A.A.R.S. WINNERS FOR 1964

Granada Multi HT*	\$3.50
Saratoga, White FL.	\$2.50
Add 25¢ per plant for postage on all roses	

For a rose bed of 24 plants stake out an area four feet wide and 18 feet long. Remove six inches of soil and mix it with the following:

3—50-lb. bags of processed cattle manure, 1—7½ cu. ft. bale of peat moss, 20 lbs. Dolomite limestone,

8 lbs. superphosphate and 5 lbs. sulphate of potash. Mix the ingredients thoroughly and replace in the bed area, water down well and plant the roses.

For healthy growth apply two tablespoons of fertilizer rose food to each plant every two weeks.

Brilliant Color

Fancy Leaf

CALADIUM

The brilliant colored leaves that these bulbs produce are unequalled in the summer garden, also used extensively in pot plantings. These bulbs should be given very good drainage.

CANDIDUM

- BLAZE—Fine deep red.
- CANDIDUM—Snow white leaf with green ribs and veins.
- CRIMSON WAVE—Crinkled transparent crimson leaves with deep green border.
- PINK BEAUTY—Pink leaf with deep pink veins.
- BRILLIANTISSIMO—Deep rose red with narrow green border.
- FANNY MUNSON—Bright crimson, scarlet ribs, narrow green edge.
- MRS. SANDERS—Dark green leaf blotched transparent rose.

MRS. W. B. HALDEMAN—Bright pink leaf with green edge.

MISS CHICAGO—Deep crimson red center, very glossy.

FRED BAUSE—Dark red with green border. Medium grower.

PANSY PLANTS—Our Pansy Plants are grown from the highest grade of imported seed and grown by a pansy specialist. Large flowering and containing many rare and beautiful colors not generally obtainable. Plant a bed of Pansies from October to January; they begin to bloom immediately.
100, \$2.75, postpaid.

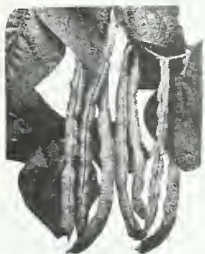

Include Some of These Better Varieties In Your Garden

ARTICHOKES

Culture—Planting time, Southern States: Sow seeds in seed bed from December to June, 1½ ounces of seed to 150 feet of row 3 inches apart in the row and rows 1 foot apart (will produce 150 plants). Cover ½ inch with earth. Transplant in October to open ground 1½ feet apart in rows and rows 3 feet apart.

LARGE GREEN GLOBE—French grown. Pkt., 20c; oz. \$1.00 postpaid.

Grow Them from Steckler's High Quality Seeds

TENDERGREEN

SNAP BEANS, DWARF or BUSH—GREEN PODDED

Height of bush 15 to 25 inches. All varieties marketed as green beans except Red Kidney and White Navy or Boston which are left to mature.

ASGROW BLACK VALENTINE STRINGLESS—48 days. An improved selection of the old Black Valentine which is stringless and yet retains the valuable quality of the old type of being immune to damage by light frosts.

TENDERGREEN—53 days. Desirable for home and market garden. Pods round, fleshy, dark green, strictly stringless, of fine quality. Seeds brown, mottled and blotched with light fawn. An improvement on Full Measure.

TENN. GREEN POD—50 days. Good home garden variety, dark green, slightly stringy, but very flavorful.

HARVESTER—A white seeded, green podded bush Snap Bean. Stringless, medium green color, pods medium long. Plants are upright, about 18 inches tall, late maturing and a good shipping bean.

TOP CROP—50 days. Mosaic resistant, heavy yielding. Round pods—5½ to 6 inches long and very meaty pods.

NEW LONGVAL—High yielding, mosaic resistance, drought and heat tolerant. Straight oval pods, dark emerald-green. Plants about 16½ inches.

RED KIDNEY—Left to maturity. A red kidney-shaped bean used for baking and soup.

ASPARAGUS

Culture—Planting time, Southern States: Sow seed January to April in seed bed, 4 ounces of seed to 150 feet of row, 2 inches deep in rows 18 inches apart (will produce about 800 plants). Transplant to specially prepared Asparagus beds December to February, 12 inches deep, 24 inches apart in rows 4 feet apart. Send for book on Asparagus Culture, \$2.75, postpaid.

MARY WASHINGTON—Result of development by U. S. Department of Agriculture to produce a rust-resisting vigorous strain of Giant Asparagus. Pkt., 10c; oz., 35c; ¼ lb., 75c; lb., \$2.25, postpaid.

ASPARAGUS

GARDEN BEANS

Culture—Planting time, Southern States: Spring, January to May; Fall, August to November. Plant 1 pound to 150 feet of row 1¼ bushels to one acre; drop two beans every two or three inches in rows; 1½ feet apart, cover one inch with earth. Average production green beans about 100 bushels per acre.

BOUNTIFUL—53 days. Pods longer than Black Valentine and flat. A prolific bearer, absolutely stringless at all stages, the very best for private and shipping purposes.

CONTENDER—54 days. A recent introduction, with resistance to common bean mosaic and powdery mildew. Pods are stringless, round and seed buff lightly mottled. Ideal for home, marketing and shipping.

TOP CROP

BUSH WAX BEANS

Height of Bush 15 to 25 Inches

IMPROVED GOLDEN WAX—48 days. Used largely by home gardeners; heavy bearer, vigorous grower. Pods large yellow, solid, brittle and waxy texture, and absolutely stringless. A good rust resisting variety.

BUSH LIMA BEANS

Height of Bush 15 to 25 Inches

NEW CALICO or JACKSON WONDER BUSH BUTTER—65 days. Pods short, used also for shelling. Name "Calico" derived from appearance at maturity. An excellent Southern bean, both for family use and for shipping, cannot be too highly recommended.

HENDERSON'S BUSH or BABY LIMA—68 days. Extremely early, hardy and productive, pods are medium dark green, short, flat, of excellent quality either green-shelled or dry. Much used by canners.

THOROGREEN—A new green seeded small bush lima of the Henderson type. Strong grower, more prolific and with slightly larger seeds.

POLE LIMA BEANS

SNAP BEANS—POLE or RUNNING GREEN POD

Use poles 5 to 8 feet long, set in rows 4 feet apart, plant 6 beans around pole. Half pound plants 150 hills; half bushel to one acre. **IDEAL MARKET**—58 days Thrifty and extremely prolific, yields better than other varieties of pole beans, thick, stringless pods.

IMPROVED KENTUCKY WONDER or OLD HOMESTEAD—65 days. Early, very prolific sort of excellent quality. Vines are vigorous, very productive, comparatively straight. Best quality for home use and for shipping purposes.

MCCASLAN POLE—65 days. Strong climber, hardy, prolific over long season. Pods dark green, thick, flat, meaty, almost stringless, tender and of a delicious flavor. Seeds ivory white.

STRIPED CREASEBACK—73 days. A very hardy and productive green podded bean. Pods long, very cylindrical or completely rounded, distinctly crease-backed.

CAN FREEZER—Pole Bean with a medium vine. Pods straight, stringless, dark green, excellent for freezing.

WHITE CREASEBACK—63 days. Green podded variety, valuable for its earliness, vigorous grower, pods are medium length, comparatively straight. They are of the best quality.

STRINGLESS KENTUCKY WONDER GREEN PODDED POLE BEANS—A new 65-day variety, unexcelled for flavor, texture and quality. Strictly stringless, vines are vigorous and uniform, very productive, bearing its pods in large clusters.

POLE LIMA BEANS

CAROLINA or SEWEE—77 days. Very early and reliable pole lima especially adapted for planting in the South.

SPOTTED or FLORIDA BUTTER—78 days. Larger pods than Carolina, very prolific, in great demand by Southern gardeners and for home consumption.

SOUTHERN WILLOW LEAF—82 days. Similar to the Sewee but a heavier yielder, early and prolific, leaves are willow leaf in shape and produce pods from the bottom to the very top of vine. Hardy and drought-resistant, thrives in sandy land, good shipper.

KING OF THE GARDEN—88 days. A true large lima pole bean, vigorous grower, extra large greenish white beans. Late variety and extensively planted.

POLE WAX BEANS

KENTUCKY WONDER POLE WAX—68 days. An early and attractive sort, one of the best of wax-podded snap pole beans.

WINDSOR BEANS

ITALIAN or ENGLISH—Long variety. 75 days. Plant about two beans every 6 inches and 2½ feet between rows. Used same as Lima beans. It has gained fame and is being planted extensively by Italian gardeners for shipping and for home use.

BEETS

— DETROIT

Culture—Planting time, Southern States: Spring, January to July; Fall, September to December. Edible condition about 62 days from time of planting seed. Plant 2 ounces to 150 feet of row, 12 pounds to one acre. Sow in thick rows 12 inches apart or sow broadcast and thin to 10 inches apart.

CROSBY'S EARLY EGYPTIAN—Beets globe shaped, center of beet blood red, tender, excellent eating.

DETROIT DARK RED—Beets oval shaped, flesh of beet very dark red an excellent variety for shipping and eating.

EARLY ECLIPSE—50 days. Extra early, uniform in size, deep red color round, with small tap roots, flesh bright glossy red, crisp and tender.

WONDER BEET—One of the earliest of table beets for outside culture. Bright red skin, vermilion red flesh with distinct zones of lighter red.

FIREBALL—A distinct variety, having the finest table qualities. Flesh solid, crisp, sweet and brilliant red color. Globe shape, skin smooth. Especially desirable for canning.

SWISS CHARD or PERPETUAL SPINACH BEET—Leaves much darker green than the Lucullus. As the outer leaves are cut more come up from the center.

CHICAGO EARLY BLOOD TURNIP—Oval shape, dark red flesh smooth skin, a favorite among private and market gardeners. Extensively used for canning and shipping.

SUGAR and STOCK BEETS

Culture—Planting time, Southern States: Spring, January to July; Fall, September to December. Sow 5 pounds to one acre in rows 2 to 3 feet apart. When 4 or 5 inches high thin to 12 to 15 inches apart in rows. Ready for harvest about 75 days after planting seed.

LONG RED MANGEL—Flesh white with reddish tinge.

KLEIN WANZLEBEN—75 days. Exceedingly valuable for stock feeding. Roots 12 to 15 inches; white with tinge of gray, very rich in sugar content, easily grown. Should be left in ground until frost to secure the largest crop.

BROCCOLI

Culture—Planting time, Southern States: Spring, January to June; Fall, September to December. Plant 1½ ounces to 150 feet of row. Plant and cultivate same as Cauliflower.

GREEN CALABRESE—A distinct variety grown by Italian gardeners for Italian trade only. Forms large solid heads which remain green. Sow seed in frames early in spring and market in June and July. Also planted in September for Christmas marketing.

Pkg. 10c; oz. 40c; ¼ lb. \$1.00; lb. \$3.00; 5 lbs. \$13.25, postpaid.

DE CICCO—An extremely early variety, producing large heads, light green in color and very productive. Pkg. 10c; oz. 40c; ¼ lb. \$1.30; lb. \$4.00.

BRUSSELS SPROUTS

Culture—Planting time, Southern States: Spring, January to June; Fall, September to December. Plant half ounce of seed to 150 feet of row. Plant and cultivate as cabbage.

LONG ISLAND—Small cabbage-like heads of 1½ inch diameter grow at each leaf joint on stalk about 20 inches tall. Heads mature successively. Pkg. 10c; oz. 50c; ¼ lb. \$1.40; lb. \$4.50, postpaid.

COLLARDS

Culture—Planting time, Southern States: Spring, June to September; Fall, October to January. Plant two ounces to 150 feet of row. Belongs to cabbage family and is cultivated in same manner. Edible condition about 85 days. One ounce will produce about 2,500 plants.

GEORGIA—About 85 days. An oldtime favorite, stands all sorts of conditions without injury.

CABBAGE—Cross between the Georgia Collard and the Charleston Wakefield Cabbage. Bred for hardness of the Collard and the flavor of cabbage. Tender, does not grow as tall as the Georgia Collard and does not winterkill.

LOUISIANA SWEET—Developed by Dr. Julian C. Miller of the Louisiana Agricultural Experiment Station, inbred to produce a uniform type of plant, having a deep compact rosette center, leaves with short stems and free of purple or red color.

VATES—Large, low growing broad and spreading variety. Stands cold weather. Color from glossy green to grayish green.

CAULIFLOWER

Culture—Planting time, Southern States: Spring, January to March in hotbeds, in open ground to June; Fall, September to December. Plant one-fourth ounce to 150 feet of row. Transplant 1½ feet apart in rows 2½ feet apart in open ground. Approximate number of days to edible condition is given after name of each variety. This varies with climatic and soil conditions.

EARLY ITALIAN GIANT—110 days. Large white compact heads, delicious flavor. A fine variety.

LATE ITALIAN GIANT—120 days. The largest of all Cauliflowers, very compact, grown very extensively and well liked.

EARLY SNOWBALL—75 days. Large compact heads, a very desirable and dependable head-forming Cauliflower. The most popular variety among Southern gardeners. Favorable for shipping and home use.

CABBAGE

Culture—Planting time, Southern States: Spring, June to September; Fall, October to January. One ounce will produce about 3,000 plants, 5 ounces to the acre. Sow 5 or 6 seeds per inch in rows about 6 inches apart in well prepared beds. Cover very lightly with earth. Keep bed moist but not wet. Transplant to field when plants are 6 inches tall preferably on a cloudy day or in late afternoon. Frequent shallow cultivation for a short time is best. Distance between plants 12 to 15 inches; between rows, 24 inches. Approximate number of days to edible condition from time of planting seed is given after name of each variety. This varies with weather and soil conditions.

COPENHAGEN—75 days. Very vigorous, short stems, few outer leaves, producing a very hard round head, very uniform in size and of long keeping qualities. Very profitable, and gaining in popularity every day. Excellent for shipping and home consumption.

DISEASE RESISTANT COPENHAGEN MARKET—75 days. A "yellow" resistant strain of Copenhagen. Not so early or as uniform, but a good round head and crisp.

LARGE LATE FLAT DUTCH—75 days. Large, solid heads, sometimes weighing 15 to 25 pounds. This is the most popular winter cabbage among Southern gardeners for home consumption and shipping.

STEIN'S EARLY FLAT DUTCH—90 days. Heads flat, very large, compact, grows vigorously and has short stem. Many gardeners prefer this variety because of its excellent record of forming heads under unusual weather conditions. Good shipper.

ALL HEAD EARLY—90 days. Large flat, compact and solid heads, few outside leaves, an excellent early cabbage. A dependable sort.

CHINESE or CHIHILI—75 days. Large, crumpled light green leaves resembling Paris Cos lettuce. Leaves are eaten boiled or raw as a salad. Popular throughout the South. Has a distinct flavor, very mild and pleasant.

DANISH BALL HEAD SHORT STEM—100 days. Very hardy, sure heading, very solid, and of good quality. One of the very best keepers and desirable for distant markets. They are exceedingly hardy in resisting cold and stand dry weather well. Medium sized heads, round and solid and stand shipment better than any other late sort.

EARLY DRUMHEAD SAVOY—85 days. Plants are vigorous, of medium size with rather short stem and very sure heading. Heads are large, nearly round, fairly solid, sweet and tender. Best for family use.

CHERVIL (Curled)

Culture—Sow broadcast during fall and winter for spring and in January and February for summer. Used a great deal for seasoning, especially in oyster soup and is often cut between lettuce. A favorite in the South. Pkg. 10c; oz. 40c; ¼ lb. \$1.00.

Ferry's Round Dutch	.10	.55	1.65	4.25

GLORY OF ENKUIZEN—80 days. A sure header of matchless quality. Heads are nearly round, solid and of splendid size for an early variety. Leaves are broad and spreading and more or less curved. Has met with instant favor all over the South for marketing and home use.

