EASTON, Pa., Feb. 22.—The Independent Gun Club held the first shoot of the season for a challenge cup on its grounds at Cedarville to-day. There was a small attendance owing to the weather conditions, there being a rainstorm and a heavy fog hung over the grounds, which made it very hard to see the targets. The cup was won by Sked, a professional "but a member of our club," he having broken 65 out of 75. J. Maurer was a close second with 64. Sked did not want to accept the honor of winning the cup, but as he is a member of the club, the "boys" said he would have to defend it, and he was promptly challenged by J. Maurer to shoot for it, and March 22 was decided on for the day to shoot it off. This cup is being eligible to challenge the holder, the conditions being 75 bluerocks per man. Scores follow; event No. 1 was for the cup:

Table of scores for Independent Gun Club. Columns include names and scores for 'Targets'. Names include W H Maurer, O Sked, J Heil, G Cross, E Wenner, W Ivey, J Maurer, E Warner, H Brunner, W. R. IVEY, Sec'y.

Frontier Rod and Gun Club.

BUFFALO, N. Y., Feb. 23.—The Frontier Rod and Gun Club shoot attendance was only normal owing to the extreme cold and strong northwest wind. Good scores were many. In event 3, Class A point was won by Wakefield; Class B by Utz after a shoot-off with Thompson; Class C by Squelch. Handicap event, No. 4, was won by Utz after shooting off with Patterson. Scores:

Table of scores for Frontier Rod and Gun Club. Columns include names and scores for 'Targets'. Names include Ebberts, Patterson, Vedder, A R Smith, Wakefield, Peasland, Thompkins, Eichberg, Hassam, Squelch, Hewitt, H Utz, Suor, H. C. URZ, Sec'y.

# Parker Gun Victories in 1912

**T**HE highest official average for the season of 1912 at both **Single and Double Targets** was made with **Parker Guns**.

As on every previous occasion, the bona fide **Championship of America** was won with a **Parker Gun**, Mr. W. R. Crosby scoring 198 x 200 targets at 18 yards rise. Same man, same gun, made the **World's Record**, scoring 98 x 100 targets at 23 yards, which is a truly wonderful performance.

Small bore **Parker Guns** are recognized as the Standard Game Guns of America and are gaining in popularity every season with the most progressive sportsmen. For full information regarding guns in gauges from 8 to 28, address

## MY BOOK IS FREE

I have written a book that I believe will help you realize a fuller appreciation of the possibilities of nature from the stand-point of health, pleasure and comfort. I had this in mind as well as the commercial idea; for, of course, this book is intended to sell goods.

### CAMPING AND HUNTING

I have camped, canoed, hunted, fished and trapped from my childhood days—often far from the usual haunts of man. I am a baseball, tennis and golf enthusiast as well. I ought to understand this business thoroughly; at any rate, it is my pride.

Ask for Catalog and Guide No. 570

All the hundreds of things this book describes are sold under a strict guarantee. If you are not pleased with your purchase—if any item does not measure up to your standard, don't hesitate—send it back. My book is free, if you mention No. 570.

### Boston A. A.

Boston, Mass., Feb. 22.—L. H. Davis beat out seven-teen gunners here to-day, getting take-home trophy, Whitney trophy for being the high gun of the day, with 193 out of 200; February trophy, as his four best scores in the month totaled 143 out of 150. J. E. Lynch was second with 142½.

The team matches were scratch events, and the team captained by T. C. Adams was the winner.

Second take-home trophy was won by S. A. Ellis after a shoot-off with J. L. Snow for third take-home trophy. These two had tied at 95, Snow being scratch and Ellis having 4 in the handicap. In the shoot-off Ellis won by one target.

New York A. C. wants to shoot the Boston A. A. a ten-man team match at Travers Island, New York, April 3. It is probable that the offer will be accepted. The scores:

Davis.....	8	98	Tucker.....	5	90
Snow.....	0	95	Munroe.....	20	88
Ellis.....	4	95	Lynch.....	5	88
Keeler.....	16	93	Ballou.....	5	87
Faye.....	0	91	Page.....	18	86
Adams.....	0	91	Farmer.....	6	85
Dickey.....	0	91	Knights.....	8	78
Brooks.....	8	91	Carlton.....	0	71
Whitney.....	12	90			

Shoot-off for second and third prizes, 25 targets: Ellis 24, Snow 23.

**Baltusrol Golf Club.**

NEWARK, N. J., Feb. 22.—F. N. Cowperthwait was the winner of the 25-bird handicap and 25-bird scratch shoots with 18 and 22 respectively.

The Short Hills Gun Club held a 100-bird scratch competition in the morning for cups presented by Marshall Geer and Sidney H. Browne. Browne was the winner with 85. George A. Williams with an average of 44, won the monthly cup. The scores:

Handicap race, 25 birds: F. N. Cowperthwait (3) 18, T. C. Watkins (4) 18, J. F. Hahn (3) 16, Dr. D. W. Granbery (0) 15, A. Borden (5) 15.

Scratch shoot, 25 birds: F. N. Cowperthwait 22, A. Borden 17, T. C. Watkins 17, J. F. Hahn 10.

Short Hills Gun Club, 100 birds, scratch: S. H. Browne 85, T. W. Lloyd 78, B. C. Fincke 76, M. Geer 75, D. J. Harrison 71, D. Howland 67, W. Byrd 62, C. H. Stout 62, N. E. Stout 58, G. Carey 53.

**California Trapshooting Season Commences.**

Now that the quail and duck shooting season is over, shotgun experts are turning their attention to trapshooting, and all of the clubs are arranging schedules. The Golden Gate Gun Club held its initial shoot on Feb. 23, and will hold regular events on the third Sunday of each month at its Alameda grounds. This club has just elected officers as follows: President, W. A. Simonton; Vice-President, Clarence Lancaster; Secretary-Treasurer, Russ Henderson.

The California Wing Club, one of the oldest organizations of its kind in the State, is arranging a program for the season, and will shoot again at Stege. The newly elected officers of the club are: President, W. W. Terrill; Vice-President, A. W. du Bray; Secretary-Treasurer, W. A. Simonton; Directors, Tony Prior, J. T. Connolly and M. R. Sherwood.

**Bergen Beach Gun Club.**

BROOKLYN, N. Y., Feb. 22.—The holiday shoot of the Bergen Beach Gun Club to-day was won by H. D. Tracy with a full 100 from a draw of 19 scalers. The gunners all returned good scores. Pat May finished second with 98 from 18. F. W. Kent third with 96 from 18. The scores:

H D Tracy.....	19 100	Dr Sauer .....	1 90
P May .....	18 98	A Russell .....	16 88
F W Kent.....	18 96	H Hewens .....	7 88

**Rockaway Gun Club.**

EDGEMERE, L. I., Feb. 22.—To-day saw the opening of a new gun club here. Everything is propitious for a successful organization. Already the roster includes many well-known shooters. The first event was taken by P. von Boeckman with 92. A handicap was won by Frank Chaffee with a full from 9. The scores:

Trophy shoot, 100 targets, scratch: P. von Boeckman 92, Frank Chaffee 85, G. Schenck 74, Louis Magnolia 74, William Milan 72, H. De Groot 70, John Ferrill 68, C. Block 67, Frank Smith 66, D. McKeever 64, J. Murray 64, C. Ellsworth 62.

Trophy shoot, 50 targets, handicap: Frank Chaffee (9) 50, G. Schenck (15) 49, Louis Magnolia (15) 49, H. De Groot (15) 48, W. Milan (10) 47, J. Ferrill (15) 47, J. Murray (14) 45, C. Block (8) 44, P. von Boeckman (0) 44, D. McKeever (12) 42, F. Smith (19) 41, C. Ellsworth (15) 41.

**Bensonhurst Y. C.**

BROOKLYN, N. Y., Feb. 22.—Thirteen Bensonhurst Yacht Club target exponents spent the afternoon cracking 'rocks to-day. Two events made up the regular program. A cup offered by Dr. Atkinson was taken by C. Ferguson, Jr., with 24 out of 25. A prize offered by the club was won by T. Reed with 22 out of 25. The scores:

Dr. Atkinson cup, 25 targets, scratch: C. Ferguson, Jr., 24, C. Trenken 18, Dr. Atkinson 17, F. Brown 17, W. Mackay 16, A. White 16, Dr. Elliott 16, T. Copinger 13, A. Beedle 11, Dr. Webb 10, T. Bruno 10, R. McKinney 10, W. Morrisy 9.

Club trophy shoot, 25 targets, scratch: T. Reed 22, C. Ferguson, Jr., 21, C. Trenken 21, A. Beedle 20, A. White 20, Dr. Elliott 17, Dr. Webb 16, T. Bruno 16, Dr. Atkinson 15, B. McKinney 15, W. Kettner 13, F. Brown 12, R. Mitchell 9.

**Everett Gun Club.**

EVERETT, Feb. 22.—Nineteen guns took part in the match at 25 targets, in which the six high men shot off for the four prizes. Spencer was high gun in the preliminaries, but lost in the shoot-off, Erskine taking first, Dr. Stoodley second, Boodge third and Russell fourth. The scores:

Spencer .....	7 27	Hemmenway .....	4 22
Russell .....	5 26	Osborn .....	6 22
Dr. Stoodley .....	3 25	Chase .....	3 21

**Marlin Repeating Shotguns**

**Model 28, 12 Gauge, Hammerless, Take-Down**

Here's the best repeating shotgun made. It's a fine appearing, beautifully-balanced gun, without any objectionable humps or bumps; it has every up-to-date feature and many exclusive advantages. Standard grade guns (No. 28 A, No. 28 B, No. 28 C and No. 28 D) have pistol grip stock; straight grip furnished on special order. They have a neater frame, more finely modeled buttstock, better lines and more style than any similar gun.

No. 28TS, "Trap Special Grade," 12 Gauge, Take-Down, Matted Barrel, 6 Shots, Weight about 8 lbs. Price, . \$26.00

No. 28T, "Trap Grade," 12 Gauge, Take-Down, Matted Ribbed Barrel, 6 Shots, Weight about 8 lbs. Price, . \$43.00

No. 28C, Grade "C" 12 Gauge, Take-Down, Matted Barrel, 6 Shots- Weight about 8 lbs. Price, . . . . . \$50.00

No. 28D, . . . . . \$100.00

Cartridge Release Button and Matted Barrel on all

Marlin Hammerless Shotguns No. 28A, \$22.60

The Model 28 hammerless trap guns provide every trap shooting requisite, in the best designed "pump gun" ever placed on the market.

No. 28T.—Special Rolled Steel barrel with raised rib, matted on top for its entire length and unequalled in shooting ability. Buttstock and forearm Circassian Walnut, finely modeled, with London oil finish, fine hand checking, bottle comb, large broad butt with hard rubber buttplate. Action parts highly polished for smooth operation. Regular buttstocks have straight grip; this grade made to order without extra charge, with straight or pistol grip stock, any length and drop within reasonable limits.

No. 28 T.S.—Provides at moderate cost a gun just right for the average trap-shooter. The barrel is handsomely matted on top for its entire length, giving a dull streak which prevents reflection of light and gives a quick, clear sight. Buttstock and forearm of American walnut, finely checked; buttstock 14 inches long, 1 1/2 inches drop at comb, 2 inches drop at heel (as in regular No. 28 T), with the large broad butt which covers more of your shoulder and keeps the shock of the recoil down to a minimum.

The Ideal Hand Book contains full information regarding powders, bullets, primers and reloading tools for all standard rifle, pistol and shotgun ammunition, tells how to measure powders accurately, and gives information on everything relating to loading and re-loading of ammunition. 160 pages; free for 3 stamps postage. The Marlin Firearms Co.

You want its advantages: Hammerless—all operating parts contained inside the frame or receiver; Solid Steel Breech—inside as well as outside, so that a defective cartridge could not possibly break the grip of buttstock and hurt the shooter's hand; Solid Top Receiver and Side Ejection—important features of all modern repeating arms; Matted Barrel—the barrel handsomely matted on top for its entire length—a high grade and exclusive feature never before furnished on standard grade repeating guns; Press-Button Cartridge Release—to change loads quickly or remove loaded cartridges from magazine at end of day's shooting; Automatic Recoil Hang-Fire Safety Device, giving full protection against hang-fire (defective) cartridges; Double Extractors and simple, quick, smooth-working mechanism: Take-Down; Trigger and Hammer Safety—a double lock on the hammer (when carrying gun loaded) that can be instantly released for quick firing. It is the safest breech loading shotgun built.

In 1912 the Marlin trap gun was high over all repeating and double guns for all single and double targets at the Westy Hogan, the big amateur shoot of the east; won the big Western Independent Handicap (amateurs exclusively); won the Preliminary Handicap at G.A.H.; tied for Amateur Championship; etc. Why don't you shoot a Marlin?

Circulars describing all Marlin hammerless guns free on request. Complete catalog of all Marlin rifles and shotguns for three stamps postage.

The Marlin Firearms Co. 27 Willow Street New Haven, Conn.

(Patented, Feb. 20, 1912.)

CLEAR VISION means a sure shot. The bright rays of the sun, or the haze of a dark day can't affect your vision if you wear KING'S SHOOTING GLASSES. **NEW FOUNDLAND**

A Country of Fish and Game. A Paradise for the Camper and Angler. Ideal Canoe Trips.

The country traversed by the Reid Newfoundland Company's system is exceedingly rich in all kinds of fish and Game. [All along the route of the Railway are streams famous for their SALMON and TROUT fishing, also Caribou barrens. [Americans who have been fishing and hunting in Newfoundland say there is no other country in the world in which so good fishing and hunting can be secured and with such ease as in Newfoundland. Information, together with Illustrated Booklet and Folder, cheerfully forwarded upon application to

J. W. N. JOHNSTONE, General Passenger Agent, Reid Newfoundland Company, St. John's, Newfoundland.

Here are  
Five  
Modernisms  
That Mark

# THE BLACK SHELLS

Our *Non-Mercuric* Primer is the most uniform ever invented and gives the hottest flame. We replace the usual ground glass (which absorbs 20% of the heat) with materials that actually increase heat.

Our flash passage, 100% larger than usual, permits all the large, hot flame from the primer to rush directly into the main charge, causing quick, complete combustion.

Our one-piece brass head has solid metal behind the explosion, with no crevices for the gases to leak through.

Our modern crimping is so exceedingly firm and smooth that THE BLACK SHELLS work through an automatic or pump gun as though they were greased.

Our waterproofing is famous since the days of the old Climax shells. Fog, rain or even a ducking can not injure THE BLACK SHELLS.

Write for our free book explaining these great modernisms in detail, or tell your dealer "I want some of THE BLACK SHELLS."

Weather conditions were ideal on both days.  
J. A. BINGAMAN, Sec'y.

### Smith Gun Club.

NEWARK, N. J., Feb. 22.—Contestants were so numerous it necessitated cutting down the 100-bird prize merchandise events to four series of 20 birds each. About 4,000 targets were broken. The scores: W. Hassinger 70, J. Geiger 74, C. Coffin 50, L. S. Page 72, J. Weiler 71, B. Heard 62, E. Ficklen 68, M. Appgar 61, E. Townley 60, I. Castles 67, G. Edgar 68, R. Fish 64, R. Budd 64, J. Wheaton 55, F. Ehrick, 72, J. Thornton 70, C. Rogers 50, James Murphy 53, W. Dickenhout 55, J. Rink 56, John Erb 43, G. Naugle 69, J. Baldwin 70, F. Compton 68, H. S. Sindle 69, Harry Hassinger 63, F. N. Single 58, Charles Day, Jr., 76, C. Luckey 40.  
Day won first prize with 76; Geiger, second, with 74; Ehrick and Page tied with 72. On the draw the former won third, and Page fourth.

### Orange Gun Club.

ORANGE, N. J., Feb. 22.—Thomas Dukes won the holiday cup here to-day, getting 89 out of 100, shot in strings of 50 targets each. Besides the two 50-bird events there was a jack rabbit shoot at 15 targets. At the finish four gunners were tied with scores of 10, and on the shoot-off M. R. Baldwin and F. D. Perkins also struck into a tie with 9, the gunners dividing the prize purse. Dr. F. W. Lockwood won one of the 50-bird events with 45.

### Essex County Country Club.

ORANGE, N. J., Feb. 22.—P. E. Heller won two events at Essex County Country Club to-day. In the sweep-stake handicap he made 24, and the take-home trophy he won with 25. In a 50-bird event for the February trophy, B. M. Shanley, Jr., shooting from scratch tied him at 48. In the shoot-off Shanley won with 24. Out of the last 75 targets thrown Shanley broke 72.

### Belden Gun Club.

CAMDEN, N. J., Feb. 22.—In conjunction with the celebration of its fortieth anniversary, the Beideman Gun Club to-day held its annual shoot for the season's prizes. Jones won the club title and trophy with 87 out of 100. Patrick was second with 83 and Steward finished with 80.

### Courtship of Birds.

"OF all the bird tribe by far the most interesting in its customs of courtship and marriage is the ruff. They are a remarkable example of selection by the female and it is possibly from a contemplation of these interesting creatures that Mr. Shaw originally got his idea for 'Man and Superman,'" said Dr. F. B. Korkman in an address before a London college, according to the Standard.

"The ruff is a swashbuckling bird with an imposing collar or ruff of feathers round his neck and a fascinating crest of feathers on his head. His whole object in life is to please Miss Ruff, but he plays quite a passive part and can only stand and wait to be chosen, and not all of the male birds are fortunate enough to be so favored. When the time for choosing comes round the male birds take up their position on a hillside and wait for the glad moment, making themselves look as bewitching as possible.

"But of a colony of twenty-two ruffs observed only eight were chosen by the discriminating females and of these only two—both of them very gaudy, dressy birds—were chosen time after time. One can only sympathize with the poor ruffs who were left out in the cold altogether and hope that they accepted their exclusion with some philosophy.

"Even the London sparrow is extremely interesting in his courtship, although we live a lifetime among them without knowing it. The mating of the sparrows may be observed at any time between now and June. That sudden, fierce outburst of chattering which most of us think

## High Gun

AT DENVER, 1912  
HANDICAP, SEPT. 10-13

Mr. R. H. Bruns, shooting his  
**LEFEVER**

made the marvellous run of  
**283 without a miss.**

On the 700 single targets, including handicaps, Mr. Bruns scored **683 out of 700.**

The second day of the tournament on the day's program of 200 targets, Mr. Bruns and his Lefever gun scored **200 out of 200.** A world's record for ten traps.

On the 500 single 16-yard target for amateurs, Mr. Bruns scored **494 out of 500.**

### ANOTHER WINNER AT THE PACIFIC COAST HANDICAP

Mr. L. H. Reid, shooting his Lefever gun, won second high average with **381 out of 400.**

## GOOD GUN OIL

No matter how new or how old your gun, it needs "3 in One." Trigger, shell extractor, hammer, break joints—every action part of any gun works easier, surer, truer, if oiled with "3 in One." It cleans gun barrels inside and out, removes residue of burnt powder, black or smokeless. Positively prevents rust in any climate or weather. Will not gum or dry out. "3 in One" also cleans and polishes stock.

**FREE** Try this good oil on your gun at our expense. Write for sample bottle and booklet—both free. Library Slip in every package. **3 IN ONE OIL CO., 112 New St., NEW YORK CITY.**

## MAXIM SILENCER BOOK FREE

"The most interesting book I ever read." So say scores of Sportsmen, Target-Shooters and Soldiers. You will say the same when you get your copy.

Explains the famous Maxim Silencer. Contains astonishing experiences told me by hunters shooting without report noise. Surprising stories from marksmen about accuracy made possible when report and recoil are eliminated. Experiences of Military Officers with silenced rifles on the battlefield in Mexico.

Write me for complimentary copy. Mention CALIBRE and MAKE of your rifle and give your dealer's name.

Hiram Percy Maxim

**Maxim Silencer Co.** 17 Colt's Armory Hartford, Conn.

No danger here - it doesn't kick.

### Full Speed Ahead

No "kick" to R. H. All the impelling force of the powder is where it ought to be—forward. Ordinary powders spend their force in a big explosion at the breech of the gun. R. H. burns progressively from breech to muzzle, giving tremendous velocity as the load leaves the gun.

### ROBIN HOOD NOT MADE BY A TRUST AMMUNITION

is the only line of shot shells and metallic cartridges loaded with R. H. smokeless powders.

Prove for yourself that R. H. shoots further, gets there quicker and hits harder; buy some from your dealer and test it.

Send for our free booklet, "Facts About Our Shell Game," full of interesting information.

ROBIN HOOD AMMUNITION CO.  
O STREET, SWANTON, VT.

mistakenly is the prelude to a fight is really a courtship conducted in sparrow style.

"The cocks surround a lady sparrow, each crying out shrilly his own excellencies and the shocking demerits of the others. The lady accepts all this homage by pecking furiously at all the excited suitors, but eventually she makes her choice and flies off with one, and they live happily together for the rest of the season.

"The cormorant also has a most interesting way with him. When he is 'in love' he lies down and twisting his neck round lays it flat along his back. And if Miss Cormorant is touched, as she should be, by this display of misery and devotion she gently caresses with her bill the feathers of Mr. Cormorant at the point where the neck curves over on to the body, and all is well."

### Westminster Kennel Show.

THE most successful dog show ever benched in this country was the thirty-seventh annual, held last week at the Grand Central Palace, New York city. In both attendance and quality of animals benched, this last show had it over any predecessor. It fell to a bow-legged bull from Chicago to take the ribbon for the best dog of any breed in the show—Strathtay Prince Albert, owned and recently imported by A. H. Stewart. It is said that ten thousand dollars was offered for this ugly beauty after the show. Jacob Ruppert Jr.'s, fine St. Bernards came in for much attention from the public and judges, carrying off first honors with Splendidus, Young Stormer, Princess Nan and Queen of Pearls. J. G. Sherman's Lerwick Bess took the premier in the Shetland Sheep class, which had a larger entry this year than ever before. Among the Irish setters, Stewartstown Rose, owned by

# FOX GUN

## Confidence

Every time you throw a Fox to your shoulder, you know it will do what you ask it to do.

It has the faculty of putting its charge where your eye and hand direct it.

It is wonderfully simple—three parts only in the entire lock. Has unusual strength—because of small number of parts they are larger and practically unbreakable. Perfect balance—an essential for accurate shooting. Workmanship and finish the highest possible product of the gun-maker's art. With an action as quick as thought—the Fox is the "finest gun in the world"—guaranteed by the makers.

Ask your dealer about the Fox Guarantee and "Fox Proof" mark which means Safe and Sound. Test the gun yourself. It will do everything but retrieve the game.

If your dealer hasn't the Fox Gun, write us giving his name and ask for catalog in colors. It will give the Fox Guarantee and detailed description of all Fox guns.

**NYOIL**

WILLIAM F. NYE is the greatest authority on refined oils in the world. He was the first bottler; has the largest business, and NYOIL is the best oil he has ever made. It has no equal. Beware of scented mixtures called oil. Use NYOIL on everything where a light oil is required. It prevents rust and gives perfect lubrication. Ladies, try it on your sewing machines. Sportsmen, use it liberally on your firearms. Hardware and sporting goods dealers sell it in large bottles (cheaper to buy) at 25c. and in trial size at 10c. Made by WM. F. NYE, New Bedford, Mass.

Ask your watch repairer whose Oil he is using on your watch.

**Winchester & Co., 909 Beekman Bldg., N. Y.**

Established 55 years

C. N. Burrows, took puppy honors, while Lansdowne puppies took everything else. The Sabine Kennels as usual took all the ribbons in smooth fox terrier classes. The new American class of Griffon Korthals had only a scant showing, being won by Diana, of Morristown, imported by Louis Thebaud, owned by Henry Mellon. Yesdihc Challenge took top recognition for Gordon setters—a wonderful dog is he. Pointers showed some beautiful specimens, while English setters were classy and full of quality. Benj. J. Aukenbruck's Pepp Wind 'Em D., who took the big ribbon, is as fine a shooting dog as you want to see.

Owing to late news for our Sportsmen's Show number, illustrations of winning dogs will appear next week.

# Among The Blackfeet

IN

# Glacier National Park

CHIEF TWO-GUNS WHITE CALP

Glacier National Park in Northwestern Montana, is the home of the Piegan or Blackfeet Indians. Long before the white man discovered this mountain marvel land these Indians made it their home and hunting ground. Their traditions, customs, fetes and mode of living in this tremendous mountain Country are of great interest to all Americans. Nowhere in the Country can the traveler so readily observe the life of this romantic race as in Glacier National Park.

**Vacations \$1.00 to \$5.00 per day**

The Great Northern Railway opens its unique new Hotel at Glacier Park Station on June 15th and will conduct complete tours through the Park the coming season. Travelers can make trips by foot, horseback, stage, boat and automobile, stopping overnight at Great Northern camps.

Write for descriptive free booklets, and send \$1.50 in stamps or money order for beautiful portfolio of fifteen views showing the Blackfeet in Glacier National Park. Single pictures mailed upon receipt of 10 cents in stamps.

# THE OUTDOOR LIBRARY

THE following is a selected list of *Forest and Stream's* books which are most suited to the taste of men and women who are fond of outdoor life—Shooting, Fishing, Natural History, Camping, Canoeing, Yachting. A good book does not wear out, but continues to give pleasure.

Catalogue giving full list of books will be sent on application.

## American Duck Shooting.

By George Bird Grinnell. Cloth, 630 pages. With 58 portraits of North American Swans, Geese and Ducks, Plans of Boats and Batteries. Fifty Vignettes in the text, and a Chart of the topography of a duck's plumage. Cloth, \$3.50.

## American Game Bird Shooting.

By George Bird Grinnell. This companion volume to "American Duck Shooting" treats of the upland game which American sportsmen shoot over dogs—woodcock, snipe, all the quail, grouse and turkeys. The volume is illustrated by colored plates of ruffed grouse and quail, and 48 full-page portraits of different game birds and hunting scenes, with a number of cuts in the text. Cloth. About 575 pages. Price, \$3.50 net. Postage, 25 cents.

## My Sixty Years on the Plains, Trapping, Trading and Indian Fighting.

By W. T. Hamilton ("Bill" Hamilton). With 8 full-page illustrations by Chas. M. Russell. New York. Cloth. 223 pages. Price, \$1.50.

## American Big Game Hunting.

The Book of the Boone and Crockett Club. Editors: Theodore Roosevelt and George Bird Grinnell. Illustrated. Cloth, 345 pages. Price, \$2.50.

## Hunting in Many Lands.

The Book of the Boone and Crockett Club. Editors: Theodore Roosevelt and George Bird Grinnell. Vignette. Illustrated. Cloth, 448 pages. Price, \$2.50.

## Trail and Camp Fire.

The Book of the Boone and Crockett Club. Editors: George Bird Grinnell and Theodore Roosevelt. Illustrated. 353 pages. Price, \$2.50.

Like its predecessors, the present volume is devoted chiefly to the great game and the outdoor life of Northern America; yet it does not confine itself to any one land, though it is first of all a book about America, its game and its people.

## American Big Game in Its Haunts.

The Book of the Boone and Crockett Club for 1904. George Bird Grinnell, Editor. 490 pages and 46 full-page illustrations. Price, \$2.50.

This is the fourth, and by far the largest and handsomest of the Club's books. It opens with a sketch of Theodore Roosevelt, founder of the Boone and Crockett Club, and contains an extremely interesting article from his pen, descriptive of his visit to the Yellowstone Park in 1903. Other papers are on North American Big Game; Hunting in Alaska; The Kadiac Bear; Moose, Mountain Sheep; Game Refuges, and other big game topics.

## Camp Life in the Woods.

And the Tricks of Trapping and Trap Making. Containing hints on camp shelter, and all the tricks and bait receipts of the trapper, the use of the traps, with instructions for the capture of all fur-bearing animals. By W. Hamilton Gibson. Illustrated. Cloth, 360 pages. Price, \$1.00.

## Modern Training.

Handling and Kennel Management. By B. Waters. Illustrated. Cloth, 373 pages. Price, \$2.00.

This treatise is after the modern professional system of training. It combines the excellence of both the suasive and force systems of education, and contains an exhaustive description of the uses and abuses of the spike collar.

## Danvis Folks.

A continuation of "Uncle Lisha's Shop" and "Sam Lovel's Camps." By Rowland E. Robinson. 16mo. Price, \$1.25.

## Uncle Lisha's Outing.

A sequel to "Danvis Folks." By Rowland E. Robinson. Cloth. Price, \$1.25.

## A Hero of Ticonderoga.

By Rowland E. Robinson. Cloth, 187 pages. Portrait of author. Price, \$1.00.

## A Danvis Pioneer

A story of one of Ethan Allen's Green Mountain Boys. By Rowland E. Robinson. Cloth, 214 pages. Price, \$1.25.

## In the Louisiana Lowlands.

A sketch of plantation life, fishing and camping just after the Civil War; and other tales. By Fred Mather, author of "Men I Have Fished With," "Adirondack Fishes," and "Modern Fishculture in Salt and Fresh Water." With portrait of the author. Cloth. Price, \$1.50.

## Forest Runes.

Poems by George W. Sears ("Nessmuk"). With art-type portrait and autobiographical sketch of the author. Cloth, 208 pages. Price, \$1.50.

## The Angler's Workshop, Rod Making for Beginners.

By Perry D. Frazer. Cloth, 180 pages. Four full-page illustrations, sixty working drawings. Postpaid, \$1.00.

A complete, simple and thoroughly up-to-date work for the guidance of the amateur rod-maker, carrying him from first principles through all phases of successful rod making. There is no theorizing or speculation. All terms are simple, and all kinds of rods and woods are treated of.

## Modern Fishculture in Fresh and Salt Water.

By Fred Mather, author of "Men I Have Fished With," with a chapter on Whitefish Culture by Hon. Herschel Whitaker, and a chapter on the Pike-Perch by James Nevil. Illustrated. Price, \$2.00.

## My Angling Friends.

A second series of "Men I Have Fished With." By Fred Mather. Cloth, 369 pages, with 13 illustrations. Price, \$1.50.

## Rhymes of the Stream and Forest.

By Frank Merton Buckland. Cloth. Heavy laid paper. Sumptuously bound. Postpaid, \$1.25.

A charming collection of verse by an author who knows and loves nature well. A particularly pleasing gift for fishermen, closely simulating in form and ornamentation the standard fly-book.

## Jack the Young Ranchman;

Or a Boy's Adventures in the Rockies. By George Bird Grinnell. Illustrated. Cloth, 304 pages. Price, \$1.25.

## Jack Among the Indians;

Or a Boy's Summer on the Buffalo Plains. By George Bird Grinnell. Illustrated. Cloth, 301 pages. Price, \$1.25.

## Jack in the Rockies;

Or a Boy's Adventures with a Pack Train. By George Bird Grinnell. Illustrated. Cloth, 272 pages. Price, \$1.25.

## Jack the Young Canoeeman.

By George Bird Grinnell. Illustrated. 278 pages. Price, \$1.25.

## Jack the Young Trapper.

By George Bird Grinnell. Illustrated. Price, \$1.25.

## Jack the Young Explorer.

By George Bird Grinnell. Price, \$1.25.

## Men I have Fished With.

Sketches of character and incident with rod and gun from childhood to manhood; from the killing of little fishes and birds to a buffalo hunt. By Fred Mather. Illustrated. Price, \$1.50.

It was a happy thought that prompted Mr. Fred Mather to write of his fishing companions. The chapters were received with a warm welcome at the beginning and have been of sustained interest. The "Men I Have Fished With" was among the most popular series of papers ever presented to FOREST AND STREAM readers.

## Houseboats and Houseboating.

By Albert Bradlee Hunt. The book contains forty specially prepared articles by owners and designers of well-known houseboats, and is beautifully illustrated with nearly 200 line and half-tone reproductions of plans and exteriors and interiors. A most interesting chapter is devoted to houseboating in England. Extra heavy paper, buckram. The price is \$3.00 net. Postage, 34 cents.

## The Art of Shooting.

An illustrated treatise on the art of shooting. By Charles Lancaster. Illustrated. Cloth. Price, \$1.25.

## Gas Engines and Launches.

By Francis K. Grain. A few pages are devoted to launches in general, with some excellent advice to the prospective owner of a motor boat; but the author's attention is given chiefly to explaining the principles, working and practical handling of the marine motor for the amateur, who does not care to trouble his head with involved technical information. Cloth. Illustrated. 123 pages. Postpaid, \$1.25.

## How to Build a Launch from Plans.

By Charles G. Davis. A thoroughly practical guide for the amateur. Shorn of all blind technicalities, it considers displacement, good construction and faulty stability, setting up the keel, framing and planking, with careful explanations. Each step is followed up to the care and running of the gas engine. Cloth, 9 folding drawings, 8 full-page plates, 40 smaller diagrams, 176 pages. Postpaid, \$1.50.

## Fetch and Carry.

By B. Waters. Tells minutely of the methods by which a dog, young or old, willing or unwilling, may be taught to retrieve either by force or "natural" system. Cloth. Illustrated. 124 pages. Postpaid, \$1.00.

## Nursing vs. Dosing.

By S. T. Hammond. A most practical book for the dog fancier, based largely on Mr. Hammond's observation that dogs, and particularly house dogs, suffer from too much medicine. Contents—Nursing, Cleanliness, Diet, Other Foods, Kennel and Exercise, Common Ailments, Diarrhea, Convulsions, Epilepsy, Distemper, Eczema, Need of Proper Care, Stomach, Vermin, Ear, Mange, Nervous System, Colic, Worms. Cloth. Illustrated. 161 pages. Postpaid, \$1.00.

## Training vs. Breaking.

Or Practical Dog Training. By S. T. Hammond. The author tells how to bring out the wonderful intelligence of the dog by kindness, as opposed to force. A clear, explicit work, which will appeal to dog lovers. Contents—First Lessons, Charge, Canine Accomplishments, The Whistle, Quartering, Retrieving, In the Field, Working in Company, Raising Puppies, Training Pet Dogs, Conclusion. Cloth. Illustrated. Postpaid, \$1.00.

## Training the Hunting Dog for the Field and Field Trials.

By B. Waters. Probably the most comprehensive work on the subject written, covers every phase of training and field trial preparation with reasons. Kennel Management, Breeding, Kenneling, Points of Judging. It is a work well calculated to enable the amateur to become a successful breeder and trainer. Cloth. Illustrated. Postpaid, \$1.50.

## Woodcraft.

By Nessmuk. No better or more delightful book for the help and guidance of those who go into the wild for sport or recreation was ever written. No one ever knew the woods better than Nessmuk or succeeded in putting so much valuable information into the same compass. Camp equipment, camp making, the personal kit, camp fires, shelters, bedding, fishing, cooking, and a thousand and one kindred topics are considered. Beyond this, the book has a quaint charm all its own. Cloth. Illustrated. 160 pages. Postpaid, \$1.00.

## Log Cabins and Cottages.

By William S. Wicks. This book covers building for the woods from the simplest shelter to the most elaborate cottage, cabin or house, and their furnishing and fitting. The details and directions are at once simple and comprehensive, and the illustrations are numerous and illuminative. Cloth. Illustrated. 44 full-page plates and numerous text illustrations. Postpaid, \$1.50.

## My Friend the Partridge.

By S. T. Hammond. A delightful reminder of crisp autumnal days in the covers. It tells of sport with the noblest of game birds, the habits and habitat of the ruffed grouse, with just the right touch of reminiscence and personal experience. Cloth. Illustrated, 150 pages. Postpaid, \$1.00.

**Buffalo as Beast of Burden.**

THE pictures and reports of the war in the Balkans have brought into prominence a quadruped which, though well known as a domestic animal in the East, is very unfamiliar to Western eyes—the buffalo. If mentioned at all, this beast is generally thought of as a savage brute, but in the war area we find him, says the London Standard, doing duty as a transport animal equally with the familiar ox, from which he is easily distinguished in the illustrations by his low set downcurving horns and muzzle carried almost straight forward.

People who have to travel by buffalo cart are to be pitied, for the buffalo is the slowest of all beasts of draught. It is his great strength that gives him the advantage over the ox. The load that a single yoke of buffaloes will pull is something astounding, and in India they are always given the kind of load which is assigned to dray horses here, ordinary horse work—except passenger traffic—being there performed by the humped oxen known over here as zebus.

India, indeed, is the native home of the buffalo, and it still exists there as a wild animal. Very wild indeed it is, too, and an old bull is very apt to attack unprovoked, contrary to the usual custom of almost all wild animals. Even its tame descendants retain plenty of spirit. When in a herd they do not fear the tiger, and a recognized method of getting "stripes" to bolt when he has taken cover is to drive in a herd of buffaloes to rout him out, which they will do to a certainty if they get on his scent.

Even tame buffaloes can make themselves very unpleasant to people they do not know, and they are not at all safe for a European to approach in India, but—and here the more attractive side of their character comes out—they display toward their owners a faithfulness one usually associates rather with dogs than with cattle.

The true Indian buffalo is really to a great extent an aquatic animal, and when off duty likes nothing so much as to lie up to its ears in water, but, like the duck, it can if necessary resign itself to existence without a bath. That an animal so nearly naked of skin as it is should thrive in so cold a climate as is that of Eastern Europe is a remarkable fact of acclimatization.

Its presence in Italy is less surprising, but even there its introduction seems to be merely of medieval date. Scientifically the tame buffalo is of interest as having, like the ass, varied so little from the wild type. Pied buffaloes are as rare as pied donkeys, though white and fawn colored varieties occur as well as the natural black. Like the ass also, the buffalo is a despised animal, yet in local utility both beasts may surpass their more aristocratic relatives, the horse and ox, while in intelligence and force of character they are certainly far superior.

**The Amber Industry.**

The business of obtaining amber from the ocean has been for long a State monopoly in Prussia. The chief center of the industry is in the province of eastern Prussia.

The gathering of the amber goes on throughout the year, but it is most profitable at the time of the equinoctial storms, says Harper's Weekly, when the winds and the waves throw it ashore. After a storm, the fishermen drag the beach. They deposit the haul upon the strand, where the women and children pick out the pieces of amber from among the seaweed. The pieces are assorted according to size, color and form.

The value of a piece of amber is enhanced when it bears the impressions of plant or animal substances. The prices of the pieces vary from about 13 cents to 75 cents, but may reach to \$100 or more. The price per pound runs from about \$1.25 to \$7.50.

A very large piece sometimes attains the weight of sixteen or seventeen ounces. The color is most commonly the familiar yellow, but it may be reddish brown or emerald green, or creamy color, and some pieces are quite white. The total yield is valued at \$1,500,000 a year.

## In the Woods with Allie

By EDWARD BRECK

(Concluded from last week.)

ONE evening they returned with downcast countenances and we said things. Thereupon Lou bet me that they would bring home at least two ducks in their canoe the next time they went out. Done, of course, and next day in the forenoon, when they landed, Lou swaggered up to camp with two web-footed birds swinging from his fist and the remark: "Well, I dunno!" Great was the joy of Allie and Unk and of their sycophant guides, and my irritation was such that I restrained it with difficulty. But I smelt a rat, or, more properly speaking, a fish-duck.

"Let me see those ducks, Lou," said I. He handed them over for examination. A glance was enough. The Injun had skinned them and cut off their heads, but had forgotten to amputate the feet, which were yellow. I exulted and remarked: "Lou, did you ever see a black duck with yellow legs?" Lou blushed as well as an Injun can, and Unk couldn't help snickering. "Nothing doing, worthy chief," I continued. "These alleged ducks of yours are sheldrakes pure and simple, just plain stinking fish-ducks; that is, no ducks at all, and the bet is off."

Then followed an acrimonious and complicated discussion as to bets, and it goes without saying that both those rogues voted dead against me. My ornithological gorge rose and likewise my sense of justice. I suspected a trick, and it turned out later that those sheldrakes had been dead for a couple of days when the plot was concocted.

"Now, look here," I broke out, "you fellows may know a lot about X-rays and wireless, and how to make confiding editors cough up fat checks, but when it comes to fur and feather and hide, just remember that little Eddie is the authority of this camp, and I tell you that a merganser is not a duck. It has a differently shaped bill, different habits and different flesh. When we said ducks, we meant edible ducks, real ducks, and you know it."

It was easy to see that I was annoyed. Allie perceived this at once and fairly whooped with malicious joy. But they would not budge from their position until we finally reached a compromise, according to which I should pay the dollar if Lou would fry and eat a sheldrake for dinner. I was satisfied on the whole, for I had tried to eat sheldrakes myself, had parboiled them, roasted them, fried them, and then thrown them away as far from camp as possible. We gathered about Lou and watched. It was a matter of a few moments for him to split one of

the sheldrakes and slap it in a frying-pan with a big lump of butter. We jibed, but he merely smiled indulgently. The bird sizzled and pretty soon an odor began to go out from it, to our astonishment by no means a disagreeable odor; quite the contrary. In less than ten minutes Lou was eating that sheldrake with a countenance that was either beautifully made up or expressive of genuine satisfaction. "Have a bite?" he asked.

Doubtfully, furtively we did, and be it recorded here upon the tablets of sporting history that that despised "fish-duck" was both tender and delicious, with not the very slightest trace of fishiness about it. The upshot of it was that we ate up both birds with avidity. I paid Lou the dollar, and sheldrakes are ducks from now on.

"What is the Latin name for fish-duck, Eddie?" was one of Allie's favorite questions for the rest of the trip.

We were not destined to leave Wildcat without a further nocturnal adventure of a singular kind. Hod, the mimic, had been throwing all

the barred owls of the county into excitement by his excellent imitation of their ridiculous cry. We had played our "Pede," solemnly taken our good-night potion, and were stretched out, feet to fire, either watching the flames flicker lower and lower, or reading some book by the light of the acetylenes. It is curious that as in the "Tent Dwellers," Allie limited his reading to a juvenile volume of the most crystal purity, while my library consisted of Prévost's "Cousine Laura" and Gyp's "Totote," while Unk divided his time between several novels of the colorless modern Anglo-American kind, and an immense tome which he said was the very latest on wireless or X-rays or something. No wonder he invariably went to sleep over it, and it soon became second nature for me to reach over, brush his cigarette, very often still burning, out of the danger zone, blow out his light, and throw it out of camp to avoid the stench.

I was awakened some time after midnight by Unk, who announced that some beast was walking round the camp. I listened and heard a noise as of small stones being thrown together.

DR. BRECK IN CAMP.

From "The Way of the Woods." Courtesy Outing Publishing Company.

Unk got up and, armed with a .22, began a thorough investigation, while Allie growled from his wall tent.

"It's right here under the grub somewhere," said Unk. "There are two of 'em. Wildcats, what?" I crawled out of my bag and joined the hunt. We finally fixed the exact location of the predatory beast as a big kettle filled with eggs, which, together with the rest of the provisions, was covered at night with a tarpaulin. I noticed that a number of the eggs lay on the ground under the tarpaulin, and began to investigate, through the tarpaulin, the interior of the kettle. To my surprise I felt the back of some animal about the size of a 'coon.

"Here he is!" I exclaimed, while Unk and Allie bent over the grub pile in great excitement. "By Jove, I've got him by the tail!"

"Hang on to him, Eddie, we'll have some fun."

"You bet I will. I've got him through the tarpaulin so he can't bite. Squirm, you varmint. I'll teach you to steal eggs from a respectable camping party."

And then, all of a sudden, the bolt was loosed. It was as if a hundred ancient stinkpots had exploded under our noses.

"Skunk!" I yelled. "It's a skunk! Run for your lives!" And I dropped that tail as if it were a live wire and fled in wild panic round the corner of the nearest tent. I had a vague view of two big men bumping into each other

in a frenzied rush to the same place of refuge. There was a mix-up, a double crash mingled with hysterical laughter and something stronger, and two otherwise dignified members of the community half crawled and half rolled into comparative safety. Just at the moment when the skunk extricated itself from the kettle and ran out from under the tarpaulin, Hod's face appeared through the dusk, and Lou's beside it. "Hullo! What's up? Porky?"

"Skunk!" yelled Unk.

"Wood pussy! Get from under!" roared Allie.

"Mephitis mephitica!" I screamed. But none of these synonyms was necessary, for the air the next second was positively reeking with the suffocating effluvium. The skunk, to make matters worse, started in the direction of the guides, and there was another wild stampede with "pussy" in hot pursuit, or it certainly looked that way. Unk swore that he saw a second skunk run out of the food pile, but I doubt whether he was capable of "visualizing" anything at that moment with proper distinctness.

And how that camp did reek! And the grub! We dreaded to investigate it, that pile of stuff on which we should depend for the next ten days at least. Allie looked at me reproachfully.

"Eddie, I thought you said there was no animal in Nova Scotia that would attack man," he said, holding his nose. Triangular recrimina-

tions followed, with covered noses, and then the funny side of the adventure came upon us and we laughed long at ourselves and each other. As for the guides, we heard nothing from them till morning, for they had fled to their tent and wrapped themselves up in their blankets.

When we awoke, it was not the perfume of wild roses that the gentle morning breeze bore to our nostrils. Nevertheless, it was not as bad as it might well have been, though we promptly renamed the place "Skunk Point." From the fact that the animal which "exploded" was, at the time of irruption, confined in the kettle by the tarpaulin, the damage was practically localized in that small space, and we lost nothing but the kettle and its contents. As for the tarpaulin, a brand new one of Unk's, we soaked it in boiling water, and then put it in the lake. We took it with us when we left the point, but it was ostracized to a spot far away from the tents. It was finally brought home, but still has to stay outdoors. Unk hopes to be able to use it on the spring fishing trip in 1915.

I don't know whether we played very heroic rôles in the "battle of Wildcat," but I do claim to be the only living man who ever held a skunk for some seconds by the tail, when all his feet had a purchase, and got off unscathed.

It's odd how things do happen when Allie goes into the woods. Why, only a few days later—but that will do for this time.

[THE END.]

## Reminiscences of the Sandhills

By AMOS BURHANS

MY last shooting expedition into the sandhills of Nebraska was not full of the same brand of charm that surrounded me when I first saw them. Let me draw the contrast:

Business detained me from the fall shooting until the middle of October, the first year I ever saw the sandhills. The season opened the first of September, and I could not get away, hence there was nothing to do until I might get off except to write the friend that I could not get away, pay for the conditioning of my dogs and order them kept right up in shape for any possible time that I might be able to get off. I was bound to go. Others who had shot from blinds along the Platte, made the sandhill pilgrimage annually, went into the best quail country along the Loup—other friends of mine who did these things as well as shoot in the sandhills as early as they could get away, came home and reported the prairie chicken shooting the best in years.

On Oct. 17 I got away. A 300-mile trip by train and I was off for the night. In the morning I looked out on a snow-covered landscape and thought the day's shooting done for. I knew not a soul in the village, and gingerly dressed in the hotel room, on the third floor from which I could get the lay of the entire surrounding country. The town lay in the valley of the Loup, betokening that once upon a time

the river had been some river and dwindled to an almost tiny silver thread, willow-bordered and hedged and fed by thousands of little springs that, too, were deeply bordered and provided excellent cover for quail (hunting which I may write of another time). These little streams fed the river and ran through the good, rich, semi-alluvial soil, generally through meadows where wild hay was cut for the winter's feeding. The meadows were not shorn to the edge of the tiny brooks. The brooks twisted too much for a patient man to mow their very banks, and these banks seemingly to protect quail and rabbits, sheltered game with weeds, sunflowers, willows, hedge and what not.

My guide and dog trainer was not to be found. He probably had thought I would not come, the weather as threatening as it had been for the past week. After breakfast I started for a cornfield in the edge of town, where, as I had dressed, I saw thousands of chickens feeding upon the shocked corn and basking in the sunshine of early morning. It was a certainty that I would never get up to any of them, but, nevertheless, I wanted the experience of seeing them in clouds. Remember, further on, that I saw these birds from my hotel window.

I went down the railroad track from the little station. It was easier than plowing through two feet of snow on the level and bucking drifts. On great piles of wheat straw,

stacks of alfalfa, fence posts and elsewhere they roosted to get the rays of warm sun. Probably I was able to get into a 500-yard range of them, but not much closer. They were wary. Yet they hated to fly off when I approached. Trying to estimate them was a lot of fun. I figured about 7,000 of them. They had been blown over the hills and into the lower country by the hard wind and snow and helped themselves to the great cornfields that were scattered throughout the flat valley.

This was one of the greatest mornings of my hunting experience. That afternoon I sauntered down into the brush along the Loup and killed a pair of chickens and a goose: They were seemingly late in going South for the winter. Returning to town, a half hour's walk, I found my guide. Then the next day's hunting was planned. There was no need to go to the ranch forty miles off into the hills. Birds could be found anywhere, and now that the weather was warming up and the snow going off so fast that one could see it, we decided to try the uplands and long grass along the bluffs that guarded the valley through which the Loup had once careened, a veritable Nile.

It is hard to describe the immense bluffs that abutted the valley. Cattle grazed over them, on their sides and in the valleys between them. There were spots along them where cattle could not get. The grass was from four

to six feet high in such steep-sided spots. The dogs soon played out their ginger and set to work, real earnest work that meant birds. The little cat-steps along the sides of the great hills, narrow and steep, gave the birds a splendid place to sun themselves and be warned of our approach. I cannot say that any other day ever gave me so many surprises. We found birds so plentiful and in such out of the way places that it was a wonder we shot one. They bobbed out from under our feet in many places where nothing but the quickest move would even allow of a shot in their direction. The chief item in the day's shoot was when my guide stood watching me across the valley that separated us, each on the end of a great bluff, and (about four million, I was going to say) a hundred birds jumped up in front of me. They were all immediately under the bluff I was on, the dog elsewhere, of course, and sailed away across

had a family of seven bairns, and they must be fed. He hunted for the market largely and trapped, and not a single brat of the great brood was old enough to help him. The next few days were about like the first one, though game was not so easily found, the ground getting dry on the wind-swept bluffs and hills, and the dogs refusing to hold as steadily on the birds. Truly it was trying to the poor dogs. They could not get in sight of the birds, most of them taking wing before we were within shot.

My last trip was during the past fall. I have made many between the first and last, going back into the hills a few miles further from settled country, if such it can be called. The further one retreats behind the bluffs the more sandy is the character of the country. Great blowouts, such as are denoted in the white-looking spot on the left of the photo, lay bare to the wind and weather, growing deeper and of

friend; the younger hunter from the nearby ranch with his gun across his shoulder as he tracks after the little herd of cows and calves; even the mail carrier who takes down his trusty gun when the season opens and stands it in the corner of his covered rig to have handy when the stray covey runs down the road ahead of him—all these are hunting the hills that once afforded kingly sport for a few men.

The little sod shack with its little stable is giving way to the larger and more comfortable farm or ranch house, and the little ranchman is finding that he cannot cope with the conditions. He is selling out to the man with capital enough to own and carry on a medium-sized operation in cattle with his own land, and what he can buy from the one who is literally frozen out.

Shooters are in greater numbers. The day

THE SHOOTING QUARTERS IN THE SANDHILLS.

Photograph by the Author.

the valley. I had imagined my sixteen-gauge pump gun was full to the muzzle, but it had but five shells in it with which I knocked down five cripples—that is, they were cripples, I am sure, after I hit them and before they touched the grass. Then it was a dirty job to get down the slope where they had all fallen and “dig them out.” The grass was very high and thick as a doormat. The birds might have gotten out, I feared, by crawling and running, but strange to say, all of them were stone dead when found. I must have been hunting for them an hour, the dog almost useless at this sort of work. Down one swath of ground I walked, then back about three feet from that line of travel, up and down, until I had found them. It was a very exciting time. Get five cripples down and mad because your arms were so stiff that your gun came up clumsily, then have a dog that refuses to pay attention to a dead bird, and see what the result is to your temper!

Going back to town we found dozens of birds in the corn. All told, I think we had twenty-one for the day's shoot. But the guide

greater area during each savage wind storm. The hills are generally ranged with valleys between. The shady spots are best for evening hunting, and one can most always count on birds being found near water. Early morning finds them on the hills where the sun peeps out earliest to warm them. During the early portion of the season, when the young are holding to the dogs well, not having been pursued enough to make them flighty and keep them out of shooting distance, one can get a few fair shots. I have heard that better ground was to be had than I go shooting over. But there are old associations, the country one knows (though it be growing tamer each season, owing to the plow and the fence of the little cattle man), old friends and faces and fields—these all to keep one in the same section year after year.

The big touring cars of the eastern sportsman who rolls down from his small private train with car and dog van, teams and saddle horses; the smaller rig with its two nasty-looking ponies and the village barber and his

of the prairie chicken is over. He will last some time if guarded in the preserves located near his heath. But memories of the days spent with them as the objects of prey cannot so swiftly be forgotten. While he lasted he fed thousands in and out of season. He was the delicious morsel of food which all put their teeth into, with a relish, while away in the sandhills in his pursuit and fighting the sand-flea. The fun of sitting in the saddle while following the dogs and watching them work, as we had to do during the past few years, owing to the great amount of territory to be covered to find a few birds, is over. Like the range country of the Dakotas, Montana and Wyoming, it is gone. But we can sit by the crackling fire and recall the fun, the unruly native dogs, the curs that often put to shame our untried bloods of the canine four hundred.

The field trials in the sandhills are no more. The race horse dogs of the type bred to-day cannot find a covey in a four hours' hunt, and we once found it possible for old Sport at fifteen years to locate and nail a bunch!

# The Adirondacks of 1858 and 1888

By J. L. DAVISON

WAS much interested in Albert Bigelow's article in your Oct. 5 number of *FOREST AND STREAM*, as I was in the Adirondacks in 1858<sup>\*</sup> on Raquette River, in St. Lawrence county, and again in 1888, when the late W. H. Moak, of New York, and I tramped 150 miles through that wilderness, commencing our tramp at Northville, Fulton county, and ending it at Theresa, Jefferson county. We arrived at the Sturgess House, Lake Pleasant, the first evening of Sept. 21, where we found our pack baskets that we had forwarded by stage express. As it rained the next morning, we did not get started until after 10 o'clock. This was our first real tramp, as we had our baskets on our back, and I had my shotgun in its case. After two miles' tramp, we came to the State fish hatchery, just being finished, and we were glad for an excuse to stop and rest and spend an interesting half hour. From the hatchery we took a trail over the mountains, and such woods I had not seen for thirty years. Just before reaching Jessup River we put up a flock of grouse, but we did not stop to secure any of them. We arrived at McCormick's, Lewy Lake, at 5 o'clock. My companion was taken ill the next morning (Sunday) and we did not get away until Tuesday morning at 9 o'clock and took a trail for Indian Lake House, eight miles distance, where we arrived at 3 o'clock P. M. and left at 6 o'clock the next morning. After an hour's walk we stopped to cook our breakfast of bacon, fried potatoes and coffee, which with bread and butter we were eating, when a young daughter of Mr. Griffin, of Indian Lake House, passed us on the way to school, a two and a half mile walk. As we passed the school house half an hour later, I asked one of the children how many scholars there were. She answered, "'Leven."

We arrived at Indian Lake postoffice at 11:15 where we mailed our postal cards, and making a few purchases of eatables, left at 11:30. About a mile from the village we called on W. D. Wakley, where Mr. Moak had stopped nine years before while going to Raquette Lake. Mr. Wakley's house was on a hillside a few rods from Cedar River, from which can be seen twelve mountains, among them Mt. Marcy, the highest in the range. I must not forget to mention that Mr. Wakley was a Democrat and a strong Cleveland and Thurman man. About eight miles from Indian Lake village we passed through a windfall where a cyclone had passed through the past July. For half a mile in width and ten miles long, not a whole tree was left standing. It passed over the road we were on, and it was a job to clear the road. I never before or since saw such a sight.

We reached Blue Mountain Lake at 5:45, making twenty and one-half miles during the day. We stopped at the Fair View House, a small new house kept by James Sault. The next morning (Thursday) started for Raquette Lake. As we walked down the street, we passed two young ladies each having an oar. As we crossed the border of the outlet of the Blue Mountain Lake into Eagle Lake, a boat passed under the bridge, and in it were the two young ladies. I

mention this, as I shall have occasion to speak of them later. About half a mile from the bridge we came to an old clearing. On the hillside fronting on Eagle Lake we saw a neat frame house with a one and a half story log house nearly in front of it. We stopped at the house to ask about our route, and during the conversation we were told that the old log house was "Eagle's Nest," where Ned Buntline (Col. E. Z. C. Judson) lived for many years. Mr. Bigelow mentions of meeting "a young man who had built a camp somewhere near Blue Mountain Lake, who told us he had cured his tendency to consumption, he thought, by his stay there." It is a well known fact New Buntline built his camp on Eagle Lake to get away from his worst enemy, alcohol, which was the only tendency toward consumption he had. He was a writer of fiction, and during the '50s and '60s wrote for the late Robert Bonner, of the *New York Ledger*. It was at Eagle Nest that he wrote these beautiful lines:

Where the silvery gleam of the rushing stream  
Is as brightly seen on the rocks, dark green,  
Where the white pink grows by the wild red rose,  
And the bluebird sings till the welkin rings.

Where the red deer leaps and the panther creeps,  
And the eagle screams over cliff and stream;  
Where the lilies bow their heads of snow,  
And the hemlocks tall throw a shade o'er all;

Where the rolling surf laves the emerald turf,  
Where the trout leaps high at the hovering fly,  
Where the spotted fawn crops the soft green lawn,  
And the crow's shrill cry bodes a tempest nigh—  
There is my home, my wildwood home.

I cannot vouch for "the crow's shrill cry," but certain it is that here we witnessed the most severe storm we had while in the woods. It was a veritable tempest, and in the middle of the lake was the boat with the two young ladies. I watched through my field glasses and expected every moment to see them capsize, but they

managed to keep the boat headed against the wind and finally passed into the outlet leading into Lake Utowana.

The storm having made the trail too wet for walking, we engaged the young man living at Eagle's Nest to take us by boat through Eagle and Utowana lakes to Bassett's, six miles. As we entered the outlet we met the young ladies returning, but when assured by our guide that there was no danger in passing through Lake Utowana and Raquette to their destination, the cottage of Mr. Hasbrook, of New York, they again started on their way. Our guide proposed that I should row their boat. As there were only two seats in their boat, one of the young ladies took my seat in the guide's boat. Although the lake was very rough, by keeping near the windward shore we got to Bassett's all right. Our guide took the young ladies' boat on his shoulders and carried it below the rapids and put it into Marion River. While we were waiting at the landing for their boat, the young lady that did the rowing during the storm on Eagle Lake showed me her hands, that were blistered from rowing. I put court plaster on them, and getting her in the boat with the other young lady to do the rowing, bade them bon voyage, little expecting to ever see them again, but the sequel will tell.

We reached the Raquette Lake House, kept by Wm. Pashley, at 5 o'clock. When we left Bassett's we intended going to Forked Lake, but got off the trail and made Raquette Lake instead. On Friday morning we got a boat of Mr. Pashley and went to the Forked Lake House where Mr. Moak had stopped nine years before. The house was closed, but it did not matter as we did not intend to stop. While returning on Raquette Lake we stopped at a camp to cook our dinner, and who should we find there but our young lady friends of the day before. The camp belonged to Mr. Hasbrook, of New York,

ALASKA GAME WARDENS' WINTER QUARTERS.  
J. C. Tolman, Senior Game Warden, Kenai and Alaska Peninsulas.

who had two men building a stone fireplace and chimney.

By the time we got started on our way, the lake was very rough, and when we were about a mile from the camp and in the middle of the lake, I broke an oar and we worked our way back to the camp with one oar and paddle. The young ladies loaned us the pair of oars we had used the day before, and we reached the Raquette Lake House just after dark.

The next morning (Saturday, Sept. 30) we secured a guide (James Burk) to take us across the lake to North Bay and to return the oars to the Hasbrook camp. From North Bay we started for Brandeth Lake, six miles. When about four miles on our way, where another trail came in, we saw a box fastened against the embankment. On going to inspect it we found that it was for United States mail. Think of putting your letters in an open box twenty miles from any postoffice! We arrived at Brandeth Lake at 1 o'clock P. M. This is one of the most beautiful sheets of water in the Adirondacks. Here we met a gentleman, Reuben Cary, who gave us information as to our route.

In your issue of Jan. 4, the article headed "Old Leviathan of Burnt Mountain Lake," I recognize in the pictures ("Rube") Reuben Cary, our chance acquaintance of 1888. The day after reading the article, in looking over my notes during that tramp I found a piece of paper two by three inches in size, on which Mr. Cary had written his address, "Reuben Cary, Brandeth Lake, P. O. Blue Mountain Lake, Hamilton County." I had not seen it for at least twenty-four years, which inspired me to write this screed. Besides giving us good advice in not trying to go by the way of Cranberry Lake at that season of the year, but to go by Munsy's and Stillwater through to Lowville, Mr. Cary put in our pack basket two pounds or more of juicy venison steak, and escorting us to the limit of civilization, bade us good-bye, but when about a mile on our way he overtook us. After leaving us, it occurred to him that we could not reach Muncy's that evening. He had followed us up to say that he and Mr. Brandeth had a camp about three miles on our way, near Deer Pond, and that we could occupy that night and over Sunday, also saying that we would find everything that we would need. Again thanking him for his kind offer, we again bade him good-bye, and resumed our tramp. We arrived at the camp about 3 o'clock. Just before reaching the camp I secured a partridge, and with it, the venison and a pot of cooked beans, we lived on "the top shelf." We found the balsam beds so good and fine that we did not get our breakfast until 11 o'clock. About noon it commenced to snow, and we thought we would better be getting on our way, and leaving Camp Cary, we started on a quiet walk through the woods to Muncy's. Much of the way the trail was barely visible, but we did enjoy that walk through the big trees. Twice we saw where a bear had sharpened his claws on hemlock trees, one of them as high up as I could reach, and a year or more after I received some bear claws and teeth from Emmett Harris, whom we met the next morning after that walk. We arrived at Muncy's on Beaver River at 3:30 P. M., leaving at 5 o'clock Monday morning and reaching Mr. Harris' camp just in time to avoid a downpour of rain. Here we cooked our breakfast of fried

bacon and potatoes with a liberal supply of coffee, which Mr. Harris said he was short of and proposed to exchange maple sugar for what we did not need on our way out. As maple sugar was a luxury with us, we gave him all our coffee for a fine cake of four or five pounds of sugar. About 11 o'clock it stopped raining and we started for Stillwater.

I must not forget to mention that the main room of Mr. Harris' house was a veritable museum. The entire walls were covered with the antlers of moose, elk and deer, and the rafters of the roof covered with the skulls of every animal he had procured for years, down to as small as a mouse, including those of the bear, wolf, panther, black and brown bear, and even one of a grizzly bear secured in the Rocky Mountains. Also the outside front of the house was covered with antlers, among which were two pairs of deer antlers locked together while fighting. One deer was dead when found. I asked him if he had ever put any price on his collection. He answered that he never sold anything. I proposed that he leave the collection to some museum. He said that he had two children teaching in the Normal School at Brockport, N. Y.

Within the next fifteen years he sent me many pairs of deer antlers and legs and skulls of bear and beaver, and many pounds of maple sugar and spruce gum. We reached Stillwater at 4:30 P. M. This was probably the best place for deer and grouse shooting that we had passed through, and here we found the best accommodation for sportsmen that we saw on the whole tramp. J. C. Dunbar, the genial host, was a gentleman and sportsman. Leaving Stillwater at 8:30 Tuesday morning we reached Fenton, eleven miles. At 3 o'clock we put up for the night. It rained or snowed just enough to make it disagreeable. We got an easy start on Wednesday morning for Lowville, where we arrived at 4:30 P. M., having made the eighteen miles in seven hours exclusive of stops.

Here we were practically out of the woods, but as our objective point was Gouverneur, St. Lawrence county, we took the trail on Thursday morning for that place, and from there we walked to the village of Oxbow in the afternoon, remaining there until Saturday morning, when I left my tramping companion with his brother, Dr. Moak, and started for Theresa, Jefferson county, my boyhood home, and where I was born, Sept. 8, 1833. I did not take the direct road to Theresa, which would have been only a ten-mile walk. Instead, I headed for Indian River below Muscalonge Lake, from which by the river route it was fourteen miles to Theresa. Crossing to the west side of Indian River, I followed the road to opposite Reed Lake, which was a mile away on the east side of the river. Stopping at a house I learned that they had a boat on the river half a mile away. I employed a lad of twelve years to take me across the river to "Doolittle's" where I procured a boat which I rowed four miles to Theresa after dark, and raining most of the way. Here ended my tramp of 150 miles through the Adirondacks.

"KONSIDER the postage stamp, my son: its usefulness consists in its ability to stick to one thing until it gets there."—Josh Billings.

## Tame Ducks in Springfield, Mass.

SPRINGFIELD, Mass., March 1.—*Editor Forest and Stream:* About ten years ago Judge Aiker, of Greenfield, in this State, who now is chief justice of the Superior Court, presented to the park commissioners of Springfield a few mallards. These ducks were placed in Forest Park, which is located about a mile from the business center of the city, and consists of 464 acres of land, containing half a dozen artificial ponds, and a small stream that runs the entire length of the park, and for a portion of the way through a few acres of partly flooded land, which is covered by a growth of alders and willows. In this section these mallards, or their descendants, have each successive breeding season made their nests and brought forth their young, which, with the old ones, have had the free range of the park during the warmer months. With the exception of the open winter just passed, these ducks, at the time the ice has begun to form in the ponds, have been caught by means of a net and kept in confinement until spring. Once when the net was sprung, several wild blackducks were captured and confined, and they, like the mallards, became semi-domesticated, and once at least a blackduck and mallard mated, and hybrids were the result. In the course of the last ten years, many of these ducks have disappeared, very likely joining migratory flocks of their wild relatives.

In the latter part of 1912 a male green-winged teal came into the park, joined this flock of ducks, and has spent the winter in their company. At first he was very uneasy at the approach of a person, but now he has become so tame that a man may stand within a few feet of him without his showing much fear.

About Feb. 1, in this part of the Connecticut valley, there seems to have been a flight of Holboell's grebe, and many reports were made of their presence here. Three were found near Springfield in an exhausted condition, and being caught, placed in a tank of water and given a fish diet, soon revived and in a short time would take food from the hand. Usually mallards, blackducks, teal and grebes make a hurried departure at the sight of man, but as is here shown when kindly treated are glad to become friends.

ROBERT O. MORRIS.

## Passenger Pigeons.

FORT DODGE, IOWA, Feb. 17.—*Editor Forest and Stream:* There has been considerable discussion through the columns of your paper of the passenger pigeon, its habits, etc., and some speculation as to the cause of the disappearance of these birds. The writer was born and reared in a country where the wild pigeon was as plentiful as any place in the United States. Fortunately, for myself at least, my recollections of the passenger pigeon are well preserved, and if you think the readers of FOREST AND STREAM will care to read, and you to desire, I shall be pleased to forward to you for publication an article on my recollections of the passenger pigeon, also an extract from a letter from one of the few surviving pigeon netters. I can vouch for the statements in the letter, and shall endeavor to make my article concise as possible. Awaiting your reply, I am,

C. A. BRYANT.

## In Camping-Supplydom—II.

Some More of the Little-Known Camping Conveniences and Travel-Foods of Other Nations

By L. LODIAN

### WOOD VS. METAL CAMPING-KITS.

**F**OR many years the writer has been of the opinion that in camping outfits, wherever practicable, wooden ware was preferable to metal ware. The latter may be easier to clean, and may be rated more sanitary, but usually in outdoor life you can get all the sanitation you want, and the extra "sanitariness" of a few plates and cups is a negligible factor. Besides, look at the lightness of wooden ware when carried; its floating property in a boat spill, or if accidentally dropped into the water, and in extremis, when at your wits' end for a bit of fuel in zero weather, the utility of the wood ware as a possibly life-saving fuel. Further, in winter camping, metal ware is unbearably cold to the touch; in other words, the metal begins at once to absorb the precious bodily heat of the digits, whereas wood robs the body of but little, hence we speak of wood as being more comfortable to the bare touch. The toughened camper bears all these things in mind.

Wood plates, wood spoons, wood forks, wood cups, wood canteens, wood whistles, wood cots and a shoal of other things wood are always obtainable on inquiry. Any skeptical person camping in cold weather should try for once at least an all-wood kit, and note the difference over metal. Of course, heating and cooking articles must be of metal, and the choice lies between aluminum and sheet-iron. The latter rusts; brass verdigrises, and aluminum effloresces out some of its salts ("pitting") and gets full of pin holes. Salt, vinegar or souring products contained in aluminum vessels soon ruin the metal. Besides, while sheet-iron articles can be cleansed by firing, aluminum is liable to disappear in the heat, unless watched.

The Russia black-iron camping utensils are perhaps the most satisfactory all-purpose vessels known. The color is really grayish-bluish. Oxidization, or rusting, is slow compared to our own common sheet-iron, and fire-cleansing of the used vessels can be done with impunity, provided the heat is just sufficient to cleanse the objects. A cherry red is all-sufficient. I am a great believer in flame and fire for cleansing used (and oft too greasy) camping cook outfits. It is so simple and speedy, and after the flame-cleansing, you have only to drop the objects into luke warm water to free them of ash or gritty particles; and lo! your kit is swiftly and refreshingly clean, and you heave an inspiration of satisfied relief. The necessarily fireless process of cleansing aluminum articles with sand, ashes, soap, etc.; the half-hour to hour of rubbing to remove the obstinate greasy black or soot (seriously abrading the metal, too)—may be with only cold water to wash the goods in on a cold, windy day. Oh, Lord! what a memory! But fire-cleansing black-iron ware makes all that unpleasantly-prolonged washing-up work an interesting pleasure in comparison. Try it some time.

### HOLLOW-BORE CAMPING CANDLES (FRENCH CAMPING LIFE.)

About three-quarters of a century ago there came out in France the tubular or perforated candles. They have been on sale in various of our foreign-grocery importing stores the past forty years, yet are scarce known; certainly not at all among American campers. In Gallic tent life, in shooting shacks and lodges, in country homes, and family hotels lacking incandescent lighting, they are in uniform use. The object of the five vertical perforations surrounding the

wick is to prevent external "guttering"; that is, in a draft, the melted grease does not 'gutter' or run over the edge on to the outside of the candle, but flows into one or more of the five perforations, and only trickles down a little way ere it hardens, and is in turn in due course all burned up in the economy of the candle. There is no waste. In a still room, the candle will burn to the end without a single hole filling; carried upstairs and meeting a draft, two or three holes may temporarily fill up to the depth of half an inch, but rarely are all blocked.

French campers often show much ingenuity, and as these perforated candles are obtainable in pure wax—which of course is entirely tasteless—they will make use of the holey candles as a makeshift "filter" when drinking from a stagnant pool. Tie the end of a silk or linen kerchief over one end and "draw" through the other. (The Italian camper thus also extemporizes into a pocket filter a short piece of macaroni.)

These candles are hydraulic-pressed and come ten to the pound, costing twenty-five cents the package. The writer first used them in France nigh a quarter century ago, and has often purchased them in Manhattan for room use. One will last about four and a half hours—the average evening's light—and in a white-washed room, with no dark objects to absorb the light, the light of one candle is sufficient for one, or even two, persons. While reading, I have often—à la française—economized on that single light to cook the evening meal—steak; boil the water for two big cups of tea, and bake a plump apple for dessert. The Gallics do this—so can a Yankee—or any other would-be camper. The trick is to cook in a fair-surfaced, but not too big, square sheet-iron dish, and to take care to keep the dish covered, to keep every possible bit of heat in. Usually I cover with a similar-sized metal vessel. When reading, or doing other work, the rather long time necessary for reaching a boil—maybe a dozen or more minutes—is scarce noticed; in fact, you are surprised, as it seems, at the speedy "singing" of the arising steam, and are liable to pay attention with the remark: "Why, is that heating up already?" Yet, if you were in a hurry, that candle-heating would never do. It has its limitations. Of course, the lighting of two candles, a couple of inches apart, under the vessel will hasten the boil, but then—especially in warm weather—the combined heat is liable to hasten the undue melting of the candles, and smoking from the wicks will result.

A camper having bits of fat uselessly knocking around can always have a good enough makeshift light from them by trying-out the material. Then it is best burnt in a small square-shaped metal dish, with the aid of any bit of cotton rag as an extempore wick. A little experience will qualify in the production of a fair light; not so good, however, as candle light of equal flame dimension, because that tried-out fat of yours contains its inherent glycerin, which is a non-illuminant.

JAPANESE COLLAPSIBLE WOOD CUP.  
FRENCH SOAP PAPER.

FRENCH PERFORATED CANDLES.

TEAR-OFF PAPER SOAP—TO OUTWIT THE SOAP BORROWER.

The chronic borrower will be found among campers and travelers as in every other walk of life. Some are said to borrow umbrellas and never return them. Some "borrow" your cigars regularly, but did you ever see them back? Some would borrow your purse if they could, with like result. Some consider friendship only for what they can get out of "the other fellow." A witty Paris cynic once sarcastically defined friendship as "a vessel that takes every opportunity of sailing into your port—i. e., portemonnaie" (purse). He was about correct. But what has all this to do with the outdoor life? Well, a Seine—and over-sane—sporting tourist was oft annoyed by soap borrowers. Nobody seemed to think of carrying soap along except him, and almost the first day out he would lose his assortment by borrowers. The excuses were: "Slipped out of hand into deep water and was lost," or "Forgotten at inn or lodge," or "Left unobserved at bottom of basin," etc. Disgusted, our friend hit upon a form of impregnated soap paper. That was some score years ago. He patented it, and lost money on it. To-day anybody is free to take advantage of his invention and make the soap paper. With a dozen meter-square sheets of soap paper with him on a shooting trip, he could defy the combined efforts of all his soapless confreres to deprive him of his stock by cutting or tearing off a piece of the paper about the size of a playing card. This was ample for a face and hand wash. The paper lathers freely, and speedily disappears amid the foam into a small pellet-like wad—the remnant of the tissue paper sheeting which held the impregnated soap.

A queer soap of Paris is human-fat toilet soap, recommended by medicos as a superior emollient. It is a dingy grayish-white, quite pure, retails at the high price of 5 francs (\$1) per small cake, and the fat is obtained from the derelict cadavers of the dissection hospitals.

Still, the "trying-out" of this human fat by violent ebullition completely sterilizes it. Medical students have sometimes given festive banquets at which the sole illumination was that obtained from scores of candles made exclusively of dissection-hospital human fat. The candlesticks on the tables were grinning human skulls, poised face upward, with the U-shaped candle protruding through the eye-holes, so as to flauntingly illustrate the adage of "burning the candle at both ends." Possibly this bizarre death-candle was the origin of the expression. But those students made merry.

FISH-ROE BREAD (SCANDINAVIA; ALSO BLACK SEA REGION).

This is a well-known product among the fisher folk of Scandinavian countries. In many northern parts, grains or cereals are scarcer than fish roe, so the latter is boiled in whole roes, reducing the size considerably, then steeped in beeswax for a thin coating. This preserves the flavor and the moisture, and it can be kept for months. It is exported limitedly to Manhattan, and is wholly edible after months of storage, and retails at the stiff price—as a luxury here—of fifty cents per pound. In the countries of origin, among the nigh moneyless coast-faring population, the price would be about one-half cent a pound. As found in commerce in the Hudson city, the fish-roe bread, with its adherent thin beeswax covering, looks like so many degenerating half-squashed bananas. It is a nutritious, satisfying, filling bread, and the would-be purchaser can get it of Norwegian or Swedish importers and retailers in Manhattan.

The Black Sea fisher folk have a similar fish-roe bread, but make of it a double use. They also salt it and smoke it, when it forms the real original Turkish delicacy known as caviar. I do not mean the Russian semi-tainted greenish-black mass known to the Tolstoi-landers as ikra (roe). These people do not use the word caviar, except in French or Teutonic conversation. But this Black Sea product preserves the natural pinkish-

reddish color of the fish roe, and is—knife-cut in thin slices and eaten between slices of fresh bread and butter—a caviar delicacy worth knowing. The Russian substitute product is quite high-priced—some \$4 per pound—yet the far superior original Turkish caviar can be obtained any time among the Arabic-speaking citizens of our greater American cities for fifty cents per pound.

The Japanese also send to Manhattan, in pound cans, a labeled fish-bread. It tastes like a well-boiled cod steak, without a particle of salt flavoring. The writer is familiar with it through a sojourn many years ago in the land of the inland sea.

A singular Japanese travel biscuit or cracker is the almost snow-white sliced codfish wafer. It is thin as a visiting card, of not very pronounced fishy taste, and does not contain a particle of salt or other flavoring. The Japs prefer to add their own salt at table. The reason for this is that it prevents semi-putrid fish being dried and palmed off on them, as the taste would be immediately apparent in unsalted stock, whereas salting covereth a multitude of defects, as witness our own salted codfish packages with their oft found odor of putrefaction.

[TO BE CONCLUDED.]

Valuable Furs of Maine.

A MAINE fur buyer on a sixteen days' trip, says the Lewiston Journal, through the Rangely region this season bought \$3,000 worth of furs. On a second trip he secured \$2,000 worth more. For fisher alone he has paid \$1,200 this season, paying for two skins alone \$50 each.

At the present time fisher is the most valuable of Maine furs with the exception of silver gray or black fox. Otter is a close second in value. Two trappers who have been in the Cupsuptic Pond region, about twelve miles above the lake of that name, recently brought out seventeen fisher, twenty-one sable, thirty-five ermine and a little other fur.

# GAME BAG AND GUN

## McLean Bill Passes.

ON March 3 the House followed the example set by the Senate and passed the Weeks-McLean bill for Federal protection of migratory birds, and on the same day the President signed the measure for which the American Game Protective and Propagation Association secured endorsement by practically every man prominent as a naturalist or game protector in the country, as well as by thousands of citizens from all over the United States. The matter has been brought before the National and State Granges and the State and local game protective associations with the result that there has been a powerful co-operative movement for Federal protection on foot for more than a year. Its successful culmination is considered the most important event in the history of game conservation in the United States.

The Weeks-McLean bill delegates to the Department of Agriculture power to regulate the killing of all migratory birds. This will bring timely protection to many species of wildfowl and shore birds that would otherwise soon join the species already extinct, and will also make it possible to cut down the annual loss of \$800,000,000, which is suffered by agricultural interests on account of insect pests, by giving the insect-eating birds a chance to increase.

The first bill for Federal protection of migratory birds was introduced in 1904 by Hon. George Shiras, 3d, then a member of Congress from Pennsylvania. The bill was referred to the House Committee on Agriculture, but was not reported. In December, 1908, the Hon. John W. Weeks, of Massachusetts, introduced a measure, modeled after the Shiras bill, which was referred to the same committee and met the same fate. In May, 1909, Mr. Weeks reintroduced his bill with modifications, and while much interest in the matter was aroused, there was never enough co-operation among those interested to secure a hearing. A later modification of the Weeks bill was introduced on Jan. 6, 1911. At the first session of the Sixty-second Congress, three bills on the subject of the protection of migratory birds were presented—the Weeks bill on April 4, the Anthony bill on April 12 and the McLean bill on May 17, 1911. All the bills mentioned received the endorsement of sportsmen and naturalists, but it was not until the American Game Protective and Propagation Association secured hearings on March 6 for the last three that the favorable sentiment of the whole country was brought to bear. The Weeks-McLean bill as passed is a combination of all of them, but is modeled chiefly on an amended form of the Weeks bill.

The measure passed as an amendment to the Agricultural Appropriation bill. When the bill—amended—went back to the House, it was strenuously objected to by Mr. Mondell, of Wyoming, who invariably and consistently opposes every measure looking toward the protection of any living thing whatever by the

Federal Government. Notwithstanding the fact that the Legislature of his own State had passed a strong resolution, requesting Congress to act favorably on this bill, Mr. Mondell fought the measure hard, and declared that he knew his people too well to believe that his Legislature was advised of the character of what was proposed.

Mr. Weeks strongly urged the passage of the bill, as did Mr. Edwards, of Georgia; Mr. Kahn, of California, and Mr. Anthony, of Kansas. Other gentlemen spoke against the bill taking up the question of its constitutionality, and there was a more or less extended debate, which fills six pages of the Congressional Record.

Finally the House disagreed with the Senate amendments and the bill was sent to conference.

On Sunday the conference committee discussed it at great length, with the result that the section was retained, and at 6 o'clock on Monday the President signed the measure.

Speaking of the time and energy required to get a bill passed by Congress, a representative of the association says:

"Since we first started work on this, we have sent over 20,000 letters requesting people to write their Congressmen endorsing the measure and send us copies of the replies, so that we should know where each member of Congress stood. In this way we have had them all put on record, either for or against the bill, and have been able to concentrate our efforts where they were most needed. We have been represented in Washington nearly all the time during this and the last sessions. We collected evidence of favorable public opinion from every State in the Union in order to show it to Congressmen. At the hearings, held March 6 last year, we presented favorable evidence from forty-four States. The measure was enthusiastically backed in every section of the country and the Southern support was convincingly strong."

The following clubs have aided in putting the measure through by sending representatives to Washington: Camp Fire Club of America, National Association of Audubon Societies, Boone and Crockett Club, New York Association for the Protection of Game, New York State Fish, Game and Forest League, Long Island Game Protective Association, Maryland State Game and Fish Protective Association, Clark County, Ohio, Fish and Game Protective Association, Game Protective Association of Virginia, Massachusetts Fish and Game Protective Association, Massachusetts Gunners' Association, Georgia Game Protective Association, Vermont Fish and Game League, West Virginia Fish and Game Protective Association and Rhode Island League of Improvement Societies.

All the State game commissioners have endorsed the movement. Those who came to Washington to advocate it in person were: John D. Moore, State Game Commissioner, and Llewellyn Legge, Chief Game Protector, of New York; John W. Titcomb, of Vermont; Dr. George W. Field, of Massachusetts; J. F. Ran-

kin, State Game Commissioner, and John C. Speaks, Chief Game Warden, of Ohio; Dr. Frank H. Davis, and E. Hart Geer, of Connecticut; Edward G. Bradford, Jr., of Delaware; and John H. Wallace, Jr., of Alabama.

Many other men of prominence visited Washington to urge the passage of the bill at the hearings. Among them are: Charles Sheldon, M. D. Hart, of Richmond, Va.; Charles J. Campbell, John Burroughs, Ernest Thompson Seton, Marshall McLean, Ottomar H. Van Norden, L. T. Christian, Talbot Denmead, William C. Adams, John C. O'Connor, Salem D. Charles, T. Gilbert Pearson, Louis E. Bauer and George A. Lawyer.

Most valuable service was rendered by Charles S. Davidson, Dr. William T. Hornaday, Henry F. Osborn, Madison Grant, Frederic C. Walcott, Archibald Henderson, W. B. Mershon, George Shiras, 3d, Col. W. G. Sterrett, William Brewster, E. T. Grether, Sidney G. Fisher, Matt C. Hoover, C. H. Wilson, Nathan Hanford, John C. Phillips, Dr. Joseph Kalbfus, Ernest Napier, F. M. Newbert and C. K. Cranston.

## Connecticut Nature Notes.

PACKER, Conn., Feb. 21.—*Editor Forest and Stream:* The ground is nearly bare of snow again, and conditions very favorable for our quail. They have suffered none through snow or cold thus far, and seem as happy and vigorous as in the good old summer time. Skunk and fox hunters report seeing bevs almost full size, and I have seen a bevy cross my lawn a full dozen strong and the tracks of larger bevs nearby. They ought to go through without trouble now, and they are surely more abundant than at this season for many years.

One of my friends had an odd experience during the hunting season. He was hunting partridges (ruffed grouse) and heard some animal squealing in a stone wall. He investigated and found a rabbit with a weasel in death grip, sucking his blood. He pulled the rabbit out, the weasel not releasing his hold, so he killed both.

The following items appeared in a local daily of the 18th instant:

With full streams and a mild winter the trout season ought to be good from the very start this spring.

SOLVING THE COST OF LIVING.—On Saturday 112 good sized eels were speared by Henry E. Davis at the drawbridge and on Thursday he secured ten pickerel and two perch at a Taftville pond. When Mr. Davis wants a few bushels of clams or oysters he goes to Waterford cove and gets a supply. He claims that with a little work and nature study a man can keep himself supplied with game and fish.

E. P. ROBINSON.

## Ducks Wintering North.

OWEGO, N. Y., Feb. 24.—*Editor Forest and Stream:* Since the spring and winter shooting of wildfowl has been closed in New York State, a great many ducks and even geese winter about the spring water lakes and streams in Central New York and the southern tier counties.

The severe winter of 1912, however, closed up many of the lakes and streams which seldom freeze, thus shutting off thousands of ducks from their feeding grounds. These were obliged to collect in large numbers in the small open spring holes where, in their half-starved condition, they became an easy mark for the pot hunters. The State officials were on the job, however, and secured many convictions for this illegal killing. As the ducks were in such large numbers, and the open water so small, the food was soon exhausted, and perhaps all would have starved in this section had it not been for the American Game Protective and Propagation Association, the Tompkins County Fish and Game Protective Association, the Owego Rod and Gun Club and others.

Members of these game protective associations purchased food and saw that the birds were fed regularly until the water opened. The notable places where this work was done were Cayuga Lake near Ithaca and the Susquehanna River near Owego.

In these places thousands of ducks were fed and no doubt thousands were saved from starvation. The birds got to look for their food daily like a flock of chickens, and became so tame they would even eat while food was being distributed.

This winter has been so very open, there has been no need for feeding the birds, as there is plenty of food in the open water. While the ducks are pretty well scattered, it is pleasant to note that there are many more wintering with us than usual. Among them are nearly every variety that visit us at any time of the year. Yesterday I saw a lone goose flying low over the village of Owego and in the direction of the river. I afterward learned that there are quite a number on the river near here.

In the afternoon I took a walk along the Owego Creek and the Susquehanna. I saw a large number of ducks. Among these were mallards, blackducks, hooded mergansers and sheldrakes. The mallards and blackducks were feeding in pairs in the little coves along the banks, which proves without a doubt that they are already mated.

One pair of blackducks came flying very close to me, the drake talking softly to his mate, and I wish I could have known what he was saying. They settled within a few feet of me, the drake alighting. At this moment his mate looked my way, saw me, took fright, and flew up the river. The drake could not understand this, and he quacked angrily. The duck soon answered him from up the river, and must have told him of his danger, for he left the water suddenly and joined his wife.

The gunners along the Susquehanna River rarely get an opportunity to shoot ducks, as they nearly all skip us on the Southern migration.

The sportsmen are pretty well educated to the fact that ducks should not be killed in the winter or spring, and are willing to go to a distance for their shooting or forego it alto-

gether in order to protect the ducks properly.

It is only when legislation is proposed such as Long Island is now asking for that a certain element here clamors for the same privilege.

The better class of sportsmen, however, are very much opposed to winter or spring shooting in any part of the State, and have entered a strong protest against the Long Island bill.

P. S. FARNHAM.

## The Hair Rope Myth.

BY CHARLES STUART MOODY.

THE rôle of the iconoclast is never an enviable one. The man who upsets ancient beliefs and demolishes hoary-headed superstitions must expect the anathema of the unthinking. Those timid souls, for instance, who fatuously stretch a hair rope about their bed at night when in a rattlesnake country, under the blissful belief that the bristles on the rope will tickle his snake-ship's belly and discourage his desire to occupy the same bed with the sleeper, will be pained to learn that their precaution is useless. A moment's reflection, however, will probably serve to convince them that were a hair rope adequate, all keepers of reptilian collection need do would be to stretch a hair rope around their charges and thus avoid the manufacture of expensive cages.

It would prove interesting could we trace the origin of the "hair rope myth." Who first advanced the idea that a rattlesnake would not cross such a rope lying on the ground? I can recall a time when I had implicit faith in the remedy. True, I had never tried it, not being afraid of snakes, but some wise person told it to me, and I never presumed to question it. My credulity had its first severe jolt when traveling across a country infested with rattlesnakes in company with a band of Indians. Their picket ropes, pack ropes, in fact all their cordage was of hair woven by the Indian women. If there were virtue in the hair rope stunt, beyond question the Indian would know it and make use of it. They did not, however, nor did any of them report a crotaline bedfellow. My next jolt was on the same trip. My cayuse (a cayuse is an Indian bred horse) was picketed near the cañon rim of the Columbia River, a country where an industrious man can go out and gather a mess of rattlesnakes in fifteen minutes. On my way out to fetch in my mount I saw a large aldermanic rattler lying on a flat rock sunning himself. "Now," thought I, "is the opportunity to test the hair rope." I loosened the picket rope, tied the horse by the halter to a sage brush, and coiled the rope around the rock and around the snake. I stood off some distance and threw rocks at the snake until he awoke and protested against the disturbance, slid off the rock and crawled unhesitatingly over the rope.

On the assumption that "one swallow does not make a summer," I took occasion to try the experiment again. The result was the same; the snake did not tarry, but got him hence.

I sincerely regret being obliged to deprive people having a dread of snakes of their consolation, but candor compels me to insist that a twine string would be as effective and far less bulky. It is a popular belief that nothing delights a rattler more than to occupy the blankets with a human being. I have spent several years on the Western cattle ranges, and not a few in

Western military camps, in localities where rattlesnakes were common, yet I have the first instance to find of where a snake crept into bed with a person. The rattlesnake is of a somewhat retiring disposition and does not court human society to the extent of looking up one for a bedfellow. In the old cattle days it was not unusual to find a rattlesnake curled up in the warm ashes upon arising in the morning. The presence of the serpent there could be accounted for not on the assumption that he was seeking human companionship, but that he came along during the night hunting a warm place to roost, found the hot ashes and bunked down exactly as he might have curled up on a sun-warmed rock or bed of sand.

During our recent military march across the country east from San Diego, Cal., it was not unusual to get up in the morning and find a "sidewinder" occupying the tent. During this march, however, the enlisted men slept in shelter tents on the ground and none of them reported an uninvited guest.

While I have been compelled to take away the fancied protection of the hair rope, the devotees of that device may console themselves that the chances of a rattlesnake getting into bed with them are about one to infinity.

## The Louisiana Bird Season.

NEW ORLEANS, La., March 5.—*Editor Forest and Stream:* Hunters here and throughout Louisiana, after a winter of good shooting, are putting in their time now on teal and snipe. Feb. 28 was the last day of the open season on most species of game birds and animals, but fishing is coming in in fine style, and will last until the shotgun and rifle season opens again in the fall. The season on trapping closed Feb. 1.

The game birds to which the protection of the law is extended after March 1 are doves, woodduck, river and sea duck, geese, brant, rail, curlew, plover, Florida duck, black mallard and quail. The Conservation Commission is taking special pains to enforce the game laws this year and prosecutions of all violators seem certain.

The season on woodcock and seagulls closed Feb. 1, and there is a ban on the killing of prairie chickens, killdeer, pheasants and wild turkey hens until December, 1915. The only game birds which may be killed now, and these only until April 1, are wild turkey cocks, teal duck, sandpipers and snipe. The closed season for all game birds except the red-wing black-bird, which is considered "game" down here, goes into effect April 1.

Spring snipe shooting is a feature of outdoor life in this section, the fields are turning green, the air is balmy and the sun just warm enough to make it a joy to be alive and afield.

H. H. DUNN.

To our mind, says the Yarmouth (Mass.) Register, there is no class of reading so fascinating as that which deals intimately with the life and habits of the denizens of the wilds. The energetic beaver is one of these interesting creatures. This wonderful animal is almost human in its intelligence. "The Tenants of the Iron Barrier" in last week's FOREST AND STREAM, will give you a close view of the beaver's activities. It is written by Robert Page Lincoln. This old-established and popular weekly keeps its place in the front rank of publications devoted to outdoor life. No sportsman's reading table is complete without FOREST AND STREAM.

**Anglers' Tournament.**

THE tournament held at the Madison Square Garden during the Sportsmen's Show was not patronized as well as had been expected, nevertheless it furnished a great deal of interest. At the time of going to press only eleven of the twenty-one events scheduled have been run, therefore balance of scores will be given in our issue of March 15. No records were broken, but good scores were made in several events. Excellent judging was done by R. R. Eichlin and W. McGuckin, while the work of referee J. Glaister was a model.

Event No. 1. Trout fly-casting for distance, five-ounce rods, 70-foot class: Open to all except those who have cast over 70 feet in any open or club tournament with a five-ounce rod.

**Fishing in California.**

BY GOLDEN GATE.

It was anticipated that early in the year some splendid steelhead fishing would be in order on the Russian River, but just about the time that the stream cleared, following the rain in December, another heavy storm occurred, and it will probably be several weeks before good sport will be enjoyed there. The stream is now muddy and at high-water mark, with considerable snow in the mountains, so that the indications are that winter sport there is at an end.

The run of steelhead reported in the Santa Ynez River proved to be an exceedingly small one, according to those who made the trip there in search of sport. There was but little water in the stream and fishing was out of question. Some fair sport has been enjoyed of late closer to home, the Tunitas lagoon yielding several fine baskets of fish. Ralph Fusier recently fished there with excellent results, taking thirty-nine fish one day, the largest of these weighing 3½ pounds.

Bad weather has kept the striped bass fishermen from the sloughs of late, but those who braved the storm met with fair results. A 40-pound bass was taken at San Antonio a few

days ago by J. Christensen and a 25-pound fish was taken at Wingo.

Anglers are interested in the report of John O. Snyder, of Stanford University, to the effect that a new variety of trout has been found in Lake Tahoe, this having been given the name of royal silver trout (*Salmo regalis*). Several of these fish have been taken in the lake near Brockway. The dorsal surface of the fish is of a deep steel-blue, this color extending downward almost to the lateral line, where it suddenly ends, giving place to a brilliant silver. This silver color pales on the ventral surface, and the abdomen, throat and chin is a pure white. A few dark spots are on the caudal and dorsal fins, while on the cheek there is a trace of red and yellow.

**Amazon River Turtles at the Aquarium.**

THE steamship Clement of the Booth Line brought to the Aquarium recently four specimens of the giant fresh water turtle of the Amazon River (*Podocnomis expansa*), the gift of the New York Zoological Society. These were secured at Manaus, Brazil, nearly 1,000 miles up the Amazon River, and were eighteen days en route on the steamer.

This is the largest species of fresh water turtle, the shell of an adult female being three feet in length. The males differ markedly from the females, being much smaller and more rounded. In spite of their large size, these turtles are entirely harmless and feed almost entirely on vegetable matter. They form a valuable food supply to the inhabitants of the Amazon region.

The eggs for many years formed the basis of a unique industry at the laying time, graphically described by Bates in his book, "The Naturalist on the Amazon River." The eggs contain a large amount of oil which is rendered out and used for food, for illumination and for various other purposes. Bates estimated that, in 1850, forty-eight million eggs, the product of 400,000 turtles, were taken. This wasteful process has depleted the supply of turtles, as might have been anticipated, so that the industry has been practically wiped out.

This species belongs to the group of side-necked turtles which loop the neck sidewise in withdrawing it under the shell for protection. It is an excellent swimmer, the feet being paddle-like and broadly webbed.

This turtle has never been exhibited at the Aquarium, and to the best of our knowledge has never been seen before in New York.

# ARCHERY

Forest and Stream is the official organ of the National Archery Association.

### Scoring by Points in Archery.

CHICAGO, Ill., Feb. 6.—*Editor Forest and Stream:* I recently sent you a symposium on the point system of scoring. Since then I have received the following letter from Will H. Thompson, of Seattle. Nearly every archer knows that Mr. Thompson was the leader in organizing the National Archery Association in 1879. He has since been devoted to its interests and five times he has won the national championship.  
EDWARD B. WESTON.

"I am sorry to know that you are thinking of reviving the old controversy over the 'point system,' as it can do no possible good, and can do much harm.

"In England they wrangled over it for thirty years and finally abandoned it for two years in favor of gross score, and then came back to it gladly, and have ever since clung to it. We abandoned it for one year—1880—at Buffalo, when Peddinghaus won a gross score, though I should have won on points, having hits and score at 100 yards, hits and score at 60 yards and gross hits, 6 points in all, to his 4 points. We changed back to points by a unanimous vote, after the most elaborate discussion.

"We came near wrecking archery at one time over the attempt to change the value of the colors on the target to 1, 2, 3, 4 and 5. The Eastern Archery Association adopted the silly change for no real scientific reason whatever, as the real value of the colors are nearer 1, 3, 5, 7, 9, than 1, 2, 3, 4, 5. In fact, 1 and 9 are right, 3 nearly right, and 5 and 7 quite wrong, especially 7. But what matters it? It gives all the same chance. Archery is an old game, doctor. The halo of age is about it. Its history is half its glory. Its old usages plead for life. The British have kept it alive through years and years of cannon and musket. Why not stay with them in all these little details that do no one wrong? A few years ago B. P. Gregson won the British medal with tenth score. A big furor ensued. Everybody irate. But finally a fine, calm, scientific article demonstrated his actual superiority in the contest. The ten scores were close, only a few points between lowest and highest. Gregson had gross hits by a pronounced margin. He had hits at 100 yards (the most difficult range) by a strong lead. He was only beaten one hit at 80 yards by one of the ten. He was second in score at both 100 yards and 80 yards, and so he deserved the medal over the fellow who by a few lucky golds and reds got gross score. Of course, any system will show wrong in individual cases, but on the whole one is about as good as another. But stability is best of all. We are at one with the English in this old, old pastime in all things save one, and in that they are right and we wrong, and that is in shooting both ways at targets. Everything is in favor of their system and naught against it. The red ring should

count 3 if the gold counts 9, yet why change? Your red and mine counts as much as Phil Bryant's, doesn't it? I lost one medal in 1880 because 'points' were abandoned, and I won the medal on points in 1888 though Maxson scored 739 to my 733. So I'm even. Don't let us muddy again the clear stream of archery that now flows deeper, cleaner and stronger than for many years.

"There is nothing to be gained. Such little, annoying things as the loss by rebounding arrows are far more important. They unnerve and exasperate."  
WILL H. THOMPSON.

### Present Means of Scoring.

BY JAMES DUFF.

I AM rather surprised to see that old bone of contention, method of scoring, come up again and to see such wholesale condemnation of the system as has appeared of late on the subject. It would seem to me that the time is ripe for taking the matter up seriously and trying, at least to amend, if not to totally alter, the point idea to something that would give some kind of satisfaction. Unlike our British friends in the sport of archery, we are scattered over so vast a territory that it is a difficult matter to see how a meeting could be convened to give the full discussion this and other matters should really have. But in the matter of publication, America by far excels anything that Britain can show as pertaining to archery; that after all it is delightful to be able to subscribe to such a work as FOREST AND STREAM where one can and does have all that is latest and best, and to know that if a lead is on one's mind, he has only to tell his troubles to the editor of FOREST AND STREAM in letter form, knowing that full publication will be given with every possibility of receiving some comfort and probably fresh loads of sound advice and ideas from the many archery readers.

Many of us know that the present means of scoring are entirely wrong, but inasmuch as we don't belong to the class that is affected by it, we give little attention to the subject.

Coming from Boston last August I was asked by an archer in the novice stage how I worked it out that Mr. Wills won second place in the York rounds, when Mr. Richardson seemed to be as good a shooter by scoring 196 hits to Wills' 195 hits, which looked as though the difference in score should be about balanced. Working it out on a per cent. basis, I was surprised to find the following result:

	Hits.	Possible.	Wills, Per Cent.	Richardson, Per Cent.
Wills	195	288	67 17-24	
Richardson	196	288		68 1-18
Score.				
Wills	885	2592	34 31-216	
Richardson	860	2592		33 29-162
Totals			101 69-81	101 19-81

Showing a win for Mr. Wills by a narrow margin, but still an undisputed win on merit.

Taking the same method of scoring and applying it to two questions asked by Drs. Elmer and Hertig, respectively, which shows that—

ELMER'S QUERY.

	Hits.	Possible.	A, Per Cent.	B, Per Cent.
A	90	90	100	
B	10	90		11 1-9
Score.				
A	90	810	11 1-9	
B	90	810		11 1-9
Totals			111 1-9	22 2-9

HERTIG'S QUERY.

	Hits.	Possible.	Jiles, Per Cent.	Hertig, Per Cent.
Jiles' end	6	6	100	
Hertig's end	2	6		33 1-3
Score.				
Jiles	12	54	22 2-9	
Hertig	14	54		25 25-27
Totals			122 6-27	59 7-27

While this method may not be acceptable to us, it seems to me to show that there is a great lack of certainty in our present means of scoring, as there are very few archers scored on their actual merits, unless it be done by the P. Bryant method, namely clean up the slate and "mak siccar."

### The Mystery of Sleep.

It is impossible to give any precise explanation of the phenomenon of sleep. Yet, says Harper's Weekly, many theories have been advanced. Legendre has shown by fairly conclusive arguments that it is due neither to "brain pallor," nor to intoxication by carbonic acid, nor to the presence of narcotic substances in the blood, theories that have been in turn advanced. Legendre intimates his preference for the view that sleep is not the result of fatigue, but is an inherited instinct designed to protect the organism against the ill effects of fatigue.

### Equality.

BY JAMES E. RICHARDSON.

WHEN fifty bowmen, straining all arow,  
Vary no finger's breadth in arrow-flight;  
When down the stadium ten runners go,  
And first to choose defieth all men's sight;  
When yew and olive tree give bow for bow,  
And star and lesser star yield equal light;  
When maids of one birth-morn are all so fair,  
That none in visible degree surpass  
In gifts of grace—bright eyes and shining hair;  
When weights of lead and gold give mass for mass;  
When the high gods shall answer every prayer,  
And each man's auspices come forth to pass;  
In that—and in no earlier—hour shall ye  
Wail fitly through the market-place, "Equality!"

### THE OBJECT OF THIS JOURNAL

will be to studiously promote a healthful interest in outdoor recreation, and to cultivate a refined taste for natural objects.

—FOREST AND STREAM, Aug. 14, 1873.

### GOOD NEWS FOR THE COUNTRY.

FEDERAL protection of migratory birds is now the law. The measure, after passing the Senate by a vote that was practically unanimous, went to the House, where it was locked up in the room of the Committee on Rules with no apparent prospect of being reported during the last hurried days of the session. However, the bill was finally attached as a rider to the Agricultural Appropriation bill, and in that form passed both Houses of Congress.

This is an enormous victory for the protection of wild life, and ought to add hundreds of millions of dollars to the productiveness of the United States, to say nothing of America at large. If Senator Root's resolution, calling for an international commission to consider the general question of protection of migratory birds by the different Governments of North America, should be favorably acted on, the result will be of incalculable benefit to this continent.

In the Senate Committee's report on the McLean bill, issued last spring, the whole matter was tersely put in the following language: "All \* \* \* the evidence goes to demonstrate the existence of a natural economic relation between these three orders of life (vegetation, insects and birds). There is a sort of interdependence, and the existence of each one is dependent on the existence of the other. But for the vegetation, the insects would perish; but for the insects, the birds would perish, and but for the birds, the vegetation would shortly be destroyed by the unchecked increase of insect destroyers."

That both Houses of Congress should have acted favorably on this measure shows better than anything else how earnest and vigorous has been the campaign of education carried on by

bird protectors all over the land. Individuals have urged the matter on their representatives in Congress. Associations have done the same and have appeared before Committees of Congress in behalf of the measure. Newspapers have presented the case in all its forms, and of all the newspapers FOREST AND STREAM was the first to take up the subject.

Hon. George Shiras, 3d, introduced the first bill in Congress and wrote a splendid brief on it. He was the pioneer. The most effective, because most direct, work done in behalf of the matter was that carried on by the American Game Protective and Propagation Association, under the direction of John B. Burnham, its president. There has perhaps never been a more effective presentation of any subject bearing on game protection than was given at the hearings held March 6 last, before the Senate Committee on Forest Reservations, and the Protection of Game, and the House Committee on Agriculture, at Washington. We have more than once pointed out the importance of that hearing, and called attention to the splendid work done by Mr. Burnham, Mr. Haskell, Mr. Faylis and others in this connection. It is to the energy and industry displayed by this association that the passage of the bill at this time is chiefly due.

### THE COMING CHANGE.

THE calendar tells us that spring has come, but as yet we must accept this on faith. To the average man the only physical evidence of its arrival is that in the middle of the day the sun has more power than a month or two ago.

The sodden fields still lie bare and brown as they have since the storms of November, and the naked trees stretch their gray branches toward the sky and wave in protest against the winds of March as they did against those of December.

Nevertheless, the change is at hand. Though in our walks abroad we still see only winter birds and hear only winter sounds.

Down by the warm springs the grass is fresh and green, looking brighter now than it will look two months hence, because of its present contrast with the universal gray. In the swamps the shining purple hoods of the skunk cabbage are two or three inches above the ground or the water, and hidden in each hood is the stalk already covered with tiny flowers. The most abused of our wild plants, the skunk cabbage is nevertheless the earliest of the spring flowers.

Soon the increasing strength of the sun will stir the warm earth, and all over the meadows the grass will begin to start. Long before the flowers come or green grass, we shall see the earliest migrants, the robins and phoebes, the forerunners of a host that will reach the height of its abundance in early May.

In the good old times when there were woodcock, one might go out at night a little later and listen to the voice of this long-billed songster, as, high in air, he talked to his mate below, and strove to out-sing his rival from the next swamp. Nowadays, it is only in especially favored localities that one may hear the mating call of the woodcock.

The angler is now preparing his tackle for use on the warming brooks, and before long will

be afield, whipping the streams—perhaps frozen—as he has whipped frozen streams in years gone by, but at least having the joy of feeling the limber rod once more in his hand.

May his first catch be a good one.

### A HARE RAISING FAD.

A FUROR for raising Belgian hares swept over the United States about fifteen years ago and ceased almost as rapidly as it began, partly no doubt because it passed into a fad for raising fancy stock for exhibition purposes. In some instances, however, the business has prospered, and during the past year, partly perhaps as a result of the high price of meats, there have been numerous signs of awakened interest in the industry. The Belgian hare is prolific, easily raised, little subject to disease when properly cared for, and its flesh is nutritious with an excellent flavor. There would seem to be no good reason why farmers and others having the necessary facilities should not engage in raising these animals both for the purpose of providing meat for home consumption as well as for the market. At twenty cents per pound, which the meat readily commands in the local markets, there should be a safe margin for profit. Moreover the meat is becoming more and more in demand by the hotels and cafés in the cities as the popular knowledge of the value of the succulent meat is increased. There have been many inquiries made to the Biological Survey of the Department of Agriculture relative to the means and methods of raising Belgian hares, and to meet this demand the Department has prepared a circular letter giving the essential facts in relation to raising these and other domesticated rabbits.

### IMPORTING GAME BIRDS.

THE importance of regulating the importation of foreign birds was exemplified in a striking manner during the past season at the time of the outbreak of a highly infectious quail disease, which spreads with great rapidity. When the disease was originally discovered by the Bureau of Animal Industry of the Department of Agriculture in 1907, large shipments of birds were being made from the West and Southwest. The infection was carried from Central Alabama and Southern Kansas northeastward to many points, even as far as Nova Scotia, and attempts to check the disease proved unavailing. During the past year, on account of the scarcity of birds, nearly all of the stock used for propagating purposes was imported from Mexico, and such shipments came directly under the control of the Department. The total importations from Mexico was 7,770 quail. Immediately upon the discovery of the disease in February all importation from Mexico was suspended by the Department, and prompt information concerning the dangers of infection was furnished to the importers and shippers with the result that the disease was discovered and confined to five or six places in Missouri, New Jersey, District of Columbia, New York and Connecticut. So far as could be ascertained by the Department, the disease did not spread beyond these points, and the malady was soon eradicated.

# YACHTING

Forest and Stream will give a weekly digest of Yachting and Motor Boating events from all over the country.

## St. Augustine P. B. A.

ST. AUGUSTINE, Fla., March 3.—The power boat races of the St. Augustine Power Boat Association will be the first of this year under the sanction of the American Power Boat Association when its new rules will be tried out. The races will begin on March 21. Charles F. Hopkins, of the St. Augustine Club, will be in charge and he also will manage the three-day regatta at Cocoa, Fla., on March 18, 19 and 20. The Cocoa regattas also are sanctioned by the national association, and this association is growing fast in strength, and it will do much this year to improve the sport of motor boat racing.

It is very probable that some reform is to be made in the title of races. So far championship events have taken place wherever there have been motor boat races. Each club or association that has been able to offer some valuable prize has called it a championship race, and often it has been called a world's championship. The result has been that each season there have been several world's champions. It is probable that when this matter is taken under discussion, a championship for each section will be allowed, with the understanding that there can be only one race each season for the championship, and the governing committee of the section shall designate the club to hold the championship event.

For national championships there can be only one race in the country each season, and that is at present under the auspices of the National Association of Engine Boat Manufacturers and this year will be held at Put-in-Bay. That association offers trophies to be raced for each year, one for an international championship and one for a State championship. These prizes are held by the winner for one season and then must be defended or returned to the association.

The British international trophy is really the only recognized international championship event. That contest arouses an immense amount of enthusiasm each season, and this year will be no exception. It is possible that a limitation may be placed on the value of prizes offered except in special regattas such as those to be held next summer in connection with the Commodore Perry celebration, or those to be held in connection with the Panama Exposition at San Francisco in 1915.

## Yachts Change Hands.

THE Hollis Burgess yacht agency has sold the 25-foot racing sloop Tiger, owned by George E. Carroll, of the South Boston Y. C., to Dr. B. F. Curtis, of Scarborough-on-the-Hudson, New York, who will use her along the Maine coast this season; and the 35-foot waterline cruising yawl Narcissus, owned by Charles O. McClintock, of Portland, Me., to Dr. Coleman Tousey, of Boston. Also the catboat Twinkle,

owned by Arthur Perrin, of Brookline, Mass., to Frederic Cunningham, of Longwood, Mass.

## Port Washington Y. C.

THE Port Washington Y. C. has adopted a new design for its burgee. A predominant white star set in a blue background, framed in a red triangle makes up the very tasteful flag. The authors of the new burgee deserve credit for originality and artistic judgment.

## Canoeing

### New York C. C.

THE New York Canoe Club is making plans for an energetic defense of the international challenge cup for which a challenge has been received from Ralph B. Britton, of the Gananoque Canoe and Motor Boat Club, and with the object of insuring the success of the trial races and the cup races to follow, has invited several of the most prominent men in the sport to act with the regatta committee of the club. Announcement will be soon made of the names of those in charge of these events, and full information will be given in regard to the conditions of the trial races which at a recent meeting of the trustees of the New York Canoe Club it was decided should be held in connection with the Atlantic Division meet at Staten Island if agreeable to the Division officers.

At the annual meeting of the club, subscriptions were opened for two syndicate boats to take part in the trial races, and it is expected with the enthusiasm which the challenge has created in canoeing circles that at least twenty-five boats will compete in these races. Owing to the large number of boats moored near the New York Canoe Club, which would seriously interfere with laying out a clear course, the cup races will probably be held off the grounds of the Marine and Field Club during the week following the meet, in connection with the annual regatta of the New York Canoe Club which will include a program of paddling and other events. This will enable those who desire to enter to have their boats shipped to the New York Canoe Club from Staten Island after the close of the meet, and from there direct to Sugar Island, which will greatly reduce the expense of transportation.

### Winona C. C.

WINONA, Minn., Feb. 27.—A canoe club, with twenty-five members, was organized here to-night. The club will be affiliated with the A. C. A., comprising clubs at St. Paul, Minneapolis and Duluth. William G. Cartlich, Secretary of the Y. M. C. A., is local organizer. The activities

will be carried on at Lake Winona, an ideal body of water for the canoeists, and carnivals will be held annually. The club plans to participate in the State club's activities.

## A. C. A. Membership.

### NEW MEMBERS PROPOSED.

Eastern Division.—George H. Holland, 49 Sheridan street, Jamaica Plain, Mass., and James C. McFarlane, 6 Dalrymple street, Jamaica Plain, Mass., both by Robert F. Kelly.

Western Division.—Waldemar R. Petersen, Dundee, Ill., by T. C. Angell; Joseph L. Gillson, 706 Forest avenue, Wilmette, Ill., by Arthur E. Sunny; Carl G. Gruner, 607 Elm street, Rockford, Ill., by R. E. Penfold; Eugene Miller, 1621 West Division street, Chicago, Ill., by Henry Bergholtz; Edwin H. Tyron, 539 Ryerson avenue, Elgin, Ill., by H. L. Boynton.

### NEW MEMBERS ELECTED.

Atlantic Division.—6612, Howard Adthead, 1752 Margaret street, Frankford, Philadelphia, Pa.

Central Division.—6610, Joseph A. Banks, Clifton Springs, N. Y.

Western Division.—Herbert S. Inbusch, 315 Farwell avenue, Milwaukee, Wis.

### RESIGNATIONS.

Eastern Division.—5258, Leonard D. Sherman, Andover, Mass.; 5712, Leon S. Sanders, Auburn, R. I.

## How the Sap Rises.

How the raw sap travels from the absorbing roots beneath the ground to the topmost twig on an oak or elm tree, more than one hundred feet above, and to nearly four or five times that height in the case of some of the mammoth gum trees (eucalyptus) of the Tasmanian forests, and in the gigantic Wellingtonia of California, has long puzzled the physicist to explain. The old idea that capillarity is the factor at work, the fluid being conveyed up the trunk and branches after the manner of oil through the wick of a lamp, becomes an altogether inadequate explanation, says the Strand. Especially is this so when we realize that in some of the internal tissues of the stem the pressure exerted reaches from eight to twenty atmospheres, or in other words from 120 to 300 pounds to the square inch—a force greater than that in the boiler of a normal railway engine.

This mighty pressure, scattered more or less irregularly through the tissues of the tree, drives the sap to the buds and forces them open, expands their leaves, and is continually at work wherever the process of building new structures is going on. It is obvious, therefore, that the engineering arrangements for the conducting and controlling of this powerful stream of life-giving sap must be very perfectly organized. Indeed, they are more than that; they present marvels of mechanical construction which are not only astonishing on account of their perfection, but are so minute that man can only penetrate the mysteries and beauty of their structure by means of high-power microscopes and careful chemical investigations. Even then he is left baffled and wondering.

# TRAP SHOOTING

## Fixtures.

If you want your shoot to be announced here, send a notice like the following:

### REGISTERED TOURNAMENTS.

March 25-26.—Birmingham (Ala.) G. C. O. L. Garl, Sec.  
 April 8-10.—San Antonio, Tex.—The Interstate Association's Southwestern Handicap, under auspices of the San Antonio Gun Club; \$1,000 added money. Winner of first place in the Southwestern Handicap guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. E. E. Shaner, Mgr., Pittsburgh, Pa.  
 April 9-10.—Lincoln, Neb.—Capitol Beach G. C. T. C. Brownfield, Pres.  
 April 10.—Atglen (Pa.) G. C. Lloyd R. Lewis, Mgr.  
 April 14-16.—New Orleans, La.—City Park G. C. J. M. Lionnet, Mgr.  
 April 16.—Mt. Holly (N. J.) G. C. A. J. Dellelto, Sec'y.  
 April 17.—Syracuse, N. Y.—Messina Springs G. C. W. E. Hookway, Sec'y.  
 April 17-19.—Hot Springs, Ark.—Arkansas State tournament, under auspices of Hot Springs G. C. H. A. Whittington, Sec'y.  
 April 19.—Lawrence (Mass.) Fish and Game Protective Association. A. C. Gray, Sec'y.  
 April 23.—Grundy Center (Ia.) G. C. Frank W. Callaway, Sec'y.  
 April 23-24.—Wellington, Mass.—Paleface Shooting Association. Walter F. Clarke, Pres.  
 April 23-24.—Brantley (Ala.) G. C. A. H. Hill, Pres.  
 April 24.—Maysville, Ky.—Mason County G. C. Wm. H. Hall, Mgr.  
 April 26.—Pottstown (Pa.) G. C. C. A. Fries, Sec'y.  
 April 29.—Guernsey, Ia.—Du Pont G. C. J. W. Dobbins, President.  
 April 29-30.—Moberly (Mo.) G. C. J. A. Melton, Sec'y.  
 April 29-May 1.—Pond Creek, Okla.—Oklahoma State tournament, under auspices of Pond Creek G. C. Wm. M. Hite, Mgr.  
 May 1-2.—Philadelphia, Pa.—Keystone Shooting League. G. F. Hamlin, Sec'y.  
 May 3.—Rittersville, Pa.—Lehigh R. and G. C. H. F. Koch, Sec'y.  
 May 3.—Bethel, Conn.—Western Connecticut T. S. L. tournament, under auspices of Bethel G. C. C. K. Bailey, Sec'y.  
 May 4-5.—Columbus (Neb.) G. C. G. A. Schroeder, Sec.  
 May 5-6.—Laramie, Wyo.—Gem City Gun Club. Tyler A. Rogers, Pres.  
 May 6.—Vicksburg (Miss.) G. C. J. J. Bradfield, Mgr.  
 May 6.—Pitcairn, Pa.—Western Pennsylvania T. S. L. tournament, under auspices of United G. C. Louis Lautenslager, Pres.  
 May 6-7.—Eagle Grove (Ia.) G. C. A. L. Yearous, Sec.  
 May 6-7.—Montpelier (Vt.) G. C. H. B. Moulton, Pres.  
 May 8-10.—Hutchinson, Kan.—Kansas State tournament, under auspices of Hutchinson G. C. Chas. T. Rankin, Sec'y.  
 May 7.—Seneca Falls (N. Y.) G. C. C. L. Frantz, Mgr.  
 May 7.—Hicksville (O.) G. C. C. E. Maxwell, Sec'y.  
 May 7-8.—Dayton, Ky.—Northern Kentucky G. C. H. R. Irwin, Mgr.  
 May 7-8.—Americus, Ga.—Georgia State tournament, under auspices of Americus G. C. J. W. Hightower, Pres.  
 May 7-8.—Sunbury, Pa.—Sunbury-Selinsgrove G. C. J. W. Schoffstall, Sec'y.  
 May 8.—Watertown (Wis.) G. C. B. H. Rieck, Sec'y.  
 May 8-9.—Kankakee (Ill.) G. C. E. F. Radeke, Sec'y.  
 May 9.—Portage (Wis.) G. C. J. Raup, Pres.  
 May 10.—Marysville (Pa.) S. A. M. L. Wise, Vice-Pres.  
 May 12.—Mt. Airy (Md.) G. C. Ira D. Watkins, Sec'y.  
 May 12-13.—Portland (Ore.) G. C. J. E. Cullison, Pres.  
 May 13-15.—York, Pa.—Pennsylvania State tournament, under auspices of York City G. C. N. M. McSherry, Sec'y.  
 May 13-15.—Montgomery, Ala.—Interstate Association's eighth Southern Handicap tournament, under auspices of Capital City G. C.; \$1,000 added money. Winner of first place guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. Elmer E. Shaner, Mgr., Pittsburgh.  
 May 14.—Tyndall (S. D.) G. C. F. F. Chladek, Sec'y.  
 May 14.—Fulton (N. Y.) G. and G. C. B. J. O'Grady, Pres.  
 May 14-15.—Waterloo (Ia.) G. C. Nick Webber, Pres.  
 May 14-15.—Pipestone (Minn.) G. C. H. T. Ober, Sec'y.  
 May 15.—Shelbyville, Ill.—Shelby County G. C. Geo. L. Dearing, Sec'y.  
 May 15.—Riverside (Ill.) G. C. E. M. Collis, Sec'y.  
 May 15.—Freeport (Ill.) G. C. J. W. James, Sec'y.  
 May 15.—Clayton, O.—Salem G. C. F. C. Koch, Pres.  
 May 17.—Phillipsburg, N. J.—Alert G. C. Edw. F. Markley, Mgr.  
 May 20.—Albia, Ia.—Monroe County Fish and Game Protective Association. Theo. B. Perry, Jr., Pres.  
 May 20.—Milton Junction (Wis.) G. C. W. H. Smith, Sec'y.  
 May 20.—Pillow (Pa.) G. C. J. A. Bingham, Sec'y.  
 May 20-22.—Temple, Tex.—Texas State tournament, under auspices of the Temple G. C. R. I. Tennant, Pres.  
 May 21.—Brazil (Ind.) R. & G. C. W. T. Crabb, Sec'y.  
 May 22.—Aurelia (Ia.) G. C. Frank R. Welch, Sec'y.  
 May 22.—Syracuse, N. Y.—Onondaga County G. C. T. E. Clay, Pres.  
 May 22.—Mt. Morris, Ill.—Mt. Morris G. C. C. J. Price, Sec'y.

May 22.—Scranton (Pa.) R. & G. C. M. F. Bohn, Sec'y.  
 May 22.—Altoona, Pa.—Central Pennsylvania T. S. A. tournament, under auspices of Blair County Road Drivers' Association. Jack Waltz, Sec'y.  
 May 22-23.—Winchester (Ky.) G. C. C. B. Strother, Sec'y.  
 May 23.—Nicholson (Pa.) R. and G. C. L. A. Wright, Sec'y.  
 May 23.—Emporia (Kans.) G. C. Chas. Ford, Sec'y.  
 May 24.—Stratford, Ont., Canada.—Pastime G. C. Wm. Boles, Sec'y.  
 May 24.—Newmanstown (Pa.) G. C. F. S. Rader, Sec'y.  
 May 24.—New Haven, Conn.—Western Connecticut T. S. L. tournament, under auspices of New Haven G. C. F. W. Smith, Pres.  
 May 24.—Gananoque, Canada.—Thousand Islands G. C. C. A. Lewis, Sec'y.  
 May 24-25.—St. Louis (Mo.) T. S. A. L. Ebert, Sec'y.  
 May 27.—Sikeston (Mo.) G. C. Wm. H. Tanner, Sec'y.  
 May 27-28.—Paragould (Ark.) G. C. C. W. Stedman, Sec.  
 May 27.—Norwich, N. Y.—Chenango County F., G. and G. C. E. D. Borden, Mgr.  
 May 27.—Brookhead (Wis.) G. C. J. B. Pierce, Sec'y.  
 May 27-29.—Peoria, Ill.—Illinois State tournament, under the auspices of Illinois State S. A. R. Scholes, Sec'y.  
 May 27-29.—Fort Dodge, Ia.—Iowa State tournament, under auspices of the Fort Dodge Gun Club. Jos. Kautzky, Mgr.  
 May 27-29.—N. Platte, Neb.—Nebraska State tournament, under auspices of Buffalo Bill G. C. J. C. Den, Sec'y.  
 May 28.—Chesapeake City (Md.) G. C. H. L. Worthington, Mgr.  
 May 28.—Morocco (Ind.) G. C. Jas. C. Murphey, Sec'y.  
 May 28.—Windsor (Mo.) G. C. W. T. Jordan, Sec'y.  
 May 30.—Menominee Falls (Wis.) G. C. J. A. Pike, Sec.  
 May 30.—Utica, N. Y.—Genesee G. C. E. J. Loughlin, Sec'y.  
 May 30.—Latonia (Ky.) G. C. H. S. Connelly, Sec'y.  
 May 30.—Waukegan (Ill.) S. A. B. Tompkins, Sec'y.  
 May 30.—Austerlitz, Ky.—Hill Top G. C. Thos. H. Clay, Jr., Sec'y.  
 May 30.—Olyphant, Pa.—Social R. and G. C. Thos. A. Bell, Sec'y.  
 May 30.—Greenwich (Conn.) G. C. J. H. Finch, Pres.  
 May 30.—Buffalo, N. Y.—Buffalo Audubon Club. W. C. Wootton, Sec'y.  
 May 30-31.—Wilmington, Del.—Delaware State tournament, under auspices of the Du Pont G. C. W. A. Joslyn, Asst. Sec'y.  
 June 2.—Bunker Hill (Ill.) G. C. C. E. Pettengill, Sec.  
 June 2.—Utica, Ill.—Interurban T. S. A. A. L. Jaques, Sec'y.  
 June 3.—Maquoketa (Ia.) G. C. E. L. Hinckley, Sec'y.  
 June 3.—Delta (Colo.) G. C. R. A. King, Mgr.  
 June 3-4.—Sisseton, S. D.—South Dakota State tournament, under auspices of South Dakota State S. A. Maurice Schindler, Sec'y.  
 June 3-5.—Eugene, Ore.—Oregon State tournament, under auspices of Eugene G. C. E. A. Bean, Sec'y.  
 June 4-5.—Baltimore, Md.—Maryland State tournament, under auspices of Maryland State S. A. H. L. Worthington, Sec'y.  
 June 4-6.—Circleville, O.—Ohio State tournament, under auspices of Ideal G. C. J. S. Ritt, Sec'y.  
 June 4-6.—Marshall, Mo.—Missouri State tournament, under auspices of Marshall G. C. E. W. Brown, Sec.  
 June 5.—S. Madison, Wis.—Triangle G. C. H. G. Waterman, Sec'y.  
 June 5-7.—Red Bank, N. J.—New Jersey State tournament, under auspices of River Side G. C. Albert L. Ivins, Pres.  
 June 5.—Milbank (S. D.) G. C. W. J. Martens, Sec'y.  
 June 5.—Spring Valley (Minn.) G. C. J. Bowden, Sec'y.  
 June 6-7.—Worcester, Mass.—Massachusetts State tournament, under auspices of Massachusetts S. T. S. A. F. E. Sheldon, Sec'y.  
 June 6.—Bradford (Ill.) G. C. H. A. Swearingen, Sec'y.  
 June 7.—Riversford (Pa.) G. C. F. A. Anderson, Sec'y.  
 June 7-8.—Milwaukee, Wis.—Badger G. C. C. P. Shumway, Sec'y.  
 June 9-12.—Buffalo, N. Y.—N. Y. State Sportsmen's Association tournament. C. F. Lambert, Sec'y.  
 June 10.—Janesville (Wis.) G. C. L. L. Nickerson, Sec'y.  
 June 10.—Brownsville, Pa.—Western Pennsylvania T. S. L. tournament, under auspices of Brownsville G. C. Louis Lautenslager, Pres.  
 June 10-11.—Warm Springs, Ga.—Merriwether G. C. T. B. Slade, Pres.  
 June 10-12.—Spokane, Wash.—Washington State tournament, under the auspices of the Spokane Gun Club. C. A. Fleming, Pres.  
 June 10-12.—Buffalo, N. Y.—New York State tournament, under auspices of the Buffalo Audubon Club. C. F. Lambert, Sec'y.  
 June 10-12.—Sioux City, Ia.—Soo G. C. W. F. Duncan, Sec'y.  
 June 11.—Robinson (Ill.) G. C. C. M. Franke, Sec'y.  
 June 12.—Platteville (Wis.) G. C. C. E. Gilmore, Sec'y.  
 June 12.—South Charleston (O.) G. C. Geo. H. Slaughter, Sec'y.  
 June 12.—Brooklyn (Pa.) R. and G. C. Myron O. Tiffany, Pres.  
 June 12-13.—Indianapolis (Ind.) G. C. G. Alig, Jr., Sec'y.  
 June 12-13.—Huntington, W. Va.—West Virginia State tournament, under auspices of Huntington G. C. L. R. Shepherd, Pres.  
 June 13-14.—Portland, Me.—Maine State tournament, under auspices of Portland G. C. S. W. Dimick, Sec.  
 June 14.—Philadelphia, Pa.—Meadow Spring G. C. Wm. F. Letford, Sec'y.  
 June 16-18.—Boise, Idaho.—Idaho State tournament, under

auspices of Idaho State Sportsmen's Association. E. F. Walton, Sec'y.  
 June 17.—Thief River Falls (Minn.) G. C. P. O. Myrum, Sec'y.  
 June 17-20.—Dayton, O.—Interstate Association's fourteenth Grand American Handicap tournament, on grounds of N. C. R. Gun Club; \$1,500 added. Winner of first prize guaranteed \$600 and a trophy; winners of second and third places guaranteed \$500 and \$400 respectively. Elmer E. Shaner, Mgr., Pittsburgh.  
 June 18.—Shamokin (Pa.) G. C. C. Rubendall, Sec'y.  
 June 18-19.—Springfield, Vt.—Vermont State tournament, under auspices of the Springfield G. C. I. L. Hall, Sec'y.  
 June 21.—Baudette (Minn.) G. C. A. M. Hoover, Sec'y.  
 June 21.—Bridgeport, Conn.—Western Connecticut Trappers' League tournament, under auspices of Sea Side G. C. Earl R. Lewis, Sec'y.  
 June 23.—Ada (Minn.) G. C. A. P. McDowell, Pres.  
 June 24-25.—Crookston, Minn.—Minnesota State tournament, under auspices of Crookston G. C. Tom Morris, Pres.  
 June 25-26.—Du Bois (Pa.) G. C. E. W. Kelly, Sec'y.  
 June 26.—Sedalia (Mo.) G. C. John McGrath, Sec'y.  
 June 26.—Fayetteville (N. Y.) G. C. C. C. Snook, Sec'y.  
 June 26-27.—Adel (Ia.) G. C. Chas. F. Clarke, Sec'y.  
 July 1.—McKeesport, Pa.—Western Pennsylvania T. S. L. tournament, under auspices of McKeesport G. C. Louis Lautenslager, Pres.  
 July 4.—Waukesha, Wis.—Spring City G. C. Homer E. White, Sec'y.  
 July 4.—Greenwich (Conn.) G. C. J. H. Finch, Pres.  
 July 4.—Coalgate (Okla.) G. C. F. C. Varner, Sec'y.  
 July 4.—Syracuse, N. Y.—Hunters' Club of Onondaga County. Chas. H. Stanard, Sec'y.  
 July 4-5.—Harrisburg (Pa.) S. A. L. B. Worden, Mgr.  
 July 4-5.—Hattiesburg, Miss.—Mississippi State tournament, under auspices of Hattiesburg G. C. H. S. Hagerty, Sec'y.  
 July 8.—Dows (Ia.) G. C. W. J. Wilson, Sec'y.  
 July 8-10.—Cedar Point, O.—The Indians. D. H. Eaton, Sec'y.  
 July 8-13.—Cedar Point, O.—The Indians' tournament. D. H. Eaton, Sec'y, Cincinnati, O.  
 July 9.—Oswego (Kans.) G. C. T. H. Chitwood, Sec'y.  
 July 9-10.—Jersey Shore (Pa.) G. C. H. Myers, Sec'y.  
 July 10-11.—Spencer (G. C.) C. E. Golby, Pres.  
 July 11.—Allentown, Pa.—Lehigh Valley S. A. Allen Heil, Sec'y.  
 July 12.—Holmesburg Junction, Pa.—S. S. White G. C. W. E. Robinson, Sec'y.  
 July 15.—Iowa City (Ia.) G. C. C. Bothell, Sec'y.  
 July 15-17.—Wilmington, Del.—Interstate Association's eighth Eastern Handicap tournament, under auspices of Du Pont G. C.; \$1,000 added money. Winner of first place guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. Elmer E. Shaner, Mgr., Pittsburgh.  
 July 16-17.—Seattle (Wash.) T. S. A. H. Fleming, Pres.  
 July 17.—Jewell (Ia.) G. C. W. S. Hoon, Sec'y.  
 July 21-25.—Raymond, Wash.—Pacific Indians. F. C. Riehl, Sec'y.  
 July 22-23.—Butler (Pa.) R. and G. C. S. G. Purvis, Sec.  
 July 24.—Lewiston, Pa.—Central Pennsylvania T. S. A. tournament, under auspices of Lewiston R. and G. C. W. P. Steinbach, Sec'y.  
 July 26.—Danbury, Conn.—Western Connecticut Trappers' League tournament, under the auspices of the Pakquoque G. C. E. H. Bailey, Sec'y.  
 July 29-30.—Bradford (Pa.) G. C. A. W. Vernon, Sec'y.  
 Aug. 2.—Greenwich (Conn.) G. C. J. H. Finch, Pres.  
 Aug. 5.—Elwood (Ind.) G. C. S. W. Swihart, Sec'y.  
 Aug. 5-6.—Lock Haven (Pa.) G. C. C. A. Jobson, Sec'y.  
 Aug. 5-7.—Omaha, Neb.—The Interstate Association's eighth Western Handicap tournament, under auspices of the Omaha Gun Club; \$1,000 added money. Winner of first place in the Western Handicap guaranteed \$200 and trophy; winners of second and third places guaranteed \$150 and \$100 respectively. E. E. Shaner, Mgr., Pittsburgh, Pa.  
 Aug. 6.—Gouverneur (N. Y.) R. & G. C. W. R. Patrick, Sec'y.  
 Aug. 9.—Holmesburg Junction, Pa.—Independent G. C. Chas. H. Newcomb, Sec'y.  
 Aug. 11.—Lima (O.) G. C. A. W. Fisk, Sec'y.  
 Aug. 12.—Tarentum, Pa.—Western Pennsylvania T. S. L. tournament, under auspices of Tarentum G. C. Louis Lautenslager, Pres.  
 Aug. 12.—Marthasville, Mo.—Daniel Boone G. C. J. O. Wilson, Sec'y.  
 Aug. 13.—Batavia, N. Y.—Holland G. C. Chas. W. Gardner, Sec'y.  
 Aug. 15-16.—Dickinson (N. D.) G. C. J. W. Sturgeon, Sec'y.  
 Aug. 21-22.—Mason City, Ia.—Iowa State Sportsmen's Association's Post-Season tournament, under auspices of Cerro Gordo G. C. R. P. Monplasure, Sec'y.  
 Aug. 23.—Temple, Pa.—Hercules G. C. A. K. Ludwig, Sec'y.  
 Aug. 25-26.—Sioux Falls (S. D.) G. C. G. A. Olsen, Sec.  
 Aug. 25-26.—Terre Haute, Ind.—Indiana State tournament under auspices of Terre Haute R. & G. C. R. O. Miller, Sec'y.

DRIVERS AND TWISTERS.

Complete scores and story of the indoor championship at Madison Square Garden will appear in March 15 issue of FOREST AND STREAM. This is made necessary because our forms close Tuesday, while the tournament continues on to Wednesday night.

A big tournament will be held under the auspices of the Glenwood Country Club, on March 12. The conditions call for 100 targets, handicap, in four strings of 25 targets. Prizes are offered five high guns. There also will be a five-man team race, and a trophy for high professional.

The Bergen Beach Gun Club will hold a handicap serial shoot at 100 targets, \$2 entrance each day on March 11, April 8 and May 13, at 1 P. M. sharp. This shoot will be an added bird handicap by Wm. De Long, assisted by the officers of the club, on a basis of past performances, for prizes donated by J. F. James, Dr. Sauer and the club. Best two out of three scores in the series to count.

W. G. BEECROFT.

Asbury Park Gun Club.

ASBURY PARK, N. J., Feb. 26.—At the Washington's Birthday all-day clay target shoot of the Asbury Park, N. J. Gun Club, Dr. Martin, of New York, won high gun money with the score of 134 out of 150, leading Koegel, of Manasquan by one bird. There were ten special events, and the money was divided on the Rose system, 5, 3, 2, 1. Over 7,000 targets were shot at. The club is planning for a three-day Easter shoot, and expects a record-breaking attendance. Following are the scores of the ten special events:

No. 1, 15 targets:

Vanderveer	13	Martin	14
Buck	12	Holznaple	16
F Gunnison	14	Shepherd	13
Carr	15	Rogers	11
J Gunnison	11	Morris	14
Muldoon	15	Lawrence	12
Ferguson	10	Mathews	15
Walker	14	Potter	12
*Davis	13	Beringer	5
Healey	6		

No. 2, 15 targets:

Vanderveer	13	Healey	5
Buck	9	Martin	15
F Gunnison	15	Holznaple	12
Carr	12	Shepherd	11
J Gunnison	11	Rogers	11
Muldoon	11	Morris	15
Ferguson	12	Lawrence	12
Walker	15	Mathews	10
Koegel	14	Potter	11
*Davis	11	Beringer	6

No. 3, 15 targets:

Vanderveer	13	*Davis	11
Buck	11	Healey	3
F Gunnison	12	Martin	14
Carr	11	Holznaple	8
J Gunnison	13	Shepherd	15
Muldoon	13	Rogers	10
Ferguson	8	Morris	12
Walker	7	Lawrence	12
Applegate	7	Mathews	13
Koegel	14	Cade	14

No. 4, 15 targets:

Vanderveer	13	*Davis	14

Carr	10	Morris	14
Muldoon	10	Lawrence	13
Koegel	11	Mathews	14
*Davis	8	Hardy	13

Evanston Gun Club.

EVANSTON, Ill., Feb. 22.—The Washington's Birthday shoot held at the Evanston Gun Club was attended by thirty-five shooters, among whom were: Tom Marshall, the dean of trapshooters; J. R. Graham, Fred G. Bills, W. D. Stannard and Matthews gave an exhibition from the 20yd. line, which was exceedingly interesting.

A cold southwest wind blew across the trap all day, which, with an occasional snow flurry, prohibited high scores. Kennicott carried off the high amateur honors, tying J. R. Graham high professional. Winkler and Watson tied for second high amateur, and in the shoot-off, Winkler captured the prize with a perfect score of 25.

The first event was at 25 targets, 16yds., with gun below the shoulder and was won by Kennicott with 24, Winkler getting second with 20, and Adams, Phalen and Coleman third with 19 each.

Kennicott, shooting at the 20yd. mark, also took first prize in the second event, a distance handicap event, with a score of 20; Miller, shooting from the 18yd. line, won second with 19; Winkler, 20yds., and Watson, 18yds., tied for third, Watson winning the shoot-off.

Watson took first honors in the third event, a wolf shoot, with the good score of 22, Kennicott second with 21, and Phalen and Coleman tying for third honors with 18, Coleman winning the shoot-off.

In the fourth event at 12 pairs doubles, Kennicott made the best score with 17. Coleman, Scowley, Winkler and Watson tied for second place with 14 each. Kennicott having won the first two events declined to accept another prize, and insisted upon the four gentlemen running second shooting off for this prize. In the shoot-off Coleman ran away with the prize with the excellent score of 21. Bristle and Fesler, being tied for third, were obliged to shoot out the tie, and Bristle won with a score of 12.

Mr. and Mrs. Frank M. Schieble entertained the members and their guests at luncheon. The dining room was decorated in American flags in honor of the day. The following are the scores for the day:

Events:	1	2	3	4	Events:	1	2	3	4
Kennicott	24	20	21	17	Scowley	18	16	17	14
Winkler	20	18	15	14	*Stannard	20	22	21	15
Coleman	19	14	18	14	*J R Graham	21	23	23	15
Phalen	19	16	18	10	*Mathews	21	17	21	11
Adams	19	17	17	10	Schieble	14	15	17	..
Bristle	13	16	16	18	Van Patten	15	15	16	7
Carman	13	15	17	10	Watson	13	18	22	14
Darby	15	11	12	3	Fesler	8	10	13	12
T E Graham	17	18	22	17	Kellogg	17	19	17	9

Miller	9	19	13	9					

\*Professionals.

Feb. 27.—Beginning March 1 and continuing throughout the year, the Evanston Gun Club will give a solid silver spoon to the member making the best score each week, using the added target handicap system.

On March 22 there will be a team shoot for the trophy donated by Mr. Tichenor. This shoot will be at 100 targets, 16yds., each man shooting 25 targets per week until he has completed 100. Mr. Kennicott will lead one team, composed of Bristle, Scowley, Miller, Darby, Davis, Marshall, Van Petten, Gamble and Harrison. Mr. Coleman is captain of the opposing team of the following gentlemen: Harpham, Millen, Watson, Phalen, Carman, Searle, De Clercq, Hanson and Milner. It is expected that this will be a very interesting contest, as the two teams are very evenly matched.

Beginning March 22 and ending June 15, a tournament will be held for the Stevens gold watch fob. The added target handicap system will be used and the first score made on our regular shooting days will apply on this trophy until 200 targets have been shot at by each contestant.

W. J. PHALEN, Sec'y.

Cleveland Gun Club.

CLEVELAND, O., March 1.—Following are the scores of Cleveland Gun Club, made to-day:

Event No. 1, semi-annual trophy, 50 targets, 16yds.: Tickerman 48, G. Burns 47, Radcliffe 46, Blakeslee 44, Hogen 44, Doolittle 44, Brainard 44, Barstow 40, Freeman 40, Dr. Jones 47, Brockway 33, Brown 37, Stevens 37, Stone 38, Rockwell 37, Weeden 37, Gould 36, Hartman 32, Mrs. Jones 31, Chappella 28.

Event No. 2, annual trophy, 50 targets, 16yds.: Blakeslee 47, Doolittle 46, Weeden 45, Hogen 45, Radcliffe 44, Brainard 44, Tickmann 43, Brown 41, Freeman 39, Rockwell 40, Stevens 28, Brockway 38, Dr. Jones 36, Hartman 35, Stone 34, Mrs. Stone 32, Chappella 30.

Event No. 3, quarterly contest, 50 targets: Blakeslee 47, Doolittle 46, Weeden 45, Hogen 45, Brown 44, Brainard 44, Burns 40, Stevens 34, Mrs. Jones 33, Hartman 33.

Sixth Club contest: Blakeslee 49, Hogen 47, Weeden 46, Doolittle 44, Stevens 37.

F. H. WALLACE, Mgr.

Laredo Gun Club.

LAREDO, Tex., Feb. 26.—Dr. W. E. Lowry and E. K. O'Brien tied for high to-day, each getting 42 out of 50. J. B. Da Camara took place with 39. Scores:

Dr W E Lowry	42	C P Hill	16
E K O'Brien	42	A B Muller	37
J B Da Camara	39	R L Muller	37
R B Lignoski	37	Dr A E Younkim	32
J W Dallman	34	Jim Gray	33
J W Mussett	22		

Crescent A. C.

BROOKLYN, N. Y., March 1.—J. H. Hendrickson was high gun to-day with 92 out of 100 from scratch, 46 out of 50, 48 out of 50 and 215 out of 250, but as a visitor he got only the take-home trophy. R. C. Williams being runner-up for Hendrickson, took Spooner trophy—44 (6) 50, and won C. Blake trophy with (6) 50. J. F. James took committee cup with 44 from scratch, with F. B. Stephenson in at the death on monthly cup (0) 21 out of 25. Scores:

Committee cup, 50 targets, handicap: J F James..... 0 44 P O McKee..... 14 40 F B Stephenson..... 0 43 R C Williams..... 6 37 F S Hyatt..... 2 41 A Blake..... 6 35

C. Blake trophy, 50 targets, handicap: R C Williams..... 6 46 A Blake..... 6 35 \*J Hendrickson..... 0 46 P A McKee..... 7 21 J F James..... 0 45 C Black..... 0 19 F B Stephenson..... 0 42 J Doig..... 10 18 F S Hyatt..... 2 38

Spooner trophy, 50 targets, handicap: \*J Hendrickson..... 0 46 G G Stephenson..... 4 36 R C Williams..... 6 44 C Blake..... 0 36 J F James..... 0 41 A Blake..... 6 34 F S Hyatt..... 2 40 P A McKee..... 7 10 F B Stephenson..... 0 40 J Doig..... 10 18

Take-home trophy, 100 targets, handicap: \*J Hendrickson..... 0 92 G G Stephenson..... 8 75 R C Williams..... 12 90 C Blake..... 0 70 J F James..... 0 86 A Blake..... 12 69 F B Stephenson..... 0 80 P McKee..... 28 64 F S Hyatt..... 24 78 J Doig..... 40 64

Monthly cup, 25 targets, handicap: F B Stephenson..... 0 21 R C Williams..... 3 19 J F James..... 0 20 A Blake..... 3 19 F S Hyatt..... 1 20 C Blake..... 0 18 \*J Hendrickson..... 0 19 G G Stephenson..... 2 13

Scratch event, 250 targets: \*J Hendrickson..... 215 R C Williams..... 160 J F James..... 210 G G Stephenson..... 148 F B Stephenson..... 194 A Blake..... 115 F S Hyatt..... 194 P A McKee..... 59 C Blake..... 174 J Doig..... 59

Cincinnati Gun Club.

THERE were not many members at the grounds on March 2, but there was some shooting, the last shots in the team race being fired when it was barely possible to see the targets in the dusk. Hammerschmidt was high man in the regular practice events, breaking 90 out of 100, a very fine showing in the strong west wind which was blowing, and causing the targets to take very erratic flights. Schreck started out with a poor score, but improved in each event, broke straight in the last event, and went out in second place with 82. In the contest for the Du Pont trophy, there were four straight scores, including the shooters' handicaps. In actual breaks, Schreck led with 46, closely followed by Hammerschmidt and Arthur Gambell with 45 and 44 respectively. Then Mutt and Jeff went up against each other in the two 100-target matches, the first resulting in favor of the former, and Jeff winning the second. On the 200 targets Mutt had the best of it by two targets, with 149 to 147.

There was still a little daylight left, and a team match was proposed between Mutt and Jeff, and Oscar and Adolph. The last shots were fired when it was almost impossible to see the targets in the gathering dusk, and the result was a victory for the latter team on a score of 122 to 113 out of 75 targets per man. The team match with Northern Kentucky will be shot on the latter's grounds on March 16, and will be a feature of the tournament to be given on that date. Each team has one win and one match resulted in a tie. Scores:

Hammerschmidt..... 90 Jeff..... 72 Schreck..... 82 Mutt..... 73

Du Pont trophy, 50 targets, handicap: Schreck..... 6 50 Mutt..... 10 50 Hammerschmidt..... 5 50 Jeff..... 12 45 A Gambell..... 6 50

Team match, 100 targets each: Mutt..... 149 Jeff..... 147

Team match, 75 targets each man: Adolph..... 69 Mutt..... 55 Oscar..... 53-122 Jeff..... 58-113

League of Southeast Missouri Gun Clubs.

There will be a meeting at Sikeston, Mo., Parlor A, Marshall Hotel, at 9:30 A. M., Tuesday, March 18, for the purpose of organizing a league of Southeast Missouri gun clubs, to which all gun clubs are cordially invited. The suggestion for this organization is for each gun club to become a member of the league. Tournaments will be held at times and places, subject to the rules of the organization. The league, of course, makes its own rules. It is a good idea to comply with the Interstate Association rules, in order to secure their \$50 per day. The home club where tournament is to be held to retain two cents per target. In order to guarantee successful tournament, each club in the league can be assessed for attendance of two members from their club, and should no one attend from that club, then they would pay 2

cents per target for all targets advertised in regular program for the two members.

After the meeting a match of two events, 25 targets each, will be held with optional sweeps extra.

The officers of the Sikeston Gun Club, are: C. H. Yanson, President; Dr. D. E. Sawyre, Vice-President; Wm. H. Tanner, Secretary.

Jersey City Gun Club.

JERSEY CITY, N. J., March 1.—We had a pretty fair attendance at our regular Saturday afternoon shoot to-day, even though the big shoot was on at Madison Square Garden for the indoor championship. Several of the boys hustled over to New York as soon as the program was finished to try and qualify for the finals. Dave Engle jumped out in front to-day at the start and stayed there until the finish, and won high average easily with 85 per cent. Dixon was second with 73 per cent., and Jack Williams sat in the third row with 72 out of 100. Jack also took home a leg on the season trophy with 44 out of 50. The scores follow in strings of 25:

Engle..... 21 23 21 20..... 15 15 10 11..... Dr Ittner..... 1 4 0 2..... Percy..... 18 20 18 14 19 19 15 19..... Summerfield..... 15 18 14 15 12..... Coleman..... 0 0 1 6 1..... Dixon..... 20 20 15 19 18..... Kellinger..... 9 11 9 8 16 13..... Williams..... 18 18 18 18..... Jackson..... 17 17 15 14..... Kearney..... 11 11 13 12..... Everett..... 8 6 17 3..... Jones..... 10 12 12 9..... Finnegan..... 13 14 13.....

Engle, after hitting the third bird he shot at, found his gun had broken. The brand-new stock had snapped off at the grip, but Dave borrowed a gun and shot like a house a-fire just the same.

Summerfield and Dixon had a little match on the side, and Dixon put it all over him, Summerfield appearing very nervous.

Coleman and Everett are new members, and both are improving, Everett getting a 17 to-day. Keep at it, boys, and things will come your way.

Kearney was out with another new gun, and his average had to suffer, of course. By and by, he is going to get the right combination, and then there will be a lot of smoke around, you can bet.

Dr. Ittner's eyes bothered him considerably to-day, which accounts for his low scores.

Kellinger came out to get a lot of practice before going over to Madison Square. Don't forget that the Jersey City Gun Club shoots every Saturday, and extends an invitation to all shooters to pay us a visit and spend a pleasant afternoon. Targets trapped at 1 cent each.

Birmingham Gun Club.

BIRMINGHAM, Ala., Feb. 22.—The midwinter handicap of the Birmingham Gun Club was a most successful affair. Attendance was up to what was expected, and the weather was warm and pleasant. A slight wind made some of the targets dip badly.

P. B. Plummer won the midwinter handicap from 18yds., and the secretary's trophy for high score was won by a member of the Birmingham Gun Club. Chas. Dunlap, of Eutaw, Ala., was high amateur. In the 200 targets in the afternoon, E. R. Holt was high professional with 195, followed by H. D. Gibbs with 193. John Fletcher was high amateur in the 200 targets with 185, followed by Geo. Waddell, of Columbus, Ga., with 184.

Scores made in midwinter handicap follow:

Yds. T'l. G H Waddell..... 20 75 C Greene..... 18 78 J K Warren..... 20 77 O L Garl..... 18 79 G Hillman..... 20 82 Mrs Garl..... 16 77 E C Little..... 18 80 L Salter..... 16 73 J Hillman..... 19 86 R Peters..... 16 65 J C Broyles..... 19 65 J Smith..... 16 39 I Armstrong..... 19 77 T Peters..... 16 80 C Dunlap..... 18 89

Professionals: E R Holt..... 22 84 P B Plummer..... 18 91 H D Gibbs..... 22 90 C Hunter..... 16 76 Elbert Holt..... 19 77 T Cassity (20)..... 19 20

Scores made in the regular events, 200 targets, are:

Shot at. Broke F B Bowie..... 140 97 J Fletcher..... 200 185 C W Dunlap..... 200 171 C J Broyles..... 200 173 O L Garl..... 200 170 H C Ryding..... 200 174 J K Warren..... 200 161 R Peters..... 200 99 G H Waddell..... 200 184 T Peters..... 200 160 L Salter..... 200 173 A Smith..... 200 79 Chas Greene..... 200 180 S Smith..... 120 41 G Hillman..... 200 179 J J Smith..... 140 62 J Hillman..... 200 160 J T Colbourne..... 60 37 E C Little..... 200 172

Professionals: Dr Sellers..... 60 47 T A Cassity..... 200 175 E R Holt..... 200 195 P B Plummer..... 200 181 Elbert Holt..... 200 181 C Hunter..... 200 176 H D Gibbs..... 200 193 C M Brady..... 200 130

Du Pont Reunion.

A RE-UNION shoot of two teams of the Du Pont Gun Club will be held at Wilmington, March 15. The teams will be designated "Red" and "Blue," with W. J. Highfield and H. P. Carlon as the respective captains. The losing team will pay the expenses of a dinner that night at the Hotel Du Pont. There will be about 150 covers. The shoot will be at 25 targets. The members of the losing team will be called to pay for the dinners of only the same number of contestants on the winning team as are on the losing side.

Amateur Championship of America.

THE eighth annual amateur championship of America at clay birds, given under the auspices of the New York Athletic Club, at their country home, Travers Island, Pelham Manor, New York, will be held on April 2 and 3.

On Wednesday, April 2, will be held the preliminary event and intercity team championship, 200 birds, entrance \$5, including birds. First, second and third prizes in preliminary event, a gold medal to each man on the winning team. The ten highest individual scores from each city will constitute that city's team. Each man must register as from the city he is representing when he makes his entry. Eligibility will be determined by the N. Y. A. C. Shooting Committee. The match starts at 9 A. M.

On April 3, at 9 A. M. the eighth annual amateur championship of America at clay birds, will be held. First, second, third, fourth, fifth, sixth, seventh, eighth, ninth and tenth prizes; a diamond medal for first prize; 200 birds, in strings of 25, entrance \$8, including targets.

Optional sweepstakes of \$2 on each of the 25 bird events; \$5 on each 100 birds of the preliminary event, and \$5 on each 100 birds of the championship event. On the 100-bird sweeps there will be two moneys for each five entries, high guns; the other sweeps will be divided according to the Rose system, 8, 5, 3, 2, 1.

Expert traps, 16yds. rise, 50yds. flight. Squads will not be made up until the arrival of shooters at Travers Island. Errors in scoring must be rectified before two more birds have been shot at by the shooter making the claim. Professionals and trade representatives will be allowed to shoot for targets only. Not more than two in a squad. Targets 2 cents each. A suitable trophy will be awarded to the professional or trade representative making the highest score in both preliminary and championship events. Shooting up will not be permitted. Lies are to be shot off at 25 birds. The committee reserves the right to reject any entry, and will refuse any post entry after No. 1 squad has shot on Trap No. 2.

Guns and ammunition shipped care New York Athletic Club, Pelham Manor, N. Y., will be delivered on the grounds. All standard loads will be for sale on the grounds. Address all entries and communications to O. C. Grinnell, Jr., 200 Fifth Avenue, New York City.

How to reach Travers Island: Trains on the main line of the N. Y., N. H. & H. R. R., stopping at Pelham, thence by trolley direct to Travers Island. Trains leave Grand Central Station, New York, 8:06, 9:06 and 10:15 A. M. Trains on the Harlem River Branch of the N. Y., N. H. & H. R. R. from Harlem River to Pelham Manor, thence by trolley to Travers Island, 7:48, 9:03 and 10:03 A. M.

Marine and Field Club.

BERGEN BEACH, N. Y., March 1.—C. D. Sayre took three out of four events to-day, shooting high for the monthly cup, getting 97 out of 100. In the scratch shoot he was high gun, 24 out of 25, and a full score gave him a trophy shoot. C. M. Camp won the other event, getting the trophy with 24 out of 25. The scores:

Monthly cup, 100 targets, handicap: C D Sayre..... 8 97 C M Camp..... 8 94 E H Lott..... 0 90 P R Towne..... 4 92 S P Hopkins..... 4 94 J M Knox..... 16 89

Scratch shoot, 25 targets: C D Sayre..... 24 P R Towne..... 20 E H Lott..... 22 C M Camp..... 18 S P Hopkins..... 21 J M Knox..... 16

Trophy shoot, 25 targets, handicap: C D Sayre..... 2 25 P R Towne..... 1 22 E H Lott..... 0 24 S P Hopkins..... 1 20 J M Knox..... 4 23 C M Camp..... 2 19

Trophy shoot, 25 targets, handicap: C M Camp..... 2 24 C D Sayre..... 2 20 F R Lott..... 0 22 P R Towne..... 1 20 S P Hopkins..... 1 21 J M Knox..... 4 20

Rhode Island C. C.

BARRINGTON, R. I., March 1.—Isaac B. Merriman was high gun in the clay pigeon shoot at the Rhode Island Country Club this afternoon with 92 out of 100. The shoot-off for the Washington's Birthday trophies was also won by Merriman. The second prize was won by C. G. Fayles with 48. The scores in the regular shoot to-day follow:

I B Merriman..... 22 17 16 17 20 92 A S Hoffman..... 15 20 18 14 15 82 G T Hanley..... 13 15 11 12 16 67 L C Tingley..... 12 12 8 12 .. 44 A C Blanding..... 13 11 9 9 .. 42 G P Hines..... 8 11 13 10 7 49 W M Binney..... 12 13 12 .. .. 37 H Hoffman..... 8 10 10 .. .. 28 Mrs V M Wilson..... 6 2 .. .. .. 8

Rockaway Gun Club.

EDGEMERE, L. I., March 1.—Paul von Boeckmann won the 100-bird scratch event with 91 to-day. Theodore Black was second with 87, and Dr. Garrett Schenck third with 84. Dr. Schenck, with (7) 50, won the 50-bird handicap. Black was second with (7) 49, and John Ferril third with (10) 47.

Laurel House Gun Club.

LAKEWOOD, N. J., March 1.—A goodly attendance shot for the S. L. Maxwell cup at the Laurel House Gun Club traps to-day. A. J. Murphy won with 85. Others shooting included J. L. Bright 76, F. F. Vanderhoof 79, Dr. C. O. H. Keyes 76, H. S. Salt 71, and J. M. Andrews 64.

**Essex County Country Club.**

ORANGE, N. J., Mar. 1.—W. R. Delehanty was the winner to-day at the Essex County Country Club shoot for the take-home trophy and a sweepstake. In each he made a full with a handicap of six. With the same handicap he was one of three high men, each with a score of 23, for the first leg on the March cup. The scores:

Sweepstakes:			
Delehanty	6 25	A Bryant	2 21
J A Hart	0 23	P Hauck, Jr.	5 21
J T Gillespie	2 23	B M Shanley, Jr.	0 20
P E Heller	6 23	P S Ross, Jr.	7 16
March cup:			
Delehanty	6 23	Hauck	5 17
Hart	0 21	Shanley	0 23
Gillespie	6 20	Ross	5 12
Heller	6 23	C H Daly	0 15
Bryant	2 21	A Riker, Jr.	6 22
Take-home trophy:			
Delehanty	6 25	Hauck	5 18
Hart	0 17	Shanley	0 22
Gillespie	2 23	Ross	7 9
Heller	6 22	C H Daly	0 17
Bryant	2 15	Riker	8 16

**Boston A. A.**

J. L. SNOW, from scratch, shot a pretty gun in both events on Saturday, March 1. He made a grand total of 94 out of 100, which, fog or no fog, was quality shooting. He smashed 47 over each trap. L. H. Davis from 6, and T. C. Adams, from the ground, each made 92 for place over the McCrea. Adams made a perfect score on 50 scalars and fell down to 42 over Sargeant. Twelve members were out, though a London fog was decidedly companionable. The scores:

	McCrea.	Sargent.	Total.	
	H. T.	H. T.	H. T.	
J L. Snow	0 47	0 47	0 94	
L H Davis	3 48	3 44	6 92	
T C Adams	0 50	0 42	0 92	
C P Blinn	5½ 45½	5½ 45½	11 91	
S A Ellis	2½ 46½	2½ 44½	5 91	
J E Lynch	2½ 42½	2½ 44½	5 87	
G L Osborne	3 44	3 41	6 85	
F Whitney	6 46	6 39	12 85	
M Ballou	2½ 43½	2½ 39½	5 83	
W C Brooks	4 46	4 35	8 81	
W B Farmer	3 41	3 39	6 80	
C B Tucker	2½ 41½	2½ 36½	5 78	
	C. B. TUCKER, Captain.			

**North End Gun Club, Pittsburgh, Pa.**

PITTSBURGH, Pa., Feb. 22.—In view of the fact that two cups were shot for, twenty-two shooters turned out, although put to a disadvantage by a prevailing high wind, which accounts for poor scores. The race consisted of 50 targets, and S. M. Crothers finished with 44 out of 50, winning the first cup, while Charles C. Irwin followed him closely with 43, capturing the second. Following are the scores in the cup race:

S M Crothers	44	H Robertson	39
C C Irwin	43	Bunn	39
L Lautenslager	42	W H Denman	38
H E Brooks	42	C W Crider	38
Nicholas	42	L W Duff	37
O L Kirch	42	C Kirch	37
E N Gillespie	41	J H Bruff	37
L Fowble	41	R P Tannehill	36
J Knickerbacker	41	Patterson	36
F Garver	40	H MacPherson	35
D W Baker	39		
H M Stewart	39	EDNA E. LAUTENSLAGER.	

**Indianapolis Gun Club.**

INDIANAPOLIS, Ind., March 1.—The gun club was favored to-day with good weather and an attendance of thirteen shooters. Moller was best in spots with two straights and a run of 61, but Edmonson, Moller and Appel beat him for the high average with 90 per cent. broken. The running contest for the Du Pont fob closed in favor of Edmonson, who made the best average in the six shoots. Scores as below:

Practice:			
Shot at, Broke		Shot at, Broke	
Moller	155 136	Keeler	90 42
*Hymer	135 96	Dixon	80 70
Wilson	105 76	Appel	60 54
Alig	105 69	Lewis	60 49
Edmonson	105 95	Britton	60 47
*Vietmeyer	100 79	Hixson	60 32
Blessing	90 72		
Du Pont trophy, 50 targets:			
Edmonson	41	Lewis	34
Dixon	39	Britton	43
*Professionals.		R. R.	

**Farragut Sportsmen's Association.**

EAST CAMDEN, N. J., March 1.—The semi-monthly shoot of the rifle section of the Farragut Sportsmen's Association was held to-day. Snow won high gun score by 2 over Frink, 124 to 122, as follows: Till 83, Rainey 98, Snow 124, Hettcoth 114, Holt 97, Fox 115, Frink 122, Wark 75. Till defeated Holt, 20 to 18, in a match shoot at 25 blue rocks, and Snow lost to Rainey in a match at 75 targets, 58 to 56. They were even on the first 50, and both did their best work on the last 25, Snow smashing 20 and Rainey getting 22.

**Baltusrol Golf Club.**

NEWARK, N. J., March 1.—Henry A. Barclay won take-home cup to-day with 22 from 6, on the traps of the Baltusrol Golf Club; he was also high man in the 50-bird handicap. Benjamin Fincke won the 25-bird club championship. F. N. Cowperthwait has offered a trophy to be contested for during this month, to the gunner making the best score in a 25-bird handicap event, two targets being released at the same time. Scores:

Silver cup, 25 birds, handicap:			
H A Barclay	6 22	J F Hahn	4 17
S H Browne	0 21	B C Fincke	1 17
G A Williams	2 19	Dr D W Granbery	0 14
F N Cowperthwait	2 18	N L Herrick	0 25
Match cup, 50 birds, handicap:			
Barclay	10 40	Fincke	2 31
Williams	4 39	Granbery	0 29
Browne	0 37	Herrick	0 49
Cowperthwait	4 34		
Club championship, 25 birds:			
Williams	19	Cowperthwait	14
Fincke	22	Hahn	10
Granbery	16	Herrick	22

**Larchmont Y. C.**

LARCHMONT, N. Y., March 2.—Five thousand clay scalars were pulled here to-day, with the largest number of destroyed ones credited to Ralph Spotts, who took high gun honors in consequence. He broke 130 out of 150, and beat W. D. Hinds in a shoot-off in a 10- and 15-bird match, breaking all in the first and 13 in the second. Sam Halstead started with 6 and filled on 25 for take-home trophy. F. W. Fitzgerald drew 28 and made the difference between that and 93 for high in 100-bird handicap. Visitors' cup went with F. R. Sweet on 24 out of 25, with the second take-home trophy going to W. E. Ferguson on a full.

**Queens Gun Club.**

QUEENS, L. I., March 1.—R. Nash, of the Queens Club, broke 100 targets to-day. This was remarkable shooting, as he went straight in three strings of 25, falling down on four rocks in third frame. Scores: R. Nash 96, C. Vogel 91, W. Hyland 87, H. H. Shannon 85, G. Covert 80, Dr. Kingston 74, J. F. Kissam 74, J. Pressinger 69, B. A. Hinkson 64, G. Wiggins 64.

# They Picked "The Perfect Shooting Combination"

Over 5,000 more trapshooters used *Remington-UMC* Speed Shells in 1912 than used any other one make.

Over 1,900 more trapshooters used *Remington-UMC* Guns in 1912 than used any other one make.

## And They Made 1912's Big Trap Winnings

Here is a partial List of Amateur Successes achieved Last Year with *Remington-UMC* Guns or Shells or both.

- R. H. Bruns, Indiana State Tournament and tied for Second Highest 1912 Amateur Record.
- Vassar Cate, Southern Handicap.
- Frank Campbell, Western Handicap.
- H. P. de Mund, Arizona State Tournament.
- F. G. Fuller, Wisconsin State Tournament.

New York A. C.

PELHAM MANOR, N. Y., March 1.—George Fred Pelham left Siwanoy long enough to come back at Travers Island to-day. He won four events, and included in his victories the Day trophy shoot, a handicap at 100 clay pigeons, and the Stoll, Robinson and special cup contests. The distance handicap trophy was won permanently by O. C. Grinnell. Ralph L. Spotts won high gun trophy with 88 out of 100. The scores:

Table of shooting scores for various events including March cup, Stoll trophy, Robinson trophy, Travers Island trophy, and High gun trophy. Lists names and scores for multiple events.

West Chester Country Club.

ARTHUR CORLIES became champion of New York Stock Exchange in rock breaking ability at annual shoot held at the country club. E. A. Tauchert, with 66 won third on net breaks. Corlies had 85. High gross score was divided between W. S. Jones, Jr., and E. Kimball, each carding 96. Jones won shoot-off. Chauncey B. Spears and Howard Boulton finished on even terms for the second best tally from scratch with 83 each, the latter winning the shoot-off, 19 to 16. The summaries:

THE WARREN WONDERS CONTINUE TO WIN WITH

WINCHESTER

.22 Caliber Cartridges and Muskets

The World's Indoor Record Tied Again

A composite target of one of Sweeting's scores, 20 shots

Composite of 100 shots 996 x 1000

Just to show that their feat of tying and outranking the world's indoor record of 996 was not a matter of luck, but the result of skill coupled with the best of cartridges and rifles, the Warren (Pa.) Rifle Team made the

same score in a recent match. The individual scores of the members of the team were: Sweeting, 200; Munson, 200; Keller, 199; Wheelock, 199; Robertson, 198. The entire team shot Winchester .22 Long Rifle "Lesmok" Cartridges, regular stock loads, such as anyone can buy anywhere. Mr. Sweeting, Mr. Munson, and one other member shot Winchester .22 Caliber Muskets. This shooting, and that done by the team a short time ago, when they tied and outranked the World's Indoor Record, is convincing proof that

REGULAR STOCK W CARTRIDGES ARE BETTER THAN SPECIAL LOADS

Glenwood Country Club.

GLENWOOD, L. I., March 1.—The first crack at the cup offered by C. E. Berner (four high scores out of five taking the trophy), was pulled to-day and was won by H. J. Hornung with 45. Fifty targets will be shot for each of the five days. In the Jackson cup shoot Silkworth had high scores of 45 out of 50. The scores:

Table of shooting scores for Glenwood Country Club, listing names and scores for various events.

The New Columbus Gun Club Company.

A COMPLETE reorganization of the Columbus Gun Club has been consummated, and at a meeting held Monday evening, Feb. 24, the new club incorporated under the name of the New Columbus Gun Club Company, and the following officers were elected for the year to begin on March 1: John R. Taylor, President; J. H. Smith, Vice-President; W. R. Chamberlain, Secretary, and Fred Shattuck, Corresponding Secretary and Publicity. The new directors are: Frank P. Hall, J. H. Smith, John Keifer, John R. Taylor and W. R. Chamberlain.

The club house and grounds in Arlington, at which many national shoots have been held since its dedication eight years ago, will be improved and a series of popular shoots inaugurated.

The management of the club wish to extend to the shooters of Ohio, and the sportsman of the country a very cordial invitation to attend its different doings, and make the club headquarters when in this section.

The regular weekly club shoot will be held on Saturday afternoon of each week, and the first tournament some time in March or April, announcement of which, with program, will be mailed to the sportsmen about ten days previous. FRED SHATTUCK, Cor. Sec'y.

# THE BRAND

## Wins Pacific Coast Rifle Matches

Report on Indoor Rifle Tournament of the Pacific Coast, held in Shellmound Park, Emeryville, Cal., Indoor Rifle Range, February 6, 7, 8 and 9, 1913, under the auspices of the Shellmound Rifle and Pistol Club, shows the following:

**CONDITIONS:**—Distance of all Targets, 75 feet; 22 Cal. Rifles; any sights, including Telescopes.

### 100-SHOT CHAMPIONSHIP CONTEST

Winner, L. S. Hawxhurst.....score 2436 x 2500, PETERS  
Third, R. S. Wixson..... " 2214 x 2500, PETERS

### CONTINUOUS MATCH

The Regular 1/8 in. Ring Target Used. Distance 75 feet

Winner, L. S. Hawxhurst.....score 222 x 225, PETERS

### BULLSEYE MATCH

Winner, Ben Jonas, center measured 2 degrees, or 2-100 of an inch from center. Used PETERS

**NOTE:**—PETERS LONG RIFLE CARTRIDGES LOADED WITH SEMI-SMOKELESS WON FIRST PLACE IN EACH MATCH.

The **P** Brand is equally popular and equally effective in all sections of this big country.

Ask for **SEMI-SMOKELESS**, and don't accept any alleged "just as good" kind.

## THE PETERS CARTRIDGE COMPANY, CINCINNATI, OHIO

NEW YORK: 98 Chambers St., T. H. Keller, Manager.

