the Episcopal Church, and was confirmed in England.

F. A. WASHBURN, Sec. 11; P. O. Martinville; born Aug. 25, 1844, in Lake Co., Ill. He lived with his parents until 1857, and came with them to Wisconsin, and settled on the farm where he still lives, and owns 325 acres of good land. He was married, in 1869, to Serena Taylor, at his mother's house in Port Andrew, Richland Co., by Squire Corner. She was born in Grant Co., Wis., Jan. 4, 1852. They have two children living—Albert E. and Ida Delia. Lily May died March 8, 1872; was buried in Rock Church Cemetery, town of Clifton. F. A. enlisted in Co. F, 2d W. V. C., under Capt. Palmer, and served four years in the late rebellion.

MRS. JOHN WATSON, Sec. 24; P. O. Livingston; was born in Lancashire, England, Sept. 18, 1827. She was married to John Watson in the Church of England, and came to America in 1848; stopped in New Orleans six months on account of sickness in the family, and lost two children there with ship fever—Thomas and another child unnamed. They then came to St. Louis, where her husband worked in the coal mines one year, and then came to the town of Clifton, in which place he resided till his death. He followed mining until he bought the farm where his wife now lives; owned 170 acres of land. He died May 23, 1876, of congestion of the brain, aged 52 years, and was buried at Rock Church Cemetery, according to the Masonic Order, by Mifflin Lodge. The procession reached nearly a mile. It was estimated that there were over 1,000 persons in attendance. Mrs. Watson has seven children living—Winfield S., Catharine, Sarah, Elizabeth M., John W., Charles and James. Three deceased—Ann, Lincoln and one infant, not named, all buried in Rock Church Cemetery. Winfield married Ellen Stephens. Catharine, G. W. Hilbry, and Sarah, James Mundon, all living in the town of Clifton and farming, except Winfield, who keeps hotel at Livingston. Mrs. Watson has been a member of the M. E. Church for twenty years.

WILLIAM C. WRIGHT, merchant and Postmaster, Martinville; was born Feb. 24, 1821, in Herkimer Co., N. Y. He came to Winnebago Co., Ill., in 1839, with one shilling in his pocket; worked out by the month two years, and received \$15 per month; then went to Galena, Ill., where he worked one year in the lead mines; then went to Rockford, Ill., and was married to Mary Keith, by the Rev. John Crummer. They then removed to McHenry, Ill., where he bought 120 acres of land from the Government and went to farming, at which he continued eighteen years; came to Wisconsin, and bought 120 acres of land on Sec. 13, town of Clifton, and farmed it for one year; then sold out the farm, and bought the place where he now lives from S. Millard, and commenced as a merchant; was appointed Postmaster, and has been the same ever since. He has been a church member forty-seven years, and was one of the builders of the Free Methodist Church, and now owns it. Rev. G. C. Coffee preached the first sermon there in the fall of 1872. Mr. Wright has been on the School Board, and has always taken an active part in the interest of the town. He is a temperance man, and assisted to organize a Good Templars' lodge in the village, which meets in the M. E. Church. They have one daughter—Emma E., who was married to William Stephens, by Rev. G. C. Coffee, at the residence of her father. She has two children—Idah May and Arthur W.

SARAH VIPAND, Sec. 36; P. O. Washburn; was born May 28, 1819, in Durham County, England; she came to America with her husband in May, 1845, and settled at New Diggings, Wis., where her husband worked at farming and mining lead; moved to Washburn in 1855, to the farm where she now lives, which contains 240 acres of land. The first building on the place was a brick and frame house that was first used as a schoolhouse, the school taught by Amelia Hull. Her husband went to England on a vi-it in 1861; he was taken ill on board ship, while returning to America; died at Buffalo, N. Y., of

dyspepsia; was buried at Chicago in July, 1861, and, in the spring of 1862, was removed home and buried in the Ebenezer Cemetery, and was the first one buried in that yard. Mrs. Vipand built the house where she now lives in 1875. She has had nine children, of whom eight are living—John W., born in England, Catherine, George, Mary, Thomas, Sarah J., Elizabeth A., James A.; one son, Thomas, died at New Diggings. Mrs. Vipand is a Primitive Methodist. Three of her daughters are married, Catharine to Michael Rowe; Mary to William H. Howdle, and Sarah to James Andrew.

TOWN OF LITTLE GRANT.

HON. DELOS ABRAMS, farmer, Sec. 9; P. O. Bloomington. The subject of this sketch is a gentleman who is honored by all who know him, and has held many prominent positions in the community in which he resides; as for enemies he has none, but is noted by all for honesty and veracity, and has aroused his neighbors from their lethargy and slumbers many times on important political questions. He was born in 1834, in Montgomery Co., N. Y.; was a son of Anthony and Scyntha Abrams; he received a common-school education. His aged mother died in 1855, and his father in 1871; their loss was long mourned by all who knew them. Delos Abrams is one of nine children, seven of whom are living; his brother, Andrew Abrams, died in Africa in 1879, as a missionary; he is also a brother to the noted Dr. Charles Abrams, of Fayetteville, La Fayette Co., Wis. Delos lived with his parents until 21 years of age, when, in 1855, he married Miss Martha M. Harvey, a daughter of James Harvey; she is one of five children; they have four children—Mary A., Susie K., Elizabeth B. and Harvey. Mary A. is married to Charles Alexander, of Carroll Co., Iowa. Mr. Abrams is a Republican; was School Clerk eleven years; Justice of the Peace two years; Assessor one year; Chairman of Town Board two terms, and was elected, in 1876, to the honorable position of Representative in the State Legislature on the Republican ticket, with a majority of 206—the largest ever given in his district; he has never been defeated in any political effort; is running a large farm of 606 acres of land, valued at \$16,000; is also the proprietor of one of the finest dairies in Grant Co., and is a Royal Arch Mason.

WILLIAM E. ADAMS, farmer, Sec. 8; P. O. Little Grant; was born in Patch Grove, Grant Co., Wis., in 1850, a son of Henry and Hannah Adams; his father was born in New York; his mother is a native of Pennsylvania. William lived with his father until he was 20 years of age; he received a common-school education; he then worked for William Humphrey eight years. Was married in 1876, to Miss Mary Van Dusen, an orphan girl, who came from New York in company with the family of J. K. Lum; they have three children—Hiram, Lulu, and an infant. Owns 200 acres of land, valued at \$5,000; has been School Director one term. Politics, Republican.

