eastern rim of blue water it found us on the beach. Among the incoming billows we could detect the interweaving of fins and tails as the surges swelled and shrank. Fiddlers and sand crabs were to be had for bait, the latter being taken anywhere by digging with a spade down a foot or so and depositing the wriggling crab in a large sack which was soon filled.

The lines used are exactly like those used in cod fishing, thick as a lead pencil and with a large hook fastened to a strand of wire or heavy catgut. The sinkers weighed about a half-pound each. Removing all our clothes but our shirts and hats (there were no women about) we entered the surf to the waist and sent the weighted and baited hook spinning as far as we could out into the boiling surf. The captain, being a deft hand, could cast his line a hundred feet. I was much less dextrous. The point was to cast the hook out beyond the nearest breaker, and it requires practice as well as strength. The line must be held taut, for if a drum gets head to seaward it will almost certainly break away.

My first fish was a big one, and though I knew what was necessary, it gave me such a jerk, that I realized it had turned. I stumbled and went under, but still held on. Yet the loose line a second later told me that my fish had made good his dash for freedom. My hat also had started for Europe, so that I had to swim a few licks to stop that voyage.

The captain explained that the proper thing to do, when the drum strikes, is to run for shore with the line over one's shoulder, then keep on going inland until your drum is landed high and dry on the beach. My second strike, however, was a beauty, its scales sparkling like opals in the sun, and I succeeded in landing it without a mishap. One of the coast-guards with us said it would "go eighteen pounds." Four of us caught seventeen big fellows, and it took several hours of hard work to accomplish this, as eels, sea-crabs, or a shovel-nosed shark would, four out of five times, steal our bait. We fully enjoyed this experience with the sea-drum, but we were rather disappointed when it came to eating them. Something might have been due to the way we cooked them. At these stations there is no regular cook, and with much of the most delectable wild foodstuff close at hand, our meals were by no means up to the Sherry or Delmonico standard.

Fat meat fried, heavy soda biscuit, druggy coffee without milk, were the staple article of diet. When it came to cooking fish, or wild duck, or any other of the naturally delicious game foods which nature so lavishly provided, the same frying-pan or a boiling pot was about the only method which we or the lifesavers could devise to make things unpalatable. Our only drinking water, too, was that which dripped from the roofs into tank cisterns; it was generally too warm, and often impure.

One day Ben, having caught a magnificent sheepshead that weighed over fifteen pounds, asked the captain to turn him loose in the kitchen for an hour or two. He had privately told me that it was a shame that one of the finest fish that swims the sea should be chucked with fat pork in a pot, or fried in a skillet with rancid bacon. When Ben served up that fish it was so good and toothsome a morsel, with its oyster dressing, its gravy, and certain

other spiced and oniony accessories, that Ben was unanimously deputed to be our company cook as long as we remained at the station. Ben grimaced some as if the promotion had its disadvantages, but faithfully accepted the honor on him thus bestowed.

Having had enough of fishing, we started in a cart with our traps and decoys to a place about four miles south of the station. Our route was along a sea meadow, alternating with stretches of dry marsh. Then, striking a shallow lagoon, we followed it down, Ben on foot, I driving, when a brace of mallards rose up. Ben let drive with both barrels, getting the ducks, but so frightened our pony that it started full speed, pitching out most of our things, nor stopping until I steered it into a miry bit of marsh, where it became bogged, and so brought perforce to a standstill.

We placed our decoys in a small pond, sat for an hour or two more without getting a shot, when Ben took his gun and straggled off. I lit my pipe, opened the pages of a recent *FOREST AND STREAM*, and was soon lost to my surroundings.

When I finished smoking and happened to look up, there were a couple of willet standing among the decoys bowing and scraping to each other not unlike a couple about to dance. On my making a move, off they flew. Presently along came one of our coast guards from the station with our dinner. No signs of Ben Bolt, however. While I ate my part, some gray-back snipe flew by, settling on shore several hundred yards away. I gave my gun to the coast guard, who was anxious for a try at them. He actually crawled most of the way, yet, in spite of his care, they rose before he could draw bead. Toward night, Ben appeared, loaded down with snipe and duck, among them teal, widgeon and a real canvasback. About the time we were discussing when we had better start back, a flock of calico-backs sailed by. We fired, and this was the signal for a continued stream of bay-birds. The tide was fast rising, and we had to put our decoys on the higher levels of marsh and stand in water ourselves. The mosquitoes came out in force, late as it was in the season; but the sport was now too exciting for us to give heed to small annoyances. We fired away sixty odd shells, and only ceased when it was too dark to see the birds. Tired and savagely hungry we were, when we reached the station, but we had a dinner of broiled snipe, fried duck, and the ever-present fish, which, badly cooked as it was, we fully enjoyed. After all there is no sauce for good eating like the relish imparted by hard, out-door sport. We sent eight dozen birds to the nearby fishing village of Chickemaconico, as a present to the villagers. Then we slept good and hard all night.

There are two other little villages strung along the lengthy strip of sand between the ocean and the sound. These are Big Kinna-keet and Hatteras. The inhabitants of these are practically cut off from the outer world, living their simple, hardy lives and preserving their old-fashioned ways. In many usages and customs they are fully a hundred years behind the times. The women are hard-working and uncomplaining. They are extremely religious and remind one in many ways of the enduring stoicism shown by their sisters in isolated communities in the Southern Appalachians. In

fact, I have never seen more devout, rigid Methodists or Baptists than one finds in these sea-bound villages, and this applies to men as well as women. I doubt if there is a fiddle or a fiddler anywhere among them. All that goes to make up the social life of average American girls elsewhere—that is, parties, dances and so on—is practically unknown here. The maidens marry as soon as they reach the age where childhood and womanhood meet. Maternity, with all its cares, duties and drudgeries is assumed, and by middle life, many of them are old women. But few vegetables are raised; milk, butter or fruit they seldom taste. These luxuries are not adapted to their storm- and sand-swept coast. Yet they seem happy, contented, and if they do not enjoy life keenly, they are compensated by not feeling too deeply. Can the world, after all, give its children more than content? In all stages of social existence, it is the one thing that makes life more endurable.

Leaving New Inlet, with its hospitable captain and crew, we made our way station by station along that fifty-mile stretch of coast until we finally arrived at Cape Hatteras. Here seemed to be the jumping-off place of creation. Here we were as much cut off, apparently, from the rest of the world, as if we were on an island in the midst of the ocean. The cape itself runs ten miles westwardly toward Pamlico Sound, with the Atlantic waves on either side. It looked to be a mile or so broad. Gazing seaward from the top of the lighthouse we saw, some ten miles away, the dreaded Diamond Shoals, where lie, possibly, as many bones of men and ships as in any other locality of our extensive sea coast. The Cape, jutting out into the Atlantic, catches the warm airs from the Gulf Stream, which, mingling with the colder breezes from the land, produces those fogs and more violent atmospheric disturbances that render this ocean neighborhood, one of the graveyards of the sea.

The sandy coast rim here is more thickly wooded than further to the north, but the timber is dwarfy and storm wrenched, and of scrubby oak varieties. Much of the land is marshy; deer abound in the coppices, and feed amid the tall sea grasses, but they are very wild and shy. As for wild fowl, they fairly swarmed at Hatteras during our stay there. It seemed as if snipe, and other smaller birds having kept along the coast rim, were here cut off from further flight southward by the sea. With a dozen decoys we hunted and shot until we were tired; in fact, we might have killed dozens more each day had we so minded. At that time—and for all I know to the contrary, it may be now—such game laws as were in force were very laxly construed, anywhere outside the leases or game privileges enjoyed by the various clubs, which here and there help the game wardens to regulate in some degree, the predominating tendency on the part of hunters was to overdo the killing of game when wind, weather and opportunity make bird slaughter attractive.

Our friends, the coast guards, told us that during the fall and winter Hatteras is a perfect reservoir for small game. Even deer, from the mainland, for some reason swim the Sound and find refuge there. Wildfowl, storm-driven,

(Continued on page 577.)

## Fur-Bearing Animals Now Protected in Tennessee.

NASHVILLE, Tenn., March 29.—*Editor Forest and Stream:* Our Tennessee lawmakers have recently enacted a law which will afford a great degree of protection to fur-bearing animals and which will go far toward putting trapping on a more humane plane. Of our 132 legislators, only four voted against the bill.

I have reason to believe that a similar law can be enacted in any State in the Union if the same plans are employed that I followed in prosecuting the campaign to secure the enactment of this law. My success in putting this trappers' bill through is due, to a certain extent, to an educational campaign—a campaign of information and enlightenment as to the good fur-bearing animals do farmers and the enormous damage done to stock by steel traps set in the open.

I would be pleased to furnish anyone with information as to how I conducted this campaign. Two years ago there was introduced in our General Assembly a bill somewhat similar to the bill that has just been passed, but there was in the former bill a provision permitting the exemption of counties whose representatives objected to the bill. Only one county accepted the bill; that was Davidson county, whose representatives introduced the bill. That bill was not, by 50 per cent., as strong as the bill that has recently become a law, hence one must realize from the little opposition we had in getting the present bill through that no ordinary means or methods were used in getting the bill through.

I am now publishing a 32-page booklet, entitled "Fur-bearing Animals—the Farmer's Best Friend." This booklet tells of the good that fur-bearing animals do farmers, and reviews bulletins of the Agricultural Department, Washington, warning farmers against allowing their fur-bearing animals to be destroyed.

I believe that the majority of the farmers who read this booklet will, if necessary, adopt drastic measures to stop the setting of steel traps for foxes, skunks, weasels and the like. I shall place copies of this booklet in the hands of all farmers within a radius of ten miles of Nashville. I will take pleasure in mailing a copy of the booklet to any one who desires to see it, and I will also furnish copies in quantities to persons who desire to distribute them among farmers in their localities.

The following is taken from the index of the booklet, which gives one an idea of the subject matter it contains:

A review of some of the bulletins sent out by the Agricultural Department, Washington, which shows the enormous amount of danger done to crops, fruit and forest trees each year by pests that constitute about 90 per cent. of the food of fur-bearing animals.

Contents of the stomachs of 105 foxes.  
Government report on food found in stomachs of thirty-two foxes.

An Ohio farmer tells of the good done farmers by foxes and skunks.

Foreign countries importing from the United States fur-bearing animals to restock their countries.

A ground squirrel and the contents of his cheek pouches.

Weasels save a large nursery.

The farmer who loses \$1,000 worth of alfalfa to get revenge on a fur-bearing animal suspected of killing a fowl.

Foxes schooling their young.  
Story of the fox and the farmer.  
How to make fur-bearing animals move their young.  
Story of the parson and the fox.  
Foxes do not catch pigs.  
Foxes do not kill lambs.  
Birds—the good they do farmers in destroying insects.  
Trapping from a humane standpoint.  
Tennessee law regulating the killing and trapping of fur-bearing animals.  
Fox breeding—hides that bring \$2,500.  
Foxes do not destroy game birds.

Following my signature I give your readers the principal features of the trappers' bill, which has been signed by our Governor.

JOHN F. DRAUGHON.

### A SYNOPSIS OF THE BILL

Prohibits the setting of steel traps, dead falls, nets, spring poles, or the like, and the killing, or attempting to kill with gun, foxes and other fur-bearing animals, on the lands or in the waters of or in the waters adjoining the lands of any person in Tennessee, without first getting from the owner of the lands a written permit to use such devices to catch or to kill fur-bearing animals between noon Oct. 15 and noon Jan. 15 only, which permit must be upon the person using such devices at the time he is trapping for fur-bearing or hair-bearing animals or killing with gun fur-bearing animals. This permit becomes void at the end of the open season, Jan. 15.

Requires a person setting a trap about a hole, cave, den, hollow log, stump, or the like on the lands of another, to place the trap twelve or more inches within the entrance to such hole or the like.

Requires the trapper to inspect his traps at least every thirty-six hours.

Requires the trapper, when he finds stock, fowl or dog in his trap on the lands of another, to make report to the owner of the lands, giving in writing the date of finding such animal or fowl, together with a full description of such animal or fowl.

Prohibits any person from setting a steel trap, dead fall, or similar device in the open, where it is liable to do damage to stock, persons, fowls, dogs, or the like, and makes the trapper liable for all damage done by his traps.

Permits anyone finding traps, dead falls or similar devices set or placed contrary to the provisions of the act, to destroy such devices.

Penalty: A fine of from \$10 to \$25 or thirty days in jail, or both, at the option of the court, for each separate offense. The setting of each trap, dead fall, or similar device constitutes a separate offense; each killing or attempt to kill with a gun a fur-bearing animals upon the lands of another, without his written permission, constitutes a separate offense; and each violation of any provision of the act, such as failure to visit traps every thirty-six hours, the setting of traps in the open, and each violation of any other provision of the act, constitutes a separate offense.

Grand juries are given inquisitorial powers concerning violations of the act and are required to make due presentment of all persons violating the provisions of the act.

Circuit and criminal court judges are required to call attention to the act when charging grand juries.

# NATURAL HISTORY

## A Pestiferous Blackbird.

MONROE, Mich., April 15.—*Editor Forest and Stream:* In the early days of the settlement of Michigan were found now and then an individual who had the interest to note many interesting or unusual things and occurrences, and to record them in his diary for the benefit of those who cared to read them for their own pleasure or profit. In this way there has been much preserved of the life and experiences that would otherwise have been lost.

One of those observing and far-seeing old settlers in the county of Monroe, along that beautiful and historic stream, the Riviere aux Raisins, as it was called by the French, who were the first to make homes in this part of New France, was one Ellis, who began publishing a weekly paper in Monroe in 1825. Ellis not only published a weekly paper, but he also kept a journal in which he recorded things that perhaps were used in the paper, or were preserved in his diary independently of the newspaper.