SAN FRANCISCO: 608-612 Howard St., J. S. French, Manager.

NEW ORLEANS: 321 Magazine St., Lee Omohundro, Manager.

### Inter-City Shoot.

LAST YEAR it was Philadelphia that had the winning team at Madison Square Garden. This year the tables were turned and New York copped the kale. Ten men from each city shot, five high scores on each side to count. And of these counters, four 95s and one 91 were made by New York, against two 91s, two 91 and an 87 for Quakerville. The match was at 100 rocks per man, and the finals showed New York 469, Philadelphia 457.

New York Athletic Club turned in three 95s, Herrick, Spotts and Burns recording them. The indoor light affected badly the scores of crack aerosaucer exterminators from each city, but the general average was excellent. Scores:

New York.		Philadelphia.	
N Herrick .....	95	Behm .....	94
Dr Sauer .....	91	Landis .....	94
A L Burns .....	95	Newcomb .....	91
R L Spotts .....	95	Foord .....	87
J H Hendrickson...	95-469	Springer .....	91-457

### Daniel Boone Gun Club.

MARTHASVILLE, Mo., March 1.—The day was not very good for shooting—too bright. The sun was shining on snow. Our club is planning a shoot for March 21, a 10-bird affair, Jack Rabbit, per centage system. This shoot is to be given for the purpose of getting our neighboring clubs to meet and organize them into a league.

Shot at, Broke		Shot at, Broke

J Mutert .....	50 36		

J. O. WILSON, Sec'y.

### Smith Gun Club.

NEWARK, N. J., March 1.—J. C. Weller beat William Hassinger for high gun at the Smith Gun Club to-day. Weller made 186 out of 200 against 185 by Hassinger. But one perfect 25, and that was made by R. Bercaugh. The following scores were made: T. Leutheuser, 17, 17, 19; W. Hassinger, 21, 24, 24, 24, 23, 22, 23, 24; R. A. Hensler, 18, 16, 17, 17, 18, 19, 19; J. C. Weller, 24, 24, 24, 23, 21, 22, 24, 24; Harry Hassinger, 21, 21; E. Sweet, 16, 17, 15, 14; I. Castle, 21, 24, 21, 21; R. Bercaugh, 22, 21, 22, 25; H. Higgs, 22, 23, 24, 21, 23.

### Seacaucus Gun Club.

SECAUCUS, N. J.—The third annual meeting of the Seacaucus Gun Club was held at F. Woekener's Hotel, here on Feb. 28. The following members were elected officers for one year: Fred. Woekener, President;

Henry Matthies, Captain; Richard Strobel, Financial Secretary; Richard Morgan, Secretary and Treasurer.

It was decided to shoot every second Sunday at 2 P. M., alternating with Hudson Gun Club. During the month of March we will shoot on the 2d, 16th and 30th, and continue. The club will commence to shoot for the Du Pont trophy on April 13.

The grounds are situated on Mill Creek. Take White Line car; get off at Lauseckers, and follow along the carriage drive. R. MORGAN, Sec'y.

## Rifle Shooting

### Military Schools Championship.

WASHINGTON, D. C., Feb. 24.—The sixth week's competition among the military schools for the United States shooting championship, for which the War Department has offered a handsome trophy, shows the Wentworth Military Academy, of Lexington, Mo., still leading the League of the Western schools, and the Bordentown, N. J., Military Institute and the St. John's school, of Manlius, N. Y., tied for first place among the Eastern schools. The results of the week's match follow:

St. John's Military Academy of Delafield, Wis., defeated the Culver Military Academy, 906 to 891; Harvard Military School, of Los Angeles, Cal., defeated the Missouri Military Academy, 853 to 813; Wentworth Military Academy defeated Kemper Military School, of Boonville, Mo., 894 to 848; Bordentown, N. J., Military Institute defeated the Randolph Military Academy, of Morristown, N. J., 889 to 687; St. John's School, of Manlius, N. Y., defeated the Nazareth Hall Military School, 904 to 600; New York Military Academy, Cornwall-on-Hudson, N. Y., with a score of 858, won from Girard College, of Philadelphia, Pa., by default; New Mexico Military Institute, with a score of 844, won from the Miami Military Academy by default.

March 3.—The final match in the Military School Rifle Shooting League, finished last week, shows a clean score of victories for the Bordentown, N. J., Military Institute in the Eastern League. In the Western League, the Wentworth Military Academy, although defeated by the Culver Military Academy, finished in the League with six victories and only one defeat. The St. John's School of Manlius, N. Y., finished second in the Eastern Division, and the St. John's Military Academy of Delafield, Wis., and the Harvard Military School of Los Angeles, Cal., tied for second place in the Western Division. The Bordentown Military Institute and the Wentworth Military Academy, of Lexington, Mo., will now shoot-off for the military school shooting championship in the United States. The final scores of the League matches are as follows:

Eastern League.—Bordentown 920, vs. St. John's (Man-

lius) 899; New Mexico 862, vs. Nazareth Hall 597; Miami 870, vs. New York 852; Randolph 764, vs. Girard College, defaulted.

Western League.—Culver 932, vs. Wentworth 913; St. John's (Delafield, Wis.) 920, vs. Harvard (Los Angeles) 825; Missouri 788 vs. Hitchcock, defaulted; Kemper 842, vs. Kentucky defaulted.

### High School League.

WASHINGTON, D. C., Feb. 24.—The scores of the High School Rifle Shooting League for the national trophy for the week ending Feb. 22 show considerable improvement, but few changes among the leaders. This is the seventh match in the League series, and in Class A the fight seems to have narrowed down between the Iowa City High School, and the Deering High School, of Portland, Me., with Morris High School, of New York City close behind. In Class B, the team of the Salt Lake City High School seems to have things their own way with seven straight wins. They are closely followed by the Susquehanna, Pa., High School boys. The results of last week's match follow:

Class A.—Iowa City defeated Western of Washington, D. C., 964 to 773; Stuyvesant of New York City defeated the Baltimore Polytechnic, 920 to 861; Deering of Portland, Me., defeated Morris of New York, 945 to 937; De Witt Clinton of New York defeated New York School of Commerce, 891 to 843; Eastern of Washington, D. C., with a score of 798, won by default from Brookline, Mass.

Class B.—Salt Lake defeated Springfield, Mass., Technical, 940 to 819; Susquehanna, Pa., defeated Portland, Me., 953 to 945; Business of Washington, D. C., defeated St. Louis Technical, 839 to 675; Manual Training of Washington, D. C., defeated Utica, N. Y., Free Academy, 910 to 812; Sault Ste. Marie, Mich., with a score of 885, won by default from Tucson, Ariz.

Iowa City High School rifle team by winning the match last week from the Deering High School, of Portland, Me., with the phenomenal score of 875, practically assures that school of first place in Class A. In Class B, the Salt Lake City High School team seems certain to win, as they have scored eight straight victories. Consequently Iowa City and Salt Lake City will shoot off for the national high school rifle shooting championship. The scores in the eighth match of the series follow:

Class A.—Iowa City 975 vs. Deering 973; Baltimore Polytechnic 878, vs. Western High of Washington, D. C., 784; De Witt Clinton 900, vs. Eastern High of Washington, D. C., 778; Morris High, 908, vs. High School of Commerce, New York, 843; Stuyvesant 913, vs. Brookline, Mass., defaulted.

Class B.—Salt Lake City 949, vs. High School of Portland, Me., 929; Manual Training, Washington, D. C., 916, vs. Sault Ste. Marie, 904; Susquehanna, 964, vs. Utica Free Academy 800; Springfield, Mass., Technical 906 vs. St. Louis Manual Training, 509; Business High of Washington City 819, vs. Tucson, Ariz., defaulted.

U. S. R. A. League Contest.

SPRINGFIELD, Mass., Feb. 25.—The following clubs had tie scores: National Capital-Pittsburgh in the sixth, Boston-Olympic in the ninth, Portland-Denver in the tenth, Pittsburgh-Boston in the twentieth, Denver-Philadelphia in the twenty-third, National Capital-Philadelphia in the twenty-fifth.

The following clubs are tied for place: Manhattan-Spokane, Columbus, Louisville, Shell Mound and Providence with 14 lost; Belleville, Osborn and Tacoma with 20 lost; Myles Standish and Cincinnati with 21.

It is possible that St. Louis-Colonial and Youngstown will be tied for place. When the tied scores are shot off, there will necessarily be a readjustment and other ties for place to be decided.

Special sets of targets have been sent all clubs likely to need them, and they will be notified as soon as possible after the returns are in to shoot off ties. Ties not shot off in time will be forfeited.

The official scores in the twenty-third and twenty-fourth matches follow:

Twenty-third match: Portland 1117, vs. Springfield 1127; Boston 1110, vs. Manhattan 1122; Denver 1094, vs. Philadelphia 1094; Olympic 1116, vs. Spokane 1124; National Capital 1116, vs. St. Louis-Colonial 1070; Columbus 1060, vs. Providence 1049; Pittsburgh 1130, vs. Tacoma (targets late); Myles Standish 986, vs. Osborn 1019; Shell Mound 1080, vs. Cincinnati 983; Baltimore 1043, vs. Youngstown 1080; Dallas 1010, vs. Belleville 993; Louisville 1074, vs. Citizens (targets late).

Twenty-fourth match: Denver 1105 vs. Boston 1139; Olympic 1127, vs. Portland 1094; National Capital 1069, vs. Springfield 1119; Columbus 993, vs. Manhattan 1127; Pittsburgh 1136, vs. Philadelphia 1090; Myles Standish 1030 vs. Spokane 1139; Shell Mound 1083, vs. St. Louis-Colonial 1085; Baltimore 1049, vs. Providence 1080; Dallas 1008, vs. Tacoma (targets late); Louisville 1050, vs. Osborn 1011; Warren 1044 vs. Cincinnati 983.

Intercollegiate Rifle Matches.

WASHINGTON, D. C., March 1.—The results of the eighth match in the Intercollegiate Rifle Shooting League made no change in the standing of the clubs. In the Eastern League, Harvard University and the Massachusetts Agricultural College are still tied for first place, both having won their last match. In the Western League, the University of West Virginia still retain its lead, closely followed by the Iowa State University and the University of Minnesota, both having lost one match. The results of the eighth week follow:

Eastern League.—Harvard 948, vs. Vermont 902; Massachusetts Institute 946, vs. Cornell 919; Princeton 919, vs. Rhode Island State 813; North Georgia Agricultural 931, vs. Maine 874; Dartmouth 898 vs. Lehigh 817; Massachusetts Agricultural 965, vs. Columbia defaulted; Norwich 926, vs. Coleman, defaulted.

Western League.—California 913, vs. Nebraska 838; Wisconsin 916, vs. Oklahoma A. and M. 874; Minnesota 934, vs. Purdue 914; Michigan Agricultural 932, vs. Kansas 845; Louisiana State 887, vs. U. S. College of Veterinary Surgeons 865; West Virginia 925, vs. Washington State, defaulted; Iowa State, 951, vs. Missouri, defaulted.

Interclub Series.

WASHINGTON, D. C., March 1.—With only two more matches to be shot in the interclub series to determine the national shooting championship, and these against weaker clubs, the Warren, Pa., Rifle Club is practically certain of winning first place in the Eastern League. In the ninth match, just ended, they defeated their opponents, the Myles Standish Rifle Club, of Portland, Me., by 13 points. The results of last week's match are as follows:

Thirteenth Regiment R. C. of Brooklyn, with a score of 892 won by default against New Haven; Birmingham R A defeated New Orleans R. and R. C., 961 to 904; Warren R. C. defeated Myles Standish R. C., 987 to 969; The Park Club, of Bridgeport, Conn., defeated Manchester, N. H. Rifle and Pistol Club, 991 to 974; District of Columbia R. A. defeated Presque Isle R. C., of Erie, 987 to 952.

The Progression of Forestry.

BY ROBERT PAGE LINCOLN.

FORESTRY, in the sense of the word, means the protection and preservation of our timbered districts by the following of a careful judgment, under the supervision of men especially fitted for this task, and yet forestry means more than protection and preservation. Although the two features walk hand in hand, so to speak, it is yet notable that many an issue has to be met with quite aside from the above mentioned qualities. The forester is not alone in his task. With him must be the lumberman, for without the one the other would have a burden on his hands. Hence, lumbering is a valuable unit in the conservation of our great forests. The forester with his keen judgment marks out the old trees standing in the way of younger timber. These must be done away with to aid the growth of the new generation. Here is

Regularity AND Reliability

are always prominent in the action of

SMOKELESS SHOTGUN POWDERS

EXAMPLES of these features are conspicuous in trapshooting tournaments. Among these are the contests at Stockholm, Sweden, where Americans scored

A World's Victory at the Traps

and defeated the experts of Europe in a spectacular manner. This achievement of winning the Team Race and Individual Championship is more proof that Du Pont Powders DO make and break records at the traps.

ESTABLISHED 1802

where the lumberman steps in and performs his task. Nor is this all that comes under the head of forestry. The menace of the forest fire has wasted millions of stands of timber. Without the help of man in replacing this valuable asset, nature would fall short of her power; the consequence would be that where once the forests held sway, nothing would appear in the shape of tree growth for many a decade. The forester has solved the problem by planting over these practically deserted grounds, and the work is extended into districts where tree growth has never appeared in any form. Waste lands, unfit for agricultural purposes, have been utilized for forestry purposes, thousands of acres being

planted with small pine shoots that some day will rise into a mighty forestry to benefit generations to come. In even the most unlikely soil it is not hard to make a pine shoot take root. Thus it will be seen the movement, now so well started, bears with it a vital significance that must not be slighted. Here there are manifold opportunities, which, extended along the right lines, are sure to bring about a reclamation of seemingly worthless ground. Lumbering in the past was a menace to the life of the standing forest. The old-time lumberman followed no rules, and recognized no laws. The main idea he held was to get as much profit out of what presented itself as possible to the exclusion of all

# Parker Gun Victories in 1912

**T**HE highest official average for the season of 1912 at both **Single and Double Targets** was made with **Parker Guns**.

As on every previous occasion, the bona fide **Championship of America** was won with a **Parker Gun**, Mr. W. R. Crosby scoring 198 x 200 targets at 18 yards rise. Same man, same gun, made the **World's Record**, scoring 98 x 100 targets at 23 yards, which is a truly wonderful performance.

Small bore **Parker Guns** are recognized as the Standard Game Guns of America and are gaining in popularity every season with the most progressive sportsmen. For full information regarding guns in gauges from 8 to 28, address

forms of conservation, protection and preservation. This destructive lumbering was a menace to the life of the forest. Only those trees containing the most lumber were felled, and the body vitals of the tree alone was brought into direct use. No care was taken to see to it that the younger trees were safeguarded. As a matter of fact they were often ruthlessly cleared away, and in many ways injured. In the wake of such relentless proceedings the lumberman of the past left a series of combustible material that was soon to be followed by the inevitable forest fire, which has smoothly finished up the work nearly completed by the destructive lumberman. The barren mountain sides in the Western country are an example of devastation wrought, and only the united efforts of men, thoroughly versed in forest perpetuation, can carry on the work successfully, a task that is not so easily overcome as would seem. Forestry, as it is practiced in the present day, is worked along systematic lines with recognition given every available feature that would seek to retard the growth and well-being of perfectly healthy trees. Hindering elements such as insects and fungus, the accumulation of worthless trees that stand in the way of a younger generation which must be removed, the improvement of the ground to the direct benefit of the growing branches and fallen trees, to stay the fire. The constant aim of the forester is to protect and preserve, and to make possible the growth of healthy trees. By the removal of worthless trees and the proper care of the ground around them, it may well be seen that it is possible to make for a better quality of timber in the younger trees.

Where the old-time lumberman brought into utilization only the very best grade of timber to be found, recklessly cutting the tree off four or five feet from the ground, thus leaving a stump with much lumber in it, and also leaving as waste material the branches, now all this is

made use of. We have arrived at a stage where economy and minute consideration work hand in hand. Practically every bit of a felled tree is utilized, and from the appearance of things the Government will not stop until the whole of a tree may be utilized for some definite purpose. The experimentations at the various Government stations evince a great interest in this feature, and we may expect notable results in their scientific endeavors in the future. The tree life on the steep mountains of the West is a notable ally to man. These mountains with their rocky formations yield but little encouragement for the young trees or seeds to attach their roots in order to obtain nourishment. Soil is of course a prime requisite, but this is not always available on these granite mountains. Thus if the tree does attain a hold upon the rocks, in the crevices and pebbles therein, it is a long time in obtaining a growing start. What scanty soil there is it has taken ages to realize, but when it once has attained a firm hold on the earth or rocks, everything coming down the mountain side is stayed by these trees, thus gradually forming that thin layer of mold which in time becomes earth. The gradual formation of this leaf mold is the means of doing a world of good to the tree life. The seeds that then fall have a chance to come to growth with a firm hold. This thin layer of soil, or leaf mold, on the mountain sides checks the rain and absorbs the melted snow. If a forest fire should sweep these mountain sides, the entire work of nature would go for naught. The leaf mold would be destroyed, the trees burned, and when the spring comes, the melted snow would rush down the hillside carrying with it the soil, wearing down to the bed rock and pouring rocks and soil into the streams in the valleys, clogging them and causing floods. To meet this problem the Government has directed its efforts into channels that attack it on all sides. The forest ranger is one of the foremost figures in the busy life of this

nation, for to him falls the duty of protecting from the ravages of the flames the immense tracts of timber that make up our standing forests to-day. At first the proposition was a gigantic one to undertake and seemed impossible on the face of it. But in the present day we find our forests patrolled by an army of men in the interest of forest protection and preservation, fully capable of handling the exigencies of the situation. Given a certain well-defined section to watch over, it is his duty to guard against the possibility of fires, and if one exists, to use every means at his command to put it out of existence.

The ranger, if he is in a mountainous district, has what is known as a lookout, a height from which he can command a view of the section under his observation. For hours he will stand on this height, scanning through his field glasses the country below him. He can tell at a glance whether a trail of smoke rising is from a settler's home fire, or whether it is from a camp-fire. However, if it appears to be suspicious, he is on his horse to the scene of disaster. Since the Government installed telephones throughout the forests, it makes the work of the ranger considerably easier. He can call up a ranger nearer the scene of the fire, telling him minutely where it is located, and the other man will then be on the spot in double quick time. When the second man reaches the fire, he at once proceeds to build fire breaks, and with his shovel throws up trenches all around. In the mean time help is coming, and while he may not have put out the fire, he at least has hindered its progress.

Everything is worked by system, and it can well be seen that only trustworthy men can fill the position; men who have a love for the work and who are skilled in the ways and means of bringing about the annihilation of a spread fire. Each ranger's district is supplied with a network of trails which makes access to a fire comparatively easy. Gradually step by step the Government is attaining perfection in its endeavors, and it will not be many years before the entire forest area will be under the closest of surveillance, making it impossible for a forest fire to do great damage. One of the features of the forester's work is to keep his territory as much as possible rid of fire fuel scattered on the ground.

Most fires originate from camp-fires that have been allowed to remain unquenched. The carelessness of some outdoor men is notable, although even where a fire has been thought to be completely stamped out, or soaked with water, a spark fanned from the coals into the brush will do the mission. Most of the unexperienced men undertaking a trip through the wild districts use what is known as a back log against which to bank their fires. Once a fire has bitten into a seasoned, pitch-impregnated log, more than ordinary care is needed to put it entirely out. A fire should be covered with dirt or sand upon leaving it, or it should be soaked thoroughly with water. It is a precaution that must rigidly be recognized by all, for it is for the good of the people.

It is said that sparks from the engine of a passing train will often prove the basis of a forest fire, and it is commonly believed that lightning striking in dead trees will ignite them. This latter is true in rare cases. The forester is guarding against the possibility of lightning

proving a destructive element by leveling all dead and worthless trees. Lightning striking in a green tree is never known to prove the basis of a fire. There are some that hold that insects do more toward killing out a forest than a forest fire. This menace is another factor in the situation that must be successfully met.

One of the foremost of insect tribe that attacks the pines is the pine beetle, and a depredation of a swarm of these killers will bring about the destruction of several thousand acres a year. It begins its work in the early part of the summer, when a swarm will settle on the trees and bore into the trunks. Once they have run their galleries, they lay their eggs, which are readily hatched, the young grubs following the inner tissue of bark eating around the tree, and usually two months of such unceasing boring kill the pine. Hundreds of thousands of acres of pine have been destroyed by the depredations of the pine beetle. Not alone addicted to operation in the Western country, it has in its time over-run the Eastern States, the Southern States, and here and there all over the timbered districts of the West.

As an example, take the situation in the northern part of Oregon some years ago. The ravages of an army of these pests destroyed some 100,000 acres of pine. In the wake of the beetle comes the inevitable borer which properly finishes the work so ably commenced by the beetle, with the result that a few years will find the pine an utter ruin and falling apart. Working side by side with the beetle is another of the insect tribe, the weevil, whose presence is a sure sign of vital destruction. It is notable that many varieties of parasite life will at the same time attack the same tree, thus making the work of death quick and sure. Once having gained their end, the army retires, and the accumulation of fungi becomes evident, and the diseased tree will soon be a rotten mass. Hardwood trees are also attacked by these predaceous insects, but the nature of the wood hampers the

work of destruction materially. While an oak, chestnut, hickory or birch is able to withstand these bodily assaults longer than the more softly vitalized trees, in time they are sure to come to an end. Young saplings are often attacked by these parasites with the result that the upper part of it will die, while the lower part will send out a shoot to one side which itself may be encircled by the busy workers, making it a stunted and deformed tree which we often notice here and there in the woods.

In the endeavor to cope with the situation, the Government has a great task upon its hands, for so startling is the magnitude of these insatiable destroyers and so alarmingly prolific are they in multiplying, that extreme patience and scientific dealing only can conquer them. The Bureau of Entomology in Washington is extending close researches to the demanded needs. In time we may expect scientific results in this direction that will make elimination probable. The forester of the present day does all that he can to check the spread of these ravaging parasites by cutting down and destroying all diseased trees, and by careful watch is able to keep down the invading host to a small degree. It can, therefore, be seen that the forest fire is not alone in the field, but has a very capable and enthusiastic army at its lead, as industrious as they are injurious, leaving no piece of work half done, but clearing it up as they go. That birds are of a great value to the forests and to the land in general cannot be too strongly emphasized. Were it not for them, this land would be over-run with insect life. As it is, the annual crop of grubs and eggs and the insects themselves fall prey to the indomitable appetite of the various and many members of the bird family, some of which subsist almost entirely upon insects.

Forestry is by no manner of means a new idea. Far from it. In the countries of the Old World the practice has been constantly before the people for centuries until in the present day everything is worked on a practical, scientific scale that is as close to perfection as the power of men united can make possible. Among the European countries, Germany is perhaps the foremost in the progression of forestry, having arrived at the point where a thorough system of culture and looking after has tended to make her 35,000,000 acres of timbered land the finest and the best kept in the world. Everything is worked on a protective basis; conservation in every form is recognized, and what with the scientific shrewdness extended, the best of results are noticed. According to the laws of that country only so much timber is removed each year as the forests are well able to produce, thus evenly balancing the productiveness and the removal. In our own country we remove at least four times as much timber as the 700,000,000 acres of timbered land can produce. Glancing at this proposition from a technical viewpoint, it is easy to see that such practices must cease if the sense of proportion be developed. Our own Government is taking Germany as an example, and is building up its system to match that which has been so ably exhibited. Switzerland is another country in the foremost rank where forestry has been practiced for centuries, having something like 2,500,000 acres at her command. Managed as it is by skilled men, it not only is one of the most profitable assets to

the country, but is actually a pride to the people who seem to evince vastly more of a sentiment toward God's first temples than actuates American people. France is another country where forestry is a recognized factor in the productiveness of the land. In France much of the land was early cleared in the interest of agriculture, but it was found that the soil was not fertile enough for such general purposes, and at once a system of reforestation was commenced with the result that to-day something like 3,000,000 acres have undergone timber restoration.

Germany for all her deliberate care in forest culture still imports from Austria-Hungary a vast deal of its wood, one-sixth of which is needed to fill out her demanded balance. Austria has something like 24,000,000 acres of timbered land, and Hungary about 23,000,000. Here then as in other countries, forestry is conducted on a scientific scale, which is remarkable for its systematic thoroughness. Norway has about 20,000,000 acres of timbered land, but the best that can be said of it is that they have a forestry bureau, and men to watch over the timber, but they are mostly paid on an inferior scale. No care is taken as regards production or removal, although even at that rate Norway timber would hold out a long time. Sweden is a trifle more advanced than its neighbor in its care of the forests, but there is no comparison to be drawn between it and the other countries to the south.

One-half of its land area is timbered, containing about 50,000,000 acres altogether. Russia has unquestionably the largest forest area in the world, and is the leading timber exporter among the nations of the globe.

Like Germany and its near neighbors, these forests have been carefully guarded, and if their civilization reaches its goal, the time will come when it will realize the perfection attained by the countries to the west of it. Italy remains at the bottom of the list in the question of timber. Little of what there is has had scant consideration by the Government, and as a result nature has suffered. Furthermore, conditions for the perpetuation of the forests here are most uninviting, the one big drawback being the nature

of the soil, the major portion of which cannot be reclaimed. In Asia we note forest conditions both good and bad. India excels in her forest conditions and her system of protection against fire is perhaps the one nearest perfect. With her 180,000,000 acres of timbered land, she is among the leaders of the world. In China we notice perhaps the greatest destruction of timber holding singular distinction of having wilfully destroyed her forests, and as a direct result there has been famine and flood in the country from the earliest times. Not a stick of wood in China but that is found useful in one way or another. What brush and saplings are put on the market are made into charcoal. Reforesting has never been encouraged, and it is doubtful if it ever

will find a place among the policies of this mighty country. On the other hand, Japan has over 58,000,000 acres of forest land, and not alone has she one of the best forestry services in the world to-day, but for centuries she has conducted this feature to the very best of knowledge and utilization, proving the far-sightedness and shrewdness of this unique nation upon which the eyes of the world are constantly directed, and from whom we expect unceasing progress.

Returning to this country we find that Canada, the lady of the North, has something like 260,000,000 acres of timber. Her wood exports are great, almost twice as great as that of the States. In this country the Government protective systems, both as regards fire and reforesting, are the best that time and labor can make possible, and every year millions of young tree shoots are given to the settlers, free of charge, as an encouragement for reproduction. It has not been so very long that the United States has been directly interested in the perpetuation of our forests, but in the present day there is an awakened sentiment that is constantly growing more distinct. The people realize the vastness of the proposition, and the yearly expenditure in this direction is great, indeed.

Many years ago, when President Harrison recognized the importance of the situation in setting aside forest reserves, the idea was a gigantic one to be met with, and people did not take to it favorably, for the time and labor necessarily drew upon the treasuries for a vast sum of money. But to-day we can meet the demands of any project in this line, and the Government is sparing no money in making perfection possible. The establishment of a national forest reserve means much labor. The section must be mapped out by trained men, and thereafter a perfect system of guarding it made possible. Most of our forest reserves are in the mountain regions where they cover the mountain sides and protect the streams, and in many notable ways are a direct help to the land and its wealth. As has been noted previously in this article, the United States has at its disposal some 700,000,000 acres of forest land. This extends throughout the Atlantic States and the Gulf region. In the Mississippi valley most of our hardwood is found, while the mountains of the west claim the greater portion of this wealth. Aside from the above there are 40,000,000 acres of timber in the Philippines, most of which is cabinet wood, and one of the most valuable assets of the country. Porto Rico has a national forest reserve. Conservation of forests is world wide in its appeal. Governments recognize the vital importance of protecting and aiding in its growth the vast wooded sections that make up so much of the globe's area. They recognize that the land unfitted for agriculture may be utilized and reclaimed for reforesting purposes, and the future will see a great stride in this mighty movement.

USE other avenues of getting business than FOREST AND STREAM's advertising columns by all means, but don't overlook this resultful method by which you keep your proposition and its merits before the mind and eye of sportsmen.

THE best time to set a hen is when the hen is red.—Josh Billings.

## Airedale Terrier Club of Long Island.

THERE were some surprises, a few reversals and a corresponding number of setbacks at the splendid show at Murray Hill Lyceum last week. The big shock was placing Gold Heels, owned by John McGough, of Brooklyn, ahead of King Oorang, Ch. Tintern Royalist, Emperor Vickery Soubrette and several others. King Oorang defeated Gold Heels in the last show at Philadelphia, although the Albright entry was an expected winner.

Gold Heels won first place in the show of the Airedale Club of America last November. The judge was Michael Jennings, and it is safe to say that this decision was not popular with the majority of fanciers.

The Vickery Kennels captured a large share of honors. The winner is a well-molded animal. His coat about the head and legs is of rich tan, with grizzly saddle.

The first surprise in the judging came in the open class, with Gold Heels, Champion Tintern Royalist, King Oorang and ten other Airedales contesting. The judge gave the blue ribbon to Gold Heels with King Oorang second and Tintern Royalist third. In the winners' class, Oorang got reserve to Gold Heels' first.

Slim Lass won first among the puppy bitches also the Vickery cup for best novice in the show. In the class for limit bitches, an unexpected ruling was Empost Nattie, who took no honors. Miss Moonlight won. Empost Nattie was judged the best of her kind at the Newark show a few weeks ago.

Vickery Soubrette won in open bitches, defeating Landcroft's Dawn, a champion at ten months old. The Vickery Kennels took everything in the brace class, the first place going to Tintern Royalist and Vickery Soubrette, and second place to Emperor and Lodestar.

The open class for best dog or bitch had nine entries. Gold Heels was declared winner. In the open sweepstakes for the best American bred dog or bitch, there were only two entries, all the others withdrawing after Gold Heels had taken everything in sight. Vickery Soubrette, the Westminster winner, was shown against Gold Heels in the final contest of the show, and Judge Jennings again awarded the prize to the new Airedale star.

Vickery Emperor took first in the limit dogs, Vickery Windstorm won second among the puppy dogs, Vickery Soubrette won first among the American bred open and winners bitches classes, while Vickery Miss Moonlight won among the limit bitches. The Vickery brace won the challenge cup offered by the Ladies' Kennel Association of America, with Tintern Royalist and Vickery Soubrette, and also won the team class.

Gold Heels won in every class in which he contested. His victories were in the classes for American bred dogs, open dogs, winners' dogs, and the two open sweepstakes classes. The awards follow:

**AIREDALE TERRIERS.**—Puppies—Dogs: 1st, Howard Ehrich's Landcroft Gladiator; 2d, Vickery Kennels' Vickery Windstorm. Novice—Dogs: 2 1st, W. A. Burtenshaw's Skibo Aviator; 2d, Tanglewood Kennels' Tanglewood Turmoil. American-bred—Dogs: 1st, John Mc-

DIANE OF MORRISTOWN.

# The Trail of the Bull Dog

An account of the wonderful 50,000 mile auto trip of Charles G. Percival, M.D., written by himself.

**IF YOU LOVE OUT-DOOR LIFE** you will revel in this book. It incarnates the spirit of the woods and silent plains, the mountains, lakes and rivers.

From the White House at Washington, where Dr. Percival delivered a message to President Taft, to the wilds of Alaska and the Yukon is a big step, but Dr. Percival made it, and was the first man who did by auto, traversing 44 states on the way, climbing 11,000 feet by auto, crossing deserts where he almost lost his life, and calling on Diaz, Madero, the Lord Governor-General of Canada, the Governor of Alaska, thirty-nine state officials and four hundred mayors.

## INVALUABLE FOR TOURISTS AND CAMPERS

The authoritative information on food and equipment for out-door life given in this book is alone worth many times the price of the volume. And it will disclose to you places near at hand and far afield that you will wish to visit for fishing, hunting or sight seeing. Illustrated by over 200 splendid views. Reads like a tale of adventure where pleasures and hardships are agreeably mixed, yet is the true story of the most remarkable trip ever made by automobile.

**YOURS** with one year's subscription to **HEALTH MAGAZINE** for only \$1.10. **HEALTH** is the oldest magazine in America devoted to physical culture and out-door life, an illustrated monthly. Regular subscription price \$1 yearly.

## National Sporting Terrier Association.

To American Terrier Fanciers:

The National Sporting Terrier Association is being organized.

Membership is open to all sporting terrier fanciers, and the object of the association is to promote, by every proper and legitimate means, the best interests of these breeds. The association will in no way conflict with the various specialty clubs, but will supplement and strengthen their efforts. Being national in scope and drawing members from several breeds, the organization will be able to do effective work for the dogs and to offer material assistance and encouragement to its members.

The plans formulated have several features that are new and which should be of great benefit to its members.

First—Members will be divided according to their breeds into sections, each section electing two of its own representatives from different parts of the country to serve on the board of governors.

Second—The association will publish a monthly sales list, which will be sent to members, to the kennel press, and to a list of other interested persons. Members can publish in this

**CHAMPION BRYNWOOD RAINBOW.**

Owned by Brynwood Kennels.

list, without any charge, dogs they have for sale. Efforts will also be made by advertising in suitable mediums to interest the general public in sporting terriers, and the association will also collect and distribute to the kennel and lay press news items about our dogs.

Third—The association's gold medal will be awarded to every member who breeds a champion, regardless of the dog's ownership.

Fourth—The association will hold a show for sporting terriers in Chicago next summer, with full classification and liberal cash prizes, and if possible a similar fixture will be established in the autumn in or near New York or Philadelphia. Exhibitors of sporting terriers will be encouraged by many specials offered at all leading A. K. C. shows, open to members' dogs registered in the A. K. C. stud book.

An organization meeting will be held during the Chicago show, when the constitution will be drawn up and officers elected. You are cordially invited to be present.

The association aims to be of real value to its members. Naturally, the greater the membership, the more work can be done. This work should appeal to every sporting terrier fancier. Will you help? The initiation fee of \$5 is waived for charter members who join before

**YESDIHC CHALLENGE.**

First, Open Dogs and Bitches. Owned by Yesdihc K'l's.

formal organization. Mail your check for \$5 for 1913 dues to the committee. But do not stop there—tell your terrier friends.

**THE COMMITTEE.**

## The Pointer Club of New England.

THE annual meeting and banquet of the Pointer Club of New England was held at Hotel Lenox, Boston, Mass., Feb. 25, 1913, and proved one of the pleasantest occasions of the season.

Genuine pointer enthusiasm predominated, and those who were not able to attend the New York Show, listened with much interest to reminiscences given by members of our club who were present, and the result of the judging shows that Massachusetts is not yet in position of the cat's tail.

The annual election of officers resulted as follows: President, Robert Leslie, of Swampscott; Vice-President, George F. Richards, of Lynn; Secretary and Treasurer, Vinton W. Mason, of Cambridge. Directors: Lincoln E. Pettee, of East Foxboro; Leander A. Penney, of Somerville; M. T. Mason, of Northampton; F. J. Lenoir, of Greenwood; F. H. Miller, of Hingham; C. W. H. Condrey, of Fitchburg.

The following were appointed judges: Robert Leslie, Dr. J. S. Howe, F. J. Lenoir, E. K. Dyer, L. E. Pettee, M. T. Mason, Joe Armstrong.

## Good Breeding Spoils the Mouser.

THE old adage that "breeding always tells" does not appear to apply to cats. At the show of the Southern Counties Cat Club, says the

**UNIVERSAL DETECTIVE AGENCY,**  
304 Colcord Bldg., Oklahoma City, Okla.

London Daily Mail, there were nearly 500 show cats, and each showed every sign of gentility. But the well bred cat gives the impression that it is careless of mice and disdainful of the plebeian pursuits of the ordinary kitchen cat.

Miss G. Cheatham, whose blue Persian Oaklands Steadfast was pronounced the best cat in the show, said:

"I breed exhibition cats simply for the pleasure of producing the most perfect cat, not for any ulterior purpose such as one has in breeding greyhounds or bloodhounds or spaniels. Highly bred cats are no more intelligent or clever than ordinary back garden cats, and certainly many of mine will not so much as look at a mouse."

#### Caught Black Bear in Santa Claus Trap.

A big black bear caught in a trap set in a chimney by a little boy to trap Santa Claus, was the story brought from the wilds of Lower Louisiana last night by C. J. Labarre, returning from a two weeks' hunting expedition, says the Houston (Texas) Post. Mr. Labarre said he hunted during Christmas with Cleoas Bertlot, a trapper, and used the latter's camp. Noticing half a dozen sharp hooks hanging in the chimney of the cabin, Labarre said he called his host's attention to the fact that they were placed rather high to hang cooking utensils on them.

"Oh, that's a trap my little boy fixed up to catch Santa Claus," replied Bertlot, who said his son had been listening closely to Christmas stories.

"During the following night a commotion in the chimney awakened everybody in camp," said Bertlot, "and it was found that a bear had tried to climb down the chimney and got mixed up with the books. The bear was caught and killed."

#### Good Practice.

It is a good plan for a young shooter to take out an empty gun and aim at every small bird which happens to raise before him. A great deal may be learned by occasional practice at this. The gun should be thrown up at the bird, and, as his mind is not obsessed by the necessity of shooting, he will see at once if he is on, and, if off the mark, recognize where his fault lies. He will also master the important matters of swing and chuck, and cultivate a clear eye and brain. What is more, he will get abundance of practice at handling and mounting his gun, and learn to appreciate how little need there is to fire hurriedly, which is the real cause of half the misses. The beginner may learn as much without cartridges for an occasional day as with them; and, if he is really intent on becoming a good shot, will not find the day dull and uninteresting.

### A Card of Character

A Card is much like a man, after all! The more character, the more power he has. The more character in your card, the more power it has.

#### The Peerless Patent Book Form Card

has more character than any card you have ever heard of before! It can be beautifully engraved or it can be neatly printed, as the user desires. It is necessarily always clean, because of the binding in book form with tissue paper between each card, and the book form also keeps it from becoming wrinkled or crumpled. Besides, it is always "right there" when you need it.

Can you think of more character for a card?

Write and get a sample tab of the cards, detach them, noting as you do so, the clean smooth edge at place of detachment, and the protection from dust and dirt. They have character to convince you, if you will but see them.

A SLACK IN THE DAY'S WORK  
From a painting by Percival Rosseau.

# "Through 18 Pages of the Telephone Book"

"I bought one of your 20-gauge Repeating Shotguns and had great success with it in the field this Fall. Also shot it at live birds and did great work, and then shot it against an eight-bore for penetration at 100 yards and beat it, driving two No. 4 shot through eighteen pages of a telephone book. Everybody is talking of this gun and you should sell quite a few of them here."

Yours truly,

LEO H. SHAAB, Elk Ridge, Md.

This is a sample of the kind of letters we are receiving almost every day. Get a STEVENS and you'll be sending in a letter like this yourself, because you can do such wonderful things with this wonderful gun.

Send for our beautiful illustrated catalog which tells all about Rifles, Shotguns, Pistols and Rifle Telescopes.

## ARE YOU A GUNNER?

*Do you love to follow your good dog over the fields in search of quail or chickens, or to struggle through swamp or along thick grown hillside, expecting to hear the roar of the ruffed grouse or the twitter of the fall woodcock? If so, you should have this new book.*

## AMERICAN GAME BIRD SHOOTING

By *GEORGE BIRD GRINNELL*

This companion volume to "American Duck Shooting" treats of the upland game which American sportsmen shoot over dogs—woodcock, snipe, all the quail, grouse and turkeys.

The first part of the volume is devoted to a description of the various species and their habits—the way in which they live their lives.

The second part of the book is devoted to upland shooting and treats of the methods by which all the upland birds are pursued and taken. The chapter "Aids to Shooting" describes the clothing, guns, and loads and dogs that the gunner may profitably use; while the last section of the book treats of the shooting of the future and the efforts to rear our native quail and grouse in domestication.

The volume is illustrated by colored plates of ruffed grouse and quail, and 48 full page portraits of different game birds and hunting scenes, with a number of cuts in the text.

*Cloth. About 575 pages. Price \$3.50, net. Postage 25 cents.*

**This book is of inestimable value. It contains the genuine hunter-naturalist facts given in the most entertaining and interesting style.**

## Leaves from a Sketch Book

By ROBERT PAGE LINCOLN

JUNE 17, 1911. I awoke bright and early this morning to the cheery call of the Wizard, who has a knack for early rising. and I knew as soon as his voice rang out that the fire had been replenished, and the morning meal was well on toward completion. And it seemed something like home to know that one could depend upon another, but then we all have our camp duties which by the way is a sure thing to follow when on an outing trip. Now, the Wizard, being gifted with the divine power of constructing things in the line of food, could not get out of it. He was chosen in the beginning of things as cook, whether he liked it or not. But then he is of the good sort, and would never have allowed us to suffer in agony. Now suppose for instance I had been chosen cook. As a cook I come under the banner of the battered saints. Once, and that was away down there when we were glorying in the beauties of Lake Manitou, I took a hand at preparing something for the famished fishermen who had been out on the lake trolling for mascalonge at least three hours, and it is a wonder I live to jot this down in the official diary. As the Scribe, my powers are limited to turning out so many words whether there is anything doing or not, and I do not mind it if I have my share of the joys eternal. Just so long as I catch so many fish a day I will cover page after page, even if I have to sit by the camp-fire all night.

As I have afore-mentioned, I tried to imitate a cook to appease the hunger that I knew was gnawing at the insides of the Athlete and the Wizard. The Student was down the lake in our canoe taking some bird pictures, or trying to. In a word I was endeavoring to make biscuits in the Dutch oven, which is a remarkable thing used by woodsmen and forest rangers sometimes, and are good fellows if one knows how to handle them. These biscuits surprised me. The dough, which I regret to say, was elastic in quality, baked all right, but then again they did not bake right. Now, how in the world do you think that Wizard does it? There he will stand mixing his flour and things with a feeling about him that encircles the camp and rises and hovers over the lake and the Canadian wilderness in general, and there I sit and watch, trying to steal from him his knowledge of these wonderful arts. My adventure with the biscuits brought tears of shame and humiliation to my eyes. They spattered upon the biscuits and rolled down to the lake, and when the fishermen finally were heard approaching across the still waters of the cove, I conjectured a lot of things, but decided to do the best I could and let it

go at that. Now the Athlete eats biscuits hand over hand. And when he arrived and I handed him one for his consumption, and he bit his teeth into it, I knew that my day of judgment had arrived.

The crust of the biscuit I had given him was of an adamantine excellence, and though the Athlete is famed for his fangs, they were unable to enter the divinity that he thought lay underneath. He thought after getting off the shell he would find the meat in the nut. But I got the whole biscuit right on the top of my dome of thought just as I made a hasty exit around the tent. I had visions of other worlds, and was sure that the one with so many trails and illuminations around it was Halley's comet. That's what I got for trying to make biscuits for hungry fishermen. It's awful. And when I again looked out there was the Athlete holding his stomach and laughing himself into a fit. I can fry fish and pancakes now and then for my own use, but when the star boarder is around it is a dangerous undertaking. Now you know why I was never chosen cook. The Wizard can cook. The Athlete gets the wood for the fire, because he is strong and healthy looking, and as a captain of one of the best known football teams in the United States has done much damage. One time the Athlete uprooted a pine that would have shamed the efforts of Hercules. You want to hear about that of course, but I will not go into details, for fear some perfumed high-

brow will call me a nature fakir. The Student has charge of the camera department, and the Scribe, while doing duty with the official book, does all the little jobs the others will not handle.

One time I washed underwear, but that's another story. This morning there is every appearance of a fine day awaiting us. We rolled out of our blankets and after a wash seated ourselves to sample the efforts of the Wizard in the line of culinary virtue. Every time I eat one of the Wizard's biscuits I love him more and more. He don't look as though he could do it, but still he is wonderful as a dough constructor. He should have a Carnegie medal, and I think as soon as we get back to civilization we will arrange a committee to investigate the old fellow. With the faintest indication of a breeze coming over the water there was something in the very air that quickened the pulse and sprung aflame in the heart. I looked far out over the waters and saw the further shore with the pines meeting the edge of the lake in one dash of gloom in that blue-black glory that is presented to one who looks upon the pines in the early morning, or as the shadows begin to fall at twilight. The sun had just peeped over the eastern brim of the pines, and the warm rays were sending their glamor into every nook as thought to search out the hidden places. The waters around the coves lay still and unblemished by the murmurless breeze; all was wrapped up in the dreams of the wilderness, and somehow

"I TRIED TO IMITATE A COOK."

"I AWOKE BRIGHT AND EARLY."

musings upon the grandeur of it all. I cannot think of these beautiful scenes save in that nature is watching all and always endeavoring to make one day better than another. Here, with the total wilderness on all sides and perhaps no human within a hundred miles of our camp, we are given an idea of what the world must have been when the Creator left it on the seventh day.

There is something so vastly inspiring about this grandeur, the pines, the waters, the spotless sky above that enters the being and clears away from its horizon all unseemly stains. The person who may not gather exaltation and innocence by this communion is indeed a heartless creation of humanity. It must enter into the soul of one in some manner or another. One may feel it in the limbs and gain a hundredfold by its application. Or it may appeal in a singular way to the primitive in one and bring him back over the route of the ages when man was a brute; the inherent call of the wild lies dormant in all. It is just that we become used to treading the old ruts in the bourn of man and never forsake them, but a little time spent close to nature will bring about a revelation in that it opens the mind to new thoughts and new experiences, feeding that innate craving that has never been thought to have existed.

The breakfast dishes having been washed up and put away, we laid our plans for the day. The Wizard and I had in view a trip further up the shore to investigate the fishing opportunities to be presented there, for we had seen a number of big black bass flirting their tails in our faces the day before, and were now going to find out if there were any remarkable specimens to be had. We each had a steel rod and the various incidentals that go with it. Slipping the canoes into the water, we were soon dipping our paddles into the crystal clear depths of the lake, one of the finest in Ontario. We had thrown off all our garments save our pants and shirts, and with the arms free, made the canoe leap out of the water. The ripples attending our course sprang aside and chased each other

toward shore. It almost seemed a shame to mar that tranquil expanse, so smooth and polished it presented itself to the eye like a glimmering floor of silver scintillating as the sun rays touched upon the ripples that moved away from us.

As we bent to the paddles we looked down into the depths now and then. Deep down it was, but so crystal clear was the water that everything was easily discernible when we slowed the canoe to let the waters calm. Now and then a big fish would swim leisurely by, his whole appearance giving an example of the wonderful freedom of this vast wilderness. For a time we absorbed the wonderful atmosphere of the morning, drinking it into the lungs out of the sheer exquisiteness of it all, and spent some time idly drifting along, content to float and dream the moments away. As the sun mounted higher in the limpid blue heavens, the gloom was being chased out of those secluded nooks, and now the day was well on its voyage toward night. Calm and sweet blew the wind in our faces. It could not have been said to have been blown, for it was but the memory of a wind so delicate and so delicious that a sense of marvel touched my consciousness and refused to leave my mind.

The canoe sped along toward its destination. No words crossed our lips, for it was an occasion in which speech appeared worthless, and therefore it was allowed to remain unsaid. Still, the feeling was there, and who may diagnose that feeling who has not experienced it. We drew gradually along toward the nook we had aimed for. Here I might add was an excellent place for the lusty fellows who are said to be the gamiest fighters, according to size, that inhabit the waters of America. For at the bottom of this cove there was a number of springs that bubbled up out of the earth, and around these springs they were wont to lie, enjoying the coolness and sweetness of it all. These northern lakes all have springs at their bottoms and the waters are always cold and clear. For this reason the fish are gamy the year around;

quite the opposite to fish found in the waters of the States who when the lakes become warm retire to the depths and refuse to take bait. Not so here. It is always a fisherman's red letter day, and when he wants fish he may be sure to procure it under the most pleasing circumstances. We reached the cove, and by the scant touching of the paddle to the water moved inward a mite. All was still. The time for sport had arrived, and keeping poised with paddle ready, I motioned to the Wizard to show his skill with the rod. Everything adjusted, he half rose and cast toward a rock that shoved its nose out of the lake. His bait was the well known and fully appreciated No. 1 "Convertible" Coaxer, the king of all bass baits. Out it shot, quiet and easy, and fell upon the water, presenting an appearance that was truly one of life and motion. Barely had it fallen, and its image had been erased from that picturing surface than the water broke with a flutter of foam, and it was in the mouth of a king. The tip of the Wizard's rod did the proper adjusting act of setting the hook in the mouth, and then the fight began. Taking the usual cue, I dipped the paddle and set my teeth on the pipe stem. The canoe was gently and carefully backed lakeward, and I waited the word of the Wizard for other directions, for all have their notions on which is the best way to keep a boat in position.

With the lure fast in his mouth, the king seemed to spring from the depths by the impetus of his tail and rose almost a foot high and dry, shaking his form and madly endeavoring to dislodge the hook. Finding this seemingly impossible, he dove down with a plunge and the fight again began. Racing outward he speeded in a great circle that promised to go by the canoe, but no, it ceased as quick as it began, for the tip of the rod was again brought upward and the fish rose once more shaking his head wildly, his gills wide apart, and his whole manner betraying one of bull-dog tenacity, which could only be shaken out of him by a long fight. Once more he was at it, this time changing his tactics, and rushing full tilt for the canoe, seemingly appreciative to the fact that his tormentors were there. The slack line accumulated fast. Under the canoe he shot, and with a breathless silence we watched. Presently he came to the surface in another leap on the other side of us, and it was quick work indeed to swing the canoe and for the Wizard to toss the line around the end of the canoe and swing it clear of the craft. The reel handle spun around, and the spool took on the loose line. There he goes again. He had been lying idle a moment and was just awakening to the realization that strenuous efforts were necessary if he was to make any show of escape. But the struggle had robbed him of much of his vitality, and though he yet was at it, cut and tear, the rod tip was lowering, and I knew that the time had just about arrived. Laying down the paddle I shoved out the net, and with the Wizard holding rod way back, I slipped it under and lifted the king into the canoe, squirming and flapping and gasping. But he was ours, and the experience was added to the store of those already known and appreciated. Just such experiences one can count up when life has shed its leaves, and the mind goes through the films of remembrance. We lured out six there and then returned to camp. The rest of this day was more or less uneventful.

# The Bears of Columbia County

By CHARLES LOSE

AS the children in school would say, Fishing Creek rises in the North Mountain, flows south through Columbia county, and empties into the North Branch of the Susquehanna at Bloomsburg. Its waters always have been, and still are, famous for the size and number of trout they contain, and the territory drained by these waters has been the haunt of large and small game since the time of the red man. The water of this stream is crystal clear, being fed by mountain brooks and by many beautiful springs around which still cling legends of the Indians. From Benton northward to the

JUST BEARS.

foot of the mountains, hills covered with dense thickets of trees and underbrush, matted together at times with laurel, crowd in on the stream and confine it to a narrow valley the sides of which are at many places high, steep and rocky.

The North Mountain, the source of the stream, is a really great mountain. It is a landmark that can be distinguished from miles away by its height, its broad level top, and its abrupt sides and ends. While many crops of timber have been taken from its summit and sides, it is still densely covered with a smaller growth, and is the home of wild beasts and sometimes of wilder men. Forty years ago it was made famous by a band of men who bought up old horses and mules and in the depths of the forest converted these animals into dried buffalo meat.

Such a section of country is bound to develop skillful anglers and noted hunters, and this section is no exception. The McHenrys, the Laubachs, and scores of others have grown up here, and as boys were inspired by the tales of their fathers to shoulder rod and gun and take to stream and forest for sport and game. The story of the catching of a large trout or the killing of a bear or deer will even now be told by a hundred firesides up and down Fishing Creek, and will furnish an incentive for scores

of anglers or hunters to start out on the following day. Lumbering and farming may appear to others to be the real vocation of the men of this section, but the men themselves know that it is hunting and fishing, and that work is an avocation, an incidental matter, to be put through promptly so as not to interfere with sport.

While the deer have increased in other mountainous sections of Central Pennsylvania, they have nearly disappeared in the North Mountain district. This is due no doubt to the skill of the hunters of this region. But if these hunters have lacked something of late years in the way of deer hunting, it was abundantly made up to them this last fall by the greatest supply of bears that the State has probably ever known in so limited a territory. Between Jamison at the foot of the mountain and Benton, a stretch of some fifteen miles, more than fifty bears were seen at one time or another, and hardly a day passed without a story of bears being seen and chased, and sometimes killed or wounded. These bears came by ones, twos and threes, and once or twice in droves, and they were of all sizes, from the little bears that the boys could kill to the big shaggy brutes that drove off the dogs and kept the men at a distance. The hunters, like the Minute men of the Revolution, slept with their rifles by their sides, and the magazines of their guns always filled with shells that would shoot far and strong. The dogs were worked up to a wild hunting frenzy, and in lonely places women locked the doors at nightfall and gathered their children close about them.

The cause of this great invasion of bears was probably the lack of mast, or "shack," as the old hunter calls it, in the immense tracts of wild land lying north of Columbia county. The usual crop of beechnuts, chestnuts and acorns was so small as to be practically nothing, and the bears were compelled to leave the mountains and migrate down the valley of Fishing Creek from whence they sallied out at night to forage on the farmers' cornfields and orchards. The banks of the stream, being steep and rocky and densely covered with trees and brush, made excellent hiding places, and the bears were only dislodged from these places by slow persistent drives made by men and dogs. Occasionally the bears, because of the close proximity to human habitations or because of lack of food, would grow restless and would move from place to place in broad daylight, and on such occasions would be seen by farmers crossing fields or would be encountered in the woods by bird and rabbit hunters. But generally they lay hidden in the thickets and among the rocks during the day and made their appearance only when driven out.

The largest bear killed during the fall was shot by Ira McHenry, a hunter of many years' experience, who has killed scores of deer and a large number of bears. This bear was located in a thick piece of woods on a steep hillside within a mile of Benton. Mr. McHenry was stationed at the top of the hill on the edge of a field, and when the drivers in the woods ap-

proached the field, he saw the bear come out from among the trees on the way to another strip of woods on the other side of the field. But the hunter was on the alert and cool enough to plant a bullet back of the shoulder before the bear had gone a dozen feet into the field. At the crack of the gun the bear wheeled and plunged back into the woods. It followed an old road for a few feet, and then abruptly turned off the road and down the hill, and when found, nearly two hours later, was lying huddled in against the bottom of an old rail fence. It had been dead for some time, and the singular thing was that while the bullet had gone entirely through the base of the heart, the bear had traveled nearly a hundred yards after the shot

was fired. The experienced hunter always tries to hit a bear back of the shoulder and low down. He wants to reach the heart, for he knows how tenacious of life a bear is. There are stories of hunters tracking wounded bears for miles and finding that the bears had finally pulled fur from their sides and plugged up the bullet holes to stop the bleeding. Mr. McHenry's bear was an enormous brute, and when suspended by the heels to the roof of the porch, its front paws touched the ground.

But not all the hunters were so lucky as Mr. McHenry. There were many days when hunters scoured the woods without seeing game; there were times when the bears were driven out without coming near the hunters; and there were good chances missed by poor shooting or by bad luck. One of the leading merchants of Benton early in the season purchased for himself a rifle of the latest pattern, loaded himself down with shells, and joined every hunting party that left the town. One day a bear ran within twenty feet of him, and went away untouched by the rain of bullets that fairly slashed the limbs from the trees. At another time a bear walked up to the man and stood and looked him calmly in the face until the hunter began to shoot straight up into the sky, when the bear shifted its beady little eyes and turned and slowly walked away. Soon after this episode the merchant traded his rifle for a calf that he will

have a butcher kill when he needs meat. Even Boyd McHenry, the most noted hunter of all this region, came through the season with only a wounded bear to his score. It is quite certain that Boyd would have killed this bear which was running up the road toward him had not a boy stepped into the road between him and the bear. Even as it was, the snapshot that he got as the bear went plunging through the woods knocked the bear off its feet and brought from it a great bawl that rang through the woods and frightened the boy nearly to death.

One afternoon a bird hunter, walking in the road near the foot of the mountain, saw a great brute of a bear leisurely crossing a little cornfield on its way to the mountain along which the road ran. The hunter exchanged his two shells of bird shot for two of buck shot and prepared to intercept bruin when he crossed the road. When the bear stepped into the road, not ten steps away, the hunter took deliberate aim and fired. He said that he could as easily have missed a cow. When the gun cracked, the bear stood up on its hind legs, and with its front paws grabbed at itself where the buckshot had gone through. Then without even a glance at the hunter, it climbed out of the road and hurried up the mountain. For nearly a mile the bird hunter tracked it by the blood, but he never came up to it, and the bear was never seen afterward. For days the hunter mourned over this piece of bad luck; he would rather have lost a horse.

Again there were some bears killed in a manner that appeared the result of nothing but sheer good luck. A boy, squirrel hunting in the woods one dark rainy day when the leaves were damp and the woods still, saw coming toward him a group of seven bears. The boy stood perfectly still, and when the bears had approached within a few feet of him, he selected the largest one of the group and poured into its side a charge of small shot that killed it in its tracks. The boy is still the hero of the neighborhood. At another time a man and wife husking corn in a field saw an old bear and her two cubs working in the edge of the field next the woods. While the man kept watch of the bears, the wife went to the house and brought out the shotgun loaded with two shells. With these two shells the farmer killed both cubs while the old bear lay on the top rail of the fence and watched him. His wife had neglected to fetch extra shells, and it certainly took some courage to face a mother bear with an empty gun after killing her cubs. The farmer thinks that his escape from attack was due to the fact that the cubs were shot dead and made no sound when killed. The old bear hung around for a few minutes and then unconcernedly started leisurely away through the woods.

There was but one instance of a wounded bear deliberately charging the hunter. George Laubach, who was hunting rabbits one morning at the foot of some rocky ledges along Fishing Creek, met a bear face to face and not ten steps away. George promptly pulled up his gun and fired right into the bear's face. Instantly the bear, with mouth open and hair along the back standing up as it does on an angry dog, charged at him. George waited until he and bear were within six feet of each other when he poured his second load of shot into the bear's breast and shot it dead. Such occurrences are very un-

usual, and it is possible that the bear was blinded by the first shot and did not actually charge the hunter, but was trying to get away.

The only man injured by a bear during the season was not a bear hunter, but a 'coon hunter. This man's dogs had treed on a tall lone chestnut tree in a swamp what the man took of course to be a 'coon. The man, who had no company but his dogs and who wanted meat badly, decided to climb the tree and shake off the 'coon for his dogs to kill. After swarming up the tree some forty feet, he found that the animal had not waited for him, but was backing down, and on the same side to which he was clinging. Then to his horror he discovered that it was a bear and not a 'coon that his dogs had treed. He was too high to risk a fall, so he just reached around the tree and hung on like grim death. The bear went right down over him, taking all the clothes and some of the skin off the rear part of him. When the man finally reached the bottom of the tree, he put out for home and closed his hunting for the season. He thinks that the bear weighed a ton, as it went down over him.

Another hunter was more lucky in treeing a bear. This man, who, by the way, was a big strong man and a famous hunter, owned a small orchard on top of the mountain. The little orchard was surrounded by a great forest, and was frequented by bears in the apple season. One October afternoon the man took his horse, wagon and gun and drove up to the orchard to bring back a wagon load of apples. Just before reaching the orchard he stopped, tied his horse, and with his gun slipped up and looked over the fence. He was not greatly surprised to see what he took to be a cub with its head down in the long grass eating apples. The man wanted a cub, and he decided to take this one alive. So he set his gun down, quietly sneaked up behind the little bear, and grabbed with both hands in the thick hair on the rump. Then when too late he found that he was holding fast to a very active, much frightened bear that would weigh a hundred pounds. But he was game and hung on. The bear tried to get over the fence and into the woods, but the man could readily prevent this. Finally, as the bear grew somewhat exhausted, the man found that he could direct its course, and he steered it toward a tree up the trunk of which he sent it with a mighty kick. Then leaving his coat and hat at the foot of the tree to keep the bear from descending, he went for his gun and later brought home a dead bear instead of a live one.

These old hunters sometimes have a supreme contempt for a bear. There was once one in this region who was willing at any time, for a share of the meat, to enter a hole into which a bear had been driven or into which it had retired to hibernate during the winter, and drive it out so that the hunters might kill it. He was a small man, as full of grit as a bull terrier. He claimed that a bear never attacked a man in a hole. But one day just as he was crawling through a narrow passage that led to a bear's den, the occupant, a very large bear, decided to come out, and did come out right over the hunter. This man, like the 'coon hunter, was compelled to buy a new suit of clothes and to sleep on his stomach for several months. It is said that after this adventure he walked away around when he came near a bear's den.

Several amusing things occurred during the great bear season of Columbia county. When the season was in its height, everybody talked and even dreamed of bears. One dark night Jim Brown, a young man living in Benton, was awakened by the fierce barking of dogs and the terrible snarling of bears. Jim hoisted his bed room window and listened. Across the creek in a wooded hillside he could hear the dogs evidently worrying bears. He could even hear the snap of teeth and the terrific snarling as bears and dogs came together. It was a fierce encounter and in the still dark night it made one's blood run cold and one's scalp tingle. Jim listened a minute or two and then he raised a mighty shout of "Bears, bears across the creek!" Soon lanterns twinkled and the streets resounded with the tramp of marching feet. Within fifteen minutes more than a score of hunters with rifles ready had crossed the bridge and hurried through the woods, guided by the barking of the dogs, only to find two bulldogs worrying several calves. At another time a miller, several miles below Benton, 'phoned to town that an enormous bear was coming straight up the main road. Then there was a gathering of hunters and dogs, the like of which could be matched in but few States. And then again there was disappointment, for it was a dancing bear led by an Italian who kept exclaiming as the hunters surrounded him, "No shoot my bear, good bear." The miller had hoaxed them. And yet it was not an entirely profitless trip, for it resulted in the trying out of a bear dog for which the owner had recently refused fifty dollars. This dog crowded in between the legs of the men surrounding the bear until the bear caught sight of the dog and made one wicked pass at him with his huge fore paw. The dog knocked down five men getting away, and then retreated under a barn where he stayed for three days.

But it was a great bear season, and Columbia county will not soon forget it.

#### Horns Twelve Feet from Tip to Tip.

The caribou, or water-buffaloes, of the Philippines often attain to great length of horn, one specimen, it is believed, standing quite without a rival in that respect. Measured along the curve of the horns, it is over twelve feet from one tip to the other. The spread of this animal's horns, says *Wide World* magazine, is greater than the width of several of the narrow lanes of the town—Iloilo—where his owner lives, and in consequence a brown line of scarred bark on the thick-set bamboo hedges often marks the roads which this splendid old giant has traversed.

# The Sportsmen's Show

"SHE has been," or to be more Shakespearean and less eloquent, the Sportsmen's Show, nineteenth edition, has taken place. The title called for international trapshooting tournament and sportsmen's show. The trapshooting end of the caption was ample, and here we delve in a metaphorical forest, for in our mental mouths the taste lingers, but the general complaint concerning the "Sportsmen's Show" end is like the remark of Oliver Twist—"I want some more."

This feature was woefully lacking. Financially the show was eminently successful—the most remunerative in years—which means, of course, there was a goodly attendance. After a round of the Garden, and a quick one at that, the crowd wafted down to the traps, where for hours they packed. At the ring side were seen many prominent clay disc exterminators, who failed to qualify, rooting for brother club members, pushing No. 8 chilled shot through the calcium atmosphere for high gun honors.

Among the amateurs noted in the paddock were: Jim Alker, of Manhasset Bay Y. C.; Joe Donovan, a Du Pont medal holder, from Siwanoy; J. F. James, of Crescent; Dan McMahan, of New York A. C.; Tom Lenane, Jr., R. L. Spotts, Jr., who had the satisfaction of seeing his father run 123 straight unfinished and win the indoor championship with 100 x 100, beating high professional W. B. Darton by 7;

Fred Howard, a one-time top notcher, for New York A. C.; Bill Short, Tom McCahill, Eugene Crowe, B. M. Shanley, Jr., Tom Kelly, the big noise in Hudson Gun Club, reached by the tube; Louis Lawton, George Fred Pelham, rosy and cheerful as usual; Jessie Thorpe, the infant prodigy from Siwanoy; Z. C. Offut, who stumbled over the thirty-second parallel and failed to qualify; Doc. Currie, one of the mainstays of Siwanoy; J. H. Finch, who when he can't shoot at home, goes any distance to burn powder; and—well, what's the use, almost every shooter was there.

Among the representatives on the rail were: Teddy Doremus, of Du Pont; John Skelly, Ed. Banks and Bill Hammond, of Hercules; Carl von Lengerke, of, "If they're black, that's us," and his cousin Ernest; T. H. Keller, of the

yellow boys and son Tom, L. R. Lewis, T. A. Davis, O. R. Dickey, and most everyone else but Lester and Fred.

Some sensational shooting was done, particularly Ralph Spotts, as graceful a gunner as one could wish to see, and a shooter from the ranks of the beyond question amateur, of which there are mighty few, although outside college athletics an amateur is as hard to find as a snake in Ireland. As Bozeman Bulger says, there are some paid amateurs. However, to return to our mutton and all wool scores, H. H. Stevens ran

success. Dave Abercrombie insisted on helping the management improve the ceiling decoration by shooting his casts through the filmy firmament, while Editor Miller angled for the Remington cubs, accurately placing his bait behind the cage of the twins.

There was a great tendency among bait exponents to snarl, but when one considers the location of the pool, it is not to be wondered at that artistic angling was at a premium. It was interesting to note the popularity of the only real camp in the show, the FOREST AND

1776.

HUNTER'S CAMP.

1876.

Erected by FOREST AND STREAM Publishing Company, of New York, in Lansdowne Ravine, Centennial Exhibition Grounds, Philadelphia

161 straight and 246 x 250—some calcium shooting. Al. Brickner, of Newton, N. J., a veteran, sturdy and cool, ran fifty straight on Friday. J. A. R. Elliott, one-time world's champion live pigeon killer, broke fifty straight Monday and forty-eight Wednesday. Sim Glover got three 48's, a 47 and a 45 for 236 and second high for wads only. W. B. Darton won top pro berth with 97 x 100, one more than old Bill Crosby could master. In the team shoot, New York wadded Philadelphia properly with 469 x 457.

Three hundred and twenty-five shooters toed the scores, and only such efficient management as that of Luther Squier could have put this bunch over a single trap satisfactorily. His work was beyond criticism and commendable.

Way up in the balcony a baker's dozen Waltonians cast fly and bait, mostly with indifferent

STREAM encampment. Trapshooters and game shooters made this camp their headquarters and many an old trapper's yarn was unfolded under the FOREST AND STREAM canvas during the week.

A considerable contrast is shown in the illustrations, the first of which shows the FOREST AND STREAM encampment at the Centennial in 1876, the second picture being that of the FOREST AND STREAM camp at the 1913 show. Trap scores follow:

"FOREST AND STREAM" CAMP, 1913.

**FUN IN CAMP.**

BY D. M. EDGERTON.

IN the winter of 1888-9 "we three" were camping in the pines of the Upper St. Johns River in Florida on a deer hunt. Our guide was a six-foot, garrulous and boastful "Florida cracker," with an experienced guide and clever company. Returning to camp one evening, and supper over, we all sat around listening to our guide's long tales of his wonderful exploits in earlier days, and the greater our silence and attention, the greater grew the events and the importance of our guide. At length one of our party, quietly interrupting, said: "John Chancey, I don't believe one d—d word you say." Up rose the guide to his full length, his face ablaze with indignation and anger, retorting, "Colonel E., I don't give two hurrahs in h—l whether you believe one d—d word I say or not." The exhibition of his offended dignity and passion at the imaginary insult, cast upon our wild cracker guide, threw us nearly all off our feet, and into roars of laughter, to be renewed for years as we met and the joke brought up.

John and I made up, but there followed another joke on John and myself, though I still half suspect that John "put it up" on me in revenge. A heavy rain storm had covered the flats in every direction with water, preventing the deer from lying down and making it impossible for the hounds to follow a trail, so we waited. After dinner, however, the guide and I mounted for a reconnaissance without dogs. After a long round and on our way back to camp we sighted three deer some distance off in the open pines. My guide said that if I would hold his horse, he would try to get within shot of them, but in which he did not succeed and returned.

Night coming on, I was too knowing to have lost the direction we had been following, but he, on mounting, turned eight points off—against my protest—and on we rode. Twilight, in Florida, is but the passing of a shadow, and ere long we were enveloped in deep darkness—dark as a pocket or a stack of blackcats—blackness intensified—not an object visible, save the weird forms of the overhead pine tops against a starless sky—mosquitoes innumerable—and we far from camp. Halting, we dismounted, when said I, "Chancey, you're lost; own up." "Yes, I am," he replied, and I confess to laughing outright, so much did I, in truth, enjoy the novelty, new to me, of our predicament.

Guessing at the direction of our camp, I lowered the muzzle of my gun and fired and waited—ears and mouths open. All was still. Again I fired and, listen, a pin dropped somewhere, and again I fired and it then seemed a penny fell, whereupon John cried out, "Now I know where we are," and started, and in an hour we distinguished a distant light—a camp-fire light—and soon our ride was at an end. But we did not escape the cajoling of our companions. The joke certainly was on us; worse on John.

Generally speaking, if home—the horse's home—is the objective point, he may be depended upon to make a bee-line for it, but if in camp, five or ten miles away, he will be very apt to give the camp a go-by and leave you to discover yourself on the way home, the camp far in the rear.

**Routs Wildcat With a Lamp.**

As Elmer Gross was returning from work at the Cameron colliery recently, a wildcat, large and heavy as a bulldog, sprang at him from the bushes.

Gross sidestepped the animal, and jerking a lighted miner's lamp from his hat, thrust the blaze into the face of the cat, which ran away, but soon returned and followed Gross half a mile toward his home at Tharptown, Pa.

Gross got a rifle, but the cat had disappeared.—New York Sun.

# GAME BAG AND GUN

## Ring-Necked Pheasant in Tioga Co.

BY PHILIP S. FARNHAM.

THE ringnecked pheasant, while not to be compared with the ruffed grouse, is bound to become one of our important game birds for the reason that it can be successfully propagated and does well in our climate.

I have watched the results of stocking with this game bird with a great deal of interest, and can give very accurate figures on the results obtained in Tioga County, New York.

In the spring of 1907 the Owego Rod and Gun Club liberated twenty-three birds which were imported from Europe, and five others which were obtained from local breeders. The imported birds were delayed so long on the road that, when they arrived, they were in very bad condition, some of the hens not being able to stand, and it did not seem possible that they could live. They were liberated, however, and in a short time all were in good condition.

The first season at least five were killed by Italians and unscrupulous gunners, and one other was killed by a farmer who said he thought it was a hawk. If no more were lost this would bring the original stock down to twenty-two. From this nucleus the numbers have increased rapidly until now the county is fairly well stocked. I would estimate that Tioga county now has upward of twelve hundred birds.

The season for shooting the male bird was opened last fall and about thirty were killed, according to the incomplete record which was available.

About fifty young birds were received last fall from the New York State game farm and were liberated in suitable cover. A consignment of these birds was also received from the Massachusetts game farm of the American Game Protective and Propagation Association. These last were liberated upon a thousand-acre game refuge near Owego, New York, where they will be protected for ten years. These birds were full grown and have adapted themselves to the conditions on this refuge and have been seen at intervals during the winter.

It was not the intention of the sportsmen of this locality, when introducing the pheasant, to have a bird to take the place of the grouse, but rather as a protection to the grouse, as we hope the shooting will be divided, thus giving the grouse a better chance.

From the results in Tioga county it would seem that the future of the pheasant is well established in this locality.

To persons wishing to stock with these birds, I would recommend that the stock be obtained from birds bred in this country rather than imported ones, as the native-bred birds are already acclimated and are more likely to be strong and healthy than those which endured a long trip in close confinement.

A great deal has been said about the damage done by pheasants to agricultural interests, and I note that there is now an agitation in Massachusetts to have an open season for them, on the ground that the birds have become a nuisance to the farmers. I remember a few years back when the same story came from certain counties in New York State, where the birds were quite plentiful, with the result that the season was opened. It was rather amusing, however, to note that just previous to the opening of the season a great many of the farmers posted their lands against hunting. It was very evident that if these birds had become a nuisance the farmers wished to abate it themselves. I am rather inclined to believe that the agitation for the open season did not come from the farmer.

I have talked with a great many farmers through central and western New York and have failed to find one who did not speak very highly of the pheasant as an insect destroyer and express a wish that there were many more on his farm, even if they did eat a little corn.

I am strong for the pheasant.

## Aspects of the Minnesota Game Code.

BY A WARDEN.

THE game season of 1912 opened in the State of Minnesota more auspiciously for sportsmen than any season in years. This particularly favorable season can largely be laid to a wise and careful administration of the game laws. I would have said a wise enforcement of the game laws had not the science of game preservation by spreading a knowledge of the game code and encouraging a sound moral attitude in the public mind toward heeding them for the benefit of the whole people, supplanted nothing more than iron-clad enforcement. Practical experience has taught the majority of game protectors that infringements of the game laws largely grow from ignorance of the offender. Generally speaking, the game laws are the least accurately known of any. Though official force will always have to be used to cope with a certain element who defy the law out of pure malice and a desire to gain the long end of the bargain by pre-season slaughter, the education of the major portion of landowners, taxpayers and sportsmen regarding the game laws seems to be uplifting the conditions throughout the State.

In the public mind wardens have ceased to be the enemies of the people. Wardens have never been enemies of the people, though many who were bent upon personal gain through disobedience of the law, have been apprehended and brought to account for their waywardness and have tried to create that inimical impression. In a State where the greater number of hunters are a race bred from the hardy stock of the Old World that conveniently forgets the law when the gain in disobeying it was imme-

diately, it is nothing short of remarkable what strides have been made in securing obedience through dissemination of knowledge of the law, especially in certain sections of this State.

The flagrant violator of the law is the man who does most of his shooting in his own county. Particularly is this true of deer and moose shooting. Both species are shot out of season, and a certain glory in escaping punishment is taken by those who evade the law. Many of the shooters care nothing about preservation of game, thinking it the property of those who live where it breeds, entirely overlooking the fact that game belongs to the State. Upon my annual trips to a point near the Itasca State Park, I have twice come upon instances of pre-season shooting of deer, and from the evidence I could gather, of course unsubstantiated, felt certain that tracks led to the cabin of the violator. One redeeming feature that I came upon among these settlers was the refusal to shoot a doe whether with or without young. The settlers are few. Each one of a community in his turn shot a deer and distributed the meat among others. They are poor people, having not more than a couple of cows of the poorest sort, a pig or two, a few hens and a plot of sandy soil upon which to scratch out a meager existence. In so far as common custom makes the law and the will of the people enforces it, these deer shooters were acting within their common custom and before their own wills. But the license fees of a good many hundred sportsmen were used to protect and propagate these deer on State lands, and these hundreds should have an equal chance in the sport of shooting them.

If an outsider went into this section and began shooting before the season opened, or without license, each one of the native settlers would be up in arms, though they pay no attention to the law they would invoke upon the head of a stranger. The problem of law enforcement in these sections is serious. Among the better class no man can be found who lives in the country to act as warden. Even some county officials have been known to aid natives to escape punishment and outwit detection at the hands of wardens sent specially to put a stop to pre-season game destruction. Very few wardens care to go into this back country to prosecute law violations, as these rabid natives are very resentful over being spied upon. Fortunately this class of law dodgers is growing smaller as the lands over which they hold sway are being cleared, and the work of farming engrosses them. Nothing but a patient educational system will succeed in coping with them.

Without doubt the greatest number of law violations come from an ignorance of the law. Enough prosecutions are being made in every section to furnish examples to willful violators. If the articles of the game law be known, if a digest of it is kept before the people all the time, it has never failed to be a forerunner of lessened infraction. A Virginia warden has re-

cently used an idea that it would be well to incorporate into the warden service of this State. A plain muslin placard printed in an ink that will stand after being rained upon contains a digest of the Virginia game laws. This warden has tacked up hundreds of them over his entire district. For keeping the laws before the people of his district, particularly the hunters, nothing could be more effective. Doubtless some of these placards would be torn down, but enough of them can be kept in sight to keep the law fresh in the people's minds.

A thorough knowledge of the law makes the people the wardens of their own game and fish. John Jones is more or less concerned about the thoughts his neighbors hold of him. He would rather be known as a law observer than as a law breaker. If his neighbors know the law and catch him infringing upon it, or about to, the healthy moral tone arising from the fear of the finger of contempt will have a lot of pressure in holding Jones in line. Jones can never tell who among the people is going to act as an agent of them and report his infringement. The more thoroughly the law is known, the harder will be his chances of successfully evading it, and the more certain his chances of detection while trying to scout it.

It is upon the same principle of a perfect understanding of the law by all the people making a warden of each of us that the great good comes from in sportsmen's organizations. In all of us the spirit of fair play is uppermost. If Jones belongs to a sportsmen's club and "sooners" a little on the season, forgets the limit, and otherwise rides over the law, he is requested to resign.

There never has been a time when so many notices about the game laws appeared in the papers of this State. These should still further be followed up by the wardens in giving advance notice of the closing and opening of seasons. Articles showing the improved game conditions in sections where law observance has been good would find room in every county paper.

In my immediate locality I have tried to show the trappers that the number of pelts they would secure would be the same whether they began catching animals before or after the season opened if all observed the law regarding the opening date. This season there was not a single fish house on the ice in this locality before the 15th day of December, and on the day spearing opened, every spearer had his license or had made application for it. So much for a campaign of education locally carried out.

This season has been exceptionally favorable for the prairie chicken hunter. As usual there were a number of arrests for shooting before the opening day. But the shooters who live in the chicken breeding country will not permit pre-season shooting. The majority of them are landowners. They do not break the law themselves and will not tolerate infractions by others. The opening day of the chicken season is generally set aside as a sort of holiday when farm and ranch work is dropped, and the pursuit of chickens made a sport in which the whole country takes part. Then the work of the farm is pressing again and until completed in the fall very little shooting is done. In the last five years there have been a gradually less-

(Continued on page 352.)

## Hunting in California.

BY GOLDEN GATE.

BERKELEY, Cal., Feb. 28.—*Editor Forest and Stream:* Throughout the entire valley sections of the State temperatures ranging from fifteen to twenty-five degrees above zero have been registered and sportsmen have witnessed the novel sight of ponds covered with a sheet of ice, and the uplands white with frost. Water is very scarce and duck shooting is limited to a few favored sections. Green feed is also confined to a few districts and geese are to be found in but a limited area. A heavy rain is badly needed to scatter waterfowl and to start a growth of green feed.

Quail shooting has improved in practically all sections of the State during the past month, but the sport falls far short of what it formerly was. This bird has suffered more than any other from the introduction of the automobile as a means of rapid conveyance and to preserve it from extinction is one of the problems that confronts game officials. The writer is of the opinion that the setting aside of game preserves on which no hunting is allowed will accomplish this better than by any other method. The California valley quail responds readily to protection of this kind and is a rapid breeder when unmolested. At the country home of the writer, where hunting is prohibited on account of the live-stock, quail are very numerous and not only feed with the poultry in the farmyard, but roost in the trees at night within a few paces of the house. In the surrounding territory the birds are scarce.

Since October, 1907, the California Fish and Game Commission has paid mountain lion bounty claims, on 1,721 lions. Humboldt county leads the list with 353 lions, with Trinity second with 198 and Siskiyou third with 162. A movement is now on foot to increase the bounty to \$40 with the idea of inducing professional hunters to take up the work of exterminating the lions.

One of the largest mountain lions ever killed in the vicinity of Occidental was slain recently by Willie A. Hendren, a fourteen-year-old lad who sighted the beast feeding on a large buck near the Hendren farm house.

The hide of a black deer now graces the office of the Fish and Game Commission at Sacramento, the deer having been killed several weeks ago in El Dorado county by an Indian. The hide will be mounted and placed on exhibition with the albino deer killed recently in Trinity county. The hair is almost jet black, shading to lighter brown on the stomach.

The request of the Redding Game Association that fifty elk be brought from the Yellowstone National Park to the Shasta Forest Reserve is to be compiled with and the animals will be transferred this winter. The Oregon authorities have objected to the transportation of the elk on the ground that the Wyoming elk is a different species from the Roosevelt elk that inhabit the Pacific Coast country and there would be danger of their intermingling. The United States Biological Survey has asked that the passage of the elk through Oregon be allowed.

Joe Venchura and Manuel Silvera were arrested recently in Marin county for hunting without a license and were fined \$25 each. Six hunters were arrested one day recently on

this same charge and four demanded jury trials.

The San Mateo county branch of the Fish and Game Protective Association has elected officers as follows: Chase Littlejohn, President; Guy P. Hull, Vice-President; H. W. Lampkin, Secretary, and A. S. Ligouri, Treasurer.

The Fish and Game Protective Association of Stanislaus county has been formed at Modesto with officers as follows: President, D. C. Wood; Vice-President, W. W. Gray; Secretary, D. C. Davison, and Treasurer, Henry Garrison.

A Plumas county branch of the California Great Fish and Game Association has been formed at Quincy, and the mountain sportsmen have come forward with a number of suggestions for changes in the fish and game laws. Protection of the mother bear and cubs until Oct. 1, a bounty of \$40 on mountain lions, a bounty of \$25 on wildcats and a fifteen-day season on deer are among the measures advocated. J. D. McLaughlin, of Quincy, is secretary of the organization.

A Game Bulletin will be issued shortly by the California Fish and Game Commission, and this will contain a number of reports by experts on game conditions in California, as well as data on the work that has been done toward conserving wild life during the past two years. Among the reports will be one from W. N. Dirks touching upon the work of the State game farm, a report on "California Valley Quail," by Harold C. Bryant; an article, "The Introduction of Foreign Game Birds into the San Joaquin and Tributary Sections," by A. D. Ferguson, and "Educating People to the Need and Value of Wild Life Conservation," by Gretchen L. Libby.

## More About Fur Seals.

WASHINGTON, D. C., March 1.—*Editor Forest and Stream:* No prettier picture has ever been drawn of the "blind leading the blind" than is that one you published in your issue of the 15th ultimo under the head of "More About Fur Seals," on pages 203-204.

Raleigh Raines has not held the reins very tight on his horses, I'll admit, and has not kept in the middle of the road, but Charles Sheldon has actually ditched his team.

Sheldon says: "Facts: Upon an exhaustive hearing the House Committee on Foreign Relations reported the bill out without any amendment for a closed season."

Is Sheldon right in his statement as above? No; the House bill as reported did not carry an amendment for a close season, but it was amended on the House floor, so as to carry a closed season for one year; and, then, so amended, passed by the House, Feb. 15, 1912, and sent to the Senate. This one-year amendment was put in with the distinct understanding that the Senate would add five or ten years to it, which came to pass.

Sheldon says also in his "facts" as above cited, that "the Senate Committee held no hearing whatever."

Is Sheldon right in this statement? No; the Secretary of Commerce and Labor, Chas. Thayer, asked for a hearing, and on Feb. 22 he spent three hours in close communion with that Senate Committee vainly trying to persuade

them not to change the House bill. The close time advocates had no desire to add to their arguments made in the House Committee, which were printed and in the possession of the Senators.

Raleigh Raines has fumbled his "facts," I admit; but Charles Sheldon is just as poor a guide on the straight and narrow road of truthful diction.

Let me give you another instance of Sheldon "facts." He says on page 204 that there is not a particle of evidence that yearlings and females were killed.

This is a fairly ludicrous misstatement, for there is not a particle of evidence that these small yearlings and females were not killed.

When those "experts," Lucas, Townsend, Merriam, Evermann and Stejneger, were sworn and put under oath, they all refused to assert that yearlings and females were not killed. They all plead ignorance of what a yearling seal was when killed and skinned.

But one man was hauled into this committee who had killed all the seals since 1890 to date, one W. I. Lambkey. He swore that a yearling skin was 36½ inches long; he knew it, because he had identified it and measured it himself.

Then what happened? He was compelled to identify 12,929 skins which he had taken in 1910, and swear to the committee that "only 7,733 of them were less than thirty-four inches long!" Just 7,733 "particles of evidence" up to Sheldon.

I think on the whole, Raleigh Raines has given your readers far the best exhibition of good sense in writing about a question which neither he nor Sheldon knows much about. Give Raleigh the reins; take Sheldon off the road.

AMOS ALLEN.

### Candlemas Day.

PASSAIC, N. J., Feb. 3.—*Editor Forest and Stream:* Without a doubt the American marmot, woodchuck, vulgarized as groundhog, saw his shadow yesterday morning and retreated to his hole to prolong his snooze during the coming six weeks of biting cold weather. It is astonishing that so many common sense people believe that this uninteresting animal can compete with the Hackensack weather provider. This absurd superstition was unknown to me when in my boyhood I had my first encounter with the woodchuck who occupied a hole under the roots of a big tree in a woodland gulf a mile or more from my father's farm. He owned a yoke of oxen which I admired very much and was fond of driving about the farm and to occasional house or barn movings. A whip lash was needed to grace the ox goad, and one very early morning found me ensconced within rifle range of the chuck's front door. When he emerged and settled down for a look about the woods, I took very careful aim and put a ball into his head, dropping him so dead that he could not slide back into his habitation. His hide was taken off, tanned and made into the lash required, in complete ignorance of my having put out of commission a famous prognosticator of near spring weather.

MEMOIR.

God makes opportunities, but men must hunt for them.—Josh Billings.

## Guide, Friend and Philosopher.

BY FRANK A. WAUGH.

His grandfather was a Scotchman, and from him he inherited his name of Blackburn. His grandmother was an Indian; from her he took eye-trouble and a dignified taciturnity which made him an ideal woods companion. His mother was of the pure French-Canadian breed and gave him his religion and his canny thrift. As for Louis Blackburn himself, he was born and bred in the woods, there he got his whole education, and there he lived his life. And there, in one of the most beautiful of the north country lakes, as the winter was closing down, he went to his last accounting.

His son, who is a foreman at the St. Maurice and has charge of an important drive every spring, wrote me a letter. It was not such a

LOUIS BLACKBURN.

letter as one gets from an automobile company or from a magazine editor, but a very human note, filled with pure and honest literature. Everyone who has been in the North Woods knows the dialect, but it is not often that one hears it so tenderly and solemnly spoken:

"Mois je suis Joe le fils; celui qu'est noyé dans lac à Vassal était mon père. Il faisait la chasse dans les environs quand les lacs commençait à prendre. Il est parti le matin et n'est pas revenu. C'est seulement après huit jours que nous avons su qu'il est perdu. Nous faisons le cherche et la dernière trace que nous pouvons trouvez était à lac à Vassal. Nous ne pourrons pas le retrouver que le printemps prochain au mois de Mai. \* \* \* Je suis bien content de vous dire qui votre champ est en bon ordre, et c'est moi qui continuera conduire vos affaires, et j'espère vous rencontrer sur le St. Maurice l'été prochain."

And so good old Louis left our camp in

good order, and they expect to find him again next spring in the month of May. Then the trapping season is over, for all the others as it is for Louis, and the ice goes out of the lakes, and Louis's sons will find him faithfully sepulchred in the bosom of Lake Vassal. Thus that noble lake, which for us has always been associated with Louis Blackburn in his life, becomes an everlasting monument in his death.

Every man who has hunted and fished in the North Woods has doubtless known some friend of Louis Blackburn's type—some were of mixed pedigree, but of the unique forest training, one in whom the teachings of nature held a heavy balance against the teachings of society and of the schools. And the men who have gone often enough and stopped long enough to learn to love the great wild country have formed their own personal attachments for good and trusty guides. I have heard (always at third or fourth hand) of tricky and unfaithful mercenaries who prey upon the summer vacationists, but I think most of us have found better treatment. Remembering Louis Blackburn, it will always be hard for me to suspect evil of any of his race.

The outstanding capabilities of this old woodsman were always a delight to us. He was small, withered and old, but he could shoulder a big pack, take an ax in one hand and his old rifle in the other and set us a pace along some blind trail which gave us hardly time to see the blazes go by. He was always ready with a fire when it rained. He always washed the dishes, and he was as neat about it as a woman. But those things which impressed us most lay deeper yet in his character. There was an obvious adjustment of his life to his surroundings which we are not accustomed to find in the haunts of civilization. There was a quiet serenity of the wild lakes and mountains—a quality which we have all longed for in our own lives. There was a simple religion of faith, which we could never have the heart to call superstition. He used often to say, "Oh! je suis bon catholique!" There was the dignified self-respect, characteristic of the Indian.

His language was an excruciating patois—French, Indian, English and tobacco juice inextricably mixed; but he had a quiet voice, and when from his end of the canoe he spoke, his words did not break, but rather blended with the harmonious silences of the lakes. He was a good companion who never spoke of politics, motor cars, markets, history, literature, or any other trivial matter. He said that loons were good eating, that the Indians frequently ate them and preferred *broussard* to the best *truite rouge*.

The next time our canoe paddles down the lake from the portage past the familiar islands and through the narrows and slowly toward the waiting log camp, there will be the same exhilarating all-enfolding silence, but in this case the lake, the islands, the trees from the shores, and most of all the great silence will speak to us in sympathetic eloquence of Louis Blackburn.

THE most profitable way to communicate with the sportsman's world is to advertise in *FOREST AND STREAM* because, as an outdoor weekly, it has no equal, and its readers are scattered throughout the land.

## In Camping-Supplydom—III.

Some More of the Little-Known Camping Conveniences and Travel-Foods of Other Nations

By L. LODIAN

TASAJO—THE UNSALTED SUN-DRIED STRIP BEEF OF IBERIC-AMERICA.

OUR own Indian pemmican oft has a whiff of the odor of semi-taintedness. It is also prepared by some Western packing houses, and may be eaten—at a shift—dry, when about half of the semi-granular coarse powder-like stuff appears to be of a roughly ground horny nature. This shows the need of boiling to soften it. On opening cans of it, the whiff of partly-tainted meat is sometimes noticed.

The Latin-American tasajo, or jerked beef, is always cleanly to handle; is ever free of the suggestion even of taint; can be carried in leather or cotton or even paper bag, or crammed into a coat pocket, and may, in thin sheet or lariat form, be eaten just sun-dried as it is. It has just a good dried meat odor. The tough strip beef of course requires boiling.

Tasajo can be obtained of the many Spanish-American importers in Manhattan, and is superior for camping to the canned pemmican. About 2,000 tons are annually brought to Manhattan alone for provisioning long-distance sailing vessels to the "four corners of crackdom."

SUN-DRIED OYSTERS (ORIENTAL OVERLAND TRAVEL).

Throughout the China Republic, in the big cities, the visitor observes the sun-dried oysters. They look like so many withered dates, and are sold loose as dates might be sold, or spitted on split-bamboo sticks, or in wreath form. This last shape is for convenience in selling from the arms or necks of the human push cart peddlers of Chinese bazaars. They are also sold in quantities in Manhattan's Chinese quarter at about twenty-five cents per pound. In stewing, they

swell up to about triple—or at least double—the size as illustrated. Of course, they are "not a patch on" the fresh oyster; have always a certain unsatisfactory leathery feel in the mouth, and are scarce worth carrying on a camping trip, but are instanced here as a curious and well-known food product of the inland Asiatic 5,000-mile caravan transport parties.

RIPENED EGGS.

This is another queer travel food of the China Republic. We illustrate a couple of specimens, as daily obtainable at Gotham's Chinese groceries. They are nigh a jet-black inside, quite evil-odored, and our own pure food officials would doubtless rate them as a "filthy, decomposed and putrid product." Yet are they any worse than our high-blown bear or venison steaks, or fully-ripened duck meat, or limburger cheese? Come, let's be consistent, and don't sweepingly condemn the Oriental because he goes in for gamy eggs instead of gamy game.

UMBRELLA TENTS OF SOUTHERN FRANCE.

These are just giant umbrellas, the ribs of wood, and can be set up in a jiffy. You can stand upright inside, even when the ribs are attached closely to little pegs driven into the ground to keep out the cold wind and wet—if you like to stand between the cross ribs. But usually the French camper is content to squat or sit under the cross-ribs, which are utilized for suspending or drying things. This dome-shaped umbrella-tent withstands enormous wind pressure. I never saw one blown down, the pressure of the wind forcing the ribs tighter to mother earth. Ingress or egress in wet weather is in a crouching position through a

low-down slit with flap attachment (woven closely as for waterproof cotton canvas).

THE REINDEER BLOOD RYE BREAD OF THE TRAVELING LAPLANDER.

In a previous article on camping and travel breads and hardtacks of the nations, profusely illustrated, an illustration of the singular "palt-brod" of the Laplander was omitted. This means blood bread, because made of the blood of the reindeer—blood instead of water being mixed with the rye flour. This combination makes the darkest-hued bread known to the globe. It is the second most sustaining bread of the world, due to the blood-albumen content. The first is the oat bread in sausage form (with its fat-seasoning) of the Scotch, and the third is the tallow bread of some of the Siberian tribes. That is, with reference to breads of cereal foundation. Of course, European fish-roe breads would about rank with the Caledonia sausage form oat bread. The banana bread of tropical America would rate out at about the same nutritive value as maize bread. There are regularly made so-styled meat loaves in Manhattan by some pork butchers of the so-called (and mis-called) "head cheese" stock. They are baked like ordinary nickel loaves, are of about the same size, are very solid and satisfying and tasty, and retail at about thirty cents per pound. They would not keep for summer camping, but would do for the winter outdoor-lifer, and, properly canned, would make one of the most sustaining articles of the camper's dietary.

\* \* \* \* \*

All the matters mentioned and illustrated in this paper are readily purchasable any time

REINDEER BLOOD RYE BREAD.

COMPRESSED TEA.  
SUN-DRIED OYSTERS.

RIPENED EGGS.

among the foreign quarters in Manhattan, or in any of our greater American cities; or your camping supply house could get the goods on order. Those of the objects which are of permanent use, make an interesting den or glass case collection for the edifying of one's visitors under some such caption as "representative camping conveniences of all nations." Limiting the exhibit to only small portable articles, the group does not occupy much space, as it can be condensed into some couple dozen—or at most couple score—exhibits. Let the reader try to get together such an interesting collection some time. He can easily do it himself by getting around per pedomobile, and if observant will

learn much that is entertaining of how our many foreign colonies live in our midst: how the Spaniard of upper Manhattan imports and eats a fish food preserved in ink (real ink, being pure sepia); the Italian of Mulberry plaza region consumes quantities of the frogs' legs and snails on daily sale; the East Side Jew buys his ginger bread in yard-long sausage-like lengths; the Oriental gets all the year round, canned, his snow-white delicious strawberries; the Teuton has his compressed fig-coffee, usable as both beverage or eaten as a sustaining food; the Jap has his sugar made from rice; the Syrian has his made from raisins, and so on.

[THE END.]

**Sportsmen's Show Tournament.**

In our last issue we gave the scores made in events from one to twelve inclusive at the anglers' tournament at Madison Square Garden during the Sportsmen's Show. Of the nine events herewith recorded, John Doughty won three, got second in two and third in three events. Marsh won four and was placed in four. Neu and Darling each captured one event, while Neu got place in three events. Scores follow:

Event No. 13—Distance bait, quarter-ounce lure: Open to all; specific rules of National Association of Scientific Angling Clubs to govern this event. A special gold medal in this event will be given for the longest cast.

	Ft. In.		Ft. In.
A. J. Marsh .....	106 4	A. J. Neu .....	57 6
John Doughty ...	62 4-2-5	J. H. Jones .....	57 9

Event No. 14—Dry-fly accuracy: Open to all; specific rules of National Association of Scientific Angling Clubs to govern, except distances are 20, 27½, 35, 42½ and 50 feet, and casts are 15, three at each buoy, and sum of demerits divided by 15.

	Per Cent.		Per Cent.
John Doughty ..	99 2-15	H. S. Smith.....	97 2-15
G. R. Jenkins ...	98 14-15	J. Jones .....	97 2-15
A. J. Marsh .....	98 10-15	S. N. Wager .....	97
A. J. Neu .....	97 10-15	G. H. Higby.....	96 2-15
W. B. Gano .....	97 9-15		

Event No. 15—Accuracy bait, casting at moving target, half-ounce lure: Open to all; specific rules of National Association of Scientific Angling Clubs to govern, except at contestant's word "Ready," and before he has east the target shall be started forward and must be moving when the contestant casts, and only one cast is made at each distance.

	Per Cent.		Per Cent.
A. J. Marsh .....	99 5-15	A. J. Neu .....	98 9-15
E. B. Rice .....	98 12-15	John Doughty ...	98 5-15

Event No. 16—Accuracy fly under bushes: Open to all. Bushes shall be placed at sides of canal overhanging semi-circular targets 6 feet in diameter, extending 3 feet over and 3 feet above targets. The bushes shall be placed alternately, one at right side of canal at 25 feet from platform, next at left side at 30 feet, and third at right side at 35 feet. The targets shall be marked by concentric rings every 6 inches, the center shall be placed next to the side of canal and counts 10 for score, the next space 9, and so on down to 5, fifteen consecutive easts to be

made, five casts to be made at each target, and highest score wins. Any style of overhead casting permitted.

	Feet.		Feet.
John Doughty .....	60	C. R. Jenkins .....	35
A. J. Marsh .....	59	W. B. Gano .....	34
C. H. Higby .....	57	H. S. Smith .....	5

Event No. 17—Fishermen's bait-casting distance: Open to all standard bait-casting tackle; line not to be under eight pounds breaking strength; any reel; any artificial lure not to exceed 1 ounce weight; hooks must be cut off at at shanks; five casts to be made, the highest average to score.

	Feet.		Feet.
John Doughty .....	100	W. A. Chandler .....	58

**San Francisco Fly-Casting Club.**

SAN FRANCISCO, Cal., Feb. 27.—*Editor Forest and Stream:* On Saturday, the 22d of February, the San Francisco Fly-Casting Club held its most successful contest at the casting grounds of the club on Stow Lake, in Golden Gate Park.

The contests were not only the most successful in point of interest and activity, in the history of the club, but also as regards attendance—there being twenty-five members taking part in the events, the largest number by far ever participating in a similar contest. There were sixteen events for prizes, and the scores made by the successful contestants were as follows:

Long distance fly, feet:	
First—E. A. Mocker.....	96
Second—S. A. Wells.....	95
Low—Paul W. Shattuck.....	65
Accuracy fly, per cent.:	
First—T. C. Kierulff.....	99.00
Second—C. H. Kewell.....	98.44
Low—James Watt .....	93.12
Delicacy, per cent.:	
First—T. C. Kierulff.....	99.22
Second—F. H. Reed.....	99.20
Low—Horace Orear .....	95.52
Half-ounce lure casting, per cent.:	
First—Paul W. Shattuck.....	98.7
Second—F. A. Webster.....	98.4
Low—C. A. Kierulff.....	79.3
Lure casting, long distance, per cent.:	
First—James Watt .....	137.4
Second—C. H. Kewell.....	136.0
Low—Harry A. Thomson, Jr.....	48.0
Long distance, light tackle fly, feet:	
First—S. A. Wells.....	80
Second—Five tied for second place on.....	76
Low—Col. Paul M. Nippert.....	56
Dry fly, per cent.:	
First—S. A. Wells.....	98.2
Second—F. H. Reed and F. H. Webster (tied).....	98.00
Low—Horace Orear .....	88.0
Long distance lure, feet, two casts:	
First—F. J. Cooper.....	175
Second—Col. J. F. Burgin.....	170
Low—Harry A. Thomson, Jr.....	50

PAUL M. NIPPERT, Sec'y-Treas.

PATTERSON, La., Feb. 28.—*Editor Forest and Stream:* Here's your \$3.00 check for twelve months' subscription to FOREST AND STREAM, which is the best investment I ever made, as I consider FOREST AND STREAM one of the greatest journals of outdoor sports on the market.

A few bear and quite a number of deer were bagged by the sportsmen here the past season, though deer were reported scarcer than ever before known, owing no doubt to the drowning of hundreds by the flood waters last spring and the wholesale slaughter by negroes and "poor white trash" who killed them by the dozens, as the poor creatures were bunched on the ridges and levees where they were driven by the crevasse waters from the Mississippi.

With best wishes for FOREST AND STREAM, I am, yours very truly, C. W. MITCHELL.

P. S.—May send you some good pictures at a later date.

**The Joy Piscatorial.**

BY J. G. MILLS.

- Fishing time is coming;
- Hear the bullfrogs sing.
- The pussy willow's budding,
- Birds are on the wing.
- Fishing time is coming;
- Fix up your lines and bait;
- Have the fish pole handy,
- You won't have long to wait.
- Fishing time is coming;
- There's music in the air;
- Brooks and streams are calling,
- Calling everywhere.

Published Weekly by the

FOREST AND STREAM PUBLISHING COMPANY,

CHARLES OTIS, President.

W. G. BEECROFT, Secretary. W. J. GALLAGHER, Treasurer.

127 Franklin Street; New York.

**CORRESPONDENCE**—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

**SUBSCRIPTIONS:** \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

**ADVERTISEMENTS:** Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

Entered as second-class matter at the Post-Office, New York, N. Y.

#### GAME PROPAGATION.

THE American Game Protective and Propagation Association is arousing widespread interest in raising game birds both native and foreign. Anyone can take it up on a small scale, and it is likely to prove very profitable. Birds will be distributed free from the association's farm to applicants who will make proper provision for their protection by placing them on land where there is good cover, and by agreeing that there shall be no shooting on this tract. The plan is to secure sanctuaries of this kind all over the country which shall serve as fountain heads from which the overflow will stock the surrounding territory. If the birds are unmolested, they will increase so rapidly on a sanctuary that they will be forced to spread out, and there will be good shooting in the neighborhood. There will be no danger of their extinction, however, if the rule against killing them on the protected areas is enforced.

The value of game as a food supply is leading more and more people to take up its propagation. Propagated game is the only kind which should be used for market purposes. Because game is sold in Europe at a very low figure, some people in this country have been led, through ignorance of the facts behind the conditions, to advocate the sale of all game in this country, erroneously thinking that a withdrawal of the protective laws would make game cheap. Of course, as is well known, in Europe shooting is only for the rich, but so much game is raised on the large estates by corps of gamekeepers, and so much is shot by the few who have the privilege, that there is a large surplus to be disposed of. The people are placated for being deprived of the shooting privilege by being allowed to buy game at a surprisingly low figure. Any such institutions as European game preserves would, if they became the rule, be intolerable to American ideas, yet such conditions are inevitable if our wild game is allowed to be slaughtered for the market. Game might be slightly cheaper at first if this were permitted, but it would soon be exterminated everywhere

by the market hunters, as it has been already in some places. The game farm offers a solution to two vexing problems, that of free shooting for all, and that of supplying the markets, for both the wild covers and the meat shops may be stocked from this source.

#### BIRDS TO EARN MONEY.

THE passage of the bill placing the protection of migratory birds under the Federal Government is likely to save a number of valuable and beautiful birds now verging toward extinction. It will also have the effect of increasing in a thousand ways the productivity of our farms, and besides this will reduce the taxes of the ordinary dweller in our towns. In certain portions of New England—to instance a region where more money has been spent in combating noxious insects than anywhere else—an increase of insectivorous birds can hardly fail to cause a decrease in the depredation of the brown-tail and gypsy moth, to lessen whose ravages millions of dollars have been expended.

This money comes out of the pockets of the taxpayers, and if the work of destroying the larvæ and eggs of these destructive insects can be done by the birds instead of by men, we shall not have to pay city, county and State for doing it.

Many a Connecticut town, famous for its ancient elms, has lost them through the ravages of the so-called canker worm, which sometimes twice or three times in a season defoliates the trees. The birds are able to cope with these worms as man cannot, for, as we have so often said, birds work every day in the year and devour adult insects, larvæ and eggs alike.

It is to be hoped that before long a convention of all the Governments of North America may be called together, to take up the study of taking advantage of the good done by our feathered neighbors. At all events it is fortunate that the United States has taken the matter in hand.

#### GAME RESERVATIONS.

President Taft created during the month of December three new bird reservations: Chamisso Island, Alaska, Dec. 7, 1912; Pishkun, Montana, Dec. 17, 1912, and Desecheo Island, Porto Rico, Dec. 20, 1912. Chamisso Island is the bird reserve furthest north and lies just below the Arctic circle in Kotzebue Sound. Many thousands of sea birds breed on this island including puffins, Pallas' murre, Pacific kittiwakes, Point Barrow and other gulls. This island is unsurveyed and the area is, therefore, unknown. Pishkun reserve embraces a reclamation project with small legal subdivisions adjoining. Many species of the edible wild duck breed here. The area of this reserve is about 3,150 acres. Desecheo Island reserve is a small island fourteen miles west of Porto Rico, and is the home of eleven species of birds of which nine species are characteristic water birds and two land birds. From 2,000 to 10,000 of each of the species of the water birds nest on the island, and embraces noddy and bridled terns, laughing gulls, several species of boobies, man-o'-war birds, oyster catchers, etc. The island is unsurveyed and the area is unknown. There are now fifty-nine bird reserves in the United States and outlying possessions.

#### GETTING OUT OF DOORS.

FOR the training of mind and body, as it concerns the individual and his own best interests, and as it concerns the interests of society of which he is a member, there is no better field of activity for the boy or man than the sports of field and stream. In these sports there are situations which contribute to the development and exercise of physical courage; self-reliance, endurance, patience and inventive power in surmounting obstacles are in constant requisition.

To the boy the energies thus applied afford a useful schooling in qualities essential in later serious life. He by success acquires confidence in himself and in turn is not timorous in assuming the initiative. He learns to think and to act for himself.

To the man who shoots or fishes, or who, better yet, does both, there comes by such recreation a rest of mind and upbuilding of body.

Who has not remarked the bright eye, the ruddy color, the assured carriage and vigorous stride of him who has had an outing devoted to fin or feather, and noted the health and energy thus displayed in contrast to the humdrum, listless manner of action exhibited before the outing?

The old boy needs his playground quite as much as does the young boy. He needs it for his amusement and for his best well-being. More playgrounds for the old boys mean fewer sanitariums, and still fewer inmates; fewer doctors and still fewer patients; fewer dyspeptic minds and still fewer dyspeptic stomachs; and healthier and happier men, women and children. Cherish and maintain the playing places for the old and young.

#### TRAVEL AND VACATION NUMBER.

Now that the winter of our discontent is over—discontent because the weather was so mild we didn't feel compelled to go away from home, although we felt that we needed a change, we are jangling our pennies in anticipation of spring fishing and summer travel. This, then, is the opportune, by some called the psychological moment, to tell Where and How to Go. Consequently our next issue will be Travel and Vacation Number, this comprehensive title covering interesting articles on fishing, in the States and Canada, with illustrated descriptive articles on many of America's vast playgrounds. Every red-blooded American will take a personal and patriotic interest in the contents of this number. Order at once from your newsdealer, for as FOREST AND STREAM is not returnable, dealers order only such copies as they have calls for.

Now that Congress has passed the migratory bird legislation, a number of self-advertisers will probably discover that they were responsible for this action and modestly proclaim the fact. Such claims will be absurd because no one man or body of men could have put the matter through unaided, but the chief credit belongs to the American Game Protective and Propagation Association which led the fight, organized the efforts of the conservationists and directed their energies from the time the first gun was fired at the hearings in Washington a year ago, till the measure went through on the last day of the session just ended.

Forest and Stream will give a weekly digest of Yachting and Motor Boating events from all over the country.

### President Wilson Cup.

PRESIDENT WILSON has notified the international committee having charge of the German-American sonder yacht races next summer of his willingness to stand sponsor for the cup which will go to the winner.

As in the six previous international sonder yacht races, four with Germany and two with Spain, the principal cup is contributed by the yacht club managing the event and named for the Government head of the country. The Eastern Y. C. presents the trophies for the races this year.

It is expected that the German entries for next summer's meet, the third of the series begun in 1906, will include an unusually fast trio of these little boats, and that the Kaiserlicher Y. C. in preparation for the races at Marblehead will have trial races at Kiel early in June.

There is some agitation in favor of increasing the cost of the German boats, which is now limited to \$1,435. The German yachtsmen and designers claim that it is impossible to build a sufficiently able boat to meet the Americans for less than \$1,650, and the German Emperor, who is the referee in the matter, has been asked to raise the limit. It is understood that this has been done, and that the German fleet will go in American waters in July. The first international race is scheduled for Aug. 26.

The sonder or special type of yacht originated in Germany. It is a fin keel boat built of red cedar, whose length, breadth and depth is not over 32 feet. The sail area is restricted to 550 square feet, and the weight must exceed 4,170 pounds. The cost in this country is limited to \$2,400. Eight or ten yachts are under construction in American ship yards, and it is expected that Providence, New York, Cleveland, Chicago and New Orleans, as well as Boston, will be represented in the American trial races to be held early in August.

### New York Y. C.

THE New York Y. C. announces the date of its annual regatta as June 26, off Glen Cove. Races for the Glen Cove cups will be held on July 5 and for the autumn cups on Sept. 4 off Glen Cove.

The annual cruise will be held in August, the date to be announced later by the commodore. The regatta committee for 1913 consists of H. de B. Parsons, Chairman, and J. M. Macdonough and C. Sherman Hoyt.

### Y. R. A. of Long Island Sound.

THE annual meeting of the Yacht Racing Association of Long Island Sound will be held at the Hotel Astor, Broadway and Forty-fourth street, New York city, on Friday, March 21, 1913, at 8:30 P. M.

Officers to serve during 1913 will be elected.

The nominating committee, chosen at the October meeting, have made the following nominations: President, Stuyvesant Wainwright, American Y. C.; Secretary, James W. Alker, Manhasset Bay Y. C.; Treasurer, George E. Roosevelt, Seawanhaka Corinthian Y. C. Members of the Executive Committee: Frank Bowne Jones, Horace E. Boucher, Harry A. Jackson, Jr., E. S. Willard.

The racing rules as finally adopted will be ratified. JAMES W. ALKER, Sec'y.

### Yachts Change Hands.

A BOSTON agency has sold the 21-foot Lawley sloop yacht Tabasco III, owned by George N. and James S. Proctor, of the Corinthian Y. C., of Marblehead, to William J. McHugh, Jr., Vice-Commodore of the Norwalk Y. C., of Norwalk, Conn., and the catboat Bantam, owned by Charles P. Adams, of Worcester, Mass., to a member of the Boston Y. C.

### Atlantic Y. C.

At the annual meeting of the Yacht Racing Association of Gravesend Bay, held Feb. 18, 1913, at the Crescent Club, the yacht racing dates for the coming season were selected and are herewith tentatively announced.

- May 30—Atlantic Y. C.
  - May 31—Bensonhurst Y. C.
  - \*June 7—Atlantic Y. C.
  - \*June 14—New York C. C.
  - \*June 21—Crescent A. C.
  - \*June 28—Atlantic Y. C.
  - July 4—Bensonhurst Y. C.
  - \*July 5—Atlantic Y. C.
  - July 12—Atlantic Y. C.
  - July 19-26—Larchmont race week.
  - \*Aug. 2—Marine and Field Club.
  - \*Aug. 9—Bensonhurst Y. C.
  - \*Aug. 16—Atlantic Y. C.
  - Aug. 19-22—Atlantic race week.
  - \*Aug. 23—Bensonhurst Y. C.
  - Aug. 30—Marine and Field Club.
  - Sept. 1 (Labor Day)—Atlantic Y. C.
  - Sept. 6—Crescent A. C.
  - \*Sept. 13—Atlantic Y. C.
- \*Championship races.

There is a demand for racing crews in the new Q and Gravesend Bird classes now building, and also for some of the older yachts whose owners, building in the new classes, would be willing to place in commission if crews were available. The purpose in constructing the new yachts was primarily to stimulate racing by affording greater opportunities to club members to learn the game and become actively interested. With the additional yachts in the various clubs on the bay this summer, the opportunity is greater than heretofore, and the purpose of the builders of the new yachts will be accomplished only when those yachts, together with those they replace, are all in commission and racing. The

regatta committee is at the service of all, in any way that may accomplish this object, and owners desiring racing crews as well as members desiring to serve are invited to communicate with the chairman.

REGATTA COMMITTEE,  
Carlos de Zafra, Chairman.

## Canoeing

### A. C. A. Membership.

NEW MEMBERS PROPOSED.

Atlantic Division.—Perry Vosseller, Raritan, N. J., by Edward C. Ehni; Lawrence W. Easton, 477 Central avenue, East Orange, N. J., by Jule Marshall.

Central Division.—M. C. Angloch, care of J. & L. Steel Co., Pittsburgh, Pa., by C. N. Boyd, Jenkins Arcade, Pittsburgh, Pa., by F. V. Eaton, 500 South Highland avenue, Pittsburgh, Pa.; John M. Grant, 6310 Marchand street, Pittsburgh, Pa., and Donald M. Naesmith, 6312 Butler street, Pittsburgh, Pa., all by Harry Bright.

NEW MEMBERS ELECTED.

Atlantic Division.—6609, Justus Schlichting, 1031 Washington street, Hoboken, N. J.; 6631, Frederick Arthur Jacobson, Edgewater, N. J.

Central Division.—6616, John C. Edwards, P. O. Box 37, Boston, Pa.

Western Division.—6613, Ferdinand W. Meugden, 4826 Winthrop avenue, Chicago, Ill.; 6614, Venning P. Hollis, 201 Lake street, Minneapolis, Minn.; 6615, A. Boyd Culver, Edwards, Ill.

LIFE MEMBER.

Atlantic Division.—Life No. 95, A. C. A. 3031, Frank G. Palmer, 171 Sigourney street, Hartford, Conn.

RESIGNATIONS.

Eastern Division.—5645, George H. Berry, Providence, R. I.; 4523, Charles G. Newcomb, Boston, Mass.; 6258, S. Sawyer, Worcester, Mass.

Western Division.—6408, Benjamin S. Pfeiffer, Peoria, Ill.

### Hunting Record Broken.

JUST by way of proving that Emperor William is fully entitled to his reputation as a mighty hunter, a sporting journal recently published statistics purporting to show that the total number of animals slain by His Imperial Majesty during his shooting career now amounts to 67,228.

The list includes twenty-four varieties of game, beginning with 38,578 pheasants, 17,950 hares and 3,442 wild boar, and continuing down the line, 2,068 stags, 867 partridges, three turkeys and one whale.

Forest and Stream is the official organ of the National Archery Association.

## Notes on Hunting Arrows.

BY JAMES M. CHALLISS.

THE recent revival of interest in archery throughout the country causes no surprise to the devotees of the sport. The prominence given the matter by *FOREST AND STREAM* has helped much, but the real reason is the intrinsic merit of the sport itself. When once the border line is crossed and a speaking acquaintance established with the rudiments of the art, conviction generally follows. One of the serious drawbacks has been the difficulty of securing proper tackle. A few years back I personally inspected the supply of the two leading commercial houses in search of a good bow, and the best I was able to find was a defective undersized Spanish yew in one and a badly twisted-backed beef-wood bow in another, together with a lot of indifferent lance. One house had some hickory bows that it recommended as being reversible; that is, the belly and back were interchangeable. Shades of Ford, not to speak of the algebraic Rendtorff! At that time I had not been initiated into the charmed circle, and knew naught of the wizards, Barnes and Whitman. It is apparent from the advertising matter carried in the columns of this paper that the supply houses are waking up and have put in a fairly complete line of tackle. That is good. But they have just touched the surface. Their line is complete from the target archer's standpoint, but totally inadequate for the hunting archer. True, the heavy target bow may be used in the field, but it is not helped any in the process. But as for arrows, it is impossible to buy one from any supply house in the country. There is no form of target arrow that will do for hunting. They are too light, too fragile, and have no shocking power. That being the case, the writer and his archer companion, Z. E. Jackson, were compelled some years ago when they took up the sport to evolve methods and devices for the manufacture of hunting arrows as a matter of necessity. After numerous experiments covering a series of years, with the help of suggestions made by Will H. Thompson out of the wealth of his experience, a standard hunting arrow was produced that seems to meet all requirements. There is no reason why such arrows should not be produced in the factories devoted to the making of target arrows and the demand supplied, or in fact a demand created when it is known that hunting arrows can be secured.

Hunting arrows are of two kinds, one known as a birding arrow and the other as a broadhead. They are of straight-grained, well-seasoned hickory, 28 inches long and  $23/64$  inch in diameter. Smaller than this will not do as a general thing, as the arrow is liable to buckle and gad or flirt in flight. With exceptionally good material it might be possible to reduce this diameter a sixty-fourth of an inch, but not more.

They are feathered with the broad side of a turkey feather, primary feathers for broadheads, and secondary for birding arrows. The feathers are four inches long and are put on spirally. The feathers are stripped, not cut from the rib, and in the birding arrow are untrimmed, while in the broadhead they are cut in a triangular shape, one-quarter of an inch high at the forward end and three-quarters of an inch at the nock end. This makes a very "sassy" looking arrow, approaching the idealized arrow of the artist. The birding arrow has for its pile a round knob of babbitt metal or solder one-half inch in diameter, while the broadhead is armed with a diamond-shaped head, stamped from a steel saw blade, one and three-quarter inches long and three-quarters inch wide, with a tang of course which is inserted in a saw slot in the steel. This is secured by a whipping of fine wire, coated with solder. The nock should be uniform in width, just fitting the string nicely and one-quarter inch deep. Of course the arrow should be painted between the feathers to protect the glue. As much adornment may be put on here as the taste of the individual archer dictates. The arrows of each should have a distinctive marking. Arrows made on these specifications will weigh approximately two ounces or ten shillings, and at first will prove disappointing to the target archer who has been shooting a 4-3 or 4-6 arrow. But when the real sphere of the hunting arrow is appreciated, their merits will appear.

It may be possible to so feather an arrow that will fly true and not rotate upon its axis. I have never seen one. A decided rotation is almost inevitably produced by the natural cup of the feather when they are mounted as nearly parallel with the axis as human ingenuity can accomplish. In the hunting arrow this tendency to rotate is exaggerated by putting the feathers on spirally; that is, by having the ends of a four-inch feather a sixteenth of an inch on either side of the true axis which passes through the middle of the feather. The result is that steadiness of flight is secured, and even an indifferent, crooked arrow will be made to fly true. As Will H. Thompson says, spiral feathering covers a multitude of sins. Another thing. Strange as it may seem, a hunting arrow should be of limited flight. Every shot does not hit, some miss, and when they do, one does not wish to walk into the next county to recover his gear. In shooting squirrels, grouse, doves or other arboreal game, the angle of the shot is generally that which will produce the maximum flight of the arrow, and to be able to recover your arrow without a day's walk is a desideratum. The initial flight of one of these hunting arrows is very rapid, but beyond the range of probable hits they soon lose their force. The range of the bow is about that of the shotgun. There are more killing shots made under forty yards than beyond, and more around

twenty than forty. Of course it is the long shot that arouses interest. I have seen Jackson impale a rabbit at seventy-two yards and have helped eat the deer that he shot at sixty yards, driving his arrow clean through from shoulder to shoulder.

Another object in having the birding arrows headed with a knob of babbitt is to prevent their sticking in the limbs or trunks of trees and thus being generally beyond recovery. This advantage was well illustrated one day when Will H. Thompson and the writer were camping along the Columbia River in Eastern Washington. Our camp was pitched in the Sualkane Cañon, a narrow fertile valley that ran back into the mountains, at the head of which lies Old Baldy. Bear were plentiful there, and one day we started out, but that is another story. On the day in question we had been hunting grouse and had been blessed with an abundance of game. We would walk along and scare the grouse from the sunflowers and sage brush, and they would fly into the branches of the nearby fir and cedar trees, making ideal bow shooting. We each had a quiver of arrows among which were two possessing individuality. The one carried by me had been made by Jackson with infinite care and upon special lines, especially the side and character of the pile, and had been christened the "Whirling Spray." Jack had been disappointed in not being able to make the trip with us, but wishing to be a factor in some way, had made this arrow and forwarded it by mail, with the special injunction that it was to be buried in nothing less than the bowels of a black bear, or on a pinch he would not scoff at a deer. Thompson's special arrow was one that had been carried by the Tartar archers accompanying the allied armies that drove Napoleon from Paris in 1814. It was a beautiful specimen of barbaric art and we had dubbed it the "Tartar Emetic." Shooting had been so good that we found before the day was over that our ammunition was running low. We lost many arrows among the rocks on the mountain sides and among the alders and undergrowth along a little stream of crystal clear water that traversed the cañon. We had flushed a covey of grouse and they scattered and lit in the fir trees. At this particular time at my first shot I got one, hit through and through at the butts of the wings. Soon my attention was attracted by a shout from Thompson, and I saw a grouse headed across the cañon giving a very good imitation of a monoplane, rudder and all. Thompson had hit it fair, from below and behind, and his keen arrow had transfixed the bird without hitting a vital spot nor affecting its flying powers. It lit along the little stream, and we searched in vain for it. The next day while passing that point we discovered where a wolf had secured the bird, devoured it and badly gnawed the arrow. But on the day in question we had exhausted our arrows excepting the "Whirling Spray" and the "Tartar

Emetic," when we espied a beautiful grouse sitting high in the fork of a fir tree. The opportunity was too good to be lost. Thompson said if he had an arrow that was headed with the Kohinor—its steel a portion of the rod of Aaron and fletched with feathers from the wing of the dove that first sighted land—he would risk it on that shot. With calm deliberation he drew from the quiver his century-old arrow and prepared to shoot. With such an example before my eyes, I could not afford to respect Jackson's injunction to bring the "Whirling Spray" to rest only in the vitals of a bear, and I proceeded to follow suit. Both shots missed, and they were good misses, my arrow buried itself in the tree just above the bird, and Thompson's just below. We had had our fun, the bird had had its scare, but our arrows were beyond recovery as far as we were concerned. Had these arrows been properly headed for that class of shooting, they would not have been lost. They were not lost entirely, however, as three years after that a combination of circus acrobat, squirrel and telegraph lineman, who heard the story, climbed the tree and chopped the arrows out, but little the worse for their long exposure.

Surprising results sometimes follow the use of blunt arrows. I have driven them entirely through a rabbit, feathers and all, and have had them glance harmlessly from the wings of a sitting grouse.

Scores of target archers have become proficient and have abandoned the sport, but I never knew one that really hunted with the bow that ever gave it up. There is more joy in bringing home one lone rabbit brought to bag with the bow than there is in giving ninety and nine to the poor which have been collected with a shotgun. It is not the blood and fur and feathers the archer wants, but the chance to shoot and scare them and see them run. The pleasure is in the glorious misses. Every miss is as good as a hit, for one sees exactly where he is shooting, and you do not have to kill in order to know whether you are doing well or ill. Everything one shoots at has more than a show for its life, unless Jackson is doing the shooting; then the odds are a little against it. But that can't be helped; he will insist upon shooting with the precision and regularity of a machine. Thompson says he is as deliberate as the processes of nature and twice as sure. All of which militates against longevity among the rabbits of this vicinity.

I find I am digressing from my subject and getting garrulous. In closing, will say that the steel heads of the hunting arrow must be sharp, razor sharp, and kept so. It is a mistake to make them barbed, or even triangular in shape, as thus it is impossible to withdraw them from the game without much cutting and tearing. Also when hunting in timber, carry a pocket axe to chop out such as become imbedded in trees and logs. And lastly, tell us through the columns of FOREST AND STREAM of your various hunts, hits as well as misses.

### The Bow That Strung Itself.

BY F. S. BARNES.

WILL H. THOMPSON, whom so many archers lovingly call the "father of American archery," for many years with his brother, the author, Maurice Thompson, used the long bow only in hunting game, and who could, if he would, give to literature and to all who love archery many interesting reminiscences of sylvan archery, more than thirty years ago wrote a little poem which appeared in some Eastern periodical, and which attracted so much attention from archery people that it was reprinted in England. Like all of Mr. Thompson's serious work, there is a tender strain of emotion running through it, which is clearly revealed in the second stanza, but it is in the last stanza that the happy conceit of the old bow stringing itself stirs the heart as well as the mind of the faithful archer. The master's praise was too much for the aged limbs of the old bow, and in their swelling pride they bent themselves until the comrade string crept to the nock.

Feeling sure that the young archers of today will be as pleased as we of other years to read and preserve this poet's gift to archery, I attach a copy of the poem.

#### "AN OLD HUNTING BOW."

BY WILL H. THOMPSON.

This is no dead, insensate staff,  
No lifeless bulk in bondage teat;  
The echoes of its ancient laugh  
Roam through the wildernesses yet.  
And fondling it, my eyes grow dim  
With just a hint of hidden tears,  
Seeing each rough and mighty limb  
Bent with the toil of years and years.  
Gone are the days, old friend, when we  
Through the green land went roving,  
And naught remains to comfort thee  
But one poor shaft and knotted string.  
Do these find tongues to sing or say  
Aught of thy vanished history?  
Of mountain brook's wild runaway—  
The pine tree's murmured mystery—  
The voices of the solitude,  
From haunts of memory calling loud,  
Tallulah from her rushing flood,  
Toccoa from her falling cloud.  
With whisperings of beasts beset,  
With scent of slain things' sensuous blood,  
Rousing the slumbering lion yet  
That lairs in memory's oldest wood.  
Do my eyes fail me, as I watch?  
Or are the great limbs curving slow,  
The looped string creeping to the notch,  
Bravo! Well done, my dear old bow.

### Bow Air—Beechview Match.

PITTSBURGH, Pa., March 3.—*Editor Forest and Stream:* On Saturday, March 1, the Bow Air-Beechview team shot a Keystone match round of 144 arrows at 60 yards. The weather, for a wonder, was perfectly calm. Mr. Holmes, while shooting, made the remark that he hardly felt at home in the absence of our usual noisy, violent wind, whereat Mr. Wolf dryly replied that if he had his way he would shoot in a vacuum. Inasmuch as Mr. Wolf weighs about 115 pounds in the rough, one can readily see why he should wish to sidestep the wind. Scores:

	Hits.	Score.
D. F. Wolf.....	102	484
W. J. Holmes.....	126	602
J. S. Jiles.....	128	612
O. L. Hertig.....	141	775

The Keystone match round consisting of

the usual team round with forty-eight arrows additional makes a pretty good test for the archer's endurance. The Pittsburgh archers have also adopted what is called the Keystone practice round, consisting of seventy-two arrows at 100 yards, forty-eight at 80 yards, thirty at 60, 50 and 40 yards; 210 arrows in all. This makes an afternoon's work, which, while somewhat strenuous, can be done once a week without harm. It comprises all the elements of both the York and American round. In looking over old scores I have found in several instances where a York round expert fell down at 40 yards. The cause of this is not lack of skill, but lack of familiarity with the short range.

Mr. Rendtorff's article on the importance of keeping both eyes open while shooting is timely. The writer has been a gun crank all his life and shoots with both eyes open, whether the weapon is a fine-sighted rifle or a shotgun with just a plain bead between the barrels. His observations of the best shots in the world point to the fact that nearly all of them shoot with both eyes open; in fact, nowadays a man who squints along the barrel of his gun is a curiosity.

While Mr. Rendtorff enumerates some advantages which may be placed to the credit of the one-eyed shooter, in reality none exist, for one can take just as fine a bead on his point of aim (if he is going to do such a foolish thing) with both eyes open as he can with one eye shut.

We flushed a meadow lark on our range Saturday and saw several scores of robins. So take courage, fellow archers, for spring is near.  
O. L. HERTIG.

### The Archery Meeting.

BY THOMAS HAYNES BAYLY.

The archery meeting is fixed for the third,  
The fuss that it causes is truly absurd;  
I've bought summer bonnets for Rosa and Bess,  
And now I must buy each an archery dress.  
Without a green suit they would blush to be seen—  
And poor little Rosa looks horrid in green!  
Poor fat little Rosa! She's shooting all day!  
She sends forth an arrow expertly, they say;  
But 'tis terrible when with exertion she warms,  
And seems to me getting such muscular arms;  
And if she could hit, 'twere as well if she missed,  
Prize bracelets could never be clasped on her wrist!  
Dear Bess, with her elegant figure and face,  
Looks quite a Diana, the queen of the place,  
But as for the shooting—she never takes aim,  
She talks so and laughs so—the beaux are to blame.  
She dotes on flirtation—but oh! by-the-by,  
'Twas awkward her shooting out Mrs. Flint's eye.

They've made my poor husband an archer-elect;  
He dresses the part with prodigious effect;  
A pair of nankeens, with a belt round his waist,  
And a quiver, of course, in which arrows are placed;  
And a bow in his hand—Oh! he looks, of all things,  
Like a corpulent cupid bereft of his wings.

They dance on the lawn, and we mothers, alas!  
Must sit on camp stools with our feet in the grass;  
My Resa and Betty no partners attract!  
The archery men are all cross beaux, in fact!  
Among the young ladies some hits there may be,  
But still at my elbows two misses I see.

### Long-Lived Boots.

CLARENCE EATON, of Franklin, Me., is wearing a pair of cowhide boots that were made fifty years ago. The boots belonged originally to Robert Fossett, of Strong, Me., and were worn by him constantly forty-eight years ago and look good for another half century's wear.

# TRAP SHOOTING

**Fixtures.**

If you want your shoot to be announced here, send a notice like the following:

**REGISTERED TOURNAMENTS.**

- March 25-26.—Birmingham (Ala.) G. C. O. L. Carl, Sec.
- April 8-10.—San Antonio, Tex.—The Interstate Association's Southwestern Handicap, under auspices of the San Antonio Gun Club; \$1,000 added money. Winner of first place in the Southwestern Handicap guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. E. E. Shaner, Mgr., Pittsburgh, Pa.
- April 9-10.—Lincoln, Neb.—Capitol Beach G. C. T. C. Brownfield, Pres.
- April 10.—Atglen (Pa.) G. C. Lloyd R. Lewis, Mgr.
- April 14-16.—New Orleans, La.—City Park G. C. J. M. Lionnet, Mgr.
- April 16.—Mt. Holly (N. J.) G. C. A. J. Dellette, Sec'y.
- April 17.—Syracuse, N. Y.—Messina Springs G. C. W. E. Hookway, Sec'y.
- April 17-19.—Hot Springs, Ark.—Arkansas State tournament, under auspices of Hot Springs G. C. H. A. Whittington, Sec'y.
- April 19.—Lawrence (Mass.) Fish and Game Protective Association. A. C. Gray, Sec'y.
- April 23.—Grundy Center (Ia.) G. C. Frank W. Callaway, Sec'y.
- April 23-24.—Wellington, Mass.—Paleface Shooting Association. Walter F. Clarke, Pres.
- April 23-24.—Brantley (Ala.) G. C. A. H. Hill, Pres.
- April 24.—Maysville, Ky.—Mason County G. C. Wm. H. Hall, Mgr.
- April 26.—Pottstown (Pa.) G. C. C. A. Fries, Sec'y.
- April 29.—Guernsey, Ia.—Du Pont G. C. J. W. Dobbins, President.
- April 29-30.—Moberly (Mo.) G. C. J. A. Melton, Sec'y.
- April 29-May 1.—Pond Creek, Okla.—Oklahoma State tournament, under auspices of Pond Creek G. C. Wm. M. Hite, Mgr.
- May 1-2.—Philadelphia, Pa.—Keystone Shooting League. G. F. Hamlin, Sec'y.
- May 3.—Rittersville, Pa.—Lehigh R. and G. C. H. F. Koch, Sec'y.
- May 3.—Bethel, Conn.—Western Connecticut T. S. L. tournament, under auspices of Bethel G. C. C. K. Bailey, Sec'y.
- May 4-5.—Columbus (Neb.) G. C. G. A. Schroeder, Sec.
- May 5-6.—Laramie, Wyo.—Gem City Gun Club. Tyler A. Rogers, Pres.
- May 6.—Vicksburg (Miss.) G. C. J. J. Bradford, Mgr.
- May 6.—Pitcairn, Pa.—Western Pennsylvania T. S. L. tournament, under auspices of United G. C. Louis Lautenslager, Pres.
- May 6-7.—Eagle Grove (Ia.) G. C. A. L. Yearous, Sec.
- May 6-7.—Montpelier (Vt.) G. C. H. B. Moulton, Pres.
- May 8.—Camden (Ark.) G. C. J. P. Wright, Mgr.
- May 8-10.—Hutchinson, Kan.—Kansas State tournament, under auspices of Hutchinson G. C. Chas. T. Rankin, Sec'y.
- May 7.—Seneca Falls (N. Y.) G. C. C. L. Frantz, Mgr.
- May 7.—Hicksville (O.) G. C. C. E. Maxwell, Sec'y.
- May 7-8.—Dayton, Ky.—Northern Kentucky G. C. H. R. Irwin, Mgr.
- May 7-8.—Americus, Ga.—Georgia State tournament, under auspices of Americus G. C. J. W. Hightower, Pres.
- May 7-8.—Sunbury, Pa.—Sunbury-Selingsgrove G. C. J. W. Schoffstall, Sec'y.
- May 8.—Watertown (Wis.) G. C. B. H. Rieck, Sec'y.
- May 8-9.—Kankakee (Ill.) G. C. E. F. Radeke, Sec'y.
- May 9.—Portage (Wis.) G. C. J. Raup, Pres.
- May 10.—Marysville (Pa.) S. A. M. L. Wise, Vice-Pres.
- May 12.—Mt. Airy (Md.) G. C. Ira D. Watkins, Sec'y.
- May 12-13.—Portland (Ore.) G. C. J. E. Cullison, Pres.
- May 13-15.—York, Pa.—Pennsylvania State tournament, under auspices of York City G. C. N. M. McSherry, Sec'y.
- May 13-15.—Montgomery, Ala.—Interstate Association's eighth Southern Handicap tournament, under auspices Capital City G. C.; \$1,000 added money. Winner of first place guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. Elmer E. Shaner, Mgr., Pittsburgh.
- May 14.—Tyndall (S. D.) G. C. F. F. Chladek, Sec'y.
- May 14.—Fulton (N. Y.) G. C. and G. C. B. J. O'Grady, Pres.
- May 14-15.—Waterloo (Ia.) G. C. Nick Webber, Pres.
- May 14-15.—Pipstone (Minn.) G. C. H. T. Ober, Sec'y.
- May 15.—Shelbyville, Ill.—Shelby County G. C. Geo. L. Dearing, Sec'y.
- May 15.—Riverside (Ill.) G. C. E. M. Collis, Sec'y.
- May 15.—Freeport (Ill.) G. C. J. W. James, Sec'y.
- May 15.—Clayton, O.—Salem G. C. F. C. Koch, Pres.
- May 17.—Phillipsburg, N. J.—Alert G. C. Edw. F. Markley, Mgr.
- May 20.—Albia, Ia.—Monroe County Fish and Game Protective Association. Theo. B. Perry, Jr., Pres.
- May 20.—Milton Junction (Wis.) G. C. W. H. Smith, Sec'y.
- May 20.—Pillow (Pa.) G. C. J. A. Bingaman, Sec'y.
- May 20-21.—Wenatchee (Wash.) R. and G. C. Chas. E. Owens, Pres.
- May 20-22.—Temple, Tex.—Texas State tournament, under auspices of the Temple G. C. R. I. Tennant, Pres.
- May 21.—Brazil (Ind.) R. & G. C. W. T. Crabb, Sec'y.
- May 21.—Windsor (Mo.) G. C. W. T. Jordan, Sec'y.
- May 22.—Mt. Morris, Ill.—Mt. Morris G. C. C. J. Price, Sec'y.

- May 22.—Aurelia (Ia.) G. C. Frank R. Welch, Sec'y.
- May 22.—Syracuse, N. Y.—Onondaga County G. C. T. E. Clay, Pres.
- May 22.—Scranton (Pa.) R. & G. C. M. F. Bohn, Sec'y.
- May 22.—Altoona, Pa.—Central Pennsylvania T. S. A. tournament, under auspices of Blair County Road Drivers' Association. Jack Waltz, Sec'y.
- May 22-23.—Winchester (Ky.) G. C. C. B. Strother, Sec'y.
- May 23.—Nicholson (Pa.) R. and G. C. L. A. Wright, Sec'y.
- May 23.—Emporia (Kans.) G. C. Chas. Ford, Sec'y.
- May 24.—Stratford, Ont., Canada.—Pastime G. C. Wm. Boles, Sec'y.
- May 24.—Newmanstown (Pa.) G. C. F. S. Rader, Sec'y.
- May 24.—New Haven, Conn.—Western Connecticut T. S. L. tournament, under auspices of New Haven G. C. F. W. Smith, Pres.
- May 24.—Gananoque, Canada.—Thousand Islands G. C. C. A. Lewis, Sec'y.
- May 24-25.—St. Louis (Mo.) T. S. A. L. Ebert, Sec'y.
- May 27.—Fairmont (W. Va.) G. C. Ed. H. Taylor, Sec'y.
- May 27.—Sikeston (Mo.) G. C. Wm. H. Tanner, Sec'y.
- May 27-28.—Paragould (Ark.) G. C. C. W. Stedman, Sec.
- May 27.—Norwich, N. Y.—Chenango County F. G. and G. C. E. D. Borden, Mgr.
- May 27.—Brodhead (Wis.) G. C. J. B. Pierce, Sec'y.
- May 27-29.—Peoria, Ill.—Illinois State tournament, under the auspices of Illinois State S. A. R. Scholes, Sec'y.
- May 27-29.—Fort Dodge, Ia.—Iowa State tournament, under auspices of the Fort Dodge Gun Club. Jos. Kautzky, Mgr.
- May 27-29.—N. Platte, Neb.—Nebraska State tournament, under auspices of Buffalo Bill G. C. J. C. Den, Sec'y.
- May 28.—Chesapeake City (Md.) G. C. H. L. Worthington, Mgr.
- May 28.—Morocco (Ind.) G. C. Jas. C. Murphy, Sec'y.
- May 28.—Galion (O.) G. C. H. D. Smart, Pres.
- May 28.—Vergas (Minn.) R. & G. C. Chas. A. Peterson, Pres.
- May 29.—Marion (O.) G. C. N. F. Titton, Sec'y.
- May 30.—Cleveland (O.) G. C. F. H. Wallace, Mgr.
- May 30.—Menominee Falls (Wis.) G. C. E. J. A. Pike, Sec.
- May 30.—Utica, N. Y.—Genesee G. C. E. J. Loughlin, Sec'y.
- May 30.—Latonia (Ky.) G. C. H. S. Connelly, Sec'y.
- May 30.—Waukegan (Ill.) S. A. B. Tompkins, Sec'y.
- May 30.—Austerlitz, Ky.—Hill Top G. C. Thos. H. Clay, Jr., Sec'y.
- May 30.—Olyphant, Pa.—Social R. and G. C. Thos. A. Bell, Sec'y.
- May 30.—Greenwich (Conn.) G. C. J. H. Finch, Pres.
- May 30.—Buffalo, N. Y.—Buffalo Audubon Club. W. C. Wootton, Sec'y.
- May 30-31.—Wilmington, Del.—Delaware State tournament, under auspices of the Du Pont G. C. W. A. Joslyn, Asst. Sec'y.

- June 24-25.—Crookston, Minn.—Minnesota State tournament, under auspices of Crookston G. C. Tom Morris, Pres.
- June 25-26.—Du Bois (Pa.) G. C. E. W. Kelly, Sec'y.
- June 26.—Sedalia (Mo.) G. C. John McGrath, Sec'y.
- June 26.—Fayetteville (N. Y.) G. C. C. C. Snook, Sec'y.
- June 26-27.—Adel (Ia.) G. C. Chas. F. Clarke, Sec'y.
- June 27-28.—Grand Forks, N. D.—North Dakota State tournament, under auspices of North Dakota State S. A. Clarence A. Hale, Pres.

**DRIVERS AND TWISTERS.**

R. V. Hanchett, Secretary, Big Rapids Gun Club, writes: "We beg to inform you that the Big Rapids Gun Club has been organized for the season of 1913 with seventy-one active members, and though the membership fee has been doubled over that of last season there appears to be more enthusiasm than ever, and a club of one hundred members assured. A schedule of ten shoots is being arranged, with merchandise prizes, given by local merchants. We will notify you later of our shooting dates, and the results of our individual shoots."

There will be an all-day shoot on March 19, given by the Jersey City Gun Club, Inc. The program consists of nine events, eight of which are at 20 targets each, entrance \$1.40; added money, \$2 each event; No. 9 is a merchandise, at 25 targets, \$1 entrance. Money will be divided by Rose system, 5, 3, 2, 1. All shooting from the 16yd. mark. To the shooter having the highest average and shooting through the entire program, the club will give \$5. The price of targets will be 2 cents each. Standard loads of shells for sale. Two sets of traps. Shooting will commence at 10:30 A. M. Further particulars from R. Young, Secretary, 383 Fairmount avenue, Jersey City.

W. G. BEECROFT.

**Laredo Gun Club.**

LAREDO, Tex., March 5.—This begins the Stevens job competition, on 200 targets, shooting 50 targets weekly, the shooter having the most broken targets at the end of the competition, to receive and keep the trophy. The scores:

	Shot at	Broke		Shot at	Broke
Dr W E Lowry.	50	45	R B Lignoski.	50	45
E K O'Brien.	50	41	Jim Gray	50	40
A B Muller.	50	43	Mrs R Lignoski.	25	12
			E. K. O'BRIEN, Sec'y-Treas.		

**New Hanover Gun Club.**

WILMINGTON, N. C., March 7.—The following scores were made by a few of our members on the above date:

G W Penny.	22	23	24	23	92
James D. Barnes.	22	23	23	22	91
J H Dreher.	22	22	23	23	90
W. A. Underwood.	21	20	23	22	86
L Clayton Grant.	22	23	23	22	88
					J. H. DREHER, Sec'y.

**West Chester Country Club.**

WESTCHESTER, N. Y., March 8.—Without any particularly creditable scores, the ten 'Change members who were up after last Saturday's shoot took a crack at the elusive clay scaler on a 200 target match. It took only 169 for H. Boulton to over-bid the crowd for honors. Stuart Scott, who has decreased in skill as he has increased in embonpoint, got an option on place with 167, while Stock Exchange champion, of a week, made third.

In the team shoot the veterans on the Country Club team, led by Ralph Spotts, probably the best amateur in the world, beat out Princeton and Yale with no effort whatever. Princeton finished second easily, and to spare.

In the club events, Scott took a limb on accumulation cup; D. G. Geddes got a call on South cup, while E. J. Low was high for North cup. The summaries:

Stock Exchange shoot, 200 targets, strings of 25:

H. Boulton	21 17 22 18 21 23 23 24	169
S. Scott	21 21 21 21 18 23 22 20	167
A. Corlies	19 23 19 24 19 22 19 21	166
H. H. Benkard	19 19 20 19 20 18 16 21	154
H. T. Whitney	19 17 20 17 23 20 19 18	153
C. B. Spears	18 20 19 20 19 17 19 21	153
J. P. Kellogg	20 20 21 24 18 16 17 17	153
L. Craufurd	16 15 20 18 20 19 18 19	145
W. W. Pell	16 14 16 9 19 16 16 17	123
E. Kimball	16 17 10 13 16 14 9 21	106

Triple team shoot:  
Country Club of Westchester.—R. L. Spotts, S. Scott, A. Corlies, W. Munn and C. Hall; total 412.  
Princeton.—E. R. Simpson, T. L. Horne, N. R. Nimick, D. L. Nichols and N. R. White; total 362.  
Yale.—O. C. Hoyt, B. H. Scott, J. C. Cassell, B. D. Newton and L. H. Thompson; total 315.

**Farragut Sportsmen's Association.**

FARRAGUT, Pa., March 8.—The semi-monthly trophy shoot was pretty well attended to-day. Bills took the silver spoor for being high for the afternoon, having a clean score with his handicaps. Second prize went to Hetteroth and third to McConnell. Bills also won two sweepstakes with scores of 23 and 24, and Slater took first money in two other sweeps with scores of 24 in each. Scores:

	Stephens.	Du Pont.
Rainey	9 11 20	13 7 20
Hetteroth	20 1 21	21 8 25
McConnell	20 5 25	18 6 24
Cable	16 5 21	15 10 25
Till	14 4 18	16 6 22
Bills	22 5 25	21 5 25
Von Nieda	19 3 22	19 2 21
Marlor	13 7 20	14 3 17
Snow	14 1 15	17 4 21
Slater	22 0 22	20 0 20
Fox	10 12 23	16 8 24
Maugen	21 0 21	17 0 17

In addition to the trophy shoots, Farragut contested with the Yachtsmen's Club in a Delaware River Trapshooting League match and won by the following scores:

Farragut.		Yachtsmen's.	
Hetteroff	43	Maugen	39
McConnell	40	Jones	39
Von Nieda	40	Street	20
Bills	44—167	Glazier	29—116

**Marine and Field Club.**

BATH BEACH, N. Y., March 8.—The resonant event to-day was the trimming of Bensonhurst Yacht Club in a team shoot. High gun was C. Ferguson, Jr., of Bensonhurst, who removed from further competition 84 targets. Second gun was E. H. Lott, of Marine and Field, with a breakage of 80. There were three ties for third destruction, Sayre, Elliott and Towne, on 74. Final accounting shows a slight discrepancy of 40 scalars between the balance of two teams. Twelve entrants were scheduled for the Dr. Atkinson cup on 25 aerosaucers. Dr. F. P. Elliott and A. H. Beetle with 21, trailed close up by C. Ferguson, Jr., with 20. Scores:

Interclub shoot, 100 targets per man:

Marine and Field Club.		Bensonhurst Yacht Club	
S. P. Hopkins	70	C. Ferguson, Jr.	84
E. H. Lott	80	Dr. F. P. Elliott	74
P. R. Towne	74	D. Semkens	53
C. D. Sayre	74—298	T. Webb	42—258

Dr. Atkinson cup, 25 targets:

Dr. F. P. Elliott	21	J. White	17
A. H. Beetle	21	Dr. Webb	14
C. Ferguson, Jr.	20	Dr. Atkinson	12
A. Allaire, Jr.	18	D. Semkens	9
J. Van Pelt	18	R. McKenny	8
G. Kowenhoven	18	T. Bruno	18

**Saratoga Gun Club.**

SANATOGA, Pa., March 8.—Sanatoga Gun Club's live bird match showed Trumbauer, Emmers, Kelfrider and Jones high guns during the afternoon. The best scores follow:

Ten bird shoot: Jones 8, Emmers 7, Trumbauer 6, Harper 6, Jamison 6, Franklin 5, Zehner 5.  
Ten bird event: Emmers 8, Trumbauer 7, Zehner 6, Harper 6, Franklin 6, Jamison 6.  
Five bird event: Kelfrider 5, Emmers 4, Harper 4, Jones 4, Jackson 4, Trumbauer 4, Booker 4.  
Eight bird event: Trumbauer 7, Emmers 6, Jones 6, Harper 5, Zehner 5, Franklin 5, Booker 4, Young 4, Felin 4.

**Riverside—Clearview.**

ESSINGTON, March 8.—Clearview gunners dropped in here to-day for another series of team races with the Riverside Gun Club. The home team captured the match by 360 to 340.

Bonsall was high gun with 46. Oliver was second with 44. Fisher was the only other Clearview man who made 40. Bowers cracked 43. Eachus and Donahue each broke 42.

Riverside.		Clearview.	
Bowers	43	Bonsall	46
Eachus	42	Oliver	44
Donahue	42	Fisher	40
Stellar	41	Hunter	36
Walber	39	Ferry	34
Shiberling	37	Shuster	34
Harper	37	Paulson	28
Doohing	31	Brawn	28
Gohrs	29	Fink	25
McFee	29—360	Absentee	25—340

Horn with 27, and Eisele with 25 also shot for Riverside.

**Beideman Fish House Club.**

EAST CAMDEN, March 8.—Dougherty and Ford were high amateurs here to-day with 83 out of 100. High forwards-only was Les. German with 98 out of 100. Scores:

Targets:					25	25	25	25	Total.
German	.....	25	25	24	24	98			
Dougherty	.....	20	22	22	24	88

*Remington-UMC*

“Beats All Out Doors”

AT FIRST STATE SHOOT OF 1913

And Follows With Great Indoor Victory Of Year At Madison Square Garden

Florida Shooters Make Top Scores With “Perfect Shooting Combination”

This is the way the winners at the Florida State Shoot, held at St. Petersburg, Fla., Feb. 19-21, started the *Remington-UMC* list of State Championships for 1913:

**Championship of Florida:** Won by D. W. Budd of St. Petersburg, 93 x 100, shooting *Remington-UMC* Autoloading Shotgun and Arrow Speed Shells.

**High Amateur Average:** Won by R. H. Bartells of St. Petersburg, 447 x 500, shooting a *Remington-UMC* Autoloading Shotgun. E. H. Eubanks tied for 2d Amateur Average, 445 x 500, shooting *Remington-UMC* Autoloading Shotgun.

100 Straight With Nitro Club Wins International Indoor Championship

There is no record in trapshooting annals of any more decisive clean-up than that achieved by shooters of *Remington-UMC* at the Third Annual International Trapshooting Tournament at Madison Square Garden, New York City, Feb. 27 to Mar. 5. Read the particulars in outline.

**International Indoor Amateur Championship:** Won by R. L. Spotts of New York, with 100 clean breaks, shooting *Remington-UMC* Speed Shells.

2d. Tied for by A. L. Burns of Mamaroneck, N. Y., and A. B. Brickner of Newton, N. J., with 94 x 100, both shooting *Remington-UMC* Speed Shells. Mr. Burns won in the shoot off, 22 x 25. (Mr. Brickner was the only amateur to break 50 straight in the qualifying rounds.)

**Amateur Long Run:** Made by R. L. Spotts, 123 straight with *Remington-UMC* Speed Shells—a new indoor record.

**H. H. Stevens Outshoots All Professionals:** With a *Remington-UMC* Pump Gun and Nitro Club Speed Shells, Mr. Stevens broke all indoor records for professional long run with 163 straight, scored 246 x 250 in the qualifying rounds (all other professionals averaged 25 birds behind this score—the nearest being 236 x 250), 342 x 350 on all targets, and 96 x 100 in the finals—losing first by but one bird.

Eight of the Ten Amateurs to Qualify at the Garden, shot *Remington-UMC* Speed Shells

5,000 more trapshooters used *Remington-UMC* Speed Shells in 1912 than used any other one make. Indications point to an even better showing for 1913

A SQUAD OF IRREGULARS AT PORT WASHINGTON YACHT CLUB'S TRAPS.

Manhasset Bay Y. C.

PORT WASHINGTON, L. I., March 9.—The March trophy and yearly cup props went to C. M. Gould today, the former on (4) 20, requiring shoot-off with D. E. Smith and J. W. Alker. The yearly event went on (4) 22. J. W. Alker, Jr., won in the take-home scratch event (2) 24 and tied up with D. S. Smith in 15-bird scratch event with 11. Ten bird scratch was a winner for Smith on 9, which was enough. The scores:

Match cup, 25 birds, handicap:			
C M Gould	4 20	R F Howland	5 16
D E Smith	2 20	F L Richards	5 15
J W Alker	2 20	B G Loomis	4 14
E A Sierck	2 17		
Yearly trophy 25 birds, handicap:			
C M Gould	4 22	R F Howland	5 19
D E Smith	2 21	F L Richards	5 17
E A Sierck	2 20	J W Alker	2 16
B G Loomis	4 20		
Take-home trophy, 25 birds, handicap:			
J W Alker	2 24	D E Smith	2 15
C M Gould	2 21	B G Loomis	4 12
E A Sierck	2 17	F L Richards	5 11
R F Howland	5 14		
Scratch, 15 birds:			
J W Alker	11	E A Sierck	8
D E Smith	11	B G Loomis	8
C M Gould	9		

DuPont Gun Club.

WILMINGTON, Del., March 8.—To-day J. T. Roberson won for keeps the handsome sterling silver cup donated by Frank L. Connable to the Du Pont Gun Club, and which has been the subject of so many interesting contests during the past twelve months. Mr. Roberson did not win his title to the cup without a struggle, as his best "two scores out of three" only totalled 82 against 81 for Alden B. Richardson. In third place came W. M. Foord, who scored 43 out of 50 on Washington's Birthday. Eight of the nine qualified to contest put in an appearance. The scores:

	Yds.	T'l.		Yds.	T'l.
J T Roberson	21	41	W M Foord	22	36
A B Richardson	22	40	Dr S Steele	19	36
H P Carlson	22	39	W Edmanson	22	34
J B McHugh	22	37	J H Minnick	22	31

With the aid of the above totals, Roberson won out by virtue of his having scored 41 out of 50 on Feb. 15. A. B. Richardson, who also scored 41 on the same day, started out badly yesterday, but finished with 23 out of 25 from 22yds., being the best score made from handicap marks during the afternoon.

Another event of interest during the afternoon was a challenge contest for the Class B 1912 trophy, donated by Eugene E. du Pont. N. K. Smith was the holder of the cup, and J. W. Anderson, Jr., one of the reliable members of Class B, was the challenger. Mr. Anderson won by breaking 40 out of 50. Mr. Anderson's name is the twelfth to go on the cup, and consequently the next proceeding in connection with the cup will be the shoot-off for final ownership between the twelve individuals who have at different times held the trophy.

Four weeks ago Eugene E. du Pont, J. H. Minnick and W. M. Foord tied in a contest for the Class A spoon, and the tie was shot off to-day. The first shoot-off resulted in a tie between Mr. du Pont and Mr. Minnick, but on the second shoot-off du Pont won easily.

In the regular T. Coleman du Pont spoon contests, ties occurred in no less than three out of the five classes. W. Edmanson, however, won the Class A spoon with 23 out of 25 without a tie. C. T. Martin, R. P. Willis and Stanley Tuchtun tied for the Class B spoon on 22 out of 25, Tuchtun winning on the shoot-off. In Class C, Dr. Horace Betts and A. M. Lindsay tied on 20 each, and in Class D, L. W. Crawford, W. G. Robelen and E. M. Ross tied on 15 out of 25. Class E was won by J. R. Bailey with 13 out of 25.

Sixty-one shooters in all competed in the regular events, but scores of 24 and 23 out of 25 were extremely scarce, while only one score of 25 straight was hung up

during the afternoon, that being credited to Edward Banks, who broke 48 out of 50, running 45 straight. The scores made in the spoon events were as follows: Stabler 5, Bailey 13, Tomlinson 21, H. Winchester 17, J. P. Winchester 17, Richardson 21, Galvin 17, \*Hammond 19, Carlton 12, Ross 15, Joslyn 18, Reed 15, Casey 17, \*Lyman 16, Simon 18, Turner 19, \*Ed. Banks 25, L. J. Squier 19, E. E. du Pont 19, \*Worthington 24, Roberson 19, Jensen 16, Jenks 14, Edman 23, Curley 11, Anderson, Jr., 16, Magahern 16, Minnick 21, Highfield 18, W. B. Smith, Jr., 15, Robison 13, Willis 22, Morgan 16, David 14, Dr. Betts 20, Martin 22, N. K. Smith 15, Patterson 14, Leedom 14, Crawford 15, Victor du Pont 19, Newman 19, \*R. King 22, Robelen 15, W. L. Smith 13, Dougherty 14, \*Colfax, Jr., 24, Mathewson 20, Mayer 13, Taggart 9, Lofland 13, Tuchtun 22, Keithley 18, Lindsay 20, Brown 9, F. D. Brown 9, \*May 7, \*Doremus 17, Kenworthy 16, Dr. Linn 15, Wm. Coyne 19. \*Not eligible for spoons.

Sea Side Gun Club.

BRIDGEPORT, Conn.—In spite of the cold and disagreeable weather, there was a good-sized crowd out for the regular shoot of the Sea Side boys, Saturday, March 8, and several very good scores were turned in under the circumstances. Lyon won the leg on the president's cup, he being the first one to score a double win on this trophy, and breaking 48 out of the 50, with a handicap of 4, making him a perfect score. Billings won the leg on the handicap cup, and Blatz tucked away another one on the Island Brook cup, he and Kellogg now having two each on this trophy. It bids fair now for some very interesting matches at the close of the season in the shoot-off on several of the season's trophies.

President's cup, 50 targets:			
Lyon	4 52	Blatz	2 44
Wilson	0 48	Kellogg	4 44
Southen	0 47	R Lewis	2 44
Hull	2 46	Adams	6 44
Senior	0 46	Billings	6 41
Hall	2 48	Jelliff	6 40
Cate	0 46	Williams	0 37
Fox	2 45	Hubbard	7 36
E Lewis	2 45	Bishop	0 29
Sterling	4 45		

Handicap cup, 25 targets:			
Billings	3 25	E Lewis	1 22
Hull	1 24	Sterling	2 21
Wilson	0 23	Adams	3 21
Lyon	2 23	Jelliff	3 21
Blatz	1 23	Senior	0 20
Kellogg	2 23	Fox	1 20
Southen	0 22	Cate	0 18
Hall	1 22	R Lewis	1 18
Williams	0 22	Hubbard	3 18

Island Brook cup, 25 targets:			
Blatz	1 25	Fox	1 22
E Lewis	1 24	Lyon	2 22
Billings	3 24	Sterling	2 22
Hull	1 24	Southen	0 21
Wilson	0 23	Adams	3 21
Kellogg	2 23	Williams	0 20
Senior	0 22	Hubbard	3 19
Cate	0 22	Jelliff	3 16
R Lewis	1 24		
Hall	1 22		

Medford Gun Club.

MEDFORD, Okla., March 7.—The following scores were made to-day at our practice shoot:

Shot at, Broke		Shot at, Broke	
Hutchinson	25 19	Strider	25 24
Bunch	25 16	Wilson	15 13
Dotts	25 20		

Our regular monthly handicap shoot was won by Will Wilson breaking 21 out of 25 from 19yds. I. V. HARDY, Sec'y.

Larchmont Y. C.

LARCHMONT, N. Y., March 9.—F. W. Fitzgerald won six events here to-day. In three of them he ran into a tie. Ralph L. Spotts, as usual, won scratch high score event with 129 out of 150. The scores:

March cup, 25 birds, handicap:			
F W Fitzgerald	7 25	D F McMahon	2 21

New York A. C.

PELHAM MANOR, N. Y., March 8.—G. Fred Pelham played a return engagement here to-day, repeating his average of last week by getting four-fifths of the events programmed—legs on March cup (4) 25; Stoll trophy (3) 25; were his, as well as 100-rock handicap (14) 98, and special trophy (3) 22. O. C. Grinnell won leg on Robinson cup (2) 24, and tied on take-home trophy, (2) 23. T. Lenane, Jr., won leg on Travers Island trophy, (3), 25, and distance handicap (18) 21. High gun trophy, scratch, went to C. Stein with 87, Ogden, Corbett and Pelham tying for place. The summaries:

Independent Gun Club.

PHILADELPHIA, March 8.—Dr. A. L. Westcott, J. B. Fontaine and William H. Clegg shot into a double tie to-day for high gun trophy. On 160 targets, in strings of 25, with distance and added bird handicaps, Westcott, Clegg and Fontaine, each with 11 added targets, scored 92. In the first shoot-off, Fontaine passed out. Clegg and Westcott ran pretty close for about half of the shoot at 25 targets, but Dr. Westcott steadied down and won. Charles H. Newcomb won a spoon for high net score with 85. Other dipper winners were: Joel Davis in Class B, and Jesse Griffith in Class C. Scores:

ADRIAN ADVANCES THE INDOOR RECORD, SHOOTING WINCHESTER

.22 Caliber Cartridges and Muskets

997 THE NEW HIGH TEAM SCORE

The Winchester .22 Caliber Musket

DIP the colors to the Adrian (Michigan) Rifle Club, for it has beaten the World's Record of 996 for indoor target shooting, hanging up a 997 in a side match with the Cleveland Team. The match was shot under exactly the same rules and conditions as govern regular matches in the Inter-Club Series. The scores of the individual members of the Adrian Team were as follows:

Table with 2 columns: Name and Score. Lists scores for Matterson (200), Meyer (200), Bonner (200), Nessel (199), and Snekker (198).

The entire team shot Winchester .22 Long Rifle "Lesmok" cartridges—regular stock loads—and Winchester .22 Cal. Muskets. This wonderful shooting shows what can be done when great skill and the best possible cartridges and rifles are combined. Following so closely on the two remarkable scores made by the Warren Team with W goods, it settles the question of superiority to the satisfaction of all shooters, and is also further proof that

Regular Stock W Cartridges are Better than Special Loads

Queens—Rockaway.

QUEENS, L. I., March 8.—Fifty-four escaped aerocauters stood between Queens and Rockaway in the team shoot here to-day. Ten men shot on each team, the winners, Queens Country Club, breaking 732 against 678 by Rockaway. The winning bunch had a number of old reliable, headed by J. F. Simonson, who topped the 19 with 92 out of his allotment of 100. J. Hendrickson, his team mate, broke 91, while the captain of the losers, Paul von Boeckman, one of the best crackers on Long Island, took third with 89. Each team had five men, who broke 70 or less. The scores:

Table with 2 columns: Name and Score. Compares scores between Queens Gun Club and Rockaway Gun Club.

Baltusrol Golf Club.

NEWARK, N. J., March 8.—In the only scratch event here to-day, a 25-target event, F. N. Cowperthwaite won with 22. J. F. Hahn won first leg on Cowperthwaite cup, 12 pair doubles, with 7 from 4 handicap. G. A. Williams won both of the other events. Scores:

Table with 2 columns: Name and Score. Lists scores for Cowperthwaite cup, 12 pairs doubles, handicap.

Table with 2 columns: Name and Score. Lists scores for scratch shoot, 25 targets.

Table with 2 columns: Name and Score. Lists scores for handicap shoot, 25 targets.

# THE <sup>®</sup> BRAND Wins Pacific Coast Rifle Matches

Report on Indoor Rifle Tournament of the Pacific Coast, held in Shellmound Park, Emeryville, Cal., Indoor Rifle Range, February 6, 7, 8 and 9, 1913, under the auspices of the Shellmound Rifle and Pistol Club, shows the following:

**CONDITIONS:**—Distance of all Targets, 75 feet; 22 Cal. Rifles; any sights, including Telescopes.

## 100-SHOT CHAMPIONSHIP CONTEST

20 Targets of 5 shots each. Regular 1/4 in. Ring Target Used

Winner, L. S. Hawxhurst.....score 2436 x 2500, PETERS  
Third, R. S. Wixson..... " 2214 x 2500, PETERS

## CONTINUOUS MATCH

The Regular 1/4 in. Ring Target Used. Distance 75 feet

Winner, L. S. Hawxhurst.....score 222 x 225, PETERS

## BULLSEYE MATCH

Winner, Ben Jonas, center measured 2 degrees, or 2-100 of an inch from center. Used PETERS

**NOTE:**—PETERS LONG RIFLE CARTRIDGES LOADED WITH SEMI-SMOKELESS WON FIRST PLACE IN EACH MATCH.

The P Brand is equally popular and equally effective in all sections of this big country.

Ask for SEMI-SMOKELESS, and don't accept any alleged "just as good" kind.

## THE PETERS CARTRIDGE COMPANY, CINCINNATI, OHIO

NEW YORK: 98 Chambers St., T. H. Keller, Manager.

SAN FRANCISCO: 608-612 Howard St., J. S. French, Manager.

NEW ORLEANS: 321 Magazine St., Lee Omohundro, Manager.

### Cleveland Gun Club.

CLEVELAND, Ohio, March 9.—The regular weekly club shoot of the Cleveland Gun Club was held on Saturday, March 8, at Shooting Park. Many good scores were made, J. R. Blakeslee, F. E. Doolittle and Dr. A. J. Brown coming under the wire with scores of 49 out of 50. Blakeslee and Doolittle tied for the day in all events, both breaking 140 out of 150.

There were only sixteen shooters facing the traps, and there is no reason why it should not have been twenty or twenty-five, if the regulars that are on strike would only turn out and give a helping hand, as some have not shot a target on the grounds this year; but they are holding out to get the best of the weather man. The championship contest for 1913 looks as if it was going to be a hot one, as Blakeslee and Doolittle have both thrown their hat into the ring for this honor, and they say it is open for others if they wish to enter. Mr. Hogan has a new gun and is looking for his friend, Mr. E. S. Rogers. Mr. A. B. Jones, who won one of the first annual trophies last year, is making a bid for the booby prize this year. The scores of Saturday, March 8:

Event No. 1, semi-annual trophy, 50 targets, handicap, 16yds.: Doolittle 47, Hogan 47, Blakeslee 46, Brown 44, Dibble 43, Hartman 41, Rockwell 41, Tobey 39, Stone 39, Thorp 37, Freeman 37, Harris 37, Clark 34, Stevens 32, Noble 31, Jones 29.

Event No. 2, annual trophy, 50 targets, handicap, 16yds.: Dr. Brown 49, Blakeslee 45, Doolittle 44, Dibble 43, Hogan 43, Thorp 41, Rockwell 40, Freeman 40, Harris 39, Hartman 39, Tobey 39, Clark 38, Stevens 34, Jones 34, Stone 32, Noble 29.

Event No. 3, quarterly trophy contest, 50 targets: Blakeslee 49, Doolittle 49, Dibble 45, Brown 43, Hogan 43, Thorp 41, Freeman 38, Hartman 37, Harris 37, Stone 32, Stevens, 32.

F. H. WALLACE, Mgr.

### Hudson Gun Club.

JERSEY CITY, N. J., March 9.—The pleasant day brought out a good attendance at the regular bi-monthly shoot of the Hudson Gun Club, to compete for the Schortemeier trophies, and to get a little practice at their favorite pastime. Billy O'Brien, the Spaniard, topped all hands for high average by breaking 80 per cent. of his targets, and had to keep close to his work, as Mr. Dickerman, of the Chicago Gun Club, who paid us a visit this morning, was right after him and finished with an average of 79 per cent. Dave Engle was a little off to-day in his shooting, and finished third with an average of 76 per cent. The winners of to-day's contest in the trophy event was, class A, W. O'Brien with a score of 43; in class B, H. J. Gautier managed to score 40, and was high in his class, while class C picked as a winner J. Williams, Jr., who scored 36 of his birds and won a leg on the prize.

The day, while pleasant over head, was rather windy, and it caused the targets to do some funny stunts, which in a way has a lot to do with some of the low scores of the shooters. We shoot on Sunday, March

23, when the sixth contest for these prizes will take place, everybody comes down to our grounds, so get on the band wagon and hear the noise, if you are afraid to carry a gun on Sunday, there are always a few that are not working at the club house and you are welcome to use them, so don't forget the date, March 23, at 10 A. M.

PIONEER POWDER MAKERS OF AMERICA

**Nassau—Westchester.**

GLEN COVE, L. I., March 6.—The final shoot in the series of interclub trapshooting contests, in which the Nassau Country Club has been participating, will be held March 23, at the Country Club of Westchester.

The matches began in February, and have reached the final stage. In the initial shoot Country Club of Westchester defeated Rockaway Hunt Club team at Westchester; Rumson Country Club defeated Oakland Golf Club at Rumson, N. J.; Nassau Country Club won their match with the Piping Rock Club team at Piping Rock, and Garden City Gun Club won from Greenwich Country Club, at Garden City.

In the second tournament, Westchester team beat Rumson and Nassau's team defeated Garden City.

Nassau's team will include Howard F. Whitney, Thomas D. Hooper, Roy Rainey, Howard W. Maxwell and William W. Pell.

The winner of February cup, offered at Nassau Country Club for shoots at home during that month, was won by W. E. Kimball with a total of 5 points. Other scores were: Herbert Lee Pratt 3 points, H. M. Cowperthwait 2½, B. B. Tilt 2, D. G. Geddes 2, and H. F. Whitney 1 point.

**Cash Prizes to Women Trapshooters.**

THE Du Pont Powder Company, of Wilmington, Del., is sending out to the women trapshooters a special prize offer for short stories on trapshooting subjects, and any of our women readers who are trapshooters are invited to compete for the prizes.

In order to secure a good story on "Why I Took Up Trapshooting," or "Trapshooting from a Woman's Viewpoint," they offer a cash prize of \$50 to the woman trapshooter submitting the best story of 800 to 1000 words, and \$25 for the second best story. Stories to be illustrated with photographs. The winning stories will be used in high class magazines with the name of the author. A competent judge will decide which are prize winning stories. They reserve the right to use any one of the stories not selected as prize winner, the author to be paid \$5 for the story and \$1 each for photographs used.

Poses of single shooters must be accompanied by the signed permission of the person photographed, giving privilege to use the picture in publications.

All stories to be eligible for the competition should be in hand by Aug. 1, 1913.

# Parker Gun Victories in 1912

THE highest official average for the season of 1912 at both **Single and Double Targets** was made with **Parker Guns**.