MAMMOTH RED ROCK—75 days. Largest and surest heading red cabbage. Plants large and vigorous with medium length stem and spreading outer leaves which are dark green with red veining. Heads are late maturing, large, round, very solid and of very attractive deep red color. Much used for cole slaw and pickling.

EARLY JERSEY WAKEFIELD—66 days. A most excellent variety, is the earliest and surest heading of first early cabbage for the market and home garden. Most gardeners depend on it for their extra early crop. Plants hardy, resistant to cold and unfavorable conditions. Compact and erect or very slightly spreading. Stem short, heads are medium, very solid, uniformly pointed and of excellent quality.

CHARLESTON WAKEFIELD—88 days. Very solid head, but less pointed and considerably larger than the Early Jersey Wakefield. Its exceeding hardiness, earliness and size of head have made it a popular sort with market gardeners and shippers. Plants are medium sized, very vigorous and slightly spreading. Heads are blunt pointed but very broad at base. Excellent for marketing and home use.

GOLDEN ACRE—65 days. Very compact, medium sized heads, uniform in size and in maturing. Very popular for shipping and home use.

WISCONSIN ALL-SEASON—90 days. Valuable in territories infested with the destructive disease known as "yellows." Heads are large and solid, weighing up to 10 pounds.

WISCONSIN HOLLANDER No. 8—100 days. Heads round, becoming slightly flattened across the top; color blue green. Heavy yielding, an ideal cabbage for storage and shipping. Highly resistant to the "yellows."

CARROTS

Culture—Planting time, Southern States: Spring, January to June; Fall, August to December. Plant 1½ ounces to 150 feet of row, 4 pounds to one acre. Sow fairly thick in rows 15 to 18 inches apart and thin to 3 or 4 inches apart in rows, when two inches high. Approximate number of days to edible condition is given after name of varieties.

DANVERS HALF LONG—65 days. A half long orange carrot, grown extensively in all classes of soil, desirable and suitable for field culture. Mature roots are of medium length, six to eight inches long, tapering uniformly to a blunt point. Flesh is orange color, very tender and of excellent quality. Favorite for the South for shipping and home use.

EARLY HALF LONG CHANTENAY—85 days. An excellent medium early, half long variety. One of the best for marketing and home use, very productive and desirable. Roots are thick, 5½ to 6 inches in length, uniformly half long or stump rooted but tapering slightly, smooth orange-red color. Flesh very crisp and tender. Extensively used for bunching.

IMPERATOR—77 days. Long, slightly tapering roots, just enough top to bunch well. Deep solid orange all through. Prolific, brittle, tender and sweet.

IMPROVED LONG ORANGE—80 days. Intermediate to late maturing, desirable for table use as well as stock feeding, very productive, uniform in shape. Roots are tender and of good quality.

OXHEART or GUERANDE—65 days. Excellent variety for hard, stiff soil. Tops are comparatively small, mature roots are 4½ to 5 inches long, very thick. Flesh is bright orange finely grained and sweet.

CRESS

Culture—Planting time, Southern States, Spring, January to April. Fall, September to December. Broad leaf, plant 3 ounces to 150 feet of row. Water Cress—2 ounces will plant space about 9 x 9 feet in water.

BROAD LEAVED or UPLAND CRESS—This variety is extensively cultivated for market. It is sown from early Fall to late Spring. The leaves resemble Water Cress. It is a wholesome dish as a salad alone or in combination with other vegetables.

WATER CRESS—Used extensively for salad making. About 75 days to edible or marketable condition.

CHIVES or SCHNITTLAUCH

One of the finest and most delicate of entire onion family. Tops are used for seasoning salads, cream cheese, etc. Plant from December to April.

Pkg. 25c.

CORN SALAD

Culture—Planting time, Southern States, Spring, June to September. Fall, October to January. Plant 2 ounces to 150 feet of row. Sow thinly in drills. Leaves are used same manner as lettuce and cress.

CORN SALAD—Grown and used extensively throughout the South.

CARDOON

Culture—Sow seed in open ground in early spring in rows 3 to 4 feet apart and plants 1 to 2 feet apart in the rows. The blanched stalks and ribs will become fit for use in 3 to 4 weeks and are a fine winter vegetable. Grown in the same manner as Celery and blanched in the same manner.

== CUCUMBERS ==

Culture — Planting time, Southern States, Spring, February to July; Fall, August to September. Plant five ounces to 150 feet of row, 4 pounds to acre. Sow in hills 3 to 4 feet apart. Each hill should be fertilized heavily with rich decomposed manure or other suitable fertilizer. Plant about 8 to 10 seeds to each hill. Approximate number of days to edible condition given after each variety.

A & C—60 days. Fine dark green variety. Disease resistant vines which produce an abundant crop of uniform cucumbers, fully 10 inches long and straight.

CUBIT—A dark green, white spine, averaging 9 inches in length. Ideal for slicing and shipping with firm white flesh.

ASHLEY—66 days. Vigorous vines and very productive. Fruits dark green, long and taper to the stem end.

F-1 HYBRID SUPERSLICER—Long, slender, and dark green fruits, cylindrical and heavy producer.

MARKETER—70 days. Noted for uniformity, deep green in color, has become the leading early shipper. Fruits medium dark green, slightly tapered to both ends.

IMPROVED LONG GREEN—70 days. Very dark green, length about 12 inches, one of the best and largest cucumbers on the market, none better. Excellent for table and shipping.

HOTKAPS

Individual hothouse for plants. See page 40 for prices.

MARJORAM—Biennial, the leaves are used in soups, the seeds in the manufacture of sausage, an aromatic of sweet flavor. Pkt. 15c.

ROSEMARY—Seasoning (aromatic leaves). Pkt. 15c.

RUE—For medicinal purposes; good for all fowls also. Pkt. 15c.

SUMMER SAVORY—Flavoring. Pkt. 15c.

SAGE—Perennial, tea made from these leaves is an excellent means of producing perspiration. Pkt. 20c.

SWEET BASIL—Annual, the leaves are used for highly seasoned dishes as well as in soups, stews and sauces. Pkt. 20c.

THYME—Perennial, Thyme tea is an excellent remedy for nervous headaches. Pkt. 20c.

== CELERY ==

Culture—planting time for bleaching June to August. Plant 1½ Oz. to 150 feet of row, transplant when about 3 inches high, to rows 3 feet apart, plants 8 inches apart

JAPANESE CLIMBING—60 days. Strong, vigorous vines can be grown on trellis. Cucumbers round, about 10 inches long, thick. Grown extensively for shipping and table.

WEST INDIA GHERKIN—(For Pickles) 60 days. Very small, oval fruits, prickly sort, very distinct from all others and grown exclusively for pickles. Fruits should be picked when young and tender. Seed is distinctly smaller than that of other cucumbers and requires from two to three weeks to germinate.

STAYSGREEN—60 days. The greenest of the Long White Spine varieties. Hardy, large fruited, of excellent shape and uniform. A favorite among market gardeners. Used extensively for shipping.

PALOMAR—64 days. Early and very productive. Fruit is even deep green about 8 inches long, does extremely well in the South. A new outstanding Downy Mildew Resistant Cucumber.

PALMETTO—67 days. Resistant to downy mildew; fruits are very dark green in color and taper slightly at both ends; white spines, an important variety for fall planting in the South.

SNOW'S or HEINZ PICKLING—52 days. An early maturing, small dark green cucumber, round square ended, grown largely for pickling. A very fine variety.

GOLDEN PLUME CELERY—Early, delicious and self-blanching. Early maturing, large and vigorous grower, easy to cultivate, very attractive and when matured is most inviting.

GOLDEN SELF-BLANCHING—118 days. Solid, very tender, golden yellow color, brittle with delicious flavor. We cannot recommend this variety too highly.

CELERIAC TURNIP ROOTED—135 days. Forms a turnip-shaped root which is used extensively for soup, sliced and cooked, or salad.

== FENNEL ==

(Italian or Florence, Imported)

Culture—Planting time, Southern States: Spring, March to June; Fall, August to November. Plant 1¼ ounces to 150 feet of row. Sow in rich well prepared soil in drills 2 feet apart and cover ¼ to ½ inch with earth. When plants are 2 inches high, thin to 10 inches apart in row. Blanch the stems. Used extensively by Italians of New Orleans and vicinity and for shipping to Eastern markets. Used very much the same as celery.

Pkg.	Postpaid		
	Oz.	¼ lb.	Lb.
\$.10	\$.35	\$.80	\$ 2.85

== ENDIVE ==

Culture—Planting time, Southern States: Spring, February to June; Fall, September to November. Plant one ounce to 150 feet of row, 3 pounds to the acre. Sow either broadcast and transplant like lettuce or in rows one foot apart and thinned to 8 inches apart. Used for salads. Approximate time to edible condition of the two varieties is 75 days. Bleached by tying up leaves or covering plants.

FULL HEART BATAVIAN—90 days. An improved variety with large leaves, broader and thicker and earlier in maturity than any other variety. Plants are upright growing, compact heart that blanches easily.

ITALIAN RED RIBBED (Panicaller)—Hardy, vigorous growing endive with bright, deep green leaves, the mid-ribs of the outer leaves are usually tinged with rose. The dense mass of deeply divided leaves formed the center blanches readily to rich cream color.

EGG PLANT

Culture — Planting time, Southern States: Spring, January to March, in hotbeds; in open ground, April to June. Fall, September to October. Plant one ounce of seed to 150 feet of row. Approximate time to edible condition is given after name of each variety; this varies, due to climatic and soil conditions. Half pound of seed will furnish plants for one acre.

NEW ORLEANS MARKET or LARGE PURPLE—90 days. This is the variety mainly grown here, oval in shape and of a dark purple color and very productive. Southern grown seed of this, as of a good many tropical or sub-tropical vegetables, is preferable to Northern seed, as it will germinate more readily and the plant will last longer during the hot season. Best variety for shipping and home use.

FORT MYERS MARKET—85 days. Vigorous and productive high bush, nearly egg shaped, ideal size for shipping. Deep purplish black color.

MISSION BELL HYBRID—70 days. Heavy yielding, deep oval in shape, tapering towards stem, dark and smooth.

BLACK BEAUTY—85 days. Rich, shiny purplish black color, heavy producing plants, hardy, grown very extensively by small and large gardeners.

FLORIDA HIGH BUSH—60 days. Very large, dark rich purple fruits of excellent quality. Produces 6 to 8 fruits. Growing in popularity every year.

GOURDS

All at 20c per packet, postpaid.
 Culture — Planting time, Southern States: Spring, March to June; grown very easily, makes ornamental vines, usually grown on trellis or fence. Do not plant near pumpkins or squash as their taste will be affected.
DISHCLOTH—When fully ripe the skin can be easily removed and the sponge-like interior cleaned and dried, then used as dish rag.
DIPPER—Long handled gourd, dippers are made from this variety.
ITALIAN or SWEET GOURD (Cucuzzi or Cucuzzi)—Used same as squash or pumpkin grows to length of 24 to 36 inches, resembles a bat, blunt at one end and tapering to the other end. One of the finest vegetables extensively used by Louisiana gardeners, principally by the Italian element.
NEST EGG—Resembling a hen's egg in color, form and size, does not crack and is uninjured by cold or wet weather, used as a nest egg and for darning purposes.
ORNAMENTAL—Planted for ornamental vines, produces a variety of small colored gourds.

LEEK

Culture—Planting time, Spring, January to June; Fall, September to November. Plant 4 ounces to 150 feet of row. Also sow broadcast and then transplant 6 inches apart in rows about 12 inches apart, 4 lbs. to the acre. Belongs to the onion family and is used for flavoring stews and soups.

LARGE LONDON FLAG—60 days. Well known broad leaved leek, hardy, productive and good quality, and extensively cultivated in this country.

Postpaid			
Pkg.	Oz.	¼ lb.	Lb.
..\$.10	\$.55	\$1.60	\$5.50

KOHL-RABI

Culture — Planting time, Spring, January to April; Fall, September to December. One ounce will produce about 3000 plants. Sow in light, rich soil in rows 1½ feet apart, then thin to about 6 inches apart in rows. 1¼ pounds to the acre.

WHITE VIENNA — 65 days. The bulb-shaped root is used similar to turnip and the leaves similar to cabbage.

SIBERIAN KALE or BORECOLE

Culture — Planting time, Southern States: Spring, March to September; Fall, October to January. One ounce will produce about 3,000 plants. Grown both for a forage crop as well as for table use as greens. Sow and cultivate same as Cabbage, to which family Kale belongs.
SIBERIAN KALE—80 days.

LETTUCE

Culture — Planting time, Southern States: Spring, January to June; Fall, September to November. Plant one ounce to 150 feet of row, 3 pounds to one acre. If planted during hot weather, soak seeds for 2 hours in water, preferably on ice if convenient, and wrap in damp cloth. Keep for six days in damp cloth until sprouted, then plant. Ants very often carry away the seed before sprouting but this treatment stops it. Approximate time to maturity is given after each variety. This varies with soil and climatic conditions.

FLORIDA ICEBERG—83 days. Very popular variety. Crisp heading plants of medium size; leaves smooth, thick, medium light green. Heads round and well folded.

GREAT LAKES—An outstanding new Lettuce of Iceberg type. Stands the heat and sun and is unusually slow to go to seed. One of the best.

BIG BOSTON—75 days. Extra large, round, very firm, light green heads. Majority of market gardeners in South are growing this variety for shipment and table use.

NEW YORK WONDERFUL—80 days. Crisp, large heads, dark green colored leaves. Produces most compact heads. Excellent for shipping.

GRAND RAPIDS—65 days. Non-heading, leaves crisp, light green, curled, fringed. Delightful flavor.

ICEBERG—84 days. Heading, curled, medium size, crisp, green, fringed leaves enclosing crisp, white interior. A very popular variety.

BIBB—57 days. Distinct butter head type, dark green variety, forming a rather loosely folded head of small size.

ROMAINE or PARIS WHITE COS—70 days. Loose spoon shaped leaves, loose heads. Bleached by tying up leaves. Delightful tasting, an excellent variety.

CHICKEN LETTUCE — For chickens or rabbit feeding, very productive, when cut, starts right in to grow again. This variety of lettuce does not head but sends up stalks 3 to 4 feet high. Heavily leaved which can be pulled off like Kale.

MUSTARD

Culture — Planting time, Southern States: Fall, September to December; Spring, January to June. Plant 2 ounces of seed to 150 feet of row, 2 pounds to one acre. Sow either by broadcast or in rows about one foot apart. Approximate time to edible condition of all varieties, 50 days.

FLORIDA BROAD LEAF—This is a quick growing and very productive variety which remains in condition for use a long time. The leaves are rounded, very slightly crumpled, unfilled and very large. They are medium light green with a broad pale green midrib.

TENDERGREEN—Can be sown nearly every month in the year in the South. Easy to grow and ready for market in 25 to 30 days. Requires 3 to 5 pounds to the acre and planted in rows 2 to 3 feet apart. Withstands the extreme summer heat and is resistant to cold weather. Leaves are large, oblong and dark green in color with small center rib. Cooked same as Spinach, Turnip or Mustard Greens.

SOUTHERN CURLED—Pale green, large curled leaves, scalloped edges, the most extensively grown variety. Highly recommended for shipping.

CHINESE BROAD LEAVED

— Large, dark green, smooth leaves sometimes 2 to 3 feet high and one foot wide; excellent variety.