During my researches for historical matters for a history of this county which I have prepared, I came across a lot of Ellis' memoranda and written narratives, written in 1826-27. I find under date of Feb. 21, 1829, the following relative to a peculiar blackbird that is not now known in this part, the particulars of which may possess interest for some of your ornithological readers. Ellis says: "There is a small blackbird infesting the west end of Lake Erie, and the country along the Detroit and St. Clair rivers, and possibly to some extent the interior. It is one of a very insignificant appearance and its weight not much more than two ounces. The male has a red spot on each wing. For capability of destruction there is nothing of the feathered tribe to compare with them. They attack all kinds of grain as soon as it is in the milk stage, yet they have a special fondness for oats, next in favor being wheat and Indian corn, such as is raised by the Indians for their own use. These birds have shown themselves capable of blasting the result of a whole season's work by a farmer in a single day.

"We have seen one bird alight upon an ear of corn, commencing at the top and stripping the husks down as it became necessary to reach the kernel, and then devour the whole ear in less than an hour, constituting a bulk and weight four times the weight of the bird. Their capacity seems without limit, for they appear to be capable of feeding from sunrise to sunset, with very little intermission. Then when their day's feasting is finished, all the birds within ten miles resort to one spot for their night's rest. This takes place among the coarsest grass and wild growths, where they huddle close together at the same spot every night. In November they migrate to a more southern latitude and return about the last of February or first of March, greatly diminished in numbers. In May, the congregation is broken up, the masses disappearing

in pairs to build nests and rear their young. About the middle of July they assemble in fields where grain has been grown, in countless numbers, and recommence the work of destruction. The farmers and their families are kept busy making all kinds of noisy demonstrations, using any sort of firearms that they may be fortunate enough to have on the premises. Scarecrows erected in the fields, they pay no attention to, and soon become accustomed to the firing of guns, shouting and other war-like demonstrations. Thus it results in the farmer and his family having no end of violent exercise of voice and limbs and losing the major portion of their crops. All sorts of expedients were resorted to to break up these annual robbers' visits, but to no purpose. The legislative council once took cognizance of the evil and offered to pay twenty-five cents per hundred for all blackbird scalps, but even this accomplished nothing.

"Numerous cases have been reported where the individual losses from this cause have exceeded \$500 in a single year. Another serious loss to the farmer was through the ravages of the enormous flocks of passenger pigeons, which made this county one of their annual roosting places. After wheat and oat seeding in the fall the great flocks of these birds will sweep down upon the fields and pick up every kernel, necessitating the replanting twice or three times in a season. A dead tree standing in one of these wheat fields would be so thickly covered by pigeons that the tree had the appearance of being in full foliage. To-day nowhere in this country can be found a pigeon, and the blackbirds of the kind described are no longer seen."

BENBROOK.

## Sprigtails and Plum Puddin' Bird.

PACKER, Conn., April 23.—*Editor Forest and Stream:* On page 463 your contributor, Scolopax, tells about a pair of sprigtails he found on the Delaware marshes, the duck dead, and the drake badly injured. The writer was at a loss to account for the incident except that the duck had been wounded by a spring shooter, had fallen and died where found, and that her mate was faithfully staying by her dead body.

No one thinks less of a spring shooter than do I, and this is not written in his defense, but I wish to suggest a possible solution to the problem. Will Scolopax inform us if there are any telegraph or telephone wires in the locality where birds were found? Many birds are killed and badly injured by flying against these wires, usually in the gloaming, as the wires may easily be seen in good light. Such birds as woodcock, duck, quail and ruffed grouse that fly swiftly late in evening and early in morning, and at about the usual height of these wires, are the heaviest sufferers, and not a little of the decimation occurring among these game birds is due to this cause.

The writer on the "plum pud'n'" bird failed

to give one of the names he is known by in the Central West. In Indiana and Illinois it is known as thunder pumper.

Mr. Forbush classes it high among the herons as a useful bird in catching grasshoppers and other insects. Its field of operations is so universally in the marshes, ponds and streams, and so rarely in the cultivated fields, that little value should be given it. And it, as well as the other herons, are very destructive to fish, both game fish and the small fry on which the game fish feed. Some writers also give them credit with eating the dead fish, that but for them would become carrion, and thus a menace to health and comfort of those living near the waters. This is but another example of the sensational bird lovers' nature faking.

E. P. ROBINSON.

## Bird Lime.

DELHI, N. Y., April 23.—*Editor Forest and Stream:* In your paper I notice a correspondent asks about bird lime for getting rid of English sparrows. A friend of mine used a big wire rat trap, setting it and baiting it with grain. He would leave it out all night and in the morning it would contain numbers of sparrows which he drowned.

The plan worked successfully until his little girl pitied the birds she found in the trap one morning and let them out. He never was able to catch any more that way.

### "Labrador for the Sportsman."

MATTEAWAN, N. Y., April 29.—*Editor Forest and Stream:* Supplementary to my article "Labrador for the Sportsman," which appeared in a recent issue of FOREST AND STREAM (April 5), it might be interesting to the tourist or sportsman to learn that during the present season of 1913 the Reid-Newfoundland Company will install a double steamer service between St. John's and Hopedale, Labrador, with stops at the intermediate ports on Newfoundland and Eastern Labrador between Battle Harbor and Hopedale. These steamers will sail on Thursday of each week from St. John's. A daily express train service has also been established between North Sydney and St. John's. The steamers Bruce and Lintrose, leaving North Sydney every day except Sunday upon the arrival of the inter-colonial railway express, will connect with these trains.

This increased service with Labrador will make it possible for sportsmen to visit the coast with a much less expenditure of time than formerly, and it offers a possibility of a fairly good trip within a period of four or five weeks that should give ample opportunity for both rod and gun in this new field for sportsmen.

DILLON WALLACE.

### North Dakota.

GALESBURG, N. D., April 18.—*Dear Grizzly King:* We have had a good winter, few storms and not much snow. Prairie chickens have wintered well and are numerous around the big corn fields. If the hatching season is favorable, shooting should be great next fall.

A young man, a friend of mine, who was farming last season up near Regina, Sask., told me he saw some chickens light near his house and took the gun and went to get some. He walked around until the birds flew, and shot and missed with both barrels. Just then he heard a fluttering by his right foot, and looking down saw he had his foot on a chicken's leg. He stooped down, got the bird, wrung its neck and pocketed it, then he heard fluttering by his left foot, looked down, and saw that his foot was on another chicken's head, stooped down, got that one and killed and pocketed it also. That was all the birds he got and he went back to the house. I have known the young man many years and believe him to be truthful.

J. P. WHITTEMORE.

### Congratulatory.

NEW YORK CITY, April 2.—*Editor Forest and Stream:* I attended the Travel Show, and found it to be most interesting. Your exhibit was indeed very attractive and seemed to draw the people. The Travel Show number of FOREST AND STREAM is mighty interesting and the cover design the best I have seen you put out. I wish you continued success.

LOUIS K. HYDE.

PHILADELPHIA, Pa., April 6.—*Editor Forest and Stream:* Inclosed find three dollars subscription for the very welcome weekly visitor.

As a rather odd nature note I can report seeing during a recent spring ramble near Lansdowne, Pa., a blackbird with a pure white tail. Quite a neat combination for a new style, but not likely to be extensively copied.

W. H. EDDY.

## In the Haunt of the Muskellunge

By E. E. PIERSON

IT was almost to the jumping-off place and nearly beyond the pale of civilization, but with muskellunge and black bass as the lure, distance lends enchantment, and no one objected to the long ride that carried us the entire length of Wisconsin. It was at Mercer in Iron county, the extreme northern point, that the sleeper left us, and, arrayed in our fishing togs and loaded down with our baggage, we boarded the carryall of our guide, Fred Vaughn, for a drive through the wildwood to Long Lake. Vaughn is the owner of an island in Owl Lake, some distance beyond, and is an authority on hunting and fishing. We were fortunate in securing his consideration and chaperonage, as his knowledge of wood lore and the finny tribe proved of immense value to us during our sojourn in the far north. The road was rough and speed was out of the question. It carried us through a forest denuded by fire, and fallen pines, tamarack and other trees, all but blocked the passageway.

We covered the eighteen miles in five hours, regardless of the debris in our way, but there was relief when we halted on the shore of Long Lake, in the heart of the wilderness. Our teamster drove back to Mercer with instructions to return for us one week later, and our party then boarded skiffs and canoes for Vaughn Island, the headquarters of our guide, and which was to be our abiding place for seven days. It required about one hour to paddle across the lake and install our belongings in the comfortable log cabin situated in the center of the small island, the territory not exceeding three-quarters of an acre. No one mentioned dinner, as all were anxious to test out the choice assortments of rods, lines and hooks, and no time was lost in getting into the boats.

The afternoon was spent in casting, but without result until on the return trip, when George Kennedy dropped his hook into a weed-bed. He was rewarded with a vicious strike, and after fifteen minutes' play, landed his first muskellunge, a five-pounder. Another member of the party secured a wall-eyed pike, and these, with a wild partridge, furnished supper. Having missed dinner, the first meal in the primitive was most appealing. Desiring an early start for Owl Lake, the party retired early, and found, upon awakening, an appetizing breakfast of fried muskellunge, bacon, potatoes, graham crackers and loganberries.

It was decided to spend two days on Owl Lake and provisions for that length of time were packed in bags, and loaded into the skiffs. After traversing the length of the lake, five miles, we hit the trail for Owl Lake. To any one but the guide, the trail was a blank, but Vaughn led the way and we followed in single file. In most places the timber was so dense the sun's rays could not get through sufficiently

to operate a camera. We crossed bogs where single tamaracks had been cut and rudely extended by some guide in years preceding. Probably not twenty persons followed this trail during the year. The shade and dampness produced moss upon the bark which resulted in treacherous footing, giving our party the impression of walking over a greased pole. The scene would have enthused an artist. The frost had tinted the leaves, while the aroma of the pines saluted the nostrils refreshingly. Occasionally a startled partridge would be flushed and scuttle away ahead of us. After an hour's tramp, we emerged upon a small clearing, and, in the center found a hunter's cabin. Our guide informed us that it was the property of a Milwaukee sportsman who inhabited it once a year, during the deer season only. Leaving this spot after a brief rest, our party walked for forty-five minutes longer until we reached the south bank of Virgin Lake. Two boats were in storage and were boarded for a trip across the water to the opposite shore, requiring a pull lasting fifty minutes. A large flock of mallards flew off in stately style as we crossed the lake, but the shotguns had been left behind and the birds flew on unmolested. Landing on the opposite shore of Virgin Lake, another portage of three-quarters of a mile was announced by the guide, crossing the ridge which separates Virgin and Owl Lakes. Finally, we emerged from the timber to see Owl Lake, one of the prettiest, wildest and gamiest bodies of water in all Wisconsin. Pine timber, untouched by the lumberman's ax, and water, were all that greeted the eye. Boarding the third set of boats, we rowed thirty-five minutes and then pulled up at Owl City Island, a half acre in extent, with a cabin in the center. The island is located in the exact center of Owl Lake.

We were now at the end of our journey, forty miles from the nearest habitation of human beings. There was no lack of owls, however, and the "Owl City" cognomen was probably given because of the numerous birds of that species in the vicinity. After a hasty meal, we proceeded to fish. A few pike and small-mouth bass were secured—caught with hand lines and grasshopper bait. The real sport was secured on the following day. Kennedy hooked a bass estimated at six pounds, casting with a No. 5 spoon; but after a pretty fight, he got away. He had more bad luck after hooking another bass, using an eight-inch sucker minnow for bait. While lazily trolling the dead sucker, he felt four sluggish jerks. Then the line tightened, the rod was bent almost double, and a fish broke water about seventy feet behind the boat. The guide exclaimed: "There he is; a big small-mouth!" The guide paddled to the middle of the lake and then ensued a fight that will be memorable to the party. That

small-mouth put up the prettiest battle imaginable, lasting fully twenty minutes. There was not a second's lull in the entire period. He rushed and cleared the water two feet in several instances, and then would go straight to the bottom. After taking forty feet of line, he broke for the boat like a flash. Kennedy did his best to reel up the slack, but in an instant he again cleared the water not eight feet from the boat, shook his head vigorously, and again went down and won his fight. Everybody felt badly when Kennedy brought up his empty hook. The guide explained that the bass had fought until he had worked a slot in his mouth and turned the hook out. The hook used was a blue steel, thin variety, about two inches in length.

The next morning at 5:30 o'clock, we were at it again, casting before breakfast. Kennedy and E. K. Crothers in one boat, with the former casting and the latter paddling, had the big experience of the day. At a point forty feet from the bank, Kennedy dropped his spoon close to the shore. There was a huge wallop, but no strike.

"Missed it," murmured Crothers.

The words were no sooner uttered than there was a strike. The fish turned completely over, coming half out of the water in doing it. It was then that Kennedy got the sensation of "some strike." It really appeared as if there was the strength of a man at the other end, and, from then on, there was "something doing."

Crothers yelled, "Let him go!" and commenced paddling vigorously for deep water. Kennedy let him take some sixty feet of the line before checking, and as he did, the fish came out of the water away off to one side. Down he went again, taking more line. Crothers called to his son Kirk to come on with another boat. Crothers was handicapped with the small, hewed paddle, but made good progress, toward deep water. Kennedy had the fight of his life with that fish. After fifteen minutes, his thumb began to ache, and he told Crothers that he was afraid that he could not hold the fellow much longer. He worked from one side of the boat to the other, down and up, then in and out. Kennedy was getting weak, and his face showed a pale hue. There was a .22 rifle in the boat and Crothers asked Kennedy to haul him in toward the boat. He complied and the fish came with steady, short jerks. At a point twenty feet from the boat, he came to the surface enough to show his shining back, but he did not jump, indicating that he was weakening. Crothers seized the rifle and put a bullet through his spine, back of his neck. The shot was a spectacular one and the fish turned over on his side. He was then hauled to the boat and lifted in by Crothers. The monster weighed fifteen pounds and was forty-three inches in length. He took up about all the spare room in the boat. Kennedy let out a whoop like a Comanche Indian and aroused the echoes. The prize was a muskellunge and was too big to eat. He was packed in ice and a week later mounted. He now adorns the dining room of Kennedy's home in Bloomington, Ill. In his mouth dangles the No. 5 skimmer spoon and little triangle of red flannel that lured him to his doom.

