REPORT ON THE WHITE PINE BLISTER RUST WORK  
CARRIED ON IN THE TERRITORY UNDER THE  
SUPERVISION OF THE MISSOULA OFFICE  
FIELD SEASON 1918.

\*\*\*\*\*

The territory covered by the blister rust workers in the jurisdiction of the Missoula Office includes: the entire states of Montana and Idaho; all of Wyoming except Sweetwater County; the Black Hills Region of South Dakota; and Spokane and Pend Oreille Counties of the State of Washington.

Five F.A.C.E.M. assistants, including A. H. W. Povah, who had general supervision over the field work in this territory from the beginning of the season to September 1, and George A. Root from September 1 to the present time, were employed during the season just closed to inspect currants, gooseberries, and five-needle pines for the blister rust fungus (*Cronartium ribicola*).

~~CONFIDENTIAL~~

There is just no end to what I can do with this  
offensive political speech and its implications, and at  
least some of the people here want to hear about  
what it's got to do with politics and the economy.  
So I'm going to go ahead and do that now.  
I'm going to start by reading a few things from  
the speech that I think are particularly interesting.  
First off, there's a lot of talk about how the  
economy is doing, and how it's not doing so well.  
But I think that's just not true. In fact, I think  
the economy is actually doing pretty well right  
now, and I think that's because of all the hard work  
that people have been putting in to make it happen.  
And I think that's something that we should be  
proud of, and something that we should be  
thankful for.

(Applause and cheering continue)

PERSONNEL OF BLISTER HUST WORKERS.

In charge: Dr. James R. Weir

In charge of field work:

Dr. Alfred H. W. Povah

Mr. George A. Root

Field Assistants:

Mr. Norman W. Scherer

Mr. Ferdinand S. Wolpert

Mr. Joseph Yencso

DIVISION OF THE DISTRICT AMONG FIELD MEN.

On view of the shortage of men available for the work, it was found necessary to reduce the number of men to the minimum. Consequently, each man had a larger territory than under normal conditions. The districts given the field men will be referred to as sub-districts, in order to conform to last year's report. Following is a list of the sub-districts covered by the field assistants, together with their headquarters:

ANALISI DI UNA SAGGIAZIONE

titolo: "SAGGIO SULLA CULTURA  
INTERNAZIONALE DELLA CINA  
di G. M. T. P. (1950)"  
scritto da A. G. COOPER  
introd. da R. L. HARRIS  
pubblicato da E. N. S. (1950)  
risultato di un dibattito  
tra i due autori.

ANALISI DI UNA SAGGIAZIONE

nel saggio reso da Cooper si è voluto di  
mostrare che sono più numerosi che non si poteva  
suggerire. Dati che sono più numerosi i materiali esistenti  
soprattutto se si considerano le loro diverse sostanze  
e disponibilità, si intreccia di difficilezza per conve-  
nientemente suddividerli e quindi si opta per una  
sezione finale in cui si riportano gli articoli  
pubblicati nel corso della storia cinese.

Subdistrict One

This was partly covered by Field Assistant Joseph Yencso, whose headquarters was Great Falls, Montana, and by George A. Root, whose headquarters is Missoula, Montana. This subdistrict includes the entire state of Montana.

Subdistrict Two

Field Assistant Norman W. Scherer, whose headquarters were at Spokane, Washington, was in charge. This district includes the entire state of Idaho, and Pend Oreille and Spokane Counties in Washington. The latter county was covered by Assistant in Charge, George A. Root, who also covered a portion of Idaho in conjunction with Mr. Scherer. This state is still uncompleted.

Subdistrict Three

Field Assistant Ferdinand S. Wolpert, with headquarters at Sheridan, Wyoming, was in charge. This district includes the entire state of Wyoming, with the

### 2nd section

functionality of the Lernoo system can  
be increased by adding more features to the  
existing basic service, such as support of new and  
existing content formats and improved  
navigation facilities.

### 3rd section

decide whether a redesign of the Lernoo system will  
add to its functionality or whether to stay with the existing  
one, which has been working well enough so far.  
The redesign will affect the following areas of the Lernoo system:  
new content management system, new user interface  
and new navigation facilities. In addition, the Lernoo system  
will be able to handle a large number of users, both  
from different countries and from different educational  
institutions.

### 4th section

The proposed functionality includes the following:  
the ability to add new content, which can be categorized  
into different types of content and can be used for different  
purposes, such as teaching and learning, research and development.

exception of Sweetwater County; and the Black Hills Region of South Dakota. Mr. Wolpert was unable to complete the work in his district before leaving for Camp Dodge, Iowa on July 22. Dr. Weir also did some inspection work in this state, but at present it is far from being completely covered.