HENRY BARNHART, miller, Sec. 22; P. O. Bloomington; born in 1820 in Butler Co., Penn.; was a son of Philip and Elizabeth Barnhart, where he resided until 1845; he then emigrated to Wayne Co., Ohio; lived there until 1852; then to Medina Co. for one year; thence to Clayton Co., Iowa, where he lived for twenty-three years; then to Allamakee Co. for two years; then to Prairie du Chien, Wis., for two years; thence to Grant Co. in 1879, and built the mill known as the Barnhart Mill, where he now resides; he is a millwright by trade, and has built grist-mills, saw-mills and woolen factories; has 23 acres of land in Iowa, valued at \$1,300; has 30 acres of land and the grist-mill where he now lives, valued at \$14,000. Was married in 1850, to Eliza H. Creamer, a daughter of Peter Creamer, of Dauphin Co., Penn.; has had eight children, seven living—Emma H., Henry N., Mary J., Edmond R., Susan, Lillie E., Fred W. (deceased), Elizabeth. He enlisted in 1862, in Co. L, 6th Ohio V. C.; served three years; has been Justice of the Peace two terms. Politics, Greenbacker.

MRS. CATHERINE COOPER, housekeeper, Sec. 36; P. O. Lancaster. Catherine Cooper, better known as Mrs. Catherine Specht, was born in 1845, in Germany, a daughter of Henry and Elizabeth Specht; lived with her parents until 20 years of age; came to America in 1860, with her father; located at Lancaster for a few years, thence to Little Grant. Married in 1863, Andrew Cooper; lived with him seven months, when they separated; have one child—Herman Cooper; she has been a hard-worker, and has accumulated some wealth; she has a fine storeroom on Maple street, Lancaster. She is a member of the Lutheran Church.

J. B. CHURCH, farmer and merchant, Sec. 2; P. O. Mount Ida; born in 1826, in Onondaga Co., N. Y.; was a son of Ezra and Rachel Church; when he was 6 years of age, his father moved to Chautauqua Co.; his father died when he was about 14 years of age, and he was obliged to work wherever he

could get anything to do to support himself and mother. At the age of 21, he married Mary, daughter of Amos and Livonia Parker; he built a saw-mill in company with his brother, and followed the lumber business for four years; he then came to Grant Co., Wis., in September, 1853; located in Little Grant, where he has 230 acres of land, valued at \$6,000; has had ten children, six living—Francis H., Charles W., Wallace W., P. A., Ida R. M., Emma S. In 1880, he built a store in Mount Ida, although he had been merchandising for two years on his farm; the winter of 1872, he visited Florida for his health. He was a member of the Town Board four years; Town Assessor eleven years; Justice of the Peace fourteen years; School Clerk thirteen years. He is a Royal Arch Mason. Politics, Greenbacker; was an enrolling officer at the time of the war.

ROBERT E. THOMPSON, farmer, Sec. 36; P. O. Annaton; was born in 1851 in Grant Co., Wis., and is a son of William Thompson, a native of Scotland. He lived with his parents till he was 18 years old. His father died in 1878, leaving the son to look after the welfare of his aged mother. He has 200 acres of land, valued at \$3,000. He was married, in 1877, to Elizabeth Day, daughter of James and Sarah Day, of Little Grant. They have one child—Charles. In politics, he is a Democrat.

JOHN F. WEFEL, merchant, Stitzer; was born in 1855 in Germany; is a son of Adam and Mary Wefel; lived with his parents until 24 years of age; came to America when but 3 years old, locating in Liberty, Grant Co., Wis. He followed farming until 21 years of age; then went into the mercantile business at Stitzer; is one of a family of five children, all of Grant Co.; two brothers deceased, both died in the same night. In politics, he is a Republican. His father is an enterprising and prosperous farmer. He is a member of the Evangelical Church.

W. J. WEIR, farmer, Sec. 19; P. O. Liberty Ridge. He was born in Grant Co. His father, Thomas Weir, came to the county in 1840, and located in the town of Potosi. In 1856, he bought the farm, which is now worked by the son, and where he lived until his death, which occurred Feb. 9, 1879. W. J. Weir was elected Justice of the Peace, in April, 1879. He was married, April 1, 1880, and has one daughter—Mamie. He is a member of the I. O. O. F.; and, in politics, is a Republican.

JOHN WILKINSON, farmer; P. O. Stitzer; was born in 1821 in Yorkshire, England; is a son of the Hon. Charles Wilkinson, of England. He lived with his parents until 16 years of age; was a cloth-dresser by trade; but, at the early age of 16 years, began as an apprentice in a blacksmith's-shop. He came to America in 1842; located in Paterson, N. J., where he resided for nine months; then to Pittsburgh, Penn., for nine months; then taking a westward course to Davenport, Iowa, for one and a half years; then to Galena, Ill.; thence to Mineral Point, where he resided for seven years. During all this time, he followed the occupation of blacksmith; and, in 1850, he wended his way to the golden regions of California, where he wandered around for eighteen months; then returned to Mineral Point for the period of two years; then to Liberty, Grant Co., Wis., in 1854, where he lived for ten years; then to Dallas Co., Iowa; then returned to his old home in Liberty, where he has since lived. He was married, in 1850, at

Mineral Point, to Miss Grace Pace, a daughter of Richard and Mary Pace, who were from Cornwall, England. He had nine children—Joseph H., Christopher, Charles A., Charlotte, Lillie, Helen, Rosalie, Richard (deceased) and John. He has 215 acres of land, valued at \$4,000; has been Pathmaster five terms, and School Director one term. In politics, a Greenbacker.

Annaton; was born in 1840, in Germany; was a son of Martin Witzig, who came to America in 1854; located in Liberty, Grant Co., Wis.; entered 100-days' troops; served four months. He was married, in 1866, to Catharine Bunson, daughter of Andres Bunson. He has seven children; has one boy crippled for life. In politics, Democrat. He lives with his mother, Annie Witzig, and was born in 1811, in Germany. She came to America in 1854, stopping at Watertown, Wis., for one month; then to Clifton for one year; then to Liberty, where she has since lived. She was married to Martin Witzig. They had eleven children, one deceased in Germany and three in the United States; seven living—Adam, Joseph P., Mary A., Frank, Joseph, Joan and Catharine. The deceased are Peter, John, Joseph and Rosey. Her husband died in 1862. She then married John Wealing, in 1866, who died the same year, eight weeks after marriage. He has 160 acres of land, and is a member of the Roman Catholic Church.

TOWN OF JAMESTOWN.

WARDEN ANDERSON, Jamestown; born in Shelby Co., Ky., Aug. 1, 1818, and emigrated to Jamestown, Grant Co., Wis., in 1842; removed to Illinois, where he resided for three years; in 1845, he removed to Wisconsin again and settled permanently. His property is in village lots; probable value, \$1,000. In politics he is a staunch Republican; was formerly a follower of the old Whig party. Public offices held by him: Town Board, Justice of the Peace, and, at present (1881), Postmaster. He married Sarah A. Calvert Oct. 16, 1877.