That was but one of many fishing incidents that made up a memorable trip. We sighted five wild deer and could have easily secured one

or more of them but for the season (September) protection. Our distance was but forty yards, the group comprising two bucks and three does. They made a pretty sight as they scampered through the timber, after our approach.

Crothers caught two five-pound, red-eye, small-mouth bass after a long battle, one requiring forty-four minutes to land. Kennedy, who was handling the paddle, attempted to take a snap-shot with his camera, but caught him just before the leap from the water, his back barely showing.

We caught eighty pounds of wall-eyed pike while at Owl Lake. On the return trip from the latter lake, we found a porcupine inspecting one of our boats at the north end of Long Lake, but all films were used in the camera and unfortunately we could not photograph him.

It was with regret that the wagon and teamster was descried slowly approaching our camp at the appointed time, at the end of the week, to haul us back to Mercer. After a fond farewell and with warm spots in our hearts for Long Lake and Owl Lake, we hastened back to civilization and the daily grind of our desks.

### Fishing in Louisiana.

NEW ORLEANS, La., April 20.—*Editor Forest and Stream:* Fishermen, much disappointed by had conditions of weather and water during the first two weeks of April, have been having the best sport of many seasons during the past week. Bass, croakers, perch and green trout are biting well in the bayous, and the streams tributary to the lower Mississippi, despite the cooler weather, but the apparent increased prevalence of the funny tribes, probably is due more to clearing water after the rains of early April than to any real additions to the fish census.

Sunday, T. H. Lyons, Sheldon Thompson and Teddy Lyons, Jr., caught 300 perch and a few green trout at Mr. Lyons' camp near Dunbar. At Chef Menteur, ten boats were out Sunday, and all secured good catches. J. W. Barkdull got 185 croakers, probably the record catch of the day. The water at the Chef is reported muddier than at any of the other fishing resorts. On Baratania, Alfred Petit, William Anderson and Ed Putnam got fifteen dozen perch at Peach Orchard. P. H. Meauglhliln and Alfred Forno, fishing at Walker's Landing, took ten dozen perch, while James McCan and Sidney Rivero, at Bertheud's Landing, hooked twenty-two dozen.

JUAN DEL SUR.

### A Whopping Brook Trout.

VALENTINE, Neb., April 15.—*Editor Forest and Stream:* On Saturday, April 5, while fishing in the Minnechaduzza Creek, a small spring stream tributary to the Niobrara River, in Cherry county, Nebraska, I caught a brook trout (*Salvelinus fontinalis*) weighing five pounds and six ounces. It measured 21¾ inches from end of nose to tip of tail, and 15¾ inches around the thickest part of the body. It is a male fish and a most beautiful specimen. It is so much larger than any brook trout I have ever seen before that the thought occurred to me how large do brook trout grow and what is the record size? It is not infrequent that rainbow trout are taken from the streams in this and adjoining counties

that will tip the scales at five pounds, but the brook trout rarely weighs more than two pounds.

Perhaps you or some of your readers may be able to give some reliable information with reference to what size the brook trout do attain. The trout I caught I have still alive in a tank supplied by spring water where I am keeping him as a proof of this fish story.

M. E. O'BRIEN.

### National Park Publications.

THE following publications may be obtained free of charge from the Secretary of the Interior, Washington, D. C.:

"List of National Park Publications," an annotated list of books, Government publications and magazine articles on the national parks.

"National Park Pictures Collected and Exhibited by the Department of the Interior," a descriptive list of pictures exhibited at public libraries by the Department of the Interior. Contains short descriptions quoted from well-known writers, but does not contain illustrations.

The following information circulars contain data regarding hotels, camps and principal points of interest, list of books and magazine articles, sketch maps and rules and regulations:

General information regarding Yellowstone National Park, general information regarding Yosemite National Park, general information regarding Mount Rainier National Park, general information regarding Crater Lake National Park, general information regarding Mesa Verde National Park, general information regarding Sequoia and General Grant National Parks, general information regarding the Hot Springs of Arkansas, general information regarding Glacier National Park.

THE following publications issued by the Department of the Interior are for sale by the Superintendent of Documents, Government Printing Office, Washington, D. C.:

"Geological History of the Yellowstone National Park," by Arnold Hague, twenty-four pages, including ten illustrations; ten cents.

"Geysers," by Walter Harvey Weed, thirty-two pages, including twenty-three illustrations; ten cents.

"Geological History of Crater Lake, Oregon," by Joseph S. Diller, thirty-two pages, including twenty-eight illustrations; ten cents.

"Some Lakes of Glacier National Park," by M. J. Elrod, thirty-two pages, including nineteen illustrations; ten cents.

"Sketch of Yosemite National Park and an Account of the Origin of the Yosemite and Hetch Hetchy Valleys," by F. E. Matthes, forty-eight pages, including twenty-four illustrations; ten cents.

"Analyses of the Waters of the Hot Springs of Arkansas," by J. K. Haywood, and "Geological Sketch of Hot Springs, Ark.," by Walter Harvey Weed, fifty-six pages; ten cents.

"Proceedings of the National Park Conference Held at Yellowstone National Park, Sept. 11 and 12, 1911," 210 pages; fifteen cents. Contains a discussion of national park problems by officers of the Government and other persons.

Remittances for these publications should be by money order, payable to the Superintendent of Documents, Government Printing Office, Washington, D. C., or in cash. Checks and postage stamps cannot be accepted.

Published Weekly by the

FOREST AND STREAM PUBLISHING COMPANY,  
CHARLES OTIS, President.

W. G. BEECROFT, Secretary. W. J. GALLAGHER, Treasurer.  
127 Franklin Street, New York.

**CORRESPONDENCE**—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

**SUBSCRIPTIONS**: \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

**ADVERTISEMENTS**: Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

money, and won't take it. And yet bills to create a fisherman's license die because the fishermen don't back them up. We can't expect gunners to spend much time pushing these bills. They are so used to paying the freight that they don't particularly mind it, and then they are deterred from action by a certain sense of delicacy. They know the anglers do not realize the situation, and they hesitate about forcing the embarrassing facts upon them. So the bills just die of inanition. Sometimes a futile protest is heard on the ground that a fisherman's license would be hard on the small boy with his fresh-cut pole and can of worms, but these can only apply to silly measures. Of course, exempt the boy. We pay for his schooling without a murmur, and possibly he learns as much in luring the dignified bullhead as he does from his books. Again, a misguided legislator blocks an attempt to put the fishermen beyond the imputation of sponging, because he thinks it will please his constituents. It may please a few fish hogs, but the truth of it generally is that real lovers of the art do not know what is going on, and would not thank him for his officious presumption that they want to let the other fellow buy all the time.

And now, having clarified our ideas on this singular state of affairs, we see the reason for its existence. We are all accustomed to take it for granted that somebody else will see to it that we don't get something for nothing. That has been the case of the fisherman, and, therefore, he hasn't thought much about the matter. It is time for him to assert his self-respect and demand that he be allowed to pay his own bills. Let's have license laws, prepared and introduced and backed up by fishermen. Not till we do will the fishermen get what they want, which is fair play all the time.

#### A PENNSYLVANIA PLUMAGE LAW.

SOMETHING more than a month ago we called attention to the fact that bird protectors were working hard in behalf of a bill to prohibit the traffic in aigrettes in Pennsylvania, and that the millinery people were as strenuously opposing the bill.

As is well known, Philadelphia has been a headquarters from which aigrettes have been secretly sold to dealers in New York, and it has been no secret that a trade in these plumes has been conducted from that center as far west as the Pacific coast, where traffic in aigrettes is prohibited. The Audubon Society has striven earnestly for the passage of the bill amending the non-game bird laws of Pennsylvania in such a way that they shall correspond with the advanced and effective laws of New York and New Jersey.

It is gratifying to learn that this amended bill finally passed the Pennsylvania Legislature without one opposing vote, and is now the law, for it was signed by the Governor of Pennsylvania, April 22.

Members of the Audubon Society, of the Delaware Valley Ornithological Club, and especially members of the Committee on Conservation of Wild Bird Life, and Witmer Stone, the editor of *The Auk*, are entitled to the greatest credit for their efforts in behalf of this bill. They have their reward in its success.

#### A CONTRABAND INCIDENT.

THE surprise and delight of readers of FOREST AND STREAM at the publication of a new serial by Nessmuk is not unexpected.

Dealing with incidents of more than sixty years ago—of a time when Nessmuk was a man in middle life, and with incidents which then were the most burning and vital that the United States had been obliged to face since it became a nation—of these matters it was at that time impossible to speak without harshness. Then, and for many years thereafter, the bitter aftermath of the Civil War endured in a most unhappy feeling of hostility between the North and the South.

Happily this state of feeling has wholly passed away; indeed, is almost forgotten. The people of the South respect those of the North as having expended immense blood and treasure for a principle. The people of the North respect those of the South for having done the same thing and much more—for having nobly and patiently suffered, through their women and children, sorrows and hardships that the North was not called upon to endure. The inhabitants of each section put forth characteristics worthy of the best Americans.

Nessmuk's story, which we are now printing, shows traces here and there of the angry feeling which once existed, and readers North and South will make allowance in the story for the mental attitude of the writer and the conditions existing at the time at which he wrote. The interest of the tale will not be affected one way or the other by the expression of this old and nearly forgotten feeling. We may feel sure that if Nessmuk were alive to-day, his view of those old occurrences would be that of the modern man. Our one feeling about this story is satisfaction that there remains an unpublished story by this great woodsman, which we are able to give to our readers.

#### OHIO HAS HUNTERS' LICENSE.

AFTER an annual pilgrimage to the Ohio Legislature for many years, the hunters' license bill was passed by the present Legislature. The bill has always before been defeated by the farmers, who feared infringement on their rights. They opposed it again this time, and on first vote it was lost, but reconsideration saved it. Ohio hunters must pay an annual license fee of \$1, and those from other States \$15. It is estimated by the State Fish and Game Commission that this will produce about \$60,000 a year and will entirely support that department, soon to be a bureau under the agricultural commission.

#### Optimism.

BY J. W. APPLGATE, JR.

Heavy boots, dusty trail,  
Icy creek, cold as hail!  
Mossy stones make him slip,  
Bark his shins. Catches gripe!  
Playful gnats in his eye,  
"Turkey trot," that's no lie.  
Think he cares? Not a whit—  
Ever see angler quit?

THE circulation of FOREST AND STREAM is world-wide.

**THE OBJECT OF THIS JOURNAL**  
will be to studiously promote a healthful interest in outdoor recreation, and to cultivate a refined taste for natural objects.

—FOREST AND STREAM, Aug. 14, 1873.

#### LICENSING FISHERMEN.

At the first glance there would seem to be no reason for taxing gunners for the privilege of taking game and exempting anglers from similar taxation. But as we were long ago converted to the belief that there is reason behind everything, except a woman's argument, we have set ourself the task of discovering why it is that the man who packs the gun pays all the bills.

Proceeding by a method of elimination, it is easy to clear the hunters of responsibility for placing fishermen in a class which enjoys special privilege at their expense. Much as we like them, we can't believe that out of sheer generosity they have volunteered to establish hatcheries and pay wardens to increase and protect the fish. On the other hand, it is even harder to believe that the fishermen have knowingly tried to avoid paying their own way. Just tell a fisherman he is being pauperized by his license-paying brother, and see what happens. There is no better sportsman than your fisherman and fair play is the basis of good sportsmanship. It is his deep-seated love of fair play that puts red in an angler's eye when he finds some pirate cleaning out a pool with dynamite. No, we positively cannot believe that it is because of opposition by the fishermen themselves that they are not now paying for the fish which the States put out every year to stock streams for their benefit.

This conclusion puts us in something of a quandary. We should naturally suppose that wielders of the rod would be staying up nights writing to the Legislature and demanding their right to pay for their own sport. One would expect them to feel toward the nimrods as the fellow feels toward the man who wins his

# ARCHERY

Forest and Stream is the official organ of the National Archery Association.

### Coming Archery Events.

PROSPECTS are bright for a very successful meeting of the Eastern Archery Association at Wayne on the coming Fourth of July. Most of the foremost archers who are eligible to compete have signified their intention of doing so. Two handsome silver cups have been donated as prizes in addition to the regular medals of the association. The tournament will be held at the same time that a tennis tournament of four or six courts and a track meet are in progress on other parts of the large field. Judging from the attendance at the similar games last year, there will be about 2,000 spectators.

It is unusually fortunate that on the same day the Western archers will be competing in the American Olympics at Chicago. Never before has the rivalry between East and West been as keen as it is this year. In the East are the two men who respectively hold the American record for the York round and the world's record for the American round. In the West are several men who have almost equalled these records in public competition, and one of whom has exceeded them in private, although he has never shot in a tournament.

These two championship matches occurring approximately a month before the national tournament in Boston will provide data on which the archery actuaries can figure to their hearts' content. Doubtless we will all be assured in advance who will be the national winners, whether by points, scores or hits and scores combined.

### The Newton Archers.

THE Newton Archers held their first tournament of the season on their range at the Newton Center Playground on Saturday, April 19, and an indication of the increasing interest which is developing in archery is shown by the fact that twenty-four archers participated in the events. The row of seven targets, all with brand new faces, the long lines of archers, and the fringe of spectators, gave the scene quite the appearance of a national tournament on a small scale.

The Newton Archers have among its membership several enthusiastic archers who are under fourteen years of age, and as it is the policy of this club to cater to their interests as well as to the interests of the adults, two special rounds at short distances were arranged for and termed the "junior team round" and the "special juvenile round." The junior team round consists of 96 arrows at 30 yards and special juvenile round consists of 24 arrows at 40 yards, 24 arrows at 30 yards and 24 arrows at 25 yards.

The morning was threatening, but in the afternoon it cleared, and with the clearing a very high wind came up, which at times assumed

hurricane proportions, and made good scoring an impossibility.

