WHO IS HERE?

We changed our communications policy and engagement with scientists to attract more mature participants to "Wiki Loves Science" which lets us increase the quality of scientific knowledge. Every Saturday 40-50 wikipedians get together in our office to edit

We greatly advanced in integrating in international community, last year we organized Wikimedia CEE meeting in Armenia, Dilijan

We established working relations with the ministry of education to include active contribution to wikipedia as a new criteria for teacher retention and appraisal