As on every previous occasion, the bona fide **Championship of America** was won with a **Parker Gun**, Mr. W. R. Crosby scoring 198 x 200 targets at 18 yards rise. Same man, same gun, made the **World's Record**, scoring 98 x 100 targets at 23 yards, which is a truly wonderful performance.

Small bore **Parker Guns** are recognized as the Standard Game Guns of America and are gaining in popularity every season with the most progressive sportsmen. For full information regarding guns in gauges from 8 to 28, address

### Boston A. A.

RIVERSIDE, Mass., March 8.—A lot of good things happened here to-day. First, a record attendance, nineteen, turned out; second, C. P. Blinn from an elevation of 5½, made a full and a half scaler over, record for March cup on Sargeant traps, and thirdly, the bunch that showed was about as congenial as ever blew rings with gun powder. S. A. Ellis won take-home trophy with 92 from four gratis saucers. Blinn occupied lower berth with 91 from 11 gratuities, while T. C. Adams, from the ground, had to sit up all night—there were only two berths, and he was third corner.

Weather was ideal, just cold enough to make welcome the altitudinous spheroid upon retreat to the club house.

### Meadow Springs Gun Club.

MEADOW SPRINGS, Pa., March 8.—Meadow Springs' big event was pulled to-day with a six-prize target shoot, which was followed in the evening by the annual banquet and election of officers. The shoot was for members only. Deily won first prize; his score of 68 from 10 handicap, was the best score made on the grounds. Henry and Emerson tied for second prize with 66, and on the shoot-off, Henry won. Scores:

A "Good Friday" shoot will be given by the club Friday, March 21, and extends greetings to Warrenton and St. Charles gun clubs, the St. Charles Trapshooters' Association and to the Cave Springs Sporting Club. In order to meet with the purpose of organizing the several clubs into a league. This was taken up at the suggestion of the president of the Warrenton Club. Talk it over with members of your club, get the club to elect representatives to meet in a business meeting after the shoot for the purpose of getting together in some manner to help each other along in the sport of trapshooting which we believe is the cleanest and most manly sport in America to-day.

The program will consist of 100 birds in ten events. Division of money, jack rabbit per cent. system. Purses to be made up of 1c. for each bird and 10c. for each bird missed. Shooters may enter for as many events as desired, but we would like for all to shoot clear through. Professionals welcome to shoot for targets only. Business meeting in the evening at the Hardware Store at 7 o'clock.

J. O. WILSON, Sec'y.

### Jersey City Gun Club.

JERSEY CITY, N. J., March 8.—Twenty-two shooters were out at the Jersey City Gun Club to-day and had a splendid day for shooting, as there was no wind at all and the light was fairly good. Geo. Piercy won high average with 82 per cent., and Dixon was next with 73. Burlington and Engle tied for third with 72 per cent. Piercy also won the leg on the season trophy. The scores follow, strings of 25:

Burlington.....	20	17	13	19	22	19	17	17	18

Jones.....	14	12	8	..	..	..	..	..	..
Finnegan.....	7	7	4	..	..	..	..	..	..

We are going to have an all-day shoot on Wednesday, March 19. Eight events, entrance \$1.40 each. Money divided Rose system, and one even at \$1 for merchandise. We also shoot every Saturday afternoon, and can take care of all who wish to pay us a visit.

Glenwood Country Club.

GLENWOOD, L. I., March 8.—Charles W. Berner was high gun in both the C. E. Berner and J. C. Jackson cup shoots, shooting 42 in the first and 41 in the latter. C. E. Berner won the sweepstakes with 25, shooting on a 4 handicap. The scores:

Table with 2 columns of names and scores for Glenwood Country Club. Includes C. E. Berner cup and J. C. Jackson cup results.

Table with 2 columns of names and scores for Sweepstakes, 25 clay birds, handicap.

Table with 2 columns of names and scores for Team race, 25 birds, handicap.

Table with 2 columns of names and scores for another Team race, 25 birds, handicap.

White Plains Gun Club.

A "Tom Davis Shoot" will be given by the White Plains Gun Club, at their grounds, Saturday, March 15. Shooting will start at 9:30 A. M. A cordial invitation is extended to the friends of Mr. Davis, members of other gun clubs, and all those interested in this sport, to shoot with us on this day, which the members have set aside in appreciation of the assistance rendered this club by Mr. Davis.

Evanston Gun Club.

CHICAGO, Ill., March 2.—Yesterday and to-day were cold, with a strong wind blowing across the traps, causing the birds to jump. Yesterday, seventeen shooters faced the traps. Jesse Young won the first event, 25 targets, 16yds., with a perfect score; Darby second with 23. J. Graham, Kennicott, Jackson, McDermott and T. Graham were all tied for third honors with 22. Jackson captured the second event with 24; Jesse Young second with 23; J. Graham, Coleman and McDermott third with 22. Kennicott took the third event with a perfect score. Jesse Young second with 23, and Jackson third with 22.

On Sunday Phalen was high man for the day with a score of 52 out of a possible 75. Millen and Miller second with 46. The shoot for the club spoon resulted in a tie, seven members making a perfect score. This tie will be shot off next Saturday and Sunday, the following gentlemen taking part in the shoot-off: Kennicott, Coleman, Darby, Phalen, Peck, Van Petten and Langworthy.

Table with 2 columns of names and scores for Evanston Gun Club. Includes Scores of March 2 follow and Targets.

Table with 2 columns of names and scores for Scores of March 3.

W. J. PHALEN, Sec'y-Treas.

Siwanoy Country Club.

MOUNT VERNON, N. Y., March 8.—An even dozen of the Siwanoy Country Club faced the traps this afternoon to contest for the Schedler trophy presented by C. W. Schedler, chairman of the gun section. The conditions called for 100 targets handicap, gun below the elbow until bird was in sight. First place was won by Z. C. Offutt, who shot from scratch, making a total of 66 with Prof. Hill, a close second with 64. Scores:

Table with 2 columns of names and scores for Schedler trophy, 100 targets, handicap, gun below elbow.

Table with 2 columns of names and scores for Gun below elbow, 25 targets, scratch.

Table with 2 columns of names and scores for Practice shoots, 25 targets, scratch.

Yale—Bridgeport.

In their first shoot of the season, Yale Gun Club was taken into camp by Bridgeport Gun Club on March 1. The score was 458 to 400. Vanstone, of Bridgeport, was upper gun with 96 wrecks. Banks topped the blue bunch with 91. The scores:

Table with 2 columns of names and scores for Yale and Bridgeport match.

High Gun AT DENVER, 1912 HANDICAP, SEPT. 10-13

Mr. R. H. Bruns, shooting his LEFEVER

made the marvellous run of 283 without a miss.

On the 700 single targets, including handicaps, Mr. Bruns scored 683 out of 700.

The second day of the tournament on the day's program of 200 targets, Mr. Bruns and his Lefever gun scored 200 out of 200. A world's record for ten traps.

On the 500 single 16-yard target for amateurs, Mr. Bruns scored 494 out of 500.

ANOTHER WINNER AT THE PACIFIC COAST HANDICAP

Mr. L. H. Reid, shooting his Lefever gun, won second high average with 381 out of 400.

Why don't you shoot a LEFEVER?

Advertisement for Rifle Shooting Indoor Championship. Text: 'Rifle Shooting Indoor Championship. THE seventeenth annual indoor championship match and prize shoot of the United States will be held under auspices of Zettler Rifle Club, A. Begerow, president, at'

159 West Twenty-third street, New York, on March 15-22. Shooting from 10 A. M. to 11 P. M. daily, except Saturday, March 22, when shooting closes at 10 P. M., and the sale of tickets at 9 P. M. Practice allowed before 10 A. M. Targets to count on scores must be handled by the committee only until scores are duly recorded. Shooters tampering with targets will be disqualified. All targets that are not shot at the close of the shooting each day, must be returned to the secretary. Competitors may hold shooting stations as long as desired, provided, however, they continue shooting. Any sights, including telescopic as well as palm rests permitted. Distance of all targets, 75 feet, only .22 short cartridges to be used. In all cases the decision of a majority of the shooting committee present will be final. Entrance fee, \$5. Each contestant to fire 100 shots on 20 targets of 5 shots each, the regular 25 (1/4in.) ring target to be used. To be completed on the same day the score is begun. The shooter making the highest score will receive the gold championship medal and choice of prizes. Next highest score, second choice, and so on. Ties will be decided by the value of the next best score or scores of ten shots. A prize for all who complete their 100 shots in this match. Cash prizes by the Zettler Rifle Club, as follows: \$20, \$15, \$10, \$9, \$8, \$7, \$6, six of \$5 each, four of \$4 each and three of \$3 each. Continuous Match.—Open to all, targets of 3 shots, 35 cents, or three for \$1. Re-entries unlimited. The best three targets to count for the first five prizes; best two targets for the next five, and one target for the rest. The 25-ring (1/4in) target to be used. Ties divided. Prizes range from \$40 to \$2. Premiums for most full scores, \$15; second, \$10; third \$5. In case of tie, next best score or scores. The Gus Zimmermann Trophy Match.—Open to all, bullseye targets. Best three centers to count. In case of a tie, next best center. Tickets of three shots, 25 cents. Tickets unlimited. First prize, Zimmerman gold trophy; second \$10; third \$5. Bullseye Target Match.—Bullseye of three shots, 35 cents, or three for \$1. Re-entries unlimited. Best shot by measurement to count. Ties divided. Prizes range from \$25 to \$2. Premiums for most bullseyes, \$5; second, \$4; third, \$3. The Shooting Committee is made up of the following: A. Begerow, chairman; F. Hecking, secretary; B. Zettler, shooting master; H. M. Pope, L. C. Buss, L. Maurer, C. Oltmann, C. Zettler, F. M. Bund, L. P. Hansen, Gus Zimmermann, C. A. Schrag, O. Smith, J. Kaufmann, A. B. Leavitt.

AT the big 6-day International Trap Shooting Tournament at Madison Square Garden, New York City, Feb. 27th to March 5th, the

*Marlin*

WON THE INDOOR

**Professional Championship**

The winning score was made by Mr. Willard S. Darton of Portland, Maine, shooting the standard grade Marlin hammerless repeating shotgun. After five days of spirited competition in the qualifying events, among a big field of the most noted expert shooters in the country, Mr. Darton broke

**97 x 100**

in the finals, adding to the long list of Marlin winnings, the much-coveted handsome gold medal, emblematic of the Indoor Professional Championship of the world.

If you want to know why Marlin guns are winners, send 3 stamps postage today for the new Marlin gun catalog, describing the six grades of hammerless pump guns as well as all other Marlin repeating rifles and shotguns.

**High School League.**

WASHINGTON, D. C., March 10.—The ninth and last week of the Public High School League competition for the United States championship finds the Iowa City High School in the lead in Class A with nine straight victories. Deering High School, of Portland, Maine, comes second with eight victories and only one defeat. In Class B, Salt Lake City High School is the winner, also with nine straight victories. The Susquehanna, Pa., High School is in second place with eight victories and only one defeat. The Iowa City High School and Salt Lake High School will now shoot off for the championship of the league and the winner will receive the national trophy presented by the War Department. The results of the match are as follows:

Class A—Iowa City High School Rifle Club, 961, vs. Morris High School, of New York City, 916; Deering High School, Portland, Maine, 971, vs. Baltimore Polytechnic School, 883; Western High School, Washington, D. C., 702, vs. Brookline, Mass., High, defaulted; Stuyvesant High School, New York city, 896, vs. DeWitt Clinton High School, New York city, 893; Eastern High School, of Washington, D. C., and High School of Commerce defaulted.

Class B—Salt Lake City High School, 945, vs. Utica Free Academy, 832; Sault Ste. Marie, Mich., High School, 898, vs. Business High School, of Washington, D. C., 797; Springfield, Mass., Technical School, 914, vs. Tucson, Arizona, High School, defaulted; Portland, Maine, High School, 836 vs. Manual Training School, St. Louis, Mo., 728; Susquehanna, Pa., High School, 960, vs. Manual Training School of Washington, D. C., 933.

**Interclub Series.**

WASHINGTON, D. C., March 8.—In the Inter-Club League matches for the United States rifle shooting championship, Warren still leads, winning the match from Erie by a large margin. The District of Columbia Rifle Association and the Manchester, N. H. Rifle and Revolver Club tied, but the score of the D. C. boys out-ranked that of the "Down Easterners." This week ends the series of matches and the indications are that the Warren Club will shoot off with the Engineers Rifle and Revolver, of Cleveland, Ohio, for the United States championship. The results of the tenth week's match are as follows:

New Orleans, La., Rifle and Revolver Club, 912, vs. 12th Regiment Rifle Club, of Brooklyn, N. Y., 890; Warren, Pa., Rifle and Revolver Club 991 vs. Presque Isle Rifle Club, of Erie, Pa., 956; Myles Standish Rifle Club, of Portland, Maine, 957, vs. Bangor, Maine, Rifle Association, defaulted; Birmingham, Ala., Athletic Club Rifle Association, 926, vs. Philadelphia Rifle Association, defaulted; The Park Club, of Bridgeport, Conn., 994, vs. Winchester Rod and Gun Club, of New Haven, Conn., defaulted; District of Columbia Rifle Association, 984, vs. Manchester, N. H., Rifle and Pistol Club, 984.

ASPECTS OF THE MINNESOTA GAME CODE.

Continued from page 336.

sening number of prosecutions for law breaking in the chicken country simply because the law is not violated as it once was. Market hunting is a thing of the past. And in no section of the State is the effect of law enforcement by spreading a knowledge of it more apparent.

Moral suasion has done more than policing service in the chicken country. It has resulted in a greater number of licenses being issued every season. In the thickly settled farming communities of the central and southern part of the State there is a wonderful increase in the numbers of flocks of birds. This can be accounted for chiefly because the birds have had a chance to mature before being fired upon. Also those birds remaining in this section after spending the winter there have been unmolested during the nesting season and have thrived. There is some after-season shooting in these sections, for the birds are not thick enough during the season to warrant one in hunting them. They come in from the breeding hills further west as the winter presses them into a country where the waste grain of the hills is more plentiful. A greater number of birds will remain in sections in which they feed, during the winter, if they are not shot into after the close of the season, for the closing date is generally in advance of the time when the flocks migrate. These things should all be made public through the press, for they are a means to an end.

**AMERICAN DUCK SHOOTING**

By George Bird Grinnell

Describes every species of duck, goose and swan known to North America; tells of the various methods of capturing each, the guns, ammunition, loads, decoys and boats used in the sport, and gives the best account ever published of the retrieving Chesapeake Bay Dog.

**AGENTS' MONEY-MAKING OPPORTUNITY**

Everybody makes money in "Baseball." Are you getting "yours"? The Baseball Magazine has opened a NEW DEPARTMENT which requires a representative for SPECIAL WORK in every city and town of the United States and Canada. Exclusive territory to the RIGHT party. The work is very lucrative, proportioned to the time required—and, as stated, can be carried on without interference with one's present occupation. Opportunity "knocks" but once. This is your opportunity. Write a postal to-day before some one else is appointed in your territory.

Address New Dept., Baseball Magazine Co. . . . . 70 Fifth Avenue, New York City

The good fishing waters in Minnesota have brought to the State annually a great number of summer residents whose trail of dollars expended for accommodations, boats, guides, bait, hotels, livery and incidentals has made the work of caring for these folks a profitable industry. The work can be extended in numerous ways, chief of which is the restocking of certain waters and the cleaning out of moss and weeds which hinder movement of the fish and make them often too easily taken. During the past four years the right to seine certain lakes has been sold by the State Game and Fish Commission at auction, the bidders thus obtaining the rough fish which they may remove from the lakes between the 1st of October and the 1st of the following May. On the 7th of August, 1912, nearly \$5,000 was realized by the commission from such sales, some of the lakes bringing as high as a thousand dollars. This money goes into the coffers of the commission, and is drawn on to further its work. One lake brought \$1,735 for the seining rights for the winter of 1912-13. The bidders pay the warden fee that provides State supervision of the work. From personal experience I know that the removal of rough fish, suckers, buffalo, carp, sheepshead, garfish, redhorse, etc., increases the successful spawning of the game fish. This winter I have never seen more small game fish than those we have encouraged in the moss and weeds of the lakes in my district. These have all been returned along with the larger fish taken from time to time.

**SUGGESTIONS.**

There being so many angles to the work of game protection and preservation, it is well to consider all of them, especially those suggestions for the improvement of conditions and the betterment of the warden service. There should be a fostering of the incentive on the part of individuals to help game through the winter. Quail should be allowed trapped and carefully planted in likely covers when spring opens. Clubs should be encouraged in this and permitted to have a deputized warden under whose supervision the work might be done. Prairie chickens are more able to help themselves in severe weather than are quail. Chickens leaving the hills of their nativity and going into densely settled country have to escape the gun of the hunter, who wants to take advantage of their presence, and more complete warden service only will protect them. When the law is enforced, this migration of chickens is highly preservative. To protect these birds, to see that quail are fed in bad weather, to have a more general control over the trapping season, we should have a salaried warden service in each county from the 1st of September to the 1st of May. The warden should be constantly on the move to perform his duties and compelled to own a horse for transporting himself. After the State begins planting game will be time enough for a service the year round in all sections. During the summer one warden could care for four counties, unless the fishing for market industry was not too large in his territory.

It is clearly against the law for minors to carry firearms, yet hundreds and thousands of them are doing it every fall and winter. They keep the woods and fields about the cities and village scoured of every game bird and creature,

and are often a menace to life and property. This law should be enforced, but cannot be without more complete warden service and a campaign of education to back it up.

In a particular valley through which flows a certain river in the southern part of this State there are not enough fishways. Commercial interests have set at naught the intentions of the game and fish commission to keep open the waterway draining this valley and allowing fish to ascend the outlets to many lakes that flow into the main stream. After a rise in the river when the flow overtops dams and turbine races, and the fish can ascend into the creeks and lakes the fishing is noticeably better. This is proof enough that the fish cannot get up when they want to run in the spring, and that the fishways should be open all the year round.

There is still further work for the game and fish commission to do in furthering preservation by sending out matter for publication which will help protect the birds during the nesting season. Every newspaper in the State will be glad to assist in the work. If the matter is neatly gotten up and placed in the hands of the editors, they will use it gladly.

The State should go ahead in its encouragement of sportsmen's clubs and specifically state what it will do to help in restocking waters, enemies of birds, introducing new birds and bettering the warden service. Clubs can be made a decided influence for improving all game and fish conditions.

A strict reapportionment of the fees received from shooting and fishing licenses should be made to further the work in either branch. Fishing cranks are very jealous of the money they pay into the general fund and want it used to better the fishing waters, and likewise the shooters who see a portion of their fees go into the distribution of trout, bass, pike and croppie fry, and loudly wail thereat, is evidence enough that a true apportionment should be made. It seems to be only a matter of time before the game and fish of this State will be looked after scientifically, and the will to do and undo will be wrested from the hands of politicians that clamor at the board of commissioners for action that suits their fancy.

Sportsmen's clubs are at their own expense restocking waters, planting rice and celery, riding waters of weeds and moss that are so thick as to hinder the movement and spawning of fish, prosecuting law breakers and going forward with the work. They should be given every assistance where it is possible and feasible.

At least once a year the wardens of this State should meet to discuss problems to be solved for the bettering of the service, and such meeting should take the form of a schooling where the ablest teachers might help. Some men are not patterned for the service. These should be weeded out. Those who like the work and are faithful should be encouraged and schooled for the every day work as well as the educational branch that includes publicity of the law and tact in its enforcement. What improvement the game conditions have made in Minnesota during recent years is generally traceable to this source, and what the future holds in reserve will be in direct ratio to the energy with which this work of publicity and direct warden service is developed.

April 5.—St. Louis Collie Club Show at St. Louis, Mo. G. F. Sudhoff, Sec'y.

## Duquesne Dog Show.

PITTSBURGH, Pa., March 8.—At the twentieth show of the Duquesne K. C., ended here to-night, King Oorang came back into his own, getting the blue for best dog or bitch in the show,

thus winning for A. Albright, Jr., of Newark, N. J., the delegates' trophy, rules of which call for three wins by the same owner. Thomas W. Lawson with Dreamwold Blunderbuss easily took honors for the best dog in the non-sporting division. Mary Winthrop Turner took two wins with Beautiful Doll in French bull class.

The Meadowview Kennels' English setters, Meadowview Bob Roy, Lady Frances, Wyoming Valley May Belle took first in classes in which they were entered.

In Airedale terriers, Baughfell Lovaine captured first award in the bitches class.

Fort Orange Browney took a first in the Boston terriers, puppies, dog class; second in the novice.

Lady Ringleader took first in two classes in the Boston terrier competition, winning in the American bred bitches and limit bitches class.

The show was the most successful ever held in this city.

Spratt's \$50 special for the best brace of any breed in the show—Won by Greenacre Kennels.

**Bulldog Breeders' Sixth Open Show.**

THE Breeders have launched the preliminaries for their sixth open show, which will be held on Saturday, May 31, the day after the big Long Island Kennel Club show. A. M. Lederer has kindly consented to adjudicate at this important show, and in view of the fact that his dog has been shown fearlessly at all shows this year, and consequently he has not passed on any of the new big ones, he should draw a banner entry. The following committee has the show in charge: C. H. Wood, Chairman; E. H. Berendsohn, Secretary and Treasurer; Walter Murray, P. Seixas and E. P. Hinds.

The location of the show is still being investigated. The committee has several venues of a particularly desirable and novel character in view and some decision will be reached by the week end.

The Breeders have filed their request for permission to apply for a license, and four point rating from the A. K. C. with the Bulldog Club of America.

The classification will follow the usual liberality of the Breeders, and as an innovation the American bred class will be divided by weight in both sexes.

Among the specials will be medals from the Bulldog Club, Inc., of England, and the Bulldog Club of New South Wales.

**Breeders' Annual Meeting.**

THE annual meeting of the Bulldog Breeders' Association of America was held Feb. 20. There were about forty members present. The following were elected for the ensuing year: W. S. Gurnee, Jr., President; Allison M. Lederer, First Vice-President; J. A. B. Hossack, Second Vice-President; E. Ralph Smith, Third Vice-President; W. Beardsly Judson, Treasurer; Abram D. Gillette, Secretary. The following governors were elected to serve until February, 1916: W. S. Gurnee, Jr., W. H. Sawyer, J. A. Hossack, Arnold Lawson, Dr. E. H. Berendsohn.

Among the important matters decided were the holding of an annual banquet, the abolition of the voting for judges by members and a provision looking toward a thorough revision of the by-laws of the association.

As the Bulldog Club of America has not as yet outlined a proposition affecting a federation of Bulldog Clubs that the Breeders feel they can accept, that important matter may be said to be still in abeyance.

**Taxidermists.**

**J. KANNOFSKY, PRACTICAL GLASS BLOWER**

and manufacturer of artificial eyes for birds, animals and manufacturing purposes a specialty. Send for prices. All kinds of heads and skulls for furriers and taxidermists. 369 Canal Street, New York.

# Rifle Shooting

## Zettler Tournament.

NEW YORK CITY, N. Y., March 16.—The seventeenth annual 100-shot gallery championship of the United States, which opened to-day, under the auspices of the Zettler Rifle Club, 159 West Twenty-third street, brought out some high scores, that of 2441 coming close to the record, 2484, made in 1911 by A. Hubalek, and bettering the score of Dr. Hudson, last year's winner, who made 2479. The best card of the day was C. Zettler, of New York city. John Kaufmann, of Spring Valley, was second with a total of 2440. W. A. Lencke, of New York city, made his first appearance in the championship matches, and made 2433 for third.

In the continuous match, which is open to all, Dr. W. G. Hudson led with three 75 and five 74 scores. C. A. Schrag and C. Zettler were the only other contestants to score 75 points, while in the bullseye match W. A. Lencke continued his excellent work in the 100-shot championship by scoring 5 degrees for the general average. His shooting in this event gave him a clean lead over the other contestants. The scores:

Championship, 100 shots:	
C Zettler, New York city.....	2441
J Kaufmann, Spring Valley, N. Y. ....	2440
W A Lencke, New York city.....	2433
P A Raymond, Greenwich, Conn.....	2428
C A Schrag, New York city.....	2398
H Martin, New York city.....	2376
Bullseye match: Degrees.	
W A Lencke, New York city.....	5
L Reali, New York city.....	10½
F Bund, New York city.....	15
T H Keller, New York city.....	19
J Kaufmann, Spring Valley, N. Y.....	37
Continuous match: Dr. W. G. Hudson, 75, 75, 75, 74, 74, 74, 74, 74; C. Zettler, 75, 74, 74; C. A. Schrag, 75, 75; L. C. Buss, 74, 74, 74; F. M. Bund, 74, 74, 73; P. A. Raymond, 74, 73; W. A. Lencke, 73.	
Zimmerman trophy: F. M. Bund, 8, 12, 19.	

P. J. O'Hare, of Newark, N. J., beat C. Zettler's score, made on opening day with a card of 2452, and was in turn beaten by Dr. Hudson, world's record holder, who was then beaten by A. Hubalek, who, in addition to being the record holder, was the champion in 1911.

In the continuous target competition, Dr. Hudson scored six perfect scores of 75 and an equal number of cards showing 74. H. M. Pope made two 75 scores and five at 74. The other marksmen to turn in perfect scores were C. A. Schrag and C. Zettler. The scores:

On hundred-shot championship:	
A Hubalek, Brooklyn.....	2,478
Dr. W G Hudson, New York city.....	2,474
P A Raymond, Greenwich, Conn.....	2,428
P J O'Hare, Newark, N. J.....	2,452
R H Nisbet, New York city.....	2,395
W Maurer, Jersey City.....	2,337

P J O'Hare.....	73

## Intercollegiate Rifle Matches.

WASHINGTON, D. C., March 12.—In the Inter-Collegiate League matches, the results of the ninth week's match show no change in the leaders. Among the eastern colleges, Harvard University and the Massachusetts Agricultural College are tied with nine victories for each. The championship of the Eastern League will be practically determined this week when Harvard and the Aggies come together in the final struggle for supremacy. Among the western colleges, West Virginia University still leads with nine straight victories, with the Iowa City University and University of Minnesota tied for second place with only one defeat to the credit of each. The strong Iowa City University team will lock horns with the leaders in the match for the week ending March 29. The results of ninth match are as follows:

Eastern League: Cornell University, 931, vs. Norwich University, 928; Mass. Tech., 945, vs. Columbia University, 883; Princeton, 938, vs. University of Maine, 878; Mass. Agricultural College, 955, vs. Dartmouth College, 902; University of Vermont, 894, vs. Rhode Island State College, 767; Harvard University, 944, vs. Lehigh University, defaulted; North Georgia Agricultural College, 927, vs. Clemson College, defaulted.

Western League: University of Iowa, 952, vs. University of Nebraska, 861; West Virginia University, 933, vs. U. S. College of Veterinary Surgeons defaulted; University of California, 920, vs. Oklahoma A. & M. College, 883; University of Wisconsin, 907, vs. Washington State College, 900; University of Minnesota, 945, vs. University of Kansas, 854; Michigan Agricultural College, 925, vs. University of Louisiana, 876; Purdue University, 933, vs. University of Missouri, defaulted.

March 15.—An interesting state of affairs has developed in the Intercollegiate Rifle Shooting League matches now going on for the new national trophy. Among the Eastern colleges, it was thought that the Massachusetts "Aggies" had first place cinched, but

in last week's contest, they were defeated by Harvard University. In doing so, the Harvard boys smashed the college record by five points. This puts them in the lead among the Eastern colleges with only three more matches to be shot.

In the Western League, the University of West Virginia continues her victorious career. The question of supremacy will be settled when the West Virginia boys meet the Iowa State University team during the week ending March 29. The University of Minnesota, which is also shooting up well in the Western League, has also a look-in, and there may be a triple tie for first place in that League. The results of the tenth week's match among the colleges for the national shooting championship are as follows:

Eastern League.—Harvard, 978, vs. Massachusetts Agricultural College, 961; Mass. Institute of Technology, 948, vs. Dartmouth College, 907; Cornell, 930, vs. North Georgia Agricultural College, 920; University of Vermont, 913, vs. Lehigh University, 792; University of Maine, 896, vs. Rhode Island State College, 814; Princeton, 924, vs. Clemson College, defaulted; Norwich, 932, vs. Columbia, defaulted.

Western League.—University of West Virginia, 934, vs. University of Wisconsin, 907; Iowa State University,

962, vs. Oklahoma A. & M. College, 840; University of California, 928, vs. Washington State College, 850; Michigan Agricultural, 914, vs. U. S. Veterinary College, 898; Purdue University, 947, vs. University of Nebraska, 835; University of Minnesota, 927, vs. Louisiana State College, defaulted; University of Kansas, 876, vs. University of Missouri, defaulted.

## Indoor Championship.

WASHINGTON, D. C., March 15.—A new world's record was made for indoor shooting in the national matches now going on to determine the club championship of the United States, the Park Club, of Bridgeport, Conn., making a score against the New Orleans Rifle and Revolver Club of 998 points out of the possible 1000. This is two points better than the record made by the Warren, Pa., Rifle Club two weeks ago. This record means that the five different men placed 98 shots inside of the circle the size of a ten-cent piece at 75 feet, using .22 caliber rifles.

Although Bridgeport has the satisfaction of making (Continued on page 387.)

# There Must Be Something?

WE don't know it all, but in our forty years' acquaintance with sportsmen all over the world we have stored up a vast amount of knowledge that no one else possesses. It is yours for the asking.

**There Must Be Something** you want to know about fishing, hunting, travel, etc. Our experts in these lines are ready to tell you—The best fishing places, how to get to them, what to take along, and where to stop while there. They can plan your fall shooting trip, be it big game, wild fowl or upland game. Such information as game laws, guides, prices, and so on we can furnish authentically.

**There Must Be Something** we can tell you about planning your summer vacation, a good hiking trip, a mountain climbing outing, a canoe cruise, long or short—ask us.

Every subscriber, whether for 3 months, 6 months, a year or for life, is entitled to consult us as frequently as he or she may desire; there is absolutely no charge for this service. Address

## The Kingdom of Eternal Hills

By ROBERT PAGE LINCOLN

**A** NUMBER of celebrities have visited that treasure land of the Northwest, Glacier National Park, and have returned to the haunts of men with glowing recounts of their experiences, often telling it in spoken words, but mostly painting those wonders of nature's handiwork upon the printed pages for the hundreds of thousands to gain knowledge from. One of these noted men was the staunch and stalwart John Muir, the well-known naturalist and writer, who said of this great territory before it was yet a park: "I would want to spend a month at least in this precious preserve. The time will not be taken from the sum of your life. Instead of shortening, it will indefinitely lengthen it and make you truly immortal."

Glacier National Park. It is a term to conjure with. Indeed, it is the one spot in this great United States where one is able to get a true glimpse and idea of what an ideal mountain country is like. So many who have never seen the Rockies have an idea that the whole chain, from the rugged, forsaken country of Canada, to the final end and dwindling to hills in Mexico, is one veritable land of wonders. Now, this is a notion I hasten to correct. There are only certain sections of the Rockies that are truly what one might say is wonderful. When I say wonderful, I want the definition to be com-

plete. I include in that definition the fullness of beauty and vastness, the utmost of nature's perfection, the unstinted immensity we know as perfection, not one lonely mount, but hundreds of them, all the very personification of a lavish and gigantic display. And I know of no place in the whole chain of the Rockies as complete and enhancing, as immense and staggering in beauty as the Glacier National Park. Here one is able to rest at the very feet of God, and mute and voiceless look out upon the eternal hills, finding no word to picture the thoughts that come to his hungering mind. This is the paradise of the true nature lover. Here he will find the end of his journey. He will need to seek no further, for this is the ultimate goal, and he will be surrounded by silent and invincible peaks that jeer at the petty achievements of man who thinks he can harness the very wands of lightning that cleave the sky and tread the paths of impossibility with sure feet. Around him those mountains rise sheer and clear into the azure of the heavens, seeming to pierce the delicate folds of the empyrean. Hung by bridal veils of the softest milk-white hue, dreaming forever, silent, unchangable, in set form, but enacting hour for hour the drama of the world of light and dark. Colors untold, mingling and melting and blending, and wavering over all with a

terrible beauty that knows no human name.

Here rise the magnificent trees, further on one glimpses through the inimitable vistas the spuming torrent, bearing down from austere and defiant heights the burden sublime; flashes here the million-voiced cascade, and trickles here the little, soft-trebled spring. Below looks up an eye of the earth in the form of a lake so very crystal clear that one is able to search the very bottom, as though it were but a few feet deep. One glimpse will bring to your mind the sense of completeness, of soul satisfaction you have been so long craving for, and which you have thought a thing never to be realized, a burden of human imagination. Behold, then, the nucleus of your dream. It is here waiting for your feet at wandering list, waiting for your eyes to look forth upon in a newer world, waiting for your heart to expand with the bigness and purpose of it all, to know that there is vastly more in this life to aim for than the miserly money grubbing that holds nine out of every ten of humanity in the thin grasping claws of commercialism. Tied down to the hard and dry ruts of life and the sickly artificial; seeing but the glare and the tawdry, the rough and the degrading, the soul stifling and the driving illusions we so lavishly feed upon and call enjoyments; hearing but commands or curses,

A FOREST RANGER'S CABIN.

noises untold, clash and clang of a thousand and one of the elements of the industrial world, and rarely hearing anything but the voice of civilization, then to suddenly leave all this far, far behind as though to shut the eye and close the ears, awakening to find yourself in a fairyland replete in the graces of the all-redeeming mother, nature. You will look upon the essence of reality, awe-inspired and baffled, and you will be called upon to draw comparisons of the scenes you left behind, and these, the very height of worldly expression, the worth while things in life.

It is a well recognized fact that the things most beautiful and complete we find the hardest to picture as we should and would like to, and so it is with this great national playground of the North. It is the acme of natural perfection, containing such a multitude of beauties, so many untold wonders, such mightiness and solemnity that the soul pauses, subject to the unbroken silence that permeates the inspiring atmosphere and robs the tongue of its fondest wish. Many will know the feeling of the gifted poet, who, to some extent at least, can give word to the emotions stirring within him; but mere man, ungifted and wholly human, can but look and feel it all, storing away in his clear

memory those pictures, never to be erased, but to be recalled with fond recollections. Hundreds upon hundreds of lakes, waterfalls without number, peaks rising here, there and everywhere, one has but to move from place to place, always seeing something new and every bit of it of interest. Now, there is one big point I wish to bear upon. How often, indeed, have we visited a much talked of place only to find it bare of the pictured attractions, lacking, and sometimes inferior, with but one or two places within the radius of the spot truly worthy of the name. But the inferior overshadows the worthy, and one will leave unsatisfied and more or less disgusted, the whole vacation spoiled. The person who would go to the Glacier National Park and come out disgusted is indeed of a most unusual and exacting nature, and one in a hundred—yes, one in a hundred, for with such an abundance to draw from, such a great territory to revel in to the heart's content, so many glories to witness, surely one must be an exotic not to be appeased. And you will be satisfied; there is no doubt about it. If you have never before looked upon the eternal hills, snow-capped and fringed in haze of the purest luster, then let your initial glory find its expression on this remarkable spot where

days come and days go, each a repetition of the one just passed by, but now changable indeed if you journey along, from place to place, ever greeted by some degree of newness, some seemingly incomprehensible display, some mightiness in which one may read the everlasting lesson! This is not a summer resort of the order you will find in the East, or even in the West, surrounding a treasured spot, a spot that acts as a magnet to the tourists, and which will be built up with a hundred and one places where the money may be weeded from the vacation spend-thrifts. No, indeed. You will find the best of accommodation here; you will find superior hotels and resting places all through the mountains, but never will you be assaulted by the sense that civilization has intruded upon this favored domain, for it lies before your eyes wholly the same as when the Creator left it at the end of his toil. You will have the seeming trifle of civilization needed for your benefit and enjoyment, and this man will welcome you with open arms, but aside from that nothing will intrude upon the mind to spoil the infinite picture as you will conceive of it, and as you will witness it in the bright hour of realization.

You will get the fullness of your dreams, the same which cannot be said of other places you have heard about and which you conceive to be the empire of beauty and all the phases connected with it. In all the Rockies you will find no place quite so interesting as this national park; you have your Grand Cañon to the southward. In its place it is without comparison, but the two are as different as night and day. Yes, vastly so. Two phases of nature's wonder that baffles the sense of expression. If you doubt this, tell me where you have read a glorious and immortal piece of literature dealing with the beauties of either of these places, and I would be interested in reading them. Next to the Yellowstone National Park in size, truly this region is a credit to the Government in setting it aside for the benefit of its people. It fulfills its purpose, it gives mortal man a glimpse of the greater and the better as no other place on the face of North America can. One thousand four hundred acres of virgin territory, a multitude of mountains, glaciers, cascades, minor waterfalls, stately pines, the home of the giant grizzly bear, the black-tailed deer, the black bear, the big-horn sheep, watched over by the soaring eagle, at home in those cloud-wrapt clefts. And in those inimitable pools, picturing an endless panorama of colors, lie the waiting trout. Icy cold and clear to the smallest atom, the water in this region is the height of perfection as a home for these hardy, poetic fish, the taking of which forms such an attraction to many of us each year, when the season rolls around on its annual visit. Here you have the acme of fishing. This is the fly-fisher's wonderland. Here you will find no "keep out" signs to smite your consciousness one right between the eyes, but will be able to roam at will and stop wherever night shall find you, to continue on in the morning and fish to your heart's content. The Government combines the whole of the people. You are one of the people; you are of the fellows that thought this would be a good preserve for your benefit, and now that you are on it, you will take out your rights, and no one is going to lie in wait for you with a shotgun loaded with salt and pepper. Go to is the motto, and

many are hanging up that motto each year in this favored land. Truly the fly-fisher's paradise! Do not worry about finding trout; they are here by the seeming millions, for there is not a stream too small to contain them. And let this sink into your mind. You will not find a trout fisher every two feet; you will not get your line tangled in one of your brethren's, for you will go for days and days and never see one of your kind. You can lose yourself here and not know but that you are in an out and out total wilderness. And the trout are not bashful; by no means are they bashful and shy. You whip a fly into that little basin and there is a rise; again and again you do it, and each time you are rewarded with a catch. Perhaps in time the performance will lose its glory, but you will at least gain your end; you will be able to satisfy that fish-craving in you. You will not have to wander day after day and come home with two or three trout in your creel as evidence of your piscatorial labors or amusement if you will call it that. Cold water makes for a wideawake fighting fish, and when you get a Glacier National Park trout on your barb, you will have your hands full for a few moments.

[TO BE CONTINUED.]

### Maryland State G. and F. P. A.

At a recent meeting of the executive committee of the Maryland State Game and Fish Protective Association, the president, Talbot Denmead, was authorized to have printed and issue cards stating what States now have license laws, and that these be distributed among the committee.

The executive committee was divided into five committees, covering as many special fields of work, and the president appointed the following:

Upland Game—Dr. B. Holly Smith, D. F. Mallory, J. Harold Wheeler, M. E. Wirsing, W. Howard Matthai, L. M. Levering, Beverly Ober.

Wildfowl—T. F. Cadwallader, Wm. H. McDowell, P. T. Blogg, Harry Busick, T. Edw. Hambleton, T. B. Harrison.

Fresh Water Fish—R. R. Spencer, Dr. Thomas Cullen, Gaylord Brooks, Henry P. Bridges, R. Hartman, Frank Heller.

Salt Water Fish—G. Rosenfeld, Swepson Earle, Graeme Turnbull, Felix R. Sullivan, H. J. Musselman, John G. Thomas.

Legal—G. D. Penniman, H. N. Abercrombie, D. M. Henry, G. A. Manning, John G. Nagen-gast, T. F. Cadwallader.

The first man on each committee acting as a temporary chairman.

It was the sentiment of the executive committee and also the association that they were unequivocally opposed to any law permitting the use of motor boats in any way relative to hunting of waterfowl.

The following new names were elected to membership: Robert S. Weisenfeld, Samuel Adler, Wm. H. Klohr, N. S. Kenny, Howard E. Crook, Martin McCormink, Walter S. Brinkman, A. Helmuth Brinkman, W. Julian deBulle, Howard Adams, M. Ernest Jenkins, Joseph Rosenfeld, C. F. Corning, Albert T. Corning, B. Holly Smith, Jr.

W. HOWARD MATTHAI,  
Secretary pro tempore.

# The Muskulunge of the French River

## Something About the Musky Fishing in the French River; also Regarding Bass

By S. E. SANGSTER (CANUCK)

THEY have somewhere around six different ways of spelling muskulunge over here in Canada; generally he is known in Ontario as the "lunge," while in the States one finds the term "musky" applied. These "water-wolves" have always appealed to the writer as the king fresh water fish to handle on rod and reasonably light tackle, barring the Atlantic salmon of the Eastern rivers.

The town of North Bay lies straight north of the city of Toronto, and above the trout waters of Ontario's highlands. It is the junction point of the G. T. R. line from the south and the C. P. from the southeast; also it is the gateway for the immense hinterland toward the Height of Land, including Temagami. Far away in front of the spectator, as he stands on the waterfront, flings the shimmering waters of Lake Nipissing. What lies beyond, straight across the lake, this article attempts to describe—to the musky enthusiast.

After you have outfitted and your provisions are packed and stored in the waterproof dunnage bag, you will pile the *tout ensemble*—this is bad French, meaning the whole outfit in this case—on one of the small steamers you can charter at a reasonable cost, and have your party puffed across Nipissing, in through the raft of islands and to the inlet of the French. Here you slam up against a hard but short portage

around the Little Chaudiere Falls, and, if the day be hot, you will breathe a sigh of vast relief as your canoe slides into the brown waters of the French itself below the carry.

Down toward the Georgian Bay the French glides—a long, twisting and crooked channel, here slipping quietly into widenings that one could almost call small lakes, again narrowing between sharp cliffs and hurtling through small cañons, where strong water necessitates a carry. All around you the river lies surrounded by the brooding silences that hide, as it were, in the forest shadows. The forest is primitive; it has remained so since Gitchie made it.

With the scent of balsam and pine strong in the nostrils, the canoe slips noiselessly down this silent paddle way; the odors grow fresher as the cooler airs come with the sinking sun. Here you jump a pair of heavy-winged mallard; yonder a V-shaped ripple is seen where a mink or muskrat swims from bank to bank; again you jump a deer that has come down to the water to escape the torments of the flies.

You will, if all goes well and you keep moving, get down to excellent bass waters by late afternoon. Around about 4:30 P. M. camp may be pitched, and then you may try your luck for some of the bronzed-backed fighting devils of the inky pools—sometimes known as the small-mouth black bass. The best bait I

BREAKFAST ON FRENCH RIVER.

have found for the French River bass is a fair-sized crawfish, which has proved better than either live minnows or frogs for still-fishing. I have never had success with the fly for the French River bass in July or August. They run from one and a half to four and a half pounds, and, homing in the cold waters of this waterway, are gamy to the last turn of the reel. The best spots are in the deep pools below white water, and generally just below your portages you will find such spots.

The lunge or muskies of the French are of all sizes, running from three and a half to twenty and twenty-five pounds, with an occasional grand-daddy over the thirty-pound mark. On a short tip rod, with a sixteen to twenty-five-pound test line, a strong reel, and one of the heavy trolling spoons, you can here enjoy some real sport—if a wolf-snouted musky, performing up to his reputation both in and out of water, provides what you consider sport.

Pickering River, a confluent of the French, provides some of the best musky waters. The waters of those expansions of the French proper, which, as I have before said, might aptly be termed lakes, are generally fairly deep and usually home some of the larger fellows. With your guide or companion paddling the canoe—moving along at the rate of around three miles per hour or slightly less—your trolling outfit cleaving the water astern, use a fairly heavy spoon. It is no cinch to handle a big musky—full of fight—on a rod, but let me assure you it is worthy the work and offers a thousandfold greater sport and satisfaction than hauling in the fish with a small rope, hand over hand. For canoe fishing for muskies I have found a net impracticable in many instances, especially where the catch runs large; also a "swat-stick" is not always a safe proposition in the canoe. The best method of killing your musky when you have played him to a frazzle, and he comes alongside and shows his gleaming white belly, is a head shot from an accurate .22 revolver; or, better still, in my estimation, a .22 automatic rifle. Of course, if close to shore or to one of the islands in these lakelets, one can land and work the fish ashore, but land is not always available. One thing I urge to be remembered every moment you have Mr. Lunge at the other end of your line—when using a canoe, as you will be doing, if you are cruising the French—and that is to keep down in the bottom. Don't sit on the thwart under any conditions, and if you have to kneel to have elbow room, keep your knees braced on the sides of the canoe and your weight on them.

The musky of the French is about as full of wolf fury as any muskylunge on the continent. They home in ice cold water here and seem chock full of energy and vim. Their flesh is exceptionally firm and tasty, save when you get one over fifteen pounds, when they get coarse. Go up and connect with one of these; handle him on a fairly light line and a rod; then when you come south again, be sure and tell the boys if you found the experience below expectations.

#### RECOMMENDATIONS REGARDING THE FRENCH RIVER TRIP.

The French can be reached direct by railway, but the best route is to North Bay and across the Nipissing, putting in at its headwaters. The cruise can run from five days to two weeks, and if you plan to do much fishing,

better arrange for a full two weeks on it.

The best plan is to make it a camping proposition throughout, taking along your tents and dunnage. Pretty well everything can be obtained at North Bay in the way of provisions, extra tackle, blankets, etc. You can bring up your canoe with you, if preferred to a rented one.

The cruise is one that had best be taken between July 10 up to Sept. 10. The fishing is good all summer, but the flies are bad prior to the end of the first week in July.

Excellent opportunities exist for live game photography, notably deer and bear. The surrounding forests are full of game, and much of it comes to the French along the route. A flashlight outfit should be included in the outfit for night work, and would well repay the expense and trouble involved.

Guides are not necessary, if your members are used to handling canoes, loaded for cruising, in the open. However, I would be inclined to recommend your engaging at least one man for the run, as it is safer under certain conditions, and in addition takes a lot of camp work off your hands. Indians from the reserves on the French can be engaged and can supply canoes as well. They will charge around \$2.50 per diem for their services as guide, with fifty cents additional where canoes are required. Many of these Indians know every foot of the cruise and the best fishing sections; the extra expense is warranted. These Indians are Ojib-

ways and are very fair canoe men as a whole.

Do not take along any firearms for this cruise in the summer; the season is a closed one on all game in Ontario, and save a .22 caliber rifle for killing your bigger fish, any gun or bigger rifle is only an unnecessary addition to your load. The only big-game shooting permissible is that with your camera.

Carry a full supply of tackle with you from home, as, once north, you may not be able to purchase your favorite spoon or line. A map of the French River may be had from the Department of Lands and Forests, Toronto, or a very accurate blueprint may be purchased from Mitchie & Co., 7 King street, West, Toronto, at a cost of around fifty cents. If you cruise without a guide, an accurate map on a fairly large scale is absolutely necessary, particularly as there are many paralleling channels where the party would invariably go astray from the proper route.

You will find an 18-foot cruising canoe best suited for this run, and also that a canvas-covered type is superior to the basswood models. A 16-foot canoe is generally too cramped for space when a camp outfit and two people are stowed aboard. The canoe can be taken north from Toronto on the G. T. R., or one may be rented at North Bay or from your Indian guide. Never figure on carrying more than two persons to each canoe; it is neither safe nor practicable.

## An Ideal Canadian Holiday

By ROBERT WILSON

**N**O country in this old world of ours, possessing such vast tracts of territory, is more happily endowed than the Dominion of Canada. That inherent love of the sea, which has been transmitted to us through our forefathers, whether we dwell in the exhilarating Northland, or the balmy Isles of the Southern Pacific, is our joint inheritance. One of the greatest deprivations suffered by settlers and visitors to other lands, is the absence of the pleasures and inspirations derived from proximity to the ocean. That these pleasures are a potent factor in the lives of many of us, no one will deny.

It is exactly in this direction that Canada is unique. To the sea-lover, nature manifests herself in her most generous and thoughtful of moods. Hardly have we lost the flavor of the ozone-laden breezes of the ocean, than we are confronted with the fact that, a wondrous provision has been made by a bountiful Providence who, anticipating this deficiency from the beginning of all things, and that the scions of the seafaring race would inhabit these wide domains, bestowed upon them the coveted possession of the world's greatest inland seas.

The kingdom of Scotland, whose greatest length and breadth are two hundred and eighty-seven, and one hundred and eighty-two miles respectively, with an area of thirty-one thousand square miles, could be carefully deposited in Superior, the greatest of all land-locked lakes.

This, to Scotsmen unfamiliar with such

prodigious disparity, will appear inconceivable, particularly when they have to face the discouraging fact that, their own beloved Loch Lomond is the merest pigmy in comparison. This latter, the "Queen of Scottish Lakes," measures but twenty-four miles in length, seven miles in breadth, and has an area of nothing more than forty-five square miles, from which it will be readily seen her great Canadian rival is nearly eight hundred times as large.

These gigantic inland waterways of Canada, connected at the Soo by the largest lock in the world, measuring one thousand feet in length, are not only sailed by magnificent liners, but are the highway for innumerable ponderous freight steamers.

Nothing like justice, however, is done to these mighty lakes. They receive but scant attention from the majority of the dwellers in this land. This, most assuredly, is not what they are entitled to, for Canada offers no more delightful holiday to those with a predilection for the sea than a voyage on the placid waters of her great lakes. Countless numbers of Canadians, for some reason known only to themselves, while complaining of the tedium of the railway journey to the west, refuse the temptations so generously presented by the alternative of the steamers of the great lakes, which convey passengers, amid an environment of luxury, as far as Fort William.

The writer, speaking from considerable experience in ocean travel, feels compelled to pay

a tribute to that lake-route connected with the steamers that ply between Fort William, Port Arthur and Sarnia. The "Huronic," "Saronic," and the more sumptuously appointed "Hamon-ic," offer all the comforts and luxuries of the most perfectly equipped ocean liners. The voyage through these inland lakes is truly a delight, and surely it behooves those on holiday bent, to give them serious consideration.

There is ever an incomprehensible feeling of delight inseparable from an ocean voyage, which by virtue of Canada's great lakes, is not denied the dwellers in the interior of this land. It is not necessary to draw upon our imagination, to believe in very truth we are plowing the majestic waters of the Atlantic or the silent depths of the lonely Pacific, as the log reels off mile after mile of fresh water, in a manner worthy of emulation by many of her salt-water rivals. From the moment we embark at Sarnia until we disembark at Fort William, ocean customs, ocean pursuits and ocean amusements are ours.

Monotony, together with dull care, are behind. Everything is bright as it can be in this world; the life, perchance, is novel, and despite the fact that we are surrounded by hundreds of miles of fresh water, there is a decided smack of the ocean about the whole.

One has only to sit silently watchful, comfortably ensconced in a deck chair, to observe the effect produced on the worn and tired who have decided to avail themselves of a "Superior outing." Every hour spent on these bracing waters tells a silent tale, and it might be truthfully stated that every passenger bears an eloquent testimony to their efficiency in those insidious ailments which are so hard to diagnose.

It is quite impossible to describe in a brief sketch; probably impossible to describe in a succession of voluminous sketches, the pleasures to be derived from a sail on Canada's inland waters.

Let not the intending passenger be hoodwinked into the belief that such a voyage as this is fraught with the faintest suspicion of monotony. Nothing could be further from the truth. If, however, monotony consists of an interminable repetition of varied incidents, such as we are confronted with at every hour of the day, what objection can we raise. This is exactly that which we came for. Incident, excitement, comfort, pleasure, novelty, and the rest of the desirable items, never absent from a lake voyage, cause time to fly on swallow's wings, making our voyage all too short, our pleasures far too fleeting.

There is another route, however, providing equal enjoyment for that one who is not altogether sure of those qualifications which are deemed to be of greater or lesser importance in the general "make up" of a sailor.

From many ports on the borderland of Ontario's Highlands, excursions may be made to a host of delightful resorts. Connections are made by steamer with Parry Sound, Midland, Meaford, Collingwood and Owen Sound, which embrace the very heart of the world-famed Thirty Thousand Islands, than which there is nothing more distinctly unique on the continent of America.

If it be but little more than one hundred miles from Penetang to Point au Maril, there is, condensed into that distance, such a pro-

DOUBLE TRACKING SOUTHERN PACIFIC AT VERDI, NEV.

fusion of beauty and loveliness, such a succession of verdant slopes and tree-fringed islands, as may be encountered in no other land on earth. The visitor from far distant scenes stands mute in wonder, at the glories here revealed. One is constrained to think that some benign visitor from the stellar regions, rudely surprised in the distribution of his many charms in the Highlands of Ontario, packed his treasures too hastily, with the result that in passing westward, an abundance of his heavenly gifts were recklessly showered about the coast.

Many foreign authors and writers make allusion to the Thirty Thousand Islands of the Georgian Bay, as well as to the Thousand Islands of the St. Lawrence; thus indisputably testifying to the impression made upon their minds by these delightful resorts. Even Jules Verne, the most descriptive of French writers, speaks in no ungenerous way, nor is he sparing in his praise of these beauty spots.

This inland lake scenery, in and around the Georgian Bay, may indeed, for lack of a more descriptive designation, be truthfully termed incomparable.

Go where you will, nature in some different humor is to be encountered in this region, yet never is she tiresome or wanting in variation. The most exacting leave these "islands of the blest" with a set determination to renew their acquaintance therewith, and at the earliest opportunity make further explorations.

There is as much scenery here, as much charm, variety and surpassing interest, as would suffice for a whole continent. And this, if unexpressed is the consensus of opinion of all who once become infected with the glamor of this lake district.

The patriotic words of Wilfred Mills, so admirably set to music by Laura G. Lemon, and dedicated in a spirit of laudable loyalty to her "dear countrymen," come instinctively to mind:

"Pure moonlight gleaming on wide inland sea,  
Pictures the home life most dear unto thee;  
Splendor of sunrise on peaks soaring high,  
Symbols thy glory in years drawing nigh."

### The Illinois Game Commission Law.

CHICAGO, Ill., March 3.—*Editor Forest and Stream:* Some of the enlightened sportsmen of Michigan have been working for a game commission law during the present session of the Legislature. The bill was drafted by the sportsmen and introduced by Senator Francis King. But for political or other reasons, the Senator deserted his guns and threatened to withdraw the bill if it was pushed.

The shout went up that the Democrats were planning to get control of the game wardens' department, and so the bill had to be chloroformed to prevent the calamity. So politics again demonstrate its narrowness.

I wonder whether it is politics or some other nigger in the woodpile which prevents the present administration from making wholesale arrests of those who are spearing rainbow and steelhead trout.

In one respect Michigan has very stringent laws, and they apply to the non-resident.

RUPERT STARBIRD.

### Black Woodchucks.

RUTLAND, Vt., March 3.—*Editor Forest and Stream:* I was much interested in the communication from W. M. Hardy in your issue of March 1 relative to black woodchucks, and like him was rather surprised that a former correspondent referred to this phase of the woodchuck as rare. Of course it may be uncommon in some sections of the country, but it is not unusual in Vermont. I have collected mammal skins of all descriptions in this State for several years, and have had occasion to see many woodchuck hides as well as the live animals. I think I have never seen a black one in the main range of the Green Mountains or even in the hill pastures, but in the valleys and more particularly in the ledgy country along Lake Champlain fully 10 per cent. of the animals will be black. The mountain "chucks" are always of the red and gray type. I have never observed any that were intermediate between the black ones and the common color.

GEORGE L. KIRK.

# NATURAL HISTORY

## Heron Protection in Pennsylvania.

THERE is now before the Legislature of the State of Pennsylvania Senate Bill No. 46, whose passage all Pennsylvania sportsmen and bird protectors should favor.

The bill is being bitterly opposed by the millinery interests of Pennsylvania, and these interests have tried to enlist as their supporters some of the sportsmen of Pennsylvania. The purposes of the bill are to put back on the list of protected birds certain species including the herons, from which protection was removed in 1909, and to stop the sale of egret plumes in Pennsylvania.

Concerning the bill, Mr. Witmer Stone of the Academy of Natural Sciences, of Philadelphia, has written a letter to the Philadelphia Press, from which we quote two paragraphs:

"The bill is simply an amendment to the present bird law covering only the two points mentioned, and the game laws of the State are in no way affected by it. The statements about its effect upon pigeon shooting or dealing in domestic poultry is absurd. The game and bird laws have nothing to do with domestic birds. These points have all been passed upon by Dr. T. S. Palmer, of Washington, the highest authority on game legislation in America, and he unqualifiedly indorsed Bill No. 46 before the Senate Committee at Harrisburg and urged its passage.

"All the opposition to the bill has originated with the millinery interests. The traffic in aigrette plumes was absolutely suppressed in New York a few years ago, and immediately the New York firms transferred their business to Philadelphia, where the law of 1909 made it possible to continue their operations. They are now making every effort to prevent the suppression of this trade in Pennsylvania and are trying to use the sportsmen of the State in their behalf by circulating misleading information about the bill. It is time that sportsmen were looking into this matter in order to learn the true purpose of the bill and also the source from which the opposition springs, so that they may not be made a catspaw for millinery interests."

The Delaware Valley Ornithological Club has issued a statement, which is backed by the Committee on Conservation of Wild Life. It says:

As some points of the bill have been misconstrued and misunderstood, the following facts are submitted as expressing the views of a society which for twenty-two years has been engaged in the scientific and economic study of bird life.

1. The object of the bill is to put back on the list of protected birds the heron family and certain other species which, owing to a misconception, were removed from protection in 1909. The bill also strengthens the clause relating to sale of wild bird plumage so as to prohibit the trade in aigrettes, which has already been stopped

in New York, Ohio, Louisiana, Florida, all the Pacific States, etc. This is part of a world-wide movement to stop the slaughter of the white herons, and Pennsylvania should do her part.

2. The bill in no way affects the game laws, as has been claimed by the millinery agents. These remain absolutely as before. Neither does it affect the trade in ostrich feathers and manufactured feather ornaments from plumage of domestic fowls or any birds regularly raised for their plumage. The milliners are only forced to give up the trade in the aigrette and some other plumage of wild birds which will have to be given up in a few years anyway, if the slaughter continues, as the birds will be extinct.

3. The claim that the white herons are not killed to secure the plumes is absolutely without foundation. Members of our club have seen the slaughter in Florida when the bird was all but exterminated there, and we have seen the affidavits of plume hunters, describing the slaughter in South America.

The plumes are only valuable at the nesting time, and the birds must be killed when they have young depending upon them. So that their slaughter means extermination.

4. The claim that herons are destructive to the fish-raising interests has been used in an attempt to mislead fishculturists and specialists. The bill provides that herons found catching fish from ponds, preserves, etc., may be shot. So far as fish in streams are concerned, the herons have little effect upon them. For the twenty years that the birds were protected, there was no decrease in fish charged against them. They do, moreover, destroy snakes and other enemies of fish, vast numbers of grasshoppers, and injurious insects, as proven by the investigation of experts of the U. S. Biological Survey.

5. One clause in the bill has been especially attacked, i. e., that which extends protection to all birds of the same family, as birds occurring wild in Pennsylvania.

This is absolutely necessary. It is easy to smuggle plumes out of Florida and Louisiana, and it is impossible to say whether a plume offered for sale in Pennsylvania came from the United States or abroad; furthermore, many other native birds so closely resemble the foreign species, that plumage taken from them cannot be distinguished. Without this portion of the clause the plumage of our meadow lark could be sold here and claimed to be that of the Mexican meadow lark, and even a skilled ornithologist could not be sure to which bird it belonged. So, the sale of plumage of all the birds of the meadow lark family must be prohibited, and all of the heron family, etc. This does not, however, affect domestic birds, ostriches, etc.

The members of the Committee on Conservation of Wild Bird Life are: George Spencer Morris, Olney, Pa.; William L. Baily, Ardmore, Pa.; Charles Platt, 3d, Chestnut Hill, Pa.; Dr. Spencer Trotter, Swarthmore College, Pa.; George H. Stuart, Girard Trust Co., Philadel-

phia; Dr. Cornelius Weygandt, University of Pennsylvania; Wm. E. Roberts, West Philadelphia High School; Samuel Wright, Conshohocken, Pa.; Robert P. Sharples, West Chester, Pa.; Dr. Howard J. Pennell, Downingtown, Pa.  
J. FLETCHER STREET, Sec'y.

## Pennsylvania Audubon Society.

*To the Members of the Pennsylvania Audubon Society and the Friends of Birds in Pennsylvania:*

SENATE BILL No. 46 has been introduced by Senator Enos M. Jones at the request of the Audubon Society to amend the non-game bird laws of Pennsylvania in such a manner as to place them on a par with the advanced and effective laws of New York and New Jersey.

As the Pennsylvania law now stands, Philadelphia is made a market for the inhuman traffic in aigrettes in the Eastern United States, and the wholesale plumage dealers of New York city, who seized the Philadelphia market, even reach out from there by mail for business into the far States of California and Oregon, where the traffic is prohibited. Moreover, under the present laws, many of Pennsylvania's valuable birds are left inadequately protected.

In the interests of the protection of bird life, for the welfare of the agricultural and horticultural interests, and for the best interests of the whole people of Pennsylvania, it is imperative that the changes incorporated in Senate Bill No. 46 should become the law. Against these changes there is no one arrayed save the few milliners who serve their own selfish interests and those who have been duped by the milliners' misrepresentations.

We urge, therefore, that you use immediately your whole influence in behalf of this measure both by writing to your Senator and members of the Assembly, and by influencing your friends to do likewise, urging your legislators to vote and work in behalf of this measure. The milliners will fight it with their utmost strength, and those who are not active in its behalf are not true friends of bird life.

Please act at once and continue to co-operate with us until the fight is won.

WITMER STONE, President.

## Words of Appreciation.

HANOVER, N. H., March 5.—*Editor Forest and Stream:* Inclosed find post office money order for three dollars for subscription to FOREST AND STREAM during 1913. I have always liked your paper, and believe in the work that you are doing in the interests of the conservation of all our natural resources and particularly our game. I have had three years' enjoyment from your paper, and hope to have many years more.

With best wishes for continued success, I remain,  
JOSEPH M. LARIMER.

# GAME BAG AND GUN

## Game Legislation of the 62d Congress

By T. S. PALMER

THE third session of the Sixty-second Congress will long be remembered as marking one of the most important milestones in the history of Federal game protection. The enactment of the migratory bird bill is the third great step which began with the creation of national refuges in the Yellowstone Park act of 1872, and was extended to interstate commerce in game in the Lacey act in 1900.

Notwithstanding the fact that attention during the last session was confined chiefly to appropriation bills, more was accomplished than at any previous session since the passage of the Lacey act. The nation-wide campaign in behalf of Federal protection of migratory birds, so ably conducted by the American Game Protective Association and other friends of conservation, resulted in the passage of the McLean bill in the Senate on Jan. 22, and later in having the measure added as an amendment to the agricultural appropriation bill and approved on the morning of March 4, the final day of the session. More than eight years have elapsed since the original bill was introduced in Congress by Hon. George Shiras, 3d, on March 5, 1904, and a year has passed since the hearing on March 6, 1912, held by the House and Senate Committee on the Anthony, Weeks and McLean bills. These measures were all restricted to game birds, but when the two latter were reported from committee, they were amended to include insectivorous birds and were made practically identical. A comparison of the text of the law with the Shiras bill shows that very little change has been made in the original measure, except to extend protection to insectivorous birds and provide a penalty for violation of the act or regulations, and an appropriation of \$10,000 for carrying out its provisions.

The four brief paragraphs in the agricultural appropriation bill represent the result of six bills (S. 2367, S. 6478, S. 6497, H. R. 36, H. R. 4428, H. Res. 815), three reports of committees (S. Rept. 675, H. Rept. 680 and 1424), memorials from eight or ten State Legislatures, thousands of letters and press notices, and unremitting efforts on the part of individuals and organizations in all parts of the country. The agricultural appropriation bill, which carried the McLean bill through the House, also contained other important game protective provisions. The appropriation for the Biological Survey contains an item of \$5,000 and authorization for inclosing a thousand acres of public land in Jackson Hole, Wyoming, to complete the winter refuge for elk; an item of \$16,000 (increase of \$4,000) for the enforcement of the Lacey act; an item of \$21,000 (increase of \$4,000) for the maintenance of the National Bison Range and Bird Reservations. The appropriation for the Forest Service also

contains a special item of \$2,000 for the construction of headquarters on the Wichita Game Preserve in Oklahoma.

### BILLS INTRODUCED IN THE THIRD SESSION.

During the last session only about 1,800 bills were introduced, of which 1,280 were introduced in the House and about 530 in the Senate. Of these three in the Senate and four in the House require mention in this connection.

S. 8169—A bill for the protection and increase of State game preserves.

S. 8403—A bill to establish the Rocky Mountain National Park in Colorado.

S. Res. 428—That the President be requested to propose to the Governments of other North American countries the negotiation of a convention for the mutual protection of migratory birds.

H. R. 28142—A bill for the protection and increase of State game preserves.

H. R. 28747—A bill reserving from the public lands of Idaho a tract of land [in the Sawtooth Mountains].

H. Res. 815—Providing for the immediate consideration of S. 6497 to protect migratory game and insectivorous birds.

None of these measures were reported from committee. S. 8169 and H. R. 28142 were simply

the general refuge bills reintroduced in amended form. The introduction of the Senate resolution providing for an international convention on migratory birds marks another important step in the history of bird protection. One of the last bills passed was the Sundry Civil Appropriation Bill (H. R. 25069), which was vetoed in the closing hours of the session, and will probably be repassed at the special session this spring. This bill carried among other items the regular appropriations of \$3,000 for maintenance of buffalo in the Yellowstone National Park, and \$15,000 for game protection in Alaska.

### SUMMARY.

The total number of bills and resolutions introduced in the Sixty-second Congress was nearly 40,000, or about 5,000 less than in the previous Congress. A detailed list of the game bills introduced in the first and second sessions has already been published (FOREST AND STREAM, Dec. 21, 1912, p. 800). The actual gain in legislation in this Congress comprised the fur seal act, carrying into effect the treaty between Great Britain, Japan, Russia and the United States, putting an end to pelagic sealing, and establishing a five-year close season on the Pribilof Islands; the migratory bird bill; a national game preserve on the Wind Cave National Park in South Dakota; a winter refuge for elk in Jackson Hole, Wyoming; and increased appropriations for maintenance of reservations and enforcement of the law regulating interstate commerce in game. All of these provisions, except

KING'S PRIDE ON A PHEASANT.

the fur seal law, were carried in the agricultural appropriation acts of Aug. 10, 1912, and March 4, 1913.

During the past two years ten important additions have been made to the list of national reservations by executive order on the following dates:

April 11, 1911. Clear Lake, California.

Jan. 11, 1912. Forrester Island and Hazy Islands, Alaska.

Jan. 11, 1912. Niobrara, Nebraska.

Feb. 1, 1912. Green Bay, Wisconsin.

Dec. 7, 1912. Chamisso Island, Alaska.

Dec. 17, 1912. Pishkun, Montana.

Dec. 19, 1912. Desecheo Island, Porto Rico.

Jan. 9, 1913. Gravel Island, Wisconsin.

March 3, 1913. Aleutian Islands, Alaska.

Two of these reservations, the Niobrara and the Aleutian Islands, are of considerable extent, and through the co-operation of the National Association of Audubon Societies and the citizens of Nebraska, the former has already been stocked with a herd of twenty-five buffalo, elk and deer. The Aleutian Islands refuge, set aside just before the close of the administration, places under the joint jurisdiction of the Department of Agriculture and the Department of Commerce all of the islands in the Aleutian chain as a reservation for the protection of birds, foxes, reindeer and fisheries.

Against this record of positive accomplishment should be set the long list of bills which failed. More game protective measures were introduced than in any previous Congress, and many of them were of exceptional merit. The measures which failed included (1) National Park bills; (2) game refuges; (3) migratory bird protection in its broader aspects; (4) game protection in the District of Columbia; and (5) a measure for the importation of foreign game animals. The National Park legislation included several bills authorizing the establishment of a Bureau of National Parks, three important measures accepting jurisdiction from the States of Montana, Oregon, and Washington over the lands in the Glacier, Crater Lake and Mt. Rainier National Parks, and providing for the establishment of at least ten national parks. Three of these were in California, and one each in seven other States, as follows: The Grand Cañon National Park in Arizona; the Lake Tahoe, Mt. Shasta and Peter Lassen National Parks in California; the Rocky Mountain National Park in Colorado; the Kilauea National Park in Hawaii; the Mt. Katahdin National Park in Maine; the Rio Grande National Park in New Mexico; the Saddle Mountain National Park in Oregon; and the Mt. Olympus National Park in Washington.

The game refuge bills included four general (S. 6109, S. 8169, H. R. 23839 and H. R. 28142), and eight special measures providing for reserves in six of the Western States, namely: A refuge on the Coronado National Forest (H. R. 8393), one on the Fort Grant Military Reservation (S. 6799), and an enlargement of the Grand Cañon Game Preserve (S. 417), all in Arizona; the Jefferson National Game Preserve on the national forest of the same name, and the Snow Creek Antelope Range in Dawson county, Montana (S. 5286); the Pecos National Game Refuge in New Mexico (S. 6942); a preserve on the Sully's Hill National Park in North Dakota (amendment to the agricultural bill); a refuge

or park in Oregon (H. R. 1705); and a refuge in Fremont county, Wyoming (S. 3948). The Pecos bill passed the Senate, and one of the Senate general refuge bills was reported by the Senate Committee.

The migratory bird legislation included a proposed amendment to the Constitution giving Congress authority over migratory birds (S. J. Res. 39), and a resolution (S. Res. 428) authorizing a call for an international convention, two propositions which may receive more attention in the near future. The district game legislation included two bills providing for a general revision of the local game laws (H. R. 8634 and H. R. 8771), and the importation bills (H. R. 1303 and 24324) authorized the importation of certain large game animals from Africa.

Notwithstanding this list of failures the record as a whole shows important progress and a distinct gain in the movement for the conservation of wild life.

### New Laws to Protect California Game.

BY GOLDEN GATE.

THAT the present game laws of California are not sufficiently stringent or restrictive to preserve the game of the State from destruction is becoming more and more evident at the close of each shooting season and the extinction of some species of wild life seems certain unless adequate legislation is secured in the near future. Men who have made a study of the subject, and who are in a position to know, declare that in the Sacramento and San Joaquin Valleys there has been a decrease of at least 50 per cent. in the number of ducks and geese to be found there, as compared with ten years ago. Other game has decreased as rapidly.

The bag limit on different species of game has been gradually lessened during this time, the open seasons have been made shorter, the law has been more strictly enforced, but in spite of these precautions the game has been gradually slipping away. A great deal has been accomplished by prohibiting the sale of venison, quail and doves, but now there is an agitation, and a well defined one, to place these on the list of game that may be sold in the open market. This agitation is being fostered by hotel keepers principally, the argument being used that the poor man should be given the opportunity to purchase game. Ducks and geese are sold now, but it is to be noted that the cost of these is such that the poor man never buys them.

The monetary value placed upon ducks has made market hunting an established industry, and it is figured that fully one-third of the million ducks killed annually are sold. It is perfectly right that the game of the State should be considered as an asset and have a monetary value, for such is certainly the case, but it is manifestly unfair that the dead game should have a commercial value for the benefit of the few market hunters and hotel keepers. Conserve the game and make the pursuit of it the source of income. California fishing is known all over the world. People come from distant points for no other purpose than to enjoy this sport. The popularity of the Catalina Islands is an evidence of what our game fishes are worth.

Sportsmen come to hunt our quail, our deer and bear. They spend millions of dollars annually in the pursuit of game, probably as much as \$15,000,000. The hotel man, transportation companies, merchants, farmers and members of all trades are benefitted either directly or indirectly.

The open sale of game will result in an income for a few years to a limited few. After that there will be no income for anyone. The legislators of California now have this matter in their hands and it rests with them whether or not the sale of game shall be abolished. The California Associated Societies for the Conservation of Wild Life, with which thousands of thoughtful sportsmen are associated, is working to arouse a sentiment against the sale of game. The California Game and Fish Protective Association is working along the same lines, as is the association formed under the auspices of the Fish and Game Commission.

To adequately protect the game of California it is imperative that the sale of game be stopped, that the bag limits of several varieties be made smaller, that the present scientific work being carried on so successfully be continued, and that the game be recognized as a valuable asset and given consideration according to its value.

### Partridge and Hawk.

FITZWILLIAM, N. H., Feb. 21.—*Editor Forest and Stream:* One afternoon in January, about 4 o'clock, I noticed suddenly a sound like the fluttering of wings against the side of my house, followed almost immediately by the crash of breaking glass in the pantry leading off the kitchen. Opening the pantry door, I saw lying at my feet the bleeding body of a large partridge in a dying condition. It had forced its way through a window pane, also tearing a zig-zag hole a foot and a half long in a Holland window shade. Some boys out of doors had seen the partridge, chased and followed by a hungry hawk, fly out of the adjoining woods to escape its pursuer, and dash into the closed window.

I showed the bird to some of my neighbors who, on examining it, declared that its back was broken in the struggle.

J. SIMONDS.

### Connecticut Nature Notes.

PACKER, Conn.—Following items appeared in one of our dailies of recent date:

CAUGHT BIG BASS.—A record catch was made by Richard Hiscox, Harry Blackburn and John Haseldon, who were on a fishing excursion Saturday at Lantern Hill. A large black bass weighing 5¼ pounds was landed besides seventeen nice pickerel. Though the bass was an unusually large one, the extraordinary part of the catch is that it was caught in midwinter.

BLACKBIRDS IN COIT ELMS.—A flock of blackbirds was seen and heard Monday morning in the Coit Elms on Washington street, a sign of an early spring.

FOREST AND STREAM aims to keep always before its readers a high, sane and cheerful ideal of American sportsmanship.

## Fly Fishing in Northern Wisconsin

By JOHN L. BANKS

**H**AVING lived for the past twenty years in the wilds of Northern Wisconsin, I became acquainted early with the habits of the speckled and rainbow trout. As far back as I can remember, the tremendous attraction of the fly-rod has held me in its firm grasp and I know no better sport than fly-casting for these wary fish.

The Brulé River, flowing through Northern Wisconsin into Lake Superior, is about sixty miles in length and in width averages one hundred feet. It is the typical home of the trout and a paradise to the fisherman. In years gone by this stream was alive with speckled trout, but with the introduction of the rainbow trout into its waters, we have gradually seen a decrease, and now practically the extinction of the brook trout. The "rainbow," a larger, stronger and gamier fish, is the cause of this extinction, destroying the spawn and thousands by thousands of the speckled fry.

To return to the Brulé as the ideal home of the trout—thirty miles from Superior City, it is fished seldom and then only on the upper waters, where the feeding springs give new life to the mother stream. The lower waters are white with rapids and falls, the intervention of an occasional pool being the only break to this monotonous tumble of water.

The rainbow trout, as a general rule, will inhabit and hold the same pool year by year. I have watched this characteristic of the trout for years in several different pools near our place on the Brulé. To prove this a fact, I have caught a large rainbow from these holes and having marked him, allowed him to swim back in his former abode. That identical trout has risen to my fly in the same place for years. He weighs probably four pounds, and I am very curious to watch and see just how long he will be there. There are places on the Brulé now, pool after pool, where I know large rainbow trout to be, some ruling by themselves, others in pairs.

In the northern streams I have found June and July the best months to use the fly. The rainbow will rise in August, too, but they are usually feeding beneath the surface at that time and a hard day with the fly results in only small fish. Personally, I should prefer to throw my flies the day long with only a few strikes than fill my creel by bait. On the Brulé and streams that empty into Lake Superior, the month of June brings forth the deer-fly, bee and a brightly-colored insect, which our "Parmacheene-Belle" resembles. These flies exist all the summer, through June and July, and as a result, we use the same species of an artificial fly the year long. I make it a point to keep a "Royal-Coachman" or a "Parmacheene-Belle" on my

leader, as lead fly the whole season, not that the rainbow continually rises to this special fly, but because I believe that one bright fly is an absolute necessity to a leader, if only as an attraction in dark and deep water.

It is a very good plan and followed by many fishermen, although not a prevalent opinion, to let your flies sink at least a foot beneath the surface. In this manner, I mean: Every trout fisherman knows that a bright day is against him, and as we often want to fly-fish

they have scoffed at the idea of underwater fishing with flies. I don't advise this method in the evening or on a cloudy day, but only when a bright sun beats down on clear water.

The day, overcast with clouds and threatening rain, is the friend of the fly-fisherman—that is, if the water is clear and low. It is no advantage on a dark day, to make an early start. The rainbow will rise all day, sometimes better after dark—always better at dusk. On these dark days, keep your flies on the surface

AN AFTERNOON'S CATCH—MUSKALONGE IN PARRY SOUND.

on these bright days, this under-water method is a good one. Don't sink your flies with any weight whatsoever; let out about a hundred feet of line and allow it to wash down with the current till your lead fly lies somewhat near the head of a pool. Trout feed in the ripple and at the heads of pools. If you let enough line out, your flies will sink about a foot. On these light days I have often filled my basket in this manner. It is hard to hook your fish under water, but "practice makes perfect," if you will attempt it. I've fished alongside of many good fly-fishermen, who have wondered why they didn't make a catch; merely because

and don't use too long a line; it's more difficult even for the clever caster, and nets you no more fish. Use the short line, a length suitable to your ability to drop your flies on the water, lead fly first and with the slightest splash; don't drop your leader in a coil, so that it causes a terrific commotion on the surface; that only frightens your fish. Many fly fishermen cast continually, allowing their flies no time on the water. That's a poor plan; cast up stream and away from your person, letting your flies float down on the current, till your line is taut below; then draw slowly in, recasting the same ground. Always whip the same

place a second time; often a trout will wait to strike, the second cast luring him out of the water.

The rainbow will always take the fly on his downward plunge, the speckled on his upward ascent. This manner in which the trout takes the fly is a good means of identification at the second they strike. The brook trout fights little in comparison to the death-like struggle of the rainbow.

Trout are a fish that feed together, and if the angler meets with poor success he may just as well lay off till the trout begin to rise to the surface. Evening fishing, regardless of the day, is always good. The fish are near the surface, preceding and after dusk, and are feeding on floating bait entirely—except in cases of high or riley water, when no results can be gained, unless bait is used.

Bait fishing is dull and tiresome to the man who has used the fly. The larger trout may be obtained on bait, as the big trout seldom rise to the surface; when they do rise, it is extremely hard to get them as far as the net on the average sized trout fly. During the spring freshets, at the opening of the season, I have caught rainbow trout weighing from five to eight pounds with large pieces of fish bait, cut from a red-horse or a chub. Chub bait, either whole or in pieces, is a good tempter for these big fish, but if caught with a large hook in their throat or stomach, they fight poorly. Sometimes when the fly-fishing is poor, catch a small shiner or chub and put him on the hook as you take him out of the water. Sink this live bait in a deep hole, and if there is a large fish there, you will not have to wait long. When he does strike, don't jerk instantly as when using the fly, but feed out line, presumably nine or ten feet, at least until you feel the line growing quite taut and the fish a dead weight on the end. Then jerk suddenly. You will have him securely hooked and you may rely on a big prize. Bait-fishing is considered slow and is slow, I will admit, after using the fly, but it requires skill on the part of the angler to catch these large rainbow in that way. In my experience it is the only way to secure the monster trout of the largest streams. In the brooks, of course, where bush and wind-falls make the fly impossible, bait is the only method, but this brook fishing is very poor sport if the larger stream can be reached. The Brulé permits the use of the canoe over its whole course; yet one may wade its waters very comfortably and reach all points of vantage.

These few opinions of mine on fly-fishing may meet with disapproval on the part of many; yet from close observation and wonderful success each season, I have proved them to be true.

### Trout Fishing in New York.

SPRINGFIELD, Mass., March 20.—*Editor Forest and Stream:* With the disappearance of the snow, the swelling of the maple buds, and the song of the returned bluebird and robin comes that perennial "spring fever" symptomized in an individual according to his hobbies. Doubtless the devotee of the rod becomes conscious of a lack of equilibrium which requires a five-ounce rod to balance, an itching of the finger

satisfied only by contact with a favorite reel, and an irresistible tendency to sort out the tackle box.

Probably every reader of *FOREST AND STREAM* has his particular trout brook, but for the early fishing, when the lusty old fellows seek the shallows of the lakes and ponds, one must go back to the little frequented waters to enjoy the stirring contest with the three and four-pounders which take the troll before the flies have roused from their winter slumber. After several years of investigation of the various waters offering "special attractions," we found last year an eminently satisfactory location of which perhaps your readers would care to know.

Taking the St. L. & O. division of the New York Central north from Utica, we transferred at Lowville to a stub line running to Croghan from which terminus the "team" from the Bald Mountain House drove us the twelve miles to what were formerly known as the Oswegatchie Lakes, but are now termed Long Pond and its sisters (Round, Rock and Trout). On the bank of Long Pond is the house above mentioned re-

TEMAGAMI TROUT.

cently purchased by a group of college men who are offering just what we had looked for, viz.: comfortable quarters, good board and everything the fisherman could desire, but such fishing! Mine host, himself a college professor in his younger days, took every pains to see that we were adequately supplied with guide, boats, etc. 'Twas like the "good old times" of which we read, and of which we had heard in other places. The fire, which wiped out half of Croghan on the first day of the open season, recalled most of the local fishermen, so that perhaps we had more than our share. Our first morning with Chris, who knew every yard of the lake, resulted in an even dozen of keepers, all of them one pound or better, and five of them going two pounds or more besides a good many smaller fry above the legal length which, on the advice of the guide, we returned to the water "to grow up." Each trip yielded to two rods something like the above catch, and what fighters! We had not known the like since on a former trip the brooks emptying into the north shore of Superior surprised us by the gaminess of its prizes. 'Twas a glorious week and resulted in an advance booking for the coming season. But how slow is the coming of the day we have

checked as that on which we again slip off for a few days of long-looked-forward-to sport.

G. B. A.

### North Carolina Rainbows.

HENDERSONVILLE, N. C., March 13.—*Editor Forest and Stream:* I read with much interest *FOREST AND STREAM* of the 8th inst. and desire to be among those who most heartily congratulate you on the passage at last of the migratory bird bill, and in congratulating you I feel that I congratulate the whole country at large and especially those who did so much toward the end to be obtained by this bill now to be the law of the land.

Our State Legislature has "quit and gone home," and we have the usual number of county game laws. This county had much better game laws before the passage of the new ones, I am told. After I have seen the full text, I will know better how to express myself in regard to this. Our Senator told me that it was really amusing to sit and hear one ask for the passage of a game law for his county, when another would rise and ask for the repeal of just such a law for his county.

I wonder if North Carolina will ever pull itself together and ask for a State-wide sane game law? It gets very tiresome at times in the constant effort to get men to see that will not look till too late. Under Uncle Sam's new law wild pigeons are to be protected, it seems, but where are they? There are none left to be protected. Too late, too late—that is, if the word wild be applied to the passenger pigeon.

Spring is with us again. How rapidly the year runs round! And so much faster as one grows older. I can well remember as a small boy wishing I were a man so I could go shooting and fishing, and the time dragged so. Now as I near my sixty-fourth birthday I can't begin to keep up with it. At any rate, I don't feel my age as yet, and hardly will, I suppose, till I find I can't climb our North Carolina mountains all day after ruffed grouse or wade our dear mountain streams without tiring out.

It will not be long now before I think I shall have a cast at the trout, and I can feel that "peculiar feeling" anglers have as the season grows apace.

We are having heavy spring rains, but when the streams fall to normal and are clear, I hope to try conclusions with the rainbows. Rain is pouring in torrents. ERNEST L. EWBANK.

### American Forestry Association.

THE directors of the American Forestry Association have arranged to hold their quarterly meeting this spring at Asheville, N. C., where they will inspect the Biltmore forest and nurseries under the guidance of C. J. Beadle, the superintendent of the Vanderbilt estate. On the evening of the same day there will be a public meeting and addresses will be made by Dr. Henry S. Drinker, president of the association, and president of the Lehigh University, who has made a particular study of the forest taxation problem; by J. S. Holmes, secretary of the North Carolina State Forestry Association, which is affiliated with the American Forestry Association; by J. E. Rhodes, manager of the National Lumber Manufacturers' Association, and a number of others.

# An English Dry-Fly Rod

## The Neversink and Other Eastern Trout Waters

By THEODORE GORDON

A TYPICAL English dry fly-rod has been sent to me to try—not a rod made for America, but the sort that those English dry-fly men prefer who will not use an American rod.

It is most interesting to compare its action with the actions of fine Leonard and Payne dry fly-rods, and it shall have the fairest possible trial. It certainly balances remarkably well, and most careful attention has evidently been paid to all details. It was built under the supervision of a master of the floating fly and was tried by half a dozen others who all approved of it, considering the action correct. Of course a line must be chosen to suit it, and I have on hand F, E and D. There is more cane in the top than in a fine American rod, and I fancy that only Tonquin cane will give the great stiffness and resiliency attained by makers such as Leonard in joints of small diameter. The tournament rods have extraordinary power with least weight, and a good few Englishmen prefer them for chalk stream fishing. This occasioned a great controversy some years ago, which, without doubt, led to considerable alterations and improvements being made in English fly-rods.

Lovers of the Neversink will be disgusted to learn that a sawmill has been moved up to the "Big Bend," one of the refuges for large trout during low water and drouths. Every stick of timber down to six inches in diameter will be cut, and it is reported that the sawdust will be disposed of in the stream. I can scarcely believe that this is true. No river in the country has such lovely "white" water as the Neversink, and in spite of damage by floods and wood chopping, it is still one of the most beautiful of our large streams. A good number of the best native anglers and landowners have put in applications for fingerling trout, and these will be distributed carefully, and to the greatest possible advantage.

Nowadays the best sportsmen think of putting trout in as well as taking them out, and endeavor to provide for the future and the younger generation of anglers. We do not wish to kill great numbers of trout, but to be able to find a few fish of size and quality, which will require a little skill and afford exciting sport—the kind that one is pleased to show and that present a handsome appearance when served upon the table.

The best anglers are apt to go where there is at least a chance of hooking a really big trout, and at present a good many fishermen are a bit uncertain where they will first wet their lines this season. I have fished the Ulster and Sullivan county streams so frequently of recent years that I feel some little inclination for the unknown or to return to streams that I have not seen for years. I found an old photograph of my first camp in the Maine wilderness recently, and it recalled many delightful memories, but I shall probably put my trust in one of the hard-fished streams in New York or Pennsylvania, where there are no black flies or midges. One becomes attached to certain waters, and I notice that men come from all directions and

from places far away to fish these old streams which have been celebrated for fifty years or more. They are associated with the names of nearly every well-known angler who flourished during the nineteenth century and have furnished sport for many thousand fishermen. One thinking of speculative changes usually remembers that he may go further and fare worse. Undoubtedly there is much first rate dry-fly fishing within 200 miles of New York city, which is not well known or much exploited.

### Fishing in California.

BY GOLDEN GATE.

STEELHEAD fishing has been surprisingly good in almost all of the coast streams in the San Francisco Bay section during the past two weeks and some very large catches have been made. Usually at this season of the year these streams are swollen with flood waters, but the rainfall to date has been exceedingly light, just heavy enough, in fact, to keep the water at the right height. Low water at this season of the year does not augur well for future sport, so anglers are making the most of the rather unusual conditions. There is still time for a good downpour of rain, but the outlook is for another dry season in Northern California with fishing at its best during the spring months.

The best steelhead fishing is now being enjoyed on the Russian River, where the fish are running freely, and where some very large ones are to be found. Several fish have been taken there weighing fifteen pounds and one tipping the scales at eighteen pounds is reported. Conditions on this stream are improving daily as there has been no rain of late and the water is clearing rapidly.

Some splendid steelhead fishing is also being enjoyed in the tide-water at the mouth of the San Lorenzo River. The fish are to be seen there by the hundred waiting for the river to rise, when they will make their pilgrimage upstream. Many anglers fish in this stream, which is near the city of Santa Cruz, and some are taking from fifteen to twenty steelheads a day.

The Salmon Creek lagoon in Sonoma county has suddenly come to the front as a great place for steelhead trout and some unusually large catches have been made there of late by members of the Salmon Creek Rod and Gun Club. Jack Lemmer, the light tackle enthusiast, recently visited that section on a fishing trip and had quite a successful venture. While fishing with a five-ounce rod he hooked an unusually active twelve-pound steelhead and finally landed him after a long battle.

While sport has been good on most streams, Paper Mill Creek has yielded very unsatisfactory results and an investigation is under way to determine, if possible, what has been interfering with the sport on this popular stream during the past season. The creek was well stocked last season, as it has been for sev-

eral years, but the fish do not seem to be there.

Striped bass fishing is showing signs of improvement, and some sloughs that have been a source of disappointment all winter are now splendid fishing grounds. Hugh Draper recently made a catch in the San Antone slough district that attracted considerable attention, taking six fish that averaged twenty pounds apiece, the largest weighing thirty pounds and the smallest seven. On the day following this catch a large number of rodmen were out and all made catches, some taking as many as twenty fish. These ran in weight from five to thirty-two pounds.

The Pescadero and San Gregorio lagoons have not been satisfactory fishing grounds of late. At Monterey Bay there is some good salmon fishing to be had, but only a few salmon have been taken in San Francisco Bay.

The trout fishing season above tidewater in coast streams opens on April 1, in fact, trout fishing will be in order then in all of the streams of the State, except those in District 3, where the season opens a month later. From the Sierras comes the report that the snow-fall has been heavier than was the case a year ago, and that streams will probably not be as low during the summer months as was the case last season, which was a hard one on fish life.

San Francisco anglers are looking forward with much pleasure to the visit of Dr. Henry Van Dyke, who is expected here this month for a short stay. While here the distinguished visitor will be the guest of the San Francisco Fly-Casting Club at a banquet at the St. Francis Hotel. This organization has had but two honorary members on its rolls, Grover Cleveland and Dr. Henry Van Dyke.

### Suggestions—Alabama to Florida.

JOHN H. WALLACE, JR., writes to a member of the Florida Legislature as follows:

MY DEAR SIR:

Your neighbors in Alabama cannot derive the highest and best benefits from their excellent game protective system unless similar laws are enacted in Florida.

Permit me to suggest that Florida needs, first—a State-wide game law with a State game and fish commissioner to enforce it; second, a hunting license tax should be imposed as follows: (a) Permitting persons to hunt on their own lands and in their voting precinct of residence without licenses; (b) in county of residence, \$1; (c) in all counties in the State, \$3; (d) non-residents and aliens, \$15. This is the Alabama plan, and the city hunters pay the cost of supporting the department of game and fish.

The birds and game have been slaughtered in Florida to such an alarming degree that unless a halt is called, many of your most valuable species will be utterly annihilated, then the tourists will cease to visit your beautiful State, and spend their money with your people.

I am sending you, under separate cover, a copy of the Alabama game laws, together with some other literature, blanks, etc., bearing upon game and fish preservation and protection, which I will thank you to accept with my compliments. Would you mind writing me how you feel about the suggested program?

JOHN H. WALLACE, JR.

Published Weekly by the  
 FOREST AND STREAM PUBLISHING COMPANY,

 W. G. BEECROFT, Secretary. W. J. GALLAGHER, Treasurer.  
 127 Franklin Street, New York.

**CORRESPONDENCE**—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

**SUBSCRIPTIONS**: \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

**ADVERTISEMENTS**: Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

Entered as second-class matter at the Post-Office, New York, N. Y.

### VACATION MEMORIES.

HAPPY are the memories which we all cherish of vacations past, and the hopes we have of those that are to come. Severe as may have been the toils of journey with pack or paddle; the climbing over rock-face and snow-slope of tall mountains; the sufferings of fatigue, hunger and thirst; in the retrospect all these hardships are lost sight of. We remember only the joys of attainment, and long for the time to come when we shall be able to repeat our trip; perhaps again to struggle and to suffer—and to succeed.

Who can ever forget the breathless anxiety of the long climb, and the final joy of peeping over the hill and seeing below him, all unconscious of danger, the great ram lying on his bed of shale, calmly looking out over the wide mountains that stretched so far below?

Who can ever forget the patient whipping of the salmon stream—the rise and strike, just at dusk, of the greatest fish yet made fast on the trip; the breathless excitement of fighting the monster in the dark, when it was impossible to see where he was going, or into what peril he was putting the tackle; and then the final supreme moment when victory declared itself—either for the angler, as he saw the waving bar of white lifted from the water, or for the fish when suddenly the line snapped back loose and the struggle was ended?

Not to everyone is it given to excel in craft the mountain sheep, or in strength to equal the lordly salmon. To stir vacation memories, no rewards are needed so great as these. We may rejoice equally over idle days spent in lounging in the sunlight along the shores of a lake, going out night and morning to catch just fish enough for the pan; or in poling the light canoe up the wild streams in Canada or the Adirondacks, or with heavy pack, yet light heart, tramping along country roads, or through dim trails in green timber; or hour after hour brushing through the yellow stubble or the brown leaves of the woodland, as we follow the dogs afield.

Many men have many minds, and to each

one his vacation, however spent, is a lasting delight. Unbidden its memories come to him by day or by night. Perhaps some sound, half heard, or some subtle odor touches a string of memory, and in a moment the full chord sweeps through his brain. More vivid still are the recollections, if he looks over a set of pictures taken on the trip, or gets out an old note book and turns its pages. Then a thousand trifles—events and words and phrases—long effaced from memory's palimpsest, spring into view and the recollection becomes as fresh as if it were of yesterday.

For most of us vacation times are short. For six months we may enjoy our memories, and for another six months may indulge in hopes of happy days to come. Nevertheless, in FOREST AND STREAM we may always read the story of other men's vacations, just as by writing for FOREST AND STREAM the story of our last year's trip we may live over again our vacation and, besides, may give to others some suggestions of the pleasures that we ourselves have enjoyed.

### STILL AT THE TOP.

THE figures compiled by the Printers' Ink of the total number of agate lines of advertising carried by each of five outdoor publications for the month of February, 1913, are as follows:

Publication.	Feb. 1913.
1. Forest and Stream.....	12,619
2. Outing Magazine .....	10,584
3. Outdoor World .....	9,302
4. Field & Stream .....	8,003
5. Outer's Book .....	6,290

### SLAYING, SLAUGHTERING AND KILLING

To be born great is not much perhaps, but we should all of us like to achieve greatness.

However, should we care to have greatness thrust upon us?

The Congressional Record deals with the proceedings of Congress, and it is not often that the simple citizen gets his name into that publication, but this happened recently to Chas. Sheldon, who, at the hearings held before the committees of Congress in March a year ago, appeared in behalf of the Weeks and McLean bills, representing the Boone and Crockett Club. Mr. Sheldon has attained a measure of success that many of us would be glad to equal, but what he had done does not satisfy a member of Congress, who wishes to thrust more greatness on Mr. Sheldon, and so discusses him by name on the floor of the House.

In the debate on the Senate amendment of the Agricultural Appropriation Bill, dealing with Federal protection of migratory birds, two speakers bitterly opposed the bill and talked at considerable length against it. One of these was Mr. Mondell, whose attitude is always well known, and the other was a gentleman from Indiana, Mr. Cox, whose speech, while his intentions were no doubt of the best, was calculated to mislead, and wholly ignores the testimony offered by a number of scientific men and officials of bird protective associations. The gentleman from Indiana expressed these views:

"The whole bill is a delusion and a snare. It would have been impossible to put the bill through, simply to protect the game bird, and in order to get it through, they had to couple with it a provision about which the fathers of this measure care nothing whatever. Who is

the Boone and Crockett Club? Where is it? What was it organized for? It was founded in 1887 by ex-President Roosevelt, and Mr. Sheldon, who appeared before the Senate committee in favor of the measure, said that the proposed measure was advocated by this club for the conservation of big game, forest reserves and perhaps it was responsible for big-game refuges. Mr. Sheldon of course was, and is, an ardent advocate of this measure, because he is a member of the Boone and Crockett Club, and no doubt in the world but what this club is in favor of the pending measure, because they are genuine sportsmen.

"This ardent advocate laments long and loud concerning big game fast disappearing, because, he says, that members of clubs like the Boone and Crockett Club no longer hunt on foot, or on horseback, but hunt in automobiles, and in fact one of the complaints against the depletion of game is because men do hunt in automobiles. Not many men in this country, compared with the total population, have much time to hunt for pleasure; most of them are rigorously employed in trying to earn a little bread and meat instead of going on pleasure jaunts and trips, slaying, slaughtering and killing game."

"Slaying, slaughtering and killing" game is a fairly ponderous expressing. The gentleman from Indiana did not wish anyone to be in doubt as to what he meant.

We do not read regularly the Congressional Record, and of the rhetorical gems that it contains many must necessarily escape us, but of those gems few, we imagine, outshine in brilliancy Mr. Cox's ringing, rolling yet redundant remarks about slaying, slaughtering and killing game.

### SPRING SHOOTING.

THE poet Whittier said if he were a young man he would enlist under the banner of some great moral reform, no matter how desperate the fortunes of that cause might appear, and devote himself to laboring for its success. One of the younger generation of sportsmen now coming on to the stage might enroll himself on the side of the spring shooting abolitionists with perfect confidence in the ultimate triumph of their principles. Nothing in the entire field of sportsmanship is more clearly demonstrated by passing events than that the sentiment against spring shooting is gaining strength. It is gaining ground in a wider territory than ever before. No one who intelligently notes the trend of opinion in relation to such affairs can fail to be convinced that this is the situation with respect to the shooting of wildfowl flying northward to their breeding grounds in the spring of the year.

### The Meadow Lark.

BY WILL C. PARSONS.

Almost deserted, Nature's choir; but one,  
 His breast aglow like summer's setting sun,  
 Pipes from a frozen clod in snow-patched field,  
 His notes flash out like rays from polished shield.  
 To cutting norther's blade, he scorns to yield.

"Cheery o' cheer,  
 Cheery every one!"

Though he eternal summer might command,  
 He stays behind; defies King Winter's hand,  
 And gladdens saddest heart with sweetest note  
 That ever burst from songster's silvery throat—  
 A benediction in his mottled coat.

"Cheery o' cheer,  
 Cheery every one!"

# ARCHERY

Forest and Stream is the official organ of the National Archery Association.

## Scoring by Points.

BY EDWARD B. WESTON.

IN the past several weeks the papers have printed a number of letters and articles on scoring by points, and nearly all the writers have expressed the opinion that a change ought to be made in the present methods of scoring the archery championships.

I am surprised that any archer should not know what the point system is. But I have lately been asked by two good archers, who have shot in several recent tournaments, to explain it to them.

All that they had cared to know was who had made the best scores; showing that to them, in comparing archers' skill, the number of points made cut no figure.

The York round is composed of three ranges. Seventy-two arrows are shot at the 100-yard range, forty-eight arrows are shot at 80 yards and twenty-four arrows at 60 yards. In a championship contest the round is shot twice, making a double round.

Ten points are used in deciding the winner. Two points are given the archer making the greatest number of hits, and two points to the one making the highest score; one point for the greatest number of hits at 100 yards, and one point for highest score at 100 yards; one point for most hits at 80 yards, and one point for highest score at 80 yards; one point for most hits at 60 yards, and one point for highest score at 60 yards.

The archer having the most points becomes the champion.

When a person takes up archery, or any sport, he sees many things which do not look quite right to him. He is not conversant with the history of the sport, and does not know that every point in it has been thought over carefully and discussed pro and con, until it has reached its present status. In his impatient enthusiasm he starts, de novo, to make over things, without availing himself of the work which has been done in the past.

It may be stated that as a rule it is a good plan to let well enough alone. But "well enough" is often not as good as it should be. In such case an effort should be made to change things for the better.

It appears that a majority of the archers believe that the present system of scoring the championship contests could be changed with great benefit. To be sure, it has the sanction of long years' use. It has been adopted, dropped and adopted again. Each time it has been under consideration, it has been discussed at length, and I regret to say in some cases acrimoniously.

H. B. Richardson states in his letter already printed, that "whatever may be the official rule in England concerning the use of the point system, it was not enforced in 1908, the year I was there. The match was decided on the highest

score. When I got one more than Brooks King, there was no discussion of the points won." Though nothing was said about it on the range, the Archer's Register, for that year, shows that the championship was won by points as usual.

It shows that the archers were thinking more of highest score than of points. It is altogether probable that if a contestant were declared champion by a point, or the fraction of a point, and had not made the highest score, the one who had would be popularly considered the best archer.

In the Archer's Register for 1911-12, a list of six best ladies' and gentlemen's scores and hits are given for each year since 1871. Of course there was no occasion for saying anything about points; it is stated that the hits and scores are given so that comparisons can be made.

They, no more than we, would think of comparing archers' skill by points which they might have made.

James Duff, of Jersey City, who has lived and drawn the long bow in England, states in his recent letter:

"I may mention here that the point method of scoring has long been looked on with scorn by some of the good British archers, but its very antiquity, I believe, has scared the man from coming forth and taking a firm stand for improvement."

The antiquity and glory of archery, and the sentiment attached to it, make it difficult to effect changes which seem to be needed.

But we must remember that the archery of to-day is different from the archery of the past.

Distances shot have been changed, as also have targets, number of arrows shot for an end, archer's dress, methods of scoring, and in other ways. A change was made at the last tournament by assigning the archers to different targets on the two days of the championship contest, so that if there was any difference in the desirableness of their locations, no one would have a good target on two days, and another, one not so good, on two days. This new arrangement caused no commotion whatever.

An evolution has been going on, and the time has not yet come when there can be no further change for the better.

When in the past, either in this country or abroad, the point system has been given up, it has been changed to gross score alone. Score and hits should be added, for in this way hits receive the credit due them, and this makes a different proposition of it.

I am firmly of the opinion that the championships should be awarded by coming hits and score. And the change can be made without "muddying the clear stream of archery that now flows deeper, cleaner and stronger than for many years," as Mr. Thompson fears might be the case.

Note.—Recent discussions of the point system of scoring may be found in the issues of

FOREST AND STREAM for Dec. 21, 1912, Feb. 15, 22, March 8, 1913.

## Fine Archery Scores.

When a double York round score of 900 is made, it does not cause much comment. The average archer does not seem to think it anything out of the ordinary, though he may never have approached it.

Since the organization of the National Archery Association, in 1879, it has been made, at its annual meetings, but six times, and by four different archers. These scores follows:

1883	Col. Robert Williams, Jr.	199	907
1885	Col. Robert Williams, Jr.	215	955
1908	Will H. Thompson	211	973
1909	George P. Bryant	227	975
1910	H. B. Richardson	231	1111
1912	George P. Bryant	230	1094

During the same period, the championship score made at the Grand National Meeting, in England, has been as high as 900 only four times as shown below:

1884	C. E. Nesham	208	902
1885	C. E. Nesham	211	917
1886	C. E. Nesham	202	1022
1890	C. E. Nesham	207	921

Since 1879, 900 has been made in other Grand meetings in England, and also in the Ohio State Archery Association a few times. But it is made so rarely that we remove our hat to the one who makes it.

## The Degenerate Yew.

From the Archer's Register, 1911-12.

Oh, where in the world can I find the bow  
That cost but a fifty-five pounds or so—  
And pulled about fifty-five pounds or so—  
Slender and taper to head and heel,  
Steady and whippy and tough as steel?  
If I drew but a finger across the string,  
Like the note of a fiddle I heard it sing;  
If I shot all day in the summer sun,  
It kept its shape when the day was done;  
It drove the arrows both low and fast,  
For bows in those days never lost their cast.  
It was waste indeed that our Yews had then,  
But ours to-day are a bourgeois race;  
Podgy and heavy and void of grace;  
No ancient blood in their veins, I ween—  
It isn't an insult to call them green!  
If you don't believe me, just "wait and see"—  
You may order a bow, but you'll get a tree!  
When you've shot your round you will rage and foam  
For you'll need a coffin to cart it home;  
And when on your wall it is safely hung,  
You'd almost swear that the thing was strung.  
If you wouldn't be cursed with such a bow,  
Fat and lazy and tired and slow,  
You may save your money and buy, perchance,  
A "cattle-walloper"—that's a lance!

AVONDALE.

## FOR ARCHERY SUPPLIES

Write for Archery Catalogue.

E. I. HORSMAN CO. 365 Broadway, N. Y.

Forest and Stream will give a weekly digest of Yachting and Motor Boating events from all over the country.

### 23-Foot Auxiliary Cruising Catboat.

THE plans on page 375 are of an auxiliary cruising catboat, designed by Swasey, Raymond & Page, Inc., of Boston, Mass., dimensions being 23 feet over all, 21 feet 6 inches waterline, 10 feet 6 inches beam, 3 feet 3 inches draft, 4 feet 2 inches freeboard bow, 2 feet freeboard stern and 1 foot 9 inches freeboard least. Her design is a little different from the ordinary Cape catboat. She has a typical high bow and lots of sheer and regulation extra wide breadth of beam. She is a little deeper and has more dead rise, and her sections would make an easier boat to drive in rough water than usually found on catboats; still she has a hard bilge, which will make her stand up in a breeze.

The sections aft are brought down with an S-shape curve which will give depth for the engine and will also make a boat which will steer well in a following sea, and in any bilge water will be aft under the cockpit rather than in the cabin.

She will have about 4,000 pounds of ballast, 3,000 pounds of which will be inside well winged out, as is the usual practice for the best results in wide boats to give them the most stability at ordinary angles of heel, and 100 pounds on the keel, which will give more range of stability and help in case of bad knock downs.

Her sail plan has 550 square feet, which is fairly moderate, but by using an engine in light airs, should prove sufficient and also avoid the necessity of reefing too often. Her arrangement plan is quite unusual for such a small boat. There is practically no waste room in her. The cockpit is 6 feet long and 7 feet wide, and has a seating capacity for from six to eight people comfortably by utilizing the bridge deck also. She steers with a wheel.

A raised hatch in the cockpit floor gives access to the engine, which is a single cylinder, 2-cycle, about 5 horsepower engine, which is the regular arrangement in Cape catboats.

Under the cockpit seats on either side are water and fuel tanks of twenty-four gallons capacity each. Between the cockpit and cabin is a bridge deck, under which is a food locker and a large refrigerator. In the cabin on the port side is a toilet room over 4 feet long, and on the starboard side aft is a galley with sink, dish lockers, galley table, coal stove space, etc.

Forward of these are two transoms which are of the extension type and will sleep two on each, these transoms being about 3 feet 6 inches wide when extended. The dining table is hinged from the centerboard trunk. Forward of the cabin in the fore peak is a large clothes closet with shelves, racks, etc., for bags, etc.

The cabin has 5 feet 4 inches head room in the lowest part. A small bowsprit is shown mainly for the purpose of carrying the anchors and to act as a fender when making landing at floats. The bowsprit makes a very convenient

place to carry the anchors. All you have to do is to hoist them up and fasten them to the hook under the bowsprit, and they are always in readiness for use.

### Yachting in California.

MORE interest is being taken in yachting on San Francisco Bay by local enthusiasts than has been the case in many years, and the outlook is that many new boats will be in commission this year. Great preparations are being made for the regatta in 1915 when yachts from all countries are expected to be here to compete for the many valuable prizes that have already been arranged for. Sir Thomas Lipton has promised to be here with his yacht Shamrock IV. and has offered a valuable trophy that will be strongly contested for. This will be for 23-meter boats, and already plans have been made to build a boat for the San Francisco yachtsmen. The challenge of Sir Thomas Lipton was accepted almost on the spot by Thomas L. Miller, and within a few days a hundred enthusiasts had volunteered to assist in building a boat. Capt. W. F. Stone, a veteran skipper, will sail this vessel, and will spend several months this summer in securing ideas and data which will be incorporated in the construction of the yacht.

At the annual meeting of the Corinthian Y. C., officials were chosen as follows for the ensuing year: Commodore, H. E. Picker; Vice-Commodore, J. F. Campbell; Port Captain, John Keefe; Treasurer, C. F. Morel; Secretary, H. W. Westerfield; Directors in addition to the officers, William J. Hogg and Gus Dorn; Regatta Committee, Robert A. Dean, Clarence Dobie and Fred Webster.

The new officers of the San Francisco Y. C. are: Commodore, R. C. Pell; Vice-Commodore, G. P. Carruthers; Secretary, Jack Russell; Treasurer, Gordon Thompson; and in addition to these as a directorate William G. Morrow and Frank Garden. Commodore Pell will use the Vixen as flagship for a few months, but has ordered a new yacht from the East that should arrive here by the first of July. J. M. Punnett, of this club, has purchased the sloop Monsoon, now flying the club's colors, and will sail her this summer.

The Sequoia Yachting and Boating Club, of Eureka, will formally present a challenge for a race for the San Francisco perpetual challenge cup early in May. Creades, owned by Arthur Way, of Eureka, will represent the Northern yachtsmen.

President C. C. Moore, of the Panama-Pacific International Exposition, has received word from the Hawaii Y. C. to the effect that the club was ready to support in any way the International trans-Pacific yacht race planned for 1915.

The Power Boat Association, recently organized as the California section of the American

Association, has elected its first officers as follows: Chairman, I. H. Cory, of the San Francisco Y. C.; Vice-Chairman, E. Forrest Mitchell, of the Sacramento Boat Club; Secretary, Frank E. Baker, of the Corinthian Y. C.; Treasurer, Harry L. Burleson, of the Pacific Motor Club; Delegates-at-Large, Frank M. Garden, of the San Francisco Y. C., and Emil Stauf, of the Corinthian Y. C.

The Vallejo Yachting and Rowing Club has elected officers for 1913 as follows: Commodore, Theo. Swanson; Vice-Commodore, Herman Streichan; Fleet Captain, Bert Ryan; Port Captain, R. H. Deimon; Recording Secretary, J. H. Browne; Treasurer, S. J. McKnight; Measurer, W. A. Kirkland; Regatta Committee, Horace Etzel and Oscar Sutterquist.

### 900-Mile Yacht Race.

A 900-MILE yacht race from Chicago to Duluth is being considered by Commodore James O. Heyworth, of the Chicago Y. C. This race, the longest held by any fresh water yacht club, is made possible by the large number of big sailing vessels which have been purchased or built for the Chicago fleets this year.

Commodore Heyworth will place the race on this season's schedule if enough entries are received; otherwise the big event will be held next year.

## Canoeing

### A. C. A. Membership.

#### NEW MEMBERS PROPOSED.

Atlantic Division.—Stanley J. Cypher, 13 Eastern avenue, Ossining, N. Y., by A. Rivers Genet.

Western Division.—Arthur Santmier, Chicago, Ill., by R. F. Rogers; Arthur Lyle Gourley, Highland Park, Ill., by John W. McConnell.

#### NEW MEMBERS ELECTED.

Eastern Division.—6622, George H. Holland, 49 Sheridan street, Jamaica Plain, Mass.; 6623, James C. McFarlane, 6 Dalrymple street, Jamaica Plain, Mass.

Western Division.—6617, Waldemar R. Petersen, Dundee, Ill.; 6618, Joseph L. Gillson, 706 Forest avenue, Wilmette, Ill.; 6619, Carl G. Gruner, 607 Elm street, Rockford, Ill.; 6620, Eugene Miller, 1621 W. Division street, Chicago, Ill.; 6621, Edwin H. Tryon, 539 Ryerson avenue, Elgin, Ill.

#### RESIGNATIONS.

Western Division.—5272, Walter W. Kellner, Milwaukee, Wis.; 6350, Robert J. Nordhold, Chicago, Ill.; 6466, John F. Moffett, 2d, Chicago, Ill.

TWENTY-THREE-FOOT AUXILIARY CRUISING BOAT.  
Designed by Swasey, Raymond & Page, and described on preceding page.

# TRAP SHOOTING

Forest and Stream is an Honorary Member of the Interstate Association for the Promotion of Trapshooting.

## Fixtures.

If you want your shoot to be announced here, send a notice like the following:

### REGISTERED TOURNAMENTS.

- March 25-26.—Birmingham (Ala.) G. C. O. L. Garl, Sec.  
 April 8-10.—San Antonio, Tex.—The Interstate Association's Southwestern Handicap, under auspices of the San Antonio Gun Club; \$1,000 added money. Winner of first place in the Southwestern Handicap guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. E. E. Shaner, Mgr., Pittsburgh, Pa.  
 April 9-10.—Lincoln, Neb.—Capitol Beach G. C. T. C. Brownfield, Pres.  
 April 10.—Atglen (Pa.) G. C. Lloyd R. Lewis, Mgr.  
 April 14-16.—New Orleans, La.—City Park G. C. J. M. Lionnet, Mgr.  
 April 16.—Mt. Holly (N. J.) G. C. A. J. Dellette, Sec'y.  
 April 17.—Syracuse, N. Y.—Messina Springs G. C. W. E. Hookway, Sec'y.  
 April 17-19.—Hot Springs, Ark.—Arkansas State tournament, under auspices of Hot Springs G. C. H. A. Whittington, Sec'y.  
 April 19.—Lawrence (Mass.) Fish and Game Protective Association. A. C. Gray, Sec'y.  
 April 23.—Grundy Center (Ia.) G. C. Frank W. Callaway, Sec'y.  
 April 23-24.—Wellington, Mass.—Paleface Shooting Association. Walter F. Clarke, Pres.  
 April 23-24.—Brantley (Ala.) G. C. A. H. Hill, Pres.  
 April 24.—Maysville, Ky.—Mason County G. C. Wm. H. Hall, Mgr.  
 April 26.—Pottstown (Pa.) G. C. C. A. Fries, Sec'y.  
 April 29.—Guernsey, Ia.—Du Pont G. C. J. W. Dobbins, President.  
 April 29-30.—Moberly (Mo.) G. C. J. A. Melton, Sec'y.  
 April 29-May 1.—Pond Creek, Okla.—Oklahoma State tournament, under auspices of Pond Creek G. C. Wm. M. Hite, Mgr.  
 May 1-2.—Philadelphia, Pa.—Keystone Shooting League. G. F. Hamlin, Sec'y.  
 May 2-4.—San Diego, Cal.—Pastime G. C. George P. Muchmore, Sec'y.  
 May 3.—Rittersville, Pa.—Lehigh R. and G. C. H. F. Koch, Sec'y.  
 May 3.—Bethel, Conn.—Western Connecticut T. S. L. tournament, under auspices of Bethel G. C. C. K. Bailey, Sec'y.  
 May 5-6.—Laramie, Wyo.—Gem City Gun Club. Tyler A. Rogers, Pres.  
 May 6.—Vicksburg (Miss.) G. C. J. J. Bradfield, Mgr.  
 May 6.—Pitcairn, Pa.—Western Pennsylvania T. S. L. tournament, under auspices of United G. C. Louis Lautenslager, Pres.  
 May 6-7.—Eagle Grove (Ia.) G. C. A. L. Yearous, Sec.  
 May 6-7.—Montpelier (Vt.) G. C. H. B. Moulton, Pres.  
 May 8.—Camden (Ark.) G. C. J. P. Wright, Mgr.  
 May 8-10.—Hutchinson, Kan.—Kansas State tournament, under auspices of Hutchinson G. C. Chas. T. Rankin, Sec'y.  
 May 7.—Seneca Falls (N. Y.) G. C. C. L. Frantz, Mgr.  
 May 7.—Hicksville (O.) G. C. C. E. Maxwell, Sec'y.  
 May 7-8.—Dayton, Ky.—Northern Kentucky G. C. H. R. Irwin, Mgr.  
 May 7-8.—Americus, Ga.—Georgia State tournament, under auspices of Americus G. C. J. W. Hightower, Pres.  
 May 7-8.—Sunbury, Pa.—Sunbury-Selinsgrove G. C. J. W. Schoffstall, Sec'y.  
 May 8.—Watertown (Wis.) G. C. B. H. Rieck, Sec'y.  
 May 8-9.—Kankakee (Ill.) G. C. E. F. Radeke, Sec'y.  
 May 9.—Portage (Wis.) G. C. J. Raup, Pres.  
 May 9-11.—Los Angeles (Cal.) G. C. Stanton A. Bruner, Sec'y.  
 May 10.—Marysville (Pa.) S. A. M. L. Wise, Vice-Pres.  
 May 12.—Mt. Airy (Md.) G. C. Ira D. Watkins, Sec'y.  
 May 12-13.—Portland (Ore.) G. C. J. E. Cullison, Pres.  
 May 13-15.—York, Pa.—Pennsylvania State tournament, under auspices of York City G. C. N. M. McSherry, Sec'y.  
 May 13-15.—Montgomery, Ala.—Interstate Association's eighth Southern Handicap tournament, under auspices Capital City G. C.; \$1,000 added money. Winner of first place guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. Elmer E. Shaner, Mgr., Pittsburgh.  
 May 14.—Tyndall (S. D.) G. C. F. F. Chladek, Sec'y.  
 May 14.—Fulton (N. Y.) G. C. and G. C. B. J. O'Grady, Pres.  
 May 14-15.—Waterloo (Ia.) G. C. Nick Webber, Pres.  
 May 14-15.—Pipestone (Minn.) G. C. H. T. Ober, Sec'y.  
 May 15.—Shelbyville, Ill.—Shelby County G. C. Geo. L. Dearing, Sec'y.

 Oct. 14.—Rising Sun (Md.) G. C. H. L. Worthington, Vice-Pres.

**DRIVERS AND TWISTERS.**

E. Reed Shaner writes that "We will not be able to make any more contributions to tournaments held this year, as our Registered Tournament Fund for 1913 has been exhausted."

If you want a delightful shock, send for the proposition just turned loose by the New Columbus Gun Club, Columbus, O. "It" arrived too late for more complete notice in this issue. Get it.

Along the lines of educating the trapshooter, Winchester Repeating Arms Co. has issued an instructive and comprehensive booklet covering all phases of division of moneys, explaining how each system should be applied to a one or two days' shoot. The rules of the Interstate Association are set forth, and these rules and

definitions are important to every trapshooter. The booklet will be sent free of charge or obligation. Send for a copy. You need it.

The Asbury Park Gun Club will hold a three-days' Easter shoot, with \$300 added money, beginning Friday, March 21, 22, 24, at their traps at the end of the Boardwalk. The three traps are on the flat beach, and with the sky as a background, the targets are clear and distinct on their entire flight, giving to our grounds the well-earned reputation of the cracks who have shot here of "The Best Ever." The program will consist of ten events each day at 15 targets each, entrance \$1.30 in each event and \$10 added money in each event. Division by Rose system, 5, 3, 2, 1. For high amateur (through the money) and high professional, ten events both days, 17-jeweled Waltham, 20-year guaranteed gold watch. Monday, March 24, miss-and-out sweepstakes,

with privilege of re-entry until 3 P. M., entrance 50 cents; no entrance received if name is already entered in office; prize, entire entrance, less targets; \$10 added by club and divided Rose system, 6, 4, 3, 2, 1. Sweepstakes at doubles at 3:10 P. M., 15 doubles, entrance \$1.50, three prizes. "Jersey Shore" championship (to be shot at Easter each year), 50 targets, entrance \$2, for a \$50 cut-glass punch bowl and other valuable cups. Lunch will be served on the grounds. Bring your best clothes and girl; dance Monday night at Casino. Ship shells by Adams or U. S. Express to Life Saving Station, Asbury Park, N. J. The management reserves the right to postpone any day's events on account of inclement weather, to next clear week day following the dates scheduled. See special train and rate schedule to Asbury Park for Easter.

At the annual meeting and election of officers held by the Keystone Shooting League it was decided to

## Remington-UMC

### "Beats All Out Doors"

AT FIRST STATE SHOOT OF 1913

**And Follows With Great Indoor Victory Of Year At Madison Square Garden**

**Florida Shooters Make Top Scores With "Perfect Shooting Combination"**

This is the way the winners at the Florida State Shoot, held at St. Petersburg, Fla., Feb. 19-21, started the *Remington-UMC* list of State Championships for 1913:

**Championship of Florida:** Won by D. W. Budd of St. Petersburg, 93 x 100, shooting *Remington-UMC* Autoloading Shotgun and Arrow Speed Shells.

**High Amateur Average:** Won by R. H. Bartells of St. Petersburg, 447 x 500, shooting a *Remington-UMC* Autoloading Shotgun. E. H. Eubanks tied for 2d Amateur Average, 445 x 500, shooting *Remington-UMC* Autoloading Shotgun.

**100 Straight With Nitro Club Wins International Indoor Championship**

There is no record in trapshooting annals of any more decisive clean-up than that achieved by shooters of *Remington-UMC* at the Third Annual International Trapshooting Tournament at Madison Square Garden, New York City, Feb. 27 to Mar. 5. Read the particulars in outline.

**International Indoor Amateur Championship:** Won by R. L. Spotts of New York, with 100 clean breaks, shooting *Remington-UMC* Speed Shells.

**2d.** Tied for by A. L. Burns of Mamaroneck, N. Y., and A. B. Brickner of Newton, N. J., with 94 x 100, both shooting *Remington-UMC* Speed Shells. Mr. Burns won in the shoot off, 22 x 25. (Mr. Brickner was the only amateur to break 50 straight in the qualifying rounds.)

**Amateur Long Run:** Made by R. L. Spotts, 123 straight with *Remington-UMC* Speed Shells—a new indoor record.

**H. H. Stevens Outshoots All Professionals:** With a *Remington-UMC* Pump Gun and Nitro Club Speed Shells, Mr. Stevens broke all indoor records for professional long run with 163 straight, scored 246 x 250 in the qualifying rounds (all other professionals averaged 25 birds behind this score—the nearest being 236 x 250), 342 x 350 on all targets, and 96 x 100 in the finals—losing first by but one bird.

**Eight of the Ten Amateurs to Qualify at the Garden, shot *Remington-UMC* Speed Shells**

**5,000 more trapshooters used *Remington-UMC* Speed Shells in 1912 than used any other one make. Indications point to an even better showing for 1913**

**REMINGTON ARMS—UNION METALLIC CARTRIDGE CO.**  
 299-301 Broadway :: :: :: :: New York City

hold the sixth annual target tournament of the club on May 1 and 2. Efforts this year will be made to make the tournament one of the biggest two-day affairs in the country. The election of officers resulted in Walter H. Sterling being chosen President; I. W. Budd, Vice-President; Frank M. Eames, Secretary; E. R. Johnson, Treasurer; W. A. Hendrickson, First Field Captain; W. H. Wolstencroft, Second Field Captain, and J. F. Pratt, Official Scorer. The Board of Directors will consist of Frank M. Eames, H. L. David and P. F. du Pont. The Handicap Committee will include Walter H. Sterling, W. A. Hendrickson, W. E. Lockwood, J. F. Pratt and E. R. Johnson.

The eighth annual tournament of the East Millstone Gun Club, East Millstone, N. J., and also for the championship of Somerset county, will be held on Saturday, March 29. Shooting starts at 10 A. M. The program will consist of eleven events. Nos. 1 to 7 will be at 15 targets each, entrance 75 cents in each event. No. 8 will be at 25 targets, entrance \$1. Event Nos. 9 and 10 will be at 25 targets each for the county championship, entrance \$1.50 in each event; for the championship \$2 for residence only. The winner of the county championship will hold the Fleischman cup for one year and a solid gold medal permanently. In event No. 11 there will be three prizes. Money will be divided Rose system, 5, 3, 2, 1. Train leaves New Brunswick at 7:55 A. M. Automobiles will meet train leaving Hudson Terminal at 8:30 A. M., and arriving at New Brunswick at 9:29 A. M. via Pennsylvania R. R.

W. G. BEECROFT.

The Southwestern Handicap.

THE Interstate Association's first Southwestern Handicap Tournament will be held at San Antonio, Texas, April 8, 9 and 10, under the auspices of the San Antonio Gun Club.

Nestled in the heart of the San Antonio river bottom, with the Salado River to the east, the Medina on the south, but two miles from a cluster of beautiful springs that jointly form the river that bears its name, San Antonio, one of the oldest cities in the United States, can boast of a history that made the State of Texas famous. There is located the sacred Alamo, a monastery erected in 1736 by the early monks from Spain who were searching the Southland for the El Dorado, behind whose walls Colonel Travis, Davy Crockett, Bowie and the other patriots who gallantly defended them were immolated on the altar of Texas liberty, and whose deaths paved the way for the civilization of the Southwest, with more missions of ancient architecture dotting the course of the beautiful river for many miles. For many years this charming city was the outpost of civilization, and from this point all the freight designed for the deeper Southwest was distributed among the many settlements that afforded a foothold for the ranchman. The advent of the railroads but intensified its importance, which was recognized by the Government in that it has erected the handsomest military post in this country, Fort Houston, where the headquarters of the Department of Texas is situated.

Let not the reader imagine for one moment that the visitor to this charming city will be obliged to camp on the banks of its charming streams and hold his bacon against the embers of a camp-fire, for he it is known that long since the adobe buildings have given way to the skyscraper, and the hotels of this city have become famous for their magnificent quarters as well as famed for the excellence of their cuisines, and the visiting shooters can be assured of not only being comfortably housed and properly fed, but the vast numbers of places of amusement are more than adequate to satisfy the most blasé of travelers.

There are splendid country clubs equipped with golf links, a splendid ball park, where teams of the Texas League fight their battles, and ten miles south can be found Mitchell's Lake, a duck marsh that has become famous for its feathered inhabitants. Three miles to the east of Mitchell's Lake there is Blue Wing Lake, teeming with bass and croppie, and where ducks can always be found in large quantities during the duck season.

San Antonio has always been famous for trap and rifle shooting, having entertained large aggregations of trap shots as early as 1896, when the first midwinter tournament was held. The citizens of this city put up a purse of \$2,000 at that tournament, as well as that of 1897, and on both occasions the trapshooting talent of the United States met in the grandest tournaments ever given.

Once more the Alamo City extends her hospitable hands and will welcome the trapshooting fraternity to attend the Southwestern Handicap, which will be held April 8 to 10, inclusive. One thousand dollars or more in cash will be added to the purses, and all visitors are assured of the best the country affords. This tournament will be under the auspices of the Interstate Association and the San Antonio Gun Club, an organization composed of the best of the Alamo City's young men, and nothing will be spared to make this the greatest event of its kind for the year.

The officers of the gun club are young and energetic, and the grounds the best in the State, having been selected with a view to having a clear sky background, and are easily reached by street car transportation or automobile.

CONDITIONS.

One hundred targets, unknown angles, handicaps 16 to 23yds., high guns—not class shooting. Two hundred

dollars added to the purse. The number of moneys into which the purse will be divided will be determined by the number of entries. Entrance money \$10, the price of targets being included.

First Money.—The winner of first money is guaranteed \$200 or more; the winner of second money is guaranteed \$150 or more, and the winner of third money is guaranteed \$100 or more. If first, second and third moneys fall below these amounts the difference will be made good by the Interstate Association.

A trophy will be presented by the Interstate Association to the amateur contestant who makes the highest score.

Regular entries must be made at the cashier's office, on the shooting grounds, before 5 P. M., Wednesday, April 9.

Penalty entries may be made after Wednesday, April 9, up to the time the first gun is fired in event No. 5, Thursday, April 10, by paying \$15 entrance—targets included.

DIVISION OF MONEYS.

Regular program and double target event, Rose system, ratio points, 5, 3, 2, 1.

Optional sweepstakes, percentage system, 40, 30, 20 and 10 per cent., class shooting. Ten (10) entries and under, three moneys, 50, 30 and 20 per cent.

To be eligible for the Squier money-back system a contestant must compete in all regular program events.

The special event at double targets, the Preliminary Handicap and the Southwestern Handicap are separate from the regular program, and it is optional with the contestant whether or not he makes entry for them. The Squier money-back system does not apply to the double target event, the Preliminary Handicap and the Southwestern Handicap.

Division of moneys in the Preliminary Handicap and the Southwestern Handicap (high guns win, not class shooting):

1 to 10 entries, two moneys—60 and 40 per cent.

11 to 20 entries, four moneys—40, 30, 20 and 10 per cent.

21 to 30 entries, six moneys—30, 20, 15, 13, 12 and 10 per cent.

31 to 40 entries, eight moneys—25, 20, 15, 12, 10, 8, 5 and 5 per cent.

41 to 50 entries, ten moneys—20, 18, 14, 11, 10, 8, 5, 4 and 3 per cent.

51 to 60 entries, twelve moneys—20, 16, 13, 10, 9, 7, 6, 5, 4, 3 and 2 per cent.

61 to 70 entries, fourteen moneys—18, 15, 12, 10, 9, 7, 6, 5, 4, 3, 2 and 2 per cent.

71 to 80 entries sixteen moneys—16, 14, 11, 9, 8, 7, 6, 5, 4, 3, 2, 2 and 2 per cent.

81 to 90 entries, eighteen moneys—15, 13, 10, 8, 8, 7, 6, 5, 4, 3, 3, 2, 2 and 2 per cent.

91 to 100 entries, twenty moneys—14, 12, 9, 8, 7, 7, 6, 5, 4, 3, 3, 2, 2, 2 and 2 per cent.

101 to 110 entries, twenty-two moneys—13, 11, 9, 8, 7, 6, 5, 5, 4, 3, 3, 2, 2, 2, 2 and 2 per cent.

111 to 120 entries, twenty-four moneys—12, 10, 9, 8, 7, 6, 5, 4, 3, 3, 3, 3, 2, 2, 2, 2 and 2 per cent.

121 to 130 entries, twenty-six moneys—11, 10, 9, 8, 7, 6, 5, 4, 3, 3, 3, 3, 2, 2, 2, 2, 2 and 2 per cent.

131 to 140 entries, twenty-eight moneys—10, 9, 8, 7, 6, 5, 4, 3, 3, 3, 3, 3, 3, 2, 2, 2, 2, 2 and 2 per cent.

141 to 150 entries, thirty moneys—10, 9, 8, 7, 6, 5, 4, 3, 3, 3, 3, 3, 3, 2, 2, 2, 2, 2, 2 and 1 per cent.

151 to 160 entries, thirty-two moneys—10, 9, 8, 7, 6, 5, 4, 3, 3, 3, 3, 3, 2, 2, 2, 2, 2, 2, 2, 2 and 2 per cent.

161 to 170 entries, thirty-four moneys—10, 9, 8, 7, 6, 5, 4, 3, 3, 3, 2, 2, 2, 2, 2, 2, 2, 2, 2, 2 and 2 per cent.

171 to 180 entries, thirty-six moneys—10, 9, 8, 7, 6, 5, 4, 3, 2, 2, 2, 2, 2, 2, 2, 2, 2, 2, 2, 2 and 2 per cent.

181 to 190 entries, thirty-eight moneys—10, 9, 8, 7, 6, 5, 4, 3, 2, 2, 2, 2, 2, 2, 2, 2, 2, 2, 2, 2 and 1 per cent.

191 to 200 entries, forty moneys—10, 9, 8, 7, 6, 5, 4, 3, 2, 2, 2, 2, 2, 2, 2, 2, 2, 2, 2, 2 and 1 per cent.

201 and 210 entries, forty-two moneys—10, 9, 8, 7, 6, 5, 4, 3, 2, 2, 2, 2, 2, 2, 2, 2, 2, 2, 2, 2 and 1 per cent.

211 to 220 entries, forty-four moneys—10, 9, 8, 7, 6, 5, 4, 3, 2, 2, 2, 2, 2, 2, 2, 2, 2, 2, 2, 2 and 1 per cent.

221 to 230 entries, forty-six moneys—10, 9, 8, 7, 6, 5, 4, 3, 2, 2, 2, 2, 2, 2, 2, 2, 2, 2, 2, 2 and 1 per cent.

231 to 240 entries, forty-eight moneys—10, 9, 8, 7, 6, 5, 4, 3, 2, 2, 2, 2, 2, 2, 2, 2, 2, 2, 2, 2 and 1 per cent.

241 to 250 entries, and over, fifty moneys—10, 9, 8, 7, 6, 5, 4, 3, 2, 2, 2, 2, 2, 2, 2, 2, 2, 2, 2, 2 and 1 per cent.

Briefly summarizing the foregoing it will be noted that two places are created for each ten entries or fraction thereof up to two hundred and fifty.

Monday, April 7, will be practice day, shooting to begin at 1 P. M. There will be five events of 20 targets each, entrance \$2 per event. Rose system, 5, 3, 2, 1. Sweepstakes optional. The Squier money-back system does not apply to the above events.

Tuesday, April 8, will be the first day. The program will consist of ten events at 15 targets each, entrance \$1.40 in each event. Extra entrance, Squier money-back system \$1; total entrance \$15. Special event, 25 double targets, entrance, \$2. Open to amateurs only. Manufacturers' agents, paid representatives, etc., may shoot in the above events for "targets only."

Wednesday, April 9, will be the second day. The program on this day will consist of six events, five at 20 targets each, entrance \$1.80 in each event; extra entrance, Squier money-back system, \$1; total entrance for

five events \$10. Event No. 6 will be the Preliminary Handicap, 100 targets, entrance \$7, targets included, handicaps 16 to 23yds., high guns—not class shooting, \$100 added to the purse. The amateur contestant who makes the highest score will receive a trophy, presented by the Interstate Association. Regular entries must be made at the cashier's office, on the shooting grounds, before 5 P. M., Tuesday, April 8. Penalty entries may be made after Tuesday, April 8, up to the time the first gun is fired in event No. 5, by paying \$10 entrance, targets included. Entries are not transferable, and entrance money cannot be withdrawn after handicaps have been allotted.

Thursday, April 10, will be the third. The program on this day will consist of six events, five at 20 targets, entrance \$1.80 in each event; extra entrance, Squier money-back system, \$1.00; total entrance for the five events \$10. Event No. 6 will constitute the Southwestern Handicap, 100 targets, entrance \$10, targets included, handicaps 16 to 23yds., high guns—not class shooting, \$200 added to the purse. Regular entries must be made at the cashier's office, on the shooting grounds, before 5 P. M., Wednesday, April 9. Penalty entries may be made after Wednesday, April 9, up to the time the first gun is fired in event No. 5, by paying \$15 entrance—targets included. Entries are not transferable, and entrance money cannot be withdrawn after handicaps have been allotted.

Hercules Gun Club.

TEMPLE, Pa., March 8.—The wind played havoc with the targets in the midst of the snow storm. The scores were exceptionally well, considering the unfavorable weather conditions. W. S. Behm, of Esterly, landed the top-notch honors. J. J. Marberger and Lee Wertz were close to his heels. Behm broke 103; Marberger, 100, and Wertz 97 out of 110, which included 5 pairs of doubles. Behm shot straight in three events. Marberger shot straight in the double event. This bunch will have the boys guessing at the coming registered tournaments during the season. Wertz is getting into form again. C. C. Prutzman shot a good clip, considering his heavy iron-work for a whole week.

Wertz, Marberger and Behm shot straight in the fourth event. John will have a crow to pick with the boys when he shoots straight again in the double event.

Van de Sande, of Lebanon, Pa., paid his respects to the boys with 84 out of 100, which is going some. Young, of Reading, shot well with 86 out of the whole program. John Engle, secretary of the Denver Gun Club, shot the full program, landing 78 to his credit. Nevergold, of Birdsboro, scored 48 in five events. Linsenberger, one of the early sixties entered to-day as a pleasure in "Ye days of long ago"—making 42 out of his 100 birds. Yoder, Kissinger, Schaeffer and Torney are beginners at the traps and need some encouragement. Much credit is due them on their first attempt. Jacob Folk, of Temple, had charge of the traps and kept them working to perfection. Ed. H. Adams was kept away on account of business. Geo. B. Bortz, who is afflicted with rheumatism, scored 68 to his credit. It must have lessened his pain to score that many.

The girl on Eighth street should show her courtesy to coach in these contests, when her best friend lands high honors. "Good for Walter." We wish him luck all the same.

The tournament for April 5 will very likely prove a great success. All lovers of target smashers are cordially invited.

The scores:

Table with 3 columns: Name, Shot at, Broke. Lists scores for Prutzman, Lee Wertz, Marberger, Van de Sande, etc.

Buffalo Audubon Club.

BUFFALO, N. Y., March 15.—W. R. Crosby and Geo. Ginn were guests of the Audubon Club at their second regular shoot for March, and incidentally the former was high man with 93 out of 100 shot at. "Remington" and Kommel were right after him with 90 and 89 respectively. Though a windy and stormy day, twenty-eight shooters were in attendance. Scores follow.

Table with 2 columns: Name, Score. Lists scores for Wooton, Kelsey, Hammond, Blackmer, Reed, Ebberts, Rommel, Moshier, Lawson, Dunville, Crosby, Covert, Fish, Broderick, Jerauld, Singer, Holliday, Anderson, Smith, Remington, Fletcher, Ward, Seymour, Ransom, Gillespie, Bates.

**New York A. C.**

PELHAM MANOR, N. Y., March 15.—For the first time this season Tom Lenane got away with the major portion of events at Travers Island. He smashed fast enough to get Stoll trophy after a tie with Fred Pelham in the 100-scaler handicap. Fred Pelham won leg on monthly cup after shooting off with Brandenburg and Church, and also won the 100-saucer scratch event. Brandenburg, a new name on the schedule, won the Robinson trophy after crowding some regulars hard in other events. Through some peculiar circumstance Ralph Spotts won only one event, and that a special 25-saucer handicap in which he drew a full from one helpin'. The scores:

Monthly cup, 25 birds, handicap:

J I Brandenburg ... 5 25	A J Brooks ..... 1 22
G F Pelham ..... 3 25	A J McManus .... 3 22
T Lenane ..... 3 24	Conrad Stein ..... 0 21
R L Spotts ..... 0 24	J P Sousa ..... 3 19
D F McMahon ..... 0 22	W B Ogden ..... 2 19

Shoot-off won by Pelham.

Stoll trophy, 25 birds, handicap:

Lenane ..... 3 25	Stein ..... 0 21
Pelham ..... 2 25	Sousa ..... 3 21
Spotts ..... 0 23	McMahon ..... 0 20
Church ..... 3 23	Ogden ..... 2 20
Brooks ..... 1 22	Brandenburg ..... 5 18
McManus ..... 3 22	

Shoot-off won by Lenane.

Robinson trophy, 25 birds, handicap:

Brandenburg ..... 5 24	Spotts ..... 0 20
Pelham ..... 3 24	Sousa ..... 3 20
Lenane ..... 3 23	Ogden ..... 2 19
Brooks ..... 1 22	McManus ..... 3 18
Church ..... 3 21	Stein ..... 0 17
McMahon ..... 1 21	

Won on second shoot-off by Brandenburg.

Travers Island trophy, 25 birds, handicap:

Lenane ..... 2 25	Stein ..... 2 21
Sousa ..... 3 25	Spotts ..... 0 21
Pelham ..... 4 25	Brooks ..... 1 20
Brandenburg ..... 5 25	McManus ..... 3 20
Church ..... 3 22	Ogden ..... 2 18
McMahon ..... 1 22	

Shoot-off won by Lenane.

Handicap, 100 birds:

Lenane ..... 11 98	Brooks ..... 4 86
Pelham ..... 12 100	McMahon ..... 2 85
Brandenburg ..... 20 93	McManus ..... 12 82
Church ..... 12 91	Stein ..... 2 80
Spotts ..... 0 88	Ogden ..... 8 76
Sousa ..... 12 85	

Scratch won by Pelham; handicap won by Lenane.

Distance handicap, 25 birds:

Church ..... 18 22	McMahon ..... 21 16
Spotts ..... 21 20	Brooks ..... 20 16
Pelham ..... 17 19	Brandenburg ..... 16 15
Lenane ..... 19 17	Stein ..... 18 15
Ogden ..... 20 16	McManus ..... 18 13
Sousa ..... 13 16	

Special handicap, 25 birds:

McMahon ..... 0 24	Spotts ..... 0 20
Lenane ..... 1 24	Brooks ..... 1 18
Stein ..... 2 24	Church ..... 1 19
Brandenburg ..... 5 23	McManus ..... 3 15
Pelham ..... 2 21	Sousa ..... 3 14
Ogden ..... 2 20	

Special handicap, 25 birds:

Spotts ..... 1 25	Brooks ..... 2 21
Brandenburg ..... 6 25	Lenane ..... 2 20
Pelham ..... 2 22	Stein ..... 3 20
Church ..... 2 22	Sousa ..... 4 18
McMahon ..... 0 21	

**Second Birmingham Handicap Tournament.**

THE second Birmingham handicap tournament will be held at Birmingham, Ala., March 25 and 26, under the auspices of the Birmingham Gun Club. There will be \$500 cash added money. A trophy for winner of Grand Birmingham handicap; also trophy for winner of Preliminary. A sterling souvenir for high professional in each handicap. Make entries for all day; cashier will refund entrance money for all events in which you do not participate. Lunch can be had on the grounds.

Monday, March 24, will be practice day. The traps will be opened at 10 o'clock A. M. At 3 P.M. the double-championship of the South will be shot at 25 pairs, \$4 entrance. Shot in two events. Money divided on per centage system, five equal moneys.

First day, March 25: Ten events of 20 targets; entrance \$2; \$15 added money each event. Preliminary Handicap will be at 100 targets (shot in strings of 25), entrance \$2, \$25 added money each event. Money will be divided percentage system, four equal moneys, 25, 25, 25 and 25 per cent. in all events. Shooting will begin promptly at 9 o'clock A. M.

Second Day, March 26: Ten events, of 20 targets each, \$2 entrance, \$15 added money. Grand Birmingham Handicap will comprise events Nos. 11-14, 25 targets each, \$2 entrance, \$25 added money. Handicap, distance, 16 to 23yds. Winner of this handicap will be awarded a handsome sterling trophy. Money will be divided per centage system, four equal moneys, 25, 25, 25 and 25 per cent. in all events. Shooting will start promptly at 9 o'clock.

This tournament is registered with the Interstate Association, and \$100 is donated by them, which goes to make up the added money. The 200 targets shot from 16yd. line will count on the yearly average. The gold badge, which goes to the winner of the Preliminary Handicap, is donated by Chas. Schwend. The sterling trophy, which goes to the winner of the Grand Birmingham Handicap, is given by the Birmingham Gun Club. The two sterling souvenirs cannot be won by the same professional.

**Manhasset Bay Y. C.**

PORT WASHINGTON, L. I., March 15.—Nine wind-proof saucer destroyers faced a west wind here to-day and ripped holes in old Boreas. On total of 50 for Stevens trophy, C. W. Berner outguessed the gale and cracked 47 slants. H. Berner pulled up in second place with 45, while J. W. Alker and W. S. Silkworth tied for last money under the wire on 44. In shoot-off for January cup between B. G. Loomis (Cyclone in Boots) and Jim Alker, the result was another tie at 22. In the miss-and-out Alker stabbed the pig for the bacon. Scores:

Events:	1	2	3	4	5	6
W S Silkworth.....	8	11	0 23	0 25	0 19	0 41
C W Berner.....	8	12	3 22	3 22	3 25	6 47
J W Alker.....	12	3 23	2 23	2 21	4 43	
E A Sierck.....	7	10	3 22	3 24	3 20	6 41
B G Loomis.....	..	..	2 14	2 21	2 21	4 42
W E Lindeman.....	5	10	7 22	7 22	7 20	14 42
D E Smith.....	..	..	2 21	2 19	2 20	4 39
C M Gould.....	6	9	4 21	4 19	4 21	8 40
H Berner.....	7	10	5 24	5 23	5 22	10 45

Shoot-off for January cup: B. G. Loomis 22, J. W. Alker 22.

Second shoot-off: Won by Alker.

No. 1 was a 10-bird scratch event; No. 2, a 15-bird scratch event; No. 3 a 25-bird handicap; No. 4 was for monthly cup, 25 targets, handicap; No. 5 for yearly prize, 25 targets, handicap; No. 6, 50 targets, handicap, for Stevens trophy.

The invitation handicap clay pigeon shoot will be held Saturday, March 29, at 1 P. M., and will be at 100 birds from 16yds. An allowance of added birds will be given to all those who, in the opinion of the committee, are entitled to same. Prizes will be awarded to the three high guns, and a prize to the best scratch score. The same person cannot win two prizes. An entrance fee of \$4 will be charged, covering cost of birds. Optional sweepstakes figured on each 25 birds. Entrance \$4. Money divided 60, 25, 15. No practice after 1 P. M. Shells of all popular loads can be purchased at the club house. In order to be sure of receiving correct handicap you are requested to send in your entry prior to March 27.

Trains leave Pennsylvania station 11:07 A. M., 12:17 P. M., and 1:15 P. M. Send entries to James W. Alker, Chairman Shooting Committee, at 29 Broadway, New York.

# — 1912 — A YEAR OF SUCCESSES FOR Peters Ammunition

"Where quality counts they win"—and quality counts EVERYWHERE. The year 1912 has been one continuous round of victories for users of Peters Shells and Cartridges—far too numerous to record here in full. The few items that follow will suffice to indicate the kind of work that can be done, and is being done every day with the P brand:

### "Steel Where Steel Belongs" Shells

WON IN 1912:

Grand American Preliminary Handicap,  
Grand American High Amateur Average,  
World's Amateur Indoor Trapshooting Championship,  
Texas State Championship,  
Arkansas State Championship,  
Pennsylvania State Championship,  
Virginia State Championship,  
Vermont State Championship,  
Colorado, New Mexico and Wyoming State Championship,  
E. C. Challenge Cup, twice by record scores,  
High General Average at Post Season Tournament.

### Peters Semi-Smokeless and Smokeless Cartridges

WON IN 1912:

3 out of 5 Matches at Zettler Rifle Tournament,  
5 out of 6 Matches at .22 Indoor League Tournament,  
8 out of first 12 scores of American Team in the International Small-Bore Match, including 1st, 2nd and 3rd,  
6 out of 10 Revolver Matches at Sea Girt Military Tournament, including Grand Aggregate,  
5 out of 6 United States Revolver Association Outdoor Championships for 1912, including Two New World's Records.  
New Inter-Scholastic Record, 980 out of 1,000,  
Astor Cup (Inter-Scholastic League).

### THE DINNER.

And that dinner was some rhetorical lunch. They couldn't "block the seer," Doremus, and he pulled a play on the names of the club members, by virtue of which he endeavored to show why Du Pont Gun Club should be the best in the world. He got away with it so well that the waiters began serving ice cream in blue rocks. J. T. Skelly said a lot of things that were not "lost" on the audience, and up to this time no "dead" ones appeared among the suppers. A recitation by Dr. Willis Linn and an original verse by George Frank Lord led up to some "for targets only" vaudeville; anyhow, the enjoyment of the occasion is best expressed by the remarks of one of the last to leave—one who had paid—said he: "I'm no great shooter like Banks, German, Skelly and the rest of the crowd to whom 'pull' and 'dead' are synonymous, but if I knew I couldn't put two pieces of coal out of a big shovel into a 30-inch furnace door at two yards, I'd have shot so as to get into this browsing pasture—s'grait, s'fine, s'pully—g'nite, gladameecha.

### Baltusrol Golf Club.

NEWARK, N. J., March 15.—De Profundis gasped the targets as each shooter called pull to-day, for fog made the shooter a stranger to the clay that hustled close to the hand that blue rocks the atmosphere. A lot of anti-fog scores were made. B. C. Fincke tripped away with two events, the March cup handicap (2) 42, and Cowperthwaite trophy in doubles (1) 16. Take-home trophy went to Lloyd (1) 23, while club championship leg stumbled to G. A. Williams on 24.

Next week the home team will shoot a match with Essex Country Club. To-day's scores:

March cup, 50 birds, handicap:			
B C Fincke .....	2 42	C H Stout .....	12 37
G A Williams .....	2 40	Dr D W Granberry. 0	33
S H Browne .....	0 40	H A Barclay .....	10 29
T W Lloyd .....	0 35		

Take-home trophy, 25 birds, handicap:			
T W Lloyd .....	1 23	S H Browne .....	0 20
Dr D W Granberry. 0	21	H A Barclay .....	5 18
G A Williams .....	0 21	C H Stout .....	6 17
B C Fincke .....	1 21		

Club championship trophy, 25 birds, scratch:			
G A Williams .....	24	T W Lloyd .....	17
B C Fincke .....	21		

Cowperthwaite trophy, 12 doubles:			
B C Fincke .....	1 16	T W Lloyd .....	0 13
S H Browne .....	0 15	G A Williams .....	1 12
C H Stout .....	6 15	Dr D W Granberry 0	11

WILMINGTON, Del., March 15.—To the victors belong the spoils, particularly in trapshooting, where one must spoil targets to become victor, and the greater the spoils, the greater the chances of being victor, and so it went at the great big jolly reunion at Du Pont Gun Club to-day, and there were fifty-three victors, and to each came a fat, luscious dinner that satisfied mentally and physically. Imagine it, if you are properly endowed with imaginative powers, 105 shooters at a club shoot, and on a rainy day at that! The entrants were divided into two teams—Reds and Blues. Captain W. J. Highfield led the Reds, while H. P. Carlon headed the Blues.

Sixty-two shooters registered their names on the score sheets as members of the Red team, while fifty-three was the strength of Captain Carlon's regiment. Thus a total of 105, all told, took part in the afternoon's engagement, which resulted in an easy win for the Reds by the score of 1,005 to 884. The conditions provided that no matter how many men there were on each team, only an equal number of scores were counted. Thus of the sixty-two Red hunters, only the scores of the fifty-three high men were counted, and to each of these went a full feed at Hotel Du Pont.

Scores did not rule high, the weather conditions not being favorable to straight scores. In fact, in the team race only one straight score of 25 was made, and that was hung up by J. T. Skelly. Four 24s, seven 23s and nine 22s, made up a total of twenty-one men who broke 22 or better out of 25, an average way below what is to be expected generally from the high class of shooters who were present.

Those who scored 20 or better for the Red team were: J. T. Skelly 25, J. H. Minnick, L. L. Jarrell, L. Z. Lawrence and H. Linn Worthington 24; L. R. Beauchamp and W. M. Armstrong, 23; Edward Banks, Vernon Williams and W. M. Hammond, 22; Dr. H. G. Buckmaster, J. G. Highfield, J. B. Grier, E. R. Galvin and W. F. Jensen, 21; J. A. McMullen, M. Mitchell, Clyde Leedom, J. A. McKelvey, W. Hinkson, Dr. Arthur Paterson and W. Swayne, 20.

The men who scored 20 or better for the Blue team were: L. S. German, W. M. Foord, W. S. Colfax, Jr., P. D. Guest and D. J. Dougherty, 23; E. C. Harrington, C. T. Martin, J. P. Groome, C. E. Springer, A. B. Richardson and D. Lindsay, 22; N. K. Smith, F. H. Springer, H. P. Carlon, J. J. Magahern and E. E. du Pont, 21; S. J. Newman, W. A. Joslyn, G. H. Simon, H. T. Reed and H. C. McClane, 20.

A special 100-target race was shot after the team race, several prominent professionals taking part. Neaf Apgar, of New York, and H. L. Worthington, of Rising Sun, Md., tied for high on 94; L. S. German and W. S. Colfax, Jr., were next with 92; A. B. Richardson and J. A. McKelvey came in third place with 90.

The other scores were: Edward Banks and W. N. Armstrong, 86; W. M. Hammond and E. A. W. Everitt, 84; J. T. Skelly, 82.

The scores made by the 105 shooters who took part

**Indianapolis Gun Club.**

INDIANAPOLIS, Ind.—The tournament of the gun club on March 8 drew an attendance of twenty-one shooters, eighteen of whom shot through the entire program. In addition, there were trapped 950 targets in practice and extras which do not appear in the report. The program called for ten events of 15 targets each, entrance \$7.50 and \$1.50 for targets. Purses were divided Jack Rabbit on the basis of 5 cents per target broken, the balance to the best guns, 50, 30 and 20 per cent. Geo. Wagner, of Peru, Ind., all out of practice and with a lot coming to him, lost but 3 out of the first 195, and finished at the head of the amateurs with 140 out of 150. Kenneth Jewett, of St. Paul, Ind., chased Wagner all the way—indeed outshot him in the second half—and finished but one point back. Edmonson was hardly up to his best form, yet posted a good 90 per cent. Parry, just returned from California, out of practice and trainsore, also ran the best he could. Others were good in spots, but lacked in the continuity of effort, which achieves results. The next time up some of our real home-grown ones will perhaps show the way to their country cousins. No one profited much in winnings, nor could one lose much, while the good fellowship which prevailed, was more than worth the cost. The dinner served by Mrs. Waite was enough to separate a man from his home if she would but take him as a boarder.

Wagner .....	Shot at. Broke	150	140	Appel .....	Shot at. Broke	150	118

**Stone Harbor Country Club.**

CAPE MAY COURT HOUSE, N. J., March 14.—One of the best blue-rock matches witnessed in this section of the State will be held on the Stone Harbor Country Club range, adjoining the golf links on the Stone Harbor Terminal Company tract at this place, March 22. Prominent sportsmen will be present. There will be a good delegation from Philadelphia clubs and a number of the professionals representing the different powder and gun companies will be present to give the amateurs a few pointers. The club has secured a mast from the wreck of the Margaret, which recently came ashore at Stone Harbor, and will use it for a flag pole on the club grounds. The club house has adopted as its emblem the fish-hawk, and a large hawk with a Cape May weakfish in its talons, embellishes the pennant, which will be raised on the 22d. There are four nests of the fish-hawks on the grounds, one on a 40ft. pole in the club house yard measures 4ft. in diameter, and is 3ft. high. The directors are having other poles about the grounds for the nesting fish-hawks.

At a practice shoot among the members this week, in preparation of the coming event, Dr. John S. Douglas, the president of the club, was high gun, breaking 40 out of 50. Scores:

J Douglass .....	Shot at. Broke	50	40	F Mixner .....	Shot at. Broke	40	27
C Springer .....	50	36	J Ramsey .....	40	23	40	23
L Champion .....	50	34	H Townsend .....	30	18	30	18
J Hall .....	50	28					

**Jersey City Gun Club.**

JERSEY CITY, N. J., March 15.—We had another good attendance to-day at the Jersey City Gun Club regular Saturday shoot, and while the day was quite hazy, there was no wind at all to make the birds cut up capers, the result being some very decent scores. H. E. Dickerman, of the Chicago Gun Club, paid us a visit to-day, the first for a long time, and at the finish led the field with an average of 91 per cent. for the day, which was going some. George Piercy was second with 83 per cent. Dixon third with only 81 per cent. Harry Burlington won the leg on the club trophy with 47 out of 50. The scores:

Piercy .....	21	23	19	22	23	21	17	..	..
Dr Groll .....	16	23	13	18	12	17	21	..	..

On the last Saturday in each month until further notice our club is going to present to the two highest scores made by members, counting the first 100 targets shot at, with added bird handicap, two fine take-home prizes, without any cost at all to the shooters. The first shoot for these prizes will be on March 29, and the last Saturday in each month thereafter. Be sure to come out every Saturday, so as to be in form for that particular day. With our two sets of traps we can take care of all who wish to spend an afternoon breaking the clays. The entertainment committee is always on the job, and pays special attention to visitors, of whom we have several every Saturday. Targets, 1 cent each.

**Asbury Park Wants Westy Hogan Shoot.**

WESTY HOGANS attending the annual Sportsmen's Show in New York city held a meeting at the Prince George Hotel on March 2 and discussed plans for this year's tournament in September.

Probably the most important matter under consideration was an invitation from the Chamber of Commerce of Asbury Park, urging the Hogans to hold their 1913 tournament at their popular New Jersey resort. The matter was thoroughly discussed, but no definite action was taken. Another meeting of the Hogans will be held in Philadelphia probably early in May, and then the city which it to get this year's tournament will be decided upon.

The prospects for another successful Westy Hogan shoot are exceedingly bright. Atlantic City, as usual, is after the tournament, and it is believed that should it be held there this year the shooting will be from one of the piers. The Hogans assure their many friends that if the tournament goes to Atlantic City every effort will be made to have it held on one of the piers. The dates selected by the tournament committee for this year's shoot, Sept. 16, 17, 18, 19, 20 were approved at the recent meeting.

# Parker Gun Victories in 1912

THE highest official average for the season of 1912 at both **Single and Double Targets** was made with **Parker Guns**.

As on every previous occasion, the bona fide **Championship of America** was won with a **Parker Gun**, Mr. W. R. Crosby scoring 198 x 200 targets at 18 yards rise. Same man, same gun, made the **World's Record**, scoring 98 x 100 targets at 23 yards, which is a truly wonderful performance.

Small bore **Parker Guns** are recognized as the Standard Game Guns of America and are gaining in popularity every season with the most progressive sportsmen. For full information regarding guns in gauges from 8 to 28, address

Cleveland, Ohio

### Westwood (Ohio) Gun Club.

WESTWOOD, Ohio, March 15.—At the shoot to-day the club entertained John R. Taylor, of Columbus, O.; L. J. Squier, of Pittsburgh, and B. S. Williams, of Nashville, Tenn. A strong, cold wind made the conditions extremely hard, and Taylor was the only one whose score was not affected. He was high man with 95 out of 100, which included a run of 55 straight. Squier, who preceded him in the squad, made the first 25 straight which has been recorded on these grounds since the opening shoot. Taylor duplicated this in the same event, and established a ground record by breaking all in the next event. B. S. Williams was not doing his best work, partly due to a strange gun, and partly to the wind. Bohnert also shot with a borrowed gun, and his score suffered. Kuball is learning to shoot right-handed, which accounts for his fall-down, for not even the wind could have made him drop so many as he did to-day, if he had put his gun to his left shoulder. Dr. Blunden did very creditable work for a new man at the traps under the hard conditions. Schneider began to get the right dope on the targets just as the shooting came to an end, and another event would have brought him well up toward the top. Max Stopper did not do so well as usual, owing to the wind. The club will put a Stevens trophy in competition very soon, and with two trophies to shoot for, the members will lose none of their enthusiasm.

### Marine and Field Club.

GRAVESEND BAY, March 15.—Three events made up to-day's program—100 targets for leg on March cup, handicap, was won by E. H. Lott from scratch with 84 syncopated targets. Sayre took place with 78 from 8, and Camp got third with two less. Mr. Lott and S. P. Hopkins broke even with 23 on 25-target scratch event, and on shoot-off Hopkins copped the kale. On the next 25-bird scratch team shoot, Hopkins and Sayre won, after shooting off from a 45 and 50 with 46 to 42.

March cup, 100 targets, handicap:

E H Lott.....	0 84	J M Knox.....	16 70
C D Sayre.....	8 78	S P Hopkins.....	4 78
C M Camp.....	8 76		

Scratch shoot, 25 targets:

E H Lott.....	23	C D Sayre.....	19
S P Hopkins.....	23	J M Knox.....	15
C M Camp.....	20		

Match shoot, 25 targets per man, scratch:

S P Hopkins .....	23	E H Lott .....	24
C D Sayre.....	22-45	C M Camp.....	21-45

Shoot-off:

S P Hopkins .....	23	E H Lott.....	23
C D Sayre.....	23-46	C M Camp.....	19-42

SHOOTING COMMITTEE.

### New Du Pont Trophy.

TRAPSHOOTERS will be interested in the latest offer made to high average winners at clay target tournaments by the Du Pont Powder Company.

From April 1 handsome solid gold scarf pins will be given to amateur and professional trapshooters who win high averages at any advertised program shoot registered or unregistered, when the contestant uses any one of their brands of smokeless shotgun powder, either Du Pont, Ballistite, Schultze or Empire, in making the win.

If the tournament is of more than one day's duration, it is understood that the pin will be given to the high average winner for the entire tournament.

The supply of the pins is limited and only one will be given to a shooter no matter how many averages may be won by him during the year.

The pins represent a full modeled quail and are exceedingly attractive. They are sent out packed in neat leather cases which makes the gift complete and a prize well worth winning.

### Holland Gun Club.

BATAVIA, N. Y., March 13.—Our regular season does not begin till April 12, but a couple weeks ago we received a wireless from Geo. Ginn that he was coming our way with Wm. R. Crosby and to tell the boys. R. C. Kirshner and "Sim" Glover came to help us, and we had two squads and a gallery of about fifty to welcome our former townsman. It was some muddly getting to our outfit, and the wise ones wore hip boots. We had cut-glass cream pitcher and sugar bowl for high gun in two classes. Gardiner won Class A with 90, and Kinney Class B with 81. Scores, 100 targets per man:

Crosby .....	96	Kinney .....	81
Kershner .....	95	Walls .....	80
Glover .....	94	Watson .....	68
Brugman .....	81	Warboys .....	64
Gardiner .....	90	Ward .....	74
Tomlinson .....	81		

CHAS. W. GARDINER, Sec. y.

### New Hanover Gun Club.

WILMINGTON, N. C., March 14.—With a gale blowing, the following scores were made to-day. Rev. Clausen had never shot at a target before, neither has he ever done any other shooting.

Dreher, 22, 23-45; Grant, 22, 22, 21-65; Underwood, 15, 13, 14-42; Clausen, 12, 13-25.
--

**S. S. White Gun Club.**

PHILADELPHIA, Pa., March 15.—Close to two-score gunners helped the S. S. Whites celebrate their March target campaign. There was an even distribution of the trophies, for outside of Newcomb the prizes were split up between five other gunners. Newcomb won two spoons and secured a win on the Class A challenge cup. He landed a dipper for getting the best net score on 50 birds, 48, and also won the ladle offered to the individual gunner on the team match between the squads captained by J. B. Fontaine and C. S. Hand.

The two teams tied at 675 targets each, and as it was too late to decide the matter with the shotgun, the two captains resorted to the coin to decide the winner. Hand won this. This gave his team the choice of first prize, when they drew the lucky number for the trophy. Harkins secured that number, and he chose the pipe, which, with the ladle were the prizes for the two teams. Newcomb's number drew down the winner's trophy for Fontaine's team and he secured the ladle. Newcomb, too, was high man for the day, he breaking 92 out of his 100 birds. Howard Wilson finished second with 91, and this gave him a spoon.

Ford captured the dipper offered for the high total on 50, with the handicaps added, and he also secured a leg on the Class B trophy. For getting high total on 75, Hand was awarded a spoon, while McGinnity carried home the dipper offered for the visitor having the highest score with his handicap included. Waters was given a win on the Class C cup, and Stevens one on the Class D trophy. Scores:

Class A:	Handicap.	Broke.	Total
Newcomb	0	23 25 22 22	92 92
Tansey	8	23 23 17 23	86 94

**Clearview Gun Club.**

PHILADELPHIA, Pa., March 12.—Harry Fisher, with 46 dead ones out of his half century of bluerocks, led the field in the monthly target test of the Clearview Gun Club to-day, over the Darby traps. Fisher broke 24 out of his first 25 and 22 of his second. Elwell, with 43, was runner up to Fisher in the Class A competition. Leford and Shuster tied for high gun in Class B, each breaking 41. On the shoot-off to determine the spoon, the two men tied at 20. On the next extra test, Leford won by breaking 22 to Shuster's 20. Paulson, with 40 smashes, captured the Class C spoon. Scores:

Class A.—Fisher 46, Elwell 43, Bonsall 42, Leford 41.
Class B.—Leford 41, Shuster 41, Bockius 38, Fing 35, Breen 35.
Class C.—Paulson 40, Winchester 35, Brawn 28, Campbell (visitor) 35.

March 16.—The regular weekly shoot of the Clearview Gun Club, held yesterday afternoon, was O.K., sixteen shooters coming to the front and taking part and trying to beat a sixty-mile gale that swept across the traps and made the little rocks do everything. The honors of the day fell to C. E. Doolittle, who was high gun for the day, breaking 142 out of 150 in the three events of 50 targets each. In the semi-annual shoot, Doolittle and Brown were tied for high honor with 47. In the annual trophy shoot, Weedon and Brown tied with 48, Doolittle being third with 47. In the quarterly shoot, Doolittle won with a score of 48, and Hogen with 46 took second.

A number of surprises were on the program of the day. E. S. Rogers was at his old stand for the first time in three months, and targets were a new thing to him, but he got on to them before leaving the ground—42, 43 and 45 out of each 50 was not bad. Blakeslee, the most looked-for man, was not to be found—high wind, they say, John don't like Captain Freeman, another who likes the wind, was not on hand. L. J. Thorp, a new one, broke 89 out of 100. Stevens is trying a new gun. Better stay with the girl of your old love and leave new things alone. The old girl is the best one, so be good.

Event No. 1, semi-annual trophy, 50 targets, 16yds.: Burns 48, Doolittle 47, Brown 47, Weedon 45, Rogers 43, Rockwell 39, Stone 39, Noble 38, Grant 37, Dibble 37, Thorp 36, Beckley 34, Stevens 33, Tobey 31, Jones 30, Hartman 29.

Event No. 2, annual trophy, 50 targets, 16yds.: Weedon 48, Brown 48, Doolittle 47, Brown 45, Grant 45, Rogers 42, Rockwell 41, Thorp 41, Jones 40, Stone 38, Dibble 37, Noble 37, Beckley 36, Tobey 35, Hartman 34, Stevens 34.

Event No. 3, quarterly trophy, 50 targets: Doolittle 48, Hogen 46, L. J. Thorp 45, Burns 45, Rogers 45, Thorpe 44, Grant 44, L. M. Weedon 44, Stone 41, Tobey 41, Weedon 41, Stevens 40, Hartman 35.

**Knollwood Country Club.**

WHITE PLAINS, N. Y., March 15.—Allen Bole won the special 100-target shoot to-day at the Knollwood Country Club, here, with a total score of 70. He was placed on the scratch mark. M. McVoy and M. Rae tied with 67 for the second prize, the former winning on the shoot-off. The other scores were: W. H. Merrill 60, W. H. Sykes 58, E. T. Fox 55, J. Bogardus 57, F. B. Mackay 53, R. H. Hooper 48, F. Campion 47, G. Pell 44, C. Moffat 43.

**Laurel House Gun Club.**

LAKEWOOD, N. J., March 15.—Archibald J. McClure won the shoot-off for the handicap cup at the Laurel House Gun Club traps to-day by a score of 85. The sweepstakes cup was won by J. L. Bright, with high gun of 86. Others shooting included R. D. Farlee, F. F. Vanderhoef, A. J. Murphy and E. J. Duth.

# Marlin Repeating Shotguns

## Model 28, 12 Gauge, Hammerless, Take-Down

Here's the best repeating shotgun made. It's a fine appearing, beautifully-balanced gun, without any objectionable humps or bumps; it has every up-to-date feature and many exclusive advantages. Standard grade guns (No. 28 A, No. 28 B, No. 28 C and No. 28 D) have pistol grip stock; straight grip furnished on special order. They have a neater frame, more finely modeled buttstock, better lines and more style than any similar gun.

No. 28TS, "Trap Special Grade," 12 Gauge, Take-Down, Matted Barrel, 6 Shots, Weight about 8 lbs. Price, . \$26.00

No. 28T, "Trap Grade," 12 Gauge, Take-Down, Matted Ribbed Barrel, 6 Shots, Weight about 8 lbs. Price, . \$43.00

No. 28C, Grade "C" 12 Gauge, Take-Down, Matted Barrel, 6 Shots, Weight about 8 lbs. Price, . . . . . \$50.00

No. 28D, . . . . . \$100.00

Cartridge Release Button and Matted Barrel on all

Marlin Hammerless Shotguns No. 28A, \$22.60

The Model 28 hammerless trap guns provide every trap shooting requisite, in the best designed "pump gun" ever placed on the market.

No. 28T.—Special Rolled Steel barrel with raised rib, matted on top for its entire length and unequalled in shooting ability. Buttstock and forearm Circassian Walnut, finely modeled, with London oil finish, fine hand checking, bottle comb, large broad butt with hard rubber buttplate. Action parts highly polished for smooth operation. Regular buttstocks have straight grip; this grade made to order without extra charge, with straight or pistol grip stock, any length and drop within reasonable limits.

No. 28 T.S.—Provides at moderate cost a gun just right for the average trap-shooter. The barrel is handsomely matted on top for its entire length, giving a dull streak which prevents reflection of light and gives a quick, clear sight. Buttstock and forearm of American walnut, finely checked; buttstock 14 inches long, 1 3/4 inches drop at comb, 2 inches drop at heel (as in regular No. 28 T), with the large broad butt which covers more of your shoulder and keeps the shock of the recoil down to a minimum.

The Ideal Hand Book contains full information regarding powders, bullets, primers and reloading tools for all standard rifle, pistol and shotgun ammunition, tells how to measure powders accurately, and gives information on everything relating to loading and reloading of ammunition. 160 pages; free for 3 stamps postage. The Marlin Firearms Co.

