J. M. P. MANSON, 1777  
IN presenting a new Spelling Book to a community whose favor has already been claimed by too many works of the kind, it is proper for the author to state what he considers the defects of other spelling books, and the peculiar advantages of his own.

In the first place, then, it has been the practice to fill spelling books with matter as out of place there as a lesson of orthography would be in a Fourth-of-July oration! Not contented with interspersing reading lessons, which have no bearing upon the preceding spelling lessons, it is not unusual to see an abridgment of grammar, or arithmetic, or both, inserted. This may have been necessary when the Bible and Spelling Book were the only library of seven eighths of our New England families; but it is no longer so, and the almost infinite variety of reading books adapted to the capacities of children, and more appropriate than the lessons of any spelling book can pretend to be, authorizes us, as society advances, to separate these branches of study. Elocution is more intimately connected with reading than reading is with orthography; but the advanced state of instruction in this community has already said that reading books must not be encumbered with rhetorical rules. The author is aware that there may be a difference of opinion in regard to the

omission of *judicious* reading lessons, (if there be any of this description,) in spelling books for the use of children just beginning to read ; but he thinks there can be no doubt as to the propriety of omitting them in spelling books designed for classes which have already learned to read, and nine tenths of the classes that use spelling books in our common schools are of this description.

In the second place, our most popular spelling books have entirely mistaken the capacities of children, by expecting too much and too little from them. To guard the child against any mistake in pronunciation, our spelling books have been filled with marks, accents, and figures, to denote the pronunciation of *every word*, however simple. By thus affixing marks to words, which the intercourse of children in society, and their necessary use of language, would prevent their ever pronouncing wrcng, (and more than half the words of our language are of this description,) the capacity of the child is underrated, while it is puzzled about what before seemed perfectly plain.

On the other hand, the free use of *any* system for noting the pronunciation of words in a spelling book, if made in the expectation of its being used by *children*, is made in vain, and the capacity of the child is overrated. Few persons have had a better opportunity than the author of this Spelling Book to test the truth of this opinion. An intimate acquaintance with the schools of Boston, from the primary to the highest, as a pupil, teacher, and overseer; the opinion of every

disinterested instructer with whom he is acquainted ; a careful study of every spelling book, from that of Dr. Watts to those of our times ; and the actual use of the most popular in his own school, where the alphabet, as well as the higher branches, was always taught ;—these circumstances have satisfied him that no very young children, and very few children of any age, can understand or make use of any system for marking the pronunciation.

But the use of such a system might be tolerated in a spelling book, for the benefit which many *instructers* might derive from it, were it not productive of the most serious evil. Relying upon this *supposed* power of marking every sound, the authors of spelling books have paid little or no attention to the proper *classification* of words ; and, consequently, the aid of *ASSOCIATION*, on which, more than on any thing else, children depend for the acquisition and retention of every kind of knowledge, is lost. The words in such books are carelessly thrown into a heap, with a mark upon their backs ; and it is not uncommon to meet with words having fifty or sixty different characteristics in the same table or lesson.

In this Spelling Book, the words are so classed in regard to sound, or some other prominent characteristic, that few or no marks are needed. All words that resemble each other are brought together ; and a short acquaintance with the book will enable a person to find most words as readily as in a dictionary. It is astonishing how the number of anomalous and difficult

words appears to be diminished by the simple effect of classification. A careless observer of the heavens sees countless stars in utter confusion; but classification reduces their host to a small number, and renders a familiar acquaintance with all that are visible no difficult attainment.

The vocabulary is believed to be more copious and select than that of any other spelling-book. It has fewer proper names than some, but it was thought improper to insert any but familiar names, that had some peculiarity.