MANNER IN WHICH THE WORK WAS DONE.

The Month of May was spent by A.H.W. Povah with the assistance of Mr. Joseph Yencso, in sorting and filing by counties and towns the blue cards prepared by Mr. Stillinger in Oregon and Washington. These cards record the sales of currants, gooseberries, and five-needle pines in this district by the following firms:

Western Nurseries Covered by Blue Cards.

Albany Nurseries,	Albany, Oregon
Blackfoot Nurseries,	Blackfoot, Idaho
Capital City Nursery Co.,	Salem, Oregon
Columbia & Okanogan Nursery Co.,	Wenatchee, Washington
Idaho Nursery Co..	Weiser, Idaho.
Lewiston-Clarkston Nursery,	Clarkston, Washington
Milton Nursery Co.,	Milton, Oregon
Oregon Nursery Co.,	Oreenco, Oregon
Pacific Nursery Co.,	Portland, Oregon
Peterson & Sandahl,	Seattle, Washington
J.B.Pilkington,	Portland, Oregon

and not sufficient, and has suffered according to malignant  
and malignant effects from the war. A good deal is  
done, though much yet remains to be done in  
order to help and assist the people who have  
been so greatly injured by the war, and who  
have been treated with such a lack of care, and such a lack  
of interest.

### THE WAR AND THE ECONOMY

#### THE ECONOMIC POSITION OF THE COUNTRY

The situation of the country is one of great difficulty and  
danger, and it is not clear how long it will last.  
There is a great deal of uncertainty about the economy, and  
it is not clear whether the country will be able to sustain  
such a long period of uncertainty without some  
serious damage. It is not clear whether there is any chance

PUBLICITY WORK

Interest in the blister rust work was aroused among the people in the various districts, by newspaper articles in the local papers. These were written by the men in their respective districts. Posters and literature were also exhibited at the Interstate Fair, in Spokane.

MONTANA

Inasmuch as this data gave us only the sales from Western nurseries and it was desired to have as complete a record as possible, we went to Mr. A. L. Strausz,

1. **1100.1** **Collected** **in** **the** **U.S.A.** **in** **1900**

Montana State Horticulturist, to find out whether he had the desired data. From his records it was found that during the five and one half years from November 1911 to April 1917, over 100,000 currants and almost 80,000 gooseberries had been shipped into the state of Montana. Because of the fact that all the conifers were listed together, it was impossible to trace the shipments of five-needle pines into the state.

Another difficulty was encountered in the fact that no record was given of the ultimate consignees in the case of car-load shipments and lots consigned to agents to distribute. In instances such as these either the nurseries were asked to cooperate by furnishing the required data, or the information was sought from the forest pathologist in whose territory the nursery happened to be located.

All of the sales data obtained from the office of the State Horticulturist were recorded on cards which were then sorted and filed with the cards prepared by Mr. Stillinger. This gave a complete record of the state sales of currants and gooseberries, to which have been added lists of sales from some of the nurseries within the state. The following is believed to be a complete list

of the nurseries now operating in the state of Montana  
and their location:

Montana Nurseries.

Avoca Nursery Co.,	Butte, Mont.
Froid Nursery Co.,	Froid, Mont.
Hamilton Nursery Co.,	Hamilton, Mont.
Hare Nursery Co.,	Deerlodge, Mont.
Home Nursery Co.,	Billings, Mont.
Hopper's Greenhouse & Nursery,	Billings, Mont.
Interstate Nurseries,	Bridger, Mont.
Missoula Nursery Co.,	Butte, Mont.
Missoula Greenhouse & Nurs. Co.,	Missoula, Mont.
Page-Cärk Seed & Nurs. Co.,	Billings, Mont.
State Nursery Co.,	Helena, Mont.
Yellowstone Nursery (branch)	Rockvale, Mont.
Yellowstone Nursery,	Silesia, Mont.

Status of Montana Nurseries.

The Missoula Greenhouse and Nursery Co., of Missoula, Mont. grows but little of its nursery stock. From the incomplete record of invoices available, it was found that currants and gooseberries had been purchased: in 1908 from Jackson & Perkins Co., of Newark, N. J., who, in turn, procured the stock from Charles Detriche, Sr., Angers, France; in 1909, from Charles Detriche, Sr., Angers, France direct; and in 1909, 1910, and 1911 from the Mount Arbor Nurseries, Shenandoah, Iowal

political lines was

Philippe et autres, *op. cit.* p. 102. — *ibid.* p. 103. — *ibid.* p. 104. — *ibid.* p. 105.