You want its advantages: **Hammerless**—all operating parts contained inside the frame or receiver; **Solid Steel Breech**—inside as well as outside, so that a defective cartridge could not possibly break the grip of buttstock and hurt the shooter's hand; **Solid Top Receiver and Side Ejection**—important features of all modern repeating arms; **Matted Barrel**—the barrel handsomely matted on top for its entire length—a high grade and exclusive feature never before furnished on standard grade repeating guns; **Press-Button Cartridge Release**—to change loads quickly or remove loaded cartridges from magazine at end of day's shooting; **Automatic Recoil Hang-Fire Safety Device**, giving full protection against hang-fire (defective) cartridges; **Double Extractors** and simple, quick, smooth-working mechanism: **Take-Down; Trigger and Hammer Safety**—a double lock on the hammer (when carrying gun loaded) that can be instantly released for quick firing. **It is the safest breech loading shotgun built.**

At the big six day International Trap Shooting Tournament at Madison Square Garden, New York City, February 27th to March 5th, Mr. W. B. Darton, using his new Marlin hammerless model won the **Indoor Professional Championship of the World.**

Circulars describing all Marlin hammerless guns free on request. Complete catalog of all Marlin rifles and shotguns for three stamps postage.

## The Marlin Firearms Co.

27 Willow Street New Haven, Conn.

### Northern Kentucky Gun Club.

The second of the series of Jack Rabbit shoots was held on March 16. The attendance was not up to expectations, owing to the stormy weather, and most of the events were shot in swirling snow squalls, which nearly hid the targets from view. Among the out-of-town shooters who were not kept away by the weather were J. R. Taylor, Columbus; R. H. Bruns, Brookville, Ind.; H. Sundy, Williamsburg, O.; Ike Brandenburg, Dayton; Sam and P. Leever, Goshen; Dr. Maddox, Harrison, and E. Bittner, Mt. Healthy. The program was at 100 targets, in five 20-target events. High score was made by J. R. Taylor, who missed but 2 targets in the last 40, and finished with 92. E. Bittner, Mt. Healthy, and John Schreck tied for second place on 89, the latter being the only shooter to go straight in any of the events.

Supt. Gambell, of the Cincinnati Club, shot in good form, and went out in third place on 87. In the team match between the Northern's and Cincinnati, the former took the lead in the first round, 49 to 47. In the second round they added 7 targets to their margin, and increased their lead in each subsequent round, going out with 13 targets to the good on a score of 252 to 239. High in-

dividual score of the match was made by Schreck, of the winning team, with Gambell a close second on 87. This victory gives the series to the Northern's with two wins to their credit, one of the four matches being a tie.

The program was started about 10:30, and was finished in good season, leaving time for several special \$1 sweeps, at 25 targets each. Money divided 60 and 40 per cent, in each event. Maddox scored 20, 20 and 22; Smith 23, 20, and 20; Gambell 19, 22, 22; Bruns 22, 22; Hammerschmidt 23, 20; Ford 23, 23; Richards 20, and Bittner 18.

A couple of 25-cent miss-and-outs ended the day's sport. Gambell dropped out on his first target in the first event, and won the second on 17. Hammerschmidt was high in the first with 10, and broke 4 in the second; Maddox 9 and 16; Ertel 3 and 0; Smith 0 and 0; Richards 3 and 7; Bruns 4 and 0.

### White Plains Gun Club.

WHITE PLAINS, N. Y., March 15.—A "Tom Davis" shoot was held to-day on the club grounds, situated at Rosedale, near White Plains. While the day was a very rainy and unpleasant one, still twenty-six shooters faced the trap. This shoot was an all-day affair, and consisted of two separate scratch events, 100 targets each, shot in strings of 25. One event was shot in the morning and the other in the afternoon. Both events were open to all contestants. Besides these two events, several other shoots, closed to club members, were run off.

Dr. G. H. Martin was high gun for the day with a total of 178 out of 800. T. H. Lawrence was second with 175. Gold, silver and bronze medals were given to first, second and third high guns in each 100 scratch event. These prizes were awarded as follows:

Morning event: T. H. Lawrence, first prize, with a score of 91; Dr. G. H. Martin, second, 88; G. F. Pelham, third, 85.

Afternoon event: Z. C. Offutt, first prize, 93; Dr. G. H. Martin and W. S. Beckley, Jr., tied for second and third on 90.

The high professional for the day was Harold Keller, with 149.

Morning event, 100 targets, scratch:

*W S Haight	70	F F Rodgers	82
*H Keller	71	M R Guggenheim	76
Dr G H Martin	88	T H Lawrence	91
G F Pelham	85	Mrs F F Rodgers	30

25 pairs doubles:

Z C Offutt	23	S Core	28
F F Rodgers	32	E Ward	32
M R Guggenheim	17	T H Lawrence	33

\*Professionals.

### Cincinnati Gun Club.

Most of the regulars were at the Northern's grounds on March 16, taking part in the Jack Rabbit shoot or in the team match, which was on between the two clubs. There were four members present, however, and the following scores were made. Butz was high in the regular events with 83, and was also high in actual breaks in the Du Pont trophy event, breaking 44 out of 50, and getting a straight with his handicap. The club's team will visit Springfield on April 26 for the second of the series of intercity team matches with that city and Dayton. The last match of the series will be shot on the N. C. R. grounds, at Dayton, on May 24, giving the contestants a chance to practice under the conditions which will prevail at the Grand American Handicap. Scores:

Butz	83	Sander	72
Davies	79	Meyer	53

Du Pont trophy, 50 targets, handicap:

Butz	8	50	Davies	7	44
Sander	12	48	Meyer	29	50

### Boston A. A.

RIVERSIDE, Mass., March 15.—L. H. Davis made a full 100 over the two traps to-day. He shot from 6 free scalers. Whitney pulled the place on 92 from 12. Ballou and Keeler tied for third with 91. Scores:

	McCrea.	Sargent.	Total.
Davis	3 50	3 49	6 100
Whitney	6 43	6 49	12 92
Ballou	2 1/2 47 1/2	2 1/2 43 1/2	5 91
Keeler	8 48	8 43	16 91
Adams	0 47	0 43	0 90
Brooks	4 45	4 44	8 89
Blinn	5 1/2 45 1/2	5 1/2 42 1/2	11 88
Tucker	2 1/2 47 1/2	2 1/2 39 1/2	5 87
Dickey	0 45	0 38	0 83
Ellis	1 1/2 43 1/2	1 1/2 38 1/2	3 82
Lynch	2 1/2 44 1/2	2 1/2 33 1/2	5 78
	C. B. TUCKER, Captain.		

### Essex Gun Club.

WEST ORANGE, N. J., March 15.—W. R. Delehanty won a 25-target sweepstake, take-home trophy, and a leg on the March cup from a handicap of 6. In the sweepstake he made a score of 23, while in the other two events he had perfect scores of 25. Despite the rainy weather and the heavy mist that hung about the mountain side, the club gunners did good work. The scores of the other marksmen in the three events in the order named were as follows:

J A Hart (0)	22 17 21	C H Daly (0)	17 24 16
B Shanley, Jr (0)	21 21 24	P Hauck, Jr (5)	16 20 17
L H Ross (6)	20 22 22		

**Glenwood Country Club.**

GLEN HEAD, L. I., March 12.—Thirty-three gunners took part in the second annual shoot of the Glenwood Country Club to-day. John H. Hendrickson, of the Bergen Beach Gun Club, broke 90 out of 100 for high gun. In the team competition, the Bergen Beach Gun Club won easily with 417 to 367. The Glenwood Country Club was second; Crescent A. C. third. Hendrickson was high again with 90 out of 100. Scores follow:

Invitation shoot, 100 targets, handicap:	
John H. Hendrickson, Bergen Beach G. C.	2 92
H H Shannon, Bergen Beach	5 89
D E Smith, Glenwood C. C.	20 88
C W Berner, Glenwood C. C.	10 88

**Daniel Boone Gun Club.**

MARTHASVILLE, Mo., March 15.—Poor scores! The boys said, "Good practice." For the wind was blowing about forty miles an hour from left to right across the field, and the air was full of snowflakes. The weather was too bad to shoot, but some of the members were at the grounds trying to put up a club house, and wanted to get it so it could be used at our "Good Friday" shoot, so of course, they had to have some sport along with the work. The house will be 15 by 16, and is strictly portable, being made in eight section of an old dancing floor and put together with bolts. Scores:

Shot at, Broke	Shot at, Broke
Bollmann... 50 27	Mutert... 25 14
E Suhre... 50 15	F Koelling... 25 12
Ahmann... 25 19	Meyer... 25 11
Kite... 25 19	F Suhre... 25 10

In an event at 12 pairs, the following scores were made: Ahmann 12, Mutert 12, F. Suhre 7.

J. O. WILSON, Sec'y.

**Pahquoque Rod and Gun Club.**

DANBURY, Conn., March 16.—Our club held its first shoot for Stevens trophy on Thursday. On account of the bad weather not many showed up. The club arranged a dinner, which in years past has created interest. C. Keet Plancon acted as chef, and the way he cooked the ham and spinach was some "cheffing."

Besides the Stevens trophy, we also shot for the Du Pont picture, which was won by R. Hall with a straight score of 25, with his handicap of four. The following were the scores for the Stevens trophy:

W S Thompson... 5 47	E Verrey... 5 46
W A Gregory... 1 47	S Fanton... 12 43
Dr. Sunderland... 5 47	K Plancon... 12 42
J Downs... 6 45	W Austin... 14 44

E. H. BAILEY, Sec'y.

**Cerro Gordo Gun Club.**

MASON CITY, Ia., March 10.—Herewith find scores made at first shoot of season by the Cerro Gordo Gun Club. The club is busy preparing for a one-day jack-rabbit on May 2, and also the Post Season shoot of the Iowa Sportsmen's Association in July.

Shot at, Broke.	Shot at, Broke.

## Bulldog Breeders' Ass'n of America.

ALTHOUGH due notice will issue at the appointed time, it might be well to remind those who nominated bitches for the third produce stakes of the Breeders that the produce eligible for these stakes will be judged at the forthcoming open show, May 31. Ten bitches were nominated for this stake.

The fourth produce stakes, now nearing its close, will be the final stakes opened by the Breeders under present conditions. At a recent meeting of the board of governors, a committee was appointed to investigate the present system of produce stakes and futurities with an idea of devising some means whereby interest in and support of these stakes may be aroused to a point that will more fully justify the association's support than is at present apparent.

The purposes of these stakes are obvious and worthy ones. They are not privileged in any sense, and it is not required of anyone to be members of the association to make their nominations eligible; it is absolutely open to all.

Produce stakes are not an innovation at this day. Clubs have tried them—one club has opened fourteen of them—and given them up. The Breeders will hang on to the idea for another year with the trust that hope will triumph over experience.

To date there have been but six nominations for the fourth produce stakes. They will remain open to bitches bred before June 30 the present year, and blanks may be had from the secretary upon application.

Produce stakes are the one real eleemosynary institution of the dog world, because out of the nominating fees the association holding them gets not one sou marquee, not even a part of the entry fee. Instead, under the present system, it adds to the stakes substantially. It listens generally like a piece of easy money if you have even a near imitation of the goods to show.

The matter of a venue for the Breeders'

open show, on May 31, is still in abeyance pending a final decision of the bench show committee. The three bitches under consideration are such absolute innovations, and are upon such virgin soil, in so far as dog shows are concerned, that the committee wisely prefers to go slow and meet all the possible contingencies a dog show is heir to now rather than later after the gates are opened the morning of the show.

## The Spoilt Eskimo Child.

THE Eskimo child is the idol of the home, and is allowed to do absolutely as he pleases. He is never punished, says a writer in the Wide World Magazine, and his whims and wishes are consulted with all the concern given an adult. In spite of this indulgence, the children are remarkably obedient. Perhaps the patriarchal manner of living—father and mother, aunts and uncles, and grandmother and grandfather all in one house—tends to make them so. The word of the old folks is law, and is never questioned. They have lived a long time, the Eskimos reason, and therefore speak with the authority of experience. All this is very nice in the ordinary walks of life, but rather embarrassing sometimes in school work. When a tot of four or five plays truant from school, and the visiting teacher, complaining to the parents, is gravely told to ask the small despot if it is his royal pleasure to come to school or not, the situation becomes ludicrous. The only resource is to become a hated truant officer; or, better, to make your work so interesting that the children cannot stay away. I remember I used to lie awake at nights thinking up new ways of presenting old subjects, usually in the form of action plays and instructive games. A native child cannot hold his interest on any one subject for any length of time. His wild, free nature craves a variety of interest. Nevertheless they are very bright for the moment and wonderful quick in perception, although lacking the white child's ability to reason out a problem and to give concentrated attention, which after all is the gift of civilization.

## Western Hemlock.

WESTERN hemlock, says the Department of Agriculture, deserves a better opinion and more general use than it now obtains. Intrinsicly it is among the most important of Western woods.

The wood of Western hemlock has generally been considered an inferior one, chiefly because of the prejudice created by the name, which has caused it to be identified with Eastern hemlock. Tests by the Forest Service, however, show it to have 88 per cent. the strength of Douglas fir, one of the country's chief construction timbers. In fact, it is often mixed with Douglas fir and used for the same purposes.

The wood is practically free from pitch, has a handsome grain, takes paint and stain well and works smoothly. It is suitable for sash and door work, furniture, interior finish, framing, flooring, boxes, barrels and pulp. In bridges and trestles it can be used for all but the heaviest construction. When properly treated with preservatives, it is a valuable cross tie and pole wood.

According to Forest Service Bulletin 115 the best stands of Western hemlock are found in the coast region and through the Cascade Mountains. The bulletin further gives the results of tests by which the mechanical properties of Western hemlock have been determined, and tells of the different uses to which the wood is adapted.

**Riverside Gun Club.**

PHILADELPHIA, Pa., March 15.—Riverside Gun Club members defeated the Independent Gun Club, of Eddystone, in the first of a series of team races to-day, at Essington, by 369 to 296. Neither team shot up to their standard. Bowers with 44 breaks led the field, while Berger with 35 was the Independent's high man. Scores:

Riverside.	Independent.
Bowers ..... 44	Berger ..... 35
Shattuck ..... 41	Schoemberger .... 32
Walder ..... 41	Essinger ..... 31
Stellar ..... 40	Mitchell ..... 31
Sterberling ..... 40	Covington ..... 29
Hamlin ..... 38	McNeil ..... 28
Horn ..... 35	Campbell ..... 28
Wiltbank ..... 34	Phillips ..... 28
Eisel ..... 34	O'Neill ..... 28
Rosie ..... 22—369	Boyer ..... 26—296

**Bourbon Gun Club.**

BOURBON, Ind., March 11.—The weather conditions were better here to-day and induced some of our boys to come out to try breaking some of the little clay targets, which, indeed, proved to be very small for all of us. We hope to have some new shooters when we commence shooting for our Stevens trophy under the handicap system. We very much enjoyed the pleasure of shooting with one of our old members, L. C. Foster, of Ft. Wayne, Ind. Following are the scores made:

Shot at. Broke.	Shot at. Broke.
*Foster ..... 30 22	J Russell ..... 50 32
Stokes ..... 30 21	Parks ..... 50 34
L Russell .... 50 44	Dexter ..... 30 17
T Dilley .... 50 42	McKinney ... 30 16

\*Visitor.

**INDOOR CHAMPIONSHIP.**

Continued from page 359.

a new record, they could do not less than third in the league shoot; Warren, the leading club making the fine score of 990, winning their match against the Bangor, Maine, Rifle Association, which defaulted. They are now the winners of the Eastern League and will shoot off for the United States championship with the Engineers' Rifle and Revolver Club, of Cleveland, Ohio, which has won similar honors in the Western League. Plans are being perfected to have both the clubs shoot together on some neutral range the same night, so that the contest, which bids fair to me a record one, may be witnessed by shooting fans, many of whom will go great distances to see such a contest. The results of the last week's match among the Eastern clubs follow:

Bridgeport, Conn., 998, vs. New Orleans, La., Rifle and Revolver Club, 900; Myles Standish Rifle Club, Portland, Me., 974, vs. Birmingham, Ala., Athletic Rifle Association, 930; Manchester, N. H. Rifle and Pistol Club, 977, vs. Presque Isle Rifle Club, Erie, Pa., 959; Warren, Pa., Rifle and Revolver Club, 990, vs. Bangor, Maine, Rifle Association, defaulted; 13th Regiment Rifle Club, Brooklyn, N. Y., 899, vs. Philadelphia Rifle Association, withdrawn; District of Columbia Rifle Association, 985, vs. Winchester Rod and Gun Club, of New Haven, Conn., withdrawn.

# ÆTNA-IZED?

## A Narrow Escape

A few minutes before the man whose office is shown in this picture reached his desk this 200-pound trophy fell from its place on the wall. Had he been seated at his desk his accident insurance policy in the ÆTNA would have meant \$30,000.00 to his estate.

The exceptional character of this narrow escape but emphasizes the fact that the lives of most men are full of hazards, against the results of which accident insurance alone can afford them any protection.

**BUSINESS MEN**—Merchants, Manufacturers, Bankers, Architects, Contractors, Commercial Travelers, and

**PROFESSIONAL MEN**—Ministers, Lawyers, Doctors, Dentists and Instructors are in constant danger from office and home accidents as well as from automobiles, street cars,

other vehicles—building operations, electric wires, slippery walks and many other causes of accidents.

**NONE ARE IMMUNE**—So why not protect your income by an Accident and Health Policy in the ÆTNA?

The ÆTNA has issued Accident policies for more than 22 years and has paid over ten million dollars for Accident Claims.

The ÆTNA has issued Health policies for 14 years and paid over one million dollars for Illness Claims.

The ÆTNA issues Accident policies in any amount up to \$50,000 which accumulates and doubles; with weekly indemnity in any amount up to \$250 per week doubling to \$500.

**ÆTNA-IZE YOUR INCOME** in this great Company before your turn comes.

## ARE YOU A GUNNER?

*Do you love to follow your good dog over the fields in search of quail or chickens, or to struggle through swamp or along thick grown hillside, expecting to hear the roar of the ruffed grouse or the twitter of the fall woodcock? If so, you should have this new book.*

## AMERICAN GAME BIRD SHOOTING

By GEORGE BIRD GRINNELL

This companion volume to "American Duck Shooting" treats of the upland game which American sportsmen shoot over dogs—woodcock, snipe, all the quail, grouse and turkeys.

The first part of the volume is devoted to a description of the various species and their habits—the way in which they live their lives.

The second part of the book is devoted to upland shooting and treats of the methods by which all the upland birds are pursued and taken. The chapter "Aids to Shooting" describes the clothing, guns, and loads and dogs that the gunner may profitably use; while the last section of the book treats of the shooting of the future and the efforts to rear our native quail and grouse in domestication.

The volume is illustrated by colored plates of ruffed grouse and quail, and 48 full page portraits of different game birds and hunting scenes, with a number of cuts in the text.

*Cloth. About 575 pages. Price \$3.50, net. Postage 25 cents.*

This book is of inestimable value. It contains the genuine hunter-naturalist facts given in the most entertaining and interesting style.

**Ptarmigan Shooting in Greenland.**

IN Greenland the ptarmigan is to be found, not only on the higher mountain ranges, as in Norway, but in all kinds of places at different times of the year, from the highest tops down to the sea level, and from the "nunatakker," or peaks which rise above the surface of the inland ice, to the outermost islands of the west coast. These birds, however, exhibit a preference for mountain tracts which lie at elevations of from 1,000 feet to 2,000 feet, from which descend plenty of slopes of stony debris, and where there are lochs and tarns scattered about. The nest of the ptarmigan, although without covering, and even when it contains eggs, is extremely difficult to discover, and it is generally situated close by a stone, a tuft of heather, or a small bush. In Greenland these birds build for the most part on the lower mountain slopes, but they do so also on all the larger and higher islands, sometimes even on the smaller and low-lying ones, and sometimes on quite flat ground near the sea. The number of eggs is usually eight, and rarely exceeds ten. Although there are exceptions in the case of late broods, the young are usually hatched out about the beginning of July, while by Aug. 20 they are full grown. Until they arrive at this stage they show a preference for somewhat low-lying places, where the ground is damp, and where there are plenty of tufts and stones, among which they can run about and hide themselves. As long as the hen is sitting the cock remains hard by, and gives timely warning to its mate of the approach of danger; but as soon as the young are hatched out he deserts his family. The cocks then repair to the higher tops, where they live singly or in small parties of three or four. Not until well on in September, when the hens and young birds have assumed their autumn plumage, are they rejoined by the cocks. Toward the end of August many of the broods repair to the mountains; others, however, remain in the lower country, and from that time until there has been a heavy fall of snow—which does not usually take place until October—the sportsman may fall in with ptarmigan pretty nearly anywhere. After that they frequent the low, heath-clad hills and slopes from which the snow has been blown away, and later in winter, about the beginning of February, they are to be found on the more level ground, where, through the force of the wind, the heather has become exposed. On such tracts immense packs may sometimes be met with at that time of the year, and, should the cartridges hold out, a good bag may be made, as they generally lie well. In the after part of the day they remain in the neighborhood of such places, and in the evening return to the slopes. In severe cold they scrape holes in the snow, and as the head only is above the surface when sitting in these they are very hard indeed to make out. In summer and early autumn ptarmigan feed mostly at night, and when resting in his tent the reindeer stalker often hears them flying round and calling. When severe frost has succeeded a heavy fall of snow and rendered the surface of the latter very hard, the birds repair to ground near the sea and to the islands, and they may then be seen running about among and stitting in the tops of the houses. They are then very tame, and although their near neighbors be shot, the others will not rise. In early spring packs of fifty or a hundred birds may be seen feeding together, but when put up they separate into small lots. In the great ptarmigan years, however, they form packs of hundreds and even thousands of birds; they are everywhere, and are so close together that several may be killed at a shot, and without causing the others to take flight.

During the period from the beginning of April until the middle of October, says the London Field, the Greenland ptarmigan passes through five changes of plumage, which may be

described as its spring, first and second summer, autumn, and winter dresses. The first of these is a transition stage between the winter and the summer plumage; the latter is assumed by the hens before they lay, and is retained until the young are full grown, in August. The second summer dress is not worn for long, and about the beginning of September the birds begin to don their autumn plumage; this last is also very transitory, and by the middle of October at latest all the ptarmigan are quite white. The young resemble their mother exactly in their plumage, and in autumn it is not easy to distinguish them from the parent birds. Except as an adjunct to reindeer stalking, ptarmigan shooting in Greenland is hardly worth taking much trouble about. The best time of year for it is undoubtedly when the young birds have assumed their first or second

summer dress; they then sit very close, and with a properly trained dog very pretty sport may be obtained in low, open cover. In windy, rainy, or snowy weather, however, they become wild; the bigger the pack the more difficult they are to get within shot of, and when put up they fly long distances. When in October the snow sets regularly in, the ptarmigan, which are then quite white, take up their abode in the lower slopes of stony debris, and to follow them about in such localities and under such weather conditions as then prevail necessitates a capability of performing gymnastic exercises which is not possessed by every sportsman. After that it may be said that the birds spend the winter in large packs, but a good many individuals separate from these, and are to be met with in small lots, which in fine weather are fairly approachable.

# There Must Be Something?

**WE** don't know it all, but in our forty years' acquaintance with sportsmen all over the world we have stored up a vast amount of knowledge that no one else possesses. It is yours for the asking.

**There Must Be Something** you want to know about fishing, hunting, travel, etc. Our experts in these lines are ready to tell you—The best fishing places, how to get to them, what to take along, and where to stop while there. They can plan your fall shooting trip, be it big game, wild fowl or upland game. Such information as game laws, guides, prices, and so on we can furnish authentically.

**There Must Be Something** we can tell you about planning your summer vacation, a good hiking trip, a mountain climbing outing, a canoe cruise, long or short—ask us.

## The Kingdom of Eternal Hills

By ROBERT PAGE LINCOLN

(Continued from last week.)

THERE may be places in the United States where the trout fishing is better than in this region, but I doubt it. Montana, recollect, has a reputation for her trout fishing that reaches a top notch figure, and is something to conjure with. The fishing in the park is an example of this splendid feature; one of its most attractive points. There are the rainbow trout in the streams and the lakes, also the mackinaw trout for those who want something on a larger scale. The mackinaw trout in this region attain a good size, but take your heavy line, your large reel clamped down on a firm reel-seat, and be supplied with a good, stiff-backed rod, then go out in your boat, using as a lure a silvery glittering spoon, and if you do not have luck, then surely there must be something wrong. A sharp tug at the end of the line and you set the hook; then follows the fight. And it will be a fight that will stir every corpuscle in your body. Back and forth, this way and that, you will play him, and finally, luck admitted, you will bring him into the boat, the luck of a perfect day. It is well known and felt by all anglers that the surroundings have a lot to do with the pleasure of the fishing. Poor surroundings cannot but make for an ill completed picture. The sensations naturally derived through an application of body, mind and muscle to this enjoyment are but one-half of it, the other half is what you see, and the lessons you gain through an intercourse with nature. A clear, blue sky above, with a few fleecy clouds floating across it, just enough to make for variety; the stately trees near at hand to sigh and give out that wonderful essence we all love to drink long and deeply of; the towering peaks on all sides—these and a thousand other features serve to make each day worthy of the name. It is notable of these mountain regions where civilization has but entered with its modern improvements and attendencies that fly-fishing has but partially been adopted.

An old outdoor man told me that one is able to catch trout just as well, and a darn site better with an old cord on the end of a broom-stick, with an angleworm or bug or butterfly for bait than with a fly-casting outfit and the factory-made flies the usual book will contain. But of course the nature of two sets of people are different. To catch a trout by aid of a fly is a hundred times more appealing and sportsmanlike and poetic than dropping a hook with a worm on it down into some innocent basin and thereafter pulling out one of its speckle-sided inhabitants. Yet the usual rule among the mountain

men is to catch them entirely for eating purposes; the enjoyment side of it is not recognized.

Yet after all perhaps over half of the trout fishing in this country is done along little, seemingly insignificant streams or rills, hid in tangles of undergrowth where casting is absurd and unthinkable; where one is forced to drop his fly or worm-baited hook down through some opening and take chances that way. Yet it makes not much difference which way you use in this region—the Glacier National Park—broom-stick or fly-casting, you will get them. Amateur or expert, you are treated alike, for the fish are not educated like some of those you find in Eastern stream, where every precaution must be used if success be courted, and where the expert alone seems to be favored. If you are going to the park and know little or next to nothing about fly-fishing, do not despair. I will give you here a few pointers which will aid you if you go here

or anywhere else. You will get a fairly good bamboo trout rod for the small sum of five dollars. If you wish to go a little higher and have the money to spare, if you want something to last and give you a great deal more service and enjoyment, then you will get the real thing for from ten to fifteen dollars. I have in my outfit a steel trouting rod which sells for six dollars and a half which I cannot help but recommend if you are a new one at the game, and I am sure you will be as entirely satisfied with it as I am. This rod is durable, it has the feel, and is by no manner of means too stiff. For this reason steel casting rods meant for trout have been more or less condemned. I wish to say that this is all more or less bosh. Of course if you want a rod that will do its own casting by pressing a button, all well and good, but if you want to work a little for the desired end, that is another thing, and you have rods to meet your demands.

GOOD FOR A CREEL ANY DAY.

The rod should be about ten feet in length and should weigh six ounces or so if it is of bamboo; if it is made of steel or solid wood, then let the weight be about seven ounces, and you will not go amiss. I wish to say that the solid wood rods are good and worthy the hand of any angler, however exacting. The solid wood rod is meant for service, but the trouble is if you are traveling, it will not do. They come in one piece or at the best two pieces, and cannot well be carried without inconvenience. Of the solid wood rods the lancewood is the cheapest; it is whippy, and for the beginner, who does not care to pay out too much for his first rod, yet wishes good service, the lancewood is recommended. A good rod of this type can be purchased for the sum of four dollars. Solid wood rods, in bethabara or greenheart, come a little high, and one could just as well purchase a bamboo rod. The bamboo rod has gracefulness, durability, resiliency and pliancy. All these points must be considered in the purchasing of a fly-casting rod, for unlike the steel bait-casting rod, where the reel is drawn upon for the greater part of the energy, in fly-casting it is the rod that does the work. The ferrules of the rod should be waterproof and serrated and should be made of German silver, for the reason that it is the most durable and will stand the most wear without giving out. The snake guides I have found to be the best on the market. The guide nearest the reel should be fitted with agate as should also the tip guide; that is, if you purchase a thoroughly perfect rod. These two guides stand the most wear, and they are brought into use the most. Hand grasp should be swelled cork. The six strip bamboo is given preference over the eight strip in that it resists wear longer, and is not liable to become warped, nor will it lose its pliancy or its resiliency.

The rod for trout fishing is the most important part of the outfit. The reel is not drawn upon for energy, save as to hold the line and to reel in the fish when one is caught. But the only reel rightly fitted for trout fishing or fly-casting is the single action reel. They come in all sorts and varieties of materials, ranging from nickle to solid German silver or German silver with trimmings; others in nickle in conjunction with hard rubber. I have found a rubber reel as good as any, though it is wholly a matter of taste. One notable thing is that the reel should have a strong click. And it should hold in the neighborhood of 150 feet of line. The proper line for fly-casting is the enameled line, either tapered or the level. Some prefer the tapered and some the level line, but for my part I do not see that there is much difference, although I may be mistaken. My experience has been as above stated.

If you are going to buy a tapered line, I would get the double taper; that is to say a line with a set thickness in the middle and gradually tapering down to the end. Such a line you can use longer. In the matter of flies, it is best to be stocked up on the best ones, and then you will be sure of striking something of the order that is needed. Cheap flies should be shunned, for they will give you but exasperation, and at the best poor results. To pay a sum of two dollars a dozen for flies is not too much, and then you are certain and can feel confident of yourself. Rod, reel and line and the flies—

these are the wholly necessary things that go into the outfit, and if you go to the park, a little care spent in the beginning in selecting your outfit will bear its fruits in helping to make your little vacation one of utter sweetness, rid of worry, and the disgust so many untutored anglers are forced to experience before they have attained the eventual near-perfection that comes from ardent application to the universal pastime.

To the fly-fishing enthusiast who goes to the park, there are many other things to occupy his attention—horseback riding in the mountains, up steep trails and through pine-fringed gorges to the top of the backbone of the continent; taking camera pictures from a territory where one need go but a mile to exhaust a brace of films and yet will not have covered the ground thoroughly; where the student of birds and animals is in a virgin territory and near at hand can find a wealth of the true, wild material—not the civilized inhabitants found near the outskirts of the cities. And there is the mountain climbing one may enjoy to his heart's content.

To the person of rugged physique and hard limbs, who has not a weak heart, here is a factor in the amusement world of a nature to call the most exacting—mountain climbing. The very mention of the word will call up pictures of gigantic snow-hugged peaks, dangerous crevasses, writhing glaciers, booming torrents—of hardy men and women, strung together with a rope carefully treading their way along lonely courses, cutting their way with the ice axes, ever moving, slow but certain toward the indomitable top of the world, there to look down, having defied blast and snow, standing victorious. Our conceiving of this hazardous sport is naturally coupled with the Switzerland country, where for time untold it has been that country's one great attraction. There the Alps rise, sinister and forbidding, to baffle the midgets of men who come creeping up their sides. Yet we need not go to Switzerland. In this country we have the Glacier National Park, in the St. Mary's country, with conditions almost the same in general as those found in the old country.

While it cannot be compared with the climbing to be found in Switzerland, it is, however, of such a nature as to satisfy the most exacting amateur. One does not know what the climbing of a mountain is until the ascent is begun, then certain illusions will be stowed away, never to be thought of again. Yet it is sport and a lot of it. It demands muscle, courage and perseverance. One will never grumble, but must laugh in the face of the mighty odds. This is mountain climbing and you will get a good taste of it if you so desire right here on grounds eternal. The value of top boots will soon evince itself to the man who makes his way through the mountains. They are the one and only thing. They brace the muscles behind the leg and hold the ankles firm. Now, this amounts to a great deal. You cannot go slip-shod up a mountain. Boots then, and have them hob-nailed. Those hobs sink in and will time without mention save you from slipping. And right here let me caution you to get them large enough so that you can get a couple pairs of woolen socks into them without cramping them. Also you want a pair of roomy pants, and the knickerbockers answer the purpose fully, or riding breeches will do as well. Something that will not hamper the movements of your knees. If you have low top

shoes, it is necessary to have either leggins or spiral puttees to go with them to guard the ankles. The spiral puttees are much in use among the members of the various mountain climbing clubs that operate annually in the Selkirk country of Canada, and are good for any kind of knocking around. They properly shed the snow and will guard the ankles from cold, hence they are an invaluable addition to the outfit. You want a sweater coat and warm woolen underwear, for the weather conditions among these peaks is none too balmy. Add to the outfit a felt hat if you do not admit the usual cap. You will be safe either way; you have your preference. These things of bodily wear you furnish yourself, but other than that you will have the best of accommodation at the "outfitting parlors" at the start of your climb, such as ice axes or alpenstocks and the rucksacks.

The outfit for a woman is much on the order of that adopted by the men. A serviceable short khaki shirt and knickerbockers, hat, sweater, boots and puttees, gloves, not forgetting the smoked glasses. Mark a line under that. Do not forget the smoked glasses, or you will soon find out the reason why when the sun, beating down upon the snow, near blinds you. There are cases without number where the trail has come to an end all too suddenly in the experience of a mountain climber, and a bit of precaution is a good thing to look forward to and heed.

There are many especial points of attraction in the Glacier National Park. From the railroad station at Belton you proceed to the starting point or nucleus of all your trips, the Glacier Park Hotel, being brought there by launch over the inimitable waters of Lake McDonald, one of the finest sheets of water in the West. It is one riot of glory, and coloring without name. Avalanche Lake is one of the first on the route, and the trail to the top is one to be remembered. Passing through the Royal Gorge one looks upon nature in all her immensity, all her grandeur, all the fullness of her expression. Here the waters crash down with a voice like distant thunder, reverberating, hissing, groaning and shrilly echoing their freedom. Fanned over all is a curtain of haze, lifting and lowering, the sun shining upon all, and searching out hundreds of color schemes one would not deem it possible to find. Just as the shadows of night are being drawn over the landscape, the ponies are homeward headed with their burdens of delighted humanity. As you ride along, the scenes and experiences of the day enter upon the mind one by one, and you again revel in the opportunity given you. You will fall asleep at the foot of some imaginary torrent, looking up into countless visions of what has passed. The next day is well filled in with a climb up Sperry Glacier, one of the most momentous of the trip, for the trail to the final goal is so long and the scenes along the way are so many and various and so awe-inspiring in their beauty that it easily stands out foremost. You will pass through virgin stretches of pine where the silence of ages seems to abide; up tortuous trails where man seems baffled, but where the nimble and hardy ponies climb like mountain sheep looking down upon torrents spuming their frothy burdens into the maw of some exacting demon below. And finally

you look upon the glacier itself, the object of the climb; having stopped at Sperry Camp for a noontide meal. The guide will tell you that you are 9,000 feet above sea level, and as you look down, you can well agree with him. You seem to be in another world. There comes into you that overwhelming sense of awe as you view the crouching rocks, the writhing waters and the horrible suggestiveness of it all. Flung out on all sides are the beauties found at the top of the world, and your eyes sweep them all in with a reveling sense of defiance. And then down again to camp at the close of the second day. The climb to the heights above Gunsight Pass fully occupies the next day, and here one is able to witness all the gigantic conformations of nature, dating back to the beginning of things.

A famous spot, indeed, is Gunsight Pass, the top of the continental divide, and a treasure land of primitive magnificence, bearing always the suggestion of the awful and almost inconceivable—seemingly impossible of human tongue in telling of—to be left in the sacredness of utter silence. It is a momentous trip, one always to be remembered. So also the trip to Red Eagle Lake, and here lies the path to the fisherman's home at the foot of Red Eagle Falls. To know that the trout every year climb the rivers to these lakes, high in the mountains, is one of the wonders and mysteries of nature, yet they do it, as impossible as it would seem. But they always court failure when they attempt to scale Red Eagle Falls, and there they lie, by the thou-

sands attempting to make it, but knowing the sense of incapacity after a few tries. Hence is the trout fisherman wreathed around in glory as he whips in his flies and pulls in trout after trout, four and five pounds in weight. Once a trout fisherman gets to Red Eagle Lake and vicinity, he stays there, for the fishing is incomparable.

The above are but few of the attractive points. When one stops for a moment to think that there are hundreds of ridges, peaks and heights all thrown together in one amazing puzzle, many of which are unnamed, the significance of it all will come to one. It is a region which is, and always will be, a spot where one might view nature in the supreme; where civilization dares not intrude, and if it does, retires with a whisper of awe and a gathering up of its perfumed garments. It is a place where the boot and the felt hat are king, where man is man, and where the millionaire rubs elbows with his less fortunate brother. The region is tapped by the Great Northern Railroad, the western gateway being Belton and the eastern gateway Midvale, where the railroad is spending one hundred thousand dollars in the erection of a new hotel. Great sums of money are also being spent in building hotel colonies, consisting of from four to ten handsome log chalets of the Swiss style of architecture, in seven of the most beautiful and convenient locations throughout the park. These colonies are from seven to twenty miles apart, and a tour through the park

can be made in comfort and ease by short stages between these colonies. These chalets are the acme of perfection, and a credit indeed. The cost of the hotel expenses of going through the park on a long or short tour can well be covered by three dollars a day. A tour of ten days by a party of five can be made at an expense of about five dollars to eight dollars per capita per day, and if one wishes to travel by foot, carrying his own camping paraphernalia, the expense can be cut down to from one dollar to three dollars a day.

The following tabulated list of charges for the tourist will indicate the reasonable cost of the tour through the Glacier National Park:

Round-trip fare, St. Paul or Minneapolis, to Belton and Midvale, Mont., the official entrances to the Park, June 1 to Sept. 30.....	\$35.00
Great Northern Chalets at	
Midvale .....	} Meals, 75 cents. Lodging, 75 cents. Per day ..... 3.00
Two Medicine Lake.....	
Cutbank Cañon .....	
St. Mary's Lake.....	
The Narrows, St. Mary's Lake.....	
Lake McDermott .....	
Sperry Glacier .....	
Belton, .....	
National Park Cabin Resort, lower end Lake McDonald. Rates, per day.....	\$2.00 to \$3.00
Geduhn's, north shore Lake McDonald. Rates per day .....	2.00
Glacier Hotel, north shore Lake McDonald. Accommodates 150 guests. Rates, per day.....	3.00
Stage ride, Belton to foot of Lake McDonald, one way.....	.50
Boat trip to head of Lake McDonald, one way.....	.75
Round trip .....	1.25
Guides, in charge of party, per day.....	3.50
Cook, per day .....	3.00
Saddle and pack horses, 5 days or less, per day....	2.00
Saddle and pack horses, more than 5 days, per day..	1.50

[THE END.]

## Among the Mexican Troglodytes

By EDWARD HOEFLICH

Illustrated from Photographs taken by the Author

ON the way from the Roncesvalles mining district, in the State of Chihuahua, Mexico, where I inspected several mines, I fell in with Don Pedro Alvarado, the noted peon mining millionaire. Don Pedro was, at that time, owner of the famous Palmilla mine, out of which his father and he took millions on millions of pesos. He had very little education, and his hobby was to fill his pockets with brand new silver dollars, walk down the streets of Parral, and distribute the coins to the poor. It is told of Don Pedro that, in him, salesmen in general had a good field for their wares. Once upon a time a jewelry salesman succeeded in selling him twelve watches. Immediately following this salesman, came a piano agent, saying, "Don Pedro, you bought twelve watches from this man, why not buy twelve pianos from me?" Don Pedro bought the pianos, placing one in each room of his magnificent million-dollar residence in Parral. He also paid forty thousand pesos for a Brussels carpet, which is always covered with canvas, so that his many children would not soil it with the beans they were accustomed to eat on the floor.

Before our trip was over, Don Pedro invited me to take dinner with him at his house. I readily accepted, as I was anxious to get acquainted with him, and to see the art treasures he was supposed to possess. During the repast

AUTHOR AND HIS DOG ROLF.  
On Brink of El Cobre Barranca.

he spoke very interestingly of his trips to the interior, and also mentioned the peculiar customs of the Tarahumares, a tribe of Indians, which used to live between the twenty-sixth and thirtieth parallels, in the State of Chihuahua. Now, the remnants of this once-powerful tribe are to be found only in the southwestern part of the State. It had been my desire for many years to get acquainted with this peculiar race, and I considered seriously the spending of several weeks in study and pleasure among its members. Don Juan Alvarez, the owner of silver mines near Batopilas, who was present at this dinner, invited me to accompany him to that place, as it would be the most suitable one from which to start my investigation, with the aid of experienced guides. Being free for the next few weeks, I made preparations immediately, and started two days afterward with Don Juan, a guide, Pedro Sandoval, and my faithful dog, Rolf, from Parral, taking the trail for the Batopilas mining camp.

This camp has been known since the seventeenth century, but came into prominence when Boss Shepherd of Washington denounced the mines, and made a paying proposition out of them. It still belongs to the family, and A. R. Shepherd is in charge. Here we outfitted for a long trip, and engaged a few Tarahumare runners as porters, for our expedition. Before

going south into the heart of the Tarahumare country, we started north toward the three famous barrancas (gorges), Batopilas, San Carlos and El Cobre. The last is the most peculiar, being more than 4,000 feet in depth. It took us almost half a day to reach the bottom of this gorge. In it the heathen Tarahumares live; and I had a good chance to get acquainted with the aborigines who have remained in their original condition up to the twentieth century. There are old reports from the seventeenth century regarding this tribe, and they are unanimous that these Indians are very docile, peaceful, and, comparing present scientific investigations, have changed hardly any in their manners and customs of life. My guide spoke the Tarahumare language fluently, but, notwithstanding this, we had some trouble to get per-

as their color is a coffee-brown. Men and women wear long hair, held together with a ribbon of cotton or palm leaves bound round the forehead. The women are smaller than the men, with very small hands and feet, and, at the first glance, they seem more fragile than white women. They are very timid, but are faithful wives and good mothers. They usually raise a family of from six to eight children, and a peculiar trait is that they marry only for love. Although the woman is not considered the equal of the man, as the Tarahumares believe that one man is worth five women, in the family councils, the wife has almost the same voice as the husband. The men have no beards, and if a hair does appear on the face, they pull it out by the roots, as they consider it a disgrace to have whiskers, as that

safest places for their granaries and store-houses. The caves are in most cases dry, very high, and in the middle is the fire which is never allowed to die out, while all around stands the household pottery of their own make. The Tarahumares prefer to live in the caves during the winter, as their houses do not protect them from the elements, and they cannot withstand the rigors of the climate. At the entrance to each cave they have three crosses of different sizes, representing the god sun, the god moon, and the morning star. Their greatest pleasure is to take a sun bath for hours.

Men and women wear little clothing save a small leather apron, and, for the most part, go entirely naked. The women, when they go to the nearby market towns, cover themselves with a few cotton clothes. They wear very few personal ornaments, except collars made from strings of seeds. The Tarahumares are very inoffensive; they neither forget nor forgive. They raise mostly corn, and they prepare their fields in a peculiar manner. They cut the trees and shrubbery before the rainy season sets in, burning them and planting the corn in the ashes, making holes with sticks, though now and then they use very primitive plows. Corn is the main staple, together with beans, chiles and squashes. Each family has three or four head of cattle, about a dozen goats, but no hogs or horses. They have some dogs, but I do not like them. They take good care of their domestic animals, never killing them except as a sacrifice to their gods.

These children of the forest were shy of my kodak, as they really believe if anyone looks into a camera the gods will be dissatisfied and the unfortunate human being will surely die. But when I finished the first negative of a boy, the whole village tried to get the photograph. They do not eat the flesh of their stock, because they believe that the gods placed man to take care of the lower animals, though they are permitted to eat wild beasts. Their foodstuffs consist of different preparations from maize (corn), and, like the Mexicans, they use a great deal of chile. One of their preferred dishes is izquiate, made of toasted corn, ground in a metate, and made into a soup with different herbs. In planting their corn they never care for large areas, as they are perfectly satisfied to raise enough merely for their own needs. Besides, most of them raise two crops, one planted in March on the highlands, and the second in June in the deep gulches near their caves. They take good care of their granaries, and when they lock them, they consider it the greatest crime for one of their tribesmen to break in. Such a case never happens, in fact, among their own people, but often Mexicans who live nearby take advantage of the seemingly inoffensive Tarahumares. They are very honest in their dealings and expect the same treatment from their white neighbors, but they often get the worst of it.

The whole territory occupied by the Tarahumares has an excellent climate, the temperature hardly ever going beyond 97 F., although in winter they have snow for a few days on the high plateaus. There are three seasons in the Tarahumare country; the dry period from March to June; the rainy period in July and August, while the remainder is winter. They are a very healthy race, many living more than

TARAHUMARE FAMILY OF GUACHICHIC.

mission from the medicine man, to put up our tents near the village. After getting acquainted with several of the chiefs, it required several days for the women to venture to leave their houses; but the little tots paved the way to friendship with the mothers, and soon I was in a position to get a glimpse of their family life.

It is peculiar how little success the Catholic Church has had in converting the Tarahumares; but it seems that the Jesuits and the Franciscans, who were the first to try it, adapted the Christian creed to some of the pagan rites of the Indians. I happened to be there during Easter week, and it was a most peculiar sight to see the Indians made up as Pharisees, with painted faces and wooden swords. It seems that the old customs remain, while the doctrines have been forgotten.

The Tarahumares are of middle size, strongly built and muscular; their faces are oval, and I consider them among the best-looking Indians of Mexico. They could hardly be likened to the North American red Indians,

makes them look like Mexicans, who, they believe, are sons of the Devil. The marriage ceremony is very simple. The medicine man mumbles some kind of a prayer, and the couple are man and wife. Divorces, which are rather rare, are declared by a council of the tribe, headed by the medicine man.

When a woman gives birth to a child, she arises next day, but the husband rests three days, lest some misfortune follow. After the three days, he takes a bath, and, on the fourth day, the mother exposes the child, naked, to the sun for at least an hour, so that the god sun can get acquainted with his son.

The Tarahumares are at the present time possibly the only troglodytes on this continent. Although they live during the dry season on the dry land, in so-called houses, most of the remainder of the year they spend in the caves of the great barrancas. There are caves which have an extension of more than 40 x 100 feet, where not alone the family lives, but the animals also, and they consider these caves the

a hundred years. To run eighty miles a day is nothing strange for them. As I have said before, theft is of rare occurrence, as are also murders, which happen only when the Indians are intoxicated. There are cases of suicide, but, strange to say, mostly caused by disappointed love. The Tarahumarc likes his home-made beer, called tesguino. They like music and they play mostly on a very primitive violin, their melodies, as with most savage races, being very melancholy.

The Tarahumares are great gamblers; and once they get the passion they will gamble away all their possessions, for they never worry about the to-morrow. Although their principal occupation is agriculture, they are very fond of hunting. This is done mostly with bows and arrows, and traps. As they are excellent runners, they have been known to run behind a deer for two days, until the animal is at the breaking point, when they kill it with their arrows. There has been scarcely a case in which the deer outran a Tarahumare. When the father of the family goes out hunting, he leaves the house early in the morning, with an ax and a bow. Seeing, for an example, a squirrel in a tree, he cuts down the tree, and, if the squirrel jumps to another, he cuts that also. Often it requires a whole day to kill one squirrel. I could not understand this proceeding, but finally I came to the conclusion that these children of the wilds love the noise of the falling tree, which often comes down with a terrific crash.

After spending a few days in the caves, the second chief, Peña, invited me to accompany him to the highlands on a hunting trip, from which I intended to continue the trip south. I was rather sorry to leave this interesting cave village, and I was pleased to see that men, women and children turned out to take leave of me. After a rather difficult ascent, I took a last glance from the bank of El Cobre barranca at the small Indian village which lay a thousand feet below. From there we went to Yoquibo, famous for its immense grottoes. I was more than anxious to find out something about the sepulchral caves of the Tarahumares, of which Mr. Alvaraez advised me that there were a number near Yoquibo and Guachichic. With all kinds of promises and good words, I finally induced the old chief to take me to one of them.

Hidden behind a high boulder, covered with a stone slab, we found the entrance, and went in to one of the strange chambers. To my great disappointment, most of the skeletons had been tampered with. Only one perfect one, that of a woman, I found in one corner, lying on its side, with the face to the east. Nearby I found a skull of great size, but, to my surprise, I discovered a hole, cleanly chiseled in the top. This reminded me of the statements of scientists who had traveled through the same region, and who claimed that the ancient tribes knew something of trepination, although it is very doubtful if this operation was performed for this object. Probably it was done to let out a devil which was thought to be inside the head. These sepulchral caves are used less at present than formerly, as the Mexican government insists upon the burial of the dead.

[TO BE CONTINUED.]

## Florida Deer Hunting.

BY D. M. EDGERTON.

MOUNTED upon my chestnut hunter "Don," and accompanied by my hound "Prince" and a "Florida cracker" guide on foot, I was out in the winter of 1892-3 after deer in the pine flats of Florida, between the Indian and St. Johns rivers. We had long failed to "strike a trail" and were returning home, when suddenly Prince "opened" and was off in full song, through the grasses bordering a large marsh. It being late, we did not follow, but stopped, listening to Prince, and by the loud tongue he was giving, we knew that the trail was warm.

Patiently waiting, we could tell that far around the marsh the deer was flying with Prince on the trail hot after. Ere long I sighted the deer in the distance on the opposite side of the marsh, making directly toward us.

Directing the guide to hide, I sat quietly waiting the deer's approach and Don, well knowing what was up, standing like a statue, his eye, too, on the coming game, a fine buck came tearing on until within about forty yards, when it swerved to pass. It was then that I gave him a charge of buckshot aft of the shoulder, fully expecting to see him do a somersault. Instead, to my astonishment, he swung clear around, came full about, and crossing his own tracks, made off, but not until I had given him the second barrel. We followed, certain of finding the buck down in the grasses, but Prince now coming up and taking up the trail was again off and soon out of sight. So surprised and disgusted was I now over the fiasco that we stayed no longer, and it being near dark, put for home, I vowing that "never more" would I hunt deer. Especially was I cut up because I had, when not hunting, sighted this same big buck and claimed him for my own. Some time after I met an old hunting acquaintance who said to me: "Colonel, do you remember the buck you were after? Well, I found him two days later, dead in the marsh, I being attracted to the spot by flying buzzards, and I have his horns," adding, "You ought not to have been so surprised, as I shot a deer one day over on the island and it ran several hundred yards before falling, and when dressed, I found that two balls had gone clear through his heart. They will do this sometimes when running hard." "Yes, I know," said I, "but I don't like their playing that game on me, though I am glad you got his horns."

However, I got even the next time out. Not forgetting my foreswear and "still nursing his wrath to keep it warm"—the ruling passion too strong—I, with another "cracker," struck out in another direction and had not traveled far before Prince "picked up" a good trail which was long followed until it led into a patch of saw palmetto, and out of which Prince jumped two deer, each of us bringing down one and both of which I carried home.

There is still, in this 1913, good hunting in parts of the Upper St. Johns River country for deer, wild turkeys, wildcats, 'coon, with quail everywhere, but game has been much disturbed in many places by the convict camps—colored "tarheels"—tapping the pines for turpentine sap. The fresh water streams and lakes abound in black bass, and wild ducks are plentiful on the Indian and Banana rivers and other places during the winter.

## THE TOP RAIL.

MINNESOTA FANNY, a thoroughbred English setter, owned by Troy Cantrell, of Lead Hill, Ark., wears spectacles. She was fitted with "specks" by an oculist, who found that she was suffering from astigmatism. For years Fanny has been known as the best hunting dog in Northwest Arkansas. Before the opening of the quail shooting season the dog went to the fields by herself, and on returning was badly scratched and showed evidence of bad falls and bumps. Her owner could not understand this until the opening day of the season. Fanny tried awfully hard, it seemed, but could not keep from falling into ditches and running into trees, and Mr. Cantrell then discovered that her eyes had become affected during the summer.

The dog's "specks" are held in place by straps and appear very much like goggles. The lenses are protected from damage by protruding rims of metal. The intelligent dog seems to understand their benefit and "hunts" like an old-timer now.

\* \* \*

MILFORD, Conn., March 3.—*Dear Grizzly King:* In your issue of Feb. 22 you printed a good duck story. Here is one better, only it does not happen to be a duck.

Mr. Sewell called at the house of Mr. Tinkham, on New Haven avenue. While there a hawk flew over and the chickens flew in all directions. Mr. Sewell said, "Get your gun and shoot him." Mr. Tinkham missed the first shot, but brought him down with the second barrel. The bird lay fluttering on the ground. Mr. Sewell said, "Go and finish him." So they went to the bird, and as Mr. Tinkham raised his gun to shoot a voice said, "What the h—l did you do that for!" Mr. Tinkham fell back and dropped his gun. Mr. Sewell said, "What did you say?" It was a large parrot they had wounded. Mr. Tinkham kept the bird ten days, when it died, and each morning it said, "D—n you" and "Thank you" when fed.

\* \* \*

Now, Grizzly, old chap, what do you make of this. It's a fact:

Representative Akin, of New York, introduced a resolution into the House to authorize the Secretary of Agriculture "to purchase six thoroughbred turkey buzzards and ninety-nine thoroughbred humming birds for breeding purposes."

The resolution recites that whether the results be gnats or fleas, the Secretary be directed to report to Congress whether such an experiment would be more valuable to the American farmer than the Department's present experiments of breeding zebras to Missouri mules, the offspring of which, Akin asserts "is a cross between a North Dakota jack rabbit and an Australian kangaroo."

GRIZZLY KING.

# NATURAL HISTORY

## The Band-Tailed Pigeon in Danger.

IN the Condor of Jan. 13 last, Prof. Joseph Grinnell has published an interesting contribution from the Museum of Vertebrate Zoology of the University of California. It deals with the outlook for conserving the band-tailed pigeon as a game bird of California.

This is one of the species so often confused with the passenger pigeon, but hardly, or not at all, found east of the Rocky Mountains. It occurs in Boulder county, Colorado, and in Western Texas, and thence south into Mexico, but chiefly on the west side of the Rocky Mountains, from British Columbia south to Mexico. Never flocking in such wonderful numbers as did the passenger pigeon, it still occurs in large, though loose, flocks, and in 1912, we are told, was slaughtered in California in enormous numbers. A writer there speaks of a single hunter who shipped from Los Olivos over 2,000 birds to the San Francisco and Los Angeles hotels in the winter of 1911-12, and quotes other people as saying that on Sundays that winter the morning train from San Luis Obispo to Los Olivos averaged 100 passengers who came to hunt pigeons, and that these passengers averaged about thirty birds apiece per day; in other words, 3,000 pigeons for a single day's hunting in one locality. The flight, for some reason or other, at this time was greater than had ever been seen in certain localities in this neighborhood, and the writer above quoted states that the birds "evidently hung around until they were simply shot out."

Mr. Grinnell discusses the general distribution of this species, its local distribution, relative numbers past and present, its food, nesting habits, rate of increase, its enemies and its value to man, and concludes by recommending legislation.

The passage of the Federal migratory bird law is quite certain to help this species, which has long been believed to be growing more and more scarce.

The band-tailed pigeon summers in the Transition Zone up and down the coast, and winters in the upper Sonoran Zone. In certain localities, therefore, it only goes higher up into the mountains in summer, and not necessarily to the north. It feeds largely on acorns, the berries of the madrone, of certain species of manzanita, and of the Christmas berry, or California holly. At certain seasons of the year it feeds on buds, and at other seasons gleans in the stubble fields. It is believed to breed only once a year, and the weight of testimony shows that the usual complement of eggs is one; in other words, the rate of increase of the band-tailed pigeon is extraordinarily slow. A valley quail is supposed to rear on an average of ten young per year, and a wild duck eight per year; but this paper says that the rate of increase of the band-tailed pigeon does not exceed that of deer, antelope and elk.

On the other hand, the enemies of the pigeon

are presumably few, and if it could be protected from the attacks of man, it might well enough hold its own. It does not breed in colonies, individual pairs scattering out through the woods and nesting at a distance from any others. Its nest is not easy to find. Its winter distribution is irregular, and it is presumably shy.

Mr. Grinnell believes that from every standpoint the pigeon deserves consideration as a game

BAND-TAILED PIGEON.

bird of California. He urges its total protection in that State for at least five years, and believes that only such a close season, at once put into effect, will save the band-tailed pigeon as a game bird. The danger which threatens it now is due to the fact that it has never been protected either by close season, bag limit, or a prohibition against its sale. It has been lawful to slaughter pigeons at any season, and in any numbers, and to sell them without restriction in the open market.

## The McLean Bill.

WHILE it seems hardly possible that any reader of FOREST AND STREAM may not be acquainted with the meaning of the McLean bill, rather than leave one reader uninformed we print the gist of the bill hereunder.—EDITOR.

"All wild geese, wild swans, brant, wild ducks, snipe, plover, woodcock, rail, wild pigeons and all other migratory game and insectivorous birds, which in their northern and southern migrations, pass through or do not remain permanently the entire year within the border of any State or Territory, shall hereafter be deemed to be within the custody and protection of the Government of the United States, and shall not be destroyed or taken contrary to regulations hereinafter provided therefor.

"The Department of Agriculture is hereby authorized and directed to adopt suitable regulations to give effect to the previous paragraph by prescribing and fixing closed seasons, having due regard to the zones of temperature, breeding habits, and times and line of migratory flight, thereby enabling the department to select and designate suitable districts for different portions of the country, and it shall be unlawful to shoot or by any device kill or seize and capture migratory birds within the protection of this law during said closed seasons, and any person who shall violate any of the provisions of this law for the protection of migratory birds shall be guilty of a misdemeanor and shall be fined not more than \$100 or imprisonment not more than ninety days, or both, in the discretion of the court.

"The Department of Agriculture, after the preparation of said regulations, shall cause the same to be made public, and shall allow a period of three months in which said regulation may be examined and considered before final adoption, permitting, when deemed proper, public hearings thereon, and after final adoption shall cause the same to be engrossed and submitted to the President of the United States for approval. Provided, however, that nothing herein contained shall be deemed to affect or interfere with the local laws of the States and Territories for the protection of non-migratory game or other birds resident and breeding within their borders, nor to prevent the States and Territories from enacting laws and regulations to promote and render efficient the regulations of the Department of Agriculture provided under this statute.

"There is hereby appropriated, out of the moneys in the Treasury and not otherwise appropriated, for the purpose of carrying out these provisions, the sum of \$10,000."

SIR THOMAS DEWAR has made a record in British East Africa by shooting four cheetahs in three minutes—all while the animals were running. This is a remarkable achievement, as cheetahs are great sprinters, and the average number shot in a year is about forty.—London Daily Mirror.

### Tanning Hides.

BUFFALO, N. Y., March 22.—*Editor Forest and Stream:* Will you not be kind enough to ask your readers for me for the following information:

First—A simple formula and explicit directions for tanning small pelts with the fur on.

Second—Some way of making the tanned pelt soft and pliable when finished.

I know there are many ways of tanning skins, but most of them are more or less complicated and the materials often difficult to obtain. I have tanned a good many small pelts with more or less success, though with, usually more than less trouble, only to have it come out hard and stiff as a board. The stereotyped directions for remedying this condition are to "work the skin back and forth across the edge of a board."

In all my experience I have only once succeeded in softening a skin, even after working on it until it wore out. The formula used in this one successful case I lost.

I have now a black squirrel skin which I tanned by means of salt and sulphuric acid, as follows:

1. Rub with salt, roll up, let lie over night.
2. Clean away all fat and grease.
3. Soak two days in a solution made as follows: Boil one quart of salt in one gallon of water, add one ounce of sulphuric acid.
4. When partly dry work over edge of board, etc.

Now this skin looks all right, just like a piece of coarse chamois in texture; but it is hard and stiff, although I have even doubled it up and rolled the crease between the palms of my hands for a long time. Again, I have before me a field mouse skin tanned all right (?), but so stiff that it crackles as I handle it.

The skins of many of the smallest mammals are very beautiful when considered as fur, and are always interesting and pleasing to most persons. This is especially so if they can be rendered perfectly soft and pliable, such as the leather of kid gloves or the small furs of retail trade.

I feel sure the subject would be of considerable interest to many of us, and if some of your readers who are successful in these directions would give us a little advice and instruction, I for one would be very grateful.

EDWARD A. EAMES.

### Goose-fish and Black Woodchuck.

PHILADELPHIA, Pa., March 10.—*Editor Forest and Stream:* In your issue of March 1 there appeared an article by your Brewer, Me., correspondent, W. M. Hardy, on goose-fish and black woodchuck, which interested me. He speaks of mention being made in a former article on Feb. 8. The writer referred to a black woodchuck as a rarity. I wish to say at this point that while I have been a resident of Philadelphia many years, I was raised as a boy and young man in Essex county, Vermont, and at that time black woodchucks were numerous. I call to mind one family of them had their burrow under the rough cobblestone foundation of an old sugar camp, and there always appeared to be a black woodchuck in each litter for a number of years. In my experience I should say

they were the same size and weight as the rest of the family, but for some reason were shy.

Now, in regard to the goose or monk-fish. Three years ago I was on Monhegan Island. While fishing for cod, we hooked a monk-fish, and he was a villainous looking customer, and when cut open his stomach was filled with sea birds, lobsters, etc. He appeared to me a voracious feeder, and with an enormous capacity for almost anything that came his way.

H. L. SHAW.

### Game and Forest Protection in Vermont.

WOODFORD, Vt., March 18.—*Editor Forest and Stream:* Now that the legislative business is over up here, we are planning in the Fish and Game Club to concentrate our attention on a patrol. To put a man in the field for a year will take quite a bit of money, and my plan for raising this is as follows: The club can very properly take steps to protect the forests and streams, as well as the fish and game, and accordingly I propose to have the patrol a fire patrol as well as game patrol. There are seventeen towns in the county, and I am going to ask each town to contribute \$25. It is within the power of the three selectmen of each town to do this. I am already unofficially assured of the Woodford and Bennington contributions. Then I mean to approach the large owners of timber land, of whom there are several. There are also three water power corporations in the county that are interested in the protection of the forests. I hope then to be able to get the State to contribute. Something can be done in a small way with personal contributions, perhaps a lecture to which admission will be charged, and, as has been suggested, perhaps some kind of a game dinner. The amount which can be realized in these ways, however, is relatively very small, though the value of these last three methods in stirring up enthusiasm and understanding is great. Under this plan, it is probable that the amount contributed by those interested chiefly in fire prevention will equal, if it does not exceed, that obtained from strictly game protection sources. All through the summer, however, the patrol will be doing quite as much fire prevention as game protection.

I want to strike a different note in all of this work from any other that I know of. I want to create a real sentiment in favor of game protection, where I can assure you that there is none now, and an intelligent understanding and co-operation in fire prevention. We have had very few fires, but they are bound to come unless this change is brought about. There is nothing like the understanding of fire among hunters, fishermen and campers in the Green Mountains that there is in the Adirondacks. In prosecuting the fire work, I want to put up signs that will be different. The usual procedure is to have a copy of the laws in fine print, on cloth. If you have been very much in touch with social work in New York you know that the old signs against spitting were mandatory and stated the penalty. The new ones read: "Please do not spit on the floor. To do so may spread disease." It has been much more effective. I want to get out signs that will reason with the appeal to one rather than threaten. A few signs will not do any good, but if one meets them often enough, I do not be-

lieve that they can fail to soak in. I think that is entirely feasible, but whether it is feasible to stir up any real sentiment for game protection in the mountain towns is quite another matter. However, I want to try it out, and the Fish and Game Club have so far approved of my methods. They are to get the patrol into the field, and let him enforce the law, decently and in order.

I do not believe in the system of keeping a game warden at home until some one with a grudge against some one else tells, any more than I believe that New York city could be run if all the police were kept in the stations until some one ran in and made a complaint; at the same time I most emphatically do not believe in hushing up wrong if there is a concerted attempt being made to enforce the law. But here in Vermont at the present time there is no such attempt being made. Accordingly I keep to myself what I know about violations, and the usual information about what is going on in the community still comes to me, though I am now president of a fish and game club and have expressed my intentions about a patrol quite clearly. While I have stated that I propose to have the law enforced if I am able, I have also stated that I propose to go about it in a certain way. Either I am believed, or else they have classed me with those good wardens who don't want to tell on their friends. It led to an amusing situation yesterday, which was annual town meeting day.

As chairman of a legislative committee looking after the town's interest in water power matters, I was making a report, and branched out from the private lake restriction to tell of some lectures that the club will give, to encourage a deeper interest in the preservation of wild life, promote better hunting and fishing, protect the cover, etc. I said that I would have a lot of free tickets, would pass them around, and that the Fish and Game Club promised good pictures, an interesting lecture, and a welcome to everyone. All the time I was face to face with good friends of mine who violate the laws, and I grinned at them, and they grinned at me. It was precisely Kipling's situation:

"They knew 'e stole; 'e knew they knowed;  
They didn't tell nor make a fuss,  
But winked at 'Omer down the road,  
An' 'e winked back—the same as us."

I am flattering myself that I have convinced the people immediately around here that I am in earnest, but that I am going about it in a certain way. They are so far perfectly cheerful about it, and to me, and that is a step in the direction of my program.

First—To create a sentiment in favor of observance of the law, in places where there has been none before.

Second—To enforce the law anyway, whether the sentiment exists or not. This alone will help to create sentiment.

WARWICK S. CARPENTER.

LON HOYLE, of Canaan, Pa., young at eighty-three, shot a silver gray fox. Its pelt is beautifully marked, and its value will run into enough money to keep the old trapper for at least a few short winters. Hoyle says it has taken him seventy-five years to get this beauty.

# GAME BAG AND GUN

## Deer in Connecticut.

PACKER, Conn., March 10.—*Editor Forest and Stream:* The local papers report a hearing the past week before the committee on fish and game of our Legislature as to changes in the law on deer.

Headlines in one paper read: "Deer Had No Friends; Open Season Wanted." When I came to the State to make my home six years since, the law protected them until 1911. When the Legislature was in session two years ago, I urged that law be changed to permit the killing of bucks only for a short season each fall, but full protection was extended for another six years in spite of the many protests from farmers and orchardists, as well as petitions from those who desired privilege of killing bucks.

There was little semblance of agreement among those who were heard as to what the law should do, except that killing should be permitted. Some of the sportsmen asked for a season of only a few days, with a limit of one buck to each hunter. Others wanted a longer season and larger limit. Some of the farmers wanted it lawful to kill at all seasons, with no limit as to number or regulations as to weapon.

Advocates of the rifle and shotgun each were strongly in favor of their own choice of hunting arms, some wanting rifles barred because of the danger in so thickly populated a State as Connecticut, while those who wished to use rifles urged the cruelty and inhumanity of wounding so many deer with shotguns, to die days later after great suffering and yield no benefit to the killer.

Every one seemed to agree that great damage was being done all over the State to farmers and fruit growers by the deer. Mr. Davis, one of our game commissioners, said he would hesitate a long time before prosecuting a man who killed a deer on his own land, even if it were not doing damage to crops. He believed a deer could have but one object in being on the land, to eat something. He claimed the deer were doing so much damage, and the claims were becoming so heavy, the State could not continue to pay them. I cannot agree with him in this after my six years' farming and gardening where deer are plentiful. They do eat some of my clover and fallen apples, but the pleasure of seeing them alone far more than repays any damage they have ever done. Many farmers take the same view, while others have a prejudice against sportsmen, and object to anything that will give them pleasure. Deer walk through my gardens and fields often doing absolutely no damage. I have followed their tracks through my sweet corn from time it was a few inches high to full grown, and have never found where a single blade or ear was bitten. Once I saw where a few bites were taken among the lima beans, and again some sunflower leaves were eaten, but no damage was done in either case. Buckwheat is often damaged badly if left long in the field, and deer are charged with eating

fruit trees. They walk under my apple trees summer and winter, and I have never seen where one twig was eaten. Much of the complaint is from farmers who "don't like a sportsman now-how."

I believe a large measure of protection should continue. I would favor killing bucks only, and only those with branching horns; no spikes. Permit only one deer to a hunter, and make resident license not less than five dollars, thus keeping many irresponsible and inexperienced hunters from the woods, and saving many deer and human lives. Possibly those who hunt on their own land only should be exempt from this tax. Non-residents should pay ten or fifteen dollars, our State being so convenient to New York city, Providence, Boston, Worcester, Springfield and other large cities. The revenue from these licenses could be used toward paying damages sustained by farmers and fruit growers.

Non-resident licenses in other States where deer may be killed are not to be had for a song. In Maine it is \$15; in New York, \$20, and in Michigan, \$25. The nearness of our State to New York city in particular should bring many deer hunters to our woodlands, and by next fall there should be an abundance of deer for all who wished to hunt. In going across two fields to a neighbor's a few days since, I saw the tracks where fifteen deer had crossed my path within the past twenty-four hours.

It will be most unfortunate if those who wish all protection removed should secure the legislation they are working for. Every earnest game protector in Connecticut should write the representatives from his district urging that proper protection still be given to our deer. All who can should be present if another hearing is had on the question. E. P. ROBINSON.

## Massachusetts Fish and Game League.

SPRINGFIELD, Mass., March 15.—*Editor Forest and Stream:* A State-wide association of fishermen and hunters was organized in Worcester at Hotel Pleasant on Thursday, the 13th instant, under the name of The Massachusetts Fish and Game League. Two members of the fish and game commission and several of their deputies were present with others, representing nearly every county in the State, there being about seventy-five. The purpose of the association is outlined in the discussion and in the platform which the league adopted, and is the propagation and protection of the fish and game.

Among those present were Dr. George W. Field, of Sharon, chairman of the Fish and Game Commission; George H. Graham, Springfield, member of the commission; Samuel D. Sherwood, John B. Smith, Henry L. Bowles; Dr. W. A. Smith, Arthur C. Merritt, E. A. Woodward, J. B. Crabtree, James H. Ripley, Frank S. Eaton, all of Springfield; O. S. Stull, of Longmeadow; Dr. F. H. Saunders, president of the Westfield Fox Club; J. H. Jones, of the Westfield Shooting Association; V. F. Skiff, of

the Westfield Anglers' Club; J. W. Hager, of the Dalton Rod and Gun Club; G. B. Bosworth, president of the East Hampton Fish and Game Association; C. F. Brevear, of Leominster; Dr. E. F. Lincoln, president of the Leominster Fish and Game Association; E. F. Strong, president of the Lee Sportsman's Association; F. E. H. Sheldon, of Chicopee; W. S. Holt, of Lowell; E. H. Rivenburg, of Chester; W. D. Moshier, of Hopkinton, president of the Brampton Gun Club; George W. Stevenson, Gilbertsville, president of the Lakeside Fish and Gun Club; George H. Chapin, Brookfield; Lyndon H. Coleman, secretary of the Pittsfield Anglers' Club; A. T. Mitten, Amherst; H. I. Tilton, of Boston, representing the National Sportsman; Salem D. Charles, of Boston, president of the Massachusetts Fish and Game Protective Association; T. J. O'Brien, of the Milford Fox Hunters' Club; N. J. Hardy, of Arlington, president of the Middlesex Sportsman's Association; Walter E. Horton, East Providence; Albert C. Green, Seekonk; Leander F. Herrick, J. W. Barney, Ernest Russell, Chetwood Smith, Frederick Bucklin (editor of the Worcester Gazette), all of Worcester. The meeting was called to order by William C. Adams, of Boston.

Samuel D. Sherwood, of Springfield, was chosen temporary chairman, and C. A. McLellan, of Brocton, temporary secretary. A motion made by Dr. Saunders, of Westfield, that a State league be formed and those present be enrolled as charter members was carried. A committee, consisting of Charles A. McLellan, of Brocton; Arthur C. Merritt, of Springfield; Dr. E. F. Lincoln, of Leominster; James W. Hager, of Dalton, and A. C. Spencer, of Beverly, together with George H. Graham and John B. Burnham as advisory members, was appointed to draft by-laws, constitution, etc. The committee reported as follows:

The name of this Association will be the Massachusetts Fish and Game League. The membership fee for annual membership shall be fifty cents, for donating membership \$5, and for life membership \$25. The object of this Association is to increase the supply of fish and game and song and insectivorous birds in this commonwealth.

The Treasurer, Secretary and Legislative Agent will be paid officials.

The annual meeting will be the first Monday in December at a place to be designated by the Board of Governors. The platform reported was as follows:

The Massachusetts Fish and Game League is the result of a conviction on the part of the fishermen and hunters in this commonwealth that the propagation and protection of fish and game will be most efficiently and permanently advanced if all persons interested proceed to that end in an orderly manner and through the agency of a State-wide association. The members of the League believe that every person who is interested in fishing and hunting or in

the protection of song and insectivorous birds should join in order to give the League the power of strength, resulting from a large membership, throughout the State.

We know that thousands of our people are interested in this great work, but their efforts have fallen short of the best attainable results through lack of thorough organization and through the misdirection of their energies.

We believe that a Board of Governors backed by thousands of members will command the respect of legislators, and that instead of passing measures of only local importance, legislation henceforth will be of a broad-gauged character, calculated primarily to increase the means of outdoor recreation by increasing the fish and game in this commonwealth, and as a result, making such recreation more attractive. We believe in keeping all persons interested in this work in touch with what legislation is proposed each year, and we shall endeavor through the press and by letter to keep the members and public informed as to what is going on at the State House, both in the Legislature and in the office of the Commissioners of Fisheries and Game.

We shall endeavor to create an influence for the propagation of fish and game in all sections of the State, and to enthuse all sportsmen to work for one object, namely, more fish and more game.

These officers were then chosen: President, Wm. J. H. Nourse, of Worcester; First Vice-Presidents—C. A. McLellan, of Brocton; Edward Clark, of Westfield, and Hon. F. O. Hardy, of Fitchburg; Treasurer-Secretary, John B. Smith, of Springfield; Legislative Council, Williams C. Adams, of Boston; Board of Governors—Edward F. Strong, of Lee; Charles M. Hallett, of Barnstable; Lyman S. Smith, of Edgartown, Henry L. Bowles, of Springfield; Sidney W. Winslow, Jr., of Beverly; N. J. Hardy, of Arlington; Wm. Holland, of Nantucket; Gus. O. Henderson, of Hingham; Roderick A. Taber, of Brocton; George B. Clark, of Suffolk, and Dr. E. R. Lincoln, of Leominster.

It was voted to empower the board to fill the vacancies in Franklin and Hampshire counties.

A vote of thanks was given to Salem D. Charles and William C. Adams for their work before the Legislative Committees on fisheries and game, to which both responded fittingly.

John B. Burnham, of New York, president of the American Game Protective and Propagation Association, spoke earnestly of the recent enactment of the McLean-Weeks bill by Congress for the Federal regulation of taking migratory birds.

The last official act of President Taft, he stated, was to sign this bill.

After remarks by Dr. Field, Ernest Russell, George H. Graham, and John B. Smith, who thanked the convention for the honor conferred upon him, adjournment was taken.

The launching of this organization is regarded as an important step in the right direction, and its progress will be watched with interest by all who have the cause at heart throughout the State. Much credit for the formation and organization of the League is due to the efforts of Geo. H. Graham and Wm. C. Adams. JOHN B. SMITH, Treas.-Sec'y.

## Reindeer in Alaska.

WASHINGTON, D. C., March 8.—*Editor Forest and Stream:* In order to relieve the conditions which existed among the ice-congested regions of Alaska, the Bureau of Education determined several years ago to solve to some degree the question of food supply for the natives. With this realization in mind, the Federal Government imported from Siberia a number of the reindeer which have proven a veritable boon to the Alaskan Indians. To-day the breeding and herding of the offspring of these imported reindeer have become a prominent feature of the industrial education of the Alaskan natives, and the principal activity of many of the arctic villages. At the last census there were 33,000 reindeer in Alaska, and to-day there is not a surplus Government reindeer north of the Kuskokwim River. Of the total number of reindeer in Alaska, 20,000 are owned by the natives. The policy of the Government is to turn over to the natives the reindeer as soon as they learn to herd and breed the animals and become aware of their usefulness. Last year, exclusive of the values which they received from utilizing the reindeer for food and clothing, the natives of Alaska derived more than \$18,000 as their share of the sales of the reindeer products. The Alaskan reindeer are distributed among forty-six herds divided among twenty-eight stations, eighteen of which are owned by the Government and ten by church missions. Loans are made of a certain number of animals either to the missions or experienced herdsmen, allowing the individual or concern to whom the loan is made to retain the reindeer for five years, at the end of which period the original number is returned. A herd of reindeer will double itself every three years, consequently those to whom loans are made are supplied with independent herds after returning the original loans to the Government. The reindeer not only furnishes its owner a means of transportation, but also affords food and clothing. The meat is easily cured, and is nutritious and delectable. The skins, from which are made the tight fitting trousers and "parka," protect both from cold and moisture. A garment made from one of these skins will keep the wearer warm in the severest of arctic weather.

When the reindeer were introduced, herdsman were brought from Siberia to instruct the natives in the care and breeding of the animals. Now, however, the Laplanders are the principal instructors. The Government does not turn over the animals to a native until he has been given a thorough course of training in caring for the reindeer. After serving an apprenticeship of five years, the native then becomes a herder. In this course the native is taught to care for, lasso, harness and drive the deer, as well as to watch and care for the fawns. During this period of apprenticeship the student is given each year a certain number of deer, and at the expiration of his term of apprenticeship, is given a herd to keep for five years, returning at the end of that time the original number of deer loaned. The herd which he has succeeded in raising for himself will furnish him and his family an independent livelihood. The native herdsman, with the growth of the mineral industry in Alaska, are earning large wages, hauling the products of the mines to distant transportation points,

and in addition supplying reindeer meat to the camps at interior points distant from the railway or steamboat lines.

Trained to the sledge, the reindeer can travel from forty to fifty miles in a day, maintaining a trot throughout the journey. They are used to transport the mail from Barrow, the most northern point on the American continent, south to Kotzebue, a distance of 650 miles. The Alaskan reindeer service is under the supervision of the U. S. Bureau of Education, and to the wisdom and management of this Government Bureau is due the development and success of the reindeer service. Each Government deer is marked with a small aluminum button placed in the ear, and all private owners are required to mark their animals with a brand, which is registered both with the local superintendent of the reindeer service and in the Bureau of Education.

In order to show the increase in the reindeer herds, the Governor of Alaska states that on June 30, 1911, there were a total of 33,629 reindeer, distributed among forty-six stations. Of the whole number, 20,071, or 60 per cent., are owned by 460 natives, 3,951 owned by the United States, 4,663 owned by missions and 4,491 owned by Laplanders. The income of the natives from the reindeer industry during the same year, including wages as herdsman, proceeds from the sale of meat and skins, and trapping in connection with their duties with the deer herds was \$42,216.10. In October, 1911, the first shipment of reindeer meat left Nome for Seattle and consisted of 125 carcasses or "meats" as the natives termed it. The shipment was made by a cold storage company and the shipment, consisting of approximately 18,000 pounds, found a ready sale in Seattle at prices ranging from twenty-five to seventy-five cents per pound, according to the cut. The Governor of Alaska estimates that there are in Northern and Western Alaska approximately 400,000 square miles of treeless regions, which are worthless for agricultural purposes, but which could furnish pasturage for 10,000,000 reindeer. He estimates that it is possible that with the present rate of increase there may be in Alaska in less than twenty-five years some 2,000,000 reindeer, and that the United States may draw some part of its meat supply from that source. RALEIGH RAINES.

## Deer in California Doomed Unless Killing Further Restricted.

THE following is an extract from a letter to J. S. Hunter, Assistant in Charge Game Conservation, Fish and Game Commission, written by Dr. T. S. Palmer, Assistant Chief, Bureau Biological Survey, U. S. Department of Agriculture:

"I note that your records show 6,847 deer killed in the State with several counties yet to be heard from. This seems a surprisingly large number and I hope soon to receive your detailed statement by counties. If such a record as this is kept for a few years the deer will be practically exterminated in some parts of the State."

Additional records, since received from additional counties, bring up the actual records of the total of deer killed in the State to nearly 7,500. Probably many deer killed were not recorded, so that a conservative estimate places the deer killed during last season in California at 10,000.

It would seem that the restriction of each hunter to one deer a season is an urgent necessity in California at this time.—Western Wild Life Call.

## Canoeing and Fishing in New Brunswick.

By S. E. SANGSTER (CANUCK)

**N**EW BRUNSWICK is known in every corner of the sportsman's world for its big game. The season 1912 saw some 1,000 nonresident hunters take out licenses, of which something like 94 per cent. got their moose, caribou, deer or bear. But the average outer looking for territory for an extended canoe cruise during June, July or August and for trout fishing rarely considers this forest province.

As regards the fishing, it is true that, owing to the greatest of all fighting fish (the Atlantic salmon) being here found, trout do not receive as much consideration as they should. Nevertheless, there are a hundred streams and forest-encircled lakes where the water fairly boils some evenings, caused by the rising of thousands of these speckled beauties.

The Tobique, Miramichi, Nepisiguit, Serpentine and Renous rivers offer much available salmon fishing, while their feeders are all full of speckled trout running from half a pound up to four and one-half pounds. The best time to try trout in the East is from June 10 on—although early May, immediately the ice goes out, is exceptionally good.

Salmon are usually found rising best between June 20 to Sept. 10 or 15. Last season the second and third weeks in July were barren—the fish refusing to rise for some unknown reason. While it is true that a great deal of the Province's salmon waters are controlled by clubs, the fact remains that on the Tobique, the Serpentine and other rivers a number of the bigger sportsmen's guides have arrangements whereby they can offer some excellent salmon pools. The average cost per diem for this kind of angling sport ranges from \$5 to \$9.

### SOME OF THE BEST CRUISES IN NEW BRUNSWICK.

The writer deems the following cruise one of the choicest propositions to-day to be had in the East. It is essentially a combination of all phases from the quiet trout waters of the forest-encircled lakes and ponds to the most expert pole-juggling on a "strong water" stream. The big game—the moose, caribou, deer and bear—abound and are daily seen during the summer season, offering exceptional opportunities for live-game photography, a "shooting" proposition ever fascinating. This cruise embraces an area of forestland, some of it fifty miles from the nearest back-settlement, in which lie some eighty lakes, ranging from nine miles down to ninety yards. Two years ago the writer counted, with his guide, in one day on the shores of one lake forty-two moose, seventeen deer and five caribou. Trout have been caught in all the lakes tried—while a number have never had a fly cast on their silvered waters. In one of the

lakes I found an abundance of togue (called gray trout in Ontario) which I took on a trolling-line on a "Bristol" with a No. 5 spoon; at the same time I took in eighteen speckled beauties running from half a pound to three pounds, all full of fight. I ran over the Provincial limit of thirty fish one day, using a barbless hook and returning them as caught; this, by the way, does the trout no harm, the vibration of the reel humming only seems to add to their zest, and I have seen them get to the fly the second time before any of their eager brethren could get a chance.

One lake I found particularly worthy of note—known as Mitnagic Lake—two miles long and one and a half miles wide—containing twenty-three wooded islands. The route lies to Oxbow, where the Ogilvy boys take you in charge. Their Home Lodge is the spot for the salmon fishing, which covers some five miles on the Tobique. The best fishing is between the lakes on the right-hand branch of the Tobique. Don't start after the salmon until you have cruised up through the trout waters—else you will never start for the trout. It is only a three-hour run by canoe from the salmon pools to the railway station, or one can continue thirty miles further, to where the Tobique joins the St. John River at Perth. The canoe route runs from the lakes at the head of the Tobique clear down to the Home Lodge and on to Perth, if desired—a total run of some 112 miles.

Another very similar cruise is in Gough's territory—one of the best big-game sections in America. It includes part of the right-hand branch of the Tobique, but swings into the Serpentine and Nepisiguit. The salmon fishing he controls is on the Serpentine and is also excellent; the canoe cruise totals something like ninety miles and offers trout all the way. It, too, has quiet lakes and ponds and, again, white-crested boiling streams through which you flash at toboggan speed. Gough has his camps built on the very watershed of New Brunswick, and in addition to being one of the choicest hunting sections in the open season, the kodak-shooting possibilities are unlimited during the summer season.

Another man who offers the best in a canoe cruise is Percy Falding; his route runs across the Province, up the Tobique, thence up the Little Tobique and down the Nepisiguit. The fishing includes salmon, speckled trout and togue. This, too, is through a virgin game land, full of moose, caribou, deer and bear. Incidentally a choice territory for fall hunting.

The Magaguadavic River cruise, starting from Scotts' Mills, a run of some forty-two miles with John Moore, is another fine trip, with excellent trout, but no salmon. The Can-

nain River run is also delightful cruising with good trout fishing, likewise the Renous River.

The writer is convinced that the fishing and canoeing possibilities of this eastern forest land are not appreciated to the degree to which they are entitled. Particularly for anglers from New York, Boston and the Eastern States, access is rapid and the game fish referred to found in abundance. Thousands of sportsmen go into this hinterland for moose and caribou; why they do not go for trout and salmon is a situation I cannot readily account for.

### Notes from New Zealand.

BY DRUMMOND SHARPE.

**DURING** the past weeks we have again envied our friends across the seas in their presumable experience of cool weather, for a heat wave has visited New Zealand, parching the earth and shrinking the streams. While it was with us, most people could realize the feelings of the wax candles, as they arched in their stands until both ends met. At last the wave passed and was followed by some extraordinary variations of temperature. Thus at the Ashburton Observatory, on Jan. 25, the highest reading of the thermometer marked 99 and the lowest 47; a difference in a day of 52 degrees. Doubtless variety is charming, as we have often heard, but as the "bud" said to the "boy," "This is so sudden." I am told that she used to say it anyway.

However, a heavy rainfall has come to put things right; notably one of our chief sports, "the famous trout fishing of New Zealand." The present season is by far the best of recent years, and though some of the most frequented fly streams have suffered from the drouth since Christmas, they recovered themselves wonderfully after the rain. In two fishing days on the Upper Opihi, near the village of Pleasant Point, 246 trout, averaging more than a pound, were landed by two rods. At Lake Taupo, in the North Island, some friends from the United States have been hauling out the big rainbows wholesale, but there the pleasure of a sportsman is lessened by the difficulty—I should say the impossibility—of finding a use for his catch. It is far more interesting to go a short way off the usual track. When avoiding the ordinary fishing stations it is easy to choose a locality where one can enjoy splendid sport without let or hindrance. A little "know how" is needful, but if that is not already in possession of the traveling angler, he will discover that the dwellers in the country districts are friendly folk, who are quite ready to assist him. Here a valuable hint—let him be chary in offering dollars as an exchange for the help he will re-

ceive. Generally speaking, a share of his catch will establish the best relations.

The big snow rivers have yielded some heavy takes. For instance, forty-three migratory trout weighing altogether 306 pounds in the "evening fishing"—usually an all night business—by two rods in the Rakaia. In this class of snow rivers the Rangitata is very near the top, and any traveling fisherman will surely be directed to its banks, but if he goes there, it will be well to heed the old Scotch saying, and "gang warily." Though it is a fine rapid river, containing huge fish, the Rangitata is a most treacherous water, and often has proved a death trap, even to those who have known it all their lives. Near the mouth there is a long tidal lagoon, separated from the South Pacific only by a shingle bank, through which the current cuts a new outlet at almost every fresh. The edges are constantly slipping in, and the angler, encumbered by waders, has little chance if he should happen to be standing in such a place. Last week the river was in flood, and while two fishermen were crossing the lagoon in a flat boat, a new channel opened suddenly through the shingle bank. They were carried out by the rush of water, and though the frail boat went safely through the breakers, it is feared that both were drowned. A tug searched for them, but found no trace. This, by the way, was the second accident of the kind, so all things considered, the mouth of the Rangitata is a good place to avoid.

Recently, while at the mouth of the Opihi, some anglers noticed an interesting migration of eels. These were coming in from the sea in an apparently endless procession; a closely swimming mass about six feet across, which passed slowly upward into the lagoon. A number were captured by the simple method of dragging a minnow flight through the shoal, and so to say, stoke-hauling them.

So far as the hunter is concerned, the month of January is one of those which afford him the fewest opportunities. By going far back into the bush, near the southern lakes or elsewhere, it is possible to get a shot at wild cattle, and again, at certain parts of the coast there are wild goats and a breed of wild sheep, which by the way carry very good trophies. With such exceptions there is little shooting in the first month, but for a change from everlasting practice at hares and rabbits, one may take a turn at wallabies—small kangaroo—on some of the South Canterbury hills. In the first case they were brought over from Australia, and liberated at Waimate, whence they have spread over the surrounding "runs." The pelts are valuable, and a shooting party may account for fifty or sixty in a day, but the sport, so-called, is not of a high order. It may be noted that the sinews in a wallaby's tail make by far the strongest and best mounts for the hooks on an artificial minnow. They are easily extracted, and last for any length of time. For the rest, in spite of his inactivity at the present moment, the hunter is beginning to look forward to some deer stalking in April, and finds that the prospect is very good.

In the commercial world a final reserve that has won many struggles is the indelible impression made upon countless minds through strong, continuous advertising.

## Albany Legislation.

ALBANY, N. Y., March 19—*Editor Forest and Stream:* To-day the bolt fell and expected legislation aimed at the Conservation Commission was introduced by Assemblyman Gurnett. One bill separates the Marine Fisheries entirely from the Fish and Game Department as now constituted, and represents the demands of the salt water fishermen as laid before the Governor. The other completely reorganizes the commission by making it single-headed, and very materially reducing its cost to the people. The bills in substance are as follows:

### THE NEW COMMISSION IDEA.

The measure, which is said to have been drawn for the Governor by Attorney Norton of the inquiry commission, in place of the present commission of three members, provides for a conservation department to be in charge of a single commissioner to have all the duties heretofore conferred upon the Forest Purchasing Board, the Forest, Fish and Game Commission, the Commissioners of Water Power on Black River, the State Water Supply Commission and the Conservation Commission. The Governor is to appoint the conservation commissioner with the advice and consent of the Senate, to serve for a six-year term at a salary of \$10,000 a year. He is to be removable by the Governor for neglect of duty or misconduct in office, upon charges, of which he must have a copy, and after reasonable opportunity to answer the charges and a public hearing before the Governor or a commissioner appointed by him. The accused conservation commissioner is to have the right to counsel at the trial. The provision for reimbursement to the secretary of his traveling and other expenses and disbursements is struck out. The salary of each of the three deputy commissioners is increased from \$3,500 to \$5,000 a year, and the provision for reimbursement to them of expenses and disbursements is struck out. The commissioner is authorized to appoint such engineers, clerks and other employes as are needed, and for which appropriation is made by the Legislature, the present provision requiring approval by the Governor being eliminated. The commissioner is authorized to establish additional divisions in the department. His jurisdiction to administer laws relating to shellfish is taken away. The commissioner is given power to designate the duties of the deputy commissioners. The deputy attorney general and assistants assigned by the attorney general for the work of the conservation department are not to be assigned to the legal department of the conservation department. The salaries of the assistants are to be fixed by the attorney general instead of by the conservation commission or commissioners. The attorney general is empowered to compromise and settle various kinds of actions. Actions to recover penalties are to be brought by the attorney general, the requirement for an order of the conservation commission prior to bringing such action is struck out. The salaries of the district forest rangers are to be fixed by the conservation commissioner according to the appropriation made for the purpose by the Legislature, the present limitation of \$1,500 and necessary expenses being struck out. Similarly the commissioner is to fix the annual salaries of the forest rangers, the present

limitation of \$75 per month and expenses struck out. The annual salary of the auditor of fire bills and accounts is to be as appropriated for by the Legislature instead of \$1,800 a year and necessary expenses. The salaries of the chief fire inspectors are to be as appropriated for by the Legislature instead of \$1,200 a year and expenses, and the salaries of game protectors are to be such as appropriated by the Legislature instead of \$900 a year. The salary of the fish culturists is to be as appropriated by the Legislature instead of \$4,000 and expenses. The conservation commissioner is given broader power to remove or discipline game protectors and fisheries protectors than are accorded to the Conservation Commission under present law. The compensation of game protectors and fisheries protectors are to be such as appropriated by the Legislature, the fixed amounts provided in the present law being struck out.

### MARINE FISHERIES BUREAU.

This measure creates a Department of Marine Fisheries to have jurisdiction over a marine district including all waters in and adjacent to Long Island, and all tidal waters of the State except Hudson River north of Verplanck's Point. The Governor is to appoint a commissioner, with the consent of the Senate. The commissioner must be a resident of the marine district, is to receive an annual salary of \$6,000, and to serve for a five-year term as the head of the department. The commissioner may appoint a deputy commissioner to receive a salary of \$5,000 a year and expenses not exceeding \$1,000, one confidential secretary at \$2,500 a year, one or more bacteriologists and such clerical assistants as are actually needed and for which appropriation shall have been made by the Legislature. The officers and employees of the department are to hold office during the pleasure of the commissioner. The commissioner may lease lands under water for the cultivation of shellfish to persons who have resided in the State one year or more, but oyster beds of natural growth shall not be leased unless they have for five years failed to produce natural oysters in sufficient quantities to enable persons to earn a livelihood by taking them. The letting of lands under water by the commissioner must be made after notice at a public auction and to the highest bidder. In no case must the price be less than twenty-five cents an acre annually. No lease may run for more than fifteen years. Under certain conditions the lessees may renew their leases for not exceeding fifteen years, and in case of failure to agree on terms for releasing, the holder of the original lease must be allowed an extension of one year to remove from the grounds all shellfish belonging to him. Leases may not be transferred except to persons who might have been original lessees. Provision is made for marking leased grounds, reports by lessees to the commissioner, collection by suit or compromise of rents in areas and summary proceedings to oust tenants whose rent is in arrears. An annual tax of twenty-five cents per acre is to be levied upon shellfish grounds owned, leased or possessed by any person. This is in lieu of all other taxes on such property. There are numerous provisions for inspection and regulating in detail the shellfish industry.

J. D. WHISH.

Published Weekly by the

FOREST AND STREAM PUBLISHING COMPANY,  
CHARLES OTIS, President.

W. G. BEECROFT, Secretary. W. J. GALLAGHER, Treasurer.  
127 Franklin Street, New York.

**CORRESPONDENCE**—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

**SUBSCRIPTIONS**: \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year.

This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

**ADVERTISEMENTS**: Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

### AGAIN THE BLACKFEET INDIANS.

At the Travel and Vacation Show at the Grand Central Palace in the space of the Great Northern Railway is a sight that may stir the blood of the old-time Western man, as it excites the curiosity of the young Easterner.

The Great Northern Railway has brought on from Western Montana, from the country adjacent to the famous Glacier National Park, a group of Blackfeet Indians. In the Great Northern space a lodge is pitched—one of the painted lodges of old times—and here are half a dozen men, two women, and a charming little child, dressed in the old-time costume of buckskin, embroidered with beads or porcupine quills, and, on special occasions, wearing war bonnets of the stiff tail feathers of the war eagle. Of these men the oldest is Three Bears, whose hair is turning white. Others are White Calf, Fish Wolf Robe, Long Time Sleeping, Lazy Boy, Big Top, and the wives of two of the men, and a child. The Indians are in charge of Mr. Shoemaker, of Helena, Montana.

White Calf, formerly known as Two Guns, is the son of that other White Calf, long chief of the Piegans. He was noted for his wisdom, his gentleness, his bravery in war, and his readiness to lead his people into new ways when he saw that these new ways could no longer be avoided. Something of his life, full of years, and the story of his death during a visit to Washington in January, 1903, was told at the time in FOREST AND STREAM.

To our mind the Great Northern Railway people have acted wisely in bringing on these Indians, and showing to prospective travelers to the Glacier National Park these kindly, friendly people, who in time to come, it is hoped, may act as guides for visitors to the park, and pilot inquisitive tourists through its rocky, yet beautiful fastnesses.

This is not the first time that a lot of Blackfeet Indians have appeared at an outdoor show in New York. In 1896 FOREST AND STREAM at the Sportsman's Show in Madison Square Garden, in March of that year, had an

attractive camp of Indians whom older readers may well remember. There was Bear Chief, sturdy of frame and square of jaw; there was Siksikáquan, tall, lean and lithe; there was White Antelope Woman and her altogether charming baby, Natóye, who for a week captured and held the sportsmen of the city and its vicinity. The newspapers of the time recognized a good thing when they saw it, and made a feature of Bear Chief, so that in a few days he became one of the best known men in New York, and those who walked by his side, while they were showing him the sights of what he called "this place of many houses," often heard people say to each other, "That is Bear Chief."

FOREST AND STREAM's camp of that day was necessarily railed off so that the public could look, but not touch. In the space was an old-time skin lodge with crossing lodge poles. A little to one side was a sweat house, with its nearby pile of stones for heating. Back of the lodge was a drying scaffold, hung with meat. There were thus seen three of the most characteristic features of the old-time Indian camp. It had been intended to have the Indians occupied at their primitive work, the man making or mending his arms, and the woman dressing hides, or making moccasins; but the public would not stand this. They wanted—each one of them apparently—to talk to Bear Chief; to ask questions of the mother and to see the baby, and there was nothing to do but yield to the pressure of circumstances.

The old-fashioned cow skin lodge was furnished with primitive implements, brought together on the Blackfoot Reservation. In the middle of the lodge burned a fire, and around it sat the family, dressed in the ornamented skin clothing of old times. Tied to the poles at the back of the lodge and hung up on a tripod without, were various sacred medicine bundles, whose history has been related, but which may not be spoken of by ordinary people. By the sweat house stood a painted buffalo skull, and not far from the lodge were the fresh killed heads and skins of mountain sheep and mountain goats.

He who looked at the sweat lodge, and was familiar with the ways of the red hunter of North America, could not but be thrilled as he remembered the prayers offered up under this frame, as the medicine man throws the water on the hot stones, and the thick steam rises. The pipe is lighted and held to the sky, to the ground and to the four directions, and then the smoke is blown toward the bull's skull, and the buffaloes are asked to help those who are now starting out to war, perhaps to great danger.

Of these FOREST AND STREAM Indians, Natóye the Indian baby was undoubtedly the most attractive and popular—the bright particular star. Dressed in the beaded buckskins worn by the children of well-to-do parents of fifty years ago, to her belt were attached a full set of tiny women's implements, elaborate and complete to the last detail. Natóye was only twenty months old, but she was pretty sturdy on her feet, and had a mind of her own. Sometimes she broke away from her parents, crept under the rail and went off by herself for a romp in the Garden. When she did that, it was not long before she was surrounded by a crowd of laughing people, among whom she was perfectly at home. She played hide and seek among the legs of the men,

or crowed and kicked in the arms of some lady. Presents were showered on her, dolls and toys and flowers. It was said of her, "She takes home with her perhaps half a peck of coppers and coins, and might have had many more had her freakishness not often led her to decline without thanks the offers of small coins, whose appearance did not suit her. Her favorite portemonnaie was her mouth, and this habit perhaps gave rise to the story of a daily newspaper man, which stated that Natóye had swallowed \$1.50 worth of pennies, which were to be searched for with the X-rays."

Yes, FOREST AND STREAM Indians of that day made their mark in New York, which lasted perhaps as long as marks made in New York often do. We think that the Great Northern Indians will make their mark, and we congratulate Mr. Noble and the peculiarly energetic and efficient staff on duty at the Great Northern space on a very happy idea well carried out.

### THE PLEASSED EXPRESSION.

THE expression of pleasure and satisfaction upon the faces of the thousands who visited our exhibit at the Travel and Vacation Show well repaid us for the considerable investment required to make the FOREST AND STREAM's camp the show place of the entire exhibition. It was labeled, Sportsman's Paradise, and so it was, except that the season was closed on everything there. However, an optical shot brought down a diversified bag. Bears, Chinese, ring-neck, golden and Hungarian pheasants, mallards, widgeon, cranes and what not else in the way of fancy fowl. A model camp and equipment, a stream and a canoe, fishing tackle; in fact, everything to gladden the heart of the sportsman was brought together in 2,600 feet of floor space, converted into a veritable forest, in which one could, in his imagination, hear the sighing of the wind and where the Blackfeet Indians sat about in perfect contentment.

### That Bear.

BY RALPH BENBROOK.

I've got him at last—  
Or he's got me;  
Right soon I'll know  
Which it will be!  
We'll see.  
You can scare some bear,  
But he don't scare;  
'Twon't do at all  
To miss that bear!  
By Goll!

Stand still, black Joe!  
Good horse, be still;  
You needn't shake so—  
That growl don't kill;  
Be still!  
It's the teeth that picks  
The bones all bare,  
But ours they shan't pick,  
We'll git that bear!  
You hear?

Mind your eye, now,  
You big fool bear!  
I'm goin' to plug you,  
If you please—where  
You prefer? Your heart?  
Crack! Good! True to hair!  
I sort o' guessed  
We'd fetch that bear  
Right there.

# ARCHERY

Forest and Stream is the official organ of the National Archery Association.

## The Point System of Scoring.

BY E. J. RENDTORFF

THE adoption of FOREST AND STREAM as our official organ for the discussion of archery matters has been one of the wisest moves made by the archery world during the last decade. During the past winter season, archery has not been dormant, but wide awake and progressive. Considerable interest has been shown, and the prospects for a revival of the sport are brighter than for many a long year past. We have, however, neglected to make full use of the opportunities afforded by FOREST AND STREAM. By this statement I mean that we do not enter sufficiently into friendly discussions of mooted archery questions.

The sport is old and full of traditions. The customs of ages cling to it tenaciously. We adhere to the practices of the hoary past and progress but slowly. The reason for this is that we do not enter sufficiently into a general discussion when new ideas are presented. Dr. Weston's articles suggesting a change in the point system of scoring offers a fruitful field for discussion. For fear that no other archer will consider the matter, I shall attempt to make a few remarks pertaining to the question, mainly for the reason that others may then follow my example. In a general discussion of the matter many suggestive ideas will be presented.

It is a good idea to let well enough alone, but it is another question when we consider a change in those matters where a grave injustice is more than possible. Thus, for example, the standard target is forty-eight inches in diameter, and every shot outside of the charmed circle is a miss. The outer circle counts one, and the center nine, with the other zones valued at three, five and seven. The selection of the size of the target is purely arbitrary, and so are the values assigned to the various colors. But what is the difference? Does not your black or gold count exactly the same as that of any other archer? Here is an example where a change would be extremely unwise and undesirable, in spite of the arbitrary, somewhat incorrect values assigned to the various colors of the target. It gives us all an equal chance. It is a good application of the square deal.

When it comes to the point system of scoring, a different condition presents itself. It does not necessarily give all an equal chance, but is frequently a matter of circumstances. Take, for example, the following three scores selected from actual American rounds:

	60Yds.	50Yds.	40Yds.	Score.	Points.
A .....	28 150	29 199	29 225	86 574	4
B .....	29 153	30 148	28 168	87 469	5
C .....	17 71	25 131	30 150	72 352	1

Here is an example of a poor archer, making a score of but 72-352, robbing an excellent score of the honors of the round. It gives an equal value to the scores 29-225 and 30-150. It is nothing short of a crime. Why should the

mediocre performance of C at forty yards be considered at all? If archer C had not been present, A and B would have tied in points with five each. On the basis of the highest score, A would have won the match by the skin of his teeth; but if B had made one more hit at forty yards, he would have won the honors by 5½ to 4½ points in spite of a total score of 100 less than A. This may be an unusual case, but it is taken from scores actually made. Consider, for example, Miss Brownell's score at the last tournament.

Now, I maintain that a method of scoring that allows these conditions is radically wrong and needs revision.

The conditions in the York round are somewhat different, for here an equal value in points is assigned to the twenty-four arrows at sixty yards, as to the seventy-two arrows at 100 yards. It is true that the expert at 100 yards has the advantage of the four points for total hits and total score, due to the larger number of arrows at that distance. This may tend to equalize the same number of points given for proficiency at sixty yards, as compared with 100 yards. There is, however, no similar compensating feature in the point system as applied to the American round, so that if the system is equitable for the one round, it is not for the other.

The two most popular alternatives that could

be used in place of the present point method are: First, an addition of hits and score, and second, the score alone. If the first method is adopted and a tie results, the winner should be the man with the highest score. In case of a tie in both hits and score, the old point method could be applied to decide the winner, but applied only to the records of the two archers that were tied, irrespective of the records made by competing archers.

Some archers might object to the second method on the basis of insufficient credit given to hits. We must consider that every miss detracts a possible nine from the total score, so that if the score alone is counted to determine the winner, the number of hits made still enters, not as a separate entity, but in its equivalent value as part of the total score. If this does not give hits the true value, then add the hits to the score. Either method is fairer, more rational and less apt to create bad feeling than our present method.

The relative value of hits and score is to a great extent a question of conditions. My two most abnormal scores at 100 yards, for an end of six arrows are: 1, 1, 1, 1, 1, 3=6-8 and 0, 0, 0, 5, 9, 9=3-23. The latter was to a great extent a matter of luck which is equalized in a large number of shots, and gave me less pleasure than the first end; still it is a great question

FOREST GROVE, OREGON, ARCHERS' CLUB.

as to which constitutes the better shooting. According to our hunting literature, the latter score would be considered far superior to the other one. Let us consider the three misses as compared to the three arrows in the white circle. According to our arbitrary size of target and value of the colors, the three white shots count infinitely more than the three misses. Judging from the position of the three missed arrows on the ground, it was probable that they missed the target by an average of about six inches, and thus came about thirty inches from the exact center. Now, are three shots twenty-two inches from the center infinitely better than three shots thirty inches away? It all depends upon our point of view.

It would be a simple matter to calculate the absolute value of hits and score, and place them on a mathematically correct basis, but this would involve the use of elliptical targets of increasing size and eccentricity as the distance from the archer becomes greater. This is, of course, unpracticable, and out of the question. With circular targets of one size for all distances, the true value of the various circles and the comparative values of hits compared to score varies, and will always remain arbitrary.

The greatest objection to the point system is the following reason: In measuring length, time, weight, or any other quantity, a definite, unalterable unit is always selected as the basis of estimation or comparison. We must do the same in archery. The unit employed in the point system is a variable quantity; i. e., the highest number of hits or score made by the various archers at each separate distance in that particular tournament, and not the highest attainable number of hits and score as it should be. The first principle in measuring is the adoption of a definite unit. This unit has been fixed for every sport but archery. In baseball, it is the number of runs; in football, the summation of the score; in golf, the number of strokes required to complete the course, etc., but in archery, it is a different quantity at every tournament and not fixed until every man has completed the round. How ridiculous it would seem, if in a game of baseball, we would figure the winner by assigning one point per inning to the team that made the most hits, irrespective of whether they were singles or home runs; one point per inning for the greatest score, or number of runs; two points for total hits; two more per total score; and then in case of a tie decide the game on the basis of the greater score! We use a similar method in archery, the only difference being that baseball has nine innings, while archery has three.

In comparing the scores of the past, we consider first the total score, with just a glance at the number of hits. We never see any mention of the number of points those scores were rated. Why not? Because they would be meaningless, not being based on a fixed unit of comparison. Still, we stick to the old irrational system.

### Scottish-American Archery Club.

JERSEY CITY, N. J., March 19.—*Editor Forest and Stream:* The Scottish-American Archery Club of New Jersey has made all preparations for their first full season on the range. Beginning September last with only two shooters, it speaks well for the sport itself, that at the season's finish on Thanksgiving Day there were eighteen regular members in the club, all unsolicited and as keen as a razor should be.

On the first Saturday in April, at the Hudson County Park, Jersey City, the first official attack on the target will be made, and as the possibilities are that at least thirty shooters will take part in the game this year, the park commissioners have been approached and promised to find the archers a new and more commodious range. As is well known in the State of New Jersey, the leading event of the athletic world is the annual sports and athletic carnival held at Schuetzen Park, Union Hill, each Decoration Day under the auspices of the Clan McLeod O. S. C. This year the care of the event has been placed with your humble servant with instructions to give archery a leading position on the program. This is the first time I believe that archery has been given its rightful place as a sporting event, and I trust that as many archers as can arrange to do so will rally round to make it a little more than a local event. Full particulars can be had by applying to our club secretary, Mr. John M. Cleland, 726 Sims street, West Hoboken, N. J.

JAMES DUFF.

### Red Cedar Bows.

BOSTON, Mass., March 20.—*Editor Forest and Stream:* Years ago—say, a small generation or so, we all were enthusiastically hunting for better bow wood. Among others we tried red cedar.

It was lovely to draw. And while it lasted was the best we could get, short of expensive yew. (I have a vague recollection that some opulent beggar who had opportunity to know declared it was better). But, alas! it would break in due time, without warning. Once a good stave came my way, and I made a bow of extra thickness. Some months later it suddenly broke in three pieces under an ordinary draw. Makers tried backing it with rawhide; but the result was always the same, so they gave it up.

Just now I'm out of the red-cedar clime, and my bow-arm is out of action also for months to come; but an idea has occurred to me.

The shock of the cord is doubtless the bow-wrecker. What if this was taken up by a rubber pad or ring around the nock as a shock absorber? I don't believe anyone has tried that.

Won't somebody "borrow" a red-cedar fence rail by the light of the moon, in that land where fence rails grow, and try out this idea?

JOHN PRESTON TRUE.

### Looking Forward to a Feast.

NASHVILLE, Tenn., Jan. 16.—*Editor Forest and Stream:* To say that I enjoyed E. J. Rendtorff's "An Archer's Confession of Faith," would be putting it rather mildly. I can hardly wait for the second part to appear. When it does, I shall file the whole gem away in the choicest part of my archery scrap-book, where it will be treasured, indeed.

Thanks to FOREST AND STREAM, the afore-said scrap-book has been feasting on a choice diet of late, such as Richardson's, "Hunting with the Long Bow"; the scholarly papers by Dr. Weston, to whom archers owe so much; Thompson's 'possum (figuratively feasting only). Thanks to Mr. Thompson for publishing that dandy skit. Shame on you Challis for not giving it to us at first; don't do it again.

This book of mine looks forward to a season of plenty. I fancy that I can see it emerging from the present year fat and sleek with material from the pens of the masters of the craft.

Wouldn't it be delightful to open FOREST AND STREAM and find more articles like the ones mentioned and these: "Training with the Long Bow," Richardson; "Developing the Hunting Arrow," Jackson; "Afield with the Bow," Thompson; "Lucky Shots," McGowan; "My Best Shots," Challis; "Discovering the Lost Art of the Bowyer," Barnes; "Flight Shots," Maxson; "Fledging Arrows," Duffy; "My Archery Collection," Taylor.

The writer has but little time to devote to the long bow, but looks forward to a time when he can have time to do a lot of serious training at target, as most of his shooting has been in the fields and forest with hunting arrows.

Am getting a little practice with hunting arrows at a target of baled straw in the back yard—distance forty to sixty feet. "Where there is a will, there's a way." Working on a new set of hunting arrows, to do a little poaching. Squirrels are right plentiful on an old estate near here, and I figure on going out with "Dutchy" some of these days and bagging a few. Am working over an old yew bow for her, for she wants to be an archer, too. Will advise you what luck we have.

A prosperous and happy New Year to the FOREST AND STREAM archery column and the readers and writers of the same.

EUCLID D. MILLER.

### Wayne Archers' Bid.

THE Wayne archers cordially invite the Eastern Archery Association to hold a tournament in Wayne on the Fourth of July, 1913.

Since the resurrection of the association in 1911, a mail match has been held each fall to determine the champions of the York and American rounds. The archers of the East have shot on the ranges of their respective clubs on a date previously agreed upon and their scores have been sent in to the secretary for comparison. It is now believed that this insipid sort of contest may be successfully replaced by a tournament of one day's duration in a place centrally enough located to be fairly easily reached from Boston and Pittsburgh and very easily from New York. Wayne is a suburb of Philadelphia; fourteen miles from Broad street station on the Main Line. Trains run every few minutes.

It is designed to shoot a single American round in the morning and a single York round in the afternoon, the winners to be awarded the championships for the succeeding year, and to be given the appropriate medals. If a reasonable number of good archers take part in the meet, it should do much to stimulate interest in archery in the vicinity of Philadelphia.

ALLAN C. HALE,

Secretary of Wayne Archers

## FOR ARCHERY SUPPLIES

Write for Archery Catalogue.

E. I. HORSMAN CO. 365 Broadway, N. Y.

Forest and Stream will give a weekly digest of Yachting and Motor Boating events from all over the country.

### Long Island Sound Y. R. A.

At the annual meeting of the Yacht Racing Association of Long Island Sound, held March 21, the following officers were elected: President, Stuyvesant Wainwright; Secretary, James W. Alker; Treasurer, George E. Roosevelt; Members of the Executive Committee—Frank Bowne Jones, Horace E. Boucher, Harry A. Jackson, Jr., and E. S. Willard. The racing rules as finally adopted at a previous meeting were ratified.

The dates chosen by the association for the season of 1913 are as follows: May 30, Harlem Y. C. annual and Bridgeport spring races; May 31, Knickerbocker Y. C. annual and Indian Harbor special; June 7, Manhasset Bay annual; June 14, Larchmont Y. C. spring; June 18, Indian Harbor race to New London; June 21, Seawanhaka-Corinthian special and New York A. C. Block Island race; June 25, Seawanhaka-Corinthian annual; June 28, New Rochelle annual; July 3, American Y. C. annual; July 4, Larchmont and Hartford annual; July 5, Oriental special and Riverside annual; July 12, Indian Harbor annual; July 19 to 26, Larchmont race week; Aug. 2, Stamford annual and Hempstead Harbor annual; Aug. 9, Horseshoe Harbor annual; Aug. 12, Huguenot annual; Aug. 16, Bridgeport annual; Aug. 23, New Rochelle special and Northport annual; Aug. 30, Seawanhaka-Corinthian fall; Sept. 1, Larchmont fall and Norwalk and Sachem's Head annuals; Sept. 6, Indian Harbor fall; Sept. 13, Manhasset Bay fall; Sept. 20, Indian Harbor Corinthian cup and Bayside annual; Sept. 23, Riverside special.

### Hudson River Y. R. A.

The following dates are set for club fixtures: Colonial Y. C.'s Cornfield Light race, July 12 and 13; Poughkeepsie race, Aug. 9 and 10; Shattemuc Yacht and Canoe Club races, at home, June 14 and Sept. 20; Tappan Zee Y. C. home races, July 4; Columbia Y. C., home races, June 7; New York Motor Boat Club, race to Albany, June 28; home races, July 19; Hudson River Y. C., relay race to Albany, May 30, and annual regatta of the association, on Labor Day, and the Saturday and Sunday preceding it, to be held off Croton Point.

The new one-design class adopted is similar to the Bayside Birds and the new one-design of Port Washington Y. C. It will be called the Indian class.

### Eastern Y. C.

BOSTON, Mass., March 22.—The fleet will rendezvous at Marblehead on July 22. The fleet will start for the coast of Maine on the morning of July 3, and after several racing and cruising runs from port to port, the cruise will end and the fleet disband at Bar Harbor on July 10.

Among the prizes will be a cup for sloops presented by Morton F. Plant, and another for schooners presented by Harry L. Maxwell.

The ocean race and the Eastern Y. C.'s annual regatta will be held before the cruise, the former starting from Newport on Saturday, June 28, and the latter off Marblehead on Tuesday, July 1. S. Reed Anthony has offered a cup for a race off Marblehead for the new class of 50-foot one-design sloops.

### Yacht Sales.

THE Hollis Burgess yacht agency has sold the 30-foot waterline schooner Fame, owned by B. B. Crowninshield, of Boston, to Vice-Commodore Roger Upton, of the Boston Y. C., and the Friendship built sloop Prowler, owned by L. M. Little, of Newburyport, Mass., to C. C. Kendrick, of New York; the 25-foot waterline auxiliary sloop Rembha, owned by Dr. Wm. G. Curtis, of Wollaston, Mass., to Dr. Charles C. Foster, of Cambridge, Mass.; the 21-foot knockabout Spinster, owned by Harold Amory, of Boston, to Dr. R. G. Horne, of Watertown, Mass.; the Sonder class sloop Panther, owned by Augustus P. Loring, of Boston, to Alfred E. Chase, of Lynn, Mass., and the Sonder class sloop Seal, owned by Herbert M. Sears, of Boston, to B. B. Crowninshield, of Boston.

### Pass the Flint-Cary Bill Without Amendment!

IN order to avoid the clear issue as to the non-sale of all wild game, several compromise measures have been proposed. Among these are suggestions (1) to close the season for two years on all game, and then to permit its sale, (2) to put the market hunter under bond to keep the law, (3) to require that sportsmen divide their bags and sell a percentage.

Each one of these proposals is open to the fatal objection that it would utterly fail to remedy the present conditions under which a premium is put on the extermination of the species. Commercialism, which has already signed the death warrant of some of the finest game in America and California, is eliminated by none of them.

The first would merely postpone the extirpation. The second would throw a few more obstacles in the way of the market hunter, who is already well accustomed to evasions—but it would not eliminate him! The third would go far to guarantee that every sportsman killed the limit every time he took the field, and this is something that the wild life cannot stand.

Each is a compromise measure which is prejudicial to the interest of the wild game, and so prejudicial to the interest of all residents of California.

Let us face the issue squarely. Commercialism or non-commercialism? Sale or non-sale? Let the people's voice be heard on this matter!

Insist upon the passage of the Flint-Cary bill without amendment.—Western Wild Life Call.

### Mongolia the Bleak.

BEYOND the forests of Siberia lies the barren center of the Asiatic continent—that inhospitable, desolate land of nakedness, the haunt of roaming nomads, a region of bitter winds and hostile climate. In the very heart of the greatest continent, in that part of the earth's surface which is furthest removed from the sea, lies the lone, bleak land of Mongolia.

In all its immense area, says a writer in the Wide World Magazine, there are but few towns where men live settled lives, and it possesses but a scanty population, while, because by its very position it is cut off from the softening influence of the sea, it presents a dreary aspect of windy wastes, endless steppes and barren mountains.

Wild and wide is Mongolia, stretching as it does for 2,000 miles in the savage splendor of limitless expanse. Man cannot rest in such a country nor live a sedentary life. It has been the birthplace of the greatest migrations the world has ever seen. Restless movement, in fact, is the very spirit of Mongolia. What history this land could tell if only its deserts could speak and its mountains bear witness! Here rode Genghis, the Mongol Alexander, the most ruthless and inhuman destroyer the world has experienced. On these wide plateaus wandered those Mongol herdsmen who fed their flocks and moved their camps with complete content and splendid isolation, until at last the wanderlust came over them, and they burst out from their fastnesses to overrun the world.

# TRAP SHOOTING

Forest and Stream is an Honorary Member of the Interstate Association for the Promotion of Trapshooting.

## Fixtures.

If you want your shoot to be announced here, send a notice like the following:

### REGISTERED TOURNAMENTS.

- April 8-10.—San Antonio, Tex.—The Interstate Association's Southwestern Handicap, under auspices of the San Antonio Gun Club; \$1,000 added money. Winner of first place in the Southwestern Handicap guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. E. E. Shaner, Mgr., Pittsburgh, Pa.
- April 9-10.—Lincoln, Neb.—Capitol Beach G. C. T. C. Brownfield, Pres.
- April 10.—Atglen (Pa.) G. C. Lloyd R. Lewis, Mgr.
- April 14-16.—New Orleans, La.—City Park G. C. J. M. Lionnet, Mgr.
- April 16.—Mt. Holly (N. J.) G. C. A. J. Delleste, Sec'y.
- April 17.—Syracuse, N. Y.—Messina Springs G. C. W. E. Hookway, Sec'y.
- April 17-19.—Hot Springs, Ark.—Arkansas State tournament, under auspices of Hot Springs G. C. H. A. Whittington, Sec'y.
- April 19.—Lawrence (Mass.) Fish and Game Protective Association. A. C. Gray, Sec'y.
- April 23.—Grundy Center (Ia.) G. C. Frank W. Callaway, Sec'y.
- April 23-24.—Wellington, Mass.—Paleface Shooting Association. Walter F. Clarke, Pres.
- April 23-24.—Brantley (Ala.) G. C. A. H. Hill, Pres.
- April 24.—Maysville, Ky.—Mason County G. C. Wm. H. Hall, Mgr.
- April 26.—Pottstown (Pa.) G. C. C. A. Fries, Sec'y.
- April 29.—Guernsey, Ia.—Du Pont G. C. J. W. Dobbins, President.
- April 29-30.—Moberly (Mo.) G. C. J. A. Melton, Sec'y.
- April 29-May 1.—Pond Creek, Okla.—Oklahoma State tournament, under auspices of Pond Creek G. C. Wm. M. Hite, Mgr.
- May 1-2.—Philadelphia, Pa.—Keystone Shooting League. G. F. Hamlin, Sec'y.
- May 3.—Rittersville, Pa.—Lehigh R. and G. C. H. F. Koch, Sec'y.
- May 3.—Bethel, Conn.—Western Connecticut T. S. L. tournament, under auspices of Bethel G. C. C. K. Bailey, Sec'y.
- May 4-5.—San Diego, Cal.—Pastime G. C. George P. Muchmore, Sec'y.
- May 5-6.—Laramie, Wyo.—Gem City Gun Club. Tyler A. Rogers, Pres.
- May 6.—Vicksburg (Miss.) G. C. J. J. Bradfield, Mgr.
- May 6.—Pitcairn, Pa.—Western Pennsylvania T. S. L. tournament, under auspices of United G. C. Louis Lautenslager, Pres.
- May 6-7.—Eagle Grove (Ia.) G. C. A. L. Yearous, Sec. Mgr.
- May 6-7.—Montpelier (Vt.) G. C. H. B. Moulton, Pres.
- May 7.—Tyndall (S. D.) G. C. F. F. Chladek, Sec'y.
- May 8.—Camden (Ark.) G. C. J. P. Wright, Mgr.
- May 8-10.—Hutchinson, Kan.—Kansas State tournament, under auspices of Hutchinson G. C. Chas. T. Rankin, Sec'y.
- May 7.—Seneca Falls (N. Y.) G. C. C. L. Frantz, Mgr.
- May 7.—Hicksville (O.) G. C. C. E. Maxwell, Sec'y.
- May 7-8.—Dayton, Ky.—Northern Kentucky G. C. H. R. Irwin, Mgr.
- May 7-8.—Americus, Ga.—Georgia State tournament, under auspices of Americus G. C. J. W. Hightower, Pres.
- May 7-8.—Sunbury, Pa.—Sunbury-Selinsgrove G. C. J. W. Schoffstall, Sec'y.
- May 8.—Watertown (Wis.) G. C. B. H. Rieck, Sec'y.
- May 8-9.—Kankakee (Ill.) G. C. E. F. Radeke, Sec'y.
- May 9.—Portage (Wis.) G. C. J. Raup, Pres.
- May 9-11.—Los Angeles (Cal.) G. C. Stanton A. Bruner, Sec'y.
- May 10.—Marysville (Pa.) S. A. M. L. Wise, Vice-Pres.
- May 12.—Mt. Airy (Md.) G. C. Ira D. Watkins, Sec'y.
- May 12-13.—Portland (Ore.) G. C. J. E. Cullison, Pres.
- May 13-15.—York, Pa.—Pennsylvania State tournament, under auspices of York City G. C. N. M. McSherry, Sec'y.
- May 13-15.—Montgomery, Ala.—Interstate Association's eighth Southern Handicap tournament, under auspices Capital City G. C.; \$1,000 added money. Winner of first place guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. Elmer E. Shaner, Mgr., Pittsburgh.
- May 14.—Fulton (N. Y.) G. and G. C. B. J. O'Grady, Pres.
- May 14-15.—Waterloo (Ia.) G. C. Nick Webber, Pres.
- May 14-15.—Pipestone (Minn.) G. C. H. T. Ober, Sec'y.
- May 15.—Shelbyville, Ill.—Shelby County G. C. Geo. L. Dearing, Sec'y.
- May 15.—Riverside (Ill.) G. C. E. M. Collis, Sec'y.
- May 15.—Freeport (Ill.) G. C. J. W. James, Sec'y.
- May 15.—Clayton, O.—Salem G. C. F. C. Koch, Pres.
- May 17.—Phillipsburg, N. J.—Alert G. C. Edw. F. Markley, Mgr.
- May 20.—Albia, Ia.—Monroe County Fish and Game Protective Association. Theo. B. Perry, Jr., Pres.
- May 20.—Milton Junction (Wis.) G. C. W. H. Smith, Sec'y.
- May 20-21.—Wenatchee (Wash.) R. and G. C. Chas. E. Owens, Pres.
- May 20.—Pillow (Pa.) G. C. J. A. Bingham, Sec'y.
- May 20-21.—Columbus (Neb.) G. C. G. A. Schroeder, Sec'y.
- May 20-22.—Temple, Tex.—Texas State tournament, under auspices of the Temple G. C. R. I. Tennant, Pres.
- May 21.—Brazil (Ind.) R. & G. C. W. T. Crabb, Sec'y.
- May 21.—Windsor (Mo.) G. C. W. T. Jordan, Sec'y.
- May 22.—Mt. Morris, Ill.—Mt. Morris G. C. C. J. Price, Sec'y.
- May 22.—Aurelia (Ia.) G. C. Frank R. Welch, Sec'y.
- May 22.—Syracuse, N. Y.—Onondaga County G. C. T. E. Clay, Pres.
- May 22.—Seranton (Pa.) R. & G. C. M. F. Bohn, Sec'y.
- May 22.—Altoona, Pa.—Central Pennsylvania T. S. A. tournament, under auspices of Blair County Road Drivers' Association. Jack Waltz, Sec'y.
- May 22-25.—Winchester, Ky.—Kentucky State tournament, under auspices of Winchester G. C. C. B. Strother, Sec'y.
- May 23.—Nicholson (Pa.) R. and G. C. L. A. Wright, Sec'y.
- May 23.—Emporia (Kans.) G. C. Chas. Ford, Sec'y.
- May 24.—Stratford, Ont., Canada.—Pastime G. C. Wm. Boles, Sec'y.
- May 24.—Newmanstown (Pa.) G. C. F. S. Rader, Sec'y.
- May 24.—New Haven, Conn.—Western Connecticut T. S. L. tournament, under auspices of New Haven G. C. F. W. Smith, Pres.
- May 24.—Gananoque, Canada.—Thousand Islands G. C. C. A. Lewis, Sec'y.
- May 24-25.—St. Louis (Mo.) T. S. A. L. Ebert, Sec'y.
- May 27.—Fairmont (W. Va.) G. C. Ed. H. Taylor, Sec'y.
- May 27.—Sikeston (Mo.) G. C. Wm. H. Tanner, Sec'y.
- May 27-28.—Paragould (Ark.) G. C. C. W. Stedman, Sec. Mgr.
- May 27.—Norwich, N. Y.—Chenango County F., G. and G. C. E. D. Borden, Mgr.
- May 27.—Brookfield (Wis.) G. C. J. B. Pierce, Sec'y.
- May 27-29.—Peoria, Ill.—Illinois State tournament, under the auspices of Illinois State S. A. R. Scholes, Sec'y.
- May 27-29.—Fort Dodge, Ia.—Iowa State tournament, under auspices of the Fort Dodge Gun Club. Jos. Kautzky, Mgr.
- May 27-29.—N. Platte, Neb.—Nebraska State tournament, under auspices of Buffalo Bill G. C. J. C. Den, Sec'y.
- May 28.—Chesapeake City (Md.) G. C. H. L. Worthington, Mgr.
- May 28.—Morocco (Ind.) G. C. Jas. C. Murphy, Sec'y.
- May 28.—Galion (O.) G. C. H. D. Smart, Pres.
- May 28-30.—Ogden, Utah.—Idaho-Utah Sportsmen's Association tournament, under auspices of the Ogden G. C. George E. Browning, Sec'y.
- May 29.—Vergas (Minn.) R. & G. C. Chas. A. Peterson, Pres.
- May 29.—Marion (O.) G. C. N. F. Titton, Sec'y.
- May 30.—Cleveland (O.) G. C. F. H. Wallace, Mgr.
- May 30.—Menominee Falls (Wis.) G. C. J. A. Pike, Sec. Mgr.
- May 30.—Utica, N. Y.—Genesee G. C. E. J. Loughlin, Sec'y.
- May 30.—Lantonia (Ky.) G. C. H. S. Connelly, Sec'y.
- May 30.—Waukegan (Ill.) S. A. B. Tompkins, Sec'y.
- May 30.—Austerlitz, Ky.—Hill Top G. C. Thos. H. Clay, Jr., Sec'y.
- May 30.—Olyphant, Pa.—Social R. and G. C. Thos. A. Bell, Sec'y.
- May 30.—Waynesboro (Va.) G. C. S. T. Day, Sec'y.

 Oct. 14.—Rising Sun (Md.) G. C. H. L. Worthington, Vice-Pres.

**DRIVERS AND TWISTERS.**

The Merrivether Gun Club will hold its tournament this year on June 10 and 11. Added money and prizes will be about \$300, and everything will be done to make the shoot a success, as in years gone by. The shoot will be registered, and there will be between fifty and sixty shooters in attendance. For further particulars address President T. B. Slade, Warm Springs, Ga.

John D. Schaeffer, of Penbrook, challenged John G. Martin, of Harrisburg, the present Pennsylvania State challenge trophy holder, which was shot at 25 birds on the Paxtonia grounds on March 18. Martin defended his title with a score of 23 against his challenger's 18. A number of prominent wing shots viewed the contest.

Secretary A. K. Ludwig, of the Hercules Gun Club, Temple, Pa., announces a grand target shoot of 100 birds in one event of 10 targets, 60 cents entrance, and six of 15 targets, \$1.15 entrance, with an additional event of 5 pairs of doubles, for Saturday, April 5, under the Interstate Association rules, divided under the percentage system. This event will be sprung at 12:30 P. M. from the traps on their renowned Cotopaxi grounds, known as one of the record-breaking shooting grounds. All sportsmen are cordially invited to attend and participate.

Daniel F. McMahon, Chairman Trapshooting Committee, New York A. C., writes: "In addition to the events already on our program for April 2 and 3 we have decided to add a five-man interclub picked team shoot, and give as prizes, with no additional entrance fee, a solid gold medal to each member of the winning team; sterling silver to each member of the second team; a bronze medal to each member of the third team. The match has already aroused considerable interest, and we expect teams from the Chicago Athletic Club, Pittsburgh Athletic Association, Seaside Gun Club, of Bridgeport, Conn., Schenectady Gun Club, Du Pont Gun Club, of Wilmington, Del., Boston Athletic Association, Paleface

# World's Indoor Record Smashed Again

Bridgeport Team Shooting  
**LES MOK . 22 s**  
 Score 998 x 1000

Against the New Orleans Team in the N. R. A. Indoor League Matches.

W. W. Naramore, 200	C. B. Naramore, 200
M. J. Lyons, 200	C. R. Disbrow, 199
C. W. Van Stone, 199	

In making this unparalleled score, which breaks their former World's Record of 996 x 1000, the Bridgeport Team used *Remington-UMC* Long Rifle Lesmok .22s in the new "Indoor Target" load.

This same ammunition was used by the Harvard University Team in hanging up a new Intercollegiate record of 978 x 1000 in the N. R. A. Intercollegiate Matches

*The Choice of Crack Marksmen Should Be Your Choice*

**REMINGTON ARMS—UNION METALLIC CARTRIDGE CO., 299 Broadway, New York City**

Gun Club, of Boston, and the Portland Gun Club. Would also state that a club will be permitted to enter as many teams as it sees fit."

The open shoot of the Port Washington (L. I.) Yacht Club will be held on Thursday, April 10. The birds will begin to fly at 12 o'clock sharp. Luncheon will be served from 12 to 6 P. M. to all guests. The race will be at 100 birds, entrance \$3. Three prizes will be awarded to the three high guns. Also a club prize to the five high men from one club. Optional sweepstakes with each 25-bird event. All kinds of shells and loads will be on sale. Bring the ladies along. Club house will be open and fine opportunity afforded to view shooting from upper veranda. Trains leave Pennsylvania Station, New York city, for Port Washington, 10:09 and 11:07 A.M. and 12:17, 1:15 and 2:18 P. M. The Trapshooting Committee consists of C. F. Prankard, L. B. Smull and Chas. L. Hyde.

W. G. BEECROFT.

Essex County Country Club.

SHORT HILLS, N. J., March 22.—Essex County Country Club shoot-out of Baltusrol Golf Club in a ten-man team match here to-day, final reckoning reading 679 to 641. A. Bryan, with 80, was high gun.

F. W. Cowperthwaite won take-home trophy; S. H. Browne lifted a leg on March cup. G. J. Williams, Dr. Granbery and B. G. Fincke tied up on Cowperthwaite trophy, and G. J. Williams purloined limb on club championship. Scores:

Table with 2 columns: Name and Score. Includes Take-home trophy, 25 targets, handicap; March cup, 50 targets, handicap; Cowperthwaite trophy, 12 pairs, handicap; Club championship cup, scratch, 25 targets.

Table with 2 columns: Name and Score. Includes Team shoot, 100 targets per man; Essex County C. C.; Baltusrol G. C.

Table with 2 columns: Name and Score. Includes Pottstown Gun Club scores.

Pottstown Gun Club.

POTTSTOWN, Pa., March 21.—The live-bird shoot held at Ringing Hill grounds was a success, in spite of the occasional showers. Twenty-two contestants entered the race, which began at 10:30 A. M. with one bird up. At 12 o'clock an intermission was taken to partake of the chicken dinner prepared especially by the hostess, Mrs. H. J. Wolf—"Ye boys know this is Fred's favorite dish." George W. Hepler, of Harrisburg, the renowned amateur wing shot and former amateur State chairman, led the field with a straight score, receiving honorary mention for this efficient work by the applause of his coaches and co-shooters. George kept his nerve, steadfastly plunging every gamester as it departed from the traps. "George met the enemy, and they were his."

Mr. Eck, captain of the Elm Leaf Gun Club, of Reading, tied with Dinger, of Harrisburg; Lesneski, of Lebanon; Emmers, of Royersford, and Ladner, of Pottstown, for second honors, with 14 kills to their credit. Eck showed exceptional skill, losing his eighth bird, which ranked him among the crack marksmen in attendance. Dinger, a former State amateur champion trophy holder, lost his fourth bird, an old crow at that by its looks. It looked as though Fred wanted to spare him, as he was never touched. This landed him second. Lesneski, an old-timer, of Lebanon, landed also among the second honors, but would have landed straight, were it not for one of the trappers stepping inside the boundary while Walter was ready to fire his second load on his seventh bird, cutting off his view, then killing it out of bounds.

Emmers, of Royersford, had a straight score up to his 15th bird, which he missed. This bird was in the game before, darting off like lightning as soon as the trap was sprung, rising directly for about 15 feet, then off she went without a scratch. The crowd was gasping with surprise. This placed Hepler as the only straight in the race.

Rehrig, of Schuylkill Haven; Fred Wertz, of Fleetwood, and Smith, of Pottstown, tied on the hoodoo 13

for third honors. Rehrig, who is known as the renowned Schuylkill county wing shot, killed 4 of his birds with one barrel—very commendable.

Tyson, of Lebanon, dropped 5 from his bunch, which is below his average.

Fred Wertz kept his nerve well, but dropped his seventh and ninth, landing third honors.

Smith made a very creditable score. "No wonder he let his whiskers grow." Geist killed them all, but two dropped dead out of bounds. Tholan, of Phoenixville, shot 8 of his birds, with one barrel, which is very creditable to him. It shows a keen, skillful eye.

Frank Wertz, of Reading, came very late, was unlucky all day, scoring away below his general average. On Feb. 8, at Spring Valley, he ranked among the high honors with 19 out of the 20 birds.

Harry S. Coldren, of Reading, lost three of his birds, which is exceptionally low for his record. The day was warm and evidently too many flies on his gun.

Lessig lost his first and fifth out of bounds, as well as Geist.

The birds were strong, heavy, recently caught barnyard gamesters, which accounts for low scores. The management was under supervision of A. A. Fink, of Reading. A. K. Ludwig, also of Reading, served as referee and scorer, keeping the game rolling. Reading's renowned wingshot trio—Messrs. Adams, Marberger and Behm—were missed to-day. These are the boys who generally land the bacon.

Another race of 15 birds will be held on the Mill Park grounds, under the auspices of the Pottstown Gun Club on March 29, under the management of Jos. D. Smith and Norman Hanley. Handicaps 27 to 30yds. A fine lot of selected birds has been engaged for this tournament. A fair attendance is anticipated. Shoot starts at 12 o'clock noon.

Table with 2 columns: Name and Score. Includes Martin, Dinger, Oliver, Rehrig, Schaeffer, Eick, Alger, Lesneski, Tyson, Hepler, Lessig, Coldren, Emmers, Frank Wertz, Fred Wertz, Melot, Keifreider, Smith, Hanley, Tholan, Geist, Ladner.

Siwanoy Country Club.

MR. VERNON, N. Y., March 22.—Competition for the Gallagher trophy, or, rather trophies presented by Mr. William G. Gallagher, brought out all of those club members who had not won a trophy during the season 1912-13, as these were the conditions laid down by general "Bill," the donor. First prize was won by Mr. C. H. Hadlock, who made a full score of 50 with his handicap. G. A. Wylie and A. M. Dalton tied for second place, each having a score of 44 with their handicaps of 6 each. The place was won by Wylie on the shoot-off.

The first two legs on the Stevens trophy, which is handicapped on the added target system, was won by L. G. Bond with (10) 47, which entitled him to the but-ctn. Scores:

Table with 2 columns: Name and Score. Includes Stevens trophy, 50 targets, handicap; Gallagher take-home trophy, 50 targets, handicap.

Table with 2 columns: Name and Score. Includes Gallagher take-home trophy, 50 targets, handicap.

Glenwood C. C.

GLENWOOD, L. I., March 22.—Two trophy shoots and five 25-target sweepstakes were shot here to-day. The Berners took all but two events. Summary:

Table with 2 columns: Name and Score. Includes C. W. Bernier Cup, 50 clay birds, handicap; Sweepstake, 25 clay birds, handicap.

Table with 2 columns: Name and Score. Includes Sweepstake, 25 clay birds, handicap.

Table with 2 columns: Name and Score. Includes Sweepstake, 25 clay birds, handicap.

Table with 2 columns: Name and Score. Includes Jackson cup, 50 clay birds, handicap.

Table with 2 columns: Name and Score. Includes Sweepstake, 25 clay birds, handicap.

Table with 2 columns: Name and Score. Includes Sweepstake, 25 clay birds, handicap.

Table with 2 columns: Name and Score. Includes Sweepstake, 25 clay birds, handicap.

Nassau Country Club.

GLEN COVE, L. I., March 22.—With \$26 dead out of 1025 pulled, Howard F. Whitney took high average for the season at Nassau Country Club. His percentage was .806. Second high average went to D. D. Geddes, who smeared 201 out of 250 for .804 per cent. Roy Rainey got place with .760, with 35 out of 125, averages follow:

Table with 3 columns: Name, Shot at, Broke, Per C't. Includes Shot at, Broke, Per C't.

To-day's high gun was T. D. Hooper, who scored 141 from a free start of 15 rocks. Geddes was only one behind. Scores follow:

Table with 2 columns: Name and Score. Includes T. D. Hooper, D. G. Geddes, H. F. Whitney, J. C. Ayres, D. A. Loring, Jr., H. W. Maxwell, W. E. Kimball, C. E. Berner, S. McCullough, C. E. Berner, A. C. Sumner, C. Therriot.

AT SIWANOEY COUNTRY CLUB TRAPS.

C. H. Hadlock, R. J. Held, G. Fred Pelham, E. L. Haas, Dr. A. W. Currie.

Crescent A. C.

BAY RIDGE, N. Y., March 20.—Fifty picked trapshooters took part to-day in a tournament at Crescent Athletic Club. To encourage the novice handicaps were allowed, consequently nine gunners tied with full scores of 100 targets. At the end of the fourth shoot-off, W. Hyland, Queens Club; C. M. Camp, Marine and Field Club; W. S. Silkworth, Bergen Beach Gun Club, and W. B. Ogden, New York Athletic Club, still were tied. The fifth shoot-off was won by W. Hyland with a full score of 25 targets.

New York Athletic Club won the team shoot with 428 out of 500; Crescent Athletic second and Bergen Beach third. The scores:

Table with columns: Name, Club, Handicap, Score. Lists individual scores for various clubs including New York A. C., Queens G. C., Bergen Beach G. C., etc.

Team shoot 500 targets, scratch:

Shoot-off for individual prize, 25 targets: W. Hyland 25, C. M. Camp 25, C. W. Billings 25, W. B. Ogden 25, W. S. Silkworth 25, S. P. Hopkins 23, T. Lenane, Jr., 22, A. W. Church 21.

Second shoot-off: Ogden, Camp, Hyland, Silkworth and Billings all tied with 25.

Third shoot-off: Billings went out on third shot; others again tied at 25.

Fourth shoot-off: all tied again at 25.

Fifth shoot-off: Hyland 25, Camp 24, Silkworth 23, Ogden 22.

F. B. Stephenson won high gun with 207 out of 250 targets at the regular shoot on March 22. G. G. Stephenson took Spooner trophy, committee cup and tied on Blake trophy. A. E. Henry won leg on March cup, while J. H. Vanderveer took all the rest of the program.

1912

# A YEAR OF SUCCESSES FOR Peters Ammunition

"Where quality counts they win"—and quality counts EVERYWHERE. The year 1912 has been one continuous round of victories for users of Peters Shells and Cartridges—far too numerous to record here in full. The few items that follow will suffice to indicate the kind of work that can be done, and is being done every day with the P brand:

## "Steel Where Steel Belongs" Shells WON IN 1912:

Grand American Preliminary Handicap, Grand American High Amateur Average, World's Amateur Indoor Trapshooting Championship, Texas State Championship, Arkansas State Championship, Pennsylvania State Championship, Virginia State Championship, Vermont State Championship, Colorado, New Mexico and Wyoming State Championship, E. C. Challenge Cup, twice by record scores, High General Average at Post Season Tournament.

## Peters Semi-Smokeless and Smokeless Cartridges WON IN 1912:

3 out of 5 Matches at Zettler Rifle Tournament, 5 out of 6 Matches at .22 Indoor League Tournament, 8 out of first 12 scores of American Team in the International Small-Bore Match, including 1st, 2nd and 3rd, 6 out of 10 Revolver Matches at Sea Girt Military Tournament, including Grand Aggregate, 5 out of 6 United States Revolver Association Outdoor Championships for 1912, including Two New World's Records, New Inter-Scholastic Record, 980 out of 1,000, Astor Cup (Inter-Scholastic League).

### Independent Gun Club.

EASTON, Pa., March 22.—The Independent Gun Club held a shoot this afternoon, when O. S. Sked and J. E. Maurer shot a match for the challenge cup representing the championship of the club. The match was at 75 targets per man. Maurer won the cup, he having succeeded in smashing 66 out of his 75, while Sked, the holder of the cup, was only able to knock down 64. After the race was decided the winner was challenged by Mr. Cross. This match will be decided in the near future. The day was fine for the sport of smashing targets, not a cloud in the sky, but a strong wind blowing across the grounds in the face of the shooters making the targets take some very deceptive flights, made the shooting very hard; but with it all, some of the boys ran good scores. Sked and Maurer were tied for first place, each having broken 89 out of 100, while Markley and Keiper tied for second place with 85 each.

The next shoot will be held April 19, which will be the first of a series of shoots for prizes. To-day's scores:

Targets:	25	25	25	Total.
Sked	22	20	22	89
Maurer	22	22	23	89
Markley	19	2	21	85
Heil	20	19	21	83
Young	22	17	19	75
Keiper	24	19	21	85
Brunner	21	18	18	75
Cross	21	23	16	81
Beengle	18	15	16	68
Ivey	17	14	19	66
Schniepp	18	23	19	60

#### Match shoot for cup:

Targets:	25	25	25	Total.
Sked	22	20	22	64
Maurer	22	22	22	66

### Southeast Missouri T. S. A.

SIKESTON, Mo., March 19.—Last night seven gun clubs formed the Southeast Missouri Trapshooters' Association, and elected officers for ensuing year. It was decided to hold a great big tournament May 27, at Sikeston, where was incubated the idea of the organization. An invitation shoot followed the meeting, and resulted as below indicated.

Officers for the year: President, W. C. Roland, Dexter, Mo.; Vice-President, Ed. Massengale, Cape Girardeau, Mo.; Secretary, Joe Howlett, Charleston, Mo.; Treasurer, W. H. Tanner, Sikeston, Mo.

The seven clubs forming the Association are as follows: Blodgett, Charleston, Campbell, Cape Girardeau, Dexter, Jackson and Sikeston gun clubs.

Managing Board of Directors: Dr. Rhodes, Blodgett; Joe Howlett, Charleston; D. H. Dickson, Campbell; Ed. Massengale, Cape Girardeau; E. S. Leming, Dexter; C. B. Looney, Jackson; C. H. Manson, Sikeston.

Regular program, 50 singles: \*C. G. Spencer 49, \*Art Killam 48, \*A. D. Mermod 48, \*Dan Bovee 48, W. C. Roland 47, D. H. Dixon 45, M. F. Lance 43, \*E. M. Hager 43, Wm. H. Tanner, 42, J. R. Baldwin 40, C. H. Yanson 39, Dan McCoy 39, J. A. Howlett, 38, Dr. D. E. Sawyer 37, Ed. Massengale 35, Tom McFarland 34, E. S. Leming 34, E. Milde 34, C. B. Looney 34, Geo. Grant 33, A. F. Perry 32, J. S. Martin 14.

Extra event, 50 singles: \*C. G. Spencer 49, \*Dan

Bovee 48, \*E. M. Hager 44, M. F. Lance 43, \*Art Killam 43, A. D. Mermod 42, E. Milde 34.

Extra event, 25 singles: W. H. Tanner 21, Ed. Massengale 21, C. B. Looney 21, A. F. Perry 18, Tom McFarland 17, Geo. Grant 14, E. S. Leming 13, E. C. Matthews 11, Wm. Fisher 11.

Doubles, 25 pair: \*Art Killam 42, \*C. G. Spencer 33, Doubles, 12 pair: \*E. M. Hager 17, \*A. D. Mermod 17, M. F. Lance 14, D. H. Dixon 14, Dan Bovee 13, J. R. Baldwin 13, Wm. H. Tanner 10, R. C. Jones 7.

\*Professionals.

### Du Pont Gun Club.

WILMINGTON, Del., March 22.—Sixteen members of the Du Pont Gun Club went to Chester, Pa., to-day and tore holes in the Blue Rock Gun Club, of that city. Although the Chester marksmen were greatly strengthened by the addition of Edward Banks, J. B. McHugh and Stanley Touchton, of the Du Pont Club, the Du Pont shooters carried off the cup. Incidentally Clyde Leedom, of the local team, won a sterling silver spoon with the splendid score of 46 out of 50, the high score for the team. The spoon was given by the Chester Club. The match was at 50 targets per man, the ten high scores to count. Although the targets were most difficult, due to a sharp right-quartering wind, the ten high score men on the winning team averaged 85 per cent. The total scores were 427 to 421. The team scores were:

Du Pont.	Blue Rock Club.
C Leedom	46
S Colfax	44
J Minnick	44
H Carlon	43
Dr Patterson	43
T E Doremus	43
H Winchester	42
W A Joslyn	42
C T Martin	40
E E du Pont	40-427
H Sloan	47
C C Lee	45
Ed Banks	45
I Pierce	45
J B McHugh	44
J B Longbottom	44
J K Warren	39
Chas Harper	38
Ben Harrison	36
J Dougherty	36-421

Other shooters who did not make their respective teams follow:

Du Pont Gun Club—C. C. Raymond 34, J. W. Anderson, Jr., 38, W. B. Smith, Jr., 29, N. K. Smith 38, Walter Tomlinson 32, S. G. David 37. David made 22 in his first string of 25.

Chester Gun Club—Copple 32, Pratt 31, McDowell 27, Stellar 35, Wilber 31, Bostwick 33, Redmond 36, Bibby 35, Spackman 32, Carten 10, Short 19, Landomus 35, Suberling 22, Coelom 15, Ditchfield 17, Mullen 14, Dehner 24, Horner 26, Touchton 18, Spear 35, Young 34.

So many regulars were in Chester to-day, only fourteen marksmen were to hum. The scores were: W. Edmanson 17, A. J. Curley 12, E. M. Ross 14, E. A. W. Everitt 22, H. C. McClane 14, R. King 16, E. R. Jenks 11, J. H. Squires 16, William Coyne 18, Dr. H. Betts 16, T. W. Matthewson 20, J. H. Willman 19, W. J. Highfield 12, T. S. Chalfant 20.

FOREST AND STREAM CHAMPIONSHIP CUP.  
In Competition at Independence Gun Club.

**Jersey City Gun Club.**

JERSEY CITY, N. J., March 22.—This was some day at the traps of the Jersey City Gun Club, with the wind blowing at the rate of 100 miles, more or less, the targets certainly did cut up capers, and some of the left-quartering birds went up so high that it is doubtful if they have struck the ground yet, and Finnegan tried to excuse his poor scores by claiming they went so high his gun, with a barrel 32 inches long, couldn't reach them. H. E. Dickerman, of Chicago, who still lingers in this vicinity, came out again to-day and showed us how it should be done, and finished with an average of 79 per cent. Dave Engle, shooting three different guns, finished with 77 per cent., and Fred Kent, a new member, who got the shooting habit up in Sullivan county, N. Y., took third place with 76 per cent., all of which was proof enough to the rest of us that they were some shooters, considering the wind and light. The scores follow, in strings of 25:

Kent	18	19	21	20	18	..	..	..
Dickerman	19	20	19	21	..	..	..	..
O'Brien	17	11	19	16	..	..	..	..
Hallinger	16	14	21	20	13	16	..	..
Kellinger	3	10	6	10	7	5	7	..
Lawton	7	12	11	12	..	..	..	..
Dixon	16	18	15	13	12	..	..	..
Summerfield	14	15	17	20	12	18	..	..
Kearney	15	12	14	13	10	9	..	..
Engle	22	20	16	19	..	..	..	..
Dannefeler	11	9	11	9	..	..	..	..
Summerfield	10	11	11	11	..	..	..	..
Harvey	19	15	8	15	15	..	..	..
Hubbell	14	11	12	11	..	..	..	..
Jackson	16	16	14	14	9	14	..	..
Finnegan	13	10	6	8	..	..	..	..
Kelly	11	14	16	10	..	..	..	..
Coleman	3	1	0	4	..	..	..	..
Smith	6	10	12	9	4	..	..	..
Slater	18	14	18	..	..	..	..	..
Dr Ittner	14	9	11	11	5	6	14	16

On March 29, the club will present to the members making the two highest scores out of the first 100 birds, handicap, two take-home trophies, and we hope to see a good turnout of the boys.

March 19.—We had a fine day for the all-day shoot at the Jersey City Gun Club to-day, and eighteen shooters shot through the entire program, and several others shot half or more of the events. John Hendrickson, of Long Island City, was high gun for the entire program, breaking 161 out of 185, and winning high average money. J. E. Englert, of Catasaqua, Pa.; T. Howard, Peapack, N. J., and B. M. Shanley, Jr., of Newark, tied for second money, and Dr. W. H. Matthews, of Trenton, took third place.

In the merchandise event, B. M. Shanley, Jr., was high with 24 out of 25, and won a nice hand-bag. The scores follow:

Shot at. Broke		Shot at. Broke	
B M Shanley, Jr	185 158	J S Fanning	185 143
G H Piercy	185 142	T Davis	185 113
H J Burlington	185 139	H H Stevens	185 153
A E Ranney	185 146	F A Jackson	185 113
C W Billings	185 141	C P Babson	185 118
J E Englert	185 158	H H Shannon	185 137
H H Miller	185 127	A Summerfield	105 66
T Howard	185 158	Dr P Moeller	85 40
D Dixon	185 135	Thos Boothroyd	85 40
Dr W Matthews	185 151	E N Huggins	85 59
H S Sindle	185 134	E H McLemore	85 49
J H Hendrickson	185 161	E E Hallinger	45 33

Of the three professionals present, Jack Fanning, H. H. Stevens and T. Davis, Stevens was high with 82 per cent.

**Daniel Boone Gun Club.**

MARTHASVILLE, Mo., March 21.—The Good Friday shoot here to-day was a success, considering the weather, but was not so well attended as our club hoped. There were only three outsiders here—Louis Ebert and Lee Eichhorn from St. Louis, and J. W. Barre from Louisiana, Mo. Mr. Ebert acted as cashier. A heavy storm tied up trains somewhat, so other trade representatives were not able to be here.

The day was cold and windy, so all who were at the grounds fully appreciated our new club house. Besides being so disagreeable to be out, the strong wind would actually shake the shooter, and what it did to the targets can hardly be put in words. A shooter came as near telling it as any one could, when he said: "The way these targets fly would make a cork-screwing jack-snipe look dead easy."

The proposed matter of organizing a league of these nearby clubs could not be completed because the other clubs were not represented. It was decided to take this up by mail in the near future with the several clubs.

Below you will see the scores. Now, boys, don't laugh:

Shot at. Broke		Shot at. Broke	
*Barre	100 89	L Koch	30 22
Wilson	100 83	F H Suhre	30 19
Bollmann	100 82	F Koelling	30 14
Kite	100 80	C McVey	20 11
Eichhorn	100 80	R Gardyne	20 6
J Mutert	100 72	Geo Koelling	10 7
Meyer	100 72	E Suhre	10 6
Berg	100 72	W Koelling	10 5
A F Ahmann	100 66	Isermann	10 5
Wyatt	50 28	F Mutert	10 3
E W Ahmann	50 26		

\*Professional.  
Practice shoot at 12 doubles resulted as follows:  
\*Barre 13, Wilson 11, Bollman 9, Kite 9, Eichhorn 12, John Mutert 13, Meyer 7, A. F. Ahmann 11, E. W. Ahmann 11, L. Koch 9, E. Suhre 10, W. Koelling 12.  
Preliminary practice, 25 targets: \*Barre 22, Wilson 19, Bollman 18, Eichhorn 13, J. Mutert 11.

J. O. WILSON, Sec'y.

**GOLD AND SILVER TROPHIES**

For Trapshooters Using

**SMOKELESS SHOTGUN POWDERS**

Make This Season Notable by Winning These Emblems of Expertness at the Traps.

TRAPSHOOTERS will be pleased to learn that our 1913 Solid Gold Long Run Trophy, the Sterling Silver Gun Club Trophy and Solid Gold Scarf Pins are appropriate in design, as well as serviceable and attractive.

**SOLID GOLD LONG RUN TROPHY**

Of special design by one of America's foremost manufacturers. It consists of a quail modeled in high relief on a solid gold pendant attached by gold mountings to a silk fob. The name of winner and address will be engraved on reverse side. Trophy is enclosed in handsome leather case. This is an emblem signifying expertness of its owner and wins recognition amongst trapshooters.

**STERLING SILVER GUN CLUB TROPHY**

The product of the workshops of the makers of the Long Run Trophy and similar in design and mountings. It is given to promote interest and activity at the Gun Club. Officials of clubs will find this trophy of value in arranging the season's program.

**SOLID GOLD SCARF PINS**

An attractively mounted, full modeled quail, enclosed in neat leather case, given to amateur or professional trapshooters who win the High Averages at any advertised program shoot. Du Pont, Ballistite, Schultze or Empire Powder must be used.

**EXTRA PRIZES TO WINNERS OF LONG RUN GOLD TROPHY**

Each of the three amateurs making the most Long Runs will receive suitably engraved gold watches. To the professional making the most Long Runs, we will give Fifty Dollars in Gold or trophy of equal value.

**— WRITE TODAY FOR — COMPLETE INFORMATION**

Concerning conditions of award, full size reproductions of Trophies and Pin and characteristics of Du Pont, Ballistite, Schultze and Empire Smokeless Shotgun Powders. Address Dept. 3.

Pioneer Powder Makers of America

**Pillow Gun Club.**

PILLOW, Pa., March 19.—Pillow Gun Club cheerfully boasts of having the oldest aerosaucer shooter of any club, a shooter having seen four-score years, and had the pleasure of voting for every Presidential candidate for fifty-nine years, and who remembers well how the passenger pigeon was caught and shot in the corn rows and various ways by the dozen—now not one to be seen in our part of the State.

Following are our scores, with the old veteran heading the list, although his score is not the best. The shoot on March 15 was largely attended; weather conditions were perfect:

Shot at. Broke		Shot at. Broke	
Old Grimm	25 13	E E Dickey	50 31
J A Bingaman	50 39	Dr Stutzmen	50 33
J E Bingaman	50 37	M L Lahr	40 30
Jay Bingaman	50 36	J J Lahr	40 29
D M Bohner	50 41	Mrs B	10 6
J A Shaffer	50 44	Mrs. B No. 2	10 4
D W Rutz	50 41		

J. A. BINGAMAN, Sec'y.

**Laredo Gun Club.**

LAREDO, Tex., March 20.—Lowry, Lignoski and O'Brien have completed their scores of 200 targets, with the balance of the competitors to complete theirs next week. From the present scores it is possible for Dallman to tie with Lowry and Gray to take the trophy from Dock by 2 birds. The members of the Laredo Gun Club held a meeting last night, when they elected new officers for the ensuing year as follows: Dr. Lowry, President; Alden B. Muller, Secretary and Treasurer; Jim Gray, Field Captain (re-elected). Many new ideas were discussed at the meeting, and it is now the intention of the Gun Club to install a rifle range.

The scores made yesterday for the Stevens trophy follow:

Shot at. Broke		Shot at. Broke	
Dr W E Lowry	200 181	A B Muller	150 129
R B Lignoski	200 175	J A McDonald	150 124
E K O'Brien	200 171	W R Rankin	50 45
J W Dallman	150 131	J E Holbrook	50 42
Jim Gray	150 133		

E. K. O'BRIEN, Retiring Sec'y.

# Parker Gun Victories in 1912

THE highest official average for the season of 1912 at both Single and Double Targets was made with Parker Guns.

As on every previous occasion, the bona fide **Championship of America** was won with a **Parker Gun**, Mr. W. R. Crosby scoring 198 x 200 targets at 18 yards rise. Same man, same gun, made the **World's Record**, scoring 98 x 100 targets at 23 yards, which is a truly wonderful performance.

Small bore **Parker Guns** are recognized as the Standard Game Guns of America and are gaining in popularity every season with the most progressive sportsmen. For full information regarding guns in gauges from 8 to 28, address

## Veteran Trap Shots in Eastern Handicap.

As far back as twelve years ago, that is, in May, 1901, a team of American trapshooters went over to England by invitation to try conclusions with the best shots in that line that British Isles could produce. Preliminaries were arranged by Paul North, of Cleveland, O., and so confident was he of the extra skill of the representatives of the United States, that he gladly made terms to shoot one barrel against the Britishers' "both barrels." "It was not an easy matter," says Ed. Banks in the *Wilmington News*, "to select a team, but Mr. North left the matter in the hands of Hon. Tom A. Marshall, Mayor of Keithsburg, Ill., and one of the most popular trapshooters in the country, as well as at that time one of the best trapshots at the trap. Mr. Marshall's selection was as follows: W. R. Crosby, O'Fallon, Ill.; Fred Gilbert, Spirit Lake, Ia.; Rolla O. Heikes, Dayton, O.; Frank S. Parmelee, Omaha, Neb.; J. A. R. Elliott, New York; J. S. Fanning, New York; Charles Budd, Des Moines, Ia.; Chauncey M. Powers, Decatur, Ill., and E. H. Tripp, Indianapolis, Ind. These nine, with their captain, Mr. Marshall, were the original ten men selected to shoot against the British team. Three substitutes were also taken along: Edward Banks, then of New York, but now of Delaware; R. R. Merrill, of Milwaukee, Wis., and B. LeRoy Woodward, of Brockton, Mass., the youngest member of the team, and yet the only one of the "unlucky thirteen" who has passed across the 'Great Divide.'

"Of the twelve men of the thirteen mentioned above, seven at least may be reckoned as still distinctly in the running. These are Crosby, Gilbert, Marshall, Heikes, Fanning, Elliott and Banks, and these seven will in all likelihood be found on the firing line at the Du Pont Gun Club when the Eastern Handicap of the Interstate Association opens up next July. As for the rest, 'Chan.' Powers has got the automobile fever; Dick Merrill is too

fond of catching tarpon and shooting ducks at Aransas Pass, Tex., to 'bother with trapshooting'; Frank Parmelee ('Buffalo Hump,' as the boys call him) got married and quit the shooting game; Ernie Tripp finds Indiana politics too enticing; Charlie Budd says that it is better fun and easier, too, to sit in a boat at Spirit Lake and catch fish than it is to walk down the line and try to 'break 'em all.'

"But of those that remain, Crosby, Gilbert, Heikes, Banks and Marshall, could still give a stiff argument to any five-man team in the country. Last year's official averages show the following: Crosby averaged 97 per cent. on 6,800 targets; Gilbert about 86 per cent. on 4,600; Heikes, slightly over 95 per cent. on 5,100; Banks, just about 93 per cent. on 1,425, while Tom Marshall, who allows his penchant for story telling (and he is a raconteur par excellence) to get away with his desire for a good average, only averaged 90.5 on 8,170 targets shot at. This would make a team average of over 94 per cent., and few who knew the men would be willing to bet that they could not exceed that average 'if it was needed.'"

## Onondaga Hunters Club.

SYRACUSE, N. Y., March 16.—O. E. Carpenter won the fifth contest for the Onondaga county trapshooting championship on the ranges of the Onondaga Hunters' Club at Onondaga Lake to-day. This is the second time Carpenter has cracked the top. With another victory the championship and the medal will go to this veteran gunner.

H. A. Brown and J. F. Fellows took second high honors. Other scores were: B. F. Fellows, Jr., 40, H. Pendergast 38, A. Davenport 36, D. E. Lillis 35, Henry Miles 25, A. Pendergast 33, C. Stannard 28.

In the contest for Class B shooters, H. J. Henry

held high gun with 37 out of 50. Ben Auer and Dr. Pendergast were next, each with 35. Ten marksmen competed in this event, making the following scores, each shooting at 50 targets: H. J. Henry 37, B. Auer 35, Dr. Pendergast 35, W. N. Pendergast 31, Thos. Lundy 30, Henry Burroughs 29, J. Rice 27, J. Sullivan 26, K. Mara 25, E. Auer 19.

A new feature of the Hunter's Club contests was the match on the doubles. The new traps recently installed worked to perfection and afforded good sport for the participants in this match. Dr. Pendergast was high man. He broke 17 of the 24 birds at which he shot. W. Willard was next with 15. Other scores were: Fred Ershaw 14, J. Sullivan 13, B. Auer 13, H. Burroughs 12, H. Miles 9, M. Windhauser 8, T. Lundy 6.

Trouble, the Hunters' Club canine mascot, won the fox chase. Sandy, owned by J. M. Sullivan, was second, while Pete R. Guilfoyle's Hunter was third.

The scores made by the shooters, including all events, follow:

Shot at, Broke		Shot at, Broke	
O E Carpenter.....	85 72	M F Gafney.....	60 36

## Evanston Gun Club.

CHICAGO, Ill., March 20.—Saturday and Sunday were ideal days for good scores at the traps, and twenty-six shooters took part in the weekly shoot at the Evanston Gun Club. On Saturday Kennicott was high man with a percentage of 92. Coleman second with 82.

On Sunday Phalen was high for the day with 88 per cent, and Coleman a close second with 87. Four were tied for the silver spoon, and in the shoot-off Raine captured the prize.

The Du Pont silver watch fob was won by Millen with a gross score of 183. The scores follow:

March 15:			
Kennicott.....	23	23	23
Coleman.....	17	21	24
Millen.....	21	17	19
Fesler.....	21	17	20

Fesler.....	20	16	21
De Clercq.....	13	13	..

On March 29, a picked team composed of Kennicott, Coleman, Watson, Winkler and Millen will shoot a picked team from the South Shore Country Club on the grounds of the latter club.

W. J. PHALEN, Sec'y-Treas.

## Stone Harbor Country Club.

CAPE MAY COURT HOUSE, N. J., March 22.—Notwithstanding the high wind which prevailed during the entire afternoon, the amateurs of the Stone Harbor Country Club made an excellent showing over previous scores at their Easter shoot, held on the range adjoining the golf links here to-day.

In the 25-bird match Dr. John S. Douglass, president of the club was high gun, breaking 21; Shields broke 20, Ramsey 18, Rish 16, Camp 12.

In the 15-bird match, Camp came to the front and won the silver tea spoons given by the club, breaking 14, Shields was second with 13, Rush and Douglass each breaking 12 and Ramsey 11.

The club made the 10-bird sweepstake matches the feature of the day. Out of the five matches Douglass won in three events; Shields one and Camp one.

Scores of the 10-bird events:

Shot at, Broke.		Shot at, Broke.	
Douglass.....	50 45	Ramsey.....	20 11

Way.....	20 14		

EDWIN R. STILES.

New York A. C.

PHILAM MANOR, N. Y., March 22.—C. W. Billings came back to-day after a vacation from the traps, and shot at such a clip that if some one had pinned a license tag on him, he would have given a good imitation of a Lancia. He removed Ralph Spotts from his accustomed job behind high gun, getting 92 out of 100 and making the same net, plus 4 gratuitous scalars, for high gun in 100-bird handicap. Still unsatisfied, he broke 25 from one for leg on March cup, Travers Island cup with (1) 24. Fred Pelham won distance handicap (17yds.) 22. G. J. Corbett made the Robinson trophy and R. J. McManus took Stoll cup. Scores follow:

Monthly or March trophy, 25 targets, handicap: C W Billings 1 25 R J McManus 4 20 A E Ranney 1 24 W B Ogden 2 20 R L Spotts 0 23 J H Hendrickson 0 20 J Dey 3 23 W J Elias 3 22 T W Hessian 5 23 H Keller 0 20 C Raymond 3 22 T H Lawrence 0 19 J J Corbett 2 21 C Stein 0 18 G F Pelham 3 23 S Kellogg 0 16 A W Church 3 23 D F Sheldon 0 15 H H Duden 5 23 R Pardee 5 14 J M Jones 4 21

\*Non-members.

Cincinnati Gun Club.

THERE was a small attendance at the weekly shoot on March 23, but two or three good scores were recorded despite the gale which was blowing most of the afternoon, and causing the targets to duck or soar in a puzzling manner. John Schreck was high with 95, his nearest competitor being Gambell with 88.

In the team race at 100 targets, Gambell and Schreck allowed Butz and Sander a handicap of 6 targets, and beat the latter by 18 targets. In the Du Pont trophy event, Schreck, Sander and Connelly made perfect scores including their handicaps, the former making high score of actual breaks with 47. Hammerschmidt arrived at the grounds just in time to shoot his score for the trophy, breaking 44 and getting a total of 48. Gambell, Butz and Sander shot a match at 25 targets per man, Butz having a handicap of 2, and Sander of 5 added targets. The result was a victory for Gambell with a total of 47 in the two races, Butz and Sander making totals of 42 and 44 respectively. Butz and Gambell then shot three matches at 25 targets each, the former having the same handicap as before. The first and third matches were won by Butz with totals of 24 and 24 to Gambell's 21 and 23. The second race went to Gambell on a straight score of 25, Butz getting but 20, including his handicap. As a wind-up for the day, Butz and Sander shot at 25, the former scoring 21 to the latter's 13. At practice on the 20th, Butz broke 94 out of 100, a score that is seldom equaled in the practice work on the grounds. The scores:

Four events at 25 targets each: Butz 80, Sander 78, Dibowski 44. Five events at 20 targets each: Gambell 88, Butz 80, Sander 73, Schreck 55, Connelly 81. Du Pont trophy, 50 targets per man, handicap: Gambell 5 49 Schreck 3 50 Butz 6 47 Connelly 10 50 Sander 14 50 Hammerschmidt 3 48 Team race, 100 targets per man, handicap: Butz 3 89 Schreck 95 Sander 3 76-165 Gambell 88-183

Cleveland Gun Club.