In the division of words into syllables, two objects seem desirable, namely, such a division as will most nearly indicate the *etymology* of the word, and such as will lead the child most readily to its correct pronunciation. Where it was possible, both these objects have been secured; but whenever a rigid adherence to etymology would have led the child to a wrong pronunciation, the author preferred not to press that point; for the true object of a spelling book should be to teach orthography and pronunciation, and not etymology, except so far as this can be done incidentally, and without injury to the main design. Fortunately, the cases are not numerous in which these great objects clash with each other; and a bias towards either would not prevent the acquisition of the true orthography.

In orthography, Johnson and Worcester have been taken as guides; and in pronunciation, Walker has been

followed as far as was consistent with the best usage in this country and in his own.

In fine, to give a distinct idea of the principles on which this Spelling Book is formed, the author respectfully submits, as the result of his long experience and observation, the following

#### A X I O M S.

1. The true way to learn the *meaning* of words is to employ them in reading, conversation, and composition ; as the best way to acquire a correct knowledge of other tools is to use them.

2. The true way to learn the *spelling* of words is to examine them, analyze them, and reconstruct them ; as the best way to get at the construction of a machine of many parts is to take it to pieces, and not to keep it in motion.

3. A knowledge of the *meaning* of words does not lead to their correct orthography ; for ninety-nine in a hundred understand the meaning of words that only one in the hundred can spell correctly. The best spellers are printers, who pay little or no regard to the meaning of the types they set up.

4. It does not facilitate these two important objects to unite them in what are called *Definition Spelling Books and Dictionaries* ; for, by thus fixing the mind upon two distinct objects, neither receives the necessary degree of attention.

5. In learning to spell, as in learning botany, or mineralogy, the more exact the classification, the more

easily the words or names are learned, and the more effectually impressed upon the memory.

6. Words placed alphabetically, as in dictionaries and definition spelling books, are no more *classed* than the buildings in a long street are classed because they are consecutively numbered.

7. Words promiscuously placed, as in common spelling books, though marked with letters, accents, figures, and other contrivances to denote their pronunciation, are no more classed than the scattered plants in a flower garden that happen to be labelled.

8. Words arranged according to the number of their syllables, are no more classed than animals would be if arranged according to their sizes, when other more important specific differences are disregarded.

9. Association is the best aid to memory, and this aid depends mainly upon classification. Words, like men, are best known by the company they keep.

10. A spelling book that assorts and classes the words of a language according to their distinctive differences, is naturally and philosophically constructed, and must effect more than any other in disciplining the mind, while it teaches a correct orthography and pronunciation.

TO THE

CHARACTERISTICS OF THE CLASSES

INTO WHICH

THE WORDS OF THIS SPELLING BOOK ARE DIVIDED.

---

THE author would gladly have included in one lesson all words having the same characteristic ; but, as such an arrangement would have brought some of the longest words into the earliest lessons, it was thought more prudent to divide some of the classes, and place the more difficult words last, so as to present an easy gradation of difficulties. When the pupils are duly prepared, the teacher, by the aid of this INDEX, can easily give them the several parts of any Class in succession.

## NOTICE.

In this Spelling Book, the only marks used are the long accent (—) and the short (˘), to mark long and short vowels when the words have more than one characteristic; and the acute accent ('), which is occasionally used to mark an accented syllable, when it differs from the rest of the Class.

When *th* is sounded as in the word *this*, it is printed in *Italic* or leaning type.

When *s* has the sound of *z*, it is printed in *Italic* type.

Letters that are silent, or not sounded, are printed in *Italic* type, unless the description of the Class renders this unnecessary.

The description of every Class, with the directions for pronouncing the words, should be read to the pupils, and *carefully explained*, before they are required to spell the lesson, or even to study it, especially if the pupils be very young.

If a whole Class should be too much for a lesson, the teacher is requested to give one or more *columns* at a time, and not any number of lines *across the page*, which would destroy the arrangement.

## CLASS 46.

(Continued on page 118.)

