THE BEAR HUNTER'S NOON DAY MEAL

# STEVENS

double hammerless guns operate smoothly and easily—they shoot strong—they shoot close. They stay **tight** because they are made with the greatest care and painstaking accuracy.

These are the features you get when you buy a Stevens Double Hammerless,

1. Coil Springs. No Missfires.
2. Compensating Locking Cross Bolt.
3. Top Lever and Bolt in One Piece.
4. Positive Automatic Safety.
5. Strong Cocking Leverage.
6. Easy to Open and Close.
7. Check Hook to Keep Barrels Tight.
8. Spring Fore-end Always Tight.

Stevens double guns list from \$15.00 to \$60.00. You get the best value for your money when you buy a Stevens. Send for our illustrated and descriptive Catalog No. 10 which describes in detail Stevens Doubles—Repeaters and Singles. This Catalog also contains valuable hints on shooting, the kind of ammunition to use, etc.

**J. STEVENS ARMS @ TOOL COMPANY**  
Main Street **Chicopee Falls, Mass.**

## ARE YOU A GUNNER?

*Do you love to follow your good dog over the fields in search of quail or chickens, or to struggle through swamp or along thick grown hillside, expecting to hear the roar of the ruffed grouse or the twitter of the fall woodcock? If so, you should have this new book.*

## AMERICAN GAME BIRD SHOOTING

By **GEORGE BIRD GRINNELL**

This companion volume to "American Duck Shooting" treats of the upland game which American sportsmen shoot over dogs—woodcock, snipe, all the quail, grouse and turkeys.

The first part of the volume is devoted to a description of the various species and their habits—the way in which they live their lives.

The second part of the book is devoted to upland shooting and treats of the methods by which all the upland birds are pursued and taken. The chapter "Aids to Shooting" describes the clothing, guns, and loads and dogs that the gunner may profitably use; while the last section of the book treats of the shooting of the future and the efforts to rear our native quail and grouse in domestication.

The volume is illustrated by colored plates of ruffed grouse and quail, and 48 full page portraits of different game birds and hunting scenes, with a number of cuts in the text.

*Cloth. About 575 pages. Price \$3.50, net. Postage 25 cents.*

This book is of inestimable value. It contains the genuine hunter-naturalist facts given in the most entertaining and interesting style.

**FOREST AND STREAM PUBLISHING CO., 127 Franklin St., NEW YORK CITY**

# THE OUTDOOR LIBRARY

THE following is a selected list of *Forest and Stream's* books which are most suited to the taste of men and women who are fond of outdoor life—Shooting, Fishing, Natural History, Camping, Canoeing, Yachting. A good book does not wear out, but continues to give pleasure.

Catalogue giving full list of books will be sent on application.

## American Duck Shooting.

By George Bird Grinnell. Cloth, 630 pages. With 58 portraits of North American Swans, Geese and Ducks, Plans of Boats and Batteries. Fifty Vignettes in the text, and a Chart of the topography of a duck's plumage. Price, \$3.50.

## American Game Bird Shooting.

By George Bird Grinnell. This companion volume to "American Duck Shooting" treats of the upland game which American sportsmen shoot over dogs—woodcock, snipe, all the quail, grouse and turkeys. The volume is illustrated by colored plates of ruffed grouse and quail, and 48 full-page portraits of different game birds and hunting scenes, with a number of cuts in the text. Cloth. About 575 pages. Price, \$3.50 net. Postage, 25 cents.

## My Sixty Years on the Plains, Trapping, Trading and Indian Fighting.

By W. T. Hamilton ("Bill" Hamilton). With 8 full-page illustrations by Chas. M. Russell. New York. Cloth. 223 pages. Price, \$1.50.

## American Big Game Hunting.

The Book of the Boone and Crockett Club. Editors: Theodore Roosevelt and George Bird Grinnell. Illustrated. Cloth, 345 pages. Price, \$2.50.

## Hunting in Many Lands.

The Book of the Boone and Crockett Club. Editors: Theodore Roosevelt and George Bird Grinnell. Vignette. Illustrated. Cloth, 448 pages. Price, \$2.50.

## Trail and Camp Fire.

The Book of the Boone and Crockett Club. Editors: George Bird Grinnell and Theodore Roosevelt. Illustrated. 353 pages. Price, \$2.50.

Like its predecessors, the present volume is devoted chiefly to the great game and the outdoor life of Northern America; yet it does not confine itself to any one land, though it is first of all a book about America, its game and its people.

## American Big Game in Its Haunts.

The Book of the Boone and Crockett Club for 1904. George Bird Grinnell, Editor. 490 pages and 46 full-page illustrations. Price, \$2.50.

This is the fourth, and by far the largest and handsomest of the Club's books. It opens with a sketch of Theodore Roosevelt, founder of the Boone and Crockett Club, and contains an extremely interesting article from his pen, descriptive of his visit to the Yellowstone Park in 1903. Other papers are on North American Big Game; Hunting in Alaska; The Kadiac Bear; Moose, Mountain Sheep; Game Refuges, and other big game topics.

## Camp Life in the Woods.

And the Tricks of Trapping and Trap Making. Containing hints on camp shelter, and all the tricks and bait receipts of the trapper, the use of the traps, with instructions for the capture of all fur-bearing animals. By W. Hamilton Gibson. Illustrated. Cloth, 360 pages. Price, \$1.00.

## Modern Training.

Handling and Kennel Management. By B. Waters. Illustrated. Cloth, 373 pages. Price, \$2.00.

This treatise is after the modern professional system of training. It combines the excellence of both the suasive and force systems of education, and contains an exhaustive description of the uses and abuses of the spike collar.

## Danvis Folks.

A continuation of "Uncle Lisha's Shop" and "Sam Lovel's Camps." By Rowland E. Robinson. 16mo. Price, \$1.25.

## Uncle Lisha's Outing.

A sequel to "Danvis Folks." By Rowland E. Robinson. Cloth. Price, \$1.25.

## A Hero of Ticonderoga.

By Rowland E. Robinson. Cloth, 187 pages. Portrait of author. Price, \$1.00.

## A Danvis Pioneer

A story of one of Ethan Allen's Green Mountain Boys. By Rowland E. Robinson. Cloth, 214 pages. Price, \$1.25.

## In the Louisiana Lowlands.

A sketch of plantation life, fishing and camping just after the Civil War; and other tales. By Fred Mather, author of "Men I Have Fished With," "Adirondack Fishes," and "Modern Pisciculture in Salt and Fresh Water." With portrait of the author. Cloth. Price, \$1.50.

## Forest Runes.

Poems by George W. Sears ("Nessmuk"). With art-type portrait and autobiographical sketch of the author. Cloth, 208 pages. Price, \$1.50.

## The Angler's Workshop, Rod Making for Beginners.

By Perry D. Frazer. Cloth, 180 pages. Four full-page illustrations, sixty working drawings. Postpaid, \$1.00.

A complete, simple and thoroughly up-to-date work for the guidance of the amateur rod-maker, carrying him from first principles through all phases of successful rod making. There is no theorizing or speculation. All terms are simple, and all kinds of rods and woods are treated of.

## Modern Pisciculture in Fresh and Salt Water.

By Fred Mather, author of "Men I Have Fished With," with a chapter on Whitefish Culture by Hon. Herschel Whitaker, and a chapter on the Pike-Perch by James Nevil. Illustrated. Price, \$2.00.

## My Angling Friends.

A second series of "Men I Have Fished With." By Fred Mather. Cloth, 369 pages, with 13 illustrations. Price, \$1.50.

## Rhymes of the Stream and Forest.

By Frank Merton Buckland. Cloth. Heavy laid paper. Sumptuously bound. Postpaid, \$1.25.

A charming collection of verse by an author who knows and loves nature well. A particularly pleasing gift for fishermen, closely simulating in form and ornamentation the standard fly-book.

## Jack the Young Ranchman;

Or a Boy's Adventures in the Rockies. By George Bird Grinnell. Illustrated. Cloth, 304 pages. Price, \$1.25.

## Jack Among the Indians;

Or a Boy's Summer on the Buffalo Plains. By George Bird Grinnell. Illustrated. Cloth, 301 pages. Price, \$1.25.

## Jack in the Rockies;

Or a Boy's Adventures with a Pack Train. By George Bird Grinnell. Illustrated. Cloth, 272 pages. Price, \$1.25.

## Jack the Young Canoeeman.

By George Bird Grinnell. Illustrated. 278 pages. Price, \$1.25.

## Jack the Young Trapper.

By George Bird Grinnell. Illustrated. Price, \$1.25.

## Jack the Young Explorer.

By George Bird Grinnell. Price, \$1.25.

## Men I have Fished With.

Sketches of character and incident with rod and gun from childhood to manhood; from the killing of little fishes and birds to a buffalo hunt. By Fred Mather. Illustrated. Price, \$1.50.

It was a happy thought that prompted Mr. Fred Mather to write of his fishing companions. The chapters were received with a warm welcome at the beginning and have been of sustained interest. The "Men I Have Fished With" was among the most popular series of papers ever presented to FOREST AND STREAM readers.

## Houseboats and Houseboating.

By Albert Bradlee Hunt. The book contains forty specially prepared articles by owners and designers of well-known houseboats, and is beautifully illustrated with nearly 200 line and half-tone reproductions of plans and exteriors and interiors. A most interesting chapter is devoted to houseboating in England. Extra heavy paper, buckram. The price is \$3.00 net. Postage, 34 cents.

## The Art of Shooting.

An illustrated treatise on the art of shooting. By Charles Lancaster. Illustrated. Cloth. Price, \$1.25.

## Gas Engines and Launches.

By Francis K. Grain. A few pages are devoted to launches in general, with some excellent advice to the prospective owner of a motor boat; but the author's attention is given chiefly to explaining the principles, working and practical handling of the marine motor for the amateur, who does not care to trouble his head with involved technical information. Cloth. Illustrated. 120 pages. Postpaid, \$1.25.

## How to Build a Launch from Plans.

By Charles G. Davis. A thoroughly practical guide for the amateur. Shorn of all blind technicalities, it considers displacement, good construction and faulty stability, setting up the keel, framing and planking, with careful explanations. Each step is followed up to the care and running of the gas engine. Cloth, 9 folding drawings, 8 full-page plates, 40 smaller diagrams, 170 pages. Postpaid, \$1.50.

## Fetch and Carry.

By B. Waters. Tells minutely of the methods by which a dog, young or old, willing or unwilling, may be taught to retrieve either by force or "natural" system. Cloth. Illustrated. 124 pages. Postpaid, \$1.00.

## Nursing vs. Dosing.

By S. T. Hammond. A most practical book for the dog fancier, based largely on Mr. Hammond's observation that dogs, and particularly house dogs, suffer from too much medicine. Contents—Nursing, Cleanliness, Diet, Other Foods, Kennel and Exercise, Common Ailments, Diarrhea, Convulsions, Epilepsy, Distemper, Eczema, Need of Proper Care, Stomach, Vermin, Ear, Mange, Nervous System, Colic, Worms. Cloth. Illustrated. 161 pages. Postpaid, \$1.00.

## Training vs. Breaking.

Or Practical Dog Training. By S. T. Hammond. The author tells how to bring out the wonderful intelligence of the dog by kindness, as opposed to force. A clear, explicit work, which will appeal to dog lovers. Contents—First Lessons, Charge, Canine Accomplishments, The Whistle, Quartering, Retrieving, In the Field, Working in Company, Raising Puppies, Training Pet Dogs, Conclusion. Cloth. Illustrated. Postpaid, \$1.00.

## Training the Hunting Dog for the Field and Field Trials.

By B. Waters. Probably the most comprehensive work on the subject written, covers every phase of training and field trial preparation with reasons. Kennel Management, Breeding, Kenneling, Points of Judging. It is a work well calculated to enable the amateur to become a successful breeder and trainer. Cloth. Illustrated. Postpaid, \$1.50.

## Woodcraft.

By Nessmuk. No better or more delightful book for the help and guidance of those who go into the wild for sport or recreation was ever written. No one ever knew the woods better than Nessmuk or succeeded in putting so much valuable information into the same compass. Camp equipment, camp making, the personal kit, camp fires, shelters, bedding, fishing, cooking, and a thousand and one kindred topics are considered. Beyond this, the book has a quaint charm all its own. Cloth. Illustrated. 160 pages. Postpaid, \$1.00.

## Log Cabins and Cottages.

By William S. Wicks. This book covers building for the woods from the simplest shelter to the most elaborate cottage, cabin or house, and their furnishing and fitting. The details and directions are at once simple and comprehensive, and the illustrations are numerous and illuminative. Cloth. Illustrated. 44 full-page plates and numerous text illustrations. Postpaid, \$1.50.

## My Friend the Partridge.

By S. T. Hammond. A delightful reminder of crisp autumnal days in the covers. It tells of sport with the noblest of game birds, the habits and habitat of the ruffed grouse, with just the right touch of reminiscence and personal experience. Cloth. Illustrated, 150 pages. Postpaid, \$1.00.

## Old Leviathan of Burnt Mountain Lake

By PAUL BRANDRETH

**S**PRING in the Adirondacks commences with the second week in May and ends with the first ten days in June. There is no slow unfolding of vegetation, no period of adolescence, no gradual persuasion of bud into leaf. The season is sharp and crisp and martial; and as if by magic the cracking joints of winter leap into the halcyon strength of youth.

Frequently when you visit the woods in early May, you will find them as bare and empty as late November, filled with big patches of snow and a winter lingering sense of nakedness. But less than two weeks later a delicate glow

favorite water, than up pops his friend, as hearty as the year before and as generous with his appetite. It is the old story that never grows stale, the old excitement that never falls lax, and always the thrill is the same, when this champion of our hopes gulps the proffered lure and is off with colors flying in the first rush of contest.

It came about one May morning that a trio of anglers set out on the trail which led to a certain wild lake in the Adirondacks. Laden with rods and fishing tackle, they trudged along, swallowing deep breaths of the bark-fragrant air, and listening to the drum-

As you near Burnt Mountain Lake the "carry" slides gently down hill into a spongy swamp and ultimately brings you to the bank of a smooth-flowing stream, which empties a few hundred yards below into the lake. Black alders bow over the water, a kingfisher rattles upstream as you approach, and constantly you hear the wind sighing among the feathery tamaracks overhead.

It was here, after a good fifty-minute tramp that the anglers arrived. A little back from the trail, pad-locked and turned bottom up on a spruce scaffolding, lay the guide boat that was to serve the day's expedition.

RUBE AND LEVIATHAN.

FISHERWOMAN, BEAU BRUMMEL AND RUBE.

of buff and apple green will creep along the mountain sides; the shores of lake and river will film with pollen dust, and the madrigal of the rose-breasted grosbeak soar rich and clear from the budding maples. Yet the very shortness of the season which plunges so abruptly from winter into summer lends it a new significance and enjoyment. The air savors of frosty vigor; the woods are open and sun-filled, and not a brook, or stream, or lake, but holds a ravenous clan of trout—big and little, lantern-jawed and diminutive—all hungry as bears and ready to devour the first morsel that comes along.

And even as the trout are rapacious, so are the fishermen. Indeed, their condition is mutual, for no sooner has the man made fast his leader and sent his flies flickering over some

ming of partridges echo dry and resonant through the forest.

The day was delicious. Pools and gulfs of sunlight lay between the open files of the gray-boled trees; the woods seemed literally to swim and expand in the scented heat of early spring, and the angler's spirits waxed gay and expectant.

When they had gone about a mile on the trail, Rube, who, under the load of a pack-basket, was bringing up the rear, called a sudden halt.

"Sugar," he murmured, "I've left that darn net behind agin."

"Isn't that the good one?" somebody asked, referring to the one he carried.

"No, it ain't," mused Rube; "but it's too late ter go back, so she'll hev ter do."

Rube unhitched his pack-basket and approached the boat. Then he paused, fumbling through his pockets.

"What's the matter?" asked "Beau Brummel," who was a red-hot fisherman and eager to be off.

"I've forgot the dum key," said Rube, peevishly.

"Well, what are we going to do," put in the "Fisherwoman," slapping furiously at a horde of black flies, gathering about her head.

Rube gazed thoughtfully at the ground.

"I suppose we'll hev ter cut the tree down," said he at last; and down it came accordingly, after much labor and unkindly language. The chain holding the pad-lock was slipped off and the boat carried down to the water's edge.

"For goodness sake, let's get out of here!"

THE FISHERWOMAN'S CATCH.

BEAU BRUMMEL FOLLOWED SUIT.

cried the "Fisherwoman," "these bugs are eating me up."

"They aint all they ought ter be, is they?" said Rube, smiling peacefully, and shaking several dozen from the labyrinths of his beard. "Well, I guess we're about ready," he added.

A moment later the boat slipped down stream, passed through the mouth of the inlet and glided out on the lake.

Years ago Burnt Mountain Lake was considered one of the most beautiful sheets of water to be found anywhere within a certain district of the North Woods. It was an ideal hunting, camping and fishing ground, an Arcadian spot, unscarred, uninhabited, undisturbed, with a splendid growth of timber stretching for miles around. But the day came when into these virgin acres a destroyer set his teeth, the ruthless fire monster, the most lamentable element against which the Adirondacks have to contend. A cone-shaped mountain standing at the southeast end of the lake was seared from base to summit till nothing remained save a pinnacle of naked pink rock; likewise a great section on the north shore was burned away, a desolated land of charred stumps being all that was left to face the water from this side. The ravages of flame, however, stopped here and the other shores escaped destruction. Nowadays, under the kind hand of nature, a profuse bloom of fire-weed helps to cover the unsightly ruins; here and there a living tree with its foliage brightens the mass of tumbled wreckage, and so it comes about that in spite of cruel scars, the scenery around the lake retains much of its former beauty, and all of its old wildness and solitude.

The sight of the broad sweeping waters and spring budding shores as they emerged from the mouth of the inlet, was good to the eyes of the three anglers. Little waves dashed boisterously against the boat's side and the brisk wind that hurried across the lake brought with it a delicate aroma of shad-berry and wild cherry blossoms. Altogether it was an ideal morning to tempt grisly lake trout from their haunts, for these indeed, waxing large and plentiful, and often attaining leviathan weight, were the kings of Burnt Mountain Lake.

For a while the anglers coasted along the north shore, under the shadow of the burnt

country. On the devastated slopes that reached above them the air literally rang with bird songs, and from among the debris of blasted trees, tumbled in appalling disorder to the brink of the lake, rose the piping of white-throats, the delicate minstrelly of warblers, the gurgling of tree swallows, and frequently the copious melody of a purple finch.

When they had trolled along here for perhaps a mile, Rube headed the boat out into the lake, and as they came within the radius of a shoal, the "Fisherwoman" hooked and landed a fair sized lake trout. Shortly afterward "Beau Brummel" followed suit, and brought in a golden-brown colleague to companion the first catch. With a silent smile, Rube shuffled the two under a moist covering of ferns, gazed approvingly on his rickety net, and sent the boat forward again with slow, even strokes.

Morning fell, and toward noon, with coats unbuttoned, the anglers basked in the benevolent warmth of the midday sun. High over the lake a big gull swept noiselessly to and fro, and at times a ripple of wild laughter was carried down on the breeze from a pair of loons bobbing like black specks on the squally waters near shore.

As one lake trout after another was brought to net, "Beau Brummel" and the "Fisherwoman" smiled on each other and blessed the ways of nature. About two o'clock, however, the "Fisherwoman" began to show signs of restlessness.

"I'm getting hungry. Isn't it about time for lunch?" She gazed toward shore and then at Rube.

"Well, I guess it is," said he, after a moment's pause, "but I just want ter take one more turn around the shoal before we go in."

"Whoa, back up, I'm on bottom," "Beau Brummel" interrupted, commencing to reel in hastily. Then his expression changed. "It's a fish!" he cried suddenly. "No it isn't—yes it is. I've got hold of a whale!"

So the battle commenced. At first the big trout bored steadily and held to bottom like a rock. Then, slowly, foot by foot, his captor was able to take in line and turn his nose toward the surface.

"Don't give him no slack, don't give him no slack!" cautioned Rube.

Scarcely had the words left his mouth when the reel gave a screech, "Beau Brummel" gasped, and away went the fish again.

"Sugar! but he means business," Rube whispered under his beard, at the same time letting the boat settle back quietly in the wind.

"He's breaking my arm," said "Beau Brummel" as the weight on the line held without relaxing. A moment later, however, the old laker apparently gave up the tug of war, and let himself be drawn up toward daylight. Inch by inch the line filled the reel. Then the "Fisherwoman" leaned forward excitedly.

"There he is!" she cried. "I see him—a regular shark!"

Out flopped an enormous tail, a sleek glistening body; then once again the trout sunk like a stone.

The next time he came up it was easy to see that the fight was nearly done. He rolled over close beside the boat, and his great bulk lay limp and inert on the surface of the water. "Beau Brummel" drew him nearer, still nearer, until Rube seized the net and slipped it under him. Here the history of the net commences in earnest.

Down went the big trout's head into the meshes, and Rube with a superhuman effort tried to heave him into the boat. But the fish was too heavy, and the three-quarters of his person hanging out of the net threatened to pull his head out, too. "Beau Brummel" ground his teeth.

"The gang's caught," he said.

Rube made a queer noise in his throat, and just then the trout slipped back in the water, pulling the mesh inside out.

"For goodness sake, hurry up and get him into the boat!" cried the "Fisherwoman," on whom the strain was taking effect.

With a rapid movement Rube shifted the net to his left hand, while with his right he seized the laker by the back of the neck. Desperately he tried to lift him from the water and fling him into the boat, but it was no use. Then suddenly, the old gladiator came to life. With a plunge like a wild horse he tore himself free; the gang holding his jaw in the net snapped like a piece of rotten twine, and with

(Continued on page 31.)

# Fragments of an Old Tale

By A. W. KETCHAM

SO much has been written of the history and passing of the wild pigeon (*Ectopistis macrura*), that one hesitates to add to the full measure of detail, and the excuse for offering the following is that it came from the lips of a fine old hunter who trapped pigeons for nearly thirty years. It was taken down much as he told it, which will also account for its rather fragmentary nature:

His name is Peter Mercereau, of French extraction; he is now eighty-two years old, born on Staten Island, but moved to a farm near Toledo, Ohio, then a settlement of perhaps 500, in 1835.

He first began to trap pigeons in 1857, on his father's farm, by the same method he always used, viz.: Two tall spring poles were driven into the ground about 235 feet apart, the net 35 by 15 feet being equidistant from these poles. When unsprung, the net was fifteen feet from a line between the two poles. It could be sprung from a bush house around one of the poles, and when sprung, came just up to the line between the two poles, its edges being weighted with lead. One or two stool pigeons were used, perched on a pole ten feet long, which could be raised or lowered by a string from the brush house. On the ground, sprinkled about as if feeding, were dead birds carefully set up to look life-like. They also

used a decoy bird tied by a string to its leg and blinded. This bird, fluttering at the end of its tether, would attract passing flocks nearer, then the stool bird was made to flutter, and if everything worked right, down would come the flock to the dead birds on the ground; but the stool bird was lowered as the flock came down. If he was raised after they had lit, they were off in an instant. When the birds had settled, the trap was sprung. If a very large catch, one man would rush at once to the net and hold it down, the weights not being sufficient. Sometimes the number was so great that they would lift the entire net clear off the ground and all escape, but mostly the rope would be pulled under the net, which had a slack of some eight or ten feet, and they would be secure.

The stool birds were wild birds reared in captivity, and they often lived for eight years. They had two or three dozen at all times. They varied greatly in usefulness; birds that would make a false move would spoil a catch. The stool birds were frequently killed by pigeon hawks, as their fluttering would attract the hawk. They kept a gun in the brush house to kill hawks.

In the early days the birds were killed and shipped in barrels to New York or Boston—the primitive way was to bite their necks, and later they used a pair of pliers. When the

birds were to be kept alive, the net was lifted to allow a man to creep under, then crates were passed to him and filled and passed out, emptying a net in a very short time. The price for dead birds was from \$1.50 to \$3 a dozen in New York or Boston. At one time they were as high as \$5—probably a war price. They were shipped without ice until April. The prices for live birds were about the same.

From one roost in Pennsylvania in his earlier trapping—in the 60's—they loaded as high as three express cars a day—150 barrels to the car. This seems ruthless destruction now, but then it only seemed a good haul, no thought being entertained of their ultimate destruction.

The trapping was mostly done in spring, usually in March. They trapped in the fall, but the birds were much more scattered, lacking the coherence of the breeding motive. In the vicinity of Toledo was a very favorable place, as the birds seldom crossed the lake, unless the weather was very favorable. They mostly came around the end of the lake on their way to the nesting places in Michigan. They kept in touch with the movements of the birds by telegraph and followed them sometimes from Pennsylvania to Wisconsin. At first they would nest sometimes in several of the States at the same time and probably also in

QUAIL FEEDING IN WINTER.

Canada, but later they became more concentrated—probably the beginning of the end. When they first came in the spring they established a roost, but the nesting place was never where the roost was. They moved a day or two before the nesting began—in a mass. Mr. Mercereau speaks of being at Lansing, Mich., at the time of such a movement—when the sky was obscured for half an hour by the solid mass of the flight.

They wintered in Tennessee, Kentucky and Georgia, and probably in other of the Southern States. Their nesting places were from one to ten miles square. The eggs were supported by a scant platform of sticks, and only one in a nest. He says he never found a nest with two eggs, but has heard of them as occurring very rarely. There were sometimes a hundred nests in a tree.

On one occasion only—in Allegheny county, Pennsylvania, in the 60's—he gathered squabs for the New York market. The birds were nesting in the mountains, a hard day's journey with a horse. They carried ice, and on the way up caught a fine lot of brook trout with a string and a bent pin. The birds were nesting on about 1,000 acres, largely in wild cherry trees. The method of gathering the squabs was to chop down the trees. There was a tribe of Indians there gathering the squabs and smoking and drying them. They

had an enormous quantity. Brook trout and squab sounds well for a wilderness lunch. He objected to gathering the squabs, on the ground that it was too destructive.

When asked what became of the squabs when the old birds were trapped, he said the squabs were fed by other birds and they did not suffer. During the nesting, he said, the males left to feed at sunrise, returning from nine to eleven o'clock, when the females went, and birds were returning far into the night. They caught nothing but males until about 10 A. M., then nothing but females. The largest haul he remembers was about 100 dozen. Sometimes when the net was sprung and they were holding it down, the pigeons would still pour down on the outside of the net.

He trapped here five years before following the birds, and then for twenty-two consecutive springs in New York, Pennsylvania, Ohio, Michigan, Indiana, Wisconsin, Minnesota, Missouri, Indian Territory and Arkansas. While trapping in Indian Territory they were 100 miles from a railroad. The birds were all shipped alive, hauled 100 miles by horses and then to New York, and there was comparatively little loss. They were fed soaked corn.

In the neighborhood of a nesting place there was a constant roaring sound continuing far into the night, so that a half mile away it

was difficult to sleep. In the fall they were very destructive to newly planted wheat—the flock would roll over and over, looking like a large cylinder, leaving scarcely a grain.

They nested sometimes in Virginia, and there they caught young birds in April. At one time in Pennsylvania he trapped when there was three feet of snow on the ground. Many birds froze on the nests. They fed in the low valleys. He said they were very fond of salt, and his best trapping was done on old deer licks. Beech nuts and acorns were their natural food, and when feeding in the woods they would roar in a vast moving cylinder. His last trapping was done in Arkansas, and his theory is that they went to South America; if so, they have hidden themselves well.

Trapping was expensive and not particularly lucrative, but one can easily understand it was a "calling" in the intimate and literal sense. When the spring came and one first heard the sibilant murmur of the rushing wings, one knew it was the imperative voice of the gods calling to the vast valleys and the purple hills—it was invitation and command. The writer can recall the thrill that came with the first flock in March, and the legions that followed. Alas! the vast cohorts clad in purple and gold are "one with Nineveh and Tyre," and the giant diapason of the millions of glittering wings is silent forever.

## Blue Ridge Mountain Rifle Shooting

By FRANK W. BICKNELL

WHEN the corn is gathered and the women and children begin to pull galax with which to draw on the country stores for "rations" and other family necessities, the mountain rifleman gets out his old hog rifle, or deer rifle, and begins to practice for the matches that are about to begin. These contests form one of the chief sporting events of

the year, and perhaps the only real contests of skill among the mountaineers. With all their fondness for hunting, the average mountaineer is not a crack shot these days, probably because he gets so little practice. It is only very recently that he has had a gun that could be relied upon beyond a very short range, and even now he hunts bear with hounds and small

single barrel shotguns. The hounds are expected to hold the bear till the hunters can catch up and dispatch the pestered animal with their guns. The woods are usually thick, the hills and hollows many and the bear cannot be seen at a distance.

The old-fashioned rifle match is an inheritance from the "good old days" when there were deer to be hunted in these mountains, and good shooting was required to get them. Then there were no stock laws to restrain the liberty of the new settlers to fatten their hogs and cattle in the great unclaimed forests. No one pretended to feed his hogs, he just turned them out on the mountain and they got fat on the nuts, roots and numerous rich fodder plants that were to be found at all seasons of the year. Usually the little pigs were caught and in some rude way marked to show ownership, though really that didn't matter much. When a man wanted a hog to kill, he went out into the woods, tried to find his own, and if he couldn't, just took any he could find, and with his trusty rifle laid him low. The animals were perfectly wild, and it was very seldom that anyone ever attempted to catch one that was full grown, and as for an old boar, he was something to be avoided by the boldest native, particularly if the man was accompanied by a dog. The wild hogs were the natural enemies of dogs and the dogs were thoroughly afraid of the hogs; and if attacked, would run to their masters for protection, when the enraged razorback was quite as willing to tear up the man as the dog.

ON THE CREST OF THE GREAT CONTINENTAL DIVIDE.

Many a bloody battle of this kind has occurred in the mountains, in the days of sparse settlement, before the war and even since. In some of the more remote sections, as over in the Black Mountains, there are still wild hogs to be dressed.

A mountain surveyor told me a tale of only four or five years ago that was thrilling a-plenty, and that hardly seems possible in this country to-day, but it was well verified and undoubtedly true. In a word, he was attacked alone in the mountains by a drove of wild hogs with nothing to defend himself but his Jacob's staff with its iron prod for driving into the ground, on which to set his surveying compass. He backed up against a large chestnut tree, and being a strong man, succeeded in stunning some of the worst of his vicious besiegers, upon which others began to tear these helpless animals to pieces, and the man escaped. Nowadays the old hog rifles are used only for shooting matches, as more powerful but lighter breechloading rifles have taken their places. But for accuracy they are hard to beat.

The rifles are, of course, muzzleloaders, and the barrels are from 40 to 48 inches long. The caliber is about .35, I should say, and the custom is to put a good strong load of black powder behind the rag-wrapped round bullet. The report is something tremendous, almost equal to an old bored-out musket. Some of the riflemen have learned, however, that a lighter charge of powder contributes to accuracy at short range. The guns are top-heavy, some of them, more or less burned out at the breech, are heavily rifled, and with big charges of quick-burning powder, they kick and often spoil the aim.

The shooters get together by previous arrangement, about nine o'clock in the morning, and as they are very deliberate in their aiming and getting in position, the shooting takes all day. There will be from fifteen to thirty contestants, and the most interesting feature of the event to the outsider is the target system. Each man has his own private target, being a rough board about three feet long, on which is a piece of white paper with a notch at the top, or a diamond-shaped hole, perhaps. Mr. Rifleman aims at this hole, or notch, or some particular corner of it known only to himself, or at a circle target above the notch, as shown in the illustration. The real target that he is trying to hit, and that counts, is under the paper, out of sight. Mr. Rifleman has practiced with his gun until he knows just how much the sights are off, and where he must aim in order to hit the target. Before the match he has measured this out with great care and accuracy on the board, marking the spot at which he must aim, and covering the real target so it will not confuse him. All this instead of adjusting the sights so they will be true to aim. Bad luck is in store for the unknowing person who undertakes to shoot one of these long rifles without previously acquiring its particular secret.

The distance is forty yards, and the shooters lie prone on the ground, resting the gun on a rail or other solid support. Many of them have a piece of tin bent around the barrel over the sight, to enable them to see the sights better in the sunlight. Some of the knowing ones are apt to have serious difficulty with something getting stuck in their gun barrels

PACK TRAIN COMING OUT OF CARIBOU BARRENS.

Photograph by George B. Clark.

on very bright afternoons, so that they are never able to do their shooting till the sun gets down out of their way. In the meanwhile the less experienced bang away and get quite excited dividing up the prizes according to the records so far made, when Old Mr. Rifleman goes to work and noses them all out. One of these is shown at the extreme right of the group, his ramrod hopelessly stuck until about 4 P. M., when the obstruction gave way and he laid down and shot away first and second money, to the disgust of those who had already parceled it out among themselves.

Usually the prizes are the parts of a beef or a big hog. There will be five "choices," as they are called. The best shot of the day gets first choice, which in the case of a beef consists of the choice of the hindquarters. The second best shot gets the other hindquarter. The third and fourth get the forequarters, and the fifth gets the hide and tallow. It often happens that one man gets two prizes, for it is not the average shooting of each individual that counts, but each individual shot. Rarely—and this is about the proudest moment of the shooter's life—one man will be able to "drive the critter away on its four feet," meaning that he has the best five shots of the day and no other man has a look in. Sometimes the crack shot will be barred from getting more than one "choice," else the others would not go in. If no animal can be secured, flour and other provisions from a nearby store, but rarely money, may be substituted as prizes. The entrance fee is usually "eight shots for a dollar." Years ago matches for money were the regular thing and there were more matches. Now there is not so much leisure.

In those "good old days" everybody used to "hole up," as they called it, when cold weather came, live in ease and careless comfort till spring called them forth. More than to make a little wood from day to day, go to mill

and do a little hunting, they had nothing to do and did not think of doing anything but sit by the fire and visit among themselves, and live on the fat of the land in their simple, contented way. Now more pressure is left to work and "get things" that were not thought necessary before.

But in spite of these new demands upon time and strength, the mountaineer is fond of his sport and will have it. He hunts bear and 'coon and 'possum, and rabbits and squirrels, has his rifle shoots, his corn shuckin's, his fishing and his taste of "blockade" applejack, takes life rather easily and not too seriously, and is advancing and improving and living much better than he used to do in those same "good old days," when he lived in a log cabin and lighted it with a pine torch.

#### Substitute for Rubber from Sea Fish.

A REPORT coming from Amsterdam tells of a factory established at Ymulden, at the mouth of the North Sea Canal in Holland, to produce a substitute for rubber. It is said that the company operating the factory has succeeded in producing a substance having the qualities of rubber and some special advantages over the genuine. While the process is a secret, the principal ingredient is said to be fresh sea fish, which are brought to Ymulden in vast quantities by the Dutch fishing fleets.

According to report, 15 to 16 per cent. of natural rubber is added to the fish and the result is a substance as flexible and elastic as rubber, but much cheaper—about as 1.25 to 8 in price—compared with real rubber. The low price of this product will be caused partly by the by-products which are possible, for it is said that much albumen will be made from the fish and that half of the factory is arranged for the manufacture of fertilizer.—Chicago Tribune.

# NATURAL HISTORY

## African Expedition of the American Museum of Natural History.

BY W. S. RAINSFORD.

BEFORE leaving the United States as leader of this expedition, the editors of *FOREST AND STREAM* asked me to send to that paper any notes I might make as I went along, even though the nature of the case caused them to be disjointed. I comply with this request, because it has seemed to me that the field of the American Museum's present expedition—British East Africa—is one of great natural interest, not to the sportsman or naturalist only, but to that larger class who watch the development of Colonial life and Colonial adventure with the eyes of men who have taken part, or would like to take part in the great game.

Four years ago I had ridden from Londiani

Station to Sergoit Rock, a landmark known to most East Africans, and which was now to be the practical starting point for my expedition. Four years ago the trail was bad, when there was any trail. And dense forest paths and some treacherous bog land made the porter's work during much of the year difficult. Now I find a fine road for wagon traffic, almost completed. The change illustrates fairly what is taking place throughout the Protectorate. A most interesting problem is here indeed being worked out, in terms of human life and endurance. Can the Englishman live, and breed, and make a home squarely under the equator?

I think I am right in saying that only in Quito have an European people succeeded in doing this without great loss of life and energy. Quito is about 8,000 feet above the sea—if I remember right—and the Protectorate, or the better, richer part of it, ranges from 5,000 to

8,000 feet above. Some, without any hesitation, declare themselves ready to answer the great question in the affirmative now. In my judgment, years must pass before the answer can be given.

Four years ago in the country I rode through, between Londiani and Sergoit, the farms were very few; one or two near the Uganda Railroad, and one large land and timber concession that had done nothing to develop its holdings. Now I found farms the whole way along and the land taken up, but comparatively little in actual occupation.

The country is one mighty ridge, almost seventy miles across, whose highest green wave rises to 9,000 feet above the sea. From this height fall to either side great grassy folds of land, belted here and there by bands of splendid dense forest, where cedar and wild olive trees are matted together by tropic, under-

SWAHILI GUNBEARER AND WATERBUCK, BRITISH EAST AFRICA.

growth and tangle impenetrable. The soil is rich, the country well watered, and admirably fitted for occupancy; but here the mistake of the Colony has full sway—the mistake of non-occupancy. Holdings of sometimes as much as one hundred thousand of acres owned by absentees, who, seated far away, presumably pay the half penny an acre yearly rent, for which they secured their long lease and do nothing for the country.

Nor is this true of the large holdings, or syndicate holdings only. It is true of the small (sic) farmer of 2,500 acres or more. Then and there, at intervals of several miles, you see ground broken, a tiny farm building, a belt of flourishing trees, a band of sheep or cattle. But as for the larger number of granted farms not a furrow has been turned, not a penny spent. And thus it comes about that absentees who do nothing to improve the value of the land are gaining greatly by the hard pioneering work of those who are developing the country, while they pay nothing, practically, for what they gain.

This state of things, one would think, must soon become apparent to the powers that be. And as no young colony could possibly stand in more need of money than does this, the government will supply themselves with funds, and at the same time promote the advancement of the Protectorate by insisting that settlement be bona fide; that the settler settle, or pay some one else to do improvements for him, or failing that, surrender the land. At present a comparative few, working hard and taking many risks to health and fortune, are rapidly pushing up land values for an absent many who are speculating on these rising land values. A tax on unimproved land would bring this state of things to an end.

Any reasonable man acquainted with the changes and chances that beset the youth of a colony, more especially an African colony, will be prepared to approve a policy that gives liberally to the "pioneer." His path to success is difficult enough in all conscience. But here the pioneer period is over—the land wants developing. It cannot be developed so long as absentees are permitted, as now they are, to lock up tens of thousands of acres on which nothing whatever has been done—thousands of the very choicest acres—while really bona fide settlers are demanding farms in vain, or have to satisfy themselves with land of very inferior quality.

The development of the colony depends actually on the success of the young settler in securing the aid of the native. Of all questions none is perhaps more important than this one of native labor.

To an outsider like myself, the East African native seems, taking him all in all, an extraordinarily docile creature. And when you consider that he has never worked for a white man, never done anything but cultivate, or have his wife cultivate his little stamba; that no white settler pretends to speak his language; that the medium of communication between the two is Swahili, which the settler speaks most imperfectly and which the native only understands and talks imperfectly, if at all, it surely is not surprising that difficulties arise.

There are those who deny the good qualities of the various native tribes (for workers in the Protectorate must be drawn from many

tribes); those who have only blame for them. But I have satisfied myself that they are almost always young men, who know nothing of other indigenous races, and have had no experience of native labor in other lands. Give the East African a little time to fit himself to the utterly new conditions that the white man's coming forces on him, and it seems certain he will be found ready and willing to do his part, and it is a great part in developing the wonderful capacities of the land. Most of the settlers are young, and they are not always patient.

In the mean time, while land policy and native labor policy are haltingly declaring themselves, who can help admiring the men, most of them in the vigor of youth, who are staking their all—all their small fortunes and their young health—in order to win a modest competence.

Here on these uplands of equatorial Africa you find them. Some few wasters, of course, you may pick out. Some who hang round Nairobi, depending on remittance from home that only do them harm when they come; but far more are seldom seen in that demoralizing little town.

They have set their faces hard to win a living from the rich pasture lands of the higher country, or are superintending anxiously the growth of sisal, rubber, or coffee plantations on lower lands nearer the sea, or the great lakes. The unknown, the unexpected, must for years still threaten every new venture of the industry. May good luck attend them. If they make money, none has better deserved it. The risks they face are many. The rewards awaiting them if they succeed are modest indeed. Taking them all in all—and I have wandered far among them for almost two years—they do honor to the race they own.

## The Wild Duck Family.

### The Teal; Its Haunts and Habits.

BY W. J. MURRAY.

THIS is one of the smallest and at the same time one of the most beautiful members of the freshwater duck family, of which there are numerous varieties distributed over Europe, Asia, Africa and both North and South America and even as far as the Falkland Islands.

The teal very much resembles the common river duck (although not more than half its size) not only in its plumage, but in its habits and mode of life, frequenting lakes, swamps, marshes and rivers; feeding on frogs, small lizards, mollusks, water insects and vegetable matter, etc. In such surroundings as here described the teal makes her nest in which she generally deposits about a dozen eggs of a light greenish blue color, and as she hatches them she sits unobserved among the reeds, surrounded with withered grass or rushes, which together with some of her own brown soft feathers forms her nest. The teal when undisturbed feeds in the day time, but otherwise at night only.

\* The European green-winged teal (*Anas crecca*) is widely distributed all over Europe and Asia, including India, where during the cold season they are captured in great numbers and kept alive in "tealeries" for use in the ensuing summer months. This teal visits Northern

Africa in winter, but is seldom to be found in the Eastern United States.

The blue-winged teal (*Anas discors*) is plentiful from the Atlantic coast to the Rocky Mountains. The male bird has the head and neck a blackish lead color darkest on the crown, a white crescent on the front of the eye and the under parts white spotted with brown. The female is a dullish brown streaked with buff. In both sexes there are sky blue wing coverts.

The cinnamon teal (*Anas cyanoptera*) is a South American duck, strictly speaking, but it is to be found in the Southwestern States of America and ranges from the Columbus River to Chile, Argentine and as far as the Falkland Islands. It goes as far north as Oregon and eastward to Illinois. It varies from the blue-winged teal in having a chestnut or cinnamon-colored head and neck, but it resembles it in having blue wing coverts.

The green-winged teal (*Anas carolinense*), which is a very fine bird, is quite common in North America. It is almost the same as the common teal of the same designation, frequenting Southern Europe.

All teals seem to prefer a temperate, but cool climate, and being migratory in their habits they manage to adjust themselves to the changes of temperature by going to the tropics for the winter, and to Northern countries for the summer. When in the United States they are timid and quiet, and for the most part nocturnal in their habits.

In Europe and especially in the British Isles there is probably no game bird more highly prized not only for the sport it affords the fowler, but also on account of its excellent table qualities and the beauty of its plumage.

While the female presents the usual inconspicuous mottled plumage of her sex (in most other species), the male is one of the handsomest of his kind. His deep chestnut-colored head and throat are diversified on both sides by a line of buff which, springing from the gape, runs upward to the eye in front of which is formed a fork, one prong passing hindward and up and the other downward, inclosing a dark lustrous green patch and both coalescing in the feathers of the back part of the head and nape. The back and sides of the body appear to be of a dullish gray. The breast is of a pale salmon color. The tail coverts and underneath are a velvety black, while those at the side are of a pale orange color. Altogether the teal drake (or mallard, as it is often called) is a bird of exceptional beauty and interest.

The teal is fairly plentiful in the marshy lakes and bogs of Ireland, where considerable numbers of them breed every year. During the early part of the winter they frequent the reeds and rush-grown shores of the lakes where they are not easy to approach, and having plenty of food they need not come out into the open danger for foraging purposes. When frost sets in, however, they become somewhat tamer and less wary, and they take to the running streams, selecting those with plenty of reeds and bull-rushes on their banks. Here they conceal themselves closely while they are feeding, and sometimes the sportsman comes on them unawares and "bags" a few in this way, but the surviving birds soon take wing for a more distant and retired feeding ground. When teal leave the lakes for the running streams in time of frost they

often go singly, or in pairs only, but when on the lakes and in marshy swamps they go in flocks (or as it is called "teams") numbering anywhere from three to six or occasionally more.

Most members of the duck family, if living much on the water, especially near the sea coast, are liable to have a fishy flavor when cooked, but this is not so with the teal whose flesh is very delicate and savory, almost as much so as a snipe or woodcock, but just the least flavor of duck is present, and none of the "fish."

In this respect the teal has a considerable advantage over the widgeon, and indeed over all the duck family in the delicacy of its flavor.

### Note on the Star-Nosed Mole.

ALTHOUGH the star-nosed mole is quite a common mammal, very few people know anything about it. City dwellers never see it, and even to those who live in the country it is almost unknown and seen only occasionally when a night hunting cat brings to the house an individual that she has caught, but does not devour because of its unpleasant odor and—presumably—taste. Long-tailed, and with the curiously star-shaped tip of the nose, it is an odd animal.

Last spring Francis H. Allen made some interesting, if brief, observations on this species and published them in a recent number of *Science*. He says:

On April 20 of this year I discovered a star-nosed mole (*Condylura cristata* (Linn.) Desmarest) entering a half rotten willow stump at the edge of a little pond in the woods at West Roxbury, Mass. The crevice it had entered proved to be a cul-de-sac, and after watching for some little time its eager efforts to escape by burrowing out, I easily captured it by seizing the tip of the tail between thumb and forefinger. I dropped it on the path close by where it at once burrowed below the surface of the humus and progressed with some speed there, its progress being indicated by a lengthening ridge of earth. Catching it again, I carried it

home, wriggling, and placed it in a wire cage with a wooden floor. It was very active, but owing, I suppose, to the position of the fore paws, which of course were fixed with palm outward, it could not get over the ground very rapidly. In the cage it kept going the rounds, poking its nose between the wires in an effort to escape. I dug some earthworms and placed them one by one in the cage. Apparently the mole's power of scent was nearly or quite as weak as its eyesight, for it paid no attention to the worms unless they were dropped directly in the path it pursued about the edge of the cage. When it actually ran its nose into a worm, however, it ate with astonishing greediness, and in a curiously piggish way, with a constant shaking of the head and shuffling the worm into its mouth with the help of the backs of its "hands," which it moved in unison. It devoured about ten worms before its appetite appeared to flag, but one worm, a very large fat one, it abandoned after cutting it into three pieces by transverse bites. Perhaps this worm was uncomfortably large for its mouth and gullet, for it afterward ate one or two smaller ones. Little or no chewing took place apparently, and the worm always disappeared down the animal's throat in a very short time. I heard no noise of the teeth in eating, such as Audubon and Bachman mention in describing the feeding of the common mole. A saucer of water put inside the cage was not noticed for some time, but finally the mole put its nose into it and appeared to drink with the same continual motion of the head that it used in eating. It tipped the saucer up a little and spilled some of the water, which it then seemed to drink off the board in a way that resembled sponging out the bottom of a boat. It continued the same operation on the dry part of the board, as if it could not tell where the water ended except by feeling. It struck me as a creature of very small intelligence. Its eagerness to escape was perhaps due less to fear than to a desire to get below the surface of the ground and to a habit of perpetual motion that seemed to possess it. I use the word "eagerness" advisedly, for that seemed to be the dominant mental attitude of the little animal. There was nothing frantic or nervous about its actions, simply eagerness to enjoy life, liberty and the pursuit of earthworms.

### Black Foxes.

HALIFAX, N. S., Nov. 8.—*Editor Forest and Stream*: In your issue of Nov. 2 in an article on "Rearing Fur-Bearing Animals," Raleigh Raines states that "some foxes have been sold for fabulous prices, bringing in many cases from \$2,000 to \$3,000."

If Mr. Raines can buy up any black foxes at those prices, he has a good opportunity to make a few thousands of the needful easily.

Fox farming has been carried on for at least a quarter of a century on Prince Edward Island, one of the Maritime Provinces of Canada. To-day there must be at least one hundred fox "ranches" on the island, a ranch containing from one to twenty or more pairs of foxes. One rancher—the pioneer in the business—has become a millionaire through what his neighbors called a crazy scheme in the beginning, but he worked away quietly, raising them for fur only

LITTLE GRAY FELLOW SCENTS WINTER.

at first, and was content to let the "wiseacres" scoff while he was becoming rich.

Now as to prices. The minimum figure that a pair of black pups, male and female, can be got for to-day is \$10,000, and they must be spoken for and part paid for a year ahead. It is reported that one pair, the female being guaranteed to be with pup, changed hands last winter at the really fabulous price of \$28,000. To my knowledge \$15,000 was paid recently for a pair. Of course these prices are for breeding purposes only, though it is claimed foxes at \$10,000 are a good investment for fur raising alone. A pelt from a fox that died through accident this year brought £410, or \$1,995.30 in the London fur market.

One of these ranches was recently formed into a stock company, being capitalized at \$600,000. The ranch has only twenty pairs of black foxes, the seller guaranteeing, however, an increase of not less than fifty young foxes to July 1, 1913. This figure brings the price of the twenty pair to nearly \$30,000 a pair, and the promoters claim that not a drop of Adams ale or a drop of the briny liquid that flows around this fox-mad island has leaked into the scheme.

W. H. STARRATT.

### New Publications.

CAMPING IN THE WINTER WOODS. By E. R. Gregor. Harper Bros., \$1.50 net.

On the fly of the cover of this book is a little notice reading "How to open a book." It goes on to say that you must lay the book back downward on a table or smooth surface. While this applies to a great many books, it should never have been printed in connection with "Camping in the Winter Woods," for once the boy starts to read the 380 pages contained in this book, he will not lay it down until he has reached the tracks of bruin on his way into the cave to hibernate, at the bottom of page 380. The book is so various in its chapter titles, and so interesting, as it leads from one episode to another, that when you buy it for your boy it will be like a through trip ticket on an express. He won't stop until he gets to the end. It relates to the experience of two boys who, at the suggestion of their father and under the guidance of "Old Ben," a famous Maine woods guide, spend a winter camping in the Maine woods. While the book is fiction, there is no chapter in it that is not probable.

WINTER IN THE YELLOWSTONE.

# GAME BAG AND GUN

## Massachusetts F. & G. P. Association.

BOSTON, Mass., Dec. 27.—*Editor Forest and Stream:* At the conference of Massachusetts sportsmen in the Tremont Building, Boston, on Dec. 12, fourteen associations were represented. From the State association there were present several of its officers besides President S. D. Charles, who was chosen chairman of the meeting. Commissioner George H. Graham and four others represented the Springfield Fish and Game Association. Deputy Warden I. O. Converse and former representative F. O. Hardy appeared for the Fitchburg Sportsman's Club; Bradford S. Turpin represented the Brunswick Fur Club, and the New England Fox Hunters' Club sent C. J. Prouty. B. Preston Clark, who represented the Pine Island Club, is a son of the late Benjamin Cutler Clark, of Boston, for several years the popular president of the State association.

The other clubs were the Hampshire County, the Eastern Massachusetts, Massachusetts Gunners' Association, the Middleboro Fish and Game Protective Association, the Hudson Sportsman's Association, South Shore Fox Hunters' Club and the Greenfield Sportsman's Club, whose president, H. E. Ward, acted as secretary.

The members present voted unanimously in favor of the portion of the first topic which relates to the licensing of cats, and Messrs. Frank Murphy, Wm. Minot, Jr., and Geo. B. Clark were appointed a committee to prepare a bill. The second portion relating to the restraint of self-hunting dogs was referred to Messrs. Clark, Mason and Prouty to present such a bill as they deem proper.

No. 4 was next considered and a vote was passed that the present bag limit on ruffed grouse, quail, woodcock and black ducks should remain as at present.

On No. 3 a committee was appointed to draft a bill prohibiting all unnaturalized persons from carrying firearms for hunting.

No. 2. As a committee to draw a bill permitting the killing of cock pheasants, Messrs. Wm. C. Adams, Geo. M. Poland and John B. Smith were appointed.

No. 5. To restrict the use of "live decoys." Majority vote opposed.

No. 6. Voted that it is the opinion of this convention that the fish and game commissioners should see that publicity be given to all violations of the fish and game laws, and that monthly the commissioners should issue a statement reporting on the work of the commission for the period next preceding to be published in the newspapers or otherwise.

No. 7. Changes in deer laws. A committee was appointed to consider and report such a bill as they consider desirable.

### NEW MEASURES.

That the Fish and Game Commission be authorized to close a town or a section of the State

against hunting birds protected by law. Committee appointed to draft a bill.

Committee named to act with reference to codifying the game laws. Another committee to request the fish and game commissioners to confer with those of other States to secure reciprocal laws in regard to foreign licenses.

Dr. G. W. Field and Geo. H. Garfield, the other fish and game commissioners, were present throughout the proceedings.

HENRY H. KIMBALL,

Secretary Massachusetts F. and G. P. A.

## Present Day Needs in Game Conservation.

BY GOLDEN GATE.

A SERIES of misleading articles on game conservation, recently appeared in one of the San Francisco daily papers, the object of these being to create an opposition to a measure that will

SITTING FOR HIS PICTURE.

probably come before the State Legislature this year designed to make it unlawful for game to be offered for sale. In these articles assertions were made to the effect that in Europe, where game is sold, deer are plentiful, and game is no nearer extinction than was the case a century ago. The California Fish and Game Commission has prepared a statement in answer to these articles for the benefit of the hunters of the State, which clearly sets for present conditions, this being in part as follows:

Little need be said about the great slaughter of game that has gone on throughout the United States. Everyone who knows anything about game conditions in the country is aware that many varieties of game have become practically extinct, and that where formerly game was plentiful, there is now a scarcity. Here in California the game is disappearing as it has in various

other States, and if the present rate of decrease continues, it will be but a few years when our State will be absolutely barren of game.

In order not to deplete the supply and still allow the people a reasonable number of hunting days during the year, it will be necessary to lessen the number of a species that may be killed in one day, and to shorten the season during which the species may be lawfully taken.

It is true that the game belongs to the people of the State, but it is likewise true that it is the sportsmen of the State who pay for its protection. The Fish and Game Commission does not receive one cent of its support from the general tax levy, nor any appropriation from the State Legislature. Its general revenue is derived solely from the sale of hunting and fishing licenses, and from fines imposed for violation of the fish and game laws.

Unlicensed hunting is permitted in but thirteen States in the Union, and the privilege is confined to residents only. In but one State, Florida, is it extended to include non-residents.

There are none who would approve of placing a bounty on game animals, yet allowing game to be offered for sale amounts practically to the same thing. It puts a price on the head of each quail, duck, deer or whatever game is in season, and is an incentive to those so inclined to hunt for the open market. The market hunter is not a producer; he is the reaper of a crop that should not be offered for sale. In the experience of the California Game Commission and every other State Game Commission, the market hunter is one of the chief game destroyers throughout the country. It was the hide hunter that killed off the buffalo; the aigrette hunter has almost exterminated the white heron; the market quail hunter has reduced the number of quail in our own State to almost the vanishing point, and unless prevented it will be the market duck hunter that decimates the ducks to such an extent that they can no longer be classed as game. More than 95 per cent. of the market hunters do not stop at the bag limit, thereby violating a law that is one of the most important, as well as the most difficult of enforcement.

The game laws should be so drawn that allowance is made for the killing of the surplus without encroaching upon the necessary breeding supply; in other words, the season and bag limit should be made consistent with the breeding capacity of the game. In some foreign countries the ownership of game is vested in the owner of the land on which the game abounds. Scotland, for example, has no deer law, but the deer are given protection by the owners of the forests in which the deer are found.

There are killed in Scotland every year nearly 7,000 deer. The forests in which deer are to be found cover something less than 2,000,000 acres, while in California, with its area of 158,000 square miles, of which perhaps one-half or about 48,000,000 acres, is suited to deer, less than 10,000 deer were killed last year. Is it not possible to develop game in our own State to

permit the taking of a bag limit that will more nearly approach the numbers killed in European countries in which game has been shot for hundreds of years?

Last year, throughout the United States, there were killed probably 25,000,000 ducks. Allowing for a moderate increase of five birds to the pair, this means that there will be nearly 100,000,000 less birds to come back this fall than there would have been had there been no shooting last season. How long will the supply last at this rate? In California at least 1,000,000 birds were killed. Over one-third of these were used in the various markets of the State. Thus estimating the same rate of increase of five birds to the pair, we have approximately 1,000,000 less ducks this year than would have been the case had the sale of ducks not been allowed.

Other conditions must also be taken into account. The number of hunters is increasing from 2 to 5 per cent. each year. Facilities for getting to what were formerly inaccessible places have increased, it now being possible for a man with an automobile to go one hundred miles or more from a railroad in a few hours' time. Game country, in which a gun was never heard a few years ago, is now overrun with hunters. Ranchers are crowding into all parts of the State, and the breeding grounds of the game are thus becoming less and less. Guns have been perfected until it is possible to fire five shots into a flock of birds almost before they are aware of the presence of the hunter.

Is it any wonder that the game is diminishing in numbers? The wonder is that there is any left.

larval condition he is secreted under a stone at the bottom of a lake, where he exists for about a year, and then rises to the surface a full-blown May fly, in the month of May. During the larval period he is known as the "stone bait"; and is used as a lure for trout and other fish, with considerable success.

The sport and enjoyment obtainable in dapping for trout with the May fly on these Westmeath lakes is "rich and rare"; and it may be truthfully said that to those lovers of the "gentle art" who can afford the time and expense involved in a visit to these lakes when the May fly is up, would amply justify a trip for the fishing, even though one were to go all the way across the Atlantic for this purpose. Such would be the effect that, like Oliver Twist, the delighted angler would be pretty sure, before long, to "call for more"!

The fishing on these lakes is free to every respectable visitor, and there is no payment for license required by the Inland Revenue authorities, except for salmon.

## Trout Fishing in Ireland.

### "Dapping" with the May-Fly on the Westmeath Lakes.

THERE are four important trout lakes in, or bordering on, the county Westmeath, viz., Belvedere, Owle, Derryvarra and Sheelin. Strange to say, they are pretty much the same size—about seven by four miles each in extent. Their characteristics are similar in almost every particular save one, and this exception is in the case of Derryvarra, one portion of which is peaty or boggy; all the others are more or less sandy bottomed and have clear and bright spring waters, including the greater part of Derryvarra, the trout in which, notwithstanding the peaty portion, are, as a rule, of excellent quality.

These four lakes are situated within seven or eight miles of each other, and all four are about this distance from the important town of Mullingar, which is one of the chief railroad centers of Ireland.

The trout in these lakes are of the finest quality imaginable. They grow quickly, and in a day's fishing thirty or forty pounds to a rod is frequently secured. It is comparatively seldom that any fish under two pounds rises to the fly—more likely two and a half to three pounds.

The condition of the fish is exceptionally good, and for table purposes their flavor is fully equal to that of the finest salmon—only more delicate. The color of their flesh is a deep reddish pink—almost maroon; and between its layers is a cream-colored curds similar to that of a good fresh lobster. The flesh is so hard and firm, that when taken out of the fish-kettle and dished, it falls to pieces on the dish.

A striking peculiarity of these trout is their shortness as compared with their thickness. Thus a fish a foot long would weigh two and a half to three pounds—and this proportion holds good in all sizes.

In appearance the trout is strongly marked with large light purple spots on a brownish back, and gray, slightly silvered, on the sides

and belly; but there are scarcely any red spots to be seen on the skin.

Of all the members of the European lake trout (*Salmo fario*) family, the Westmeath variety has no superior as a gamey fish, especially during the time the May fly is on the water, which is usually the latter ten days of May and the first ten days of June.

During this period they are very greedy for the fly, and rise to it with great avidity and sprightliness. They give a great deal of play and are sport to the last. One has got to be sure that the fish is played out before the landing-net is applied, as these trout have a knack of getting a "second wind" at the moment when they seem to be exhausted; then they make a final desperate plunge, which sometimes breaks either the tackle or their hold, and in this way make their escape.

The mode of May-fly fishing, which is called dapping, is as follows: The fisherman with rod, line, reel, casting-line and hook, launches his boat on the windward side of the lake. Some wind, sufficient to raise a "curl" on the water, is absolutely necessary. Having put the natural May fly (*Ephemera*) on his hook, he holds his rod so as to allow the fly to dangle on the surface of the water, and his boat to drift quietly right across the lake. This avoids any noise, and at the same time makes it easy to maintain a position for holding the fly on the surface of the water. When the boat reaches the lea side of the lake, it is rowed back again, and this process is repeated as often as required during the time the fishing lasts.

It is a pity that the May fly's term of aerial existence is so short. He has only a few hours, into which has to be crowded the chief events of his life's history; his birth, his growth, his courtship, his marriage and his death (not to speak of minor details)—truly a Herculean task for a poor May fly. Whatever the opinion may be as to whether this particular life is a "merry" one or not, there can be no manner of doubt that it is "short"!

This refers to his life as a winged insect, which, of course, is his perfected form. In his

## How Much Does a Fish Shrink?

HAVANA, Cuba, Dec. 11.—*Editor Forest and Stream:* Your very delightful Christmas number has just been received in this distressful country, and is being read with the usual interest, but we have been perfectly flabbergasted by the article on "How Much Does a Fish Shrink?" and our local experience in this matter makes us inclined to qualify you as a "nature faker."

I have in my possession a photograph of a countryman of yours holding by arms length at the end of a line a microscopic red snapper with a look on his (the fisherman's) countenance giving a good illustration of a scientist trying to discover the Mighty Atom, and I can vouch that, according to his own statement (and he ought to know) that red snapper instead of shrinking had increased the following day to exactly 7 pounds 2 ounces. This happened three years ago, and heaven only knows to what proportions it may have increased now.

Another instance of the same: Six of us went out a few weeks ago and caught a swordfish weighing about forty pounds. The following day (after this leviathan had been cut up and eaten) it weighed anything from 240 pounds 3½ ounces to a ton, according to the imagination of the individual relating the catch and the presumable credulity of the listener.

In the face of these established facts we must come to the conclusion that your waste paper basket must have been mislaid or your lynx eye out of focus when you allowed said article to appear in your columns.

Wishing you a Merry Christmas and continued prosperity for the New Year, I remain,  
C. R.

## How Long Will a Fish Live Out of Water?

GLOBE, Ariz., Dec. 12.—*Editor Forest and Stream:* The correspondence in recent issues of FOREST AND STREAM as to how long fish can remain out of water, has so interested me that I am prompted to give you some facts concerning my own experience in this line.

Near my home in the East were several swamps, caused by the surface waters collecting in basin-like depressions in the limestone country

rock. During high water in the spring, small fish from the St. Lawrence could sometimes ascend the little streams and ditches and gain access to these swampy tracts which, at this season, resembled fair-sized ponds. Here these wandering fish would spawn, and each pond would have its quota of small pike, chub, suckers and shiners. By far the most plentiful, however, were the "black minnows," a mottled dark and light brown fish which, so far as I know, never attained a length of more than six inches, nor were they ever found in the clear waters of the St. Lawrence, evidently not having their origin in that source. They were strong, hardy fellows, and for that reason much in demand for use as bait. In outline they somewhat resembled a trout, and kept in an aquarium showed "game" characteristics to a certain extent, refusing to feed on anything that was not alive. A living fly thrown upon the water would be taken with a wicked rush, much as a bass or trout would have taken it. A dead fly would, however, be ignored. As the season advanced and the rains became less frequent, the hot sun would gradually dry up these ponds until finally there remained nothing but a few mud holes in the deepest parts. Here all the minnows would gather, and as the August sun sucked up the little remaining water, these holes would become evil smelling places, swarming with fish and insect life. Then we boys would reap our harvest and gather the minnows in large quantities for future use.

One day when, preparatory to going fishing, I was dipping minnows from the barrel in which we kept them, the town fire bell commenced ringing, and dropping the net with its collection of minnows as I thought into the barrel, I ran to the fire. Fifteen hours later I found the net (which by the way was made from the arm of an undershirt, the top being strung on a loop of heavy wire and the bottom closed by tying a string around it) had not fallen back into the water as I supposed, but had remained hanging, with only about one-half inch of the extreme end below the string that closed it, submerged. This, however, had sufficed to keep the whole quite damp, and on looking inside I found the black minnows were alive, though the shiners, chub and suckers were all dead. This started me experimenting to see just how long these fish could live out of water, and I found that by carefully wrapping them loosely in a damp cloth and imbedding the package in wet moss, the black minnows could be kept out of water for about twenty-four hours without seeming to affect their vitality in the least, though in every case all the shiners, chub and suckers with them died. Wrapping some in cloth and moss, and putting the whole in a perforated tin box, I sent them from Montreal to Toronto, where the black minnows arrived alive, the shiners were dead.

I now believe that, as the ponds dried up and the other minnows died by hundreds, the black minnows worked down into the mud and remained alive until the fall rains gave them relief. This theory is strengthened by the fact that there was one hole, deeper than those in the swamp, which had no surface connection whatever with the river by which the minnows could at any time come or go, and in this place these minnows could be found until the surface dried up, and again as soon as the fall rains had softened the mud and filled the basin to the depth of a foot or so.

I have known these minnows to live in a rusty tin boiler from September until the middle of February without any food or attention whatever, and with the water actually red with rust.

Perhaps some of your readers have a knowledge of this minnow and can give me its name or something of its life history.

L. O. HOWARD.

## Life History of the Common Eel

(*Anguilla vulgaris*)

### A Study in Zoology.

THERE is probably no member of the zoological class of fishes more familiar to the public than the common eel, so far at least as its general appearance goes, but it is quite different with its habits and modes of living, many of which are still only partially or imperfectly understood, notwithstanding that the eel has been studied with much interest by naturalists and others since the time of Aristotle over 2,200 years ago.

Like birds, all fishes are liable to be migratory more or less at times, but some move at stated periods, and with great regularity. Among these latter must be included the common eel which, although primarily a fresh water fish, spends the later portion of its existence in the salt water.

The eel is without ventral fins, and has the dorsal confluent with the anal fin around the extremity of the tail. The skin is very smooth and exceedingly slippery, a quality which has, from time immemorial, been associated with the eel family so as to become proverbial. This slipperiness is due to a natural and constant exudation of slimy matter through their skin which greatly facilitate their movements through mud, weeds, drains and narrow passages.

Although not visible on the surface, there are present small scales embedded in the skin, but these are now of no use whatever, having become atrophied from long disuse, and have passed into a rudimentary condition.

The eel, because of its habit of going to the sea to spawn, is styled in zoology *catadromous*, which habit is the exact reverse of the habits of the salmon and trout, which are described as *anadromous*.

The natural impulse to make for the sea at the approach of the spawning season is so strong in the eel that if barred by any obstacle on its annual run, it is said that it will leave the water and make a detour over rocks, meadows and marshy grounds, in order to gain its way to some river or stream, so as to insure its reaching the sea somehow.

If it should happen that eels fail to get away from their confined fresh water abode and thus become land-locked, they have been known to spawn there for a time, but eventually it is said that they become sterile.

As the eel is mainly a fresh water fish, it is only natural that it should, as it does, spend most of its life in lakes, rivers and ponds in Europe and America, chiefly within the temperate zones.

The eel is exceedingly voracious and is practically omnivorous. Although free swimmers when necessary, they spend most of their time in the mud and burrow there, and in the soft banks of the rivers and lakes. For the purpose of feeding they frequently appear at the mouth

of their burrows, and greedily devour worms, insects, dead fish and other animal matter and refuse carried down by the passing currents. Being nocturnal in their habits, the eels feed mostly at night. Although ordinarily the length of an adult eel is from two and a half to three feet, they grow occasionally to the length of four or five feet. The female is usually larger than the male of the same age.

Although much prejudice seems to have always existed against the eel, a fact which is probably due to its snake-like appearance, it is nevertheless regarded as a very important article of food both in this country and in Europe, and its flesh is highly prized because of its tenderness and its savory qualities.

Once every year, usually toward the end of October, the eels seem to be impelled by some mysterious impulse to quit their natural fresh water habitat, and to make for the sea in vast numbers. With one accord and simultaneously the whole eel population (of spawning capacity) of the lakes, rivers and ponds, start on what is called a "run" toward the sea. This unanimous migration takes place invariably at night, and the darkest night is usually selected for the operation.

These runs are the fisherman's opportunity, and enormous catches of the fish are made on such occasions by means of eel weirs and various kinds of traps set along the river routes. Not only are such catches usually very large, but the fish are certain to be in the finest condition coming up to the spawning period.

For some obscure reason the eels will only spawn in the salt water, and it is evidently for this purpose alone that the annual visit to the sea is made. After spawning, the fate of the parent eel is still a matter of much difference of opinion and uncertainty even among those who have some claim to be regarded as authorities on the subject. Certain it is that the best opinion seems to be that the vast majority of eels never again return to the fresh water after spawning takes place. Some authorities say they die in the sea, but if so there surely ought to be some evidence of the fact apparent, but none has been forthcoming. What would seem to be the most likely explanation is this: When spawning is over, no doubt the eels find themselves at the disadvantage of being placed in a new and to them strange environment for which they are but ill adapted, and hence they soon become an easy prey to voracious and predatory marine fishes, such as sharks, rays, dogfish, etc., and are likely to be soon devoured by them, a fact which would account for the complete disappearance of the eel after reaching the sea.

After the lapse of about a year the young or larval eel instinctively makes for the estuaries, the mouths of rivers and streams, and worms its way through moss-covered stones and works clear over the highest waterfalls, including Niagara, and continues its course till it covers the furthest reaches of the rivers and streams of the country, getting into the lakes, ponds and marshy places wherever they can manage to find a suitable place to take up their settled abode. In this way all the fresh water of the country becomes restocked with eels, which in turn repeat, again and again, the parental history, and thus is the eel population of the fresh waters constantly renewed and maintained from year to year.

127 Franklin Street, New York.

**CORRESPONDENCE**—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

**SUBSCRIPTIONS:** \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

**ADVERTISEMENTS:** Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

### THE OBJECT OF THIS JOURNAL

will be to studiously promote a healthful interest in outdoor recreation, and to cultivate a refined taste for natural objects.

—FOREST AND STREAM, Aug. 14, 1873.

### OUR COMPACT WITH THE NEW YEAR.

THE "little fellow" is here. What shall we do for him? And by the same token, what will he do for us?

We agree to give him the best sportsman's weekly possible, and in return he will give us an audience with what few of the best sportsmen we do not already serve.

Enough said. It is a bargain.

### RAISING GAME FOR MARKET.

OUR estimable and well-meaning confrere, the Game Breeder, "still insists he sees a ghost" in our attitude on matters relating to game breeding on private lands. With persuasive persistence our friend asks: "Should game be sold alive by breeders for propagation?" Our answer to this question is emphatically, "Yes!" Further, the Game Breeder yearns for our opinion as to whether "game properly tagged should be sold dead for food." To this we should say that game raised by private individuals, so labeled, with necessary proof to support the labels, should be marketable at any time. We believe in a long open season on all game, and can think of nothing that would afford us greater pleasure—for we ourselves love to hunt—than to see those who enjoy shooting wild game indulging their pleasure all year around, excepting during breeding seasons. However, were everyone honest, we would have no need for locksmiths, for they would prosper better as ditch diggers, nor would game laws be necessary. Every shooter would kill a fair bag, feed birds in winter, and shoot only during reasonable periods. Unfortunately the time is not now when everyone who carries a gun may be trusted to use it honestly. When game is abundant, as it has prospect of being, thanks to the revenue from hunters' licenses,

private game stocking, game refuges and the sterling efforts of John B. Burnham and the American Game Protective and Propagation Association, then shall we shout from the rooftops for longer open seasons, sale of privately reared game at all time, and a general opening of the laws that now must be drawn tight to keep the game hog and market hunter from reducing the game supply in the woods, fields and forests to the game barrenness of a city block. Before making the editor's cross, that indicates to the printer the end of the story, we want to thank our kindly neighbor for lifting from us the stigma of littleness. We love our neighbors as ourselves, and wish all our outdoor contemporaries a most prosperous New Year, knowing that each adds its mite to the joy of living, and produces competition, which after all keeps us all on edge for personal and public betterment. There is room for us all, but not at the top, where we insist on staying.

### RIGHTS OF THE FARMER.

SYRACUSE, N. Y., Nov. 14.—*Editor Forest and Stream:* I hope the sporting papers of this country will take the right attitude in the matter of trespass and posting farms, with a view to bringing farmer and sportsman together.

There is no question but that many farmers have just cause for complaint, and the sporting papers ought to call upon all those who enjoy a day afield to do their utmost to cultivate a kindly feeling between farmer and sportsman.

The State, as a whole, is doing considerable in the way of stocking coverts and streams, and it is hardly a fair proposition, after this has been done, to keep the inhabitants of villages and cities from enjoying the sport by "boarding" these places after game has become plentiful.

Possibly some day a law will be enacted which will do away with the "No trespassing—No hunting" sign, except in the immediate vicinity of farm buildings, and perhaps a contribution of fifty cents or one dollar from each hunter directly to the farmer to compensate for any possible damage of fences or other property in hunting upon his grounds will form a satisfactory solution of the problem. Some middle course of this kind, it would seem to me, would be the best way out of the dilemma.

LOUIS WILL.

[The farmer should be paid for the privilege of shooting. The farm is more generally posted to-day than ever before. In many sections, in the South especially, the shooting rights are reserved for visiting sportsmen, who in return pay the taxes on the land. In such cases the owner cares little or nothing for the shooting, but is glad to piece out his income thus.

We believe that the system is one to encourage. There is little likelihood that the time will soon come when the prices asked for shooting privileges will be exorbitant, or in excess of what the gunner would be perfectly willing to pay, provided he actually received in exchange for his outlay a chance at game that was worth while.

From the present widely prevailing conditions of utter disregard of the landowner's rights by the visiting—that is to say, the invading and trespassing—gunner, to such a common recognition of the rights of others as shall make pay-

ment for shooting privileges obligatory, is a far cry, but the new order of things would be for the true interest of the sportsman.

The more fully the privilege of shooting is regarded as a privilege, and the more commonly the recognition is insisted upon, so much the more game will there be for the decent sportsman, and so much the less for the rowdy. When those conditions shall prevail, the problem of a game supply will in large measure have been solved. We would be glad to see the agricultural papers give increased attention to this subject. The farmers of this country have the game situation largely in their own hands, and the sooner they recognize the fact and it is recognized by shooters, the sooner will come an end to the raids of the ruffians who are no more entitled to be regarded as sportsmen in the field than as respectable citizens at home.—EDITOR.]

### WHEN DID MAN COME?

In a lecture delivered not very long ago in London on problems relating to the antiquity of man, Prof. A. Keith called attention to the opposing views of two sets of scientific men. One of these groups believes that man had developed in the Pleistocene period—say, 400,000 years ago—while another set believed that man, as man, existed far back in the Tertiary—say, 3,000,000 years ago.

Professor Keith made the point that in the distant past there was not a single kind of man in existence, but very many different kinds; all of which in due time became extinct, except that branch which gave origin to modern man. He believes that man must have taken on his human character near the beginning of the Pliocene period, or in late Tertiary time, perhaps 1,500,000 years ago.

### A Friend of Yours.

BY GEORGE A. T. HISE.

Yes, there's sport in the rushing brook,  
Where the speckled beauties lie;  
In thrashing out the shaded nook  
With whipstock rod and fly.  
But for sport to test the old bamboo,  
There's none compared to that  
You find upon your hands, when you  
Have hooked a two-pound cat.

There's plenty of sport in the ponds, my lads,  
Where the big-mouth have their sway,  
And snarl your line in the lily pads  
While the reel is clicking away.  
But down by the dam, in the rocky bed,  
There's better sport than that—  
"Give him the butt and keep your head,  
You've hooked a five-pound cat."

Yes, there's sport in the northern lakes,  
Where the muskie's full of fight.  
No use to thumb the line he takes,  
He calls on brain and might.  
But listen, pal, if it's scrap you want,  
If you're bound to go to the mat,  
Come on with me, I know the haunt  
Of a ten-pound yellow cat.

The cat is ready for any old bait,  
Morning or noon or night.  
No matter his length, no matter his weight,  
It's fight, fight, fight.  
Twisting and flopping he comes to the shore,  
Giving you tit for tat;  
On the sands he grins and asks for more,  
This sportsman's fish, the cat.

## Bow vs. 'Possum

By WILL H. THOMPSON

**M**R. J. M. CHALLISS, of Atchison, Kansas, of the firm of Waggener & Challiss, general attorneys for the Missouri Pacific Railway Company, and Mr. Z. E. Jackson, a leading attorney of the same city, are eager and successful hunters with the long bow, and a few days ago Mr. Challiss mailed to the writer an account of the "only 'possum in Atchison county ever killed by a bow in the hands of a white man."

Believing that Mr. Challiss' account of the doughty deed is too good to be lost, I have dared, without his permission, to give to the readers of *FOREST AND STREAM* that part of his letter relating to his achievement, and I have, still more recklessly, ventured to add some lines in which my own impressions of the Kansan's triumph are outlined. Mr. Challiss says:

"Will Waggener, who does an Indian dance every time a bow and arrow is mentioned, and has lots of good-natured fun at my expense, suggested that he had a bunch of boys on his hands, yesterday afternoon, whom he had promised to take hunting, and asked me to go along in the machine. I replied that I would go if I could take my bow, and have the first shot at anything we saw. He readily consented, and did another Apache dance. It was a hazardous thing for me to do, but I wanted to get out with the bow and so we went. We headed for Independence Creek, about four miles north of town, and along which there is some good timber. When we got to the bridge on the creek, one of the boys shouted that he saw a 'possum. The machine was stopped and every kid in the bunch jumped out, fully armed with murderous shotguns and rifles. The machine stopped in the middle of the bridge, a bridge about five times as large as the one where Jack got the squirrel, and the 'possum was in the top of a small tree, opposite the middle of the bridge, and about forty yards distant. Will was true to his word, and with some difficulty restrained the blood-thirsty crew he had in charge, every one of which had drawn a bead on the 'possum. It was finally agreed that I should have the first shot. I was not so anxious then. I would not have been much disappointed had the 'possum seen fit to move on. With that same deliberation that marked Capt. Talbot when he was going to shoot the rat, I leisurely unlimbered myself, took off my overcoat and strung my bow. I started to walk along the bridge to get down on the ground and within an archer's distance, but the shout of derision that arose from Will and the kids compelled me to retreat to the middle of the bridge where I had a good view

and clear space. I looked at that 'possum and looked at the background. In the entire range of my vision that 'possum was the smallest thing I saw. There were seventeen trillion places where my arrow could go, and only one place it could go to do any good.

"Any one of those kids could have killed that 'possum at the first shot with their shot-

MRS. W. H. WILLS.

guns, even the boy with the rifle (who was getting his bead with a rest over the bridge railing) need not have made a very good shot to get results. I had no care for my reputation in the matter, but I was worried on account of the bad fame that might come to the bow. I hated to see the ancient and honorable weapon disgraced. But these things did not clear the situation at all. There were the boys, and the 'possum, and the bow, and the opportunity. There was not a one of them that

knew that six whites are better than one gold.

"Something had to be done, and that right away. The 'possum kept growing smaller all the time, and appeared to be glued to that limb. From his fixity of purpose I believe he was a lineal descendant of that one which the half-witted boy poked with the stick and then accused of being 'skeert.' Will was standing at my side, and, from his position, that 'possum looked as large as an elephant; in fact, it was the only thing he saw. It obscured the entire background for him. With demoniac glee he said, 'Now's your chance, now's your chance; if you miss that 'possum, you will never hear the end of it.' And I knew that was the truth.

"Oh! why had I ever gotten out of the machine? Why, when the fame of the bow was unsullied, had I not allowed the boys to murder with their splatter guns? They could shoot a foot or more to either side, or above or below, and as a reward of inaccuracy, make a perfect shot, i. e., get the game. But these reflections did not increase the game in size or diminish the distance. I selected one of my narrow-feathered broad heads, and seeing that it was straight and well fledged, drew to the ear and let drive. As the arrow left the bow, I saw that it was in perfect line, and its keen hiss was music to the ear. For a moment I had that feeling of compunction which I always experience when I see a death-dealing arrow apparently about to hit a living creature. As my shaft screamed past the 'possum it just grazed his back and he let go of the limb and hung by his tail.

"'You hit him! You hit him!' shouted the boys.

"Will never said a word. Seeing that I was preparing to shoot again, they waited the outcome with more interest. Taking another shaft of similar make (the Challiss brand on a Thompson model), I again drew to the ear. As I felt the broad head stop on my forefinger I knew that Barnes had done all he could for that arrow, and with sixty-five pounds of the snows, and winds, and rains, and the sunshine of the Oregon mountains stored in my shaft, it screamed toward its quarry. As it left me, a whirling, hissing thing of life, it bore death on its wings. I knew—I instinctively felt that my aim had been true. It is for these moments of perfect satisfaction that we trudge miles and miles in the woods, and work long hours on our gear. The time put in on that arrow was not wasted. Highfield never made a better. But really I do not believe that 'possum appreciated the distinction accorded him. When he looked over his anatomy, he found that he was minus one hind leg, neatly severed with a perfect arrow that was razor sharp. This undoubtedly detracted from the satisfaction of being the only 'possum in the history of Atchison county that had been shot with a bow in the hands of a white man. Distinction enough for one 'possum, at least.

DR. ROBERT P. ELMER.

"At the second shot the boys said, 'You hit him again,' and Will said, 'Well, I'll be darned'

"The impatience of the boys could not be restrained any longer and they determined to capture the 'possum alive, in attempting which he was allowed to get into the creek, and one of the boys murdered him with a shotgun. He was half grown—a little larger than a good-sized rat."

**A DIDELPHIC TRAGEDY.**

(Possum potest non pugnare.)

It came to pass, but I don't know how,  
That the last Didelphys, and man-with-a-bow,  
The self-same crossing happened to seek,  
At the hridge over Independence Creek.

The 'possum was safe, or so thought he,  
On the highest branch of a Kansas tree;  
Four hands to hold with, also a tail,  
And the latter he never had known to fail.

The archer had taken along some cusses,  
Armed with obsolete blunderbusses,  
Ostensibly giving to them an "outing,"  
But really only to do his touting,

When he should be able to shoot and show  
His marvelous skill with shaft and bow,  
And bag all the game, and poke some fun  
At the others who clung to the "has-been" gun.

The man was aggressive, the 'possum passive;  
The latter petite, the former massive;  
The archer bold and self-reliant;  
The small marsupial quite defiant;

For he had been guilty of many crimes,  
And been indicted a hundred times,  
And, being presumably out on bail,  
He clung to his freedom with claw and tail.

His idiot-grin of innocence,  
Was an artful plea, but no defense,  
And was promptly stricken, as plainly "sham,"  
When the first shaft hurtled and creased his ham.

Knowing the luck that follows the bow,  
And knowing the Atchison archer so,  
If I had been that quadruped then,  
I should have fled from the haunts of men

With a speed continually increased,  
As the squares of my several jumps, at least,  
Till I could send back a 'possum's curse  
From a place not mentionable in my verse.

But he didn't. The weak, marsupial fool,  
Who never had been to the public school,  
Was densely stupid, and did not know  
The way of a man with a shaft and bow.

(No more than the readers of Solomon shall  
"The way of a man with a maid," et al.)  
Knew less of the numbers of arrows in stock  
Than Solomon knew of the snake on the rock.

For an archer will shoot till his shafts are sped,  
And then, if the 'possum be not yet dead,  
Will gather his arrows again and again,  
And shoot, and shoot with might and main,

And keep on shooting until he has hit  
All of the places the size of it,  
And so it must happen, that soon or late  
Didelphys Virginia must meet his fate.

He met it but, oh, the miraculous luck!  
The second, as well as the first, shaft struck,  
And the fool marsupial lost his grin,  
As he rubbed the stump where a leg had been.

He lost his head and uncurled his tail,  
And, as usual, with people when both ends fail,  
The attraction of gravitation began,  
To bring him down to the level of man.

The closing scene of the tragedy then,  
My muse would hide from the eyes of men!  
The splash of the fall in the freezing river,  
The grin that my country has lost forever,

The rush of the hunters with gun and bow,  
The sound of the bludgeon with blow on blow,  
The crack of the ribs by the hurled stone met,  
The crunch of the boot heel, spike-beset;

All this, and more, I might portray,  
But it seems sufficient to only say,  
That, after the close of the human storm,  
Didelphys Virginia was "out of form."

And then in the gloaming they rushed for home,  
And the rifle's crack and the shotgun's boom  
Was drowned by the archer's triumph cry,  
As he waved the marsupial tail on high!

**Christmas Archery in Chicago.**

It is a rare thing for archers to draw the bow on Christmas day, but that is what we did in Chicago.

The weather was beautiful, with a temperature of 41 degrees above zero, clear sky and a light wind from the southwest.

Not expecting such weather, social engagements had been made which kept a number of archers from the range.

The following scores were made. Team round, 96 arrows at 60 yards:

G. L. Nichols...	22	120	21	105	22	108	24	116	87	449
Dr. E. B. Weston	18	90	19	83	17	93	18	88	72	354

James H. Pendry, president of the Chicago Archery Club, shot, but on account of the size of the score, his modesty prevented his turning it in.

W. H. Wills, formerly one of our best archers, and now president of the New York Archery Club, shot a part of the round with a strange bow and arrow. Social engagements called him before he finished the round.

The following scores have recently been made in this "neck of woods":

Team round:										
H. W. Bishop...	24	132	21	123	23	133	22	118	90	506
E. J. Rendtorff...	...	...	...	...	...	...	...	...	96	582
	24	140	24	174	...	...	...	...	48	314

Seventy-two arrows at 100yds, 50 246.										
American round:										
H. W. Bishop.....	29	183	30	208	30	226	89	617		

EDWARD B. WESTON.

THE columns of this magazine serve as a prompt and satisfactory medium for the communication of facts and ideas between sportsmen.

**Newton Archery Scores.**

BOSTON, Mass., Dec. 27.—Editor Forest and Stream: On Saturday, Dec. 21, L. C. Smith and S. W. Wilder shot a match at Newton Center consisting of a double American round. Scores:

	60yds.	50yds.	40yds.	Total.
S. W. Wilder.....	28 164	29 157	30 186	87 507
	23 91	30 148	30 190	83 429—170 936
L. C. Smith.....	24 112	26 136	28 128	78 376
	16 84	25 101	23 113	66 298—144 674

G. P. BRYANT, Sec'y N. A. A.

**Birds, Game and Fur-Bearing Animals.**

ACCORDING to the annual report of the Biological Survey recently submitted to Secretary Wilson, the rearing of fur-bearing animals in the United States for their pelts continues to be a subject of much interest. Skunks, muskrats, mink and foxes are reared in captivity or on preserves under control of breeders. The large prices asked for mature black foxes for breeding purposes has resulted in confining the industry in the hands of a very few. Comparatively few attempts have been made to raise mink in the United States, but experiments are being conducted in co-operation with the National Zoological Park with a view to determining the most successful methods of rearing these animals. Muskrat farming has probably reached its highest point of development on the eastern shore of Maryland. Muskrat marshes are worth more measured by their actual income than cultivated farms of like acreage in the same vicinity. Only one other animal in the world, the European rabbit, exceeds the muskrat in the number of skins marketed.

The report also calls attention to experiments for the extermination of prairie dogs, ground squirrels and gophers that are being conducted by means of poison baits, traps and other methods. It is a surprising fact that the daily forage for thirty-two adult prairie dogs equals that required for a sheep, and that 250 eat nearly as much as a cow. Spotted fever ticks in the two younger stages live almost wholly upon small native rodents, and the California ground squirrel has been infected with bubonic plague by fleas from rats. The danger that these diseases may become endemic furnishes an additional important reason for the destruction of the animals. The bureau reports that the antelope is in greater danger of extermination than any other kind of American big game, that there is great need for a suitable preserve in the antelope country, and that the buffalo on the National Bison Range have now increased to eighty-one, or forty-four more than the original number three years ago.

There are now fifty-six bird reservations, and additional inspectors and wardens have been appointed to care for them. The European rabbit, introduced on Farallon Islands, California, and Laysan Island, Hawaii, has become such a pest that efforts will be made to reduce its number on Laysan Island. Every effort has been made to stop the sale of plumage of certain birds, gulls, terns and especially herons. New regulations passed under the Alaska game law practically makes game refuges of five islands in Southeastern Alaska. Instructions have been given to the revenue cutters in Bering Sea to insure a strict enforcement of the law protecting walrus.

**YACHTING**

GETTING UNDER WAY.

**Ice Yacht Columbia.**

SYRACUSE, N. Y., Dec. 12.—*Editor Forest and Stream:* I am sending under separate cover photographs of my ice yacht, Columbia, the first and only boat ever built of this model. It is the invention of Wm. M. Stanbrough, of Newburgh, N. Y. This model is a little different than my boat, as you will see from the pictures. The cockpit rests on the runner plank and on a track and has wheels so it runs easily back and forth on the track. When the boat comes about, the cockpit swings to the windward runner. The main sheet being fastened to the backbone of the cockpit, pulls it around as soon as the sails fill, and turning the boat also helps to swing the cockpit. The cockpit and its three-foot backbone are fastened to the main backbone by a large iron pin or post. This post can be removed and the whole cockpit can be removed and a small stationary cockpit fastened to the backbone, reducing the weight about 100 pounds. This is done in light winds. Both cockpits set well forward, thus distributing the weight of boat and load evenly on all three runners. The tiller post is about three feet forward of the rudder post and is connected by cable and drums as seen in the pictures.

I built this boat last winter and tried it out, and I find it a great improvement over the old style craft. While the other boats are trying hard to keep from capsizing, I have no trouble keeping on the ice and make great speed.

The cockpit can be shifted at any time by turning the wheel, seen in the front of the cock-

pit, which is connected with a cable to the backbone. You can do stunts this way by turning this wheel which turns easily and sends the cockpit to leeward, thus throwing the load and cockpit where it helps to tip the boat instead of holding it down. Thus you can keep it on two runners at most any angle. H. E. MORTON.

READY FOR ACTION.

**Yacht Sales.**

THE following have been sold through the agency of Frank Bowne Jones since the close of the yachting season:

Sloop yacht Heron (35-foot water line), sold for T. H. Shepard, of Boston, to E. H. Prentiss, of the New York Y. C.

Gasolene yacht Lizanne (55-foot water line), sold for the N. Y. Yacht, Launch & Engine Company to W. B. Thom.

Gasolene yacht Jessica (85-foot water line) sold for Commodore J. M. Macdonough to P. L. Atherton, of Louisville.

Auxiliary yawl Savola (30-foot water line) sold for Geo. H. Wicks to H. B. Cox, of New York.

Sloop Irondequoit (40-foot water line) sold for H. G. Noble to T. H. Shepard, Boston.

Sloop Mignon IV. (75-foot water line) sold for Arthur E. Coupal, of Boston, to E. A. Nelson, of New York.

Gasolene cruiser Wealaka (43-foot water line) sold for William H. Draper, to George G. Allen, of New Rochelle, N. Y.

Gasolene cruiser Arab (40-foot water line) sold for C. A. Godshalk to Herbert G. Wylie, of Tampico, Mexico. Also the 35-foot water line launch Doodle Bug, sold for Charles McLoughlin, to Mr. Wylie.

Houseboat Tomoka (25-foot water line) sold for J. N. Emley to Henry Sanderson, of New York.

Larchmont Interclub sloop Yukon sold for Norman P. Weir to W. H. Mackintosh.

Sloop yacht Vega (40-foot water line) sold for Clifford R. Hendrix to W. E. C. Eustis, of Boston, Mass.

PLAN OF ICE YACHT COLUMBIA—NUMBERS REFER TO DESCRIPTION IN PATENT PAPERS.

Also an order from Richard S. Storrs, of New York, for a 45-foot water line auxiliary yawl from the plans of B. B. Crowninshield. The contract for the construction of the yacht has been given to Robert Jacob, of City Island.

#### Corinthian Y. C.

THE committee on nominations announces the following nominations for the various positions to be filled by election at the annual meeting to be held Jan. 13, 1913:

Trustees, to serve for three years, to succeed J. Willis Martin and Edward C. Dale, whose terms of office expire, George Breed and Sydney G. Fisher; Commodore, George W. Childs Drexel, steam yacht Alcedo; Vice-Commodore, Eli Kirk Price, schooner Clarissa; Rear-Commodore, Walter Lippincott, motor yacht Lady Betty; Secretary and Treasurer, Addison F. Bancroft; Measurer, J. Murray Watts; Race Committee, Charles D. Mower, Charles Longstreth, A. F. Bancroft; Committee on Nominations, J. Willis Martin, Chairman, Hobart A. Hare, M.D., Charles Longstreth, W. Barklie Henry, Sydney G. Fisher.

#### Old Mill Y. C.

THE Old Mill Y. C., at its annual meeting on Pleasant Point, Jamaica Bay, elected: Commodore, George S. Conger; Vice-Commodore, William J. Edwards; Rear-Commodore, Peter S. Anderson; Corresponding Secretary, Arthur E. Baker; Financial Secretary, John McGrath; Fleet Surgeon, Harry Ellis; Fleet Chaplain, Rev. Carl Podin; Trustees for three years, Thomas O'Neill, William J. Edmonds, Robert A. Grinnell; for two years, Joseph Buehler, Thomas Wayne, William Armbruster; for one year, Dr. George A. Cooper, William E. Powers, George Conger.

## Motor Boating

### Newport M. B. Club.

At the annual meeting of the New York Motor Boat Club, the following officers were elected for 1913: Commodore, C. P. Chapman; Vice-Commodore, C. A. Leonardi; Rear-Commodore, C. H. Dugliss, Jr.; Secretary, W. T. Randolph; Treasurer, N. J. Allen; Governors, for two years, Charles Ludwig; for one year, G. J. Westlan.

## Canoeing

### A. C. A.—Atlantic Division.

THE officers of the American Canoe Association of the Atlantic Division follow:

Vice-Commodore, Albert D. Berning; Rear-Commodore, Elmer B. Ayres; Purser, F. C. Buchenberger; Executive Committee, Henry B. Fort, Eugene C. Kelly, Gardner G. Richards, Fred H. Smith, Frank T. Wilson.

The announcements for the year 1913 follow:

Feb. 8.—Division dinner, Hofbrau Haus, New York city; Joseph M. Perkins, chairman of committee, 501 West 169th street, New York.

March 15.—Division smoker, Philadelphia, Pa.; Gardner G. Richards, chairman of committee, Sixth and Chestnut streets, Philadelphia, Pa.

May 10 and 11.—Ramapo River cruise; Eugene C. Kelly, chairman of committee, 984 Jackson avenue, Bronx, New York city.

May 30 and 31.—Delaware River cruise;

Howard M. Landis, chairman of committee, 2026 Wallace street, Philadelphia, Pa.

June 28 to July 6.—Annual meet and camp, Tottenville, Staten Island, New York; Edmund vom Steeg, Jr., chairman of committee, 10 Camden street, Roselle Park, New Jersey.

Aug. 8 to 22.—National meet at Sugar Island, St. Lawrence River.

Aug. 30, 31 to Sept. 1.—Race meet and camp, Red Dragon C. C., Wissinoming, Philadelphia, Pa.; Frank T. Wilson chairman of committee, Frankford, Philadelphia, Pa.

### Ferrets in Rhode Island.

It is reported that hunting with ferrets, which is against the law, is being carried on extensively in Johnston and Scituate, and rabbits are being caught by this method. It was stated by a hunter recently that there is more ferret work being done than for many years past, and up to date the hunters have escaped detection. The ferrets give no chance at all to the rabbit. When driven into a wall or hole, the ferret is set upon the rabbit's track and the hare is then driven out into the hands or a bag held by the hunters.

The penalty for using a ferret is severe, and it is possible that the complaints will receive attention and a prosecution or two brought which would end the practice.—Providence, R. I., Telegram.

### Pythons Like Milk.

"THE fondness of pythons for milk is notorious," said an official of the zoo. "A python will follow a bowl of milk for miles and then be perfectly satisfied with the milk as a reward for its journey. In India sometimes the natives in traveling through the forests carry a torch ahead for fear of wild animals, and one man will bring up the rear, carrying a bowl of milk. In this way they sometimes enter a town, followed by half a dozen pythons, as they say in India, 'wagging their tails behind them.'"

# TRAP SHOOTING

If you want your shoot to be announced here, send a notice like the following:

**Fixtures.**

**REGISTERED TOURNAMENTS.**

- Jan. 22-25.—Pinehurst (N. C.) Country Club. Leonard Tufts, Pres.
- Feb. 22.—Birmingham (Ala.) G. C. tournament. O. L. Garl, Sec'y.
- July 8-13.—Cedar Point, Ohio.—The Indians' tournament. D. H. Eaton, Sec'y, Cincinnati, O.

**DRIVERS AND TWISTERS.**

The Sunny South Handicap will be held at Houston, Tex., Jan. 27-Feb. 1, 1913, under auspices of Houston Gun Club. The added money will be more than any previous shoot, and program very attractive. Following this shoot there will be two other shoots with good added money in the near vicinity of Houston. For further particulars write Alf. Gardner, Manager.

If scores of your club are missing in this issue, console yourself with the fact that they will appear next week. We went to press a day early this week because our printers insist on the turkey privilege New Year's Day. Incidentally, ye late ones—note: We go to press **TUESDAY** of each week. Trap scores must be in hand not later than noon of that day. Do you get me?

Happy New Year, Hercules. May your fame and popularity be to the shooting field as "the Birth of Venus" is to the field of art. May your progeny be heard from shore to shore, and may the man behind the gun in Maine speak well of you to his confrere in Cali-

fornia. May your path be strewn with chilled shot and fragments of shattered clay targets.

Bumpers to the baby Hercules and those to whom his destiny has been assigned. To the "Birth of Hercules." Bottoms up!

Prosit! Hoping that the thousands of novice trapshooters and experienced field shooters, who, during the past year, have refrained from the pleasures of trapshooting because they were afraid the small scores they might make for a while would bring ridicule upon their efforts, and who felt they were not wanted in regular club shoots, will lose sight of so foolish an idea and join the clay target fraternity. The disc breakers' league is one full of fraternal spirit. Every member of it will offer a helping hand to the tyro, encouraging him with useful tips and generous handicap. Join the chorus now, and probably by spring you will be doing solo parts with chilled No. 8s to the encore of the same bunch with whom you did finger exercises to the accompaniment of a busted metronome. Time, in trapshooting, is the secret of success—the one thing upon which hangs the possibility of a berth in the upper register; and—there is no time like the present.

W. G. BEECROFT.

**Highland Gun Club.**

EDGE HILL, Pa., Dec. 28.—Tom Tansey was the lime lighter to-day at the monthly shoot of the Highland Gun Club, getting high with 69 out of 75. George S. McCarty, the only other entrant in Class A, finished second by smashing 63. Other spoon winners were Joel Davis in Class B, when in the first two events carded he missed only one target in a total of 25, running straight in the second. In Class C, Laurent was the dapper winner, and Jones captured the prize in Class D after a shoot-off with Fell and Deist. There were five perfect scores in the handicap event for the club button,

and after a close shoot-off Jones landed the emblem for the ensuing month. In the shoot at 5 pairs of doubles Freed was high with 8, after a hard shoot over the second trap, where often the clay birds got lost in the shadows of the bare trees. Scores:

Class	10	15	Hp.	T <sup>1</sup>	10	15	10	15	Total
Tansey	A	10	14	2-25	10	12	10	13	69
McCarty	A	4	14	0-18	8	15	9	13	63
J F Meehan	B	8	12	4-24	10	11	9	11	61
Freed	B	6	13	2-21	9	8	8	15	59
Davis	B	9	15	7-25	7	7	7	11	56

**Frontier Rod and Gun Club.**

BUFFALO, N. Y., Dec. 21.—At the final shoot of the Frontier Rod and Gun Club for 1912, held to-day, cups were won by Wakefield, H. Utz and F. G. McKenna. Winners in the handicap race are Thompkins, G. McKenna and Eichberg.

At the regular meeting the following officers were elected: J. Klein, President; F. C. Miller, Vice-President; William Boyer, Treasurer; H. C. Utz, Secretary; George Koch, Sergeant-at-Arms; G. McKenna, Field Captain; H. Thompkins, Assistant Field Captain.

It was decided to open the charter for a short time by making the initiation fee \$3, which includes the first year's dues. The scores:

Events:	1	2	3	4	5
Targets:	10	15	25	25	25
Ebberts	9	11	18	18	21
Wakefield	8	9	17	19	..
Thompkins	8	..	19	20	..
G McKenna	..	..	11	22	..
W Hewitt	6	11	14	17	..
H Utz	5	7	..	15	..
Lawson	7	14	6	15	14
Rappich	6	8	16	14	15
Eichberg	6	12	11	24	18
Crawston	..	..	5	..	..
C Utz	..	..	6	..	..
E Utz	..	..	10	..	..

Point winners in cup race: Wakefield, Cranston and Thompkins.

Handicap: Eichberg.

FOREST AND STREAM may be ordered from any news-dealer. Ask your dealer to supply you regularly.

## Interstate Association's Official 1910 Records

Here is The True Guide to 1913's Would-Be Winners at the Traps

**NO TRAPSHOOTER HAS EVER BEATEN 1955 x 2000**

The Phenomenal 1910 Record, made by W. H. Heer, with Remington-UMC Gun and Speed Shells

This score was made at Registered Tournaments, under Interstate Association auspices and is official. It stands as a remarkable example of the possibilities of skilled marksmanship in combination with modern arms and ammunition.

16 of 20 Interstate Handicaps Have Been Won With Remington-UMC

Start your practice now with a Remington-UMC Pump Gun and the Speed Shells and you, too, will depend upon this "Perfect Shooting Combination" for the contests you want to win.

Shoot Remington-UMC For Speed Plus Pattern

REMINGTON ARMS—UNION METALLIC CARTRIDGE CO., 299-301 Broadway, New York, N. Y.

Siwanoy Country Club.

MT. VERNON, N. Y., Dec. 26.—The Siwanoy Gun Club, of Mt. Vernon, N. Y., had a turnout of twenty enthusiastic members to face the traps at the Christmas Day competitions. The foot of snow that fell on the day previous made a beautiful background apparently, but the dazzling white in the foreground, fringed by the dark tree trunks, seemed to contribute to low scoring, in spite of the otherwise favorable weather conditions.

The first event on the program was the fourth competition for the handsome president's trophy, handicapped on the Du Pont system, with a distribution of points to the ten high guns. G. A. Wylie and Dr. Currie tied for first honors, each obtaining a score of 9 1/2 points. The standing to date of highest total points won in the president's trophy is: Dr. Barnard 22, G. A. Wylie 19, W. Thorpe 17.8, Z. C. Offutt, 16.5, G. L. Yates 15, M. R. Guggenheim 13, W. M. Wylie 13 and T. H. Lawrence 11.5.

The second event on the program was for the Captain's trophy, which is a miss-and-out competition, 10 straight kills being necessary to win a leg. L. G. Bond and Dr. Barnard were high guns, but did not quite qualify.

Considerable interest attached to the contest for the "take-home" trophies, first being won by G. L. Yates with a clean score with his handicap. Dr. Currie, L. D. Hill and Harry Morgan tied for second place at 23 each, with Currie the winner after the shoot-off. Aided by his handicap of 5, L. G. Bond won first place for the Du Pont trophy with a clean score; H. J. Smith with a handicap of 6, was a close second. Scores:

Table with columns: Handicap, Broke, Total, Points. Lists names like G. A. Wylie, Currie, Dalton, Smith, etc.

Table with columns: Take-home trophies, Broke, Points. Lists names like Yates, Currie, Hill, Morgan, etc.

Table with columns: Du Pont trophy, Broke, Points. Lists names like Bond, Smith, Currie, etc.

L. D. HILL, Sec'y Gun Section.

Northern Kentucky Gun Club.

DAYTON, Ky., Dec. 22.—The turkey shoot held to-day was one of the most successful affairs of the kind that has been given in this locality for a long time. A large attendance, thirty-one shooters, entering during the day, and twenty-five shooting the entire program of five 20-target events. Weather conditions were perfect, and some extra good scores were recorded. There was a good turnout of local shooters, and among the well-known out-of-town contestants were: L. J. Squier, Pittsburgh, Pa., and R. O. Heikes, Dayton, O., both professionals; J. G. Francis and J. M. Cleaver, Harrison; E. and A. Bauer, Lawrence, Ind.; H. and A. Sundry, Williamsport, O.; S. Leever, ex-twirler of the Pittsburghs, and T. J. Dunne, Goshen, O.; Towler, Mt. Healthy, O., and T. J. Donald, Felixity, O.

As usual, at the club shoots, Elmer Lamb was in charge of the office, and was ready to deliver the prizes to the winners as soon as the last ties were decided in the last event.

The program, as arranged by the managers—H. R. Irwin and G. W. Dameron—was a liberal one, and their efforts to have the prizes well distributed, met with a large measure of success. Four prizes were given in each event—turkey to first, duck to second, chicken to third, and can of oysters to fourth. Ties for all but the turkey were decided by the score in the following event, except in the last event, which was shot off, miss-and-out. The ties for first prize were shot off miss-and-out at the conclusion of each event. The winner of first prize in any event was handicapped for the balance of the program. The winner in the first event went to 13yds. in the second event; if he won again, he went to 19yds., and if again the winner, he went to 20yds., the limit. A turkey was given to the man making high score for the entire program, and the low man was also given a turkey. One of the famous club dinners was served in the club house at noon. Shooting began about 11 o'clock, and the last tie was decided soon after four. Elmer Lamb, as usual, had charge of the office, and was ready to deliver the prizes to the winners at the close of the shoot.

The fine weather brought out a large crowd of spectators. S. Leever was high amateur with 97 out of 100. He went straight in the first two events, and dropped 1 target in each of the last three. Dameron and Irwin

came next among the amateurs with 94 each, the latter shooting from 18 and 19yds. after the first event. F. Holaday was third with 93. R. O. Heikes got in second place for the day and led the professionals with a score of 96; O. J. Holaday was second with 94, and L. J. Squier finished with 91. Hammerschmidt was not in his best form, though he shot well in all but the second event; he tied with T. J. Dull and Ford on 90. In the first event Irwin and Leever tied on 20, the latter winning the miss-and-out, 4 to 3. The second event brought Leever and Donald together in the shoot-off, the former winning, 5 to 4. In the third event, Irwin, Holaday and Dull tied on 20. Dull missed the first target, Holaday the second and Irwin proved the winner. The fourth event had five men in the tie with 19 each, and the shoot-off proved to be a close fight between Leever and Hammerschmidt. The others were quickly disposed of, Ford dropping his third target, Holaday his fifth and Dameron his ninth. The first two scored the first 20 targets, and then each missed his 21st. Starting again, Hammerschmidt dropped his seventh target, but Leever scored and won the turkey, his total score being 46 to 45 out of 47 in the event and shoot-offs.

The winners in the events follow in the order of their standing:

First event: H. R. Irwin, T. J. Dull, J. Schreck, A. C. Ertel. Second event: Leever, Dull, F. Holaday, Hammerschmidt.

Third event: Irwin, Leever, Ford, Clements. Fourth event: Leever, Sunderbruch, Ertel, Quimby.

MRS. O. L. GARL.

Champion woman shooter of the South.

Fifth event: Sunderbruch, Leever, Dameron, Francis. There was no time for sweepstake shooting after the close of the regular program, as darkness was fast approaching.

Table with columns: Shot at, Broke. Lists names like T. J. Donald, J. G. Francis, F. Holaday, etc.

Crescent A. C.

BAY RIDGE, N. Y., Dec. 25.—C. R. James won his steak on two cups to-day, becoming actual owner of Vanderveer trophy, and take-home trophy. He shot remarkably well under severe weather conditions, getting 19 out of 25 on Vanderveer and (4) 87 on take-home event. Committee cup was a tartar, requiring shoot-off and re-shoot-off before going to R. C. Williams. December cup was elicit of much keen competition, settling at last in the maw of F. S. Hyatt. The scores:

Table with columns: Committee cup, 50 targets, handicap. Lists names like A. Blake, J. S. Lawson, M. Stiner, etc.

Table with columns: Shoot-off for committee cup, 50 targets, handicap. Lists names like J. F. James, Dr. R. C. Williams, F. S. Hyatt, etc.

Table with columns: Take-home trophy, 100 targets, handicap. Lists names like C. R. James, J. H. Vanderveer, F. B. Stephenson, etc.

Table with columns: December cup, 25 targets, handicap. Lists names like F. S. Hyatt, C. R. James, J. F. James, etc.

Table with columns: Permanent possession of December cup. Lists names like F. S. Hyatt, J. F. James, M. Stiner, etc.

Table with columns: Vanderveer trophy, 50 targets, handicap. Lists names like C. R. James, F. B. Stephenson, J. S. Lawson, etc.

Table with columns: Shoot-off, 25 targets. Lists names like C. R. James, F. B. Stephenson, etc.

Table with columns: Shoot-off for permanent possession of Vanderveer trophy. Lists names like C. R. James, Dr. R. C. Williams, etc.

Dec. 25.—The Crescent A. C. held a holiday shoot to-day, and while not very well attended, was interesting. The chief event was at 225 targets and was won by Frank B. Stephenson who broke 207. Mr. Stephenson won also Christmas Day cup with 91 out of 100. The committee cup went to R. C. Williams who broke 46 out of 50. J. F. James was high for Vanderveer trophy. In the December cup event, the high guns were F. S. Hyatt and M. Stiner with 23 out of 25. Scores:

Table with columns: Christmas cup, 100 targets, handicap. Lists names like F. B. Stephenson, R. C. Williams, M. Stiner, etc.

Table with columns: Committee cup, 50 targets, handicap. Lists names like R. C. Williams, F. S. Hyatt, F. B. Stephenson, etc.

Table with columns: December cup, 25 targets, handicap. Lists names like F. S. Hyatt, M. Stiner, F. B. Stephenson, etc.

Table with columns: Vanderveer trophy, 50 targets, handicap. Lists names like J. F. James, F. S. Hyatt, R. C. Williams, etc.

Table with columns: High gun trophy, 225 targets. Lists names like F. B. Stephenson, M. Stiner, J. F. James, etc.

Mineral Springs Gun Club.

JENKINTOWN, Pa., Dec. 28.—In the final 1912 shoot of the Mineral Springs Gun Club, to-day, Haas won high gun with 82. In the club events, totalling 50 targets, the spoon winners were Worthington, Pierson and Taylor. Summaries:

First event, 25 targets: Haas 21, Beans 20, Nash 18, Pierson 18, Hildebeitel 19, Worthington 19, H. Nice 17, Taylor 14, Hobensack 17.

Second event, 25 targets: Haas 15, Beans 17, Nash 16, Pierson 14, Hildebeitel 16, H. Nice 19, Worthington 19, Taylor 18, Hobensack 16.

Third event, 25 targets: Haas 21, Beans 20, Nash 18, Pierson 17, Hildebeitel 17, Worthington 16, H. Nice 18, Taylor 16, Hobensack 16.

In the fourth event, 25 targets, Haas broke 25 straight, not a shooter fell below 20.

Aggregate totals on 100 targets shot at: Haas 82, Beans 77, Nash 74, Pierson 69, Hildebeitel 71, Worthington 74, H. Nice 71, Taylor 68, Hobensack 69.

Brewster Gun Club.

BREWSTER, O., Dec. 27.—The Brewster Gun Club entertained a number of their new members and prospective new members at the traps on Christmas afternoon. You will note that a number of the shooters had very low scores, this being the first time they ever did any trapshooting. Following is the score of the afternoon:

Table with columns: Shot at, Broke. Lists names like D. Mossop, A. Arnold, C. Engleman, etc.

A. J. BURNS.

**New York A. C.**

TRAVERS ISLAND, N. Y., Dec. 28.—Dan McMahon got the bacon to-day and took high gun from Ralph Spotts, which in itself is some feat of Samsonian breakage. His score in the big act was 92 out of 100. A few of Danny's other efforts corralled December cup with a full from a one disc draw; Held trophy, with a straight, and partnership with W. B. Ogden, for winners in scratch team shoot, 92 being shattered by Danny and 80 by Ogden—172 for the pair, which was just one too many for Ralph Spotts and A. W. Church. Culver cup called for a shoot-off between five with fulls, finally going to G. M. Thomson with 23 from 3 hand-outs.

Travers Island trophy needed adjustment between three fulls, ultimately being credited to R. R. Debacher. Handicap cup on 100 scalers went to E. G. Lenane with a full and two over from 24 gratis objectives.

Distance handicap was purloined by Dr. E. R. De Wolfe from 18yds., after a shoot-off with Spotts, shooting from 21. The air was crisp and clear, but a treacherous down-channel wind made shooting hard and scores decidedly creditable. Incidentally McMahon broke 49 out of the first two events of 25 each. The summaries:

December cup, 25 targets, handicap:

D F McMahon.....	1 25	G M Thomson.....	3 22
E G Lenane.....	6 25	O R Dickey.....	0 21

**Newton Gun Club.**

THE fifth annual New Year's poultry shoot of the Newton Gun Club will be held at Newton, N. J. Handicap, winners to go back one yard. Not a money making scheme—just for fun. This shoot will be run same as our previous shoots. All poultry will be put up at actual cost. If you have never attended, ask Lewis Colquitt, Neaf Apgar, H. H. Stevens or Jack Fanning what they think about it. If you can show us where

# WINCHESTER

## 20 Gauge "Brush" Shells

"LEADER" and "REPEATER"

Winchester "Brush" shells, which have had such a success in 12 and 16 gauges and reached such a wide popularity, are now furnished in 20 gauge in "Leader" and "Repeater" brands, the loads being as follows: 2½ inch shell, 2¼ drams (or equivalent) of smokeless powder and ⅞ ounce of 6 to 10 size shot. These "Brush" shells double the efficiency of your gun, inasmuch as they give a cylinder-bore pattern in a choke-bore gun without loss of velocity or penetration. They can also be used in cylinder-bore guns with about the same pattern and penetration as regular loads. If you have not tried them, you have yet to take the full measure of your gun. :: :: :: ::

## Winchester "Brush" Loads Are Sold By All Dealers

you can have more fun and sport for the money, your shooting will be free. Turkeys, geese, ducks, chickens and roasting pigs on hand. All kinds of shells. All loads for sale. A hot lunch at 12:30 for all who participate. Dead mark shooting under management of Ross McPeck. Protection for all shooters.

**Larchmont Y. C.**

LARCHMONT, N. Y., Dec. 29.—Danny McMahon robbed the bluerock's nest to-day, climbing over Ralph Spotts, who got stuck on the trunk of the tree before he reached the nest. Twenty-two others gunners were in the party and each got some of the young squabs that flew slowly.

Ralph L. Sootts took the monthly cup. The special monthly trophy was won by T. Lenane.

The visitors' trophy was won by A. L. Burns, the boy prodigy, with a full score of 25, and A. W. Whiting carried off the 100-target handicap with 97. Whiting was winner of first take-home trophy. With a handicap of 4 he shot a full score. The second take-home trophy was captured by Dr. L. Culver with a full. D. J. McMahon was the winner of the leg for the accumulation cup, and Tom McCahill carried off the 15-target scratch prize, T. Lenane winning the 10-target scratch contest.

**Indianapolis Gun Club.**

INDIANAPOLIS, Ind., Dec. 21.—A stiff wind and freezing temperature combined to keep down the target scores to-day. In practice at 16yds., Moller led with scant 90 per cent; Dixon in second place. Shooting the first leg of the sliding distance handicap for the Du Pont fob, Edmonson and Lewis tied on 42. The scores follow:

Practice:

	Shot at.	Broke		Shot at.	Broke
Moller.....	80	71	Lewis.....	20	16
Dixon.....	80	69	Neighbors.....	20	13
Edmonson.....	80	68	Hofer.....	20	12
Short.....	80	65	*Hymmer.....	100	91
Alig.....	75	52	*Vietmeyer.....	100	90
Britton.....	40	30			

Du Pont fob, 50 targets:

Moller.....	41	Britton.....	32
Dixon.....	40	Lewis.....	42
Edmonson.....	42	Neighbors.....	23
Short.....	34	Hofer.....	37

# 1912

## A YEAR OF SUCCESSES FOR

# Peters Ammunition

"Where quality counts they win"—and quality counts EVERYWHERE. The year 1912 has been one continuous round of victories for users of Peters Shells and Cartridges—far too numerous to record here in full. The few items that follow will suffice to indicate the kind of work that can be done, and is being done every day with the P brand:

### "Steel Where Steel Belongs" Shells

WON IN 1912:

Grand American Preliminary Handicap, Grand American High Amateur Average, World's Amateur Indoor Trapshooting Championship, Texas State Championship, Arkansas State Championship, Pennsylvania State Championship, Virginia State Championship, Vermont State Championship, Colorado, New Mexico and Wyoming State Championship, E. C. Challenge Cup, twice by record scores, High General Average at Post Season Tournament.

### Peters Semi-Smokeless and Smokeless Cartridges

WON IN 1912:

3 out of 5 Matches at Zettler Rifle Tournament, 5 out of 6 Matches at .22 Indoor League Tournament, 8 out of first 12 scores of American Team in the International Small-Bore Match, including 1st, 2nd and 3rd, 6 out of 10 Revolver Matches at Sea Girt Military Tournament, including Grand Aggregate, 5 out of 6 United States Revolver Association Outdoor Championships for 1912, including Two new World's Records, New Inter-Scholastic Record, 980 out of 1,000, Astor Cup (Inter-Scholastic League).

Use the P Brand of Ammunition if You Want Best Results

## THE PETERS CARTRIDGE COMPANY, CINCINNATI, OHIO

NEW YORK: 98 Chambers St., T. H. Keller, Manager.

SAN FRANCISCO: 608-612 Howard St., J. S. French, Manager.

NEW ORLEANS: 321 Magazine St., Lee Omohundro, Manager.

### Chicago Gun Club.

CHICAGO, Ill., Dec. 21.—Aside from being quite cold, the day was fine for trapshooting. However, only nine shooters participated in the five events of the afternoon. Fetherston topped the list in the first 50-target event by breaking 47, Goode, Doc May and Dickerman each scoring 45, while Darby broke 43. Goode came in at the head of the list in the next event, scoring 46 out of 50, which gave him a total of 91 out of the 100, also landing first honors in events 4 and 5. Doc May showed a spurt of his former speed and form in the first 50. Scores, No. 5 being at 12 pairs:

Events:	1	2	3	4	5
Targets:	15	50	50	25	24
Goode .....	12	45	46	22	18
May .....	8	45	37	17	13
Stannard .....	13	41	43	21	12
Darby .....	13	43	43	16	11
Dickerman .....	45	43	..	..	..
Fetherston .....	47	..	..	..	..
Bosley .....	31	36	..	..	..
Silver .....	42	40	..	..	..
T V Cannon .....	20	26	..	..	..

Event No. 4, was gun below armpit until shooter calls pull.

Dec. 22.—Another splendid day for shooting found most of our members attending the turkey shoot at Riverside. Geo. Eck claimed the honors in three events, finishing up his last event by going out straight, which gave him a total of 48 out of 50, with gun below the armpit. Hardy Wolfe claimed first place in event No. 4 with 24 out of 25, also breaking 22 out of 25 in events Nos. 1 and 5. Miller was going along at a good pace in his first 100, but fell back on the last 50. Scores:

Events:	1	2	3	4	5	6
Targets:	25	50	50	25	25	24
Geo Eck .....	45	43	23	25	..	..
P Miller .....	42	42	19	14	..	..
H Hlavka .....	..	39	..	..	..	..
H Wolfe .....	22	..	24	22	..	..
C Kozla .....	..	30	..	..	..	..
E J Uhlina .....	21	37	..	..	11	..
L C Huck .....	16	32	..	..	9	..

Nos. 4 and 5, gun below armpit; No. 6, 12 pairs.  
Wm. F. MERKLE, Supt.

### Atglen Gun Club.

ATGLEN, Pa., Dec. 26.—The Atglen Gun Club held a very successful closing shoot for the season to-day, seventeen taking part. The program was run off in two parts, 100 targets, Jack Rabbit, and 50 targets, percentage system. Wilson was high amateur on the 100 with 90. Jebb was high in the 50 with 45, also high amateur on all targets shot at with 134 out of 150. Vernon Williams, the local crack shot, fell down on the last string, putting him out of the coveted place. Lloyd R. Lewis was the only pro present, and finished with 137 out of 150, losing 9 of these in two events via the finch

route. William Fielis, Jr., shot his first string to-day and did well with his 20-gauge. We look for him to clean up the bunch in even better shape than "Bill" did in the good old days, when he made the rounds with his old friend Kruger and "eat 'em alive" with the old Greener that you cannot buy for love or money.

The club is starting to work on their registered shoot, to be held April 10, when they expect to have the biggest one ever, and that's some big. Notice will appear later. Scores:

One hundred targets, Jack Rabbit system:					
Shot at.		Broke			
*Lewis .....	100	94	Martin .....	100	81
Hull .....	100	87	Fickes .....	100	56

Jebb .....	100	89	Fielis, Jr .....	20	8
Williams .....	100	88	Chamberlin .....	20	8
Wilson .....	100	90	Lamon .....	20	10
Fifty targets, percentage system:					
*Lewis .....	43	Williams .....	43		
Hull .....	38	Martin .....	41		
Fielis .....	40	Jackson (10 targets) ..	7		
Johnston .....	44	Engram (10 targets) ..	6		
Jebb .....	45	Fielis, Jr (10 targets) ..	6		

### Amateur Championship of Long Island Sound

THE fifth annual amateur clay bird championship of Long Island Sound will be held under the auspices of Manhasset Bay Yacht Club, Port Washington, L. I., on Jan. 12. The match is open to members of all recognized clubs on Long Island and Long Island Sound and the waters thereof, and will be at 100 targets, 16yds., starting at 11 o'clock. Two sets of traps will be used. Entrance \$3, including cost of targets.

There will be three handsome trophies for three high guns. A trophy to the club whose team scores the greatest number of points. Five high guns of each club constitute a team.

Sleeping rooms may be engaged night before shoot by applying to the House Committee at the club house. Optional sweeps, \$5. Five high guns to participate as follows: 50 per cent to winner, 25 to second, 15 to third and 5 to fourth and fifth.

The following loads will be on hand: Ballistite, 25 grains; Dupont, 3 drams, 3/4 drams; New Schultze, 3 drams; Dead Shot, 3/4 drams; Mullerite, 3/4 drams. Shells may be purchased at the club house.

Trains leave New York (Penn. Station), 9:12, 10:09 and 11:07. Guns and ammunition shipped in care of the club by Long Island Express, prepaid, will be delivered at the club house.

Entries should be sent to Trap Committee at the club, Port Washington, L. I., before noon Friday, Jan. 11, 1913, or to J. W. Alker, Chairman Trapshooting Committee.

FOREST AND STREAM may be ordered from any news-dealer. Ask your dealer to supply you regularly.

### Paleface Shooting Association.

WELLINGTON, Mass., Dec. 21.—An all-day shoot was on the card to-day, which, with the high price of turkeys, and the fact that turkeys were the burnt offerings, brought out twenty-one shooters to-day. The largest, heaviest and most luscious gobbler went to the table of Frank Hilliard, who in a special Turk-Balk event broke 25 straight. Two pros from Brunswick, Me.—Wheeler and Chapin—shot a team event with P. E. Osborn and A. E. Sibley from Portland. It ended in a tie on 261 out of 300. Archibald took the 100-target handicap with 103 from a gift of 18. High gun went to Wilder with 142 out of 150.

One hundred and fifty targets:

### Meadow Springs Gun Club.

MEADOW SPRINGS, Pa., Dec. 28.—Twenty shooters lined up here to-day. The club's program consisted of the usual weekly events, but the rivalry existing between the members of the M. S. and the visitors to shoot the high guns was keen. Charles H. Newcomb was upper gun, breaking 97 out of 100. Thompson was the runner up with 96 from a free start of 6.

Thompson tied Sloan for the high actual among the Meadow Springs members. Each broke 90. Scores:

Gracey .....	10	94	Armstrong .....	10	40
Randall .....	0	91	Rothaker .....	0	53
Wardin .....	8	87	Thompson .....	6	96

**Westwood Gun Club, of Cincinnati.**

CINCINNATI, O., Dec. 22.—Following scores were made in practice by Westwood Gun Club members. Mr. Menzer was a visiting shooter. Our club has been organized only recently, and we have decided to improve grounds and are erecting a new club house and concrete pit, which will be completed within the next two weeks. I might mention that our club has three first-class electric traps and one emergency pull trap. These will no doubt be augmented in the near future by an automatic trap. We consider our field second to none. The boys are very enthusiastic, and visitors are thoroughly welcome at any of our shoots. I shall endeavor to send you scores regularly and will place your paper on the table of the club house.

Following is list of officers and members: P. Ruehlman, President; M. Stopper, Vice-President; John Schneider, Secretary; A. C. Kuball, Treasurer; H. Carson, V. Schroeder and Wm. Bohnert, Trustees; C. Kuball, Organizer; C. Rosemeyer and F. Disser, Referees; A. La Boyteaux, Field Captain; Wm. Rowekamp, M. Campbell and James Connor, House Committee. The other members are: C. Eckert, A. Pfalzgraph, E. Barelou, C. A. Tooker, E. Carson, R. C. Carson, R. Tooker, Dr. G. Mallet, C. Fox, Wm. Bitter, J. Ruehlmann, F. Memer.

H Carson .....	100 59	F Memer .....	75 55
C Rosemeyer ...	50 39	A C Ruball.....	75 33

Dec. 23.—This was the regular shooting day of the club, and the weather could scarcely have been better for sport at the traps, but the members turned out in force, and denied themselves the pleasure of shooting for the purpose of building a club house. The plans were drawn by A. Kuball, architect, and such progress was made in the construction that the house will be completed before the first shooting day of the new year, and the boys can enjoy the comforts of a home. Two or three members appeared with guns, but they willingly turned to and acted as carpenters and helpers. At the last shoot on Dec. 22, there were nine members present. H. Carson led with 37 out of 50, and F. Menzer a close second with 35. There has been a marked improvement in the scores since the club held its first shoot a few weeks ago, and the members are more enthusiastic than ever. By spring several of the members should be able to make a good showing in almost any company, and ought to have a team for the Interclub matches that are being planned for.

**Glenwood Country Club.**

GLEN COVE, L. I., Dec. 28.—Seven Glenwood Country Club trappers blew holes in ambient atmosphere today, scattering fragments of black and yellow over the snow, each in proportion to his keenness of eye and ability to time.

Six trophy shoots at 25 targets each were decided, and one event at 10 pairs of doubles. W. S. Silkworth and J. C. Jackson carried off all but two events. The latter gunner won three events and two of the prizes were captured by Mr. Silkworth. A. Smith won one of the trophy shoots. The event at 10 pairs of doubles was captured by J. I. Bergen. The scores:

Trophy shoot, 25 targets, handicap:

**Manhasset Bay Y. C.**

PORT WASHINGTON, L. I., Dec. 29.—A good squad showed up, and we all enjoyed the day very much. Next Sunday the traps will be open to competitors who wish to practice for the championship on Jan. 11, and a special take-home trophy will be awarded the best scratch score on the 100 birds. Shooting will start at 2:30 P.M. sharp, and both sets of traps will be used if necessary.

Handicap sweep, 25 targets:			
H F Clark	4 25	J E Meyer	3 21
H Funke	3 24	E A Sierck	3 20
J W Alker	2 23	C Clark	7 19
F R Long	1 23	D E Smith	2 16

Scratch sweepstakes, 10 and 15 targets:			
Targets: 10 15		Targets: 10 15	
H F Clark	9 9	H Funke	5 9
J W Alker	9 12	E A Sierck	5 6
F R Long	8 12	C Clark	4 6
D E Smith	7 12		

One hundred birds, scratch:			
J W Alker	88	D E Smith	64
F R Long	84	E A Sierck	58
H F Clark	79	C Clark	50
H Funke	71		

December cup, 25 targets, handicap:			
J W Alker	2 25	L Provost	7 20
H F Clark	4 24	D E Smith	2 20
C Clark	7 23	D Provost	5 20
J E Meyer	3 23	B G Loomis	3 19

**Huntington Valley Gun Club.**

JENKINTOWN, Pa., Dec. 28.—S. C. Fox, Jr., and Geo. W. Elkins, Jr., divided rather unevenly the four events to-day. Elkins took the first and Fox the rest. Scores:

First event, 10 targets, handicap:			
G W Elkins, Jr.	1 10	Tyler	3 9
Tilden	0 9	Capt Sewell	4 8
S C Fox, Jr.	2 9	I E Thompson	0 8

Second event, 15 targets, handicap:			
Lippincott	2 16	Tilden	4 18
S C Fox, Jr.	2 16	Thompson	0 14
G Lovering	1 16	G W Elkins, Jr.	1 11
Capt Sewell	5 14		

In the miss-and-out which followed, Fox won the decision, breaking 12 straight, while Lovering broke 11, Lippincott falling out early in the shoot.

Third event, 25 targets, handicap:			
S C Fox, Jr.	4 25	Tyler	7 23
Tilden	3 25	Capt Sewell	8 24
G Lovering	2 25	Elkins, Jr.	5 22

In the miss-and-out to determine the winner, Fox, Jr., again won the decision.

Fourth event, 25 targets, handicap:			
S C Fox, Jr.	2 26	Thompson	1 24
Tyler	7 24	G Lovering	3 24
Lippincott	7 22	G W Elkins, Jr.	5 21
Tilden	4 21		

**Port Washington Gun Club.**

PORT WASHINGTON, L. I., Dec. 25.—A scant half dozen aerosaucer exterminators stayed home from church on this glorious Christmas Day to shoot for the noonday piece de resistance, under the management of Capt. C. C. Thatcher, a goodly number of gobblers were saved from cold storage and offered up (on the hoof) as prizes to the upper register clay scaler exponents. Joe Walsh had an eye on a couple of Christmas dinners, getting the first with 9 out of 10, and the second after missing two targets. Bill Saords lugged home one Meleagris gallopavo for Mrs. Bill and the kids. Bill scattered the fragments of 8 of the 10 opportunities offered. Tom Mallon was the only other shooter with anything of a discerning optic. He shattered 7 scalers, allowing 3 to go unscathed on through the ambient atmosphere to a watery grave. On New Year's Day the big event will be a scratch shoot at 50 targets for five 10-case notes. So far reports say twenty-five have entered. If you are nearby or must come from a distance, drop in. Capt. Thatcher's hospitality is renowned in Nassau county, and he can shoot some. Scores:

Events:	1	2	3	Events:	1	2	3
Thos Mallon	7	5	5	Jos Walsh	9	8	8
J Miller	5	2	..	H Pouley	..	..	7
W Saords	4	8	..				

**Penn Square Gun Club.**

PENN SQUARE, Pa., Dec. 28.—The most successful shoot in the history of the Penn Square Gun Club was held on their grounds this afternoon. James Chalk was the high gun of the afternoon getting 27 out of 29. Summary:

Miss-and-out sweepstake: Chalk 4, Hart 3, Walters 3, Richter 2, Vaughn 2, Bowman 2, Harmer 1, Jackson 1, Ringler 1, Callahan 1.  
 Twenty-bird shoot: Chalk 19, Felton 17, Hart 16, Walker 16, Richter 15, Bowman 15, Hartell 14, Jackson 14, Callahan 13, Harmer 12.  
 Miss-and-out sweepstake: Mark Hart 4, Chalk 3, Richter 3, Walker 3, Vaughn 2, Bowman 2, Hartell 2, Jamison 1, Jackson 1, Ringler 1, Hoopson 1.

**PARKER GUNS**

**Wear Well, Shoot Well and Handle Well**

Wear well because they are made of the best material by the most skillful craftsmen. Shoot well because they hold the charge compactly together at extreme ranges. Handle well because the greatest attention has always been paid to the distribution of wood and metal, to insure perfect balance and the most symmetrical outline. Twenty-bore Parkers have set the pace for small bores in America, and are growing in popularity every year with the most progressive sportsmen.

### Hudson Gun Club.

JERSEY CITY, N. J., Dec. 29.—Dave Engle with good, consistent shooting, was the best shot at the Hudson Club shoot this morning, and finished high gun with a total of 92 per cent. Carl von Lengerke was his nearest competitor, and finished with 98 per cent. The shooting was a little hard owing to the snow on the ground and a hazy background; otherwise the day was ideal for trapshooting, and on an average the scores were very good. Burlington was on the job again, looking for satisfaction for the trimming that he received at the last shoot, and to make sure of getting even he brought down his 34-in. barrel; but it was just the same and just as easy for Tom Kelley to show him a few points in the game, and he went home a much sadder and a wiser man than he came, as he had to resort to his check book to settle with the cashier, and had to borrow his car fare to get home.

We have completed arrangements for the series of shoots that we are going to hold for three L. C. Smith guns that have been so generously donated by one of our oldest members, Lou. Schortemeier, and will try and start this event on the next shooting date, Jan. 5. Conditions are: 50 birds at each shoot, entrance including targets, \$1.00, and one re-entry allowed each day. There will be eight shoots for the prizes, and the shooters will be divided in three classes, with one gun for each class. Prizes will be awarded to the five highest scores made in the eight shoots. So come out, boys, and try and win a gun. Everybody has a chance, and they are beauties. Don't forget the next date, Jan. 5.

### Piping Rock Gun Club.

LOCUST VALLEY, L. I., Dec. 28.—The first important trapshooting event on the Piping Rock Club's newly built trap grounds took place to-day, and was for a magnificent cup donated by Mr. C. V. Brokaw, of New York. It was a bird handicap affair, and as most of the contestants were new at the sport, some of the allowances were very great. The day was raw and chilly, which, combined with a puffy cross-wind and the inexperience of most of the shooters, they did not score as they had in former practice shoots. Twenty-four, including one woman, took part in the event, and the winner was Donald G. Geddes, of Glen Cove, L. I., who had an allowance of 12 in his 100 birds. He was tied, however by Mortimer L. Schiff, of New York. G. L. Sherer, of Bayswater, L. I.; Mrs. J. E. Davis and J. E. Davis, of Oyster Bay, L. I., but by consistent shooting he finally shot all of them down to Sherer, who com-

pedded Geddes to break 33 out of 35 before Sherer shot out his allowance of 12 targets.

The trapshooting feature at this club has become so very popular that Mr. Mortimer L. Schiff has donated a cup to be shot for on Lincoln's Birthday, and Mr. F. P. Moore has donated a cup for competition on Washington's Birthday. A large number of the ladies are becoming interested in the sport, and are being coached (as are many of the men) by the well-known professional trapshot in the employ of the Du Pont Powder Company, Mr. Jack Fanning, who also laid out the magnificent grounds some two months ago, and which are the most complete in every respect in the country. Mr. Fanning also managed the Brokaw cup event, and it was a very successful affair in every way and all were well pleased. The scores of the contestants follow:

D G Geddes.....	12	104	G E Fahys.....	39	78
M L Schiff.....	60	100	H Norton.....	39	94
J E Davis.....	74	113	L Montant.....	40	87
Mrs J E Davis.....	74	101	J A Blair, Jr.....	45	86
G L Sherer.....	29	112	J P Grace.....	30	98
H F Whitney.....	12	85	J Whigham.....	51	94
A W Rossiter.....	20	87	H Weeks.....	22	65

F P Moore.....	48	86	C Burton.....	50	92

### Marine and Field Club.

BATH BEACH, L. I., Dec. 28.—Only a small number of shooters turned out to-day, but quality more than compensated for loss in numbers. E. H. Lott broke 92 out of 100, going straight on 75, and every bird was a fast flier. This was in December cup event. Lott also broke 21 out of 25 in handicap trophy event, but was beaten by P. R. Towne with 22 from 2. The above prominently mentioned gentleman won scratch event on 25 clay discs, with 23. C. M. Camp took second with 20, while Towne tacked his claim on third with 19.

December cup, 100 targets, handicap:					
W H Lott.....	0	92	L C Hopkins.....	8	85
P R Towne.....	8	89	C M Camp.....	12	71
Trophy shoot, 25 targets, handicap:					
P R Towne.....	2	22	C M Camp.....	4	19
E H Lott.....	0	21	W C Biddle.....	5	18
L C Hopkins.....	2	20			
Scratch shoot, 25 targets:					
E H Lott.....	23		L C Hopkins.....	16	
C M Camp.....	20		W H McCouille.....	14	
P R Towne.....	19				

### Rhode Island C. C.

BARRINGTON, R. I., Dec. 28.—This was day one in trapshooting season, and she dragged forth fifteen devotees. Rhode Island Country Club, one of the clay-bird roosting places, generally turns out double this number, but never more enthusiasm. From Providence came C. H. Gardner, who had a most consistent and unvarying eye. He broke 22 out of 25 in each of five events. Merriam got place with three 21s and a 20.

Dr C H Gardner.....	22	22	22	22	22
H T Merriman.....	21	21	21	21	20

### Airedale Field Trials.

TORONTO, Canada, Dec. 26.—*Editor Forest and Stream:* I have read with considerable interest E. M. Post's letter in the issue of FOREST AND STREAM of Dec. 14.

I do not altogether agree with Mr. Post's contention that a dog with a gray coat and a light eye should win in the show ring, even though he should have the other points of the ideal Airedale terrier.

It appears to me that the great pleasure in breeding Airedale terriers is to produce them as near the standard laid down as possible. If we begin to get away from the black saddle and the well placed dark eye, we might just as logically drift away from important points such as good bone, long clean skull, rough texture of coat, etc. My contention is that we have an Airedale terrier standard, and should all breed as close to it as we possibly can. There is only one point in the standard that I do not agree with—that is the limit of weight for dogs of 40 to 45 pounds. Of late years we have seen very few 40-pound Airedales coming anywhere near the money in our leading shows. On the other hand the Airedale terriers that have gone right to the top during recent years in England, United States and Canada have been dogs weighing, I venture to say, nearer 50 pounds than 45.

As to the trimming and stripping to which Airedale terriers are subjected before being shown, I don't believe this practice is altogether objectionable.

The Airedale terriers I keep and never intend to show are stripped twice each year in order to keep their coat in what I believe to be a proper condition. I am inclined to think that the Airedale two months after he has been stripped is in better shape as an ideal hunting dog than if his coat was allowed to grow indefinitely. I do not believe that the coat of the average winning Airedale at the time he is shown is in an artificial condition, as is claimed by Mr. Post. In my humble opinion, the condition of coat of the average winning Airedale at the time of the show is in good condition for bench show purposes, and also for practical work such as Airedales are used for in the Western States.

Mr. Post appears to me to have slightly mixed the conditions of bench shows with those of field trials. I quite agree with Mr. Post that Airedales should be properly trained as gun dogs, but the points required for such work could only be brought out at properly constituted field trials, and in this connection I think it a great pity that we do not see more of the latter on this side of the water.

J. F. H. USSHER.

### The Airedale's Coat.

PITCAIRN, Pa., Dec. 21.—*Editor Forest and Stream:* You ask for an expression of opinion about the coat of the Airedale, and as a breeder and admirer of the breed I would say that E. M. Post has expressed my sentiments exactly.

The coat should consist of the long wire hair and the soft under coat. All agree on that

point. Then why in reason should we pick them for showing?

Breeding for color and dark eyes is all right, but I do not think it should be considered in judging. The bench is a poor place to judge a dog, especially an Airedale. Why, I have had them with more sense and reasoning powers than some people, and that leads me to comment on your editorial, "Reason and Instinct." You have the correct idea. The learned scientist may tell us that man alone of all created life is gifted with the faculty of reason, but we who love the outdoor life and the animals know that many animals are able to reason.

R. K. BOYER.

### Psychology of the Dog.

PROFESSOR PETRUNKEVITCH, Cameron and Woodruff, of Yale University, gave tests recently to Jasper, an English brindle terrier, two years and three months old, born in Richmond, Va., and owned by Dixie Taylor, who is visiting different colleges to let the professors of psychology test the animal's mental qualities.

Prof. Petrunkevitch gave a two hours' test to Jasper and then said he was the most wonderful dog he had ever seen. The professor ordered the dog to walk up the stairs, stop in the middle, and stand on his hind feet. Jasper started at once up the stairs and directly in the middle of the staircase he stopped and placed his fore paws on the bannister rail. Professor Woodruff went into a dark room, while Jasper's owner sat in the parlor, a few doors away, with the dog. Taylor then told the dog to go into the room in which Professor Woodruff was and

take a handkerchief out of the professor's pocket. The dog immediately did as he was bidden.

Other tests put to the animal were equally difficult. He was told to find a jardinière, which he did immediately. In quick succession he was told to knock over a waste basket, open a door and pick up a pencil, all of which he performed immediately after the command.

BALTIMORE, Md., Dec. 27.—Johns Hopkins University took Jasper in hand to-day. Professor John B. Watson, head of the experimental psychology department in the university, and a widely known writer on psychological subjects, was there, and with him were Professor R. W. Wood, professor of physics; Professor Herbert Spencer Jennings, professor of biology; Professor Knight Dunlap, professor of biology, and Drs. C. Bassett and Leonard K. Hirshberg.

A few words from his master and the dog, after mounting a table for a look out of a window, ran down a hall around the corner and closed the door. Taylor gave a number of orders through a closed door, and they were all obeyed. A rubber ball, a pair of spectacles, a whisk broom, a hat and other articles were placed in a row on the floor, and Jasper was instructed to select one of them. He made only one or two errors.

"Whisper your commands to him," suggested Dr. Dunlap, so Taylor breathed a few words into the animal's ear, whereupon Jasper romped over to a lot of objects and picked up the correct one—a ball. Tests tried out in the open succeeded equally as well as those in the laboratory. Jasper ran across the street and stood up against the wall, and when it was suggested in a casual way that he run a block and crawl into an automobile there, the dog went to the place designated, but the machine was too high for him to jump into.

## Airedales.

ON Feb. 24, at the Murray Hill Lyceum, Manhattan, the annual show of the Airedale Terrier Club, of Long Island, will be held. This is a four-point show and will be held on the day following the close of the Westminster show and on the day before the Boston show, thereby giving the exhibitors an opportunity of acquiring sixteen points in less than one week. The listed special prizes are the best ever offered at any specialty show. Further information will be furnished by O. J. Butler, secretary of the bench show committee, 59 William street, Manhattan.

## TRAPSHOOTING NOTES.

### Smith Gun Club.

NEWARK, N. J., Dec. 25.—High gun went to William Hassinger in the 100-target event in the holiday shoot of the Smith Gun Club, at Wiedenmayer's Park to-day with 91. William Trowbridge was second with 90; Sam Thornton third with 88. Scores:

W Hassinger..... 91	J Erb..... 82
J C Weiler..... 83	Dr Moeller..... 78
J Hudson..... 87	H Hassinger..... 84
G W Naugle..... 80	W Trowbridge..... 90
S Thornton..... 88	

Sweepstakes events were shot as follows:

## Pahquioque Rod and Gun Club.

DANBURY, Conn., Dec. 25.—F. G. Clark won the honors at the Christmas shoot of the Pahquioque Gun Club to-day. There were about twenty shooters. Clark broke his first 30 straight, making him 185 out of 200 for the Du Pont trophy. Gregory broke 43, making him 184; Daley broke 41, making him 182. Clark was high gun for the day with 45 out of 50. Gregory and Olmstead each broke 43; Daly 41, Sunderland 38, Mansfield 37, E. Miller 34, J. Osborne 31, R. Bailey 30, C. Snell 30, F. Coker 29, and C. Miller 27.

An event that caused considerable interest was the 20-gauge contest, the gun below the elbow. There were ten entries in this event, which was won by Clark with 12 out of 15, with E. H. Bailey second, with 11, Dr. Sunderland 9, J. Osborne 9, W. G. Olmstead 9, C. Snell 9, C. Daley 3, R. Bailey 7, F. Lawrence 7.

Another feature was a race between two young nimrods, Elliott Gregory, son of William Gregory, and William Sunderland, son of Dr. Sunderland. They shot at 25 targets each. Gregory broke 10, and Sunderland 8.

## Bourbon (Ind.) Gun Club.

BOURBON, Ind., Dec. 29.—Enclosed find scores of our Christmas shoot. We had a cold and windy day, but the little clay targets gave us lots of sport, so we did not mind the weather. Scores:

	Shot at. Broke		Shot at. Broke
Radeliff.....	50 33	Vink.....	50 19
Stoaker.....	50 35	Sponceller.....	30 18
Metheny.....	50 32	Sickman.....	30 21
Dilley.....	50 41	Wilson.....	30 23
Russell.....	50 42	Taylor.....	30 16
Miller.....	30 17	Highway.....	15 9
Ailet.....	30 16		L. R.

## Dows Gun Club.

Dows, Ia., Dec. 21.—We held our practice shoot this afternoon under unfavorable conditions, so our scores look ragged. A high wind was blowing the targets in all directions, as the following scores show:

	Shot at. Broke		Shot at. Broke
Minkleman.....	30 18	Shafer.....	60 39
Hemenway.....	50 32	Satterlee.....	55 28
Rummel.....	25 20	McNeilly.....	55 24
Wilson.....	50 39	Millet.....	35 17
		W. J. Wilson, Sec'y.	

## Eagle Gun Club.

MANOA, Pa., Dec. 28.—Harry B. Fisher shot the only straight score at Eagle Gun Club to-day. Four gunmen shared second. They were Thomas, Melreth, Paulson and Smith. Scores:

H Fisher.....	30 10	Alter.....	28 7
C Thomas.....	30 9	Hull.....	28 8
Melreth.....	29 9	Kinchslor.....	27 7
F Paulson.....	28 9	Winger.....	28 7
H Smith.....	27 9

ROLL OF HONOR.

The following gentlemen have possibles to their credit: Scott, of Warren; Fort, of Baltimore; Seaborn, of Youngstown; Prentys and Armstrong, of Golden Gate; Poindexter and Dreher, of Denver; Rush, Coats, Wilburn and Berger, of Spokane; Crossman, of St. Louis; Hosmer, of Boston; Royal, of Pittsburgh; Dolfen, of Springfield; Mattmiller, of Louisville.

On an after Jan. 1 only those with paid up 1913 membership are eligible on the teams. Team captains, please take notice.

In order that our score sheet may go out weekly on Tuesday, reports must reach the secretary-treasurer not later than Monday noon after each match. Clubs are liable to a fine for being negligent in this matter.

It is gratifying to notice the wide general improvement in the scores. Congratulations.

J. B. CRABTREE, Sec'y-Treas.

**OLD LEVIATHAN OF BURNT MOUNTAIN LAKE.**

Continued from page 6.

a mad flourish of his huge tail he disappeared from sight.

"Hell!" said Rube, staring at his empty hand. He sat thus for several minutes, position unchanged, his hand held out before him, like an accusing sign. Then he picked up the oars and in silence rowed ashore.

Beside a small stream that ran off the hillside into the lake, the anglers made a landing. A short distance back from shore they found an open, grassy spot beside a little pool—a place sweet with warm, wood odors, and sunlight, and the sound of the brook as it trickled under a brush pile.

Here Rube kindled a fire and brewed tea. At the end of the fourth cup he gazed mournfully at "Beau Brummel," who was seated on a log absently chewing a sandwich and brooding over his misfortune.

"I'd ruther hev lost the biggest buck on the township than hev had that fish get away," he said.

The "Fisherwoman" sighed and warmed her hands over the fire.

"I believe he'd have weighed twenty pounds."

"Yes," answered Rube, draining his fifth cup, "all of that, and I dunno but he might hev hefted a few pounds more."

"Let's go home," said "Beau Brummel" suddenly.

# Studebaker

## New Models

**Cars with few equals at any price and no equals at the Studebaker Price**

When you buy a gun, ammunition or any other article which is part of your outfit, Mr. Sportsman, you are governed largely in your selection by the maker's name.

When you buy an automobile you should KNOW whether its maker's name stands for the substantial value which guarantees you a satisfactory investment.

The name Studebaker has always been associated with inflexible honesty of manufacture. To-day it stands, in the minds of 88,000 automobile owners, as a fixed standard by which all other automobile values are judged.

This year The Studebaker Corporation will build \$65,000,000 worth of automobiles. Such an output MUST—by its very magnitude—suggest the financial and mechanical resources of the Studebaker plant.

It is the bigness of this production—made possible by Studebaker facilities for the purchase and conversion of raw material into the finished car—that has brought a really fine automobile within the reach of the people who have waited for a car of thoroughbred appearance and performance—at a price they feel they can afford.

Such comfort and luxury and beauty of line as is typified by the Studebaker new models is found only in cars of the highest price, and we doubt if any builder can lay claim to a more clean, compact, beautiful and efficient piece of mechanism than the Studebaker chassis reveals when exposed.

The quality of the steel used in Studebaker automobile construction, its heat treatments to give it the requisite hardness and strength, and the careful, tested machine work, are assurances of endurance.

And no motors are built along more advanced and proven lines than Studebaker motors. They are rated BELOW rather than above their actual horse power, this abundance of reserve power for emergencies. They are powerful, noiseless, instantly responsive to the throttle. They are simple, sure, without complicated features. They are motors of the enclosed valve type, cast en bloc, and cooled by the simplest and most effective system known.

Studebaker cars are made in their entirety at the Studebaker plant—the largest, best equipped and most efficiently manned in the world.

The less you know about a motor car, the more you must depend upon the builder's name and reputation. You can't go wrong in buying a Studebaker. It should be your choice not only because it is built by builders of sterling repute, but because it is the ultimate choice of the men "who know."

See our dealer or send to us for full specifications and catalogue H.

### Bergen Beach Gun Club.

PROOKLYN, N. Y., Jan. 1.—One of the largest fields of the season (forty-three) took part in the tenth annual merchandise handicap shoot of the Bergen Beach Gun Club. The winner was Dr. Sauer, who had scores of 24 and 21, giving him 45. J. H. Vanderveer was second. Class B was won by A. Schubel, and Class C was taken by C. S. Medler. The scores:

Annual merchandise shoot, 50 targets:

Dr Sauer	45	J. Gaughan	33
J H Vanderveer	43	C Ferguson	32
A. Schubel	42	D Van Valer	32
P von Boeckman	42	W S Schroeder	32
W A Silkworth	42	J F Simonson	32
J A Howard	41	J H Richmond	32
J H Hendrickson	40	C Cooper	31
C S Medler	39	J Conover	31
F Hewens	39	J Welzmeiler	31
C A Medler	39	J Jones	31

A M Dalton	35	*C von Lengerke	37
F H Thoben	34	*T Davis	35
L Brush	33		

\*Professionals.

Dec. 28.—Difficult conditions were experienced by the trapshooters of the Bergen Beach Gun Club on Saturday. A high wind swept across the traps and made it exceedingly hard for the nimrods to hit the targets. Dr. Sauer, who shot from scratch, was the winner, breaking 82 out of a possible 100 targets. Capt. H. W. Dreyer and H. Hewens tied for second place with 80 each. Scores:

H W Dreyer	10	80	C Schroeder	10	71
H Hewens	14	80	J Thompson	5	67
Dr Sauer	0	82	H Kellar	0	66
P von Boeckman	0	79	W Skidmore	7	66
R Morgan	0	75	L Richardson	15	63
P Collins	15	71	C Echeveria	15	44

### Cleveland Gun Club.

CLEVELAND, O., Jan. 2.—Bruns was the winner of the New Year's shoot at the traps of the Cleveland Gun Club, getting the New Year's trophy with 136 out of 150 and tying with Stepp in the special trophy event with 43 out of 45. Scores:

New Year's shoot, 150 targets per man:

Bruns	136	Dibble	119
Stepp	134	Leggett	110
J Rummell	130	Rummell	101
Harris	130	Stone	97
Jones	129	Noble	97
Dickerman	128	Telling	110
Blakeslee	126	L Rummell	92
Archer	125	Bell	73
J Richards	125	Ott	43
Brown	123	Hale	39
Freeman	121		

Special shoot, 45 targets per man:

Bruns	43	Jones	40
Stepp	43	Rockwell	39
Archer	41	Brown	38
J Rummell	41	Richards	37

### Laurel House Gun Club.

LAKEWOOD, N. J., Jan. 4.—Laurels in the Pine handicap went into competition here to-day. The first leg was taken by Frank F. Vanderhof, from New York city. He eliminated 92 out of 100 aerosaucers, which, added to 6 handouts, gave him upper berth with 98. C. V. Murphy from scratch gave him plenty of room in the front of the car, feeling by actually cracking 91 baked mud discs. W. E. Miner trailed into place with 85. Other scores: J. C. Rosegarten 76, C. J. Murphy 65, J. H. Hance 64, C. O. Kayser 64, T. E. Tuninson 63, J. L. Bright 60, T. D. Davis 60, W. C. O'Leary 55, G. G. Schaefer 51.

The Saturday afternoon shoot will be a regular event during the winter.

### Greenwich C. C.

GREENWICH, Conn., Jan. 4.—Targets without gyroscopes were unsuccessfully used here to-day, in consequence scores were low, as was the attendance, because a vicious off-sound wind insisted upon being present, though uninvited.

Five rock-breakers were on the score, each working over 100 saucers. M. B. Foster with a handicap of 8, got away with 98 out of his quota. N. Webb with double the winner's free scalars, scored 96. Geo. M. Pinchon from 20 untrapped aerosaucers, was credited with 89. E. C. Willis, from 20 gratis flyers, wrecked 82, with J. B. Chapman bringing up the rear guard with 76 eradications from 16.

## TRAPSHOOTING NOTES.

### Buffalo Audubon Club.

BUFFALO, N. Y., Jan. 4.—The first shoot for 1913 was a frost in point of numbers, but a good one in point of enthusiasm. At a meeting held after the shoot, seven new members were elected, showing that the club is in a healthy condition. A meeting of the committee on the State shoot was held at the Lafayette Hotel, in the evening, and plans to make it one of the best shoots on record were formulated.

Hopper made a clean sweep in Class A, excepting in event 3, where "Pop Lambert" went straight. In Class B Messrs. Luckow, Jerauld and Cumming won in the order named. Scores:

Targets:	15	20	20	20	25
Wright	14	18	18	16	22
Lambert	12	17	20	11	21
Blackmer	13	17	15	16	19

**Ammunition Consumption in Shooting Galleries.**

IN the long series of business romances evolved in this age of industry, one important employment of man has been consistently overlooked. It is safe to say that not one person in ten thousand who reads these lines has ever before seen a printed word bearing on the subject of the shooting gallery.

Probably every other work of mankind has been done into type—in either a favorable or unfavorable light—and nearly as many have found their way to the expressive moving picture film and have been flashed in drama or comedy before watching thousands. But the tale of the .22 repeater, the little copper cartridge and the lance of fire has been passed by. A loud-mouthed imitation of Buffalo Bill, a begrimed row of crooked shooting rifles, and a line of clay pipes and white-washed targets—this, sad to say, has been the popular impression of the gallery man and his paraphernalia.

It will surprise the world to know that one string of galleries located at Coney Island has been so conducted as to continue for twenty-six years in ever-increasing prosperity against a handicap of fire losses alone—which the festive island seems fated to bear at regular periods—of more than a quarter of a million dollars. This magnificently organized machine of seven separate galleries is owned by the McCullough brothers, James J. and Henry M., who started twenty-eight years ago with one gallery on the Bowery in New York city, and who by exceptional sagacity and industry, have developed a business which has no peer of its kind in the world.

Nothing is more apparent than the fact that a determination to give every shooter his money's worth has been responsible for the continued prosperity of the McCullough galleries where too many others have flown with the season. From the early 80s, when the brothers staked their little pile in the Bowery gallery venture, all through the coming and going of the Coney crowds for a half lifetime of summers, the man or woman who has stepped up to the counter in a McCullough gallery has found a "square" gun, and the best ammunition to be had, and has been given a fair chance at the targets.

In the gallery business, as in other walks of life, twenty-eight years have brought many innovations, and these McCullough patrons have been the first to enjoy. The now familiar glass balls playing at the top of a stream of water were first offered as targets in these galleries, as was the popular "falling bird" target. The McCulloughs were also first to provide shooters with the modern Remington gallery rifle, and have lost no opportunity at any time to place gallery shooting on a higher plane or to add to its attractiveness.

Some idea of the staple character of the McCullough business may be gathered from the fact that in twenty-six years at Coney Island, their galleries have never consumed less than 3,500,000 cartridges annually. No, this is not a statement from the report of the Secretary of War—the McCullough books will substantiate it. No other concern or individual in civil life has ever developed such an insatiable appetite for cartridges. To dole out this tremendous supply of ammunition to those anxious to "try their skill," at least fifty men are employed in season to operate the local galleries, and some outfits that "follow the fairs" and other big events, all over the continent. All of these activities are handled from the modern, business-like headquarters at Coney Island.

As the McCulloughs have developed in their own work, they have transmitted their experience to others, and they are responsible for the establishment of many galleries throughout this and many foreign countries. It was early necessary to devote a corner of the office to the making of the various targets and other parts and to the repair and general care of guns and other work in connection with the upkeep of operating galleries and outfitting new ones. This "corner" soon spread into an up-to-date shop and foundry, equipped with the latest machinery. In this shop complete galleries and units of galleries are made and shipped to all parts of the world.

So here, says Newark Star, is the outline of a big, broad "success" story, with its opening scene laid in a dingy room on the Bowery, and its succeeding chapters, replete with the peculiar interest inherent in this little-known branch of industrial history, reaching into every civilized land on the globe.

**Huntingdon Valley Country Club.**

JENKINTOWN, Jan. 4.—Six events were on the program here to-day. Rowland won every event, shooting a great gun all through. The scores:

First event, 25 targets, handicap—Rowland (7) 26; W. L. Ross (10) 23; Gilpin Lovering (1) 23; George F. Tyler (8) 22; George W. Elkins, Jr. (7) 22.

Second event, 15 targets, handicap—S. C. Fox (0) 12; Tyler (4) 14; Rowland (5) 16; Ross (5) 14; Lovering (0) 10.

Third event, 10 targets, handicap—Fox (0) 7; Ross (4) 11; Tyler (3) 10; Rowland (4) 14; Lovering (0) 7.

Fourth event, 25 targets, handicap—Tyler (7) 24; Ross (10) 22; Rowland (5) 27; George W. Elkins, Jr. (5) 24.

Fifth event 25 targets—G. Lovering 19, Rowland 21, Fox 15.

Extra event, 25 targets—Rowland 17, Fox 14, Lovering 21.

**Robin Hood Gun Club.**

STATEN ISLAND, N. Y., Jan. 1.—Eight guns were on the firing line at the New Year's Day shoot on the new grounds at Concord. The main feature was the shoot for the 1912 cup that had to be won three times. Rowley won the cup three times and took it home. Following are the scores of to-day:

1912 Cup, 100 targets—C. Rowley 93, G. Hutchings 86, G. Schofield 65, W. Rohlfis 80, G. Conelley 66.

**Genesee Gun Club.**

UTICA, N. Y., Jan. 1.—The midwinter clay-pigeon tournament of the Genesee Gun Club which took place to-day was a success. Rarely has such a large number of sportsmen been brought together at a target shoot. Two automatic traps began throwing targets at 10 o'clock in the morning and there was no cessation in the banging of the guns until it became too dark to see the whirling discs against the skyline. More than forty marksmen from all parts of Central and Northern New York competed for the cash and merchandise prizes and the pure love of one of the cleanest and most fascinating outdoor sports known. Averages fell below those usually made, which was to be expected, partly

from lack of practice, but mainly due to a gusty wind, which caused the asphalt to jump and dive through the loads of shot carefully directed.

The winners in the big merchandise event were: Charles Dalley, Baldwinsville; B. K. McCurley, Utica; T. L. Davidson, Utica; T. E. Clay, Syracuse; Stephen Williams, Washington Mills; A. W. Meagher, Syracuse; J. J. Hamn, Watertown; C. F. Brunner, Utica; Jerome Dehee, Chadwicks; H. D. Holmes, Gouverneur; Charles Jenne, Ilion.

**Saratoga Gun Club.**

SARATOGA, N. Y., Jan. 2.—The Saratoga Gun Club started the New Year with an ideal day and a fair field of shooters. The final event for the Du Pont trophy was shot, and Corey, breaking 21 out of 25 in his last string, won the trophy by the narrow margin of one target. Green finished second, one target ahead of Kearney. The race for the trophy has been close all through the season, never more than three targets separating the leaders. Following are the scores:

	Shot at.	Broke		Shot at.	Broke
Nolan	75	47	Hammond	40	18
Green	75	40	Butler	35	20
Corey	60	38	Kelley	25	10
Kearney	60	36	Van Aernam	25	10

## Sheep Hunting Around Alaska's Highest Volcano

By HARRY G. SCHAUPP

### In Two Parts—Part One

a gentle reminder that he is not standing on terra firma and he blinks sorrowfully, tremblingly wondering what he has done now to offend his lord and master. Another solar-plexus punch and he gets the impression that he is doing something wrong. So he experiments by lifting the opposite foot, throwing his full weight on the one resting on your own. You clinch your teeth on an indrawn breath and rupture a few brain cells in strong thoughts that eventually reach him by mental telepathy, for he shifts his weight to the other foot and releases yours. This also relieves the lock-jaw, and your mouth opens as the retained breath and thoughts come forth in quick audible sounds that relegate the horse to those fiery regions so close beneath Wrangell.

On the Nedina we rested our horses awhile near an old waterwheel which some earlier prospectors had constructed for running a small sawmill to cut lumber for sluice boxes.

The second day we camped at the head of the Dadina at timber line at Wrangell's base. The horses were turned out to make the best of the scanty grass, and despite the hobbles, were continually taking the back trail for the Copper, where feed was good. One forenoon, after a return in search of the horse, Frank said he had seen twenty-three sheep in a basin at the head of a short tributary gulch. As prospecting had not panned out well, we decided to put in some time in hunting sheep for a winter's supply of meat. We accordingly made plans for getting at this bunch of twenty-three.

As opportunity did not seem favorable for getting within range by going up the gulch, we decided that Lou and I should each take a side and gain a commanding position on the cliffs above. Frank was to take the .22 rifle and automatic pistol (as we only had two large rifles) and work up the center until the sheep became alarmed and fled to the rocky ranges on either side. The head of the gulch terminated at a very high, steep ridge, whose upper reaches were deeply covered with snow. We figured that when the sheep tried to leave the basin they would take to the more easily accessible rocky sides. After a long climb, I gained what I thought was a favorable position. But in the meantime heavy fog or clouds had gathered about the heights. These broke and closed again at intervals. Making my way out to a projecting point over a perpendicular

made friendly overtures to a small Siwash pup.

Frank and Lou took two of their horses and I one of mine. We swam the horses across the Copper, while our Indian friend, Allen, took us across in his boat. Allen seemed to think very favorably of the mineral resources of the Wrangell region.

"Mebe so biyou (much) gold sit down big stone. Mebe so ketchum chetta (copper). Mebe so halo (no)."

We packed our horses and headed for the "big stone" (mountain), occasionally making use of an old Indian trail. To digress a moment, did you ever lash a pack on a skittish horse and have him shy over against you, planting his non-shod hoof on your own? Um, well it's not conducive to that evenness of temperament so essential on a hot day with a horde of mosquitoes drilling prospect holes on your face and neck. Particularly so after a morning's chase of several miles for the horses where the feed is scarce and they have back-tracked. You give him a short-arm jab as

**W**E left our cabin on the Copper River in the early part of September for a prospecting and hunting trip around the Wrangell volcano.

Frank made one trip over there with a pack on his back, taking along Spot, who also carried a pack. Spot was a canine friend who was on the spot when it came to packing or a hard pull on a sled. He held himself aloof from the scrawny, ill-fed Indian dogs, but

precipice, I waited for the clouds to roll by. At last, like the unfolding of some great panorama, they were drawn aside, revealing the titanic arena below with the sheep lying scattered about. I counted them; there were twenty-three. As so much time had elapsed without any indications of my two pals, I concluded that, the weather being so unfavorable, they had returned to camp. I then decided that if the clouds broke again I would try a long chance shot from where I was with the 6 mm. This opportunity soon arrived, and, though the distance was too great to distinguish which carried the largest horns, I singled out one of the larger white spots and fired. Failing to take into consideration that I was shooting almost straight down, I evidently

pected to kill sheep with a .22, but I have killed goat and deer with a .22 special. After emptying the .22, Frank used the pistol without result. Had he used it first he might have reduced that unlucky number, 23; although the pistol is accurate for quite long range and has a good penetration.

The height I was above the sheep may be realized inasmuch as I had not seen Frank or heard the reports of his shooting.

No simmering pot of sheep meat wafted its fragrant odors about our camp-fire that night, and our steaks were sliced from a slab of bacon.

The following day I ascended a high point for a reconnoissance and took a few snap-shots with the camera. To my left was Mount Drum,

slopes are darkened by falling ashes, but are soon whitened by a fresh fall of snow.

The next day we sought new fields for the sheep, Frank and Lou going on the mesas toward Sanford, while I took to the higher ridges of Wrangell. I worked over until I could look down upon the glacier and the silvery thread of the Chetudina's waters as it wound its way through the ice-cut gorge several thousand feet below.

As I had not found likely looking sheep country, I turned back for camp. Coming out on a high ridge overlooking the Dadina, I took out my field glasses and scanned the opposite slopes for the other two hunters. I soon discovered several sheep feeding, and a moment after saw Frank and Lou making their way toward them. A little later I could see the white puffs of smoke as the shooting commenced, but it was all soon lost to view in a depression beyond. That evening they returned, each carrying a sheep, and a third large one was left behind to be brought in the next day. In the morning Lou and I went out and brought in the large one.

For several days I had talked of attempting to climb Mount Wrangell, whose summit at that time no one had come anywhere near reaching. Frank and Lou laughed at the foolishness of anyone having a desire to climb high mountains; but I said I was going to have a try at it anyway. I had intended to start that morning, but carrying in the sheep had occupied the forenoon, so I did not get away until 2 P. M. As I intended to spend a night on the glacier, I carried a pack of about forty pounds, consisting of a sleeping bag, snowshoes, camera, field glasses, biscuits and sheep meat. I took to the glacier, whose greenish tinted front was fissured and curved into irregular shapes. Climbing was quite good, except for the numerous large crevasses cut across the glacier.

When the lengthening twilight shadows had deepened the gloom of these bottomless pits, I had made about seven miles up the glacier and decided to bivouac for the night. I would have gone further that evening, but old "Kah-Una-Lita" had shaken up his fires, putting on the forced draft until a dense volume of black smoke rolled forth. Quite contrary to its prevailing direction, the smoke now drifted off to the left across the glacier ahead of me. Its density was greater than the atmosphere, for it flowed along in an immense stream down Wrangell's sloping shoulder and off through the pass above a small projecting peak. Retaining its outline, with a slight undulating movement, it resembled some monstrous serpent slowly crawling forth in its nocturnal search for prey. The possibility of it changing its course and enveloping me in its sinuous folds was my reason for not attempting a higher altitude before dark. Opening my pack, I dined on biscuits and "ovis dalli." That last looks good, and to some may appear to be an item from a French menu, but is only the scientific term for this particular species of sheep. The lid from a baking powder can, with some lard and a small piece of rag, was my alcohol-lamp by which I melted snow for a cup of water. Then among the crevasses, near a wall of darkened ice, I unrolled my sleeping bag on the snow and crawled in for the night.

shot over. The sheep immediately leaped to their feet, somewhat bewildered, and a second shot brought no noticeable results. Then, contrary to our expectations, they made for the head of the basin and succeeded in forcing their way through the snow to the top of the ridge, over which they disappeared. There was a compelling motive for their actions, as I learned later on comparing notes at camp that evening.

By taking advantage of available cover, of which we had not been aware, Frank had succeeded so well in his stealthy approach on the sheep that he was almost among them when I opened fire. As he was so close and not knowing from what quarter the shots came, he had at once sought shelter among some rocks. After an interval he stepped forth and emptied the .22 at them. Though he heard several bullets strike, he failed to stop any of them.

Most hunters will smile at the idea of ex-

a beautiful shell-shaped mountain with a serrated top of glistening snow, like a tinted seashell set on edge. Before me stood the 16,200-foot Mount Sanford, whose upper slopes still retained the snow mantle it had worn for untold ages. The higher peaks in these northern latitudes kick off their foot covering during the summer, but keep their top-coat on and head well muffled. To the right lay the long, dome-shaped, ice-armored volcano of Wrangell, "Kah-Una-Lita" (the Smoke Mountain) of the Indians. The grim old warrior wears his glacial coat of mail in calm complacency, only breathing out a vast volume of smoke as evidence of the mighty internal fires beneath. On a clear, calm, wintry day, with temperature around 40 or 50 degrees below zero, it presents a magnificent spectacle, with its great volume of smoke ascending several thousand feet perpendicularly and then mushrooming out into a gigantic head. Sometimes the glistening, snowy

# Little Bald Mountain, N. B.

By RUPERT STARBIRD

It was old, hard packed snow and I couldn't even pound a hole for my hip to rest in. It was cold snow, too! It's a hard proposition to try to warm up a whole glacier through a few thicknesses of blanket.

I shivered and shook until I became alarmed for fear of the volcano getting into synchronic vibration with me and causing an earthquake. Even Morpheus gave me the cold shoulder, depriving me of the solace of his lethean arms. It was a splendid opportunity, though, for dreamy retrospection. I presume I became so wrapt in thought that its additional folds afforded some warmth, for I dozed off toward morning and overslept.

After a hasty breakfast of frozen biscuits and meat I resumed my way with only the camera and snowshoes. The latter I soon had to use, as I had got up to the loose snow, much of which had fallen in the recent stormy weather about the summit. The snowshoes were rather small, and this, with the loose snow into which I sank deeply, and the increasing rarity of the atmosphere, made climbing exceedingly difficult and laborious.

Passing too close around the sloping end of a crevasse, I stepped on a patch of wind-swept ice and my snowshoes slid, carrying me down. I landed on a ledge six feet below, and scrambling out, went on. The smoke serpent of the previous evening had reared its head in an attitude of defense against the threatened invasion of man.

After climbing several hours, I saw that at the progress I was making, I would probably reach the crater by evening—too late to return to my night's camp by dark. It would have been folly to have attempted to remain on the summit at 14,000 feet over night without shelter. If not death from exposure, it most likely would have been by asphyxiation in the smoke and gases. Had I left the main camp early in the morning instead of 2 P. M., I could have reached a much higher altitude for my night's camp. Then from there have reached the summit by noon and returned to the night's camp for another night, or probably reached the main camp.

As it was, I reluctantly turned and took the back trail; and on reaching my night's camp, gathered together my pack and hit a fast pace down the glacier. As the afternoon waned, soft fleecy clouds had gathered about the summit, from seemingly nowhere. These spread and settled, and through broken rifts the sun at times burst, casting dark shadowy profiles along the icy slopes. Looking far down across the fissured glacier, beneath the dark, lowering clouds, it seemed like some dismal abyss of Dante's Inferno, where lost souls were tortured.

Big, damp flakes of snow commenced to fall when I reached a large rounded rock passed the day before. Its protecting shadow had preserved its base while the sun had melted away the surrounding surface, leaving it poised on a pedestal of ice like a gigantic football awaiting a kick-off. Camp was reached at dark and a big feed of sheep stew duly appreciated.

In July, 1909, five years after my attempt, the crater was reached by Robert Dunn and William Soule. I had adways planned on going back some day to be the first to look down

(Continued on page 63.)

**T**HE country around Little Bald Mountain, New Brunswick, is a prolific territory in which to hunt, and of especial interest, owing to the variety of game to be found there. It quickens the pulse when one thinks he may meet a bear, caribou, moose, or deer in a day's walk; and variety is the essence of New Brunswick hunting.

Little Bald Mountain lies sixty-five miles northwest of Newcastle, and relatively is hard of access, but you cannot expect to step from a Pullman car into a district where game is plentiful, and the hunters few.

Forty years ago the last big forest fire in

without caribou being seen, either singly or in groups. The largest band I saw contained about twenty-five. This is not a large one, since last year it was not uncommon to see as many as one hundred in a herd. But it was at a time when there was a considerable snow in the woods. Then the moss is not so easily found, but in the open it lies everywhere under the snow.

On the first day after the first meal in camp, I got a deer. I had walked in twelve miles in the morning, much of the way through a wet valley, partly caused by the many beaver dams along the brook. This makes traveling

A QUENCH INTERRUPTED.

this section passed over the tops of the mountains, leaving the timber in valleys standing, and with the help of time only a small dead stub here and there marks the event. Only a few scattering spruces are now making the struggle for existence.

Hunting there is a miniature of that in the mountains of the West. You may go up on the top of a mountain from where other mountaintops, slopes and glades among the spruces unfold themselves to view, and with a good pair of field glasses look over the country at leisure; but the chief purpose of the glasses is in looking for good heads, saving unnecessary walking for game which you would not shoot. These open places furnish food for bear and deer, as well as caribou; for in addition to the moss, they are covered with blueberry bushes, upon which the deer were feeding; but November is a little late for bears.

After the first of November no day passed

hard, but after lunch I was refreshed and ready to make a start.

The first mountaintop lies about a mile from camp, and when Luke and I were topping the last ridge before coming into the "game field," we saw two deer, a buck and doe, with heads up, looking in our direction. They were about 125 yards away, and I fired at once. The buck flinched, and the doe ran at the report. I fired again, missing, when the buck ran, but turned at the brink of the hill and looked back. Why did he do this? At the time he had a bullet in his shoulder, and I did not expect to see him stop in full view, within 200 yards, under the circumstances. I shot again as he faced us, and he bounded over the crest into the timber below. Going over to where we last saw him, Luke picked up a piece of bone from the deer's leg. But it was hard to find blood, for the low bushes which covered the ground had spots of red coloring on their

leaves; in fact, we only found one blood splash. Luke said, "We are going to get this deer." It must have been a "hunch." We spent about an hour carefully picking out the trail until it ran into many tracks, and we were at a loss what to do—only for a little snow! Then I suggested we go back to the place where the deer first stood and see if he had bled much there. We could not find the place readily, and I said, "Now if we go back to the trail and find the empty cartridges, we can get a line on where they stood." We did this, and as we stood looking the ground over, saw a deer in an open space on the next mountaintop, limping badly as he moved slowly along. Before I connected him with our buck, Luke said, "That is our deer, and his leg is broken." He had apparently just come out of the woods. When we got over to him he was standing with his head down, and probably was about to lie down. I was surprised that he did not lie down in the woods instead of coming out in the open. We had not crowded him; in fact, it was an hour after he had been shot that we saw him on the mountain. I shot him, and he started like a flash, but dropped dead in a few jumps. He was rolling in fat, and the contents of his stomach showed that he had been principally feeding upon blueberries.

Two days afterward I shot another buck out in the open. He absolutely fell in his tracks. This deer also was in prime condition. Twenty years ago a deer's track in this section was very rare. Now there is an abundance of deer.

On the second day of hunting we saw our largest herd of caribou. We were on a mountaintop and saw them filing out of the woods over a mile away. At the distance they looked almost black in the middle and white fore and aft. We could not make out the heads through our glasses, since they were not powerful enough. The caribou walked along to the highest slope of the mountain, when all hands laid down. At this time they keep the sharpest watch, and as they are usually facing in about all directions, it is liable to be very difficult to get a good chance at the bull you are after.

It is not hard to get up to some members of the band, but the bull may be so surrounded by cows and bulls with poor heads, that he is out of the danger zone. We had to travel in a wide circle to get the wind in our favor, and then as we approached nearer, we found that we could not size up their positions, owing to many small spruce trees scattered around. Several times we had to retreat when we would work in sight of some cow, and make an attempt from a different angle. There appeared to be a bull with a pretty fair head, not in good view, but on our side. His position was so well covered by the cows and calves that we could not get up to look him over. We figured that by making another circle our chances would be good for a shot should we want the head. After more crouching and crawling, it seemed at last as though we were on the right track, when just as we crawled around a small spruce, we came face to face with a small bull, cow and calf, which, up to that time, we had not seen. They were not forty yards from us, while the bull we were after was lying down just below the top of the ridge, 200 yards away. The cow would look at us and then turn her

head as though to get up, and then turn her head for another inspection.

Had I known the bull on the ridge carried a good head, I might have shot him where he lay; but I planned on waiting until the cow got up and started the bull, when I would shoot if he had good antlers. While I was considering this, the cow got to her feet very deliberately and started off under a full head of steam, all the rest of the caribou following her lead without a pause. The bull I was watching acted faster than I figured on, for he was up and started too quickly. We could see he had a good head, but a hurried shot went too low and he was over the top of the mountain be-

CANADIAN BULL MOOSE.  
Photograph by A. C. Tyler.

fore I could shoot again. But as he passed the skyline he left a clear impression of a grand pair of antlers. Luke said the largest he ever saw—maybe so.

These caribou set their course directly away from us, and, so far as we know, never turned for a second look; in fact, the cow was the only one to see us. It is where they cannot quite make out what is afoot that they are the greatest delight to the eye. Trotting a short distance with a grace all their own, showing a perfect knee action, and stepping out with their front feet with a lightness that seems scarcely to touch the ground, then pausing in an alert attitude for another puzzled inspection. Then repeating the same performance,

sometimes they will circle until they catch the warning scent, when they are off, sometimes on that matchless trot, at other times breaking into a gallop. We found them whimsical and uncertain in their actions. We have noted that a band feeding along would suddenly start off at full speed, and as suddenly all hands would stop and start feeding again, apparently being governed only by the impulses of the moment. At times a band would appear on a mountain top and feed along so rapidly that we had many a hard chase, only to find upon coming up that they had passed down into the woods, to be seen no more; in fact, this was our common experience. So I suggested we spend the day in one place, from which we could overlook a valley which was covered with game trails and also see any caribou which might come out on the side of Little Bald Mountain across the valley.

We took water in a bottle for the "kettle" in order to save a long walk to the brook, where we usually "boiled." A gentleman from Montreal was taking his lunch at the brook one day, and while he was sipping his tea a bull caribou passed along within fifty feet, and was easily shot.

Well, we were on the mountaintop, settled as comfortably as possible behind a wind-break, prepared to wait patiently throughout the day, although a cold wind was blowing and there were indications of snow in the air. But fortune smiled on us, since we had scarcely tested our patience before we saw a caribou getting to his feet down among the spruces in the valley. We had both seen him lying down, but had not made him out. We quickly went down into the valley and worked along behind good cover toward his position. Then we saw that there was a small bull, cow and calf with him. The big bull was then charging the younger one, trying to drive him away. However, he was doing it in a half-hearted manner. It took several shots to bring him down. Caribou have a way of straddling and bracing themselves when hard hit, and will keep their feet under a lot of lead. I have seen a caribou with both front legs broken project himself along with his hind legs.

I was well satisfied with the head. The horns were symmetrical, both brow tines being uniform. We took some pictures, with the usual posing, dressed the caribou and performed the ceremony of "bilin' the kettle," after which we packed out the head, hide and meat. "Not too bad," the guide said, as we were throwing aside our things in camp.

During the night a snowstorm set in, turned to rain and finished up by freezing as it fell, which formed a hard crust and tinselled the trees into a silvery wonderland. Then came a few days of that contentment which comes to us when we feel that our trip is a success, and we may look about our front yard and become acquainted with things near home, now and then shooting a partridge or rabbit for the pot. There were the carcasses of three cub bears near the cabin upon which the chickadees and squirrels were amicably feeding. It was amusing to see the chickadees put out a foot and brace against the carcass, as though to keep from bodily lifting it from the ground, just as a moose bird will hold a foot upon a scrap of meat too large to swallow or carry off whole.

The squirrels resented my intrusion, one in particular making a great fuss. Sitting up with his front feet on his chest, as though squeezing his bagpipes, he scolded steadily; but I would not be driven away. The carcasses had been there two weeks, but were not touched until the snow and sleet came, when the ice-covered trees kept the chickadees at bay and perhaps signalled the open season on bears to the squirrels.

One morning I made the round of the traps with the guide. The result was three moose birds—no more, no less.

On Nov. 11, carrying our packs, we walked down twenty-four miles to another camp, in order to change our environments, perhaps. Much of the walking was through wet valley land, caused both by a wet fall and beaver dams along the brooks. We came to one interesting place in an old road, where there were the tracks of four caribou, a moose, bear, deer and fox. We were tired and wet when we got to camp; but we burned wood freely

THE ROAD TO MORE CHEER.

and soon had the stove red hot and the cabin warm. For two days I weakly allowed the guide to induce me to tramp the woods. He went on the theory that "you never can tell what's coming down the mountain," and that if you cover ground enough you are liable to run into something. But at every step the crust "crunched" under foot and it was useless hunting.

On the third night in camp a gentle, fleecy snow stole down upon us while we slept, and by noon the walking was fairly good. The crust still broke in places, but the snow muffled the sound. We walked several hours without seeing a track, and it seemed as though nature was at rest under a snowy shroud. At last we saw a moose which had just got out of his bed. He stood with his head behind a tree, so that we could not see his horns. His frame was immense, but he appeared to be gaunt. Shortly he trotted out into full view. He had a round horn extending down parallel with his head, but not quite to the nose. On the other side there was no horn to be seen from where we stood. He evidently was old and his race about run. We walked over to where he had been lying down and found it had only been for a few moments, as the warmth of his body

had made no impression upon the snow. We went on a short distance and saw a moose track filled with snow. It was about four hours old. The guide said, "This is a pretty old track, but we may as well follow it." I said I thought it was made by the moose we had just started. We followed the tracks about fifty yards, when they abruptly became fresh, and within twenty feet we saw the bed the old bull had just left. He had been standing still in his tracks for about four hours beside a little spruce tree. How different from a deer or caribou! This ended our day's hunt.

The next morning we started a cow and calf. That was all from seven to eleven. It was probably too soon after the storm, or perhaps the moose had moved into another section. This was the last hunt from this camp, and we moved across three miles to another, where the team was to take me out the next day. We stopped only long enough for lunch and a smoke before again starting out. Within two hundred yards of camp we came upon the tracks of three moose. We followed them to a high bank overlooking the trail we had just come over to our new camp, when they had turned back, evidently having seen or heard us. One of them was a bull. He avoided all places where the trees were close together and often circled places through which the others passed. We followed them for over ten miles along side hills, over down timber, through thickets and swampy places, through which they had wallowed, until we came to where they had crossed the northwest branch of the Miramichi. After dark, wet and leg weary, we were back in camp.