SOUTH EUCLID, O., March 22.—The regular weekly shoot of the Cleveland Gun Club held to-day was the real thing. J. R. Blakeslee, better known as Jack, was on the job and was the glimmering star of the day with 144 out of 150. This is a great help toward the Stevens championship trophy—98 out of the first 100 is going some; but Jack must do it, as he has a trotter behind him. C. E. Doolittle, who won the championship last year with a percentage of 96, is not well up and will be on the firing line before the year is ended. Dr. M. D. Stepp, the newlywed, was on hand for the first time since he and his better half got home. The change has had no effect on the Doctor's eye, as will be seen from the scores that he put up. Capt. Geo. Freeman says he has found the spot and got in two 39s and 44. He says that is good enough for him, as he is not looking for 50s. Stevens laid the new gun aside and came back to the old one and made three points out of four times up. Rogers was out again and bettered his score of a week ago. The scores:

Event No. 1, semi-annual trophy, 50 targets, handicap 16yds.—Blakeslee 49, Doolittle 47, Stepp 45, Rogers 44, Brown 43, Dibble 43, Grant 39, Freeman 39, Stone 39, Rockwell 38, Stevens 37, Tobey 35, Hartman 31, Thorp 30, Ward 30. Event No. 2, annual trophy, 50 targets, handicap, 16yds.—Blakeslee 49, Stepp 46, Doolittle 45, Rogers 45, Grant 43, Dibble 43, Freeman 39, Stone 39, Tobey 38, Stevens 37, Thorp 36, Brown 35, Hartman 34, Rockwell 34, Ward 32. Event No. 3, quarterly trophy contest, 50 targets.—Blakeslee 46, Doolittle 46, Stepp 46, Rogers 43, Brown 42, Freeman 41, Grant 40, Tobey 39, Stone 39, Thorp 35, Hartman 34, Stevens 34. Event No. 4, sixth city trophy contest, 50 targets.—Rogers 44, Grant 44, Freeman 44, Stone 40, Stevens 36, Thorp 35, Hartman 30, Rock 29. F. H. WALLACE, Mgr.

Frontier Rod and Gun Club.

BUFFALO, N. Y., March 22.—Rain and dark weather made things dismal here to-day, and few shot the entire program. Point winners were:

Class A—Eichberg; Class B—Patterson; Class C—Squelch. Event No. 4, 25-bird handicap, was won by Patterson. Scores: Targets: Ebberts 10 15 25 25 25 25 Rappich 8 10 13 16 14 14 Eichberg 8 13 20 20 18 Dewald 4 8 9 15 .. Hewitt 7 14 17 .. Vedder 5 10 12 .. Peasland 7 10 15 .. High Gun

AT DENVER, 1912 HANDICAP, SEPT. 10-13

Mr. R. H. Bruns, shooting his

LEFEVER

made the marvellous run of 283 without a miss.

On the 700 single targets, including handicaps, Mr. Bruns scored 683 out of 700.

The second day of the tournament on the day's program of 200 targets, Mr. Bruns and his Lefever gun scored 200 out of 200. A world's record for ten traps.

On the 500 single 16-yard target for amateurs, Mr. Bruns scored 494 out of 500.

ANOTHER WINNER AT THE PACIFIC COAST HANDICAP

Mr. L. H. Reid, shooting his Lefever gun, won second high average with 381 out of 400.

Why don't you shoot a LEFEVER?

**Pahquioque Rod and Gun Club.**

BRIDGEPORT, Conn., March 21.—Thirty shooters took part in the Good Friday shoot, held by the Pahquioque Gun Club. C. W. Stevens won high gun with 92 out of 100. Hal Sanford and W. A. Gregory tied for place with 91. Ray Bailey and Harold Meeker, who were tied for the July novice cup last year, shot off the tie to-day, Bailey breaking 60 to Meeker's 58 out of 100.

In the first open event, Sanford won first with 25 straight. Stevens and Gregory were tied at 23.

There were five who had perfect scores in the first handicap. Lawrence Meeker won first. For the second handicap there were three tied for first on 25 straight. Sanford and Stevens made this score from scratch and John Harkness with 4 free targets. According to the plan agreed upon in deciding the winner, Sanford received the three prizes awarded for the first three places. W. G. Olmstead, John Durkin, W. S. Thompson, R. J. Downs and Ray Bailey were tied at 24. Bailey won the toss and got the prize for fourth place.

The last handicap match was for those who had not won a prize in the preceding events. There were three straights, Downs winning first, Ray Bailey second and

R. H. Bennett third. Again there were three tied with a score of 24 and W. G. Olmstead got place.

For the three coming nearest to a certain percentage of hits, Harold Meeker was nearest to 59 per cent.; Lawrence Meeker, nearest to 53 per cent., and Fred Cocker nearest to 40 per cent. Fred Cocker won the consolation prize.

An interesting feature of the shoot was the team race. Sanford and Gregory chose sides from all the shooters present, and the five high scores on each team were selected to decide the winning side. Sanford's team won with 412 out of a possible 500 to Gregory's team. The scores:

Sanford .....	91	Gregory .....	91
Stevens .....	92	Daley .....	83
Thompson .....	86	Bennett .....	82
Olmstead .....	74	Harkness .....	74
Rockwell .....	69-412	Sunderland .....	73-403

The shoot for the Stevens trophy was very close. Olmstead and Plancon were tied on the second leg, making 50 straight with their handicaps. On the 100 targets shot at, C. W. Stevens, W. S. Thompson and R. H. Bennett tied on 94 out of 100. Sanford had 93,

Gregory, S. H. Fanton and Plancon 92, E. J. Vesey 91, R. J. Downs 91, Ray Bailey 90.

The total scores for the 100 targets are as follows: Stevens 92, Sanford 91, Gregory 91, Thompson 86, Daley 83, Bennett 82, Vesey 80, Olmstead 74, Harkness 74, Sunderland 73, Fanton 72, Knapp 71, Plancon 70, Rockwell 69, Durkin 65, Downs 68, Mansfield 61, Bouton 61, Bailey 60, H. Meeker 58, L. Meeker 55, Stacey 54, Cocker 54.

For the 50 targets, the scores are: L. Carel 40, Simmons 36, E. H. Bailey 34, Hoyt 32, Willis Harris 30, Snell 30, L. Harris 25.

**Jersey City Gun Club.**

JERSEY CITY, N. J., March 23.—There was a good attendance at the Hudson's traps this morning, it being the sixth contest for the Schortemeier trophies with thirty-three shooters taking part in the program.

In Class A, shooting from 18yds., Billy O'Brien had things all his own way and won another leg on the prize. Class B had Tom Kelley as a winner, while Class C had Joe Whitley, who managed to hobble to the firing line with the aid of a crutch, was the man to bring home the bacon with a score of 34.

Kelley with 74 per cent., was high average for the day, with Harry Higgs being the runner-up, just one point shy, and finished with 73 per cent., and third honors for the day was divided between Dave Engle and Dr. Downes, who journeyed all the way from Englewood, to show the secretary how he used to clean up the boys at his home traps when he used to follow the game; but the best he could show to-day was 72 per cent. Downes and Drury, also of Englewood, shot a race at 25 birds. Drury being a beginner, the Doctor was to allow him a handicap, but the way he started on his first 10 birds, gave Downes such a shock that he "blew up," and finished with 14 breaks, while Harry continued the good work and finished with 21. We hold our next shoot on April 6. Everybody welcome here, so come out and see us. Scores follow:

Targets:	25	25	50	25	25

**Larchmont Y. C.**

LARCHMONT, N. Y., March 23.—Young Ralph Spotts is a chip of the old block, and the senior Ralph is no block head, kus why? Kus he—the senior—has been high gun at every shoot this season at Larchmont; holds the indoor championship, and—well, anyhow, there is no better amateur in this or any other country. Well—as wuz—Ralph the younger, standing on a stock of 7, drew a full in the 25-rock event for a special trophy, and took it home. Some boy and sum score—7-18-25. After this event this youngster proceeded to go after some of those outside his immediate family, with the result that he tied T. Lenane, Jr., and A. W. Fitzgerald for the take-home trophy, but lost in the shoot-off, which went to Fitzgerald. Pa Spotts once more put his 7½s into the high gun trophy, with 131 out of 150. He copped also a limb on accumulation cup with 25 straight. With a handicap of 14 and a total score of 99, T. Lenane, Jr., won the 100-target handicap match. G. J. Corbett was the runner-up with 94 to his credit. Lenane also captured the leg for the monthly cup with a full score.

**Bennett Gun Club.**

PHILADELPHIA, Pa., March 22.—The weekly shoot of the Bennett Gun Club was held this afternoon. Stokes Prickett broke 15 straight, and nosed out three others, who were but one point behind.

Next Saturday the club will shoot for a 1913 model pushmobile. Weekly event, prize, silver spoon, 15 blue rocks each—Stokes Prickett 15, Emmett Black 14, Philip Ewell 14, J. King 14, Benjamin Martel 13, William Robinson 13, F. Miller 13, J. Sampson 13, H. Butterworth 13, F. Sagers 13, Frank Bennett 12, E. Lee 12, W. Brown 12, F. McGinley 12, C. Thomas 12, Samuel Houston 12, Gus Hargesheimer 12, C. Shannon 12, Edward Wilcox 11, Samuel Collins 11, H. Beardsworth 11, Charles White 10, J. Owens 10, W. Kirkwood 10, Samuel Wilson 9.

**Indianapolis Gun Club.**

INDIANAPOLIS, Ind., March 22.—To-day was fair and the attendance good. Parry was high over all in the practice, losing but one target in 60. Edmonson with 4 lost was in second place, and each had an unfinished run of 45. Edmonson, 22yds., and Appel, 18yds., tied for the spoon, the former winning in the shoot-off. Scores as below:

	Practice.	Spoon.	
	Shot at.	Broke.	Yards. Total.
*Van Nest	130	82	.. ..
L Stelken	110	70	.. ..
A Stelken	110	69	.. ..
Tegarden	110	69	.. ..

Appel	20	17	18 41
*Professionals.			R. R.

**Farragut Sportsmen's Association.**

PHILADELPHIA, Pa., March 22.—Till, Von Nieda and Fox carried off the kale here to-day. The scores:

	Stephens.	Du Pont.
Till	8 25	7 25
Snow, Jr	4 24	6 22
Von Nieda	3 23	4 23
Nason	3 23	4 23
Rainey	12 23	10 24
Snow, Sr	0 14	0 18
Fox	12 23	9 25
F Lawrence	0 19	0 21

In a 25-bird sweepstake event Von Nieda and Lawrence tied with 19 each. Nason got 18, Rainey 14, and Snow, Jr., 11.

**Knollwood Country Club.**

THE first 100 of the 200 handicap program at Knollwood country Club was won to-day by T. H. Shannon, who mused up 88 out of 100 from scratch.

H H Shannon	0 88	W H Sykes, Jr.	20 77
E T Fox	30 85	W C Teagle	20 75
F M Wilson	30 83	M McVoy	15 75
F Crampton	20 79	A Bole	10 45

**Rifle Shooting**

**U. S. R. A. Score Sheet.**

SPRINGFIELD, Mass., March 19.—In the course of the League series the following teams had scores that tied and required a shoot-off:

- Tie on 1102—National Capital, 1906 vs. Pittsburgh, 1148; Olympic, 1127 vs. Boston, 1125.
- Tie on 1086—Denver, 1120, vs. Portland, 1115.
- Tie on 1110—Pittsburg, 1135 vs. Boston, 1114.
- Tie on 1094—Denver, 1128, vs. National Capital, 1067.
- Tie on 1103—National Capital, 1100, vs. Philadelphia, 1066.

After disposing of the tied scores, there were numerous ties for place, which were shot off. The following summary shows final standing of the clubs, the matches won and lost, the scores of the final shoot-off, if any, the classes, and the League totals of the class leaders:

Class A.	Won.	Lost.	Shoot-off.	Total.
Manhattan	23	1	1137	26,814
Spokane	23	1	1120	26,885
Olympic	22	2	1124	26,651
Springfield	22	2	1120	26,745
Class B.				
Denver	15	5	1120	26,771
Pittsburgh	18	6	1122	26,814
Boston	18	6	1118	26,814
Portland	18	6	1104	26,814
Class C.				
St. Louis-Colonial	15	9	1107	25,966
National Capital	15	9	1058	25,966
Youngstown	14	10	1105	25,966
Philadelphia	14	10	1066	25,966
Class D.				
Shell Mound	10	14	1095	25,799
Providence	10	14	1079	25,799
Louisville	10	14	1063	25,799
Columbus	10	14	Forfeited.	25,799
Class E.				
Warren	8	16	1020	24,676
Dallas	7	17	1020	24,676
Baltimore	6	18	1020	24,676
Osborn	4	20	1020	24,676
Class F.				
Belleville	4	20	975	23,298
Myles Standish	3	21	1050	23,298
Tacoma	4	20	966	23,298
Cincinnati	3	21	987	23,298

To Citizens belongs the honor of being game enough to finish, although losing every match.

Osborn has the distinction of shooting herself out of the prize list of Class F to a position in the class above. Is there anyone who isn't glad to see Belleville's plucky struggle for three years rewarded?

The question of suitable prizes for first and second place in the different classes is now in the hands of the executive committee.

One record has been broken, Pittsburgh raising Portland's 1147 of last year one point, to 1148. Pittsburgh had in that score three shots that were close and was given the lower cut.

J. B. CRABTREE, Sec'y-Treas., U. S. R. A.

**Seventy-first Regiment Shoot.**

NEW YORK CITY, March 21.—A. E. Wells, Corporal C. Martens and Private J. Bianchi, of Company H, 71st Regiment, N. G. S. N. Y., established a new regimental record in the sixth annual shoot for the Banks trophy to-night with a score of 198 out of 210, the best previous figures were 197, made three years ago by Company K. The event was for a loving cup donated by Commodore David Banks, in addition to individual prizes to the three members of the winning team.

The entry list mustered twenty-two teams, consisting of three men each, comprising a marksman, sharpshooter and expert. The first event was at seven shots standing for a possible score of 105, and the second at prone position for a like number. The team's two strings showed scores of 94 and 104 at standing and prone positions, respectively. In the latter position they missed a full score by only 1 point, establishing a record in the event.

Company K was second with 193, and Company L third with 190. The scores:

Company.	Standing.	Prone.	Total.
H (first team)	94	104	198
K	89	104	193
L	88	102	190
B (second team)	87	97	184
B (first team)	87	97	184
K (second team)	86	98	184
D	90	93	183
K (third team)	88	95	183
M	91	90	181
H (second team)	84	96	180
E (second team)	87	92	179
C (first team)	81	98	179
G (first team)	86	91	177
E (first team)	84	88	172
F (first team)	85	85	170
G (second team)	81	88	169
E (third team)	81	87	168
C (second team)	77	85	162
I	75	83	158
B (third team)	73	83	156
M (second team)	77	78	155
F (second team)	64	89	153

**Intercollegiate Rifle Matches.**

WASHINGTON, D. C., March 22.—The results of the eleventh match in the Intercollegiate Rifle Shooting League, just finished show no change in the standing among the colleges of the East. Harvard University is still in the lead with eleven straight victories, with the Massachusetts Agricultural College with ten wins.

Among the Western colleges, West Virginia University leads with eleven straight victories, followed by State University of Iowa with 10. The feature of the last match was a tie between the Michigan Agricultural College and the University of Minnesota, decided in favor of the former on account of their having the best score in the standing position, and a similar tie between the University of Nebraska and Kansas University, decided in favor of the former under the same rule. The results for the eleventh competition follow:

Eastern League: Harvard, 869, vs. Mass. **The Bulldog Breeders Association of America.**

THE association will hold its sixth open show in New York city—the venue to be announced shortly—on Saturday, May 31.

Allison M. Lederer, whose extensively exhibited Inwall Kennels are well known, has kindly consented to judge.

The Bench Show Committee in charge follows: C. R. Wood, Chairman; B. H. Berendsohn, Secretary and Treasurer; Walter Murray, P. Seixas and E. P. Hinds.

And this, then—and of course—is the "per usual" appeal to you for support, based upon nothing newer, nothing more surprising and nothing better than your pride in the association, which by now must have become an ingrained habit with every one of you.

Someone said of us: "No specialty club ever set the hot pace the Breeders set." There is no denying it; and if we've maintained it, it is because, when the word came to "Hit it up," there was always the strength and the spirit in every one of us for another spurt.

We want specials first, and then the entry. We shall depart from our usual practice this time, and this will be the only letter you will receive on the subject. There will be no "follow-up." There will be no need of any.

All specials, or the promise of them, must be sent to Dr. E. H. Berendsohn, 204 Berkley Place, Brooklyn, N. Y.

It is earnestly urged that where it is possible, all specials be offered by April 15 and be given or sent to Dr. Berendsohn at least a week before the show.

ABRAM D. GILLETTE, Secretary.

You'll find in inquiries received through the advertising columns of FOREST AND STREAM an earnest interest in your goods that "half-clinches" the sale.

**Brief of the National Association of Audubon Societies.**

(Submitted to the Ways and Means Committee of the House of Representatives, Washington, D. C., on Jan. 30, 1913.)

THE National Association of Audubon Societies urgently recommends the amendment of Paragraph 438 of the tariff act, relating to feathers and downs so as to prohibit the importation of plumage of our native birds of the United States including aigrettes. We ask for this change:

Amend Schedule N, Sec. 438, to read as follows:

Feathers and downs of all kinds, including bird skins or parts thereof with the feathers on, crude or not dressed, colored, or otherwise advanced or manufactured in any manner, not specially provided for in this section, twenty per centum ad valorem; when drseded, colored or otherwise advanced or manufactured in any manner, including quilts of down and other manufactures of down, and also dressed and finished birds suitable for millinery ornaments, and artificial or ornamental feathers, fruits, grains, leaves, flowers and stems or parts thereof, of whatever material composed, not specially provided for in this section, sixty per centum ad valorem; *provided, that the importation of plumage of native wild birds of the United States or of plumage indistinguishable from that of our native wild birds, including aigrettes, crude or manufactured, is hereby prohibited except for scientific purposes.* . . .

We ask this on the following grounds:

1. That a number of the species are now approaching extinction.
2. That the birds are of great economic value.
3. That the traffic in such plumage is illegal in many States.
4. That the plumage trade is destructive, barbarous and unnecessary.
5. That the loss of revenue can readily be made up from other sources.

1. The demand for plumage for wild birds for millinery purposes during the past twenty years has grown to enormous proportions. In the effort to supply the market, the woods, fields and sea coasts of the United States have been combed systematically by plume hunters. Breeding colonies and rookeries in the tropics from Australia to Venezuela and the most distant islands in the Pacific ocean have been devastated by the emissaries of the plume trade. The traffic in the United States has caused the practical extinction of some of the most beautiful birds including egrets, the least tern, and locally of several other species. Breeding colonies of certain sea birds have been practically annihilated along the coasts of New Jersey and Virginia. The egrets formerly found in every State in the Union with half a dozen exceptions are now restricted to a comparatively few isolated colonies in the Southern States, and a few wandering individuals which occasionally stray northward to visit the haunts where they were formerly abundant.

2. The value of insectivorous and seed-eating native birds is too well known to need detailed exposition in this connection. The economic value of the egrets and other species of plume birds is not generally appreciated. Recent investigations in Florida by a representative of the National Association of Audubon Socie-

ties has shown that herons of several species during the breeding season are not only important scavengers, but destroy immense numbers of crayfish, cutworms and grasshoppers. Without going into detail, the following table shows at a glance the character of the food of four species of young herons in Florida. The results are based on examination of the components of fifty meals of each species. The table shows that fifty snowy egrets consumed no less than 762 grasshoppers and ninety-one cutworms; that fifty little blue herons destroyed 1,900 grasshoppers, 149 cutworms and 142 crayfish, and fifty Louisiana herons consumed no less than 2,876 grasshoppers. One stomach of a Louisiana heron was found to contain 200 grasshoppers.

FOOD OF YOUNG HERONS.

(Based on the examination by O. E. Baynard, Orange Lake, Florida, of fifty meals of each of the following species.)

	Grass-hoppers.	Cut-worms.	Cray-fish.	Suck-ers.	Miscel-laneous.
Snowy egret .....	762	91	29	..	9
Little blue heron..	1900	149	142	..	45
Louisiana heron ...	2876	17	67	..	14
Egrets .....	..	..	176	61	297

Under the head of miscellaneous are included large numbers of water moccasins and other snakes which are well known to be great destroyers of fish.

Both the egret and the snowy egret are destructive to field mice, and are, therefore, of pronounced economic value to the agricultural interests of the country, as shown in Bulletin No. 33, of the Biological Survey of the United States Department of Agriculture.

3. **Illegal Traffic.**—The trade in plumage of native birds is now illegal in a number of the States, including Massachusetts, New York, New Jersey, Ohio, Louisiana, Missouri, Colorado, California, Oregon, Washington and other States. The trade in plumage of native birds is thus prohibited in such important millinery centers as Boston, New York, New Orleans, Cleveland, Cincinnati, St. Louis, Kansas City, Denver, Los Angeles, San Francisco, Portland and Seattle. The Federal law (35 Stat. 1137) already prohibits interstate commerce in plumage shipped in violation of local laws. The United States should not permit the importation of goods which are contraband in some States. Their importation should be prohibited as has already been done in the case of lottery tickets, opium, seal skins illegally captured, etc.

4. The death knell of any species of wild life is sounded when mankind begins to commercialize it. A number of species of North American birds are to-day on the verge of extinction because of the activities of the collectors working in the interests of the world's great millinery establishments. In collecting heron aigrettes the most barbarous cruelties are practiced. These long airy feathers are the nuptial adornments of the birds and are found only in the breeding season. To procure these feathers it is absolutely necessary to take the life of the birds which produce them. This means that the young are left in the nests to die of starvation. Egrets once bred as far north as New Jersey and perhaps Long Island, but to-day they do not occur during the nesting season north of North Carolina. The agents of the National Association of Audubon Societies have been able to locate in recent years about thirty colonies of these birds in our Southern swamps. In the summer of 1912 these few remaining

rookeries contained in the aggregate a population of about 5,000 egrets. Thirty years ago there were millions of these birds in the United States. Because of the disappearance of egrets over large sections of the country in which they formerly occurred, it is now necessary for the trade to secure these feathers from abroad, and the same heartless war of extermination is to-day being carried on in South America and Southern Asia. As long as we permit the importation of aigrettes, we have but little assurance for saving the remnant of the egrets still found in this country, as it is impossible to distinguish in the manufactured product the feathers of these birds taken in different countries.

5. **Revenue.**—The actual revenue derived from the importation from plumage (including aigrettes for millinery purposes) is unknown, for the reason that no separate record is kept of the importation of plumage for millinery purposes and feathers and downs used for pillows, quilts and other purposes. In the case of aigrettes, probably 90 per cent. of the goods are imported in the crude state at the low rate of duty based on appraisal at port of shipment. If figures were available, it is doubtful whether the appraised value of most aigrettes would exceed \$15 or \$20 an ounce, allowing a revenue of \$3 or \$4 per ounce. Assuming that the importations for any one year amounted to half a ton or a thousand pounds, the duty at \$3 an ounce would be \$48,000 and at \$4 per ounce \$64,000. If this revenue is regarded as indispensable or so important as to necessitate the continuance of a traffic at once barbarous, useless and destructive to the interests of our farmers, an equal source of revenue may be found in paragraph 289 in Schedule G, by imposing the same duty on game birds as on poultry.

To accomplish this, amend Paragraph 289 to read:

Poultry, live, three cents per pound; poultry and game birds, dead, five cents per pound.

If this amendment be adopted, Paragraph 510 of the Free List should be amended to read:

Birds, and land and water fowls alive for exhibition or propagation.

The present provision which imposes a duty of five cents a pound on poultry and allows game birds to be imported free is class legislation. It is the height of injustice in these days of high prices to require the poor man to pay a duty of five cents a pound on his poultry while the wealthy patron of the high class restaurant and hotel can obtain his game birds free of duty. Under the present tariff exemptions the importation of game birds from Europe has increased enormously. As many as 25,000 birds are known to have been imported on a single vessel at New York. The records of the Conservation Commission of New York show that since the new law went into effect in 1911, prohibiting the sale of native game and requiring foreign game to be tagged, game birds to the number of 492,400 have been tagged. Most of these birds are pheasants, grouse and ptarmigan, weighing from a pound to a pound and a half or two pounds. If the average is taken at a pound and a half, the importations of New York alone would net about \$37,000. As these figures represent the importations at New York alone for a period of two years, it would be safe to say that the importations for all ports in the United States may be safely placed at not less than \$50,000.

For Sale.

**Taming Pigeons.**

An amusing story is told of the late Lord Leighton, the famous painter, says the Shooting Times of London. A friend found the artist trying to get some pigeons to keep still for the purpose of a picture. All his efforts were unavailing until someone said, "Soak a little bread in whiskey and give it them." The experiment proved successful.

**The Humorous Crow.**

Crows certainly possess a sense of humor and manifest the utmost audacity in playing practical jokes upon other birds. An English officer in India reports seeing a crow slip up three successive times behind a meditative adjutant bird and deliberately tweak his tail. The first two

times the adjutant was surprised merely; the third time it turned quickly enough to discover the joker, and also, with one indignant snap of its huge bill, to swallow him.—Shooting Times, London.

**Made of Matches.**

A FRENCH artist, M. Amiot, has lately exhibited a collection of articles made entirely from the ends of matches picked up in the streets of Paris. He weaves, says the Strand, his material in a design, spreads the backs of the matches with gum, and presses the whole firmly together. M. Amiot has made several vases in this way, and an excellent model of a violin. In the latter, which has movable pegs and strings, there are no fewer than 1,500 matches.

JUST PUBLISHED

SIR  
GILBERT  
PARKER'S

New Novel

THE

JUDGMENT HOUSE

Copyright, 1913, by Harper & Brothers.

Undoubtedly the author's best book, surpassing in interest even "The Weavers" and "The Right of Way." It is a story of international interest—its sympathies as wide as the Empire. The destinies of nations are interwoven with the lives of the two heroes—one a millionaire, a pioneer of the Cecil Rhodes type; the other a diplomat, with his finger on the pulse of the world. And the woman, like Cleopatra, influences the careers of empire-builders by her beauty and her cleverness. Numerous other characters—statesmen, financiers, a famous prima donna, and a cockney newsboy—are drawn with the author's accustomed skill.

**Salmon Statistics.**

1. The sockeye spawns normally either in its fourth or fifth year, the king salmon in its fourth, fifth, sixth or seventh year, the females of both species being preponderatingly four-year fish.
2. The young of both sockeye and king salmon may migrate seaward shortly after hatching, or may reside in fresh water until their second spring. Those of the first type grow more rapidly than the second, but are subject to greater dangers and develop proportionately fewer adults.
3. Coho salmon spawn normally only in their third year. The young migrate either as fry or yearlings, but adults are developed almost exclusively from those which migrate as yearlings.
4. Dog salmon mature normally either in their third, fourth or fifth years, the humpback always in their second year. The young of both species pass to sea as soon as they are free swimming.
5. The term "grilse," as used for Pacific salmon, signifies conspicuously undersized fish which sparingly accompany the spawning run. They are precociously developed in advance of the normal spawning period of the species. So far as known, the grilse of the king salmon, coho and dog salmon are exclusively males, of the sockeye, almost exclusively males, except on the Columbia River, where both sexes are about equally represented. The larger grilse meet or overlap in size the smaller of those individuals which mature one year later at the normal period.
6. Grilse of the sockeye are in their third year, of the king salmon in their second or third year, of the coho and the dog salmon in their second year.
7. The great differences in size among individuals of a species observed in the spawning run are closely correlated with age, the younger fish averaging constantly smaller than those one year older, though the curves of the two may overlap.—Bulletin of the Bureau of Fisheries.

**Vermont's Hedgehog Bounty.**

THE Vermont hedgehog's fate is settled. The State will continue to pay a bounty on his head for the next two years, but at the bargain counter reduction of 50 per cent. In other words, the bounty has been reduced from 30 cents to 15, which, however, would strike the proverbial man up a tree as ample.

To date, says Burlington Free Press, the State has paid out \$20,000 in hedgehog bounties, and the reduction in the bounty will result, one would think, in stimulating hunters to fresh exertions, so that it will be no great surprise if the total shows no considerable reduction.

Few people, we believe, knew before the hedgehog became a burning and expensive issue in the Legislature that the forests of Vermont were endangered by his onslaught. His favorite food is clover, and this when abundant so fully satisfies his modest wants that he asks for few additions to the menu. His favorite abode is at the edge of the farmer's wood lot in reasonable proximity to a clover field.

In such a hedgehog paradise he luxuriates in the farmer's clover all summer and dreams about it all winter in his long hibernation. The party aggrieved by the animal's predatory operations has always been the farmer as far as the knowledge of the general public is concerned, and the lumberman's grievance was voiced at Montpelier.

We are told that not far from the capital there is a series of hedgehog "preserves," and that one family has gathered in \$3,000 in bounties. These two facts were not coupled in the Legislative debate, but one would think that it would not be a very long step for a resourceful Yankee to take from bounty to breeding.

**Style-keeping Clothes for Outdoor Wear**

To hold its shape and retain its smartness through the stress of outdoor wear, a suit or coat must have the right fabric foundation.

American Woolen Company's OLIVAUTO CLOTH and FORESTRY CLOTH, Shade 65, offer the best combination of style and wearing quality for motoring suits and coats, riding, golfing, hunting and fishing clothes.

For motoring wear we recommend OLIVAUTO CLOTH especially, because it does not show dust or grease spots readily, resists wrinkles—and being closely woven, turns wind and showers. It is fashionable olive-brown in color, and tailors splendidly. Medium Weight Only.

FORESTRY CLOTH, Shade 65, is especially desirable for hunting, camping and fishing garments. It is made in all desirable weights up to Twenty-Two Ounces. This cloth was adopted for the Official Uniform of the U. S. Forestry Service.

Any custom tailor or store can obtain OLIVAUTO CLOTH and FORESTRY CLOTH for you. They may be had also in correct sporting garments ready-to-wear from Abercrombie & Fitch Co., New York, and other outfitters. If you don't find them, write for samples and prices.

## Camping on Aroostook

By WILLIAM SIMPSON

To mute and to material things  
New life revolving summer brings;  
The genial call dead nature hears  
And in her glory reappears.

—Walter Scott.

IT was blossom month in Maine, perfume pervaded the air, hemlock, pine, balsam, here and there, wild black cherry, budding birch and laurel were now in their annual bloom of youth. On the edge of the streams the pussy willows were out, and occasionally in the shade of a spreading yellow birch, clumps of trailing bear berries that delight the partridges, and furnish them with food and cover. On the banks of the river, fringes of gaudy dogwood or sumac and other flowering shrubs blend their odors with pond lilies, and American lotos, harebells and forget-me-nots, blue and white wood violets peep from under the old moss-covered logs and a dozen more of nature's wild beauties are abloom. The cold winter with heavy snow and the lateness of the spring, had caused delay to some, but the sudden warm sun in June had helped along others, and now all seemed to join in a concert of color, as if nature's storeroom had burst open, and she had become intoxicated with giving, which is the ace of joy.

Everywhere the sweet, merry songs of active and busy birds, some native, and more fresh from the South, were taking up their summer residence; the partridges were there giving examples in bravery in spite of natural timidity, and does not this brave little bird give proof that there are other qualities than beautiful plumage and sweet voices in the bird kingdom, and I doubt if anyone who is a lover of nature, or has spent much time out of doors, has not observed the devotion to their young, and the courageous manner of protecting their offspring. On several occasions I have had a chance to see their heroism conquer fear, and particularly how the hen bird exposes herself and ignores all danger in her efforts to defend her young. She will flutter about to attract your attention, while her less helpless brood will make their escape to safety among the moss or ferns, and other natural cover, after which the mother bird will fly to a place of safety herself, with valor that despises death. I am not in full sympathy with those that call this bird a "fool hen."

The kingfisher bristles up his ruffled crest when he alights on the overhanging branch of a dead tree as he darts down stream on your approach and seems to resent an intrusion and quarrels with you for interrupting the business

which his name implies. His harsh screams can be heard half a mile away on a quiet day. The noisy bluejay is perched on top of a dead tree calling to you from his perch to leave, leave, leave; he is a ventriloquist and a mimic, but he is no singer, but has a discordant voice. Early in the spring his disposition is mild; the hen lays her eggs early, and about the time the young are able to fly their plumage becomes quite brilliant, and the parents become inveterate robbers of other birds' nests. Not only will they devour the eggs of other birds, but will often quarrel with birds larger than themselves, and will give battle over a choice morsel, and if they are in company with others of their own tribe, will vanquish a chipmunk, and sometimes even a squirrel.

Overhead sat a sweet-voiced veeery, that notable songster of the East, whose song is impossible to describe in words, and he is lavish with his musical entertainment. Yellow warblers and wrens are flitting from twig to twig, and I fancy there is no fisherman, or pilgrim of the wildwood, of rightly-tempered mind, who will fail to lay these scenes on the altar of remembrance.

Among all this glory of blossom and plumage, under a pearl-tinted sky on the banks of the Aroostook, we pushed our canoe from the landing, and pursued our course up to the headwaters of the Aroostook. It is not a great river, so it has little to do with great responsibilities, or matters of vast importance; it is not called upon to float large vessels or to bear great burdens. Every spring it renders valuable service to the State and the lumbermen, in floating down large quantities of logs, that are left conveniently on its bed, to be called for by the spring freshets, and carried to places where they can be used to best advantage. Like many other small rivers, it is not too large for the intimacy of a summer vacation. Here and there it has a deep pool, where it keeps its store of game trout, and landlocked salmon, and freely gives up its bounties to visiting sportsmen, and its still waters are the summer home of the many deer and moose that feed along its banks among the lily-pads and luscious grasses.

It was six o'clock in the evening when we reached the salmon pool. After ten hours of constant struggle with the current, we were just

SONG OF THE RAPIDS.

a mite tired. from exertion with the pole on the swift water, and the paddle on the dead water; but there was no trace of weariness, the constant change of scene on the river bordered with verdure, stretches alternating with sand interlaced with ferns and wild flowers, and stretches of innumerable rocks, with foaming wild cascades, and again with patches of pond lilies whose fragrance, with that of the woods, filled the air.

If there is anything that carries the mind back to the creation, it is to float on a river, and knowing as you look that it has been there for ages, and that the water that flows from these springs was there from the beginning of time.

On a high bank overlooking the salmon pool was built a log camp well stocked with provisions, all the necessities, and some of the luxuries of life. The latch string was outside the door, and all that was wanting was a few trout.

a series of small log cabins, and a main dining camp and headquarters, above which was a big bell to call the guests who were sojourning there to assemble for dinner—it could be heard for miles in that still clear air.

There were many log cabins on cut out trails, situated on various lakes, ponds and streams, within a radius of twenty-five miles, and at the end of each trail could be found a canoe conveniently located. So there was little carrying to do on the trails, and one could choose from about fourteen different locations, all under the control of one proprietor, and persons going there could remain on the territory and have the freedom of the place, and the run of your teeth, by paying a modest sum per day to the proprietor.

It was a dry summer on the Aroostook, and after a spell of warm weather the water was low, and the fishing poor, which often happens in August. We tried diligently at the spring-

first course consisted of trout and fritters, the second fritters and trout, and the third more trout and fritters.

It was a delightful summer, and the days went along merrily and swiftly. I could not say that I was tired of the fishing, that has not happened; but the season had advanced on the calendar and thoughts of bear came into our minds. We had seen signs where they had been clawing the trees and shrubs, and also around the brambles and raspberry bushes, so we carefully tucked the rifle in the canoe every time we went away from camp, hoping to have a contest with bruin.

It is a rather tame hunting country that has not got a selection of bear stories, and Aroostook is on a plane with the average. My experience during thirty years of vacations spent in locations more or less liable for their bear stories, is limited to three venial offenses, one of which happened on the Aroostook River, on

AUTHOR, AROOSTOOK GUIDES AND TROPHY.

AROOSTOOK SALMON POOL.

to complete an Aroostook voyager's repast, and on that occasion, with the setting sun yet pouring his radiance through the overhanging pines, flecking the pool with gleams of light, uncoiling my leader and letting loose my flies, I cast them over that pool and succeeded in getting enough to complete the supper. At the break of day I took eleven as pretty trout from that pool as it has ever fallen to my lot to see. I remarked to my guide how even they were in size, and expressed wonder that I had not hooked some larger ones. "Why," said he, "these little fellows are too quick for them, but if you will allow your flies to sink an inch or so under the surface of the water, you will be likely to get the big ones," but the current was too swift for that.

Above this pool there was several miles of dead water, where we could occasionally see a cow moose, with perhaps a calf by her side, or a few deer feeding, or standing in the water to be safe from flies and mosquitoes.

On the evening of the second day of our canoe trip on the river, we reached little Millinockett Lake, where on an island, a little gem of beauty some ten or twenty acres in area, was

holes, the mouths of the small brooks where the bright fresh green grass was, put on our most attractive flies, and changed them often, but all without much results until a rough northeast storm set in, lasting for some days. Finally subsiding we went up to the head of the lake to a pool in Caraboo Brook, a beautiful clear stream fed by cool springs. In this pool I cast my flies, and there followed what, to enjoy again, I would cheerfully travel twice the distance from New York to repeat. It was a contest that required all the skill the fisherman possessed to keep the plunging trout away from the logs and fallen timbers that surrounded the pool, in which should they become entangled, the gut leader would break like a spider's gossamer. The little five-ounce H. L. Leonard rod that I cherished as an old friend, almost bent double as I gripped it tightly, not giving but a few inches, the pliant rod almost forming a bow under the strain. My guide, who was looking at the quivering tackle, exclaimed, "That rod is the real thing!" after securing twenty-one nice trout, all of which were required for the table at the home camp. That evening the meal was served up in three courses; the

the pond below Millinockett Lake, while preparing for a siesta. The partridges that constituted our dinner had soiled our fingers, and to remove the stain, we went to the edge of the stream, which was our only available finger bowl, and where we had made a cheerful little fire to broil our simple luscious meal. Looking up stream I observed a black, loose-jointed, plantigrade creature shamble along the river for a few yards. He paused, sat on his haunches, sniffed the air, changed his course and disappeared in the thick underbrush, while the gun, carefully loaded, lay safely in the canoe a hundred feet away quite harmless.

Most of the persons who spent the warm months of the summer fishing here had returned to their city homes, and a few hunters had taken their places. The woods had commenced to take on the russet hue of autumn, and the deer shooting was the attraction. We had seen many large deer feeding in full view during our fishing excursions, and had heard of others having seen some very large deer at Beaver Ponds; but as there were few fish in them, we had not gone there. It was a hard trail of three miles, but as the weather was

cool, we stuffed a few needful articles in our pack, and went over there prepared to stay a few days, to see if we could get one of the big deer that had been seen. There was a little log cabin and a great surplus of young balsam that we cut down and used freely to make comfortable beds, and to carpet the floors. A few hours' healthy exercise and we had a camp, such as would delight the heart of any hunter. The ponds were small, shallow and muddy at the bottom. We prospected round the fringe of dense underbrush on the shore, and on the second day came upon a large buck deer feeding among the thickest of the cover. He raised his head and assumed a poise as for a picture; a noble sight to see, and a well directed soft-lead bullet finished his career. He was a big, old fellow, and had evidently been in some rough fights, as one ear had been slit for some inches, and the other bore evidence of having previously been frozen, as a piece of it was gone. This was the largest animal of the species I had ever seen, and it was no easy task to carry that head and carcass over that rough, steep three-mile trail. I afterward had the head mounted, and it is now one of my most highly prized trophies.

The venison we cooked in every way that skill and location would permit, even rivalling in a peculiar excellence the famous inimitable dinners at Kennelly's on Broadway.

What sports are there in house or city to compare with those that the children of the wild wood enjoy, and often as we pause a moment in the hot smoky air of town, will come the refreshing memory of these scenes and cool breezes, that forever blow on the clear waters of Aroostook.

Not the least in importance is the selection of your guide, he should have a cheerful disposition, quick, inventive and active. A skillful, correct-mannered guide is a great joy and a source of constant pleasure. A good, true sport or a good and faithful guide is rarely over-talkative—the habit of their skill is silence and the conversational powers, the "feast of reason and flow of soul," are reserved for the camp-fire. These men of the woods are generally self-reliant, independent, models of energy and faithfulness, and if you treat them fairly and in a respectful, manly spirit, you will surely get your money's worth, and I have seen them under every test—hunger and fatigue, exposure to heat and cold, sickness and health, good and bad luck—and a more faithful, honest, painstaking, patient class does not exist. Modest of speech, fearless of danger, untiring in their efforts to please, and to prove a faithful helper and friend. In going into camp with a guide avoid a low-bred, coarse-mannered, surly fellow as you would a pestilence or a rattlesnake.

Many pleasant evenings are spent in the glow around the camp-fire, with a few genial friends, and kindred spirits to listen, and relate the story of adventure. Shoot over again your first or largest buck, and land once more your largest or gamest trout.

What a jolly personnel was here assembled, one could scarcely imagine a more frolicsome set on a vacation, with all serious cares left behind. A great physician from Boston left the serious business of his profession behind him and was always ready and willing to inject mirth into a meeting, and a most genial sunny

fellow and excellent sport as ever enlivened a camp. A merchant who when in the city supplied nearly half of the people there with many of their needs, and who has the faculty of making people feel it a pleasure to hand him their money, and his table talk was a source of pleasure and an aid to digestion. A young banker, an athlete, who was always so fit and jovial, one morning after his usual swim in the cold waters of the lake, was asked as to his condition, remarked that he felt as if he could lick his weight in wildcats. What never-to-be-forgotten occasion was the hour of the evening meal! when the hungry set met bronzed from exposure to the wind, water and the sun. What jokes provoking roars of laughter enlivened that meal! No rudeness or questionable stories, and with each sally of wit and roar of laughter, the ethics of a gentleman were never violated, and they always mixed their wine with sobriety.

There is no social directory in the wilderness, and the company was not made up by a social leader. Oh, no! All were thrown together by chance, or at least by the "call of the wild."

One afternoon some time after the opening of the moose shooting season, the banker and his guide, who had been absent from camp for two days, drew their canoe up on the landing. Not only did he poise his most important bank director step, but he carried with him an air of responsibility, only seen in those who have been frequently marked with success. His face was lit up with more than his usual cheerful disposition. "How is it 'sport,'" asked the scribe, with a laugh, "have they made you president of your exchange, or are you to join the central figure at a wedding?" "Joining the central figure at a wedding is all right," was his reply, "but I've got something that knocks being president of an exchange cold! We went up yonder in the thick timber and shot a big bull moose with a fine head. Oh! it was a nice tidy affair, landed him with one shot from my old reliable .45-90 Winchester." He had been in camp two weeks, and the only thing he needed to complete his cup of hunting happiness was a bull moose, and from that day forth he has tuned his heart to sing the praise of Aroostook.

Did you ever notice the response that occasionally occurs to persons with a genial nature and a generous spirit? Well, it broke out here, and every sport and guide at the camp volunteered assistance to skid that moose to where he could be put on a raft of three canoes and brought to camp. The head has been beautifully prepared and now adorns the walls of a city mansion.

In order to lighten the penalty of declining years, we must go back to nature at least once every year and be refreshed and rejuvenated by the murmuring waters, and be lulled to sleep by the song of the rapids; and if we live to be old, we shall yet die young, with a treasury stored full of memories, that will be well worth having.

#### Aw, What's the Use.

A right-handed writer named Wright,  
In writing "write" always wrote "rite."  
He meant to write "write,"  
But he couldn't write right—  
Who started this darn thing, anyway?  
—Cincinnati Enquirer.

#### New Publication.

SINOPAH, THE INDIAN BOY, by James Willard Schultz (Ap-i-kun-i). Profusely illustrated by E. Boyd Smith. Houghton Mifflin Co., New York. Price, \$1.10 net.

Here is a story of a Blackfoot Indian boy, who, from his christening Sinopah, to his life as the great Chief Pitamakan, furnishes a narrative enjoyable to the grown-up and thrilling to young people. Those were wild days when Sinopah was born. Fort Benton, owned by the American Fur Company, was the only white settlement in Montana. The Blackfeet owned all of the country from Saskatchewan River in Canada, south to the Yellowstone River, and from the Rocky Mountains eastward 300 miles. The plains were covered with buffalo and antelope, while in the mountains and along the rivers elk, deer, big-horn, moose, black and grizzly bear and wolves were abundant. It was in this setting that Sinopah was reared. It is in this atmosphere that Apikuni has developed his famous stories, now historic in literature; and this last effort shows no diminution in wondrous interest from his previous classics. Read it to your boys and girls for the pleasure you will get and the profit that from it they will derive.

#### Tanning Skins.

BETHLEHEM, Pa., March 28.—*Editor Forest and Stream:* I see by this week's issue of FOREST AND STREAM your Buffalo correspondent, Mr. Eames, asks for a simple formula for tanning skins. The following has been used with success by myself and others for tanning fresh skins: One part alum, one part saltpeter, one and a quarter parts salt. Make all very fine and cover flesh side, roll up and leave four days in a cool place, then rub well until dry; stretch on a flat surface and paint with neatsfoot oil; leave four days, take down, and work oil in well. If a thick skin (deer, etc.) give another coat of oil and rub.  
JOHN F. RAUCH.

#### Who Lost This Bird?

EAST NORTHFIELD, Mass., March 26.—*Editor Forest and Stream:* We have discovered a carrier pigeon in our barn, with the following markings on it: No. 12, U. F. B. Mason, St. Lawrence, 307 Mass. Not being familiar with the abbreviations and terminology of fanciers, I am at a loss to know whom to address to notify them of their property being in our hands, and write to you for information.  
W. R. MOODY.

#### Sleeps with Fly-Book Under Pillow.

PLAINFIELD, N. J., March 18.—*Editor Forest and Stream:* Your paper failed to put in an appearance last week at the usual time. I missed it awfully.

Please hurry along; spring is coming. I retire early and sleep with my fly-book under my pillow and dream of the budding leaves and the streams and the quiet rise of the big fellow that "done" me last season. Good luck.

JOHN DOUGHTY.

# Labrador for the Sportsman

By DILLON WALLACE

LABRADOR embraces an area of 511,000 square miles, and of this immense area it is safe to estimate that 170,000 square miles are covered by water. It is a land of great forests, wide barrens, innumerable lakes, large rivers and myriads of sparkling brooks.

Three varieties of caribou inhabit the forests and barrens, black bears are comparatively numerous, and the white or polar bear visits the eastern, northern and western coasts. The lakes of the plateau are well stocked with namaycush or lake trout—which often attain an immense size—and with pike; the rivers with salmon, ouananiche and brook trout. Nearly all the streams and lakes, indeed, teem with trout.

Labrador, so far as the sportsman is concerned, is virgin land. Leaving out of consideration a narrow region contiguous to Lake St. John, the Saguenay River and the Gulf of St. Lawrence, you may count upon the fingers of your two hands the sportsmen who have visited the country with rod and gun during the last ten years. The only explanation that occurs to me of this neglect of so fertile and so attainable a field for enjoyment and novel experience is the undeserved bad name that Labrador bears, together with lack of information concerning sections of the country attractive to the sportsman and which at the same time might be reached without too great an expenditure of time and effort.

Salmon run in nearly all of the Labrador rivers, but the further north one goes, the less likely are they to take the fly. I refer here to the eastern peninsula, northward from Battle Harbor, which is situated on the extreme southeast coast. This section of the coast may be reached from June until November by the fortnightly mail boat from St. Johns, Newfoundland, a very comfortable little steamer of the Reid-Newfoundland Company.

Battle Harbor is the first Labrador port of the northward-bound steamer. Here natives with small boats may be employed for excursions to the St. Charles River, and to a river flowing into the head of St. Lewis Inlet. So far as I am aware, no fly has ever been cast into either of these streams. From St. Francis Harbor, two ports beyond Battle Harbor, the Alexis River is reached. Natives have informed me that this was an excellent salmon stream—the best, in fact, of the southeast. So far as I am aware no angler has ever visited it, though it is certain that natives take many salmon here every year with nets.

My advice to the angler, however, would be to proceed to Sandwich Bay, disembarking from the steamer at Cartwright Post of the Hudson's Bay Company. Here he has several rivers in which to try his luck, and if fortune does not favor him in one he may easily shift to another. The best salmon rivers in Sandwich Bay are the Paradise, the Eagle, the North, the South and the White Bear. The Hudson's Bay Company nets them here rather extensively, and I am personally aware of some three or four anglers who have visited these

waters with success. The Cartwright agent of the company will be glad to assist the sportsman in securing native guides with boats.

Thus far I have said nothing of trout. Let it be understood that all of the streams mentioned are splendid trout streams, though to find the largest trout one must ascend the streams a considerable distance. North River is a particularly good trout stream, and natives have assured me that one may row a boat pretty nearly to the pools of the four- and five-pounders.

The country back of Sandwich Bay is a pretty good bear country, though during the fishing season caribou are scarce. In this, as in all the deep inlets and bays, seals are plentiful. Seals are not easy to shoot in open water,

have tried it. I am doubtful, indeed, whether a fly has ever been cast in the Kenamou. There are many other streams emptying into Hamilton Inlet, and much beautiful country surrounding the inlet attractive to sportsmen.

Ascending Northwest River, and three miles above the trading posts, Grand Lake is entered. This is a magnificent sheet of water some thirty-five miles in length, and presumably very deep. There are five rivers and many brooks emptying into Grand Lake. Cape Corbeau River, which is unexplored, enters from the south, and Waddy's brook from the north, each about halfway up the lake.

Five miles from the head of the lake the Nascaupée and the Crooked rivers enter a deep bay on the north, and the Beaver and Susan

LABRADOR CARIBOU.

and in Labrador it is a greater feat of marksmanship and sportsmanship to shoot a seal than to shoot a caribou.

The country contiguous to Hamilton Inlet, to the northward of Sandwich Bay, offers excellent all-round sport, both with rod and gun. Rigolet Post of the Hudson's Bay Company is the point of debarkation for Hamilton Inlet. A tug belonging to a lumber company operating at the head of the inlet, or a little mission steamer, usually connects here with the mail boat, and passage on either may be secured to Northwest River, ninety miles inland. Or, should both of these boats fail, a native may be engaged with a sailing craft for this most interesting and delightful journey.

At Northwest River there are two trading posts—one maintained by the Hudson's Bay Company, the other by Revellion Frères, where supplies and such outfitting as may be wanting, can be purchased.

Twelve miles across the inlet from Northwest River is the Kenamou River, said to be a good salmon and trout stream, though I never

rivers flow into the lake at its upper extremity.

The Susan is a swift and unpractical stream upon which to travel. The Lower Beaver is unexplored, and only an investigation would reveal its character. In the upper Beaver, however, fifty miles from Grand Lake, and thence on to a series of large lakes where it has its rise, I have caught no end of fine trout. In August, 1903, Leonidas Hubbard, Jr., and myself landed in one hour from a single pool eighty-nine trout averaging fourteen inches in length. Neither of us stepped outside a circle ten feet in diameter.

The lakes at the head of the Beaver River contain pike, and no doubt lake trout. Wild geese are always here during summer, ptarmigan are found upon the surrounding hills, and caribou are very certain to be seen along the river and in the neighborhood of the lakes. I should say that fifteen days would take a party from Northwest River to the lakes, with no halts for bad weather.

The country around the head of Grand Lake, and particularly along the lower Nascaupée

pee, is well stocked with bears. I have seen innumerable fresh bear signs around the mouth of the Beaver and Susan rivers.

To the sportsman looking for both angling and hunting, I would suggest as quite available and easily reached the Nascaupée and Crooked River region. The lower Crooked River is too swift to ascend with a canoe, but higher up it may be entered by a portage route from the Nascaupée.

Turning into the bay which I have mentioned on the north side and some five miles from the upper end of Grand Lake, the wide mouth of the Nascaupée will be discovered. Just above its mouth on the right hand bank is an unoccupied trapper's cabin. Ascend the Nascaupée—which is a large river and cannot be mistaken—some twelve miles, to a point where a shallow river enters from the left. This is the Red River. A mile or so above the junction heavy rapids occur in the Nascaupée.

Nearly opposite the Red River and on the east bank of the Nascaupée, is a small tilt, or cabin, used by trappers in the winter. A little way above this an Indian portage trail turns to the eastward, and over a high hill to a small lake. Here look out for caribou, for stragglers are certain to be encountered from this on.

The trail continues eastward through a series of six or seven small lakes, and is generally well defined. With one exception it will be found to leave the lakes nearly opposite the point where it enters. This exception is a long, narrow lake where it leaves about halfway down the lake and just before the second island is reached.

This trail will presently lead you into the Crooked River. While small trout are plentiful in the lakes on the portage trail, here in the Crooked River the first really large trout are found. At the point where the trail enters it the river runs with a swift current, one rapid is ascended a little above, and a little way above the rapid a branch enters from the right. You are to keep to the left-hand branch, however, and quickly you find the river divided into two streams, with the left-hand stream pouring down over the rocks in a heavy rapid, or low fall. At the foot of this rapid lurk really big trout and onaniche. I have caught beauties of both species here, the trout running up to six pounds—and there is no end to them—the ouaniche larger.

No fly has ever been cast in this stream by any but myself and my party, when here in 1905, and no other white men than ourselves have ever crossed the portage trail or seen the country contiguous to the Crooked River.

Good angling continues as the river is ascended. The portage around the rapids is to the left of the left-hand branch. A day or two up stream will carry you into Lake Nipisich, an entrancing sheet of water. I did no trolling on Lake Nipisich, but there is little doubt that it contains lake trout. It is well worth a visit. In all probability ducks and geese will be found here.

No Labrador native except the Indian has ever seen Lake Nipisich. With the assistance of good packers it should be reached in eight or ten days' travel from Northwest River. By caching along the way necessary supplies for the return trip to the Nascaupée, and traveling light, even less time would be consumed,

unless halts are made for the purpose of hunting and fishing.

Caribou are certain to be encountered between the Nascaupée and Lake Nipisich. There is an excellent chance of meeting bear. No where in the world is there better angling. Therefore I recommend this section to the sportsman.

Another good caribou region, at same seasons, lies back of Davis Inlet, to the northward from Hamilton Inlet. The caribou are likely to be far back into the country, however, until near the close of steamer navigation, and I do not recommend the sportsman to go so far north unless he is prepared to remain during the winter.

For Labrador trout use Nos. 8, 10 and 12 hooks. No. 8 will be the size mainly used. I have had my luck with the duller hued flies, the brown-hackle, though in Labrador trout are not very particular. When conditions are not good for fly-fishing use a snelled hook, a .22 bullet or shot for sinker, and the belly fin of a trout for bait. They will invariably respond to this lure.

Salmon begin running in the Sandwich Bay rivers about the first week in July, and are found in the neighborhood of Hamilton Inlet about the 10th to 15th of July. The salmon outfit should contain a good assortment of flies, for salmon in these higher latitudes on the Labrador need much coaxing.

The sportsman who goes to Labrador will be no novice, and will require little advice as to outfit, but let me make these suggestions: The outfit should be as light as possible, and contain neither luxuries nor superfluous claptaps. Pork and flour can be purchased at the trading posts. Desiccated vegetables and evaporated fruits are preferable to canned goods, because lighter. A small folding sheet-iron tent stove will be well worth its trouble and weight. Balloon silk or other of the very light-weight waterproof tents will reduce effort on the portage. Tent should have ground cloth and be fitted with a front of mosquito netting or cheesecloth, as a protection against mosquitoes or flies.

Personal clothing should be substantial—medium-weight underwear, heavy woolen socks, moleskin trousers, gray flannel outer shirt (blue or very dark cloth seems to attract black flies), a heavy pontiac shirt to be used as a sweater, felt hat, plenty of bandanna handkerchiefs, one pair of heavy, hob-nailed wading shots, or wading sandals, two pairs of larigans or oil-tanned moccasins, and at the trading post purchase also a pair of native sealskin boots. It is well to be supplied with a suit of feather-weight oil skins.

As protection against black flies and mosquitoes carry a good stock of fly dope. Purchase from your outfitter a head net that will fit over your hat and set well down upon your shoulders, and is supplied with tie string to come under the armpit. Cut the fingers off an old pair of kid gloves at the second joint, and have sewn to the gloves loose armlets that will reach to the elbows. It is well to button the sleeves of your outer shirt over these. This glove and sleeve attachment is even more essential for protection and comfort than the head net.

A light sleeping bag—as light as can be

had—with a double lining of good woolen blankets, will make a comfortable and sufficient bed.

You will have to take canoes with you. They cannot be had in Labrador, and canoes are necessary in penetrating to caribou hunting and trout fishing country.

Native Indians cannot be employed as guides. Neither can you depend upon employing breeds or other natives in summer, willing to go beyond tidewater, or at most beyond the beginning of the first portage trail. It is for this reason I have detailed so carefully the portage route from the Nascaupée River to Lake Nipisich. Take your packers and canoe-men with you.

Game laws do not extend to this part of Labrador, and there is no restriction upon either hunting or fishing as to season or bag, and no license fee is charged.

Labrador may be reached via rail to North Sydney, N. S., steamer to Port-aux-Basques, and rail to St. Johns, where connection is made with the fortnightly mail steamer. Or, you may go by steamer from North Sydney to Port-aux-Basque, rail to Bay of Islands, and thence by steamer via the Straits of Belle Isle to Battle Harbor, and there connect with the northward-bound mail steamer from St. Johns. A more leisurely, and for those who have time a much pleasanter, route is via Red Cross Line steamer from New York to St. Johns. This steamer calls at Halifax, and affords one day in that delightful city. Should you find it more convenient to make your sailing from Boston than New York, other lines of steamers running from Boston to Halifax will permit you to connect at Halifax with the Red Cross Line steamer to St. Johns.

### Books Wanted.

CANOVA, S. D., March 20.—*Editor Forest and Stream:* Herewith find inclosed check for one year's subscription to your valuable paper. I like your paper very much. Kindly send me your book catalogue. You have called attention to some good hunting books in "Trail and Camp-Fire." I have bought a number of books from Captain McNab and like them very much indeed. Can you get me the books by Selous, "A Hunter's Wanderings in South Africa" and "Travels and Adventure in Southeast Africa"? And where can those books on Indian sport be bought—"Highlands in Central India," "Thirteen Years Among the Wild Beasts of India," "Wild Sports of India," "Large Game Shooting"? And what is the price for a book? And can you get me the book, "Short Stalks"?

An early answer will oblige yours truly,  
WM. POTRATZ.

# Among the Mexican Troglodytes

By EDWARD HOEFLICH

Illustrated from Photographs taken by the Author

(Continued from last week.)

FROM Yoquibo we continued our journey toward Guachichic. Near the former village a high plateau commences with a wonderful vegetation of wild flowers and trees of immense size. I noticed white pines more than 100 feet in height and nine or ten feet in circumference at the base. Instead of following the straight road, old chief Peña induced me to take a side trip toward Zapuri, where there are supposed to be excellent hunting grounds. Almost immediately he struck the trail of a deer, but I was hardly able to follow the old Indian and his runners, although I was on horseback. After a six hours' run, I finally had a chance to kill an old buck of exceptional size. The Indians told me that, in former years, they had to fight many bears, mountain lions and jaguars, which often bothered their small herds. There are deer in numbers, but the Indians enjoy most hunting squirrels. Wild turkeys (tschivi) are to be found in great abundance, but, on account of the broken grounds, they are very hard to hunt. Besides turkeys, there are many kinds of eagles, large owls, ravens and woodpeckers almost everywhere. The latter are hunted mercilessly, on account of their feathers, which are supposed to be of use in preserving the Indians' health.

We continued our hunt until nightfall, and, toward midnight, we reached our camp, where old Peña remained over night, and the next morning took leave, going back to his caves. Traveling onward toward Guachichic, we reached this Indian village, without any incident whatever, late next day. The medicine man was advised of my coming, and, although his dignity would not permit him to advance to greet me, he was rather cordial when I entered his house and shook hands with me. By this time I understood a few words of the Tarahumare language, and, with signs, we understood each other very well. He invited me to his best room, where he, his family, and all his animals, lived together. Upon my suggestion, however, he was willing to visit me in my tent, where I spread out for him a royal meal of canned goods and good cognac. Here I had almost the same experience as at the Baranca del Cobre, but, knowing better the Tarahumare character, I made friends more rapidly with them. Next day I had occasion to be present at a court proceeding. The simplicity and justice meted out was rather a revelation to me. The case was as follows:

About a year before, a married man ran away with another woman. They remained in hiding all this time, but, finally, the curiosity of the woman gave the guilty couple away. They were brought back to the village, and the medicine man, together with the chiefs, held court in the open square. The prisoners were brought in by five policemen who were armed with bayonets tied to bamboo sticks. The court appointed an attorney for the defendants, but, as

they acknowledged their guilt it took the court about five minutes to pass sentence. The man and woman were ordered whipped on the spot. Without the twitching of a muscle, the Indian walked a few steps to the post, turned his back to the policemen and received without a groan his whipping. The same operation was performed with the woman. The second part of the sentence was that the man, who begged to be permitted to live with his sweetheart, must return to his lawful wife, and the woman must be married immediately to any one who would have her. There was a short suspense, because no one seemed to want to become her husband. Finally a young chap, about eighteen years old, stepped forward, declared his willingness to cast his lot with that of the woman, and a few minutes afterward they were man and wife.

In Guachichic, Noragachic, Tomachic and Guachóchic live more than 9,000 Tarahumares. This part of the Tarahumare country is considered the most thickly settled, and here most of the Indians continue to observe their pagan rites, though they have a mixture of Christianity. The family life is about the same as everywhere else, though I have had occasion to note some different features. The women, who are rather comely, are usually occupied with needlework and pottery-making, when their household duties give them time for it. Their family life is rather happy; the mother is very fond of her children, and while there I

had a chance to see the peculiar custom of kissing each other on the belly, as they do not know the mouth kiss. They are very hospitable, but to make a visit is a tedious job. When a neighbor wants to visit, he covers himself with a serape, slowly approaching the house so that he cannot be seen. There he will sit down and wait until invited to enter. The family to be visited is often at dinner, or doing some kind of work, and the first thing they do is hold a family council as to whether they should invite their would-be guest to come inside. This council often lasts for hours, and the visitor awaits patiently the decision. Finally, the owner of the house steps outside with great dignity and invites the other to enter. Coming in, he is offered tesguino, and they often chat for hours. If it is a stormy night, the guest is always invited to remain within the house for the night.

Although the Tarahumares are of rather moderate habits, their home-brewed beer, tesguino, plays an important rôle in their home life and in their religious ceremonies. Tesguino is made in the following manner: The corn is moistened until it sprouts, when it is crushed and boiled, and, to make it ferment, a seed of some herb, which looks like wheat, is used. For a Tarahumare it is a feast of the gods to drink good tesguino and eat a few roasted field mice with it.

Their religion is very simple. The men pray to the sun, and the women to the moon.

STREET MARKET IN MEXICO.

They believe that the sun takes care of the world during the day; therefore, they never transact any business until the sun is gone down. They call him the "Father Sun." The "Mother Moon" is ruler during the night, and her son, the morning star, helps her to watch and command the other stars. The Tarahumares are rather good astronomers, and they love to study the different constellations, most of which they know by sight. The nominal Christians also believe in a Tata Dios, or god-father; a Madre Dios, or godmother; (the Virgin), his wife, and also in a devil, who is an old man with one eye and a long beard, like the Mexicans. The devil has many children, who are Mexicans. The belief in the cross is followed by the pagan Tarahumares also, and they explain it as representing the sun, the perfect man, with extended arms. In most homes they have three crosses, one representing the sun, one the moon, and one the morning star. This is the same as the Christian Trinity. They believe in immortality and claim that death is only a change for the better.

The medicine man, who is, at the same time, the chief of the tribe, plays a great part in the life of the nation. He is the high priest, the medical adviser and judge. They are clever prestidigitators and hypnotists, for, in many cases, they make the poor sick Indian believe he is cured. The medicine man must be very clever, as his lot is not very enviable if he is not successful. Although they have some good medicinal herbs, in the most cases the medicine man's cures are made with prayers. After a thorough examination, they put a very small tube made from human bone into the sick part and suck out worms, and stones. The cure must be made effective, however, by the immediate burial of the stones and worms, and these must not be disturbed, otherwise the medicine man's efforts will have been in vain. The cause of most sicknesses is believed to be some spirit which entered the body, and which must be driven out. The same explanation is made for a headache, the sufferer believing that a spirit is hammering inside the head. Quite frequently the Tarahumares use steam baths, which have an excellent effect. They dig a hole in the ground in which a person can remain sitting. Into this hole they throw hot stones, covering them with green cypress or cedar twigs. Most of the patients are taken out more dead than alive, but frequently cured. The Tarahumares believe in brujas (female witches) also, and it is the high priest's task to drive out the bad spirits inculcated by these witches. Sacrifices of animals to the gods are very common, and when they are sick the Indians try to induce the gods to help them by means of votive offerings. The same thing is done when the rains are delayed. Throwing water toward the heavens is a common ceremony, and the sacrifice of pet animals is indulged in.

Although they believe in immortality, they believe also in the transmigration of the spirits of dead humans into animals. To find out into what animal the dead person has been changed, they leave a meal with the corpse over night and throw ashes around the bier. Next morning, they study the tracks of the animals which visited the corpse during the hours of darkness, and thus decide into what variety of ani-

mal the person has been turned. The dead walk during the night; therefore the Tarahumares keep indoors, so as not to disturb wandering spirits. The Indians believe that all nature is alive, that plants and animals have souls, and, therefore, they are careful not to destroy wantonly any forms of life.

The dances (donzas) are mostly of a religious character, and often last two or three days, as the Tarahumares claim that the gods are pleased with such ceremonials. Men never dance with women. The dances are of about the same nature as their music, slow in movement and melancholy. The two principal dances are the rutuburi, which they learned from the turkeys, and the yumari, taken from the deer. In dancing and in drinking tesgüino they express all their desires to the gods. I spent more than a week in Guachichic, and, although we suffered a great deal from the lack of good food, altogether it was an enjoyable time I passed with the Tarahumares there. At the same place I met a Tarahumare who was taken to the Chicago World's Fair. I had a rather long conversation with him, but he was not greatly impressed with what he had seen in Chicago, notwithstanding the fact that he played a great rôle in the village, and that his history probably will be handed down to posterity. We made many side trips, as far down as Zapuri, and other small villages. One afternoon we got into Tomachic, where I had the good luck to be present at one of their periodical dances. It was nothing like an American Indian war dance. In the beginning it seemed rather monotonous, but, after catching the strain of their music, I found it interesting. The dance goes on for a few minutes in even rhythm, and when the tune of the music changes, the whole crowd bursts out in a short shout, and then on they go again. The only interruptions they have are to drink tesgüino. In the evening the dance is continued by torchlight, until, at a late hour, the dancers drop out one by one, less from fatigue than from imbibing too much of their native beer. During the harvest, they never pay their help, but the neighbors assist each other, and a peculiar custom goes with it. When the work is finished, they take the owner of the land, bind him hand and foot, and carry him to his house, where he is compelled to furnish plenty of tesgüino and a good meal before his neighbors liberate him. The whole proceeding is carried on with such a serious manner that a stranger would believe that the man is going to be punished for some crime, but it seems natural with the Tarahumares, as they seldom are seen to smile.

From Guachichic we took the trail to Minas de Oro, and from there to Guadalupe y Calvo, which lies in the most southern part of the State of Chihuahua. Guadalupe y Calvo was one of the best known mining camps of the early thirties of the last century. It was worked mostly by Englishmen, who took untold millions from the camp. At present the town is deserted, but the whole aspect is that of an English village, with nicely laid out streets, covered with cobblestones, but with grass growing everywhere. I met a few Americans, and it was really a pleasure to taste fresh food. My animals and runners were in good shape, so I pushed on northward, toward the government reservation of Tecoricich.

Passing the Rio Fuerte, we climbed a rather steep barranca, but when we reached the high plateau, we found ourselves in the midst of a wonderful timber tract. For miles and miles the great pine trees reared their heads, proudly, like giants, more than a hundred feet in air, seemingly paying little attention to human beings far below. Next day we reached the continental divide, about 10,000 feet above the level of the sea, and, though we could not see to the Pacific or to the Atlantic, we had the idea that we governed with our sight the two great oceans. At this altitude, the nights were rather cool, but we did not suffer to a great extent with the cold.

Continuing on the Parral to Guadalupe y Calvo road, we got into Tecoricich Sunday morning. Before arriving at the village we were surprised to see so many empty houses, but it was explained to us that as soon as a member of a Tarahumare family dies, the house is vacated, and, in some nearby valley, another is built. In Tecoricich we were welcomed heartily by the new schoolmaster, Edmundo Loya, and the chiefs of the Tarahumares. In Tecoricich there is much farming, and most of the trees are cleared from the land. Edmundo Loya told us of the different great lagoons near here, so we decided to cut short our visit to Tecoricich, and to return after our excursion to these lakes. Following the course of the Tecoricich River, we approached the Nanaruchic Mountain, about 9,000 feet high, and, to get a good view of the surrounding country, we climbed the easily accessible peak. From there we saw the five lakes, and decided to put up our camp for the night, near the Laguna de Juanota, which has an area of about half a mile in width by a mile in length. We arrived before sunset and, erecting our tents, we enjoyed a pleasant evening around the campfire. Next morning we had a pleasant surprise. The lagoon was covered with thousands on thousands of ducks, as well as many other kinds of waterfowl. I liked the place and planned to remain there at least two or three days. The nearby Tarahumares came into my camp and were surprised to see a white man around there. The first thing I tried to do was to explore the lagoon, and for that purpose I built, with the aid of the Tarahumares, a raft. This was a revelation to the Indians, and they never thought that such a craft would remain on the surface of the water. I got a good deal of pleasure from boating on the lagoon, and when I reached the most southern point of the lake, I saw, on a small elevation, quite a number of Tarahumares in earnest consultation. Expecting to find something interesting, I approached the meeting place and discovered that they were deliberating about the election of a new governor of the Tecoricich reservation. They spoke very little, but it seemed that, with few words, they came to an understanding.

The time passed all too quickly at the lagoon, but as I planned to spend a few days in Tecoricich, we broke camp and retraced our steps toward the village. Edmundo Loya spoke Spanish fluently, and I had a good chance to get a great deal of information concerning the Tarahumares from him. The whole Tecoricich district contains about 2,000 souls. There is a small adobe church, and the Catholic priest

(Continued on page 450.)

# GAME BAG AND GUN

## An Oklahoma Shooting Trip.

NEW YORK CITY, March 26.—*Editor Forest and Stream:* For some time past I have been meaning to write to you about a little shooting trip I took in the late fall in McCurtain county, Oklahoma, which may possibly be of interest in case you should have any inquiries regarding sport in that territory.

A party of four Chicago friends, including myself, took a long, hard trip over the Frisco Road to the southwestern corner of Oklahoma, where we went into the old Choctaw Indian country, part way over a lumber railroad and the rest of the distance—about twenty odd miles from civilization—in wagons over what they called roads, which were really blazed trails through the woods for the most part.

We found beautiful rolling wooded country, but with a decided lack of good water, and had considerable difficulty in locating our camp near a good supply.

We were late enough to miss the rattlesnakes and other vermin, which were pretty well holed for the winter, although we saw a few tarantulas roaming around at midday in the sun.

The weather during the day was very warm and beautiful, but the nights were exceedingly damp and chilly.

There are no real guides there, and the hunters we could get, for the most part, were made up of poor whites who were satisfied with low wages and who had no idea of the duties of a guide. They did, however, help us in some directions when they were not scooting off by themselves without our permission looking for game.

In hunting, we had no difficulty in finding plenty of deer and had gotten three good bucks before I left, after being in camp eight days. I devoted most of my time looking for turkeys and was successful after a great deal of hard work. I should like to spend more time in turkey hunting, as it is extremely difficult to get near enough to get a shot at a turkey.

We had some duck shooting, quail, rabbits, fox, squirrels and plenty of 'coon and 'possum hunting at night in addition to the deer and turkey, and got some of about everything there was in the woods.

Our evenings around the camp-fire were about the best part of the trip, as the stories and talk of the local hunters, with their debates, were most interesting and laughable, and the old fiddle was not neglected.

You can imagine we lived pretty well, having a good cook to work over the camp-fire and all kinds of food, besides game.

It was a most enjoyable experience all the way through, and I should not have missed it for a great deal, but, like every other available hunting place to-day, the woods were terrifically over-crowded and we refrained from going way through to the mountains on account of reports of the hunters in that better territory.

Under present conditions it will be but a year or two before the game will be almost extinct there, even with the care of the wardens who are trying to enforce a law, which is being violated every day, as regards the killing of numbers as well as species of game.

Again, the class of hunters through those woods is not trained and is very careless. I will confess that I was nervous a great many times when I was roaming around alone between and over the ridges, when I could hear dogs and shooting in different directions about me. I should prefer to find a new ground for my next trip and certainly would not go into

THE AUTHOR.

this country earlier on account of snakes and ground vermin.

We saw very few Indians, but we understand that a good many of the old tribe of Snake Indians, of the Choctaw family, have isolated themselves further back in the woods as civilization has progressed through that country, and that a year ago they showed some temper and exception to the invasion of their country by the hunters, which resulted in a little shooting, in a few cases fatal, but now there is little fear of trouble through there. Civilization is progressing very fast through all that country; the towns springing up are remarkable in many ways. It will not be a great many years before the lumber industry and other lines of business will be in full swing, where ten years ago was an absolute wilderness.

GEORGE E. FARRINGTON.

## Menhaden-Oil Exports to Scotland.

THE annual imports of menhaden oil into the Glasgow consular district amount to about 20,000 barrels, nearly all from America. Most of the oil is refined by one concern. Owing to the advancing prices of linseed oil, menhaden oil is used largely in paints and in the manufacture of linoleum.

## Connecticut Game Protection.

ESSEX, Conn., March 7.—*Editor Forest and Stream:* To my way of thinking the McLean bill for the Federal protection of migratory birds, is the greatest measure ever adopted by any legislative body in this country for the protection of our wild life. Without doubt under Government supervision the law will be more strictly enforced than it is at present, and a uniformity of open and closed seasons for large sections of the country will work wonders in keeping up the supply of ducks and other migrants. It will also do away with the foolish attempts that are constantly being made whenever any State Legislature is in session to have whatever good laws that State may have repealed.

I know how it is in the State of Connecticut and oftentimes am disgusted at the shortsightedness of those people who are trying to bring about those changes. For instance, there is a bill up now for lengthening the open season for shooting ducks till the 1st of February, introduced, I understand, by some gunners who reside on the Sound shore in this county (Middlesex). To be sure, there are ducks galore, and the ever present desire to kill is again made manifest by this silly bill. And yet the reason for this abundance is not far to seek. In the year 1907 the State of Connecticut wisely put the ban on the killing of ducks after Dec. 31, this becoming a law after the closing date of the open season had vacillated between March 31 and April 30, almost biennially for several legislative terms. Almost immediately results began to be in evidence. The supply, which for a few years had been decreasing, now began to hold its own, and to-day, in spite of the ever-increasing number of hunters, it is safe to say that there are more ducks of almost every variety than there were eight or ten years ago.

I doubt very much if there is a more thoroughly gunned section in the State than in the four towns of Lynne, Old Lynne, Essex and Saybrook in the lower Connecticut valley. I have recently compiled a few figures to see just what proportion of people were taking out hunting licenses, finding a list of the same in the last report of the Connecticut Fish and Game Commission. In the counties of New London and Middlesex, the ones in which these towns are located, the proportion is one license for every forty-six and thirty-five of the population respectively. In the above mentioned towns the proportion is 11, 18, 17 and 26 in the order given. There may be towns in other portions of the State that furnish nearly as many licenses, but I doubt very much if any four adjoining towns produce so many hunters.

I merely mention this to show that there is some shooting done in this locality, and to make plain that whatever game we may have, is not here because it finds this section a refuge and a safe retreat. Now, here are a few samples of bags of ducks that have been made here recently. I know of two hunters who on two dif-

ferent occasions killed between twenty-five and thirty blackducks in a day's shooting in the fall of 1911. Bags of fifteen were no rarity at all and were frequently made this past fall. I also know of two days' shooting at broadbills this past fall that I can verify. One bag made in a single day was composed of fifty-seven ducks, mostly broadbills, and the other forty-seven all broadbills. Of course these figures may seem large for this part of the country, and indeed they are. I do not want to give the impression that such bags can be made every day, for such is not the case, but I do want to show clearly that these strings are by no means uncommon.

I am almost daily made aware of the presence of wildfowl hereabout. I can look from the window of my home and see ducks, mostly mergansers, almost any time, sporting and feeding in the openings in the ice of the cove, and by venturing out and exploring unvisited places, I can see them almost without number. Just before this last cold spell, or to be more concise, on Jan. 26, I sallied forth in a canoe to see how many ducks were stopping in Lord's Cove, a large bay and marsh on the east side of the river. I had heard that large numbers were stopping there, but had no idea so many would be seen. It is no exaggeration at all to say that there were hundreds and hundreds, mostly blackducks and broadbills, with a few mergansers and golden-eyes. It is highly gratifying to see such large numbers around and to realize that the abolition of winter and spring shooting has brought about such splendid results.

I hardly think the sensible sportsmen of the State will ever stand for the repeal of the present excellent law we now have, for anyone of an observing nature can readily see that it is working too well to be tampered with. Nevertheless there must be a vigilant watch kept by the friends of the birds till we have a better and more comprehensive law, which I truly hope the McLean bill will be.

GEORGE W. COMSTOCK.

The true sportsman does not quit the field because he missed the first shot.

### The "Red Gods."

AITKIN, Minn., March 1.—*Editor Forest and Stream:* In your issue of Feb. 15 I see Chas. Cristadora refers to the "Kipling or Red Gods" controversy in FOREST AND STREAM some years back. Mr. C. says it was the field against Browne, which was nearly the case. Mr. C. also says the controversy hinged on shod or "shodless" canoe poles, which is an error. There was much random talk about canoe poles, but the final outcome turned on what Kipling meant by "Red Gods."

The trouble started when Browne said Kipling wrote much of meaningless jargon, or words to that effect. As Mr. Kipling's press agents had been working overtime on this side of the water at about that time, the over-excited multitude swarmed out in defense of him.

"When out the hellish legion sallied,  
As bees buzz out in angry fyke,  
When plundering herd assail their byke."

The controversy raged long, and the carnage was somewhat fearful, but did not seem to lead anywhere. I finally suggested, in the columns of FOREST AND STREAM, that each one of the Kipling defenders tell what he meant by "Red Gods," and if he were a clear and lucid poet, they would all agree as to his meaning.

The belligerents fell for the idea and the editor of FOREST AND STREAM set a time limit for all answers to be in. When these were all in, no two agreed on any particular. This would seem to have left the victory with Browne, but the mob would not see it, and by that time Mr. B. was in hiding somewhere in the wilds of Canada, and has never been heard from even unto this day.

E. P. JAKUES.

### Taking the O Out of Odor.

WASHINGTON, D. C., March 9.—*Editor Forest and Stream:* If your skunk-infected correspondent will cover the "spots" of tent and clothing with fresh chloride of lime, all odor will be removed. This is the way the French make skunk furs marketable, free from all offensive stench. TIMOTHY E. WILCOX, U. S. A.

### The Spirit of the Eagle.

BY PAUL BRANDRETH.

Half wakened by a moonbeam's farewell kiss,  
The pool within the forest meadow lay  
And smoked with early mists. O'er night's abyss  
The errant breezes of arriving day  
Brushed with their fairy hands the sleeping pines,  
Hailed forth the ruddy legions of the sun  
To fill the East with ruby of old wines,  
And called the jeweled birds out one by one,  
Till presently within the wood there fell  
A thrush's chiming, like a crystal bell.

That sylvan note in elfin echoes ran  
From hill to hill, from grove to honeyed grove,  
And as a dream voice in the ear of Pan  
Presaging day, its liquid music strove  
To rouse the slumbrous god. Fragrant and cool  
The respirations of the quickening dawn  
Breathed o'er the wood; then lo! beside the pool  
Blushing and ivory-limbed, white nymph and Faun  
Leaped joyously; or borne on shaggy brute  
Trafficked in cherry blooms and wood-sweet fruit.

The low moon set. The wood folk brave with song  
Romped wildly in their Bacchanalian glee  
Till one among this gallant festive throng  
Blew the shrill silver horn that bade them flee,  
And even at the warning, from the glade  
The voice of something sorely wounded cried.  
Headlong they fled as from the pine tree's shade  
A white doe broke the thicket. In her side  
An arrow drove her on with bitter pain,  
And flecked her silky flank with crimson stain.

Straight to the pool she blindly made her way,  
Ah, piteous sight to those bright morning skies!  
For reaching it she stumbled, fell and lay  
Half in the water, with soft dewy eyes  
In terror backward gazing toward the wood;  
And when the East was bathed in golden light,  
Came Acteon and in the meadow stood,  
Searching with cager glance to left and right.  
He saw her! gave a loud triumphant cry,  
And plucked an arrow from his war-girth thigh.

But there he paused. Out of the morning blue  
Swift as a plummet dropped from Zeus' throne  
With sword-shaped pinions dipped in sunrise hue,  
A great gold eagle plunged, a living stone.  
Ah, then it was the hunter stayed his hand,  
For with its mighty wings spread dark and wide,  
The bird in cooling shadow gently fanned  
The stricken deer; and hovering by her side  
Wrenched at the arrow that had laid her low,  
And filled the air with screams of fiercest woe.

Oh, Acteon, be gone ere yet the dawn  
Hath dried from vine and leaf the crystal dew;  
Go, go! ere Dryad, Nymph and bearded Faun  
Come to avenge the death of her ye slew.  
But look! Fate holds him and he waits too long,  
The meadow seethes in anger and dismay;  
The eagle claps his wings, ten thousand strong  
Flash creatures of the forest forth to slay!  
And he who reaped the life blood of the doe,  
The king of birds strikes earthward with a blow!

So are the weaker championed by the strong;  
So doth the hunter with the hunted bleed;  
And so the eagle's battle ringing song  
Doth voice for man a brave immortal creed!

### Belgian Hares.

BOSTON, Mass., March 17.—*Editor Forest and Stream:* I note your item about a revival of interest in Belgian hares. Now, I'm just back from Maine, where Holman Day lives, and he knows a thing or two about that bug. Large factories often rely on their main work for support, but on by-products for profit; and Mr. Day claims that at least one Maine farmer made a complete failure of it with that same Belgian hare because, being a prohibition State, he could not sell their hops for beer.

Moral: Some things are geographical in their profit chances.

The German carp is a case in point.

JOHN PRESTON TRUE.

WILD DUCKS IN SODUS BAY.

Fed all winter by the Conservation Commission, New York State.

### A Queer Catfish.

IN a recent publication of the Annals of the Academy of New York Sciences are printed some notes on a climbing catfish, by R. D. O. Johnson, which are of unusual interest.

The catfish in question resembles in a general way the ordinary catfish, or horned-pout of the north. The skin is smooth and without scales; the color a dark, mottled gray, and the fish is small, rarely being more than twelve inches long. These fish are clumsy, awkward swimmers, wriggling through the water like tadpoles. They are found in the creeks and rivers of the Andes Mountains in the Republic of Colombia, South America.

This is a region of tremendous rainfalls, four or five inches of water sometimes falling within a few hours, and producing floods of immense volume. The rock over which the streams flow is soft and rapidly worn away. The stream beds are steep, consisting for the most part of a succession of falls, cascades, pot-holes and short riffles. If these catfish depended merely on their swimming powers, they would be swept out of the stream in a very short time; instead of—as they do—remaining there and multiplying so that they are very abundant.

These fish are provided with a mechanism which enables them to anchor themselves and hold their position during these floods, and a further mechanism which enables them to creep and climb in any direction. The mouth of this fish is small, but it is surrounded by a broad, soft, rubber-like flap, thin and flexible at the edges, and by the use of this sucker mouth and its surrounding mouth flap, the fish is enabled at once firmly to attach itself to any convenient object. Besides this, on the belly, just back of

CATFISH.

the pectoral fins, there is a triangular plate, to which the ventral fins are attached. The outer front ribs of these fins are broad and flattened, and their flat surfaces are thickly studded with small, sharp teeth, pointing backward. The triangular plate and its attached fins may be moved forward and backward through a distance equal to about one-sixth of the length of the fish, and by means of the alternate action of the mouth and of this belly apparatus, the fish is able to creep along against a current that would sweep it away, if it depended solely on its swimming powers.

On sunny days, when the water is clear, these fish may be seen moving about, hitching themselves along over the surfaces of rocks and stones, sometimes swimming for short distances, but seeming to depend in moving about chiefly on their ability to creep. They are found in all parts of these mountain streams, even in the small tributaries of their heads, and they can only reach those highest waters by creeping up steep slopes.

Mr. Johnson instances an extraordinary example of their powers in ascending surfaces which are vertical, or even overhanging. He had occasion to divert the waters of a small mountain stream, so that it would be practicable to get to a deep pot-hole, from which the water, rock and gravel were afterward removed. The pot-hole was twenty-two feet deep, nearly circular, and varied in diameter from six to ten feet. The sides were generally vertical and in some parts inclined inward. When the water had been lowered to within four feet of the bottom, it was seen that the hole contained a large number of these catfish. They were greatly excited and were swimming and creeping in all directions. A small stream of water in a thin film ran down one side of the pot-hole from a leak in the dam above. This small inflowing stream was at last discovered by some of the fish, which began to creep up the side of the hole in the water, but were frightened by the movements of the workmen and dropped back. At noon, when the work was stopped, four of the smaller fish started up the wall, following the thin stream of water which ran over their noses, down their backs and trickled off their tails. They hitched themselves rapidly up for a foot or two; then remained quiet for a short time, and proceeded for another foot, and took another rest. In half an hour the four had reached the water in the pool at the foot of the dam above. In making the ascent, they passed over a part of the wall about two feet in length that inclined inward at an angle of about 30 degrees from the vertical. This slope seemed to make no difference in their movements or speed, but they passed over it rapidly and safely. During the afternoon several more of the fish climbed out, but in the evening, when work stopped, there were a large number still at the bottom of the hole. The next morning not one remained.

For the most part the path followed by these

CATFISH CLIMBING OUT OF A POOL.

fish in climbing up this rocky wall lay over smooth, water-worn surfaces, free from any coating of vegetable matter, but on the upper part there was a thin film of vegetation that may have been of use in catching the sharp-pointed teeth on the movable ventral fins. The vertical distance climbed by the fish measured eighteen feet.

These catfish deposit their eggs in the deepest pot-holes and attach them one by one to the under sides of large stones.

### Trout in North Carolina.

LINVILLE FALLS, N. C., March 22.—*Editor Forest and Stream:* The trout season on Linville River will open May 1. The past season has been exceptionally favorable for the trout, as the winter has been open, with no ice or floods to injure the fish. Much damage has been done in some winters by the formation of ice that goes out with tremendous force down the narrow, rocky gorge. Floods also do much harm to the fish, carrying quantities of debris and sand down the river. The past year has been free from anything of this kind. The river has been well stocked every year for five years and may be expected to give better sport this year than usual.

The Crest of the Blue Ridge Highway, now building from Altapass on the C., C. & O. railway, twelve miles to this place, is well on its way to completion, and will be finished some time this summer, the engineers say. It is an automobile road with a maximum grade of 4½ per cent., crossing the Blue Ridge and going along its crest in various places. Here it follows for several miles the summit of Humpback Mountain, altitude 4,300 feet, from which

magnificent views may be obtained, overlooking all this high mountainous region, including the highest peaks east of the Rocky Mountains. From here the road follows up Linville River and along the slopes of Grandfather Mountain to Blowing Rock, another popular resort, altitude 4,000 feet, thirty-three miles from here. The road is a hard sand and clay surface, eighteen feet wide at present, to be widened shortly to twenty-four feet.

F. W. BICKNELL.

### The Travel and Vacation Show.

Two hundred thousand persons took the opportunity offered at Grand Central Palace last week to see America first. In the immense hall was gathered a remarkable collection of exhibits giving in replica the wonders of the American continent, its splendid railroad facilities, hotel accommodations and vast scenic beauty. Thousands of dollars were spent in making the miniature scenes reflect the grandeur of the originals. Among the exhibits worthy of note were:

**ADAMS EXPRESS COMPANY.**—Evolution of the company's delivery methods from a handbag to a four and a half ton automobile truck, from the time of Alvin Adams in 1840 to the present methods of transmission of money and valuables.

**AMERICAN EXPRESS COMPANY.**—Exhibiting photographs and interesting pictures of foreign offices and other interesting subjects. Original wheelbarrow and safe which were used in the early service of the company for transferring valuables. Display of moneys of foreign countries.

**BERMUDA TOURIST BUREAU.**—Scene of the harbor of Bermuda, showing the steamship Bermudian in the foreground. Corals, plants, photographs and scenes in Bermuda of interest to tourists.

**CAMP WOPOWOG.**—Information pertaining to Camp Wopowog, the vacation camp for young men and women on the Salmon River, Connecticut.

**DEALWARE & HUDSON COMPANY.**—A panorama of Northern New York, known as the "Summer Paradise," covering the Adirondacks, Lake George, Lake Champlain and including the company's modern fireproof hotels on Lake George, Lake Champlain, Fort William Henry and Hotel Champlain.

**FOREST AND STREAM AND SPORTSMEN'S PARADISE.**—Typical of the modern sportsmen's resort. Through the aid of the *FOREST AND STREAM* magazine, this scene was created and properly was termed the spirit of the exhibition. It comprised some 2,500 feet of floor space, thickly wooded, with a pool in its shades. A model camp was fitted up by Schoverling, Daly & Gales, rare and beautiful game birds and waterfowl were roaming about by courtesy of G. D. Tilley, of Darien, Conn., while two highly attractive Russian bears lent reality, thanks to the Remington Arms-U. M. C. Co.

**GRAND TRUNK RAILWAY.**—Reproducing a portion of the city of Ottawa, the capital of the Dominion of Canada, showing Chateau Laurier, the \$2,000,000 Grand Trunk Hotel and the Grand Trunk terminals; also a view of the Dominion Parliament buildings, the Rideau Canal, the Gatineau and Ottawa Valleys, and the Laurentian Hills in the distance.

**GRAND TRUNK PACIFIC RAILWAY.**—A replica

of Mount Robson, altitude 13,700 feet, the highest mountain in the Canadian Rockies. Mount Robson lies north of the Valley of Fraser, to the west of Yellowhead Pass, through which the Grand Trunk Pacific will pass in plain view of this magnificent mountain.

**GREAT NORTHERN RAILWAY GLACIER PARK EXHIBIT.**—This exhibit comprises Indians and eight scenic booths showing scenes from eight of the Chalet camps in Glacier National Park. These Chalets have just recently been built by the Great Northern Railway and are located at eight of the most scenic portions of the famous playground:

Two Medicine Lake Camp, Cutbank Cañon Camp, St. Mary Lake Camp, Many Glacier Camp, Going-to-the-Sun Camp, Gunsight Lake Camp, Sperry Glacier Camp, Granite Park Camp, the Blackfeet Indians.

**HUDSON DAY LINE.**—Exhibiting a model of the steamship Hendrick Hudson, also a model of Fulton's Clermont, which has been planned on the same scale to show the progress of steamboat construction. Scenes of the Upper Hudson River painted by Raphael A. Weed, to be used on the new steamboat, Washington Irving, which will be put into commission this season.

**MUNICIPAL TERMINAL MARKET MODEL.**—The model of the Municipal Terminal Market, a suggested plan for the New York City Terminal Market, exhibited through the courtesy of Mrs. Elmer E. Black, member of the mayor's Market House Commission, who is responsible for the creation of the model.

**NEW BRUNSWICK TOURIST AND INFORMATION BUREAU.**—General information of the Province of New Brunswick as a tourist, hunting and fishing, camping and canoeing resort.

**NEW ENGLAND HOTEL ASSOCIATION.**—A typical view of the section of country in New England with splendid automobile driveways and wayside inns, such as may be found throughout that section of the country.

**NEW HAMPSHIRE HOTEL ASSOCIATION.**—Exhibiting a typical view of New Hampshire, showing Asquam Lake, together with pictures of Winnepesaukee Lake, Lake Sunapee, Portsmouth Harbor, Franconia Notch and Pemigewasset River, and scenes in the White Mountain Range.

**NEW YORK CENTRAL RAILROAD.**—The Adirondack Mountains, showing Lake Placid and depicting the beautiful combination of lake and mountain scenery to be found throughout the woods. The Catskill Mountains. A representative view of the delightful mountain district that is so close to New York and is reached in from two to five hours. The Hudson River. A view showing the Palisades with the Highlands in the distance, and familiar to all travelers up and down this beautiful river. The Thousand Islands. The view shows a group of islands lying in this beautiful region between Clayton and Alexandria Bay. The Thousand Islands is unsurpassed in the world as a river resort.

**NEW YORK, NEW HAVEN & HARTFORD RAILROAD.**—View of the celebrated White Mountains, typical of scenes found in New England, the vacation land. Mount Kineo House, with Mount Kineo in the distance.

**NIAGARA FALLS.**—Showing an accurate reproduction in panoramic effect of one of the world's greatest wonders—Niagara Falls with its awe-inspiring splendor. The city of Niagara Falls is shown in the distance, the point of view being

taken from the Canadian side near the famous Clifton Hotel.

**CITY OF OTTAWA.**—Exhibiting immense photographs in black and white. These photographs, the largest ever made, show the various features of Ottawa, such as the Parliament buildings, Parliament Hill, sections of driveway, summer resorts, recreation grounds and general views of the city of interest to tourists.

**PANAMA CANAL EMBLEM.**—This beautiful emblem was conceived by James J. Hannerty, celebrated for the "Hannerty Idea." It is an allegorical picture of Columbia sharing her fruits with the world, and as a result of the Panama Canal, proclaiming: "There is no East, there is no West."

**RICHELIEU & ONTARIO NAVIGATION COMPANY.**—View on the St. Lawrence River as seen from the boats of this company.

**UNITED STATES GOVERNMENT GOOD ROADS EXHIBIT.**—Exhibition of models of road-making machinery, sections of roads, illustrations of methods of modern road-making, sections of highways, etc.

**WELLS FARGO & COMPANY EXPRESS.**—Exhibiting an old stage coach employed for many years on the old Pescadero route in California, including historical exhibit, together with illustration of modern methods of conducting the express business.

**WESTCHESTER COUNTY CHAMBER OF COMMERCE.**—Scenes in Westchester county, together with a large relief map showing the contour of the county, and a collection of photographs representing various sections of the county.

The show was splendidly handled by the International Exposition Company under personal direction of E. V. P. Ritter, organizing director, and Robert H. Sexton, organizing manager.

### Illinois Casting Club.

CHICAGO, Ill., March 27.—*Editor Forest and Stream:* The executive committee announces the following changes in the casting rules of our club:

A member missing a contest may re-enter in the same on either of the next two contests for that event, but not thereafter.

In the case of any event being postponed from Saturday, the same may be cast the following day, or any Saturday on which the same event is scheduled.

In the occurrence of a back-lash, the demerit will be limited to twenty feet.

The extra awards are to be the same as last year, but in addition there will be a special trophy given at the close of the season, consisting of a superior split bamboo casting rod, valued at \$25.

This latter trophy will be awarded to the member of any class, attaining the highest score the greatest number of times in his class during the season's work.

In the event of a tie the award will be made to the one who, in the cast-off, exceeds his own class by the greatest number of points.

There will not be a spring tournament this season, our club deferring in favor of the Chicago Fly-Casting Club.

That our next dinner, which precedes the opening of our season, may be nearer the first casting event, it will be given in the latter part of April, and an announcement of it will be sent you later.

J. D. ANWAY, Secretary.

Published Weekly by the

FOREST AND STREAM PUBLISHING COMPANY,  
CHARLES OTIS, President.

W. G. BEECROFT, Secretary. W. J. GALLAGHER, Treasurer.  
127 Franklin Street, New York.

**CORRESPONDENCE**—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

**SUBSCRIPTIONS**: \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year.

This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

**ADVERTISEMENTS**: Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

Entered as second-class matter at the Post-Office, New York, N. Y.

### THE OBJECT OF THIS JOURNAL

will be to studiously promote a healthful interest in outdoor recreation, and to cultivate a refined taste for natural objects.

—FOREST AND STREAM, Aug. 14, 1873.

### THE FLOODS OF 1913.

The reports of the appalling destruction of life and property which have recently come from the States of the Middle West, have shocked the whole world. They recount a series of calamities almost like a war. Other floods have occurred in this country, and caused great loss, but never before on this continent has there been a series of disasters that affected such thickly settled regions.

There is much speculation as to what caused the floods, and many suggestions are offered which it is hoped may provide against similar misfortunes in the future. We believe that for the present the causes of these storms must remain unknown. Floods caused by the melting of heavy snows over vast areas, such as in past times have frequently overwhelmed the territory bordering the lower Mississippi, may be explained in part by the deforestation of great areas of country, but it does not appear that the floods of March, 1913, can be attributed to such a cause, though it may well be that the absence of forest and of forest floor over great areas of country increased the destructive power of the water.

It is difficult to conceive the amount of material damage that has been done. Houses were destroyed, farms ruined, towns with all their active manufactures, great buildings and busy commerce, halted in their career of success and progress. Transportation lines were interrupted in a hundred places, and all business was caused to cease.

The situation presents a striking example of the absolute dependence on transportation lines of great aggregations of humanity. Only by these transportation lines are the cities provided

with their daily sustenance brought from the country. Cities do not produce food. A fortnight's interruption of the operation of transportation lines might mean that a large proportion of the population of Chicago would die of hunger.

As always happens in the case of a great calamity, the American people—the most generous in the world—spring forward to help their unhappy fellows, contributing time, money and personal effort to the work of relieving suffering. The spectacle is one that we have all seen many times, and that—sad to say—we shall probably often see again. Melancholy as are the causes which call forth these exhibitions of sacrifice for others, they have their helpful side, for they strengthen our belief in the humanity and goodness of our neighbors.

### BIRD PROTECTIVE REGULATIONS.

On Wednesday, March 26, at the rooms of the American Game Protective and Propagation Society, in New York city, an informal meeting was held by a number of persons interested in the protection of birds, and with special reference to the new law for the Federal protection of migratory birds.

Dr. T. S. Palmer, representing the Biological Survey, had sent out an informal invitation to persons interested in the new law, in order that it might be discussed and the Biological Survey might have the benefit of some of the ideas of gunners and game protectors before seriously attacking the work of formulating the regulations called for by the new law. It is obvious that the law is general in its terms. It gives the Agricultural Department the right to establish close seasons, but apparently does not go much further than this. Nothing is said about bag limits; nothing is said about methods of capture. These things are apparently left to the States to regulate.

In his opening remarks Dr. Palmer indicated some of the difficulties to be faced in establishing these regulations, and made his points very clear, by showing colored maps already prepared by the Biological Survey, which showed graphically the distribution in summer and winter of some species, the places where certain species breed, and many other matters of very great interest. Most of those present expressed their views on different phases of the subject. On one or two occasions the talk got switched off from the main question to reasons as to why Long Island ought to have spring shooting; but it was presently brought back again to the points at issue.

There were present, as was to be expected, two parties holding radically opposite views. One of these parties wished to establish regulations which would be drastic and severe from the start; the other party rather believed in beginning mildly and accustoming the public to the operation of the new law before any very radical action is taken.

The speeches made, of course, represented nothing more than individual opinions, but it is obvious that the Biological Survey is anxious to formulate regulations in this matter which will stand the test of criticism by all hands.

The general subject of the law is one which we believe may profitably be discussed by all sportsmen.

### COVER ILLUSTRATION.

The illustration on the cover this week pictures the Blackfoot Indians sitting around the camp-fire in Sportsmen's Paradise, the FOREST AND STREAM exhibit at the Travel and Vacation Show. In the background are the bears, so popular with the red men during their stay at Grand Central Palace.

### JOHN H. WALLACE, JR.

It is a fitting tribute to the conscientious efforts of Col. John H. Wallace, Jr., Fish and Game Commissioner of Alabama, that he should be urged to accept a nomination for Governor of his State. Should Col. Wallace be elected, as seems assured if he accepts the nomination, what a blessing he will be to bird life and the sportsman. All success to the Colonel.

### LONG ISLAND TROUT SEASON.

TROUT on Long Island opened April 1. The season in other parts of New York State opens May 1. Previous to last year trout could be taken into New York city from Long Island during the open season there; now, however, trout may not be taken from Long Island or elsewhere into Manhattan previous to May 1. It may be worth local trout fishermen's while to remember this.

### N. C. R. GUN CLUB.

By wire the good news arrives that though badly mused up by flood, the National Cash Register Gun Club will hold the Grand American Handicap as planned. This decision, however, comes as no great surprise, for when one reads of the glorious heroism of James H. Patterson, President of the National Cash Register Company, by whom the gun club is made possible, one would wonder were any other decision reached. It seems perfectly natural that the spirit of never say die would be found among those fortunate enough to be employed by James H. Patterson.

### PLANTS OF ST. VINCENT, FLA.

For a long time W. L. McAtee has been engaged in the study of the food of our wildfowl. In the course of that study he visited St. Vincent Island, well known as the game preserve of Dr. R. V. Pierce, who is greatly interested in improving the supply of natural food for ducks. During two short visits, of about one week each, Mr. McAtee collected about 239 species of indigenous plants and ten introduced species. Of these one is the wild rice of the North, with which Dr. Pierce has had little success until his last planting, which, however, did well, and the seed was reported as ripening in October, 1911.

Mr. McAtee's investigations on the duck food question, when brought together and published by the Biological Survey, will be of enormous value to sportsmen, but more particularly of enormous value to that constantly increasing number of persons who are interested in the protection and increase of our wildfowl under semi-domestication.

# ARCHERY

Forest and Stream is the official organ of the National Archery Association.

## Figures, Signs and Equations.

BY E. J. RENDTORFF.

CONFESSION is good for the soul. Allow me, therefore, to admit that until the other day I was unable to spell correctly the word "toxophilite." As my Webster's dictionary does not give the word, I hope this fault will be forgiven, and that on judgment day the error will not weigh too heavily against me. I always was a poor speller.

Allow me in this contribution to apologize to the archery world for having inflicted on it a series of parodies "fit for comic opera."

My effusions have been too numerous for modesty. When I get started, in my enthusiasm for archery, I seldom know when to stop. My articles are an example of this. The case reminds me of farmer Jones' white pig named Ink.

Smith: "Why do you call him 'Ink'?"

Jones: "Because he always runs from the pen."

It would almost seem that I am trying to throw a brick at Brother Hertig, whom I frequently quote in this article. This is not the case. I simply consider his point of view inimical to the highest development of the sport, and wish to point out to him, and the archery world in general, the errors of a mistaken attitude toward the use of simple mathematical and graphic analyses of archery phenomena.

Dr. Hertig takes exception to the equation,

$$\text{velocity} = \frac{\text{force} \times \text{time}}{\text{mass}} = \frac{\text{feet}}{\text{inches}}$$

He writes: "Get a yew bow and you will see, your equation to the contrary notwithstanding, why a bow that gets rid of its arrow most quickly is the bow that shoots furthest and strongest. The longer the time the string acts on the arrow during the twenty-two inches it travels in getting rid of its arrow, the slower will be the velocity of that arrow. As I understand your equation, time entered as an advantageous element in the case of the heavy arrow vs. the light one."

To a certain extent Dr. Hertig is correct. The bow that gets rid of its arrow most rapidly is of course the one that imparts the greatest

$$\text{velocity to the arrow, as velocity} = \frac{\text{distance}}{\text{time}};$$

but in spite of that, time enters as an advantageous element in the case of heavy arrow vs. light one. This may seem like another paradox, which after all are rather common in this world. Thus, the other day I saw two negroes waiting for a car. The younger was the son of the older one, but the older was not the father of the younger. It seemed strange, but nevertheless it was true. It all depends upon our point of view.

Let us again consider the equation; velocity (of arrow)=

$$\frac{\text{force (of bow)} \times \text{time (during which the force acts)}}{\text{mass (of arrow).}}$$

Let us assume that a certain string acts on an arrow for 1/100 second, and through a distance of but 10 inches; while another string, offering the same force, acts on another arrow of the same weight for 1/50 second through a distance of 20 inches. The latter arrow was the force of the string acting for twice the length of time as in the first case, and gives a greater velocity.

It is an analogous case to a locomotive starting a train. After the locomotive has pulled for 10 seconds, a certain velocity is attained; but in 20 seconds the velocity will be twice as large, provided the force of the pull remains constant.

Let us follow the analogy a little further. After the train has reached its greatest velocity, the cars follow the locomotive almost as fast as it can move. The force the locomotive exerts on the train is then greatly diminished. Similarly, if a man pushes against a sled for one second, it will move with a certain velocity, which becomes approximately twice as great in two seconds. After a while, however, the sled moves almost as fast as the man can run, and he therefore pushes against it with little force and gives it no extra velocity. Exactly the same thing happens to an arrow. The string moves forward with a certain velocity depending upon the length, strength and elasticity of the bow. When the arrow is very light it soon gains a velocity almost equal to that which the string has when the bow is shot without an arrow. The force exerted against the arrow is thus quite small for approximately the last half of the distance it traverses before leaving the string. The arrow will then have but little energy stored up in it. It will have a high velocity due to its lack of weight, but the friction of the air will soon absorb its kinetic (motion) energy, and it will "peter out" before traveling very far.

The case of the heavy arrow is as follows: On account of its greater weight and consequent inertia, or opposition to get into motion, the bow will give the arrow a slower velocity than the light arrow. The force of the bow, exerted through the agency of the string, will therefore be greater against the arrow during the time the arrow and string remain in contact. Furthermore, the time of contact is greater than for the light arrow, so that the heavy arrow absorbs more energy, and is better able to overcome the friction of the air, or the resistance of any extraneous effects, such as those produced by variable winds, buckling of the shaft, etc.

In our equation the product of force  $\times$  time is greater for the heavy than for the light arrow. What does this mean? Why, that the heavy arrow will have a relatively greater velocity than the light one. Relative to what? Relative to

its increase in weight. In plain English it would mean that if an arrow weighing 220 grains be given a velocity of 200 feet per second by a certain bow, an arrow of twice the weight, or

$$440 \text{ grains, would not have a velocity of } \frac{200}{2} \text{ or}$$

100 feet per second, but in the neighborhood of 150 feet instead. As the quantity of motion, or momentum, a body possesses = mass  $\times$  by velocity, it is at once apparent that the heavy arrow will have more energy than the light one, overcome the resistance of the air easier, have a more uniform flight, hit the target harder, rebound less readily, etc. Although its initial velocity is less than that of the light arrow, it may make a better flight shot than an exceptionally light one, on account of its greater stored up energy and consequent ability to overcome the friction of the air. Note, for example, the remarks of Randolph Laughlin in his recent article on "Archery—Golf" (printed in FOREST AND STREAM, Feb. 1) pertaining to the flight of light Turkish arrows.

Let us next consider the case of the yew bow, which Dr. Hertig believes in some way contradicts our formula. He claims that a 48-pound yew will shoot with as great a velocity as a 56-pound lemonwood. Perhaps it will. As I have never shot a yew bow I know nothing concerning its merits, save what I have been told by other archers. Let us admit, for the sake of the argument, that a 48-pound yew will shoot as strong as a 56-pound lemonwood. If it does, why does it do so?

I believe it will be clear by this time that the force acting on a moving arrow, while in contact with the string, is not the full force of the bow, and that the force which is operative depends upon the speed with which the string moves forward compared with that of the arrow. Yew is apparently a very elastic wood, so that the bow has a very sharp cast, i. e., occupies but little time in moving from full draw to its position of rest. In that case the force acting against the arrow, after its immediate release, would be larger for the yew than for the lemonwood, by, say, 20 per cent. The arrow would be in contact with the string for, say, 10 per cent. less time. This would make the product of force  $\times$  time 10 per cent. greater for the yew bow, and give the arrow that much extra velocity.

The reason why I used the formula will become apparent after reading the following explanation. I was firmly convinced that archers are wrong in using light arrows, and introduced the equation to show that heavy arrows have a certain compensating advantage. Light arrows have, of course, a higher initial velocity and a lower trajectory up to a certain limit of distance. This high velocity is desirable and can be secured only by the use of a light arrow, or by a strong bow when used with a heavy arrow.

A heavy arrow is, as a rule, also a stiff one, on account of its greater diameter. It would buckle, wobble and flirt less than a light one. Does this alone counterbalance the high initial velocity? Hardly. Would the advice of a man practically unknown to the archery world be sufficient if he were to advocate the use of arrows of a weight above that customarily used, or would it be up to him to give good and sufficient reasons for the faith that is in him? It was certainly up to me to prove the case, and for that reason I employed the equation that applies to all kinds of motion where a sudden force, or impact, acts on a body and produces a resulting motion.

The equation given happens to be the second of Newton's three fundamental laws of nature, and have been used by the scientific world during the last few centuries. No exceptions to it have ever been known. It is, therefore, reasonably certain that the equation is correct. The conclusions derived could not be deduced except through reference to and analysis of the

$$\text{equation } v = \frac{\text{ft.}}{\text{in.}}$$

That is why it was used. The mere statement of fact, without a clue to the process of reasoning employed would have been quite useless. We must be shown in order to be convinced against our will, especially when we buck up against tradition and the custom of ages.

Now that I have explained a few of the little matters where Dr. Hertig believed he disagreed with me, let us return to the question of our negroes. That, too, was simple. The older one was the mother of the younger.

Dr. Hertig says: "When it comes to reducing the beautiful total which comprises good archery to figures, I question the soundness of the analysis entering into the proposition."

In answer to this statement I am only ready to admit that it has not been customary, and that it is somewhat difficult or undesirable. The general principles of archery are in no way radically different from those that enter in rifle shooting, though more complicated and difficult to deduce. It would be impossible to analyze what the archer frequently does, but it is a different proposition to determine what he should do. A man can become a good archer without understanding the fundamental principles that enter in the various phases of his sport. He will merely be a well-trained automaton who would imitate spontaneously the motions to which he had become accustomed. For the highest development of the game and the greatest efficiency of which man is capable, a good knowledge of the underlying principles is necessary, so that he can tell at once, or reason out, the cause of his failure in the various phases of his shortcomings. Other things being equal, the man who understands the theory of his game is the one who wins in the long run.

Mathematics can always be used to great advantage in anything that follows the regular laws of nature, or is in any sense of the word methodical. It is not a hindrance except to the uninitiated, but gives the greatest imaginable aid to those in the habit of close and straight thinking; in fact, mathematics, in its highest sense, is merely a shorthand method of reasoning, with

the rules of the game so arranged that the flying off a tangent, or the use of the unconstrained and rabid imagination, is avoided.

It is not harsh and crabbed, as some would believe, but soft and musical as is Apollo's lute. Though the hypothesis arrived at may sometimes be partially incorrect, nevertheless true progress only begins when facts are sought in at least the suggestion of a principle; for science consists not in a mere accumulation of facts, but in a generalization of knowledge, so as to exemplify known principles. The poet and the mathematical-physicist are thus nearly akin, as both employ the faculty of the imagination in its highest sense—that which the psychologists call the constructive imagination, as opposed to mere fancy. The philosopher's faculty is quite as powerful and important an agent in the development of archery as the mere gift of acquiring new knowledge by observation and experiment. Practically every discovery of physics and engineering was preceded by a mathematical analysis of the underlying theory. This is a matter of history and not mere supposition. No true progress will ever be made in archery, or in any physical science for that matter, unless mathematical and graphic analysis theoretically applied, though based on the known laws of nature, work hand in hand with practice, or else precede it. Without these our statements of archery technique are merely an expression of personal belief, too frequently based on misconceptions and prejudice. They lead nowhere, except to chaos. What we need in order to advance our sport is a careful study of the principles of the various phases of the game.

I have attempted something of that nature. My inexperience as an archer may have led me astray in some minor details, but I maintain that the general method of procedure is correct, rather than our more fashionable, though popular, method of hit, miss and come again. But for goodness sake avoid modern scientific methods, even if in every other case they have proved the only correct method of procedure.

There is a member of the Chicago Archery Club who has the habit of striking his arm guard with annoying frequency. His club mates cannot understand why, and claim that he should be one of the world's leading archers, as "his left arm is held firm as a rock, and cannot be seen to move one particle when the arrow is shot." He has shot for years with the same fault, and the "human factor," which causes his defect and which Dr. Hertig says "is subject to a non-mathematical process and not one of figures and signs," has never been discovered either by himself or others. Let us examine this as a specific case to illustrate that the method of "figures, signs and equations" may after all be of some little value.

The study of the two (correct) force diagrams, in my article on "The Toxophilites Paradox" (FOREST AND STREAM, Feb. 8, 1913), showed that there were five different and distinct elements, or effects, that enter in order to shoot an arrow without lateral divergence to the left. These followed strictly from the study of the diagrams and were not based on mere personal belief. What did the analysis show? First, that the explanation of Ford, Butt, Walrond and others, which had been accepted as satisfactory by all of us up to the present day, were not sufficient to account for the phenomenon. For-

tunately, I was able to refer to Dr. Elmer's machine as a laboratory proof of this insufficiency. Second, the existence of a force (A, Fig. II.) at the nock of the arrow which moved the string to the left and tended to rotate the plane of the bow in the same direction. Third, the more than probable existence of a compensatory motion of the archer's arm to the left, which motion is somewhat delayed at the instant of release, but comes into play and increases after the center of gravity of the arrow passes the point of contact with the bow. Fourth, the explanation why all the arrows of a set should have a uniform configuration of their center of gravity and also be of equal stiffness in the shaft.

Now, if the left arm is held "steady as a rock," as we have always been told that it must, the third of the above effects, which is one of the two compensating factors where the "human equation" enters, will be eliminated. The arrow through its tendency, caused by inertia, of moving forward without angular divergence will thus throw the burden of rectification on the second of the above mentioned effects, i. e., cause the plane of the bow and string to rotate to the left with a greatly increased and totally unnecessary force, thus striking the string against the arm guard and keeping a man who should be an expert archer from attaining the proficiency and success that his latent abilities merit.

The argument in favor of the heavy arrow, the explanation of Dr. Elmer's machine, the solution of the arrow not diverging to the left, the need of a uniform rigidity, the probability that the left arm should not be held "firm as a rock," the prediction of the apparent cause of the Chicago archer (whom I have not even met) striking his arm guard, and a few other minor conclusions follow directly as a consequence of

$$\text{an equation } v = \frac{\text{feet}}{\text{inches}}, \text{ and from two force}$$

diagrams. These conclusions have not been controverted. If such results follow as a logical analysis of equations and diagrams, it would almost seem that the "reducing of the beautiful total which comprises good archery to figures" is not such a bad method after all. The proof of the pudding is in its eating.

The trouble with archery is that it is suffering either from too much apathy, neglect and fetish worship of things that are accepted merely because the halo of ages surrounds them with too much reverence; or else too much hot air, with little serious thinking, and not sufficient consideration of the methods of modern thought. We idealize our sport, but do not put it on a scientific basis. The development of the essential ideas, the underlying principles, and the consequent application is a job for a full-sized man. They are difficult to present, hard to understand, but infinitely more perplexing to develop. When they are assimilated by the chosen few, and transmitted in expurgated form to the remaining devotees of the sport, our game will have a chance; it is handicapped enough by existing conditions.

A great work can be done along these lines, but it is a thankless job.

Let us give the men who make an honest effort our sympathy and consideration.

*Finis coronat opus.*

**Whitman of Melrose.**

CHICAGO, Ill., March 29.—*Editor Forest and Stream:* I received the following letter nearly ten years ago. I had then been out of archery for nineteen years and did not know that my college classmate was, or ever had been, interested in the sport. When I learned of the fact I wrote him, and in reply to my queries he wrote as follows:

EDWARD B. WESTON.

MELROSE, Mass., Nov. 8, 1903.

Dear Friend:

Yes, I have been interested in archery for many years; indeed, before you and the dear boys of our class knew me. There has not been a time since I was fifteen years old, that I could not have found a bow and arrows in my belongings. You need not suppose from this that I am, or have been, an expert archer. In fact, I can now score more at a target than at any time in the past; and now I am only a fair archer, and am only able not to disgrace myself among average archers. I went to the Maryland meeting last year, and found such delightful men that it has given archery an additional charm.

Now, I have a fine rifle, and you know what a fine rifle will do. I also have a dog and gun. I use them fairly well. A good shot over my dog, that brings down a grouse at fifty yards, is a pleasure that only a sportsman knows. But the flight of an arrow from a fifty-pound bow, that goes to its mark, 100 yards away, is a pleasure the average sportsman does not know. There is nothing else to compare with it.

Ever yours,

A. G. WHITMAN.

**Pittsburgh Archers.**

PITTSBURGH, Pa., March 31.—*Editor Forest and Stream:* At the shoot held Saturday afternoon, March 29, on the Bon Air range, the following scores were made:

American round, 90 arrows:				
	60yds.	50yds.	40yds.	Total.
Jiles .....	25 121	28 120	30 198	83 439
Holmes .....	25 127	28 156	28 196	81 479
Fleming .....	12 60	15 75	23 121	50 256
Haines .....	14 72	16 80	24 110	52 262
Hertig .....	29 159	30 176	30 194	89 529
Hertig .....	27 151	30 170	30 198	87 519

On the Saturday previous Dr. Hertig made a perfect hit score in the American round of 90-522; also a team round of 94-482, and in the same afternoon he shot a Keystone match round of 144 arrows at 60 yards, scoring 140-700; good shooting, but too much to be crowded into one afternoon.

All prospects point to a fine year for the long bow.

JAMES S. JILES.

**The Newton Archers.**

BOSTON, Mass., March 25.—*Editor Forest and Stream:* On March 19 the archers of Newton, Mass., met and organized a new club to be known as "The Newton Archers." The club starts off with a charter membership of fifteen, and as there are quite a number of persons living in Newton, Mass., who are interested in archery, it is expected that the membership will increase considerably. The officers of the club are as follows: President, S. W. Wilder; Vice-President, C. T. Switzler; Secretary and Treasurer, L. C. Smith; Target Committee, Mrs. B. P. Gray, C. T. Switzler, Joseph Bishop.

This new club is favored in having the use of the excellent archery range on the Newton Center Playground, and it is planned to hold club shoots every Saturday afternoon as soon as the weather permits.

This club is the result of the interest in archery which has been aroused by the example and influence of Burton P. Gray, president of the National Archery Association, who lives in Newton Center, Massachusetts.

LOUIS C. SMITH.

NEWTON CENTER, Mass., March 31.—*Editor Forest and Stream:* The pleasant weather Saturday afternoon, March 29, lured on to the archery range at the Newton Center Playground some of the more enthusiastic members of "the Newton Archers," an archery club recently formed at Newton Center, Mass. The afternoon was bright but rather crisp. The following scores were made:

American round:				
	60yds.	50yds.	40yds.	Total.
C. T. Switzler.....	22 118	29 147	29 169	80 434
	26 124	27 143	29 157	82 424
				162 858
S. W. Wilder.....	18 82	26 132	28 142	72 356
	22 84	25 116	29 173	76 373
				148 729
L. C. Smith.....	16 60	29 161	28 170	73 391
	19 89	26 120	28 146	73 355
				146 746

LOUIS C. SMITH,  
Secretary The Newton Archers.

**A New Convert.**

THE writer had the pleasure of shooting a York round on March 8 and a second York round on March 22 over a beautiful range at Steilacoom, Washington, with Dr. J. W. Doughty, a new convert to archery. The doctor first strung a bow late last season, and has made as rapid an advance in archery as any person I have ever known.

His scores, though very fine, do not show him at his best, for only a few days before he scored with 72 arrows at 100 yards, 50-200, and again 47-197.

His style is nearly perfection, and it requires no gift of prophecy to foretell his greater success.

First York:				
J. W. Doughty.....	33 145	32 152	21 99	86 396
Will H. Thompson.....	39 169	38 166	24 126	101 461

Second York:				
J. W. Doughty.....	35 167	34 148	22 90	91 405
Will H. Thompson.....	47 197	36 130	23 127	106 454

After finishing the last York, we shot a score at 100 yards, and the writer was ingloriously beaten by the doctor, who scored 161 to my 154.

Who has a more apt pupil?

The shooting was better than the score indicates, as the cold March wind, pouring across the range, numbed fingers, and whisked arrows, and thus protected the target from greater mutilation.

WILL H. THOMPSON.

**Sir Thomas' Challenge.**

THE refusal of the challenge committee of the New York Y. C. to reconsider its action in declining to accept Sir Thomas Lipton's challenge for a series of races for the America cup was upheld by a unanimous vote at a special meeting of the club.

Fewer than fifty members attended, as it was taken for granted by a majority that the challenge committee took the only proper action under the circumstances.

All that appears to remain for Sir Thomas to do now, if he wants a race, is to issue an unrestricted challenge. The fault the New York Y. C. found with his most recent defi was that he, as challenger, appeared to go beyond the wording of the deed of gift by demanding that the defending craft be not more than 75 feet in length on the waterline.

**Boats Change Hands.**

THE Hollis Burgess yacht agency has sold the 60-foot motorboat Karl, owned by the estate of Charles Dennison, of Boston, to Miles L. Carter, of Attleboro, Mass. Karl is a very handsome cruising motorboat built last year for the late T. W. King, of Boston, and is equipped with a 40 horsepower motor. Also the 44-foot motor boat Princess, owned by Henry W. Harris, of Chestnut Hill, Mass., to Samuel M. Holman, of Attleboro, Mass.; the 38-foot motorboat La Reine, owned by Herbert M. Plimpton, of Norwood, Mass., to Commodore Charles A. Blazo,

of the Winthrop Y. C., and the 30-foot motorboat Bob, owned by Arthur T. Stohlbohm, of Boston, to Edwin A. Sayward, of Brookline, Mass.

**A. C. A. Membership.**

NEW MEMBERS PROPOSED.

Atlantic Division.—Frank E. Esibill, 79 Bank street, Bridgeton, N. J., by Robert E. Fithian.

Western Division.—John Stewart Elliott, Beatrice, Neb., by F. B. Huntington; Mark L. Powers, P. O. Box 1078, Beatrice, Neb., by F. B. Huntington.

NEW MEMBERS ELECTED.

Atlantic Division.—6632, Stanley J. Cypher, 13 Eastern avenue, Ossining, N. Y.

Western Division.—6633, Arthur Santmier, Hecla, Manitoba, Can.; 6634, Arthur L. Gourley, Highland Park, Ill.

There dwells a wife by the Northern Gate,  
And a wealthy wife is she;  
She breeds a breed o' rovin' men  
And casts them over sea.

And some are drowned in deep water,  
And some in sight o' shore,  
And word goes back to the weary wife,  
And ever she sends more.

—Kipling. 1

# TRAP SHOOTING

Forest and Stream is an Honorary Member of the Interstate Association for the Promotion of Trapshooting.

## Fixtures.

If you want your shoot to be announced here, send a notice like the following:

### REGISTERED TOURNAMENTS.

- April 8-10.—San Antonio, Tex.—The Interstate Association's Southwestern Handicap, under auspices of the San Antonio Gun Club; \$1,000 added money. Winner of first place in the Southwestern Handicap guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. E. E. Shaner, Mgr., Pittsburgh, Pa.
- April 9-10.—Lincoln, Neb.—Capitol Beach G. C. T. C. Brownfield, Pres.
- April 10.—Atglen (Pa.) G. C. Lloyd R. Lewis, Mgr.
- April 14-16.—New Orleans, La.—City Park G. C. J. M. Lionnet, Mgr.
- April 16.—Mt. Holly (N. J.) G. C. A. J. Dellette, Sec'y.
- April 17.—Syracuse, N. Y.—Messina Springs G. C. W. E. Hookway, Sec'y.
- April 17-19.—Hot Springs, Ark.—Arkansas State tournament, under auspices of Hot Springs G. C. H. A. Whittington, Sec'y.
- April 19.—Lawrence (Mass.) Fish and Game Protective Association. A. C. Gray, Sec'y.
- April 23.—Grundy Center (Ia.) G. C. Frank W. Callaway, Sec'y.
- April 23-24.—Wellington, Mass.—Paleface Shooting Association. Walter F. Clarke, Pres.
- April 23-24.—Brantley (Ala.) G. C. A. H. Hill, Pres.
- April 24.—Maysville, Ky.—Mason County G. C. Wm. H. Hall, Mgr.
- April 26.—Pottstown (Pa.) G. C. C. A. Fries, Sec'y.
- April 29.—Guernsey, Ia.—Du Pont G. C. J. W. Dobbins, President.
- April 29-30.—Moberly (Mo.) G. C. J. A. Melton, Sec'y.
- April 29-May 1.—Pond Creek, Okla.—Oklahoma State tournament, under auspices of Pond Creek G. C. Wm. M. Hite, Mgr.
- May 1-2.—Philadelphia, Pa.—Keystone Shooting League. G. F. Hamlin, Sec'y.
- May 3.—Rittersville, Pa.—Lehigh R. and G. C. H. F. Koch, Sec'y.
- May 3.—Bethel, Conn.—Western Connecticut T. S. L. tournament, under auspices of Bethel G. C. C. K. Bailey, Sec'y.
- May 4-5.—San Diego, Cal.—Pastime G. C. George P. Muchmore, Sec'y.
- May 6-6.—Laramie, Wyo.—Gem City Gun Club. Tyler A. Rogers, Pres.
- May 6.—Vicksburg (Miss.) G. C. J. J. Bradfield, Mgr.
- May 6.—Pitcairn, Pa.—Western Pennsylvania T. S. L. tournament, under auspices of United G. C. Louis Lautenslager, Pres.
- May 6-7.—Eagle Grove (Ia.) G. C. A. L. Yearous, Sec. May 6-7.—Montpelier (Vt.) G. C. H. B. Moulton, Pres. May 7.—Tyndal (S. D.) G. C. F. F. Chladek, Sec'y. May 8.—Camden (Ark.) G. C. J. P. Wright, Mgr. May 8-10.—Hutchinson, Kan.—Kansas State tournament, under auspices of Hutchinson G. C. Chas. T. Rankin, Sec'y.
- May 7.—Seneca Falls (N. Y.) G. C. C. L. Frantz, Mgr. May 7.—Hicksville (O.) G. C. C. E. Maxwell, Sec'y. May 7-8.—Dayton, Ky.—Northern Kentucky G. C. H. R. Irwin, Mgr.
- May 7-8.—Americus, Ga.—Georgia State tournament, under auspices of Americus G. C. J. W. Hightower, Pres.
- May 7-8.—Sunbury, Pa.—Sunbury-Selingsgrove G. C. J. W. Schoffstall, Sec'y.
- May 8.—Watertown (Wis.) G. C. B. H. Rieck, Sec'y. May 8-9.—Kankakee (Ill.) G. C. E. F. Radeke, Sec'y. May 9.—Portage (Wis.) G. C. J. Raup, Pres. May 9-11.—Los Angeles (Cal.) G. C. Stanton A. Bruner, Sec'y.
- May 10.—Marysville (Pa.) S. A. M. L. Wise, Vice-Pres. May 12.—Mt. Airy (Md.) G. C. Ira D. Watkins, Sec'y. May 12-13.—Portland (Ore.) G. C. J. E. Cullison, Pres. May 13-15.—York, Pa.—Pennsylvania State tournament, under auspices of York City G. C. N. M. McSherry, Sec'y.
- May 13-15.—Montgomery, Ala.—Interstate Association's eighth Southern Handicap tournament, under auspices Capital City G. C.; \$1,000 added money. Winner of first place guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. Elmer E. Shaner, Mgr., Pittsburgh.
- June 14.—Warren (Minn.) G. C. Chas. F. Grindler, Sec'y. May 14.—Fulton (N. Y.) G. and G. C. B. J. O'Grady, Pres.
- May 14-15.—Waterloo (Ia.) G. C. Nick Webber, Pres. May 14-15.—Pipestone (Minn.) G. C. H. T. Ober, Sec'y. May 15.—Shelbyville, Ill.—Shelby County G. C. Geo. L. Dearing, Sec'y.
- May 15.—Riverside (Ill.) G. C. E. M. Collis, Sec'y. May 15.—Freeport (Md.) G. C. J. W. James, Sec'y. May 17.—Phillipsburg, N. J.—Alert G. C. Edw. F. Markley, Mgr.
- May 20.—Albia, Ia.—Monroe County Fish and Game Protective Association. Theo. B. Perry, Jr., Pres. May 20.—Milton Junction (Wis.) G. C. W. H. Smith, Sec'y.
- May 20.—Pillow (Pa.) G. C. J. A. Bingaman, Sec'y. May 20.—Clayton, O.—Salem G. C. F. C. Koch, Pres. May 20-21.—Columbus (Neb.) G. C. G. A. Schroeder, Sec'y.
- May 20-21.—Wenatchee, Wash.—Washington State tournament, under auspices of Wenatchee G. C. Chas. F. Owens, Pres.
- May 20-22.—Temple, Tex.—Texas State tournament, under auspices of the Temple G. C. R. I. Tennant, Pres. May 21.—Brazil (Ind.) R. & G. C. W. T. Crabb, Sec'y. May 21.—Windsor (Mo.) G. C. W. T. Jordan, Sec'y. May 22.—Mt. Morris, Ill.—Mt. Morris G. C. C. J. Price, Sec'y.
- May 22.—Aurelia (Ia.) G. C. Frank R. Welch, Sec'y. May 22.—Syracuse, N. Y.—Onondaga County G. C. T. E. Clay, Pres.
- May 22.—Scranton (Pa.) R. & G. C. M. F. Bohn, Sec'y. May 22.—Altoona, Pa.—Central Pennsylvania T. S. A. tournament, under auspices of Blair County Road Drivers' Association. Jack Waltz, Sec'y.
- May 22-25.—Winchester, Ky.—Kentucky State tournament, under auspices of Winchester G. C. C. B. Strother, Sec'y.
- May 23.—Nicholson (Pa.) R. and G. C. L. A. Wright, Sec'y.
- May 23.—Emporia (Kans.) G. C. Chas. Ford, Sec'y. May 24.—Stratford, Ont., Canada.—Pastime G. C. Wm. Boles, Sec'y.
- May 24.—Newmanstown (Pa.) G. C. F. S. Rader, Sec'y. May 24.—New Haven, Conn.—Western Connecticut T. S. L. tournament, under auspices of New Haven G. C. F. W. Smith, Pres.
- May 24.—Gananogue, Canada.—Thousand Islands G. C. C. A. Lewis, Sec'y.
- May 24-25.—St. Louis (Mo.) T. S. A. L. Ebert, Sec'y. May 27.—Fairmont (W. Va.) G. C. Ed. H. Taylor, Sec'y. May 27.—Sikeston (Mo.) G. C. Wm. H. Tanner, Sec'y. May 27-28.—Paragould (Ark.) G. C. C. W. Stedman, Sec. May 27.—Norwich, N. Y.—Chenango County F., G. and G. C. E. D. Borden, Mgr.
- May 27.—Brodhead (Wis.) G. C. J. B. Pierce, Sec'y. May 27-29.—Peoria, Ill.—Illinois State tournament, under the auspices of Illinois State S. A. R. Scholes, Sec'y. May 27-29.—Fort Dodge, Ia.—Iowa State tournament, under auspices of the Fort Dodge Gun Club. Jos. Kautzky, Mgr.
- May 27-29.—N. Platte, Neb.—Nebraska State tournament, under auspices of Buffalo Bill G. C. J. C. Den, Sec'y. May 28.—Chesapeake City (Md.) G. C. H. L. Worthington, Mgr.
- May 28.—Morocco (Ind.) G. C. Jas. C. Murphey, Sec'y. May 28.—Galion (O.) G. C. H. D. Smart, Pres. May 28-30.—Ogden, Utah.—Idaho-Utah Sportsmen's Association tournament, under auspices of the Ogden G. C. George E. Browning, Sec'y.
- May 29.—Vergas (Minn.) R. & G. C. Chas. A. Peterson, Pres.

**DRIVERS AND TWISTERS.**

A. J. McClure won the final shoot for the Captains' cup at the Laurel House Gun Club traps at Lakewood last Saturday with 87. Dr. C. O. H. Keyser won the sweepstake cup with 96.

The United Shoe Machinery Athletic Association Gun Club will hold an annual all-day spring tournament at Beverly, Mass., on Saturday, May 24, and its annual all-day fall tournament on Saturday, Sept. 27, at the same place. The club is planning to make these bigger and better shoots than any they have held previously, and all shooters are cordially invited to attend. The officers of the club are: A. C. Spencer, President; W. R. Hurd 2d, Field Captain; P. B. Batchelder, Secretary; W. A. Luscomb, Vice-President; Range Officers: M. E. Ellis, C. B. Giles, W. A. Luscomb; Directors, S. W. Winslow, Jr.; H. E. Sears, A. T. Foster, H. H. Eaton.

W. G. BEECROFT.

**Pottstown Gun Club.**

POTTSTOWN, Pa., March 29.—The annual white flyer handicap show of the Pottstown Gun Club, held on the club's Mill Park grounds to-day, was a great success. The Mill Park Handicap, 15 white flyers, \$10 entrance, was the feature event, with twenty-one entries, of whom Norman W. Hanley, captain of the Pottstown Gun Club, and Harry J. Wolf, of Ringing Hill, tied in 15 straight for the President's cup, with Edward Emmers, of Royersford; Isaac Knowles, E. B. Melrath and S. C. Aiman, of Philadelphia, tie on 14 each for the Secretary's cup. Hanley carried off the honors, as Wolf had left the grounds before the shoot-off was ordered, while Isaac Knowles won the Secretary's cup. The scores:

	Yds.	Tl.		Yds.	Tl.
Peter Miller.....	27	11	Murtorf .....	27	10
Wolf .....	30	15	Eschbach .....	28	9
J. D. Smith.....	30	13	Waddell .....	27	13

J. O. WILSON, Sec'y.

**Mt. Silsby Gun Club.**

ST. JOHNSBURY, Vt., March 26.—A gun club was organized at this place on March 5, to be known as the Mt. Silsby Gun Club, with nine charter members as follows: Fred. Cushman, Benj. Daniels, Alden McFarland, Morton D. Lyster, Carl Daniels, Albert McFarland, Benj. Tousant, T. H. Lyster and Carl Lyster. The following officers were chosen for the year 1913: President, Alden McFarland; Vice-President, Benj. Daniels; Secretary and Treasurer, Carl F. Lyster; Field Captain, Carl Daniels. The club has already purchased an Expert trap and a good supply of clay pigeons, and expects to commence shooting by May 1. The total membership consists of about thirty. It is hoped it may be increased to fifty. Land for the trapshooting has been donated by one of the members.

CARL T. LYSYTER, Sec'y-Treas.

**New Hanover Gun Club.**

WILMINGTON, N. C., March 28.—The following scores were made to-day:  
 Boylan 65, Grant 65, Dreher 69, Underwood 46, Holloyway, 48.

**Essex County Country Club.**

WEST ORANGE, N. J., March 29.—W. R. Delehanty won the events here to-day, which feat with him has grown to be a habit. He took the March trophy with a full of 25, and handicap sweepstakes with 22. In the other event James A. Hart and B. M. Shanley, Jr., scratch men, tied with a 23. Scores:

Handicap sweepstakes, 25 targets:					
W. R. Delehanty .....	4	22	B. M. Shanley .....	0	20

Shanley .....	0	23			

**.22 Metallics WIN**

**100-Shot Indoor Gallery Championship**

FOR THE FOURTH CONSECUTIVE TIME

At the Zettler .22 caliber Tournament held at New York, March 15-22.

Arthur Hubalek, with a score of 2479, won this classic of the Indoor Shooting Game. Dr. W. G. Hudson, second place, 2474, and J. Williams, Jr., fourth place, 2470. All three shot **Remington-UMC** .22 metallic ammunition.

**Continuous Match:** Arthur Hubalek, Dr. W. G. Hudson and J. Williams, Jr., tie for first place, each with three possible scores of 75, all shooting **Remington-UMC** .22 metallic ammunition.

**Premium Match:** Won by J. Williams, Jr., with seven 75's. Dr. W. G. Hudson, third, with six 75's. Both shot **Remington-UMC** .22 metallic ammunition.

This same ammunition was used by the Harvard University Team in hanging up a new Intercollegiate record of 978 x 1000 in the N. R. A. Intercollegiate Matches.

Birmingham Gun Club Tournament.

Two days of as hard shooting conditions as one will likely have to face anywhere were dished out by the Weather Man to sixty-three game, enthusiastic sportsmen during the registered tournament held by the Birmingham (Ala.) Gun Club on March 25 and 26, and that better than 80 per cent. of them each day shot through a program of 300 targets is something well worth studying over, showing as it does just how popular the great game of trapshooting is growing throughout the country.

From all over the United States sportsmen came and "battled with the elements" for supremacy over the "elusive clays," and it must be admitted that the elements finally succeeded in putting the majority of them in their "game sack," notwithstanding the fact that among that number were some of the cream of the shooting world.

The Birmingham Gun Club has indeed a great deal to be proud of in that the tournament from every other standpoint, save that of weather conditions, was one of the most successful ever held in the South, and Messrs. Jas. Hillman, Bob Baugh, John K. Warren and O. L. Garl, who were at the helm, deserve much credit for the manner in which it was carried out.

On Monday, the 24th, preliminary day, an event at 25 pairs was pulled off, to the winner of which the club gave a handsome trophy. This proved a "battle royal," for the weather, though a trifle better than on either of the two succeeding days, was such that the finish saw three of the best amateur double-target shots in "this neck of the woods" tied on the low score of 35 out of a possible 50. And it required two shoot-offs at 10 pairs each before W. W. Cocke, of New Orleans, La., finally broke the "stranglehold" J. K. Warren, of the local club, had secured, and walked away with the prize. It having previously taken the combined efforts of these two gentlemen to put our "little" friend A. M. Hill, of Dawson, Ga., out of the running, they succeeding only after resorting to the famous "Gotch toe-hold," which, as everyone knows, naturally placed Andy at a disadvantage.

About the best piece of shooting done during the tournament was also accomplished on this day, when E. W. Daniel, of Lynchburg, Va., made the remarkable run of 61 straight in practice. This proved by far the longest run of the shoot. Daniel was on his maiden trip as a powder demonstrator, and he certainly gives promise of making more than good in all branches of the game.

Another new face in the professional ranks was Frank N. Huseman, whom all the boys were glad to welcome even though he did walk off with the sterling trophy presented to the high professional in the Preliminary Handicap by Secretary O. L. Garl.

Following are the scores in what the program designated the "Double Target Championship of the South":

Table with 2 columns of names and scores for the Double Target Championship of the South.

Table with 2 columns of names and scores for Professionals.

The first day's program called for a total of 300 targets, 100 being at 16yds., and 100 constituting the Preliminary Handicap. The wind was almost a gale, and there was no particular star able to shine through it, the results showing three tied for high on 185 out of 200. James S. Day, H. D. Gibbs and E. W. Daniel, three professionals, each having scored that number in the regulation 16yd. events. John K. Warren was next with 183, winning high amateur for the day by one target from John R. Livingston, of Springville, Ala. E. R. Holt, Montgomery, Ala., second high professional, was next with 180. The scores on 16yd targets were:

Table with 2 columns of names and scores for Shot at, Broke.

Another three-cornered tie resulted in the Preliminary Handicap. W. W. Cocke, winner of the double-target event the previous day, found his title to the trophy offered to the winner of this event, disputed by Dr. C. L. Gunn, of Gadsden, Ala., and E. M. Cornwell, of Birmingham, a new and enthusiastic member of the local club. Each of these gentlemen had secured 90 out of 100. We are unable to say just what method

"Cockey" resorted to to shake these fellows loose, but in his reply to the pleasant little presentation speech of Secretary Garl, he admitted that he had prepared a speech for the occasion, but that they had "shot it out of him." Following are the scores in the Preliminary Handicap at 100 targets:

Table with 2 columns of names and scores for the Preliminary Handicap at 100 targets.

At times during the second day's program the wind was so strong that it was no uncommon sight to see a shooter momentarily lose his balance at the score, stagger and brace himself again before "lining up." One shooter, having called "pull" on one occasion, was just in the act of firing when his hat blew down over his eyes, completely obscuring his vision. It was up to him to shoot, however, and so, trusting in that kindly providence that looks after all good trapshooters, pulled the trigger and—broke the target.

Though the conditions were worse, the experience of the past two days had enabled the boys to overcome them to a certain extent, and on the whole the scores showed up a little better. Walter Huff, of Macon, Ga., and H. D. Gibbs finished in front with 189 out of 200, while J. S. Day came next with 183. W. T. Laslie was high amateur with 179, and J. W. Hightower and J. O. Sirmon second with 175. Don't these scores look funny following such names? Look on down the line—they get worse:

Table with 2 columns of names and scores for Shot at, Broke.

The event of the most interest naturally was the Grand Birmingham Handicap, to which the club had added \$100 and an exceedingly handsome trophy. In this event John R. Livingston, who had been shooting consistently throughout the tournament led the field with 87 out of 100 and won with 2 targets to spare, his nearest competitor being E. C. Little, of Gadsden, Ala., with 85. Both these scores were strictly high class work under the conditions and reflect great credit on those who made them. E. W. Daniel won the trophy for high professional in this event.

A summary of the two days' scores shows Jas. S. Day and H. D. Gibbs tied on 534 out of the entire program of 600 targets; E. W. Daniels next with 533. John R. Livingston was next with 532, giving him high amateur on all targets, though John K. Warren led him one on the 400 regulation.

By Granny! I led that right-hand fellow a hundred yards and then didn't get him. Reckon I must have been overshootin' him.

Only two long runs worth mentioning were recorded—that of 61 straight by Daniel, and the one made by Jake Gibbs when he chased his hat two-thirds of the way around the one-mile race track. If it hadn't been for the water jump at the seventh hurdle, Jake would be running yet.

Everything considered, it was certainly some shoot, and long to be remembered by all those in attendance. There were a number of new faces, of course, and all will be back again at the next one, but to us "old ones" who have been going to Birmingham for years, it was certainly a treat to meet the crowd once more; to enjoy the excellent luncheon served by the ladies of the West End Society; to hear again the "he's dead" of the only referee of his kind in captivity; to see once more the same "old face" at the cashier's window, the ammunition counter and at the refreshment stand. I tell you, it was a treat, and we will all look forward with much pleasure to the next meet of the Birmingham Gun Club.

A. S. HOOTER.

The Guernsey (Ia.) Shoot.

GUERNSEY, Ia., March 24.—Just a little noise about the Guernsey shoot April 28 and 29; \$90 added money, fine ground, Merrill targets. This shoot will be held just one-half mile from town, on the Dick Morgan farm, which is the residence of the president of the

club. Fried chicken, canned fruit in the cellar. You are always welcome at my house. Don't forget this shoot. Be present, I want to shake hands with you as a matter of good fellowship. The Interstate Association adds \$50, the gun club adds \$30; total \$80, to be divided on each event in four equal divisions. The club also adds \$10 to the amateur shooting the highest average on the who program. April 28, commencing at 1 o'clock we give a 100-target Jack Rabbit shoot. The club gives the highest average on this 100 targets, \$5. Be on hand April 28. April 29 will be the big event. Registered. The program consists of 150 targets in events of two 15s and one 20 all through the program. Interstate Association adds \$50, the gun club \$40 for this day, the four equal divisions of money. This tournament will be conducted under the rules of the Interstate Association, and all rules must be strictly complied with. There will be no deviation from the rules. I wish to meet you personally. We expect about forty to toe the mark. This event only comes to us once in twelve months, and we intend to make it an enjoyable time for everybody present. The programs are now ready to mail. Write me. Everybody come in over the Northwestern Railway. You make direct connection at Belle Plaine with the main line, arriving at Guernsey at 9:00 A. M. Late arrivals may shoot up.

Pres. Du Pont Gun Club.

Jersey City Gun Club.

JERSEY CITY, N. J., March 29.—A good big turnout was in attendance at the regular shoot of the Jersey City Gun Club to-day, and before the last gun was fired around 4,000 targets had been thrown, and after the smoke had cleared away, it was found that Dave Engle had won high average with 79 per cent., and George Piercy second with 74 per cent. The principal event was the two take-home prizes, put up for the two highest scores, counting handicap, made on 100 targets, and as is often the case, the new members carried off the honors. E. H. McLemore won first prize, a handsome piece of cut-glass; and second prize went to J. Williams, Jr., who has just joined our club, and shot like a regular veteran, Harry Burlington won the leg on the season trophy with 49 out of 50. The scores follow, in strings of 25:

Table with 2 columns of names and scores for Jersey City Gun Club.

On April 5 we commence shooting for the Du Pont trophy, a silver watch fob, and the handicaps will be added birds and very liberal. Visitors are always welcome, and targets are only one cent each.

Queens Country Club.

QUEENS, N. Y., March 29.—Five 25-disc events made up to-day's program here. The big noise was E. R. Chapman, who ran straight on his first string and tied up at 106 out of 125 with W. Barnes. The scores:

Table with 2 columns of names and scores for Queens Country Club.

Medford Gun Club.

MEDFORD, Okla., March 27.—Representative Ed. O'Brien was our guest to-day, and a good bunch turned out to spend the afternoon with him, the scores are good considering the high wind. The scores:

Table with 2 columns of names and scores for Medford Gun Club.

Our club will hold the third Grant County championship on Oct. 8, and a registered tournament on Oct. 9 with plenty of added money.

I. V. HARDY, Sec'y.

**Du Pont Gun Club.**

WILMINGTON, Del., March 29.—The three main events to-day were the regular monthly contest for the Eugene F. du Pont team trophies, the final shoot-off for the 1912 Class B cup, and a similar contest for final ownership of the 1912 Class D cup. A school of instruction for beginners was also started at No. 3 traps, with Lester S. German, the well-known professional from Aberdeen, Md., as head schoolmaster. The school was decidedly popular, and was well attended, and bids fair to be one of the main attractions at the weekly shoots of the local gun club.

In the E. E. Du Pont team contests, eight teams competed, and J. H. Minnick with his side partner, E. M. Ross, were high with a total of 48 out of 50, handicap allowances included. J. B. Grier and Henry Winchester, and R. S. Wood, paired with D. Lindsay, were second with 46. The several scores in this event were as below:

	Broke.	Hdp.	T'l.	Points.
Clyde Leedom .....	17	3	20	
Dr Bullock .....	14	9	23-43	1
J H Minnick.....	22	1	23	
F M Ross.....	20	7	25-48	4
S Reis .....	10	9	19	
L C Lyon.....	21	3	24-43	1
W A Casey.....	14	7	21	
H P Carlon.....	21	1	22-43	1
W G Wood.....	15	3	18	
H T Reed.....	16	5	21-39	0
W J Highfield.....	19	3	22	
W Edmanson .....	21	1	22-44	2
J B Grier.....	18	5	23	
H Winchester.....	20	3	23-46	3
R S Wood.....	18	5	23	
D Lindsay .....	20	3	23-46	3

In the final contest for the 1912 Class B cup, all the eligibles with the exception of Victor du Pont put in an appearance, and after a good race, H. W. Bush won after a shoot-off with C. Thorpe Martin, both having broken 40 out of 50 targets in the event. The shoot-off showed some class on Mr. Bush's part, as he broke 24, his opponent scoring only 18. The scores were: I. Turner 35, H. W. Bush 40, J. W. Anderson 31, N. K. Smith 31, C. T. Martin 40, H. P. Carlon 34, C. Leedom 37, D. Lindsay 33, S. Tuchtou 37.

In the contest for final ownership of the 1912 Class D cup, all the ten eligibles—that is, those who had won the cup on one or more occasions during the year, were on hand. J. A. McMullen took the cup, breaking 20 and 22 in his two strings of 25 targets each, being 4 targets better than E. M. Ross, his nearest competitor. The scores were: E. M. Ross 38, J. H. Squires 26, W. A. Casey 30, W. J. Highfield 31, W. F. Jensen 23, J. A. McMullen 42, S. G. David 14, J. B. Grier 36, Dr. E. O. Bullock 26, H. C. Pollock 36.

Fifty-two shooters shot at 25 targets, but only one straight 25 was made, and that by Lester German; 24 out of 25 was made by W. S. Colfax, Jr., J. B. McHugh and Edward Banks. The scores were: Isaac Turner 15, E. M. Ross 20, W. A. Casey 16, C. H. Anderson 7, W. F. Jensen 15, L. S. German 25, J. M. Turner 22, Eugene Raymond, Jr., 21, L. W. Crawford 17, W. A. Joslyn 21, R. P. Willis 16, W. S. Colfax, Jr., 24, N. K. Smith 15, C. H. Simon 17, Clyde Leedom 17, Dr. Bullock 14, S. A. Reis 10, L. C. Lyon 21, W. J. Highfield 19, W. F. Jensen 14, J. W. Anderson, Jr., 14, C. H. Simon 16, H. P. Carlon 21, Edward Banks 24, J. B. McHugh 24, J. H. Minnick 22, John E. Miller 18, W. G. Wood 15, E. R. Jenks 11, H. L. Morgan 21, H. C. McClane 14, W. Edmanson 21, H. C. Pollock 19, Dr. A. Patterson 20, H. J. Taggart 11, H. T. Reed 16, S. G. David 11, Henry Winchester 20, W. Tomlinson 20, Wm. H. Neely 18, Wm. Coyne 19, F. H. Springer 19, G. F. Lord 19, T. W. Keithley 21, E. R. Galvin 22, R. S. Wood 18, D. Lindsay 20, Karl Mayer 10, S. Tuchtou 18, Dr. Betts 16, C. C. Gerow 17, Geo. Wolstingholm 13.

**Baltusrol Golf Club.**

NEWARK, N. J., March 29.—With a season of consistently good shooting, Dr. D. Webb Granberry became club champion after to-day's program. His to-day's score was 20 out of 25, totaling him an average of 19.375 for the season.

S. H. Browne broke 39 out of 50 from scratch, which put him in possession of the March cup on an average of 38.705. G. A. Williams topped the take-home trophy with 24 out of 25, while Marshall Geer, from 4 unshot rocks, took a leg on Cowperthwaite trophy, his gross breakage being 21 out of 12 pairs. The scores:

March cup, 50 birds, handicap:			
C H Stout .....	12	44	
T W Lloyd .....	0	42	
B F Fincke .....	0	41

**Secaucus Gun Club.**

SECAUCUS, N. J., March 30.—Twelve members of the club came out last Sunday afternoon for a little fun over the traps. No doubt the scores will be laughed at, but I will affirm they are true. And if any of the Jersey City or Hudson clubs don't believe it, I will invite them to our next regular shoot on April 13 at 2 P. M. sharp, and they will be made welcome, and go away convinced that my figures are accurate. The first five shot during a heavy rain, and our captain, Matthies, said the rain cracked the targets, and they broke easy. This is young Frohberg's first shoot. The scores:

**Marine and Field Club.**

BATH BEACH, N. Y., March 29.—On the return shoot to-day against Bensonhurst Y. C., the home team got trimmed by seven rocks in a five-hundred saucer program. Dr. Elliott, of Bensonhurst, and S. P. Hopkins, of the Marine and Field Club, tied for top gun with 80. Generally strong men on each team proved erratic, thereby keeping the general totals down. In the final for March cup, H. Lott and J. M. Knox tied for a final shoot-off next Saturday. Dr. Elliott cracked 23 out of 25 for Dr. Atkinson cup. The scores:

# 1912

## A YEAR OF SUCCESSES FOR Peters Ammunition

"Where quality counts they win"—and quality counts EVERYWHERE. The year 1912 has been one continuous round of victories for users of Peters Shells and Cartridges—far too numerous to record here in full. The few items that follow will suffice to indicate the kind of work that can be done, and is being done every day with the P brand:

### "Steel Where Steel Belongs" Shells

WON IN 1912:

- Grand American Preliminary Handicap,
- Grand American High Amateur Average,
- World's Amateur Indoor Trapshooting Championship,
- Texas State Championship,
- Arkansas State Championship,
- Pennsylvania State Championship,
- Virginia State Championship,
- Vermont State Championship,
- Colorado, New Mexico and Wyoming State Championship,
- E. C. Challenge Cup, twice by record scores,
- High General Average at Post Season Tournament.

### Peters Semi-Smokeless and Smokeless Cartridges

WON IN 1912:

- 3 out of 5 Matches at Zettler Rifle Tournament,
- 5 out of 6 Matches at .22 Indoor League Tournament,
- 8 out of first 12 scores of American Team in the International Small-Bore Match, including 1st, 2nd and 3rd,
- 6 out of 10 Revolver Matches at Sea Girt Military Tournament, including Grand Aggregate,
- 5 out of 6 United States Revolver Association Outdoor Championships for 1912, including Two New World's Records.
- New Inter-Scholastic Record, 980 out of 1,000,
- Astor Cup (Inter-Scholastic League).

### New York A. C.

PELHAM MANOR, N. Y., March 29.—G. F. Pelham won two trophies on his finishes to-day, being the Powhattan Robinson cup and the monthly cup. He made during the month two wins on each. Four ties showed on the Robinson trophy. In the shoot-off, Pelham's score was 21. Corbett won Travis Island cup. J. G. S. Dey won distance event after a tie with W. B. Ogden.

In the monthly distance shoot-off, Pelham topped with 19 from the 18yds. mark. The scores:

### Evanston Gun Club.

CHICAGO, Ill., March 24.—A team representing the Evanston Gun Club competed with a team of the South Shore Country Club on Saturday at the traps of the latter. The match was 100 birds each, and the Evanston team shooting way below form, lost the event by 33 birds. All credit is due the South Shore team, as they clearly outshot the Evanston team, and did it in a most sportsmanlike manner.

The visiting team were delightfully entertained at dinner after the match. In the near future a return match will be held at the Evanston grounds. The scores follow:

South Shore Team.		Evanston Team.	
Donnelly	88	Kennicott	81
Carson	76	Coleman	59
Heath	67	Millen	77
Hardy	63	Phalen	59
Cushing	95-389	Winkler	80-356

On account of a miserable day Sunday only ten shooters were at the traps, and notwithstanding the rain, some good scores were registered. Schieble was high man, only missing four birds out of 50. Coleman was second with five misses. Darby was third with a score of 44 out of 50. Five are tied for silver spoon—Harphay, DeClercq, Hanson, Millen and Schieble. This tie will be settled next week, as the weather would not permit further shooting.

W. J. PHALEN, Sec'y-Treas.

### Paleface Gun Club.

WELLINGTON, Mass., March 29.—Dr. Newton was high on actual breaks, and Frank Sweet high handicap gun at the shoot this afternoon. Dr. Newton broke 96 out of 100, and had a straight run of 72. Sweet's handicap of 12 targets made his total 98. Both men received silver trophies. Scores:

Dr. Newton	4 100	Blinn	8 92
Sweet	12 98	*Sibley	0 92
Cook	12 97	Bullock	12 91
Proctor	12 97	Wiggs	1 91
Jackson	20 94	Frank	2 90
Hinds	4 94	Burnes	1 87
Charles	8 93	Heard	8 84
Wilder	0 93	Wood	24 64
Marden	4 93	Thompson	0 47
Clarke	4 92		

\*Professionals.

Manhasset Bay Y. C.

PORT WASHINGTON, N. Y., March 29.—One of those congenial shoots, designated as the annual invitation, drew out twenty-nine guns at Manhasset Bay Y. C. to-day. Ten crackers from various handicaps made 91 or better, and while four home club saucer destroyers were included in the upper ten, the event was won by G. F. Cleghorn, of Queens Gun Club from a gratis start of 25. M. R. Guggenheimer, from Siwanoy, got second from 18 discs unpolled. The race for high net score afforded predominant interest, J. H. Vanderveer and W. S. Silkworth tying on 88 from 6 handicap, which was scratch among the amateurs. After five shoot-offs they whirled a coin and the trophy went to W. S. Silkworth, of Manhasset Bay Y. C. Third place brought out good gunning between R. B. Budd, of the home club, and A. F. Brombacher from the Crescent A. C. The visiting exterminator won the shoot-off. Rotten weather kept the crowd small, but good treatment kept 'em happy. The scores:

\*Tied for third prize. Shoot-off won by M. Brombacher.

J. H. Vanderveer and W. S. Silkworth tied for high scratch score prize; five shoot-offs also tied. Toss-up won by Vanderveer.

March 30.—Six events were pulled to-day, of which J. W. Alker crabbed five, including monthly cup with a full from two; Stevens trophy, 46 from 4, and the 10, 15 and 25 sweets. E. A. Sierck, from a pair of comps, got full on the yearly cup. The scores:

Crescent A. C.

BROOKLYN, N. Y., March 29.—George Bingham shot into the major portion of to-day's events. He took the Spooner trophy with 48 out of 50, take-home trophy with 96, Blake cup on 48, and the J. F. James cup on 45.

Monthly cup was won by F. B. Stephenson with an aggregate of 63 out of 75, and Spooner trophy with a total of 6 points.

J. F. James won the committee cup and was high scratch gunner of the day, with 208 out of 250. The shooting season at Bay Ridge finishes next Saturday. The scores:

WILMINGTON :: :: :: :: DELAWARE

Bergen Beach Gun Club.

BROOKLYN, N. Y., March 29.—Only a small field of gunners took part in the weekly trapshooting matinee of the Bergen Beach Gun Club to-day. Twenty-five target practice shoots were decided. The best work was done by G. Gates. He was closely followed by A. V. Suydam. The scores:

Parker Gun Victories in 1912

THE highest official average for the season of 1912 at both Single and Double Targets was made with Parker Guns.

As on every previous occasion, the bona fide Championship of America was won with a Parker Gun, Mr. W. R. Crosby scoring 198 x 200 targets at 18 yards rise. Same man, same gun, made the World's Record, scoring 98 x 100 targets at 23 yards, which is a truly wonderful performance.

Small bore Parker Guns are recognized as the Standard Game Guns of America and are gaining in popularity every season with the most progressive sportsmen. For full information regarding guns in gauges from 8 to 28, address

NEW YORK SALESROOMS 32 Warren Street PARKER BROS., Meriden, Conn. Or A. W. duBRAY, Resident Agent, P. O. Box 102, San Francisco, Cal.

CLEAR VISION means a sure shot. The bright rays of the sun, or the haze of a dark day can't effect your vision if you wear KING'S SHOOTING GLASSES. Made of Akopos Crystal, our exclusive product and infinitely superior to amber.

The KING and the KING-BUSCH-STELLUX Binoculars have wonderful magnifying power, are handsomely finished, durable and scientifically correct. Endorsed by the leading sportsmen of America.

THE F. W. KING OPTICAL CO. Cleveland, Ohio

New Rochelle Y. C.

On Sunday, March 30, the monthly trophies were decided, except the March cup, which resulted in a tie, Stoddard, Todd and Currier having two legs each.

The New Rochelle team were decisively beaten by White Plains, although if the home talent had been up to usual form, they would have been beaten by a smaller margin.

Table of scores for New Rochelle Y. C. including Sweepstakes (25 birds), Saturday cup (25 birds), and Accumulation cup (100 birds) with names and scores.

Richmond Rod and Gun Club.

THE Richmond (Va.) Rod and Gun Club was organized on March 21 with thirty-five members enrolled. Plans to start shooting immediately upon the arrival of the trap were made and the committees were appointed to complete arrangements.

The club was organized under the direction of H. W. Vietmeyer and James Barr, gun club promoters, who were brought here by Clarence Jessup at the request of a number of local men interested in the sport.

Officers elected were: O. F. Porter, President; Mort Little, Vice-President; Walter Englebrecht, Secretary; J. F. Hornaday, Treasurer; Clarence Jessup, Field Captain.

As the grounds will be outside of the city limits, Sunday shooting for the benefit of the members who are unable to indulge during the week is deemed permissible. Those present were: J. F. Hornaday, Charles Jordan, Clarence Jessup, Harry Jay, Walter Englebrecht, William Morrey, Mort Little, Mayor W. W. Zimmerman, Herbert McDivit, R. P. Wissler, Louis Iffit, E. M. Harter, Otto Heins, N. T. Stegall, Mr. Cook and Mr. Ingalls.

# About the barrels of the

## FOX GUN

"The Finest Gun in the World"

THE usual charge from a gun has a bursting force of from 50,000 to 65,000 pounds to the square inch.

With this force within a few inches of his head a man should come pretty near knowing that his barrels are *right*. The FOX barrels are made to test from 90,000 to 110,000 pounds to the square inch. This shows that the FOX is safe.

The FOX barrel construction is positively scientific. It is a special grade of the highest quality of Fluid Steels, specially bored, and tested with a tremendous overcharge equal to the test required by the European Government Proof Houses.

Because of the small number of mechanical parts in the action the frame of the FOX is not cut away so much as the average gun, therefore the FOX has frame strength where it is scientifically needed. This, with barrels of scientifically distributed weight, giving strength and balance, make it "the perfect handling gun."

### Ask Your Dealer To Show You The Fox

Handle it. Examine it closely. Read the Guarantee and Certificate of Test attached to each gun. Know that FOX PROOF means safe and sound—and that it insures the gun doing in your hands just what it has done in the hands of our inspectors.

If your dealer cannot accommodate you write us, giving his name, and we will forward catalog and full information.

The A. H. FOX GUN CO.  
4655 N. 18th St., PHILADELPHIA

**3 IN** Important as the Gun Itself

is "3 in One" for oiling all the delicate parts. Makes trigger, lock, every action part work promptly, properly. Never hardens or gums, contains no acid.

"3 in One" removes the residue of burnt powder. Indispensable with smokeless powder. Positively prevents barrel from rusting inside or out. Cleans and polishes the stock.

Free sample bottle sent on request.

3-IN-ONE OIL CO.,  
112 New Street, New York City

### Boston A. A.

RIVERSIDE, Mass., March 22.—J. L. Snow won the take-home trophy from scratch to-day. L. H. Davis won the take-home with his handicap. The weather was clear with a stiff northwest wind. The scores:

Storey	12 18	Studley	2 15
Smith	12 18	Ross	8 13

### Meadow Springs Gun Club.

PHILADELPHIA, Pa., March 29.—Henry led the field in actual breaks to-day with 88 out of 100 for silver dipper. In the club shoot at 50 birds, Emerson and Letford tied with 47, and on the shoot-off, Letford won by 22 to 16. In the yearly point prize event, which started the first shoot of the new year, Turner, Letford, Emerson, Deily and Henry each scored 5 points; Armstrong 4; Wiley, Wolf and Kinckener 3; Keenan, Williams, MacAlonan and Henner 2, and Umholtz, Jackson and Soley 1.

## High Gun

AT DENVER, 1912  
HANDICAP, SEPT. 10-13

Mr. R. H. Bruns, shooting his

## LEFEVER

made the marvellous run of  
283 without a miss.

On the 700 single targets, including handicaps, Mr. Bruns scored 683 out of 700.

The second day of the tournament on the day's program of 200 targets, Mr. Bruns and his Lefever gun scored 200 out of 200. A world's record for ten traps.

On the 500 single 16-yard target for amateurs, Mr. Bruns scored 494 out of 500.

### ANOTHER WINNER AT THE PACIFIC COAST HANDICAP

Mr. L. H. Reid, shooting his Lefever gun, won second high average with 381 out of 400.

Why don't you shoot a LEFEVER?

E. I. HORSMAN CO. 365 Broadway, N. Y.

The American Powder Mills have manufactured Sporting Powder for 78 years.

They make one brand, *and one brand only*, of Smokeless Powder, and that is DEAD SHOT. They have confined their efforts to this one brand, so as to give the sportsmen of America a powder they can absolutely depend upon at all times and under the most adverse conditions.

DEAD SHOT has the combined *good* qualities of other powders, but stands alone as the *best* powder on the market today.

We don't ask you, Mr. Sportsman, to take our word for it. Just give DEAD SHOT a trial and judge for yourself.

Below are a few records made by shooters using DEAD SHOT:

World's Longest Runs, . . . .	456 straight.
" " " " " " " " " " " "	565 straight.
Official High Average, . . . .	1907, .949 per cent.
" " " " " " " " " " " "	1908, .967 per cent.
" " " " " " " " " " " "	1909, .972 per cent.
" " " " " " " " " " " "	1911, .97 per cent.
Grand American Handicap, . . .	1911, 99x100 from 20 yds.
" " " " " " " " " " " "	1912, 96x100 from 19 yds.
Official High Amateur Average,	1912, .958 per cent.

**Zettlers' Annual Tournament.**

A. HUBALEK.

FROM far and wide came riflemen last week to take a look or a try in the little Zettler Range in West Twenty-third street, New York city. Brooklyn, however, sent the winner in Arthur Hubalek, who made a remarkable score in the 100-shot championship and won the match with 2479 out of 2500. W. G. Hudson tied L. C. Buss, of Montclair, for place with 2474. T. H. Keller, of yellow shells made by Peters Cartridge Co., won the prize for most bullseyes with 54. W. A. Lemcke won bullseye match with a perfect center shot.

The continuous on an 1/8-inch ring target, bullseye two inches in diameter, shoot until you are tired, was a tie between Dr. Hudson, Keim, Pope, Hubalek, Buss, Ittle and Jarvis Williams. They divided the purse. The latter also got purse for most 75s. Zimmerman trophy was copped by F. M. Bund, with L. C. Buss second and Ittel third. Besides Brother Keller, the selling interests were ably handled by John Hessian, of Remington-U. M. C. Co., and Capt. A. F. Laudensack and H. M. Thomas, of Winchester Repeating Arms Co.

**National Rifle Association Notes.**

THE inter-club gallery championship of the United  
States will not be decided for several weeks, owing to  
the floods which are now devastating the State of Ohio.  
Several members of the Engineers Rifle and Revolver  
Club of Cleveland are on duty with the militia in the  
flood district, and the range of that club is under water.  
The shoot-off is now scheduled to be shot on the evening  
of April 11, if possible. If not, the shoot will be held  
on the evening of the 18th.

In the inter-school league matches, the final contest  
between the Iowa City High School and the Salt Lake  
City High School is yet to be held, the Easter holidays  
having interfered with the holding of the final shoot.  
The same condition prevails in the military school  
league, in which Wentworth Military Academy and  
Bordentown, N. J., Military Institute are yet to shoot off  
for the championship.

The floods in Ohio will also be the cause of delay  
in issuing the programs for the International and National  
shooting competition. These programs were be-  
ing printed in Columbus, Ohio, and delivery was to be  
made this week, but owing to the suspension of railroad  
service, it will be several weeks before these programs  
will arrive in Washington.

Official targets are being sent out for the interna-  
tional small bore match. In selecting the members of  
the team to represent the United States all those men  
who have fired in six or more of the matches in the  
inter-club gallery competition, and who made an aver-  
age of 194 or better were selected. There were forty-four  
men that came in this class, leaving only six men to be  
selected from the country at large, who had not been  
competitors in the indoor league shoot. These six men  
will be selected by the executive committee of the  
National Rifle Association on merit only, and after a  
thorough try-out to see if they are still shooting in  
their old record way.

There appears to be an unprecedented activity  
throughout the country in the organization of new  
rifle clubs. Whether this is caused by the publicity that  
the big matches are giving to rifle shooting, or whether  
it is a healthy increase in the sport of rifle shooting  
alone is hard to tell, but probably an era of a revival  
in rifle shooting is with us.

**League Island Rifle Club.**

READING, Pa., March 18.—The Reading Turn  
Verein Club shot a match with the Island League Club  
on the Island League range. It was a banner event  
and was won by the Island boys with 234 points ahead of  
the Turn Verein boys.

George Bernhart served as scorer and referee and  
kept the boys hustling. "Berny" had his mustache  
shaved off before the contest, which resulted in his team  
winning. "Berny" looked like a stranger. I wonder  
what his girl said when he came home?

The next contest will be shot on the Turn Verein  
range, with H. L. Melchior as chief coacher.

Charles Miller landed first honors, with Guy Willson  
as second. Guy was going some. The scores:

R. T. V. Club.		I. L. Club.	
Chas Miller .....	586	Guy Willson .....	583
Lentz .....	569	G Miller .....	582

LUDDY.