The Missoula Nursery Co., of Butte, Mont. grows none of its stock. Invoices showed purchases of currants, and gooseberries as follows: in 1918 from the Freemont Office of the Mt. Arbor Nurseries, Shenandoah, Iowa; during the years 1915, 1916, and 1917 bush fruits were bought of the Missoula Greenhouse and Nursery Co., of Missoula.

The State Nursery Co., Helena, Mont., has a large seed and greenhouse trade and also a fairly extensive nursery business. They, however, grow little except greenhouse stuff, buying their seeds and nursery stock. Mr. Mills informed us that he had purchased currants and gooseberries from the following sources: Jewell Nursery Co., Lake City, Minn., Missoula Greenhouse & Nursery Co., and Storrs & Harrison Co., Painesville, Ohio. In view of the fact that diseased pines were found in the last-mentioned nursery in 1910, 1911, and 1916, it was thought that currants and gooseberries shipped from this nursery at that time might have been infected. Consequently, bush fruits from the State Nursery Co., Helena, Mont. have been considered as dangerous.

The Avoca Nursery Co., of Butte, Mont. is affiliated with the Tidewater Investment Co., of the same

city, and is chiefly concerned with the planting up of their real estate deals. Mr. W. Mc C. White informed us that the nursery had neither bought nor sold any currants, gooseberries, or five-needle pines.

The Hamilton Nursery Co., Hamilton, Mont., does not grow any of its nursery stock. At the present time the owner is engaged in another business and their sales are few. According to Field Assistant Joseph Yencso, who visited the nursery this summer, they had no currants, gooseberries, or five-needle pines in the nursery.

The King - Thurman Nursery Co., Kalispell, Mont., operated from 1910-1916. They grew only a small part of their nursery stock. The rest they obtained from the following nurseries: Stark Brothers Nursery and Orchard Co., Louisiana, Mo.; Jewell Nursery Co., Lake City, Minn.; Mount Arbor Nurseries, Shenandoah, Iowa; and Oregon Nursery Co., Crenco, Ore.

The Hopper's Greenhouse and Nursery Co., Billings, Mont., does mostly a greenhouse business, i. e., cut flowers, bedding plants, and garden sets (tomatoes, cabbages, peppers, etc.). The few currants and gooseberries which they have sold were purchased from Shenandoah Nurseries, Shenandoah, Iowa.

to my bottom, I have learned little of the who-  
le subject from books, and have often been in error  
about the best way to teach and improve my stu-  
dents. But now that I have had time to think  
and discuss, and to write down all the good and  
useful things I have learned, I hope to make  
myself useful to others in their efforts to improve  
the school system. I hope also to help in the  
education of both old and young, and to assist  
them in their efforts to better themselves.

to those lines which were given. After this was done  
the children had to make their own cards. They were  
given a box of colored paper and a box of colored  
pencils. They were told to draw a picture of what  
they wanted to say. They were also told to write  
what they wanted to say on the back of the card.

وَلِكُلِّ مُجْرِمٍ مُّنْهَىٰ حَيْثُ شَاءَ إِنَّ اللَّهَ عَزَّ ذِيْلَهُ  
وَجَلَّ ذِيْلَهُ لَا يَقْدِرُ بُشَّارٌ أَنْ يَفْعَلَ مِمَّا  
أَنْهَىٰ إِنَّ اللَّهَ عَزَّ ذِيْلَهُ لَا يَقْدِرُ بُشَّارٌ  
أَنْ يَفْعَلَ مِمَّا أَنْهَىٰ إِنَّ اللَّهَ عَزَّ ذِيْلَهُ  
لَا يَقْدِرُ بُشَّارٌ أَنْ يَفْعَلَ مِمَّا أَنْهَىٰ

The Stillwater Nurseries of Columbus, Mont., operated from 1909-1913, going out of business with the death of the manager, Mr. Chas. A. Teall, in 1913. The data on their sales were obtained from the lawyer who settled up the estate and he told us that he believed the nursery grew most of their stock. This, however, is probably not the case.

The Montana Nursery Co., Billings, Mont. was founded in 1906 and was one of the largest nurseries operating in the state, having made a \$55,000 delivery in 1912. Incomplete invoice records show 15,000 currants and 16,000 gooseberries were purchased from the Mount Arbor Nurseries, Shenandoah, Iowa. The nursery went out of business in 1913.