WATERMELON

Culture — Planting time, Southern States: Spring, February to June. Plant in light sandy soil, mix well rotted manure or any good fertilizer in each hill before planting. Plant 8 to 12 seeds in each hill about 7 feet apart each way; 2 ounces to 150 feet of row and 4 pounds to one acre. When plants are 3 inches high, thin to about 3 to 4 plants per hill. Approximate time to maturity given after each variety. This varies with climatic and soil conditions.

DIXIE QUEEN—90 days. A white seeded variety, round and finely flavored, sweet and juicy, firm flesh which seems to be all heart because of the very small seeds.

CHARLESTON GRAY—85 days. Excellent for home and market. Fruits long and blocky with light gray green color. Rind hard; deep pink and delicious meat. Shows no hollow heart. Seeds large, dark veined brown.

FLORIDA GIANT—95 days. Vigorous growing and heavy producers. Melons are nearly round in form, skin solid dark green, flesh red and firm. A good shipper. Grows larger than most any other variety, not unusual for specimens to weigh 100 pounds.

GOLDEN HONEY—Bright golden flesh extending close to dark green ring. Meat firm and sugary flavor. No hard core or stringy sections.

SELECTED TOM WATSON—85 days. 18 to 24 inches long, compact, deep red flesh, free from core, special selected seed of the Tom Watson variety.

RATTLESNAKE (Georgia)—85 days. Light green color, lightly mottled and striped, flesh scarlet, thin rind, excellent shipper, very popular.

SUGAR BABY—92 days. Another "icebox" melon, sugary red flesh, very prolific.

CONGO—90 days. Bred for resistance to anthracnose, but not immune. Tough rind and firm, fine grained flesh, especially adapted to Southern shipping. Fruits are oblong, blocky, dark green faintly striped with a lighter green.

STONE MOUNTAIN—80 days. Almost round, rich dark green. Flesh is rich scarlet, fine grained and especially sweet. Seeds white. Under favorable conditions weigh 50 to 65 pounds.

OKRA

Culture — Planting time, Southern States: Spring, March to June; Fall, July to October. Sow in rows about 2 feet apart and after plants are nicely started thin to 8 to 10 inches apart in row. 10 ounces will plant 150 feet of row, 20 pounds to one acre. The famous soup called "Gumbo" made in the South is prepared with Okra; also makes a delicious salad. Approximate number of days to edible condition is given after each variety. This varies with climatic conditions and soil.

LOUISIANA MARKET—60 days. Starts bearing when plant is very small, heavy producer, one of the most popular varieties, planted extensively. Cannot be recommended too highly.

DWARF GREEN PROLIFIC—60 days. Dwarf plant, but a very heavy bearer. Very prolific. We recommend this variety very highly.

LOUISIANA GREEN VELVET—60 days. Uniform pods about 6 to 7 inches long and tender. Spineless characteristics of this variety make it exceedingly desirable.

PERKINS' MAMMOTH LONG POD—70 days. Long green pods, round near the end and tender, the most popular variety grown.

WHITE VELVET (Lady Finger)—60 days. Medium size round white pods, prolific producer. A favorite variety for canning.

PARSLEY

Culture — Planting time, Southern States: Spring, January to April; Fall, September to November. 150 feet of row. Plant in rich, mellow soil. Parsley seed starts growth slowly. We suggest soaking seed in water for 10 to 12 hours before planting. Sow thickly in rows 1 foot apart; when about 3 or 4 inches high, thin to 5 or 6 inches apart. Number of days to edible condition given after each variety.

PLAIN LEAVED—75 days. Dark green foliage, very hardy, strong flavor. A favorite for Southern tables.

DOUBLE CURLED—90 days. Leaves curled and crimped, grown very extensively for market.

MUSKMELON

or CANTALOUPES

Culture — Planting time, Southern States: Spring, February to June. Plant in rich, sandy loam soil. Mix well rotted manure or any good fertilizer in each hill. Plant 14 to 12 seeds in each hill. Hills 5 feet apart each way. When plants are nicely started thin to about 4 plants to each hill. Two ounces required to 160 feet of row. Four pounds to an acre. Approximate time to maturity is given after each variety. This varies with climatic and soil conditions.

EARLY HACKENSACK—70 days. Flesh and skin greenish color, large size, ribbed, excellent tasting. Popular throughout the South.

HONEY DEW—100 days. Same as the Golden Honey Dew except it has emerald green flesh. Has honey-like flavor, in great demand wherever grown.

HONEY ROCK—90 days. Very prolific, heavier, coarser netting than Honey Ball. Almost round, medium size, rich salmon flesh of fine quality.

TEXAS RESISTANT NO. 1—90 days. Resistant to Downy mildew and aphids. Fruits fairly uniform, about 6 inches long. Rind firm and fine texture, flavor sweet and spicy.

POLLOCK'S 10-25—This excellent main crop melon of the Rocky Ford type is one of the most popular of shipping varieties. Fruits nearly round or slightly oval, show no ribbing and are densely netted over the entire surface. Flesh is rich salmon at center, shading to light green at rind. Seed cavity is very small.

MILWAUKEE MARKET (orange flesh)—94 days. A splendid size, sometimes averaging 20 to 25 pounds, possesses a very delicious flavor. A very prolific variety and splendid for shipping.

ROCKY FORD or HART'S VICTOR—74 days. Small size, prolific producer; green flesh, a favorite in the South. Good shipper.

ROCKY FORD OR HART'S VICTOR

PARSNIPS

Culture — Planting time, Southern States, Spring, January to April; Fall, September to November. Two ounces will plant 150 feet of row, 8 pounds to the acre. Sow in deep, mellow soil in rows 12 to 18 inches apart. When plants are 3 inches high, thin to 3 inches apart in the row.

HOLLOW CROWN OR SUGAR

ONION SETS

Onion sets are largely for planting home gardens for early greens and also for market. Plant in rich, well cultivated ground in rows 10 to 12 inches apart, and 2 inches apart in the row, 8 bushels to the acre. Plant for Spring from January until April; Fall, September to November.

RED WETHERSFIELD—Very hardy, good keepers, one of the best all purpose red onions.

YELLOW DANVERS—Make medium sized, globe-shaped, yellow onions, very fine.

WHITE SILVERSKIN—Very attractive onion, makes large silvery onions.

SQUASH

Culture — Planting time, Southern States: Spring, March to July; Fall, August to November. Plant 1½ ounces to 150 feet of row, 4 pounds per acre. Prepare hills by mixing well rotted manure in each hill and pulverizing thoroughly. Plant 6 to 8 seeds in each hill. Summer varieties, hills should be 3 to 4 feet apart each way, winter varieties 6 to 8 feet. When well started thin to 3 plants to each hill. Do not bruise when gathering. The approximate number of days to edible condition is given after each variety. This varies, due to climatic and soil conditions.

EARLY WHITE BUSH or PATTY PAN—54 days. Vine dwarf in habit, produce round scalloped squash 4 inches thick and about 9 inches in diameter. The most popular variety in the South.

COCOZELLE or ITALIAN GREEN STRIPED—90 days. Fruit somewhat shaped like a Banana Cantaloupe, 12 to 15 inches long and about 5 inches thick. When young, dark green, afterwards light yellow. Excellent for slicing and drying like eggplant.

GIANT SUMMER STRAIGHTNECK — 55 days. An improvement on the Crookneck variety. Fruits are thick, heavily warted, straight and bright orange yellow color. Highly recommended.

LONG YELLOW or SUMMER CROOKNECK—80 days. Produces crooked shaped yellow squash. Thick, fine quality flesh. Very popular.

ZUCCHINI—60 days. An increasingly popular sort of the Italian Marrow group. Fruits weigh 3 to 4 pounds, nearly cylindrical, and straight. Color medium green, mottled with creamy-grey and lighter green stripes. Flesh firm and delicately flavored.

TABLE QUEEN (Acorn)—65 days. Small acorn shaped, dark green, early maturing squash. Produces uniform thin shelled fruit, flesh rich orange color, delicious flavor, good keeper.

NEW INSECTICIDE

CYGON* dimethoate 4E

TURNIPS

Culture—Planted August to November. For home consumption and Northern markets. Plant 1½ ounces to 150 foot rows, 4 pounds to one acre. Sow broadcast, or in rows 1½ to 2 feet apart. Cover a half-inch. Thin out as overcrowding hinders proper development. Turnips grow better in a light, rich soil. Turnips and Rutabagas are also used extensively for feeding stock; however, do not feed them to milch cows as it affects the taste of the milk.

EARLY PURPLE TOP STRAP-LEAVED—50 days. Medium size, flat grained and tender, an excellent variety.

SHOGON—70 days. Large white, semi-flat, heavy producer, good keeper, used both for table and stock. Louse and disease resistant.

PURPLE TOP WHITE GLOBE—60 days. Large globe shape white turnip with purple top. One of our best and most popular varieties.

SEVEN TOP—70 days. Tops very large and make excellent greens and salads. Very hardy roots, excellent for the South.

WHITE FLAT DUTCH—46 days. An early variety, excellent for home and market gardeners. Tops small, strap leaved. Roots flat, white throughout, fine grained, sweet and tender.

IMPROVED PURPLE TOP RUTABAGAS—80 days. Oblong shape, yellow flesh, very solid, used extensively for table and stock feeding.

EARLY PURPLE TOP STRAP-LEAVED

SPINACH

Culture — Planting time, Southern States: Spring, January to June; Fall (main crop), September to December. Plant 3 ounces to 150 feet of row, 10 pounds per acre. Sown broadcast in fields or in rows about 12 inches apart (small gardens). There are no better greens produced than Spinach. Rich, moist ground is best and grows better when season has cool nights. Approximate time to edible condition is given after each variety. This varies with climatic conditions and soil.

BROAD LEAVED FLANDEMS — 70 days. Very large, broad leaves, grows erect, very extensively grown, fine flavor.

EXTRA LARGE LEAVED SAVOY — 60 days. Very large, thick leaves, slightly curled. The best and most extensively grown variety for market.

OLD DOMINION—40 days. A savoy leaved Spinach, compact dark bluish green, heavily crumpled except at the very leaf tip. Blight resistant, withstands heat and cold. Highly recommended.

NEW ZEALAND — 90 days. Dark green, thick succulent leaves. Heat resistant, grows well all summer, very popular.

NOBEL GIANT LEAVED -- The best smooth leaved sort. Produces a large mass of very thick rounded leaves of enormous size, a quick grower and stands very long before bolting. "Nobel" is an ideal variety for truckers and canners.

VIROFLAY—Desirable for canning as leaves grow clean and upright, and are broad and pointed at end.

RAFFIA

RAFFIA.

Its principal use is for tying vines, flowers, asparagus and celery bunches, and for grafting. Natural color is a light straw. 1 lb. 65c; 5 lbs. \$3.00, postpaid.

WHITE SHALLOTS

Culture—Planted August to March. For home consumption and Northern markets. 6 bushels per acre in 4 foot rows. The quantity to be expected from an acre, if planted in field culture, 4 foot rows, would be from 50 to 60 barrels; but if planted, as is done near New Orleans, in 2 foot rows, 100 to 125 barrels if planted in August and September. If planted later, they do not multiply so well.

WHITE SHALLOTS—
Sold out.

TOMATOES

Culture—Planting time, Southern States: Spring, December to March, in hotbed; in open ground to June; Fall, September to November in open ground. Plant ½ ounce to 150 feet of row. One ounce will produce about 3000 plants. Transplant from hotbed when plants are 6 inches high to open ground, 3 to 4 feet apart each way. Tomatoes require rich, well pulverized soil. If danger of frost is not over when transplanted, plants must be covered at night whenever there is danger of frost. To protect them from insects dust with Arsenate of Lead, powdered form, about 2 weeks after transplanting and at 2-week intervals thereafter. Approximate number of days from time of planting seed to edible condition is given after each variety. This varies due to climatic and soil conditions.

PONDEROSA—125 days. Very large, very firm, crimson color, few seeds, prolific producer, one of our best varieties.

LOUISIANA ALL SEASON—80 days. A cross between Louisiana Pink and Break-O-Day. Produces a heavy early yield of uniform sized fruits. Globe shaped and medium in size.

JEFFERSON—Vigorous, prolific and wilt resistant. Fruit smooth, globe shaped and dark red in color.

OX HEART—The home gardener who delights in introducing unusually good things into his neighborhood will be amply repaid by including Ox Heart in his garden plans this spring. Among large fruited tomatoes this variety is unique. In form it is distinct, since it is almost exactly the shape of a heart as the name implies, and single fruits sometimes weigh more than two pounds.

BREAK O' DAY—One of the wilt-resistant varieties. An early tomato resembling Marglobe but of higher scarlet color and not so distinctly globe shaped. It is slightly earlier than our stocks of Marglobe. The vines are vigorous and productive. Planted extensively in trucking districts and gives excellent results.

BRIMMER—90 days. A pink fruited variety; similar to Ponderosa. Fruits large, flat and rough, small seed cells, of inviting flavor.

CERTIFIED MARGLOBE—79 days. Plants vigorous with heavy foliage, resistant to wilt and rust; moderately productive. Fruits medium large, globular, smooth, solid with thick walls and cross sections, a fine variety.

DWARF CHAMPION (Tree Tomato)—Dwarf and compact growing plants, stems thick and short. Extremely hardy and can be set out very early. Purplish pink color, medium quality and excellent variety.

GROTHEN'S GLOBE—70 days. A new early maturing wilt resistant variety. Fruits deep scarlet and free from objectionable yellow about the stem end.

LOUISIANA DIXIE—74 days. Originally bred from Louisiana Pink. Resistant to wilt and early blight. Fruits are medium to large in size and globe shaped. Fruit is a very good pink color, does not crack, prolific producer.

LOUISIANA GULF STATES—77 days. A highly refined variety of the ordinary Gulf States Market. Vigorous growing, high in yield, and will resist wilt. Color is a good pink, globe shaped and resistant to cracking.

LOUISIANA PINK—Same as Louisiana Red, except in color.

LOUISIANA RED—Wilt resistant tomato, medium size, small seed cavity, heavy bearer, fruits borne in large clusters and almost globe shaped.

NEW PRITCHARD—A scarlet, self topping disease resistant variety. Fruits large, smooth, globular, solid with thick walls and cross sections. Free from cracking and the quality is much superior to other varieties. Matures only a few days later than some early varieties.

RUTGERS—77 days. Extensively planted for shipping purposes. Large, uniform, purplish pink variety, globe shaped and free from cracks and blemishes. Firm skin, smooth and solid with few seeds. This variety is resistant to blight and matures uniformly.

PEAR-SHAPED YELLOW—Similar to Red Pear-Shaped except in color.

RED PEAR-SHAPED—100 days. Pear shaped, small size fruits, good quality.

"NO-SEED" BLOSSOM-SET

"No-Seed Blossom Set" is a popular liquid hormone spray for Tomatoes, Strawberries, Cucumbers and other crops. Makes Tomatoes ripen 1 to 3 weeks earlier, stopping blossom drop.

4 oz. \$0.75 each; 1 pint \$1.75 each.
12 oz. Aerosol (for 100 plants) \$1.79 each.

ACME TOMATO DUST

Many common spraying and dusting materials are irritating to tomato plants, causing rapid respiration so that they lose moisture more quickly than the plant can replace. Acme Tomato Dust is especially formulated for tomatoes, controlling blights and worms and permitting best possible harvest.

1 lb. 80c; 4 lb. bag \$1.90.

GARDEN PEAS == POTATOES ==

LITTLE MARVEL

Culture — Planting time, Southern States: Spring, January to May; Fall, August to November. Plant 3 pounds to 150 feet of row, 1½ to 2 bushels to one acre. Sow in rows 2 to 3 feet apart and cover 2 inches.