Owing to a tip-over, we were late in starting for the settlements, but arrived in time for the midnight express, which was to take me on the first stage of my journey back to Chicago.

### How Fast Do Ducks Fly?

BUFFALO, N. Y., Dec. 28.—*Editor Forest and Stream:* I wish to make a few remarks about the speed in flight of some ducks. I see that a number of writers estimate the speed of ducks in flight at from 50 or 60 up to 100 or 120 miles per hour, and some say that with a gale of 40 or 50 miles they will make 150 miles per hour.

Now I do not propose to say they do not do this, and I do not claim to be an authority on this subject, only to relate what I have seen. My business has for a number of years caused me to make the trip over the Pennsylvania division of the New York Central Railroad between Geneva and Corning about as often as once per month. This road runs near Seneca Lake for a number of miles, especially between Dresden and Geneva where the road is very close to the water for some ten miles. A number of so-called duck houses—that is, large boxes—are set out in the water a short distance from the shore on spiles, and the hunters get into them and set out decoys in front.

A number of times in the season I have seen ducks fly into these decoys, and after being shot at fly the same direction of the train, and at no time have I seen the flocks keep ahead of the train for any great distance. One time in particular, just as the train was approaching one of these houses, I saw a flock of golden-eyed ducks, called whistlers in this part of the coun-

try, swing into the decoys, get four shots into them, and those that were left, swung out almost exactly parallel with the train. We passed this flock inside of half a mile. I went to the conductor and asked him to give me as near as possible what he considered the speed of the train. He said about fifty miles an hour. I then spoke with him about the ducks. He said he often raced with them and generally beat them when going fifty miles an hour or better.

On another occasion I was on the trolley car between Tonawanda and Niagara Falls when the car kept up with a flock of ducks flying down the river parallel with the car for about a mile. The ducks seemed by their flight and size to be the lesser bluebills.

I am inclosing a clipping which shows that ducks in migrating do not fly as fast as some people claim:

"On Christmas day, William A. Eddy, the kite expert, at Bayonne, N. J., measured by

BRUIN STARTLED.

means of his kites the altitude of the thousands of wild ducks which were flying southward along the coast. The average height of the flying ducks was found to be 1,500 feet. They passed across the cross-wire space of Mr. Eddy's kites in about three seconds. This time was taken repeatedly, and twenty observations confirmed the speed traveled. It was found that the ducks were traveling very nearly 47½ miles an hour. Although the kites were up but 500 feet, the ducks appeared to be afraid of them, and repeatedly great flocks steered off to one side or the other as they approached the point where the kites were. Mr. Eddy had aloft two nine-foot and two seven-foot kites. On Dec. 20 Mr. Eddy, by means of his kites, found that the cirrus clouds were traveling at the rate of 173 miles an hour, which is the highest velocity yet recorded."

### New York Zoological Society Meeting.

THE nineteenth annual meeting of the New York Zoological Society will be held in the Grand Ball Room of the Hotel Waldorf-Astoria, Fifth avenue and Thirty-fourth street, New York city, on Tuesday, Jan. 14, 1913, at 8:30 o'clock P. M. An interesting program has been arranged.

## New Biological Material Collected.

BY RALEIGH RAINES.

THE Smithsonian Institution has just described further new material collected during the Biological Survey of the Panama Canal Zone, including new insects, mammals and birds. This survey was inaugurated in 1910 and continued for two seasons, the Smithsonian having the co-operation of various Government bureaus, including the Bureau of Fisheries, the Bureau of Entomology, the Biological Survey, the Isthmian Canal Commission, the Panama Railroad Company and the Field Museum of Natural History

Mr. Goldman collected fourteen new species and sub-species, including a pigmy opossum, several forms of field mice and rats, a squirrel, a pocket gopher, a porcupine, a forest rabbit, a bushdog, a shrew, and an old raccoon-like animal peculiar to Central America, only recently at all common in collections. All of these various specimens have been deposited in the U. S. National Museum.

The new birds collected during the exploration have been described by E. W. Nelson, of the Biological Survey, and the species represent three new genera and twenty-four new species and sub-species, including wood-dove, two mot-

hunting is in fresh fields and where the reward may be wholesome and satisfactory.

### BUFFALOES INCREASING.

Lieut.-Col. Brett, Commanding Yellowstone National Park, reports to the Interior Department that his men have seen more buffaloes in the wild herd in the park recently than for ten years past. They counted forty-eight buffaloes, he reports, and all of them appeared to be in fine condition. The tame herd, which is kept in an inclosure in the park, now numbers, according to Colonel Brett, 144.

A private retreat for nesting birds will be maintained by the Federal Government near Valentine, Nebraska. President Taft has proclaimed the reservation of 613 additional acres on the abandoned Fort Niobrara reservation, the only reserve in the continental United States maintained for the breeding of prairie chickens, sharp-tailed grouse and quail. Citizens of Valentine, and the National Association of Audubon Societies, subscribed sufficient money to erect a heavy mesh wire fence around the tract, within which there will be immediately located as companions of the three species of the grouse family herds of bison, deer and antelope, presented by a Nebraskan who has been breeding these animals for years.

### The Meadow Lark in California.

FROM the laboratory of the University of California comes an interesting study of the food habits of the Western meadow lark. This species has been much complained of by California farmers because of its habit of pulling up the sprouting grain.

Harold C. Bryant, one of the assistants of the California State, Fish and Game Commission, has made a careful study of the Western meadow lark in a particular locality—Red Bluff, Tehama county, California—examining the stomachs of six birds a month for each month of the year. He has found that for the twelve months the birds average about 65 per cent. of animal food to 35 per cent. of vegetable food. Thus in January, when insects are not available, the meadow lark eats but 1 per cent. of animal food and 99 per cent. of vegetable food. During the next two or three months the percentage of animal food grows larger, while that of vegetable food decreases, until in the month of May the meadow lark eats 99.9 per cent. of animal food and only .1 per cent. of vegetable food. All through the summer the animal food far overbalances the vegetable. Of the insects eaten, about one-half are grasshoppers and one-third cut worms. Mr. Bryant gives a table which shows the number of grasshoppers consumed by meadow larks in summer, and from these tables he concludes that the meadow lark consume not far from fifty grasshoppers in a day.

While it no doubt is true that not all the grasshoppers destroyed are actually injurious—

MALLARDS RAISED BY JAMES W. ALKER AT GREAT NECK, L. I.

Seven of these ducks flew away, and after an absence of two weeks, returned.

of Chicago, the latter institution taking part in the fish collecting.

Early in 1912, E. A. Goldman, of the Biological Survey of the Department of Agriculture, went to Panama for the second exploration and made extensive additional collections of mammals in January and February. From February to June explorations were conducted in Eastern Panama to determine the faunal relation of that region to the Canal Zone, as well as the areas to the westward and northward. His efforts were centered around the Pirri Mountains, one of the highest ranges in Eastern Panama, rising more than 5,000 feet, located near the Colombian boundary, southeast of San Miguel Bay. This region is covered with a dense unbroken forest and has a heavy annual rainfall, although at the lower levels it is usually dry from January to April, except for a nearly continual fog, and the consequent condensation of moisture on the foliage, which has practically the same effect as light showers. The collection of natural history specimens, which includes some 800 birds and 595 mammals, indicates that the fauna of Eastern Panama is South American in its general characteristics.

mots, three hummingbirds, two flycatchers, several tanagers, two warblers, a woodpecker, toucan, wren, finch, thrush and others. Many of the specimens were collected by Mr. Goldman who, it appears, is the first zoological collector to penetrate the forests about Mount Pirri and its bordering lowlands. Here many birds and mammals not before known from Panama were taken, a number of which were also new to science. Several species of South American animals appear to reach their northern limit at this point, being unknown in the Canal Zone and adjacent territory, although only about 150 miles distant. J. R. Malloch, of the Bureau of Entomology of the Department of Agriculture, has identified three new species of diptera, having been collected by August Busch while a member of the exploring party in the regions of Taboga Island, Panama. All of the new specimens will be mounted and placed in the National Museum.

Little attention has been paid to Panama as a favorable hunting ground for sportsmen and naturalists, but it is expected that the publicity given to the two Government expeditions will induce some of the venturesome in search of new fields to visit this near possession where the

for some species are too few in numbers to cause any great harm—it is obvious that the meadow lark must play a very important part in keeping down the number of injurious insects in the region under consideration.

Every study of bird food like this one—and others by Professor Beale—is of very great value. We are likely to have more of them.

### News of the Fur Seals.

THROUGH the co-operation of Great Britain, Japan, Russia and the United States, the practice of pelagic sealing was abolished in 1911. The past summer was, therefore, the first breeding season under the new law, the first time for thirty years or more when the fur seal herd was free from the drain upon its breeding stock, when the mother seals were not killed at sea just before or just after the birth of the young.

It seemed important that during this first season the number of seals upon the islands should be determined, as nearly as possible, and a census was therefore taken. This has been done many times before, in a variety of rough ways which have given very different results.

In 1869 Capt. Charles Bryant, the first agent in charge of the fur seal herd, estimated that there were three and a quarter millions breeding seals and young. Several years later Henry W. Elliott figured that there were 3,193,000 breeding seals and young, and of non-breeding seals a million and a half more. Again in 1890 on a greatly reduced herd, Elliott estimated the breeding seals and young at less than a million. In 1895, Drs. True and Townsend found 156,000 seals of all kinds, while another enumerator in the same year believed there were 405,000 breeding seals and young. All these estimates were made on the theory that at about the time when the pups were born, all the cow seals would be on land. In 1896, however, it was discovered that a full count of the pups on the island showed that they outnumbered the cows two to one; all figures had to be revised, and then the estimate for 1896 was 450,000.

The census for 1912, which was carried on by George Archibald Clark, of the Bureau of Fisheries, shows that there are more than 215,000 animals of all classes on the islands of St. Paul and St. George.

Mr. Clark believes that the herd has not changed much since 1909; that the annual destruction by pelagic sealers just about equalled the annual increase; in other words, the herd has been standing still. With the protection of the females, the increase each year should be about 10 per cent.

It is estimated that by the abolition of pelagic sealing, 15,000 additional breeding females reached the rookeries of the Pribilof Islands and brought forth their young, making an estimated difference of 30,000 animals at the close of the year.

The mortality on the Pribilof Islands was studied during the breeding season of 1912. As will be remembered, this was investigated during the years 1896 and 1897 by the seal commission. At that time there was a very heavy loss among the pups from starvation, the mother seals being killed while fishing at sea. The hook worm disease was also a cause of death. Mr. Marsh, of the Bureau of Fisheries, reports a total loss on St. Paul Island of 880, which

is at the rate of 12.5 per thousand. The death rate from starvation is but little more than 4 per cent., and from the hook worm disease for the whole season considerably less than one per thousand. On the other hand a large number of pups die from suffocation at birth.

All this has to do with the losses among the pups. The adults die from fighting and various accidents. As time goes on and the number and age of the bachelor seals increases under the present law, the loss from fighting and other accidents on the rookeries will, no doubt, increase.

The establishment of a close season on bull seals for a period of five years is likely to have a deplorable effect on the subsidiary life of the islands. Commercially the Arctic blue fox is the most important form of this life. These foxes are scattered all over the island, and in past years have depended for their winter food on the frozen carcasses of the seals killed during the season for their skins. During the past forty years, 40,000 pelts of blue foxes have been taken, and the foxes, by proper feeding, may be indefinitely increased in number. Animal for animal, the fox is as important commercially as the fur seal. In other words, in London a fox skin brings the same price as a seal skin. The lack of food during the coming winter is likely to greatly reduce—by starvation—the fox population, and starvation for five years is likely to wipe it out entirely. The matter is one which calls for serious consideration by legislators, and Congress should repeal the provision of the law which forbids the killing of superfluous bull seals.

G. B. G.

### Food of Some Common Birds.

A BULLETIN lately issued by the Department of Agriculture deals with the food of some well-known birds. These are found in six or eight families and nearly 5,000 stomachs of these birds have been examined so as to determine, with certainty, the food on which they subsist, and to learn whether they are useful or not.

The three-toed woodpeckers—birds found in the Middle States only in the dead of winter—subsist chiefly on animal food, about 90 per cent. of the food of these species being insects. Among these are the wood-boring larvæ of beetles which do a vast amount of damage to our forests. Rough estimates of the food of these birds led Dr. Beal to conclude that a single bird in one year will destroy between 13,000 and 14,000 of these grubs. The vegetable food of the two species of the three-toed woodpeckers are trifling amounts of fruit, mast and the interior layer of tree bark.

The food of the California woodpecker on the other hand contains comparatively little animal matter, less than 25 per cent., and besides it eats grain, fruits and mast. It appears to be fond of almonds, and in sections where almonds are largely cultivated develops a strong liking for these nuts. It stores them in holes drilled in the bark instead of the acorns which it usually employs.

Complaint has been made of Lewis woodpecker that it does damage to apples, and this subject has more than once been brought up in the columns of FOREST AND STREAM. For those examined the stomachs seem to show that animal

food is more than 37 per cent. and vegetable matter more than 62 per cent.

Less than one-third of the food of the red-bellied woodpecker appears to be animal, but the insects that it devours are, to a considerable extent, harmful. Fruit and nuts make up the greater part of its vegetable food, but it has developed a taste for fruit, and in the Florida orange groves has proved itself an injurious species.

Naturalists have given the sapsuckers a bad name, because they drill holes in the bark of fruit and other trees and drink the sweep sap. It is also said that the tapping of trees in this way destroys the value of the wood for lumber, and it is recommended that the sapsuckers be not protected.

Two species of hummingbirds, the ruby throat and the Anna hummingbird are treated here. It is well known that hummingbirds eat a multitude of insects. On the other hand their food furnishes little economic interest, whereas the flycatcher feeds almost entirely on insects and unquestionably do an enormous lot of good. They should receive protection.

The horned larks are useful, both for the animal and the vegetable matter that they consume. About 20 per cent. of their food is animal and nearly 80 per cent. vegetable. They eat some grain, but only very little, but do eat a great quantity of weed seeds and nearly 70 per cent. of the food of the larks consist of noxious weeds. The insect food is largely of harmful insects.

The little chipping sparrow, familiar over the whole United States, and so often building its nest in the vines which shade the piazza, is strictly a useful bird. More than a third of its food consists of insects, and in summer it is almost wholly insects. The birds' summer food is from 50 to 98 per cent. wild seeds and it destroys many harmful insects. It is thus one of the best friends of the farmer. The little junco or blue snowbird is another useful species. Three-fourths of its food is vegetable matter, but in summer this proportion falls to nearly half. The vegetable food consists of fruit seeds and waste grain, but chiefly weed seeds, as every country lover well knows.

For the white-crowned sparrow the dietary is found to be animal food, only a little more than 7 per cent., and vegetable food nearly 93 per cent. If it does not destroy a great proportion of harmful insects, the white-crowned sparrow at least consumes a vast number of weed seeds, which amount to 70 per cent. of the vegetable food. Some of these seeds are of most harmful and persistent weeds.

The Southern butcher bird is a great consumer of grasshoppers, and the amount of vegetable food that it eats is trifling. It kills a few birds and eats some useful insects, but on the whole it is very destructive to many harmful beetles. On the other hand, the Southern butcher bird is nowhere very numerous.

Audubon's warbler and the ruby-crowned kinglet, birds that are seen at very different seasons of the year, are extremely useful birds, destroying great quantities of noxious insects and greatly helping to keep certain harmful species within bounds.

This bulletin is really useful to the farmer, and Dr. F. E. L. Beal and W. L. McAtee have made it a very interesting paper.

# GAME BAG AND GUN

## Defending the New Jersey Fish and Game Commission.

JERSEY CITY, N. J., Dec. 24.—*Editor Forest and Stream:* My attention has been called to the December issue of the "Game Breeder" wherein the New Jersey Fish and Game Commission is severely criticised because of the arrest of persons having attempted to remove game from the State contrary to the New Jersey law, the arrest having been made by the warden in the belief that it was New Jersey game being so removed.

In all fairness to the commission, I beg to advise that I have on numerous occasions represented hunters being charged with the violation of the New Jersey game laws, and I have particularly in mind a very recent case wherein I represented two gentlemen who had been arrested under the above circumstances, and although they were arrested as they were about to leave the State with game in their possession and found guilty of a violation, and the time for appealing the same under our laws had about expired before I was retained, it was therefore incumbent upon me to take prompt and decisive steps to protect the interests of my clients before they would have lost their remedy. I therefore immediately got in communication with these same commissioners on the long distance 'phone at Trenton, and the commission at once sent their chief warden, James M. Stratton, to investigate the case. The result of the investigation was, that the board ordered prosecution in these cases dropped, which was entirely satisfactory to me and my clients. This is only one of the many similar instances wherein immediately any unjust action is taken by a warden or a justice of the peace before whom an arrest is pending, if the matter be properly presented to the commission, they will always investigate and see that no injustice is done any citizen.

I am prompted to write you the above as an act of justice to the commission, whom in private practice at the law and during the several years that I have been a member of the New Jersey Legislature, coming almost in daily contact with the members of said commission, I have always found them to be fair and just in the enforcement of the fish and game laws.

The board adjusted the case last before referred to without taking advantage of any technicality whatsoever, and did not put my clients to the burden of an appeal from the justice's decision before whom they were taken.

In view of the above I am satisfied that if any person who is arrested for the violation of any game laws in this State as were my clients, would have their attorney, if they have one, take the matter up immediately with the fish and game commissioners before the penalty that may be imposed is remitted by the justice imposing the same to the State Treasurer, I am sure that he will be given the prompt and court-

eous treatment that is uniformly extended to everyone.

I am further convinced of this by reason of the fact that I know of similar cases where prosecution was immediately dropped upon the facts being presented to the board, and the commission of the deputy warden making the arrest was revoked.

PETER H. JAMES.

## Changes in Game Laws Recommended.

BY GOLDEN GATE.

THE California Game and Fish Protective Association, one of the most prominent organizations of its kind in the West, has made the following recommendations for changes in the present game laws, some of these being radical ones:

That whenever, in any county in this State, the annual sale of hunting licenses amounts to more than \$1,000, and said county employs and pays a county game warden \$1,000 or more a year, the State Fish and Game Commission shall pay \$1,000 a year to such county, the money to be expended in fish and game patrol work.

That changes be made in the dates of opening and closing seasons, so that doves and tree squirrels may not be hunted and shot during the closed season on quail. It is further advocated that snipe, curlew, plover and other shore birds may not be taken during the closed season on wild duck.

That the sale of wild ducks, wild pigeons and black sea brant be prohibited. That the limit daily for wild pigeons be twenty, and that the limit for tree squirrels be placed at four.

That a deer tag system be adopted, and that the limit be reduced to one buck. That the use of dogs in deer hunting be prohibited entirely.

That the State Fish and Game Commission make a test case of that section of the county government, delegating the power to supervisors to shorten fish and game seasons.

That a law be enacted making it possible to try for manslaughter a person killing a human being by mistake for game.

To shorten the open season on deer and to make it later.

Violation of the State fish and game laws by any individual shall be penalized by the cancellation of such individual's license for that year.

That the open season for trout be from May 1 to Jan. 1, and that the minimum size limit be placed at six inches.

That more efficient laws be enacted for preventing the use of the snag-hook, grab-hook, spears and other similar devices.

That the existing law prohibiting the sale of trout be changed, so that trout of twelve inches in length, or more, only can be marketed.

That the use of any or all spawn for bait be prohibited.

Providing for a closed season on all trout in tide water from Feb. 1 to April 1.

That no California whittings may be taken otherwise than by hook and line, and that a district be established off the coast of Southern California in which seine fishing is prohibited.

## Game Commission Wins Important Case.

A DECISION has been reached in the case of the American Game and Transfer Company against the California Fish and Game Commission for an injunction to prevent the seizure of consignments of ducks. In a sweeping decision handed down by Superior Judge Frank J. Murasky, every contention of the commission was upheld, and it now has the undisputed right to seize wild game, no matter who may have possession of it, providing it is held contrary to the provisions of the fish and game laws. Shortly after the opening of the duck season, the game and transfer company mentioned, secured a temporary injunction against the commission to prevent the seizure of consignments of ducks and sought to make this permanent. In the trial that followed, the transfer company attempted to prove that it merely accepted consignments of game from hunters in the country and delivered them, never accepting more than the legal limit from any one consignee. The fish and game commissioners proved that the company was not acting as a common carrier, but that it had agents in the hunting sections, who secured the game and shipped it to the local office of the concern where it was sold. The extent of the business can be judged from the fact that during the past month over 2,200 sacks of ducks have been handled here, each containing the limit of twenty-five. This means that over 55,000 ducks are handled here by transfer companies in one month, or a total for the season of almost a quarter of a million. When it is considered that similar conditions exist in other large cities in the State, the extent of the business is realized. Hotels and restaurants will be affected by the ruling, and the excuse will no longer be permitted that they are merely holding game that belongs to private parties. The settlement of this point of law is one of the most important rulings that has been made since the commission commenced the work of conserving the game of California.

## The "Uniform" Fish and Game Law.

ALBANY, N. Y., Dec. 23.—*Editor Forest and Stream:* Possibly some light may be let in on the apparent dissatisfaction with the so-called "uniform" fish and game law, which the Conservation Commission has recently so earnestly defended, if the manner in which the law was produced is made known.

When \$15,000 was appropriated to secure a law which was to be far ahead of all former productions in this State, and which would truly conserve the fish and game, it was given out and

generally believed at the time that the fish and game sections were to be brought to this high state of perfection under the watchful eyes of three specially qualified experts—John B. Burnham, former chief game protector of the State and always an ardent out-of-door sportsman; Marshal McLean, a big-game hunter of the Camp-Fire Club; and George A. Lawyer, the present president of the State League of Fish and Game Clubs.

This combination looked like a real divorce between protection and politics, and although Mr. Lawyer afterward developed into an active attorney and partisan of the Conservation Commission, the sportsmen of the State were inclined to believe that at last something really was to be done in their interest. Some of them actually attended the first hearings given on the proposed new law, but went away speedily disillusioned. The resulting legislation was the so-called "uniform" fish and game law, which the merest tyro in such matters could readily see was based neither on scientific knowledge nor actual conditions. Attempts to secure important amendments were futile, although during the past season the Conservation Commission has been compelled to admit serious imperfections in the law and to modify it, to correct them in order to meet an outraged public sentiment for the real conservation of fish life.

Why a scientific fish and game law was not secured for the large sum appropriated is readily seen when the vouchers on which the \$15,000 was drawn from the State Treasury, are examined in the office of the comptroller. These, it should be remembered, were paid only on the approval of the Conservation Commission.

The three experts commonly credited with the work on the new fish and game law apparently had very little to do with it, and got very little of the money. George A. Lawyer, the Conservation Commission's attorney, drew \$1,650 for "services as special counsel in the codification and revision of the fish and game law, drafting rules and regulations, work forms and in preparing an index to the law." He swears he worked in all sixty-six days and was paid \$25 per day, but he does not swear that he is a qualified expert in fish and game matters such as one might reasonably expect would have been selected to draft a perfect statute. John B. Burnham did not make any charge for his services nor for his many trips between New York and Albany during the time the "uniform" law was being forced through. Possibly his compensation came from the American Game Protective and Propagation Association of which he is the responsible head. His many friends would scarcely like to believe that Mr. Burnham approved either of the unscientific and indefensible fishing section or of several things in the bird and animal sections.

Marshal McLean, from whom much might reasonably have been expected in putting the hunting sections into a creditable condition, certifies that he "worked on a draft of the marine fisheries law" one day in his office in New York, and that he was "in attendance in Albany" nine other days. He was paid in all for ten days at \$25 per day, and got an allowance of \$168 for expenses. It has not hitherto been known that Mr. McLean is an expert on marine fisheries.

This somewhat remarkable accounting easily prepares one for the union of politics with con-

servation shown by the disposition of the remainder of the \$15,000 fund. First comes John W. Hogan, lawyer and democratic politician in Syracuse, whose voucher says he was concerned in the "conservation of water" for forty-one and a half days in Albany and forty days in Syracuse at \$75 per day. He got \$5,112.50, although he is not recorded among those usually acknowledged as conservation experts. Next on the list is Roslyn M. Cox, lawyer and democratic politician in Orange county, who certifies to working 131 days at \$25 per day "as special counsel codifying, drafting and rewriting the laws relative to forest parks." He got also \$778.50 for traveling expenses. How Mr. Cox would be rated in a civil service examination in forestry is not known.

The third beneficiary of the \$15,000 fund to

require extended argument to indicate why there may fairly be dissatisfaction with the fish and game sections of the "uniform" law. Not a single well-known expert gave extended consideration to any subject contained in the statute. The fish and game section was not drawn by the three men reasonably supposed to know something about the subject. It may safely be said that half a dozen members of the hunting and fishing clubs could have produced a better law so far as fish and game protection are concerned. They certainly could have done so if a little scientific aid were given them.

Other peculiarities in the making of the law can be shown, but it is probable that the foregoing statement will be sufficient to explain several of the strange things now known to exist

THE RETRIEVE.

From painting by Edmund Osthau.

create a perfect law was John H. Burke, Saratoga county lawyer and democratic State committeeman, who drew 118 days' pay at \$25 per for "drafting and codifying laws relative to lands, forests and public parks; attending hearings of the committees and legislative sessions; preparing briefs on the constitutionality of the proposed law, statements for publication and for the committees, statements for the Governor and a synopsis of the law." Committeeman Burke is another hitherto unknown authority on forestry matters. Finally Thomas J. Cummings, a Chautauqua county attorney and democratic State committeeman, was paid for thirty-four days at the usual \$25 per. He got \$850 and swears his days were "spent in examination of the laws and statutes, and assisting in the preparation of drafts and proposed amendments to the conservation law." Mr. Cummings is another hitherto unknown expert on the great subject of conservation whose discovery may be credited to the Conservation Commission.

From these few disclosures made by the records in the comptroller's office, it does not

in the "uniform" law whose enactment was secured by the Conservation Commission.

JOHN D. WHISH.

### Nellie.

BY VERNON HARTSOCK.

NELLIE, beautiful Nellie, thou art half the world to me,  
And the other half is nothing but to know that thee—  
The best of boon companions, a true and noble friend—  
Belongeth to me—thy heart is mine until the end.

Nellie, beautiful Nellie, thy brown inquiring eyes  
Bespeak to me of hunger or romp, I surmise,  
Through wildwood or through meadow, in any lonesome  
place,  
Lead the way, I will follow thy bewitching grace.

Nellie, beautiful Nellie, with thy locks of curling red,  
That would put to shame the tresses on some queenly  
head,

Famed for its exquisite beauty—thou art never vain,  
Nor fishing for compliments; my smile is thy gain.

My house shall be thy mansion; my hearthstone thy re-  
treat;  
Thou can'st share my couch and welcome, and my  
victuals eat.

I have no wife to protest, or cause a dialogue—  
Nellie, charming Nellie, my Irish Setter dog.

## Taking Channel Bass off Cape May.

BY MARK HOPKINS, JR.

CAPE MAY is the southernmost town on the east coast of New Jersey. It is used principally as a summer resort where people bathe off the magnificent beach, play tennis, golf and do the usual things done at a place of that ilk.

This summer, however, I discovered something that appealed to me more than any of the foregoing games. It was my first summer there, and having often heard of the channel bass caught north of Cape May, I moved around to find out if there might not be something of the kind to be found off the long beach, with its shoals and rips, especially toward Cape May Point, where the Delaware Bay turns out into the Atlantic and a long shoal runs out for two miles to the buoy which marks the channel for the packets and long tows.

While in a deep conversation with Mr. Baum the fish man, who had a pound off the point, I learned that his son, George Baum, (and there never was a better fellow to go out with, fish or no fish) was a member of the U. S. Life Saving crew at the point, and that he had a small gasoline launch of which more anon, in which he went out when laid off during the summer months and got channel bass.

That was enough for me. I got in line with George, looked over my tarpon tackle, and two days later found myself off the point on the ebb tide in George's motor boat. That boat deserves a column of its own. It was as George expressed it, distinctly a "mongrel." Twenty-two feet over all, eight-foot beam, open amidships, the bow decked over about three feet; the engine about six feet forward of the stern and in the stern a raised cockpit almost level with the gunwale, which made an ideal place to sit and play your fish when you hooked him. Last, but not least, she was flat-bottomed, which allowed her to slip over the choppy cross seas of the rips like a duck.

We were anchored about twenty-five yards off the shoal. The tide being on the ebb, the stern faced the rips, and as the current was running about five miles an hour, it took a heavy dipsey or sinker to find bottom in the shallow water, where all the big fish feed on the sand crabs which are covered and uncovered by the tides.

George put a half a side of a moss bunker or menhaden on for bait, and the line ran out with the tide for about twenty-five yards before the dipsey found bottom on the edge of the shoal. He then cast over his hand-line, and we sat there sliding up and down on the green-gray water with the rips tumbling about just ahead of us, and the Lord knows what in the way of big fish playing around under it.

I got the first strike. It came like a flash, and "zing" out went about seventy-five yards of line. I had the patent brake on, and was just making up my mind to put on the thumb brake when the fish slacked up and rose toward

the surface. George, watching the line, murmured something about sharks, and in about ten minutes an 18-pound shark arrived alongside the boat to be clubbed on the head with the tiller and chucked overboard. George then proceeded to annex another shark, and I may as well say right now that we hooked and killed eleven of the brutes in the next hour and a half. After that came a lull until I felt a light strike and reeled in a weakfish, which my guide and mentor unhooked and laid in the bottom of the boat, remarking that the sharks had evidently moved on, and that as the bass and weakfish generally fed together, it looked good for a real fish.

I give you my word that my dipsey hadn't been on bottom for ten seconds after that when I got a shock that would put an amber-jack in the "also ran" class.

Bang! the bass hit the line and took it off the reel so fast that my heart up-swallowed into my mouth as I watched it diminish on the reel. After he had out about 150 yards I put on the thumb brake and he slowed up, finally surging in a big circle around the boat, I couldn't tell how deep. It was ticklish work with a light line, the heavy fish and the strong tide running with him. My mouth was like the inside of a lime burner's hat, and my left arm was positively nothing but glass—felt liable to crack any minute—while George, who weighs 180, was hopping about forward like a squirrel in a cage.

For twenty minutes did I play that bass and had him within twenty-five feet of the boat when happening to look up he saw our bottom. Zing! zing! zing! three sharp metallic jerks, and he was off again and nothing stopped him until another 150 yards of line had gone out. Then the same thing again for twenty minutes more until he lay alongside, and I pumped him up so George could hang the gaff in him, and in he came, a great big gold fish, all old rose color on the side and back, white belly and the tremendous head and mouth of the bass family.

I swore long and fluently—so did George—but it was the swearing of pure joy which differs much from that of a lost hook, dipsey and several yards of line.

Not another one did we strike that day, but later on several others were taken, and take it all in all, I'll take off my hat to the channel bass. He is in the same class as any of the big-game fishes that do not leave the water, and as I said can even go the amber-jack one better.

## Fishing in California.

BY GOLDEN GATE.

THE fall run of steelhead has commenced on the Russian River and will doubtless be very heavy in a few days, as conditions are ideal. The run has commenced a little earlier than usual, and already some large fish are making their appearance, several having been taken weighing from ten to fifteen pounds. The bar at the mouth of the river has been open for about three weeks, but only within the past

few days have the fish commenced taking the hook.

Striped bass fishing at Wingo and San Antonio sloughs has shown an improvement of late, and some good catches are now being made. The best run of bass, however, is being found at Petaluma Creek. Albert Wilson and Robert Sangster recently took sixty bass there, the largest weighing over thirty pounds, and two other anglers took over twenty in one day. The customary clam bait seems to meet with but little favor on the part of the bass, the big catches having been made on bullhead bait.

Fishing off Point Reyes is very poor for this season of the year, but on Tomales Bay some fine sport is being enjoyed. The bars at the mouth of most of the coast streams are now closed and a rain is needed to clear these out and to freshen the water.

## Annual Jollification of the Anglers' Club of New York.

*To the Knights of the seductive bamboo—Greetings:*

GET out your duffle bags and hike to the Hotel Navarre shortly after sunset on the night of Jan. 14, 1913. Your reward will follow in the shape of a good dinner worth while, talks and pleasing motion pictures. All this, including "ohbejoyful," for three bones. Preserve the date (Jan. 14) in paraffine and fish for fellow reel grinders to come with you and share with you the joy of the "peat-reek flavor of the glorious Scotch.

Another more far-reaching cast will be made in a few days. THE DINNER COMMITTEE.

## Notes From New Zealand.

BY DRUMMOND SHARPE.

NOV. 19 will be marked in my diary by letters of reddest ink—but wait, really now, how tiresome. Just when I have taken pen to tell of the best fishing day that has been mine for years, a thought suddenly occurs which robs me of at least half the pleasure of relating the experience in another land. It occurs that our New Zealand seasons differ most perversely from those of older countries; that while we are now at the beginning of summer, my friends in the United States may be driving sleighs over frozen snow, and therefore a hunting yarn might prove more interesting at the moment. Over seas the rod has been put away, giving place to gun and rifle; really—I repeat it—what a truly tiresome thought. However, I find that a chronicle of any sport is usually interesting to sportsmen in any land; so encouraged by certain of our numerous visitors from the other side, I venture a few brief lines to describe some splendid fishing before the rest.

Revived by one of the rainiest years on record, from the baneful effects of drouthy summers in the past, every New Zealand

THE DAY'S CATCH.  
By Cecil Aladin.

concerned, but some of the efforts made by the government of that period were the reverse of wise. For instance, a couple of thar and a pair of markhoor were obtained from the Himalaya Mountains at a cost of about £600, and being turned out on a snow-clad New Zealand range, were never seen again. Afterward, half a dozen moose were brought over from Canada and released somewhere in the southernmost part of the country, in the vicinity of Dusky Sound. For the succeeding years nothing has been heard of them; but now comes a tale of "great splay tracks bigger than my stretched-out hand." Two men on a pioneering expedition heard animals—presumably—crashing off through the densest bush, and finding these tracks, they measured accordingly; but I think that it is possible their legs were fully "stretched-out" as their hands, for I am given to understand they got out of there right away. All things considered, the men are not greatly to be blamed. It is easy to imagine that an old bull moose in a bad temper might have made matters extremely interesting for them; still, as a local paper a little unfeelingly remarks, "the right of New Zealand to the title of a 'big-game' country" might then have been established.

As an example of indiscreet acclimatization, the importation of stoats and weasels into New Zealand must be given a first place; but it seems that the idiot responsible for such a folly is not without his peer. The stoats and weasels were intended to destroy rabbits, but soon becoming fastidious, they preferred to decimate the feathered game, so foxes were taken to Australia for hunting purposes, but instead of remaining in their own place like nice well ordered foxes, they are now killing the poultry and lambs wholesale. These foxes were liberated first in Victoria, about a score of years ago, but since then they have increased with wonderful rapidity, and may be found in almost every part of Australia. Nowadays they are destroyed, whenever that is possible; and at a shoot recently organized on a run in New South Wales, more than four hundred were slain; but even such dreadful proceedings as these will not suffice to keep their numbers within bounds.

### An Appreciation.

NEW YORK CITY, Oct. 28.—*Editor Forest and Stream:* I have been meaning, ever since my return from New Brunswick, to call upon you personally to thank you for your kind consideration in my behalf and to tell you what a successful trip I had. I found Mr. Mackenzie a good guide, with a splendid hunting country, and I was fortunate in being able to secure a really good moose head. I can report as to the country that the camps are clean and in good condition, food and cooking excellent, an abundance of moose, a good many deer, and some caribou, but the latter are not hunted until November, and first class trout and salmon fishing. Of course the latter closes on Sept. 15, but I saw a good many fish. CORNELIUS W. WICKERSHAM.

Any subscriber may supply a friend with a copy of current issue of FOREST AND STREAM by sending us on a postal the name of that friend.

stream and river, at the present instant, apparently, is teeming with sea-run trout. The "dry-fly" man can pick his quarry and catch plenty; the average fisherman can kill a basketful; an angler with minnow lures has just returned from the Rangitata—a big snow river—with twenty-six trout, each weighing from six to nine pounds. Sadly, I condense that red-letter day of my own into a line—ten fish, all weighing over four pounds, caught with dry-fly, in the Kakahu Gorge. From its inaccessibility, I imagine that as yet few people have explored this place. Breakfasting in camp at 5 A. M., we waded nearly all day under sunshine and shower, up the rocky gorge, often having to scramble round a slippery corner crag, where a missed footstep would mean a drop down fifty feet; but never was a day more enjoyed, or a "second-meal" in camp at 7:30 P. M.

To turn from fishing to shooting, it may be said for one thing that the Auckland Province is now by far the best ground for pheasants, and there the season was unusually successful. The Auckland Acclimatization Society has imported a number of Mongolian pheasants, and the experiment of crossing them with English birds has produced the most satisfactory results. It seems that game eggs will stand a fair amount of rough usage on a journey, for settings of wild duck eggs are being exchanged for those of Mongolian pheasants with sportsmen in Tasmania, a week away by rail and ship.

A few years ago we were seized with a desire to stock the wildest wastes of our islands with animals which might form quarry for the hunter's rifle, in addition to the great existing herds of red and fallow deer. No doubt that would have been very nice for all

### SULLIVAN LAW IS CONSTITUTIONAL.

(From the New York Sun, Jan. 4, 1913.)

THE constitutionality of the Sullivan anti-pistol law was upheld yesterday by a vote of 3 to 2 in the Appellate Division of the Supreme Court. One of the dissenting judges was Presiding Justice Ingraham. The case before the court involved a person's right to have a pistol in his house to protect his home without a license.

The defendant in the case was former Deputy Attorney-General Joseph F. Darling, who offered himself as a subject for a test case by taking a policeman to his house and showing him a revolver in a bureau drawer. He had been held for trial in Special Sessions, but appealed the case by taking out a writ of habeas corpus. Yesterday's decision remands Darling to the Tombs to stand trial.

Justice Clark wrote the prevailing opinion in which Justices Laughlin and Miller concurred, while Justice Scott wrote the dissenting opinion. In his opinion Justice Clark said:

"In the statute at bar the Legislature has not prohibited the keeping of arms. For the safety of the public, for the preservation of the public peace the means employed being within its discretion and not in that of the courts unless flagrantly in violation of a constitutional provision, the Legislature has passed a regulative, not a prohibitive act.

"Legislation, which has for its object the promotion of the public welfare and safety, falls within the scope of the police power and must be submitted to, even though it impose restraints and burdens on the individual. The rights of the individual are subordinate to the welfare of the State."

Justice Clark said that for many years there has been a law against carrying concealed weapons, and no court in the country has declared it in violation of the Constitution or the Bill of Rights. The court says this law did not seem active in preventing crimes of violence in this State, so the Legislature proceeded a step further with regulatory legislation and has picked out the particular kind of arm, "the handy, the usual and the favorite weapon of the turbulent criminal class," and adds:

"The citizen may not have that particular

kind of weapon without a permit. If he has it in his possession he can readily stick it in his pocket when he goes abroad. If the citizen carries it concealed upon his person, it is a felony; if he has it in his possession handy and ready whenever the impulse shall come to violate the law, he shall be guilty of a misdemeanor unless a permit is procured. The Legislature assumed that the obligation to procure the permit would be the most effective preventive to the possession of such weapon by the criminal classes."

Now that there is no question as to constitutionality of the Sullivan law, what's to be done? There is only one answer: Put it up to the proper authorities to enforce that law. Then, as quickly as possible, get Timothy D. Sullivan, who now is a Congressman, to have drafted and present a Federal bill which shall prohibit the manufacture of pistol or revolver having a barrel less than ten inches long, target shooting size. Here would be an arm from fourteen to fifteen inches over all, absolutely inconceivable on the person, and a handy home size. This would do away with the particularly vicious arm made in vest pocket sizes. When the Federal bill became a law, the Sullivan law could be repealed and every revolver having barrel less than ten inches long would become outlawed, to be replaced, sooner or later by the target arm—the arm that most sportsmen have at home, anyhow. Here would be new business for sporting goods dealers all over the country, and a great relief to those who feel need of a gun in the home, but who will not break the law, which now denies them the right to keep a pistol or revolver in their houses.

### MAINE LEGISLATION.

A BILL is being drafted for presentation to the Maine Legislature at this session. The bill contains at least three estimable paragraphs—protection of moose from two to four years; reduction of non-resident shooting license to \$10; enactment of resident hunting license not exceeding \$1.

Particularly imperative is the close season on bull moose. Railroad statistics just issued show only ninety-seven killed this year (this number not including lumber camp and resident killings) as against almost twice that number last year. Guides and sportsmen report very few moose in the woods, while a good head is very rare.

### PROTECTION OF MIGRATORY BIRDS.

THE most far-reaching measure for wild bird protection ever seriously considered by a legislative body in the United States is the McLean bill for Federal protection of migratory birds, which is now pending in the Senate at Washington.

Since George Shiras, 3d, in 1904 first introduced in Congress a bill of this character, similar attempts have followed, but all have met with death at the hands of the committees to which they were referred for consideration. The McLean bill, however, has been favorably reported by the committee on forest reservations and the protection of game.

Congress has convened, and although the session will be short, ending on March 4, there is abundant time to advance this bill to a vote, if the supporters of the measure will immediately become active and bestir themselves to the

point of urging their Senators to take up the measure and pass it. The friends of bills affecting commercial enterprises never sleep, and their representatives are ever alert. The friends of wild life must be equally active if we are to hope for success. Communicate at once with your Senators at Washington and urge them to support the "McLean Bill for Federal Protection of Migratory Birds."

### NEW LEGISLATION FOR NORTH CAROLINA.

WE sportsmen are more or less resigned to the intricacies of the railroad time table, which we must consult before going out of town for shooting. It always has been perplexing to those of us who visited North Carolina to find it necessary to once more plod through a game law time table to learn what time and under what conditions we may unlimber our gun before we can get back, in pleasure, the price and annoyance of our trip. Maryland, hopeless Maryland, is the only State whose game laws piece out the crazy quilt, stitched with restrictions, in North Carolina. A dozen different dates for shooting wildfowl, an equal number for quail, numberless county restrictions on deer, various dates on wild turkey and so on ad lib. At this session of the Legislature a bill will be offered making uniform laws for the entire State. We offer up a fervid hope that the members of the Legislature may have occasion between now and the time the bill is presented, to look up the time table between their homes and the State capital, and take the game laws out of the Chinese puzzle department, so long headed by the railroad time table.

### Bow Meeting Song.

BY R. E. EGERTON-WARBURTON.

The tent is pitched, the target reared, the ground is measured out,

For the weak arm sixty paces, and one hundred for the stout!

Come, gather ye together, then, the youthful and the fair,  
 And poet's lay, to future day, the victor shall declare.

Let busy fingers lay aside the needle and the thread,  
 To prick the golden canvas with a pointed arrow-head;  
 Ye sportsmen quit the stubble, quit, ye fishermen, the stream,

Fame and glory stand before you, brilliant eyes around  
 you beam.

All honor to the long-bow which many a battle won,  
 Ere powder blazed and bullet flew from arquebus or gun;  
 All honor to the long-bow, which merry men of yore,  
 With hound and horn, at early morn, in greenwood  
 forest bore.

Oh, famous is the archer's sport, 'twas honored long ago,  
 The God of Love, the God of Wit, bore both of them a  
 bow;

Love laughs to-day in beauty's eye and blushes on her  
 cheek,

And wit is heard in every word that merry archers speak.

The archer's heart, though, like his bow, a tough and  
 sturdy thing,

Is pliant still and yielding, when affection pulls the  
 string;

All his words and all his actions are like arrows, pointed  
 well

To hit that golden center, where true love and friendship  
 dwell.

They tell us in that outline which the lips of beauty show,  
 How Cupid found a model for his heart-subduing bow;  
 The arrows in his quiver are the glances from her eye,  
 A feather from love's wing it is that makes the arrows  
 fly!

# ARCHERY

## An Archer's Confession of Faith

By E. J. RENDTORFF

**S**INCE the publication in *FOREST AND STREAM* of my letter to Dr. Weston, numerous inquiries pertaining to archery have been made. Archery literature is replete with dissertations on the beauty of the sport and of

The bow must be stiff laterally, with the two halves equally balanced. The relative strength of the two limbs should be so proportioned that the free period of vibration of each is the same. If the lower arm is the

6-foot 2-inch, 45-pound bow. This is due, not to a difference in the wood of the bows, but to the physical law that the period of vibration of a bar varies inversely as the square root of its length. I believe a 5-foot 10-inch bow will give far better service than one of the standard 6-foot—length.

It has been stated on good authority that practically any bow will do, provided the arrows, aim and release are accurate. I certainly cannot agree with this statement, and insist that for record shooting the bow must approach the physical ideals.

There is another element entering into the construction of bows that seldom is considered; that is, its efficiency. Efficiency is generally defined as the ratio of the energy put into a bow, when the arrow is drawn, to the energy imparted to the arrows on their release. For a perfect bow this ratio would be 100 per cent., a condition that never holds. When an arrow is drawn, potential energy, or the energy of rest, is stored up in the fibres of the bow. The amount of this is the product of the length of the draw of the arrow multiplied by the average force exerted by the bow. When the arrow is released, the energy of rest is transformed into kinetic, or the energy of motion. Its quantitative amount is one-half the product of the mass multiplied by the square of the velocity imparted to the arrow. That bow is efficient in which the two types of energy are most nearly alike.

The efficiency of a bow depends mainly on the past history of the wood and the methods employed in its seasoning. A wood that is green will have a sluggish cast, be inefficient, show great variations under different weather and temperature changes, and will soon get a permanent set to the shape of the bow.

The seasoning of wood consists in removing from the green wood fibres some of the moisture and sap essential to its growth and life. This is generally removed by methods that aid in the saving of the required time, as the use of the steam kiln. Wood so seasoned is generally inferior to that dried out in a longer time at a lower temperature, and the belief is common that time is the chief element of success. The high temperature produced by the steam induces certain harmful chemical actions, and a destructive distillation of the coal tar products of the sap.

The proper method for seasoning wood, in my estimation, is not attained by increasing the temperature, but by removing the air pressure in the surrounding space and having the consequent water vapor absorbed by drying or deliquescent agents, such as concentrated sulphuric acid or calcium chloride. The wood for bows and arrows should be placed in a strong air-tight steel cylinder, held vertically, with the drying agents introduced in the bottom of the tube, and the air with the following water vapor removed with an air pump. This

FLIGHT SHOOTING.

its ancient history, but to my knowledge no serious attempt has been made to give the art a scientific foundation. It is for the above reason that I submit this article on our glorious craft—the sport of kings and king of sports—of a nature somewhat different from our classical essays on archery. As I am self-taught, my rambling remarks will probably abound with errors, but if something can be saved from the wreck of criticism that will be useful to my fellow archers, the object of this paper will be attained.

The ideal bow would have the arrow nocked at the middle of the string and released at the center of the bow. The two limbs of the bow would then be made of equal strength to insure a symmetrical cast. This would, however, give no room for the position of the hand. If the arrow is nocked at the middle of the string, the grip must be somewhat below the center of the bow, making it slightly topheavy. If, on the other hand, the grip be placed at the center of the bow, the nocking point would be above the middle of the string. Both methods are undesirable, but also unavoidable. A combination of these methods might be used, the grip being somewhat below the center of the bow with the nocking point a corresponding distance above the middle of the string. As this is a choice between three evils, it is difficult to decide which is the least objectionable method. For my share, I prefer the second, though I am free to admit that it has serious objections.

shorter it must be relatively weaker, and vice versa. The bow should be stiff in the middle, the greatest flexure occurring in the end one-third of the limbs.

When the bow is strung and fastened in a vise, so that the plane through the string and its central axis is a vertical plane, then the back of the bow should everywhere be horizontal, or else symmetrical with regard to the horizontal plane. If it is not so, take a file and a small Stanley level and remove all skew, or eccentricity, from the back. A heavy or strong bow is not necessarily the one giving the sharp cast, or imparting a high velocity to the arrow. It is a question of stiffness, elasticity and length of bow combined. The elasticity of the wood would be improved through scientific seasoning methods, but these are beyond the control of the archer.

The selection of weight depends upon the strength and the willingness of the archer to work. On the whole, a heavy bow gives a lower and smoother trajectory to the arrow and eliminates to a great extent the flirring and wobbling due to an uneven release of the string. It also overcomes the eccentricities of flight introduced by the feathers on the various arrows not being glued on at the same angle, or not possessing the same curvature. Arrows which insist on wobbling with a 40-pound bow, fly true as a line with a 55-pound bow.

The sharpness of cast is enhanced by shortening the bow. I have a 5-foot 9-inch, 40-pound bow that gives a decidedly sharper cast than a

ACCURACY SHOOTING.

would season our wood rapidly and retain the elastic qualities that are so essential to an efficient bow.

The efficiency of the bow depends also upon the weight of the arrow. The momentum, or amount of motion possessed by the arrow, is the product of its mass multiplied by its velocity, or

$$\text{Momentum} = \text{mass} \times \text{velocity.}$$

A force acting for a short time, such as that of the bow-string on the arrow, is called an impulse, or impact. The quantitative value of the impact varies as the product of the acting force (constant for any given bow at full draw) by the duration of time during which the force acts. The effect of the impact is to give momentum to the arrow and to produce a constant velocity. The impact of the bow equals the momentum imparted to the arrow, or

$$\text{Force} \times \text{time} = \text{mass} \times \text{velocity.}$$

Hence, the velocity of the arrow=

$$\frac{\text{Force (of bow)} \times \text{time (during which the force acts)}}{\text{Mass (of the arrow).}}$$

Now, every body at rest, like the arrow drawn on the bow, has a tendency to remain at rest. This tendency to remain at rest is called inertia. The inertia of a heavy body is greater than that of a light one. Consequently the force of the bow, exerted through the agency of the string, would act on the arrow for a longer time if the arrow were heavy than it would if the arrow were light. The above equation shows that its velocity would therefore be relatively greater. In other words, the momentum, or energy stored up in the arrow would be greater, and the bow more efficient; that is, you would be getting more energy out of it in proportion to what you put in. This may seem strange, but would you use a light tennis ball to make a distance throw?

The greater energy in the heavy arrow would diminish the danger of rebound from the target, minimize the effect of wind, and over-

come the variable effects produced by a lack of uniformity in the size, shape and configuration of the feathers. The arrow would also be stronger and stiffer, and therefore vibrate and deflect less. It would shoot more accurately, and especially in the horizontal plane.

When the arrow is shot, the potential energy of the bow is released and imparted to the arrow as kinetic energy. The arrow at first accelerates in velocity, until the nock leaves the string, and thereafter travels with a uniform velocity in the direction in which it first leaves the bow, except as it is retarded by the friction of the air, affected by a head-wind, or drawn downward by the force of gravity. When the arrow is released a sharp recoil is experienced, which is transmitted from the bow to the archer. This recoil, or reaction, is equal to the energy with which the arrow is projected, and therefore depends upon the strength of the bow.

Why is it that one bow gives a recoil that we call "smooth as silk," while another kicks, twists the wrist, turns the hand and stings?

It is entirely a question of the mutual action, or interference, of the vibrations of the two limbs of the bow. If these two limbs are properly proportioned with regard to strength, so that their free periods of vibration coincide, they will form a node, or position of rest, at the grip of the bow. The limbs then vibrate in harmony and the bow feels balanced.

If, however, one limb is relatively stronger than the other, so that it vibrates more rapidly, the mutual action of the two limbs will intermittently form anti-nodes, or positions of motion, under the grip and the bow string, and otherwise feels unmanageable. If the two lateral halves are not of the same strength, a torsional or twisting vibration will probably also result, much to the archer's discomfort. This soon affects his equanimity of mind, acts on his nerves, and places him in a mental condition where good shooting is an impossibility.

A bow with a good recoil is a joy forever! A poor one may not seriously affect any particular single shot, but its psychological result on the archer is distinctly bad. For good shooting there is such a delicate balance of operations which must be performed in synchronism,

that any irritating influence must not be overlooked. In fact, the archer's psychological condition, or frame of mind, is of the utmost consequence. In preparing for a meet a course in mental training is of the same importance as the training of the muscles or the eye.

We are all acquainted with the archers who in practice shoot well, only to meet with mediocre success at the crucial moment. On certain days we all shoot consistently, while on others everything goes wrong. We blame our tackle, the wind, the temperature, the light, our friends, in fact, everything under the sun. The trouble is entirely in our own upper story. I, therefore, repeat most emphatically that every source of irritation must be eliminated to do record shooting. Remedy the bad recoil by making the shorter limb of your bow somewhat weaker than the longer one, so that the free periods of vibration of the two are the same; see that the bow is symmetrical laterally, and use a string compatible with the bow.

In the future I shall order all my bows delivered without the varnish or other finish, so that they can be strung, examined and corrected for any lack of symmetry. If one lateral half is stronger than the other, the arrows will cast either to the right or left of the target, while the side recoil will move the left arm from its position of rest. The two limbs of the bow can then also be worked to the correct relative strength, so that their periods of vibration coincide.

The braid at the center of the bow should be removed and the bow built up at the center, where it is grasped, until the grip conforms to the shape of the hollow of the archer's hand; else the bow will be held loosely in the grasp and the recoil on release throw it out of true alignment. This grip should then be covered with some strong, absorbent material that does not give on pressure. A soft plush grip is a mistake.

The strings furnished with our bows, or purchased at the supply shops, are not satisfactory. After trying various materials, I have found one consisting of from fourteen to sixteen strands of carpet warp to give excellent results. The separate strands are waxed before being twisted together. The end of the

PITTSBURGH ARCHERS.

string, that is tied to the lower tip of the bow, should not be allowed to hang loose. It should be twisted around the string tightly and finally fastened with thread. The string should have a loop at each end.

A single strand of previously waxed carpet warp gives a very satisfactory winding for the nocking point. Determine the center of the string and then coil the wrapping as far below the center as you do above, for otherwise the string will vibrate, not only as a whole, but also in segments, and produce harmonic vibrations that feel disagreeable, and will impart a vibratory wiggle to the arrow.

For consistent shooting the arrows should always be nocked at the same point on the string. This is generally attempted by winding a short piece of colored thread at the nocking point. That requires great care in placing each arrow on the string and allows the nock to slip up or down as the arrow is drawn. A better method is to wind a short shoulder of carpet warp, both above and below the nocking point, so close together that the arrow will just fit in between, without free play or undue constriction. The archer then has an invariable nocking point and need give this no further attention.

The arrow should then be placed on the string at right angles to it. A draughtman's 90 degree triangle, or square, can be used for this purpose. Now make a heavy pencil mark on the bow directly above the shaft of the arrow. The hand should always be placed on the grip so that each arrow is raised to the height of this pencil line. The force of the string is then transmitted directly along the axis of the arrow, so that they will fly true. Any flirting or wobbling of the arrow introduces inaccuracy of flight and absorbs energy which should be used to propel the arrow straight and not wasted in doing internal work in the arrow itself.

The period of vibration of the string should coincide with that of the bow. The rapidity of vibration of the string varies directly as the square root of the tension, and inversely as the length and the square root of its weight. The length and weight remain constant, no matter how far the arrow is drawn, but the tension is variable. It is, therefore, practically impossible to calculate the constants of a string exactly suitable for a given bow, but an incompatible one soon shows its effects in an uneven cast of the arrow, due to the string vibrating in over-tones, produced by a lack of harmony of the vibration periods of bow and string.

The incompatible string is also more apt to break, not at full drawn or while the arrow is still in contact with it, but on the recoil after the arrow has left the string. This happens at the moment when the string attempts to shorten while the bow straightens, a case that would not occur when the periods of vibration of bow and string are in harmony. The arrow would probably hit the target, but a new string would be required, whose position on the bow would in all probability not coincide with the old one, and therefore require a new and undetermined point of aim.

I well remember the peculiar idiosyncracies of a string that to the eye appeared nearly perfect. It is, of course, unnecessary to state that each string should be round along its entire length.

It is customary to allow a clearance of about six inches between the string and the back of the bow, but eight inches produces a steadier flight and less wear on the shaft where it rubs against the bow. It greatly reduces the violent shifting of the nock to the right, which occurs just before the arrow leaves the bow, and constitutes one of the most serious physical imperfections of shooting. This shifting of the nock raises havoc with an arrow, unless it is unusually stiff, and rapidly renders them unlike in weight and shape. The increased clearance also greatly decreases the danger of striking the string against the arm guard, which frequently spoils an otherwise good shot.

For accurate shooting the arrow must be true in straightness, stiff, and uniform in weight, in the position of the center of gravity, and in the conformation, curvature and size of the feathers. Here is where our greatest mechanical difficulties arise. It is practically impossible to get accurate arrows, and still more difficult to keep them in condition. We must utilize what is furnished us, but through the proper care conditions can be greatly improved. I shall not attempt to give my ideas as to how arrows should be made, as these are still in the formative stage and based on theory rather than on practice; but I shall attempt to give some hints applicable to arrows that come to us ready made.

Examine the horn nock of each and file them to the width necessary for your string. See that the bottom of each nock is square, or better still, round, and of the same diameter as the string. This groove in the horn must be exactly symmetrical with the central axis of the arrow, and not displaced toward either side. Have the groove a little wider on top than at the bottom. File the groove down to such a depth that all the arrows are of same length.

Now weigh each arrow, add varnish to the light ones, and carefully remove it from the heavier ones until they are practically of the same weight. Do not add or remove varnish equally along the entire shaft, but first balance each arrow on a sharp triangular file and mark the center of gravity. Add or remove varnish so as to make the center of gravity of every arrow come the same distance from the point.

A thin film of good oil or grease prevents mud, paint, etc., from adhering to the shaft and this keeps the weight of the arrows constant.

When stored away for the winter, place them in a vertical position, preferably in a practically air-tight metal case, to prevent the abnormally dry steam heat from removing too much moisture.

[TO BE CONTINUED.]

### Archery in Pittsburgh.

PITTSBURGH, Pa., Dec. 30.—*Editor Forest and Stream:* Winter has closed on us and the ground is frozen so hard that a missed target means a broken arrow.

As yet an indoor range of sufficient extent has not been obtained, but it is expected that one may be found soon.

As it is, the shooting part of the sport is to all intents and purposes over for the season, but the discussion of the various phases of archery and the publishing of the same in *FOREST*

AND *STREAM* will constitute a mid-winter diversion almost as interesting as the real thing.

Now, fellow archers, new and old, let us hear from you. Let us have your own original ideas. Don't dive into musty history and cough up some old and awful stuff that will impose on the good nature of the editor and usurp space not belonging to our department. Don't relate the doing of impossible things by impossible men, but endeavor to infuse something of the scientific into our beloved but neglected sport.

The last scores made by the Beechview Bon Air archers were as follows:

Ninety-six arrows at 40yds.:	
Jas. S. Jiles.....	96 518
Team round, 96 arrows, 60yds.:	
Jas. S. Jiles.....	80 376
W. J. Holmes.....	86 368
American round:	
O. L. Hertig.....	85 506
W. J. Holmes.....	83 405
Jas. Jiles.....	82 408

Dr. Hertig has just finished his first season, having commenced to shoot late in 1911.

In ten consecutive team rounds of 96 arrows at 60 yards, shot over three different ranges, he has averaged 92 hits, 480 score, in no round making less than 90 hits. This is an average of thirty to an end, or five (a blue) to each of 960 arrows. His average in the American round since Sept. 1, covering several dozen rounds, has been 84 hits, 456 score.

The doctor has a little note book in which he records his scores both good and bad. He says: "One may forget the bad scores; in fact, it is only human to do so. This little book is devoid of sentiment and human frailty, and when it comes to the computing of averages, it will place you just where you belong."

In his article of last week, Dr. Hertig relates a dream which the writer of this is supposed to have had, and which he does not deny, being firmly of the opinion that among the mountains of the East, yew trees may be found out of which good bows may be made. Let us search.

JAS. S. JILES.

### 1913 Archery Scores.

CHICAGO, Ill., Jan. 1.—*Editor Forest and Stream:* It is a rare thing for archers to shoot on New Year's Day. As a rule, to which there are few exceptions, November sees the end of the archery year. But the mildness of this winter has enabled us to shoot on Christmas and New Year's and on several other days.

Those few enthusiasts, who preferred to forego other pleasures for those of the range, made the following scores, to-day. Weather: Temperature 40 degrees, wind, South, 20 miles an hour. The scores:

Team round, 96 arrows at 60yds.:					
H. W. Bishop.....	21 105	22 104	21 125	22 112	86 446
G. L. Nichols.....	22 106	22 96	22 116	23 111	89 429
J. H. Pendry.....	21 97	23 117	20 96	19 85	83 395
Dr. E. B. Weston	18 78	18 94	16 66	21 95	73 333

Mrs. Witwer-Taylor and Mr. Walker were out for a short time.

EDWARD B. WESTON.

THE Chicago Archery Club held its annual business meeting at the Grand Pacific Hotel recently and elected the following officers and executive committee: President, James H. Pendry; Vice-President, Dr. Edward B. Weston; Secretary-Treasurer, Percival S. Fletcher; Executive Committee, Messrs. Pendry, Weston, Fletcher and Homer S. Taylor and George L. Nichols.

# TRAP SHOOTING

## Fixtures.

### REGISTERED TOURNAMENTS.

Jan. 22-25.—Pinehurst (N. C.) Country Club sixth annual Midwinter Handicap. Leonard Tufts, Pres.  
 Feb. 22.—Birmingham (Ala.) G. C. tournament. O. L. Garl, Sec'y.  
 April 8-10.—San Antonio, Tex.—The Interstate Association's Southwestern Handicap, under auspices of the San Antonio Gun Club; \$1,000 added money. E. E. Shaner, Mgr., Pittsburgh, Pa.  
 July 8-13.—Cedar Point, O.—The Indians' tournament. D. H. Eaton, Sec'y, Cincinnati, O.

## DRIVERS AND TWISTERS.

The annual indoor aerosaucer exterminating contest will be held at Sportsmen's Show, Madison Square Garden, New York, commencing Feb. 27.

The seventeenth annual indoor championship match and prize shoot of 1913 will be held under the auspices of the Zettler Rifle Club, 159 West Twenty-third street, New York, from March 15 to 22. Programs later. A. Begerow is President; F. Hocking, Secretary.

E. R. Shaner, Tournament Manager, the Interstate Association, writes us that "the Interstate Association's Southwestern Handicap tournament will be held at San Antonio, Tex., April 8-10, under the auspices of the San Antonio Gun Club. There will be \$1,000 or more added money."

From Seaside Club at Bridgeport comes the cheerful news that they will send scores regularly to FOREST AND STREAM. E. R. Lewis, of this club, tells me that they have trapped 260,000 targets during the past two years, and hope to do better this year. This shows a healthy condition and commendable enthusiasm. FOREST AND STREAM trappists will be glad to see the scores and compare with their own. Thanks.

It is interesting to note that Pittsburgh Athletic Club is going in for trapshooting again. Last year there were many enthusiastic regulars at the P. A. C. traps. Limited space and encroachment by factories made the game impossible. There is likelihood that grounds out of town will be secured this winter. "The Winged Head" of P. A. C. says: "Twenty-five thousand targets were trapped in the short time the members of the club had grounds last year. It is indeed the sport alluring—the sport of kings." W. G. BEECROFT.

### Seaside Gun Club.

BRIDGEPORT, Conn.—The regular shoot of the Seaside Gun Club was held New Year's Day, it being the third of the winter series. A more perfect day at this time of the year could hardly be conceived for the sport, and a good crowd was in attendance. Special interest was centered in the club championship, a semi-annual event, and it developed into a most exciting event at the finish, with a display of skill seldom seen under like circumstances. Messrs. Wilson, Cate and Vanstone tied up with 94 each out of their 100, and in the shoot-off at 25 birds, Wilson went straight, and Cate and Vanstone broke 24 each—a very pretty exhibition by all three men. Wilson had his eye on them most of the day, he having broken 49 out of his first 50, giving him the leg on the President's cup. Hall, Wolfinger and W. Smith turned in perfect scores with their handicaps, in the handicap cup event, Smith winning out in the shoot-off with another perfect score, giving him the leg.

Smith again tied up with Kellogg and Clarkson in the Island Brook cup event, and in the shoot-off Smith and Kellogg again tied up, Kellogg winning out in the next trial, giving him the leg.

An added feature for the day was ten high gun prizes, with handicap, 100 birds, which were won as follows: Cate (2) 96, W. B. Smith (10) 94, Wilson (0) 94, Williams (4) 94, Wolfinger (8) 94, Vanstone (0) 94, Lyon (8) 92, E. Lewis (6) 91, Stiltz (8) 90, D. D. Smith (20) 89.

President's cup, 50 birds: Wilson (0) 49, Vanstone (0) 48, Cate (1) 47, Adams (7) 46, Lyon (4) 46, Senior (0) 45, Fisher (10) 45, Williams (2) 48, Stiltz (4) 44, Wolfinger (4) 44, Southey (0) 44, W. Smith (5) 43, Billings (7) 43, Kiefer (12) 43, Hall (2) 42, R. Lewis (2) 42, Kellogg (5) 41, Sterling (6) 40, Fox (4) 40, Mollan (12) 40, Clarkson (4) 39, Ferris (4) 37, Fish (5) 36.

Handicap cup, 25 birds: Hall (2) 25, W. Smith (2) 25, Wolfinger (2) 23, Cate (0) 24, Fisher (5) 24, Ferris (2) 24, Williams (1) 23, Lyon (2) 23, Stiltz (2) 23, Vanstone (0) 23, E. Lewis (1) 23, R. Lewis (1) 22, Senior (0) 22, D. Smith (5) 22, Sterling (3) 21, Adams (3) 21, Lavery (2) 21, Wilson (0) 21, Clarkson (2) 19, Billings (3) 19, Southey (0) 18, Mollan (6) 18, Kiefer (6) 17, Kellogg (2) 15, Fish (2) 14.

Island Brook cup, 25 birds: Kellogg (2) 25, W. Smith (2) 25, Clarkson (2) 25, Wolfinger (2) 24, Cate (0) 24, Wilson (0) 24, Lyon (2) 23, Stiltz (2) 23, Williams (1) 23, Ferris (2) 24, Vanstone (0) 23, Sterling (3) 22, D. Smith (5) 22, Adams (3) 21, Senior (0) 21, Hall (1) 21, E. Lewis (1) 21, Southey (0) 20, Billings (3) 20, Kiefer (6) 20, Fisher (5) 19, Mollan (6) 19, Fox (2) 18, Fish (2) 18, R. Lewis (1) 17, Lavery (2) 14. T. M. A.

### Bourbon (Ind.) Gun Club.

BOURBON, Ind., Jan. 4.—Our practice shoot on New Year's Day was very poorly attended, the boys being out

## Philadelphia Trapshooters' League

BOREAS took a hand with his great guns in the Jan. 4 events of the Philadelphia Trapshooters' League, but finally succumbed to the heat of enthusiasm of the members of the League. However, the presence of the grizzled old veteran kept scores well down. Du Pont and Whites won their respective matches, thus remaining tie for upper berth. Nevertheless Du Pont showed the class, and all in all, went to the top in quality, though not in points. Meadow Springs lost to S. S. Whites by only 13 saucers, while Du Pont tore the rims off Glen Willow by 40 saucers.

Highland went over to Camden, and by winning from Edge Hill tied Lansdale for second place. The latter beat Clearview, 430 to 418. The Highlands broke only 4 more than Camdens. Points scored and targets broken:

Dupont	6	1349
S. S. White	6	1339
Lansdale	5	1271
Highland	5	1252
Meadow Springs	4	1304
S A Camden	4	1241
Clearview	3	1276
Glen Willow	3	1170

### Lansdale—Clearview.

PHILADELPHIA, Pa., Jan. 4.—Lansdale won to-day by 430 to 418, but not until after a stubbornly fought match. Lansdale brought over only fourteen men. Clearview could dig up only fifteen. It was too cold and blustery for the others.

Metz, of Lansdale, carried off the high gun, losing but 2 out of 50. L. Swartz and Nice tied with 47, while Fisher led the Clearviews with 45. Lloyd Lewis, of Wilmington, shot in the match and broke 45. Scores:

Lansdale.		Clearview.	
Metz	47	Fisher	45
L Swartz	47	Bonsall	45
Nice	47	Elwell	44
Bender	46	Gideon	43
Rodgers	43	Davidson	43
C Swartz	42	Greene	43
Martin	40	Wiltbank	42
Henning	39	Steller	40
Worthington	39	Fink	37
Rausch	39—430	Shuster	37—418

### Du Pont—Glen Willow.

WILMINGTON, Del., Jan. 4.—The Glen Willow Gun Club, of Roxboro, Philadelphia, visited Du Pont to-day in the third match of the series of the Philadelphia Trapshooters' League. The Glen Willow boys, although the tail-end team in the league when yesterday's race started, showed up very well, not only in point of numbers, but also in the scores made under adverse conditions and on a strange ground. Du Pont had forty-two men at the score; Glen Willow twenty-six, making a total of sixty-eight shooters; three not eligible to shoot in the race made seventy-one.

The local club won out quite easily, but the visitors were by no means disgraced, as they shot under difficult conditions, the majority of them having come in on a late train and only having a poor light to shoot in. The final scores of the ten high men on each team showed a total of 441 for Du Pont Gun Club, as against 401 for the Glen Willows.

The wind blew hard, but straight scores of 25 were made by L. C. Lyon, W. S. Colfax, Jr., and Edward Banks, the latter not being eligible to shoot on the home team. Curiously enough all these scores were made over No. 2 trap. Lyon and Colfax were high on the Du Pont team with 49 out of 50. The nearest to them was E. Gillinger, of the Glen Willows, with 45; J. Rigg, of the same club; J. H. Minnick and Walter Tomlinson, of the Du Ponts, next with 44 apiece. The 43s were: O. Wilde, of the Glen Willows, who had the misfortune to slip up on his last string, and W. Edman, E. E. du Pont and J. B. McHugh, of the home team, and two (W. Carter and E. Kinckiner), of the Glen Willows.

Of the four on the home team, one had to be cut out of the honor list, and by the rules adopted in such cases, namely, the lowest score in the last 25 (H. P.

to turkey feasts, etc. Russell tried out his new trap gun, which was just received from the factory. Scores:

Shot at. Broke		Shot at. Broke	
Parks	50 35	Radeliff	50 34
Johnston	50 31	Semler	25 16
Russell	75 61		L. R.

### 1913 Prospects.

BY E. R. SHANER.

NEVER at the opening of any trapshooting season was the prospect for the future brighter. There is not a cloud discernible on the horizon. Members of the fraternity are, as a rule, above the influences which lead to bickering in some sports. A love of clean, exciting, scientific and high-toned sport controls them, and the subsequent rivalry is of a generous nature that has a tendency to create and keep up interest in the pastime. I look for more contests and competitors at the traps during 1913 than ever before. That the new year will be productive of some excellent sport, I do not doubt.

Carlton, one of the Du Pont Gun Club's wheel horses) had to be eliminated from the team. Two 38s, two 37s and one 35 found places on the Glen Willow team.

The scores of the two teams were as follows:

Du Pont Gun Club.		Glen Willow Gun Club.	
W S Colfax, Jr.	49	E Gillinger	45
L C Lyons	49	J Rigg	44
J H Minnick	44	O Wilde	43
W Tomlinson	44	R Carter	42
W Edman	43	E Kinckiner	42
E E du Pont	43	H McClennan	38
J B McHugh	43	G Schuster	38
J T Roberson	42	J B McFalls	37
C Leedom	42	Geo Steene	37
W M Foord	42—441	Geo Gearhart	35—401

Other scores made by those present, but who did not "make the team," were:

Du Pont Gun Club—H. P. Carlton 42, W. J. Highfield, N. K. Smith and Victor du Pont 41; W. A. Joslyn and H. W. Bush 40, J. B. Grier, T. W. Mathewson, Dr. H. Squires and Thorpe Martin 39; W. G. Wood and C. H. Simon 38; B. Guest, E. A. W. Everitt, W. B. Smith, Jr., William Coyne and Z. H. Lofland 37; W. M. Hammond, Dr. Arthur Patterson and Albert Bird 36; C. E. Springer and C. Haverback 35; L. L. Jarrell and R. L. Naudain 34; J. W. Anderson, Jr., A. J. Curley and Dr. Horace Betts 33; J. J. Magahern 31; E. M. Ross 29; W. A. Casey 25, and S. G. David 22.

Glen Willow Gun Club—R. Hall, A. George and R. Mattis 34; William Free and H. Reichelderfer 33; Dr. Pepper and George Ferrell 32; J. Mattis, Charles Weimann, C. Hallick and George Bickings 31; William Fessler and L. R. Garretson 30; J. Ulmer 29; W. McClennan 26, and George Tomlinson 21.

Not eligible to compete: Edward Banks 48, Linn Worthington 45, and L. D. Willis 40.

### Whites—Meadow Springs.

PHILADELPHIA, Pa., Jan. 4.—Sixty-seven members took part in to-day's match. The Whites won, by 449 to 436, the last squad, which consisted of White, Mathews and Howard, finishing up with high scores. This trio brought in the required number to give the teetehers their third straight win.

The lowest scorer on the Meadow Springs team was Turner with 41. Griffith and Howard, of the Whites, and Sloan, of the Meadow Springs, were the leading high guns, getting 47 out of 50. Griffith, Howard and Sloan made straight scores in one event. Scores: Team race, ten men to a team, 50 targets per man:

S. S. White.		Meadow Springs.	
Griffith	47	Sloan	47
Howard	47	Renner	46
Wilson	45	Dickinson	45
Newcomb	45	Torpey	45
White	45	Thompson	44
W H Mathews	45	Kirsch	42
Powers	44	Coyle	42
Sidebotham	44	Hutton	42
George	44	Leford	42
Seyern	43—449	E H Turner	41—436

### Highland—Camden.

CAMDEN, N. J., Jan. 4.—Highland beat Camden to-day by 394 to 390. Both clubs were shy several of their best shots, but the match was close.

Springer led for Camden with 47, the best score of the day, running 25 straight in his first event. McCarty got a 43 and Perry 41 for Highland. Totals of 40 or better were few. Highland getting four, Camden three.

Tom Meehan and Butch Landis, the last two men in the closing squad, were the bacon getters for Highland. Scores:

Highland.		Camden.	
Tansey	44	Springer	47
McCarty	43	Chalmers	43
Perry	41	Pechman	41
Pflegar	40	Kling	39
Freed	39	Hineline	39
Hibbs	39	Radeliff	38
Landis	39	Slear	36
T Meehan	38	H Anthony	36
J F Meehan	36	Crane	36
Clark	35—394	Wakeman	35—390

**Siwanoy Country Club.**

MT. VERNON, N. Y., Jan. 2.—The Siwanoy Country Club, of Mt. Vernon, was favored with unusually fine weather on New Year's Day. The saucer-shaped clearing in front of the traps gave an aspect of shooting under natural conditions. This was made more realistic by slight currents of air, which made the pigeons jump in a life-like manner, and incidentally was partly responsible for some low scores.

The first event on the program was the fifth competition for the handsome president's trophy, handicapped on the Du Pont system, with a distribution of points to the ten high guns. Seven shooters tied for first honors, each with their handicaps making a perfect score, entitling them to 7 points apiece. The standing to date of the highest total points won in the president's trophy is: Dr. Barnard 22, Dr. Held 19.5, G. A. Wylie 19, W. Thorpe 17.8, Z. C. Offutt 16.5, Prof. Hill 16.5, J. Wintjen 16.3, G. L. Yates 16, L. G. Bond 15.5, J. P. Donovan 15, H. J. Smith 13.5, M. R. Guggenheim 13, W. M. Wylie 13, Dr. Currie 11.5, and T. H. Lawrence 11.5.

The second event on the program was for the captain's trophy, which is a miss-and-out competition, 10 straight kills being necessary to become eligible to win a leg. J. P. Donovan, Geo. F. Pelham and Dr. Held became eligible by breaking 10 straight each, and in the shoot-off the leg was won by the first named. Mr. Donovan and Mr. Offutt are the only two members who have scored in this event.

The Du Pont trophy furnished considerable interest in that Dr. Barnard and Dr. Currie with their handicaps each had perfect scores. The standing to date is: First, Dr. Currie, with Dr. Barnard, H. J. Smith and L. G. Bond close seconds. The last three named each had the same score.

The take-home trophies were shot for under club handicaps, H. J. Smith taking first place and J. G. Wintjen second place.

In the afternoon some of the members had a practice shoot at the Olympic style. The scores:

President's trophy:

Handicap.	Broke.	Total.	Points.
Donovan	8	20	25
Smith	7	19	25
Bond	5	20	25
Cornett	8	17	25
Held	5	20	25
Hill	8	17	25
Wintjen	6	19	25
Yates	6	18	24
Stone	8	16	24
Morgan	8	15	23
G A Wylie	4	18	22
Lawrence	7	15	22
W Thorpe	6	16	22

Barnard	6	16	22	0
Stiles	8	12	20	0
Hadlock	8	12	20	0
Pelham	1	19	20	0
Groll	0	19	19	0
Currie	4	14	18	0
W M Wylie	8	10	18	0
Guggenheim	8	9	17	0
Rauch	4	12	16	0
Fine	8	7	15	0
Des Martes	8	6	14	0
Miss Thorpe	8	5	13	0

Take-home trophies, 75 targets, handicap:

Smith	6	25	G A Wylie	3	18
Wintjen	4	24	Donovan	4	18
W M Wylie	6	22	Hadlock	8	17
Yates	3	21	Hill	3	17
Guggenheim	4	21	Pelham	1	17
Stone	6	21	Fine	8	17
Lawrence	1	20	Morgan	5	16
Barnard	5	20	Held	1	16
Bond	5	19	Cornett	5	15
W Thorpe	4	19	Stiles	7	14
Currie	6	18	Miss Thorpe	8	12

Dupont trophy, 25 targets, handicap:

Barnard	7	25	Stone	6	21
Currie	8	25	Wettstein	8	21
Donovan	4	23	Lawrence	1	20

**Portland Gun Club.**

PORTLAND, Me., Jan. 1.—To-day's shoot brought out fourteen trappists, but none good enough to throw any dust on E. Randall, who exterminated 91 out of 100. His little brud C. missed only one more, which put him over Thurston for place. The scores:

Hinds 75, G. Darton 84, Dimick 78, *Osborne 79, Sterling 70, E. Randall 91, C. Randall 90, Dr. Hayden 82, Thornton 57, Taylor 85, Thurston 87, Adams 78, Gray 78, Gray 77, Dr. Gilman 61.

**Daniel Boone Gun Club.**

MARTHASVILLE, Mo., Jan. 1.—An interesting clay-bird match was shot on the grounds of the Daniel Boone Gun Club at this place to-day between a crowd of shooters from Treloar and Holstein, two little towns about seven or eight miles west of here, on one side, and an equal number of our home "boys," on the other side, for a dollar a man and the losing side to pay for all the birds. A strong irregular wind was blowing into the face of right-quartering birds, which made some of the shooters say things that don't look well on paper, but you can imagine what some of them were, looking at the scores.

The visitors were a bunch of jolly, manly fellows, but were up against hard luck on account of new grounds and wind. Both sides expect to shoot again soon at Treloar, Mo.

The match to-day was at 50 birds for each man: Holstein and Treloar, Marthasville.

Dr Underwood	34	C Kite	49

J. O. WILSON, Sec'y.

**Smith Gun Club.**

NEWARK, N. J., Jan. 4.—Considering the high winds blowing over the traps, the scores made to-day on the Smith Gun Club grounds were exceptionally good. Two men made 25-bird straight scores. They were W. Hassinger and B. M. Shanley, Jr. High gun honors also went to B. M. Shanley, Jr., whose score was 246 out of a possible 275. R. Hensler and W. Hassinger also shot well. The following scores were made: B. M. Shanley, 21, 23, 22, 20, 22, 22, 23, 25, 21, 24, 23; R. Hensler, 19, 21, 17, 18, 19, 20, 21, 19, 23; W. Hassinger, 23, 20, 20, 21, 22, 22, 25, 24, 22; H. Hassinger, 18, 19, 23, 18; J. Thompson, 23, 20, 19, 22, 24, 19; C. Von Lengerke, 20, 22, 18, 19, 20, 21; F. Appgar, 19, 19, 19, 15; M. Appgar, 15, 17, 17, 20, 19; L. Colquit, 21, 23, 23, 21, 21, 21.

Midwinter Handicap.

ADVANCE indications point to a large, classy and extensive representation for the sixth annual midwinter trapshooting handicap at Pinehurst, North Carolina, scheduled for Jan. 22, 23, 24, 25. From inquiries numbering several hundred and covering all sections, many advance entries have been received and a large number

planning to come on the Saturday preceding the tournament for preliminary practice and the enjoyment of the diversified attractions which the village affords. The number of ladies in attendance will be unusually large and special plans are being made for their entertainment, among them a bridge party at The Carolina, tea at the Country Club, and the usual dances.

Many improvements at the trapshooting ground enhance their attractiveness, and the background has long been considered ideal, situated as they are on the crest of a hill which slopes gradually away into the distance, with the sky for the limit. Some idea of their location may be gained by the accompanying picture taken during last winter's shoot.

New York A. C.

PELHAM MANOR, N. Y., Jan. 1.—The feature to-day was a holiday cup for both the scratch and the handicap gunners. The latter event was won by C. W. Billings. In the handicap event T. Lenane, Jr., C. W. Billings, Dr. Culver, Dr. De Wolfe, J. I. Brandenburg, A. W. Church and J. M. Jones tied with full scores. Eight shoot-offs were required before Jones took the cup.

Two new cups were placed in competition to-day. One, offered by Mr. Stein, was captured by B. M. Higginson. The other was the Thomson trophy and was won by T. Lenane. Both events will run throughout the month. The January cup and Travers Island trophies were taken by C. W. Billings. He also scored a leg on the Olympic cup with a full. The distance handicap was won by J. M. Jones. The scores:

Table with 2 columns: Name and Score. Includes January cup, 25 targets, handicap; Thomson trophy, 25 targets, handicap; and Travers Island trophy, 25 targets, handicap.

Table with 2 columns: Name and Score. Includes Stein trophy, 25 targets, handicap; Thomson trophy, 25 targets, handicap; and Travers Island trophy, 25 targets, handicap.

Table with 2 columns: Name and Score. Includes Travers Island trophy, 25 targets, handicap; and High gun handicap, 100 targets.

Table with 2 columns: Name and Score. Includes High gun handicap, 100 targets; and Holiday cup, 100 targets, scratch.

Table with 2 columns: Name and Score. Includes Holiday cup, 100 targets, scratch; and Holiday cup, 100 targets, handicap.

Table with 2 columns: Name and Score. Includes Holiday cup, 100 targets, handicap; and Distance handicap, 25 targets.

Table with 2 columns: Name and Score. Includes Distance handicap, 25 targets.

Jan. 4.—T. Lenane, Jr. won three-eighths of the events here to-day, while Dr. E. R. De Wolfe won one-fourth. Lenane won Thomson trophy, distance handicap, high gun. Dr. De Wolfe won the Travers Island trophy and January cup. C. W. Billings won Olympic, Stein trophy, and R. L. Spotts won a shoot-off for high

scratch gun with Higginson. Each of the latter cracked 85 in the handicap, and when they shot off at a string of 25, Spotts broke only 23 to his opponent's 22. The summaries:

Table with 2 columns: Name and Score. Includes January cup, 25 targets, handicap; Thomson trophy, 25 targets, handicap; and Travers Island trophy, 25 targets, handicap.

Westwood Gun Club.

THE club entertained a squad of Cincinnati Gun Club members at the grounds on Jan. 4. The visitation was unexpected, but the home boys dropped their work and arranged an afternoon's sport for their guests. The high score was made by Hammerschmidt, who broke 66 out of 75, getting 47 out of the last 50. Sundry came second with 44.

The new house will be completed in a week or ten days. Several of the members will visit the Cincinnati Gun Club on the 12th, when Fred Gilbert, the well-known professional expert of Spirit Lake, Ia., is to be present. The ground was covered with snow, and a cold wind, sweeping over the hills, made it too cold for the boys, so that only a few targets were trapped.

Table with 2 columns: Name and Score. Includes Targets; and Shot at, Broke.

Chicago Gun Club.

CHICAGO, Ill., Dec. 25.—Christmas Day we had grand weather, and the ten shooters whose scores are given herewith came out to enjoy the afternoon, trying to break targets. Thomas certainly didn't let many get away, as he broke 15 straight in the practice event, brought down 48 in the first 50-target event, and scored 46 in the second, giving him a total of 111 out of 115 on singles. Silver was not far behind when he totaled 92 out of 100 in the two main events. Mrs. Fetherston shot in splendid form for not having done any shooting in some time. Scores:

Table with 2 columns: Name and Score. Includes Events; and Targets.

Dec. 28.—Another ideal day brought out a field of thirteen shooters, and a glance at the fine scores made by them shows that they had a good afternoon's sport. Young, Bills and Graham each broke 97 out of 100 in the two club events, Kirkwood being next in line with 95, while Goode scored 94. Meisner and Silver each made a total of 46 out of 50 in one event. Kirkwood took top honors in the double event, breaking 21 out of 24. R. R. Skinner was a visiting shooter from Birmingham, Ala., and he expects to be with us again on his return from Iowa. Scores:

Table with 2 columns: Name and Score. Includes Events; and Targets.

Dec. 29.—Conditions were considerably different from yesterday, as it was dark and cloudy, a light rain falling at noon, and a cold wind blowing all afternoon.

Dave Thomas did splendid work and was an easy winner of first honors for the day with a total of 130 out of 140. Eck took first place in event No. 4 with a score of 24 out of 25, Thomas having to be content with second place with 23, Wolfe making the same score.

Table with 2 columns: Name and Score. Includes Events; and Targets.

Guernsey Gun Club.

GUERNSEY, Ia., Dec. 25.—Our little aggregation of trapshooting enthusiasts met on the club grounds this afternoon for a little practice shoot, the weather being ideal, warm and calm. The following scores were made:

Table with 2 columns: Name and Score. Includes Shot at, Broke.

J. W. DOBBINS, Prest.

Crescent A. C.

BAY RIDGE, N. Y., Jan. 1.—H. M. Brigham won the trophies at Crescent Athletic Club at Bay Ridge today. He started out in the committee cup by tying F. B. Stephenson for the prize. Both gunners had 48 out of 50. Brigham won the shoot-off. He won Take-home trophy with 95 out of 100. Stephenson was high gun for the monthly cup with a full. W. W. Pell won a leg on the Clinton R. James prize.

There also was started a high scratch average shoot at Bay Ridge yesterday. F. B. Stephenson was the highest marksman with an average of 92.88; his total was 269 out of 225 targets. H. M. Brigham was second; O. R. Dickey third. The scores:

Committee cup, 50 targets, handicap: F B Stephenson... 0 48 O R Dickey... 0 43 H M Brigham... 2 48 F S Hyatt... 2 41 A E Hendrickson... 6 47 J S Lawson... 10 41 G G Stephenson, Jr... 6 46 M Stiner... 0 40 W W Pell... 4 44 R C Williams... 6 34 C R James... 2 44 H H Hopkins... 14 29 J F James... 0 43

Shoot-off, 50 targets, handicap: H M Brigham... 2 47 F B Stephenson... 0 46

Take-home trophy, 100 targets, handicap: H M Brigham... 4 95 G G Stephenson, Jr... 12 88 F S Hyatt... 8 91 O R Dickey... 0 87 W W Pell... 8 91 J S Lawson... 20 85 F B Stephenson... 0 91 J F James... 0 84 C R James... 4 90 M Stiner... 0 81 A E Hendrickson... 12 89 R C Williams... 12 80

Monthly cup, 25 targets, handicap: F B Stephenson... 0 25 A E Hendrickson... 3 23 W W Pell... 2 24 R C Williams... 3 23 G G Stephenson, Jr... 3 24 J S Lawson... 5 23 J F James... 0 24 H M Brigham... 1 23 C R James... 1 24 O R Dickey... 0 22 F S Hyatt... 2 23 M Stiner... 0 21

C. R. James trophy, 50 targets, handicap: W W Pell... 4 49 F B Stephenson... 0 45 O R Dickey... 0 48 H M Brigham... 2 45 G G Stephenson, Jr... 6 47 A E Hendrickson... 6 43 F S Hyatt... 4 46 J S Lawson... 10 42 C R James... 2 45 R C Williams... 6 42 J F James... 0 45 M Stiner... 0 37

High scratch average: F B Stephenson... 92.88 C R James... 86.22 H M Brigham... 90.66 W W Pell... 84.00 O R Dickey... 88.88 F S Hyatt... 81.33 J F James... 87.11 M Stiner... 79.55

Jan. 4.—Too much wind slipped unexpected motors of an eccentric pattern into the aerosaucers here to-day, in consequence of which most of the scores do not seem to belong to the names alongside of them. However, it's no printer's error. They belong where they are. Frank B. Stephenson, possibly, may be made an exception—he outgessed old Boreas, 201 out of 250 times. G. G. Stephenson, Jr., from a gift of 6, took limb on committee cup with 41, and a support on Remsen cup with (3) 23. F. T. Bedford with 2 gratis scalers copped pillars on monthly cup with 24. Take-home trophy was won by scratch man, F. B. Stephenson with 88. F. O. Williams was topper on James cup with 46 from the egg, but being a non-member, had to relinquish the honor to Stephenson, Jr. Scores:

Committee cup, 50 targets, handicap: G G Stephenson, Jr... 6 41 F T Bedford... 4 36 C R James... 0 40 R C Williams... 6 35 G Brower... 6 38 H M Brigham... 0 33 F B Stephenson... 6 37 \*F O Williams... 0 33 G Bingham... 14 37 F S Hyatt... 2 27 J F James... 0 36

Take-home trophy, 100 targets, handicap: F B Stephenson... 0 88 G Brower... 12 72 G G Stephenson, Jr... 12 82 George Bingham... 28 72 C R James... 0 76 J F James... 0 67 R C Williams... 12 75 F S Hyatt... 4 65 F T Bedford... 8 73 \*F O Williams... 0 60 H M Brigham... 0 73

Monthly cup, 25 targets, handicap: F T Bedford... 2 24 \*F O Williams... 0 18 G G Stephenson, Jr... 3 21 J F James... 0 16 C R James... 0 20 H M Brigham... 0 16 F B Stephenson... 0 19 F S Hyatt... 1 14 R C Williams... 3 19 G Bingham... 1 43

\*Not a club member.

Essex County Country Club.

ORANGE, N. J., Dec. 28.—A. O. Headley won the December cup at the Essex County Country Club traps, getting his last leg to-day. With a handicap of three targets, Headley scored 72. The three scratch men finishing were B. M. Shanley, Jr., 59, C. H. Daly 56 and James A. Hart 53. Hart was the best gun to-day, winning the ten doubles and also making a score of 24 in the take-home trophy event. A. O. Headley was first in the Olympic shoot, where he had a score of 21, and then tied with B. M. Shanley, Jr., in the handicap

OFFICIAL SEASON'S AVERAGE WINNERS FOR THE 11th TIME

WINCHESTER

Shotgun Shells Show Their Superiority Again in 1912

FOR thirteen years the Season's averages of trap shooters have been recorded. Eleven years of the thirteen, the Season's High Average has been won with Winchester Loaded "Leader" or "Repeater" Shotgun Shells. The year 1912 was no exception, as the following shows:

W. R. CROSBY

Allen Heil of Allentown, Pa., won the Season's High Amateur Average on Single and Double Targets combined, and the Interstate Association Official Season's High Amateur Average on Double Targets, with Winchester Loaded "Leader" Shells.

W. R. Crosby, of O'Fallon, Ill., won the Interstate Association Official Season's High Professional Average on Single Targets, and the Season's High Professional Average on all targets shot in Registered Tournaments, with Winchester Loaded "Leader" Shells.

Fred Gilbert, of Spirit Lake, Ia., won the Interstate Association Official Season's Average on Double Targets, with Winchester Loaded "Leader" Shells.

Two 1910 Interstate Association Records That Beat 1955 x 2000

E. F. Forsgard won the Season's High Professional Average for all targets shot in tournaments Registered by the Interstate Association. He broke 4799 x 4895 targets, 98+ per cent.

Shooting in five consecutive tournaments Registered by the Interstate Association, he broke 2077 x 2100, 98.90 per cent.

Mr. Forsgard in all his shooting used Winchester "Leader" or "Repeater" Loaded Shells. His gun was a Winchester Repeater—not a double-barreled one of a make so "modern" that it is no longer manufactured.

For Records and Results Shoot W Shells and Guns

sweepstakes, where a score of 23 prevailed. Headley was favored with an allowance of three targets, while Shanley shot from scratch. The scores:

Handicap sweepstakes.—B. M. Shanley (scratch) 23, C. H. Daly (scratch) 19, James A. Hart (scratch) 20, A. O. Headley (3) 23, C. F. Ross (6) 21.

Take-home trophy, handicap.—C. H. Daly (scratch) 21, J. A. Hart (scratch) 24, C. F. Ross (6) 21, P. E. Heller (6) 21.

Olympic shoot, handicap.—B. M. Shanley, Jr. (scratch) 12, C. H. Daly (scratch) 13, J. A. Hart (scratch) 19, A. O. Headley (3) 21; C. F. Ross (6) 15, P. E. Heller (3) 11.

Ten pairs, doubles, scratch.—J. A. Hart 13, C. F. Ross 9, B. M. Shanley, Jr., 8, A. O. Headley 8, P. E. Heller 8, E. M. Phillipi 2, C. H. Daly 6

Cincinnati Gun Club.

ON Dec. 29, O. J. Holaday was high gun with 90 out of 100. The conditions were not good for high scores, drizzling rain falling the latter part of the afternoon. L. J. Squier was the only shooter to go straight in any one of the five events. In the team match, Trimble and Holaday, the two local professionals, got

the best of Squier and Hammerschmidt by 6 targets. Ralph Trimble has not been much in evidence in the local shooting game for some time, and was in poor shape to-day. John Schreck is always on hand, and generally puts up a better score than his to-day's tally. McArdle got to the grounds late, and only shot at 65 targets, in the last 25 of which he broke 17, Hammerschmidt getting 22. O. T. Holaday shot at 50 targets, breaking 8 out of the last 10. A. Sunderbruch used to be one of the best shots in the club, and needs only a little steady practice to get back his old standing again. The scores:

Events: 1 2 3 4 5 Total. Targets: 20 20 20 20 20 D J Holaday... 18 18 19 17 18 80 I J Squier... 15 19 20 17 18 89 R L Trimble... 16 18 18 17 18 87 J Schreck... 18 17 15 18 19 82 Hammerschmidt... 17 18 13 18 16 81 A Sunderbruch... 17 19 17 16... 69 F McArdle... 15 17... 32 O T Holaday... 14 15... 29 Koster... 9 4... 13

Team match, 100 targets: R. Trimble 87, D. J. Holaday 90; total, 177. Squier 89, Hammerschmidt 82; total, 171.

1912

A YEAR OF SUCCESSES FOR

Peters Ammunition

"Where quality counts they win"—and quality counts EVERYWHERE. The year 1912 has been one continuous round of victories for users of Peters Shells and Cartridges—far too numerous to record here in full. The few items that follow will suffice to indicate the kind of work that can be done, and is being done every day with the P brand:

"Steel Where Steel Belongs" Shells

WON IN 1912:

- Grand American Preliminary Handicap, Grand American High Amateur Average, World's Amateur Indoor Trapshooting Championship, Texas State Championship, Arkansas State Championship, Pennsylvania State Championship, Virginia State Championship, Vermont State Championship, Colorado, New Mexico and Wyoming State Championship, E. C. Challenge Cup, twice by record scores, High General Average at Post Season Tournament.

Peters Semi-Smokeless and Smokeless Cartridges

WON IN 1912:

- 3 out of 5 Matches at Zettler Rifle Tournament, 5 out of 6 Matches at .22 Indoor League Tournament, 8 out of first 12 scores of American Team in the International Small-Bore Match, including 1st, 2nd and 3rd, 6 out of 10 Revolver Matches at Sea Girt Military Tournament, including Grand Aggregate, 5 out of 6 United States Revolver Association Outdoor Championships for 1912, including Two new World's Records, New Inter-Scholastic Record, 980 out of 1,000, Astor Cup (Inter-Scholastic League).

N. C. R. Gun Club.

DAYTON, Ohio, Jan. 1.—The jack rabbit shoot held to-day was a big success, not because of the "system" used, but because the shooters know that anything pulled off by this club under the management of the "only" MacCandless, and with the efficient backing of the other officers, is bound to be perfect in every detail. The weather clerk was also kind, and furnished a balmy, spring-like day, instead of the cold, blustering weather which may be expected to usher in a New Year. Over eighty shooters were present on the grounds, seventy-three entering the regular events, and seventy shooting the entire program. Starting off with a 20-target event, the next four were at 15 targets, and the sixth at 20 targets, a total of 100 targets. The entrance fee was low, only \$1, of which \$1 was deducted for targets. This allowed every shooter 5 cents for each broken target, and furnished 5 cents for each miss for the high guns in each event, divided 50, 30 and 20 per cent. Three traps were in use all day, the program being run off on Nos. 1 and 2, and No. 3 being kept busy by those who wished to shoot for targets only.

During the day 400 or 500 spectators visited the grounds, among them many of the fair sex. The office was in charge of W. F. MacCandless, with S. L. Goss and J. R. Urdike assisting. It was a busy place, but Mac's system worked to a charm, and the pay envelopes were ready promptly. H. L. MacCandless was kept busy supplying the contestants with their favorite loads, the "shell room" being well stocked. O. B. Sortman had general management of the field force. At No. 1 G. M. Wilson was referee and puller; No. 2, Ross Mombeck; No. 3, John Neff. The trappers were: No. 1, T. Welch; No. 2, Russell Mombeck; No. 3, Lester Perkins, W. Stroble and Cole. Scorers: C. R. Carley and R. S. McFarland, at No. 1; H. Bonner and E. Hall, at No. 2. The bulletin was kept up to date by E. E. Strobell.

The first squad was called to the firing line promptly at 10 o'clock, and with the exception of a few minutes at noon, when the workers were getting lunch, there was no cessation in the firing until shortly after 3 o'clock when the last event was finished. A number of good scores were recorded. C. D. Coburn, of Mechanicsburg, missed but three targets and headed the list. J. Hargrave, of Jamestown, got in second place with 94. Sam Leever, of Goshlen, tied for third place, with V. A. Hubler, of Dayton, on 92. Only three professionals were present, "Pop" Heikes taking the lead with eight down, Charlie Young following with 11 down, and L. J. Squier was third.

At the end of the regular program a special event at 25 targets was shot with forty entries. In this E. Hammerschmidt, of Cincinnati, and F. C. Koch, of Phillipsburg, divided first money on straight scores. Second money was divided among seven shooters with 24 each; five got third money on 23 each, and the same number divided fourth money on 22 each.

The Cincinnati and Northern Kentucky gun clubs were well represented. While here, Superintendent Arthur Gambell, of the former club, arranged for a series

of inter-city team matches with Dayton and Springfield, the first match to be shot on the Cincinnati's grounds on Feb. 2, to be followed by one at Dayton on Feb. 22, and one at Springfield on May 30. Each club to be allowed to enter not more than fifteen men in each match, the ten best scores to constitute the team total.

On the journey home a series of local team matches were arranged between Cincinnati and Northern Kentucky, three men on a team, 100 targets per man. W. R. Randall, E. Hammerschmidt and A. Sunderbruch will represent the former, and H. R. Irwin, J. E. Schreck and G. W. Dameron the latter club. The first match will be shot at the Cincinnati grounds on Jan. 12, and the return match at Northern Kentucky on the 19th.

H. L. Mombeck, president of the N. C. R. Club, did not do himself justice on the firing line. His other duties kept him on the jump, and gave him no time to steady himself for target smashing. S. W. Everitt, club captain, had his hands full, and the shooting was only an incident with him, which accounts for his low total of breaks. W. F. Bippus, vice-president, shot below his average, but scored 100 per cent. in fulfilling his duties as one of the hosts. Ike Brandenburg was content to let the visitors have the cream, but just to show that he could shoot, he broke 19 in the last event. Ed Cain is getting back into form after a severe illness, and proposes to make the Cincinnati and Springfield boys go some if they beat the Dayton team on Feb. 2. Clarence Coburn only upheld the reputation of his home team, where they raise good shots and good sportsmen. C. R. Sticksels, of Hamilton, can do better, very much better, than he did here. It wasn't a case of "clay bird" argue with him, just happened to be his off day; all shooters have 'em sometimes. F. C. Koch is some shooter and demonstrated the fact after the first event, going out with one of the few straights in the last event. J. M. Markham had hard luck in two events, or his score would have been nearer his average.

The N. C. R. Gun Club officers are already making plans for the comfort and pleasure of those attending the G. A. H. in June, and the shooters will be given the time of their life. The Indians are beginning their campaign for big doings at the tournament in July at Cedar Point, and from now on will keep the dates fresh in the minds of the shooters. They figure on an attendance second only to the G. A. H., and the inducements offered ought to make the realization of their expectations certain. A week's outing at one of the most beautiful summer resorts in the country, not to mention the fat purses which will be hung up, should prove a strong attraction.

Berlin Gun Club.

BERLIN, Md., Dec. 31.—The annual handicap shoot of the Berlin Gun Club brought out twelve baked clay cracking exponents to-day. Joe Hammond made a straight, for which he was awarded a turkey. Second high went to Levin Layton, who sogged home with 24, one more than Preston Disharoon. Only 25 birds were trapped per caput. Scores: Joseph Hammond 25, Levin Layton 24, Preston Disharoon 23, Capt. Wash. Floyd 20, Bayard Morris 20, Capt. Harry Ludlam 20, A. W. Peters 20, Thco. M. Purnell 19, Eugene Pruitt 18, Edward Brintingham 17, Stewart Hammond 16, Raymond Boston 16.

**Boston A. A.**

Boston, Mass., Dec. 28.—P. W. Whittemore won take-home trophy after shooting off tie with T. C. Adams. There was a good light, but a brisk wind made the targets duck. Scores:

Take-home trophy, 50 targets, handicap:					
T C Adams.....	0	49	W B Farmer ...	3	46
P Whittemore...	8	49	L H Davis .....	4	43
M Ballou .....	2½	48½	*C F Marden...	0	42

J L Snow .....	0	42	G L Munroe....	8	34
G L Osborn....	5	41	W B Farmer...	3	23

Dec. 25.—Conditions at the Christmas Day shoot were not conducive to high scores—snow on the ground and bright light, making it very hard to see targets. F. Whitney won first; Osborn and Page tied on 93 for second, and in the shoot-off at 25 targets, Osborn won; Page took third. Scores:

F Whitney.....	20	94	C B Tucker.....	5	92
G L Osborn.....	11	93	H W Knights.....	8	89
R W Page.....	20	93	G B Clark.....	15	89
R A Faye.....	0	92	W C Brooks.....	8	84

Shoot-off for second, 25 targets:  
Osborn ..... 0 25 Page ..... 5 22

Boston, Mass., Dec. 21.—Nine men made 45 or better over Sargent system, and the same number showed equally well over McCrea traps. J. L. Snow won take-home trophy, with a full score of 50 from handicap of 1. G. B. Clark was only ½ point behind from handicap of 7½. F. Whitney was third with 49 from 10. Faye and Dickey, scratch men, made 48, with Adam, the only other scratcher, totaling 47.

F. Whitney and C. B. Tucker, former with 9 and latter 5 handicap, tied on full scores for December trophy leg. Faye and L. H. Davis each scored 49, the former from scratch. Weather conditions were well high perfect. Scores follow:

Take-home trophy, 50 targets, handicap, Sargent system:

J L Snow.....	1	50	L H Davis.....	4	45
G B Clark.....	7½	49½	H W Knights...	4	45
F Whitney.....	10	49	J E Lynch.....	2½	42½

T C Adams.....	0	48	G L Munroe....	8	39
H W Knights..	4	48	W B Farmer...	3	38
C P Keeler....	6½	47½			

Jan. 4.—Fourteen members went to the traps at Riverside to-day. The wind caused all sorts of didos among the scalars. The take-home trophy was won by Adams from scratch after a shoot-off with Whittemore, who tied at 84 from 10 handicap. Scores:

Adams .....	0	84	Dickey .....	0	75
Whittemore ..	16	84	Owen .....	15	75
Davis .....	8	83	Whitney .....	18	69
Snow .....	0	82	Munroe .....	16	63
Farmer .....	6	80	Tucker .....	5	61
Lynch .....	5	79	Goodwin .....	20	52
Knights .....	8	78			

Shoot-off, 25 targets:  
Adams ..... 0 20 Whittemore ..... 4 19  
C. B. TUCKER.

**Rhode Island C. C.**

PROVIDENCE, R. I., Dec. 28.—Fifteen gunners shot here to-day. Dr. C. H. Gardner was high in the open shoot; he scored 22 in each string of 25. H. B. Deming won the handicap event. The summary:

Dr C H Gardner.....	22	22	22	22	22
H T Merwin.....	21	21	21	20	..
F H Elmore.....	18	21	20	17	..
K F Wood.....	17	19	16	..	..
G T Hanley.....	17	16	16	15	..
F B Merriman.....	17	17	..	..	..
J B Lewis.....	15	13	12	17	..
H B Deming.....	16	7	..	..	..
S Borden, Jr.....	12	10	..	..	..
R W Comstock, Jr.....	8	12	6	..	..
F F Bowden.....	10	8	11	..	..
Darius Goff, Jr.....	9	8	..	..	..
K J B Sullivan.....	11	8	..	..	..
H A Hoffman.....	7	7	9	..	..
L C Tingley.....	16	..	..	..	..

In the handicap contest H. T. Deming defeated Dr. Gardner; Arnold Hoffman defeated H. T. Merriman; L. C. Tingley and Gerald Hanley had tied scores, but on the shoot-off Hanley won; F. H. Elmore defeated Arnold Hoffman; Henry A. Hoffman defeated H. T. Merriman; G. T. Hanley defeated Darius Goff, and Spencer Borden, Jr., defeated F. H. Elmore.

**Larchmont Y. C.**

LARCHMONT, N. Y., Jan. 5.—It was banner day at the Larchmont Y. C. to-day, there being a large field, and the scores were the highest seen in many years. In all of the ten matches, except one, from two to ten full scores were returned. The ten were shot in the special trophy match by W. J. Elias, A. Whiting, J. Raymond, M. K. Waters, Dr. L. Culver, T. J. McCahill, J. H. Finch, W. B. Short, W. E. Ferguson and W. F. W. Fitzgerald.

W. E. Ferguson carried off the honors of the day, for he won four of the matches, shooting in most cases against twenty others and finishing with full scores in each, sometimes after a shoot-off with his opponents. His first win was the leg for the monthly cup, then the special trophy match which he followed up by winning the "take-home" trophy and finally he tied in the 100-bird handicap match with A. Whiting, each having made the phenomenal score of 100. In the shoot-off Ferguson won.

Ralph L. Spotts upheld his reputation as "high gun" for the day by breaking 138 out of the possible 150 targets. B. M. Higginson tied him, and they shot off, but the latter not being a member, Spotts won. Higginson won the visitors' trophy with a full score,

and he was also the winner of the special take-home trophy at 25 targets. He returned a full score. Of the eighteen men that shot for the accumulation cup, L. Antoine proved the winner with a full score of 25.

**Whitemarsh Valley C. C.**

WHITEMARSH, Pa., Jan. 4.—Breaking 93 of his 100 targets and having a handicap of three dead ones, Dr. Muller led the small but select field of gunmen who shot over the traps of the Whitemarsh Valley Country Club to-day. Muller shot consistently from the start, but he had to do so to win, for Bowers, with a total of 92, gave him a close rub for the honor. The wind played havoc with the blue rocks, but despite this big handicap, all of the marksmen finished their afternoon's sport with creditable scores. Scores:

Eagleson (10)	87	Edson (7)	89	Dr. Buck (16)	72
Umstead (8)	87	Dr. Muller (3)	96	Bowers (5)	92
Bell (12)	62

# Look at the Top Shot Wad

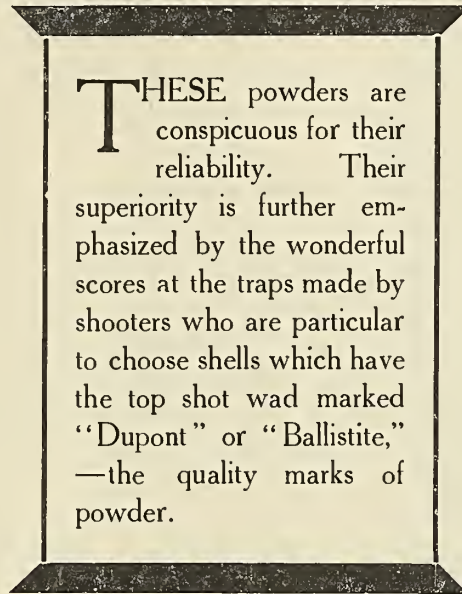

SEE THAT YOUR SHELLS  
ARE LOADED WITH

## DUPONT OR BALLISTITE

A PERFECT BULK SMOKELESS POWDER A PERFECT DENSE SMOKELESS POWDER

MORE shooters use Dupont Smokeless Shotgun Powder than all other smokeless powders combined.

MORE shooters use Ballistite Smokeless Shotgun Powder than all other "dense" smokeless powders combined.

THESE powders are conspicuous for their reliability. Their superiority is further emphasized by the wonderful scores at the traps made by shooters who are particular to choose shells which have the top shot wad marked "Dupont" or "Ballistite,"—the quality marks of powder.

BOSTON  
CHICAGO  
ST. LOUIS

Columbus Gun Club.

COLUMBUS, O., Dec. 28.—Eighty-eight shooters at a tournament at this season shows some interest in the game. We had that number here to-day. C. A. Young was high gun, but as he hails from the targets-only division, that's all he got for breaking 109 out of 120. Upper register amateur was G. H. Slaughter with 105. The rest of the kale went to H. E. Smith, J. E. Walters and R. Gorsuch. Scores:

Table listing scores for Columbus Gun Club. Columns include shooter names and scores. Total scores are listed on the right side of the table.

Strausstown Gun Club.

READING, Pa., Jan. 4.—Hamburg, Mt. Aetna, Strouchsburg, Tulpehocken, Rehersburg and other nearby towns were represented here to-day. The scores: First event, 10 live birds—H. J. Paul 7, Reed 10, Samuel Zellers 6, S. T. Christ 9, R. Baum 4, F. Noll 6, F. I. Hoffa 9, William Rentschler 8, Curtis Himmelberger 8, George C. Hix 4. Second event, 10 live birds—H. J. Paul 6, R. Baum 8, Confer 9, F. Noll 8, Samuel Zellers 8, Reed 8, George C. Hix 7, S. T. Christ 9, I. Hoffa 7. Third event, 10 targets—F. Noll 8, I. Hoffa 7, J. B. Bagenstose 7, W. Leshar 6, William Younker 6, Samuel Zellers 2, Curtis Himmelberger 7, W. Miller 4, C. Reed 6, George C. Hix 6. Fourth event, 15 targets—F. Noll 11, W. Baum 5, Reed 10, S. T. Christ 8, W. Leshar 9, Confer 4. Fifth event, 10 targets—W. Leshar 5, Bagenstose 8, Himmelberger 6, Bohn 4, Anspach 5, Younker 6, Hix 7, Bagenstose 8.

PARKER GUNS

Wear Well, Shoot Well and Handle Well

Wear well because they are made of the best material by the most skillful craftsmen. Shoot well because they hold the charge compactly together at extreme ranges. Handle well because the greatest attention has always been paid to the distribution of wood and metal, to insure perfect balance and the most symmetrical outline. Twenty-bore Parkers have set the pace for small bores in America, and are growing in popularity every year with the most progressive sportsmen.

For further information regarding guns in gauges ranging from 8 to 28, address PARKER BROS. :-: Meriden, Conn. New York Salesrooms, 32 Warren Street

"INFALLIBLE"

"All That Its Name Implies"

A "DENSE" SMOKELESS SHOTGUN POWDER THAT ACKNOWLEDGES NO SUPERIOR

QUICK CLEAN RELIABLE

If anybody doubts the "reliability" of "INFALLIBLE," we would like to call attention to the record made by E. F. Forsgard, of Waco, Texas, who averaged over 98 per cent. for 4895 targets shot at in Registered Tournaments, shooting "INFALLIBLE."

WILMINGTON, DELAWARE, U. S. A.

Crescent Gun Club.

WHITE HOUSE, N. J., Jan. 1.—Five hundred spectators, thirty target shooters and fifty bull shooters attended the shooting tournament conducted by the Crescent Gun Club here New Year's Day. The weather was ideal and several good scores were turned in. Loyd Lewis, of Du Pont fame, was high gun with 180. He shot like a fiend all day. He was followed closely by Frank Lawrence, who broke 175. Thos. Howard, of Peapack, was high amateur gun with 179; E. Gary, of Sunnyside, was second with 173, and O. Blake, of Elizabeth, was third with 173. The big event was the bull shoot at dead mark. There were 624 shots fired for the bull. At the finish it was found that the Clinton Club had won with a center shot. E. Gardner, of Bernardsville, took second money. The team race between White House and Elizabeth was a hummer and resulted in a victory for White House. The scores:

# Never Shakes Your Confidence

**D**ON'T let your long planned expensive hunting trip be spoiled—spoiled by your gun not rising to the occasion at the critical moment.

And you *know* how the shortcomings of your gun always show up at the critical moment. After that your confidence is gone.

The Six Hunter brothers have kept on the trail of shotgun shortcomings with invention, workmanship and Purpose, for 22 years. The result is the Smith Gun, the gun without a single shortcoming to mar the pleasure of the hunting trip or cheat the game bag of a single bird.

Write us for the Book of Smith Guns which shows how the Purpose to get rid of "shooting loose" produced the Smith bolt that double-wedges through extension rib and grips tight with a double rotary grip. How the Purpose to eliminate *inaccessibility* brought about the Smith "One-Screw Access." How the Purpose to save *loss of aim* in fumbling for the second trigger evolved the highly successful Hunter One-Trigger. And so on through the list.

### NO SHORTCOMINGS

Illustration shows our No. 2 grade, price \$63.75 net. With Automatic Ejector, \$75 net. With Automatic Ejector and Hunter One-Trigger, \$100 net.

## L. C. SMITH GUNS

"6 Times 22 Years' Experience"

HUNTER ARMS COMPANY, 176 HUBBARD STREET, FULTON, NEW YORK

The great question—How far to lead?—is simplified by the quickness of

## THE BLACK SHELLS

Instead of the customary ground glass in the primer to absorb 20% of the heat and cool the flame, the materials in our Non-Mercuric Primer actually increase the heat and so hasten the ignition of the main charge. Moreover, this hot flame is also a *large* flame, because our 100% larger flash-passage permits practically all of it to rush straight into the main charge.

Hence, the explosion is so instantaneous, and its completeness gives such maximum driving power, that you need allow hardly any "lead" on your bird, and absolutely no time at all between pulling the trigger and the discharge.

Tell your dealer "I want some of THE BLACK SHELLS."

Send for Valuable Booklet on modern improvements in ammunition  
**UNITED STATES CARTRIDGE COMPANY**  
 Dept. H, Lowell, Mass.

### Jersey City Gun Club.

JERSEY CITY, N. J., Jan. 4.—An unfriendly wind paid us a visit to-day and raised the dickens with our scores, as it blew a gale until 4 P. M., and by that time it was too late to make up the shortage, some of the targets going nearly a hundred yards before the wind. Only fifteen had the courage to come out and take a crack at them. Hallinger won the high average trophy with 78 per cent, which was O.K., considering. George Piercy and Harry Burlington were next to him with 75 per cent. The spoon winners were Shannon, Hallinger and Dixon. Dr. Ittner joined our club to-day and shot at the bluerocks for the first time—just the sort of a day for a novice, but the Dactor was game, and is going to stick. The scores, in strings of 25:

Tewes	17	18	16	17	..	..	..
McLemore	16	11	14	10	9	..	..
Huggins	14	5	13	12	12	..	..
O'Brien	20	19	14	17	18	..	..
Summerfield	10	8	12	..	..	..	..
Piercy	17	18	19	22	20	18	18
Shannon	18	22	20	21	11	8	9
Hubbell	16	14	16	18	13	11	..
Dixon	16	15	20	20	18	18	..
Dr. Ittner	1	1	6	8	..	..	..
Hallinger	22	22	19	15	..	..	..
Burlington	20	19	18	18	..	..	..
Kearney	10	14	15	..	..	..	..
Jones	10	9	9	..	..	..	..
Banks	12	16	13	..	..	..	..

Jan. 1.—We had a little shoot for the members on New Year's Day. Seventeen were out for the fun, several of the regulars evidently being too full of turkey to get out in time, so decided to postpone their shooting until another day. Spoons were the prizes to contest for to-day, in five of the events, and in another event a solid gold necktie clasp. The spoon winners were Tewes, Burlington, Hubbell, Dixon, Dr. Bogart, Geo. Piercy annexed the necktie clasp, and George was also high average man for the club trophy for the day with 87 per cent; and his old-time rival, Dave Engle, was right behind him with 86 per cent. A unanimous vote elected the former celebrated wingshot, Joe Whitley, the gamest shooter on the grounds to-day, the same good opinion being due to the fact that about three months ago Joe took a flying start from the roof of a house he was inspecting, and landed on a lot of sidewalks, and this was the first time he had handled his gun since the fateful day. Joe's right foot is still on a vacation, and he had to use his walking stick as a substitute, and even then he had to miss 3 out of his last 4 birds in one event to lose a spoon. The scores in strings of 25:

Geo. Piercy	23	21	22	21	23	22	21	19	24
Hallinger	16	20	14	20	22	17	19	19	..
Burlington	22	14	21	21	20	17	18	17	19
Tewes	20	12	14	13	12	14	17	17	11
Hubbell	15	17	18	16	19	15	15	16	..

### Ossining Gun Club.

OSSINING, N. Y., Jan. 1.—Herewith find scores of a club shoot held on the Ossining Gun Club grounds to-day. Event No. 1 was won by Blandford, which gave him second win for the White Plains cup. Events Nos. 2 and 3 made 50 targets for prizes. Bedell, Lyon and Wood were high with 44 and drew for choice, reverse to the order named. Blandford got fourth with 43, then came Hyland, Hubbell and Kipp. Coleman, an old member, showed the stuff he was made of by copping first money in Event No. 4, which was a \$1 sweep. Dr. R. J. Owen made his debut as a target smasher and showed he was some little shot by plastering 13 out of 25. The scores:

### Independent Gun Club.

EASTON, Pa., Jan. 1.—The Independent Gun Club held its annual pigeon shoot on its grounds here to-day. There was a good attendance of shooters, as well as a large crowd of onlookers. The weather was ideal for shooting, and the birds were a good lot of flyers. Weiss was high gun, killing his ten birds straight, with Maurer, May and Barclay following close with nine each. Below are the scores:

Event No. 1, ten birds each: Elliott 7, Heil 8, Maurer 9, Crass 8, Ivey 8, Wenner 5, Kelechner 7, Breinger 8, Sandt 8, Stires 7, May 9, Weiss 10, Barclay 9, E. Warner 6, W. Warner 5.  
 Event No. 2, miss-and-out: Heil 4, Maurer 1, Cross 1, Ivey 2, Wenner 2, Kelechner 2, Sandt 2, Stires 2, Weiss 1, Barclay 2, E. Warner 3, P. Warner 2, Garnier 4.

## High Gun

AT DENVER, 1912  
 HANDICAP, SEPT. 10-13

## Mr. R. H. Bruns, shooting his L E F E V E R

made the marvellous run of 283 without a miss.

On the 700 single targets, including handicaps, Mr. Bruns scored 683 out of 700.

The second day of the tournament on the day's program of 200 targets, Mr. Bruns and his Lefever gun scored 200 out of 200. A world's record for ten traps.

On the 500 single 16-yard target for amateurs, Mr. Bruns scored 494 out of 500.

### ANOTHER WINNER AT THE PACIFIC COAST HANDICAP

Mr. L. H. Reid, shooting his Lefever gun, won second high average with 381 out of 400.

Why don't you shoot a L E F E V E R?

**Are You Aware That America Is Richer In Ruins By a 1000 Fold Than All of Europe Combined**

**Did You Ever Hear That These Ruins Belong To a Civilization Compared To Which The Oldest of Europe's Monuments Belong To But Yesterday?**

**Have You Ever Visited the Innumerable Castles All Through The Great Southwest Where The Most Enlightened Race In The World Have Lived, Departed and Left No History Within The Knowledge of To-day?**

This book, which is new and original, is by the Editor of "Health" Magazine, and contains the incidents of his two years' automobile trip into all parts of the North American Continent. 1500 miles in Mexico during the late insurrection, of being chased by bandits, being lost on the desert and rescued from death by thirst by Troop K of the 4th U. S. Cavalry. It is replete with 300 interesting original photographs, taken by the author on his trip. Read how he penetrated a thousand miles further north than has ever been made by automobile before, driving over the dreaded White Pass Trail from Skagway, Alaska tidewater to the headwaters of the mighty Yukon River in the Klondyke and north of 62 degrees.

Look at the pictures of crossing the highest point of the Sierra Nevada and Rocky Mountains and crossing the continent from San Francisco to Portland, Me., in the middle of winter in three feet of snow in an automobile.

The most interesting and instructive book on America for Americans that has ever been printed. Get it and learn about the country you live in.

Sprague, of Dover.

**Manhasset Bay Y. C.**

PORT WASHINGTON, L. I., Jan 5.—The regular weekly shoot of the Manhasset Bay Yacht Club was held to-day. Besides the regular events a take-home trophy was hung up for a 100-bird scratch, and a Du Pont trophy for a 100-target handicap. Sixteen shooters showed up. The targets were very hard, the light being extremely poor. Silkworth got away with the take-home trophy and E. P. Alker won the Du Pont trophy, and C. M. Gould won a leg on the yearly prize, and J. W. Alker won a leg on the January cup. Scores, No. 1 was for take-home trophy; No. 2, for Du Pont Handicap:

**Eagle Gun Club.**

MANOA, Pa., Jan. 4.—Felix, Muller and Redmond occupied upper berths in the 10-bird match here to-day.

In a special 25-bird race Rose beat Thompson 16 to 15. A miss-and-out was divided by Aiman and Rose, who ran 9 straight, then decided to share the money, and the second was tied by Thomas and Coyle, who each grassed eight.

The scores in the 10-bird event were: Redmond 9, F. Muller 9, Felix 9, Rose 8, Knowles 7, Thomas 7, Jackson 7, Thompson 6, Miller 6, Killian 6, Bevins 6, W. Thomas 6, Aiman 5.

**Inland Wardens Elect Officers.**

AUGUSTA, Me., Jan. 2.—At a meeting of the Maine Inland and Fish Wardens' Association, held in the rooms of the fish and game department at the State House last night, the following officers were elected for the present year: President, Charles P. Gray, Fryeburg; Secretary and Treasurer, Frank M. Perkins, Bradley; Vice-Presidents, W. T. Pollard, Foxcroft; George Cushman, Portland, and John H. Ruth, Linneus.

The Du Pont Gun Club.

WILMINGTON, Del., Dec. 28.—J. H. Minnick, Eugene du Pont and W. M. Hammond tied in Class A with 24 out of 25. In the shoot-off Hammond took the spoon with 24 in the second string. C. T. Martin was the high man in Class B with 23 out of 25.

In the shoot-off of the tie for the F. L. Connable cup between J. H. Minnick and William Edmondson, at 25 targets from 23yds., Minnick won with 21, to Edmondson's 17. Both men shot from the 22yd. mark. There will be just one more name placed on the cup. Then the final shoot for the permanent ownership will take place.

Some time ago there was a tie between R. S. Wood and S. J. Newman for Class C cup. This tie was shot off to-day and Newman won with 38 to 35 for Wood. As there was a challenge in for this cup by W. J. Highfield, Newman agreed to shoot at once.

W. M. Hammond shot in fine form, finishing with 94 out of 100, and only two down in 75. Scores: Mathewson 17, Edmondson 19, Hammond 24, Minnick 24, Guest 22, Springer 20, Leedom 20, E. du Pont 24, Newman 16, Casey 18, Carlon 18, E. E. du Pont 21, V. du Pont 19, J. B. McHugh 22, Colfax 24, Leedom 18, Casey 12, Guest 18, Stevens 14, Highfield 19, Willis 21, Frist 18, Jarrell 21, Ed. Banks 24, Gerow 16, R. S. Wood 17, W. G. Wood 17, Joslyn 20, Holden 12, Dr. Betts 15, David 14, Tuchton 21, Anderson, Jr., 21, Skelly 19, Ross 15, Simon 19, Tomlinson 20, Coyne 21, W. B. Smith, Jr., 19, Edge 3, Magahern 21, Martin 23, N. K. Smith 21, Bird 20, Parsons 1, Goldsboro 8, Z. H. Lofland 21, Roberson 21.

Jan. 1.—Ed. Banks proved himself the State Hercules here to-day. He was strong enough to keep the State championship, despite a mighty effort made for it by W. S. Colfax, Jr. Banks won by 3 scalars, finals being: Banks 94 out of 100, Colfax 91. Score by innings is as follows: First string of 25; Banks 24, Colfax 22; second string, each broke 24; total for 50: Colfax 46, Banks 48. In the third string Colfax gained one on Banks, breaking 24, Banks 23. Banks now led Colfax by one target; score: Banks 71, Colfax 70. In the fourth string Colfax got only 21 while Banks got 23; total: Banks 94, Colfax 91.

Ideal weather, Du Pont hospitality and the alluring gobble of the meleagris gallopavo, combined to bring out the largest attendance thus far recorded down Wilmington way.

J. H. Minnick was high in the Turkey shoot with 47 out of 50. Second went to J. B. McHugh, Jesse Griffith and C. B. Springer with 44 out of 50. Jesse Griffith won the second turkey in the spin off. Mr. Griffith would have preferred a capon—he comes from Philadelphia.

High man in Class B was J. A. McKelvey, with 46 out of 50; second, N. K. Smith, 42; Dr. S. Steel 41.

H. L. Morgan was high with 43 in Class C; F. F. Lofland second, 39; J. F. Straughn third with 37.

R. L. Naudain was high in Class D with a score of 40 out of 50; second, J. H. Squires, R. A. Vance and E. M. Ross tied with 34. Squire drew the turk.

Class E high man was D. S. Wood, 30 out of 50.

Some of the prominent visitors were C. H. Newcomb, Jesse Griffith, S. M. Freeman, J. F. Pratt, Eugene Raymond, Jr., and R. A. McGrath, from Philadelphia; C. B. Springer, Cape May Court House, N. J.; J. A. McKelvey, Newark, Del.

Some of the high scores in the practice events were: C. H. Newcomb, 91 out of 100; William Hammond, 91 out of 100; J. T. Skelly, 48 out of 50; William Ford, 71 out of 75.

The scores in the various classes, 50 targets per man, were as follows:

Class A—Edmondson 43, Minnick 47, Hammond 41, Colfax, Jr., 46, McHugh 44, Newcomb 42, Pratt 38, McGrath 38, Griffith 44, Ed. Banks 42, Willis 42, Everitt 41, Springer 44, Skelly 41.

Class B—Tuchton 35, V. du Pont 41, Jarrell 40, Willis 36, Dr. Steel 41, R. P. Willis 39, Freeman 41, Winchester 40, W. B. Smith, Jr., 32, Dr. Patterson 39, Martin 35, W. G. Wood 38, C. E. Springer 31, Bush 39, Lyon 36, N. K. Smith 42, McKelvey 46, Tomlinson 39, Magahern 35, Keithley 36, Carlon 39, E. Raymond, Jr., 37.

Class C—Grier 36, Ewing 22, Highfield 34, Groome 31, Casey 26, Mathewson 34, Morgan 43, Dr. Betts 26, Dr. Rumford 33, J. F. Straughn 37, W. S. Simpson 28, J. K. Greenwood 32, R. S. Wood 36, Coyne 31, Lofland 37, Simon 32, E. R. Ewing 32, F. F. Lofland 39, Walker 34.

Class D—J. H. Squier 34, Stevens 24, Vance 34, F. Springer 19, Robelen 23, Robison 22, Haverbeck 32, Jensen 30, Ross 34, Naudain 40, David 33.

Class E—Bailey 23, D. S. Wood 30, Mammele 29, Dr. Harris 11.

\*Not eligible.

Evanston Gun Club.

CHICAGO, Ill., Dec. 30.—Some time during Saturday night the Evanston Gun Club's trap house was burned down. It is the opinion of the directors that it was the work of some incendiary, and they have offered a reward of \$25 for information that will lead to the conviction of the guilty party. The loss is estimated at \$200, fully covered by insurance. Work will be started at once on a new trap house, and it is expected that a new trap will be installed.

Directors' cup, 50 targets, handicap: Bristle ..... 7 48 Harpham ..... 11 37 Coleman ..... 0 48 Kennicott ..... 2 47 Carman ..... 10 45 Millen ..... 4 48 De Clercq ..... 24 47 Phalen ..... 13 50 Davis ..... 8 44 Searle ..... 12 45 Ford ..... 19 43 Scowley ..... 7 47 Harrison ..... 12 42

The shooting on Sunday brought out the following scores:

Table with 3 columns: Name, Score, and Position. Includes Doyle, Darby, Hanson, Langworthy, Miller, Schieble, Van Patten, Winkler, Watson, and SECRETARY.

CHICAGO, Ill., Jan. 2.—Twenty members and three guests appeared at the traps of the Evanston Gun Club for their New Year's event. The director's cup was won by J. W. Miller with a score of 96. The other shooters being closely bunched for this honor. The final scores were as follows:

Table with 3 columns: Name, Handicap, Broke, and Per Cent. Includes J. W. Miller, J. H. Bristle, H. Van Petten, G. H. Coleman, R. De Clercq, A. H. Winkler, W. R. Carman, W. J. Phalen, J. F. Davis, A. L. Hanson, H. Kennicott, R. C. Millen, F. M. Schieble, A. A. Scowley, C. H. Searle, R. H. Harrison, W. J. Doyle, H. F. Darby, E. L. Harpham, W. R. Watson.

It has been decided to limit the membership to 100, and a campaign for new members has been started to bring it up to this figure, as with the new grounds and larger equipment this summer it will be an easy matter to accommodate that many shooters.

W. J. PHALEN, Sec'y-Treas.

Marine and Field Club.

BATH BEACH, L. I., Jan. 4.—We had a return match to-day with the Englewood Country Club, of which the Marine and Field Club won by 56 targets. Following are the scores of Interclub shoot:

Table with 2 columns: Club Name and Score. Includes Englewood Country Club, Marine and Field Club, A. B. Gaines, Jr., E. H. Lott, F. Schultz, S. P. Hopkins, J. H. Emanuel, Jr., C. D. Sayre, W. E. Loughman, P. R. Towne, N. W. Peters, C. B. Ludwig.

Scratch shoot, 25 targets: S. P. Hopkins 25, A. B. Gaines, Jr., 24, C. D. Sayre 23, P. R. Towne 22, E. H. Lott 22, E. Schultz 22, W. E. Loughman 20, J. H. Emanuel, Jr., 20, C. B. Ludwig 19, H. B. Vanderveer 19, J. M. Knox 18, R. Schneider 18, N. M. Peters 16.

Table with 2 columns: Club Name and Score. Includes Handicap shoot, Moonlight squad, 25 targets: A. B. Gaines, H. B. Vanderveer, F. Schultz, J. M. Knox, C. D. Sayre, R. Schneider, W. E. Loughman, N. M. Peters, J. Emanuel, Jr., P. R. Towne, E. H. Lott, C. B. Ludwig, S. B. Hopkins.

E. H. Lott was high gun at 94 on the Interclub shoot, and in the scratch shoot, S. P. Hopkins, the old Crescent Club shooter, who has been at the game for many years, made his first 25 straight, although he had made many 23s and 24s prior to this. Seeing that there was a young gale blowing through most of the shoot, we consider the above scores very commendable.

C. D. SAYRE.

Birmingham Gun Club.

BIRMINGHAM, Ala., Dec. 28.—Eight shooters were at the weekly shoot of the Birmingham Gun Club. H. H. Hamilton shot high, with Mrs. Garl a close second in percentage. Mr. Lee was trying out several new guns, and finally decided on a repeater and bought it from Mr. Baugh at once.

A squad of shooters were out on Christmas Day, and J. C. Broyles shot high on this occasion with 91 out of his 100 shot at. Scores were made as follows on Dec. 28:

Table with 2 columns: Name and Score. Includes H. H. Hamilton, K. T. Lee, R. H. Baugh, C. Hunter, Mrs. Garl, E. M. Cornwell, O. L. Garl, Maynard, O. L. GARL, Sec'y.

Nonesuch Gun Club.

PORTLAND, Me., Jan. 1.—Eighty-six was high here to-day, but not so high as the wind, which broke opportunity and smashed all chance for records. Ernest Dyer made the 86. There was a tie for place between J. W. Whitney and James, each of whom eliminated 65 aerosaucers. Harry Lord, captain of the champion White-Sox, took a turn at bat, but the shoots and cusses of old Sputter Boreas were too much for him. He got 9 hits out of 20 times at bat—high shooting with the willow, but low for the splatter buss. The scores:

Table with 2 columns: Name and Score. Includes J. Whitney, E. Dyer, James, Hannaford, E. Brackett, Stanforth, C. Brackett, Ross, Elmer, Lord, H. Cash, Tupper, C. Cash, Noyes.

**Medford (Okla.) Gun Club.**

MEDFORD, Okla., Dec. 25.—Seventeen shooters and a large number of spectators came out to day. The weather was fine. The following scores were made:

Shot at. Broke.		Shot at. Broke.	
Blood .....	45 40	Wilson .....	45 33
Walling .....	66 39	Soucek .....	45 34
Hutchinson .....	45 31	F Wilson .....	30 19
L Brown .....	30 19	A Soucek .....	15 13
Dotts .....	30 24	Z Soucek .....	15 8
Thorp .....	30 19	J Thorp .....	15 3
Hardy .....	30 23	Moss .....	10 3
Strider .....	55 51	Lockwood .....	15 7
Eaton .....	25 16		

After this shoot several of the members enjoyed a "bird" shoot.

Friday, the 27th, was the last regular shoot afternoon for our club for 1912, only a few were out. Mr. W. U. Shanklin won our high average cup for the year. The scores for to-day follow:

Shot at. Broke.		Shot at. Broke.	
M Brown .....	40 32	Hardy .....	25 24
Walling .....	40 27	Soucek .....	35 32
Antle .....	30 26	Anderson .....	10 8

I. V. HARDY, Sec'y.

(For further Trap Notes see pages 34 and 35.)

**SHEEP HUNTING AROUND ALASKA'S HIGHEST VOLCANO.**

Continued from page 39.

that hole whence the smoke serpent had crawled.

Another morning, Lou and I took to a ridge that led to high benches which eventually brought us out onto a very high ridge overlooking a circular basin at the head of a tributary to the Dadina. We had seen no sheep so far, but had evidently got into a likely section, as the ridge showed indications of being a regular run for them. On the opposite edge of the basin, just below a jumbled cropping of rocks, we saw two white spots which the glasses proved to be sheep. They also seemed aware of our presence and the question was, how to get at them, as they were in a very open position. I suggested that one of us should make his way around the head of the basin above or beyond the sheep. There was the possible chance of getting a shot, and the sheep on being cut off from above, would probably descend into the basin, cut across it and take to the ridge on which we then were. For a short distance I was in full view of the sheep, then I managed to keep out of sight.

An hour's walking, much of it over snow, brought me above the sheep, or rather where they had been, for after considerable maneuvering I found they had vacated. I climbed to the bottom of the basin and picked up their trail, heading directly for the ridge. All this had taken considerable time, and it was then late in the afternoon and we were about eight miles from camp. As I had seen or heard nothing of Lou, I concluded that he had become chilled and tired of waiting and started for camp. I hardly felt like making that long difficult climb to the top of the high ridge to find out. As I walked slowly along, undecided what to do, I heard two shots, barely audible. That sounded like Lou was still at his post. Turning back a short distance, to get a view of the top of the ridge, I saw, silhouetted against the sky, a tiny figure bent over at work on something, and that something must be sheep. It seemed I would have to climb that ridge after all, and up I went. When I arrived, Lou was waiting with the sheep all ready for packing. He had about given up hope of seeing sheep, when he spied them coming along the ridge. He brought down the leader when but a short distance away and the second as it was rushing past.

## AMERICAN GAME BIRD SHOOTING

By **GEORGE BIRD GRINNELL**

This companion volume to "American Duck Shooting" treats of the upland game which American sportsmen shoot over dogs—woodcock, snipe, all the quail, grouse and turkeys.

The first part of the volume is devoted to a description of the various species and their habits—the way in which they live their lives.

The second part of the book is devoted to upland shooting and treats of the methods by which all the upland birds are pursued and taken. The chapter "Aids to Shooting" describes the clothing, guns, and loads and dogs that the gunner may profitably use; while the last section of the book treats of the shooting of the future and the efforts to rear our native quail and grouse in domestication.

The volume is illustrated by colored plates of ruffed grouse and quail, and 48 full page portraits of different game birds and hunting scenes, with a number of cuts in the text.

*Cloth. About 575 pages. Price \$3.50, net. Postage 25 cents.*

**This book is of inestimable value. It contains the genuine hunter-naturalist facts given in the most entertaining and interesting style.**

**FOREST AND STREAM PUBLISHING CO., 127 Franklin St., NEW YORK CITY**

# Rifle Shooting

## N. R. A. Meeting.

At the annual meeting of the board of directors of the National Rifle Association of America, held in Washington, D. C., Jan. 8, Lieut.-Gen. John C. Bates, U. S. A., retiring president of the Association, in his valedictory remarks dwelt upon the failure of this country to foster rifle training among its citizens, especially the youth. He spoke of the great necessity for rifle ranges, and urged that legislation be enacted for the acquiring of land and the building of rifle ranges near large centers of population by the Government, the necessity for this being shown by the fact that the encroachment of building operations had wiped out nearly all of the old established ranges throughout the country, and unless the Government acquired such land now, it will be impossible to do so in later years when the ground will be much more valuable and large tracts more difficult to obtain.

The report of the secretary, Lieut. Albert S. Jones, showed the Association to be in a thriving condition, with a membership as follows: 25 State organizations, 85 regiments, 58 separate military organizations, 131 civilian rifle clubs, 41 college clubs and 67 school boy clubs, an increase of 76 clubs and organizations during the year, the most noticeable gain being made in the civilian rifle club class.

In connection with the international matches for 1913, invitations to send teams have been sent to all nations, through the State Department, to the United States to compete in the international matches to be held at Camp Perry, Ohio, during August and September.

The present indications point to the presence at the tournament of rifle teams from France, Germany, Italy, Switzerland, Sweden, Holland, Denmark, Belgium, Austria and Hungary from Europe, in matches of the International Union, and the Argentine Republic, Peru, Chile and Brazil for the matches in the Pan-American Shooting Union. The famous Palma trophy will also be competed for, and teams are expected from Canada, Australia and South Africa.

The international matches will carry with them a total of \$17,900 in cash prizes, and the matches of the National Rifle Association would carry \$10,000 more, making a grand total of \$28,000 in cash prizes. The announcement was made that trophies had been offered and accepted for the international matches from the National Guard Association of the United States, and the Hon. John Work Garrett, the U. S. Minister to the Argentine Republic. The date of the matches for the National Rifle Association will be Aug. 18 to 23, inclusive, for the national matches, Aug. 25 to 29, inclusive, and for the matches of the two International Unions, from Sept. 1 to 9, inclusive. The National Rifle Association has incorporated in its program a new match for civilian clubs, calling for teams of four men each, firing 20 shots at 500 yards.

The officers elected for the current year are: President, Gen. Charles D. Gaither, Maryland; First Vice-President, Gen. Elliott C. Dill, Maine; Second Vice-President, Col. S. W. Brookhart, Iowa; Third Vice-President, Major Carl Hayden, Arizona; Treasurer, Col. H. G. Catrow, Ohio; Secretary, Lieut. Albert S. Jones, District of Columbia; additional members Executive Committee: Col. J. G. Ewing, Delaware; Lieut.-Col. Edward B. Bruch, New York; Lieut.-Col. William Libbey, New Jersey; Major Charles D. Rhodes, U. S. A., representative of the Assistant Secretary of War.

## War Department Shoot.

WASHINGTON, D. C., Jan. 1.—The first match of the league series of gallery shooting competitions for the new national trophy given by the War Department resulted as follows:

Eastern League.—Bangor, Me., defeated Birmingham, Ala., 952 to 882; Portland, Me., defeated Brooklyn, 963 to 881; District of Columbia, defeated New Orleans, 963 to 735; Warren, Pa., defeated Manchester, N. H., 985 to 952; Bridgeport, Conn., with 991 won by default from Philadelphia; Erie, Pa., with 851, won by default from New Haven, Conn.

Western League.—Adrian, Mich., defeated Dickinson, N. D., 968 to 961; Bucyrus, Ohio, defeated St. Louis, 951 to 910; Cleveland defeated St. Paul, 984 to 980; Madison defeated Youngstown, 955 to 758; Butte, with 958, won by default from Tacoma. The two clubs in Milwaukee tied with a score of 951, but the first Wisconsin club won under the rules deciding ties.

The winning club of each league will shoot off for the United States championship. This is the first gallery competition held in this country under the auspices of the War Department. The matches will extend over eleven weeks, there being twenty-four clubs competing.

## Island League Rifle Club.

READING, Pa., Jan. 7.—This rifle shoot was held on the range of the Island League Rifle Club, at a distance of 75 ft., indoors competition, possible 6250 points. The Island League proved to be the winners by 10 points. Zeller was high average man with 575. H. I. Melchior, of the South End Gun Club, had charge of the competition. A number of smiles passed over his countenance, as his club was ahead 10 points. Well done,

## The Timberdoodle

By THEODORE GORDON

ONLY a sober little trout fly! The first of its kind, but as it sits cocked up on the table before me it recalls many days of glorious sport with a truly royal game bird, one of the finest in all the world, and I believe one of the most intelligent. It is true that at times the woodcock presents an easy mark, particularly after a long flight (possibly hundreds of miles) and a heavy feed the night before. The bird is resting, possibly dozing, in the warm sunshine of an October day. It is lazy and comfortable, disinclined to great exertion of its power of flight as it flaps up easily from the dog's point.

But wake him up, give him a little experience of guns and gunner, and the woodcock becomes another creature, not only in the matter of flight, but in cleverly outwitting the designs of sportsmen of experience and their well-trained dogs. I have been an eye witness of tricks that seemed almost uncanny. Without being wearisome I may mention one instance among a great many which showed that the woodcock has brains in that big head of his. I was shooting with a friend and one dog in good cover near a stream of respectable size, and was walking well in advance, but much nearer the water than the other

gunner and his dog, when two shots rang out, and facing the sound I saw two woodcock flying rapidly toward me. Now, all about me the brush was thin and there were only a few trees of small size; it was late in the season and the leaves were down. Both birds pitched near at hand, paused a moment as if listening, then slipped away toward the stream. On reaching this they rose again without a sound and flew to the worst piece of bog briers, trailing vines and thick brush in the neighborhood. A practically safe refuge. Of course the dog could make nothing of such a performance.

ONE OF A BRACE THAT WORKED TO PERFECTION.

I fancy that the woodcock is a brave bird, not timid. I have seen them strut away like little turkey cocks from the pointing dog with that absurd little tail spread and drooping wings. They would make interesting pets if the difficulty in supplying them with proper food could be overcome. This has been done in the past by filling deep-sided pans with soft loam and keeping them well stocked with worms, but Mr. and Mrs. Woodcock have fine large appetites and good digestions. I am tempted to tell the story of a captive woodcock as I remember it, but will only say that it did not object to the dogs pointing it as much as they pleased, and that it enjoyed standing on one leg before the fire in the sitting room. The first, second and third primary feathers in the woodcock's wings resemble long narrow saber or sword blades, and these I believe make the ringing sound which is heard when the bird rises, although it can fly quietly. It has a funny habit, at dusk and after, in the breeding season, of rising in the air and then dropping straight down with wings extended, but with quill feathers turned to allow the air to pass through them, making a sort of buzzing difficult to describe. They have many queer tricks and ways, and often raise their broods in peculiar places—in the back yards and vegetable gardens of a village, for instance, and I once saw a single bird in a large deserted flower garden in a Southern city of 6000 inhabitants. The house had been sold and rebuilding given over for a time. The month was July.

I could talk about woodcock until the end of time. Everywhere in mountainous and hilly districts, in plains and valleys, where there is food, pure water and good cover, woodcock find breeding places. The tiniest trout brook with a little feeding or boring ground along the edges will suffice for a pair or two. At the season of the moult in August they usually change ground or scatter. They may be found on higher land or in tall corn growing in rich soil, particularly if there are low moist spots in the field. In fact, a bird may be found in most unlikely places in August and September.

In the Southland there are enormous tracts of swamp and river bottoms which afford safe winter quarters for woodcock, but an intense cold wave, or sudden drop to freezing temperature, may force them to move further south and possibly concentrate more or less on easier ground for a few days until the return of milder weather.

I once found evidences of a great flight in Florida near the Gulf coast after a very severe norther, but the birds only remained during the worst of the cold wave.

Most of my disappointments as well as big bags in woodcock and English snipe shooting have been due to sudden changes in the weather both north and south. For instance, hearing of a flight I drove thirty-six miles for three birds. I was a day too late. Upon another occasion my dogs and self worked hard all day in one of the finest river swamps in the country and retreated on our base, a deserted house in which we camped alone. That very night a lot of woodcock dropped into and around the smaller swamps near the house, and next day we had fine shooting under ideal conditions and with a brace of dogs that worked to perfection.

The best of sport is to be had in some of the Northern States during the month of October

and early November in those long swales watered by bubbling springs and small streams where there is all sorts of cover and feed, and where one is often in doubt as to what will rise to the dog's point; it may be quail, woodcock or ruffed grouse. I have killed a quail with the right and a woodcock with the left barrel, and was not sure which bird the dog was pointing.

But I must call a halt. It requires such a little thing to start one going. A perfect panorama of landscapes and scenery of the most varied description unwinds somewhere in one's brain. A lot of wonderful dogs (the best ever) prance about and do surprising and interesting stunts. A thousand incidents of the chase scurry through the mind, and all for such a trifle.

Yet after all a good deal has gone into that trifle. It must be harmonious in coloration as is the plumage of a woodcock. Let us see what makes the "Timberdoodle":

Two wing feathers (strips) from two woodcock, one shot by A. H. Caspary, of New York, one by myself, a small feather from the butt of the wing, a feather from a bright red cock, saved for me by B. W. LeRoy until said cock got too nasty and overbearing with the other chickens, a pinch from the hide of one of the fur-bearing animals of North America trapped by young Times, a nice boy; narrow gold tinsel given me by M. F. Kiffie, of Columbus, Ohio, and lastly a proper tail from the mottled feather of a wild duck.

The American woodcock is much smaller than the European bird, the heaviest I have had record of not exceeding ten ounces in weight, while I have heard of Irish and Welsh woodcock that weighed as much as seventeen or eighteen ounces. Our bird is very handsome, however, and affords better sport over setters or pointers. On the other side of the ocean men and boys are employed as beaters to flush the birds. Spaniels are used to some extent and retrievers to find the dead birds. I inclose feathers from both birds, so that the editor may compare the beautifully mottled plumage. The habit of picking up feathers wherever found sometimes leads to interesting discoveries. Such for instance as that there are two distinct varieties of wild mallards in America. One of them is decidedly rare at the present time. I found the birds in New York. The female woodcock is larger than the male.

## THE TOP RAIL.

My neighbor's son is the proud possessor of a "fighter" rooster, which has enough game blood to make him combative, but not enough to carry him on to victory.

Recently as I sat by my window I saw the rooster staggering down the street on his way home. His wings were dragging on the ground, his beak was wide open, and he was panting for breath.

When he had passed out of sight up the driveway, my thoughts traveled back to my boyhood home, and again I saw Ziba Kendall's "Little Devil of a Bantam," which ruled the street on which he lived. My first experience was on a morning when I crossed the street with a pan of table scraps for our neighbor's pig. The bantam met me as I entered the gate and let me know that he expected to be served first. I raised the pan above my head, but it was of no avail. Flying up in my face, he threw me sprawling on my back, and, while I ran home crying, helped himself to the choicest bits.

In those days picket fences were not common, and Deacon Kendall's was of flat boards, with one on top which made a fine promenade for "his wattles." There he would take his stand, and if a colored man or boy passed the house he dropped to the walk behind him and viciously pick his heels. When the victim turned he would fly to the top of the fence and crow, and if pursued, would hop down into his own yard. When the man started on his way, the bantam would return to the attack, and if the negro was bare-footed, blood was sure to follow his blows. Sometimes a girl or woman who had a hole in the back of her stocking received his attention, but he usually only troubled darkies.

One day the good deacon went out to feed his cow, and the rooster for some reason objected to his master's presence in the barn. He flew to the top of his head and pecked and clawed him unmercifully. The deacon rushed back to the house, his thin hair showing the result of the rooster's efforts, and sent out one of his boys with an ax, and the "Little Devil's" life was ended.

Although the deacon was a very strict Methodist, he had a son-in-law, Joe Tasker, who was far from the faith and ran a saloon and restaurant in Syracuse. I was in the city one evening and wandered into Joe Tasker's restaurant. The State fair was being held in the city, and the restaurant was crowded. The bar was near the door and there were a number of drunken brawlers lined up in front of it. Suddenly a fight started, and one man standing at the end of the bar drew a revolver and threw it up to shoot. Before he could pull the trigger, a man near him reached down to a table where a dinner had just been served with a large steak and grabbed the steak, slapping it over the gunman's face, blinding him with grease and gravy, and with the other hand twisted the revolver away from the would-be shooter.

The picture of the bad man with blood and butter running down his face as he was thrown out of the door is a vivid one.

GRIZZLY KING.

## Seizure Under the New York Law.

A RECENT raid in New York city resulted in the seizure of 900 hummingbirds and many gulls, herons and swifts, which were offered for sale in disregard of the Shea law prohibiting possession for sale of birds of the same families as birds native to the State of New York.

THIS magazine is published on the fundamental principle that what its readers are paying for is FOREST AND STREAM.

# The Tenants of the Iron Barrier

By ROBERT PAGE LINCOLN

ONE of the most notable among the fur-bearing animals to be found in this country where it still remains in remote parts and will evidently continue to perpetuate its kind, if given the protection of the Government is the beaver, an animal that has amounted to a very great deal indeed in the history of this country which has been based so solidly upon the foundation of the fur trade.

Dating back to the time of the early settlers, the beaver has constantly been before the people and an object of great interest both in a sentimental and a practical manner. Those who have studied its habits have found much indeed upon which to revel, and those who have engaged in the capture of it for its fur have found that it is not only a shrewd and cunning animal, though by no degree of such as is possessed by the mink or the otter, although of such an order as to make the taking of it more or less difficult. The fur is valuable and desirable as a money maker.

In the present day, owing to protective measures adopted for his preservation, the beaver is able to recuperate its lost numbers, and we find in some parts of the United States a gradual increasing that would point to a survival after all is said and done.

It is, of course, an almost settled opinion that animals are actuated entirely by their instinct, as against the idea held by some that they are possessed of human intelligence. The heightened degree of instinct claimed for some animals has been very misleading indeed in the forcing of unthoughtful persons to the belief that this keenness holds the essence of reasoning.

The beaver on its part is a wonderfully ingenious animal. We witness in its progression from the brute stage to that of the present day a complete survival wherein other animals, forced to the last barrier of the wilderness have abandoned their knowledge of material uses, falling back almost entirely upon their powers of cunning which have become sharpened to an

extreme. It is natural that when human or brute progress along one essential line, restricting their processes of thought or instinct to one individual factor, they will be proficient in that to a notable degree, which cannot be said of their other faculties of deduction and observation as directed toward material things, unless these are likewise developed. The beaver gives us an example of an individual of the brute family which has retained its given amount of talent and art.

While the beaver is not to be considered in the school of cunning as suggested by the wolf or mink or such, they in their limit cannot surpass the beaver in its high development of material ingenuity. In evading man, these other animals have found it necessary to cultivate their shrewdness. The beaver has cared little for these, and as a consequence has not forgotten his native talent. The beaver in captivity is a gentle and harmless creature, seemingly dull and sorrowful and unpossessed of passion, endeavor-

ONE OF THE TENANTS.

ing only when the occasion permits to eat out of his prison by gnawing through the boards.

It is an amphibious animal, belonging to the same family as the muskrat, an animal which it resembles to a distinguishable degree and appears to be but an enlargement of its little cousin. It is about two and a half feet in length, and I have known them to weigh up to seventy pounds, which is the highest coming under my notice. The beaver is a singularly beautiful animal, provided with a reddish-brown fur that is very thick and lustrous, the finer hairs close to the skin being protected by so-called guard hairs, which are stiffer and as a rule darker than the inner coat. The most remarkable feature about this animal is the singularity of its conformation. It is the sole member of the quadrupeds, having membranes between the toes on the hind feet only and none on the fore feet, which supply the place of hands as typified in the case of the squirrel. The fore feet are small and the hind feet large and powerful, making a wonderful swimming apparatus, quite a singular feature in this make-up. There are strong claws on these hind feet, and it is notable that each is provided with an extra claw above the second toe which is sharp as a rule, unless blunted, and which is evidently used to remove bits of wood which might get between their teeth while engaged in gnawing. The tail, which is shaped oval fashion, is flattened and hard. This tail is about twelve to fifteen inches in length and half that wide. There is no doubt but that this is used for a rudder, for when the animal is in motion, it swings from right to left in perfect unison with the movement of the body and aids the animal to attain its speed. It is a myth that the beaver uses this tail on which to convey mud and stones to his dam, as so-called naturalists of the past have exploited in reference to observations of this detail. Later on I am going to cull and set down what one naturalist noted in this line as an example for what has been supposed to be the truth. But this tail serves a purpose besides that of an aid to swimming. It is the danger signal, and when a sentinel posted on guard to watch receives intelligence of prowlers in the neighborhood of a dam, a slap of this tail on the surface of the water will cause every beaver to stop work and disappear to safety.

Perhaps one of the most wonderful things in the conformation of the beaver is the adaptability of its teeth to cut into trees in felling them. These teeth—it is the front ones of course that do the cutting—are hard and will stand any amount of rough usage, being covered with an enamel that protects the tooth from wear. The jaws work in and out when undergoing the process of gnawing, and are unusually well developed for the task, being powerful to a high degree.

The beavers breed in April and May and bring forth from two to four in a litter. These young are early taught to cut with their teeth small twigs and stems, and throughout the summer months undergo a system of training in the observation and direction of their parents as will fit them for the busy life before them. Nor do the young leave the parents when they have attained a likely growth. They stay in their parents' abode until they are three years old, and then set out for themselves to build

dams and breed, the younger ones generally choosing a site above that of their elders, but so situated as to not affect the other. A curiosity lies in the fact that the beaver's organs of reproduction are not discernible from the outside, as witnessed in other animals. By ripping open the vent one will first come across what is known as the oil stones, two hard objects which are said to contain a subtle fluid used by this animal in massaging his beautiful fur when moments of leisure present themselves between his arduous toil. Over the oil stones, as witnessed in both the male and the female gender, lie the castors which contain a certain scent that is exuded during the breeding season. These castors find a ready sale in the market when properly cured and will bring the trapper about six dollars a pound. Men who follow the trap line have found that to use this as a scent or lure when trapping the beaver is certain of making his catch that much the greater, and prepared with a mixture of oil is a worthy addition to a trapper's line of scents. Above the castors is found the organ of reproduction. Like most other animals the beaver feels no mating desire until the proper breeding season. Of a gregarious nature during the summer months, the beaver gains back its activity when the fall months are at hand.

At some time in the early part of September they commence operations upon their dams and houses. These houses are built more or less conical, much on the order in a perfect state as that of the muskrat, but higher and more staunch in its make-up. About ten or twelve animals find room in one of these houses, which are practically immune from the chill of the most bitter winter weather. After the houses have been constructed they begin work on their dam. This dam is generally at the head of some rapids or shallow water, so that when the dam is put in, it will form a deadwater in the part which lies above. The idea of forming this deadwater, which is usually five or six feet in its depth, is to protect their winter's supply of eatables from freezing in. Often where there is deep water without the need of the formation of a dam to assure such, the beaver will make a hole in a bank with the entrance under water, and sloping gradually up above the water and into a dry chamber where he stays in the winter. But where such circumstances do not afford themselves, the dam is a necessity.

In making this iron barrier, the beavers have a task on their "hands" which is quite stupendous, but with such unswerving energy do these little creatures go at it that it is only a matter of time before completion is assured. If trees stand at the site of their operations, they are felled in such a manner as to fall directly across the shallows or rapids. With amazing speed these trees are cut into and dropped, one lying across the other so as to form a compact mass when the stones, mud, clay, grass and leaves are packed in with them. If trees suitable for the purpose of a foundation are not at hand, the beavers will go further up-stream and drop trees, cutting them into suitable lengths so as to make transportation possible, then they float them down and eventually by aid of their teeth and paws, and all working in unison, drag them into place, fixing them into position parallel with the stream. Then all variety of débris is floated down from above, the pressure of the water

working this into place to form a solid mass, which when the frost has permeated it makes it of the nature of iron in durability. With their teeth and paws the beavers do all this work, aided by their great swimming capacity. They are very wise indeed in their location of this dam and build according to the power of the stream. Thus if the stream is swift, with a very strong current, such as would have notable effect upon the structure, the dam is built on what is called the convex curve, or that is to say the curve is up-stream; thus it will readily impress itself upon the mind that the strength of such an affair is redoubled. But where the flow of the water has little or no force, it is often built straight across the stream, or as has been noted many times, the curve is down-stream.

[TO BE CONCLUDED.]

### Maine Shooting Notes.

To Frank T. Wadsworth, of Eastport, Me., goes the distinction of having shot the largest bull moose in the State this season. The animal, which is a splendid specimen, was shot at Tomah Station.

The moose weighs between 1,100 and 1,200 pounds and was brought down by Mr. Wadsworth at a distance of about seventy paces. The animal has a splendid head with web antlers, having a breadth of eighteen inches. One of the antlers has fourteen points and the other twelve, while the width of the horns from tip to tip measures fifty inches. The guides in the neighborhood of Tomah claim that it is by far the largest moose ever shot in that region.

Arthur C. Welch, of Wayne, a member of the United States Geological Survey, has the honor, it is believed, of shooting the largest buck deer secured in Madrid during the past season.

The giant of the forest had a twelve-point head and weighed in the vicinity of 300 pounds. Mr. Welch also got a nine-point buck, and his friend Nelson Harnden, of Belgrade Lakes, got two bucks of six and eight points each.

One of the finest elk heads ever seen in Biddeford was taken to the H. F. Gillette summer home at the Pool recently. The specimen was perfect in every particular and will prove a very handsome ornament in the large hall of the Gillette residence.

The head had twelve perfect points and a spread of forty-two inches, while it was forty-three inches from the base of the antlers to the tips.

### The Fire Spell.

WHAT magic lies in embers glowing red,  
In curling smoke, or twisting tongues of flame,  
To bring to mind some word someone has said,  
Flash on the sight some long-forgotten name?

We gaze and gaze, and, ah, the things we see;  
The past so vivid and the future dim—  
The roseate younger days of you and me,  
The days to come, so vague, so gray, so grim!

It holds us all, this witchery of fire;  
No wonder naked savages of old  
Warmed at and worshipped its weird, leaping spire,  
And read the secrets its red depths unfold.

—Walter Juan Davis in Denver Intelligencer.

READY FOR THE START.

stream meandered from one side to the other of the wide flats, but we held a straight course, fording its icy waters when it crossed our trail.

About midnight we reached camp, where Frank had kept supper warm for us, but had finally given up expecting us and turned in for the night. We soon had some hot coffee and food ready.

The next day Lou and I took one of the pack horses and went back to get the sheep. While he went up the side gulch with the horse, I went around to our night's descent to look for my field glasses, but failed to find them.

Lou could not get the horse within a half mile of the falls on account of the roughness of the cañon. He left the horse and went up on foot, but found no place by which he could climb up at the falls. Fortunately a convenient rock stood near the edge, which he lassoed with the lash rope he had brought along. By means of this he pulled himself to the top and threw down the two sheep, which he was relaying to the horse when I came up the gulch to meet him. We then carried them to the horse, lashing one on each side and returned to camp. The failure of one particular roll of films, through some unknown cause or defect, is offered as an apology for not presenting more interesting photos. Those shown are some of many developed two wintry nights in the little log cabin on the Copper, an empty candle box with a door of ruby cloth serving as a lantern. Prints were also made by candle light; an exposure of eight minutes before three lighted candles was required for some.

[THE END.]

#### New Publications.

"1812." A TALE OF CAPE COD. By Michael Fitzgerald. Published by Charles W. Swift, Yarmouthport, Mass. \$1.25.

In this stirring tale of Cape Cod, during the War of 1812, the author gives us a realistic picture of the life of the period. The book will be warmly welcomed by every American whose patriotic pride is stirred by the recital of heroic deeds performed by the men who so valiantly struggled against fearful odds in the days when the nation was young and comparatively weak. The exposed position of Cape Cod rendered it peculiarly liable to the attacks of the British warships, and the sufferings of the hardy inhabitants were almost unbearable.

The author, while not a native of the Cape, has lived for many years in the district, and his work shows that he is a keen student of local history. His treatment of the subject is eminently fair. While he does not conceal his sympathy for the weaker side, he has not painted the British as monsters of iniquity but as brave seamen engaged in the uncongenial task of harassing defenceless villagers. His sketch of Captain Richard Raggett, "Old Dick Raggett," as he was known in the Royal navy, is an example of this.

The action of the narrative is rapid and there is an entire absence of "padding" in it. The book enters a new field in the literature of Cape Cod and deserves a wide reading.

A FRENCH firm has offered a prize amounting to \$2,000 for the first osprey (egret) farm established on French territory.

## Sheep Hunting Around Alaska's Highest Volcano

By HARRY G. SCHAUPP

### In Two Parts—Part Two

AT one point was a long snowy slope leading down to the basin. To expedite matters I suggested sliding down this with the sheep, but Lou thought it a little risky, and preferred a more roundabout way over the rocks. I then took both sheep and started down, but got stuck at one place for lack of sufficient grade. So taking one sheep I gave it a good start and let it scoot down alone and then slid down with the other.

Arriving at the bottom we slung the sheep on our backs and started down the basin. This soon drew in to a narrow gulch until it finally was just the creek bed with steep almost precipitous sides. It was growing dark and cold and the boulders in the shallow stream were coated with ice, which made footing insecure. Suddenly we came to an abrupt fall of about twelve feet. In the increasing darkness, with the icy conditions of the rocks, we did not attempt to descend, but cached our sheep and started to climb the ridge on our right to get over to the main Dadina. This proved to be a greater undertaking than we expected.

I started straight up, but Lou thought it would be easier climbing at an angle, so we separated. I finally reached the top, and giving a loud coo-ee, received a faint answer from my right. It had grown too dark to see the rocks at my feet. Starting down along the top of the ridge I found that climbing by the sense of touch was much easier going up than down a

steep mountain side. My hands were more sensitive in finding footholds than my feet. I might have succeeded better by going down head foremost, which I came very near doing. After stepping off a three-foot drop and jarring my lumbar vertebra considerably, I decided to try going straight down the opposite slope. This was better, as there were stunted alders and brush growing wherever they found root hold. By clinging to the brush and sliding and climbing, I could always have a foot or hand hold. When my feet dangled off into space, I would drop a rock down; if it took too long in striking bottom, I would move along to try a new place. I noticed that my field glass case seemed very light, and on investigation found the lid unbuckled and case empty. They were fine day glasses, but now it was good-night glasses.

At 9 P. M. I reached the bottom, where I found a patch of spruce timber and built a large signal fire for Lou. Shortly afterward I heard a faint call far up on the ridge to the left. I answered and occasionally heard others, each time a little nearer. After a longer interval I heard a troubled voice coming out of the darkness above: "How in thunder did you get down? Every darned place I try there's a straight drop off." At last he was within easy conversational distance. He finally got down to where I was.

Going out on the open bars we had fair traveling, as the sky had commenced to clear, and the stars were coming out. The glacial

# NATURAL HISTORY

## Expedition to the Altai Mountains.

BY RALEIGH RAINES.

THE zoological expedition to the Altai Mountains, Siberia, and Mongolia, organized and conducted by the co-operation of the United States National Museum with the Museum of Comparative Zoology of Harvard University, has recently returned to this country after an especially successful trip of about four months' duration. The expedition was under the direction of Dr. Theodore Lyman, of Harvard University, through whose interest and liberality the expedition was made possible. It was the object of the expedition to collect the mammals and birds of the Altai Mountains, and in this respect the expedition succeeded far beyond expectations. Among the mammals there have been found several new species and subspecies.

Mr. Ned Hollister represented the National Museum, and he has prepared a description of the collection which will be mounted in the near future. The whole collection includes about 750 mammals and birds, among them fine specimens of the wild sheep of the Altai region, which is the largest known species of sheep, together with ibexes, gazelles and other large game. There are seven new species comprising five rodents, a bat and a weasel. The specimens will be divided equally between the Harvard and the National Museum of Zoology.

The expedition sailed from New York on May 22, 1912, for London, then went to St. Petersburg, and across country by the Siberian Railway to the Obi River, where they boarded a steamer and traveled up river for almost 500 miles to Biisk. Leaving Biisk by tarantass, the native carriage, the party journeyed 500 miles to the south, to the last Siberian outpost, Kosh-Agatch, whence pack horses were taken, and the real trip begun into Northern Mongolia. The base of operations was a camp located in what was practically the center of the Asiatic continent. Hunting and trap setting were the daily occupations of the members of the party, and of course the skinning and preparations of the specimens secured.

In returning, the same general route was pursued and the party reached home in the latter part of last October. Besides Dr. Lyman and Mr. Hollister, the personnel of the expedition included Mr. Conrad Kain, of Vienna, a well-known Alpine guide, and actually in the field, five native Kalmuks and a train of fourteen horses. Mr. Hollister declares that the success of the expedition is largely due to the many courtesies extended by the Russian officials of St. Petersburg and elsewhere.

The game was fairly plentiful and the hunting generally good, the travel attended with the usual accommodations of the country. The specimens of sheep which are the wild mountain species of the Altai Mountains, are considered the best trophies secured. While these

sheep have been known to scientists for almost twenty-five years, yet a sufficient number of specimens have never been secured heretofore to afford opportunity for a complete or extended study of the species. The sheep are the largest known and resemble the domestic sheep in color, except for the winter coat, which is longer fleece and almost black.

### Notes from Washington.

REPRESENTATIVE BAKER, of California, has introduced a bill in the House of Representatives providing an appropriation of \$65,000 for the study of the economic relations of birds to agriculture, and to further study the food habits of birds and mammals. The bill further provides that at least \$15,000 of the amount appropriated shall be devoted to the study and propagation of fur-bearing animals, including the mink and marten. The bill, which was referred to the Committee on Agriculture, will probably have the items included in the next agricultural appropriation bill now being considered in committee. The appropriation for the present year includes the sum of \$5,000 for experiments in raising the mink and marten, and preparations are now being made by the Department of Agriculture to begin raising the mink in the National Zoological Park, in Washington City, and the marten farm has about been located in Shoshone county, Idaho. Great interest is being manifested in fur farming, to judge by the number of inquiries received by the department and the favorable notices given the project by the press. It is hoped to extend the experiments as fast as developments will permit.

### A Season's Study.

SALISBURY POINT, Mass., Jan. 2.—*Editor Forest and Stream:* I have collected the following records for Northeastern Massachusetts which I think you may consider worthy of notice in your publication. They are all from Essex county.

W. D. CARPENTER.

#### SHOT AND COLLECTED.

Dec. 5, 1890.—Cock blue-winged teal, Town Creek, Salisbury, by Wm. N. Currier. Fat, showed no signs of being a "cripple."

Nov. 2, 1895.—Sora rail, Indian River marshes. Flew, good condition.

WM. N. CURRIER.

July 5, 1898.—Pomarine jaeger. Merrimac River. Specimen preserved. (Said to have been previously recorded by taxidermist.)

WM. N. CURRIER.

Dec. 14, 1912.—Cock green-winged teal. Rather poor condition. Dropped into a pond with live decoys near Benj. P. P. Moseley's gunning shanty on Plum Island River marshes. Specimen preserved.

CARL NELSON.

Dec. 7, 1897.—Wilson's snipe in green spring hole among the snow, near Artichoke River.

GEORGE STEVENS.

(Mr. Stevens believes that it was prepared to spend the winter at this spot. Not a "cripple.")

"Between Dec. 25, 1911, and Jan. 1, 1912."—A pair of Wilson's snipe on river bank, Newburyport. Both collected. One fell dead upon a large cake of ice.

HOWARD HURLY.

All the above were collected.

A kingfisher has been twice seen in winter, as follows:

Jan. 1, 1912.—Under the Essex Merrimac chain bridge. "So full of herring that it could hardly fly."

WM. N. CURRIER.

Dec. 27, 1912.—Powow River, Salisbury Point. I saw it very distinctly and at close hand, scared it off its perches and caused it to give its rattling cry. Followed it along for some distance.

W. D. CARPENTER.

### Approaching Extinction of Birds of Paradise.

THE long-plumaged birds of paradise peculiar to the Island of Jobi were once numerous, but in 1906, despite active search by natives, only seventy skins were shipped from the island. The red bird of paradise of the Island of Waigiou has become very rare and will probably soon be extinct. Each year every full plumaged male of the great bird of paradise, found only in the Ayru Islands, is killed, and the species is rapidly nearing extinction. The blue bird of paradise has become so scarce that twenty hunters were able to find only three specimens in a three weeks' search over a large part of its limited home. Some years previous to 1907 two Chinese traders in Humboldt Bay were exporting every three months about 12,000 bird skins, chiefly those of the lesser bird of paradise.

### Meriden Bird Sanctuary.

THROUGH the activity of Ernest Harold Baynes, the Meriden (N. H.) Bird Club has established a bird sanctuary at that place. Many plants that furnish bird food have been set out, and the students of the Meriden Academy have joined with the residents in putting up bird boxes and food houses, feeding the birds in winter, and protecting them from their enemies. The bird population of the locality has greatly increased. Branch bird clubs have been formed by Mr. Barnes in other parts of New England, which are doing similar work.

### Protection of Birds on the Farne Islands.

A NUMBER of residents of Northumberland county, in the north of England, have organized the Farne Island Association, the object of which is the protection of the razor-billed auks and other species of birds which nest on the Farne Islands. These islands, twenty-one in number, lying off the coast of Northumberland, are small, rocky, and of no agricultural value. Keepers have been employed to stay on them during the birds' nesting season to protect the birds.

## The Fur Seal Herd.

BY GEO. BIRD GRINNELL.

A CONDITION of the treaty with Great Britain, Russia and Japan, by which pelagic sealing was abolished, is that the United States shall turn over to Great Britain and to Japan, each, 15 per cent. of its land catch of seals. When the treaty was entered into, it was naturally supposed that a limited number of seals would be killed annually, as may be done without injury to the herd. On the other hand, an effort was made in Congress to practically repudiate the treaty by suspending all killing for the entire life of the treaty, which would have led to the resumption of pelagic sealing. The final compromise, providing for no killing for a period of five years, violates the spirit of the treaty, since it is impossible to justify such suspension to the other powers.

It is believed that in 1913 there will be 12,000 surplus bull seals, of which at least 6,000 must be allowed to grow up. In five years this would make a total of 30,000 adult bulls. But in 1912 not more than 1,500 bulls were needed, and in 1917 there will be no need for more than twice that number. For every bull required, therefore, there will be nine for which there is no place, and which will spend their time fighting through the rookeries and causing a great destruction of young pups.

Unimportant from one point of view, and yet deserving of consideration, is the money loss which the preservation of these 30,000 unneeded bulls will entail. Each of these at three years old would produce a skin worth \$40 to the Government, but when the bull has passed the proper time for killing, his skin becomes valueless and he must live out his natural life. These 30,000 skins then will be lost; in other words, \$1,200,000 is to be thrown away. It is suggested also that the cutting off of the supply of seal skins for five years is likely to render this fur unfashionable, and there will be little or no market for seal skins when the Government again becomes a seller in 1918 and 1919.

All expert authorities recognize that the suspension of land killing—which means the killing of the surplus males, since the females are never killed—can do only harm to the herd. It delays the re-establishment of the seal herd, it is wasteful of money, it harms the United States and the other parties to the treaty, and it deprives mankind at large of a useful fur. The suspension of killing brings with it no advantage of any sort.

This provision of the law ought to be repealed.

## Bacon and Dumplings in Camp. ❧

BY S. M. NEAL.

FOR bacon and dumplings in camp, fill a hot frying-pan with sliced bacon and fry till crisp, then remove, add boiling water till the pan is half full. Make a stiff batter with two cups of flour, four teaspoons of baking powder, one tablespoon of grease, and water enough to make it the proper stiffness. Drop the batter into the bacon gravy and cook till done. After the dumplings are cooked, thicken the gravy a little with flour and serve with the crisp bacon. This has proved a very popular dish with camping parties and takes but a short time to prepare.

## The Buck Law.

"COMMON sense, economy and public safety demand that the so-called 'Buck Law,' prohibiting the killing of female deer and fawns at all times, be enacted in every State where it is not now in force."

This statement was elicited from John B. Burnham, president of the American Game Protective and Propagation Association of New York, in connection with the present agitation in favor of a buck law in Michigan, which George Shiras, 3d, one of the foremost naturalists of the country, has been advocating.

"In connection with Dr. Fisher and Professor Beal, of the Biological Survey," Mr. Burnham continued: "Mr. Shiras has prepared a table which shows in a striking way the advantages of the buck law in increasing the number of deer which can properly be killed each year. These figures show that if twenty-four does and twenty-four bucks, age two years, be protected for ten years, allowing annually thereafter an average of one and one-half fawns per pair, there would be 1,560 of each sex, or a total of 3,120 deer in the herd. Taking the same number to start with, and shooting 50 per cent. of each year's bucks and does indiscriminately, the herd would be exterminated at the end of the same period, and only 155 deer would have been killed. If we shoot only 50 per cent. of the bucks, we will have killed 781 of them in ten years, a like number will remain, and there will be a breeding herd of 1,562 does.

"These figures should convince even the

game hogs of the advisability of protecting does. The only people who can be impervious to the argument which they present are those who would like to exterminate our deer immediately with no thought for the rights of future generations, and the wishes of such persons should hardly be considered by legislative bodies.

"To put the matter in a way with which everyone is familiar, our herds of deer present to the people who own them the same problems that owners of cattle have to face. In any one year a stockman could realize more heavily by killing and marketing all his cattle. However, as such a course would put him out of business or force him to lose his profit in the purchase of new animals, he keeps the greater part of his cows and disposes of most of the bulls. Any other method would be considered insane if followed by a private owner, yet there are still many States in which the public owners of deer pursue the disastrous course of killing the males and females alike.

"Besides the figures given by Mr. Shiras in support of the buck law, we have the practical experience of more than half the deer hunting States of the Union, in which it is now in force, and in every case this tends to establish the accuracy of the theoretical estimate. When the law was enacted in Vermont, the deer had been practically exterminated in that State, and it was necessary to import them. At the present time more deer are killed in Vermont than in any area of similar size in North America, and that this is so is due entirely to the protection of does.

"But it is not only for economic reasons

ELK IN JACKSON'S HOLE.

that the buck law is necessary. The appalling number of people shot by mistake in the woods in States which do not demand that a hunter see the horns before he shoots, supply eloquent testimony that this precaution is essential to public safety.

"With the increase in population, dangers from the incautious use of firearms become yearly greater. The only argument that can be offered against observing the restrictions placed on hunters by the buck law is that in trying to tell whether a deer is a buck or a doe, the hunter may lose a shot, and such an argument carries no weight when we know that the time taken to make the distinction may save the life of another hunter. This argument is only offered by the tyro, and while it would be foolish to say that the tyro should not be allowed to hunt, it is certain that his inexperience should not be allowed to endanger the lives of others. There is no one thing which will do as much toward cutting down the annual loss of life in the woods as the general adoption and stringent enforcement of the buck law."

**Bringing Game into New Jersey.**

LINDEN, N. J., Jan. 6.—*Editor Forest and Stream:* I have read with interest several notices in different "sporting papers" regarding the arrest and fining of sportsmen in New Jersey.

I cannot sit idly by and see the State Game and Fish Commission of New Jersey maligned in such a matter. I think a little frank statement of my experience of having been arrested and fined will suffice to set at rest all such reports.

I had been shooting at Greenwood Lake, N. J., several days and my bag consisted of two partridges and six rabbits. I took the afternoon "Sunday" train at Greenwood Lake Glens. On my arrival at Erie Station, Jersey City (had no gun or dog with me), I was arrested by Deputy Rayner, who demanded to know where I had gotten my game. I told him I had shot it up at Greenwood Lake, N. J. He took me to Hoboken, before Justice of the Peace. J. J. O'Brien, who fined me \$46.80. I explained to the Justice of the Peace that if he would call up the clerk who had issued the license to me in Linden, N. J., he would verify my statement. This he refused to do. I was detained several hours in the office of J. J. O'Brien and finally was fortunate enough to catch a friend at the club who very kindly came down and paid my fine.

I called on Ernest Napier, president of the State Fish and Game Commission of New Jersey, and stated my case to him. He immediately took steps to have my fine and costs returned to me (which was done) and assured me he very much regretted such action on the part of Deputy Rayner.

He sent his very able game protector, Mr. Stratton, to Hoboken to hear my case, and after the hearing exonerated me from all charges brought against me.

I was present at the hearing after which and in my presence Mr. Stratton told Magistrate O'Brien and Deputy Rayner that he did not want such a miscarriage of justice to happen again, and further admonished them to exercise some sense and judgment in handling such cases in the future. I have been informed that Rayner

has been dismissed. I was never treated with more consideration and courtesy than I received at the hands of Messrs. Napier, Stratton and Hall; no partiality was shown me. Anyone who had proceeded in the same manner would, I am sure, have received the same kind and courteous treatment.

EDWARD MITCHELL.

**My First Pheasant.**

PLAINFIELD, N. J., Dec. 28.—*Editor Forest and Stream:* How familiar is the adage, "Of all sad words of tongue or pen, the saddest are these—it might have been." However, in this case, being perverse, I reversed the order of

THE EVIDENCE.

things. "It" was. If I hadn't hollered at a bunch of people coming up the road I couldn't have turned author-sportsman, nor could I have shot the pheasant pictured herewith. It was done this wise: On Election Day I went over into New Providence township to take a look at our old homestead, since converted into the Union County Tuberculosis Sanitarium. I took my gun, more for companionship than with any idea of getting a shot. I had nosed along, quartering the fields in the best imitation I could give of a well broken pointer, and had about decided to hike homeward. As I turned toward the road, a hundred yards away, I saw some people whom I recognized. I let out a whoop to attract their attention, and whirr! whirr! cuck! out of the brush rose a cock pheasant. He beat me around a big tree and I didn't get a shot. I marked him and trailed. He ran a considerable distance from where I marked, flushing twenty-five yards away. My story ends here. The picture indicates my luck. He was said, by the taxidermist to whom I took him

for preservation, to be a very fine cock ring-neck. I haven't recently seen a picture of a pheasant in FOREST AND STREAM, to which I am a subscriber and an ardent reader, so thought you might be waiting for a good one to publish. This is it. Caption:

Of all good luck o'er moor and fen,  
'Twas a cock pheasant and not a hen.

H. S. F., JR.

**Big-Game Resume for the Season.**

BANGOR, Me., Dec. 28.—A table showing the total game shipments for the season of 1912 over the Bangor & Aroostook Railroad has been prepared in the offices of the railway in this city and given out for publication. According to the railway statistics there were more deer shipments this season than a year ago, the total being 3093 for 1912 and 3,025 for 1911. The moose shipments are much smaller, there being but 97 shot this year, against 188 last. The present season brought out more bears, the figures showing 66 for 1912 and 42 for 1911.

The following shows the total shipments from each station in the game country:

	Deer.	Moose.	Bear
Hudson	4	1	..
Bradford	4	..	..

MANY of our readers take FOREST AND STREAM, and we would advise all of them to do so, since many interesting articles are printed weekly.—From the Game Breeder.

## Land Owner, Rabbit Hunter, Game Laws.

PRATT, Kans., Jan. 4.—*Editor Forest and Stream:* Before the present fish and game law was enacted, many complaints were made to the Department of Fish and Game by farmers and owners of ranches against "rabbit hunters."

Under the old law, persons who hunted rabbits were not required by law to carry hunters' licenses.

It would seem, judging from the reports that come to the Department, that many hunters and sometimes parties of hunters would tramp through fields and pastures with dogs and guns shooting rabbits, and in many instances it was reported that these hunters shot things that were not rabbits.

When a game warden interfered with these parties, he was told that they were only hunting rabbits and did not have to carry a hunting license. Much complaint was made by farmers and stock raisers concerning the damage done by such hunters. Many times these rabbit hunting trespassers had packs of dogs with them. The shooting done by the hunters and the chasing of rabbits by the dogs frequently frightened domesticated animals, causing them to run into barbed wire fences, break out of their inclosures, or otherwise do damage to themselves or adjacent property. Numbers of domesticated animals were reported as having been shot, some killed and others crippled by these so-called rabbit hunters.

The law passed by the last Legislature requiring rabbit hunters to carry licenses was not intended to protect the rabbits, but the farmers and stock raisers who are continually annoyed by rabbit hunters. But little complaint has come to this department on account of the enactment of this law, except from some parties in the western part of the State, where jack rabbits are a nuisance. In such places the people sometimes have what they call a "round-up" hunt for jack rabbits or for coyote wolves. From twenty-five to a hundred or more people frequently desire to join in these hunts. Many of the hunters do not have hunters' licenses.