HARMON BISHOPP, farmer; P. O. Jamestown; born in Prussia in 1822; has 80 acres of land, the probable value of which is \$4,000. In politics, a Democrat. He served as a soldier in Prussia. Married Theresa Vosberg; they have five children—Joseph, Catharine, John, Barbara, Harmon.

CUTHBERT BRADWELL, P. O. Fair Play; born in England on the 30th of January, 1820; came to America in 1830; remained four years in Schuylkill Co., Penn., and moved to Wisconsin in the spring of 1835, and located at Jamestown; followed mining for some years. Owns 160 acres of land; probable value, \$8,000. Is with the Republican party in politics; is a Protestant. Wife's maiden name, Mary Haley; she was born in Ireland; have five children—Winfield, James, Olive, Emma, Mary.

FRANK BROWN, P. O. Fair Play; native of Baden, Germany; born Oct. 10, 1807; emigrated to Hazel Green in 1844. In politics, a Democrat; in religion, a Catholic. Married Catherine Maus, a native of Germany; born in 1817; they have had six children—Mary A., Christena, Peter, Francis, Henry, William F. (died April 2, 1872). Peter served in the army in the 25th W. V. I., and was honorably discharged.

MICHAEL CALVERT (deceased); born in England in 1810; emigrated to this country in 1831, and settled in Galena and followed mining, then removed to Fair Play, Grant Co., Wis., where he died; since his decease the family have kept hotel; in politics he was a Democrat; in religion, was of the Protestant faith. Was the father of ten children—Sarah, Mary, John, Joseph, Lizzie, Maggie, Maria, William, Ned, Martha.

RANSOM B. FOLTS, Jamestown; was born in New York in 1843; occupation, mining; in politics, he is a staunch Republican. Married Ann Thurtell, of Jamestown, Wis.; they have two children—Edward R. and Eva May. Served in the army; enlisted in Georgetown, in Co. I, 25th W. V. I. Are of the Protestant faith, but are not members of any denomination or sect.

NICHOLAS HOFFMAN, Jamestown; is a native of Germany, born in 1841; immigrated here in 1852; his occupation is farming; he has 21 acres of land; probable value, \$1,100. Is a Republican in politics. Married Eliza Trumbull, of Batavia; they have one child—Clara, aged 14. Served in the army three years; enlisted in Dubuque, Iowa, in the 5th Iowa V. C.

JOHN HIER, farmer, Sec. 13; P. O. Fair Play; has 125 acres of land; probable value, \$5,600. His politics is Democratic; he is of the Roman Catholic faith. Has held the offices of Assessor, term of

1862, Chairman of the Board two years (1865), Town Treasurer for four years, and has been Chairman for many years. Was born in the county of Wexford, Ireland, in 1830; immigrated with his father, four brothers and three sisters, in 1852. Married Margaret Williams; they have four children—Ellen G., Henry P., Mary F. and Celia V. Came to Wisconsin before the days of railroads; marketed all his produce in Galena, Ill.; commenced mining and found a great quantity of lead on the Williams land; owned one-third interest in the mine; put engines on mines, which did not prove a paying investment.

JACOB HUNSAKER (deceased); was born in Union Co., Ill., May 24, 1823; immigrated to Wisconsin in 1847, where he engaged in mining; he operated the mines in the town of Hazel Green known as the "Hunsaker Mines;" afterward he engaged in farming, which he followed until the time of his death, which was caused by a team running away with him, Aug. 21, 1875. He married Matilda Pallett, a native of England; she was born in 1830, and is the mother of six children—Charles, Phebe, George, Thomas, Nellie and Albert.

FRANK KAISER, farmer; P. O. Fair Play; from the boundary line between Belgium and France; has 200 acres of land, the probable value of which is \$8,000. In politics, Democratic. He served in the army under Louis Phillippe, of France. He married Mary Widerbolt, a native of Germany; they have four children—Joseph, Henry, Frank and Eugenie.

JOHN KEMP, farmer; P. O. Jamestown; has 133 acres of land, the probable value of which is \$7,000; was born in Cornwall, Eng., in 1830; emigrated to this country in 1843; settled in Hazel Green, Wis. In politics is a Republican. His wife's maiden name was Jane Roberts, born in Cornwall, Eng.; they have six children—Charles, John, William, Royal, Alfred, Edna. Are members of the Methodist Episcopal Church.

BENJAMIN KILBOURN, Jamestown; native of Kentucky; came to Galena by steamboat Feb. 25, 1828. Married Lydia Dewey; have three children—John, Edward and Flora. In early days he followed mining as an occupation, but of later years has followed farming in connection with mining; is the owner of 700 acres of land, the probable value of which is \$25,000. In politics a Republican. Is a member of the Presbyterian Church at Jamestown. Mr. Kilbourn has a remarkable memory, and talks of matters which occurred fifty years ago, as though but a few years back; remembers in the fall of 1827 and the spring of 1828 the Government levied a duty on foreign lead. The law didn't go into operation until the following June; in the meantime, there were three cargoes of lead brought to our ports, and the consequence was that it caused a glut in the market, and lead sold that fall in Mineral Point at \$5 per thousand.

REV. TIMOTHY J. LEWIS, Jamestown; born in New York in 1825; moved to Wisconsin in 1850, and settled in Rock Co.; is a minister of the Gospel; has been a member of the West Wisconsin Conference twelve years; stationed at Jamestown, Grant Co., Wis., in 1880; prior to his ministry he followed the business of carpenter and joiner. Married Ellen Himebaugh, a native of Pennsylvania; have six children—Francis E., Henry B., Fred F., Mina B., Timothy G., Hattie May.

FRANKLIN LYSTER, cabinet-maker and undertaker, Jamestown; was born in Illinois Nov. 5, 1828; he has $10\frac{28}{100}$ acres of land; probable value, \$1,500. Public offices held by him: Justice of the Peace for fifteen years; Assessor seven years; was census enumerator in 1880; County Supervisor, and at present (1881) is County Coroner. Married Hannah Nehimire, who was born in Germany; they have eight children—Henry L., Frank M., Albert N., Mary C., Ellie H., Fannie F., John C., Maggie E. Settled in Jamestown, Wis., in March, 1856. In politics, a Republican.

KIREN MURRAY (deceased); born in Kings Co., Ireland, in 1799; emigrated here in 1825, and was engaged at New Orleans; came to Galena, Ill., March 17, 1828, and engaged in mining; then settled on his farm in 1833; he has 240 acres; the probable value is \$12,000; he died in January, 1874, and was buried at Sinsinawa Mound; he was the oldest settler in this part of the country. In politics he was Democratic; in religion, a Catholic. He married Bridget Carroll, a native of Kilkenny Co., Ireland; born Sept. 29, 1813; they have nine children—Martha, Lawrence, Nicholas, Samuel, Thomas (died in December, 1874), Kiren, Mary, Catharine, Michael (graduated and received a diploma from the St. Clara Academy at Sinsinawa Mound).