**Intercollegiate Rifle Matches.**

WASHINGTON, D. C., March 31.—The twelfth weekly  
competition of the intercollegiate gallery rifle shooting  
matches, just ended, resulted in the defeat of the West  
Virginia University by the Iowa State University. This  
now makes a tie, with only one more match to be shot.  
In the Eastern League, Harvard University is now a sure  
winner with twelve straight victories to her credit. Iowa  
State University and West Virginia University will be  
compelled to shoot off the tie for the Western League,  
and the winner will shoot off for the United States cham-  
pionship with Harvard. The results of the twelfth match  
follow:

Eastern League: Massachusetts Agricultural, 964, vs.  
University of Vermont, 919; Harvard, 946, vs. Norwich,  
936; Massachusetts Tech, 961, vs. Lehigh University, 812;

### Bulldog Breeders Meet.

THE first of several scheduled bench show matches was held last Saturday at the Hoffman-Albemarle Hotel under the auspices of the Bulldog Breeders' Association of America. In the puppy classes some fine specimens were shown. Paul Scarsdon, of Australia, judged with satisfaction. The Eminent Turk, owned by Mrs. William Betts, won the special match. The awards:

Puppies—Bitches, 3 to 5 months: 1st, Mrs. Walter Sickles' Topsy Turvy; 2d, G. A. Wells' Kitty Bellaire; 3d, Mrs. C. M. Platt's Nancy Mars. Dogs, 3 to 5 months: 1st, G. A. Wells' Beau Brummel; 2d, W. T. Drew's Billy Buttons; 3d, A. Oberle's Bayardo Junior. Dogs and Bitches, 5 to 8 months: 1st and 2d, Inwall Kennels' Willie and Alice-Sit-by-the-Fire; 3d, A. Siagre's Larlot.

American-bred—Dogs: 1st, A. D. Gillette's Robinswood Pindarns; 2d, Mrs. H. Rhoades' Wee Rascal; 3d, A. Liagre's Larlot.

Open—Dogs: 1st, Mrs. H. Rhoades' Wee Nugget; 2d, Mrs. C. N. Platt's Silent Marquis; 3d, A. D. Gillette's Robinswood Pindarns.

Open and American-bred—Bitches: 1st, Lieut.-Col. Nelle's Hermit's Cora.

Special Match—Dogs: 1st, Mrs. W. Betts' The Eminent Turk.

### Club Elections.

THE New England Collie Club has elected the following officers: President, Walter B. Foster; Vice-Presidents, E. J. Clarke, T. E. L. Kemp and Dr. T. W. Dwight; Secretary, F. P. Sibley; Treasurer, J. L. Card. Directors, Mrs. J. L. Card, C. A. Orcutt, Mrs. Grierson and Miss Bullock. Delegate to the A. K. C., H. P. J. Earnshaw. The New England has absorbed the Eastern Collie Breeders' Association.

Officers of the Pointer Club of New England have been elected as follows: President, Robert Leslie, of Swampscott; Vice-President, George F. Richards, of Lynn; Secretary and Treasurer, Vinton W. Mason, of Cambridge. Directors, Lincoln E. Pettee, of East Foxboro; Leander A. Penney, of Somerville; M. T. Mason, of Northampton; F. J. Lenoir, of Greenwood; F. H. Miller, of Hingham, and C. W. H. Condrey, of Fitchburg. The following have been appointed judges: Robert Leslie, Dr. J. S. Howe, F. J. Lenoir, E. K. Dyer, L. E. Pettee, M. T. Mason and Joseph Armstrong.

### AMONG THE MEXICAN TROGLODYTES.

Continued from page 431.

comes now and then to read mass, as these Indians are supposed to be Christians, although they do not vary much in belief from their tribal brethren in the western part of the State. The election of the governor, Francisco Rodriguez, was celebrated the same day that we arrived, and we had the good fortune to be present at the feast and ceremonies of his inauguration. There were more than 200 Tarahumares sitting around the public square, taking in a succulent (?) meal of izquite, roast mice, half-raw venison and tesguino served in gourd dippers. This feast lasted for several hours, and toward dusk the dance commenced. They called their dance matachinas, which is about the same as the rutuburi, changed only by Spanish influences. This dance was more lively than the rutuburi, but I must admit that the latter was more fascinating, possibly because it was brought down from past centuries to the present time. The dance lasted more than two hours, and the whole music consisted of two violins of native make, and, as the Tarahumares are native born musicians, there was scarcely any discord to be noticed.

The Indians continued to drink their tesguino, but I was glad to withdraw to my tent. Next morning, Sunday, I visited the small church and was surprised to see a few good paintings. The Spanish missionaries had great patience and wonderful will power to spread their faith so far away from civilization. They tried their best, but superstition could not be overthrown by the church. In the afternoon the feast continued, and I had the idea to offer a prize for the best shot with a bow and arrow. Young men and old took part in the contest, and the precision of their shooting was really remarkable. The prize consisted of a pair of overalls and a blouse, and was won by Fabustino, son of the new governor. After the shooting match, a great foot race was prepared. Tarahumar means "runner," so anyone can imagine what these Indians are able to do in this line, when even the name, which came down through untold centuries, indicates their superiority in this form of sport. I met there a Tarahumare runner, who, carrying 100 pounds, ran 110 miles in seventy hours. They can run 170 miles at a dog trot without stopping. A young buck can run 600 miles in four or five days, having for food only pinole (toasted corn flour) and water. Their endurance is wonderful, and I can safely claim that they could win any Marathon race, and outdo anyone in cross country distance running. A few days before the races start, the participants go into training. They are not permitted to touch any intoxicating drink, and they must avoid all greasy foods, potatoes, eggs and sweetmeats, as such foods make them too

heavy. A day before the race, they drink warm water, their limbs are massaged by their trainers and bathed in hot water.

There are two parties in each race, distinguished by red and another colored band, worn on the head. The peculiarity of the race is that in running, each racer pushes a small ball, an inch and a half in diameter, made of oak root. This ball must be pushed only with the toes of the right foot. They are very superstitious, and the medicine man tells them that if they touch this ball with the hands, they will go to hell. Only when the ball falls into a creek or a deep gulch are they allowed to take it out and put it on a place where they may continue to roll it with their toes. When everything was ready for the race I attended, the governor stepped forward, made a short speech, and, at a sign, the balls were thrown and the race started.

To describe the whole race would be tedious to the reader, but I was astounded at the endurance manifested by the runners. The field had a circuit of fourteen miles, and the winner made twelve rounds without stopping. During the race the runners did not eat anything, but chewed pinole constantly, while their friends supplied them with water, so that they did not need to stop longer than to take a drink. The runner wears small bells around his belt to keep him awake, in case he should become too tired. They did not run very fast; but they usually make about forty miles in six to eight hours. I saw one fellow run four miles in half an hour. The sun was setting, and the women brought out torches, so that the race might be continued. Many dropped out; but toward eleven o'clock in the evening the race was won by a young Indian about twenty-three years of age. There was great rejoicing in the winning party. During the race the highest excitement prevailed owing to the heavy betting. Everyone had his choice, and the bettors staked everything, clothing, their animals—in fact all their possessions, on the result. The winner does not get any premium, but he makes a great conquest with the women of the tribe, and receives many presents from those who bet on him. The women also have their races,

with this difference; that their rules are not so strict as those of the men, and they usually run shorter distances. It is a beautiful sight to see that the women among the Tarahumares are treated with more respect than in any other Indian tribe.

After the feast I distributed many presents among the Indians, and, to my great regret, was compelled to begin the return trip to Parral. Leaving the Parral to Guadalupe y Calvo road, we turned, upon the suggestion of Pedro Jimenez, to the northwest to investigate some gold mines in the Arroyo de los Bueyes. I never expected to find anything, because the whole formation did not have the appearance of gold-bearing rock, but, to please the Mexican and a few civilized Tarahumares, I decided to spend a few days with them. It was one of the most strenuous rides I had on the entire trip, but finally we arrived at our destination, and put up our tents near a small spring. It was a cold night and I invited Jimenez to sleep with me in the tent, but he refused on the ground that bears were present in large numbers in the neighborhood, and he preferred to stand watch with a few Indians. They built immense fires to keep away the animals, and, being a fatalist, I turned in without bothering my head about the four-footed marauders. They are a sort of black bear which is inoffensive when not attacked. Nothing occurred throughout the night, and next morning I was ready to investigate the so-called gold mine.

To please my companions, I stayed there for one day, cleaned out a small shaft, but, as I expected, nothing was found. Following the Rio de los Bueyes, we went down to the Rio de San Juan, in the Tierra Colorada district, which interested me greatly on account of reports that grizzly bears are to be found there. The reports were true, but it would require too much space to describe our hunt for the big animals. We followed the course of the San Juan River, which was full of all kinds of fish, and finally reached the capital of the district, Balleza. The alcalde (mayor) of the town received me cordially, and, as I had no more use for them I dismissed my faithful Tarahumare runners, who returned to their villages, well paid and laden with presents.

From Balleza I rode down to Los Baños (hot baths) where I met my old friend, Don Pedro Saenz, who tried to induce me to make a second Carlsbad of his hot springs. From here I took my last glance at the Tarahumare country, and, after four hours' ride on horseback, I reached Ojito, the last station on the Parral and Durango Railroad, where I took train for Parral. The four weeks I had spent among the Tarahumares were among the most enjoyable of my life. I had had a good chance to return to nature and to live close to nature. In my estimation, the Tarahumares would make excellent laborers, if handled rightly, and it is a great pity that these sons of the wilderness are too often mercilessly exploited by their Mexican neighbors.

[THE END.]

Good advertising enables one to become wealthy with the aid of the multiplication table—sales being multiplied in proportion to advertising.

## ARE YOU A GUNNER?

*Do you love to follow your good dog over the fields in search of quail or chickens, or to struggle through swamp or along thick grown hillside, expecting to hear the roar of the ruffed grouse or the twitter of the fall woodcock? If so, you should have this new book.*

## AMERICAN GAME BIRD SHOOTING

By *GEORGE BIRD GRINNELL*

This companion volume to "American Duck Shooting" treats of the upland game which American sportsmen shoot over dogs—woodcock, snipe, all the quail, grouse and turkeys.

The first part of the volume is devoted to a description of the various species and their habits—the way in which they live their lives.

The second part of the book is devoted to upland shooting and treats of the methods by which all the upland birds are pursued and taken. The chapter "Aids to Shooting" describes the clothing, guns, and loads and dogs that the gunner may profitably use; while the last section of the book treats of the shooting of the future and the efforts to rear our native quail and grouse in domestication.

The volume is illustrated by colored plates of ruffed grouse and quail, and 48 full page portraits of different game birds and hunting scenes, with a number of cuts in the text.

*Cloth. About 575 pages. Price \$3.50, net. Postage 25 cents.*

This book is of inestimable value. It contains the genuine hunter-naturalist facts given in the most entertaining and interesting style.

FOREST AND STREAM PUBLISHING CO., 127 Franklin St., NEW YORK CITY

**Monkey and Cobra.**

MANY animals exhibit remarkable sagacity when dealing with snakes. Naturalists assure us that an intelligent puppy knows, somehow, that snakes may be venomous, and treats them accordingly. If he attacks a snake, he does it with a series of quick jumps and recoils, and continually jerks his head upward to avoid a possible dart from the serpent.

A horse kills a snake by leaping upon it with all four feet kept together, so that the snake's fangs can find nothing but the horny hoof to strike into. The knowledge of these special tactics is a part of the instinct of all animals.

There is on record an interesting example of how a monkey treats a snake, says Harper's Weekly. In this case the serpent was of the most deadly variety—the cobra. This cobra was coiled up on the ground under a tree. The monkey slowly left his perch in the forks of the tree, and quietly, with great caution, moved downward until he had approached within about two feet of the reptile.

He moved his head from side to side, as if closely inspecting the object before him. Then he took a firmer hold of the tree with one arm and wrapped his tail closely around the trunk.

He reached forth his hand until it was within six or eight inches of the snake, and then quickly withdrew it. The witness who observed this curious scene was for a time in doubt whether the monkey had a realization of the dangerous character of its adversary. The little fellow seemed unknowingly to be playing with death.

The hand of the monkey again moved toward the venomous reptile. It looked as if the monkey was going to seize the snake. The supposition was correct, for suddenly, like a flash of lightning, the monkey grasped the cobra around the neck, close to the head, in such a manner that it could not bite, while the snake's body encircled the monkey's arm.

An extraordinary scene followed. The snake hissed loudly, the monkey chattered and screeched and danced and leaped in frantic delight. He would cease now and then in his wild contortions and seriously examine the snake's head and eyes and protruding tongue. Then he would dance about again.

When he had enough of this sport, he began to rub the head of the serpent on the hard ground, continuing this work for some time, with repeated solemn inspections of the progress of his task. Finally he had rubbed the head of the cobra entirely off. Then with much gleeful chattering, he dropped the writhing body and scampered away to join his companions.

**Arctic Hawk Caught.**

WHEN the steamship Minnesota arrived from the Orient on her last trip, she had on board a strange passenger who took passage in mid-Pacific and was not entered on the purser's list, says the Seattle Times.

A large Arctic hawk, measuring nearly four feet from tip to tip, joined the Minnesota on March 17, south of the Aleutian Islands, followed the wake of the ship many hours and finally alighted on the topmast.

Heavy gales which had swept the Alaskan coast a few days before drove hundreds of small birds to sea, and as these sought refuge in the rigging, they became prey to the great hawk. After feasting all afternoon, the hawk perched on the mainmast, where it prepared to spend the night.

A Japanese boy in the steamer's crew planned otherwise. Equipped with a gunnysack, he mounted the mast and slipped the sack over the bird's head. Capt. Thomas W. Garlick presented the hawk to the Seattle Park Board, which will place it in one of the city parks.

One of the illusions is that the present hour is not the critical, decisive hour. Write it on your heart that every day is the best day in the year.—Emerson.

**BOOKS OF THE OUT-OF-DOORS**

**THE LAND OF FOOTPRINTS**

By Stewart Edward White

Characterized by Col. Roosevelt as the most informing book on Africa ever written.

Stewart Edward White has evidently found the real Africa. He has caught the spirit of the land and portrayed it vividly, a book both interesting and educational.—*The Indianapolis Star. Illustrated. Net, \$1.50.*

**THE MOUNTAINS**

By Stewart Edward White

Some experiences of the author while camping in the Rockies. Besides being an interesting and amusing story, the volume contains a great deal of practical information on camping and woodcraft. A good many woodsmen in embryo will recognize themselves in the Tenderfoot of this book. *Illustrated. Net, \$1.50.*

**CAMP AND TRAIL**

By Stewart Edward White

This is one of the most practical books on camping ever written. The author not only tells what in his experience it is best to take on trips (equipment, "grub," etc.), but tells also where to get them. It is a complete outfitting guide in readable form.

*Illustrated. Net, \$1.25.*

**ADVENTURES IN CONTENTMENT**

By David Grayson

Little adventures in contented country life—so many vignettes of things rustic with the glancing lights and shadow of sunshine and cloud and of tears and laughter.

*Illustrated. Cloth, net, \$1.35. Leather, net, \$1.50.*

**ADVENTURES IN FRIENDSHIP**

By David Grayson

Of which the Outlook says:

"Adventures in Friendship" is to be commended to all those who imagine that the business of life is to make money; who are absorbed in dealing with things and have missed the way of peace and joy; who rush when they ought to loiter, and are in a fury of action when they ought to be meditating—altogether a delightful book.

*Illustrated. Cloth, net, \$1.35. Leather, net, \$1.50.*

**THE BOOK OF WOODCRAFT**

By Ernest Thompson Seton

It might, if the title were not forbidding to the young, more accurately have been called "The Encyclopedia of the Arts and Sciences of Uncivilized Man and How They May be Made Use of by the Civilized." Such is its scope, its nature, and its varied ramifications in all that pertains to the wild.—*Pest, Pittsburgh, Pa. Illustrated. Net, \$1.75.*

**THE FORESTER'S MANUAL**

By Ernest Thompson Seton

"Here is a nature book that no one who goes about with his eyes open in city or woodland can afford to go without. It is what its title denotes—a forester's manual. But it is a good deal more than that, too, as a survey and identification of all the trees of Eastern North America."—*New Orleans American Magazine.*

*Cloth, net, \$1.00. Paper, net, 50 cents.*

**BIRD GUIDE PARTS I AND II**

By Charles K. and Chester A. Reed

Part I—Gives a full yet concise description of every water and game bird.

Part II—Of every land bird east of the Rockies. Over 200 illustrations in full color in each volume.

Part I—*Cloth, net, \$1.00. Leather, net, \$1.25.* Part II—*Cloth, net, 75 cents. Leather, net, \$1.00.*

Parts I and II—Bound in single volume, pocket size, leather, net, \$2.25.

## Salmon Teasing

By G. B. F.

**T**HIS mild-mannered March brings to the mind circles on the surface of the old-time pools where trout used to rise way down in Maine, and some are thinking of April upon the brooks in the lower tier of New Hampshire counties, and about the middle of that month trolling for lake trout will be lively on our large lakes in the central part of the State.

But I have had my salmon rods varnished, fly-books refilled, casting leaders replenished and reels set in order for a seventh season in Newfoundland.

Salmon fishing takes the "edge" off brook trout sport in a measure, and one reason is that trout keep diminishing in size, as well as numbers, and stream fishing with flies is about the only place trout exhibit their full strength and spirit. On small ponds it is the same thing over and over, but in a strong current there is more surprise and variety.

Salmon fishing in Newfoundland in 1912 has been reported a little, but not as fully as usual.

I arrived there on the Codroy River about July 1, after hearing of great success in June. One rod in June took ten fish on one day of an average weight of about ten pounds. This is a good average weight and a remarkable day's success, but the man behind the rod had too much of the record motive, working as though bushels of fish-flesh were the criterion of first-rate sport.

There occasionally comes a day when salmon won't allow flies to crease the water, but this is never to be expected, and an average of two a day is good fishing. In thirty-nine days of fishing I caught but fifty salmon and was thoroughly delighted.

Sometimes you won't get a fish for two or three days, and then, with the drop of the stream after a rain, you may get three to five in a single day. June is the best month on the Grand Codroy for numbers. But after the spring flood is settled down, the fishing comes mainly after rains on the drop of the high water.

Fish of thirty to forty pounds' weight are rarely good "risers" and not very numerous. They seem to have had episodes earlier in life that make them wary and reflective. I got two last year whose combined weight was thirty-six pounds, and one of them was taken after high water on the Little Codroy. He gave me about an hour's constant fighting, and down the stream he led me with great excitement for a quarter of a mile.

It was "rough and tumble" on his part, out and in again, away off on the opposite side tugging down stream and running up, until all tired out he settled among some water grass and quietly awaited the wicked gaff. He was thirty-eight inches long, bright and fresh from the tide, and ought to have tipped twenty-five pounds, had he been fat and thick.

Weight is an uncertain indication of the fighting force of salmon. The time the fish has been up from the sea, the condition of the stream as to coolness and current, the height of water and opportunity to rush about, are the main features that mark the prospect for a lively or unlively event. And the duration of the contest is usually governed by such conditions. However, one had better be expecting a most surprising episode almost any time, even after the fish has appeared to be quite tame or exhausted.

Sometimes you have to cast when it seems as though no fish could see your fly.

One day last season I was out in a perfect gale. The water was blown white into the air, and I was sensible of serious danger of my fly hitting me every cast in the back of my head or neck. The gusts would bring my cast back with a "swish" and away would go the fly on the white caps. All at once I had a big salmon on, and down around the bend he went toward the high waves of the brackish tide. I

jumped into our boat and the wind took us along as fast as the fish ran. It looked as though the wide water was our goal, and that was rough and flying white. But the fish came to a sandy shoal and stopped for breath. Then I wound him back slowly until he was steering for a small bush near the shore. The guide got out, and just before Mr. Salmon was going to take the chance of a turn about that bush, he felt the cold steel of the gaff and came into the boat. We caught three in that gale with just about the same nerve-racking experience.

You never can forget a salmon hooked in a gale. You will watch the cast, your hat just ready to blow off, your coat flying over your shoulders, your waders too short, your rod trying to get away from you, bending with the force of the wind and fish, and when the fish has been saved, you will think you could never do it so well again, but in five minutes you will go at the same hard conditions with renewed assurance.

One day I got a twelve-pounder with every seeming chance of failure. The fly was on a little No. 8 hook. We use sixes and eights mostly, although on that windy day I used a No. 4. The pool was about 200 feet long and twenty feet wide. The fish waltzed up and down and out until he seemed ready to give in, but no, down he went over the fall of two feet into rapid water and stopped in a hole with the line

LITTLE CODROY RIVER.

across a sharp ledge between us. The guide worked the line off with his gaff and the fish started another race down stream into another pocket. We worked him out of that, and then down further he went and played out and across. The guide waded in to end the salmon's troubles, but not a bit of help would the fish accept, but still further through some rough water between the rocks he rushed until he snagged the leader on a stub and rested. The guide again waded in and cleared the leader, and down went the salmon between two rocks where the water ran swiftly, but with a sort of quiet pocket at the bottom. I couldn't feel the motion of the fish at all, and thought he was free. The guide hunted up a long pole, and, after getting out in the water where he could get hold of the leader, announced that the fish was still on. He prodded the pocket until he touched a silvery side, and away it went up stream and down again where we soon brought him to gaff. We found the hook set in some tough grizzly material. You see, that fish had a number of favoring conditions to free himself, but his mistake was in resting when he ought to have been working. It is quite a trick to recognize opportunity and use it. The privilege of fishing for salmon is a royal one, and in twenty-five years, or even less, it is likely to be rare and costly. It is easy to take the 8 o'clock morning train out of Boston via St. John, N. B., and in forty-nine hours be putting your tackle together for salmon on the Little River on the Codroy.

Although an easy journey there, it is hard enough to quit and go home, or to keep away after one trip.

### American Forestry Association.

WASHINGTON, D. C., March 28.—*Editor Forest and Stream:* The directors of the American Forestry Association held their spring meeting on March 25 and 26 at Asheville, N. C., where, in addition to the discussion of the association's forest conservation work, the directors and their guests inspected the Biltmore and the Mount Pisgah forests, through the courtesy of George W. Vanderbilt and his superintendent, C. D. Beadle.

In the evening a public meeting was held at the Langren Hotel and a large number of guests heard addresses on forestry, the progress of forest conservation, the relation of the broad-minded lumberman and forest progress, by Dr. Henry S. Drinker, President of the American Forestry Association; J. E. Rhodes, Manager of the National Lumber Manufacturers' Association; J. S. Holmes, Secretary of the North Carolina Forestry Association; Capt. J. B. White, of St. Louis, one of the leading lumbermen of this country, and ex-President of the National Conservation Congress; John Birkinbine, President of the Pennsylvania Forestry Association; A. B. Farquhar, President of the Pennsylvania Conservation Commission; D. J. T. Rothrock and S. B. Elliott, members of the Pennsylvania State Forestry Reservation Commission, and others.

P. S. RIDSDALE.

FOREST AND STREAM is what it purports to be—the most conspicuous example of a thoroughly dependable sportsman's publication in the United States.

# Pearl Fishing on the Wabash River

By THOMAS M. CISEL

PEARLS are found in fresh waters in many parts of the country. Tennessee, Arkansas, Wisconsin and Illinois all have well developed pearl fisheries along their rivers and lakes, and there are frequent finds of the gems, some of which are equal or superior to the best salt water pearls. The rivers of Illinois lead in the production of pearl-bearing clams. The Wabash, flowing along the eastern boundary of the State, is considered the best field for pearl fishing. These waters are strongly impregnated with limestone, which seemingly is necessary to the development of perfect gems.

To become an expert clam catcher requires not only an outfit of the proper equipment of tools, but the understanding of movement of the clams. Early spring finds the clams at the top of the deep mud deposits where they have spent the winter months safe from the danger of ice. Here they remain until about the first of June, when they leave the mud banks for the rock and gravel shoals.

The mode of fishing depends upon the season or the location of the clams. The mud banks require the use of large heavy iron tongs that are forced down into the mud, the spiked jaws forming a basket of steel that catches and holds almost a bushel of mud, rocks and clams. Once the tongs are forced down and closed, leverage is taken over the boat end to aid in raising the heavy mass. The clams are sorted from the rocks and the refuse is returned to the water. This method is hard work, and is only used in early spring before the clams have reached the surface of the mud fills. Once they have reached the top and are feeding on the slime and river filth, the crowfoot bar is used. This consists of an iron bar eight feet long attached to a net of strong twine. Fastened to the twine are from four to five hundred four-point grab hooks. This

hook-covered net is held on the bottom by the weight of hooks and bars. The fisherman now throws out an anchor. When the anchor is firmly caught, he is enabled to drag the net along the clam beds. Millions of mussels and clams cover the bottom of the river, and when feeding lie with their shells open; the hooks catch in the open shells, causing the clams to quickly close. Once the hook is grasped, the clam will remain until removed by force. Slowly the nets are drawn along the river bottom until most of the hooks are full, when the nets are raised and the clams removed. Eight bushels is considered the average day's catch for one man with the ordinary outfit—boat, drag net, anchor and tongs constitute the water or catching equipment.

The camp equipment consists of a furnace over which is set a large steel tank called a cooking vat. This vat holds several gallons of water which is kept at the boiling point. From the boat the clams are scooped into this tank of boiling water, a tight lid is placed over the tank, and the clams are allowed to steam for several minutes to kill them and make their removal from the shell easier. Care must be taken not to subject them to too great heat, else the pearls they may contain will be ruined. After the clams have been well steamed, they are taken from the vat and placed upon the shelling table. Here the meats are removed from the shells and each is carefully looked over for pearls and slugs. The pearls are usually found in the meat, but sometimes one is found fast to the shell or imbedded in the shell itself. The perfect or high value pearls are few, although almost every clam contains a slug or low grade pearl. The value of a pearl depends upon its color and size. Color is first considered, the round or ball pearl being most desired. Next comes the pear, the double

BOAT, WITH GRAB NET; STEAMING VAT, SHELLING TABLE AND OTHER CAMP TOOLS.

button, the dumb bell and the turtle back. These are the most common forms of what is considered perfect pearls.

Next in the high value class come the freak pearls that from some unknown cause have taken strange forms—perhaps that of a berry, a horn or some other odd shape. One was found near Allendale, Illinois, that was the exact form of a bulldog's head, only the eyes had to be added to make the likeness perfect. This was done by the use of two small seed pearls, thus making a valuable find for the owner. No matter what shape a pearl may be, the form must be perfect to have a high commercial value. The slugs are ill formed pearls and are graded as to their size and shape, the same as the perfect pearls. The small ones are used in the setting of cheap jewelry and are sold by the ounce, bringing from \$2 to \$9 per ounce. High grade slugs are known as spikes, rose buds and apple seeds, and are sold separately and in sets. A set of high grade spikes is a very valuable find, and several months or perhaps years are required to match up a set. The number required will depend upon what is to be made. The lowest set is five, while three hundred have been used in making a necklace. The pearl or slug is found in various colors. Pure white is the most common and is also one of the most desired when of perfect form. Pink is the next most common in all shades from darkest shade to a mere tint. Purple and black are seldom found and usually of little value, as they are given to faulty formation, such as cracks, specks and curds. The blue steel is the only blue pearl formation found and is most

always a valuable find, perfect in form and color. Gold and silver tints are found, but seldom of any valuable size. The gold pearl is one of the most beautiful, but is seldom larger than a buckshot. The rose bud slug, to be of value, must be white or pink. They are in form as an opening rose bud and are valued as ring and pin sets.

The camp life of the pearl fisherman is best seen along the Wabash and its tributaries. From the mouth of the river to the headwaters of its feeders can be found one continued chain of clam fishing camps. From the time the early spring freshets drive the ice from the river until the cold weather again closes his fishing grounds, the surface of the river is covered with boats of clam fishers. Camps are established at the most favorable location, each camp working the section of water nearest their encampment. The home of the clam fisherman is usually a tent or boat, the houseboat being the most suitable and comfortable, as the tent must be placed on the damp overflowed soil of the river bank near the vats and shelling tables, which fill the air with disagreeable odors. The houseboat is anchored in running water, giving ventilation from the open river.

Aside from the catch of slugs and pearls, the season's catch of shells adds much to the profits of the labor. The shells are used in the manufacture of buttons, knife handles and fancy articles of jewelry made from mother of pearl. Shells are sorted and graded, the button shells being known as pig toes, negro heads and mucketts. They are all thick, heavy shells yield-

ing a clear smooth working material that is used in the making of high class buttons. The washboard clam, the largest of fresh water clams, has a shell of extra large size and of various colors ranging from a deep pink, blue and green to a pure white. One shell may contain all these colors or be a pure white. The washboard clam is also found to produce more perfect ball pearls than any other clam. These large fancy colored shells are used in the making of cut pearl articles. Although pearl fishing is a comparatively new industry, thousands of tons of shells are taken from the rivers of Illinois each summer. The river banks are lined with tents and paper shacks of fishermen, while the water is constantly covered with fishing boats, yet the supply of clams seems to be limitless. The yearly catch is constantly growing larger, as more men engage in the business. Grab nets of clam fishermen are bringing to light many relics of by-gone days, such as articles lost in the river from sinking boats and other mishaps, anchors from the steamboats and flatboats of early days. One fisherman found in his net a large silver watch of old-time style, another a heavy set of handcuffs made of brass.

The work of the clam fisherman is also putting out of business the net, set lines and fish traps, so common along the rivers in past years, use of the drag net making it useless to set out lines or nets, as they become entangled and are dragged from their anchors. This has prevented the catching of fish by these methods, and the streams are becoming well stocked with the native fish.

## Inside Route to Maine

By JOHN D. SCHMIDT AND "COMPANY."

THE completion of a four-year engineering course in three made the last a more or less strenuous year. Before being loose into the cold world we decided to spend the summer in some sort of outdoor life. The inside route from New York to Maine by canoes was chosen.

Now, in the course of college events it many times happens that one's collection of wherewithal approaches a minimum, and we were not an exception. Therefore strict economy was practiced in the selection of outfit and throughout the trip. Careful perusal of maps led us to accept this course, which briefly is as follows: Starting from New York city, up the Hudson to Troy; through the Barge Canal into Lake Champlain; down the Richelieu and St. Lawrence rivers to Quebec; thence up the Chaudier to its source; next a twelve-mile portage over the height of land into Maine, thus reaching the Moose River; down this stream, passing through Moosehead Lake into the Kennebec River and down to Bath, the home of one of us.

The party consisted of four—Fat, Spider, Van and Unc. The expedition recognized no leader, the majority ruling, and in case of tie, the longest and loudest thunder. Fat, in absent-minded moments, had sometimes concocted a

passable rarebit, which, of course, made him the cook. Spider, in coincidence with his ability as a story teller, could graphically describe certain German dishes that his aunt cooked, and therefore was commissioned as assistant, which rendered him very serviceable as chief dish-wrestler. The rest of the crew were to make camp and collect fuel. Van kept the log. Unc, being about a good sized infinitesimal in stature, had to be banker, chief economizer, steward and official photographer. The fact that only one had had any experience in canoeing made the anticipation amusingly interesting, and the selection of the outfit brought forward many theories as to what were essentials. Save a little superfluous clothing, nothing could have been eliminated, knowing that it was merely an outing, and that we never were to use guides for heavy work. We purchased two eighteen-foot White Guide Special canoes, yclept "Hoh" and "Woj." When loaded with one hundred pounds they could bear one man sitting on a gunwale. For the bow man we rigged a suspended cane seat. Four paddles were of maple and two of spruce, all untipped. The latter are still in good condition, after having been used continuously, besides often doing service as setting poles. The rest of the outfit went into five watertight bags—tent, blankets,

grub, dishes and clothing. The tent was flyless and waterproofed with paraffine. Each had an army blanket and poncho. A set of tinned dishes telescoped into a cube of fourteen inches. The clothing bag also contained a camera, medicine, repair kit, maps and lantern. Authorities prohibit a lantern, but ours was cheap, substantial, folding, and candle-burning, with mica faces. It was very useful, especially for pinochle. No firearms were carried.

At the last moment the plans were wisely changed, that a twenty-five foot launch might be taken to Lake Champlain, wherein we avoided paddling against the Hudson in an untoughened condition, and also obtaining a diversity of experiences. The start was made on June 14, 1908. Up the Hudson and through the Barge Canal was uneventful, excepting the piping hot sun and some twenty odd locks to pass. Fortunately we had no "tire troubles," so made good time. At Fort Ticonderoga we left the boat, trucking the canoes two miles to Lake George. The next day we paddled up the lake thirty miles against a headwind to Ivanhoe Island, where we spent a rare week of loafing, a friend having kindly given us the use of a cottage.

The return to "Tye" was a little delayed, as we wished to make it a regatta day. A strong

southern breeze finally came. That morning Fat and Unc really turned out early to sneak down to the "Hoh" and grease its bottom, for it was agreed that the winners of the race to "Tye" would be excused from all labor for a week. Each crew improvised a poncho as a square rigged sail. The crew of the "Woj" smelt the grease, so polished their canoe similarly. Amid the cheers of the assembled campers the start was made. The "Woj" forged ahead, being lighter laden. The longheads of the "Hoh" had previously arranged a corner on the other two ponchos, so made haste to execute their coup d'etat by using all three ponchos. Quite needless to say, they were guests for a week.

Resuming the launch "Katy D." we continued our run up Lake Champlain, where we were caught in a storm. Had we no canoes in tow, we would have been quite safe, but they were soon a-wash, so that we had to beach the whole thing. At Port Kent we made a pilgrimage four miles inland in the blazing sun, expecting to see the wonderful Ausable Chasm. Around the principal part of the chasm is a high board fence of the old county fair ground brand, the inside of which to see a nominal fee of two dollars is charged. About this point we were uninformed. An eight-mile tramp on a dusty road and not to see the show would never have satisfied us, so over the fence we went. Seeing all there was, we started to walk out the main gate, and, being questioned for tickets, a new Marathon record was established back to the canoes.

The canoe trip now began in reality, having delivered the motor boat to its owner at Port Kent. Endeavoring to make Plattsburg on schedule time, we started in another Champlain storm, this time enjoying the Hawaiian Islanders' sport of riding the crest of a wave. We entered the Richelieu and hurried on into the Province of Quebec, where we found only French-speaking people. Our combined knowledge was put into play at an auction of household wares. We "swap for swapped," quoting the Canuck, our hatchet for an ax. At the same place we inspected a crude wind-mill nearly two hundred years old and still used for grinding corn.

The broad, clear waters of the St. Lawrence were a contrast to the muddy Richelieu as we entered the former at Sorel. Hearing of the tercentennial celebration at Quebec only two days ahead, we decided to spurt for the event. We did one hundred and two miles in two days, getting within fifteen miles of Quebec when the tide (nineteen-foot rise) turned against us. The ambitions of the crew spruced up in so far as was possible with only a woolen shirt, khaki trousers, moccasins, and no hats, then walked inland three miles, catching a train to the city, where the spectacle of the Plains of Abraham was witnessed. At daybreak we reached camp in a somewhat tired condition. We rolled into blankets for an all-day snooze, but were frequently disturbed by Italians shouting, "Blaa! Bloor!" which caused a scramble for the lee side of a tree in order to avoid flying pieces of rock blasted by a railroad construction gang. The following day down to Quebec, where the Prince of Wales assisted us in the review of the assembled warships of many nations.

# NATURAL HISTORY

## The Weeks-McLean Bill and What it Means

**N**OW that the Weeks-McLean bill, giving Federal protection to migratory birds, which was characterized on the floor of the House as "the most radical legislation ever proposed in this country," has become a law, the American Game Protective and Propagation Association, which engineered the passage of the measure, is being swamped with inquiries as to how and when it will be put into effect. In answer to these, the following statement has just been issued:

"An amendment to the Weeks-McLean bill, which was made just before final passage, makes mandatory the adoption by the Department of Agriculture of suitable regulations prescribing closed seasons, having due regard for zones of temperature, breeding habits, and times and lines of migratory flight. The bill provides that when these regulations are prepared they shall be made public, and that a period of three months shall be allowed before final adoption, in order that they may be examined and considered, and that public hearings may be granted if this is deemed advisable.

"At the present time it is impossible to say how much time will be required to draw up these regulations. The matter will be entrusted to the Biological Survey, which is a bureau of the Department of Agriculture, and while much of the requisite data has already been collected in connection with the Survey's other activities, it will at least be necessary to compile available information on migrations and breeding habits in different sections of the country, and co-ordinate it with the proposed regulations in view. It may be found advisable to make more exhaustive investigations of these problems to supplement those which have been carried out for other purposes. In any case, it will be impossible for the new law to take effect in time to protect the birds during the breeding season which is at hand, and unless unforeseen difficulties arise, it will unquestionably be in operation before the migrations of 1914.

"The regulations imposed will prohibit absolutely the killing of those song and insectivorous birds whose value to agriculture greatly outweighs their food value. Notable members of this class are robins, blackbirds and bobolinks. In a general way it is safe to say that migratory game birds such as ducks, geese, swans and shore birds will be protected from the time they mate in the spring until their young are full grown. As these birds mate earlier in some parts of the United States than in others, hard and fast rules governing open and closed seasons cannot be made for the whole country, but zones will have to be created and shooting seasons determined in accordance with conditions in each zone. Additional protection in certain zones, or for the whole country, will probably be given to some species which are now threatened with extinction, until they have increased beyond the

danger point. Likely candidates for this special consideration are the woodcock, in many localities the woodduck, trumpeter swan, whooping and sandhill cranes and many varieties of shore birds.

"An important provision in the bill which should not be lost sight of says: 'That nothing herein contained shall be deemed to affect or interfere with the local laws of the States and Territories for the protection of non-migratory game or other birds resident and breeding within their borders, nor to prevent the States and Territories from enacting laws and regulations

will remedy a great injustice which is at present suffered by sportsmen in States which have adequate game laws through the fact that gunners in neighboring States have greater opportunities to shoot, and, therefore, get more than their rightful share of birds.

"The details connected with the enforcement of the Weeks-McLean law are yet to be perfected, but the State authorities will probably take the most active part in making it effective, as in the case of the Lacey act. The latter is a Federal statute which prohibits traffic in game under the interstate commerce clause, in States

Senator (formerly Congressman) Weeks of Massachusetts.

Senator McLean, of Connecticut.

### FRAMERS OF THE WEEKS-McLEAN LAW FOR FEDERAL PROTECTION OF MIGRATORY BIRDS.

to promote and render efficient the regulations of the Department of Agriculture provided under this statute.' As most States already have laws which will fulfill the requirements of the Federal law, no new restrictions will be placed on their citizens, unless in the matter of better enforcement, and as the laws were made to be enforced, there can be no logical objection to this. In the fight to secure this legislation it was plainly shown that the better sentiment in those States, which now allow spring shooting and the slaughter of song birds, is decidedly against these practices, and it was made evident that all real sportsmen and all thinking people will welcome Federal action to put a stop to them where it has been impossible to secure State action. Besides gratifying such people, the new measure

where it is unlawful to sell it. When this act was under discussion its adversaries maintained that a large and expensive force would be necessary to make it effective, but experience has proved that a very small appropriation was needed, as the local wardens were glad to enforce it. The same will be true of the legislation just passed. The appropriation of \$10,000, which it carried, will prove sufficient for immediate needs, and considering the importance of the law and the money it will save the country, there is no doubt that Congress will increase the appropriation when necessary.

"Besides the one already mentioned, another amendment was made just before the bill became a law. This was to satisfy constitutional objections, and it provides that the imposition of

finer or imprisonment for violation of the act shall be in the discretion of the court instead of the Department of Agriculture. In this connection it is gratifying to note that one of the most able lawyers in the country expressed the opinion that the Supreme Court would sustain the Weeks-McLean law when he heard the decision it has just made in favor of the constitutionality of the white slave law which was passed in July, 1910.

"Now that the principle of Federal protection of migrants has been recognized; it should logically be extended to international protection. Senator Root has introduced a resolution requesting the President to propose to other North American countries the negotiation of treaties for the mutual protection of migratory birds. Senators Weeks and McLean are in favor of this proposal, and will prove powerful allies in getting it through. The National Association has already commenced to lay plans with every hope that the same protection will be given to our migrants when they are beyond our borders that we have just accorded them while they are with us."

### A Snake Story.

PENDLETON, Ore., March 25.—*Editor Forest and Stream:* The following incident, which came under my observation several years ago, may be of interest to your readers.

There are one or two questions in connection with it which I have never been able to satisfactorily answer, and I would like to hear from any reader who can explain the problems which this "snake story" brings out.

Walking along a railway line, where it runs parallel to the Umatilla River at a point where the railroad and river were very near together, and the river ran about fifteen feet below the road bed, my attention was attracted by the flash of some creature which sprang down the almost vertical bluff from a narrow ledge about half way between the railroad and the bottom of the bluff.

I stopped abruptly and fixed my gaze in the direction of the ledge from which I had seen the movement in wonderment as to what it could have been.

As soon as I stopped I heard the "buzz" of a rattlesnake, and soon discovered the serpent coiled up on the narrow ledge from which I had seen the flash of the fleeing creature.

Within a few seconds, and while I was debating with myself as to how I should get within reach of his snakeship in order to "mimloose" him, a cottontail rabbit came scrambling up a rough path which led from the ledge diagonally down to the river bottom.

Without apparently seeing me or the rattler either, molly cottontail deliberately approached within a foot or so of the snake, which latter immediately drew back its head and struck the rabbit violently. The rabbit gave no sign that it felt the blow, nor did it show any alarm or make any move to escape, which it might have done had it so wished. It simply sat there gazing vacantly into space (not at the snake) while the latter coiled and struck it over and over again.

Finally the repeated coiling and striking of the rattler caused it to change its position on the ledge, and at last, as it struck again, the move-

ment caused the snake to slip off the ledge and roll to the bottom of the bluff.

As soon as this occurred, the rabbit hopped back down the path, up which it had come, and I saw neither snake nor rabbit again.

Now the questions which I wish to have answered are these: What impelled that rabbit to approach the snake? If it had been "charmed" in the first instance, my approach evidently broke the "charm," for what I first saw was probably that same rabbit as it fled when I came in sight as I walked along the track. Again: What was the probable effect on the rabbit of the blows which the snake struck? Did the snake probably poison it, in which event it would soon die, and in that event would the snake seek its victim and if found consume it for food?

C. K. CRANSTON,  
Chairman F. & G. Com., Oregon.

### Muskrat Trapping.

BY PHILIP S. FARNHAM.

THE muskrat has become one of our most valuable fur-bearing animals, and is the source of a large revenue to many people in this country.

One fur buyer in the East purchased nearly \$70,000 worth of fur last season, and he tells me quite the largest number of pelts were those of the muskrat. But there is great danger of this valuable animal being exterminated on account of the manner in which it is being taken.

Only during the past few years have laws protecting fur-bearing animals been in force in New York State, and these laws are not yet strict enough. It is not so much for sentimental reasons that I advocate better protection for the muskrat, but more for the protection of a valuable industry.

The wasteful methods which have been employed in taking these animals are the destruction of whole families during the summer, taking them too early in the fall before pelts are prime, destroying their houses and digging out burrows; taking them too late in the spring after breeding has begun, and shooting them during high flood time when they are driven out of their burrows. This last is very wasteful, as the poor little fellows have no place to hide, and the shooting destroys the value of the pelts to a great extent.

As a boy I shall never forget my muskrat trapping experiences, and how proud I was when I purchased a suit of clothes with money obtained from the sale of fur which I had caught myself. I always caught rats with steel traps, and of course met with the same experience all trappers have met with in losing many by having them gnaw off a leg and get away.

I have caught rats that had lost three legs in this way, and I cannot help thinking of the great suffering that these little animals have had to go through in an effort to preserve their lives.

Recently in going along the Owego Creek I saw a muskrat upon the bank that was evidently in trouble. Thinking, of course, that he was in a trap, I crossed the creek with the intention of hitting him over the head and putting him out of his misery. I was very much surprised to see him fall over and die just before I reached the spot. Upon investigation I found that he had been in a trap and had eaten off a

leg in order to get away. The bone had been badly splintered and blood poisoning had set in which had caused his death.

The steel trap at best is a murderous thing, but I learned that in trapping muskrats much of the cruelty and the loss of many fine pelts could be avoided by drowning the rats. This can easily be done if the traps are properly set.

For the benefit of the boys who have not had the experience I will explain how this can be done.

Select a place to set the trap where there is sufficient water to drown a rat, preferably along a bluff bank or upon a point which extends out into the water where a rat would be apt to look for food. Here tear off some of the earth and make a foundation upon which to place the trap. Set the trap under the water about four inches and fasten the chain out in the water as far as possible by driving a stake through the ring. Bait the trap with a piece of sweet apple or parsnip, suspended by a string over the trap high enough so that the rat will have to stand on his hind legs to reach it, and in such a position that the trap will be the most convenient place for him to stand. A muskrat will scent this bait for a long distance and will swim over the trap with his front feet and not touch it. He will then raise upon his hind legs and in his efforts to get the swinging bait will step into the trap which will clamp on to the hind leg well up to the body. Then as the chain will not permit his going upon the bank, he will drop off into deep water and soon drown. If this method is practiced, many fine pelts will be saved and much of the suffering to the captive will be avoided.

After skinning the rat, save the carcass. If you do not care to eat it yourself, remember it will make an excellent bait for your skunk or mink traps or fine meat for the chickens.

No real sportsman will set traps in a muskrat house or burrow.

### Alabama Notes.

FOLLOWING is a circular letter from the Alabama Game and Fish Commissioner to the county wardens:

MONTGOMERY, Ala., April 5.—*My dear Sir:* The hunting season is now over, the time when birds and game, native to Alabama, can be legally shot is ended. Therefore, be especially on guard to the end that the protected wild life of the State be not molested during the forthcoming mating, nesting and breeding season.

A desire to fish will soon be in the blood of all lovers of angling. An overwhelming majority of people of this State favor the taking of fish only by legal means, hence those who persist in using illicit devices in depleting our waters of fish should be apprehended at all hazards and promptly convicted.

In order that the highest benefits may be derived under our conservation statutes, you are directed as follows:

First—Investigate every violation committed in your presence or brought to your attention.

Second—If convinced that the law has been violated and the evidence points to a certain individual as being the guilty party, proceed to swear out a warrant immediately before a justice of the peace and have the defendant bound over to await the action of the grand jury, pro-

vided there is no county court in your county that has jurisdiction of misdemeanors, in which event instigate prosecutions in the county court.

Third—Place on your docket all cases investigated by you and make entries of all your official acts in connection with such cases.

Fourth—Be present, without fail, when the grand juries of your county are organized, and present to the solicitor, in writing, a list of all violations of which you are cognizant, together with the names of the witnesses who can give competent testimony against the alleged violators of the game and fish laws.

Fifth—Keep in close and constant touch with your deputies and have them meet you on stated occasions at the county seat for the purpose of discussing with you and reporting to you any infractions of which they are aware, and with a view of formulating plans for compelling a strict observance of the law.

Sixth—Fail not to let me have your report on the first day of each month, whether anything of interest occurs in your county or not, and communicate with me as often as you are in need of advice and whenever a prosecution is instigated or a conviction secured.

Seventh—Urge the teachers of your county to celebrate Bird Day in the public schools, which this year falls on the 5th of May.

Your active co-operation will result not only in preserving the game and fish of Alabama, but in educating the people up to a point where their natural resources, belonging to them in their sovereign capacity, will be better appreciated, consequently better protected.

JOHN H. WALLACE, JR.,  
Commissioner.

### About Sprigtail Ducks.

PHILADELPHIA, Pa., March 23.—*Editor Forest and Stream:* While tramping some Delaware River meadows one day last week, I happened upon the body of a hen sprigtail duck lying in the grass near a ditch, which had been the cause of my stopping long enough to wonder whether it was too deep for my long boots. I picked the bird up by one wing, and noted the flesh only next to the ground had been eaten, apparently by mice, the rest of the body being undisturbed, and that the color of the meat showed it had died very recently. Being within half a mile of the river, I concluded the bird, after being shot, had flown thus far before succumbing, and dropped the rather "odorous" corpse into the grass. Just then my eye caught sight of a drake of the same species, crouched within five feet of the dead hen. I promptly got down on one knee, and quietly reaching out, grasped the live duck firmly across the back. He made practically no resistance as I gathered him in, placing his legs between my fingers and pressing his body to my side to prevent possible struggles. I carried the bird thus for perhaps a quarter of a mile to show the "find" to my companions. On my way to join them I carefully noted the perfect condition of his plumage—not a feather seemed out of place in that most beautiful coat, and barring his being very thin in body, I concluded he was unharmed. After joining my friends I satisfied myself the bird's wings were unbroken, and then took him to the edge of a broad ditch, where I gently placed him in the water and released him. He swam away rapidly for a dozen yards, then

A RARA AVIS.

THIS bird, believed to be a monkey-faced owl, sprang out of the shadows of an abandoned pavilion in Werner's Park, near Baltimore, Md., and furiously attacked Charles Werner. Before Mr. Werner beat it into subjection, it lacerated his face and tore his hands severely. For days afterward it was caged and fed ravenously on birds and mice, which it devoured whole. A broken blood vessel caused its death.

The bird was only about a foot in height, but its wings measured four feet from tip to tip. When angered, it whimpered and screamed like a spoiled baby, and was exceedingly vicious. Its face curiously resembled a monkey, and by a queer arrangement of black feathers about the bill, infernal mustachios were so well represented that the result was a feathered Simian Mephisto.

by means of his wings and feet, skittered for thirty more, stopped a moment, and dove out of sight. The only influence we could draw was that this duck had flown from the river with his stricken mate to remain by her, probably until his own demise by starvation had taken place.

Whether he has since found his way back to her body may probably never be known. My hope was that his experience with me might give him a "new thought" for his own welfare. However, as a sermon on the subject of spring shooting, it carries a lesson that seems worth while, so I pass it along.

SCOLOPAN.

### Dwarf or Midget Owl.

VERDI, Nev., March 6.—*Editor Forest and Stream:* Some weeks ago I read of the dwarf or midget owl of the Northwest. The writer seemed to think they were very rare. I have been somewhat familiar with the little fellow for twenty-five years. Two days ago (March 4) one visited my front yard, where it perched on a limb. While I looked, it suddenly darted down into the next yard where are some rabbit pens, and returned with a mouse, which it carried to a pine tree nearby. In the short hour which I watched it, it caught four mice. It remained all day. How many more it caught I do not know. I came close to it (about twelve feet) and have since regretted that I did not photograph it, as I could easily have done.

To-night, coming home, I found one by the

road where some fool with a gun had left it dead. I think if I had seen the one who did it he would have found it a very unhealthy locality. They all ought to be protected. I have seen them feed upon wasps, mice, frogs and grasshoppers. They are very small; much smaller than a robin. Wish I could send the little fellow on the table as I write. He weighs two ounces. Some bird, what?

S. M. WILEY.

### Fifty Common Birds.

THE State Department of Agriculture has issued, through the Bureau of Biological Survey, of which Henry W. Henshaw is chief, a Farmer's Bulletin of very great interest to agriculturists and to sportsmen.

The pamphlet of thirty-one pages deals with fifty common birds of farm and orchard, giving a colored figure of each, describing the species, giving its range, and something about its habits. In the case of each species, it is indicated whether the bird is useful or injurious, and the pamphlet is, therefore, a compendium of common bird knowledge which every farmer ought to have at hand. The colored plates are drawn by Mr. Fuertes, which means that they are done by our best bird painter, and are extraordinarily true to nature.

We advise our readers to write to the Department of Agriculture for a copy of Farmer's Bulletin No. 513. It is not only extraordinarily useful, but a very beautiful publication.

## Florida Report.

RICHMOND, Va., March 21.—*Editor Forest and Stream:* Thinking, perhaps, that the following information may be of some service to you in advising other sportsmen, I submit a report in brief on a six weeks' shooting and fishing trip in Florida:

The first stop I made after leaving Jacksonville, was at New Smyrna, Fla., on the Florida East Coast R. R. Here we were unable to procure a guide for the fresh-water fishing and the shooting. There seems to be only one guide in the town, and at that time he was away in the interior with a camping party on Lake Ashby. This guide's last name is Sams, being the brother of the man who runs the Ocean Hotel. We were told by Mr. Sams of the hotel that the salt water fishing was poor in that immediate locality, and that there was no duck shooting allowed within the limit of twelve miles down the coast, said territory being a Government preserve. He reported further that the bass fishing was good in Lake Ashby, and that both quail and turkey could be obtained in the Lake Ashby district, but only by going some fifteen to twenty miles by wagon and camping out. He suggested that we go direct to Allenhurst, Fla., which is reached as follows: New Smyrna to Titusville via Florida East Coast R. R., Titusville to Allenhurst via small mail boat which leaves Titusville wharf every day at 4 P. M. Allenhurst is situated on the peninsula running south between North Indian River and South Indian River, or as is locally known, between Mosquito Lagoon and Indian River proper. It is on the Haulover Canal which connects Mosquito Lagoon with the Indian River.

Allenhurst is a place of some fifty inhabitants and has one general store and postoffice and a small hotel, run by the Indian River Co., M. S. Rowley, Manager. We found the Allenhurst Hotel entirely satisfactory—the rooms clean, the beds comfortable, water good, the management kind, considerate, and catering almost exclusively to sportsmen. We obtained special rates of \$14 per week each. The hotel provides rowboats for nearby fishing free of charge, bait free of charge, launch and guide for duck shooting 75 cents per hour. We found good duck shooting and fair snipe and shore bird shooting. All the fishing from Allenhurst is in salt water—very good trout and sheepshead fishing—and residents report excellent channel bass fishing in spring.

I would advise sportsmen to engage for their guide a man named Crooks, who hunts and fishes for a living, when not guiding. He is reported to be the best guide in that locality. The guides furnished by the hotel are employed in other capacities and do not claim to know the favorable places as well as Crooks.

We found the climate delightful and healthy and the surroundings all that could be desired. We spent two weeks at this place. From Allenhurst we went by mail boat to Titusville, thence

via Florida East Coast R. R. to Miami. We found excellent sea fishing, the catches brought in containing amberjack, grouper, kingfish, barracuda and mackerel. We got no tarpon, as they were not running in February. Seagoing launches cost \$20 to \$25 per day, the sportsmen furnishing food for the crew. From Miami we went north again via Florida East Coast R. R., getting off at Titusville, thence via branch line to Sanford at the head of the navigation on the St. Johns River, stopping at the Sanford House, rate \$2.50 per day to a sportsman; guides at this place hard to procure. We obtained a boatman who knew but little of the fishing grounds, but even with this to contend with, we secured good catches of large-mouth bass and crappie. The angler who cares for crappie fishing can gorge himself among the lily pads within two miles of Sanford. The bass fishing I would call fair only for Florida. The best bass fishing out of Sanford is obtained by taking a launch up the St. Johns some fifteen miles to the mouth of the Wekiwa River, thence up this river to its headwaters at Wekiwa Springs.

The Wekiwa River is in most places very beautiful, and on the upper reaches a typical stream for fly- and bait-casting, the water being very clear, swift and cold for Florida. I had excellent sport fishing down six miles from Wekiwa Springs in this territory entirely with a fly-rod and thinly shaved pork rind in lieu of a fly. It is true that the bass in the upper reaches of this river are smaller than those lower down, and the fishing resembles more brook fishing for trout than bass fishing. It is the only stream of its character that we discovered or heard of in Florida. Exceptionally large bass were taken by another angler just at the mouth of this river.

Wekiwa Springs can be reached also via Seaboard R. R. to Apoka, thence by team to Wekiwa Springs Hotel, which is merely a bungalow kept by a man named Osbern. We attempted no shooting around Wekiwa Springs, but from what I can learn, I believe it is one of the best places in Florida. In going down the River I saw two deer drinking. I should certainly advise a trial for quail, turkeys, deer, bear and wildcats in this district. Rates at Wekiwa Springs Hotel are \$2 per day. The hotel is satisfactory in every way and caters especially to sportsmen. It is a most delightful spot and I don't think it can be beaten for all-round sport.

Our next stop was at Lakeview Hotel, Leesburg, Lake county. Hotel accommodations good, management considerate, special attention given to sportsmen, live bait plentiful. One excellent guide from hotel, a colored man, named Milton Johnson, who has a small launch for fishing in Lake Griffin. Rates at hotel, \$18 per week; bait 50 cents per dozen; launch with guide, included, \$3 per day; launch with guide, included, on Lake Harris, \$4 to \$6 per day. On Lake Griffin I got my best fishing, securing some excellent strings even in unfavorable weather. The bass in Lake Griffin and up into the mouth of the Oklawaha River run as big, I believe, as anywhere in the

world. I saw one string of ten bass, the largest weighing twelve pounds and the smallest four and a half pounds. There is a limit in Lake county of ten bass per rod per day.

We had but poor success at Leesburg with trolling and artificial bait-casting. I believe the bass will rise to artificial bait of several kinds in the late spring or early summer, but for February or March there is no use trying anything but live bait, shiners in preference. I regret to state that fish in Lake county are not protected during their spawning season, but the game reforms in Lake county far surpass those in any other county we visited, the quail bag limit being fifteen per day per gun, and nets of all kinds are prohibited in the lakes. In several counties we found the game fish being taken by hundreds and towers built in the water from which the local fishermen shot the fish with rifles and heavy buckshot. The quail shooting around Leesburg is good, guides, teams and dogs easily procured, duck shooting poor, alligators seen frequently.

I have gone somewhat into detail and trust that you will pardon the length of this report.

W. P. PATTERSON.

## Immense Slaughter of Wildfowl.

MORE wild ducks have been shot in Iowa during the past two weeks than in many seasons previous. Northerly gales and cold waves have twice arrested the northerly migration of wildfowl and driven them southward, and wherever there has been open water, the hunters have been able to kill them with ease. Assuming the average number shot in each county during the past two weeks to be 500, a conservative estimate, 50,000 ducks have been slaughtered in Iowa this spring. If permitted to pass on to the breeding grounds unmolested, these birds and their progeny would have furnished fine sport next fall.—Waterloo Evening Courier.

## Regulations Regarding Camp-Fires on New York State Lands.

EVERY person who starts a camp or other fire upon, or in the vicinity of forest or woodland, for cooking, obtaining warmth or any industrial purpose, shall, before lighting the same, clear the ground of all branches, brush wood, dry leaves or other combustible material within a radius of ten feet from the fire, and shall carefully extinguish the fire before quitting the place.

Every person who shall use other than incombustible gunwads or carry a naked torch, firebrand, or exposed light in or near forest or woodland, or who, in the vicinity of such land, shall throw or drop into combustible material, any burning match, ashes or pipe, lighted cigar or cigarette, or any burning substance, and who fails to immediately extinguish the same, is guilty of a misdemeanor.

## Tanning Skins.

LAS ANIMAS, Colo., April 2.—*Editor Forest and Stream:* Edward A. Eames, of Buffalo, N. Y., asks for a formula for tanning. The following is the method most used by trappers and Indians, and one which leaves the skin in the most perfect condition. It is more applicable to light weight skins, although the Indians used it in tanning buffalo robes. The brains of any animal will tan its hide, but the fact should not be lost sight of that it is the elbow grease used in pulling the skin after the brains are rubbed in that is of the most efficiency. I have used raw sheep skins, wolf hides, mountain lion hides and numerous other skins under my bed until they were as soft and pliable as they could be made by any method of tanning.

With the formula inclosed, I have tanned a wolf skin (done the pulling) in an evening while gossiping with the boys. Beaver, badger and an old otter being thicker and containing more glue are more difficult to work soft, and unless one wishes to put considerable extra work on them, should not be tanned by this method.

### FORMULA.

Stretch and salt the skin and let it dry. When dry, moisten the flesh side, double it flesh side in, roll tightly and let it lie, until pliable. Place on a smooth board held in the lap and with a sharp knife remove all flesh, fat, etc.

Take the brains of a beef and thoroughly clean them. One set of beef brains will tan two wolf hides. Place them in cold water with a little salt for twelve hours. Place the hide on a board and apply the brains, rubbing them in thoroughly. Roll the hide flesh side in and let lie twenty-four hours, then take the hide over the knee and pull it from you until dry.

The squaws were in the habit of holding the brains in their mouth and chewing them as they used them. This is not necessary, but I have no doubt but that it adds to their efficacy.

F. T. WEBBER.

## Floods and Felled Forests.

WALTER C. TAYLOR, of Brookline, Mass., writes to the *New York Times*:

The tide of flood nonsense is rising faster than the waters did in the recent mid-West disaster. Why is it that some of the most remarkable floods occur in West Virginia and Kentucky, in regions which are barely one-fourth denuded of the trees and underbrush?

Take the case of the Ohio flood of 1832, when Ohio was 95 per cent. first growth forest?

Do we expect farmers to give up cultivating lands which are worth from \$50 to \$150 an acre and plant trees to secure an imaginary guard against floods which hit them about once in a life time? Against such a visitation as that of last month, no human power can guard, any more than against a tidal wave or an earthquake.

## New Tariff Protects Birds.

BIRD protection societies in the United States will score a strong point under one provision of the new tariff bill. The measure will prohibit all importation of aigrettes, egret feathers, osprey plumes and feathers of wild birds, except for scientific or educational purposes. Ostrich plumes and feathers of domestic birds will be exempt.

# Something About Bait-Casting

By ROBERT PAGE LINCOLN

I DO not pose as an authority on bass fishing and bait-casting particularly, nor do I come out with brilliant stories of catches I have made; neither do I confine myself to the use of the artificial bait, and I do not scorn, when the situation demands, to use worms, helgramite or any other earth beings. I do not fish from the opening of the season till June alone. I find that the best bass fishing on the calendar is to be had from the end of June till the cold weather sets in. We have listened to the words of the immortal bait-casters; we have placed them way up in the empyrean, and we have taken their word for granted. There seems very little more to be said, and if we have anything else to say, we say it with bated breath, awaiting the moment when death shall visit upon us.

I have spent years on the water fishing for the pugnacious bass, and the more I have fished, the more I have found out—one point in special—and that is that you will never know the bass and his queer notions. What he will take this day it is hard to use with effect the next, when another bait will be just the thing, or it may be that the fish will not strike at all. One day they will bite with avidity and the next it is all off; it sets the mind to wondering, and therefore it is that I have said somewhere in one of my articles to the American outdoor press that you will not know and appreciate the habits of the black bass in one year nor in ten.

Now I have fished and I have fished hard. I admit I am a crank in everything concerned with the out-of-doors. For years the needle of my compass has covered black bass fishing, and I have followed it up with care and consideration. I have renounced ambition and have let personal advancement go hang that I might take just one more little trip, just one more fling into the pockets, one more toss into the pads, and I have been rewarded. But, as I say, I have no brilliant catches to hand out to you. My success has been measured in hard work and a lot of it.

There are times when I have pursued the sport from the time the sun slips up from the region of night in the east until it crept into the lids of night in the west. After that I have gone out with the moonlight baits, but I cannot say that my success has been phenomenal. The trouble with so many of these men who pose as authorities (and I say it without malice aforethought) is that they will never admit their hours of ill-luck, but will always paint their success in glowing colors. This has always been hard on me, for I appreciate the fact that I have brothers along the line. I have hunted in vain, however, for those hours of ill-luck, narrated in the course of their stories. If I should find them my hope would be greater and I would know that I am not alone with

my hours of ill-luck. I have used practically all of the artificial baits on the market and have had success with them. I have caught ten bass of good size in an afternoon with a Coaxer, and then again I have used a Coaxer all day and have had little or nothing to show for my day's work of pleasure. It revolves then on the fact that bass are queer creatures, now bright and alert, now sulking and indifferent, changing by the hour—but there is always the chance that the coming moment may bring success.

In the question of artificial baits, we have a beautiful one for speculation. In some of the wild Minnesota lakes, where no human beings seem to have transgressed, I have caught bass quite easily with the artificials, and coming right down to the heart of civilization, in the lakes near the haunts of man, I have had no luck. Proving that the artificials are of little or no use in much fished waters, except in rare cases, in wild waters they will keep the fisherman busy. Artificial baits have been condemned by the humanitarians as being unsportsmanlike, as a procedure not worthy of one holding superior notions and looking at the pastime from the angle of art. Well, I don't know about that. If you think stabbing a frog through the head with a hook and plunking it around until it is dead is more sportsmanlike than using the artificial, all well and good. It is for yourself to decide. For my part, I am impartial. I use the bait I think will get the most fish for that day. I find out in the early morning hours what bait the bass are taking best that day, and then gauge my proceedings accordingly. Therefore, I always have with me both live and artificial, selected with care. The frogs I choose are not too small, and not too large. I know just what size attracts the bass and follow it up.

In regard to the artificials, it may be said that they are things of worth if used right, but very poor things if used wrong. There are baits with gangs on the sides and behind that will catch in the weeds, and that is about all. Thank heavens! we have weedless artificials.

Bass can see for a distance of fifty feet and are often noted lying in wait by some concealing pad, their eyes taking in everything that goes on above. Beware of the fly that falls near it. I do not condemn any bait of the artificial order for the reason that bass are so changeable in their notions. This bait may prove good in one lake, another better in another and so on. There is always room for speculation, calculation and study, also work.

If, after working a whole morning on a lake without success, I wind up at noon with one ingenious catch, I am plenty satisfied, and will put that morning down as one worthy of attention among the rest of them. You will not know the ins and outs of using artificial baits in one year or two. You have to study, and

LAKE TEMAGAMI—FISH? YES, ALL YOU WANT.

you get the best teacher right out of experience. You may get the beginning pointers through reading from the pages of the fish authorities, but in the main you have to get right down and study it out for yourself. A bass strikes a bait on the side nine times out of ten; then there are those inquisitive fellows who will follow up a bait for about ten or fifteen feet and will finally seize it. The gang on the end will get the follow-up fellows, but the bass that comes down upon it with a rush are soon caught by the side gangs. But around about the time when the weeds begin to thrust their noses into the upper world, out of the water, these baits not only are worthless, but can catch nothing. Therefore it is that the weedless bait has proven to me a winner. I can cast that bait into any water, and if I do not get fish, I am sure I won't drag in the whole lake bottom and its contents, and that amounts to quite a bit with me.

Connected with the art of bait-casting there is due to be much exasperation, as a natural course; and the baits that have bare hooks coming in contact with weeds cannot but pave the way for the well known explosions. There is a time and place for the use of these baits with the many hooks. In Minnesota, the kingdom of bass fishing, where I got my training, there are lakes that are weedless, and the water is crystal clear; you can see deep down into the water and a great way out. Here these baits can be used with success, and I have done it to my entire satisfaction.

It makes no difference whether a bait is a surface bait or an under-water bait, they have their time and place. The surface bait I have used in the spring and fall. Then the bass are in shallows picking up the insects that abound and fall to the surface. When the water becomes warmer the fish retreat to deeper water, say about the second week in the month of July. In plain view of the bass in the shallows I have caught them with the use of the surface bait and have had ample opportunity to study their ways and actions. The use of the live bait, as centering around the frog, is perhaps one of the best ways of catching the black bass for the reason that it is the most natural. It is a winner and should be given a try-out at all times.

The bait-caster's outfit should be as complete as his money can make possible, and right here let me put in a word for the man of moderate means. In all the time I have been pounding this machine in the interest of the outdoor press, I have always managed to get in a word for the man whose pocketbook is

rarely bulging with bills. Get a good outfit—one that will last you for years—with an outlay of little over twelve or fifteen dollars. The reel is the main article of the outfit; on the reel depends the success or non-success of your trip. A good quadruple multiplying reel that will amply do you can be purchased for from four to seven dollars. The points demanded in good reel construction are durability, firmness, and of such worth as to last through bad weather and fine, giving equal service at all times. The metal should be of a good grade—German silver preferred—for not only is it known for its wearing qualities, but it is of a subdued coloration and will not alarm the fish, as will the flashy glitter of the nickel reels. I have used German silver reels for many years and have found them worthy of any man's attention. Where they are put out by reputable manufacturers they are especially good.

In the hands of the beginner, the smooth running reel, one that will spin for at least five minutes, is more or less of an impossibility and one cannot learn the game on it, but with a reel not so highly keyed up one is better able to practice and become efficient, later purchasing a better reel. Between four and seven dollars you will find listed some of the best and most used reels on the market. They inspire confidence and come within the means of every man. The quadruple multiplying reel is the reel best fitted for bait-casting. It has four revolutions of the spool to one revolution of the handle. This reel should have a large barrel, since on such a reel the line can more easily and readily be assembled where, in the short-barreled reel the quarters are cramped and the line cannot be laid correctly without inviting the inevitable backlash, the bane of the bait-caster, both the experienced and the inexperienced. A glance through the advertising pages of this magazine will suffice to give you an insight into low priced reels, those coming under my observation in this article. Do not go under four dollars, and it is not necessary for you to go over seven.

In the question of the rod for bait-casting, I have found the steel rod pre-eminently the leader; the steel rod is the most universally used, a recommendation in itself. This rod should not have a stiff backbone; the rod with the stiff backbone is better used for larger fishing, as for the pickerel and the muskellonge. Rather let there be a give from the center of the rod to the tip; a give that will easily be noticeable when you have the rod in hand. There are steel rods and steel rods; there are better quality in some and much poorer in

others. Dry goods store specials should be banned, relegated, banished, exiled, whatever you wish, for they are nothing more or less than blow-pipes. Pay from four to five dollars for a steel rod and you have something you can lay hands upon and know that you have something worthy of your attention, something that will give the pugnacious bass a run for his money. Always remember the rod with the give, the well defined give, and you will have made a step in the right direction. Five or six feet is about ideal for a rod. Avoid the very short rods and the very long ones. Choose in between and you will have done the right thing.

In the question of guides, do not get them too big, but medium. Those rods having guides an inch across are not necessary; they are too much exaggerated. The reason of the big guides is to allow of less line friction, but the medium guides are just as good, if not better. If the guides are fitted with agate you are that much ahead, but it costs more. I have a rod having agate lining in the reel guide and the tip guide, for these two stand the most wear, the most friction. I have found that it will save your line—it will last longer and prove its worth.

In regard to the reel. The average reel is held firm by a band that is slipped over one of the shoulders; this is all right, providing it stays firm. The reel band that locks by means of a thumb screw, is better and will hold secure against wriggling out of place. Some reels are provided with the finger pull, a contrivance around which the forefinger is hooked, purporting to give the bait-caster a firmer hold on the rod. I have used them, but they are not necessary. For the beginner they are good and are recommended in this article.

The line for bait-casting is a subject many amateurs get tangled up in. They will try this and that, something and another thing, but they finally find something that is entirely suited to their needs. A soft braided silk line is to be given preference among all others. Note here that I have used quite a few in my day, and the one and only one I have come to utterly rely upon is the soft braided line.

Do not forget to get yourself a tackle box. I wish I could tell you how much pleasure I had packing baits around with me in my pockets before I had sense enough to get a tackle box. It is a necessity and you should not go out fishing before you have one. It is not necessary to get a box that will hold four gallons of bait and reel and other paraphernalia. A small box is quite sufficient—one that will hold your

(Continued on page 483.)

**Going Out of the Ice in Maine.**

As the opening of the trout season in Maine depends on "going out of the ice," there is each season considerable speculation and ferment among anglers over the time they can "get to it." The following table, which goes as far back as our fishing editor has records, will allow the anxious Waltonian opportunity to strike an average that will fit the present season:

GOING OUT OF ICE.

The record of ice leaving the Rangeleys each year since 1882 may interest anglers who go to that part of Maine. 1883, May 14; 1884, May 13; 1885, May 15; 1886, May 3; 1887, May 16; 1888, May 21; 1889, April 30; 1890, May 9; 1891, May 10; 1892, May 4; 1893, May 20; 1894, May 2; 1895, May 7; 1896, May 9; 1897, May 12; 1898, May 1 and 2, 1899, May 8 and 9; 1900, May 15; 1901, April 30; 1902, April 30; 1903, April 29; 1904, May 8; 1905, May 7; 1906, May 14; 1907, May 15; 1908, May 10; 1909, May 12; 1910, April 17 and 18; 1911, May 9; 1912, May 4.

The following are the dates when the ice has left the big fishing grounds of Maine in previous years:

Sebago Lake has opened on the following dates: 1872, May 9; 1873, May 1; 1874, May 7; 1875, May 6; 1876, May 1; 1877, April 23; 1878, April 12; 1879, May 5; 1880, April 13; 1881, April 24; 1882, April 19; 1883, April 29; 1884, April 26; 1885, April 26; 1886, April 25; 1887, May 1; 1888, May 8; 1889, April 12; 1880, April 24; 1891, April 23; 1892, April 23; 1893, May 4; 1894, April 19; 1895, April 21; 1896, April 21; 1897, April 22; 1898, April 13; 1899, April 27; 1900, April 26; 1901, April 15; 1902, March 29; 1903, March 27; 1904, April 23; 1905, April 24; 1906, April 21; 1907, April 25; 1908, April 25; 1909, April 8; 1910, April 1; 1911, May 12; 1912, May 12.

Cobbosseecontec Lake has opened on the following dates: 1872, May 3; 1874, May 4; 1875, May 2; 1876, May 1; 1877, April 18; 1878, April 14; 1879, May 5; 1880, April 22; 1881, April 21; 1882, April 28; 1883, May 1; 1884, April 26; 1885, April 29; 1886, April 20; 1887, May 7; 1888, May 9; 1889, April 15; 1890, April 26; 1891, April 28; 1892, April 18; 1893, May 4; 1894, April 24; 1895, April 21; 1896, April 22; 1897, April 24; 1898, April 16; 1899, April 29; 1900, April 24; 1901, April 20; 1902, April 2; 1903, April 5; 1904, April 28; 1905, April 21; 1906, April 24; 1907, April 21; 1908, April 21; 1909, April 11; 1910, April 3; 1911, April 6; 1912, May 10.

Moosehead has become free of ice on the following dates: 1881, May 9; 1882, May 19; 1883, May 13; 1884, May 16; 1885, May 16; 1886, May 2; 1887, May 12; 1888, May 21; 1889, April 29; 1890, May 8; 1891, May 14; 1892, May 4; 1893, May 19; 1894, April 29; 1895, May 9; 1897, May 10; 1898, May 3; 1899, May 6; 1900, May 14; 1901, May 1; 1902, April 29; 1903, April 28; 1904, May 10; 1905, May 3; 1906, May 13; 1907, May 14; 1908, May 11; 1909, May 13; 1910, April 20; 1911, May 10; 1912, May 12.

The ice has left the Belgrade Lakes on the following dates: 1880, May 8; 1881, May 15; 1882, May 21; 1883, May 14; 1884, May 11; 1885, May 16; 1886, May 5; 1887, May 20; 1888, May 23; 1889, April 29; 1890, May 9; 1891, May 14; 1892, May 9; 1893, May 21; 1894, May 2; 1895,

May 7; 1896, May 9; 1897, May 12; 1898, May 6; 1899, May 7; 1900, May 15; 1901, May 4; 1902, April 28; 1903, April 29; 1904, May 13; 1905, May 2; 1906, May 13; 1907, May 19; 1908, May 10; 1909, May 14; 1910, April 19; 1911, May 5; 1912, May 8.

**Salmon in Maine.**

THE salmon season on the Penobscot River opened midnight, April 1, when it was lawful to take the Penobscot River, or more properly the Atlantic salmon, until July 15.

There is a standing offer at \$1.25 a pound for the first three or four salmon taken, and, as the salmon run from 12 to 18 pounds, one fish makes a good day's pay.

For years John McGregor, "the spoolwood king," of Lincoln, bought the first fish taken to send to a thread manufacturer in Newark. Since his death his son has continued the practice, and the first salmon taken in the Penobscot every year is eaten in Newark. Several other standing offers for early fish are from New York clubs and hotels.

The price holds at \$1 a pound until the catch improves, then slides down the scale until it sometimes reaches fifteen cents a pound at the end of the season, although good cuts are rarely sold for less than twenty-five cents. Bangor does not get a taste of the fish until the price drops to about sixty cents.

There is only one place in the Penobscot River where the fish are taken with rod and reel, and that is at the Bangor Pool. This is rather a misnomer, for the salmon water is far from a pool, but a half mile stretch of rapids just below the dam which holds back the water of the river to furnish power for the Municipal Waterworks Pumping Station and Electric Light Plant.

Fishing is free to everyone.

The usual way of fishing the pool is from a flat-bottomed boat in which there is a chair facing the stern, where the fisherman sits and lets his leader with the gaudy fly float down stream at the end of 100 yards of line, while his boatman rows against the stream just hard enough to keep the boat nearly stationary. Many anglers work alone, using a small boat and letting the rod rest on the bow while they work the oars.

When a fish takes hold they are obliged to let the boat drift, which adds to the excitement. It is an unwritten law of the pool, however, that all other boats shall keep clear of a fisherman playing a fish and go to his assistance if he needs it, standing by with the gaff. The salmon fight fiercely, and the veteran takes no chances until his fish is in the boat.

Probably nowhere else in the country can such fishing be had almost in the heart of a city, for the pool is within the city limits, only ten minutes by trolley from the Bangor hotels.

**'Catches' First Maine Salmon.**

BANGOR, Me.—Charles C. Bissell caught the first salmon of the season at Bangor Pool on April 4. It weighed 16 pounds and was sold for \$32.

**Kennebago River.**

ICE went out of Kennebago River March 27.

**Fishing in Lake Sunapee.**

SPRINGFIELD, Mass., (On Train), April 6.—*Editor Forest and Stream:* The ice is about all out of Lake Sunapee, N. H. Only a little is left at the upper end of the lake and in Sunapee Harbor. Several fishermen were out trolling to-day and all had good luck. Twenty-one chinook salmon and one Sebago salmon were taken besides several square-tail and Sunapee trout.

The salmon were nice fish and would weigh from three to seven pounds each.

Last year about 2,000 chinook salmon were taken in Lake Sunapee, and from the way the fishing starts off, it looks as though many more than that would be taken this year. The lake is full and the water is at high water mark. Smelt are beginning to run and are used for bait. Fishermen can secure accommodations early at Blodgett's Landing and Sunapee Harbor.

GEO. H. GRAHAM.

**Illinois Casting Club.**

CHICAGO, Ill., April 4.—*Editor Forest and Stream:* The dinner preceding the opening of our season will be given at the restaurant of the Kuntz-Remmler Co., on April 19, at 7:15, but it is desired that all be present at 6:30. A motion will be made to change the wording in the amendment to Section 3 of Article 5 of the constitution. A change will be made in the method of awarding the special trophy from that given in the last letter, necessitated by the availability of two more trophies. The opening tournament of the Chicago Fly-Casting Club will be held at Anglers' Pool, Garfield Park, May 25. The casting will commence at 10 A. M. The events will be the four accuracies—dry-fly accuracy, accuracy fly, quarter-ounce and half-ounce accuracy bait. There will be a cup awarded to the winner of each event, the cups to be given to the visiting members, while ribbons will be awarded for second and third places.

J. D. ANWAY, Secretary.

**Massachusetts Laws.**

FRIDAY, Feb. 28, was the last day of pickerel fishing till the first of May, under the new law now in effect. The law imposes a fine of not more than \$10 for a person to take or have in his possession a pickerel between March 1 and May 1.—Yarmouth, Mass., Register, March 8, 1913.

**Ice Goes Out of Sebago.**

No one was tempted to do illegal salmon fishing in Sebago Lake this year. The ice went out the same day the season opened, April 1.

**Half Lion, Half Leopard.**

THERE was presented to the Zoological Society of London recently the skin of a lion-leopard hybrid. The animal was born in India and lived nearly two years.

The skin, says Harper's Weekly, has spots like those of the leopard, but those on the sides of the body are smaller and darker. The belly is unmarked and the tail terminates in a tuft like that of the lion.

FOREST AND STREAM PUBLISHING COMPANY,  
CHARLES OTIS, President.

W. G. BEECROFT, Secretary. W. J. GALLAGHER, Treasurer.  
127 Franklin Street, New York.

**CORRESPONDENCE**—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

**SUBSCRIPTIONS**: \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

**ADVERTISEMENTS**: Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

Entered as second-class matter at the Post-Office, New York, N. Y.

### SOME OREGON MAMMALS.

THE first number of the Bulletin of the American Museum of Natural History for 1913 contains an interesting paper on the mammals of Northern Malheur county, Oregon. H. E. Anthony spent the greater part of August and September, 1912, in that county, collecting mammals and birds for the American Museum of Natural History.

The lower country there is a more or less level sage brush flat, alternating with rolling hills, and Willow Creek, the stream which drains it and flows into the Malheur River, has an altitude of about 3,750 feet. The soil is fertile, the climate on the whole equable, warm in summer, with a moderate amount of snow in winter. There are some mountains running up to an altitude of 7,500 feet.

On the sage brush flat such familiar birds are found as the sage hen, the sharp-tailed grouse, the magpie and the rock-wren, while in the timber of the hills occur blue grouse, ruffed grouse, various woodpeckers, Clark's crow and the Louisiana tanager.

Mule deer were formerly abundant in this country, and still exist, spending their summers back in the more inaccessible parts of the range, but coming down to the lower land to winter.

Pronghorn antelope formerly ranged the open country in large numbers, and as late as 1908 were reported to the number of fifteen or twenty. "This band would work south in the fall to spend the winter about some springs where favorable winter forage existed. In the spring time they would return and be seen at intervals back on their summer range. However, there came a summer when none returned, and to-day their old range knows them not. It is presumed that they were exterminated while in their winter quarters, since it is customary for antelope always to return to a chosen district unless persistently molested."

On Ironside Mountain, at an elevation of about 7,000 feet, Mr. Anthony found a fair-sized horn sheath of a mountain sheep. It was old and

weathered, and serves as one of the last reminders of an animal once abundant. "The open, rocky ridges along the foothills were favorite haunts for this fine species in the earlier days, but it has been some years since the last one was seen in Malheur county."

Of the many rodents the one of chief interest is the beaver.

It is six or seven years since FOREST AND STREAM called attention to the good work done by the beaver in irrigation, pointing out that their dams hold the water and furnish sub-irrigation in many places for considerable areas of meadow land. It was predicted then that when the public came to appreciate this good work, farmers generally would strive to have the beaver protected. Mr. Anthony says:

"The beaver have held their own along Willow Creek, and to-day their dams and evidence of their work can be seen at every bend. The ranchers, in general, believe in their protection, and, freed from molestation, the few that were left on the creek, when active trapping for their fur ceased some years ago, have increased to quite a respectable number. The whole valley of the creek shows the results of beaver work. The soil, in places, indicates conditions that only generations of beaver dams produce by inundation; and most of the creek bottoms are moist from sub-irrigation induced by beaver work. The ranchers consider these animals an important asset to their holdings; so much so, in fact, that when stock is occasionally lost through becoming bogged down and drowning in some dam, they do not molest the beavers, but charge up the loss to accident, for the beaver is responsible for the heavy hay crops in the creek valley through his system of sub-irrigation. His dams raise the level of the waters and his burrows, dug deep into the banks, provide a ready outlet into the fields for the backwater. In most cases, the water does not appear in the meadows as surface moisture, but may be found at varying depths of several inches. The value of this has been demonstrated by the former uncertainty of hay crops when the beaver were scarce, and by the increase in yield as the beaver multiplied and their work became a greater factor.

"An interesting modification in food habits, due to the cultivation of the creek meadows, was noted. The beaver were found to have numbers of well defined paths into the alfalfa, and every morning mud and water along these attested to their constant use. The alfalfa would be cleared away for some distance from the creek bank by the time the meadow was ready for cutting. After the field was mowed, the beaver brought in bundles of the cut hay and used it even when it was fairly dry. A few cut willows were generally to be seen floating in the dead water at each dam.

"Very rarely were beaver houses noted. These animals seemed to prefer living in holes in the bank, with the entrances under water."

The Idaho pigmy rabbit, spoken of as the rarest of the hare family in the United States, is not uncommon in the region where Mr. Anthony collected, and he gives some interesting remarks on its habits.

Coyotes are abundant in Malheur county, and do much damage by catching the chickens, ducks, geese, turkeys and sheep of the ranchers. They are, therefore, highly unpopular, though

they do a great deal of good by destroying the mice and ground squirrels that are so abundant and do so much damage to the crops.

A single black bear was seen by the collector.

The paper is illustrated by two plates, one a scene showing Ironside, and the country where the collecting was done, and the other giving the country in which the Idaho pigmy rabbit is found, and a capital picture of the animal itself.

Mr. Anthony's paper possesses unusual interest.

### EGRET PLUMES AND THE TARIFF.

SEVERAL times within the past few months we have pointed out the desirability of inserting in the new tariff law a provision forbidding the importation of the plumage of our native wild birds, including aigrettes, or the importation of any feathers which are indistinguishable from the feathers of our own native birds. The movement to carry out this suggestion has had the support of protective associations generally, and the tariff law just introduced contains such a provision. The section forbids all importation of aigrettes, egret feathers, osprey plumes—another name for egret plumes—and all feathers of wild birds, except for scientific or educational purposes.

So amended, the tariff law would be a tremendous force in re-establishing a number of species that by commercial destruction have now been brought very close to the danger point. This re-establishment is of course very important from the scientific standpoint, and equally desirable from the economic point of view, for many of our herons feed largely on such noxious creatures as grasshoppers, cut-worms, crayfish, and various snakes and mice, and are thus allies of the farmer.

Bird protectors everywhere should make a strong effort to see that this prohibition against the importation of egret feathers is retained in the bill.

### THE MOUNTAIN SHEEP'S NAME.

THE specific name of the mountain sheep has been under discussion among naturalists for nearly twenty years. Some people call the mountain sheep *Ovis canadensis*; others *Ovis cervina*, and others, a few years back, called it *O. montana*. Many of our best mammalogists have expressed their opinion as to which was the proper name, but there has been no agreement, some authors insisting on using *cervina*, and others *canadensis*.

In Vol. XXVI., of the "Proceedings of the Biological Society of Washington," Wilfred H. Osgood has an article on the name of the Rocky Mountain sheep, and gives his reason for concluding that *Ovis canadensis* is the proper title. These various names were all given to the species early in the year 1904, but in no case is it possible to establish the precise date at which the names were applied. Because, however, the name *Ovis canadensis* appeared with both a text description and a figure, in the year 1904, while in the same year the name *montana* appeared with only a figure, and the name *cervina* with only a diagnosis, Mr. Osgood concludes that according to Article 28, of the International Code of Zoological Nomenclature, Recommendation (b), the selection of the name *canadensis* is imperative.

## About Teaching Beginners.

BY ROBERT PAGE LINCOLN.

WITH the resurrection of archery as a pastime among the outdoor kindred, there is gradually coming to light what we are pleased to call, "hints to the amateur." There you have it: hints to the amateur, but while there has been quite a bit dispensed through the columns of *FOREST AND STREAM*, I have yet to find the man that has said anything which the crude—the downright crude—beginner can build upon.

There has been a mass of scientific twaddle by E. J. Rendtorff purporting to serve as stepping stones to success, but honest, it has almost broken my back. Think of starting in to teach amateurs about archery with the sky-soaring dope this professor hands out! If he would use common low-brow language and leave some of his high-brow feelings at home, I think the amateur would be more generally pleased, and he would know more about what to do than he does now after wading through this fellow's scientific outbursts. Why in the name of all things does he not get down to bottom facts and give us the rudiments of it—the first principles? Instead, he starts right in as though everybody knows or should know the foundation facts, forgetting that there are some people not as quick-minded and scientific as others. If I were the expert some of these archers claim themselves to be, I would first of all in starting out to tell beginners how to do things in this line what sort of wood to use for a bow. Notice how scrupulously free Mr. Rendtorff's articles have been on this point. I think it was three or four weeks ago that an "insignificant" amateur asked through these columns just what sort of wood one should use in a bow, but to date I notice no experts have come to the front with valuable, straight from the front, material.

That is the first point, my dear and obliging experts, and believe me it is one of the main ones of the whole business. Get that down pat. And right here comes in one big one, and it directly hinges upon the above remark. The obliging and scientific professor had a Duff lemonwood bow weighing fifty-five pounds. With this bow he has made alleged remarkable scores, and he has hardly been in the game more than a year, and somewhere I believe he made mention of the fact that he is below normal in muscular arm development. But that has nothing to do with what I am striving for. It is this: Imagine this professor holding a fifty-five-pound bow at arm's length and shooting with it! I am from Missouri, and you have got to show me. Fifty-five pounds—get that! Fifty-five pounds! I have never been more surprised in my life. What in the world are these things like? Are they on the order of gas pipes? Recollect, my dear brother amateurs, that we do not know what sort of wood these tournament ginks are using. But fifty-five pounds, and even

then look how they are trimmed down. I wonder if the professor, when he weighted this bow, wasn't standing on the scales also? Honest, I can't see where the amusement in archery comes in when one is using a bow of this weight.

I have shot with many bows, but the weights of them have been so insignificant compared with this that I refrain from setting down the same for fear I will be promptly ridiculed by the upper bunch who seem to be so aloof from the amateur clan. I have wondered many times

HOMER W. BISHOP.

President Chicago Archery Club, 1912.

if archery is not for the favored few, just as in all other things. I wonder if this is a poor man's pastime after all. I have never been near tournaments—never will. It smacks of the élite. I have been lured to come, but where would an amateur be with the uppers? But I am going beyond my subject. I have shot with bows of comparatively small weight. I received my archery education when a small kid from an Indian youth, and what I learned was bottom facts. His bow was made of ironwood. I have since constructed and used such bows of such wood with success, but some of the trees I have shaped them from have not weighed fifty-five pounds.

I have never purchased a bow ready made. The joy of it all centers around the constructing of them. I wonder how many of our "experts" make their own bows or have made their own bows? But fifty-five pounds for a bow—think of it! If it is true, then please let us know what variety of breakfast food or book-learning one must eat to become powerful enough to draw a string back to the chin with a fifty-five-pound bow, hold it while getting the point of aim and elevation—before the final release. I admit unblushingly that I am astonished. I have a photograph of Edward Weston, the dean of the American archers. If in that picture the bow weighs even one-third of Mr. Rendtorff's bow, I will admit myself befuddled eternally, and will withdraw without as much noise as a mouse.

Mr. Weston holds his bow with apparent ease. He has not the vitality of a younger man and still he holds the bow with ease. I would like to see a photo of the ardent and scientific professor standing thus with his fifty-five-pound lemonwood bow at arm's length before I will give it any thought at all. And it would be very nice and befitting if the "experts" would come forward and give their ideas of bows, their weight, where to get the wood, what variety of wood, how many kinds there are worthy of attention; just what hardwood to take and what not to take and reasons for such without collecting an aggregation of spell-binders and scientific paddlers enough to choke a mule; where such wood might be obtained outside of those purchased ready made. Then start in and tell what the professor did not tell; tell what tools to use, how thick the bow should be at the grip and how thick the limbs should be. Tell how to make the notches at the ends where the looped cord or string slips in, and what sort of a string to use; why a certain kind of string; point out some inferior ones; tell about how to care for the string; what preparation to put on it, if any; tell the amateurs how they shall pull the cord on a fifty-five-pound bow without tearing their fingers out of joint. Because you know, my dear amateurs, you hook the fingers around the cord, the arrow notched between, and when you are ready to release, after you have found your elevation and point of aim, you allow the string to gradually slip off. You never use the pinch; that is to say, by pulling the notched back between the thumb and the fore-finger. That's something the professor in his eagerness forgot to tell you. Also he said nothing about blood stung finger tips; the use of gloves and wrist guard, or why one should wear such.

I would like to know where the eminent professor got his information on how to season the bow. I wonder if he has ever seasoned or made a bow himself? If he has, certainly he could do better than what he put down in black and white just recently. He infers, or theorizes, he does not give it as actual results from experiments. Note that! There will have to be

some explaining anent this heavy bow business. Someone has to clear the atmosphere of mystery surrounding it if we are to arrive at any conclusions. Just for the sport of it I am going to remain passive. I have nothing to impart—I would not impart what I have learned from experience for fear I will be pounced upon and excluded from the honorable ranks. When Mr. Rendtorff says "a weak thirty-five pound bow" I cease to wonder. He is easily at the head of the world's combined archers; his strength is enormous, or I have been dreaming. Mr. Rendtorff makes the mistake all highbrows or near highbrows make—he soars way up and there takes his perch, sticking to one thing and one thing only.

It is very easy to see that he has little time for small bows. How many of the average can shoot from a fifteen-pound bow, let alone a ten-pounder? Highbrow anglers will jeer at a five dollar machine-made rod and laud their little bamboo fifty dollar rods to the skies, and yet the five dollar rod will do perfect work and is just as good as the hand-made affair if in the hands of the right man. Same in this. Mr. Rendtorff is doing more damage than good with his "my superiority" dope. Mr. Rendtorff, if you were actually to make your own bows, out of necessity, saying that your life depended upon it, and were given just the same opportunity that the average fellow has of selecting wood for his material in some rural wood, what would you take for instance? Wood that, when cut down and seasoned, would weigh your fifty-five pounds, forty pounds, thirty-five pounds or even fifteen pounds? Kindly answer that. Also just how you would go about it and how much said bow would weigh after it is seasoned. I have yet to find out which way you season bows. Do you use "deliquescent agents" or the strong air-tight steel cylinder? Have you tried either method? Tell what sort of air-tight steel cylinder you used, so amateurs like myself may be led along the right road to success. About your fifty-five-pound bow: Do you get real honest sport out of lugging it around? Do you send it by freight? How do you manage to lift it and draw the string back to your chin? I doubt very much if the late Robin Hood had such a bow. What do you think of the William Tell episode? Think he used a fifty-five-pounder? Not saying that I have any faith in the belief that either did the things they were credited with. What was the use of your padding up those articles with that technical stuff, science and diagram; that was too advanced and there are very few of beginners who understand it. Your description was very vague; all such stuff is vague and is better learned by the individual through experience. Experience is the best teacher, the only one worth while. I have this to say: In one year you sure done wonders. I have more or less enjoyed bow and arrow shooting for ten years, all told, when work did not crowd me, and I do not think I have so very much to impart. Will you admit that there are two classes of archers, one class that shoots at tournaments and one class, "the insignificant," which shoots in secluded places for fear of being found out, who have not the money, the means by which they can journey from one end of the country to the other to attend tournaments and thus get into the limelight?

Men and women who have nothing else to

do day after day than practice archery, why should they not be experts? You and the rest of the archery "experts" have gotten together by mutual agreement to boom archery. There does not seem to be any remuneration in it to individuals other than love for the sport. You are going to appeal to the majority. Well, then, take my advice and come down a few niches and get on the level with this majority. We want the success of the average; the man who makes a bow out of common wood—common American wood and not your imported stuff. I think artificiality is a crime. Archery will always be restricted to the minority. Therein lies the fact that it will never be as widespread as other sports. You will write of archery on the tournament grounds and admit that alone. The majority will get no hearing, for that is not the nature of things as they are. At the expense of being made the butt of your jokes I am going to take the side of the amateur. Mr. Rendtorff will elucidate, since he has broken the ice, and must, therefore, do the telling, drawing upon his experience and not from old histories. And we want your poorest work and your failures, and not the fact that by accident you happened to hit the target at eighty or one hundred yards. Target shooting is inferior compared with the true archery out in the woods. With a set range the target archer cannot but be sure of himself, but the archer who has no set range and must shoot with keenness and calculation is vastly different. You target archers make target scores the sole object of your attention and consequently work it to death, making it only a dry as dust performance.

Without the true poetry surrounding it, such as the archer in the midst of nature must realize, the pastime is not worthy of the notice. And the majority are inclined to favor the latter for reasons well to be recognized. And we want to hear about shooting with small bows. Are there any amateurs who have shot with bows under ten pounds? Well, then, let us hear from you. It will be appreciated, and let us pay no attention to such aloof remarks as "a weak thirty-five pound bow" from a man who has been an archer and knows it all from beginning to end—after one year's practice.

### An Arrow's Flight.

CHICAGO, Ill., March 17.—*Editor Forest and Stream:* I have read some of the expert opinions in regard to the effect on an arrow's flight of difference in point of balance from others in the same set.

So far, the opinions advanced seem to deal with the effect that such difference in point of balance might have on the lateral or side movement of the shaft.

It is my idea that any such a difference would be more likely to affect the flight of the arrow in the vertical plane; that is, to cause it to fly higher or lower rather than out of line to either side.

In comparing the behavior of any shaft it is not fair to assume any but the most favorable state of weather—that is, little or no wind. One can never be sure that a breeze is steady or will continue to be of regular force at any time or over any part of the range.

A range that is partially protected by buildings or trees is particularly likely to have calm

belts or cross-currents between the archer and the targets. Under such conditions no one may be sure whether the fault is in the arrow or the unsteady wind.

A difference in size, texture and position of the feathers will have a much greater influence on an arrow's flight than several grains difference in weight or quite a decided shifting of the point of balance. Of course, the heavier the shaft, the less its flight will be affected by any small changes in weight or balance.

During the past few years I have been experimenting with a view to making the feathering of the arrow more regular than on those I've been able to get at any dealers.

This last season all of my best scores were made with a 36-pound lancewood, backed with hickory, and arrows of my own make weighing only 340 grains. Out of twenty-five arrows I have been able to select eight that will group well enough to hit inside the green line at eighty yards (if the archer is not at fault). There is a difference of three-quarters of an inch in point of balance between some of these and also several grains difference in weight between the lightest and heaviest.

I have given particular attention to the feathers and believe they are the main factors in holding the arrows in this set in the paths in which they are intended to travel. On a calm day last December, shooting the entire eight at an end, I made a score of 92—490 out of 96 arrows at 80 yards. That would seem to bear out my contention that small differences in weight and balance do not cut a great figure.

G. L. NICHOLS.

### Keystone Archers.

THE Keystone Archers, in organizing for the season of 1913, have elected the following officers: Dr. O. L. Hertig, President; Dr. R. P. Elmer, Vice-President; James S. Jiles, Secretary-Treasurer.

At the present time at least four members of this club are averaging over 400 in the team round and several others are rapidly reaching similar proficiency. It is probable that the contest for the Pearsall bugle this year will be very close. First class teams should be entered from Illinois, Massachusetts, New York and Pennsylvania.

### To Keep Matches Dry.

A NOVEL method of carrying matches on one's person in the wet without having them become soaked is to immerse a box of safety matches in paraffin until a solid cake is formed out of which a match may be broken when desired.

When the match is scratched, says the *Outing*, the coating of "waterproof" is rubbed off its tip and also off the composition abrasive on the box, thus permitting the match to ignite. This is a simple expedient which will be sure to appeal to all woodsmen—professional or amateur.

## INSIDE ROUTE TO MAINE.

Continued from page 460.

That night we camped at the mouth of the Chaudier River and almost in the shade of the collapsed Quebec Bridge. In the morning we rummaged through the debris. The structure, when completed, was to have been larger than the new Queensboro Bridge, so picture the mass of scrap iron! Some ninety men were either drowned or crushed outright. The natives told of one who was pinned between two members at the water's level and drowned with the rising tide, none daring to end his suffering, as it was a crime in the eyes of the law.

Our first mishap occurred upon ascending the rapids of the Chaudier, the "Woj" getting caught on a rock, whereupon the swift current came over the gunwale, bending the canoe and breaking several ribs. Much to our chagrin, a picnic of several officers and ladies of the British fleet witnessed the spill with glee. A pair of moccasins and some clothing were lost, teaching the valuable lesson of tying everything into the canoe. Apparently all must learn that lesson by experience, for Dillon Wallace in his Labrador expedition had a similar affair, but of vastly more consequence. Two days were consumed in repairing, during which time we killed two woodchucks and made stew.

Reconnaissance and inquiry proved the river to be very low and packed with pulp wood. Therefore we decided to ship the canoes fifty miles up stream to Beauce Junction, hoping to find sufficient water there to continue up the stream. Funds were too short for all to ride. One man lost his moccasins and another was ill from the woodchuck stew, so attended to the shipping. Their appearance was near-hobo type, and as such they were taken in tow by two Inter-Colonial R. R. detectives, but finally convinced them of our business. Lucrative positions were offered as strikebreakers in a salt mine. Meanwhile the other two counted fifty-two miles of ties to Beauce Junction, taking one dollar and some corn meal cakes for traveling companions. No doubt fifty-two miles sounds easy when one reads of Weston doing almost that much before breakfast, but just try fifty-two Canadian miles over irregularly spaced ties. En route a character was met in Carl Jerome, twice a globe trotter for the New York A. C. His card read as follows:

Let's Get Acquainted, Capital, \$100,000,000  
In My Dreams.

POOR CARL,  
SIGN AND PICTORIAL PAINTER.

Rag Time Millionaire  
Looking for Some One to Love.

Kind Regards to Friends Won't Hunch and Out  
and Knockers, for a Good Time.

Permanent Address: Heaven.

We were truly in the land of the Canuck,

who, by our experience is a most ignorant and superstitious person. At frequent intervals along the roadside the inevitable shrine, many of which are life-sized moulds of the Christ nailed to the Cross and picturing great suffering.

To our disappointment the condition of the river was worse than that below. Arrangements had previously been perfected to have money await us at this point, but something had evidently gone wrong, for nothing could

ONE OF THE AUTHORS, AND THE WAY HIS FEET FELT AFTER HIS FIRST PORTAGE.

be found upon inquiry. Immediately the banker went up to the station to telegraph for "coveted needful." The Canuck operator had never heard of transmitting money by telegraph! Therefore we had to start in trying to convince him that it was possible. After windy arguments his majesty consented to look up the rules and of course saw that we were quite right. We sent three telegrams, but one reaching its destination. Before getting any results, we were down to eight cents, with a menu of coffee and "dough gods." The recipe for the same being no baking powder, flour and water being fried in saved-up bacon fat, which makes

a biscuit, the interior of which is anything but crisp.

When the money did come the very first train was taken over the border into Maine, arriving at Jackman at midnight. We could not recognize the country by sight, but we did by the genuine Yankee hospitality, when the station agent told us to unroll our blankets and bunk in the depot, asking us to keep an eye on the mail pouches until he returned in the morning. The canoes sent by freight caused us to wait four days. A trapper and his wife made it pleasant for us, often sending down pies, which, needless to say, were rapidly punished.

Down the Moose was an entirely new experience to all. It was practically the forest primeval. Many bear tracks were seen and deer were plentiful. The river was very rapid, and low in places, making progress so difficult that only ten miles were accomplished in two days. Each one of us cut a small pine tree, which, with the bark stripped off, made an excellent setting pole. Poling was voted great sport—that is, when going down stream. In lowering over a small torrent, locally called by the mild term "quick water," two canoes upset, but everything was tied to the thwarts this time. We had considerable trouble in getting through Moosehead Lake, as it was very rough.

Having had no wheat bread for some weeks, we purchased a loaf at a sporting camp, paying fifteen cents for a fair sized biscuit. We took the West Outlet of the Kennebec and again went slowly as we had to drag over rocks. Several wrecked canoes were passed. Arriving at Indian Pond Dam, we found the famous "Hulling Machine" a barrier, no man having ever passed through, although often attempted. Therefore we had to make a seven-mile carry to Chase's Stream through the forest on a very faint trail. The canoes were now considerably water-soaked and must have weighed over one hundred pounds each, which, in addition to about one hundred and seventy pounds of grub and duffle, made a single carry impossible. The day of the migration was a hot Sunday. On the first half of the carry we left the tent behind. Although it was still in August, the nights were exceedingly cold. We did not anticipate a comfortable night in the open, it being too dangerous to build a big fire, as forest fires were prevalent throughout the State. Fortunately we stumbled onto an abandoned log-driver's camp, in which we were quite cosy, neglecting an abundance of lice infesting the cabin. Dragging the canoes down Chase's Stream was drudgery, the stream's bed being barely dampened, which was indeed good luck, for the banks are so inaccessible that we would, without a doubt, have gone over a forty-eight foot falls, had it been earlier in the summer. Soon after we let down over a thirty-five foot fall. The Kennebec with its deep, though

rapid water was welcome. Another day brought us to the Forks. This period of travel from Indian Pond Dam to the Forks occupied six days, during which time we saw no one.

From the Forks, or the mouth of the Dead River, the trip was down an inclined plane, easy paddling with enough quick water to make it interesting. One day, on making a carry around a dam, we met a man who was a few points under the wind (in the dry State of Maine, too), and inquired about the Bombazeen Rips, which we expected to encounter shortly.

"Well," says he, "them rips is all right, if you get through," thereby showing true Maine wit.

When we arrived there, the river was a formidable mass of white water, but, by active use of paddles, the canoes went through without shipping a drop.

On the last Sunday out a fair record was made in the amount of grub stowed away. Each of us ate: One half-loaf of bread, six potatoes, four and a half ears of corn, one cucumber, one pound of stewed beef and two cups of coffee.

Barring seven dams to carry around, the remainder of the trip was easy work. On the last night out we built a big camp-fire and roasted peanuts, then proceeded to finish our ten-thousand point Irish pinochle tournament, the object being to avoid getting points, as the first man out lost and has to pay for a dinner when all meet in New York again.

We were seventy-four days from New York, with an average of thirteen miles per day, the best day's paddle being on the St. Lawrence with fifty-nine miles. Forty-two camps were made. The total cost, including outfit, was two hundred and forty nine dollars.

To say that we had enjoyed ourselves belittles the trip, but we were glad to see Bath loom up with a hearty welcome and a bountiful table.

## Remington-UMC

### Retains Amateur Trapshooting Championship of America

Charles H. Newcomb of Philadelphia Wins Title and Trophy, 179 x 200, with Arrow Speed Shells—Nitro Clubs won 1912's Championship Event.

*Other Remington-UMC Winnings at N. Y. A. C.'s Eighth Annual National Championship Event at Travers Island:*

**Preliminary Handicap:** Won by R. L. Spotts of N. Y. A. C., 183 x 200, shooting Arrow Speed Shells.

**High General Average:** (Including High Amateur Average) Won by Charles H. Newcomb, 355 x 400, shooting Arrow Speed Shells.

2d Amateur Average, won by R. L. Spotts, 350 x 400, shooting same ammunition.

**High Professional Average:** Won by Lester S. German, 350 x 400, shooting Arrow Speed Shells.

**Inter-City Shoot:** Won by New York Team, eight of ten men shooting *Remington-UMC* Speed Shells.

**Inter-Club Match:** Won by N. Y. A. C. Team, four of the five men shooting *Remington-UMC* Speed Shells.

*Seven out of Ten Prize Winners used Remington-UMC.*

*5,000 more trapshooters used Remington-UMC shells in 1912 than used any other make. Indications point to an even better showing in 1913.*

**REMINGTON ARMS—UNION METALLIC CARTRIDGE CO., 299 Broadway - - - - - New York City**

PHILADELPHIA, Pa., April 5.—As the interclub tournament nears an end it becomes more and more evident that Du Pont Gun Club will take away the crown from the Dentists. Although to-day's matches were a win for S. S. Whites and for Du Pont, the Wilmington high-speed merchants still are one up, and that means an almost sure win, with a possibility of a tie—seemingly a most remote chance. Such team work and enthusiasm as the Brandywine aerosaucer specialists have exhibited during the League meets seldom goes unrewarded, and while I hate to say, "I told you so," reference to the "Driver and Twister" column at the beginning of the tournament will reveal my prognostication, that Du Pont looked like pennant bearers—Johnny McGraw, please write. Yesterday Du Pont beat Highland by 50 scalars, 455 to 408; Whites beat Camden by 48—439 to 391; Meadow Springs trimmed Lansdale by 28 rocks—449 to 421; Clearview beat Glen Willow by only 16—424 to 418. Thus far Du Pont has broken 34 more clay plates than has the dental outfit, who are 49 breaks ahead of Meadow Springs. Du Pont leads by one point, White and Meadow Springs are tie for place. The number of targets broken and points scored are as follows:

	Points Scored.	Targets Broken.
Du Pont	12	2,699
S. S. White	11	2,665
Meadow Spring	11	2,616
Lansdale	9	2,512
Highland	9	2,487
Camden	7	2,452
Clearview	7	2,444
Glen Willow	6	2,363

Mooney 37, Dougherty 37, Davis 36, Perry 42, Hallowell 39, Mueller 30, Bowers 42, Freed 37, Dalton 36, Harkins 36, Landis 39, Tansey 43.

In addition to the above scores, there were five who shot along, but who were not eligible to compete in the team race, either through non-membership or for other causes. These were: Edward Banks 45, Carl F. Moore, of Pittsburgh, Pa., 41; W. Reissner 40; R. King 38, and F. King 30.

In accordance with the custom of the club, three silver souvenir spoons were put up for competition, Lewis class system, and the fortunate winners were: D. J. Dougherty, J. J. Magahern, and W. F. Jensen, Dougherty, A. B. Richardson and Henry Winchester tied for the Class A spoon on 47 each. The tie was decided by a roll off on the "indicator," and Dougherty won. E. Raymond, J. J. Magahern, J. W. Anderson, Jr., and C. E. Springer tied for the second spoon on 39, and on the "roll off" Magahern won. W. F. Jensen and R. F. Willis tied on 33 for the third spoon, and Jensen won on the roll of the wheel.

After the close of the shoot, some practice scores were shot, several members of the club joining in a 100-target race. High gun was Edward Banks, who ran 81 straight during the afternoon, and finished his last string with 97 out of 100, and a grand total of 142 out of 150 for the afternoon.

## Whites—Camden.

PHILADELPHIA, April 5.—S. S. Whites easily beat Camden to-day, the score being 439 to 391. It took 42 for any of the Whites to qualify, and of those who did, McKean, Howard George, Charley Newcomb and Abbott each made 45, with three other Whites having 44. Scores:

S. S. White.	Camden.
McKean	Hineline
George	Johnson
Newcomb	Borden
Abbott	Kling
Wilson	Taylor
Betson	Warren
Waters	E. Holloway
Griffith	Wakeman
Severn	Chalmers
Fontaine	Fleming

## Lansdale—Meadow Spring.

PHILADELPHIA, Pa., April 5.—By defeating Lansdale by 449 to 421 to-day at Lansdale, the Meadow Spring Gun Club maintained its tie with the S. S. Whites for second place, and kept in the fight for the championship with the Du Ponts. Buckwalter, with 48 out of his 50, led the Meadow Spring field, beating Al. Heil by a bird. L. Swartz for Lansdale, tied Buckwalter. Bender finished second with 47. Scores:

Meadow Spring.	Lansdale.
Buckwalter	L. Swartz
Heil	Bender
Sloan	Rauch
Coyle	Metz
Pierce	C. Swartz
Chandler	Gregory
Rudolph	Henry
Letford	Clark
Ford	Nice
Renner	Rogers

## Clearview—Glen Willow.

Clearview broke the deadlock with the Glen Willow Club for last place to-day by defeating the Roxborough gunmen at Darby with a score of 434 to 418. Fred Coleman was the high man, he getting 47. Clegg and Rigg, with 46 apiece, led the visitors.

J. Mowell Hawkins and Lloyd Lewis were the professional visitors, Hawkins broke 49 out of 50 and Lewis 34. Gohrs, a visiting amateur, also shot, he breaking 30. Scores:

Clearview.	Glen Willow.
Coleman	Clegg
Gideon	Rigg
Elwell	Hall
Fisher	Pollock
Paulson	J. Matties
Lee	Fres
Bonsall	Reichdifer
Rockius	Holland
Ferry	Garrison
Paul	Kickner

Twenty-five targets: Miller 20, Rice 16, Richards 12, Erdman 12.  
 Twenty-five targets: Englert 23, Schrader 20, Smith 19, Fisch 16, Snyder 11.  
 Twenty-five targets: Stoll 19, Wall 18, Bruch 18, Headman 15, Worst 15, Steele 15.

## New Hanover Gun Club.

WILMINGTON, N. C., April 4.—The first shoot of the season was held to-day. Only a squad were present. We hope to soon get the boys lined up. The cause of the low scores was a stiff wind.

Dreher	22	24	22	67
Boylan	19	20	17	55
Robbins	23	16	17	55
Underwood	14	15	21	50
Snow	..	..	7	7

J. H. DREHER, Sec'y.

## DRIVERS AND TWISTERS.

The Chevy Chase Club, of Washington, has put in a set of five expert traps, and the Columbia Country Club of Washington will also install traps.

The next shoot at the Hudson Gun Club, Jersey City, N. J., will be held on April 20. All shooters are welcome, targets one cent, good fellowship free.

The Interstate Association Tournament Committee has appointed G. V. Dering, Columbus, Wis.; J. Ed. Cain, Dayton, O.; C. H. Newcomb, Philadelphia, Pa.; Harvey Dixon, Oronogo, Mo.; and F. M. Edwards, Columbus, O., a committee to allot handicaps to entrants in the coming Grand American Handicap at Dayton, O.

Elmer E. Shaner, Tournament Manager, Interstate Association, writes: "We have this day received a telegram from W. F. MacCandless, Secretary N. C. R. Gun Club, Dayton, O., reading as follows: 'Barely escaped. Dayton will hold Grand American Handicap on regular dates.' This indicates that there will be no change in place or dates for holding this year's Grand American Handicap."

The Northern Kentucky Gun Club, Dayton, Ky., has decided to call off the registered shoot scheduled for May 7 and 8 changing the dates to Aug. 7 and 8. This action was thought best, owing to the damage caused by the flood, as the house and grounds can hardly be gotten into first class shape in time for the May dates. The program planned is a liberal one, and should attract a good crowd.

The Oneonta Fish, Game and Gun Club will hold its annual tournament June 7, the Saturday preceding the State shoot, held at Buffalo, June 10, 11 and 12. The club has recently reorganized with a membership of about 125 members. A new club house has been erected. Two sets of traps will be in operation, and as this is a registered tournament, a large gathering of shooters is expected. Club grounds are situated on line of trolley road and can be reached in a ten minute ride from the city.

The grand opening shoot of the Little Falls Gun Club (L. F. A. A.) will be held Saturday, April 26. The program will consist of nine events—eight at 20 targets, \$1.40 entrance each, and one (No. 9) at 25 targets for merchandise prizes, \$1 entrance. Money will be divided Rose system, 5, 3, 2, 1. Interstate rules to govern. Targets, 2 cents each. Ten dollars to be divided between the three high amateurs shooting the entire program, divided 50, 30, 20. Standard loads of shells for sale. Shooting will commence at 10:30 A. M. Lunch will be served on the grounds at reasonable prices. Train leaves Jersey City, Greenwood Lake Division of the Erie, at 9:08 A. M. Take trolley direct to the grounds. From Paterson, take Little Falls trolley direct to the grounds. Further information from Jesse L. Plass, Secretary, Little Falls, N. J.

W. G. BECROFT.

## DuPont—Highland.

WILMINGTON, Del., April 5.—There was a great gathering of trapshooters to-day at the grounds of the Du Pont Gun Club when the home team beat Highland Gun Club, of Philadelphia and cinched a tie for first place in the Philadelphia Trapshooters' League. Should the local team win the last match of the series, the match against the Meadow Springs Gun Club, of Philadelphia, next month, the trapshooting pennant belongs to the Du Pont Gun Club. And the worst they can get is a tie.

The scores in yesterday's match were 408 for Highland, 458 for the home team, a total remarkable under the circumstances, as the wind blew hard all the time. Sixty-six du Ponters put in an appearance, while twenty-two came to defend Highland.

Only one straight score of 25 was made in the team race, that by Henry Winchester.

The Du Pont team total showed three 47s, three 46s, three 45s and one 44. For the Highlands there were only two 43s for high, while a single 38 found a place. The team scores were:

Du Pont Gun Club.	Highland Gun Club.
A. B. Richardson	W. N. Cooper
H. Winchester	Tom Tansey
D. Dougherty	N. K. Hibbs
C. T. Martin	E. C. Perry
J. Roberson	R. A. Bowers
W. S. Colfax, Jr.	T. Meehan
I. Turner	P. Pfeeger
J. B. McHugh	J. J. Hallowell
W. A. Joslyn	H. Landis
C. Leedom	C. D. Crooks

The scores made by the different contestants in the team race—sixty-six for Du Pont and twenty-two for the Highlands—were as follows:

Du Pont Gun Club—Richardson 47, Turner 45, Ross 32, A. I. du Pont 40, Crossan 37, Irwin 27, Bush 38, Royman, Jr., 39, Winchester, Jr., 38, H. Winchester 47, Simon 36, Hammond 40, W. J. Highfield 43, J. G. Highfield, Jr., 41, N. K. Smith 40, Leedom 44, Curley 27, MacMullen 38, J. C. Crossan 28, Lynam 31, Jarrell 40, Martin 46, McCordle 31, Gerow 34, Roberson 46, McHugh 45, Magahern 39, Foord 37, Neely 19, Anderson, Jr., 39, Jensen 33, Guest 38, Galvin 33, Springer 39, T. W. Mathewson 37, Edmanson 35, E. E. du Pont 40, R. F. Willis 33, S. J. Newman 27, C. D. Prickett 34, W. G. Wood 42, H. L. Morgan 40, Dr. Betts 37, Wood 38, Everitt 34, Minnick 35, Dr. Patterson 42, Springer 31, Thatcher 15, W. B. Smith, Jr., 32, Reed 37, Carlon 41, Grier 31, Reis 21, Joslyn 45, Tomlinson 29, Tuchten 36, Taggart 13, Baker 22, Lofland 22, Dr. Bullock 32, Keithley 36, Haverbeck 28, Dougherty 47, Colfax, Jr., 46, Wm. Coyne 34.

Highland Gun Club—Crooks 38, Meehan, Sr., 33, Reatche 34, T. Meehan 41, Cooper 43, Biddle 37, J. Meehan, Jr., 37, Hibbs 42, P. Pfeeger 39, Flannagan 33,

## Lehigh Rod and Gun Club.

BETHLEHEM, Pa., April 5.—Englert was high gun to-day, breaking 67 out of 75. Bitterling was second. The club medal shoot was won by Englert.

Medal club shoot, 25 targets: Englert 24, Schrader 22, King 22, Bitterling 20, Smith 20, Zeigler 18, Miller 18, Steager 18, Sobers 17, Stoll 17, Fisch 16, Kethledge 16, Bruch 15, Steele 15, Werst 14, Snyder 12, Kincaid 10, Bickert 7, Erdman 6.

Twenty-five targets: Bitterling 20, Zeigler 18, King 17, Steele 12, Sobers 11.

Twenty-five targets: Rice 16, Richards 15, Miller 13, Erdman 9, Kincaid 5.

Twenty-five targets: Smith 23, Englert 20, Snyder 14, Schrader 14, Fisch 10.

Twenty-five targets: Wall 20, Bitterling 19, Zeigler 18, Sobers 15, Headman 13.

Twenty-five targets: Bitterling 21, Zeigler 20, King 20, Steele 18, Sobers 16.

Hunters' Club.

ONONDAGA, N. Y., March 30.—O. E. Carpenter won title of champion trap shot of Onondaga county here to-day, receiving a handsome gold medal, offered by the Hunters' Club as an emblem of the championship which has been competed for during the past winter.

Carpenter's shooting was excellent. In each string of 25 he smeared the horizon with 23. He also won two of the preliminary contests for the medal, the shoot to-day giving him possession. He also broke 127 out of 150 for high gun.

Thomas Lundy and Henry Burroughs each broke 41 for Class B cup. Burroughs won the shoot-off.

More than 4,000 birds were pul'ed. Fifteen shooters competed in Class A, eleven in Class B, while twenty-three others participated in the practice events only.

The scores in the Class A contest:

Table with 2 columns of names and scores for Class A contest.

The following scores resulted in Class B:

WINCHESTER

.22 Caliber

Repeaters

Three Models to Select From

There are three different Winchester .22 Caliber Repeating Rifles, either one of which gives first class satisfaction for target shooting or hunting small game. They are the Model 1903 .22 Automatic; the Model 1890 and the Model 1906. The first, as its name implies, is reloaded by recoil. After its 10-shot magazine is filled and the rifle once loaded, the only effort required to shoot it is to aim and pull the trigger. On account of the ease and novelty of its operation, there is no end of fun shooting this rifle. It's the peer of all .22s. The Models 1890 and 1906 resemble one another very closely, but differ in length and weight. Both are handsome, well-made, fine-shooting, smooth-working guns. The latter is a handy little piece which has no equal in gun value. It has a 20-inch, round barrel, fitted with sporting front and adjustable rear sights. It shoots .22 Short, .22 Long and .22 Long Rifle Cartridges, which permits the use of light ammunition for target work and heavier cartridges for game shooting. All three of these rifles are Take-Downs, and come apart easily and quickly. They can be packed in a small compass, which makes them just the thing for a fishing, boating, automobiling, or other outing trip. WINCHESTER CARTRIDGES. Whichever one of these rifles you select, use Winchester make of cartridges in it. They develop the possibilities of Winchester and other makes of rifles and revolvers to the fullest degree. Get the kind with the big W on the box.

Winchester Rifles and Cartridges are Sold Everywhere

Buffalo Audubon Club.

BUFFALO, N. Y., April 5.—Twenty-four enthusiastic shooters faced the traps to-day in the very worst kind of weather for breaking clay targets. Frank Wright again demonstrated his ability with the scatter gun, though hard pressed by Covert and Fish. The latter made the only straight of the day in the third event. Mr. Ebberts won a leg on the Imhoff and Cannon trophy, beating Wright by one bird in the last event. Mr. Rogers won an exciting shoot-off, miss-and-out from his teacher, Mr. Covert, which incidentally cost the latter a dinner at the Lafayette. Scores:

Table with 2 columns: 'Targets:' and scores for Buffalo Audubon Club.

Table with 2 columns: Names and scores for Buffalo Audubon Club.

W. C. WOOTTON, Sec'y.

Cheltenham A. C.

CHELTENHAM, Pa., April 5.—The second shoot of the Du Pont series took place to-day. Scores:

1912

A YEAR OF SUCCESSES FOR

Peters Ammunition

"Where quality counts they win"—and quality counts EVERYWHERE. The year 1912 has been one continuous round of victories for users of Peters Shells and Cartridges—far too numerous to record here in full. The few items that follow will suffice to indicate the kind of work that can be done, and is being done every day with the P brand:

"Steel Where Steel Belongs" Shells

WON IN 1912:

- Grand American Preliminary Handicap, Grand American High Amateur Average, World's Amateur Indoor Trapshooting Championship, Texas State Championship, Arkansas State Championship, Pennsylvania State Championship, Virginia State Championship, Vermont State Championship, Colorado, New Mexico and Wyoming State Championship, E. C. Challenge Cup, twice by record scores, High General Average at Post Season Tournament.

Peters Semi-Smokeless and Smokeless Cartridges

WON IN 1912:

- 3 out of 5 Matches at Zettler Rifle Tournament, 5 out of 6 Matches at .22 Indoor League Tournament, 8 out of first 12 scores of American Team in the International Small-Bore Match, including 1st, 2nd and 3rd, 6 out of 10 Revolver Matches at Sea Girt Military Tournament, including Grand Aggregate, 5 out of 6 United States Revolver Association Outdoor Championships for 1912, including Two New World's Records, New Inter-Scholastic Record, 980 out of 1,000, Astor Cup (Inter-Scholastic League).

American Amateur Championship.

PELHAM MANOR, April 3.—A considerable population of champions of one sort and another went into the discard here to-day, when the American amateur club championship was shot at Travers Island, under auspices of New York Athletic Club. Wires were crossed on the dope on the winner, as Ralph Spotts, by virtue of his consistent season's shooting, and the fact that he was on home grounds, was tipped to win honors. He didn't. He got only third, and he has not shot in such uneven form at any time during the year. He was one of the champs to add to the scrap heap. Another was Ernest von Lengerke, who by the grace of a prevailing wind, is champion of New Jersey. He was too far under the rope and old iron to be found with a grappling-iron. He landed sixth with 165 out of 200. Paul von Boeckman, Long Island champ, didn't need the sign "Use No Hooks" in looking for him. He was too far under to be spoiled by a hook. He peaked out from under about thirty-three bruised champs and near-champs, and at that he was only 13 discs below Allen Heil, who took second on 169.

The big honor went to a mighty steady in-all-weather gunner, Charley Newcomb, of Philadelphia, who had a margin of 10 in his glory, cracking 179 out of 200 scalars. George Ade, the old Yale quarter-back, chipped in on every raise, finally being called on 146. Another broad-shouldered football 'ero was E. Wigglesworth, some time back an all-American half-back from Harvard. He had the honor of heading the list of shooters, if one inverted the score-card. He smeared the ambient atmosphere with 138.

Owing to a strong bear market on scores, A. Corliss, champion of New York Stock Exchange, was "put" in 41st place. Pennsylvania had three men in the first ten, the balance being New Yorkers. New England was well represented in the entries, while not a single Western club had a shooter at the score. Much interest was manifested in the club team shoot. New York A. C. took the event with 799 out of 1000, Ralph Spotts being high cracker with 167 out of 200. Boston A. A., shooting on new grounds and not being used to the variety of steam that can ooze up from black creek mud, put up a plucky argument, passing under the wire just 11 saucers to the bad. Westchester Country Club was sighted in the offing some 14 targets later.

Among the for-wads-only disseminators of the gospel of ballistics, Les German, whose wares are à la Du Pont, tied up with high amateur on 179. It is interesting to note that this is the fourth time that Newcomb has shot for the title, and that he won it finally on the lowest score that ever has taken the title, which has been in competition ten years.

In the preliminary, held yesterday, Ralph Spotts was high gun with 183, D. F. McMahon second with 179, and G. A. Hobart, third on 178, while R. A. Faye, of Boston A. A., completed the foursome with 176.

In the inter-city team shoot, New York won with 1708, Boston second with 1692, Philadelphia third, 1609. One hundred and twenty-nine guns started in pre-

lim., and 149 in championship. Last year's prelim. winner was E. A. Randall, of Portland Gun Club, who this year made 171. Last year's champion was B. M. Higginson, who this year did not compete.

Preliminary shoot, 200 targets, scratch:

# Amateur Championship of America

Won by Charles H. Newcomb, Philadelphia, Pa.,  
April 3, 1913 :: :: Travers Island, N. Y.

Score, 179 x 200 with

## SCHULTZE

### Smokeless Shotgun Powder

Under the Most Adverse Weather Conditions.

Allen Heil, Allentown, Pa., was second in this classic event, scoring 169 x 200, using

## DU PONT

and F. B. Stevenson of New York, and L. C. Wilson of Bridgeport, Conn., tied for fourth and fifth places in this event, using BALLISTITE and DU PONT respectively.

Amateur average for two days' shooting won by Charles H. Newcomb, score 355 x 400, using SCHULTZE.

Long Run of tournament made by R. A. Faye, using SCHULTZE.

## DU PONT

also ties for high professional average and decisively wins second, third and fourth professional averages.

ANOTHER CONCLUSIVE proof of the superior shooting qualities of Du Pont Brands.

Follow the example of the winning trapshooters and use  
**Du Pont — Ballistite — Schultze**

stock of his gun a few inches longer, the result being the best score the Doctor has had so far. Kearney, Kellinger, Summerfield and Lawton are also some of the new ones that are fast catching the vets, and will make the rest of us hustle to keep in front. One of our enthusiastic members, while in a generous mood has given \$10 in gold, to be won by the member making 100 straight at any of our regular Saturday shoots during the remainder of our shooting season. Why not make it 500, brother, instead of 100 straight, and then you would be sure to keep your 10-spot another season.

### White Flyer Gun Club.

CONDITIONS appear to be unusually bright for trap-shooting in the District of Columbia this year. Recently a new club has been organized in the southeastern part of Washington, and has adopted the name of the White Flyer Gun Club. They have a membership already of sixty. They will build a club house, 16 x 20 at Twentieth and A streets, S.E., and will shoot twice a week—Tuesdays and Saturdays. The officers are: President, O. C. Ryon; Vice-President, E. G. A. Gaffield; Secretary and Treasurer, Geo. A. Emmons; Captain, H. M. Jett.

### Larchmont Y. C.

LARCHMONT, N. Y., April 6.—How much alike do the chronicles of Larchmont Yacht Club trapshoots read each week—Ralph Spotts high scratch gun, this week, 136 out of 150. Two other events also went to R. L. S., each on straight 25—accumulation cup and special take-home trophy. W. E. Ferguson, A. J. McManus, A. W. Fitzgerald, R. J. Jones, W. J. Elias, A. B. Alley, R. K. Spotts and T. Lenane, Jr., tied with full scores for take-home trophy. In the second trial, Lenane won with another 25 full.

O. C. Hoyt, Fitzgerald, Elias, Alley, Spotts and Lenane tied with full scores for monthly cup. Fitzgerald won in the second shoot-off with another full. A. W. Whiting and Alley tied for the visitors' cup, which Alley finally won.

Elias won the 100-target handicap match with a full score from 15, and won also 10-target scratch event. Whiting took the special trophy with a full, and Lenane won 15-target scratch with 14.

The final legs on non-winners' monthly cup, April monthly cup, March and April special trophies, the visitors' cup and accumulation prize will be shot next Sunday, which will wind up the trap season here.

### Siwanoy Country Club.

MT. VERNON, N. Y., April 5.—Almost perfect weather conditions were enjoyed by the sixteen members and guests of the Siwanoy Country Club at the semi-weekly shoot. C. H. Hadlock was in particularly good form, and carried off the honors in the Stevens trophy, after shooting off the tie with Messrs. H. J. Smith and G. L. Yates, thereby winning the button. Hadlock also had a full score in the Du Pont trophy. Other full scores were made by E. W. Valentine, H. J. Smith and M. R. Guggenheim.

E. W. Valentine won high honors from scratch with 85 out of 100. Capt. Granbery, of the New Rochelle Yacht Club gun section, and G. L. Yates, tied at 82 each.

As a wind-up a "Del Gross" shoot, which is based on a point system, with one point for each five straight targets broken, was won by M. R. Guggenheim with 4 points to his credit in his score of 23 out of 25. Scores:

### Jersey City Gun Club.

JERSEY CITY, N. J., April 5.—Fine weather brought a good many members and friends out to the Saturday shoot of the Jersey City Gun Club to-day, and a pleasant afternoon was spent smashing the clays. Dave Engle was high gun again to-day, finishing up with an average of 84 per cent.; George Piercy second, only one point behind him. Kearney and Dixon tied with 46 each for the season trophy, and Summerfield won the leg on the Du Pont trophy, which was the first leg won on the prizes, and will be shot for four more Saturdays, the member winning the most legs getting a silver watch fob. The scores follow, in strings of 25:

Piercy.....	20	21	18	23	24	19	.....

# Parker Gun Victories in 1912

THE highest official average for the season of 1912 at both Single and Double Targets was made with Parker Guns.

As on every previous occasion, the bona fide Championship of America was won with a Parker Gun, Mr. W. R. Crosby scoring 198 x 200 targets at 18 yards rise. Same man, same gun, made the World's Record, scoring 98 x 100 targets at 23 yards, which is a truly wonderful performance.

Small bore Parker Guns are recognized as the Standard Game Guns of America and are gaining in popularity every season with the most progressive sportsmen. For full information regarding guns in gauges from 8 to 28, address

### New York A. C.

PELHAM MANOR, N. Y., April 5.—A tail-end crew turned out for to-day's shoot; nevertheless, some good shooting was calendared. J. G. S. Dey was a veritable game hog, stuffing his hunting coat with a leg on April cup with (3) 25; spring trophy, same killing; and high handicap gun (12), 96. W. B. Ogden will bear watching by the conservator of clays. He clubbed a dent in club trophy with a full from a 2-disc draw, side-swiped C. Stein, H. Duden and A. Walker for Travers Island cup, each making their full on allotted draws, ran into another composite on take-home trophy, the rest of the picture being made up of J. Meyer. His final big kill was in scratch high gun, which he took with 87 out of 100. C. Stein filled on his third draw for Travers Island cup with (2) 21. Among the new shooters, R. E. Pardee showed up well, and shapes up well for a front-ranker next season. The summaries:

### Analostan Gun Club.

WASHINGTON, D. C., April 6.—This was opening day for Analostan Gun Club. The boys shot under difficulties. The day was cold and raw, with a stiff northwest wind. The targets soared like live things, and the scores were poor, with the exception of one of our visitors, "Mayor" E. E. Reed, of Manchester, N. H., and E. W. Ford, the former scoring 88, using a strange gun, and the latter, in the same boat, scored 87—remarkable scores considering the handicap. Mr. Reed now has the honor to represent the First Congressional District of his State in the House of Representatives. Before leaving the grounds, he applied for and was admitted to membership. The club feels honored in having his name on the rolls. Lieut. Thomas Withers, of the Navy, was also admitted to membership, and will add lustre to our organization. Following are the scores:

Shot at, Broke		Shot at, Broke	
Reed.....	100 88	Barnes.....	65 52
Ford.....	100 87	Baum.....	50 40
Peck.....	100 82	M Taylor.....	50 38
Kirk.....	100 79	Stubener.....	50 36
Parsons.....	100 78	Withers.....	50 36
Graves.....	100 69	Brown.....	50 32
Green.....	100 66	Davis.....	25 15
Emmons.....	100 64	Ryon.....	25 15
Bradford.....	100 56	McQuillan.....	25 13
Culver.....	100 52	Dulaney, Jr.....	25 9
Dulaney, Sr.....	65 54		

The contest for the Du Pont trophy, at 25 singles, resulted as follows:

Baum.....	8 25	Parsons.....	3 22
Kirk.....	4 25	Emmons.....	12 21
Ford.....	5 25	Culver.....	13 21
Graves.....	13 24	Taylor.....	1 19

Baum.....	5 23	Bradford.....	3 14
Peck.....	1 22	Brown.....	1 13
Dulaney.....	1 22		

MYLES TAYLOR, Sec'y.

### Hercules Gun Club.

TEMPLE, Pa., April 5.—The Hercules Gun Club target shoot was fairly well attended, considering the extremely hard gale, thus making shooting exceptionally difficult. The scores are very creditable. Lee Wertz and E. H. Adams tied on 97 out of 105 for first honors. Second honors fell on J. J. Marberger, the light-weight, with 92 out of 105. "Good for John."

Les German paid his respects to the boys—a jolly, good fellow, with several good new fish stories now and then. That 15ft. shark must have been a match for Les. Bartz shot the program, but will get a new gun for our next shoot. Good for George. Miller shot in good form to-day in several events. Hiram, an old-timer, shot a good clip, showing the boys some of his early days.

Kissinger, Yader and Schaeffer are picking up. Practice is needed occasionally, which will improve their scores. Calhoun arrived late and scored 46 out of his 65.

Several of the boys intend to go to Rittersville on May 3 to bring the high honors to Reading. Scores:

Shot at, Broke		Shot at, Broke	
German.....	95 88	Yader.....	85 50
Wertz.....	105 97	Hiram.....	70 51
Adams.....	105 97	Noll.....	75 53

### Evanston Gun Club.

EVANSTON, Ill., April 3.—Twenty-eight shooters took part in the weekly event at Evanston Gun Club on March 29 and 30. Scowley and Kennicott were tied for high amateur honors with a percentage of 93. Schiele won one of the club spoons, and seven were tied for the second spoon. The leading scores follow:

Scowley.....	25 23 23 22
Kennicott.....	23 23 24 ..
Carman.....	23 21 24 21
Adams.....	22 22 23 23

Dehner.....	29	Campbell.....	26
Curlow.....	29—371	F Short.....	26—305

**Saratoga G. C.**

SARATOGA, N. Y., The week-end shoot of the Saratoga Gun Club brought out a small field of shooters owing, perhaps, to the threatening weather. Fay was the star performer. Scores were fair in most instances with Kearney leading the amateurs, and Fay his professional partner. Bullard's newcomer broke 21 out of 25 and 19 out of 25 first time out. This was considered a good performance for a novice. The following are Friday's scores:

Shot at, Broke		Shot at, Broke	
*Hassam	85 78	Downs	60 43
*Fay	85 80	Hammond	50 24
Corey	70 49	Nolan	25 17
Bullard	60 43	Van Aernam	25 14
Kelly	60 23	Vandenburg	25 12
Kearney	60 50		

The Sunday shoot of the club brought out a good field of starters, and though a wind blew across the traps, improved scores were made by the shooters present. Sesselman was high man, leading Corey and Kelly by one bird. The following scores were made:

Shot at, Broke		Shot at, Broke	
Sesselman	50 36	Freeman	25 12
Corey	50 35	Flynn	25 3
Kelley	50 35	Oliver	25 4
Green	50 32	Mann	25 13
Chamberlin	50 30	Wentworth	25 10
Jackson	50 26	Montanye	25 10
Costello	25 15	Heslin	25 12
Manigault	25 15	Hammond	25 12
Colcord	25 14		

Harry Levenston was out of town, or the club would have pitted him against Fay and Hassam. Some class to the Saratoga shooter yet.

Howard Bullard certainly has an eye for cart-wheels even though he is a bank president. Fay is a good hanging sportsman, and the club members were fortunate in having him present.

The club extends an invitation to all shooters, no matter what day. We can accommodate them with a shoot of some kind, and they will enjoy it, too. Trap-shooting has always been a favorite sport here, but

died off for a few years. Too much purse shooting and events of 25 and 50 birds when ten would have ruled and no handicaps. Clubs should consider this and make the game more economical for the novice and shooter of small means.

**Westwood (Ohio) Gun Club.**

CINCINNATI, Ohio, April 6.—There was a good attendance at the shoot, and weather conditions were fair, the usual wind being absent, only an occasional gust from the hills affecting the flight of the targets. The best score of the day was made by C. Rybolt, who broke 44 out of his last 50, and 85 out of the 100 targets shot at. L. J. Squier, of Pittsburgh, was a visitor and broke 93 in the five events he entered. W. J. Heidecker made his first appearance at the traps to-day, and in his second event broke 60 per cent. of the targets. Schneider did his best work in the first two events, breaking 76 per cent. La B. was not in just the right form to-day and failed to break his usual number. Sander and Butts were cut off from their sport at the Cincinnati grounds, and came out here, but did not do so well as they do at home. The targets were hard, and once in a while one would take a sudden jump, which caused a miss. Disser used a strange gun, and the result was a long string of goose eggs. Jones was trying out a new gun, which accounts for the 10 in his score, as well as the other low figures. With the more even flight of targets, the scores of the members will improve. The Stevens trophy series will be started very soon. Rybolt is getting ready for the G. A. H., and he does not propose to finish last by quite a few.

Targets:		25	25	25	25	25	Total

**Roanoke Gun Club.**

THE 1913 shooting season of the club was begun on Saturday afternoon, April 5, with forty shooters, enthusiasm high, and prospects bright for an excellent season of the attractive sport. Good shooting, however, was made very difficult by reason of a high wind that swept the grounds, but in the face of this handicap some excellent scores were made. The club was delighted to have as its guests a squad of shooters from our nearest neighbor, the Lynchburg Club. Their visit was thoroughly enjoyed by the club, and it is hoped that they can come often. From now until the last week in October the weekly shoot will be held on each Saturday afternoon at 3 o'clock, and it is hoped that all members of the club will come out and enjoy the sport. The scores made at Saturday's shoot are as follows:

Shot at, Broke		Shot at, Broke	
*Willis	100 96	Hooper	100 74
Anderson	100 92	Boyd	100 74
Fox	100 92	Dalby	50 36
Jamison	100 90	Walters	50 35
Stockley	100 89	Mitchell	100 70
Watson	100 89	J. B. Cumbie	100 70
McFerrin	50 43	G. C. Cumbie	75 52
*Fisher	100 84	Hunt	100 68
Dawson	150 126	Moore	100 66
Dyer	50 41	C. T. Jennings	75 49
Elliott	125 100	Shepherd	100 65

Price	50 38	Cooksey	50 25
Bloxton	100 75	Nelson	50 12

\*Professionals.

**Paleface Gun Club.**

WELLINGTON, Mass., April 5.—Dr. Newton, of Revere, led the field of eleven trapshooters at the Paleface traps to-day, breaking 94 out of 100. He was forced to break his last 29 targets straight in order to top his nearest rival, Wilder, of Fitchburg, who broke 93. A return 10-man team match between the Boston and New York trapshooting teams will be held at the Paleface grounds shortly. Summary, 100 targets:

	20	20	20	20	20	Total
Dr. Newton	17	19	19	19	20	94
Wilder	17	18	19	18	19	93
*Osborne	15	17	20	19	19	90
Burnes	18	16	19	18	18	89

New Bedford, Mass.

Ask your watch repairer whose oil he is using on your watch.

Will Not Gum or Chill

**Hudson Gun Club.**

JERSEY CITY, N. J., April 6.—The following scores were made by the members of the Hudson Gun Club at the regular bi-monthly shoot to-day. Harry Burlington and Billy O'Brien fought it out for high average, and it was a very close race, Burlington winning out by one target. In the Schortemeier contest Billy O'Brien was high with 37 for Class A. Kelley, with 39, won a leg on the prize in Class B, while the winner in Class C was Jack Williams with 32 for his score.

The weather this morning was of a mixed variety, with sunlight, snow squalls and wind blowing across the traps at 70 miles an hour, so the scores had to suffer accordingly, and when we could keep in range of the 20 mark, we knew that we were doing some shooting.

Dr. Downes and Harry Drury journeyed to the grounds this morning to settle a little difference that sprung up since our last shooting date, when Drury trimmed the Doctor. The outcome of this morning's race was: Downs 33, Drury 31. As they each have one win to their credit, a third race is looked for in the near

future, to see who is to be called Champion of Englewood.

On April 20 we hold our next shoot, when the last contest for the Schortemeier trophies will take place, and as the shooters in their respective classes are very close in their scores, a good keen contest is scheduled to decide the winners. Harry Burlington promises to bring the Gautier Band along to root for him and help him win, so come out and visit us. Every body welcome to shoot at the Hudsons.

Targets:	25	25	50	25	25
J Williams	10	16	32	13	16
C von Lengerke	18	23	33	16	18

H W Drury	11	10		15

**Cleveland Gun Club.**

SOUTH EUCLID, O., April 5.—The regular weekly club contest of the Cleveland Gun Club, held to-day, at shooting park, Mayfield road, was somewhat of a shoot, seventeen shooters attending, and the scores are good for the day, as the wind blew a gale, pushing the targets in all quarters, high and low, which made the shooting very hard.

P. R. Blakeslee captured the high gun prize for the day by breaking 116 out of 125 targets shot at. Doolittle was a good second with 113. The surprise of the day was the appearance of Mr. R. C. Hopkins, who has been one of the mainstays of the club for a number of years, but for the last six months he has been somewhat under the weather and has not been able to attend the shoots, and his appearance to-day was a welcome one, and we hope to see him at the old stand for many years to come. Scores follow:

Event No. 1, semi-annual trophy, 50 targets: Doolittle 47, Blakeslee 45, Burns 44, Hogan 43, Weeden 42, Stepp 41, Doctor 40, Stevens 40, Noble 40, Stone 39, Hopkins 38, Freeman 37, Gould 37, Rockwell 36, Hartman 31, Thorp 29, Brown 22.

Event No. 2, annual trophy, 50 targets: Blakeslee 47, Doolittle 44, Docton 43, Burns 43, Hogan 41, Noble 41, Weeden 39, Brown 38, Stevens 37, Hartman 37, Stone 36, Thorp 35, Hopkins 35, Rockwell 34, Stepp 33, Freeman 31.

Event No. 3, quarterly trophy, 25 targets: Blakeslee 24, Stepp 23, Doolittle 22, Weeden 21, Docton 20, Jack 20, Thorp 18, Hopkins 18, Brown 18, Sapp 18, Hogen 18, Stevens 17, Stone 17, Hartman 17, Noble 16, Grant 16.

F. H. WALLACE, Mgr.

**Smith Gun Club.**

NEWARK, N. J., April 5.—Nearly three thousand birds were thrown from the traps to-day. R. A. Hensler, J. Reed and J. Baldwin made perfect scores of 25 straight. The scores:

R A Hensler	22	24	25	17	21	23	22	17	21
J Baldwin	24	24	23	24	25	24	24		
Wm Hassinger	20	22	23	23	23	23	24		
J Reed	23	22	20	20	20	25	29	20	21
H Hassinger	18	22	21	21					
W H Dickenhorst	22	18	19	22	22	22	23	23	
J Hudson	19	18	17	21					
H Higgs	24	23	24	24	23				
J C Weiler	21	22	23	23	22	23	24	23	
Jas A Murphy	19	18	18	18	20				
S Thornton	20	21	19	19					
E Sickley	22	21	23	19	20	22	23		
L Tompkins	21	18	21	17					
M Weiler	15	15	24	19					
E Sims	16	17	16	19					

**Medford Gun Club.**

MEDFORD, Okla., April 4.—Our club held its regular monthly handicap shoot this afternoon. Dr. Blood won the trophy, a silver fork, shooting 22 out of 25 from the 20yd. line. Handicap scores:

	Yds.	T'l.		Yds.	T'l.
M Brown	17	18	Blood	20	22
Bunch	17	17	Wilson	21	18
Hutchinson	17	15	Hardy	21	17
Soucek	19	18	Walling	21	14

The following scores from the 16yd. line:

	Shot at.	Broke		Shot at.	Broke
Hardy	50	42	Hutch	25	19
Bunch	50	41	Wilson	30	22
Walling	40	32	Antle	50	36
Soucek	50	37	Young	25	18
Blood	30	23			

Dr. Antle and Mr. Young were guests from the Renfrow, Okla., Club. W. HARDY.

**Crescent A. C.**

BROOKLYN, N. Y., April 5.—Shooting at the Crescent Athletic Club came to an end to-day, for the feature was at 200 targets for the championship of the season of 1913. The winner was J. H. Vanderveer with 178.

The shooting committee explained the holding of two title shoots within as many months by the statement that the championship won by Mr. Blake was for the season of 1912. According to the committee the club always is a year behind in its title events, and as there is a strong probability that this is the last season of shooting at Bay Ridge, the committee decided to hold the 1913 championship to-day rather than wait for another year. It was rather hard lines for Mr. Blake, however, who only held the title for two months instead of the full year.

Vanderveer won also the Take Home Trophy with 95 out of 100. J. H. Hendrickson was the high gun in the Take Home shoot, but being a non-member could win.

**Indianapolis Gun Club.**

DIXON led the target breakers at Indianapolis, Ind., on April 5 with 91 per cent., and the performance was better than told by the figures, as a half gale blew across the flights which deflected a straightaway—if missed—fifty feet from its course. Barr, Parry and Edmonson were bunched in the second place, the former getting the only straight of the day.

Edmonson, 20 yards, attached another spoon, which gives four in a row. The scores follow.

Practice:		Shot at. Broke		Shot at. Broke	
Dixon	110	100	*Barr	60	53
Parry	110	96	Skaden	50	38
Edmonson	110	96	Hofer	40	30
*Vietmeyer	100	78	Alig	40	29
Neighbors	85	62	Britton	40	25
Coss	70	56	Black	40	27
Wilson	65	51			

Spoon events, 50 targets:		Yds. T'l.		Yds. T'l.	
Dixon	20	36	Hofer	16	41
Parry	20	34	Alig	16	35
Edmonson	20	42	Black	16	36
Neighbors	16	34			
*Barr	20	37			R. R.

**Birmingham G. C.**

BIRMINGHAM, Ala., April 5.—Eighteen shooters were at the weekly shoot of the Birmingham Gun Club.

H. C. Ryding made a splendid score in the wind, breaking 94 out of his 100 shot at.

John Fletcher was in second place with 89. Most of the shooters were shooting well, considering the hard conditions. Scores as follows:

Shot at. Broke		Shot at. Broke			
H. C. Ryding	100	94	R. F. Myers	100	70
John Fletcher	100	89	O. L. Garl	75	57
G. Hillman	100	83	Kidd	75	52
E. M. Cornwell	100	83	L. Myers	75	48
Randolph	100	79	Mrs. Garl	75	44
Lee Moody	100	77	Sid Lee	75	32
P. H. Pitts	100	76	T. B. Dodge	50	30
Dr. Sellers	100	71	Oden	50	27
R. H. Baugh	100	70	P. Toulman	50	25

**Salem County Rod and Gun Club.**

SALEM, N. J., April 4.—Our club will have its annual planked shad supper on Wednesday, April 23, and the spring shooting tournament the following day. It is our desire to make these events the finest in the history of the club. The proceeds of the shoot will go toward a fund for the new club house.

W. H. HARRIS, Vice-Pres.

**Daniel Boone Gun Club.**

MARTHASVILLE, Mo., April 4.—Only one squad was out to-day, but the day was a nice pleasant one for a shoot. Bollman was high man and won the Du Pont picture trophy. Scores, each man shooting at 25 targets: Bollmann 24, Wilson 22, Berg 20, Koelling 18, Meyer 15. J. O. WILSON, Sec'y.

**Rifle Shooting**

**Intercollegiate Rifle Matches.**

WASHINGTON, D. C., April 5.—The inter-collegiate shooting matches for the gallery championship of the United States came to an end last week with an unbroken series of victories for Harvard University. This rifle team wins the Eastern League championship, closely followed by the Massachusetts Agricultural College with only one defeat and Princeton University third with two defeats.

In the Western League, the series resulted in a tie, which must be shot off between the West Virginia University and Iowa State University teams, both having won twelve matches and lost one. The University of Minnesota is a close second with only two defeats to their credit. The team winning the shoot-off between West Virginia and Iowa will shoot the match to determine the United States championship with Harvard University, when the indoor college rifle shooting for the season of 1913 will be closed. The results of the last match of college series are as follows:

Eastern League: Harvard, 943, vs. North Georgia, 938; Mass. Aggics, 966, vs. Mass. "Tech," 960; Princeton, 922, vs. Dartmouth, 912; Norwich, 947, vs. Lehigh, 937; Cornell, 912, vs. Maine defaulted; Vermont, 922, vs. Clemson, defaulted; Rhode Island, 822, vs. Columbia, defaulted.

Western League: West Virginia, 968, vs. Purdue, 932; Iowa State University, 961, vs. University of Wisconsin, 922; Michigan Agricultural College, 945, vs. University of Nebraska, 865; Washington State College, 908, vs. University of Kansas, 841; University of California, 924, vs. U. S. Veterinary College, defaulted; University of Minnesota, 950, vs. University of Missouri, defaulted; Oklahoma A. & M. College, 909, vs. Louisiana State College, defaulted.

Property For Sale.

Property for Rent.

**MAINE CAMP.**

In Moosehead Lake District, on beautiful lake ten miles long; best shooting and fishing and finest spring water in the State. Accommodates party of eight or ten besides guides. Completely and comfortably furnished, including boats and canoes, and ready for immediate occupancy. Rent for season, \$500.

**MOORE & WYCKOFF**

546 Fifth Ave. Tel. 1263 Bryant New York City

Resorts for Sportsmen.

**NEWFOUNDLAND.**

A land teeming with SALMON, TROUT and CARIBOU, besides other game. I provide outfits and guides. For particulars apply J. R. WHITAKER, "The Bungalow" Grand Lake, Newfoundland.

**TROUT FISHING**—A proposition of interest to gentlemen desirous of having good trout fishing. My idea is to have FOREST AND STREAM readers form a club of about twenty members, whose annual dues would be moderate. My property is situated in Rockland county, New York State, an hour and a half from New York City. It comprises 30 acres, half woodland and half meadow. It has two streams and two deep spring-fed ponds of about two acres each, which are stocked with trout, and produce an abundance of natural food. If you are interested, write to Dr. M., care Forest and Stream.

## The Trail of the Bull Dog

An account of the wonderful 50,000 mile auto trip of Charles G. Percival, M.D., written by himself.

**IF YOU LOVE OUT-DOOR LIFE**  
you will revel in this book. It incarnates the spirit of the woods and silent plains, the mountains, lakes and rivers.

From the White House at Washington, where Dr. Percival delivered a message to President Taft, to the wilds of Alaska and the Yukon is a big step, but Dr. Percival made it, and was the first man who did by auto, traversing 44 states on the way, climbing 11,000 feet by auto, crossing deserts where he almost lost his life, and calling on Diaz, Madero, the Lord Governor-General of Canada, the Governor of Alaska, thirty-nine state officials and four hundred mayors.

### INVALUABLE FOR TOURISTS AND CAMPERS

The authoritative information on food and equipment for out-door life given in this book is alone worth many times the price of the volume. And it will disclose to you places near at hand and far afield that you will wish to visit for fishing, hunting or sight seeing. Illustrated by over 200 splendid views. Reads like a tale of adventure where pleasures and hardships are agreeably mixed, yet is the true story of the most remarkable trip ever made by automobile.

**YOURS** with one year's subscription to **HEALTH MAGAZINE** for only \$1.10. **HEALTH** is the oldest magazine in America devoted to physical culture and out-door life, an illustrated monthly. Regular subscription price \$1 yearly.

### Bulldog Breeders' Ass'n of America.

THE secretary of the association has regretfully received the resignation of W. H. Sawyer from the Board of Governors. Mr. Sawyer's business interests demand his absence from New York for some time to come, and he feels that he cannot continue as a member of the Board and do justice to the position.

The Grand Central Palace will be the scene of the Breeders' sixth open show on May 31 next. While the committee had hoped to introduce a novel venue to the dog-showing public, yet the Palace lends itself admirably to dog shows because of its central and most accessible location.

The Bulldog Club of America, Inc., has graciously accorded the necessary permission to the Breeders, enabling them to apply for license with a four-point rating from the A. K. C.

In addition to their usual two bronze medals the Bulldog Club, Inc., of England, is this year offering an additional two of silver, so that with the offerings of the Société Canine de Savoie and the Bulldog Club of New South Wales, the special list in the premium list of this year's Breeders' open show will partake of a decidedly foreign flavor.

A. D. GILLETTE.

### Kennel Notes.

ROBERT LOBBAN, of New York, and owner of the crack heavyweight bulldog Deodora Monarch, has accepted an engagement to judge that breed at the L. K. A. show in the Botanical Gardens, London, at the end of May.

George S. Thomas, of Hamilton, Mass., who if the rule prohibiting professional handlers from judging in this country goes into effect in May will be barred from acting in that capacity here, will be one of the judges at Brussels in June and also officiate at the first show held by the Wire-haired Terrier Club in England.

The officers of the American Fox Terrier Club for the ensuing year are: President, Winthrop Rutherford; Vice-President, C. W. Keyes; Secretary and Treasurer, H. H. Hunnewell. Besides having \$1,000 invested in securities the treasurer's report showed a cash balance of \$387.

## Kennel.

## For Sale

Midkiff Babette (A.K.C. 135517), white and liver Pointer bitch, whelped April 19, 1909. Sired by Champion Devonshire Maxim out of Midkiff Baby. Babette has won first and second on the bench, is a proven brood bitch and a capital mother. Owing to the overcrowded condition of our kennels, will sacrifice for \$25.00.

**SOMETHING ABOUT BAIT-CASTING.**

*Continued from page 466.*

reel, lines, hooks and three or four representative American artificial baits.

The art of bait-casting is soon learned if you will go at it with patience and calculation. You will know when you stand with your thumb on the spooled line, ready to cast, how much value there is placed on that member. You must learn to gauge distance and instinctively know how much force it will take to send the bait that distance. When you are ready to cast, the thumb is pressed down on the spooled line. The rod is then swung backward and forward smartly, at an angle of about forty-five degrees. As the rod comes forward it is brought out nearly level and is held so while the line is running out; when the bait falls, the thumb is brought down on the spooled line, the butt of the rod is pressed against the stomach and the reeling-in process begins. It is very simple to the man who is born careful and calculating; but the man who is careless and inattentive will have his hands full and may give up the pastime in short order. Be sure and use your artificial baits, and remember and put it up as a motto to follow, that one bass caught with much work, when you are using care and drawing upon your experience, means more than a whole sack full caught otherwise. You will know you outwitted an ingenious old fellow of the pads. By all means use the artificials, but do not forget the live bait.

When the bass have retreated to the deeps in the middle of the summer, the frog bait and the artificials may not do their duty; then they may be taken by aid of a long line baited with the afore-mentioned helgramite, worms, etc. In the evening hours the bass will come in toward shore and may be taken in the pads. Bass lie along sandbars in the middle of the summer and an underwater bait lowered to the right depth will get them. It is foolish to stop your bass fishing, as some will, right after the bass have retreated into the deeper water. Then is the time you should get out and try your luck; in fact, it is then you must work for it. There is no sport where everything comes your way. One failure should be counted a blessing and ten of them but a further encouragement to go in and win.

Some of the best fishing may be had at night, using the moonlight, or glowing baits. Such baits are coated over with a phosphorescent preparation, which, held to the light for a few minutes to absorb glowing power, will suffice for a night on the lakes. It is said that the bass feed up until twelve o'clock midnight. I have caught bass up till almost that hour, using the phosphorescent baits. Trolled through the water, they look ghostly and awe-inspiring, but it is certain the bass are not over-shy at them, as a trial will show you. Study the bass. It is only through study that you will be able to fully appreciate the pastime, and it is one of the best that is offered you.

Mention is herewith made that fly-casting makes for a splendid sport indeed; in fact, it is in a class by itself. The rod for fly-casting for bass should be slightly heavier than the trout rod, and it should have a stiff backbone. My steel rod has proven to be very successful in this branch of the pastime as well as on the trout streams. It has been condemned as being

too metallic; that it has not the "feel," but I have found it worthy of notice and have had success with it. It is a rod you can rely upon for rough work. It has resiliency and pliancy to a marked degree. The price readily comes within the means of the average man. Of course, the bamboo trout rod can be used very successfully. Light tackle will give you a good time, and if you land your fish without mishap you are lucky. But the steel rod clings on like a tenacious thing of life. Use your enameled, waterproof silk line and your single action reel, with six-foot leader. Bass flies will be found in the lists of reputable makers.

**The Boy Scouts of France.**

THE French name of the movement that corresponds to the organization of Boy Scouts of America is La Ligue d'Education Nationale, says The Outlook. Its president is M. Louis Liard, the eminent authority on philosophy and ethics. The members take a pledge never to speak ill of their country before strangers, and under any circumstances, when they have occasion to speak of French public life, "to discuss discreetly what is bad, to be silent about what is middling, and to extol what is good in French public life." The local groups are made up very much as they are in America and England, and the members have naturally come to be known as "éclaireurs," scouts.

**The Bend in The Road**

By TRUMAN A. DeWEESE

It is the story of the rejuvenation of an abandoned and neglected farm by a city man. The contrast between city and country, the description of rural types and their attitude toward the city farmer, the loving companionship of dumb animals, the sermons in trees and blossoms, are drawn with a delicate humor and quaint philosophy that is irresistible. It is not a manual on agriculture or horticulture, and yet it abounds in suggestions that testify to the author's practical experience in "making things grow."

*Illustrated, \$1.00 net.*

**Motor-Boating for Boys**

By CHARLES G. DAVIS

Written by an expert, this practical handbook will be of immediate value to motor-boat owners of all ages. It not only explains the details of the mechanism, installation and operation of motors, tanks, carbureters, etc., but also sets forth the various chances for trouble, and the difficulties which may be encountered, and shows how they are to be avoided or overcome.

*Illustrated, 50 cents net.*

**Harper's Book for Young Naturalists**

—By—  
ALPHEUS HYATT VERRILL

Written with the aim of helping boy collectors to gather and arrange their collections intelligently. Taxidermy, trapping, catching and mounting insects, dredging at the seashore—all are explained. Directions are also given for the making of a museum. The illustrations are all original.

*Fully Illustrated. \$1.50 net.*

**Harper's Outdoor Book for Boys**

By JOSEPH H. ADAMS

A practical book with clear directions how to make all kinds of outdoor things like windmills, aeroplanes, boats of various sorts, etc., and detailed descriptions of other phases of outdoor life.

## TRAPSHOOTING NOTES.

### Evanston Gun Club.

EVANSTON, Ill., April 7.—A stiff wind Saturday made the targets jump so that good scores were hard to make. Seventeen shooters turned out at the Evanston Gun Club, and considering the difficulties, some good scores were registered. The club spoon was won by Watson, who was tied with Kennicott for high amateur honors for the day.

Three professionals, Hymer, Kirkwood and Matthews, visited the club, but did not shoot up to their usual form, and five of the club members outshot them. The five holding this honor were: Watson, Kennicott, Bistle, Raine and Carman. Kennicott captured the prize in doubles, making high score over all. The following are the scores for the day:

	24	25	22	21	Per Cent.
Kennicott	24	25	22	21	92
Watson	21	23	25	..	92
Bristle	23	23	23	..	90
Raine	22	23	..	..	90
Carman	21	21	22	..	85
*Hymer	23	21	23	20	84
*Kirkwood	22	19	23	20	84
Goode	21	22	19	23	82
Millen	22	20	17	19	78
Phalen	19	19	19	20	78
Gamble	16	21	..	..	74
*Matthews	15	19	20	14	68
Milner	8	18	15	18	59
Scowley	17	11	13	14	55
Marshall	11	15	..	..	52
Foerster	10	16	13	..	52

\*Professionals.

In the double event, 12 pairs, Kennicott scored 17, Goode 16, Hymer 14, Matthews 14, Watson 13, Phalen 12, Bristle 12, Foerster 10, Kirkwood 9.

Sunday was an ideal day and fifteen shooters took part in the day's program. The club spoon was won by Mr. Hall, after a very exciting race. In the first round six were tied, and in the shoot-off three were eliminated. In the third shoot-off with Hanson, Phalen and Hall as contenders, Hanson was eliminated by one miss, leaving Hall and Phalen to shoot in the finals. Hall had a handicap of 2 and Phalen 1. Both shooters broke 22 targets, giving the spoon to Hall by one bird.

Phalen was high man for the day with a percentage of 89; Scowley was a close second with 87. The scores follow:

	23	22	19	24	22	22	24	Per Cent.
Phalen	23	22	19	24	22	22	24	89
Scowley	21	24	21	23	21	22	21	87
Hall	19	19	24	22	23	..	..	86
Darby	22	21	..	..	..	..	..	86

W. J. PHALEN, Sec'y-Treas.

### Orange Gun Club.

ORANGE, N. J., April 12.—Dr. George W. Wakeley led for the Von Lengerke cup, and J. Guggenheim was high for the Dukes cup. Haas trophy and Fly Rod went to Von Lengerke. The scores were as follows:

Von Lengerke cup, handicap:					
Wakeley	3	25	Mosler	4	24
Guggenheim	3	22	Haas	4	20
Von Lengerke	0	21	Dukes	0	21

Dukes cup, handicap:					
Wakeley	2	36	Von Lengerke	0	49
Guggenheim	5	50	Mosler	8	47
Dates	8	33	Haas	8	41

Haas trophy, Olympic, handicap:					
Wakeley	1	16	Mosier	4	25
Dates	4	13	Haas	4	21
Von Lengerke	0	25	Dukes	0	23

Fly Rod competition:			
Wakeley	22	Mosler	23
Guggenheim	21	Haas	19
Dates	20	Dukes	18
Von Lengerke	25		

### Clinton Hill Gun Club.

NEWARK, N. J., April 12.—A new gun club was formed to-day, to be known as the Clinton Hill Gun Club. W. L. Sheppard was elected president, and H. V. Holman secretary and treasurer. The members will shoot every Saturday afternoon on the club traps in Union. To-day's scores:

Events:	1	2	3	4
Dr J R English	15	19	20	19
James L. Smith	21	21	22	23
J W Mason	21	24	21	21

**New York A. C.**

PELHAM MANOR, April 12.—To-day brought the final shoot for the year at Travers Island, and was, as usual, designated as annual club championship, the program being 200 scalars. Ralph L. Spotts wound up a wonderfully consistent season of winnings by taking title on 188 in a vicious rain storm. J. H. Vanderveer, a recent addition to the Mercury foot bunch, took place on 178, with last year's champion, Dan McMahon, tied for third with Frank Hall on 177. Hall won the shoot-off with 22 out of 25. Vanderveer won high scratch gun with 92 out of 100. Winners of other shoots were:

- First championship string, scratch, 25 birds: Stuart Scott 25, R. L. Spotts 25.
- Second championship string scratch, 25 birds: D. F. McMahon 25.
- April cup, handicap, 25 birds: A. E. Ranney (1) 24.
- Club trophy, handicap, 25 birds: J. H. Vanderveer (1) 26.
- Spring trophy, handicap, 25 birds: J. H. Vanderveer (2) 27.
- Travers Island trophy, handicap, 25 birds: G. F. Pelham (4) 29.
- Seventh championship string, scratch, 25 birds: J. G. Dey, 24.
- Eighth championship string, scratch, 25 birds: R. L. Spotts 25.

Day trophy, handicap, 100 birds:

J H Vanderveer ... 7 99	D F McMahon ... 2 87
F Hall ... 8 97	J W Hessian ... 20 86
A J McManus ... 15 96	S Scott ... 0 86
J G S Dey ... 10 95	W B Ogden ... 7 86
G J Corbett ... 4 94	C W Billings ... 2 85
G F Pelham ... 4 93	R R Debacher ... 15 85
A W Church ... 12 89	O C Grinnell ... 5 85

## “Shooting the Wary Old Canada”

By SANDY GRISWOLD

**H**AVE you ever indulged in a mid-winter goose hunt out on the icy old Platte?

I have many and many a time in the misty old past, and much health and much happiness have I enjoyed therefrom, and I hope to experience the thrills of many another such a hunt, although year by year the chances are growing slimmer.

All day the wary old Canadas are off on the winter wheat, alfalfa or barren cornfields, and when they come in to the river, in the early dusk is the best time of all. They are up and off in the mornings, in these latter days, while the stars are still spangling the firmament, much

too early for even the hardiest and gamest of the old wildfowlers.

I was out with Sam Richmond a few years ago, Ray Welch and I; and that was the last winter goose hunt that I have ventured upon. We had a snug blind in the tall pampas grass that for some reason or other has always grown on Crook's Island in the Platte, east of Clarks, and while we saw several distant flocks of geese during the cold, bleak day, not a bird came into our decoys, except a pair of American mergansers which, I regret to say, we needlessly killed. But we stuck it out until evening; in fact, did not get away from the tow-head till well after dark.

It was intensely cold, but with the sky only partially clouded over and just as the dimmed sun began to lower toward the crimsoned western horizon, big, black, ragged clouds, heavy with snow, began to thrust themselves into view, and we became avid with eager expectation, for Sam said the geese were bound to come. More and more lowering grew the skies, and flurries of big, dry flakes soon began to fill the air. The sun down, the cutting wind turned into a fierce gale, and swept with shrill cries across the vast expanse of snow-covered ice, under which the rushing waters added their muffled roar.

“There they come!” cried Sam at last, and

CANADA GEESE.

in a shivering line we crouched behind the low willows we had stuck with much difficulty into the frozen ground among the drift and touseled grass.

Through the flying scud, off over the north shore, we saw the geese—some fifteen or sixteen big, black fellows, all in full cry like a pack of fabled hounds of the storm. They were flying with broken ranks, the fiercely scolding winds causing each bird to pilot for itself, although many yards in the lead was a wise old gander. They were still well up in the air, for in spite of the wild and boisterous weather, they seem to know that danger lurked below.

While Ray and I snuggled close down alongside one another, old Sam was on his knees calling in the very best "goose" to the passing flock. We were about abandoning hope, however, for the birds soon passed down the forbidding shore, quite a ways to the east of us, when Sam suddenly exclaimed in an excited voice: "They hear me! They are turning, and we are going to bust a few of them!" and then, with his fist in funnel-shape to his mouth, he again sent forth that guttural auh-unk, unk, unk, and in the dim gray of the straggling storm's snarling smudge, we saw the flock, curving over the ice and spiraling our way. Then we forgot the hoarse voice of the storm, forgot the bitter cold and the oncoming night, as that raking fever of excitement and expectancy, which I cannot describe, seized us in its wildest ecstasy.

"They are coming right in!" and old Sam's weather-beaten form bent lower among the tall grass blades, still sounding that ghostly call that was luring those big black birds on to their doom.

"They see the decoys; don't move, but be ready," and Sam cautiously poked his old gun out through the thin willows.

On came the geese through the flying gray of the winter night, the termagant winds rudely buffeting them, now to this side, now to that, as if to shield them from some intangible evil, the old gander flapping slower, until all the flock were abreast, and then with a louder honk, a single prompt trumpet blast, he drew them down lower over the whitened ice, and they all came winnowing silently along, like floating

spirits in gray, toward the decoys grouped on the lateral bar extending out from the islet on which we crouched.

The scentless smell, if I may use the expression, of the blast and its swirling snows was in our nostrils, and the wintry stress was as the zephyrs of June in our half frozen frigid faces. Through the gloom we could now plainly discern the approaching birds, all silent as floating vapor, as if vaguely fearing the catastrophe about to overwhelm them.

On they came from out the vortex of wind and snow, lowering as they advanced, until, altogether, meeting bravely the full savagery of the gale against their ashen breasts, they dropped their black legs, outstretched their broad pinions, to get the proper equipoise, to land them on the hard, unyielding bar, and on they came.

At this almost frenzied climax, Sam, jumping to his feet, fairly yelled: "Give it to them!"

A brilliant flash of lightning vividness burst athwart the bleak scene, revealing the troupe of actors that thronged that cold and wintry stage. Six sharp reports broke in loudly against the sullen baying of the gale, and five big geese, as if struck by a single bolt, were fluttering in the last throes of their wild life upon the icy bar.