A number of applications have been made to this department for permits to carry on these neighborhood hunts. The department has no authority to give such permits. There was no provision made in the law for conducting such hunting parties. Even though the members of such hunting parties carried hunting licenses, the trespass laws forbidding hunting on occupied lands without permission, should be considered.

This department has no objection to such hunting parties made up for the purpose of hunting wolves and rabbits, provided they can be conducted according to law. However, we desire to say that we have received many letters from parties living in districts where these hunts have been carried on, making protest and calling upon this department for advice and help. Complaints have been made in many instances that these hunting parties, in their chase for wolves and rabbits, cut and tore down fences, left gates open that allowed stock to escape, and did other and further damage by running over cultivated fields. Serious objections were made to such "reckless" hunting parties going through farms and over other grounds. We have no particular recommendation to make along these lines, but will favor any measures that may seem advis-

able for the benefit and protection of all parties concerned.

L. L. DYCHE,  
State Fish and Game Warden.

## A New Policy for Fisheries and Game

BY HERBERT K. JOB, STATE ORNITHOLOGIST OF CONNECTICUT.

THE fact that strong organizations of sportsmen, fishermen and nature lovers are arising in Connecticut for the purpose of securing change in existing conditions as related to fisheries and game, together with widespread expression of individual dissatisfaction, is suggestive. One of these organizations has increased of late well on toward the thousand mark of membership. The chief plank in their platform is the securing of a single-headed commission of fisheries and game. Their argument is that under the three-headed system it has proved practically impossible for those intelligently interested in birds, game and fish to get what they want done in the line of progressive, up-to-date measures. They also say that under the system of divided responsibility each member shelters himself behind the others, and the whole system, whether bi-partisan or otherwise, gets hopelessly involved in politics. If there were but one head, those interested in fisheries and game could make known their wishes, and if the commissioner did not come up to the mark, they would know just what to do.

Of course this is no panacea. If an ignorant, crafty politician were appointed, it would be as disheartening as under the old system. Certainly, however, this principle of single personal responsibility is the soundest and strongest, and is being adopted more and more in modern government.

Whether a commission consists of one or more members, there are certain general principles which apply. First, every commission should be a body of experts or specialists in the subject. Selection for such responsibilities on political grounds is the shame and weakness of our American institutions. Should there continue to be a board of three on fisheries and game, certainly one should be an expert ornithologist and understand the propagation of game and all the modern methods; another should be an expert in fishery matters and fish culture. The other might be either, but one at least should be a good business manager. To be fond of hunting or fishing is distinctly not sufficient qualification for such responsible position. Moreover, politics has clearly no place in matters connected with the delights of the open and should not be tolerated.

Second, men being considered for a commission could properly be asked to pledge themselves to carry out definite policies for the public betterment if appointed. Candidates might well announce the policy to which they would pledge themselves, which would both assist in an intelligent selection and make it easier for the appointee to steer his course true.

Following is a platform which I would suggest for a new policy of fisheries and game. Details, of course, could be varied, but as to the main principles I believe that any man or men, who aspire to make a notable record of public service, would have no reason to be ashamed of them:

SUGGESTED OUTLINE OF A PLEDGED POLICY FOR THE NEW COMMISSION OF FISHERIES AND GAME IN CONNECTICUT.

I. Adopt the policy of the propagation of game birds, especially native species, both by semi-artificial and natural methods. Import no more foreign birds for direct distribution. Establish a central State game farm on the State tract of the Connecticut Agricultural College. Employ as superintendent an expert game breeder who has had large success. Breed quail and Oregon pheasants for immediate distribution and experiment with other species. Also distribute eggs of game birds for hatching. Train the warden force in methods of feeding and protecting wild game, and in those of feeding and attracting song and insectivorous birds used by the German Government. Extend the system of State reserves for game and bird life, including added reserves specially for the breeding, attracting and protection of wildfowl, particularly wild ducks.

II. (Extension work. By printed matter and supervision instruct and assist farmers, landowners and sportsmen in the propagation of game birds and wildfowl. Co-operate with the private game preserves in propagation and increase of game. Co-operate with the Connecticut Agricultural College in training students and poultry school attendants to become expert game propagators to fill good positions which are already waiting. Start branch game farms over the State as rapidly as expedient, and employ these trained men to run them. Encourage game breeding as an industry.

III. Tone up the game warden service in line with methods similar to the civil service, as recently adopted in Massachusetts, as follows: Select wardens by competitive examination. Have a chief warden and a small staff of rangers on salary and giving their entire time. Pay local deputy wardens at least a small annual fee, as funds allow, and expect them to do some real work. Make promotion by merit. Abolish politics from the service.

IV. Regulate distribution of fish, preventing distribution in private waters contrary to law, and also the subsequent posting of waters stocked with State fish. Secure open stocked waters for public use. Increase the supply of fingerling fish and discourage distribution of fry.

V. Institute full publicity as a policy, both as to methods and expenditures. Establish regular publicity system, to obviate complaint that things are done in the dark, and give out frequent and ungarbled information, both of success and failure, which is the right of the public who pay the bills. Use the hunting license fund only for the increase, protection and propagation of game.

VI. Strictly keep out politics from the entire department, without doing which full efficiency is impossible. Put everything on the best possible business basis, courting suggestions and publicity.

"MOTHER," said Jim, "why doesn't Pop get FOREST AND STREAM every week? I'm keen to read all about animals and hunting; and I like fishing, too."

"I don't know why, Jim, but your Pop seems to be always doing silly things anyhow!"  
Moral: Don't be like Pop.

## Large- and Small-Mouthed Bass.

BY CHARLES CRISTADORO.

THOSE who have followed the gamy bass in many waters seem to agree that around Osakis and Alexandria, Minnesota, are grouped more superb bass lakes than in the same area elsewhere in the world.

Over twenty years ago I fished these lakes, favoring Lake Ida, and like the shattered jar, the memory clings around it still. Suffice it to say that having been a shut-in for nearly eight years, now oscillating between a sick bed and an invalid chair, I am fishing always in the past, the days that are gone. My favorite 12-bore gun, the muzzleloader, stub and twist double barrel of my youth (a superb masterpiece of the gunsmith's art before the advent of the breechloader, a gun that had been made to order "regardless" in England for Commodore Chauncey, of the U. S. Navy); a dozen or more fly-rods, tried and not found wanting; reels and duffle of all kinds, an accumulation of thirty years; instead of "vending" these off to fall into the hands unappreciated, I turned the whole kaboodle over to a young trout and camera enthusiast with the understanding that he was to hold them "in trust," and when the hand of fate in years to come kept him aloof from forest and stream, he was to likewise pass them along in trust.

It was a good move, for when that enthusiast visits Shovel Creek near Klamath River, and whips the pools harboring four and five-pound rainbows, a friend is with him with a camera, and a faithful record is made, even to the photographing of the workings on the spring balance when the fish were weighed. I insist on this because I too have been a fisherman, and everybody has heard of how the trout fishing father's scales were called on for an interesting family event and made a seven-pound normal baby into a twelve-pounder, much to the surprise of doctor and nurse and pride of the mother. The father was undemonstrative, for he knew the scales, and he made the mental calculations, deducted five, and he alone, at the interesting ceremony, knew the real weight of that kid phenomenon.

So when my friend goes fishing, I go fishing, too, for his camera is such a fine lensed one that the pictures are superbly true to life.

But back to Lake Ida and the bass. It was my first visit, and Bedman, the guide (now let us hope carrying on the same occupation across the silent river) started off in the boat, loaded with lunch basket, frying-pan and coffee pot, turning eventually into a small bay where the water was still.

It did not look good to me for small-mouthed bass (I did not want the large-mouthed cousin, especially in still warm water), but Bedman was doing the guiding and I let him so do.

It was a minnow or small frog bait proposition, flies never seemingly producing anything further than a tired wrist on Lake Ida waters.

A half-submerged log rested on the bank, thirty or forty feet away. "Lay your minnow alongside that log," and I did. A swirl, the bait disappeared, a strike, and from the immobility at the business end of the leader I felt I had missed the fish and caught foul of the log. "Giving the butt" did not help any when "of a sudden" the line cut its way twenty feet or more toward deep water and stopped. More butt tactics produced no result. The fish was hugging the bottom, and thinking it over. I took out my jack-knife and tapped the metal reel-seat, when something happened, and up came the fish to see who was telephoning to him. He made no fight and came in after a few moments. Bedman tried the net on him, discarded it, had me reel him up close, slipped his fingers under his gills and holding him over the boat actually placed his big fist into his opened jaws. The scales noted  $7\frac{3}{4}$  pounds, and the scales were right, for they were the ones used by Charlie Fitz Maurice, who had used them on the lochs of Scotland. They were right then, and are right even yet. Three further casts were made resulting in much the same procedure and a  $6\frac{3}{4}$ , a 5 and a  $4\frac{3}{4}$ -pound large-mouth were the results.

Turning to the elated Bedman, I asked him if there was nothing else in the lake but large-mouths. "Why, yes, over there in the open lake at Sandy Point." "There's where I want to go," I replied. Bedman, when he knew me better, said at the time he thought me crazy for leaving such fishing.

But we struck them rich on the sandy bottom and the reel sang the sweetest of all music to the angler's ears. And at each strike as the small-mouth darted up in the air at the first contact with the hook, it was for me to stand on my feet and fight it out.

And then the afternoon after an indifferent off day, an hour before sunset, after a shower, when we were feeling our way along, the water around the boat was cut by the dorsal fins of a school of big fish, and as quickly to sound again. "Here they are!" said Bedman; "slews of them," and with that he dropped the anchor as gently as a summer's rain.

I had two two-jointed fly-rods as supple as a whip. I told Bedman to bait them both. He for a moment demurred, but obeyed. Over went my first line, weighted on the leader by a split BB shot. Down it went slowly, as I laid the rod momentarily upon the gunwale to reach for the second rod, which, baited, I threw over, and before the second line had plumbed out, the tip of the first rod began to ominously bend down. Laying the second rod down, I arose upon my feet, and when I thought the bass had gorged the minnow (the minnows were small and the fish were large), I struck. Zip! came the small-mouth like a submarine bomb high in the air and splattering the water well around him. He certainly was full of ginger and meant to give me a run for my money. Here and there, and then the second rod began to bend as I maneu-

vered the first fish well to the left on a taut line and well-bended rod. Carefully I reached for the second rod and struck, and then with a rod in each hand and a pair of lively bass I had my hands full, literally, for a moment. Running my second fish to the right I called to Bedman to take the second rod from my hand and to keep the fish on the tip, out of the way, and not to tire it, just keep the hook "sot." And then free from dangerous snarling, I played my first fish, and he was a good one, and only came to the net which Bedman had ready for him after the last ounce of fight was out of him. The net under him, I pulled a couple of yards free from the reel and laid the rod in place so that when the baited hook was thrown over by Bedman, all would be in order. I reached back then for the second rod and found I had a very lively bass on my hands. Here, there and everywhere and care taken to "butt" him every time he journeyed toward the other line. Another ominous bending of the first rod, a setting of the hook and again I had a pugnacious fish on each rod and my arms extended as far as I could like a railroad semaphore. Again did Bedman take the rod as before. Suffice it to say that this lasted for one hour, and as the sun went down over the hills, action ceased. There was nothing more doing.

As I was tired carrying fish to town to present them to the neighbors, who in some cases demurred because the fish were not all prepared for the pan, I in my latter fishing days put them all back and I always returned to town empty-handed, a thing my friends wondered at.

The morning's catch, enough for our noon day fry, under the trees on Rocky Point (the aroma of the hard wood camp-fire smoke, boiling coffee and frying bacon and fish lingers yet in my nostrils) was always saved, all the rest got their freedom and none the worse for wear.

And that night in the darkness as we made the six or seven miles toward camp, we passed Sandy Point. Suddenly a loud quacking from a flock of shelldrakes and a whirring of wings and a dripping of water, followed by a swish of some upward darting body! For a second or more silence followed, and then came a splash as if a Newfoundland dog had leaped into the lake. "Only one of our overgrown pickerel striking at those ducks. We surely have some big ones in this lake. An Englishman with a chalk line, a large mascalonge spoon and an interspacing of heavy sinkers to take his line down sixty or eighty feet used to troll and now and then land one of those old whales."

My experience with those two rods was unique. Bedman said he never saw such fishing, and I surely never again had such fishing from that day to this, and of course never will have any more fishing, good, bad, or indifferent, except in my mind, and when my young enthusiast using my old reliables of thirty years, lands the big rainbows up on Shovel Creek and has the camera tell me the story so real that I feel I have been there doing it myself all over again.

## Winter Fishing in Maine.

BY SAM R. WEBBER.

BESIDE a huge beech tree which towers majestically toward the firmament above, stands cozy camp Nashwaak, the retreat of the winter fisherman. Before it almost as far as the eye can reach stretching in a vast expanse of white lies Nash's Lake, the home of the trout and the pickerel.

After the delightful sports of the summer season and the hunting in the fall which we so love are but memories in our dreams and reveries this scene grows before us, and we long for the days when Jack Frost's inexorable power shall sheath the blue waters in a thick ice armor.

And so it was that when one crisp afternoon in February I received an invitation to go fishing with the captain, I packed my knapsack with all celerity and joy.

Next morning when the alarm clock went off with a thrilling whirr, the star-studded sky gave promise of pleasant weather, and we thanked the Red Gods silently for their smiles. After a hearty breakfast the old horse was harnessed and we climbed aboard the pung and started on the long drive for the fishing grounds. Presently the captain joined us, his hardy face wreathed in smiles, and the drive continued uninterrupted, the woodsman clambering aboard. From this point the road lay through the woods, and it seemed that the two veterans had hardly begun to tell their anecdotes of past experiences when the lake, glistening as the morning sun peeped over the eastern ridges, lay before us. In a short time camp Nashwaak loomed up in the distance, and we had reached our destination.

The prosaic part of ice fishing, the chopping of holes through twenty-six inches of solid ice, and the baiting of hooks in a freezing wind is enough to dampen the ardor of even the most enthusiastic; and so when fifteen silvery shiners were swimming in the deep waters of Coleman Cove, we adjourned to the camp for dinner.

The remaining hours of the day passed pleasantly and quickly, and the catching of several large pickerel added excitement. A rabbit contributed his share of the fun when he tried, much to his sorrow, to ascertain if the captain's .32 revolver were a popgun or a real man's weapon.

When the sun began to sink behind Mount Seeall in the west, we took in our lines and again set out to Camp Nashwaak to prepare supper. And yea, verily, mighty was the eating in the little cabin that night, and with good reason, too, for who could not eat when camp-baked beans, fried rabbit, porcupine's liver and bacon lay steaming on the table before him?

Supper over and the dishes cleaned it was not long before the bunks on the wall began to look inviting, so we promptly "hit the hay."

The next day passed even more quickly and pleasantly than the previous one, and when we landed several large squaretails, for which the lake is noted, our trip seemed a success. We drove back beneath a starlit sky, extremely happy, happy because we had spent two days in the open, happy because we had caught fish enough to reconcile the ones at home, happy because we knew that we should again undergo the same delightful experience.

## How Long Will a Fish Live Out of Water?

WASHINGTON, D. C., Jan. 9.—*Editor Forest and Stream:* I have read with much interest the article in your issue of Jan. 4 by Dr. L. O. Howard on "How Long Will a Fish Live Out of Water?" The article interests me very much. The little so-called "black minnow" to which Dr. Howard refers is the Eastern mud minnow, whose scientific name is *Umbra pygmaea*, originally described in 1842 by De Kay from Tappan, Rockland county, N. Y. This and one other species (*Umbra limi*) which is very abundant from Quebec to Minnesota and southward to the Ohio, constitute the only American species of the family *Umbriidae* or mud minnows, to which they belong. The Eastern mud minnow reaches a length of about four inches and is found pretty generally distributed in lowland streams and coastwise swamps from Long Island and Northern New York to the Neuse River, N. C. Many years ago Prof. Baird said: "A locality which with the water perfectly clear will appear destitute of fish will perhaps yield a number of mud fish on stirring up the mud at the bottom and drawing a seine through it. Ditches in the prairies of Wisconsin or mere bog holes, apparently affording lodgment to none beyond tadpoles, may thus be found filled with *Umbra*." I myself have found these little fish in abundance in swamps, ponds, ditches and weedy streams in Northern New York. I have found the other species in equal abundance in similar places in Indiana and elsewhere in the upper Mississippi valley. Each species is in considerable demand as a bait minnow. Perhaps the chief thing recommending them for that use is their great tenacity of life. It is a common thing for people to catch them and keep them in rain barrels or similar receptacles indefinitely.

One would infer from Dr. Howard's article that he thinks it probable or possible that these little fish get into the swamps from the larger streams during high water. Such is not the case. They are not found in the St. Lawrence River or similar streams, except perchance in nooks and corners where there is quiet water with mud bottom. In some places they are called "mud fish"; in others "dog fish" and are believed by those who have that belief to be the young of the bowfin or common fresh water dog fish (*Amia calva*). They are, of course, nothing of the kind.

In Northern Alaska there is a fish known as the Alaska black fish or Chornia ryba (*Dallia pectoralis*) belonging to a closely related family and having habits similar to those of the two mud minnows of the United States. They are also equally if not more tenacious of life. The story is frequently told that the Indians collect them in the fall of the year and retain them in baskets, frozen, to feed to the dogs during the winter. It frequently happens that the dog swallows the fish whole, and then the deuce is to pay, for the warmth of the dog's stomach very soon thaws out the fish, and then the movements and contortions of the fish in the dog's stomach provide an uncomfortable situation for the dog, resulting in severe vomiting and the throwing up of the disturbing fish. I understand that stories of this kind are vouched for by early Alaska travelers who elsewhere are recorded as men of truth and veracity.

BARTON WARREN EVERMANN,  
Bureau of Fisheries.

## American Fisheries Society.

THE members of the executive committee of the American Fisheries Society have decided to hold the forty-third annual meeting at Boston, Sept. 8 to 12 this year, and arrangements are being made to make it the largest meeting ever held. It is proposed by the Massachusetts members to have all New England join with Massachusetts in giving the members a royal welcome that they will never forget.

This society was organized in 1870 and has numbered among its presidents many noted men, among them being the following: Wm. Clift, Robert B. Roosevelt, Theodore Lyman, Marshall McDonald, Dr. James A. Henshall, George F. Peabody, John W. Titcomb, Hon. George M. Bowers, Dr. Hugh M. Smith, Dr. Tarleton H. Bean and Seymour Bower.

The society is divided into five divisions—fish culture, aquatic biology and physics, commercial fishing, angling, protection and legislation.

The present officers are: President, Dr. Chas. H. Townsend, New York; Vice-President, Dr. H. B. Ward, Urbana, Ill.; Recording Secretary, Ward T. Bower, Washington, D. C.; Treasurer, Charles W. Willard, Westerly, R. I.; Corresponding Secretary, Dr. George W. Field, Boston, Mass.; Executive Committee, Daniel B. Fearing, Chairman, Newport, R. I.; J. Q. Ward, Kentucky; N. F. Buller, Pennsylvania; Ernest Schaffle, California; Dwight Lydell, Michigan; George W. Miles, Indiana; George H. Graham, Massachusetts.

## Shrinkage of Fish

PARK RIDGE, N. J., Dec. 12.—*Editor Forest and Stream:* In reading your Christmas number it is with great pleasure I noticed your table of the shrinkage in the weight of fish. I have not made very many tests of this, but last spring on Moosehead Lake I did make a test of a 10-pound lake trout, which when caught weighed exactly 10 pounds, and after a matter of about six hours weighed exactly 9 pounds 8 ounces. I also made a test of a 5-pound trout which seven or eight hours after weighed 4 pounds 12 ounces. So taking these two instances into consideration I think that your scale of shrinkage is as near to being correct as you can ever possibly come to it.

I trust that this will bring up some very interesting correspondence which will appear from time to time in your valuable paper.

GEO. E. DUNCAN.

At the annual meeting of the Crawfish Club, composed of hunters and fishermen of Tazewell county, Illinois, the following officers were elected for the ensuing year: President, Louis Luick; Secretary, G. F. Taubert; Treasurer, W. A. Stockert. The club has been incorporated and will shortly erect a first class club house.

DURING the present year, forty-three convictions of persons violating the game and fishing laws have been reported in Central Illinois, the fines ranging from \$5 to \$100. The numerous convictions are credited to sportsmen who cooperate with the game wardens in reporting instances where the laws are being violated by the irresponsible classes.

**CORRESPONDENCE**—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

**SUBSCRIPTIONS:** \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

**ADVERTISEMENTS:** Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

Entered as second-class matter at the Post-Office, New York, N. Y.

### THE OBJECT OF THIS JOURNAL

will be to studiously promote a healthful interest in outdoor recreation, and to cultivate a refined taste for natural objects.

—FOREST AND STREAM, Aug. 14, 1873.

### THE TARIFF AND BIRD PLUMAGE.

ONE of the first things likely to be done by Congress is to amend the tariff laws. The attempt for such a revision is likely to come, and when it comes, it may linger long with us.

A movement is in contemplation so to change the tariff law as to prohibit the importation of bird plumage for millinery purposes. Such a prohibition would no doubt except ostrich plumes and the so-called fancy feathers, which are, in fact, the plumage of poultry. This movement is quite sure to receive the support of bird protectionists individually, of the bird protective societies and of the Biological Survey. It will be welcomed as a more efficient and sweeping means of bird protection than anything yet suggested.

It is intended that the amendment shall be so carefully drawn as to be of unquestionable constitutionality, and it will be so simple and unmistakable in terms as to be easy of comprehension by anyone and to enlist hearty and enthusiastic popular support. Such an amendment, if adopted, can be enforced by the customs service without additional expense. It is believed that it will settle the plumage question for this country and will greatly encourage and strengthen those who are trying to secure like legislation in England and in Germany. Passed and enforced, it will be a great stroke for bird protection.

Even if it should fail to become a law, those who are urging it believe that it will greatly advance the cause of bird protection by calling renewed attention to it, and will avert any reduction of the tariff now imposed on finished millinery products. The effort is now in its infancy, but we are likely to bear more of it before long.

WHEN you think of an outdoor publication, there stands FOREST AND STREAM.

### ACID KILLS WILD DUCKS.

INVESTIGATIONS of the causes for the enormous mortality among wild duck in the neighborhood of Salt Lake City, Utah, which were instigated by the American Game Protective and Propagation Association, have revealed the fact that sulphuric acid poisoning, and not a contagious disease, as was believed, was responsible for the death of two million waterfowl in 1910 and nearly as many during the past season.

The association solicited the aid of the Biological Survey at Washington, and through its officers Dr. Buckley, of the Pathological Division of the Bureau of Animal Industry, was sent to the scene of the supposed epidemic. All those who have given the matter attention now concur in Dr. Buckley's conclusion that sulphuric acid discharged into the marshes by industrial plants has destroyed the birds. This discovery paves the way for legislation, which should be immediately enacted to prevent this great waste of valuable animal life.

### OF THREE THINGS BEWARE!

TRAGEDY treads close upon the heel of mirth. We set out on pleasure, and it is likely to end in sorrow. Of three things beware!—a loaded gun, an unloaded gun and a canoe.

In an interior village of this State one day last week a son, returning from a shooting excursion, came into the house with game and fun. The father picked up the gun, thinking it to be unloaded, pointed it at the mother and said in fun, "Suppose I should shoot you," pulled the trigger for a joke—and shot her dead.

Last Sunday, two young men set out in a canoe to cross the Hudson. The rudder paddle didn't handle the craft very well, so the men tried to change seats—and only one was left to tell the story of joy turned into mourning.

And yet three of the most harmless things in all the world are a loaded gun, an unloaded gun and a canoe.

### DR. RAINSFORD'S REPORTS.

DR. W. S. RAINSFORD, who is conducting the third African Expedition of the American Museum of Natural History, has agreed to report to FOREST AND STREAM his progress from time to time, as he gets a chance to arrange data gathered along the way. The first of these articles appeared last week. A second paper, just received, will be found in our next issue. Dr. Rainsford's writings will interest both big-game hunters and naturalists, as they will give intimate detail of present conditions in Africa, told in the inimitable style of one who knows.

### THE HERO OF 1858.

CAPTAIN OLIVER N. BROOKS, an old-time skipper, and for nearly a generation the keeper of the lighthouse on Faulkner's Island, in Long Island Sound, died Jan. 5 in Derby, Conn.

It was a piece of heroism performed on the night of Nov. 23, 1858, that caused Captain Brooks to be spoken of as the "Hero of 1858." That night the schooner Moses F. Webb went ashore in a heavy gale on Goose Island, not far from Faulkner's Island. Captain Brooks, disregarding the weather, put out to the stranded

vessel in an open boat, and safely took off the five men of the crew. This feat was widely heralded. The Life Saving Benevolent Association of New York presented him a gold medal and the citizens of New Haven gave him a purse of gold.

Captain Brooks was known to every Connecticut ornithologist of thirty years ago as a careful observer of birds, and as possessing in his home at the lighthouse a collection of birds of unusual interest. His name has been quoted in many a list of Connecticut birds during the last forty or fifty years.

Captain Brooks was a delightful man, full of stories of his experiences and observations. He was twice a member of the Connecticut General Assembly.

### THE VISION OF ST. AUGUSTINE.

TAUNTON, Mass., Dec. 1.—*Editor Forest and Stream:* Some years ago I chanced to be locked up in the fortress by the guard who was unaware of my presence. I however managed to attract his attention, and he returned and let me out after a short incarceration. Otherwise I should have stayed there all night. I occupied the cell allotted to Osceola, the Seminole chief, and subsequently to Geronimo. This poem owes its existence to that fact.

HENRY D. ATWOOD.

The sun had set,  
 The dark lunette  
 Of Marion's ancient fortress gleamed  
 Beneath the moon  
 All pale; but soon  
 The clouds were parted and it seemed  
 A fairy scene  
 So calm, serene—  
 The while the waves with muffled roar  
 Upon the beach,  
 A pure white reach  
 Of sand, in constant tumult pour.

I gazed, sad-eyed,  
 On every side  
 Until upon the waters mild  
 I saw a sail,  
 And o'er the rail  
 A stalwart form appeared and smiled:  
 It seemed in joy,  
 Without alloy—  
 And yet his face I did not know;  
 Some happy thought  
 His fancy caught,  
 Or he could not such pleasure show.

Perhaps his eyes  
 Saw other skies—  
 Perhaps he saw one loved of yore  
 In vision sweet,  
 Whom he would greet,  
 If he should ever meet her more;  
 For time nor place  
 Can e'er efface  
 The love in sweethearts taught to grow;  
 Go where they will  
 It lingers still—  
 It ever was, and will be so.

So may it be,  
 Good friend, with thee—  
 Thou valiant heart and seaman bold;  
 And now at last,  
 Thy voyage past,  
 Before the rising moon is old,  
 Mayest thou on shore  
 Meet her once more—  
 Once more within thine arms enfold,  
 And plead again,  
 And not in vain,  
 And bring her jewels, silks and gold.

## An Archer's Confession of Faith

By E. J. RENDTORFF

(Concluded from last week.)

WHEN the feathers are badly injured it is necessary to replace them. Be sure that you do not select a right-handed feather when the remaining two are left-handed, or vice versa. A good way for fastening these feathers is as follows: Purchase a  $\frac{2}{4}$ -inch butt, or door hinge, and file the two halves until they are of the same width. Place the feathers between them with the fibre part projecting. Smooth the fibre with a file, put on a rapidly drying glue and then place radially on the proper place of the shaft. Remove the hinge after the glue has set. The wood below the feather must be scraped, so as to remove all traces of paint from directly underneath the feather. It is, of course, also necessary to apply glue to the wood before the feather is put in place.

The arrow should be of such length that, when fully drawn, the nock will be directly under the vertical axis of the eye. In this case the point can be moved to the right or left without throwing the arrow out of the horizontal axis of the eye, but if it is either too long or too short, every shifting of the point must be accompanied by a slight shifting of the nock. The length depends somewhat on the position at which the left arm is held, but it can certainly be determined within one-quarter of an inch. As a general rule, a long arrow will shoot better than a short one.

When it comes to the choice of weight of arrows, the general practice seems to be to select the lightest one that can be used. This I consider a great mistake. My first arrows were of 4-3 S. weight. They were gradually increased to 5 S., with a consequent increase in accuracy for every weight. For the American round, I believe, an arrow heavier than 5 S. would be a distinct improvement. This would put the point of aim on the target for sixty yards, and approach the conditions under which Maxson made his remarkable American round score of 90-666.

Any lack of regularity in releasing affects a heavy arrow less than a light one. The same is true of the action of the wind. Furthermore, a heavy arrow is generally a stiff one, so that less energy is wasted in producing internal vibration and more devoted to its actual propulsion. Any lack of velocity of a heavy arrow is more than counterbalanced by a truer flight, less flirring and wobbling, and a higher point of aim, which is desirable for short-range shooting.

The shaft of an arrow should not have a bright, lustrous finish, although a smooth one, for else the line of maximum illumination pro-

duced by the light reflected from such a surface is apt to be mistaken for the true axis of the arrow.

It is customary to hold the nock of the arrow below the chin, with the index finger in contact with it. I must confess that I do not like that method, and consider the hollow between the mouth and chin a better position. There are two reasons for this. At the shorter

T. R. WILLARD, WHO HAS MADE MUCH HISTORY FOR ARCHERY.

ranges a point of aim on the target or near to it is far preferable to one far away. The closer the nock is held to the eye, the nearer to the target will be the point of aim for all distances up to eighty yards. There is a point in the hollow between mouth and chin which is directly below the vertical axis of the eye. If the arrow is of the proper length, and the nock is held at this place, then the point of the arrow can be shifted to the right or left at pleasure, without throwing the arrow out of the horizontal axis of the eye. If, on the other hand, the nock is held under the chin, where there is no convenient place of reference, so that the fingers can instinctively feel when the nock is in the vertical axis of the eye, it be-

comes necessary to look along the entire length of the arrow to insure that it is held in the proper position. In the one case it is held in the true position mechanically, and the point only need be watched to insure the proper direction and a uniform length of draw, while in the other case several different adjustments must be made and frequently altered.

The length of draw should be such that the point of the arrow rests on the top finger of the left hand, but great care should be taken that the point does not slip below the level of the finger, for else an upward thrust is produced that will throw the arrow higher than it is aimed. The draw should be completed and the left hand closed firmly before the aim is taken. If the rigid closing of the hand is performed after the aim is completed the point of the arrow is apt to be elevated.

Now comes the important and much-mooted question of aiming.

Taking it for granted that the draw is perfectly made, both with regard to length and direction of the arrow with reference to the eye, the question arises how it should be held with regard to the target and the point of aim. I believe the novice will do best by riveting his attention on the point of aim and totally neglecting the target. It is good practice for the beginner to place a small white object on the ground at the position of his point of aim, and then move sideways until the line from the right eye through the point of aim intersects the center of the target. He should thereafter neglect the target and consider his point of aim only.

After an entire season of shooting, during which he has acquired a certain amount of skill, and can intuitively perceive when the various adjustments are properly made, he should regard his point of aim as of secondary consideration. He should focus his direct or primary vision on the center of the target, with his secondary or indirect vision on his point of aim. As a novice his point of aim gives his adjustments, both lateral and vertical, but as an expert the point of aim should be used only for the vertical adjustment, or elevation, at which the arrow is to be held. This will allow him to watch the arrow during its flight and thus avoid the shifting of the left hand, when the arrow is released, that would unconsciously be produced when the archer alters his vision from the point of aim to the target, in order to note the success of his shot.

The release is the most difficult knack to be acquired in all archery. Many different methods are employed. Many good archers combine the final drawing of the arrow, and the completion of the aim, with the release. I believe firmly in first adjusting the arrow to the bow, then to the eye, next to the proper length of draw, then to the target, and finally to the point of aim, for elevation purposes; and then standing pat on all of these adjustments, in

each and every case, in exactly the order in which they are made, so that the release is a final and absolutely separate and distinct accomplishment.

When the aim is completed, and the arrow ready to be released, it will be noticed that the point has a habit of wobbling in spite of the greatest care. The true position will be reached only to be lost again. The release must be made at what is called the "psychological moment"—i. e., at the instant when the position of true aim occurs.

The release should be a synchronous combination of an opening of the hand, a rotation of the fingers above the string as an axis, and a sharp pull backward, so that while the three are accomplished in unison, the position of the string does not change until the release is completed.

In order to insure the holding of the bow in the proper position, until it is no longer in contact with the arrow, it is good practice not to lower either the bow or the right arm until one second after the shot has been completed.

One common fault with archers is the lack of rigidity of the left arm in holding the bow in position. It is very evident that a motion of the bow to the right or left, as the arrow is released, will deflect it somewhat from its true course. This effect of lateral rigidity is universally recognized and every archer attempts to meet the condition, but the effect of rigidity in the longitudinal direction, viz., from the archer to the target, is generally not understood.

Why is it that various arrows of the same length and weight do not carry the same distance when drawn to the same length, held at the same elevation, and properly released? Why can one archer make a longer flight-shot with the same bow and arrow than another, when both elevate the arrow to the proper angle of slightly over 45 degrees? The standard answer is that his release is better. It is customary to blame the release for a multitude of sins when the true defect lies in some other source.

No broad jump record could be made by jumping from a feather bed, or from a movable rowboat. Similarly no arrow can be shot with great velocity unless the left arm is held rigidly in the longitudinal direction, so that it does not bend or give during the recoil. The true answer is based on the physical principle that for every action there is an equal and opposite reaction. The good flight shooter holds his left arm and body strongly braced, so that on releasing the arrow there is a minimum give along the direction of his arm, with a consequently greater velocity imparted to the arrow. The reaction of the bow is absorbed, not by the muscle of his triceps, producing a flexure of the arm, but by the muscles of his shoulder, back and legs. These muscles must, at every shot, be held uniformly tense, or rigid, when the arrow is shot, or else the arrows will shoot untrue in the vertical plane.

My legs always become tired long before my arms show the effect of shooting, though the muscular development of my arms is, if anything, below normal. The longitudinal recoil is in reality a complex resultant of three different component reactions. When the arrow is drawn, the left arm is under a compressive

strain, and the hand has a tendency to move toward the archer. At the moment the release occurs the strain is removed, and there is a tendency to move the arm forward. This effect is instantaneous. The projection of the arrow forward produces a recoil backward, causing a compression or flexure of the arm. This effect lasts during the entire time the arrow is in contact with the string. At the moment the arrow leaves the bow there is again an instantaneous tendency for the arm to move forward. As these three reactions do not occur in unison, and are unequal in magnitude, the resultant recoil is rather complicated in its effect. As none of the reactions act directly along the axis of the arm there is also a tendency to shift the left arm laterally and, generally, to the left.

In addition to the lateral and longitudinal rigidity of the arm the effect of the distinctly different torsional rigidity must not be overlooked.

When the bow is tightly gripped at full draw, the bent legs of the bow and the two segments of the string lie practically in one plane. The left arm, wrist and hand are under considerable strain. When the arrow is released the force that holds the bow in that particular plane is suddenly removed and there is a tendency to revolve the bow, with the wrist as an axis. This will throw the arrow to the right or left, and also introduce a lateral vibration in the bow that will not improve the feeling of the recoil.

To remedy this defect, grip the bow so that there is no tendency to rotate it either to the right or left while the arrow is drawn, for then no turning movement will exist when the arrow is released. The improper flexure of the wrist and lack of torsional rigidity is the main cause of striking the bow string against the arm guard and thus spoiling what would otherwise be a successful shot.

There is another defect of a similar nature that must be considered, viz., the tendency on release to rotate the bow through a vertical plane. The pull on the string is some two inches above the axis of the left wrist and arm. This introduces a turning movement, when the arrow is drawn, the amount of which is the strength of the bow multiplied by the distance (about two inches) between the position of the shaft of the arrow and the axis of the wrist. This amounts to a turning moment of about nine foot-pounds and produces an appreciable motion of the top of the bow toward the archer, on the draw, and a reaction in the opposite direction on release, with a consequent tendency for the arrow to undershoot. This tendency is increased by bending the wrist upward, but it can never be eliminated. The remedy is the proper rigidity of the wrist in the vertical plane when the release occurs.

Although it is not essential to good shooting, we are frequently interested in the actual velocity of our arrows. This can best be determined by shooting them straight upward and taking the interval occupied by their flight with a stop-watch. The time required for the upward flight is the same as for the downward motion. The velocity of the arrow the moment it returns to earth is the same as when it first leaves the bow.

(Continued on page 94.)

## Archers in Winter.

CHICAGO, Ill., Jan. 9.—*Editor Forest and Stream:* At this season of the year, when the range is covered with snow and bows and arrows have been put away, archers have various ways of spending the time, which, were the weather favorable, would be devoted to shooting.

Some simply hibernate. These are not good archers.

A few who are expert workers in wood, make bows and arrows.

Most all read everything they can find on the subject of archery, and get together to discuss questions of interest on which there is not universal agreement. And there are many such questions. Now is the time we should write for the papers. Everyone has something of interest to say, and everyone wishes to hear it.

Subscribe for a paper in which you are sure to find some space devoted to archery.

Perhaps the following figures will be read with interest by devotees of the sport.

Rank of the men champions of the National Archery Association of the United States, from the first meeting in 1879 to 1912, both inclusive:

Ninety-six arrows at 80yds.:  
Jiles ..... 50 202 Hertig ..... 76 324  
Holmes ..... 51 199

Mr. Holmes' shooting in the American round was remarkable for its regularity. It is seldom that two rounds in succession are shot with so little variation of hits and score at the different distances and with total of hits and score alike.

The writer fell down badly at the 50 yards, making a score fully 70 points below what should be made at that range. O. L. HERTIG.

# YACHTING

## Racing on Long Island Sound.

BY CLARENCE CONVERSE, IN THE FLASH LIGHT, PUBLISHED BY THE ERIE Y. C.

It gives me pleasure to note that you are not allowing the gasolene motor to make the grand sport of wind-jamming a lost art where the conditions for sailing are so ideal as at Erie. By adopting your recent small one-design sailing class, you are right in line with a popular movement among the yacht clubs here in the East on Long Island Sound. Oyster Bay has a class of 15-foot boats which is raced every week on their club courses—the outside course on the sound in nice weather; the inside course, off Seawanhaka Club, in threatening weather. Stamford Y. C., across the Sound, has a similar class; Bridgeport another; Hempstead Harbor, the jewel class (beautiful little knockabouts of polished mahogany) each handled by a young millionaire of the Red Spring colony of Hempstead; Manhasset Y. C., of Port Washington, L. I., has contributed four popular one-design classes to the Sound racing fleet in its short life of about ten years; Bay Side Y. C. brought out a splendid class of Gardiner-design last summer, called the bird class, each boat bearing the name of some waterfowl; and in recent years here the clubs have found the one-design idea so popular that they have been building what have become known as "interclub" one-design classes, where the boats are owned by members of different clubs, but are all of the same class.

The friendly rivalry between the skippers in these classes is very keen, as you have doubtless found by your experience in your class. We, on the Sound, have some twenty-two association regattas each season, not counting the many extra races on Sundays, and it is very interesting to see how differently some of the boats of a one-design class perform under the changed weather conditions of so many races, some of the skippers proving to be better heavy weather sailors and others getting more out of their boats on light fluky winds. The tide here, too, is a great factor to be taken into consideration. Often, on the short five-mile triangle of the Larchmont Y. C., the current will be setting north along the shore with many eddies which can be worked to good advantage, while one mile out in the Sound, at the southeast stake boat, the current will be strong to the southward. And if the regatta is started at either turn of the tide, these conditions will often be changed diametrically before the boats have covered the triangle. Then again we will sometimes start with a west wind blowing out from the New York shore, only to find it dying out half a mile or so off shore under the influence of a south wind which is coming over from Long Island. When there is very little wind here of a summer afternoon, and a change of tide due during the regatta, the experienced skipper looks for a change of wind to a brisk southerly—though it does not always come—and

it is amusing to see the different skippers weigh their chances of sailing to the southward of the triangle perhaps against a head tide to get advantage of the first of the new breeze, while some of their adversaries calculate it is better to trust to the dying northwest zephyr and perhaps more favorable tide. Then again the two leading boats of the class often have a luffing match which takes their skippers so far out of the course for the next stake boat or finish line before they realize it that the slower boats, by holding on toward the mark, will get in ahead. In this way now and then a boat which has not been kept in racing trim, and which has consequently not won a race all the season will come in leading her little fleet to the mortification of the leaders of the class. As we sail for championship counts in every association regatta, we sometimes get so absorbed in attempting to beat some particular rival whose points tally up to that time closely with ours that we both lose the first and second prizes we should win in that regatta, and our other adversaries add to their point score correspondingly.

## Yacht Sales.

THE Hollis-Burgess yacht agency has sold the following:

The 35-foot water line auxiliary yawl Rebecca, owned by Dr. Coleman Tousey, of Boston, to W. E. Scull, of Philadelphia.

The 25-foot water-line yawl Spectre, owned by Russell S. Paine, of Worcester, Mass., to Professor George E. Russell, of Roslindale, Mass.

The 25-foot waterline auxiliary knockabout Annie L., owned by Commodore William F. Oburg, of the Cottage Park Y. C., of Winthrop, Mass., to Frank L. Mott, of Buffalo, N. Y.

### A. C. A. Membership.

NEW MEMBERS PROPOSED.

Atlantic Division.—Eric G. Anderson, P. O. Box 191, Cranford, N. J., by F. E. Ahrens; Benj. F. Cromwell, 32 Fairfield Road, Yonkers, N. Y., and Frederick C. Cromwell, 32 Fairfield Road, Yonkers, N. Y., both by B. Frank Cromwell.

Central Division.—George M. Eaton, 726 East End avenue, Wilkinsburg, Pa.; Paul R. Applegate, 5525 Kentucky avenue, Pittsburgh, Pa.; Lew E. Duva, 5417 Coral street, Pittsburgh, Pa.; Wm. F. Patton, Jr., 403 Gray Apartments, Wilkinsburg, Pa., and Bert E. Dart, 210 Hutchinson avenue, Swisssdale, Pa., all by F. D. Newbury.

Western Division.—William Hawley, Dundee, Ill., by Thomas C. Angell; Henry Bergholtz, 438 New York street, Aurora, Ill., by John Deneau; George T. Bean, 504 Woolner Bldg.,

Peoria, Ill., by Hugh P. Miller; George W. Schoeffel, Y. M. C. A., Peoria, Ill., by Jos L. Furst; Harry T. Stubbs, 315 Kishwaukee street, Rockford, Ill., by H. F. Norris; Rae Dupree, Dundee, Ill.; Cecil H. Bingham, Dundee, Ill.; Irving M. Western, Dundee, Ill., and Nelson J. Gothard, Dundee, Ill., all by Thos. C. Angell.

### RESIGNATIONS.

Atlantic Division.—1620, Fred B. Collins, Bayonne, N. J.; 4955, Charles F. Ash, Brooklyn, N. Y.; 5741, James G. D. Burnett, New York, N. Y.; 1493, Lucius M. Stanton, New York, N. Y.; 1935, Gilman S. Stanton, New York, N. Y.; 5990, William P. Randall, Mt. Holly, N. J.

Central Division.—153, Nathan S. Smith, Newburgh, N. Y.; 5484, Frank N. Spellar, Pittsburgh, Pa.

Eastern Division.—4100, William C. Corey, Wilmington, Delaware; 5725, Crosby J. Wells, Providence, R. I.; 5620, Lewis P. Allen, Reading, Pa.; 5763, Albert S. Hayward, Providence, R. I.; 5270, Howard F. Mulcahey; 5168, James S. Gibson, Boston, Mass.; 5150, Robert Sibor, New Bedford, Mass.

Western Division.—6406, Elmer D. Becker, Chicago, Ill.; 6468, Fred L. Frauenhoff, Aurora, Ill.

### MEMBERS DECEASED.

Atlantic Division.—121, Manning Skinner, 235 West Seventy-fifth street, New York, N. Y., one of the old members of the association.

Central Division.—2066, Edward D. Taitt, Gouverneur, N. Y.

Eastern Division.—Edward T. Brigham, E. Peperell, Mass.

## Simple Sterilization of Water.

A FRENCH scientist, M. Dienert, has discovered that drinking-water can be completely sterilized by being placed in a vessel containing a small piece of zinc and stirred from time to time, says Harper's Weekly. He has placed distilled water in test tubes, with a small piece of zinc in each, and then added cultures of various microbes. After a time the microscope shows the microbes gathered about the zinc and all dead. Zinc and zinc oxide are practically insoluble in water, but the bacteria cause slight quantities of these substances to be dissolved, probably because they secrete a small amount of some acid. The amount of zinc dissolved, however, is so small as to be absolutely harmless when taken in with the water.

The extended use of zinc and "galvanized" iron vessels as receptacles for drinking-water shows that the zinc will last a very long time. This use of zinc or zinc-lined containers works thus automatically to sterilize the water placed in them. Experiments in which cultures were made from water that had been kept in zinc vessels for various lengths of time will tell us before long whether this principle can be utilized on a large scale for sterilizing drinking-water intended for domestic or community consumption.

# TRAP SHOOTING

## The Pipe of the Piping Rock

AS AN indication of the trend of trapshooting, of the invasion of, and popularity in, exclusive and aristocratic circles, I have selected as an example the Piping Rock Club at Locust Valley, L. I. Of course, we know that among yacht clubs trapshooting is, and

exclusive in this country, is one of the wealthiest, with a large "coed" membership. Its racing and hunting events always bring out class, both equine and human. Last October, a little bunch of the club impetus, including Frank L. Crocker, Jr., John B. Dennis, Jas. H.

Long Island an inkling of what these gentlemen wanted but knew not how to get. He forthwith offered his services to make the best ever of the trap department of the ambitious gentlemen, who yearned to become rock breakers, without a Sing Sing address.

Three months ago the site for the traps was selected with an appropriation of \$3,500 voted to carry out the project. Thus far the gun house has been completed, with outgoing and incoming traps working. The arrangement, as will be seen in illustration, is ground flush traps—the aerosaucers at the pull signal come in or out as though coming out from the ground. Under construction is a tower one hundred feet high, to throw the mud discs overhead, English style—nowhere else in America is there such an arrangement; but, figure the Piping Rocks, the day may come when pheasant drives

MAIN CLUB HOUSE.

MR. FANNING DECOYING SHOOTERS.

has for years, been the yachtsman's alternative—yachting in summer, trapshooting in winter, mere shifting from tiller to gun. However, in the huntsmen's clubs, generally given up to social pleasures, under guise of the much abused term country club, trapshooting has, with few exceptions, not become a prominent pastime for members, both men and women.

The Piping Rock Club, while not the most ex-

Sears, Percy Chubb and Frank Havemeyer (now the shooting committee) got together and decided that so many of the Piping Rock coterie shot over traps at other clubs, it would be better to offer temptation equally attractive and keep the members at home. Somehow—ask the birds—one Jack Fanning, an expert in club formation, representing a powder company on the banks of the Brandywine, got from the laden winds of

in America may be possible, and, if they are, the overhead fly will help some.

It is rather interesting to note that out of 368 members in the club, more than sixty are in the trapshooting fold, and of these more than a dozen are from the superior fraction, or hope to be, department. These ladies threaten to become militant shooters; in fact, some already can pick their full quota of aerosaucers from

TRAP HOUSE, SHOWING "INBOUND" AND "OUTBOUND" TRAPS.

INTERIOR SCORE BOARD.

the ambient atmosphere, while others are getting quite proficient with the splatter gun.

If the progressive work goes on, this club portends much in the trapshooting line; in fact, it is bound to grow, because the beginner, the expert and "the woman" has an equal chance to play at the greatest game ever offered lovers of outdoor sports.

New York A. C.

PELHAM MANOR, N. Y., Jan. 11.—Some of the bunch put-putted across the Sound this morning to the Long Island Sound championship at Manhasset Bay Yacht Club. They were lucky to get back, although not hampered by any excess freight in the way of trophies. Ralph Spotts got square here by getting high gun trophy with 92, enough to have won over the water, and the Stern trophy with a straight. O. C. Grinnell won the biggest half of the events, getting a leg on the Thompson cup, after a shoot-off with Brandenburg; Day, won distance and Olympic cups. Charley Billings became permanent owner of Olympic cup with six legs. A. E. Rainey took leg on January cup with (2) 25 after a shoot-off with Ralph Spotts and T. Lenane, Jr. Billy Heer and Geo. W. Maxwell were on hand to take care of the for-wads-only boosters' society interests. Scores:

Table of scores for New York A. C. including January cup, Thompson trophy, and various handicaps.

Table of scores for various trophies and handicaps, including Stein trophy and Travers Island trophy.

Table of scores for high gun trophy and other events, including 100 targets and 100 targets, scratch.

Analostan Gun Club.

WASHINGTON, D. C., Jan. 11.—The annual meeting of the Analostan Gun Club was held last night. A large number of members were in attendance. The reports of the secretary and treasurer were read. In the former's report it was shown that 58,221 targets were thrown during the year, and that the average attendance at the weekly shoots was eighteen. The treasurer's report was gratifying, showing a healthy cash balance in the treasury. The annual election of officers was held and resulted as follows: President, C. S. Wilson; Vice-President, Dr. W. D. Monroe; Treasurer, Dr. A. B. Stine; Secretary, Miles Taylor; Captain, George W. Peck; Trustees, M. D. Hogan, R. P. Hawes and Dr. B. L. Taylor.

Mr. George A. Emmons announced that he would present a silver cup to be contested for by the members. The cup was accepted, and Miles Taylor and George W. Peck, Jr., were appointed as a committee to arrange the said contest.

The membership voted favorably on the proposition to appropriate \$200, to be expended in the purchase of four trophies to be awarded to the high guns in Classes A, B, C and D. Those participating in these contests will be required to shoot at 1200 targets during the season.

The president of the club was authorized to have the club house remodeled and enlarged and to make other arrangements for the comfort of the shooters during the coming year.

The contest for the silver spoons which has been so popular during the past two years will be continued. A resolution was also adopted directing the Secretary to make an application to the Interstate Shooting Association for dates upon which to hold registered shoots in May and August.

MILES TAYLOR, Sec'y.

# Long Island Sound Championship

PORT WASHINGTON, L. I., Jan. 11.—The mariner's curse trolled itself lingeringly about the ambient atmosphere here to-day and acted as pallbearer to the clay discs, and a deterrent to those ambitious to attain title of champion clay target wrecker of Long Island Sound. Nevertheless the biggest aggregation of aspirants for the title thus far drawn to this classic under auspices of Manhasset Bay Yacht Club, came to the fog front and stayed to the finish. We know of no event handled with more dispatch and smoothness than was this, in which forty-eight gunners did their do and went on their way, with pleasant memory. Much of the credit for the expert handling of the event is due Jim Alker, whose score fell far below his average because of his interest in everybody else. Carl von Lengerke, representing "If it's black, it's us," and Brother Keller, of the "yellow boys," helped considerably. Then, to add to the joy of the occasion, a damsel from Mt. Vernon, Miss Thorpe, cute as a bug's ear, shot fast enough to trim her father, though some uncharitable party said "Pop missed the last four on purpose." Be that as it may, the little lady lent a willing hand and a pretty face. Now, to get back to our mutton. The team that won and the high gun really does not come from teams eligible to win a Long Island Sound championship, for it's a far cry—and a longer jump on the Long Island R. R. from Long Island Sound to Bergen Beach, found on the map of Brooklyn. Paul von Boeckman picked 90 scalars from their hiding places in the fog; F. B. Stephenson lost one more in the dripping atmosphere, while W. S. Silkworth from B. B., and B. M. Higginson from N. Y. A. C., across the way, tied with 88. In the team event Bergen Beach made 432, which was very, very, very high. The high team from those actually domiciled on the Sound was the bunch from Travers Island—not by any means the best five there either, who got away with 394, second high in score figures.

High man in the Mercury Foot aggregation was B. M. Higginson, while Ralph Spotts, probably the best target trailing exponent on the Sound, smashed only 83. The Manhasset team was in hard luck through absence of Hazen Hoyt and Gould, both top-notch rock crackers. E. A. Sierck and I should worry) C. W. Berner, did their little best with 82 shatterings each. Siwanoy's high was 76, made by M. R. Guggenheim, while F. R. Long, of Queens Country Club, spattered the dust of 81 among the waves.

Among the "for-targets-only" contingent, H. H. Stevens broke 95, Carl von Lengerke 89, H. D. Gibbs 10 less.

Port Washington Yacht Club was represented by Charley Hyde, who knows the name and address of every wild duck on the Sound. Charley mistook smoke rings from a passing tug for clay scalars, so his score was pretty well depressed; rather than emphasize its lowliness, we will not mention it here—it's in the tabulation. About the only fellows that had a score that looked like it, came from Siwanoy—and that's outside the fog zone.

The entire affair was so successful that in future the "Long Island Sound championship" in the East will be second only to the Eastern Handicap of the Interstate Association. Scores of team shoot follow:

## Midwinter Handicap.

THE sixth annual and midwinter handicap will be held at Pinehurst, N. C., Jan. 22-25, inclusive.

There will be ten regular events of 20 targets each on the first and second days, and five regular events of 20 targets each on the mornings of the third and fourth days. Prizes in all regular 20-target events will be divided according to Rose system, 8, 5, 3, 2.

There will be an additional optional sweepstake, \$2 entrance on every 20-target and 25-target event on the program. Purses in all optional sweeps in 20- and 25-target events will be divided, high gun system, one money for each five entries or fraction thereof. There will be an optional sweep, \$2.50 entrance, on each the first and second 100 of the first and second day's program and in the first 100 of the third and fourth day's program. Money divided high gun, as explained elsewhere.

For high average in the regular 16yds. event (600 targets) a gold medal will be awarded for the first high amateur, a silver medal for the second high amateur, a silver medal for third high amateur.

The Pinehurst midwinter preliminary handicap will be 100 targets, unknown angles, handicaps 16 to 23yds.; high guns, not class shooting. Two hundred dollars added to the purse. The number of moneys into which purse will be divided will be determined by the number of entries. The management will also add to the first money a sum sufficient to make it \$200. Entrance money, \$10, the price of targets being included. In addition to first money (guaranteed \$200), the winner will receive the Pinehurst preliminary handicap cup. Three special trophies will also be given in this event.

The Pinehurst midwinter handicap, 100 targets, handicaps 16 to 23yds., high guns, not class shooting. Five hundred dollars added to the purse. The number of moneys into which the purse will be divided will be determined by the number of entries. The management will also add to first money a sum sufficient to make it \$500. Entrance money, \$20, the price of targets being included. In addition to first money (guaranteed \$500) the winner will receive the Pinehurst midwinter handicap cup. Three special trophies will also be given in this event.

The Handicap Committee will be selected from shooters in attendance. The committee will meet at The Berkshire Hotel, Pinehurst, North Carolina, on the evenings of Jan. 23 and 24, to allot handicaps for the preliminary and midwinter handicaps.

Professionals are welcomed to demonstrate their goods and will be allowed to shoot for the price of targets. Professionals who take part in the handicap events will be handicapped the same as the other contestants, and must shoot for targets only, from the handicap distances as allowed by the Handicap committee.

The Country Club reserves the authority to postpone any event on account of bad weather or other important causes, if in the judgment of the management such postponement is necessary.

The official score will be kept on a score board in plain view of the contestant. It will be the duty of the contestant to see to it that the right result is recorded. In case of error, it will be the duty of the contestant in whose score the mistake has occurred to have it corrected before he fires at two (2) more targets, otherwise the score must stand as shown on the score board. In case a contestant's view of the score board is interfered with through any cause, he may refuse to shoot until the result of the last shot can be seen.

**First Day.**—Entrance in regular events, \$21; additional optional sweeps, \$20; two optional 100-target sweeps, \$5; total entrance, first day, \$46.

**Second Day.**—Entrance in regular events, \$21; additional optional sweeps, \$20; two optional 100-target sweeps, \$5; total entrance, second day, \$46.

**Third Day.**—Entrance in regular events, \$11; preliminary handicap entrance, \$10; additional optional sweeps, \$18; optional 100-target sweep, \$2.50; total entrance, \$41.50.

**Fourth Day.**—Entrance in regular events, \$11; midwinter handicap entrance, \$20; additional optional sweeps, \$18; optional 100-target sweep, \$2.50; total entrance, fourth day, \$51.50.

Pinehurst is on the Aberdeen & Ashboro Railroad, five miles from Aberdeen, and may be reached by the Seaboard Air Line from Aberdeen, N. C. (Pinehurst Junction), or by the Southern Railway via High Point, N. C. Through Pullman cars to Pinehurst from New York and Washington and intermediate points via Seaboard Air Line.

In can also be reached via Atlantic Coast Line from Hopes Mills to Aberdeen, via Aberdeen & Rockfish Railroad, connecting with the Aberdeen & Ashboro at Aberdeen.

## The Sunny South Handicap.

THE Sunny South Handicap, will be held at Houston, Texas, Jan. 27, 28, 29, 30, 31 and Feb. 1, 1913, under the auspices of the Houston Gun Club.

The first day's program will consist of five events at 20 targets, \$2 entrance and \$10 added to each event. Five events at 25 targets, \$2.50 entrance, \$10 added to each event. All shooting from 16yds. mark. Money divided per cent plan, class shooting, 40, 30, 20 and 10 per cent. High amateur average on this day will receive \$25; second high, \$25; third high, \$15; fourth high, \$10.

On the second day there will be ten events at 20 targets, \$2 entrance and \$10 added to each event. Money will be divided 40, 30, 20 and 10 per cent., class shooting. High amateur average for this day will receive \$25; second high, \$25; third high, \$15; fourth high, \$10.

On the third day there will be five events at 20 targets, \$2 entrance and \$20 added to each event. All shooting 16yds. Money divided per cent. plan, 40, 30, 20 and 10 per cent., class shooting. Event No. 6 is at 100 targets, entrance \$10, and is for the Houston Chronicle trophy, emblematic of the Southern Amateur Championship, to be shot for from the 16yds. mark, and is open to all amateurs attending the Sunny South Handicap, and counts for averages on the program. It is now held by J. Graham, of Long Lake, Ill. Money in this event is divided as follows: Fifty per cent. of the purse goes to the holder of the trophy, the balance of the purse divided 50, 30 and 20 per cent., the winner of the event to receive the trophy. This is a valuable trophy, donated by the Houston Chronicle, one of the leading daily papers of the South, and is shot for once every year at the Sunny South Handicap by the amateur trapshooters. The winner of the trophy will receive 50 per cent. of the entrance fee at the next open contest upon surrender of the trophy. High amateur average for this day will receive \$25; second high, \$15; third high, \$10, and fourth high, \$10.

On the fourth day there will be nine events at 20 targets, entrance \$2.50, and \$25 added to each event. All shooting from 16yds. Money in the first four events divided per cent. plan, 40, 30, 20 and 10 per cent., class shooting. The next events will be divided Rose system, 5, 3, 2, 1. Event No. 10 is for the Houston Post trophy, emblematic of the team championship. This event is open to any two amateurs living in the same State, and is to be shot for once every year at the Sunny South Handicap. The trophies are now held by Messrs. France and Gardiner, of Houston, Texas. High amateur on this day will receive \$25; second high, \$15, and third high, \$10.

On the fifth day there will be five events at 20 targets, \$2.50 entrance, and \$25 added to each event. Money divided per cent. plan, 40, 30, 20 and 10 per cent., class shooting. The Sunny South Handicap, 100 targets, \$10 entrance, \$100 added. Handicaps 16 to 23yds., eight moneys, 25, 20, 15, 10, 10, 5, 5 per cent., class shooting. In addition to first money the winner will receive a beautiful trophy. This event is open to both amateurs and professionals. The balance of shooting is only open to amateurs. The Sunny South Handicap is counted for average. High amateur average on this day will receive \$25; second high, \$15, and third high, \$10.

On the sixth day there will be ten events at 20 targets, \$2.50 entrance, and \$25 added to each event. All shooting from 16yds. Money in first five events divided 40, 30, 20 and 10 per cent., class shooting. The last five will be divided Rose system, 5, 3, 2, 1. High amateur for the entire program will receive \$50; second high, \$25; third high, \$25; fourth high, \$15 and fifth high, \$10.

Targets will be thrown from 40 to 55yds.

## Marine and Field Club.

BROOKLYN, N. Y., Jan. 11.—Murky clouds and dripping atmosphere made shooting hard here to-day. C. D. Sayre decided two-thirds of the events, getting leg on monthly cup with 96 from a free start of 12. S. P. Hopkins with 8 gratis scalars, took second with 95, while E. H. Lott, shooting from scratch, made 91—some shooting under existing conditions. In take-home trophy, Lott from scratch got 24 and the event. Sayre slipped into place with 23, while P. R. Towne trotted along with 22 for the tail of the triple. Trophy shoot, scratch, Sayre slipped one over on the bunch, and, honestly, it shocked 'em some, by breaking straight. Hopkins and Towne smeared the fog with 24 each, while Brother Lott smashed only 23.

Only seven members were cut, but all of them shot remarkably well, considering the conditions.

Monthly cup, 100 targets, handicap:			
C D Sayre.....	12 96	P R Towne.....	8 90
S P Hopkins.....	8 95	J M Knox.....	18 87

E H Lott.....	23		

Chicago Gun Club.

CHICAGO, Ill., Jan. 1.—After a close and exciting race, Capt. May's team won from Capt. Fox's team by a margin of 18 targets. Both teams were evenly matched, and after all hands had shot at 30 targets the winners were only two targets in the lead, but Fox's men lost out in the wind up.

The splendid weather of to-day brought out a field of forty-three shooters, thirty of them participating in the team shoot, which was started at one o'clock, after captains Doc May and Fox had carefully chosen their men, and then "swapped" two men. Dave Thomas and Fred Bills were the two high individuals, each breaking 48 out of 50, and both were on the losing team. Kirkwood, with a score of 46 out of 50, was high on the winning team, while Ralph Kuss was a close second with 45. Harry Kahler and Stannard each scored 45 breaks, and F. Meisner tied Jay Graham for third place on their team with 43. The race proved to be very close in the first two frames, for at the finish of the first 15 targets the total scores were: Doc's team 173 to Fox's 171, and the finish of the second frame of 15 resulted in a total of 344 to 342, each team having scored the same number of "dead birds," viz.: 171. In the last frame of 20, Doc's team increased their lead, so that they were 18 targets to the good at the finish. Fox says he knows he had a team of winners, and the only way he can figure out their defeat is that Doc must have bribed some of the team, so he is going to have Phil Miller investigate the case just as soon as he gets through with the counterfeiter who Bob Seelig "tipped" him off to. The scores, 50 targets per man:

Table listing scores for other events. Columns include names and scores. Top scorers: F Cook 18 16 18, O P Goode 18 24, T H Lewis 16 21, O W Croker 15 18, W C Boltman 18 16, John Eck 22, A Moore 18 21, L B Clark 20 23, F W Belknap 19 20, F B Fox 18 20 9, H Hlavka 16 19, R Patterson 13 4, H Hollerman 20 19, T A Taggart 17, J F Pitts 12 16, P C Malley 11 15, H W Rockwell 7 14, Dr H W Gettles 15 11, Mrs Featherstone 15, H B Northcott 6.

Jan. 4.—Ten shooters came out to the club grounds today, several of them making fine scores. Fetherstone climbed up to the top of the ladder in the first club event, making 48 out of 50, Goode running a close second with 46, while Barto, Stannard and Graham each broke 45. In the second 50, Goode and Graham tied on 47 for first place, Stannard scored another 45, while Silver came in for third with 43. In the practice event at 15 targets Stannard and Graham broke them all, Goode, Fetherstone and Lynn each scoring 14. The scores:

Table listing scores for Jan 4 events. Columns include names and scores. Top scorers: J R Graham 15 45 47 19 19, Silver 42 43, Cannon 9 30, Fox 32.

Jan. 5.—The second monthly shoot of our club was shot under the most difficult weather conditions, as a gale of wind from the northeast drove the sleet (which came down all afternoon) directly into the faces of the shooters, many of them being unable to see the targets after calling for them.

A glance at the scores will show that high scores were out of the question, when 77 out of 100 won first place, and many of the marksmen who seldom get below 90 per cent, dropped to 70 per cent, and lower, the reader may well know that something was doing in the weather line. Kuss landed the top score of 77, while Silver was a close second with 76 from 16yds. Wm. Stout, who came from Burlington, Ia., with our good friend Breitenstein, landed third place with 75 out of 100. He says he will be back for our February shoot, and may bring some more of the Burlington shooters along. Kammerer was going along fine and looked to be the winner until the last frame, when the sleet got the best of him. The scores:

OFFICIAL SEASON'S AVERAGE WINNERS FOR THE 11th TIME

WINCHESTER

Shotgun Shells Show Their Superiority Again in 1912

FOR thirteen years the Season's averages of trap shooters have been recorded. Eleven years of the thirteen, the Season's High Average has been won with Winchester Loaded "Leader" or "Repeater" Shotgun Shells. The year 1912 was no exception, as the following shows:

W. R. CROSBY

Allen Heil of Allentown, Pa., won the Season's High Amateur Average on Single and Double Targets combined, and the Interstate Association Official Season's High Amateur Average on Double Targets, with Winchester Loaded "Leader" Shells.

W. R. Crosby, of O'Fallon, Ill., won the Interstate Association Official Season's High Professional Average on Single Targets, and the Season's High Professional Average on all targets shot in Registered Tournaments, with Winchester Loaded "Leader" Shells.

Fred Gilbert, of Spirit Lake, Ia., won the Interstate Association Official Season's Average on Double Targets, with Winchester Loaded "Leader" Shells.

Two 1910 Interstate Association Records That Beat 1955 x 2000

E. F. Forsgard won the Season's High Professional Average for all targets shot in tournaments Registered by the Interstate Association. He broke 4799 x 4895 targets, 98+ per cent.

Shooting in five consecutive tournaments Registered by the Interstate Association, he broke 2077 x 2100, 98.90 per cent.

Mr. Forsgard in all his shooting used Winchester "Leader" or "Repeater" Loaded Shells. His gun was a Winchester Repeater—not a double-barreled one of a make so "modern" that it is no longer manufactured.

For Records and Results Shoot W Shells and Guns

Smith Gun Club.

NEWARK, N. J., Jan. 11.—Smith Gun Club held their shoot over traps at Wiedemeyer's Park to-day. Hassinger got first with 47 out of 50. Sam Thornton and Louis Colquitt each smashed 45, and in the draw Thornton won out, giving him second place and Colquitt third. Fourth went to T. Compton, and Fifth to J. Thompson. The former broke 44 and the latter 43. Another tie was had in the scores of Dr. Moeller and J. Baldwin for sixth place. Each broke 42, and as in the previous case, it was decided by a drawing. Dr. Moeller pulled the lucky slip, giving him sixth, and Baldwin seventh.

Sweepstake shooting was indulged in both before and after the prize event. High gun honors for the afternoon were captured by L. Colquitt, who broke 189 out of a possible 200. J. Thompson, J. Baldwin and S. Thornton also made creditable scores. The following scores were made: R. Hensler 18, 20, 23, 39; W. Hassinger 21, 21, 23, 47; J. Weiler 20, 18, 21, 21, 36; John Kink 20, 21, 36; W. H. Dickenhorst 20, 15, 18, 17, 36; J. Thompson 18, 25, 25, 24, 43; L. Colquitt 24, 24, 25, 23, 24, 24, 45; Dr. Moeller 18, 19, 20, 42; F. Compton 24, 22, 44; F. Kusterer 18, 11, 25; J. Baldwin 19, 20, 23, 24, 24, 23, 42; John Erb 19, 18, 19, 30; H. Sindle 20, 21, 24, 40; J. Francisco 20, 21, 22, 38; S. Thornton 25, 24, 24, 45; L. Castle 34; H. Hassinger 37.

Essex Country Club.

ORANGE, N. J., Jan. 11.—L. H. Ross won three out of the four events here to-day. In two of the events he was tied with James A. Hart and won the shoot-off. Ross shot with a handicap of 6 in 25, while Hart was a scratch man. Sweepstakes was won by B. M. Shanley, Jr. The scores:

Table listing scores for A. O. Headley cup, 50 targets, handicap. Columns include names and scores. Top scorers: Shanley 0 45, Hart 0 40, Ross 12 49, A Brandt 4 44, Daly 0 41.

#### Spring Valley Shooting Association.

READING, Pa., Jan. 11.—In the third event, a miss-and-out, 5-bird limit, Lee Wertz, Fred Wertz and Eisenhour killed straight. The fast birds and cloudy day kept the shooters guessing. Harry Coldren, an old-timer at this game, fell shy.

The annual 20-bird handicap of the Spring Valley Shooting Association will be held on Saturday, Feb. 8. A large attendance is anticipated. For particulars address E. H. Adams, 1805 Perkiomen avenue, Reading, Pa.

Manager Charles Hass, of the Blandon Rod and Gun Club, announced a 15-bird handicap, entrance \$8 and \$9; 7-bird, \$4 entrance introductory on Saturday, Jan. 25, on the grounds of the Blandon Rod and Gun Club.

Harry Ball, E. H. Adams and W. S. Behm are scheduled to shoot at the Midwinter Handicap at Pinehurst, N. C., Jan. 22-25. Something doing, boys, when their old-time coacher, H. I. Melchior, has charge of this trio. Oh, gee, look at that "Hass-a-pepper." Walter says this is like kissing a pretty girl—the more you get the more you want. Scores:

Event No. 1, 12 live birds:					
Pruzman	28	11	Irwin	28	11
F Wertz	29	10	Ice	29	7
E Adams	30	11	F Wertz	29	9
W S Behm	29	11	O Melot	29	7
L Wertz	30	10	Marburger	29	10
H Wolf	29	9	Wentzel	28	9
H Coldren	30	6	Schmoyer	28	9
Haas	30	7			

Event No. 2, 10 live birds:					
Pruzman	28	7	O Melot	28	6
F Wertz	29	8	Fred Wertz	29	10
E Adams	30	7	Marburger	29	9
Behm	29	7	Ice	29	8
L Wertz	30	9	Coldren	30	8
H Wolf	29	6	Schmoyer	28	5

The first event, of 12 birds, was won by four ties of 11 kills each—Pruzman, Adams, Behm and Irwin. The second event of 10 birds was won by Fred Wertz, of Fleetwood, who killed straight. Lee Wertz and Marburger were second with 9 kills.

LUDDY.

#### Cincinnati Gun Club.

The team match, which was the feature of the weekly shoot on Jan. 12, was won by the team of the Northern Kentucky Gun Club, with a margin of 13 targets. Capt. G. W. Dameron, of the winning team, made high individual score, 93; Hammerschmidt, of the opposing team, being his nearest competitor, with 89. The Northerns took the lead in the first round at 20 targets, and increased their advantage in each round until the last 20, when the Cincinnati team beat them by 2 targets. The return match will be shot on the Northerns' ground as soon as the high water will permit.

W. R. Chamberlain, of Columbus, was among the visitors, and tied for second high score with R. L. Trimble, the local expert, on 91 in the regular events.

The flood prevented W. R. Randall, of Mason, a member of the Cincinnati team, from reaching the grounds, and his place was taken by Supt. Arthur Gambell. The latter was not in his best form, or the story might have had a different ending, at least the teams would have finished nearer together. Dameron shot well up to his usual gait, missing only one target in the last 60.

The new Westwood Gun Club was represented by J. Schneider, A. C. Kuball, M. Stopper and J. Nocheck, all of whom took part in several of the events, although they arrived at the grounds late in the afternoon. L. J. Squier, of Pittsburgh, was present, and shot through the program, but had luck in the first and last events kept his score below his usual mark. Back-water from the Licking River transformed the grounds into an island, and was still rising when the shooters left, being only about a foot below the planks of the bridge. The conditions were hard—poor light and cold—and this had its effect on many of the scores. Irwin has been doing much better work lately than he did to-day. Schreck has also been putting up scores in the 90 per cent. class of late, and was one of the four men to go straight in any one of the events to-day, but the targets were too rough for him in the last three events, and he dropped. A. Sundry, couldn't connect, as he did at Dayton on New Year's Day, and finished several targets below the mark that was expected of him.

Ballou	5	89	Munroe	16	75
Davis	8	89			

#### Eugene Gun Club.

EUGENE, Ore., Jan. 3.—To-day was very blustery and cold, some snow in the air, but ten of the boys would not be denied, and spent a very pleasant afternoon at the club grounds. Moulten was high man with 96 to his credit, which is sure going some, taking into consideration the weather conditions. After the regular 100 birds, Moulten and McCormack chose sides and shot for the supper which was won by the McCormack squad, although they finished in the dark.

At 7:30 this evening, pursuant to call, a meeting was held at the club rooms, and the Oregon State Sportsmen's Association was organized, and from the interest shown, there is no doubt but what it will be a success.

Dr. F. M. Day, of Eugene Gun Club, was chosen President; F. P. Tracey, of Albany Gun Club, Vice-President; E. A. Bean, of Eugene Gun Club, Secretary-treasurer. The Board of Directors are: M. Abraham, of Portland Gun Club; A. B. Weatherford, of Albany Gun Club; Wm. Beagle, of Ontario Gun Club; C. P. Murphy, of Baker Gun Club; Dr. E. R. Seely, of Medford Gun Club, and Ira Johnson, of Coquille Rod and Gun Club. Eugene was selected as the place for holding the first annual tournament, under the auspices of the Eugene Gun Club, and as the boys here have the reputation of doing things about right, every lover of the game can be assured of a good time. The dates will be announced later. To-day's score:

Moulten	96	Deierlin	82
Kompp	90	Holohan	81
McCormack	89	Cook	79
Seavey	89	Veatch	76
Bean	84	Smith	69

Team shoot:			
Mollen	21	McCormack	22
Holohan	23	Kompp	24
Seavey	23	Cook	24
Deierlin	18	Veatch	17
Smith	16—101	Bean	24—109

E. A. BEAN, Sec'y.

#### Stanley Gun Club.

**Fixtures.**

If you want your shoot to be announced here, send a notice like the following:

**REGISTERED TOURNAMENTS.**

- Jan. 22-25.—Pinehurst (N. C.) Country Club sixth annual Midwinter Handicap. Leonard Tufts, Pres.
- Feb. 22.—Birmingham (Ala.) G. C. tournament. O. L. Garl, Sec'y.
- April 8-10.—San Antonio, Tex.—The Interstate Association's Southwestern Handicap, under auspices of the San Antonio Gun Club; \$1,000 added money. Winner of first place in the Southwestern Handicap guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. E. E. Shaner, Mgr., Pittsburgh, Pa.
- May 27-29.—Fort Dodge, Ia.—Iowa State tournament, under auspices of the Fort Dodge Gun Club. Jos. Kautzky, Mgr.
- June 9-12.—Buffalo, N. Y.—N. Y. State Sportsmen's Association tournament. C. F. Lambert, Sec'y.
- July 8-13.—Cedar Point, O.—The Indians' tournament. D. H. Eaton, Sec'y, Cincinnati, O.
- Aug. 5-7.—Omaha, Neb.—The Interstate Association's eighth Western Handicap tournament, under auspices of the Omaha Gun Club; \$1,000 added money. Winner of first place in the Western Handicap guaranteed \$200 and trophy; winners of second and third places guaranteed \$150 and \$100 respectively. E. E. Shaner, Mgr., Pittsburgh, Pa.

**DRIVERS AND TWISTERS.**

C. F. Lambert, Secretary-Treasurer, writes: "The committee for arranging details in connection with the forthcoming tournament of the New York State Sportsmen's Association, to be held in Buffalo during the second week in June, next, held their first meeting recently, and the results cause the belief that visiting shooters on that occasion will be interested and entertained."

W. G. BEECROFT.

**Evanston Gun Club.**

CHICAGO, Ill., Jan. 9.—Nine shooters appeared at the traps of the Evanston Gun Club on Saturday, Jan. 4, and on account of a high wind high scores were out of the question. Scores:

Shot at. Broke		Shot at. Broke	
Kirkwood	50 36	Darby	50 30
Kennicott	50 41	Millen	25 19
Coleman	25 16	Gamble	50 5
Bristle	25 18	Van Petten	25 12
Phalen	50 28		

At the 20yd. line out of a possible 25, Kirkwood made 20, Kennicott 21, Coleman 18, Bristle 14, Phalen 14, Darby 14, Millen 13, and Gamble 14.

In doubles, out of a possible 24, Kirkwood made 15, Kennicott 13, Bristle 15, Phalen 11, Millen 12 and Van Petten 7.

On Sunday seventeen shooters took advantage of the day and made the following scores:

Shot at. Broke		Shot at. Broke	
Searle	50 16	Millen	75 51
Thwaite	75 46	Miller	50 29
Hanson	75 37	Scowley	50 28
Davis	50 26	Winkler	75 61
Van Petten	75 43	Watson	50 34
Langworthy	50 13	Kumfer	25 17
Kennicott	50 37	De Clercq	50 26
Gormley	50 17	Coleman	50 36
Carman	50 30		

At 20yds. the following scores were made from a possible 25: Kennicott 13, Millen 13, Scowley 13, Winkler 18 and Kumfer 14.

Two of the members shooting Sunday might have made better scores had they not been arrested while speeding to the grounds in their automobile. The Chief of Police was kind enough to allow them to continue to the traps upon their promise to appear in court the next day.

W. J. PHALEN, Sec'y-Treas.

**Team Matches.**

THE following conditions have been drawn up to govern the series of inter-club team matches between the Cincinnati Gun Club, N. C. R. Gun Club, of Dayton, Ohio, and Springfield (Ohio) Gun Club:

Three contests to be held at Cincinnati, Feb. 2; Dayton, Washington's Birthday, and Springfield, Decoration Day.

Each club will be allowed to enter fifteen men and select the ten best scores at each contest. The total scores in the three contests to decide the winning team.

Each contest will be at 100 targets per man, five events, twenty targets each.

Two cents will be charged for targets, and one cent for each target set aside, the total amount to be given the winning team at the final contest. A statement to be furnished each club at the conclusion of each contest as to the number of entries, etc.

Squads to be made up with a contestant from each team alternating.

Each club may arrange a program in connection with the team race.

Capable referees and scorers are to be furnished and the score kept in plain view of the shooters.

Copies to be given each club at the conclusion of each contest.

Professionals who are recognized as members of the competing club are not barred.

The  
**Perfect Smokeless Shotgun  
P O W D E R**  
EASY ON YOUR SHOULDER

SCHULTZE is increasing daily in popularity amongst field and trap shooters. Its very light recoil appeals to new shooters, and it is an aid to increasing their proficiency with the shotgun.

☛ Schultze Powder has the distinction of being a potent factor in making

**The 1912 Long Run Score**  
of 309 straight. This achievement by Chas. G. Spencer of St. Louis, Mo., is evidence that Schultze Powder retains the essential velocity, penetration and reliability which make every Du Pont Smokeless Powder so effective.

☛ Remember that the amateur long run record for 1910 of 426 straight was made by J. R. Graham with Schultze powder.

☛ All dealers sell Schultze loads. Try these and increase the pleasure derived from your shotgun.

**The Du Pont Gun Club.**

WILMINGTON, Del., Jan. 11.—Du Pont Gun Club was two years old to-day, and her anniversary party was attended by fifty-five of the elite from the powder burners' fraternity. Everybody who was anybody was there, and, en passant, we may make so bold as to mention that W. S. Colfax was present, dressed in his best shooting clothes. He missed only one target out of 150, making a run of 124—not bad for a foggy day. The usual class shoots were held.

The first prize in Class A was won by E. M. Daniels, who was high amateur, with a score of 94 out of 100. Second prize in this class went to William M. Foord, with 91 out of 100.

Victor du Pont was high in Class B, with 91 out of 100. Second, Stanley Tughton, 87 out of 100.

C. H. Simms was high in Class C with 85 out of 100; second, B. T. Stevens, 83.

D. L. Hoopes, Jr., won first in Class D with 82 out of 100; W. P. Jensen second, 79.

First in Class F was D. S. Wood, with 58 out of 100; second, C. H. Lambert, 50.

H. L. Worthington, from prodrom, eligible for wads only, was high man, his score, 96 out of 100, being the best made in the regular event.

The total number of targets thrown during the day was 7,000. Scores were:

Class A—Hammond 88, Edmanson 74, Richardson 90, E. E. du Pont 90, Carlon 87, Minnick 83, Lyon 84, Sloan 84, W. G. Wood 68, McHugh 88, Roberson 88, Foord 91, \*W. A. Joslyn 85, \*H. L. Worthington 96, \*E. A. W. Everett 83, \*J. T. Skelly 93, Daniels 94.

\*Not eligible for prizes.

Class B—Jarrell 81, Willis 83, Leedom 84, Turner 81, N. K. Smith 72, Coyne 73, Anderson, Jr., 73, Tomlinson 77, Winchester 84, W. B. Smith, Jr., 70, Victor du Pont 91, J. I. Magahern 85, S. Tughton 87, Dr. A. Patterson 80, G. R. Cleveland 80, M. F. Morris 85.

Class C—Dr. H. Betts 65, C. H. Simms 85, S. J. Newman 75, Mathewson 65, Highfield 70, Lord 65, Ewing 67, Stevens 83, W. L. Smith 68, Lofland 74, Springer 73.

Class D—Hoopes, Jr., 82, Jensen 79, Squires 76, King 73, Raymond 54.

Class E—Couson 81, D. S. Wood 58, Lambert 50.

### Meadow Springs Wins Shoot Off.

CAMDEN, N. J., Jan. 11.—The disputed Meadow Springs-Camden Shooting Association Trapsshooters' League match shot on Dec. 7 and won by the latter by 425 to 417, then ordered shot over again by the Board of Directors, was decided here today. Two men from each team shot the event, this being one less than those eligible. Meadow Springs won, Letford and Christman breaking 43 and 42, while Lippincott and Dungan broke 39 and 35.

The scores made by the Meadow Springs were higher than the two low men who made the team match on Dec. 7, while the totals registered by the two Camden men fell below the marks made by their lowest scorers on that day. This enabled Meadow Springs to add 9 targets to their total of 417, made in the December match, giving them 426, and as the Camden score of last month only amounted to 425, the West Philadelphians captured the match.

This causes a general shift in the standings of certain clubs in the league race. Meadow Springs has a point added to their total, giving them 5 scored to date, and increases their target breakage to 1313. Camden loses a point by going down to defeat, giving them a total of 3 scored, but their broken targets, 1241, remains the same, for they failed to better their score of last month by to-day's effort.

This ties Meadow Springs with Highland and Lansdale for second place and drops Camden to a tie with Clearview and Glen Willow for tail end position. The present standing follows:

	Points Scored.	Targets Broken.
Du Pont	6	1349
S. S. White	6	1338
Meadow Springs	5	1313
Lansdale	5	1271
Highland	5	1252
Clearview	3	1276
Camden	3	1276
Glen Willow	3	1170

### Independent Gun Club.

PHILADELPHIA, Pa., Jan. 11.—Howard Wilson, of Frankford, won the principal trophy at the Independent Gun Club monthly shoot over the Keystone traps at Holmesburg Junction to-day. On the main program, Wilson, Dr. F. W. Matthews, Betson, C. H. Newcomb, Thos. Tansey, Keenan, J. B. Fontaine and W. H. Mathews tied with full scores. In the first shoot-off Betson, Tansey and W. H. Mathews were eliminated, and on the second Keenan and Newcomb passed the bunch. The third eradicated Fontaine, leaving Wilson and F. W. Matthews to go to it. Wilson had a handicap of 1 1/4 targets, and Matthews 1. The race in the fog and settling dusk was balanced well. At the end of the 25 targets, each had broken 22, which gave the prize to Wilson on his handicap of 1/4 target.

The silver spoon for the best net went to Chas. H. Newcomb with 96, one better than Jesse Griffith, who won the runner-up dipper after being tied with Eyre. The spoon for Class B was captured by Benjamin Deist, while Edmund T. Rumble added another spoon to his collection of silver by getting booby prize in Class C.

In addition to the regular shoot, Isaac W. Budd put up a special trophy for a 50-target event to the shooter coming nearest to a score that was kept secret until the shoot was over. This proved to be 39, and

Harvey Wiley was the successful one by just making the necessary total.

Clarence Hand equaled the year's score with J. B. Fontaine by winning their dual race yesterday by just one bird, Fontaine having led his side at the last League shoot. It was quite some feat even to win by the single target, as Hand had to shoot from the 18yd. mark, while Fontaine stood at 16yds. Scores:

H. George, 16	8	86	Hineline, 19	4	85
Fontaine, 16	15	100	Hand, 18	4	92
Betson, 16	17	100	Apgar, 20	4	96
Davis, 16	16	97	Keenan, 16	22	100
Clegg, 17	14	93	Perry, 17	14	96
Tansey, 18	10	100	Eyre, 16	13	99
F. Matthews, 18	8	100	Deist, 16	25	90
Pratt, 18	8	89	Wiley, 16	12	97
W. Matthews, 18	9	100	Rumble, 16	25	73
Wilson, 17	9	100	Slear, 16	8	97
Newcomb, 20	4	100	Appleton, 17	12	99
Griffith, 20	4	99			

The scores made in the Budd trophy shoot, 50 targets, follow: H. George 38, C. Betson 42, Clegg 41, F. W. Matthews 47, W. H. Matthews 47, Newcomb 48, Hineline 42, Apgar 46, Perry 40, Deist 33, Rumble 23, Appleton 41, Fontaine 41, Davis 38, Tansey 48, Pratt 40, Wilson 46, Griffith 47, Hand 49, Keenan 45, Eyre 44, Wiley 93, Slear 46.

### Larchmont Y. C.

LARCHMONT, N. Y., Jan. 11.—A 30-mile-an-hour breeze makes an uneven cradle for clay saucers, so scores made here to-day are most creditable. Geo. W. Maxwell broke 123 out of 150. Billy Heer, H. D. Gibbs and C. Williams were other trade representatives present.

T. J. McCahill carried off the honors. He got the leg for the monthly cup with a full score of 25; also the special trophy match with 25, and the accumulation cup contest with another full score. Ralph L. Spotts was high gun in the 150-target scratch contest with 127 broken targets. B. M. Higginson, of the New York Athletic Club, broke 132, but this prize was for members only. Higginson was the winner of the 15-target scratch event, and he also captured the take-home trophy at 25 targets with a score of 22.

A Whiting won the visitors' trophy, after a shoot-off with Dr. L. Culver, and he also won the 100-target handicap match with a score of 93. The special take-home trophy was won by A. L. Bruns, and M. K. Waters carried off the 10-target scratch prize.

### Riverside Gun Club.

CHESTER, Pa., Jan. 11.—The Riverside Gun Club, of Essington, defeated the Chester Gun Club, of Chester, to-day over the Essington traps by 424 to 366. The scores:

Riverside.	Chester.
Bonsall	45
Fisher	45
Bowers	45
Hamlin	43
Doeling	42
Steller	42
Walber	42
Wiltbank	42
Harper	39
Eachus	39—424
Lord	44
Spackman	42
Coppie	41
Dehmer	37
Birney	36
Jansen	35
Harrison	34
Carter	33
Spear	32
Bostwick	32—366

### Crescent A. C.

BAY RIDGE, N. Y., Jan. 11.—J. F. James shot a great gun to-day, getting 92 out of 100 from scratch, which, under hazy conditions, was exceptionally good. In addition to take-home trophy, he tied W. W. Pell for Remsen cup. G. G. Stephenson, Jr., won committee cup with 45 from 6 graft rocks, and monthly cup with 24 from 3 handouts. C. R. James trophy limb was lopped off by F. S. Hyatt with 46 from a couple duly presented him. Two brilliants were present from the helping-hand firmament—R. O. Heikes, who broke 94, and E. S. Graham, an amateur when he won Olympic championship last year, now saying nice things for Hercules. Mr. Graham put the blinds on Rollo in two events. Mathematically calculated, this would be two-fifths of the day's events. Ed. hasn't got his professional cleats in the turf yet. The scores follow:

Committee cup, 50 targets, handicap:					
*R O Heikes	0	47	J F James	0	42
G G Stephenson, Jr.	6	45	*E S Graham	0	40
C R James	0	44	F S Hyatt	2	40
W W Pell	2	42	G Bingham	7	38

Take-home trophy, 100 targets, handicap:					
*R O Heikes	0	94	C R James	0	82
J F James	0	92	G Bingham	14	80
*E S Graham	0	87	W W Stake	10	59
F S Hyatt	4	86	C E Aldrich, Jr.	14	55
W W Pell	4	85			

Monthly cup, 25 targets, handicap:					
G G Stephenson, Jr.	3	24	W W Pell	1	21
*E S Graham	0	24	C R James	0	20
*R O Heikes	0	23	R C Williams	3	19
J F James	0	23	C E Aldrich, Jr.	7	18
F S Hyatt	1	23	W W Stake	5	14
George Bingham	7	21			

C. R. James trophy, 50 targets, handicap:					
F S Hyatt	2	46	*E S Graham	0	43
C R James	0	45	R C Williams	6	40
*R O Heikes	0	45	W W Pell	2	38
J F James	0	43	G Bingham	14	35
G G Stephenson, Jr.	6	41	W W Stake	10	27

Remsen trophy, 25 targets, handicap:					
W W Pell	1	23	F S Hyatt	1	21
J F James	0	23	*R O Heikes	0	20
C R James	0	22	G G Stephenson, Jr.	3	20
*E S Graham	0	21	G Bingham	7	20

### Indianapolis Gun Club.

INDIANAPOLIS, Ind., Jan. 4.—High wind and low temperature combined against the target breakers to-day. In the practice numbers, W. Hillis, of Greencastle, Ind., led and was strong in spots, getting two straights of 25 each and one of 15. In the trophy event, a shifting distance handicap, Lewis was high gun and is now in the lead. The scores follow:

Practice:

	Shot at.	Brk.		Shot at.	Brk.
W Hillis	170	151	Lewis	60	47
F Hillis	170	140	Hofer	60	44
Edmonson	130	110	Alig	60	41
Moller	130	109	Dixon	50	40
*Veitmeyer	100	79			

Du Pont fob, 550 targets:

Edmonson	34	Hofer	32
Moller	36	Alig	30
Lewis	37	Dixon	33

The following scores were made in practice on Dec. 28 at 100 targets:

*Veitmeyer	97	Alig	82
Dixon	90	Lewis	82
*Hymer	87	Neighbors	66

Jan. 12.—Edmonson, with 90 per cent. broken, was best in the practice to-day. Shooting for spoons, Lewis and Hofer, both at 18yds., tied, and in the shoot-off at 20 targets the former won, 19 to 18. The scores follow:

Practice, 50 targets: Edmonson 45, Moller 44, \*Veitmeyer 44, Hofer 41, Dickson 40, Lewis 38, Alig 36. Spoon event, 50 targets, distance handicap: Edmonson (20yds.) 39, Moller (20yds.) 40, \*Veitmeyer (20yds.) 42, Hofer (18yds.) 43, Dickson (20yds.) 38, Lewis (18yds.) 43, Alig (18yds.) 36. \*Professional.

### Birmingham Gun Club.

SEVEN shooters were at the weekly shoot of the Birmingham Gun Club, held Jan. 11. The wind was blowing very hard, consequently the scores are away below the average. J. C. Broyles made the remarkable score of 87 out of his 100 shot at in the gale of wind. Scores follow:

	Shot at, Broke		Shot at, Broke		
K T Lee	175	108	E M Cornwell	75	44
J C Broyles	100	87	O L Garl	50	36
John Lambeth	100	72	Mrs Garl	25	18
R H Baugh	75	55			

The day was an ideal one for trapshooting, except for a light wind. Our best shooters do not come out often during the winter so the scores are not a sample of the shooting that can be done by the Birmingham Gun Club regulars. T. K. Lee is a beginner at the trapshooting game, though a veteran with the rifle. H. Hamilton, the only professional present, was shooting away below his average. Scores:

	Shot at, Broke		Shot at, Broke		
T K Lee	100	72	O L Garl	60	53
H Hamilton	100	70	E M Cornwell	80	46
Mrs Garl	80	63	Ganes	20	10

O. L. GARL, Sec'y.

**Jersey City Gun Club.**

JERSEY CITY, N. J., Jan. 11.—Enclosed please find scores made at the Jersey City Gun Club to-day. Geo. Piercy won high average prize with a mark of 84 per cent, and in the silver spoon event Kearney showed good form, and after tying Lawton, won the shoot-off with two birds to spare. The day was fine for shooting, but the scores were only ordinary. Piercy, in addition to winning high average, also scored a straight 25, the only one made during the afternoon. The scores follow in strings of 25:

Targets:	25	25	25	25	25	25
Burlington .....	22	21	21	14	..	..
Engle .....	20	20	14	19	21	..
Lawton .....	10	15	18	17	14	..
Kearney .....	18	14	19	19	19	..
Hallinger .....	19	18	21	19	22	..
Piercy .....	16	23	25	22	20	21
Tewes .....	15	21	16	11	..	..
Hubbell .....	20	13	21	16	..	..
Summerfield .....	14	7	13	11	..	..
Kellinger .....	6	7	5	4	5	..
Dr. Ittner .....	6	6	..	..	..	..
Dixon .....	20	19	14	..	..	..
Jones .....	10	15	14	..	..	..

SECRETARY.

**Fox Logan Gun Club.**

PHILADELPHIA, Pa., Jan. 11.—The members of the Fox Logan Gun Club met to-day for their regular shoot over the traps. Among those present were Mrs. Moulton and Mrs. Blaise, both of whom shot well. Dr. Hutton took high gun. In the event at 12 pair of doubles, Dr. Hutton broke 21, while Gideon and Cox broke 19 each.

In the regular 50-target handicap, Class A spoon went to Dr. Hutton; Class B to Peden, and Class C to Moulton. Scores:

Fifty-target handicap: Smith (3) 43, Cox (3) 42, Hutton (0) 47, Gideon (0) 38, Dalberg (0) 38, Delaney (0) 37, Maracon (0) 33, Peden (0) 42, Blaise (0) 38, Beattie (0) 37, Gough (2) 27, Moulton (0) 39.

Special club event: Smith 20, Delaney 19, Maracon 17, Cox 20, Peden 21, Blaise 19, Mrs. Moulton 11, Mrs. Blaise 10, Davis 17.

Two events at 6 pairs each resulted as follows: Hutton 10, 11; Gideon 10, 9; Cox 9, 9; Blaise 5, 10; Moulton 6, 6.

**Monmouth Beach Gun Club.**

MONMOUTH BEACH, N. J., Jan. 8.—At the regular annual meeting of the Monmouth Beach Gun Club the following officers were elected for the ensuing year: President Frank M. Johnson; Vice-President, Percy A. White; Treasurer, Morgan Woolley; Secretary, Nicholas F. Woolley; Field Captain, Frank Horner. The following members were elected Trustees: Wm. Buxton, P. H. Sheridan and F. P. Kampf.

It was decided to hold regular meetings on the first Monday of each month and a weekly shoot on Saturdays at 2 o'clock. Visitors are welcome at all the club shoots, and special events will be arranged for at intervals throughout the season. A committee is now completing the arrangements for an entertainment and reception to be held in the near future, and a cordial invitation will be extended to all discerning sportsmen to attend.

A ways and means committee was appointed to get some action on a combination gun, ice and yacht club house, and will probably have a definite report to make at the next meeting.

**Eagle Gun Club.**

MANOA, Pa., Jan. 11.—Nolan, shooting from the 28yds. mark, ran straight in the weekly event of the Eagle Gun Club to-day. He grassed every one of his birds cleanly.

Seven miss-and-outs followed the 10-bird race and most of them ended in ties, the money being split between the high men. In the first Rose and Jackson tied with 1 kill apiece. In the second Nolan shared with Rose with 4 kills, and in the third the former split the coin with Coyle at 3 all. Miller and Walker split the fourth with 1 bird each and Jackson and Coyle the fifth with 5 in a row. Rose won the sixth with 3 grasses and the seventh was shared by Smith and Kirsch with 4 each. Scores:

Ten-bird event, handicap yards rise: Nolan (28) 10; Walker (28) 9; Brown (30) 9; Rose (28) 9; Black (28) 9; Hill (29) 8; Smith (28) 8; Kirsch (28) 8; Emerson (28) 8; Soley (28) 8.

**St. Thomas Gun Club.**

ROBERT D. EMSLIE, National League umpire, has been selected as President of the St. Thomas Gun Club, St. Thomas, Ont. Other officers are: Vice-President, George S. McCall; Captain, Robert Coffee; Treasurer, Dr. S. M. Lipsey; Manager, W. J. McCaone; Assistant Manager, E. H. Flach. The club has decided to hold another registered grand international shoot Dec 1 to 5, 1913, inclusive, and in the meantime the grounds will be greatly improved.

**Montclair Gun Club.**

MONTCLAIR, N. J., Jan. 11.—Four baked mud shatters went after 25 scalars each to-day in the weekly competition for fall trophy—leg seven. I. S. Crane sewed up the leg with a full from 4 sent him by the grace of the handicapping committee. H. F. Holloway, whose gratuity was 7, scored 23. Winslow from 6 made 21, and Findlay had 18 from 7.

# PARKER GUNS

**Wear Well, Shoot Well and Handle Well**

Wear well because they are made of the best material by the most skillful craftsmen.  
Shoot well because they hold the charge compactly together at extreme ranges.  
Handle well because the greatest attention has always been paid to the distribution of wood and metal, to insure perfect balance and the most symmetrical outline.  
Twenty-bore Parkers have set the pace for small bores in America, and are growing in popularity every year with the most progressive sportsmen.

# "6 Times 23 Years' Experience" Produced this Handsome New Gun

YOU will not look for conspicuous new "improvements" in the 1913 L. C. Smith Guns, because the 6 Hunter brothers' 23 years of invention, expert workmanship and concentration of purpose have improved the Smith Gun to the point where improvements cease to stand out against the background of "No Shortcomings."

But you will see a complete new set of designs, so handsome in engraving, embellishment and finish, that you will be delighted to the point of

ecstasy when you handle and examine them. And you'll wonder that the prices are not double.

Not new models—merely the regular L. C. Smith Guns beautifully re-designed and given names instead of numbers.

Call at your dealer's and see these handsome guns today. Or send for the new Book of Smith Guns showing all the 1913 new designs, at prices from \$25 net to \$1,500 list. If you put it off, you'll forget, so write for it now before you lay aside this magazine.

### Huntingdon Valley Gun Club.

JENKINTOWN, Pa., Jan. 10.—Four 25-target matches were on the program to-day. Good scores ruled:

Targets:	25	25	25	25
G Lovering .....	8 16	4 23	3 24	5 22
Morgan .....	8 16	5 20	3 24	5 19
Fox, Jr. ....	9 19	9 20	.. .	7 21
Rowland .....	8 20	7 21	5 18	8 20
Ross .....	10 22	.. .	3 24	8 24
Archer .....	2 23	.. .	1 24	.. .
Herron .....	5 19	.. .	.. .	7 18
Elkins, Jr. ....	3 25	.. .	4 25	6 23

### Paleface Shooting Association.

WELLINGTON, Mass., Jan. 11.—S. W. Putnam 3d was high gun in the 100-target practice shoot of the Palefaces to-day with 94. W. F. Clarke, of Roxbury, second with 93, including a run of 59, breaking 20 straight in the second and third rounds, and missing his last bird in the fourth. Dr. W. C. Newton, of Revere, trailed with 92. The scores: Wilder 94, \*Gil Wheeler 93, W. F. Clarke 93, Dr. Newton 92, C. Blinn 91, B. N. Burnes 91, C. F. Marden 91, Wiggs 84, Foster 83, Waters 80, Cassidy 79, J. Clarke 78, Reece 58.

\*Professional.

### Orange Gun Club.

ORANGE, N. J., Jan. 11.—Ernest von Lengerke, of Von Lengerke & Detmold, was high gun here to-day, shooting as an "amateur." Ernest does to the queen's taste what we all try to do—mix business with pleasure—and successfully keeps his weather eye open for an order for a gun "just like he uses." Three ten-bird

events brought out good scores, Mosler getting 27 in strings of 9; Dukes doing the same with 8, 9, 8; Wakeley 8, 9, 9; Mosler 9, 9, 9; Lockwood 10, 9, 7; Dukes 8, 10, 9; Perkins 7, 10, 8.

Von Lengerke took the 10-bird walking match with a straight, while in the two 25-bird events Wakeley made 24 and 22, which gave him high in the second and second in the first. Scores:

Walking match: Wakeley 4, Mosler 9, Lockwood 8, Dukes 9, Perkins 9, J. von Lengerke 3.

Two 25-target matches gave these results: Wakeley 24, 22; Mosler 20, 21; Lockwood 20, 21; Dukes 22, 21; Perkins 22, 22; E. von Lengerke 25, 20; J. von Lengerke 19, 21; Howe 23, 22; Kingsland 14, 18. Ties were not shot off.

### New Rochelle Y. C.

NEW ROCHELLE, N. Y., Jan. 12.—Visiting gunners were Messrs. Pelham, Offutt, Thompson, Moore, Griffith and Apgar. Targets were difficult, strong puffy wind all day, and during Olympic event a 60-mile gale and torrents of rain made the yachtmen feel glad that they were on terra firma instead of in their boats. On Saturday afternoon Granbery made a clean score of 25, and went on to 36 before missing; he also won the Saturday cup and a leg on the Olympic trophy. Considering the conditions on Jan. 12, the shooting was creditable. Thompson did the best work on singles, and Offutt with 17 out of 20 doubles, was easily high score. Donovan and Granbery are rounding into form. Scores of Jan. 11:

Event No. 1, 25 targets, handicap:

Granbery .....	0 19	Marsland .....	2 16
Stoddard .....	0 17	Eldredge .....	2 15
Black .....	2 17		

Event No. 2, Saturday cup, 25 targets, handicap:

Granbery .....	0 25	Marsland .....	2 18
Stoddard .....	0 19	Eldredge .....	2 16
Black .....	2 19		

Event No. 3, sweepstakes, 25 targets, handicap:

Granbery .....	0 21	Stoddard .....	0 17
Marsland .....	2 20	Eldredge .....	2 20
Black .....	2 16		

Event No. 4, sweepstakes, 25 targets, handicap:

Stoddard .....	0 22	Black .....	2 19
Granbery .....	0 20	Eldredge .....	2 16
Marsland .....	2 18		

Scores of Jan. 12:

Event No. 1, 10 targets, scratch: Donovan 7, Offutt 7, Pelham 8, Moore 5, Apgar 8, Thompson 8, Chandler 10, Molloy 6, Granbery 9.

Event No. 2, 15 targets, scratch: Thompson 15, Pelham 11, Offutt 9, Molloy 8, Apgar 14, Donovan 10, Chandler 9, Moore 11, Granbery 11, Stoddard 10.

Event No. 3, Du Pont trophy, 25 targets, handicap: Pelham 22, Apgar 21, Chandler (2) 19, Stoddard (1) 18, Moore 17, Offutt 22, Donovan 20, Granbery (1) 19, Eldredge (3) 17, Thompson 21, Krauss 20.

Event No. 4, Olympic trophy, 10 targets, scratch: Granbery 9, Moore 6, Stoddard 5, Donovan 6, Apgar 8, Krauss 7, Eldredge 4, Pelham 8, Chandler 7, Molloy 3.

Event No. 5, 10 pairs doubles, scratch: Offutt 17, Donovan 12, Chandler 9, Apgar 14, Pelham 9, Moore 8, Marsland 13, Stoddard 11, Eldredge 7.

Event No. 6, 25 targets, sweepstakes: Apgar 21, Thompson 15, Krauss 17, Donovan 19, Offutt 15, Chandler 14, Moore 18, Marsland 16.

Event No. 7, 25 targets, January cup: Griffith 22, Krauss 19, Chandler 17, Granbery 20, Marsland 18, Eldredge 15, Stoddard 19, Donovan 17, Molloy 13.

### Sportsmen's Show.

THE building of New York's yearly sportsmen's show at Madison Square Garden is going busily forward, and its "open season" will be the time for anglers, shooters, outdoors generally and guides to fraternize, tell of past performances and promise achievements for next season. The dates of the 1913 exhibition will be Feb. 27 to March 5, opening Thursday evening and closing the next Wednesday night. The action of the show will be led by trapshooting, in the third annual indoor international tournament. The conditions for smashing clay pigeons by electric light were improved last year over the 1911 tournament so greatly that the shooters have suggested no further improvements. In the basement school boys will have their annual rifle shooting competitions under the auspices, management and rules of the Public School Athletic League. There will be six individual matches and six team matches. Six city public high schools of New York and several from out-of-town besides private schools will be represented. For fine enthusiasm it would be hard to find an element that can surpass anglers who compete in fly- and bait-casting tournaments. The anglers will rally round the tank again, but in the coming show the artificial "stream" will be transposed to the northern balcony, where the indefatigable Waltonites may cast from eleven o'clock A. M. to eleven P. M. In the sportsmen's shows of the two previous years the tank was laid diagonally across the trapshooters' field, which was also used for many spectacular activities when the guns were not cracking and the waiting were patient and stoical, but only by a supreme effort.

The scenic phase of the two last shows will again be strong, but with new effects, and there will be guides, frontiersmen, cowboys, Indians, boy scouts and campers doing stunts whenever the shot is not flying across the field at the tall steel barrier. The owners of the new sportsmen's shows, since 1910—S. M. Van Allen, of Jamaica, L. I., and William J. Poth—are the managers of the Madison Square Garden, and they promise to produce an outing show that will do both owners and the historic Garden credit. "Steve" Van Allen is the inventor of indoor trapshooting by artificial light and for the third time will smile his satisfaction at the pessimists who prophesied that it would never work. The "gun houses," "loading companies" and powder companies have been convinced, because they are all coming into the show with contracts for an increased exhibition space.

# KENNEL

## Dog Show Dates, 1913.

Jan. 18.—Bulldog Breeders' Association, at Murray Hill Lyceum, Thirty-fourth street, New York city. A. D. Gillette, Sec'y.

 June 3-4.—Ladies' Kennel Association of America, at Mineola, L. I. James Mortimer, Supt.  
 April 18-19.—French Bulldog Club of America, at Hotel Astor, New York. O. F. Vedder, Sec'y.

## Starting the Beagle Puppies.

BY AMOS BURIHANS.

LIKE the Frenchman who vended flea powder and advised in applying it that first the flea be caught, I advise first getting a beagle that is worth the time and effort expended in training it. The first beagle I trained to follow rabbits was a large female of a size and conformation I afterward found to be nearly that of a foxhound. Not knowing the difference, and the hound doing better work at getting the rabbits out of the brush than the curs I had been using, I was tickled with the way she went at her business.

First, be sure you have a real beagle, one bred from working parentage, from eight months of age up, or if you are fortunate enough to possess a beagle matron that can and will hunt and she has presented you with a nice litter of puppies early in the year, they will be ready to start before this age, if hunted with their dam. You will have little trouble in getting a beagle started if you are located in a rabbit section. Bred right, they take to the work quickly. I start them as young as they will follow afield, teaching them that a light load of powder is just the thing they should be glad to hear. If a puppy is kept in the kennel or on chain, and strangers or other dogs are seldom about, and the pup is never taken out, you can expect it to grow up shy of the gun or any strange sounds that it may hear. Shoot about the kennels as much as possible with a small rifle. Especially do this if you are not located where you can take them afield a few times per week. Let them learn that when they see the gun, there is going to be some pleasant excitement for their particular benefit. From what I have learned from other breeders, there is a greater percentage of gun shy beagles than bird dogs. And once a Chesapeake breeder told me that it was a natural fault of all Chesaupes. How true this is I do not know.

As soon as beagle puppies want to run afield with you or with another dog, they will begin to get their noses to earth. A few rabbits thrown into the yard where they can mull them over and drag them about will hasten their appetite for scent. They will sooner know what they are after if this is practiced and refuse to pay attention to woodchucks, gophers and other var-

mints which they come across. When they know what they are hunting for, take them into a thicket or field where rabbits are abundant and slowly work along with the puppies until they get interested in a warm scent. When they start off on it, snuffling and puttering about, making the most out of what they smell, stand still and wait for them to flush the rabbit. Do not walk on and lose the puppies. If they get lost a few times, it won't be long before they will want to keep in sight of you, and will refuse to hunt independently. Nothing is more exasperating than to own a dog that will not get out and hunt away from one.

A dog puppy I knew of was taken afield at four months of age after he had been dragging dead rabbits about his yard for a month. His dam was taken along twice, the first trips the puppy ever made. He started a rabbit, and his mother harked in with him on the trail. He gave tongue for the first time, and when they turned the rabbit toward me, it hopped along in the grass where I shot it with a small rifle. Then the pair came up to it, and the pup seized the game. This was repeated three or four times the same afternoon. The following day the puppy was taken afield, and he went to work like an old dog when the thicket was reached. The sister of this pup broke her chain and made off in a field of high cane, started a rabbit, and late that night I had to saddle a horse and go after her, so persistently did she stay on the trail.

THAT every line printed in this magazine is carefully read is attested by the voluminous correspondence reaching the editor's desk.

## AN ARCHER'S CONFESSION OF FAITH.

Continued from page 82.

In its upward flight the velocity is decreased by thirty-two feet every second, due to the action of the force of gravity. In its downward motion there is a corresponding increase of velocity of thirty-two feet for every second of its fall. This rate of increase and decrease of velocity is called the acceleration of gravity, and is entirely independent of the weight of the arrow. In other words, a heavy arrow will fall no faster than a light one.

The velocity of the falling arrow at any point of its flight is equal to the product of the acceleration of gravity by the time elapsed, or  $v = at$ . Thus, if it takes eight seconds for an arrow to return to earth, its velocity on leaving the bow is  $32 \times 4$ , or 128 feet per second.

The height which the arrow reaches, when shot vertically upward, can be calculated with equal ease. This height is the product of one-half the acceleration of gravity by the square of the time elapsed, or  $space = 16 t^2$  feet. For the above arrow a height of  $16 \times 4 \times 4$ , or 256 feet would be reached.

The calculation of the greatest distance to which this arrow can be shot may also be of interest. The best elevation for a flight shot is slightly over 45 degrees. For that angle the arrow would fly over a horizontal distance equal to the square of its velocity divided by the ac-

celeration of gravity, or  $\frac{v^2}{32}$  feet. The arrow previously considered would therefore make a

flight shot of  $\frac{128 \times 128}{32} = 512$  feet.

This arrow shot at an elevation of 18 degrees would strike the gold of the 100-yard target in 2.465 seconds.

During that time gravity would pull the arrow down 97.3 feet. As the nock is generally held some five inches below the eye, this is equivalent to aiming some nine target diameters above the gold.

If, at the next shot, the arrow is held at the same elevation and perfectly released, but with a somewhat shorter draw, so that the arrow would take only .03 seconds longer to reach the target, the force of gravity during that short interval of time would draw the arrow down an extra 2.5 feet and produce a clean miss of the target.

Again, if an arrow is correctly drawn and aimed, but on release the nock is displaced slightly over one-fifth of an inch, the target will be missed.

These examples illustrate the uniformity and accuracy with which the various manipulations must be performed for record shooting, and explain why archery is the king of sports.

In closing I wish to submit a few general words of advice:

Do not attempt any distance above sixty yards during your first year of practice. Do not get discouraged and consequently careless. Shoot every arrow as if your very life depended on its success. If, on a certain day, everything goes wrong, lay aside your bow until you are again in the proper state of mind. Do not give up because some other archer is making more rapid progress than yourself.

Study your defects, contemplate your sins, correct your imperfections. Shoot with your head as well as with your hand and arm.

## Elk for Georgia.

In a recent interview, Jesse Mercer, State Game Warden of Georgia, said various Elk lodges has received with favor his suggestion that they contribute toward a fund for the purchase of a herd of elk to be placed on that portion of the government's Appalachian reservation which lies in Georgia.

He hopes within the next few weeks he can get the lodges to take formal action. He has been assured by the Federal authorities that the herd of elk would be welcomed, and that the government's reservation caretakers would look after the animals.

Mr. Mercer favors the purchase of a herd of about twenty elk and it is his opinion that within five years this herd would number 500. He says that the government bought the Appalachian reservation primarily for a timber reserve, but that it is preparing to afford protection to all kinds of game which may be found there.

**Breeding Fur-Bearing Animals.**

ACCORDING to the annual report of the Biological Survey, recently submitted to Secretary Wilson, the rearing of fur-bearing animals in the United States for their pelts continues to be a subject of much interest. Skunks, muskrats, mink, and foxes are bred in captivity or on preserves. The large prices asked for mature black foxes for breeding purposes have resulted in confining the industry in the hands of a very few. Comparatively few attempts have been made to raise mink in the United States, but experiments are being conducted in co-operation with the National Zoological Park, with a view to determining the

most successful methods of rearing these animals. Muskrat farming has probably reached its highest point of development on the Eastern Shore of Maryland. Muskrat marshes are worth more, measured by their actual income, than cultivated farms of like acreage in the same neighborhood. Only one other animal in the world, the European rabbit, exceeds the muskrat in the number of skins marketed.

This report also calls attention to experiments for the extermination of prairie dogs, ground squirrels, and gophers that are being conducted by means of poison baits, traps and other methods. Spotted-fever ticks in the two younger stages live almost wholly upon small native rodents, and the California ground squirrel has been infected with bubonic plague by fleas from rats. The danger that these dis-

eases may become endemic furnishes an additional important reason for the destruction of the animals.

The bureau reports that the antelope is in greater danger of extermination than any other kind of American big game; that there is great need for a suitable preserve in the antelope country.

The buffalo on the National bison range have now increased to eighty-one, or forty-four more than the original number three years ago.

There are fifty-six bird reservations, and additional inspectors and wardens have been appointed to care for them.

Every effort has been made to stop the sale of plumage of certain birds, gulls, terns, and especially herons.

MESSRS. HARPER & BROTHERS take pleasure in announcing the publication of a notable new novel,

# THE DRAGOMAN

The author of this book is an American

His name is

**GEORGE K. STILES**

This is his first novel.

Predictions are always hazardous, but the publishers of "The Dragoman" believe that this book has in it qualities which will make it one of the most talked of and successful novels of the new year.

It is a love story. The heroine is an American girl. The hero is a young Englishman. The scene is Egypt—not the Egypt of hotels and tourists, but the grim hinterland of the upper Nile, where strange things happen and few white men ever venture. The East and its mystery, the inner workings of international diplomacy, the mighty power of Mohammedanism, are all elements which make the story one of extraordinary and fascinating interest.

*Frontispiece. Post octavo. Cloth, \$1.30 net.*

## WOODROW WILSON'S Life of George Washington

A new illustrated edition at a popular price of this biography of our first President. In the perspective of American history—a perspective clearer, perhaps, to this writer than to any other—the period treated is especially significant, being the culmination of the Colonial era and the establishment of the republic on the firm basis of Constitutional law.

*Profusely illustrated by Howard Pyle, Harry Fenn and others.*

*Crown 8vo. Cloth. \$2.00 net.*

**HARPER & BROTHERS**

*For Sale.*

### GAME BIRDS

Hungarian Partridges, Quail, Ring-neck Pheasants, Wild Turkeys, Capercaillie, Black Game, Wild Ducks, Decoys, Beautiful Swans, Fancy Pheasants, Peafowl, Cranes, Storks, Ornamental Ducks and Geese.

*"Everything in the bird line from a Canary to an Ostrich."*

I am the oldest established and largest exclusive dealer in land and water birds in America, and have on hand the most extensive stock in the United States.

OJIBWAY GUIDE AND FAMILY IN TEMAGAMI FOREST RESERVE, NORTHERN ONTARIO

# THE OUTDOOR LIBRARY

THE following is a selected list of *Forest and Stream's* books which are most suited to the taste of men and women who are fond of outdoor life—Shooting, Fishing, Natural History, Camping, Canoeing, Yachting. A good book does not wear out, but continues to give pleasure.

Catalogue giving full list of books will be sent on application.

## American Duck Shooting.

By George Bird Grinnell. Cloth, 630 pages. With 58 portraits of North American Swans, Geese and Ducks, Plans of Boats and Batteries. Fifty Vignettes in the text, and a Chart of the topography of a duck's plumage. Price, \$3.50.

## American Game Bird Shooting.

By George Bird Grinnell. This companion volume to "American Duck Shooting" treats of the upland game which American sportsmen shoot over dogs—woodcock, snipe, all the quail, grouse and turkeys. The volume is illustrated by colored plates of ruffed grouse and quail, and 48 full-page portraits of different game birds and hunting scenes, with a number of cuts in the text. Cloth. About 575 pages. Price, \$3.50 net. Postage, 25 cents.

## My Sixty Years on the Plains, Trapping, Trading and Indian Fighting.

By W. T. Hamilton ("Bill" Hamilton). With 8 full-page illustrations by Chas. M. Russell. New York. Cloth. 223 pages. Price, \$1.50.

## American Big Game Hunting.

The Book of the Boone and Crockett Club. Editors: Theodore Roosevelt and George Bird Grinnell. Illustrated. Cloth, 345 pages. Price, \$2.50.

## Hunting in Many Lands.

The Book of the Boone and Crockett Club. Editors: Theodore Roosevelt and George Bird Grinnell. Vignette. Illustrated. Cloth, 448 pages. Price, \$2.50.

## Trail and Camp Fire.

The Book of the Boone and Crockett Club. Editors: George Bird Grinnell and Theodore Roosevelt. Illustrated. 353 pages. Price, \$2.50.

Like its predecessors, the present volume is devoted chiefly to the great game and the outdoor life of Northern America; yet it does not confine itself to any one land, though it is first of all a book about America, its game and its people.

## American Big Game in Its Haunts.

The Book of the Boone and Crockett Club for 1904. George Bird Grinnell, Editor. 490 pages and 46 full-page illustrations. Price, \$2.50.

This is the fourth, and by far the largest and handsomest of the Club's books. It opens with a sketch of Theodore Roosevelt, founder of the Boone and Crockett Club, and contains an extremely interesting article from his pen, descriptive of his visit to the Yellowstone Park in 1903. Other papers are on North American Big Game; Hunting in Alaska; The Kadiak Bear; Moose, Mountain Sheep; Game Refuges, and other big game topics.

## Camp Life in the Woods.

And the Tricks of Trapping and Trap Making. Containing hints on camp shelter, and all the tricks and bait receipts of the trapper, the use of the traps, with instructions for the capture of all fur-bearing animals. By W. Hamilton Gibson. Illustrated. Cloth, 360 pages. Price, \$1.00.

## Modern Training.

Handling and Kennel Management. By B. Waters. Illustrated. Cloth, 373 pages. Price, \$2.00.

This treatise is after the modern professional system of training. It combines the excellence of both the suasive and force systems of education, and contains an exhaustive description of the uses and abuses of the spike collar.

## Danvis Folks.

A continuation of "Uncle Lisha's Shop" and "Sam Lovel's Camps." By Rowland E. Robinson. 16mo. Price, \$1.25.

## Uncle Lisha's Outing.

A sequel to "Danvis Folks." By Rowland E. Robinson. Cloth. Price, \$1.25.

## A Hero of Ticonderoga.

By Rowland E. Robinson. Cloth, 187 pages. Portrait of author. Price, \$1.00.

## A Danvis Pioneer

A story of one of Ethan Allen's Green Mountain Boys. By Rowland E. Robinson. Cloth, 214 pages. Price, \$1.25.

## In the Louisiana Lowlands.

A sketch of plantation life, fishing and camping just after the Civil War; and other tales. By Fred Mather, author of "Men I Have Fished With," "Adirondack Fishes," and "Modern Fishculture in Salt and Fresh Water." With portrait of the author. Cloth. Price, \$1.50.

## Forest Runes.

Poems by George W. Sears ("Nessmuk"). With art-type portrait and autobiographical sketch of the author. Cloth, 208 pages. Price, \$1.50.

## The Angler's Workshop, Rod Making for Beginners.

By Perry D. Frazer. Cloth, 180 pages. Four full-page illustrations, sixty working drawings. Postpaid, \$1.00.

A complete, simple and thoroughly up-to-date work for the guidance of the amateur rod-maker, carrying him from first principles through all phases of successful rod making. There is no theorizing or speculation. All terms are simple, and all kinds of rods and woods are treated of.

## Modern Fishculture in Fresh and Salt Water.

By Fred Mather, author of "Men I Have Fished With," with a chapter on Whitefish Culture by Hon. Herschel Whitaker, and a chapter on the Pike-Perch by James Nevil. Illustrated. Price, \$2.00.

## My Angling Friends.

A second series of "Men I Have Fished With." By Fred Mather. Cloth, 369 pages, with 13 illustrations. Price, \$1.50.

## Rhymes of the Stream and Forest.

By Frank Merton Buckland. Cloth. Heavy laid paper. Sumptuously bound. Postpaid, \$1.25.

A charming collection of verse by an author who knows and loves nature well. A particularly pleasing gift for fishermen, closely simulating in form and ornamentation the standard fly-book.

## Jack the Young Ranchman;

Or a Boy's Adventures in the Rockies. By George Bird Grinnell. Illustrated. Cloth, 304 pages. Price, \$1.25.

## Jack Among the Indians;

Or a Boy's Summer on the Buffalo Plains. By George Bird Grinnell. Illustrated. Cloth, 301 pages. Price, \$1.25.

## Jack in the Rockies;

Or a Boy's Adventures with a Pack Train. By George Bird Grinnell. Illustrated. Cloth, 272 pages. Price, \$1.25.

## Jack the Young Canoeeman.

By George Bird Grinnell. Illustrated. 278 pages. Price, \$1.25.

## Jack the Young Trapper.

By George Bird Grinnell. Illustrated. Price, \$1.25.

## Jack the Young Explorer.

By George Bird Grinnell. Price, \$1.25.

## Men I have Fished With.

Sketches of character and incident with rod and gun from childhood to manhood; from the killing of little fishes and birds to a buffalo hunt. By Fred Mather. Illustrated. Price, \$1.50.

It was a happy thought that prompted Mr. Fred Mather to write of his fishing companions. The chapters were received with a warm welcome at the beginning and have been of sustained interest. The "Men I Have Fished With" was among the most popular series of papers ever presented to FOREST AND STREAM readers.

## Houseboats and Houseboating.

By Albert Bradlee Hunt. The book contains forty specially prepared articles by owners and designers of well-known houseboats, and is beautifully illustrated with nearly 200 line and half-tone reproductions of plans and exteriors and interiors. A most interesting chapter is devoted to houseboating in England. Extra heavy paper, backram. The price is \$3.00 net. Postage, 34 cents.

## The Art of Shooting.

An illustrated treatise on the art of shooting. By Charles Lancaster. Illustrated. Cloth. Price, \$1.25.

## Gas Engines and Launches.

By Francis K. Grain. A few pages are devoted to launches in general, with some excellent advice to the prospective owner of a motor boat; but the author's attention is given chiefly to explaining the principles, working and practical handling of the marine motor for the amateur, who does not care to trouble his head with involved technical information. Cloth. Illustrated. 128 pages. Postpaid, \$1.25.

## How to Build a Launch from Plans.

By Charles G. Davis. A thoroughly practical guide for the amateur. Shorn of all blind technicalities, it considers displacement, good construction and faulty stability, setting up the keel, framing and planking, with careful explanations. Each step is followed up to the care and running of the gas engine. Cloth, 9 folding drawings, 8 full-page plates, 40 smaller diagrams, 170 pages. Postpaid, \$1.50.

## Fetch and Carry.

By B. Waters. Tells minutely of the methods by which a dog, young or old, willing or unwilling, may be taught to retrieve either by force or "natural" system. Cloth. Illustrated. 124 pages. Postpaid, \$1.00.

## Nursing vs. Dosing.

By S. T. Hammond. A most practical book for the dog fancier, based largely on Mr. Hammond's observation that dogs, and particularly house dogs, suffer from too much medicine. Contents—Nursing, Cleanliness, Diet, Other Foods, Kennel and Exercise, Common Ailments, Diarrhea, Convulsions, Epilepsy, Distemper, Eczema, Need of Proper Care, Stomach, Vermin, Ear, Mange, Nervous System, Colic, Worms. Cloth. Illustrated. 161 pages. Postpaid, \$1.00.

## Training vs. Breaking.

Or Practical Dog Training. By S. T. Hammond. The author tells how to bring out the wonderful intelligence of the dog by kindness, as opposed to force. A clear, explicit work, which will appeal to dog lovers. Contents—First Lessons, Charge, Canine Accomplishments, The Whistle, Quartering, Retrieving, In the Field, Working in Company, Raising Puppies, Training Pet Dogs, Conclusion. Cloth. Illustrated. Postpaid, \$1.00.

## Training the Hunting Dog for the Field and Field Trials.

By B. Waters. Probably the most comprehensive work on the subject written, covers every phase of training and field trial preparation with reasons. Kennel Management, Breeding, Kenneling, Points of Judging. It is a work well calculated to enable the amateur to become a successful breeder and trainer. Cloth. Illustrated. Postpaid, \$1.50.

## Woodcraft.

By Nessmuk. No better or more delightful book for the help and guidance of those who go into the wild for sport or recreation was ever written. No one ever knew the woods better than Nessmuk or succeeded in putting so much valuable information into the same compass. Camp equipment, camp making, the personal kit, camp fires, shelters, bedding, fishing, cooking, and a thousand and one kindred topics are considered. Beyond this, the book has a quaint charm all its own. Cloth. Illustrated. 160 pages. Postpaid, \$1.00.

## Log Cabins and Cottages.

By William S. Wicks. This book covers building for the woods from the simplest shelter to the most elaborate cottage, cabin or house, and their furnishing and fitting. The details and directions are at once simple and comprehensive, and the illustrations are numerous and illuminative. Cloth. Illustrated. 44 full-page plates and numerous text illustrations. Postpaid, \$1.50.

## My Friend the Partridge.

By S. T. Hammond. A delightful reminder of crisp autumnal days in the covers. It tells of sport with the noblest of game birds, the habits and habitat of the ruffed grouse, with just the right touch of reminiscence and personal experience. Cloth. Illustrated, 150 pages. Postpaid, \$1.00.

FOREST AND STREAM PUBLISHING CO., 127 Franklin St., New York

**Wild Geese in Louisiana.**

FROM the time that the earliest settler first reached the shores of Louisiana this State has been famed as a feeding ground for innumerable wildfowl. Each fall countless thousands of ducks and geese, to say nothing of the waders and long bills, come out of the north and spend the winter in the marshes and on the prairies of the Delta State.

But of all these thousands of birds, scarcely any remain within the borders of the State to nest and rear their young. A few varieties of ducks, such as the wood duck or brancheur, the Florida duck or canard des isles, an occasional pair of teal—that is about all. As for geese, at the earliest sign of spring these big fellows start for the far North and select the wildest and most inaccessible portions of this as the most suitable location for their summer homes.

Not until the past season, it is believed, have a pair of Canada geese ever been known to rear young in Louisiana.

About two years ago a sportsman living in West Feliciana while hunting in the marshes near the Mississippi River shot and slightly wounded a pair, male and female, of wild Canada geese. Seeing that the wounds were very slight and would not permanently injure the birds, except to prevent them from flying, he took them home and placed them in his barnyard.

As time passed the birds completely recovered from their injuries, became quite tame and associated with the other domestic fowl. They were novel pets, and were kept and fed for this reason.

Winter passed and with the coming of spring the instinct to go North, mate and rear a brood of downy goslings took possession of the birds and they would have carried out their desire had it not been for the fact that neither could fly.

This being the case, they did the best they could, and mated and produced their brood where they were, probably a thousand miles further south than they would under ordinary circumstances have remained.

The young birds thrived and grew and the flock, now numbering five, was the pride of its owner. Then came tragedy in the shape of a hungry dog, which happening to catch the mother goose on land one day ran her down and killed her and was in turn killed by the owner for its murderous propensities.

The damage it seemed was irreparable, for no other wild goose could be secured as a mate for the old gander. With the advent of spring, however, the old fellow solved the problem for all by mating with one of the tame geese on the farm and from this mating was produced a hybrid, a pale edition of the wild stock.

The old gander, the three young birds and the hybrid are now alive and well, according to the owner, who intends trying a number of experiments in mating with the rare stock that he possesses as a result of two lucky shots.—New Orleans Times-Democrat.

**Municipal Forest Growing.**

It is a rather novel experiment for a municipality to go into the forestry business on a large scale as Montpelier proposes to do by planting seedlings on thirty acres of land about Berlin Pond; but it is likely to turn out as a profitable investment, given time.

The initial cost of the experiment, the land being at the municipality's disposal, is not great and the care of the growing trees will not impose any greater outlay, the trees really taking care of themselves; but the results in the reforested area will be entirely out of proportion to such combined expense, for timber is valuable now and is bound to be more valuable by the time these trees have reached a sufficient size.

Therefore Montpelier will realize good returns on the experiment and at the same time it will be utilizing land which otherwise would

lie idle or grow up to useless accumulations of plant life. Moreover the example which the municipality is setting may be of value in that it will encourage the reforestation of other tracts of land in the vicinity.

Other Vermont communities which have idle land would find it a good investment to set out seedlings now and let nature work for them in growing trees. Such efforts would counteract in part the devastation of the forests which is constantly going on in Vermont.—Barre Times.

**Irish Rain and Game.**

It is frequently said that Ireland will never be able to equal England and Scotland for

game, because of its heavy rainfall, but it is doubtful if that exercises any adverse influence. At all times of the year the rain in Ireland is beautifully soft and warm, and those marrow-chilling falls so often experienced elsewhere never occur. Most of the soil, too, is very porous, and water does not easily accumulate on the surface, except in a low-lying district. The Irish peasant has the greatest contempt for rain, and is to be seen working placidly in the fields on a thoroughly wet day, which would send his English confrere home in an hour. Irish game birds treat wet weather just about the same, and seldom seek shelter as birds on this side of the Channel do. In Ireland cold is seldom added to the discomfort of wet.—Shooting Times.

## In East Africa for American Museum Natural History

By DR. WILLIAM S. RAINSFORD

**W**E who live in lands where civilization has gradually developed, where science has been the handmaid and helper for generations of the adventures, cannot easily realize its newness, the unexpectedness of the dangers and difficulties that confront those who thrust their way and fortune among regions where science is quite unknown; where no civilized or even semi-civilized people have ever developed the country or themselves.

East Africa of all regions on earth has been till very lately the least known, the least affected by European life. It stands to reason

that if there still remain any large mammals unknown to our zoologists, they must be found in such a land, and this is what has happened in British East Africa.

Three of such animals there are. Just now, Nov. 29, 1912, a report says there is a fourth, and two certainly, viz.: the giant pig and the bergo have been found here.

Just lately, I say, persistent reports of a fourth new mammal have been coming in. But so strange, so unlikely are these reports, that it is hard to give much importance to them. A quite new and large savage beast is declared to

exist among the woodlands reserved for the Naudi tribe to the southwestward of Kewasin Gisher plateau. These natives have constantly spoken of such a beast. Its name among them, as nearly as I can get it, is chemosit. It is supposed to have the general appearance of a bear, with a wolf's head. Now, unconfirmed native reports of living things, possible and impossible, we all give little heed to, but several white settlers in the last four years declare they have seen such an animal, and now a few weeks ago one of them states that he has shot one and has taken the skin.

CAPTIVE AND CAPTORS.  
Photograph by Edwin Pinches.

I shall make a point of visiting this man (a Dutchman) on my way back to the railroad, and if I can find any reliable evidence of the new beast's existence, I will report the result of my inquiries to FOREST AND STREAM.

The East African tribes, so far as I can learn, unless when and in so far as they have been touched by Mohammedanism or Christianity, have no belief in either a supreme being or any spirit life. Death for them ends one brief all. A modified belief in witches and witchery generally prevails. It does not take as important a place in their lives as it seems to have done among other African peoples.

Occasionally, and as a very extreme measure, they will put a witch to death or force them to undergo (even as our own forefathers of the seventeenth century did) an ordeal that amounts practically to death. They are apt to follow the old Bible law which said: "Thou shalt not suffer a witch to live."

Lately I camped by the borders of a bewitched lake, and one page at least of its unwritten story is curious and tragic enough. It is clear for an African lake and deep. A narrow margin of weed and sedge extended a few feet from the shore. There are always wildfowl on it, but I could discover no sign of fish life. Its height above the sea, over 8000 feet, forbids the possibility of crocodile. The natives assert positively that no one can swim in it and live.

Just before my visit, a civil officer, in charge of a large gang of natives, working on the Government road nearby, had witnessed a strange tragedy. He told me that a Dutchman with his wagon and "boys" had camped nearby. The Dutchman shot a duck, which fell some way out in the clear water beyond the weeds. He sent in his Kavorondo boy, who was a good swimmer, to get it. The lad had no difficulty in passing the weedy margin, and immediately struck out in the clear water. Just before reaching the duck, he gave one shrill cry, threw up his hands, and went down. Of course there was no boat. The wood growing near the shore was too heavy to make a raft. No one could rescue him, nor retrieve the body. Next day it floated. None dare swim out to it, and a couple of rifle shots insured its only burial. This was the third man who had perished under almost similar circumstances in a short time in that lake. Small wonder that the natives firmly believe that lake bewitched. Mr. ——— told me that he had been many years in Africa and had seen some strange things, but none stranger than this.

Returning to the country after four years' absence, I found, as I expected, a great change and diminution in its wild life. Great sections of the country where the soil is good and where game was therefore most abundant have been allotted to settlers, and though as yet but a small proportion of these are actually dwelling on their properties, the possession of the game has passed naturally with the land. Settlers, too, can buy game licenses at a reasonably low figure, and it is before the advent of the settler, not of the sportsman, that the wild life goes. It must be so; it should be so. It was so in our own Western land. Some animals, such as buffalo, waterbuck and bushbuck, carry hides that are of considerable value for ox and horse harness and command locally quite a high price. Naturally these go first. Then the lesser buck, such as oraby, steinbuck, dinkebuck, supply the strug-

gling new arrival with the only meat that is reasonably good. (No wild meat in Africa is really good, but strangely enough the halfbreed mutton, now being raised, is quite delicious.) So the small buck go, too. Lions are doomed when land is thrown open for settlement. They are too dangerous and too destructive. The settlers' dogs rob their chase of most of its peril, and a poisoned carcass may make away with a dozen. Still even now there are a good many lions left. Between the first of last January (1912) and Oct. 1 of the same year, one man had shot eleven on a farm I camped at, and still one night while there I heard lions grunting at three different points within, say, three miles, and I shot two in the immediate neighborhood myself. My friend, the farmer, had three fine oxen taken from his very tent door, and he struck on a method of shooting the thieves which, I think, is original so much so that I fancy few will care to follow his example. When he knew by the bellowing of his oxen in the kraal that a lion was at his door, he "induced" his wretched tent boy to come outside with him; he with his rifle, the boy with a lamp held high on his head. Together they moved round the place in the pitchy darkness, till by the raised lamp light he could make out the lion's eyes shining. He shot, he told me, about eighteen inches below these, and then went back to his tent. Naturally, he did not push matters any further just then. The readers of FOREST AND STREAM will, I think, agree with me when I say few men would have the nerve to push them so far. On none of the three occasions had the lion gone further than one hundred yards. He found them dead in the morning. Incidentally this man was guarding another man's oxen.

Man-eating lions are fortunately rare, but have sometimes to be reckoned with. Last year the Government road from Meru to Neri, one of the chief roads near Nairobi, was closed to traffic for several months by man-eating lions. Accurate details of native losses are almost impossible to get. The natives themselves are curiously silent when one of their own people is carried off. Certainly many lives were lost, and one of these lions was shot by a friend of mine as he charged full into his marching safari without any warning or the slightest provocation about 9 o'clock one fine morning. But that is another story, to be told in another letter.

### Liked Our Dec. 28th Number.

MINNEAPOLIS, Minn., Jan. 4.—*Editor Forest and Stream:* I especially compliment you on your last number. It was excellent, and way and far above anything published in the outdoor literature world. And believe me, to eke out a compliment from me you have to "go some." By the way, this story form of outdoor nature is most appealing; for instance, Burhans' Christmas Turkey Hunt, and the one by Travis in the last number on Shark.

You will hear quite a bit from me this coming year.

ROBERT PAGE LINCOLN.

FOREST AND STREAM is as characteristic as is the first robin that raises his voice in the spring.

## THE TOP RAIL.

JO CURTIS, who owned land on which there was good shooting, decided to let it out by the day to whatever sportsman happened to come his way. One day a party arrived and paid a day's hire. They tried to persuade the farmer to accompany them, but he noticed the way they held their guns, and declined. Instead, he gave them dogs and ferrets, told them where to find birds and rabbits, and bade them have a good day's sport.

There was an ample amount of banging as the day wore on, and in the afternoon one of the gunners returned to the farmhouse.

"Hello!" said the farmer; "shot all the birds?"

"Er—n-no," hesitatingly replied the sportsman.

"Been goin' fer the rabbits, eh? Any luck?"

"Not exactly," said the other.

"What have you come back for, then?"

"Er—well, we want to know if you can let us have some more dogs and ferrets; we've used them all up."

\* \* \*

BILL TIGER, Bruce Thistle and John Holdback are being congratulated by their fellow members of the Cheese Box Club, of Irvington, N. J., for introducing a new stunt in hunting. On a former hunting trip this trio saw several English pheasants feeding near a cow, so when they arrived at Denmark recently they paid a dollar to a farmer for the loan of a bell that was attached to a cow's neck, and fastening it on to John, the others started him off into the woods, hoping that the pheasants would hear the familiar sound and gather around. The scheme worked fine. The first pheasant to answer the decoy was so riddled with shot it looked as though it had passed through the gears of a trolley car. Emboldened by their success, John ran round and round in a circle, and before he dropped from exhaustion, three fine birds were killed. So true was the aim of Thistle and Tiger that not one of the birds was a fit subject for the taxidermist when they were picked up. They are going to try it again next season, but John refuses to play the cow.

\* \* \*

M. H. BOALS, eighty years of age, a pioneer hunter of Alton, made his annual duck hunting trip up the Illinois River this year, thus keeping alive the traditions of the Blue Grass Hunting Club of Alton. This club was organized sixty years ago and was famous among the nimrods of a preceding generation. There are but two surviving members, the other in addition to Boals being T. B. Geran, of Middletown, Ohio, now in his ninety-second year, and who has laid aside the gun and fishing rod forever.

GRIZZLY KING.

# The Tenants of the Iron Barrier

By ROBERT PAGE LINCOLN

(Concluded from last week.)

THE length and height of the dam depends entirely upon the width of the stream. Some dams have been noted as high as eight feet and up to 150 feet in length, but there are some a good deal shorter than this and not so high. When the dam is built it is noticed that the water forms an even flow over the top and just of such a height that it will drop over easily without force or wear. A sentinel is stationed at a commanding point to warn his working kindred of the approach of a dangerous element either in the shape of brute or human. The beaver sense of smell is very much developed, and this feature aids him greatly in telling if there are others present in the neighborhood.

When the dam has been built the beaver sets about putting in his winter's supply of food. In the main this food consists of the bark of tender young saplings and twigs, although the inner fiber of the wood is also consumed. In the winter time, however, most of this food is the bark of willows, poplar, birch, aspen, alder, ash, hazel and hemlock and various others, all depending upon what varieties may be found in the immediate vicinity of the dam. These shoots are cut up into certain lengths and conveyed to the deadwater, where they are stored for the winter's consumption. When the winter has set in and the stream is frozen, the beaver is perfectly safe from the clash of the elements, and nothing breaks in upon him in his subterranean retreats. There is the dense gloom of the dry chamber in which the family is content. The monotony does not seem to be realized, and between eating, sleeping and swimming they have a gay time indeed, making a hundred journeys a day to the food bed in the deadwater and dragging into the house a stick to eat on. When these sticks have been thoroughly shaved of their bark, they are carried to a place alongside of the dam, where they are utilized in time of need in repairing the structure. Such an emergency as a breakage in the dam, the beavers are well fitted to meet, and then as by an unknown call all are out and busy, dragging in wood and carrying in mud and clay to keep this in place. With the constant wear of the water upon their work it can readily be recognized that it is a tedious task indeed, and often very discouraging, but they never leave it go unfinished. I have taken the liberty of setting down the "observations" of one Dr. William Allen who published a private book, evidently for his friends alone, and which I am told by relatives never got beyond eighty copies. The name of the book is "Twenty Years in the Rockies," and seems to me to be more or less of a "story" all through from beginning to end. The following extract does not lead us to have much hope on other statements contained in the book:

"The stream at this point was a series of little lakes, and about 200 yards below I could hear the triphammer and piledriver thumping away as each beaver's tail came down on the new construction. I was soon near the dam, but could get no satisfactory point of observa-

tion. A few yards ahead of me stood a box elder tree, and I began to crawl toward this as carefully as if I were stalking a band of deer. The bushes and willows covered my approach and presently I was among the branches. Carefully I peered from out the green foliage. What a sight met my gaze! Seventy or eighty beavers were working in broad daylight, and as though they feared none of God's creatures. I took a careful survey of the country for Indians, saw that my horse and gun were within easy reach, and dismissed all fears. I was eager to give my entire attention to what I had often sought after, but never had had the pleasure of seeing until now. The dam was nearly one hundred yards long, about six feet wide at the bottom and narrowed to two feet at the top. It comprised stones, logs and willow branches packed together so firmly that it was impossible to dislodge any portion of the structure. I first sought to divide the workmen according to their respective duties. The most prominent figure was that of an old beaver, gray with age and of enormous size, whose function seemed to be that of general supervisor, for he sat apart on a sandbar.

"My attention was next attracted to some very large, strong beavers which placed in position material brought forward by others. I begrudged the occasional glances which I was compelled to give to satisfy me that no Indians were approaching. I was curious to know how these hod carriers, who came forward with their tails loaded down with mortar obtained their load. The master mechanics with their tails beat this mortar into position. I peered a little

further over the boughs and saw that down below the dam close to the original creek bank where some water was creeping forth was the mortar trough. Some beavers were engaged in mixing this sticky clay and placing it on other beavers' tails who in turn went straight to the dam with it. I could scarcely remain silent when I saw this proceeding, for how this mud was moved had always been a mystery to me, as it takes tons of it to make a dam. I beheld with delight even the youngest beavers coming with long willow twigs in their mouths to lay beside the masters. These in turn took them, cut them in pieces and stuck them down by rearing upon their hind feet, holding the twigs fast in their teeth while pushing them firmly into the dam. As soon as the mortar was taken from the hod carriers, it was stamped solidly into position by the tails of the workers. Such precision and orderly work I have never seen carried out, except by the bees and the red ants of the plains. I noticed two or three times that the youngsters had a disposition to play between loads. The masters would then thrust out their necks and show their teeth. This would cause them to scamper back to work.

"In my delight and curiosity I pressed far and further out on a small limb and suddenly it broke, letting me down noisily. The superintendent beaver upon hearing the sound jumped into the water and gave one stroke of his tail which sounded all over the series of dams, and instantly every beaver had disappeared and dead silence reigned. My horse was still cutting grass without fear or excitement, so I slid to the

"THESE SHOOTS ARE CONVEYED TO THE DEADWATER."

# Hunting Emus

By AUSTRALIS

OUR station (ranch) in Australia was situated away in the west of the State of New South Wales, about 200 miles from the nearest town. It was in the heart of what we call the bush—the wild open and unsettled plains. The station itself covered some 300,000 acres, and it in turn was surrounded by other stations, some larger and some smaller. The paddocks were huge affairs, being usually four miles long by eight broad. Most of the country was covered with small trees and scrub, nowhere too thick to ride through, though often you had to ride slowly. Naturally this sort of country being in its wild native state, and few people bothering to trouble the animals and birds, was full of game. Our station had a couple of creeks running through it and a large lake (about 800 acres) of fresh water. It was, therefore, the home of countless kangaroos and emus.

The emu is a very large bird, ranking next to and much resembling the ostrich. Fortunately for itself, however, it has no valuable feathers. Instead it carries a dense brown covering of what at a distance looks like thatch. It is really a coarse sort of fibrous feather. If the skin be

completely removed and dressed with the feathers on, it makes a fair mat, something like a sheepskin. But it is nothing to rave over. Nobody thinks of making his living at emu hunting. At the same time hunting emus is very good sport. It needs a good horse and a couple of good fleet dogs. The emu of course cannot fly. He has a pair of stubby wings which he spreads out while he is running, but I do not think they are of much assistance to him. But if he cannot fly, he can run to some purpose. Nothing slower than a greyhound or deerhound has any chance of catching him. Although a harmless bird, he is an awkward customer to handle, especially to one not used to him, and the dog on his first introduction usually get the worst of it. I had a very speedy little greyhound sent up to me from the South. I took her out one afternoon and sent her after a big cock emu. She soon caught up to him and jumped at his side in an endeavor to bring him down. The result was first a mouthful of feathers that half choked her, and second a kick in the side that sent her reeling and howling twenty feet away. She picked herself up and limped back to me, cough-

ing up feathers and evidently wondering what she had struck.

The kick of an emu is like that of a horse. If the kick catches the dog fairly, it often kills him, and I have seen a man get his arm broken with one. Also the emu has a tricky habit of reaching forward with his leg and sweeping you with his claw. I remember one day finding an emu caught in a wire fence. I got him out after some trouble, and he was half suffocated before I finished. I was holding him by the neck, just behind the head, when there was a "swish." It was the emu's leg shooting out. It just missed my head, but caught the sleeve of my coat and ripped it to the shoulder. I let go at once and the bird was off at full speed.

A trained dog never grabs at the emu's body. Instead, it races until it gets level with the bird, and then it springs at its long neck. It takes some experience and cleverness to accomplish this, but once it is done, it is very effective. The emu topples over instantly and is easily dispatched. It is capital sport of an early morning to get a couple of dogs after a big emu cock. Your horse, if a good one, enters

SABLE ANTELOPE.

From painting by Archibald Thorburn.

into the spirit of the chase, and all you have to do is to sit him and ward him off the timber. Away in front the emu, with neck outstretched, is striding off at a tremendous rate, while your dogs are stretched out in a desperate endeavor to overhaul him. If the brush is very thick, the emu, who is used to it, will double and twist so much that the dogs are unable to head him. But if the brush is fairly open, the result will be that the dogs are presently beside him. If your horse is a good one, you are not far away. Then one of the dogs makes a mighty leap at the emu's neck. Probably he misses, as the emu makes a desperate effort to evade him. The dog falls over and goes rolling into the scrub, making wild efforts to recover himself. But the other dog is now beside the emu, and he hurls himself at his prey. Very probably he, too, makes a miscalculation. I have seen this business repeated half a dozen times before the emu was pulled down. On the other hand I had a dog once that hardly ever failed to pull his bird down at the first jump.

Emus are very curious birds. I mean their bump of curiosity is very highly developed. Often while camped out in the bush for lunch I have had them come right up to me. Anything strange seems to excite their curiosity. A red rag hung on a bush will bring emus up to it from a long distance. I have often amused myself by attracting emus to within a few yards and then firing a revolver at them. The manner in which they tumbled over one another in a desperate endeavor to get away was very amusing, and each shot sent them faster. Of course on these occasions I never fired at the birds, except on an odd time when I wanted a skin. A bullet sputtering at their feet had the best effect.

I was lying asleep under a bit of scrub one day, when a slight noise awoke me. I opened my eyes, and there were a dozen emus inspecting me and my belongings. One fine cock bird was standing nearly on top of me. After studying the birds for some little time I suddenly gave a yell and sprang to my feet. The effect was almost incredible. The emu is a clumsy bird and cannot get up speed quickly. This little flock just tumbled over each other and several birds went sprawling in the dust. Some kicked at other birds and at imaginary foes. I could have caught the legs of one of them when I jumped up had I been foolish enough.

The emu gets sadly bothered by the wire fences on the stations. Usually it pokes its long neck between two of the wires and scrambles through. Sometimes it trips, however, to step through, often with disastrous results. The emu after getting one leg through throws himself forward and of course falls over on the other side. His leg acts as a fulcrum and gives a twist to the wires, at the same time tightening them up. If the emu is very strong and the wire a bit corroded, he can break away. But usually he is held as in a vise and perishes miserably if no one comes along to get him free.

In times of drouth the emu suffers very much. All the water in his district sometimes dries up, and the grass of course goes, too. Then the emu will wander long distances in his search for water. Often he will strike an extra strong fence and wander up and down it, making vain endeavors to get through, until he falls and dies. The last water hole, with its foot or

so of muddy water, is often quite an emu cemetery. I have seen scores of the birds bagged in the mud, and too weak to get out. At drouth times the birds get too weak to run and can be caught on foot.

Emu eggs are a curiosity and are largely exported. They are very large, about twenty times that of an ordinary hen, and are of a very rich and deep dark blue. An emu lays ten or twelve eggs at a clutch, in a rough nest made in the sand, and the station hands and stockmen often collect them for sale. Beneath the dark blue coloring there is a basis of pure white and the shell is very thick. The black fellows take advantage of these facts to carve the eggs, or rather to form cameo pictures of bush scenes on them. The bushmen themselves often put in their spare hours at the pastime, and I have seen some really artistic work done on the eggs. The young emus are prettily striped and the old birds are very careful of them. Sometimes a dingo or a fox will try to get at the young ones, but the mother bird goes at them furiously, and always drives them off. I once saw a dingo get his leg broken in this way.

The emu has a curious custom, if he sees you at a distance, of squatting down on the ground, and of laying his long neck on the ground, to keep it from betraying him. It seems akin to the well-known custom the ostrich is reputed to have of burying its head in the sand. This habit is mostly adopted at nesting time and is of course done to prevent the nest from being discovered. Often, too, the hen emu will leave her nest if she sees anyone about and will go away from it in a curiously crouched attitude with her neck and body almost touching the ground.

### New Publications.

THE BOOK OF WOODCRAFT AND INDIAN LORE, by Ernest Thompson Seton, with over 500 drawings by the author. Doubleday, Page & Co. 557 pages, cloth.

Mr. Seton's large and interesting volume—really the eleventh edition of the "Birch Bark Roll"—contains much useful and interesting information and is very suggestive. It is a book for boys, appealing especially to those who wish to be Indians and those who choose to be boy scouts, but may profitably be read by every outdoor man. Perhaps there is no better way of suggesting its contents than to name the seventeen sections into which it is divided. These are: Principles of Scouting; Spartans of the West; Purposes and Laws of the Woodcraft Indians; Honors and Degrees and Indian Name; Woodland Songs, Dances and Ceremonies; Suggested Programs; Indoor Scouting Possibilities; Outdoor Scouting; Signaling and Indian Signs; Campercraft; Games, Health and Woodland Medicine; Natural History; Mushrooms and Fungi; Forestry; Some Indian Ways and Campfire Stories.

The field of outdoor life is wide, but Mr. Seton has covered much of it, and has given the small boy who longs to know something of the way in which his forefathers lived a vast deal to think about.

Mr. Seton's Woodcraft Indians—a boys' club which he started near his place in Connecticut a number of years ago—have become famous, yet the author has been told that the inclusion of

the word "Indian" in the title has hurt the movement. In his section, "The Spartans of the West," therefore, he endeavors to show that the typical Indian—the best Indian—was a splendid man and had high ideals. Since in all communities there are people who are good and bad, strong and weak, efficient and worthless, he reasons that in considering the Indian it is fair to take the best examples of the race to represent his philosophy and excellence, just as we ourselves would prefer to have white Americans represented by Emerson, Lincoln or George Peabody. With this in mind, he has given fifteen items in the Indian's creed, most of which are just, fair and true. He quotes from a large number of excellent authorities—people who have lived among Indians and know them—statements going to show that the Indian had this creed. Among these writers are George Catlin, Captain John G. Bourke, W. P. Clarke, Charles Eastman, Geo. Bird Grinnell, General Nelson A. Miles and others. The proof is of extraordinary interest.

In a book so large as this almost every man will find something to which he can take exception, yet the portions criticized by different people would be different, and over certain points the best authorities might disagree.

On the whole, the book is extremely interesting, and it will undoubtedly have a large popularity.

On one point Mr. Seton conveys an unjust idea, though after all it is perhaps rather the choice of a wrong word which gives this idea. He says that our soldiers "have been trained to hate the red men." This is not true, as the author shows on many pages of the book. Soldiers have been trained to fight the red men because fighting is their business, and under orders they must fight. Yet Bourke, Dodge, Clarke and Crook—the very authorities who testify to the many good qualities that the Indians possessed—were soldiers and fighters. They did not "hate" the Indians. We should be glad to see the word "fight" substituted for "hate" in the first line on page 58 of this book, the aim of which is to present only just ideas to the many boys who will read it.

### Pleasure for Others.

BOSTON, Mass., Dec. 20.—*Editor Forest and Stream:* In behalf of the trustees of the Kurn Hattin Homes, allow me to express our appreciation of the subscription to FOREST AND STREAM which is to be forwarded to the Homes in Westminster.

We are sure that the boys in the Homes will enjoy the periodical very much, as we have always found that good healthy publications, such as yours, make a direct appeal to our boys. We can assure you that the paper will be well read, and will be appreciated.

Kindly convey our thanks to the kind donor. Appreciating your interest in the matter, I remain,  
GEO. B. GRAFF, Trustee.

THE stories and articles in FOREST AND STREAM coming to its readers once a week, keep them in a closer touch with the magazine than is possible with a drawn-out monthly serial, consequently they do not lose interest in the paper; they are accustomed to read it weekly and anxiously await its arrival.

# A Trip Up Whiteface Mountain

By ELSIE SCHNEIDER

**D**URING the early part of the summer, three years ago, a party of girls spent their vacation in the village of Lake Placid, N. Y., nestled among some of the big mountains of the Adirondack range, hugging the shores of Mirror and Placid lakes. Many a pleasant half day was spent climbing the little mountains, such as Whitney, Cobble and Pulpit. We returned from these to face a challenge from Mount Whiteface. We accepted the challenge and began to prepare for the struggle. At dinner one day we heard harrowing tales of adventurers on similar quests. However, the facts seemed to be that Whiteface was 4,872 feet high, rough and rugged, with an old Indian trail leading a circuitous way up. The length of the trail was about five miles on the

edge we reached Wilmington in good season.

From there we left the Ausable River which is chameleon-like in character as in color. It is clear and sparkling all the way, showing its stony basin in the shallower parts through which one might easily walk, and in the deeper channels, reflecting the green mountainside or the azure sky. The current varied every half mile. In one place the water would rush like a torrent, while just beyond would bicker with the stones and then gurgle along in joyous mockery. It seemed to say:

"Here's a trout, there's a trout,  
Come, get out, get out, get out."

While we were loath to see our rig turn

tain top and went down a gradual slope into another valley.

From there we traveled upward circuitously to the summit of Nippletop, 3,500 feet high. Down into the valley we went again and wondered at the stupidity of the Indians in stretching out a trail through the thick woods and down into the deep valleys. Our guide told us all trails head to the highest points eventually; that the Indian scouts purposely kept to the woods and near the source of water.

Running through the valley was the turbulent tributary of West Branch of the Ausable River. Its waters washed with a musical murmur that was fascinating, the willowed banks. The stream was an unfathomable blue, setting in strong re-

WHITEFACE, AS SEEN FROM MT. WHITNEY.

OVER THE FIRST HILL—WAITING FOR "SECOND WIND."

LAKE PLACID, BUCK ISLAND AND HAWK ISLAND WITH SENTINEL RANGE IN BACKGROUND.

Lake Placid side and about eight miles on the about and leave, we were glad to begin the climb. Wilmington side.

Upon advice of the village counsel we chose the Wilmington side because its trail takes more gradual ascent. A callow youth from a neighboring town offered to accompany us and agreed to bring us home by eventide if we started early enough.

Attired in short skirt, blouse and strong, high-topped shoes, each of the girls took her sweater on her arm and started out for what she thought would be a day's outing. A rig took us through magnificent woods of evergreen. The glistening dew was lingering on the fern.

Light-hearted and carefree, we jogged merrily on, passed our vanquished adversaries, Cobble Hill and Pulpit Rock, and along the West Branch of the Ausable River. We drove through Wilmington Notch, a deep cleft made long ago by the swift river current. On we went to High Falls where we stopped to let the horses rest while we gazed in wonder at nature's handiwork. Our ever practical driver lamented the great waste of power at the falls. We agreed to let man and nature fight it out, but we hoped nature would win. We had come about seven miles, and after three more miles by the river's

We were going at a rapid pace through the thick brush and stubble on the lower trail, leading southwest, when fortunately we met Mr. Marshal. He asked us our destination, and upon reply said he had a camp near the top and was himself going that way. We were overjoyed to be guided by one who knew every turn in the trail and could teach us to climb. He had told us to climb at a regular speed, not to stop for breath the first time the intake valve seemed to clog, but to keep on until we got our "second wind." The guide made a picture, long to be remembered, as he labored steadily ahead with his well-filled pack basket strapped to his back, and a two-gallon oil can in one hand. His hair was smooth and black and long; his face was honest and frank. He wore a pair of colorless trousers, so short that they showed his red woolen socks.

About three miles of traveling, through brush and over rocks, brought us to a clearing which overlooked the valley through which glided, in graceful curves, the Ausable River. Mr. Marshal told us we were on the summit of Mount Marble, 2,725 feet high. We tarried here for our second breath and crossed the moun-

tain top and went down a gradual slope into another valley.

Beyond the brook, tall, slender birches beckoned invitingly with their silver fingers. The hardest climb was the last three-mile stretch leading along a winding way through a second growth of pines, over large bare rocks bearing faint and indistinct marks of the trail. Another tramp through brush and brier brought us to a clear and cool spring beneath an immense rock. How different was this spring from the shallow muddy wayside puddle! It thrilled every sense and more. Its fragrance awakened our uncultivated sense of smell. It was sweet to taste and soothing to the touch. When the youth stooped over to give us a drink, a trampess remarked: "O! Jacob's well." "Glad to hear it," replied the youth; "I didn't know he was ill."

A few rods up we came to a clearing upon which we staked our claims for rest. When our hearts beat normally again we had time to view the scenes in perspective. The mountain side looked like a beautiful moquette carpet in varying shades of green, made by the warp of the blue sky and the woof of the yellow sunshine. The clouds were gathering fast and made shadow after shadow pass in rapid succession over the mantle of earth. We turned to observe the

cabins built by Mr. Marshall and saw the site was well chosen. The main shack was of rough logs, one story high, about twenty feet long and ten feet wide. A door and a window faced the lower trail, valley and spring to the south. The long table and benches inside were stationary, reminding one of the lumberman's mess table and benches. A small iron stove drew well (we were drawn toward it immediately) a few pots and pans, odd granite plates, and tin cups gave promise of a hot meal. A half dozen blankets and a cot at one end of the hut served as a seat, hall rack, cupboard, foot stool, bookcase or bed as occasion required.

Facing the "combination room" was the solitary sleeping room, long and low with one door, no windows, and many natural ventilators. Opposite the door at the end of the shack stood a small wood stove upon almost vagrant legs. It seemed to sway, and as you neared it, raised a rusty elbow into your face.

The trunk of a pine sapling separated the pathway inside from the pine bough bed, upon which the toil-worn traveler might rest for the night. A rope overhead was intended for any clothes the traveler could spare while he slept.

We found a monstrous rock southwest of the cabins, from which we could clearly see, looking down defiantly at us, the bare bold top of the mountain half a mile away. Here we ate lunch. We asked if we had time for a siesta, which was granted by our guide, who said he was sure it would rain before we could reach the top. So we stayed and watched the deep purple clouds sink lower and lower, then move like panoramic pictures about the mountain head. We hastened inside, where consternation reigned among the girls, for we knew we couldn't go home that evening.

It was raining a hard, remorseless rain in the valley, and the trails were veritable brooklets. We sat listening to the fretful patter of the rain upon the window, when someone ventured to remark that we had no tooth brushes with us. Our guide promptly said: "There is a good strong tooth brush here that you girls can use if you wish. Dr. Bunner left it here last year, and I don't need it. And don't be afraid, girls. You can sleep on the pine boughs in the other cabin. Henry and I will sleep in here on the cot. I'll build a fire in your stove and give you five of the blankets. Then I'll nail the door shut so no prowling bears will get in."

Encouraged by his solicitude and the clearing sky, we ate heartily of broiled steak and potatoes. Phoebus was sinking to rest when we were alarmed by a couple of masculine voices from the ravine. "Here it is, here it is," and they burst into the camp like a cyclone. Tattered and torn were their trousers, while their arms were bare and bleeding from the briars they passed on the way. They had been traveling since morning and came up the shorter but harder route by way of the Wilmington flume. They stemmed the tide of the mountain torrent and disregarded the trails because they thought they would save time. Mr. Marshall's larder, usually well stocked with canned meats and vegetables, was much depleted after these boys had dined. They ate with a gusto that would have flattered Epicurus himself.

Stepping outside the lamp-lit cabin into the darkness, we felt the hallowed silence brooding over all. I stole away unmissed to the great

overhanging rock and sat there drinking deep of the cup of heaven and fearing it would slip from me if marred by a single voice. It was as though the earth were in lethargic sleep of hibernation. The clouds, grown soft and white and fallen down beneath me, looked like a silver cocoon embracing the larva of a caterpillar and hiding from unhallowed gaze the beautiful mystery of the metamorphosis.

Streaks of lightning encircling the mountain tops prophesied a wondrous change while the deep reverberations of sonorous thunder heralded the birth of a beautiful day. The clouds receded in ever widening circles. Stars appeared like lustrous eyes on the verge of tears.

It was growing cooler, so we went back into the cabin, huddled about the fire and told stories. One of the boys said that on the way up he had seen several panther tracks in the soft mud; another vowed they were the foot prints of a wildcat. The guide assured us that these animals seldom go beyond the line of vegetation, near which we camped. Story followed story, until the lamp burned low and the belated travelers threw themselves down on the pine boughs in one corner of the little shack and fell fast asleep. We enjoyed the flicker of the thirsty wick and so we stayed until the oil gave out. Then we were in a predicament. We could not stay up all night; we were too weary for that. The damp, floorless cabin in which we were would never do to sleep in. We were holding counsel when Mr. Marshall returned and said that there was nothing for us to do but to take the vacant corner in the shed, lie down and cover ourselves with blankets. Having no alternative, we did as advised, and crawled like prowlers of the night into our lair. Although Mr. Marshall acted as guard and stayed up to feed the yawning stove, we determined we would rest but not sleep. For a long time we watched the fanciful shadows made by the intermittent flames and the weird silhouette of our guide sitting by the stove like an Indian chief before a fire to the Great Spirit.

It may have been extreme weariness, the fragrance of the pines or both, that weakened our wills, but it was not long before Morpheus claimed us for his own.

The stillness that followed the storm was broken occasionally by the gnawing of a hedgehog outside. The dull monotony of the regular recurrence of the sound was exasperating. It ceased after a time, and then we heard the delicious soothing sound of the sighing pines. They breathed a rare sweet perfume and lulled us to slumber.

Day dawned clear and bright, and I hastened to my hallowed rock, stood upon it and viewed the transformation. There below me hovered the variegated earth like a beautiful butterfly just out of its cradle. The green was soft and velvety while the blue was deep yet luminous.

The boys had unbunked early and tried to make themselves look presentable. Although they had no visible baggage, they produced a brush and razor and shaved by the unsteady reflection of a poor mirror. Not to be outclassed by the boys, yet having no comb, we betook ourselves to the boudoir outside and arranged our veils upon our heads like breakfast caps. Then we filed in and sat down to breakfast, the men on one side, the girls on the other. Never did we eat with more relish. Formality was im-

possible, for how could you use banquet room manner when you had to borrow your neighbor's tin fork to eat your pancakes? And what would you do if, while trying to raise a battered granite cup to your lips, the handle parted company with the bowl? It was useless to say, 'I beg your pardon; it wasn't my fault,' when the coffee went into your neighbor's lap. Nor did it help matters to add "Never mind, I didn't want the coffee, anyway."

After breakfast we made our adieus to our hospitable host and guide, and started toward the summit just half a mile above us. We went through bushes, wet with rain, and got so cold that when we got to the open verdureless path, we had to run to warm up. The last quarter mile was over bare rocks, some of which were ten feet high. After laboriously scrambling over these, we reached our goal.

Beautiful and clear, as it always is after a rain, was the view. To the southwest lay the silvery Lake Placid with its three well-wooded islands, Hawk, Moose and Buck, and Lake Mirror, but an echo of the larger lake. To the east we could see Lake Champlain stretching in never-ending line beyond the mountains. Looking north, sixty miles away, we could discern the St. Lawrence River. All about us were the many minor mountains and sixty little lakes that make the Adirondack region famous for its grandeur of scenery, and a rendezvous for hunters and fishermen.

Just below the summit of Whiteface, and on the Placid side to the right of the downward trail, there is a tiny spring that bubbles out of a crevice in a rock. Here we drank our fill, then continued down over the large boulders until we reached the slide which is a flat steep rock about 150 feet long and 50 feet wide. It is this bare slide that looks like a face from the valley and that gives the mountain its name "Themogen" which is Indian for "Whiteface." There was nothing on this rock but water that trickled down and made it very slippery. We tacked across at the risk of our lives, for having nothing to take hold of we might easily slip from view into the grave deep below. We crossed Whiteface Brook several times, after reaching the lower half of the trail which is wooded with pine, hemlock, spruce and cypress, interspersed with maples and birches. The density of the forest cast a weird light on the ground, speckled with shadows of the restless leaves. The sun was high over our heads when wearily we reached the end of the trail at the landing at the head of the lake.

After signaling for an hour, we hailed the Silver Spray, a twelve-passenger launch that makes regular tours around the lake. A six-mile skim over the waters of Lake Placid brought us to the home of our adoption, the town of Lake Placid, where our friends were anxiously awaiting us. As we gazed at our adversary, the mountain, we regretted the struggle was over and wished as we often do, that to-day were yesterday.

### Regulation of Killing of Alaska Deer.

THE Secretary of Agriculture, acting under Section 2 of the Alaska game law, has issued a regulation with regard to the killing of deer on certain islands in Alaska. It reads:

"The killing of deer on the following islands in Alaska: Kodiak Island and Long Island, is hereby prohibited until Dec. 10, 1914."

# GAME BAG AND GUN

## Shooting in 1818.

FROM a copy of Nicholson's British Encyclopedia, published in Philadelphia in 1818, comes some interesting material. Definition of "Sporting" comes first and is unique. Here we find mentioned hunting license, scarcity of game, covert beating, ownership of game, night shooting and the fact that fowling is practiced by persons of rank only.

SPORTING.—Although we have not omitted to notice what generally appertains to the winged, finny or quadruped parts of nature, it appeared to us better to collect the whole of the matter relating to sporting, in general, under one head, thereby to preclude the necessity for reverting to other volumes for such information as might be sought. The reader will, however, remark that we have, under the article "Angling," furnished an ample detail of that diversion; therefore we shall proceed to the discussion of what relates to fowling. The first item presenting itself to our consideration is the gun, which ought always to be suited to the occasion. For ordinary field excursions, that is to say, when questing for pheasants or partridges, the piece ought to be conveniently light, and of rather a small bore; the barrel from two feet four to two feet six, or perhaps eight inches in length. Chambered guns undoubtedly strike hardest, and in most instances will be found to scatter least. Hence a good marksman will prefer such, but taking care to allow full thirty yards distance to the bird, unless in cases of emergency, before the trigger is drawn. When this precaution is neglected, the chance of missing is greater, while on the other hand such birds as may be hit are absolutely spoiled by the column of shot which brings them down. The gun requisite for cocking, that is, for woodcock shooting, is of a very light construction and very short, because the birds generally rise well within shot, and that the branches of trees, etc., may be less in the way of the gun's motion while taking aim. We have seen some guns made for this branch of shooting that have been little heavier than a large horse pistol. With regard to such birds as are found on plains, or are aquatics, guns of a larger caliber and more strongly fortified, so as to resist a large charge of powder without recoiling severely, are indispensably necessary. The selection of a gun must after all depend on various circumstances. For instance, a powerful man, in the prime of life, and of a large stature, would be no ways incommoded by such a one, as would prove highly distressing to an elderly person, of a weak frame, and of a diminutive size. Again, we necessarily make a distinction according to the nature of the sport, hence when shooting in a punt, or when laying wait for waterfowl, a heavy gun may be used. In truth, without a very strong charge, some of the more shy, or more full feathered, birds are not easily brought down. Some experienced

persons find that with a stout barrel, weighing from ten to fourteen pounds, they can bear the recoil of even two drachms of powder; which in an ordinary piece would produce at least an highly unpleasant recoil, if not some damage to either the piece or the sportsman. Every barrel ought to be chambered, because the piece is thereby strengthened, and the force or impetus of the shot considerably increased. With respect to the kind of chamber, a variety of opinions exist; for the most part purely theoretical, and in support of some favorite hypothesis, started by way of novelty by some maker anxious to obtain celebrity. After mature consideration, we are rather disposed to accord with a number of old sportsmen in commending the plain cylindrical chamber, made in the butt screw, or by a very small screw stump added to the butt of the piece, the latter being preferable in respect to security against lodging fire in the worm of the screw, but rather more expensive.

The lock of a gun is a most important object. It cannot well be too small and compact, provided space be allowed for the free movement of the several parts. We all know that the lock of a pistol will answer its purpose as well as that of a musket. The great consideration is that friction should be avoided by every possible means, which is best effected by the most simple movements, and by keeping them clear from the plates. Every part subject to the action of another should be well steeled and hardened, and where practicable, friction-rollers should be employed. The pan, above all things, ought to shut very close, and to spring up in a smart manner, when struck by the flint. The trigger should not be subject to action at half cock, but at full cock ought to draw with little resistance; at least, it should not require such force as might derange the aim, or delay the discharge.

Such guns as have double barrels are commonly provided with a trigger for each lock, though some are made with but one trigger. In the former case either barrel may be discharged at pleasure, which is not always the case in the latter mode of construction, which though apparently more simple is by no means so convenient. The alleged reason of having but one is that the interior is simplified, while the sportsman is less bewildered in regard to the choice of triggers, and in the application of the finger thereto, but we conceive that no cool or expert sportsman is ever at a loss in those particulars.

We now come to speak of the sizes of shot in ordinary use, as they are appropriated to various kinds and sizes of birds, observing that many old sportsmen and gamekeepers consider it advantageous to mix No. 4, 5, 6 and 7 in nearly equal quantities. This, however, does not seem to be warranted. The application of particular sizes to corresponding purposes appears to us more proper; nor can we reject that which rests on the solid basis of reason in favor of a system but partially supported, even in words, and with-

out a sufficient course of experiment under the eye of impartiality. We have, indeed, the assertions of various gentlemen of the most candid dispositions, and versed in those experimental tests requisite to sanction a practice, whereby it should appear that no mixture should ever take place, but that where large, shy game is sought (such as wild geese, bustards, etc.), No. 1 should be used; or, in default of that, No. 2. That where wild ducks and other hard-feathered birds are in view, No. 3 or 4 should be used. That for hares, pheasants and partridges, No. 4 and 5 ought to be employed. That for woodcocks, No. 6 and 7 suit well, while for snipe and quail, No. 7 and 8 answer admirably. As for ortolans, larks, etc., No. 9 and 10 should be used, where the birds are not very shy, otherwise No. 8.

From this it will be seen that No. 4, 5, 6 and 7 certainly constitute the general expenditure of the regular sportsman, but we cannot from that deduce that they ought to be mixed. However much we may differ in the above point from the Rev. W. B. Daniel, author of the celebrated "Rural Sports," such is the opinion we entertain of that work, that we shall present our readers with the following passage, extracted from his second volume. He gives the following table:

	Grains.
One ounce of common shot, No. 4, contains.....	166
Charge for double gun.....	317
One ounce of patent shot, No. 4, contains.....	202
Charge for double gun.....	375
(The difference of charge, between the patent and the common shot, is, therefore, 58 grains in the ounce.)	
One ounce of No. 5, common shot, contains.....	230
Charge for ditto .....	437
One ounce of patent ditto.....	271
Charge for ditto .....	512
Difference 75 grains.	
One ounce of No. 6, common shot, contains.....	300
Charge for ditto .....	554
One ounce of patent ditto .....	327
Charge for ditto .....	630
Difference 76 grains.	
One ounce of No. 7, common shot, contains.....	363
Charge for ditto .....	708
One ounce of patent ditto .....	388
Charge of ditto .....	757
Difference 49 grains.	
MIXED SHOT.	
One ounce of No. 4, 5, 6, common shot, contains .....	232
Charge for ditto .....	434
One ounce of patent ditto, No. 4, 5, 6.....	263
Charge for ditto .....	493
Difference 59 grains.	
One ounce of No. 5, 6 and 7, common shot, contains .....	297
Charge for ditto .....	582
One ounce of patent, No. 5, 6, 7.....	330
Charge for ditto .....	599
Difference 17 grains.	

Our readers cannot fail to perceive that the word "charge" is, in the above case, purely arbitrary. We necessarily conclude that Mr. Daniel found such answer well for the double barrel gun which he used, which might be of a large or of a small bore. Taking the average, we compute his charges to weigh about 9 or 10 to the pound, and this we may perhaps find to be tolerably correct as a standard on common occasions, since it is found in general that a bag of shot, weighing a quarter, i. e., 28 pounds, will make about 260 charges.

Mr. Daniel continues as follows:

"The smallest shot above mentioned (i. e., No. 7) will kill at forty yards, the velocity of a charge of No. 7 being equal to one of No. 3 at that distance; and since small shot fly thicker than large in proportion to size, and as there are many parts about the body of a bird wherein a pellet of No. 7 will affect its vitality equal to a pellet of No. 2, the chances for using the former are multiplied in the marksman's favor, for it is the number and not the magnitude of the particles that kills on the spot. If sportsmen would be persuaded to use No. 5 and 6 in grouse and partridge, and No. 7 in woodcock shooting instead of No. 3 and 4, and No. 4 and 5 for black game and pheasants, instead of No. 2 and 3, they would bring home one-third more game and not destroy one bird more than usual. They who prefer large shot and accustom themselves to fire at great distances, leave nearly as many languishing in the field as immediately fall, whereas those that use small shot and shoot fair fill their bag with little spoil or waste, beyond what they take with them from the field."

We derive much satisfaction from the support of so respectable an authority, and from the assurance of another veteran in ornithologic devastation, who assures us that for upward of twenty years he never used any shot for field sport above the size of No. 6, with which he has killed bustards and deer. The same authority further states that for the ordinary birds of small game, such as snipe and quail, No. 8 was always found perfectly adequate. For geese and in general for ducks, it was his constant practice to load with No. 2 and 3, according to the expanse of water. We are likewise indebted to the same authority for a kind of standard, by which sportsmen in general may be guided with propriety, which serves at the same time to supply the deficiency prevailing in all publications on this subject:

"Many persons are unable to estimate the proper charges of powder and shot for their respective pieces. It is true, some authors tell us, to be guided by the weight of the ball, but it often happens that a ball is not at hand, and when obtained, unless it fits exactly and is perfectly spherical, will not determine the true dimensions of the bore. I have always found that with the best powder a charge equal to a diameter and a half of the bore was the best; that is, the most efficient quantity; that it impelled an equal quantity of shot with great force; and that without causing too great a recoil. Thus, if the bore were six-eighths of an inch, the load of powder, poured loosely into the piece, should raise the ramrod nine-eighths of an inch; or one inch and one-eighth. The wadding should be of thick leather, or felt (i. e., old hat) cut out with a machine; that should be rammed down firmly, but not so as to bruise the grains of

powder. Then put in the same measure of shot as you did of powder, and ram it down rather moderately, after covering with a second wadding as above. Observe that shot will spread more or less in proportion to the force with which it is rammed down. The more it is rammed, the less it will diverge. The above mode of charging will cause the charge in a piece of three-quarters of an inch bore to occupy a depth of full two inches and a half in depth. Some, who have a great predilection for large charges, may smile at the above quantity, which has, however, answered admirably with me, and will be found under fair and repeated experiments to be the most killing charge that can be used. But I must remark that owing to some fault in the construction, and especially if the vent be placed at all beyond the bottom of the barrel, some guns will recoil severely, even with the above moderate charge. When such is the case, I should recommend that the piece be chambered."

The foregoing perspicuous mode of charging appears so reasonable, and is founded on so regular a computation, that we feel a confidence in urging all sportsmen to give it a fair trial. It is obviously moderated, therefore may be considered as devoid of danger. Upon that principle we could expatiate at great length regarding the highly culpable practice of carrying a piece full cocked, also of letting it swing in such a direction as might cause the charge, in case of accident, to wound any person in the field. The muzzle ought always to be carried above the shoulder, and in general it ought to be the

endeavor of every sportsman to avoid every liability to endanger either himself or any other person. However inconvenient stop locks may prove on some occasions, they nevertheless have the great recommendation of being on the safe side of the question. When a gun is put by in a situation accessible to other persons, even when unloaded, it ought to have the lock stopped, to prevent its being injured, but when a piece is loaded, which should never be the case, except under very pressing circumstances, due care ought to be taken to prevent its being in the hands of children, or of any but those for whose use it may be intended.

Having said thus much in regard to the construction or kinds of guns proper for shooting in general, we shall proceed to state a few particulars relating to the various kinds of game generally sought, and to give the sportsman as much insight as our limits may allow, regarding the laws in force on the subject of shooting, etc.

[TO BE CONTINUED.]

**Prizes for Michigan Schools.**

W. B. MERSHON, of Saginaw, Mich., author of "The Passenger Pigeon," and an active worker for bird protection, has offered seven prize medals to the school children of Michigan for various essays on birds, for feeding birds, for photographing them, and for success with bird houses. The prizes will be distributed next May, on Arbor and Bird Day, 1913.

WHEN THE TRAIN ARRIVED IN JERSEY CITY.

REASE

### New York Zoological Society.

THE nineteenth annual meeting of the New York Zoological Society was held on Tuesday, Jan. 14, at the Waldorf-Astoria. John L. Calwalader, Vice-President, presided. There was a large attendance of members from New York and other places.

Madison Grant, Chairman of the Executive Committee, gave an outline of the events of the year. A census of the animals in the park taken Jan. 1, 1913, shows 1,251 different species of mammals, birds and reptiles, represented by about 5,000 specimens.

The zebra house and yards have been entirely finished, and are occupied by the equine animals of the Society's collection, the herd of Przewalsky horses, the wild asses and the zebras. Considerable additions have been made to the Rocking Stone Restaurant. A winter house for pelicans and other birds is in process of construction, and a shelter is to be built for the yaks.

The maintenance fund for 1913 provided by the city is \$191,925, which contrasts interestingly with about \$60,000 provided during the first year that the park was in operation.

The city's finances have not admitted of the appropriation of money for the construction of the new Aquarium as had been hoped. The finances of the Society are in excellent condition, though the fund for the National Collection of Heads and Horns has been overdrawn. The endowment fund has been increased to about \$300,000.

The Society needs an increased membership. A great city like New York should have many thousands of members for this Society, instead of only two or three thousand.

In 1912 the attendance at the park exceeded by a hundred thousand that of any previous year, amounting to more than 1,700,000 persons.

An expedition has been sent to West Africa in the effort to secure living gorillas for exhibition at the park. The one brought over a year or two ago died after being here eleven days. It is the intention of Mr. Garner to keep in captivity such animals as may be captured until they become accustomed to confinement, and to the novel food they must receive.

Members of the Board of Managers to take the place of those whose terms have just expired were elected.

Mr. Charles Stewart Davison, of New York, offered a resolution, seconded by Major W. Austin Wadsworth, of Geneseo, N. Y., urging on Congress the passage of the Weeks and McLean bill for the protection of migratory birds. Dr. Hornaday supported the resolution, and when the question was put by the presiding officer, it was carried unanimously.

At the close of the business meeting an adjournment was had, and Madison Grant, the Secretary of the Society, showed, and very effectively explained, a series of eighty beautiful pictures representing the cave paintings by stone age man—the man of Cro-magnon—in the caves of Southern France and Spain. These paintings are in one or two colors, or are sometimes sculptured in the rock. They show an astonishing degree of art, especially when it is considered that the painting or engraving must have been done practically in the dark and far under ground.

Mr. Grant was followed by S. N. Leek, of Wyoming, who showed and described a number of interesting pictures, some of them motion pictures, having to do with outdoor life in Wyoming; he showed deer, antelope, elk, beaver and many other things. Mr. Leek's address was a strong plea for the winter feeding of the elk, whose winter range has been cut off by the settlements between the Yellowstone Park and the Red Desert in Wyoming.

### Suggestion and the Bear.

BY L. O. ARMSTRONG.

SOME months ago on the north shore of Lake Superior I came across a very neat camp. It was the headquarters for an iron camp and was in charge of a foreman and a cook. The foreman was a bright rollicking Irishman, all business when there was business to do, but willing to enjoy himself, especially in the way of sport when it came his way. He was the kind of Irishman for which the race makes no apology. The day we reached there, was the last day of the cook's service. He was a very good cook, and as we had some days to spend in the vicinity of the camp, we looked upon his departure with some concern. I asked him why he was leaving. He didn't answer, but instead got busy among the pots and pans. The foreman afterward said to me as we went out for a day's fishing: "I'll tell you why the cook wants to leave. Last Sunday I said to him, 'Let us go out for a stroll. Perhaps we will see the bears that have been around the camp!' He agreed and came. We walked along the trail to the iron mine. On the way we flushed several coveys of partridge, and I saw both wolf and bear tracks. I had taken my gun with me.

After walking about twenty minutes from the camp, we saw a black bear on a hillside not more than 15 yards away. I said to the cook, 'I am going to shoot as near to that bear as I can without hitting him.' I shot and the bear gave a leap, but did not fall. I saw that I had wounded the bear who instead of running away turned our way and started in our direction in a very brisk manner. The fur was out of season, and I did not want to shoot the bear, but it was evident that he had blood in his eye. As he came near I noticed the cook fall back behind me. When the bear got right near I thought I would make him stand on his haunches by throwing my hat toward him. It had the desired effect, and when he stood on his haunches and showed fight, I saw that I had to shoot him. I fired and the bear fell like a lump of lead. At the same time I heard a great crash and heard the cook shout, 'Take off the bear, take off the bear!' I looked around and saw that the cook had climbed up a small dead tree killed by fire. It was a bushy soft maple. The agitation that had evidently taken hold of the man caused him to shake the tree and weaken the roots which were pretty well burnt out, and just as I shot the bear, the tree fell, the branches pinning down the man and his scare. The branches were to him the paws of the bear holding him in his grip, and blinded with fear he kept shouting, but dared not open his eyes until I pulled the tree away, and then it took him a minute or two to recover his composure and to feel absolutely assured that he had escaped. He admitted the corn at the supper table and the joshing has continued so steadily that he thinks he has to give up his job."