*The general rule for forming the past tense and present participle of regular verbs is to add ED or ING to them; but if the verb already ends in E, the rule is to add only D or NG.*

*The following lesson is prepared, not only to guide the pupil to the spelling of these variations of the verb, which are not found in dictionaries, but to afford the teacher an opportunity for correcting a vicious pronunciation of the termination ING, as if it were written IN; as, SINGIN, TAKIN, &c.*

*The E before D final, in the middle column, is silent, and the two syllables are pronounced as one.*

*Whenever the omission of E before ING would bring two I's together, it is customary to change the first I into Y, thus :—*

die	died	dy ing
lie	lied	ly ing
tie	tied	ty ing

*But the E is retained in the following verbs :—*

hie	hied	hie ing
vie	vied	vie ing
eye	eyed	eye ing
dye	dyed	dye ing

*And in all verbs ending in OE or EE; as,*

shoe	shoe ing
hoe	hoe ing
toe	toe ing
see	see ing
agree	a gree ing, &c.

*Whenever, too, the omission of E before ING would confound the word with another of different meaning, the E may be retained; as, SINGE, SINGE-ING, and not SING-ING. The exceptions to the general rule are very few, and perhaps these examples embrace all of them.*

### CLASS 47.

*Words of one syllable ending in any doubled consonant, retain both letters when a syllable is added; and this rule also applies to words of more than one syllable, if the accent be on the last.*

*Words ending in LL generally retain both letters in their compounds; but, as this rule is not without exceptions, the following table will show the usage in regard to each word.*

all; all' spice, al' so, al' most, al to geth' er, with al'.

### CLASS 48.

*Words of one syllable ending in a single consonant, having a single vowel before it, generally double the consonant when another syllable is added; and this rule also applies to words of more than one syllable, if the accent be on the last.*

NOTE.—Some words ending in single *l*, without having the accent on the last syllable, have yet doubled the consonant; as, *travel*, *traveller*; *libel*, *libellous*; *duel*, *duelling*; but the custom of omitting the latter *l* is gaining ground, and will probably prevail. The words to which this remark applies are the following:—

<i>apparel</i>	<i>drivel</i>	<i>label</i>	<i>quarrel</i>
<i>bevel</i>	<i>duel</i>	<i>laurel</i>	<i>ravel</i>
<i>bowel</i>	<i>embowel</i>	<i>level</i>	<i>travel</i>
<i>cancel</i>	<i>enamel</i>	<i>libel</i>	<i>revel</i>
<i>carol</i>	<i>equal</i>	<i>marshal</i>	<i>rival</i>
<i>cavil</i>	<i>gambol</i>	<i>marvel</i>	<i>rowel</i>
<i>channel</i>	<i>gravel</i>	<i>model</i>	<i>shovel</i>
<i>chisel</i>	<i>grovel</i>	<i>panel</i>	<i>shrivel</i>
<i>counsel</i>	<i>handsel</i>	<i>parcel</i>	<i>snivel</i>
<i>cudgel</i>	<i>hatchel</i>	<i>pencil</i>	<i>tassel</i>
<i>dial</i>	<i>jewel</i>	<i>pistol</i>	<i>trammel</i>
<i>dishevel</i>	<i>kennel</i>	<i>pommel</i>	<i>unravel</i>

Of these words Worcester says, “They are spelled in the dictionaries of Perry and Webster with a single *l*, and this mode is more or less favored by Ash and Walker, and by Bishop Lowth and other scholars, and it evidently better accords with the analogy of the language.”

*Worship* doubles the *p* when a syllable is added, but *parallel* never doubles the final *l*.