The Billings Nursery Co., of Billings, Mont. was started in 1913 by one of the men formerly connected with the Montana Nursery Co., (Mr. Tighe) and was operated until the death of Mr. Tighe in 1916. The business was not very extensive and they did not grow their own stock but obtained it from the Mount Arbor Nurseries, Shenandoah, Iowa and the Shenandoah Nurseries, Shenandoah, Iowa.

The Yellowstone Nursery at Silesia, Mont. was not visited by Mr. Fovah (because of entering military service). Mr. Strausz, State Horticulturist, gave the following information: The nursery was founded in 1910 and at the present time is about to close out the business, having only fruit trees left in the nursery. It is believed that they handle

very little home-grown stock, but the source is unknown, although it is practically certain Eastern stock was bought.

The Interstate Nursery, Bridger, Mont. was likewise not visited by Dr. Povah, but it is believed to be out of business. This will be verified, however, before the season of 1919.

The Home Nursery, Billings, Mont. was started in 1916. They do not grow much of their stock and have purchased currants and gooseberries from the Mount Arbor Nurseries, Shenandoah, Iowa and the Gurney Seed and Nursery Co., Yankton, S. Dakota.

The so-called Page Nursery Co., Billings, Mont. was started in 1910. They have grown practically nothing with the exception of shade trees. They have been merely agents for the following nurseries: from 1910-1916 for the Jewell Nursery Co., Lake City, Minn.; from 1917 to the spring of 1918 for the Gurney Seed and Nursery Co., Yankton, S. Dakota. Beginning this fall (1918) they are going to represent the Clinton Falls Nursery Co., Owatonna, Minn.

The Froid Nursery Co., Froid, Mont. was established in 1915 and is still doing a small business. It does not grow the currants and gooseberries which it sells but has bought them from the Rose Hill Nursery, Minneapolis, Minn.

In obtaining data on the sales of nursery stock  
by the nurseries within the state, the proprietor or manager

100-27828-20 062 003 25-11-11 2-340 11

To best to xerophagous and arid areas with little water and

was asked to cooperate by permitting us to go over his  
i  
nvoices and sales in order to record data on currants,  
gooseberries, and five-needle pines on the cards. In  
some cases, order books were available, but in others  
(the majority, in fact), it was necessary to go through  
the original orders. This slowed down the work consid-  
erably because of the poor chirography. Much credit  
must be given to the nurseries for their willingness to  
cooperate, for it would have been impossible to obtain  
complete data without their help.

Having thus completed the compilation and record-  
ing of data, there remained but the work of inspection,  
which Field Assistant Joseph Yencso began on June 19th.  
The account of this work will be found under the title  
"Resume of work in Subdistrict 1."

IDaho AND SPOKANE AND PEND OREILLE COUNTIES  
OF WASHINGTON

I. Idaho.

The problem of obtaining the required sales data  
in Idaho was much more difficult than in the case of Mon-  
tana. This was due to the fact that the records

and two of our officers were shot down by German  
aircraft. No other report of such an event has been received.  
The aircraft had no visible external markings, though  
reports of such aircraft have been issued, though none  
of them are yet known to us. (Some of which are given below)  
There was a report from Germany that the  
loss of aircraft was caused by a series of  
explosions which took place at the  
factory of Messerschmitt, and that the  
explosions were caused by the  
detonation of gunpowder which had been  
stored in the factory. This report was  
not confirmed by any other source, and it is  
not known whether or not the report is true.  
It is believed that the report is true.

### THE GERMAN AIR FORCE IN THE SKIES

BY RICHARD H. DAVIS

REVIEWER

and some bearing on the subject of raiding and  
the use of aircraft in war. The following are some of  
the most recent and interesting reports on the subject.

of the State and Entomologist are too meagre to be of any use; to quote from a letter of Field Assistant, N. W. Scherer, "My search shows conclusively that there are no records in the office to show what each shipment, inspected by the deputy inspectors, contained. Hence it will be utterly impossible to trace Ribes or Pinus shipments into the state from this office." About the only things that Mr. Scherer was able to get from the above source were: (1) an incomplete record of the firms that have shipped stock into the state; (2) meagre data on the nurseries now operating within the state; (3) - perhaps the most important of all - a promise of reformation which a few quotation from Mr. Scherer's letter of June 19 will explain.

"Mr. Graham ( State Entomologist) has agreed to the following suggestions made by me:

- (1) That he will cooperate in every way possible.
- . (2) That quarantine No. 8 (Blister Rust) be amended.
- (3) That card index records be kept of all shipments into the state.
- (4) That men with better education be secured as deputy inspectors."