In the morning the men shot the American round, the ladies shot the Columbia and the children shot the junior team round. In the afternoon the men shot the team round, the ladies the national round, and the children the special juvenile round. The following scores were turned in:

American round:		L. C. Smith .....		66 306	
S. W. Wilder	73 376	C. T. Switzler	65 293		
J. P. Gray	77 354	Ellis Spear	64 292		
V. C. Lovejoy	66 306				

Team round:		Ellis Spear .....		53 229	
B. P. Gray	70 294	L. C. Smith	51 195		
S. W. Wilder	61 243	G. P. Bryant	77 351		
C. T. Switzler	60 232				

Columbia round:		50Yds.	40Yds.	30Yds.	Total.
Mrs. L. C. Smith	16 64	23 119	24 136	63 319	
Mrs. B. P. Gray	14 78	18 76	24 140	56 294	
Miss N. Pierce	18 70	20 72	22 120	60 262	
Miss R. Brewer	4 6	3 15	13 49	20 70	

National round:		60Yds.	50Yds.	Total.
Mrs. B. P. Gray	27 105	19 85	46 170	
Mrs. L. C. Smith	44 164			
Miss N. Pierce	23 81	14 48	37 129	

Junior team round:		Total.	
Burton P. Gray, Jr., 10 years—			
10 42 11 39 14 66	9 29	44 176	
Dorothy D. Smith, 10 years—			
10 56 8 26 13 47	12 29	43 167	
Teddy Badger, 12 years—			
12 60 9 25 5 19	8 24	34 128	
E. Anderson, 11 years—			
31 105			
Philip Wilder, 11 years—			
6 20 6 18 10 42	4 18	26 98	
Walter Jones, 10 years—			
0 0 1 1 5 13	5 9	11 23	

Special juvenile round:		40Yds.	30Yds.	25Yds.	Total.
D. D. Smith, 10 years	10 52	9 38	20 103	39 193	
B. P. Gray, Jr., 10yrs.	9 33	12 26	13 45	34 104	
P. Wilder, 11 years	1 3	7 31	5 19	13 53	
W. Jones, 10 years	0 0	2 6	7 25	9 31	

There were several archers who did not finish the rounds and did not turn in any scores.

An indication of the increasing interest that is being developed in archery in this vicinity is shown by the fact that the local archery club, known as The Newton Archers, now has a membership of twenty-two although it was organized only about a month ago. One unique feature of the club is that it has a strong junior department, there being six members under eighteen years of age. These young archers are just as earnest in their shooting as the adults, and most of them have been drilled in the essential points of target practice, so that they handle their bows like veterans. In the interest of these junior members two special rounds have been adopted for members under eighteen years old, one called the junior team round, consisting of 96 arrows at 30 yards, and one called the special juvenile round consisting of 24 arrows at 40 yards, 30 yards and 25 yards, respectively.

On Saturday afternoon, April 26, seventeen of The Newton Archers were on their range at the Newton Center Playground. Several of them were novices, who never drew a bow until this spring, and for this reason did not wish to publish their scores. The others turned in the fol-

lowing scores. It will be noted that some of the men shot the double American round, while the others shot a single American only. Scores:

American round:		60yds.	50yds.	40yds.	Total.
C. T. Switzler	25 117	27 123	28 184	80 424	
	25 123	22 146	30 186	77 455	
					157 879

G. P. Bryant	28 146	23 81	30 184	81 411	
S. W. Wilder	20 94	28 136	30 176	78 406	
	19 74	24 120	28 162	71 356	
					149 762

Ellis Spear	23 107	26 150	29 147	78 404	
L. C. Smith	19 65	24 120	26 144	69 329	
	14 54	23 113	28 134	65 301	
					134 630

Columbia round:		50yds.	40yds.	30yds.	Total.
Mrs. L. C. Smith	19 91	22 120	24 144	65 355

Dorothy D. Smith (10 years old)		57 240
Norman Cabot (13 years old)		54 227
Burton P. Gray, Jr. (10 years old)		60 224
Philip Wilder (11 years old)		19 76

Special juvenile round:		40yds.	30yds.	25yds.	Total.
Burton P. Gray, Jr.	6 20	17 97	20 97	43 214	
Dorothy D. Smith	9 49	9 33	20 73	38 155	
Philip Wilder	9 31			19 73	

When we planned for the tournament on April 19, I wrote to several archery clubs throughout the country, advising them of the rounds we planned to shoot on that day, and suggesting that it would be a pleasant thing if the archers generally would shoot the same rounds at the same time, and then send in their scores to FOREST AND STREAM for publication. I forwarded to FOREST AND STREAM the scores made on the Newton Center archery range, but too late for publication in the issue of April 26. Since then I have received the following scores from the secretary of the Chicago Archery Club with the request that they be forwarded to FOREST AND STREAM for publication. Scores:

Team round:		60yds.	50yds.	40yds.	Total.
H. W. Bishop	22 142	18 134	20 106	20 108	80 490
E. Rendtorff	21 105	22 104	22 140	23 115	86 464
H. S. Taylor	24 126	21 115	21 101	24 112	90 454
H. L. Walker	20 84	21 99	23 99	16 74	80 356
J. H. Pendry	21 115	21 79	15 79	15 71	72 344
Dr. Weston	19 79	18 84	17 83	22 90	76 336

American round (the two American rounds were shot on different days):		60yds.	50yds.	40yds.	Total.
H. W. Bishop	28 153	29 165	29 167	86 490	
	30 156	30 186	30 198	90 540	

G. L. Nichols	28 148	28 170	30 192	86 510	
	28 132	30 170	30 182	88 484

LOUIS C. SMITH,  
Secretary The Newton Archers.

Dr. Weston.

Mrs. Witwer-Taylor.  
6 golds at 30yds.

Robert P. Elmer.

**A Double York.**

SEATTLE, Wash., April 19.—*Editor Forest and Stream:* Dr. J. W. Doughty and the writer shot a double York round on the beautiful grounds at Old Fort Steilacoom on Tuesday and Wednesday, April 8 and 9, in beautiful weather, with only a trifle too much wind. Dr. Doughty was deep in his first "slump" and was much discouraged, but his style of shooting is so exceptionally good that I feel sure he will soon again be in full control of his bow. I give you our scores:

J. W. Doughty.....	31 99	28 116	20 98	79 313
	30 98	33 131	21 93	84 322
	61 197	61 247	41 191	163 634
W. H. Thompson.....	49 199	39 189	20 112	108 500
	39 201	36 168	24 114	98 483
	88 400	75 357	44 226	206 983

WILL H. THOMPSON.

**Pittsburgh Score .**

PITTSBURGH, Pa., April 21.—*Editor Forest and Stream:* In response to a request made by Louis C. Smith, secretary of the Newton Archers of Boston, the shooters of Pittsburgh held a meet on Saturday, April 19, and herein are the scores made. Mr. Smith's idea was to have means of comparison of scores made all over the country.

Owing to the fact that Pennsylvania does not celebrate April 19 as a holiday, the afternoon only could be used, and on that account the full program was not completed.

However, the Beechview Bon Air archers and the Schenly-Bellefield bowmen were well represented, and the shooting was done on the Pittsburgh Athletic Club range, and on the grounds of the Bon Air Club, the idea being to have means of comparison of the two rival sections. The wind was very high, and it would be safe to say that had the day been calm, 50 to 100 points would have been added to each score.

Double American round, Beechview		Bon Air archers:	
60Yds.	50Yds.	40Yds.	H. S.
W. J. Holmes.....	24 116	29 157	20 180
	26 132	28 150	29 189
	50 248	57 307	59 369
			166 924

J. S. Jiles.....	21 93	27 123	30 162	78 378
	24 112	25 121	28 168	77 401
	45 205	52 244	58 330	155 779
D. A. Wolf.....	15 63	22 72	27 113	64 248
	14 58	17 69	26 112	57 239
	29 121	39 141	53 225	121 487
J. T. Monahan ....	4 24	12 48	20 68	36 140
	10 30	7 21	15 57	32 118
	14 54	19 69	35 125	66 258
Team round, 96 arrows, 60yds.:

Jas. S. Jiles .....	82 390	S. M. Stauffer ....	45 171	
Schenly-Bellefield bowmen, single American round:				
	60Yds.	50Yds.	40Yds.	H. S.
O. M. Sorber ....	18 60	23 93	21 103	62 256
G. W. Postgate ...	15 69	20 68	29 117	64 254
Milton Sorber ....	15 51	19 77	19 99	53 227
W. H. Haines .....	14 62	17 95	15 63	46 220
F. M. Howard ...	13 61	11 55	20 88	43 204

The low scores of the Schenly-Bellefield men are no doubt due to the fact that this is their first effort of the season. Captain Postgate, Dr. Haines and Milton Sorber have all done better work, and no doubt by mid-summer they will be scoring well over 300 in the single American.

The writer had the misfortune to shoot a section of a broken arrow, some two and one-half inches long into his hand on Friday evening, consequently he will refrain from shooting for some weeks, as the wound while not serious is very painful, necessitating complete rest for the hand during the healing process.

O. L. HERTIG.

PITTSBURGH, Pa., April 11.—*Editor Forest and Stream:* In the April 12 issue of your magazine I read with delight the criticism on Prof. E. J. Rendtorff's recent articles by Robert Page Lincoln. This opens up a new field for arguments between the target archer, who uses every legitimate means of obtaining the most perfect equipment to enable him to make the highest scores possible, and the archer who wanders through woods and over fields shooting "at" anything that strikes his fancy, with a bow, arrows, arm guard, string, quiver and shooting glove made with his own hands.

All archers appreciate Professor Rendtorff's articles as being entirely different from the usual archery stories. Badminton's book on archery, published in England, deals very exhaustively

with every question which may arise in the mind of the beginner as enumerated by Mr. Lincoln, such as the best woods for making bows and arrows, methods of manufacturing bows, arrows, guards, strings, finger tips, etc. The National Archery Guide, published by Spaulding, price ten cents, gives excellent directions for "rank amateurs."

While in Chicago last Christmas week I had the pleasure of meeting Professor Rendtorff, and he certainly has made a study of the scientific points of the sport. During my conversations with this archer, I gained much valuable information regarding serving the string, nocking points and other niceties of the game.

It is quite apparent that Mr. Lincoln imagines that the professor shoots with a Duff lemonwood bow, actually weighing fifty-five pounds. If I were not so polite I would laugh (Ha! Ha!). But if you could see this wonderful Chicago archer, who stands several inches over six feet, and has a physique denoting remarkable strength, you would realize that even this feat of arms might be literally accomplished by him.

With men like Duff, Barnes and Whitman and others, to say nothing of our English experts, who have spent a lifetime in studying how to season wood and make self bows, backed bows, footed arrows, and other equipment, it would be the height of folly for us poor target archers to compete with them, unless we do so for the extreme pleasure some of us gain in making things, like our friends, Dr. O. M. Sober and J. S. Jiles, of this city.

It is hard to decide whether or not the target fiend or the archer of the woods gets the most enjoyment. Personally, I enjoy both forms of recreation, but think that the hunting style appeals more to the country man and the young folks, whereas very few business or professional men have the time to wander over hills and dales with "hum" made outfits.

Permit me to congratulate you on the interesting articles that have appeared in your admirable magazine since you started your archery department.

G. W. POSTGATE.

**The Handy Man,**

Bill Simms was quite a handy man at any sort of trick; Could tinker up a balky watch or fix a windmill quick. Could whittle fancy ornaments or doctor up a calf, Or shoe a horse with lightnin' speed or run a phonograph.

An artist, too, with chalk or brush, quite wonderful was he, The only thing Bill couldn't draw was just a salary.

Bill Simms could make a dandy churn that surely did the work, Could build an automobile that would run without a jerk. Could make a set of bobsleighs that would run as slick as grease, Could cut a pair of trousers that would always hold their crease.

But one thing that Bill couldn't make at all, to save his life— He couldn't make a livin' for himself and kids and wife.

Bill Simms could play the violin and almost any horn— Could imitate each bird or beast that ever had been born. The folks kept him busy doin' odd jobs and all sitch, He had no time to settle down in order to get rich. His neighbors all asked favors and he never turned one down; And Bill spent his declinin' years in livin' on the town. —Chicago Journal.

## The Orchard Lake Club

Being the second of a series of articles covering hunting and fishing clubs in the United States and Canada. First of this series appeared recently under the caption, "The Pipe of the Piping Rock," treating of the Piping Rock Club, of Locust Valley, Long Island. Secretaries of clubs are invited to submit articles describing their clubs with a view to appearing in this series.

ORCHARD LAKE.

WITHIN a six hours' journey of New York city, by railroad, wagon route and up-grade all the way, there is a sixty-acre lake which is just coming into its own as a reserve for enviable trout fishing. It is Orchard Lake, Sullivan county, in the foothills of the Catskills, owned and controlled by the Orchard Lake Club, of New York. Large gamy brook trout, from all reports, rise there throughout the season with encouraging rapidity, if only the angler is fortunate enough to select the proper fly.

Orchard Lake was known to many New Yorkers as an exclusive fishing preserve as long ago as fifteen years. Two years ago the property, including 500 acres of timber land, was taken over by the Orchard Lake Club, composed of about fifty well-known business and professional men and have a board of governors selected from New York city.

Aside from its resourcefulness for fly-fishing, Orchard Lake is one of the successful trout-propagating preserves. The lake is filled with native brook trout and the stock is replenished annually from a hatchery situated a short distance above the lake on a little mountain stream.

Orchard Lake is reached by New York, Ontario & Western from the West Shore terminal to Livingston Manor, a four-hours' trip, thence eight miles over hill and dale in a wagon. The elevation is 2,100 feet above sea level. From the departure outside of the city environs, at the juncture with the scenic Hudson to the approach of the wagon trail's end at the club house on a hillock overlooking the beautiful lake, the atmosphere is that which the tired-out business man hails as one of rural sublimity. A winding macadam road follows the Willowemoc River, and leads to the old

wagon road at the mouth of Sprague Brook. From that point on more ox-teams than automobiles are met. The road climbs through the woods beside the brawling brook to the club property. In the spring and summer rabbits bob from the roadside, and in winter both deer and bear frequent the trails to the ponds and streams in the forest.