Distance in rows and between rows is governed by the height of the different varieties. Approximate number of days to edible condition is given after each variety; this varies with climatic and soil conditions.

WRINKLED VARIETIES

14 lbs., 1 peck; 56 lbs., 1 bushel

LITTLE MARVEL—62 days. Dwarf variety, about 18 inches high. Valuable for home and early shipping. Vines dark green, medium stocky. Pods single and double dark green, blunt, plump, well filled with 7 or 8 tender peas. Seeds medium size, light green, squarish, wrinkled.

CARTER'S IMPROVED TELEPHONE — 70 days. Pods 4½ inches long; height of vine 4 feet, an excellent producer.

THOS. LAXTON—64 days. Height of vine 3 feet, pods 4 inches long. Market gardeners are growing this variety very extensively.

SMOOTH VARIETIES

15 lbs., 1 peck; 60 lbs., 1 bushel

PEDIGREED EXTRA EARLY — 60 days. Height of vine 2½ feet, pods 3 inches, a prolific producer. One of our best and most popular varieties. Seed small, smooth, yellowish white. Stock we offer is much superior to most on the market and recommended highly.

EARLY ALASKA—60 days. Vines 2½ feet tall; pods 3 inches, prolific producer, an extra fine variety.

CREOLE PEAS—60 days. This variety will withstand severe heat and cold. Pods are 3 to 3½ inches long, with 5 to 7 peas of a distinct flavor. Its vigorous vines average 5 to 7 feet and yield an enormous crop. Immune to root rot, mildew and such diseases. Sow during winter and early spring.

ONIONS

Culture — Planting time, Spring, January to June; Fall, September to November. Plant one ounce to 150 feet of row, 3 pounds to one acre. Onions grow best in rich, loamy soils. When young plants are about the size of a goose quill, transplant to open ground 4 inches apart and 12 to 18 inches between rows. Cultivate sufficiently to keep out weeds. Approximate number of days from time of planting is given after each variety. This varies with climatic and soil conditions.

RED CREOLE—130 days. Very large, semi-globe shaped, reddish colored bulb, excellent tasting, good keeper and heavy producer. This variety constitutes one of the important crops in Louisiana.

YELLOW BERMUDA—120 days. Large flat yellowish colored onion, very popular for market as well as home garden. Grown extensively throughout the South.

CRYSTAL WAX BERMUDA—120 days. Large flat, pure white onion, mild and delicious flavor, one of the finest and most popular varieties.

EVERGREEN BUNCHING (White)—60 days. Produces a cluster of 4 to 6 shoots from a single seed the first season. Used only for green onions.

ROQUETTE or Rocket Salad

Culture — Planting time, Southern States: Spring, January to June; Fall, August to December. Plant 1½ ounces to 150 feet of row. Sow 15 inches each way. Leaves are used for salad similar to lettuce. Ready for cutting about 45 days. Very delicious.

ROQUETTE or ROCKET SALAD—Pkt. 20c; oz. 65c; ¼ lb. \$1.75; lb. \$6.00, postpaid.

VEGETABLE PEAR CHAYOTE or MERLITON

Culture — Planting time, Southern States: Spring, March to May. The Vegetable Pear makes an excellent dish whether creamed, fried, stuffed, baked with cheese or as a salad. It is grown on a long ornamental vine similar to the gourd, to which family it belongs. The vine is usually trailed on a trellis or fence. Plant the whole pear with broad end down, leaving small end slightly exposed. Never plant less than two for successful results of production.

VEGETABLE PEAR (Chayote or Merliton)—Each 45c; dozen \$4.50, postpaid.

Culture—Planting time, Southern States: Spring, January to April; Fall (small seed potatoes), August and September. Potatoes thrive best in a light, dry, rich soil. For spring planting, large potatoes are cut so that a good sized piece will contain 3 eyes. The pieces are planted in rows 2 to 3 feet apart and hills 1 to 2 feet apart in rows. Fall seed potatoes are small and are planted whole, all varieties listed mature in about 85 to 100 days.

Dust plants with Arsenate of Lead, powdered form, every two weeks after plants are 6 inches high for control of Potato Bugs.

EARLY BLISS RED TRIUMPHS—Certified selected stock. Light red, medium size, round, uniform shape, eyes slightly depressed, an excellent variety for shipping. Grown very extensively both for home and market.

KATAHDIN—Slightly oval white, very smooth with shallow eyes. Vines are light green and vigorous and so far no mosaic has been found on this variety. It is unsurpassed for cooking and eating. Katahdin does well on rich peat soils and on muck land.

LASODA—Adapted to heavy soils and produces higher yields than the Bliss Triumphs. Plant grows upright, is of fair vigor and small to medium leaves. Potatoes are semi-round to oblong, smooth, and pinkish red in color.

WHITE ROSE—Long tubers almost uniform in shape and size. Flesh white. It is a heavy cropper and planted extensively in the South.

SALSIFY or OYSTER PLANT

Culture — Planting time, Southern States: Spring, January to June; Fall, August to December. Plant 2½ ounces to 150 feet of row, 8 pounds per acre. Spade ground deeply and mix with well pulverized manure. Sow in rows 10 inches apart. Grown in both large and small Southern gardens. Edible condition 150 days after planting. Taste similar to oysters.

SANDWICH ISLAND—Pkt. 10c; oz. 50c; ¼ lb. \$1.35; lb. \$4.00, postpaid.

SORREL (Broadleaved)

Culture — Planting time, Southern States: Spring, January to April; Fall, September to December. Plant 2½ ounces to 150 feet of row. Sow in rows one foot apart. Used like Spinach as well as in salad and in soup. Edible condition about 85 days after planting. Planted in many small gardens throughout the South.

SORREL (Broadleaved)—Pkt. 25c; oz. 75c; ¼ lb. \$2.25; lb. \$4.50, postpaid.

ATLAS FERTILIZER EMULSION

A complete liquid organic Plant food—derived from Fish.

Pint \$1.20; Quart \$2.15, postpaid; Gallon \$6.25.

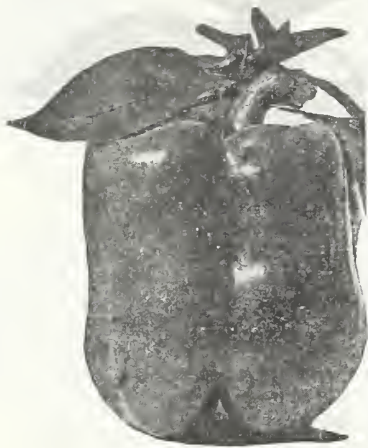

Directions for use on package.

OIL-I-CIDE

The ideal oil spray emulsion for orange and other citrus groves and similar orchard trees, Azaleas, Camellias, Gardenias, and other cultivated shrubs.

Pint 90c; Quarts \$1.50; Postpaid. Gal. \$2.80, not postpaid.

CALIFORNIA WONDER

PEPPERS

PEPPERS

Culture—Planting time, Southern States: Spring, December to March in hotbeds; in open ground, March to June; Fall, August to November, in open ground. Two ounces will produce about 1500 plants, 6 ounces to an acre. Open ground planting 1½ feet apart and 1½ to 2 feet between rows. Do not plant two varieties close together as they mix easily. Production of peppers in the South is one of our large industries. Approximate time to edible condition is given after each variety. This varies with climatic and soil conditions.

SWEET PEPPERS

CALIFORNIA WONDER—75 days. Large bright red glossy type, similar in shape to crimson Giant but far superior, of mild delicate sweet flavor, early and unsurpassed for shipping, a heavy yielder.

LIBERTY BELL—75 days. Similar to California Wonder but borne pendently, less infolding at nose, dark green in color.

YOLO WONDER—78 days. Very good for shipping and market gardens, large dense foliage and a week later than California Wonder. Thick flesh, pendent fruits.

FLORIDA GIANT—75 days. Fast becoming a favorite of Louisiana truckers. Prolific bearer, large, dark green color and smooth.

PERFECTION or PIMENTO—Thick fleshed. Mild and sweet, smooth glossy green turning bright red.

OAKVIEW WONDER—63 days. Fruits blocky, smooth, thick mild sweet flesh. Plant stockier than California Wonder but fruit are set earlier and more abundant.

HOT PEPPERS

LONG RED CAYENNE—110 days. Pods 4 inches long, twisted and pointed. Very pungent, bush about 3 feet tall, a favorite with many Southern gardeners.

TABASCO—75 days. Small pointed red peppers, bush 3 feet high. Prolific producer, very hot. The nationally known Tabasco Sauce is made from this excellent variety.

RADISHES

Culture—Planting time, Southern States: Spring, January to June; Fall, August to December. Plant 3 ounces to 150 feet of row, 8 pounds to the acre, about 10 inches apart and cover lightly. If too thick radishes do not form properly but crowd each other. Plants should be about 2½ inches apart, allowing proper space for development of Radish. Radishes constitute a very large crop for Northern markets. Approximate time to edible condition is given after each variety. This varies due to climatic and soil conditions.

CINCINNATI MARKET—28 days. Popular for home and market use. Tops short and small, roots are 6 to 7 inches long, cylindrical and tapered near tip, deep red with purplish tinge. Flesh white and crisp.

BRIGHTEST SCARLET or THREE-QUARTER LONG—25 days. Bright scarlet color, average 6 inches long, a favorite.

CRIMSON GIANT TURNIP RADISH—25 days. Very large, round, scarlet color, good shipper, grown very extensively and very popular.

EARLY DEEP SCARLET TURNIP—22 days. Small, round, deep scarlet color, mild taste. You will like it.

FRENCH BREAKFAST—22 days. About 1½ inches long and about ¾ inch in diameter, deep scarlet color, except a little white around root. We recommend this variety very highly.

ICICLE—25 days. About 5 inches long, white brittle and has mild flavor, well liked.

SPARKLER TURNIP WHITE TIP—20 days. One of our best early radishes for the home garden and a great favorite in large markets for early planting outdoors. Roots are nearly round, slightly flattened on the underside. Color is very bright, deep rose scarlet with a distant white tip. Flesh is white and of the best quality.

SCARLET GLOBE RADISH—23 days. Tops small, ideal for bunching. Globe shaped about 1¼ in. long, good red color, white flesh and crisp.

PUMPKINS

GREEN STRIPED CASHAW

Culture—Southern States, planting time: Spring, March to July. Usually planted in cornfields; when grown as separate crop, plant in hills (10 seeds to the hill) 8 to 10 feet apart each way. When started, thin to 3 or 4 plants. When leaves die, cut pumpkins from vines, leaving 3 to 4 inches of stem and store in dry place; avoid bruising. One pound to 300 hills, 4 pounds to an acre. Approximate number of days to edible condition is given after each variety. This varies with climatic and soil conditions.

CONNECTICUT FIELD—120 days. Large, smooth, oval-shaped, orange yellow color, very productive. Grown extensively throughout the South, mainly in cornfield, splendid for table and feeding stock.

GREEN STRIPED CASHAW—90 days. Large white with green stripe, with crooked neck, flesh light yellow, thick, coarse, but sweet. Planted more extensively in the South than any other variety. One of the best for pie making and excellent keeper.

GOLDEN YELLOW MAMMOTH—100 days. Bright golden yellow skin, thick flesh, excellent quality, splendid keeper. Weight 50 to 80 lbs., cannot be beaten as a pie pumpkin and for stock feeding.

LARGE CHEESE—108 days. Bright orange color, shaped like a cheese, very large and indented top and bottom. Excellent quality, well liked wherever grown.

*A Luxurious Centipede Lawn
from NEW Centi-Seed®*

....No back-breaking sprigging

Responsible lawn experts consider Centipede the best all-round lawn grass for this area of the South. It is rich in color, produces a thick, weed-free turf,

• grows well in shaded areas and requires less mowing and less fertilizer than other grasses. Until recently Centipede could be planted only from sprigs. But now—with new CENTI-SEED—you can sow a Centipede lawn—quickly, easily, inexpensively.

- Thrives in Sun and Shade
 - Grows in any Soil, Rich or Poor
 - Hugs the Ground—Mowing once each month is usually sufficient
 - Permanent, Grows more Lovely each Year
 - Requires Fertilizer only once each year at half the rate for other grasses
 - Dense Sod Completely Crowds out Weeds
 - For New Lawns or to Convert Old Lawns
 - Costs less to Plant and far less to Maintain.
- Full directions in each package

Buy CENTI-SEED from your Seed Dealer
CENTI-SEED is grown and packed exclusively

Lakeland, Georgia

SOY BEANS

VELVET and SOYBEANS for Fertilizer

Planting Time, Southern States, March to August

BILOXI (Soy)—Bush grows upright 5½ feet with very heavy foliage. Besides producing excellent food for grazing and hogging down with corn for ensilage, it is one of the best fertilizing plants in existence. We recommend this variety very highly. 6 to 8 pounds will plant one acre in rows 3 feet apart. 1 to 2 inches deep. 60 lbs. per bu.

1 lb. 50c; 2 lbs. 80c; 5 lbs. \$1.50, postpaid.

EXTRA EARLY SPECKLED VELVET or 90 Day—Produces very long vines and very heavy foliage. Heavy producer of short, well filled pods. No better soil fertilizer plant can be found. This variety is known and recognized as the best for all purposes. Plant 1 peck to 1 acre in rows 4 to 5 feet apart. 60 lbs. per bushel.

1 lb. 65c; 2 lbs. \$1.20; 5 lbs. \$2.50, postpaid.

MAMMOTH YELLOW (Soy)—Vines bushy, vigorous, erect habit. Sow broadcast a half bushel to one acre or 1½ feet apart in rows 3½ feet apart. An excellent and popular variety. 60 lbs. per bushel.

1 lb. 50c; 2 lbs. 80c; 5 lbs. \$1.50, postpaid.

OTOOTAN (Soy)—A very fast growing plant, growing 4 to 5 feet high, fine stems and delicate leaves. Cures quickly, makes hay of finest texture and very fine quality. It leads the field for silage or forage. Jet black, rather small, a half peck plants an acre. 2½ to 3 feet between the rows. Extensively used throughout the South. 60 lbs. to the bushel.

1 lb. 60c; 2 lbs. \$1.00; 5 lbs. \$2.00, postpaid.

AVOYELLES—Developed in Louisiana, grows very similar to Otootan, sometimes called Improved Otootan, seed are much larger—the worms past year in Louisiana did no damage to Avoyelles but ruined the Otootans.

1 lb. 55c; 2 lbs. 85c; 5 lbs. \$1.75, postpaid.

COWPEAS

COW or FIELD PEAS

Planting Time, Southern States, March to August

BRABHAM—Grows upright, very heavy producer, retains foliage very well while being cured. Very vigorous growing. An excellent variety, very popular. 60 lbs. per bushel. 2 bu. per acre.
¼ lb. 25c; lb. 65c; 2 lbs. \$1.10; 5 lbs. \$2.35, postpaid.

CLAY—Produces heavy foliage as well as pods. Very vigorous growing. The Clay is the most popular field pea in the South. Excellent forage crop. 60 lbs. to bushel.

¼ lb. 25c; lb. 65c; 2 lbs. \$1.10; 5 lbs. \$2.35, postpaid.

WHIPPOORWILL—Upright, bushy growth of plant. A great favorite because of early maturity and is easily harvested. 60 lbs. per bushel.

¼ lb. 25c; lb. 65c; 2 lbs. \$1.10; 5 lbs. \$2.35, postpaid.

MIXED PEAS—Often thousands of bushels of field peas become mixed and often farmers request a mixture of good varieties. These mixtures are becoming very popular. 60 lbs. per bushel.

¼ lb. 25c; lb. 60c; 2 lbs. \$1.00; 5 lbs. \$2.25, postpaid.