---

*The words in the above note may, then, be considered exceptions; but the general rule holds, although the two syllables are pronounced as one, the E before the final D becoming silent, although sometimes this last syllable is pronounced separately by incorrect speakers.*

<i>ebbed</i>	<i>rubbled</i>	<i>felled</i>	<i>filled</i>
<i>webbed</i>	<i>drubbed</i>	<i>smelled</i>	<i>chilled</i>
<i>bobbed</i>	<i>scrubbed</i>	<i>spelled</i>	<i>killed</i>
<i>mobbed</i>	<i>called</i>	<i>shelled</i>	<i>spilled</i>
<i>robbed</i>	<i>galled</i>	<i>swelled</i>	<i>trilled</i>
<i>sobbed</i>	<i>squalled</i>	<i>yelled</i>	<i>thrilled</i>
<i>throbbed</i>	<i>walled</i>	<i>quelled</i>	<i>tilled</i>

willed	fanned	punned	purred
lolled	manned	shunned	bagged

dimmed	pinned	barred	wagged
brimmed	sinned	spared	re called
trimmed	tinned	starred	ful filled
hummed	skinned	warred	un rolled
thrummed	thinned		

*In the following words, the E is silent, and the D has the sound of T. A few of these words are sometimes contracted, T being substituted for the last syllable; as, TOST, PAST, DROPT, STRIPT; but, as this contraction gives to regular verbs an irregular form, it should be avoided.\**

quaffed	stepped	passed	pro fessed
scoffed	slipped	glassed	re dressed
cuffed	ripped	grassed	pos sessed
puffed	tripped	blessed	de pressed
snuffed	stripped	pressed	re pressed
capped	hoped	kissed	im pressed
lapped	mopped	hissed	com pressed
clapped	cropped	missed	op pressed
flapped	dropped	tossed	dis tressed
napped	stopped	re passed	trans gressed
snapped	classed	con fessed	en grossed

\* It may be remarked, also, that, when the past tense is pronounced in one syllable, correct writers and printers never omit the e, and supply its place before d with an apostrophe, thus, *lov'd*, *bless'd*, &c., for the only object of thus contracting words is to reduce the number of syllables; but this contraction neither alters the number of syllables nor the pronunciation of the word.

## CLASS 50.

*Words in which WH is sounded as if written HW.*

*It is a very common error to pronounce WH as if the H were silent. This practice, besides its impropriety, has a tendency to confound words of very different meaning; as, WHET, to sharpen, with WET, to moisten; WHEN, at what time, with WEN, an excrescence; WHILE, during, with WILE, a trick; and so of many others.*

## CLASS 51.

## Words ending in A.

**A** at the end of a word is pronounced like AH in MESSIAH; and care must be taken not to give it the sound of long A in FATE. The same rule applies to proper names; as, AMERICA, ASIA, AFRICA, CHINA, &c.

## CLASS 52.

(Continued on page 136.)

## Words ending in ENT and ENCE.

This Class has been compiled to enable the teacher to correct the very common fault of pronouncing these terminations as if they were written UNT and UNCE; as, AB-SUNT, PRES-UNCE, &c. The E is not sounded

*so fully as in CON-SENT, IN-VENT, and other words where it is accented, but still the sound only differs in degree, and not in kind.*

ca dence	co gent	mo ment

## CLASS 9.

(Continued from page 40.)

*Words in which U has its long sound, as in CUBE.*

Let the attention of the pupil be directed to the remaining words of this Class, in which the long sound of *u* must be preserved. The great fault of New Englanders and their offspring is, pronouncing the *u* as if it was *oo* — *magnitoode, institoote*, &c.

*Accented on the first syllable.*

## CLASS 56.

*Words in which I, at the end of an unaccented syllable, has its short sound, as in PIN.*

*This Class might have been included in the 6th; but, as these words present one of the greatest obstacles in the path of the young speller, in consequence of his mistaking the short sound of I for the long sound of E, to which even Walker refers it, it has been thought prudent to collect these words into a Class by themselves.*

*Whenever it was possible to unite the I with the following consonant, and secure the correct pronunciation of it, this has been done in the preceding Classes; but the following words do not admit of any such union, without offence to the eye or to the organs of utterance.*