There are few preserves in the Catskills where the natural characteristics have not been

marred by commercializing in one form or another. This is not true of Orchard Lake. The forests verge the lake directly on three sides, and the old woodmen trails serve as the only short cuts through the dense overgrowth. On the fourth side a grassy approach leads to the club house and other buildings over the brook, which feeds the lake. A boat house stands on this end of the lake and looms up on the approach to the club's reservation, as the first sign of the encroachment on nature. The wagon trail leads directly alongside this boat house.

Of unusual interest is the club's provision for the entertainment of the members' wives and families as well as their guests. In addition to the main club house, a cottage arranged on the apartment plan, has recently been fitted up for extended house parties. An important adjunct to the club is its clay pigeon traps, and among the members are many upper register aerosaucer exterminators, who while away many pleasant hours cracking the elusive clay discs. Bathing in the summer time is delightful.

Beyond the club house and surrounding buildings, the forest again stretches for miles. From the lake, therefore, the angler can see the forest in all directions, rising gradually to the peaks of a range which conforms in almost every detail to the outline of the irregularly shaped trout lake. On one of the highest points, a quarter of a mile from the club house, is a spring of clear, sparkling water, which supplies all the club buildings by gravity.

The preserve and club house is open to members of the club and their guests from May 1 until Oct. 1.

Officers of the club are: William W. Harrison, President; Milton H. Yale, Vice-President; Chas. S. Kneeland, Secretary and Treasurer. Board of Trustees: Term ending 1914—Louis Stearns, Adolph Vietor, Frank S. Smith; term ending 1915—Robeson L. Low, George Hodgman, Milton H. Yale; term ending 1916—William W. Harrison, C. Eustace Kneeland.

THE HATCHERY.

# TRAP SHOOTING

Forest and Stream is an Honorary Member of the Interstate Association for the Promotion of Trapshooting.

### Fixtures.

If you want your shoot to be announced here, send a notice like the following:

#### REGISTERED TOURNAMENTS.

- May 1.—St. Johnsbury, Vt.—Mt. Selsby G. C. Carl H. Lyster, Sec'y.
- May 3.—Rittersville, Pa.—Lehigh R. and G. C. H. F. Koch, Sec'y.
- May 3.—Bethel, Conn.—Western Connecticut T.S.L. tournament, auspices of Bethel G. C. C. K. Bailey, Sec'y.
- May 4-5.—San Diego, Cal.—Pastime G. C. George P. Muchmore, Sec'y.
- May 5-6.—Laramie, Wyo.—Gem City G. C. T. A. Rogers, Pres.
- May 6.—Vicksburg (Miss.) G. C. J. J. Bradfield, Mgr.
- May 6.—Pitcairn, Pa.—Western Pennsylvania T. S. L. tournament, under auspices of United G. C. Louis Lautenslager, Pres.
- May 6-7.—Eagle Grove (Ia.) G. C. A. L. Yearous, Sec'y.
- May 6-7.—Montpelier (Vt.) G. C. H. B. Moulton, Pres.
- May 7.—Tyndall (S. D.) G. C. F. F. Chladek, Sec'y.
- May 7.—Seneca Falls (N. Y.) G. C. C. L. Frantz, Mgr.
- May 7-8.—Americus, Ga.—Georgia State tournament, auspices of Americus G. C. J. W. Hightower, Pres.
- May 7-8.—Sunbury, Pa.—Sunbury-Selingsgrove G. C. J. W. Schoffstall, Sec'y.
- May 8.—Watertown (Wis.) G. C. B. H. Rieck, Sec'y.
- May 8.—Camden (Ark.) G. C. J. P. Wright, Mgr.
- May 8-10.—Hutchinson, Kan.—Kansas State tournament, auspices of Hutchinson G. C. C. T. Rankin, Sec'y.
- May 8-9.—Kankakee (Ill.) G. C. E. F. Radeke, Sec'y.
- May 9.—Portage (Wis.) G. C. J. Raup, Pres.
- May 9-11.—Los Angeles (Cal.) G. C. S. A. Bruner, Sec'y.
- May 10.—Marysville (Pa.) S. A. M. L. Wise, Vice-Pres.
- May 12.—Mt. Airy (Md.) G. C. I. R. A. Watkins, Sec'y.
- May 13.—Shelbyville, Ill.—Shelby County G. C. Geo. L. Dearing, Sec'y.
- May 12-13.—Portland (Ore.) G. C. J. E. Cullison, Pres.
- May 13-15.—York, Pa.—Pennsylvania State tournament, auspices of York City G. C. N. M. McSherry, Sec'y.
- May 13-15.—Montgomery, Ala.—Interstate Association's eighth Southern Handicap tournament, under auspices Capital City G. C.; \$1,000 added money. Winner of first place guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. Elmer E. Shaner, Mgr., Pittsburgh.
- June 14.—Warren (Minn.) G. C. Chas. F. Grinler, Sec'y.
- May 14.—Fulton (N.Y.) G. C. & G. C. B. J. O'Grady, Pres.
- May 14-15.—Waterloo (Ia.) G. C. Nick Webber, Pres.
- May 14-15.—Pipstone (Minn.) G. C. H. T. Ober, Sec'y.
- May 15.—Riverside (Ill.) G. C. E. M. Collis, Sec'y.
- May 15.—Freeport (Ill.) G. C. J. W. James, Sec'y.
- May 17.—Phillipsburg, N. J.—Alert G. C. Edw. F. Markley, Mgr.
- May 17-18.—Fresno (Cal.) Blue Rock Club. A. S. Tong, Sec'y.
- May 20.—Albia, Ia.—Monroe County Fish and Game Protective Association. Theo. B. Perry, Jr., Pres.
- May 20.—Milton Jct. (Wis.) G. C. W. H. Smith, Sec'y.
- May 20.—Pillow (Pa.) G. C. J. A. Bingham, Sec'y.
- May 20.—Clayton, O.—Salem G. C. F. C. Koch, Pres.
- May 20-21.—Columbus (Neb.) G. C. G. A. Schroeder, Sec'y.
- May 20-21.—Wenatchee, Wash.—Washington State tournament, auspices Wenatchee G. C. C. F. Owens, Pres.
- May 20-22.—Temple, Tex.—Texas State tournament, under auspices of the Temple G. C. R. I. Tennant, Pres.
- May 21.—Brazil (Ind.) R. & G. C. W. T. Crabb, Sec'y.
- May 21.—Windsor (Mo.) G. C. W. T. Jordan, Sec'y.
- May 22.—Mt. Morris (Ill.) G. C. C. J. Price, Sec'y.
- May 22.—Aurelia (Ia.) G. C. Frank R. Welch, Sec'y.
- May 22.—Syracuse, N. Y.—Onondaga County G. C. T. E. Clay, Pres.
- May 22.—Scranton (Pa.) R. & G. C. M. F. Bohn, Sec'y.
- May 22.—Altoona, Pa.—Central Pennsylvania T. S. L. tournament, under auspices of Blair County Road Drivers' Association. Jack Waltz, Sec'y.
- May 22-25.—Winchester, Ky.—Kentucky State tournament, under auspices of Winchester G. C. C. B. Strother, Sec'y.
- May 23.—Nicholson (Pa.) R. & G. C. L. A. Wright, Sec'y.
- May 23.—Emporia (Kans.) G. C. Chas. Ford, Sec'y.
- May 24.—Stratford, Ont., Canada.—Pastime G. C. Wm. Boles, Sec'y.
- May 24.—Newmanstown (Pa.) G. C. F. S. Rader, Sec'y.
- May 24.—New Haven, Conn.—Western Connecticut T. S. L. tournament, under auspices of New Haven G. C. F. W. Smith, Pres.
- May 24.—Gananoque, Canada.—Thousand Islands G. C. C. A. Lewis, Sec'y.
- May 24-25.—St. Louis (Mo.) T. S. A. L. Ebert, Sec'y.
- May 27.—Fairmont (W. Va.) G. C. Ed. H. Taylor, Sec'y.
- May 27.—Sikeston (Mo.) G. C. Wm. H. Tanner, Sec'y.
- May 27-28.—Paragould (Ark.) G. C. C. W. Stedman, Sec'y.
- May 27.—Norwich, N. Y.—Chenango County F., G. and G. C. E. D. Borden, Mgr.
- May 27.—Broodhead (Wis.) G. C. J. B. Pierce, Sec'y.
- May 27-29.—Peoria, Ill.—Illinois State tournament, under the auspices of Illinois State S. A. R. Scholes, Sec'y.
- May 27-29.—Fort Dodge, Ia.—Iowa State tournament, under auspices of the Fort Dodge Gun Club. Jos. Kautzky, Mgr.
- May 27-29.—N. Platte, Neb.—Nebraska State tournament, under auspices of Buffalo Bill G. C. J. C. Den, Sec'y.

- May 28.—Mt. Holly (N. J.) G. C. A. J. Dellette, Sec'y.
- May 28.—Chesapeake City (Md.) G. C. H. L. Worthington, Mgr.
- May 28.—Morocco (Ind.) G. C. Jas. C. Murphey, Sec'y.
- May 28.—Galion (O.) G. C. H. D. Smart, Pres.
- May 28-30.—Ogden, Utah.—Idaho-Utah Sportsmen's Association tournament, under auspices of the Ogden G. C. George E. Browning, Sec'y.
- May 29.—Vergas (Minn.) R. & G. C. C. A. Peterson, Pres.
- May 29.—Marion (O.) G. C. N. F. Titton, Sec'y.

- July 17.—Lorain (O.) G. C. J. P. Traxler, Sec'y.
- July 18-20.—Green Bay, Wis.—Wisconsin State tournament, auspices Green Bay G. & G. C. R. E. St. John, Sec'y.
- July 19-23.—Ocean City, Md.—Berlin G. C. A. W. Peters, Sec'y.
- July 21-25.—Raymond, Wash.—Pacific Indians. F. C. Riehl, Sec'y.
- July 22-23.—Butler (Pa.) R. and G. C. S. G. Purvis, Sec'y.
- July 24.—Lewiston, Pa.—Central Pennsylvania T. S. L. tournament, under auspices of Lewiston R. and G. C. W. P. Steinbach, Sec'y.
- July 26.—Danbury, Conn.—Western Connecticut Trapshooters' League tournament, under the auspices of the Pahquoque G. C. E. H. Bailey, Sec'y.
- July 28.—Ft. Wayne (Ind.) G. C. W. H. Scherer, Mgr.
- July 28-31.—Betterson (Md.) G. C. Jas. R. Malone, Mgr.
- July 29-30.—Bradford (Pa.) G. C. A. W. Vernon, Sec'y.
- Aug. 2.—Greenwich (Conn.) G. C. J. H. Finch, Pres.
- Aug. 5.—Elwood (Ind.) G. C. S. W. Swihart, Sec'y.
- Aug. 5.—Hicksville (O.) G. C. C. E. Maxwell, Sec'y.

Aug. 5-6.—Lock Haven (Pa.) G. C. C. A. Jobson, Sec'y.  
 Aug. 5-6.—Knoxville, Tenn.—Tennessee State tournament, under auspices of Knoxville G. C. Howard Van Gilder, Vice-Pres.  
 Aug. 5-7.—Omaha, Neb.—The Interstate Association's eighth Western Handicap tournament, under auspices of the Omaha Gun Club; \$1,000 added money. Winner of first place in the Western Handicap guaranteed \$200 and trophy; winners of second and third places guaranteed \$150 and \$100 respectively. E. E. Shaner, Mgr., Pittsburgh, Pa.

**DRIVERS AND TWISTERS.**

Secretary G. Connelly, of the Robin Hood Gun Club, Staten Island, N. Y., announces a merchandise shoot at 50 targets on Tuesday, June 3. A good program has been arranged, and all powder burners are welcome. To reach the grounds from New York city, take Staten Island Ferry to St. George, then Richmond trolley.

Waterloo Gun Club will give a two-day registered amateur shoot on May 14 and 15, at Waterloo, Ia. \$176 added money. Club officers are: Nic. Webber, President; R. L. Apfel, Treas.; J. F. Libby, Secretary; F. M. Shores, Field Captain. The program will comprise 200 targets each. Shooting commences at 9 o'clock. Open to all amateurs. Professionals cordially invited to shoot for targets only.

The Committee, Foster B. Houston, John S. Brown and Dr. Wm. Francis, announce that the South Charleston Commercial Club will co-operate with the South Charleston Gun Club to make a success of the interstate shoot to be held at South Charleston, Ohio, June 12, 1913. No effort will be spared to make visitors in this little city a most pleasant one should you desire to attend this event.

Final contest in the Philadelphia Trapshooters' League will be held on the grounds of the Meadow Springs Gun Club, Fifty-seventh and Lancaster avenue, Philadelphia. It will be between the Du Pont and Meadow Springs Clubs. Should Du Pont win this shoot it will capture

the championship. Should Du Pont lose, there will be a triple tie for first place between S. S. White, Du Pont and Meadow Springs. W. G. BEECROFT.

**West End Gun Club.**

RICHMOND, Va., April 26.—The following scores were made at a preliminary shoot given preparatory to the regular opening shoot of the club, to be held May 3:

Events:	1	2	Events:	1	2
Targets:	25	25	Targets:	25	25
Storr .....	24	..	Purcell .....	7	17
Leake .....	9	7	Cabell .....	12	14
Hart .....	20	24	Easley .....	17	16
Catlett .....	20	20	Flippen .....	19	19
Hundley .....	15	10	Boyd .....	22	23
H G Anderson .....	12	8	Bagby .....	15	16
Newcomb .....	24	25	S Taylor, Jr. ....	..	12

**Princeton University Gun Club.**

PRINCETON, N. J., April 25.—We opened the season with a triangular match with Westchester and Yale. The outcome was: Westchester 412, Princeton 362, Yale 315. N. R. White, of Princeton and Austin Munn, of Westchester, tied for high gun at 86 out of 100. Bad wind prevailed.