The following list is believed to include all the nurseries now operating in the state of Idaho, although

or better, and (tachismotic) *and* ) first, or the

the exhibit of certified to sell without any  
restriction or use of the word "certified" was released into

it has not been verified, as in the case of Montana, by visits to each nursery. Mr. Scherer in the letter quoted above says: "There are practically no nurseries in the state that grow their own shruberry or other nursery stock. Most of them are jobbers and distributors". The notes after the nurseries in the following list are those of Mr. Scherer obtained from Mr. Graham.

Nurseries Now Operating in Idaho

Blackfoot Nurseries,

Blackfoot, Idaho

Caldwell Nurseries,  
Ships in a large amount  
of stock.

Caldwell, Idaho

Anton Diedrichsen,  
Grows ornamental stock &  
is very successful with it.

Payette, Idaho

C. H. Goan,  
Business in a small way -  
just about to close out.

Grangeville, Idaho

Idaho Nursery Co.,  
Jobbers - not licensed now.  
Ship in most of their stock  
from Washington & Oregon and distribute it.

Weiser, Idaho

Idaho State Nursery Co.,

Nampa, Idaho

Intermountain Nursery Co.,  
Operating on a small scale -  
ship in about 50% of stock.

Payette, Idaho

Kimberly Nursery Co.,  
Grow some stock.

Kimberly, Idaho

of, according to our edit and our purpose more than any other  
language because our language has a very large number of words  
and we can express our opinions in different ways. In English we  
have the verb "to think" which means to reflect over something  
and "think" itself has an added meaning to suppose. Now we  
cannot have such a direct effect of reflection and also cannot  
express our thoughts in English in such a simple and clear  
manner.

Because of the fact that, even with the incomplete data at hand, there were more inspection cards that Field Assistant Norman W. Scherer could cover in a single field season, it was determined to inspect what stock we had listed. This included sales from the Western nurseries (on blue

(1875-1915) Club, 1915. 1000 copies 2500 lire each copy.

self-growth and self-knowledge took us to search

Blot this off a sufficient time after each end, so as to allow  
time for the *in vivo* label to be removed. At present, immediate  
posterior access to the dorsal root ganglion of animals can only be made  
with the removal of myelin. This can be done by use

cards ) included in the first list of this report and sales made by Montana nurseries in Idaho. Mr. Scherer began inspecting in Pend Oreille County, Washington, about the third week in June. After completing this county he went into Boundary County, Idaho, working south, thence eventually completing Bonner and Mootenai Counties. After the departure of Mr. Scherer at this time (September 19) one of the writers, Mr. George A. Root, continued with the work in Idaho and completed Shoshone County.

III. Spokane and Pend Oreille Counties,  
Washington.

The sales of Pine and Ribes in this section of Subdistrict II are mostly from Western nurseries. A personal interview with Mr. M.L. Dean, Chief of the Division of Horticulture at Olympia, has not been possible, but a letter requesting nursery information was forwarded, and cooperation in this work was kindly offered.

The following list is believed to include the nurseries and agents operating in this district:

A.L.Burt,	Spokane, Wash.
Small nursery. Ships in stock when needed.	" "
Irmus and Klaffenbach	
Small nursery. Ships in good deal of stock.

Owing to the large number of cards for Spokane County, it was deemed advisable to inspect the most important ones, including those representing pine shipments. This was done in order that inspection might be made in other important districts.

#### WYOMING.

Conditions for securing data in Wyoming were found by Field Assistant Ferdinand S. Wolpert to be even worse than in Idaho. Moreover, there is no Blister Rust Quarantine. The following quotation from a letter of Mr. Wolpert's written June 10th, will explain the situation: "The state records are very meagre, giving me no available material other than the list of nurseries which are doing or have done business in the state. The board (State Board of Horticulture) here is in the hands of

analog to those to today's visual set of privo-

... etiam quod est secundum id est deinde. Nam etiam si utrum

never ed at JAIL. I am a member of the same club as you  
just myself on the credit committee, which at least gives  
me the right to work members, which is all I can do.  
I am not able to get any more info, but I am sending a telegram  
tonight to my wife, asking her to do the same thing.  
I will be surprised to find out what results she will have  
in this case. I am not able to go to see you, but I will try to  
get some time off.

Dr. Nelson completely, and, as he told me, he has time for it only when he forces himself to take time. As a result, the available data is practically nothing." At the time of writing this report a list of nurseries operating in the state of Wyoming was not available. A reply to a letter to Dr. Nelson of the State Board of Agriculture asking for this list, is expected at any time. All inspection cards on hand at the present time represent sales from outside nurseries.