Sam was the first to shoot. At the crack of his first barrel, the grizzled old leader with folded sails and drooping white collared neck, came down with a plunge, and at his second, another relaxed his hold on the trenchant air, and with legs outstretched beneath it, long neck and black bill pointing skyward, fell slowly in a revolving whirl of white, black and gray. Quickly, so quickly as to seem to be all mingling together, three more tumbled to the whitened sands, while the remainder of the flock, pouring forth a flood of the most far-reaching and distraught cries that ever rolled from living throats, were wheeling and sheering in almost endless confusion across the black night, and then, still screaming that ghostly honk, vanished, darting far out over the murking river into the whirlpool of the night.

"That's all," was the laconic and matter-of-fact declaration of Sam, and while Ray and I gathered the still warm and throbbing bodies

of the dead Canadas, he hurriedly, almost spitefully, jerked up the decoys from their frozen sockets, slapping them together with a clang, and shoving them far back under the tangle of the willows, and shouldered his gun and plodded off stolidly through the swirl of the storm for home.

Two hours later we were all in shirt sleeves and stocking feet gathered around the old base-burner in the little low ceiling room of the legendary old West hotel, clamoring like another incoming flock of unsuspecting geese over the wild mix-up on the bar in the truculency of the night's storm.

Who missed his double, that was the weighty question. I said it was Ray, and Ray said it was I, and Sam, always ready to give a comrade the best of it, said it was he himself who missed with his second barrel, and then Ray exploded with a loud detonation.

"You are a grand old liar. You had both your birds falling before either Sandy or I pulled a trigger. I believe in giving the devil his due. We were right side by side, and I know what I'm talking about. It was Sandy who missed his second goose; that I'll swear to on a stack of Bibles higher than Gilroy's kite. But what's the diff? Let's all take another little smack of that good old Yellowstone, and get to the hay. I'm all in."

And now, do you wonder, why an old sportsman has happy memories of winter goose shooting?

#### Eggs in Lime.

A GERMAN epicure comes to the rescue of the Chinese in regard to their alleged habit of eating rotten eggs, says the London Shooting Times. The eggs, he says, are simply preserved in lime until they get a consistency like that of hard butter, and they taste something like lobster. He declares them one of the choicest delicacies he has ever eaten. He thinks there are no better cooks in the world than the Chinese. When he went to live among them, his friends predicted he would starve, but he had a good time and gained weight—more than he wanted to.

## THE SPORTSMAN TOURIST

### Without Rod and Gun in Canada

By RALPH BENBROOK

IT is not such a very long journey to Nova Scotia, but when you arrive at Sydney you are just about 1,000 miles nearer Ireland than you were when leaving Montreal on the Intercolonial Railway. Yet this is not shortening your ocean voyage by that many miles, because you will sail from Halifax. But we are not taking the ocean voyage at this time, so we will not figure so very close. By the way, this trip across Canada, to the Maritime Provinces, will be a most pleasant and to most a novel experience. For one thing you will travel by a superb line that is owned and operated by the Government. "The Canadian Government Railways" it is called, or if you prefer to travel in French, you can call it "Les Chemins de Fer du Gouvernement Canadien," which comprises the same general privileges and restrictions, the fare being the same in either language. While we are on this subject, and to save explanations hereafter, it must be stated that this railroad being a Government affair absolutely, there are no stockholders, no stock, no dividends, no rebates, no graft. If the road makes money and shows up a profit on the operations, this money is used in the betterment of the property; if there is a loss in the operation of the property, there is no kick by stockholders having cold feet, for there are no stockholders to kick or howl.

Our first stop is at Quebec, or rather we do not stop exactly at the ancient capital, for that is across on the opposite side of the St. Lawrence River, and about a mile or more from the place where we do stop, which is Levis. We take a peep at the brilliantly electrically-lighted old city from our distant viewpoint and wonder what the old fellows who prowled around there nearly three centuries ago would say if they could be pried up to gaze upon the fairy spectacle of this night. Levis does not look very attractive by night, but it looks a hundred times better by night than by day. It is raining and the comfort, nay, luxury of our sleeper, decides us not to stay there. The idea is blood-curdling. We go on with the rest of our self-respecting and agreeable *compagnons de voyage*. The next thing that is wholly apparent to our comfort-lulled senses is the fact that we are at Rivière du Loup. We expected to at least hear a wolf howl, or hear one of the hair-raising stories of the Loup Garoux, which, according to the folk lore of the region, were in the habit of carrying off the children of the habitants and devouring them in the rocky fastnesses of the

mountains. What was nearly as great a tragedy, they carried off chickens and sheep and pigs and other useful equipment of the farm. But all that we heard, characteristic of the places, was the music of the dashing cascade which leaped down the rocks at the side of the railroad. It was just daybreak, and a faint idea could be formed of the romantic beauty of the spot.

Rivière du Loup is just across the River St. Lawrence from Tadoussac, with which it is connected in summer by a ferry. The river at this point is about eighteen miles wide. Some river when you think it over, or try to cross it with a canoe when the tide is up. We speed on past numberless stations, settlements, hamlets and water stations. By looking over the time table at the breakfast table I found that there were forty-seven of these stations with a St. in front of their names between Montreal and Moncton. I actually did not know there were so many saints in the calendar. For instance, whoever heard of St. Pacome or Saint Bazile or Saint Perpetue? But down here in Quebec Province it is a cold day when you cannot pick up a few odd saints that you never heard of. We have followed the St. Lawrence River thus far, and now at Rimouski we gradually swing southward and directly we are in the picturesque Metapedia valley, the most beautiful scenery in New Brunswick, if not in all Eastern Canada. Language cannot describe its charms, nor can the camera reproduce its beauties adequately.

The valley is inclosed by forest-clad hills rising to an elevation of 500 to 1,000 feet which approach each other so intimately that barely room is left for the river, the railway and the fine high road. What space is left between the foot of the hills and the river, or the railway is filled with beautiful flowers, often of tropical luxuriance and coloring. The river forms innumerable rapids and is conceded one of the most famous salmon streams in Canada, with the Restigouche not far away (in importance or distance). As usual all the salmon fishing is in private hands and strictly preserved. Three members of the Metapedia Club joined our party in the smoker at this point, and while they were plainly enthusiastic sportsmen, they were not telling big fish stories, but rather bemoaning the fact that the season had been a "beastly" one for fishermen, owing to incessant rains and bad condition of the streams. The fact seems to impress me that the whole of what is called the

north shore of New Brunswick is a salmon and trout fishing country. The Restigouche stands pre-eminently above every other stream, with its tributary waters, as the finest salmon stream in the world.

Rimouski, or as it is otherwise called, St. Germain de Rimouski, is perhaps best known as a port of call for ocean steamers where passengers and mails from or for the Maritime Provinces embark or disembark. There is a French population which is wholly Roman Catholic. It is a seat of a Roman Catholic bishop and has a fine cathedral built of stone. St. Barnabé Island protects the harbor, and with this is connected a romantic legend. As a matter of fact the territory along the St. Lawrence is alive with legends, and it is considered as equal to being out of the world as to be destitute of a fine old legend or two. The rivalry became very spirited at one time, and the chap or priest that could spring a really fine dramatic and hoary-headed ancient tale with fairly well-marked symptoms of probability was much sought for. This stimulated the cupidity of some, and fake legends were now and then detected, in which case the perpetrator was summarily thrown into the St. Lawrence.

I was told that in some localities a "legend censor" was necessary to establish the authenticity of a legend, and even there the public was not secure, on account of the propensity of the censor to accept bribes of one kind or another. So even in the primeval wilderness and amid the railroad station saints, "boodle" was seen to herald civilization.

A quiet people are these habitants of the lower St. Lawrence, simple in their tastes, primitive in their ways, with an abiding devotion to their mother tongue, and an absorbing faith in their mother church. Little change has been effected by the opening up of the country by railroad and the more aggressive settlers, either in the mode of life, the sentiments or the interest in the outside world. They remain much as they have been for the past two centuries. Their ways are the ways of their fathers. The railroad and the telegraph run through a country inhabited by a people who are still in the seventeenth century; such is their tenacity in holding to the manners, customs and language of the old régime. Their wants are few and easily supplied, vexed by no restless ambition, light-hearted, and vivacious, they are optimists of the optimists. French in all their thoughts

and words, yet they are loyal to the British Crown, and contented under British rule, so long as they are not seriously interfered with.

The scenery hereabouts continues most attractive, and as we view the picture that Baie des Chaleurs spreads out before us as it did before Jacques Cartier in 1535 in the bright sunshine, we feel the inspiration that is invariably felt in viewing nature at its best. Its Indian name is Eketuam Nemaachi (sea of fish). Moncton challenges our attention and consideration on account of a most interesting natural phenomenon, and some other things. The river Petit Codiac furnishes the phenomenon, and it has no duplicate in the world, unless a partly similar feature on a river in China furnishes one. This is in connection with the great tides in the Bay of Fundy which are forced up the narrowing shores of Chignecto Bay, and into the Petit Codiac River, where the water rises to a height of forty to seventy feet. The rise of this tremendous tide is here heralded by the forerunner of a huge tidal wave which sweeps up the entire width of the river to a height of five or six feet. This wave is called the "Bore" and reaches Moncton about an hour ahead of the regular flood. So great is the anxiety to witness this novelty that in one of the hotels there is posted a notice announcing the time of arrival of the "Bore" like this:

.....  
: THE BORE :  
: WILL ARRIVE AT 11:03 :  
: A. M. :  
.....

We glanced at this announcement with interest as we entered without knowing in the least what it referred to, unless it was to one of us, and each disdained the soft impeachment. We were soon relieved of our suspense by the explanation of the event. At low tide the bottom of the river is bare as the fields that lie along its banks—a slimy mud confronting the beholder. In twelve hours' time wharves and docks, whose surfaces are thirty-eight feet high, are submerged, and vessels of considerable size are loading there. I was never before so deeply impressed with the importance of water in the make-up of a river. Moncton is the headquarters of the Intercolonial Railway, and a goodly company of courteous gentlemen in charge of the railway affairs. Near Moncton on the Hopewell Cape, about twenty miles distant, are several remarkable rocks of red sandstone sculptured into fantastic forms by the action of the powerful tides which rise to a height of some thirty or forty feet above the level of the water. Another point that is worth seeing as an interesting incident in the passing of the red man is Richibucto, a reservation of the Micmac Indians, about 300 of them, who pass their lives much the same as reservation Indians elsewhere, viz.: making baskets, moccasins and bows and arrows, doing a little fishing, drinking a little whiskey and furnishing a home for a thousand dogs or more—and some other species.

This tribe speaks a mongrel French. They are not a sociable people, and their conversation with a stranger is limited mostly to: "Donnay mo sank cent" (give me five cents), "Donnay mo present" (give me a present), and monetary suggestions of the kind.

Miramichi Bay was visited by Jacques Car-

tier some years before our visit, he made a settlement here and lived for some time enjoying the hunting for big game and fishing for the lordly salmon. He and his companions must have had royal sport while the ammunition lasted.

St. John is called the City of the Loyalists. It is named from the river into which Champlain and De Monts steered their high-pooed, square-rigged vessels three centuries ago on the feast day of Saint John the Baptist, so that it lacks but a little of the date of arrival on the bleak New England coast of the little Mayflower. The rocky ridges upon which the town is built rise in a series of terraces from the waters of the Bay of Fundy. As a matter of fact the city is carved out of the solid rock, and the work of preparing the streets with dynamite and pick-axe must have been tedious and enormously expensive, but the streets and foundation walls of buildings have a base that will last while time endures.

[TO BE CONTINUED.]

### New Publication.

OUR VANISHING WILD LIFE; ITS EXTERMINATION AND PRESERVATION. By W. T. Hornaday, Sc.D. With maps and illustrations. New York Zoological Society.

Packed within the covers of this book of 412 pages are facts bearing on the destruction of wild life by—so-called civilized—man in extraordinary numbers. Dr. Hornaday has brought together a vast fund of information bearing on this subject, so that the volume is really an encyclopedia of the utmost use to all who are interested in the subject. Especially useful will it be to those who are called upon to legislate with regard to the preservation of useful birds, whether they be game birds, insectivorous, or water birds.

In his foreword, Dr. Osborn, President of the New York Zoological Society, terms the volume an alarm call, like "The sounding of the great bells in the watchtowers of the cities of the middle ages, which called the citizens to arms to protect their homes, their liberties and their happiness."

In his preface Dr. Hornaday points out that the game of North America does not belong wholly and exclusively to the men who kill. These, he says, constitute only 3 per cent. of our population, while the other 97 per cent. of the people have rights in this life.

The volume is divided into two parts, the first dealing with extermination, and the second with preservation. In Part I., the past and the present are considered. Among the subjects dealt with are the former abundance of wild life; species of North American birds and mammals which are extinct, or are apparently about to become so; the regular army of destruction and the guerillas who aid it; destruction of wild life by disease and by the elements; slaughter of song birds by Italians and by Southern negroes, and the extermination of birds for women's hats. The story is told of the tragedy of Laysan Island, and there are discussed unfair firearms and shooting ethics; the present and future of big game in North America, Africa, Asia and the far East.

Part II. deals with the present and future; discusses the new laws that are needed—includ-

ing one for the protection of migratory birds by the Federal Government—and of no-sale-of-game laws. Much is said about introduced species, beneficial and injurious, about game preserves and refuges in the United States and Canada, private game preserves, preserves in Africa, and the breeding of game and fur in captivity. The need of teaching wild life protection to the young is insisted upon, as is also the duty of American zoologists to American wild life.

The volume is profusely illustrated with engravings and maps, and, as we have said, is far and away the most useful contribution that has ever been made to the subject. It is written by an extremist, one of those reformers without whom no great advance movement is ever started. On the other hand, it is not to be supposed that so large a work as this would be free from errors, whether of fact or of taste. There are inaccuracies in it, exaggerated statements and other statements made in unreasonable language that take away much of their force. But when all this is said, the book is still most interesting, useful and valuable. It is likely to accomplish a great work.

It is understood that arrangements have been made to put it in the hands of thousands of people who can use it in considering laws to be passed, or in the carrying out of existing laws. It should have, and we believe it will have, a very wide circulation.

It may be had of Chas. Scribner's Sons, and the price is \$1.50.

### Houses Without Nails.

IN Alberta, Canada, there is a village of houses which have been constructed without nails. As a matter of fact little or no hardware of any character has entered into their construction.

These houses have been built by Ruthenian immigrants and their architecture is quite novel. Their first attempts at house building are usually of the kind they had been accustomed to over in Europe, and their buildings are of the typical Ruthenian style—log, pitch-roofed, thatched and wide in the eaves. In many cases these buildings are put up without a dollar's worth of hardware.

Even the door, an affair of slender twigs woven and laced together, swings on homemade hinges and is latched with a wooden hasp, says the Detroit Free Press. The floor is of hewn logs, unnailed. The roof, as the favorite Russian roof always is, is a wonderful fabric of poles and cross-woven wheat straw, ten inches thick, packed tight and solid, and laid with such care that it will shed the weather for twenty years.

# Myth and Miracle

By WILLIS BOYD ALLEN

IT is a pretty myth, that of the seven lovely young nymphs who hunted with Diana, were in turn rudely hunted by Orion, and were compassionately changed by Jupiter, first into doves and then into stars. But what interests me most in the story of the Pleiades is the fact that of this spring-time constellation Maia, for whom our dear, fickle month is named, was foremost in the bevy of laughing girls; as May leads the procession of the seven golden months of the New England year. It must be borne in mind that all the tearful adjectives applied by English poets to April properly belong to our own May time, half of which is "so awfully like Mayn't."

"Aprille, alacke,  
Her snowy cloke flung backe  
And gailie cast aside;  
Then cryed,  
With little wilfulle gustes of raine,  
Because she could not have her cloke again."

But it is in the following month that we New English have learned to expect alternations of snow, rain, ice and sultry heat. Maia, it will be remembered, was the mother of Mercury, who must have received his "temperament" from her, before transmitting it (according to our friends the astrologers) to all those born while his planet is in the ascendant, to the end of time. But with all her moods, her changeful ways, her dainty poutings and tears, her cold rebuffs and exquisite relentings, May is the Lady of the year. As in a drawing-room the subtle influence of a lady is felt the moment she enters, so this lovely month, with arbutus trailing from her hand as she approaches us, and violets clasped to her bosom as she bids farewell, captivates and enthralls. Her voice is the music of bird-note and unfettered streamlet; her garment sun-shot mist, over the soft, brightening velvet of lawn and meadow.

One day in late April, not long since, it was my good fortune to visit a certain farm in Maine. Leaving the gray old house, over whose uneven floors so many generations of children have crept and toddled until, erect and blithely strong, they fared forth into the world of which they as yet knew so little; leaving the house, I walked slowly down through the orchard, across the field; climbed a pair of lichened bars, and strolled on into the pine wood that notches the horizon on every side of the old farm. Here I was fain to pick my way along the slope above the brook, for great banks of snow still lingered in sheltered spots, and the patches of brown needle-work between afforded but slippery and precarious footing. My stroll was limited, after all; for walking was difficult, a cloud was partly across the setting sun, throwing a red flush athwart the snow; the swollen stream was brawling over its banks, and altogether, in spite of a cheering clump of pussy-willows, the forest was rather dreary, in that march-land between winter and spring.

Two weeks later I visited the same spot. May had come, and the transformation was marvelous. In place of the snow-drift was a

bank of loveliest white blossoms, each with its rosy sunset tint. The brook was singing gaily, and from a neighboring thicket came the flute notes of a thrush, voicing the very gladness, the holiness, the peace of a new-born world.

Much discussion has arisen of late, in the city of Mather, of Channing, of Brooks, concerning the verity of the scriptural accounts of the New Testament miracles; but here surely was a miraculum, the more, not the less marvelous for its repetition year by year, which one was forced to believe; the literal transformation of a snowbank into a perfumed drift of spotless beauty; the transmuting of the mire of every meadow and roadside strip of turf into heaps of homely cowslip and dandelion gold; the blue sky itself reflected in a hill-slope of violets.

As I turned toward home, the stream and the thrush sang together to the soft diapason accompaniment of the pines; and on the post of the mossy fence a song-sparrow, with its meek contralto chant of contentment, added the last perfect note to the sweet, insistent voice of May.

Just now I am stopping at a country house not twenty miles from Boston. The change from the anxious, nervous bustle and roar of the city to the quietness and peace of pine woods, bird songs and rural life is marvelous. Once more I wonder why we forsake all this for the other. In the early morning we are awakened by the distant clarion of cocks, and the fluting of robins in the elms that stretch their sheltering boughs almost over the old house. The far-off rattle and hum of a trolley car, softened to a cascade-like murmur, brings the only suggestion of modern days. The green turf around the house is dotted with dandelions. "Don't you wish they were real gold?" said a little girl to me, voicing the ever-human craving for money. For the present, at any rate, I prefer the soft, sonsie yellow blossoms to the hard, clashing metal.

I have just returned from a five-mile walk along country roads, which led me "by green pastures and still waters." At one time there was not a house in sight. A stream brimmed to its grassy banks, now and then a soft waft of rain fell, doing only good. These soft, gentle spring showers are the chosen type in the Scriptures for the blessing of Heaven, descending upon the just and unjust, bringing sweet refreshment, inspiring new life. The birds to-day are alert, the foliage glistens, gleams among the grasses and sedges, and their dark pools widen to the stems of the surrounding alders and willows on their banks. A purple-winged butterfly slants through a momentary ray of sunshine, happy in the new warmth and brightness.

That was yesterday. To-day this is a world of golden light, soft south wind and apple-blossoms. The leaves of the fruit trees seem to spread and enlarge before our very eyes. The boughs are great drifted heaps of white and pink bloom, murmurous with the hum of bees. A robin glides swiftly from her nest as I ap-

proach, returning when safety is assured, to brood over the sky-tinted eggs—"little music boxes," Horace Lunt calls them—from which the melodies are not yet set free. Hark! The first oriole is whistling merrily as he drifts to and fro in the swaying boughs of the elms in quest of a site for the nest that shall be his home for the season. He is the official herald of summer. "Oyez! Oyez!" he calls, in clear flute tones, "It has come. I am here. Snow is gone. Summer reigns. Long live the king!"

## The Hunters' Paradise.

BY C. M. STEWART.

I want a home, a perfect dream,  
Away from all the haunts of man,  
Beside some winding mountain stream  
That wash her rocks and golden sand,  
Where I can roam or take my ease  
When twilight's dreamy shadows fall,  
Where wafts the music on the breeze  
Of howling wolves or panther's call.

I want a home where I can see  
Old nature in her youthful bloom,  
Away from all that hampers me,  
Where city life is filled with gloom.  
I want to live where I can get  
The pleasures that belong to me,  
With one true friend that can't forget  
This world was made for such as we.

I want a home all decked in green,  
Where towering peaks rise far and high,  
And shady dales lurk in between  
Beneath the azure summer sky;  
Where balmy spring her beauty crimps  
And warbling songsters pipe by day,  
And lovely bands of mountain nymphs  
With fairies dance the nights away.

I want a home, a rustic cot—  
The mansion has no charm for me;  
I want it in some quiet spot  
Away from care and sorrow free,  
Beside some restless, limpid stream,  
Where I can stroll at break of day,  
And cast my hook in fancy's dream  
Where rainbow trout and cropy play.

I want a home where nature dwells,  
Away from all the city's throng,  
Where bob-o-link sings in the dells  
With merry note and warbling song,  
Where cedars grace the mountain chain  
And wooded vales are green and gay,  
With some good friend that feels the same  
We'd let the future fade away.

I want a home where I can take  
My boat and gun and come and go,  
Or paddle over stream and lake  
With some dear friend like one I know,  
Where twilight shadows gently sway  
When autumn's frosty nights appear,  
And watch the wilderness at play,  
Would fill a sportsman's heart with cheer.

I'd like a home, not made by hands  
That carve the marble or the stone—  
A cave where ancient roving bands  
Have left their bleach'd, cadav'rous bones;  
Where little limpid streamlets play  
Among the nodding daffodills,  
And murmur on their devious way  
Among the ferns and grassy hills.

I want a home where I can see  
When autumn days their pleasures bring;  
The mountain crags so dear to me  
And fading scenes of vanished spring,  
When Indian summer's fires glow,  
I love to watch the smokey haze,  
Or trail the wild buck and his doe  
Through scenes of wildest, deepest maze.

There are over 7,000 ostriches in the Salt River Valley, Arizona, and the number is being increased every year. This is eighty per cent. of the ostriches in the United States.

## The Passenger Pigeon

By C. A. BRYANT

**T**HE wild pigeon, or more properly the passenger pigeon, has been the subject of so much discussion in *FOREST AND STREAM* that the writer tenders his contribution on that head with misgiving as to his ability to write as fluently on the subject as some who have preceded him in these columns.

Having been born and lived until manhood in Southern Michigan, which place was ever favored with visits from the passenger pigeon, and being an observer of these birds and their habits, I feel able to write about the pigeons as I remember them.

In early spring, often while the snow still covered the ground, the northward flight of pigeons commenced. A few warm days in succession and the advance guard of the flight came in small flocks. Often they stopped to feed, seeking the places where hillsides with a southern exposure had been laid bare of snow by the sun. Perching in the trees on these hills the pigeons dropped to the ground to feed on the acorns, beechnuts, etc., which had been left from the previous fall. The advance flight did not remain long, but as soon as they had fed, sped northward in search of nesting places, going generally to the pine and hemlock timber, though often there were nestings in the hardwood, especially on ridges covered with beech trees, these places being quite common in the country where the general growth was pine and hemlock. Following closely in the wake of the pilot flight came the main army of the pigeons. Soon after daylight they began to fly north and continued to pass over until nearly noon, the majority of the flight of the day being over by the time the sun reached the meridian, though on cloudy or rainy days the birds often flew all day. On such days the pigeons often alighted in large numbers, giving preference at such times to the dry trees, particularly to those which had been "girdled" in the process of clearing the land. In the oak openings the trees were often girdled, the ground broken, and a crop of winter wheat sown and harvested while the girdled trees were standing. There was much wheat shelled and scattered on the ground by the old process of cradling the grain, and this afforded a fine opportunity for the pigeons to feed when on their flight. The spring flight never lasted more than about a month altogether. The flight of the flock, the thousands and tens of thousands, which came in the spring, often passed over in three or four days. This flight was followed by smaller flocks, and these were often passing, a few at a time, for two or three weeks.

There were but few nestings of the passenger pigeon in the settled country of Michigan. There was on two occasions that I remember a

flock of several hundred which nested about a mile from where I lived. This was in the late 60's. These pigeons nested on a ridge covered with beech timber, the ridge being flanked on one side by a lake surrounded by an almost impassable marsh, and on the other side by a tamarack swamp. This, and a nesting of a small colony of not more than two or three hundred pigeons in a dense tamarack swamp, were the only nestings in our locality.

The pigeons at the time of the spring flight were thin in flesh, though strong and vigorous, and much wilder and more difficult of approach than in the summer or fall.

The pigeons began to appear again, after the spring flight, in our locality, about the 1st of August, the first arrivals being small flocks of sometimes not more than a dozen birds. These made their appearance usually in the wheat stubble where they came to feed on the shelled wheat. As they increased in numbers, pigeons gathered in larger flocks, feeding in the stubble, and as the time for sowing fall wheat came on, they were present in great numbers. The country was, much of it, new; the ground rough, with many stumps and roots. This made the use of machinery for either sowing or harvesting impossible, and when the wheat was sowed broadcast and the ground harrowed to cover the seed, there was much grain left uncovered. Then came the pigeons. Soon after it was fairly light they swarmed on the newly sown fields. Sometimes they alighted in trees near the edge of the cultivated ground and then dropped by dozens and hundreds on to the ground to feed. The exposed grain was soon picked up, and the pigeons in the van of the flock fared the best. Those in the rear were continually rising and flying to the front, so that a flock of pigeons feeding on the ground had the appearance of rolling along the surface.

When acorns and beechnuts were plenty, these birds fed to a great extent on the mast. Generally the year when acorns were plenty, there was a scarcity of beechnuts, and vice versa, though the writer has known of years when both beechnuts and acorns were plenty. When feeding on the mast, the pigeons generally went in smaller flocks than where they fed on the stubble fields or the newly sown wheat. One of their methods of feeding on acorns and beechnuts was peculiar. After frost had fallen a time or two, the nuts and acorns became loosened from their holds, but did not fall at once. Then the pigeons would light on the outer ends of the limbs of the oak or beech, and seizing a beechnut or acorn in their bill, winnow backward with their wings and pull the nut from its fastening and swallow it whole. Strange as

it may appear, I have seen seven white oak acorns, as large as the first joint of my little finger, taken from the crop of a passenger pigeon. These acorns had been swallowed entire, and would be digested in a few hours. I remember seeing eleven beechnuts taken from one pigeon's crop. The passenger pigeon often fed on the red raspberries which grew in abundance on the land where pine had been cut off, and they were also fond of elderberries. The writer has shot pigeons whose crops and flesh around the crop was stained from eating berries.

The pigeons were great drinkers, going to water as regularly as to feed. These birds do not drink like a hen by filling the mouth and then elevating the head when swallowing, but drink like an animal, by suction. The nature of the food on which the passenger pigeon subsisted, chiefly grain, nuts and acorns, made water a necessity to them, and the small ponds in the woods were favorite drinking places.

The spring flight of pigeons did not seem to be at all dismayed at cold inclement weather when once they had reached the north, but in the fall the first sharp cold days usually started the pigeons south.

I never netted any pigeons and consequently will not describe this method of taking these birds. My nearest approach to netting pigeons was when a boy about my own age and myself were hunting on a cold rainy day in April. We saw a large number of pigeons alighting in the edge of a field. We approached the place under cover of the woods next to the field, and saw a place where the ground was blue with pigeons. We fired and the slaughter was great. On approaching the place where the birds had been so thick, we found we had fired into a netter's "bed" or baited place to which the birds were decoyed. The netter was absent, although the net was set, and the trip rope was run from the net to the bough house where the netter hid when in operation of his trap. We gathered the slain and crippled pigeons, the result of our shots, and vanished.

Shooting wild pigeons was great sport. If the shooter wanted pigeons, he sought the birds at their feeding places where a shot into a large flock was often most disastrous to the pigeons and satisfactory to the hunter. I knew of forty-four pigeons being picked up as the result of one shot into a large flock feeding on newly sown wheat. The shooter who sought the pigeons for sport had ample opportunity to exercise his skill when the birds were flying to and from the feeding places. The pigeons flew with the speed of the wind, and it took skill and

(Continued on page 512.)

## Natural History Notes.

BY GOLDEN GATE.

A PARTY of scientists and hunters recently returned to San Francisco from a trip to Honolulu and the Laysan Islands. The journey from the island port to the little sand spit, now an important Hawaiian bird reservation, was made in the U. S. revenue cutter *Thetis*, and ninety days were spent on the island. The census of bird life that was taken showed that there were approximately 50,000 albatross, 50,000 petrel and 15,000 frigate birds. The island was infested with rabbits, and 5,000 of these were killed in an effort to exterminate them. Trees and shrubs were planted, and it is likely that the island will show a changed appearance in a few years. On the shoals of this island and nearby sand spits numbers of warm water seals were found. Among the members of the party were W. S. Wallace, George Willett, A. M. Bailey and Commodore G. R. Salisbury.

The power schooner *Teddy Bear* has cleared from Seattle with a party of scientists aboard bound for the Bering Sea to make a study of animal and bird life. Among those making the trip are Joseph Dixon, of the Museum of Comparative Zoology of the University of California; W. Sprague Brooks, of Milton, Mass., representing the Museum of Comparative Zoology at Harvard, and Samuel Mixter, representing the Smithsonian Institute. Points in southeastern Alaska will be visited, and then a call made at Dutch Harbor, the Bogoslov Islands, the Attu and Rat Islands, followed by a visit to the Siberian coast, Anadir Bay, Nome and possibly Wrangell Island. On the trip home the *Teddy Bear* will touch at Nome, the Pribilof Islands and Walrus Island.

The California Audubon Society has been incorporated at Los Angeles, Cal., by Mrs. K. H. Coit, F. W. D'Evelyn, C. F. Holder and others.

## Tagging Birds.

ST. LOUIS, Mo., April 5.—*Editor Forest and Stream*: As the McLean bill has become a law, I think it wise for sportsmen to consider how this will eventually affect hunting migratory birds, and I believe the following suggestion is worthy of consideration:

That the Federal Government issue licenses, say at a cost of \$10 per year, or \$1 for three consecutive days, and charge a fixed sum for every head of game killed, by the means of a stamp tag. This tag could be made of two thin discs of brass, about one inch in diameter, with a paper insert between them, with thirty-one holes in the outer circle and twelve in the inner circle. The holes in the outer circle being numbered from one to thirty-one, respectively, and the inner circle from one to twelve, each tag bearing the year and a serial number in the center, and having two wires attached. When the game is killed, one wire is passed through the outer circle, indicating the day of the month, and one wire through the inner circle, designating the month of the year. This would cancel the tag, and the inspector could readily ascertain whether or not the game was properly tagged.

These tags could be issued by the Government at, say, ten or twenty-five cents each, or

different prices for different game. For instance, ten cents for snipe and twenty-five cents for duck. All funds so obtained to be used to properly protect and propagate game. The protection is especially necessary when the game is very young, and during the hatching period.

It should not seem difficult, if we paid twenty-five cents for every duck killed, for the Government to be able to hatch and replace with that sum three or more ducks six or seven weeks old, at which time they should be able to shift for themselves, especially if placed in a lake where their natural enemies did not abound. It is well known that game bred in captivity turns wild very rapidly.

Furthermore, it would be necessary for the license holder to report back to the Government when securing a reissue of tags, the game he killed, and the tags purchased; this under oath.

I think that the conditions cited above would enable us to continue spring shooting, enable the market hunter to ply his trade, and for restaurants and hotels to serve game. It would be necessary of course that restaurants and hotels take out licenses, which would permit them to sell game, and making it obligatory that they turn in all tags and make report under oath as to the game they disposed of.

A. J. MEIER.

## Woodpecker as Imitator.

RALEIGH, N. C., April 10.—*Editor Forest and Stream*: The "National" woodpecker must, to be sure, be an imitator, and he has succeeded in giving the most admirable imitation of the noise of the riveters who are doing work on steel structure buildings here. A day or two ago in the early morning, as the writer was approaching a residence on top of which are finials of galvanized iron, the noise made by a couple of riveters apparently was heard. It was found that two of the "Nationals," each on a finial, were rattling away with their bills. Half a dozen other birds of the same kind were on trees in the neighborhood, and these were doing the best they could on dead limbs, but the ones on the finials seemed to enjoy their superiority as noise-makers. Several persons came and watched their performance, which the birds evidently enjoyed.

One would rattle away, and then cock his head to one side and look around at the other, as if to say, "Listen to me." Then the other would do his best. Three or four of the "Nationals" who were in the trees flew over and saw how the noise was made, circling around in the air, watching and listening.

FRED. A. OLDS.

## Hedgehogs.

NEW YORK CITY, April 12.—*Editor Forest and Stream*: On behalf of hundreds of sportsmen readers of your journal, I most sincerely deplore the lack of knowledge of ordinary animal life exhibited by the writer about "Hedgehogs" in the Burlington (Vt.) Free Press, quoted in your issue of April 5 inst. The article, too, was written under the shadow of the University of Vermont.

We Essex County, N. Y., men want a bounty of twenty-five cents each put back on the American porcupine (commonly and incorrectly called "hedgehog").

This animal is a positive menace to standing timber, as all woods men know, and to the sweet corn, even in carefully watched gardens.

He is, therefore, cordially hated by all agriculturists, and his extermination is eagerly looked for. It is the writer's belief, founded upon some experience, that old "porky" avails himself of the grouse eggs that lie under the low hemlocks on the sunny slopes of our mountains up there not far from his rocky dens.

In one locality alone where, owing to local activity, the porcupines were nearly exterminated under the recent bounty law, the grouse which had been almost extinct suddenly began to increase, until last year the woods and roadsides were full of old and young birds. I noted no corresponding increase in other remote districts in the same town where these pests had been let alone, although same had been formerly the best of grouse cover.

Does anyone suppose that one of those blundering, awkward beasts weighing thirty or forty pounds would take the trouble to walk around a nice little nest full of fresh eggs if it were right in his path? I trow not.

But, back to the newspaper story, which is certainly free in its statements. Hear this: "His favorite food is clover, and this when abundant so fully supplies his modest wants that he asks for few additions to the menu." This being so, how does the Free Press man account for the almost constant visitations to old soap barrels and salt-soaked hemlock boards and boxes by his "hedgehog." Does he know how the animal makes night hideous with gnawings and devourings of said lumber if, indeed, he does not consume an entire porch? Worst of all is the concluding paragraph: "His favorite abode is at the edge of the farmer's wood lot, in reasonable proximity to a clover field. In such a hedgehog paradise he luxuriates in the farmer's clover all summer and dreams about it all winter in his long hibernation." This last word makes a man smile who has often seen and killed "quill-pigs" in the woods in the depths of winter, and has found their little runways cut deep in the snow crust.

Will the Free Press man amend his interesting article by striking out the word "hedgehog" wherever it occurs therein and substitute the word "chuck"?  
PETER FLINT.

JERSEY CITY, N. J., April 5.—*Editor Forest and Stream*: After buying FOREST AND STREAM on the news-stands regularly since the days of "Kingfisher," "Nessmuk" and Sam Lovell, I feel entitled to become a subscriber and therefore inclose check.  
ROBERT H. CARSON.

## Passing of the American Buffalo.

### The Noblest Roman of Them All.

BY D. M. EDGERTON.

MUCH study has been given and history written upon the race of the North American Indian—a history that carries with it much of the life of his four-footed and truly majestic companion, albeit his main sustenance. But few there are of men now living who have enjoyed the sport, the only grand sport of a "buffalo hunt"—a sport which began dying away the day when the Pacific railways started under construction westward from the Missouri River. Before that event he roamed in immense herds of thousands upon thousands all that part of the country called the plains eastward from the Rocky Mountains to the valley of the Missouri, and from Texas to British Columbia undisturbed except by the attacks of Indians for food and raiment, and up to the early 70's were still to be found in smaller bodies, the prey of white hunters for their hides who left on the plains a scattered covering of white horns and bones, which were later gathered and shipped by rail to be made into a farm fertilizer. And still may be seen far and wide spots made by this monarch of the plains, known as "buffalo wallows" where, in the absence of trees, they were wont to lie down and roll, to scratch themselves and get rid of the flies. How far eastward of the Missouri River, in far earlier times, they were to be found, deponent saith not, but Washington in his journal of a trip down the Ohio River from Fort Pitt (now Pittsburgh) in a small boat with some companions—in 1770—mentions meeting an Indian chief, a former friend, on the river bank near where Marietta now stands, and who gave Washington a "quarter of a buffalo" and showed him buffalo tracks.

To realize something of the proud nature and courage of the buffalo when in his native element, and to respect him, one had but to separate a bull from the herd, cut him out and ride up on him and alongside as he runs, give him a ball from the rifle, and round the buffalo comes, like a "liner" at sea. One glimpse of his dark eye, exhibiting his insulted dignity, as he charges your horse, until you are driven off, as he thinks, and then he is off again on his way. The writer, now past his hunting days, recalls such scenes and battles, as battles they often were.

Perhaps the last buffalo hunt in which he participated was in 1872, at Fort Russell, then at the western boundary of Kansas and on the line of the Kansas Pacific (now N. P.) railway, of which company he had become an official, between Kansas City and Denver. Going over the road we laid by our car to pay a call upon the officers at that post, and by them a hunt was proposed and accepted for the next day.

We railway officers were each furnished with full sized cavalry horses, carbine and revolvers, the horses green at the business, and

mine, a fine black charger, as afraid of a buffalo as of an elephant, and the party, six in all, started off, followed by a four-horse army wagon.

After a wide berth of a few miles, a small herd was sighted, and keeping under cover as much as possible, we came within striking distance, and after them we went, every man for himself. The herd scattering, I selected the largest bull I saw, cut him out from the bunch, and putting my rampant horse—so afraid of the game that I had to hold by the starboard rein and under spur—alongside, I opened with my revolver, at every report of which the buffalo bull would turn and charge me, so that I finally left him, to fall later if badly hurt, and made after another which I brought down, but not until between managing my cavalry horse, now wild from the shooting and scent of the game, I had put one ball up through the wide rim of my hat.

When the chase was over, the soldiers skinned and hauled home to the fort, the robes and best parts of nine buffalo.

At times, after the completion of the road to Denver, in August, 1870, small herds could be seen and sometimes shot at from the train. Upon one occasion, when the writer was aboard, a wounded buffalo, shot in the shoulder, fell. The train stopped, and when approached, the buffalo would struggle up and try to charge, until taking a rifle from one passenger, I walked up in front of the struggling animal, and as he rose I gave him his quietus. From then on they gradually disappeared, and these noble monarchs of the plains are a wild thing of the past.

## Hunting in California.

BY GOLDEN GATE.

Now that the duck season is closed, goose hunting is attracting the attention of sportsmen, and some large bags are being made in the grain-growing sections of the San Joaquin and Sacramento valleys. Cool weather has been prevailing for several weeks and this waterfowl is making a longer stay here than usual. On the marshes curlew, plover and English snipe afford some sport, but it is to be noted that the supply of these birds is getting very limited. The season on these is open until May 1, but just why this is the case no one seems to be able to explain. Snipe have been found nesting at this time, but usually plover and curlew leave before this date. The long-billed curlew is getting very scarce in California, and immediate legislation is needed to preserve it from extinction. A bill introduced into the Legislature by A. H. Breed, of Oakland, will afford protection for all kinds of shore birds, rail, wild pigeon and woodduck if passed.

E. K. Strobridge, of Hayward, has introduced a bill into the Senate designed to give the Fish and Game Commission greater power in time of immediate need. For instance, in

case of an epidemic among deer or duck, which has occurred several times in the past, shooting could be stopped in any district, and in case there should be a sudden falling off in the number of any species of wild life, immediate action could be taken instead of waiting for legislative action, which could easily be delayed for two years.

Jack rabbit drives, once so common in the great valleys of California, are now but seldom held, owing to the scarcity of rabbits, but on March 15 the farmers and gardeners of Arboga, Butte county, organized a drive and killed about 400 of the pests, covering an area five miles square.

During the month of February the Fish and Game Commission paid \$960 in lion bounty claims, this being the greatest sum paid in any one month for several years. In the past six years the bounty has been paid on about 1,750 mountain lions, about one-fifth of these having been killed in Humboldt county. A huge California panther was killed a few days ago in Marin county, within a few miles of San Francisco, the beast weighing over 150 pounds.

Mayor Mott, of Oakland, has suggested that a part of Alameda county's exhibit at the Panama-Pacific International Exposition in San Francisco in 1915 be in the form of an exhibit of the fauna of California. He favors the erection of a building to house five specimens of each animal typical to this State, in their original surroundings.

Since the first of the year the efforts to enforce the Fish and Game laws of the State have resulted in two fatalities. The first of these occurred in Wildcat Cañon in Alameda county, and for several weeks the authorities have been endeavoring to capture the guilty parties, but without avail. Mushroom hunters, while visiting this wild spot, came upon the body of Deputy Fish and Game Commissioner Bert Blanchard, of Oakland, who had been missing from home for two days. The deputy had been shot in the head with a shotgun from a distance of but a few feet at the most. Witnesses were found who had seen him two days before with two men in custody, these having been apprehended for killing robins. The deputy intimated that he was after a third party, and it is believed that this person is the murderer.

The second fatality occurred near Larkspur, March 10, when Deputy Fish and Game Commissioner John W. Gallaway attempted to place Herbert and George Le Corne, of Kentfield, under arrest for illegal fishing. These men bore a bad reputation and had been carrying on poaching and illegal fishing for years in defiance of the authorities. The deputy had learned of a net being set for steelheads and was in hiding when the men visited the spot and were loading the fish into a wagon. He placed the pair under arrest and had them handcuffed, when one of them drew a revolver while the officer's head was turned for a moment and shot him through the jaw. The handcuffed

men then started to run, but the deputy, although seriously wounded, rose from the ground, pulled out his own weapon and shot both men. George Le Cornec has since died and his brother is in a serious condition.

### The "Plum Pud'n" Bird.

ONE of our most peculiar birds is the American bittern, which is a summer visitor, remaining with us from April to October. This bird is by no means common, and if one is in the neighborhood, you will know it by the peculiar call of "pump-er-lunk, pump-er-lunk, pump-er-lunk," or by its other call which resembles the noise made by driving a stake into the mud. Because of the latter call, the bittern is often called the stake driver, and the name is a good one, and because of a fancied interpretation of the first call, the bittern is often spoken of in the country as the "plum pud'n' bird." This cry is also referred to as the pumping call, because it does so nearly imitate the noise of an old-fashioned wooden pump when water comes hard. There is one more very odd characteristic this bittern has in uttering its cries. The head and neck go through such convulsions that one really wonders whether or not the bird is choking to death. One author, Bradford Torrey, who is one of the very few ornithologists who has seen this bird when it is calling, says that the contortions are very suggestive of those of a person who is very violently seasick.

Edward H. Forbush, in his book, "Useful Birds and Their Protection," says that this American bittern is the most useful of the herons, as it frequents low fields and pastures and destroys many grasshoppers and other orthoptera. But it does this in a skulking sort of way, because it is one of the most shy birds we have, seeking cover by preference and not rising to fly in sight of anybody except when hard pressed. It stays in marshy grounds, seldom flying into trees; even its nest is built in the bog land. It is rather attractive in appearance, brown in general color, the under part of the neck being of mottled white and brown, while along the side of the neck is a distinguishing mark or streak of black. Many long feathers dangle, pendant like, from the head and neck. It is about half as tall as the blue heron, but more bulky and awkward in flight.

### Who Knows How to Make Bird Lime?

BOSTON, Mass., April 7.—*Editor Forest and Stream:* How do you make it, or where can one get it? I'm peeved at some dratted Britishers—sparrows that are fussing my bluebirds and are impudent when I object. I want to get them within reach and say a few kind words to them myself. Don't say, "Try bird stores and druggists," for I've done that already. Nobody in Boston seems to know. So I turn to you. Doesn't Hornaday know? When he has an elephant or a brass monkey to catch, or other bird—perhaps he is wise to this. Please ask him.

JOHN PRESTON TRUE.

Tell the public what you have to sell. They'll buy, if you tell them why they should in the columns of FOREST AND STREAM.

### Getting Out the Tackle.

HENDERSONVILLE, N. C., April 8.—*Editor Forest and Stream:* There seems to be quite an improvement in our county game laws so far as the open season goes. Partridges (quail) open season, Nov. 15 to Jan. 15. In regard to the dog law, if I am rightly informed, dogs (pointers and setters) can run at large all the year now, as well as the hound and cur, and so in the eyes of the law (last year's law) are raised to the latter's level. It appears, too, that the tax on dogs is removed—a big mistake in my humble judgment. It would better have been doubled. It was \$1 for a dog and \$2 for a bitch. Thus do we change every two years under our unwise county system. It is always likely to be one extreme or another.

Well, we are through with dogs, rifles and guns, and have overhauled our fishing tackle, and are ready for the trout streams. In fact, last Thursday I drove with a friend fourteen miles to have a cast or so for the rainbow trout. We left at six in the morning and put the horse up at a farmhouse on the bank at Green River. But the wind got up before 9 A. M., at which hour we stepped into the water, and it was cold, too. I had a seven-inch trout in a few minutes, then never a rise again till mid-day. My good wife had instructed me to bring some trout home, and so, knowing the water was cold, I took some garden hackle along, also spoon, bait and pork rind. The rainbows refused both baits, and so I had the best possible excuse to return to my flies, and this I gladly did.

The wind was against me as I waded up stream, and very difficult to place the flies just as I wished. Finally I started back down stream to join my friend for a simple lunch of sandwiches and hot coffee—the latter in a Thermos jar—and I remembered reading but a few days before the advice of an up-to-date angler, "Never draw your flies up-stream against the current." So just that very thing I proceeded to do, for had I not caught many trout that way before? Almost immediately I had a rise, and during the afternoon I added nine more rainbows to my creel and lost more than half a dozen more. They seemed to strike in a half-hearted way, not taking well the fly, and so were not well hooked. I have very often taken rainbow trout drawing my flies against the current when they refused it otherwise, but as a rule take my largest fish casting up-stream, and letting the flies come down with it.

I suppose if a trout reasons at all, it is in this wise: "That is a lively insect going up-stream that way; I must have a try at it." A big fellow might put it this way: "No small insect has the strength to go up-stream that way, so I will just let one of these younger fish investigate it," and so he stays under his rock, or the creek bank, and lets the other gain experience—experience which perchance he acquired as a youngster which some other big fellow let him gain several years before. At any rate, I know that brook trout and rainbow trout will both take flies properly brought to their attention, drawn up-stream at times, and I have caught them so when the same flies were offered them

THE LAST SWISH OF A BIG FELLOW.

otherwise. In fact, there are many ways to deliver the flies, and sometimes any one of them will take trout, and again there are times when none of them will. The more I fish for trout, the less it seems I know about them, and find yet a great deal more to learn. And it certainly is very interesting the lessons one learns. The old proverb which says: "We learn wisdom from failure more than from success," is very true in trout fishing, and what would the pleasure be if we knew before we started just what we were going to do, and knew we were going to be successful. The very uncertainty adds zest to it.

ERNEST L. EWBANK.

## Fishing in California.

BY GOLDEN GATE.

WEATHER conditions have been ideal for winter sport in California, the rainfall having been exceptionally light, and more enthusiasts of the rod and reel have been in quest of steelhead trout, salmon and striped bass than is often the case at this season of the year. Splendid catches of bass and steelhead have been made, and so unusual have conditions been that some fly-fishing has been done with considerable success.

While the weather has been very satisfactory for fishing in tide water, the lack of rain makes the outlook for trout fishing in coast streams very uncertain. Streams are lower now than they should be in May or June, and the indications are that the season will be a very short one. Trout fishing will be in order in all of the fish and game districts of the State, except one in the high sierras, after April 1, and will be general a month later. The snowfall in the sierras has been light, and unless there are unusually heavy storms late in the season, early sport will be the best. Last season was an exceedingly hard one on trout, owing to the low waters, and the coming one promises to be even worse.

Steelhead fishing is still good in tidewater, and in some places exceptional catches are being made. Carl Werner and two companions recently fished in the Gazos lagoon and landed over 300 trout in one day. There is a limit to the catches that may be made above tidewater, but below the established lines there is none whatever.

Heavy catches of steelhead continue to be made in San Lorenzo Creek at Santa Cruz, and further down the coast, near Santa Barbara, some good sport has been enjoyed in the Santa Ynez River. It is reported that so low have some of the coast streams been that steelhead trout have spawned in the shallow lagoons, being unable to get upstream.

The largest fine ever imposed upon anyone in Trinity county for a violation of the fish and game laws was recently inflicted on J. H. Hooper of the Globe Mining Company. He plead guilty to the charge of turning sawdust from the company's mill into Cañon Creek, and was fined \$250, which he promptly paid.

The Union Oil Company, which has been on trial in the Justice Court at Martinez for permitting oil waste to flow into the bay from its refinery, has been bound over to answer to the Superior Court. The Fish and Game Commission contends that the waste oil from the refinery is killing the fish in San Pablo Bay. A bill is now before the State Legislature to make

possible the strict enforcement of the present law touching upon oil pollution of State waters.

Attention is being called to the fact that there is a radical conflict between the fishing laws of the State and the provisions of the law by which the water of streams may be appropriated. The work being done by the Great Western Power Company on the North Fork of the Feather River brings to public attention the fact that it is lawful for water power concerns to appropriate every drop of water in a stream, divert the water from the regular channel, and at certain seasons of the year dry up the stream from the point of diversion to the power house, which may be miles below.

The California Anglers' Association, the Pacific Striped Bass Club and the San Francisco Striped Bass Club have prepared a statement for the legislators now meeting at Sacramento in which arguments are presented for and against certain of the fish and game bills under consideration. Changes in the present laws relating to the open and closed seasons on salmon and striped bass are opposed, as are the efforts being made to remove all protection from black bass. The proposition to again permit the use of the Chinese shrimp net is condemned, it being claimed that since the use of this net was prohibited, there has been a great increase in the number of fry of striped bass and other fish in the bay. A bill prohibiting the use of salmon or trout roe as a lure is approved. A reorganization of the Fish and Game Commission is urged with commissioners devoting their full time to their duties. Bills are favored that will permit the importation of fish into the State during the closed season under proper restrictions.

The trout fishing season in coast streams opened on April 1, and some splendid sport has been enjoyed since that date. More anglers journeyed from San Francisco to fish on the opening day than was ever the case before, special trains being put on by the railroads to accommodate the crowds desiring to visit the streams on the peninsula. Weather conditions were decidedly favorable, and almost everyone returned with fair-sized catches. The rains late in March served to increase the flow of water, and better sport was enjoyed than was thought possible. It is conceded, however, that it will be but a short time until the water in all of the coast streams will be very low, and that the fishing season will be a short one.

While some trout have been taken with flies and with spinning spoons, most of the fish have been taken with bait, and it will be a couple of weeks before artificial lures are effective, as insect life is just commencing to make its appearance. The most taking lure at the present time is a hackle fly with the hook tipped with a salmon egg or an earth worm. Most of the trout landed were of small size, from six to ten inches in length, but here and there some large steelheads were found. While fishing in Laurel Creek, James Payne landed a 32-inch steelhead, and several 5-pound fish were taken on the opening day.

Many of the members of the California Anglers' Association visited Paper Mill Creek on the opening day, this being an established custom, and but little difficulty was experienced in securing satisfactory catches. Probably the best fishing, however, was experienced on the San Lorenzo River in the vicinity of Santa

Cruz. This stream was visited by hundreds, and it is asserted that at least 8,000 trout were taken there on April 1. Some large fish were taken on Soquel Creek, Clarence Houghton landing a 30-inch steelhead there. The streams in Alameda and Contra Costa counties were too low generally, and but light catches were made there.

The indications are considered good for the passage of the alien fishermen's bill by the State Legislature before its adjournment. This bill provides for an annual license tax on commercial fishermen, \$5 for Americans, \$10 for foreigners who are taking out citizenship papers, and \$100 for aliens not eligible to citizenship. The measure is aimed at the Japanese and Chinese whose mode of living makes it impossible for white fishermen to compete with them, and whose methods of fishing are declared to be destructive.

## Do Trout Eat Spawn?

BRANCHPORT, N. Y., April 8.—*Editor Forest and Stream:* I have heard it claimed many times that carp destroy the spawn of the lake trout (*Cristinomer namaycush*). Now, it does not seem to me that this can be so, as the carp is a vegetable feeder mostly, and a shallow water fish. Then at the time the trout are spawning (November and December) carp are supposed to be lying in deep water and in a semi-torpid condition. (The German Carp in the United States, Cole, page 561.) If any of your readers know of a case where trout spawn has actually been found in the stomach of a carp, I would be glad to hear from him in the columns of FOREST AND STREAM.

That the lake trout itself sometimes eats the spawn, I know to be a fact from my own observation. Three or four years ago in November or December, I saw a man dressing a lake trout, and the stomach was full of trout eggs. Again in December, 1911, a man brought to me the stomachs from two small lake trout, and both were full of trout eggs. He said that these trout were about eleven inches long. Their stomachs I now have, preserved in alcohol.

It would seem from the foregoing that it is not an uncommon occurrence for the lake trout to eat the spawn of its kind.

VERDI BURCH.

## Illinois Casting Club.

CHICAGO, Ill., April 11.—*Editor Forest and Stream:* The fish and game laws now pending before the Illinois Legislature can probably be passed if every man will help.

On receipt of this will you please write two letters, one of each to the gentlemen named below.

To the Hon. F. A. Garesche, Chairman, Fish and Game Committee, House of Representatives, Springfield, Ill.

Write, asking him to support House bill 453 without change or amendment, and to especially insist that there be no alteration made in the provision for a closed season for game fish.

Write also to Hon. Edmond Beall, Chairman, Senate Fish and Game Committee, House of Representatives, Springfield, Ill.

A letter of the same import asking him to support Senate bill 255 in the same way.

A. F. SWISHER,  
Secretary Illinois Casting Club.

Forest and Stream will give a weekly digest of Yachting and Motor Boating events from all over the country.

### International Yacht Race, 1914.

SIR THOMAS LIPTON has come back at the New York Y. C. with an unconditional challenge for the America cup in 1914. There is no more to be said. Either Sir Thomas gets the race or the cup is his without the formality of contest.

### Brooklyn Y. C.

YACHTSMEN met last week to perpetuate the Brooklyn Y. C. The organization passed out of existence when the National Yacht Club was formed two years ago. The organization will retain its membership in the Yacht Racing Association of Gravesend Bay. It will give one championship race this summer, starting and finishing the contest off the Atlantic Y. C. at Sea Gate. It is possible that the organization will have a station on the lower bay within another year.

### Port Washington Y. C. One-Design.

(Plans on page 501.)

THE hull specification for the new one-design are as follows: Length over all, 28 feet 6 inches; length waterline, 17 feet 9 inches; beam, 7 feet 1 inch; draft, 4 feet. Keel plank is to be of yellow pine  $\frac{7}{8}$  inch thick. Rest of planking to be of cedar  $\frac{3}{4}$  inch thick. Sternboard of mahogany  $\frac{7}{8}$  inch. The top sides to be in two planks, with ship lap and edges riveted with copper rivets.

Frames to be of oak and hackmatack,  $15\frac{1}{2}$  inches center to center. In wake of keel to be sided  $1\frac{1}{2}$  inches, moulded  $1\frac{1}{2}$  inches. In ends to be sided  $1\frac{1}{4}$  inches, moulded  $1\frac{1}{2}$  inches. Frames on sides to be knees, moulded  $1\frac{1}{4}$  inches, sided  $\frac{7}{8}$  inch.

Shelf to be of yellow pine  $1\frac{1}{2}$  inches by  $1\frac{1}{2}$  inches.

Deck Beams—Large beams at mast and each end of cockpit, sided  $1\frac{1}{4}$  inches, moulded  $1\frac{1}{2}$  inches; connected to frames by knees. Other deck beams to be sided  $\frac{7}{8}$  inch, moulded  $1\frac{1}{4}$  inches. Short beams to be sided  $\frac{3}{4}$  inch, moulded  $1\frac{1}{4}$  inches.

Keelson to be of yellow pine; to be 6 inches amidships, tapered at ends, and to be sided  $\frac{7}{8}$  inch.

Deck to be of white wood or other approved wood  $7/16$  inch thick, thoroughly painted and covered with 8-ounce canvas. Canvas to be carried down over sides of top strake and covered with flat weather strip  $1\frac{1}{2}$  by  $\frac{5}{8}$  inch yellow pine, rounded on edges. Deck to be given two coats of paint.

Boat to be fitted with two watertight bulkheads, of approved construction, one at after end of cockpit and one forward of mast.

Hatches—A small hatch to be placed on after deck and one on forward deck to obtain access to holds.

Cockpit Floor—Cockpit floor to be cedar or cypress  $\frac{1}{2}$  inch thick.

Coaming—Coaming to be of yellow pine of approved size and location.

Fastenings—Plank to be fastened with galvanized clinch nails; stern board, stem and outer edge of bottom plank to be fastened with brass screws if required. Fastening of keel plank, frame and keelson to be galvanized iron bolts clinched on washers.

Mast step to be of approved design.

Spars to be as per sail plan. Mast, boom and gaff. All of spruce. Jib boom if required.

Iron Keel—To contain about 1,100 pounds of cast iron well bolted to deadwood with  $\frac{3}{4}$  inch bolts. Pattern to be furnished by builder.

Rigging to be put in place by builder and furnished by builder.

All blocks, cleats, deck fittings, etc., to be put in place by builder and furnished by builder.

Rudder post to be of bronze or brass  $1\frac{1}{8}$  inches in diameter, and to have rudder thoroughly bolted to it with bronze bolts.

Tiller to have brass jaw, which is to take tiller, and to be fitted and fastened snugly to rudder post. Hinged to move, not stationary. Sails are to be furnished by owner.

The boat to be given at least three coats of paint or varnish, of approved make and color, inside and outside.

### San Francisco Y. C. Increases Membership.

THE San Francisco Y. C. now has the greatest enrollment in its history and is preparing for a very successful season. Fifty-four yachts are now flying the club colors and others will be added when the season is well under way. The sloops Genesta and Thelma are now attached to this fleet and will add greatly to its racing strength. The schooner Edris, built in the East for Captain John Barneson, has been fitted up following her strenuous trip around the Horn, and will participate in all of the races this season. A feature of the season's program is a regatta for schooners only.

### Yachts Change Hands.

THE Hollis Burgess yacht agency has sold the 25-foot waterline sloop yacht Irolita, owned by Walter K. Shaw, of Concord, Mass., to a member of the Boston Y. C.; the catboat Arbutus, owned by A. L. Merritt and C. W. Hall, of Quincy, Mass., to F. W. Goeller, Jr., of New York; the yawl Zara, owned by Manton E. Merchant, of New York, to Ralph L. Colton, of Philadelphia; the 21-foot waterline racing sloop Opitsah III., owned by Elmer F. Smith, of Boston, to J. M. O'Brien, of South Norwalk, Conn., and the champion Eastern Y. C. 17-foot knockabout Scarab, owned by Caleb Loring, of Boston, to a prominent member of the Boston Y. C.

### Ticks From the Ship's Clock.

A SYNDICATE of Cleveland, Ohio, men have ordered designs of a Class R yacht from Gardner, and she will be built at City Island.

The Addison Hannon Class P boat, from designs of Fred W. Goeller, Jr., is nearly planked in at City Island, N. Y. She will not be as long as most of the newer P boats and will have more beam. She will have the limit of displacement allowed by the new rules.

Three entries have been made for the Philadelphia-Bermuda race this year. They are: Dream, owned by Commodore Charles E. Lagen, Yachtsmen's Club, Philadelphia, last year's winner; Barbara II., Vice-Commodore W. M. Duncan, Staten Island Boat Club, and Tec, W. T. Wheeler, Jamaica Bay Y. C.

The Brooklyn Y. C., one of the oldest yacht clubs in the country, has been reorganized.

The 48-foot cruising power yacht Selma, owned by C. F. Ackerson, of Bay Shore, N. Y., has been bought by Holman F. Day, of Portland, Me.

H. E. Bodman, of Detroit, has bought the 53-foot over-all schooner Nokomis, which is at Colter's yard, Dorchester, and will start in May on a novel cruise to his home waters. A 12-18-horsepower Scripps engine is being installed, and the boat will go by the Erie Canal. As the boat draws seven feet and the canal is only about four and a half feet deep, he solves the problem thus. He will place pontoons on each side of the run and will partially float the boat with these, thus reducing his draft the required amount.

Rear-Commodore J. Pierpont Morgan has named his new 50-foot one-design sloop, which is in commission at Herreshoff's, Grayling.

The Canadian cup defender Seneca, a Class P boat, has been bought by Amilius Jarvis, Jr., a Canadian yachtsman, and will be raced in connection with the Perry Centennial at Put-in-Bay in August.

Charles C. Allom, a possible challenger for the America cup, has said that if he wins the international yachting event at Havre, France, early this summer with his 15-meter cutter Istria, he will be glad to have her brought to this country on her own bottom to race against an American yacht built on the same rules as Istria.

In changing address, the old as well as the new should be given.

Published Weekly by the

FOREST AND STREAM PUBLISHING COMPANY,

CHARLES OTIS, President.

W. G. BEECROFT, Secretary. W. J. GALLAGHER, Treasurer.  
127 Franklin Street, New York.

**CORRESPONDENCE**—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

**SUBSCRIPTIONS**: \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

**ADVERTISEMENTS**: Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

Entered as second-class matter at the Post-Office, New York, N. Y.

### DR. TOWNSEND VINDICATED.

SOME months ago we called attention to a scandalous attack made by a committee of the House of Representatives, of which John R. Rothermel was chairman, on Dr. Charles H. Townsend, of the New York Zoological Society. We pointed out that the attack was without foundation, and that in the testimony taken by the Rothermel Committee, there was nothing to justify the charges made.

As Dr. Townsend is a public official, the New York Zoological Society felt it necessary that the attack on him should be made the subject of an independent investigation, and accordingly the executive committee of the Zoological Society referred the matter to one of its members, W. W. Niles, a lawyer of New York, for investigation and report. Mr. Niles made a complete and thorough investigation of the evidence taken by the Rothermel Committee, and of the proceedings before the Hague Tribunal at which Dr. Townsend was a witness, and has reported that neither in the evidence taken by the committee or in the proceedings of the Hague Tribunal is there anything which justifies the charges of the Rothermel Committee. Mr. Niles takes up each one of the charges, and quotes testimony bearing on it and concludes that the charges from the report of the majority of the Rothermel Committee "are absolutely without justification from any evidence to the committee."

Mr. Niles' report to the executive committee of the New York Zoological Society—consisting of Madison Grant, Chairman; Samuel Thorne, Wm. Pierson Hamilton, W. W. Niles, Henry Fairfield Osborn, Frank K. Sturgis, Percy R. Pyne and Lisperard Stewart—was considered by that body, which thereafter unanimously passed the following resolutions:

Resolved, That after a full examination of the proceedings of the House Committee on Expenditures in the Department of Commerce and Labor, and of the report submitted by the minority of the said committee by which it ap-

pears that the said committee has never held a single meeting for the purpose of considering the evidence, and that the report made by the chairman was never submitted to the committee for its consideration, and that in the opinion of the minority the report had never been approved by a majority of the committee, that it is the unanimous opinion of this executive committee that the honesty and integrity of Dr. Charles H. Townsend have not been impugned in any way; that the recommendations of said Congressional Committee are in no wise justified by the evidence taken by the committee; that the report of the majority of the committee is drawn without any reference to the facts in regard to Dr. Townsend's connection with the matter, and that the attack upon him is unjustifiable, malicious and untruthful, and further

Resolved, That the Executive Committee of the New York Zoological Society does unanimously approve and endorse the report upon the subject prepared by Mr. Niles and the conclusions contained therein.

### TAGGING BIRDS.

IN another column appears an interesting letter from a St. Louis shooter on the subject of wildfowl tagging as a means to spring shooting. He has invented a most ingenious tag, whereby one may tell the day of the month and the month in the year when the fowl was killed. He suggests that the Government sell tags at twenty-five cents each, funds thus received to be used for game propagation. The plan reads like sincerity, and probably the writer so intended it, nevertheless any loop hole that will give the market hunter a chance to ply his trade should be killed upon its inception. Most of this class of gunner is without sense of honor, and any scheme to tag would be evaded, while many hotel proprietors would cheat the law by repeating on the tags or otherwise getting around the license. An ounce of prevention in this instance will do more for propagation of wildfowl than will a million tags—tag day is past, and we veto any suggestion that may open the way to spring bird destruction.

### AN ICELESS EXIT OF WINTER.

UNDER the laws of compensation and as an offset to the damage by spring floods in the Middle West, the absence of floating ice or of ice gorges on practically all of the great streams of the country certainly is a factor not to be ignored. Had there been this general element added to the enormous flow of water, the destruction would have been more extensive.

The only partially ice-bound territory now is in the furthest Northern States west of the Mississippi and east of the Cascade range. In the interior of Minnesota, ice is still about thirty inches thick. North Dakota reports twenty-one inches at Bismarck and twenty-five and one-half inches at Williston. Practically all of the great Eastern rivers, as well as the Ohio and its immediate tributaries, were cleared of ice prior to the middle of March, leaving only the upper Mississippi drainage basin, which now has about four inches of snow from which on its own account little is to be feared. The Upper Lakes still are icebound.

Another compensating fact is the minimiz-

ing of damage to river craft on such streams as the Ohio, Mississippi, Hudson, Delaware, Susquehanna and lesser streams. Usually, thousands of damage are inflicted not only on vessels at wharf and those moored in coves for winter keeping, but on docks and anchorages as well, wherever the ice gorges or floating ice has had access. Thus this season has a credit not to be overlooked when the account is finally balanced against the desolating floods.

### "NESSMUK."

JUST imagine a story by Nessmuk in this day, when the old outdoor reader complains that "nowadays we don't get such great stuff as Nessmuk, Kingfisher, Mather and their kind used to write." Cheer up—we have a heretofore unpublished story by Nessmuk (George W. Sears), with the manuscript written, as they all were, in his own hand writing, the crabbed, uneven hand of the man devoting much time to the gun, rod, paddle and axe, and only using the pen when he had in mind something too good to be kept from those he loved, the men who sought outdoors life. The narrative is one of slavery days, long before the emancipation of the negro. It is Nessmukian in its simpleness, with an anti-climax that makes one want to get up and holler.

We came across the story in a bundle of manuscripts that had been "copy read" and set aside for later use. In those days Nessmuk had many confreres of the rod, gun and pen, some of whom were his equal in their facility with these implements, consequently a story by Nessmuk took its turn with that of others in publication. At any rate, this great story comes now as a reminder of one of the greatest outdoor writers this country ever has known. The story will begin in the next issue; you won't want to miss it. If you buy from the newsstands, order early from your dealer.

### MARCH ADVERTISING RECORD.

MOST everyone agrees that there is much news and information in advertisements, and that the reader takes pleasure in perusing them, though he has no definite want in view. Some time ago we heard of a man who was in the habit of sending some of the American magazines to a friend in India, but who tore out the advertising pages in order to save postage. Getting a letter from the recipient, his friend wrote him thus: "Please discontinue removing the advertising pages, as I enjoy the advertisements fully as much, if not more, than the main part of the magazine."

Printers' Ink compiles the total number of agate lines of advertising carried by four outdoor publications last month as follows:

Publication.	March, 1913.
1. Forest and Stream.....	17,639
2. Outing Magazine .....	13,496
3. Field & Stream.....	11,636
4. Outdoor World .....	7,476

It seems to us that the publication carrying a large amount of advertising is more valuable and interesting to the subscriber than one without this kind of information.

The above tabulation shows where FOREST AND STREAM stands.

### Yachting in San Francisco Bay.

FRANK GARDEN and Harry Cory, of the San Francisco Y. C., have offered a cup to be sailed for by the yachtsmen of that club under different conditions than usually rule. The race will be over a three-mile triangular course, and will have its commencement at the club house. The contestants will line up at the boat float, launch their small boats, row to the yachts anchored in the stream, cast off the moorings, hoist sail and beat to windward for a mile. After turning a mark, a spinnaker must be set and a run of another mile made, the race to conclude with a reach to the anchorage where the moorings must be picked up, the canvas stowed away, and the trip made back to the float in the small boat.

The sloop Discovery, one of the fastest yachts on the bay, for years owned by Captain MacFarlane of the Corinthian Y. C., has been purchased by R. C. Pell, commodore of the San Francisco Y. C., who has disposed of the Vixen to Jack Lowe, of the same club. James Lanagan, ex-commodore of the San Francisco Y. C., has purchased the sloop Emma from G. Dorn, of the Corinthian Y. C., and the latter will sail the Fulton G. this year. The Merry Widow is now owned by Frank Parker and is being prepared for the opening of the season by having a new centerboard put in and her fin keel cut down a foot. She will be sailed under the colors of the Sausalito Y. C.

At the annual meeting of the Sausalito Y. C., held recently, officers were chosen as follows: Commodore, Lester F. Secor; President, Walter Reubold; Vice-Commodore, Peter Diehl; Vice-President, Wm. Larson; Port Captain, Frederick Hindshaw; Secretary, W. L. Sutherland; Measurer, W. M. Woodward; Treasurer, Al. F. Reubold; Regatta Committee, J. Cochran; P. Diehl and W. L. Sutherland. This club has just been made a member of the Pacific Inter-Club Yacht Racing Association. A schedule has been prepared for the season which will open on April 26 and close on Oct. 26. Among the most important events planned are the following: Race for the Rohde cup, June 1; Sorenson cup race, June 15; Nathan-Dohrmann trophy race, July 6; perpetual trophy race, July 13; Inter-club race, Sept. 9; Reubold cup channel race, Sept. 21, and Aquatic Day, Oct. 5.

The Encinal Y. C., of Alameda, is letting contracts for many improvements in its club house, including a ball room and new dressing rooms and a large boat deck. A fleet of a dozen racing dories will be placed in commission this year, these to be of the 21-foot class. The new officers of the club are: S. M. Haslet, President; E. M. Shaw, Vice-President; Harry H. Shed, Secretary.

The San Francisco Y. C. has adopted its program of events for the coming season, and has named May 3 as opening day. The principal events of the year will be the clambake at Paradise Cove, May 30; schooner race, June 15; Farallone race, June 15; motor boat regatta, July 4; yacht race for Polhemus-Lowe cup, July 4; lightship race, July 13; annual regatta, July 20; river cruise, Aug. 31 to Sept. 9; power boat race, Sacramento to Sausalito, Sept. 9; closing day, Oct. 26.

The Corinthian Y. C. will open the season on April 26, and the leading events of the sea-

son will be the annual regatta, May 30; Hammersmith trophy race, June 15; Bellis trophy handicap race, June 29; race to Santa Cruz, July 19; river trip, Aug. 9 to 17; inter-club regatta, Sept. 9; motor boat races and aquatic sports, Sept. 21; Corinthian games, Oct. 5; closing day, Oct. 18.

## Canoeing

### Atlantic Division, A. C. A.

THE annual Ramapo River cruise will be held Saturday and Sunday, May 3 and 4, from Suffern, N. Y., to Mountain View, N. J.

The advance in date is on account of the early spring and the probability of low water at the original time set.

This cruise covers the most interesting part of the stream and many exciting rapids, rifts and dams will be run.

About fifty members made this trip last year, and in view of the complete success and great enthusiasm shown, the committee expects one hundred or more and can assure every one of a most enjoyable and exhilarating cruise. If undecided about going, speak to some one of those who shot the rapids and ran the rifts last year, and their enthusiasm will surely induce you to pack up your outfit and attend.

Frequent trains leave New York via Erie R. R. for Suffern, N. Y.

Leave New York, Chambers St.—9:10, 9:20, 10:45, 12:40, 12:50, 1:00, 1:45, 3:15, 3:50, 4:40.

Leave Jersey City—9:30, 9:34, 11:00, 12:54, 1:04, 1:15, 2:00, 3:29, 4:04, 4:55.

Arrive Suffern.—10:29, 10:43, 12:13, 1:46; 1:53, 2:30, 3:21, 4:53, 5:14, 6:19.

For other trains consult Erie R. R. time tables.

Camp will be made on Saturday evening about six miles down stream where we will have a regular Atlantic Division camp-fire.

Camp will be struck early Sunday morning,

the cruise continuing to Pompton Lakes, where dinner will be served at the hotel at noon. A light supper will be served at Mountain View at the end of the cruise, so don't bring grub for these meals.

Those desiring to paddle up the Hudson River to Piermont, N. Y., on the Saturday and Sunday previous (April 26 and 27) will find a freight car to transport their boats and outfits to Suffern. Also boats can be shipped by freight or express care of the American Canoe Association, Suffern, N. Y. However, a word to the wise—ship your outfits early, or paddle up to Piermont. Proper arrangement will be made to ship canoes back after the cruise.

If you have a boat and no partner, or have no boat and want a partner, notify the committee, and they will endeavor to make arrangements for same.

Now get busy. All live canoeists will make this cruise. Don't miss it. The advice of the committee is go as "light" as possible.

The committee follows: Eugene C. Kelly, Chairman, 904 Jackson avenue, Bronx, N. Y.; Jule F. Marshall, Inwood C. C.; Charles Spenser, Knickerbocker C. C.; Benjamin A. Acker, unattached, Ossining, N. Y.; Arthur Lucke, Yonkers C. C.; Edward F. Maloney, Hiawatha C. C.; Eugene F. Cole, Wenonah C. C.

### A. C. A. Membership.

#### NEW MEMBERS PROPOSED

Atlantic Division—J. Pierson Reed, Vine-land, N. J., by Levi Hindley.

#### NEW MEMBERS ELECTED.

Atlantic Division.—6640, Frank E. Esibill, 79 Bank street, Bridgeton, N. J.

Western Division.—6638, John Stewart Elliott, Beatrice, Neb.; 6639, Mark L. Powers, Beatrice, Neb.

CANOEING, CANADA STYLE.

# ARCHERY

Forest and Stream is the official organ of the National Archery Association.

## The Method of George Phillips Bryant

**I** NTERESTING and instructive letters on methods of shooting in archery were read at the recent annual banquet of the Chicago Archery Club. For the benefit of the cause of archery, it was decided to publish these letters in full.

Our present champion, Geo. Phillips Bryant, answered a series of fourteen questions, prefacing his replies as follows:

"These answers tell what I do and not necessarily what I would recommend. Though Ford's book is my Bible on archery, I have always believed that the individual should accommodate Ford's methods to his particular requirements and physical powers.

"For the short ranges, the style used by Mrs. Howell and so ably set forth by Prof. Rendtorff in his recent articles, cannot be beaten, and if a man has great power, he may well try it at the longer ranges.

"I have never quite settled in my mind the value or wisdom of the particular modifications that I personally show in my shooting."

And further in a later letter Mr. Bryant explains as follows:

"I believe every man has to go through a certain amount of personal experimentation before he can settle on that method best suited to his peculiarities, and feeling that I am still in the experimental stage, I hesitate to set forth any particular style or method as desirable, especially as it might be considered a challenge to discussion, which I would regret."

The questions and answers follow:

Question 1. "What weight bow do you use at 100, 80, 60, 50 and 40 yards? What weight arrows at those distances, and are you particular that all of a set of six arrows weigh the same?"

Answer. "I have used bows varying from 48 to 56 pounds at all ranges, but now use about 48 at the American round ranges and about 52 at the 80 and 100.

"I abandoned anything less than 5 shilling arrows two years ago. Mr. Rendtorff has stated every argument better than I can. If I were only going to shoot up to 80 yards, I would use a light bow about six feet two inches long and a 6 shilling arrow. I have never had a set of arrows weighing alike, but test them for flight by actual shooting."

Question 2. "How high do you string your bow; that is, the distance between the string and the belly of the handle?"

"Is your nocking point tight or loose on the arrow?"

Answer. "Six and three-quarter inches. Nocking point just a fit, but not tight. However, I am rather careless about the fine points at times."

Question 3. "You seem to take a preliminary aim with bow half drawn and a final aim with bow fully drawn. Have you a point of aim at each of these draws, and where is it?"

Answer. "One point only. For some years I held my arm out straight and drew as Richardson does, but went back this last spring to my old style as less exhausting and awkward. I draw as I raise and attempt to approximate the point of aim as I draw so that at full draw I shall have just come on point of aim, then steady on it and release. This is what I try to do, but no doubt make many false moves."

Question 4. "How do you loose? Do you throw your fingers off the string with a slight backward movement, or do you hold your fingers bent and tense and with the least possible movement allow the string to roll off the fingers, which latter have a tendency on account of their tenseness to fly back into the bent position like a spring upon release of the string?"

Answer. "I used to open my fingers and pull back so that it had appearance of an explosion. Then tried Fisher's release, then took lessons from Thompson and Taylor, but have never got a release to suit yet. I try to get a somewhat more mechanical and less delicate release than they get. Your last alternative with the addition of the fact that my hand and arm come back about half an inch in the act of loosing, so that the string does not go forward till entirely free, covers it as well as I can."

Question 5. "I notice when fully drawn the top of your thumb is placed just back and below your right ear, or is it in front of your ear? Do you depend upon your thumb, thus placed, as a stop or anchor to hold your bow fully drawn, while you perfect your aim, or is it simply to steady your right hand and determine the length of your draw, the muscles of your arm and back, holding the strain of the bow?"

"Does the end of your thumb act as a pivot in releasing the string?"

Answer. "My thumb comes on the point of my jaw bone and is a personal peculiarity only. I draw much too far back by all the rules of archery, and can do so only because of facial conformation. I never intentionally let any pressure come on the thumb, but use it merely as a guide. The pictures show a pressure due to holding for the photographer. The result of pressure is to make the thumb act as a pivot, throw the hand out of line and ruin the shot."

Question 6. "Does your forefinger touch your chin, neck or face when bow fully drawn, and which and where?"

Answer. "It probably touches under my chin, though I am entirely unconscious of it. I believe if one is going to shoot only 80 yards

and under, that it is of great advantage to draw to the corner of the mouth as Mrs. Howell and Mrs. Phillips did."

Question 7. "I believe you use a glove finger tips. How do you make your tips? Do you use quills, are you careful not to allow a crease in your tips? Of what kind of leather? Do you prefer the 'feel of the string'?"

Answer. "I face the finger ends with corodvan or horse-butt, sewing them on at the base and part way up the sides, but leaving them free on the ends. I am not satisfied with them. I use thin tips so as to feel the string. There are times when I do not prefer 'the feel of the string,' but grin and bear it."

Question 8. "Please say where you place the string on your fingers."

Answer. "My fingers show heavy callouses beginning about one-quarter of an inch from the joint and almost square across."

Question 9. "Do you hold your bow exactly upright; that is, vertical, and do you look to the right or left of your string as you aim along the arrow? Are both eyes open, or do you close your left eye?"

Answer. "Very slightly slanted to the right and look by the left of the string. Both eyes open."

Question 10. "How do you hold the bow with your bow hand, wrist perfectly straight, or slightly bent toward you to avoid striking the arm guard?"

Answer. "Wrist straight. Do not bend it in or out and can shoot bare arm without striking except on recoil I get the vibration."

Question 11. "As you draw with your string hand, do you push forward with your bow hand, or is all the drawing done with your string hand?"

Answer. "I have my arm (left) practically straight before drawing, and as I raise my bow I draw with the right arm and back, so that as my left arm comes up, it remains straight, but not rigid. I do not grasp the bow tight until up and on the point of aim, and that allows it to settle in my hand so that it pulls true."

Question 12. "When you have perfected your aim, is your bow arm extended to its uttermost, hand, wrist and arm held rigid, elbow locked open, or do you find it necessary to avoid rigidity in order that the recoil may follow the direction the arrow is aimed?"

Answer. "It is extended, but not to its uttermost, and the elbow is not locked, nor is it bent. I have a feeling of full extension without that of stretching. It must be very firm but not rigid. I developed a flinch last spring, when I was shooting with the outstretched arm, that nearly drove me out of archery. I do not feel capable of advising, as my own control of my left arm is so poor."

Question 13. "Do you draw until the front of the pile just touches the back of the bow or

until the end of the pile is flush with the back of the bow?"

Answer. "I draw until the shoulder of the pile—that is, the bevel—is back as far as it will go without dropping on my knuckle."

Question 14. "I notice you stand squarely at right angles to the target. Do you throw your weight mostly upon your heels or front of your feet?"

Answer. "Weight on both feet equally and more on the heels than the toes. I stiffen my knees and back about the same time as I do my grasp on the bow."

The American round champion of 1911, Dr. R. P. Elmer, answered questions as follows:

Question 1. "How do I loose?"

Answer. "In the most rotten manner which is a constant source of disgust to me. Practically all the weight of the string is borne on my third finger, instead of being equally distributed as it should be. This results in an unnecessarily bent bow string which on being freed imparts a wobble to the arrow. Theoretically the string should bend only at the nock of the arrow, and the thickness of one's fingers makes an unavoidable error. If the third finger does the pulling, it is so much the worse. I do not loose with a snap, which I do not approve of, but at the same time I do not think I am sluggish."

Question 2. "Does my string hand touch my face?"

Answer. "I had to go out in the yard and shoot a few arrows to find out just what happened, and I discovered that my second metacarpophalangeal articulation rested on the inferior mandibular border just anterior to the insertion of the masseter, while my first lay against the thyroid cartilage. This is all wrong in my opinion, because it throws the nock end of the arrow in so close to the neck that if one stands sideways to the target, his nose shuts off half the shaft of the arrow from the eye. In the future I expect to give a good tryout to a draw to the mouth for 60 yards as the French do. After I have loosed, my hand presses tight to my neck."

3. "I do not string my bow high enough for fear of breaking it."

4. "When in full draw, my arm is straight and rigid. This is the cause of my worst fault which has lost me many a good score, and which is that I throw my left shoulder so far up and forward that the bow string often hits it."

5. "My finger tips are far from satisfactory. I use the kind Captain Barnes sells. Owing to my pernicious method of holding the string, my third finger is apt to become very sore, and I have to use on it a very thick finger tip. This makes my loose still more inaccurate."

6. "At Chicago I stuck an arrow in the ground where the ball of my left foot rested and sighted over it to get a straight line to the target. It was merely to find the initial line on which a point of aim must lie. I think a plumb line is better."

And in response to a belated request the morning after the banquet, the following description of his "loose" was received from that veteran archer and several times champion, Will H. Thompson:

"The string lies in a *slightly* diagonal direc-

tion from the first finger to the third, not straight across, and *as much pressure as possible put upon the shirking first finger*. Arrow drawn nearly, not quite to the head, aim then taken, and then, all being held quite firm, the fingers being as *straight* as possible to retain the string, *slowly drawn backward off the string*.

"Note.—The fingers *not opened at all*, but *pulled off the string*. The string should come back a trifle with the pull, or *feel* as if it did, and after the loose, the drawing hand should remain below the right jaw, with the fingers tense and slightly incurved. This gives the keenest loose and flattest trajectory of which the bow is capable, and no good arrow will wobble or wag in the least if so delivered. With such a loose, the 100-yard range is fully commanded by a 40-pound bow. The hardest thing to command at the loose is to pull the fingers off *slowly*, and yet this is more important than any other point in archery. Every time a good archer gets this slow, even pull of the fingers off the string, the arrow goes to the mark. The slow loose does not upset the left arm, and gives the one measureless moment in which the aim is corrected, and the success of the shot assured."

I hope the writer may be pardoned if he closes this description of methods of shooting the long bow by saying that it is his opinion that the "loose" is by far the most important act in the series of acts that go to make up the shooting of an arrow. An archer may stand in perfect form, he may nock, draw, hold and aim with great care and precision, and yet, when the crucial moment comes, the climax or finale of the loose, he finds that all the thoughtful painstaking care exercised in the preceding acts may go for naught because of the slightest variation or error in the release of the string, and may the writer add further that as an adjunct to the "loose," the finger tips do not receive one-half the attention they should.

J. H. PENDRY.

### New Archery Club.

PITTSBURGH, Pa., April 10.—*Editor Forest and Stream*: In response to an invitation tendered by C. W. Welty and John T. Monahan, prominent citizens of Wheeling, W. Va., James S. Jiles and the writer spent Saturday and Sunday, April 5 and 6, at the famous little city of the hills.

The object of our visit was to christen a new archery club, measure out a new range, and teach a half dozen promising converts how to keep the "right hand to the face and elbow up."

We were taken by Mr. Welty to the Fort Henry Club, and there entertained most royally; in fact, we partook so freely of our host's generous offering that Mr. Jiles wanted to stay "right there" and postpone exercise until morning. Mr. Jiles has considerable of that quality which Brother Rendtorff calls inertia, and as the inertia of heavy bodies is much greater than that of small bodies, we must all concede that he is "some stayer." After lunch we were driven by motor to Mr. Monahan's home, Howard Place, Pleasant Valley, and there treated to a pleasant surprise, for while we knew that the suburbs of Wheeling were beautiful, we were not prepared to see the fine country estate of nearly one hundred acres with suitable places

for ranges of one hundred yards or more on every terrace.

The place chosen for the targets is reached by a winding road and is situated on the level crest of a high hill where for miles around one can see and enjoy a prospect truly pleasing.

The wind was high and interfered somewhat with the scores.

Before initiating the beginners, Mr. Jiles and the writer shot an American round with the following scores:

	60Yds.	50Yds.	40Yds.	
Jiles .....	25 113	28 150	30 182	83 446
Hertig .....	28 132	30 164	30 212	88 508

Beginners' round, 72 arrows, 40yds.:				
J. T. Monahan ...	40	158	Harry Lutz .....	30 102
C. W. Welty .....	36	120	William Howard...	12 42
Frank Mulaney ...	40	148		

In my opinion these scores made by men who never shot a bow before are very good. Mr. Welty handled the weapon with the careless ease of an Indian, and if it were not for his quickness, would have outshot all the others.

Mr. Jiles has offered a Barnes bow as a prize to the first man making, within twelve months, a score of 450 in the American.

One of the objects of our visit was not attained. Mr. Monahan was expecting to have on hand for our test and inspection a pair of bows which Mr. Barnes, the maker, says cannot be duplicated in quality for \$500.

The bows were to be delivered on April 1, but no doubt Mr. Barnes' illness has held him back in their manufacture.

Meanwhile we hope that many little clubs are springing up here and there all over the country.

O. L. HERTIG.

### The Newton Archers.

NEWTON CENTER, Mass., April 7.—*Editor Forest and Stream*: Several of the Newton archers spent Saturday afternoon, April 5, in target practice on the archery range at the Newton Center Playgrounds.

The weather was about perfect, spring was in the air, and several meadowlarks attended the archers and sang a tuneful accompaniment to the swish of the arrows in their flight.

The Newton Archers, as the local archery club is named, has among its members several ladies and three youthful archers about ten years old, and some of the ladies and children were shooting Saturday afternoon. The men shot the American round, the ladies shot the Columbia, and the children shot at thirty yards.

The following scores were made:

American Round:				
	60 Yds.	50 Yds.	40 Yds.	Total.
C. T. Switzler.....	23 101	23 146	23 149	80 396
L. C. Smith.....	29 98	25 127	30 164	75 389
S. W. Wilder .....	18 70	23 146	30 160	76 376
Ellis Spear .....	17 95	17 69	22 100	56 264

Columbia Round:				
	50 Yds.	40 Yds.	30 Yds.	Total.
Mrs. B. P. Gray.....	20 62	22 112	24 136	66 310
Mrs. L. C. Smith.....	14 70	16 78	23 123	53 271

Ninety-six arrows at thirty yards:  
Dorothy Smith.....45 200 Philip Wilder..... 133

In four consecutive ends Dorothy scored as follows: 4 18; 3 11; 5 27; 4 22; total, 16 78.

Dorothy and Philip both took up archery last fall, and there is a friendly rivalry between them to see which will make fastest progress.

On March 22 and again on April 3, S. W. Wilder shot an American round, making the following scores:

	60 Yds.	50 Yds.	40 Yds.	Total.
March 22 .....	27 133	27 127	30 154	84 414
April 3 .....	27 109	27 133	30 206	84 448

April 19 is a holiday in Massachusetts and

the Newton Archers are planning to hold an archery tournament on that date at the Newton Center Playground.

There are several members of the Newton Archers who have just secured their tackle and who have never shot before, and an especial effort is being made to encourage these to take part in the tournament. A special round at the 40 and 30-yard ranges for these novices will be one feature of the tournament.

LOUIS C. CMITH,  
Secretary The Newton Archers.

**Dr. Coles' Fine Shooting.**

CHICAGO, Ill., April 5.—*Editor Forest and Stream:* Archers rarely indulge in target practice at twenty yards. I remember an impromptu match shot at this distance at the national tournament in 1908. The regular program for the day had been finished, and all the archers and spectators gathered near the contestants. The interest manifested was tense, and held to the end. Hardly a word was spoken, nor a sound heard save that of the arrows striking the targets. Scarcely a person moved until the shooting was finished. Why were they so spell-bound? Because the distance was so short that they not only saw the target hit, but hit near its center, nearly all the arows finding the gold or red.

To onlookers it is not interesting to watch archers shooting at targets placed so far away that they make as many misses as hits.

A rifleman expects to strike the bullseye with every shot, no matter what distance he is shooting, and he comes near doing it. What would we think of him if he placed the target so far away that he did not hit it half the time?

I did not start out to write about short range shooting; but it is certainly interesting to see one accomplish what he is trying to—in this case, hit the gold.

I recently received a card from Rev. E. I. Cole, of Ossining, N. Y., who will be remembered as a novice at the national meeting last August. He reported a wonderful score, which he had just made with thirty arrows at twenty yards. I can find no record of any finer target shooting at this range, save a score by Will H. Thompson, when he made 29 golds and a red out of 30 shots.

I give Mr. Coles' score in the order in which the hits were made: 999, 999, 999, 999, 799, 999, 999, 997, 999, 977=30—262.

Don't look with contempt on a fine score, even though made at short range.

The National Association does not recognize the twenty yards range; and few archers even practice it, except occasionally, "just for fun."

If any of the archers, even the best of them, think it easy to duplicate Mr. Coles' score, I suggest that they try to do it; and when they succeed, report it to the FOREST AND STREAM, and also state how many trials they made before they accomplished the feat.

EDWARD B. WESTON.

# Southwestern Handicap

Adds to Year's Victories With  
*Remington-UMC* Guns and Shells

First Big Interstate Handicap of 1913 Pays Another Tribute to the "Perfect Shooting Combination."

## A Few of the Many *Remington-UMC* Winnings:

**Preliminary Handicap**—Won by R. B. Barnes, Bay City, Texas, 96 x 100, shooting a *Remington-UMC* Pump Gun.

**High Professional on All Singles**—Won by Thomas A. Marshall of Keithsburg, Ill. Mr. Marshall was also high professional in the Preliminary Handicap, 94 x 100, and tied on all targets shot at for entire tournament, shooting *Remington-UMC* Gun and the Speed Shells in all events.

**High Professional on Doubles**—Won by Wm. H. Heer, with *Remington-UMC* Gun and Arrow Speed Shells.

**Southwestern Handicap**—Tied for by Robert Sorenson, shooting *Remington-UMC* Autoloading Shotgun and Arrow Speed Shells.

**Long Run of Tournament**—Won by Homer Clark, 134 straight, with *Remington-UMC* Pump Gun.

*You May Depend Upon Remington-UMC — The Perfect Shooting Combination — For Higher Scores at the Traps, Better Field Averages.*

**REMINGTON ARMS—UNION METALLIC CARTRIDGE CO.,**  
299 Broadway - - - - - New York City

stand their handicaps, while others who were looked upon as not dangerous outshot their previous scores.

R. B. Barnes, an amateur of Bay City, Texas, shot himself into the shooting world by scoring 96 out of his 100, shooting from the 18yds. mark, which did not seem to worry him. In fact, Barnes beat his morning's score, when he only scored 93 from 16yds.

Nic Arie again distinguished himself by getting second place with 95. Most of the professional shooters were handicapped from 19yds. to 23yds., and in consequence did not make high scores. Tom A. Marshall was high in that class with 94.

In the Preliminary Handicap there were 39 entries at \$5, or \$195; 2 penalty entries at \$8, or \$16; 20 entries for targets only, making 61 entries in all. Added money \$100; total purse, \$311.

Winners, amount won and winning score follow: R. B. Barnes, 96, \$68.45; Nic Arie, 95, \$55.95; H. P. DeMund, T. C. Ford, J. A. Gwynn and Bart Lewis, 93, \$33.40 each; W. B. Twitchell, S. L. Gill, George Crosby and R. Merrill, 91, \$13.20 each.

THIRD DAY, APRIL 10.

Owing to the high wind which blew directly into the faces of the shooters and which made the flight of the targets very uncertain, the shooting during the entire day was very difficult, and as a result, many scores suffered.

In the early morning program at 100 targets, Homer Clark and Bill Crosby, both professional shooters, and Nic Arie, of Houston, an amateur, tied with 98 breaks out of 100 targets, most wonderful shooting, considering the conditions.

# WINCHESTER

## .22 Caliber

## Repeaters

### Three Models to Select From

There are three different Winchester .22 Caliber Repeating Rifles, either one of which gives first class satisfaction for target shooting or hunting small game. They are the Model 1903 .22 Automatic; the Model 1890 and the Model 1906. The first, as its name implies, is reloaded by recoil. After its 10-shot magazine is filled and the rifle once loaded, the only effort required to shoot it is to aim and pull the trigger. On account of the ease and novelty of its operation, there is no end of fun shooting this rifle. It's the peer of all .22s. The Models 1890 and 1906 resemble one another very closely, but differ in length and weight. Both are handsome, well-made, fine-shooting, smooth-working guns. The latter is a handy little piece which has no equal in gun value. It has a 20-inch, round barrel, fitted with sporting front and adjustable rear sights. It shoots .22 Short, .22 Long and .22 Long Rifle Cartridges, which permits the use of light ammunition for target work and heavier cartridges for game shooting. All three of these rifles are Take-Downs, and come apart easily and quickly. They can be packed in a small compass, which makes them just the thing for a fishing, boating, automobiling, or other outing trip.

**WINCHESTER CARTRIDGES.** Whichever one of these rifles you select, use Winchester make of cartridges in it. They develop the possibilities of Winchester and other makes of rifles and revolvers to the fullest degree. Get the kind with the big **W** on the box.

### SOUTHWESTERN HANDICAP.

The Southwestern Handicap at targets, one of the most important shooting contests to be held this year, was won by a Texan. Although shooters of many States competed for this event, Texas marksmen proved to be superior. H. R. Bosley, of Dallas, was the winner after shooting off a tie with Robert Sorenson, of Rockport, and Bob Connerly, of Austin, on a score of 92 out of 100 targets.

Connerly was handicapped at the 20-yard line. Bosley

had one yard on Connerly, shooting from 19yds., while young Sorenson stood at 16yds. The first tie, all three men shooting at 20 targets, resulted in Connerly and Bosley each breaking 19, while Sorenson broke only 17, which put him out of the running. Again Connerly and Bosley shot at 20 targets, which resulted in Bosley scoring 18 to Connerly's 16, and which gave Bosley the Southwestern Handicap.

A little incident occurred in the shoot-off, which shows the sportsmanship in the shooting fraternity. Bosley, who was shooting from 19yds., by mistake stood back to 20yds. Connerly noticed this and called his rival's attention to the fact just as he was in the act of shooting, missing his target. Mr. Connerly insisted on Mr. Bosley shooting at another target, as he claimed that he balked Mr. Bosley, and it was so ruled by the referee. On shooting again Bosley broke his target, which won for him the shoot-off. Mr. Connerly was heartily congratulated on his display of true sportsmanship. Mr. Connerly's action in this respect was in striking contrast to that of a few others, interested in a commercial way only, who insisted that the target be scored lost. These objectors were certainly unfamiliar with the reputation for fairness of Manager Shaner, who refereed the shoot-off, otherwise the question would not have been raised.

"steel where steel belongs"

Peters Shells

WIN SOUTHWESTERN HANDICAP

The P brand was the "whole cheese" at the Inter-State Association's First Southwestern Handicap Tournament, San Antonio, April 8-10, winning practically all the honors.

SOUTHWESTERN HANDICAP, won by H. R. Bosley, 19 yards, score 92 ex 100

Mr. Bosley tied with two others and won in the shoot-off.

PRELIMINARY HANDICAP, won by R. B. Barnes, 18 yards, score 96 ex 100

HIGH PROFESSIONAL AVERAGE, J. S. Day (tie), - - score 339 ex 350

SECOND HIGH AMATEUR AVERAGE, Barton Lewis, - score 334 ex 350

Peters SHELLS demonstrate their superiority in this, the first big tournament of the season. Trap shooters are wise to the fact that the P brand of shells gives them a "hunch" in any race. Insist on having "steel where steel belongs."

THE PETERS CARTRIDGE COMPANY, CINCINNATI, OHIO

NEW YORK: 98 Chambers St., T. H. Keller, Manager.

SAN FRANCISCO: 608-612 Howard St., J. S. French, Manager.

NEW ORLEANS: 321 Magazine St., Lee Omohundro, Manager.

Table with columns: Name, Yards, Targets (20, 20, 20, 20, 20), Total. Lists names like F W McNeir, H P De Mund, H R Bosley, etc.

The ground squad record was again broken when squad No. 5, in event No. 2, broke 99 out of the 100 shot at. This squad was composed of Mrs. Topperwein, George Crosby, Bud Barnes, Ben Schwartz and Harry Murrelle.

Out of the total of 350 16yds. targets shot at during the three days, the professional averages were as follows: Crosby, 339; Day, 339; Clark, 336; Gilbert, 334.

In the amateur class Arie distinguished himself by breaking 340; Bart Lewis, 334; E. F. Forsgard, 328. This means all targets shot at from the 16yds. mark.

In the Southwestern Handicap there were 41 entries at 8, or \$328; 1 penalty entry at \$13; 1 penalty entry, targets only at \$2; 20 entries for targets only, making 63 entries in all. Added money, \$200; total purse, \$543.

Winners, amount won and winning score follow: H. R. Bosley, 92, \$200 (guaranteed); R. H. Connerly, 92, \$150 (guaranteed); Robt. Sorenson, 92, \$100 (guaranteed); R. C. Chew and A. D. Ross, 91, \$57 each; F. W. McNeir and T. C. Ford, 90, \$35.30 each; Bart Lewis and R. Merrill, 89, \$24.40 each; J. A. Gwynn, 88, \$16.30.

The committee that allotted handicaps was composed of Messrs. George Tucker, Brenham, Texas; George K. Mackie, Scammon, Kansas; Dan O'Connell, San Antonio, Texas; Bart Lewis, Auburn, Illinois, and F. W. McNeir, Houston, Texas.

SQUIER MONEY-BACK PURSE.

55,000 targets at 1 cent each.....\$550.00
First day extra entrance at \$1..... 49.00
Second day extra entrance at \$1..... 48.00
Third day extra entrance at \$1..... 51.00

Total purse .....\$698.00
Total losses paid back ..... 288.75
Surplus .....\$409.25

Winners and amount won follow: Nic Arie, \$49.20; Bart Lewis, \$45.10; E. F. Forsgard, \$41; R. H. Connerly and R. Merrill, \$32.80; H. R. Bosley, \$23.70; Geo. Crosby, \$24.60; W. R. Miller and F. W. McNeir, \$20.50; Dan O'Connell, \$16.40; Sam Forsgard, T. C. Ford and R. B. Barnes, \$12.30; C. D. Tuetsch, \$8.20; H. P. De Mund, J. A. Gwynn, O. C. Guessaz, R. Sorenson, Geo. Tucker, W. B. Twitchell, S. L. Gill, G. K. Mackie, A. R. Ludlam, A. Gardiner, H. Grindel, L. Trussion, and A. Barnett, \$4.10.

Medford Gun Club.

MEDFORD, Okla., April 11.—Blood made a straight 25 to-day, Soucek cracked 42 out of 50 and Hardy broke 41 out of 50. The scores:

Table with columns: Name, Shot at, Broke. Lists names like Blood, Brown, Wilson, etc.

Roanoke Gun Club.

By reason of inclement weather, lowering clouds hanging thick and heavy, only a limited number of shooters were present at Saturday's shoot. Those who were fortunate enough to be present, however, enjoyed an afternoon of good sport and some good shooting was indulged in. It is hoped by the club that the members will actively attend the shooting for the ensuing season.

The weekly trophies offered by the club were won by the following members:

Scratch Class—First, Jamison; second, tie between Shepherd and Jones.

Class A—First, J. B. Cumbie; second, Holland.

Class B—First, McFerrin.

Class C—First, D. W. Richards.

Stevens trophy—Tie, Jamison and McFerrin.

The scores made are as follows, 50 targets per man:

Table with columns: Name, Broke, Per Cent. Lists names like Jamison, Scholl, Jones, etc.

New Hanover Gun Club.

WILMINGTON, N. C., April 11.—At our regular Friday afternoon shoot the following scores were made:

Table with columns: Name, Events (1, 2, 3, 4), Total. Lists names like Dreher, Grant, Underwood, etc.

Handicap, 25 targets, yards: Grant (23yds.) 21; Underwood (18yds.) 23; Halloway (18yds.) 13.

J. H. DREHER, Sec'y.

Everett Gun Club.

EVERETT, Mass., April 12.—A 25-target shoot was held for the Stevens trophy. Clark was high gun with 19 actual smashes.

An all-day handicap merchandise shoot will be held next Saturday, open to all comers.

Table with columns: Name, Match, 25 targets. Lists names like Clark, Smith, Spencer, etc.

Capital Beach Gun Club.

LINCOLN, Neb., April 10.—The first of the two-day tournaments for this season was pulled successfully here yesterday and to-day. There were forty-three trappists on the job. First day's high gun was H. J. Rebhausen, who smeared the ambient atmosphere with 184 of the 200 clay things pulled for him. E. W. Varner and H. E. Snyder divided the kale on the second day, each negotiating 164 discs. High gun for the tournament was divided between Rebhausen and Snyder, each taking unto himself 346 saucers. Top for wads only was W. A. Brown with 340. Scores:

First Day.

Table with columns for Events, Targets, and Total. Lists names like J C Den, H J Rebhausen, C L Waggoner, etc., with their scores across 11 events.

Second Day.

Table with columns for Events, Targets, and Total. Lists names like J C Den, H J Rebhausen, C L Waggoner, etc., with their scores across 11 events.

Spring Valley Shooting Association.

SPRING VALLEY, Pa., April 12.—In the midst of the rain storm of the first series of shoots of the Spring Valley Shooting Association, of Reading, W. S. Behm showed some exceptional skill, breaking 121 out of 125 for high honors. Walter broke his last 71 straight, unfinished. E. H. Adams, of Reading, secretary of the association, landed second honors with 113 to his credit. Ed. lost 3 hoodoos in the third event. Marberger landed third honors, shooting straight in the first and fifth events. John has no mercy for his fellow boys. Lee Wertz dropped four in the seventh event, placing him one target behind Marberger for third honors. Frank Miller shot on excellent form to-day, but lost six in the sixth event. Frank Wertz is coming into form again for the coming State shoot. Ambrose Mayer, of Manatawny, paid his respects to the boys, breaking 100 out of his quota. The scores, 125 targets per man:

Baltusrol Golf Club.

NEWARK, April 12.—With the opening of summer greens, the trap season closed here to-day with an open scratch shoot. J. A. Hobart, of Country Club of Westchester, won with a score of 95 out of 100. M. K. Waters, of Garden City, with 83, and D. Fincke, of the home club, filled up the berths with 83 each. The former and his team mate, W. Floyd, copped both take-home trophies. The scores: M. K. Waters, Garden City, 83; D. Fincke, 83; J. L. Griggs, Paterson G. C., 80; E. Rosler, Garden City, 77; P. T. Gillespie, Essex County, 77; E. Voorhees, Garden City, 75; S. H. Browne, Baltusrol, 73; T. Baxter, 72; Marshall Geer, Baltusrol, 71; L. Smith, Plainfield G. C., 70.

Table with columns for First take-home, 50 birds, handicap. Lists names like M K Waters, J A Hobart, L Smith with scores.

Table with columns for Second take-home, 50 birds, handicap. Lists names like W Floyd, J A Hobart, D T Van Boskirk, E A Sierk with scores.

The scores of April 13 follow:

Hobart (scratch) 48, 47, 95; Siebeck (12), 43, 46, 69; Richards (16), 39, 42, 49; Daly (6), 43, 37, 68; Fincke (2) 44, (3) 44, 38; Hahn (16), 43, 46, 57; Griggs (2) 42, 42, 80; Knapp (16), 44, 40, 52; Cowperthwait (2) 42, (3) 31, 68; Fiske (10) 42, 46, 68; Van Boskerk (16) 39, 47, 54; Gales (10) 43, 46, 69; Barclay (16) 33, 32, 33; Dowse (16) 37, 45, 30; Smith (10) 45, 45, 70; Walter (6) 47, 46, 83; Roesler (4) 45, 40, 77; Voorhees (4) 45, 38, 75; Floyd (16) 40, 50, 53; Wittmore (4) 39, 38, 69; Gillespie (4) 42, 43, 77; Geer (6) 44, 39, 71; Browne (2) 40, (6) 38, 73; Bahson (scratch) 37, 35, 72; Quarricr (16) 30, 34, 48.

Highway Rod and Gun Club.

BROOKLYN, N. Y., April 10.—The Highway Rod and Gun Club, organized in 1911 in the Bureau of Highways, New York, elected the following officers: President, William Walton, Jr.; Vice-President and Treasurer, Constantine M. Dressel; Warden, Edward Jantzen. Any employee of the Bureau is eligible for membership who takes fish and game in a sportsmanlike and lawful manner. The president is one of the best-known amateur fishermen and gunners on Long Island.

# Parker Gun Victories in 1912

THE highest official average for the season of 1912 at both **Single and Double Targets** was made with **Parker Guns**.

As on every previous occasion, the bona fide **Championship of America** was won with a **Parker Gun**, Mr. W. R. Crosby scoring 198 x 200 targets at 18 yards rise. Same man, same gun, made the **World's Record**, scoring 98 x 100 targets at 23 yards, which is a truly wonderful performance.

Small bore **Parker Guns** are recognized as the Standard Game Guns of America and are gaining in popularity every season with the most progressive sportsmen. For full information regarding guns in gauges from 8 to 28, address

NEW YORK SALESROOMS

W Edmanson ..... 89	H Winchester ..... 23
J P Groome ..... 35	W Tomlinson ..... 27
W M Hammond..... 95	W B Smith, Jr. .... 50
S A Reis ..... 50	R T Pennington ..... 20
Dr H Betts ..... 44	L Mathewson ..... 19

### Smith Gun Club.

NEWARK, N. J., April 12.—W. Hassinger and H. Higgs tied to-day on 47. In the shoot-off Hassinger broke 23 against 22 by Higgs.

J. Baldwin, C. T. Day, Jr., and J. C. Weiler, tied for third with 44.

J. Weiler and L. Colquitt lost the team match against J. Baldwin and W. H. Dickenhorst by the score of 47 against 46. H. Hassinger and L. Colquitt shot a tie in a team event with J. Baldwin and W. H. Dickenhorst, each team breaking 48.

The following scores were made:  
J. Reed, 21, 20, 41; W. H. Dickenhorst, 20, 20, 20, 23, 23, 44; E. E. Gardner, 17, 18, 20, 36; W. Hassinger, 23, 21, 23, 47; H. Harringer, 23, 23, 25, 42; J. Baldwin, 25, 23, 25, 24, 25, 44; J. C. Weiler, 21, 21, 44; C. T. Day, Jr., 24, 25, 44; W. Spencer, 20, 20, 40; E. Sweet, 14, 17, 30; E. Townley, 19, 17, 40; T. Howard, 25, 21, 25, 25, 41; E. E. Gardner, of Bernardsville, 23, 20, 21, 21, 41; L. Colquitt, 22, 18, 25, 22, 25, 25, 23, 42; J. F. Murphy, 18, 16, 19, 40; H. Higgs, 24, 22, 47; E. Bellingrath, 20, 20, 22, 21, 29; F. Pohlman, 20, 19, 36; Charles T. Day, Sr., 19, 20, 40.

### Birmingham G. C.

BIRMINGHAM, Ala., April 12.—There was shooting at the Birmingham Gun Club on Friday and Saturday. Owing to baseball, there were only a few out on Friday, J. C. Broyles shooting high.

On Saturday twelve shooters were out. The wind blew hard and consequently the scores are not as good as might be expected. H. C. Ryding is still keeping up

O. L. GAIL,

Secretary Birmingham (Alabama) Gun Club.

his good work. P. B. Plummer was high professional. James Hillman is shooting a new gun.

Following are the scores made on Friday:			
Shot at. Broke.		Shot at. Broke.	
C J Broyles... 100	91	Wheeler ..... 100	67
J Lambeth ... 100	80	Pitts ..... 100	64
E M Cornwell 100	88	Gay ..... 50	30

Following are the scores made on Saturday:			
Shot at. Broke.		Shot at. Broke.	
H C Ryding... 100	92	Lee Moody .. 100	75

Noble ..... 8 23	
Stapp ..... 0 23	

F. H. WALLACE, Mgr.

### White Plains Gun Club.

WHITE PLAINS, N. Y., April 12.—The usual bi-monthly shoot of the White Plains Gun Club was held to-day. The unsatisfactory weather conditions prevented a large attendance, although twenty gunners faced the trap. Dr. G. H. Martin was high gun for the day and won leg on the Schieffel trophy and Du Pont trophy. T. L. De Nyse won the take-home prize and a leg on the Stevens trophy.

Two ladies were at the score and each showed remarkable possibilities as aerosaucer destroyers. Mrs. Woodcock broke 10 out of 25, while Mrs. Rogers obliterated 33 out of 100—mighty good in prevailing weather. Scores follow:

Dr G H Martin..... 23	22	23	22	90
T H Lawrence..... 23	22	19	24	88
Z C Offutt..... 20	24	20	21	85
A Betty ..... 22	20	24	18	84
A Chandler ..... 22	23	20	18	83
T L De Nyse..... 22	23	21	14	80
E Carcock..... 18	21	15	17	71
C H Hadlock..... 18	13	15	16	62
Dr A W Currie..... 17	14	9	10	50
Mrs Rogers ..... 8	6	8	11	33
H M Ferguson ..... 10	11	16	14	51
H Rogers ..... 15	11	11	11	48
W S Beckley, Jr..... 19	22	17	..	58
A D Seovel..... 16	15	..	..	31
*T Davis ..... 17	18	..	..	36
S I Stroock ..... 12	..	..	..	12
Mrs Woodcock ..... 10	..	..	..	10

\*Professional.

Match at 25 pairs, double: F. E. Rogers 30, T. H. Lawrence 30, Z. C. Offutt 26, E. F. Ward 17.

### Larchmont Y. C.

LARCHMONT, N. Y., April 13.—Larchmont Yacht Club held their final shoot to-day. Next Saturday the club will wind up the season with an invitation shoot for the interclub and universities individual trapshooting championship and the left leg on Larchmont trophy. Nineteen gunners turned out to-day, and full scores were returned in all but one event. Nine ties with full scores were turned in for visitors' trophy. They were J. H. Whiting, W. E. Ferguson, E. L. C. Robbins, Dr. L. Culver, A. L. Burns, E. Gross, A. J. McManus, A. W. Fitzgerald and Dr. A. Sauer. In the shoot-off, A. L. Burns won the leg, but the cup finally went to D. F. McMahon, who had already won two legs for it during the season. He won also the special trophy for the season with a straight.

Ralph L. Spotts once more took high gun with 136 out of 150. R. K. Spotts won the non-winners' cup, and W. B. Short took the accumulation cup with a straight. Take-home trophy went to A. L. McManus, and the 100-target handicap to A. L. Burns. The monthly cup was won by A. W. Fitzgerald. The 10-target scratch went to R. L. Spotts, and the 15-bird scratch to A. W. Church.

### Port Washington Y. C.

PORT WASHINGTON, L. I., April 10.—There was a pretty good field for midweek at the annual shoot of Port Washington Yacht Club. John H. Hendrickson won with 98 out of 100. Second medal was won by D. E. Smith with 92. Third by W. Simonson.

In the sweepstakes that followed the regular shoot, Hendrickson again was high gun. The second high winner was D. E. Smith, and then came Dr. Martin, Harry Lee, W. Simonson, R. Jones and C. E. Hyde.

The team trophy shoot was won by Bergen Beach Gun Club.

Montclair Gun Club.

MONTCLAIR, N. J., April 12.—Little Falls Gun Club hung it on Montclair Gun Club here to-day by seven points. The shoot was at 50 targets in strings of 25 targets per man. The scores:

Table with columns for Little Falls and Montclair, listing names and scores for various participants.

In a 25-target shoot for three prizes, C. L. Bush was the winner with 21; H. S. Sindle, second, with 20, and S. G. Francisco, third, with 19.

Riverside—Independent.

PHILADELPHIA, Pa., April 12.—Riverside gunmen beat Independent Gun Club, of Eddystone, Pa., here to-day by a score of 154 to 151.

Table with columns for Riverside and Independents, listing names and scores.

Atglen Gun Club.

ATGLEN, Pa., April 10.—Cloudy weather and a stiff cross wind account for the unusually low scores made by many, being unable to judge the targets properly.

Owing to the cold weather, the squads were slow forming, and about half the cup race entries were withdrawn, there being fifty entries made and it being too late to finish in time to catch the trains.

Table with columns for Reg. and Cup, listing names and scores for Atglen Gun Club participants.

Jersey City Gun Club.

JERSEY CITY, N. J., April 12.—The weather to-day was evidently too inclement for several of the members of the Jersey City Gun Club, as only seventeen of the faithful responded to the call to arms, but, strange to say, some of the best scores made for some time were hung up for future reference.

Table with columns for Events and Targets, listing names and scores for Jersey City Gun Club participants.

Trapshooters from any other part of this little planet that should happen to be in this vicinity on a Saturday afternoon and want to spend a pleasant hour or so, come to Jersey City and take the Plank Road trolley and ride until you hear the bang.

Bergen Beach Gun Club.

BROOKLYN, N. Y., April 12.—Garry Remsen had to make a straight string of 25 targets to win first prize here to-day. Mr. Remsen was in the final squad of the shoot, and when he went to the firing line for the last time, it was announced that he had to make a 42 to tie L. Schorty and J. von Boeckman and a perfect score to win. The scores:

Table with columns for names and scores, listing participants and their results for Bergen Beach Gun Club.

A SINGLE TRIGGER

Lefever Gun

in the hands of L. H. REID, Seattle broke 2115 x 2200 = 96.14% with ordinary factory loaded shells purchased from local dealers.

Mr. Reid, shooting at Interstate Association Registered Tournaments throughout the 1912 season, has the high average for the Pacific Coast.

The loads were regular factory loads; the LEFEVER bore, famous for the even pattern and penetration, assisted MR. REID to make this record.

Why don't you shoot a LEFEVER Single Trigger this year?

**Westboro Gun Club.**

WESTBORO, Mass., April 14.—The Westboro Gun Club was organized April 8 with forty members present. The following officers were chosen: H. F. Hemenway, President; Dr. C. S. Knight, Vice-President, Judge W. E. Fowler, Treasurer; Chas. E. Beach, Secretary; J. T. Johnson, Captain.

We have three expert traps in working order and will hold our first shoot April 19. Plans have been made for a club house that is to be built as soon as possible. Every shooter will be welcome.

D. F. HARRINGTON.

**Daniel Boone Gun Club.**

MARTHASVILLE, Mo., April 12.—The day was cold, chilly and rainy. Not many shooters were out. We found that the old dancing floor made a poor roof for our club house, so to-day we re-covered it with tar-felt. We feel we have a snug little club house and at a very little cost.

At our business meeting to-night it was decided to shoot for the Du Pont fob trophy under the following conditions: Fob to go to the high gun in the first 25 birds shot at in each week, and to become the property of the winner when he has won it three times, and to stay in competition until it shall have been won three times or until our registered shoot in August.

The scores of to-day follow:

Shot at. Broke.		Shot at. Broke.	
Bollmann .....	50 42	Meyer .....	50 30

**Rifle Shooting**

**League Island Rifle Club.**

READING, Pa., April 8.—One of the keenest rifle contests ever witnessed in Reading took place this evening on the Island League range, when the third contest between the ten-man teams of the Island League and the Turn Verein. Each of the three contests was won by the League Island team. At this contest they won by 103 points. George W. Miller won high honors with a score of 601 points out of 625, a most commendable record at a night contest. Second honors were won by Zellers, of the Turn Verein team, with 594 to his credit.

The boys were going some during the entire night. Scorer George Bernhart, representing the sporting goods of Bright & Co., of Reading, was kept busy. "Bery" was again delighted that his team won. "Hebe" is advancing some with his scores. Pop Eshelman was out of form to-night and landed on the low-water mark. Lentz showed the boys some skill with 584 to his credit. C. Miller was close to his heels with 580. Frank Gerhert was present to witness the game, but did not compete. Chef Melchior was nothing but smiles. Next competition will likely be shot on the Turners' range on the fifth floor of the Academy of Music. The scores:

**THE PASSENGER PIGEON.**

Continued from page 494.

a hard hitting gun to stop them as they passed. The experience of my first and last shots at wild pigeons will always linger in my memory. As a boy of eleven years of age, I went to visit my grandfather. The time was spring, the weather sunny and warm, and in the orchard near the house the pigeons were feeding in great numbers on buckwheat which had been cradled the previous autumn, some of which still lay in swaths under the apple trees. Over the kitchen door of grandfather's house hung a long single-barreled English fowling piece, brought from England when its owner came to America to try his fortunes in a new world. The men of the household were away in the fields, and the pigeons had the orchard to themselves. I cast longing eyes on the gun, and importuned my grandmother for permission to try my skill, but met with prompt emphatic refusal. My aunt, a dare devil girl of eighteen, waited until grandmother had gone up-stairs, and we were alone in the kitchen. "If I load the gun for you, will you be awful careful?" asked my aunt. I would have promised anything for the use of that gun. Aunt poured a generous charge into the ancient weapon, a "made over," by the way, from flint to cap lock, and with repeated caution let me out through the woodshed into the garden. A row of currant bushes afforded secure and easy approach to the orchard fence. In the fence corner, from behind a clump of sassafras sprouts, I looked for my prey. There they were, more than a hundred steel blue-backed, red-breasted, cock pigeons, eagerly eating the buckwheat, fluttering along the swaths, and walking with the jerky, alert step of their gait. Carefully I pushed the gun between the rails of the fence, raised the heavy hammer to full cock, cuddled my cheek down to the clumsy stock, took long aim into the thick of the pigeons, and fired. If the shock of the lead against the bodies of the pigeons was severe, no less sudden and painful was the jolt which the ancient arm inflicted on shooter. My nose bled, tears filled my eyes, while on my right cheek a lump which rapidly increased in size marked the spot where my face rested against the gun stock while taking aim. However, I scaled the fence and ran to view the effect of my shot. Nine pigeons, some dead, some only crippled, repaid my maiden effort at pigeon shooting.

The last time I shot wild pigeons was years after the event above described, when, in company with my father in the fall of 1876, in Calhoun county, Michigan, we fired two shots each into a large flock of pigeons feeding in a wheat stubble and gathered forty birds as the result of the four shots.

Many theories have been advanced upon the disappearance of the passenger pigeon which once darkened the sky as the myriad flight passed between the observer and the sun. The idea has been advanced that the birds forsook their

(Continued on page 514.)

**A Four-Day Tour in  
Glacier National Park  
For \$22.00**

**By Automobile, 4-Horse Stage, Launch or Horseback.**

Break your journey to or from the Pacific Coast by a stop-over at Glacier National Park. It will be a new and wonderful experience. A few days in this scenic wonderland will provide material for a life-time of vivid, pleasant recollections—and at comparatively trifling cost.

For instance, \$22 covers the total expense of a four-day tour to exquisite Lake St. Mary in the very heart of the scenic region of the Park, by automobile, launch and stage, including a visit to the unique and cozy Chalets at Many-Glacier and Going-to-the-Sun Camps—the paradise of the mountain trout fisherman. An almost unlimited number of other tours, covering one to twelve days or an entire season, may be arranged at a correspondingly low cost.

**Low Fares Every Day**

to Glacier National Park and Pacific Coast. The accommodations throughout the Park cannot be excelled. In addition to the famous chain of Swiss Chalet Camps, a magnificent new hotel has just been completed, offering every modern luxury and convenience. It is built of huge logs in perfect harmony with its natural setting. Every room is electrically lighted and heated, swimming pool and shower baths in basement. Enormous open fireplaces typify and crystalize the spirit of hospitality and generous welcome that is evident from the moment of your arrival.

An excellent opportunity is afforded to observe the tribal dances and ceremonies of the Blackfoot Indians—one of the most interesting and picturesque of all surviving tribes. Stop off at Glacier Park Station.

**Write for Aeroplane Map and Special Booklets**

Very complete descriptive literature explaining every feature and including a large Aeroplane map of the entire park, in colors, will be mailed on request. An interview with one of our representatives who has personally visited Glacier Park, may be arranged. Write for full information today

THE second in a series of members' matches arranged for 1913 will be held at the Hoffman-Albemarle on Saturday, April 26, at 8 o'clock. The judge will be announced at the time of the matches. The following classes will be provided: Lightweight dogs, lightweight bitches, heavyweight dogs, heavyweight bitches, American-bred dogs, American-bred bitches, lightweight brace, heavyweight brace—best in the show. Ribbons in all classes. Copper medal, best in the show. No advanced entry required. Everything free as fresh air—and there will be more of that and more room this time. Guests of members are always welcome at these matches. ABRAM D. GILLETTE, Sec'y.

**Puppy Brings \$850.**

At the annual North of England Fox Terrier Show, held at Bradford, England, March 29, a nine-months'-old wire-haired terrier puppy named Anchor, defeated most of the cracks in England, including the famous champion, Collarbone of Notts, Gycroft, Salex, etc. He was entered in the catalogue to be sold for £50, and at this price four claims were handed in to the secretary by Messrs. George Raper, Samuel Wilson, Major Anne and I. I. Holgate. On being submitted to auction all four claimants joined in the bidding until the price reached £110. At this stage Messrs. Wilson and Holgate dropped out, and when Mr. Raper bid £150, Major Anne renewed the bidding, and it was not until Mr. Raper had bid £170, about \$850, that the puppy became his property.

"HERE is an inexpensive remedy for curing dogs of worms, including the tapeworm, says the Shooting Times: Roll some of the strongest tobacco, with the help of linseed oil, into a pill about the size of the top of your third finger, and administer it in the usual way, first starving the dog for a dozen hours. This simple remedy was given me the other day by a carter, who thus cures his horses of worms, and, having tried it during the last few days, I can recommend it."

THE best way to get in close touch with the ready and steady buyers who read FOREST AND STREAM is to keep your advertisement constantly before their eyes.

**Property For Sale.**

**CANADIAN CAMP**

For sale or to let, two story, new, modern, up-to-date camp, completely furnished; situated on Lake L' Achigan in Laurentian Mountains, night's run from New York, 2 hours from Montreal, altitude 1000 feet. Main camp has 10 master's rooms, 4 baths; winter lodge, 5 rooms and bath; 30 acres of ground, 10 acres cleared. Boat house, barn, ice house, unlimited supply of spring water. THE PASSENGER PIGEON.

Continued from page 512.

usual haunts on account of the encroachments of civilization, and now make their home in some far South American forest. The world is too small to hide them if the wild pigeon exists in anything like its former numbers.

The theory of destruction by being blown out to sea when in migration and thus destroyed meets with no credence on my behalf. Those who knew the habits and range of this bird, and were familiar with its prowess of flight, will scarcely coincide in this belief. A fatal epidemic has been suggested as the cause which removed the pigeons from the earth, but no man

can remember seeing dead pigeons, which died from disease, in such numbers as to warrant this presumption. The wild pigeon of the United States did not disappear in the strict sense of the word; its fate was that of the American bison—extermination at the hands of man. From the landing of the first white man in America we have lived in an age of destruction. Forests so old that the trees were giants when Cæsar led his legions into Gaul vanished before the axe and flame of the settler, and with these have gone many of the beasts and birds which once inhabited the land. The wild pigeon was fixed in its ways. The voice of spring was the call to the breeding ground, and no small woodland

with cleared fields on its boundaries sufficed this blue meteor of the air as a place in which to mate and rear its young. The deep woods with their towering pines, the lofty hemlocks with their hanging branches which forked into a thousand partings, in each of which a pigeon's nest, frail though it was, might ride safely in the spring winds and cradle each its squab, the hills clothed with graceful beeches in whose boughs thousands of pigeons might nest, and under whose canopied shade myriads fed upon the fallen mast—these were the places toward which the passenger pigeon turned its flight at nesting time, as the salmon turns his nose ever toward fresh water when the instinct of his kind tells him it is time to spawn.

Then came the netter with meshes ever spread beside the feeding ground and the drinking place of the birds. He tempted them with scattered grain, and with seasoned salt bed; lured them with his flyers and decoyed them with his stool pigeon, and when the fatal moment came, flung the smothering folds of his net over the packed hundreds, and none escaped.

It has been said that no salmon lives to tell the story of its trip into fresh water at spawning time, and that all perish on the journey. The salmon leaves behind millions upon millions of eggs to hatch and replace the parent fish. How about the pigeons netted at their nesting places? The mother bird engulfed in the snare returned no more to the frail nest with its one egg or solitary squab; the egg chilled, does not hatch. The young bird with no warm breast to hover and protect it from the cold and no parent to pour the predigested food or "pigeon's milk" into the ever hungry maw, sickened and died, and no young grew up in the place of the parent birds destroyed.

The lumberman felled the pines and floated the logs to the ever devouring mills. The hemlocks were cut down by sections, denuded of their bark and went the way of all trees. The settler followed with axe, fire and plow, and the nesting places of the passenger pigeon vanished as the rifle smoke blows away on the wind.

There could be but one ending of the passenger pigeon under these conditions. Harried by the shooters' lead when passing the settlements; engulfed by countless thousands in the netters' snare; driven from nesting grounds by the ever-increasing persecution of man; its breeding places laid waste; its food supply diminished, denied a truce of the warfare against it even when the young were in the nests, the birds knew not which way to turn for safety, ceased to breed for want of undisturbed nesting places, and the end of the survivors was swift and sure.

The letter, which follows, from one of the pigeon netters, will show the extent of the inroads made in the pigeons' ranks in one locality, and in connection therewith I may say that the year in which the writer of the letter referred to tells of the operations of the pigeon netters in Michigan (1877) was the last year in which the passenger pigeon visited that State in any numbers.

The writer of this article has no word of criticism to offer on the way in which the passenger pigeon was exterminated. We lived according to our light. The times were those of destruction and waste. There would always be, we thought, enough timber, more than enough;

enough white pine, enough trout, enough grayling, enough pigeons. Alas! why not?

MR. SCUGALL'S LETTER.

"The wild pigeon is something that only men past middle age can write about from experience.

"In 1875 I was in Oceana county in Michigan at the town of Shelby. There was a large nesting of wild pigeons there, and on one large hemlock tree a man named Parrish and myself counted 317 pigeons' nests. The tree was about forty rods from Parrish's house.

"I was at this nesting about a month. From about the middle of March until after the middle of April we shipped one hundred barrels of birds a day.

"In early days folks calculated on a pigeon crop, as much as any crop, every two years. Although the pigeons went over on their migrations every year, they only stopped every other year on account of the mast, or shack, as we used to call it, and their nesting in the locality above referred to was every other year pretty sure, but I never knew them to nest twice in the same place, and when the country got more settled, they went further north.

"In 1877 there was quite a lot of pigeons which stopped at Shelby on their reconnoitering trip, and we thought they would stay. But the advance squad left in a few days, and soon after the main body of the flight came in flocks longer than the eye could reach and passed over Shelby about 8 A. M. So ten of us sports clubbed together and wired north to see if the flight had settled down anywhere. About 4 o'clock P. M. we got word that they had stopped at or above Petoskey, Mich. This was the 23d of February, 1877.

"That spring my partner and I caught 2,000 dozen pigeons. We caught 108 dozen the first day and they netted us \$108. The first two weeks we caught 1,000 dozen. I was at this nesting from Feb. 23 until May 17. I surely have seen some pigeons and nests. I have seen two eggs in a nest, but I never saw two young birds or squabs in one nest. I have seen one squab and one bad egg in a nest when the squabs were small, but as they grew, soon got rid of the egg. The nests were only a few sticks and looked as if it was a tight match to hold even one bird.

"This time I was at Petoskey in 1877 which was the last year that the birds were netted. In 1880 they nested in the mountains in Southern Missouri. In 1882 there was a nesting in the Panhandle of Texas, twenty miles wide and forty miles long, the largest nesting ever known, but so far from shipping points that the pigeons were not trapped at either place, as the birds taken would have to be hauled seventy-five miles by team, so it would not pay. That is the last I ever saw or heard of the wild pigeons, though I saw a newspaper account of there being great numbers of them washed ashore on the Russian coast.

"In 1886, when I lived in Sioux City, I reported the migration of birds for the Smithsonian Institute, and while I was always a great observer of bird and animal life, and nature in general, others might have seen things different. The pigeon netters are all old men now. I was one of the youngest netters in the business at the time I have written about, and am past seventy now."

**For Sale.**

#### Property For Sale.

#### CANADIAN CAMP

For sale or to let, two story, new, modern, up-to-date  
camp, completely furnished; situated on Lake L'Achigan  
in Laurentian Mountains, night's run from New York, 2  
hours from Montreal, altitude 1000 feet. Main camp has  
10 master's rooms, 4 baths; winter lodge, 5 rooms and bath;  
30 acres of ground, 10 acres cleared. Boat house, barn,  
ice house, unlimited supply of spring water. Daily mail  
service, all table supplies delivered to camp. Abundance  
brook and lake trout and bass fishing, deer, bear, par-  
tridge shooting in season. Rental, season, \$1500. Selling  
price, \$17,500. Particulars and photo.

PEASE & ELLIMAN, 340 Madison Avenue, N. Y.

GET THIS, QUICK! Northern Wisconsin private fishing  
and hunting resort and poultry ranch (including Cor-  
porate Charter) for sale; or half interest, to right party.  
Located best fish and game section; lake frontage; all  
improvements; stocked, and in operation. Exceptional  
opportunity "outings" at trifling expense, and clear good  
profit each year, without interfering regular business.  
Reason for sale—need the money. Bargain price; part  
cash, balance easy terms. Address J. D. WOLMA, 1153  
"A" Monadnock Block, Chicago.

#### PROPERTY FOR SALE

For Sale—Farm, 50 acres—40 tillable, level and free from  
stones; soil good for corn, potatoes, gardening, clover,  
dairying, poultry; good water and fruit; wild berries  
and nuts plentiful. Seven-room house, new barn and  
silo. Wood for fuel. A country home for a sportsman,  
nature lover, dog breeder or trainer. Deer, ruffed grouse  
and quail abundant, and adjoining land-owners generous.  
Beautiful river and ponds near and fishing fair. Conven-  
ient to Providence, New York and Boston by steam and  
electric roads, and to New York by boat. Price, \$2600.  
E. P. ROBINSON, Packer, Conn.

#### Salmon Fishing in Perpetuity FOR SALE

Anyone desiring property in fee, with lifelong fishing;  
can purchase that which cannot be had elsewhere. Several  
fine pools, forming a pocket beyond which fish cannot  
go; in one of which they are always found.—Large fish  
and good catches.—Large bungalow, fully furnished;  
also bunk, ice and smoke houses. Season opens last of  
June. River easy of access. Price, \$20,000.  
Address "M," care Forest and Stream.

#### Property for Rent.

TO RENT—THE CEDARS, LAKE CHAMPLAIN.  
Two furnished houses suitable for private and boarding  
purposes; splendid view and grounds, out-buildings, stor-  
age and ice house; gasoline engine for pumping water;  
good fishing, easy of access to line boats and trains. For  
further information apply to MRS. M. E. WHITESIDE,  
Vergennes, Vermont.

Some sporting goods dealers realize the  
necessity of shouting their claims to the public,  
and all of the experienced ones have learned  
that the quickest and most profitable way of  
doing it is to print their store news in FOREST  
AND STREAM.

### Bird Notes from Maine.

CITY POINT, Me., April 14.—*Editor Forest and Stream:* On April 8 there was a flutter of wings on the porch where crumbs had been scattered. "Robin red-breast," I said, for my eye caught the warm reddish tinge of our old friends' feathers. Looking more closely, my interest in our visitor increased, for he was a stranger, a smaller bird than the robin, and the red markings were on his wings and tail feathers, while his body and breast were a mottled, speckled gray. The bird lover who was looking over my shoulder whispered "a fox sparrow," and with bated breath we watched until some noise startled the bird, and he flew away. The bird lover told me that fox sparrows are only seen here for two or three weeks, stopping on their way further north, and that they are sweet singers. He saw the first one this year on March 20, which was unusually early; in fact, all the birds arrived early this year, as his records show.

"It's a strange thing," he said the other morning at breakfast, "how the song sparrow sings at this season of the year while the birds are mating. His song lasts a full minute or longer, and is as liquid and sweet as that of any bird I know. Later in the season the song changes; it lasts only a few seconds and is much less musical." When he talks of the feathered folks, we are glad, for they are close and intimate friends of his. He has made a life-long study of their ways and habits. His mind is stored with interesting facts concerning them, and he seems to enjoy their confidence to a great degree.

The purple martins are his favorites and he has a large colony. His three houses were filled last summer, and he has just completed another large house, built in the shape of a castle, with turrets and towers, which we have no doubt will prove attractive to his feathered friends. The musical, gurgling notes from the throats of a hundred or more of these martins fill the air around his home through the long summer days, and the sudden silence when they migrate some day late in August is almost oppressive.

One day on a mountain top in the solitude and silence we found the bird lover on his knees beside a net which held three little helpless hermit thrushes. The day had been a wonderful one of mountain climbing, and memory holds many of its pictures, but the one that comes to us most often is that of the birds' nest hidden away so carefully among the mountain grasses, with the strong man bending over it. We think that even the anxious mother bird must have trusted his good will when she saw the gentleness and friendliness of his expression at that moment.

Summer brings us many happy days in the Maine woods. We look forward to them eagerly, longing for the trout brooks and the freedom from care that come to those who follow their winding ways, and for the companionship of the feathered folks.

R. T. NEWELL.

### Early Sebago Salmon Catches.

BOSTON, Mass., April 14.—*Editor Forest and Stream:* Just returned from Sebago Lake. I brought back five salmon. The man I went with caught a 11¼-pounder, while a young lady from Dorchester landed one that scaled 12½ pounds.

### Lough Melvin Will Fish Well.

I HAVE always considered this lough to be one of the very best salmon waters in the British Isles for the man of small means. I see no reason to alter that opinion. In addition, it is an early lough, and there are competent boatmen and good boats on the water, and comfortable hotels on the banks. The direct route to the lough is from Euston, via Holyhead or Fleetwood, to Dublin or Belfast, thence by G. N. Rly. (I.) to Belleek, and by car to Garrison, which is the angling center for the lough.

In addition to the salmon fishing, Lough Melvin holds some very large lake trout, gillaroo and brown trout. It opens on Feb. 1 and closes on Sept. 30. The best of the salmon fishing occurs early in the season; then follows the grilse season. The best time for the trout with artificial fly is February, March and April. In August they are taken dapping with the Harry Long-legs—of which a plentiful supply can be obtained locally—and this sport often continues through September. The charge for fishing is 18s. per week, or 3s. 6d. per day, tickets to be had at any of the hotels on the shores of the lough. The best fishing part of the lough is the Garrison end, but the fish at times feed over the greater part of the water.

I am often asked for patterns of flies suitable for Irish waters. Here are some dressings that will kill in Lough Melvin, the River Erne and the adjacent rivers and loughs.

The Parson.—Hook No. 7; tail, two twists gold, small topping and two or three sprigs gold pheasant tippets, black harl, three twists; body, golden olive silk, changing into pig's down of the same shade, then into orange and fiery brown toward the shoulder; golden olive hackle three parts down the body, with full claret hackle over; wings, two golden pheasant saddle feathers, over this three or four toppings with sprig of green parrot, golden pheasant tippet, pintail, turkey and wood-duck, with kingfisher's or blue chat-

terer's feathers at each jowl, and blue macaw's feeler; head, slack harl, gold tinsel according. Other Parsons are dressed larger, with six, seven or eight toppings in the rings with cock-of-the-rock ad lib., and with jay's hackle and purple cock instead of pintail, and even small toppings on the breast. This last one is good in heavy water.

Another Fly.—Hook No. 5; silver twist and pure silk tag, gold pheasant topping and tippet sprigs for tail; ostrich harl over; apple-green silk body, tipper with black twist and silver, greenish yellow hackle all the way down; gold pheasant tippet feather, tied hackle fashion, and jay's hackle over; black harl head, and mixed wing of golden pheasant saddle feathers; ditto tail and tippet, gallina and bustard and red and blue macaw, two or three sprigs of each.

Another Fly.—Hook No. 5; blue silk and silver tag, gold pheasant topping and tippet sprigs for tail; black harl over; body, about a third of an inch of claret silk, the rest orange; golden olive all the way down; jay's hackle over silver tinsel; wing, mixed, of gold pheasant's tail and tippet, gallina, and one topping and red macaw feeler; black harl head.

Another of Smaller Size.—Silver and pure silk tag, topping and tippet tail; black head; orange silk body, with claret hackle all down. silver tinsel; wing as before with blue feelers. A yellow body and hackle may also be fitted to the same fly.

Add to these for bright weather and low water later in the season a fly with dark orange body (spare), fine silver; a cock-of-the-rock feather for tail; two cock-of-the-rock for inner wing; gold pheasant tail and dark argus over that; dark mallard over all, and blue chatterer on each side of the cheek; golden olive hackle with claret hackle at shoulder; and blue macaw feeler.

Also three bodies of dark blue and red tail joint, yellow and claret joint, or claret and yellow joint respectively; silver tinsel tips; ostrich head; blue, claret, and golden olive hackles respectively; jay at shoulder of each, finish silver twist; wing, same for each—two toppings, pintail, green parrot, and gold pheasant tail; blue macaw feelers.

Brown trout flies in their order of merit are: Claret and partridge, black and teal, butcher, claret and mallard, claret and grouse, claret and teal, March brown, blue and blea, blue spider. The blue spider is an *AI* bright-weather fly.—*Shooting Times*, London.

## A Contraband Incident

### A Story of the Forties Written by Nessmuk

I AM a hunter, in the American sense of the term, for I do not beat covers or "draw" them *secundem artem* with aristocratic flourish of flunkeys and dogs, horns and hounds. For twenty-five years or more my tastes and inclinations have led me to spend a portion of each year in the dense forest regions of the newer free States, sometimes in company with one or more kindred spirits, but quite as often alone or with only a faithful still-hunt dog for company.

One can hardly do this sort of thing for a score of years without meeting incidents that will bear relating, and one comes back to me continually with a vividness for which I can hardly account. It was not much of an affair, either, only a little episode in the lives of three human beings.

In the October of 1840 it was that a Mr. Kelly, his son, a lad of eighteen, a "mountain man" named Randolph—so at least he called himself—and a clerk from Chicago by the name of Jason, built a "two-faced camp" near the shores of Lake Michigan for a general season of fishing and hunting. The camp was built near an extensive marsh, and on a small tributary of the Calumet River, said tributary having its rise in a lake of some extent which occupied the center of the marsh. The lake was a very paradise for fish and wildfowl, although most difficult of approach, owing to the uncertainty of the quaking bog which composed its shores. One could only approach the open water within forty or fifty yards when the treachery of the floating bed quilt became so tremulously apparent that no prudent man would risk an advance, although the armies of ducks which lined the shores and the platoons of wild geese swimming in the center were sufficiently provoking to a lover of sport. Yankee ingenuity overcame the difficulty.

I managed to roll a light dugout within a few rods of the lake, whence, with much ado and an old scythe, I cut a channel to the open water. My companions laughed at me. They cared but little for fishing or fowling, and the old farmer prophesied that I would soon be glad to relinquish the double-barreled shotgun for the more noble rifle, while Randolph was loud in his contempt of all scatter guns, and not at all complimentary in his remarks concerning the Yankees, who, he contended, were the only ones who used them.

"Ef," said he, "I had to hunt for my life 'n' had my choice between a mopstick an' a shotgun, I should take the mopstick."

The sport on the lake was such as at least satisfied me. I was not a certain shot with the rifle, and I did not care to spend day after day peering and poking about in the dense gloomy forest for a shot at a deer, the chances being in the deer's favor when I did get a shot, so I stuck to the lake and the dugout—fishing, smoking and idling through the better part of the day—to Randolph's supreme disgust, but making good use of the time from four in the afternoon until nine or ten o'clock at night, and also of the early morning while it was yet dusk. For then it was that the wildfowl came in large

Nessmuk.

flocks from the northward, sitting on the water in such multitudes as to give the lake the appearance of a living field of heads and feathers. It was no unusual feat to save twenty or more at one discharge of a double barrel, and the most inveterate Jersey "duck butcher" could have slaughtered to his heart's content. I tired of it, however, not that my love of the sport flagged, but it has always seemed to me a wicked waste of God's gifts to slay his beautiful creatures when one can make no use of them, and it is, moreover, unsportsmanlike. I have long ceased to shoot wantonly. The man who shoots or angles for the mere pleasure of indiscriminate slaughter and subjugation is no true sportsman, but a brute.

It was in the latter part of October, and when we had been some three weeks in camp,

that I took my way toward the channel where lay the dugout for the purpose of having one more shy at the wild geese on the lake. They had been flying in huge flocks all day, and I knew the water would be nearly covered with them that night, so I stepped into the dugout as the dull lead-colored day waned to the gloaming, arranged the screen of spruce boughs and marsh grass, fastened the paddle alongside by its thong, and waited for darkness and the geese to settle down on the face of the water. The lake extended from northeast to southwest, and the dugout lay at the northeast end, so that when the wind was northerly, I had only to cast loose, drift silently down on the flocks, and just as they began to show dimly, pour in both barrels, then pick up the slain and find my way to camp. On the night in question the wind blew almost a gale, lashing the surface of the lake into miniature breakers, and whistling through the spruce screen in a manner well calculated to impress one with the necessity of preserving the center of gravity in a little bread tray—for it was hardly bigger—on a dark stormy night. As darkness began to settle on lake, marsh and forest, the wind increased, and it began to snow, while flock after flock of geese came skimming along just above the treetops and plunged into the lake with a headlong force that denoted great haste in the performers or a strong gale abaft the beam. I saw that a storm was at hand, and decided to wait no longer than until I could just distinguish a flock on the water within short range before casting loose. I had not long to wait. The leaden clouds grew more and more inky, the outline of the lake became invisible, wildfowl and water were merged in one black gloomy field of shapeless space, and I cast off the little wooden grapnel, cocked both barrels, rested the gun over my knee, took a squatting position, and slipped quietly along the narrow channel. Two or three minutes of rubbing through grassy, marshy water brought the dugout to the open, and I shot out into the lake with a speed which convinced me that, like the old Indian on Baffin's Bay, I had "too much bush."

For a minute or two the tiny craft glided silently down the lake, the ducks squattling away on either side, and then, directly ahead loomed a mass of dark bodies with long necks dimly showing through the darkness and storm. A slight yawing of the dugout and the long necks pointed inward as they "huddled" for flight. Two simultaneous streams of flame, a crashing roar, a stunning recoil and—the dugout was bot-

tom upward, while I was struggling for life in the ice cold lake. On the whole it was a near thing. I was already numb with cold, and no man can long continue to work and struggle in ice cold water. The only available landing point was directly to windward, and there was nothing that would float with a man aboard within two miles. It is surprising how coolly a man can take such a mishap when there is nothing else for it. I got on the capsized dugout, cleared it of the brush and grass which had formed the screen, found the paddle all right, and then be-thought me of the gun. I had taken the precaution—which I recommend to anyone shooting from a light birch or log canoe—of tying a strong line to the guard, the other end of the line being fast to the dugout, and, as there was some three yards' play in the bight of the line, the gun would act as an anchor. It was hard to part with it, for besides being an heirloom, it had the mark of honest old Joe Manton on the barrels, and was hard to beat at long range, but there were no chances to spare, so I got out my knife and cut the line, then cut open my coat sleeves and sent the coat after the gun, cut open and took off the right boot—I could not manage the other—laid myself flat along the bottom of the dugout, headed for the wind's eye, and commenced a fight for life with less nervousness than I have felt in making a shot at a squirrel. Jason had agreed to put in an appearance at the landing with a torch on hearing the report of the gun, but the camp was half a mile to windward, and he might not have heard it, or the storm might deter him. Suppose I managed to reach the weather end of the lake, how was I to find the narrow channel not more than a yard wide and partially hidden by the loose grass? Was I really making headway at all, or going to leeward in spite of my incessant paddling, and how long would I be able to hold out against fatigue and cold? were questions continually recurring as I worked with all the steadiness and vim I was master of, shouting loudly at intervals of a minute or two in the forlorn hope of being heard at the camp; but the only answer was the howl of the blast and the sullen splash of the little waves as they washed over the almost submerged prow of the dugout and dashed in my face. I was getting discouraged. I blamed Jason that he did not come according to agreement, and cursed my folly for attempting to shoot in such a storm from a ticklish little bread tray, which was hardly safe by daylight with smooth water under it. As I grew numb and weak, paddling with less vigor and slight hope, it was a wonder how vividly every past act of my life flitted before my mental vision—not for once, and then done, but the whole course was mapped out to the mind's eye much as landscape is shown of a dark night by a vivid flash of lightning, or rather by a quick succession of flashes, and it was a marvel how sharply the angles of incidents stood out in several little peccadilloes which had almost passed out of previous memory at each successive flash. I had rather entertained the notion that I was what you would call an honorable, fair-dealing man—considerably better than the average; in fact, not exactly a saint. I did not set up for that, but quite as good a Christian as many who made much greater pretensions. That dismal night ride on the bottom of a capsized dugout, with

a blinding snowstorm in my face, and only one spot of a yard's breadth in which to make a landing, rather took the conceit out of me. Do what I could, the reckoning looked bad. It was in vain that I tried to call to mind some act of redeeming nobleness as an offset; conscience would not be cajoled. I actually felt too mean to die, and continued to struggle and paddle against hope, much as Larry kicked when being hung—out of pride. When it seemed impossible to hold out for five minutes longer, when the numbed, tired arms were on the point of refusing to work in obedience to the will, hope came in the fact that the little waves, which had been dashing in my face, no longer made even an audible ripple against the prow. I was close to the bog, for shore it could scarce be called, and I felt a thrill of hope as I struck out with renewed vigor. Then one hand got a hold of the rank marsh grass, then the other; the grass would stand a pull; it was fast by the roots, and I drew the dugout ahead with might and main, expecting it to stop at every fresh pull, but it did not. Was it chance which led the nose of that clumsy pine trough as straight to the narrow channel as I could have steered it in broad daylight? In the channel it was, at all events, and as I crabbed my way slowly along by tugging at the turfy bog on either side, a beacon of promise glimmered ahead, looking like—like Jason coming with the torch, which it was. He came cautiously across the carpet of shaking turf, and stood on the tamarack poles which composed the landing just as I reached the same point. It was a capital occasion for a neat little speech, and Jason "improved" it. Helping me to an upright position, he thrust his hand into the breast of his gray shooting jacket, drew forth a half-pint flask, and presented it at my unlucky head with the following remark: "Old Otard—drink!" Eloquence like that needs no eulogist and will not soon fade from memory.

No doubt I ought to have felt grateful for my deliverance, but I am almost ashamed to confess the first thought on finding myself once more on dry land was of the invaluable smooth-bore, which lay at the bottom of the little lake—supposing it to have had any bottom at all—and regret that I did not shorten the bight of the lanyard and try to save it.

Before 9 o'clock we were all sitting cosily by the fire smoking and spinning yarns, the mountain man excelling in the latter accomplishment; not, I think, through natural talent so much as an aptitude for lying and absurd exaggeration. He was in the middle of an interminable story about a "time" he once had during a high flood on the Mississippi, where he had floated about for I don't know how many days, with nothing to eat or drink but river water. The snow was still falling fast, the wind whistled drearily, and the camp-fire burned with a hearty crackling cheeriness, when a head was thrust in at the open front of the camp, and a deep hoarse voice saluted the party with, "Please, gen'l'men, wo'd you leff me come in an' warm a minute? I'se 'bout done friz." The head was a very large head with an immense mouth and a tremendous mass of matted wool, on the top of which rested the crown of a straw hat, the brim having evidently yielded to the pressure of circumstances over which the wearer had no control. "I'd be mightily 'bleeged

to you gen'l'men ef you'd—"

"Come in, man, come in, of course—why good God! the fellow's a'most naked," said the farmer. "Why, what in heaven's name took you in the swamp such a night as this? Got lost?"

"Yes, massa," said the darky, advancing to the fire, and shivering like one in a fit of the ague. "Yes, I'se got lost shore enuff; I seed your fire more'n two hours ago, but, but I didn't like to come—"

"Oho," said the mountain man Randolph, "you're from the South, I reckon; here, take a pull at this."

The darky took a drink from the proffered flask and turned first one side then the other to the fire with nervous uneasiness. In size, the fellow was a giant; not less than six feet four in height, with square, heavy shoulders, arms heavy and long, gaunt and bony in form and feature, an unmitigated negro of the largest and strongest type, ragged almost to nakedness, gaunt from hunger and suffering, it was evident from this as well as from his idiomatic style of speech that he was a "fugitive from labor."

"Well," continued Randolph, "you've had a good horn, you're among friends, and you may as well own up. Now, where did you come from? Tell the truth, 'cause you see 'twon't do you no good to lie—you're from Kaintuck, I reckon?"

The darky kept stepping and turning uneasily with a half insane restlessness, and the mute, humble appeal of his look as he eagerly studied our faces by the fitful firelight was sufficient to excite the sympathy of any decent man.

"Yes, massa, I'll tell de trufe; 'tain't no use to hole out any longer. Ef I was alone I could stan' it, but I ain't; I'se got a wife an' a little gal out in de swamp. Oh, gen'l'men, we loves our freedom, an' wese bin tryin' to fin' Canada—so long, mus' be more 'n' forty days now—an' we can't. Seem's do every man's hand was turned again us; twice we bin hunted, an' dey put de dogs on us, but de Lord he led us on an' turned our inimy de wrong way; now he's leff us—de Lord's leff us. We could stan' de heat, an' de hunger, an' de wet, but we can't stan' de snow an' de cold. Oh, mas'r's, ef one ob you sho'd come to my cabin cold an' hungry an' sufferin' I'd gib you a crus' an' sech vittles as I had to gib in His name, an' wouldn't harm a hair of your head. Dar's a woman out in de swamp, mos' as white as you, an' a poor little sick gal. Ef you can't help us, take your guns an' shoot us, but don't send us back to be slaves."

And the great ignorant, awkward black fellow went down on his knees and pleaded for help in his sore need, as I never heard man plead before or since. Many of his sentences were incoherent, and his allusions to scriptural texts were wild and frequently incorrect, but the burden of his plea, liberty—liberty and help for his suffering wife and child—was put with an agony of eloquence that brought tears to every eye in camp, save the stony, gray eyes of Randolph.

"Bring your wife and child into camp at once," said farmer Kelly. "They shall have anything the camp affords, and you shan't be sent back to slavery, either. Here, light the torch and take yer back-track. By George! a man who will stand all that for his liberty deserves to have it."

[TO BE CONTINUED.]

# Montana Hunting Trip

By E. L. S.

THE latter part of September, 1911, found two of us, representatives of the States of Connecticut and New York, friends and former hunting companions, speeding westward via Chicago and St. Paul, thence over the Great Northern Railroad to the western part of Montana.

This outing was expected to recuperate and build up our tired forces and give us a new lease of life; and further, we had intuitively arranged to meet some of the large game of the United States in this particular locality; consequently we came prepared. The Senator with his .405 Winchester and the writer with a .33 special Winchester and a Remington automatic .35, to say nothing of our preparation for small game and fish.

Our guide, Chick Grimsley, often called

our start into the mountains; but our visit at friend R.'s ranch was pleasant in the extreme and a failure to have made this visit would certainly have been unfortunate. Finally things were ready and, having procured our licenses, we went by wagon thirty-five or forty miles to Cañon Camp on Birch Creek in the foothills. This was the last of September; we wished to be on the hunting ground when the season opened, Oct. 1; notwithstanding this date, the snow was six or seven inches deep at this point, as the country here is extremely mountainous.

Early Monday morning we were on our way, thirty-five miles distant on the western slope of the main range of the Rockies. Our route followed the course of a good sized creek to its very source, which, at this point, was the Continental Divide; then down the other side

south, and is surrounded by mountains. To the south Mount Pentagon Peak, being ten thousand feet above sea level, was visible against the sky. Across Meadow Creek, westward, on the far side of the valley, was a range with an uneven side covered generally with heavy forests. On the east, the mountain slopes came almost to our tents and the range was so high that it took the writer from early morn to one p. m. to reach the summit.

Our stay at this camp was delightful; clear, cold water at our door for bathing and drinking; the purest air to breathe that man was ever blessed with, and scenery that could not be excelled.

We found the weather west of the Continental Divide warmer than on the eastern slope of the mountain; and it was only occasionally

CHICK AND HIS GRIZZLY.

THE SENATOR AND TROPHIES.

“King of the Grizzlies,” had to his credit twenty-four bear pelts since the beginning of 1911, up to the time of our departure for the East. He was well acquainted with the country and knew the habits of the wild animals. He had spent many years in this locality and had twenty or more cabins in the most likely places for the different kinds of game. With sufficient time at one's command, grizzly, black and brown bear, elk, deer, big-horn sheep, mountain goat, coyotes, and smaller game could not only be hoped for but would probably be trophies of a well-planned hunt with Chick.

We reached our railroad destination tired, but much pleased with the wonderful productive prospects of the country through which we had just passed. It seems as though when these hundreds of thousands of acres of rich level land have been made to produce their best by methods of scientific farming that a sufficient production of hardy grains and vegetables can be had for years to come, notwithstanding the rapid increase in population.

The Senator's trunk got lost and did not come to hand for several days, thus delaying

following the little streamlet until it became a small river. The scenery was superb. Sometimes our trail was along the creek bottom, passing difficult places with mountain peaks thousands of feet above us. The scene was ever changing, in some places the valley would broaden out and perhaps be bordered with precipitous ranges, with now and then snow-covered peaks. To an Eastern man, such a trip is a revelation indeed.

We reached Trail Creek Camp (one of Chick's substantial log cabins), about twenty-five miles from our starting point, late in the afternoon. Early in the morning we again were on the move for Meadow Creek Camp, ten or eleven miles distant. This was to be our first hunting camp, and as Chicks' log cabin here had burned the spring before, we pitched our tents. Evidence of game was seen all along our way in, but the vastness of the country, together with its extreme roughness and mountainous nature, made it seem to a tenderfoot that the getting of game would be rather uncertain without unusually good luck.

Meadow Creek valley extends north and

that we had snow enough in the valleys for tracking, and then it did not stay on long enough to be of much assistance. The higher ranges and peaks were covered with snow the most of the time while we were there.

Next day the Senator brought down a fine mountain goat. This goat was on a projecting shelf about 300 feet up an almost perpendicular precipice. The animal seemed to become suspicious of our presence, and as both ends of the shelf on which he stood was guarded, the only way of escape was to go directly up the mountain side, as it was impossible to leap downward. The writer watching the movements from across the valley saw the goat make a successful effort to climb this seemingly unsurmountable cliff. The animal was not in sight of the Senator at this point; while the writer was not expected to shoot, he knew something must be done to let the Senator know the necessity of immediate action. Without hope of hitting the mark, he fired, and as soon as the echoes were vibrating back and forth across the gorges, the Senator changed his position and saw what was going on and

immediately his .405 began to speak. The goat was almost at the top when Chick appeared at the extreme top of the precipice waving his arms and yelling. The animal's escape being cut off at this point, it turned and worked its way down to the shelf from which it started. A shot from the Senator's rifle dropped him to the valley below. The estimated weight of this goat was from 250 to 275 pounds; it was a beautiful specimen. Just now the Senator seemed to me just a little taller, stood a little straighter and was a trifle more dignified. We took to camp nearly all of the meat, and Chick said that left would make fine bear bait, which subsequently proved true as we killed a small grizzly bear at this exact point.

A few days later I left camp early in the morning alone and started in a southeasterly direction, working my way up the side of the snow-covered range through heavy timber. Crust was on the snow in exposed places. I had not gone very far from camp, when I found fresh signs of elk. I spent much time in trying to see them before they saw me, but the undergrowth was very thick and the noise made in breaking through the crust made this impossible, and I found that I had started eleven or twelve elk. They passed quarteringly down the side of the range to my right. I followed, hoping I might see them through an opening below me. This trail led me over slide rock, through gorges, fallen timbers and in places where it seemed simply impossible for an animal of an elk's weight and foot formation to go. Knowing that the snow was entirely gone on the opposite side of the valley toward which the elk were headed, I concluded to follow them no further, and to go to the place where we had captured the goat, hoping to see some carnivorous animal. Changing my course, I slowly worked up the side of the mountain, and after going about half a mile, I was much disappointed to discover that I had started another band of six or eight elk before seeing or hearing them. I did not attempt to follow, but continued on, seeing many signs of bear. I reached the summit from which I could look down into the gorge where the Senator's goat had fallen. I was lying upon the rocks, carefully scanning the gorge below, when suddenly it seemed as though there was a slight movement among the pine shrubs, a little to the left of the goat carcass. As I adjusted my field glasses to my eyes a huge grizzly bear rose on its haunches. I could see him plainly as he lifted his head high and sniffed. This unexpected sight of a grizzly caused me no little excitement. Having seen the Senator and Chick over this identical ground, it gave me very accurate comparative size of the bear, and when I tell you that I believe this animal to have been fully eight feet tall, I consider my estimate very conservative.

After satisfying himself that all was right, he settled down again among the pines; but every few moments he would go through the same method of testing the safety of his position. Knowing well the nature of the bear, the lay of the land and the direction of the wind, it was simply impossible to get closer without being discovered. The distance was about six or seven hundred feet below me and from fifteen to sixteen hundred feet away on a horizontal line. The wind was blowing a gale from right to left, but in mountain gorges it is ex-

tremely fluky and uncertain and no one can tell over such a range as was before me which way the bullet would drift. My rifle was powerful and accurate and would easily kill a large grizzly at the distance, if the shot could be placed in a vital spot. The only thing for me to do was to hold as accurately as possible and hope that the driftage would equalize itself. With this thought in mind, every nerve at its highest tension, but steady, and hoping that I might be successful in capturing this huge, powerful animal, I fired; and for an instant I thought I had him, for he fell over backward, but immediately sprang to his feet and bounded up the side of the mountain with the agility and lightness of a cat. After a few bounds he stopped with head high in the air, in an attitude of extreme alertness. Hardly had he stopped, when I fired the second shot, and again he bounded forward, springing upon a log far above him, showing his tremendous strength and activity. I shot four times before he passed out of sight. I then ran along the ridge for several hundred yards, hoping to get another shot under more favorable circumstances, but was disappointed. Coming back to the point where I had shot at the bear, wondering why I had failed to score, I shot at a small black spot in the snow near where the bear was, knowing that by this method I could learn the driftage of the bullet. At this time I of course was uncertain as to whether I had wounded the bear or not, so proceeded into the gorge with a great deal of caution, but found as I proceeded that the wind was from left to right, just the reverse that it was at the top of the ridge. When I reached the place where the bear was, I found no signs indicating that I had hit him, and upon examining the black spot which I had shot at, found that the bullet had drifted to the right several inches, indicating that the first shot had probably passed to the right of the bear's neck or shoulders and struck the ground just in front of him, which evidently caused him to dodge backward and fall over. The track of this bear, as made in the snow, was fully three inches longer than the large boot which I wore and two and a half inches wider; which partially, at least, corroborates my former statement concerning size. Knowing well the disposition or tendency of a wounded grizzly, I at first felt somewhat disinclined to follow its tracks, feeling that my business needed my attention, and that if the bear should charge me from a near thicket or from behind a rock, that the chances were very much in favor of the bear. I therefore made haste slowly and did not attempt to follow, unless I could see the tracks for some distance ahead, and always kept on the upper side of them. Many times the track led into a thicket, but I would work around on the other side to see if the bear had gone on. After following some distance, I came to the conclusion that I had not wounded the bear, and that he was only trying to get away from me. After that I followed the track as I would have a rabbit through all kinds of bad places. After following nearly two miles I lost the track on the sunny side of a slope. About this time I came across the Senator and our cook, who had been hunting together, and they agreed that the animal was a very large one. The cook said that he was born in Texas and had lived all of his

life in the Rocky Mountains, but had never seen a larger grizzly bear track, and commented on the fact that he did not wish to follow it, or have anything to do with the maker of it whatsoever. Surely, there are times when ignorance is bliss. I have been told many times since this adventure, by men who know what they are talking about, that I was very careless to follow a large grizzly bear after shooting at it, not knowing whether it was wounded; but all is well that ends well.

Several days later we moved camp to Trail Creek, where a number of elk and deer were shot by our party. It was while at this camp that the Senator had an experience which he will not soon forget. We were hunting together in rather an open forest with much moss on the ground, which permitted us to go very still. We were not far apart when I heard an exclamation, and looking quickly, I saw a large bull elk with magnificent antlers just disappearing into the valley. I had no time to shoot. Looking toward the Senator, I saw him standing like a statue with his rifle at ready, gazing at the point where the elk had disappeared, with a look of mingled surprise and disgust stamped on his face, which seemed to speak volumes; and just at this moment he spoke to me in a loud voice saying, "Oh, Doc, come here and kick me—kick just as hard as you can!"

"What is the trouble, Senator, I asked.

"I saw that animal on the ground fast asleep and in such a position that I mistook him for the large end of a log and turned toward you to comment on its size, when, hearing a slight noise, I turned that way just in time to see a mammoth bull elk with an elegant set of antlers dash among the evergreen trees and disappear. What do you think of that, Doc? Isn't that discouraging, humiliating and disgusting to one who pretends to be a hunter and who came way out here purposely to get a trophy of this kind, to have an elk fool a fellow this way? The idea that I am so dull that it is necessary for me to punch an object a few times with my rifle barrel before I can fully make up my mind whether or not it is an animal, and then have such an elk get away from me!"

A few days later we broke camp, and after an exceedingly interesting trip, without accident, reached civilization.

#### Prefer the Pistol.

A RECENT canvass of the cavalry officers at Fort Myer, indicates a unanimous desire to retain the pistol as a part of the arms of the cavalry soldier, as it has been since the reign of Henry VIII, when the English cavalry carried clumsy pistols called "dags."

# Home-Made Lures

By PAUL H. BYRD

I SHALL endeavor to at once give an idea of what may be expected by the reader with a view to relieving those who may not care to read. Everyone may not be in sympathy with an enthusiasm that carries one so far along, but all readers want to be sure that they are not missing a subject which interests them. Those having ample means are not necessarily barred and those who are handicapped by the reverse conditions are not necessarily included. But my endeavor is leading me to shy at the use of a concise and nifty expression which, I am sure, all will understand and, respectively, be on their way or follow me rejoicing. It is: if you are bughouse on fishing and fishing tackle, this article is for you.

There will be no discussion about why bass strike—nor about why they do not; but an effort will be made to describe in detail, with a limited vocabulary, how to make imitations of, or substitutes for manufactured wooden minnows and other lures. But only those which have lured bass will be described.

The tools required to make these articles are not elaborate; an ordinary pocket knife, a small, flat file, a piece of window glass, a wood drill, the diameter of which is equal to that of a BB shot, a metal drill, the diameter of which is slightly greater than that of the shank of the screw-eye passing through the spinners of the trade product, and only very slightly less than that of the screw-eye (preferably brass) which you are able to find in your local hardware stores, and which most nearly meets the specifications of the special article referred to. These drills cost about ten to fifteen cents in hardware stores.

To operate these drills, bore diametrically with the larger one a hole in a four-inch section of broomhandle and roughly square it—the hole, not the broomhandle—with a knife blade, and insert with some force the grip of the drill. Use as an auger. Speed is not a requirement.

For the bodies of the minnows use cedar or cypress or white pine. I prefer cypress, because it does not split easily and is not so susceptible to a smooth finish and will therefore hold paint or enamel best. Small pieces of cypress or pine may be found in the sweepings at a planing mill, carpenter shop or in a building nearing completion. Reduce the pieces of wood to a size in inches  $\frac{3}{4} \times \frac{7}{8} \times 2\frac{1}{2}$ , or, if your rod is light and very resilient and will not cast a weight in excess of an ounce, reduce it to  $\frac{5}{8} \times \frac{1}{2} \times 2$ . Whittle it roughly to a torpedo shape, maintaining the original proportions of its two diameters at the center. The hand and eye unaided by calipers should do this with sufficient exactness. Its measurements explanatory of future references now are: Longitudinal, from end to end, 2 inches; lateral, from side to side,  $\frac{1}{2}$ -inch; perpendicular, from top to bottom, which will be from back to belly of the minnow,  $\frac{5}{8}$ -inch. A line drawn longitudinally at the lateral center should find the center of the ends slightly above the perpendicular center. When the finished product is

cast and strikes the water on its back the weight in the bottom, being thus removed from the true center, will exert greater power in righting it, which means doing it quickly.

Scrape the surface with the glass and improve the general outline in so doing.

With the smaller drill make a hole in each end as far as is required by the particular screw-eye you have, or stop just short of the required distance and allow the threads of the screw to penetrate solid wood. Sometime you might hook a whale and it would be humiliating to reel in a dislodged screw-eye.

As to the eyes for the lure your choice is the limit of the various sizes and colors of string beads handled by the 5- and 10-cent stores, or, which is a little cheaper, the nursery

the exact lateral center, bore a hole with the wood drill almost as deep as the diameter of the BB shot which goes into it. Hammer the shot in the hole until it spreads and fills completely. File flush with the surrounding surface and drive through it and on into the wood a  $\frac{3}{8}$  or  $\frac{1}{2}$ -inch wire brad. In determining the weight of the completed lure, regulate the amount of the shot placed in it by the size of the screw-eyes and their weight. It is not necessary to use the entire shot. If you are particular as to weight, weigh the various parts together before assembling.

There is no longer an argument among enlightened fishermen about gang hooks being unethical, and when they are draped about the minnow fore, aft and amidships, looking like a cargo of anchors carried abeam, the device is mildly termed barbarous. But relics of barbarism still survive, have a vogue and find a ready market. Education in progressiveness in bass fishing means to convert a benighted soul from a stick of dynamite or a gunnysack full of

Fig 1

Fig 2

Fig 3

Fig 4

Fig 5

Fig 6

you may rob. You may indulge your fancy for pop-eye to an extent equaled by the size of the bead, setting it shallow or deep, by digging a hole with the point of a knife blade. To fasten the beads, cut black, brass pins (swiped from that little German silver receptacle on her dressing table) to a length greater than the diameter of the bead, but not long enough to reach to the screw-eye. To aid in avoiding this, direct the pin from an angle forward, and the weird effect of a crosseyed minnow may of itself exert a compelling attraction for some otherwise disinterested bass. You know how this is yourself.

Holding the cut pin by the head, make the blunt end sharp by drawing the file away from the head. Place some glue in the eye socket and on the pin before passing it through the bead. Force the pin into place by pressure, not by striking it. The resemblance of the black head of the pin to the pupil of an eye is startling, provided, of course, the color of the bead lends itself to the deception, denying a too great effort at nature-faking.

In the bottom, a quarter of an inch from the longitudinal center, toward the tail, and in

crushed buckeyes to a nine-gang minnow, then to one of three single hooks, and lastly to one hook, which is enough, affording the maximum amount of sport. The minnow we are now making has three single hooks, but may carry only one, and that at the tail, if the length of the minnow is decreased.