Our next was a seven-man team match with the Smith Gun Club, Newark, which was a very close contest, Smith finally winning by two targets. The day was a perfect one for the match, and three men went straight—C. T. Day, Jr., B. M. Stanley, Jr., and W. Hassinger. The scores:

Princeton.		Smith.	
T L Horne .....	48	B M Sharley .....	50
F B Mimide .....	48	C T Day, Jr. ....	50
N R. White .....	47	W Hassinger .....	50
E R Simpson .....	45	J Baldwin .....	46
R McAlpin .....	43	J Weiler .....	43
D Nichols .....	42	J Wheaton .....	42
W C Sharley, Jr. .	41—314	R Hensley .....	35—316

Five of us entered the championship shoot at Travers Island, and three made the Philadelphia team, composed of the first ten high scores among the shooters of New Jersey and Pennsylvania—E. R. Simpson, T. L. Horne and N. R. White. In the championship event E. R. Simpson, after getting a bad start in the morning, handed in a card of 88 on his second 100 that was second only to Newcomb out of the field of 150 shooters. His total was tenth on the list, 160 out of 200.

On April 22, J. M. Hawkins was good enough to stop over and pay us a visit. For the first few shots

the new grounds bothered him, but after getting his "stride," he broke 102 straight targets. I am afraid the scores of the other members would hardly be representative, as they all seemed to have an off day for some reason or other. Hawkins broke 144 out of 150, and N. R. White 95 out of 100.

On May 10 we hold the intercollegiate shoot here. Yale, Harvard, Dartmouth, Cornell and Princeton are entered. H. Stevens and J. Fanning are to take charge.

May 9 a triangular shoot takes place between Dartmouth, Harvard and Princeton. N. R. WHITE.

**Analostan Gun Club.**

WASHINGTON, D. C., April 27.—The members of the Analostan Gun Club had their troubles on Saturday, the 26th. A stiff wind from the south flattened the targets out—made them low, and many of them were over-shot. We had a number of visitors, including Mrs. McKee, Mr. Coffin, of the Palefaces, and U. M. C. Anderson. The shooting was kept up until dark. Following are the scores:

Shot at. Broke.		Shot at. Broke.	
Huseman .....	115 96	Bradford .....	80 47
E E Reed .....	100 89	Mrs McKee .....	80 40
Anderson .....	100 88	Dulaney .....	65 47
Hunter .....	100 83	Emmons .....	65 33
Ford .....	100 83	Sharpe .....	65 11
Peck .....	100 74	M Taylor .....	50 44
Graves .....	100 70	Parsons .....	55 41
Bray .....	100 62	Luttrell .....	50 36
Barnes .....	95 86	Stine .....	50 36
Duvall .....	95 49	Davis .....	50 32
Greene .....	90 34	Fickling .....	50 25
Kirk .....	80 62	Stubener .....	50 42
Culver .....	80 49	Dulaney, Jr. ....	20 10
Coffin .....	50 41	Spencer .....	15 0

At 12 pairs the following scores were made:

Reed .....	21	Luttrell .....	13
Parsons .....	17	Graves .....	12
Kirk .....	14	Dulaney .....	9
Huseman .....	14	Ford .....	(20) 13
Davis .....	13	Coffin .....	(22) 8

Dupont trophy, 25 targets:

Peck .....	4 24	Huseman .....	2 17
M Taylor .....	5 25	Barnes .....	4 24
Kirk .....	3 19	Ford .....	3 22
Monroe .....	3 20	Stine .....	2 21
Emmons .....	12 23	Bradford .....	12 25
Parsons .....	4 24	Green .....	7 17
Graves .....	5 22	Culver .....	15 25
Stubener .....	4 24	Bray .....	10 24
Luttrell .....	5 25	Duvall .....	1 10
Reed .....	0 23	Hunter .....	0 23
Davis .....	4 23	Fickling .....	14 23

# Warren Team Wins Championship of United States With Remington-UMC

**A**FTER experimenting with various makes of cartridges in preliminary matches, the Warren Team choose *Remington-UMC* the record-breaking ammunition in the shoot-off for the Championship of the Eastern and Western divisions of the N. R. A. .22 Calibre Indoor Rifle League and of the United States, winning with the remarkably high score of

**994 x 1000**

This is the Second Consecutive Winning of the Championship by Shooters of *Remington-UMC*.

REMINGTON ARMS—UNION METALLIC CARTRIDGE CO., 299 Broadway, New York City

Arkansas State Sportsmen's Association.

HOT SPRINGS, Ark., April 19.—The twenty-third annual tournament of the Arkansas State Sportsmen's Association was held under the auspices of the Hot Springs Gun Club on April 17, 18 and 19. The attendance was not as large as expected on account of flood conditions, which seriously interfered with many of the State shooters reaching here. There were twenty-six amateurs and twelve professionals present, and the shoot passed off nicely. There were about 25,000 targets trapped in the three days.

At the annual meeting of the State Sportsmen's Association, Geo. W. Clements of Little Rock, was elected President; Dr. Dibbel, of Little Rock, Vice-President, and Paul R. Litzke, Secretary and Treasurer. It was also decided to hold the 1914 tournament in Little Rock. Individual State Championship was won by J. F. Bolton, of Eureka Springs.

FIRST DAY—APRIL 17.

Table with columns for Events, Targets, and names of shooters (G W Clements, J D Procter, Wm Clegg, G E Crosby, S E McGeehan, Carl A Wilson, D G Barstow, Wescott, J R Graham, F M Edwards, Wm W Little, H Whittington, J Lewis, A D Mermod, W H Simpson, W H Deaver, A W Scruggs, W Henderson, W H Heer, T A Marshall, F Gilbert, H J Donnelly, B L Williams, A U Williams, Litzky, Merrett, R L Bennett, Chas Bergstreser, B H Blockson, J F Bolton, W O Creason, F M Moody) and their scores across 11 targets.

SECOND DAY—APRIL 18.

Table with columns for Events, Targets, and names of shooters (G W Clements, J D Procter, Wm Clegg, G E Crosby, S E McGeehan, C A Wilson, D G Barstow, Wescott, J R Graham, F M Edwards, Wm W Little, H Whittington, A D Mermod, W H Simpson, W H Deaver, A W Scruggs, W Henderson, W H Heer, T A Marshall) and their scores across 11 targets.

Table with columns for Events, Targets, and names of shooters (\*F Gilbert, \*H J Donnelly, B L Williams, A U Williams, \*R L Bennett, J P Wright, C C Handy, Chas Bergstreser, B H Blockson, J F Bolton, \*W R Crosby) and their scores across 11 targets.

THIRD DAY—APRIL 19.

Table with columns for Events, Targets, and names of shooters (G W Clements, J D Procter, Wm Clegg, G E Crosby, S E McGeehan, D G Barstow, Wescott, J R Graham, F M Edwards, Wm W Little, H Whittington, A D Mermod, W H Simpson, A W Scruggs, W Henderson, W H Heer, T A Marshall, \*H J Donnelly, B L Williams, A U Williams, \*R L Bennett, J P Wright, C C Handy, F M Moody, \*W R Crosby) and their scores across 11 targets.

South Charleston G. C.

ALL trapshooters are invited to participate in a shoot of unusual attractiveness, to be held on our grounds on June 12. On this day we will have a registered shoot, with \$100 added money. The entrance fee is \$3.50. One hundred and fifty birds under Lewis class system. This system will give sixteen moneys—four to each class. In addition, the club will give four low gun trophies, and at least eight excellent merchandise prizes. A feature of the day will be an exhibition shoot by trade representatives. Three automatic traps will be in operation to eliminate late and hurried shooting.

At this date we have thirty-two entries, all within five miles of our village, and the situation at present indicates a record crowd.

GEO. H. SLAUGHTER, Sec'y.

Toms River G. C.

TOMS RIVER, N. J., April 21.—Six ardents made dents in targets to-day. King was big denter with 42 out of 50. Incidentally this same King won a spoon and a picture by breaking 21 out of 25, which score was tied by Williams, who fell by the wayside in the shoot-off, which said King copped, 7 out of 10.

Ed Dempsey will eat with a silver spoon from now on, as he took one for second high with 17. Third lucre was a mess between Tilton and Shuts, each smearing the sunlight with 16. Scores:

Table with columns for names and scores (O B Shuts, Geo Williams, A C King, R Robinson, I S Tilton, Ed Dempsey, O. B. SHUTS, Sec'y).

Buffalo Audubon Gun Club.

BUFFALO, N. Y., April 19.—A gale from the north-west caused many misses to-day, the little clay discs being most elusive. Broderick was high for the day with 81 out of the regular program of 100.

Audubon Club members are making extensive preparations for the entertainment of the visiting sportsmen at the New York State Sportsmen's Association's annual State shoot, June 9 to 11, the first day being practice day. Probably up to date, nearly \$2,500 worth of prizes and cash have been donated for the occasion, and we are counting on the best gathering of any State shoot for years past. The merchandise and added money will be divided according to the Lewis system, and we hope this will insure an equitable division. Scores for to-day's shoot:

Table with columns for Targets, names of shooters (Covert, Rogers, Ebberts, Kelsey, Cox, Eberhardt, Mosher, Lawson, Broderick, Bates, Ward, Blackmer, Hassam, Jerauld, Burke, Immel, Jones, McCutcheon, Smith, Anderson, Cummings, White, Dr Wootton, H Wootton, Talcott, Patterson, Rice) and their scores across 11 targets.

W. C. WOOTTON.

Lawrence F. and G. P. A.

LAWRENCE, Mass., April 19.—High gun money, \$50 was divided as follows: M. Gates, \$25; Dr. W. C. Newton, \$15; A. C. Gray, \$10. The weather was very windy. Scores:

Table with columns for names and scores (J M Gates, Dr W C Newton, A C Gray, J S Fanning, G R Steele, E C Griffith, W J Stainton, \*G H Chapin, S W Putnam, \*A S Stull, G M Proctor, S W Winslow, Jr., \*J E Burnes, W D Hinds, R N Burnes, \*O R Dickey, E E Reed, F R Sweet, E H Archibald, \*W M Hammond, Rob Smith, Geo Golden, G H Bowen, W Parker, A C Spencer, T A Whidden, F H Andres, \*J R Higgins, J M Archibald, C H Littlefield, C R Laguquist, \*A E Sibley, T R Varick, J Spofford, G F Moore, W W Corson, J I Rafuse, H Boynton, A T Foster, A B Colwell, W J McDonald, W F Clarke, C P Blinn, J T Willis, A H Houghton, C Bailey, W W Bradbury, S Hanford, J A Brackett, A B Shuman, W R Hurd, N B Russell, Dr R W Foster, J W Judson, John Blake, J F Chase, F Thompson, B S Drew, O Ruhl, H Litchfield).

Roanoke Gun Club.

A LARGE and enthusiastic crowd of shooters was present on Saturday afternoon, April 26, at the week-end shoot of the club. The sport of the afternoon, however, was somewhat marred by a hard rain that swept the grounds for a short while, after which ideal shooting weather was had. Interest in the club shoots is rapidly increasing and the competition among the members of the several classes is keen.

The weekly trophies offered by the club were won by the following members: Scratch class—No. 1, tie, Jamison and E. W. Poindexter; No. 2, H. C. Elliott. Class A: No. 1, Holland; No. 2, Boyd. Class B: No. 1, Dyer; No. 2, MacFerrin. Class C: No. 1, F. Jones; No. 2, Cooksey. Stevens trophy, Dyer.

The scores made by the respective shooters are as follows:

Table with columns for names and scores (Shot at, Broke, Daniel, Holland, Jamison, E Poindexter, Dyer, Boyd, Elliott, Wilkinson, Bloxton, \*Scholl, Watson, Atkinson, J Poindexter, Shepherd, MacFerrin, F Jones, W S Jones, Dalby, D W Richards, Cooksey, J S Brown).

\*Professionals.

BRYDEN GUN CLUB.

Which will hold its registered tournament June 28.

Hudson Gun Club.

JERSEY CITY, N. J., April 26.—The final shoot for the Schortemeier prizes was held on Sunday, April 20, with the conditions being the most miserable that we have experienced in several years.

The management of the club wishes to thank every shooter that took part for the able manner in which they supported this contest, as it goes to show the donor, Louis Schortemeier, that the prizes were very appropriate, and his efforts in creating new interest in the Hudson Gun Club, was very much appreciated.

Our next shoot will be held on Sunday, May 4. Everybody is welcome at our grounds to shoot as little or as many as you want to. We have a force of seasoned shots here that are always willing to start the beginner on the right track, so get on the job and come to a real live gun club that is not in the game for the coin, but just a good time with a jolly good bunch of shooters.

Shells for sale on the grounds, and lots of blue rocks to shoot them at. Do not't forget the date, May 4, and every second Sunday following.

Table with columns for Events (Targets, H Pape, J Williams, Dr Culver, D D Engle, J E Smith, W Gebhart, W Raymond, J H Smith, W Eaton, W Roach, A Betti, F Smith) and rows for 1, 2, 3, 4, 5.

Table with columns for names (H Burlington, T Kelley, W O'Brien, T Davis, J Thompson, L Schortey, C Von Lengerke, J Pape, R Young, C Phelps, W Dowse, W Hutchings, J Whitley, A Kuzzell, W Summerfield, R Metz, J Williams, Jr) and rows for 15, 26, 17, 16, 14.

SECRETARY.

Jersey City Gun Club.

JERSEY CITY, N. J., April 26.—We had a good attendance at the regular monthly prize shoot of the Jersey City Gun Club to-day. The day was almost perfect for trapshooting, as there was very little wind, and the light was good.

Geo. Piercy, shooting from scratch, won the leg on the Du Pont trophy with a straight 25. Scratch high average was won by Piercy also with a percentage of 85. Kearney was second with 81 per cent. Scores follow in strings of 25:

Table with columns for Targets (Burlington, Tewes, Kearney, Sturdevant, Dr Ittner, Kent, Engle, Hallinger, Williams, Jr, Boothroyd, Smith, Piercy, Dixon, Jones, Black, Summerfield, Coleman) and rows for 25, 25, 25, 25, 25, 25, 25, 25.