PATRICK MURRAY (deceased); born in Kings Co., Ireland, in 1809; died July 8, 1877; in politics, a Democrat; in religion, a Catholic. When he first settled here he followed mining with some success; afterward engaged in farming, which has been continued by the family since his decease;

they have 240 acres of land, the probable value of which is \$12,000. Mr. Murray married Mary Sheridan, a native of County Cavan, Ireland; they have had eight children—William (dead), Michael, James, Catharine (dead), Sarah, Joseph, Theresa, Agnes.

E. D. PEAKE, teacher; Jamestown; was born in Hamden, Delaware Co., N. Y., July 27, 1836, and engaged during the earlier years of his life, up to 1862, in farming, lumbering and school-teaching; circumstances prevented his enlisting at the outbreak of the rebellion, but he soon afterward followed the strong inclination of his mind, and entered the Quartermaster's Department, going to Florida as a lumberman, where he remained from August, 1864, to June, 1865; he was at Jacksonville, when many Union soldiers entered that prison-pen, and the Abolition sentiments entertained by him were heightened by the brutality shown at that place; soon after returning North from Florida, Mr. Peake taught school in Anawan, Ill., and in the summer of 1866, came to Jamestown, where he has since resided; has held the office of Justice of the Peace, but is no office-seeker. Was married, June 1, 1871, to Miss Martha E. Judd, of Stafford, Genesee Co., N. Y.; they have no children; is Republican in politics.

DR. ARCH SAMPSON, Fair Play; born in Fairfax, Vt., May 16, 1818; attended Burlington University, Vermont, graduated at Dartmouth Medical College in 1843; immigrated to Fair Play, Grant Co., Wis., in the fall of 1845, and commenced practicing medicine; his property is in village lots, the probable value of which is \$1,000. In politics, a Republican; was formerly a follower of the old Whig party; in religion, is of the Protestant faith; public offices held by him are Justice of the Peace, Town Superintendent, and at present (1881) Postmaster at Fair Play. Married Sophronia Gibbs, a native of Jericho, Vt.; is the father of three children—Emma, Charles, Florence; one son deceased—Charles.

EDWARD WARD, Jamestown; was born in Cornwall, England in 1826; follows farming as an occupation; has 145 acres of land, probable value, \$7,500. In politics, a Republican. Married Mary Symons, a native of Cornwall, England; have two children—Elizabeth A. and James; are of the Protestant faith, but are not members of any particular denomination.

JOSEPH WEBER, Jamestown; born in Prussia May 6, 1819; emigrated here in 1846; settled in Galena for six years, and then removed to Jamestown, where he settled permanently; he engaged in mining, and afterward began farming; probable value of farm, \$5,000. Politics, Democratic; is a Catholic. Married Catharine Kulle, who was born in Prussia April 2, 1821; was married in Prussia in 1843; they have eight children—Martha, born Sept. 29, 1843; Anton, July 13, 1845; Joseph, Sept. 20, 1847; Henry, Jan. 14, 1850; Fuldine, March 17, 1851; Joecheim, Nov. 12, 1854; Ceewille, Feb. 14, 1859; Catharine, May 16, 1861.

TOWN OF PARIS.

PETER CASPAR, farmer; P. O. Jamestown; son of Peter Joseph and Ann Clara Caspar; was born near Coblenz, Prussia, July 8, 1829. His father came with his family in June, 1842, to the United States, and settled in Milwaukee. Here his father died in August, 1850. The mother moved to Smelser in 1857. Peter remained at home until 1853, when he commenced business for himself. He was married, July 15, 1853, to Miss Maria C. Messersmith, of Jamestown. They have nine children—Elizabeth, now Mrs. Bonn, living in Smelser; Catharine, now Mrs. Keier, in Beetown; Peter at home; Anna C., now Mrs. Hafner, in Jamestown; Josephine, now Mrs. Pickel, in Smelser; Margaret at home; Andrew at home; Ferdinand at home and John at home. Mr. Caspar has been Chairman of the Town Board of Paris, and member of the County Board since 1867, and still holds the office. He was County Commissioner under the Commissioner system of county government. In 1869, he was elected Justice of the Peace, and successively since. He has been Clerk of School Board for the past twenty-five years. He is a member of Wana Lodge, No. 4, A., F. & A. M., and of Hoffmung German Lodge at Lancaster of I. O. O. F. He is a Republican in politics.

CYRUS A. HORNBECK, farmer, Sec. 17; P. O. Dickeyville; son of Isaac and Elizabeth (Mitts) Hornbeck; was born in Carroll Co., Ind., Feb. 28, 1842. His father moved to Paris, Wis., in 1844, and bought a farm of 160 acres on Sec. 21, Town 2, Range 2 west, where he still resides. Cyrus enlisted in Co. I, 25th W. V. I., Aug. 6, 1862; served through the war, and received his discharge June 7, 1865. He was in the Army of the Tennessee. He was married, Feb. 1, 1870, to Miss Mary Shinoe, daughter of Benjamin and Sarah (Preston) Shinoe, of Paris, Wis. They have four children—Melvin,

Albert, Orville and George. His farm contains 210 acres. He also owns the ferry across the Platte River. Mr. H. has held the office of Town Assessor, also that of Constable for several terms.

MORGAN VANMETER HORNBEEK, farmer; P. O. Dickeyville; was born near Delphi, Ind. His father and mother moved to Paris, Wis., in 1844, and are still living on the old homestead. They were married Feb. 14, 1833, and have six children living—Sarah, now Mrs. Beckett, living in Dickeyville; Morgan V., Cyrus A., Martha J., now Mrs. Smith, living in Dakota; Mary Elizabeth with her parents; Cynthia, now Mrs. Williams, living in Georgetown, Wis. Morgan V. enlisted 6th of August, 1862, in Co. I, 25th W. V. I., in company with his brother, Cyrus A.; served through the war; was discharged June 7, 1865. He was married to Miss Margaret Smith, daughter of Maxime Smith, Oct 17, 1869. They have three children—Cass Elmi, Arthur B. and Leone V. His farm of 70 acres is on the northeast quarter of Sec. 21, Town 2, Range 2. He is Clerk of the town of Paris, and a Trustee of the Union Church. He has been Town Supervisor and District Clerk several years.

THOMAS LONGBOTHAM, farmer; P. O. Dickeyville; son of Elijah and Rebecca Longbotham; was born in the Parish of Ripon, West Riding, Yorkshire, England, May 13, 1807. Was married in 1840, to Miss Hannah Wreakes; she was born at Petworth, near London; they came to the United States in 1841, and settled in Rigsby Hollow, Potosi; here he followed smelting about two years; then moved to the Menomonee Diggings and mined for about three years; then, in October, 1846, entered three forties and commenced farming, where he still resides. He now owns about 770 acres in the town of Paris; the homestead is on Sec. 22, Town 2, Range 2 west. Mrs. L. died July 27, 1880, leaving six children living—William, now living in Thomasville, Neb.; Elijah and Thomas, now living in Rockford, Iowa; Rebecca A., John and George, at home. Mr. Longbotham has been Clerk of the Town of Paris about twenty-three years in succession, and member of the School Board many years.

