BLOOD DONORS

The Southern Regional Research Laboratory of the Bureau of Agricultural and Industrial Chemistry has received special mention by the Chairman of the Federal Division of the Blood Donor Campaign for its "consistently high performance in the blood donor campaign." The Laboratory has a total of 322 employees of which 24 donated blood during June to make a cumulative total of 291, the largest number of donations made by any Federal agency in the New Orleans area.

This is an enviable record and we might strive to do as well here in Washington.

HINTS FOR COMFORT

We all think we've been having very hot weather and wish we could do something about it. Of course we can't do a thing about the weather itself, but we can make ourselves more comfortable by following these simple rules issued by the U. S. Public Health Service. Increase the intake of fluids during hot weather. Fruits and vegetables are excellent sources of fluids. Fried foods and rich pastries should be curtailed. Drink 6-8 glasses of water per day. Fruit juices are palatable thirst quenchers. Avoid large amounts of sweetening.

Loose clothes, light in weight and color are most comfortable for hot weather. Cotton and linen aid most in avoiding the burning effect of the hot sun.

Avoid active physical exercise before or after meals. Swimming is one of the best hot weather sports as it doesn't overheat the body.

Observe regular hours of sleep. "To be comfortable during hot weather live sensibly, form regular habits of living, get plenty of rest, and above all try to acquire a cheerful and philosophical outlook on life.