I am not a Christian Scientist, but I do believe in the power of suggestion, of which this is a backwoods example.

## An Angler in Ireland

By SHANNON SHORE

ANGLERS in the British Isles speak of "game fish" and "coarse fish," under one or other of which heads we include all fish found in our fresh water.

The distinction makes for convenience, though there is of course nothing scientific or even legal about it, no fish being scheduled as game, but still admirers of the ferocious and daring pike, the bold and sporting perch, and even other coarse fish often protest against its invidiousness. But there is no getting away from the fact that in beauty, sporting qualities and excellence as food the salmos are fish apart and are the aristocracy of the finny tribe. Salmon, trout, grayling and char belong to this category, but the grayling is unknown in Ireland, while the char is only found in the depths of one or two lakes in these islands, and that so sparsely that it is seldom included among British fish at all. This reduces in Ireland to

salmon and trout, but so affluent are our favored waters that few Irish anglers regard as serious the fishing for any other fish except these two.

Strangers to this country, however, intent on salmon fishing, will bear in mind two small matters here. First, that a salmon rod license costing £1, and which is good for the whole country, has to be taken out by each angler before commencing operations; and also that the term "salmon" in this connection includes sea trout, bull trout or any other salmos that migrate to and from the sea, so that the tourist angler down Cork or Mayo way, who may happen to find sea trout, but no salmon, running in a river, has still to take out a salmon license if he wishes to fish for the sea trout. Neglect of these points may lead to trouble, and it is also to be noted that the possession of a salmon license gives the holder no right of fishing whatever on any man's water without that man's express permis-

sion. A salmon or sea trout hooked and landed by an unlicensed angler is to be immediately returned to the water. Penalty in these cases is not less than £2 plus costs. This salmon rod license is unknown in England or Scotland, but no license is required with us for trout (*Salmo fario*), which is the one non-migratory fish we have in this country and of which we are naturally very proud indeed. This common or brown trout is the special glory of our Irish lakes and streams, a fish of unrivaled culinary excellence, a bold yet cautious riser, fierce and powerful in battle, beautiful to the eye in color, shape and movement, and attaining in large waters and where food is plentiful a great size. No fish perhaps shows such individual differences in color, markings and shape as trout, and although there is never any mistaking the species, so pronounced are the contrasts presented occasionally that not a few ichthyologists have insisted on enumerating varieties to the number of a dozen or more. But this was found to be out of the question in practice, for in some of our rivers it is often difficult out of a dozen fish for the angler to find even a brace identical in shape and marking. The feeding habits of the fish, depth, nature of the bottom and other characteristics of this place frequented by them, prevalence of shade or shine, and endless other features have been offered in explanation of this, and there doubtless is something in them, but the interesting point of the situation is that trout in this country at least differ from each other in the most remarkable manner very often, though still possessing the well-marked features of the race in a way there is no mistaking. Passing over minor differences our native trout are either silver or golden, and to one of these two classes every trout of a pound or so in weight and upward may be at a glance referred.

The former fish may be described as exactly resembling a well-conditioned and well-colored little salmon of his size with the addition of a more or less plentiful sprinkling of star-like small brown patches along the sides, especially about the pectoral and central regions. Vividly red spots are sometimes intermixed also, but these seem to disappear with age. In lakes and large waters where these trout attain a size of from six or eight pounds to ten or twelve pounds or more, they are generally known as *Ferox*, and their formidable teeth and other indications seem to show they are rather fiercely predatory in their nature. They are often white and somewhat coarse in flesh, and do not improve with age, being as a rule best for the table when under two pounds or so in weight and before bad cannibalistic habits have time to develop.

The golden fish on the other hand exhibits a brownish yellow flank, tends with time to aldermanic proportions, is curdy and salmon colored in flesh, which is of a rich delicious flavor even in fish of the largest size. As a fighter he is high-mettled and fierce, but his bolt is soon shot where he has been living too well, and after a few heavy rushes he is quickly blown and presently surrenders at discretion. Up to three or four pounds in weight, however, he often exhibits a youthful vigor and obstinacy, which leave nothing to be desired, and so puts up a splendid fight. This trout was known to the old Irish by a name which meant "red fellow" or "red lad" (ghillie rua) and it is still known in many places as the "gillaroo" trout. As this

fish is to some extent red both inside and outside, the true origin of its name is obviously a matter of some dispute, and we shall not here attempt to settle it. But this is not the only difficulty the case presents. The trout is provided with a gizzard-like stomach, it appears, and so not a few anglers now stoutly hold that the gillaroo is simply the trout with the gizzard, and that philology has nothing to say in the matter.

Now, gizzard and gillaroo have certainly no more to do with each other than monmouth and macedon, but still there is an unsuspected something in it when we look closer. This fish is partial to a diet which includes fresh water shrimp, whelks and other aquatic "snails" of all kinds, and it is to enable it to crush and grind this crustacean food it is provided with, or, as we now put it, has developed a gizzard. And this crustacean food it is which makes the flesh of this trout red, so after all the gizzard and the name (gillaroo) have established a left-handed connection we cannot ignore. As a rule the names *ferox* and gillaroo are little used in this country. We speak of a big trout or lake trout or river trout and mean to imply no differences except merely those of size or habitat, and which have nothing essential or racial about them. As a matter of fact our trout, whether big or little, white or yellow, found in lake or river, is one, and no differences of which science can take cognizance as invariable really exist among them. All efforts to establish the like have failed, and trout are trout and nothing more. Such terms as white trout, salmon trout, are properly only applicable to sea trout (*Salmo trutta*), and even here hard and fast differentiation is not too certain, the migratory habit being the characteristic mainly relied on when a legal point is in question.

Anatomical distinctions, even between salmon and trout themselves, are as good as hopeless. Few, if any, of our trout spawn in lakes, and it is a moot point at what age the offspring of the lake trout descend the tributary streams where they were hatched out and join their parents. Trout much exceeding in size any found in the lake are often taken in the river, but whether true river trout or not it is not easy to determine, and in many cases trout of a great size are found in rivers having no communication at all with lakes.

Trout abound in the lakes and rivers of Ireland. One hears on all sides that of late years trout have been rapidly disappearing from our waters, and probably they are not as numerous as they were half a century ago, but for all that they are found in great numbers everywhere still, even the tiniest streams where in long drouths hardly a trickle of water is seen, scarcely ever being without them. Improvements in farm draining by lessening the permanent water area and volume, and the increase in the use of artificial manures which probably introduces pernicious soluble ingredients into the water, doubtless have reduced the number of our trout, but be that as it may, it is difficult to find a streamlet anywhere in this country without trout, even if it hold nothing else. The tenacious vitality of the trout is one of the most striking things about this fine sporting fish.

FOREST AND STREAM used to be "dad's" paper; it is yours now.

## New York Anglers' Club.

THE big pond at Hotel Navarre was full of big fish (stories) on Jan. 14, when the annual election and dinner of the New York Anglers' Club was held there. It was a jolly gathering of New York's best anglers; each having discarded his creel for a "biled" shirt and his Duxback for an open front, as the casting was to be done from elbow instead of wrist. The tournament face gave way to an expression of eagerness to tell one just a little better. A well-stocked speakers' table got a rise from a big one every time toastmaster Julius Seymour cast a dry quip into it.

General Wingate, who has fished in many streams, told of his present occupation of fishing among anæmic school boys for athletes. Reports show how successful he has been. Dan Beard, no one can describe him, unless they say: "Oh yes! Dan Beard; well, he's, well—he's Dan Beard." Anyhow, Dan boy-scouted a bit and told stories worth while. And what more appropriate at a fisherman's dinner than a rising toast. This they gave to Sir Daniel.

Ex-President Lamison, who retired with as much grace as with which he casts, said a few—very few—words about bait, fly or fly bait, and let it go at that. President-elect Hardy introduced Speaker Seymour eloquently, and another year comes with more joy to the New York Anglers' Club. The officers follow: President, William H. Hardy; Vice-President, Harrison Elliott; Secretary, A. B. Hubbard; Treasurer, Harry Friedman; Directors, Harold G. Henderson, John L. Kirk, G. M. L. LaBranche, J. G. Lamison, J. H. Seymour, Tobias A. Wright; Committee on Admissions, A. R. Hanners, Chairman, Dr. B. W. Glover, Fergus Lamb, Henry Mesa, George W. Yuengling; Committee on Nominations, William H. Hardy, Chairman, Harrison Elliott, John L. Kirk, J. G. Lamison; Tournament Committee, Dr. L. Gordon Fulton, Chairman, A. B. A. Bradley, Dr. R. Johnson Held, C. H. Higby, G. M. L. LaBranche, W. C. Metcalfe; Committee on Arrangements, E. H. Myers, Chairman, D. T. Abercrombie, Adolph Grant, Oscar T. Mackey, E. J. Mills, Dr. F. C. Raynor, William H. Zabriskie.

## Congratulatory.

BOSTON, Mass., Jan. 1.—*Editor Forest and Stream:* Congratulations upon the appearance of the Christmas number of FOREST AND STREAM. I was particularly impressed by the flavor of the editorials. The author of "Still Hunter" is evidently a true lover of wild nature, a close observer and one of those to whom in truth "the trees talk and the waters sing."

I had a very enjoyable trip to the famous Dead River region again this fall, accompanied by Mr. Bean, of the Boston Post. We secured our full quota of deer, a bear, two foxes and the limit on partridges.

Wishing you and yours a happy and prosperous New Year, I am, etc., F. O. PRICE.

NORTHAMPTON, Mass., Dec. 28.—*Editor Forest and Stream:* I thank you for your cordial Christmas letter with all its contents. I congratulate you on your success of increased percentage and the promise of what is yet to come. I keep physique as usual in my seventyninth. O. K. CHARLES HALLOCK.

Published Weekly by the  
**FOREST AND STREAM PUBLISHING COMPANY,**  
 CHARLES OTIS, President.  
 W. G. BEECROFT, Secretary. W. J. GALLAGHER, Treasurer.  
 127 Franklin Street, New York.

**CORRESPONDENCE**—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

**SUBSCRIPTIONS:** \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

**ADVERTISEMENTS:** Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

Entered as second-class matter at the Post-Office, New York, N. Y.

**THE OBJECT OF THIS JOURNAL**  
 will be to studiously promote a healthful interest in outdoor recreation, and to cultivate a refined taste for natural objects.

—FOREST AND STREAM, Aug. 14, 1873.

#### FOREWORD.

MARCH FIRST issue of FOREST AND STREAM will be Sportsman's Show Number, and while our editorial layout for the issue is by no means complete, matter already scheduled offers a wide variety of subjects and territory covered, while no previous single issue of FOREST AND STREAM or of any other sportsman's magazine has offered a list of contributors so prominent in literary and sportsman's circles.

Dr. William S. Rainsford, in East Africa, at the present time, in charge of an expedition of the American Museum of Natural History, will contribute one of his literary gems, descriptive of some part of the journey. Edward Breck, who made New Brunswick popular as a big-game hunting ground, and in turn was made infamous, as he says, by Albert Bigelow Paine in the "Tent Dwellers," contributes a humorous story as to how he tried to get back at Paine. It's a side-splitting story, one that may safely be read only by a coptortionist. Then to get down to the inner man, L. Lodian, known the world over as explorer and engineer, feeds us an article on "Foreign Camp Foods and Camping Accessories." It's a whole book cunningly condensed into a series of magazine articles. So little is known of Alaska hunting, where are the best 'grounds' and how to reach them, that a rattling article by J. C. Tolman, senior game warden of Kenai and Alaska Peninsula, will be devoured by big-game hunters. The Glacier National Park is described intimately by Robert Page Lincoln, an ardent sportsman and an expert angler. He will tell fly-casters and tourists a lot of things they do not, but should, know about this great national playground. Canada's lakes and rivers will be explored for you by S. E. Sangster (Canuck). He will outline canoe trips, short and long, tell

where, what and how to fish Canadian streams. He will describe in a new way the Algonquin National Park and the Temagami region, and picture each so that you will recognize it when you see it. The story of the Grand American Handicap, the trapshooters' classic, will find a place in this number, and then the entire issue will be profusely illustrated. Later we will unfold more plans for your pleasure in the Sportsman's Show Number. Say March first issue to your newsdealer, for you will want copies to send your friends.

#### TRANSATLANTIC RACING.

TOM DAY, who last summer crossed the Atlantic in a 40-foot motor boat, stirred up so much enthusiasm among motor boat owners that it now is proposed to hold an annual across the ocean race for motor boats. Commodore Charles Sagen, of the Yachtsmen's Club, of Philadelphia, is sponsor for the suggestion. It may be remembered that Commodore Sagen won the Philadelphia to Bermuda race last fall with his motor boat Dream. One would think that after the knocking about the little Dream got, Commodore Sagen would realize what a fruitless event an across the Atlantic race would be. The Bermuda race brought out only the fact that small power boats are not fitted for ocean voyages, that there is absolutely no pleasure in such trips for captain and crew, and that every man on the boat "wouldn't take any amount for his experience, nor would he do it again for any amount." All such a trip as Mr. Day's develops is the fact that all that is needed for so long and speculative a trip is a bigger boat and good weather. Why waste time on a phase of motor boat development that is absolutely unnecessary and undesired when so many important details of motor boat construction, useful to the average enthusiast, remain in abeyance? The development in automobiles has so far out-stripped perfection in motor boats that it is time marine engine men took a look into the future instead of living in the past. Why not devote energy toward improvements of value to all of us instead of putting time and money into a phase of the subject in which only a few are interested and none enthusiastic?

#### FISHERMAN'S LICENSE.

It is said the New York State Conservation Commission has in mind a plan to license anglers fishing New York waters.

The proposition is to be placed before the Legislature in the form of a "combination" hunting and fishing license to cost \$1.10. This is the tax that has for some years been annually levied on all who go afield with a gun, and the "combination" simply includes all anglers in the requirement to pay \$1.10 if they wish to continue to pursue the "contemplative man's recreation."

Up-State anglers resent charging them for the joy of a day on the stream. Now, as a matter of fairness, is there any reason why a man who shoots and does not fish should with his license money supply funds for stocking streams for the angler's benefit? Why should not the angler be willing to pay for his own fun? It takes a great deal of money to keep streams in this State stocked, and certainly this cost should not be charged to the non-sportsman, the man who neither shoots nor fishes, nor

should it fall upon the gunner. It is directly up to the rod bearer to take one end of the sportsman's joke and pull along his share of the cost of the day's sport. The proposed charge of \$1.10 certainly is reasonable enough, particularly as it offers the combination privilege of shooting and fishing. As to the question of licensing the boys who fish, this would not be necessary. Boys under sixteen should be allowed to fish unlicensed; there would be sufficient revenue without the boy's contribution. The enormous income from fishermen's license would enable the Conservation Commission to give New York anglers the best fishing anywhere in this part of the country, and sportsmen should see to it that the money is spent under direction of men competent to do the work. Under these conditions it does not seem reasonable to think that any true disciple of Sir Izaak would object to paying \$1.10 a year for the pleasure of fishing where there are fish.

#### DAME NATURE.

WHAT cards is Dame Nature holding up in her cold hand? What does she mean by the allurements she holds out to birds and flowers this winter? In the middle of January we see a robin hopping on a lawn, the grass of which is beginning to get on a spring coat. A maple sends out an olive branch of pinkish hue to make peace with winter, ere she shoots her early buds. The crocus timidly pushes back her earthen blanket to flirt with a warming sun, but Dame Nature is cruel. She is but inviting the robin, the maple and the crocus that she may nip their precociousness and send them back to smart and sulk, until such time as she sees fit to bring them forth in permanence.

JOHN H. WALLACE, JR.

THE appointment of John H. Wallace, Jr., to a place on the advisory board of the National Conservation Exposition, to be held in September, 1913, at Knoxville, Tenn., is a remarkably happy one. Mr. Wallace as game and fish commissioner of Alabama has made a great many reforms in game conditions, while his conservation work has made him a nation-wide reputation.

#### WALKING FOR SUFFRAGE.

Now that it's all over, it does seem as though the New York City to Albany march was better training for a fall mountain climb than for suffrage. However, 'tis a happy disposition that can exercise its humor as it exercises its legs.

#### An Arrow Song.

BY WILL H. THOMPSON.

A song from green Floridian vales I heard,  
 Soft as the sea-moan when the waves are slow;  
 Sweeter than melody of brook or bird,  
 Keener than any winds that breathe or blow;  
 A magic music out of memory stirred,  
 A strain that charms my heart to overflow  
 With such vast yearning that my eyes are blurred.  
 Oh, song of dreams, that I no more shall know!  
 Bewildering carol without spoken word!  
 Faint as a stream's voice murmuring under snow,  
 Sad as a love forevermore deferred,  
 Song of the arrow from the Master's bow,  
 Sung in Floridian vales long, long ago!

# ARCHERY

## The Effect of a Variable Illumination.

BY E. J. RENDTORFF.

IN archery as in baseball, golf, football, or any of our other standard sports, it is the man possessing an intimate knowledge of the little details who wins.

Dr. Hertig writes: "At Thanksgiving I had good prospects for straight hits and a score well over 500, but at the last a change of light caused me to shoot low with the result that my last thirty arrows were progressively poor in score. I missed with the 79th, 81st and 83d arrows. Then, when it was too late, I found the cause and incidentally acquired an item of archery lore hitherto unnoticed—that the light may affect one's vision so much as to cause a displacement of the point of aim. The sun had been shining all afternoon, and when it went behind the clouds and my point of aim, a light patch of grass, receded or rather crept toward me, I undershot."

The explanation becomes more evident through the use of an illustration.

In the diagram E represents the eye, A the arrow, B the actual intersection of the line of sight with the ground, and C the point of aim. When the light is good, the line of sight EB is contiguous with the point of aim. We are able to "draw a sharp bead" on account of the good illumination. We do not cover the point of aim with the pile of the arrow, but bring the projection of the pile in immediate contact with the near side of the point of aim, so that it will remain in plain view.

When the illumination is poor the point of aim becomes obscured. In order to see it more distinctly we unconsciously lower the line of sight, as shown in the right hand half of the illustration, and allow more of the point of aim to lie in front of the projection of the pile. We apparently aim as we did before, as the relative positions of the projection of the pile and the point of aim appear the same as they did when the light was good. The phenomenon is an optical illusion, well understood by physicists.

The remedy is to apparently raise the elevation of the arrows when darkness approaches.

The amount of this elevation can be learned through experience only, as it depends on three variables: the acuteness of the archer's vision, the relative darkening, and the nature of the point of aim. For a clear cut, distinct point of aim, the apparent elevation would be less than for a vague, somewhat indefinite "point."

## One Cause of Failure at Public Meetings.

IN the old Archery and Tennis News for Aug. 15, 1882, Launcelot—Will H. Thompson—had a very interesting review of the fourth annual meeting of the National Association. This drew a letter from Colonel Williams, which appeared in the same paper, Sept. 30, 1882. Mr. Thompson wrote:

"On the last day of the meeting a special shoot was arranged at 100 yards for special prizes, donated by three archers, and being curious to study this very matter, I arranged to shoot at a target with the champion Homer S. Taylor and Colonel Williams. It was at once apparent that neither the champion or myself

trajectory to his arrows, and is the choice quality in the shooting.

"Right here he failed. He would shoot perhaps six shots with perfect care and most excellent execution, except at the very last instant of the loose, when I could discover a fainting of the nerves, as it were, and the arrow went on its course with the same line and elevation which the archer intended, but dropped just under the target or lodged in the black or white below the gold. Fully one-half of the shots were thus delivered. Occasionally the strong will would hold everything taut through the critical moment, and the fingers would come backward off the string with a firm and rubbery tenacity of pull that never ceased its vigor until the string had passed the finger tips. In these instances there was always the same result. I could tell without following the flight of the arrow that its destination was 'a gold, a red or at least a blue,' as Fisher said of Ford's.

"Now, Colonel Williams knew that his loose was failing him, but why? He could not tell, nor yet can I.

could force our shooting, but Colonel Williams began as though the range was under his control. But despite the low and steady flight of his arrows, despite the faultless line kept throughout the whole seventy-two shots, and the beautiful grouping of his arrows at every end, either just under or just over the target, the scoring was very poor for even a mediocre archer, much less such an one as Colonel Williams.

"I readily discovered the immediate cause of the failure in keeping the elevation, but I could not tell the cause of the cause.

"The perfect elevation is of course only to be kept by an unvarying draw and unvarying loose. The drawing of Colonel Williams was so exactly the same at each shot that only in one instance did I think I detected a variance, but the loose was defective. In practice this gentleman's loose is nearly perfection. His fingers are pulled smoothly and steadily backward off the string with a rather slow, firm and perfectly resolute movement. It is the constant pulling until the string is gone, which gives the flat

"Now, the failure of the loose in his case was only partial. It was not only at the latter part of the loose, but at the very last of it. In a flight of sixty yards the results would have been very little worse than if the loose had been perfect, but at 100 yards the error was fatal. I think many of our archers are troubled in the same way, and communications on this point would be valuable and interesting. Will Colonel Williams, Mr. Walworth, Mr. Hammond, Mr. Taylor, Mr. Nash and other gentlemen give us some notes upon the subject through the Archery and Tennis News?"

Colonel Williams' "Notes" follow:  
Editor Archery and Tennis News:

In your issue of Aug. 15 appears an article from Launcelot in which he refers at some length to my shooting at Chicago in July last. He has discovered the cause of my indifferent score at the York round, but was unable to determine the cause of the cause, and calls for further information on this point.

The cause of this cause was partly lack of muscular and nervous force, and partly a lack

DR. EDWARD B. WESTON.  
The Dean of the Fraternity.

of proper equipments. The bow I used on the first day was a new one, and had never been exposed to the sun. It is marked fifty-five pounds, and after standing in the sun a short time, did not draw forty-five pounds. The bow used on the second day was five pounds below that weight, which I could loose well. But what causes this letting down of muscular and nervous force? This question, or rather the answer, interests all archers. It is common on an archery field to hear of this or that one "breaking up." This "breaking up" is simply a failure of the forces necessary to a proper loose. When a good archer properly equipped "breaks up," he needs rest and nourishment. Excitement will affect him much less than the lack of bread and meat and sleep.

What causes this failure of the necessary forces? There are many causes, chief among them a long ride without proper rest, food and sleep; the performance of labor which you are not accustomed to immediately preceding the shooting; standing in the hot sun on a July day, when you are accustomed to working indoors, or in the shade, and other similar causes.

The great trouble with American archers is that they are always in a hurry and fail to take proper food and rest.

When they go to a national or State meeting, they rush off in a hurry, and when they get there, they retire later and rise earlier than they do at home. No archer who pursues this course can hope to approach his or her score on the private range.

The points to which I refer are within my own experience, and those who take time to read what I have written will at once conclude that I consider good loosing the crowning difficulty in archery. This is precisely what I believe. Most of the bad shooting of good archers is caused by bad loosing. If the loose is bad, it matters little how well the bow is drawn, or accurately the aim is taken; the shooting will be

indifferent. It is difficult, if not impossible, to describe a good loose. But it may be asserted without fear of contradiction that no loose is good in which the fingers of the right hand are not freed from the string by a backward movement of the hand. If the fingers are freed from the string by a continuation of the draw, or backward movement, the bow arm, as well as the right hand, will remain in position after the arrow has left the bow. If, on the contrary, the fingers go forward with the string, at the moment of loose, the bow arm will give way, the shot will be bad, and the archer will appear dazed and disconcerted.

I am conscious of my inability to make myself understood on this point, but if the archer who is laboring under this difficulty will try the experiment of loosing a few arrows with the determination that the right hand shall remain in position after the arrow has left the bow, the point to which I allude will be discovered. If the hand goes backward from the string at the moment of loose, the archer will remain firmer in position after the arrow is gone, but if it goes forward, the right hand will drop and the bow arm will go down at once.

The surest way to prevent the hand going forward with the string is to make the final draw after the aim is taken very slow and even to the point of loosing. By this means the archer will continue the backward pressure on the string to the very instant of loosing, and though the arrow, to the observer, will stop its backward movement over the bow for an instant, the archer will feel from the force he is using to continue the backward movement, that the arrow continues to move until the last moment and does not stop at all. Of course the arrow stops the backward movement before it starts in the opposite direction, no matter how the loose may be made; and if the archer at this instant is keeping up the backward force on the string, he will accomplish a good loose.

### Hark Ye! New York Archers.

NEW YORK CITY, Jan. 17.—*Editor Forest and Stream:* It is earnestly requested that all lady and gentlemen archers in the vicinity of New York communicate at once with the undersigned,

president of the New York Archery Club. This club is a revival of the New York Archery Club, which used to hold meets in Central Park, and the Brooklyn Archery Club, whose range in Prospect Park was famous. The revival was effected last summer and a number of enthusiasts held regular matches in Sheepshead Bay race track, where Superintendent Frank T. Clarke kindly offered a range and other facilities.

Arrangements are now being made to secure an adequate and convenient range in Manhattan or Brooklyn. Announcement of this will be made at an early date. The number of applicants for membership is gratifying, and as soon as the range has been decided upon, a general meeting will be called, at which a constitution and by-laws will be adopted, new officers elected, etc. In case membership is large enough, it may be advisable to have two sections, with a range in Manhattan and one in Brooklyn. For this reason communication with everyone interested is desired. The shooting season begins as soon as winter "breaks up." In a few weeks we ought to be able to let fly our arrows.

The revival of this sport of kings in Greater New York is of historic interest. Up to about thirty years ago Brooklyn had the largest club in the county. Central Park had a big club and Spuyten Duyvil also was in line. Like some other localities, this city lost interest and the clubs ceased activity. Happily the interest did not wholly die, and when the writer set about the revival of the clubs, he found several survivors of the great days keenly interested. E. I. Horsman, who thirty years ago was the leading archery tackle manufacturer in this country, and his son, E. I. Horsman, Jr., who in those days was classed as a "boy archer"; Frank Pearsall, the well-known Brooklyn photographer, who was secretary of the Brooklyn Club and as its official photographer has over 100 negatives of the prominent people and events of the day; D. A. Nash, secretary of the New York Pilot Commission, and in the old days one of the best archers in the county, and Edward Parker, of Brooklyn, are all embers. Mr. Horsman and his son are so much impressed by the growing importance of the sport that they are preparing a revision of Horsman's "How to Train in Archery," the standard guide of thirty years

Left to right: H. S. Taylor, Chicago; H. B. Richardson, Boston; Wm. H. Thompson, Seattle; W. H. Wills, New York.

ago. Mr. Horsman, senior, is in Europe, and on his return in a few weeks will complete the work.

There is a gratifying interest in New York suburbs, which is a splendid thing for the sport. It may not set well with our Jersey City friends to call them suburbanites, but be that as it may, James Duff, of Jersey City, the veteran archery goods manufacturer, is doing great work, and his Jersey City club is now one of the strongest numerically in the country. Harry Du Bois, one of E. I. Horsman Co.'s force, tells the writer that he had a number of residents in the Oranges are organizing a club to begin operations right away with a range in West Orange. There are a number of other items of interest of this kind, all showing the extent of the archery boom that is on hereabouts.

The writer has just returned from Chicago, where he shot on Christmas day on the grounds of the Chicago Archery Association, where he learned the sport. It is a delight to go to Chicago, if only to see and talk with that veteran archer, Dr. E. B. Weston, who is justly entitled to be called dean of the sport. In Dr. Weston's office one day there were besides the doctor E. T. Rendtorff, whose work is setting the archery world by the ears; George Postgate, archery director of the Pittsburgh Athletic Association, where such excellent work is being done; H. W. Bishop, of the Chicago Association, whose scores are becoming astonishing, and myself. It was a treat to ply Rendtorff with questions and get his clear cut, well thought-out answers. You understand that Rendtorff, in a sense, is a beginner. He has been shooting in his own yard for two years and ordinarily it takes two years to get out of the beginners' class in archery. But late this last summer we began to hear of Rendtorff's wonderful practice scores, and we woke up to the fact that we had a hitherto unknown genius in the game. Since hearing of him, every archer has been anxious to see and talk with Rendtorff. This is why this meeting is here detailed. The writer wishes to inform his brother archers that when they meet Rendtorff at the Boston tournament next August, they will not only meet a man to delight their hearts, but a man to match their skill. The writer has not seen him shoot, and he has as yet had no public shooting experience; but his sound principles, coupled with what he has accomplished in practice, point to an unequalled first tournament achievement for him.

W. H. WILLS,

116 Nassau St., New York, Member of Executive Committee, National A. A.

**Adventures of Mr. Verdant Green.**

"ARCHERY was all the fashion at Brazenface. They had as fine a lawn for it as the Trinity men had, and all day long there was somebody to be seen making holes in the targets and endeavoring to realize the pose of the Apollo Belvidere; rather a difficult thing to do when you wear plaid trousers and shaggy coats. As Mr. Verdant Green felt desirous not only to uphold all the institutions of the university, but also to make himself acquainted with the sports and pastimes of the place, he forthwith joined the Archery and Cricket Clubs. He at once inspected the manufactures of Muir and Buchanan, and after selecting from their stores a fancy wood

bow with arrows, belt, quiver, guard, tips, tassels and grease pot, he felt himself to be duly prepared to represent the Toxophilite character. But the sustaining it was a more difficult thing than he had conceived, for although he thought that it would be next to impossible to miss a shot when the target was so large and the arrow went so easily from the bow, yet our hero soon discovered that even in the first steps of archery there was something to be learned, and that the mere stringing of his bow was a performance attended with considerable difficulty. It was always slipping from his instep, or twisting the wrong way, or threatening to snap in sunder, or refusing to allow his fingers to slip the knot, or doing something that was dreadfully uncomfortable, and productive of perspiration; and two or three times he was reduced to the abject necessity of asking his friends to string his bow for him.

"But when he had mastered this slight difficulty, he found that the arrows (to use Mr. Bouncer's phrase) 'wobbled,' and had a predilection for going anywhere but into the target, notwithstanding its size; and unfortunately one went into the body of the honorable Mr. Stormer's favorite Skye terrier, though, thanks to its shaggy coat and the bluntness of the arrow, it did not do a great amount of mischief. Nevertheless, the vials of Mr. Stormer's wrath were outpoured upon Verdant Green's head, and such epea pteroenta followed the winged arrow

that our hero became alarmed, and for the time foreswore archery practice."

**Information Wanted.**

EASTMAN, Ga., Jan. 14.—*Editor Forest and Stream:* Since reading your paper I have become interested in archery. I am somewhat of an archer myself, having learned the art when a boy. I understand how to make bows and arrows, but have no suitable material. Will you not inform me of places and firms where I may buy bows and arrows? Also let me know the proper material of which both bows and arrows are made, and where I could procure the material?

Is it the usual custom to buy supplies from manufactured stock of some supply house or to make such supplies for one's self? I have searched every issue of your paper for the information I need, but have learned nothing of the material.

I can make fairly good bows of yellow pine when of the proper granular structure and sufficiently dry. I make my arrows of reeds cut from the forest and afterwards dried. I can shoot pretty accurately, but I find that the reed is not sufficiently rigid to prevent lateral deflection from the target aimed at.

The furthest effective arrow flights I can make with my own make of bows and arrows is about 200 yards.

N. W. HURST.

**YACHTING**

GANANOQUE, Ont., Jan. 5.—*Editor Forest and Stream:* The above photograph may interest you as it shows two things: First, the extraordinary and summer-like condition of the St. Lawrence River on Jan. 1, 1913, when canoe sailing was possible; and second, Ralph B. Britton taking his daily practice spin in view of his

challenge for the international cup, as published in your columns in the issue of Oct. 19.

The light was faint for a snapshot with an F. 8 (my shutter has no slow automatic cut-off), but it shows Ralph Britton in characteristic action on the sliding seat.

VICTOR J. SLOCUM.

**Club Elections.**

**WHITESTONE Y. C.**

THE Whitestone Y. C. elected officers as follows: Frederick M. Van Nostrand, Commodore; William A. Banta, Vice-Commodore; George V. Vanderpool, Treasurer; Richard Battin, Jr., Secretary; Grant S. Kelly, R. A. Freeman, Joseph Ruff and Frederick Wittman, Governors.

**CORINTHIAN Y. C.**

THE Corinthian Y. C., of Philadelphia, elected George W. Childs Drexel as its commodore to succeed E. W. Clarke, who declined re-election. There are now more than 200 members of the club and 111 yachts carrying the Corinthian Y. C. pennant.

**EASTERN Y. C.**

ROBERT TREAT PAINE, 2D, of the sloop yacht *Shinna*, was re-elected commodore of the Eastern Y. C. The other officers are Herbert M. Sears, Vice-Commodore; Henry Taggard, Secretary; Patrick T. Jackson, Treasurer; George A. Goddard and Frank B. McQuenten, members of council at large; Louis M. Clark, Henry A. Frothingham, Frederick M. Hoyt, Henry A. Morss and William B. Stearn, Regatta Committee. The rules adopted by the Atlantic coast conference were accepted by the club with some few amendments for local conditions.

**MANHASSET BAY Y. C.**

THE annual meeting of the Manhasset Bay Y. C., which was recently held, elected officers as follows: Commodore, Henry D. Walbridge; Vice-Commodore, John W. Bird; Rear-Commodore, Edgar A. Sierck; Secretary, B. G. Loomis; Treasurer, Edward J. West; Measurer, William Gardner; Trustees, Class of 1915, John T. O'Rourke, Charles M. Gould. The club is in a flourishing condition. B. G. Loomis, the new treasurer, is what Mayor Gaynor termed Fosdick—a cyclone in boots. His motto is, "Tell me what's wanted and tie the stops on yourself; I will get it." And he will.

**Canoeing**

**A. C. A. Membership.**

**NEW MEMBERS PROPOSED.**

Atlantic Division.—William Walter, Jr., 4617 Oakland street, Frankford, Philadelphia, Pa., by Joseph W. Broomhead; Harold G. Byington, 37 Croton Lane, Ossining, N. Y., by A. Rivers Genet; J. Howard Fell, 1222 Sansom street, Philadelphia, Pa., by Chas. M. Swart.

**MEMBERS TRANSFERRED.**

Atlantic Division to Central Division.—5292, Everett V. Walker, 405 East street, Warren, Pa.  
Atlantic Division to Western Division.—5660, Arthur P. Gewehr, c/o Deering, Milliken & Co., 411 South Fifth avenue, Chicago, Ill.

**RESIGNATIONS.**

Central Division.—5661, Fred C. Hanker, Wilkensburg, Pa.  
Eastern Division.—6216, Wallace C. Ray, Providence, R. I.

**TRAP SHOOTING**

**Fixtures.**

*If you want your shoot to be announced here, send a notice like the following:*

**REGISTERED TOURNAMENTS.**

- Feb. 22.—Birmingham (Ala.) G. C. tournament. O. L. Garl, Sec'y.
- April 8-10.—San Antonio, Tex.—The Interstate Association's Southwestern Handicap, under auspices of the San Antonio Gun Club; \$1,000 added money. Winner of first place in the Southwestern Handicap guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. E. E. Shaner, Mgr., Pittsburgh, Pa.
- April 8-10.—Pond Creek, Okla.—Oklahoma State tournament, under auspices of Pond Creek G. C. Wm. M. Hite, Mgr.
- April 10.—Atglen (Pa.) G. C. Lloyd R. Lewis, Mgr.
- April 16.—Mt. Holly (N. J.) G. C. A. J. Delleite, Sec'y.
- April 15-17.—Montgomery, Ala.—Interstate Association's eighth Southern Handicap tournament, under auspices Capital City G. C.; \$1,000 added money. Winner of first place guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. Elmer E. Shaner, Mgr., Pittsburgh.
- April 23.—Grundy Center (Ia.) G. C. Frank W. Callaway, Sec'y.
- April 26.—Philadelphia, Pa.—Meadow Spring G. C. Wm. F. Letford, Sec'y.
- April 29.—Guernsey, Ia.—Du Pont G. C. J. W. Dobbins, President.
- May 1-2.—Philadelphia, Pa.—Keystone Shooting League. G. F. Hamlin, Sec'y.
- May 5-6.—Laramie, Wyo.—Gem City Gun Club. Tyler A. Rogers, Pres.
- May 6-7.—Eagle Grove (Ia.) G. C. A. L. Yearous, Sec.
- May 7.—Seneca Falls (N. Y.) G. C. C. L. Frantz, Mgr.
- May 7.—Hicksville (O.) G. C. C. E. Maxwell, Sec'y.
- May 8-9.—Kankakee (Ill.) G. C. E. F. Radeke, Sec'y.
- May 13-15.—York, Pa.—Pennsylvania State tournament, under auspices of York City G. C. N. M. McSherry, Sec'y.
- May 14-15.—Waterloo (Ia.) G. C. Nick Webber, Pres.
- May 22.—Aurelia (Ia.) G. C. Frank R. Welch, Sec'y.
- May 22.—Syracuse, N. Y.—Onondaga County G. C. T. E. Clay, Pres.
- May 27-29.—Fort Dodge, Ia.—Iowa State tournament, under auspices of the Fort Dodge Gun Club. Jos. Kautzky, Mgr.
- May 27-29.—N. Platte, Neb.—Nebraska State tournament, under auspices of Buffalo Bill G. C. J. C. Den, Sec'y.
- May 30.—Menominee Falls (Wis.) G. C. J. A. Pike, Sec.
- June 2.—Bunker Hill (Ill.) G. C. C. E. Pettengill, Sec.
- June 3.—Maquoketa (Ia.) G. C. E. L. Hinckley, Sec'y.
- June 4-6.—Circleville, O.—Ohio State tournament, under auspices of Ideal G. C. J. S. Ritt, Sec'y.
- June 5.—S. Madison, Wis.—Triangle G. C. H. G. Waterman, Sec'y.
- June 9-12.—Buffalo, N. Y.—N. Y. State Sportsmen's Association tournament. C. F. Lambert, Sec'y.
- June 10-12.—Buffalo, N. Y.—New York State tournament, under auspices of the Buffalo Audubon Club. C. F. Lambert, Sec'y.
- June 10-12.—Eugene, Ore.—Oregon State tournament, under auspices of Eugene G. C. E. A. Bean, Sec'y.
- June 12.—Brooklyn (Pa.) R. and G. C. Myron O. Tiffany, Pres.
- June 12-13.—Huntington, W. Va.—West Virginia State tournament, under auspices of Huntington G. C. I. R. Shepherd, Pres.
- June 16-18.—Boise, Idaho.—Idaho State tournament, under auspices of Idaho State Sportsmen's Association. E. F. Walton, Sec'y.
- June 17-20.—Dayton, O.—Interstate Association's fourteenth Grand American Handicap tournament, on grounds of N. C. R. Gun Club; \$1,500 added. Winner of first prize guaranteed \$600 and a trophy; winners of second and third places guaranteed \$500 and \$400 respectively. Elmer E. Shaner, Mgr., Pittsburgh.
- June 26.—Fayetteville (N. Y.) G. C. C. C. Snook, Sec'y.
- June 26-27.—Adel (Ia.) G. C. Chas. F. Clarke, Sec'y.
- July 8.—Dows (Ia.) G. C. W. J. Wilson, Sec'y.
- July 8-10.—Cedar Point, O.—The Indians. D. H. Eaton, Sec'y.
- July 8-13.—Cedar Point, O.—The Indians' tournament. D. H. Eaton, Sec'y, Cincinnati, O.
- July 9-10.—Jersey Shore (Pa.) G. C. H. Myers, Sec'y.
- July 12.—Holmesburg Junction, Pa.—S. S. White G. C. W. E. Robinson, Sec'y.
- July 15-17.—Wilmington, Del.—Interstate Association's eighth Eastern Handicap tournament, under auspices of Du Pont G. C.; \$1,000 added money. Winner of first place guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. Elmer E. Shaner, Mgr., Pittsburgh.
- July 21-25.—Raymond, Wash.—Pacific Indians. F. C. Riehl, Sec'y.
- Aug. 5-7.—Omaha, Neb.—The Interstate Association's eighth Western Handicap tournament, under auspices of the Omaha Gun Club; \$1,000 added money. Winner of first place in the Western Handicap guaranteed \$200 and trophy; winners of second and third places guaranteed \$150 and \$100 respectively. E. E. Shaner, Mgr., Pittsburgh, Pa.
- Aug. 9.—Holmesburg Junction, Pa.—Independent G. C. Chas. H. Newcomb, Sec'y.
- Aug. 15-16.—Dickinson (N. D.) G. C. J. W. Sturgeon, Sec'y.

- Aug. 21-22.—Mason City, Ia.—Iowa State Sportsmen's Association's Post-Season tournament, under auspices of Cerro Gordo G. C. R. P. Monplasure, Sec'y.
- Aug. 26.—Mechanicsburg (O.) G. C. F. J. Coburn, Sec.
- Sept. 1.—Ogdensburg (N. Y.) S. A. J. M. Morley, Sec.
- Sept. 4.—London (Ohio) G. C. H. L. Hildinger, Sec'y.
- Sept. 17-19.—Atlantic City, N. J.—Westy Hogans, Bernard Elsesser, Sec'y.

**DRIVERS AND TWISTERS.**

E. M. Daniel, son of the late United States Senator John W. Daniel, and himself an attorney, leaves the ranks of amateur trapshooters to become a professional, having accepted a position with a sporting goods house. He twice held the Virginia amateur championship. During 1912 Mr. Daniel broke 2,037 out of 2,180 targets in registered events.

Jersey City Gun Club will hold an all-day shoot on Lincoln's Birthday, Feb. 12. There will be ten events of 20 birds, each, entrance \$1.40 in each event; total \$14, targets included at 2 cents. Two dollars added to each event, and to the contestant shooting through the entire program and having the highest average, the club will give \$5. Money divided Rose system, 5, 3, 2, 1.

The New Jersey State trapshooting tournament will be held at Red Bank on June 5, 6 and 7, on the grounds of the Riverside Gun Club. This was decided at the last meeting of a committee from the State Sportsmen's Association. The committee representing the State Association consisted of George Piercy, of Jersey City, president of the Association; Charles T. Day, Sr., of Newark, secretary; B. M. Shanley and Charles T. Day, Jr., both of Newark. The Riverside Club was represented by Alfred P. Ivins, president; George Bray and Wm. Chandler.

We have received from Mr. Elmer E. Shaner, Tournament Manager of the Interstate Association, the following announcements:

"The fourteenth Grand American Handicap tournament will be held at Dayton, O., June 17, 18, 19 and 20, on the grounds of the N. C. R. Gun Club. There will be \$1,500 added money. In addition, the winners of first, second and third places in the Grand American Handicap proper will be guaranteed \$600, \$500 and \$400 respectively. The winner of first place will also receive a handsome trophy."

"The Interstate Association's eighth Eastern Handicap tournament will be held at Wilmington, Del., July 15, 16 and 17, under the auspices of the Du Pont Gun Club. There will be \$1,000 added money."

"The Interstate Association's eighth Southern Handicap tournament will be held at Montgomery, Ala., April 15, 16 and 17, under the auspices of the Capital City Gun Club. There will be \$1,000 added money."

W. G. BEECROFT.

**Manhasset Bay Y. C.**

PORT WASHINGTON, L. I., Jan. 19.—To-day was no day to expect an automobile enthusiast to go trap-shooting, so only seven trappists got into the rock-breaking contest to-day. It may be that B. G. Loomis couldn't have won all the events, sufficient unto the day, however, is the fact that he won all he entered; limb on January cup with (3) 23, and season trophy handicap with (3) 22, and he just naturally showed class in each of these events. D. E. Smith dragged away take-home trophy with 24 from a gift of 2. In the 15-target scratch, E. A. Sierck was good for 11, one up on Tomlinson. Scores:

January cup, 25 targets, handicap:			
B G Loomis.....	3 23	D E Smith.....	2 20
G M Gould.....	5 21	J Tomlinson.....	0 17
E A Sierck.....	3 20	F L Richards.....	4 16
Season trophy, 25 targets, handicap:			
B G Loomis.....	3 22	F L Richards.....	4 17
D E Smith.....	2 20	G M Gould.....	5 16
E A Sierck.....	3 18	E G Unitt.....	0 13
Take-home trophy, handicap, 25 targets:			
D E Smith.....	2 24	E A Sierck.....	3 19
G M Gould.....	5 23	J Tomlinson.....	0 18
Fifteen targets, scratch:			
E A Sierck.....	11	D E Smith.....	10
F L Richards.....	11	G M Gould.....	9
J Tomlinson.....	10		

**"Dead Shot" High Average Trophy.**

The American Powder Mills offers to the amateur trapshooters a solid gold watch fob, which will be given to any shooter winning the high amateur average of a registered tournament shooting "Dead Shot" powder throughout the tournament. High average of tournament must be figured on targets thrown on the regular program from 16yds. only. No shooter can win more than one Dead Shot fob. However, an additional prize of a solid gold diamond watch fob will be given at the end of the year to the amateur shooter winning the highest number of points at tournaments during the year. Points to be won as follows:

Any shooter winning high average at 16yd. targets for a three days' registered tournament will be given six points; for a two days' registered tournament, four points; for a one day registered tournament, two points, provided he wins the high amateur average for the entire tournament, shooting Dead Shot.

At a registered tournament the shooter winning high amateur average for the entire tournament will receive a Dead Shot watch fob; also points as per above. After receiving one fob, any future averages he may win will be credited to him for the diamond fob, which will be given at the end of the year to the shooter having the highest number of points. (See rule as to unregistered tournaments.)

At unregistered tournaments the following rules govern:

The shoot must be an advertised tournament—that is, advertised in some of the sporting papers, such as American Field, 801 Masonic Temple, Chicago, Ill.; Sportsman's Review, 15-17 West Sixth street, Cincinnati; Sporting Life, 34 South Third street, Philadelphia; FOREST AND STREAM, 127 Franklin street, New York; Arms and Man, 1502 H street, N. W., Washington, D. C., or any of the regular sporting magazines.

Local club meetings or practice shoots will not be classed as a tournament.

The shooter winning the high amateur average of an unregistered tournament will not be given a fob. He will, however, be credited with one point for winning the high amateur average of a one day unregistered shoot; two points for winning a two days' unregistered shoot, etc; that is, he will be given one point for each day of the tournament, provided he wins high amateur average for the entire tournament, shooting Dead Shot powder.

No shooter is eligible to win the diamond fob unless he has at some time during the year won a Dead Shot watch fob by winning the high amateur average at some registered tournament. However, it will not be necessary for a man to win the average at a registered tournament before points he may have won at unregistered tournaments commence to count.

Points, as above stated, will be given on all tournaments from Jan. 1 to Dec. 31, 1913.

Certificate as to a man's winning the high amateur average at a tournament must be made and signed by some professional shooter attending the tournament. Same must be mailed to the American Powder Mills, 1730 Tribune Building, Chicago, Ill.

The names of the shooters who have won fobs or points on the diamond trophy will be published once each month in the sporting papers. At the end of the year the shooter having the greatest number of points will secure the diamond trophy.

**Larchmont Y. C.**

LARCHMONT, N. Y., Jan. 19.—O. C. Hoyt, a new trapper, won four of the eleven events here to-day, each one a take-home trophy. He won the 100-target handicap cup with (28) 93, and broke 100 in the 150-target shoot. B. M. Higginson was high gun with 135 out of 150. Ralph Spotts, Jr., a thirteen-year-old chip of the old block, broke 47 out of 100, and in the handicap scored (32) 79. The scores:

January cup, 25 targets, handicap:	
J G Batterson..... 4 25	S Halstead ..... 6 23
B M Higginson..... 3 25	R L Spotts..... 0 22

**White Plains Gun Club.**

WHITE PLAINS, N. Y., Jan. 15.—Small attendance braved the elements to-day to crack rocks for the take-home trophy. Dr. Martin and Edward Townsend shot remarkably, going straight on 50. Dr. Martin got the shoot-off. Third went to H. O. Allyn with 47. Two jolly boosters were present, T. Davis and H. Keller.

Registered Tournaments.

E. REED SHANER, the new secretary of Interstate Association, has blossomed out handsomely on his job with issuance of an artistic booklet, telling comprehensively why and whereof of the Association.

"The Interstate Association's primary object in registering tournaments is to encourage State associations, leagues of gun clubs and special organizations; therefore, it is the Association's present intention to do all in its power to urge and foster the formation of State associations and leagues of gun clubs in those States where none now exist.

"A broad experience has demonstrated that the registration of tournaments confers many important advantages to trapshooting activities, but that, if not safeguarded and controlled by proper restrictions, it is subject to many abuses, petty and serious. The promoter, actuated by purely business reasons, is the chief offender.

"There is such a thing as too much shooting, with its harmful reactions. Again, under the old conditions, a strong club holding a successful tournament often made excessive profits, which were out of all proportion as compared to the effort and expense of holding the tournament.

"The new conditions eliminate the undesirable features, while developing the sport on lines that are broad, wholesome and permanent. The matter of good sportsmanship is given full consideration.

"In place of program advertising, the Interstate Association has substituted a yearly contribution of \$20,000, to be apportioned to State Association tournaments and to the tournaments of gun clubs members of State Associations as herein defined.

"Thus the moneys which heretofore went to hundreds of clubs, weak and strong, now go directly to the shooters, much to their enrichment. Nevertheless, the clubs directly benefit by the changes, since more shooters support the registered tournaments because of the material inducements offered in the way of added moneys, and because of the greater number of shooters who shoot through the entire program.

"At all times there is a reasonable guarantee that when a tournament is registered it is worthy of the confidence and support of the trapshooting fraternity, and it has the dignity and importance incident to good auspices.

"The yearly averages, compiled from the records of tournaments thus registered and standardized, are incomparably more valuable than are the averages compiled from the data of a multitude of clubs whose standards of competition are loose or non-existent.

"All this in a particular way—in a general way, the present requirements of registration make for responsibility, permanency and good sportsmanship, both of clubs and shooters. At present the mushroom club and speculative promoter have no standing.

"A summarized report of the operation during the year 1912 shows that 250 tournaments were registered, of which number, 201 were conducted under the Squier money-back system; that \$20,000 was contributed by the Interstate Association to gun clubs and State associations and leagues of gun clubs; that \$23,003.62 was paid back to amateurs to cover their losses, and that \$26,680.63 in average money was divided among amateurs after all of said losses were paid back.

"For the years 1911 and 1912 the Interstate Association outlined the program of events, specified what system of money division was to be used, and stipulated how its contribution was to be applied. This plan was quite successful in its workings, and gave the very best of satisfaction, but the Association thinks the time has now arrived for such matters to be left to the clubs holding the tournaments to arrange as they think will best suit their particular localities.

"In the apportionment of the \$20,000 contributed by the Interstate Association, the States are divided into three classes—A, B, and C.

"Class A includes States with a population of 3,000,000 or over. To each State association tournament of this class the Interstate Association will contribute \$300.

"Class B includes States with a population of under 3,000,000 to over 1,000,000. To each State Association tournament of this class the Interstate Association will contribute \$200.

"Class C includes States with a population of under 1,000,000. To each State Association tournament of this class the Interstate Association will contribute \$100.

"The matter of population will be determined by the census of 1910.

"A State association in a Class A or Class B State must have a membership of ten or more bona fide gun

clubs located in ten or more different cities or towns.

"A State Association in a Class C State must have a membership of five or more bona fide gun clubs located in five or more different cities or towns.

"The Interstate Association, at its discretion, may exact proof of the proper organization of any State Association, which applies for a registered tournament.

"The foregoing applies to State Associations, or to a league of gun clubs in a State which has no State Association.

"The following applies to individual gun clubs: Any gun club, a member in good standing in a State Association or of a league of gun clubs, may apply for registration. Applications from gun clubs not members of a State Association or of a league of gun clubs will not be considered.

"To each two-day approved tournament the Interstate Association will contribute \$100.

"To each one-day approved tournament the Interstate Association will contribute \$50.

When a gun club applies for a two-day tournament the granting of such application shall depend on the attendance at and success of previous registered tournaments of said club, if any were held. The determination of whether it shall be a one-day or two-day tournament is at the discretion of the Interstate Association.

"The Interstate Association would respectfully suggest that the regular program for a registered tournament consists of not less than 150 targets nor more than 200 targets per day.

"The records of the Interstate Association show that the most successful tournaments held during the past few years were those of one day's duration, and that many two-day tournaments which had a good attendance the first day were failures in point of attendance the second day. Therefore, at the annual meeting of the directors of the Interstate Association, held Dec. 6, 1912, the following resolution was adopted:

"Any club that held a two-day registered tournament in 1911 or 1912 at which the attendance did not reach 25 or more entries the second day shall not be granted registration for more than a one-day tournament, unless said club shows increased strength and is able to assure the Association of prospective success."

"Applications for one-day registered tournaments will be given the preference in 1913. Preference will also be given to the applications of clubs that will add money to their respective programs for the benefit of the shooters.

"Any gun club holding a registered tournament shall give one page of its program, of which the copy shall be furnished by the Interstate Association, for purposes of announcing the amount of money contributed by the Interstate Association and for purposes of publicity.

Gun clubs located in sections where freight rates are excessively high, thus making targets cost considerably more than they do in the East, may charge 2½ cents or 3 cents per target, if it is customary to make such charge at tournaments.

"The Interstate Association's contribution will not be paid to any club until such time as such club, holding a registered tournament, shall have sent in the requisite report of the tournament to the Interstate Association.

"When the fund of \$20,000 is exhausted, tournaments will be registered, but without any contribution of added money by the Interstate Association.

"Gun clubs located in States where there are no State Associations or leagues of gun clubs may register their tournaments, but no contribution will be made to these tournaments. Scores made at such tournaments become a part of the official averages for the year.

"Send applications for registered tournaments to Interstate Association, E. Reed Shaner, Sec'y, 219 Coltart avenue, Pittsburgh, Pa."

Bergen Beach Gun Club.

BROOKLYN, N. Y., Jan. 14.—Bergen Beach Gun Club held its monthly shoot-to-day. Ideal weather gave opportunity for good scores and good sport. The principal event was 100 targets, which ran into a tie between Russell and Dr. Sauer on 89. Russell won the shoot-off.

Table with 2 columns: Name and Score. Includes A Russell 17 89, Dr Sauer 1 89, \*H I Gibbs 0 88, G S K Remsen 5 87, H I Shannon 6 86, W D Hinds 2 85, G Kelly 5 84, H Tracy 20 84, \*J Fanning 0 84, P von Boeckman 1 84, H Allen 8 83, J Gaughan 8 82, \*C von Lengerke 0 81. Also lists other names like W L Groll, P M Moeller, H Edwards, J Dannefelser, L Schorty, J E Smith, E M Huggins, \*H Keller, II W Dreyer, D Jones, \*R Schneider, \*T Davis.

\*Professionals.

Rhode Island C. C.

PROVIDENCE, R. I., Jan. 11.—The third leg for the president's cup was shot for at the Rhode Island Country Club to-day. Dr. Charles H. Gardner was high with 43 out of 50. In the two previous rounds the scores were (50 targets in each case): H. T. Merriman 42, 35; K. F. Wood 25, 34; J. B. Lewis 38, 38; I. B. Merriman 31, 28.

To-day's scores, 50 targets: L. C. Tingley 26, R. W. Comstock, Jr., 7, L. C. Blanding 27, H. T. Merriman 35, Dr. C. H. Gardner 43, H. B. Denning 30, J. B. Lewis 30, A. Hoffman 35, K. F. Wood 32, Mrs. V. M. Wilson, Jr., 10.

Minikahda Club.

MINNEAPOLIS, Minn., Jan. 11.—The trap team of the Minikahda Club defeated the Town and Country Club here to-day, 344 to 325, taking permanent possession of the silver cup that has been in competition during the past three years. Starbeck, of the Minikahdians, was high gun with 41 out of 50.

Chicago Gun Club.

CHICAGO, Ill., Jan. 11.—The weather to-day was not very pleasant for target shooting, as it was cloudy and dark, a fine mist falling the greater part of the afternoon, threatening to turn to snow at most any time. Fourteen shooters came out to enjoy themselves. Fetherston repeated his win of last week by landing the high score of the day in the first 50 target event, scoring 49. Young was a close second with 48, while Graham came in third with 46.

Goode and Silver divided first place honors in the second fifty, when each broke 46.

In the double events, Jay Graham was right on the job, breaking 23 out of his first 12 pairs, and 22 in the second frame. Barto gave him a good race in both these events, as Joe broke 21 in each event. Young and Graham finished up their scores with a 25 straight and won the last event on singles. Harpham was going along fine, when his gun went wrong and he dropped down with the borrowed one.

Table with 2 columns: Name and Score. Lists events and targets for L M Fetherston, J S Young, O P Goode, E Silver, J B Barto, E L Harpham, C B Barnes, C W May, F B Fox, T V Cannon, J K Graham, A H Ammann, H C Kirkwood, M Ballou.

Event No. 8 was gun-below-the-elbow. Jan. 12.—A clear, bright day, but rather cold and crisp, as the thermometer hovered close to the zero mark, kept the list of shooters down to thirteen, and they found the warm club house quite comfortable after shooting through each frame.

Ralph Kuss again headed the list by breaking a total of 94 out of 100 in two 50-target events—quite an improvement over last Sunday, when he cleaned up the bunch with 77 in the gale and sleet. Seelig, Sr., Silver and Miller each scored 45 in the first 50, while Crocker came in for third place on 42. Bills broke 49 out of 50 in the first 50, but dropped 7 in the second event. George Eck was high in event No. 3, shooting with gun below armpit, breaking 22 out of 25. Krammer found that by slowing up just a trifle, he breaks more targets, scoring 45 out of 50 in two extra frames he shot. He has been in the habit of trying to break them almost before they leave the trap. Robert and Green came over from Hammond to spend the afternoon with us.

Table with 2 columns: Name and Score. Lists events and targets for R Kuss, C R Seelig, E Silver, P Miller, O W Crocker, Geo Eck, B L Kammerer, C F Seelig, W D Stannard, F G Bills, W Wolfe, F E Probert, H Green.

Events 3 and 4 were gun-below-the-armpit.

Medford (Okla.) Gun Club.

MEDFORD, Okla., Jan. 17.—A good bunch turned out to-day to pay their respects to Jimmie Keating, a trade representative, the firm he represents having sent several of the members a sample box of ten shells. We held a Jimmie Keating special. The following are the scores:

Table with 2 columns: Name and Score. Lists Hutchinson, Dotts, Chism, Hardy, Strider, Walling, Wilson, Brown, Eaton.

Table with 2 columns: Name and Score. Lists Striker, Hardy, Hutchinson, Blood, Walling, Anderson, Chism. Includes sub-headers 'Shot at, Broke' and 'Shot at, Broke'.

The year 1912 was a very successful one for our gun club. We commenced the year with an expert trap, under a rudely constructed trap house, and a membership of seven or eight. We increased our membership to thirty-six, added an Ideal-Leggett trap and new trap house, we built a nice club house and have a two-inch plank platform on the firing line—everything modern and up-to-now.

We believe we are the only gun club in the United States that kept an accurate record of every shot fired by every member of our club over our trap.

During the year we held a merchandise shoot, the Grant county championship, and a one-day registered tournament. All were successful, leaving us a nice balance in the treasury. We have planned for the new year monthly handicap shoots and a high average trophy for the year. Our record shows that 54,108 rounds of ammunition were fired over our trap.

We shoot every Friday, and visiting sportsmen are invited to visit us.

I. V. HARDY, Sec'y.

**Buffalo Audubon Club.**

BUFFALO, N. Y., Jan. 20.—The New York State Sportsman's Association's annual meeting and tournament will be held this year on June 10, 11 and 12, under the auspices of the Buffalo Audubon Club, and already considerable work has been done toward making the shoot one of the best in the country, and inquiries regarding date, programs, etc., are already coming in, thus indicating a State-wide interest. The officers are: B. V. Covert President, and C. F. Lambert, Secretary-Treasurer. The shoot will be registered with the Interstate Association.

The Audubon Club has gone on record as favoring the Weeks and McLean bills now before Congress, for the protection and propagation of our native and the migratory birds, and letters have been received from Congressmen Smith and Driscoll, also from Senators Root and O'Grman, signifying their intention of supporting the same.

High winds and rain interfered with the regular shoot yesterday, but about fifteen members attended. Dr. Wootton, who has been out of the game for some time, showed the boys he has not lost his eye, by tying for first honors with Fish, with Hammond and McCutcheon next in order.

Joe Jennings, champion of Canada, stopped off on his way to Pinehurst, where he, with Messrs. Wright, Kelsey, Covert and Hopper, of the Audubons, will compete against the world's best shots. Scores:

Targets:	15	20	20	20	25
Wright	10	13	14	17	20
McCutcheon	11	12	16	16	21
Hammond	12	18	16	15	16

**Intercollegiate Trap Notes.**

NEW HAVEN, Conn., Jan. 16.—Two intercollegiate gun team meets are held each year, one in the fall, the other in the spring. Yale, Harvard, Princeton, Dartmouth, and Pennsylvania have, till this past fall, entered teams in these shoots. Dartmouth and Pennsylvania being unable to be represented this year, Yale, Harvard and Princeton met over the Yale traps on Nov. 23, Yale winning the meet for the eighth consecutive year by the following score: Yale 339, Princeton 335, Harvard 360.

A high wind made the targets difficult, and as a result, the scores are lower than usual, Capt. N. R. White, of Princeton, taking high gun with a total of 85 out of 100. Nimick, of Princeton, followed with 83. Yale's shooting was very close—a fact which gave them the victory over Princeton. Both Princeton and Harvard were erratic, which lowered their totals to a marked degree. Thompson, of Yale, and Bullock, of Harvard, deserve special mention, both of these men making high scores considering the weather conditions.

Besides the intercollegiate shoots, Yale, Harvard and Princeton hold dual matches. Yale this fall won both of these events, beating Harvard and Princeton by 16 birds.

Interest in trapshooting at Yale has increased remarkably in the past few years, the Yale Gun Club now totalling about sixty members. Two practice shoots are held each week, either among the members or with club teams near New Haven. These practice shoots are held on Wednesday and Saturday afternoons, and we should be glad to welcome any visitor who may be interested in trapshooting. J. L. B.

**The Du Pont Gun Club.**

WILMINGTON, Del., Jan. 18.—Brother Banks calls today's program a bill of fare. I should characterize it as a bill of excellence. The three main features alone were enough to charm the heart and satisfy the longings of those who enjoy competition in the fraternity of aerosaucer disintegrators. The T. Coleman du Pont spoon event carded fifty-one contestants—and that's the word right here—ten of the aggregation were, however, from the development squad, too old for spoons, now at the fork age, or who had more intimate affiliations elsewhere. High eligibles were J. H. Minnick, Eugene du Pont and Billy Foord (tied at 23) in Class A; W. B. Smith with 21 in Class B; W. J. Highfield with 21 in Class C; W. F. Jensen with 20 in Class D; D. S. Wood, S. W. Long tied on 14 in Class E.

J. R. Graham, advance man for Hercules, made what, under existing weather conditions, was an exceptional score—96 out of 100.

In the Eugene E. du Pont team trophy contests Z. H. Lofland and Dr. E. Q. Bullock scored the maximum of 50, and added 4 points to their totals. J. B. Grier and W. B. Smith, Jr., recorded a total of 49 and got 3 points each. In the third place, and with a credit of 2 points each, were three teams: C. E. Springer and J. W. Anderson, Jr., B. F. Stevens and W. F. Jensen, Dr. Arthur Patterson and S. G. David. In the fourth place, with a total of 47, was the team made up of J. H. Minnick and Victor du Pont. Fourteen teams took part.

Challenge matches for the class cups came out as follows: Class A—H. P. Carlon 42, beat L. C. Lyon 34. Class B—N. K. Smith, 39, defeated C. T. Martin, 35. Class C—Albert Bird, 34, defeated J. H. Squires, 20. Class D—W. F. Jensen, 38, defeated M. E. Ross 33. Owing to Mr. Jensen's winning the spoon in Class D to-day, this moves him up into Class C, and consequent-

**A WORLD'S RECORD TARGET**

Composite target, actual size, of 200 shots fired by G. W. Chesley in ten different matches in the Inter-Club Series of 1911-12. Score 1990 out of 2000.—The World's Record. Made with Winchester .22 Long Rifle "Lesmok" Cartridges and a Winchester Musket.

**I**F you go in for indoor target shooting with rifle or pistol, of course you want to excel. To do so you must use uniform, dependable ammunition. Some makes of cartridges are as variable as the weather. Some shots go high, some go low, and some don't go at all. For accuracy and all around satisfaction, you can bank on

# WINCHESTER

## Rifle and Pistol Cartridges

In all kinds of competition they continue to excel. They are made by people who have learned in making firearms many fine points about cartridges that could be learned in no other way. No matter what the make or style of your favorite arm is, you can bring out its possibilities to the fullest degree by using Winchester make of cartridges. Dealers everywhere sell them, and a trial will convince you that it is worth while to insist upon having

# THE W BRAND

ly the Class D cup will be up for open competition at the next shoot.

The scores made in the Coleman du Pont spoon contests were:

Class A—J. H. Minnick, E. E. du Pont and W. M. Foord 23 each; W. Edman and J. B. McHugh 21; W. G. Wood, H. P. Carlon and W. M. Hammond 18, L. C. Lyon 14.

Class B—W. B. Smith, Jr., 21; N. K. Smith, Victor du Pont, Dr. A. Patterson and Clyde Leedom 20; J. W. Anderson, Jr., H. W. Bush and Stanley Tuchten 19; L. L. Jarrell 18; C. T. Martin 17, William Coyne 16.

Class C—W. J. Highfield 21; Z. H. Lofland and J. B. Grier 20; T. W. Matthewson, C. E. Springer, H. T. Reed and B. F. Stevens 19; G. Frank Lord 17; Dr. Betts 16, and R. S. Wood 13.

Class D—W. F. Jensen 20, Dr. E. Q. Bullock 18; M. E. Ross and S. G. David 17; J. H. Squires 14; J. T. Birch and W. G. Robelen 12.

Class E—D. S. Wood and S. Wesley Long 14; J. R. Bailey 10.

The scores made by those not eligible to compete for the spoons were: J. R. Graham 23, Edward Banks 22, W. S. Colfax, Jr., and Hugh Jackson 21, J. T. Skelly 19, G. A. Hill 17, J. H. Thomas 15, T. E. Doremus 14, C. W. Pappenheim 10, and F. W. Wilson 3.

**Dunkirk Gun Club.**

DUNKIRK, N. Y., Jan. 13.—Following are the scores made at our monthly shoot, held Jan. 12 at the club's grounds. Most of the boys shot at 75 targets. The weather was very cold, and the wind blew a gale, but for all that the boys seemed to have a good time.

Leyer was high gun in Class A for the prize shoot, No. 1, with 23. Schweda and J. Houser tied with 19 each in Class B. Houser won on the shoot-off. G. Houser and Flanigan tied with 16 each in Class C, and Houser won the shoot-off. The fourth try for the Stevens trophy was shot off with Schweda still in the lead:

Tyler	19 20 14	Leyer	23 22 22
Parker	19 20 17	Koch	11 14 17
Schweda	19 19 15	Anderson	13 13 12
McCane	8 17 11	Palmer	21 .. ..
G Houser	16 19 13	Sullivan	13 13 16
J Houser	19 21 22	Kinn	16 12 16
Flanigan	16 9 15	Murphy	17 21 20
Hopper	20 19 ..	Loeb	15 18 ..
Wrrattan	16 23 ..	Kale	16 17 14

#### New York A. C.

PELHAM MANOR, N. Y., Jan. 18.—A real line of rotten weather was handed out here to-day, but even fog, rain and mist rising from channel mud succeeding in keeping scores down.

Scratch cup was taken by B. M. Higginson with 94, which (-) speaking, was both sum and some shooting. Four ties were recorded on January cup, which finally was won by J. G. Batterson. Thompson trophy also went into a tie with a finality of (7) 25 for R. R. Debacher. Stein cup fell under the unanimous rule, after which Tom Lenane (4) 25 went home with the bacon. Travers Island trophy had several get together with no shoot-off. Handicap cup slipped over to J. G. Batterson (20) 104, while Stein got distance handicap with 22 from 16 yards. Scores:

#### Delaware Sportsmen's Association.

At the annual meeting of the Delaware Sportsmen's Association recently the following officers for the ensuing year were elected: President, Dr. Horace Betts, Wilmington, Del.; Vice-President, A. B. Richardson, Dover, Del.; Secretary and Treasurer, W. A. Joslyn, Wilmington, Del.; Board of Directors: O. N. Melson, Marshallton, Del.; W. E. Edmanson, Newport, Del.; Dr. Horace Betts, Wilmington; A. B. Richardson, Dover; W. A. Joslyn, Wilmington.  
The Wilmington & Philadelphia Traction Company's Trapshooting Club was unanimously elected to membership. The Delaware State shoot was awarded to the Du Pont Gun Club, the proposed dates being May 30 and 31.

**Siwanoy Country Club.**

Mr. VERNON, N. Y., Jan. 18.—Our very active Mr. L. G. Bond arranged what was termed a "versatility shoot" for the Siwanoy Country Club and a score of the members of the Gun Section, who braved the fog and rain, had their fill of thrills before the afternoon was over. The two very handsome trophies presented by this same active member were won by Joe Donovan and Zack Offutt in the order named. The regulations of the shoot were as follows: Shots at broken targets not counted. Shots out of turn called "lost bird." No balks allowed. Because of the unusual styles of shooting, any man with a shell in his gun who was not on the line facing the trap was disqualified.

The five highest men in each event received points—5 for the highest, for the next, etc. In case of tie in any one event, points were divided. In case of tie in the final totals, each contestant faced the traps alone for 25 birds, club handicaps with an additional handicap of one to the fastest shooter.

Event No. 1, 25 birds, club handicap: (As it was desired to make speed a factor, the men in the squad finishing in the shortest time received an additional handicap of one bird.)

	Handicap.	Total.	Points.
J P Donovan	4	25	5
Dr Barnard	5	24	3½
H G Smith	5	24	3½
L D Hill	3	23	1½
G F Pelham	1	23	1½

Event No. 2, 7 birds or less, shift every shot, miss-and-out:

	Points.		Points.
G F Pelham	4½	Z C Offutt	¼
W Thorpe	4½	M R Guggenheim	¼
Dr Currie	2½	Dr Barnard	¼
Miss Thorpe	2½	Dick Courten	¼

Event No. 3, gun at hip until pull was called, 5 birds, shift every shot:

	Points.		Points.
Z C Offutt	4	J P Donovan	1
M R Guggenheim	4	L D Hill	1
E W Valentine	4	H V Morgan	1

Event No. 4, 5 birds, shift after each shot: (Each man was allowed time to bring gun to shoulder, but trapper pulled without signal at his own discretion.)

	Points.		Points.
J P Donovan	4	G F Pelham	1
L D Hill	4	E W Valentine	1
G L Gates	4	Dr Currie	1

Event No. 5, 10 birds: (At the cry of pull the trapper threw two birds in rapid succession. The second shot was fired at the second bird thrown. Shift after each double.)

	Points.		Points.
H V Morgan	5	G L Yates	1
Z C Offutt	3½	Dr Barnard	1
K Thorpe	3½	G A Wylie	1

Event No. 6, 10 targets, shift every second shot: (Each man was allowed to have two shells in his gun. The second shot could be used at a missed target if necessary. In case but one shot was used, the gun was opened before shifting and unloaded before leaving the line.)

	Points.		Points.
Z C Offutt	5	M R Guggenheim	2
J P Donovan	2	G L Yates	2
G F Pelham	2	E W Valentine	2

Event No. 7, 5 doubles (two thrown at once), shift after each pair:

	Points.		Points.
J P Donovan	5	L D Hill	1½
Z C Offutt	1½	M R Guggenheim	1½
G F Pelham	1½	Dr Barnard	1½
W Thorpe	1½		

Summary of points:

	Points.		Points.
J P Donovan	17	Dr Barnard	6 5-12
Z C Offutt	14 5-12	H V Morgan	6
G F Pelham	10½	Dr Currie	3½
W Thorpe	9½	H G Smith	3½
L D Hill	8½	Miss J Thorpe	2½
M R Guggenheim	7 11-12	G A Wylie	1
G L Yates	7	Courten Dick	¼
E W Valentine	7	E L Hass	¼

Messrs. W. A. Bentley and E. B. Tice were guests who shot in practice after the special events.

**Essex Country Club.**

WEST ORANGE, N. J., Jan. 18.—Fifty scalers comprised to-day's program, the Healey cup event. L. H. Ross took his second limb on it with 48. The scores:

Headley trophy, 50 targets, handicap:			
A Bryan	4 36	J A Hart	0 45
P Hauck	10 47	W E Stewart	16 32
L H Ross	10 48	A O Headley	6 43

**Hudson Gun Club.**

JERSEY CITY, N. J., Jan. 13.—One of the most disagreeable days of our existence as trapshooters was what we experienced at the regular club shoot on Jan. 11, and the twenty-one shooters that reached our grounds to open the prize series of the next four months were rather discouraged at the poor scores which they returned. The main event, No. 3, was shot in a gale of wind and rain, making it almost impossible for some of our heavy-weights to stand on the platforms, which accounts for the many poor scores that were made.

Lou Schortey was high in Class A with 39. The winner in Class B was J. E. Smith, who had 37 to his credit, and in Class C, Joe Whitley was the surprise of the shoot, breaking 40, a dandy showing for a man that has not handled a gun for the past four months, as he has been confined to his home with an injury to his leg, and who was never known to break more than 11 out of 25. However, Joe, keep up the good work and win one of the guns, and we will all do our best to teach you how to use it.

Everybody is welcome to take part in this gun con-

test, so just come out and put your name on the score sheet.

BOSTON CHICAGO ST. LOUIS DES MOINES

#### Daniel Boone Gun Club.

MARTHASVILLE, Mo., Jan. 11.—Our gun club held its first regular meeting of the year to-night with a large number of the members present, even though the weather was bad. This being election time, the following officers were elected for the year: President, H. W. Meyer; Vice-President, A. F. Ahmann; Treasurer, O. F. Berg; Secretary, J. O. Wilson; Field Captain, John Mutert.

The treasurer's report showed the club to be in a prosperous condition, both as to membership and finances. So good, in fact, a reduction in annual dues was voted for the present year.

During the past year ten new guns were bought by our club members—four Smiths, two Ithacas, one Winchester Trap, one Winchester Automatic, and two Remington Automatics.

The new officers were requested to take the proper steps at once to secure a registered one-day tournament for the late summer, an earlier date not being suitable for this locality.

In looking over our records we find there were only about 40,000 targets thrown over our grounds during 1912, and we do not know whether that is few or many for the first year of the gun club's existence.

The day was cold and rainy, with sleet on the ground. Only five shooters got out to the grounds to do any shooting. Of these, Ahmann was high as the scores, at 50 targets, show: Ahmann 46, Lichtenberg 40, J. Mutert 37, Meyer 32, R. Gardyne 14 out of 25.

Jan. 18.—The following practice scores were made to-day. The day was pleasant, and the boys are warming up for a few team races with neighboring clubs in the near future if prospects materialize.

	Shot at.	Broke		Shot at.	Broke
Kite	50	46	Meyer	50	37
Wilson	50	45	Wyatt	50	36
J. Mutert	50	42	E. Suhre	25	19
Bollman	50	40	H. Fortmann	25	18
Berg	50	40	Struebbe	25	14
Lichtenberg	50	39	E. Koch	10	2
A. F. Ahmann	50	37	F. Suhre	25	10

#### Boston A. A.

RIVERSIDE, Mass., Jan. 18.—G. L. Osborn was the winner of take-home trophy to-day; also high on the January cup. The weather was cloudy and there was a little southerly wind. The McCrea traps broke down, and the whole match was shot over the Sargent traps:

	Hcp.	T'l	Hcp.	T'l	Hcp.	T'l
G. L. Osborn	4	48	4	51	8	99
N. Greeley	7½	44½	7½	44½	15	99

C. B. TUCKER, Capt.

#### Herron Hill Gun Club.

PITTSBURGH, Pa., Jan. 17.—Eighty trapshooters from this city and vicinity attended the midwinter shoot of the Herron Hill Gun Club, on Davis Island. Every one who was any one was there.

The day was dark and the foggy rain, with rain on the side made shooting difficult. Darkness stopped the shoot after 75 birds had been pulled for each man.

A handsome silver loving cup had been put up for competition. Alex King won it.

The annual meeting of the Western Pennsylvania Trapshooters' League was held after the shoot. But the browsing in the Dutch room of the Fort Pitt was regarded by most of the sportsmen as the big noise. It did prove to be the most enjoyable, for the afternoon's shooting had put each worthy gun handler's hunger on edge, and the waiters had a busy time of it. A tasty and substantial menu fitted them for the more serious things of the evening.

Several matters of importance connected with the coming season were disposed of at the meeting. The League is the governing body of the sport in this section, and it, in turn, is conducted along lines laid down by the Interstate Association, the governing body of the trapshooters of the United States. The annual League race will again be the big event of the local season. Five shoots will be held at five different gun clubs, one being run each month next summer. Prizes will be awarded for individual and team competition. The Lewis class system will be used to classify the shooters, so that every man taking part will have an excellent chance to land one of the prizes.

Carl Moore, of Brownsville, won last year's individual championship, but he was pressed hard by other good men, among whom were Abner Calhoun, Painter and Heckman. The Camden four-man team had an easy thing of it in the team race, winning with little opposition. Its members are Calhoun, Hickman, Rigby and Abner, four sterling shots.

Following the example of the trapshooters in this territory, devotees of the sport in Western Pennsylvania and eastern Ohio are about to form an Ohio-Pennsylvania Trapshooters' League, including Youngstown, New Castle, Sharon, Warren, Niles, Girard, Ellwood City and other towns. The new organization will be modeled along the lines of the local association.

Gun clubs affiliated with the Western Pennsylvania Trapshooters' League include Camden Gun Club, Vulcan Gun Club, Butler Rod and Gun Club, Herron Hill Gun Club, Charlevoix Gun Club, Canonsburg Gun Club, Pittsburgh Gun Club, Belleverson Gun Club, Washington Gun Club, McKeesport Gun Club, Brownsville Rod and Gun Club, Tarentum Gun Club, Coraopolis Gun Club, Buckhorn Gun Club, United Gun Club, North End Gun Club, Youghiogheny Gun Club and McKees Rocks Gun Club. The scores made follow:

A. H. King	72	Denman	53
Painter (50 targets)	44	Humes	55
Cochran	63	Itell	54
Greer	62	Simpson	64
Irwin	66	Heisey	56

Girard	60	51	Snyder	30	24
Birch	60	42	J. F. CALDWELL, Sec'y.		

New Rochelle Y. C.

NEW ROCHELLE, N. Y., Jan. 19.—Yesterday's weather lacked all the coaxing qualities, hence a very small score-toting here. Four events were pulled, of which Granberry, the only scratch man annexed 50 per cent. His gettings were 25-target sweeps, 22 and Olympic cup at 10 scalers, 9. Marsland got away with Saturday cup with (4) 22, while Black took the 25-target handicap with (4) 23. To-day brought out a larger attendance with five events on the car. Ten-target sweeps went to Granberry with 9. Fifteen-target handicap went to Giriat with a full from a 3-disc draw. He also corralled the 10 pair doubles scratch with 14, after which everybody wondered how he got tied to his handicap. Molloy from 6 gift clays took Du Pont trophy event with 19, while Joe Donovan, who has a Du Pont medal anyhow, was satisfied to get away with Olympic event on 8 out of 10 from scratch.

Scores of Jan. 18 were:

Table with 4 columns: Event Name, Target Count, Handicap, and Scores for participants like Granberry, Marsland, Stoddard, and Downing.

A. K. LUDWIG, The hustling secretary of Hercules Gun Club.

Jan. 19.—Scores made to-day follow:

Table listing scores for five events: 10 targets, 15 targets, Du Pont trophy, 10 targets, and 10 pairs doubles.

Parker Gun Victories in 1912

THE highest official average for the season of 1912 at both Single and Double Targets was made with Parker Guns.

As on every previous occasion, the bona fide Championship of America was won with a Parker Gun, Mr. W. R. Crosby scoring 198 x 200 targets at 18 yards rise. Same man, same gun, made the World's Record, scoring 98 x 100 targets at 23 yards, which is a truly wonderful performance.

Small bore Parker Guns are recognized as the Standard Game Guns of America and are gaining in popularity every season with the most progressive sportsmen. For full information regarding guns in gauges from 8 to 28, address

NEW YORK SALESROOMS 32 Warren Street PARKER BROS., Meriden, Conn. Or A. W. duBRAY, Resident Agent, P. O. Box 102, San Francisco, Cal.

CLEAR VISION means a sure shot. The bright rays of the sun, or the haze of a dark day can't affect your vision if you wear KING'S SHOOTING GLASSES. Made of Akopos Crystal, our exclusive product and infinitely superior to amber. Non-magnifying. Postpaid, \$1.50 to \$7.00. Prescriptions ground to order. The KING and the KING-BUSCH-STELLUX Binoculars have wonderful magnifying power, are handsomely finished, durable and scientifically correct. Endorsed by the leading sportsmen of America. You save \$10 to \$25 buying direct from us.

Write to-day for Booklet and Prices

THE F. W. KING OPTICAL CO. Cleveland, Ohio

Clearview Gun Club.

PHILADELPHIA, Pa., Jan. 18.—The big shoot of the winter was pulled here to-day. It is known as the oyster supper shoot. The feature event was a team race between squads captained by Messrs. Gideon and McCullough, with six shooters on a side. Gideon's team won by 246 out of 300, while McCullough's aggregation could break only 224.

The club events, divided in the customary A, B, and C divisions, furnished some high class firing. Bonsall with 48 out of 50, led the Class A men, followed by Gideon with 45 and Davidson with 42. Bockius was the best Class B man with 43; Green was second with 41. Brawn's 32 was the best score made by any Class C man, while Sherer with 40 led the delegation of four visitors. Scores:

Team race, six men to a team, 50 targets per man:

Table comparing Gideon's Team and McCullough's Team scores for various shooters.

Club shoot, 50 targets per man, class shooting: Class A—Bonsall 48, Gideon 45, Davidson 44, Fisher 42, Elwell 38, McCullough 32. Class B—Bockius 43, Green 41, Williams 40, Shuster 39, Puff 37, Ferry 35, Fink 33. Class C—Brawn 32, Carr 37, Warner 20. Unclassified—Campbell 38, Moff 11, McCrane 9.

Jersey City Gun Club.

JERSEY CITY, N. J., Jan. 18.—Twenty shooters were out to-day to enjoy January shooting with the thermometer up in the 60s, which made the day like one in May. Geo. Piercy was high again to-day and won the high average trophy easily with an average of 84 per cent. During the afternoon there were three spoons contested for, which were handicap events, and the winners were: Dixon, Tewes and Emmons. Tommy Kelly, who shows them how to do it over at the Hudson Gun Club, paid us a visit to-day and came early, so as to get plenty of practice, as he was expecting to meet Joe Whitley in a special match. Joe showed up all right with his crutch and gun, but when Kelly said what an advantage he would have in shooting against a man with only one good leg, he very properly refused to go on with the match until Joe is in first-class condition again, which every one hopes will be soon. Dave Engle came the nearest to a straight when he scored a 24 in the second event. McLemore is still experimenting with guns, and of course his scores show it. O'Brien and Tewes fought it out all afternoon between them. Budd was out for the first time this season, and shows the need of attending more regularly. The scores, in strings of 25, follow:

Table listing scores for Jersey City Gun Club members like Piercy, Kellingner, Williams, Kelly, Emmons, and Budd.

Table listing scores for Haddonfield Gun Club members like McLemore, Huggins, Dr Groll, Hubbell, O'Brien, Summerfield, Engle, Lawton, Tewes, Hallinger, Dixon, Dr Ittner, Boothroyd, and Jones.

Haddonfield Gun Club.

HADDONFIELD, N. J., Jan. 18.—Haddonfield Gun Club held a merchandise shoot with almost ideal conditions. The match was at 50 targets with an entrance fee of \$1.50. The members shooting were divided into three classes, A, B, and C, according to their ability, Class A being the highest. The top scores were made in Class A by Leonard Z. Lawrence with 46; in Class B by James H. Lyster with 43, and in Class C by G. Kress with 36. The scores:

Class A—L. Z. Lawrence 46, F. T. Holloway 43, Chalmers 41, Turner 39, Bundy 38. Class B—J. H. Eyster 43, Stafford 41, J. D. Bennett 40, Dungan 38, N. Peacock 36, C. Holloway 35, E. S. Webster 34, Bergen 33, C. C. Garrett 31, J. Clark 29, Wood 27, H. F. Tompkins 25. Class C—G. Kress 36, M. D. Manning 32, Morris B. Clark 31, J. C. Remington 30, V. A. Sartori 28, George Lye 27, H. A. Scattergood 25.

Camden Shooting Association.

CAMDEN, N. J., Jan. 18.—The Camden Shooting Association had a merchandise shoot to-day which drew a good turnout of target-wreckers. Wood was high gun with 47 out of 50. E. Springer broke 24 from the 21yd. mark and won hamper shoot. Scores: Merchandise shoot, 50 targets: Hineine 43, Slear 41, Mrs. Randall 29, Wakeman 38, Springer 46, Randall 42, Cling 39, Rogers 32, Ratcliffe 44, Holloway 38, Roster 30, Horner 31, Davis 41, Eisenhardt 35, Wood 49, W. Johnson 40, Lippincott 31, Stiles 44, Taylor 33. Hamper shoot, 25 targets, distance handicap: Foster (16yds.) 22, Wakeman (17) 19, Cling (17) 20, Rogers (16) 19, Springer (21) 24, Borden (20) 22, Ratcliffe (20) 22, Hineine (20) 20, Steath (20) 21, Horner (16) 12, Johnson (17) 10, Davis (18) 17, Lippincott (16) 20, Stiles (18) 18.

Laurel House Gun Club.

LAKESIDE, N. J., Jan. 18.—Park Painter cup again was up for competition here to-day. The leg went into a split, Dr. Chas. L. Lindley with 5 handouts and F. F. Vanderhoef with 4 each, totaling 44. The latter took the shoot-off. Among those present were Messrs. W. E. Miner, A. J. McClure, F. P. Kimball, C. V. Murphy, C. O. H. Keyser and Lester Maxwell.

S. S. White Gun Club.

PHILADELPHIA, Jan. 18.—High gun went to H. P. Wilson at the regular shoot of S. S. White Gun Club to-day at Keystone traps, Holmesburg Junction with 92.

In addition to the regular club shoot, the Du Pont prize was down for decision, Hutton, Taylor, Hinkson, Perry, Robinson and Wiley all tied, but in the shoot-off at 50 targets, Perry won. Scores:

Table with columns: Name, Class, B, B.B., Htcp., Net. Total. Lists scores for various shooters like Greenwood, Pratt, Wilson, Ford, etc.

Marine and Field Club.

GRAVESEND BAY, L. I., Jan. 18.—P. R. Towne, from a handicap of 8 ran 97 here to-day, which, as anyone who looked over the ocean on this day will realize, as being good enough for the best and better than the rest.

Table showing scores for Marine and Field Club events: January cup, 100 targets, handicap; Sweepstake, 25 targets, handicap; Shoot-off.

Columbia Manual Training with a score of 924 to 849; Susquehanna, Pa., High defeated Sault Ste. Marie, Mich., High with a score of 834 to 803; and the Utica, N. Y., Free Academy defeated St. Louis, Mo., Manual Training with a score of 678 to 553.

Indoor Rifle League Contest.

SPRINGFIELD, Mass., Jan. 8.—Some very close decisions have been referred by the secretary to other members of the executive committee:

Table with columns: Match number, Team names, Scores. Lists various indoor rifle league matches and their results.

Intercollegiate Rifle Shooting.

WASHINGTON, D. C., Jan. 17.—The first competition in the series of intercollegiate rifle shooting matches for the gallery championship resulted as follows:

Cornell University defeated Clemson College, 888 to 786; Columbia University, of New York, defeated University of Maine, 934 to 829; Dartmouth College defeated the Rhode Island State College, 880 to 736; Harvard University defeated Princeton University, 938 to 916; North Georgia Agricultural College defeated Lehigh University, 872 to 748; Massachusetts Agricultural College defeated Norwich University, 953 to 881; Massachusetts Institute of Technology, defeated University of Vermont, 907 to 883; Michigan Agricultural College defeated Oklahoma Agricultural and Mechanical College, 897 to 829; Washington State College defeated Louisiana State College, 870 to 825; West Virginia University defeated University of Kansas, 893 to 765; Purdue University defeated University of Wisconsin, 891 to 881; University of Minnesota defeated University of Nebraska, 911 to 779; University of Iowa with a score of 930 won from the University of California by default; the U. S. Veterinary College with 717 also won by default from University of Missouri.

Cleveland, Ohio, Jan. 10, 1913.

Publishers Forest and Stream, New York City: Gentlemen—I always read FOREST AND STREAM, and have done so since the early '80s. On my travels it is sent to me by a news agent who sends me other reading matter and keeps track of my address.

Very sincerely, EUGENE PERDUE.

High Gun

AT DENVER, 1912 HANDICAP, SEPT. 10-13

Mr. R. H. Bruns, shooting his

LEFEVER

made the marvellous run of 283 without a miss.

On the 700 single targets, including handicaps, Mr. Bruns scored 683 out of 700.

The second day of the tournament on the day's program of 200 targets, Mr. Bruns and his Lefever gun scored 200 out of 200. A world's record for ten traps.

On the 500 single 16-yard target for amateurs, Mr. Bruns scored 494 out of 500.

ANOTHER WINNER AT THE PACIFIC COAST HANDICAP

Mr. L. H. Reid, shooting his Lefever gun, won second high average with 381 out of 400.

Why don't you shoot a LEFEVER?

Rifle Shooting

Rifle Practice Under Government Supervision.

The first rifle shooting competition ever held under the auspices of the Government between the rifle teams of high schools in the different cities of the United States, for which a handsome new trophy has been presented by the War Department, began week of Jan. 13.

The competition consists of a "round robin" series of matches, in which twenty high schools, covering a territory from Maine to Arizona, and from the District of Columbia to Utah, are taking part. For nine weeks the schools will compete against each other until by a series of elimination, the winning team is determined. The shooting is being done on 50-foot ranges with .22 caliber rifles; teams of five, each boy firing 10 shots standing and 10 shots prone; possible score for a team 1000.

The results of the first competition are as follows: The Iowa City High School defeated the Baltimore Polytechnic with a score of 962 to 789; Deering High School of Portland, Me., defeated Brookline, Mass., High with a score of 954 to 693; the Southern High of Philadelphia defeated De Witt Clinton of New York city, with a score of 908 to 894; the Stuyvesant High of New York city defeated the High School of Commerce, New York city, with a score of 865 to 813; the Morris High School of New York city, defeated the Eastern High, District of Columbia, with a score of 898 to 810; the Springfield, Mass., Tech. defeated the Business High, District of Columbia, with a score of 873 to 776; Portland, Me., High defeated Tucson, Ariz., High with a score of 903 to 658; Salt Lake City, Utah, High, defeated District of

**Eastern League Shoot.**

WASHINGTON, D. C., Jan. 20.—The results of the matches of the third week of the Eastern League shoot for the interclub gallery rifle shooting championship of the United States for the new national trophy are as follows:

Birmingham, (Ala.) A. C. Rifle Association defeated the Thirteenth Regiment Rifle Club, of Brooklyn, N. Y., 941 to 919; District of Columbia Rifle Association defeated the Myles Standish Rifle Club, of Portland, Me., 983 to 969; Manchester (N. H.) Rifle Club, defeated the New Orleans Rifle and Revolver Club, 974 to 919; the Park Club, of Bridgeport, Conn., defeated the Bangor (Me.) Rifle Association, 989 to 968; Presque Isle Rifle Club, of Erie, Pa., with a score of 933 won by default from the Philadelphia Rifle Association; the Warren (Pa.) Rifle Club with a score of 99, the highest yet made in the league matches, won from the Winchester Rod and Gun Club, of New Haven, Conn., by default.

The possible score for a team is 1000. The shooting is being done on 75ft. gallery ranges, using .22cal. rifles.

**THE TENANTS OF THE IRON BARRIER.**

Concluded from page 103.

ground, took my belt knife, cut a stout stick, sharpened it and began to tear out the fresh work which was almost completed. It was almost impossible to move any part of the masonry which was secured so firmly. But after a hard struggle I got the water started and went back to my tree to await results. I was sure that the beavers had not smelled me, and such being the case I was confident they would soon return to the work. Shortly I saw the old boss stick his head out of the water and swim over to the dam, carefully scanning every object and raising on his hind feet and sniffing all around. After satisfying his curiosity he gave two terrible blows with his tail, then ran to where the water was pouring over the dam. He went through all manner of antics and was soon joined by the entire force. Strange to say, no other beaver after coming to the surface even stopped to look or sniff, but started to work as though he were a fireman at a fire, and in one-fourth of the time it had taken me to reach the water, they had stopped it entirely. Now the regular work went on again without interruption until all parts of the dam were of uniform height. After a fearful beating of the surface with their tails, all the animals jumped into the pond and began swimming as though in perfect delight. Then the old superintendent went all over the newly constructed dam, going last to the point just finished, which he gave a few pelts with his tail. He then joined the others in their swimming celebration. When I alighted from the tree, the alarm was given, and all the beavers disappeared."

This statement on the face of it shows the result of a little mental hallucination, for while the writer undoubtedly has watched beavers at work like all others who wish to impress upon the eager public that his observations have been exceptional, hence the pen will deviate into the realms of fancy. The beaver evinces no direct intellectual superiorities, but it is far more advanced than others of the lower animal family. In the present day very little trapping for the beaver is done, save in isolated districts where the intrusion of man has not worked its destruction upon their diminished numbers. And even where such districts are found, the manner of procedure on the part of the trapper must be carefully gauged. One old woodsman has the following information to offer on the subject:

"A full grown family of beavers consists of the parents, their three-year-old offspring, the two-year-olds and the yearlings, four genera-

tions of four different sizes, occupying one hut and doing business in one pond. Finding such a pond, the trapper's object should be to take them all, and he should conduct his operations in such a manner that when one is caught it will not alarm the rest; otherwise the whole family may leave for parts unknown. His care should be directed toward two points, namely, first to the setting of the traps in such a way as to take each beaver while alone; and secondly, to make arrangements for drowning them as speedily as possible after they have been taken. To secure the first point he should not set his traps near the dwelling of the beavers, but should select places at some distance up the pond on some point or neck of land projecting into the stream where the animals pass and re-pass, but where each will be likely to go alone. The trap should be set close to the shore, about three inches under water and should be carefully secreted by a covering of a soft substance that will not interfere with the trap springing. As a lure, the scent taken from a beaver castor may be left on the bank near the trap. If the trapper's approach was made from the land, all footprints should be erased by drenching with water. To secure the second point the chain of the trap should be attached to a sliding pole, which will lead the captured beaver into deep water and drown him.

"Beavers are sometimes taken by breaking away their dam, two inches below the surface, in one or two places and setting the traps in the breaches. They keep sentinels who examine their dams every night, and the least break is soon detected and put under repair. The capture of one here would like as not frighten the others away. When the ponds are frozen over, make a hole in the ice about three feet across near the shore and near a house. Cut a tree of birch, poplar or alder about six inches in diameter, press the top together and shove the whole under the ice in such a direction that the beaver will be likely to pass and re-pass it in going to and from their house. The butt of the tree should be fastened at the shore under the ice. Directly under the butt, about ten or twelve inches below, a platform should be set. The chain ring should be attached as before to a dry sliding pole. After the trap is set and secured, the hole in the ice should be filled up with snow and covered with water and allowed to freeze solid. The beaver passing the newly cut tree and discovering its freshness will proceed toward the butt for the purpose of securing the whole for food, and in gnawing it off near the shore over the trap will be likely to be taken. The reason why the sliding pole should be dry is that if it is green the remaining beavers will be likely to gnaw it off and take it home with them, trap, beaver and all for the sake of the bark the sliding pole has contained."

The present writer, who has resurrected the above written method will add that it is one of the best known when trapping the animals under the ice. But every trapper does not proceed in exactly the same manner, but the basic idea is wholly the same.

## The Uniform Fish and Game Law.

NEW YORK CITY, Jan. 13.—*Editor Forest and Stream:* In your issue of Jan. 11 there appeared a statement of fact and fancy. I refer to the attack by John D. Whish on the new game law of the State of New York.

Mr. Whish's manner of procedure in this polemic is to take a few facts that are readily accessible to all, and draw conclusions from them, disguised by clothing them in vague generalities. Thus, he says that the committee selected to codify the new law got a very small proportion of the money appropriated for that purpose, and because this is so, he says that the committee had very little to do with the codification. He admits that this committee, composed of John B. Burnham, president of the American Game Protective and Propagation Association; George A. Lawyer, president of the New York Forest, Fish and Game League, and the undersigned, was competent to do the work intrusted to it, but he insists that "the fish and game section was not drawn by the three men reasonably supposed to know something about the subject." This statement, quoted verbatim from Mr. Whish's letter, is at variance with the facts. Mr. Burnham, Mr. Lawyer and I drew up the fish and game section.

Another allegation made is that not a single well-known expert considered the statute. As a part of its preliminary work, the committee held numerous public hearings both in Albany and New York. These hearings were attended by Dr. William T. Hornaday, director of the New York Zoological Park; Dr. T. S. Palmer, of the Biological Survey, of Washington; Dr. Tarleton H. Bean, State fishculturist, and sportsmen, gunners and fishermen from various parts of the State. During the entire time that the work of codification was in progress, the committee was in touch with the State, and its report was presented to and received the approval of the State League at its annual meeting in November, 1911.

The only part of the law which was not essentially changed was that dealing with marine fisheries. A new part was drafted, but opposition developed powerful enough to defeat the amendment and leave the section in its original form. Mr. Whish's denunciation of this law as it now stands is the only really intelligent thing in his letter. He did not, however, place the responsibility for it where it belongs.

When we try to discover what are the deficiencies in the law, with which Mr. Whish says there is such general dissatisfaction, we must take them on trust from the following indefinite remarks. He speaks of the law "which the meanest tyro in such matters could readily see was based neither on scientific knowledge nor actual conditions."

"Attempts to secure important amendments were futile," he informs us, "although during the past season the Conservation Commission has been compelled to admit serious imperfections in the law and to modify it to correct them in order to meet an outraged public sentiment for the real conservation of fish life." Again he speaks of "several of the strange things now known to exist" in the law, but he wisely refrains from attempting to expose them.

In answer to some of these unfounded generalities, let me point out that the present law is based on the scientific knowledge and experi-

ence of actual conditions, which Mr. Whish kindly credits the codification committee with possessing. When Mr. Whish alludes to futile attempts to secure important amendments, to the commission's being compelled to admit serious imperfections in the law and to modify it, etc., he speaks more definitely, but still fails to point out specific instances. The commission has not admitted that there are serious imperfections in the law, nor has it been forced to modify it so far as the codification committee is aware.

Those who have followed closely the various questions which have arisen under the new law will readily distinguish the slender thread of fact from the perversions which Mr. Whish has strung upon it. But unfortunately such people form a very small minority, and for the benefit of the majority which might otherwise be misled, it may be well to outline these questions.

In the first place, the new law is uniform for the entire State with the exception of Long Island. The advantages of a uniform law over the old code, which was crammed full of special provisions for certain localities, are manifest. Some of the special provisions which existed before were necessary and proper. Others were created to bestow privileges upon a few people whose political influence was strong enough to secure them. These special provisions, good and bad, were abolished alike, and if this abolition had really nullified the good ones, its wisdom would have been questionable. But that was not the case. The new law confers power on the Conservation Commission to shorten seasons and give increased protection in other ways, locally, whenever this seems advisable for the conservation of the fish and game. The commission is the logical agency to act in matters of this kind. It is its duty to keep informed as to conditions in all parts of the State. It has the facilities for so doing. The Legislature has not. Under the old system the Legislature was deluged at every session with bills to grant special laws for different localities. It was impossible for the legislators to know the merits of the questions involved, and it was easy for men with political influence who wished to hunt and fish without restriction, to secure that privilege through legislation on territory which they controlled.

Probably the case which caused Mr. Whish and his friends dissatisfaction under the new law concerned the repeal of the section giving special protection to black bass in Lake George. There was a great deal of protest against this before it was understood that the commission could and would use its discretionary power in that matter and grant the special protection which was needed under Section 152. This the commission did and there has been no dissatisfaction since.

With respect to the merit of the present game law, others than Mr. Whish have expressed their opinion. Commenting on the New York law, Dr. William T. Hornaday says, in his forthcoming book, "Our Vanishing Wild Life": "In 1912 a new codification of the State game laws went into effect, through the initiative of Governor Dix and Conservation Commissioners Van Kesteren, Moore and Fleming, assisted (as special counsel) by Marshall McLean, George A. Lawyer and John B. Burnham. This code contains many important new provisions, one of the most valuable of which is a clause giving the Conservation Commission power at its dis-

cretion to shorten or to close any open season on any species of game in any locality wherein that species seems to be threatened with extermination. This very valuable principle should be enacted into law in every State."

Dr. T. S. Palmer, assistant chief of the United States Bureau of Biological Survey, says in a letter under date of Jan. 24, 1912: "I am in receipt of your favor of recent date and greatly appreciate your courtesy in sending me one of the first printed copies of the 'act to amend the conservation law in relation to fish and game.' \* \* \* In my opinion this bill is the best codification of the New York law ever prepared, and one of the best and most complete measures of its kind ever drafted in this country."

The verdict of such men is gratifying and will help us to bear with equanimity the castigations of Mr. Whish.

MARSHALL McLEAN,  
For the Codification Committee.

**Hunting in California.**

BY GOLDEN GATE.

QUAIL hunting in Northern California has been very poor this year, especially in the San Francisco Bay district, and limit bags are of rare occurrence. Usually there is splendid sport to be enjoyed in Marin county during November and December, but this year there were few quail to be found, notwithstanding

the fact that a closed season from Oct. 15 to Nov. 15 was declared by the supervisors of that county to protect the young birds. The heavy rains that occurred early in the season killed off many young birds and poachers were active during the extra closed period named by the local authorities, spoiling the sport that was anticipated. From other nearby quail shooting districts word is being received of indifferent sport, but in the southern part of the State the birds seemed to be fairly plentiful and good bags were secured, especially in San Diego county.

Duck shooting is still good on most of the marshes around San Francisco Bay, and but little difficulty has been experienced at any of the regular hunting grounds in securing the bag limit. Better shooting conditions are now being experienced on the San Joaquin and Sacramento rivers as a result of the falling off of the activities of market hunters. Since the victory of the Fish and Game Commission in the game transfer case, many market hunters have gone out of business. On the bay marshes northern spoonbills are now much in evidence, but it is difficult to get a bag of canvasbacks or mallards. Many hunters will not shoot spoonbills, but when these birds first arrive their flesh has an excellent flavor. No rain has been experienced for a long period, with the result that many fresh-water pools are drying up and ducks are again congregating on the salt marshes.

The recent Goose Stew held at Sacramento was such a success that it has been decided to hold similar events at regular intervals, and to carry on the work. The Sacramento Goose Stew Club has been organized with F. M. Newbert, President; G. M. Treichler, Secretary, and F. J. Ruhstaller, Treasurer. The membership will be limited to residents of Sacramento county.

Sportsmen from Central California gathered at Fresno on Dec. 10, to attend the annual convention of the District Game Protective Association, and adopted a long list of recommendations for changes in the present game laws. Among these was a bill prohibiting the killing of bear during all the year, except from Sept. 1 to Dec. 1, the claim being made that they are no longer harmful to stockmen and are rapidly being exterminated. It was also recommended that the sale of ducks be prohibited.

Farmers and hunters in Butte county are planning a coyote drive to be held this winter. Since the bounty on this animal was revoked, much damage has been done to stockmen and farmers generally.

The California State Board of Health has issued a bulletin showing that rabies are prevalent in every county of the State, and is advising that local measures be passed in every county making the muzzling of dogs compulsory. Hunters in Marin county are protesting against the passage of such a measure there and ask that hunting dogs in the field be excepted.

## AMERICAN GAME BIRD SHOOTING

By **GEORGE BIRD GRINNELL**

This companion volume to "American Duck Shooting" treats of the upland game which American sportsmen shoot over dogs—woodcock, snipe, all the quail, grouse and turkeys.

The first part of the volume is devoted to a description of the various species and their habits—the way in which they live their lives.

The second part of the book is devoted to upland shooting and treats of the methods by which all the upland birds are pursued and taken. The chapter "Aids to Shooting" describes the clothing, guns, and loads and dogs that the gunner may profitably use; while the last section of the book treats of the shooting of the future and the efforts to rear our native quail and grouse in domestication.

The volume is illustrated by colored plates of ruffed grouse and quail, and 48 full page portraits of different game birds and hunting scenes, with a number of cuts in the text.

*Cloth. About 575 pages. Price \$3.50, net. Postage 25 cents.*

This book is of inestimable value. It contains the genuine hunter-naturalist facts given in the most entertaining and interesting style.

**FOREST AND STREAM PUBLISHING CO., 127 Franklin St., NEW YORK CITY**

**Persian Rivers.**

IN Persia a river is generally called by the name of the town on its banks, and therefore changes its name at each town it reaches. This, writes Colonel Stewart in "Through Persia in Disguise," makes it very difficult to learn the right name of the rivers.

My groom was an Armenian, and very much more intelligent than ordinary Persians, since he had been educated at a mission school at Ispahan. One day he was swimming about in some water we passed, and I said to him, "No doubt you learned to swim in the Zayendeh Rud"—the river that flows by Ispahan. "No, sir," he replied, "I did not learn to swim in the Zayendeh Rud, but in the Ispahan River." He actually did not know that the large river passing his native town was called the Zayendeh Rud, or, in other words, that the Ispahan River and the Zayendeh Rud were one and the same.

Another instance of this confusion is shown by what people call the Abrishmi River. The name of the river is the Kal Mura, but the majority of Persians and also Europeans cross it on the main post-road between Meshed and Teheran by a bridge that was built by a silk merchant, and that is called "Pul-Abrishmi," or the silken bridge; so they call the river the "Abrishmi, or the Silken River, which is certainly not its name. The river, which flows by Khusf, although at this point very slightly brackish, lower down becomes very salt indeed, and finally is lost in the desert.

Karez, or underground canals, carry the water of this river in every direction over the country. I think the wonderful patience shown by the Persians in the labor of excavating these underground channels for water is surprising. Every drop of water has to be bored for and tunneled through miles and miles of ground before the precious liquid reaches the crop for which it is intended.—Youth's Companion.

**Poor Sport in Georgia.**

JOHN D. ROCKEFELLER and a party of friends were taking a trip across country in Georgia last fall when they came to a stream which they had to cross by ferry. The ferry-boat was operated by a white-haired old negro, and, while they were floating across, Mr. Rockefeller tried to make conversation.

"Jack," he asked the old man, "have you caught any fish to-day?"

"Naw, suh," replied Jack dejectedly.

"The fishing," observed Rockefeller, "must be pretty poor."

"I spec' it is," agreed Jack sadly.

"You haven't caught any fish at all?"

"Not a one."

"That seems strange," continued Rockefeller.

"It do," said Jack, and still his bearing was that of a man weighed down by woe.

"Well," asked Rockefeller, "why is it, do you think, you haven't caught any fish?"

"Humph," said Jack, still mournful, "I ain't been fishing to-day."—From the Popular Magazine.

**The Speed of Animals.**

ACCORDING to naturalists, no animal is known to have exceeded the speed attained by the famous race-horse Sysonby. Instantaneous photographs show the full length of one complete stride as about twenty-six feet. In the stride of the fastest racers the hind quarters and limbs are raised considerably higher than the shoulders, and from this relatively great height brought downward and forward, widely separated from each other, as a sportsman says, "to avoid striking the fore legs." The hare which is hunted with fast hounds has not in reality the speed of the dog. The dog, on the other hand, does not attain the speed of the horse. The giraffe is said to run at the rate of fifteen meters (yards) per second under the most favorable conditions. The elephant, going at the rate of two yards a second, carries a weight approximately that carried by six horses.—Harper's Weekly.

There's a thrill of excitement about this picture. It's true to life. You can almost hear the flapping canvas of the tent. In common with the other pictures of the Camping Series, it is exquisitely colored. This series is ideal for your den. You can get them for 50 cents each, or four for \$1.50—or, see special offer.

**The Women Divers of Japan.**

A GREAT many of the pearl-divers of Japan are women. Along the shores of the Bay of Ago and that of Kokasho the thirteen- and fourteen-year-old girls, when they have completed their primary school course, go to sea and learn to dive. They are, indeed, taught to swim almost in babyhood and spend most of their time in the water, except in the coldest season, from the end of December to the beginning of February. Even during the inclement season they sometimes dive for pearls. These girls and women wear a special dress and their hair is fastened in a hard knot. Their eyes are protected by glasses against the en-

trance of water. Tubs are suspended from their waists.

A boat in command of a man is assigned to every five or ten girls and women to convey them to and from the fishing-grounds. When the divers arrive on the grounds they leap into the water at once and begin to gather oysters at the bottom. The oysters are dropped into the tubs hung from their waists.

When these receptacles are filled the divers are raised to the surface. They dive to a depth of from five to thirty fathoms without any special apparatus and retain their breath from one to three minutes. Their ages vary from thirteen to forty years, and between twenty-five and thirty-five they are in their prime.—Harper's Weekly.

## About this Time of the Year

By SANDY GRISWOLD

**I**NVARIABLY, about this time of the year, after the last hunting days have faded away in the dim umber of the delayed winter hosts, when the blazing fire feels better than ever before, is when we old rovers of the field, sit and dream of the days gone by, and hope longingly for a few more to come. And as I recline here this cold and lowering afternoon before my own blazing log fire, my memory goes back, with ecstatic vividness, to the first hunt I ever had, with my beloved old shooting pal, Sam Richmond, now an esteemed resident of the beautiful little city of Wolbach, up on the singing Loup.

We were on the broad and then houseless flats, leading away both to the north and to the south from the legendary old Prairie Creek, north of Clarks, out on the Union Pacific.

It was long about the middle of March and all the immeasurable lowlands about the old Pawnee ranch—famous in its day—were soft and oozy and swarming with jacksnipe.

Many ponds were caused that spring by the overflow of Prairie Creek. These puddles were in some instances a mile or more in circumference, and this morning they were all frozen over, but one of the deepest, where immense numbers of wildfowl had congregated—ducks—principally pintails, and geese and the so-called brant, which are nothing more nor less than speckled front geese.

Sam and I were out of camp by daylight. I planted myself amid some old ragged tumble weeds, which I had hastily scraped together, while Sam did the same thing a hundred yards above. We both began shooting right and left and overhead almost immediately. The birds fell, not like rain, but just like ducks, and still they came, off from the distant feeding fields and from over the low hills down toward the Platte, all to this one partially open piece of backwater. This continued unabated until we were out of shells. I had never shot a Canada goose or a speckle front in this part of the country before that morning, and my first shot at the latter was when a flock of eighteen or twenty came dipping with the wind down to the glistening water. They passed me all together, their heads in line, about thirty-five yards away. I killed four with the first barrel, and as they broke, the fifth, with my second. That was a fine starter on speckled fronts, and Sam yelled congratulations.

However, he was too busy with his own job to have much time watching me. A few moments later I heard that sonorous, but ever thrilling auh-unk of a Canada goose. O, yes, I was quite

familiar with the note, although this was my first hunt on the Platte.

Peering eagerly around I quickly saw two big geese coming straight at me, about ten yards high, from the direction of the creek. I flattened myself out among the weeds, until I could see the birds' beady eyes. Then I leaped to my feet and dropped one with each barrel in as good style as Sam himself could have done it. It is expressing it mildly when I say that after this had happened I was the proudest man probably from Brady's Island to Rogers, and Sam, too, entered into my elation with equal zest. He

was a mere boy then, but oh my! oh me! what a goose hunter.

That same morning, while standing on the thick ice over one of the reaches in the creek, I shot a white goose. He was about sixty yards up and straight above me. Down he came like a thousand of bricks, which was strong enough to bear my 150 pounds of avoirdupois, slick as a whistle, not half a dozen feet from where I was standing, and went through the ice.

"Don't mind him," remarked Sam, as I made ready to try and fish him out with my gun barrel; "he isn't fit for anything, anyway. If

WILD TURKEYS.

From group in American Museum of Natural History.

you want white geese we can go back in the fields and kill a wagon load before night."

And so we could. But what about white geese to-day? If you go out on the Platte next March and get a dozen in a week, you'll be accomplishing a feat worth talking about.

And "not fit for anything, anyway." Well, you won't hear Sam Richmond, or any other sportsman who knows anything about the table qualifications of our game birds, make that declaration in these piping times of truth and veracity. There has been a great change in the opinion of wildfowling over the gastronomic value of white geese since the days when they used to line the Platte's shores for miles and miles like a solid snow bank, and there are scores and scores of good eaters who will tell you that they can be set on the table in as palatable shape as either a Canada or a speckled front.

But that memorable day. It was over a quarter of a century ago, and I have no hesitancy in telling it. Our bag was 178 ducks, 31 Canada geese and 20 speckled fronts, besides quite an intermingling of jacksnipe, four sandhill cranes, one whopper, a dandy, and now in the Smithsonian Institute at Washington, D. C., to which institution it was donated by old Sam himself.

### Forests Need Protection.

BONNERS FERRY, Idaho, Dec. 10.—*Editor Forest and Stream:* In your Nov. 2 number there is an editorial under the heading "Forests Need Protection." In that editorial you say "it is difficult to understand the mental attitude of certain Western representatives in Congress" on this question.

You mention that a certain Idaho Congressman "most bitterly opposed every movement looking toward better control of fire."

That Congressman has just been re-elected by an overwhelming vote as an endorsement of his course in Congress. If you will read the inclosed letters on the subject of the forest service, perhaps you will understand a little better why the West is fighting. FOREST AND STREAM has a great mission—that of protecting and saving the forests. Better come out here to the forest service ridden Idaho where we have twenty-seven national forests, one of them, not the largest, containing 900,000 acres, and investigate their methods and you will wonder no longer at the "mental attitude of certain Western Congressmen." C. W. H. HEIDEMAN.

THERE is no publication anywhere whose influence with its subscribers is more vital than that of FOREST AND STREAM.

## Shooting in 1818

*Being Extracts From Nicholson's British Encyclopedia, Published in Philadelphia in 1818.*

*(Continued from last week.)*

THE bustard is the largest of our feathered game, the male sometimes weighing nearly thirty pounds, being in length (from beak to toe) nearly four feet, and expanding its wings so as to measure full nine feet between their tips. Some consider it to be gallinaceous, while others class it with the ostrich and cassowary. The bill is strong and somewhat convex, the eyes red, head and neck ash-colored, and on each side of the lower beak is a tuft of feathers from five to nine inches in length; in some countries of a beautiful jet black, but with us of a white or dun color. The back is barred transversely with black and bright rust color; the greater quill feathers are brown, the belly white, the tail has twenty feathers, the middle ones barred with black; the legs are long, naked above the knees; it has no hind toe (which is a peculiarity whereby this genus is distinguished, for there are innumerable varieties in different parts of the world), but has a callous process, serving as a heel. The female rarely exceeds twelve pounds in weight, and is not so strikingly marked as the male, and has no tufts under the bill. Her color is more dull, and she has not the reservoir or water pouch found within every male, and which is capable of containing from four to seven pints of water. This enables the bustard to remain for a long time on those immense plains, remote from water, where it is often found, and where the female lays her eggs, which are of a pale olive brown, sprinkled with dark spots. Her nest is very soon made, being nothing more than a shallow hollow, scraped in some dry place, especially in a turnip field, or in some dry stubble, or grass, whence she can see whatever approaches. Her own color so much resembles the soil that unless scented by dogs she is often put up by persons who almost tread on her before she rises.

Bustards were formerly numerous in England, but now are only found in the south and east parts, particularly on the large downs of Yorkshire, and of Wiltshire and Dorsetshire. They are supposed to be extinct in Scotland. They very rarely wander more than thirty miles from their native haunts, making very short flights, running very rapidly, and rising from the ground with considerable difficulty. Hence they have been frequently caught by greyhounds after chases affording considerable diversion. It is evident that for so heavy a bird large shot must be necessary, especially when found on a plain, where it is extremely shy. Some have, however, been brought down with No. 6, but in such cases they have risen within a moderate distance. In aiming at the bustard with large shot, endeavor to strike under the wing, but if with anything less than No. 2, you cannot do better than level just before his beak, so as to hit the head. This bird is by some called the floriken; in the east it is called the cherruss.

The pheasant, though not a native of England, nor indeed of Europe, for it was first brought from the banks of the Phasis in Asia Minor, has multiplied so extensively among us

as to form a very considerable object among the sporting world. The cocks sometimes weigh nearly four pounds, though in general not more than three. The hen is usually from eight to twelve ounces lighter. This bird is too well known to require description in respect to color or figure. The wings of a pheasant are extremely weak, hence it can rarely fly half a mile. To this it is attributed that none are found on the new continent, though they are now very numerous throughout Europe, and in some parts of Africa, as well as in Asia. There are many varieties such as the argus, of which the wings are all over dotted as with eyes; the golden, which is of a beautiful luster green, marked with gold-colored specks of the most vivid appearance; the black, which is only found in India, where it is called the Moco, and is erroneously considered as appertaining to the crow tribe.

The pheasant does not easily resign its wild habits; when it does, it seems to languish. It lays but few eggs, and is indifferent, or indeed at a loss, regarding its young, which are usually hatched and reared by a common hen on that account. When allowed to ramble, they multiply as quick as the means of subsistence may afford, and appear to thrive during even our most rigorous winters. They are extremely fond of ants, without which, it is asserted by many, they will neither breed nor remain where bred. In copices abounding with haws, hips and many other kinds of berries, the pheasant takes great delight; they also fatten a little upon acorns. They begin crowing about the middle of March, when they will sometimes come into the farm yards and tread the common hens, whence many assert the finest game fowls are produced, for the pheasant is remarkable for its spirit. One cock serves seven or eight hens. They are particularly fond of clover, especially when it stands for seed. In that they will, if undisturbed, make their nests; hence so many young and eggs are destroyed by the scythe.

In pheasant shooting, most old sportsmen confine their aim to the cock bird, unless the game is extremely abundant, when it is often necessary to thin them on account of the prodigious damage they do among ripening corn. When the corn is cut, they will frequent the stubble, in search of the stray grains, until alarmed by the researches of sportsmen. At first they take to the hedge rows, where they often lay extremely close, or wind in among the briers so as to puzzle the spaniels, and to rise in a position adverse to the sportsman. After being several times put up, they take refuge in heavy woods, in which it is extremely difficult to make them take wing. There they run under the low bushes and generally gain much upon the dogs, unless followed up with great spirit and activity. Aim at the head or wing, allowing a moderate advance for the bird's flight, which is at first very rapid, but soon becomes languid, and is at all times very fluttering and noisy.

Sportsmen are sometimes deceived in re-

gard to the sex of the bird they fire at, for a peculiarity obtains among pheasants which is perhaps little known, namely that after a certain age, the hen becomes barren, moults and assumes the plumage of the cock. In this state she is subject to the jealousy of all the males, and has an unnatural bent toward the destruction of whatever eggs of her own species she can find.

Pheasant shooting commences on the first of October, and requires very well trained spaniels. Such as are strong in the chest and loins, with very short legs, are keen, obedient and courageous, should be selected. Unless these qualities exist, the sportsman will meet with great mortification. His dogs will put up the birds at a great distance, and after having fatigued themselves, will hunt without spirit or discrimination. They will drive the pheasants up among the low boughs in the woods, and puzzle to no purpose. Spaniels that have a taint, however remote of the hound, will be babblers, unsteady and quit birds for hares. If good, you cannot have too many spaniels for pheasant shooting,

but if bad every additional dog will prove an additional tormentor.

Mr. Daniel justly observes "there are no fixed rules for beating coverts. This, however, ought to be a standing regulation, never to beat in a slovenly manner. A nide of pheasants are sometimes collected in a very small space, and in the middle of the day conceal themselves very close. In the early part of the season pheasants prefer grassy, brambly, two and three-year-old slopes, and it is lost labor to try higher growths. As the season advances, they will lie in clearer bottoms, especially among pits of water, which are sometimes found in woods. In winter skirting the edges and afterwards by degrees, sinking deeper into the coverts, is, perhaps, where the game is not very plentiful, as good a mode as any. The haunt of the game that have been feeding in the adjoining fields will thus probably be hit off, and it may at least serve to show whether there is game in the covert. If any of the spaniels are wide rangers, after traversing the wood well, always make a concluding circuit

round the edge of it, depend upon getting shots by this means at those birds which may have run or flown from the interior parts."

FOWLING, the art of taking or killing birds. It is either practiced as an amusement by persons of rank and property, and then principally consists in killing them with a light firearm, called a fowling piece, and the diversion is secured to them by the game laws; or it is practiced for a livelihood by persons who use nets and other apparatus. Though there is much skill and knowledge displayed in fowling with the fowling piece, not only in the use of the instrument, but likewise in the training of dogs and discovering and starting the game, we must, from the nature of our limits, avoid entering into this subject. The other artifices, by which birds are taken, consist in imitating their voices, or leading them by other means into situations where they become entrapped by nets or bird lime or otherwise.

The pipe, or call, affords the most common means used to take great numbers of birds. This is done in the months of September and October. A thin wood is the spot chosen for this purpose. Under a tree, a little distant from the others, is erected a cabin, and there are only those branches left on the tree which are necessary for the placing of the bird lime which are supple twigs and are covered with bird lime. There are placed around the cabins avenues with twisted perches, which are also besmeared with bird lime. The bird catcher places himself in the cabin, and at sunrise and sunset imitates the cry of a small bird, calling the others to its assistance, for animals have also their cries to express their different passions, which are well known to each other. If a cry is made to imitate the owl, immediately different sorts of birds assemble at the cry of their common enemy, and they are seen falling to the ground at every instant, their wings from the bird lime being of no use to them. The cries of those birds which are thus caught attract others, and great quantities are in this manner taken. It is only during the night that the great and small owls are taken by counterfeiting the cry of the mouse.

To take the lark, nets are spread, and about the middle of the net is placed a looking glass, to which a cord is attached, which upon being drawn, makes the glass turn round like the sails of a windmill. During the time that the sun shines, it is put in motion, its brilliancy attracts the larks, whose feet get entangled in the meshes of the nets. The clap net is also made use of during the night. This is a large slender net, which is supported at each end by two men upon long poles. They walk about the ground until they hear the larks, when they let it fall, and take by this means vast quantities.

Waterfowl may be taken in great numbers by nets properly managed. The net for this purpose should be always made of the smallest and strongest pack thread that can be got. The meshes may be large, but the nets should be lined on both sides with other smaller nets, every mesh of which is to be about an inch and a half square, each way, that as the fowls strike either through them, or against them, the smaller may pass through the great meshes, and so streighten and entangle the fowl.

[TO BE CONCLUDED.]

"The pheasant does not easily resign his wild habits," says Nicholson's Encyclopedia. About 100 years after this was written we find Silver and China pheasants domesticated and sleeping on a cake of ice.

# Waltonian Disciples and a Tale

By ROBERT PAGE LINCOLN

**S**UPPOSE now, that all the world looked blue or light green in hue; suppose you had a three-ply expansion grouch and an outlook upon life with edges on it; suppose you couldn't smoke, eat or think without hurting your brain irrevocably, and on top of that make it a bitter cold winter day, with cruel winds sapping it to the gables and dancing jigs upon the window sill—I say, what could there be in this world that would change the face of the map, brighten up the general outlook and bring peace and good will to the world? Cease wondering.

Julius holds the golden key.

Of course you don't know Julius as well as I do. If you did, you would understand, but since you do not know Julius you will have to forego the pleasure of his acquaintance. It's too bad, but it can't be helped. You will have to try and bear it somehow. Yes, I know it's hard, but remember that it is good to live and know there is such a person in the world, even though you will never see him or hear his voice tenderly twanging upon the lyre of philosophy. Julius is a discovery. I am quite certain he is a discovery; in fact, I am doubly certain, so don't corner me. You can't get it out of my brain that Julius is a discovery.

And since he is a discovery, let me introduce you to the aforementioned disciple of Izaak Walton, for he is a disciple even if he is not aware of the fact. Julius has hair either red or golden; however, I do not feel that my word in this line should be taken as conclusive, for it seems that this hair is changeable in its effect. In other words, it has moods. And he has a home-grown mustache the color of spiritus of fermenti. Perhaps his nearness to this fatal drug has had effect upon the garniture that decorates the region under his nose. Leastways that blur of inconsequency, flaming with the demon passion, touched by the fiery wand of Aurora (whatever that is) will live when Julius is not, as a momento of what a man could carry through life and die a natural death—buried with amens and flowers. Otherwise Julius is all right. No man will know what stress of emotion has gone on within his noble dome, save the occasional glimpses of philosophy that will crop up at odd moments. It comes so natural, too. I am not going to garner my memory for a chapter of his witty sayings, but will append two. Now look out:

"Pure thoughts are gems of the soul; evil thoughts are the nitro-glycerine of the devil."

"Opportunity creeps up to you like a snail; when it gets by you, it runs like a jack rabbit."

Let me proceed with my tale.

Suppose that all the world looked blue or light green in hue—bing! a hand would fall upon you like a thunderbolt from out the skies. It happened to me, and I withered beneath it like a flower beneath pelting rain. Cautiously I looked up to see a face wreathed in a leering grin, and a voice that bade me come to earth. It was Julius.

"Say, you old moss-back," said he, "rout out before I am called upon to pull you out. Do you know there are fish to be caught in the little old lake ten miles from here? Do you

know that I have minnows, ice prong and everything but tackle, and that if your majesty will contribute said tackle and will honor me by coming along, I think before morning we will have some of the best enjoyment man ever was given a chance to make use of? To further ease your mind, let me make known to you that I have a sled and one horse, blankets and all other necessities. Will you come?"

There you have the gist of it, to use the expression of the best seller. Of course I have padded it, since this is a literary masterpiece, and I want you to know how far superior I am in using the language. I have fished alongside of Julius for seasons, but I have never conceived of fishing with him through a hole in the ice for crappie. To tell the truth, I had been mourning about the fact that there would be no fishing till the spring opened up, and I had been wondering what I should do with all my spare time. Lord knows, as Taft would say, how I have this spare time on my hands, but I have it. I light my pipe with spare time, and now I was going to use some of that time in fishing. At least, I thought so.

"We will sleep in William's old barn," I suggested, reading his thoughts. "While I sit here and think it over, bring me the tackle boxes. I don't want to move for fear I will do something. I leave that pleasure to you. Is it cold outside?"

It was cold. I knew it when I asked, but I wanted to hear a comforting remark from Julius.

But Julius favored me with a withering look and routed out everything I had stored away. I hoped vaguely that Julius would some day fall and crack his head. I would miss his infallible philosophy, but I could at least bring wreaths to lay on his grave. When he threw out a reel with a clang on the floor, I could even see a robin twittering on his gravestone. But he found the right box after much needless work. I charged him to put each and every piece of fishing paraphernalia he had thrown out on the floor back into its original place, carefully and befittingly. He did.

I opened the box, and with the revealing of the various baits, hooks and lines, memory came back to me of lily pads and shallows. I was again casting for the pugnacious ones and it was summer and the warm sun was shining brightly from the clear blue sky above. I could hear the waters gently lapping the sides of the boat, I could hear the whirr of the reel and the plumping of the bait into the pockets, guided carefully into place through some well-governed instinct. Ah, and once more I saw the gamy fellow rise and snap up my offering. I had him on the barb and the water was being cut blade-like from right to left. I saw him brought up to the side of the boat. My companion was leaning forward, eagerly, with the net, his eyes alight, giving me advice and cautioning me to be careful.

"I have got pork sausage, cheese and beer out in the sled" said Julius. "We certainly will not starve. When I go fishing, believe me, one of the first things I attend to is the eats."

I came to earth.

"Yes," I said, "and some of the occasions you might refer to are not the most brilliant to say the least. You will remember—but never mind. How many quarts of food did you bring with you this time?"

But Julius would not listen, so I sighed reflectively, selected the lines and the hooks, asked Julius how many minnows he had with him, and found that there were seventy-five, and then prepared for the start. We started about 4 o'clock in the afternoon, hope seated in ribald magnificence between us, and evil thoughts gurgling in the feed pail behind. Julius insisted upon singing rag-time to take the chill away, and I pulled the horse blanket up closer to escape the cold. I do not know what Julius' voice reminds me of; it certainly is not inspiring, but it has a homely fervor in it that bubbles over with unsubdued mirth and hilarity. There is no dividing line between his philosophy and his singing.

It was late when we got to the lake and the farm, but we got the horse into the barn, fed him up, and pulled down some hay for him, then we debated on what we would do. Julius hung up the lantern, and by the light of it we gratified our protesting inner men with offerings in the form of cheese sandwiches. Then Julius decided a drink would go nicely, and after he had had a drink, he decided he would sing for my benefit. I regarded him in sleepy and indifferent silence. The hay loft was a place of inspiration, a sort of soothing reminder of summer days, lying full length in the new-mown meadow grass, with eyes shaded, looking up into the inimitable blue of the arched heavens. Without it was cold, but within it was warm and agreeable, and amply clad as we were and with blankets to cover us, we scorned the flattering attentions of the red-nosed king, winter. Some time thereafter the humble son of the sod, who owned the hay loft and all the hay therein, scenting things, came up to tell us that we could not have the lantern burning; it would set the barn on fire. Julius took the cue and handed over the bottle, and suddenly the devoted one forgot what he had come up for and waxed intelligent, and gradually hilarious as the elixir tore through his vitals. Figuratively being a prohibitionist, I was immune to the attentions of the demon, drink. Julius and the farmer, however, met and embraced at the altar of friendship, and soon they were talking more or less about horses and politics, weather conditions and fishing through the ice. I pricked up my ears when he told Julius of having caught thirty crappies that very day out beyond the point. This aroused my fancy and I went to sleep.

I remember that the lantern was burning brightly and vividly at that time; in the morning it was still burning.

Even a farmer will forget in time of need. I awoke while it was yet early, roused Julius and found him most unwilling to get up. However after wrestling with him and sitting on him and otherwise misusing him for about ten minutes, he rubbed his eyes and sat up, plainly

disgusted. The hay had worked wonders on him. We got out as soon as possible, exercised a bit to be able to meet the cold, and then started off. It was dark and cold; Julius looked like a sour cheese and bore on his shoulders an immortal grudge.

However, after walking for a time, swinging our arms now and then to keep the blood in motion, we succeeded in making the best of the situation. Julius suggested waiting a couple of hours and building a fire; this did not appeal to me at first, but I succumbed to the thought of warmth. We crossed the lake and sought out a sheltered place, scraped away the snow and built a fire. There was plenty of firewood in the shape of dried oak. Seated before the fire Julius brightened up, his outlook upon the world became vastly more comfortable, and his intelligence broadened to a remarkable degree. The minnows were alive and active in the pail; the salt we had put in the water helped to sustain their energy. I was for going out at once and starting to fish, but Julius said it was far too early. He averred that the fish had not yet left their beds. Nevertheless, I fixed out my line and hook, took the minnow pail and the ice prong, and set out.

Fishing through the ice is a winter pastime for the followers of the princely sport, and while it has nothing in it to compare with the opportunities afforded in summer, it will yet suffice to keep the light burning and the thoughts fresh. Ice fishing is, however, closely associated with the man who catches for the market, and the winter harvest is great, indeed. On some lakes it is not rare to see shack after shack, each covering some hole in the ice where an industrious human is busily drawing the broad-sided fellows from the deep day in and day out. But there are also those who go out just to break the dead mid-winter monotony with something new and appealing. The sport of it is confined mostly to how many fish you are able to get, and how wise you are at selecting the right spot. Conditions being favorable, and given the benefit of a fine day, one is able to realize a certain proportion of enjoyment quite original in its class.

Calculating the place of my operations by my observations of the previous summer as to the locality of the fish, I was soon busy cutting the hole. It was none too warm. Once I heard Julius shouting, but I could have sworn he was eating a cheese sandwich and was deriding my efforts. However, I soon had the hole shaped, and at once began to fish. On the slender hook I treaded on a wiggling minnow, in such a fashion that it lay horizontal in the water, hooked through from the back to the belly and then again back up through. Down went the line to the required depth, and I was ready for my wait. I lifted and lowered the bait at intervals to ascertain, if possible, the level at which the fish stayed. I will here answer a question a gentleman once asked: Why is it that a man fishing on one side of a boat will get no fish no matter how he tries, while another fishing on the opposite side will, to use a common term, "pull in all kinds of them"? Very easily answered, as illustrated above. Fish stay at a certain level in the water. One man was fishing at exactly the right level, the other was fishing too deep, and although the fish were aware of the existence of that bait below them, they were

disinclined to go down and investigate. Very simple. I have not been mooning and pondering over drove after drove of the finny brethren without realizing this simple yet exotic rule, but this rule did not seem to fit in with my present case, for after raising and lowering the line and holding it at about every height, I came to the conclusion that there was something the matter. I had not had a bite.

I decided to set my stick and let the bait rest at a certain height. This set stick, or two, as I should say, is composed of one laid across the hole and another tied to it in the center. One end is free, and to it is attached a rag; the line is fastened to the other. When a fish nibbles or takes the bait, the stick rises, announcing to the fisher to be in readiness, or to pull

me," said Julius, as he threaded on a minnow, putting lordly emphasis on his remark. "Thus do I bait the hook, thus I walk to the hole and thus I drop it into the deep. Drop, O smooth and velvety line, to the nether regions, drop. Come ye corn-fed fishes. Even now I can hear your tails slapping a tattoo upon my brain."

Things happen in this world. Where least expected will they bloom as the flowers, yielding their delicate fragrance to the balmy air. One bloomed for Julius, for hardly five minutes had elapsed when he got an awful tug on his line. He had just remarked: "Fish may come and fish may go, but this one will leave me never." As if in answer he was rewarded. For a few minutes Julius was about as intimate with that fish line as a man could be. Back and

STARTING FOR FISHING GROUNDS—PARAPHERNALIA FOR FISHING THROUGH THE ICE.

up. I had just rigged up my affair and was taking a turn on the ice when Julius came running, tackle box in hand, hope prodding him between the shoulder blades. He seemed very well fed as the gray light of that winter day fell athwart his wistful visage, and I knew there were fish on his horizon.

"Got to go out further," he advised. "Give me that ice prong and watch me. The fish come and eat out of my hands. There is a peculiar magnetism about me. I used to work in a fish market." He at once began making a hole in the ice so wide that even by shouting across, one could but faintly make himself understood if he desired to communicate. He enlivened me with the information that he would presently pull out a fish distinguished among all other fish for its length and breadth. I watched him in unenvied silence.

Suddenly up went my flag, and the next moment I was pulling in a lusty fellow of about one pound and a half. Up he came with much flopping and was soon on the ice. Julius made haste to finish his hole.

"Now, you will kindly keep your eyes on

forth it cut the water and then up came the fish, a pickerel, but Julius had not seemed to have learned from experience that a pickerel saves all its energy for the final flop. The flop came; there were three or four Juliuses in motion something like you will note in the comic supplement—an exclamation, a movement in the water and the big one got away. All of this had happened so quickly that it took my breath. And on Julius' shoulder gloom sat enthroned with sinister visage and menacing mien.

Julius walked back and forth on the ice wringing his hands. "That's always the way; that's always the way," he said. "That was a fish. He must have been about two feet long. I never saw such a creature for length." Secretly I was happy.

"Fish may come and fish may go, and I know one you will get—never." I told him, but he scorned my existence. I left him to his sorrow and filled in my time with pleasure and profit pulling in crappies. The commotion around Julius' fishing place having subsided, the ill luck soon departed, and better luck took its place. He was eminently successful, and grad-

ually his spirits returned, even if they were not bottled. Nineteen and ten stood the score after we had fished for seeming ages. The sun was high in the heavens. We had smoked pipe after pipe of tobacco, when finally Julius happened to think of eating, and a shade of pain overspread his countenance. He had forgotten. Fishing glories departed from his horizon. For him there was but one place, one destination. The world and all its wealth was as nothing to him when compared with the thought of eating.

Thoroughly satisfied with our success we hit it for the shore where we found the embers of the fire smouldering, the great log crumbling. We replenished it and soon were frying pork sausage over the glows. Enjoyment? Yes, considerable. A little adventure in contentment, the more interesting because it was so simple, yet so intensely appealing. We had individually appetites worthy of epicures and before we arose and lit our pipes again, I wordlessly thanked Julius for remembering the pork sausage and the cheese. We fished some more in the afternoon, but around 2 o'clock it began to get colder and the thought of home assailed us, so we gathered in our fish, put them in the gunny sack and bid farewell to the lake.

Half way home a thought entered my mind. "Where did you put the fish, Julius?" I asked, looking behind in the sled.

"Oh!" said Julius, without turning, "they are hanging there on the side of the sled on the nail."

"What!" I yelled, my heart taking one leap, and then falling through the seat lay gasping on the floor of the sled. "They're gone!"

Julius by a superhuman effort thrust his head out from among the robes and yawned.

"I was only fooling," he said; "they are under that blanket in the back."

A drink revived me; I was shaking like an aspen.

"What do you mean by 'also and likewise'? Can you explain the difference to the jury?"

"Yes suh!" said the witness. "You am a judge. His honah ovah there on the bench am a judge—also—but not likewise."

"WILL YOU HAVE THE GOODNESS TO HAND ME THAT LITTLE BIRD I'VE JUST SHOT OFF YOUR HEDGE?"

From a Seymour picture in the Woodward Collection.

## Enjoined from Scaring Ducks.

ROBERT SCHINDLER, of Halifax, was temporarily enjoined from "wantonly or maliciously" frightening wildfowl from the range of the gunning stands of George O. and Benjamin H. Currier on the shore of West Monponsett Lake, by Judge Raymond in the equity motion session yesterday.

The injunction is part of an equity action brought by the Curriers to determine the rights of the public in wildfowl on a "great pond," a question which has never been decided by the courts of this State. The complainants plan to carry the issue to the supreme court, if necessary. —Boston Herald.

BOSTON, Mass., Dec. 31.—*Editor Forest and Stream:* I spent a day in court waiting for the hearing of the case explained by the above clipping, which will give you the judge's decision.

This pond is a large enough body of water so that it is public domain, the air is free, and the birds are the property of the State or Federal Government.

Will some legal light explain to me how, with the above conditions, a gunning stand on one side of a pond can be enjoined from shooting? My entire interest in the goose game in Massachusetts is to do what little I can to have the birds protected from unnecessary slaughter, and this injunction giving a man, or set of men, property rights in these flying birds is something beyond my capacity for understanding. Perhaps you have some legally trained sportsmen who can set us right. I only hope the losers in this case will spend the money to have the matter given proper consideration. The facts were certainly not gone into at this hearing.

CHARLES C. CLAPP.

## The Last Hunt.

BY W. H. BENTLEY.

Git me down my rifle, Sandy, now the powder horn an' caps

There's my doe-skin pouch o' bullets, hangin' up by them long straps;

An' my huntin' knife is lyin' on the shelf—right over there,

Jes beside them greasy patches. Lay 'em all in this here chair.

Now my leggins; they're the ol' kind made o' buckskin laced with thongs;

Saved 'em jes 'cause Zek'l made 'em, right afore he left these grounds.

Him an' me was jes like brothers. S'pose I'll some time understand

Why at eighty-nine I'm here, while he is in the Other Land.

O yes, Sandy, I'm a-goin'. Jes once more I want to see Them good old forest places that was allus 'tractin' me. O' course, I may go slow, at first, in makin' hill an' dale;

Put my j'int's'll git well limbered as I foller 'long the trail.

I want to see Bald Mount'in towerin' up so fine an' grand,

Jes as if the Lord A'mighty had sot up a big grand-stand

Fer them that liked to view His works, an' see the way things stood

Afore men come a-choppin' an' a-clearin' off the wood.

I want to stand by Tumblin' Falls, an' see the water boom,

An' jump an' fling itself like mad down to the lower flume;

An' then, as if ashamed, grow still an' steal off to the lake.

There's a picter fer you, Sandy, that no hand but God's could make.

An' if I find it ain't too fur, I'd like to come around The ridge, where all them beeches is—how well I know that ground.

Down at the foot's the cedar swamp, where me an Zeke one day,  
Scart up two whoppin' big bull moose; an' neither got away.

Mebbe, when I'm a-trampin', still, along some path I know,

I'll git sight of a noble buck, or else a fine fat doe.  
My eyes ain't sharp like once they was; an' I can't h'ist up my gun

Like I used to could; an' I might miss if they sh'd start an' run.

Too much fer me, you think? O no. But s'pose it is: what then?

What's one day more or less to me, who's allus ready when

The Lord A'mighty, seem' how soon I'll be a care,  
Sends down that messenger o' His to call me Over There.

An' Sandy, what's more fittin' than fer me, an' ol' woodsman

Who's lived on nature's bounty, like—jes fed from God's own han',

Fer long past three-score-years-an'-ten—right now to lay my bones

Down in the frosted, withered leaves, or 'mong the brown pine cones.

What'd be more fittin', I say, fer me who'se lived my years

Clost to the things of natur', havin' no troubles, no fears,

Than to give my soul to my Maker out in the open air—  
To drop while the breeze in the spruces is chantin' a fun'ral prayer.

So I'll be off now, Sandy, boy. Hand me the gun an' things.

The lure of the woods is workin', an' in my ears there rings

The call o' the forest places that so often I've bin in;  
The end o' my days'll be burdened unless I kin see 'em ag'in

\* \* \* \* \*

The twinkling stars night vigil kept,  
Over a bier that breezes swept,  
And down a glade where the spruce trees grow,  
Sang midnight requiem, soft and low,  
Through the branches wide. The only shroud  
That covered the bier was the night shade's cloud.  
No mourners stood with uncovered head  
About the form of the placid dead.

His last, long sleep, the hunter slept.  
If over his bier no mourners wept;  
If shroudless he lay, while but stars sent  
A feeble light from the firmament;  
If his bier was the leaf-strewn sod—  
'Twas fitting, he said. When from his God  
In the forest's depths the call had come,  
He'd died as becometh nature's son.

# GAME BAG AND GUN

## North Carolina Notes.

HENDERSONVILLE, N. C., Jan. 26.—*Editor Forest and Stream:* The deer shooting season closed on Dec. 15. Few deer were killed this season, as far as I have heard. The chief reason being that black tongue killed so many the past summer and early fall that many sportsmen did not hunt them, and the owners of large preserves allowed no hunting, wishing to give the deer some rest to recover from this dread disease. In this I think they were wise.

The fires in our mountains in November did some damage, but to what extent I do not know; doubtless the damage was great. We have had very little rain, and the woods were very dry.

In November I went to Murphy, the capital of Cherokee county, and thence on the mail wagon over the mountains to Hayesville, Clay county. The smoke from the fires was everywhere, and so much so that it appeared like a dense fog. I saw the fires even to the banks of the Tuckassege River in the dark from the train windows as we sped along. The deepest snow I ever saw fall in our mountain country in the month of November came and checked the fires. No doubt fires were started at many points purposely, and it was said that detectives were sent to trace, if possible, the sources from which they were started, but I have heard nothing more as to this. It was reported that in the Pisgah forest estate fires were set to run the deer out to outlying territory that they might be shot. As a check against fires in the valley of the pink beds, "ways" were cut across through the dense thickets of kalmia some thirty to fifty feet wide quite straight and at intervals of several hundred feet, so that men could stop fires in the cleared-out "ways" or spaces. All the undergrowth had been removed, so that there would be little for fire to feed on. This I noticed when on a very enjoyable camping trip several years ago. These dense thickets of kalmia are called by the mountain folk "laurel thickets" and also "ivy thickets."

The kalmia is a mass of pink in the late spring and early summer, hence the name "pink beds." Later on the rhododendron comes out in large clusters of pure white. This whole mountain country is in pink dress in the early warm season. But we have a kalmia, as you drive down the Reedy Patch Gap, that I noticed is quite light in color, really white, and in the Green River valley a small variety of rhododendron in small clusters perfectly white and quite a small, rather blunt-pointed, leaf of a much lighter green; and on Stone Mountain, west of Pisgah, apparently the same variety, but very low bushes. In mid-summer the giant kind is in full bloom—a perfectly white bloom in large clusters. Again in certain localities we have still another in large clusters of a very bright color. This, too, has a small blunt leaf of a much lighter green color. I have seen the same colored blooms in very small clusters also.

These last two are not to be seen everywhere, as is the kalmia. The mountains are a vast succession of pink groups when the kalmia is in full bloom. I have seen the giant variety of rhododendron fifteen or twenty feet high. The kalmia does not grow so high, but is in vast quantities. Unfortunately for me I am not a botanist, yet I have been in the mountains of this section a great deal the past forty-five years and have seen many changes during this time. The acquiring of the Pisgah forest large boundary by Geo. W. Vanderbilt has been the means of conserving the deer at least. But for this very few deer would be in these woods at all. This is shown by other mountain sections not protected. For instance, on a trip to the Plott Balsam, near Waynesville, which I made several years ago, not even a track was seen anywhere, and the tops of those wild mountains reach up to over 6,200 feet. I saw one ruffed grouse on that trip; no other game.

Our Legislature is in convention and once more we are going to try for a sane game law, with sportsman's license, for the whole State, and shall put out of commission at least some of the foolish laws now in force.

I shall in due time report what is accomplished.

ERNEST L. EWBANK.

## California Society Formed to Preserve Game.

BY GOLDEN GATE.

At a meeting held in November at the headquarters of the Sierra Club in the Mills Building, San Francisco, the California Associated Societies for the Conservation of Wild Life was organized, the new organization being made up of the Sierra Club, the Tamalpais Conservation Club, the State Humane Association, the Cooper Ornithological Club, the Paleontological Society of the Pacific Coast, the San Francisco Society for the Prevention of Cruelty to Animals, the California Academy of Sciences and the California State Audubon Society, the combined membership of these being more than 9,000. William F. Bade, of the Sierra Club, was elected President; W. P. Taylor, of the Cooper Ornithological Club, was elected Secretary, and an executive committee chosen as follows: Prof. Joseph Grinnell, of the State University; Ernest Schaffle, Secretary of the Fish and Game Commission; W. Leon Dawson, author of "Birds of California"; J. H. Cutter, L. L. Burlingame, Matthew McCurrie and Bruce Martin.

The organization advocates:

The abolition of county game laws, except where a county desires to extend restrictive measures and encouragement of a strong centralized administration of game laws by the Fish and Game Commission.

The shortening of the season on certain game birds and the placing of certain birds not considered game birds on the protected list; also a reduction in the bag limit.

A law providing for the protection of the bear, raccoon, mink, badger, marten, otter, red wolf, wolverine, skunk and ring-tailed cat during all seasons except during the winter months when the fur is prime or when private property is endangered.

A law prohibiting the sale of any American-killed wild game in California, jack rabbits being excepted.

The abolition of game districts as at present outlined within the State, and if necessary a re-districting according to life zones and faunal areas.

A law for the establishment of State game refuges.

A law for the breeding of game in captivity and the sale of such game under license.

A law placing the assistants and game wardens of the Fish and Game Commission on a civil service basis.

## California Game Notes.

SAN FRANCISCO, Cal., Dec. 28.—*Editor Forest and Stream:* In recent numbers of your esteemed publication I have read of the methods used by State and local officials in informing the "public" as to fish and game laws, the reasons for their observance, etc., and have thought that the work of the California Fish and Game Commission along similar lines might be of some interest and value to your readers.

Under separate cover I am mailing you a number of booklets, folders and notices which I have numbered for identification:

No. 1, which we call the "abstract," is probably the most effective thing of its kind used in our State. Three hundred and twenty-five thousand copies have been printed since the adjournment of the last Legislature, and a copy given to each hunter and market fisherman in the State at the time his license for the year was purchased. In addition, thousands have been received by people who had already worn out "abstracts" previously obtained, and other thousands have been used in schools for the instruction of the pupils, have been tacked up in livery stables, hotels, bar-rooms, garages, country saloons and otherwise given publicity. The California sportsman who goes into the field without one of these little folders is an exception.

No. 2, of which 12,500 have been printed in the last two years, is intended for posting only. It is prominently displayed in the office of every county clerk (the hunting license sellers in this State) on every railroad station blackboard, in every one of the 1,500 stores of dealers in ammunition and fishing tackle, in every country resort, in most postoffices, and in hundreds of other public and semi-public places.

Because of the expense of compilation and publication, only 8,000 copies of the "law booklet" (No. 3) have been distributed. These have

gone to the seventy-five salaried and 700 unsalaried deputies of the Commission, and to district attorneys, county clerks, judicial officers, local peace officers, members of the Legislature, and to others particularly interested in fish and game laws and able to unravel legal verbiage.

Of notices 4, 5, 6, 3,150 have been posted in the localities where plantings of game have been made. They have probably served a good purpose.

With the idea of acquainting the sportsman with the appearance of the ring-neck pheasant, a reproduction of one of Louis Agassiz Fuertes' drawings has been used on the back of this season's license. About 187,000 licenses have been printed to date, of which possibly 150,000 will be sold and seen by the hunters before the first of next July.

In addition to these "lessons and reminders to the public," a constant campaign of education is kept up through the press of the State, and by the work of deputies and special lecturers. A manual for public school teachers, dealing with methods of teaching bird, mammal and fish conservation, has been prepared by the Commission and is being very generally adopted throughout the State. Circulars and statements are issued at frequent periods and sent everywhere likely to do good.

An immense amount of educational work has also been done in this State by the numerous societies and organizations interested in fish and game preservation and allied subjects. At the present time "the great Fish and Game Protective Association," with a membership of about 15,000, is promising to revolutionize legislation and subsequent law enforcement.

I hope the length of this communication may not preclude the possibility of its publication in an early number of *FOREST AND STREAM*, and that the statements contained therein and the "exhibits" separately submitted may be of value to someone. ERNEST SCHAEFFLE,

Sec'y California Fish and Game Com.

### Antelope in Wyoming.

WOLF, Wyo., Dec. 4.—*Editor Forest and Stream:* In your issue of Nov. 30 is a letter from D. F. Hudson, State Game Warden of Wyoming, which reports antelope as gradually increasing "from all reports" and refers to mountain sheep as protected animals. The Yellowstone Park has been for some years a fine point in which to study the increase or decrease of the antelope. After the deep snow and cold weather through the Green River country about six or seven years ago, the scarcity and scattered bunches left, seemed to melt away steadily.

The coyote, golden eagle, poacher, sheep herder and other game butchers all quit union hours and worked over time when antelope were in range. I have visited Jackson's Hole nearly every fall for many years, and in 1911 my entire party only saw four antelope (all does) in over three weeks. The Yellowstone Park report, issued three or four years since, gave a count of over 1,500 antelope on the alfalfa field at Gardiner, Mont.

Shortly after this count was made, most of the herd crossed the State line between Montana and the park, but very few ever recrossed it. In the spring of 1911 I saw a few antelope on the alfalfa about March, and think the superin-

endent's report gave about 400 in the park, which I believe was a close count. I was in Gardiner several times during May, June, July and all of August, 1912, during which last month I went through the park, going by Norris, Lower and Upper Basins to Jackson Hole and returning by the outlet of Yellowstone Lake over Mt. Washburn, up Lamar River to the buffalo herd and back by Blacktail Creek to the Mammoth Hot Springs and Gardiner.

Below Mt. Washburn on Antelope Creek, which was a famous antelope range until within three or four years, we saw no antelope; in fact, no living thing but a coyote and a buzzard.

On Slough Creek we saw a single buck, and just a mile below the Rose Creek buffalo corral saw one small bunch of fifteen or twenty, where

of Big Horns, a few sheep were ranging when the law was passed, protecting them until 1915. In 1909, near the noted Medicine Wheel, I saw a ram track nearly as large as a yearling steer track, but I fear that he was taken in or possibly died a natural death.

The mule deer have been quite plenty on the mountains, and many have been killed. I know of seven bucks being killed by five men in less than a week, all within a circle of less than five miles diameter, and a hunter told me that seventy-five to one hundred deer, bucks, does and fawns, had been killed in the head of Dry Fork of the Little Horn. He also says that country is now bare of game as the hind side of a tombstone.

We have too long an open season in Wyo-

A BULL ELK IN JACKSON'S HOLE, WYOMING.

two years before, within 1,000 yards of the same spot, I counted over eighty antelope.

The Gardiner alfalfa field was deserted. My count there was like the parson's round-up of sinners—"If there had been another, it would have made one." The soldiers at the park entrance and Gardiner people living across the street from the field reported seeing one or two antelope this spring, but at this time the field was deserted. I hope that the reports given Mr. Hudson are correct, but fear that they are too optimistic.

As to the mountain sheep, they are protected in the Big Horn Mountains, but not west of the Big Horn River.

A small bunch of sheep are reported to use in the Cloud Peak country. In the north end

Sept. 1 to Nov. 30, inclusive, gives ninety-one days; at least thirty days too much.

If the spring duck shooting and killing of does and fawns can be stopped, we may expect good sport for years to come, with both ducks and deer, but if continued, hunters will soon be forced to practice at blue rocks and targets.

I have just heard from reliable people in the Hole that this fall has been so fine, and with so little snow, that the elk are in the hills mostly instead of on the feeding grounds near Jackson and all are in fine condition. (Letter was written Nov. 25.)

Ducks and grouse have been rather scarce this season. The ducks have either blazed a new trail over Wyoming or are killed off in spring. Sage grouse are protected by law until

September, 1915, but I have heard from wardens and others that most foreigners are too blind to see any difference between a sage grouse, a chickadee and a jack rabbit.

I think the ruffed grouse are fast decreasing and the sharp-tails are also disappearing, while the dusky or blue grouse, one of the finest birds for sport or table in the United States or elsewhere, and second only to the wild turkey, are getting mighty scarce.

Our district game warden, Dell Ray, has done some fine work in an elk killing case where an old-timer killed (or at least will be tried for it at present term of court) three to five elk.

A few years since, while in the Hole with a party, we found twenty-four elk; nothing taken but the teeth and one scalp. Each elk smelled like a last year's corpse, and the maggots by the million rolled about in the bodies like waves tossing. I would like to have tried kindness on those butchers of tooth hunters by hog-tying and putting them face downward among the maggots to stay until winter, when ice was thick in Gehenna, and I think even Gehenna is too good for such degenerates; you can't honestly call them men.

HOWARD EATON.

### The New York Doe Law.

LITTLE FALLS, N. Y., Jan. 20.—*Editor Forest and Stream:* I believe that the law forbidding the killing of does in the Adirondacks is a good thing. With the other readers of the State, I have seen many stories of five, ten, twenty dead does found by hunters in the woods, but I do not believe those stories. Of course, some does were killed by men who shoot first and find out what they shot afterward, and there is always a percentage of men who shoot, no matter whether they shoot at legal game or not.

The advantages of the law that forbids the killing of does are numerous. I think that one of the greatest advantages is the fact that it brings home to every hunter a definite knowledge that there is now no excuse for shooting at moving bushes, at things half seen and at game not clearly in sight.

If a man offers for an excuse that he shot some one, that "he thought it was a deer," he is indicted in public opinion instantly for criminal carelessness. Until a man sees the game well enough to know that it has horns, and is not a doe, there is no excuse for shooting. The doe law will make it far easier to convict the fools and the scoundrels who shoot men "by mistake," and spoil the hunting of thousands who fear the men who shoot at moving bushes and in the direction of noises.

The conviction in Michigan of a young man and his sentence for life imprisonment on the charge of killing a man "accidentally" is certain to be followed by other convictions of the same kind. The New York law, regarding does, is a step toward putting the fool hunters where they belong. I think that another step should be taken. I think that men who have killed or maimed people by their carelessness with firearms should be refused hunting licenses under the hunting, fishing and trapping laws; this would be a measure of public safety, and I feel certain that it could be made constitutional.

Now as to the sporting proposition that the doe law is bad; the fact is that it compels men to be better hunters, better woodsmen. The contingent that goes into the woods and demands its toll of meat, even fawn meat and doe meat, do not add to the splendor of the woods in the least. They are the ones, I feel certain, who are making all the foolish claims that dead does fill the woods. They find that they are naturally doe killers, and that if they cannot bring out does, they cannot bring out any venison.

Of course, I know, and every deer hunter knows, that it is a good deal easier, as a rule, to kill does than it is to kill bucks. To go forth and shoot only bucks cuts the kill not only in two, but it makes the kill one-third or even less. The practice of hunters in camp is to kill anything to get meat, and then go after "horns." Doubtless even now, this practice is kept up to a large extent. Guides will tell that the game laws are scorned by countless men who advocate stringent laws and who are before the world apparently the strictest of sportsmen. This is one thing that makes men scorn a type of woods visitors as hypocrites.

The doe law brings home the necessity of circumspection before killing; it reaches every good sportsman, particularly, and the good sportsmen are going to profit by it in their own increase of skill. It puts a premium on excellence of hunting, self-sacrifice and ability.

The tendency of the day in hunting, fishing and outdoor life is not quantity, but for quality. The rewards offered for stories of record fish is an indication of this tendency, which is now against the large count—years ago fishermen called their success by count and not by size. In hunting, it is not the number of heads shot that matter, but the size and beauty of the game secured. The photographer is crowding the killer hard. If it were harder to kill an animal than it is to photograph it, the killer would be supreme.

The cry to have the doe law repealed is urged by many good people who think that meat is really wasted by the butchery of does. There is a great deal of meat wasted, anyhow, by faulty shooting. There is more meat wasted under the old law, which allowed killing of either bucks or does.

The anti-doe law is really a saver of meat. The number of men who would "take a chance" at a fleeting deer under the old system is very large. Taking a chance would result in the wounding of many deer which would get away and die. Now men take no chances of breaking the law by shooting at a deer whose sex they cannot determine. There are hundreds of deer shot at under a buck and doe law, which are not shot at under the anti-doe law.

It happens that I have not hunted deer under the law that forbids the killing of does, but I know from my own experience in the woods, counting more than twenty-five years, that this law is the best possible preventive of carelessness in hunting. I have hunted for bucks alone on many occasions, and have let the does go—and the reward in compulsory skill and woodcraft is ample return for all the pounds of venison that may have been lost.

The only valid argument against the law forbidding the killing of does is found in the statement that dry does are growing more and

more plentiful. There is, perhaps, no remedy for this. In the long run, however, I question whether much harm will be done by having fewer fawns in proportion to the number of the deer. Probably the loss is made up in the better condition of the deer during the winter, especially the does which, unweakened by care of fawns, survive in strength and fitness, whereas mother does would die of exposure. The deer as a race will be stronger and better with fewer fawns.

At least the people who know that the buck law is a good thing should present their side of the argument and not permit the howlers for permission and excuse for banging away at anything moving in the brush to go unchallenged. The law, merely as a saver of human life, is well worth the investment. Under this law there is absolutely no excuse for the criminal carelessness that mistakes men for deer.

RAYMOND S. SPEARS.

### Game in District of Columbia.

BY RICHARD SYLVESTER, SUPERINTENDENT OF POLICE.

THE District of Columbia territory embraces nearly seventy square miles and includes a large unimproved, suburban section. There is found large tracts of timber and underbrush, all abundantly watered. There is an extensive natural park where the rocks, trees of large dimensions and conditions make excellent cover for quail, squirrels, foxes, rabbits and range for birds of plumage.

Under the supervision of the Game and Fish Protective Association, of which Walter S. Harban is the honored president, and protected by abundant laws enforced by the warden of the association, quail and game and the birds are secure against shooting. This condition is encouraged to the end that the District may become throughout one large preserve as a natural attraction. In addition to the quail and small game, the association purchased woodduck, canvasback and other varieties of ducks, wild geese and swan and affords them protection. During the winter season the writer employs the mounted policemen to distribute screenings as feed for the birds, and the "population" of quail under this treatment has increased from 400 to about 2,000. The warden of this jurisdiction initiated this practice several years ago, and it has been followed in many other jurisdictions. Along the Eastern Branch of the Potomac River and on the marshes of the Potomac within the District, reedbird and ortolan shooting is permitted by law after Sept. 1, and under permits issued by the Superintendent of Police of the District, excess of rabbits are permitted to be killed off by truck gardeners by careful qualification.

Likewise the Potomac River within the District of Columbia is a spawning bed for shad, herring, small-mouth black bass and smaller species. Fishing with hook and live bait during the open season is allowed.

It is to be regretted that the long open quail season in the District enables the pot-hunter to make it a sale place until March. The association fought the long open period, but stronger influence prevailed in Congress, and the sportsmen were defeated. An attempt will be made to shorten the period this year by the Game and Fish Association.

## California Game Associations.

BY GOLDEN GATE.

SPORTSMEN throughout California are actively preparing, through the medium of their organizations, for placing before the Solons information regarding the changes in the fish and game laws desired. During the past year a great central State organization has been perfected, and this now has a membership of over fifteen thousand. District organizations are now being formed, and the needs of sportsmen in the various sections of the State will be voiced through these.

Sportsmen in the San Joaquin Valley district recently organized at Fresno with J. P. Bernhard, President; E. S. Van Meter, Vice-President; Walter M. Harrell, Secretary, and M. W. Muller, Treasurer. Directors—Oro Hayward, of Sanger; Fred J. Stone, of Fresno; F. W. Kiesker, of Fresno; S. E. Black, of Temperance Colony, and Frank Noomart, of Fresno. Resolutions were adopted advocating many changes in the game laws in District 4.

The Alameda County Game Protective Association has been formed with Dr. C. A. Wills, of Oakland, President; State Senator E. K. Strobbridge, Vice-President, and Luther Lund, of Pleasanton, Secretary. The Directors are: Earl Downing and C. L. Crelling, of Pleasanton; W. P. Taylor, of Berkeley; H. Carriger, of Fruitvale, and W. H. Ellison, of Oakland.

The Monterey County Fish and Game Association has been reorganized with R. F. Johnson, President; F. A. Treat, Vice-President; W. E. Parker, Secretary, and Francis M. Hilby, Treasurer.

The Marin County Game Protective Association, of which Robert Pearson is President, and H. C. Hall, Secretary, held its annual meeting at San Rafael recently. During the past year this organization has increased its membership to almost two hundred, has obtained a bounty on vermin and has secured the appointment of a county game warden. Among the recommendations that will be made to the State Legislature will be the forbidding of steam trawl netting of fish within two miles of the shore, the retaining of the hunters' license tax within the county, the local patrol of game haunts, the power of the supervisors to shorten the open season on game and fish and the establishment of Marin county as a game district in itself.

## Fox Dog and Small Game.

EAST NORTHFIELD, Mass., Jan. 9.—*Editor Forest and Stream:* Think of men making game laws that have been more destructive than the hunters to our small game.

For the past ten to twenty years the fox dog has been put to one side on account of the deer law. This noble animal is a friend to the small game, because it would hunt all kinds of vermin that would otherwise destroy the smaller game.

Now they have a closed season on vermin in New Hampshire and Vermont.

The legislators in the States of New Hampshire, Vermont and Massachusetts have done all that they could do to decrease the small game, and then they wonder why there are no game birds.

Hunters here cannot even find rabbits; they

have never seen as many fox tracks as there are this winter.

The foxes have destroyed everything in the shape of small game, and if there was an open season on deer the year round in each county joining New Hampshire and Vermont, Vermont alone would keep the State of Massachusetts stocked with deer and vermin. How can any member of the past Legislature boast of good game laws when he has done everything that he could do to destroy our game, not only the present season, but to root it out forever?

Vermin has control of all small game.

ANSON HOWARD.

## Wolves in Ontario, Canada.

"A YOUNG man named Rodier, employed in one of the camps of the G. B. Lumber Co., at Loring, Ont., one of the missions of the Peterborough Diocese, left the camp at 7 o'clock a few evenings ago to visit some traps he had set

in the woods. He was gone only a few minutes when he was set upon by a pack of eight or ten wolves. Rodier was armed with a revolver, and the report of the weapon, together with his cries for help, attracted the attention of another lumberman, Honore Auger, who seized his rifle and hastened in the direction of the cries. He reached the scene just as Rodier dropped exhausted. He fired and killed one of the wolves. Thereupon the pack abandoned the fallen man and attacked the newcomer. Auger emptied the magazine of his rifle into the pack, killing three more. Then, armed only with a pocket knife he succeeded, after a desperate struggle, in dispatching the three that remained. Both men had to be carried into the camp by companions who arrived on the scene a few minutes later.

"Rodier escaped with but a few scratches, while Auger, who had risked his life to save that of his companion, was severely wounded in the shoulder and thigh."—From Peterborough, Ont., Examiner.

## Illinois Casting Club.

FOLLOWING are the official scores of the Illinois Casting Club for the season of 1912:

Quarter-ounce Accuracy Bait.—The highest single score in this event was made by D. R. Linder. On July 13 he made 99.8 per cent., equaling his own and Wm. Stanley's record of last year. The next two high scores were made by E. K. Pierson and W. J. Jamison, 99.5 per cent each. During the course of the season, 99 per cent., or better, was made twenty-six times.

Half-ounce Accuracy Bait.—In this event casting in our closing fall tournament, Wm. Stanley startled the casting world by making a score of 100 per cent. In our regular season's work, Wm. Stanley, E. K. Pierson and R. C. Nicholson were tied for the individual high score, with 99.6 per cent each. Following closely are A. D. Whitby, L. E. DeGarmo, W. J. Jamison and E. R. Kerr, with 99.5 per cent each.

The score of 99 per cent. or better was made forty times during the course of the regular season.

Quarter-ounce and Half-ounce Accuracy Bait Combined Scores.—Wm. Stanley, 99.22 per cent.; E. K. Pierson, 99.19 per cent.; D. R. Linder, 99.18 per cent.

Quarter-ounce Distance Bait.—Average of five casts, won by W. J. Jamison, average 109 feet; longest single cast of the year by Wm. Stanley, 150 feet.

Half-ounce Distance Bait.—Average of five casts, won by Wm. Stanley, average 150 feet; longest single cast, won by Wm. Stanley, 226 feet.

Delicacy Fly.—Single high score, L. E. DeGarmo, 98 20/30 per cent.; best average scores, L. E. DeGarmo, 98 13/30 per cent.; N. C. Heston, 98 7/30 per cent.

Light Tackle Dry Fly Accuracy.—Best single high score, Wm. Stanley, 99 10/15 per cent.

This score, made July 20, is our club record, exceeding the former record of 99 9/15 per cent., held by N. C. Heston.

Season's average, best three scores, L. E. DeGarmo, 99 29/100 per cent.; Wm. Stanley, 99 29/100 per cent.; N. C. Heston, 99 22/100 per cent.

Accuracy Fly.—A new record for our club was established in this event by W. H. Ball, who, on May 18, cast a score of 99 12/15 per cent., exceeding his own record of 99 10/15 per cent., made in 1911.

Season's average, best three scores, L. E. DeGarmo, 99 44/100 per cent.; N. C. Heston, 99 41/100 per cent.; E. K. Pierson, 99 31/100 per cent.

Combined Fly Average.—Three events, viz., delicacy and accuracy fly, light tackle dry fly accuracy and accuracy fly, L. E. DeGarmo, 99 21/100 per cent.; N. C. Heston, 99 14/100 per cent.; Wm. Stanley, 99 3/100 per cent.

Light Tackle Distance Fly.—The longest single cast during the past season was made by Wm. Stanley, 95 feet. The season's best average, by L. E. DeGarmo, 83 1/3 feet. The club's records are, longest single cast, 99 feet; the season's average, 89 1/3 feet. Both held by W. H. Ball.

Distance Fly.—A new record was made for our club in distance fly. J. E. Amman, on Aug. 3, made the splendid cast of 111 feet. The previous record, held by H. D. Willis, was 103 feet. The best average for the season was also made by Mr. Amman and is our club record, 105 feet.

Salmon Fly.—L. E. DeGarmo, although his high score of 133 feet is lower than his best of 1911, has slightly increased his average, making 130 1/2 feet for the season.

Friendship Cup.—In the accuracy competition for the first place on the friendship cup, embracing four events—quarter-ounce and half-ounce bait and light tackle dry fly and accuracy

fly—presented to this club by the Chicago Fly-Casting Club, Wm. Stanley is the first, with a score of 99 25/100 per cent.

At the annual meeting of the Illinois Casting Club, Jan. 20, officers for the ensuing year were elected as follows: President, A. F. Swisher; Vice-President, J. W. Tice; Secretary, J. D. Anway; Captain, Wm. McCandless; Executive Committee, H. C. Humphries.

The Kansas Fish and Game Laws.

IN chapter 198 of the Session Laws of 1911 the Kansas Legislature passed what might be considered a new fish and game law for the State of Kansas. Many old sections were omitted, others were revised and many new sections with new provisions were added. So far as we have been able to learn, this fish and game law has been generally satisfactory to the mass of Kansas people. However, no State has succeeded in making a fish and game law that is satisfactory to all its people. Topographical conditions and conditions of environment in different parts of the State make it difficult to frame a law that will apply with equal fairness to all its people.

Many laws relating to fish and game have been ill-advised, due (in part) to the fact that they favor special localities and special interests, and due largely to their disregard of biological knowledge. Any code of laws that can be agreed upon by the lawmakers of a State as large as Kansas must of necessity be in the nature of a compromise; they are experimental and must at times be revised and readjusted to meet the requirements of changing conditions.

PURPOSE OF LAW.

It is the intent and purpose of the law to protect certain kinds of wild life because this wild life is valuable to mankind. The wanton waste and destruction that follows in the footsteps of the over-zealous sportsman, the pot-hunter, the market hunter and the "game hog," has made deep and unnecessary inroads into the wild life centers of our State. It is the purpose of the fish and game laws, and the duty of those who enforce them, to restrain the thoughtless and avaricious person who destroys valuable wild life without regard for its present value or future condition. Without such restraint many valuable animals, birds and fishes would soon become rare and even extinct.

LAWS SHOULD FAVOR THE STAY-AT-HOME PEOPLE.

Persons of means can go to various parts of the country and to reputed pleasure resorts for their outings, but people in more moderate circumstances and the poor man must seek the joys of fishing and the pleasures of field sports either at home or some nearby place. It seems to me that the interests and pleasures of the latter, who are vastly in the majority in our State, should ever be kept in mind when the fish and game laws are being enacted. Laws should not be made for the well-to-do sportsmen alone. We had this idea in mind when we made plans for the largest and best equipped pond fish hatchery in the country. We hope to be able, by stocking and restocking Kansas waters, to produce a good supply of fish in all the streams and ponds in the State; in other words, to produce fish enough in Kansas waters so that fish will become a common article of food for Kansas people and the pleasure of fishing may be enjoyed by thousands at or near their homes.

L. L. DYCHE, State, Fish and Game Warden.

When you think of an outdoor publication, there stands FOREST AND STREAM.

The Anglers' Casting Club of Chicago.

OFFICIAL SCORES FOR SEASON OF 1912.

Table with columns for months (MAY 19, JUNE 2, JUNE 16, JUNE 30, JULY 14, JULY 21, AUG. 4, AUG. 11, AUG. 25, SEPT. 8) and rows for anglers (Ames, Burke, Campbell, etc.) with sub-columns for 1/2 A, 1/2 D, A F, D F.

A—Accuracy Bait. D—Distance Bait. A F—Accuracy Fly. D F—Light Tackle Dry Fly Accuracy. NOTE—Decimals in Accuracy Bait, and Distance Bait scores read as tenths. In Fly scores as fifteenths.

Published Weekly by the  
**FOREST AND STREAM PUBLISHING COMPANY,**  
 CHARLES OTIS, President.  
 W. G. BEECROFT, Secretary. W. J. GALLAGHER, Treasurer.  
 127 Franklin Street, New York.

**CORRESPONDENCE**—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

**SUBSCRIPTIONS:** \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

**ADVERTISEMENTS:** Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

Entered as second-class matter at the Post-Office, New York, N. Y.

**THE OBJECT OF THIS JOURNAL**  
 will be to studiously promote a healthful interest in outdoor recreation, and to cultivate a refined taste for natural objects.

—FOREST AND STREAM, Aug. 14, 1873.

#### A LONG STEP FORWARD.

THE McLean bill for the Federal protection of migratory birds was passed by the United States Senate, on Wednesday, Jan. 22. This action followed an admirable speech made by Senator McLean, Jan. 14, and printed in the Congressional Record. At the close of that speech, Senator Root, of New York, offered a resolution that the President be requested to propose to the governments of other North American countries the negotiation of a convention for the mutual protection and preservation of migratory birds. The resolution was referred to the Committee on Foreign Relations. After the bill's passage, it was sent over to the House of Representatives, where there is a possibility that it may come up by unanimous consent before the close of the present session. It occupies a preferred position.

The passage of this bill is the longest step in the direction of wild life protection yet taken in this country. The measure passed the Senate without opposition, showing that one House of Congress has been thoroughly convinced of the economic necessity of protecting migratory birds, which are the greatest natural force working in behalf of the farmer, and which, if protected and encouraged, cannot fail to add enormous sums to the wealth of the country.

A large part of the time and effort of the farmer is devoted to protecting his crops from the ravages of noxious insects, and under the most favorable circumstances these efforts are but partially successful. To the loss caused by the insects must be added the cost of the labor and material, expended in fighting the insects. In the birds we have an innumerable unpaid host of helpers, working all through the year, and performing services incalculable in dollars and

cents, but at all events enormous. It has been estimated that the destruction caused by harmful insects amounts to \$800,000,000 a year, a sum almost too vast to be comprehended. Moreover, with the continued spread of population and consequent destruction of useful birds, the harm done by injurious insects is constantly increasing.

By explaining true conditions, and so arousing public sentiment in its favor, many individuals and many associations gave valuable help to the passage of the measure.

The hearings on the McLean and Weeks bills, held last March before committees of the Senate and House, constituted the ultimate force that pushed the bill to victory. No Federal game measure ever called forth at one time so widespread and so impressive a body of public opinion as that marshaled at these hearings. The work of organizing the forces that believed in the measure, and the bringing them together at one time, so that they might deal a blow which would be effective by its very mass, was done by John B. Burnham, president of the American Game Protective and Propagation Association. The results of his efforts were most gratifying, and the gathering of wild life protectors of all sorts and conditions made a great impression on both committees. Mr. Burnham's efficient work in this matter is not likely ever to be forgotten.

#### PROHIBITING IMPORTATION OF BIRD PLUMAGE.

JAMES BUCKLAND, of England, in a letter to E. H. Forbush, State Ornithologist of Massachusetts, declares his opinion that Germany will be the first European power to pass a law prohibiting the importation of plumage, and expresses the hope that England and America will follow. America, however, may be the first nation to adopt such a measure, as a movement is on foot to amend the tariff law so as to forbid importation into the United States of birds and bird plumage for millinery purposes.

#### GAME BY PARCEL POST.

THERE is a bare possibility that the recently enacted parcel post law and the game laws of the several States may not work smoothly together. The thought may not have occurred to those interested in game protection that game may be sent through the mail in parcel post without being detected by the postal authorities and game inspectors. It is comparatively easy for game wardens to keep an eye on the express and freight packages, but the parcel post is another proposition. Suspecting that game is being shipped by freight or express, inspectors can go to almost any length to detect it, and once having done so may seize it at the destination. They may examine packages in freight or express stations and search persons on the high-way suspected of having game, but the inspector will have no such privilege with the parcel post. The mailing of a package is regarded as a secret between the sender and Uncle Sam, and not an unauthorized hand may touch or tamper with the mailed article or package in any way. Nor are any questions answered concerning other people's mail by employees of the postal service. The Lacey act provides that nothing shall be sent through the mails, the possession of which

is prohibited in the State in which it is intended for delivery. This was of course intended to cover game and will undoubtedly be enforced as far as possible. But one sending a package by parcel post is not required under present postal regulations to say what the package contains. In order to enforce the Lacey act in connection with the parcel post, it will be necessary to provide for such contingencies as will prevent the unlawful shipment of game. Once more we must plug up a loop hole for the market hunter.

#### KILLING THE MAN BEHIND THE GUN.

IN the slaughter of about 800 deer, 138 bears and bunches of small game in Pennsylvania during the season just closed, twenty-seven hunters were killed and 126 injured, with several counties still to be heard from. The modern sportsman is surely a deadly creature—to himself or his friends. We imagine that if these mortality statistics could be communicated to the bears and deer of the State, they would excite many chuckles. With such unerring aim on the part of our gunners, it is no wonder that wild animals are rapidly increasing in many States.

#### GREAT GUNS! LOOK AT THIS!

IT may interest many of the readers of FOREST AND STREAM to know just how much advertising we are publishing, and how it compares with what other magazines are doing, for notwithstanding the fact that our advertisements are interesting in themselves, the greater the volume of business we carry, the better will be the magazine we can give our readers at an unincreased cost. You readily will see, therefore, that in helping our advertising department, you are in turn reaping the benefits thereof. Many of our readers mention FOREST AND STREAM in buying goods advertised therein. Do you? It's a very simple problem with a great big answer. When you have goods to advertise, just remember you are the style of man who subscribes to FOREST AND STREAM. If you would purchase the class of goods you sell, then use FOREST AND STREAM. But to return to other lines, namely agate; we ask you to glance over our record of last year when we carried 191,668 agate lines, equal to 855 "standard" magazine pages. Our nearest competitor ran 19,000 lines less, while a pair of binoculars are required to discern the next in line. It ran more than 50,000 lines behind the ticket. We feel justly proud of having carried more business for the year than did Harper's or Century. And mind you, the court of last resort, Printers' Ink, has handed down this decision, for the following figures were taken from tables compiled by Printers' Ink, showing the amount of business carried during the past three calendar years by those magazines in our line. We were going to say "class," but after you have looked through the following tabulation, you will see that that is not quite the word:

Publication.	1912	1911	1910
1. Forest and Stream...	191,668	174,977	216,419
2. Outing Magazine...	172,311	159,689	156,437
3. Field & Stream...	140,175	144,598	146,292
4. Outer's Book...	105,028	97,664	80,070
5. Outdoor Life...	95,816	93,352	95,526
6. Outdoor World...	95,741	101,266	106,154

# ARCHERY

## Archery-Golf.

BY EDWARD B. WESTON.

THIS is a game of golf in which the player uses a bow and arrow instead of a club and ball, together with certain modifications of the rules of straight golf.

We have read in recent periodicals of games called archery-golf, which should have been called archery vs. golf, for they were played as matches over golf links between archers and golfers, each using their proper implements.

The game of archery-golf, or golf-archery, is not new, having been played in St. Louis for several years. Wishing to learn more about it, I wrote to Randolph Laughlin, a prominent St. Louis attorney, whom I believed to be the originator of the game, for the information. He kindly sent me the following letter, which I am sure will be read with great interest by both archers and golfers:

"I thank you for your letter of Jan. 10, inclosing clipping from the Daily News of Jan. 8, and asking me to let you know when first I played the game of golf-archery.

"I played this game for the first time in St. Louis county (just outside the limits of the city of St. Louis) in the summer of 1899. At that time I supposed that the game was original with me, but since then I have learned that it is only a modification of the ancient English game of 'Shooting at the Buttes.' I am not very familiar with the English form of the game, but my understanding is that it consisted merely in shooting at mounds of turf, which were piled up on the English Commons for that purpose; the archers shooting from one mound to another, not so much with a view of keeping a score of their shots, as with a view to keeping in training for the practice of archery.

"In my case the purpose was to get the benefit of a not too strenuous exercise in the open air, with enough of an incentive to make that exercise a sport and not a labor. My original purpose in selecting golf-archery in preference to golf was because I wanted a course right away, and had neither the time nor the patience to lay out a golf course. My purpose in maintaining the course as an archery-golf course instead of converting it into the regulation golf course is because I believe the game of golf-archery is very much superior to the game of golf from the standpoint of its own merits. The golf-archer gets fully as much exercise as does the golfer, and has the added zest which comes from using a man's weapon instead of a child's toy. In addition to this, the golf-archery course is much more picturesque than the regulation golf course. I did not have to cut down a single tree to lay out my course. Indeed, the numerous trees which are clumped and scattered all over the course furnish natural hazards, which add greatly to the enjoyment of the game.

"Another and very substantial advantage is in the item of expense. I have to keep the grass

cut, as a matter of course, but there are no putting greens to roll or water. Indeed, after purchasing the gear and targets, there is no more expense incident to golf-archery than there is to keeping up any ordinary park.

"Another advantage is that, one does not have to waste any time to keep in practice. I make no pretense to being an expert archer, but I have played with several experts, and find that I am quite as good at the game as they are. On the other hand, I find that my wife is quite as

BEGINNER IN ARCHERY, NEW ROCHELLE ARCHERY CLUB.

good a player as I am, and that after a beginner goes over the course two or three times, he becomes as expert as a veteran. The game is one in which a man's wife and children can compete with him on terms of substantial equality. This is not true of golf. Nor does one have to keep in practice to play successfully. After being away from the game for nearly a year, I found that I could play quite as well as I could when I was in almost daily practice.

"My course consists of nine targets, scat-

tered over a rolling country in an irregular circuit about two miles in extent. In the south central portion of this course there is a lake with arms and inlets which form natural hazards, as do also the numerous trees. The targets are placed at irregular distances apart, the general aim being to place them far enough away to make it necessary to take three shots to go from one to the other. The first shot is called the drive shot, the second the approach shot, and the third the target shot. There may be any number of players in the "flight," but two is the ideal number. The more players you have the longer it takes to get around, and the less exercise you get in proportion to the time spent.