FREDERICK MARING, farmer, Sec. 21; P. O. Dickeyville; son of Caspar Ortes and Margaret Maring, was born in Burch, Ewrach, Bavaria, Aug. 10, 1807; he came to the United States in 1841, and lived in Pennsylvania one year; then to Galena, Ill., where they remained a year; then to Hazel Green, where they lived thirteen years, and followed mining three years; then engaged in farming, etc.; in 1856, settled in Paris on Sec. 21, where he now resides and owns 163 acres. He was married in Pennsylvania in the spring of 1842; has ten children living—the eldest, Festus, is at home; he enlisted in Co. I, 25th W. V. I., Aug. 6, 1862; served through the war and was discharged June 7, 1865; he is a member of the Town Board, and a member of the fraternity of Odd Fellows; Louisa, now Mrs. Wackershauser, in Paris, Wis.; Catharine, now Mrs. Montag, residing in Iowa; Magdalena, now Mrs. Hoffmeister, in Potosi, Wis.; William, Dickeyville; Mary, now Mrs. Schneider, in Wausau, Wis.; Mitchell and Friederick, at home; Barbara, now Mrs. Schmeltz, in Dubuque, Iowa; Leone, at home.

MICHAEL MONTAG, farmer, Sec. 27; P. O. Dickeyville; owns 185 acres; son of Henry and Martha Elizabeth Montag; was born in Katharinenberg, Saxony, Prussia, April 10, 1846; his father was born in the same place, and his mother at Eisstrut, Saxony; she died in August, 1870, aged 46 years; his father moved to the United States and settled on Sec. 27, Town 2, Range 2 west, where Michael now lives. He was married Jan. 9, 1871, to Miss Catharine Brant, daughter of Andrew and Victoria Brant, of Jamestown; they have five children—Henry, Justin, Charles, Dorothea and Andrew. He is a School Director, a Republican and a Catholic. His father was Burgomaster of his native village in Germany, and, after he moved to Wisconsin, he was elected, in 1867, Justice of the Peace; he is still living in Dickeyville; he was the second German who settled in the town of Paris; a zealous Catholic, he helped to build the St. Mary's German Catholic Church at Jamestown, and afterward the "Holy Ghost" Chapel, German Catholic Church, at Dickeyville.

ANDREW SCHMITT, merchant and farmer; P. O. Dickeyville; son of Michael and Margaret Schmitt; was born in the village of Zeuthern, Baden, Germany, Jan. 25, 1832; he came to the United States in September, 1852, landing at New York; thence he went to Newark, N. J., where he worked as a clerk in a store; the next year, he visited a sister in St. Louis; from there went to Menomonee, Dunn Co., and worked for Knapp, Stout & Co., at lumbering and in their store; remained with them until the spring of 1857, when he came to Dunleith and commenced business for himself as a merchant; the same year he started a branch store in Jamestown, and, in 1860, he opened another branch in Dickeyville; soon afterward, he moved to Dickeyville and discontinued his other two stores, and is still engaged in general merchandise; he built the hotel in Dickeyville, and owned it for many years; he is also engaged in farming, and owns about 600 acres; has a fine vineyard; deals in stock, and has a fire insurance agency. He has been Notary Public and Postmaster in Dickeyville since 1861; was elected Justice of the Peace the same year; Chairman of the Board for the town of Paris in 1862-64; Town Treasurer in

1865, and successively ever since to the same office. He is a member of the Masonic fraternity, also an Odd Fellow. Is a Republican in politics; in religion, a Catholic. He was married June 11, 1856, in Menomonee, to Miss Christina Scheppelle, from Baden, Germany; they had four children—Louisa, now Mrs. May, of Jamestown, born June 11, 1858; John A., born May 28, 1860; Rosa, born Jan. 8, 1868; Christian F., born Feb. 12, 1870; having lost his wife in 1872, he was married July 13, 1874, to Miss Elizabeth Schmeltz; they have two children—Barbara, born Sept. 22, 1875, and Joseph George, born Feb. 22, 1880. His mother, at that time a widow, came in 1854 with the rest of her family, and settled in St. Louis, where she died Sept. 11, 1857. His brother, Maximilian, resides in St. Louis, and carries on a manufactory for plows and also a carriage factory; his sister Katharina (Mrs. Gaus), also lives in St. Louis, and owns several large business blocks, also the Iron Mountain Hotel. His sister Josephine (Mrs. Kastner) resides in St. Genevieve, Mo.

GEORGE SALZMANN, farmer, Sec. 25; P. O. Dickeyville; owns 160 acres of land; son of Adam and Anna Salzmänn; was born in Gusladen, Prussia, Nov. 18, 1815; he came to the United States in 1849; settled first in Ohio near Cincinnati; lived there about two years; went to Kentucky, near Covington, where he remained about five years; thence to Galena, Ill., three years; thence to Dickeyville, where he lived on a rented farm for four years; then on Sec. 36, town of Paris, three years; then, in 1866, he bought the place where he lived until the 29th of July, 1877, when he died suddenly in the field while at work. He was married Feb. 2, 1843, to Miss Theresa Junemann, daughter of Martin and Theresa (Hartung) Junemann, of his native place; she still resides on the homestead in Paris; they had eight children, six of whom are living—Anna, now Mrs. Jentz, living in Hazel Green, Wis.; Elizabeth, now Mrs. Ginter, living in Conception, Mo.; Barbara, now Mrs. Weagel, living in Benton, Mo.; Caspar, living at Ishpeming, Mich.; Henry J., at home; Frank, at Corwith, Iowa. Mr. Salzmänn was a member of the Holy Ghost Chapel, German Catholic Church, at Dickeyville.

JOSIAH WILLEY, farmer; P. O. Jamestown; son of Henry and Grace Willey; was born in the parish of Mullion, Cornwall, England, Aug. 18, 1819; he has a sister (Mrs. E. Dewing) residing at Lancaster, and four brothers—Richard, residing at Little Grant; James, in Richland Co.; Edwin and Thomas, in Carroll Co., Iowa. Mr. Willey came to the United States in 1845, and settled near Benton, Wis; he moved to the town of Paris in 1858; he owns in all 187 acres in Secs. 25, 26 and 35, valued at \$10,000. He was married in 1849, to Miss Christiana Thomas, of the parish of Mullion, England; she was born Dec. 25, 1825; they have seven children—Grace T.; Charlotte I., now Mrs. Bedford; John H., living in Carroll City, Iowa; Addie E., now Mrs. Cundy, living in Colorado; Abram N., Josiah R. and Mary E., at home.