PURPLE HULL—Distinct from other varieties. Pods are tinged a dark purple red, longer and shell easily. Productive and disease resistant.

¼ lb. 30c; lb. 85c; 2 lbs. \$1.50; 5 lbs. \$2.70, postpaid.

WHITE CLOVER

WHITE DUTCH—This is a very common variety in the South, although small for hay production, it is one of our best pasture clovers. Sow in Spring or Fall, 12 pounds

MAMMOTH RUSSIAN—Heads often measure from 12 to 15 inches in diameter containing an immense amount of seed, which is used for poultry feed, planted in Spring, 3 pounds per acre.

Pkt. 10c; 1 lb. 60c; 5 lbs. \$2.85, postpaid. Write for quantity prices.

CROW REPELLENT

It protects your corn plantings by keeping off crows, larks, blackbirds and other corn-pulling birds, as well as moles, woodchucks, squirrels, etc. Does not clog the planter; protects the corn from rotting. Not poisonous and will not injure the seed.

By mail postpaid, ½ pint (enough for 1 bushel corn) 70c; pint \$1.15. Not postpaid, ½ pint 80c; pint \$1.00.

HARDY GRASSES FOR HEALTHY PROFIT

BERMUDA GRASS—Plant from February to September, 20 pounds per acre for lawns and 30 pounds for golf courses and 40 for levee protection. Bermuda is used more extensively than any other grass on lawns, golf courses and levee protection. It has a narrow, thin leaf of dark green color. Spreads quite rapidly and grows very well in the South. It dies down with a heavy frost in the Fall but comes in in the Spring. It does not do well in the shade but is very hardy where it has sunshine. Takes about 30 days to start.

1 lb. 75c; 5 lbs. \$2.75, postpaid.

CARPET GRASS—Plant from February to September, 20 lbs. per acre for lawn and 30 lbs. for golf courses. This is a much coarser grass than Bermuda but will stand drought and hot weather better and also stays green longer in the fall. It is a natural perennial in Louisiana. It is used extensively in lawns, golf courses, fairways and parks. It stands more shade than Bermuda. Takes about 30 days to start. Carpet Grass is also used extensively for meadows and pastures in the South.

1 lb. 80c; 5 lbs. \$3.85, postpaid.

HULLED BERMUDA—Germinates within 15 days with proper moisture conditions. Highest grade of Bermuda with hulls removed, which insures quick results and nice green lawns. Sow 1 to 2 lbs. to each 1,000 square feet.

1 lb. 85c; 5 lbs. \$3.65, postpaid.

DOMESTIC ITALIAN RYE GRASS—Grown in the United States from the imported Italian and English. Used extensively today in America for lawns, golf courses, meadows and pastures and is claimed to be harder than the imported varieties. Slightly darker and stays green longer in the early summer. Requires 300 pounds to the acre on lawns and golf courses and 40 to 50 pounds for pastures.

1 lb. 45c; 5 lbs. \$1.35, postpaid. Not pre-paid, 10 lbs. \$1.45; 100 lbs. \$10.25.

CENTIPEDE GRASS—Low growing, thrives in shade or sun, requires little mowing, grows in rich or poor soil and requires very little fertilization. Finer in texture than St. Augustine.

¼ lb. \$3.25; ½ lb. \$8.25; lb. \$12.00.

ZOYSIA JAPONICA—This fine-leaved lawn grass will thrive well both in full sun and dense shade. As it only grows from 3 to 4 inches tall it requires very little mowing. The new strain we are offering grows as rapidly as St. Augustine Grass in warm weather, is immune to chinch bugs and has a tendency to crowd out crab grass. Full directions for planting with each purchase. Lb. \$4.95, postpaid.

Surround Yourself with Beauty

Enjoy the beauty of lovely flowers and at the same time get that relaxation of mind and body that working in a flower garden gives you. It's an easy way to keep up your morale and get away a little while each day from the cares of a troubled world. Try it! You'll be glad that you did.

- AGERATUM (Midget Blue)**—Only 3 to 4 inches tall, with a good spread of about 12 inches, freely producing tiny tufts of true ageratum-blue flowers.
Pkt. 25c; ¼ oz. \$1.00.
- ALTHEA ROSEA (Hollyhock)**—October until April. Very hardy. 4 to 6 feet high.
Pkt. 15c; oz. \$1.25.
- ALYSSUM (Little Gem, Sweet Alyssum)**—Free flowering; six inches high; white flowers; very fragrant. October till April.
Pkt. 25c; oz. \$1.10, postpaid.
- ALYSSUM (Violet Queen)**—A distinct variety, with delicate lavender flowers.
Pkt. 20c; ½ oz. 80c.
- ALYSSUM (Royal Carpet)**—New rich violet purple, compact and spreading.
Pkt. 25c; ¼ oz. 75c.
- AMARANTHUS TRICOLOR (Joseph's Coat)**—Very showy; cultivated on account of its leaves, which are green, yellow and red. Two to three feet high. April till August.
Pkt. 15c; ½ oz. 80c.
- AMARANTHUS (Molten Fire)**—Dwarf leaves dark bronze, red center, very beautiful.
Pkt. 15c; ½ oz. \$1.25.
- AQUILEGIA (Columbine)**—Long-spurred hybrids mixed. Prefer partly shaded location. Sow during January to March. Height 2½ feet.
Pkt. 35c.
- ARMERIA (Thrift, Sea Pink)**—Dwarf-growing perennial with grassy leaves and a tufted habit of growth. The flowers are borne in globular heads during March to May, and the plants are suitable for edging to borders.
Pkt. 25c.
- ASTER (Semple's Branching Mixed)**—Beautiful for cut flowers. Two feet. December till March.
Pkt. 20c; oz. \$1.65.
- ASTER (Queen Margaret, German Quilled Mixed)**—Perfect double quilled flower, of all shades. One and a half feet high. December till March.
Pkt. 20c; oz. \$1.65.
- ASTER (Crego Will Resistant Mixed)**—Large double peony shaped flowers of fine mixed colors, one of the best varieties. Two feet high, sow from December till March.
Pkt. 20c; oz. \$1.65.
- BALSAMINA CAMELIA FLORA ALBA**—Pure white flowers about 2 feet high, used for bouquets. Sow all Balsaminas from February till August.
Pkt. 25c.
- BALSAMINA**—Mixed. Improved camelia-flowered. Very double and beautiful colors. February to August.
Pkt. 15c; ½ oz. 80c; oz. \$1.40.
- BELLS OF IRELAND (Irish Green Bell flowers)**—Graceful 2 ft. branching stems are so surrounded by 2 in. flowers there is little room for leaves. The bell shaped calyx of the flower is green and delicately veined containing the white corolla. Both curious and beautiful. Planted January to May.
Pkt. 25c; ½ oz. 60c.
- BELLIS PERENNIS (English Daisy)**—Finest double mixed variety; 4 inches high. October till January.
Pkt. 25c; ½ oz. \$1.75.
- CALENDULA (Ball's Gold)**—It has fine stems, immense double flowers of brilliant glisteny orange. A great favorite. Planted October to March. Grows 1½ feet high.
Pkt. 15c; ½ oz. 65c; oz. \$1.10.
- CALENDULA (Orange King)**—Outer petals are slightly imbricated, while those of the center are curved like a peony. Color glowing orange. Planted October to March, grows 1¼ feet high.
Pkt. 15c; ½ oz. 65c; oz. \$1.10.
- CALENDULA (Pacific Beauty)**—Produces large blooms on long stems, exquisite persimmon orange.
Pkg. 15c; ½ oz. 65c.
- CALENDULA (Orange Shaggy)**—New orange colored Calendula, grows 18 in. high. Planted October to March.
Pkt. 15c; ½ oz. 65c; oz. \$1.10.
- CALENDULA (Chrysantha)**—Large double buttercup yellow flowers, flowers incurved, extremely popular. Planted October to March.
Pkt. 15c; ½ oz. 65c; oz. \$1.10.
- CALENDULA (Lemon Ball)**—Sulphur yellow, a very fine double blooming calendula and planted extensively. Planted October to March.
Pkt. 15c; ½ oz. 65c; oz. \$1.10.
- CALENDULA (Sensation)**—Vigorous growth, flowers borne on stout stems, blossoms are flat, brilliant orange with a scarlet sheen and full yellow center. Planted October to March.
Pkt. 15c; ½ oz. 65c; oz. \$1.10.
- CANDELABRA (Cassia Alata)**—Known as The Candle Tree—Bright yellow blooms. Easy to grow. Thrives best in sunny locations. Grows to height of about 5 ft. Planted from February to April.
Pkt. 35c; ½ oz. \$1.00.
- CANDYTUFT (Coronaria)**—Hyacinth flowered white. A very fine variety. One foot high. October to April.
Pkt. 15c; ½ oz. 75c; oz. \$1.35.
- CANDYTUFT (Umbellata)**—In separate colors, white, lavender, crimson.
Pkt. 15c; ½ oz. 65c; oz. \$1.10.
Rose, cardinal. Pkt. 15c.
- CANDYTUFT**—Mixed all colors.
Pkt. 15c; ½ oz. 65c; oz. \$1.10.
- CARNATION (Margarita Robustus)**—Fl. pl. semi-high double Margaret Carnation. Dwarfish habit, grows 12 to 15 inches high. The flowers are much variegated, occasionally producing yellow ones. October to April.
Pkt. 20c; ½ oz. \$1.30; oz. \$2.25.
- CELOSIA CRISTATA (Dwarf Cockscomb)**—Very ornamental producing large head of crimson and yellow flowers 1 to 2 feet high. February till August.
Pkt. 15c; ½ oz. \$1.00; oz. \$1.85.
- CENTAUREA CYANUS (Double Cornflower)**—A hardy annual of easy culture; various colors, 2 feet high. March to May.
Pkt. 15c; ½ oz. 50c; oz. 85c.
- CHRYSANTHEMUM TRICOLOR (Carinatum)**—Summer Chrysanthemum. Showy Summer bloomers of different colors. 12 to 15 inches high. March to May.
Pkt. 15c; ½ oz. 90c; oz. \$1.25.
- COLEUS**—A well known and beautiful bedding plant which can be easily propagated by seeds which produce different shades of colored plants. March to May.
Pkt. 50c.
- COSMOS SENSATION RADIANCE (new)**—A striking new color combination never before seen in Sensation Cosmos. Deep rose petals overlaid with large well defined zone of rich crimson.
Pkt. 25c; ½ oz. 75c; oz. \$1.25.
- COSMOS (Sensation Finest Mixed)**—Mammoth size flowers, 4 to 5 inches in diameter, with broad, heavy fluted petals carried on very long stems. Mixture contains white and shades of rose and pink.
Pkt. 15c; ½ oz. 75c; oz. \$1.25.
- COSMOS (Fiesta)**—Makes a compact 2½ ft. plant with a riot of blooms all summer, blooms are semi-double and ruffled. A very desirable cutflower for the house.
Pkt. 25c.
- CYNOGLOSSUM AMABILE (Chinese Forget-Me-Not)**—A lively plant producing sprays of brilliant blue Forget-Me-Not like flowers. Grows easily and blooms for a long season. 18 to 24 inches high.
Pkt. 15c; ½ oz. 45c; oz. 75c.
- DAHLIAS (Unwin's Dwarf Hybrids)**—Produces branching plants 2 to 3 feet tall bearing semi-double flowers. Mixed colors.
Pkt. 25c; ½ oz. \$1.00.
- SHASTA DAISY**—An absolute perpetual bloomer throughout the whole year wherever it has a chance. October till April.
Pkt. 25c; ½ oz. 75c.
- GLORIOSA DAISY SINGLE**—Mixed yellow and golden orange and gold, contrasting dark center which sets off long petals. Fine cut flower.
Pkt. 35c; ¼ oz. 70c.
- DIANTHUS BARBATUS (Sweet William)**—Their beautiful colors make them very showy. Should be sown early, otherwise they will not flower the first spring; 1½ feet high. October till April.
Pkt. 15c; ½ oz. 70c; oz. \$1.10.
- DIANTHUS CHINENSIS (Chinese Pink)**—Single. A beautiful class of annuals of various colors which flower very profusely in early spring and summer. One foot high. October till April.
Pkt. 15c; ½ oz. 88c; oz. \$1.35.
- DIANTHUS HEDDEWIGGI (Japan Pink)**—Double. This is the most showy of any of the annual pinks. The flowers are very large and of brilliant colors; one foot high. October till April.
Pkt. 15c; ½ oz. 90c; oz. \$1.50.
- DIMORPHOTEA (African Daisy)**—Rich orange gold with dark center disc.
Pkt. 20c, postpaid.
- ESCHSCHOLTZIA CALIFORNIA (California Poppy)**—Single. A very free flowering plant, good for masses. Does not transplant well. One foot high. Yellow color. December till April.
Pkt. 15c; ½ oz. 60c; oz. \$1.00.
- GAILLARDIA (Blanket Flower)**—Mixed. Planted in early spring, excellent for beds, borders or for cutting.
Pkt. 15c; ½ oz. 75c; oz. \$1.35.
- GOLDEN GLOW (Rudbeckia)**—Grows 3 feet high, branching freely and bearing by the hundreds on long, graceful stems; exquisite double flowers of brightest golden color and as large as a Cactus Dahlia. Perfectly hardy and blooms continuously throughout the summer months.
Pkt. 15c.
- GOMPHRENA (White and Crimson Bachelor Button or Globe Amaranth)**—Mixed. Well known variety of flowers; very early and free flowering; continues to flower for a long time. Two feet high. From February to August.
Pkt. 15c; ½ oz. 75c; oz. \$1.25.
- GYPSOPHILA**—White. Pure white, of easy growth, several sowings should be made during the season to keep up the supply. Planted March to June and grows 2 feet high.
Pkt. 15c; ½ oz. 65c; oz. \$1.00.
- GERANIUM ZONALE (Zonale Geranium)**—Mixed. Seed saved from large flowering varieties of different colors; should be sown in seed pans, and when large enough transplanted into pots where they can be left or transplanted in spring into the open ground.
Pkt. 50c.
- HELICHRYSUM (Strawflower)**—A very fine ornament for any garden and prized everywhere for winter decoration of vases, etc. Needs plenty of room to develop. Flowers for drying should be gathered when partially unfolded and suspended with their heads downward in a cool place.
Pkt. 20c; ½ oz. \$1.00.
- HELIOTROPIUM (Heliotrope)**—Mixed varieties with dark and light shaded flowers. Should be sown in hotbed if sown early. October till April.
Pkt. 25c.
- LARKSPUR (Apple Blossom)**—Very attractive spikes of pink blooms.
Pkt. 15c; ½ oz. 80c; oz. \$1.25.
- LARKSPUR (Bright Carmine)**—Long erect spikes of fiery carmine flowers—very lovely and effective.
Pkt. 15c; ½ oz. 80c; oz. \$1.25.
- LARKSPUR (Dark Blue)**—Annual, long, erect spikes of beautiful dark blue blossoms.
Pkt. 15c; ½ oz. 80c; oz. \$1.25.
- Larkspur (Giant Imperial White King)**—Flowers are a pure, glistening white. Florets are extremely large and fully double. Plants are tall, well over 5 feet, and cutting spikes 24 to 30 inches long.
Pkt. 15c; ½ oz. 80c; oz. \$1.25.
- LARKSPUR (Giant Imperial Mixed)**—Very showy, 2½ feet.
Pkt. 15c; ½ oz. 85c; oz. \$1.10.
- LUPINS**—Mixed. Free flowering, easily grown annual, with long, graceful spikes of rich and various colored pea-shaped flowers, valuable for mixed borders, beds, and for cutting; prefers a little shade. Planted from November to April, grows 1¼ feet high.
Pkt. 15c; ½ oz. 60c; oz. \$1.00.
- LUPINS (White)**—Same as above but pure white flowers.
Pkt. 15c; ½ oz. 60c; oz. \$1.00.
- LUPINS (Blue)**—Same as above but blue flowers.
Pkt. 15c; ½ oz. 60c; oz. \$1.00.
- MYOSOTIS (Palustria, Forget-Me-Not)**—A fine little plant, with small blue star-like flowers. Half foot high. December till March.
Pkt. 25c.
- MATRICARIA (Fever Few)**—Double white. A perennial bearing small double white flowers, good for cutting.
Pkt. 25c; ½ oz. \$1.35.
- MARIGOLD (African or Tall Growing Marigold)**—Very showy annual for borders with bright yellow flowers. Two and a half feet high. February to March; October to December.
Pkt. 15c; ½ oz. 70c; oz. \$1.25.