*Accented on the fourth syllable.*

mul ti pli cand    an i mad vert    re cog ni zee

*The following words, besides containing the short I, are also examples of the general rule, by which E final lengthens the vowel that comes before it in the same syllable. No separate Class has been made of such words, but they have been separated from the other words in Classes 1, 3, 5, 7, and 9. A separate Class was made of the exceptions, and numbered 43.*

### CLASS 61.

*In English, the general rule is to pronounce C and G hard before A, O, and U, and soft before E, I, and Y. Advanced pupils are very often unable to pronounce correctly the syllables*

ga, ge, gi, go, gu, gy;  
ca, ce, ci, co, cu, cy;

*and teachers should be careful to set them right in regard to sounds that enter into the composition of so many words. C has no exceptions to this rule; but in the following words, G is hard before E, I, and Y.*

*Accented on the first syllable.*

*Accented on the second syllable.*

re quest	ac quit	ac quire	es quire
e quip	re quite	re quire	in quire

The above words present no difficulty to the learner, and other words like them are interspersed in other Classes. No Class would have been made, had it not been for the following words, in which QU, following a vowel, is sounded like KW, the K with the former, and the W with the latter syllable, or as if C were added to the syllable that precedes the QU; thus, A-QUE-DUCT is pronounced AC-QUE-DUCT, &c.

*Accented on the first syllable.*

## CLASS 84.

## PROPER NAMES.

The following list only includes such proper names as present some difficulty or peculiarity, and are in common use. Those who wish for a more complete list may find it in Worcester's Dictionary, which is preferable, in this respect, to Walker's, because it embraces modern as well as ancient names, and is adapted to the wants of the United States.

Were the orthography and pronunciation of Indian and foreign names at all settled, any thing like a complete list of them would swell this book to twice its present size; but nine tenths of the names would be unimportant, or of very limited use, and they would be as much out of place here as strictly technical words, which are necessarily and properly excluded from all spelling books.

The matters contained in this Appendix do not properly belong to a Spelling Book; but until they are to be found elsewhere, they must be continued here, though out of place.

## PUNCTUATION.

In teaching the stops and marks used in writing and printing, the author has found it useful to make the stop so large that the whole class can see it, and then, pointing to it, to ask the following questions:—

- Q. (,) *What is this stop called?*
- A. A COMMA.
- Q. *How long must you pause or stop at a comma?*
- A. Long enough to count one.
- Q. *How must your voice be at a comma?*
- A. The voice must be kept up at a comma.
- Q. (;) *What is this stop called?*
- A. A SEMICOLON.
- Q. *How long must you pause at a semicolon?*
- A. Long enough to count one, two.
- Q. *How should the voice be at a semicolon?*
- A. At a semicolon the voice must be kept up.
- Q. (:) *What is this stop called?*
- A. A COLON.

\* See remarks at Class 50, page 79.