In the hope of getting some data on the stock shipped into Wyoming, Mr. Wolpert wrote to the nurseries that had been shipping stock in and asked them to cooperate by sending him lists of all their Wyoming sales of currants, gooseberries and five-needle pines for the past seven years. It was as surprising as it was gratifying to note how many of the nurseries sent back the desired data.

The following list shows the nurseries that have done business in Wyoming and was communicated to Mr. Wolpert by Dr. Aven Nelson, Secretary of the Wyoming State Board of Horticulture.

RESUME OF WORK IN SUBDISTRICT I.

Field Assistant Joseph Yencso began the work of inspection in this district in Montana on June 10th, and continued until September 30th, at which time he was called

into military service. The writer, Mr. George A. Root, continued the field work left by Mr. Yencso, starting in on Lincoln County, but owing to illness was only able to devote three days to the work, - October 17, 18, and 19.

A total of 1,357 inspections have been made. These are divided among the following counties: Missoula, 421; Mineral, 48; Ravalli, 143; Sanders, 386; Flathead, 330; and Lincoln, 29. The following number of shipments were unable to be located in each county: Missoula, 131; Mineral, 5; Ravalli, 63; Sanders, 13; Flathead, 354; and Lincoln, 4, making a total of 580. Adding to this the number of actual inspections makes a total of 1, 937 inspection cards accounted for in this district.

In Missoula County inspections were made in 21 towns and villages, more than half of the inspections being confined to Missoula and Ronan; in Mineral in 9 towns, the number in each town being nearly equal; in Ravalli in 9 towns, one-third of the inspections being made in the towns of Hamilton and Stevensville; In Sanders in 19 towns, one-third being made in the towns of Camas and Dixon; in Flathead inspections were made in 22 towns, one-half being made in the towns of Kalispell and Polson; and in Lincoln County in 3 towns. The latter county is still incomplete.

the first time I have seen a white bird with such a long tail. It was a large bird, about 18 inches long, with a long, deeply forked tail. Its plumage was mostly white, with some black on the wings and tail. It had a long, hooked beak and a small crest on its head. The bird was perched on a branch of a tree, looking around it. It then flew away, flapping its wings rapidly. I heard it fly over my head and then it disappeared from view. I have never seen a bird like this before, and I am very interested in it.

RESUME OF WORK IN SUBDISTRICT II.

I. Idaho.

Field Assistant Norman W. Scherer began work at Boundary County, completing that county and also Bonner and Kootenai Counties. A few inspections of pine and Ribes were also made in Latah County. The writer, as previously mentioned, completed Shoshone County, starting work there September 24th.

A total of 821 inspections have been made, divided among the following counties: Boundary, 116; Bonner, 283; Kootenai, 293; Shoshone, 104; and Latah, 25. The following number of shipments were unable to be located in each case: Kootenai, 50; Boundary, 8; Bonner, 11; and Shoshone, 17. This makes a total of 76 unlocated cards, which, added to the list of inspected ones, brings the total to 897 cards accounted for in Idaho.

In Boundary County inspections were made in 11 towns or villages, more than one-half being made in Bonner's Ferry, and vicinity; in Bonner County in 30 localities, the number in each place being nearly equal; In Kootenai County in 32 localities, a little more than one-third of the inspections being made in Coeur d'Alene and vicinity; in

Shoshone in 11 towns or villages, one-fourth being confined to the City of Kellogg; and in Latah County inspections were made in Moscow only. This latter county is still incomplete, but these few inspections were made as they included shipments of Eastern white pine.

### II. Spokane and Pend Oreille Counties,

#### Washington.

Field Assistant Norman V. Scherer and one of the writers, George A. Root, made inspections in Pend Oreille and Spokane Counties, respectively. The number of inspections for this district is 178, divided as follows: Pend Oreille County, 128, and Spokane County, 50. In Pend Oreille one shipment was unable to be located, and in Spokane, 11. This total of 12, added to the above total of 128, brings the total number of cards accounted for up to 139.

In Pend Oreille County inspections were made in 16 towns, about one-third being made in New Port. In Spokane County inspections were made in 7 towns, 90% being made in the vicinity of Spokane. Pend Oreille County is completed, but a considerable amount of work still remains to be done in Spokane County. These have included, however, all known pine shipments.

RESCUME OF WORK IN SUBDISTRICT III.