"One of the players keeps score. Our usual practice is to make the low man at one target do the work of keeping score for the next target and so on. This score is kept on printed pads which I have had made for that purpose. These pads have blank spaces for the date of the game, the names of the several players, the handicap, if any, the number on the arrow of each player (each arrow being numbered to avoid confusion), and the shot score and target score made by each player at each target. Then, at the foot of each score card, is printed the following rules which are all the rules there are to the game:

"In the lake counts three shots, two for penalty. On the rocks, over the fence, in a tree, or a lost or broken arrow counts two shots, one for penalty. A shot which strikes but does not penetrate the target does not score."

"The player who completes his ninth targets in the fewest number of shots wins. If two complete the round in the same number of shots, then only is the target score counted, the one with the highest target score being the winner. Thus, if you should complete the course in 25-66, and I should complete it in 25-63, you would be the winner, as this score would indicate that we had each taken twenty-five shots, but that you had scored sixty-six points at the targets, as against my sixty-three. The targets on my course are of straw, mounted on iron tripods, and faced with the regulation oil cloth, painted in white, black, blue, red and gold. We keep the target score by counting one for the white, three for the black, five for the blue, seven for the red, and nine for the gold. My targets are left out all the year round, in all kinds of weather. I find that the iron tripods last indefinitely, and that the straw will last for five years or longer, but the oil cloth facing must be replaced every spring.

"Another advantage to this game is that you can play it all the year round. The only disadvantage of playing in winter is that if your arrows strike against the ice on the lake, they will slide for a quarter of a mile, and as every player has to be his own caddy, he sometimes gets more exercise than he bargained for.

"I keep my arrows in a case made for that purpose, and my bows in the ordinary felt bags, but I leave both bows and arrows on a shelf in

the roof of a little summer house on the edge of the lake, where they are exposed to all extremes of heat and cold, dryness and humidity. This may ruin them from the standpoint of the expert archer, but it does not impair their efficiency for the purposes of the game.

"The best score that I have ever made over the course was 21, and then I made two of the targets in one shot. This was pure luck in each case, as neither target was in sight when I shot at it, both being behind intervening clumps of trees and shrubbery. On this occasion I used one of Captain Barnes' Oregon yew bows (84 pounds) and an Aldred flight arrow. Ordinarily I use a little 52-pound bow, and the regulation target arrow. With this my score varies between 23 and 27.

"A number of ladies who play this game repeatedly make scores as low as 25. The beginner, who has never had bow or arrow in his hand before, usually takes about forty shots on the first round, thirty-five shots on his second round, and thirty shots on his third round, after which he continues to average anywhere from 27 to 30 until he gets the swing of it.

"I find that the average woman player makes about 200 yards on the drive shot, while the average man gets about 225 yards. This is what I accomplish with my 52-pound bow. With my 84-pound bow I got 300 yards, but I broke that bow two years ago, and since then I have been trying to get Captain Barnes to duplicate it. The best he has been able to do so far is to send me a 76-pound bow, with which I cannot beat 250 yards.

"In an effort to gain greater distance I have tried Turkish arrows, drawing them well within the arc of the bow by means of a horn groove which prevents them from striking, but I find that they do not accomplish nearly the distance that can be gained by the heavier arrow.

"A great many people in this city have been playing this game with me during the last ten years, and it has been written up several times in the local press, but so far as I know it has never been played anywhere except on my course. I never have played it against a golfer on a golf course, but from what I know of both games I am confident that the most expert golfer on earth would stand no chance whatever as against an archer of ordinary ability."

There are two points in Mr. Laughlin's letter which I don't quite understand. Perhaps he will make them clear. He says: "Another advantage is that one does not have to waste any time to keep in practice." How can an archer, or any sportsman, do as good work when out of practice as when in practice?

Again he says: "The beginner who has never had bow or arrow in his hand before, usually takes about forty shots on his first round," and by his fourth round has reached the limit of his skill. How can near perfection in any game be reached with a few days' practice?

### "Gravesend Birds."

GRAVESEND BIRDS is the name of the new class to be built for racing on the Lower Bay.

The movement among the associated yacht clubs on Gravesend Bay to build in this class was started within the past ten days at a dinner attended by the commodores of the Lower Bay, and thus far five boats have been ordered, with every indication of this number being doubled by the opening of the season.

Bird Class type is a Gardner design boat built last year for the members of the Bay Side Y. C., and is the finest type of small boat as to speed and seaworthiness ever designed. They measure 28 feet over all, 17.9 feet water line, 6.10 feet beam, draw 2.6 feet with keel and 4.6 feet with centerboard. The shallow keel permits their being drawn up on beach for cleaning, thereby saving hauling-out charges. They handle easily, good boats in rough water, roomy and very stiff for their size.

These boats cost a trifle more than half the amount necessary to build an "S" type. They made a favorable showing with the "S" boats during the Atlantic race week, actually defeating them in one of the races. The class was selected because among other reasons it will permit of intersectional racing between the Lower Bay and Long Island Sound.

Already two special prizes have been offered, and with the regular class prizes offered by the different clubs in the association, the owners will have all the sport they want. These boats are also eligible to compete for the Lipton cup. This trophy is a very valuable one, and must be won three times by the same owner to become his property.

### Club Elections.

#### HORSESHOE Y. C.

MEMBERS of the Horseshoe Harbor Y. C., of Larchmont, held the twenty-fourth anniversary meeting at Hotel Manhattan. Twenty-five were present. The officers elected were: T. J. McCahill, Commodore; Alfred E. Fountain, Vice-Commodore; William Stewart Allen, Treasurer; George P. Forbes, Secretary; Edward G. Unitt, Trustee. The three last named were re-elected to office, the members refusing to accept their resignations.

#### BARRINGTON (R. I.) Y. C.

THE Barrington Y. C. held its annual meeting on the night of Jan. 25. N. Howard Easton was unanimously re-elected commodore. Other officers were: Horace L. Manchester, Vice-Commodore; Dr. Emery P. Sweet, Rear-Commodore; W. J. Kenyon, Secretary and Treasurer; W. P. Cross, Joseph A. Miller, Alfred L. Atwater, Fred H. Bishop and William A. Mathewson, Board Directors.

### Yacht Sales.

THE Hollis Burgess Yacht Agency has sold the 35-foot water line sloop yacht Irex, owned

by William S. Kinney, of Boston, to Alexander P. Graham, of Boston. Irex is 55 feet over all, 13 feet 6 inches beam and 7 feet draft, with a large cabin and two staterooms. She was designed by A. Cary Smith and was built for Joseph Pulitzer, Jr., of New York.

The same agency has sold the 40-foot motor boat Gold Plate, owned by C. M. Dunbar, of Providence, R. I., to Walter M. Nichols, of Winthrop, Mass., a prominent member of the Cottage Park Y. C.

## Canoeing

### A. C. A. Membership.

#### NEW MEMBERS PROPOSED.

Atlantic Division.—Sheppard W. Hogan, 216 North Third street, Millville, N. J., by Levi Hindley; Joseph F. Peiser, 2468 Seventh avenue, New York city, by Wm. J. McAnanny; Louis Papan, 797 Church Lane, New York city.

#### NEW MEMBERS ELECTED.

Atlantic Division.—6562, Eric G. Anderson, P. O. Box 191, Cranford, N. J.; 6578, Benj. F. Cromwell, 32 Fairfield Road, Yonkers, N. Y.; 6579, Frederick C. Cromwell, 32 Fairfield Road, Yonkers, N. Y.

Central Division.—6568, George M. Eaton, 726 East End avenue, Wilkinsburg, Pa.; 6569, Paul R. Applegate, 5525 Kentucky avenue, Pittsburgh, Pa.; 6570, Lew E. Duva, 5417 Coral street, Pittsburgh, Pa.; 6571, Wm. F. Patton, Jr., 403 Gray Apartments, Wilkinsburg, Pa.; 6572, Bert E. Dart, 210 Hutchinson avenue, Swissvale, Pa.

Western Division.—6564, Wm. Hawley, Dundee, Ill.; 6565, Henry Bergholtz, 438 New York street, Aurora, Ill.; 6566, George T. Bean, 504 Woolner Bldg., Peoria, Ill.; 6567, Geo. W. Schoeffel, Y. M. C. A., Peoria, Ill.; 6573, Harry T. Stibb, 315 Kiswaukee street, Rockford, Ill.; 6574, Rae Dupree, Dundee, Ill.; 6575, Cecil H. Bingham, Dundee, Ill.; 6576, Irving M. Western, Dundee, Ill.; 6577, Nelson J. Gothard, Dundee, Ill.

#### RESIGATIONS.

Atlantic Division.—4660, Charles R. Smith, Trenton, N. J.

Central Division.—5729, William J. Donovan, Buffalo, N. Y.

Western Division.—5229, Grant M. Miles, Peoria, Ill.

### Too Much for Pop.

"Pop!"

"Yes, my son."

"They scuttle a house at the top, don't they?"

"Yes, my boy."

"And they scuttle a boat at the bottom, don't they?"

"Why—yes."

"Well, where would they start to scuttle a houseboat, pop?"—Yonkers Statesman.

# TRAP SHOOTING

## Fixtures.

If you want your shoot to be announced here, send a notice like the following:

### REGISTERED TOURNAMENTS.

Feb. 22.—Birmingham (Ala.) G. C. tournament. O. L. Carl, Sec'y.

March 25-26.—Birmingham (Ala.) G. C. O. L. Carl, Sec.

April 8-10.—San Antonio, Tex.—The Interstate Association's Southwestern Handicap, under auspices of the San Antonio Gun Club; \$1,000 added money. Winner of first place in the Southwestern Handicap guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. E. E. Shaner, Mgr., Pittsburgh, Pa.

April 10.—Atglen (Pa.) G. C. Lloyd R. Lewis, Mgr.

April 16.—Mt. Holly (N. J.) G. C. A. J. Delleite, Sec'y.

April 17.—Syracuse, N. Y.—Messina Springs G. C. W. E. Hookway, Sec'y.

April 18-19.—Wellington, Mass.—Paleface Shooting Association. Walter F. Clarke, Pres.

April 19.—Lawrence (Mass.) Fish and Game Protective Association. A. C. Gray, Sec'y.

April 23.—Grundy Center (Ia.) G. C. Frank W. Callaway, Sec'y.

April 29.—Guernsey, Ia.—Du Pont G. C. J. W. Dobbins, President.

April 29-30.—Moberly (Mo.) G. C. J. A. Melton, Sec'y.

May 6.—Vicksburg (Miss.) G. C. J. J. Bradford, Mgr.

April 29-May 1.—Pond Creek, Okla.—Oklahoma State tournament, under auspices of Pond Creek G. C. Wm. M. Hite, Mgr.

May 12.—Philadelphia, Pa.—Keystone Shooting League. G. F. Hamlin, Sec'y.

May 5-6.—Laramie, Wyo.—Gem City Gun Club. Tyler A. Rogers, Pres.

May 6-7.—Eagle Grove (Ia.) G. C. A. L. Yearous, Sec.

May 6-7.—Montpelier (Vt.) G. C. H. B. Moulton, Pres.

May 6-8.—Hutchinson, Kans.—Kansas State tournament, under auspices of Hutchinson G. C. Chas. T. Rankin, Sec'y.

May 7.—Seneca Falls (N. Y.) G. C. C. L. Frantz, Mgr.

May 7.—Hicksville (O.) G. C. C. E. Maxwell, Sec'y.

May 7-8.—Sunbury, Pa.—Sunbury-Selinsgrove G. C. J. W. Schoffstall, Sec'y.

May 8-9.—Kankakee (Ill.) G. C. E. F. Radeke, Sec'y.

May 13-15.—York, Pa.—Pennsylvania State tournament, under auspices of York City G. C. N. M. McSherry, Sec'y.

May 13-15.—Montgomery, Ala.—Interstate Association's eighth Southern Handicap tournament, under auspices Capital City G. C.; \$1,000 added money. Winner of first place guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. Elmer E. Shaner, Mgr., Pittsburgh.

May 14.—Tyndall (S. D.) G. C. F. F. Chladek, Sec'y.

May 14-15.—Waterloo (Ia.) G. C. C. Nick Webber, Pres.

May 15.—Shelbyville, Ill.—Shelby County G. C. Geo. L. Dearing, Sec'y.

May 22.—Aurelia (Ia.) G. C. C. Frank R. Welch, Sec'y.

May 22.—Syracuse, N. Y.—Onondaga County G. C. T. E. Clay, Pres.

May 22.—Mt. Morris, Ill.—Mt. Morris G. C. C. J. Price, Sec'y.

May 24.—Newmanstown (Pa.) G. C. F. S. Rader, Sec'y.

May 27-29.—Fort Dodge, Ia.—Iowa State tournament, under auspices of the Fort Dodge Gun Club. Jos. Kantzky, Mgr.

May 27-29.—N. Platte, Neb.—Nebraska State tournament, under auspices of Buffalo Bill G. C. J. C. Den, Sec'y.

May 28.—Windsor (Mo.) G. C. W. T. Jordan, Sec'y.

May 30.—Menominee Falls (Wis.) G. C. J. A. Pike, Sec.

June 2.—Bunker Hill (Ill.) G. C. C. E. Pettengill, Sec.

June 3.—Maquoketa (Ia.) G. C. E. L. Hincley, Sec'y.

June 4-6.—Circleville, O.—Ohio State tournament, under auspices of Ideal G. C. J. S. Ritt, Sec'y.

June 5.—S. Madison, Wis.—Triangle G. C. H. G. Waterman, Sec'y.

June 6.—Bradford (Ill.) G. C. H. A. Swearingen, Sec'y.

June 9-12.—Buffalo, N. Y.—N. Y. State Sportsmen's Association tournament. C. F. Lambert, Sec'y.

June 10-12.—Buffalo, N. Y.—New York State tournament, under auspices of the Buffalo Audubon Club. C. F. Lambert, Sec'y.

June 10-12.—Eugene, Ore.—Oregon State tournament, under auspices of Eugene G. C. E. A. Bean, Sec'y.

June 10-12.—Sioux City, Ia.—Soo G. C. W. F. Duncan, Sec'y.

June 12.—Brooklyn (Pa.) R. and G. C. Myron O. Tiffany, Pres.

June 12-13.—Huntington, W. Va.—West Virginia State tournament, under auspices of Huntington G. C. L. R. Shepherd, Pres.

June 14.—Philadelphia, Pa.—Meadow Spring G. C. Wm. F. Letfords, Sec'y.

June 16-18.—Boise, Idaho.—Idaho State tournament, under auspices of Idaho State Sportsmen's Association. E. F. Walton, Sec'y.

June 17-20.—Dayton, O.—Interstate Association's fourteenth Grand American Handicap tournament, on grounds of N. C. R. Gun Club; \$1,500 added. Winner of first prize guaranteed \$600 and a trophy; winners of second and third places guaranteed \$500 and \$400 respectively. Elmer E. Shaner, Mgr., Pittsburgh.

June 24-25.—Crookston, Minn.—Minnesota State tournament, under auspices of Crookston G. C. Tom Morris, Pres.

June 26.—Fayetteville (N. Y.) G. C. C. C. Snook, Sec'y.

June 26-27.—Adel (Ia.) G. C. C. Chas. F. Clarke, Sec'y.

July 8.—Dows (Ia.) G. C. W. J. Wilson, Sec'y.

July 8-10.—Cedar Point, O.—The Indians. D. H. Eaton, Sec'y.

July 8-13.—Cedar Point, O.—The Indians' tournament. D. H. Eaton, Sec'y, Cincinnati, O.

July 9-10.—Jersey Shore (Pa.) G. C. H. Myers, Sec'y.

July 12.—Holmesburg Junction, Pa.—S. S. White G. C. W. E. Robinson, Sec'y.

July 15-17.—Wilmington, Del.—Interstate Association's eighth Eastern Handicap tournament, under auspices of Du Pont G. C.; \$1,000 added money. Winner of first place guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. Elmer E. Shaner, Mgr., Pittsburgh.

July 21-25.—Raymond, Wash.—Pacific Indians. F. C. Riehl, Sec'y.

Aug. 5-7.—Omaha, Neb.—The Interstate Association's eighth Western Handicap tournament, under auspices of the Omaha Gun Club; \$1,000 added money. Winner of first place in the Western Handicap guaranteed \$200 and trophy; winners of second and third places guaranteed \$150 and \$100 respectively. E. E. Shaner, Mgr., Pittsburgh, Pa.

Aug. 9.—Holmesburg Junction, Pa.—Independent G. C. Chas. H. Newcomb, Sec'y.

Aug. 26.—Mechanicsburg (O.) G. C. F. J. Coburn, Sec.

Sept. 1.—Ogdensburg (N. Y.) S. A. J. M. Morley, Sec.

Sept. 4.—London (Ohio) G. C. H. L. Hildinger, Sec'y.

Sept. 17.—Nevada (Ia.) G. C. E. W. Scott, Sec'y.

Sept. 17-19.—Atlantic City, N. J.—Westy Hogans. Bernard Elsser, Sec'y.

Sept. —Sacramento, Cal.—The Interstate Association's eighth Pacific Coast Handicap tournament, under the auspices of the Capital City Blue Rock Club; \$1,000 added money. Winner of first guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. Elmer E. Shaner, Manager, Pittsburgh, Pa.

## DRIVERS AND TWISTERS.

Dates of the Southern Handicap tournament have been changed from April 15-17 to May 13-15.

Harrisburg Sportsman's Association, of Harrisburg, Pa., will hold their twenty-sixth annual live-bird tournament on Washington's Birthday.

There will be a shoot of shoots on Feb. 9 at Hudson Gun Club. Ye trappists near New York city will find the Hudson Gun Club in Jersey City a most convenient place to reach, and you will be well treated when you get there.

Date of Oklahoma State tournament, scheduled for Pond Creek, Okla., under the auspices of the Pond Creek Gun Club, has been changed from April 8-10 to April 29-May 1. Date of Meadow Spring Gun Club's tournament, scheduled for Philadelphia, changed from April 26 to June 14.

Capt. C. B. Prutzman, of the Reading Roller Mill Club, announces a 10-live-bird and a 50-target event, to be shot on the Spring Valley grounds on Saturday, Feb. 1. He urges all club members to qualify in this race and win appropriate prizes. Bird race, 27 to 30yds. rse. Targets, all shoot from 16yds.

Elmer E. Shaner, Tournament Manager, the Interstate Association, writes: "The Interstate Association's eighth Pacific Coast Handicap tournament will be held at Sacramento, Cal., during the month of September, under the auspices of the Capital City Blue Rock Club. The exact dates for the tournament will be announced later."

The 20-bird handicap to be held at Spring Valley, under the auspices of the Spring Valley Shooting Association on Feb. 8, promises to be a record-breaker. Handicaps are from 27 to 30yds. Entries from Harrisburg, Lebanon, Pottstown, Royersford and Philadelphia are assured. Birds will not be rated higher than 40 cents a pair. Traps and field arc level, all fenced in, and are the most beautiful in the State for live bird shooting. A cordial invitation is extended to all lovers of this sport to participate. Programs may be had by addressing E. H. Adams, 1505 Perkiomen avenue, Reading, Pa.

Revival of trapshooting at Baltusrol Golf Club over in Jersey is a good sign. It proves that even so exacting a sportsman as a golfer cannot get along with only one recreation, and like all those who want one better than they have, they turned to the trap, the acrosaucer and the shot putter. Here's hoping they'll lose no more targets than they have lost golf balls, with the co-operation of well trained caddies, with ever ready hee's.

A newly incorporated gun club, known as Asbury Park Gun Club, has met with phenomenal success. Organized only three weeks ago, it already has enrolled 113 members. They meet every Tuesday and Saturday afternoon on the beach, and hold shooting matches, and have two traps continually in use. The officers are: President, Arthur A. Seger; Vice-President, T. Herman Beringer, Jr.; Secretary, Elvin C. Burtis; Treasurer, James Hardy.

Down Maine way, in the neighborhood of Portland, there is a saying, "If you go to it, go to it right," said saying being particularly in vogue at the None Such Gun Club, located on Crooked River. This expressive title covers a club a year old, and just chock full of good shooters, all of whom take an interest in teaching the young to shoot. One by one the original bunch of a dozen boys is being reduced as they slip from Kindergarten to upper register shooters.

W. G. BEECROFT.

## Crescent A. C.

BAV RIDGE, N. Y., Jan. 25.—Final shoots for the committee cup and January trophy were held to-day. G. G. Stephenson, Jr., with 42 out of 50, won committee cup, as well as taking January cup with a monthly total of 72. Scores:

Take-home trophy, 100 targets, handicap:			
M Stiner	..... 4 96	F B Stephenson	..... 0 82
J F James	..... 0 93	B Brower	..... 12 82
H M Brigham	..... 0 93	J H Vanderveer	..... 4 81

## Bowdoin College Gun Club.

BRUNSWICK, Me., Jan. 21.—In the D. K. E. House at Bowdoin College, fourteen enthusiastic scatter gun men met and had a chinefst as to the feasibility of organizing a gun club to hold weekly trap shoots, and later probably get into the Intercollegiate Trapshooters' League. Suffice it to say, the club was organized and for the present will use shooting grounds of Brunswick Gun Club. Officers were elected as follows: President, George L. Skolfield, '13, of Brunswick; Vice-President, Kenneth A. Loring, '14, of Reading, Mass.; Secretary-Treasurer, Theodore E. Emery, '13, of Randolph.

## Medford (Okla.) Gun Club.

MEDFORD, Okla., Jan. 24.—The following scores were made by the members of the Medford Gun Club:

Shot at, Broke		Shot at, Broke	
Walling	..... 30 24	Soucek	..... 25 22
Wood	..... 25 17	Brown	..... 30 24
Wilson	..... 30 20	Hardy	..... 40 33
Hutchinson	..... 30 23	Strider	..... 15 13

I. V. HARDY, Sec'y.

# Midwinter Handicap

By HERBERT L. JILLSON

**P**INEHURST, N. C., Jan. 27. (Special).—Saturday's premier handicap of the sixth annual Midwinter Handicap of the Pinchurst Country Club rounded out a remarkable week, which takes its place among the leading American shoots and is a pleasant prophecy for the trapshooting season of 1912, which it inaugurates. Never in the history of these annual events have as many shooters gathered or such a wide extent of territory been represented. Three-fourths of the field were the pick of the country's best.

Naturally, the tournament was one of sensations and surprises, and the pace was fast enough to hold the attention of big crowds from opening practice to the final climax of the Handicap, in which J. E. Jennings, of the Dominion Athletic Association, of Toronto, pulled through a winner with 95 to his credit from the 20yd. mark, one target in the lead of S. W. Putnam, of Fitchburg, Mass., who scored 94 at 18yds. Tied at 93 were C. D. Coburn, of Mechanicsburg, O. (19yds.), and Allen Heil, of Allentown, Pa., (22yds.), with the field close up, bunched in numerous ties, and many of them in the running until the last string had been shot.

Ninety-five and a tie between B. V. Covert, of the Audubon Gun Club, Buffalo, and Allen Heil, who shot from the 18 and 21yd. marks respectively, gave a spectacular finish to the Preliminary. In the shoot-off, Mr. Covert, who voluntarily advanced to the 20yd. mark, scored 25 straight, while Heil recorded but 21, losing the 13th, 15th, 21st and 23d targets; 93 found Dr. D. L. Culver, of Jersey City (19yds.), Bradford Timms, of Atlanta (16yds.) and N. W. Walker, of Goff, N. C. (18yds.), bunched in a triple tie, with a squad of five snug up and going fast in 92.

The race for the high general average gold medal offered for the 600 targets, exclusive of the handicaps

(16yds.) was a pretty one, F. S. Wright, of the Audubon Club, leading with 572. At 566, L. B. Worden, of Harrisburg, and C. H. Newcomb, of Philadelphia, tied for the silver medal and second position, Newcomb winning the shoot-off, 25 to 23. F. G. Fuller, of Mukwonago, was fourth in 562. For the full 800 targets of the week, Newcomb led with 749, and George L. Lyon, of Durham, N. C., who shot as a non-contestant, finished second in 744.

The innovation of the tournament was the introduction of three trophies in three class divisions created by the Lewis system, which divided the number of competitors in the first two days' program (400 targets) into three classes, a score between 379 and 355 determining Class A, 354 and 334 Class B, and 333 and 325 Class C. In the Handicap event, S. W. Putnam won the Class A trophy with a score of 94; C. D. Coburn finishing second in 93, and W. J. Jones and C. H. Newcomb third in 92. In Class A, Allen Heil was first in 93, Frank Huseman and C. W. Billings tied for second at 91, and David T. Leahy third at 90. In Class C, Robert N. Burnes won the trophy with 87, Charles Nuchols was second in 86, and E. P. Springer third in 85. In the similar event in connection with the Preliminary, Dr. D. L. Culver won Class A trophy with 93; L. B. Worden and W. J. Jones tied for second at 92, and C. H. Newcomb and G. H. Waddell tied for third at 91. Allen Heil won Class B with 95, and N. W. Walker was second in 93, with C. W. Billings and L. C. Grant tied for third at 92. Brad. Timms won Class C trophy with 93, and Thomas Lenane, Jr., was second in 92, and Charles Nuchols third in 90.

In Saturday's 100-target sweepstakes, R. L. Spotts (96), F. S. Wright, L. B. Worden, F. H. Huseman, Richard Gerstell, F. A. Hodgman and G. E. Waddell,

all of whom made 94, were high guns. In a similar event, Friday, F. S. Wright at 98, E. A. Randall at 97, and F. G. Fuller at 96, led. B. M. Higginson's 191 was best sum for the day. Henry Powers was second in 190, and he lost a chance to win on the last two strings. In third position F. G. Fuller and S. W. Putnam tied at 188. This program was also duplicated on Wednesday, the opening day, when F. S. Wright scored 93, C. H. Newcomb was second in 192, and L. B. Worden third in 190.

Among the professionals, H. D. Gibbs led in the general average with 743 of the 800 targets, and 566 of the 600. In the Handicap, C. E. Goodrich was first in 97, E. H. Storr second in 94, and E. M. Daniels third in 93. In Saturday's sweepstake, Woolfolk Henderson scored 99, Fred Gilbert 98, and Goodrich and Phellis 97 each. In the Preliminary, Gilbert and Henderson tied at 91, and Phellis made 89. Gibbs and Phellis divided honors at 98 and 96 in the sweepstakes. In Thursday's sweepstakes, Gibbs made 190 and tied with H. H. Stevens; J. M. Hawkins was third in 189. In Wednesday's sweepstakes Hawkins led with 188, Phellis was second in 187, and Gilbert third in 185.

Dr. J. H. Dreher, of Wilmington, N. C., was chairman of the handicap committee, selected from the contestants and associated with him were C. W. Billings, of Glea Ridge; B. S. Donnelly, of Chicago; F. D. Kelsey, of East Aurora; Henry Powers, of Atlantic City; D. A. Edwards, of Union City, and Dr. W. F. Clarke, of Boston, who were much complimented for the impartiality of their adjustment.

The added money and trophies amounted to \$2,500, a sum exceeding even the Grand American, which is \$1,500, but which guarantees some \$700 in addition, making the total about \$2,300. The only other shoots which equal the Pinchurst event are the Westy Hogans' and the Denver Handicap. Mr. Jennings, the winner of the Handicap, carried away the magnificent handicap trophy and the \$500 prize; Mr. Covert, the Preliminary winner, a splendid trophy and \$200 in added money, not to men-

AEROSAUCER EXTERMINATORS AT THE MIDWINTER HANDICAP.

tion sweepstake winnings. There was also a trophy for Mr. Putnam, the runner-up in the handicap.

A noticeable feature of the shoot was the large number of ladies in attendance and the fact that many of the participants came in advance of the event and a number will linger throughout the week to enjoy the diversified recreation which the village affords.

Luther J. Squier added new laurels to his national reputation as a manager, and Charles H. North looked after the trap equipment with the skill of an expert. From start to finish the event went off without a hitch. "Rest assured that you now have the classiest shoot of all the year," said Charles H. Newcomb to the Gun Club secretary, as he was leaving for his train, "and it's bound to increase in popularity because of your varied hotel accommodations, which appeal to all sizes of pocket-books, the attractions of the place in variety of recreation, the charm of your climate at this season of the year, and the magnificent generosity and personal interest of Mr. Leonard Tufts, Pinehurst's owner, and your Country Club president.

Wednesday, Jan. 22.

Sweepstakes, 200 targets:

Table of names and scores for Wednesday, Jan. 22. Amateurs: F S Wright 193, C H Newcomb 192, L B Worden 190, R Gerstell 188, J E Jennings 189, E A Randall 184, F G Fuller 184, B S Donnelley 183, R L Spotts 183, H Powers 183, Dr D L Culver 183, T H Fox 182, S W Putnam 181, A H Sunderbruch 181, L Lyon 180, F Plum 180, S Leever 179, F Campbell 179, F A Hodgman 179, W S Hoon 178, W H Jones 178, E B Springer 177, C C Irwin 177, D A Edwards 176, B M Higginson 176, E H Eubank 176, C W Billings 175, B V Covert 175, Geo Waddell 175, Dr W F Clarke 174, R N Burnes 174, A W Church 174, D Leahy 174. Professionals: J M Hawkins 188, C W Phellis 187, H H Stevens 185, W Henderson 185, F Gilbert 185, W Huff 183, H D Gibbs 182, Homer Clark 181, O R Dickey 181.

Thursday, Jan. 23.

Hudson Gun Club.

JERSEY CITY, N. J., Jan. 26.—The second shoot of the series for three L. C. Smith guns was very well attended to-day, with thirty-three shooters taking part. J. S. Thompson was high in Class A with 44 breaks; Class B winner was J. E. Smith with a score of 44, and Jack Williams with 41 was the high man in Class C. This event has six more shoots before being ended, and there is still a chance for all those who have not yet shot to get in, as the five best scores are to count for the winner in each class, so come out and put your name on the score sheet at the next shoot, on Feb. 9. Everybody still has a chance to win one of these guns.

The day was ideal for trapshooting, and some very good scores were made by the boys present. The management had some difficulty with the traps not working right, but arrangements have been made to have matters adjusted by the next shoot. Thompson was high gun for the day with 86 per cent., with Smith giving him a good race for the honor with 85 per cent.

We still do business at the old stand on the Hackensack River, and all Turnpike cars stop at the west side of the bridge, so get your gun cleaned up for the next shooting date, and come out and show your appreciation of our old club mate, who so generously has donated the guns for you to win. Feb. 9. Don't forget the date.

SECRETARY.

Meadow Springs Gun Club.

PHILADELPHIA, Pa., Jan. 25.—The largest attendance of the season shot here to-day. H. Sloan, with an actual breakage of 95 out of 100, led the field, winning a silver dipper. Joslin, from Du Pont Gun Club, finished with 92. Armstrong smashed 72 out of his 100, which with 20 free ones, was high for members' spoon. E. B. Garrett, Hewlett and Rudolph each got a leg on Harvey cup. In the yearly point trophy shoot, which ends next month, points yesterday went to Rudolph 5, Hewlett 4, Armstrong, Leford, Sloan and Pierce, 3 each; Soley 2, and MacAlonan and Fish 1. Scores:

Highland Gun Club.

EDGE HILL, Pa., Jan. 25.—George McCarthy couldn't make business and pleasure dates agree, so he cut out Pinelurst, taking vengeance on the bunch here to-day. He cracked 97 out of 100—three 24s and a straight. Jesse Griffith was second with 95, while Tom Tansy trailed with 94 in Class A. In Class B, J. F. Meehan was high with 93. Class C went to T. Meehan with 83, while Class D at 61 was caught by Fell.

Class A—Tansy 94, Landis 88, G. McCarty 97, Griffith 95. Class B—G. S. McCarty, Jr., 85, J. F. Meehan 93, Hibbs 85, Pratt 91, Sidebotham 70, Freed 82, Houpt 87, Wilson 84.

WINCHESTER

Shotguns and Loaded "Leader" Shells ::

AT THE

Midwinter Handicap

The Self-Explanatory Tale of Triumph

MIDWINTER HANDICAP: Won by J. S. Jennings, of Todmorden, Ontario, shooting Winchester "Leader" Shells, with the magnificent score of 95 x 100 targets from the 20-yard mark.

PRELIMINARY HANDICAP: Won by B. V. Covert, of Lockport, N. Y., shooting a Winchester Repeating shotgun and Winchester "Leader" shells. Score 95 x 100, and twenty-five straight on shootoff. Allen Heil, of Allentown, Pa., shooting Winchester "Leader" shells tied with Mr. Covert with a score of 95 x 100, but was beaten in the shootoff.

HIGH AMATEUR AND HIGH GENERAL AVERAGE: Won by F. S. Wright, of South Wales, N. Y., shooting a Winchester Repeating shotgun. Score 572 x 600 targets.

HIGH PROFESSIONAL AVERAGE: C. W. Phellis, of Huntington, W. Va., shooting Winchester "Leader" shells tied with one other shooter. Score 556 x 600 targets.

For Record Making and "Jinx" Breaking SHOOT W GUNS AND SHELLS

Class C—T. Meehan 83, Firth 56, Pharoah 68, Perry 77, F. Meehan, Jr., 23, Davis 81, Clegg 70. Class D—Fell 61, Jones 55.

Baltusrol Golf Club.

NEWARK, N. J., Jan. 25.—As an indication that trapshooting is popular among members of a golf club, just see the representative list of shooters who turned out to-day when the sport of trapshooting was rejuvenated. A revival trophy was offered for high on 25 rocks in to-days' events. Twenty-three made by T. W. Lloyd was good for a win, with a tie on 22 for place between A. R. Allen and S. H. Browne.

The scores for the cup—T. W. Lloyd 23, S. H. Browne 22, A. R. Allen 22, B. C. Fincke 21, Dr. D. W. Granberry 21, H. N. Fiske 20, Marshall Deer 18, J. S. Hahn 16, William Byrd 15, and H. A. Barclay 13. Open events—B. C. Fincke, 16, 18, 19, 18, 21; H. N. Fiske, 19, 20, 20; J. F. Hahn, 12, 16, 16; A. R. Allen, 21, 22, 20, 19; S. H. Browne, 20, 18, 22, 19, 17; W. Lloyd, 23, 18, 21, 17; W. Byrd, 5, 12, 6, 11, 15; Dr. D. W. Granberry, 21, 20; H. A. Barclay, 20; M. Deer, 12, 12, 18, 17, 16.

Visitors—C. Von Lengerke, 24, 17, 22, 24; C. H. Daily, 22, 17, 21, 17; J. J. Dick, 12, 24, 13, 18.

Birmingham Gun Club.

At a meeting of the Birmingham Gun Club, held Saturday, Jan. 18, several matters were discussed. The spring shooting tournament was discussed, and the matter of having the dates changed on account of the Southern Handicap tournament coming so close and conflicting with ours. An attempt will be made to have our shoot changed to some other date.

A new gun club has been formed at Ensley, Ala., which will shoot on the grounds of the Birmingham Gun Club, Wednesday of each week. Local and visiting shooters are invited to attend these shoots.

At the weekly shoot of the Birmingham Gun Club John Fletcher made a run of 64 without a miss, and but 2 down in 75 shot at. H. C. Ryding and R. H. Baugh also shot well. Scores:

Shot at Broke: R H Baugh.... 125 110 John Lambeth... 50 43
E M Cornwell... 100 80 O L Garl..... 55 42
John Fletcher... 75 73 Le Croy ..... 75 43

#### Chicago Gun Club.

CHICAGO, Ill., Jan. 18.—While the weather was mild and pleasant, it was cloudy and rather dark, with quite a stiff wind blowing, to make it interesting for the fifteen marksmen who toed the mark on the firing line to-day. Goode again landed first honors in the two 50-target club events, making a total of 92 out of 100, Ed. Graham making the same score among the pros. Barto had the best of it in event No. 1, when he broke 47, but did not shoot in the second. Ammann put up the best score of the afternoon in the second 50 by breaking 49. He tried hard to make a straight, so as to tie his side-ticker. Goode, who had a race with him, but Goode won by one target, the same as last week. Fetherston was close up to the leaders in the first event with a score of 45 out of 50. Young tied Goode on a total of 46 in the second 50, while Kennicott and Stannard each broke 45. Scores:

Jan. 19.—Weather conditions were just about the same as on Saturday, and it was very gratifying to see a field of twenty-three shooters turn out for their favorite sport. President May was on hand early to greet his many friends, and was busy making everyone feel "at home" and enjoy themselves; not only those who faced the traps, but also the visitors who did not shoot, of whom there were quite a number.

The officers of the club have decided to put their shoulders to the wheel and all push together in boosting and building up the club, setting others a good example by coming out and bringing their friends with them and taking part in the shooting, and also seeing to it that such shooter and visitor is enjoying himself, and when he leaves he will feel that he has thoroughly enjoyed a pleasant afternoon with us, and will want to come again. The spirit of good fellowship which prevailed is bound to make friends for our club, and it only remains for each and every member to do his part toward bringing up the attendance of our club shoots.

The work of the marksmen on the firing line was not quite up to their usual average, as it was quite dark and the fluky wind caused many "miscues." Fred Gilbert was the same old Fred, and up to his usual game, landing high score in the several events, while he had company in two others. Some of the boys say that while they may have a chance with him when on the

firing line, they acknowledge he has a walkaway in other lines of shooting, as was demonstrated to-day when the club house doors had to be opened several times to cool off the air.

Ralph Kuss demonstrated that he can "come back," as he landed high amateur honors the third Sunday in succession, scoring 88 out of 100 in the two 50-target events, 13 out of 15 in practice and 42 out of 24 pairs.

Fetherston took second place in the first 50 with a total of 44, while Houghton landed second in the second 50 with a score of 45, the latter did not get down to his usual good form until the last frame in the second. Becker, Warnimont, Fenstermaker and Green took a run over from Hammond on the Interurban to spend a few hours at our club. Come over often, boys, and bring more with you, as you will always be welcomed by our members, who enjoy your company.

F. C. Young was with us several times last year and expects to become a member soon, as he will be out more often from now on. Bowes tried his hand at breaking targets for the first time to-day. Harry Dunham came late, but not too late to get in on a few events. A felon on one of his fingers accounts for his low scores, as he is usually right up with the top-notchers.

Oscar Kausche said he was satisfied to tie his old rivals, Phil Miller and "Bill" Riley in the last event, but when they meet again, look out for Oscar. Scores:

Targets:	50	50	15	12p	12p

#### Dows Gun Club.

Dows, Ia., Jan. 22.—We held a tournament here yesterday, Jack Rabbit system; and, although the day was cold and very windy, twenty shooters shot through the entire program. Heldebrant carried off most of the "green," and was high gun with 124 out of 140, which is a good score for the kind of targets we had to shoot at.

F. Fisher was second man with 123, and Hemenway and Yearous tied for third with 116 each. We were pleased with the turnout, as the weather was very disagreeable, and all the boys seemingly had a good time. Fred C. Whitney was with us during the forenoon and looked after the cash. Everybody missed him when he had to leave in the afternoon. Scores follow:

Events:	1	2	3	4	5	6	7	8	9	10	Broke.		
Targets:	10	10	15	15	20	10	10	15	20	..	..

Milner .....	5	7	12	17	..
Coleman .....	15	17	17	21	..
Winkler .....	20	23	23	25	21

At the 20yd. line the following scores were made out of a possible 25: Pace 14, Phalen 18, Millen 15, Scowley 17, Emmory 17, Hanson 11, Coleman 21, Winkler 21.

W. J. PHALEN, Sec'y-Treas.

**Larchmont Y. C.**

LARCHMONT, N. Y., Jan. 26.—To-day's shoot wound up the monthly prize events as well as including daily prizes. R. Jones was the man of the hour, getting away with five-eighths of the trophies. He first cracked 9 out of 10 for the opening sweeps; next, special trophy with a full score came his way, after which he stowed away Visitors' trophy, washing this down with Take-Home trophy, and topping off the day's joy with Accumulation trophy, each with a full score of 25, all of which gave him high gun for the day with 125 out of 150. A. L. Burns was pace-maker, only four targets behind on high gun. O. C. Hoyt won the 100-target handicap with 92; also leg on the monthly cup. This trophy, however, was won outright by W. E. Ferguson, who had won two legs on it. He shot off for it yesterday against Batterson, McCahill and Hoyt. Special trophy for the month was won by Tom McCahill. Scores:

January cup, 25 targets, handicap:

O C Hoyt.....	7 25	J J Dick.....	2 23
W J Elias.....	4 25	W E Ferguson.....	5 22
J G Conover.....	3 25	J G Batterson.....	3 22
A L Burns.....	3 24	T J McCahill.....	3 21
Dr W Short.....	3 24	F W Fitzgerald.....	7 21
J H Finch.....	3 24	R Jones.....	3 19

Shoot-off won by Hoyt.

Ten targets, scratch:

R Jones.....	9	T J McCahill.....	6
J G Conover.....	9	F W Fitzgerald.....	6
W J Elias.....	8	O C Hoyt.....	5
A L Burns.....	8	J G Batterson.....	5
J J Dick.....	7	F R White.....	4
Dr W Short.....	7	W E Ferguson.....	4
J H Finch.....	7		

Shoot-off won by Jones.

Visitors' cup, 25 targets, handicap:

R Jones.....	2 25	J J Dick.....	2 21
T J McCahill.....	3 25	J G Batterson.....	3 21
O C Hoyt.....	6 25	J G Conover.....	3 21
A L Burns.....	2 25	C R James.....	1 18
Dr W Short.....	3 25	F W Fitzgerald.....	7 19
J H Finch.....	3 24	W E Ferguson.....	7 18
W J Elias.....	3 23	F R White.....	7 17

Shoot-off won by Jones.

Special trophy, 25 targets, handicap:

R Jones.....	2 23	J G Conover.....	3 20
O C Hoyt.....	6 23	W J Elias.....	4 19
T J McCahill.....	2 22	J G Batterson.....	4 18
Dr W Short.....	2 22	W E Ferguson.....	6 17
J H Finch.....	3 22	J J Dick.....	2 17
C R James.....	1 20	F W Fitzgerald.....	7 16

Shoot-off won by Jones.

Take-home trophy, 25 targets, handicap:

R Jones.....	2 25	E G Unitt.....	6 18
C R James.....	1 21	W J Elias.....	3 18
J H Finch.....	3 21	J G Batterson.....	3 18
A L Burns.....	2 20	J J Dick.....	2 17
O C Hoyt.....	6 19	W E Ferguson.....	5 16
Dr W Short.....	2 18	T J McCahill.....	1 16

F W Fitzgerald.....	7 23	T J McCahill.....	2 19
J H Finch.....	3 23	J J Dick.....	2 17
F E Ferguson.....	6 22		

**Boston A. C.**

BOSTON, Mass., Jan. 25.—A squad, goodly in numbers and performance, shot over the Riverside traps today. Adams, from scratch, shot as clean a pair of events as one could want to see. Over McCrea traps he broke 50 straight with 47 out of 50 at Sargeant throwers. The total of the two were for take-home trophy, in which Whitney, standing 18 saucers, reached him. In the shoot-off Whitney, with 4½ up, won by ½ aerosaucer. Captain Tucker put up a good race, drawing 2½ in each event and making a full on Sargeant and 4½ on McCrea, tying Osborne at 35 for monthly cup, which was finally won by Osborne in the shoot-off, but only by ½ point. Ballou, with 2½, broke his targets cleanly and lost out over the McCrea's by only ½ scaler, making 49½ out of fifty. With 46½ in the other event, he totaled 95. The scores:

T C Adams.....	0 97	J L Snow.....	0 88
F Whitney.....	18 97	J E Lynch.....	5 88
C B Tucker.....	5 95	S A Ellis.....	5 88
G L Osborn.....	6 95	W C Brooks.....	8 80
M Ballou.....	5 95	*C F Marden.....	0 76
*E A Staples.....	0 92	G L Munroe.....	16 75
E L Davis.....	8 92	A W Hayford.....	20 68
*C B Day.....	0 92	*M Ballou, Jr.....	0 67
W B Farmer.....	6 89		

Shoot-off, 25 targets, take-home trophy:  
Whitney..... 4½ 23½ Adams..... 0 23

Shoot-off, 25 targets, monthly trophy:  
Osborne..... 1½ 23½ Tucker..... 1¼ 22¼

\*Guests.

# THE SEASON'S RECORDS

## Smokeless Powders

THE CHOICE OF THE

### Leaders of the Western Pennsylvania Trapshooters' League

1912 was notable for the high amateur averages made by prominent members of this organization. These accomplishments are especially creditable to the following members as well as an indication of the reliability at the traps of Du Pont's Powders.

C. F. Moore, Brownsville, Pa.....	93.75%	Schultze
J. F. Calhoun, McKeesport, Pa.....	93.47%	Dupont
G. E. Painter, Pittsburgh, Pa.....	92.98%	"
Dr. A. H. Aber, Dravosburg, Pa.....	92.63%	"

The uniform quality of Du Pont's Powders is a conspicuous feature. It is this uniformity which creates confidence and aids in making high scores wherever the tournament occurs.

Du Pont, Ballistite, Schultze or Empire should be on the top shot wad of your shells. These are the powders used by makers and breakers of trapshooting records.

## Your dealer sells Du Pont Powders for Trap or Field Shooting

**United Shoe Gun Club.**

BEVERLY, Mass., Jan. 25.—Before the biggest crowd of the season that has ever attended a shoot in this city, a chicken shoot under the auspices of the United Shoe Gun Club, of this city, was held this afternoon, when thirteen gunners went on the mound. The day was an ideal one, and was much enjoyed by the local marksmen, who made good marks. Following are the scores made by the shotgun division: P. L. Osborne 41, F. H. Wheeler 57, R. F. Sibley 60, J. B. Hadaway 49, J. V. Morse 57, H. G. Richardson 45, J. K. Browne 36, A. T. Foster 54, A. C. Spencer 43, S. W. Winslow, Jr., 60, A. D. Todd, 47, H. H. Eaton 57.

The chickens were awarded to S. W. Winslow, Jr., R. F. Sibley, J. V. Morse, F. H. Wheeler, H. H. Eaton and A. T. Foster.

On the same afternoon the rifle division held a shoot which was also largely attended, and much interest was manifested in the outcome of the match. The following were winners of chickens in the rifle division shoot: Dr. Harry E. Sears, first; Ernest F. Whitten second; Lient. C. G. Perkins third; C. B. Giles fourth; W. T. Abbott fifth; J. J. Flynn sixth.

A plan is on foot to make the membership of the United States Shoe Gun Club, of this city, the largest

gun club in Massachusetts. Already there are over 200 members belonging to the summer capital club, and President A. C. Spencer is planning to have a campaign within the next month to get in new members and get the membership up to 500 or even 600 if possible, as much interest is being taken in the weekly shoots held in Beverly, and it is thought that it will not be a hard job to get new members.

**Speedway Gun Club.**

NEWARK, N. J., Jan. 21.—To-day's target-wrecking squad was very small. B. M. Shanley shot five strings for 109. L. Page cracked 154 out of 175, Louis Colquitt did 132 out of 150, while J. Thompson was the only rocker to break 25 straight.

B M Shanley.....	99	92	21	24	90	..	..

Getting Down to  
**DETAILS**

"The Finest Gun  
in the World"

**FOX GUN**

There are 20 Big and Outstanding Reasons why the FOX is Superior to any gun made. Following are a few of these reasons:

- Made of the best gun materials.
  - Most skilled and highest paid workmanship.
  - Acknowledged the best balanced American gun.
  - Barrel Construction positively scientific.
  - The Fox Created Method of boring has made the FOX famous.
  - Coil mainspring guaranteed forever.
  - Simplest and strongest and only genuine 3-piece lock in the world.
  - Fastest hammer ever put on a gun.
  - Forend holds tight forever—latest word in compensating device.
  - Triggers are positive—no creep whatever.
  - Every FOX is guaranteed—and the FOX Company stands back of the guarantee.
- Ask Your Dealer**
- for the other equally important reasons why the FOX is BEST and tell him to show you the gun and the GUARANTEE that is attached to it. Don't accept a FOX without the FOX PROOF certificate.
- If your dealer cannot accommodate you write us giving his name and we will forward Catalog and full details.

**New York A. C.**

PEIHAM MANOR, N. Y., Jan. 25.—The call of the south depleted the ranks somewhat to-day, but a goodly number of regulars turned out.

Thomson trophy, shot for at 25 birds three times during the month, was won by O. C. Grinnell with 47 per cent January trophy went to J. G. Batterson after a triple struggle through ties.

In the 50-bird handicap event for the Debacher trophy, Batterson, Grinnell and Huggins tied. Batterson and Grinnell tied in the shoot-off. Finally Grinnell won the trophy.

D. F. McMahon and W. B. Ogden shot off the tie for the Travers Island cup, the former winning. The Stein trophy went to E. N. Huggins. O. C. Grinnell won the scratch match at 100 targets with 92, and in the shoot-off between himself and C. Stein in the 100-target handicap event the latter won. Mr. Huggins having won two legs on the Stein trophy, took it. The summary:

January trophy:					
O C Grinnell	..... 3	25	W B Ogden	..... 2	22
J G Batterson	..... 4	25	J W Hessian	..... 5	22
C Stein	..... 5	25	K Meyer	..... 0	22
R B Debacher	..... 6	25	D F McMahon	..... 1	19
E N Huggins	..... 7	24	J Hoyt	..... 0	10

January trophy shoot-off between two-leg winners:					
Batterson	..... 4	25	Grinnell	..... 2	25
Grinnell	..... 2	25	Batterson	..... 4	24
Batterson	..... 4	24	Grinnell	..... 2	20

Thompson trophy:					
O C Grinnell	..... 2	25	D F McMahon	..... 1	20
C Stein	..... 5	25	J G Batterson	..... 4	20
E N Huggins	..... 7	25	W B Ogden	..... 2	19
J W Hessian	..... 5	24	K Meyer	..... 0	16
R R Debacher	..... 6	22	J Hoyt	..... 0	7

Shoot-off won by Huggins

Stein trophy:					
D F McMahon	..... 1	25	E. N. Huggins	..... 6	24
W B Ogden	..... 2	25	C Stein	..... 5	23
J G Batterson	..... 4	25	R R Debacher	..... 6	23
J W Hessian	..... 5	25	K Meyer	..... 0	13
O C Grinnell	..... 2	24	J Hoyt	..... 0	9

Award made to E. N. Huggins, winner of two previous legs.

Travers Island trophy:					
D F McMahon	..... 1	25	R R Debacher	..... 6	23
W B Ogden	..... 2	25	J W Hessian	..... 5	22
O C Grinnell	..... 2	24	E N Huggins	..... 6	22
J G Batterson	..... 4	24	K Meyer	..... 0	20
C Stein	..... 5	24	J Hoyt	..... 0	8

Shoot-off won by McMahon.

Monthly shoot-off:					
McMahon	..... 1	24	Ogden	..... 2	22

One hundred targets, scratch:			
O C Grinnell	..... 92	J W Hessian	..... 75
D F McMahon	..... 85	J Hoyt	..... 71
W B Ogden	..... 84	R R Debacher	..... 71

Grinnell	..... 3	25	Grinnell	..... 3	22
Huggins	..... 7	24			

**New Rochelle Y. C.**

NEW ROCHELLE, N. Y., Jan. 25.—The steady five turned out to-day to clean up four events, three sweeps and the Saturday cup event. Stoddard won the latter event with (2) 23. Bullock took two of the sweeps and Granbery one, as follows:

Sweep, 25 targets, handicap: Bullock (4) 24, Marsland (3) 20, Granbery (0) 21, Stoddard (2) 22, Black (3) 21.

Sweep, 25 targets, handicap: Bullock (4) 25, Stoddard (2) 18, Marsland (3) 17, Granbery (0) 19, Black (4) 22.

Saturday cup, 25 targets, handicap: Stoddard (2) 23, Bullock (4) 21, Marsland (3) 18, Granbery (0) 22, Black (4) 21.

Sweep, 25 targets, handicap: Granbery (0) 21, Stoddard (2) 19, Black (4) 13, Bullock (4) 20, Marsland (3) 18.

Jan. 26.—The monthly prizes were decided. Several ties resulted and were shot off. Granbery won the long-run trophy with 36 straight. He also won the Olympic trophy after shooting off a tie with Krauss. Donovan won a leg on the Du Pont trophy with 24, which tied with Krauss, each having two legs. Donovan won the shoot-off with 22. In addition to which he tied with Giriat and Stoddard in the doubles event, and won the shoot-off for the cup with 17 out of 20, which was remarkable shooting under the windy conditions. Scores:

Sweep, 10 targets: Giriat 5, Molloy 8, Chandler 8, Bullock 9, Currier 6, Howard 6, Granbery 9, Donovan 8, Stoddard 7. Bullock wins shoot-off with 9.

Sweep, 15 targets, handicap: King (0) 11, Granbery (0) 12, Currier (1) 10, Donovan (0) 13, Howard (0) 14, Giriat (1) 14, Bullock (1) 13, Molloy (2) 14, Chandler (1) 13, Stoddard (0) 11. Howard won shoot-off with 14.

Du Pont trophy, 25 targets, handicap: Howard (0) 22, Giriat (2) 17, Granbery (0) 19, Currier (3) 17, Stoddard (1)

17, Donovan (1) 25, Molloy (5) 24, Bullock (2) 20, Krauss (1) 18, Marsland (2) 22, Chandler (2) 25.

Olympic match, 10 targets. Currier 6, Chandler 6, Granbery 7, Marsland 5, Howard 6, Donovan 7, Stoddard 6, Eldredge 5, Giriat 7, Krauss 9.

Scratch event, 10 pairs doubles: Stoddard 11, Giriat 9, Howard 12, Bullock 8, Chandler 12, Currier 10, Donovan 14, Marsland 8, Eldredge 8.

Sweep, 25 targets, scratch: Howard 22, Stoddard 19, Krauss 20, Giriat 18, Bullock 22, Donovan 23, Chandler 20, Molloy 19, Marsland 17, Eldredge 14.

**Sea Side Gun Club.**

BRIDGEPORT, Conn., Jan. 18.—The regular bi-monthly shoot of the Sea Side Gun Club was held at their club grounds to-day, it having been postponed from Jan. 11. A more ideal day for the sport could hardly be desired at this season of the year, which resulted in keen competition, and some very good scores being returned.

In the President's cup event, 50 birds, Wilson, at scratch, broke 49, making a very pretty exhibition. But not to be outdone, C. Fox, with a handicap of 4, and Sterling, with 6, tied up with Wilson, and in the shoot-off, 25 birds, Wilson and Fox again tied at 23, Fox having 2 handicap. Again they went at it, and the next time they tied at 24, and in the next trial, 15 birds, the "Skipper" showed his staying qualities by beating Wilson by one bird, giving him a leg on this event.

In the handicap cup event, Vanstone, scratch, made a perfect score, but Hull, with one handicap, came home with 24, making him a perfect score. In the shoot-off, Vanstone broke 22 and Hull with his handicap, getting 24 giving him a leg on this event.

The Island Brook cup event furnished another exciting contest, Senior and Chamberlain, at scratch, E. Lewis 1 handicap and Lavery 2, all turning in perfect scores. In the shoot-off Chamberlain again went straight, giving him the leg. Scores:

President's cup, 50 birds:					
Wilson	..... 0	49	Chamberlain	..... 0	44
C Fox	..... 4	49	Hall	..... 2	43
Sterling	..... 6	49	Billings	..... 7	43
E Lewis	..... 3	48	W Smith	..... 3	42
Vanstone	..... 0	47	R Lewis	..... 2	42
Senior	..... 0	45	Southey	..... 0	40
Hull	..... 3	45	Lavery	..... 4	37
Kellogg	..... 4	45	G Fox	..... 0	23
Cate	..... 0	44			

Handicap cup, 25 birds:					
Vanstone	..... 0	25	Sterling	..... 3	22
Hull	..... 1	25	Southey	..... 0	21
Senior	..... 0	24	E Lewis	..... 1	21
Chamberlain	..... 0	24	Billings	..... 3	21
Wilson	..... 0	23	W Smith	..... 1	20
Fox	..... 2	23	Kellogg	..... 2	19
R Lewis	..... 1	23	Hall	..... 1	19
Cate	..... 0	22	G Fox	..... 0	14

W Smith	..... 1	24			

T. M. A.

**Farragut Sportsmen's Association.**

CAMDEN, N. J., Jan. 25.—Cable, with twelve gift scalers, made a full and tied Hetteroth, 9-25 for the Stephens trophy to-day. While Hetteroth won the Du Pont trophy with 24 from a push of three, he was also high gun for the day. The scores:

Stephens trophy:					
Cable	..... 12	25	Marlor	..... 6	19
O'Neil	..... 7	22	Snow	..... 10	25
Fox	..... 7	23	Eastwood	..... 0	12
Von Nieda	..... 0	19	Till	..... 7	23
Lapp	..... 2	18	Rainey	..... 10	19
Hetteroth	..... 9	25	Crist	..... 0	9
Ostrander	..... 8	22			

Du Pont trophy:					
Cable	..... 10	18	Marlor	..... 8	17
O'Neil	..... 5	21	Snow	..... 6	21
Fox	..... 6	19	Eastwood	..... 0	13
Von Nieda	..... 3	20	Till	..... 11	23
Lapp	..... 3	20	Rainey	..... 10	14
Hetteroth	..... 3	24	Crist	..... 0	11
Ostrander	..... 3	13	Walz	..... 0	13

**Stamford Rod and Gun Club.**

STAMFORD, Conn., Jan. 25.—A mightily interesting team shoot was trapped here to-day between Greenwich Gun Club and Stamford Rod and Gun Club. Every bird pulled up to the last six meant the race might go to either team. Finally, Greenwich pulled up to a lead of 5 scalers, and won out, 456 to 451. E. L. Hatch, for Stamford, shot a consistent gun, getting high for both teams with 97 out of 100. J. S. Conover, of Greenwich, was second topper with 95. M. B. Foster, of the home team, third with 94. No member of either team made less than 88, with the exception of R. A. Gillespie, of the losing team, who was away off his feed, breaking only 81.

**NYOIL**

**Nyoil Absolutely Prevents Rust**

Use it on your gun, revolver, bicycle, talking machine, reel—in fact, for any purpose for which a fine, pure, lubricating oil is desired. It never chills or hardens, "gums" or smells bad. Ask sporting goods or hardware dealer. Large bottle, cheaper to buy, 25c.; trial size, 10c.

**WM. F. NYE** New Bedford, Mass.

Ask your watch repairer whose oil he is using on your watch.

Ask your watch repairer whose Oil he is using on your watch.

**Western Pennsylvania Trapshooters' League.**

PITTSBURGH, Pa., Jan. 25.—The annual meeting of the Western Pennsylvania Trapshooters' League was held at the Fort Pitt Hotel, Jan. 17, at which the following officers were elected: Louis Lautenslager, President; J. F. Calhoun, Vice-President; J. C. Garland, Secretary-Treasurer; Edna E. Lautenslager, Corresponding Secretary. Executive Committee: James Lewis, Dr. A. H. Aber, Homer E. Young.

It was decided to continue the League, as in former years, making it a permanent organization, and a committee was appointed to draft constitution and by-laws to govern same.

The usual five monthly tournaments will be given, beginning in the month of May, places and dates for holding same will be announced later.

Preceding the meeting there was a banquet given, at which about sixty of the most prominent trapshooters of this vicinity were present, showing that the interest in trapshooting in western Pennsylvania is much alive.

The coming year promises to be the best in the history of the sport of trapshooting.

During the year 1912 the League gave five shoots, in which 218 contestants participated. Thirty members of clubs belonging to the League shot in at least four out of the five tournaments and qualified for the season's averages, which are as follows:

	Shot at.	Broke.	Average.
C F Moore.....	720	675	93.75

The team trophy for the season was won by the Camden Gun Club, which consisted of J. F. Calhoun, Dr. A. H. Aber, A. H. Rigsby and A. D. Hickman.  
EDNA E. LAUTENSLAGER, Cor. Sec'y.

**Western Connecticut Trapshooters' League.**

The third annual meeting of the Western Connecticut Trapshooters' League was held at the Sea Side Outing Club, Bridgeport, Conn., Jan. 20, 1913. The meeting was called to order at 1:45 P. M., President W. W. Rice, New Haven, in the chair, and the following delegates responded to roll call: Messrs. Bailey, Day and Panton, Danbury; Funk, F. W. Smith and Derrick, New Haven; Cate, Vanstone and Adams, Bridgeport; H. Sherman, Long Hill; E. H. Bailey, proxy for Bethel. A communication was read by Secretary Sherwood from the Mattatuck Rod and Gun Club, Waterbury, tendering their withdrawal from the League for the coming year, and was accepted with regrets.

Treasurer's report showed a goodly balance on hand. A communication was then read from the Hartford Gun Club, applying for membership to the League, in event of any vacancy at this time, the same being favorably considered, and it was unanimously voted to admit the Hartford Club to fill the vacancy made by the Waterbury Club.

Dates were allotted as follows for the tournaments during the coming summer: Bethel, May 3; New Haven, May 24; Bridgeport, June 21; Danbury, July 25; Long Hill, Aug. 16, and Hartford, September.

The following officers were elected for the ensuing year: President T. M. Adams, Bridgeport; Vice-President, W. E. Day, Danbury; Secretary and Treasurer, Chas. Sherwood, Long Hill; Directors—D. H. Hall, W. L. Thompson, F. W. Smith, H. M. Judd, Homer Sherman and E. Mumford. T. M. A.

**Chester—Riverside.**

CHESTER, Pa., Jan. 25.—The team shoot here to-day was some return match, and it was no return of good for evil, for Chester hung the catchup match on the visitors. However, what Chester made, Pinchurst lost, for Fisher, of Riverside, ran his fifty straight, Bowers, of the same team, cracking 46, while three high lights from the Du Pont Gun Club made 46 or better. Ed. Banks only lost one of his Herculean efforts, McHugh lost three and Hammond four. We all have read the story of some shoots—well, this was some shoot. The scores:

Chester.		Riverside.

Westwood Gun Club.

CINCINNATI, O., Jan. 25.—The club entertained two
visitors at its weekly shoot to-day—H. R. Irwin, of the
Northern Kentucky Gun Club, and M. J. Welch, of the
Cincinnati Gun Club. The latter was in fine form and
shot a 94 per cent. gait, breaking 47 out of 50 targets.
Irwin shot well in two of the events, but failed to main-
tain his good work all through. The weather conditions
were fairly good, except for a raw wind, which made it
uncomfortably cold on the firing line.

Of the club members, J. Schneider was high man
with 66, followed by A. C. Kuball with 54 per cent.
E. Hafner made his first appearance at the traps for
several years, and needs practice to get back his old
form. In his last event, A. La B. broke 15 straight, but
fell down the latter part of the event, tying with Irwin
on 19.

The club house has been completed, and the shoot-
ers appreciated having a place to warm up in between
events. A number of the members will attend the shoot
at the Northern Kentucky's grounds on Feb. 9, when the
return match with the Cincinnati will be shot. Scores:

Table with 5 columns: Name, 25, 25, 25, 25, Total. Rows include H R Irwin, A La B, M Welch, J Schneider, A C Kuball, E Hafner, J Connor, M Stopper, F Disse.

Ossining Gun Club.

OSSINING, N. Y., Jan. 25.—There was a practice shoot
held by the Ossining Gun Club to-day. Weather
conditions were ideal for high scores, and big scores there
were. We have a shooter here who, though he has been
in the game but a short time, is showing championship
possibilities—98 out of 100 on 50yd. targets over the
Ossining Gun Club grounds, is some going, and R. P.
H. Wood did it to-day. Blandford broke 74 out of 75,
with a straight run of 62; Wood was a target behind.
When the smoke cleared away after the last 25, the score-
board showed that "youth shall be served." Wood went
straight, while the veteran dropped 6. Dr. R. J. Wren
showed steady improvement over previous attempts, ne-
gotiating a 17. Isaac Kanus tried his hand for the first

time at clay bird smashing and did well. Alderman J.
C. Barlow tried a string of 25, and was pleased with a
score of 19, made with a strange gun. In event No. 2,
Blandford went straight and got final win on the "White
Plains" cup.

Table with 5 columns: Name, 25, 25, 25, 25, Total. Rows include R P H Wood, C G Blandford, I F Lyons, J T Hyland, W S Smith, Dr R J Wren, W Holden, I Kanus, J C Barlow.

The Du Pont Gun Club.

WILMINGTON, Del., Jan. 25.—W. Edmanson won the
twelfth contest for the Frank L. Connable cub to-day at
Du Pont Gun Club. It was his second victory in the
series of matches for this trophy. He was high man
to-day with a score of 22 out of 25.

H. P. Carlon, the holder, and W. M. Foord, the
challenger, shot for the Class A challenge cup. Foord
won with 42 out of 50, while Carlon made 38.

The winners of the Connable cup contests and the
dates follow:

Table with 4 columns: Date, Winner, Score, Hdcp. Rows include April 20, May 11, June 8, June 22, July 20, Aug. 3, Aug. 14, Sept. 7, Oct. 19, Nov. 16, Dec. 28, Jan. 25.

Pahquioque Rod and Gun Club.

DANBURY, Conn., Jan. 27.—At the annual meeting of
the club the following officers were elected for the en-
suing year: W. S. Thompson, President; C. W. Stevens,
Vice-President; E. H. Bailey, Secretary-Treasurer; W. G.
Olmstead, Captain; Geo. Hall, Cashier. Directors: C. H.
Daley, F. G. Clark, W. A. Gregory, W. E. Day, S. H.
Fanton.

The club is planning for a good year at the traps,
and has selected July 26 for our annual tournament.
Last year we held the largest tournament in our league,
also one of the largest ever held in New England, with
122 shooters, and everyone got a good prize.

The Western Connecticut Trapshooters' League is
one of the best organizations of trapshooters in the
country. We are to hold our annual banquet on Feb. 6,
which is the thirteenth anniversary of our club. This is
the social event of the year in Danbury, and all the
tickets are disposed of two weeks ahead. This helps keep
up the interest with those members who are not active
at the traps, as everybody likes to belong to a live or-
ganization. We hold a shoot on the afternoon of the
banquet and put up a loving cup, which will be pre-
sented to the winner at the banquet. We expect quite a
number of shooters from out of town, also several pros.,
as they never miss one.

Northern Kentucky Gun Club.

THE damage wrought by the flood has been repaired,
and the grounds are once more in shape for the weekly
shoots. The attendance was unexpectedly small, in view
of the fine weather, only three shooters showing up. Of
these, H. R. Irwin was high, dropping but two targets
in the first 75, and going out with a score of 95. Irwin
has come rapidly to the front in local trapshooting
circles, and when in form can keep the best of them
guessing.

The club has arranged a fine program for Feb. 9,
when the team will shoot a return match with the Cin-
cinnati Club. There will be five 20-target events, Jack
Rabbit system. Local shooters are expected to turn out
in force, and delegations from Goshen, with Sam Leever
at the head, Dayton and other towns have signified their
intention of coming. Every shooter will get paid for
every target he breaks, and there will be a nice little
purse to divide among the high guns in each event, with
probably a reward for the high guns of the day. Scores:

Table with 5 columns: Name, 25, 25, 25, 25, Total. Rows include H R Irwin, J B C, G W Dameron.

Indianapolis Gun Club.

INDIANAPOLIS Ind., Jan. 25.—In the practice to-day
Edmanson led the amateurs, but failed to reach 90 per
cent. He was also best in the spoon handicap, winning
from the 20yds mark. The scores follow:

Table with 4 columns: Name, Shot at, Brk., Shot at, Brk. Rows include \*Darton, \*Hymer, \*Vietmeyer, \*Van Nest, Edmanson, Neighbors, Brown, Spoon handicap, Edmanson, Moller, Lewis, \*Professionals.

## Rifle Shooting

### Public High School Competition.

WASHINGTON, D. C., Jan. 21.—The National Rifle Association of America announces the results of the second competition between the public high school rifle teams throughout the United States for the new national trophy, for which twenty high schools are competing in a series of inter-school competitions covering nine weeks. The shooting is being done on gallery ranges at 50 feet with .22cal. rifles, and teams of five; the total possible score being 1000. The results of the second competition are as follows:

Iowa City High defeated Brookline, Mass., 939 to 736; Southern High of Philadelphia defeated the High School of Commerce, New York City, 902 to 843; Stuyvesant High, New York city, defeated Eastern High of Washington, D. C., 861 to 799; Morris High, New York city, defeated Baltimore Polytechnic, 915 to 810; Deering High of Portland, Me., defeated De Witt Clinton High of New York city, 946 to 879; Salt Lake City High defeated the Susquehanna, Pa., High, 934 to 841; Tucson, Ariz., High defeated the Utica, N. Y., Free Academy, 746 to 729; Manual Training, Washington, D. C. defeated Manual Training, St. Louis, Mo., 857 to 680; the Portland, Me., High defeated the Business High, Washington, D. C., 926 to 778; Technical High, Springfield, Mass., defeated Sault Ste. Marie, Mich., High, 870 to 867.

As the school officials of the city of Philadelphia have forbidden rifle practice by members of the schools, the Southern High School, of that city, which has made such a very good record in inter-school competitions the last two years, has been compelled to withdraw from the League.

### Intercollegiate Rifle Matches.

WASHINGTON, D. C., Jan. 24.—The National Rifle Association of America announces the results of the third match in the intercollegiate series of gallery rifle shooting matches for the college championship as follows:

Dartmouth College defeated Clemson Agricultural College, 902 to 850; Columbia University defeated Cornell University, 939 to 886; Lehigh University defeated Rhode Island State College 838 to 688; Massachusetts Agricultural College defeated Princeton University 954 to 944; Massachusetts Institute of Technology defeated North Georgia Agricultural College 929 to 901; Harvard University defeated the University of Maine 950 to 839; Norwich University defeated University of Vermont 910 to 878; University of California defeated Kansas University 887 to 783; University of Wisconsin defeated Louisiana State College 873 to 858; Minnesota University defeated Washington State College 924 to 862; West Virginia University defeated Michigan Agricultural College 931 to 921; University of Nebraska defeated U. S. College of Veterinary Surgeons 828 to 820; State University of Iowa defeated Perdue University 928 to 901; Oklahoma A. and M. College with a score of 866 won by default from the university of Missouri.

This is the third match of the series of thirteen matches to determine the championship.

### Interclub Rifle Matches.

WASHINGTON, D. C., Jan. 27.—In the inter-club rifle matches this week, the Park Club, of Bridgeport, Conn., retains its lead with another win, and A. B. Gully, of that club shot the possible score of 200. The club's score was 994 of the possible 1000, defeating the Birmingham, Ala., Club, whose score was 938.

The Warren, Pa. Rifle Club, with a score of 990, defeated the Thirteenth Regiment Rifle Club, of Brooklyn, N. Y., whose score was 904. The Myies-Standish Rifle Club, of Portland, Me., with a score of 958, defeated the Presque Isle Rifle Club, of Erie, Pa., whose score was 938; the New Orleans Rifle and Revolver Club, with a score of 898, the Manchester, N. H., Rifle and Pistol Club, with a score of 971, and the District of Columbia Rifle Association, with a score of 977, all had walkovers.

The prize for which the clubs are striving is a new trophy presented by the War Department, representing the civilian rifle club championship of the United States. The standing to date of the Eastern League is as follows:

	Won.	Lost.
Bridgeport .....	4	0
Washington .....	4	0
Warren .....	4	0
Erie .....	3	1
Bangor .....	2	2
Portland .....	2	2
Manchester .....	2	2
Birmingham .....	1	3
New Orleans .....	1	3
Brooklyn .....	0	4

There are seven more matches to be fired, when the winning club of the Eastern League will shoot against the winning club of the Western League for the championship.

### Military School Rifle Matches.

WASHINGTON, D. C., Jan. 26.—The National Board for the Promotion of Rifle Practice in the United States, in pursuance of its policy to promote rifle shooting in institutions of learning, has given a handsome trophy for the military schools of the country to compete for. The matches are held under the supervision of the National Rifle Association of America, which announces the results of the first match of the series now being held as follows:

Harvard Military School of Los Angeles, Cal., defeated the Culver Indiana Military Academy, 870 to 852. St. John's Military Academy, of Delafield, Wis., defeated the Hitchcock Military Academy of San Rafael, Cal., 912 to 762. The Kemper Military School of Boonville, Wis., defeated the Missouri Military Academy of Mexico, Mo., 790 to 575. The Wentworth Military Academy of Lexington, Mo., defeated the Kentucky Military Institute of Lyndon, Ky., 897 to 733. St. John's School, of Manlius, New York, defeated the Military Academy of Roswell, N. M., 843 to 809. The Bordentown, N. J., Military Institute with a score of 871, won from the Girard College of Philadelphia by default. The Nazareth Hall, Pa., Military Academy, with a score of 493 won from the New York Military Academy by default. The Randolph Military Academy of Morristown, N. J., with a score of 607, won from the Miami Military Institute of Germantown, O., by default.

The conditions of the matches call for teams of five, representing each school, each boy firing ten shots standing and ten shots prone, with a .22cal. rifle. There are sixteen schools in the competition, each one of which will fire one match with every other school.

### Cincinnati Gun Club.

THE team match of the Indoor League on Jan. 22, shot at the Brendamour range, was attended by nine members. The team total was not up to the mark which the club has set in previous matches. W. H. Cox shot very consistently, placing 19 shots in the black, and recording a total of 211, high for the match. G. E. Pugh got in second place on 202, and A. A. Yungblut, with his 22, scored 197. Elmer Hake, who usually makes the team, was in poor form to-day, and fell down badly, although making high 5-shot score, 46, on his second target. A team match is being arranged with Troop C of Cincinnati, and will be shot on the Brendamour range, with a return match at the armory. Scores:

W H Cox.....	43	44	40	43	41—211
G E Pugh.....	39	44	42	38	39—202
A A Yungblut.....	42	41	36	38	40—197
Ccl. C. Hake.....	37	39	36	41	37—190
A H Kenan.....	38	34	42	41	31—186—986

**Edible Locusts.**

Not a few commentators have stumbled over the statement that John the Baptist "did eat locusts." Not aware that in the East locusts are eaten, even to this day, they have suggested that some sort of bean is meant.

Locusts are to-day eaten in Arabia, pretty much as they were in Biblical times. Foreigners as well as natives declare that they are really an excellent article of diet. They are best boiled.

The long, or "hopping," legs must be pulled off, and the locust held by a wing and dipped into salt before it is eaten. As to flavor, the insect is said to taste like green wheat.

The red locust is more palatable than the green kind. Some say that the female is red and the male green, but others contend that all are green at first, whatever the sex.

Locusts must be caught in the morning, for then they are numbed by the cold, and their wings are damp with the dew, so that they cannot fly. They may be found in Arabia clustered in hundreds under the desert bushes, and they can be literally shoveled into a bag or basket.

Later the sun dries their wings, and it is hard to catch them. When in flight they resemble what we call May-flies. They fly side-wise, drifting as it were before the wind.

They devour everything vegetable, and are devoured by everything animal; desert larks and bustards, ravens, hawks and buzzards like them. The camels munch them in with their food; the greyhounds run snapping after them all day long, and eat as many as they catch. The Bedouins often give them to their horses.—Youth's Companion.

**Seagull 43 Years Old.**

M. BLONDEAU, of Quimperle, Brittany, shooting a few days ago, killed a seagull. Attached to one of its legs was a ring with the inscription in English: "1869. Return to the Zoological Station at Heligoland."

In 1869 Heligoland (now Helgoland) was a British possession. It has not been ascertained whether the tag was genuine.

**Bolivia, a Land of Varied Altitudes.**

THE fifth largest country in the New World, Bolivia, lies wholly within the tropics, yet altitude, rather than latitude, determines climatic conditions. From the lofty plateau on the west marked by the highest peaks of the Andean range, the republic's vast domain terraces down through smiling temperate valleys to the dense tropic jungle of the Amazonian plain. No greater contrast on earth can be pictured than that of the Titicaca basin and the eastern frontier. The one, treeless, windswept, encircled by the mightiest mountains of the Americas; the other, a sea of tangled verdure in the heart of the world's greatest wilderness. In a land so varied the products naturally cover a wide range. Precious metals, wrested from the Titanic strongholds of the Andes, rival Nature's most lavish forest gifts.

It was in the bleak mining region, two and a half miles above sea level, that the Spaniards first settled after the conquest, and it is here that the greater portion of the population is found to-day. Two thirds of the country lies in the lowlands, yet 88 per cent. of the people live on the plateau. Man is rooted to his native soil. The life of the Bolivian highlander is as dreary as his environment, yet he can not often be tempered down into the garden places just over the Andean wall.—American Review of Reviews.

**Why Thunder Sours Milk.**

It is universally known that milk turns sour after a thunderstorm. This has been attributed to the large quantity of ozone which is liberated by the electricity in the air. The experiments of Professor Trillat in Paris do not confirm that theory. He has established that atmospheric depressions cause putrefying gases—normally quiescent—to rise to the surface of certain substances, and in support of his theory points out that odors of all sorts are more permeating after storms. These atmospheric depressions accelerate the decomposition of gases and tend to liberate them. Hence lactic ferment is produced. Professor Trillat has made many experiments with diverse substances under varying pressures and has observed that when the barometer is lowest (during storms, etc.) the decomposition of gases is most rapid.—Harper's Weekly.

**Girl Tread By a Bear.**

WORD has been received here that Miss Laura Drumb, of Grand Rapids, had a narrow escape from death in Angeles, Wash. She recently accepted a position in the Angeles city schools and taking advantage of a day's vacation, went hunting. She had bagged twenty squirrels and several grouse and was about to fire her last cartridge when she saw a bear and had just time to climb a tree.

There she remained five hours, the bear refusing to leave the foot of the tree. Because of her long absence, Frank Drumb, her uncle, started a search. He had his camera, and upon arriving at the scene, preserved his presence of mind sufficiently to snap a picture despite her protests before taking her from her perilous position.—Grand Rapids, Mich., correspondent Minneapolis Journal.

**Raising Blue Foxes.**

THE Mariposa, Capt. Thomas Moore, had 250 passengers from southeastern and southwestern Alaska ports, a shipment of salmon from Yakutat and an unusual consignment, twenty cages containing live blue fox for transshipment to St. John, N. B., where they will be used in starting fox farms.

Fox raising has become quite an industry in northeastern Canada and big returns have been made from the sale of the animals' pelts. The foxes were brought to Seward by the steamer Dora from western Alaska, some of them from as far west as Dutch Harbor.—Seattle Post Intelligencer.

**For Sale.**

**GAME BIRDS**

Hungarian Partridges, Quail, Ring-neck Pheasants, Wild Turkeys, Capercaillie, Black Game, Wild Ducks, Decoys, Beautiful Swans, Fancy Pheasants, Peafowl, Cranes, Storks, Ornamental Ducks and Geese.

ON THE ALERT  
From painting by Theodore Rosseau.

# THE OUTDOOR LIBRARY

THE following is a selected list of *Forest and Stream's* books which are most suited to the taste of men and women who are fond of outdoor life—Shooting, Fishing, Natural History, Camping, Canoeing, Yachting. A good book does not wear out, but continues to give pleasure.

Catalogue giving full list of books will be sent on application.

## American Duck Shooting.

By George Bird Grinnell. Cloth, 630 pages. With 53 portraits of North American Swans, Geese and Ducks, Plans of Boats and Batteries. Fifty Vignettes in the text, and a Chart of the topography of a duck's plumage. Price, \$3.50.

## American Game Bird Shooting.

By George Bird Grinnell. This companion volume to "American Duck Shooting" treats of the upland game which American sportsmen shoot over dogs—woodcock, snipe, all the quail, grouse and turkeys. The volume is illustrated by colored plates of ruffed grouse and quail, and 48 full-page portraits of different game birds and hunting scenes, with a number of cuts in the text. Cloth. About 575 pages. Price, \$3.50 net. Postage, 25 cents.

## My Sixty Years on the Plains, Trapping, Trading and Indian Fighting.

By W. T. Hamilton ("Bill" Hamilton). With 8 full-page illustrations by Chas. M. Russell. New York. Cloth. 223 pages. Price, \$1.50.

## American Big Game Hunting.

The Book of the Boone and Crockett Club. Editors: Theodore Roosevelt and George Bird Grinnell. Illustrated. Cloth, 345 pages. Price, \$2.50.

## Hunting in Many Lands.

The Book of the Boone and Crockett Club. Editors: Theodore Roosevelt and George Bird Grinnell. Vignette. Illustrated. Cloth, 448 pages. Price, \$2.50.

## Trail and Camp Fire.

The Book of the Boone and Crockett Club. Editors: George Bird Grinnell and Theodore Roosevelt. Illustrated. 353 pages. Price, \$2.50.

Like its predecessors, the present volume is devoted chiefly to the great game and the outdoor life of Northern America; yet it does not confine itself to any one land, though it is first of all a book about America, its game and its people.

## American Big Game in Its Haunts.

The Book of the Boone and Crockett Club for 1904. George Bird Grinnell, Editor. 490 pages and 46 full-page illustrations. Price, \$2.50.

This is the fourth, and by far the largest and handsomest of the Club's books. It opens with a sketch of Theodore Roosevelt, founder of the Boone and Crockett Club, and contains an extremely interesting article from his pen, descriptive of his visit to the Yellowstone Park in 1903. Other papers are on North American Big Game; Hunting in Alaska; The Kadiac Bear; Moose, Mountain Sheep; Game Refuges, and other big game topics.

## Camp Life in the Woods.

And the Tricks of Trapping and Trap Making. Containing hints on camp shelter, and all the tricks and bait receipts of the trapper, the use of the traps, with instructions for the capture of all fur-bearing animals. By W. Hamilton Gibson. Illustrated. Cloth, 360 pages. Price, \$1.00.

## Modern Training.

Handling and Kennel Management. By B. Waters. Illustrated. Cloth, 373 pages. Price, \$2.00.  
This treatise is after the modern professional system of training. It combines the excellence of both the suasive and force systems of education, and contains an exhaustive description of the uses and abuses of the spike collar.

## Danvis Folks.

A continuation of "Uncle Lisha's Shop" and "Sam Lovel's Camps." By Rowland E. Robinson. 16mo. Price, \$1.25.

## Uncle Lisha's Outing.

A sequel to "Danvis Folks." By Rowland E. Robinson. Cloth. Price, \$1.25.

## A Hero of Ticonderoga.

By Rowland E. Robinson. Cloth, 187 pages. Portrait of author. Price, \$1.00.

## A Danvis Pioneer

A story of one of Ethan Allen's Green Mountain Boys. By Rowland E. Robinson. Cloth, 214 pages. Price, \$1.25.

## In the Louisiana Lowlands.

A sketch of plantation life, fishing and camping just after the Civil War; and other tales. By Fred Mather, author of "Men I Have Fished With," "Adirondack Fishes," and "Modern Fishculture in Salt and Fresh Water." With portrait of the author. Cloth. Price, \$1.50.

## Forest Runes.

Poems by George W. Sears ("Nessmuk"). With art-type portrait and autobiographical sketch of the author. Cloth, 208 pages. Price, \$1.50.

## The Angler's Workshop, Rod Making for Beginners.

By Perry D. Frazer. Cloth, 180 pages. Four full-page illustrations, sixty working drawings. Postpaid, \$1.00.

A complete, simple and thoroughly up-to-date work for the guidance of the amateur rod-maker, carrying him from first principles through all phases of successful rod making. There is no theorizing or speculation. All terms are simple, and all kinds of rods and woods are treated of.

## Modern Fishculture in Fresh and Salt Water.

By Fred Mather, author of "Men I Have Fished With," with a chapter on Whitefish Culture by Hon. Herschel Whitaker, and a chapter on the Pike-Perch by James Nevil. Illustrated. Price, \$2.00.

## My Angling Friends.

A second series of "Men I Have Fished With." By Fred Mather. Cloth, 369 pages, with 13 illustrations. Price, \$1.50.

## Rhymes of the Stream and Forest.

By Frank Merton Buckland. Cloth. Heavy laid paper. Sumptuously bound. Postpaid, \$1.25.

A charming collection of verse by an author who knows and loves nature well. A particularly pleasing gift for fishermen, closely simulating in form and ornamentation the standard fly-book.

## Jack the Young Ranchman;

Or a Boy's Adventures in the Rockies. By George Bird Grinnell. Illustrated. Cloth, 304 pages. Price, \$1.25.

## Jack Among the Indians;

Or a Boy's Summer on the Buffalo Plains. By George Bird Grinnell. Illustrated. Cloth, 301 pages. Price, \$1.25.

## Jack in the Rockies;

Or a Boy's Adventures with a Pack Train. By George Bird Grinnell. Illustrated. Cloth, 272 pages. Price, \$1.25.

## Jack the Young Canoeeman.

By George Bird Grinnell. Illustrated. 278 pages. Price, \$1.25.

## Jack the Young Trapper.

By George Bird Grinnell. Illustrated. Price, \$1.25.

## Jack the Young Explorer.

By George Bird Grinnell. Price, \$1.25.

## Men I have Fished With.

Sketches of character and incident with rod and gun from childhood to manhood; from the killing of little fishes and birds to a buffalo hunt. By Fred Mather. Illustrated. Price, \$1.50.

It was a happy thought that prompted Mr. Fred Mather to write of his fishing companions. The chapters were received with a warm welcome at the beginning and have been of sustained interest. The "Men I Have Fished With" was among the most popular series of papers ever presented to FOREST AND STREAM readers.

## Houseboats and Houseboating.

By Albert Bradlee Hunt. The book contains forty specially prepared articles by owners and designers of well-known houseboats, and is beautifully illustrated with nearly 200 line and half-tone reproductions of plans and exteriors and interiors. A most interesting chapter is devoted to houseboating in England. Extra heavy paper, buckram. The price is \$3.00 net. Postage, 34 cents.

## The Art of Shooting.

An illustrated treatise on the art of shooting. By Charles Lancaster. Illustrated. Cloth. Price, \$1.25.

## Gas Engines and Launches.

By Francis K. Grain. A few pages are devoted to launches in general, with some excellent advice to the prospective owner of a motor boat; but the author's attention is given chiefly to explaining the principles, working and practical handling of the marine motor for the amateur, who does not care to trouble his head with involved technical information. Cloth. Illustrated. 128 pages. Postpaid, \$1.25.

## How to Build a Launch from Plans.

By Charles G. Davis. A thoroughly practical guide for the amateur. Shorn of all blind technicalities, it considers displacement, good construction and faulty stability, setting up the keel, framing and planking, with careful explanations. Each step is followed up to the care and running of the gas engine. Cloth, 9 folding drawings, 8 full-page plates, 40 smaller diagrams, 176 pages. Postpaid, \$1.50.

## Fetch and Carry.

By B. Waters. Tells minutely of the methods by which a dog, young or old, willing or unwilling, may be taught to retrieve either by force or "natural" system. Cloth. Illustrated. 124 pages. Postpaid, \$1.00.

## Nursing vs. Dosing.

By S. T. Hammond. A most practical book for the dog fancier, based largely on Mr. Hammond's observation that dogs, and particularly house dogs, suffer from too much medicine. Contents—Nursing, Cleanliness, Diet, Other Foods, Kennel and Exercise, Common Ailments, Diarrhea, Convulsions, Epilepsy, Distemper, Eczema, Need of Proper Care, Stomach, Vermin, Ear, Mange, Nervous System, Colic, Worms. Cloth. Illustrated. 161 pages. Postpaid, \$1.00.

## Training vs. Breaking.

Or Practical Dog Training. By S. T. Hammond. The author tells how to bring out the wonderful intelligence of the dog by kindness, as opposed to force. A clear, explicit work, which will appeal to dog lovers. Contents—First Lessons, Charge, Canine Accomplishments, The Whistle, Quartering, Retrieving, In the Field, Working in Company, Raising Puppies, Training Pet Dogs, Conclusion. Cloth. Illustrated. Postpaid, \$1.00.

## Training the Hunting Dog for the Field and Field Trials.

By B. Waters. Probably the most comprehensive work on the subject written, covers every phase of training and field trial preparation with reasons. Kennel Management, Breeding, Kenneling, Points of Judging. It is a work well calculated to enable the amateur to become a successful breeder and trainer. Cloth. Illustrated. Postpaid, \$1.50.

## Woodcraft.

By Nessmuk. No better or more delightful book for the help and guidance of those who go into the wild for sport or recreation was ever written. No one ever knew the woods better than Nessmuk or succeeded in putting so much valuable information into the same compass. Camp equipment, camp making, the personal kit, camp fires, shelters, bedding, fishing, cooking, and a thousand and one kindred topics are considered. Beyond this, the book has a quaint charm all its own. Cloth. Illustrated. 160 pages. Postpaid, \$1.00.

## Log Cabins and Cottages.

By William S. Wicks. This book covers building for the woods from the simplest shelter to the most elaborate cottage, cabin or house, and their furnishing and fitting. The details and directions are at once simple and comprehensive, and the illustrations are numerous and illuminative. Cloth. Illustrated. 44 full-page plates and numerous text illustrations. Postpaid, \$1.50.

## My Friend the Partridge.

By S. T. Hammond. A delightful reminder of crisp autumnal days in the covers. It tells of sport with the noblest of game birds, the habits and habitat of the ruffed grouse, with just the right touch of reminiscence and personal experience. Cloth. Illustrated, 150 pages. Postpaid, \$1.00.

FOREST AND STREAM PUBLISHING CO., 127 Franklin St., New York

### An East Brewster Fox Hunt.

BY MICHAEL FITZGERALD.

THIS is the season when the sporting blood of the Cape Codder is at full tide. The hunting cry of the foxhound is heard in the woods as wily reynard is trailed through copse and glade. From Spring Rock to Sheep Pond the gallant dog pursues the quarry and there finds that the foe has doubled on his tracks. Back again for some distance and nosing around for another clue, with a full-throated cry the hound renews the ruthless quest in the direction of Long Pond. Swerving to South Orleans, reynard increases his lope, for old "Spotty" is getting dangerously close and he must be shaken off on this long stretch. The music of the chase now comes faintly to the silent but alert watcher at Spring Rock. No need to follow the dog. The man with the gun knows that when reynard reaches the South Orleans road he will turn once more and skirt the north shore of Baker's pond on the last leg of his journey to earth. Half an hour goes by. The hound's cry increases in volume to the eastward and each moment it becomes louder. The last round of the struggle has been reached and the end is near. The man with the gun hears the dog crashing through the underbrush, and almost under the muzzle of the weapon the jaded fox emerges from the tangled growth. Bang! Old Spotty shakes the fallen foe a few times and is rewarded by "Good dog!" from his master. Quickly poor reynard is triced up to a limb and skinned. The man with the gun goes home richer by nine dollars, old Spotty at heel, and both well content with the day's work. The eye-filling spectacle of a gay, red-coated cavalcade had no part in the run and some may think that without it fox-hunting is tame work; but the man with the gun, who waited so patiently under the shadow of Spring Rock, followed the varying notes of the dog's music intently, and with the mind's eye every phase of the hunt was distinctly visible to him. No curve or swing of the course escaped him. His blood tingled with excitement as he read the messages which the gallant hound sent ringing through the clear air. It was well to make a few extra dollars these hard times, but this man had the instincts of a true sportsman, and only the week before he declined to "dig out" a fox because there was "no fun in that kind of thing;" and old Spotty would be sure to get even with reynard later. And, says Yarmouth (Mass.) Register, if any city man likes a full day's sport, he cannot do better than to have it with dog and gun in our East Brewster woods. There's lots of varmint around.

### Greenheart.

A wood which, according to the Department of Agriculture, outlasts iron and steel when placed in water is British Guiana greenheart. It is used in ship and dock building, trestles, bridges, shipping platforms, flooring, and for all purposes involving great wear and tear. The woods of two species of West African trees have been introduced into English markets as substitutes for greenheart under the name of African greenheart, but both are inferior to the South American tree.

All the gates, piers and jetties of the Liverpool docks and practically all the lock gates of the Bridgewater Canal in England are of greenheart. It furnished the material also for the fifty pairs of lock gates in the Manchester, England, Ship Canal. When the greenheart dock gates in the Mersey Harbor at Liverpool were removed in order that the channel might be deepened and widened, the same wood was again employed in building the enlarged gates, and wood placed in the gates of the Canada dock in 1856 was used again in its reconstruction in 1894. The use of greenheart has been specified for sills and fenders in the lock gates of the Panama Canal. Nansen's ship, the "Fram," and the Antarctic ship "Discovery" were built of greenheart. In addition to its use as timber, great quantities of the wood are made into charcoal.

Though it grows in parts of British, French, and Dutch Guiana, Venezuela, Brazil,

### AFTER THE BIG STORM

The appeal of this picture should awaken a response in the hearts of every real lover of camp life. You have doubtless had a similar experience. It is a remarkable set of pictures for 50 cents each, or four for \$1.50, or see special offer.

Colombia, Peru, Trinidad, Jamaica, and Santo Domingo, it is being cut only in British Guiana, where it is found along the sea coast and water courses, seldom extending more than fifty miles inland. Greenheart used to bring \$1.00 per cubic foot at the point of shipment, but the present price is considerably less. Constant drain for more than 100 years upon the most accessible stands of greenheart in British Guiana has stripped the forest of its material, and the wood now obtained is of inferior quality. Tracts are now being cut over in some places for the third time. Only the heartwood of the tree possesses the peculiar durability desired, and the best wood is found in old trees.

The wood of three other species of the same botanical family is occasionally cut and

sold with the genuine greenheart. These are the white cirouballi or sirouballi, the yellow cirouballi, sometimes called "black cedar," and the keritee or ketti. Circular 211 of the Forest Service, which describes greenheart and its various uses, tells how to distinguish between it and these substitutes. While they closely resemble greenheart, they are inferior to it in durability.

FOREST AND STREAM gives more than twice as much reading in a year as the largest of the three-dollar magazines. And it does this at a trifling cost of less than six cents per week. In no other way may one secure for himself so much of the best outdoor literature at such a slight expense.

## Special Offer

For a limited period the publishers of JUDGE will let the subscribers of Forest and Stream have a set of these pictures and a year's subscription to JUDGE for \$5.

## Adirondack Camp-Fire

By WILLIAM SIMPSON

IT was several years ago—I had not been very well for some time, not to a degree of illness that incapacitated me from attending to my usual duties—I consulted a doctor of medicine, who said I had “rails on my lungs.” He looked wise and sad, like one who lost a whole lot, or an old friend that forgot to leave him a legacy. Anyway, he shook his head, wrote out a prescription, and handed it to me with some oral instructions. I moved about as usual

at the foot of Lower Saranac Lake?” It is burned down now, but it used to be a favorite rendezvous; not the fashionable hotel, you understand, but woods hotel of the old sort, where a man could use his knife for the purpose of transporting nourishment to his mouth without attracting undue attention.

It was early in the season when I arrived there. The lumbering was over for that year, and many of the men who had worked on the

a favor, or throw a troublesome customer out of the barroom door. Here the pine, balsam, spruce, cedar, birch and many other varieties of vegetation breathe out their perfumed air and health-giving qualities, more especially at night, and if those unfortunate individuals who are troubled with that parent of many ills, “dyspepsia” and its near relation, consumption, and some of their less troublesome kin, were to come here during the summer months and be lulled

ON THE STILL WATER.

ON THE RAPIDS.

for some time, the physician's serious looks had given me some misgivings, but between doubt and hope as to my actual condition, I struggled along fairly well for awhile.

Did you ever notice when you have been in poor health, the number of gratuitous cures that are suggested to you by your friends and the various remedies that are thrown in? Well, that was my experience, too. I finally consulted the most celebrated doctor of medicine, E. G. J., whose great knowledge and wonderful ability were universally acknowledged. His advice was as honest as it was brief. He said: “You are in bad shape, and if you do not give up your activities for awhile, there probably will be a store where yours is now, but you will not likely be the proprietor.” So I inferred I was likely to be the central figure at a funeral. I put my affairs in order and went to seek health and recreation among the Adirondack Mountains.

“Do you remember the sportsman's retreat

lumber job were now “guides” and were stopping here, waiting for pre-arranged appointments or looking for prospective “sports.” As I alighted from the stage coach, the first place I made use of was the ante-room off the office, where guests often entered to wash up and remove the soil of travel. The water was all right, all Adirondack water is, but when it came to the comb and brush, perhaps I ought to draw the veil of charity over that comb. Its teeth in some respects resembled the front rank of a defeated army. The brush was not so bad; it looked younger and may have been less frequently used, but it had a serio-comic smell, and it was a red-letter day when that roller had a new towel put on it. But this is not a hard-luck story. The place had many redeeming qualities; the rooms were clean and tidy, the beds good and their linen perfect; the dining room was large and cheerful, the fare excellent, and the jolly landlord always willing to do a friend

to sleep by the murmuring waters and breathe this air, laden and mingled with the perfume of the water lily and all the wild flowers that come to life in the woods between the entry of the snowdrop and the exit of the golden rod, their troubles would be removed a lot.

With improved health, nature sends increased zest and relish and a better appreciation and fuller enjoyment of outdoor life. So in due season I received my share.

There was in the party “Laura Louise,” a relation of mine by marriage, who entered into the full enjoyment of everything as it came along, especially the trout fishing, and at close range could cast a fly as well as the best. Often in the gloaming we would go out on the lake to the mouth of one of the small brooks and there she would try her skill with the fly, which on one occasion was rewarded in landing two nice half-pound trout with one cast of her flies.

Our next moving day brought us to “Bart-

lett's" on Upper Saranac Lake, on the carry between the lake and Round Pond. To us it was the homeliest, cosiest, nicest spot of all. For a place to spend a summer vacation, here is a choice selection on a short carry of about a quarter of a mile, a small piece of land that separates two lakes, plenty of grass, shade trees, sloping lawns, sequestered nooks, sylvan glades, babbling brooks and the whole outfit for an active individual from the age of seven to seventy, who can perform his ablutions with the aid of the Saranac Lake and sunshine instead of a cute little pitcher and basin and a towel the size of a return ticket. As a place to recuperate and increase the avoirdupois, it has few, if any, equals. Between breathing the air, universally reputed for its restorative powers, walking in the pine-laden zone, stroll in the cool of the evening, or to row over the Saranac Lake in an Adirondack boat.

Just here I would say a word about that boat. A Saranac boat is a thing of beauty and a joy for ever, about sixteen feet long, weighing about seventy pounds. It is one of the greatest achievements of the boat builder in the back woods. It is a frail craft, so light that it can be carried by your guide over a carry miles long. It rides the water as gracefully as a swan and makes rapid progress as if by magic. It can float in three inches of water, and in the hands of an experienced guide can go thirty-five miles a day, and I have seen them cross the Saranac Lake with a load consisting of, among other things, two large cart wheels, a large Saratoga trunk, and two deer hounds.

In the picture George Washington crossing the Delaware is all right, and we ought to be patriotic, but here is a rival. You get in the bow of the boat on Round Lake, when the wind gets in a hurry and lashes the seas into a white foam, and you will be kept quite as busy as the immortal George Washington was, dodging blocks of ice on the Delaware.

Variety is the spice of life, and after a delightful stay at Bartlett's, we moved across the lake to the Sweeney Carry. No old Adirondack traveler will ever forget the old carry house where the kind, thoughtful proprietor of that cozy camp served the most delightful dinners. Oh shades of Lucullus, Paul Smith and Delmonico, how we did relish those excellent meals. Now let me tell you of the place and the good people there.

The house was one of the ordinary kind, such as you will find in the North Woods, built of spruce logs and its architecture in keeping with environments. The landlord and his wife with their young daughter, natives of the wild wood, busied themselves taking care of the summer visitors and travelers who arrived via the carry, and from up the Bog Stream. Every day was a busy one. There was no indolence on their part. The wagon was a two-story affair that could hold two boats on either side and one over the other, so that four boats could be carried at one load. It had every appearance of being a prosperous business. The women folks could see across the bay, and the moment a party appeared across the lake, preparations were made according to the number in the party, and everything would be ready on their arrival. So the days passed merrily that summer. In the evening around the camp-fire those present would relate or listen in the glimmer of the

burning logs to the tales and adventure of present and other days.

Have you ever noticed the quality of greeting that belongs to certain occupations, the "How do you do," "Good morning," and other more or less empty salutations which fall flat on the ear and make but a very faint impression on the mind of the dweller in cities, who rarely carries an instant for an answer? How hollow compared with the sportsman's "Hello, hello, what luck?" which breathes out a heartfelt community of interest and good feeling.

It was the manner of spending Sunday that impressed me most. When I sojourned there, the mother of the household called her little family and guests together in the sitting room, with perhaps a camper from a nearby camp who perchance came to get a pail of milk, and there kneeling down to "Heaven's Eternal King," the mother prayed and read the sacred page or perhaps together all joined in hymns of praise and held communion in simplicity and truth. Is not that the religion of the heart? And I venture to say that one who has never passed a Sunday amid the solemn loneliness of a comparatively uninhabited region cannot fully realize the meaning of those two words, "God's country."

The tide of summer travel commenced in June and was at its height in the carry in July, and this was a stopping place for the mid-day meal best known to old-timers and the wise ones. The hours of ease were relieved of monotony by the various types of character who made up the galaxy of summer travel that passed here going over the carry to the Bog River to camp on the banks of the many streams and ponds—artists, doctors of divinity and medicine, judges—supreme and subordinate—merchants, manufacturers and people in all walks of life were represented, some in quest of health and some on pleasure bent, but almost everyone came for the trout fishing and game shooting.

The destination of many was Little Tupper Lake, and on the shores of this beautiful sheet of water was a retreat presided over by an old-time Adirondack worthy, "Pliny Robbins," a man of many virtues that I knew, and if he had any sins, "Oh, may shades of darkness hide them." Here the deer and smaller game were plentiful, the waters of the lake and streams were teeming with the lusty trout, and the fishing was fully described by any of the guides. They could tell where the trout were and when they would be at home, but their feeding time in August, ah! that was a different affair. Suffice it to say, there almost always were as many as the cook could use. But it is not all of a fishing or shooting vacation to get a lot of fish or plenty of game; that is only a sort of main-spring of the affair. There is the exhilarating exercise crossing the trails, the strolling at will through the woods, the social intercourse round the camp-fire, making photographs—those gentle reminders which in the years to come bring back memories to us of those happy days, refreshing to the memory and pleasing to the mind. It was a favorite diversion to glide up in the boat on any of the streams running into the lake, and in the stillwater come upon deer feeding upon the lily-pads or sweet grass at the mouth of the spring brooks, replete with verdure and mosquitoes. I asked Ed. Huntington, my old and reliable guide and one whose veracity was considered reliable, how long insects stayed

in the woods, and he said: "Waal, they kim in here in the spring on snowshoes, and they go away in the fall on the first snow sled."

This certainly was a sportsman's paradise. The shores were clear of fallen timber, the water was cold and clear, and the most desirable occupied sites for camps were vacated. Now, I do not plead guilty of laziness. I will compromise by confessing to preferences for certain kinds of work, and deer hunting by various legal methods had a fascination for me, but after a while I would get tired of it, or at least the sharp edge of desire would be dulled a little in time, but one thing I have not had enough of is fishing for the lordly speckled or square-tailed trout. Now, all ye lovers of the rod, disciples of Izaak Walton, and lovers of green woods and clear waters, who dangle a small fish on a trolling rod big enough to grow beans on, with a line to match and call it sport, listen and learn what happened to one of the craft with a Leonard fly-rod, nine and a half feet long, weighing five ounces, with a reel to match, a tapered line on it, and a six-foot gut leader on Bog Stream in August.

The weather had been warm and the sky clear for a few days and the fishing poor. About sundown the wind shifted and blew almost a gale, with a heavy downpour of rain for two days, and during the night it cleared. There had not been a fish caught for several days, and the turbulent waters of the lake were now placid as a basin, and its face shone like a mirror. Ed Huntington, who had learned to play cards while in the army, had grown tired of the game, and sat down beside me on the veranda and whispered: "The trout will be scattered from the spring holes, and to-day we ought to have glorious sport fishing." So we quietly got into our boat and slipped away to try our luck, putting together the three joints of that wand that feels in your hand like magic, adjusting the reel and line with the selected flies, that on referring to my diary I find were a scarlet ibis on a No. 4 hook at the end, a Montreal as a second and a brown hackle for a drop fly.

We tried first at the mouth of the stream without success, and Ed deftly paddled the boat up the stream a little to a bend, where a huge log lay on the shore in the stillwater. "Now," said Ed, "cast toward the patch of lily-pads under that log, and you ought to get a good one." No sooner said than done. The two upper flies rose in response to the rod, but the end fly was fast in the mouth of a three-pound trout. Taken by surprise, he leaped with a mighty effort three feet into the air. He came harmlessly down upon the slack of the line and dove to the bottom. I was fearful lest he would find a sunken log, or get tangled up in the lily-pads, but I presently led him out from shore to give battle and the response was a sullen shaking as a Scotch collie shakes a rabbit. I bore heavily on the rod, made a few turns on the reel, and after some fierce fighting in the open water, he started toward the surface again up and down, back and forth through that deep pool. Each time he came to the surface he shed a yellow gleam of light, and mustering all his powers with one supreme effort, he leaped a foot above the surface of the water, until at last exhausting all his energy, he rolled over on his side, and Ed, who knew his part of the business, slipped the

(Continued on page 187.)

# History of the Wild Turkey Gobbler

## The Last of His Race in Michigan

By WILLIAM B. MERSHON

**T**HIS bird weighed 23¾ pounds. It was mounted by William Richter, long since dead, and one of the best taxidermists of his day. After skinning this turkey I remember he sent the carcass down to my mother, and we had roast turkey and it was simply fine.

I had for many years been a turkey hunter and my father before me; in fact, my father and I together were always urged by my mother to get a turkey for Christmas if we failed to get one for Thanksgiving. If there was tracking snow we were pretty sure to get our bird, but without it, it was almost impossible, according to our mode of hunting them.

We would drive out in the country eight or nine miles, put up the horse at a farmer's, and with lunches in our pockets start out for the day's tramp. Turkey tracks were generally found crossing the road somewhere from one piece of woods to another or from the woods to a swamp. If they were old tracks, they generally led to where fresh tracks could be found, and in the early days turkeys were quite plentiful. This was back in the 70's and early 80's. The tracks having been found, no special care was taken to approach the turkeys unseen nor unheard, but we would follow the tracks until it was evident the birds had seen us and were beginning to run. We would follow along until finally one track would leave the flock and then another, and these single birds starting off would go through the most impenetrable places in the thickets, crawl through brush heaps and come out the other side into the swamps under old upturned roots of trees and finally unexpectedly almost in your face out from under some small clump where it had been hiding would burst this tremendous and grand bird into flight. I defy anyone not to be startled by the apparition, and even when using a shotgun, with No. 2 and 3 shot, quite often the bird, although within range, was missed because of the unexpectedness of his appearance, and the startling effect of his flight. If we were successful and had gotten our one bird, that might do for the day, but if we missed and did not succeed in getting up with this straggling bird, we would go back to the main flock to follow up the next bird that separated from the flock.

Turkeys lie closely at times so one would almost step on them. I used to have a Gordon setter named Nip—Nip and Tuck were the pair—and Nip was very fond of turkey hunting. She would follow along and her nose seemed to tell her when we were getting anywhere near a bunch of turkeys and her tail would begin to go back and forth at a rapid rate. Many is the turkey I have gotten over her staunch point.

But to return to the big turkey gobbler. This was in the fall of 1886 when Bert Beach and I took the train on the old Detroit and Bay City road to a little station about nine miles from Saginaw, intending to hunt across to Reese, a little station on the old narrow gauge, the S. T. & H. My recollection is that there was a stretch of about four miles of hunting

territory between, where there was always good partridge shooting. Notwithstanding a slight tracking snow had fallen the night before, we had very slight hopes of turkeys. But we had not been in the woods long before we ran on to the tracks of four wild turkeys. Our shells were changed to coarse shot and we took after them. Although the snow was rapidly melting

and the tracking hard, we did succeed in picking up the tracks of one, but he got away from us and made a long flight and disappeared in a little clump of ragged weeds and brush. The snow had all gone by this time, and despairing of picking up the tracks again, I had put in No. 7 shot and had killed four ruffed grouse.

I had my old black and tan setter Bob, the

A FINE SPECIMEN OF WILD TURKEY.  
Shot by the author, and the one referred to in the article.

old original fellow, with me, and well on in the afternoon he began to make queer motions as we came up to the trunk of a fallen large elm tree. Before I had time to change my shells, from the top of this old tree the gobbler burst forth like a cyclone. I made a quick snapshot at his head and neck and luckily filled him full of No. 7 shot, for down he came with a thud and old Bob went to him and tried to fetch him to me, but the thrashing and beating of his wings pounded the dog, so it was some time before he could get hold of him at all. My companion and I let out a war whoop that could have been heard for miles. He was a magnificent bird with a beard nearly eight inches long and the colors of the rainbow are painted in bronze in his plumage to this day.

We had to take turns lugging our game. Four partridges, the ammunition in our pockets and a turkey weighing nearly twenty-four pounds and a cross country tramp of a couple or three miles to make a train we had none too much time to meet, about tuckered us out.

A letter from Bert Beach to-day reminds me of this shooting episode. He is in far off Arizona and says that somehow or other the shooting in these days is not like it used to be, a sentiment to which I thoroughly subscribe.

### Fly Campaign.

ALBANY, N. Y., Jan. 27.—*Editor Forest and Stream:* The house fly is not the only serious offender, since recent investigations show that the common biting stable fly is a carrier, possibly the usual carrier, of infantile paralysis. This recent addition to the list of man's known enemies breeds under much the same conditions as the house fly, though displaying a marked preference for strawy wastes.

A successful fly campaign must depend largely upon a general appreciation of the undesirable character of flies and a widespread recognition of the practicability of suppressing the pest. Only about a decade ago it was considered impossible to control the salt marsh mosquito. The seemingly impossible of yesterday is being done to-day, and at no very great expense. The history of the house fly will duplicate that of the mosquito in large measure as soon as communities realize the vital advantages of generally abandoning middle age methods of caring for manure from the stable and wastes from the house. The overabundance of flies about many dwellings is proof of the excellent provision unthinkingly made for these filthy insects. The fly campaign must be accompanied by a reformation of certain unsanitary practices in regard to the disposal of domestic wastes or by-products and should be supplemented by local health ordinances prohibiting under penalty the maintenance of fly breeding conditions. The actual work against flies in a community should be preceded by vigorous efforts along educational lines for the purpose of securing intelligent and general co-operation. This latter is very important and may well begin at once if results are to be obtained next summer.

E. P. FELT, State Entomologist.

FOREST AND STREAM is edited exclusively for the sportsman. There is no other publication like it in existence. It contains something of more than ordinary interest in each issue.

## Out of Doors in Canada

### Some of the Best Bass and Musky Waters in Ontario and How to Reach Them

*One of a series to run in FOREST AND STREAM during the year.*

By S. E. SANGSTER (CANUCK)

THE Province of Ontario offers the choicest waters of all Canada for those anglers whose favorite game fish is either the musky—over here called the lunge—and the small-mouth black bass. There are other waters, here and there, that can produce some good lunge, but, taken as a whole, the lakes and rivers of Ontario stand par excellence.

Down along the front, in the waters of the St. Lawrence River are found some mighty big muskies, the record fish in 1911 and 1912 coming from there, notably around Stanley Island, below Cornwall, and also in Hay Bay, above Belleville. There is a plenty of good hotel accommodation here available, and good guides and comfortable skiffs and motor boats are located without any trouble.

The French River, together with its confluent, the Pickerel, offers a splendid combination trip of canoe cruising, and both musky and bass fishing of the real kind. This is as yet essentially a camping proposition, and one would have to outfit at either North Bay, thence crossing the lake (Nipissing) by a small steamer, and putting in at the headwaters, or else getting off the train where it crosses the French, putting in just below the railway bridge. Some mighty big lunge have been taken from the French waters, a number over thirty pounds and a few over forty. Bass run well around 3½ to 4½ pounds. Both species are still plentiful and yield all the fight their reputation accords them.

Lying between the little villages of Cobocok, at the northwest corner, and Lakefield at the "other," lie some twelve beautiful little lakes that offer a splendid proposition for a canoeing and fishing trip, yet having several very comfortable little inns where accommodation may be had for any little fishing stopovers desired. Primarily, I would make special mention of several of the best points, although fishing is good as a whole throughout. The Kawartha Lakes, as this system of connected waters is known, has been aptly so termed, for the Indian word "Kawartha" means "Happy Lands and Bright Waters." From an experience extending over a number of years and repeated visits, I would say that the best all-round fishing may be had at either Buckhorn Falls, on Buckhorn Lake, or in Cameron and Balsam Lake, while Pigeon Lake, particularly the lower end, beyond Gannon's Narrows, still produces some fine lunge.

Reached from Peterborough and Lakefield, thence by steamer through Stony Lake to Burleigh, I would suggest the canoeist "put in" above the locks here and paddle through Lovesick Lake and Deer Bay, up the narrows of Buckhorn to Buckhorn Falls at "Hall's Bridge." Here is a very cosy little inn where charges are moderate and the board wholesome, and the fishing for lunge and both large- and small-mouth bass is of the best. Another

method of reaching this point is by road from Peterborough—some fourteen miles. Continuing from here, the party would paddle through the upper reaches of Buckhorn, turning into Gannon's Narrows for some 350 yards, from whence one enters Pigeon Lake. If tents are aboard, swing down to the south and spend a couple days fishing here. Turning northward, a paddle of some 6½ miles brings into view the little lighthouse just below Bobcaygeon, and entering the short Pigeon River one lands at the locks between this and Sturgeon Lake. Bobcaygeon is a good point to obtain camp supplies and boats or canoes—and there are a dozen splendid campsites anywhere from a mile to four from the village, where excellent fishing may be had. Passing on through Sturgeon Lake to Sturgeon Point, the route turns sharply to the right to Fenelon Falls. This little village is the site of a big power plant; also, incidentally, there are two really good inns where satisfactory accommodation may be had at around \$10 to \$12 per week; also boats and boatmen. The fishing immediately around Fenelon is best for small-mouth bass, although there is good lunge fishing as well. A paddle of some four or five miles through Cameron Lake takes one to the little single-locks at Rosedale, where there is excellent fishing for both species. Passing through into Balsam, some splendid campsites are found on either the mainland or on one of the several islands, and good fishing also anywhere in the lake, which runs up some four miles to Coboconk, at the head of the System. The party can turn this trip "hind end to," as it were, and enter either by way of Coboconk on a branch line of the G. T. R. from Lindsay, or from Lindsay itself, down the six miles of Scugog River into Sturgeon Lake.

As already indicated, while there is ample accommodation for stopping over at one of the smaller inns—all of which are comfortable and pleasant, I would recommend as the best plan a canoe cruise. The lakes are small enough to insure safety from heavy winds, and there are any number of good camping spots to be found all along the route. Minnows for still-fishing may be obtained in any of the lakes. It is well, however, to take in a complete assortment of fishing tackle, as one cannot obtain any choice at the small villages.

The Georgian Bay waters offer a wide choice for bass and lunge fishing. Notably near Kagawong, on Manitoulin Island and around Key's Inlet, at the mouth of the French. Most of the lower points have become overcrowded, and while some fair fishing is had, it is, as a rule, much better in the northern part at the points mentioned. A very good little inn is found at Kagawong Village and boats may be readily obtained.

The Rideau System of lakes, extending from Kingston north and east to Smith's Falls

# Season in the Middle West

By SANDY GRISWOLD

and by locks and Rideau River to Ottawa, where this river empties into the Ottawa River, has some excellent points for bass and lunge, together with some lake or gray trout. Westport is a good point of entry and below Jones' Falls, near Smith's Falls, is another good spot. Camping is excellent all along the route, either for a canoeing or motor boat party. A number of good small hotels all along the lakes, insure comfortable accommodation in case of wet weather or for those ladies who do not care to enjoy the pleasures of camp life under canvas. A navigation company runs steamers between Ottawa and Kingston, thus allowing ready access to any point on these lakes.

The Ontario season opens for lunge and bass on June 16. The flies and mosquitoes are over early in July, and trips anywhere here after July 5 to 10 are in order. Personally, I would say my choice for the earlier fishing would be the Kawarthas, with the French for a wilder and longer canoe cruise. (Full data as to any specific trip will be supplied upon request of FOREST AND STREAM readers.)

## Gently Tapping on the Window Pane.

JERSEY CITY, N. J., Jan. 25.—*Editor Forest and Stream:* From year to year I have noted that your correspondents have reported the appearance of the first robin and other signs of spring. This afternoon I opened every window in my modest domicile that the balmy January air might blow through. This evening as dusk approached there was a large active Jersey mosquito bumping against the window in the dining room trying to get out.

Can you beat that? SWITCH REEL.

[And why, Brother Switch Reel, should a little early activity on the part of the *Culex pungens* surprise you, who live in Jersey? Likely it was a missionary trying to get you into a proper frame of mind to receive, hospitably, later in the year his brother culicidæ.—EDITOR.]

## A White Blue-Wing Teal.

SOURIS, N. D., Jan. 1.—*Editor Forest and Stream:* I inclose a photo of an albino duck. This bird was shot by my good friend Sam Wilson while hunting in the Turtle Mountains

of North Dakota. It is a perfect specimen of blue-wing teal, except that it is perfectly white in color. I would be pleased to have you use the picture in FOREST AND STREAM, which is a welcome weekly visitor at my home.

HENRY W. PETERSON.

FOR the first time this winter the ground out this way is whitened with snow this morning, to the depth of probably an inch. The flurry came in the night, but couldn't have lasted long, for there is not the vestige of a cloud visible, and the sun is shining as beautifully as in June. [Letter dated Jan. 15.]

Up to date there has been no winter like this known in Nebraska—famous, however, for its matchless climate—in thirty years. We have not had one cloudy day since Sept. 3, and last night's skiff of snow was the first flake seen here this winter. It has been simply one long uninterrupted stretch of beautiful, balmy and golden weather, and looks now as if it meant to continue on indefinitely.

Another unprecedented fact is that the fall shooting season of all kinds was the poorest known in an equal period of time. There were but few prairie chickens, practically no quail at all, and the ducks and geese were lamentably scarce.

There was fairly good sport in September immediately after the opening of the chicken and wildfowl season on both classes of game, but the chicken that had been so fortunate as to escape the ante-season lawbreakers were speedily killed off, and so were the locally bred ducks, and by the time the really bona fide bird shooting season—October—rolled round, there was mighty slim picking on either. The quail season was of but two weeks' duration, the first two in November, but of all the numerous parties that went out, to my personal knowledge there was not one that met with even fair success, and the majority of them got skunked absolutely. I myself with Ralph Crandall, with two of the best dogs in the State, spent the three first days of the season on the formerly fine grounds north of Chapman, and bagged six birds and two chickens. The quail were badly winter-killed, and it will require years for them to recuperate, even with the brief open season we are accorded.

But the strangest thing of all has been the persistent absence of the wildfowl, both ducks and geese, in fact, so far as the latter are concerned, it might be said, almost literally there were none at all, excepting until the past ten days, when quite a few Canadas have been killed up along the Loup and the Platte.

After the first issue of blue-wing teal, spoonbills, mallards and widgeon from the close north, there has been nothing that even approximated what might be called a flight, and the far northern birds either took another route or passed us by in the night without even lingering long enough to say howdy. The more probable theory

is, however, that the birds came and went in small and straggling bunches, and while both feed and water was abundant, for some unaccountable cause, they failed to linger here for any considerable time, and the shooting was never up to even the most ordinary standard.

As for the geese, even along their favored old haunts on the Platte River they have been only noticeable for their absence. Even back in October there were but precious few Hutchins and fewer white and speckled fronts, but a few

PRAIRIE HENS.

Canadas, which have been showing up better lately than at any period during the fall or winter. I spent a week out on the Three Spring marshes, on the Hon. Charles Metz's far-famed ranch, and bagged forty-four mixed ducks, two Canadas and an occasional old cock grouse. Earlier up on the Loup, at the mouth of Horse Creek, from time immemorial famous for its ducks and geese, I was all but skunked, simply able to get enough for the camp.

In a talk with State Game Warden Miller, he told me that upward of 20,700,000 fish were distributed among the various lakes and streams of the State during the years 1911-12. This number included 18,825,000 wall-eyed pike, 812,750 brook trout, 703,600 rainbow trout and 290,150 big-mouth black bass.

According to the warden the cultivation of bullfrogs in the State has not been very successful, although at Long Pine, Imperial, Beatrice, Benkelman and Bassett he is still looking for

the best results. The license money footed up to \$65,000, and it is sure to be more than duplicated in the coming similar period. He intends to ask the pending Legislature to appropriate a sum equal to that realized by the licenses with which he hopes to vie with the most successful States in the Union in the propagation of both game and fish.

There have been quite a few antelope come down from the hills out in Sioux county during the past month, and bunches of from four and six to a dozen or fifteen are seen along Indian Creek every day, so I am told by rancher R. E. Merrell. He says so far there has been but little snow in the Black Hills, and this makes the visits of the antelope sort of strange, but he says they are there, and that is all there is to it. He says that on his cattle rounds he sees them feeding at the haystacks along down the Indian Creek valley, and sometimes within 200 yards of the rancher's house. There is a heavy fine for killing an antelope in this State, and Merrell says he has not yet heard of any of them being molested.

From what I have observed on my fall ducking expeditions, and what I have heard from other sportsmen, there were more crows in the different sections of Nebraska this fall and winter than there have been for many years. Upon the flats northeast of Calhoun flocks of tens of thousands of these sable birds assemble daily, and all along the Missouri River bottoms they have been roosting in countless and actually astounding numbers just as they used to do twenty-five years ago, when the crows were common visitors to all the door yards throughout the city of Omaha.

Did you ever watch the evening flight of these birds in the dreary days of December. If so, you were certainly amply repaid for your trouble and charmingly entertained as well. There are thousands and thousands of crows in Nebraska; more, I believe, than in any State in the Union, and there is no other spectacle in nature that fits so completely with the surroundings as the afternoon procession of these always interesting birds from their harrowing in the fields to their roosts among the thick willows in the river's bottom.

And in the spring what a boon to the lover of the outdoor world is the crow. Long before the bluebird's mournful but sweet note is heard dropping from the vacuous skies, before the trill of even the hardy little field sparrow ripples upon the still tingly air, before the soft currents from the Southland unpurple the sunny slopes and fans the odorous anemone into faint color and starts the shrill chorus of the hylas in the wet meadows, the crow forms the vanguard of approaching spring.

### Mexican Fruit Fly.

THE fact has been determined by the Secretary of Agriculture that an injurious insect known as the Mexican fruit fly (*Trypeta ludens*), new to and not heretofore widely prevalent and distributed within and throughout the United States, exists in the Republic of Mexico. In order to prevent its introduction into the United States, the Secretary of Agriculture has forbidden the importation into the United States from the Republic of Mexico of the following fruits: Oranges, sweet limes, mangoes, achras sapotes, peaches, guavas and plums.

### Shooting in 1818.

*Extracts from Nicholson's British Encyclopedia, Published in Philadelphia in 1818.*

Continued from page 135.

These nets are to be pitched for every evening flight of fowl about an hour before sunset, staking them on each side of the river about half a foot within the water, the lower side of the net being so plummed that it may sink so far and no further. Place the upper side of the net slantwise, shoaling against the water, but not touching it by nearly two feet, and let the strings which support this upper side of the net be fastened to small yielding sticks set in the bank. These, as the fowl strikes, will give the net liberty to play and to entangle them. Several of these nets should be placed at once over different parts of the river at about twelve-score fathom distance one from another, and if any fowl come that way, the sportsman will have a share of them. It is a good method, when the nets are set, to go to places sufficiently distant from them with a gun to frighten them toward the places where the nets are, and wherever any of the fowl are started from, it may not be amiss to plant some nets also there to take them as they return. The nets are to be left thus placed all night, and in the morning the sportsman is to go and see what is caught. He should visit the river first and take up what are caught there, and frightening the rest away to the other places where his nets are; he is next to visit them and take what are there secured.

The Ceylonese have great plenty of waterfowl wild on their island and have a very remarkable way of catching them, which is this: The fowler enters a lake or other water, which has a good bottom, and is not very deep. He puts an earthen pot upon his head, in which there are bored holes, through which he can see. He keeps himself so bent down in the water that only the pot is above the surface. In this manner he enters the place where the wildfowl are in clusters, and they think it is only some floating block. He then takes some one by the legs, and gently draws it under water and wrings its neck till he has killed it. Then putting it into his bag, which is fastened about his middle, he takes hold of another in the same manner, and so on, till he has got as many as he can carry off, and then he goes back in the same manner in which he came, not disturbing the rest of the birds, who never miss their companions, as they seem to dive down for their diversion when the fowler pulls them under. In places where this has been practiced so long, or so carelessly, that the birds are shy, the fowler uses a gun, but this he does in the following manner: He makes a screen of about five feet high, and three feet wide, which he carries in one hand straight between himself and his game, and in the other hand his gun. The birds are not alarmed at what appears only a bush, for this screen is always covered with branches of trees, fresh cut down, and full of leaves so that the sportsman behind advances as near as he pleases, and then putting the gun through some crevice of the screen, he fires.

GAME.—It is a maxim of the common law that goods of which no person can claim any property belong to the King by his prerogative, hence those animals, *feræ naturæ*, which come under the denomination of game are styled his

Majesty's game, and that which he has he may grant to another, in consequence of which another may prescribe to have the same within such a precinct or lordship. And hence originated the right of lords of manors or others to the game within their respective liberties. For the preservation of these species of animals, for the recreation and amusement of persons of fortune, to whom the King has granted the same, and to prevent persons of inferior rank from misemploying their time, the following acts of parliament have been made. The common people are not injured by these restrictions, no right being taken from them which they ever enjoyed; but privileges are granted to those who have certain qualifications therein mentioned, which before rested solely in the King. To entitle anyone to kill game, he must now take out a certificate, upon which a stamp duty is payable. These certificates are to be dated the day of the month when issued, and shall be in force till the first of July following, and no longer; and if any clerk of the peace, his deputy, or steward, clerk, etc., issue certificates otherwise than directed, to forfeit 20*l.* 25 Geo. III. sess. 2. No person to destroy game, until he has delivered an account of his name and place of abode to the clerk of the peace, or his deputy, or to the sheriff, or steward, clerk of the county, riding, shire, stewardry, or place where such person shall reside, and annually take out a certificate thereof, which must have a stamp duty of 3*l.* 3*s.* 25 Geo. III. sess. 2. Any person counterfeiting or forging any seal or stamp directed to be used by this act, with intent to defraud the revenue, or shall utter or sell such counterfeit, on conviction thereof, shall be adjudged a felon, and shall suffer death without benefit of clergy; and all provisions of former acts relative to stamp duties to be in force in executing this act. 25 Geo. III. sess. 2. Every qualified person, shooting at, killing, taking or shooting any pheasant, partridge, heathfowl, or blackgame, or any grouse or red game, or any other game, or killing, taking, or destroying any hare, with any greyhound, hound, pointer, spaniel, setting dog, or other dog, without having obtained such certificate, shall forfeit the sum of 20*l.* *Id.* Clerks of the peace, or their deputies, or the sheriff, or steward clerks, in their respective counties, ridings, shires, stewardries, or places, shall, on or before Nov. 1, 1785, or sooner, if required by the commissioners of his Majesty's stamp duties, transmit to the head office of stamps in London, a correct list, in alphabetical order, of the certificates by them issued between the 25th day of March in the year 1785, and the first of October in the same year; and shall also in every subsequent year, on or before the first of August in each year, make out and transmit to the stamp office in London, correct alphabetical lists of the certificates so granted by them, distinguishing the duties paid on each respective certificate so issued; and on delivery thereof the receiver general of the stamp duties shall pay to the clerk of the peace, etc., for the same, one halfpenny a name; and in case of neglect or refusal, or not inserting a full, true and perfect account, he shall forfeit 20*l.* *Id.* Lists may be inspected at the stamp office for 1*s.* each search; (*id.*) which list shall once, or oftener, in every year, be inserted in the newspapers in each respective county. If any qualified person, or one having

# GAME BAG AND GUN

languages. He was one of the first to discover that excellent salmon fishing could be had in Monterey Bay and passed much time there. His writings of sport there, of angling in general and of fly-fishing in Maine lakes, are well known. In the commercial field of California he was a prominent figure, having taken the initiative in reclamation work, in citrus cultivation and in the raisin industry.

## The Skill of a Gunner.

NEW YORK CITY, Jan. 29.—*Editor Forest and Stream:* With misgivings bred of many previous disappointments, application was made to an advertiser in FOREST AND STREAM for information as to the prospects of good quail shooting near Tillery, N. C. In due time came the reply with all questions satisfactorily answered. One portion of the answer contained the very guarded comment that the bag varied according to the skill of the gunner, while another portion announced the not uninteresting information that accommodations and table were far above the average in North Carolina. An over-night journey, a four-mile drive from Tillery, brought an old-fashioned roomy Southern house in sight. Introductions followed to the junior member of the firm, a most charming lady of youthful spirit and a genial sportswoman, fully alive to those details which add so much to a gunner's comfort, and watchful at all times against any infringement of the rights of her guests.

Arrived at about the same time was T. B. Pritchard, of Rochester, N. Y., a delightful companion during a week's gunning. Arrangements had been perfected by which two young men of the neighborhood were to act as our guides, and while one was allotted to each, we alternated at Mr. Pritchard's suggestion.

Hunting in different directions, we both flushed more coveys than we were willing to admit, our refusal to give truthful answers being based on that strong legal bulwark that a man cannot be compelled to give a reply which would be calculated to hold him up to ridicule; more so because on looking at the bag we were reminded of the words of the letter, "It depends on the skill of the gunner."

Our best day's individual bag was sixteen, with perhaps double that number of misses, for which there is little excuse in old field gunners. While I have never been quite able to overcome that nervousness which comes at the first whirr of flight and causes me to shoot in such haste that frequently I do not see my gun, I know there are others in the same class, for I have seen some of them perform; and while it is difficult to teach an old dog new tricks, there remains the fond hope that persistence will be rewarded, and the day arrive when at all times I will see my gun before I shoot, yet presently there is consolation in the thought that the zest would be taken out of the sport if shots were not missed occasionally.

All of our hunting was done in the piney woods, a sort of half clearing, and our average find was eight coveys a day. Because of the large areas, scattered birds were difficult to locate, and single bird shooting could not therefore be freely indulged in.

The birds in flushing would at times get up as a covey, then a few at a time, and again a few would get up, and when both barrels had been discharged and one thought there were no more, the rest would get up and leave in haste. This of course, while not according to Hoyle, furnished additional excuses for lack of skill on the part of the gunner.

Wild turkey were seen on one occasion, but proved difficult of approach. At another time

## A Coal-Black Woodchuck.

LOCKPORT, N. Y., Feb. 1.—*Editor Forest and Stream:* I have just received a letter from Floyd C. Mandeville, of Newfane, N. Y., in which he says:

"I was at Wilson, N. Y., last Sunday and met a friend, Will Slocum, who asked me to come with him, as he had something interesting to show me. And it certainly was. He had a coal black woodchuck which he had dug out of his hole a week before, and at the time I saw it it was so tame that it would eat out of his hand, and did not seem to be the least bit afraid."

I have heard of white woodchucks, but have never heard of black ones. J. L. DAVISON.

## Prominent California Sportsman Dies.

BY GOLDEN GATE.

J. PARKER WHITNEY, a pioneer resident of the State, capitalist, sportsman and author, a man generally beloved and respected by all who knew him, passed away at the Hotel Del Monte, Monterey, Jan. 17, at the age of 78 years. Mr. Whitney was a native of Gardner, Mass., and came to California in 1851, making the first trip by water. Later he crossed the plains no less than five times and thus had an excellent opportunity of seeing American wild game at a time when its protection was unthought of. His writings upon the subject of sports have made him known over the whole world, these having been printed in many

THE DAY'S BAG.

as we came through the reeds of a branch, a startled fawn paid tribute to the skill of the nineteen-year-old guide, whose No. 9 quail shot did effective work. It was his first deer and his joy was contagious; in fact, I beamed in the reflected glory of his smile. A prouder boy I have never met.

The pleasant week came all too soon to a close, and with its close came the knowledge that we had met most delightful people and been furnished the best accommodations and had sat at an exceptional table, with the result that there was planted the seed of that temptation which induces a gunner having the flimsiest sort of excuse to neglect his temporal affairs for another chance at the birds.

Needless to say, both Mr. Pritchard and myself determined to repeat as frequently as our affairs would permit, notwithstanding that we found the lady to have been the writer who questioned our skill, and being herself no mean gunner had tolerantly smiled in a very superior sort of way at our many excuses for failing to shoot with greater accuracy.

LOUIS HESS.

### The Fur Seal Question.

WASHINGTON, D. C., Jan. 20.—*Editor Forest and Stream:* The fur seal question has again loomed up as a bone of contention between those who wish to preserve the Alaskan seal herd intact for five years, and those on the other hand who wish to continue killing the surplus male seals on land for the purpose of securing seal pelts. After extensive hearings lasting several months, both the House and Senate committees agreed upon a treaty with Japan, Russia and England whereby pelagic sealing should be suspended for a period of five years, this country to pay each of the powers mentioned the sum of \$200,000 in lieu of their sealing rights. The House bill as passed provided for a closed season of ten years, but the Senate committee reduced it to five years, to which the House agreed and the bill became a law. The evidence before both the House and Senate committees showed that pelagic sealing, which is the killing of seals at sea, was the most destructive agent in the decimation of the seal herd. This appears true for the reason that the females and mother seals are killed in the sea while in search of food, thus leaving the young seal pups to starve on shore, resulting in the death of the mother and young. The evidence also showed that the land killing was almost equally destructive, as the unlawful killing of seals two years old and under at an age when it is difficult to determine the sex, resulted in at least 50 per cent. of the young seals thus unlawfully killed being females. When these facts were shown, and it being further demonstrated that the decimation of the seal herd was a near probability, Congress extended complete protection for a term of five years to all seals in Alaskan waters. Now comes a report from Prof. George A. Clark and Prof. David Starr Jordan with arguments to show that the suspension of the land killing was an error, and urging the repeal of that item in the law. President Taft was prevailed upon to send a special message to Congress urging the repeal of the law suspending land killing. Notwithstanding these appeals, it is understood that Congress will not be inclined to repeal the pres-

ent law, preferring, it is believed, to give complete protection for five years to all seals than to risk further decimation of the herd from any kind of killing.

RALEIGH RAINES.

### State Game Preserves.

REPRESENTATIVE KENT, of California, has introduced a bill in the House providing for the protection and increase of State game preserves. The proposed law provides that whenever the Legislature of any State shall relinquish the sovereign rights of the State over the game in any given area, and the Governor so notifies the U. S. Department of Agriculture, then the President is authorized to declare by public proclamation that the game, birds or fish within the area so relinquished are under the protection of the United States, and that such areas thus constituted shall be known as national game refuges and feeding grounds for animals, birds or fish protected therein. The areas thus constituted may be in national forests or unoccupied public lands, and lands held in private ownership and relinquished to the Government for national game preserves. Appropriate fines and punishment are provided in the bill for those who violate its provisions. The bill aims primarily to extend Government protection of the game of the country, and has much merit to recommend it. The proposed measure, which was referred to the House Committee on Agriculture, will be extended hearings if any desire to be heard on the merits of the bill.

### Deer Hunting in Wisconsin.

WALDHEIM PARK, Wis., Jan. 20.—*Editor Forest and Stream:* The deer we were going after are found in Taylor county, Northern Wisconsin. The open season is from Nov. 11 to 30, and each hunter is limited to the killing of but one deer.

I started, alone, from Milwaukee to be in time for the opening and was joined, en route, by two companions, all young men with some earlier experiences and good marksmen—or claimed to be.

The pine forests are dense in places and success lays in obtaining plain sight of your object, and at the same time, be aware of other objects nearby, and when covering a deer, be able to hit it in the spot you want and bring him down.

On the first day we were out early from our quarters, and after a long tramp through the close pine woods we separated. Hearing a distant shot made by other hunters to the south, I knew a deer was in motion and ran for an open road, expecting, if not killed, that I might head the deer off, which, luckily, I did, as it—a fine buck—crossed the opening within fifty yards, when off went my rifle, the ball going directly through the heart, and I had him. He weighed fully 175 pounds and carried a splendid pair of antlers. To this, our first one, we attached a license coupon, conveyed him some distance to an old settler's house and later presented him to one who had done much for our entertainment and comfort.

During the very short season, and the territory being limited, many hunters are out and one is liable to encounter more hunters than deer, and to avoid any possibility of our crack-

ing away at each other, or being served in that manner by others, red cloth was attached to each hat and boat, easily seen at a distance, not only by our party, but by other hunters. This practice should be the law.

Chances for a shot in an opening of the woods are rare—more luck than otherwise—but each of our company got his allowance, and then it was home again. The deer in that section are not scarce, as was evident from the numerous signs in the snow, and we had frequent sights of a flying white tail appearing at times above the thicket—underbrush—apparently without a body. But shooting then is hazardous to other hunters—a hazard not taken by a sensible and careful sportsman.

J. H. VOJE, JR.

### Hunting in California.

BY GOLDEN GATE.

DUCK shooters are now enjoying the best sport of the season, the recent storms having brought great numbers of birds down from the north, many of these being the coveted canvas-backs. The birds are now well scattered, water being plentiful in all sections following the heavy rain, and it is not necessary to belong to a gun club to secure a limit bag. Good hunting is being experienced on the bay shore, although in some sections the presence of oil on the water ruins the birds for table use.

The interest of sportsmen through the State is now being centered on the State Legislature, where a bill has been introduced by Senator Flint, which provides for the non-sale of game. This measure is being bitterly attacked by market hunters and hotel men and certain newspapers. The California Associated Societies for the Conservation of Wild Life is working hard in the interests of the proposed law and has prepared statistics showing the decrease in the game of the State during recent years, especially in ducks, now the only game that is allowed to be sold.

The controversy over fish and game matters promises to continue through the entire session of the Legislature, and just what changes will be brought about are difficult to foretell. Some of the enemies of game protection favor the abolishment of the Fish and Game Commission, others want counties to handle game matters as they see fit. Back of the entire controversy is the subject of private game preserves, and there is no doubt but that the general feeling is against these. If the sale of ducks is to be prohibited, it would seem that it would be necessary at the same time to enact legislation prohibiting the baiting of ponds and excluding the public from the marshes. The tendency is toward legislation of this kind, and this will probably be the solution of the problem. Members of the Fish and Game Commission favor this and even many members of prominent gun clubs express the belief that the gun club in its present form must go.

AN international convention for the protection of migratory birds, along the lines of existing agreements as to fish, is provided for in a resolution introduced on Jan. 14, at Washington, by Senator Root, and sent to the Committee on Foreign Relations in the Senate.

**California Game Protection.**

SAN FRANCISCO, Cal., Jan. 11.—*Editor Forest and Stream:* I read with much interest the article in a recent issue by Golden Gate on "Present Day Needs of Game Conservation." I met the writer who uses this name at a recent meeting of sportsmen and was glad to see that he was firmly opposed to the sale of game of any kind.

You may be interested in learning that there is a strong movement on here, led by hotel interests and politicians, to put quail, doves, shore birds, etc., on the list of birds that may be sold and to allow the sale of deer. The State commission has been doing splendid work, but it is proposed to abolish this and put the game affairs in the hands of county officials. This backward step would virtually mean the end of game in this State.

I am very glad to note the attention you pay to California in your valued paper and appreciate the letters by Golden Gate and Mr. Holder.

We expect crowds of sportsmen here in 1915 and millions of general visitors. In case the sale of game is permitted, as is planned, it is good-bye game.

WM. S. MARTIN.

**Shooting in Colombia, South America.**

LEGATION OF THE UNITED STATES OF AMERICA, Bogota, Colombia, South America, Dec. 31.—*Editor Forest and Stream:* The Consulate General at this capital having been closed, it devolves upon me to answer your letter of Nov. 26 last regarding hunting conditions in Colombia.

In reply I beg to say that as far as I know there are no game laws, and inasmuch as the climate is the same all the year round, with two short rainy seasons in September and April, the season is always "open." Guides would cost about \$20 per month "found." Shotguns, etc., can be imported paying duty, but it would be necessary to obtain especial permission through the Legation to bring in rifles.

I can hardly think it would be worth anyone's while to come here for hunting alone. Except crocodiles, small tiger or wildcat, some deer on the mountains, and a few wild duck and pigeon, there is nothing to shoot in this section of South America.

I am, sir,

Your obedient servant,

LELAND HARRISON,

Chargé d'Affaires ad interim

**The Goose Fish.**

UNCASVILLE, Conn., Jan. 24.—*Editor Forest and Stream:* Some weeks ago while taking a Sunday morning stroll over the property of the Pea Island Gunning Club in North Carolina, I ran across two specimens of the goose fish, or angler, which the tide had left on the beach. I opened both specimens and discovered in one a lesser scaup, or broadbill, and in the other a red-breasted merganser. Both of these ducks were in perfect condition and apparently had been suffocated. I inclose photographs which may be of interest.

The following extracts about this fish are taken from "The Fishes of North Carolina," by Hugh M. Smith, page 308:

"The angler is found on both sides of the

Atlantic in rather shoal water. While passing most of its life on the bottom, it sometimes comes to the surface and basks there. It attains a length of four feet.

"On the North Carolina coast it is well known to the fishermen under the expressive name of all-mouth. It is very common at Cape Lookout and is regarded as a great nuisance in net fishing, for as many as twenty large specimens are sometimes found in a sink-net in one lift.

"No use is made of the fish here or elsewhere in the United States.

"The angler is noted for its repulsive appearance and extreme voracity. By means of

THE GOOSE FISH.

its moving dorsal filaments, it decoys small fish into the vicinity of its large mouth. It also feeds on coots, ducks and other sea birds, and one of its vernacular American names—goose fish—has allusion to its food. Crabs and other invertebrates are eaten also."

Our club superintendent stated that he once found a goose fish, which, when opened, contained four grebes and two clear noses (*Raja englanteria*).

HORATIO BIGELOW.

Note.—There is also an account of this fish published by Dr. Theodore Gill, entitled "The Life History of the Angler," in Smithsonian Miscellaneous Collections, Vol. 47, 1905.

A DISTINGUISHING characteristic of FOREST AND STREAM is that its readers compose one great loyal legion, gathered naturally by a unity of interest

**Pheasant Raising in California.**

THE possibilities of pheasant raising in California have been given considerable attention during the past few years, and the initial attempts along the line of hatching and rearing the birds have been quite satisfactory. At the State Game Farm at Hayward the raising of pheasants for game stocking purposes has been carried on for several seasons, but much of the work done has been along experimental lines. Superintendent William N. Dirks, who has had charge of the farm for the past year, has rendered a very interesting report of last season's work, and the results of his experiments and experiences will doubtless be of value to others. This report in part is as follows:

On account of the unsatisfactory results obtained in years past, when all eggs were hatched under the domestic hen, it was decided to learn if more satisfactory results could not be obtained by the use of incubators. A great deal of time was spent in reading what various authorities have written on this subject, but it was found that their reports were more or less contradictory, and that only in a general way could they be relied upon. It was then determined to go ahead with actual experiments.

Various makes of incubators were tried and all were found to give about the same general results. Eggs were first placed in the incubator during March. Out of 13 eggs but 5 hatched—a percentage of a little over 38. Of the next lot of 517 eggs, 367 hatched, or nearly 71 per cent. Three other lots were tried, with poor success, only 40 per cent. hatching.

It was then decided to set the eggs under hens for a number of days before transferring them to the incubators. Of the first lot of 1,100 eggs so placed, 822 hatched—a greater percentage than had been secured by the use of the incubator alone. Even better results were secured later; out of a lot of 500 eggs, 411 were hatched, or 82 per cent.

It is a general complaint among pheasant breeders that the eggs laid toward the end of the season are weaker in fertility than those laid earlier. This has not been the case with the eggs hatched at the game farm during the past season; for of the last 123 laid, 100 were fertile.

It is planned, for the next year, to carry on experiments in co-operation with the State University, at the State Farm at Davis, to see if satisfactory results cannot be obtained with incubators alone, thus abandoning the use of hens.

Although the trial with incubators has not met with the success that was hoped for, the artificial brooder, on the other hand, has given entire satisfaction, and has proved to be far ahead of any natural method for the raising of birds in large numbers. The brooder-house is a building divided into five compartments, opening into screen runways, eight feet wide by ninety feet long. At one end of the building a furnace is sunk in a shallow pit, and leading from it a terra-cotta pipe laid in a trench runs the entire length of the building. This pipe is boxed in and covered with sand. By this arrangement a very even temperature can be maintained at all times.

Food is placed within reach of the young

pheasants within a few hours after they are taken from the incubator. For the first few days they are given a boiled custard, made in the proportion of six eggs to a pint of milk; after a day or two a small amount of corn-meal is added to this custard; and later, corn grits and fresh chopped beef. Hemp, mustard and canary seeds are also scattered in the pens, and after the chicks are a month old, wheat and charcoal are added. Sand and green food, such as lettuce, kale and clover, are placed within reach of the birds at all times.

After five weeks in the brooder, the birds are strong enough to be transferred to outside pens; and almost any time after they are eight

weeks of age they are ready for liberation. About this time there is a tendency to pick each other's feathers, with the result that as soon as blood shows, the injured bird becomes an object of attack by all the other birds in the pen, and in most cases is killed.

In securing eggs, the breeding birds were confined in small pens—one male to five hens, except in two pens, where eight and ten hens respectively were confined. From both of these pens eggs were taken equaling in fertility those taken from the pens in which there was a lesser number of females. Experiments along this line will be carried on during the next summer.

In raising pheasants it is very important to guard against the young birds' getting hold of any of the burrs of the burr-clover, as these burrs lodge in the throat, and, if not removed—an operation that may be performed with the aid of a small pair of physician's forceps—will cause death.

### Opposed to Spring Shooting.

MADISON, Wis., Dec. 28.—*Editor Forest and Stream:* Every club represented in the Wisconsin Fish and Game Protective and Propagation League went on record as opposed to spring shooting of ducks and other game birds.

E. T. S.

## Cold Facts and Dry Grins

By MIQUE WEBB

"There is little in life but labor;  
To-morrow that may be a dream.  
Success is the bride of endeavor  
And luck but a meteor's gleam."

But

Old Dame Fortune went to sleep one day  
And left her stores unguarded;  
I slipped in, with debts to pay,  
And with more than enough, departed.

**T**HE Old Dame was cruel to me. She watched my every effort, holding me down to the work bench, and seeing to it that the meteors gleamed often, but never rewarding my efforts when I tampered with the god of chance. One day I surprised her, however, winning a little more than was necessary for my immediate needs. I shall always think the Old Lady was napping when I did it, for she has since been more careful. Money burns holes in the average man's pockets, and I was no exception to the general rule. For fear of loss in this direction, I began to cast about for some way to rid myself of my troublesome surplus. Being an ardent disciple of Sir Izaak Walton, I decided to indulge my fancy and go a-fishing. Where? No short trip for me. I had money to burn. I was city-born and city-bred and had never seen a body of water larger than the Cumberland River, which ran by my home town. My fishing had been confined to its tributary streams in my locality, and to its muddy bosom, and I had never caught over half a dozen fish in one day in my life, the largest being a three-pound bass.

A friend, who had just returned from a trip to Pass-a-Grille, on Tampa Bay, Florida, dropped in. He was full of his fishing adventures. I spent half a day listening to his marvelous tales. He enthused me, and as I now had sufficient shekels, here was an opportunity to gratify my strongest desire. He, like myself, was a land lubber, and this had been his first trip to salt water. He expatiated on his

experiences with fish he had caught and fish he had seen, until I could hardly follow him. Their names were all new to me, and his descriptions were so graphic I could hardly give credence to his narrative. He mentioned mackerel, bluefish, drum, sheephead, angel-fish, sailors' choice, channel bass, mango, snapper, grouper, cobia, grunts, pigfish, jewfish, shark, devilfish, sea-bats, whipray, sting-ray, sea pigeon, redfish and others too numerous to enumerate.

A few days later I arrived in St. Petersburg. I spent one day outfitting and making arrangements for my trip to the Pass. My friend had kindly loaned me a large reel, capable of holding 600 feet of line. He also offered the loan of an auger, but I declined. Beyond this I must buy all the balance of my tackle in St. Petersburg. I looked up a hardware store, and I am going to say right here this hardware store had the best assortment of fishing tackle I ever saw. It was good, but I haven't been all over the world, and may not be much of a judge. With the clerk's advice, I soon had an outfit. When I was through with my purchases, I had two bamboo poles, one fourteen feet and the other twelve feet. No socket joints, but just straight canes, wrapped with flax in each joint, and in every other one a guide for the line. They were flexible and strong. I also had two Cuttyhunk, Irish linen lines, of 200 yards each; one fourteen strand and the other eighteen strand. These lines are practically non-breakable when a reel is used. The combined strength of a fish pulling against the thumb pressure of a fisherman on his reel using a Cuttyhunk of the sizes mentioned will never break them, provided they are new and have not been rotted by water use. Salt water rots a line very quickly, unless it is thoroughly dried after use. I have always made it a practice to stretch my lines from tree to tree for an hour or two after wetting to keep them dry and strong. These lines cost six dol-

lars each, but they were worth it. I also had hooks of all sizes from fly to 10-0. I have always been partial to the straight Limerick, and all my selections were of this kind. I was told to use the wire snood. I had never seen anything of the kind before, having always used gut snoods at home. My hooks consequently were all eyelets. Many salt water fish have teeth, and wire must be used to prevent the line from being cut. My outfit was made complete with a spool of piano wire, sinkers of all sizes, swivels, a pair of good pliers, corks, etc.

Snoods must now be made. A length of wire, about six inches long, is cut, and an eyelet is made in each end, linking the sections together by allowing each alternate eye to rest in the other. Three links make a snood about eighteen inches long. I spent the better part of the night in making up snoods and had several dozen ready for morning.

I now had to make my arrangements to get to the Pass. An enterprising jeweler had built several cottages on the end of Long Key, which is a bench of sand from 100 to 300 yards wide and several miles long, separating the gulf from the bay. Pass-a-Grille is the channel that admits the water from the gulf to the bay. It separates Long Key from Pine Key. The Pass itself is about half a mile wide at high tide. There are many of these passes, and many similar keys to Long Key. The landlubber calls them islands. Pass-a-Grille is considered the best for fishing. The jeweler had selected the end of Long Key to build his sportsmen's fishing camps, and was doing a thriving business renting them at one dollar per day. They were very nice three-room frame houses, with portico across the front facing the bay. At the time of my trip there were three of these cottages. At present Pass-a-Grille is a thriving little town, with good hotels, clubs, etc., and I understand still has good fishing.

I wanted a cottage. I saw Gille, who gave me a large brass key with a still larger brass plate attached, on which there was a number. He took my money in advance for a week's rent, the whole transaction smacking loudly of the hotel plan. He then made arrangements with a sail boatman and a cook, and I was to depart

at daybreak the next morning. The cook and I rustled around and purchased the camp supplies. Seeing all my baggage stored away in the good boat Pelican, with a light heart and a great deal of enthusiasm, I began to take in the little town of St. Petersburg and its surroundings. I found much to interest me. It was all absolutely new to me.

There was a railroad dock out from shore to deep water in length about one mile. Out on this I went. About half way I came to the population of the city. I had been wondering where they were. Mackerel were biting, and when this is the case, the people stampede to the dock, for mackerel bring eight cents a pound, and you get your money just as fast as you can unhook your fish. Looking down the rock on either side was a waving cane thicket of fishing poles going up and down all the time. Wriggling mackerel were in the air and on the dock. I came near throwing a fit at the sight of all these fish. I did not sleep much that night. I was too excited and too full of expectations for the next day.

We sailed the next morning on time. The sun was just peeping above the glass-like water, and the opal tints shading into gold were more beautiful than I can describe. The dawn breeze was just beginning to ripple the water as we got into the channel. It was the 15th of April. I shall never forget that day, for it was the most enjoyable of my life. Everything was entirely new, and all was built for the cravings of my heart. The water seemed alive with fish from the size of a pin point up, and the air was filled with bird life. It was paradise to me. Pelicans and gulls were busy gathering sardines that hung in large schools about the protecting dock. In places it looked as if one could walk upon the thick shoals of these little fish. All about our boat the pelicans were diving for their prey. These silly birds were amusing. They would fly to a height of forty or fifty feet, turn their beaks downward, and seem to fall to the water, striking with a great splash. They rarely missed their mark. After catching a sardine they would sit upon the water for a time looking foolish. A close observer would notice, when their beaks came up from the dive, they held their prey crossways in the bill. To swallow the fish or place it in their enormous pouches they must get it started down the throat head foremost. To do this they pitch the fish up into the air and catch it just right. Often gulls are watching, and when the pelican comes up and sits on the water with his fish preparatory to making his toss, the gull on the wing slides his bill along that of the pelican and steals his hard-earned finny food. The pelican looks from side to side and makes no complaint, but goes for another dive and probably lets the same thing happen to him again.

We rounded out into the bay and started for our destination, crossing the head of the dock and going due south. When we were well out, a huge fish broke the water near the boat. "What's that!" I cried.

"Only a porpoise," was the answer. During the day we saw many of these, and being equipped with a rifle and shotgun I tried many shots, but without effect so far as the rifle was concerned, but with the shotgun I managed to pepper one. It is said they are the fastest fish that swim. I believe it, for when the shot stung the one I hit, we did not see him again for

about two minutes, and then he broke water almost out of sight and seemed to be going strong.

The boatman and cook vied with each other in imparting information about the birds and fish we saw. I was like a small boy, and no doubt asked many foolish questions, as was attested by their sly winks and grins, but oh! how I did enjoy that day.

As we sailed among the different keys, each was pointed out and its name given. The Cow and Calf interested me very much. They were two small keys somewhat resembling at a distance the animals from whence they derive their names. Then there was Bird Key, on which we stopped, that I might see the multitudes of the feathered tribe making their homes on this spot. At that time the island furnished many eggs for the nearby inhabitants, but now the United States Government has it set aside for the sole use of the birds.

We crossed Boca Caega Bay, a most beautiful body of water, and landed at Pass-a-Grille about 4 o'clock that afternoon.

Leaving the boatman and the cook to unload the baggage, and do all else to make us comfortable in the cottage, I dived for my fishing tackle and was in my coveted goal. I soon learned, however, that there were thorns or teeth in Paradise, as the first fish I caught was a mackerel, and in my haste and excitement to take the hook from his mouth, I managed to get my thumb and forefinger between his jaws. He came up hard, and his sharp teeth sank into my flesh. Oh! how it did hurt. My boatman came to my rescue and showed me how to handle a mackerel. Placing his left hand just below the gills, he pressed hard and the mouth of the fish flew open, thus releasing my paining digits. He then extracted the hook and I paid my compliments to the fish in language not suitable for a Sunday school.

I had much to learn, but was an apt pupil, and was soon on to the game. Mackerel fishing is a dirty job. They are covered with a slimy paste that sticks to everything it touches. They wriggle and squirm a great deal, and usually get their glutinous mess all over one's clothes, to say nothing of hands and face. I once caught 143 of these fish between 10 o'clock in the morning until 5 in the afternoon. I was a sight to see when the day was over. I did not use a reel in making this catch, but just a straight bamboo pole about fifteen feet long with a heavy braided line tied to the end of it. When mackerel are biting, you are lucky if you are not in a crowd. I was in a crowd of one hundred or more one day when the fish were biting fast. The majority of those fishing were out for the money in the game. I was green at mackerel fishing and attempted to use a reel. My first catch did some stunts that were very embarrassing to yours truly. This fish is extremely erratic in his movements, and is, I think, the most nervous of all fish. When we struck and the hook went home, he went twenty feet one way and then twenty another, making both gyrations in a few seconds. He ran in and around all of the other lines and made a tangle that took over half an hour to unwind. I had delayed the bread winners, and they were rather caustic in their remarks. I could not blame them, so cut my line, and after doing all I could to make amends, sneaked away to give the timid a chance to work off their spleen. There were

many women and children present, and they were least considerate.

After landing my first mackerel I was back again for another. The next, however, was a bluefish and so on until the day closed. As an inland fisherman I had always strung my fish and dropped them back into the water to keep them alive. True to my practice I did the same with my salt water catch, but only one time. After fishing for a couple of hours and having about twenty fish on my string, I pulled them up to quit. I was much surprised to find only the heads left of three of them. A shark had the balance.

I caught many different kinds during the next day and had a delightful time. On the third day I was a little tired of taking them in so fast, and began to cast about for something more exciting. I was playing a two-pound mackerel when a cloud cast a shadow on the water. Then I saw a very large fish nervously swimming and darting about my captive as if he wanted him for dinner. Wishing to try something heavy that would test my tackle and skill, I let the mackerel tire himself out. I had my right hand clasp the reel handle and both thumbs on the leather thumb stall or break, and the butt of the pole fixed in my stomach. I do not know why my muscles were so rigid and tense, but they were when the big fish struck. He was a cyclone. To describe his actions, suppose you tie a rope around the neck of a 200-pound hog. Tie the other end of that rope to a flexible fishing pole and put the butt end of that pole against your stomach, then have that hog dart suddenly between your legs. This is what happened to me. The butt of that pole seemed to go clear through and strike the backbone.

[TO BE CONTINUED.]

AMONG magazines for the outdoor lover, FOREST AND STREAM looms up particularly large.

J. S. P. H. WILSON,  
Maine State Commissioner of Inland Fisheries and Game.

Published Weekly by the  
**FOREST AND STREAM PUBLISHING COMPANY,**  
 CHARLES OTIS, President.  
 W. G. BEECROFT, Secretary. W. J. GALLAGHER, Treasurer.  
 127 Franklin Street, New York.

**CORRESPONDENCE**—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

**SUBSCRIPTIONS:** \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

**ADVERTISEMENTS:** Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

Entered as second-class matter at the Post-Office, New York, N. Y.

**THE OBJECT OF THIS JOURNAL**  
 will be to studiously promote a healthful interest in outdoor recreation, and to cultivate a refined taste for natural objects.

—FOREST AND STREAM, Aug. 14, 1873.

#### ENFORCING ARKANSAS GAME LAWS.

ARKANSAS was among the first States to put up the bars against non-resident sportsmen, and she went beyond the others in building her fence higher and stringing its top with barb wire. Something like forty years the statutory prohibition has existed, and during much of this time the general laxity in its enforcement baited the traps of unscrupulous officials, who fined or spared according to the financial status of the offender, with due consideration of all the circumstances of his offending. Usually an outsider might hunt and fish undisturbed if the relative or guest of a resident, or if of known standing in politics or business. Otherwise the chances of escaping arrest were as unguessable as the fine that would be assessed if he happened to guess wrong. This was no matter of evading payment of hunting license, but rather of doing something which the law declared could not be done under any circumstances. "No non-resident shall hunt or fish" is as positive a prohibition as "Thou shalt not kill." Conviction meant pretty nearly anything that the honorable court wanted it to mean. At times, possibly, something hinged on whether the fine was to be turned in to the county treasury, or split up among the officials instrumental in its collection. A light fine and a few words of caution would usually hurry the plucked pigeon out of the State, grateful for unmerited clemency, while fleecing him further might bring about complaints and disagreeable publicity. In countless instances hunters were arrested and released without a semblance of trial, and no justice of the peace shared in the yellow-backed bill that the constable or deputy quietly stowed away with his tobacco and extra "ca'tridges." It was pure, unadulterated graft. The public

knew of it, but did not bother to disapprove, for those who were mulcted were outsiders and really had no right to slaughter Arkansas game. It would be funny, were it not so absurd, how the idea of indiscriminate slaughter attaches to the term "non-resident." As a matter of fact, one local gunner, skilled in hunting and perfectly acquainted with the country, will kill more game in a given time than three sportsmen from other States. But the Arkansas plan of game conservation seems to have commenced and ended with sitting on an occasional outsider, while his more fortunate brethren assisted the natives in enthusiastically shooting up everything in sight. Aside from over long open seasons the general game law of the State reads well, but passing laws and enforcing them are different propositions. The non-sale clause is pretty generally enforced, except in counties where the game is so abundant that its killing can be made a profitable business. The law prohibiting the removal of game outside the State is respected by the transportation companies in their instructions to agents and representatives, but some way immense quantities of Arkansas game find ready markets at Memphis and St. Louis.

The eastern half of the State—the lowland country—is the big-game range. Some few deer and scattered bands of turkeys may still be found in the upland counties, and almost everywhere there is excellent quail shooting. The enmity toward non-resident hunters is less apparent here. They are rarely seen in the hill ranges, because when a sportsman is able to afford a trip to Arkansas, he generally prefers to go where there is a chance to bag bigger game than quail and squirrel. Of late it has become little more than a chance, even in the swamp lands, where a few years ago there was a certainty of shots at deer as reward for a day or two of careful hunting.

Everything considered, the Arkansas game has had a pretty bad year of it, and the years which are to come offer small promise of better things, unless the people of the State awaken to the importance of real game protection by the enforcement of existing laws.

When second class lumber came to be worth double the former price of first grade stuff, a swarm of sawmills settled down among the oaks and gums and cypresses, and commenced to eat up everything in sight; not a comparatively few selected trees, but anything and everything big enough to square four inches twenty feet above the ground. Oaks and hickories were the first to go, and when the nuts and acorns vanish from a woodland, there is mighty little left to attract and hold game. At the rate the timber is going, in five years Arkansas will be as barren of big trees as the white pine lands of Michigan and Wisconsin. Nowadays logs are hauled to the mills over tram roads, and the "dinky" engines, which supply the power, are wood burners. Through their agency much of Eastern Arkansas was burned over during the unusually dry weather of the past autumn, and the hot fires of the mill slashes killed or ruined virtually all of the young growth of trees that the loggers had spared. And still earlier in the year came the big overflow, which was most disastrous to game in the counties along the Mississippi River. It is estimated that 75 per cent. of the deer drowned, the remainder escap-

ing by taking to the levees, where in many cases they were fed by the neighboring planters until the flood subsided.

#### NON-SALE LAW IN CALIFORNIA.

RIGHT now a critical situation exists in California, although the same situation has been successfully met in other States. It is the fight of the hotel men's lobby against non-sale of game, with a rally of true sportsmen in support of Senator Flint's non-sale bill. This bill is identical in general character to the law now so effective in New York, Massachusetts and some other States.

Permission to sell game adds the commercial to the sporting instinct where the latter alone is already too destructive. It invites hotel and café proprietors to employ men to kill game for private profit and keep at it every day, whereas the man who hunts for sport alone can do so only occasionally and then finds that the market hunter has destroyed his chances.

In another column appears a pithy and interesting letter from a California sportsman correspondent. Read it; then, if you have a vote in California, go after your Senator to support the Flint bill.

#### GLACIAL EXPLORERS RETURN.

PROF. ROLLINS B. SALISBURY and William J. G. Land, both of the University of Chicago, returned to Chicago Jan. 8 from a trip in the interest of science. Professor Salisbury, who is head of the department of geography and dean of the Ogden school of science, has been investigating the glacial formations of Argentina and Patagonia. He had his main camp at Lake Nahuel Huapi, in the Eastern Andes. Professor Land, of the department of botany, brought back a large collection of botanical specimens from Australia and the islands of the Pacific.

#### To the Memory of George Borup, Jr.\*

BY PAUL BRANDRETH.

The blood of conquest in his veins,  
 He braved the White Sea's bitter might,  
 And gripped the huskies' frozen reins,  
 And drove into the Polar night.

The Dog Star of the glittering skies,  
 The North Lights throbbing keen and pale,  
 Beheld his dauntless, smiling eyes,  
 As fast he sped on Peary's trail.

He recked not of the fearful leads,  
 The Arctic gales that pierced his soul,  
 But fearless raced to fill the needs  
 Of men who battled toward the Pole.

And when the ice-pack oped its gate,  
 His task complete, his foes outdone,  
 He journeyed from the land of Fate  
 Back to the homeland's living sun.

So young he was, so strong to see;  
 Sinewed and bronzed; a vital man  
 Glowing with personality,  
 A prince in the explorer's clan.

And still the old immortal sea  
 Must claim her child. Oh, glorious end,  
 With laurels of eternity  
 For him who died to save a friend!

[\*It will be remembered that George Borup, Jr., was the life of the Peary expedition to the North Pole. He was drowned in saving a friend in a canoe upset in Long Island Sound shortly after his return from the Pole.—EDITOR'S NOTE.]

# ARCHERY

## The Toxophilist's Paradox

By E. J. RENDTORFF

**A** PARADOX is a statement of fact apparently opposed to common sense. Why is it that an arrow will fly along its aimed course instead of several degrees toward the left, when it is held on the side of the bow with the string pushing it further to the left as the nock approaches the bow? The fact that it does fly true, instead of shifting radically off its course, as we would naturally expect, constitutes the toxophilist's paradox.

Ford, Butt and Walrond have explained this phenomenon to us, and for several decades their ideas have been accepted and passed unchallenged. It takes some little nerve for a novice to state publicly his unbelief in the classical explanation. In order to explain my heresy I shall attempt to discuss the various phenomena that enter, give my conclusions, and then let our archery friends act as the jury.

gravity an accelerated motion toward the left. The inertia of the arrow thus produces the force C, which tends to prevent the angular displacement.

This force C becomes constantly greater until the arrow leaves the string, because, first, the arrow accelerates in velocity; and second, the angle of displacement constantly increases. The force C produces the two balancing forces B against the bow, and A against the string.

While the center of gravity lies within the bow, the force C will produce a slight bending of the arrow, with the concave side toward the left. It is the force B which prevents the arrow from falling away from the bow, and not a problematical twisting of the string, as some of our English authorities have stated.

In Figure 2 are illustrated the conditions applying when the center of gravity of the

string approaches the bow. When the nock leaves the string, with the customary clearance of about 7 inches, the force C would be about 10 inches beyond the bow for my 29-inch arrows. The equation for equilibrium would be

$$A \times NE = C \times GE, \text{ or Force } A = \frac{GE}{NE} C = \frac{10}{7} C$$

At this moment the angle D<sub>1</sub>N G is increasing at its most rapid rate, while the velocity of the arrow has reached its greatest value. In other words, the force C is now at its maximum value, while the force A is 10/7 times larger than C. What happens?

Effect 3. The force A moves the bow string toward the left, thus relieving the bending of the arrow and decreasing the shifting of the arrow out of its aimed course.

These three effects are operative, but are they sufficient to explain the paradox? If they were sufficient it would follow that a bow held rigidly in a frame, with the arrow released either by hand or by some trigger contrivance, would project the arrow at least as well as when shot by an archer. Let us see what Dr.

FIG. 1.

Figure 1 represents an arrow full drawn and ready for release. The center of gravity of the arrow is at G. On release the force F exerted through the agency of the string moves the arrow forward. The arrow starts from rest and accelerates in velocity until it leaves the string, after which it travels with a uniform velocity, except as it is slowed up by the friction of the air.

Now, every body at rest has a tendency to remain at rest. This tendency is called inertia. The existence and action of inertia can be illustrated as follows:

Attach two strings with a breaking strength of about eleven pounds to the top and bottom of a ten-pound weight. Suspend the weight from one string, with the other one hanging loosely below. A slowly acting force of but one pound exerted on the lower string will suffice to break the upper one; but if the lower string be jerked rapidly the weight will remain hanging while the lower string breaks.

Effect 1. When the arrow is released and the bow string moves forward, the angle D N G constantly increases. This gives the center of

gravity an accelerated motion toward the left. The forces C and B remain in direction as before, but they have increased in magnitude. The force A is zero when G is opposite the bow, and then changes in direction and increases in magnitude until the nock leaves the string. The force C now bends the arrow toward its aimed course, viz., with the concave side of the flexure toward the right. This corresponds exactly with the statements of Walrond, Ford and Butt, with the following exceptions: They do not mention the forces A and C, but assume the existence of B only (which Ford calls a blow) and ascribe to it the various bendings of the arrow. Now, as the force B always pushes the arrow directly against the bow, no turning moment can exist and the force is therefore not operative in any of the motions of the arrow as described.

Effect 2. They also mention the effect of the feathers throwing the nock to the left, as the feathers pass the bow, thus helping the alignment of the shaft.

Giving our English friends full credit for the two reasons so far deduced, let us proceed with our inquiry. The force A increases as the

Elmer has to say about the subject. I shall quote from a recent letter: "What do you think of a mechanical support and trigger for a bow as a method for testing arrows? I made one, and it gave results that were very surprising. For instance, the arrows flew rather wild and showed a very marked tendency to buckle. What astonished me still more was that they veered off to the left. This made it seem likely that ordinarily the bow is slightly pushed to the right by the arrow."

Although we have already added one new reason to those formerly accepted as sufficient, we are apparently not yet entirely on the correct track, so let us continue the study of our force diagram.

Effect 4. From the instant the center of gravity of the arrow leaves the inside of the bow until the nock leaves the string, the force A offers a considerable turning moment, tending to turn the plane of the string and bow toward the left. The magnitude of this turning moment is the product of the force A multiplied by the distance N E. The distance N E varies from 17 to 7 inches, but as it decreases,

the force A increases, so that the turning moment remains fairly constant and of considerable magnitude.

In Dr. Elmer's machine the bow can not turn, but in the archer's hand it can and does. If not properly controlled it will move the bow string against the arm guard.

Effect 5. When the arrow is drawn the left arm is under considerable strain and the hand moves slightly to the right. On release, the removal of the constraining force moves the arm somewhat to the left. The muscles do not respond at once, due first to the inertia of the arm and, second, to the fact that muscular movement does not begin until a certain time after stimulation. As the arrow remains in contact with the string for about 1/40 of a second, after release, the motion of the arm toward the left is probably negligible until after the center of gravity of the arrow has passed the inside of the bow and then increases in magnitude until the arrow leaves the bow. This would have the tendency of moving the nock toward the left, thus pushing the arrow back parallel to its aimed course.

This last effect can not be proved through the use of mathematics, as it depends upon several variable factors that can not readily be determined, such as the exact period when the muscular recoil is operative. I derived the conclusions mainly through a prior reasoning. The following facts seem to prove the conclusion correct. When the nock leaves the string the force A no longer acts against the arrow. This would greatly diminish the force B and consequently produce but little wear on the shaft along the last seven inches of the nock end. My old arrows show considerable wear in this zone, which leads one to believe that the fifth effect is operative to a marked extent. In addition to this, arrows when shot buckle far less than they would if effect 1 were the main factor.

The first three effects are operative in a mechanical contrivance, such as that used by Dr. Elmer. The fact that this machine shoots badly to the left and buckles the arrows, as it theoretically must, shows that the last two effects are not only operative but are probably the chief factors in the solution of the problem. The relative magnitude of the various effects depends somewhat upon the personal equation of the archer, when he, through intuition, gets the five effects balanced he is able to shoot without lateral displacement, or undue buckling of the arrows.

I believe we are now prepared to solve the problem, discussed in a previous article, pertaining to the effect of a variable point of bal-

ance of our arrows. A variable position of the center of gravity alters the relative magnitudes of Effects 1, 3, and 4. As just mentioned, an archer shoots without lateral displacement when all five effects are properly balanced. A difference in the position of the center of gravity of our arrows changes the relative magnitude of three of the effects, so that an exact balance of all five effects cannot be maintained, unless the point of balance of each separate arrow corresponds closely to the remaining arrows of the set.

### Pittsburgh Archery.

CHICAGO, Ill., Jan. 20.—*Editor Forest and Stream*: The New Year's day archery scores made in Pittsburgh, and reported by Dr. Hertig, in *FOREST AND STREAM*, Jan. 18, were fine, particularly so as they were made in mid-winter. An analysis of them brings out some very interesting points.

The doctor truly says: "Mr. Holmes' shooting in the American round was remarkable for its regularity. It is seldom that two rounds in succession are shot with so little variation of hits and score at the different distances and with total of hits and score alike."

We quote the scores, lest some of the readers may not have seen them.

Double American round scores:				
	60yds.	50yds.	40yds.	Total.
W. J. Holmes.....	26 118	28 148	30 182	84 448
	28 118	27 149	29 181	84 448
	54 236	55 297	59 363	168 896
Dr. O. L. Hertig..	29 127	30 142	30 192	89 461
	28 174	29 129	30 190	87 493
	57 301	59 271	60 382	176 954

For our purpose let us consider that Mr. Holmes' double American round score was made by two archers, each shooting one of the single rounds. We will call them A and B. We will treat Dr. Hertig's score in the same way and name the archers C and D.

In the first case, had they been shooting for the championship, A would have won, 5½ points to B's 4½, though they were tied on gross hits and score. Most archers will think that A and B showed the same skill, though in this case perhaps it would be as well to award the championship by points as in any other way; for instance, by shooting more arrows or by drawing lots.

In the contest between C and D, C made two more hits and D made the higher score by 32. No sane person would say two hits were equal in value to 32 score. And yet, scored by the point system, C won by 6½ points to 3½, and with 32 less score!

Mr. Holmes' score was a remarkably well balanced one. That is, that part of the total score made at each range was what it should have been. It will be found by examining a large number of scores, be they high or low, that about one-third of the total is made at fifty yards, the mid range. Mr. Holmes' total score was 896, a third of which is 298; his fifty yards score was 297.

Dr. Hertig says he fell down at fifty yards. His total score was 954, one-third of which is 318. His fifty-yard score was 271, forty-seven less than would have been expected.

What we have written is perhaps of no practical importance, but it has helped to "while away an idle hour." EDWARD B. WESTON.

### Complimentary.

CHICAGO, Ill., Dec. 21.—*Editor Forest and Stream*: I wish to thank you for the good work you have shown for archery in the year now closing. The last issue—save what I furnished—was fine, particularly your editorial on the new department.

Every archer in the country ought to subscribe for *FOREST AND STREAM* and write for it. EDWARD B. WESTON.

# YACHTING

## New Rochelle Y. C.

THE annual meeting of the New Rochelle Y. C. was held on Feb. 1 at its usual place of meeting, the Manhattan Hotel, the steward of which is a member of the organization, and whose personal interest in the affair makes it one of the most interesting of the year. The usual excellent banquet was served, while the windward work was well taken care of by the toastmaster. The officers were elected as follows: Montrose W. Houck was elected to succeed Commodore E. W. Myrick; Vice-Commodore J. A. Mahlstedt was re-elected Vice-Commodore; John F. Lambden, Rear-Commodore.

Mr. Marsland's report as secretary shows the club to be one of the most prosperous on the Sound. The report showed an active membership of 235 and 117 enrolled yachts, many of which race throughout the season in the Sound regattas.

The treasurer's report showed net assets of \$16,417.54. The club has recently purchased Harrison Island on Echo Bay.

Among the guests were Mayor F. H. Waldorf, of New Rochelle; Thomas Fleming Day, Commodore George W. Kear, Commodore G. D. Bangs, George R. Le Sauvage and Carl P. Kuchler.

## Club Elections.

### BOSTON Y. C.

THE Boston Y. C. held its annual meeting on Jan. 30. The following officers were elected: Arthur W. Chesterton, Commodore; Roger Upton, Vice-Commodore; Dr. Samuel Crowell, Rear-Commodore; Walter Burgess, Secretary and Treasurer; Alfred Douglass, William L. Barnard, A. H. Van Pelt and Winfield M. Thompson, Executive Committee; Walter Burgess, C. F. White, J. C. Bolan and C. A. Cooley, Membership Committee for two years; Arthur Willis, Chairman of the Membership Committee; T. Walcott Powers, Chairman of the Regatta Committee; F. P. Huckins, W. H. Litchfield, H. Lundberg and F. H. Borden, Regatta Committee. Two hundred were present, making a record attendance. The reports of the committees showed the club had a good treasury balance with a membership close to the limit.

### WINTHROP Y. C.

At the annual election of the Winthrop Y. C., the following officers were elected: Charles A. Blazo, Commodore; Herbert F. Ward, Vice-Commodore; Charles E. Bird, Secretary; Joseph J. Devereux, Treasurer; Frank H. Byrne, Chairman of the Regatta Committee; George H. Greggs, Measurer, and Frank A. Talcott and Ralph C. Goudey, Directors.

## Ice Yachting.

MENOMINEE, Mich., Jan. 30.—Oshkosh carried off first honors in the "B" class and Menominee in the "A" class at the Northwestern

ice yacht races held to-day. The Madison entry was disqualified after a collision with the Menominee craft.

# Canoeing

## Ka-ne-en-da C. C., Syracuse, N. Y.

As a genuine winter get together, the canoe dinner given by the Ka-ne-enda Canoe Club at Blausett's Tavern, certainly was one great success. In part, this affair was essentially an A. C. A. event, as in addition to the thirty-odd Ka-ne-en-da C. C. officers and members present the Central Division was well represented by the guest of honor, Vice-Commodore C. Arthur Spaulding, also of the Buffalo C. C.; ex-Commodore C. Fred Wolters, A. C. A., '05, and of the Rochester C. C.; Lyman T. Coppins, of the Buffalo C. C., and Jesse J. Armstrong, of the Rome C. C.

Many complimentary remarks were made upon the splendid and appropriate decorations which consisted of the club colors, red, white and black, and also practically pennants of all the leading canoe clubs of the Central Division supplemented by large A. C. A. and U. S. flags, forming a keynote as it were. The club's totem, a large mounted blue heron, occupied the place of honor. The menu cards, composed of the A. C. A. and K. C. C. pennants, were designed especially for the occasion. On the inside appeared the menu and a jaunty little canoe verse.

With the music and the opportunity afforded to exchange anecdotes, the time slipped quickly by, and it was 10:30 before the menu had been finished and cigars lighted preparatory to enjoying the excellent program of canoeable talks to come. Following a short address by the commodore and his introduction of the toastmaster, the guest of honor, Vice-Commodore Spaulding, led off with a most interesting and delightful talk on the advantage and pleasure of the American Canoe Association, also the delights of its annual meet at Sugar Island. Ex-Commodore C. F. Wolters gave a talk on the history and activity of the Rochester C. C.; L. T. Coppins on the club spirit and good fellowship of the Buffaloes, and J. J. Armstrong, a talk on the humorous side of canoeing.

Following the talks given by the guests, Commodore C. H. Mattison spoke on the growth and ambitions of the Ka-ne-en-da C. C. At midnight everyone joined singing "Auld Lang Syne" and an exceptionally pleasant affair passed into club history.

A. F. SAUNDERS,

Vice-Commodore, 1912.

## A. C. A. Membership.

### NEW MEMBERS PROPOSED.

Eastern Division.—William A. Jacobson, 30 Clinton avenue, New Haven, Conn.; P. E. Munger, 68 Perkins street, New Haven, Conn.; John F. Male, 117 Poplar street, New Haven, Conn.; Russell H. De Baun, 97 Exchange street,

New Haven, Conn.; Robert W. Hoadley, 119 Exchange street, New Haven, Conn.; Maelund S. Colburn, 362 Ferry street, New Haven, Conn.; Harold Towner, 99 Exchange street, New Haven, Conn.; Philip S. Mack, 108 East Pearl street, New Haven, Conn., all by B. L. Goodwin, and Harry L. Green, 1174 Elmwood avenue, Providence, R. I., by Fred C. Rexford.

Western Division.—Gilbert R. Baumbach, Peoria, Ill., by Hugh P. Miller; W. J. Livesley, Kaiserhof Hotel, Chicago, Ill., by A. W. Friese; Charles L. Engstrom, 1204 Madison street, Peoria, Ill., by Hugh P. Miller; Horace G. Roberts, 17 Oak Lane, Davenport, Iowa, by Robert F. Abercrombie; Elbert M. Burnett, 905 Fullerton avenue, Chicago, Ill., by Charles E. Tyson; Charles P. Huntington, Cumnor Road, Kenilworth, Ill., by F. B. Huntington.

### NEW MEMBERS ELECTED.

Atlantic Division.—6580, William Walter, Jr., 4617 Oakland street, Frankford, Pa.; 6581, Harold G. Byington, 37 Croton avenue, Ossining, N. Y.; 6582, J. Howard Fell, 1222 Sansom street, Philadelphia, Pa.

### MEMBER DECEASED.

Atlantic Division.—2947, Albert R. Genet, Ossining, N. Y., died Oct. 25, 1912.

## Des Moines Sportsmen's Show.

EVERY phase of outdoor life from the mildest to the most strenuous games and from the pleasant summer camp to the more rugged lodge of the wild animal hunter and trapper will be depicted in various interesting forms at the First Annual Sports and Recreation Show, which will be held in the Des Moines Coliseum from April 17 to 26. The exposition, which will be given under the general direction of Louis W. Buckley, will be similar in form to those seen in Madison Square Garden, New York, and will be the most attractive show of the kind ever attempted in the West.

The big Des Moines Coliseum is conveniently located on the river front in the very heart of the city, and it has been planned to mark a water course on which all forms of water craft from the canoe to the motor-driven boat and hydroplane will be exhibited. This will be only one of the many sports to be demonstrated by exhibitors. Another feature will be a rifle and clay pigeon field, and tournaments for both amateurs and professionals will be conducted.

Everything pertaining to outdoor life will be shown, and the sportsmen of the Middle West are taking a great deal of interest in the coming event. All booths will be arranged in rustic style to represent nature, and at one end of the Coliseum will be a reproduction of a jungle, where wild beasts from all parts of the country will be exhibited. There will be taxidermy contests, tournaments of all sorts; in fact, no end of attractions.

THE visit of a flock of some 200 or 300 Pallas' sand-grouse to North Yorkshire is a notable event, as it is some years since such a flock has visited this country. These birds are allied to the pigeon family, and their habitat is Central Asia, where on the sandy wastes they are found basking in the sun and lying in holes that they have scraped out. They visit this country at intervals in small or large flocks, and invariably land on the East Coast. There are instances of its nesting here, but it does not seem to show a disposition to permanently settle down. It is a protected bird, and we are pleased to learn that the Yorkshire Naturalist Association are taking steps to prevent its destruction.—Shooting Times.

**TRAP SHOOTING**

**Fixtures.**

If you want your shoot to be announced here, send a notice like the following:

**REGISTERED TOURNAMENTS.**

Feb. 22.—Birmingham (Ala.) G. C. tournament. O. L. Garl, Sec'y.