TOWN OF WATERLOO.

GEORGE K. CURTIS, farmer and carpenter; P. O. Burton; born in Torrington, Litchfield Co., Conn.; son of Loren and Phebe (Pritchard) Curtis; came to Harrison in 1863, and to Burton in 1869. July 7, 1866, married by Loren Wade, to Harriet, daughter of David and Catharine (Klindeings) Burkholder; has three children—Eldora, Daniel E., Rosa E. Enlisted February, 1865, in Co. G, 47th W. V. I., and was out nine months. Is at present in charge of the United Brethren Church, at Pleasant Grove, seven miles east of Darlington, which has thirty-two members; was licensed by Platte River Mission Conference December, 1879. His mother was a descendant of Hotchkiss, who came over in the Mayflower. His father was of French descent (Curtis) of Canada.

DAVID DODGE, lumberman, Lancaster; born in Erie Co., N. Y., May 29, 1848; son of Daniel and Mary (Harwood) Dodge. Married April 25, 1872, by Noble Johnson, of Delaware Co., Iowa, to Jennie, daughter of C. V. Steers; she was born March 7, 1853; have two children—Willis C., born July 15, 1873; Frank L., Oct. 5, 1877. Mr. D enlisted in Co. B, 1st U. S. A., and served one year. Is a Republican and a First-Day Adventist. Was four years lumbering in Iowa, and is now erecting his mill on Sec. 2, in Waterloo; has 30 horse-power and a 56-inch saw; cuts 5,000 feet in twelve hours, with five men.

JOSEPH DOLL, farmer, Sec. 23; P. O. Burton; 352 acres; born April 1, 1820, at York, Penn.; son of Joseph and Susan (Hoar) Doll; came to Grant Co. in 1854, and soon after to Waterloo (now Burton), where he worked at his trade (cooper) three years. Married Oct. 22, 1843, in Knox Co., Ohio, by Rev. William Maynard, to Mary Ann, daughter of Nathan and Penelope (Worman) Head, who

was born Aug. 20, 1820. Had eleven children—Jones A., born Jan. 27, 1846, married Jennie Hallaway, now in Kaosas; Mary Jane, born Dec. 26, 1848, wife of Frank P. Mink, has four children living; Oliver, born Sept. 24, 1849, married Theresa Oakleaf, has five children; Sarah Alice, born Dec. 14, 1851, wife of George Potts; Amanda E., born Sept. 5, 1853, wife of John H. Hunt, of Burlingame, Kan., had four children, one living—Myrtie; Henry T., born Nov. 16, 1857, married Minnie Elwell; William B., born Aug. 9, 1859; Charles E., born Jan. 4, 1863; and an adopted daughter, Lou, born Jan. 23, 1865, been with them five years; Margaret Ann, born July 29, 1844, and died March 11, 1853; Thomas R., born Nov. 6, 1855, died Jan. 11, 1858; John W., born Jan. 27, 1868, died May 11, 1868. Mr. Doll is a "Congregational" Democrat, and has held office several years in his town. In 1880, the steamer Penguin, Henry Specht, proprietor; John Specht, Captain; Henry Specht, Engineer, ran up the Grant River fifteen miles, and took wood and supplies, corn, etc., from Mr. Doll's barnyard. He states that in 1857, the snow covered the stocks of corn, and was seven feet deep on the level, also that hay sold in Dubuque at \$120 per ton, and that his brother chased a deer from the yard, and caught and killed it after a short race, the deer being unable to run in the snow. Mrs. Doll's parents left Maryland when she was 3 years old, and settled in Hampshire Co., Va.; she left there at 15 years of age, and went to Ohio, where she remained until her marriage. The maternal grandfather and grandmother of Mrs. Doll were of English and German descent. Her mother died about four years ago, aged 82 years; the father is living at Mt. Vernon, Ohio, aged 80 years, Jan. 29, 1881. The mother of Mr. Doll was 83 years of age when she died, fourteen years ago.

JAMES L. GRAHAM, blacksmith; P. O. Burton; born March 27, 1837, in Virginia; son of Alexander and Elizabeth (Deigh) Graham; came to Grant Co. in 1860; at Big Patch two years. On July 4, 1862, he enlisted in Co. F, 20th W. V. I., and was out three years. Married Aug. 13, 1866, by B. F. Mayne, of Platteville, to Mary E., daughter of Pliny and Rosanna (Bulson) Holmes, born June 13, 1848; they have no children. In 1855, Mr. Graham struck a lead one mile south of Fair Play, and sold one fourth interest for \$4,000; his partners—Cook, Kincaid and Mace—are all dead; Mace became a prominent man and resided at Dubuque, where he died a year ago.

GEORGE S. JOHNSON, merchant, Burton; has 500 acres of land in Sec. 22; was born Dec. 26, 1833, at Lockport, N. Y.; son of Lorenzo and Armina (Griffin) Johnson, of Rhode Island and New York. He was married April 22, 1855, by Father Schrouenbach, of St. Andrew's, to Ann, daughter of Patrick Brady; they have had eight children—Armina, born March 8, 1856; James A., born Aug. 3, 1858, married Nettie Dixon, of Beetown; George E., born July 16, 1866; Eliza Jane, born Sept. 3, 1863, died Aug. 1, 1864; twin boys, born Jan. 16, 1869; one died at birth, and Charlie died Aug. 23, 1869; one girl, born March 23, 1873, died at birth; Mary Ann, born July 18, 1860, was crushed to death in a cane-mill, Oct. 3, 1876; she was assisting about the mill and her clothing caught in the machinery, the arm and shoulder being torn off, leaving the heart and lungs visible; other portions of the body were horribly mangled and ground with the clothing, so that it took an hour to gather up and remove the remains from the machine; she was a remarkably active, intelligent girl, and beloved by all. Mr. Johnson started in the mercantile line in 1878; he has a general stock of dry goods, stationery, groceries, hardware, boots and shoes, drugs and medicines, cigars and tobacco, glass, crockery, paints and oils, cutlery, etc.; he is located two miles above Burton on the Grant River, and is rapidly absorbing the trade of the town and the surrounding country; he is a live man, and people know it. He states that the steamer Waterloo, of Waterloo, twenty-five tons burthen, was launched in 1852, Capt. A. S. Cash proprietor, and was afterward taken to New Orleans, and finally to Panama; the scene was witnessed by 1,000 people, who had a dance in the evening, and a fine flag of forty feet was presented by the ladies present.