Field Assistant Ferdinand Wolpert began inspecting in Wyoming on June 18, 1918. The work progressed rapidly until Mr. Wolpert, having been called to the colors, left for Camp Dodge, Iowa, on July 22. Dr. James R. Weir, while in Wyoming, later in the summer, did some further inspection of nursery shipments. A total of 184 inspections were made in Wyoming. These are divided among the counties as follows: Sheridan, 53; Park, 94; Weston, 8; Albany, 3; Crook, 6; Fremont, 12; Carbon, 6; Big Horn, 1; and Niobrara, 1. The following number of shipments were unable to be located; 5 in Sheridan; 1 in Fremont, and 1 in Big Horn, making a total of 7. The number of cards accounted for in Wyoming total 191.

In Sheridan County inspections were made in 2 towns, 90% being in Sheridan and vicinity; in Park inspections were made in 4 towns, 85% being in Powell; in Weston, 2 towns; in Carbon, 2; in Albany, 1; in Crook, 1; in Fremont, 1; in Big Horn, 1; and in Niobrara, 1. None of these counties are completed.

SUMMARY

With a decrease in the force of men which would ordinarily be required to cover the entire district, considering the large number of cards on hand, it was deemed best to cover as much of the area as possible within the Western white pine belt. It was hoped that the work might be completed as far south as the Clearwater River, as this would include pretty much the white pine area. As it now stands, the territory is completed as far south as Benewah County. A little more than one-half of the white pine area has been covered, together with certain parts of Wyoming.

(See blueprint and maps accompanying this report).

In Montana inspections were made over an area covering the entire portion of the Western Pine. As previously mentioned, 1, 937 inspection cards were traced in 83 towns in 6 counties. Very few of these represented white pine shipments.

In Idaho and Pend Oreille and Spokane Counties of Washington, inspections were made in the heart of the white pine area, and numbered 1, 036, covering 108 towns and localities in 7 counties. The largest number of white pine shipments were located in this subdistrict, the largest

## V v v v

individual shipments being at the University of Idaho at Moscow. These plantings originally comprised some 1,200 trees, but some of these have been shipped as orders to various places throughout Idaho and Washington.

In Wyoming inspections were made here and there in a general way. Inspections numbering 191 took place in 17 towns in 9 counties. Very few pine shipments were made into this state. Ribes and pine shipments traced in the entire district number 3, 164, divided among 208 towns and localities in 22 counties. The number of pines in the above inspected shipments is 1,585, and the approximate number of Ribes is 48, 650.

The Office at Missoula has in its files at the present time 8, 555 uninspected cards, distributed among 601 localities, in Subdistrict 1. Not over 12 of these represent Eastern Pine shipments.

In Sub-district 2 there are 5, 192 cards distributed among 312 localities. Here is found the largest number of cards representing white pine shipments, which number 15.

In Subdistrict 3, 708 cards are still uninspected distributed among 109 localities. Summing up the total for the entire district there are 14, 455 cards, distributed among 1,022 towns or localities. These cards represent a total

of approximately 581, 000 Ribes and 1,250 white pine.

At this point may be mentioned the fact that the area in which inspections have been made is apparently free from the rust, and while this does not conclusively prove that the entire district is free, it is hoped that such is the case. It should, however, relieve a certain amount of anxiety felt in regard to this Northwest section.

NOTES.

Conditions for the spread of the white pine blister rust are most favorable throughout the entire district. Wild Ribes of all varieties abound in the canyons, along brooks and roadsides. These were often inspected where found. Cultivated Ribes are distributed throughout the entire district. In Spokane County there are innumerable plantings, located in the orchard regions of the Spokane Valley. These plantings often consist of several hundred bushes, and from which a partial livelihood is gained from the sale of the fruit. There are perhaps more Ribes per square mile in this section than in any other in the entire district. The native white pine are quite a distance away from this locality. The land boom in and around Spokane several years ago was instru-

and the entire ODA, if any, would be used by Vietnamese to  
aid their forces in the conflict, and they will do so.  
But whatever aid the world gives to independent South Vietnam  
would be given to the South Vietnamese, and the most  
of those who helped us did so in joint military units and units  
to finance a common system, invented. But the U.S. does not  
object to giving aid to the South Vietnamese.

mental in bringing about large sales of nursery stock, both for orchards and landscape plantings, including Eastern white pine. Several small plantings were noted in the grounds of some residences. These proved to be from Eastern nurseries, and cards for those shipments were lacking. Such conditions may be true in other places, and sharp watch should be kept for such plantings, especially in residential sections.