- Q. *How long must you pause at a colon?*  
 A. Long enough to count one, two, three.
- Q. *How must the voice be at a colon?*  
 A. At a colon the voice is kept up.
- Q. (.) *What is this stop called?*  
 A. A PERIOD.
- Q. *How long must you pause at a period?*  
 A. Long enough to count one, two, three, four.
- Q. *How should the voice be at a period?*  
 A. At a period the voice must always fall.
- Q. *Has this mark any other use?*  
 A. It sometimes is merely a sign of abbreviation, and then should be called a *dot*.\*
- Q. (?) *What stop is this?*  
 A. A QUESTION, and shows that a question is asked.
- Q. *How long must you pause at a question?*  
 A. Long enough to count one, two, three.
- Q. *How should the voice be after a question?*  
 A. If a question can be answered by *yes* or *no*, the voice must be raised; but if not, the voice must be lowered, as at a period.
- Q. (!) *What stop is this?*  
 A. A mark of ADMIRATION.
- Q. *What is the use of the mark of admiration?*  
 A. The mark of admiration expresses wonder or surprise.
- Q. *How long must you pause at an admiration?*  
 A. Long enough to count one, two, three.
- Q. *How should the voice be at an admiration?*  
 A. At an admiration the voice usually falls.
- Q. ( ) *What are these marks called?*  
 A. A PARENTHESIS.
- Q. *What is the use of a parenthesis?*  
 A. A parenthesis includes one sentence within another, to explain it.
- Q. *How should words enclosed in a parenthesis be read?*  
 A. Words enclosed in a parenthesis must be read lower and quicker than the words not enclosed.
- Q. [ ] *What are these marks called?*  
 A. BRACKETS; brackets are used for the same purpose as the parenthesis.
- Q. (') *What is this mark at the top of letters called?*  
 A. An APOSTROPHE.
- Q. *What is the use of the apostrophe?*  
 A. An apostrophe shows that one letter or more is left out; as, *e'er*, for *ever*;—or it shows that the word is in the possessive case; as, *John's book*.
- Q. (^) *What is this mark called?*  
 A. A CARET.
- Q. *What is the use of the caret?*  
 A. A caret shows that something has been left out by accident; as, *Jon<sup>h</sup>*, for *John*.

---

\* The list of Abbreviations will explain this remark.

Q. (—) What is this long mark called?

A. A DASH.

Q. What is the use of the dash?

A. Sometimes the dash is used instead of the comma, semicolon, colon, and period; sometimes it is used with those stops, and lengthens the pause at them; and sometimes the dash marks an unfinished sentence.

Q. (—) What is this shorter mark called?

A. A HYPHEN.

Q. What is the use of the hyphen?

A. A hyphen joins words or syllables together; as, *man-servant, pu-per.*

Q. (‘ ’) What are these marks called?

A. QUOTATIONS.

Q. What is the use of quotations?

A. Quotations show that the words between them are not the writer's own words.

Q. (‘) What is this mark called?

A. A DIÆRESIS.

Q. Of what use is the diæresis?

A. It separates two vowels into different syllables; thus, *aërial* and *Nerviï* are pronounced a-e-ri-al and Ner-vi-i.

Q. (‘) What is this mark called?

A. The ACUTE ACCENT, and is chiefly used to mark the accented syllable of a word.

Q. (‘) What is this mark called?

A. The GRAVE ACCENT; it is now seldom used in English.

Q. (—) What is this mark called?

A. The LONG ACCENT, and is placed over a long vowel; thus, röbe.

Q. (‘) What is this mark called?

A. The SHORT ACCENT, and is placed over a short vowel; thus, röb.

Q. (I F) What is this mark called?

A. An INDEX, and directs the reader to something to be particularly noticed.

Q. { What is this mark called?

A. A BRACE, which connects two or more words or lines.

Q. (§) What is this mark called?

A. A SECTION, which divides a book or chapter into smaller parts.

Q. (¶) What is this mark called?

A. A PARAGRAPH, which shows that a new subject is begun.

Q. (\*) What is this mark called?

A. An ASTERISK.

Q. († ‡ ||) What are these marks?

A. REFERENCES.

Q. What is the use of the asterisk and references?

A. The asterisk and references direct the reader to some explanation at the side or bottom of the page.

Q. When a great many references are wanted, what are used?

A. Figures or small letters.

## ABBREVIATIONS.

**Q.** *What is an abbreviation?*

**A.** A shortening; the first letter or part of a word being put for the whole of it.

**NOTE.** — Children sometimes ask why *P. M.*, for instance, stand for *Afternoon*, and *A. M.* for *Forenoon*. The instructor should tell them that many of the abbreviations are the first letters of Latin words, which mean the same as the English here given. Thus *P. M.* stand for *Post Meridiem*, which is the Latin for *Afternoon*, and *A. M.* stand for *Ante Meridiem*, which is the Latin for *Before Noon*, or *Forenoon*.