CHARLES F. NEWMAN, farmer, Sec. 1; P. O. Lancaster; owns 80 acres of land; born in Auburn, N. Y., in 1849; son of Richard L. and Rachel (Haskell) Newman; came to Grant Co. twenty-four years ago; has owned and run two threshers. Was married Feb. 22, 1880, by Andrew Walker, to Adaline, daughter of Widow Keen; she was born Feb. 1, 1844, and has five children by her first husband, Horace Albee, of Great Bend, Penn., who died in 1878—Roby, Nellie, John A., Laura and Amy. Mr. Newman was Constable two years.

ALONZO OAKS, wagon maker, Burton; was born at Rockdale, Dubuque Co., Iowa, July 24, 1849; son of William and Mary (Head) Oaks; came to this county and started a wagon-shop in 1879. He was married Sept. 3, 1876, by Hiram Gilmore, to Jane K., daughter of Joseph K. and Isabel (Clark) Quick; they have had three children—Harvey Ray, born Aug. 23, 1877, died Sept. 8, 1877; Bertha, born Dec. 5, 1878; Amos Jerome, born Dec. 21, 1880. Mr. Oaks has been Town Clerk four years.

HUBERT SCHUELTER, shoemaker; P. O. Burton; was born Jan. 21, 1847, in Prussia; son of Mathias and Gertrude Schuelter; came here in 1854, and followed farming until his enlistment, in October, 1863, in Co. A, 1st W. V. C.; served two years; assisted in the capture of Jeff Davis, and received \$317 of the reward. He was married Dec. 31, 1869, to Florence, daughter of Emerson and Mary (Drouillard) Chapman; they have had five children—Anna, born Nov. 28, 1869, died Dec. 5, 1872; Henry, born Jan. 6, 1871, died at 1 year of age; Lena, born Jan. 26, 1874; Anna B., born Jan. 8, 1877; Henry A., born Aug. 5, 1879. In politics, Republican; in religion, Catholic. He has been Constable four years. Assisted in organizing the Good Templars Lodge.

WILLIAM B. SLOCUM, farmer, Sec. 11; P. O. Lancaster; was born Sept. 2, 1822, in Saratoga Co., N. Y.; son of Job and Lydia (Bolt) Slocum, of Vermont; came to Grant Co. in 1843; after a short residence at Cassville, came to Waterloo and ran a cabinet-shop three years; from there to a farm in Bloomington; thence to Rice Co., Minn., and returned to Bloomington, and to his present location in 1868; his father died in 1860, aged 74, and his mother in February, 1880, 90 years of age. He was married Nov. 28, 1849, by Elder Chapin (Baptist), to Sarah Jane, daughter of Abner and Emma (Green) Beardsley; they have six children—Charles H., born Sept. 12, 1850, who married Sarah Harper, of Orient, Iowa; they have two children—Walter and Jennie; Alice E., born July 26, 1852, wife of E. N. Fancher, lumber dealer of Iowa; they have two children—Mabel and an infant; Grace L., born March 13, 1854, teaching school in District No. 2, Potosi; Clara L., born July 26, 1856; Wilfried J., born July 3, 1858; Mary E., born Dec. 8, 1865. Mr. S. is a Republican and a Congregationalist. He has been several years Town Clerk, Chairman and Justice of the Peace. Owns 170 acres of land.

TOWN OF HARRISON.

BENJAMIN A. GRAVES, Sec. 2; P. O. Platteville; born in Mercer Co., Penn., Dec. 11, 1825. Married Miss Lurancy Ray July 25, 1845; she was born Feb. 14, 1828, in Trumbull Co., Ohio. In 1848, they came to Wisconsin, where Mr. Graves began as a teamster in this town; he afterward rented farms for a number of years until enough was earned and saved for the purchase of a farm of his own in 1858. This farm he sold to a brother in 1875; he then bought his present 107-acre farm of George McFall. Mr. Graves is a member of the U. B. Church, and a Republican; has been Constable, etc. During the last eight months of the rebellion, he served as one of the 44th W. V. I. Have eight children—George, Roswell, Mary A., Arnold, Martha, Lulu, Lurinda and Hattie; they lost two—Joab, aged 6, and Lorenzo, aged 2.

OBED KING JONES, Sec. 1; P. O. Platteville; born in Trumbull Co., Ohio, Jan. 17, 1833; son of Chauncy and Elizabeth (Brown) Jones; has 240 acres on which or part of which his father settled in 1840. His wife was Miss Susie, daughter of Nathan and Elizabeth Janney, of Washington Co., Mo.; they have two children—Nellie and Frank. Mr. Jones has two children—De Forrest and Lottie, by a former marriage. He is a Republican, and belongs to the M. E. Church. In the spring of 1877, he began the manufacture of cheese, and, in the spring of 1880, built the only cheese factory in his town. Chauncy Jones came from Hancock Co., Ill., to Harrison in the summer of 1837; he was accompanied by a cousin, Obed King, and they built a small log cabin near where O. S. Jones now lives. Mr. Jones was by trade a stone-mason, and was one of the workmen on the old Platteville M. E. Church. Mr. King settled permanently in the town in the fall of 1837, and Mr. Jones in March, 1840; Chauncy Jones, Sr., grandfather of O. S. and O. K., came in 1839, and located on Sec. 12, in Harrison. Mr. King met a tragic death in June, 1840, being killed by the falling of a tub full of rocks while in the bottom of an unfinished well. O. S. Jones was Chairman of Harrison in 1879; was Town Superintendent of Schools many years, and is an old-time teacher in the town.

J. W. KAUMP, Sr., Sec. 13; P. O. Platteville; born in the village of Wehrendorf, Hanover, in November, 1811; came to America in 1833; landed at New Orleans, and came from there up the Mississippi to Grant Co.; engaged in mining at Big Patch until the fall of 1836, when his brother, A. H., and himself, settled near where he now lives, entering the same land which they have cleared and improved, and now own. Until his marriage, they kept bachelor's hall, and by the division, J. W. came into possession of 240 acres. He married, Sept. 27, 1837, Phoebe Flynn, who was born in February, 1822, in Posey Co., Ind.; she came to Grant Co., in 1835; they have had fourteen children, eight of whom are still living—

William A., Mary E., Catherine F., Elizabeth A., Eliza J., Louis S., Emanuel A. and Alfred S. All were born on the home farm, the eldest in the log cabin of the "bachelor brothers." The Kaump Brothers are now the veteran settlers of Harrison. In 1863 and 1864, J. W. Kaump was one of the County Commissioners. He has also been Chairman of his town many years; also Treasurer and Assessor. Henry Utt and himself named the town of Harrison in honor of the victor of Tippecanoe.

A. H. KAUMP, Sec. 14; P. O. Platteville; was born in the village of Wehrendorf, Hanover, in November, 1815; came to America in the spring of 1835, arriving in the fall of the same year at the Big Patch Diggings; engaged in mining here with his brother, J. W., until the fall of 1876, when they entered the land now constituting their respective farms; the land was heavily timbered, and the entire vicinity a forest. Only John Shipley, Abraham Wavers and perhaps one or two others preceded them as settlers in this town, of which the Kaump Brothers are now the veteran pioneers. A. H. Kaump married Nancy Utt, by whom he has five children—John W., Henry H., Mary J., Ruth A. and Emma L.; all born on the Harrison homestead. Mr. Kaump is a Methodist and a Republican.