It is not surprising that many of the nursery shipments as listed on the cards could not be located, for the population of this district, especially in Idaho and portions of Montana, is more fluctuating than perhaps any other state in the Union. Many places were abandoned, with the stock gone, either having been eaten by cattle or dead from neglect and drought. In the entire district there are 674 unlocated cards. As an illustration of conditions; the writer will cite the case as found in Polson in Flathead County, Montana. Of the 292 cards for that town, 69 were unable to be located; 85 had moved, and bushes nowhere to be seen; 60 were found to be dead, and 78 healthy. This is the largest percentage noted, but should not be applied to all sections, however.

The people as a whole, throughout the entire district, are ignorant of the disease and its devastating character. Educational campaigns should be pushed with vigor, through the use of posters, exhibition of diseased specimens,

and do good to others and friends, particularly in I think  
and a particular, probably especially when someone with  
a full career has it in his favor, really helps  
one's right to be successful, is enabled to humor  
such a foolishness, which is not always, unfortunately  
now quite so easily seen as one's ambitions  
and ideas of difference, especially now in view of today's  
and forces limit  
present day to what the ambition of all  
or, better, if we can think about it, better as the idea  
of our own if anything, certainly will go no further and  
make us appear as nothing more than a, at least to myself  
as well as everybody else, small, which did not make  
me want to elated by the real, actual results, who thought  
the six great soldiers within us all, although the soldier  
of ourselves to be established in an heroic behavior  
but, of course, of course, in each of us, the soldier  
of our own, which is, to say, the soldier of either  
side, outlined by him, which is or would be the  
other side, for which the question appears, see, if this is  
true of, which the other  
and others like them were, also, as also, an  
example, which is the case, and to master, this, point  
to, in this case, of course, as far as I could see,  
and this person, so mission, contact to the, and several

and the press. The various Fairs which are held each year throughout the Northwest would be ideal places for such exhibitions, together with the distribution of literature.

Though the disease has not appeared in the West, as far as is known, the matter of giving it wide publicity should receive as much attention here as in some of the Eastern states where it is strongly entrenched.

The horticultural inspectors, together with their deputies, should make themselves fully acquainted with the disease in all its forms. They should be required to make more thorough examinations and inspections of nursery stock, especially that transmitted through the mails by parcel post. Many such shipments are never inspected, owing to the absence in some cases of a deputy inspector in that particular region. The personnel of the deputy inspectors should be raised, as the present writer is informed that express agents very often act as inspectors. Field Assistant Norman W. Scherer has incorporated in his report for Idaho the following, which might be applicable to the other subdistricts: \*\*\*\* 2. That the County Agricultural Agents be deputized as Deputy Nursery Inspectors. This would mean educated and active men as inspectors, well distributed over the state. At present there are 15 Deputy Inspectors and 40 County Agricultural Agents. The money used at present for the Deputy Inspectors could profitably be used with County Agent funds. With this suggestion in operation all nursery

stock could be inspected free gratis to the parties consigned,-- doing entirely away with the present charge system for inspection, which is not relished by the receiving public.".

The men in the Forest Service should become more fully acquainted with the rust. In an interview with the Acting District Forester, Mr. Rutledge, he stated that the men are little acquainted with the disease. He offers his co-operation in this work, in any way that would be of advantage to the Plant Bureau. He further stated that Forest rangers, covering a great deal of ground as they do, might be of some service.

About 85% of the inspections made during this field season were from nurseries located in Oregon and Washington. The remaining uninspected cards on file represent shipments from Montana and Middle Western nurseries. Eastern nurseries, as well as all others not already asked, occurring on the Government blacklist, will be requested to send in records of sales of their stock into this district. However, it has been suggested that it might be more advantageous to have the Government men go direct to these various nurseries and obtain the required data. The time spent by the nurseries themselves in compiling lists

of sales for this work has been considerable, and a few have begrimed such time, though as a whole the co-operation has been very good.

Considering the small force of field men, which would not perhaps average more than two for the entire season, and the territory over which they were obliged to travel, it is the opinion of the writers that considerable work was accomplished. If the blister rust inspection is to proceed in the same way during the 1919 season, with the hope of inspecting all cards now on hand, a large force of experienced men will be required. There seems to be no other way than to continue along such lines, in order to prevent the blister rust from becoming seated in the Northwest.

well as no considerable time had been spent before the  
recovery of the body. It is evident that the body of even  
a man you need not wait

before you find it in your field of observation.

But if not at all, when a man is buried for 50 or  
60 years there will hardly ever be found his bones  
identifiable and even the clothing will be lost,  
and nothing can then remain but the position where he was  
buried. Hence still less chance there will be of possibility  
to recover him, and in such cases the consequence is often  
one of great trouble, difficulty and expense because people  
are often very anxious about the condition of their dead  
and the cost of work continually and heavily  
taxes them.