Favorite Annual Flowers

- MARIGOLD (Petite Mixed)**—New dwarf double French Marigold, compact in growth, about 6 inches tall. Pkt. 25c; 1/4 oz. 75c.
- MARIGOLD (Dixie Sunshine)**—Sensational new and fascinating large ball shaped flowers composed of dozens of tiny five-petaled florets, gracefully interlocking, daintily fringed in effect. Brilliant golden yellow. January to April. Pkt. 15c; 1/2 oz. \$1.50.
- MARIGOLD (French or Dwarf Marigold)**—Covered with yellow and brown flowers. One and a half feet high. January to April. Pkt. 15c; 1/2 oz. 80c.
- MARIGOLD (Gigantea Sunset Giants)**—Large flowers, produced in profusion, of delicate fragrance. Flowers are loosely formed, full centered, with broad heavy petals. Sunset Giants is a mixture ranging from deep orange through golden orange, deep golden yellow, light yellow, lemon yellow, and a delightful new shade of primrose. Pkt. 15c; 1/2 oz. \$1.00.
- MARIGOLD SPRY (French Dwarf)**—Light orange, crested center and maroon outer petals. 6 to 8 in. Pkt. 15c; 1/2 oz. 75c.
- MARIGOLD (Yellow Supreme)**—Fluffy well rounded blooms with frilled petals of rich lemon. October to December. Pkt. 15c; 1/2 oz. 80c; oz. \$1.35.
- MARIGOLD (Guinea Gold)**—A distinct type growing 2 to 2 1/2 feet tall, brilliant orange flushed with gold, an early blooming sort, loosely ruffled flowers. October to December. Pkt. 20c; 1/2 oz. 80c; oz. \$1.35.
- MARIGOLD (Tall African)**—All double orange. Exactly like the tall African Marigold in size, but a deep orange color. Planted October to December. Pkt. 15c; 1/2 oz. 80c; oz. \$1.35.
- MARIGOLD RED HEAD (Dwarf)**—Single French. Well shaped flowers made up of a single row of recurved petals, crested center. When first opening, blooms are rich mahogany red, changing to auburn and later to bronze and gold. Pkt. 15c.
- GLITTERS**—A new chrysanthemum flowered African Marigold—grows about 2 1/2 to 3 ft., bright lemon yellow blooms. Pkt. 25c.
- NASTURTIUM (Double Gleam Hybrids)**—A wide assortment of colors, sweet scented, foliage fresh green. Pkt. 15c; oz. 40c; 1/4 lb. \$1.10.
- NASTURTIUM (Double Scarlet Gleam)**—Flowers are fiery orange scarlet and almost three inches across and are uniformly well formed. Pkt. 15c; oz. 40c; 1/4 lb. \$1.10.
- NASTURTIUM (Golden Gleam, Flore Pleno)**—A double sweet scented Nasturtium, golden yellow blooms with stiff, long stems. This is a distinct and new variety of Nasturtium and being offered for the first time. Pkt. 15c; oz. 40c; 1/4 lb. \$1.10.
- NASTURTIUM (Dwarf)**—Mixed. Blossoms red, yellow and salmon; used with leaves as salad. Seed pods while young and succulent picked and used as capers. February to April, and November and December. Pkt. 10c; oz. 30c; 1/4 lb. 80c.
- NASTURTIUM (Tall)**—Mixed. Same as above, makes an excellent screen for unsightly places. February to April and November and December. Pkt. 10c; oz. 30c; 1/4 lb. 80c.
- PANSY (Large Trimardeau)**—Mixed. This is the largest variety in cultivation, the flowers are well formed, generally three-spotted, quite distinct; the plants grow compact. October to March. Pkt. 25c; 1/4 oz. \$1.25.
- PANSY (Roggli's Giant)**—Mixed. A very early variety of finest and rarest flowers and coloring. Very large blooms and is planted from October to March; grows about 8 inches high. Pkt. 50c.
- PETUNIA (Balcony)**—Mixed. Single large flowering, makes an effective display over a long season. Pkt. 25c; 1/4 oz. 75c.
- PETUNIA (Glants of California)**—Mixed. Very large flowers and colors embrace every conceivable shade. Extensively planted. Planted October to May. Pkt. 35c.
- PETUNIA (Hybrida)**—Mixed. Splendid mixed hybrid varieties. Plants are of spreading habit; about 1 foot high. October till May. Pkt. 15c; 1/2 oz. \$1.35; oz. \$2.50.
- PETUNIA (Snow Queen)**—One of the best pure white Petunias, ideal for bed massing. Pkt. 25c.
- PETUNIA (Heavenly Blue)**—A silvery blue, compact grower and free flowering. Pkt. 25c.
- PETUNIA (Purple)**—One of the best rich velvety purple Petunias. Free blooming and compact. Pkt. 25c.
- PETUNIA (Rose of Heaven)**—Rich, brilliant and effective rose color. Planted October to April. Pkt. 25c.
- PETUNIA (Rosy Morn)**—A very pleasing clear pink with a broad white throat. A splendid sort for porch boxes, pots and beds. Planted October to April, grows 1 foot. Pkt. 25c; 1/4 oz. 75c.
- PETUNIA (Theodosia)**—Enormous single ruffled flowers of a beautiful shade of rose pink, with golden yellow veined center. Very popular. Planted October to May. Pkt. 35c.
- PETUNIA (Comanche)**—Deep torch red blooms, slightly fringed, a little deeper in color than Fire Chief. Price \$1.00 Pkt.
- PETUNIA (Carnival)**—Hybrid grandiflora, bedding type, growing 12 to 15 inches, wonderful color range, most flowers being fringed petal edges. Pkt. 75c.
- PETUNIA (Red Satin)**—New and vivid scarlet Dwarf, globe-shaped form, 10 to 12 in. Pkt. \$1.00.
- PETUNIA (Fire Chief)**—Brilliant red color, dwarf habit, free blooming. Pkt. 50c.
- PHLOX (Twinkle Dwarf Star Mixed)**—Flowers like tiny stars, in a complete color range; dwarf growing. Pkt. 50c.
- PHLOX (Perennial Mixed)**—A mixture from a celebrated collection. Seeds slow in germinating. Pkt. 25c; 1/4 oz. \$1.25.
- PHLOX (Drummondii Grandiflora Alba)**—Pure white, some with purple or violet eyes. December till April. Pkt. 25c.
- PHLOX (Drummondii)**—Mixed. Their various colors and length of flowering, with easy culture, make them a favorite with everyone. One foot high. December till April. Pkt. 25c; 1/4 oz. 85c.
- PHLOX (Fiery Scarlet)**—Easy culture and a favorite. One foot high. Planted December to April. Pkt. 25c.
- PHLOX (Flesh Pink)**—Same as above, but a beautiful shade of pink. Planted December to April. Pkt. 25c.
- PHLOX (Star Mixed)**—Dwarf habit, attractive star-shaped flowers; a novel variety. Pkt. 25c.
- PHYSOSTEGIA (False Dragon Head)**—A very hardy perennial and gaining in popularity. It forms dense bushes 3 to 4 feet high, bearing freely during the summer months spikes of delicate pink tubular flowers. Pkt. 25c.
- POPPY (Sweet Briar)**—Pink, very showy, double blossom annual; 2 to 3 feet high. Pkt. 15c; 1/2 oz. 75c; oz. \$1.25.
- POPPY (Flanders Field)**—Very showy double red blossoms; annual, 2 to 3 feet high. Pkt. 15c; 1/2 oz. 60c; oz. \$1.00.
- POPPY**—Double Shirley flowers, very showy. Cannot be transplanted. Two feet high. October till May. Pkt. 15c; 1/2 oz. 60c; oz. \$1.00.
- SHIRLEY POPPIES**—Single mixed. October to May. Pkt. 15c; 1/2 oz. 60c; oz. \$1.00.
- PORTULACA (Single)**—Mixed. The flowers are of various colors, from white to bright scarlet and crimson. The plant is good for edgings, vases or pots. Half foot high. February till August. Pkt. 20c; 1/2 oz. 85c.
- PORTULACA (Grandiflora, fl. pl.)**—Mixed. Double Portulaca. The same variety of colors with semi-double and double flowers half foot high. February till August. Pkt. 20c; 1/2 oz. \$1.35.
- PYRETHUM ROSEUM**—Hardy perennial, daisy-like flowers, fern-like foliage excellent for cutting. Planted after danger of frost is over, prefers sunny location, rich well drained soil. Pka. 50c.
- QUEEN ANNE'S LACE**—Hardy annual, large, loosely formed terminal clusters of tiny white flowers, used for cutting. Pkt. 25c; 1/2 oz. 90c.
- SALPIGLOSSIS (Painted Tongue)**—Large flower mixed. One of the finest annuals, of easy culture and succeeds in any good soil and in a sunny location. Produces blooms all during summer until frost. Seed should be started in hotbeds about the end of March and planted out after danger of frost is over. Pkt. 25c.
- SOLANUM (Christmas Pepper)**—Ornamental plant with attractive berries. Useful pot plant for winter decorations. November to February. Pkt. 25c.
- SALVIA (Scarlet Sage)**—Well known decorative bedding plants. Can be grown as an annual as it flowers freely from seed the first year. Two to three feet high. February to April. Pkt. 25c; 1/4 oz. 90c.
- SALVIA (Bonfire)**—Dazzling scarlet. Dwarf, compact grower. Height 1 1/2 feet. Pkt. 25c.
- SALVIA (Harbinger)**—The finest and most striking of all bedding Salvias. The plants are symmetrical, dwarf, and compact. Pkt. 25c.
- SALVIA (Blue Beard, Blue Bedder)**—Wonderful clear, dark blue flowers on long, wiry stems. Plant compact. Pkt. 25c.
- SCABIOSA (Mourning Bride)**—Commonly known as the Pincushion Plant. Produces beautiful flowers in delicate shades on long stems. Makes very effective borders or beds. Planted after danger of frost is over, about March. Pkt. 25c.
- SNAPDRAGON (Canary Bird)**—A very fine variety of giant yellow blooms, growing 24 to 36 inches high. Planted October to March. Pkt. 25c; 1/4 oz. 70c.
- SNAPDRAGON (Loveliness)**—Rose pink blooms. Giant flowered, grows 32 inches high. Planted October to March. Pkt. 25c; 1/4 oz. 70c.
- SNAPDRAGON (Rust Proof California Giant Mixture)**—This mixture of rust proof Snapdragons is the best of all around type, equally fine for border or for cutting. The plants are of the popular Nanum Majestic type. Pkt. 25c; 1/2 oz. \$1.00.
- SNAPDRAGON (Crimson King)**—Rich, crimson, semi-tall sort. Very good for bedding. Pkt. 25c; 1/4 oz. 70c.
- SNAPDRAGON (Shasta)**—Pure white, a very desirable variety and rust proof. Pkt. 25c; 1/4 oz. 70c.
- STOCKS (Early Giant Imperial Improved Bismarck Mixed)**—An extra fine early blooming mixed stock of branching habits, producing double flowers, splendid for cutting. Planted October to March. Pkt. 15c; 1/4 oz. 75c.
- STOCKS (Double Early Giant Imperial Bismarck)**—Canary yellow. Same as above, but long spikes of yellow blooms. Pkt. 15c.
- STOCKS (Double Early Giant Imperial Bismarck)**—Old rose blooms. Pkt. 15c.
- STOCKS (Double Early Giant Imperial Bismarck)**—Fiery blood red blooms. Pkt. 15c.
- STOCKS (Double Early Giant Imperial Bismarck)**—Silvery lilac blooms. Pkt. 15c.
- TEN-WEEKS STOCKS**—Mixed. Large flowers of all colors from white to dark blue or crimson. Should be sown in pots or pans, and when large enough transplant into rich soil. One and a quarter feet. October to March. Pkt. 15c; 1/4 oz. 75c.
- TITHONIA (Mexican Sunflowers, Torch)**—Large, single flowers, orange vermilion color and especially desirable for planting among shrubbery. February to March. Pkt. 20c; 1/2 oz. 85c.
- TORENIA FOURNIERI**—Lovely blue flowers with three large spots of darkest blue and a bright yellow throat. Blooms during summer and fall and makes fine beds and borders. Pkt. 35c.
- VERBENA CANDIDISSIMA (White Verbena)**—Pure white verbena of more or less fragrance; 1 1/2 feet high. January to April. Pkt. 20c.

BEAUTIFUL ZINNIAS

MAMMOTH VERBENA HYBRIDA (Hybridized Verbena)—Their long flowering and great diversity of color makes them valuable for every garden however small. All colors mixed; 1½ feet high. January to April. Pkt. 15c; ½ oz. 95c.

VERBENA SCARLET—Brilliant scarlet-red flowers of great size, flowers freely during summer. Planted January to April. Pkt. 20c; ½ oz. \$1.00.

VINCA — Mixed. Red and white Periwinkle. Plants of shining foliage, with white and dark rose colored flowers, 2 feet high. February to April. Pkt. 25c; ¼ oz. 85c.

VIOLA CORNUTA—Tufted Pansy mixed. Annual, extensively used for edging and their spreading habit renders them valuable for rockeries. August to December. Pkt. 25c.

VIOLA ODORATA (Sweet Violet)—Well known edging plant, one-half foot high. Sow from January to March. Pkt. 25c.

SWEET PEAS — The range of color, combined with the exquisite beauty of form of the flowers and the gracefulness of the long stems, makes this the most popular of our annual flowers.

EARLY-FLOWERING SPENCER — These magnificent Sweet Peas are ideal for late fall and winter blooming in the lower South. Plant during August, September and October.

Mrs. Hoover—Rich indigo blue.

Kate Smith—Scarlet.

Harmony—Mauve Lavender.

Snowstorm—Pure White.

Oriental—Cream.

Giant Rose—Rose Pink.

American Beauty—Crimson Rose.

Grenadier—Dazzling Scarlet.

Shirley Temple (New)—Delightful Soft Rose Pink.

Pkt. 15c; oz. 35c; ¼ lb. \$1.00; lb. \$3.50.

Spencer's Extra Early Christmas—Flowering.

Mixed. Pkt. 15c; oz. 35c; ¼ lb. 95c; lb. \$3.25.

SPRING FLOWERING CUTHBERTSON—Hardy, vigorous growers, seldom winter-killed in the South. Sow during October and November and they will commence blooming in March.

Daisy—Glistening white.

Helen—Blush pink.

Catherine—Scarlet cerise.

Katie—Bright cream pink.

Flora—Rose cerise.

Spring Flowering Cuthbertson—Unsurpassed for richness and brilliancy.

Prices on above: Pkt. 15c; oz. 35c; ¼ lb. \$1.00; lb. \$3.50.