Table with columns for names (Budd, Harvey, Finnegan) and rows for 21, 18, 17, 20, 17, 20, 17, 14, 17, 18, 13, 13, 11, 8, 13.

So as not to confuse Smith, mentioned above as a prize-winner, with others of same name in this section, it should be stated that his first name is John. Now we all remember having met him, of course.

Harry Burlington was under the weather to-day and had to give it up after three attempts, which accounts for his poor scores.

Dave Engle had considerable trouble locating the birds, another new gun being the cause. But Dave promises to do better next time, or treat.

Hallinger had a corner on 17s to-day, but found it hard to collect on them.

Fred Kent came out to try his new gun stock and had no kick coming, as he is pretty sure he has it right now.

Williams, Jr., who won second prize last month, was just one bird shy of the same one to-day.

Summerfield wanted to have the right-quarters cut out for the day, but was overruled by the chair.

Grundy Center Gun Club.

GRUNDY CENTER, Iowa, April 23.—High amateur score here to-day was 176 out of 200 rocks, but the wind was the prime anti to good scores. A. H. Cleveland made the above high cracking. The scores:

Table with columns for Shot at, Broke (B Anderson, A L Yearous, C McBride, F M Hamblin, B Rischer, \*C G Spencer, Joe Kantzky, \*J E Dickey, \*W T Garrett, \*F K Eastman, W T Wilson, C Hemmingway, H C Mommer, Robt Page, W S Hoon, Geo Reimers, R C Holck, P C Schmidt, Guv Bailey, G F Rowlett, C Chapman, O Fritzel) and rows for 200, 163, 200, 162, 200, 160, 200, 163, 200, 170, 200, 191, 200, 175, 200, 191, 200, 144, 200, 168, 200, 172, 200, 159, 200, 149, 200, 147, 200, 174, 200, 161, 200, 139, 200, 161, 200, 133, 200, 158, 200, 113, 200, 137.

\*Professionals.

The Southwestern Handicap Won With A WINCHESTER Repeating Shotgun

H. R. Bosley, of Dallas, Texas, shooting a Winchester Repeating Shotgun, won the Southwestern Handicap with a score of 92 x 100—19 x 20 and 18 x 20 in the shoot-off.

R. H. Connerly, who tied with one other shooter, tied Mr. Bosley on 92 targets and was runner-up in the shoot-off, shot Winchester "Leader" Shells and a Winchester Repeating Shotgun.

Nick Arie of Houston, Texas, an amateur, shooting a Winchester Repeating Shotgun, won High General Average for the tournament with a score of 560 x 600, and High Average Over All on 16-yard targets with a score of 340 x 350.

W. R. Crosby, shooting Winchester "Leader" Shells, and J. S. Day, shooting a Winchester Repeating Shotgun, tied for High Professional Average on the 16-yard targets, their scores being 339 x 350.

As Usual, W Goods Win The Big Honors

*“steel where steel belongs”*

# Peters Shells

## WIN SOUTHWESTERN HANDICAP

The  brand was the “whole cheese” at the Inter-State Association’s First Southwestern Handicap Tournament, San Antonio, April 8-10, winning practically all the honors.

**SOUTHWESTERN HANDICAP**, won by **H. R. Bosley**, 19 yards, score 92 ex 100

*Mr. Bosley tied with two others and won in the shoot-off.*

**PRELIMINARY HANDICAP**, won by **R. B. Barnes**, 18 yards, score 96 ex 100

**HIGH PROFESSIONAL AVERAGE**, **J. S. Day** (tie), - - score 339 ex 350

**SECOND HIGH AMATEUR AVERAGE**, **Barton Lewis**, - - score 334 ex 350

**HIGH AMATEUR AVERAGE**, April 11, **Barton Lewis**, - - score 195 ex 200

At New Orleans, April 15-16, **HIGH AMATEUR AVERAGE**, **Barton Lewis**, - - score 387 ex 400

**Peters** SHELLS demonstrate their superiority in this, the first big tournament of the season. Trap shooters are wise to the fact that the  brand of shells gives them a “hunch” in any race. Insist on having *“steel where steel belongs.”*

SAN FRANCISCO: 608-612 Howard St., J. S. French, Manager.

NEW ORLEANS: 321 Magazine St., Lee Omohundro, Manager.

### The Southern Handicap.

THE Interstate Association's Eighth Southern Handicap tournament will be held at Montgomery, Ala., May 13, 14 and 15, under the auspices of the Capital City Gun Club.

Modern Montgomery, the third city of Alabama, furnishes a striking illustration of an historical old community splendidly blended into the new, of a people proud of the venerated past, but living in the present and looking through progressive eyes upon a rosy future. Situated just fifty-seven miles from the exact center of the State, surrounded by fertile fields and virgin forests and at the head of navigation of a noble river, Montgomery early became an important trading post. Indeed, it has never lost its position as the agricultural center of Alabama.

Montgomery, with its wealth of history and tradition, is of the old South, but its people are more boastful that they are foremost in the spirit of the new South. This Capital City of Alabama is pointed out among Southern cities as the most conspicuous example of modern municipal development. It has led the way in sanitary equipment and civic improvements.

There are 52,000 people within trolley car distance of the center of the city of Montgomery, including many planters who go to their farms daily in motor cars. The historic value of Montgomery has made the city for many years the objective point of tourists, and the fine roads of the county have brought many points of interest into accessibility.

Six lines of railroads and navigable river provide ample facilities for the commerce of Montgomery, which approximates in the value \$50,000,000 annually.

The Capital City Gun Club, under whose auspices the 1913 Southern Handicap tournament will be held, was organized in 1905, with a membership of fifty-six. The shooting grounds of the club were then, and are now, located at Pickett Springs, four and one-half miles from the center of the city on the car lines of the Montgomery Traction Company. The grounds are, beyond doubt, among the finest in the United States, with a perfectly clear sky background and ample accommodations for all purposes. The club house is within fifteen feet of the car tracks.

The club is prosperous and flourishing, and its members at all times lend every effort to please and entertain every visiting sportsman. In addition, it is well to bear in mind that Montgomery is the home of one of the oldest shooting organizations in the United States, and that the sportsmen of this locality, as well as the citizens, have at all times been noted for their hospitality and spirit of sportsmanship.

The members of the Capital City Gun Club extend a cordial invitation to all their numerous friends and sportsmen in general to be with them at the coming meet, May 13, 14 and 15, assuring them of a pleasing and jolly time.

The conditions governing the Southern handicap are as follows: One hundred targets, unknown angles, handicaps 16 to 23yds., high guns (not class shooting); \$200 added to the purse; the number of moneys into which the purse will be divided will be determined by the number of entries. Entrance \$10, targets included.

The winner of first money is guaranteed \$200 or more; the winner of second is guaranteed \$150 or more, and the winner of third is guaranteed \$100 or more. If first, second and third moneys fall below these amounts, the difference will be made good by the Interstate Association. A trophy will be presented by the Interstate Association to the amateur contestant who makes the highest score. Regular entries must be made at the cashier's office, on the shooting grounds, before 5 P.M., Wednesday, May 14. Penalty entries may be made after Wednesday, May 14, up to the time the first gun is fired in event No. 5. Thursday, May 15, by paying \$15 entrance, targets included.

#### PROGRAM.

Monday, May 12—Practice Day.—Shooting begins at 1 P.M. Five events of 20 targets each, entrance \$2. Rose system, 5, 3, 2, 1. Sweeps optional. The Squier money-back system does not apply to the above events.

The Columbus Board of Trade, in conjunction with the citizens of Columbus, Ga., offer for competition a silver loving cup, the value of which is \$500, under the following conditions: The trophy is to be known as “the Columbus, Georgia, cup,” and the competition is to be open to amateurs only. To be eligible for the trophy a contestant must shoot in all events called for by the program of the tournament, the Southern Handicap, Preliminary Handicap, and double-target event included, and the contestant making the highest average shooting in all of said events is to be credited with one win of the cup. The trophy is to be contested for at Southern Handicap tournaments only, and it is to become the absolute property of the contestant who wins it three times.

First Day, May 13.—There will be ten 15-target events, entrance \$1.40 in each; extra entrance for Squier money-back system, \$1 each event. There will be also a special event at 25 double targets, entrance \$2. Open to amateurs only. Manufacturers' agents, paid representatives, etc., may shoot in the above events for targets only.

Second Day, May 14.—There will be five 20-target events, on this day, \$1.80 entrance and \$1 extra entrance for Squier money-back system in each event. Event No. 6 on this day will be the Preliminary Handicap, 100 single targets, \$7 entrance (targets included), handicaps 16 to 23yds., high guns (not class shooting), \$100 added to the purse. The amateur contestant who makes the highest score will receive a trophy, presented by the Interstate Association. Regular entries must be made at the cashier's office, on the shooting grounds, before 5 P. M., Tuesday, May 13. Penalty entries may be made after Tuesday, May 13, up to the time the first gun is fired in event No. 5, by paying \$10 entrance, targets included. Entries are not transferable, and entrance money cannot be withdrawn after handicaps have been allotted. These events are open to amateurs only. Manufacturers' agents, paid representatives, etc., may shoot for targets only.

Third Day, May 15.—On this day there will be five 20-target events, \$1.80 entrance and \$1 extra entrance for Squier money-back system, in each. Also will be shot on this day the Southern Handicap (event No. 6), 100 targets, \$10 entrance (targets included), handicaps 16

to 23yds., high guns (not class shooting), \$200 added to the purse. The winner of first money is guaranteed \$200 or more and a trophy; the winner of second is guaranteed \$150 or more, and the winner of third is guaranteed \$100 or more. If first, second and third moneys fall below these amounts, the difference will be made good by the Interstate Association. Regular entries must be made at the cashier's office on the shooting grounds before 5 P. M., Wednesday, May 14. Penalty entries may be made after Wednesday, May 14, up to the time the first gun is fired in event No. 5, by paying \$15 entrance, targets included. Entries are not transferable, and entrance money cannot be withdrawn after handicaps have been allotted. Open to amateurs only; all others may shoot for targets only.

The first Southern handicap was held at Nashville, Tenn., in 1906. Open to all. Total number of entries in the main event, 70. C. G. Spencer, of St. Louis, Mo., handicapped at 20yds., was the winner with a score of 98.

The second tournament was held at Richmond, Va., in 1907 and had 83 entries. G. S. McCarty, of Philadelphia, Pa., was the winner with a score of 92 from 17yds.

The third tournament was held at Birmingham, Ala., in 1908 and had 116 entries. George L. Lyon, of Durham, N. C., was the winner with a score of 94 from 19yds.

The fourth tournament was held at Nashville, Tenn., in 1909, and had 127 entries. S. L. Dodds, of Hickman, Ky., was the winner with a score of 94 from 16yds.

The fifth tournament was held at Columbus, Ga., in 1910, and had 128 entries. J. S. Young, of Chicago, Ill., was the winner with a score of 96 from 22yds.

The sixth tournament was held at Charlotte, N. C., in 1911, and had 100 entries. W. T. Laslie, of Tuskegee, Ala., was the winner with a score of 96 from 19yds.

The seventh tournament was held at Columbus, Ga., in 1912, and had 105 entries. Vassa Cate, of Brunswick, Ga., was the winner with a score of 93 from 19yds.

### Frontier Rod and Gun Club.

BUFFALO, N. Y., April 28.—The attendance was all that could be expected, for the weather was cloudy, cold and a continual downpour of rain. Frank Wright was high with 88 per cent. Scores:

Targets:	10	15	25	25	25
Wright .....	8	14	23	20	23
Eichberg .....	7	9	20	18	24
Wakefield .....	..	..	18	15	..
Rapich .....	6	9	12	15	15

Schlender .....	2	5	8	5	..
Vedder .....	4	9	..	..	..
Utz .....	5	12	16	16	..

The point winners in the cup race are: Class A—Eichberg, 20; Class B—H. Utz, 16; Class C—Squelch, 20. Handicap: Eichberg, 18.

H. C. Utz, Sec'y.

DuPont—Riverside.

WILMINGTON, Del., April 26.—In a team race to-day Du Pont Club defeated Riverside (Pa.) Club, 445 to 436. Delaware's champion, Edward Banks, shot with Riverside and broke 46 out of 50 for high gun on the team. A. B. Richardson and W. S. Colfax, Jr., were high for Du Pont, with 48. The scores of the ten highest men on each side counted for total result. They were:

Table with 2 columns: Du Pont and Riverside. Lists names and scores for various participants.

The Riverside team was captained by Col. G. F. Hamlin, of Philadelphia. The visiting shooters were from Philadelphia, Camden, Trenton, Atlantic City and other places. Each man shot at 50 targets in two events of 25 targets each. The scores of all the contestants follow:

Du Pont.—Bush 37, Worthington 46, Raymond 35, Grier 37, Robelen 32, Hammond 42, Reis 34, Galvin 40, Koss 43, Crawford 27, Webster 25, Torousley 24, Smith 34, Martin 43, J. Mathews 39, Mathewson 35, Carlon 44, Baker 23, Leedom 34, Taggart 25, Bullock 35, Hoopes 41, Richardson 48, Minnick 44, Lawrence 41, Foord 42, Winchestr 39, Tomlinson 32, Doremus 42, Anderson, Jr., 34, Joslyn 43, Skelly 42, McHugh 42, Springer 38, Edmanson 38, Wood 43, Jenks 38, Coyne 31, W. B. Smith, Jr., 29, Dr. Patterson 39, David 26, Gervon 42, Keithley 37, Simon 41, Mayer 28, Touchton 39, Roberson 45, Magahern 41, Colfax 48, Willis 44, Rumford 37.

Riverside.—Jones 28, Dr. Mathews 43, Griffith 41, Henline 41, Cook 43, Dork 36, E. Ford 35, P. J. Ford 43, Pratt 35, Horner 41, Longbotham 31, Lodomson 33, S. Jackson 35, Hause 34, Dougherty 28, Worlow 45, Hamlin 39, Plum 43, Coleman 41, V. Oliver 45, Fisher 35, Bockius 31, Overbaugh 32, Eck 31, Fleming 44, Taylor 34, Newkirk 34, Sidebotham 32, Abbott 34, Waller 30, Stellar 40, Elwell 38, H. Davis 21, Banks 46, Braun 30, Hinkston 38, Waters 43, Torpey 37, Wiltbank 38, Stetter 33.