March 25-26.—Birmingham (Ala.) G. C. O. L. Garl, Sec.

April 8-10.—San Antonio, Tex.—The Interstate Association's Southwestern Handicap, under auspices of the San Antonio Gun Club; \$1,000 added money. Winner of first place in the Southwestern Handicap guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. E. E. Shaner, Mgr., Pittsburgh, Pa.

April 10.—Atglen (Pa.) G. C. Lloyd R. Lewis, Mgr.

April 16.—Mt. Holly (N. J.) G. C. A. J. Delleite, Sec'y.

April 17.—Syracuse, N. Y.—Messina Springs G. C. W. E. Hookway, Sec'y.

April 18-19.—Wellington, Mass.—Paleface Shooting Association. Walter F. Clarke, Pres.

F Stevens	20	21	20	24	25	..
J Shanley	20	19	25	21	..	..

**Larchmont Y. C.**

LARCHMONT, N. Y., Feb. 2.—A vicious cross-wind blowing here to-day kept the scores pretty well down. However, it was not an ill-wind, as it blew alike on the good shooter and the bad shooter. B. M. Higginson got away with the high gun trophy with 129 out of 150, after shooting off a tie with R. Jones. In this event Fred Gilbert broke 136, but as he shoots for wads only, this score did not count on the trophy. In the February cup event, R. Jones drew a full plus 2 from 3 clay discs handed him by the dealer. A. L. Burns and B. M. Higginson tied on the Larchmont trophy. In the shoot-off Burns took it. The take-home trophy ran into a tie between O. C. Hoyt, J. G. Corbett and B. M. Higginson; Hoyt won the shoot-off. The accumulation cup was another tie affair between three shooters; final won by W. E. Ferguson with a full from a 6-disc draw. Day trophy was won by B. M. Higginson with 94 from 5.

February cup, 25 targets, handicap:

**Baltusrol Golf Club.**

NEWARK, N. J., Feb. 1.—With a brand new set of traps, the golfers became aerosaicer exterminators here to-day. While this was the second shoot, it was the first official event. F. H. Brown took a leg on the club championship with 19 out of 25. G. Williams, with a start of 8 free ones, captured a limb on the monthly cup with 43, and on the Day cup, H. A. Barclay, who had a gift of 7 scalers, broke 21. The scores made were very creditable under the existing conditions, which were very blustery. Scores:

Monthly cup, 25 targets, handicap:

G Williams	8	43	D Fincke	4	35
Dr Granbery	0	39	H A Barclay	14	33
I F Hahn	6	38	F N Cowperthwait	10	32
T W Lloyd	2	37	W Byrd	8	32
M Geer	8	36	H Fiske	4	28

Club championship, 25 targets:

F H Browne	19	J F Hahn	15
Dr Granbery	18	F N Cowperthwait	15
D Fincke	18	H Fiske	14
G Williams	18	M Geer	14
T W Lloyd	17	W Byrd	13

Day cup, 25 targets, handicap:

H A Barclay	7	21	J F Hahn	3	18
Dr Granbery	0	20	F H Browne	1	18
D Fincke	2	19	H Fiske	2	16
T W Lloyd	1	19	L W Smith	0	16
G Williams	4	19	W Byrd	4	15
M Geer	4	18	F N Cowperthwait	5	13

New Rochelle Y. C.

NEW ROCHELLE, N. Y., Feb. 2.—Weather cold and windy. Most of the members had not recovered from the effects of the annual club dinner at the Hotel Manhattan the night before, so the attendance was small. Mrs. Vogel made her first visit to the club and was high gun in some of the events. Scores:

Event No. 1, 10 targets, scratch, sweep: Granbery 9 Marsland 5, Donovan 7 Stoddard 5, Currier 6

Event No. 2, 15-target sweep, handicap: Donovan 13 Stoddard 1, Marsland 2 Granbery 0, Currier 10

Donovan won the shoot-off.

Event No. 3, February cup, 25 targets, handicap: Donovan 21 Mrs Vogel 0, Stoddard 19 Chandler 18, Bullock 17 Granbery 16, Marsland 16 Currier 16, Molloy 14 Giriat 13

Donovan won the shoot-off.

Event No. 4, 10 targets, Olympic, scratch: Granbery 8 Donovan 4, Chandler 7 Giriat 4, Bullock 4 Mrs. Vogel 7, Marsland 7 Stoddard 4

Event No. 5, 25 targets, scratch: Mrs. Vogel 20 Stoddard 18, Donovan 21 Bullock 17, Granbery 20 Chandler 17, Giriat 19 Marsland 14

Next week, Feb. 9, New Rochelle will shoot a team match with Siwanoy Country Club, of Mt. Vernon. Several professionals are also expected to participate, and the shooting will probably continue in the afternoon.

Feb. 1.—Strong northwest wind. Scratch sweepstakes, 25 targets: Granbery 23 Bullock 19, Stoddard 21 Black 16. Saturday cup, 25 targets, handicap: Bullock 19 Granbery 0, Stoddard 21 Black 17. Handicap sweep, 25 targets: Bullock 21 Stoddard 2, Granbery 20 Black 18. Handicap sweep, 25 targets: Stoddard 24 Bullock 2, Granbery 21 Black 17

Crescent A. C.

BAY RIDGE, N. Y., Feb. 1.—The day brought on a team shoot with the Rumson Country Club, of Seabright, N. J., which resulted in the home team winning by 13 targets, the finals being: Crescent Athletic Club, 384; Rumson Country Club, 371. High gun was M. Stiner, of the Crescent, who made 84; second high was H. Boulton, of the Seabright bunch, who eliminated 82. The third man was F. B. Stephenson, of the home team, with 81. The committee cup credits George Brower with one win, with a score of 46 from 8 gifts. W. S. Jones, with a tremendous handicap of 24, won the take-home trophy with 95. C. Blake with 2 and H. I. Caesar with 6, each made fulls on the monthly cup. The Hyatt trophy ran into a tie between C. R. James from scratch and F. B. Stephenson, who drew 4, getting 41. Scores:

Interclub shoot, 500 targets per team: Crescent A. C. Rumson Country Club. J F James 74 H Boulton 82, H M Brigham 72 J P Kellogg 79, M Stiner 84 C R James 76, F Hyatt 73 H I Caesar 63, F B Stephenson 81-384 W S Jones 71-371

WINNERS OF 1913 Follow Old Year's Lead

Remington-UMC Triumphs Over All

— AT —

PINEHURST MIDWINTER SHOOT

Wins High on All Targets, Long Run and Ties for High Professional. There were more Remington-UMC guns and shells used than any other make.

Will The New Year Exceed This Magnificent List of 1912's REMINGTON-UMC Amateur Triumphs?

R. H. Bruns, Indiana State Tournament and Tied for Second Highest 1912 Amateur Record.

Vassar Cate, Southern Handicap.

Frank Campbell, Western Handicap.

H. P. de Mund, Arizona State tournament.

F. G. Fuller, Wisconsin State Tournament.

J. R. Graham, Illinois State Tournament and Individual Clay Bird Championship of World at Olympic Games.

Jack Jewett, Minnesota State Tournament.

V. W. Johnson, Mississippi State Tournament.

W. T. Laslie, Alabama State Tournament.

A. M. Messner, Michigan State Tournament.

C. N. Newcomb, Westy Hogans' Championship.

C. F. Nelson, Handicap Championship of Colorado, Wyoming and New Mexico.

W. E. Phillips, Grand American Handicap.

C. H. Parker, North Dakota State Tournament.

Dr. L. G. Richards, Virginia State Tournament.

Wm. Ridley, First Highest 1912 Amateur Record.

Geo. J. Roll, Tied for Second Highest 1912 Amateur Record.

R. L. Spotts, Maine State Tournament.

Moroni Skeen, Utah State Tournament.

J. E. Taylor, North Carolina State Tournament.

Ed. Varner, Nebraska State Tournament.

Wm. H. Varien, California-Nevada Tournament.

S. G. Vance, Amateur Championship of Canada.

J. P. Wright, Arkansas State Tournament.

Harry Whitney, Kansas State Tournament.

J. P. White, South Dakota State Tournament.

Start the Season Right Shoot Remington-UMC—the perfect shooting combination

REMINGTON ARMS—UNION METALLIC CARTRIDGE CO. 299-301 Broadway New York City

Siwanoy Country Club.

MT. VERNON, N. Y., Feb. 1.—J. R. Wettstein won the 100-bird handicap for the Guggenheim trophy to-day with 81. From a handicap of 30, Dr. R. J. Held, who shot from scratch, broke 78. Z. C. Offutt made 75.

Jessie Thorne lent her smile and good humor to the occasion, and with the help of 19, scored 71. A brisk and uncertain wind made shooting difficult. The scores: J. R. Wettstein (30) 81; Dr. R. J. Held (scratch) 78; T. F. Pelham (1) 77; Z. C. Offutt (scratch) 75; C. L. Yates (3) 74; Dr. Currie (10) 72; E. L. Haas (8) 71; Miss Jessie Thorne (19) 71; C. H. Hadlock (23) 70; H. J. Smith (12) 69; J. Donovan (4) 65; M. R. Guggenheim (4) 60; J. G. Wintjen (5) 60; W. Thorpe (5) 58; H. V. Morgan (10) 45.

Massachusetts Trapshooting League.

BEVERLY, Mass., Jan. 31.—A plan is on foot to form a Massachusetts Trapshooting League, to be composed of gun club teams from Holyoke Gun Club, Chicopee Falls, Worcester, United Shore of Beverly, Paleface and B. A. A. gun clubs of Boston, with a possibility of the newly organized Everett Gun Club joining the new

League. The Everett Gun Club is composed of some of the prominent business men and citizens of the city. C. R. Russell is president and E. J. Drew secretary-treasurer. Among the prominent members of the club are John Ripley, William J. Bryant, Alderman Charles P. Cooke, Charles F. Spencer, Jr., Melvin B. Gilmore, Lawrence P. Lawton, William Day (a well-known business man), William J. Ford, William Willoughby, James R. Kempton, William R. Howland, of Stoneham, Dr. Russell P. Bodge, of Somerville; Thornton Smith, City Auditor, of Everett; Dr. P. R. Studley, James J. Ross and Harry R. Grant.

Marine and Field Club.

BATH BEACH, N. Y., Feb. 1.—Five gunners broke rocks here to-day, despite most unlikely trap weather. J. M. Hawkins got away with first leg on February cup with (18) 90. Ties on January cup were settled, the trophy finally becoming the property of P. R. Towne with 92, 10 more than S. P. Hopkins had. Scores:

February cup, 100 targets, handicap: J M Knox 18 90 W H Davol 16 86, P R Towne 4 88 S P Hopkins 4 85, C M Camp 12 88

**Manhasset Bay Y. C.**

PORT WASHINGTON, L. I., Feb. 2.—With an unsteady, incoming wind, shooting was hard here to-day. However, it did not seem to be quite as hard for Charles M. Gould as for the rest, as he got away with five out of six events on the program. The one he didn't win went to H. T. Clark, who made a full on a 4-disc draw for the Manhasset cup. B. G. Loomis made Gould hustle in spots, especially in the 10-target trophy scratch event, where they tied up on 8. Gould won out on the shoot-off. The February cup was tied for by H. T. Clark and Gould, but Clark lost out in the shoot-off, in addition to which Gould took the high gun prize with 72 from scratch. The attendance was not quite up to the mark. Scores:

Trophy shoot, scratch, 10 targets:			
B G Loomis	8	D E Smith	6
C M Gould	8	H F Clark	6
F L Richards	6	R Howland	4
Trophy shoot, 15 targets, scratch:			
C M Gould	13	H F Clark	10

High gun prize, 100 targets, scratch:			
C M Gould	72	D E Smith	64
H F Clark	71	F L Richards	61
B G Loomis	66	R Howland	46

**Buffalo Audubon Club.**

BUFFALO, N. Y., Feb. 1.—A sixty-mile breeze, with the thermometer at zero, made a very difficult target for the boys to break, at the first regular shoot of the Audubon Club in February. Congratulations for Messrs. Wright and Covert, who distinguished themselves at Pinehurst, were in order; Wright was high gun over all amateurs and professionals, and Covert won the preliminary handicap; Wright was again high man to-day, with Blackmer and Wootton next. Very poor scores were made, and are as follows:

Targets:	15	20	20	20	25
Wright	14	16	16	17	25
Glover	13	15	15	17	20
Blackmer	11	14	15	16	23
Immel	12	11	12	7	..
Moser	7	8	8	9	17
Ebberts	13	12	14	14	23
Rommel	11	14	15	13	16
Wacker	11	12	12	13	23
Covert	12	18	15	12	21
Rogers	13	13	12	13	21
Wootton	13	15	15	14	22
Black	7	8	7	5	..
Lambert	10	16	11	15	19

Fred Ward	12	..	..	..	12

Shoot-off for Dupont trophy: Price 10, Caldwell 9. No. 4 was for Du Pont trophy.

**Hamilton Gun Club.**

HAMILTON, Mass., Jan. 30.—A largely attended shoot was held by the Hamilton Gun Club here Friday, when twelve members took part in the shoot. The day was an ideal one for the shoot and much interest was manifested as to the outcome of the match. Jones broke 90 out of the 100, capturing first prize, while Smith took second prize by breaking 89 out of 100, and Bull third, he smashing 35 of the clay pigeons. Following are the scores: Jones 90, Smith 89, Bull 85, Berry 84, Berry 83, Heeny 82, Hawley 79, Cregg 79, Watson 78, Cleaves 75, Saunders 74, Henon 71, O'Brien 70.

### W Winnings at Pinehurst

MIDWINTER HANDICAP: Won by J. S. Jennings, of Todmorden, Ontario, shooting Winchester "Leader" Shells, with the magnificent score of 95 x 100 from the 20-yard mark.

PRELIMINARY HANDICAP: Won by B. V. Covert, of Lockport, N. Y., shooting a Winchester Repeating Shotgun and Winchester "Leader" Shells. Score, 95 x 100, and twenty-five straight on shoot-off. Allen Heil, of Allentown, Pa., shooting Winchester "Leader" Shells, tied with Mr. Covert with a score of 95 x 100, but was beaten in the shoot-off.

HIGH AMATEUR AND HIGH GENERAL AVERAGES: Won by F. S. Wright, of South Wales, N. Y., shooting a Winchester Repeating Shotgun. Score, 572 x 600 targets.

HIGH PROFESSIONAL AVERAGE: C. W. Phellis, of Huntington, W. Va., shooting Winchester "Leader" Shells, tied with one other shooter. Score, 556 x 600 targets.

### Some W Winnings at Houston

SUNNY SOUTH HANDICAP: Won by Dan O'Connell, of San Antonio, Texas, shooting Winchester "Leader" Shells and a Winchester Repeating Shotgun. Score, 96 x 100. W. R. Crosby was second with a score of 95, shooting from the 22-yard mark. He used Winchester "Leader" Shells.

HOUSTON CHRONICLE CUP: Won by Nic Arie, of Houston, Texas, shooting a Winchester Repeating Shotgun. Score, 99 x 100. in the shoot-off.

HOUSTON POST TEAM MEDAL: Won by Nic Arie and C. B. Haycox, of Houston, Texas, both shooting Winchester Repeating Shotguns, and Mr. Haycox also shooting Winchester Shells. Score, 50 straight, and 47 x 50 in the shoot-off.

### Chicago Gun Club.

CHICAGO, Ill., Jan. 25.—The weather to-day was not the most inviting for target shooting, as it was cloudy and dark, with a good stiff wind driving the targets down, and had most of the thirteen shooters who faced the traps guessing as to where to hold on them so as to score dead birds. Fetherston landed the coveted prize of high amateur in both 15-target events with a total score of 90 out of 100. May and Barto did not allow Fetherston much leeway in the second 50, as they each broke 43. Ed. Graham started in with 15 straight in practice, broke 93 out of the next 100 and went 25 straight in the last event, thus winning the pro. honors. Most of the scores are considerably below their usual average, and the marksmen all agreed to try to make up for it next week. Scores:

Targets:	15	50	50	25	25	12p
L. M. Fetherston	46	44				
C. W. May	12	36	43			
J. B. Barto			43			
F. Silver			38	21	18

W. F. De Wolf	9	30	32			
T. V. Cannon	5	13	19			
M. E. Bosley			37			

Jan. 26.—During the early part of the afternoon the weather was more like a spring day than midwinter, and a field of twenty-six shooters turned out for the several events shot during the afternoon.

Fifteen new members were added to the club roll the past week, with more being reported in 'almost every day. A. H. Winkler, F. C. Young, A. B. Chladek, F. M. Libbe and P. Patrick were new members who were out to-day, and all did good work at the trap, this being Patrick's second trial at smashing targets.

C. K. Seelig was high amateur for the day with a total of 93 out of 100 in the two 50-target club events, and 21 out of 25 from 20yds. E. Silver ran him a close race for the honors of the day, showing the same total of 93 out of 100, but dropped behind in the extra event at 20yds., in which Silver broke 18 out of 25. Fred Bills ground 'em up to the tune of 97 out of 100 in the two 50-target events. Bob Seelig's 98 in the first was good for high mark, Silver's 46 taking second place, Kammerer breaking 45 for third, while Schultz and Riley each broke 44. Silver concluded to go one better in the second 50, and his total of 47 landed first, Seelig, Jr., and Schultz each crowding him along with scores of 46. Seelig, Sr., broke 45, while Kammerer and Winkler each broke 44. Doc. May showed the way in the practice event by taking first place with 14 out of 15. Geo. Eck landed the top score in event No. 4, breaking 22, gun below the armpit until bird is in sight. Hardy Wolfe took the honors in event No. 5 by breaking 24 out of 25, Young and Kammerer keeping him close company with a score of 23. Winkler, Young and Libbe did better each time

they shot a frame, and their scores show that with regular practice they will soon land among the leaders.

Targets:	15	50	50	*25	25	25

\*Gun below armpit. The last event was at 20yds.

Feb. 1.—Chicago Gun Club has started a campaign for new members. This famous club hopes to enlist a total membership of 500, of which 300 already belong to the organization. The regular initiation fee has been suspended until July 1, and new members are being accepted upon payment of the annual dues of \$5. When the desired 200 additional members are secured, which won't be long, the regular initiation fee goes on again.

The officers of the club would be pleased to hear from any prospective member, and any person applying to Secretary Shogren, room 840 First National Bank Building, will be given such information regarding the club as he may seek.

WM. F. MERKLE, Sup't.

### Huntingdon Country Club.

JENKINTOWN, Pa., Feb. 1.—Fox won two events and tied in another here to-day. Lovering ran a good second as an aerosaucer exterminator. Three events were contested, a miss-and-out being necessary to determine the decision in the last event.

At 25 targets: S. C. Fox (5) 28; Corbit Lovering (3) 23.  
 At 15 targets: Mellor (5) 12; Adams (5) 13; Fox (4) 14; Lovering (4) 17; Howell (5) 13.  
 At 10 targets: Mellor (4) 6; Howell (4) 10; Fox (3) 11; Lovering (3) 11; Adams (4) 7.  
 Miss-and-out: Howell 3, Fox 4, Lovering 2,

### Evanston Gun Club.

CHICAGO, Ill., Jan. 27.—Conditions were ideal for good scores at the shoot if the Evanston Gun Club and some good shooting was witnessed. Millen carried off the honors of the day by making two perfect scores in succession. This is the first time this feat has been accomplished since the organization of the club, even by professionals, who have visited the grounds. Mr. Watson had second best.

The club will hold an all-day merchandise shoot on Washington's Birthday.

The following are the scores made Sunday:

Targets:	25	25	25	25	25
Gamble	16	14	17	15	..
Adams	22	17	20	20	19
Harrison	15	15	15	10	..
Scowley	18	20	17	19	..
Millen	20	19	25	25	21
Davis	19	14	22	..	..
Doyle	16	23	21	..	..
Carman	21	19	14	..	..
Gormley	14	12	..	..	..
Langworthy	9	14	..	..	..
Ihalen	17	19	23	..	..
Hanson	12	15	..	..	..
Milner	6	16	..	..	..
Coleman	23	..	..	..	..
Van Petten	13	13	8	10	..
De Clercq	11	11	13	..	..
Watson	22	20	21	22	..
Darby	16	..	..	..	..
Sprague	4	2	..	..	..
Miller	20	..	..	..	..

At the 20yd. line the following scores were made from a possible 25: Phalen 17, Coleman 17, Doyle 15, Scowley 13, Davis 13, Hanson 9.

At 12 pairs doubles, Coleman broke 18, Phalen 14, Millen 12, Carman 10, Miller 8.

W. J. PHALEN, Sec'y-Treas.

### Smith Gun Club.

NEWARK, N. J., Feb. 1.—To-day's events at Wiedemeyer's Park, brought out a good attendance. High men were J. Thompson, who made 132 out of 150; Wm. Hassinger, with 147 out of 175; J. Baldwin, 155 out of 200, and R. Hensler, 137 out of 200.

R. A. Hensler	18	16	13	16	16	21	18	17
J. Baldwin	16	21	19	20	17	21	23	18
Wm. Hassinger	21	18	22	20	21	22	23	..
J. Thompson	23	22	18	23	22	24	..	..
H. Hassinger	20	18	19	16	..	..	..	..
Dr. P. Moeller	16	14	13	16	18	..	..	..
John Letzelter	18	13	19	15	..	..	..	..
Louis Colquist	19	20	21	24	21	..	..	..
W. H. Dickenhorst	15	16	12	20	16	17	..	..
A. Donohue	14	16	19	17	..	..	..	..

Cincinnati Gun Club.

J. SCHRECK was high man at the weekly shoot, Feb. 2, scoring 115 out of 125 shot at. In the first 100 he was tied with Medico on 93, the latter being the only contestant to go straight in any one of the 20-target events. M. J. Johnson finished in second place with 113, putting up a score of 90 in the first 100. Supt. Gambell had the best of it in the 25-target event, going out without a miss. Smith and Jones, two beginners at the traps, showed great improvement after the first event, the former breaking 32 and the latter 61 out of their first 100 targets. Davies started off badly, but got back to form in the second event, and finished in third place for the afternoon. The weather conditions were good, a trifle cool, but not enough to affect the work of the shooters.

The club team will visit the Northern Kentucky grounds on Feb. 9 to shoot the return match with that club. There will be a 100-target program provided, Jack Rabbit system, with an entrance of \$7, of which \$1 will be deducted for targets, and \$1 put in a purse to be divided equally among four classes, Lewis system, 50, 30 and 20 per cent. Shooters receive 5 cents for each target broken, and 5 cents for each target missed will constitute a purse to be divided 50, 30 and 20 in each event.

Davies and Medico shot a friendly match at 40 targets, the former winning by two targets, 37 to 35. At the close of the first round the score was a tie on 18, and Davies gained the lead in the last round with 19 to 17. The scores of to-day were as follows:

Table with columns: Events, Targets, Names (Hammerschmidt, Schreck, Davies, Johnson, A Gambell, Medico, Smith, Jones), and Total scores.

Match, 40 targets: Davies 18 19-37 Medico 18 17-35

Daniel Boone Gun Club.

MARTHASVILLE, Mo., Jan. 25.—The following scores were made at practice by members of the Daniel Boone Gun Club. On the first 25 Ahmann went straight, winning the Du Pont picture on high gun, which any member of our club can compete for, the first 25 birds of each regular practice day to count. No member is eligible to win more than one picture. The weather to-day was pleasant and the scores show it.

Table with columns: Shot at, Broke, Names (J Mutert, A F Ahmann, Kite, Bollmann, F Suhre, Lichtenberg, Meyer, Wilson, Berg, McVey) and scores.

Feb. 1.—One of our new members, Louis Koch, of Treloar, Mo., was high man to-day with 22 broken out of the first 25 shot at, which gives him the picture donated by the Du Pont Co. and shot for each week.

The weather was so cold that some of the boys said they could not "feel the trigger." We hope the spring days will soon come, when a new excuse will have to be hunted up for the low scores:

Table with columns: Shot at, Broke, Names (L Koch, Lichtenberg, J Mutert, A Ahmann, Wm Koch, Meyer, Dothage, F Koelling) and scores.

Northern Kentucky Gun Club.

THERE was little doing at the grounds on Feb. 2, only two shooters showing up for practice. Capt. G. W. Dameron was present, but took no part in the sport. J. Wuerdeman broke 90 out of 100, and W. Wuerdeman 58 out of 75.

The grounds have been put in fine condition since the flood, which did considerable damage, and everything is in readiness for the jack rabbit shoot, which is to be held on Feb. 9 in connection with the return match between the Northern's and Cincinnati's teams. The program will be 100 targets in 20-target events, \$7 entrance. Of this \$1 will be deducted for targets, and \$1 set aside to form a high average purse for those shooting the entire program. This will be divided equally among four classes, Lewis system, 50, 30 and 20 in each class. Each shooter will be paid 5 cents for each target broken, and 5 cents for each target missed will make up a purse divided 50, 30 and 20 in each event. The prospects are good for a large attendance, barring bad weather.

Ye Oak Meadow Gun Club.

SANDUSKY, O., Feb. 1.—Ye Oak Meadow Gun Club held a very enthusiastic meeting at the Sunyendeand Club on Jan. 29. Reports were read and accepted, and one that appealed to all was: "Resources over \$500 and no liabilities." Members decided to hold a spring shoot on Thursday, April 17. It will be run under the new Roundy system, originated with R. W. Chamberlain, of

Du Pont Smokeless Powders

The Choice of the Winners at the Sixth Annual

Midwinter Handicap Target Tournament

PINEHURST, North Carolina, from January 22d to 25th, was the scene of spectacular trapshooting on the part of America's celebrated target shooters. The exhibition of marksmanship was not only highly creditable to shooters but was also a display of the reliability of Du Pont Powders.

The victors of the Tournament shot Du Pont Powders with following results:

THE MIDWINTER HANDICAP

The Midwinter Handicap, the Main Event, Won by J. S. Jennings, Todmorden, Canada, 95 x 100, from 20yds., shooting DU PONT.

Allen Heil, of Allentown, Pa., won the Governor's Trophy, and R. W. Burnes, of Cambridge, Mass., won the Secretary's Trophy in the Midwinter Handicap. Both contestants shooting DU PONT.

THE PRELIMINARY HANDICAP

B. V. COVERT, of Lockport, N. Y., shooting DU PONT from 18 yards, tied at 95 with Allen Heil, Allentown, Pa., shooting SCHULTZE from 21 yards. The shoot-off was won by Mr. Covert, with 25 straight.

D. D. L. CULVER, shooting DU PONT, won the President's Cup; Allen Heil, shooting SCHULTZE, the Governor's Cup, and B. Timms, shooting DU PONT, won the Secretary's Cup—handsome trophies placed in competition in the Preliminary Handicap.

GOLD MEDAL FOR HIGH GENERAL AVERAGE

Frank S. Wright, South Wales, N. Y., shooting DU PONT, winner with score of 572 x 600. C. H. Newcomb, Philadelphia, Pa., shooting SCHULTZE, tied for second average; score, 566 x 600. Mr. Newcomb in shoot-off broke 25 straight and won the silver medal.

HIGH AMATEUR SCORE ON ALL TARGETS

C. H. NEWCOMB, PHILADELPHIA, PA. 749 x 800, SHOOTING SCHULTZE
Geo. L. Lyon, Durham, N. C. 744 x 800 " DU PONT
H. D. Gibbs, Union City, Tenn. 743 x 800 " SCHULTZE

THESE conspicuous triumphs prove our assertions that Du Pont Smokeless Powders "make and break records at the traps."

IT PAYS TO SHOOT DU PONT POWDERS

Columbus, O. Chamberlain has been called "Roundy" by the shooting fraternity for years; hence the Roundy system.

We expect our spring shoot to be a great success under this system, and as it is new, I submit a brief outline of the program:

Two special events (optional), entrance \$2. Regular program, 150 targets. Professionals shoot for targets only. The \$6 entrance fee pays for 150 targets, 150 cartridges (any brand and any load), and your dinner. Can you beat it? Why, on your home grounds, it costs you more than that for the number of targets, and besides this system offers you, Mr. Amateur, a real chance to win some of the money. Supposing we have 100 shooters, divide them into four classes. The first 25 high scores will be first class; the second 25, second class; the third 25, third class; the fourth 25, fourth class.

The three highest scores in each class will receive 50, 30 and 20 per cent. of the purse allotted to each class. Purses divided class shooting, not high gun. With this Roundy system, the much abused "poor shot" gets a fair shake with the expert.

We also are offering a silver medal to high average amateur, and high professional, and a bronze medal to low score.

Our annual registered tournament will be held Thursday, Aug. 28.

Mineral Springs Gun Club.

WILLOW GROVE, Pa., Feb. 1.—At the monthly shoot of the Mineral Springs Gun Club the following scores were hung up:

Twenty-five targets: Haas 23, Nice 18, Pierson 20, Hiltetbiel 23, Bready 13, Worthington 13, Cornell 9, Martin 15, Nash 17, Corson 17.

Twenty-five targets: Haas 20, Nice 20, Pierson 21, Hiltetbiel 22, Bready 15, Worthington 15, Cornell 15, Martin 20, Nash 15, Corson 15.

Twenty-five targets: Haas 18, Nice 20, Pierson 21, Hiltetbiel 22, Bready 19, Worthington 21, Cornell 12, Martin 13, Nash 19, Corson 9.

Twenty-five targets: Haas 21, Nice 24, Pierson 21, Hiltetbiel 18, Bready 16, Worthington 22, Cornell 13, Martin 22, Nash 22, Corson 7.

These four events constituted the 100-bird total, for records of the club. The summaries show that Haas broke 82, Nice 82, Pierson 83, Hiltetbiel 85, Bready 63, Worthington 71, Cornell 49, Martin 75, Nash 73, Corson 43, Nice and Haas shot off their tie in a special 25-target event, Nice breaking 23 and Haas 22.

# Parker Gun Victories in 1912

**T**HE highest official average for the season of 1912 at both **Single and Double Targets** was made with **Parker Guns**.

As on every previous occasion, the bona fide **Championship of America** was won with a **Parker Gun**, Mr. W. R. Crosby scoring 198 x 200 targets at 18 yards rise. Same man, same gun, made the **World's Record**, scoring 98 x 100 targets at 23 yards, which is a truly wonderful performance.

Small bore **Parker Guns** are recognized as the Standard Game Guns of America and are gaining in popularity every season with the most progressive sportsmen. For full information regarding guns in gauges from 8 to 28, address

**NEW YORK SALESROOMS**  
32 Warren Street

**PARKER BROS., Meriden, Conn.**

Or **A. W. duBRAY**, Resident Agent, P. O. Box 102, San Francisco, Cal.

(Patented, Feb. 20, 1912.)

**CLEAR VISION** means a sure shot. The bright rays of the sun, or the haze of a dark day can't affect your vision if you wear **KING'S SHOOTING GLASSES**. Made of **Akops Crystal**, our exclusive product and infinitely superior to amber. Non-magnifying. Postpaid, \$1.50 to \$7.00. Prescriptions ground to order.

The **KING** and the **KING-BUSCH-STELLUX** Binoculars have wonderful magnifying power, are handsomely finished, durable and scientifically correct. Endorsed by the leading sportsmen of America. You save \$10 to \$25 buying direct from us.

### Boston A. C.

BOSTON, Mass., Feb. 1.—J. E. Lynch made the excellent total of 95 out of 100 to-day. Conditions were hard, as a high, unstable wind blew across the traps, lending uncertain impetus or suddenly retarding an apparently true quartering scalar. Lynch shot from 2½ and 5 handicap in the respective events of 50 aerosaucers. T. C. Adams was runner-up from scratch with 88, while third also went to a scratcher, J. Clark, from the visitors' list, who broke 85. Eighteen clay saucer exterminators were at the score.

	McCrea.	Sergeant.	Gd. Total

### Asbury Park Gun Club.

The Asbury Park Gun Club will hold its first big shoot on Lincoln's Birthday, Feb. 12. Also one will be pulled Washington's Birthday. These will be all-day shoots, from 10 A. M. till dark. This is a new club, thirty-two members on New Year's—now 111. There will be ten events at 15 targets each, entrance \$1.30 per event. Money will be divided Rose system, 5, 3, 2, 1. If over five amateurs finish ten events, \$5 added to high gun. If over five professionals finish ten events, \$5 added to high gun. There will be three traps working, one for targets only. The traps are on the flat beach, giving a clear sky background from the horizon to the zenith, and affording a clear view of the target on its entire flight. Glass-enclosed grandstand. All shells on the ground. Ship your shells by United States or Adams Express, care Life Saving Station, Loch Harbour, Asbury, Park, N. J. An old sand pirate is arranging for a big clam chowder, and there will be other lunch on the ground. Further information from E. C. Burtis, Secretary.

### White Plains Gun Club.

THE shoot of the White Plains Gun Club, held Saturday afternoon, Feb. 1, was certainly a red-letter day for attendance, there being present thirty-two gunners and about twenty spectators, including eight ladies. The shooting began at 1 o'clock and continued till dark. Fred. Gilbert, of Spirit Lake, Ia.; G. E. Hollahan, T. H. Keller, Carl von Lengerke and Tom Davis were the professionals present as guests of the club. Although

Davis did not shoot, he lent a valuable hand in helping things to go smoothly.

In the 50-bird event for the take-home prizes, the competition was very keen. Dr. Martin was first with a score of 47. Ed. Ward was second with 46, and Core, Scovel and Beckley were tied for third with scores of 40 each. In the shoot-off Scovel won. The scores follow: Dr. Martin 47, Ward 46, Scovel 40, Core 40, Beckley 40, Allyn 39, Townsend 38, Lawrence 37, Rodgers 37, Carpenter 36, Banks 26.

In the 50-target event for the visitors' prize, Hyland won. The scores were as follows: Hyland 40, Finch 38, Lyons 36, Wood 35, Schefflin 31.

The 100-target event for the 500-target selected high score handicap prizes (which continues throughout the season), had results as follows: Ward 92, Martin 90, Scovel 85, Beckley 81, Allyn 81, Core 76, Rodgers 75, Carpenter 73, Lawrence 72, Townsend 69, Banks 65.

Fred Gilbert led the professionals with a score of 95 out of 100, which was splendid shooting, considering the high wind.

A great deal of enthusiasm and good fellowship is being shown by the members of this club, and the membership is rapidly increasing, eight new members being elected at the last meeting.

### Trap at Sportsman's Show.

THE indoor tournaments at Madison Square Garden rather brings a problem of accommodating all who want to shoot. Last year a thousand targets an hour were thrown during shooting periods, yet some waiting gunners were denied the privilege of shooting. A new possibility looms up in the way of a triangle match between Boston, Philadelphia and New York gunners. Daniel McMahon, of the N. Y. A. C. gunners, is the originator and advocate of such a three-corned shoot, with Chas. B. Tucker, of the Boston Athletic Association, to pick the flower of Boston's trapshooters to enter a tryout contest. Charles H. Newcomb, of Philadelphia, rounded up the victorious Quakers, who last year won the inter-city match, and R. L. Spotts, of the N. Y. A. C., captained Gotham's gunners. Boston has some crack shots who can make Quakers and Knickerbockers roll up high scores to beat the Hub's best bluerock breakers.

Another match proposed is one between Connecticut and New York State shooters. Connecticut shelters a lot of trapshooters with records, and a Nutmeg-Empire match would turn out a score that would hit the top notches.

### Knollwood Country Club.

WHITE PLAINS, N. Y., Jan. 30.—Knollwood Country Club trappists had a blustery day to-day to crack targets for the Francis M. Wilson trophy. W. McCloy, from scratch broke 69 out of his 100 and was high gun on actual breaks. W. H. Sykes with 10 free ones, had 76 for the leg on trophy. The scores follow: W. H. Sykes (10) 76, W. McCloy (0) 69, F. M. Wilson (10) 65, S. B. Mackey (0) 59, E. T. Fox (10) 58, W. C. Teagle (0) 54.

FOREST AND STREAM may be ordered from any news-dealer. Ask your dealer to supply you regularly.

## Rifle Shooting

### Intercollegiate Rifle Matches.

WASHINGTON, D. C., Feb. 1.—The results of the fourth rifle match between the universities and colleges throughout the country for the new national trophy resulted as follows:

Eastern League: Columbia University defeated University of Vermont, 916 to 878; University of Maine defeated Lchigh University, 836 to 808; Cornell University defeated Dartmouth College, 876 to 819; Massachusetts Agricultural College defeated Rhode Island State College, 959 to 907; Princeton University defeated Massachusetts Institute of Technology, 932 to 916; North Georgia Agricultural College defeated Norwich University, 910 to 904; Harvard University with a score of 956 won by default from Clemson College.

The standing of the colleges in the Eastern League to date shows Columbia, Harvard and Massachusetts "Aggies" in a triple tie for first place.

Western League: University of California defeated Louisiana State College, 890 to 880; Iowa State College defeated University of Kansas 936 to 831; Perdue University defeated U. S. College of Veterinary Surgeons, 898 to 852; Michigan Agricultural College defeated University of Wisconsin, 911 to 896; Washington State College with a score of 877 won by default from the University of Missouri; West Virginia University won from the University of Minnesota, 917 to 916; Oklahoma A. and M. College won from the University of Nebraska, 851 to 848.

The Iowa State College and West Virginia University are tied for first place in the Western League, each with four wins. The University of Minnesota and University of California have each won three and lost one match.

### Indoor Rifle League Contest.

SPRINGFIELD, Mass., Jan. 29.—Following are the official scores of the Indoor League contest:

Thirteenth match:

Louisville.....	1026 vs. Dallas.....	989
Warren.....	1021 vs. Baltimore.....	1019
Citizens.....	837 vs. Shell Mound.....	1093
Belleville.....	938 vs. Myles Standish.....	996
Youngstown.....	1096 vs. Pittsburgh.....	1104
Cincinnati.....	997 vs. Columbus.....	1078
Osborn.....	953 vs. National Capital.....	1060
Tacoma.....	998 vs. Olympic (S. F.).....	1112
Providence.....	1053 vs. Denver.....	1145
St. Louis Colonial.....	1105 vs. Boston.....	1084
Spokane.....	1168 vs. Portland.....	1092
Philadelphia.....	1106 vs. Springfield.....	1125

Fourteenth match:

Dallas.....	1048 vs. Baltimore.....	1032
Louisville.....	1022 vs. Shell Mound.....	1107
Warren.....	1018 vs. Myles Standish.....	986
Citizens.....	897 vs. Pittsburgh.....	1110
Belleville.....	972 vs. Columbus.....	1010
Youngstown.....	1057 vs. National Capital.....	1185
Cincinnati.....	997 vs. Olympic (S. F.).....	1117
Osborn.....	1010 vs. Denver.....	1136
Tacoma.....	1043 vs. Boston.....	1116
Providence.....	1064 vs. Portland.....	1191
St. Louis Colonial.....	1105 vs. Springfield.....	1113
Spokane.....	1121 vs. Manhattan.....	1126

The Executive Committee has decided that Spokane wins from Denver in the twelfth match by 1118 to 1117. Decision has not yet been rendered on the Boston-Olympic contest, match No. 9.

J. B. CRABTREE, Sec'y-Treas.

### Interclub Rifle Matches.

WASHINGTON, D. C., Feb. 1.—The fifth match of the Eastern League in the interclub rifle shooting championship of the United States for the new national trophy shows the District of Columbia, Bridgeport, Conn., and the Warren, Pa., rifle teams still in a triple tie. The highest score was made by the Warren Club, which shows a total for five men of only 9 points less than the possible score of 1,000. The results of the matches are as follows:

The District of Columbia Rifle Association defeated the Birmingham, Ala., Athletic Club Rifle Association 984 to 935; the Park Club, of Bridgeport, Conn., defeated the 13th Regiment Rifle Club of Brooklyn, N. Y., with a score of 959 to 886; the Presque Isle Rifle Club, of Erie, Pa., defeated Bangor, Me., Rifle Association, 922 to 758; Warren, Pa., Rifle Club defeated the New Orleans, La., Rifle and Revolver Club, 991 to 922; Manchester, N. H., Rifle and Revolver Club defeated the Myles-Standish Rifle Club, of Portland, Me., 985 to 943.

The standing to date is as follows:

	Won.	Lost.
District of Columbia.....	5	0
Bridgeport, Conn.....	5	0
Warren, Pa.....	5	0
Erie, Pa.....	4	1
Manchester, N. H.....	3	2
Bangor, Me.....	2	3
Portland, Me.....	2	3
Birmingham, Ala.....	1	4
Brooklyn, N. Y.....	1	4
New Orleans, La.....	1	4

In the Western League, the Cleveland, Ohio, Rifle Club is still in the lead with the clubs of Butte, Mont.; St. Paul, Minn.; Milwaukee, Wis., and Adrian, Mich., tied for second place.

**Public High School Competition.**

WASHINGTON, D. C., Jan. 28.—The results of the third rifle shooting match between the public high school rifle teams for the new national trophy are announced by the National Rifle Association of America, under whose auspices the shooting is being carried on:

Iowa City High School retains its lead by defeating the De Witt Clinton High School of New York, 956 to 917; Baltimore Polytechnic High School defeated the Brookline, Mass., High with a score of 793 to 439; Deering High, of Portland, Me., defeated the High School of Commerce, New York city, with a splendid score of 954 to 858; Morris High, of New York, with a score of 914, won by default from the Stuyvesant High of New York; Eastern High, of Washington, D. C., with a score of 813, won by default from the Southern High, of Philadelphia, whose team was compelled to withdraw from the League matches owing to the opposition of the school authorities; Business High, of Washington, D. C., with a score of 811, defeated the Utica, N. Y., Free Academy, whose score was 769; Portland, Me., High defeated Springfield, Mass., "Tech," 920 to 896; Salt Lake City High defeated the Sault Ste. Marie, Mich., High, 921 to 896; Susquehanna, Pa., High defeated the Manual Training School, of St. Louis, Mo., 841 to 580; Manual Training, Washington, D. C., defeated the Tucson, Ariz., High, 875 to 763.

The best individual score of the match was made by Everett Hoover, of Iowa City, whose score was 97 standing, 98 prone; total 195 out of the possible 200.

a hedgehog or a quill pig, as the guides call them, and while the sound indicated something approaching, it did not get any louder, but presently a fine handsome buck deer came into full view. I measured his antlers with my eyes, knelt on one knee, took quick steady aim for his shoulder, and pulled the trigger. He fell instantly, shot through the heart, and stretched his graceful form at the foot of a large beautiful yellow birch tree. It was early in the day, and we were about an hour's tramp from the lake, so we carried him down the trail he probably had gone over many times before.

We would like to have lingered longer amid these scenes, but having obtained everything we

were in search of, including excellent health and buoyant spirits, we very reluctantly bid farewell and returned to the dusty city to look up the needful and chase the fitful and elusive dollar.

If you were to go over that territory now, you would find signs posted on many of the trees and along the road. The possession is now vested in a millionaire sportsman of international reputation.

THAT FOREST AND STREAM is read with more than ordinary care by sportsmen is proved by its growth. Its increase in circulation has continued right through the summer months.

**Woman Rifle Shot Issues Challenge.**

LONDON, Feb. 1.—To prove her contention that women are the equal if not the superior of men in rifle marksmanship, Miss E. Fenton, secretary of the Imperial Rifle Club, has issued a challenge to select a team of ten women to compete with an equal number of men on a miniature range.

Miss Fenton claims that the results at Bisley, since many of the shooting competitions there were thrown open to women, have shown that women do just as well as men with the rifle, and furthermore they do it with less practice than their male competitors. She instanced the last meeting, when one woman made a "possible" at 300yds., and another divided the prize in an open event.

The Ladies' Bisley, too, has greatly increased the interest in rifle shooting by women. "Many women," said Miss Fenton, "become high-class 'marks-men' almost without practice, a circumstance which does not apply to men."

"So far as I can see, a woman's nature naturally fits her for shooting. Shooting does not require strength; it needs steadiness and coolness. Every one knows that women are superior to men in a crisis; and it is because our nature is more phlegmatic that we make better shots. In addition, of course, there is the fact that we drink less alcohol."

**Zettler Rifle Club.**

NEW YORK, N. Y., Feb. 1.—The following scores were made on Jan. 28: Conditions, 50 shots, 10-shot strings, possible, 250:

A Begerow	226	231	232	240	232—1161
J Kaufmann	242	248	246	246	247—1229
F Hecking	239	237	234	233	236—1179
Dr Leavitt	234	230	238	241	240—1183
H M Pope	244	249	247	249	247—1234
O Smith	244	244	243	243	238—1212
C Zettler	237	243	246	241	244—1211
L P Hansen	242	240	231	242	243—1193

**ADIRONDACK CAMP-FIRE.**

Continued from page 166.

landing net under him, and in a moment lay in the creel in the boat a beautiful trout. He was dotted with spots of brightest vermilion, his fins rosy as a sunset on that August, edged with a fringe of creamy white—a prize I was proud of. After securing some of his smaller relations we closed our record for the day with nine trout.

The open season for deer was now on. They do not feed on the shores in the fall or open season as they do during the summer. They were up on the high hardwood ridges, and one who is not familiar with the woods, or has not been fortunate enough to have a good guide who knows his business, sometimes has to work hard to get his quantum of game. In this my luck has been remarkably good. We had hunted a few days without success, until one misty day Ed thought of a small spring bog at the foot of a ridge. We arose early and took a position on a game trail leading to the bog, and patiently still-hunted for a big buck, whose footprints we had seen in the soft mud surrounding the marsh, and our patience was rewarded by hearing something moving on the trail that first sounded like

## SHOOTING IN 1818.

Concluded from page 170.

a deputation, shall be found in pursuit of game, with gun, dog, or net, or other engine for the destruction of game, or taking or killing thereof, and shall be required to shew his certificate, by the lord or lady of the manor, or proprietor of the land whereon such person shall be using such gun, etc., or by any duly appointed gamekeeper, or by any qualified or certified person, or by any officer of the stamps, properly authorized by the commissioners, he shall produce his certificate; and if such person shall refuse, upon the production of the certificate of the person requiring the same, to shew the certificate granted to him for the like purpose; or in case of not having such certificate to produce, shall refuse to tell his christian and surname, and his place of residence, and the name of the county where his certificate was issued, or shall give in any false or fictitious name, he shall forfeit 5*l.* *Id.* Certificates do not authorize any person to shoot at, kill, take, or destroy any game at any time that is prohibited by law, nor give any person a right to shoot at, etc., unless he be duly qualified by law. *Id.* No certificate obtained under any deputation shall be pleaded or given in evidence, where any person shall shoot at, etc., any game out of the manors or lands for which it was given. The royal family are

exempted from taking out certificates for themselves or their deputies. *Id.* The duty on these certificates are now, by an act which is at present passing the House, to be had through the collectors of the assessed taxes. The above is the law now in force. Besides having a certificate, each person to kill game must be qualified by having a certain estate. The last general qualification (to use the words of Dr. Burn, though in fact it is the first of the acts relative to the game ever now put in force) by estate or degree, to kill game, is 22, 23 Charles II. c. 25. This enacts, that every person not having lands or tenements of the clear yearly value of 10*l.* or on leases for 99 years, or upward, of the clear yearly value of 15*l.* or except the eldest son and heir of an esquire, or person of higher degree, or owners of forests, parks, etc., in respect of such forest, park, etc., is not qualified for himself or any other person, to keep guns, bows, greyhounds, etc., c. 3. This merely states the qualification; the penalties and modes of proceeding are entirely changed by subsequent acts; and first, by 5 Ann. c. 14, which directs that all former acts not thereby repealed and altered continue in force. With respect to offenses against the game laws, we shall here enumerate those chiefly which fall under the cognizance of justices of the peace out of sessions, premising, that for brevity sake the following abbreviations are used: viz.: P. denotes the penalty; R. the mode of recovery; A. the application of it; Ap. the appeal; J. 1 or 2 and W. 1 or 2, that one or two justices may convict, or that one or two witnesses must prove the offense; and in treating of the several statutes on this head we shall consider, 1. what relates to game exclusively; 2. what relates to other quadrupeds; and, 3. other birds which, though fera natura, are sometimes reclaimed, and private property.

Every higher, chapman, victualler, carrier, etc. who shall have in his possession any hare, pheasant, partridge, moor-game, etc., or offer to sell any such (except sent by a person qualified to kill game), P. 5*l.* for each piece; R. distress, and in default commitment three months; J. 1. Stat. 5. Ann. c. 14, s. 2.

Persons not qualified to keep dogs, engines, etc., to destroy game, P. 5*l.*; R. as above; A. half to the informer, half to the poor. Justices, lords of manors, and gamekeepers, may take away the game, dogs, guns, etc.

Gamekeeper selling, or otherwise disposing of such game, without consent of the lord of the manor, P. three months imprisonment; conviction as above. *Ibid.* s. 4.

Killing game in the night, i. e., between seven in the night and six in the morning, from Oct. 12 to Feb. 12; and between nine at night and six in the morning, from Feb. 12 to Oct. 12; or at any time on a Sunday or Christmas Day, P. from 10*l.* to 20*l.* for the first offense, and from 20*l.* to 30*l.* for the second; conviction as above, to be within one month. 13 Geo. III. c. 80, s. 1, 2, 3, 9. In case of a third offense, P. commitment to the session, unless he become bound with two sureties to appear; prosecutor to be bound to prosecute (*Ibid.* s. 1.); application of penalties, half to the informer, half to the poor; R. distress, and in default, commitment three calendar months. Ap. sessions. *Ibid.* s. 4.

More than two persons going out with guns, nets, etc., to destroy game, between eight at night and six in the morning, from Oct. 1 to

## The Small Game Rifle That's Big Enough For Deer

Price \$15

New Model 27  
.25—20 or .32—20 calibres

**R**ABBIT, woodchuck, hawk, fox, wolf and deer fall ready prey to its high velocity smokeless or black and low pressure smokeless loads. For target work it is unexcelled.

Built with the famous Trombone Action and Smokeless Steel Barrel, unobtainable in any other rifle of its calibre. Its solid top and side-ejection protect shooter's face and eyes, and prevent dirt from entering action.

The desirable take-down construction and Ivory Bead sight cost extra in other .25—20 and .32—20 rifles. You pay nothing additional for these in the *Marlin*.

See this hard-hitting, accurate shooting, perfectly-balanced rifle at your dealer's today.

Send 3c in postage for new catalog showing the complete line of *Marlin* repeaters, rifles and shotguns.

*The Marlin Firearms Co.* 27 Willow Street, New Haven, Conn.

## No Shortcomings

The Smith Gun has no shortcomings—not one. The 6 Hunter brothers, with inventions, precision, workmanship and experience, kept after shot gun shortcomings for 22 years, until they had wiped out the last and least important one.

"6 Times 22 Years Experience" gives the shooter of a Smith Gun the fullest possible pleasure in the field, and the maximum game in his bag.

Ask your dealer to show you the new L. C. Smith 20-gauge. Send for Catalog.

HUNTER ARMS CO., 90 Hubbard St., FULTON, N. Y.

**L. C. SMITH GUNS**

Feb. 1; or between ten at night and four in the morning, between Feb. 1 and Oct. 10; or any person found with firearms or other weapons; may be apprehended by owners, keepers, etc., who shall deliver them to a peace officer, to be taken before a justice; or if they cannot be apprehended, the justice, on information on oath, may issue his warrant; P. deemed a rogue and vagabond, and to suffer accordingly. 39, 40 Geo. III. c. 50.

Killing, or having in possession, any partridge, between Feb. 1 and Sept. 1, or any pheasant, between Feb. 1 and Oct. 1, P. 5*l.* for each bird; R. action in the courts of Westminster. 2 Geo. III. c. 19.

Killing, or having in possession, any black game, from Dec. 10 to Aug. 10 (in New Forest, from Dec. 10 to Sept. 1, by 43 Geo. III. c. 34); or any red game, from Dec. 10 to Aug. 12; or bustard, from March 1 to Sept. 1: P. 10*l.* to 20*l.* first offense, and 20*l.* to 30*l.* for every subsequent offense; R. distress and sale, if not forthwith paid, and the offender may be detained till the return of the distress, unless he gives security to appear again in five days; for want of distress, commitment from three to six calendar months, or till paid with costs; J. 1; W. 1; A. half to the informer, half to the poor; Ap. sessions, to be holden within four calendar months after the cause of complaint, giving fourteen days' notice to the justice, and every other person concerned, and entering into recognizance,

with one sufficient surety to try the appeal and abide the order of the court. 13 Geo. III. c. 55. s. 1, 2, 3, 4, 9, 10.

Every person using gun, dog, etc., to destroy the game, must take out a certificate from the clerk of the peace, for which he shall pay a duty of 3*l.* 3*s.* P. 20*l.* R. J. 1, W. 1. distress, or in default, commitment three calendar months, or till paid. A. half to the informer, half to the King. But if not prosecuted within six calendar months, the whole to the King. Ap. sessions. Justice may mitigate, not to less than half and costs. Gamekeeper to take out a certificate, for which he shall pay 1*l.* 1*s.*; under the same regulations and penalties, 25 Geo. III. c. 5. 31 Geo. III. c. 21.

Killing, or attempting to kill, any deer, in any forest, chase, or park, without consent of the owner, P. 20*l.*; and for every deer killed or carried away, 30*l.*; and if the offender be a keeper, double. R. sessions. Conviction, J. 1, who shall transmit the conviction to the sessions. 16 Geo. III. c. 30, s. 1, 3. Justice, on oath W. 1, may issue his warrant to search for any deer skin, head, etc., or any net, and cause the person on whose premises they are found to be brought before him, and if he does not give a satisfactory account how he came by them, P. from 10*l.* to 30*l.* *Ibid.* s. 4. Persons through whose hands the deer, etc., have passed, not giving a good account, liable to the same penalties. *Ibid.* s. 5. Keepers and their assistants may apprehend offenders they find in the act, and take them before a justice. *Ibid.* c. 15. R. distress, and for want of distress, commitment for six months, or till paid, with costs. J. 1. W. 1. A. half to the King, half to the informer. *Ibid.* s. 11.

Burning furze, fern, etc., on any forest or chase without consent of the owner, keeper, etc., P. 40*s.* to 5*l.* R. distress, or in default, commitment from one to three months. J. 1. W. 1. A. half to the informer, half to the poor. 28 George II. c. 19.

Unlawfully entering into any ground (inclosed or not), and hunting or killing rabbits, P. treble damages to the party aggrieved and costs, or commitment for three months, and till he find sureties for his good behavior. J. 1. W. 1. 22, 23 Charles II. c. 25, s. 4.

Killing or taking house dove or pigeon, P. 20*s.* or commitment from one to three calendar months, or till paid. R. J. 1. W. 1. A. to the prosecutor, 2 George III. c. 29.

Driving, or taking by nets, tunnels, etc., any waterfowl in the moulting season. P. 5*s.* for each fowl, and nets to be seized and destroyed. R. distress, and in default commitment from fourteen days to one month. J. 1. W. 1. A. half to the informer, half to the poor. 9 Anne, c. 25. s. 4.

Game, are deer, hares, pheasants, partridges, moor game, and, by the act now passing, snipes and woodcocks are made game.

It is not to be inferred that these statutes actually empower qualified persons to hunt or shoot anywhere. They cannot enter another man's land in pursuit of game without his leave, but at the same time, if he has not warned the sportsman against coming upon his land, he will not recover more than 40*s.* costs in an action of trespass.

Sporting Seasons.—The time for sporting, in the day, is from one hour before sun rising, until one hour after sun setting. 10 George III. c. 19. For bustards, the sporting is from Dec. 1

to March 1. For grouse, or red grouse, from Aug. 11 to Dec. 10. Hares may be killed all the year, under the restrictions in 10 George III. c. 19. Heathfowl, or black game, from Aug. 20 to Dec. 20. Partridges, from Sept. 1 to Feb. 12. Pheasants, from Oct. 1 to Feb. 1. Widgeons, wild ducks, wild geese, wild fowls, at any time, but in June, July, August and September.

**Pennsylvania Divided on Blackbirds.**

THE ordinary blackbird, known locally as the cowbird or the purple grackle, bids fair to be a theme of discussion in the sessions of the Pennsylvania Legislature during the winter.

Letters are being received by the State Game Commission, says the Philadelphia Record, asking that the State authorities back a bill to protect the blackbird all the year round because of the bugs of which the blackbirds relieve the farmers. And just as vigorously as the blackbirds is being championed others are writing demanding that the bird be put on the outlaw list, owing to its habits of destroying the nests and eating the young of other birds.

The commission will recommend that the turtle dove and kildeer, which belongs to the plover family, be protected because of their destruction of insects. These birds are common all over the State, and in many sections are virtually protected because of their usefulness. The blackbird's reputation is not as good as those of the dove and the kildeer.

# A MESSAGE

These are some of the things that the boy is taught to make

**T**O the Mother or the Father, the guardian or the friend of the boy who is just now entering the most momentous years of his life, those years between eleven and eighteen when his character hardens in the mould that shall make or ruin his career, this message is addressed.

To say that such a boy needs stimulation in right paths is a common phrase that no one will dispute. But how to stimulate, or what to stimulate him with, is the centuries old problem that you are dealing with and about to decide and then to pursue.

Doubtless you have tried many expedients, doubtless you have watched him in his sports and his studies and with his playmates, and possibly—if he is like most boys—you have seen his interest shift from one thing to another, and have wondered with trepidation what will be the final result.

### It is to you, then, that this solution is submitted, viz., HARPER'S YOUNG PEOPLE'S LIBRARY—INDOORS AND OUT.

It consists of six books—not story books, not moral tracts, but six books whose sole aim is to awake in boys the desire to make things and to do things. It is a little library built upon the fundamental principles that that boy who learns to use his hands and mind in unison, to depend upon his ingenuity to construct his own bob-sled or his own pushmobile or his own book-rack, becomes in the very process of his efforts more manly, more reliant and sobered to a better realization of his latent ability.

We are not presumptuous enough to claim it is your duty to buy these books, but we do say and we do firmly believe that it is your duty to find out all about them. This costs you nothing. It may repay you a thousandfold. So won't you, for the boy's sake, sign the attached coupon at once?

**HARPER & BROTHERS**  
Franklin Square  
New York, N. Y.

Sirs:—Please send me without obligation, full particulars about HARPER'S YOUNG PEOPLE'S LIBRARY—INDOORS AND OUT.

### The Salmonidae Family.

The Char (*Salvelinus alpinus*) and Other Members.

BY W. J. MURRAY.

THIS is a name given to numerous varieties of the genus *Salmonidae*, inhabiting the northern regions of Europe, Asia and America. The true char are to be found in the lakes of mountainous portions of the North Temperate zone, in both the eastern and western hemispheres, and they are widely distributed over these regions where both their habits and appearance vary considerably according to their geographical position.

In the extreme north of Europe and Asia the char take to a marine life and follow the same mode of existence as the salmon and sea trout, including the anadromous habit of ascending the rivers annually for spawning purposes about October.

When the char take to the sea their scales become silvered like the salmon and sea trout. In appearance the char bears a strong resemblance to its cousin, the common European river trout (*Salmo fario*), but does not usually grow so large, the average weight being only about one-quarter pound, although on some rare occasions two pounds have been reached. In the western coast of Scotland some of the lochs contain large char. Loch Leven at one time contained some weighing up to two or three pounds, but such fish are no longer to be found there; a fact which is probably accounted for by the loch having been lowered through some arterial drainage in its locality. It is, by the way, a well established fact that fish are very apt to forsake any lake or river, the natural conditions of which have been disturbed or interfered with by drainage. Many fine fishing grounds have been permanently ruined by this means.

Another char (*Salvelinus fontinalis*), or what is known as the American brook trout, has been introduced into Great Britain during the last thirty years, but up to the present time there is no evidence of their having established themselves there in a permanent way. Although they have been known to do so temporarily in some of the Scottish lochs, they usually soon disappear. These brook trout or char very closely resemble the British variety and are a very handsome fish. The color of the char is that of a bluish purple on the back, while its sides are of a golden tinge, running into red on the belly. There are red and black spots along the sides as well as on the tail and dorsal fin. The fins are of a reddish pink, and the outer edge is tipped with white. But while these are some of the leading characteristics, they are subject to various minor changes and modifications due to changes of locality and environment—to temperature, climate, food supply, etc. Some of these modifications are often so pronounced that they lead to confusion in classification and to errors in nomenclature.

From an angler's point of view the char is regarded as inferior to the trout, not being considered quite so gamy a fish, although affording very good sport nevertheless, and for culinary purposes. When the fish are in good condition they are considered an excellent food fish. The best time to angle for char is on quiet evenings when they can be seen rising to small natural flies. The angler's flies should be allowed to sink, and then should be drawn quietly along,

taking care to keep them in the submerged position.

If nature did not favor the char with defensive weapons against predatory fish, she certainly supplied it with some resources in the way of cunning, for it takes no risks with the pike, avoiding all waters where this natural enemy is to be found. Indeed, so exclusive is the char that it seems to prefer having a lake all to itself. In a mountainous region of the County of Cavan, Ireland, the writer is familiar with a small lake about a mile long and three-quarters broad, which teams with small char, and the only other fish found in the lake are eels. The presence of char in this little lake is very mysterious. The locality is wild and isolated and quite away from civilization almost, so that it would seem to be very improbable that the char were put there by the hand of man. This lake is the only one in Ireland that is known to contain char, which seems to be in itself very strange. But this is not the only peculiar feature about fish distribution in Ireland. In Lough Neagh (in Ulster) the largest lake in the British Isles, which is fourteen miles by twelve, there is a small, pretty, herring-like fish (*Coregonus pollan*) belonging to the *Salmonidae* family, and is closely allied to the whitefish of the American Great Lakes. In appearance it is exactly like a North Atlantic herring, and its average weight is about one-quarter to one-half pound, reaching sometimes to about three-quarter pound. It is beautifully silvered and very gracefully shaped. The lake abounds with these fish, which go in shoals and are netted, like herring, by local fishermen who find a ready market for them in the neighboring towns. The flavor of the fish is quite similar to that of the whitefish.

The pollan is peculiar to Ireland and Lough Neagh, although it was thought at one time that specimens of the fish were found in Lough Derg on the Shannon. No satisfactory evidence of this is available. It is interesting to know that this fish is a cousin of the char—the subject of this sketch.

Yet another distinction Ireland enjoys in regard to its salmonoid fish is its "gillaroe" or "gillaroo" trout (*Salmo fario*) which belongs exclusively to Lough Melvin, a fine trout lake about six and one-half miles long and three and one-half miles broad, situated between the county of Sligo on the one side, and the counties of Leitrim and Fermanagh on the other. This strange variety of the European trout is possessed of a stomach so strengthened as to form a regular gizzard like that of a fowl, and is sometimes called a "gizzard trout." Apart from this special feature the fish is an ordinary well-conditioned lake trout, which grows to seven or eight pounds or more. As a sport and food fish it is splendid, and is very highly prized. In the month of May and June there are many visitors from Great Britain and elsewhere to Lough Melvin, with rod and fly, in order to enjoy some good sport with the "gillaroo." The visitors to Lough Melvin will find ample accommodation in the hotels in the celebrated watering place, Bundoran, which is only about three miles from Lough Melvin, and the fishing is free to all visitors.

ENTHUSIASM is contagious. A magazine edited with enthusiasm is bound to be read with enthusiasm—advertising pages and all.

## ARE YOU A GUNNER?

*Do you love to follow your good dog over the fields in search of quail or chickens, or to struggle through swamp or along thick grown hillside, expecting to hear the roar of the ruffed grouse or the twitter of the fall woodcock? If so, you should have this new book.*

## AMERICAN GAME BIRD SHOOTING

By **GEORGE BIRD GRINNELL**

This companion volume to "American Duck Shooting" treats of the upland game which American sportsmen shoot over dogs—woodcock, snipe, all the quail, grouse and turkeys.

The first part of the volume is devoted to a description of the various species and their habits—the way in which they live their lives.

The second part of the book is devoted to upland shooting and treats of the methods by which all the upland birds are pursued and taken. The chapter "Aids to Shooting" describes the clothing, guns, and loads and dogs that the gunner may profitably use; while the last section of the book treats of the shooting of the future and the efforts to rear our native quail and grouse in domestication.

The volume is illustrated by colored plates of ruffed grouse and quail, and 48 full page portraits of different game birds and hunting scenes, with a number of cuts in the text.

*Cloth. About 575 pages. Price \$3.50, net. Postage 25 cents.*

This book is of inestimable value. It contains the genuine hunter-naturalist facts given in the most entertaining and interesting style.

**FOREST AND STREAM PUBLISHING CO., 127 Franklin St., NEW YORK CITY**

**Pistol Legislation in England.**

In the House of Commons on a recent day the Home Secretary, replying to Mr. Joynsin Hicks, said the Government hoped to be able next session to introduce a bill regulating the possession and sale of pistols. Mr. McKenna added that he trusted the measure would be treated as uncontroversial. The need for further legislation has again been brought into prominence through the recent attempt upon the life of Sir Edward Henry, Commissioner of the Metropolitan Police. For some considerable time past the matter has engaged the attention of the home office. The existing Pistols Act, passed in 1903, had for its chief object the prevention of the use of pistols by children. Under Section 4 of that Act it is illegal for any person under the age of eighteen to buy, hire, use, or carry a pistol. Owners or would-be owners of pistols who are of maturer years are required at the time of purchasing the pistol to produce a gun license. The purchaser must also give his name and address to be entered by the seller in a "Pistol Register." The definition of a "gun" in the Gun License Act, 1870, "includes a firearm of any description." Under the Pistols Act of 1903 the purchaser of a pistol is required to produce the license which, under the Act of 1870, he was already bound to possess.

The exemptions in the Gun License Act are embodied also in the Pistols Act. They apply to naval, military, and police force, possessors of game licenses, unlicensed persons carrying guns for licensed persons, bird scarers, gunsmiths and common carriers. To this heterogeneous list must be added persons proceeding abroad to places where British gun licenses are not valid, and persons who merely desire to keep pistols in a dwelling house, where no license is required. A system of police permits, which in effect legalizes acts already legal, has been instituted to prevent abuse of the exemption clauses. A greater difficulty, in practice, is that persons who do not possess gun licenses, are not entitled to exemption, and do no claim it, are able with impunity to ignore the Act altogether. Flat, automatic pistols carried in a pocket are so easily concealed that the detection of offenses is found to be almost impossible. Pistols obtained in places where the Pistols Act does not apply are not less dangerous than those obtained in England. There is no urgent need for imposing further restrictions upon those who observe the law and do not commit offences. The legislation proposed should be of such a character as to defeat the practice of those who are able to set the existing law at defiance.—London Field.

**Fly-Casting at Sportsmen's Show.**

Trapshooting's twin feature in the next Sportsmen's Show, which will open Feb. 27, in Madison Square Garden, will be the Anglers' casting competition of fly and bait-casting. The chief innovation from conditions of the two preceding annual Sportsmen's Shows will be transposition of the casters' tank from the eastern end of the arena to the western half of the northern balcony. This year the anglers can make a daily program that will run from the time the doors open until they close without having to give way to trapshooters, cowboys, boy scouts or burros in the cañon and plains of the show's big scenic stage. The director of the casting tournament committee will be David T. Abercrombie, who, counseled by a tournament committee, will formulate all plans for the coming contest. Among the famous anglers already interested are John Doughty, E. M. Gill, C. C. Levinson, A. Jay Marsh and Walter McGuckin. The general committee includes the tournament committee and the following: Julius H. Seymour, Fred T. Mapes, William C. Metcalf, Jansen C. Lamison, D. W. Poor, Harold G. Henderson, Arthur C. Rice, Warren Miller, George La Branche and Herbert S. Smith.

**A COLD AND FOGGY MORNING IN CAMP**

This is another of the Camping Series. It is hard to give a real idea of the beautiful coloring of this picture. You can almost feel the cold, damp, foggy air upon your cheek as you look at it. There's a snap and dash of realism about the Camping Series that is irresistible. It's yours at 50 cents each, or four for \$1.50, or see special offer.

**From New Bern, N. C.**

Many New Bernians, who remember Charles Hallock as a winter resident of this city some fifteen or twenty years ago, may be interested to know that he is alive and hearty still, though nearly eighty years of age. He resides at Northampton, Mass., whence he wrote recently to FOREST AND STREAM, the well-known weekly journal of outdoor life, founded by him in 1873, acknowledging its Christmas greetings and congratulating the editors on its continued and deserved prosperity.

It was through Hallock's articles in the FOREST AND STREAM that the writer became acquainted with the advantages of New Bern as a winter resort, and although the old Chat-

tawka Hotel did not quite measure up to his somewhat idealized description of its table and accommodations, the writer will always feel grateful to him for having called his attention to the town in which he has spent twelve consecutive winters, and hopes to spend as many more.  
J. L. K.

**Arsenic That We Eat.**

It is known that arsenic exists normally in the tissues of the human body without doing harm. It is a constituent of peas, almonds and beans. Fresh lettuce, says Harper's Weekly, though rich in water compared with almonds and beans, reveals scarcely less arsenic. The foodstuffs poorest in arsenic are the banana, chestnut and leek.

## By Paddle and Portage in Algonquin National Preserve

By S. E. SANGSTER (CANUCK)

**T**HERE are still a few stretches of untrammeled Hinterland yet to be found in Canada, but much of this so-called wilderness lies over the Height of Land and is practically inaccessible for the average tourist who has only an all-too-brief vacation coming to him. In the Algonquin National Park, Ontario's immense 2,000,000-acre forest and game preserve, however, we find this obstacle of inaccessibility absolutely removed. The glistening steel of the G. T. R. "Ottawa" Division cuts through the park about a third way up from its southern edge, and situated thereon we find two splendidly equipped inns, one at Joe Lake and the second at Cache Lake (Algonquin Park Station); and at each of these two points we also may obtain complete outfitting supplies from canoes and guides down to the smallest items of the provision pack.

Possibly there are other canoeing and fishing territories as virgin and offering much that

is worth while—but they are away in sections hard to reach, and they offer nothing not found in the National Preserve. With its thousands of ideal lakes and streams, "made to order," as it were, for the vehicle of the "silent places"—the canoe—stretching away into the interior, each lake leading into another, the streams between gleaming like silver threads as they wind their silent, tortuous path around the mountains, the great spruce and pine-clad heights overshadowing all, no summer playground on the whole American continent can "show anything" on this great work of the Almighty.

Likewise the fishing is, and would be expected, the kind found in waters which are naturally the home of the trout, and that have been properly protected, absolutely nothing being permitted but rod and line. The trout species are there, the delicate pink-fleshed speckled beauties running up to 2½ and 3 pounds, the gray or lake trout averaging from

3 to 26 pounds, and their cousin, the black-spotted salmon or red trout, often being taken as hefty as 12 and 20 pounds—occasionally over this. And, let me whisper, oh! brother angler, these salmon beauties are no sluggards; they live in the ice-cold lakes of this wild Laurentian country, and they fight like—well you have all you can handle when you connect with one. Of course, when the heat of July and early August has tempered the surface water, the big ones retire into the deep sinks and crevices, with which these lakes are filled, and consequently one has to go down after them with heavy tackle—but from an extended experience I feel justified in claiming one can catch as large salmon and have all the fight he is looking for at any time between early May and the middle of September. "Nuf ced."

Upon leaving "steel," either at Joe Lake or at Cache Lake, one has the choice of a multitude of outing routes open to him—so varied

SCENES IN ALGONQUIN NATIONAL PARK.

and so many, indeed, that one could devote many pages to description of each. If, however, the new arrival does not intend making one of the permanent inns his headquarters, I would suggest that he and his party outfit and strike off on the northern route. A great many people go up to Algonquin Park, but aside of those who simply stay at the two hotels, very few get further into the interior than Smoke Lake to the south, or Island Lake in the north. If you will take my advice—and it is well meant—you will plan your trip for at least ten days or two weeks and hike away beyond Island Lake, through the Otter Slides, Red Pine and Burnt, to Cedar Lake and even further. Drop into Lake Lemeure, en route, for a day or two, and go after salmon trout; you will get them here aplenty—big fellows, full of fight, and you will, at the same time, find unsurpassed camping spots where the view is grandly virgin, and where there is nothing but the wild things of this vast wilderness to be seen. Overhead, perhaps, a lone seagull soars on outstretched pinions, while away yonder at the far end of the lake a pair of parent loons send forth their wild laughter. Probably, when all is still and you are comfortably reclining in the canoe, your trolling outfit cleaving a golden thread astern, your guide will suddenly bring to notice a deer, perhaps two or a little herd, somewhere along the shore line. Then, just when the excitement of paddling up on these is over, you have a vicious tug and the fight is on with a lusty salmon to a finish. Can you ask anything better than such a life for your all-too-short vacation?

Then, after a visit to the lumber supply station on Burnt Lake, if your provision bags are getting light, you point north and east again and steadily push onward toward the northern edge of the preserve. Each lake you enter possesses a charm all its own, each has its individual shores and attractions—each time you will exclaim in admiration and never will the days seem long or the trip grow uninteresting.

When you weary of trolling for the lake and red trout, the speckled beauties lose their power to draw you from your bed at dawn, then you can try out a new stunt, perhaps, that of live-game photography. Nowhere on the continent can this ever-fascinating game of kodak-shooting be essayed with such opportunities for success. The whole preserve is full of deer and other furred animals. If you are wise you will include in your dunnage, when leaving civilization, some flashlight sheets and a reflecting outfit for night use. After dark on any of the lakes you traverse you can, on a quiet night, paddle along the shore line and have your chance at flashing a dozen different species of the wild animal life here found. You sit in the bow of the canoe, your flashlight outfit rigged before you, your kodak set, and silently as the shadows your guide drives the little craft through the deathly silence. Overhead the heavens seem drawn up and pinned by the stars, while out in the deeper water the silver moonlight gleams. Far ahead you hear a rustling and crackling of twigs, and your nerves jump several scales up in tension. Quietly, oh so quietly, you slip through the water—then your guide throws the jack on perhaps a lone buck, perhaps several deer together, and you pull the trigger of the flash-

light and it is all over. Far away a loon flings forth its weird night cry—so lonesome and ghostly that shivers run up your back—while a whip-poor-will warbles on the opposite shore. "By jove," you exclaim, as a whopping trout jumps close to the bow of the canoe, and then, when the bottom grounds at the little camping spot, you feel at liberty to light up your pipe and ponder over the nights' experience.

But—even though you do not care to bother with the necessary requisites for night photography—you can have unlimited "shots," at deer in particular, during the daylight. I have counted, in two hours' paddle from the Hotel Algonquin, Joe Lake, on a Sunday afternoon, perhaps seven miles in all, fifteen deer and a black bear. On the northern route as many as forty deer have been started along the lakes and streams in two days' going. Porcupines are a daily sight and a nightly nuisance, fox are nightly prowlers around one's camp when there are fish to tempt them. Often, in the northern portions, one hears the long-drawn howl of the wolf pack as they trail over the mountains in search of their kill, while much interesting and instructive beaver lore may be had by quiet and patient watch at one of the beaver dams on dozens of the little streams. Animal life and game photography! Well, certainly I have never as yet found that section where it can be better located than in this Hinterland.

In a trip over this northern section lasting from ten days to two weeks, a party can visit anywhere from twenty to forty lakes and streams, depending on the amount of time devoted during the cruise to fishing and loitering at camps, and the outfit carried along. As already stated, these waters are unsurpassed for the canoe cruiser, and the situation of being wind-bound anywhere is practically unknown. Leaving out Smoke Lake, south of the railway, and Island and White Trout lakes, on the northern route, the winds never kick up sufficient sea to cause any anxiety, although one can make the best of use of his knowledge of handling these craft.

One of the great beauties of this virgin summerland is that the fair sex can safely be taken along. A great many bring their wives to the Algonquin National Park and leave them at either the Hotel Algonquin at Joe Lake or the Highland Inn at Cache Lake, and go into the interior themselves. However, more and more are they taking their ladies along with them, and personally I know of no better health and pleasure-giving vacation for the mesdames than two weeks in the heart of the preserve. If there is any red blood in them—and generally they have just about as much as the average male—they will enjoy every minute quite as much as their lords and masters.

In conclusion I desire to state that nowhere on the Continent, between the Atlantic and the Pacific, from the Gulf of Mexico to the Height of Land, do I know of a playground offering attractions in their purely natural states as in the great Hinterland, with ease of access, virgin fishing and all the other genuine inducements, surpassing this grand territory officially known as the Algonquin National Forest and Game Preserve.

#### Some Routes Outlined:

No. 1 ROUTE, which probably offers the best

there is in the shape of an extended cruise over good going, grand scenery and the best of fishing, may be outlined as follows:

Putting in at Joe Lake Station (where there is a fine inn and well-stocked outfitting store, operated by L. E. Merrell), passing north and east through Joe and Baby Joe lakes, down a creek into Little Island and Big Island lakes; thence over a portage of some 400 yards into Little Otter Slide Lake, connecting with Big Otter Slide, thence a short portage into the Petewawa River, which winds in short and long sweeps to White Trout Lake; north straight across this lake and a short portage of about 200 yards into Longer Lake and down a short narrows with a little rapid into Red Pine Lake. Here go east over a portage of 120 yards into Lemeure for a fishing side-trip; returning, pass on north into Burnt Lake (where a lumber camp supply store enables the refilling of provision supplies). On straight north through the Cedar and Catfish lakes right to the north edge of the park on the Amable du Fond waters. Return as far as White Trout Lake, thence cutting a little east down through the big Opeongo Lake waters, which will bring one out at Rock Lake Station, some twenty miles each of where the start was made. This is one grand cruise for a three-week outing. Fishing is essentially lake, salmon and speckled trout; going excellent, portages well marked and open.

No. 2 ROUTE strikes south from Joe Lake, passing through Canoe Lake, thence into Smoke Lake (where the G. T. R. System are this season operating a most comfortable log-cabin camp). The route continues southward through this big lake over a short but steep portage into Ragged Lake, from which you can either go over into Big Bear Lake or on into Crown Lake over a long but open portage of over a mile. Crown Lake is noted as one of the lakes of the Highlands for big speckled trout, and good sport is assured during the entire summer season. Big Bear Lake is also excellent trout water; the camping sites are everywhere all along the route—the party could, if desired, stop over one night at the G. T. R. Camp-Inn at Smoke Lake. Distance each way about twenty-two miles. Trip can be cruised in four days, but would recommend allowing at least ten days.

ROUTE No. 3.—From Joe Lake north through Buck, Fawn into Doe. Especially good for May and early summer fishing for lake and salmon trout (illustration shown herein is a salmon trout from Doe Lake that was caught late in May, weighed 17½ pounds). Continuing from Doe Lake into Little Bear Lake and out by way of McIntosh Lake down to Canoe Lake station, or eastward out by way of Island Lake and back to Joe Lake Station. Excellent fishing; good going. Time required from two days to a week.

ROUTE No. 4.—From Cache Lake (where there is also excellent inn and outfitting store) through Cache, Cranberry and White lakes out through Source, Hilliard and connected lakes into the Madawaska River, which can be followed for miles. Excellent speckled and gray trout waters, also small-mouth black bass in

*Continued on page 218.*

# The New Tell-at-a-Glance Game Law System

Washington, D. C., February 5, 1913.

Editor *Forest and Stream*, 127 Franklin Street, New York City.

Dear Sir: I am enclosing herewith sample of three cards which the Biological Survey has recently published for general distribution, showing the present status of the legislation on the subjects of resident hunting licenses, the law protecting does, and the organization of the Warden Service of the various States. Copies of these cards may be had upon application.

Very truly yours,

T. S. PALMER, Assistant Chief, Biological Survey.

**T**HE shaded areas show the States which have provided State officers for the enforcement of the game laws.

In 25 States (dotted) the work is in charge of a single officer.

In 18 States (ruled) the work is intrusted to a Commission of several members.

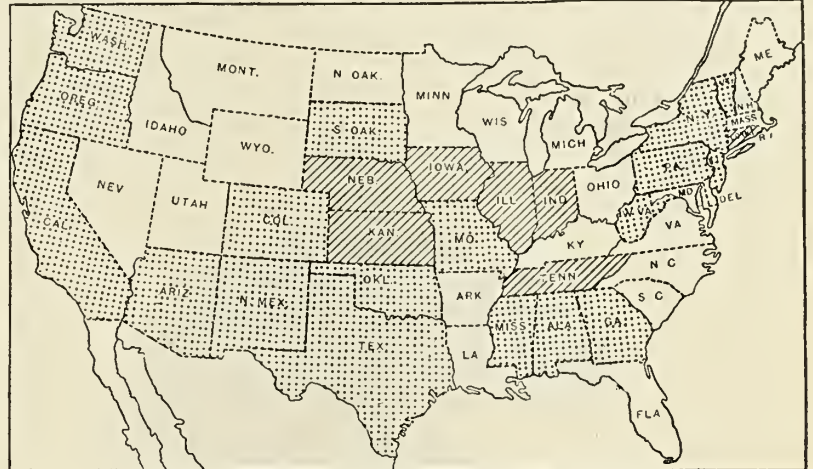

In 5 States, Arkansas, Florida, Mississippi, Nevada, and Virginia, the duties are performed by local officers.

The first game commissions were those of New Hampshire and California, organized in 1878. The first State wardens were those appointed in Minnesota, March 8, 1887; Michigan, March 15, 1887; and Wisconsin, April 12, 1887. The first salaried wardens were appointed in Michigan and Wisconsin in 1887.

The game commissioner of Alabama is elected by the people; elsewhere State game officials are appointed by the governor.

The duties of the commissions of Illinois, Maryland, North Carolina, Pennsylvania, Rhode Island, South Carolina, South Dakota, and Wyoming are restricted to game; those in other States include the protection of fish, and in Michigan, New York, Tennessee, and West Virginia the protection of forests.

Issued by the Biological Survey, U. S. Department of Agriculture, January, 1913.

States which had laws protecting Does throughout the year in 1912.

**R**ESIDENT hunting licenses are now required in 36 States and 7 Canadian Provinces.

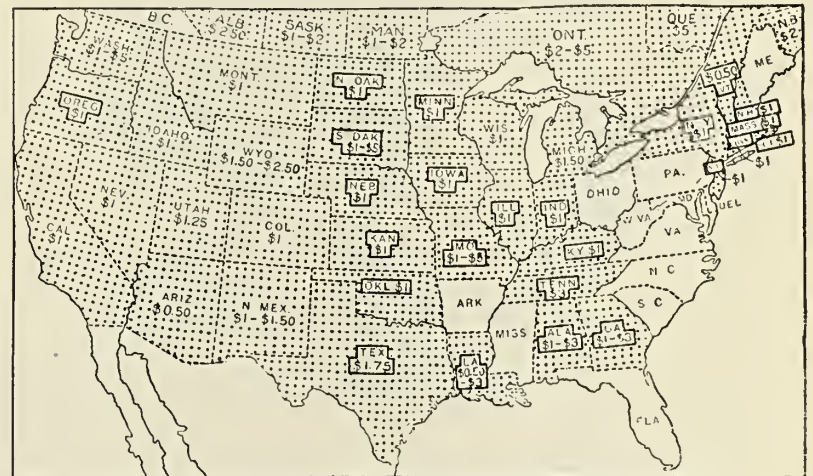

In Michigan, Alberta, New Brunswick, Ontario, and Quebec, these licenses are required only for hunting big game, and in Tennessee only for hunting on land without written permission of the owner

In 24 States, following the French method, landowners are permitted to hunt on their own property without license. (These States are indicated on the map by black lines inclosing their names.)

In 12 States, mainly in the West, following the English method, everyone who hunts is required to secure a license.

In Connecticut, New Jersey, New York, Oklahoma, and Rhode Island an additional fee varying from 10 to 25 cents is charged for the issue of the license.

From *Farmers' Bulletin 510, Game Laws for 1912.*  
U. S. DEPARTMENT OF AGRICULTURE.

States and Provinces which required residents to obtain hunting licenses in 1912.

**T**HE shaded areas on the map show the States in which Does are protected throughout the year, the white areas in which Does may be hunted during the open season.

All deer are protected throughout the year in the ruled area, including 8 States and Long Island.

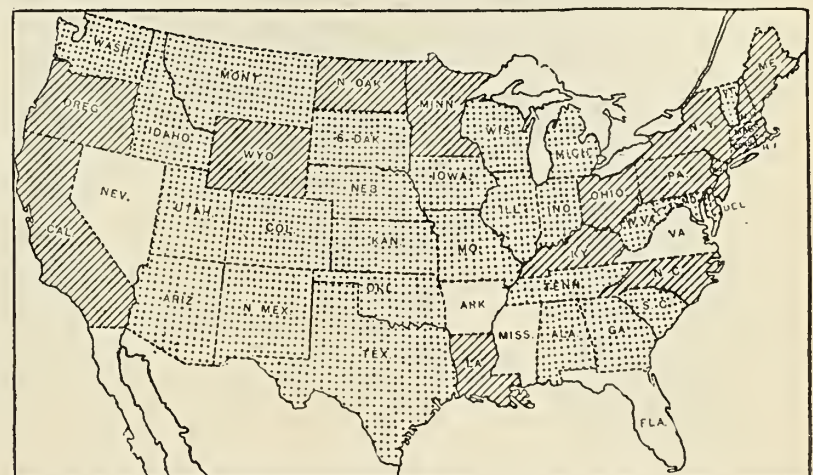

Does are protected throughout the year in the dotted area, including 18 States.

Delaware and Ohio have no wild deer and no deer laws.

The first Doe law was enacted in California in 1883. Similar laws were enacted in Arizona and Vermont in 1897, and in Colorado in 1899.

The laws of Colorado and New Mexico require that deer killed must have horns; those of New Jersey and Pennsylvania that the horns must be visible above the hair; those of New York and Vermont that the horns must be at least 3 inches long; and the law of West Virginia that the horns must be 4 inches long.

Issued by the Biological Survey, U. S. Department of Agriculture, January, 1913.

States which had game commissions or wardens, January 1, 1913.

# Frank Forester

## A Man with a Wonderful Versatility was Henry William Herbert

By RALPH PENBROOK

**H**ENRY WILLIAM HERBERT, of all writers most gifted in his equipment to charm the lover of nature and field sports, was in his day the leader of them all. He was born in England in 1807 of distinguished parents, the son of Rev. William Herbert, Dean of Manchester, who was the second son of the second Earl of Carnarvon, a younger branch of the house of Pembroke. Young Herbert was sent to a private school near Brighton, when, after a year, he was transferred to Eton, at which school he remained five years. From there he entered Cains College, Cambridge. While at this university he was surrounded by

a gay coterie of young commoners, who were attracted by the aristocratic bearing of the new acquisition, and who was in no wise loath to join their ranks. He was not in a condition financially to move in such fast company, and in order to maintain the pace they set for him, committed the grave error, which has before and since that time led to disaster; boating, racing, steeple chasing, shooting and kindred pursuits do not as a rule prove to be the ideal diversions for a young man immersed in the duties of getting an education.

However, in young Herbert's case, his quick and accurate conception, wonderful adap-

tation for study, his powers of analysis, his phenomenal talents in the acquisition of and the assimilation of knowledge, enabled him, notwithstanding all the adverse and distracting influences to make such progress, astonished none more than the professors, so that he won several scholarships and prizes, graduating in 1831 with a distinguished record. After spending a few months in England after his graduation, his yearnings for "fresh fields and pastures new" prompted him to seek them in the United States.

He arrived in New York in the fall of that year. His first employment was in a private school, which at that time stood in Beaver street near Broadway, as a teacher of Greek. During this occupation he found time to write occasionally for the press, and "doing" the reviews for the old *Courier and Enquirer*, where he soon won reputation as a keen and trenchant reviewer. This was congenial employment and assisted to develop quickly a decided taste for literary pursuits. In 1834 he wrote his first historical novel, "The Brothers; A Tale of the Froude," which was favorably received and proved very successful. Shortly after this he became connected with the *American Monthly Magazine*, at times doing all the literary work. In this connection he was associated with Charles F. Hoffman, to whom the magazine was afterward sold.

A little later, about 1837, he established, jointly with three others, a new magazine called the "Magnolia." This is said to have been the first magazine ever printed in America on the system of entire originality, both of literary matter and illustrations, the latter being entirely the work of American engravers, after designs by American artists. It survived two years, and during the whole of this time a considerable portion of the matter was furnished by Mr. Herbert. His second attempt at novel writing was "Cromwell," published by Harper, and scored a success, though owing to the panic of 1837 to 1838, it did not reach so large a sale as "The Brothers." Another story followed in 1843, a story of the English civil wars, with the title of "Marmaduke Wyvil," which was published simultaneously in New York and London. It was evident from the cordiality of the public's reception of Herbert's books that the new star had found a friendly and an admiring world to shine upon. During these few years of literary work the young man had found time to indulge his taste for field sports, for which the country over in Jersey and in Orange county, New York, offered rich and ample opportunity.

It was in 1840 that he adopted the sobriquet Frank Forester, and over this pseudonym he published with marvelous rapidity the stories which made that name famous in his own time, and still remain the fascinating tales of a hunter who knew the life from the ground up. His "Ringwod the Rover," "Warwick Woodlands," "My Shooting Box," "The Deer Stalkers," captured young and old alike.

It has been said of Frank Forester's stories, that the tendency in them to dwell with unseemingly and unnecessary unctious upon the pleasures of the table, the mysteries of the kitchen, and the marked flavor of the punch-bowl, detracts from their merit, and his best friends are willing to concede that a just elimi-

From an etching, 1850.

nation of these features would have been wise. Especially is this view taken at the present time. There is a growing sentiment becoming stronger and more decided among gentlemen sportsmen that the brandy and whisky flask is by no means indispensable to an outfit for a day's or week's sport in the field or forest.

Frank Forester had many noble qualities, but being human, and withal trained in the English methods, learned in his native land, it is not altogether strange that among the good impulses there should not be found some serious faults. Did not Shakespeare strike the note when he said: "The web of our life is of a mingled yarn, good and ill together; our virtues would be proud if our faults whipped them not, and our faults would despair if they were not cherished by our virtues."

But his best work was not, by any means, in the line of sporting adventures. His talents found play in the whole field of literature. His "Cavaliers of England," and the "Chevaliers of France," "The Roman Traitor," "The Knights of England, France and Scotland," "The Captains of the Old World," "Henry VIII. and His Six Wives," "A Metrical Translation of Prometheus and Agamemnon of Aeschylus" are some, but not all, that serve to illustrate the wonderful literary gifts of the great author-sportsman. As a fisherman he enjoyed the same illustrious record, for he had fished as well as hunted in nearly every State in the Union, then accessible, from Maine to Maryland, south of the Great Lakes, and from below Quebec in the St. Lawrence and its tributaries to Sault Ste. Marie; his "Fish and Fishing in North America," "Game in its Season," etc., are not to to-day to be shelved as "dead wood."

He was unfortunate to have been born before the great expanse of game land west of the Missouri had been opened up to the world. He wrote of the noble sport among the hills and plains intelligently, but he had never by personal experience been able to gratify what must have been a continuing desire to "draw bead" on the game animals which even now are becoming only a memory.

When Herbert dipped his pen in the "ink of the bards"—which he seldom did—the result was such as to justify the expectation that a man in whose mind and heart all the graces of the nature lover ran riot, should not be lacking here. The following introduced his "Upland Shooting":

It is brilliant autumn time, the most brilliant time of all,  
When the gorgeous woods are gleaming ere the leaves  
begin to fall;  
When the maple boughs are crimson and hickory shines  
like gold;  
When the country has no green but the sword grass by  
the rill,  
And the willows in the valley and the pine upon the hill;  
When the pippin leaves the bough, and the sumack's  
fruit is red,  
When the quail is piping loudly from the buckwheat  
where he fled,  
When the sky is blue and the river clear as glass,  
When the harvests all are housed and the farmer's work  
is done,  
And the woodland is resounding with the squirrels and  
the gun.

The London Field says: "FOREST AND STREAM, the New York paper, deals more fully with shooting and fishing than any other in America."

## Boone and Crockett Club Annual Meeting.

THE annual meeting of the Boone and Crockett Club was held Wednesday, Feb. 5, at the University Club, New York, at 7 o'clock in the evening. Something over fifty members were present. Major W. Austin Wadsworth, of Geneseo, New York, the president, occupied the chair.

The most important business of interest to the general public was the presentation by Charles Sheldon, chairman of the Game Preservation Committee of the club, of his report for the past year. It was divided into various sections, dealing with the work of the year, the game situation, and recommendations for the future.

At the last annual meeting the Game Committee recommended that the club's work be devoted especially to the establishment of game refuges, and later in the year the Executive Committee appointed a Finance Committee to raise funds for the carrying out of this recommendation. Many members responded, and a sum was raised, sufficient to make a beginning of this work. A bill was introduced in Congress, authorizing the President, on request by the Governor of any State, to set aside in any forest reservation within that State an area not to exceed 50,000 acres as a game refuge, to be put under the charge of the Secretary of Agriculture. The situation chosen for the first refuge was the Sitgreaves National Forest in Arizona. The bill was introduced in the Senate and House so late that it could not come to a vote during the last session, and during the present short session it was not likely to receive attention, and it could not become law for a long time.

In view of this fact, the chairman and another member of the Game Preservation Committee recently visited Arizona, had an interview with the Governor, and suggested to him the establishment of a State refuge, covering the same area that the club had chosen for a Federal reservation, if such a law should be established. If the State would establish such a refuge, the Boone and Crockett Club would contribute toward the expense of stocking it.

Governor Hunt received the suggestion with interest, as did a large part of the population of the State. A bill was introduced at the Legislature, which only assembled a few days ago, setting aside the desired territory; eighty elk, promised by the Biological Survey, have been delivered, and the people of Arizona have paid all the expenses of bringing the elk on to the ground. The Game Committee had promised, in case this reservation was established, and the elk brought there, that it would contribute the sum of \$2,500 toward building a fence, buying hay, and hiring a man to look after the elk through the rest of the winter; but so great was the interest of the people of the State that all this appears to have been done already, without any assistance from outside. It is even reported that plans are being made in Arizona to establish another State reservation, in another locality, to which the Boone and Crockett Club may be permitted to contribute.

The committee expresses the opinion that many of the measures proposed for enactment

in laws are not of a character to afford a permanent solution for the preservation of American game. "They lack the needed elements of variability and quick adaptability to diverse and constantly changing conditions." It urges better means of enforcing game laws in all States, laws for the non-sale of game, the establishment of game refuges, and the encouragement of game propagation. It also urges careful consideration of the following subjects: Laws including permissive close seasons, variable bag limits, and other necessary restrictions, but the laws should accomplish these ends by creating commissions for the preservation of game and investing them with elastic powers and full responsibilities. Such commissions should have full authority to make or unmake, lengthen or shorten close seasons; to increase or decrease bag limits; to set aside and entirely prohibit shooting on areas of land or water necessary for feeding grounds of wild fowl, shore birds, game birds, or animals; to establish rest days, on which neither game nor water fowl can be disturbed; in fact, full and complete power to establish such constitutional regulations or restrictions at any time, or in any section, independently, as varying and changing conditions may require, adequately to conserve the game.

After the election of officers, the annual dinner was held, after which Cherry Kearton exhibited his wonderful moving pictures of game and wild creatures in various parts of the world, North America, East and West, Africa and Borneo. These pictures, taken with a new camera devised by Mr. Kearton, are the most wonderful that have ever been shown, and were greatly enjoyed by the diners. They were accompanied by a running talk dealing with sports, natural history and travel, and were of extraordinary interest.

Among those present were: Royal Phelps Carroll, Col Caswell, Mr. Crosby, Winthrop Chanler, W. Redman Cross, Charles Stewart Davison, H. Casimir deRham, Dr. W. K. Draper, J. Coleman Drayton, Deforest Grant, Madison Grant, Henry G. Gray, Geo. Bird Grinnell, Arnold Hague, Geo. L. Harrison, Jr., Dr. Walter B. James, J. H. Kidder, C. Grant LaFarge, Dr. Alexander Lambert, Percy C. Madeira, Townsend Lawrence, Dr. Louis Rutherford Morris, George D. Pratt, John J. Pierrepont, Dr. Paul Outerbridge, John Hill Prentice, A. P. Proctor, Percy R. Pyne, Theodore Roosevelt, Dr. John L. Seward, Charles Sheldon, Dr. William Lord Smith, Major W. Austin Wadsworth, J. Walter Wood, Gen. Geo. S. Anderson, Dr. Wm. T. Hornaday, Dr. C. Hart Merriam, Prof. Henry Fairfield Osborn, Dr. Chas. H. Townsend, Carl Akely, and others.

## It's All a Matter of Training.

AMASA, Mich., Feb 2.—*Editor Forest and Stream:* I have been much interested of late in reading the articles concerning the Airedales that have appeared in FOREST AND STREAM. I believe nothing has been said of these dogs as hunters and retrievers of game birds. Perhaps you are in position to give me some information as to what these dogs can do in this line.

Should you not have the necessary information at hand, would you kindly refer my letter to someone whom you know would be in position to answer.

R. P. VANSAW.

# Harking Back

By CHARLES CRISTADORO

MR. WEBBER'S reference to the call of the "Red Gods" takes me back to the pages of *FOREST AND STREAM* of years ago. How many of my readers remember the "Red Gods," "blackened timber," "shingled beach," "iron-shod canoe poles" and the "roming round the bend" controversy? The then editor inserted Kipling's poem and Fred Browne arose to the occasion and boldly asserted that Kipling did not know what he was writing about. And then the war was on. How the ink flew! Issue after issue gave the views of others, all in support of Rudyard, and, of course, against Browne. The editor threatened to shut off the discussion, but yet they came. It crystalized into one question finally as to whether canoe men ever used an iron-shod canoe pole or not. To give room in the paper for aught else, the lid was clapped down good and hard on the discussion, and to this day the question as to whether a canoe pole is iron-shod or not has never been authoritatively settled.

But it surely was a merry war while it lasted—and everybody who read the paper seemed anxious to get into the game and down Browne. But metaphorically backing up to the question, he exclaimed that—

This rock shall fly  
From its firm base  
As soon as I,

and he held on to his iron-shodless canoe pole theory to the last until the editor rang down the controversial curtain.

We had about then the Limburger and mallard mixup, for which the writer was responsible. Vividly describing how a discarded empty tin of Limburger, thrown carelessly upon the pass, spoiled a part of an afternoon's duck shooting, until, it being buried, all went well, a controversy was started upon the question as to whether a duck smelled or not, or more specifically, whether a duck could smell, or, better still and more specific yet, whether the olfactory nerves of a duck were sufficiently developed to enable it to smell.

Coahoma (I wonder if he is yet with us on this side of the Silent River), who was the snake-story contributor from Mississippi, if I remember correctly, seemed to seriously regard my Limburger-mallard yarn and go into the question scientifically as to whether that odoriferous tin of Limburger was actually located a hundred or more yards away down the pass, and was the real cause of the phenomenal divergence of flock after flock of greenhead led birds, who otherwise would have come straight over the blind. It was great fun while it lasted, even if it did bring Coahoma and the writer into the *FOREST AND STREAM* court in a friendly law suit. I think the editor, who was an old seasoned duck hunter, decided that ducks had not the power of scenting the enemy, but made up in seeing what they lacked in smelling.

## UNIQUE GUIDES.

What a book could be written on guides and their ways! One I remember in particular which the old man, who fished and hunted with me, said should have been a banker and not a

guide. He was out of his calling. This guide in question, although an expert fisherman and a great bait-caster, cared really nothing about the sport, yet he always took along his rusty old steel rod with its coffee-mill reel. There was a reason, and a good one. Gray bass go in pairs and in schools. If you caught one, you could surely count upon its mate, and if a third were caught, you could make up your mind you had a school of them to deal with. It was a matter of "feeling" for them along the sandy bars, finding them.

Our guide came out strong in this investigation work, for he had an arm like Hercules himself, and with heavy sinker and bait, he would hurl that line and set up a screeching of that loose old reel that seemed as if it would never stop. Here and there he would cast, and finding them at last, it was a matter of moving our boat in the right direction, which he promptly attended to. That rod never came into play after the fish were located. I never knew him to fish even when we were in a school and there were more than enough to go around. His enthusiasm long ago had oozed out from his finger tips.

A pompous patron sat in our guide's boat for the first time. All was in readiness to push off, lunch basket, frying-pan and coffee-pot snuggled away in the bow, and then before pushing off, the old junk rod was put into the boat last. The fisherman flared up.

"What's that? Take it out at once! I never allow my guide to fish under any circumstances! I'll do all the fishing that there is to be done! Take it out!"

The guide removed the basket, then his slicker and then the rod, and put them safely away, and then turning to his now more than interested guest, roughly ordered him out of the boat. He got out. The guide stepped into the boat and rowed up the lake. The guest thought it over, and in due course got back to town. And the old man, when the opportunity presented, told Charlie, the guide, he was meant for a banker and missed his calling in life. Just a case of misinterpretation and haughtiness on one side and lack of tact and loss of temper on the other.

## THE LAWYER FISH.

The same guide and a lawyer, an ex-judge, in the boat. A mudfish, peculiar more or less to that lake, was landed by the lawyer. It was an ugly creature, more or less combative and a persona non grata in the boat. After the fish had been dispatched and thrown overboard, the incognito lawyer asked Charlie the name of the ugly fish.

"We call that fish a "lawyer——"

"And why a lawyer, may I ask?"

"Well," replied Charlie, "he's one of those chaps that will sting you, take your pocketbook, the shirt off your back and even your hide, if he can get it."

After the lawyer had told that story on himself at the club in town and it had drifted back in course of time to Charlie, he denied that he knew the calling of his patron at the

time, but that did not alter the facts in the case. All of which goes to prove that the guide can be odd at times, as well as the sportsman, and perhaps more often the sportsman than the guide, as in the case of the man who could throw a fly and was bound to impress that fact upon his guide by repeatedly lengthening out his casts, only to be told by the guide who was "on," that it was mighty fine casting, but equally poor fishing, inasmuch as the trout pool was not more than thirty feet away from the boat and the caster was laying his flies in water a few inches deep.

## New Brunswick and Nova Scotia.

ANNAPOLIS ROYAL, N. S., Jan. 29.—*Editor Forest and Stream:* In your "Foreword" of this week you do me too much honor in calling me the man who put the "New" in New Brunswick as a popular big-game hunting ground. Of course you nodded and really meant Nova Scotia, a country with which I am very much more familiar.

A great many people have asked me to compare the two Provinces in regard to hunting and fishing. This comparison need not be odious, for both have many advantages. I might put it shortly thus:

Moose.—More in New Brunswick and heads run larger; easier to get your head, as the beasts are not so sophisticated, and have the habit of coming out on the shores of lakes and streams more or less regularly. It costs at least twice as much to hunt in New Brunswick as in Nova Scotia, where there is also good moose hunting, though it takes more skill to get a head. Nova Scotia is a good place to begin, and especially for the poor man. You don't have to go so far for a moose as in New Brunswick. The best place to start from is South Milford, near Annapolis Royal, though there are other good points.

Deer and Caribou.—No deer hunting yet in Nova Scotia. Fair hunting in New Brunswick. Caribou plenty in Northern New Brunswick and in Cape Breton, N. S., where the hunting of this beast was reopened last fall. Good heads in both places.

Bear.—More in New Brunswick, though a lot are got in Nova Scotia. It is always a chance if you get one, unless you run them with dogs or trap them.

Salmon.—New Brunswick has the call. Very uncertain in Nova Scotia. Fish smaller.

Trouting.—Good in both anywhere in season. Cheaper in Nova Scotia.

Canoe Trips.—Excellent in both, but especially fine in Western Nova Scotia, where everything is wild, the carries very short, and the network of waterways extraordinary, the ideal canoe country.

Tuna.—Near Sidney, N. S. There are tuna further south, but few have been landed, I believe.

EDWARD BRECK.

A FULL-BLOODED Chippewa Indian named Carlisle Kawbawgam, a graduate of the Government Indian School at Carlisle, Pa., has made a sensation in Berlin and Vienna, not as an athlete like Thorpe, but as a tenor singer. He is hailed by the critics as having a voice of the first order, and is called by them the "Red Caruso." He is now to study for grand opera in Berlin.

# GAME BAG AND GUN

## A Humane Rabbit-Trap.

USE a piece of strong twine for the noose, four feet in length. Tie a little loop in one end, and about ten inches from the other end double the twine and throw a loop, then insert a small stick, two inches long and as thick as a lead pencil, and draw the loop tight. Trim out a slender sapling about 1 or 1¼ inches in diameter at the butt, and where it tapers down to a half inch, cut it off. This is the spring-pole. Now tie the snare string firmly to the top of this spring pole.

Now, about 2½ or 3 feet from the butt, drive in a croched stake. Cut a bait-stick about 8 inches long, and as thick as a pencil, or lighter,

A BAITED RABBIT-SNARE.

and put a piece of sweet apple, turnip, carrot, or other tempting bait on it.

To set the snare, draw down the top of the pole until you can pass the short stick on the twine, under the crotch, and catch one end on the crotch and the other end over the bait-stick, which is held against the side of the crotch by the tension of the bent pole. A noose is formed of the loose end of the twine, and this is spread out square, about 9 inches in diameter around the bait, as shown, the rear supported by little twigs. In setting this, do not stand or sit directly in front of it, or the pole may suddenly spring up and hurt you. Stones about the size of bricks should be placed behind and at the two sides. If well made, the least interference with the bait by the rabbit will spring the snare, and the noose draws tightly about the rabbit's neck and lifts him from the ground. Ordinary seine twine will answer for this snare, but a slightly heavier and harder twine is better.

By driving the croched stake at the right place, the top of the spring-pole must be drawn in toward the butt somewhat, and this makes the snare more certain in action, as it throws the noose forward as well as upward. The bait stick must also be of such a length that the bait is brought outward almost to the front of the spread noose, or the rabbit will have his front

feet over the string when the snare springs, and it will catch him by the hind legs. This would mean, says the Hunter, Trader and Trapper, a slow death for poor bunny, whereas if properly set, his demise is sudden.

## Proposed Changes in Game Laws.

Explanation—Matter in Italics is new; matter in brackets is old law to be omitted.

STATE OF NEW YORK, No. 691, in Assembly, Jan. 30, 1913, introduced by T. K. Smith, read once and referred to the Committee on Conservation.

An act to amend the conservation law, in relation to the propagation of game and to the application thereof of fees for hunting and trapping licenses.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. Subdivision 4 of Section 185 of Chapter 647 of the laws of 1911, entitled "An act relating to conservation of land, forests, waters, parks, hydraulic power, fish and game, constituting Chapter 65 of the consolidated laws," as added by Chapter 318 of the laws of 1912, is hereby amended to read as follows:

4. Disposition of fees. The license fees above provided for shall be remitted by the city and town clerks on the first Tuesday of each month to the county clerk of the county, and such fees together with those received by the county clerk for issuing licenses from his office shall be remitted to the commission on the second Tuesday of each month with a schedule setting forth the name and residence of each license and the amount paid[, and shall by him be remitted to the State treasurer as are fines and penalties]. The commission[er] shall pay to each county clerk the sum of three per centum of the total amount of such license money received from such county clerk. *The balance of such fees, notwithstanding the provisions of the State finance law, shall be paid by the conservation commission to the propagation commission. The commission shall consist of a member of the conservation commission, to be designated by the commission, and two additional members to be appointed by the governor and to hold office during his pleasure. The members of such propagation commission shall receive no compensation for their services as such, but shall be entitled to their actual and necessary expenses incurred in the discharge of their duties. The propagation commission shall appoint such number of clerical assistants at such compensation as may be fixed by the conservation commission. The propagation commission shall have all the jurisdiction, powers and duties of the conservation commission conferred or imposed by this chapter, respecting the propagation and distribution of game, and the conduct and control of game farms now owned or hereafter acquired by the State. All moneys received by the propagation*

*commission from license fees or otherwise, exclusive of the expenses of the commission as authorized by this section, shall be used and expended in such manner as the propagation commission may determine, exclusively for the propagation of game, the stocking and maintenance of game farms, and the distribution of game from such farms or otherwise acquired or reared in stocking the fields and forests of the State. The propagation commission shall be deemed a bureau of the conservation commission, and shall at such times as the conservation commission requires report to such commission respecting its proceedings and its receipts and expenditures under this section.*

Section 2. This act shall take effect immediately.

## More About Fur Seals.

NEW YORK CITY, Feb. 7.—*Editor Forest and Stream:* In your issue of Feb. 8, 1913, appears a letter on the fur seal question by Raleigh Raines. I regret to refer to the fact that this letter illustrates once again the deplorable misunderstanding of the facts that has characterized all the evidence presented by the advocates of a close season on fur seals. And still more, this letter contains statements directly opposed to undisputed facts.

Statement in letter: "After extensive hearings lasting several months, both House and Senate committees agreed upon a treaty with Japan, Russia and England whereby pelagic sealing should be suspended for a period of five years," etc.

Facts: July 7, 1911, this treaty was entered into by the United States, Great Britain, Russia and Japan. Under its terms pelagic sealing was abolished for fifteen years, during the life of the treaty. In August, 1912, an act to put full effect to the treaty was passed by Congress. This act contained an amendment suspending land killing for five years.

Statement in letter: "The House bill as passed provided for a close season of ten years, but the Senate committee reduced it to five years, to which the House agreed and the bill became a law."

Facts: Upon an exhaustive hearing the House committee on foreign relations reported the bill out without any amendment for a close season, and the bill was passed in the House without the amendment for a close season. The Senate committee to which the bill was referred held no hearing whatever, but this committee reported out the bill with an amendment for a ten-year close season, and the bill passed the Senate with the amendment.

The conference committee of both House and Senate reduced the close season to five years and so the bill was passed.

The President, who positively disapproved of a close season, signed the bill rather than sacrifice the treaty.

Statement in letter: "The evidence also

showed that the land-killing was almost equally destructive, as the unlawful killing of seals two years old and under at an age when it is difficult to determine the sex resulted in at least 50 per cent. of the young seals thus unlawfully killed being females."

Facts: It was not "unlawful," nor has it been so charged, to kill seals two years old. The "evidence" to the effect that land-killing is destructive to the seal herd is contained only in the assertions of one individual who has ever seen fur seals in the ocean. This evidence was supported by only a few other individuals, all of whom disclaimed any knowledge of the fur seal based on practical observations. The "evidence" as to killing yearling seals and pups and females is of a strictly similar kind. On the other hand, the evidence of every individual with the above mentioned exception, who has practically observed and studied the fur seal, agrees that properly regulated, land killing is conducive to the welfare of the seal herd. This evidence includes all of our ablest naturalists who have practically studied the question.

The "evidence" that yearlings and females, except for a few unavoidable and insignificant exceptions, have been killed by the agents of the Department of Commerce and Labor, is not sustained. In fact, the proof is positive that quite the contrary is the case.

The latest report on the seal herd made by Dr. David Starr Jordan and George A. Clark (Economic Circular No. 4, Bureau of Fisheries) is the result of the last investigation made after land-killing had been suspended. It deserves careful reading by all. This is the report to which Mr. Raines alludes, but it is clear that he has not read it with care, since it contains some of the above mentioned facts correcting his errors.

The fur seal question needs more attention from the public than has been given to it. But those bringing it to attention should at least state undisputed facts and thus clear the way for an intelligent consideration of the questions at issue.

CHARLES SHELDON.

### Old Clothes.

R. B. MARSTON, whose writings as editor of *The Fishing Gazette*, London, are famous for their erudition, had a little mental wrestle in his issue of Jan. 11 over the subject of old clothes brought about through a recent editorial in *FOREST AND STREAM*. The subject is so well handled that we print it herewith in its entirety including the cause of it all:

#### "Old Clothes."

"Have the days of old clothes gone by?" asks *FOREST AND STREAM*. "If so, the fun of summer living has passed away for all time. Time was when we went to the woods, our old togs were as essential as rod or gun. Now many sportsmen's resorts compel good clothes in the dining room and on the piazzas. Hotel proprietors, who know only formality and never have experienced the pleasure of baggy trousers, have an idea that the patrons demand style. A ballot from the guests would show that only suffragettes and wallflower resorters want 'glad rags' on the premises.

"Much has been done to ruin resort business by the Café de l'Opera suggestion. We all are willing to show our respect to the ladies, and

those that come with them, by 'dressing for dinner,' but the man who goes to a resort where fishing is good, goes first for the fishing, next for the food and bed, and last for any 'hit' he may make among feminine boarders.

"The hotel wise enough to advertise 'Old clothes may be worn here' will be popularized by real outdoor men and women."

I have often wondered what the American expression "glad rags" meant. One can see from the context that the editor of *FOREST AND STREAM* means those "best clothes" which one has to wear on festive occasions and at funerals. But just what "rag time" means I do not know. I wonder if even delightful Wilkie Bard does?

Since I wrote this, curiously enough I find in the *Field* an article by Captain Frank Wemyss on the same subject, and with the same title, "Old Clothes," in which he also sings the praises of the angler's favorite old fishing togs. There is no doubt that most of us do come to get a sort of affection for an old fishing coat or hat—for one thing I always know that even if I should leave my match-box at home, I shall be certain to find odd ones in one or other of the pockets, and if not there, then certainly two or three in the lining along with the rooks' feathers one has picked up for pipe cleaning, which have a wonderful way of making a hole in the corner of the pocket, and so leading a match or two astray. I think one of the most delightful of half hours is when a sudden thunderstorm drives you to take refuge in a shed in an orchard, from which you can see the river, and watch the birds and the queer ways of the fowl, and the delight of the ducks, while you have a smoke. And to find your only match is in the lining of your old fishing jacket adds to your respect for the latter.

R. B. M.

### The Bustard.

NEW YORK CITY, Feb. 1.—*Editor Forest and Stream*: The reference to the bustard in *FOREST AND STREAM* for Feb. 1 reminds me that I have several times had in my mind the idea of suggesting that the bustard be introduced into America. There are a number of species, some of them of enormous size, and of great value,

both from the viewpoint of sport and of adding to our food supply. Bustards from different latitudes would thrive all the way from Mexico to Canada if turned loose on our plains. It should not be at all difficult to secure specimens for the purpose.

In Hungary the bustard is one of the common game birds, and this particular species I think sometimes reaches a length of nearly four feet and a spread of eight or nine feet between the wing tips. Eggs, no doubt, could be obtained without any difficulty by the men who are engaged in importation of game birds, and who are in a position to correspond with collectors.

ROBERT T. MORRIS.

### Grit a Quail Necessity.

PACKER, Conn., Jan. 30.—*Editor Forest and Stream*: Winter is half gone and thus far has been very mild, indeed, with only one snow, and it laid less than a week. Our shooting season ended Nov. 23, with far more quail and ruffed grouse left for seed than last year, as has been the case for several years. Our cover is such that sportsmen simply cannot kill out these birds, and until another severe winter decimates the quail, they will keep on increasing. While last winter was very cold here, we had almost no snow and quail were unhurt. Over much of the west the cold weather was accompanied by snow and quail suffered greatly. I notice one writer, reporting from Kansas, says last winter was very severe, and many quail were frozen to death. He also says: "One discouraging thing about this was that some of the birds reported frozen were reported to have had their crops full of food." This is right in line with claims I have been making in the sportsmen's journals these thirty years that quail do not starve or freeze to death primarily, but die because they cannot get grit to grind the weed seeds which are easily gathered from the weeds reaching above the snow. Over thirty years since after a deep snow had been on the ground for about two weeks I took a walk to see how the quail were getting along. The day was pleasant, sun shining and snow melting. I soon found tracks of a bevy, and after following them a

AN ARGUMENT PRO OLD CLOTHES.

short distance noticed where one track had gone off to right of the others, and only a few steps away sat the bird in the snow apparently asleep. I walked toward it, but it made no effort to fly, so I tossed some snow at it. Still it did not fly. I picked it up dead, but still warm. I again followed the bevy, and soon found another dead, and then still another. When I found the bevy, the remainder were all able to fly, but no doubt died before next day. I went then to another field, a very weedy cornfield, with abundance of rag weeds and wild millet or foxtail. I found tracks of a larger bevy and again picked up dead birds at the side of their path, one of which had enough life in it to open its eyes, but to make no effort to get away.

It was very plain these birds had plenty of feed easy to get, and they could not be freezing to death when snow was thawing. At the time I did not think to examine their crops and gizzards to see if death was due to failure to get grit, but a later experience led me to attribute their death to this cause. That experience was in the use of poultry droppings to make liquid manure for plants in pots. I found quite a large percentage of the droppings consisted of gravel or grit. I had long known poultry had no teeth and ground their food with grit, but did not know the grit passed out with the droppings and had to be constantly replenished. Yet later I saw men unloading a car of grit for a large poultry grower, 500 bags of 100 pounds each for a single grower. Of late years I have spent many hours breaking up broken dishes, glass, etc., for my poultry. They are often far more greedy for this than any feed I can offer them, and this on a place where gravel is not at all scarce or difficult to get. I believe any reader of these lines who has poultry will find it an interesting experiment to break up some dish or queensware about the size of corn grains and toss it to his hens. And if the ground has been covered with snow for a week or two before, it will be all the more emphatic. All progressive poultry growers supply their stock with grit now, all supply houses having it for sale.

These are my reasons for believing quail die, not because of cold or lack of food, but from lack of grit with which to grind the food they can nearly always find on weeds above the snow. Therefore, I would advise all those who distribute food for quail in severe weather to include a liberal supply of medium size poultry grit.

Our deer are also increasing rapidly. I see them feeding in my fields often, and helping themselves to apples in the orchard. One came by the house a few days since, soon followed by two hounds. The fox hunters complain the deer are so plentiful that their hounds more often trail deer than foxes.

E. P. ROBINSON.

### Fox Hunting in North Carolina.

RALEIGH, N. C., Jan. 28.—*Editor Forest and Stream:* George McCullers, one of Wake's veteran fox hunters, whose home is at McCullers, eleven miles south of Raleigh, brought in to-day a very fine "brush," and it is of a fox which has quite a history. Three years ago Mr. Beale Johnson brought a couple of gray foxes from Florida, marking the ears of each.

Two weeks ago Mr. McCullers was out with his fine pack of hounds, and after an hour's run caught one of these foxes. The "brush" is uncommonly fine, and the animal, Mr. McCullers says, was a particularly handsome specimen and put up a game run.

Last Saturday Mr. McCullers and his pack were joined by Beale Johnson and his pack and by some other sportsmen. There was a stirring chase, lasting an hour and fifty minutes, when the fox was taken in the top of a pine tree. During the chase the fox was seen at least twenty-five times by different members of the party, and he put up a splendid run. This fox had been chased several times before, but has escaped by a very strange trick, this being running in front of a train. Saturday he tried the same trick, but was seen some distance ahead of the train, and the dogs contrived to drive him off the track and this was his undoing.

FRED A. OLDS.

### Tricks of Class Legislation Exposed.

BERKELEY, Cal., Jan. 21.—*Editor Forest and Stream:* Through its subsidized papers, the Hotel Men's Lobby at Sacramento falsely pretends that gun clubs have started the no-sale-of-game movement, intending thus to disparage it in the eyes of the people. Remember that the California Associated Societies have originated the bill introduced by Senator Flint. It is a measure drawn in the interest of all the people, and cuts out the abuse of public privilege by hotel men and market hunters.

A hotel man who argues on behalf of game to be sold to the "poor man" and then charges him for wild duck at the rate of \$1.50 to \$2.50 apiece is a curiosity—until you find out that this same hotel man at \$2.00 a duck can make a gross average of \$300 a week out of twenty-five ducks a day and have enough left to pay the hunter handsome wages!

Enlightened game legislation like that of England and Germany long ago provided against the destructive combination of hotel men and market hunters. A special fee and license are required of the man who hunts to sell game. The game dealer also must have a special license and "inkeepers" are expressly prohibited from holding hunting licenses.

But we allow these classes to lobby openly in Sacramento for the retention and enlargement of their special privileges which are utterly destructive of the public interest in game. Enlightened public policy demands the immediate enactment of a no-sale law, or the imposition of a severe handicap on the market hunter.

Remember that twenty-one States of the Union have already prohibited the sale of American-killed wild game. Most of those which remain have nothing to preserve. Is California going to lag behind? New York State, in opposition to the most powerful hotel lobby in the country, passed the no-sale law unanimously in the Assembly. Even Nevada has a no-sale law. In every case market hunters and hotel men have bitterly opposed this last and only check upon utter destruction.

If, as alleged, hunting has become too exclusively the privilege of "gentlemen sportsmen"—and gun clubs say this abuse should be regulated independently of the no-sale law—they may be required to furnish a certain percentage of the

bag limit for sale under tag; or it may be declared illegal to lease hunting privileges, compelling ownership of hunting preserves, or the baiting of ponds may be made illegal. These are matters for legislators to adjust from time to time. But the sale of game in the open market should be prohibited at once.

What became of the passenger pigeon, one time the most abundant game bird of the United States? Read Mershon's book on this bird, and you will find that market hunters and hotel men combined to bring about its extinction. One and a half million birds were killed and trapped at a few nesting sites in Michigan alone. When the matter of conservation was brought up, game dealers and hotel men urged against it the same argument which the hotel men's lobby in San Francisco is now putting forward. Last season one market hunter is known to have killed 280 band-tailed pigeons under one tree during one day's flight at Santa Barbara. The end of such policy is extinction of all California game just as the passenger pigeon is now utterly extinct.

Everyone interested in the conservation of wild life should urge his representative in the Legislature to work for the passage of the Flint bill to stop the awful slaughter of game for sale.

WILLIAM FREDERIC BADE.

### New Publication.

THREE WONDERLANDS OF THE AMERICAN WEST, by Thomas D. Murphy. Illustrated with sixteen plates in full color and thirty-two duogravure plates from copyrighted paintings and photographs. L. C. Page & Company, Boston, Mass. Price \$3.00.

This interesting publication contains the notes of a traveler on the Yellowstone Park, the Yosemite National Park and the Grand Cañon of the Colorado River, and a chapter on other wonders of the great American West. It will strongly appeal to travelers and lovers of nature who appreciate the inspiring wonders of the West—the land of weird mountains, crystal cataracts and emerald rivers, all glowing with endless play of light and color.

### How Much Does a Fish Shrink?

OAKLAND, Cal., Jan. 15.—*Editor Forest and Stream:* In your issue of Jan. 4 there is a rather facetious article under the above heading.

In a FOREST AND STREAM of several years ago I remember reading the following:

An old darkey went a-fishing one day, but for several hours had no success. Finally he landed an enormous sucker. Delighted with the catch, he sat down upon a sunny bank to contemplate it, when he fell asleep. Soon there came along another darkey, also engaged in the same agreeable recreation. He had quite a string of fish, but there was no sucker on his string that approached in size the one mentioned. Removing the big fish from the string of his sleeping compatriot, he substituted a small one from his own and passed on. Later on darkey No. 1 awoke, and his first thought was for his magnificent prize. Holding it in the air with a look of dismay, he exclaimed: "Golly, how dat sucker am swunck!"

Just how much "dat sucker am swunck" was not stated, but in estimating the shrinkage of fish, instances of this kind should by no means be overlooked.

FORKED DEER.

## Cold Facts and Dry Grins

By MIQUE WEBB

(Continued from last week.)

**T**HIS fish was the grouper, I was afterward informed, and you can always tell when you strike him, as he will come directly toward you every time, provided you are standing on a dock, or some other place under which he can hide. He frequents a pile of rocks or some place where he can retreat as an abiding place and feeds within a radius of from 50 to 100 yards from its base. The one that struck me, true to his habits, ran among the piling, covered with barnacles, which cut my line as soon as it was taut, or else the pain he caused me would have been much greater. I was advised if I wanted to catch grouper, I must throw out as far as possible from the dock, and when I hooked one, to reel in fast, taking up the slack as the fish came in. I tried, following directions, using cut instead of live bait. I soon had one but did not reel in fast enough, and he got away with my hook and snood. I had seven trials before I was successful, and then the boatman was responsible for the catch, as he gaffed the fish just as he came to the surface. I lost a hook and snood on each trial. My success was a small one of seven pounds. The shock on the taut line brought him to the surface, his tail touching the piling.

The grouper is a splendid fish, both to catch and eat. He is the best of all the bake fish. Much better than the red snapper. His flesh is a fine grain and very white, with a gamy flavor. He is the mule of the ocean. In pattern, much like our black bass, is heavily built and as quick as a cat. There is no skill required either in hooking or playing him. It is main strength that fills the grouper fisherman's bag. Your strength against his. I have caught many and cannot recall ever having missed hooking on a strike. I once went out to a sunken vessel in the middle of Tampa Bay, with a party of six. We anchored just off the wreck of an old vessel. One of the party weighed about 225 pounds. He was tall and powerful. During the day I saw our extra strong member bend his reel handle, which was on a heavy tarpon reel, trying to turn a large one. Our party lost over 100 hooks, and landed seven fish, the largest being of twenty-six pounds and the smallest seven pounds. I had the honor of bringing in the smallest, which is called the baby grouper. They are babies up to eight pounds. The babies are red, while above eight pounds they are dark slate. I like grouper fishing the best of all on any water.

On the third day I began to wish for some pleasant companions to share with me the great sport I was having, and as if in answer to my prayer, they came in that night. About 10 o'clock

we had a severe storm with rain and wind. A party of gentlemen had been to John's Pass, fishing for tarpon, and on this day started back for St. Paul. John's Pass was the inlet at the other end of Long Key, about seven miles distant. They had left this pass, going out or around the gulf side of the key, and had attempted to make Pass-a-Grille, this being the shortest and best route. The storm caught them just before reaching the pass. They had lost control of their boat and were blown up on the lower point of Long Key. They applied to me for shelter, and I was only too glad to have them for companions. We became fast friends on short notice.

The storm brought us another derelict, the greatest curiosity I saw on my trip. A devilfish, or sea bat, had been killed at sea. His great body, weighing about 2,000 pounds, had been washed upon the beach. He was a monster of the deep. He had evidently been killed with long-bladed knives, as there were by actual count, ninety-three stab wounds in his body. I was informed by my new-found friends that this fish often takes a nap on the surface of the gulf, and ships at night frequently run into them. Sailors then take butcher knives and lash them to stiff poles and lance the fish until dead. They are very tenacious of life, and it takes many wounds to kill them. Sailors dread this fish, for it has two tentacles or claspers, fleshy objects about four or five inches wide and from two and one-half to three feet long, which extend outward from one side of its cavernous mouth. Their object is undoubtedly to aid in securing food. When the fish is moving, they are in constant motion, being whirled about like the tentacles of a squid, and they are muscular and powerful, as has been demonstrated on many occasions. The natural movement of these claspers is inward, and when an object strikes between them, it is instinctively held. Thus, if by accident or design, they strike a ship's cable, these tentacles clasp the chain or cable, and are said to hold on until it thunders or the fish is killed. There are many authentic cases where this fish has dragged vessels from their moorings and carried them many miles out to sea.

The first chapter in "Big Game at Sea," by Charles Frederic Holder, deals with this fish. The scene of his adventures with the sea bat, vampire, giant ray or devilfish were laid in the same locality and waters that I was now in. The one that was cast upon our beach measured twenty feet from wing tip to wing tip, and thirteen feet four inches from head to the base of his whip-like tail. I would call him diamond-slapped, the two wing points making the alter-

nate corners and head and tail the others. I now had a chance to enlighten myself on the devilfish. I had always been under the impression that his Satanic Majesty was the many-tentacled, spider-like octopus or squid, but found him to be entirely different.

The devil was dead and I rejoiced. He was very dead, so much so that he began to scent the whole locality. We could see a mile away, seaward, to deep water, many sharks rolling and tumbling, trying to get into the precious bit of putrid flesh. We were heartily sorry we could not send it out to them.

My stranded friends now began dredging a channel to deep water to float their boat, and I returned to my fishing.

Sunday morning came. All labor ceased on the channel, because one member of their party was an ex-parson. They had dubbed him X. The others were anxious to go on with the work, but X. said no. It was a beautiful day. After the morning meal was finished we adjourned to the front porch to smoke and chat. I soon found that X. was a strong character. An Irishman, a Georgian and a "hill-billy" combined. He was one of the most enjoyable characters, except on this occasion, I have ever had the good fortune to meet; full to the brim with Irish wit and humor. He had left the ministry to become an editor of a weekly paper.

In the course of conversation I had asked him the question, why he had quit the ministry for the newspaper business? His answer was illustrative, and assumed the proportions of a joke, ridiculous, but we must draw our own conclusion from it, as he would give us no better reason. His illustration was about as follows:

An old couple, living in the mountains of Georgia, had raised a large family of boys, there being twelve in all. The mother had been the strongest character of wedlock, and the children had been raised to manhood, following her ideas and ideals. Both parents were illiterate and very poor. Eleven of the boys had attained manhood, and all had turned out badly. The twelfth was a lad of fourteen and the father declared one day that Mam had raised eleven failures, and he was going to "bust" loose and raise one success as a credit to the family, referring to Eli, the youngest. Mam was willing for Dad to try. To be sure he would not fail, the old man decided to make a parson of his boy. He sent him away to a boarding school and gave the teacher positive instructions to make a preacher of his boy. The teacher made every effort to make of the boy all the old man desired, but the boy being naturally bad, the teacher must naturally fail. However, the teacher did not notify Dad of the boy's shortcomings, as he needed pupils to pay the expenses of his school.

Eli absorbed slang as a sponge does water. He was very good in all sports and was the best "shine" player in school. He led the school in two ways. He was at the head in the brawn class and the tail-ender in the brain class. Books had no interest for him. However, in the three

years he attended the school, he secured enough knowledge to make an appearance before his illiterate parents and brothers. Dad thought he should know enough to preach a sermon, and just before his home-coming of the third year, the old man went around to his neighbors and notified them that his son would preach his maiden sermon on a Sunday morning of a given date. The district was sparsely settled, and preaching was only held once each month by a circuit rider. Any thing extra in the way of entertainment was sure to draw, and Eli faced a large audience on his first attempt to expound the gospel. Eli was notified that he must perform, and that he must prepare for his performance. Fearing if he did not he would not be allowed to go back to school again, he assented to all arrangements and notified his father that he would be ready. He prepared his sermon from the fight between David and Goliath, which appealed to his football nature of rough and tumble. He arose in the pulpit on the Sunday appointed, and addressed his audience as follows:

"David! David! David! David wus er daisy—he wus. David wus er dandy. Say! you know whut David done ter Goliath? Yer don't? Well, I'll jist tell yer. Little old David knocked holes in that ere jint big'r'n punkins. Oh! little ole David wus er scrapper frum Scrappersville—he wus. Whut he done ter that ere scounnel wus er plenty. He wus er cracker-jack. Say! I jist want ter stan' flat-footed an' bet any yap in this ere house a ten spot thet little ole David—"

"Shet up yer trap, Eli. Every time yer opens yer mouf yer darkens ther cause."

This ejaculative interruption came from Dad, who was occupying a seat in the amen corner together with Mam and all of the family—a seat that was very close to the pulpit. The injunction was issued as the old man arose with a two-pound Bible drawn back in his right hand as if to say to Eli, "If you don't you will get this against the side of your head." It is needless to say Eli subsided.

When the laugh had died away on the soft balmy air, the parson turned to me and said: "Well, what are you going to do to-day?"

"Who! me! I am going fishing," I answered. "I didn't come down here a thousand miles from home to fish and expect to be bluffed on Sunday. If I were at home I would go to church: go to sleep and dream I was catching a big one, but down here I am going to do the real thing, if there is no law against it."

With his index finger pointed at me, he said: "If you go er fishing on er Sunday, the devil ull get yer shore."

"The devil is dead," I said; "don't you smell him?"

"When the devil is alive, he is as odorless as can be, When the devil is dead, the devil of a smell makes he."

I said no more, but gathered up my tackle and departed for the dock, the parson repeating his warning. He also shouted the fourth commandment after me as a parting and a warning of my obstinacy.

There was a bench on the dock which resembled a church pew. The dock was about fifty feet long by about ten feet wide, and was built on piles driven into the sand. It was about six feet above the water. Deep water commenced almost on the shore line, consequently the outside edge of it was over very deep water;

about forty feet. It was built close into shore. A broad walk led out to it, and the whole structure looked like a railroad depot platform. It was located immediately in front of the cottage, which was situated about thirty feet from the water's edge.

I made myself comfortable on the bench, which had a high, solid back shutting out or  
*Continued on page 219.*

### Fishing in New Jersey in January.

ASBURY PARK, N. J., Feb. 6.—*Editor Forest and Stream:* The wonderful mild weather experienced this winter was notable for many oddities of nature, grass growing, trees blooming, etc., and in addition thereto, one feature which will last in the memory of anglers who reside in New Jersey for a long time to come, was the fishing in the fresh-water lakes and ponds in the month of January for pike and pickerel. The open season for catching these fish is from May 20 to Nov. 30, and from Jan. 1 to Jan 31; and when it is taken into consideration that there is a law prohibiting catching fish through the ice, it would appear ordinarily that the open season for the month of January was unnecessary. However, this year it proved an acceptable exception, much to the delight of fresh-water anglers.

There are numerous lakes and ponds situated within a radius of fifteen miles from Asbury Park, N. J., which not alone afford good sport for pike, pickerel and yellow perch, but also contain numbers of black bass, which can be taken in season.

Large numbers of pike and pickerel have been taken in the numerous lakes and ponds, and it was not at all exceptional to see the angler discarding his overcoat on account of the springlike atmosphere. On New Year's Day the writer was one of a party of three who captured fifteen pickerel weighing from one to three pounds apiece, and on the last day of the season, Jan. 31, eight of similar weight.

Daily fishing parties would take advantage of the unusual climatic conditions prevailing. In Deal Lake alone, which is situated at Asbury Park, numerous pickerel were captured, the largest weighing 4½ pounds. It is improbable that similar conditions will prevail for many years to come. HARTIE I. PHILLIPS.

### Stocking Pennsylvania Streams.

THE Pennsylvania Department of Fisheries under its new system of distribution furnishes a blank form upon which the recipients of fish state the number and condition when they are received. There is much gratification felt in the Department over the fact that in nearly every case the fish are reported to arrive in first class condition, and to this is added the congratulations upon the character of the fish, the larger size now being distributed seeming to strike the popular fancy. Some of the recipients speak of the increased interest that is being taken by people in the restocking of the streams. One correspondent from Montgomery writes as follows:

"In placing these last fish in the streams today, I was surprised at the favorable sentiment of all the property holders I talked with, and am inclosing you a copy of the wording of the notices I have secured permission to post these

streams with just prior to the opening of the seasons for several years, and from the expression of sentiment I believe it will pay to go to the extra trouble and expense, as I find it is always necessary for someone to go ahead and work these things for any amount of success. I have been doing probably more missionary work for this cause than is customary, especially with your Department, but as I have fished for all kinds of fish locally ever since I could sit up and hold a rod, I certainly am only too glad to go ahead and see personally that these plantings are properly done at any time any fish are sent here."

The following is a copy of the poster which the correspondent anticipates using along each stream each spring:

#### CAUTION!

Fishermen desiring to see in this stream good trout fishing, must be moderate in their catches for a few years.

Do not try to catch the limit of the law, especially while they are just planted.

Give them a couple of years' light fishing, catch a decent mess, not over fifteen or twenty in one day, and quit for that day, coming out oftener.

By restocking carefully and fishing carefully, we can soon have good fishing for all. We invite you all to take an active interest in restocking and supporting our home fishing grounds.

COMMITTEE OF FISHERIES.

### Luncheon to Col. John H. Wallace.

THROUGH the good office of Secretary Haskell, of the American Game and Protective Association, last week, a luncheon was given at the Drug Club for John H. Wallace, Jr., State Game and Fish Commissioner of Alabama. Col. Wallace had just returned from Washington, where he worked himself to a frazzle in an effort to push through the McLean bill for protection of migratory birds. One readily can realize Col. Wallace's power to influence Senators in the way he thinks they should go. He is straightforward, sometimes at the cost of being politic, but his sincerity is so evident that not even the most delicate could take offense. Much of interest concerning game legislation was discussed and some sound propositions formulated. Those present were: Dr. William T. Hornaday, President of the American Zoological Society; John H. Wallace, Jr., Game and Fish Commissioner of Alabama; William S. Haskell, Vice-President of the American Game Protective and Propagation Association, and J. O. Pierson, President of the Audubon Society, and W. G. Beecroft, editor of FOREST AND STREAM.

### The Eastern Mud Minnow.

GLOBE, Ariz., Jan. 26.—*Editor Forest and Stream:* I have just read with much interest Barton Warren Evermann's article on the Eastern mud minnow and would like to take this opportunity to thank him for the information therein contained.

Lest others also be misled by the signature I wish to explain that Dr. L. O. Howard is in no way responsible for the article, nor must he be credited with my lack of knowledge of a subject upon which he is probably well versed.

L. O. HOWARD.

Published Weekly by the

FOREST AND STREAM PUBLISHING COMPANY,  
CHARLES OTIS, President.

W. G. BEECROFT, Secretary. W. J. GALLAGHER, Treasurer.  
127 Franklin Street, New York.

**CORRESPONDENCE**—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

**SUBSCRIPTIONS**: \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

**ADVERTISEMENTS**: Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

### A NEW VIEWPOINT.

THE report of the Game Preservation Committee of the Boone and Crockett Club, referred to on another page, ought to be read by all sportsmen. It presents a new point of view, and urges careful consideration of a number of new points.

The game protection movement in this country has become a great reform movement, and like all reform movements is composed of extremists, reactionaries and people of moderate views. At present many of the extremists are urging the absolute prohibition of the taking of wild life.

The Boone and Crockett Club feels that under proper conditions reasonable sport with the gun is altogether admissible. Prohibition is only one of the many elements in the problem. The Club would completely prohibit where necessary, and approve the shooting of animals and game birds where it can be done without injury to the breeding reserve. To discourage the sportsman will be to destroy the most effective force now working for game protection.

On the other hand, the sportsman must conduct his sport like a gentleman. He should be the first to refrain from killing animals where they are so few that the destruction of any of them will tend toward extermination, or even endanger their increase. Antelope at the present day should not be killed. In most places the mountain sheep should not be killed, and the same may be said of grizzly bears and in certain places of deer. On the other hand, the killing of elk, outside of Yellowstone Park, and of deer, moose and caribou in certain localities is entirely legitimate and proper.

The Club urges—and this is the point which calls for the best judgment of the best man—the creation of commissions for the preservation of game, and investing these commissions with elastic powers, and holding them to full responsibilities. They should have authority to make or unmake, lengthen or shorten close seasons; to increase or decrease bag limits; to set aside absolute refuges on feeding grounds necessary to wildfowl, shore birds, game birds, or animals;

and in fact to establish such constitutional regulations or restrictions as varying condition of place or time may require; the whole object being to conserve the game.

To many sportsmen these ideas will be wholly new, but they are the results of careful thought by men of wide experience who have long been studying the subject. Sportsmen generally may profitably read and study the complete report here referred to.

### NORTH ATLANTIC FISHERIES.

Secretary of State Knox and Ambassador Brice have exchanged ratifications of the treaty signed last July providing for the adjustment of the North Atlantic fisheries controversy. The convention has already been approved by the Senate, and the substance prescribes the boundary waters and provides for a commission which shall pass upon the reasonableness of the local Canadian and Newfoundland fisheries regulations. One of the questions settled by the treaty is that neither Great Britain nor its colonies may impose regulations on American fishermen exercising their treaty rights in the territorial waters of Newfoundland or Canada, unless such regulations are held to be reasonable by an impartial tribunal. In case of dispute, neither Great Britain nor the United States can be the sole judge of the regulations. The fishermen will know before the beginning of each season just what regulations will be in force that season, thus putting to an end the former practice on the Newfoundland coast of imposing regulations on short notice or without any notice. The results attained sustain the chief contentions of the United States in the arbitration. The whole matter was referred to the Hague tribunal which rendered a decision which both the Canadian Parliament and the United States Senate ratified in substance, though for a time it was thought the whole question would be reopened on account of the Canadian Parliament balking over the sections relating to the fisheries in Lake Michigan and the salmon fisheries of British Columbia. Happily this was avoided and the matter was agreed upon and the treaty closed.

### THE ALLIGATOR SATCHEL.

IF the feather-bedecked hat implies the destruction of birds of plumage, the alligator skin hand bag means the passing of the 'gator; and with all his ugliness the Florida alligator bids fair to follow the Florida plume birds with all their beauty into the limbo of wild species destroyed for commercial purposes. One unfortunate feature of the case is that the alligator has no friends. He is universally regarded as an ugly customer. His ways are the reverse of winning. No Audubon Society espouses his cause. The sentiments evoked in behalf of the feathered singers in the trees has no regard for the alligator bellowing in the swamp. The alligator must go. The statistics show that he is going; in fact, from large areas of Florida he has gone. In the early days of pleasure travel in that State, a half of a century ago, on all the great highways, the alligator was as ubiquitous as he was novel and interesting. To-day one must seek him, if to be found at all, in the remote by-ways. In those times he was

sought as a curiosity, or fell a victim to the sportsman thirsting for renown as an alligator slayer; but since then, the commercial importance of his pursuit having been demonstrated, he has been hunted systematically for market.

Alligators are killed chiefly for their skins and the commercial value of their teeth. A large trade is still carried on in alligator curiosities. In 1900 about 8,400 alligators were disposed of to tourists in Jacksonville. Most of these are very small ones, for which the hunters receive only from \$10 to \$30 per hundred. In no branch of the industry are those who gather the raw material well paid. Marketable skins from three to twelve feet in length bring only sixty cents on an average, and most of this is taken out in trade—provisions and ammunition—so that the hunter appears to earn all that he receives. The hunter combines with his pursuit of the alligator that of deer, bear, wildcat, opossum and raccoon for the skins. Previous to the bird protection law the plume birds contributed an important share to the profits. In like manner, unless there shall be a change in present methods, the alligator industry must fail.

### PERCIVAL ROSSEAU.

THOSE who have enjoyed the Rosseau covers that have appeared recently in FOREST AND STREAM will be interested in visiting the exhibition of Mr. Rosseau's celebrated paintings at the M. Knoedler & Co. galleries, Feb. 15 to March 1. The drawings of this foremost artist represent the highest type of canine portraiture and will repay well any dog lover visiting the galleries.

A FITTING tribute was paid Walter Winans by the King of Sweden, who has decorated him with the Olympiad Commemoration medal. Mr. Winans has done probably more than any one individual in the development of the sporting rifle, as well as in furnishing valuable data on game preservation through his breeding for big heads. At the Olympic meet Mr. Winans won the gold medal for sculpture and the silver medal for running deer team shooting.

FRIENDS of the McLean bill now in the hands of the Committee on Agriculture in Congress, and which undoubtedly will take the place of the Weeks bill, are urged to lend their influence at once that the bill may be passed before the expiration of the present session of Congress on March 4.

### March.

BY ELSIE SCHNEIDER.

What care I if the winds are cold  
And the clouds of winter subdue the sun?  
The little brown buds will soon unfold,  
And the crocus bring forth its pot of gold—  
For winter's race is nearly run.

What care I for the vanishing snow  
And the dull, dead leaves that lie about?  
In the somber field the grass will grow  
And the ice-bound river will merrily flow—  
For winter is nearly wearing out.

What care I for the pelting rain  
And the steel-gray dome that hangs overhead?  
The robin and bluebird will come again,  
The day grows longer, the night's on the wane—  
For winter sleeps the sleep of the dead.

# ARCHERY

## Target Fronts

By E. J. RENDTORFF

IT is exasperating, to say the least, to have our arrows rebound or pass through the target and then count a center shot for five points. In this article I shall make no attempt to suggest an arbitrary value to these misfortunes of the archer, but shall confine my attention to the cause of these accidents and suggest a remedy.

The bosses of our straw targets have many weak places where an arrow will pass through. This cannot well be avoided. The rebounds are generally made when the point of the arrow strikes the heavy binding twine through which it cannot penetrate. A front with the inner circle shot to a sieve produces more rebounds than a new one. Rebounds are also sometimes produced by a lack of contact between front and boss, but the recoil from the binding twine is the more common.

In America we generally use a front of oilcloth, probably for the reason that it is the prevailing custom. Oilcloth is not well adapted for this purpose, and offers the following objections:

First—It is difficult to paint on a smooth oilcloth, as the colors have a habit of running and separating, so that a sharply defined circle or a smooth area of uniform color is hard to obtain. This is because the cohesion of the paint is greater than the adhesion between the paint and the glossy material of the oilcloth.

Second—Oilcloth is weak and brittle and is easily torn when arrows penetrate or are withdrawn. It allows the straw boss to buckle, and gives it but little mechanical support. The life of an oilcloth front is thus very short.

Third—Oilcloth offers but little resistance to the passage of the arrows, thus allowing them to pass through when a weak part of the boss is struck.

Fourth—When the arrow strikes the binding twine and rebounds, the oilcloth offers so little resistance to the recoil that the arrow leaves the target.

Fifth—It has the nasty habit of allowing particles of the front face to adhere to the shaft of the arrows, so that they will shoot untrue unless carefully cleaned with monotonous frequency.

Oilcloth fronts offer several other minor objections, but the five mentioned are sufficiently serious to consider the use of a substitute. Last fall I tried a light canvas that can be purchased for 14c. per yard. As the material was but twenty-six inches wide it was overlapped about one-half inch at the inner edge, and then sewed. This canvas was given two coats of boiled linseed oil before it was painted. This was done to prevent the colors from running, but was afterward found to be a mistake. The

capillary action of the material of the canvas and its absorptive power is so great that when paint is applied on the unoiled surface the color pigments will not run far, but the oil itself will. It is thus easy to paint a good front on this material.

The canvas was turned over the edge of the boss before it was sewed on. This reinforced the outer edge so that the danger of arrows passing through near the petticoat was thus minimized. The boss was greatly strengthened by the canvas and showed but little tendency to buckle. This front was used for some six weeks before cold weather set in. During that time some 8,000 arrows hit the target. I know of none that passed through, and of but one rebound with a weak 35-pound bow shooting a light arrow. After all this use the front was in better condition than the average oilcloth would be after 500 hits.

It is interesting to note what happens when the arrow strikes the binding twine under the

condition that would cause a rebound with the oilcloth front. With the canvas front the arrow does not penetrate the twine, but starts to rebound. The canvas, however, offers a sufficient resistance to the recoil of the arrow, so that instead of rebounding entirely off the target it is held in place. The canvas front is in every sense of the word superior to the oilcloth, and its adoption should become universal. An archer who tries it will never again consider the use of oilcloth for target fronts.

### Archery Notes.

BY EDWARD B. WESTON.

EARLY in January of this year I sent the following letter to thirty-five archers:

My Archer Friend:

For many years, both in the United States and in Great Britain, the point system of scoring has been used in deciding the individual archery championships. Of course, the object is to decide who is the best archer. Can this be done more accurately by using the point method than by taking the highest score, or by score and hits added?

I shall be pleased to receive an answer from

Four archers who shot in the first tournament of the National Archery Association, held in Chicago, in 1879. They also shot in the 1910 tournament, held in Chicago, at which time this photograph was made. Reading from left to right: Dr. E. B. Weston, Chicago; Tac. Hussey, Des Moines; Will H. Thompson, Seattle; Geo. F. Henry, Des Moines. Each of them is still alive and shooting.

you, and to be permitted to use it in an article on the subject which I hope to prepare.

Cordially yours,

EDWARD B. WESTON.

I regret to say that only eleven replies were received. From these I quote as follows, taking them in the order in which they were received:

Dr. O. L. Hertig, of Pittsburgh, wrote: "Am firmly of the opinion that the American Round as well as the Columbia, should be decided by highest score. But when it comes to the York a different condition obtains, especially at 80 and 100 yards, when target hitting is archery, and gold making largely luck. Here is an illustration. Last fall Jiles and I shot a York round, one end of which I remember well. At 100 yards Jiles made 3, 3, 3, 1, 1, 1—6-12. Hertig made 9, 5, 0, 0, 0, 0—2-14. No archer in the world can deny the fact that Jiles' end was infinitely better than mine, although two less in score. My suggestion is: Decide the York round just as we have been doing. This may apply to the Ladies' National round.

"Decide the American and the Columbia just as we do the team round, by highest score."

Of course, no valid argument can be made from a single end. Nearly all would agree that Mr. Jiles' end was the better of the two. But scored by points, as advised by Dr. Hertig, for 100 yards' shooting, the scores would be tied. Scored by score alone, Dr. Hertig would have won. Scored by hits and score added, Mr. Jiles would have won, 18 to 16, and this would seem to be right.

George Phillips Bryant, National champion, Boston: "I have long been of the opinion that the point system is unfortunate, and in some cases unfair. On the other hand I would not like to see any change that would affect the fair comparison of modern scores and the long line of past performance.

"I should like to see total score win, and in case of tied scores then total hits to win, and in case of both hits and score being tied, then settle it by points as now, but only between those tied."

In comparing scores, we never compare them by points, but always by the highest scores.

George L. Nichols, Chicago: "It is decidedly my opinion that the point method does not show the relative skill of archers in a contest, as well as would the system which you suggest.

"By taking the total of scores and hits at all distances in any round, each contestant has a fair and equal chance; which does not seem entirely possible under the point system.

"One thing I might ask. That is, how to dispose of ties. In the American round shot on Columbus Day I made one more hit than Mr. Bryant; but one less score.

"It seems to me that the relative importance of the number of hits is greater than would be shown by simply adding the total number of hits to the total score, though that method is as fair to one as to another."

The Columbus Day scores to which Mr. Nichols refers, were published in FOREST AND STREAM last Nov. 16. They make an interesting study. Mr. Bryant won, having the highest score. Had hits and scores been added it

would have made a tie in both hits and score.

Then, if as above suggested by Mr. Bryant, the case had been settled by the point system, Mr. Nichols would have won by 6 points to 4 for Mr. Bryant.

Tac. Hussey, Des Moines, Ia.: "In answer to your question as regards 'points.' I have no special opinion to give for or against the system. I do not expect to enter into a National shoot again. I shall continue my local shooting as usual, and encourage all archers to take up the bow again when the season opens, for the reason that I am very fond of the sport, and think it does me good to get out into the green fields once or twice a week."

Mr. Hussey's many friends expect to see him again at National meetings. Though he has passed his eightieth milestone, he is yet making fine scores.

Z. E. Jackson, Atchison, Kansas: "Your letter of Jan. 4 relative to the system to be used in scoring was duly received. It does seem to me that the point system is fraught with technical possibilities. I believe as you do that the test of the archer is his score. The point system might be of advantage if only a very limited number of arrows were to be shot, because we all know that six whites are better than one or two golds, but where a large number of arrows are shot, as is always done in championship tests, this advantage disappears for the reason that the good archer will get higher scores than the poor one. I am heartily in favor of the score system."

Dr. Robert P. Elmer, Wayne, Pa.: "In my opinion championships should be decided on score alone with hits counted only in case of ties. This is an arbitrary opinion which I cannot base on any reasonable demonstration. It is lurking in my head that some smart mathematician could figure the whole thing out on a scientific basis which would do away with hot-air and guess-work.

"If in the American round 90 hits, 90 score were made, would it show greater skill than 10 golds with 80 misses? This is probably a question of opinion.

"The point system in special cases can be shown to be obviously unjust, as when, in a York round, 20-81, 30-110, 30-165—89-354 would beat 28-140, 29-147, 29-165—86-452.

"I doubt if it would ever be shown that greater score would be the cause of unjust winning."

Burton Payne Gray, president N. A. A.: "Yours of Jan. 3 inst., came to hand. My impression is, that the best method of determining the championship, where there is a tie score, would be that the one receiving the largest number of hits should be declared the victor; and in the event of a tie both in score and hits, then use the point method. I doubt if it ever happened that there was a tie both in hits and score."

The following scores, reported by Dr. Hertig, and already printed in FOREST AND STREAM, show that an archer may shoot two scores on the same day, and tie in both hits and score at the different distances, and with total of hits and score alike.

The doctor says: "Mr. Holmes' shooting was remarkable for its regularity. It is seldom

that two rounds in succession are shot with so little variation of hits and score at the different distances, and with total of hits and score alike.

Double American round scores:				
	60yds.	50yds.	40yds.	Total.
W. J. Holmes.....(A)	26 118	28 148	30 182	84 448
(B)	28 118	27 149	29 181	84 448
	54 236	55 297	59 363	168 986
Dr. O. L. Hertig.....(C)	29 127	30 142	30 192	89 461
(D)	28 174	29 129	30 190	87 493
	57 301	59 271	60 382	176 954

For our purpose, let us consider that Mr. Holmes' double American round score was made by two archers, each shooting one of the single rounds. We will call them A and B. We will treat Dr. Hertig's score in the same way, and name the archers C and D.

In the first case, had they been shooting for the championship, A would have won, 5½ points to B's 4½, though they were tied on gross hits and gross score. Most archers will think that A and B showed the same skill; though in this case perhaps it would be as well to award the prize by points as in any other way; as for instance, by shooting more arrows, or by drawing lots.

In the contest between C and D, C made two more hits, and D made the higher score by 32. No sane person would say 2 hits were equal in value to 32 score. And yet, scored by the point system, C won by 6½ points to 3½, though making 32 less score!

Though not germane to the question, it may be said that Mr. Holmes' score was a remarkably well balanced one. That is, that part of the total score made at each range, was what it should have been. It will be found by examining a large number of scores, be they high or low, that about one-third of the total is made at 50 yards, the mid range. Mr. Holmes' total score was 896, a third of which is 298; his 50 yards score was 297.

Dr. Hertig says he fell down at 50 yards.

## YACHTING

### East Shrewsbury Ice Y. C.

THE East Shrewsbury Ice Yacht Club held its first race of the season on Feb. 6 when the Mosquito Fleet was put into commission. In the first two-mile race for small boats, Captain George Riddle piloted Fido second over the course in 7m. 30s., finishing 50s. ahead of Spud II. with Captain Alonzo White at the helm. The diminutive Pater Bug third, with Master Hank Wooley in charge, finished third.

While there were no races on Sunday, the visitors at the club house were treated to a number of thrills. In the excitement of "clocking" some of the new boats that were tuning up, the hickory log fire in the club house burned out for want of attention.

Captain Aaron Wooley put the finishing touches on "Big Bill" in the morning, but on the trial spin was caught in a wind pocket which snapped the mast and boom. Within an hour afterward, however, "Big Bill" was fitted out with new rigging, and judging by the fast time made on the second trial, this new mosquito will have to be reckoned with in the distribution of cups. A series of races is scheduled for Saturday, Feb. 15, and Washington's Birthday, provided the ice holds out. K.

### Streak Wins the First Ice Yacht Race of the Season.

RED BANK, N. J., Feb. 9.—*Editor Forest and Stream:* Running against a heavy north-west wind, which at times almost caused it to turn turtle, Everett Asay's ice yacht Streak won the first race of the season at the Independent Ice Yacht Club to-day. It was a five-mile triangular run on the North Shrewsbury River, and Streak made it in seven minutes. Harry Asay tended the sheet. The other participants were Ralph P. Sickel's P. D. Q. II. and Nat Chimey's Breeze. Fred Fisher's N. R. G. made a start, but was disabled, and Chester Minton withdrew with Spy. The chairman of the committee, Edward Asay, started the boats off in a bunch, and Streak soon forged ahead, leaving P. D. Q. and Breeze to fight for place.

### New Boat for Col. Du Pont.

GENERAL T. COLEMAN DU PONT'S racing motor boat, Tech, Jr., which lost its mark through the decision of the Motor Boat Club of America not accepting the report which credited her with having made a new world's record of fifty-eight miles an hour in the international race for the Heins trophy at Huntington Bay last September, is having several changes made in the craft, which, according to her builder and designer, Adolph Apel, should enable her to come up to or beat the time she is reported to have made in the September clash of the speed champions of the world.

General du Pont, however, it is reported, has declared that so long as the committee of the Motor Boat Club remains as it is, he will never enter the craft again for a mark in the

international contests. No explanation is given out other than this statement.

Mr. Apel, the builder, declared his conviction that the speed was in the Tech, Jr., and that she indicated reserve power that he is called upon to develop through alterations, which he declines to discuss in technical statements, and which he has assured her owner he will bring out.

"I have had the Tech under observation and have studied out points that can be improved. In this, Commodore du Pont agrees and has directed me to go ahead with them. They concern her lines as well as her engines. Yes, I am disappointed over the decision of the Motor Boat Club, but I am confident that we will be able to demonstrate in races in which Tech Jr. will be entered that she has all the speed claimed for her."

Mr. Apel is building another hydroplane for General du Pont, which he says will point higher out of the water, and the stern will lower a little, which is accomplished by a lengthening of the concave surfacing of the bottom by a series of "cutaways" which graduate to larger sizes as they approach the stern, and the builder believes this new craft will have much more speed than the Tech, Jr.

When the committee representing the Motor Boat Club of America rendered its finding to the effect that the timing of the Tech, Jr., was at fault, the Heins trophy was awarded to Mrs. Paula H. Blackton, whose Baby Reliance III. showed the next best time over the course, though it was less than forty miles an hour.

The records of the speed trials at Buffalo show that Mrs. Blackton's flyer covered a mile with the tide at the rate of forty-nine miles an hour and against the tide at forty-five miles an hour, or at an average speed of forty-seven miles, and the Davenport (Iowa) records show that Commodore J. Stuart Blackton's Baby Reliance II. established a record of fifty-four miles an hour, while Count C. S. Mankowski's Ankle Deep made a mile at the rate of 51.3 miles an hour over the Glen Cove course last December.

### Club Elections.

#### PHILADELPHIA Y. C.

OFFICERS of the Philadelphia Y. C. were elected as follows: Commodore, John H. Bromley; Vice-Commodore, Philip H. Johnson; Rear-Commodore, Bernard Bloch; Recording Secretary, S. W. Bookhammer; Financial Secretary, C. Carroll Cook; Measurer, Alex G. Rea; Fleet Surgeon, Dr. Fred J. Haerer; Harbor Master, Thomas W. Boyd; Trustees, William A. Christy, A. L. English, Joseph Price, George W. Fite, S. B. S. Barth, Robert J. Williams, Adam Sulke; Race Committee, John McAvoy, Otto Robert Heiligman, George T. Gwilliam.

#### PASSAIC Y. C.

AN enthusiastic meeting of the members of the Passaic River Y. C. was held in the club house, Feb. 4, for the annual election. Over 200 members were present. The deepest interest

was displayed in the election of a commodore, the candidates being E. L. Curtis and John Keller. Keller's aggregation was successful by a majority of two votes. The defeated ones were good losers, however, and the new commodore will undoubtedly have the loyal support of all the members during his administration.

The election of a financial secretary also brought on a spirited contest, William Hedden winning against Frederick Wilkins with a majority of eleven votes. The other officers elected are as follows: Vice-Commodore, Frederick J. Stumpf; Recording Secretary, Frederick Kessler; Treasurer, A. E. Warren; Members of Board of Trustees, E. A. Wall, Henry Yahn, William Murray, Henry Stumpf, F. S. Wurth and William O. White. The following were elected as members of the auditing committee: E. L. Harsey, L. Nauemann and Frederick J. Stumpf.

The club is in a prosperous condition, the membership being more than 300. The secretary reports a flotilla numbering 152 craft. There have been many social events during the past year, and hopes are high for as good a season this year. Definite plans for coming motor boat season will be taken up at the next meeting.

### McClurg Buys Arabella.

OGDEN T. McCLURG, of the Chicago Y. C., purchased the ocean-going schooner yacht Arabella, formerly owned by Washington B. Thomas, of Boston. The yacht, which will be the largest yet sailed on the Great Lakes, will be added to the fleet of the Chicago Y. C. Mr. McClurg intends to rechristen her Talofa. The yacht measures 128 feet on deck and is 103 feet on the waterline. The beam is 26 feet and the draft 13 feet.

## Canoeing

### A. C. A. Membership.

#### NEW MEMBERS PROPOSED.

Atlantic Division.—John B. Clarke, 521 West 175th street, New York city, by A. D. Berning; William M. Wall, 498 First street, Brooklyn, N. Y., by F. C. Buchenberger; Margin Mills Gregory, 205 Jackson street, Trenton, N. J., by Wm. C. Kuhn; Harry I. Wood, Box 54, North Tarrytown, N. Y., by Chas. W. Ferguson; Frederick A. Jacobson, Edgewater, N. J., by J. A. Leroux.

Western Division.—David P. Burns, Jr., 828 Fayette street, Peoria, Ill., by Bruce Rutherford; George W. Smith, 404 Home avenue, Oak Park, Ill., and Thomas F. Joyce, 425 Belmont avenue, Chicago, Ill., both by W. W. Hinckley; Frederick D. Parker, 516 Jefferson Bldg., Peoria, Ill., by H. H. Dewey.

#### NEW MEMBERS ELECTED.

Atlantic Division.—6583, Sheppard W. Hogan, 216 North Third street, Millville, N. J.; 6584, Joseph F. Peiser, 2468 Seventh avenue, New York city.; 6585, Louis Papen, New Durham, N. J.

#### RESIGNATIONS.

Central Division.—6505, Charles H. Rice, Buffalo, N. Y.

Western Division.—4300, George Q. Hall, Cleveland, O.

# TRAP SHOOTING

## Fixtures.

If you want your shoot to be announced here, send a notice like the following:

### REGISTERED TOURNAMENTS.

Feb. 22.—Birmingham (Ala.) G. C. tournament. O. L. Garl, Sec'y.  
 March 25-26.—Birmingham (Ala.) G. C. O. L. Garl, Sec.  
 April 8-10.—San Antonio, Tex.—The Interstate Association's Southwestern Handicap, under auspices of the San Antonio Gun Club; \$1,000 added money. Winner of first place in the Southwestern Handicap guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. E. E. Shaner, Mgr., Pittsburgh, Pa.  
 April 9-10.—Lincoln, Neb.—Capitol Beach G. C. T. C. Brownfield, Pres.  
 April 10.—Atglen (Pa.) G. C. Lloyd R. Lewis, Mgr.  
 April 16.—Mt. Holly (N. J.) G. C. A. J. Dellette, Sec'y.  
 April 17.—Syracuse, N. Y.—Messina Springs G. C. W. E. Hookway, Sec'y.  
 April 18-19.—Wellington, Mass.—Paleface Shooting Association. Walter F. Clarke, Pres.  
 April 19.—Lawrence (Mass.) Fish and Game Protective Association. A. G. Gray, Sec'y.  
 April 23.—Grundy Center (Ia.) G. C. Frank W. Callaway, Sec'y.

 Sept. —.—Sacramento, Cal.—The Interstate Association's eighth Pacific Coast Handicap tournament, under the auspices of the Capital City Blue Rock Club; \$1,000 added money. Winner of first guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. Elmer E. Shaner, Manager, Pittsburgh, Pa.

## DRIVERS AND TWISTERS.

Scores not in hand Monday of this week were necessarily omitted because our forms closed a day early on account of Lincoln's Birthday. Send along your score, it will run next week.

Chas. W. Gardiner, Secretary Holland Gun Club, Batavia, N. Y., writes us: "Eleventh annual tournament—Western New York Championship—of the Holland Gun Club, has been registered by the Interstate Association, and will take place on Aug. 13. Our season begins the second Saturday in April."

The following telegram was received from Brother Covert, dated Lockport, N. Y., Feb. 6: "Kindly correct report of last week regarding my shooting off tie with Allen Heil at Pinehurst. I stood at 13 yards, not 20, as reported. Have too much respect for Mr. Heil's ability as a shooter to make any concessions."  
 W. G. BEECROFT.

## Westwood (Ohio) Gun Club.

THERE was a big gathering at the weekly shoot on Feb. 2, twenty-five members taking part in the events. On Feb. 1 the weather was so cold, close to the zero mark, with a cold wind sweeping down off the hills, that few came out, and only four even tried to do any shooting. One event was enough for them, and their scores were not near up to their mark. On the 2d H. Carson did the best work, breaking 72 per cent. of his targets. The club is increasing in membership, and the series for the Du Pont trophy, which was started on the 2d, has awakened a new interest. This is a handicap shoot, the member who shows the largest percentage of improvement since he began to be declared the winner. Scores follow:

	Shot at.	Broke		Shot at.	Broke
C Rosemeyer	75	43	C Rybolt	75	50
P Ruchman	50	23	W Miller	50	24
J Nocheck	50	18	Disser	50	25
B Campbell	50	22	Bahnert	50	37
P Kuball	25	11	A Kease	50	13
G Sauer	25	4	La Boiteaux	50	29
C Kuball	50	25	G Oskamp	50	18
A C Kuball	150	76	W P Oskamp	50	21
J Schneider	75	37	L Bley	25	15
M Stopper	75	34	Becker	25	15
Goda	25	9	J Mohr	25	10
J Ruchman	25	1	H Carson	50	36
M Campbell	75	49			

## Larchmont Y. C.

LARCHMONT, N. Y., Feb. 8.—Under conditions that were ideal for the sport, the trapshooters of the Larchmont Y. C. used up some 5,000 clay birds to-day at their weekly shoot, and in the eleven matches decided many full scores were returned.

The feature of the day was the work of young Ralph K. Spotts, the 12-year-old son of Ralph L. Spotts, the well-known prize winner. Shooting against fourteen others, including his father, young Spotts, with a handicap of 8, returned a full score of 25 in the match for a special trophy, tying two of the crack shots of the club—W. J. Elias and F. W. Fitzgerald. In the shoot-off he won the prize. In the next contest for the visitors' trophy, the young Nimrod again shot a full score, this time tying four men—W. J. Elias, S. Halstead, E. Gross and W. E. Ferguson. In the shoot-off the boy again won from Ferguson by one bird.

Ralph L. Spotts not only took high gun for the day, with a total of 130 out of 150, but he won the 100-target handicap. Shooting from scratch he broke 89 clay birds. D. E. McMahon broke 134, but being a visitor, was not eligible. W. J. Elias was second with 129.

There were three take-home trophies shot for. The first was taken by F. W. Fitzgerald after a shoot-off with R. K. Spotts; the second went to J. Henry with a full score of 25, and the third was captured by W. J. Elias, who also won the leg for the monthly cup. The leg for the accumulation cup was won by R. Jones, who also won the 10-target scratch contest. D. F. McMahon was the winner of the 15-target scratch contest, with a full score.

**Essex Country Club.**

WEST ORANGE, N. J., Feb. 8.—B. M. Shanley, Jr., from scratch won first leg on the February trophy with a perfect score of 25. L. H. Ross and L. E. K. White, handicapped at 5, finished with 25 in the take-home trophy event. White won the shoot-off, and won also the Bryant trophy event. Peter Hauck, Jr., and E. E. Heller, handicapped at 5 and 6 targets respectively, were tied up at 25. The shoot-off was postponed. A. O. Headley won a practice match with 25. Summaries:

Take-home trophy, 25 targets, handicap:

B M Shanley, Jr....	0 23	C H Daly.....	0 21
C F Ross.....	7 21	L H Ross.....	5 25
G M Pynchon.....	0 22	E E Heller.....	6 22

A O Headley.....	3 24	E E Heller.....	6 25
G P Gillespie.....	2 19	P Hauck, Jr.....	5 25
C H Daly.....	0 21	W H Peck.....	6 14

**Independent Gun Club.**

PHILADELPHIA, Feb. 8.—Charles H. Newcomb won the spoon for high net score with only 86 breaks out of the 100. Raymond Waters was the only gun to total 100, including handicap, winning the trophy for the best gross score, shared second honors with Frank J. Hinehline, of Camden, with 84, and even Jesse Griffith, an ordinarily good and consistent shot, smashed but 83, while Dr. F. W. Mathews, of Trenton, showed distinctly poor form, getting 78 and beating his brother, another steady and consistent shooter, by one target. The spoon for runner-up went to R. A. McGrath, who fell just one target short of the century, while the spoons for Classes B and C were captured by Dr. Westcott and Benjamin Deist. The scores:

	Yards.	Broke.	Handicap.	Total.
S M Freeman.....	16	70	15	85
Waters.....	16	84	17	100
George.....	16	72	8	80
Fontaine.....	16	81	15	96

**Du Pont Gun Club.**

WILMINGTON, Del., Feb. 8.—Thirty-nine gunners shot here to-day. Eugene E. du Pont won the Class A event. Coleman du Pont, the spoon event with a score of 21 out of 25. Walter Tomlinson was the winner in Class B with a score of 22 out of 25. The other winners were:

Class C—T. W. Mathewson 15 out of 25; Class D—Arthur J. Curley, 19; Class E—D. R. Rutter 15.

The point winners for the E. E. du Pont team trophies were:

C Leedom.....	3 23	L W Crawford.....	7 21
A J Curley.....	7 25-48	W G Wood.....	1 19-40
J H Minnick.....	1 23	H P Carlon.....	1 20
S G David.....	7 25-48	Z H Lofland.....	5 19-39
W Edmanson.....	1 23	W T Jensen.....	5 19
W Mathewson.....	5 20-43	Dr E Bullock.....	7 20-39

Dr C R Jefferis.....	13	..	..	..	..	..	..	..

**Jersey City Gun Club.**

Jersey City, N. J., Feb. 8.—A cold and windy day kept the attendance down to seventeen gunners to-day. A strong wind from the southwest made the targets cut up all kinds of capers, and made the scores of old-timers look like those of beginners. George Piercy, who seemed to have a first mortgage on high average trophy, was up against it to-day, finishing with 71 per cent., which was considered pretty fair by the rest of us, who had hard work sticking around 60 per cent. Dave Engle was second with 66 down out of 100 attempts. Kearney won the leg on the season trophy. The scores follow, in strings of 25:

Engle.....	16	17	20	13	..	..	..	..
Lawton.....	14	15	14	9	..	..	..	..
Kelly.....	13	17	15	..	..	..	..	..
Dixon.....	19	15	16	14	..	..	..	..
Piercy.....	16	20	14	18	22	18	17	..
Shannon.....	9	15	9	16	12	13	17	..
Tewes.....	14	12	15	10	17	..	..	..
Williams.....	12	13	14	11	13	17	..	..
Hubbell.....	12	17	14	11	..	..	..	..
Von Lengerke.....	18	16	12	13	17	18	15	..

REMINGTON ARMS—UNION METALLIC CARTRIDGE CO, 299-301 Broadway, New York City

MEMBERS OF THE BRADEN COPPER CO. GUN CLUB.

**Braden Copper Co. Gun Club.**

SANTIAGO, S. A., Dec. 30.—Inclosed please find photograph taken in the Chilean Andes, at an altitude of 7,982 feet, situated at 72 kilometers from the town of Rancagua, showing the members of the Braden Copper Company's Gun Club, formed exclusively by employees of the company. Its genial general manager, R. T. White (the tallest gentleman in the photograph) is one of the most enthusiastic followers of the sport.

Trapshooting, as you will observe, is followed in the altitudes of the Andes Mountains, and shows that the game of trapshooting has reached such far-off corners as Chile.

The Braden Gun Club has over twenty-five active members, and counts upon such excellent shots as R. T. White, C. B. Holmes, B. T. Colley, E. T. Stannard and J. Chambers, all shooters of 85 to 90 per cent. average.

The staff of the company at Rancagua has recently started trapshooting, and promises to develop some excellent "target busters." Both clubs are looking forward to competitive shoots in the near future, the result of which will bring forth still deeper interest in trapshooting.

JAS. H. SPENCER.

**Chicago Gun Club.**

CHICAGO, Ill., Feb. 1.—Near zero weather had the effect of keeping down the attendance at our weekly shoot to-day, and the strong, icy-cold wind numbed the shooters' fingers, so that only a few good scores were recorded. Fetherston put up the top score of the amateurs when he broke 46 out of 50 in the first club event, Schultz taking second place with 36, while trying out a new gun. Ed. Graham made a runaway race of it for the day, as he copped first place in all four events, but then he nailed the targets almost before they left the trap house and before the wind made them dance a jig in their flight. Our ever pleasant and good-natured friend Harpham thoroughly enjoys the time spent at our club, as he gets as much fun out of the sport if he lands a low score as if he lands at the top of the list. Kay and Fox concluded they had all they needed after shooting one frame of 15 and proceeded to thaw out near the fire. Scores:

Table with 4 columns of names and scores for Chicago Gun Club events.

Feb. 2.—Our hopes for a more moderate temperature for to-day were in vain, as conditions were just about the same as yesterday. With a fairly pleasant day, our third monthly handicap shoot, which was shot to-day, should have brought out at least fifty shooters; but as it was, a field of twenty-six marksmen turned out in spite of the cold weather. High scores were out of the question, and after shooting through the handicap event most all concluded they had enough, and the two-man team race was postponed until next month.

Silver and F. C. Young tied for first honors in the main event, each breaking 78 out of 100, Silver breaking his from the 18yd. mark, and Young standing at 16yds. F. Gibson, a visiting shooter from Kirkwood, Ill.; Shaw and Moore divided second place honors by breaking 74, the first two from 18yds., and Moore standing at 16. Riley and Seelig each broke 73 from 18yds. for third place. Ed. Graham topped the professionals with 90, while Terry broke 55.

First honors in the weekly club event went to Silver with 43 out of 50. N. Kuss took second with 37, while Matz broke 35 for third place.

Shaw led the field in a practice event by breaking 14 out of 15. C. Young fulfilled our expectations of last week, when we said he would soon be among the leaders, as he took first place with Silver. The two Breitensteins

and Stout came all the way from Burlington, Ia., to be with us to-day and expect to come again on March 2.

It was lucky that the squad sheet writer had Riley lead off ahead of Seelig instead of Stout, or the squad hustler may have had trouble on his hands if he should have called Stout, Seelig, etc., to the firing line.

Phil. Miller was accompanied by two of his brothers who are in the city on a visit.

The Esenbury Film Co. had a moving picture operator on the grounds, and after getting his machine set, he turned her loose, getting the shooters on the firing line, and finished a group picture, Fred. Bills bringing up the rear, and he tried to walk into the machine, but stopped just in time to fire the last shot in the picture. Scores:

Table with 4 columns of names and scores for Braden Copper Co. Gun Club events.

**Glenwood Country Club.**

GLEN HEAD, L. I., Feb. 8.—Eight gunners took part in the weekly shoot here to-day. The feature was the Glenwood cup event at 50 targets, which was won by C. E. Berner. Scores:

Table with 2 columns of names and scores for Glenwood Country Club events.

Team shoot, 25 targets, handicap: Team No. 1..... 8 66 Team No. 2..... 0 65

Team shoot, 25 targets, handicap: Team No. 1..... 0 64 Team No. 2..... 4 58

Team shoot, 25 targets, handicap: Team No. 1..... 8 64 Team No. 2..... 0 64

Shoot-off for prize, 25 targets, handicap: Team No. 2..... 0 66 Team No. 1..... 4 63

The teams were composed of the following: Team No. 1—C. W. Berner, J. I. Bergen, W. J. Baxter and H. Berner.

Team No. 2—W. J. Silkworth, J. B. Johnson, G. E. Berner and H. Horning.

**Marine and Field Club.**

BATH BEACH, Feb. 8.—President Paul R. Towne won the February cup and the take-home trophy to-day. Scores:

**Fort Side Gun Club.**

FORT WASHINGTON, Pa., Feb. 8.—The Fort Side Gun Club held a live-bird shoot to-day, well-known wing shots from Philadelphia, Nerristown, Pottstown and the surrounding country being present. The swift birds provided plenty of sport for the shooters. The principal event of the afternoon was a 25-bird shoot, with a \$20 entrance. Coleman shot the high gun of the thirteen contestants, gathering all but one of his birds. Knoule and Buckwalter were second with 23 kills each. The best scores follow: Coleman 24, Knoule 23, Buckwalter 23, Geist 22, Oakes 22, Paul 22, Wolstencroft 22, Graves 21, Hoffman 21, Du Pont 20, Muller 20, Trumbauer 20, Brownell 21.

**Chester Gun Club.**

CHESTER, Pa., Feb. 8.—The Chester Gun Club with help of some Du Ponters, won the third and deciding team race from the Riverside Gun Club, at Essington, to-day, by 408 to 397. Each club had won a match from the other, and to-day's match settled the argument between the two. Both teams shot high speed, and while the Chester outfit failed to have any of their members register the highest individual score, they shot together much better than did the Riverside Club, having seven of their ten men get 40 or better, while Riverside could only get four in the 40 class.

Bowers and Hamlin, of the Riverside Club, were the high scorers of the day. Each broke 46, Bowers getting the only straight score. Elwell finished with 44 and Fisher with 40, being the only other 40-men on the team.

Banks led the visitors with 45, while Martin broke 44. The Clearview Gun Club, of Darby, will meet the Riverside team at the former's grounds next Saturday in connection with the Darby Men's monthly club shoot. Scores:

Chester.		Riverside.	
Banks .....	45	Bowers .....	46
Martin .....	44	Hamlin .....	46
Lord .....	43	Elwell .....	44
Lee .....	43	Fisher .....	40
Reynolds .....	42	Walker .....	39
Copple .....	40	Donalme .....	39
McHugh .....	40	Clinger .....	38
Hammond .....	39	Shuster .....	37
Longbottom .....	37	Stellar .....	35
Speakman .....	35-408	Shattuck .....	35-397

Scores made by gunners who failed to qualify for their respective teams follow:

Chester—Bibby 33, Leedom 35, Bibby 33, Young 26, Jackson 26, Harrison 25, Spear 25, Cleuro 23, Mullin 21. Riverside—Seiberling 32, Wiltbank 34, Seibling 32, Gohrs 28, Bockius 27, Harper 28.

**Farragut Sportsmen's Association.**

EAST CAMDEN, Feb. 8.—A big field of marksmen turned out at the monthly shoot of the Farragut Sportsmen's Association here to-day, and although a rasping wind cross-countered the targets, some creditable scores were made. Only two of the fourteen clubs entered yesterday put in an appearance at the opening shoot of the Delaware River Yacht Club's Trapshooting League to-day. Teams from Farragut and the Yachtsmen's Club were the only entrants. The former won by a score of 138 to 123. As a result of their default, the twelve clubs are at a serious disadvantage in the race for the season's trophy. Scores:

Stevens.		Du Pont.	
Oneill .....	11 7 18	13 7 20	
Till .....	16 6 22	14 11 25	
Hetteroth .....	14 4 18	16 2 18	
Marlor .....	13 9 22	15 13 29	
McConnell .....	11 0 11	12 0 12	
Parker .....	16 0 16	15 0 15	
Fox .....	1 6 7	9 10 19	
Wills .....	17 0 17	18 0 18	
Mason .....	11 0 11	7 0 7	
Warren .....	11 6 17	11 5 16	
Von Nieda .....	13 3 16	9 6 15	
Snow .....	14 5 19	15 8 23	
Rainey .....	4 12 16	4 13 17	

McConnell took first money in a 25-bird sweepstake, getting 20 out of 25 targets, the scores being: McConnell 20, Warren 18, von Nieda 17, Till 15, Parker 15, Mason 16, Fox 8.

The team scores follow:

Yachtsmen's Club.		Farragut Club.	
Glazier .....	3 19	Till .....	3 33
Street .....	4 29	Hetteroth .....	4 34
Smith .....	3 31	Parker .....	3 34
Jones .....	2 34-123	Wills .....	2 37-138

**Meadow Springs Gun Club.**

MEADOW SPRINGS, Pa., Feb. 8.—With 90 out of 100 H. H. Sloan, of Meadow Springs Gun Club, won silver dipper for high to-day on actual breaks. A high wind hurt chances for high shooting. Scores:

Club shoot, 25 targets, handicap:			
Sloan .....	0 23	MacAlonan .....	5 17
Letford .....	2 21	Rudolph .....	8 71
Renner .....	1 24	Soley .....	2 23
E Chandler .....	3 20	Seebold .....	0 19
Deily .....	4 17	Henry .....	2 24
Thompson .....	1 24		

Harvey trophy, 100 targets, handicap:

Sloan .....	0 90	Thompson .....	4 84
Letford .....	6 63	MacAlonan .....	10 38
Renner .....	4 93	Rudolph .....	8 71
E Chandler .....	6 40	Soley .....	6 66
J. Chandler .....	0 14	K Letford .....	0 11
Blittersdorf .....	0 8	Seebold .....	0 33
Deily .....	8 34	Henry .....	4 45

**Greenwich G. C. vs. Country Club.**

GREENWICH, Conn., Feb. 8.—The Greenwich Gun Club took a fall out of the Country Club here to-day. Unfortunately only three crackers were present from each club. The Gun Club bunch won out with 237 to 216. Scores:

Greenwich Gun Club—Finch 82, Chard 78, Brush 77; total 237.  
Greenwich Country Club—Wills 76, Foster 70, Von de Ropp 70; total 216.

There was a vicious uncertain wind, which took the high possibilities rapidly away.

# WINCHESTER

## LOADED SHELLS and REPEATING SHOTGUNS

### Repeat Their Pinehurst Clean-Up at Houston

**SUNNY SOUTH HANDICAP:** Won by Dan O'Connell, of San Antonio, Texas, shooting Winchester "Leader" Shells and a Winchester Repeating Shotgun. Score, 96 x 100. W. R. Crosby was second with a score of 95, shooting from the 22-yard mark. He used Winchester "Leader" Shells.

C. G. SPENCER

**HOUSTON CHRONICLE CUP:** Won by Nic Arie, of Houston, Texas, shooting a Winchester Repeating Shotgun. Score, 99 x 100.

**HIGH AMATEUR AVERAGE:** Won by E. F. Forsgard, of Waco, Texas, shooting a Winchester Repeating Shotgun and Winchester Loaded Shells. Score, 1131 x 1205, which was the same as that made by Mr. C. G. Spencer, winner of High Professional Average. Mr. Forsgard also made the long run of the tournament, scoring 180 straight.

**HOUSTON POST TEAM MEDAL:** Won by Nic Arie and C. B. Haycox, of Houston, Texas, both shooting Winchester Repeating Shotguns, and Mr. Haycox also shooting Winchester Shells. Score, 50 straight, and 47 x 50 in the shoot-off.

**HIGH PROFESSIONAL AVERAGE:** Won by C. G. Spencer, of St. Louis, Mo., with a Winchester Repeating Shotgun and Winchester Loaded Shells. Score, 1131 x 1205.