ZINNIAS—Zinnias today claim a prominent place among the preferred annual garden flowers. For fall blooming, sow during July, August and September. In 6 to 7 weeks the plants will begin to bloom; the flowers increase in size and beauty of color as the plants mature.

GIANT DAHLIA-FLOWERED—Resemble the decorative Dahlia because of their unusual depth, open and graceful growth, and curled petals.

Canary Bird—Primrose yellow.

Crimson Monarch—Crimson red.

Dream—Distinct deep lavender.

Exquisite—Light rose, darker center.

Scarlet Flame.

Polar Bear—Large, pure white.

Prices on above: Pkt. 15c; ½ oz. 75c; oz. \$1.25.

Mixed—A very fine Dahlia-like flower, double, of finest blooms.

Pkt. 15c; ½ oz. 65c; oz. \$1.10.

LILLIPUT ZINNIAS—Elegant, small-flowering type with attractive round, almost globular-shaped blooms resembling the pompon Dahlias. Very prolific bloomer.

Canary—Yellow.

Scarlet Gem—Deep scarlet.

White Gem.

Pink—Deep flesh pink.

Prices on above: Pkt. 15c; ½ oz. 75c; oz. \$1.25.

ZINNIA LILLIPUT PASTEL MIXTURE—Plants 12 to 15 inches in height, compact growing and free flowering, early blooming, producing flowers about 45 days after seed is sown.

Pkt. 15c; ½ oz. 75c; oz. \$1.25.

ZINNIA FANTASY—Finest mixed. Delicate lacy-petaled flowers, rounded, medium sized with a wide range of beautiful colors, a really beautiful variety. Pkt. 15c; ½ oz. \$1.00.

ZINNIA FANTASY STAR DUST—Flowers of medium size, shaggy petaled, color is a rich deep golden yellow, free flowering, early blooming. Pkt. 25c.

ZINNIA (Fantasy Wildfire)—Vivid red in coloring. Plants are neat, strong and free blooming; 2½ to 3 feet tall, coming into flower 45 to 50 days after seed is sown. Pkt. 25c.

ZINNIA (Peppermint Stick)—New, with a wide range of colors, a good cut and come again Zinnia. Pkt. 15c; oz. \$1.50.

ZINNIA (Persian Carpet)—Like tiny dahlias with pointed petals, dwarf in habit and begins to bloom early. Pkt. 25c; ½ oz. \$1.00.

ZINNIA (Blaze)—All America Winner. Profusion of brilliant mandarin-red flowers changing to fiery orange-scarlet, fluffy, quilled petals, and double. Pkt. 35c.

SHRUBS

ABELIA GRANDIFLORA—Most beautiful, popular and satisfactory broadleaf evergreen. Foliage a dark glossy green, covered from early spring to late fall with bell-shaped white and pink flowers. In winter its leaves turn metallic bronze color. 2 yr. plants \$1.35 each, postpaid.

FLOWERING ALMOND — Of upright growth. Hardy with lovely pink flowers in early spring. Tiny little leaves borne on long stems make it very useful in any landscape. 2 TO 3 FT. \$1.35 EACH, POSTPAID

ALTHEA (Purple)—Same description as Red Althea only blooms are large, double lavender. 18 TO 24 IN. \$1.25 EACH, POSTPAID

ALTHEA BEU DE FEU (Double Red) — Tall growing bush form plant. An abundance of large double red flowers. Hardy and easy to transplant. Blooms fine in July August and September. 18 TO 24 IN. \$1.25 EACH, POSTPAID

ALTHEA JEANNE d'ARC (White Althea)—Same description as the Red Althea, only blooms are large, double white with carmine centers. 18 TO 24 IN. \$1.25 EACH, POSTPAID

AMERICAN RED BUD (Judas Tree)—This plant needs no description as you all know its lovely form, its beautiful pink and rose-colored flowers, and its use as a background or single specimen plant. The tree is exceptionally hardy, a very fast grower and exquisite in every respect. 2 to 3 ft. \$1.35, postpaid.

BUTTERFLY BUSH — A new, very compact, rather dwarf type. Commonly called Butterfly Bush, Buddleia or Summer Lilac. Beautiful green foliage with gorgeous purple and lavender blooms in immense clusters. Strong 2 ft. plants, \$1.35 each, postpaid.

CRAPE MYRTLE—The glory of the South. Extremely hardy, does well in any soil, can be planted in full or half sun. Blooms from mid-summer until frost, when most flowers are gone.

Colors: red, pink, lavender. Specify color wanted. 2 ft. plants, \$1.25 each, postpaid.

CYDONIA JAPONICA (Japan Quince)—Commonly called Evergreen Burning Bush or Flowering Japonica. Produces a brilliance of scarlet-red flowers almost before snow leaves the ground. Tall, slow growing, bush form shrub. Suitable for use as single specimens, hedging, or any place where a blaze of red color is desired. The most beautiful of all the flowering shrubs in the South. Hardy everywhere. 2 ft. plants \$1.25 each, postpaid.

PURPLE LEAF PLUM—Ornamental tree with deep pink flowers appearing along the branches before the red foliage appears. \$1.75, postpaid.

VITEX (Chaste Tree)—Beautiful late blooming shrub with lilac-blue spikes. Sage green foliage. \$1.35, postpaid.

MOCK ORANGE—Of upright growth reaching a height of about 5 feet. Very small, dainty leaves of a dark green color. Highly scented, beautiful white flowers. 18 to 24 in. \$1.25 each, postpaid.

PINK HONEYSUCKLE—Exactly like the red bush except the flowers are small pink with an abundance of them.

2 ft. plants \$1.25 each, postpaid.

RED BUSH HONEYSUCKLE—A lovely plant of upright growing habit ranging in size from 3 to 5 feet. Small, dainty little leaves with an abundance of small red flowers followed by red berries make it one of the most loved plants grown in the nursery. 2 to 3 ft. \$1.25 each.

RED FLOWERING PEACH—A large type of flowering tree with the same foliage as the fruit tree.

It is beautiful when in bloom during the early spring with its large double red flowers. It is a solid mass of blooms.

2 ft. plants \$1.75 each, postpaid.

DEUTZIA (Pink)—Large, double pink flowers with a shading of rose. Very hardy, attractive, and does well in any soil. One of the first plants to bloom in early spring. 2 TO 3 FT. \$1.25 POSTPAID

FORSYTHIA—Erect growing, tall and slender. Especially desirable for tall backgrounds. Lovely golden flowers of rich yellow. One of the first shrubs to bloom.

2 FT. PLANTS \$1.25 EACH POSTPAID

RED LEAF BARBERRY—Similar to the popular Green Leaf Japanese Barberry, only its foliage as it develops in early spring assumes a deep bronze red color which it keeps until fall when it changes to vivid orange-scarlet and red shades. 2 FT. \$1.25

MALUS HOPA (Flowering Crab) — Vigorous grower, dark pink blooms. 2 to 3 ft. \$1.75 each, postpaid.

SPIREA BILLARDI—A low growing, graceful flowering shrub. Blooms on long spikes or stems, with gorgeous lavender flowers. Fast grower, reaches about 3 feet in height. 2 TO 3 FT. \$1.25 POST PAID

SPIREA ROSEA—A grand shrub for group or mass planting. Has dense foliage with long stems of beautiful rose shaded flowers. Very pretty and showy. Blooms from July to September.

STRONG 2 FT. PLANTS \$1.25 EACH, POSTPAID

SPIREA VAN HOUTTEI—One of the most beautiful of all the Spirea family. In early spring the plant is covered with small, dainty, white flowers. It looks like a white snowbank. Has a splendid form with long draping branches of light green. Can be used for screening or background work. 2 ft. plants \$1.35 each, postpaid.

WEIGELA ROSEA—Tall growing with deep pink, trumpet shaped flowers borne thickly along stems. They bloom abundantly throughout the summer. 18 TO 24 IN. \$1.25 POSTPAID

WHITE FLOWERING DOGWOOD (Cornus Florida)—Tree form. Solid mass of beautiful white blooms in early spring. Foliage dark green with very attractive leaves. Very hardy.

2 to 3 ft. plants \$2.35, postpaid.

YELLOW JASMINE—Its branches are beautifully arched, overhanging the ground from the inner edges. Foliage dark green, covered with gorgeous little yellow flowers all summer.

5 STRONG 2 YR. PLANTS \$1.25 EACH, P.P.

PINK FLOWERING DOGWOOD—Beautiful mass of pink blossoms in early spring. 2 TO 3 FT. PLANTS \$3.50 POSTPAID

WISTERIA—For trailing over buildings, piazzas, verandas or trellises, the decorative features which their long graceful blossoms afford make a particularly pleasing effect. We have these in light blue and white. 24 in. \$2.15 each, postpaid.

"BREATHE CLEAN HEALTH MASKS"

ORTHO HOME ORCHARD SPRAY
14 oz. \$1.39; 1 lb. 12 oz. \$2.49.
For Worms in Peaches—Pan Peach
Spray, 1 lb. 70c.

Orders taken for December, January and February delivery. Recommend shipments by express.

APPLES

FINE APPLES—Apples are fast increasing in favor here in the South and every home orchard should have several varieties for a full season's supply.

Early Red June—Medium to large, excellent keeper.

Delicious—Mellow, large, excellent eating and good shipper.

Early Harvest—Similar to Ben Davis, but 10 days earlier.

\$1.50 each, not prepaid.

APRICOTS

APRICOT—3 to 4 feet. Fruit of Apricot is similar in shape to the Peach, except that it is not downy and is almost perfectly round. Flavor very fine. 3 to 4 ft. \$1.75.

CHERRY

MONTMORENCY—Red. Sour. 3 to 4 ft. \$1.75, not prepaid.

ORANGES

ORANGE TREES—In planting an orange grove, it is poor business to plant cheap trees. Orange trees to prove vigorous and prolific should have large, well formed root systems and strong, clean, healthy tops one or two years old. Our trees are grown on loose sandy, loam land, which permits the root systems to develop properly.

DUNCAN GRAPE FRUIT—2 to 3 feet. One of the best and largest thin skin. 24 to 30 in. \$2.50 each, not prepaid.

KUMQUAT—2 to 3 feet. Used for preserving, small size and profuse bearer. 24 to 30 in. \$2.50 each, not prepaid.

LOUISIANA SWEET—2 to 3 feet. Medium size, thin skin, very sweet. 24 to 30 in. \$2.50 each, not prepaid.

MANDARIN—2 to 3 feet. Medium in size, flattened, deep yellow in color, skin thin and of fine texture, glove skin.

None.
SATSUMA—2 to 3 feet. Large glove skinned, sweet, excellent quality. 24 to 30 in. \$2.50 each, not prepaid.

WASHINGTON NAVEL ORANGE—2 to 3 feet. Fruit large, red-orange in color, skin thick, smooth and tough; seedless. 24 to 30 in. \$2.50 each, not prepaid.

PEACHES

PEACHES—The most popular fruit tree planted in the South and by far the most satisfactory and easiest grown. No orchard is complete without several popular peaches.

BELLE OF GEORGIA—3 to 4 feet. Sweet, freestone, white skin and flesh, pink cheek. Each \$1.50, not prepaid.

CHINESE CLING—3 to 4 feet. Sweet, clingstone, white flesh, creamy skin, pink cheek, large. Each \$1.50, not prepaid.

ELBERTA—3 to 4 feet. Large size, freestone, yellow skin and flesh red cheek. Each \$1.50, not prepaid.

J. H. HALE—3 to 4 feet. Large yellow freestone, red cheek, round shape, excellent flavor. Each \$1.50, not prepaid.

MAYFLOWER—3 to 4 feet. Early, large, well colored clingstone, excellent quality. Each \$1.50, not prepaid.

PERSIMMONS

PERSIMMONS—Large, smooth, conical, orange to bright red and of highest quality. Vigorous and productive.

TANE NASHI (Japanese)—3 to 4 feet. Very large, flat, yellow seedless fruit, very sweet. Each \$2.25, not prepaid.

FIGS

CELESTE—3 to 4 feet. Medium size, purple to blue, very sweet and a favorite. Each \$1.75, not prepaid.

PEARS

PEARS—Favorite of any home orchard where a variety of fruits is desired. From the small sugar, juicy varieties to the large hard-cooking kind, our soils are adapted to their culture. The "Pineapple" variety is practically blight proof and is well adapted to growing in blight regions.

ORIENT—Blight proof pear, very good quality for eating and cooking, free very vigorous and prolific bearer. This variety is highly recommended over the Bartlett. 3 to 4 ft. \$1.90, not prepaid.

BARTLETT—3 to 4 feet. Large, clear, bright yellow, juicy, a favorite. Each \$1.90, not prepaid.

KIEFFER'S HYBRID—3 to 4 feet. Yellow with bright vermilion cheek, juicy and large. Each \$1.90, not prepaid.

LECONTE—3 to 4 feet. Pale yellow, smooth skin, large, a favorite in the South for preserves and eating. Each \$1.90, not prepaid.

GRAPES

For All Purposes

MOORE EARLY—1 year old. Blue black, early, sweet and very prolific. Each \$1.25, not prepaid.

CONCORD—Blue black, thick flesh, very sweet; an old standby. Each \$1.25, not prepaid.

LUTIE—Light red color, very compact in the bunch and absolutely rot-proof and of high quality. Each \$1.25, not prepaid.

SCUPPERNONG—Very popular, bronze color, well known throughout the South. Each \$1.75, not prepaid.

WHITE NIAGARA—Creamy white, large, transparent and very sweet. Each \$1.25, not prepaid.

PLUMS

Wide choice in following varieties:

ABUNDANCE—3 to 4 feet. Large, heavy, bearing roundish yellow skin. Each \$1.75, not prepaid.

BRUCE—3 to 4 feet. Dark purple skin, blood red flesh, excellent preserver. Each \$1.75, not prepaid.

BURBANK—3 to 4 feet. Purplish red, deep yellow flesh, large and sweet. Each \$1.75, not prepaid.

50 lbs. \$3.95; 25 lbs. \$2.49.

VERTAGREEN—Lawn Food with DDT and Dieldrin for chinch bugs.
50 lb. bags \$3.75.

HYPONEX — Food, drink, and medicine for plant life. With Hyponex, plants grow luxuriously and develop sturdy growth regardless of the poorness of the soil. No greenhouse, small or large, should ignore the extra results which can be obtained by use of Hyponex.
5 oz. 59c; 10 oz. can \$1.00; 2 lbs. \$2.45; 10 lbs. \$9.00.

SULPHATE OF IRON (Copperas)—
1 lb. 30c; 5 lbs. \$1.10; 10 lbs. \$2.50.

MANGANESE SULPHATE—
1 lb. 20c; 5 lbs. 90c; 10 lbs. \$1.50.

SHEEP MANURE — Wizzard brand is pure sheep manure, absolutely weedless. Apply 500 to 1,000 pounds per acre.
5 lbs. 65c; 25 lbs. \$1.40; 50 lbs. \$2.39.

ALUMINUM SULPHATE—Used to change your soil to acid reaction and broadcast over surface at rate of 1 to 2 pounds to each square yard of ground. Use Aluminum Sulphate for your Azaleas to make them beautiful.
Lb. pkg. 10c; 25 lbs. \$1.50; 50 lbs. \$2.50; 100 lbs. \$4.75.

FINE BONE MEAL—One of the best animal fertilizers known to plant life.
5 lbs. 95¢; 10 lbs. \$1.75
25 lbs. \$2.85

NITRATE OF SODA—Provides nitrogen in a form that is immediately available to plants. For forcing vegetables, flowers, fruits, etc. Use with care; 500 lbs. per acre. For liquid fertilizer, use one ounce to a gallon of water.
Lb. 10c; 10 lbs. 65c; 25 lbs. \$1.50; 100 lbs. \$4.00.

