FUNCTIONAL ANALYSIS REPORT NO. F/A - 254
Date 4 August 1945

TARGET NO: 90:17-209

NAME OF TARGET: MILITARY WORKS TOKYO

LOCATION: TOKYO, JAPAN COORDINATES: 35°45'N 139°44'E

PHOTOGRAPHY: Date Mission Print Nos
 2 April 1945 3PR/5M113 2V:28,29

1. This report has been prepared from a study of aerial photographs and a consideration of evaluated ground information supplied by the Joint Target Group.
2. FUNCTION:
This target, which is called Military Works, is part of TOKYO "ARSENAL AREA" but the general planning of the area and the buildings suggest a Workers Training School.
3. LOCATION:
MILITARY WORKS is situated approximately $\frac{1}{2}$ mile due W from OJI station on the TOHOKU line, TOKYO.
4. SERVICES:
The target has direct road leading to target 206; ground information says that all parts of "ARSENAL AREA" have electric train communications, but the poor quality of cover does not allow this to be proved.
5. IDENTIFICATION OF FACILITIES:

1-5	Unidentified
6,7	Machining and assembly shops
7A	Boiler house
8,9	Unidentified
10,11	Ammunition filling shed
12	Stores
12 A-D	Unidentified
13-16	Light industrial purpose
17-19	Unidentified
17 A-C	Earthen-wall protected sheds
20,20A	Unidentified
21,21A,B	Unidentified
21C	Water tank
22-26A	Probably classrooms etc.
27,28	Stores
29-41	Dormitories, messhall etc.

6. DISCUSSION:

No definite information exists about this target, except that it is a Military Works belonging to TOKYO "ARSENAL AREA".

The target is situated beside target 206 and not far from targets 205 and 1135 and has good communications with them. The grouping and types of buildings suggest that they have been built for different purposes. Each group looks like a self-contained unit but the manufacturing quantity cannot be very great. The N part of the target looks more like a training school

6. DISCUSSION(CONTINUED)

and the S part is given up to dormitories and recreation. Ground information mentions that the TOKYO "ARSENAL AREA" has a Workers Training School (Ginsha Yoseijo) but does not specify where.

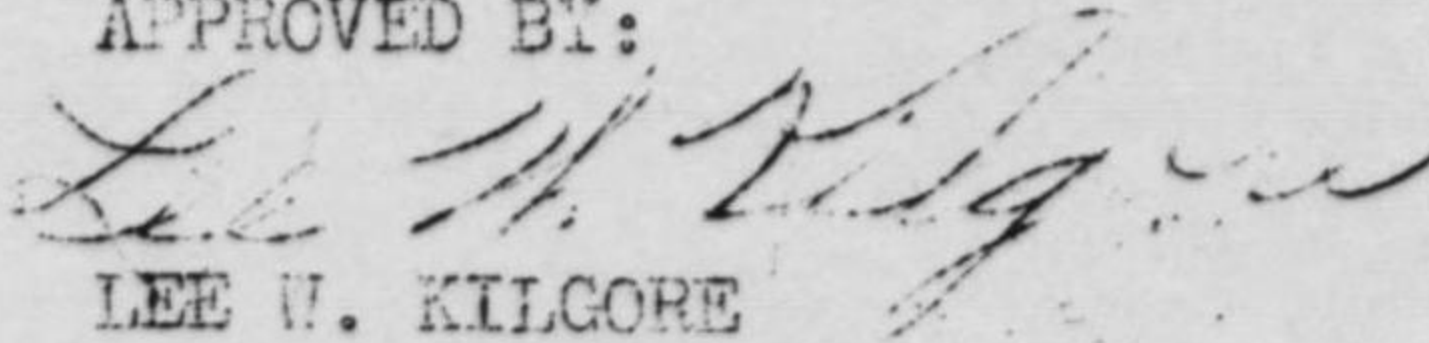

7. ACTIVITY:

The cover of the target is poor and no signs of steam or smoke can be seen at time of photography but the target, if a training school, might quite well be fully active without much outward signs of activity.
