

DELCO-LIGHT

Electric Light and Power When and Where You Want It

Delco-Light is the complete electric *light and power* plant. When you install Delco-Light you get bright, clean, safe, electric lights in every room of your house,—in every part of your barn and outbuildings. You get electric power at the house,—to pump the water, to run the washer, wringer, cream separator and churn. You get electric power at the barn,—to turn the cornsheller, the grindstone and the fanning mill,—all of this, *bright, safe, electric lights, and dependable electric power*, at the touch of a convenient button.

Delco-Light pays for itself by the work that it does. Delco-Light is the electric light and power plant for you to install; it is dependable, durable and efficient,—*recommended and endorsed by more than 60,000 satisfied users throughout the world*. This is your guarantee of its satisfactory operation. *Write us today for your copy of the new Delco-Light catalogue, giving valuable information and further complete details.*

Put the Delco-Light Power Stand to work for you. It is an efficient, portable electric motor that you can easily carry from one job to another.