JAMES LIKENS, Sec. 17; P. O. Rockville; born Jan. 10, 1812, in Washington Co., Va.; his parents, John and Margaret (Davis) Likens, removed to Wythe Co., Va.; here he was reared as a farmer. During three years of his young manhood, he followed flat-boating on the Western rivers. From Vincennes, Ind., he went to Isle No. 100 on the Mississippi; thence to Galena, Ill., where he spent the winter of 1831-32; his next location was Dodgeville, Wis., where he followed mining six years. In 1840, he located near Rockville, and, in 1846, settled on his present farm. He married Artilla Crocker in 1839; she was born near the Kanhawa Salt Works, Virginia, and came to Wisconsin in 1835; they had ten children—William W., George W., Sarah J., John, James, Benjamin F., Samuel, Artilla, Josephine and Emma; all were born in Grant Co.; the three eldest sons were in the Union service during the rebellion, the eldest, William W., serving as Captain of Co. H, 43d W. V. I.; George W. was a Sergeant in the same company, he died Nov. 20, 1864, at Johnsonville, Tenn. John Likens, after the war, graduated at the University of Wisconsin, only to be cut down by the merciless sickle of death in December, 1873. James Likens is one of the genuine old settlers of Harrison and the State. He is in politics a Republican, and has held various town offices. His eldest son is now an attorney at law in Harvard, Neb.

THOMAS & JOHN McMAHON; P. O. Platteville; are sons of Thomas and Margaret (Blakly) McMahon; the father was born March 17, 1787, in County Fermanagh, Ireland; he came with his family to America in 1847, and at once located in Harrison; at his death, Aug. 3, 1875, he left seven children—John, William, Jane (Mrs. William Horlocker), Eliza (Mrs. Thomas Moffitt), Thomas, Margaret (Mrs. John Marston), and Mary (Mrs. H. W. Long). John McMahon has a family and a farm of 205 acres; is a Republican, and served four years on the Town Board of Supervisors. Thomas McMahon is with his mother on the homestead farm of 130 acres. He served, as did his brother William, in the 25th W. V. I., during three years of the civil war, participating in the battles and movements made by his regiment. He is now Chairman of the Town Board, of which he was a side member in 1879; he has also served seven years at Justice of the Peace, and two years as Assessor. In 1880, he was the U. S. Census Enumerator.

TOWN OF MOUNT IDA.

OMAR J. ARNOLD, farmer, Sec. 27; P. O. Fennimore; born in 1844 in Fulton Co., Ill.; removed with his parents to California when 8 years old; came to Grant Co., Wis., in 1856. Married Marcia J. Anderson Sept. 16, 1869; she was born in Hancock Co., Ohio, May 3, 1853, and came to Wisconsin in 1854. Mr. Arnold received a common school education; attended the Bloomington Seminary; also took a select course at the State University in 1864-65; followed teaching for several years. He is the inventor of the Eureka Corn Cultivator, on which he received a United States patent. Has three children—Bessie, Bertha, Cora P. Has always been identified with the Republican party; was elected Chairman of the Board of Supervisors in 1879, and re-elected in 1880; was enumerator of the tenth census of his town, and owns a valuable farm of 160 acres.

RICHARD BUGGINS, Postmaster and merchant, Mt. Ida; was born in Staffordshire, Eng., Feb. 28, 1824; emigrated to the United States in 1848, and settled in Grant Co., Wis., in 1855. Was married to Harriet Walson. He has filled the offices of Justice of the Peace, Constable, Clerk of Schools, and is at present Postmaster. Is a Radical Republican. Is a member of the Baptist Church.

Owens a nice property in the village of Mt. Ida. Adopted Mary Gilder when 4 years of age, who is now the wife of F. M. Simonds.

PASSENGERS BOUND FOR
CALIFORNIA, COLORADO, NEBRASKA,
DAKOTA, **MINNESOTA,**
WISCONSIN, **MONTANA,**
AND THE TERRITORIES,

Should, if they would consult their interest, buy their tickets via the

Chicago & North-Western Railway

This is the **LEADING RAILWAY** of the
WEST AND NORTHWEST.

This important system of Railway Lines is one of the Largest Corporations in the World, owning and operating, under one management,

2,390 MILES OF ROAD.

Its Lines run from Chicago in many directions that it is necessary to designate its Lines by certain specific names, which will give a correct idea to the passenger of the part of country each Line traverses. These Lines, numbering nine, are as follows:

Chicago, Council Bluffs & California Line.
 Chicago, Sioux City & Yankton Line.
 Chicago, Clinton, Dubuque & La Crosse Line.
 Chicago, Freeport & Dubuque Line.

Chicago, La Crosse & Winona Line.
 Chicago, Minnesota & Dakota Line.
 Chicago, St. Paul & Minneapolis Line.
 Chicago, Milwaukee & Lake Superior Line

Chicago, Green Bay & Marquette Line.

These Lines enable the "CHICAGO & NORTH-WESTERN" to reach all principal points in the WEST, NORTHWEST, and, through its connections, the FAR WEST.

It offers every facility for Quick, Safe and Comfortable Transit to the traveler who selects this as his route. It stands second to no road in the West, and offers inducements and advantages that are not and cannot be offered by any of its competitors. Its management adopts every improvement known to the modern Railway System, and is determined that the CHICAGO & NORTH-WESTERN RAILWAY shall remain the LEADING Railway of the GREAT WEST.

Passengers should ask for and be certain their Tickets have a Coupon which reads, over the

"CHICAGO & NORTH-WESTERN RY."

All Ticket Agents will be glad to sell them via this Line.

REMEMBER!—PULLMAN HOTEL CARS Are now running regularly between CHICAGO and COUNCIL BLUFFS on the California Express Trains of the **CHICAGO & NORTH-WESTERN RAILWAY.** BEAR IN MIND, no other road runs Pullman Hotel Cars, or any form of Hotel Cars, THROUGH between Chicago and the Missouri River. This is the only Line that has THROUGH EATING CARS of any sort.

NO TRANSFER at ST. PAUL via the CHICAGO & NORTH-WESTERN RY.

Passengers procuring tickets to points beyond ST. PAUL should use GREAT CARE to see that they read over the

Chicago & North-Western Railway,

— OR THE —

Chicago, St. Paul & Minneapolis Line.

And not over a route having a SIMILAR NAME, as this is

THE ONLY ROUTE YOU CAN TAKE TO AVOID A CHANGE OF DEPOT AT ST. PAUL.