To place the side hooks, bore a hole with the small drill from an angle forward far enough into the wood to give certain direction to the screw. Let the angle be at the degree your fancy dictates the hook shall set. Bore it at a perfect right angle if you want the hook to lay parallel to the minnow. Some of mine are bored at an acute angle and the hook sets at nearly ninety degrees. Undoubtedly this is an advantage—to the fisherman. I have found that it does not materially aid dead limbs and logs and rocks in their mad rush to grab the lure. The screw should be brass, flat or round head, three-eighths of an inch long and small enough to pass easily through the eye of the hook which will be any size you prefer, and of the large-eyed, straight bend shape. Any shape as regards the bend of the point, similar to Cincinnati bass, will foul oftener and appears

incongruous. There are two ways (of mine) to fasten the hook, but I prefer that which will be described last. These are selected through a process of elimination. I have tried many. With the point of a knife blade pick out a hole, the center of which will be the small drill hole, the diameter that of the outside of the hook's eye and the angle of the bottom that at which the hook will set. Place the eye therein and make rigid with a much shorter screw than described.

The other method employs the metal eye used by harness makers. They are about the size of a BB shot and flare at one end. File away a quarter of its length from the small end, and just a trifle from one side of the flare; enough to allow it to rake forward at the angle of the hole when that end is placed over it. Place the hook over the small end, pass the screw through and make rigid. The angle from the longitudinal at which the hooks will trail depends on the lure being on the surface or under water. If surface, according to my idea, the angle is downward; if under water, it is slightly upward.

In placing the tail hook, let the last turn of the screw eye find the barb above, and again we introduce a factor designed to frustrate the diabolical intentions of logs and limbs. It will pass over them like a steeplechaser over the water jump.

For coloring matter there is a wide range. Iron bed enamel is good, especially in white and shades; and bath tub enamel in very small friction top cans. Vivid colors are in carriage paints, and a small bottle full will repaint a minnow many times. If you live in a large city you may find products better suited to the purpose, and of which I never heard.

You are not limited to the torpedo-shaped minnow. One of the most successful of mine is made of white pine, shaped like a perch, painted an orange color, with Indian bead eyes of blue. Eyes, originally, but since one of them came violently in contact with a rock, alas! However, the loss is no apparent handicap. Sometimes I think, any way, the eyes are more attractive to the fisherman than the fish. So far as that is concerned, though, the entire lure is, sometimes, and then I don't think.

If you shave yourself, presuming the male member of the family to be doing this work, no matter who reads, you, meaning he, will find the spinners in the tube containing the soap. Break half of each blade from an old pair of shears and convert the tube into a flat sheet. The points of the shears will hinder manipulation, and besides you haven't enough power to operate them beyond the center; also, they will spread. Now she'll let you break them.

If you—he, of course—do not shave at home, surely you are awakened sometimes by that hideous device, an alarm clock. Revenge! Reduce it as per the soap tube. Make models of the designs of spinners you prefer and trace with a lead pencil on the metal, reverse side of the nickel. Apply the shears as you did to produce those wonderful paper dolls, but with added force. Place the distorted spinner between two blocks of hardwood, covering the nicked side with blotting paper and beat it until flat. File the edges smooth.

Fig. 1 mostly resembles the spinner of the trade minnow. Find the exact center and drill

a hole from the nicked side with the small drill. Assuming that we are looking at the nicked side, bend away from you at dotted lines BB, then at AA bend toward each other the ends, causing them to overlap and making a hollow four-sided square. Be sure that it is square and that the drill is held to a perfect perpendicular when you drill through the double bottom. With forefinger and thumb bend the blades to a propeller shape. If you attach both head and tail spinner, reverse the bend of the blades, causing them to revolve in opposite directions and thus negative the tendency toward turning over the lure.

To reduce the friction of the head spinner on the wood, place between them a washer made by drilling a hole in a piece of the nicked metal and cutting around it with the shears. To cause the tail spinner to turn easily, place behind it a bead.

Fig. 2 represents a spinner that may be substituted for Fig. 1, and can be more easily made with accuracy. Looking at the nicked side, bend the ends away from you at dotted lines to a right angle with the surface of the blades, first boring the holes. It makes up well out of sheet copper or brass.

Fig. 3 is easily made, the ends being bent the same as Fig. 2, but is not adapted to the minnow which has been described. To it may be attached flies, bucktails and short, chunky, wooden shapes, made to suit your fancy, with, of course, more or less regard for the fancy of the bass.

Fig. 4 represents the shank on which Fig. 3 spins. It is made of brass spring wire to be had on spools at hardware stores, in various sizes, and costs fifteen cents under the same conditions that apply to the drills and break-fast foods. Straightening a piece of the required length, bend an end into the snap illustrated, then put on a bead, then the spinner, then another bead and bend another snap, or a permanent loop, as this is the line end. Bend it opposite to the first snap. You will, of course, put the spinner on "wrong end to" on the first one you make, and discover the error after the loop is made. Here's where the pliers come in handy. I form the snaps around a screw-driver or ice pick.

If a small line snap is used no care need be taken not to scratch the spinner loop in the making. Otherwise the line will be quickly frayed where it is tied. This snap enables you to change lures quickly. It is represented by figure 6 and may be made of any wire having a slight spring in it, but I prefer very small brass or gold spring wire. To prevent scratching when making the line end loop, place blotting paper in the nose of the pliers. This snap is also very convenient in connection with a casting weight which I make and use with flies. Bass (in Oklahoma) are not prone to come to the surface for flies and a weight to sink them affects adversely the casting qualities of a light fly-rod. I use the casting weight mentioned with a bait casting rod. Make it of cypress, torpedo shape, about one inch and a half long and half an inch in diameter at its center. However, its dimensions are proportioned to the combined weight of the fly, the spinner and the casting weight itself, which is that best suited to your rod. I always take with me one weighing an ounce to be used if

a heavy wind blows, although my rod does not cast it well. Place in each end of the wood a brass screw eye and in its center a weight, the same as in the minnow. A lead or slate color approximates invisibility in the water. I allow mine to soak over night in floor stain. I offset to an unknown degree its visibility by placing it a greater or less degree from the fly and spinner with reference to the clarity of the water. Occasionally a bass will strike it, but this will happen only often enough to justify and lend color to the statement that the fish was the biggest you ever saw.

You may connect a casting weight and a spinner more or less permanently with extra heavy line or gut, snapping on the fly and attaching the line with its snap to the other screw eye of the weight. Looping the line to the weight quickly frays the line.

With this combination and a white miller fly, which I also made, on July 4 last, in Maynard Bayou, near Muskogee, Okla., I landed a channel catfish weighing eight and three-quarter pounds. The balance of the tackle was a three-ounce bait-casting rod and a ten-pound test Perry D. Frazer line. I have made and given these lures to several friends and all report its unusual attractive powers for catfish. Only in certain seasons do perch strike. In the spring they take a bright red fly on the apparatus described. This color is successful in luring bass during the winter, but no more so than yellow or orange, which is dependable the year round, and which is my favorite. Possibly I think this about the color, because I use it with greater persistency than any other. A large portion of the water we fish in Oklahoma is murky, and yellow is the most pronounced color for visibility in water, although it is not the quickest to record itself on a photographic plate.

As I said at the beginning, the making of these lures is neither for the rich or the poor, but for those in both classes who can take a justifiable pride in their ingenuity. And, believe me, when you have caught your first bass or had even a strike on one of them you are amply repaid.

#### Australian Crane Decreasing.

It is authoritatively stated that the well-known Australian crane, or "native companion," is becoming very scarce.

# The Dogs from Labrador

## The Rarest and Most Unknown Species of the Whole Canine Family

By H. E. HENWOOD

**T**AKING into consideration their great utilitarian value, it is rather remarkable that there is not an instance on record of the Labrador species having been exhibited at a dog show in this country, or found in the possession of any dog fancier. Although they are decidedly scarce in their native habitat, nevertheless they are to be found there, and a limited number are owned by English kennels. It would seem natural that on account of their usefulness, beauty and amiable disposition, the species would have been carefully propagated here long ago, for outside of the necessary expense there certainly should not be any especial difficulty in importing them.

Comparatively few persons are aware that there is such an animal, and most of those who are—even those well versed in dog lore—are possessed of the opinion that a Labrador and a Newfoundland dog are one and the same animal, which is an exceedingly erroneous conclusion. It is true that they resemble one another in many respects, although not altogether in color, and besides the Labradors display many distinctive characteristics peculiar to themselves, and not to be found in any others of the canine family.

Their heads are very broad, with high foreheads, eyes full and far apart, their jaws at the back are extremely wide and strong, tapering toward the front, and giving a wedge-shaped appearance to the snout; ears moderately large and pendant—not small and upright like those of the Eskimo dogs, which so many believe them to be, having so described them in literature; hair black, long, straight and silky. They stand about twenty-seven inches high at the shoulders, have large medium length legs, very deep chests, and their feet are webbed to the extremity of their toes similar to those of all waterfowl. This last remarkable physical construction gives them great power in the water, and places them at the head of the list of the fast swimmers of the dog family.

Because of the fact that these dogs are covered with unusually long and thick hair, they are provided with almost a water-proof protection for the skin against the icy water in which they are constantly to be seen; indeed, water might almost be said to be their natural element, for they can spend hours swimming about in it, without the slightest inconvenience or fatigue. If they do not plunge in, they can swim all day in calm water without completely submerging their bodies, so that when they come ashore, they will have a dry strip along the entire length of the top of their backs. They are peerless divers, and can keep under water so long that an onlooker will begin to gasp in sympathy for them. Continuous diving produces quite a visible effect upon their eyes, giving them a temporarily blood-shot appearance. Normally, their eyes are most attractive—full and round—and the commissures of their eyelids do not drop, exposing the red canthi or corners of the eyes, which in the St. Bernards is such a disfiguring feature and produces such an unpleasant effect

upon the beholder. Apropos, the St. Bernard dog is often said to look very much like the Labrador species, but in reality there is not the slightest resemblance.

Lord Feversham, of Duncombe Hall, England, possesses an exquisite piece of statuary representing the favorite dog of Alcibiades and displaying a most perfect specimen of the Labrador species, which goes to prove that the species existed as far back as the fourth century, when Greek art was at its height; therefore, it is a subject of considerable discussion among the few persons who are interested and informed how the dogs were originally transported to this continent and became identified with the bleak and barren coast of Labrador.

At the present time there are three species of the canine family in Labrador—the Labrador retriever, the "huskies," which belong to the

A THOROUGHbred LABRADOR DOG.

Eskimo species, and the true Labrador dog. It is exceedingly strange that the Labrador is not classed among the sporting dogs by authoritative writers, for it is unquestionably the best sporting dog extant. In passing, one may explain that the retriever, the Labrador retriever, the Labrador, Newfoundland and St. Bernard dogs all belong to the retriever family, all more or less remotely connected, and in the order given here. As a matter of fact, all dogs have one common origin, and the most highly prized of the various species have been artificially produced by segregation, in different parts of the world, and by the influence of different climates, foods and environments, also by exercising the greatest care in selecting mates, and by destroying aberrant offspring.

No absolute reliance can be placed upon the quality and appearance of an expected litter of pups. Many a kennel has been surprised into a state of consternation by the advent of a litter of young dogs, none of which bore the slightest resemblance to either of their parents, nor could they be likened to any known species. These surprises are not due to unexpected mating, but are attributed to telegony. Many such occasions

transpire when there has been no possibility of earlier mating.

To return to the main subject. The Labrador dog has an unusually active brain, and therefore is capable of receiving a more diversified and wider range of education than any other members of the canine family. These dogs will point as well as any pointer; will show as much sagacity in corralling sheep as the collie; will not be surpassed by land spaniels, working under a gun, and when it comes to retrieving in water, they are simply par excellence; none other can approach them. When out on a duck hunting expedition, a Labrador dog has been known to chase a wounded duck for hours, diving when the duck dived, coming up to the surface each time a little closer to his prey, and finally getting it.

Sometimes a duck will not be so seriously wounded as to prevent it from making use of its wings to help its escape over the water from its persistent pursuer, and whenever the dog will get uncomfortably close, it will fly twenty or thirty yards before being forced to alight again by its crippled condition, but the dog, not the least daunted by these discouraging flights, will keep after it with a Nemesis-like and unswerving intent, never tiring himself, but gradually wearying the duck, until it is finally forced to succumb to the inevitable. Many times, when chasing a wounded duck, he will go so far that his big black head will become invisible to his companion in the chase, and he will remain out of sight for half an hour or more. When eventually the hunter descries a black speck in the distance, gradually getting larger, then he knows that his dog has succeeded in capturing his game, although it will be some little time before he can actually see that the dog is carrying something in his mouth, and still a considerably longer time before he is able to deliver the goods.

In addition to his perseverance when following and hunting down game, another characteristic of this remarkable species is his directness of attack. He will plunge straight through brush and underwood, regardless of the sometimes painful consequences, when in pursuit, never taking his eyes away from the object he is after; in no wise resembling the other varieties of dogs, who generally look around for an easy approach.

On account of his great swimming power, this dog is invaluable as a life-saver from drowning. If his master should accidentally upset his boat or fall into the water, he need have no fear for his life, for he will find his dog right beside him, ready to offer his services, and if necessary quite willing to carry him ashore, besides being able to swim out and tow in the upset boat.

A most pleasing trait in these Labrador dogs is their honesty of purpose in all things. Such a dog will do that which very few animals can do, and many human beings cannot do, and that is, he looks you fairly and squarely in the face,

(Continued on page 545.)

## Sixteen or Twenty.

BY THEODORE GORDON.

TWENTY-BORES are extremely popular at present, and one sometimes hears that they will kill ducks at longer ranges than the old reliable 12-gauge. There is something very attractive about these little guns, and when anything is in fashion, it is in fashion with all its feet. We would all like to try everything that comes out, but only the man with well-lined pockets can afford to own a battery of guns. The average individual has to center his affections upon one shotgun, and his opportunities for shooting are limited. He expects this weapon to answer for all feathered game and wishes to carry no unnecessary weight, yet we do not think that many sportsmen can rest satisfied with an excessively light weapon.

If one intends to order a 20-gauge chambered for three-inch shells, I fancy that he would do well to handle a good 16-bore of about six and a half pounds' weight before doing so. One must have weight if he uses heavy charges of powder for wildfowl or grouse, and it seems to me that six and a half pounds is sufficiently light for any double gun. Some men do good work with short-barreled 20-bores weighing about five and a quarter pounds, but I am confident that the great majority will do better if they add at least one pound to this weight. Many of the best shots at the traps and in the field are using barrels thirty to thirty-four inches in length, and find their shooting improved owing to better alignment and sure pointing qualities, and long barrels do not go with feather-weight guns.

If we can have but one gun I sincerely believe that the old 16-gauge will be found most satisfactory for the average man. It will shoot well with reduced charges if one is in pursuit of woodcock, quail and snipe down even to one-half ounce of shot for rail birds, and seven-eighths ounce is sufficient with a full charge of powder behind it. The difference between a three-inch 20-gauge cartridge and a regular 16-bore shell in the matter of convenience is, I think, in favor of the latter. If at any time you wish to burn a little more powder and throw a few more shot, you can do so with the sixteen. It is a good plan to consult two of our best gunmakers and get their ideas after informing them that you expect to have but one gun. Describe also the shooting you prefer and expect to do. We have had one featherweight full-choke and always wished it was a bit heavier. So much depends upon balance and the "feel" of a gun in the hand. If soft, one will be very tired at the end of the day, no matter how light the gun may be, and in the long run the one-gun man will have more comfort and satisfaction with a well-proportioned six and a half to seven-pound weapon than with a featherweight of any gauge. I should say barrels not shorter than twenty-eight inches and not longer than thirty-two inches for either bore. Bag limits in

addition to game that has become wild allow but a few shots per day, and these are often difficult ones at long range and fast flying birds. We have to be very quick, but steady and sure to make good. Often we are content if we have one or two ruffed grouse or a couple of ducks after a hard fag. A good 16-bore is not to be sneezed at when entered at trapshooting, and with a full charge of shot may be depended upon to smash clay birds with great regularity. In fact, it seems to be the best gun for the greatest number who wish for light weight, convenient ammunition and all around effectiveness.

## Hunting in California.

BY GOLDEN GATE.

THE Lagunitas Rod and Gun Club recently held a formal house-warming of the new club house on Mount Tamalpais, this being attended by the members and a number of invited guests. At this meeting it was decided to hold a varmint hunt some time in April in an effort to clear the club's preserves of bobcats, 'coons, skunks and other small animals that have been increasing in numbers so rapidly of late. A number of hunting dogs are being purchased by the members of the organization, and it is anticipated that fully one hundred nimrods will assist in the hunt.

The rapid extermination of quail on the lands of the Spring Valley Water Company in San Mateo county, where hunting is not allowed, recently led to an investigation of the causes, and it was found that the property was badly infested with predatory animals. Traps were set and during one night sixteen 'coons, ten wildcats and twelve skunks were taken. Twelve trappers have been employed by the water company, and these will hunt in the hills until the varmints are exterminated.

The movement that is on foot to make a game reserve out of Mount Tamalpais where wild life might breed unmolested is meeting with strong opposition from gun clubs and the owners of the mountain. These threaten to retaliate by closing their property to the public.

The present outlook is that but few of the game bills introduced in the State Legislature will be given serious consideration. The non-sale bill has a good chance of becoming a law, but this is not in its original form. It has been amended to permit the sale of wild geese and all kinds of rabbits.

## In Tete Jaune Country.

WEST NEWTON, Ind., April 15.—*Editor Forest and Stream:* In case any of your readers should be contemplating a trip this year to the Mount Robson and Tête Jaune Cache country and should ask for advice concerning guides, you could not do better than to recommend J. W. Beattie and Adolph Anderson, care of Hood's Store, Tête Jaune Cache. Anderson was with me a couple of years ago on a trip to the Brazeau region, and he has since been trapping

and prospecting in the Fraser country. Beattie at that time was the hunter for the Pacific Pass Coal Company, and I was with him for some time. In a rather wide experience with such men I have met none that I liked as well or that had as good a knowledge of their business. They now have a good outfit of horses and can care for any party, large or small, at reasonable rates. Furthermore, they know the country, are good hunters, and will work their heads off to get game. I had hoped to take a trip with them this fall myself, but a literary undertaking will prevent. I shall be glad to correspond with anyone who is contemplating such a trip.

PAUL L. HAWORTH.

## 500 Song Birds Imported.

WITH the arrival of 500 song birds of foreign birth in Detroit, the first steps have been taken in the unique experiment of transplanting foreign songsters into this country. Among the arrivals were 161 linnets, 15 brilliant yellow-hammers, 60 greenfinches, 13 bullfinches, 22 blackbirds, 6 bluejays, 54 chaffinches and 15 redpolls.

The birds were brought over at the order of Henry Ford, prominently known as "savior of birds."

Game Warden Daniel, taking one guess, said "these birds will rapidly become acclimated, and although I do not think that the birds will leave the Ford farm just yet, they will multiply and migrate in the course of time."

## Bird Lime.

HANOVER, Pa., April 19.—*Editor Forest and Stream:* John Preston True can make an excellent bird lime from plain linseed oil by boiling it down until it becomes thick and gummy. Can be used on twigs, foot rests of bird houses, etc.  
J. A. MELSHEIMER.

NEW YORK CITY, April 21.—*Editor Forest and Stream:* If your subscriber will get a copy of the Scientific American Cyclopaedia of Formulas, 1911, at the Public Library in Boston, he will find on page 25 two receipts. I believe bird lime can be bought at M. A. McAllester Co., 65 Cortlandt street, New York. H. H. WALKER.

NEW YORK CITY, April 15.—*Editor Forest and Stream:* In your issue of April 19 a subscriber in the cultured city would like to get some bird lime. This article is made from the bark of the holly tree, and is made in England by distillation where that evergreen is quite common. It is used to catch gold finches and other song birds that are found there in great numbers. He can buy it from William A. McDonald, 2781 Broadway, New York city. A very good substitute can be made from a distillation of turpentine, but that is a ticklish business. A more convenient way would be to obtain it from the manufacturers of adhesive plaster, or those people that make the sticky fly paper.

WILLIAM SIMPSON.

# SEA AND RIVER FISHING

## A Day Spoiled

By W. J. CARROLL

I SUPPOSE it is because "Angling," as Piscator informs us, "is a harmless recreation—a recreation that invites to contemplation and quietness"; and as the Ettrick Shepherd avers, "It's a maist innocent, poetical, moral and religious amusement"; and because my incursions into "God's ancient sanctuaries" were mainly in quest of "peace, good health and much good fish," I never had in my woods experience any very thrilling adventures by flood or field.

An avocation that is "maist innocent," and that invites to "contemplation and quietness," is not likely to furnish any of the hair-raising escapades that in the ordinary way fall to the lot of those who go far afield seeking big game. Nevertheless, when I was a lad in my teens, I was a participant in a little drama that nearly ended in a tragedy, and that at the time thrilled me as I have seldom been thrilled since.

As a result of many weeks' planning, Sam, a school-fellow of mine some years older, and I found ourselves one lovely summer morning, shortly after sunrise, at the foot of Ocean Pond, which is situated in a remote outpost, some distance from the nearest village. As all the inhabitants were fisher folk and were engaged in their various occupations at the seashore, we were as remote and much alone as if in the heart of Africa.

"Ye'll have the wind down from the 'sou' sou'west', and 'twill be a grand day for the traouts. If you go up to the head of the pon' where the Willow Brook runs in, you'll get 'em there as plenty as caplin, and as big as dogs"; thus Uncle Pierrie delivered himself the night before, when we called on him to arrange about getting his boat. His weather prognostications were verified to the letter, and we were now about to test his prophecies about the "traouts."

Uncle Pierrie's boat lay on the bank. He had cautioned us to be careful of ourselves, as she was easily capsized. She was a locally made clinker-built flat, just as cranky as they make them, and when Sam eyed her, he said, "Look-a-here, laddie, don't you sneeze or look crooked aboard of this one, or I am a gone goose. You can swim all right, but if she goes over, I'm done—I'll go to the bottom like a killock."

I promised to be careful, and we shoved off and boarded her. There were three thwarts in her, and Sam sat on the forward one and took the paddles.

Now a most uncommon thing happened me that day, and it afterward proved Providential for Sam. I had a bran new silk line and had not taken it out till this morning. I started to get it on my reel. It became more hopelessly tangled than ever I saw a line tangled since or

before, and it took me an unreasonably long time to take the kinks out of it. The lake was very large and deep, dotted with islands here and there. Sam rowed up a good bit, and at last got hot and tired, so I proposed to beach the boat on a rocky islet ahead, and he could rest and fish, while I straightened out my line.

We came to the islet and hauled the boat up on a flat ledge that ran out a few feet. Sam slipped ashore and held the boat, while I walked the length of the boat and got out over the bow. We then hauled her up till she was about three parts high and dry. The water was very deep and dark all around the rock, and as it looked a likely spot, Sam threw out, while I still struggled with my line.

Generally when I go fishing my line and gear are made ready days before, so that very few minutes after we strike the chosen waters my flies are skimming the surface. I was very impatient now, and in my hurry once more verified the old adage, "the more haste, the less speed." However, all things on this sublunary sphere come to an end, and after what seemed to me to be an interminable delay, I at last got everything ready and threw out.

In the meantime Sam had hooked a nice mud-trout and had made the rounds of the islet, which was only a few feet in extent. I went to the point furthest from the boat and soon hooked a splendid one. Sam was now impatient to get to the head of the pond, and while trouting, kept on urging me to come along.

All the boys with whom I ever fished have a standing joke at my expense. They say if I get a single bite in a place I want to live there forevermore. Of course, this is exaggeration. But one tells how on an occasion when four of us were camped near a pond, and had Irish pig's head, New English potatoes and new American cabbage for dinner, which event was scheduled for six o'clock. The whole camp, being sick and tired waiting, had to turn out at ten o'clock and come down to the lakeside where I was getting an odd bite and compel me to haul up by firing stones into the water all around where I was fishing. Another tells about the day they had to send a search party from the steamer up the river at four o'clock in the evening to force me aboard to my breakfast, which meal I had forgotten to take before we left in the morning. So the yarns go.

This time I was about to move on, but was having "just one more throw to get the Lord Mayor of Ocean Pond" before I boarded the boat, when I had the experience that made my hair actually and literally stand on end. I was facing up the pond, the boat was on my right-hand side and Sam was sitting in the stern

with his line out. While the boat was beside me and not in my direct line of vision, yet through the corner of my eye I could see her. Suddenly I saw the regular movement of Sam's rod cease, and I said to him, "Have you struck another one?"

He not answering, I turned right around and looked squarely at him. The sight that met my eyes caused my hair to suddenly stiffen and my heart nearly cease beating. His body was shaking violently, his eyes were bulging out of his head, and he was frothing out of the mouth. I was struck dumb with wonder and amazement, and while I was yet gazing at him speechlessly, the rod shook out of his hand, and he slowly fell head foremost out over the stern of the flat into the dark deep water.

Then I awoke like a flash. I sprang aboard the boat and ran the length of her on the thwarts, and just as he was leaving the boat, I pinned him to the edge of the rail and held him. I could get no grip on his coat, which had tightened, to haul him in, so I ran my hand down his back, under the water, and hooked my forefinger into the collar of his coat and hooked him back into the boat. It then flashed on me that if I fooled with him in the boat she would soon slip off the rock and both of us would be drowned sure. In my excitement I put my two hands under him, lifted him as if he were a year-old baby, stepped over the thwarts with my burden as lightly as a cat and laid him on his back on the smooth part of the rock.

It was then I was in a quandary. It suddenly dawned on me that I had heard that Sam was subject to fits of some kind. I did not know what to do. However, I laid him flat on his back, opened his neckwear, chafed his hands and wiped his mouth. After what seemed to me to be hours of anxiety, he came to a little and sat up.

I breathed freely once more and was thanking my stars that I was well out of an awkward predicament, when my sudden hopes were dashed to despair. As he opened his eyes, I saw the light of reason had left them; he looked uncanny, and when I talked to him he answered wildly and incoherently, or muttered unintelligibly. It was then that I realized that I was marooned on a remote rock, single-handed with a companion who had gone suddenly insane. I had no means of binding or securing him, and if he had shown the least violence, the result probably would have been the drowning of us both. I had nothing but the two trout lines to tie him if he had got obstreperous, and I soon decided that for this purpose these were useless.

After a time, seeing that he was quiet and

docile, I got him into the stern of the boat, shoved off and pulled for dear life to the nearest shore, talking to him all the while to keep him steady in the boat. When I got so near that I could beach her at the least sign of danger, I made all haste for the landing place at the foot of the lake.

I do not know to-day whether it is a physical fact or the result of an excited imagination, but I am under the impression that there were more curves and coves and bays in that pond than there are to be found all along the Atlantic sea coast. After ages of hard paddling, we at last arrived at the starting place, and I got Sam ashore. He suddenly sighed heavily, his whole body seemed to be convulsed; he looked around in evident surprise; the vacant look left his eyes and he said quite rationally: "What's the matter? What's happened? Why aren't we fishing up at the mouth of the brook?" I explained to him that he had fainted and fallen into the water, and that I had just caught him in time. He had not the least notion of anything that had happened for hours.

As he was the only son of a widowed mother, who was also a great friend of my own, I promised not to breathe a word of our

misadventure. When he took off his coat and vest we found that his singlet was quite dry, except on the collar, so that instead of his being in the water for ages, as I had imagined at the time, he could not have been immersed for many seconds.

When I got home late that night and got to bed, I was still suffering from jangled nerves. Every time that I would doze, the picture of the man in a fit going out over the stern of the dory would come vividly before me, and before I knew what I was doing, I had sprung right out of bed on the floor three or four times, every nerve in my body tingling with excitement.

At last, my mother, hearing me, came into the room, sat on the side of the bed and got the whole story out of me. This seemed to soothe and relieve me, and I soon fell into a deep sleep and rested easily for the remainder of the night; but for weeks after, it so affected me that I used to start in my sleep nearly every night. And even now, after the lapse of a quarter of a century, when all the parties concerned have been long gathered to their fathers, I often conjure up the picture of that beautiful summer day and think how near poor Sam was to a tragic ending.

rule, exert all their energy to free themselves; some more than others, owing to their superior strength and activity and also by reason of a higher grade of intelligence with which some varieties are endowed.

The fish fauna of North and Middle America embraces 3 classes, 30 orders, 225 families, 1,113 genera, 325 sub-genera, 3,263 species and 133 sub-species as compiled in Bulletin No. 47 of the United States National Museum under the authorship of our leading ichthyologists, Jordan and Evermann. In view of this great number and variety of fishes to select from, it is not strange that there should be a wide diversity of opinion among those who have given the game fish question careful consideration.

We are all agreed in that the brook or speckled trout (*Salvelinus fontinalis*) is in every sense of the word a game fish; but I well remember hearing an old angler relate the manner in which the largest brook trout he ever had known of being taken from the streams of Western New York, in which this game fish par excellence had no opportunity of showing his fighting qualities. The incident related was substantially as follows: "The largest genuine speckled trout I have ever known to be caught in this section weighed four pounds and two ounces. It was taken many years ago by a small boy, using a cut pole, heavy line and hook, in the upper waters of Caledonia Creek, N. Y. I knew where this old settler lay, and had hooked on to him two or three times with light tackle, but was unable to hold him. The small boy referred to sneaked up to the bank with his heavy pole, with a worm for bait, and in a twinkling yanked him out over his head, high and dry on the bank. I secured the fish for five dollars, with which the youngster was well pleased."

There are anglers by whom it is claimed that the carp possesses game qualities which would astonish many who are prone to deride his ability along this line, and last summer, while angling for black bass on the St. Lawrence River, I caught a six-pound catfish on light tackle which gave me a wonderful fight, and a fair-sized eel has sometimes convinced me, for a while, that I had hooked the record bass.

The idea is entertained by many people that game fish are not, strictly speaking, food fish, while the truth of the matter is, that a large number of the better class of food fishes are principally those classified as game fish; particularly is this true of the fresh-water varieties.

All waters are not adapted to the production of the most highly regarded food fishes, and attempts to stock waters with fish not suitable for them must always result in disappointment and failure. Fortunately there are comparatively few bodies of water in this country in which some good edible variety will not thrive. They may not be game fish in accordance with the generally accepted understanding of the term, but at the same time they are capable of affording sport and recreation of a quality sufficient to satisfy the average angler.

It is absolutely useless to undertake to acclimatize fish in waters which do not possess the natural qualifications to meet the requirements of their physical organization.

## The Game Fishes

By CHESTER K. GREEN

WHAT constitutes a game fish? Is it the fish itself; the fishing tackle or the viewpoint of the angler? The question as to where the line shall be drawn separating those which shall properly be classified as belonging to that aristocratic circle of game fighters among the fishes and those that are not, is somewhat analogous to the difference between a weed and a plant, as explained by a writer on botanical lore. "A weed is simply a plant out of place. Almost any useful plant may become a weed if it grows in the wrong place; and conversely, almost any weed may be valued as a garden plant under some circumstances."

Drawing our conclusions from this illustration and applying them to fish, it might justly be claimed that under certain circumstances and conditions almost any kind of a fish might be called a game fish. The late Prof. G. Brown Goode says, in his valuable work, entitled "American Fishes": "Game fishes are those which by reason of courage, strength, beauty and solidity of their flesh are sought by those who angle for sport with delicate fishing tackle"; and again he says relative to the subject: "A game fish is a choice fish; a fish not readily obtained by wholesale methods at all seasons of the year, nor constantly to be had in the markets; a fish, furthermore, which has some degree of intelligence and cunning, and matches its own wits against those of the angler, requiring skill, forethought and ingenuity to compass its capture."

Another writer makes this logical assertion: "And it may be generally asserted that any fish is most game when fished for in the

way which gives the greatest chance of resistance and of escape, and which demands the greatest skill and delicacy on the part of the fisherman."

In the Smithsonian Institution at Washington will be found a case of mounted fishes bearing the inscription, "American Game Fishes." This case contains the following specimens: Brook trout, grayling, yellow perch, white perch, sunfish or bream, landlocked salmon, sea bass or black will, pike-perch or wall-eyed pike, Columbia River salmon, quinnat, large-mouthed black bass, small-mouthed black bass, calico bass, Atlantic salmon, lake trout, bluefish, sheepshead, scup or porgy, Spanish mackerel, weakfish or sea trout, cero, spotted weakfish, pickerel, horse-cavallé, channel bass or red drum.

In reading over this list of specimens it is very clear to be seen that it is not intended to convey the impression that the case contains a complete representation of all the so-called game fishes of this country, as many familiar varieties are missing; but they are given to show the kind of fish which certain authorities have named to designate them as such by placing them in a case under the above mentioned heading.

From the opinions expressed above and the list given, it can be safely asserted that it would be a difficult task for one to clearly define the question as to what are and what are not game fishes at all times. It, therefore, appears that the tackle used and the mode of capture have infinitely more to do with the matter than the fish itself. All fish are tenacious of life, and when on the hook, as a

# YACHTING

Forest and Stream will give a weekly digest of Yachting and Motor Boating events from all over the country.

## A Story in Phonautics.

*Not Written by Secretary of the Navy Daniels.*

A JACKEY, having served his time and been discharged from the United States Navy, wandered up the Bowery. He had blown the money coming to him when he stopped working for Uncle Sam. His ruminations led him either to a bench in the park or re-enlistment. He decided on the latter. Two points off his starboard bow paced the immaculate solicitor for Uncle Sam. Jack saluted the blue and brass-bedecked "doughboy" and went up the dark and creaky stairs to a dingy room, sometime known as the recruiting office. He mumbled to the "petty" in charge that he wanted to re-enlist. "Re-enlist?" queried the "petty," "I don't get you," whereupon he took from the shelf a Danielized dictionary of navy terms. "Nothin' doin'; 'tain't here. What's on yer chest, anyhow?" Up spake a grizzled old sea dog tilted back on a frayed cane bottom. "He wants to go back into the navy." "Oh! you desire to be re-engaged for service with the United States Government!" "You got me wid the foist barrel, bunkie," said the applicant. "Kindly give me your family tree insofar as it relates to your qualifications to enter the employ of Secretary Daniels," said the "petty."

Having satisfactorily passed muster, through the help of his discharge papers, he was sent to the Brooklyn Navy Yard. As he got aboard the receiving ship Vermont, the weather beaten old bo's'n's mate sang out, "Go below—I mean descend to the floor underneath and receive your instructions." "Aye, aye, sir." "Stop! that language is not acceptable here; you mean yes, sir." Too bewildered to get the drift of things, Jackie shouldered his dunnage bag and hesitatingly asked, "Where's the companionway to the berth deck?" "The what to which," bawled a nearby "petty." "You must have served your time before sea language was denaturalized; you descend the stairs over to your left and when you reach the floor below turn to your right, where you will observe a row of closets, in one of these deposit your dun—I mean your clothes bag."

Jack, having no wireless to the Navy Department at Washington, too bewildered to go further, dared not ask more questions. His nerves, unstrung from the labor involved in the spending of his pay, now were frazzled to a raw edge. He tottered and would have fallen but for a coxwain who came along in time to buoy him up. "Pleasé, Mr. Coxwain—" "Say, lad, don't call me coxwain; there ain't no such billet—I mean position, since Daniel picked the plum; I'm the man who steers the boat; what can I do for you?" "Take me to the apothecary; I got to go to the sick bay—I'm all in." "Sick bay! This bay ain't sick. Mayor Gaynor has just put in a sewage trunk to an island in the ocean; you must mean the hospital." To the

apothecary they went, and Jack, uncertain as to what was the Danielization of the term in his mind said: "Doctor, splice the main brace." "Man, you need Bellevue or Matteawan; there's no main brace on this ship; she's fast in Brooklyn mud. Tell me your troubles; I can tell by your bewildered expression you are in mental pain. You want a drink. Oh! yes, I see, you are of the old school. You were in the navy last week before our vocabulary was redramatized. When you want a drink, say so. Don't say 'splice the main brace.' It's only lady friends of the officers that dare be nautical these days. Take this dose, and while you rest I'll translate Farragut into Daniels for you: Starboard, right; port, left. To go below, say downstairs; berth deck, say sleeping floor; port your helm is, exert sufficient pressure on the wheel in a lefterly direction to turn the ship to the right. If you want to direct someone to the bow, say go along to the front of the ship. Instead of hammocks each resident of the Government yacht has a folding brass bedstead and instead of a number an engraved brass plate designates the name of the owner. If you belong to the port watch, you must say, 'I am on duty on the left side of the vessel.' The red and green running lights have given way to 'L.' and 'R.' in illuminated letters, the log and lead are now known as speed and depth indicators; in fact, lad, every time I hear an order nowadays I have to do like a policeman when you ask him which direction Broadway is from the Bowery—look in a book. I would advise you the next time a demoted admiral comes around canvassing for the 'revised nautical dictionary,' to buy one. It will put you in strong with Daniels. Now sleep a while and you will feel better."

## Corinthian Y. C.

A SERIES of spring races of the Corinthian Y. C., of Philadelphia, for 1913, open to raceabouts belonging to all organized yacht clubs, follows:

First Series.—Saturday, May 3; Saturday, May 10; Saturday, May 17; Saturday, May 24; Saturday, May 31.

Second Series.—Wednesday, May 7; Wednesday, May 14; Wednesday, May 21; Wednesday, May 28.

Third Series.—Saturday, June 7; Saturday, June 14; Saturday, June 21; Saturday, June 28.

Fourth Series.—Wednesday, June 4; Wednesday, June 11; Wednesday, June 18; Wednesday, June 25.

Opening Day, Saturday, May 24.—Special race for raceabouts and a "bang and go back" race for motor boats. Prizes for the first and second in this class. Circular giving special instructions for these races will be issued later.

May 30.—Special race for raceabouts.

May 30 and 31.—Long distance motor boat race: Overfalls Lightship and return. Open to

all cruising motor boats enrolled in the club and to such other boats as may be specially invited to participate. Race will be run under the rules of the American Power Boat Association, the committee reserving the right to waive any part of the rules which they may deem advisable in this special event. Start to be made off Corinthian Y. C. pier on Friday, May 30. Preparatory signal will be given at 2:55 P. M.; starting signal at 3 P. M. Course: From starting line to red nun buoy No. 2T, thence following main ship channel to and around Overfalls light vessel, leaving same on port hand; return over same course to finish line off club house. Certificate of measurement must be filed with regatta committee before the start of race. Any protest of measurement must be made in writing before start.

Commodore G. W. C. Drexel has offered first prize cups for each raceabout series, opening day race and long distance motor boat race.

Invitation Race, Saturday, May 31.—For a cup presented by Charles Longstreth. Open to any two or more similar sailing yachts that could be considered in a class, who enter for the race prior to 9 o'clock in the morning of the above date. Open to yachts of the Corinthian Y. C. or yachts of other clubs invited to participate, except yachts in the raceabout class. Should there be more than one class of yachts for this race, a cup will be given for each class.

Saturday, June 14.—Motor boat race to Reedy Island and return. For boats enrolled in Corinthian Y. C.

In addition to the prizes above referred to, racing flags will be given to winners of the sailing races. First prize, rectangular blue. Second prize, fishtail red. Third prize, triangular white. Racing flags will be awarded immediately after finish of race.

Raceabouts participating must be remeasured and inspected for equipment, otherwise they will not be considered as entering. Motor boat races are open to cruisers only, and must be measured by Corinthian Y. C. measurer. Measurement certificates by other measurers will be accepted subject to verification by club measurer.

ADDISON F. BANCROFT, Chairman.

CHARLES LONGSTRETH,

CHARLES D. MOWER,

Race Committee C. Y. C.

## Portland Y. C.

At a special meeting of the Portland Y. C. held March 16 to further the movement for the new power boat squadron, twenty-five motor boat owners were present. A committee was appointed to draw up rules and regulations governing the squadron. The following are the officers of the new power boat squadron: Commander, Holman F. Day; Lieutenant Commander, W. A. T. Hunt; Lieutenant, George A. Gould; Secretary, Frank W. Wardwell; Treasurer, W. A. T. Hunt.

**CORRESPONDENCE**—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

**SUBSCRIPTIONS:** \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

**ADVERTISEMENTS:** Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

### THE SPELL OF THE SPRINGTIME.

As the sun in its springtime orbit gathers strength and infuses its magic warmth everywhere, the annual miracle of the revivification of animal and vegetable life begins. The ice-bound waters, snow-clad landscape, leaden sky and frosty winds are forced to give place to waters aglow with the light and warmth of the sun; to fields and slopes and woodlands dressed in vivid green, refreshing and pleasing to eyes and mind; to breezes balmy, gentle and laden with the fragrance of herbs and flowers; and arched over all a deep blue sky, patched with a few fleecy, lazy clouds. The transformation from the cold and sere and dismal season of dearth to the bright and cheerful season of renewing plenty is a period during which all nature rejoices. Hardy flowers burst forth to welcome the first spring warmth of the sun, bravely risking the straggling furies of departing winter. The unfolding of vegetable life follows in quick succession. The buds gradually open, flowers of rare beauty bloom and gladden the scene; the trees blossom, and a new fragrance pervades the air.

There is brightness with beauty everywhere to please the eye. The ear is delighted with the hum of bees, and the melodies of long-absent song birds. All nature is warmth and color and melody.

The enchanting spell of the season infuses a new buoyancy into man. He is most susceptible to the impress of nature in her kindest mood and her most beautiful adornment. Though he enjoys the charm of the present in itself, he enjoys it the more in contrast with the cold, bleak and dormant season which preceded it.

It has more than this. It has its witcheries. The open waters, with the incessant glintings in the sheen of light, and with ducks resting or feeding in the favored nooks, arouse the instinct of the duck shooter. The impulse of the gunner is upon him. He thinks of the sport over decoys, of sport in a blind, of sport in a pass, of the dusky phantom speeding down the wind which he, with a quick shot, sent plowing and splashing into the water; or of the high-

flying "Canada" he so deftly tumbled out of the sky, to the surprise of his companions. And thinking of all this, he is indeed a better sportsman if he will refrain from spring shooting, because he thereby contributes to the general good and will not pawn his own shooting of the future for the momentary gratification of shooting in the present.

In the cold, swift streams the trout, shy, cunning and fastidious, is a worthy prize of the most delicate skill. A miniature demon of a beautiful fish—aggressive, swift of action, predatory and a fighter by nature—he casts a spell over man which reaches from the brooks to the very centers of the towns and cities. The trout fisher prowls about from store to store, inspecting new colors and forms and materials of flies. He holds long and grave conversations on rods and reels. He overhauls his fishing paraphernalia, and although he may not go fishing, he engages in all that appertains to it as earnestly as if it was foreordained that he should go. The witchery of the brooks is upon him. The fever of the season has infected him. He meets a friend, who, pressed by business cares, has forgotten all about the season. A word or two, and in a moment his friend has the fever, too. The little trout in the faraway brook has cast his spell over them. The fever spreads.

It is a healthy malady. Man's mind is diverted from the exactions of business. The fever takes him out among nature's best of the wholesome and the beautiful, where there is quiet and peace and health. The impulses of the springtime, to fly to the woods and fields and brooks, are those which bring him needed rest, a recuperated being and a longer life.

### A NEW SERIAL BY "NESSMUK."

Up to the time of Nessmuk's death, May 1, 1890, of all the contributors to FOREST AND STREAM—and what a host of sterling men and women they were—none ever won quite the place in the affectionate regard of readers that belonged to "Nessmuk." Into his writings was put not alone the lore of the woods—nature's secrets, revealed to such a woods haunter as he had been—but there was more than this—the philosophy and sentiment and wit and wisdom of a shrewd, observant, keen and penetrating student of human nature. A wonderful knowledge of the woodlands and of the ways of the woodland creatures was his, and a remarkable knowledge of his fellow men as well. Someone else might have written "Woodcraft" and another pen have contributed "Forest Runes," but the "Nessmuk" who could write them both may be found not once in a century. It is for this reason we lay particular stress on the narrative by George W. Sears, beginning in this issue, and continuing through several subsequent numbers. To bring "Nessmuk" back among us, if for only a few weeks, is an achievement of which we duly are proud.

### SANS STARBOARD—SANS PORT.

SECRETARY OF THE NAVY DANIELS has made a place for himself in the hall bedroom of fame for doing to traditional nautical terms what Andrew Carnegie wants to do to time-honored spelling of English. Possibly Secretary Daniels wants to go down in American history as the father of phonautics.

### INTERNATIONAL PROTECTION OF MIGRATORY BIRDS.

TREATIES between the United States and more than a dozen foreign Governments will be necessary, if a plan for international protection of migratory birds, which is embodied in Senate Resolution 25, is to be fully carried out. This resolution was introduced recently by Senator George P. McLean, of Connecticut, and was favorably reported April 9, by the Senate Committee on Foreign Relations. There is every reason to believe that it will soon be passed by the Senate.

John B. Burnham, President of the American Game Protective and Propagation Association, has just returned from Washington where he had favorable interviews with President Wilson and Secretary of State Bryan in regard to this matter. Should the resolution be passed by Congress and receive the endorsement of the President, the principal countries with which it will be necessary to open negotiations are Great Britain, with Canada to the north and insular possessions to the south of us, which harbor many of our migrants at different seasons; France on account of her colonies in the West Indies and in Guiana; Japan, with whom we have had trouble in the past because of the activities of her feather hunters in the Hawaiian Islands; Mexico, Brazil, Argentina, Columbia and Ecuador. There are other countries with less important possessions to the south, or near our colonies in the Pacific. These include Holland and Denmark, the independent countries in the West Indies, and other Republics in South America.

Now that we have given Federal protection to our migratory birds through the Weeks-McLean law, the next step should logically extend this protection in a way that will prevent a few market gunners and feather hunters from destroying the birds that will forever benefit all countries which they visit, if shooting is properly regulated.

### Shady.\*

BY HENRY WELLINGTON WACK.

THERE is no old town like Shady, asleep within blue hills,  
Nor glen that wakes so blithely to the laughter of cool rills;

For it has nor work nor worry, nor market place nor care,  
And one's soul may thrive in candor while its God and grace are there.

There is just one house in Shady, and it's white and very small,

And its mistress is more gracious than beautiful or tall;  
But there's cheer around her hearthstone and there's love within her walls,

And 'tis there that I'll be straying when the woodland smiles and calls.

You may need the city's glamor and invite its din and dust,

And love its brass and tinsel and its heart of stone and rust;

You may even feel the magic of its throbbing urge and life,  
And with greed in modern fashion plunge into its stress and strife.

Then stay you in the city, while I ramble o'er the hills,  
And you may pluck your neighbor's purse while I pluck daffodils;

And when your dust is in a jar, and I am ninety-four,  
I'll wade the brooks of Shady, casting flies for-evermore.

\*Shady is a beautiful little hamlet in Ulster county, New York State, near Woodstock, and has been idealized in an oil painting of the impressionist school by the author, which we have reproduced on our front cover.

### Ticks From the Ship's Clock.

THE Cape Catboat Association has announced that they will not hold races this season north of Marblehead or south of Hull Bay.

SOMEONE has described the New York Yacht Club as Lipton's tease. That seems to us as a bit strong, in matter wherein water plays so important a part.

UNLESS the arrangements are changed again, the New York Y. C. fleet will rendezvous at New London on Tuesday, Aug. 5, late in the afternoon. There will be the usual formalities of holding a meeting of captains on board the flagship Sea Fox.

OFFICIAL entry of the motor boat Tocsam II., W. D. Mulford, owner, has been filed with the regatta committee of the Philadelphia Yachtsmen's Club for the Bermuda race, which starts on June 7 off Race street pier, Philadel-

phia. She will be in direct command of her owner, Mr. Mulford, and will be entered as a representative of the Ocean City Y. C., whose pennant she will fly.

THIRTY new members were admitted to the Kennebec Y. C. at the regular monthly meeting.

### New Rochelle Y. C.

THE New Rochelle Y. C. has at the commencement of the season taken in fifty-five new members, making the present roll number 283. Before the return of the initiation fee on May 7, it is confidently expected that the membership will be increased to over 300.

The club will go in commission on May 4, on which date there will be held the regular quarterly meeting of the members, and there will be a shad dinner at the club house on Harrison Island.

Ground will be broken for a new club house immediately at the close of the yachting season this fall.

### Yachts Change Hands.

THE Holliss Burgess yacht agency has sold the knockabout Virya, owned by J. M. O'Brien, of South Norwalk, Conn., to Elmer F. Smith, of Marion, Mass.; the Massachusetts Bay 18-foot racing sloop La Chica, built for C. H. W. Foster, of Boston, under the name of Piccadilly, to a Boston yachtsman; the Buzzards Bay Herreshoff one-design class 15-foot knockabout Cat's Paw, owned by Henry W. Harris, of Chestnut Hill, Mass., to Morris Gray, Jr., of Chestnut Hill, Mass., and the Hull one-design class knockabout Kid, owned by Lowell A. Mayberry, of Boston, to Edward J. Wynde, of Boston.

### Atlantic Y. C.

THE following appointments for the season of 1913 are: Fleet Captain, Alvah Nickerson; Fleet Surgeon, Charles E. Gilbert, M.D.; Chaplain, Nehemiah Boynton, D.D.; Regatta Committee, Carlos de Zafra, Chairman, Frank P. Currier, Rudolph H. Weber.

J. STUART BLACKTON, Com.

Forest and Stream is the official organ of the American Canoe Association.

### N. Y. C. C. Accepts Canadian Challenge.

THE New York C. C. has accepted the challenge of the Gananoque and Motor Boat Club of Canada to race for the international cup known as the New York Canoe Club international trophy.

This cup has been defended successfully by the American canoes in every contest sailed since it was offered first in 1886, but there has not been a race since 1895. The Gananoque Canoe and Motor Boat Club of Canada has challenged and named Ralph B. Britton as its representative, and the New York C. C. has accepted the challenge. This trophy is for sailing canoes, and must be raced for always under the rules of the New York C. C., no matter where held.

According to the international cup rules the defender must be selected after a series of trial races open to members of all canoe clubs in the United States. The New York C. C., after accepting the challenge, appointed a committee to take charge of the trial races, select the defender and conduct the challenge races. This committee is Louis S. Tiemann, 80 Maiden lane, Chairman; Paul Butler, Robert J. Wilkin, C. Bowyer Vaux, Austin M. Poole, H. Lansing Quick, George P. Douglass and H. Dudley Murphy.

The Atlantic Division of the American Canoe Association is to hold its annual division meet at Pard's Point, Tottenville, Staten Island, June 28 to July 5, and the officers of that division have extended to the New York C. C. an invitation to hold the trial races at this meet, which has been accepted. The trial races will

be probably on July 3, 4 and 5. All canoeists have been invited to enter.

The officers of the Marine and Field Club, off whose grounds several international races have been sailed, have placed their grounds at

the disposal of the New York C. C. for the big races, and these will be sailed July 11, 12 and 14. The series is two out of three races of not less than eight or more than ten miles, and there is a time limit of three hours for each race. The first canoe to cross the finish line is the winner.

### A. C. A. Membership.

NEW MEMBERS PROPOSED.

Atlantic Division.—J. Durbin S. Wood, 47-49 Liberty street, New York city, by F. C. Buchenberger.

Eastern Division.—Henry George Butler, 278 Cranston street, Providence, R. I., by William A. Heath.

NEW MEMBERS ELECTED.

Atlantic Division.—6641, Paul Schwenn, 248 Lawrence avenue, Brooklyn, N. Y.

Western Division.—6642, Gordon A. Van Riper, 227 East Park avenue, Highland Park, Ill.

### California Cork Trees.

THE supervisor of the Angeles National Forest, Mr. Charlton, has begun an experiment on a large scale with a view of determining whether the cork trees that flourish in Spain can be raised in Southern California. He has just reset 1,000 cork trees, each about two feet high, and has planted thousands of cork tree seeds back of San Bernardino.

Mr. Charlton believes that with proper attention and care trees furnishing the cork of commerce can be profitably and successfully raised in this part of the country. Outside of the experiment station at Chico there appears to have been no efforts to raise cork in California.

RALPH B. BRITTON.

Forest and Stream is the official organ of the National Archery Association.

### Olympic Games Archery.

CHICAGO, Ill., April 14.—*Editor Forest and Stream:* Plans have been made for the biggest athletic event in the history of the United States. The American Olympic games will be held in Chicago next June 28 to July 6, inclusive.

Partial list of officers of the American Olympic Games Association are: Honorary President, Harold F. McCormick; President, Lawrence Heyworth; Vice-Presidents, Everett C. Brown, A. A. Stagg and others; Director-General, Everett C. Brown (Mr. Brown had charge of the United States contingent at Stockholm last year); Treasurer, Frederick H. Rawson; Secretary, Charles E. Bartley.

Archery will have a place on the program. The number of days given to it, and the program to be shot, have not yet been selected, but will be announced in due time.

The Olympic Games Archery Committee are: Dr. Edward B. Weston, Chairman, 511 Peoples Gas Building; Homer S. Taylor, care of Franklin MacVeagh & Co.; Dr. Carver Williams, Auditorium Building; James H. Pendry, care of Western Union Telegraph Co.; Homer W. Bishop, Insurance Exchange Building; Herman L. Walker, Fine Arts Building; Percival S. Fletcher, Chicago Stock Exchange Building.

Will you probably attend the meeting? If it is impossible, urge others to come.

Please let me know how many archers in your vicinity will probably attend?

A meeting at the time mentioned will not interfere with the National Meeting in Boston under any circumstances.

Those who plan to go to Boston will go anyway, and should they come here first, it will be good practice for the meet to come later.

Please write me at your earliest convenience, so that we may know how many contestants to expect.

Time is short, and we must begin preparations at once.

We need the help and good will of all in this work for archery. EDWARD B. WESON.

### The Duff Arrow.

THE Duff arrow is a replica in sterling silver of a 25-inch lady's target arrow. It was presented to the National Archery Association by James Duff, to be awarded each year to the novice making the best score in the American round at the national tournament. The first competition for it took place in 1910, when it was won by G. L. Nichols. In 1911 it was won by Dr. Elmer, and in 1912 by Ellis Spear, Jr. In those years the interpretation of the word "novice" presented no difficulties, as all of the men who were shooting for the first time in the national meeting had had no chance to shoot in any other. This year and henceforward it may be different, and a more exact definition of eligibility to compete for the arrow seems de-

sirable. The Olympic championships at Chicago and the Eastern championships at Wayne are certainly tournaments, and archers competing in them can scarcely be called novices afterward. Yet it is probable that the men who by dint of hard work during the past year have fitted themselves to try with credit for this novice's trophy will shoot at either of these two places. Inasmuch as Mr. Duff gave the arrow and set the terms for its award, let us call on him for an opinion as how best to provide for these changed conditions.

### Targets.

BY ROBERT P. ELMER.

WHILE shooting in my first tournament at Chicago in 1911, I was surprised on one occasion to see three arrows hit my target simultaneously. This of course was due to the fact that the archers on either side of me had at the same time mistaken my target for theirs and had fired at it with correct aim, but with loss of score. Last year at Boston a similar mistake was made more than once, though by only one person at a time. Indeed, it is a surprisingly easy mistake to make. The English have sought to eliminate this source of annoyance by having painted on each alternate target a round black spot at 12 o'clock white. This, however, creates a slight element of unfairness because in looking at a spotted target one can mentally project a line through the spot and the gold and thus assist himself to find his point of aim. In my opinion an easy and impartial way to overcome the difficulty is to make the outmost line bounding the white of a different color on each target and wide enough to be easily seen. The Wayne archers have had targets rimmed with red, blue, yellow, green or black and no confusion has ever arisen in their use.

With the others who have spoken on the subject in FOREST AND STREAM I heartily prefer canvas facings to those of any other material. Most people use oilcloth. This is easily torn, and in bright sunlight will often appear as a reflector of dazzling brilliancy on which the rings are wholly indistinguishable. Linoleum is used by a few, and is open to the same objections as oilcloth if the shiny side is used. If the rough back is painted in dull finish colors, it makes an excellent face. The superiority of canvas lies in its total lack of luster and in its very great durability. Rebounds practically never occur from linoleum nor canvas, but from soft oilcloth are fairly frequent. For my personal service I use the heaviest sail canvas of two pieces sewed down the middle. For tournament or club work this grade of material is unnecessarily expensive, and may be replaced by light canvas fifty-two inches wide.

One of our archers who is an artist of international reputation painted a target face in such a way that the eye would naturally focus

on the center and not be attracted by the bright colors around it. The gold was brilliant, and the other rings of pale neutral tones that really were clearly defined for accuracy of scoring, but at a distance seemed to merge into one shade. Several archers shot at it, but so far as could be seen the effect on their scores was not appreciable.

When a new target is received the usual custom is to pass a loop of stout cord through one or two turns of the whipping and thereby to hang the target up. This is bad practice because in time after some of the strings have been cut by arrows, the target will sag, becoming slightly elliptical and allowing the straw to separate between the bundles sufficiently to let a swift arrow pass through. The best way is to sew a piece of rope around the edge of the target back for about three-quarters of the circumference and tie the ends together at a point behind the upper black. In this way the weight of the target is supported at the bottom, and if there be any sagging, it tends to greater compactness.

It is difficult to put a target on the stand by one's self. This can be facilitated by the use of a rope and small pulley, care being taken that the pulley does not show above the target where a shaft might break against it.

### Pittsburgh Scores.

PITTSBURGH, Pa., April 15.—*Editor Forest and Stream:* About the time the novice in archery begins to think himself "some pumpkins," and to have visions of making scores of "Bryantorendtorfic" proportions, watch him. He is due for a slump. Saturday was ideal for archery and had anyone suggested to Mr. Jiles or the writer that either of them would score lower than 86-460 in the American round or under 400 in the York, that individual would have had to cover money.

Mr. Holmes and Mr. Wolf have not reached the big-head stage, although the former has been doing some very consistent work, as his score, which put him in first place in the American round, will testify:

York round, 72 arrows at 100yds., 48 at 80yds. and 24 at 60yds.:

	100Yds.	80Yds.	60Yds.
Jas. S. Jiles .....	16 60	23 99	21 89 60 242
O. L. Hertig .....	43 161	32 118	20 92 95 371

After the 100 yards the writer had fond hopes of making a 500 score, but the slump microbe was at work in his system, resulting in a poor score at 80 yards and a still poorer one at 60 yards.

American round, 90 arrows:

W. J. Holmes.....	85 471	D. A. Wolf.....	52 188
O. L. Hertig .....	84 412	H. Amidick .....	51 161
J. S. Jiles.....	77 377		

A friendly and observing spectator, who had often visited our range, commented on the comparatively poor showing all of us, Holmes excepted, were making, and was told to come to

Boston with us in August and see what a real slump looked like.

Our work on the range is the chief cause of poor shooting, and during the first warm days of spring the temptation to overdo the thing is very strong; however, by the time the new peas are in the pod and the cucumber and head lettuce are crisp in their beds, we will have learned moderation. I must confess, Mr. Editor, I am mighty glad spring is here, and the sentiment herein expressed is the nearest approach to vernal poetry I have ever been guilty of, and it no doubt is the result of a feeling akin in that which prompts the ready rhymester to mold his overflowing vocabulary into joyful verse.

Hark! do you hear that robin?

O. L. HERTIG.

**An Invitation Shoot.**

WAYNE, Pa., April 19.—*Editor Forest and Stream:* Responding to the invitation of the Newton archers, two members of the Wayne archers shot a double American round this afternoon. The wind was blowing with great violence, which is a partial excuse for the indifferant scores. Late in the afternoon it slacked up so that the second rounds were better than the first.

	60Yds.		50Yds.		40Yds.		Total
T. Truxton Hare ..	11	41	19	77	20	90	50 208
	15	77	18	76	23	105	56 258
	26	118	37	153	43	195	106 466
Dr. Elmer .....	12	54	16	80	26	120	54 254
	20	86	28	152	29	169	77 407
	32	140	44	232	55	289	131 661

ROBERT P. ELMER.

**Long Flight Shots.**

CHICAGO, Ill., April 15.—*Editor Forest and Stream:* Some time ago there was a statement in your archery department from a St. Louis man to the effect that he had many times made flight shots of 300 yards.

This is better than any record made at our national tournaments, but does not speak well for the cast of a yew bow of eighty-four pounds' pull.

Further on he states that he gets 225 yards with a fifty-two-pound bow, but cannot beat 250 yards with one weighing seventy-six pounds. Either there is something wrong with those bows or the man does not know how to handle them.

I have repeatedly made 220 yards with a home-made bow of rock elm of only forty-two pounds' pull, and have made 240 yards with one of Duff's lemonwood bows that weighed forty-eight pounds.

An unfooted pine arrow was used, thirty inches long, weighing almost 300 grains. It had a taper pile or point, and the feathers were of the regular size and shape. G. L. NICHOLS.

**Scottish-American Archers of N. J.**

JERSEY CITY, N. J., April 19.—*Editor Forest and Stream:* Only six of the above turned out at the range to take part in the mail match arranged by the Newton archers, and one of the six was John McOwan, who tried his prentice hand for the first time under adverse conditions, a miniature gale blowing across the range, and despite ropes and pegs, laying the targets flat

on several occasions. To the writer it seemed not so much a question of hitting the target as keeping on one's feet. However, a single American round was shot, and the magnificent totals piled up. If any member of the above body sees this in print, I'll be a fair subject for Judge Lynch, as the general opinion after the match was that it was a shame to expose our inability to the light of day.

J. Duff .....	84	375	Wm. McOwan ...	42	196
G. Milne .....	50	289	*J. McOwan .....	27	109
J. Cleland .....	50	220	†R. McNeil .....	25	84

\*Shot for first time.  
†Shot only 40yds., arrived late.

JOHN M. CLELAND, Sec'y.

**To Get a Free Cast.**

CHICAGO, Ill., April 6.—*Editor Forest and Stream:* In reference to the article by Mr. Rendtorff in a recent issue, in which he assumes that the flight of the arrow is held in the line of original aim because there is an equalizing

Handle, from front. Bow, unstrung, from front. Bow, strung, from left side.

side movement of the bow hand, I cannot agree with him in that conclusion.

I admit that the arrow may bend slightly as it is about to leave the string in an effort to follow the original angle of projection. The string probably has a tendency to draw over a little out of a true line to follow the shaft, and there is a possibility that there may be a similar slight movement of the limbs of the bow. Those movements would be too small and fast for the eye to perceive, but I am quite certain that my own hand has no perceptible compensating motion in any direction. Its position after the arrow has left the bow is the same as when the loose is made. If I forget to hold my bow hand firmly, the usual result is a wild shot; just as likely to go to the right as to the left.

Of course there are some archers who let the bow hand give a little and follow the arrow. If this movement is directly in the line of the arrow's flight, it ought to cause no side de-

viation, but this forward movement will have the effect of altering the elevation of the arrow unless it is exactly the same each time, as the more firmly the bow is held, the sharper will be the cast.

So far as a mechanical release is concerned I should not care to venture an opinion unless familiar with the working details of the apparatus used. I am engaged at present on plans for a mechanically operated bow for use in testing my arrows, and find the matter of a satisfactory release is not a problem to be solved without considerable attention to details.

I have a two-piece jointed bow with an off-set handle, so that the string pulls clear. To have just the proper line of clearance, a line perpendicular with the bow should pass from the string to a point three-sixteenth of an inch (one-half the thickness of the shaft) to the left of the bow at the handle. Such a condition ought to allow a free cast, except for the rub of the feathers against the bow. In actual test the arrow goes four feet to the right in sixty yards. I had to build out the left side of the handle about one-quarter inch to get the arrows to shoot approximately in a correct line. Can someone explain why that should be?

I inclose some photos of the bow to which I refer. It was made about the year 1877 and used in the first national tournament. It is made of Texas osage. Now it has become badly cracked, but when in use it pulled forty-eight pounds.

There is another point not yet mentioned that I believe has a strong influence on the flight of the shaft. That is the amount of rotation given to the arrow by the feathers. At one time I feathered a number of arrows in a mechanical device for that purpose, and gave a considerable set or twist to the feathers, not putting them on parallel to the shafts. This caused so strong a rotation and consequent drift that I had to hold over half the width of the target to the left at fifty yards. The set grouped very well. Most arrows I have seen are feathered to rotate to the right. It is to this fact that I should lay the proper lining up of the arrow rather than to any involuntary side shift of the bow hand.

Anyone can make a test by shooting an arrow feathered so that it rotates to the left along with a set that rotates in the other direction. G. L. NICHOLS.

**Congratulatory.**

NEW ORLEANS, La., April 5.—*Editor Forest and Stream:* FOREST AND STREAM comes every week, and I certainly enjoy it. I do not believe there is another outdoor publication which gets the average—not the highbrow—but the regular American so close to the healthy, enjoyable features of the outdoors as does FOREST AND STREAM, and I read all of them.

H. H. DUNN.

FORT DODGE, Iowa, April 8.—*Editor Forest and Stream:* I have not received the number of April 5. Your paper usually arrives on Saturday of the week of publication, but mine is not here yet. Will you send me one? I can't afford to miss a single number.

C. A. BRYANT.

# TRAP SHOOTING

Forest and Stream is an Honorary Member of the Interstate Association for the Promotion of Trapshooting.

## Fixtures.

If you want your shoot to be announced here, send a notice like the following:

### REGISTERED TOURNAMENTS.

- April 26.—Pottstown (Pa.) G. C. C. A. Fries, Sec'y.  
 April 29.—Guernsey, Ia.—Du Pont G. C. J. W. Dobbins, Pres.

**DRIVERS AND TWISTERS.**

Yale Gun Club will take a fall out of Piping Rock Club to-day. Great will be the fall thereof—I think.

Here is Holland Gun Club, Batavia, N. Y., program for season of 1913: Saturday, April 12; Saturday, May 10; and June 14, at 1 o'clock; Friday, July 4, at 9 o'clock; Wednesday, Aug. 13, all day (eleventh annual tournament. Saturday, Sept. 13, at 1 o'clock; Thursday, Nov. 27, at 9 o'clock. Percentage totals and must shoot in five of the programs to qualify. J. B. Knickerbocker is President and Chas. W. Gardiner, Secretary.

The Hudson Valley Rod and Gun Club, Inc., Glens Falls, N. Y., will open the season with an afternoon shoot on the old club grounds on Saturday, April 26. Sweeps optional; targets, 1 cent each. Special events if time permits. Shells for sale on grounds. The club grounds are located on the main line of the trolley road between Glens Falls and Hudson Falls. All cars stop at the grounds. J. A. Norton, is Secretary.

W. G. BEECROFT.

**Siwanoy Country Club.**

MT. VERNON, N. Y., April 19.—Poetic weather, perfect light, heavy, irregular breeze, green things growing. Fifteen members and guests enjoyed the extra jump taken by the targets in the breeze. L. G. Bond won the first leg on the Stevens handicap trophy with a total score of 24. E. L. Haas and M. R. Guggenheim tied on the second leg with full scores of 25 each. On shoot-off button was won by Haas. Total high points to date 112 each for Bond, Haas and Guggenheim.

G. L. Yates captured the first leg on the Du Pont handicap trophy with a full score of 25, and C. H. Hadlock and L. G. Bond tied with full scores on the second leg. Total high points to date: Hadlock 71, H. J. Smith 68.

High gun scratch was won by M. R. Guggenheim with 82 out of 100. Mr. and Mrs. F. F. Rodgers, of Stamford, were guests. Scores:

Stevens handicap trophy, 50 targets:

*Chas Gaskill.....	13		

\*Indicates new members, who have never shot at traps previous to this time. R. W. HOPKINS.

**Manhasset Bay Y. C.**

PORT WASHINGTON, L. I., April 20.—Smith, a mighty man is he, and when he shoots he lands, but then what's the use, as Alker says, if you like my performance go round and knock at every trapshooter's door. If you don't like it, don't knock. And so it goes—one day up, next day down. Smith, as we started to rhyme copped every event to-day, and he didn't have to shoot such a much at that, but the wind, she warn't no respecter of pussons—she howled through the inlet likell, and put cute little notions into the bellies of the scalers that lent pain, not to the bellies, but to the shooters. The scores:

Trophy shoot, scratch, 10 birds:			
D E Smith.....	6	C M Gould.....	4
E A Sierck.....	5	F C Richards.....	4

# Southwestern Handicap

Adds to Year's Victories With  
*Remington-UMC* Guns and Shells

First Big Interstate Handicap of 1913 Pays Another Tribute to the "Perfect Shooting Combination."

## A Few of the Many *Remington-UMC* Winnings:

**Preliminary Handicap**—Won by R. B. Barnes, Bay City, Texas, 96 x 100, shooting a *Remington-UMC* Pump Gun.

**High Professional on All Singles**—Won by Thomas A. Marshall of Keithsburg, Ill. Mr. Marshall was also high professional in the Preliminary Handicap, 94 x 100, and tied on all targets shot at for entire tournament, shooting *Remington-UMC* Gun and the Speed Shells in all events.

**High Professional on Doubles**—Won by Wm. H. Heer, with *Remington-UMC* Gun and Arrow Speed Shells.

**Southwestern Handicap**—Tied for by Robert Sorenson, 92 x 100, shooting *Remington-UMC* Autoloading Shotgun and Arrow Speed Shells. Mr. Sorenson is a nineteen year old boy and the Southwestern was his first shoot.

**Long Run of Tournament**—Won by Homer Clark, 134 straight, with *Remington-UMC* Pump Gun.

You May Depend Upon *Remington-UMC* — The Perfect Shooting Combination — For Higher Scores at the Traps, Better Field Averages.

### Ridgefield Gun and Game Club.

RIDGEFIELD, Conn., April 12.—Another lusty infant has been added to the trapshooting fraternity, when the Ridgefield Gun and Game Club was launched to-day with a flag-raising and tournament. Two charming young ladies, Miss Jessie Thorpe and Miss Bolles, christened the ship by breaking cartridges over her "bow."

The grounds are picturesquely located on a hill overlooking the country for miles around. The club has a splendid house and two traps, which make the range the equal of any in the country. Fifty-five marksmen came out to-day. The conditions were bad for high scores.

Some of the best amateurs blew in from Greenwich, Bethel, Mt. Vernon, Hartford, and Danbury. The members of the Ridgefield club showed their appreciation in many ways of the interest taken by the members of the Pahquioque Rod and Gun Club, of this city, in their shoot, about thirty members of the local club attending. George Hall, of the Pahquioque Gun Club, acted as cashier and E. H. Bailey kept the shoot going outside, being assisted by some of the members of the Ridgefield club and the professionals.

The feature of the day was the presentation of a large American flag by the Pahquioque Rod and Gun Club. The presentation was made by President W. S. Thompson, of Pahquioque Rod and Gun Club, the response being given by Dr. Mansfield, of Ridgefield club.

In the first open event of 30 targets, W. G. Olmstead won first with 27. L. Brush took second. F. F. Rogers made third.

In the handicap shoot at 30 targets there were ten who had perfect scores and six prizes awarded. R. H. Bennett was first, L. Crossy second and James T. Bowman third.

In the open shoot for 15 targets, L. Brush was first, W. G. Olmstead second, and H. M. Judd third.

The winners of high averages were L. Brush, of Greenwich, first; W. G. Olmstead, of this city, second; Keet Placon, of this city, third.

Jessie Thorpe shot a challenge match with E. H. Bailey at 25 targets and trounced him properly.

The scores:

Open shoot, 75 targets:	
L. Brush .....	65

### Rochester Gun Club.

ROCHESTER, Mich., April 15.—The Rochester Gun Club held its opening shoot April 13. The club has just been organized and has forty-seven members, and the grounds are located twenty-six miles from Detroit. Visiting shooters were present from Chicago, Detroit, Grand Rapids, Birmingham, Oxford, Orion and Pontiac. Sixty shooters participated, and over 5,000 rocks were thrown. The shooting was most excellent, considering the strong wind that blew the entire day. Mrs. Vogel's shooting was easily the feature of the day. Some of the scores:

	Shot at.	Broke.	Per Cent.
Mrs. Vogel .....	100	84	84
Stonehouse .....	95	79	83
Braddock .....	90	115	78
McIntosh .....	100	78	78

Savigny .....	130	63	50

### Holland Gun Club.

BATAVIA, N. Y., April 12.—Evidently the boys haven't got the habit yet, for only five turned out for our opening shoot. Brugmann was trying out a new gun. If it improves any on coming trials, we will bar him from the pools, for 90 per cent. on 150 targets is a little fast for us. We tied him for the Du Pont picture, but he won on the shoot-off. We also tied him for the regular program trophy and had yellow streaks in the shoot-off. The Du Pont trophy he won with 25 straight. We're going to put a spike in that new gun. Scores follow:

Targets:	25	15	15	20	25	25	25
Brugmann .....	22	14	14	15	25	22	23
Gardiner .....	21	12	14	17	18		
Childs .....	7	5	8	8	12		
Owens .....	7	8	9	5			
Kinney .....	19	9	12	13	18		

CHAS. W. GARDINER, Sec'y.

### Hunters Club.

ONONDAGA, N. Y., April 12.—Thirty-three of the most expert marksmen in Syracuse and Central New York took fire at the clay pigeons at the shoot of the Hunters' Club of Onondaga on their ranges at Onondaga Lake to-day. Five events aside from the strings of practice targets, held the attention of the crack shots during almost the entire day. Under weather conditions which were almost ideal, many good scores were registered.

The banner event of the afternoon was the battle for honors in the Class B division. Dr. Sanford won the medal offered by the club with 42 out of 50. J. M. Sullivan was second with 41.

"Germany" Matt Windhausen took the prize in the Du Pont trophy match with 25 straight. Windhausen was high gun for the day with 102 out of 125.

O. E. Carpenter carried off his share of the spoils of war in the powdery battle over the ownership of the Stevens medal. "Carp." finally won out, leaving Dan Lillis and George Phillip to fight it out to see which should claim second honors. Carpenter broke 24, and Lillis and Phillip each smashed 23.

The doubles shoot was won by Al Meagher with 20 out of 12 pairs. The scores:

	1	2	3	4	5	6	Shot at.	Broke.
A. Davenport .....	16	19	15	23			115	83
B. Auer .....	16	18		11			65	45

O. E. Carpenter .....	24		17				50	41
G. Shane .....	14	15					50	29
E. Auer .....		33					60	33
Jutton .....	19						35	10

Events Nos. 1 and 2 were Class B event; No. 3, Du Pont trophy; No. 4, Stevens trophy; No. 5, practice targets; No. 6, doubles.

### Pennsylvania State Sportsmen's Association.

THE program of the twenty-third annual tournament at clay pigeons of the Pennsylvania State Sportsmen's Association, which will be held at York, May 12-16, under auspices of the York City Gun Club differs in many respects from the programs the shooters of Pennsylvania have been accustomed to. But the Association's program committee and the tournament committee of the York Club are confident that the shooters of the State, generally speaking, will indorse the innovation by attending in large numbers.

In addition to adopting the Squier money-back system, the program committee has decided to classify the shooters in the matter of dividing the sweepstakes. The sweepstake winners will be divided into four classes—A, B, C, and D—and the sweepstakes will then be divided by three moneys, 5, 3, and 2, Rose system, in each class. Each day's program will consist of 150 targets, entrance \$11, including targets and \$1 for the Squier money-back purse, leaving \$7 to be divided. Calculating on a basis of 100 entries, there will be \$70 in the purse in each event. If there are twenty 88 per cent. shooters, the purse in Class A will amount of \$14; if there are forty 80 per cent. shooters, the purse in Class B will amount to \$28; if there are thirty 75 per cent. shooters, the purse in Class C will amount to \$21, and if there are ten shooters under 75 per cent., the purse in Class D will amount to \$7.

Each contestant will be required to file a certificate of average with the program committee before his entry will be accepted.

### Enola Sportsmen's A. A.

ENOLA, Pa., April 13.—For a day when old Boreas had been elected premier, the scores to-day were not so rotten. Hoover tore up 210 out of 275; Martin 205 out of 250; Cumberland 186 out of 195, and others in proportion. Twenty-two crackers bored up the ozone with much joy and No. 8s. Scores:

	Shot at.	Broke		Shot at.	Broke
Hoover .....	275	210	Kessler .....	110	91
Martin .....	250	205	Earley .....	100	82
R. Smith .....	240	195	Myers .....	100	77
Seidel .....	225	197	Sweger .....	90	64
Miller .....	200	171	Ramsay .....	75	63
Cumberland .....	195	186	Wagner .....	70	55
Kreider .....	155	123	Shank .....	50	39

Wilson .....	115	103	Wills .....	10	8

C. R. ROCKEY, Sec'y.

FLAG RAISING AT RIDGEFIELD, CONN.

**Brewster G. C.**

BREWSTER, O., April 17.—The Brewster Gun Club held a very interesting event this afternoon. There were nineteen shooters present. One of the events was a 50-bird shoot for the supper. Two of the club members were chosen as captains, and they chose members of their respective teams alternately. J. Christman was the captain of the winning team, and D. Mossop was the captain of the losing team. The scores of the 50-bird event were as follows:

Winning Team.		Losing Team.	
J Christman, capt., 39	D Mossop, capt., 25	A Glick ..... 39	W Glick ..... 43
A Glick ..... 39	W Glick ..... 43	B Glick ..... 33	A Arnold ..... 30
B Glick ..... 33	A Arnold ..... 30	C Oberlin ..... 25	A Burns ..... 29
C Oberlin ..... 25	A Burns ..... 29	W Spangler ..... 43-179	C Engleman ..... 37-164

The real big score of the day was that made by W. Nutting, who broke 21 out of 45 birds. Mr. Nutting is a one-arm shooter. The amputation of his right arm has made it necessary for him to use his left arm, and he certainly does some pretty shooting. Scores for the full event follow:

Shot at. Broke		Shot at. Broke	
B Glick ..... 125 86	W Glick ..... 60 49	A Burns ..... 119 80	A Arnold ..... 60 33
A Burns ..... 119 80	A Arnold ..... 60 33	D Mossop ..... 110 56	J Lightell ..... 45 16
D Mossop ..... 110 56	J Lightell ..... 45 16	J Christman ..... 94 74	R Gage ..... 45 14
J Christman ..... 94 74	R Gage ..... 45 14	P Cabbut ..... 80 80	W Nutting ..... 45 21
P Cabbut ..... 80 80	W Nutting ..... 45 21	A Glick ..... 75 57	H Harr ..... 35 11
A Glick ..... 75 57	H Harr ..... 35 11	C Engleman ..... 75 57	Allen ..... 25 16
C Engleman ..... 75 57	Allen ..... 25 16	W Spangler ..... 75 63	R Gruber ..... 25 13
W Spangler ..... 75 63	R Gruber ..... 25 13	C Oberlin ..... 75 45	W Corbin ..... 10 2
C Oberlin ..... 75 45	W Corbin ..... 10 2	A. J. BURNS, Sec'y.	

**Pahquioque Rod and Gun Club.**

BRIDGEPORT, Conn., April 19.—Third leg for Stevens' trophy was held at Tamarack range to-day. Nine shooters made straight scores with the handicap added targets. On the first 25, Hal Sanford and E. Vesey were high men with 24 each. W. A. Gregory, E. H. Bailey and W. S. Thompson followed with 23. C. W. Stevens and C. Howard Daley bagged 22. Dr. Paul U. Sunderland took 21, and Keet Plancon 20.

On the last string of 25, Hal Sanford, C. W. Stevens and Byron Crane made straight scores. E. Vesey took 24, C. Howard Daley 23, E. H. Bailey, W. S. Thompson, Dr. Paul U. Sunderland and James T. Bowman made each a score of 22. The averages made by the shooters were among the highest in the records of the club.

In the scratch shooting Hal Sanford won with 49 out of 50, and also broke 97 out of 100. E. Vesey fol-

lowed with 48. C. Stevens and B. Crane bagged 47. E. H. Bailey, W. A. Gregory, W. S. Thompson and C. Howard Daley made 45. On the 100, C. Howard Daley broke 94, while W. A. Gregory potted 91 and W. S. Thompson 88. James T. Bowman, who has shot clays only three times, broke 20 without a miss, and finished with 22 out of 25. The scores:

Shoot, 50 targets, handicap:			
W A Gregory ..... 0 45	B Crane ..... 5 50	C H Daley ..... 6 50	R Downs ..... 15 50
C W Stevens ..... 0 47	E H Bailey ..... 11 50	Hal Sanford ..... 2 50	K Plancon ..... 7 50
E Vesey ..... 4 50	H Ray Bailey ..... 15 48	W S Thompson ..... 1 46	H Meeker ..... 15 48
Dr Sunderland ..... 7 50	J Bowman ..... 15 50		

Shoot, 100 targets:				
W A Gregory ..... 137	Dr Sunderland ..... 138	C H Daley ..... 135	R Downs ..... 131	
C W Stevens ..... 141	K Plancon ..... 142	Hal Sanford ..... 143	H Ray Bailey ..... 138	
E Vesey ..... 141	H Meeker ..... 135	W S Thompson ..... 140		

**Cincinnati Gun Club.**

THINGS were doing at the grounds on April 20, after the let-up enforced by the flood, and thirteen shooters took part in the several events. Among the visitors were C. O. LeCompte, of Asheville, N. C., and W. R. Randall (The Kid), of Mason, Ohio. For the first time in a number of years, Bleh took his place on the firing line, and showed that he had not forgotten how, although his score was not up to the old-time mark.

The feature of the afternoon was the five-men team match at 50 targets per man. The first round resulted in a tie; in the second string Clark's team got a lead of 2 targets, but in the final round at 20 targets, Schreck's team walked away from their opponents, going out with a lead of 9 targets. High individual scores were made by Clark and Rocky, team mates, who broke 44 each.

In a match at 25 targets per man, between the same teams, Schreck's team was again the winner, with 2 targets to the good. Clark was high man with 25, the only straight score made.

In the practice events Rocky and LeCompte tied for high score on 95 out of 110. Butts was second with 86.

Several of the members will go to Maysville, Ky., on the 24th, to enter the contest for the Kentucky State challenge cup, not held by Wm. H. Hall, of that place, who won it last fall by defeating Thomas H. Clay, Jr., of Paris. The second match in the series of inter-city team contests, which was scheduled for Springfield on April 2, will probably be postponed a week or more,

on account of the conditions caused by the flood in Dayton.

**Smith Gun Club.**

NEWARK, N. J., April 19.—Fifteen marksmen managed to break more than 2,500 birds to-day. High gun went to ex-champion J. Thompson. C. T. Day broke a clean 25 straight. The following scores were made:

C. T. Day, Jr., 24, 25, 22, 21; Richard A. Hensler, 23, 19, 18, 22, 18, 21, 22; W. Hassinger, 20, 22, 21, 22, 21, 23, 20, 22; B. M. Shanley, Jr., 23, 23, 23, 21, 20, 21, 21, 23, 22, 22; T. Pryor, 18, 14; W. H. Diepenhorst, 0, 19, 19, 21, 21, 20, 21, 22, 19; C. Von Lengerke, 22, 18, 19, 22, 17, 15, 21; J. C. Weiler, 20, 18, 23, 22; T. Parcels, 16, 17, 19, 16; H. Hassinger, 14, 19, 18, 15; D. Spencer, 21, 12, 18, 18, 16; Dr. Moeller, 14, 17, 19, 20, 19; George Ohls, Jr., 21, 21, 15, 20, 19, 19; J. Thompson, 20, 23, 24, 24, 23, 21, 23, 23; H. Higgs, 18, 21, 20.

Instead of May 6, the match between Charles T. Day, Day, Jr., of the Smith Gun Club, and E. Von Lengerke, of the Orange Gun Club, for the State amateur championship cup, will be shot off over the Orange Gun Club traps on April 26.

# The Southwestern Handicap Won With A **WINCHESTER** Repeating Shotgun

H. R. Bosley of Dallas, Texas, shooting a Winchester Repeating Shotgun, won the Southwestern Handicap with a score of 92 x 100—19 x 20 and 18 x 20 in the shoot-off.

Nick Arie of Houston, Texas, an amateur, shooting a Winchester Repeating Shotgun, won High General Average for the tournament with a score of 560 x 600, and High Average Over All on 16-yard targets with a score of 340 x 350.

R. H. Connerly, who tied with one other shooter, tied Mr. Bosley on 92 targets and was runner-up in the shoot-off, shot Winchester "Leader" Shells and a Winchester Repeating Shotgun.

W. R. Crosby, shooting Winchester "Leader" Shells, and J. S. Day, shooting a Winchester Repeating Shotgun, tied for High Professional Average on the 16-yard targets, their scores being 339 x 350.

## As Usual, W Goods Win The Big Honors

"steel where steel belongs"

Peters Shells

WIN SOUTHWESTERN HANDICAP

The P brand was the "whole cheese" at the Inter-State Association's First Southwestern Handicap Tournament, San Antonio, April 8-10, winning practically all the honors.

SOUTHWESTERN HANDICAP, won by H. R. Bosley, 19 yards, score 92 ex 100

Mr. Bosley tied with two others and won in the shoot-off.

PRELIMINARY HANDICAP, won by R. B. Barnes, 18 yards, score 96 ex 100

HIGH PROFESSIONAL AVERAGE, J. S. Day (tie), - - score 339 ex 350

SECOND HIGH AMATEUR AVERAGE, Barton Lewis, - score 334 ex 350

HIGH AMATEUR AVERAGE, April 11, Barton Lewis, - score 195 ex 200

At New Orleans, April 15-16, HIGH AMATEUR AVERAGE, Barton Lewis, - score 387 ex 400

Peters SHELLS demonstrate their superiority in this, the first big tournament of the season. Trap shooters are wise to the fact that the P brand of shells gives them a "hunch" in any race. Insist on having "steel where steel belongs."

THE PETERS CARTRIDGE COMPANY, CINCINNATI, OHIO

NEW YORK: 98 Chambers St., T. H. Keller, Manager.

SAN FRANCISCO: 608-612 Howard St., J. S. French, Manager.

NEW ORLEANS: 321 Magazine St., Lee Omohundro, Manager.

City Park Gun Club.

NEW ORLEANS, La., April 16.—Bart Lewis and Geo. W. Maxwell won high amateur and professional averages at the three-day tournament of City Park Gun Club finished here to-day.

Guy Macmurdo, who last year won the amateur championship of Louisiana, defeated all of the other Louisiana amateurs in a 50-bird race for the championship. He broke 47 out of 50, and W. W. Cocke took second with 46.

An unusual feature of this race was that by beating Mr. Cocke by the one bird in this match, Macmurdo evened up with him exactly on the total for the entire three days. By doing this, too, Macmurdo and Cocke tied for the third high amateur average, which was won by Bart Lewis, the sensational shooter from Sangamon county, Ill., and in which John Livingston of Springville, Ala., was second.

With Maxwell taking the high average among the professionals, W. R. Crosby was second and H. D. Gibbs, of Union City, Tenn., was third.

The shooting Wednesday was the best of the tournament. All conditions were favorable; the weather was just right, bright and warm, and little breeze was blowing to make the flying "birds" do erratic "stunts" in the air. As a result the averages were considerably better in practically every case than were those of either Monday or Tuesday, and the races were closer.

The shooting of Maxwell and Lewis, of course, provided the features of the day, for both put up an article of marksmanship that has seldom been seen over a local range. The idea of Mr. Maxwell, with but one arm, being able to outshoot such experts as "Big Bill" Crosby, "Pop" Heikes, Jim Day, Walter Huff, Ben Schwartz, and the like, seemed almost unheard of, yet this same Maxwell has done this very thing each day of the matches.

Lewis broke 95 45 of the 500 targets that he shot at in the final two days. His record was 479 out of 500.

The match for State championship was the feature event of the tournament for the amateurs of Louisiana, and provided an exciting finish. The strongest contenders were Macmurdo and Cocke. The event consisted of the final 50 birds shot at by the amateurs during the day. Previous to the beginning of this race, Cocke had led Macmurdo during the day's shoot by one bird, and until the race was half over it appeared that he would maintain this lead. Finally he dropped one, however, and a moment later, Macmurdo did likewise. Then both missed again, and once again. Still Cocke had the lead, though they were even in the title race. Shot after shot was made successfully until Cocke overlooked something on a left-quartering bird, and Macmurdo broke straight to the end, and won and tied for the day's average with his competitor.

The tournament was one of the most successful ever held in this city. The quality of the shooting was far better than usual, and the shooters comprised one of the greatest squads ever seen here. Everything moved smoothly, owing to the unceasing efforts of Capt. J. M. Lionnet and Acting Secretary Arthur Saucier, assisted by Sag Harris, the veteran clerk of shooting

tournaments. The shooters, too, were highly pleased with their treatment here, and all promised to come back as soon as they were notified of another shoot, or sooner, if possible. Ten States were represented, including all of the Southern States as well as Nebraska, Kansas, Illinois and Ohio.

There were 21,840 targets thrown during the regular program:

PRELIMINARY.

The total scores of each of the contestants on Monday, 200 targets per man, were as follows:

Table with 2 columns of names and scores for preliminary tournament.

Professionals:

Table with 2 columns of names and scores for professionals.

Scores for the second and third day:

Table with 4 columns of names, 1st day, 2d day, and 3d day scores.

Professionals:

Table with 2 columns of names and scores for professionals.

High professional averages for the meet, possible 500: First, George W. Maxwell, 390; second, W. R. Crosby, Winchester, 387; third, H. D. Gibbs, U. M. C., 380. High amateur averages for the meet, possible 500: First, Bart Lewis, Auburn, Ill., 479; second, J. R. Livingston, 467; third, W. W. Cocke, T. M. MacMurdo (tie), 451.

Independent G. C.

EASTON, Pa., April 19.—The Independent Gun Club held the first of a series of four shoots for the J. Stevens trophy to-day. Maurer and Ivey were tie for

high with a total of 48 out of 50 targets. Maurer and Cross also shot a match for the club's challenge trophy. Maurer won the cup with a score of 64, while Cross was only able to get 54 out of his 75. Heil challenged the winner to shoot for the cup. The match will be shot at the next regular shoot, May 17. The scores of to-day's shoot follow:

Table with 2 columns of names and scores for to-day's shoot.

Event No. 1 was for the Stevens trophy, handicaps included. Event No. 3 was for challenge trophy.

W. R. IVEY, Sec'y.

Roanoke Gun Club.

ROANOKE, Va., April 19.—The weekly trophies offered by the club were won by the following members: Scratch Class—S. C. Atkinson first; P. T. Jamison second.

Class A—Howard Holland first; A. H. Boyd, second.

Class B—J. B. MacFerrin first.

Class C—D. W. Richards first; C. T. Jennings, second.

The Stevens trophy was won by S. C. Atkinson. The scores made were as follows, 50 targets each:

Table with 2 columns of names and scores for Roanoke Gun Club.

\*Willis, professional, shot at 100 targets.

E. W. POINDEXTER, Sec'y-Treas.

Marine and Field—Bensonhurst.

BENSONHURST, April 19.—On the home grounds the Bensonhurst tars got mixed in their nautical terms and called starboard to the trap helmsman. He, having been Danielized, steered the bird the wrong way, with the result that the skippers from the Marine and Field beat 'em to the tune of 47 targets. The weather was—well, it wasn't good enough to talk about. C. Ferguson, Jr., of Bensonhurst, was high gun with 76 out of 100. S. P. Hopkins, of Marine and Field, was second with 73, and C. D. Sayre, third, with 71. The scores:

Table with 2 columns of names and scores for Marine and Field.

A sweep shoot, 25 targets, scratch, was won by Dr. S. P. Hopkins with 22.

**Du Pont Gun Club.**

WILMINGTON, April 19.—There were fifty-five shooters out to-day, among them being A. B. Richardson, champion of Delaware several times, and H. S. Crawford, a new hand at the game, but judging from his work to-day, is likely to remain long in the novice class. As a member of Class D, and as partner of Richardson of Class A, he was a member of the winning team in the E. E. du Pont trophy contest, and was thereby entitled to count four points toward his total.

H. P. Carlon, of Class A, and Dr. A. Patterson, of Class B, were second, with a total of 46. J. H. Minnick, of Class A, and Dr. E. Q. Bullock, of Class D, were tied with Walter Tomlinson, of Class A, and Henry Winchester, of Class B, on 44. W. B. Smith, Jr., of Class B, and E. M. Ross, of Class C, were in fourth place with 38. The full scores follow:

	Points.
A B Richardson .....	1 23
H S Crawford .....	7 25-48 1
R S Wood .....	5 21
W J Highfield .....	3 11-32 0
J H Minnick .....	1 23
Dr E Q Bullock .....	7 21-44 2
H P Carlon .....	1 24
Dr Patterson .....	3 22-46 3
W Tomlinson .....	1 20
H Winchester .....	3 24-44 2
E M Ross .....	5 20
W B Smith, Jr.....	3 18-38 1

The high wind this afternoon was against good scores, but J. H. Minnick was high, with 93 out of 100. Straight scores of 25 were made by J. B. McHugh and A. B. Richardson, excellent work under the weather conditions. The scores made by the fifty shooters present on the first 25 targets shot at were as follows: Curley 11, W. K. Smith 17, Martin 21, Joslyn 22, Squires 13, Lord 16, Crossan 15, Webster 15, Galvin 20, J. W. Mathews 18, Risner 22, King 14, Willis 17, Jenks 6, Foord 18, Simonton 19, Turner 13, Reis 13, Banks 18, McHugh 21, Roberson 20, Magahern 12, Richardson 22, Highfield 18, Wood 16, Crawford 18, T. W. Mathewson 20, Coyne 20, Carlon 23, Massey 12, Dr. Betts 17, Anderson 18, Minnick 22, Baker 14, King 5, Leedom 19, Turner 17, Winchester 21, Tomlinson 21, Pennington 15, Prickett 20, W. G. Wood 17, Dawson 11, W. Edman 18, Dr. Patterson 19, Simon 16, Tughton 17, Dr. Bullock 14, Colfax, Jr., 20, Ross 15, Long 12, Smith, Jr., 15, Dr. Linn 15, Lindsay 10, E. du Pont 22.

**Jersey City Gun Club.**

JERSEY CITY, N. J., April 19.—Twenty-three shooters faced a gale to-day at the Jersey City Gun Club and fired at nearly three thousand targets during the afternoon, and, needless to say, nearly half of them found a nice soft spot to rest on the marsh, and in as good condition as when they left the trap. Conditions for shooting were about as hard as we have had them all season, and the only one that didn't seem to mind the wind was Geo. Piercy who led the field with an average of 80 per cent. for the day. Harry Burlington won the final leg on the season trophy and carried it home with him, so as to square himself with the family. It was a prize worth winning, and the competition during the last three months has been spirited, and ownership was not decided until to-day, as Piercy was right after him to the last. Williams, Dr. Ittner and Summerfield tied for the leg on the Du Pont trophy, and in the shoot-off Summerfield won.

The scores follow in strings of 25:

Events:	1	2	3	4	5	6	7	8	9
Targets:	25	25	25	25	25	25	25	25	25
Kearney .....	11	12	15	18	..	..	..	..	..

Slater .....	23	16	18	19	21	..	..	..	..

Next Saturday, April 26, will be our regular monthly take-home prize shoot, and we hope to see all present.

**Yale—Greenwich.**

GREENWICH, Conn., April 19.—The Yale gun team lost its match to-day with the Greenwich Field Club by 23 birds. A high wind sweeping over the traps made good shooting impossible, which accounts for the low scores. By this victory the Greenwich Club wins the second leg on a cup, the first of which the Yale team has already won. Clarence Martin, of Greenwich, was high man with a total of 75, while H. B. Scott was high for Yale with 68. The scores:

Yale.	Greenwich.
Scott .....	68
Banks .....	62
Hoyt .....	63
Newton .....	64
Thompson (Capt.) .....	53-310
Ferguson .....	67
Foster .....	64
Martin .....	75
Gallatin .....	55
Pynchion .....	72-333

**DU PONT SMOKELESS POWDER**

OLYMPIC CHALLENGE CUP  
Photo: 1-10 Actual Height.

Winner of the  
**OLYMPIC CHALLENGE CUP**

In Competition with  
The World's Most Expert  
Trapshooters

THE notable victory of the American Team at Stockholm in 1912, and the spectacular exhibition of one of its members, who excelled all previous records for the Olympic Challenge Cup, are significant examples of the superiority of Du Pont Smokeless.

**Endorsed by International Experts**

The velocity, uniform pattern, and moderate recoil of Du Pont Smokeless during this tournament attracted marked attention amongst the experts representing England, France, Germany, Sweden and Russia. They were unanimous in their endorsement of the reliability and regularity of Du Pont Smokeless.

**FOLLOW THE WINNERS**

By shooting Du Pont Smokeless—a powder widely and favorably known because of its conspicuous performances.

Ask your dealer for Du Pont loads. Look at the top shot wad—if it reads "Du Pont," the shell contains the world's leading smokeless shotgun powder.

For further information, ask for Du Pont booklet No. 3.

**Greensboro G. C.**

GREENSBORO, Ala., April 13.—Walter Huff honored us with a visit on the 9th, but as our dark-skin population was celebrating the anniversary of their freedom, we were unable to entertain Mr. Huff at our club. The club grounds are at the same park at which the negroes were gathered. The following afternoon being our regular practice day, was very bad, having rained all the morning, and but seven shooters were out. R. M. Leland brought us fair weather Friday, and eight of the members went out to the traps with Mr. Leland. The scores on April 10 follow:

Shot at.	Broke
J A Blunt.....	50 43
C W Wheeler....	50 40
C Erwin .....	50 35

**Herron Hill Gun Club.**

PITTSBURGH, Pa.—The Herron Hill Gun Club, of Pittsburgh, has decided to open their club house and grounds to all shooters. We have created an associate membership, fixing the dues at \$5 per year. This membership includes all the privileges accorded an active member with the exception of voting. It has been decided to hold regular shoots on the first and third Saturdays of each month, beginning May 3, and to offer Sterling silver spoons as prizes to be distributed in accordance with the Lewis Class system. Members may shoot at any time, as the grounds will be open the whole year; just telephone the club that you will be down, and you will find the traps ready.

We invite you to be present on May 3, whether you are a member or not. Come and see what we have to offer you.

Shooting will begin upon the arrival of the 1 o'clock Sewickley express, leaving Fifth street and Liberty avenue on the hour.

E. E. LAUTENSLAGER, Asst. Sec'y.

# Parker Gun Victories in 1912

THE highest official average for the season of 1912 at both **Single and Double Targets** was made with **Parker Guns**.

As on every previous occasion, the bona fide **Championship of America** was won with a **Parker Gun**, Mr. W. R. Crosby scoring 198 x 200 targets at 18 yards rise. Same man, same gun, made the World's Record, scoring 98 x 100 targets at 23 yards, which is a truly wonderful performance.

Small bore **Parker Guns** are recognized as the Standard Game Guns of America and are gaining in popularity every season with the most progressive sportsmen. For full information regarding guns in gauges from 8 to 28, address

## Messina Springs Gun Club.

SYRACUSE, N. Y., April 17.—The first handicap registered Squier money-back tournament of Messina Springs Gun Club was held at Syracuse to-day brought out over fifty shooters for program. Total for the day, sixty-six. This proves that if gun clubs wish to draw out the shooters, the way to do it is handicap every one.

Not until the last gun was fired was anybody able to tell who was going to be at the top and get the money. This is something that has not taken place in some time, because heretofore all the really good gunners got the money and the shoots were not well attended.

Results show the advantage of handicapping shooters so as to make clay bird shooting popular. No matter how much money a man has, he likes to have a fighting chance for it. The entry would have been a great deal larger if the weather had been warmer.

Other gun clubs should do something toward giving every shooter an equal chance.

High amateur gun went to E. Snook with 133 out of 150 from 20yd. line. His roll of green for this excellent effort amounted to \$19.50. C. L. Frantz, on same mark, took second with 128, and carried away gold totaling \$14.60. A. C. Denning came into next high lucre with 126 from 18yds., and was handed \$9.75.

High up in the wads-for-professional smiters of the dried clay, was old Brother Neaf Apgar, who with all the other selling talk artists shot from 16yds. Neaf robbed the quarries of 142 rocks, Harry Stevens cleared the ambient atmosphere of 138 black smudges, while good ole McMurchy smote to destruction 135 aerosaucers.

Nine thousand two hundred and ninety-five rocks were pulled and every shooter went away satisfied that he had a fair shake.

formed his duties in a manner pleasing to all. The gunners of Syracuse and vicinity extend their most cordial thanks to Mr. Gunn. W. E. HOOKWAY.

## Sea Side Gun Club.

BRIDGEPORT, Conn., April 19.—The last shoot of the winter series was held by the Sea Side Gun Club to-day, and there was something doing from the firing of the first gun. A northwest gale made it a day of low scores, but with several of the season's events to be decided by the results of the day, it kept everybody on edge all the afternoon.

Principal interest was centered in the President's and the handicap cup events, no one having won the second leg in either of these events, except President Lyon, who had won a leg three times, but being the donor of the cup and not caring to win it himself, he withdrew, leaving the other seven winners to shoot off in a 25-targets event. Wilson, scratch, and Adams with 2 handicap tied at 24 each in the shoot-off, and in the next trial Adams won by one target with his 2 handicap. In the handicap cup event, Senior, scratch, Kellogg, 1 handicap, and Adams, 2 handicap, tied at 25, Kellogg winning out in the shoot-off by one bird, giving him the cup, he having previously won a leg in this event.

The Island Brook cup was won by Blatz, he being the only one having won two legs in this event.

The high gun trophy for the season, scratch event, 800 targets, was won by Wilson with a total score of 736. Senior was second with 732.

The high gun trophy for the season, handicap, 800 targets, went to E. Lewis with a total score of 739 actual breaks out of 689.

The two-man team race was won by Senior and Southey with a score of 720 out of 800.

The first shoot of the summer program will be held May 10.

Following are the scores of to-day:

President's cup, 50 targets, handicap:					
Senior	0	43	E Lewis	1	41
Billings	6	48	Kellogg	3	40
W Smith	3	42	Cate	0	39
Fox	2	42	Lyon	0	39
Hall	1	42	R Lewis	1	39
Southey	0	41	Blatz	2	37
Adams	5	41	Vanstone	0	36
Sterling	3	41	Hubbard	7	36

Handicap cup, 25 targets:					
Senior	0	24	Sterling	1	21
Adams	2	24	Billings	3	21
Kellogg	1	24	Hall	0	20
Wilson	0	23	Lyon	0	19
Cate	0	22	Blatz	1	19
W Smith	1	22	Hubbard	3	19
Vanstone	0	21	R Lewis	1	18
E Lewis	0	21	Fox	1	17
Southey	0	21			

Kellogg won the shoot-off.

Island Brook cup, 25 targets, handicap:					
Hubbard	3	25	Cate	0	19
E Lewis	0	22	Adams	2	19
Kellogg	1	22	Hall	0	18
Blatz	1	22	R Lewis	1	18
Senior	0	21	Billings	3	18
Vanstone	0	21	Fox	1	16
Wilson	0	21	W Smith	1	14
Sterling	1	21			

## Western Pennsylvania Trapshooters' League.

The first tournament of the Western Pennsylvania Trapshooters' League will be given under the auspices of the United Gun Club, Pitsaurn, Pa. To reach shooting grounds, take Pennsylvania Railroad or Ardmore Express Trolley to Pitsaurn. Shooting grounds are within sight of depot. No sweep entrance is charged. The entrance fee is for targets only. The league donates the money. In 1908 the League paid \$720 average money; in 1910, \$950; in 1911, \$594.30; in 1912, \$890. Of those shooting in four shoots a year 90 per cent. won. This year all who shoot in four of the five shoots should share in the average moneys, because there will be several more moneys to the class. There will be \$20 added to each shoot, and \$100 added to season's purse. The season's purse should be about \$200. You have a chance to win. Four handsome solid gold fobs have been purchased for the winners of the season's average. To each class is assigned a trophy. The five high guns in each class will shoot off for these—100 targets per man. The president's cup, donated by L. Lautenslager, goes to the contestant making the highest season's average. The program consists of ten 15-target events, \$3 entrance, open to all amateurs. The League donates one-half of this entrance to establish a purse, to which will be added \$20. This purse to be equally divided among four classes—A, B, C, and D. One to five shooters, three moneys; 3, 2, point division; six to ten shooters, three moneys; 3, 2, 1; 11 to 15 shooters, four moneys—4, 3, 2, 1; 16 to 20 shooters, five moneys, 5, 4, 3, 2, 1; 21 to 25 shooters, six moneys—6, 5, 4, 3, 2, 1. To insure the most equitable division of the average money, one-fourth of the amateurs shooting through the program shall constitute a class. For example, if forty-eight shoot through, the twelve high men shall constitute class A; the next twelve, class B; the next twelve, class C, and the next twelve, class D. An equal amount of money, an equal number of contestants of equal shooting ability. Lunch will be served on the grounds; also loaded shells for sale on grounds. Price of targets included in all entrances. This tournament is registered with the Interstate Association. Further information relative to the tournament will be cheerfully furnished by J. A. Penrod, Pitsaurn, Pa. Guns and ammunition forwarded by express, prepaid, and sent to M. D. Salyards, Pitsaurn, Pa., will be delivered at the shooting grounds without charge. Mark your own name on the box goods are sent in.

**Indianapolis Gun Club.**

INDIANAPOLIS, Ind., April 12.—Better target breaking conditions prevailed to-day, and scores showed some improvement. The figures given cover practice and trophy scores, as both were made at 16yds. Vietmeyer led with 94 per cent.; Edmonson right up with 93, Parry 90. They and Moller each got a straight. Shooting first time for the members' trophy, with an equalizing number of targets added, Edmonson (scratch) was first with 57 out of 60, Moller (scratch) and Britton (4 added) were next with 56. Scores follow:

Shot at. Broke		Shot at. Broke	
Edmonson .....	190 177	Appel .....	100 76
Moller .....	170 137	Britton .....	80 70
Parry .....	145 133	Alig .....	80 53
Dixon .....	145 126	Neighbors .....	80 45
*Vietmeyer .....	100 94	Rushton .....	50 25
Lewis .....	100 85		

April 19.—To-day was marked by Edmonson's second annual attempt to break 100 straight. The figures given indicate that he missed one, but the boys in cleaning up the field found a target, unbroken, pierced by six pellets of shot, and all agreed that it looked just like the one called lost. Van Nest was the best professional. Scores:

Shot at. Broke		Shot at. Broke	
Edmonson .....	100 99	Alig .....	80 61
Parry .....	100 92	Lewis .....	80 60
Britton .....	100 89	Wilson .....	60 49
Denny .....	100 87	Mitchell .....	60 32
*Van Nest .....	100 85	Hixson .....	60 31
Neighbors .....	100 64		

April 17.—To-day was held the tournament of the club, and it drew a shortage of entrants, but there was quality to spare, as shown by the summary of scores. Of the eleven who shot at 150 or more targets, six broke from 90 to 97 per cent. Vietmeyer was in front up to the seventh frame, when he fell back and was passed by Chamberlain, Edmonson and Straughn, who finished in that order. In the last two events at 50 targets, Chamberlain posted 50, Parry and Moller 49 each. Edmonson

and Straughn 48 each, a total of 244 out of 250. We have in mind others who will do as well during our May shoot. Scores:

Shot at. Broke		Shot at. Broke	
*Chamberlain .....	200 194	Britton .....	150 134
Edmonson .....	200 191	Weaver .....	150 125
Straughn .....	200 186	Voris .....	150 123
Parry .....	200 183	Lewis .....	125 101
Dixon .....	200 176	Stille .....	135 104
Cope .....	200 162	Moller .....	80 74
Hofer .....	200 161	Arnold .....	80 64
*Vietmeyer .....	150 133	Cox .....	50 38

**Piping Rock Club.**

LOCUST VALLEY, L. I., April 19.—Too much, likewise too uncertain a wind, too, substituted dumb luck for science in slaughter of the aerosaucers here to-day, so that scores, mostly, were not fit for publication. Finally the chorus dwindled to a duet with Robert Goelet and Paulding Fosdick on the stage. Three events were shot at 25 discs. It looked like anybody's match, not because the contestants were shooting a close race, but because reversal of form got to be habit with both rock breakers. First Goelet cracked 9 to Fosdick's 6; then Fosdick found 13 scalars crackable in the ambient atmosphere, with Goelet straining badly after 22 that led his charges successfully. In the final string Fosdick decided that an imaginary "too much lead" was better than not enough, with the result that he smeared the horizon with 12 of his pulls, while his opponent disintegrated one less. Final score: Fosdick 31, Golet 23.

PIPING ROCK TRAP HOUSE.

The assemblage on the back line was representative of the gathering found at Newport tennis tournaments. Among the enthusiasts being Vincent Astor, Hermann Oelrichs, Percy R. Pyne, F. L. Hopkins, H. L. Winthrop, A. B. Gallatin, Marshall R. Kernochan, Duncan G. Sloan, Moscs Taylor Pyne, S. T. Frclinghuysen, Robert Goelet, Mr. and Mrs. Paulding Fosdick, McKim Hollins, R. Thornton Wilson.

**Cleveland Gun Club.**

CLEVELAND, O., April 19.—The following scores were made to-day at our shooting park, Stop 16-A, Mayfield road:

Event No. 1, semi-annual trophy, 50 targets, 16yds.:

Hogan .....	47	Stapp .....	38
Burns .....	45	Stone .....	37
Brown .....	44	Thorp .....	36
Ambler .....	42	Tobey .....	36
Rogers .....	40	Weeden .....	34
Stevens .....	39	Noble .....	32
Brainard .....	38	Hartman .....	29
Freeman .....	38		

Event No. 2, annual trophy, 50 targets:

Hogan .....	43	Noble .....	37
Stapp .....	43	Brainard .....	36
Burns .....	42	Stone .....	36
Ambler .....	40	Stevens .....	35
Tobey .....	40	Weeden .....	34
Freeman .....	39	Brown .....	32
Thorp .....	38	Hartman .....	28
Rogers .....	38		

Event No. 3, quarterly trophy contest, added-target handicap:

Thorp .....	8 25	Weeden .....	2 23
Stapp .....	0 25	Freeman .....	1 23
Stone .....	6 25	Ambler .....	2 22
Noble .....	8 25	Hogan .....	0 22
Hartman .....	6 25	Brainard .....	3 22
Rogers .....	2 24	Burns .....	0 22
Stevens .....	2 23	Tobey .....	3 22

Event No. 4, same as No. 3:

Hogan .....	0 24	Stapp .....	2 22
Rogers .....	1 23	Burns .....	2 22
Freeman .....	1 23	Hartman .....	1 20
Stone .....	1 22	F. H. WALLACE, Mgr.	
Wallace .....	3 22		

A SINGLE TRIGGER

**Lefever Gun**

in the hands of L. H. REID, Seattle broke 2115 x 2200 = 96.14% with ordinary factory loaded shells purchased from local dealers.

Mr. Reid, shooting at Interstate Association Registered Tournaments throughout the 1912 season, has the high average for the Pacific Coast.

The loads were regular factory loads; the LEFEVER bore, famous for the even pattern and penetration, assisted MR. REID to make this record.

Why don't you shoot a LEFEVER Single Trigger this year?

"DEAD SHOT"

The season of trap-shooting is just beginning. This promises to be the biggest year in the history of the sport. Thousands of new amateurs have joined the ranks and become *fascinated with the game.*

It teaches you *easy familiarity with a gun*—teaches you to shoot *accurately on the wing*—makes a good sportsman of you and leads you to the out-of-doors. There isn't half as much difficulty in learning as some of you seem to think. If you want to be a good wing-shot, this is the way to learn.

At the very beginning make it a point to ask for—and insist upon **DEAD SHOT** powder *in all your shells.* It is a smokeless powder that has the *lightest recoil, the greatest velocity* and insures the *closest pattern.* If you will use **DEAD SHOT** exclusively and allow no one to advise you to the contrary, you will learn trap-shooting in less time, *and with better results,* than in any other way.

Most of the world's best records have been made with **DEAD SHOT.** You can shoot it all day without injury to your shoulder and old hunters know what that means. Better profit by their example and start right. If you use some powder of tremendous explosive force, you will likely tire of the sport mighty quickly. So pin your faith to **DEAD SHOT** and make your beginning *effective.*

All dealers—all hardware stores that sell ammunition—have all makes of shells loaded with **DEAD SHOT.** All you have to do is to ask for **DEAD SHOT,** and your dealer will understand that *you know your business.*

Write us for Rules and Regulations on the 1913 **DEAD SHOT** High Average Trophy we are offering to the Amateurs.

**Larchmont Y. C.**

LARCHMONT, N. Y., April 19.—Eighty-five dried mud distributors made impressionistic paintings in the atmosphere with wads and fragments to-day as the final of the Larchmont trap season. It was an all day go, the last event being pulled in the dim, damp darkness. An open 200 scaler event, a twenty-man New York vs. Long Island team shoot, and a Larchmont championship contest kept four traps incessant.

New York trimmed Long Island by 3342 to 3146, leading in every string, and in an interclub match Larchmont's squad of five had 23 points up on the Country Club of Westchester. Although the regular Country Club squad was among those absent, some of the best from N. Y. A. C. failed to stop Spotts & Co.

Ralph Spotts was of course high man, and won also Larchmont championship for the third time. He missed only 13 birds in 200, and had three perfect scores. The summaries:

### THE DOGS FROM LABRADOR.

Continued from page 527.

and steadily holds your eye with his for an incredibly long time—the best index in the world of honesty and a clear conscience, both in man and beast. Another peculiar characteristic which these dogs possess is that they never sit down squarely on their hind quarters, but always flop over on one side or the other, and sit on their thighs.

Their reasoning faculties are wonderful, and they readily acquire a good working vocabulary of their master's language. The following event, enacted not long ago, will illustrate the high order of reasoning displayed by these wonderful Labrador dogs, and proves a clear case of prompt action, without previous teaching for the particular emergency:

A hunter landed from his skiff on an island, accompanied by his young Labrador dog not quite two years of age, to take a look over the extensive marshes, with the hope of surprising some ducks. Upon their return he found that the boat, which had not been pulled up sufficiently on the shore, had worked loose, and by the aid of the wind was being carried seaward. It could be seen floating far out on the water, and drifting further every minute. Believing that he might be marooned there for the night, the hunter started collecting wood with which to build a fire, for the double purpose of keeping warm, and also to attract the attention of anyone who might be passing in a boat, searching for him. In his extremity it suddenly occurred to him that it was barely possible his dog might be made to understand that he was wanted to go after the boat; that is, if it had not drifted too far for him to fix his dog's attention upon it. At least, the chance was worth the effort. So he brought his dog close to the water's edge, took the dog's head between his hands, holding his eyes in the direction of the boat, and then pointing at it, said: "Go and fetch the boat!"

The dog jerked his head out of his master's hands, made one plunge and was off in the water, without another word being said to him, making a beeline for the boat, which it took him at least ten or twelve minutes to reach. The hunter had field glasses, which he always carried on his hunting trips, and while the dog was working industriously on the boat, his master focussed the glasses upon him with anxiety and fear,

eagerly watching the efforts he was making. Knowing what he had to contend with, the hunter was afraid that the dog would throw up his task before he had made any progress. Imagine, therefore, with what anxiety he supervised the dog's contention with his almost overwhelming difficulties!

Through the glass he saw the dog seize hold of the arm of a waterproof coat that was hanging over the bow, in order to pull the boat in that manner, but the coat came away, leaving the boat behind. The dog's reasoning power told him that some other way must be devised, so he turned back and got a grip on a loop of the painter—a trailing rope—and this he tugged at until he had managed to get a longer hold. During these efforts, however, he still held on to the coat. He then turned and swam for the shore, bringing both the coat and the boat in safety to his master's hand.

Could a more interesting sight be imagined? Away out there in the water was that young dog, working alone without a word of encouragement, overcoming almost insuperable obstacles as he met them (possibly swearing a little in the canine language), and bent upon accomplishing the specific task that his master had set him to do. It goes without saying what kind of a reception he received, on account of his wonderful achievement, and no doubt the dog was as proud of his performance as was his master.

Now, that dog did not know what the word "boat" meant in the abstract, never having been taught, but he knew perfectly well the meaning of "fetch," and therefore he associated the object his master pointed out to him with the familiar word "fetch," and consequently grasped his master's wish. The dog had been trained under most rigid rules, by a painstaking master who carefully avoided using synonymous words in his instructions, so as not to confuse the dog's mind by different sounding words that conveyed the same meaning. For instance, if he wanted the dog to "go to heel," he would always use that identical expression, instead of "get back," or "go behind." By adhering closely to that method of teaching, an intelligent dog will acquire a very extensive knowledge of his master's language in a short time.

That boat performance has been repeated by two other Labrador dogs under almost similar conditions, so it will readily be seen that the intelligence of the breed is general and not particular. It is to be hoped that some dog fancier, reading these facts, may be moved to make an effort to acquire a pair of these faithful animals with a view to propagating their species in this country.

### Greyhound Sells For \$5,510.

HUNG WELL, the greyhound winner of this year's Waterloo cup, fetched the record price of \$5,510 at an auction of greyhounds in London after the show.

**TRAPSHOOTING NOTES.**

**Berlin Gun Club.**

THE Berlin Gun Club, of Berlin, Md., announces a registered tournament for July 19, 21, 22 and 23, at Ocean City, Md., and following almost immediately the big Eastern Handicap at Wilmington. July 19 and 21 will be preliminary days, while the regular program will be continued on July 22 and 23 under the Squier money-back system. It is the intention of the management to add at least \$400. Ocean City is an ideal location for such a tournament. Surf bathing, fishing (both deep sea and bay) and shore bird shooting abound there. It is conveniently located and is within easy access of both Washington, Baltimore, Philadelphia, New York and Wilmington. No pains will be spared by the management to make this one of the most attractive and successful tournaments of the year, and it is expected that many of the entrants in the Eastern Handicap tournament at Wilmington will attend this tournament.

Tournament will be conducted under the direct management of H. Linn Worthington. For further particulars address A. W. Peters, Secretary.

**New Hanover Gun Club.**

WILMINGTON, N. C., April 18.—L. Clayton Grant was high amateur to-day with 92 out of 100. H. A. Keller was high pro with 93. Scores:

Keller	24	23	22	24	93
Grant	22	22	24	24	92
Boylan	21	22	23	22	88
Dreher	21	21	21	21	84

Holloway	13	20	17	20	70
Christian	13	18	19	..	50
Rev. Clauson	..	14	6	17	37

**White Flyer Gun Club.**

WASHINGTON, D. C., April 20.—The White Flyer Gun Club, which was recently instituted, and now has an enthusiastic membership of about sixty, held its opening shoot on the 18th. Seventeen members and visitors were in attendance. Their grounds are at Twentieth and A streets S.E. Lloyd Lewis honored them with a visit. He was chaperoned by M. D. Hogan, of the Anlostan Club. Jos H. Hunter, who has not been in the game

for two years, has obtained a new gun, and with it re-established his reputation as one of the best shots in the city by breaking 98 out of 100. He broke 50 straight, missing his 51st target, and also missed one out of his last 25. On these grounds the shooters had the wind at their backs. This club will shoot every Tuesday morning and Saturday afternoon during the season. Following are the scores:

Shot at. Broke		Shot at. Broke			
W E Miller	130	86	G A Emmons	60	35
J H Hunter	100	98	J Hurst	25	20
Lloyd Lewis	100	84	J E R Purks	90	56
Dr F McQuillan	100	56	G O B Gray	75	55
H N Jett	75	47	W A Wenner	75	52

M D Horgan	50	42	R Livesay	65	33
V G Gaffield	25	22	Chadwick	50	7
A M Ryon	25	15			

MYLES TAYLOR, Sec'y.

**Boston A. A.**

Boston, Mass., April 19.—The all-day shoot of the Boston A. A. Gun Club, at the Riverside traps to-day was the biggest shooting tournament the club has held. There were four different matches and eight trophies.

In the morning shoot, the first take-home trophy was won by G. B. Clark, and the second by J. L. Snow. In the afternoon shoot the first take-home trophy was won by E. E. Staples, and the second by Dr. Ellis.

The 100-target match for the accumulation trophy was won by W. C. Brooks after a tie with L. Davis. The 25-target match for the Ballou trophy was won by G. L. Osborn, and the trophy for the high score of the day by E. E. Staples. The prize for the high handicap was awarded to G. B. Clark. The summary:

**MORNING SHOOT.**

**Analostan Gun Club.**

WASHINGTON, D. C., April 20.—The rain all day on the 12th inst. prevented the Analostan Gun Club from having its regular shoot on that afternoon. However, the 19th was a good day, barring a very strong wind, directly in the shooters' faces, and a large number turned out to enjoy the sport. During the afternoon twenty-seven were on the firing line, and over 2300 targets were thrown. Frank Huseman, who is now in the professional ranks, led the boys in scoring, having 89 to his credit in the singles and 21 out of 24 in the doubles. Dr. Stine, our amiable and efficient treasurer, was the runner up with 88 out of 100. Several new members and prospective ones were present. Among those who were present and warmly welcomed, was W. S. Duvall, one of our oldest members, nct in years, but in his connection with the club. He has a new gun, and hopes to be with us often this season. He scored 39 out of 50, a splendid score, considering the conditions. Following are the scores:

	Shot at.	Broke		Shot at.	Broke
Green	125	67	Duvall	50	39
Stubener	150	124	Wallace	50	38
Ford	125	104	Bray	75	49
Huseman	100	89	Withers	70	44
Stine	100	88	Baum	70	36
Leight	100	82	Kirk	50	36
Parsons	100	79	Miller	50	37
Peck	100	76	Luttrell	50	30
Graves	100	74	Kreg	50	18
Hume	100	74	Wise	30	20
Perkins	100	63	Cassaway	45	10
Bradford	100	53	Dulaney, Jr.	15	7
Culver	100	62	Dulaney, Sr.	50	37

Scores at 12 pairs double: Huseman 21, Kirk 20, Dulaney 15, Ford 15, Taylor 13, Baum 12, Luttrell 10, Bray 10, Parsons 11, Culver 8, Withers 5.

Please mention "Forest and Stream."

**National High School Shooting Competition.**

THE first inter-school competition for the new national trophy presented by the National Board for the Promotion of Rifle Practice brought out an entry of twenty clubs. With a view of equalizing the teams according to their ability as far as known, these schools were divided into classes. What was presumed to be the best ten clubs were put into Class A, and the other ten into Class B. The schools that entered teams were as follows:

Class A: Iowa City (Iowa) High School; Morris High School, New York city; Western High School, Washington, D. C.; Deering High School, Portland, Me.; Brookline (Mass.) High School; DeWitt Clinton High School, New York city; Stuyvesant High School, New York city; High School of Commerce, New York city; Baltimore (Md.) Polytechnic Institute; Eastern High School, of Washington, D. C.

Class B: Business High School, Washington, D. C.; Springfield (Mass.) Technical School; Portland (Me.) High School; Utica (N. Y.) Free Academy; McKinley Manual Training School, Washington, D. C.; Susquehanna (Pa.) High School; Salt Lake City (Utah) High School; Manual Training School, St. Louis, Mo.; Tucson (Ariz.) High School, and Sault Ste. Marie (Mich.) High School.

This proved very satisfactory and the plan will be carried out in subsequent years. The ten or twelve clubs, according to the number of entries, having the highest percentage will be put in Class A. New clubs coming into the league matches will be put in the lower class.

The 1913 matches were successful in many ways. The weekly reports came in more promptly and consequently better notices were given to the daily press. It was to be regretted that the Southern High School of Philadelphia was forced to withdraw from the competitions through the opposition of the Superintendent of the Schools, as they were shooting well and would have given a good account of themselves. Their place in the schedule of matches was taken by the Western High School, of Washington, D. C.

The going to pieces of the Brookline, Mass., High School team was unfortunate, but they were laboring under difficulties, especially in regard to range facilities.

For the second consecutive year victory perched upon the banner of the ambitious and persevering lads of the Iowa City High School. Their victory was well deserved, and the team did conscientious work from the start. Much credit is due to Mr. C. Ellis Williams, for his able management and coaching. The Deering High School boys also deserve great credit, as does also their coach, Mr. Wallace Knight, a former pupil of the school. Their general average for all the matches was the highest of all teams, but they were unfortunate in losing one match. They deserved second place, but under the rules of the match, second honors went to the winner of the second class who shot off with the winner of the first class for the championship. This will be changed hereafter and the second place will be given to the school that stands second in Class A, and the winning teams of classes B and C will receive some recognition for winning in their own class. The final standing of the clubs in both classes were as follows:

Class	Club	Won.	Lost.
Class A:	Iowa City High	9	0
	Deering High	8	1
	Morris High	7	2
	Stuyvesant High	6	3
	DeWitt Clinton High	4	5
	Baltimore "Poly"	3	6
	High School of Commerce	2	7
	Eastern High School	2	7
	Western High School	1	8
	Brookline High	0	9
Class B:	Salt Lake High	9	0
	Susquehanna High	8	1
	Portland High	6	3
	D. C. Technical	6	3
	Springfield Technical	6	3
	Sault Ste. Marie High	4	5
	Business High	3	6
	Tucson High	2	7
	Utica Free Academy	1	8
	St. Louis Technical	0	9

The average score per match for the ten highest teams were as follows:

Deering High School	957.5
Iowa City High School	956.9
Salt Lake City High School	935.2
Portland High School	924.3
Morris High School	915.1
Susquehanna High School	902.5
Springfield (Technical)	900.2
Manual Training, D. C.	893.1
Stuyvesant High School	889.3
DeWitt Clinton High School	871.6

The above clubs will, if they compete in 1914, be put in Class A. Iowa City and Salt Lake City High Schools shot off for the championship with the following results:

Iowa City High.	Salt Lake City High.
L Raymond ..... 195	A Rydaldch ..... 194
Wm Moerschel .. 194	R Spears ..... 192
L Burns ..... 194	J Armstrong ..... 192
P Newberg ..... 191	C Macfarland ..... 189
E Hoover ..... 190-964	A Mays ..... 188-955

The names of the ten highest individual competitors and their averages follow:

P M Johnson, Deering High	195.3
Geo R St John, Deering High	192.3
Don Luscombe, Iowa City High	190.6
Wendall T Smith, Deering High	190.1
Philip Newberg, Iowa City High	189.6
Frank Konvolinka, Iowa City High	189.3
Earl Mellus, Salt Lake High	189.
Everett Hoover, Iowa City High	188.5
Millard Hughey, Deering High	188.3
Wm Moerschel, Iowa City High	188.2

For Sale.

# Rifle Shooting

## National Shooting Competition for Military Schools.

The first inter-school competition among the military schools of the United States for the new national trophy, presented by the National Board for Promotion of Rifle Practice, was a success in some ways, but the fact that there were only sixteen entries from the 115 military schools in the United States was not encouraging. Interest was at first somewhat halting owing to a bad start and to the fact that two clubs, the Girard College Rifle Club, and the Missouri Military Academy did not shoot their matches at all, and the Miami Military Institute and New York Military Academy did not make prompt report of their first few matches.

In the 1913 matches the following sixteen schools were represented: Wentworth Military Academy, of Lexington, Mo.; St. John's Military Academy, Delafield, Wis.; Culver Military Academy, Culver, Ind.; Bordertown, N. J.; Military Institute; St. John's School, Manlius, N. Y.; Miami Military Institute, Germantown, O.; New Mexico Military Institute, Roswell, N. M.; New York Military Academy, Cornwall-on-Hudson; Kemper Military School, Boonville, Mo.; Harvard Military School, Los Angeles, Cal.; Hitchcock Military Academy, San Rafael, Cal.; Missouri Military Academy, Mexico, Mo.; Randolph Military Academy, Moristown, N. J.; Nazareth Hall Military Academy, Nazareth, Pa.; Kentucky Military Institute, Lyndon, Ky.; and Girard College Rifle Club, Philadelphia, Pa.

As it would have made too long a schedule to have all of the clubs in one league, they were divided into two leagues of eight clubs each. The matches began the week ending Jan. 18, and closed the week ending March 1. The standing of the clubs in the Eastern League at the close of the matches was:

	Won.	Lost.
Bordertown Military Institute.....	7	0
St. John's School .....	6	1
New Mexico Military Institute.....	5	2
New York Military Academy.....	4	3
Randolph Military Academy.....	2	5
Nazareth Hall Military Academy.....	2	5

Miami Military Institute dropped, and Girard College did not shoot.

In the Western League the results were:

	Won.	Lost.
Wentworth Military Academy.....	6	1
St. John's Military Academy.....	6	1
Culver Military Institute .....	5	2
Harvard Military Academy.....	5	2
Hitchcock Military Academy.....	3	4
Kemper Military School .....	2	5
Kentucky Military Academy.....	1	6

Missouri Military Academy did not shoot.

Wentworth and St. John's military academies having tied, it became necessary for them to shoot off for first place in the Western League. The result of this shoot-off was as follows: Wentworth 927, St. John's 896. As a result of this shoot-off, Wentworth shot off for the United States championship with the Bordertown Military Institute, the winner of the Eastern League. This shoot-off resulted in a very close finish between the two schools, with the following result:

Bordertown M. A.	Wentworth M. A.
M C Robinson... 185	R C Goldsberry... 191
H Hohlweg... 185	R N Strickland... 185
J Le R Sadlier... 185	B C Cook... 182
S R Day... 183	C H Slusher... 182
F K Iszard... 184-922	A Lill... 180-920

The best team score was 930, by Culver Military Academy against Wentworth Military Academy. The average score per match for all the teams was as follows: Wentworth 910.2, St. John's 901.4, Culver 896.2, Bordertown 885.2, St. John's School 878.4, Miami 849.5, New Mexico 830.8, New York 828, Kemper 811.7, Harvard 798.2, Hitchcock 787.8, Missouri 701.2, Randolph 651.7, Nazareth Hall 539.4. The Kentucky Military Institute shot in only five matches, and the Girard College and Missouri Military Institute in none.

In the 1914 matches the above ten or twelve clubs (according to the number of entries received), having the highest average, will be put in Class A. Another change contemplated for the 1914 matches is rearranging the prizes so that the winning team in each class will receive medals representing the championship of that class.

Some of the boys did very consistent shooting throughout the league matches. The following are the ten boys who shot and made the team for every match and their average: O. R. Rosaacn, St. John's M. A., 187.7; F. Kasten, Jr., Culver, 184; W. W. Ashurst, Wentworth, 182.2; Wm. Ingalls, Culver, 181.4; R. N. Strickland, Wentworth, 180.7; R. C. Goldsberry, Wentworth, 180.7; F. K. Iszard, Bordertown, 180.5; R. Latham, St. John's School, 179.8; H. Scowcroft, St. John's M. A., 178; M. R. Cardenas, St. John's School, 177.

## TRAPSHOOTING NOTES.

### Pottstown G. C.

POTTSTOWN, Pa., April 26.—Pottstown Gun Club held a registered tournament here to-day; The Interstate Association contributed \$50-50 cents each event; the club contributed 6 cents for each target. Total average money \$25, divided in three classes, \$5.80, \$3.50 and \$2.30. The system of money division in regular events was 40, 30, 20 and 10 per cent. The program consisted of ten 15-target events. Number of targets trapped during tournament, including practice events and all other events of any kind, was 6,300. Number of contestants partici-

# Right Clothes of Right Fabric

Mean protection to your body from brush, chill winds and showers, plus solid comfort. The best fabric for all these purposes,—for fishing, hunting, camping and hiking suits is

## FORESTRY CLOTH

(SHADE 65)

Pure wool, unfinished worsted, firmly woven—soft and pliable. Gray-green in color; all weights. This is the fabric officially adopted for U. S. Forestry Service.

Another special fabric made by the American Woolen Company for outdoor and sporting wear is Olivauto Cloth. A fashionable olive-brown serge especially suitable for motoring, riding and golfing clothes. Medium weight only.

Any Custom tailor or store can obtain OLIVAUTO CLOTH and FORESTRY CLOTH for you. They may be had also in correct sporting garments ready to wear from Abercrombie & Fitch Co., New York, and other outfitters. If you don't find them, write for samples and prices.

## A Contraband Incident—II. A Story of the Forties Written by Nessmuk

*Illustrations from "Woodcraft."*

THE scene I have attempted to describe passed very rapidly, and it could not have been ten minutes from the time of his appearance until the fugitive was on his way to the hiding place of his wife and child, torch in hand, and with fresh hope in his heart. No sooner was he out of hearing than Randolph rose to his feet and said: "Now, boys, we are in luck; you see what the fools have brought themselves to by getting these runaway notions in their heads. They've suffered more on this trip than they would in ten years if they'd stayed at home, and they're bound to suffer if they ever get to Canada. The free States are no place for darkies, and 'twould only be doing them a kindness to feed 'em well, clothe 'em comfortable and send 'em back. That fellow's a darky preacher, I know. What the devil good is he in Canada? Let him go back and preach to the niggers where he belongs. I ain't goin' to turn nigger thief, and I go in for sending 'em back accordin' to law; what do you say, boys? There won't be less than \$300 reward; maybe more, and we may as well have it as anybody else."

"Well," said farmer Kelly, "the first thing is to feed the hungry and clothe the naked; after that we can see about the 'sending back,' though I have a notion that if they ever do go back, they'll start from a p'int a few miles north of this. I'm no nigger catcher, and I ain't greedy for money to be got in that kind of way; I call it blood money."

"The hell you do," said Randolph savagely, "and I s'pose you don't believe in keepin' the law neither, nor in Scriptor."

"Waal, yes, I *du* believe in Scriptor; I believe in doing to others as you would be done by, and I believe in loosenin' the bonds of them that are bound, and in lettin' the oppressed go free. I take it that's good Scriptor doctrine. As to law, I'm my own judge of that. If I break the law I'm willin' to bide the consequences."

"Waal," rejoined Randolph, "it's my opinion that you're just a cussed Abolitioner, and it's my opinion further that the darky 'd better go back to his master. If the rest of you want to play the fool, you can, but—"

Here he was interrupted by the return of the negro, without the torch, but bearing in his arms the almost perished child, and closely followed by his wife. The child was apparently some five years old, and might be described as an intelligent featured bright mulatto. The

woman, save to the eye of an expert, showed no signs of African origin whatever. She was ragged and emaciated, with a look of weary, patient suffering that was most touching, but her form, when in the fullness of health, must have been nearly faultless, and her manners were actually those of a lady. She was still handsome, even in her emaciation and misery. What could have induced her to marry an unmitigated negro of plantation speech and manners?

Fearless, straightforward, common sense kindness is very quick at relieving suffering. In a quarter of an hour from the advent of the

conclusion that he had gone for help to arrest and commit the miserable fugitives for rendition in the expectation of a handsome reward. We all believed him mean and unprincipled enough to do any dirty job for money, and we had come to dislike him thoroughly as a companion. He was rude, overbearing, and a most egregious braggart, boasting frequently of the antagonists he had finished with "old bowie" or the "har" he had "raised" when hunting and trapping among the Rocky Mountains. For the rest he could sing tolerably, had a frank off-hand way which frequently enabled him to "wring in," as he expressed it, with better company than he deserved, and was a capital rifle shot.

We had concluded that Randolph had gone for help to arrest the runaways, but though we were well convinced of this, no man spoke his thoughts. We waited on our strange guests assiduously, receiving their thanks in silence and listening with pained hearts to the moanings of the sick child, or brooding savagely on the conduct of the rascal Randolph and what the morrow might bring. We knew that if he came back with legal papers and the proper officer to serve them, we were powerless. Had the weather been favorable, we might have hurried the fugitives to a place of present safety, but the state they were in and the tell-tale snow seemed to preclude the feasibility of this. We were at a nonplus, and I was half inclined to regret that one of us had not seen fit to follow Randolph and shoot him ere he reached the clearings. Taking his own account of himself, it would have been an act of simple justice.

Jason—the only one of the party who had openly avowed abolition sentiments, and who had nightly quarreled with Randolph on politics—was the first to notice the absence of another one of the party, and asked the farmer where his son was. Sure enough, young Kelly had gone—no one knew when or where. "Waal," the farmer quietly said, "he does seem to be missin' jest now; I reckon he'll turn up all right after a spell." He said no more on the subject, but his meaning look and a sort of cool confidence about the man as he sat nursing one leg and smoking placidly before the fire somehow reassured me, and I looked on the absence of the quiet, harmless looking youngster as most significant.

One o'clock came and found the tired fugitives in a deep lethargic sleep. Even the sick child had ceased moaning and slept soundly. The

NESSMUK KNIVES AND HATCHET.

party in camp they were all comparatively comfortable. It was no time for scrupulous delicacy. They were all divested of the wet comfortless tatters which partially covered them, each had a stiff drink of "hot stuff," and all the spare coats, overcoats, blankets and buffaloes were put in requisition to warm, and keep them warm, until other clothing could be procured.

When we had done all in our power to relieve the sufferers, when they were warmed, fed and quietly taking the rest of which they stood in such need, then it was that we first noticed the absence of the man Randolph. Jason had seen him walk out of camp a few minutes before, rifle in hand, and we all jumped to the

three white men watched and waited with different degrees of patience. Farmer Kelly took it coolly and seemed half inclined to sleep on it. Jason on the contrary chafed continually and glared savagely at everything and everybody. He was young, impulsive, a disciple in politics of Joshua R. Giddings, and hated every species of slavery as a Milesian hates snakes. As for myself, I was young, a native of the Bay State, and, although a Democrat in politics, very unsound on the goose. I had never before seen a real fugitive fresh from slavery. I looked at the sleepers as they lay still and death-like in the glare of the forest camp-fire, and asked myself: Should I, who had that very night been rescued from a miserable death with odds great-

INDIAN CAMP.

ly against me—should I turn on these helpless ones and lend a hand to place them in slavery which they dreaded more than death? I did not see the case clearly in all its bearings then, but I saw that it would be a crime scarce better than murder, and I only swore that come what might, law or no law, my mother's son should never see a slave fairly and earnestly seeking his or her freedom without lending a helping hand.

Two o'clock came and found the weary still soundly sleeping, while the white men yet waited and watched. Jason, who had been getting more impatient as the time wore on, at last seated himself by the farmer and relieved his impatience as follows: "Look here, Kelly, we may as well talk matters up a little. Here's three human beings who will need help in the morning if ever three unlucky mortals did; now what's to be done? You know well that scamp Randolph will be back in the morning with a posse of blackguards to jail these people and get the sneak money. Now, if your boy has gone for help, say so, and we'll know what to expect, for I shan't stand by and see 'em taken; it's too cursed beastly and inhuman, so you see I'd like to know who and what to depend on. What do you say, Nessmuk?"

I had made up my mind to fight if there was no other road left open by which the run-

aways might escape, and I said so, pledging myself to stand by him to the best of my ability and see it out fairly if need be to the last.

"Good! That's two, and the darky, if he ain't afraid to fight, is equal to two more. Now, Kelly, let's hear from you. I know there's no fear of you helping the nigger catchers, but you've got a farm and a family hereabout and mayn't want to get into law scrapes, so if you don't want to help, why you can play spectator and hinder the constable a little in some way—"

"You are good boys," said the farmer; "good boys both of you, only don't talk quite so loud, and come a little closer. I'll tell you something."

There was a pleasant twinkle in his eye as he said this, and when we had huddled quite close as though expecting him to whisper, he continued in a low, calm tone: "'Tain't often I get anybody to help keep secrets which I can't keep myself, but you'll do to trust, I reckon, you two. Did you ever hear of such an institution as the underground railroad?"

We had heard of it, and Jason owned to having assisted the conductors of the road on one or two occasions.

"Good! Now, I happen to be one of the conductors on that road; have had an interest in it for more than fourteen years here and in Ohio. In that time I've helped more than 200 passengers on the road to freedom, and I don't know as I'm the poorer for it. In all that time I haven't been arrested, and only once have had to fight. That was when three of us were taking a family through from Terre Haute to the lakes. They got track of us and sent a man by the name of Boyce after us—a tiger of a man he was, and a regular nigger hunter. They came on us in the night on the road above Newport, and Boyce pitched in like a mad bull. If the two men he had along for helpers had a fought like him, we should ha' had to cave, but they didn't seem to care so much about it as he did, and the three nigger men we had aboard of our wagon fought for their freedom like bulldogs. I never thought to see slaves fight like that. Boyce fired his revolver twice and hit a darky both shots, but a big mulatto they called Commodore took him a wipe over the head with a stone and stopped his nigger catching for one while. They went back to Newport and tried to raise a big turnout to catch us, but their leader's skull was crushed, so he was disabled, and the people were glad of it. They wasn't anxious to turn nigger hunters, so we got off without more trouble, and I've heard since that Boyce never got the better of the hurt on his head. I hope it's so, too, for one of the darkies he shot died in about a week after getting to Wellington Square, in Canada, where he had a brother and a wife. I didn't set in to tell a yarn, however; what I was going to say is this: I have been in more than a dozen scrapes when it looked as though a fight couldn't be got over nohow, and yet, by pulling straight ahead, steady and cool, always trying to get away, to the last minute, without a fight, we always got off without a shot or a blow, except the time above Newport. It'll be so now, you may depend on it. My boy has gone out to the clearings for some friends who are true as steel, and he'll be back afore Randolph and his blackguards can get 'round; he'll have a good team along and some clothes, so you see there ain't likely to be a fight unless we meet them on the road, which

may happen. In that case I think we'd better fight if need be, and it might be well enough to cut a good hickory for the darky. He ought to be able to whip four of them alone with a club if there's anything in looks or size."

"Yes, massa," said the negro, who had been awake and listening. "Yes, massa, I'll use de club fas' enuff, nebber you fear dat. Dar can't no fo' men take me back alive, bet on dat. I'se jes' goin' fro' by daylight or die; I'se bin cut up enuff for one darky an' dey won't flog me no more. I cood got fro' long 'fore dis time ef I'd bin alone, but I had to tote de little gal mos' ebery step o' de way, an' it hender'd me mighty bad."

"And how far have you traveled?" asked Jason.

"I couldn't tell how fur, massa; it's a mighty

CAMP FIRE AS IT SHOULD BE MADE.

long way; we b'longed to Colonel J., 'bout twelve mile from Richmond."

[TO BE CONTINUED.]

#### Man's Growth.

A MAN'S organs and those of his bones which are not subject to pressure grow continuously until he is 40 years old; that is to say, the heart should become stronger, the capacity of the lungs increase and the brain should develop steadily until the fourth decade of life.

A man, says the Chicago Tribune, ceases to grow tall, however, at the beginning of the third decade, because after that time pressure exerted by the weight of the body while in the erect position compresses the vertebræ or small bones in the spine, the disks of cartilage between them, the pelvis and the thigh bones, and this pressure overcomes the natural elasticity of the disks and the growth of these bones.

However, a British scientist contends that were a man a quadruped, and therefore freed from the downward pressure produced by his weight upon his spinal column, he would continue to grow in height for ten years longer than he does at present, since it has been found that bones not subjected to compression increase up to the fourth decade.

# A Kangaroo Hunt

By AUSTRALIS

I WAS staying with a cousin in the northeast of Victoria a few months ago, in a very wild district, much of it practically untrudden by man. It was formerly a district much favored by bushrangers, and there had been several deadly fights between them and the police. My cousin owns a cattle station extending to 30,000 acres. In addition, he leases from the Government another 30,000 acres of wild mountain country, abutting on his run. This mountain country is extremely rough, the ranges being covered with heavy timber, and a very thick undergrowth of brush. Naturally, it was the home of any amount of wild animals, including kangaroos, wallabies, emus and wombats, besides smaller fry. But so dense was the cover that it was hard to have a go at them.

One fine spring morning my cousin said: "We'll go out to the ranges to-day and camp all night. I have to inspect the water supply. We will take a couple of good dogs and see if we can get a kangaroo." I was delighted, and was up early to make preparations. These were soon completed. We took a pack horse, as the ranges were impassable to wheeled traffic. The pack horse carried sufficient food, and a few cooking utensils. We took no tent, as the weather was warm, and we could soon knock up a shelter of branches. The most important points in our preparation were our horses. My cousin had a beautiful little black mare that was a perfect mountain pony. He gave me a very nice little chestnut. Both of these horses were small, but were as sure-footed as goats. Bred in the mountains, they had become adepts at clambering about their steep sides, and my pony was to show me feats that made my hair stand on end. We had a seventy-mile ride before we got to the mountains. We did not reach a camping place until about one, when the pack was unloaded, the horses hobbled out, and the billy set to boil. It was an ideal spot, beside a pretty mountain spring that gurgled its way down a long valley. Already we had seen a few small kangaroos, called brush kangaroos, but we didn't trouble about them, although our two dogs chased them until they got lost in the forest. A long whistle by my cousin, however, always brought them back. The two dogs, I may mention, were, first a sort of deerhound, and the second one a cross between a foxhound and a greyhound. The deerhound was very fast and strong, and equal to anything we would put up.

After lunch we resumed our trip, and presently came to the water supply that my cousin was to inspect. It was a wind-driven arrangement that drew the water up from a small lake formed by a spring, and then allowed it to run into two troughs. It was in fair order, but needed oiling and a little attention. By the time this was done, evening was drawing on, so we decided to pitch our camp at the spring. The night was beautifully fine, so we didn't need any shelter. My cousin, with his tomahawk, cut down a supply of silky tea-tree, which he made into a couple of beds. A rug thrown over this made a very comfortable resting place. We had brought a gun, and at sunset I had some

good sport at bronze-wing pigeons which came to the spring to drink. I shot half a dozen, and my cousin soon had a couple plucked and broiling on the fire. We made a good meal, and soon after turned in to sleep. I was a good while going to sleep, owing to the strange bush noises, but my cousin was asleep almost as soon as he laid down. However, I followed his example eventually. He woke first, and nudged me sharply, announcing that it was time to get up. It was just breaking day, and about 5 o'clock, and the birds were singing all around us. It didn't take us long to make a fire, boil our billy and broil another couple of pigeons. Then my cousin caught the two horses. It was not quite six when, leaving the camp as it was, and the pack horse feeding quietly around it, we set off for

very big. "There are some foresters," shouted my cousin; "come on," and he leaned forward on his mare and shot off like an arrow. My pony, with very little persuasion, followed, and soon we were both galloping along the mountain side in full pursuit of our prey. The going as yet was not difficult, although once or twice I had to duck my head to avoid being knocked out of the saddle by an overhanging bough. I soon, however, imitated my cousin, who was lying along his horse's neck, Indian fashion. The dogs were now among the flock, which scattered in all directions. My cousin kept his attention fixed on a very big male, that seemed to me to be at least ten feet high. This kangaroo was speeding along at a terrific rate, bounding right over small bushes. The two dogs soon singled

the mountain, which reared its huge bulk just in front of us. "There are," said my cousin, "some huge kangaroos on this range. They are called 'foresters' or 'old man kangaroos,' and some call them 'boomers'."

The true forester is a huge animal, standing between six and seven feet high, very fleet, and very strong. Though not naturally savage, these kangaroos fight dearly for their lives and use their strong hind legs, and the long toes on them, to rip open their attackers. We rode on and up over shoulder after shoulder of the range until we were about 2,000 feet high. Then my cousin warned me how to behave. "Just sit your pony," he remarked, "and he will look after himself. Do not check him, as he is sure of his feet wherever he goes." He had just finished when the deerhound gave a long growl and bounded off. There the timber was not very thick, and peering through it, we saw a small mob, about a dozen of kangaroos, some of them

him out, encouraged by my cousin's yells, and presently we were all on his track. He turned sharply to the left and made straight downhill, covering huge distances with every bound and crashing through the brush as if it were straw. My cousin followed and my horse took the same way. I have often wondered since how we got down. My pony jumped everything jumpable, and where it was too steep for him to gallop, he gathered his legs under him and just slid until he came to a firmer foothold. Once I must have slid fully thirty yards in this manner. But every time he found his feet so certainly that my heart, which had got up into my mouth, gradually resumed its normal position. Down we all went, and the uproar and crashing could be heard a mile away. Once my pony landed in a cluster of rabbit burrows, into which he sank knee deep, but he was out of them safely next moment. This downhill work suited the kangaroo, who soon got well away in front.

And when at last we got on to the plain, he was out of sight, though we could hear the baying of the dogs. On the flat we soon made up the lost ground. Both of our ponies had a fine turn of speed, and laying their bellies almost on the ground they fairly flew along. Soon the noise of the dogs came closer, and at last after tearing through a thick belt of undergrowth, during which one of my boots was nearly dragged off, we came upon our quarry. He was what is called "bailed" up against a big eucalyptus. When pressed hard, these foresters turn on the dogs, and putting their backs against a large tree, face them. Then, if the dogs come too close, the kangaroo clasps them in his arms, and lifting one leg, rips them open with the long claw that decorates each hind foot. The foxhound had incautiously run in, and the kangaroo had grabbed him and was about to give him the *coup de grâce*, when the deerhound sprang at his tail. This made the kangaroo drop his prey and turn to face his new enemy. But the cautious old deerhound knew the danger and backed off, growling savagely. My cousin jumped off his horse, and picking up a small stick, ran at the kangaroo. Curiously enough, the kangaroo is very soft about the head, a small tap there settling him. But in his hurry my cousin missed, the stick breaking on his shoulder. The kangaroo jumped forward, and was grabbing him, when the deerhound again made a flank attack, thus probably saving his life. My cousin then went to his pony, and took off the stirrup leather. This, with his iron attached, makes a favorite bush weapon, and is used on dingoes, kangaroos and snakes. Swinging it round his head, he watched his opportunity, and presently the iron fell with a crash on the forester's head and ended his career. He was seven feet high. We skinned him, as my cousin wanted the skin to make stock whips of, it being the very best material for that purpose. Tying the skin to the saddle, we set off along the foot of the range, and presently had the luck to put up a solitary forester. This led to another fine chase, nearly as exciting as the first, my pony taking a mountain stream in his stride, and nearly leaving me in it. Eventually this kangaroo took to the water, wading out into a marsh until he was half submerged. Neither of the dogs would follow him, as it meant certain death. The kangaroo would have clasped the dog and held him under water until he drowned, so my cousin rode his mare in after it with a long stick. The kangaroo, however, would not let him come to close quarters, but bounded out and off again. The dogs were soon on his trail and another merry ten minutes' burst saw the end. The deerhound put on a spurt, and jumping at the kangaroo's neck, had brought him heavily to the ground, where he soon killed him. It was still early, so we put in the rest of the afternoon after wallabies, a small species of kangaroos. We caught six of them after fair runs, and duly skinned them all. It was after five when, with quite a pile of skins on his saddle bow, my cousin turned his pony's nose for home. I had no idea where we were, but after an hour's ride the spring and our camp hove in sight, and very tired but very happy, we both rolled off our horses and sat in our bunks for a breath before making tea. Altogether the trip was a most enjoyable one, and one which I always look on as a red-letter day in my calendar.

## Benjamin Trautmann, alias Ben Trout

By J. H. LEEBRICK

"DON'T fish here, and by thunder I mean it." straggled across a rough board emphatically nailed to a sturdy bull pine near a quiet, but deceptively deep pool of crystal mountain water.

"That's the first sign of civilization of that disagreeable kind we've met in Montana. Is it a jest?" I inquired.

"Jest! why no, that's anything but a jest; don't you see those speckled beauties and how fearless they seem? They don't dart under cover of those rocks as you expected."

"Well, who or what protects them?" I queried.

"It's Ben Trout. We want to take dinner

have spent it more as "Ben Trout" had done. "Been fishin'?" he asked, looking at our creels, which we had proudly held up for his inspection.

"We'll have them for dinner," said my companion, "if you say so."

"For your dinner, not mine; no, thankee," said Ben. "I'd about as soon eat a brother as one of them people. I lived with them once, or thought I did, and I reckon that amounts to about the same thing."

Thinking the story was approaching, I thought to draw him on.

"That sounds fishy," said I, with a questioning smile.

THE WAY TO THE FALLS BELOW.

there on our return. I'll try to get him to tell you his story. If I succeed, I'm sure you'll find it unique to say the least."

We passed without as much as taking a single cast in that tabooed pool. After the best morning's fishing I had ever experienced, noon found us nearing that guarded and fascinating aquarium.

A long, low cabin in the midst of a clearing came into view. There was an indication of thrift in the neatly kept out-building, and a curl of light, blue smoke from the broad chimney told that the mid-day meal was in progress.

As we neared the house, a tall muscular man, whose stalwart form seemed well in keeping with the rugged pines about him, approached and gave my companion a hearty hand shake, and me a friendly nod. When I was introduced as a particular friend, that hand shake was extended to me, and a hearty one it was.

He has gained that vigorous frame by hard knocks in the wilderness, I thought, and regretted my shut-in life and wished that I might

"So it does. It be an old story to Bill, there, but reckon ef he kin stand it, I kin."

We sat on a group of socially-arranged boulders in the shade of a pine that had been spared to shade the cabin.

"Wall," began Ben, as he laid his rough hand gently on a beautiful greyhound that was leaning against him, gazing wonderingly at the two strangers, "I was the laziest cuss that ever had to draw breath in Arkansas, and that ain't sayin' no little neither, but I was. That was given up by all the folks for miles round Tarkill, t'other side of Boston Mountains, where I come from 'bout ten year ago. The folks never could get me to go to school or nothin' else, an' it wa'n't my fault neither, for I always 'lowed laziness was a disease. I always feel sorry for anyone that's got it—but I git off my story. I was sayin' I couldn't be made go to school, but I did once in spite of my disease, an' it was that gal in the house yonder that made me. I heard her say once that she'd no use for a man that couldn't read nor write, an' said right afore me

that Jack Smith, whose dad had bought the Gilson place, was a fine scholar an' would some day git the finest gal in the neighborhood an' she was dead sure of it, an' then looked straight at me. I was only fifteen then, but I never had seen any gal that just took my eye as Jane Barnes did.

"The next day I put off to school an' begun my fust learnin' with Jane a-settin' jest in the seat to my left. I expected she'd make fun of me with all the rest when I had to confess I only knowed 'bout half the alphabet. She never laughed, but looked down right hard at Jack Smith when he commenced to giggle on account of my ignorance. I don't blame him now, but then I wanted to punch his head. I knowed Jane didn't like fightin', so I had nothin' to do but dig away at my books, an' I did for nigh six months. By that time I could read better than Jack, and often read the newspapers at the corners where we got our mail an' groceries.

"It seemed to me that I had worked 'bout hard enough to have the best gal in the neighborhood take a little more notice of me, so one day I asked her if she liked any one 'bout here any better'n she did me.

"Waal, the breath was clean tuck out ov me when she brought that durned Jack Smith up again in this way, an' it was cruel, too, for it was always the easiest thing in the world for him to work, an' the very thought o' work almost made me sick."

"What work did you ever do, Ben?" asked she.

"All that ever had to be done," said I.

"You never stripped that cane last sorghum time; you've never helped your dad git wood in; jest tell me what you ever did do?"

"Dad always gits in wood a week ahead, so what's the use of me gittin' in more?"

"Does your dad git in sorghum a week ahead?"

"I was sick last sorghum time."

"Ben, you weren't; you weren't; nothin' but jest lazy, an' I tell you, you'll have to change your habits."

"I had no habits to change, but I went away determined to work as hard as Jack Smith ef it killed me.

"So next day I went out in the woods with dad to cut rails. Mam was tickled nearly to death, an' after I had started out, I heard her say to dad: 'There, didn't I tell you Ben's goin' to make a man of his-self yet!'

"I helped dad saw the first tree down an' cut one length off, then he had to go back to the house to git a wedge. Waal, I knowed a cool place, fifty yards away, so went there for a little rest. When dad come back, I wasn't nowhere to be seen, but I seen him, an' he jest looked round an' shook his head an' I'm sure he said, 'Jest as I told you, old woman.'

"Waal, Jane knowed I'd tried an' failed an' got so she wouldn't even look at me. I tell you I missed her eyes. They were the softest, prettiest eyes in that whole country, an' they belonged to the best gal, too.

"Early that spring several families got the Montana fever. Dad got it, too, an' so did Jane's people. I thought then would be my time to git her sure, but what did Jack Smith's daddy do but conclude to go too. Well, we all went.

"The trip was a hard one, an' it tired me out so that I had 'bout concluded to give Jane up.

"She seemed to grow prettier every day an' my folks was anxious for me to git her, but Jane sort of suspected somethin' was up, an' she jest plainly told the folks that she'd never marry a man that wouldn't work enough to keep hisself, let alone a wife.

"The next day she saw me or rather I saw her, for I went over to her dad's to tell him that dad would be ready to build that division fence.

"Jane said to me: 'Ben, ef you are the smallest part of a man, you'll help build that fence an' do some of the clearin'.'

"The next day I got my axe an' started out in earnest an' worked like a nigger till noon. Jane must have seen me, for when I passed her house she gave me such a smile that I felt well paid for my mornin's work.

"In the afternoon I went it harder than ever. Had jest cut down a tree as big as thisen, when I stopped to brush the sweat from my face, when that smile came back to me as plain as could be, an' I set down a minute to think.

"Those eyes were glorious, so soft an' dreamy-like I closed mine to see hern better, so leaned back ag'in the tree an' 'fore I knowed it, was asleep an' didn't wake up till past supper time. When I passed Jane's, she wa'nt nowhere to be seen. I knowed she'd been listenin' for my choppin', but didn't hear it any more'n I did.

"Waal, next mornin' I set out ag'in, but was too stiff an' tired from workin'. It was misery to move, so I jest set my axe an' myself down an' tried to think of some other way out of it. That gal I knowed was worth cuttin' up that whole forest into tooth-picks fur, but there must surely be some other way, so I giv' up gittin' her by choppin' an' went down to the brook.

"Maybe you saw my warnin'. I fust had it, 'No fishin' aloud here,' but one day I went down to take a look at my old friends, when I saw two fellers a-fishin' away as though my sign weren't there.

"Didn't you see that sign?"

"Yes," said one of them smart Alicks, 'but they don't teach the Injun language in Eastern colleges,' an' then he grinned at me.

"But they teach yellin', rowin' an' swimmin', don't they?"

"Yes," he answered, lookin' puzzled like.

"We'll have a sample of your swimmin', an' I shoved him off the rocks.

"Waal, I had to hand him a pole to keep him from goin' over the falls. I pulled him up the bank an' dragged him to my sign an' I'll be durned if the critter couldn't read as well as you or me—but here I'm gittin' off my story ag'in," said Ben, with an amused twinkle in his eye. "Waal, next mornin' I was more discouraged than I ever was in my hull life, so after breakfast I dragged my weary bones down to the deep pool just above the falls. Maybe you saw it as you passed up the crick. Oh, you did, did you? Waal, in those rocks that hang over the deepest place I found a seat where the rocks jest seemed made for a lazy back like mine. I set there tryin' to study some other way to Jane's affections, while I was studyin' with my eyes on the trout (big lazy fellows). I got to thinkin' what a glorious life theirs must be. Nothin' to do but lay there quiet in that cool water an' occasionally wriggle up an' take in some onlucky grasshopper or fly, then back ag'in

an' float under the cool shady rocks. I was growin' drowsy, when all at once the water seemed to come up all 'bout me an' I felt so cool an' comfortable an' then sure enough I had my wish. I was one of those lucky trout. The fust thing I did was to look up an' see if that feller was a-settin' there on the rock lookin' at us. Waal, there he was but asleep an' I was glad we had changed places.

"I always was sociable, so I swum over where several of my speckled brothers were, an' passed the time of day with them. They nodded an' seemed to think me nothin' uncommon. An' indeed, it didn't seem unusual to me, but I was from Arkansas, an' had to ask questions, so I said: 'Where do you fellers sleep?'

"They looked a little surprised at my question, but answered: 'Why, right here!'

"Yes, but what keeps you from going over the falls?"

"Why, you have to keep wrigglin', of course."

"What! Wriggle in your sleep!"

"Yes, of course."

"Thinkin' they were gysin' me, I started off on a tour of exploration with several fellers 'bout my size. After swimmin' round the pool half a dozen times I begun to git tired in dead earnest an' felt as ef nothin' but a nap would rest me, so turned to my companions an' said: 'I'll be much obliged to you ef you'll show me to a bed room.'

"They all looked puzzled, so I explained, 'I'm tired and want rest. Ef I stop for only a minute I'll go down stream.'

"Look! look!" said one of the fellers. 'Look at that lubber; he's goin' to roll off those rocks an' git a-duckin'.'

"I looked up at the feller I used to be an' he had slipped down. It did look as though the lazy hulk I had left was goin' to foller me. I begun to sympathize with him, for I could see by the way he was lyin' that his back was on the sharp edge of a rock, an' must feel somethin' like mine, for I was gitten most awful tired of wrigglin' against the current. I drifted down a bit when one of the fellers swam to me an' said: 'Say, stranger, don't you know you're gitten too near the falls; you'll be smashed to pieces ef you go over there.'

"Waal, I begun to paddle back to the place where I left the rest, but it was hard work, an' I was hot an' felt sweaty in spite of bein' in the water. When I did git back I was clean tuckered out an' blowin' like a porpoise.

"I'd only been in the water an hour, but it seemed to me an age. I'd a give anythin' in the world to have been out on shore an' said so to one who had kinder looked after me.

"Why," he said, 'you wouldn't last long there; you'd be drowned.'

"I gave a sickly kind of grin an' said I'd risk it ef I knowed how to git out, but I said I've got to have rest of some kind.

"Don't you ever stop wrigglin'?" I asked, wishin' I could rub my back, for it seemed almost broken.

"No," said my friend; 'never! unless you want to go over there,' givin' his tail a twist in the direction of the falls.

"I looked up longingly at my former self an' to my horror saw it had slipped down an' was just balancin' on the edge of the rocks.

(Continued on page 578.)

# Along the Carolina Coast

By WILLIAM PERRY BROWN

**I** SUPPOSE there are few more deserted regions in America to-day than the hundred or so miles of coast line running from Virginia Beach on to Cape Hatteras.

It is as solitary as if it were a thousand miles from the haunts of men, instead of lying on the eastern edge of two populous and prosperous States. There is a strip of sand varying from one hundred and fifty yards to a mile in width—roughly estimated—that separates the Atlantic Ocean from the sounds inland, and along these sands, on top of the highest dunes, are built the life-saving stations of the coast guardsmen.

It had long been my wish to vary certain fall and winter outing trips with something different from the orthodox lake, river, mountain, canoe and other hunting or fishing expeditions. I had spent days in the great Dismal Swamp, had also gone a few trapping rounds amid the swamps and marshes that make the Pedee, Capt. Fear, and other Carolina rivers so popular with the hunting and fishing fraternity, large clubs of whom occupy yearly certain leasing privileges that give them and their friends unequaled hunting and fishing opportunities during the open season.

On a trip from my West Virginia home to Norfolk, one autumn, I met an old-time Florida sportsman whom we will call Ben Bolt, for that is not his name. After confabbing together and finding that we both wanted something new in the line of outing experience, Ben said to me:

"Let me tell you what we'll do. We've tried the swamps, the sounds, the poccasins and the pinewoods, but we've never tried the sea-beach."

"Do I understand that you——" I began.

"You can understand this, Billy. We—you and I—want to go somewhere, not too far from God's country, where we can turn savages, wear what we like, eat as we please, fish, hunt, swim, booze if we wish, and all this amid a sort of life we have not been with before. We don't want it to be too darned expensive either nor do we want it to keep us away from home, and worses things, more than three or four weeks. What say?"

Now Ben being, as I said, a very old friend, with whom I had roughed it in various parts of Dixie, from mountains to sea and gulf, his words put me to studying. Next day, on the street, we met a kindly spoken man whom Ben introduced me to as one of the Superintendents of the Atlantic Coast Life Saving Service. He invited us to lunch with him at his club.

During the hour or two of talk that followed, he gave us more straight pointers upon the wild, free life led by the coast guard, yet which is allied to strict discipline in behalf of man's noblest of human efforts, that of saving life and property along the sea, than I had ever listened to before.

"There's our new next vacation all laid out, said Ben. "Can you get off next month?"

I saw that the superintendent looked a little mystified. So Ben proceeded to explain

what we both, by that time, wished to do during the autumn season, when open game shooting was on.

It met with his instant approval; in so much so, that he politely regretted that the exigencies of his office prevented his going with us, at least for a few days.

"Of course we'd like to have you, Captain, but in lieu of that, you might give us, before we start, letters to the keepers on our route, and that will help us almost as if we had you along yourself."

Ben grinned as he said this, for we both

the best way is to jump right into the middle of it, especially if you are limited as to time. But it was rather a long jump and took us three days to make it from Norfolk. We traveled part of the way by rail, then by steamer to Manteo, thence by rail to Naggshead, where was a hotel, and from there by rowboat to Bodies Island, where was the first station north to which my friend's friend, the superintendent, had given us a letter.

We now began to understand why tourists and hunters are not so plentiful in those parts, for of all tiresome journeys those three days of

A NORTH CAROLINA CABIN.

knew that a good word from the superintendent would smooth out wonderfully many of the little kinks that may occur to two wilderness tramps such as we already proposed making of ourselves.

With an affability that was not less marked than his prompt acceptance of our proposals, he the next day gave us letters to certain keepers along the Carolina coast; and these, when we later came to use them, we found quite as potent as the ring of some far eastern potentate of the Arabian Nights period, in procuring for us the welcome and entertainment we hardly had hoped to find.

In consequence of these things, some two weeks later, the two of us found ourselves at Bodies Island, well along on the North Carolina seaboard. We had concluded to skip the Virginia coastline as being too near the towns and the mainland. If you are out for wild life,

the long jump were about the most wearisome I have encountered.

The station at Bodies Island was at this time manned by a negro crew, the only colored crew along that long stretch of beach. It was under command of an old-fashioned Virginia darkey, who called himself "Cap'n Jake," and claimed to have been, as a boy, the body servant of a certain Major Jennings Wise, who was killed at Roanoke Island during our Civil War. I have heard since that a white crew has replaced the darkies; but know nothing definite.

"Cap'n Jake," after we had read the letter to him, put himself at our disposal. He "lowed" that snipe were plentiful on the lower end of the island, and drove us to the flats himself, putting us in the same blind where he said ex-President Cleveland had sat when making his last visits to the locality. We had but small luck, it being too dry; and both of us

bagged only half a score of yellowlegs. This weighed on Jake's spirits somewhat.

"Why, suh, de las' time Misser Clevelan' was hyur, he plum filled one of our biggest bags, f'om noon ter sunset. Yass, suh. He sho' did."

Driving back to the station and declining Jake's invitation to a late dinner, we gathered together our belongings and pushed on several miles further to New Inlet. Here the ocean breaks through a sandy barrier to pour its tides into the northerly end of Pamlico Sound. On the other side was the next station, and as we had telephoned ahead, a small boat was waiting for us at the inlet.

Captain Wescott received us here; a fine looking man in his thirties, hard as nails physically, and showing the good effects of open air life, even if accompanied by certain perils of the sea. He read our letters, told us to make ourselves at home and make the station our headquarters. At that time most of his crew were away on furlough, so we accepted without discommoding any one else. That evening we spent in getting out our fishing tackle, for the inlet is renowned for the excellence of that kind of sport. Indeed, I have seldom anywhere had better results in hand-line fishing than here.

The inlet is, perhaps, half a mile long and some forty or fifty rods wide. When the tide begins to rise then is the time that the fish make their way up the channel from the open sea. These are principally sea trout, bass, skipjack, sheepshead, red snappers, bluefish with other kinds, all eager biters yet rather capricious from day to day as to the kind of bait they would take most readily. The first day they bit savagely at any bait we offered, from bacon rind to clams. But the next day crab-meat appealed to them most; while on another, it would be live minnows or very small mullet. Now and then we would get a huge eel, which he had to kill with a club, to prevent its tangling our lines.

All fishing was done with a stout hand-line with a heavy sinker. When the incoming or outgoing tides were at their swiftest, the fish would bite most greedily. Sea crabs bothered us some; for unless the fish took the bait at once, the great claws of some crustacean would grip the bait and hang on until we pulled out and put an end to Mr. Crab.

Though we slew many and cussed the whole crab generation, their numbers were countless, and they are always hungry, whether the fish are or not. At slack water the fish would cease biting, but the crabs were still on the job. The fact that we did not want them, made no difference. At last, growing tired of hauling in sea fish, we improvised a trolling line, and with the aid of a big tin spoon, some hooks, a few feathers, and a strand or so of catgut, we made, with the captain's aid, a very good imitation of a trolling outfit and had splendid sport, sailing up and down the inlet or rowing when the wind was slack, with the weakfish. At times we would hook a monster that would wet us from head to foot before we could secure it. Exhilarating? You bet! It put mere bank fishing in the shade.

One morning about dawn Captain Wescott awoke us with the news that the drum were along shore. Quickly we were out and getting ready; for the coming of sea drum is like angels' visits. Just as the sun came up above the