## FOR CLEAN SCORES IN 1913, SHOOT W GUNS AND SHELLS

**Smith Gun Club.**

NEWARK, N. J., Feb. 8.—The Smith Gun Club held its monthly merchandise shoot at their traps at Wiedenmayer's Park. Neaf Apgar broke 25 straight. The following scores were made:

NEW ORLEANS: 321 Magazine St., Lee Omohundro, Manager.

### Crescent A. C.

BAY RIDGE, N. Y., Feb. 8.—A strong wind made high scoring difficult at the Crescent Athletic Club to-day. Sixteen members faced the traps. The feature was the club championship (scratch) at 200 clay targets. Thirteen competed, each man shooting four strings of 50 targets. It was a close thing from start to finish between C. R. James and Charles Blake. Blake finally won with a score of 162, one bird to the good. Scores:

Committee cup, 50 targets, handicap:			
W W Pell	4 46	G G Stephenson, Jr	4 40
J F James	0 43	D T Leahy	2 39
F B Stephenson	0 41	C R James	0 35

\*Did not shoot full 200 targets.

### Sea Side Gun Club.

BRIDGEPORT, Conn., Feb. 8.—The regular shoot of the Sea Side Gun Club was held at their club grounds to-day, and was well attended, considering the weather. It was a day of poor scores, as the strong west wind gave the birds a very irregular flight, causing them to do all sorts of zig-zag stunts. However, Senior came through with 93 out of 100, breaking the last 49 out of 50, a most creditable performance under the circumstances, and giving him a leg in each event, the handicap cup and the Island Brook cup. Wilson followed him a close second with 91. Lyon with 4 handicap, tied with Wilson, scratch, at 46 on the President's cup, 50 birds, Lyon winning the leg by one bird in the shoot-off. Scores:

President's cup, 50 targets:			
Wilson	0 46	Southey	0 39
Lyon	4 46	Kellogg	4 39
Cate	0 45	R Lewis	2 39
Senior	0 44	Hall	2 36
Vanstone	0 43	Sterling	4 34
Hull	2 43	Fox	2 32
*Gregory	0 41	*Hubbard	0 22
E Lewis	2 41		

Handicap cup, 25 targets:			
Senior	0 25	Hall	1 21
Vanstone	0 25	Southey	0 20
*Gregory	0 24	Fox	1 20
E Lewis	1 24	Hall	1 17
Cate	0 23	Kellogg	2 16
Lyon	2 23	Sterling	2 16
Wilson	0 22	*Hubbard	0 16

Island Brook cup, 25 targets:			
Senior	0 24	Lyon	2 19
Wilson	0 23	Hall	1 18
Cate	0 21	Fox	1 18
Southey	0 20	Kellogg	2 17
Vanstone	0 20	Sterling	2 16
Hull	1 20	*Hubbard	0 12
*Gregory	0 19		

T. M. A.

### Queens Country Club.

QUEENS, L. I., Feb. 8.—J. F. Simonson was high gun in the weekly shoot of Queens Gun Club to-day with a total of 96 out of 100. The scores:

J F Simonson	8 96	D K Morrell	8 74
J H Hendrickson	6 86	W Hyland	8 73
J M Kissam	16 84	J R Chapman	8 68
R L Law	12 82	C Vogel	12 62

Packer, Conn., Feb. 6.

FOREST AND STREAM grows better all the time. The articles by Prof. Niven and Reverend Rainsford are especially to my liking. Very truly,

E. P. ROBINSON.

### Montclair Gun Club.

MONTCLAIR, N. J., Feb. 8.—Members of the Montclair Gun Club shot a 25-target handicap to-day for the tenth leg for the fall trophy. It was won by Edward Winslow with (6) 22. A walking match at 10 targets was won by J. H. Francisco with 4.

The results in the handicap shoot were: Boxall, (3) 21; Batten (5) 19; S. T. Francisco (5) 20; J. H. Francisco, (5) 19; T. J. Badgley (10) 14.

In a practice shoot, George Batten broke 18 out of 25. The club elected the following officers for the year: President, I. Seymour Crape; Vice-President and Field Captain, George W. Boxall; Secretary, Edward Winslow; Treasurer, Chas. H. Bush; Counsel, T. J. Badgley.

An invitation was extended to the members of the Montclair A. C. to shoot with them during the next three months and also extended an invitation to the Somerville Gun Club to shoot a match in April.

### Demopolis Gun Club.

DEMOPOLIS, Ala., Feb. 5.—There was a meeting of the Demopolis Gun Club, Monday, Feb. 3, and the following officers were re-elected: Dr. E. B. Bailey, President; B. F. McCoy, Vice-President; W. C. DuFeu, Secretary-Treasurer; N. G. Winn, Captain.

The boys are all looking forward to the opening of the trap season, and we expect to hold one or two shoots this year. Shooting days will be Thursdays of each week. All visitors welcome.

W. C. DuFeu, Sec'y-Treas.

### Knollwood Country Club.

WHITE PLAINS, N. Y., Feb. 28.—Knollwood Country Club held its weekly shoot here to-day. McVoy broke 78, which with a handicap of 5, won the event. The prizes for the event were presented by W. H. Merrill. Scores:

McVoy	5 78	F B Mackey	0 61
W S Sykes	0 67	E G Fox	10 49
F M Wilson	10 64		

### Laurel House Gun Club.

LAKELWOOD, N. J., Feb. 8.—A number of the cottage colony were out to see the shooting for the handicap cup, the captain's cup, and the treasurer's cup, at the Laurel House Gun Club traps to-day, which were all won by Charles V. Murphy, who shot from scratch. Others shooting included Maxwell Lester, I. H. Hance, T. E. Tunnison, F. F. Vanderhoef, J. L. Bright and A. J. McClure.

## Rifle Shooting

### U. S. R. A. League Contest.

SPRINGFIELD, Mass., Feb. 5.—Following are the official scores in U. S. R. A. League contest:

Fifteenth match:

Baltimore	1082 vs. Shell Mound	1070
Dallas	1024 vs. Myles Standish	1026
Louisville	1039 vs. Pittsburgh	1109
Warren	1029 vs. Columbus	1052
Citizens	886 vs. National Capital	1082
Belleville	950 vs. Olympic	1111
Youngstown	1047 vs. Denver	1122
Cincinnati	971 vs. Boston	1091
Osborn	972 vs. Portland	1095
Tacoma	1013 vs. Springfield	1121
Providence	1077 vs. Manhattan	1126
St. Louis-Colonial	1075 vs. Philadelphia, undecided.	

Sixteenth match:

Shell Mound	1087 vs. Myles Standish	1056
Baltimore	1025 vs. Pittsburgh	1105
Dallas	1038 vs. Columbus	1042
Louisville	1044 vs. National Capital	1076
Warren	1002 vs. Olympic	1101
Citizens	896 vs. Denver	1136
Belleville	968 vs. Boston	1108
Youngstown	1031 vs. Portland	1101
Cincinnati	971 vs. Springfield	1136
Osborn	962 vs. Manhattan	1116
Tacoma	1024 vs. Philadelphia, undecided.	
Providence	1076 vs. Spokane	1137

Seventeenth match:

Myles Standish	1052 vs. Pittsburgh	1110
Shell Mound	1095 vs. Columbus	1063
Baltimore	1030 vs. National Capital	1101
Dallas	1016 vs. Olympic	1115
Louisville	1053 vs. Denver	1134
Warren	1038 vs. Boston	1108
Citizens	976 vs. Portland	1082
Belleville	1003 vs. Springfield	1114
Youngstown	1069 vs. Manhattan	1100
Cincinnati	986 vs. Philadelphia	1096
Osborn	979 vs. Spokane	1107
Tacoma	949 vs. St. Louis-Colonial	1076

Eighteenth match:

Pittsburgh	1127 vs. Columbus	1077
Myles Standish	1031 vs. National Capital	1092
Shell Mound	1095 vs. Olympic	1112
Baltimore	1026 vs. Denver	1130
Dallas	1038 vs. Boston	1108
Louisville	1077 vs. Portland	1105
Warren	1046 vs. Springfield	1112
Citizens	915 vs. Manhattan	1117
Belleville	969 vs. Philadelphia	1084
Youngstown	1080 vs. Spokane	1123
Cincinnati	986 vs. St. Louis-Colonial	1076
Osborn	967 vs. Providence	1061

The following clubs are tied: National Capital and Pittsburgh in the sixth; Boston and Olympic in the ninth; and most probably Pittsburgh and Boston in the twentieth.

By agreement the secretary-treasurer calls in other members of the executive committee where doubtful shots affect the result of a match. This was the case in the Boston and Olympic match, called a tie, and in the Spokane-Denver match, which was decided in favor of Spokane, 1118 to 1117 by four members of the committee.

OFFICIAL standing of the clubs at the end of the eighteenth match, with seven regular matches yet to be shot, and the shoot-off of ties for score and class, material changes will be made in this list:

Won.	Lost.	Won.	Lost.		
Manhattan	17	0	Shell Mound	7	10
Olympic	16½	½	Youngstown	8	10
Spokane	16	1	Providence	6	11
Boston	15½	1½	Baltimore	4	13
Springfield	15	2	Warren	5	13
Denver	14½	2½	Tacoma	3	13
Portland	13½	3½	Myles Standish	3	14
Pittsburgh	12½	4½	Dallas	3	14
Philadelphia	10	5	Cincinnati	3	15
National Capital	11½	5½	Belleville	2	16
St. Louis-Colonial	10	6	Osborn	2	16
Columbus	8	9	Citizens	0	18
Louisville	8	10			

#### ROLL OF HONOR.

The following shooters have made five-shot possibles in the League matches:

Armstrong, of Olympic; Berger and Coats, of Spokane; Crossman, of St. Louis; Douglas, of Manhattan; Fennel, of Boston; Fort, of Baltimore; Harris, of Shell Mound; Hosmer, of Boston; Matmiller, of Louisville; McCutcheon, of Denver; Prentys, of Olympic; Quicksall, of Philadelphia; Royal, of Pittsburgh; Rush and Stansbury, of Spokane; Stevens, of Myles Standish; Thomas, of Philadelphia, and Wakefield, of Springfield, one each.

There is on file a possible on target 41 of Match 20, without any identifying mark.

Burgeson, Dreher and Poindexter, of Denver, have two each, as have Scott, of Warren, and Taylor, of Boston, while Dolfin, of Springfield, has three, and Wilburn, of Spokane, leads with four.

Crossman scored the first one, Poindexter has one, with all inside the ring. Coats has the smallest group, all covered by a nickel, and Dreher one on the last target of one match and another on the first target of the next. Last winter Major Wakefield had two consecutive in the midst of one match. These are remarkable performances, but not strictly U. S. R. A. records. See pages 38 and 39 of Handbook.

J. B. CRABTREE, Sec'y-Treas.

# VICTORY

Follows the Use of

## SMOKELESS SHOTGUN POWDERS

At Houston, Texas, January 27—February 1

WON BY MR. D. O'CONNELL  
A SAN ANTONIO AMATEUR

96 x 100  
— WITH —  
DU PONT

Mr. W. R. Crosby with 95 x 100, shooting DU PONT, was second in this notable event.

THE MIDWINTER HANDICAP, PINEHURST, N. C.  
Won by Joseph Jennings, 95 x 100, with DU PONT.

Shoot DuPont Smokeless Shotgun Powders whose Regularity and Reliability are important factors in Handicaps where conditions demand Exceptional Marksmanship and Superiority of Powder to successfully overcome them.

### High School Championship.

WASHINGTON, D. C., Feb. 3.—The fourth match in the series of League matches for the high school shooting championship shows a record score made by the Deering High School, of Portland, Me., in their match against the Eastern High School, of Washington, D. C.

In Class A there is a triple tie for first place between the Iowa City High School, the Deering High School and the Morris High School, of New York City. The scores of the teams in this class for the fourth week's match are as follows:

Iowa City High defeated High School of Commerce, New York city, 948 to 857; De Witt Clinton High, of New York city, defeated the Baltimore Tech., 856 to 791; Morris High, of New York city, with a score of 917, won from Brookline, Mass., High by default; Deering High, of Portland, Me., defeated the Eastern High, of Washington, D. C., with a score of 965 to 805; Stuyvesant High, of New York city, won from the Western High, of Washington, D. C., with a score of 894 to 712.

In Class B, the High Schools of Portland, Me., and Salt Lake City, Utah, are tied for first place. The results of the fourth week's match for this class are as follows: Manual Training School, Washington, D. C., defeated

the Business High, Washington, D. C., 905 to 742; Springfield, Mass., Tech., defeated the Utica, N. Y., Free Academy, 902 to 743; Portland, Me., High defeated the Sault Ste. Marie, Mich., High, 919 to 869; Susquehanna, Pa., High with a score of 922, won from the Tucson, Ariz., High by default; Salt Lake City High defeated the St. Louis Manual Training, 935 to 624.

### Tie in Military Schools Championship.

WASHINGTON, D. C., Feb. 4.—The results of the third match between the military schools of the country for the rifle shooting championship and new national trophy are as follows:

Culver, Ind., Military Academy defeated the Kemper Military School of Boonville, Mo., 901 to 817; St. John's Military Academy, of Delafield, Wis., defeated the Kentucky Military Institute, 900 to 745; the Wentworth Military Academy, of Lexington, Mo., defeated the Missouri Military Academy, 917 to 659; the Bordentown, N. J., Military Institute defeated Nazareth, Pa., Military School, 854 to 750; New Mexico Military Institute defeated the Randolph Military Academy, of Morristown, N. J., 810 to 547; St. John's School of Manlius, N. Y.,

# Parker Gun Victories in 1912

**T**HE highest official average for the season of 1912 at both **Single and Double Targets** was made with **Parker Guns**.

As on every previous occasion, the bona fide **Championship of America** was won with a **Parker Gun**, Mr. W. R. Crosby scoring 198 x 200 targets at 18 yards rise. Same man, same gun, made the **World's Record**, scoring 98 x 100 targets at 23 yards, which is a truly wonderful performance.

Small bore **Parker Guns** are recognized as the Standard Game Guns of America and are gaining in popularity every season with the most progressive sportsmen. For full information regarding guns in gauges from 8 to 28, address

with a score of 866 won by default from the New York Military Academy, and the Harvard Military School, of Los Angeles, Cal., won by default from the Hitchcock Military Academy, of San Rafael, Cal.

The St. John's Military Academy, the Wentworth Military Academy, the Bordentown Military Institute and the St. John's School are all tied for first place.

## BY PADDLE AND PORTAGE IN THE ALGONQUIN NATIONAL PRESERVE

Continued from page 198.

Cache Lake. A fine cruise for four or five days' time. Good going and open portages.

Route No. 5.—Going south, as over No. 2, continuing through connected paddleways right through to the Lake of Bays, either at Dorset or to the Wawa Hotel, sending back outfit by train. This can be varied by going clear through to the head of the Kawartha Lakes to Coboconk, down through the Gull River and Mud Turtle Lakes, and continuing on as far through the Kawartha lakes as you wish to go.

### A Few "Been-There" Facts Worth Noting.

**CLOTHING.**—Take along two suits of light-weight flannel underwear and one suit of heavier weight; a couple of flannel overshirts (negligee style) of gray or khaki flannel and—my own preference—a suit of "Duxbak" (olive), which is both waterproof and light, at the same time also proof against tears from rocks and snags; both men and ladies are wise to wear these suits. For the feet I personally prefer a 14-inch sporting boot, several of which may be had to-day practically waterproof and fairly light.

**OUTFITTING.**—All the visitor need take with him is his personal clothing and fishing tackle. I may say that, after a fairly wide and varied experience, I found the two supply stores in the park to contain as good a variety of every requisite as one can find anywhere. The canoes are good, the tents of all shapes, sizes and

weights and the provisions fully up to the standard expected, even better.

I would recommend using the smaller tents, preferably those known as the "bell tents" for extended trips, and would also suggest including a rubber poncho for each tent and plenty of the heavy flannel blankets to be had here. The provisions are best packed in pantasote and linen bags, particularly those that are affected by moisture. Carry ensemble in waterproof dunnage bag.

**FISHING TACKLE.**—From a wide and varied experience, I feel warranted in recommending the genuine "Bristol" steel rod for use in this country. Quite as resistant and "snappy" as any rod of wood, they are practically indestructible, and the experience of breaking your only tip forty miles from steel and source of supply has never been my unfortunate lot as yet. You can tie them up in one of the dunnage packs, and when wanted, are always in working condition.

There are a great many who have used the "amalgamated wire" outfit of 24-gauge copper wire for hot weather trolling, although to-day the newer woven wire lines have superseded these; my own preference, however, is a good linen or silk line, such as the 16-pound test "Kingfisher," using two or three heavy sinkers; you can get down just as deep with such a rigging, and it handles much better on a reel than the wire rope, besides giving your fish a much better chance to put up a fight.

After a wide experience with all the many varieties of artificial minnows and trolls, the writer is convinced that none of these yield strikes as does the Archer spinner, using live minnow. Take along three or four extra ones (medium size), remove the gang hooks, leaving only those at the tail, and you will get results. The artificial wooden plugs will get strikes occasionally, but so seldom that they are entirely

outclassed by the genuine minnow, which can be caught in any quantity in these lakes. Take along a few minnow hooks and a string; at the camping points hundreds can be taken and kept in the minnow bucket for days.

**TIME TO VISIT THE PRESERVE.**—It is, to a large degree, a matter of taste and opportunity. Any time from the 20th of May until the end of September one finds both weather and fishing good. June is a bad month for flies and mosquitoes; but after July to these have disappeared. My own choice, if there is nothing to cause one to go before, is from the 1st to the 20th of September. The weather is then delightful and the fishing at its best.

**GUIDES.**—The question has often been asked the writer by inquirers: "Is a guide necessary here?" In answering this question it is necessary to know the trip planned by the party, the members' experience in handling loaded canoes and in wilderness travel. For the ordinary party of three or four—particularly when the ladies are included and the visit to these lakes is the first—I would recommend the engaging of at least one guide. He will eliminate all chances of getting astray, and at the same time take a lot of the camp work off one's hands.

Where the party consists of young men, and if they are experienced in handling canoes, it is feasible to cruise the preserve's waters, using one of the Provincial Department of Forests' and Lands' maps and a compass. Likewise, parties making either of the two preserve inns their headquarters, can make day outings to Smoke Lake, Joe, Buck and Doe lakes, etc., without guidance.

As I have said, however, for an extended trip to the north, it is safer and better from every point of view to employ a guide.

**STARTING IN POINT.**—For trips to the South one may start with equal advantage from either Algonquin Park Station or Joe Lake, as the run to Smoke Lake is good from either point. For the long cruise north, however, one has to go through Joe Lake, and while it is possible to paddle around from Cache Lake, I would say that it is best to outfit at the Algonquin supply store at Joe Lake, this being the logical key to the northern waters.

Another good trip for a week's outing can be taken by putting in at Rock Lake Station, camping in one of the several lakes reached from here. Mention might well be made of the small-mouth black bass fishing in Long Lake, reached from this point. Outfit would have to be shipped east from Algonquin Park or Joe Lake Station and dropped off at Rock Lake.

**ROUTES TO PRESERVE.**—The route from the East, New York or Boston, is G. T. R. to Montreal and thence over their Ottawa Division to the park; Pullman service. Time from Montreal 8½ hours; from Chicago, Detroit or Buffalo and Central State points, G. T. R. to Toronto, thence over the North Bay route to Scotia Junction, and east to park; time from Toronto, 9 hours.

PHILADELPHIA, Pa., Dec. 5.—*Editor Forest and Stream:* Enclosed please find a sketch of an incident of my recent gunning trip and also snap shots. Have read **FOREST AND STREAM** for over twenty-five years and it was never better than right now.

Yours very sincerely,  
W. H. EDDY.

## COLD FACTS AND DRY GRINS.

Continued from page 207.

shielding one from a view of the cottage, as the bench faced the pass.

My new-found friends had instructed me to get down on the bottom if I wanted to catch big ones. That is, I must fish without a float, and they said it was best not to use a sinker. My bait should be large and heavy enough to furnish weight for the cast.

Following their instructions I rigged up for a big one, using an 8-o hook, heavy wire snood and about four ounces of cut mullet for bait. The tide was on the ebb flow and was running out fast. When this is the case an old experienced fisherman quits the game, as he knows fish will not bite on the ebb. My friends informed me of this fact, but I did not believe them, thinking it was said to prevent me from fishing on Sunday.

I made my cast and got down to the bottom, and in a few moments my line began to run off my reel, but very slowly. I gave the fish plenty of time, thinking he would soon make his rush, but no rush came. After about twenty feet of line had been run out in this creeping manner, I checked the reel to feel the weight of whatever it was. The weight was there, but it felt like an old chunk of rotten wood. I determined to reel in slowly and did so and brought to the surface what looked to me like the "devil before daylight." The thing that had my bait was perfectly round and about the size of a peck measure. He had arms or pinchers that were an inch or more in diameter. I reeled him up on the dock, he holding on to the bait by his powerful claws. When I let him down on the boards, he released my bait, and rearing up on his hind legs, made motions with his claws as if he would attack me. He was between me and the walk way and had me hemmed in with water on all sides. His formidable claws looked dangerous and large enough to break an ankle bone. I tried to pass, but his sideways movements were so threatening I gave it up and backed away to the edge of the dock. I yelled to my friends for help, but they were very slow in responding. They were enjoying my situation. At last they started in my direction, coming up behind the crab, as I learned later the thing was. As they came up behind him, he advanced on me, and I, becoming panic-stricken, went overboard in water over my head and had to swim and wade to shore. When I reached terra firma, the crab had been captured by the parson by scooping him up from the rear, holding him in such a manner as to prevent him from reaching his hand with his claws. The laugh was all on me, and I submitted as gracefully as possible. The capture was a great prize, as the large giant crab is considered a great delicacy. Pass-a-Grille is noted for these crabs. Their claws are boiled until done, and then broken up with a hammer, and the flesh contained is delicious. The canning of the flesh of these crabs is quite an industry in Japan, and our imports from that country can now be found in almost every grocery store in this country.

After a change of clothing I went back to fishing. I felt that I had rather quit, but the "joshing" I received put me on my mettle, and I rather forced myself to continue.

The tide was now running out strong as in an hour or two it would turn back. I baited

and got down on the bottom again. There was nothing doing. After trying about for quite awhile, I settled down on the bench, and the warm sunshine and balmy air soon had its effect. I became drowsy and dozed off into a cat nap. Being a little "hard o' hearin'," and my pole growing heavy, I stuck the butt of it in a knot hole in the planking and took the line in my hand, letting it lie loosely across my palm, so I would be awakened by the feel of it crossing, if I did not hear the reel eliek. I do not know how long I was in this position, but it was not long, when suddenly my line ran out and over my hand so fast it burnt me, and the reel made a great screech. Jumping to my feet in a sleepy condition, and acting hurriedly or in the space of a few seconds, I made a tremendous jerk, throwing my pole over my right shoulder so hard the tip struck the boards behind me, and I nearly stood on my head. I had struck at nothing, or rather there was no weight on my hook to balance my tremendous effort.

At one time in my life I was a shipping clerk in a wholesale grocery store. I was shipping a hundred boxes of sixty pounds each of cheddah cheese one day, having an Irish porter load them on a dray. The cheese was in tiers of six boxes each and were lined up on the pavement ready for the dray to load. Pat was swinging his body rhythmically and accurately to the weight of each box as to the distance he must elevate it to the dray. One dray had been loaded, and the work being very hard, I allowed Pat, at his request, to go to the corner saloon and get a drink before commencing on the next load. While he was away I took the cheese out of the bottom box of one of the tiers. In due course of time Pat came to this box. When he grasped it and threw his body, muscle and weight against the supposed weight in the box, he turned a complete somersault.

"By the holy gum bone and Moses," he said. "Thet's ther forist toim in me loife I iver had wan dhrink ter make me ther daddy o' Hereules."

The joke I had worked on Pat was now being worked on me, and I did not enjoy it near so much as when I was the joker. There is a vast difference between a joker and a jokee.

As I recovered my balance, I exclaimed, "Missed him, by gum." And then I heard a giggle from behind the bench. Looking down behind it I saw the parson writhing and shaking with hearty laughter, and now there was a great guffaw from the cottage. The parson had

**HANDY OIL CAN HANDIEST**

It's the same Old Reliable 3-in-One Gun Oil you have always bought, but the can is **new**. Can't leak, can't break and just fits your hip pocket. Has patent self-sealing spout. 3½ oz., 25 cents. 3-in-One oils perfectly lock, trigger, ejector, break joints. Cleans and polishes barrels inside and out; also wooden stock. **Absolutely prevents rust.**

**FREE**—Write to-day for a generous sample. 3-in-One is sold by all hardware, sporting goods and general stores, in 3 size bottles: 1 oz., 10c; 3 oz., 25c; 8 oz., (½ pint) 50c. Handy Oil Can, 3½ oz., 25c. If your dealer can't supply you we will send a Handy Oil Can, full, by parcel post for 30c.

**THREE-IN-ONE OIL CO.**  
112 New Street New York

hooked a piece of wire on my line just beyond the tip of my pole, and giving this a big jerk, had caused all of my activity and trouble.

Did you ever notice the difference between being laughed at and being laughed with? There is just as much difference as there is between daylight and darkness. No one can enjoy a good hearty laugh more than I can, and few will suffer more when they are the objects laughed at. I screwed my face up into the semblance of a laugh, holding the muscles of my face and stomach tense and on a strain that in time became very painful. I would have been glad to discontinue my fishing by this time, but being bull-headed by nature, I couldn't give in. The tide was now turning, and I put on a fresh bait and made another cast. In a short time I had a strike and hooked a nice fish. My reel had worked loose in the slide on my pole, and in playing my fish it suddenly slipped out, and before I could catch it, fell off and went to the bottom of the bay. There I stood with a fish well hooked, and my reel at the bottom of forty feet of water, and the pole in my hands with the line running through the guides. I tried to do something with my fish by pulling on the line with my bare hands, but he was too heavy, and after cutting and burning them, I gave it up. I stood holding the pole wondering if I had tied the line to the reel barrel, and wondering if I would lose that borrowed reel. I was extremely uncomfortable and my jackassical friends were braying again as if they would burst with their merriment. I held on to the pole, and after a time the fish ran out all of the 600 feet of line and elevated the reel back to the slide groove. Quickly replacing it, I reeled in the fish, which was about broken down

# High Gun

AT DENVER, 1912  
HANDICAP, SEPT. 10-13

Mr. R. H. Bruns, shooting his

# LEFEVER

made the marvellous run of **283 without a miss.**

On the 700 single targets, including handicaps, Mr. Bruns scored **683 out of 700.**

The second day of the tournament on the day's program of 200 targets, Mr. Bruns and his Lefever gun scored **200 out of 200.** A world's record for ten traps.

On the 500 single 16-yard target for amateurs, Mr. Bruns scored **494 out of 500.**

## ANOTHER WINNER AT THE PACIFIC COAST HANDICAP

Mr. L. H. Reid, shooting his Lefever gun, won second high average with **381 out of 400.**

with his strenuous labor. He turned out to be a redfish, or sea bass of eight pounds. I laid him out on the dock boards and faced my tormentors with a better grace, but was still suffering considerably as I baited my hook and went back for another.

[TO BE CONTINUED.]

### "Breaking In" New Shoes.

THE method now adopted by the army for "breaking in" new shoes and making them conform to all the little quirks of individual feet, resulting in a perfect fit, is unique. After the shoes are fitted to the soldiers' feet they are made to stand in water to their shoe-tops until the leather is thoroughly soaked, then they are marched around until the shoes have dried on their feet, when forever after the new footwear is as comfortable as the proverbial "old shoe." This may seem a somewhat heroic method, but in practice it is found thoroughly effective.

Albany, N. Y., Jan. 20, 1913.

Editor Forest and Stream, 127 Franklin street, New York city:

Dear Sir—Referring to the publication in your issue of Jan. 11th, relative to the hunting and fishing of Murdock Mackenzie in New Brunswick, I can confirm all that your correspondent says, for Mac is the best guide ever; he is personally four kings in himself, and is a living proof of the old adage that "much can be made of a Scotchman if he be caught young."

Very truly yours,  
(Signed) ROBERT E. WHALEN.

### ARCHERY NOTES.

Continued from page 210.

His total score was 954, one-third of which is 318. His 50 yard score was 271, 47 less than would have been expected.

E. J. Rendtorff, Lake Forest, Ill.: "Some time ago you sent me a circular letter requesting my opinion concerning the point method of scoring. Following are my ideas concerning the matter:

"I consider the point method an obsolete, arbitrary, irrational method, with nothing in its favor and very much against it. My highest American round score is 89-637, and my lowest, where I made 90 hits is 90-442. If these had been shot in competition, the one miss would have detracted 3 points from the value of the highest score. Very evidently an illogical amount.

"On looking through my score book I found the following scores:

					Points.	
A	.....	30 128	30 210	30 206	90 544	6
B	.....	29 183	30 208	30 204	89 595	4

"B loses the match with a very superior score on account of one single miss at 60 yards. If he had made a hit instead of miss, the points would be: A, 4½; B, 5½.

"Now, the point I wish to make is that the value given to hits, as in the present point method, is irrationally high.

"In scoring the York round, the matter becomes still worse, for we then give equal credit to the hits and score of the 24 arrows at 60 yards, as we do to the 72 arrows at 100 yards. This is not only ridiculous, but constitutes a piece of rank injustice. The entire point system of scoring is a piece of stupidity, that frequently leads to bad feeling. It must be revised, and a more rational system substituted in its place. I believe the summation of score and hits is the proper solution."

H. B. Richardson, ex-president and former National champion, Boston: "There is no advantage, and much disadvantage, in the point method of scoring.

"Whatever may be the official rule in England concerning the use of the point system, it was not enforced in 1908, the year I was there. The match was decided on the highest score. When I got one more than Brooks-King, there was no discussion of the points won.

"There is no doubt in my mind but what the highest score is the simplest and fairest way of awarding the championship."

In the constitution of the British "Grand National Archery Society," as printed in the Archer's Register, it is stated that the championship shall be awarded by points. In Mr. Richardson's letter he says the point system was not enforced in 1898. "When I got one more score than Brooks-King, there was no discussion of the points won." It was probably seen at a glance which Englishman had most points. Mr. Richardson won, de facto, but not de jure, as he was not a member of the British society.

The consideration of the three leading scores made in that championship contest is very interesting, and I review them here for the information of those who know nothing about them.

Contains No Acid

# NYOIL

THE SPORTSMAN'S FRIEND

A Guarantee Against Rust

The best gun oil ever known. Cleanest to carry. Absolutely odorless. All sporting goods and hardware dealers. Large bottle (cheaper to buy) 25c; trial size, 10c. Don't wait until your old bottle of some other make is used up, but throw that away and buy a bottle of NYOIL now.

WM. F. NYE  
New Bedford, Mass.  
Ask your watch repairer whose oil he is using on your watch.

Will Not Gum or Chill

**Reload your rifle, pistol and shotgun shells and save half the cost of cartridges.** Modern shells can be reloaded many times. **Ideal Hand Book** tells all about reloading all makes and styles of shells; 140 pages of useful information for shooters. Free for three stamps postage. Matlin Firearms Co., 27 W St., New Haven, Conn.

Three highest scores:

	100yds.	80yds.	60yds.	Total.
H. B. Richardson.....	88 362	75 335	38 174	201 871
Brooks-King .....	77 319	72 342	43 209	192 870
J Penrose .....	69 253	60 276	46 266	175 795

Richardson won by 9 hits and 1 score. By points he won by 7 to 3. Of the 3 points, Penrose made 2 and Brooks-King only 1, though he made 75 higher score than Penrose made. Suppose Brooks-King had made two more whites, the scores would have been, Richardson, 201—871, and Brooks-King, 194—872, and Brooks-King would have won by 7 hits, score 1.

This would have been unjust to Richardson, for 7 hits are certainly worth more than 1 score. If hits and score had been added, Richardson would have won by 6.

Dr. Wm. Carver Williams, ex-president N. A. A., Chicago: "Replying to your recent note of inquiry about the use of the point system of scoring at tournaments of the N. A. A., I can tell you what I think of it in very few words. It is antiquated and preposterous, and is retained through a sentimental loyalty to a supposed tradition. If its origin were to be investigated, I doubt whether there would be even that ground for its existence.

"It not only works rank injustice in some degree in nearly every tournament, but it often makes the championship a question of luck pure and simple.

"These statements are amply proven by some figures that we once went over together. The retention of this system does not even have any influence in comparing American and English scores, because the winning of matches by this system has nothing to do with the comparative skill of those shooting at different matches. By all means let the irrational old fossil of absurdity be abolished."

James H. Pendry, President Chicago Archery Club: "Replying to your inquiry relative to best system of scoring to decide archery championships, after giving it some thought, I am heartily in favor of arriving at a decision by adding the hits and score. This method is simple, easily understood, and just to all concerned."

It will be seen from these letters that there is practically a unanimous majority, in favor of scoring championship contests either by gross scores, or gross hits and gross scores added.

I am surprised that no one has arisen to de-

# THE OUTDOOR LIBRARY

THE following is a selected list of *Forest and Stream's* books which are most suited to the taste of men and women who are fond of outdoor life—Shooting, Fishing, Natural History, Camping, Canoeing, Yachting. A good book does not wear out, but continues to give pleasure.

Catalogue giving full list of books will be sent on application.

## American Duck Shooting.

By George Bird Grinnell. Cloth, 630 pages. With 58 portraits of North American Swans, Geese and Ducks, Plans of Boats and Batteries. Fifty Vignettes in the text, and a Chart of the topography of a duck's plumage. Price, \$3.50.

## American Game Bird Shooting.

By George Bird Grinnell. This companion volume to "American Duck Shooting" treats of the upland game which American sportsmen shoot over dogs—woodcock, snipe, all the quail, grouse and turkeys. The volume is illustrated by colored plates of ruffed grouse and quail, and 48 full-page portraits of different game birds and hunting scenes, with a number of cuts in the text. Cloth. About 575 pages. Price, \$3.50 net. Postage, 25 cents.

## My Sixty Years on the Plains, Trapping, Trading and Indian Fighting.

By W. T. Hamilton ("Bill" Hamilton). With 8 full-page illustrations by Chas. M. Russell. New York. Cloth. 223 pages. Price, \$1.50.

## American Big Game Hunting.

The Book of the Boone and Crockett Club. Editors: Theodore Roosevelt and George Bird Grinnell. Illustrated. Cloth, 345 pages. Price, \$2.50.

## Hunting in Many Lands.

The Book of the Boone and Crockett Club. Editors: Theodore Roosevelt and George Bird Grinnell. Vignette. Illustrated. Cloth, 448 pages. Price, \$2.50.

## Trail and Camp Fire.

The Book of the Boone and Crockett Club. Editors: George Bird Grinnell and Theodore Roosevelt. Illustrated. 333 pages. Price, \$2.50.

Like its predecessors, the present volume is devoted chiefly to the great game and the outdoor life of Northern America; yet it does not confine itself to any one land, though it is first of all a book about America, its game and its people.

## American Big Game in Its Haunts.

The Book of the Boone and Crockett Club for 1904. George Bird Grinnell, Editor. 490 pages and 46 full-page illustrations. Price, \$2.50.

This is the fourth, and by far the largest and handsomest of the Club's books. It opens with a sketch of Theodore Roosevelt, founder of the Boone and Crockett Club, and contains an extremely interesting article from his pen, descriptive of his visit to the Yellowstone Park in 1903. Other papers are on North American Big Game; Hunting in Alaska; The Kodiak Bear; Moose, Mountain Sheep; Game Refuges, and other big game topics.

## Camp Life in the Woods.

And the Tricks of Trapping and Trap Making. Containing hints on camp shelter, and all the tricks and bait receipts of the trapper, the use of the traps, with instructions for the capture of all fur-bearing animals. By W. Hamilton Gibson. Illustrated. Cloth, 360 pages. Price, \$1.00.

## Modern Training.

Handling and Kennel Management. By B. Waters. Illustrated. Cloth, 373 pages. Price, \$2.00.

This treatise is after the modern professional system of training. It combines the excellence of both the suasive and force systems of education, and contains an exhaustive description of the uses and abuses of the spike collar.

## Danvis Folks.

A continuation of "Uncle Lisha's Shop" and "Sam Lovel's Camps." By Rowland E. Robinson. 16mo. Price, \$1.25.

## Uncle Lisha's Outing.

A sequel to "Danvis Folks." By Rowland E. Robinson. Cloth. Price, \$1.25.

## A Hero of Ticonderoga.

By Rowland E. Robinson. Cloth, 187 pages. Portrait of author. Price, \$1.00.

## A Danvis Pioneer

A story of one of Ethan Allen's Green Mountain Boys. By Rowland E. Robinson. Cloth, 214 pages. Price, \$1.25.

## In the Louisiana Lowlands.

A sketch of plantation life, fishing and camping just after the Civil War; and other tales. By Fred Mather, author of "Men I Have Fished With," "Adirondack Fishes," and "Modern Fishculture in Salt and Fresh Water." With portrait of the author. Cloth. Price, \$1.50.

## Forest Runes.

Poems by George W. Sears ("Nessmuk"). With art-type portrait and autobiographical sketch of the author. Cloth, 208 pages. Price, \$1.50.

## The Angler's Workshop, Rod Making for Beginners.

By Perry D. Frazer. Cloth, 180 pages. Four full-page illustrations, sixty working drawings. Postpaid, \$1.00.

A complete, simple and thoroughly up-to-date work for the guidance of the amateur rod-maker, carrying him from first principles through all phases of successful rod making. There is no theorizing or speculation. All terms are simple, and all kinds of rods and woods are treated of.

## Modern Fishculture in Fresh and Salt Water.

By Fred Mather, author of "Men I Have Fished With," with a chapter on Whitefish Culture by Hon. Herschel Whitaker, and a chapter on the Pike-Perch by James Nevil. Illustrated. Price, \$2.00.

## My Angling Friends.

A second series of "Men I Have Fished With." By Fred Mather. Cloth, 369 pages, with 13 illustrations. Price, \$1.50.

## Rhymes of the Stream and Forest.

By Frank Merton Buckland. Cloth. Heavy laid paper. Sumptuously bound. Postpaid, \$1.25.

A charming collection of verse by an author who knows and loves nature well. A particularly pleasing gift for fishermen, closely simulating in form and ornamentation the standard fly-book.

## Jack the Young Ranchman;

Or a Boy's Adventures in the Rockies. By George Bird Grinnell. Illustrated. Cloth, 304 pages. Price, \$1.25.

## Jack Among the Indians;

Or a Boy's Summer on the Buffalo Plains. By George Bird Grinnell. Illustrated. Cloth, 301 pages. Price, \$1.25.

## Jack in the Rockies;

Or a Boy's Adventures with a Pack Train. By George Bird Grinnell. Illustrated. Cloth, 272 pages. Price, \$1.25.

## Jack the Young Canoeerman.

By George Bird Grinnell. Illustrated. 278 pages. Price, \$1.25.

## Jack the Young Trapper.

By George Bird Grinnell. Illustrated. Price, \$1.25.

## Jack the Young Explorer.

By George Bird Grinnell. Price, \$1.25.

## Men I have Fished With.

Sketches of character and incident with rod and gun from childhood to manhood; from the killing of little fishes and birds to a buffalo hunt. By Fred Mather. Illustrated. Price, \$1.50.

It was a happy thought that prompted Mr. Fred Mather to write of his fishing companions. The chapters were received with a warm welcome at the beginning and have been of sustained interest. The "Men I Have Fished With" was among the most popular series of papers ever presented to FOREST AND STREAM readers.

## Houseboats and Houseboating.

By Albert Bradlee Hunt. The book contains forty specially prepared articles by owners and designers of well-known houseboats, and is beautifully illustrated with nearly 200 line and half-tone reproductions of plans and exteriors and interiors. A most interesting chapter is devoted to houseboating in England. Extra heavy paper, buckram. The price is \$3.00 net. Postage, 34 cents.

## The Art of Shooting.

An illustrated treatise on the art of shooting. By Charles Lancaster. Illustrated. Cloth. Price, \$1.25.

## Gas Engines and Launches.

By Francis K. Grain. A few pages are devoted to launches in general, with some excellent advice to the prospective owner of a motor boat; but the author's attention is given chiefly to explaining the principles, working and practical handling of the marine motor for the amateur, who does not care to trouble his head with involved technical information. Cloth. Illustrated. 128 pages. Postpaid, \$1.25.

## How to Build a Launch from Plans.

By Charles G. Davis. A thoroughly practical guide for the amateur. Shorn of all blind technicalities, it considers displacement, good construction and faulty stability, setting up the keel, framing and planking, with careful explanations. Each step is followed up to the care and running of the gas engine. Cloth, 9 folding drawings, 8 full-page plates, 40 smaller diagrams, 170 pages. Postpaid, \$1.50.

## Fetch and Carry.

By B. Waters. Tells minutely of the methods by which a dog, young or old, willing or unwilling, may be taught to retrieve either by force or "natural" system. Cloth. Illustrated. 124 pages. Postpaid, \$1.00.

## Nursing vs. Dosing.

By S. T. Hammond. A most practical book for the dog fancier, based largely on Mr. Hammond's observation that dogs, and particularly house dogs, suffer from too much medicine. Contents—Nursing, Cleanliness, Diet, Other Foods, Kennel and Exercise, Common Ailments, Diarrhea, Convulsions, Epilepsy, Distemper, Eczema, Need of Proper Care, Stomach, Vermin, Ear, Mange, Nervous System, Colic, Worms. Cloth. Illustrated. 161 pages. Postpaid, \$1.00.

## Training vs. Breaking.

Or Practical Dog Training. By S. T. Hammond. The author tells how to bring out the wonderful intelligence of the dog by kindness, as opposed to force. A clear, explicit work, which will appeal to dog lovers. Contents—First Lessons, Charge, Canine Accomplishments, The Whistle, Quartering, Retrieving, In the Field, Working in Company, Raising Puppies, Training Pet Dogs, Conclusion. Cloth. Illustrated. Postpaid, \$1.00.

## Training the Hunting Dog for the Field and Field Trials.

By B. Waters. Probably the most comprehensive work on the subject written, covers every phase of training and field trial preparation with reasons. Kennel Management, Breeding, Kenneling, Points of Judging. It is a work well calculated to enable the amateur to become a successful breeder and trainer. Cloth. Illustrated. Postpaid, \$1.50.

## Woodcraft.

By Nessmuk. No better or more delightful book for the help and guidance of those who go into the wild for sport or recreation was ever written. No one ever knew the woods better than Nessmuk or succeeded in putting so much valuable information into the same compass. Camp equipment, camp making, the personal kit, camp fires, shelters, bedding, fishing, cooking, and a thousand and one kindred topics are considered. Beyond this, the book has a quaint charm all its own. Cloth. Illustrated. 160 pages. Postpaid, \$1.00.

## Log Cabins and Cottages.

By William S. Wicks. This book covers building for the woods from the simplest shelter to the most elaborate cottage, cabin or house, and their furnishing and fitting. The details and directions are at once simple and comprehensive, and the illustrations are numerous and illuminative. Cloth. Illustrated. 44 full-page plates and numerous text illustrations. Postpaid, \$1.50.

## My Friend the Partridge.

By S. T. Hammond. A delightful reminder of crisp autumnal days in the covers. It tells of sport with the noblest of game birds, the habits and habitat of the ruffed grouse, with just the right touch of reminiscence and personal experience. Cloth. Illustrated, 150 pages. Postpaid, \$1.00.

**For the Convenience of  
FOREST & STREAM READERS**

we offer the following combination rates on two or more periodicals. Your subscription can be renewed now at these rates no matter when the present one expires. By following directions you can make your own selection and fix the proper remittance price.

**DIRECTIONS:** From the list below select your magazines, add their class numbers and multiply by five—the result is the cost in dollars and cents. For instance,

fend point system. When a person is brought into court charged with a crime, the judge appoints an attorney to defend the accused, if the latter is unable to employ one. Now, if after the archers have read these letters, no one volunteers to present the good in the point system of scoring (if there be any good in it), it is hoped that some one be asked to give us its history, and the reasons for its adoption.

BLUE GRASS FARM KENNELS, Berry, Ky.

**The Trail  
of the Bull Dog**

An account of the wonderful 50,000 mile auto trip of Charles G. Percival, M.D., written by himself.

**IF YOU LOVE OUT-DOOR LIFE**

you will revel in this book. It incarnates the spirit of the woods and silent plains, the mountains, lakes and rivers.

From the White House at Washington, where Dr. Percival delivered a message to President Taft, to the wilds of Alaska and the Yukon is a big step, but Dr. Percival made it, and was the first man who did by auto, traversing 44 states on the way, climbing 11,000 feet by auto, crossing deserts where he almost lost his life, and calling on Diaz, Madero, the Lord Governor-General of Canada, the Governor of Alaska, thirty-nine state officials and four hundred mayors.

**INVALUABLE FOR TOURISTS  
AND CAMPERS**

The authoritative information on food and equipment for out-door life given in this book is alone worth many times the price of the volume. And it will disclose to you places near at hand and far afield that you will wish to visit for fishing, hunting or sight seeing. Illustrated by over 200 splendid views. Reads like a tale of adventure where pleasures and hardships are agreeably mixed, yet is the true story of the most remarkable trip ever made by automobile.

**TROUT FISHING**—A proposition of interest to gentlemen desirous of having good trout fishing. My idea is to have FOREST & STREAM readers form a club of about twenty members, whose annual dues would be moderate. My property is situated in Rockland county, New York State, an hour and a half from New York City. It comprises 30 acres, half woodland and half meadow. It has two streams and two deep spring-fed ponds of about two acres each, which are stocked with trout and produce an abundance of natural food. If you are interested, write to Dr. M., care FOREST AND STREAM.

**Raising Carrier Pigeons.**

The scientific breeding of carrier pigeons in France received a great impulse from their practical utility during the siege of Paris, and this industry has since been followed with much interest. While the siege was in progress 363 carriers were sent out in balloons, of which 302 were liberated and 73 returned safely. They bore messages photographed microscopically on pellicles of collodion, which were enclosed in goose quills attached to a silk thread to the upper part of the tail feathers. The success of these experiments led to the organization in France of a military pigeon system. The Ministry of War maintains control over all the carrier pigeons in the country.

Colombophile societies exist everywhere in the republic, and their activities are under the control of the military authorities. Careful attention is given to the feeding of birds

destined for racers. Their usual diet is wheat, but as a contest approaches they are fed on small dried beans and maize, and are given water containing iron. Just before a race, some amateurs give their birds beechnuts and buckwheat, which are believed to impart special strength for the flight.

John Hall Osborne, our Consul at Havre, says the New York Sun, says that the training of the young birds begins when they are three or four months old. They are placed in a basket, taken a mile or so from home and liberated. A few days later they are again transported, usually in the same direction, but twice as far, and so on in successively longer stages until they are able to fly homeward, 100 miles or more. At the age of five months they can fly 500 or 550 miles in ten hours. They are not at their best, however, until the age of four or five years, when they can easily cover 600 or 700 miles.

The average velocity of a good carrier is twenty-seven to thirty miles an hour, although an instance is on record where a bird attained a speed of seventy-five miles an hour. Persons on whose property a carrier pigeon alights or remains must within two days inform the Mayor of the city in which they reside, indicating, if possible, the place from which it came. Serious penalties are provided for any one other than the owner who catches or kills or even attempts to catch or kill carrier pigeons.

Commercially, wireless telegraphy has completely superseded the pigeon post. Several years ago an intelligence system of this kind was used by the Compagnie Generale Transatlantique on its steamships plying between Havre and New York. Pigeon cotes were maintained at Havre, Cherbourg and Rennes, and pigeons from these three places were taken on board vessels leaving Havre. Some of each lot were released in the order mentioned; that is, birds from Havre left first, then those from Cherbourg, and finally those from Rennes.

Enough were retained for the return voyage, and these were released in the reverse order. Besides carrying official messages for the company the pigeon post was at the service of the passengers, the charge being 96 cents per message in addition to 19 cents per word. A considerable proportion of the birds released on board were lost at sea by reason of storms and other causes, and the system was abandoned in 1898, several years before the adoption of the wireless telegraph. A passenger who witnessed the release of the carriers on board a vessel of the French line says that the vessel had been out from Havre an entire day when a dozen pigeons were liberated from the basket. They rose in a flock to the height of the mast, described three circles to get their bearings, and then flew off in the exact direction of their home.

**Finds Fish Pond of Nero.**

Prof. Boni, who is supervising the excavations on the Palatine Hill, has made an important archaeological discovery. Beneath the Basilica or the Flavian palace he found two narrow stairways, leading to a "piscina," a water reservoir consisting of five large compartments. It is still intact, covered and well preserved by watertight cement.

The reservoir dates from the time of Nero, when it was used as a pond for sea fish, with the object of breeding exotic fish for the Emperor's table.

That the artificial rearing and hatching of fish was practiced in ancient Rome is attested by Pliny, who refers to a fish called scarns, found between Rhodes and Crete, but bred artificially.

On bravely through the sunshine and the showers;  
Time hath his work to do and we have ours.

—Emerson.

Pittsburgh	1110	vs. Boston	1110
Myles Standish	1033	vs. Portland	1101
Shell Mound	1001	vs. Springfield	1141
Baltimore	1039	vs. Manhattan	1120
Dallas	1065	vs. Philadelphia	1110
Louisville	1010	vs. Spokane	1118
Warren	1030	vs. St. Louis-Colonial	1085
Citizens	922	vs. Providence	1079
Belleville	1007	vs. Tacoma	—
Youngstown	1075	vs. Osborn	952

The contest Tacoma-Philadelphia in the sixteenth match goes to Philadelphia, Tacoma waiving its right to protest because of loss of Philadelphia targets.

The following clubs are tied on scores: National Capital-Pittsburgh; Boston-Olympic; Portland-Denver; Pittsburgh-Boston. These ties are to be shot off as soon as possible, and at least this month.

There are sure to be numerous ties for places in class due to matches won and lost, and these must be shot off within ten days of close of regular matches. Distant clubs will be notified by wire and targets rushed to them as soon as the result will permit.

A sufficient interval between the League and Indoor championships will be provided for to allow all shooters to rest up and get in good form for the championship contests.

J. B. CRABTREE, Sec'y-Treas.

**Intercollegiate Rifle Matches.**

WASHINGTON, D. C., Feb. 8.—The fifth week in the Intercollegiate Rifle Shooting League shows no change, as far as the leaders are concerned. There is still a triple tie in the Eastern League between Columbia, Harvard and Massachusetts Agricultural. In the Western League, Iowa State and West Virginia are tied for first place. The results of the matches shot last week in the championship series are as follows:

Eastern League.—Princeton defeated Norwich, 923 to 811; Columbia defeated Dartmouth, 917 to 883; Massachusetts Agricultural defeated University of Maine, 953 to 850; Harvard defeated Cornell, 946 to 877; Massachusetts Technical defeated Rhode Island State, 908 to 786; North Georgia Agricultural defeated University of Vermont, 914 to 912; Lehigh with 758 won by default from Clemson.

Western League.—Michigan Agricultural won from the University of California, 926 to 895; Iowa State won from Louisiana State, 944 to 863; Washington State won from the University of Nebraska, 866 to 839; Perdue won from Kansas, 938 to 799; University of Minnesota won from the University of Wisconsin, 932 to 902; Oklahoma, A. & M. won from United States College of Veterinary Surgeons, 871 to 852; West Virginia University with a score of 923, won from the University of Missouri by default.

Feb. 15.—The sixth week's competition in the Intercollegiate Shooting League shows several changes in the standing of clubs. In the Eastern League, the defeat of Columbia by Harvard breaks the triple tie for first place in that league. In the Western League, the University of Iowa and Michigan Agricultural College shot a tie. If the official count of the targets shows that Iowa lost the match, it will put West Virginia alone in the first place. The results of the matches are as follows:

Eastern League: Princeton University defeated North Georgia Agricultural College 947 to 920; Harvard University defeated Columbia University 952 to 885; Cornell University defeated Lehigh University 898 to 791; University of Vermont defeated Dartmouth College 910 to 904; Norwich University defeated Rhode Island State College 901 to 775; Massachusetts Institute of Technology with a score of 921 won by default from the University of Maine; Massachusetts Agricultural College with a top score of 959 won by default from Clemson College.

Western League: Iowa State University and Michigan Agricultural College tied with a score of 933; University of Minnesota defeated University of California 924 to 909; West Virginia University defeated University of Nebraska 942 to 849; Oklahoma Agricultural and Mechanical College defeated Washington State College 880 to 878; Kansas University defeated U. S. Veterinary College 808 to 751; Perdue University with a score of 922 won by default from Louisiana State College; University of Wisconsin with a score of 901 won by default from University of Missouri.

## Little Talks About Fly-Fishing

By THEODORE GORDON

CHAUCER (*mysteriously*):

Hush!

Mine own true mistress is sweet Out-of-doors.  
No Whitsun lassie wears so green a kirtle,  
Nor sings so clear, nor smiles with such blue eyes  
As bonny April, winking tears away.  
Not flowers o' silk upon an empress' sleeve  
Can match the broidery of an English field.  
No lap of amorous lady in the land  
Welcomes her gallant as sweet Mistress Earth  
Her lover. Let Eneas have his Dido!  
Daffydowndilly is the dame for me.

It is said that the present winter has been the mildest experienced in this country since 1843, and robins and bluebirds were deluded into coming North in January.

Such being the conditions, it was but natural that all members of the great fraternity of anglers should develop severe cases of spring fever at mid-winter. If buds were swelling and pussy willows were in bloom, it must be time to think of going a-fishing, and they longed to be up and away. But bide a wee, gentlemen, we must be content with the pleasures of anticipation for many weeks to come, and the weather gods may play us many a trick before All Fools Day. In fact, they have just begun to get busy and are now giving us a taste of real wintry weather. Except on the riffles and swift water the larger trout streams are now frozen over, and all the land is dressed in white. We are expecting a good crop of ice from the ponds and lakes. We must all do a great deal of thinking before the season opens on May 1, and in many ways this is a delightful part of the fisherman's year. He is looking forward hopefully and enjoying the best of sport in his mind. Anticipation plays a large part in the pleasures of fly-fishing, and there is really quite a lot of things to do. Rods and tackle must not be neglected until the last moment, and we must make good all deficiencies. There is much pleasure in inspecting the old stock of artificial flies and in buying or dressing new ones. Time flies fast always, and as the years pass, it seems to get away more and more rapidly. We have not days enough in the week to do all that we wish or intend to do.

Last season was a good one for caddis flies (*Trichoptera*), the one with wings sloping over the back. Many were dun-colored, light or dark. I did not see as many browns as usual. There should be lots of them in the evening. The stone flies were a fair crop (those flies with four wings that lie flat on the body, *Perlidae*), but were not often on the water in great numbers on the streams we fished. The well-beloved *Ephemera* (day flies) were very plentiful a few years ago, but they suffered much

from great floods that played the deuce with the bottoms of the streams where the larva are in hiding. These beautiful insects, with their upright wings, delicate bodies and long tails, are found in great variety, of many colors and of all sizes. Also there are usually a few of the mosquito-like crane flies about, and land flies and bugs are blown on the water or seek it as the ants do, when they take wing in fine weather. A little experience enables a man to select suitable artificial flies for the waters he fishes, but we prefer imitations, or typical flies that are life-like and natural appearing on the

A GOOD BASKET OF TROUT.

water. The best of these resemble well-known insects in size and color, with a very few exceptions, which may pass for bugs or be used simply as lures to attract the trout. Many old American wet flies kill well as floaters, if well hackled. In fact, any fly will float, if oiled, but we wish the dry fly to cock up and float just as the water-bred insects do. They are not afraid of the element in which they live during the greater portion of their lives.

Many of our insects differ greatly from those found in Great Britain, yet others are closely akin in color and size to English flies. All manufacturers have their own patterns, and considerable differences will often be noted in imitations which are named the same. We prefer to tie our own and like to think that we follow nature, but the longer one studies the insects, the less easily one is pleased with his counterfeits. We have been as much as two years at work before a pattern was really satisfactory, even though it killed trout. There is so much in the presentation of the fly and in keeping out of sight of the keen vision of the fish. Their eyes are practically their only pro-

tection, and they quickly detect movement, yet they cannot distinguish form quite as we do. No round-eyed creature can have the clear ideas of forms that man with his almond-shaped windows, enjoys, but they see mighty well. They feel pretty safe in a large body of water, but during drouths and in the smaller class of streams, one must use great circumspection if he desires the larger fish. Again, the fishing of broken water, where the surface is disturbed by current, wind or eddies, is usually much easier than taking trout from smooth, calm water, which flows slowly, and has no great depth. We scare lots of trout in such places and seldom know it. It is most interesting to fish for the larger trout that have seen many baits and flies and have probably been hooked several times. One difficulty is to find them in position to feed and in the humor to do so, and the next is to place the fly softly, without splash, and so accurately that it will float over them naturally an inch or two to the right or left of the trout's nose. Of course when lying near the top of a pool they may come some distance and take quite a large fly. They are often ready for any food in such places, and the disturbed water covers any deficiencies in the fly, and to some extent its presentation.

Long lists of flies are published and much advice has been given as to the selections to be made from these, but we like to know where, and at what time, a man expects to fish. Early in the season the trout will often take a big fly that might scare them later, and they are hungry and not very particular. Most of the duns are good, and one may need a brown or yellow-bodied fly. A few spinners may not come amiss, and many anglers like No. 10 hooks. I like No. 12, and often use smaller sizes on low water. One cannot lay down rules, as I have raised large trout to big flies when they disdained midgits. You might not care to disturb yourself to go for one peanut when there were no more in sight. Dun is often used to indicate the sub image of the *Ephemera*, but dun-colored or bluish-gray flies are found among the American *Trichoptera*, light or dark. In old times, dun seems to have meant red, as a dun bull or dun cow. In some parts of the old country "bloa" (pertaining to the color of the clouds) is used instead of dun. Lead color might be used for the wings of many flies.

We all have pet flies in which we have great confidence, and if one has confidence in his fly, he can devote his entire attention to presenting it to the trout in the most natural and attractive style. We doubt if we could kill good trout

# Xavier Mouchoir's Bear Hunt

As Related by Himself

By KEUKA

with some of the patterns used successfully by other anglers, and they might not care for some of our favorites. Yet I notice that some unknown flies quickly win their way, if well designed and natural in appearance. We are all hoping for a first rate season, with plenty of good trout for evcryone. There was much high water in the early part of the winter, but very little ice. Many fish were seen in the spawning beds, but naturally bred fry have a hard time of it. Many applications for fingerlings have gone to Albany, and we must all do what we can to restock the free waters, which are so hard fished.

When one considers the rapidly growing army of anglers, the problem of giving them sport becomes an interesting one. If we could conserve the streams and prevent the great damage done by floods and ice, if we could break the force of the current, stop the masses of shifting stones here and there, and have plenty of deep water and hiding places for the trout, much would be accomplished. The streams would support a greater head of trout, the food supply would be better and insects (and their larva, of course) would be more plentiful. Low dams of reinforced concrete, well placed and anchored, would not be costly, and would greatly improve the fishing. We all wish for trout of good size and to have plenty of them. On free water they are fished for in every way, while in preserved or private reaches the rule is fly-fishing only. This leaves the trout many opportunities to feed in safety, as they will not always take flies, and often feed freely in colored water. We must provide for all kinds of fishermen in these large streams if it is possible.

Every man requires a hobby of some sort to divert his mind from the cares and worries from which none of us is free, and fly-fishing is peculiarly fascinating in anticipation, realization and retrospect. One may begin as a child, or take up the rod late in life; it makes little difference in one's enthusiasm. Once a fly-fisher, always a fly-fisher, and I fancy that the man who sticks to the fly, uses nothing else, has the best of it, although he may not kill so many trout. Sometimes it requires considerable strength of mind to break the chain of business and go where we long to be, but "a stitch in time saves nine," and even a few days on the streams in the spring time, while the air is fresh and braeing and all the world is young, will do much for a man's health and strength.

The bit of sport and change of scene renew his youth, and he feels like a boy again.

The spirit of the boy lies dormant in many of us, and only needs to be released by just going a-fishing.

Good luck.

## Life in a Gay City.

BY HEK.

Let's see; what shall it be?

A bout at archery?

That's devilish, they say, and rather sporty,

Shall we go and bend the bow

And in our get-up show

An abandon that's quite summery resorty?

But, softly, don't you think

Those things lead on to drink?

This fly-casting, rogue, archery and cricket?

This prattle let us cease

And stir up the police—

This town of ours is positively wicked.

—Chicago-Tribune, August, 1910.

**D**URING a recent stormy, blustering February day, I was seated in my comfortable Morris chair before a blazing fire of birch logs, which headed the list of my Christmas presents (the chair, not the fire), and Xavier, who had come in a half hour before, was listening to the exciting narrative of a bear hunt in Michigan, which I had been reading aloud from FOREST AND STREAM for his benefit, with considerable embellishment of my own. Xavier remained silent and thoughtful for several moments after I had concluded, but finally without taking his eyes from the fire, spoke as follows:

"Ah'l was notis dat dare was be two kin' bear hunts; one kin' where mister mans hunt de bear, an' anudder kin' wherel mister bear hunt de mans. For my own places ah'l was not care much fur dat las' kin' o' bear hunt. It was mebbe too much lak' jug han'le. Ah'l was be gret persons for fair play. Some fellers w'at tell such terribly stories een dat FOREST STRIM lak' w'at you was jes' rid, 'bout some bears hunt w'at dey never was have, an' talk big Injun me. Bes' dey go wid me some tam an' I was show dem some kan o' bear hunt dat dey ken tell dere gran' ehilun, if dey be lucky nuff to live troo wid it. Ah'l was goin' tell FOREST STRIM some tam 'bout leetly scrap w'at me an' ma brudder Joe was have one tam wid dis kan o' beas' daoun ware he was live in Mississipp. Ma foi! ma foi! but dat was bad mix up fo' sure. Ever you hav' been down in Mississipp an' see dem olc canebrakes wat cover de hull State an' part de river, too? Hein? Wall, seh, bes' you not try for see him. Bes' let some oder feller go an' tell 'bout it. Wal, seh, it was good many year 'go dat ah'l was go down to viseet ma brudder Joe, an' ah'l was tek ma ol' long bar'l rifle 'long wid me, cos Joe was sen' word to me dat he hull councree was 'live wid game. (Ah'l was foun' out bime by dat he was lie lak de dev' 'bout dat.) Anyways, ah'l was git dare af'er 'bout t'ree four weeks of it, to ware Joe was live. So nex' day fus' I git dat way, we was plan fur go aout fur bear. Well, seh, dat was beat all countrees w'at ah'l never was see hinside mah hull laf tam. We was go troo t'ickets so t'ick you was be unable for see seven feets ahead nor seven feets to one side, nor two feets to de backward where you was be. Canebrakes an' canebrakes—twentee, t'irtee, fortet feets high; miles an' miles an' miles, widout see one houses or onc shanties; not one mans be out; if she was she mus' lose hissself biffore she can turn roun' in t'rec minnit. Joe was tell dat dese t'ickets keep plentec black bear layin' roun' loose, w'ich mak' plentec fun for hunter mans. He was so game w'en she runs, an' more game w'en he stan' up for fight, an' he was die so hard, an' live so veree long. Ah'l was t'ink some tam dat a bear was mak' up from all de toughes' kan o' t'ings w'at was lef' after all de udder animals was bilt of it. W'at you t'inks Mr. FOREST STRIM, ant ah'l was 'bout right of

it, or was you not have some acquaint wid dat kan o' folks? Wall, seh, mah brudder Joe she have wid hecm 'bout de longes' dog from hees nose to de en' of hees tail dat you can't fin' in all United States, beside Canady. He was not be so awful beamy, but hees bodee was be so long in de lengt' of it dat hees front legs was get tired half an hour biffore hees hin' legs ketch up wid it."

"Come, come, Xavier, you certainly are now going beyond bounds."

"Hol' on, ma fren' hol' on, mah brudder Joe say he ean prove it."

"Well, all right, old fellow, that ought to settle it, anyway; go ahead with the story."

"Wal, seh, Bots (dat was be de nam' of de dog) was not be much of a han' for hunt de bird, 'cept duek. Joe was say Bots be handy for duck hunt; she was be so long dat it was lak bridge, an' he could walk out on hees back an' git duck w'at fall in de crik or cross over some strim—*un bon chien, eh?* Joe was hav' hees back turn w'en he tell dese, an' mebbe he was mak' joke on dat subjack. Ennyways, biffore we was gon' gre't ways long from Joe's house, ah'l was fin' myself alone wid Bots. We was miss one anudder ah'l b'leeve in de big eanebrake, me an' Joe. W'en ah'l was foun' out dis, ah'l was feel veree hanxious 'bout Joe, an' not so very happy 'bout maself, needer one, in such a strange places. Ah'l was not t'ink very long tam, w'en Bots was begun growl lak' he was not so very happy 'bout it heeself. Bime-by she was growl more loud, an' den she was bark lak' he was see some t'ings he not lak' an' den he was mak' one gran' rush behan big log w'at was lay partlee in some water. Biffore t'ree minnit ah'l was hear mos' hawfullis roar an' graouls an' raeokit, lak' dare was big seuffle on han' behan' de log. Ah'l was stay befront de log wid ma rifle readee for shoot. In one minnit dere was cum aout from behan de log wid terribly noise an' howls ole Bots an' big black bear 'bout big as two-year-ole heffer, an' two, t'ree eubs—mebbe four of it—ah'l can't tell, now. Gee! gee! gee! but she was roar, an' ah'l see she was have Bots hin her fore paws an' was squeeze hecm lak' sider press; ma foi! But she was yell an' de bear was roar lak' seven lions hin' one eage hecu circus menagity. Ah'l was putty skare fur maself, ah'l was tol' you, an' ma han' was shake lak' ague cheel, but bamby ah'l was got good haim at de bear, so ah'l was not danger fur shoot Bots, an' w'at you s'pose, dat dam ole gun not go off. She was meesfire! Dat beas' quick lak' cat, she was spreng for me. Ah'l was feel her hot nasty bref hon my faees, an' de frof from hees jaws splatter hall over ma coat. Ah'l tol' you eet was not so verra pleasantly for Xavier 'bout dat tam. Ah'l was t'ink of mos' hevery t'ing w'at ah'l was never do hin ma 'hole laf, an' w'at dampfool ah'l was be for come aout here, ennyway. An' ah'l was t'ink haow ah'l was goin' be foun' to tak' ba'k to my famlee. Ba gosh! ah'l was pooty seek of

## Louis Akin—Nature Lover

By ROBERT L. WARNER

it. Wall, seh, de bear he was ketch me hon ma shoulder an' was jes' reddee for mash me wid udder paw of it, w'en Bots she begin to bodder de cubs; den de ole she bear wid hawful roar turn roun' an' go fur Bots. Den Bots he was mak' beeg rush for de bear hin' parts an' dis give me tam' for fin' out ah'l was not be kill', jes' almos', an' ah pull hout ma beeg knife an' when Bots was tak' care of de been hin front of heeself, ah'l git up close an' stick ma knife 'bout foot long into de beas' side an' she was tumble over hon de groun'."

"Was she dead then, Xavier?"

"Non, ma fren', he was not be verry dead, dat tam. Bots an' maself was verry bizzee peeps for 'bout t'ree-quarter hour, an' eet was question wid Bots wedder w'ich was goin' be dead duck betwixt of it. But ah'l was git good chance for stick ma knife hon de bear t'roat an' heart nine or seven times, an' she was mak' up her min' she better t'row up de sponge. Ah'l was holler for Joe an' holler, an' holler, an' bamby he was come, an' we was try for mak' up some plan for git de bear home, an' tak care de cubs. Joe he was keep de cubs, w'at he was not heat, till he was beeg bear."

"Was that the only bear hunt that you experienced on that visit to Mississippi, Xavier?"

"Ah'l was have two t'ree more beeg hunt, but ah'l mus' go naow, for hol' woman he was wait for me h'over to Joe Swop's. Ah'l mus' tell 'bout dat some nudder tam."

So, lighting his pipe and taking a twist with the red worsted "comforter" around his neck, Xavier took a reluctant departure.

### Moose in New Zealand.

WELLINGTON, New Zealand, Dec. 13.—*Editor Forest and Stream:* On the 24th of February, 1910, I wrote you with reference to the moose liberated in New Zealand about twelve years ago, and mentioned that another shipment, consisting of four stags and six hinds, were being landed and would be liberated in the Fiordland National Park on the west coast of New Zealand.

As I know you are interested in the acclimatization of these animals, I inclose, for your information, extract from a newspaper report dated 2d instant with reference to these animals:

"There is reason to believe that the moose liberated on the West Coast Fiord district are thriving and breeding. A member of the mining party which visited Dusky Sound on Friday told a Southland Times reporter that at Supper Cove they found the clearest traces of the moose. They were keenly interested to observe fresh marks of the cloven hoofs of the moose, which could not have been more than ten days old, and among the larger impressions smaller replicas were distinctly visible, showing that at least one calf was with the older beasts. This is the latest evidence supplied of the success of the attempt made to acclimatize the moose, and sportsmen will be keenly interested to learn that the animals seem to be doing well in their new home."

B. M. WILSON.

We like to receive brief letters from our subscribers telling of their exploits with rod and gun.

JAN. 2, at Flagstaff, Arizona, died a man than whom no more passionate lover of nature ever lived.

Thirty-two years ago come this spring, in the side yard of a tiny home at East Portland, Oregon, a small boy laid out upon the grass a row of brook trout which he had inveigled from the waters of Tyan's Brook during the long hours since daylight. Nellie Matlock, the little girl next door, stood on tip toes, with her chin between the pickets of the fence, to ad-

LOUIS AKIN.

mire the catch, and said: "Do you know Louis Akin? He is lots of fun and he just loves to go trout fishing."

I promptly hunted up Louis Akin, and three days later we played hooky for the first time to go trout fishing. We had played hooky off and on nearly ever since. I was planning to break away again with him in February for a few days upon his return to New York, when the wires flashed to me the dreadful news that he had laid down his brushes for the last time. A thousand camp-fires glimmer through the years, and through the smoke of each I see his face! In Maine, in British Columbia, Oregon, Washington—a background of forests, streams, glaciers and frozen peaks.

Very young an orphan, he had been buffeted by fortune, but took all blows cheerfully. Contemptuous from the start of conventions and civilization, a passionate lover of the wild, he would go unaccompanied, save by dog or cat, into the primeval wilderness of Washington and

remain perfectly happy without company for months at a time, trapping, exploring, painting. He was never alone in the wild, for everything alive about him out of doors afforded him company.

He had a strong vein of humor, and when no human friend was near, he had his joke upon the wild friends about him. I recall his having once arranged a little cage back of his cabin filled with strips of meat, and a door which he could lower with a thread from a distance. Thus he caught, one by one, the numerous Canada jays which lived with him, and after painting all their legs a deep red, released them. Thus he was able to identify them, and even twelve months later, upon returning again for his weeks of solitude in this remote spot, found his old friends there wearing their faded red leggings. He always had some such joke as this going on in camp.

Beginning with the merest rudiments of an education, he lifted himself steadily up until, after many struggles he had won recognition as one of the foremost of American artists of the wild. Beginning as a mere lad in a sign writer's shop at Portland, patiently and with painful slowness, he acquired the rudiments of his art, and aside from a short session one winter at the Chase Art School, New York, he was wholly self-educated.

His art came from within rather than from without. It was truly an expression of his soul—his attempt to speak in colors of that which he saw and felt and loved about him everywhere in nature.

He never was so much a hunter as a tracker, but always a great fisherman. I can see him now wading down the curving capes of a hundred streams, East and West, casting the fly, or bowed in adoration, kneeling to make Oriental obeisance as was our custom to the first ten-inch trout of the season.

Always he made friends, both white and red. Whether it chanced to be the Lilloet of the Fraser River, the Passumquoddy of Maine, or the Hopi of the desert, it was always the same. The Indians always seemed to find in him a kindred spirit. He saw nature with the eye of the Indian. He would pick up a new Indian language with amazing rapidity, and was always teaching the Indians words from other tribes. In two weeks' time, while sheep hunting in the Fraser River cascades four years ago, he had taught Jack James of the Lilloets a good part of the Hopi language, and they were constantly flinging Hopi expressions at each other to the great amusement of old Napoleon, who sat grimly by the fire, occasionally croaking with delight.

One evening when we were about sixteen years old, he came over to my house with a copy of FOREST AND STREAM. Said he: "Are you on to FOREST AND STREAM? This is the real thing." Thereafter we took turns buying FOREST AND STREAM whenever we could spare the price, and ten-cent pieces were none too plentiful with either of us in those days.

During the last ten years of his life he had

come into the full possession of his artistic powers. While he did well everything in nature, he found his best expression in the mountains and the desert and the life of the Indian. Recognition of this fact had inspired the trustees of the American Museum of Natural History to commission him two years ago to paint the mural decorations for the new Indian wing of the Museum. Upon this work he had been engaged in Arizona since the spring of 1911, and his preliminary sketches were nearly ready for exhibition at New York when he died. His many friends East and West are hopeful that these sketches will be preserved by the authorities of the museum, and committed to its walls in heroic size at the hands of some other competent artist.

I quote from two out of many letters received since his death. The first from one of his oldest chums, a surgeon in Oregon:

"I shall hold fast to his virtues, and they were many. Long an orphan, he had his struggles. His talent for art and for making friends saved him from mediocrity. He seemed to me so different from anyone I ever knew, it is difficult for me to conceive such a character. It makes my heart ache to think of it all, and I wish I had written him oftener. It is nine years since I visited him at the Cañon, spending a week on the brink, and he was the usual prince of good fellows."

And the second from the last friend who lived with him, a lawyer in Arizona:

"He has done his last work, his palette and easel, his cases, his blankets and his Indian trinkets are here before me in my big room as I write; his dog, his constant companion on his trips, is lounging here on his blanketed bed; a picture of himself, contentedly smoking a long pipe, looks down from his clothes closet (the picture done by an artist friend some time ago), but he will know them never again. The magic brush lies there in the case, but the wizard hand now rests forever, and its deft and magic touch is gone. And thus, dear sir, it is. Thus hath Death displaced him from the world that was all too lacking in its estimation of his genius and his worth. My ideas of art are indeed crude, but not so that I could not recognize in our mutual friend a master indeed. Oft have I come and silently watched him as he worked, careful not to unduly disturb him, as that wonderful mind working intensely, strove to make the canvas repeat its picture. Then sinking back in his chair with his longshoreman's pipe sending up wreaths of smoke, he would gaze intently to see what touch was missing, wherein the color blend was not just as he wanted it. If not satisfied, he would plunge in again, working rapidly all the time, until the canvas satisfied him. Then he would relax, forget his art, and read some light magazine for recreation.

"We can of course find countless reasons why he should have been spared, but futile all. It is our privilege to mourn, but the final reason yet all rests with Him who has given life and who has in this instance taken it away from one we loved. I am content to know and feel that he is at rest, that his soul is at peace; that he was not afraid to die; that whatever his faults, and I found them few, they were engulfed in the love he had toward his fellow man. Surely death cannot be the end of such

a life; surely the grave is not its goal; and feeling thus, I can only say, 'Farewell, dear friend, but only for a time, until we meet again before the God of us all, in whose charity we shall all dwell.'"

Numerous private collections at New York, Chicago, San Francisco, Portland and in New England contain examples of his art. I cherish in my own home many of his sketches in pen and in oils, covering a period of twenty years—everyone breathing a breath of wild, and culminating with his masterpiece, "Jack's Valley," in a splendid canvas depicting a late afternoon view across this valley toward Jack's Mountain and the glaciers, which flashed at right and left on the horizon—a very wonderful spot, the site of the furthest camping ground of our sheep hunt in 1909.

"The forest lies a purple plain.  
Great glaciers gleam afar,  
The river, like a silver chain,  
Winds down by bend and bar."

As one stands and looks further and further away into the depths of this picture, one almost feels the chill breath of the early mountain evening and the gripping stillness of the silent places.

Now he has crossed the great divide. The desert he loved has received his ashes. Surely, somewhere, somewhen, we shall again ride forth with him, delighting in the melody of his rich baritone rising through the passes ahead of the pack train, and hear again his cheery voice beside the camp fire in the evening shadows.

Beyond the loom of the last lone star, through outer darkness hurled,  
Further than rebel comet dared, or hiving star swarm swirled,  
Sits he with those who praise our God for that they loved His world.

## THE TOP RAIL.

REDLANDS, Cal., Jan. 18.—*Dear Grizzly King:* I have heard and read a good many duck stories, but here is one from this morning's Review that walks away with the bacon. What gets my goat is that the newspaper man tells it with such a straight face. He doesn't even so much as "crack a smile." Can you beat it?

REELFOOT.

SAN BERNARDINO, Cal.—Jan. 17.—The ice which covers the surface of Big Bear Valley Lake to a depth of five inches contains the bodies of thousands of wild duck and other fowl which were trapped while asleep when the recent cold snap struck the valley.

A party composed of Jim Jeffries, Ira Clark, Charles Martin and Gus Knight returned to the valley yesterday after several weeks in the valley. They report much zero weather. The birds were frozen to death in coves where they had huddled.

Local sportsmen are planning to cut the ice

in blocks and pack the cold storage ducks for shipment to the markets.

\* \* \*

"A story printed in the New York papers about two policemen who chased a collie dog out of Central Park and around several city blocks until they finally cornered it and shot it, because they thought it a wolf, escaped from the menageries," said a friend of mine, "reminds me of some experiences my grandfather had with wolves and dogs.

"Grandfather was an English remittance man who was attempting the agricultural conquest of the then northern Ontario from the vantage of a pigskin polo saddle at the time of his experience (the winter of 1860-61) about which I am writing. Returning, on horseback as usual, from the town of Barrie one winter night, he surprised quite a number of dogs by the roadside near his home, and thinking his own Scotch collie might be among them, he pulled up and gave the customary whistle. The 'dogs' took to the woods in a hurry. Grandfather realized that he had whistled to a pack of wolves, and so, when next he was returning from town by moonlight, he carried a good English fowling piece loaded with buckshot across the saddle in front of him.

"The wolves were surprised in approximately the same place, at the edge of a cedar swamp. Grandfather fired both barrels of the gun, picking a different wolf for each barrel and scored both times. One wolf was killed outright, but the other, hit behind, cried for all the world like a dog. Grandfather loaded up again and put it out of its misery; and then he found it was indeed a dog! Worse, it was his own valuable and well-beloved collie that he had brought with him all the way from old England. And the other? It was a cur that belonged to the worst enemy my grandfather had, a neighbor who perpetually warred with him concerning a line fence which neither would allow the other to build. The court made my grandfather pay \$100 for the cur. He had made the mistake of being loaded for wolves on a dog night."

\* \* \*

That reminds me of a bob-tailed collie we had on the farm when I was a boy. Pete was a terror to woodchucks, and he would whip any dog that came on the place. He was getting along in years at the time of which I am writing, but what he lacked in agility he made up in wisdom.

One day in January a butcher came to our place to look at some sheep, and he brought in his sleigh a lanky young lemon and white pointer, the first bird dog I had ever seen. The pointer jumped out of the sleigh and Pete immediately gave chase. But it was no use, the pointer made rings around him on the hard crust of the snow-covered field to which they had repaired. The pointer seemingly considered it a great romp, but Pete was in deadly earnest. I knew what would happen if Pete once got hold of the pup.

The chase continued while my father and the butcher were "putting up" the horse, and by the time they were ready to go to the sheep pens, Pete was "plumb tuckered," and as angry as a dog could well be. He gave it up and I began to think the old dog was worsted for once. But not Pete.

When the butcher was stooping over one of

# Effective Game Protection

By C. L. CHAMBERLIN

the sheep pens, Pete slipped up and, an unprecedented thing for him, he bit the man badly. Nor did he let it go at that. He stood ready to fight it out with the butcher, seeing he had been unable to catch the butcher's dog. My father had to shut him in the cow stable, for he wouldn't allow the butcher to move so much as a finger.

I've always thought the old dog must have got a good deal of satisfaction out of the encounter after all. At any rate, the butcher found reason to "lam" his dog right soundly before he left, and Pete surely heard the hulla-baloo the pup set up when he felt the horsewhip.

GRIZZLY KING.

## A Trip to Remember.

NEW YORK CITY, Feb. 10.—*Editor Forest and Stream:* I have just returned from my trip to Cocoa, Florida. It was one of the most successful and delightful trips I have ever taken.

We had good guides both on land and water. Our shooting was done mostly back of the St.

THE subject of game protection is receiving considerable attention from the people in several quarters. It is none the more likely to succeed because it is apparently becoming a fad. Much is said in farmers' clubs, nature study societies and other organizations about the best methods of protecting the remaining game birds and animals, but these same organizations overlook the practical and effective methods of preserving our wild life, while State Legislatures are importuned and pressure enough brought upon them to secure the kind of laws that seem most needful. While clubs and societies are writing and talking, wild life is decreasing, and by the time they have settled upon the laws most necessary and have secured their enactment, wild life will have disappeared entirely in many places. The thing to do is

and landowners or renters whose names appear below agree to enforce the trespass law against all hunters, not owners or renters of land whose names are found on the paper. Signers have the right to hunt on the premises of others by getting one annual permission, otherwise they may shoot only upon their own land. Outsiders may shoot upon the land thus protected only by getting permission from each member separately upon whose premises they wish to shoot. No one landowner may give permission for the land of another except in cases where an organization is effected with officers whose duty it is to grant permission to outsiders. Permission may be sold or granted free as seems best, but only to reliable sportsmen who are able to give references as to their responsibility.

An arrangement of the kind described will effectively shut out the irresponsible, shiftless, reckless class, those that usually do the damage to stock and crops. By strictly enforcing such regulations the game may be largely protected without another thing being done. But there are two or three other things just as effective and no more expensive that farmers may do. One is to locate the coveys that are left on the premises at the close of the shooting season and when winter is about to open. Few birds will wander much after that. They seek a swamp, thicket, or other natural protection and keep within short distance of it during the cold weather. The farmer may in an hour's time locate all the birds that are congregated on his premises for the winter. He should keep an eye on them to see if they are holding their own or if predatory birds and animals have also located them and are diminishing their numbers with the rapidity known only to the ability of a hungry fox, mink, or owl. If he sees where some of these prowlers are dining on the birds, a little inspection will decide the nature of the thief, and traps carefully placed will soon put a stop to their depredations.

As winter advances and the snow deepens, food also becomes scarcer, not only from much of it having been eaten by that time, but also through its being buried under snows having a crust too firm for breaking readily. More real game preservation can be effected at such times by scattering some screenings or other cheap, small grain around the runways and hiding places of the birds than in a winter of lobbying a politically hardened Legislature to pass impossible laws.

The people in the city who wish to do something along this line may open communications with some true sportsman or farmer, who has the interests of the game at heart, and send money for the purchase of grain on the condition that the farmer places it daily or every second day where it will do the most good. It does not require a large amount of grain to keep the life in a quail or partridge during the season of deep snows, and with the coming of a thaw the birds will be able to get down to the ground and obtain food for themselves.

With the coming of spring, the birds mate

MR. CORSA.

THE GUIDE.

MR. PARDEE

A DAY'S KILL.

Johns River, some twenty miles from Cocoa. The fishing was done mostly in the St. Johns River and consisted of large-mouth black bass, of which we caught fifty-two the first day, thirty-eight the second and forty-eight the third. The largest weighing seven pounds even, others six and mostly around five pounds. They were almost all caught trolling; a few casting.

The hunting comprised deer, turkey, quail and ducks. On a four days' trip inland we shot two deer, two turkeys (one twelve and the other ten pounds), a good many quail, two rattlesnakes, one about five feet long and the other four feet.

Ducks were very plentiful, and had we desired could have filled our boat with them almost any day.

Mr. Corsa and I are very grateful to you for recommending such a fine place to us, and we will long sing the praises of Cocoa.

R. E. PARDEE.

Montreal, February 3, 1913.

Gentlemen and Friends:

Now then, on the q. t., my good wife has looked after my paper for many years, but circumstances have placed many miles between us for the past year, and in a recent letter she says: "Your FOREST AND STREAM subscription must be due. Now, don't let it run out, for next year's Bible, it is the best on the table." That from a good woman is some recommend.

Inclosed please find check covering my subscription for another year.

Very truly yours, W. H. THURLOW.

No. 975 Frontenac St.

to act now in a way that will keep alive the fast vanishing species while strong and far-reaching laws are being secured.

People living in cities can do little active work since they have not the opportunities for personal work. However, it will require but a limited amount of organization with a single purpose in view to place things in a situation where city people, as well as country, may help by furnishing the funds required to put into practice the necessary operations. What are these means by which they may assist in preserving wild life and how may country people at little or no expense do much to keep alive the wild life among them?

The answer is not far to seek. There is just one thing which must be the forerunner of any successful movement of this kind. People everywhere must rid themselves of this feeling that "why should we spend our time assisting in the raising of game when other sportsmen will come in and shoot from our flocks?" There are laws in almost every State which prevent trespass, and these may be enforced if the landowners choose to see after it. The farmers have it in their power to do much for wild game on their premises with the laws as they are.

First, arrange a local subscription to which as many farmers subscribe as it is possible to secure. Let the heading state that the farmers

and nesting soon begins. Then the country resident can do much for the birds by way of watching their enemies and putting a load of shot into some prowling, half-wild house cat or blood-thirsty weasel. Then, too, the shotgun will prove an effective ally to put down the too numerous owl, hawk or other plunderer. Remember to spend a few spare moments in locating the nests of the birds as early in the season as possible. Then it is an easy matter to keep an eye on them while the eggs are being incubated and the little, downy nestlings yet too young to seek the safety of the tall grass when danger approaches. A well-directed shot often saves a whole brood, for once let a prowler find the spot and it stops only with the empty nest.

And so we say that the man or woman who wishes to do something for the preservation of game birds, yes, and animals, may do much along lines herein suggested. Later, when the laws have been arranged so as to permit the owner of the land to own the game as well as the timber and other natural products, we may find other ways of increasing the numbers, such as breeding, turning loose birds as breeding stock from other sections, and giving them the run of the farm while looking after their welfare, just as one does with his poultry. We have not yet approached scientific agriculture among the masses, so that every spot of land is used for some good purpose, and it is likely to be many years before that time is reached. Until then every farm has spots of ground that are not adapted to ordinary agricultural pursuits, which, by a little attention, may be made a covert for the raising of wild game in abundance.

We still lack laws which protect the farmer in the full enjoyment of his game and allow him to send his friends a brace of partridge or sell an honorable stranger a half dozen quail to be shot from his coverts. When the farmer realizes that he is full and complete owner of his wild game, and that it may be made a valuable asset, he will gladly spend the few moments required in assisting the birds and in keeping down their wild enemies. But, till that time comes, something must be done, or in most sections we shall have no wild game left to enjoy. Let us do what we can now that we may at least retain enough old birds to stock our coverts. *Now* is the time to act.

#### Inverted Trees.

A FOREIGN railway company has solved the plan of getting good shade trees in a short time, though they may be small.

These trees are so arranged that after two years' time they will give as much shade as trees in the ordinary way of setting out would give that are fifteen or twenty years old. The company gets a small elm tree, preferably digging this, roots and all, from the ground. The tree then is set, the top part being set into the ground and the roots are left in the air. The tree then grows, forms roots on what originally was the top of the tree, and the original roots that now take the place of the branches begin to leaf out and form a complete foliage very quickly.—Chicago Tribune.

#### The Defective Fish and Game Law.

ALBANY, N. Y., Feb. 3.—*Editor Forest and Stream:* Fully to reply to Brother Marshall McLean's attempted defense of the "Uniform" Fish and Game Law, would take too much of your valuable space, and, moreover, I stand by my original assertions. If Brother McLean helped draw the law, then he should at once amend the voucher which I copied in the Comptroller's office in December. In it he made affidavit that he worked on the marine fisheries section. Mr. Lawyer, in his affidavit, took the credit for the fish and game section. But admitting that these affidavits did not mean what they said, how does the trio who, it is now asserted, did the fish and game work, square the statement of Brother McLean to the effect that the "uniform" statute is a great and good production, the most perfect ever, with the fact that within a fortnight the Conservation Commission has had introduced more than 100 amendments to correct the law? Only partly to describe them took nearly two newspaper columns. Verily, I fear that my assertion that the "uniform" law was "based neither on scientific knowledge nor actual conditions" will have to stand. Leaving out the game section entirely, I should personally have been ashamed to have drawn the fisheries section. It was not based either on scientific knowledge or actual conditions. It was drawn in many respects to please men who run railroads and summer resort hotels, both of whom want early seasons to attract the early visitor. If Brother McLean wants any names mentioned in this connection, I can accommodate him. Denial of my assertion that "attempts to secure amendments were futile" seems best explained on Brother McLean's behalf by saying that he did not know. I was actively engaged in legislative newspaper work when the "uniform" law was in the making and know personally that this was true.

Protests from up-State fishermen were ignored. The president of the Lake George Association told me only last summer that his were suppressed. I personally know that no attention was paid to a protest made by the U. S. Fisheries Commission. The statement that matters as to Lake George have been adjusted by the Conservation Commission to the satisfaction of everybody has no foundation in fact. There is a very general dissatisfaction with the law as it applies to that lake, for the very reason that the law takes no cognizance of existing conditions, and is not in accordance with scientific teachings. The concession made last season by the commission, in deference to a demand from fishermen and property owners at Lake George, was for one year only. It never would have been necessary to make this demand if the law had been drawn by some one with a knowledge of the inland waters of the State. There is just as much need for considering the cold mountain waters separately as there is for making an exception for the warm waters of Long Island.

The Conservation Commission seems to have adopted the policy of denying that any defects exist in their pet statute. The fact that it has had to be practically made over within a year is sufficient answer to this attitude. It also should cause Brother McLean to sit up and take notice. This "perfect statute" was to do away with any more efforts to amend the fish and game law in the Legislature! Yet this very session the commission itself has had introduced more amendments than appeared at any two previous sessions. If the "uniform" law is a perfect work of man in Brother McLean's estimation, may hunters and fishermen be forever preserved from anything worse. Personally I much regret that Brother McLean and his associates feel it necessary to hide behind such men as Dr. Hornaday and Dr. Palmer when the defects of their work are pointed out in good faith.

JOHN D. WHISH.

#### American Game Protective and Propagation Association.

OPINIONS on winter and spring shooting of wildfowl by twenty-nine experts have been compiled and published by the Long Island Game Protective Association to show why the proposed amendment to the conservation law, making it legal to shoot ducks on Long Island during these seasons, should be defeated. These opinions are from eight State game commissioners, nine prominent ornithologists, seven grange and association officers, two editors, one college president, one State Senator and one attorney general, including such prominent men as Edward Howe Forbush, State Ornithologist of Massachusetts; Frank M. Chapman, of the American Museum of Natural History; Dr. George Bird Grinnell, T. Gilbert Pearson and Dr. E. W. Nelson.

Commenting on this, the following statement has just been issued by the American Game Protective and Propagation Association of New York:

"It seems incredible that there should be a movement on foot at the present time to put New York State, which is now the leader in good game legislation, back in the ranks of those that allow duck shooting at a time when the killing of one means the destruction of a whole flock. If the proposed amendment should become a law, ducks could be killed up to the 31st of March, long after they are mated, and when, in some cases, they have begun to nest.

"Winter shooting is hardly less objectionable, for during January and February the birds have much to contend with in the forces of nature, and shooting at that time drives them about, prevents their proper feeding and mating, and forces them away from the district. If the small number of men on Long Island who wish special legislation in favor of selfish interests are successful in putting it through, the fall shooting throughout the rest of the State will be only 50 per cent. as good as though the birds were protected for the remainder of the year.

In other words, these market gunners wish to profit at the expense of the duck shooting of the whole State of New York.

"When the United States Senate has just passed a bill for Federal protection of migratory birds, in support of which testimony concerning the disastrous results attending spring shooting was presented by practically every game commissioner and every prominent naturalist and sportsman in the country; when the people throughout the nation are becoming thoroughly aroused to the necessity for restricting shooting in order to save from destruction the valuable natural resources represented by our migratory birds, it is not the time for market gunners and a few so-called sportsmen to attempt to pass a law permitting them to break the rules against killing in the breeding season which any true sportsman would respect whether forced to do so or not."

If the Legislature of New York State passes either of the bills introduced by Assemblyman Fallon and Senator O'Keefe, after having sent a concurrent resolution to Congress endorsing the Weeks and McLean bills for Federal protection of migratory birds, it will not only put itself in a ridiculous position, but it will have dealt a direct blow to the cause of conservation which it will be impossible to justify in the eyes of any right-thinking citizen of the State.

### The North Carolina Game Law.

HENDERSONVILLE, N. C., Feb. 6.—*Editor Forest and Stream:* I wrote you some time ago that an effort would, I thought, be made to place this State in line with other States in the matter of a State-wide game law. I fear we shall again be disappointed. From what our county member writes me, it looks like the same old crazy quilt—the county system—every county for itself and the devil take the hindmost. It seems a pity that experience counts for so little in a thing so important as this—the conservation of our game. Certain it is that the county laws accomplish little, if anything. Our season opened Jan. 1, and empty shells were in the fields, but not a covey of birds could I, with the help of my setter, find in a stretch of a mile and a half of country that several years ago I could have bagged from ten to twenty partridge (quail) easily in a short afternoon shoot.

A game law without game wardens, who attend to their business, is a farce and nothing more. Guns could be heard in any direction from or before the first day of November, which no doubt accounts in a large measure for the few partridges to be found after Jan. 1. During the second week of the month myself and a friend tramped nearly all day in the Flat Rock neighborhood and I never even got a shot at one.

On Jan. 2 three of us in another part of the county managed to bag twenty-four, and this is the best I have seen this season. I fear the trappers of partridges think that a real effective and wise game law will stop trapping and aid the true sportsman, hence better no law than a good one, if the birds cannot be trapped and sold. Numbers of robins have come and have heard them singing.

ERNEST L. EW BANK.

### An Open Winter.

EAGLE LAKE, Essex County, N. Y., Feb. 10.—*Editor Forest and Stream:* This has been an open winter here thus far. Up to Feb. 1 we had only six inches of ice in this lake, away up 1,100 feet above Lake George in this same county. Since then the cold weather has thickened the ice about four inches more, and all are at work getting it into houses of the summer residents.

Large catches of perch are made through the ice, one of sixty and another of eighty having been lately made. The bait is usually minnows or perch eyes.

There were a large number of deer all about

stock our covers with pheasants from the State farm, but the birds will have little show for reproduction, unless these "quill-pig" pests are exterminated. In some parts of this town it was formerly impossible to have any field sweet or evergreen sweet corn on account of the ravages of these pests. One weighing more than forty pounds fell to a steel mink trap set by the writer, who baited him right in a garden patch of corn in this town.

The Eagle Lake Property Owners' Association is interested in a project to have the commission erect a fishway at the outlet of this lake, to save the quantities of pike and bass that go over the small dam there every spring in spawning time. This has gone on until the

### IN BERING SEA.

Photograph by J. C. Tolman, Senior Game Warden, Kenai and Alaska Peninsula.

here last fall, and very few were shot, owing to lack of tracking snow this year. The Ticonderoga-Schroon stage has run on wheels all winter so far, something unheard of before, in the writer's memory, at least. The grouse are seen daily feeding in the tops of the "hard hacks" and birches, and offer a most tempting mark. They are "budding," as their feast in the tree tops is called locally. There were more birds of this kind in this section last year than have been seen for twenty years. The law against unrestricted bags and the non-sale of game is one cause for their abundance. Another cause is the scarcity in this part of the town of the devastating hedgehog, which goes nosing around among the nesting birds in the spring and ruins hundreds of nests, eating every grouse egg in his way. I noted also where ten or twelve fine hemlock trees were destroyed, all close together, by this rodent, the other day. An effort should be made to have the bounty of twenty-five cents per hedgehog killed restored by our county supervisors. Unless this is done, these animals will destroy our outlying corn fields again, and we shall soon see the grouse diminishing again until they become almost exterminated, as they were prior to this year.

The Conservation Commission is trying to

lake is almost depleted of large pike. They all get into the creek and are either speared or die of starvation. A few small ones run down to Paradox Lake, I am told. SPORTSMAN.

### England's 1912 Season.

ONE more game shooting season has come and gone, and, taken on the whole, the season of 1912-13 has proved at least rather better than a fair average one. Grouse were both plentiful and free from disease, and some record bags have been made on the more celebrated moors. Partridges also were numerous in many districts, although of course the heavy rains of the summer played havoc with the young broods in the low-lying districts, especially in certain portions of East Anglia. Pheasants, both hand-reared and wild, did remarkably well, and unusually heavy bags have been shot at Holkham, Elveden, Raynham Park, Bylaugh Park, Quiden, Tichborne and other well known preserves. The law still permits the shooting of wildfowl until and including March 1, while a little sport may still be had with the wood pigeons and rabbits. It is almost time to stop shooting the latter, for we have already seen a number of young rabbits running about outside the coverts and warrens.—Shooting Times and British Sportsman.

# SEA AND RIVER FISHING

## Cold Facts and Dry Grins

By MIQUE WEBB

(Continued from last week.)

I DID not have long to wait. Soon I had a bite that seem to be a heavy one. I gave him plenty of time and then struck hard. I felt the hook go home, and at the same time felt the weight of a fish that made me sit up and take notice. There was a little rush, and then a tremendous lunge that caused me to throw both thumbs on the thumb stall. I came down hard on the line with all my power. I had my pole well up and was giving him all the strain I could get out of my tackle, but to no avail. He seemed to have an engagement somewhere else as he made a bee line from me. In his mad rush he came to the surface for a moment, and we could see that my opponent was a twenty-foot shark. Someone yelled, "Save your line!" "Cut loose!" etc. I was very busy with both hands and could not get out my knife. The parson was standing near by, but for some reason did not attempt to interfere, as he was so busy laughing or for other reasons he did not produce the weapon of severance. That shark had an engagement, as I have stated, I think, with a dentist in Yucatan, for he did not make a turn or bobble while he and I were connected. My reel was humming, and from underneath the leather there was a dense column of smoke ascending from the friction on the line. Momentarily I expected to see it blaze, and believe it would have done so but for the fact that the whole line had but a few moments before been submerged when I was handling the redfish.

It is astounding how many thoughts can pass through the human brain in so short a time when that brain is under acute excitement or sudden alarm. I thought of a thousand things while that line was running off my reel. Mainly, however, my thoughts were, what would happen to Mique when the end came? I knew I had fastened the line to the reel barrel, but how? Had I tied it around the barrel or had I tied a knot in the end of the line as a woman does her sewing thread after running it through her needle eye? There is a needle eye in the barrel of a reel, you know. I gave it up, but prepared myself for what would come. I braced myself against the shock, but fully expected to go overboard, and if I did I had made up my mind to go on to Yucatan with that shark. It was preferable, anyway, to being laughed at.

The end came suddenly, and with no shock at all, but instead a report as loud as the discharge of a pistol. I had tied a knot in the end of the line, and when this knot struck the eye in the reel barrel, it passed through, being water-soaked and much too large for the hole it must pass through; it was like the wad out of a popgun. My reel was stripped and I had

absolutely nothing to show for six dollars' worth of the best fishing line I ever used, except a pair of slightly scratched thumbs and a very dry grin.

I gazed for a long time at the water that could hold a monster, that could hold a fish and that could do me as that fish had done. I want my readers to remember that previous to this time I had never caught anything larger than a three-pound bass, hence you can imagine my feelings.

When I turned from my experience I beheld the parson lying on the boards of the dock, rolling from side to side in an agony of laughter. He had gotten beyond the noise-making part of this pleasant occupation. He was now like a man with an ague. In his paroxysm he was rolling from side to side, and was at times very near the edge of the dock. I was exasperated. These fellows had laughed at me until my mouth looked as if I had been eating green persimmons. I was getting very sore, and must confess I lost my head a little. I was getting ready to do murder. I dropped my pole and empty reel in disgust, but I could not keep my eyes off of the parson. He was very near the edge of the dock, and it suddenly occurred to me, I admit, with some fear at first, that he would roll over the edge, and then I didn't care if he did, and then I wished he would, and the next moment I was at his side, giving him a sudden twist and a push. Over he went, striking the water lengthways, and with a mighty splash. My heart stood still for a moment. Could he swim? Yes, for he was at the surface in a moment, and I knew he was at home in the water. When he went down, his mouth was open, and as he came to the surface, he expectorated a stream of water an inch in diameter and about three feet long, and then struck out for the shore with a long, easy stroke, still laughing as if he could never be exhausted in that nauseous practice. I viewed him with a sickening heart, and almost a wish that he had never come up.

"Laugh and the world laughs with you;  
Cry and the world laughs on."

I thought of these lines and tried to screw up my face into some semblance of a laugh, but it was too dry even to produce a substitute.

My experience made me think of a time when I was on the other side of the fence on a similar occasion. It was at a summer resort near a small country town down South. There were some twenty-five or thirty families at the resort, and the most of them were there to drink the medicinal waters, but there were some who had other business on hand, such as look-

ing after the daughters of the afflicted. I belonged to the latter class. Fathers and mothers were there for their health and their children from necessity. Entertainment was scarce. One day an advertisement was scattered through the hotel, stating that James McFadden would produce "Hamlet" at the town Opera House that night. Children five cents; grown-ups ten cents. Hamlet at five and ten cents was too cheap to miss, and we all decided to go. We went. Young ladies and young gentlemen had seats in the front of the house, while the old folks were in the rear. My sweetheart and I were favored with seats in the front row. The "Opry" House had formally been a livery stable. A stage had been erected in one end, but beyond this nothing else had been done toward improvement, the whole being so crude that the refined senses of the city hotel folks had been shocked into laughter. As the majority of the girls were at the giggling age, anyhow, it would have been hard to keep them from laughing at a funeral. The footlights were coal oil lamps placed at intervals on the edge of the stage.

Mr. McFadden came out on the stage, but at first we did not recognize him as the actor. He was a double-fisted Irishman, with a red head and freckled face. His nose did not improve his facial beauty, and looked as if it had cost him a great deal of money. He was still improving it, as we soon saw that he was about half drunk. In addition to his natural beauty, a nickel shave had helped a great deal. He looked as if his face had had an encounter with a barbed wire fence, and the fence had come out a good second best. I think he must have been shaved with a butcher knife. He was a comical object, but entirely serious; the only serious person in the house. He balanced himself by spreading his legs very near as far apart as he could get them and addressed his audience as follows:

"Ladies an' gent'men—hic—Oi wull now guv yer—hic—Ham—hic—lit's serlilerkoy." He accented the Ham in a deep bass voice and let out the "lit's" like escaping steam. We were all holding down the laughter as best we could up to this point, but now it was too much, and we exploded. We could stand no more. Our safety valves gave away or the boilers would have blown up.

Mr. McFadden's face assumed an expression of pained surprise. He looked so hurt over the interruption that the laughter died away into giggles and snickers here and there. We on the front bench were suffering. The girls had their handkerchiefs stuffed in their mouths, their heads hanging down or tucked away in the crooks of their arms or were looking backward or in some way or other were trying to avoid a direct gaze at the actor. When the hush settled on the audience and quiet reigned again, he attracted my attention by pointing his index finger directly at me, and in angry tones said: "What in 'ell yer laffin' at?"

This was more than the house could stand and a roar of laughter was the answer to his query. His embarrassment now was so apparent that it was painful to look upon, and it was several minutes before he spoke again. Then he said: "This ere aud'n'ce doan' want no Hamlit. It wants Punch and Judy."

This brought down the house again, and we on the front bench broke for the door and soon the whole audience was out, following our lead. We strung out for the hotel, and soon there was a mile or more covered by laughing, rollicking people. The whole performance had reminded me strongly of the Duke and King in Mark Twain's Huckleberry Fin. For several weeks later any one could cause a roar of laughter at any time of day or night by merely saying "Ham-lit's" around that hotel or town.

But the shoe was on the other foot now, and I could realize how Mr. James McFadden felt that night.

When the parson came up from his plunge, I was relieved to see he could swim, and when I saw him commence where he had left off before he went down, I immediately recognized the fact that I was in bad. I began to cast about for a hiding place. I thought of going up to the point of Long Key about 500 yards away and trying my luck there. No sooner thought of than done. Snatching up my tackle and filling a bucket with live bait from our wire tank, I went over to shore and around to the back of the cottage to the kitchen and had the cook give me a little cold lunch and struck out for the point.

I rigged up my new line, and to relieve my tortured mind and body, began fishing at once, and soon was having the best of good luck. The tide was rising fast now, and fish of all kinds were biting fine. To keep my bait alive I had submerged my bucket in the water's edge. The sand was steep and shelving at this point, and I must move my bucket every few moments or the rapidly rising water would prevent my reaching it. I had been fishing for a couple of hours and the excitement of catching fish had relieved my sufferings from excessive dry grins. It was about the middle of the afternoon. I had just landed a nice bluefish and wanted a fresh bait. Going to the bucket, I stooped over it, after moving it back, and securing a nice sardine, impaled him on my hook. While fastening the top of the bucket, I let him dangle back in the water, and as my line was reeled up short, my pole being held between my knees in a perpendicular position, as it took both hands to handle the bucket, the bait was not more than six inches from my face, just on the top of the water. Suddenly a whole barrel of water came into my face, and all over my body, drenching me to the skin. I rolled over backward on the sand, and the first thought that entered my head was that my tormentors had played another mean trick on me, and was sure of it when looking backward I saw them ranged in a row about twenty feet in my rear. I was ready to fight now, but on glancing down at my reel, which was lying at my feet, I saw the handle digging up the sand and the barrel revolving rapidly and the line running out fast.

Jumping for it I was soon playing a good fish.

Fish feed in close to shore on rising water. The one I now had proved to be a twenty-pound

redfish. He had been attracted to my minnow and had struck in and played the mean joke, but he paid for it with his life. I think he was a relative of the parson's. If I could have strung the parson on the same line with him, I would have been more than pleased. I could have enjoyed this catch very much, but for that bunch of howling and screeching yaps in my rear.

My bait bucket was gone and I had too much objectionable company to want to stay on that point any longer, so I made another move back to the dock, leaving my tormentors in possession. I would fish out the day now or "bust." I got down on the bottom again and soon had a fish. He was a good one, just about my size. We had it nip and tuck for the good part of an hour. He put up a good argument, but I finally won and later wished I hadn't.

About the time I got him out, that bunch

they found in the cottage, they alleviated the pain. They laid me out on my bed and then a question arose among them—was a shark bite poisonous? None were certain, but the cook, who was a Southern darkey, was sure of it, but lost his head in the excitement, and did not remember what he had heard was best to do for it.

It was decided that I must be got to town at once for medical attention. The boat was manned and my baggage loaded in. All hands decided they would go with me. I was made as comfortable as possible in the stern of the boat and soon fell asleep. It was late in the afternoon when we started, and I knew no more until I was awaked about 9 o'clock that night by loud talking.

There was a colloquy on between the cook and the parson. I heard the cook say: "Boss,

ONE OF THE "BIG" DRY FLY EXPONENTS.

of "galoots" were back at the cottage. They were a weak looking lot. They had about laughed themselves into dish rags.

My fish proved to be a fifty-pound shark and when I laid him down on the boards in triumph, the parson weakly called over to hold him up and let them see what it was. I placed my right hand on the top of the wire snood to raise up the fish. He was lying on his side. As I started to lift up and began to pull on the wire, he gave a tremendous flop with his tail on the boards and raised his head to my hand, taking it into his mouth in less than a second. He snapped me just like a puppy dog. I instinctively jerked against his action, but too late, as one tooth went through the nail of my middle finger, and my index finger fared but little better. In jerking away from him, I tore out his hold and made ugly and painful wounds.

I was up against it again, but this was no laughing matter. The blood was streaming from the cuts and I was in agony. I fell over on the bench about the time my friends reached me. I fainted and lay still. They dressed my wounds as best they could, and with a little turpentine

ef yer doan go back an' git dat piece ob skin, dis ere gen'man goner die—sho."

"How do you apply the skin when you get it, Mose?" asked the parson.

"Yer takes a piece ob hit, erbout ez big as yer han', an' rubs hit all ober der body," answered the cook.

"Which side of the skin do you use? The inside or the outside?"

"De outside."

"Why, Mose, the outside of a shark's skin is like the coarsest of sandpaper!"

"I know hit, boss, but dat's just hit. Hit breaks de skin all ober, an' lets de pisen out."

There was a general laugh at the wisdom of the cornered darkey, and the parson satisfied him by saying that a piece of coarse sandpaper would do just as well, and we could get that in St. Petersburg. I thanked God that I had not been on that lonely island with Mose alone when the accident happened. This conversation sent a few cold chills chasing up and down my spine, and was rather discomforting, but I knew the Southern darkey and his superstitions so well I did not worry much. After thinking about it

awhile, I came to the conclusion that he had gotten the idea from "the hair of the dog cures the bite."

I laid low and tried to overhear more of the conversation that was going on in the forward part of the boat, but to no avail, as it was being carried on in such low tones I could make nothing of it, except that I was the subject being discussed. Finally, the parson elevated his voice and I heard him saying: "Gentlemen, I'll make a book on this case. I'll fix up a slate. I'll bet any man ten to one that he loses a finger, seven to one that he loses two fingers, five to one that he loses a hand, three to one that he loses his arm up to the elbow, even money that he loses his whole arm, and one to five that he loses his life. I will also bet even money that he never goes 'er fishin' on er Sunday again."

"Come on, boys, have I any takers? Put up or shet up."

This was sticking it into me pretty heavy, and I could stand no more. I yelled out to him, much to the surprise of all as they thought I was asleep: "Parson, I'll take the whole d—slate for as much as you want, but would like to leave out the Sunday bet."

This put a quietus on all present, and nothing more of interest happened until we reached St. Petersburg.

I was carried to the hotel and laid out on the bed. The parson went for a doctor. The doctor came, looked wise and dressed my wound, but evaded my anxious questions. When through he wrote a prescription and rang for the bell boy. When the bell was answered, the little slip of paper was given to the boy. In a short time the boy came back with a tray on which there were six thin glasses filled with what looked like iced tea, and there was the tinkling ice in the liquid. A sugar bowl and spoon were also on the tray. The negro bell boy set the waiter down on a little deal table and withdrew to the side of the room. There seemed to be something lacking, and the darkey was sent back with another slip of paper, and soon appeared with a nice green bunch of mint. There were seven of us in the room including myself, and I noted that there were but six glasses. I understood, but thought it was the parson who would not indulge. The glasses were assigned and I was completely ignored. There was none for me, and my suspicions were strongly aroused. Just before the final tilt I spoke gently to the doctor and said: "Doctor, is that the prescription you sent out to be filled *for me*?"

"Well—er—rer—yes," he said.

"But, doctor, where is mine?"

"Yours—why—you are a sick man, and I cannot allow you to have any of this. It would excite and do you much harm."

My grip was sitting nearby on a chair at my left. I reached out with my good left hand and grasped it, bringing it to my side. It opened from pressing a spring, and I soon had my hand inside. I drew out my old .38 revolver, and at the flash of its metal trimmings there was a scramble for the door.

"Hold! gentlemen!" I exclaimed.

There was a pause in the headlong rush. Laying the gun on my right wrist I drew a bead squarely between the doctor's eyes and held it as best I could on his batting orbs and ducking head, and then addressed him in no uncertain words.

"Doctor, if I don't get one of those—yours won't do you any good."

"Why, really—er—rer—Mr. Webb—er—rer—I think—ahem—I have made a great mistake in your case, but mistakes will happen in the best regulated families, you know, and I am no exception to the general rule. Yes, I really think now that you should have one, as you have produced such a good argument. I now recede, retreat and retire from my original position, and say that you may have one, two or three or as many as you like, and they will do you much good."

I rolled over on the bed and had the best laugh I had had in ten years, as the two full moons of the bell boy departed on his way for the extra. Oh! how good it did feel to have my middle "innerds" shake with genuine old-fashioned laughter.

Fame is a dangerous flame. It is as disagreeable to me as dry grins. The next morning I had it. It always comes like measles or whooping cough and I caught it on the fly.

The joke on the doctor was too good to keep, and all of the citizens wanted to know me. I stayed with them three days, and when I left I felt like a wet blanket inside and out, but I knew a majority of the population of that town well enough to call them by their first names.

[THE END.]

## Fishing in California.

BERKELEY, Cal., Jan. 27.—*Editor Forest and Stream:* Striped bass fishing has been very poor or late in the vicinity of San Francisco, but few fish having been taken, and these have been small in size. Usually good sport is experienced at this season of the year at San Antonio and Wingo, but so far the fish have failed to put in an appearance there in numbers. Weather conditions are probably largely to blame for this, there having been practically no rain this season to freshen the water in the sloughs and lagoons frequented by this fish. Extremely cold weather has visited California since Christmas, all records for the past twenty-five years having been broken, and but few anglers have tried bass fishing.

A short time ago the indications were for some splendid steelhead fishing in the Russian River, but just about the time anglers commenced to arrive on that stream a shower occurred in the mountains and muddied the water to such an extent that but few were taken. Many large fish were to be seen rolling in the stream, but only a few were taken. As heavy rains are expected now at any time, it would seem that winter steelhead fishing would be rather limited. A number of local anglers, among whom was William Hillekast, have visited the Santa Inez River, near Lompoc, of late, and have secured fair catches of steelheads.

Dr. F. B. Alden visited Catalina late in the year, and while he landed no large fish on this trip, was successful in taking a number of yellowtail and bolita, which are now running well.

Winter salmon fishing on Monterey Bay is excellent this year, some of the catches being phenomenal. Aug. Raht fished there one day and landed fifteen fish, the largest weighing sixteen pounds. A few salmon are being taken off Point Reyes, but the sea is too rough there

to make fishing popular at this season of the year.

F. A. Shebley, superintendent of hatcheries for the California Fish and Game Commission, recently turned over to that body an interesting specimen of fish life in the form of a double-headed rainbow trout, caught near Truckee. The fish is six inches long, has two perfectly formed heads, two bodies back to the dorsal fin, two eyes, two stomachs, two hearts, and put up a lively fight when landed. It is seldom that freak fish of this character live to attain the size of this one.

The great California Fish and Game Protective Association, in which about fifteen thousand residents of California hold membership, is expected to exert a great influence over the passage of laws affecting fishing in this State by the Legislature now in session and a number of changes in the present laws are being advocated. It is proposed to prohibit the taking of trout under six inches in length, to prohibit the sale of black bass and to make the limit twenty-five per day, and to prohibit the use of seines in many fresh water streams. Organizations are being perfected in the various game districts, and these will make recommendations regarding the needs of the different sections of the State.

At the urgent request of the California and Nevada Fish and Game Commissions, the Federal Government has set aside a sum of money for the repair of the Derby dam fishway, and in the future fish in the Truckee will have no difficulty in reaching the headwaters of that stream during the spawning season.

In the biennial report that will be submitted by the Fish and Game Commission to Governor Johnson shortly, will be a number of important reports of investigations of fish life made during the past two years, these to be incorporated in a special fish bulletin. Among these will be a report prepared by Charles Lincoln Edwards, of the University of Southern California on California abalones; an account of experiments with salmon and steelhead trout, entitled "Towing Salmon and Steelhead from Sacramento to the Sea," by N. B. Scofield; the "Problem of the Spiny Lobster," by Bennet M. Allen, of the University of Wisconsin; "Investigation of the Clams of California," by Dr. Harold Heath, of Stanford University; the "Edible Crab of California," by F. W. Weymouth, of Stanford University; "Quinnat Salmon Investigation," by N. B. Scofield, and "Trout and Black Bass Planting and Transplanting in the San Joaquin and Southern Sierra Districts," by A. D. Ferguson.

# ARCHERY

## Effect of Variable Point of Balance on the Flight of Arrows

By E. J. RENDTORFF

SOME time ago I received a letter from Dr. Hertig stating that the new arrows he had just purchased possessed a lack of uniformity in the position of their point of balance or center of gravity. He wished to know whether a variation of one-half inch would produce an appreciable difference in their flight. My answer was that I did not know. As I have never seen the subject discussed, and admit my ignorance

The physical principle involving the action of the center of gravity of an arrow can be stated as follows: The motion of the center of gravity of a system acted on by any force is the same as if all the mass were collected at the center of gravity and all the force (viz., that of the bow string) were applied at that point, parallel to its former direction.

An arrow that rotates or turns in the plane

first a drift, and second an angular displacement of the shaft from its actual direction of flight. The pressure of the wind on the shaft in front of the center of gravity turns the arrow in one direction, while the pressure on the feathered end turns it in the opposite direction, with the center of gravity as a fulcrum or axis of rotation. This is best illustrated by the use of a diagram.

In Fig. 1, G is the center of gravity of the arrow, A and L the force of the wind, while B and C represent the pressures produced by the forward motion of the arrow along its path EK. The forces L and B tend to shift the arrow toward the line of flight EK, while forces A and C tend to turn it at an angle.

The tendency of a force to produce rota-

FIG. 1.

concerning it, I wish some archer would shed a little light on the subject.

Instead of writing to some of our archery authorities concerning the solution of this question, I believe it would be better to have the question discussed in our official organ, so that other archers will receive the benefit of their knowledge. The chief function of an archery department in such a magazine as FOREST AND STREAM lies in the mutual help that archers receive in general discussions of mooted problems. In order to set the ball rolling I shall attempt to give my views on the subject, in the hope that the true answer will be forthcoming.

My candid opinion is that the position of the center of gravity, or point of balance, makes but little difference in the flight of an arrow, unless the variation is quite marked; but when an authority like Dr. Weston says that it makes as much difference as a uniformity of weight, it becomes apparent that a considerable diversity of opinion exists.

of its shaft, due to the action of a strong wind, or for any other cause, will rotate about its center of gravity as an axis. An unfeathered shaft having the center of gravity in the middle would rotate easily and have a very eccentric flight. A similar arrow with the center of gravity near the pile would fly somewhat truer, as the friction of the air along the nock end of the shaft would make the center of gravity precede and drag the arrow behind it. If the center of gravity is near the nock end, the arrow would turn through 180 degrees and fly with the pile toward the rear. The main function of the feathers is to keep the center of gravity of the arrows in front, with the nock in the rear. The guiding force is the friction of the air. The greater the distance between the feathers and the center of gravity of the arrows, the greater will be the guiding effect, so that on a quiet day, with little wind, this arrow would have the steadier flight.

Wind has two general effects on the arrow:

tion about a given axis depends upon the magnitude of the force and upon the perpendicular distance from the axis of rotation to the line of direction of the force. This distance is called the "lever arm," and the turning tendency the "moment" of the force. Thus the tendency of the force B to produce a rotation about the center of gravity G is equal to the force B times the distance GH.

Now the forces A and C produce a rotation to the right, while L and B cause a rotation to the left. The arrow will turn until there is an equilibrium of the moments of these four forces, or until

$$A \times FG + C \times IG = B \times GH + L \times GJ.$$

If the center of gravity of another arrow lies nearer the pile, the moment of the force of the wind A increases, while that of L decreases. As the feathers are relatively large in area this will produce a greater angular displacement.

—FOREST AND STREAM, Aug. 14, 1873.

### A QUEER FUR SEAL REPORT.

A REPORT on House Resolution No. 73, adopted May 12, 1911, was recently issued in Washington by the chairman of the Committee on Expenditures in the Department of Commerce and Labor. The resolution calls on the Secretary of Commerce and Labor to furnish to the House copies of all letters, reports, documents and instructions received from, or given to, those in charge of the fur seal islands from Jan. 1, 1904, up to date.

The majority report on this resolution, for which apparently the chairman, John H. Rothermel, is responsible, is signed by four members of the committee, and is accompanied by a minority report, signed by the remaining three. Although the House resolution calls for information for 1904 and subsequent years, the majority report goes back nearly fifty years and contains a bitter and wholly unjustified attack on H. H. D. Peirce, former third assistant Secretary of State, and Dr. Chas. H. Townsend, now director of the Aquarium.

The evidence taken by the committee makes more than 1,000 pages. The last hearing was held in July, 1912, but the committee has never held a single meeting for the purpose of considering that evidence, nor was the report made ever submitted to the committee. Carbon copies were distributed to the members of the committee, after the chairman had filed the original.

The report of the majority goes back to 1867-68, and inveighs against the care of the seal islands down to 1910; declares that the lease of the North American Commercial Co. was obtained by fraud; that H. H. D. Peirce and Chas. H. Townsend combined with the president of the North American Commercial Co. to collect a fraudulent claim against the Russian Govern-

ment, and that Peirce and Townsend prepared the case and presented it at the Hague in 1902; that C. H. Townsend and G. M. Bowers, fish commissioner, advised the Secretary of Commerce and Labor to lease the seal islands again for twenty years from 1910. It recommends that the Attorney General and the State Department institute proceedings to collect various damages from the North American Commercial Co., and its one-time president, and to rectify the wrong alleged to have been done by Townsend and Peirce against the Government of Russia, and finally urges that the services of the Treasury agents on the Pribilof Islands be dispensed with.

The testimony taken before the committee supports few of the assertions made in the report, and does not justify its recommendations. Dr. C. H. Townsend was sent to the Hague simply as a witness to testify regarding pelagic sealing matters. He did not prepare any case; he did not represent any claimant. He was a simple witness summoned to appear and to give testimony. The author of the report, when he states that notwithstanding the depletion of the fur seal herd, Dr. Townsend and Mr. Bowers recommended to the Secretary of Commerce and Labor that the islands should be leased again, strives to convey an impression of wrong doing. Yet he knows very well that up to April 21, 1910, the law made it mandatory on the Secretary of Commerce and Labor to release the islands on the expiration of the old lease; in other words, these officials were simply doing what the law directed. What their real judgment was is easily shown by the record.

At a meeting held soon after their appointment, the whole advisory board of the fur seal service, of whom Dr. Townsend was one, were agreed as to what should be done about the islands, and individually, and as a body, advised that the Government should not lease, but should itself assume entire control over them. It was not until after these recommendations had been made that Senator Dixon, of Montana, introduced resolutions suggesting that the then existing lease should not be renewed. Later, when bills providing for the repeal of the law of 1870 were under consideration, the Secretary of Commerce and Labor appeared before the committees of the House and Senate and urged the passage of Senator Dixon's bill, which became a law April 21, 1910.

The majority report abounds in loose and unproven statements. There is no evidence that yearlings and female seals have commonly been killed by agents of the Government. All there is to show this is the assertion of one man, who has not been to the islands for more than twenty years.

The majority's recommendation that Treasury agents be withdrawn from the islands is most foolish. On the islands are many scores of natives who depend for guidance—indeed for existence—wholly on the Treasury agents, and who without the supervision of these agents might do anything in the world, from killing seals to killing each other. The United States not only has on these islands property worth many thousands of dollars, but what is much more important, has the responsibility of caring for a considerable number of human beings who are absolutely dependent on it, through the help and support of these Treasury agents.

Following the report is a statement as to some matters presented to the committee.

Certain vague and general charges made by Henry W. Elliott against the officials connected with the fur seal fisheries are quite unsupported by evidence.

There is nothing except bare assertion to show that any yearling male seals have been killed in an unlawful way. Evidence to show that under-aged seals had been killed was attempted by introducing what purported to be London sales sheets of C. M. Lampson & Co., but a comparison of these supposed sales sheets with originals shows that the copies introduced at the hearing were not true copies, but had been altered.

There is no evidence that large numbers of female seals have been killed on the islands. In the few cases where females have been killed, it has probably not been done intentionally, but by accident.

Efforts were made to show that the great decrease of the seal herd has been brought about by land killing rather than by pelagic sealing, but practically all the testimony available shows that 80 per cent. of the pelagic seal skins are those of female seals. This would mean that from 1890 to 1897, 500,000 females were secured. The evidence goes to show that for every six male seals killed on land, two males and nine females were killed in the water. Besides, all agree that of the seals mortally wounded in pelagic sealing, only a small proportion are recovered. Some say that four out of five are lost, and the lowest estimates are that at least one-half of those killed are not recovered. It is, therefore, fair to say that the number of females killed at sea by the pelagic sealers, 1890-1897, was more than 1,000,000 individuals, and each one of these was either about to produce a pup, or left one to starve on the land.

All who have looked into the matter and whose opinion is of value agree that the decrease of the fur seal herd is due to the enormous destruction of female seals by pelagic sealing.

The wholly baseless attack on Dr. Chas. H. Townsend, by Congressman Rothermel, is greatly to be deplored. It cannot hurt Dr. Townsend, whose standing in the community is too firmly established to be shaken by such an attack, but is likely to react very seriously on the reputation of its author.

NEXT week's issue will be the sportsman's show number. It will be chock full of fresh, crisp sportsman's material, descriptive, interesting and instructive. Dillon Wallace, famous for his intimacy with Labrador, is a feature added since our last foreword. The issue will be profusely illustrated. Get it.

### THE JANUARY RECORD.

HERE are the figures compiled by Printers' Ink of the agate lines of advertising carried last month by the outdoor sportsmen's publications:

Publication	Jan., 1913
1. Forest and Stream.....	13,297
2. Outing Magazine .....	11,750
3. Field and Stream.....	6,944
4. Outdoor Life .....	7,168
5. Outer's Book .....	6,048
6. Outdoor World .....	5,982

EFFECT OF VARIABLE POINT OF BALANCE ON THE FLIGHT OF ARROWS.

Continued from page 239.

placement of the arrow. However, the moment of the force B increases at the same time, so that the tendency to move the arrow back to the direction of its line of flight is also increased. Conversely, if the center of gravity of the arrow is nearer the nock the power of the feather to right the arrow is decreased, but the wind will not be able to turn the shaft through as great an angle as before. Things thus seem to balance, and neither position of the center of gravity seems to possess a distinct advantage over the other.

I see but one other case where a variable position of the center of gravity can produce

—a matter which to my knowledge has never been considered.

In connection with Fig. 1 there are two other things I wish to discuss. If the arrow has an angular position with regard to its line of flight, as illustrated in the diagram, the area exposed to the friction of the air, in the forward direction, is greater than that offered when the shaft lies in its trajectory. This extra friction would retard the velocity of the arrow and cause it to undershoot. According to theory it would therefore be necessary to elevate the arrow when shooting with a strong wind. I would like to inquire from our archery friends whether they have ever noticed this effect.

The second inquiry is relative to the drift

their flight. As stated in the article, I did not pretend to understand the matter and wrote mainly for the purpose of starting a discussion on the subject, in the hope that the true answer would be forthcoming.

One week after this article was written, I believed I had thought out the solution of the problem and the article on the "Toxophilist's Paradox" was the result. In the last paragraph of that article is explained why our arrows should have a uniform position of their center of gravity. That is my final conclusion.

The explanation may be correct; but if we are ever to progress intelligently and become proficient archers, these matters must be discussed. We will all make mistakes in these discussions, but what is the difference, if in the

FIG. II.

different results, and that is at the moment when the arrow first leaves the bow. The string, on release, has a tendency to move toward the central axis of the bow, D, Fig. 2.

The center of gravity of the arrow tends to move straight ahead, on account of its inertia, but the nock of the arrow is constrained in its motion by the string, so that there is a tendency to move the pile toward the left. This introduces the three forces A, B and C, illustrated in the diagram.

Now, if the center of gravity of the arrow is moved toward the pile, the tendency of the shaft to get an angular displacement, on release, is diminished, due to the greater moment of the force at G, which holds the arrow in line, and also due to the consequently larger moment of the force at A, which would move the string to the left and thus diminish the lateral displacement; but the arrow would therefore bend more and receive an extra wobble during its flight. The pressure B against the bow would be increased and the wear on the shaft augmented.

If the center of gravity is moved toward the nock, the arrow on release would receive a slightly greater angular displacement, but the wear on the shaft would be decreased. The arrow would bend and wobble less and therefore have a truer flight.

In brief, every advantage gained by having the center of gravity near the pile is neutralized by a corresponding disadvantage, and vice versa. It is a case of six of one and half-a-dozen of the other. In solving the problem one is between the devil and the deep sea. I believe a slight variation of the position of the center of gravity of an arrow makes no material difference, at any rate, less than does a lack of uniformity in the stiffness of the shafts

of the arrow in the direction of the wind. I have frequently been surprised at the relatively small drift produced by a strong cross wind. A wind of forty miles per hour moves about 150 feet, while an arrow travels 100 yards. The drift of the arrow would, of course, be much less, but it should certainly be more than one-fiftieth of that amount, or about three feet; and still I doubt whether I have ever made a larger allowance for a cross wind while shooting at 100 yards. How is this explained?

On examining Fig. 1, it will be seen that the pressure of the air, produced by the forward motion of the arrow, is much less on the windward than on the other side of the shaft. This will produce a shifting of the arrow into what we sometimes call, the "teeth of the wind"—i. e., in the direction opposite to the wind. It is the same effect as that which causes a baseball to curve when one-half of it is smoother than the other, as is the case with the "spit ball."

AN EXPLANATION.

This article on "The Effect of a Variable Point of Balance of Arrows" was written first and intended to precede the "Toxophilist's Paradox." Through a mistake the articles were published in the reverse order. The diagram intended for Fig. 2 in the Paradox article was also omitted, and another, having no connection with the subject, substituted in its place. Fig. 2 of the "Balance" article was the one intended to be used.

When the "Balance" article was written the explanation of Butt, Walrand and Ford, pertaining to the reason why arrows are not deflected to the left, was considered the correct one, and on this basis I could not understand why a slight variation of the center of gravity of arrows made a very material difference in

long run we manage to get a better understanding of the subject?

Pittsburgh Archers Organize.

PITTSBURGH, Pa., Feb. 10.—*Editor Forest and Stream:* At a dinner given by J. C. Patch, an organization of the various archery clubs around and about Pittsburgh was effected.

The dinner, a nice little affair, was held at the Pittsburgh Athletic Association club house. Fifteen archers were present. The name of the merger is the Pittsburgh Archery Association. Mr. Patch was elected President, Dr. W. H. Haines was chosen Secretary-Treasurer, and Dr. O. L. Hertig was selected as Vice-President, target bearer, range sweeper, and general filler in of miscellaneous duties. He accepted after much argument, with the proviso that some one else be allowed the privilege of cutting the grass during the shooting season.

Mr. Patch, the new president, is a man well fitted for the position. In addition to being an archer of much enthusiasm and great promise, he is a man who can, and more, who will dig down in his jeans when the occasion demands. You don't have to go after him with a lasso and a pair of dental forceps when a worthy cause needs help.

The members of the new association are counting the days in anticipation of spring's arrival, and let me whisper—Jimmie Duff needs to get busy making some extra tough targets.

We have been very much interested in the able articles which Mr. Rendtorff has been contributing to the cause. I am not sure, however, that we all agree with him. I can appreciate the sentiment that, with animated verbiage, puts every phase of our beloved sport into song, into verse, and into prose even more

practical than verse; I can even foretell a big success, if the thing in its entirety were set to music and put on the operatic stage. But when it comes to reducing the beautiful total which comprises good archery to figures, I question the soundness of the analysis entering into the proposition. In other words, "Them equations gets my goat."

Say, Mr. Editor, who is responsible for the spelling of the title of Rendtorff's last article? "Toxopholist"! Shade of Ulysses! Could that warrior but see how his beloved title was butchered by your typesetter, he no doubt would feel like sending a fiery arrow out of the depths of Hades in search of the offender.

Elmer's machine has shown why the arrow goes to the left on leaving a rigidly held bow, for the arrow in so doing is following the angle of divergence just as one could expect. The machine also gives the true reason why the arrow goes straight when the bow is held in the hand: The force of the string propelling the arrow acts on the movable arm and wrist which holds the bow. Thus, in spite of the angle of divergence, a compensatory adjustment takes place and the arrow goes true.

Elmer's machine can be worked out by mathematics. The human machine is subject to a non-mathematical process, and the human equation is not one of figures and signs.

On Jan. 25 the last scores of the season were shot on the Bon Air-Beach View range in a high wind, which accounts for the low totals:

Ninety-six arrows, 80 yards:

	Hits.	Score.
Jiles .....	47	171
Holmes .....	51	163
Hertig .....	77	331

The extra twenty yards distance in the eighty yards over the sixty yards makes a high score very difficult of attainment.

O. L. HERTIG.

[As the good doctor avers, this is the place for discussion—all sorts of poetic license being allowed during class hours. Brother Rendtorff being very partial to diagram illustration has used an O for an I, presumably, because it best illustrates his purpose—and more closely resembles a target, which has attracted the critical arrow of the Pittsburgh expert. Maybe, however, euphony has had some hand in the matter. Mr. Rendtorff's spelling better suiting adaptation for setting to music—only our expert equationist can tell.—EDITOR.]

### The Point System of Scoring.

BY EDWARD B. WESTON.

ANDREW S. BROWNELL, of New York City, who was one of the most prominent archers in early days, writes as follows:

"The notes on archery published Feb. 6, with which you favored me, bring up to my mind the controversy on the same subject which lasted two or three years—1879 to 1882.

"The present generation seems to find the same difficulty with the revision of the York

round scores by points, as we did then; and while myself and a number of others, as you no doubt remember, advocated what appeared to be a radical change, the result was, I think, to show a number of us at least, how readily the necessary correction could be made. What we discovered really was, that the rings of the target are not proportioned equally for comparing scores at all distances. To illustrate: It is skill that enables one to hit the target at 100 yards, but it is largely chance what part of the target is hit. This, I think, is what led the English people to revise the score by the

the relations between the first two on the list. "As you will probably remember we had some long and elaborate articles on this subject, all of which might have been avoided could this simple solution have been evolved without the discussion."

Mr. Frank C. Havens, who has done more than any other person, in contributing prizes to the N. A. A., made the following conditions in the competition for his prizes last August:

"And that the scores be not computed by the present system, but that hits and scores be added—for instance, 87 hits, 487 score. Result, 574.

"This will always place the best performer in his proper position in the list."

## Canoeing

### Atlantic Division Dinne, A. C. A.

THE thirty-third annual dinner of the Atlantic Division was held at the Hofbrau Haus, New York city, Saturday evening, Feb. 8, 1913. One hundred and fifty-eight members and guests gathered together for one of the most successful affairs in the history of the Division.

Vice-Commodore A. D. Berning, as toastmaster, introduced many interesting speakers, including Commodore Fred W. Cramphorn, Secretary B. L. Goodwin, President Board of Governors, H. Lansing Quick; Hon. Franklin W. Hopkins, W. P. Stephens and Captain Anthony Fiala, the Arctic explorer, who, with the aid of stereopticon views, gave a highly interesting account of his canoeing and explorations in the frozen North.

### A. C. A. Membership.

NEW MEMBERS PROPOSED.

Atlantic Division.—Howard Adshead, 1752 Margaret street, Frankford, Philadelphia, Pa., by Joseph W. Broomhead.

Central Division.—Joseph A. Banks, Clifton Springs, N. Y., by William B. Foote.

Western Division.—Herbert S. Inbusch, 315 Farwell avenue, Milwaukee, Wis., by John F. Butt.

NEW MEMBERS ELECTED.

Eastern Division.—6586, William A. Jacobson, 30 Clinton avenue, New Haven, Conn.; 6587, P. E. Munger, 68 Perkins street, New Haven, Conn.; 6588, John F. Male, 117 Poplar street, New Haven, Conn.; 6589, Russell H. De Bann, 97 Exchange street, New Haven, Conn.; 6590, Robert W. Hoadley, 119 Exchange street, New Haven, Conn.; 6591, Maelund S. Colburn, 362 Ferry street, New Haven, Conn.; 6592, Harold G. Towner, 99 Exchange street, New Haven, Conn.; 6593, Philip S. Mack, 108 East Pearl street, New Haven, Conn.; 6594, Harry L. Greene, 1174 Elmwood avenue, Providence, R. I.

Western Division.—6595, Gilbert R. Baumbach, Peoria, Ill.; 6596, W. J. Livesley, Kaiserhof Hotel, Chicago, Ill.; 6597, Charles L. Engstrom, 1209 Madison street, Peoria, Ill.; 6598, Horace G. Roberts, 17 Oak Lane, Davenport, Iowa; 6599, Elbert M. Burnett, 905 Fullerton avenue, Chicago, Ill.; 6600, Charles P. Huntington, Cunnor Road, Kenilworth, Ill.

F. S. BARNES,  
Lake Forest, Oregon.

point system, but in doing so they brought in other disastrous conditions.

"Ordinarily by the point revision, the score where the number of hits is larger in the lower score than the amount of the larger score over the lower, the change in rank will be made; and a simple solution of the problem is, I think, to combine the hits and score as a total score. This will in a few cases bring the man who has the excess of hits, but smaller score, to the front.

"The illustration by Dr. Hertig of 6 hits 12 score, and 2 hits 14 score, would give total scores of 18 and 16, which I believe would be their proper ratio. The example given by Dr. Elmer, would also show the same result.

"This simple revision would not be subject to the objectionable feature which we found in the point system, whereby a man, say third on the list, would secure a point, and thus change

TRAP SHOOTING

Fixtures.

If you want your shoot to be announced here, send a notice like the following:

REGISTERED TOURNAMENTS.

Feb. 22.—Birmingham (Ala.) G. C. tournament. O. L. Carl, Sec'y.
March 25-26.—Birmingham (Ala.) G. C. O. L. Carl, Sec.
April 8-10.—San Antonio, Tex.—The Interstate Association's Southwestern Handicap, under auspices of the San Antonio Gun Club; \$1,000 added money. Winner of first place in the Southwestern Handicap guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. E. E. Shaner, Mgr., Pittsburgh, Pa.
April 9-10.—Lincoln, Neb.—Capitol Beach G. C. T. C. Brownfield, Pres.
April 10.—Atglen (Pa.) G. C. Lloyd R. Lewis, Mgr.
April 16.—Mt. Holly (N. J.) G. C. A. J. Dellellette, Sec'y.
April 17.—Syracuse, N. Y.—Messina Springs G. C. W. E. Hookway, Sec'y.
April 18-19.—Wellington, Mass.—Paleface Shooting Association. Walter F. Clarke, Pres.
April 19.—Lawrence (Mass.) Fish and Game Protective Association. A. C. Gray, Sec'y.
April 23.—Grundy Center (Ia.) G. C. Frank W. Callaway, Sec'y.
April 23-24.—Brantley (Ala.) G. C. A. H. Hill, Pres.
April 24.—Maysville, Ky.—Mason County G. C. Wm. H. Hall, Mgr.
April 28.—Pottstown (Pa.) G. C. C. A. Fries, Sec'y.
April 29.—Guernsey, Ia.—Du Pont G. C. J. W. Dobbins, President.
April 29-30.—Moberly (Mo.) G. C. J. A. Melton, Sec'y.
April 29-May 1.—Pond Creek, Okla.—Oklahoma State tournament, under auspices of Pond Creek G. C. Wm. N. Hite, Mgr.

DRIVERS AND TWISTERS.

The Northern Kentucky Gun Club, of Dayton, Ky., will hold a two-day registered tournament, May 7-8.

Secretary Kelly, of the Hudson Gun Club, writes us: "The next shoot of the Hudson Gun Club, will take place on Feb. 23. All are welcome to shoot on our grounds." W. G. BEECROFT.

Crescent A. C.

BAV RIDGE, N. Y., Feb. 15.—H. T. Spooner won take-home trophy to-day with 92 out of 100 from 16 handicap. The scores:

Table with columns for names and scores for Crescent A. C. tournaments including Committee cup, Take-home trophy, Monthly cup, Hyatt trophy, Scratch shoot, and Monthly cup.

Only six gunners took part in the holiday shoot of the Crescent Athletic Club. The winners of the principal events were Dr. R. C. Williams, A. E. Henry and C. Blake. The scores:

Table with columns for names and scores for Crescent Athletic Club events including Committee cup, Take-home trophy, Hyatt trophy, Monthly cup, and Remsen trophy.

New York A. C.

PELHAM MANOR, N. Y., Feb. 15.—Daniel F. McMahon was high with 88 out of 100. The scores: Monthly cup, 25 targets, handicap:

Table with columns for names and scores for New York A. C. Monthly cup.

Table with columns for names and scores for New York A. C. February cup.

Table with columns for names and scores for New York A. C. Club trophy.

Table with columns for names and scores for New York A. C. Distance handicap.

Table with columns for names and scores for New York A. C. Special trophy.

Table with columns for names and scores for New York A. C. Added target handicap.

Table with columns for names and scores for New York A. C. Day trophy.

Table with columns for names and scores for New York A. C. High gun trophy.

Feb. 12.—D. F. McMahon did the best work at the Travers Island traps of the New York Athletic Club to-day. He was the high scratch gun of the afternoon with a total of 86 out of 100. In addition, he took the monthly cup with a full score of 25 targets. Other winners included C. Stein, who won a leg on the February and another of the club trophy, as well as being the high handicap gunner of the day, and B. M. Higginson, who took the take-home trophy.

Larchmont Y. C.

LARCHMONT, N. Y., Feb. 16.—Sixteen gunners toiled here to-day in a good sturdy rock-breaking contest. Full scores were returned in most of the contests. Nearly 5,000 clay birds were used at the two sets of traps in service.

Ralph L. Spotts carried off high gun honors, getting his eleventh mark for high man during the season by breaking 140 out of 150. D. F. McMahon trailed him by just one bird. He also won the second take-home trophy with a full score after a shoot-off with A. Whiting, T. Lenane, Jr., and W. E. Ferguson.

There was some close work in the 100-target handicap, ending in a tie between T. J. McCahill and A. Arthur, each having smashed 98 out of 100. In the second shoot-off Arthur won. T. J. McCahill, A. Arthur, T. Lenane, Jr., and W. E. Ferguson tied with full scores of 95 in the shoot for the monthly cup, and in the shoot-off McCahill won.

T. Lenane, Jr., won the visitors' cup with a full after a shoot-off; he also captured the 10-target scratch prize. The 15-target scratch prize went to A. Arthur, and the special trophy prize to A. Whiting with a full. A. J. McManus won the take-home trophy with a full after a shoot-off with F. W. Fitzgerald, and the accumulation cup went to W. E. Ferguson after a shoot-off

with T. J. McCahill, A. Arthur, W. J. Elias and Dr. W. B. Short. Scores follow:

Table with columns for names and scores for New York A. C. February cup.

Table with columns for names and scores for New York A. C. Larchmont trophy.

Table with columns for names and scores for New York A. C. Visitors' trophy.

Table with columns for names and scores for New York A. C. First take-home trophy.

Table with columns for names and scores for New York A. C. Accumulation cup.

Table with columns for names and scores for New York A. C. Second take-home trophy.

Table with columns for names and scores for New York A. C. Special trophy.

Table with columns for names and scores for New York A. C. Day trophy.

Table with columns for names and scores for New York A. C. High Gun trophy.

Baltusrol Golf Club.

FAR HILLS, N. J., Feb. 15.—The record number, fourteen, turned in scores to-day:

Handicap event, 25 targets: T. Watkins (7) 24, S. N. Cowperthwait (4) 23, B. C. Fincke (2) 22, S. H. Browne (1) 22, Dr. O. W. Granbery (0) 21, Henry Barclay (7) 21, T. W. Lloyd (1) 21, B. J. Downer (8) 19, A. Borden (8) 15, C. A. Stout (5) 17, G. A. Williams (2) 16, W. Byrd (4) 16, B. J. Harrison (3) 15, J. F. Hahn (3) 11.

Scratch event, 25 targets: B. C. Fincke 21, T. W. Lloyd 20, G. A. Williams 19, Dr. Granbery 17, J. F. Hahn 16, S. N. Cowperthwait 16, S. H. Browne 15, A. Borden 14, B. J. Harrison 14, C. A. Stout 12, T. Watkins 12, W. Byrd 9.

Fifty targets, handicap: S. N. Cowperthwait (6) 45, S. H. Browne (2) 45, B. C. Fincke (4) 43, H. Barclay (14) 41, W. Byrd (8) 39, T. Watkins (8) 38, T. W. Lloyd (2) 38, C. A. Stout (10) 34, G. A. Williams (4) 34, B. J. Harrison (6) 33, Dr. Granbery (0) 30, J. F. Hahn (6) 26.

the 20yds. mark. Wm. Ridley gave the winner a close run and finished only one behind, with H. Snyder but two less. Fred Bills and Geo. Crosby tied on 86; Geo. Grubb and Fred Caldwell 84. The scores:

Ed Jenkins	73	Chas Ditto	79
Fred Bills	86	Ed O'Brien	83
Art Killam	80	Wm Ridley	89
Geo Maxwell	80	E W Varner	86
Fred Caldwell	84	Wm Goeller	83
Del Gross	75	W Baggerman	76
H Snyder	88	Fred Call	68
Guy Cooper	78	Ross King	82
G W Nicolai	90	F Luther	73
V H Green	68	Geo King	68
G K Mackie	72	H Sherman	68
H Dixon	81	E T Gibbs	79
L Erhardt	64	Geo Grubb	84
Jay Graham	83	Geo Crosby	86
E Houghton	81	R D Morgan	84

Shooting the whole program, including the handicap of 100 targets, a grand total of 575 blue rocks, Fred Bills, the Chicago expert, topped all his pards with 526; Ed O'Brien, the old short-grass shooter, accounted for 519; then came on the new shooter for this class who is generally known in Illinois as "Jay," with 514; last, but not the least attractive shooters was the well-known one-armed man, who is endeavoring to break in a new gun, and he made 491.

These "show me" Missouri fellows were to the front in one, two, three order, and Nicolai made 518, Dixon 513 and Snyder 511, with the Iowa crack, Ridley, fourth.

And now we must call your attention to something that you will more than likely not read about in the FOREST AND STREAM for the next twelve months, viz., that of the Great Western Amateur Handicap at 25 live pigeons with an entrance of \$16.25, purse divided and guaranteed as follows: First, \$125, second \$100, third \$75, fourth \$50.

Many of the readers must call to mind that in 1902 the last grand American live-bird event was patted off here, and it was such a large affair and attracted so much attention, that it virtually stopped pigeon shooting in nearly all States, and the Interstate Association was compelled to pass it up.

The shooters there were handicapped by distance according to their known ability by the following well-known committee: Geo. R. Mackie, Seammon, Kans.; V. H. Greene, Kansas City, Mo.; J. W. Harlan, Kansas City, Mo.; Wm. Baggerman, of St. Louis, Mo. G. W. Schroeder was on the committee, but whatever happened neither he nor Dan Bray, Dick Linderman, nor any of the old-timers from the great State of Nebraska were present, which was regretted, for they on many occasions made all other State teams take notice.

Geo Nicolai did not miss his last bird, but a much

older shooter, F. N. Cockrell, did, else there would have been another tie for the gold watch; as it was Houghton got in with 24 after having lost one early in the race. This man Houghton lives in the far away north country, but the handicap committee had evidently heard from him, as he had to go to the 32yds. mark. Another 32yds. man, after going ten straight was disposed to withdraw after being scored lost on an imperfect gun. The shoot-off was settled at the end of the 5th round, as Houghton got a little behind a fast one. The scores:

F N Cockrell, 30.....	23	W Baggerman, 330 ...	21
Dr F M Plank, 30.....	21	E J Gibbs, 23.....	w.
R B Elliott, 30.....	22	Geo King, 29.....	15
R W King, 29.....	17	M Thompson, 31.....	23
Geo Nicolai, 32.....	24	L Tucker, 30.....	23
Ed Jenkins, 30.....	17	G H Davis, 29.....	19
R Thompson, 32.....	22	Eugene Howe, 30.....	21
Geo Grubb, 31.....	18	A F Rickmers, 30.....	21
Chas Ditto, 31.....	21	B F Eaton, 30.....	21
V H Greene, 30.....	21	A E Thomas, 30.....	18
G K Mackie, 31.....	21	F Luther, 28.....	18

**Glenwood Country Club.**

GLENWOOD, L. I., Feb. 15.—A number of ties added to the interest here to-day. Scores follow:

Silkworth cup, 15 targets, handicap: J. C. Jackson, (2) 47, C. W. Berner (2) 47, W. Silkworth (0) 46, D. Edgar Smith (3) 45, H. J. Hornung (7) 43, L. E. K. White (5) 37, J. S. Crosby (4) 36, J. L. Bergen (4) 34, H. Berner (3) 31.

Sweepstakes, 25 clay birds, handicap: Silkworth (0) 23, Hornung (7) 23, White (5) 22, C. W. Berner (2) 23, Smith (3) 21, Crosby (4) 21, Bergen (6) 20, H. Berner (3) 17. Shoot-off: Silkworth 23, Hornung 15.

Sweepstakes, 25 clay birds, handicap: J. S. Crosby (5) 23, C. W. Berner (2) 23, Smith (4) 22, Silkworth (0) 22, Hornung (8) 22, White (6) 20. Shoot-off: Berner 22, Crosby 20.

Sweepstakes, 25 clay birds, handicap: Silkworth (0) 23, Hornung (7) 23, Crosby (4) 21, Smith (3) 21.

Sweepstakes, 25 clay birds, handicap: Jackson (3) 25, J. I. Bergen (4) 22, Crosby (4) 20.

Sweepstakes, 25 clay birds, handicap: Jackson (0) 21, Bergen (4) 20, Crosby (4) 17.

**New York State Association.**

THE New York State Sportsmen's Association could not have made a better selection in choosing a president than the one made at their regular annual meeting held in Syracuse in June of 1912, when they named B. V. Covert, of Lockport, who was at that time president of the Buffalo Audubon Club. C. F. Lambert was elected secretary-treasurer, and no more enthusiastic sportsman or capable official could have been named.

With such men at the head, assisted by other members and clubs of the New York State Association, situated in every part of the State, the coming annual meeting and tournament is an assured success. Shooters will gather from every corner of the State for this tournament to test their skill, in friendly competition at the traps under the auspices of the Buffalo Audubon Club, on June 9, 10, 11 and 12. The first day will be practice day, and each succeeding day will be reserved for regular State-wide competition.

The moneys will be divided under an equitable system, which will insure as fair a division as is possible.

The Squier money-back system will apply to each individual day's performance, by which means amateurs who are not so adept at the sport as some of the others will be fully protected.

It will be the aim of the management to cater particularly to the 80 and 85 per cent. shooters, who are in reality the backbone of the sport, and cannot, under ordinary circumstances, break even.

The Audubon Club is very fortunate in having a corps of shooters who are always able to hold their own in the insteat company, as evidenced by the splendid record of Messrs. Wright and Covert at the Pinehurst midwinter tournament, held at Pinehurst, N. C., the latter part of January. Wright was high gun over all amateurs and professionals, with the splendid performance of 572 dead out of a total of 600 targets shot at, being 6 targets to the good over the next high man. Twice he had scores of 98 out of 100 and two runs of over 75 without a miss. Wright is at present champion of the State of New York, and will be called upon to defend his title at the coming tournament. Covert did not shoot quite so brilliantly as Wright, excepting in the preliminary handicap event, when from the 18yd. mark he smashed 95 out of the 100, being a tie with that sterling shot, Allen Heil, of Allentown, Pa.

In the shoot-off at 25 targets to decide the winner of the beautiful trophy and purse, Covert showed the stuff he is made of by breaking straight, while his opponent scored 22.

Besides the sweepstakes events at the coming tournament, there will be a merchandise event, at which prizes amounting to over \$1000 will be distributed to the lucky winners. In this event, as in all others, the management will make a supreme effort to protect the poorer shooters.

# Here Are the Figures, Mr. Trapshooter!

They Point Your Way to Success in 1913

Over 5,000 more trapshooters used *Remington-UMC* Speed Shells in 1912 than any other one make.

Over 1,900 more trapshooters used *Remington-UMC* Guns in 1912 than used any other one make.

*FOLLOW THE LEADERS!*

Tie to *Remington-UMC* "the perfect shooting combination" and insure better scores

REMINGTON ARMS—UNION METALLIC CARTRIDGE CO, 299-301 Broadway, New York City

Clearview—Riverside.

PHILADELPHIA, Pa., Feb. 15.—The Clearview Gun Club beat out Riverside, of Essington, to-day in a ten-man team race, shot over the Darby traps. Out of their 500 blue rocks the Clearviews smashed 438, while the Essington team totaled 418. Oliver and Fisher led the Darby delegation with 48 smashes out of their half century of clay skimmers, with Elwell a close second with 47.

Walber was the best Riverside target getter, shattering 45 out of his 50, with Harper a good second with 44.

Clear weather with little wind to handicap the marksmen was favorable to good scores, and these were made with profusion by the gunners in the team race, and also in the Clearview's monthly club test, which preceded the battle with the Riversides.

In the club event Fisher and Oliver led the A men with 48 breaks apiece, with Elwell holding second place with 47.

Shuster led the B gunmen with 45 breaks, Green being second with 43 and Lee third with 42.

Winchester's 34 led the C gunners, while Paul and Knowles divided second honors with 33.

Thomas led the half dozen visitors who participated, smashing 41 out of his 50 skimmers. Scores: Team race, ten men to a team, 50 targets per man:

Table with 2 columns: Clearview and Riverside. Lists names and scores for various participants like Oliver, Fisher, Elwell, etc.

Club shoot, class system, 50 targets per man: Class A. Oliver 48, Elwell 47, Fisher 48, Roberts 33.

Class B. Shuster 45, Dutch 37, Green 43, Campbell 36, Lee 42, Paulson 32, Ferry 41, Kirsch 38, Bockius 40, Beers 28.

Class C. Winchester 34, Kress 38, Paul 33, Coyle 36, Knowles 33, Crawford 27, Thomas 41, Visitors.

Cincinnati Gun Club.

THE members turned out to the shoot at the Northern's grounds on Feb. 9, and there was little doing at home. The first match in the series of tri-city team matches will be shot on these grounds on Washington's Birthday. The cities of Dayton, Springfield and Cincinnati will be represented. Each city can enter fifteen men, the best ten scores to count for the team.

Feb. 15.—The members turned out well at the shoot to-day for the purpose of getting tuned up for the first of the tri-city team matches with Dayton and Springfield, which will be held on Washington's Birthday, Feb. 22. High score was made by W. R. Randall, "The Kid," of Mason, Ohio, who broke 92. Capt. George W. Dameron started off with perfect scores in the first two events, breaking 72 straight in practice and the regular events, and tying for second high score with A. Sundry, of Williamsburg, Ohio, on 90. Hammerschmidt's drop from the 90 per cent. class was due to the use of a strange gun, which cost him several targets.

A feature of the afternoon was the return team match between Cincinnati and Northern Kentucky. After a hot race, it was decided in favor of the Cincinnati by one target. The Northerns had a lead of two targets at the close of the first round. They increased this to six in the second round. The Cincinnati bunch got busy in the third round and reduced the lead to four targets. At the end of the fourth round the score was a tie, and in the last round the home team had one the best of their opponents, the total score being 265 to 264.

In the series of three matches each team has won one, and one was a tie. This will necessitate another match, which will be shot on the Northern's grounds in the near future.

In another three-man team match at 100 targets per man, Arthur Gambell's team took the lead from the start, and increased it in each round, defeating Davies' team by 24 targets, 268 to 244.

A five-man team match wound up the afternoon's shooting, Squier's team defeating Gambell's by two targets, 111 to 109. "Roundy" Chamberlain did not do so bad when it is remembered that he was using a strange gun; if he had his old "reliable" with him, very few of the targets would have reached Gambell's "target saver." Squier started off with one down, and ended with one of the few straights of the afternoon, but hard luck in the second event kept him out of the 90s. Sampson tried his luck for the first since last summer, and showed that he has not quite forgotten how to point; he will do good work for the team on the 22d.

Mutt and Jeff are two members and they both promise to make good. Dr. Bird shot at 75 to-day—the first time he has been on the firing line for several months, and broke 49. Irwin shot a good gait in most

of the events, but quered his chances for the 90 per cent. class in the first and third events. R. Davies settled a little dispute with Chamberlain to-day, but was not in good form, and the latter had the best of the argument. Mexico showed some of his old-time form, finishing close to the 90 mark.

The first of the tri-city team matches with Dayton and Springfield, will be shot here on Washington's Birthday, Feb. 22, starting promptly at 1 P. M. The traps will be open for practice during the forenoon, and if necessary, three traps will be used, so that all the shooters may be accommodated.

Practice, 100 targets per man: A Gambell 86, R Trimble 88, J Schreck 87, G Dameron 90, W R Randall 92, Ertel 83, R Davies 74, A Sunderbruch 90, Hammerschmidt 83, Medico 87, \*L J Squier 87, McCreary 57, R Ward 65, Sampson 77, \*R W Chamberlain 88, Mutt 79, H R Irwin 87, Jeff 82, \*O J Holaday 89.

\*Professionals. Team match: Northern Kentucky vs Cincinnati. Irwin 87, Sundry 90, Dameron 90, Hammerschmidt 83, Schreck 87-264, Randall 92-265.

Team match: A Gambell 86, Davies 74, Sundry 90, Hammerschmidt 83, Randall 92-268, Schreck 87-244.

Team match: A Gambell 20, Squier 22, Medico 21, Chamberlain 21, Sundry 22, Hammerschmidt 22, Holaday 24, Schreck 24, Jeff 22-109, Mutt 22-111.

S. S. White G. C.

PHILADELPHIA, Pa., Feb. 15.—The S. S. White's monthly brought out thirty-seven marksmen to-day. The usual club program called for 100 blue rocks shot at in relays of 25 each, handicaps added to the scores, with class shooting governing. Charles H. Newcomb won the high gun honors with 96 out of 100, winning the spoon for the high net score of the day. George S. McCarty made two straights, had one 23 and a 22.

In the class challenge cup event Newcomb, with 49, took Class A. Wilson's score of 45 won a leg on B trophy, McGrath had 43, and that gave him a clutch on the C emblem, and Stevens' 37 was good enough for a dot on the D cup.

Wilson, George, Smith, Ford, McGrath and Stevens tied for Sidebotham trophy. In the first shoot-off, four of the men dropped out, leaving Stevens and Wilson. On this round Stevens won.

Jesse Griffith captured the spoon offered for the high net score on 50, he making 49; W. T. Smith won the dipper on the total high on 50, handicaps included, and Wilson landed the spoon for the best score on 75. Scores:

Table with 2 columns: Class A and Class B. Lists names and scores for participants like Severn, Newcomb, H Wilson, etc.

Class C. McGrath 16, Shoemaker 20, W T Smith 20, Keene 16, George 20, Robinson 16, Waters 12, Abbott 16, Peden 20, 92.

Class D. Taylor 48, Hinkson 24, Hornisher 24, Stevens 28, 104.

Visitors. McCarty 0, Cox 0, McConnell 0, Keenan 0, C Betson 0, 55.

Boston A. A.

BOSTON, Mass., Feb. 15.—With a free start of 5 and a total of 99, S. A. Ellis was high gun to-day and winner of take-home trophy. To win, however, he had to shoot off a tie with Capt. C. B. Tucker, who started from the same handicap. Shoot-off gave Ellis 6 up. L. H. Davis took third with 97 from a gift of 8. J. L. Snow from scratch disintegrated in the ambient atmosphere 95 altitudinous semi-sphereoids. The day was ideal for aerosaucer cracking—clear, warm and windless.

Table with 4 columns: Name, Hcp. Total, Sargent Total, Grand Total. Lists names and scores for participants like S A Ellis, C B Tucker, L H Davis, etc.

Tie for the take-home trophy shot off at 25 targets: Ellis 24, Tucker 18. C. B. TUCKER, Capt.

Westwood (Ohio) Gun Club.

THERE were about twenty-five members at the club shoot on Feb. 9. High score was made by Rybolt, who broke 74 out of 100 in the practice events. G. Oskamp finished second with 54. In the first of the contests for the Du Pont trophy, eight members took part. J. Schneider and A. La B. tied for first place on 31 out of 50. M. Stopper, A. C. Kuball and P. Ruchman were tied for second place. The club will have a house warming on Feb. 22, Washington's Birthday, and a committee is preparing a program with merchandise prizes for that occasion. There will be a flag raising on that day, with several speakers, and a salute to Old Glory as it is unfurled to the breeze.

Table with 4 columns: Name, 25, 25, 25, Total. Lists names and scores for participants like W Daniels, Kling, G Oskamp, etc.

Du Pont trophy contest, 50 targets: A. La B. 31, W. Bohnert 22, M. Stopper 28, H. Carson 23, A. C. Kuball 28, J. Schneider 31, J. Nocheck 17, P. Ruchman 28.

Feb. 15.—The club entertained several prominent trapshooters at the shoot to-day, among them being L. J. Squier, Pittsburgh, Pa.; W. R. Chamberlain, Columbus, O., and O. Holaday, Ralph Trimble and R. Davies, local experts. High scores were impossible owing to the high wind, which caused the targets to duck and take various puzzling and unexpected flights. O. Holaday was high man with 88, a showing fully equal to a 95 per cent. clip under normal weather conditions. R. Davies was second with 86, breaking 46 out of the last 50 targets. Chamberlain was handicapped by the use of strange guns, and fell far below his average. Squier started out with a 20, and duplicated it in the last event, going out in third place. Trimble was not in good form, as his score indicates, although the wind and strange grounds caused some of his misses. A. C. Kuball's showing was poor for him, but is accounted for by the fact that he is determined to learn to shoot with both eyes open, and is still in the beginner's class. The club members are showing much improvement, and will be ready to take on a few team matches with the local clubs by the time the weather settles.

Table with 4 columns: Name, 25, 25, 25, Total. Lists names and scores for participants like L J Squier, O Holaday, R Davies, etc.

Du Pont Gun Club.

WILMINGTON, Del., Feb. 15.—Eight out of nine leggers on Frank L. Connable trophy competed to-day. A. B. Richardson and J. T. Roberson tied from the 22yd. mark with 22, 19 and 21, 20; totaling 41 out of 50 each. Dr. Stanley Steele made third berth with 40 from 19yds. Scores:

Table with 4 columns: Name, Yds, T'l, Yds, T'l. Lists names and scores for participants like A B Richardson, J T Roberson, etc.

In the regular events fifty crackers blew up rocks. Another feature was a match for the Class B cup, held by N. K. Smith. The challenger was L. L. Jarrell, and he put up a great scrap, losing by a single target only. The Class D cup was up and was won by W. A. Casey with 21.

High score on 100 targets for the afternoon was W. S. Colfax, Jr., with 96. L. S. German was second with 93, while W. M. Hammond, who recently joined the professional ranks by reason of his connection with the Hercules Powder Company, came next with 92. Messrs. Colfax and Hammond were the only two during the afternoon to turn in straight scores of 25.

Next Saturday afternoon will find an owner for the 1912 Class Cup, donated by Eugene E. Du Pont.

The scores made by the different contestants on the first 25 targets shot at were as follows: L. S. German 23, C. H. Colburn 13, H. P. Carlson 20, W. Edmanson 19, J. H. Minnick 16, A. B. Richardson 23, H. W. Bush 22, E. M. Ross 12, C. Leedom 16, J. H. Squires 18, L. W. Crawford 11, J. B. McHugh 16, Dr. S. Steele 20, J. T. Roberson 17, Edward Banks 20, J. J. Magahern 10, J. T. Birch 15, J. B. McHugh 20, A. J. Curley 10, F. P. Ewing 14, E. R. Jenks 9, P. D. Guest 23, G. F. Lord 12, H. T. Reed 17, J. C. Cannon 19, W. R. Townsley 7, W. S. Colfax 25, A. H. Lord 10, J. W. Anderson, Jr., 14, E. G. du Pont 24, W. M. Hammond 18, Wm. Coyne 15, S. G. David 16, S. W. Long 5, W. A. Casey 21, D. S. Wood 16, S. A. Reis 7, C. H. Simon 20, Dr. A. Patterson 15, A. F. Hickman 16, L. L. Jarrell 19, T. C. Doremus 16, H. D. Black 17, W. B. Smith, Jr., 12, S. T. Tuchten 14, Dr. E. Q. Bullock 14, W. P. Berry 13, J. H. Thomas 13, L. C. Lyon 18, Dr. H. Betts 13, M. E. Rose 19, W. H. Neely 12, N. K. Smith 24, Dawson 11.

Mt. Kisco Gun Club.

Mr. Kisco, N. Y., Feb. 12.—The scores at the traps were unusually poor to-day, owing to a strong head wind, which made the targets act like St. Vitus' dance.

J. Stevens Arms Co. trophy, 25 targets, handicap—first leg:

WINCHESTER

.22 Caliber Cartridges and Muskets :: ::

Tie and Outrank the World's Indoor Record

THE Warren (Pa.) Rifle Team, shooting in competition recently in the Inter-Club Series of Matches, tied and outranked the World's Record of 996, made last year by the Bridgeport team.

Composite Target of Sweeting's Score. 20 Shots.

The scores of the Warren wonders were as follows:

- SWEETING.....200
MUNSON.....199
HAINES.....199
WHEELOCK.....199
ROBERTSON.....199

TOTAL - - 996

Composite Target of Total Score. 100 Shots.

All of the team shot Winchester .22 Long Rifle "Lesmok" Cartridges, regular stock goods, such as any one can buy anywhere. Mr. Sweeting and three others shot Winchester .22 Caliber Muskets.

This wonderful performance, which outranks the previous World's Record, because the latter contained a 198, confirms the opinion of the most successful shots that

REGULAR STOCK W CARTRIDGES ARE BETTER THAN SPECIAL LOADS

Jersey City Gun Club.

JERSEY CITY, N. J., Feb. 12.—Owing to the disagreeable weather on Lincoln's Birthday, the turnout was small at our all-day shoot, as it took a real enthusiast to face the elements. Paul von Boeckman was high gun for the day with an average of 79 1/2 per cent, for the entire program.

Table with 2 columns of names and scores for the Jersey City Gun Club.

The scores were not in keeping with the day and were very ordinary. George Piercy was high gun and won the high average trophy after an exciting race with Hallinger, the latter missing his last target, a low ducking right-quartering bird, which he overshot.

Table with 2 columns of names and scores for the Jersey City Gun Club.

Feb. 15.—This was an ideal day for shooting the clubs, and several members took advantage of the fine weather and came out and spent a pleasant hour or two.

On Washington's Birthday we are going to have a merchandise shoot, starting at 2 P. M., and extend an invitation to all shooters to pay us a visit on that day and see how easy it is to win a nice prize.

# The Kind of Targets

that can be made with the

## Semi-Smokeless Cartridges

NO SPECIAL SPECIFICATION NECESSARY

50 consecutive shots—10 on each target—made with

**PETERS** Factory Loaded .22 L. Rifle Semi-Smokeless Ammunition using machine rest; range 75 feet. Rifle not cleaned from start to finish.

These cartridges were taken from a regular factory run, and are the same in quality as can be bought from any Peters dealer. They may be shot with equal confidence on any range from 25 feet to 100 yards or more. Always ask for Semi-Smokeless.

### THE PETERS CARTRIDGE COMPANY, CINCINNATI, OHIO

NEW YORK: 98 Chambers St., T. H. Keller, Manager.

SAN FRANCISCO: 608-612 Howard St., J. S. French, Manager.

NEW ORLEANS: 321 Magazine St., Lee Omohundro, Manager.

#### Chicago Gun Club.

CHICAGO, Ill., Feb. 8.—Fairly pleasant weather conditions brought out fifteen shooters for our regular weekly club shoot. Quite a number of good scores were made, and the two regular club events of 50 targets each developed a most interesting race between Fetherston and Jesse Young, both breaking 48 out of 50 in the first, and 47 in the second, which gave them each a total of 95 out of the 100. At no time in the race was there more than one target difference in their scores. Barto made a strong bid for the leadership in the second 50, but finished in second place with a total of 46, while MacLachlan and Kirkwood each scored 45 for third honors. First place in the practice event went to Goode with a score of 14 out of 15, Mac and Kirk tying for second with 12 each.

Barto took the lead in the first event at doubles when he broke 21 out of 12 pairs, although MacLachlan made the same score in the second frame. Mac had taken quite a layoff from trapshooting, as he has not been out since last fall, but he showed his old form in the last 50 singles, and the second frame of doubles.

Melchor was a guest of Jesse Young, and he proved to be a good student for his first trial at breaking targets. Scores:

Feb. 9.—With the thermometer registering above the freezing point, and a clear sky, this was a splendid day for target shooting. A field of thirty-four shooters and a large gallery of spectators responded to the inviting conditions, everyone enjoying themselves both on the firing line and visiting with one another in the club house.

Jesse Young and Fetherston came back to-day to renew their battle of yesterday, which had ended in a tie. Both started in as if it was to be a repetition, as they each broke 14 out of 15 in the practice event, Young again making a total of 48 out of 50 in the first 50, while "Fethers" scored two less, or a total of 46. In the second 50, Young again broke 48, and "Fethers" finished with one less, 47, the latter thereby losing by 3 targets on the two days.

Winkler, who is one of our new members, won third place honors for the day, breaking a total of 46 out of 50 in the first 50, where he tied Fethers for second place, scoring a total of 43 in the second fifty and finish-

ing in a tie with Miller and Eck for first place in event No. 4, each breaking 19 out of 25 gun below armpit until target is in flight. Kammerer and silver divided fourth place honors of the day with a total of 86 out of 100, Kam breaking 45 in the first 50.

F. C. Young scored a total of 43 out of 50 in the first club event, another new member near the top. H. Walsh was out for the first time in over six months; he is slowly gaining strength from a severe illness. Shrigley also shows the effects of a hard siege of bronchitis, from which he is slowly recovering. No one loves trapshooting any more than he, but he had to quit after shooting the first 50. J. Lino had his first try-out on our grounds; he was shooting a 20-gauge. King, Harrison and Oakes were taking their first lessons at the traps.

Master Applegate, shooting a 20-gauge, is the ten-year-old student of John Taggart. He handles himself splendidly when on the firing line, and will soon be making splendid scores.

Burton and Stannard tied for pro honors, each scoring 91 out of 100, Burton tying Young for first place with 48 in the first 50.

Are you arranging to be with us on Washington's Birthday. We want a record crowd to participate in the merchandise shoot, which is on for that day, a fine list of prizes having been provided. Trains leave Randolph street at 11:20 A. M. and 12:45 P. M. All shooters coming on the 12:45 can get in the merchandise shoot.

#### Hudson Gun Club.

JERSEY CITY, N. J., Feb. 9.—Event No. 2 was for the Schortemeier prizes, and was closely contested for, the winners being: Class A—W. O'Brien. Class B—H. J. Burlington. Class C—Jack Williams. Our next shoot will be held on Feb. 23, when the fourth contest for the above prizes will take place. The Turnpike car to the Hackensack River Bridge is the way to get to the grounds, so come out and see us shoot the bull, which we always divide among the shooters present.

#### Huntingdon Valley Shoots.

NOBLE, Feb. 15.—At the weekly shoot of the Huntingdon Valley Country Club target marksmen, over the range here this afternoon, a number of events were shot off, with results in doubt until the final targets left the traps. The summaries:

First event, 25 targets: G. Lovering (3) 23, Fox (4) 25, Archer (5) 20, Rowland (5) 24.

Second event, 25 targets: Fox (4) 25, Rowland (7) 21, Archer (4) 20, Lovering (4) 22, Biddle (5) 26. Several miss-and-out events in which the same list of shooters took part, filled in an ideal afternoon behind the traps. Three weeks more of the announced shooting schedule remain.

**Northern Kentucky Gun Club.**

CINCINNATI, O., Feb. 8.—The special shoot given at the grounds to-day was a big success, and it looks like the "combination plan" appeals to the local shooters as well as to those from a distance. The program was five 20-target events, \$7 entrance, \$1 deducted for targets; \$5 divided Jack Rabbit system, and \$1 in a purse divided by the Lewis class system. Thirty-two amateurs and professionals shot through the program, among those from out of town being: W. H. Hall, Maysville, Ky., who won the Kentucky challenge cup on the Cincinnati grounds last fall, and finished second high amateur here; A. and H. Sundy, Williamsburg, O.; H. Ertel and R. Gaskell, Morrow, O.; R. H. Bruns and F. G. Biltz, Brookville, Ind.; I. Brandenburg and Ed. Cain, Dayton, O.; T. J. and E. Donald, Felicity, O.; R. Stickels, Hamilton, O.; Dr. O. D. Maddox, Harrison, O.; W. R. Randall, Mason, O.; H. Hessler and L. Bittner, Mt. Healthy; T. Barstow, St. Louis, Mo.; L. J. Squier, Pittsburgh, Pa., and C. O. Le Compte, Eminence, Ky.

The conditions were hard, owing to the mist which rose from the river, causing a poor light and making it difficult to see the targets. A. Sundy, of Williamsburg, O., put up the high amateur score, breaking 91 out of 100. W. H. Hall, Maysville, Ky., gave him a hot race for premier honors, being one target ahead at the end of the fourth event, but losing out in the last round, when Sundy broke 20 straight to his 18. R. H. Bruns, Brookville, Ind., was third with 89.

The professionals were in good trim and captured high place for the shoot. L. J. Squier, Pittsburgh, tied with Ralph Trimble, the local man, on 93. C. O. Le Compte was in second place on 89. Squier had the lead at the close of the fourth round, but Trimble beat him one target in the last event, and tied.

The return team match between Cincinnati and Northern Kentucky was pulled off at the shoot and resulted in a tie on 263. At the close of the second round, Cincinnati was in the lead by 3 targets; in the next round the Northern team got busy and forged to the front with 3 targets to the good, 160 to 152. When Randall took his place on the firing line for his last 20 targets, the score stood 263 to 243, and it was up to him to go straight in order to tie. It was not the first time he has been placed in a tight place, and he delivered the goods, saving his team from defeat. The shoot-off of the tie will take place on the Cincinnati grounds.

A special handicap event at 25 targets was started at the close of the regular program with nineteen entries, the prize being a shooting jacket. Ike Brandenburg, Dayton, was the winner with 24 from 17yds. Hessler, Davies and Trimble finished second with 22 each.

**Yale University Gun Club.**

NEW HAVEN, Conn., Feb. 17.—The Yale University Gun Club will hold its first practice shoot this Saturday in preparation for the spring matches. Candidates for the team have been called for, and it is hoped that another winning intercollegiate team can be made up. Shoots will be held with the Bridgeport, Hartford, Danbury, Westchester, and New York Athletic Club, besides the dual shoots with Harvard and Princeton and the usual spring intercollegiate, to be held this year over the Princeton traps.

# VICTORY

## For the Trapshooters Who Used

# DU PONT

# SMOKELESS POWDERS

At the Ninth Annual Interstate Shoot at Kansas City, February 11, 12, 13 and 14

THE Interstate Target Championship, Sliding Handicap, The High Amateur Average for the tournament, The Interstate Live Bird Championship open competition, The Great Western Handicap at Live Birds

ALL WON BY  
Geo. Nicolai, shooting

THE Challenge Match at 100 targets won by Harry Snyder, Challenger, shooting SCHULTZE.

THE Team Championship won by Messrs. Cooper, Elliott, Thomas, Tucker and Cockrell, all shooting DU PONT.

THE High Professional Average won by Fred Bills, shooting DU PONT.

## IT'S EASY TO WIN WHEN YOU SHOOT THE POWDERS THAT MAKE AND BREAK RECORDS

**Smith Gun Club.**

NEWARK, N. J., Feb. 15.—A large field of shooters was on hand to-day at the Smith Gun Club traps at Wiedenmayer's Park. The following scores were made:

On Washington's Birthday an all-day shoot will be held over the club traps. Starting promptly at 10 A. M., practice and sweepstake shooting will be indulged in. In the afternoon, starting at 2 o'clock, an open mer-

chandise prize shoot will be held. This event is open to all shooters, entrance to be \$2. Sweepstakes will also be shot off during the afternoon if the time allows.

**Nassau Country Club.**

GLEN COVE, L. I., Feb. 14.—Howard Cowperthwait won the cup offered by C. V. Brokaw at the shoot of the Nassau Country Club. It was a 100-target handicap affair. Other participants were Roy Rainey, H. F. Whitney, T. D. Hooper, W. E. Kimball, J. F. Carlisle, A. W. Rossiter.

**Bensonhurst Y. C.**

BROOKLYN, N. Y., Feb. 12.—Lincoln's Birthday was selected to inaugurate a trap department here, and every indication leads to the belief that the new department will meet with popular approval. Dr. Atkinson has donated a silver cup for Saturday shooting.

FOREST AND STREAM may be ordered from any news-dealer. Ask your dealer to supply you regularly.

# Parker Gun Victories in 1912

**T**HE highest official average for the season of 1912 at both **Single and Double Targets** was made with **Parker Guns**.

As on every previous occasion, the bona fide **Championship of America** was won with a **Parker Gun**, Mr. W. R. Crosby scoring 198 x 200 targets at 18 yards rise. Same man, same gun, made the **World's Record**, scoring 98 x 100 targets at 23 yards, which is a truly wonderful performance.

Small bore **Parker Guns** are recognized as the Standard Game Guns of America and are gaining in popularity every season with the most progressive sportsmen. For full information regarding guns in gauges from 8 to 28, address

**NEW YORK SALESROOMS**  
32 Warren Street  
**PARKER BROS., Meriden, Conn.**

## THE ANGLER'S WORKSHOP

# Rodmaking for Beginners

By **PERRY D. FRAZER**

**A** UNIQUE work, bringing the science of rodmaking up to the very moment and epitomizing the knowledge and experience of experts for the guidance of the average man. The evolution of bait-casting principles has made Mr. Frazer's book supersede all previous publications on the subject.

Every angler—young or old—who is fond of adapting his rods and tackle to his own ideas of what they should be, will find in this book a large fund of information gathered by the author in years of study, experiment and practical experience in fishing, tournament casting and at the work bench. He theorizes and speculates not at all. He tells "the how" of everything connected with rodmaking in a way that makes results certain. All explanations are simple and easily followed.

Separate chapters are devoted to each of a half dozen types of bait-casting rods; to tarpon, surf and light salt water rods; bass and trout, salmon and tournament fly-rods. Complete specifications of well-known types are given, and the chapter on split bamboo rodmaking is the most comprehensive treatise on the subject ever published. Indispensable in the angler's library.

Cloth, 180 pages, four full-page illustrations, 60 working drawings, making plain every feature of the text. Postpaid, \$1.00.

**FOREST AND STREAM PUB. CO., 127 Franklin St., New York**

### Medford (Okla.) Gun Club.

MEDFORD, Okla., Feb. 14.—Fourteen shooters enjoyed a good practice at our club grounds this afternoon. We had with us two popular trade representatives, K. L. Eagan, of Okla City, and Henry Donnelly, of Guthrie, Okla. The scores:

Shot at. Broke		Shot at. Broke	
Donnelly	100 94	Bunch	45 22
Eagan	95 84	M Brown	45 23
Blood	30 26	Hutchinson	45 23
Dotts	40 34	Wilson	30 26
Soucek	50 44	Antle	20 9
L. Brown	30 25	Walling	55 44
Croxton	25 10	Hardy	60 54

Our monthly handicap shoot was held on the 7th and was won by Walling breaking 20 out of 25 from 18yds. —a good score, considering weather conditions.

Our club has asked for registration dates, and we will hold the third annual Grant county championship and registered tournament early in October.

I. V. HARDY, Sec'y.

### Asbury Park Gun Club.

ASBURY PARK, N. J., Feb. 13.—The Asbury Park Gun Club will hold its grand big shoot on Washington's Birthday. We are also arranging one for Easter, March 24-26. These will be all-day shoots, from 10 A. M. till dark. This is a new club with thirty-two members on New Year's—now 118, and more hanging on the hook, all working for the success of the program on Feb. 22, which will comprise ten events of 15 targets each, \$1.30

entrance in each event. The division will be by the Rose system, 5, 3, 2, 1. If over five amateurs finish ten events in the money, \$5 added to high gun. If over five professionals finish ten events, \$5 added to high gun. There will be three traps working, one for targets only.

The traps are on the flat beach, giving a clear sky background from the horizon to the zenith, and affording a clear view of the target on its entire flight. Glass-enclosed grand stand. All shells on the ground. Ship your shells by United States or Adams Express, care Life-Saving Station, Loch Arbour, Asbury Park, N. J.

Cap. Kidd made a big scaldler full of chowder for Lincoln's Birthday, and he said he never saw a crew of pirates go after the mess as those shooters did. He is cooking up something for Feb. 22.

E. C. BURTIS, Sec'y.

### Evanston Gun Club.

EVANSTON, Ill., Feb. 10.—The weather yesterday and to-day could not have been improved upon, and the result was a very satisfactory attendance at the traps of the Evanston Gun Club. A great deal of interest is being taken in the program for Washington's Birthday, and the directors are sparing no pains in their effort to make the arrangements such that every one will have an enjoyable day. There will be four events, the first 25 targets at 16yds., with gun between hip and shoulder until the command to "pull." The second a handicap, 25 targets. The third 25 targets, 16yds., targets to be thrown 89yds., and the fourth event at 12 pairs doubles, 16yds. There will be two prizes in each event, with special prizes for the two best total scores in four events.

A hot luncheon will be served to those who go to spend the day. Saturday's scores follow:

Winkler	22 21 22 16	Gamble	11 14
Phalen	19 18 20 19	Hickey	7 8
Millen	20 19 20	Erricson	1 1
Carman	23 14 13	Ancaal	2 4 2
Van Petten	12 15 21		

The last two gentlemen had their first experience at clay-bird shooting. At 20yds., Carman made a score of 11, Winkler 19, Phalen 15, Van Petten 10, Millen 19.

The following scores were made Feb. 9:

Kennicott	25 23 23	Miller	18 18 8
Millen	25 23 19	Hanson	17 13 13 10
Coleman	22 22 20	Harrison	16 16
Darby	20 19	Van Petten	13 15 12
Watson	22 19	Gormley	16 10
Adams	20 19 16	Focrster	8 8 2
Scowley	23 21 21 19	Hannick	11
Carman	20 17	Langworthy	8 12
Fester	19	Pratt	2 8
Doyle	21 16 9	De Clercq	13 6

W. J. PHALEN, Sec'y-Treas.

### State Shooting Associations.

BECAUSE of numerous inquiries received from clubs wanting to join State associations in order to give registered tournaments, we have obtained from E. Reed Shaner, secretary of Interstate Association, a list of State associations, which we publish herewith.

