FCOF 4-81  
August 1981

## COFFEE SUPPLY AND DISTRIBUTION IN PRODUCING COUNTRIES, 1960/61-1981/82

This circular updates Foreign Agricultural Circular FCOF 4-80, published in August 1980.

The data presented here on area, tree population, production by type, trade, consumption, and stocks cover the 22-year period 1960/61-1981/82 on a crop-year basis. Because crop years for producing countries vary--i.e., they can begin in October, April, or July--annual regional and world totals are sums of the data for the individual country crop years. Totals for stocks, for example, are the sum of stocks for individual producing countries at the beginning and ending of their specified crop years (normally when stocks are at or near their lowest annual level), rather than world stock levels at a particular time.

Some clandestine movements of coffee occur between neighboring producing countries. Because it is virtually impossible to determine the magnitude of these movements, such coffee has been included in the production figures for the country from which it is officially exported.

In a few countries, the figures for domestic use include coffee stocks that have deteriorated, been destroyed, or used for nonbeverage purposes during the year. Utilization as such is footnoted. Also, world and regional totals on area, tree numbers, and average yields are not complete, because data for some producers are not available.

Data for 1981/82 are highly preliminary, especially with respect to exports.

The data series were prepared or estimated on the basis of official statistics of foreign governments, reports of U.S. Agricultural Counselors and Attaches, Foreign Service Officers, the International Coffee Organization's (ICO) statistical bulletins, results of office research, and related information. These data series will be updated on a regular basis and published in FAS circulars. Area statistics are in hectares (2.471 acres), and supply and distribution data are in 1,000 bags of coffee, green bean equivalent (GBE) of 60 kilograms (132.3 lb) each.

Information in this circular was prepared by C. Milton Anderson, Horticultural and Tropical Products Division, FAS/USDA, Washington D.C. 20250. Telephone (202) 447-3423.