HY-GRO — Analysis: 13-26-13. The soluble plant food and starter solution.
8 oz. 79c; 1½ lb. \$1.79; 4 lbs. \$3.85, postpaid; not prepaid, 10 lbs. \$8.00.

ACTIVO (Formerly Bacto)—Make your own fertilizer easily, quickly—often in as little as three weeks. Odorless! Organic! Just sprinkle Activo on kitchen waste, leaves, garden rubbish, sewage sludge, etc. Sprinkle in outdoor toilets, reduces odors, makes easily handled ash of waste.
No. 2 size, \$1.85; treats 450 lbs. compost.
No. 7 size, \$3.48; treats up to 1,800 lbs.

Place **HOTKAPS** — patented paper hot-houses — over seeds or plants. Complete protection from destructive **FROSTS, STORMS AND INSECTS**. Ripen crops 3 weeks earlier; increase yield 18% to 51%. Maintain perfect mulch. Millions used by successful growers every season. Easy to set.

20 Hotcaps for \$1.10; 250 for \$7.95, setter free; 1,000 for \$28.15; 100 for \$4.80.

HOTKAPS

FULTON'S PLANTABBS

Odorless Plant Food Tablets

PLANTABBS — Concentrated, Complete, Balanced Plant Food Tablets. Now contain Vitamin B₁ in proper, effective, measured amount.

Postpaid, 50 tablets 39c; 90 for 59c; 200 for \$1.00; 1,000 for \$3.50.

HORMODIN POWDER NO. 1—This hormone powder produces better roots—faster. Simply dip stems of cuttings in "Hormodin" Powder and place in usual propagating medium.

Price: 1¼ oz. 80c; 1 lb. \$4.80.

FRUITONE (The Hormodin Spray)—Stops premature drop of flowers, fruits and leaves.
Price: 2 oz. \$1.25; 12 oz. \$5.00.

ROOTONE—Roots, cuttings, stimulates seeds and bulbs.
¼ oz. 35c; 2 oz. \$1.25; 1 lb. \$5.00, postpaid.
No. 10—2 oz. \$2.25.

All-Leather—SOFT AS KID
Durable—DIRT-PROOF
Easy to Wear—WASHABLE

National Eezy Wear Garden Gloves

Used the year round for gardening, garage, housework, furnace, yard, painting, etc. Sizes—small, medium and large.

EEZY-WEAR—\$2.00 per pair.

TRAINETTES

A strong and easy to use trellis for sweet peas and other light climbing vines. Height 5 feet.
6 ft. length 75c; 8 ft. 95c; 15 ft. \$1.35, postpaid.

NEW!
DIFFERENT!

Weatherized

TRANSPLANTONE—It is used extensively in setting out tomato, sweet potato, cabbage, tobacco, and other plants, for early maturity and larger crop.

Price: ½-oz. pkt. 35c; 3-oz. can \$1.25; 1-lb. can \$4.00.

PEAT MOSS—You, too, can have a beautiful lawn and garden. Use Peat Moss, nature's finest soil conditioner. This miracle maker of humus puts millions of tiny sponges to work, providing soft, loose, fertile soil that allows air circulation and the penetration of the sun's rays. It stores plant food that would otherwise be washed away and wasted.

Standard bale \$5.95.

FLORAVATE—Two grades, coarse and fine. Mulch instead of cultivate. Save labor, save watering, save money. Makes dry sandy soil hold water and fertilizer like a sponge. Loosens tough clay soil. Does not burn. Use Floravate—sturdier plants—more flowers.

100- 100-lb. bales \$3.00
5 bales \$2.75 each.

ferti·lome "The Nation's Finest Line of Specialty Plant Foods"

For Lawns - Flowers - Shrubs - Trees and Gardens

ferti·lome All Purpose Plant Food:

Feed "nature's way with ferti·lome, the best organic base fertilizer anywhere. Use on lawns, shrubs, trees, bedding plants, bulbs, vegetables and fruits. Contains cottonseed meal, bone meal, and blood meal—ideal for all soils. 1 lb. 39c, 5 lb. 89c, 10 lb. \$1.50, 25 lb. \$1.95, 50 lb. \$2.95, 80 lb. \$4.50, 100 lb. \$4.95.

Azalea-Camellia-Gardenia Food

Creates an acid soil condition which produces healthy, beautiful, acid-loving plants. Contains cottonseed meal, bone meal, and blood meal plus iron, zinc, copper, manganese, boron and molybdenum in chelated form from Multi-TRACIN. Good for all acid-loving plants.

1 lb. 39c, 5 lb. 98c, 10 lb. \$1.75, 25 lb. \$2.95, 50 lb. \$3.95, 100 lb. \$6.50.

ferti·lome Liquid Root Stimulator and Starter Concentrate

ferti·lome Liquid Root Stimulator and Starter Concentrate is an all soluble mix for every transplant, contains iron, zinc, copper, manganese, boron and molybdenum in chelated form from Multi-TRACIN, in addition to primary plant foods and root hormone. Plants become rooted quicker . . . grow faster . . . fewer replacements necessary . . . plants mature earlier . . . produce longer. 1 oz. 29c, 1 lb. \$1.39, 25 lb. \$11.95.

**Blended
Grass Seeds**

**Contains
Zoysia Seed**

SOD-MASTER LAWNSEED is a Precision Blend of Permanent, Attractive and Trouble-free Grasses in the ratio of 4 Bahiagrass* seeds—3 Zoysia seeds—3 Fescue seeds. These perennial grasses mature slowly and co-habit for years. We also include Highland Bentgrass and a "mite" of Bermudagrass seeds for a quick all-over cover and for the transition to the slower maturing turf. *We use genuine Pensacola Bahiagrass only.

ferti·lome containing Ethion for control of Chinch Bugs

Ethion combined with ferti·lome—proven most effective for the do-it-yourself home owner. Not only controls Chinch Bugs but many other soil insects. Apply in one easy step with the regular feeding schedule. Contains cottonseed meal, bone meal, and Blood Meal. 50 lb. \$5.95.

Rose Food

Produces greenest leaves and essential new growth on which new blooms develop. A special bone meal, cottonseed meal, and blood meal diet plus iron, zinc, copper, manganese, boron and molybdenum in chelated form from Multi-TRACIN, in addition to primary plant foods.

1 lb. 39c, 5 lb. 98c, 10 lb. \$1.75, 25 lb. \$2.95.

ferti·lome containing Terraclor

A complete organic base plant food with Terraclor added for control of Brown Patch . . . feed and control disease in one easy step. Contains cottonseed meal, bone meal and blood meal. 50 lb. \$3.95.

**SOIL TESTING
\$2.50 per sample**

**GRACE UREA PRILLS
45% NITROGEN
FERTILIZER COMPOUND**

The most concentrated solid nitrogen fertilizer—completely water soluble—adapted to all methods of application. Non-corrosive; non-explosive; non-toxic. Quick acting; long lasting.

50 lb. bags \$4.50 F.O.B. New Orleans.

ferti·lome Liquid Plant Food Concentrate

Contains iron, zinc, copper, manganese, boron and molybdenum in chelated form from Multi-TRACIN, in addition to primary plant foods. Leaves no harmful deposit on flowers, foliage—Spray or sprinkle on plants—Doesn't injure plants even in hot weather if used according to instructions. Mixes readily with all popular insecticides, fungicides. Dissolves instantly—leaves no sediment to clog sprayers—clean—odorless.

1 oz. 29c, 6 oz. 69c, 1 lb. \$1.39, 25 lb. \$11.95.

GARDEN DESIGNING

THE DESIGNER OF A GARDEN MUST TAKE INTO CONSIDERATION THAT EVERY DETAIL MUST HAVE INTEREST IN ITSELF YET BLEND WITH THE COMPOSITE GROUP AS A COMPONENT TO ARCHITECTURAL DESIGN AND THE HABITS OF USERS.

More than 20 years experience in designing garden plans for small homes, town houses and estates enables us to help you with landscape plans which you can follow and have a professional job at very low cost.

Approximate pH Value or Reaction of Various Chemicals, Mineral & Organic Materials Useful in Horticulture.

Lime pH 12.2 Bone meal pH 10.0 Wood ashes 9.0-10.0 pH
 Most City water supplies 8.0 - 9.5 pH Nitrate of soda 9.0 pH
 Cotton Motes 9.0 pH Muriate of Potash 9.0 pH Cotton bolls 8.5 pH
 5 to 10 yr Live Oak Leaf Mold 8.0 pH Most animal Manures 8.0 pH
 Cocoa shells 5.3 to 8.0 pH.

BELOW NEUTRAL

Rainwater 5.5 to 7.0 pH Peat soil 5.5 pH, Fresh Live oak leaves 5.4 pH
 Pecan shells 5.4 pH Spanish moss Gin waste 5.4 pH
 Sugar cane pulp 5.4 pH Tea & Coffee grounds 5.0 pH
 Cotton Seed Meal 4.5 pH Peat Moss 3.5 pH Aluminum Sulphate 3.2 pH

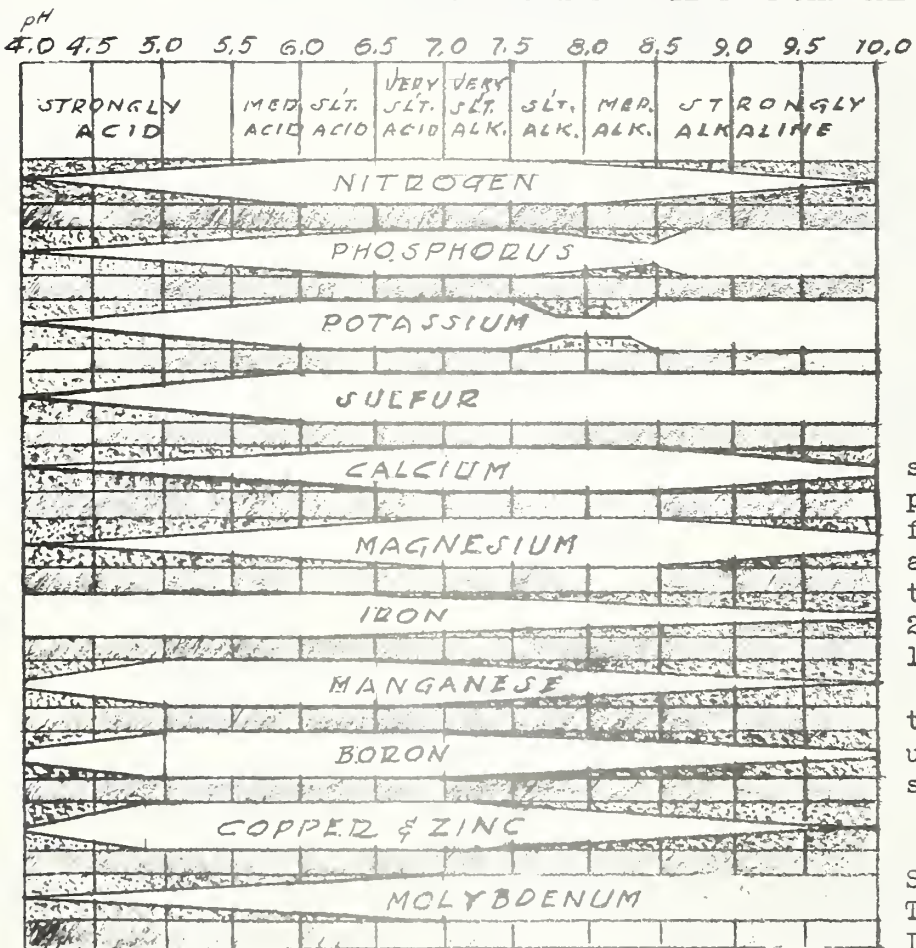

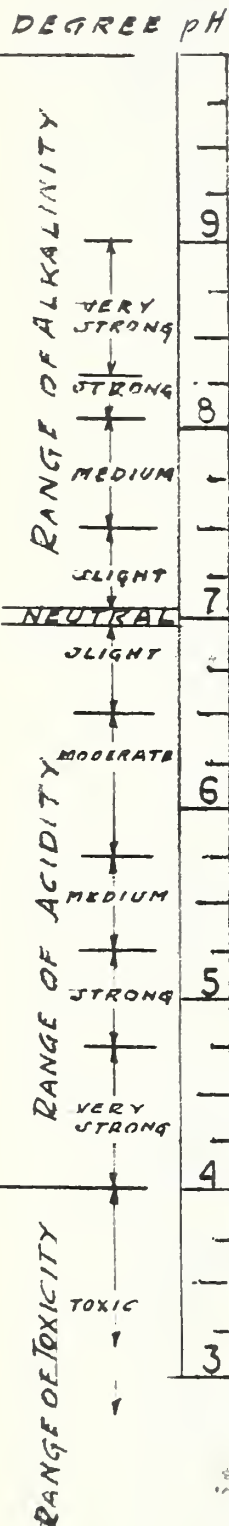

The reaction of the soil (pH) is considered to be of great importance in agriculture and horticulture. Plants of certain groups grow best when soil reaction is within their preference.

Nutrients are available to plants in maximum quantities at pH levels as indicated on the chart below.

Each soil has an individual characteristic and specific properties which must be known before it can be made use of for the profitable production of agricultural or horticultural crops. To hold or increase the fertility of soil to produce the crop desired one must know what is required and in what quantities; diagnosis is the first step.

We maintain a soil testing laboratory to assist the professional nurseryman, farmer or the amateur hobbyist achieve success.

OUR COMPLETE SOIL TEST MEASURES THE FOLLOWING:

- pH REACTION
- ORGANIC MATTER
- NITRATE
- PHOSPHORUS
- POTASSIUM
- CALCIUM
- MAGNESIUM
- SULFATE
- IRON
- MANGANESE
- AMMONIUM
- CHLORIDE

Remove soil from several spots where plants are growing, from the surface to a depth of 6" for trees and shrubs and 2" for pastures and lawns.

Mix each sample thoroughly and send us 1 pint for each sample to be tested.

WE WILL TEST YOUR SAMPLES AND RECOMMEND TREATMENT REQUIRED TO INSURE THE SUCCESS OF YOUR CROP.

PLANTING INFORMATION

Correct Centi-Seed planting is a three phase operation:

Good seedbed preparation.

Uniform distribution of the seed.

Working the seed into the soil.

A poor job of any phase will result in poor performance!

Plant 4 to 8 ounces Centi-Seed per 1,000 square feet on new seedbeds. Use the higher rate where faster coverage is desired and on old lawns.

Distribute with a Cyclone seeder or Brillion culti-packer seeder. Carefully control the flow rate (hole opening) on Cyclone seeders, regulating so that the area can be sown twice to insure uniform distribution (cross from east to west and then north to south). Mix with adequate dry sand for uniform hand scattering if no mechanical distributor is available.

After seeding, rake vigorously to get seed mixed in top half inch of soil. Rake old lawns before seeding to facilitate getting seed in contact with the soil.

Centi-Seed must not be left on the surface, nor planted more than one-half inch deep. "Rolling in" is not adequate.

Newer model Brillion culti-packer seeders do an excellent job of distributing the seed and placing them in the soil at the proper depth.

Soil temperatures must be around 70 degrees or better for effective germination. Centi-Seed germinate in 10 to 12 days under constant moisture at proper soil temperatures, but the seedlings are so small that many people are unable to identify them for several weeks and some people never identify the seedlings until a few weeks before a Centipede lawn is perfected.

Excellent lawns are often produced in four or five months, but your customer should be cautioned against expecting too much too soon. Watering should be continued even when seedlings cannot be identified.