- Arizona.—No association that we know of.
- Arkansas.—Wm. W. Little, Pres., Hot Springs, Ark.
- Alabama.—H. McDermott, Sec'y, P. O. Box 926, Birmingham, Ala.
- Colorado.—Rocky Mountain Interstate Sportsmen's Association. (This includes Colorado, New Mexico and Wyoming.) W. G. Myers, Sec'y, Salida, Col.
- Canada.—Dominion of Canada Trapshooters' Association. T. Claude Cooke, Sec'y, 302 St. James St., Montreal, Que., Canada.
- Idaho.—E. F. Walton, Sec'y, 417 N. 9th St., Boise, Idaho.
- Illinois.—Robt. Scholes, Sec'y, Peoria, Ill.
- Indiana.—R. O. Miller, Sec'y, City Bldg., Terre Haute.
- Iowa.—Jas. Kautzky, Sec'y, Ft. Dodge, Ia.
- Kansas.—Chas. T. Rankin, Sec'y, Hutchinson, Kans.
- Kentucky.—T. H. Clay, Jr., Pres., Austersitz, Ky.
- Louisiana.—E. F. Leckert, Sec'y, 321 Magazine St., New Orleans, La.
- Maine.—No State association that we know of.
- Maryland.—Geo. P. Mordecai, Sec'y, 312 E. Baltimore St., Baltimore, Md.
- Massachusetts.—F. E. H. Sheldon, Sec'y, 70 Pine St., Chicopee Falls, Mass.
- Minnesota.—Adolph F. Rauch, Sec'y, Crookston, Minn.
- Mississippi.—C. M. Davis, Pres., Laurel, Miss.
- Missouri.—T. M. Ehler, Pres., Slater, Mo.
- Montana.—Reynolds Prosser, Sec'y, Helena, Mont.
- Nebraska.—M. Keith Neville, Pres., N. Platte, Neb.
- New Jersey.—Chas. T. Day, Sec'y, 618 N. 7th St., Newark, N. J.
- New York.—C. F. Lambert, Sec'y, 201 Clinton St., Buffalo, N. Y.
- North Carolina.—J. E. Crayton, Pres., Charlotte, N. C.
- North Dakota.—Albert E. Rose, Sec'y, 322 8th St., Fargo.
- Ohio.—J. S. Ritt, Sec'y, Circleville, O.
- Oklahoma.—W. F. French, Sec'y, Pond Creek, Okla.
- Pennsylvania.—Bernard Elssner, Sec'y, York, Pa.
- South Dakota.—John Sherbino, Sec'y, Webster, S. D.
- Texas.—Geo. Tucker, Sec'y, Brenham, Tex.
- Vermont.—H. B. Moulton, Pres., Montpelier, Vt.
- Virginia.—J. D. Owen, Sec'y, Lynchburg, Va.
- Washington.—T. B. Ware, Pres., care Ware Bros., Spokane, Wash.
- West Virginia.—C. W. Phellis, Sec'y, Huntington, W. Va.
- Wisconsin.—R. E. St. John, Sec'y, Green Bay, Wis.
- Delaware.—W. A. Joslyn, Sec'y, 466 Du Pont Building, Wilmington, Del.
- Michigan.—B. S. Gaylord, Pres., Owosso, Mich.
- California-Nevada.—T. D. Riley, Sec'y, 242 California St., San Francisco, Cal.
- Georgia.—Geo. H. Waddell, Pres., Columbus, Ga.
- Oregon.—E. A. Bean, Sec'y, Eugene, Ore.

### Indianapolis Gun Club.

INDIANAPOLIS, Ind., Feb. 8.—Lewis with 84 per cent. was best in the target practice here to-day. The bare figures do not show the merit of the performance. The scores follow:

Shot at. Broke		Shot at. Broke	
Alig	150 98	*Vietmeyer	100 71
Moller	150 110	Dixon	100 70
Lewis	100 100	Hofer	25 21
*Hymer	100 82		

\*Professionals.

On Feb. 22 the club will hold a Jack Rabbit tournament, the program to cover 100 targets, entrance \$5, and \$1 for targets. We have room and a hearty welcome for all who may attend.

R. R.

Feb. 15.—Edmonson and Moller were the only ones to beat 90 per cent. in the practice to-day, with 92½ and 91½ respectively. And that was some shooting, as the wind blew half a gale across the traps. In the Du Pont fob handicap Alig led with 41 out of 50, while Edmonson added one to his lead over Lewis in the totals to date. Scores were as follows:

Practice:		Shot at. Brk.		Shot at. Brk.	
Barstow	120 82	Lewis	60 46		
*Barr	90 81	Alig	60 43		
Moller	60 55	Edmonson	40 37		
Appel	110 84	Neighbors	60 33		

\*Professionals.

Trophy:  
Lewis 50 37  
Alig 50 41  
Edmonson 50 38  
Miller 50 39  
R. R.

**Cleveland Gun Club.**

CLEVELAND, O., Feb. 8.—Dr. A. I. Brown was the star performer of the afternoon at the traps of the Cleveland Gun Club to-day, winning two events, tying for high honors in the third and copping high gun laurels with a total of 138 out of 150.

Conditions were hard, as a high, unstable wind blew across the traps. However, it did not seem to be quite as hard for Brown as for the rest, as he got away with two out of three events in good style, and the only thing that he was sorry for was that more of the crackerjacks were not out, as he likes to trim the bunch, but they take to the tall timber when the wind blows.

Event No. 1, semi-annual trophy, 50 targets, 16yds.: Brown 47, Stepp 47, Hogen 41, Weeden 40, Jones 40, Jack 40, Little 40, Stevens 35, Thorp 34, Noble 33, Hartman 31.

Event No. 2, annual trophy, 50 targets, 16yds.: Brown 45, Weeden 40, Hogen 40, Stepp 40, Jack 39, Little 39, Stevens 38, Thorp 37, Jones 36, Noble 31, Hartman 25.

Event No. 3, quarterly contest, 50 targets, 16yds.: Brown 46, L. M. Weeden 45, Stepp 44, Hogen 40, Jones 40, Weeden 40, Thorp 38, Jack 38, A. J. Stevens 33, Noble 31, Stevens 31, Hartman 27.

Feb. 15.—Good scores were made here to-day, as follows:

Event No. 1, semi-annual trophy, 50 targets: Blakeslee 48, Stepp 45, Brown 45, Weeden 44, Dibble 49, Buckley 39, Freeman 38, Stone 35, Hartman 35, Grant 34, Stevens 32, Noble 30.

Event No. 2, annual trophy, 50 targets: Weeden 46, Blakeslee 44, Stepp 44, Dibble 44, Jack 42, Beck 39, Brown 39, Grant 39, Freeman 37, Stone 35, Hartman 35, Noble 29.

Event No. 3, quarterly trophy, 50 targets: Blakeslee 46, Stepp 45, Weeden 44, Brown 44, Grant 38, Stevens 37, Freeman 37, Stone 34, Hartman 34, Noble 30.

Event No. 4, sixth city trophy, 50 targets: Weeden 48, Brown 46, Blakeslee 45, Grant 41, Hartman 37, Stone 34, Stevens 30, Noble 30.

F. H. WALLACE, Mgr.

**Pahquique Rod and Gun Club.**

DANBURY, Conn., Feb. 8.—The thirteenth annual shoot on the range of the Pahquique Rod and Gun Club, on the Tamarack, ended in a banquet of glory and good cheer. Twenty men and one young lady, Miss Thorpe, of Mt. Vernon, turned out for the shoot. Cold, raw wind made discs untempting.

The chief event was the banquet cup for the best score out of 50, amateurs only. W. A. Gregory, of Danbury, was the winner with 39.

An added target event, a handicap match for \$5 in gold, was won by Dr. Paul U. Sunderland, of Danbury.

The shoot was in charge of C. Howard Daley and W. E. Day, members of the Pahquique Club, assisted by G. H. Chapin, of Winchester Arms Co. Scores:

**Marlin Repeating Shotguns**

**Model 28, 12 Gauge, Hammerless, Take-Down**

Here's the best repeating shotgun made. It's a fine appearing, beautifully-balanced gun, without any objectionable humps or bumps; it has every up-to-date feature and many exclusive advantages. Standard grade guns (No. 28 A, No. 28 B, No. 28 C and No. 28 D) have pistol grip stock; straight grip furnished on special order. They have a neater frame, more finely modeled buttstock, better lines and more style than any similar gun.

No. 28TS, "Trap Special Grade," 12 Gauge, Take-Down, Matted Barrel, 6 Shots, Weight about 8 lbs. Price, . \$26.00

No. 28T, "Trap Grade," 12 Gauge, Take-Down, Matted Ribbed Barrel, 6 Shots, Weight about 8 lbs. Price, . \$43.00

No. 28C, Grade "C" 12 Gauge, Take-Down, Matted Barrel, 6 Shots. Weight about 8 lbs. Price, . . . . . \$50.00

No. 28D, . . . . . \$100.00

Marlin Hammerless Shotguns No. 28A, \$22.60

The Model 28 hammerless trap guns provide every trap shooting requisite, in the best designed "pump gun" ever placed on the market.

No. 28T.—Special Rolled Steel barrel with raised rib, matted on top for its entire length and unequalled in shooting ability. Buttstock and forearm Circassian Walnut, finely modeled, with London oil finish, fine hand checking, bottle comb, large broad butt with hard rubber buttplate. Action parts highly polished for smooth operation. Regular buttstocks have straight grip; this grade made to order without extra charge, with straight or pistol grip stock, any length and drop within reasonable limits.

No. 28 T.S.—Provides at moderate cost a gun just right for the average trap-shooter. The barrel is handsomely matted on top for its entire length, giving a dull streak which prevents reflection of light and gives a quick, clear sight. Buttstock and forearm of American walnut, finely checked; buttstock 14 inches long, 1 3/8 inches drop at comb, 2 inches drop at heel (as in regular No. 28 T), with the large broad butt which covers more of your shoulder and keeps the shock of the recoil down to a minimum.

The Ideal Hand Book contains full information regarding powders, bullets, primers and reloading tools for all standard rifle, pistol and shotgun ammunition, tells how to measure powders accurately, and gives information on everything relating to loading and r loading of ammunition. 160 pages; free for 3 stamps postage. The Marlin Firearms Co.

You want its advantages: Hammerless—all operating parts contained inside the frame or receiver; Solid Steel Breech—inside as well as outside, so that a defective cartridge could not possibly break the grip of buttstock and hurt the shooter's hand; Solid Top Receiver and Side Ejection—important features of all modern repeating arms; Matted Barrel—the barrel handsomely matted on top for its entire length—a high grade and exclusive feature never before furnished on standard grade repeating guns; Press-Button Cartridge Release—to change loads quickly or remove loaded cartridges from magazine at end of day's shooting; Automatic Recoil Hang-Fire Safety Device, giving full protection against hang-fire (defective) cartridges; Double Extractors and simple, quick, smooth-working mechanism: Take-Down; Trigger and Hammer Safety—a double lock on the hammer (when carrying gun loaded) that can be instantly released for quick firing. It is the safest breech loading shotgun built.

In 1912 the Marlin trap gun was high over all repeating and double guns for all single and double targets at the Westy Hogan, the big amateur shoot of the east; won the big Western Independent Handicap (amateurs exclusively); won the Preliminary Handicap at G.A.H.; tied for Amateur Championship; etc. Why don't you shoot a Marlin?

Circulars describing all Marlin hammerless guns free on request. Complete catalog of all Marlin rifles and shotguns for three stamps postage.

# High Gun

AT DENVER, 1912  
HANDICAP, SEPT. 10-13

## Mr. R. H. Bruns, shooting his LEFEVER

made the marvellous run of  
283 without a miss.

On the 700 single targets, including handicaps, Mr. Bruns scored 683 out of 700.

The second day of the tournament on the day's program of 200 targets, Mr. Bruns and his Lefever gun scored 200 out of 200. A world's record for ten traps.

On the 500 single 16-yard target for amateurs, Mr. Bruns scored 494 out of 500.

### ANOTHER WINNER AT THE PACIFIC COAST HANDICAP

Mr. L. H. Reid, shooting his Lefever gun, won second high average with 381 out of 400.

Why don't you shoot a LEFEVER?

### Spring Valley Shooting Association.

THE 20-bird race, held under the auspices of the Spring Valley Shooting Association on the Spring Valley grounds, proved a success. The day was very cold, with a slight gale stirring across the field. The ground was covered with snow, which made the birds almost invisible. Many a thick, heavy-feathered gamester made its way to the barnyard.

In the preliminary handicap event, which opened at 11 A. M., by Manager A. A. Fink with ten entries, Fred W. Dinger, of Harrisburg, and Dick Lamb, of Philadelphia, scored straight for first honors. Frank Wertz, of Reading; J. C. Martin, of Harrisburg; Daubert, of Llewellyn; Hand of Tower City, and A. Moyer, of Manatwamy, tied for second honors.

In the 20-bird race, twenty-five shooters participated. Many of these had previous State records, and some had records as one-barrel shooters. In this race, Walter S. Behm, of Esterly, handicapped at 29yds., shot a clean score of 20, his last two being shot in the dusk. He was the last man at the firing line, and when his last bird dropped, applause arose among the participants and shooting admirers of Mr. Behm. He has now a phenomenal record of 52 straight kills unfinished. Out of these he killed 23 birds with one barrel. He will very likely continue this run at Harrisburg or Pottstown on Feb. 22, where a 20 and a 15-bird race, handicap, will be shot. Since Mr. Behm has attained this record, he will very likely be handicapped to 30yds. at either of these coming events.

Frank Wertz, of the home club, and Fred W. Dinger, of Harrisburg, tied for second honors with 19. Wertz missed his 12th bird, a dark brown hooper, which made its way among the missing across the fence. Dinger missed his bird, and from then he shot a perfectly steady clip to the finish. He was a former State challenge trophy holder.

Third honors on 18 kills were won by Fick, of Blandon, and H. J. Wolf, of Pottstown, the well-known crack shot.

J. J. Marberger and E. H. Adams, both of Reading, tied on 17. Adams is one of the leading crack shots both at live birds and targets in Eastern Pennsylvania. He had a very peculiar experience this afternoon. One of his shells lodged in his gun chamber, which refused to release when he was trying to fire his second shot at his 14th bird, thus a lost bird was scored against him. Adams ranked with high honors with a straight score at the Boyertown 15-bird handicap race. Here Behm tied

for second honors with 14. These two chums are very hard to beat, and will make some showing at the coming State shoot, to be held at York, Pa., on May 12 to 15.

Daubert, of Llewellyn, one of the Schuylkill county record-breakers as a one-barrel shooter, fell some shy to-day, not being used to the Berks county rules of handicapping.

Hand, of Tower City, killed 8 birds out of his 15 with one barrel, much to his credit. He is more of a target shot than a live bird shot.

Samuel Kurtz, of Newmantown, also a former State challenge trophy holder, dropped 5 birds, much surprising his admirers.

"Ice," who ranked high at Port Carbon, on Jan. 30, won high gun, but fell away below his usual average to-day.

Sixteen kills proved to be the lucky number, as eight shooters tied on that number, viz.: Prutzman, of Reading; Martin, of Harrisburg; Oliver, of Harrisburg; Coldren, of Reading; Lee Wertz, of Temple; Melot, of Fleetwood; Noll and Hoffa, of Myerstown.

Fred W. Dinger, of Harrisburg, distributed programs and entry blanks for the 20-bird handicap race, to be shot on the Harrisburg Sportsmen's Association grounds on Saturday, Feb. 22.

H. J. Wolf, of Pottstown, announced a 15-bird handicap race for Saturday, Feb. 22, to be shot on the Ringing Rock grounds, Pottstown, where a silver trophy will be awarded to the winner. A. A. Fink, of Reading, will have charge of the management.

A. K. Ludwig, secretary of the Hercules Gun Club, Temple, Pa., announces a grand target shoot on their grounds on Saturday, March 8. All lovers of this kind of sport are cordially invited to attend. Programs will be distributed in due season.

Event No. 1, 7 live birds, entrance \$5; Dinger 7, Frank Wertz 6, Martin 6, Dick Lamb 7, Winchester 5, Eisenhower 5, Oliver 5, Daubert 6, Hand 6, Moyer 6.

No. 2, Spring Valley Handicap, 20 live birds, entrance \$12:

	Yds.	T'l.		Yds.	T'l.

LUDDY.

### Birmingham Gun Club.

THE programs for the Feb. 22 shooting tournament and midwinter handicap will be out in a few days and will comprise a 100-bird handicap in the forenoon. The member of the Birmingham Gun Club making the highest score will receive a sterling vase.

In the afternoon there will be ten 20-target events, all at 16yds., sweepstake shooting, with \$75 added money. Money divided Jack Rabbit system. Surplus divided percentage system, four equal moneys.

Scores made at the Friday shoot follow:

Shot at.	Broke	Shot at.	Broke		
E M Cornwell	100	89	Ira Armstrong	100	77
J C Broyles	100	85	Randolph	100	72
Yas Hillman	100	84	R H Baugh	100	66
H Hamilton	100	83			

Scores made on Saturday follow:

Shot at.	Broke	Shot at.	Broke		
Tom Cassidy	100	82	Dr Sellers	85	51
E M Cornwell	75	68	O L Garl	70	49
Mrs Garl	100	64	W Matlock	75	44
C Hunter	100	62	J Lambeth	50	37

Feb. 16.—At the regular weekly shoot of the Birmingham Gun Club, held Friday, John Fletcher shot high with 93 breaks out of his 100 shot at. Twelve shooters were out.

On the special shoot on Saturday afternoon, six shooters were present. The wind was blowing very hard and erratic, consequently the scores are bad.

The Feb. 22 registered shoot will be well attended, judging from present indications.

Scores made Saturday follow:

Shot at.	Broke	Shot at.	Broke		
Dick Leland	100	79	Mrs Garl	80	48
E M Cornwell	85	68	J J Smith	100	55
O L Garl	80	67	F Cornwell	65	29

### New Rochelle Y. C.

NEW ROCHELLE, N. Y., Feb. 9.—The day was clear and cold, and a brisk, puffy wind made the targets rather difficult. It was the biggest shoot the yacht club has had so far, there being twenty-six contestants, and the number of targets shot at was over 3,800. Shooting began at 10:30 A. M., and with the exception of an hour for dinner, continued until about 4:30 P. M. The principal event was a team shoot with Siwanoy Country Club. The conditions of the match were: 50 targets, scratch, entries unlimited, best five scores of each club to constitute the teams. Siwanoy turned out nine men and one young lady, Miss Jessie Thorpe, and New Rochelle had ten men on deck. Siwanoy won the match by 15 birds. Among other visitors were Neaf Apgar, Mrs. Vogel and Fred Howard.

Donovan won a leg on the Olympic cup, and Molloy won a leg on the February cup.

Field Captain Granbery was a busy man, looking after the details of the shoot, and what little shooting he did was not up to his usual form. A team shoot

Latest and Best Device to PREVENT SHOCK from Gun Fire or Other Noise. With Pocket Case, \$1 00 pair. Ask your dealer for them.

J. A. R. ELLIOTT

P. O. Box 201 New York, U. S. A.

with Stamford Rod and Gun Club is on the program for later in the month. Scores:

No. 1, 10 targets: Howard 9, Granbery 7, Dr. Jones 7, Stoddard 6, Donovan 6, Currie 5, Guggenheim 5, Haas 4.

No. 2, 15 targets, scratch: Dr. Jones 14, Howard 13, Mrs. Vogel 13, Haas 12, Bullock 11, Korper 11, Giriat 11, Guggenheim 10, Donovan 10, Pelham 10, Molloy 10, Currie 10, Chandler 9, Stoddard 8, Marsland 7.

Event No. 3, Olympic, 10 targets, scratch: Donovan 9, Offutt 8, Giriat 8, Chandler 6, Krauss 6, Haas 6, Marsland 6, Molloy 5, Granbery 4, Stoddard 5.

Event No. 4, team shoot: Siwanoy C. C.

No. 9, 25 targets, scratch: Offutt 23, Hill 23, Apgar 23, Howard 21, Chandler 21, Haas 20, Mrs. Vogel 19, Guggenheim 18, Yates 16, Stoddard 15, Black 12.

No. 10, 25 targets, scratch: Guggenheim 23, Howard 21, Mrs. Vogel 20, Chandler 20, Haas 18, Stoddard 15, Black 14.

### Baltimore Rod and Gun Club.

BALTIMORE, Md., Feb. 14.—We have not had an official shoot since late fall, owing to our lease expiring and the property being sold for building purposes. We held an official shoot, or 25-bird race, on Feb. 8, at Homestead Farm, Phoenix, Md. The next shoot will be held Easter Monday.

Scores made on Feb. 8 follow: J. Johnson 22, Rush Williams 15, Basil Hall 14, G. Hall 13, J. Turnbaugh 10, A. Shearer 6, C. Wylie 6, A. Sterrett 6, J. Shearer 6, E. Johnson 3, J. Miller 2, B. Winder 2.

Geo. Chapman was scorer; Capt. Wm. A. White, referee. J. B. DOLMAN, Sec'y.

### South Chicago Gun Club.

CHICAGO, Ill., Feb. 9.—At our annual election for the year of 1913 the following officers were chosen: Dr. J. W. Stanton, President; Gilbert Morgan, Vice-President; Fred. Pernod, Treasurer; Ben Taylor, Financial Secretary; Chas. H. Rambo, Recording Secretary; Gus Johnson, Field Captain; Wm. Hausler, Chas. G. Hausler and Ross Woodhull, Trustees.

The new year of 1913 started with 103 members. The club is starting its fourth year, and has steadily grown from year to year. It has a good financial standing, and all of its members satisfied. The membership fee is \$3, and the dues \$3 per year. Any applications will be gladly received. CHAS. H. RAMBO, Rec. Sec.

Siwanoy Country Club.

Mt. VERNON, N. Y., Feb. 12.—With the temperature hovering at about 20 degrees at the Siwanoy Country Club traps, it looked as if, in spite of this and the handicap of a playful little breeze, that the twenty-two gun section members would turn in some good scores, when Dr. R. J. Held made a mark of 24 in the first practice squad. Good scoring was not to be, however, when the aforesaid playful little breeze noticed what was going on, and while the antics of the targets were interesting to watch, the targets themselves were very hard to hit.

First honors in the president's trophy, which is handicapped on the Du Pont system, with a distribution of points to the ten high guns, were won by Prof. Lewis D. Hill, who made a full score with his handicap of 5 targets, and the aid of Dr. Currie's new gun. The standing to date of the highest total points won on the president's trophy is as follows: Prof. Hill 26.5, Dr. Held 25.5, Dr. Barnard 23.5, M. R. Guggenheim 21.5, G. L. Yates 21, Z. C. Offutt 20, G. A. Wylie 19, W. Thorpe 17.8, Dr. Currie 17.5, and J. G. Wintjen 16.3. One of the above will be the winner on Washington's Birthday, on which date the seventh and final competition will be held.

No one qualified for a leg on the captain's trophy, which is a miss-and-out affair, requiring 10 straight targets, although G. A. Wylie broke 7 and L. G. Bond 6. M. R. Guggenheim was high gun in the Dupont trophy with (S) 24. The high scores to date are: H. J. Smith 65, Dr. Currie 65, G. A. Wylie 63, G. L. Yates 63, M. R. Guggenheim 63, Dr. Barnard 63, W. M. Wylie 62, Prof. Hill 62.

J. P. Donovan with (4) 23 and H. J. Smith with (5) 25 walked away with first and second take-home trophies. The two jack rabbits were won respectively by E. L. Haas with 21 and Dr. Barnard with 19. Scores:

Table with columns: Name, Handicap, Total, Points. Lists scores for Du Pont trophy, 25 targets, handicap.

Table with columns: Name, Handicap, Total, Points. Lists scores for First take-home trophy, 25 targets, handicap.

Table with columns: Name, Handicap, Total, Points. Lists scores for Second take-home trophy, 25 targets, handicap.

First jack rabbit, 25 targets, scratch: G. A. Wylie 19, G. L. Yates 18, E. L. Haas 18, M. R. Guggenheim 17, Dr. Barnard 17, H. V. Morgan 17, W. M. Wylie 17, W. Thorpe 16, H. J. Smith 16, Dr. Currie 14.

Second jack rabbit, 25 targets, handicap: E. L. Haas 21, M. R. Guggenheim 20, Dr. Barnard 19, Dr. Currie 18, H. V. Morgan 17, G. L. Yates 17.

Buffalo Audubon Club.

High scores were in order at the second regular shoot of the Audubons for February. Old reliable F. D. Kelsey, Ebberts, Dr. Bartlett, Collins and Conley were in the 90 per cent. column. Dr. Bartlett, a new member from Castle, N. Y., carried off highest honors with 93 out of his 100.

New shooting grounds will have to be provided by April 1, and a committee has been appointed to arrange for same. Scores:

Table with columns: Name, Targets, Scores. Lists scores for various members like Reid, Collins, Ward, Kelsey, Ebberts, etc.

Table with columns: Name, Targets, Scores. Lists scores for various members like Bernhard, Fish, Lambert, etc.

White Plains Gun Club.

WHITE PLAINS, N. Y., Feb. 12.—White Plains Gun Club to-day beat Greenwich Gun Club in a five-man team shoot on the home grounds. Over thirty gunners were out, the shoot lasting all day.

A. L. Burns won a silver cup for best score in the shoot. The summaries:

Table comparing White Plains G. C. and Greenwich G. C. scores for members like Burns, Lawrence, Martin, etc.

Take-home trophy, 50 targets, handicap: A. L. Burns 4 48, T. H. Lawrence 4 47.

Table with columns: Name, Handicap, Total, Points. Lists scores for Selected 100-target match.

Feb. 15.—Schefflin won first in the 100-target prize for selected high score for the season; Ward was second, and Dr. Martin third.

Table with columns: Name, Handicap, Total, Points. Lists scores for members like Townsend, Dr. Martin, Hyland, etc.

Table with columns: Name, Handicap, Total, Points. Lists scores for Event No. 3, at 50 targets, handicap.

Bennett Gun Club.

GLOUCESTER CITY, N. J., Feb. 15.—Bennett Gun Club resumed their weekly shooting matches to-day, twenty-five facing the targets. The prize was won by A. Steorling, who piled up a perfect score, as follows: A. Steorling 15, F. Bennett 14, E. Cleor 14, S. Pickett 13, F. Butler 13, A. Cheesman 13, J. Sharp 13, E. Thomas 13, G. Grater 13, G. Hargesheimer 13, H. Burroughs 13, R. Blackburn 13, B. Martel 12, R. Halloway 12, R. Harvey 11, S. Hurley 11, W. Lawler 11, M. Hughes 11, W. Hinst 11, F. Molt 11, S. Hide 11, Joe Phillips 11, H. Stanton 11, T. Higgins 10, W. Somers 10.

Lehigh Rod and Gun Shoot.

BETHLEHEM, Pa., Feb. 15.—An interesting live-bird shoot was held this afternoon before the traps at Rittersville by the Lehigh Rod and Gun Club, Scores:

Table with columns: Name, Handicap, Total, Points. Lists scores for various members like Sobers, Kethledge, Michael, etc.

Bordentown Gun Club.

BORDENTOWN, N. J., Feb. 15.—The Bordentown Gun Club held a clay pigeon match here to-day, at 20yds. rise and 25 targets each. Scores: McLaughlin 20, Evan 19, Thompson 18, West 14, Koenig 16, Kester 15, Maitland 14, Southard 6, Brakely 9, Pellett 9.

RIFLE NOTES.

National Rifle Association Notes.

WASHINGTON, D. C., Feb. 10.—At a recent meeting of the executive committee, the program of the international matches and also of the N. R. A. matches were completed. The changes in the N. R. A. program were: Putting the individual military championship of the United States in the President's match alone, and making that match of more importance by increasing the number of shots at 1000yds., to 15 shots, and shooting the 600yd. score on target B, with a counting bull of 16in. in diameter. This new target, which has just been adopted by the N. R. A., will be used in several of its matches. The life and annual members' match was consolidated into one match, to be known as the Individual Members' match. The long-range Tyro match

was abolished, owing to the fact that there is now a tyro class in all of the matches.

A new match was added for civilian rifle clubs, teams of four men, shooting 20 shots at 500yds. This is the second time that the N. R. A. has put a match in its program for civilian rifle clubs. It was withdrawn before on account of lack of patronage. The match will not be shot unless there are more than four entries.

The program of the joint tournament will be ready for distribution in about three weeks, and copies will be sent to all individual members of the N. R. A., as well as the officers of affiliated organizations. The year book for 1912 has been delayed on account of the preparations for the international shoot. The same will not be ready for issue under two months. This book will be sent free to all individual members and officers of affiliated organizations.

The executive committee decided to take on once again the international small-bore match with England, Canada and Australia, and the secretary was authorized to proceed with the organization of a team to represent the United States. This team will be selected from those members of rifle teams who are now competing in the Interclub League matches.

Public High School Competition.

WASHINGTON, D. C., Feb. 10.—The fifth week in the High School Rifle Shooting League matches shows a triple tie for first place in Class A between the Iowa City, the Deering of Portland, Me., and the Morris, of New York city. In Class B, the Portland, Me., and Salt Lake are still tied for first place. These results of the matches were:

Iowa City defeated the Eastern, of Washington, D. C., 556 to 545; School of Commerce, New York, defeated the

land. The secretary's report showed the club in good financial condition. Before adjournment of the meeting a number of plans were advanced which it was thought would attract the high

QUEEN OF PEARLS.

class dogs to the trials, and these were generally discussed. The club wishes to have its trials recognized as one of the best amateur trials of the country and will spare no efforts to attain this result.

**Dog Muzzling in Vienna.**

Dog lovers in Vienna protest strongly against the cruel muzzling laws in the Austrian capital. The law imposes a wickedly conceived wire arrangement, which is of no practical value against rabies. Any dog suffering from rabies will speedily free himself of any muzzle.

A few days ago, says the New York Tribune, a number of children cruelly tormented a dachshund. The animal turned upon its tormentors and bit several of them. At once the cry of "Mad dog!" was raised, and police circulars were issued regarding more stringent muzzling.

Perlin, called the best organized city in Europe, gave up the muzzling system more than two years ago, realizing that it was unnecessary. Vienna would do well to follow suit if it wishes foreigners possessing dogs to come there.

PRINCESS NAN.

Baltimore Polytechnic Institute, 874 to 811; Deering, of Portland, Me., defeated the Stuyvesant of New York, 861 to 893; Morris, of New York, defeated Western, of Washington, D. C., 914 to 651; De Witt Clinton, New York, with a score of 875 won by default from Brookline, Mass.; Susquehanna Pa., High defeated Business High, of Washington, D. C., 900 to 824; Sault Ste Marie, Mich., High defeated St. Louis Manual Training, 881 to 690; Springfield, Mass., Technical, defeated the District of Columbia Technical, 897 to 893; Salt Lake City High defeated the Tucson, Arizona, High, 935 to 772; Portland, Me., High defeated Utica, N. Y., Free Academy 935 to 768.

Feb. 17.—The results of the sixth match in the league series of rifle shooting matches being carried on be-

tween the high schools of the country for the National championship show little change in the standing of the clubs.

In Class A there is still a triple tie between the Iowa City High School, the Deering High School of Portland, Maine, and the Morris High School of New York city, each having six straight wins.

In Class B the defeat of the Portland, Maine, High School team by the Manual Training School of Washington, D. C., gives the lead to Salt Lake City High School. The scores made by the school teams follow:

Iowa City High School defeated the Stuyvesant High, of New York city, 952 to 892; Baltimore Polytechnic defeated Eastern High, of Washington, D. C., 862 to 816; Morris High, of New York city, defeated the DeWitt Clinton High, of New York city, 919 to

574; the Deering High, of Portland, Maine, defeated the Western High, of Washington, D. C., 960 to 810; High School of Commerce, New York city, with a score of 822 won from the Brookline, Mass., High by default; Salt Lake City High defeated Business of Washington, D. C., 934 to 782; Susquehanna, Pa., High defeated Springfield Technical 938 to 918; Manual Training, Washington, D. C., defeated Portland, Maine, High 919 to 918; Sault Ste. Marie, Mich., High defeated Utica, N. Y., Free Academy 897 to 790; Tucson, Arizona, High defeated St. Louis Technical 800 to 695.

**Indoor Rifle League Contest.**

WASHINGTON, D. C., Feb. 8.—The United States indoor rifle shooting team record was tied, and the triple tie in the Eastern Interclub Rifle Shooting League was broken by the Warren (Pa.) Rifle Club, which made a score of 996 of the possible 1000. This means that five men of this team placed 100 shots in a space that could be covered by a 5-cent piece. The results of the sixth match of the series for the championship are as follows:

Warren Rifle Club defeated Park Club, of Bridgeport, with a score of 996 to 989; District of Columbia R. A. defeated the 13th Regt. R. C. of Brooklyn, 986 to 918; Manchester (N. H.) Rifle and Pistol Club, with a score of 970, won by default from Bangor (Me.) R. A.; the Birmingham (Ala.) A. C. defeated Presque Isle R. C., of Erie, Pa., with a score of 954 to 943; Myles Standish R. C., of Portland, Me., with a score of 951, and the New Orleans (La.) R. and R. C. with a score of 908, both won their matches by the default of their competitors.

The standing of the clubs to date is as follows:

	Won.	Lost		Won.	Lost
District of Col....	6	0	Manchester .....	5	2
Warren .....	6	0	Birmingham .....	2	4
Bridgeport .....	5	1	New Orleans .....	2	4
Erie .....	3	3	Brooklyn .....	0	6
Bangor .....	3	3			

In the Western League the results are as follows: Adrian (Mich.) R. C., defeated Madison (Minn.) R. C., 978 to 952; Dickinson (N. D.) R. C. defeated the First Wisconsin R. A., 976 to 953; Engineers' R. and R. C., of Cleveland, defeated the Rocky Mountain R. C., of Butte, Mont., 990 to 977; Bucyrus R. C. defeated the New Orleans (La.) R. C., 970 to 933; Milwaukee, (Wis.) R. and R. C. defeated Tacoma R. C., 942 to 919; St. Paul (Minn.) R. and P. C. defeated St. Louis-Colonial R. C., 972 to 946.

In the Western League, Cleveland had a lead of 6 straight wins, with St. Paul, Milwaukee and Adrian second with four wins and one loss. Indications point to the final contest for the national trophy between the Cleveland, O., Club and the Warren, Pa., Rifle Club.

Feb. 15.—The results of the seventh contest are as follows: District of Columbia Rifle Association defeated the Park Club, of Bridgeport, Conn., 991 to 983; Warren, Pa., Rifle Club, which was scheduled against the Philadelphia Rifle Association, which has been withdrawn from the matches, made the excellent score of 993; the Manchester, N. H., Rifle and Pistol Club defeated the Birmingham Athletic Club Rifle Association 972 to 957; Myles Standish Rifle Club, of Portland, Me., defeated the New Orleans Rifle and Revolver Club 957 to 919; Presque Isle Rifle Club, of Erie, Pa., defeated the 13th Regiment Rifle Club, of Brooklyn, N. Y., 947 to 897; Bangor, Maine, Rifle Club defaulted.

**Military Schools Championship.**

WASHINGTON, D. C., Feb. 12.—The results of the fourth match in the national shooting competition for military schools is given out by the National Rifle Association of America. In the Eastern Division, the Bordertown, N. J., Military Institute and the St. John's School, of Manlius, N. Y., are still tied for first place. In the Western Division, the Wentworth Military Academy, of Lexington, Mo., and the St. John's Military Academy, of Delafield, Wis., are tied for first place with the Culver Military Academy, and the Harvard Military School of Los Angeles, Cal., runners-up, with only one match lost for each. The results and scores follow:

The Bordertown Military Institute defeated the New Mexico Military Institute, 894 to 841; New York Military Academy defeated the Randolph Military Academy, 814 to 658; Nazareth Hall Military Academy with a score of 595 won from Girard College by default; St. John's School, Manlius, N. Y., with a score of 868, won from the Miami Military Institute by default; Culver Military Academy defeated the Kentucky Military Institute, 914 to 776; the Harvard Military School defeated the Kemper Military School, 857 to 817; St. John's Military Academy, of Delafield, Wis., defeated the Missouri Military Academy, 895 to 727; the Wentworth Military Academy, with a score of 920, won from the Hitchcock Military Academy by default.

**League Island vs. Reading Turn Verein.**

READING, Pa., Feb. 11.—The rifle competition of the Island League and the Reading Turn Verein resulted in the following score: John Jones and George Bernhart served as judges. The Island League won with 104 points to the good. Many of the members visited the range during the contest. A reception was tendered the former by the latter after the tournament. Scores:

Island League.		Reading Turn Verein.

## U. S. R. A. League Contest.

SPRINGFIELD, Mass., Feb. 18.—Following are the official scores of the twenty-first and twenty-second matches in the weekly competitions of the U. S. R. A.:

**Twenty-first match:**

Olympic	vs. Denver	1104	1123
National Capital	vs. Boston	1107	1107
Columbus	vs. Portland	1103	1107
Pittsburgh	vs. Springfield	1020	1120
Myles Standish	vs. Manhattan	1078	1092
Shell Mound	vs. Philadelphia	1024	1105
Baltimore	vs. Spokane	1044	1097
Dallas	vs. St. Louis-Colonial	1053	1071
Louisville	vs. Providence	1009	985
Warren	vs. Tacoma	908	994
Citizens	vs. Osborn	989	985
Belleville	vs. Cincinnati		985

**Twenty-second match:**

Springfield	vs. Manhattan	1139	1112
Portland	vs. Philadelphia	1115	1102
Boston	vs. Spokane	1111	1140
Denver	vs. St. Louis-Colonial		1086
Olympic	vs. Providence		1070
National Capital	vs. Tacoma	1115	973
Columbus	vs. Osborn		974
Pittsburgh	vs. Cincinnati	1114	985
Myles Standish	vs. Youngstown	1018	1075
Shell Mound	vs. Citizens	1083	
Baltimore	vs. Belleville	1041	984
Dallas	vs. Warren	1032	1029

The following shooters have made possibles in addition to those already listed: Hoffman, Jewett and Fennell, of Boston; Patterson, of Osborn; Atkinson, of National Capital, Ayer, of St. Louis; Dolfen, of Springfield (two); Coats, of Spokane; Armstrong, of Olympic. The contest (Tacoma-Cincinnati) in the nineteenth match goes to Tacoma, 990 to 982. The Belleville-Tacoma contest in the twentieth match goes to Belleville, 1007 to 1003.

Tacoma has been charged with a shot missing in the twentieth match and the secretary-treasurer will entertain a protest on his scoring of this match.

J. B. CRABTREE, Sec'y-Treas.

## The Military School Leagues.

WASHINGTON, D. C., Feb. 19.—The National Rifle Association of America announces the results of the fifth match in the series of Leagues competitions being carried on between the military schools of the country for the national trophy, to be presented by the War Department.

In the Eastern League, the Bordentown Military Institute and the St. John's School of Manlius, N. Y., both of whom won their matches this week, are still tied for first place. The results of the match between the schools of the East are as follows:

Bordentown Military Institute defeated the New York Military Academy, 905 to 863; St. John's School of Manlius, N. Y., defeated the Randolph Military Academy, of Morristown, N. J., 908 to 689; New Mexico Military Institute, with a score of 831, won by default from Girard College, of Philadelphia; Nazareth Hall Military Academy, of Nazareth, Pa., with a score of 578, won by default from the Miami Military Institute.

In the Western League, the Wentworth Military Academy is leading, closely followed by Culver, Ind., Military Academy and Harvard Military School, of Los Angeles, Cal. The results among the schools of the West are as follows:

Culver Military Academy defeated Missouri Military Academy, 902 to 747; Hitchcock Military Academy, of San Rafael, Cal., defeated the Kemper Military School, of Boonville, Mo., 834 to 817; Harvard Military School, of Los Angeles, Cal., defeated the Kentucky Military Institute, 874 to 760; Wentworth Military Academy defeated the St. John's Military Academy, of Delafield, Wis., 924 to 890.

## Intercollegiate Rifle Matches.

WASHINGTON, D. C., Feb. 22.—The seventh week's rifle shooting contest among the colleges of the country for the national trophy shows several important changes. In the Eastern League, Harvard University and the Massachusetts Agricultural College remain tied for first place. In the Western League, the Iowa State College, which won every match last year and every match to date for the present series, lost to the University of Minnesota, thus breaking the tie for first place in that League. West Virginia University is now the leader with Minnesota and Iowa tied for second place. The results of last week's match follow:

Massachusetts Agricultural defeated Cornell, 956 to 920; Columbia defeated Lehigh, 894 to 817; Harvard defeated Dartmouth, 935 to 893; Norwich defeated Maine, 910 to 867; Princeton defeated Vermont, 935 to 893; North Georgia Agricultural defeated Rhode Island State, 929 to 790; Massachusetts Institute of Technology with a score of 927 won by default from Clemson.

Minnesota defeated Iowa State, 955 to 947; West Virginia defeated Oklahoma A. and M., 939 to 892; Michigan Agricultural defeated Perdue, 937 to 923; Wisconsin defeated Nebraska, 923 to 875; Washington State defeated U. S. College of Veterinary Surgeons, 866 to 862; California with a score of 906 won from Missouri by default; Kansas, with a score of 845 won by default from Louisiana State.

## Right Clothing for Outdoor Wear

**N**OWADAYS the idea that any old clothes will do for sport is thoroughly exploded. Good taste and good sense demand appropriate garb, and for this purpose there are no other fabrics so good as OLIVAUTO CLOTH and FORESTRY CLOTH (Shade 65), made by The American Woolen Company. They make garments that look right and give ease and freedom to body and mind. They tailor splendidly. They turn sharp winds, being pure wool and closely woven. Each is trademarked—stamped on the back of the cloth like this:—

### OLIVAUTO CLOTH

A fashionable, olive brown serge, closely woven, medium weight; makes superb riding, golfing and motoring clothes. Doesn't show dust or grease spots readily.

### FORESTRY CLOTH

Shade 65. Beautiful gray green in color, closely woven; ideal for hunting, fishing, tramping and all outdoor wear. Official for U. S. Forestry Service.

Any custom tailor or store can obtain OLIVAUTO and FORESTRY CLOTHS for you. They may be had also in correct sporting garments ready-to-wear from Abercrombie & Fitch Co., New York, and other outfitters. If you don't find them, write for samples.

OUR OUTING BLANKETS ARE MADE TO MEET THE REQUIREMENTS OF CAMP LIFE. MADE IN VARIOUS WEIGHTS AND COLORS.

## Inter-City Rifle Shooting Championship.

WASHINGTON, D. C., Feb. 22.—The intercity club match for the rifle shooting championship of the United States show several changes for the eighth week's series of matches. The Warren, Pa., Rifle Club again tied the record and defeated the District of Columbia Rifle Association, thus taking the first place in the Eastern League. This means that the Warren marksmen will shoot off with the winner of the Western League for the championship. It looks as if their opponent will be the Engineers' Rifle and Revolver Club, of Cleveland, O. The results of the matches in the Eastern League for the eighth week follow:

Warren, Pa., Rifle Club defeated the District of Columbia Rifle Association, 996 to 986; the Park Club, of Bridgeport, Conn., defeated the Presque Isle Rifle Club, of Erie, Pa., 989 to 949; Manchester, N. H., Rifle and Pistol Club, defeated the 13th Regiment Rifle Club, of 905; the Birmingham, Ala., A. C. Rifle Association with a score of 928, the Myles Standish Rifle Club, of Portland, Me., with a score of 938, and the New Orleans Rifle and Revolver Club with a score of 920, all won their matches by default from their opponents.

## Fisherman's Luck.

In the Catskill foothills a New York traveling man who was making a trip overland passed an old man who was fishing with hook and line in a small stream. As the drummer drove by in a buggy the old man never took his eyes off the bobber in the water.

When the traveling man returned late in the afternoon he was greatly surprised to see the old man still in the same position, with his eyes glued on the bobber.

"Hello, uncle!" he shouted. "Any luck today?"

Without taking his gaze off the cork, which rested on the surface of the placid stream, the old man replied:

"Had a nibble 'long about noon."—Judge's Library.

## In the Woods with Allie

By EDWARD BRECK

A GREAT painter of the Renaissance once got even with a bitter enemy, whose political position rendered him otherwise immune, by immortalizing him in a celebrated painting of the Inferno as one of the principal devils. The method always appealed to me, and I have a list of certain individuals whose characters I have long contemplated placing in a very lurid literary Inferno. Judge, then, of my indignant astonishment when, before I had gathered sufficient courage for the attack, to find this method tried on myself! You have all read this calumnious caricature of a pure and simple soul offered to a jeering public under the title of "The Tent Dwellers," which purports to relate the adventures of the author, two Bluenose guides and my very humble self. Now this man came down to my cabin in the woods with a halo of innocence about his head and begged forsooth for the privilege of enjoying the primitive wilderness in my experienced company, etc. And in the largeness of my heart I took him in, this viper, and warmed him for weeks in my bosom. I opened to him the wondrous secrets of the great unknown. For days and days we paddled and fished and slept shoulder to shoulder, while he covertly studied me at this close range, he and his insidious camera. Worse yet, he entered into a foul conspiracy with a man who heaves charcoal for the magazines, to issue caricatures of me, a respectable, habitually good looking person, in the public press. You know the deplorable result; the book has sold like wildfire, and the length of two normal lives would not suffice me to eliminate those staring goggles and that dervish beard from literature. Two considerations particularly irritated me; firstly, that not one cent of the big royalties on this book ever dropped into my yawning coffers, directly, anyhow; and, secondly, that the artist not only handed down to posterity a totally wrong impression of my particular style of beauty, but actually had the appalling assurance to make that man Allie, really a shambling, overgrown creature, go down to history as an Adonis.

When the book first appeared, I thought only of blood. The double murder of a prominent author and a well-known artist, followed by a sensational homicide, in self-defense, would not only assuage my thirst for vengeance, but drag me out of the semi-nirvana in which an apathetic public had thus far left me to languish. But something—was it my New England conscience?—caused me to abandon this fell plan, and I determined to sue both author and artist for defamation of character. But again it occurred to me that such a *cause célèbre* would only tend to

increase the sale of the book, and thus put more money into my enemies' purses. Also I should be laughed at for not possessing timber heroic enough to take a joke, even when it resulted in my being placed on record for all time as a begoggled and hirsute anarchist, or a priest of the hairy Ainos of Northern Japan. I therefore determined to dissemble and invite Allie to come again to my cabin for a little trip. I would study him, as he did me, at closest range, note every idiosyncrasy and petty foible, and then—but the rest could confidently be left to my ruthless pen. I invited him once, twice, thrice, but apparently he ever suspected something; he feared Eddie even when sending honeyed words. One year he raced across the continent on the trail of the younger Twain; the next he was building a shanty in Connecticut; the third he sailed away to the Orient on a modern "Quaker City." But this year, at last, he consented. I exulted when the acceptance came, for I felt that I held his reputation in the hollow of my hand. Down should go my ruthless thumb and the contents spilled in the mire of jeering publicity. Paraphrasing Napoleon before Waterloo, I exclaimed: "I have him, this Allie!"

And then, all at once, there we were, Allie and Unk and I, with our guides Charles the Strong (he of the "Tent Dwellers"), Lou Harlow the mimic, the mighty hunter, and Horace who "trims the bunch" with rifle and paddle at every guide's meet. Once more cleaving the dimpled waters of Fairy Lake in mid September—glorious season in the north woods! Every birch and beech is a burst of yellow, every maple a flaming torch. The rocks are white along the shore, breaking the lush line of reddened hardwoods. The birds have not yet left. The robin and kingbird linger, and the jays never desert us, neither he of the gaudy azure nor his more homely but "cuter" cousin, whiskey-jack. The eerie cry of the loon, the ghostly flight of the heron, the raucous squawks of crow and raven, the measured whirr of the ducks overhead, the stirring crescendo of the cock grouse's drum solo—all these were delights to eye and ear. My face tingled in the fresh breeze, but my heart was so warm and contented that I almost relented toward Allie, sitting there half doubled up in the bow of his canoe.

Nevertheless the spirit of trouble was present, though often latent, from the first. Unk had

"UNK," "ALLIE," "EDDIE."

sped on before us in chase of a solitary black duck, which we soon had the pleasure of seeing fall to his excellent aim as it rose from the water; and we, Allie and I, forthwith entered into an altercation as to the way in which that duck should be cooked. To be sure, it wasn't our duck, but we quarreled about it just the same, and we were deep in the controversy of broiled versus roasted, when we joined Unk and Lou. Unk's only comment on the subject was one solemn wink at Lou, and a mumbled remark about the "Emperor's beard."

Then we moved up West River and the trout were there, nice fellows, eager for the fly and lots of them. If it wasn't the seventh heaven, it was well up in the celestial scale, and we camped at the head of navigation thoroughly well content with the day's work. But here at once broke out a most obstinate and virulent controversy—cornbeef hash versus canned beans. You must know that Unk is a six-footer and a champion destroyer of comestibles. And he doesn't affect the delicate and the subtle. Solid grub is what Unk demands in the woods, and his idea of what the normal man should have three times a day is about three or four heaping plâtefuls of hash, cornbeef hash made of beef, potatoes, onions and pork, the last three severally cooked, and the whole afterward browned on both sides in the frying-pan. Now, I like hash; I have long been a poor penny-a-liner, and I know it well and value it. But when it comes to hash twice a day and warmed over for the other meal, even hash palls. As for Allie, though he is by no means an inferior trencherman, I know well that hash once a day was enough for him. And yet that marplot aided and abetted Unk in his hash cult just to spite me, I am convinced. There were a dozen or more cans of baked beans in our provision baskets, and I like beans, being from Boston originally. Besides, beans are heavy, and it was good policy to eat the heavy things first before the long carries came, so as to lighten the load. But what happened? Four times out of five, yea five out of six, I was voted down and forced to eat hash. In vain I drenched my plateful with Chili sauce until that excellent disguiser was exhausted. Allie and Unk sent out to the club house as we passed a day or so later and got a further supply. The result was that hash triumphed and we not only carried those heavy beans all the way to Silver Lake, but more than half of them are cached there to this hour. I am going back there this year, still-hunting, and neither Allie nor Unk will be there. Then—beans!

Another thing irritated me from the start. I didn't seem to be able to get "rises" out of Allie as easily as I expected. The trouble was that his reputation (of course fictitious) for wit was such that those dratted guides needed but to see his lips begin to move in order to break out into uproarious guffaws. No matter how subtle or how barbed my bon mots, the most insufficient answer from Allie was quite enough to put the laugh on me, and they often added insult to injury by exclaiming, "That's a good one on you, doctor!" I began to see that this man Allie was gradually getting the whole camp on his side, and I brooded over it bitterly, harboring my dire revenge in hopes. For a time things seemed to mend, for Hod and I won the first shooting match with our .22s, and I was high

man. Then Lou bet me one dollar that no ducks would be shot that day, and I nearly fell over when that Redskin lifted a dollar bill out of his jeans that night and handed it to me without comment, though sadly. I never suspected what was coming in reprisal, the less so that I had the luck to net the big trout the next day. Never mind what it weighed; it was a whopper as trout go in Bluenoseland, and it fought hard after taking the fly, as trout do near the breeding season in that country. I kept it to bake, for it was a male, and I believe earned a cigar each from Allie and Unk for being high rod.

The first night in camp took the form of a celebration. It was the first meal of hash, which, prepared in Horace's inimitable style, was good; and then there were trout, broiled, fried and roasted on sticks. Then came buckwheats with maple syrup, and stewed apples, with a little rum to give them "kick." After that pipes and blague and fish lies and general content. There were three tents with the cosy camp-fire between. Unk and I occupied one lean-to, Charlie and Hod another, while Allie stuck to the old wall tent of "Tent Dweller" fame. Unk and I had really started on a moose hunt and were only whiling away a few days with Allie until the season opened, and we reviled him as a "mere fisherman" and for using a "house tent" in autumn. Even his guide deserted him and slept with the others in the lean-to.

Conversation finally began to lag and from Charles the Strong came a peculiar sound that sounded suspiciously like an incipient snore. This brought Unk to his feet, for barring working like a horse toting stuff over the carries, he recognized only two duties in camp, both nocturnal in character. One was to fill and light the two little acetylene lamps, a splendid invention by the way, which illuminated the camp as with the sun. This was in his capacity of scientist to the expedition. The other was to brew the good-night potion, for which Unk exhibited uncommon talent, not to say enthusiasm. And Unk's brew was good by all the gods, and we enjoyed it the more because it was, with exceptions, the only one we permitted ourselves each day. Unk knows German, and no doubt is an admirer of Schiller, for his punch is concocted according to the receipt given by that immortal:

"Vier Elemente, innig gesellt,  
Bilden das Leben, bauen die Welt!"

Three of his vier Elemente were the identical ones recommended by the German poet, namely, lemons, sugar and boiling water, but Unk's fourth element was a richer and more fiery ichor than was ever quaffed on the heights of the Weimar Olympus, for it was old forty-overproof rum brought for our especial sakes from a far and fair country of the south. No finer brew "ever drove the skeleton from the feast or painted landscapes in the brain of man." With hearts full of the love of everything on earth and above we quaffed it, while poor Charles and Hod, who never touch strong drink, turned their heads away with a miserable imitation of indifference.

It would seem that the appearance of Allie in the woods was the signal for things to happen, and they started right in the first night. Along toward morning I vaguely felt a weight on my legs, and murmured something about

"getting off my foot." This awakened Unk who sat up and stared, exclaiming: "Well, I'll be darned!" Then I sat up myself and nearly bumped noses with a porcupine that was sitting fairly on my lap. Mutual astonishment—tableau! Porky came to his senses first and waddled off into the darkness before Unk could secure a .22. We regretted his loss, for porcupine's liver is one of our favorite delicacies. Even that chicken-hearted Allie, who objects to the slaughter of anything, has now come to the point of "porky-cide," as he calls it.

We did not tarry long in the vicinity of Fairy Lake, but turned our bows to the south across the lake, through George's Runs, with the beautiful Hemlock Island (Uksoost Manago) and on down the Liverpool for miles and miles to "the big lake," Rossignol, passing Loon Lake Falls, where Allie on a former occasion landed the champion trout of the expedition, dubbing him "King Edward." It was on this run that Unk caught a beauty weighing about two pounds. I had not been fishing much, but had one or two good ones aboard, so that when Lou, after coming alongside and glancing at my catch, bet me a dollar that they would get the biggest trout that day, I took him up. To be sure there were a couple of hours left before making camp, but the wily mimic reflected that, with the low stand of the water, we should be too much occupied in picking out channels to do much fishing. The inevitable result was that Lou triumphantly won the bet with Unk's big trout caught early that morning. Unk indignantly denied all complicity, and growled out something about being easy, and a fool and his cash, etc. That man Allie positively roared with unholy glee.

Meanwhile our three-cornered Pedro tournament proceeded steadily. "Pede" is the ideal game for the woods, with a good deal of head-work, but no continued mental effort. Allie and Charlie got the lead the first night at West River and held it all along to the very day they left us at our hunting camp, when Hod and I succeeded in tying their score; Unk and Lou a very good third.

We camped at the old tree on Wildcat Point, convenient both to the duck coves and the further side of Rossignol, and thence Unk and Lou hunted and hunted, with varied success. But the water was different from the year before, when we had seen hundred of ducks, and their luck soon deserted them; in fact, we began to say sarcastic things about their prowess.

(Conclusion next week.)

## Bird Life in Porto Rico.

BY RALEIGH RAINES.

THE strict prohibition of bird hunting in Porto Rico has already resulted in a notable increase in birds of all kinds seen throughout the island. Reports to the Insular Bureau of the War Department show that more than one hundred distinct species of bird life have been discovered and described. Suitable rules for the protection of bird life on the island have been formulated, and their strict enforcement is reflected by the increase in the number of birds. In the very recent past comparatively few birds were seen in Porto Rico. They were the prey of the mongoose, and in addition to this pest the people greatly sought after the birds and their eggs for food and so-called "sport." In the introduction of beneficial birds and parasites, work thus far has been confined to investigation, and search for such species as can be introduced as destructive enemies of local pests. That involves thorough study of requirements, and then extensive search in other countries for the birds and parasites to meet these requirements. The board of commissioners of agriculture of the island has conducted extensive investigations of bird life both in Porto Rico and elsewhere. The entomologists employed by the board have been engaged in experimental and research work along various lines in the classification of the several Porto Rican plant parasites and their diseases and the search for their enemies with which to exterminate them. In that work they have taken full advantage of the knowledge acquired in similar experiments by the Biological Survey and the Department of Agriculture. A special effort is being made by the board to impress upon Porto Rican school children the economic value of bird life to agriculture.

Unfortunately there is a scarcity of insect-eating birds on the island, and it will be necessary to import some of the varieties which may appear suited to the location and climatic conditions to supply this deficiency. The presence of the mongoose on the island has been most unfortunate for the birds, as the animal which was imported several years ago for the purpose of destroying cane-eating rats has about destroyed most of the ground-building birds native to the island and those that build in low shrubs and hence greatly restricts the list of beneficial birds which otherwise might be introduced. Efforts will probably be made by the island authorities to do away with the destructive mongoose and find other means of exterminating the cane-eating rat.

## Canadian Alpine Camp.

THE Canadian Alpine Club will hold their annual camp this year at Mount Robson Pass, known as the Yellow Head Pass Country. The Alpine Club has a membership of about 1,000, and includes on its list sportsmen from all over the world. There will be several of the principal mountain climbers from England, including Longstaff, the well-known Alpine climber; Dr. Collie and M. Mumm, of France, who are also ardent climbers. Mount Robson is 13,700 feet altitude, and up to the present time has been ascended by only one white man, the Rev. George B. Kinney.

# Hunting in Alaska

By J. C. TOLMAN, Senior Game Warden of Kenai and Alaska Peninsula

ON the Kenai Peninsula the moose are most plentiful of any of the game animals. They cover the entire peninsula and are plentiful on both sides of the Kenai River. Between the river and Kachimak Bay it has been estimated that there are between forty and fifty thousand on the peninsula.

Sportsmen from all over the world have hunted here, and so far as I am aware have all been well pleased. With a proper guide, anyone that can shoot at all will have no trouble in getting the limit (two) in a very reasonable

Kenai during part of the open season, at that time one could go direct.

Bear are also quite plentiful, two species, the brown and black. Parties desiring specimens have had little trouble in getting them. Those intending to come here to hunt need not bring any outfit other than their guns, as everything needed can be had here at a reasonable price.

There are a few caribou on the peninsula also, but they are protected the entire year.

On Kodiak Island there is only one game animal, the bear, the Alaska brown and the Kodiak or grizzly, the latter equaling or surpassing in size the grizzlies of the States.

Guides for Kodiak Island can be secured at Kodiak or Uyak.

### ALASKA PENINSULA.

On the north end of the peninsula we have moose, caribou, black and brown bear, also the Kodiak.

Along the middle and lower end of the peninsula we have caribou and bear, the brown and Kodiak. I consider that part the best section in Alaska to get large specimens of bear, as they are very plentiful and have not been hunted so much as on Kodiak Island.

Caribou are very plentiful there. I spent last winter in that section and estimate that there are between 15,000 and 20,000; have seen droves of over 500. Guides may be secured at Unga and Sand Point. I was born in Oregon and have hunted over California, Oregon and Washington, have spent the last twenty-three years in Alaska, have been all over it from the southeast end to Point Barrow, and I consider these two peninsulas by far the greatest game country I have ever seen.

The game is very easy of access, necessitating no great hardships. Men and women who looked to me to be fit subjects for a hospital, have come here, but they got their limits and returned happy and looking much improved in health.

## Camp Directors' Association.

THE Camp Directors' Association, an organization developed from the Boys' Camp Exhibits in the annual Sportsmen's Shows at Madison Square Garden, will hold its third annual meeting Saturday evening, March 1, at the Victoria Hotel. The association consists of fifty directors of organization and private summer camps for boys and girls, among them Boy Scouts and Young Men's Christian Association camps, and the membership is increasing. At the last meeting, Feb. 8, at the Berkely School, West End avenue and Seventy-second street, the topic for discussion was "Education in Camps," based upon a paper ready by Louis M. Fleisher, of Philadelphia. Those present were: Dr. Elias G. Brown, President; W. W. Thomas, Secretary, of 355 Riverdale avenue, Yonkers; H. C. Beckman, Frank L. Bryant, Louis M. Fleisher, E. M. Healy, Dr. Paul Kyle, Allen S. Williams, Dr. W. A. Keyes, G. W. Little, Harry Rich Mooney, Dr. George L. Meylam, Irving G. McCole, Robert Tindale and Dr. Frederick H. Wilson.

J. C. TOLMAN,

Senior Game Warden, Kenai and Alaska Peninsula, preparing a caribou roast for Thanksgiving dinner.

time. Competent guides can be secured at Seward and at Kenai. Starting from here a party can reach a good moose or sheep country in two days' travel, the first day about twenty-five miles by rail and the next thirty miles by boat. Sheep are also quite plentiful in some localities. A party wishing to hunt both moose and sheep can make one permanent camp and hunt successfully. There are also a few goats, but not plentiful enough to make successful hunting.

A party wishing to hunt from the Kenai or Cook Inlet side must continue by steamer to Seldovia, then transfer to gasolene launches for Kenai. Although the steamer runs through to

THE AUTHOR AND HIS PACK.

The bag is the same as shown in the illustration on page 265. Note the hat worn by the author. It is his pack "converted."

## In Camping-Supplydom

### Some More of the Little-Known Camping Conveniences and Travel-Foods of Other Nations

By L. LODIAN

**Y**OU would think the collapsible metal pocket-cup for tourist convenience a modern contrivance, yet the Japanese have had it centuries, neatly turned from different diameter bamboo wood rings, and sloped or slanted in the lathe to a close-fitting nicety making for impermeability. One, which the writer purchased in Japan years ago, will be illustrated in a later article.

About a dozen years ago a folding pocket lantern was patented here, but pocket lanterns, collapsible, first appeared in Europe about 300 years ago. To anybody interested I can show any time an authentic photogravure of one preserved in a European cathedral. This knock-down pocket-lantern is of the sixteenth century.

Nearly a century ago the pocket-lantern—just as we see it to-day in America—was in common use in France. Only the transparent water-white sheet-horn was used instead of mica or glass sides. They are still obtainable thus.

NON-SLIPPING WOVEN HEMP ROPE SHOE SOLES FOR MOUNTAINEERING (PYRENEES).

In mountain and rock climbing, ordinary leather footwear is too dangerously slippery to trust your limbs to; rubber soles "draw" the feet in warm weather, and after a couple of weeks are liable to emit the disgusting stifling "rubber" odor, due to the vile compounds used to cheapen the rubber by conscientious manufacturers. The light-greenish so-styled "krom-tanned"

leather soles should be rejected instantly, as they are treacherously slippery on wet rock. Untanned raw-hide soles are all right in dry weather, but instantly dangerously slippery when wet; and, further, a few days' wetting and non-drying will soon develop in them the nauseating odor of decomposing hide, which of course means rotting. Outside cork soles one-half to three-quarters of an inch thick have been repeatedly tried, and are non-slipping, but cork is too brittle for foot wear. Densely compressed felt soles are non-slipping, but wear into ugly holes in a few days' rough wear, and are not waterproof. Birch bark and other bark shoes have no life to them. Moccasins—even soled city-wear moccasins—are unsatisfactory. I have had many hundreds of miles' walking in these last, called in the West "shoepacks."

So you see how in the years gone by we tried about every type of footwear known. Have even worn the gaudy yellow heelless turn up-toed footgear of the eunuchs of Turkish harems, and right here in this city, too, on Manhattan's sweatshop avenue (formerly lower Fifth avenue), but I took care that should be at night time.

We are, therefore, in a kind of "vicious circle" in camping-shoedom. Those of my readers who have toured the Swiss Alps will recall the extremely rough-woven hand-made worsted socks sold to climbers for pulling—just like socks—over the outsides of your shoes, to prevent

slipping. They often give trouble trying to work off, are ungainly and unsightly, and soon ruined in hard exertion. Still, they're better than a broken bone.

But one footwear I haven't mentioned, although familiar with it in actual use month after month over a score years ago in old Spain. This is the *alpagata* or hemp-fiber (sisal) shoe of the *montañeros* of the Iberian sierras. (They are procurable in Manhattan and among the Spanish.) The sole is composed exclusively of densely-woven hemp rope, is fairly waterproof, non-slipping, and has the faculty of picking up and retaining in its interstices sandy particles, especially when wet. This gives a gritty foothold which not alone overcomes slipperiness, but adds to the life-wear of the sole, as it is constantly presenting a thin stone-embedded surface to resist abrasion. Contrary to our own experience with leather shoes, the *alpagata* uppers wear out first, and as re-upping would cost about as much as a new pair of shoes, they are discarded for new ones. I never saw a fairly worn-through *alpagata* sole, although have done myself hundreds of miles of walking, in the aggregate, in *alpagatas*, both in Spain and out of it.

#### WATER-BOTTLE CAPS (SPAIN).

These are an old device among Spanish fisherfolk and coastwise peasants. They are just cured bull or ox or mule bladders, and can be used either for holding water or wine or olive oil, or as a warm-water bag, or as an air-pillow; and, half-telescoped, as a wash-bowl or as a storm-proof cap. The Spaniards call it *pellejo*, which is the diminutive for and signifying "little skin" (*pello*, skin). Bladders from the giant mules of Iberia are most prized. Some of those animals are about the proportions of the ponderous Belgian percheron stallions, and their bladders, when inflated, can be used as a makeshift camp or deck stool, if stood on end—so large are they—and, properly cured, will keep an amount of fresh water sweet for days. Inflated and dry, they will easily uphold the weight of a 200-pound man. And when not required for these or a multitude of other usefulnesses, the camp-stool-used bladder can be used as a storm-proof cap, as before mentioned, covering completely the ears and leather coat collar of the Iberian, and will keep his head dry through the wettest of weather.

The Spanish oil-skin coat is not an unsatisfactory, sticky, leaky rosin or varnish-coated cotton fabric as with us, but is the real animal skin which has been split and oil-cured. Hence the name oil-skin; i. e., a skin which has been oiled to render it impermeable.

Any American outdoor-lifer can make these multi-usable or all-purpose bladder-caps for himself. Your butcher will get some bladders for you. They are easily oil-cured with a few days' treatment by any oil (not a mineral oil) both sides; or, if desired tanned, it suffices to save a few handfuls of used tea leaves. Stew them till they yield a dark-brown liquor. This holds the tannin of the tea leaves. Let the extract cool to just warm, and pour into bladder for a couple of days, with occasional shakings. Invert or reverse the bladder for thorough tanning both sides. If drying stiff, dampen and oil to produce suppleness. The oil produces a mixed tannate, giving a dark-brown hue.

The bladder being a frail material compared to the hide substance, care must be taken against the leather getting hard. When tanned leather gets hard or horny, cracking is not far off, and means the ruination of the bladder for air-pillow or water-bottle purposes. No cement has ever been devised for satisfactorily patching a punctured bladder, as no cement will expand with the expanding (under air or water pressure) bladder, and rubber cement is worthless on the oil-tanned membrane. So, the bladder not being fool-proof—often ruined by a pin prick, even—vigilance must be exercised against it dropping, or cratching against nails, or the depredations of grubs in warm weather (most serious course of all, sometimes). Even when the bottom gets punctured, you can firmly tie up the neck end, cut out the bottom, and use the bag for a couple more years as an all-purpose article—storm cap, wash-bowl, funnel (neck untied), poultice protector in illness, soap bag (or any other bag); as a suspended shower bath, money or ore receptacle—and always waterproof. It is, however, no longer practicable as an air-tight vessel.

Unfortunately, few things in this world are fool-proof, to repeat, unless it be a ship's anchor, blacksmith's anvil or iron barrel-hoop. Step forward on the latter for shin-bone proof.

THE MULTI-USABLE NEGLIGE CAP OF THE PYRENEE MOUNTAINEERS.

There is a tiny 1,000-year-old independent Republic in the East Central Pyrenees—on the Iberian versant of the slope—known as Andorra. The scribe visited the statelet in April, 1891, crossing the Pyrenees entirely alone, and without snowshoes, although there was four meters' (about thirteen feet) depth of snow atop the Portus Pass, and about half that on the Alos Pass. For, by the route followed, it was necessary to toil over two sierras, but fortunately the snow was compact enough to prevent sinking beyond the knees. The trans-sierras trip lasted three days, putting up at mountain hamlets at night. The weather almost throughout was fine, and the scenery also fine and impressive, charmed with all the poetry of distant prospects and vast horizons.

The mountaineers wear a species of hand-made tam-o'-shanter, but which is open both ends. It is elastic, and entirely made of the natural undyed black-brown worsted obtained from the black sheep. This nature dye will not crock or fade. Not alone does it serve as a kapo (cap), but can be used as a hand-mit or glove, or as a make-shift valise (holding a surprising lot of articles); or, at a shift, as bathing pants; or the mountaineer will tuck his baby comfortably into one and carry it along contentedly teetering up and down.

With half a dozen of those kapos in one's knapsack, the camper will have one of the most useful articles of campingdom. They could be imported by any camping-supply store, or the reader could make them himself. Ask at any big department store where they sell piece goods (as for ladies' waists) for the hollow-woven or tubular seamless worsted cloth, preferably the undyed material, made from the fleece of black sheep. The imported article would be somewhat heavier and shaggier-looking than the machine-made tricot (as the cloth is technically termed) of the American mills, so the domestic article would be best, as more portable and pocketable. I have worn these knockabout, multi-usable negligee caps in Manhattan and elsewhere for years, and they look just about like any other of the cap tribe so common now on our city streets.

In many a mountain fonda (inn) of the Pyrenees, the peasants will roll up their caps ring-shape, and use them in a game at quoits. Slip-knotted together, a dozen of them will make an extempore scaling-ladder, stretching more than double by the weight of the climber. Such a "rope" easily withstands a heavy man's weight.

(Continued in our next issue.)

"Which form of sport do you prefer, hunting or fishing?" "Fishing," replied Doc Sawyer. "When a man has to have a fish-hook cut out, you know where to look for it, but bird shot scatters terribly"—Philander Johnson, in the New York Globe.

THE TOP RAIL.

WHILE fishing down a sizeable New England trout stream one day, I saw ahead of me a brother of the angle who seemed to be acting queerly. At first I thought him some unmitigated fool who was trying to catch trout with an artificial bass minnow and a fly-rod, for I saw him repeatedly flail the stream with a bait out of all proportion to the rod he was using.

On drawing nearer, I found he was afflicted of a plague of good-sized redfin minnows, which took his flies almost as often as they were presented, and which he jerked high over his head into the back cast so hard that the hook was invariably torn from the minnow's mouth when the line straightened out behind him.

I approached the man (he was a modish dressed fellow of about thirty) and he nodded to me, but continued to jerk out the minnows. It was amazing, the way the little beggars took his flies, and I stood watching, laughing a little inside, perhaps.

At last all three of the angler's flies were either broken or whipped off by his vigorous fishing, and he stopped to bend on a new assortment. I could see he was vexed.

"Looks like you've struck a convention," I remarked, smiling my best.

He finished tying on his flies before he answered, by which time I was moving on.

I did not catch what he said, on account of the noise of the rift, and begged his pardon. He paused, and in a rather shrill voice almost shouted: "I've caught twenty-two standing right in this spot, d—n them. I'm going to fish them all out. There's one got one of my flies now," he continued, raising the tip of his rod. "Watch me hoist him!"

He made a vicious upward jerk with his rod arm, and—smash went his handsome bethabara rod in two places, the tip joint and the middle joint. His line had looped around a boulder while his attention was momentarily diverted by the conversation. He had tried to "hoist" New York State.

I tarried there no longer, and as I fished on, unsuccessfully for the most part, I bethought me of good old Sir Izaak and of some of his quaint observations, and especially those with reference to the virtue of patience.

GRIZZLY KING.

Fast Growing Trees.

HARD, fine-grained, durable wood usually grows slowly, says Popular Mechanics. A most remarkable exception is the eucalyptus, and this it is that gives the tree its great value as a means of reforestation. It is said that the eucalyptus grows five times as rapidly as any other tree.

Seedlings have been observed to make an average growth of six inches in height a day, and one tree in California attained a height of 125 feet and a diameter of thirty-six inches in nine years. The eucalyptus will not thrive where there are frosts.

A Collection of the All-purpose "Kapos" (Caps) of the Pyrenees and Andorra Republic regions in black, white, and undyed brown worsteds. They are "ringed," as shown, for convenience of stowing in travel kit.

The Spanish Alpagata—hemp-fiber-soled non-slipping shoes. In use in Iberia since the Arab conquest (hence their Arabic name). Much used all over the Pyrenees by mountaineers.

# Lion Hunting in Africa

By DR. WILLIAM S. RAINSFORD,

In Charge of the Third African Expedition of the American Museum of Natural History

**P**ERHAPS some notes on lion shooting, and East African lions generally, may be of interest to the readers of *FOREST AND STREAM*. Let me then, by way of making matters clear, try and give some idea of the features of this country, or rather that part of it—Mt. Elgon, B. E. A.—in which I now am, and which supplies the largest and blackest-maned lions in Africa. Lions are, of course, subject to such increasing and universal persecution, that their numbers are being rapidly reduced. Since they are among the most cunning of wild beasts, they are learning to take care of themselves, and bringing them to bay nowadays, at least in a legitimate manner, is not by any means as easy as it was some three or four years ago.

Schillings, of "Flashlight and Rifle" fame, trapped in steel traps, and with little difficulty, a large number, though, by the way, he says nothing of this in the book. At present, though

these sink into and are admirably hidden by the great waving grass harvest that covers all the land. Then it is that a pack of trained dogs can get their deadly work in. Grass is no protection from the dog. Lioness and young lions are then specially easy to bring to bay. The barking pack surround the confused beasts, and if there be a number of dogs, there is little danger to the pack, and scarcely any at all to the hunter, who can ride up at leisure and shoot at his leisure.

Lately lions have been hunted in this way by Paul Rainey. He got as many as seventeen in one day, I am told. But, Mr. Rainey was not the first to adopt the dog pack. Dutchmen have always, when they were able, pursued this method. They have usually a pack of mongrels round their shambus. These admirably serve their masters. Accompanied by them, there is little danger of stumbling on a lion—always

near his farm for his family and native boys. The game disappears, but his bullocks, sheep, pigs, goats, remain and increase. Failing the game, the lion takes to the herds, sometimes to the black boys. That is the situation. Naturally anyone—any method—that can free a neighborhood of lions is approved by the settler. He will poison a carcass, set a trap, or welcome Mr. Rainey and his pack—anything to rid him of the dangerous vermin; and furthermore, a good lion skin will fetch, even in Africa, £10. That is the price of a milch cow.

The sportsman's point of view is equally capable of definition. Men, he says, will come from far and incidentally will spend much money in the country on the chance of securing a lion by sportsmanlike methods. The East African lion is the biggest and darkest lion in the world. Destroy this fine beast, say they, and you cut off an important source of income from a new colony that needs it. You discourage the very class of man you should cater for.

From the sportsman's point of view all this is true. But this beautiful country, this temperate climate (for the tropics), this rich red soil that can in many places be made to yield two crops a year, is no longer chiefly a hunter's paradise. It is fast becoming a successful colony. It can no longer be treated either as a native reserve, or a game preserve. From it therefore the lion must go, as already he has gone completely from the far less favored lands of Cape Colony.

Lions then, hereabouts, are no longer to be found, even occasionally, as I found them five years ago, in bands of from fifteen to five, sauntering homeward at 8 o'clock in the morning sunshine—uttering now and then little low, satisfied family grunts that served admirably to guide one in a stealthy approach. No! they have to be hunted up day after day, evening after evening, or caught very early in the morning taking a last mouthful from the zebra or kongoni kill they happen to have secured in the very late hours of the night. So I got my first two lions this trip; and how I got my third one I shall now tell:

By the middle of December the face of the land in British East Africa has changed—almost all the long grass has vanished. Burned off by native and settler, so that when the rain comes in March or April, the new springing verdure may grow in full strength and provide pasturage for flock and game. The land is brown. Brownness relieved by the vivid green shoots of the stunted mimmosa thorn trees, scattered everywhere, and by patches of uplands that, having caught occasional rains in November, are already a tender green.

In great stretches of this brown burnt land the swampy places still struggle hard to hold their moisture. Here the game herds come for water, and in them and near them lurk the lions to kill. The dampness of the swamp land and of the matted river bottoms have baffled the grass fires that sweep the country, and so in

NATIVES SPEARING A LION.

Photograph by Mr. Cherry Kearton. Published by permission.

many farmers have traps, you seldom hear of a lion being caught in one.

Again, not long ago, where I am now, lions were careless in their hours of return to reed bed or jungle, after the night's hunting. They would often dawdle homeward, lion, lioness and cubs, enjoying themselves by the way, waiting in some sunny spot, or basking on an ant hill, till the morning sun dried off for them the heavy night dew. This was the hunter's opportunity. You caught them napping before they could make the shelter of the papyrus swamp, or the heavy river bottom. They go home much earlier now.

After the rains, say in July, August and September, the grass is so rank in most good game country (and it is in such country that lions are found) that there is not such need for caution on the lion's part. Then it is that usually the lions cub. The yellowing herbage corresponds exactly with their tawny coats. They can see long before they are seen. One glimpse of a yellow back or pointed ear you may catch if you are lucky; but in a moment

an extremely risky thing to do—because the pack give ample warning of his presence. And when, as is usual, one or two of the lot will take and follow a lion spoor, the game is doomed. One Dutch farmer close to Mount Elgon has killed sixty lions with dogs in two years, and no one ever heard of a Dutchman being hurt. This method of lion hunting has lately given rise to much discussion, and the advocates of it and those against have heartily abused each other.

From the sportsman's point of view it is dirty work. The fine beast has no chance. But let it be remembered in all fairness, that the sportsman is not the only one or indeed the chief one to be considered when it is a question of killing lions. The lion is a dangerous and exceedingly destructive kind of vermin. That is the settler's view of his case. He, the settler, is here to make a living, and a hardy earned living at that. He cannot lease his farm and spend his precious time in scouring the country, searching for a beast that is the most elusive of all wild animals. He kills game

these the lion is provided with the day shelter his safety demands. Here they lodge during the long hot day. From there they come forth, usually silently at night, to do their hunting, and to these they return before the first sign of dawn. From such cover, you can fancy, it is no easy matter to drive them forth.

One such swamp we drove the other day, putting our fifty boys in line, and promising half a rupee all round bakshish for every lion killed. The swamp proved too wet. Our men struggled bravely through, but ducks and python were all it held. These last drive terror into all the natives of British East Africa. Any sort of snake seen, and there is a wild skelter—gunbearers ever leading the retreat. I cannot find that python—and there are many hereabouts—ever really hurt anyone. But surely they are fearsome beasts. On another trip I got one twenty-two feet long. Driving this swamp (soon as we knew there were no lions, and had turned our attention to the ducks), I had to stand on a clump of rushes, waist-deep in the water, and close to a deep, dark pool, some twenty yards across.

As I stood there, waiting for the ducks my black men were disturbing elsewhere, I learned a keen sympathy with my naked porters' antipathy for python in a grewsome way. I saw the water of that deep pool move through all its length and breadth in big, slow ripples that broke silently against the tall rushes bordering it; a long, strong, unseen creature could alone make such waves. It gave me an uncanny feeling, and I was glad to get away from my swaying foot rest. Some days later we drove another swamp. We had camped hard by it, and had neither seen nor heard any sign of lions. Our hope therefore of getting anything for our trouble was not very great.

On either side of the swamp (which was about a third of a mile long, and four hundred yards across) lay bare ridges, bare save for the sprinkled thorn trees growing on them. At the end of it all the land had been quite lately burned over; save for the thorn trees, cover there was none.

H., mounted on a pony, lined the beaters up at the further end. Asyce, mounted on another pony, rode along the opposite side. Thus a lion, breaking on either side, stood a good chance of being ridden to bay. I hid myself at the further end of the swamp in a tuft of tall grass, some two hundred yards from the edge of the reed bed, which formed the real cover. Where the reeds ended, low yellow grass stretched for some hundreds of yards before you came to the burnt ground. This grassy swamp meadow had been much grazed by game. Here and there tufts of tall grass stood up in it, but it would seem to afford no cover in which a good sized cat could crawl without being seen from the dominating ridge at either side.

When cover is thick, as it was here, your beaters should make a noise. When light, a silent drive is best down wind. The scent only of approaching men will be sufficient to make lion or leopard leave cover.

The men came through finely, though in the thick stuff, unfortunately, alignment was not well kept. By the time they came to the end of the heavy reed bed, nothing lay before the beaters but the low waving meadow grass for

the space of some two or three hundred yards. Some reed buck had come out, and these, of course, were let go gently; nothing else.

H. had given up all hope, and was leisurely riding through the low grass toward where I was concealed. On the other side of the swamp, the gun posted there had gone after a marabout stork. I rose from my hiding and drew close to the line of moving men, which had swayed to a long crescent, the wings in advance of the center. Suddenly, though they made no sound, I saw the beaters sway and break in every direction. I rushed toward the point of disturbance, fancying that a chetah, or serval cat, had crawled out of the swamp and lay hidden before the line. As I did so, I caught a glimpse of a low yellow back. The lion burst right through the men and made back for the reeds. Men covering him everywhere, it was impossible to shoot for a time, and when he was clear, the grass covered him. H. shot a poor chance and missed. All this took but an instant to happen. As H. shot, out of the corner of my eye I saw another fine lion rise, seemingly out of the very ground, not forty yards further on and bound for the open. I shot twice, quickly as I could, and rolled him over. Another shot from H. finished him. And then there burst from all the scattered black men a wild yell, and the long line of them quickly formed in a savage impromptu dance round the big beast, whose sides still were heaving—a moving scene!

The tuft of grass that covered that lion was not as big as a tent floor. How he got to it unseen is hard to explain. But that is the lion's way, and herein lies much of the charm of lion hunting. No man, not even the most experienced hunter, can tell what he will do.

Later we discovered that three lions had been on foot. One more had come stealthily out of the reeds, turned and slunk back, when there was a gap in the beaters' line.

We consulted together, and determined not to try the swamp again. The danger to the guns outside would have been small; the risk to the porters grave; and the cover was so thick, that had anything happened, we could not quickly have given aid. We were fortunate as it was, for one of the lions, as I said, went clean through the beaters' line, just when the men were closest together, and had touched no one.

Surely there is no sport that can compare with lion hunting. The lioness may charge, and without any warning, or she may do as one I followed hard the other day from early morning to late evening did—make a clean bolt for it, and leave her five little cubs, no bigger than a setter dog, to fend for themselves. That lioness acted as though she had not as much courage as a household cat. You never can tell, and that is the fun of it.

Here is the other side: Only some months ago H. was marching on Safari with Mr. and Mrs. ———, not very far from Nairobi, and on a government road. About 9 o'clock they noticed a quite fresh lion spoor, and by way of precaution H. took his double .450 from his gunbearer. He had scarcely done so before a lion rushed out of some bushes close by, coming for this same gunbearer. The beast charged very rapidly, but before he seized the man, H.

smashed him one full in the shoulder. The heavy soft-nose bullet had no noticeable instantaneous effect, for the lion seized the man by the arm. H. rushed up, and at a few feet distance blew the beast's brains out as it still held the crushed arm in its jaws. That lion's jaws had to be pried open before the arm could be freed.

Many natives in the neighborhood had been killed lately and eaten by lions. Doubtless this lion was a man-eater. It was an old lion with teeth badly worn.

### Goose-fish and Black Woodchuck.

BREWER, Me., Feb. 20.—*Editor Forest and Stream:* The pictures and notes by Horatio Bigelow in the Feb. 8 issue of FOREST AND STREAM in regard to the goose-fish and particularly as to his catching sea fowl, are very interesting and recall and corroborate in every way an account related to me by a friend a few years ago.

This gentleman—who happens, by the way, to be a well-known writer and a man with a most intimate knowledge of the sea and all which pertains to it through having spent much of his life upon the outer coast of Maine—told me once that while at Isle au Haut and busy about something upon the beach, he became aware of some strong disturbance in the shallow water and rock weed close to low water mark. Upon going down there he found a very large goose-fish, or "monk-fish," as they are sometimes known on the coast, thrashing about belly upward, its stomach greatly distended and evidently in keen distress. He pulled the fish out, and being interested in what could cause it to be so bloated, cut it open. From its stomach he said he took—and his word is undoubtable—two full grown and perfectly fresh loons, and after these a number of very large deep-water sculpins. I now forget how many sculpins there were, only remembering that there were several. As for the loons, which were not the small form, but our great northern diver, the largest loon we have, he said that they were perfect in every way and to all appearances just killed.

From such evidence as that by Mr. Bigelow and the above, it would appear that this fish, stupid as he would seem, is a fellow to be reckoned with. I doubt if we begin to appreciate how many waterfowl are lost yearly by this and many another unthought-of source.

In the same issue of the paper I notice the mention of a black woodchuck being taken and am surprised to see it referred to as a rarity. May I say that at this point in Maine, black woodchucks are not only not unusual, but common. While not as plentiful as the reddish form, there are always some of them about, and I have personally killed a number and have seen many more.

It would be interesting if correspondents throughout the range of the Eastern and Central States would report as to the coloration of these animals in their particular localities, the presence of dark ones, if any, etc., and as to their weight. I have been led to infer from information none too well substantiated that woodchucks to the southward are heavier than those here, but to what extent, if any, I cannot say. Notes covering such points as these might be of interest and value.

W. M. HARDY.

# SEA AND RIVER FISHING

## Paddle and Portage in Temagami-land

The Lure of Temagami is its Canoeing and Fishing—Both as Yet Unspoiled in a Thousand Lakes

By S. E. SANGSTER (CANUCK)

THE song of the paddle sounds sweet to many thousands of red-blooded, outdoor enthusiasts of America. Nowhere on the continent to-day are long canoe cruises, combining unspoiled fishing waters, to be fitly compared with those of interior Ontario and Quebec. The silent places are being rapidly shoved off to the northern edge of the map. To-morrow there will be no hinterland left to explore; summer hotels will be the finish of the exploring canoe fisherman.

It is my purpose herein to outline as practically as feasible on paper, in a limited space, a series of real canoe routes from the central point of Temagami Inn, or Bear Island, some of them under twenty-five miles in length, and others taking one further into the paddleways, running up a total stretch of one hundred miles or more.

Temagami is a veritable forest kingdom some fifty by sixty miles, all of which has been

withdrawn by the Ontario Government from settlement and constituted a forest reserve. Into this immense area no lumberman or settler will be allowed to swing his devastating axe; no sawmills pollute the crystal air. All is as nature made it. Dropped into its center lies Lake Temagami, a great octopus, its hundreds of arms and feelers stretching in all directions into this forest land. Get the word Temagami—pronounced "te-mog'-a-me" with a full, open, deep-chested tone. The very sound of this Ojibway Indian for deep waters stirs the red blood in the outdoor enthusiast. The pine, the balsam and tamarack, with their indescribable odors that bring peace to the soul and sweep away the cobwebs of worry from fagged brains, well makes one say with Warman:

"Crystal Temagami, Wasaciagama,  
Swift-running waters and skies that are blue,  
Out on the deep again, rock me to sleep again,  
Rock me to sleep in my little canoe."

THE KIND OF FISH YOU READ ABOUT.  
Caught by the Author.

And 'tis up here, where the summers are short and the twilight long that one puts in his canoe for a vacation that will never be forgotten. Over the G. T. R. from Toronto to North Bay and thence straight north over the T. & N. O. steel some seventy miles or more to Temagami station. Without loss of time a sturdy little steamer runs you down to Temagami Inn and Bear Island. This is the point from whence the canoe routes off the beaten path may best have birth.

Take a map of this northern portion of Ontario and follow the routes hereafter described. Should you care to attempt it, a cruise clear through to Hudson's Bay is feasible. I refer herein, however, to less arduous routes, such as may be accomplished from a week to five weeks' time. First regarding outfitting and guide. You can take up your own canoe, if desired; or you can rent excellent ones at Bear Island from the H. B. Co. Post there, or from the Steamboat and Hotel Company on a basis of around from \$3 to \$3.50 per week. Guides are obtainable, their charges from \$2.50 to \$3 per day, with a reduction for a cruise of, say, four weeks or more, bringing it down in the neighborhood of \$2 to \$2.25 per day. All items of outfit in the shape of tents, blankets, cooking utensils are to be obtained from either the Steamboat Company or the H. B. Co. Post at reasonable prices. We would recommend writing well in advance to Mr. H. Woods, H. B. Co. Factor, Bear Island, Temagami P. O., Ontario, to arrange for whatever may be required along the above items.

It is feasible for a party if its members are really good canoeists and have had experience in the real outdoors, to cruise these paddleways without a guide. However, it is, I think, well worth the additional cost to have a good guide along. He not only puts one into the right spots for the big fish, but also takes off your hands the grubby work in camp. If, say, your party number three men, or two men and one lady (it is thoroughly feasible to take along your wife or sister), then with two canoes you could take one guide, making two persons per canoe.

Starting with shorter trips and then coming to those more arduous, making Bear Island or Temagami Inn the putting-in point.

No. 1. Going due west behind Alexander Island, portaging into Gull Lake, thence by portage to Turtle Lake, thence into Manito-pec-pagee, swinging northward into Emerald Lake and on into Obabika Lake and Obabika Bay; thence either by portage into Devil's Bay or to the northwest arm of Temagami and back to the starting place. Distance, some thirty-five miles. The fishing, trout and small-mouth bass; good.

No. 2. Continuing the above trip from Obabika Lake on northward through Wakimika Lake and Diamond Lake, thence over the Sharp Rock portage out to the Lady Evelyn Hotel. Distance, fifty miles.

No. 3. From Bear Island southward through Cross Bay into Cross Lake, thence turning to

the southeast into McAdam and Lowry lakes through Jumping Caribou and Ingall lakes, turning northwest through Wasacsinagama waters and going west out over the portage to Shining Wood Bay, some three miles below the starting point. Distance, some thirty-three miles. Fishing, bass, lake and speckled trout. Going fairly good; portages open.

No. 4. Same as No. 3 as far as Jumping Caribou Lake. Going from this lake straight west from portage into Kettle Lake, thence east through Miller and Rankin lakes to short portage out to railway at Rabbit Creek Station. Distance, some thirty miles; going good, save last portages, which are fairly long, though open. Fishing, bass and trout; good.

No. 5. A somewhat longer cruise is as No. 3 and 4 to Jumping Caribou Lake, thence into Kettle Lake and southward again through connecting stream into Marian Lake and on through Marten and Shabosaging lakes, east and out to steel at Boyce Station. This is longer than No. 4, being around forty-two miles. Portages well marked; none over three-fourths of a mile. All along this route timber is excellent—spruce, tamarack, pine and poplar. Fishing is speckled and lake trout and bass; good.

#### MY TWO PREFERRED ROUTES.

Nos. 6 and 7 are cruises that, while longer and requiring more time to cover, offer a splendid outing trip, with the best of fishing and camera opportunities on moose and caribou.

No. 6. Take steamer up to Lady Evelyn Lake; put in here and point north through Obisaga Narrows, northeastward beyond Indian House and Obashingwakoka Narrows (really a river) into Matawabika Lake, which, by a long arm, takes one to a fire ranger's house at the junction of the Montreal River. Here you turn down stream, southeast, going to Latchford on the T. & N. O. steel. This route is some forty-eight miles. By going on down into Rib Lake, to the station of that name, it would add another ten or eleven miles. Or from the ranger's house instead of going down to Latchford, swing north and west as far as your time permits. The fishing is essentially speckled and lake trout and bass. The going good and the portages clear. This is an excellent route; some white water.

No. 7. The best long cruise of any, puts in at Bear Island, and crossing Temagami Lake into Cross Bay, follows down through Cross Lake and into the Temagami River, which takes you into the Sturgeon River. This is a grand cruise, all down stream, and with great trout and bass fishing. Some splendid fishing may particularly be had in Island Lake (a widening of Temagami River) and near where the Temagami enters the Sturgeon. Turning down the Sturgeon, a splendid run is offered clear to Sturgeon Falls Station on the C. P. R. Here put your outfit on a train and go east to North Bay; get one of the small steamers to run your party across Nipissing to the entrance to the French River and put in again, going right through to Key's Inlet where the French spills into the Georgian Bay. The distance from Temagami Inn to the Sturgeon River is some thirty-six miles; that part of the Sturgeon from the entrance of Temagami River down to Sturgeon Falls an additional twenty-eight to thirty miles; a total of some sixty-five miles. From

the mouth of the French down to the Georgian Bay is some forty miles, the entire cruise running somewhere above the one hundred mile mark, and every foot of it down stream. The fishing is splendid; that from Temagami down to Sturgeon Falls being essentially trout and bass. The French River is too well known as one of the grandest musky and bass waters to require more than a mention of this. Some of the biggest lunge in America have come from the French waters. This, therefore, gives a greater variety of game fish for the enthusiast than any of the others. Some white water is encountered, notably between the end of Cross Lake and Island Lake. There is also considerable portaging experienced, but the trails are well marked and good going. In short, it is just hard enough to make it worth while. Also an excellent cruise for sighting big game and for scenic conditions. Guides should be used for this cruise, as well as for that down the Montreal River.

## Fishing in California.

BY GOLDEN GATE.

AL. M. CUMMING, one of the leading anglers of San Francisco, spent the early part of February on the Santa Ynez River, near Lompoc, and enjoyed some exceptional sport there, the run of steelhead being at its height during his visit. Most of the fish were taken on spawn, but some were taken on the spoon when the water cleared. At Austin pool, near Duncan's Mills, some large steelhead have been taken, and good sport is being enjoyed all along the Russian River. At Pescadero Lagoon a twelve-pound steelhead was landed recently, and a fourteen-pounder was taken recently on the Napa River, indicating that the run is now on in earnest. The lack of late rains is keeping the water clear, and sport is being enjoyed at a time when it is usually out of the question.

Salmon fishing is not reported as being good, but A. Rahl visited Monterey Bay one day recently and succeeded in landing eleven fish, one of these weighing fourteen pounds. But few salmon have been taken as yet in San Francisco Bay.

Bass fishing has shown a decided improvement during the past two weeks, and many anglers who felt that the season was at end have been lured to the sloughs by the splendid weather now being enjoyed. At San Antonio, George Christensen recently landed seven fine fish in one day, and several fish have been taken at Wingo.

The annual banquet of the San Francisco Striped Bass Club was held in February, about fifty anglers being present. Prizes were awarded for the largest fish taken during the past season, the winners being in the following order: David Wallace, Chas. E. Urfer, James Lynch, Emil Acret, Fred Franzen, Chas. P. Landresse, Harvey Harmon, Frank Mcsager, W. H. Von Dohlen, Adam Hackmeier and Terry Evans.

The eighth annual meeting of the California Anglers' Association was held at the club rooms of the organization, Feb. 11, and officers were elected for the ensuing term as follows: President, George A. Wentworth; First Vice-President, E. L. Bosqui; Second Vice-President, Dr. L. T. Cranz; Secretary, John L. W. Catter-

mole; Treasurer, H. B. Gosliner; Directors, W. R. Chambers, A. J. Baker, A. B. Christensen, J. Springer and E. C. Boucher. The association passed resolutions favoring an act making possible the importation of food fishes into the State during the closed season on local fish; the retention of the present law affecting black and striped bass; the imposing of a \$100 tax on alien market fishermen not capable of becoming citizens; a reorganization of the fish and game commission, and the appointment of a single commissioner at a large salary to devote his entire attention to the affairs of the office, and the retention of the present crab and shrimp laws. About 150 members were present at the meeting.

## The World's Tournament of 1910.

RACINE, Wis., Feb. 15.—*Editor Forest and Stream:* The president of the National Association of Scientific Angling Clubs has called my attention to the fact that there has been some misleading statements printed concerning the World's Tournament of 1910.

To correct this matter and place honors where they rightly belong, I inclose a statement which I will be pleased to have you publish at your earliest convenience.

Trusting that you will publish this, and thanking you in advance, I am,

BENJ. F. FLEGEL.

#### STATEMENT OF BENJ. F. FLEGEL.

"My attention having been called to certain misstatements in the advertising matter of a certain manufacturer of rods and reels, wherein I have been credited with having won both the half-ounce and quarter-ounce accuracy bait events in the international bait- and fly-casting tournament, held in Chicago, in 1910, and desiring to disclaim any such credit or honor, but place the same where it belongs, would make the following statement:

"I did not enter either the half-ounce or quarter-ounce accuracy bait events in the said tournament, and am informed that D. F. Beatty, of the Chicago Fly-Casting Club, won the championship medal in the half-ounce accuracy bait event, and W. H. Ball, of the Illinois Casting Club, won the like honor in the quarter-ounce accuracy bait event.

"I entered only the half-ounce and quarter-ounce distance bait events, and in each I won both the championship medal or trophy for the highest average of five casts and for the longest single cast, aggregating four prizes in the two events."

BENJ. F. FLEGEL.

## San Francisco Fly-Casting Club.

SAN FRANCISCO, Cal., Feb. 11.—*Editor Forest and Stream:* It is proposed by the San Francisco Fly-Casting Club to hold a tournament in this city during the exposition year, 1915, to which fly-casters from all over the world will be invited.

Proper committees have been appointed, and you will be advised of progress and given full information regarding the events from time to time:

PAUL M. NIPPERT, Secretary-Treasurer.

# GAME BAG AND GUN

## History of a Tent.

BY DILLON WALLACE.

ON my second Labrador expedition of 1905-1906, a balloon silk tent was the only shelter our party had. It was 7 x 9 feet in size and originally weighed nine pounds. From June 26, 1905, when our expedition struck inland from Hamilton Inlet, Eastern Labrador, until Sept. 3, when we reached Lake Michikamau on the interior plateau, it housed five, and during the first three weeks of the journey, six men.

From Lake Michikamau all save Clifford H. Easton and myself returned to Hamilton Inlet. Easton and I, with an 18-foot canoe, this tent and a light outfit, proceeded northward over

once beset by heavy snow storms and high winds, and with a 60-foot tide running, progress in our little boat was slow and difficult. At length we were driven to refuge upon a small wind-swept island, where for several days a northeasterly gale held us inactive prisoners.

When the gale finally subsided, the waters were choked with heavy arctic ice, our boat could no longer be of service, and we were forced to abandon it, together with our tent and other outfit, and with light packs upon our backs continue on foot without shelter. After some minor hardships, including a period of five days without food, we at length reached Fort Chimo. Here Easton and I outfitted for the winter and returned to civilization with dogs and snowshoes.

number of hunters in Pennsylvania and Montana. For the past few years I have had occasion to read the papers of the State very carefully, and during the hunting season I have been especially observant in watching for accounts of shooting accidents. As well as I can remember there has been less than a dozen reported in the last three years, one or two from the Libby country, one near Hardy and the others scattered over the western part of the State.

The Hardy accident is well fixed in my mind, for I happened to be on a train passing through that place on the day the accident occurred. It appears that a rancher had killed a deer and was dressing it when another hunter fired from a nearby hillside. Wonderful to relate, the bullet did not strike a vital spot, but merely broke the man's leg, under such circumstances a very lucky ending.

If the cause of so few shooting accidents is as I believe, namely: so few ignorant or tenderfoot sportsmen, that condition was disrupted in the fall of 1912 in the Sun River section of the Rockies. This country has long been known as a sportsman's paradise, although I now deny it that title. My idea of this kind of a paradise does not include a nice graded wagon road, a telephone line and hunters occupying nearly every available camping place.

Last year a road was completed from the North Fork Cañon to the springs. Several dams will be built by the U. S. Reclamation Service for irrigation purposes, and the road was built by the Service so that supplies could be hauled. When it became noised about in the surrounding country that the road had been built at last, every homesteader and dry land farmer within a radius of one hundred miles bought ten or twelve boxes of shells, called the dog, hitched his plow horses to the lumber wagon and started forth as confidently as though he was about to slaughter a steer in the corral.

You who know, think of going into the Rockies with two or three horses and no pack saddles! Well, that is what hundreds of them did. Of course they did not get very far from the road, and very few of them saw any game, but the wonderful part of it is the fact that any of them returned alive and uninjured. Bullets flew in every direction along that road, and we were actually so afraid of being mistaken for game when we came out that one of the party argued that we ought to post guidons at the van and rear of the pack train.

I only heard of one accident, although there were several close calls. Just before we came out, a lad of about fourteen was shot, the bullet passing through the lower part of the abdomen and lodging in front of one of the pelvic bones. The boy's escape was miraculous, for the report sounded very close, and the hunter could not have been more than fifty yards away in the green timber. It was perfectly evident that it was another case of "thought it was a deer," for in spite of the boy's screams the hunter did

A LABRADOR CAMP.

Dillon Wallace and party in camp in Labrador on their history-making trip in 1906.

the northern divide, located the headwaters of George River and continued down the river to Hudson Straits.

On Sept. 26 our canoe, while running a rapid in the George River, collided with a submerged rock. We were overturned and swept over a low fall. Our axes, arms, cooking utensils, practically all of our provisions and other valuable outfit were lost. The tent and canoe, however, together with such portions of the outfit as floated ashore, were recovered. The ground was covered with snow, and the temperature close to zero, but making the best of our misfortune we continued our journey, reaching tidewater on Oct. 16.

Here we engaged the services of three Eskimos with a small open boat, and though the season was far advanced, undertook to reach the Hudson's Bay Company's post, Fort Chimo, 150 miles to the westward.

We were now beyond the tree line and dependent for fire wholly upon stray bits of driftwood picked up along the coast. We were at

The following summer our Eskimos returned to the island, recovered the abandoned boat and tent, and the Factor of the Hudson's Bay Company shipped me the tent on the company's one steamer which annually visits the region. This is the tent shown in the photograph herewith.

## Killing the Man Behind the Gun.

DEER LAKE, MONT., Feb. 13.—*Editor Forest and Stream:* The editorial, "Killing the Man Behind the Gun" in a recent issue makes me curious to know whether any such statistics for Montana have come to the notice of FOREST AND STREAM. Who knows how many hunters have been killed in this State in the past few years? I think the comparison would be very interesting.

Although I do not know and have no means of ascertaining, I am going to venture the assertion that such deaths and injuries have been very few, even when considering the relative

not have enough manhood to appear and render what assistance he could.

An amusing incident also occurred in the same country. A hunter who was wearing a red hat had it shot from his head. Instantly dropping behind a rock, he waited for the man to come up and claim his game. I like to imagine what would have happened if he had done so, but unfortunately the hunter passed on his way with the remark that he had shot at a sheep, but he did not think it worth while to climb up and see.

If the Legislatures of our different States do not make strict laws that would tend to protect hunters against such carelessness, do you not think they ought to give permission to the victims to take a return shot? I firmly believe that any Montana jury would quickly acquit any man charged with such an offense.

WM. ST. JOHN.

### Hunting in California.

BY GOLDEN GATE.

WITH the quail season at an end and but a few days left in which to hunt ducks, the winter shooting season may be regarded as being over. Taking everything into consideration, the season as a whole has been a satisfactory one for sportsmen, as game has been fairly plentiful. The quail season was late in commencing, as the birds hatched late, and in some sections of the State the opening dates were postponed for several weeks. Ducks have been quite plentiful throughout the season and geese have been present in their usual large numbers. Records kept by the California Fish and Game Commission place the number of deer killed at 7,200, but it is likely that the number is nearer 10,000, as the reports from some counties are incomplete.

The valley quail of California is in greater need of immediate protection than any other game bird at the present time, unless it be the wild pigeon. Within the past five years a very marked decrease is to be noted in the number of quail, and this grand game bird is now more sought for than ever. The automobile and the game hog are largely responsible for its disappearance, and there are but few places where it is unmolested. The problem of conserving the valley quail will probably be solved by setting aside game districts in certain sections of the State where hunting will be allowed at no time. Quail are quick to take advantage of protection, as can be seen in Golden Gate Park, where they are to be found by the thousands, and on private farms where hunting is not allowed. The setting aside of a few breeding preserves in favorable locations would solve the quail question for all time. A start along this line has been made, and it is proposed to prohibit hunting on all municipal watersheds.

Duck shooting has been good during the month of February along the bay shores, in the marshes and other sections where water is to be found. In some places, however, the continued dry spell has kept waterfowl away, and sport has been unsatisfactory. Of late, canvasbacks have been plentiful, and most of the bags were of these.

The State Legislature is now taking a thirty days' recess, as provided by law, but will convene again on March 11 and take up its work.

Considerable attention will be devoted to the non-sale of game measure, advocated by California sportsmen through their various organizations, but the hotel men and kindred interests are planning to fight this proposition to a finish. Not only that, but they promise to introduce measures placing quail, doves and deer on the list of game that may be sold. The latter half of the session of the 1913 Legislature promises to be of great interest to those interested in the conservation of wild life.

The Marin county hills, although but a short distance from San Francisco, form the haunts

SNIPE SHOOTING.  
Drawing by Hy. Watson.

of many predatory animals, and those desiring a day's sport behind a pack of dogs can have it without journeying far. A. Topsy, who lives at Tocoloma, recently had an unusually successful day's hunt, bringing home with him three panthers, one wildcat, one 'coon, three foxes and four skunks. Sportsmen of that county advocate a bounty on predatory animals, so plentiful have they become.

### Wolf Caught in Wire Fence.

FORT DODGE, Iowa, Feb. 10.—*Editor Forest and Stream:* The statement that a large timber wolf was found near this place, caught in a wire fence, may seem an odd assertion. However strange it may seem, the statement is true. While this is a prairie country, and all the prairie land under cultivation, there is considerable timber along the Des Moines River. The wolves still remain in the wooded broken coun-

try on the river below here, and about two weeks ago a teacher of a country school in Otho township, driving to her school house, saw a large wolf entangled in a wire fence near the road.

The teacher informed a Mr. Chelleen, who lives near the school house, and the latter found the wolf securely held by a hind leg in the wire fence. Chelleen shot the animal and brought the skin to the county auditor's office to obtain the bounty. The skin was that of a large gray timber wolf. Mr. Chelleen said the wolf was caught by the hind leg which had in some way been caught between the top wire of the woven wire fence, and a strand of barbed wire which was strung along the top of the woven wire. In its struggle to get free, the wolf had broken its leg and the skin of the broken member had been pierced by the barbs on the upper wire. The wolf must have crawled under the upper wire and then gone over the top of it, as the skin of the broken leg was wrapped around this wire and held by the barbs. The ways of civilization are not kind to wild creatures.

C. A. BRYANT.

### Frank Forester.

PIPESTONE, Minn., Feb. 21.—*Editor Forest and Stream:* As a collector of sporting literature, I wish to thank you for the article on Henry Wm. Herbert (Frank Forester) contained in your last number. I have many autograph letters, portraits, etc., of this greatest of American sporting writers, and copies of all his books pertaining to angling and shooting, together with many newspaper and magazine clippings of a biographical nature, and a number of biographies. The Hollyer etching is superior to the one you give from frontispiece to "Field Sports." The Zimmerman photograph, from a painting by Meade, is a very beautiful portrait.

It is true, as Ralph Penbrook says, that Forester's dwelling on the pleasures of the punch bowl was in a measure unwise, but such allusions are only to be found in his stories of a lighter vein, particularly "The Warwick Woodlands" and its sequels "My Shooting Box" and "The Deer Stalkers" (what grand sketches they are!). But such criticism cannot be made on that great American sporting classic, "Frank Forester's Field Sports," on which his reputation chiefly lies.

Let us have more such articles.

ALFRED PETERSON.

### The Latch String.

ITHACA, N. Y., Feb. 6.—*Editor Forest and Stream:* It is not necessary to look over FOREST AND STREAM to see that you have made a change. I have noticed that from time to time. Your circulation man is on his job, and there is no reason why you are not coming to the front, and why you will not arrive, if you have not already arrived. We are anxious to see it succeed. We know that the user of an Ithaca gun will be suited with FOREST AND STREAM if he reads it.

Maybe you would like to follow the hounds. If you would, we have the hounds, and we have the foxes and the latchstring is out. Bring yourself and your appetite and leave everything else at home, as we have it.

L. P. SMITH, Ithaca Gun Co.

Forest and Stream will give a weekly digest of Yachting and Motor Boating from all over the country.

### Duxbury Y. C.

THE Duxbury Y. C. is building a new house to be ready in May. The building will cost \$10,000, raised by subscriptions of the members. It will stand on the shore near the Duxbury wharf on land where formerly a building owned by John Irwin and occupied as a club house by the club stood, and will be 84 feet long and 44 feet wide with a 15-foot piazza with a covered porch on the front. The main hall will be 50 by 32 feet and will have a large stage where entertainments can be given during the year.

Last summer a movement was made to secure another location where the club could have easy access to deep water and this point of land was secured and a building committee composed of Arthur R. Train, of Duxbury, Chairman; George W. Benedict, William L. Benedict, L. B. Goodspeed and Dr. W. H. Potter, of Boston; Alfred E. Green, of Duxbury; J. Henry Hunt, Harvey W. King, Robert C. King, of Boston; F. R. Maxwell, of Brookline; C. E. Rogerson, of Milton; Thomas Weston, Jr., and Winthrop C. Winslow, of Boston, was named. This committee has made rapid progress and foundations are now in and work on construction will begin immediately.

At the annual meeting recently held the following officers were elected: George W. Benedict, Commodore; L. B. Goodspeed, Vice-Commodore; Harvey W. King, Secretary and Treasurer; J. K. Burgess, Measurer; Arthur R. Train, Charles E. Rogerson, Dr. William H. Potter, Directors; Arthur R. Train, Edwin S. Goodspeed, Robert S. Gorham, House Committee; Frank L. Converse, Mrs. Waldo Kennard, Miss Helen King, Entertainment Committee; Charles E. Rogerson, William F. Shedden, Frank B. Converse, Membership Committee; Thomas Weston, Jr., Chairman; Dr. William H. Potter, Harvey W. King, J. Henry Hunt, Francis C. Rogerson, Regatta Committee; George W. Benedict, Frank R. Maxwell, Winthrop C. Winslow, Chas. E. Rogerson, Edwin S. Goodspeed, J. Henry Hunt, Dr. J. B. Brainerd, Judges.

### San Francisco Bay Yachting Notes.

WALTER S. LELAND, a member of the committee appointed some time ago by Thomas L. Miller, president of the syndicate that is to build a 23-meter yacht to race against Sir Thomas Lipton's Shamrock in 1915, has returned from an Eastern trip and rendered an interesting report on the various types of racing yachts there. The committee will hold a meeting shortly to select the general style of the racer that will be built here.

The schooner Edris, which left New York Harbor over a year ago bound for this port, has arrived and is attracting much attention. The trip was made by the way of the Straits of Magellan, and much bad weather was en-

countered. Not a member of the original crew was aboard the boat when she reached her destination. The yacht is the property of Captain John Barneson.

The Oakland Y. C. has been formed at Oakland and headquarters have been established on the estuary at the foot of Twelfth avenue. Officers have been chosen as follows: Commodore, Frank H. Mosher; Vice-Commodore, Eugene Shafter; Secretary, William E. Scully; Treasurer, William E. Judge; Port Captain, Bert Watkinson. John Sherry will be official measurer. The fleet at present consists of seventeen yachts.

### Bayside Y. C. Appointments.

COMMODORE G. WALDO SMITH, of the Bayside Y. C., announces the following appointments for the season: Fleet Captain, C. D. Kells; Fleet Surgeon, Dr. Charles B. Story; Chaplain, Rev. Charles A. Brown; Legal Adviser, James A. Dayton; Chairman of the House Committee, Eaton V. Reed, Chairman of the Regatta Committee, Willard H. MacGregor; Chairman of the Entertainment Committee, John P. Floan; Chairman of Library Committee, Austin Healy.

### Yacht Sales.

A BOSTON agency has sold the 44-foot motor boat Helen, owned by Fred A. Porter, of Bangor, Maine, to Frank A. Schirmer, of Newton, Mass., and the 25-foot waterline sloop yacht Sentana, owned by G. Walter Vialle, of Concord, Mass., to Rufus T. French, of New York.

### Boston Y. C. Power Squadron.

HISTORY is being made by the new power squadron of the Boston Y. C. The organization, which was known as the power boat division last year, is unique—the only one in the world of its kind. At its first annual meeting, held last week at the Rowe's Wharf station of the club, the results of the first year's experience were discussed, carefully thought out rules, based on this experience adopted, and plans for another season made.

The idea of this organization has been taken up by other yachting organizations which have watched the success the Boston Y. C. has had with solving the old problem of what to do with the power boats. Other organizations have been waiting merely to get a set of rules under which the squadron will sail this year to start out for themselves in the formation of like organizations. Among the clubs that were mentioned at the meeting which intend to have power boat divisions were the Edgewood Y. C. of Rhode Island; the Columbian Y. C., of New

York; the Albany Y. C., and the Portland, Me., Y. C.

There has long been need of education among power boat men in the rules of the road and in navigation, as any pilot of any harbor in the country can tell you. To raise the sport of power boating to the level at which no slurs can be put upon it by seamen and other yachtsmen, an important rule was incorporated in the book. There will be a board of instruction, composed of the commander of the Power Squadron and two other members, to instruct and examine the members of the squadron in the rules of the road, ability to operate and navigate power boats and in rules of the United States governing and applying to power boats.

In the matter of flag signals, through which all orders are given from the flag boat, the squadron probably has the most complete list of any yacht club, and every contingency, so far as possible, has been provided for. The old international code has been followed out to some degree in the special code, and there are many additional two-letter signals.

When Commander Upton first put the proposition of a power boat organization with naval discipline and naval tactics up to the club members a year ago, it was mentioned that a naval officer had hinted that such an organization might be of service in time of war and might be given recognition by the Navy. In view of that fact a letter referred to by Mr. Upton at a meeting is not surprising. A Japanese naval officer has written to the commander asking for full particulars of the scheme, as he said that so far as he had been able to learn, a similar scheme might well be encouraged in Japan.

The officers elected at the meeting were: Roger Upton, Commander; C. N. Burnell, Lieutenant-Commander; N. L. Stebbins, Secretary and Treasurer. Commander Upton appointed W. A. Hopkins flag lieutenant and F. P. Huckins, second lieutenant.

### New York Motor Boat Show.

THAT the fascination the public holds for the power boat is increasing at a most remarkable rate was never better exemplified than during the show last week at the Madison Square Garden. The attendance was very large, much larger than at any previous boat show, and the interest shown by all classes of visitors is evidence that the motor boating sport will be more popular than ever this season.

The show is declared by all interested to have been the most interesting ever held by the Manufacturers' Association. The exhibitors are delighted with the successes. Everyone did good business, and in addition to many orders already placed, many tentative orders were received. Motor boating this year promises to be more popular than ever before in its history.

# CANOEING

Forest and Stream is the official organ of the American Canoe Association.

## Canoe Cruise in Canada.

WITH the passing of the forests of the northern tier of States, and the following spoliation of the streams, those enthusiasts who love the song of the paddle and of the reel, who plan to leave behind the dollar-chasing throng for a vacation in the real outdoors, must hike North to the uncombed paddeways of interior Canada. It is, in brief, practically a necessity for such sportsmen of the Central and Eastern States to turn their eyes and thoughts toward the border and say, "Northward, Ho!"

Herein it is the intention to outline one of the grandest canoeing, exploration and fishing jaunts in the real hinterland of the North, a trip for the real outdoor canoeist who wants to enter into communion with nature in her primitive surroundings. This is a trip from Lake St. John, Quebec Province, straight north some 500 miles to salt water at James Bay.

Route.—Travel in is by way of the C. N. R. from Quebec City, north to Roberval, on Lake St. John, which immense inland lake is the headwaters of the mighty Saguenay River.

Outfitting.—At Roberval is a good store wherein one can obtain much in the way of provisions, etc.

Canoes and Guides.—Also at Pointe Bleue, which, by the way, is the Indian village of the Montagnais Indians, one can obtain his Indian guides and cook. Arrangements had best be made well in advance, preferably through the H. B. Co. agent at this point for suitable and efficient men. The best man of all is Joseph Kurtness; other good Indians are Xavier Raphael, Xavier Gill, Pitre Deschene and Sylvestre Etienne. Kurtness is a good cook as well as canoeist. As the route includes some strong "white" water, they will insist on going two to a canoe, stern and bowmen; they ask around \$2 per day and extra for canoes.

Cruising Route.—From Pointe Bleue to Washwanipi there are two routes possible. First, by way of the Ashnapamushuan, Nekupan rivers, Opatukoman and connected lakes and Natowe River; or second, by the Ouiatshuanis, Croché, Frenche and St. Maurice rivers, and thence through a chain of several lakes. I would say the first route is longer, but easier going. Along the Natowe River ducks are plentiful, while moose country shows most signs along the St. Maurice.

Fishing.—The trout fishing (speckled) is excellent along the second route, while pike are found in goodly numbers in the waters covered by the first selection. I would, in fact, incline to recommend the fishing and hunting along the St. Maurice waters.

Passing north from Washwanipi, if desired, the cruise continues some 270 miles further by way of the East Main River to salt water at Ruppert's House with good going all the way.

Time To Go.—Arrangements should be made

to reach Roberval around Aug. 15, in order to leave with the Indians on or around Aug. 18 to 20, when the Montagnais leave their village for the winter's trapping trip clear over into Labrador. The trip would then also eliminate the fly and mosquito problem, these being gone by the 1st of September as a rule. Going in as far as Washwanipi, return could be made around the 25th of September, or going right through by Oct. 20. It is an ideal, unspoiled cruise and permits of bringing out moose, bear and caribou also.

## A. C. A. Membership.

### NEW MEMBERS PROPOSED.

Atlantic Division.—Justus Schlichting, 1031 Washington street, Hoboken, N. J., by Francis C. Buchenberger.

Central Division.—John C. Edwards, P. O. Box 37, Boston, Pa., by Ross L. Leffler.

Western Division.—Ferdinand W. Mengden, 4826 Winthrop avenue, Chicago, Ill., by Robert F. Abercrombie; Venning P. Hollis, 201 East Lake street, Minneapolis, Minn., by F. B. Huntington; A. Boyd Culver, Edwards, Ill., by Hugh P. Miller.

### NEW MEMBERS ELECTED.

Atlantic Division—6601, John B. Clarke, 521 West 175th street, New York city; 6602, William M. Wall, 498 First street, Brooklyn, N. Y.;

6603, Marvin M. Gregory, 205 Jackson street, Trenton, N. J.; 6604, Harry I. Wood, P. O. Box 54, North Tarrytown, N. Y.

Western Division.—6605, David P. Burns, Jr., 828 Fayette street, Peoria, Ill.; 6606, George W. Smith, 404 Home avenue, Oak Park, Ill.; 6607, Thomas F. Joyce, 425 Belmont avenue, Chicago, Ill.; 6608, Dr. Fredrich D. Parker, 516 Jefferson Bldg., Peoria, Ill.

## Ceylon Tea.

TEA plantations in Ceylon have been in existence only thirty years, yet the annual exports of black tea amount to nearly \$20,000,000 in value. Formerly coffee constituted Ceylon's main industry, but after a disease of the plant in 1880 its cultivation was discontinued. Many planters, however, recouped themselves by tea and rubber. Thanks chiefly to the former article, the island's old prosperity revived. Today Ceylon boasts 1,500 plantations.

Plant necessary to tea cultivation is costly but very labor-saving. The work itself is not hard; only the climate makes it irksome. What is wanted mainly of employees is to watch machinery and feed it from the stock of tea leaves awaiting treatment. The workers are not Singhalese, but natives of Southern India. A laborer's wages vary from eight to sixteen cents a day, while a foreman's salary averages \$200 a month.—Harper's Weekly.

A NATURAL HAZARD.

Published Weekly by the

FOREST AND STREAM PUBLISHING COMPANY,  
CHARLES OTIS, President.

W. G. BEECROFT, Secretary. W. J. GALLAGHER, Treasurer.  
127 Franklin Street, New York.

**CORRESPONDENCE**—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

**SUBSCRIPTIONS**: \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

**ADVERTISEMENTS**: Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

Entered as second-class matter at the Post-Office, New York, N. Y.

#### COVER PHOTOGRAPH.

THE unique photograph appearing on the cover of this issue was taken by Mr. Charles A. Hazen, President of the Bras Coupe Fishing Club, which is located about 125 miles north of Ottawa, Canada, in the River Desert region, to the northwest of the Gatineau River, and shows the interior of the club's camp on Round Lake. In front of this cabin, in 1910, one of the members of the club caught a 7½-pound small-mouth black bass.

#### SHALL SPRING SHOOTING BE REVIVED?

THERE are now under consideration in the New York Legislature two bills, apparently designed to again open the season on Long Island for the shooting of ducks during the late winter and early spring. One of these, extending the opening season for about thirty days, or until Feb. 10, has already been favorably reported from the committee, and may, perhaps, be rushed to a vote at any time. The other, a Senate bill, still in the committee, extends the open season for wildfowl on Long Island until March 31.

The questions involved in these bills have been thrashed over before the Legislature of the State of New York time and again, and some years ago that body in its wisdom enacted a bill closing the season for the possession of wildfowl after Jan. 10. This law has received almost universal approval. Even wealthy people, who greatly desire to have wild ducks on their table during the winter—although during the first season they complained greatly of the hardship of being obliged to go without these birds—are now satisfied that the present law is wise, and are willing to abstain from the luxury so long enjoyed, because they believe it is for the public good.

The passage of the present New York law has enormously reduced the consumption—and so the killing—of ducks in their Southern wintering grounds, where it has always been the practice to kill as many as possible from the time when they appear in the fall, until the day of their

departure for the North in the spring. The present New York law has thus an influence far wider than is apparent from the language of the statute, and is a peculiarly useful protective measure for wildfowl.

Persons who consider the sentimental side of the question will be influenced, no doubt, by the fact that certain species of ducks are mated in January and February, and should not be killed during the late winter. If the protection of any migratory game bird is believed in, there is no logic to support the spring shooting of wildfowl. If they can be shot in spring, why not shoot the woodcock, the snipe, or any other migratory bird? Blackducks, woodducks and other species which formerly bred in great numbers in New York State, and which since the passage of the present law have again begun to breed here, are in precisely the same category as the woodcock. We have heard no one advocate the spring shooting of woodcock.

Sportsmen will do well to take all steps possible to see that these bills—whether advocating the renewing of spring shooting, or merely starting an entering wedge which later shall accomplish this end—are voted down by their representatives at Albany.

#### PROTECTING THE FISH.

THREATENED extinction of the great game fishes of the Pacific coast has led the American Game Protective and Propagation Association, of New York, to join with Southern California sportsmen in their efforts to preserve them. Among these fish are the largest specimens of the finny tribe which are taken on hook and line. For game qualities combined with great size, no other fish has equaled the tuna, and there are half a dozen species of even greater weight which have attracted anglers from all over the world to Southern California.

These fish spawn in the kelp beds where they are taken in such numbers by net fishermen that the future of the supply is in serious danger. Charles F. Holder, as chairman of the Los Angeles committee, has recommended to the State Legislature that netting be prohibited within the distance of three miles of the shores of Catalina Island, and it is hoped that a law will be passed this winter which will give the fish this necessary statutory protection.

#### MOVING THE BUFFALO.

THIS is moving time for the buffalo in Nebraska, and a small but quite important mixed herd of bison, elk and deer have been transferred to the care of the Department of Agriculture, and a good sized reservation has been set aside for their care. The herd was the property of J. W. Gilbert, a wealthy ranchman near Valentine, Nebraska, and he has donated the animals to the Government on condition that they remain inside of the State. As the department has a reservation located on the old Fort Niobrara reservation containing 12,000 acres, Dr. Gilbert was informed that his conditions would be gladly met by the Government. This reservation has been a bird refuge for some time, and it was determined to extend its use as a big game reserve also. The citizens of Valentine raised by public subscription a fund sufficient to place a fence around 200 acres of the reserve, an area large enough to care for the

big game until the Government could secure an appropriation to inclose the entire reserve. There are eight bison, fifteen elk and some deer in the herd, so that it is the basis of what will probably be quite a thriving herd in the course of a few years. The Niobrara tract will continue to be used as a bird reservation, and is one of fifty-nine others in various parts of the country under the care of the department. These refuges are not evenly distributed by any means, some States having several and others none. It is hoped by the officials of the department and by bird lovers as well that within a short time each of the States will have at least one bird reservation within its borders, as it is believed that this would do a great deal toward solving the problem of game and bird conservation and preservation throughout the entire country. With such a refuge in each State, laws both State and Federal for the protection of migratory birds would be a matter of a short time.

#### THE PRAIRIE DOG.

It is estimated by the Biological Survey that the prairie dog is the most destructive of our rodents, and that the daily forage consumed by thirty-two adult dogs equals the amount required by a sheep, while approximately 250 prairie dogs eat in a day about the same amount of forage as a cow. As some of these dog towns cover thousands of acres and contain millions of rodents, the extent of damage done annually may easily be imagined. Their destruction has become quite a problem, and the experts of the Biological Survey are engaged in experimenting with the best and most economical method of exterminating these little pests.

#### GENUINE SPORTSMEN.

THE Winona Sportsmen's Club has appointed a delegation to urge the defeat of a bill before the Legislature to permit spring shooting. The proposed law would allow hunters to kill geese and bluebills during the spring flight. The Winona sportsmen very sensibly take the view that no one but an expert could or would distinguish these birds from some others. A law to permit hunting of geese and bluebills in the spring would offer an excuse to be out in the field with a gun and would result in promiscuous shooting of all kinds of game.

It is this sort of sportsmen's club that does honor to its title and whose being means preservation of game.

#### The Farmhouse Hearth.

BY A. L. W.

What though without the aurora's shifting glow  
Dim lights the orchard mantled all in snow,  
The high stars glitter cold, the icy wind  
Assaults each rattling pane and shivering blind—  
Within the hickory logs aroar  
Flash warmth and light athwart the floor.  
Before the andirons apples hiss  
In ecstasy of sputtering bliss.  
The boys are hammering forth the sweets  
Of garnered shellbarks—laughter greets  
Each pounded finger, while at hand  
Full mugs of tangy cider stand.  
Child David, perched on father's knee,  
Hears tales of long ago with glee.  
The girls wind off the scarlet skein,  
While mother's needles click amain.  
The dreaming haoun' dog twitches on his bed  
As phantom rabbits scurry through his head.

# ARCHERY

Forest and Stream is the official organ of the National Archery Association.

## Keep That Left Eye Open.

BY E. J. RENDTORFF.

At a meeting of archers, held in Chicago during the holidays, the statement was made that at the Boston tournament fully half the contestants shot with the left eye closed. As this method is radically wrong, I wish to bring it to the attention of our fraternity, though I must confess that the explanation of the reason is difficult to present. In order to make the matter clear, permit me to quote a little of the physics pertaining to vision.

A single eye sees most distinctly any point situated on its optical axis and less distinctly other points toward which it is not directly looking, but which are still within its circle of vision. It is able to judge the direction of any such point, but unable by itself to determine its distance. From the actual size of the retinal image, determined by sensation, we may infer the angle which the object subtends; i. e., its apparent size. But this angle is a function not only of the real size, but also of the distance. All objects subtend the same angle if the ratio of size to distance is constant. In order to form a judgment of the real size of an object, its distance must be known or assumed. The perception of distance of the single eye is very imperfect, as is seen if we attempt to thread a needle with one eye closed, or try to pass the end of a rod bent at right angles through a ring placed at arm's length. Hence, our judgment being at the mercy of two variables, is frequently unreliable. The moon, for example, appears larger in the horizon than in the zenith, evidently because we assume unconsciously a shorter distance for it in the former case. So, in the opinion of different individuals, the moon varies in size from a dime to an archer's target, according to the ideas previously formed of its distance compared with that at which these objects are generally viewed. A fly moving close to the eye may, through an error of judgment as to distance, be mistaken for an eagle soaring amid the clouds.

The perception of distance is greatly facilitated by the use of both eyes. The means of estimating distance possessed by a single eye is that due to the muscular sense in producing the necessary accommodation, though it may, indeed, learn to judge by such criteria as loss of color, indistinctness of outline, decrease in magnitude, etc., but if the object is near, the single eye is not infallible even with these aids. With two eyes their axes are made to converge upon the object, this convergence being greater as the object is nearer. By this action the images in the two eyes fall on corresponding points of the retina, so that we perceive one and not two images. The muscular effort required to produce the necessary convergence, by the motion of the eyes themselves, is the basis upon which our estimate of distance rests. The

judgment founded on the muscular sense is of course a matter of education. The delicacy of the appreciation of distance appears in our estimation of solidity. When the two eyes are directed upon a single point, we gain the power of judging its distance as compared with that of any other point. This is necessarily unattainable in monocular vision.

If both eyes were equally strong, two projections of the pile of our arrow would be seen on the ground near our point of aim. The right eye is, however, invariably the command-

HOMER W. BISHOP.

ing eye, so that the projection on the right, due to the left eye, is either indistinct or totally missing. With one eye only, we have great difficulty in judging distance, while with both eyes open the binocular vision comes to our aid. It is true that with the right eye only we get a better, more sharply defined projection of the pile on our point of aim, but we cannot in this case judge the proper length of draw of the arrows, or the location of the point of aim, as well as when both eyes are open. At all distances, and especially at the longer ones, the proper uniform length of draw is of prime importance. When the point of aim is not sharp and distinct, as it seldom is, but rather an uncertain area, the judgment of distance is of greater importance than a sharp bead on a point that we arbitrarily assume to be the proper point of aim, but which in reality is only our estimate of the correct spot.

Let us summarize what is gained by each method:

**Left Eye Closed**—A sharper, better defined image of the pile of the arrow and a sharper bead on an assumed point of aim whose real position cannot accurately be estimated without binocular vision.

**Both Eyes Open**—A better judgment of distance, applied as follows: First, a more definite estimate of the actual position of the point of aim, which with a vague indefinite "point" approaching an area, must be determined separately for each single shot; second, a more perfect knowledge of the proper length of draw, without which a sharp bead on a fixed unalterable point of aim is useless.

The only advantage gained by closing the left eye is thus more apparent than real. According to theory an archer shooting with the left eye closed would become progressively poorer as he approached the longer distances. Therefore, keep the left eye open.

## Pittsburgh Archery.

PITTSBURGH, Pa., Feb. 24.—*Editor Forest and Stream:* The afternoon of Feb. 22, although very windy, was so fine that three of the Bon Air archers shot on their range.

Team round, 96 arrows, 60yds.:				
W. J. Holmes	.....	81	327	
Jas. S. Giles	.....	82	334	
O. L. Hertig	.....	92	464	
American round:				
		60yds.	50yds.	40yds.
W. J. Holmes	.....	25	99	29
Jas. S. Giles	.....	26	102	28
O. L. Hertig	.....	30	162	29
		151	30	206
				89
				519

As usual the writer spoiled what would have been a good score by shooting poorly at 50 yards.

The Bon Air-Beechview team, composed of James S. Giles, D. H. Wolf, W. J. Holmes and O. L. Hertig, have arranged for a team match on Decoration Day, shooting against J. C. Patch, L. B. Fleming, G. W. Postgate and W. H. Haines, who constitute the Schenley-Bellefield team. Mr. Giles has made a fine bow of mountain ash backed with second growth hickory, which at the gentle insistence of an overpowering majority he is going to offer as a prize for high score.

O. L. HERTIG.

## Winter Archery in Chicago.

CHICAGO, Ill., Feb. 17.—*Editor Forest and Stream:* Yesterday our weather conditions were: Temperature, 31 degrees; wind, north, fifteen miles an hour; clear sky; ground frozen.

Two archers went to the range, and Mr. Pendry reports the following scores made by Homer W. Bishop.

Team round—				
23	123	23	139	24
24	126	24	134	94
American round—				
28	158	30	196	30
218	88	582		
Forty-eight arrows at 80yds.—				
35	179			

This was a good deal of work for one who has done no shooting for six weeks, and under the conditions the scores are wonderfully fine.

EDWARD B. WESTON.

# TRAP SHOOTING

**Fixtures.**

If you want your shoot to be announced here, send a notice like the following:

**REGISTERED TOURNAMENTS.**

- March 25-26.—Birmingham (Ala.) G. C. O. L. Garl, Sec.
- April 8-10.—San Antonio, Tex.—The Interstate Association's Southwestern Handicap, under auspices of the San Antonio Gun Club; \$1,000 added money. Winner of first place in the Southwestern Handicap guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. E. E. Shaner, Mgr., Pittsburgh, Pa.
- April 9-10.—Lincoln, Neb.—Capitol Beach G. C. T. C. Brownfield, Pres.
- April 10.—Atglen (Pa.) G. C. Lloyd R. Lewis, Mgr.
- April 16.—Mt. Holly (N. J.) G. C. A. J. Dellette, Sec'y.
- April 17.—Syracuse, N. Y.—Messina Springs G. C. W. E. Hookway, Sec'y.
- April 18-19.—Wellington, Mass.—Paleface Shooting Association. Walter F. Clarke, Pres.
- April 19.—Lawrence (Mass.) Fish and Game Protective Association. A. C. Gray, Sec'y.
- April 23.—Grundy Center (Ia.) G. C. Frank W. Callaway, Sec'y.
- April 23-24.—Brantley (Ala.) G. C. A. H. Hill, Pres.
- April 24.—Maysville, Ky.—Mason County G. C. Wm. H. Hall, Mgr.
- April 26.—Pottstown (Pa.) G. C. C. A. Fries, Sec'y.
- April 29.—Guernsey, Ia.—Du Pont G. C. J. W. Dobbins, President.
- April 29-30.—Moberly (Mo.) G. C. J. A. Melton, Sec'y.
- April 29-May 1.—Pond Creek, Okla.—Oklahoma State tournament, under auspices of Pond Creek G. C. Wm. M. Hite, Mgr.

**DRIVERS AND TWISTERS.**

Third annual clay target tournament of the members of the New York Stock Exchange will be shot on March 1 at 2 P. M., at the Westchester Country Club, Westchester, N. Y.

Weekly trapshooting contests will be held every Saturday afternoon during March, at the Port Washington Yacht Club house. Open to all club members and their guests. Special prizes for those who have never shot at clay birds. Guns will be supplied free to all.

An important meeting of the Westy Hogans, to consider plans for the 1913 tournament of the Westy Hogans in Atlantic City in September, will be held at the Prince George Hotel in New York city, at 1 o'clock Sunday afternoon, March 1. All members of the Westy Hogans are urged to attend this meeting.

Teddy Doremus is, as usual, pulling off something new for Du Pont Gun Club. This time two teams will be drawn to shoot for 600—more or less—dinners at Du Pont Hotel. The teams are entitled: "I Should Worry" and the "I Should Worry You." The team that's stuck buys the dinners. Wouldn't you hate to finish with the "I Should Worrys"? On the committee are many prominent from the Hurks and the Doops.

Du Pont Gun Club, of Guernsey, Ia., will give its first annual registered tournament, April 29. The Interstate Association has added \$50, and Guernsey Club adds \$30, and the divisions will be on the four equal division system. A part of the added money will be allotted to the high amateur shooting the highest average on the entire program, and the balance will be divided on each event. The program will give full particulars, and will be ready to mail April 1. Write for particulars to J. W. Dobbins, President.

W. G. BEECROFT.

**Pottstown Gun Club.**

READING, Pa., Feb. 22.—The live-bird shoot on Ringing Hill grounds (a 15-bird race) was a success, although shot in a downpour of rain. Eight contestants entered. Scores: Fred Wertz 13, Emmers 14, Marberger 13, Thos. 12, Wolf 12, Geist 15, White 12, Ziegler 12.

The second race of 10 birds was won by Jones, Fred Wertz and Geist. Other scores were: Hamlin 9, Emmers 9, Marberger 9, Clark 9, Brown 8, Thomas 8, Wolf 8, Mauger 8.

LUDDY.

**Harrisburg Sportsmen's Association.**

HARRISBURG, Pa., Feb. 22.—The live-bird race held on the Paxtonia grounds under the auspices of the Harrisburg Sportsmen's Association was a great success. The competition figured for the State challenge trophy held by George W. Hansell, of Lebanon, Pa. The rain was nearly ankle deep from Paxtonia Inn to the grounds. This served sufficiently to thaw the corns of the shooters who were present without rubbers.

The birds were strong, heavy-feathered barnyard gamesters, which seemed to have seen previous races, according to the many flights, drivers and different somersaults they made. The sleeper shooters were kept at a distance by two State Constabulary officers. This provided safety to the shooters from stray shots, which formerly were quite numerous.

The 20-bird race was started at 11 A.M., with thirty-three entries from all parts of eastern Pennsylvania. The event resulted in three ties on 19—Vernon Williams, of Atglen; George W. Hepler and John G. Martin, both of Harrisburg. In the shoot-off at 10 birds, Williams lost his fifth bird, killing 7 out of 8 shot at. Hepler missed his 9th while Martin killed straight. Thus Martin is entitled to the State challenge trophy, which he holds for one year, provided he defends the same from all challenges. Any shot challenging Martin is to put up \$20 toward the race, Martin to select the grounds and handicap.

Seven shooters tied on 18 kills for second honors—Shearer, of Carlisle; Jebb, of Cochransville; Dinger; Icy, Worden, Peters, and Shaeffer, all of Harrisburg.

The lucky number for third honors to-day proved to be 17 from these hard shooting birds, as thirteen shooters tied on 17, viz.: Oliver, Morgan, Donson, Alan, Reese, Lincoln, Crane, Wilson, Cyrus, Hoffman, Tritt, Schmoeyer and Miller.

Fourth honors fell to Rubendall, Moore, Mattson and Adams with 16 kills.

Dinger had a dark brown hooper for his 19th, which escaped both barrels. It flew close to the boundary, then slowly got out of sight, while Freddy tried to retrieve it. This scored Dinger among the second-honor crowd. Keys had bad luck with 12 kills to his credit—away below his average.

Shearer showed some skill when he reached the 18yd. mark with second honors. Something doing, boys, next year.

Icy the tinker shot 12 birds straight, but dropped the hoodoo, No. 13, and the 16th, landing second honors. Alan, who had no practice for several months, and of the heavy-weight competitors, landed on the 16 bunk.

Lincoln, of Carlisle, also missed his 13th bird, then his 15th, scoring him among the 17 bunch of lucky ones. Malick, of Shamokin, had 11 googoes, which landed him as low gun. A special prize should have been offered for this.

Old man Wilson, of Marysville, who is always gamy, and not afraid to bunk against shots, did exceptionally well to-day with 17 kills, considering his age.

Cyrus, one of Reading's leading shooters, was out of form, missing his third and fourth, then had a run of 10, scoring 17 to his credit.

Walter Lesneski, of Lebanon, one of the foremost wing and target shots, fell some shy to-day in this race. His wife was on the grounds, which may have caused him to become nervous, dropping 5 birds.

Lockwood B. Worden, a member of this association and president of the Pennsylvania State Sportsmen's Association, killed his last 14 birds straight, landing in second honors with 18 kills. As a target shot Worden ranks as one of the foremost in the State, having won one of the cups at Pinehurst, N. C., on Jan. 24, from some of the best target shots in the country. No flies on his gun in this game.

Jebb, of Cochransville, a senior man in the game, shot excellently, considering his age and eyesight. He let the boys sit up and take notice, killing 18 in the 20-bird race, and 5 straight in the miss-and-out.

Ben Hull, one of Lancaster's crack shots, fell below his average to-day. "Some days must be dark and dreary," Ben.

Vernon Williams, of Atglen, one of the high honor men, shot in excellent form to-day, with 19 kills. The writer considers him one of the fastest shots in the State.

Guy G. Miller, of Lebanon, who shot straight at Myerstown on Friday, dropped 3 birds to-day. "Very unlucky, Guy."

Geo. W. Hepler, of Harrisburg, formerly known as the "Lone Star" shooter, tied for first honors, dropped his 18th. George was somehow out of practice. Dinger served as his coach in the shoot-off.

Mrs. Fred. Dinger and daughter were on the grounds and enjoyed the game, the daughter casting cheering remarks to papa.

Ed. H. Adams, one of the Reading stars, was very unfortunate, losing his 9th and 10th. His 17th was one of the old-timers, which rose three feet, then wiggled down within nine feet of the ground, then shot off like lightning, never touched.

Schmoeyer, another Reading hummer, scored 17, not reaching his top notch.

In the second event of 7 birds, with a \$5 entrance, high honors went to Dinger, Williams and Rubendall, each with a straight score. Seven shooters killed 6 for second in this race.

Henry Trivits, of Hyde Park, a leading Reading shot, missed his train and arrived too late to enter the races,

but coached cheering remarks to his Reading chums. Thirteen entries were received in the miss-and-out. Jebb, Oliber and Hepler divided the honors when 5 birds had been shot.

A. K. Ludwig, of Reading, accompanied his chums, rendering assistance on the scores. Haas, of Fleetwood, who was one of the high guns last year, was missed to-day.

Mr. Egolf, secretary of the Association, had his hands full keeping score from two traps.

Much credit is due to Manager Carl Stewart for the success of the shoot, who kept bees humming with his force of assistants. Scores:

No. 1, 20 live birds, \$12 entrance:	
Dinger .....	18
Shaeffer .....	18
Ed Keys .....	12
Oliver .....	17
Morgan .....	17
Icy .....	18
Peters .....	18
Rubendall .....	16
Donson .....	17
Alan .....	17
Reese .....	17
Lincoln .....	17
Crane .....	17
Malick .....	9
Wilson .....	17
Martin .....	19
Drybred .....	10

No. 2, 7 live birds, entrance \$5, 28yds. rise:	
Matlen .....	6
Dinger .....	7
Oliver .....	6
Jebb .....	5
Conner .....	6
Hoffman .....	6
Hepler .....	5
Cramer .....	6
Williams .....	7

Shoot-off for trophy, 10 live birds, 29yds. rise:	
Martin .....	10
Williams .....	7

No. 3, miss-and-out, \$2 entrance, 28yds. rise:	
Jebb .....	5
Williams .....	2
Hoffman .....	3
Dinger .....	2
Oliver .....	5

**Manhasset Bay Y. C.**

PORT WASHINGTON, L. I., Feb. 16.—E. A. Sierck was the little bo-peep here to-day. He won high gun event with 80 out of 100. R. Howland was second with 77; D. E. Smith third with 76. R. Howland copped February cup handicap with 24. The summary:

February cup, 25 targets, handicap:	
R Howland .....	2 24
D E Smith .....	2 22
C M Gould .....	4 22
E A Sierck .....	3 21

J. O. WILSON, Sec'y.

# Where the Grand American Handicap Will Be Shot

History of the N. C. R. Gun Club, Dayton, Ohio

By MACK

H. L. MONBECK, PRESIDENT.

LATE one Saturday afternoon in April, 1909, three tired but happy snipe hunters sat on a log in the Big Beaver Swamp, resting from their tramp through the swamp. They had shot a few of the flavory jacksnipe, but, best of all, they had fully enjoyed the pleasure and companionship of several hours in the glorious outdoors, with the warm sunshine, green grass and wild flowers, the many robins, thrushes and other song birds chirping and flying back and forth, and the fresh, balmy air of spring (nature at her best). How their red blood had tingled whenever a wily jack rose suddenly from some grassy tuft, and with a shrill "skack" darted away like a flash on his zig-zagging course across the swamp. These men Harve L. Monbeck, Fred W. Oswald and W. F. MacCandless—employees of the National Cash Register Co., were regretting the fact that it was the last Saturday afternoon of the open snipe season, and that they could not be together outdoors for any shooting until the next fall. Suddenly the idea occurred of forming a shotgun club to shoot clay birds on Saturday afternoons. Harvey had taken a very active part in trapshooting for over sixteen years. Fred was also a well-known amateur shooter with several years' experience on the firing line. "Mac" had never shot in any blurock shoots, but he recalled how, when a boy of twelve, he had once or twice crouched in a large box and loaded an expert trap while some men "boomed" at the targets with black powder shells. However, for years he read and admired the scores made by "Pop" Heikes and other leading shooters. They talked of plans for a club all the way home, and the next week they began trying to interest the shooters among their fellow workers. On Thursday evening, May 20, Monbeck, Oswald, MacCandless, C. A. Sheets, W. G. Souders, Frank Oswald, J. E. Neff, W. C. Breen, E. Allen, J. L. Shropshire, C. B. Wertz and G. R. Schoenberger met and organized a club; as they were all employees of that company, they named it N. C. R. Gun Club. Each of these twelve men contributed \$1 to the first treasury fund to buy loaded shells and targets. The officers chosen were: President, Wertz; Captain, Monbeck; Secretary, Sheets; Treasurer, Fred Oswald. On the following Saturday afternoon, May 22, the club's first shoot was held, using two expert traps, which Monbeck had owned for several years, our company having readily granted permission to place the traps in their field at a safe distance from the baseball diamond. Then three more members were secured, and each of the fifteen contributed \$1, and a second-hand blackbird trap was bought. From then on the membership fee was made \$2, so that all members would be on the same basis.

W. F. BIPPUS, VICE-PRESIDENT.

W. F. MacCANDLESS, SECRETARY-TREASURER.

S. W. EVERETT, CAPTAIN.

It had been our company's policy for years to assist

NATIONAL CASH REGISTER GUN CLUB, DAYTON, OHIO.

and encourage its employees in clean, manly outdoor sports, and they made several baseball diamond, tennis courts and a cinder track for foot racing, furnished the equipment and kept everything in fine shape for use on Saturday afternoons, holidays and summer evenings. The company did these things because they not only liked to see their people happily enjoying these games, but they also felt sure that such recreation would make them healthier and more efficient workers. So they gladly built a trap house, firing line and small shelter house, with seats around the sides, for the gun club.

The first part of June, Sheets and Oswald resigned their offices of secretary and treasurer. W. F. MacCandless was then elected secretary and treasurer, and has been kept in that office ever since. When he accepted the office he told the members that "it was his hopes and aim to help them build up a gun club that would win the respect and esteem of all followers of trapshooting throughout the United States, become one of the most popular and best-known clubs, make this finest of all manly sports more popular, hold the Ohio State shoot, and finally secure the coveted privilege and honor of holding the greatest of all shooting events, the Grand American Handicap. His ideas were instantly and unanimously approved and the club made this standard their goal. He also received the club's approval of his suggestion to publish only the best scores of any and all shooters taking part in their practice shoots and to omit them entirely if they broke less than four-fifths of their targets. That policy has brought many beginners into the sport, and been deeply appreciated by expert amateurs, when they had a "bad day over the traps."

The club announced that all shooters were invited and welcome to enjoy the sport with them every time they had a shoot. Rolla O. ("Pop") Heikes came out to their second shoot, gave them encouragement and splendid advice. He was made an honorary member, and has been their guiding star ever since.

The first New Year's shoot was held over that one trap on Jan. 1, 1910, and over sixty shooters were present. The latter part of May, 1910, our company granted the club a new location in the southeastern part of N. C. R. Field and started building a roomy, comfortable club house, large concrete trap house, gravel firing line and a suspension foot bridge over the canal. As the club's membership had increased and they were entertaining a large number of shooters every Saturday, the Ohio Electric Railway was induced to make a regular stop (for both city and interurban cars) at the foot bridge, thus bringing shooters within 30yds. of the club house. On July 2, 1910, the opening shoot was held on the new grounds, E. A. Deeds, general manager of the company, firing the first shot by request of the club, and scoring a "dead bird."

The club installed a new western McCrea trap, and many large pleasant shoots were held. Wertz resigned in September, 1910, and H. L. Monbeck was chosen president and still holds that office. Harvey well deserves that honor, as he has been one of Ohio's best-known amateurs for over twenty years and has done a great deal to build up and encourage trapshooting. Sheets, a big, jolly fellow and a crack shot, was made captain.

Sixty-six shooters attended the New Year's shoot, Jan. 2, 1911. The club never tried to make money on its big shoots. It has always been in it for "the pleasure of shooting" and the "good of the sport," and always gave every concession and privilege they possibly could, and figured to make their shoots more attractive and enjoyable and less costly to the shooters. The club's membership now included some of the company's officers and several prominent department managers. Such splendid men as Luther J. Squier, Tom A. Marshall, John R. Taylor, W. R. Chamberlin, Fred Gilbert, Lester German and others were visiting them often, boosting them, and part of the club's hopes were being realized.

On June 8 the president and secretary-treasurer were sent to the Ohio State shoot at Columbus, O., to try and secure that tournament for 1912. They had the good fortune to land it, and the club immediately began working to make the event a record-breaker. About seventy shooters attended the third annual New Year's shoot on Jan. 1, 1912. Sheets had resigned as captain the latter part of December, 1911, because of his taking a Saturday course in higher mechanics. S. W. Everett, a prominent amateur, splendid shot, and formerly manager of the Harshman Gun Club, was chosen captain and still holds that office.

On March 1, 1912, the office of vice-president was created, and W. F. Bippus, treasurer of the company, was elected to that office. He is still vice-president, and although he never shot a clay bird until July, 1909, he

has become one of the club's best shots, is always among the leaders at big shoots, and is a popular favorite with all. As only employees of the company were eligible to join, the club made fifteen of Dayton's leading prominent business men (who had been regular visitors and boosters) honorary members. In March, 1912. Such sterling men as F. H. Rike, I. G. Kumlter, J. M. Markham, R. R. Dickey, C. E. Mcad and others were included. The company built two more trap houses and firing lines, enlarged the club house and made other improvements to enable the club to properly handle the Ohio State shoot; they also printed the programs, etc.

The club leased an Ideal-Leggett trap, thus making two traps for practice..

One hundred shooters was their mark for the State shoot, but they did better, having 104, 107 and 110 shooting in the Ohio State shoot, June 5, 6 and 7 respectively. That was the largest and best State tournament held in the United States during that year, and was only beaten by the one at Cincinnati many years ago. The club gave \$350 (all the money they had received for advertising and part of their profits on the shoot) to the prize moneys in addition to the \$300 given by the Interstate Association. All the visiting shooters said it was one of the best conducted and most enjoyable tournaments they ever attended, and they drew up resolutions asking the Interstate Association to send the Grand American Handicap to Dayton, O., in 1913.

On June 18, 1912, the club sent Monbeck, Bippus, Everett, Sheets and MacCandless to the thirteenth Grand American Handicap at Springfield, Ill., to boost Dayton and the club for the fourteenth Grand American Handicap. On Dec. 3, the club sent their secretary-treasurer to New York city to attend the Interstate Association convention and to remind them that they were still fighting for the premier event of the sport. On Dec. 6 he wired his brother officers that the Association had awarded the fourteenth Grand American Handicap in 1913 to the N. C. R. Gun Club. This gun club, only three and a half years old, had reached their great goal. Immediately after the secretary returned, the club began to arrange plans for making the coming G. A. H. the largest and most enjoyable tournament ever held. With the advice and assistance of Elmer E. Shaner, treasurer, and all officers and members of the Interstate Association, which the club will receive, they feel sure that their hopes will be realized. Besides Dayton's business men and citizens are going to co-operate also. Thanks to the generosity of our company, we have one of the best located, most convenient and best equipped shooting grounds—a level range, no hills or woods to spoil the sky-line, shoot almost due north, right on city car line, city cars every seven minutes, interurban cars ever half hour, and only seven minutes' ride from center of city, hotels and depot. Five hundred roomy metal lockers will be furnished free of charge, large rest tent, with comfortable summer cots and chairs for the shooters. Finely cooked, tastily served course dinners will be given in a large, cool dining tent for 50 cents each. Splendid lunch counter service also. Everything possible will be provided for the comfort and pleasure of the shooters. Dayton has splendid railway facilities (six steam railway lines and seven electric lines), fine hotel accommodations (four modern, large hotels and many up-to-date smaller ones), and over 100,000 generous, hospitable citizens to welcome you.

You and your friends are cordially invited to "come to Dayton," June 16 to 20 inclusive, and help us make good our slogan: "Five hundred shooters and the best G. A. H. ever held," at Dayton, O., 1913. "We will expect you."

**Myerstown Gun Club.**

MYERSTOWN, Pa., Feb. 21.—The live-bird shoot held under the auspices of the Myerstown Gun Club was a success. High honors went to Walter Lesneski and Guy G. Miller, who killed straight. Miller also killed straight in the 5-bird race. Second honors were won by B. Tyson, of Lebanon with 9 kills. George M. Hansell was out of form; he was considered one of the best marksmen in the State. Hoffa showed some pace when he shot straight in the second event. Some of the boys expect to go to Temple, Pa., to attend the target shoot on March 8. Program calls for one event of 10 and six of 15 targets each, with an additional one of 5 pairs of doubles. The scores:

No. 1, 10 live birds, \$6 entrance, 30yds. rise: W. Lesneski 10, B. Tyson 9, G. Zellers 7, Hoffa 7, S. Rabold 4, W. Sheppler 7, G. Miller 10, G. W. Hansell 7.  
No. 2, 5 birds, 6 entrance, 30yds. rise: W. Lesneski 3, G. W. Hansell 4, B. Tyson 4, G. Zellers 3, Hoffa 5, S. Rabold 3, G. G. Miller 5.

When you think of an outdoor publication, there stands FOREST AND STREAM.

**Larchmont Y. C.**

LARCHMONT, N. Y., Feb. 22.—The day's rest handed out in honor of George Washington was utilized by Larchmont Y. C. in an all-day's serenade to the late President. New York A. C. and Crescent A. C. took the opportunity to shoot also for their regular weekly trophies during the fusilade. The big joy for the day went to Charley Newcomb, from the Quaker City. He cribbed both the handicap and scratch events. The former drew 181 out of 200 from a free start of 14, the latter requiring 167 to win. The three-cornered team shoot was won handily by Crescent A. C., with 832 out of 1,000, three higher than Larchmont. Ralph Spotts and Dan McMahon tied for high gun, the former getting 90 out of his first 100 against McMahon's 93, while Spotts spoiled 86 in his second 100, against Dan's 83. The summaries:

 Shoot-off won by G. Lembeck.

Feb. 23.—Full scores were returned in all but two of the eight matches decided, and several shoot-offs were necessary to determine the winners.

Seventeen men faced the traps to-day. W. E. Ferguson, from a handicap of 97, captured a handicap 100-target match. He also won the special trophy at 25 targets, and the take-home trophy with a full score of 25, and tied W. J. Elias for accumulation cup with a full score of 25.

Both the monthly cup and the visitors' trophy were won by R. Jones. The second take-home trophy at 25 targets, went to A. L. Arthur with a score of 25, and scratch event fell to R. L. Spotts with 128. A. Brown (a visitor) broke 132.

The undecided matches of Saturday resulted in A. L. Arthur winning the accumulation cup after a shoot-off, and Hinds winning the 100-target handicap match for a special cup.

**Brewster Gun Club.**

BREWSTER, O., Feb. 15.—For the purpose of trying its new trap and inspecting the grounds and getting everything in readiness for its initiation shoot, the members of the Brewster Gun Club met this afternoon. All members present were well pleased with the new lay-out. The scores made this afternoon follow:

Shot at, Broke		Shot at, Broke	
Burns .....	85 53	Lightell .....	72 17
W Glick .....	75 56	Engleman .....	55 35
Wilson .....	75 53	A Glick .....	45 27
Christman .....	75 42	A Arnold .....	25 19
Gage .....	75 33	B Arnold .....	25 1

Feb. 22.—Despite inclement weather, a strong wind and many intermissions on account of rain, fifty-four amateur and three professional shooters faced the traps of the Brewster Gun Club on Washington's Birthday. Some of the merchandise prizes contested for were a Winchester repeating rifle, a leather gun case, a target pistol, two knives, two boxes Elverso cigars, a safety razor, a stein, two meerschaum pipes. There were also money awards amounting to \$45. The scores follow:

Shot at, Brk.		Shot at, Brk.

\*Professionals shot for targets only.

The winners of prizes were: Metzgar, Hines, Essig, J. Walters, J. Christman, D. Miller, W. Glick, Merrill, K. Miller, Evans, Deal, Pashel, Rex, Stewart, A. Glick, Crawford, Witters, Sherman and Mossip.

A. J. BURNS, Sec'y.

**Indianapolis Gun Club.**

INDIANAPOLIS, Ind., Feb. 22.—A temperature of 30 degrees and a 45-mile wind was the weather contribution to the tournament of the Indianapolis Gun Club to-day. But the twenty-two shooters did the best they could and were cheerful. There was no great attraction in the way of possible winnings—just a little jack rabbit program of 100 targets, entrance \$5 and a dollar for targets which was preceded by a little practice while the folks gathered, and followed by an extra fifty under about the same conditions. Edmonson led the amateurs with 82½ per cent. Jewett was close up with 80. The club will throw a tournament each month during the season of 1913, and perhaps solve the question of "too many tournaments." The scores follow:

Shot at, Brk.		Shot at, Brk.	
*Barr .....	200 170	Moller .....	150 113
Edmonson .....	200 165	Dixon .....	150 107

**Du Pont Gun Club.**

WILMINGTON, Del., Feb. 22.—Fifty shooters took part in the several events to-day. The big noise was the second leg on the F. L. Connable silver trophy contest. W. M. Foord was high with 43 out of 50 from the 22yd. mark. He stands a good chance of coming out ahead after the final leg will have been decided.

The final shoot-off of the Class A cup, donated by Eugene du Pont was also decided, all the contestants standing at 22yds. H. P. Carlon, by virtue of a 21 and a 20, was high, Minnick breaking 40, and W. S. Colfax 39.

The regular shoot for the Coleman du Pont silver spoons resulted as follows: Class A spoon, H. P. Carlon with 23; Class B was tied by C. T. Martin and T. W. Mathewson with 23. S. J. Newman won the Class C spoon on 22, and W. A. Casey the Class D with 20. J. R. Bailey and E. R. Jenks tied for the Class E spoon on 13. Ties will be shot March 8, as next Saturday the Lansdale, Pa., Gun Club will visit the local club for the regularly scheduled Philadelphia Trapshooters' League contest.

Scores in the F. L. Connable cup race were as follows: W. M. Foord 43, A. B. Richardson 38, J. T. Robertson 38, J. B. McHugh 38, H. P. Carlon 37, J. H. Min-

nick 33, W. Edmonson 33, Dr. S. Steele 32, H. W. Bush 31.

The scores made in the final shoot for the Class A cup were as below, all shooting from 22yds.: H. P. Carlon 41, J. H. Minnick 40, W. S. Colfax, Jr., 39, Edward Banks 37, W. M. Foord 37, E. A. W. Everitt 33, J. B. McHugh 33.

In the Coleman du Pont spoon contest the scores made were as follows, all shooting at 25 targets from the 16yd. mark: A. B. Richardson 22, E. M. Ross 17, W. Edmonson 20, H. W. Bush 17, J. R. Bailey 13, W. J. Highfield 17, W. A. Casey 20, T. W. Mathewson 23, W. G. Robelen 11, Clyde Leedom 17, J. H. Minnick 22, Herbert D. Betts 4, G. M. McCouch 6, S. J. Newman 22, W. M. Foord 21, W. S. Colfax, Jr., 23, H. T. Reed 19, F. Turner 15, C. T. Martin 23, H. P. Carlon 23, S. G. David 15, J. W. Anderson, Jr., 20, C. H. Simon 20, A. J. Curler 11, D. S. Wood 15, W. G. Wood 13, J. E. # They Picked "The Perfect Shooting Combination"

Over 5,000 more trapshooters used *Remington-UMC* Speed Shells in 1912 than used any other one make.

Over 1,900 more trapshooters used *Remington-UMC* Guns in 1912 than used any other one make.

## And They Made 1912's Big Trap Winnings

Here is a partial List of Amateur Successes achieved Last Year with *Remington-UMC* Guns or Shells or both.

- R. H. Bruns, Indiana State Tournament and tied for Second Highest 1912 Amateur Record.
- Vassar Cate, Southern Handicap.
- Frank Campbell, Western Handicap.
- H. P. de Mund, Arizona State Tournament.
- F. G. Fuller, Wisconsin State Tournament.
- J. R. Graham, Illinois State Tournament and Individual Clay Bird Championship of World at Olympic Games
- Jack Jewett, Minnesota State Tournament.
- V. W. Johnson, Mississippi State Tournament.
- W. T. Laslie, Alabama State Tournament.
- A. M. Messner, Michigan State Tournament.
- C. H. Newcomb, Westy Hogan's Tournament.
- C. F. Nelson, Handicap Championship of Colorado, Wyoming and New Mexico.

- W. E. Phillips, Grand American Handicap.
- C. H. Parker, North Dakota State Tournament.
- Dr. L. G. Richards, Virginia State Tournament.
- Wm. Ridley, First Highest 1912 Amateur Record.
- George J. Roll, Tied for Second Highest 1912 Amateur Record.
- R. L. Spotts, Maine State Tournament.
- Moroni Skeen, Utah State Tournament.
- J. E. Taylor, North Carolina State Tournament.
- Ed. Varner, Nebraska State Tournament.
- Wm. H. Varien, California-Nevada Tournament.
- S. G. Vance, Amateur Championship of Canada.
- J. P. Wright, Arkansas State Tournament.
- Harry Whitney, Kansas State Tournament.
- J. P. White, South Dakota State Tournament.

Siwanoy Country Club.

Mr. VERNON, N. Y., Feb. 22.—Unusual interest was displayed by a score of members of the gun section of the Siwanoy Country Club and several invited guests on Washington's Birthday, on account of it being the wind-up shoot for the president's trophy, which has been in competition since Columbus Day, and for the Du Pont trophy, which has been in competition since Christmas Day.

The president's trophy, which is handicapped on the Du Pont system, with the distribution of points to the ten high guns, was won by Dr. R. Johnson Held with a total of 31.5. The Du Pont trophy was won by Mr. H. J. Smith.

The high point winners for the season in the president's trophy were: Dr. Held, 31.5; G. A. Wylie, 27.5; Prof. Hill, 26.5; W. Thorpe, 26.3; L. G. Bond, 26; Z. C. Offutt, 24; D. Barnard, 23.5; M. R. Guggenheim, 22.5; G. L. Yates, 22.

The high points for the season in the Du Pont trophy were: H. J. Smith, 90; Dr. Currie, 89; G. A. Wylie, 88; G. L. Yates, 87; Dr. Barnard, 84; M. R. Guggenheim, 84; W. Thorpe, 83; W. M. Wylie, 82.

No one qualified for a leg on the captain's trophy, which requires ten straight targets on the miss and out plan, although W. Thorpe broke 7 on his trial.

First take-home trophy was won by L. G. Bond, who made a full score with his handicap of 5, and the second take-home was won by Miss Jessie Thorpe, the 15-year-old member and the daughter of Walter Thorpe, who was very proud of the results of his training. Miss Thorpe has been shooting less than one year, and is exceedingly popular in the club on account of her aptitude with the gun and her charming personality.

President's trophy, 25 targets, handicap:

Table with columns: Name, Handicap, Total, Points. Lists names like G. A. Wylie, W. Thorpe, L. D. Bond, etc.

Du Pont trophy, 25 targets, handicap:

Table with columns: Name, H., T., Name, H., T. Lists names like H. J. Smith, Z. C. Offutt, G. A. Wylie, etc.

First take-home trophy, 25 targets, handicap:

Table with columns: Name, H., T., Name, H., T. Lists names like L. G. Bond, H. J. Smith, Z. C. Offutt, etc.

Second take-home trophy, 25 targets, handicap:

Jack rabbit, 25 targets, handicap:

Table with columns: Name, H., T., Name, H., T. Lists names like H. J. Smith, G. L. Yates, E. L. Haas, etc.

Cleveland Gun Club.

CLEVELAND, O., Feb. 22.—The regular weekly club shoot of the Cleveland Gun Club held to-day was something of a drawing card, as a number of new faces showed for the first time in many moons. The weather conditions were very bad, with a wind that kept the scores below par. Targets were shot twenty a minute for three hours, which is a record-breaker for the Cleveland Gun Club's grounds.

Stapp and Doolittle were high guns for the day, breaking 134 out of 150 in all events. Blakeslee tapped them hard and came in under the wire with 133. Weeden was a god third with 132. The special prize winners under the Lewis system were as follows: Class A (two prizes)—Doolittle and Stepp. Class B—Jones, first; Brockway and Scott tied for second, to be shot off. Class C—Roberts and Freeman. The scores:

Event No. 1, semi-annual trophy, 50 targets, handicap 16yds.: Stepp 49, Doolittle 45, Weeden 44, Blakeslee 44, Brown 43, Burns 40, Freeman 40, Hogen 39, Jones 39, Scott 38, Brockway 38, Murray 34, Stewart 34, Roberts

33, Franks 33, Harris 32, Stone 31, Noble 31, Sullivan 31, Randerson 30, Rockwell 30, Hartman 30, Burton 27, Eaton 25.

Event No. 2, annual trophy, 50 targets, handicap 16yds.: Blakeslee 45, Burns 45, Doolittle 45, Brown 44, Scott 43, Weeden 43, Jones 41, Hogen 41, Roberts 40, Freeman 40, Steep 39, Harris 39, Tobey 38, Brockway 37, Murray 36, Stone 34, Noble 33, Franks 33, Sullivan 32, Randerson 31, Eaton 30, Hartman 30, Stewart 30, Rock 29, Burton 23.

Event No. 3, quarterly trophy contest, 50 targets: Telling 45, Stepp 46, Weeden 45, Blakeslee 44, Brown 44, Doolittle 44, Jones 42, Burns 41, Hogen 40, Freeman 40, Murray 39, Brockway 39, Harris 35, Rockwell 34, Scott 32, Roberts 33, Noble 32, Stone 30, Hartman 29, Eaton 25.

F. H. WALLACE, Mgr.

Hudson Gun Club.

JERSEY CITY, N. J., Feb. 23.—With the wind blowing across the traps at the rate of ninety miles an hour, the fourth contest for the Schortemeier trophy was shot off, and the man that could average 65 per cent, was doing some good work. The best performer was Billy O'Brien, who scratched out 74 per cent., with Dave Engle one point behind with 73 per cent. Tom Kelley was third with 68 per cent.

We are going to give the game another trial on March 9, our next shooting date, and we would be pleased to have any of the out-of-town target busters that will be on for the garden tournament come over and show us how to make high scores at the Hudson Gun Club grounds. Everybody is welcome, so take the Turnpike car to the Hackensack River bridge, get off on the west side and walk north along the river bank to the club house. The scores:

Table with columns: Name, 1, 2, 3, 4, 5. Lists names like D. D. Engle, Dr. Moeller, H. J. Burlington, etc.

T. H. K., Sec'y.

Westwood (Ohio) Gun Club.

THERE was a large attendance at the shoot on Feb. 16, twenty-six members taking part in the various events. The best work of the meet was done by E. Bauer, who broke 44 out of his last 50, and finished his 100 with 81. G. Oskamp and J. Schneider each shot at an extra 25, the former leading at the finish by 4 targets with 85 to 81. O. Kling shot an 82 per cent. clip in his last 50 targets. Ed. Frohlinger was a visitor, but could not overcome the handicap of strange grounds, and did not put up his usual score.

Table with columns: Name, 25, 25, 25, 25, 25, 25, Total. Lists names like E. Bauer, Frohlinger, H. Carson, etc.

Knollwood Country Club.

WHITE PLAINS, N. Y., Feb. 22.—H. H. Shannon was high gun at the weekly shoot of Knollwood Country Club here to-day; he broke 83 out of 100. The scores:

Table with columns: Name, Score. Lists names like H. H. Shannon, F. Frampton, M. McVoy, etc.

Tri-City Team Shoot.

THE first of the series of team matches between Cincinnati, Dayton and Springfield was held on the former's grounds at Rosedale, Ky., Feb. 22, and proved to be the most successful shoot that has been pulled off in this locality for many months. The weather conditions were extremely hard, a strong wind blowing quartering across the traps, made it impossible to judge the flight of the targets with any certainty, and caused many of the scores to fall far below the average. By the conditions of the match each city could enter fifteen men, the ten high scores counting for the team. Springfield and Dayton each brought their full quota, lacking one in the former team, and in addition to the fifteen men entered by Cincinnati, there were enough others entered in the events to bring the number well over sixty. The race was a hot one from start to finish, the result being a victory for Cincinnati by 17 targets over Springfield, and 18 targets over Dayton. At the close of the first round, Springfield had the best of it by one target over Cincinnati, and 6 targets over Dayton. In the second round, the Queen City went to the front, finishing with 12 targets ahead of Springfield, and 23 ahead of the Gem City boys. The close of the third round put them still further in the lead, 21 ahead of Springfield, and 23 ahead of Dayton. In this round the latter team closed up the gap between them and Springfield, cutting the latter's lead to 2 targets. In the fourth round Springfield had the best of it and succeeded in getting within 12 targets of Cincinnati, and 8 targets ahead of Dayton. The last round was Dayton's, and the team finished one target behind Springfield, in third place. The high team score in any event was made by Cincinnati in the second round, when the team scored 183 out of 200; Springfield came the nearest to this score in the fourth event, with 177. High individual score for the match was a tie between F. W. Roberts, of Cincinnati, and J. M. Markham, of Dayton, each breaking 92, a very remarkable showing under the conditions. Horace W. Heikes, of the Dayton team, was second high with the fine score of 90, tying with C. A. Winkler, of Springfield. The fifteen Cincinnati men broke 1223 out of 1500 targets; Dayton, 1184, and Springfield (fourteen men), 1124 out of 1400.

Sam Leever, the "ex-Pirate," brought down five Goshenites, and shot a match with six of the Cincinnati Gun Club, finishing in the lead with 456 to 451. Leever was high man, tying with Roberts and Markham on 92. The Cincinnati had the best of the first and last rounds, but the Goshen boys proved too much for them in the other three.

The office was in charge of Luther J. Squier, of Pittsburgh, Pa. The referees and scorers were J. Braunage and Len Shepard. L. Gambell kept the squads moving, and there were no delays from the start at 12:45 to the finish at 3:45. The scores:

Table with columns: Team match, 100 targets per man; Cincinnati, Dayton, Springfield, Goshen. Lists names like H. R. Irwin, O. J. Holaday, G. W. Dameron, etc.

Table with columns: Team match, 100 targets per man; Cincinnati, Goshen. Lists names like A. Gambell, E. Frohlinger, E. Hammerschmidt, etc.

Table with columns: Team match, 100 targets per man; Cincinnati, Goshen. Lists names like A. Gambell, E. Frohlinger, E. Hammerschmidt, etc.

Table with columns: Practice events; Shot at, Broke, Shot at, Broke. Lists names like Irwin, Monbeck, Markham, etc.

Stamford Rod and Gun Club.

STAMFORD, Conn., Feb. 22.—A 100-bird handicap was shot here to-day and won by Victor S. Alien. The scores: Victor S. Alien (16) 86, A. L. Ferguson (13) 85, E. L. Hatch (0) 81, B. B. Brown, Jr., (4) 80, Nathan Webb (0) 78, N. B. Foster (0) 76, A. S. Pitt (8) 73.

# Oh! Mr. Trapshooter!

*Do read "The Figures" of the other fellow and enjoy with us the satisfying sensation of having a competitor prove the superiority of*

# WINCHESTER

## Shotguns and Loaded Shells

W. R. CROSBY.

Using Winchester Loaded Shells, he outshot all other trapshooters for the season of 1912.

The record and statistical department of a certain gun and ammunition company has been working overtime lately. Its resultant achievements suggest and compare favorably with the stories of Aladdin's Lamp, and the Wonderful Bag in "The Swiss Family Robinson." The former simply had to be rubbed and the latter only dug into in order to produce anything, no matter how weird or impossible the demand might be.

The latest tit-bit that this indefatigable department has favored the trap-shooting world with is that over 5000 more trap-shooters used their shells in 1912 than used any other make, and that over 1900 more trap-shooters used their guns in 1912 than used any other make. If Winchester Loaded Shells were used by 5000 fewer trap-shooters than used the other fellow's, it is as plain as the nose on one's face that the **W** brand had 5000 less chances of winning the highest average for the season's shooting, yet Winchester Loaded Shells *did* win that coveted honor. That's quality for you.

The same reasoning applies to guns, for, notwithstanding those 1900 more guns of the other fellow's, a Winchester Repeating Shotgun outshot all other repeaters in the race for the high average for the season's shooting.

C. G. SPENCER.

The man who pointed the Winchester Repeating Shotgun which outshot all other repeaters for the season of 1912.

If you "get us," and we believe that you do, you can't help but agree that winning against the tremendous odds which the other fellow says Winchester Shotguns and Loaded Shells had to contend with, proves the superiority of the **W** brand more conclusively than any other conceivable test could.

**P. S.—We hate to spoil this convincing proof of the superiority of Winchester Shotguns and Loaded Shells, but frankness compels us to say that the other fellow's figures are conspicuously inexact. They were shaken from some imagination tree.**

*"You can fool some of the people all of the time, and all of the people some of the time, but you can't fool all of the people all of the time."*

WINCHESTER REPEATING ARMS CO., . . . . . New Haven, Conn.

# THE BRAND Wins Pacific Coast Rifle Matches

Report on Indoor Rifle Tournament of the Pacific Coast, held in Shellmound Park, Emeryville, Cal., Indoor Rifle Range, February 6, 7, 8 and 9, 1913, under the auspices of the Shellmound Rifle and Pistol Club, shows the following:

**CONDITIONS:**—Distance of all Targets, 75 feet; 22 Cal. Rifles; any sights, including Telescopes.

## 100-SHOT CHAMPIONSHIP CONTEST

## CONTINUOUS MATCH

20 Targets of 5 shots each. Regular 1/4 in. Ring Target Used

The Regular 1/4 in. Ring Target Used. Distance 75 feet

Winner, L. S. Hawxhurst..... score 2436 x 2500, PETERS  
Third, R. S. Wixson..... " 2214 x 2500, PETERS

Winner, L. S. Hawxhurst..... score 222 x 225, PETERS

## BULLSEYE MATCH

Winner, Ben Jonas, center measured 2 degrees, or 2-100 of an inch from center. Used PETERS

**NOTE:**—PETERS LONG RIFLE CARTRIDGES LOADED WITH SEMI-SMOKELESS WON FIRST PLACE IN EACH MATCH.

The P Brand is equally popular and equally effective in all sections of this big country.

Ask for SEMI-SMOKELESS, and don't accept any alleged "just as good" kind.

NEW ORLEANS: 321 Magazine St., Lee Omohundro, Manager.

### White Plains Gun Club.

WHITE PLAINS, N. Y., Feb. 22.—Notwithstanding the rain and fog, twenty-six gunners were on hand for the Washington's Birthday shoot of the White Plains Gun Club, and some splendid shooting resulted. T. H. Lawrence and Guy Ward (a visitor) each shot perfect strings of 25 in the same squad. Lawrence also made a straight run of 51, and H. O. Allyn broke 93 out of 100. The first event was a 50-target scratch event for doubles, and resulted:

Rodgers .....	25	Beckley .....	16
Allyn .....	21	Ward .....	14
Lawrence .....	19	Krepps .....	17
Townsend .....	19		

The next event of the morning was at 50 targets for three take-home prizes. Rodgers won with 49, McCormick second with 48 and Core and Parker were tied for third with 43. In the shoot-off Core won. The scores:

Rodgers .....	3	49	Lawrence .....	0	42
McCormick .....	6	48	De Nyse .....	8	40
Core .....	4	43	Townsend .....	0	39
Pardu .....	10	43	Beckley .....	3	33
Ward .....	2	42	Allyn .....	2	33
Krepps .....	3	42	Scovel .....	12	32

In the 100-target selected high score event, Rodgers, McCormick and Parker were high, each with 93. Scores:

Rodgers .....	3	93	Ward .....	2	83
McCormick .....	6	93	De Nyse .....	8	81
Pardu .....	10	93	Townsend .....	0	75
Krepps .....	3	89	Beckley .....	3	72
Lawrence .....	0	85	Allyn .....	2	72

The first event of the afternoon was at 50 targets for three take-home prizes, and Carpenter, Beckley and Pardee were all tied for first with 50 each. In the shoot-off Pardee got first, Beckley second and Carpenter third. The scores:

Pardu .....	8	50	Lawrence .....	0	45
Beckley .....	3	50	McCormick .....	4	42
Carpenter .....	3	50	Sellars .....	2	42
De Nyse .....	8	49	Rodgers .....	1	39
Allyn .....	1	49	Core .....	4	39
Krepps .....	3	47	Townsend .....	0	38
Ward .....	2	47	Hermann .....	5	33

In the afternoon 100-target selected high score event Carpenter was on top with 98, Allyn second with 97, and Krepps third with 96. The scores:

Carpenter .....	3	98	Core .....	4	89
Allyn .....	1	97	Sellars .....	2	83
Krepps .....	3	96	McCormick .....	4	86
De Nyse .....	8	96	Townsend .....	0	75
Lawrence .....	0	91	Rodgers .....	1	74

In the high score for the day (all events, including doubles), 250 targets, T. H. Lawrence was high with 195. The scores:

Lawrence .....	195	Rodgers .....	177
Allyn .....	179	Townsend .....	169

Fitch, of the Greenwich Gun Club, won the visitors' prize for the all-day high score for visitors with 194.

H. O. Allyn was high man for the gold medal for a total of 100 targets, which included the club's monthly test at 50 birds, with the handicaps added; a 25-target match with handicaps included in the scores for the Harvey trophy, and a 25-bluerock test which counted for the yearly prizes.

Harry H. Sloan carried off the high gun with 95 out of 100. Pierce captured the dipper offered in the club shoot with a score of 50. Keenan secured the spoon offered for runner-up, scoring 49. The scores made by Letford and Rudolph tied them for the spoon for high totals.

### Meadow Springs Gun Club.

PHILADELPHIA, Pa., Feb. 22.—To-day's card called for a total of 100 targets, which included the club's monthly test at 50 birds, with the handicaps added; a 25-target match with handicaps included in the scores for the Harvey trophy, and a 25-bluerock test which counted for the yearly prizes.

Harry H. Sloan carried off the high gun with 95 out of 100. Pierce captured the dipper offered in the club shoot with a score of 50. Keenan secured the spoon offered for runner-up, scoring 49. The scores made by Letford and Rudolph tied them for the spoon for high totals.

In the Harvey trophy competition, Ford, Pierce, Soley, Letford, Armstrong, MacAlonan and Fish were credited with wins, and in the yearly point prize shoot, which closed with yesterday's event, the points were distributed as follows: Soley and Pierce 5 each; Keenan, 4; Letford, Renner and Williams, 3 each; Sloan, 2; Armstrong, Fish and Rudolph, 1 each. Scores:

Sloan .....	9	15	0	24	0	23	24	0	95	
Wisher .....	5	3	0	8	0	13	..	..	0	29
Ford .....	5	8	2	23	2	25	21	..	8	87
Thompson .....	8	13	1	23	1	22	22	4	90	90
Emery .....	8	12	3	19	3	21	..	..	9	63

Asbury Park Gun Club.

The first big shoot of the Asbury Park Gun Club was held at the club grounds in Loch Arbour, Asbury Park, N. J., on Lincoln's Birthday, and despite the high wind and intense cold, creditable scores were the rule.

Table of scores for Asbury Park Gun Club. Columns include names and scores for 15 targets. Names include Muldoon, Vanderveer, Walker, Apgar, Von Lengerke, Wilbur Rogers, Morris, Shepherd, O'Brien, Davis, Chandler, W Lawrence, R R Robinson, G W Buck, C C Newman, Garrison, W D Applegate, W B M Ferguson, T H Beringer, Mathews, Burtis, Koegel, Sweeting, Schenck.

Feb. 22.—Fifty gunners faced the traps of the Asbury Park Gun Club on the beach to-day, nearly 2,500 targets being broken in the ten special events alone. Mrs. Charles Woodcock and Miss E. Brown, of New York, were the first women gunners to take part on the club's shoots and made such creditable scores that a program for women will be included in the three days' shoot being arranged for Easter week.

Paleface G. C.

WELLINGTON, MASS., Feb. 22.—Wilder won high gun trophy at the holiday 150-target shoot to-day with 140. W. F. Clarke and Dr. Newton tied for second. Dr. Newton won on toss up.

The added handicap trophies were won by Rule, of Lowell; Charles and F. Ray Richardson, George H. Chapin and William Hill tied for first professional with 136. Gil Wheeler was third with 115. The scores:

Table of scores for Paleface G. C. Columns include names and scores. Names include Wilder, Clarke, Edwards, Dr Newton, Griffiths, Burnes, Isola, Marden, Day, Frank, McArdle, Sweet, Spencer, Lagerquist, Charles, Rule, Blinn, Parker, Winslow, Dr Russell, Proctor, Richardson, Dr Reece, Gray, Archibald, Henry, Whidden, Rogers, Houghton, Wall, Dr Mohr, French, Litchfield, Williams, Blake, Brackett, Hanford, Varick, Bradbury, Kay, McCabe.

Professionals: Chapin 136, Hill 136, Wheeler 115, Scott 114.

Saratoga Gun Club.

SARATOGA, N. Y., Feb. 22.—The holiday shoot of the Saratoga Gun Club held to-day was attended by eight pottery smashers and a driving sleet in the face of the shooters. Considering the conditions, there was plenty of sport, and we hope the next tough day the porch shooters will come out and enjoy the sensation.

In the event for the Stevens fob Corey broke 9 out of 10 and captured the event. In the Levenston cup race Kearney, with 8 added targets, won by one target, beating Corey (scratch) for the honors. Hammond finished third. Other scores were as follows:

Table of scores for Saratoga Gun Club. Columns include names and scores for 'Shot at' and 'Broke'. Names include Hammond, Farrington, Corey, Kearney, Capen, Seselman, Greene, Kelly.

New comers at the traps are shooting on a par with those of more experience. J. M. COREY, Sec'y.

DU PONT

BALLISTITE

SCHULTZE

EMPIRE

SMOKELESS SHOTGUN POWDERS

THE spectacular records at the 1912 Trapshooting Tournaments were made with these powders.

THE uniformity of Du Pont Powders is one of the principal features which contributes to the success of shooters. Regularity of pattern and confidence in their performance produce that sense of reliance essential to the making of exceptional records.

LOOK at the top shot wad. Make sure that your shells are loaded with either Du Pont, Ballistite, Schultze or Empire Powder.

SHOOT THESE POWDERS AND BE A WINNER

Independent Gun Club.