A. B. Richardson won the Class A Coleman du Pont spoon event by breaking 24 out of 25. The results in the other classes were:

Class B—Wm. G. Wood, 22; Class C—C. H. Simon, 25; Class D—C. C. Gerow, 23; Class E—W. F. Webster 14.

Mason County Gun Club.

MAYSVILLE, Ky., April 24.—The first annual registered tournament of the Mason County Gun Club was held here on April 24. Quite a large number of shooters were on the firing line, considering the recent havoc wrought in this section by floods. The shoot was a success from start to finish, weather conditions being ideal. The wind was at the shooters' backs most of the day, and affected the scores to a certain extent, but it could have been worse. The management wants to thank all those who were present and helped to make their first shoot a success, and can only say, "Come again, boys, the latch string is always hanging out."

Table with 2 columns: Shot at, Broke. Lists names and scores for participants in the Mason County Gun Club tournament.

Events Nos. 6, 7, 8, 9 and 10 constituted the race for the Kentucky State challenge cup. There were four entries for this trophy, and the scores were as follows:

Table with 2 columns: Name and Score. Lists scores for participants in the Kentucky State challenge cup event.

DuPont Gun Club.

WILMINGTON, Del., April 24.—The midweek shoot of the Du Pont Gun Club to-day was ladies' day—not on the side lines, but at the scores, twenty-three of the fair sex being in evidence. This is the second shoot the ladies have attended within a week.

There will be one trap for the exclusive use of the ladies every Thursday afternoon. Following is a list of those who attended: Miss H. O. Hammond, Miss Bessie V. Carson, Mrs. S. Hart, Miss M. V. Lannan, Miss C. Quigley, Miss A. Smith, Mrs. W. A. Joslyn, Mrs. Harry Prettyman, Miss Anna A. Flinn, Miss E. Macken, Mrs. W. F. Jensen, Mrs. F. W. Wilson, Miss J. Hirst, Mrs. J. E. Miller, Mrs. W. L. Adams, Mrs. J. B. Broud, Miss A. E. Riley, Miss M. R. Woodman, Miss Anna G. Dunbar, Miss E. Morris, Mrs. E. L. Riley, Miss Elizabeth Ramsay and Mrs. C. T. Martin.

Among the regulars, Eugene C. duPont broke 90 and 94 out of two tries at 100. J. H. Minnick was second with 93 out of his last 100. Following are the scores:

Table with 2 columns: Shot at, Broke. Lists names and scores for participants in the DuPont Gun Club ladies' day shoot.

Westboro Gun Club.

WESTBORO, Mass., April 19.—First shoot of the Westboro Gun Club was held this afternoon.

The officers of the new association are: President, Howard F. Hemenway; Vice-President, Dr. Charles S. Knight; Secretary, Charles E. Beach; Treasurer, Judge William E. Fowler; Field Captain, John T. Johnson; Lieutenants—J. R. J. W. Fay, Ernest Marsh and Errol Marsh; Committee on Grounds and Traps—Noah Nason, Michael Wagner and Daniel Harrington.

The first 10-target shoot was won by George Taft with 7. The second 10-target shoot was won by Taft with 5. The 15-target shoot was won by Ernest Marsh with 6. The scores:

Ten-targets shoot: Marsh 1, Taft 5, Jones 4, Harrington 1, Wagner 0.

Ten-target shoot: Taft 7, Jones 1, Adams 5, Hemenway 1, R. Harrington 1, Staples 3, Nason 1, Gannon 1, Linz 2, Marsh 2, H. Metcalf 0, Fowler 0, Burgess 1, H. Harrington 1, Rice 0, Parker 0, W. Metcalf 3, Bower 1, Fay 5, Wagner 1.

Fifteen-target shoot: Taft 4, Jones 4, Adams 4, Linz 5, Hemenway 4, Staples 4, E. A. Marsh 1, H. Harrington 2, Nason 3, H. Metcalf 0, W. Metcalf 1, Fowler 1, E. Marsh 7, Rice 3, Fay 1, Barnes 1, Wagner 2,

Fulton Gun Club.

FULTON, N. Y., April 26.—There were four events at 25 targets each shot here to-day. J. C. Hunter was high gun, with 94 out of 100; Fred Weise second, 93. Scores:

Table with 2 columns: Shot at, Broke. Lists names and scores for participants in the Fulton Gun Club events.

April 23.—H. McMurphy was high to-day with 97 out of 100; F. Weise second, 88. Good wind from the north took birds high in the air. Scores:

Table with 2 columns: Shot at, Broke. Lists names and scores for participants in the Fulton Gun Club event on April 23.

# The Ross Rifle

"LOOK OVER THE ROSS"

## Your next Rifle should be a "ROSS" .280—(High Velocity)

The unequalled power and consequent low trajectory of this .280 "Ross" model, its great strength and safety, its ability to withstand at the breech the greatest of pressures, its wonderful accuracy, its power to anchor any game it fairly hits, all these qualities are conceded.

Increased manufacturing facilities devoted to this special model, and new selling arrangements in the United States will enable this "Ross" model to be retailed at a uniform price of

**\$55.00 Duty paid New York—after May 1st.**

No sportsman will grudge this price for the very best rifle in the world.

### THE "ROSS" .280 SPORTING CARTRIDGE

with copper tube expanding bullet (patented) can now be bought from dealers throughout the United States, at \$7.50 per hundred. The accuracy, range, and stopping power of this cartridge have excited the attention of hunters of large game throughout the world. This is the cartridge which gives the best results and should always be used with the "Ross" .280. If your dealer cannot show you the "Ross" .280 and the "Ross" Sporting Cartridge, write direct for illustrated catalogue and name of nearest dealer.

Ross Rifle Co., Department S-14, Quebec, Can.

## NEWFOUNDLAND

**A Country of Fish and Game. A Paradise for the Camper and Angler. Ideal Canoe Trips.**

The country traversed by the Reid Newfoundland Company's system is exceedingly rich in all kinds of fish and game. All along the route of the Railway are streams famous for their SALMON and TROUT fishing, also Caribou barrens. Americans who have been fishing and hunting in Newfoundland say there is no other country in the world in which so good fishing and hunting can be secured and with such ease as in Newfoundland. Information, together with Illustrated Booklet and Folder, cheerfully forwarded upon application to

J. W. N. JOHNSTONE, General Passenger Agent, Reid Newfoundland Company, St. John's, Newfoundland.

### New York A. C.

PELHAM MANOR, N. Y., April 26.—To-day demonstrated once more the growing popularity of handicap shooting among high class athletic, country, golf and yacht clubs. It was the closing of the biggest and most popular trap season ever known at New York Athletic Club. Finals in all trophy events were shot and all awards were popular. Three events went to R. R. Debacher. While neither C. W. Billings nor Ralph Spotts was present, Billings took the J. Stewart Blackton trophy for the highest scratch total on 100 rocks during the season. The winner broke 95 earlier in the season.

To J. Henry Vanderveer, a recently elected member belongs the long-run trophy, with 62, made two weeks ago. Corbett trophy for the season's best handicap 100-bird score ran into a tie between R. R. Debacher, George M. Thomson, Conrad Stein, J. M. Jones and G. Fred Pelham, each with a full total during the season. In the shoot-off, Debacher won.

### Birmingham G. C.

BIRMINGHAM, Ala., April 18.—There was shooting at the Birmingham Gun Club yesterday and to-day. Friday's shooting was done in a rainstorm. We had with us Mr. W. R. Crosby, who made 96 out of his 100 in the rainstorm. John Fletcher was high amateur with 92.

On Saturday, Gentry Hillman was high. The wind kept some of the scores down, but did not affect the shooting of Mr. Hillman. Scores:

Shot at. Broke		Shot at. Broke			
G Hillman.....	100	97	Mrs. Garl.....	100	65
Dr T Sellers.....	100	81	H Brown.....	100	64

The Brantley Gun Club's Tournament.

BRANTLEY, Ala., April 26.—The Brantley Gun Club held a registered trapshooting tournament on April 23 and 24, which was well attended. Ideal weather prevailed, with the exception of quite a stiff breeze. Nevertheless, some very good scores were recorded in each day's events.

W. R. Crosby made the long run of the shoot of 145 targets and was high professional on all targets, his record being 391 out of 400; George W. Maxwell, the one-arm shooter, was second high professional on all targets, his record being 389 out of 400; H. D. Gibbs was third high professional with 388 out of 400; A. J. Hill, of Dawson, Ga., was high amateur and winner of the trophy with 373 out of 400; W. T. Laslie, of Tuskegee, Ala., was second high with 370 out of 400, and J. P. Sousa, New York city, was third high with 363 out of 400.

The Interstate Association contributed \$100, as follows: \$5 added to each of the first ten events on the program of each day. The club contributed \$100, as follows: \$15 added to events Nos. 11 and 12, and \$20 to event No. 13.

The scores:

Table with columns: Name, First Day (Shot at, Broke), Second Day (Shot at, Broke). Lists scores for various shooters like W. R. Crosby, W. T. Laslie, G. W. Maxwell, etc.

W. F. RAINER, Sec'y.

Boston A. A.

BOSTON, Mass. April 26.—Owen and Keeler made full scores on 190 rocks to-day, the former from 18, the latter from 16 gratis scalars. On the shoot-off Owen made a full 25 from 4, thus copping the take-home trophy. First team match in series of six, five men to the team, program 100 targets, was won by No. 3, with 446 out of 500. Staples was high on the team with 94. Snow, of No. 2, was top gun of the entire outfit with 95. Team No. 1 was second with 434. Dr. Ellis won Brooks trophy with a full 100 from 3. Weather was all that a targetter could ask for. The scores:

Table with columns: Name, McCrea, Sargent, Total. Lists scores for Owen, Keeler, Osborn, Davis, Ellis, Snow, Blinn, Brooks, Farmer, Carleton, Dickey, Staples, Sibley, Monroe, Ballou, Clark, Tucker, Achorn, Adams, Sweet, Whitney, Clark, Knights.

\*Guests.

Five-man team match, scratch, for the Snow medals; first of the series of six at 100 targets per man:

Table with columns: Team No., Name, Score. Lists team scores for Osborn, Ellis, Faye, Williams, Monroe, Snow, Brooks, Tucker, Clark, Whitney.

C. B. TUCKER, Capt.

Independent G. C.

READING, Pa., April 26.—About twenty trappists turned out here to-day, and some good breakage was recorded. Particularly excellent crushing was done by Eck, Young, Haag, Davis and Murdorf. Eck got a 24 and a 24 out of 25, and a 15 full. Haag broke 16 straight. Du Pont fob, 25 targets:

Table with columns: Name, Score. Lists scores for Firing, Kofroth, Murdorf, Jones, Sloat, High, Davis, Miller, Stricker, Troop, Stevens fob, Handicap, Haag, Blind, Swisher, Murdorf, Jones, Davis, Troop, Kofroth, Young, Handicap, Haag, Swisher, Murdorf, Jones, Davis, Kofroth, Young, Handicap, Haag, Swisher, Murdorf, Jones, Davis, Young, Firing, Handicap, Haag, Swisher, Murdorf, Jones, Davis, Kofroth.

M. F. KOFROTH.

White Plains Gun Club.

WHITE PLAINS, N. Y., April 28.—An interesting shoot was held at the White Plains Gun Club on Saturday, April 26. The day was ideal, and brought out a total of twenty-seven shooters. A. L. Burns was high gun, and also won a leg on the Schiefflin trophy. H. M. Ferguson, a new member, won first take-home prize and a leg on the Stevens medal. C. H. Hadlock and A. M. Dalton won second and third take-home prizes in the order named. F. F. Rogers won a leg on the Allyn trophy for doubles. Scores:

Table with columns: Name, Shot at, Broke. Lists scores for A. L. Burns, Dr. G. H. Martin, G. P. Granbery, E. Carpenter, Z. C. Offutt, T. H. Lawrence, T. L. De Nysc, A. B. Hubbell, H. Finch, F. F. Rogers, L. Brush, J. T. Hyland, B. R. Stoddard, A. M. Dalton, Allyn trophy, F. F. Rogers, T. H. Lawrence, J. T. Hyland.

Bon Air Gun Club.

PITTSBURGH, Pa., April 26.—Not a great many of the boys turned out here at our shoot to-day, but those who did were mighty enthusiastic. On 50 rocks Reshterwald and Stahl tied at 41. Stahl made 25 straight in his last string. In the rifle division, Wolfe made 72. The scores:

Table with columns: Name, Score. Lists scores for King, Stahl, Slater, Rechterwald, King, Stahl, Rechterwald, Bradshaw, Wolfe, Miller, Wolfe, Miller.

A SINGLE TRIGGER Lefever Gun

in the hands of L. H. REID, Seattle broke 2115 x 2200 = 96.14% with ordinary factory loaded shells purchased from local dealers.

Mr. Reid, shooting at Interstate Association Registered Tournaments throughout the 1912 season, has the high average for the Pacific Coast.

The loads were regular factory loads; the LEFEVER bore, famous for the even pattern and penetration, assisted MR. REID to make this record.

Why don't you shoot a LEFEVER Single Trigger this year?

Mason County Gun Club.

THE first annual registered tournament of the Mason County Gun Club was held at Maysville, Ky., on April 24. The attendance was quite good, though not up to expectations, the recent flood, no doubt, preventing some shooters from taking part.

A feature of the tournament was the contest for the \$400 Kentucky State challenge cup, which was won by Wm. H. Hall, of Maysville, on the Cincinnati grounds last fall, T. H. Clay, Jr., of Paris, being the challenger, and two other Kentucky shooters entering the contest.

High score for the day was made by W. Henderson.

professional, 166. High amateur average was made by H. Clark, 163. W. H. Hall was second with 159, and T. H. Clay third with 157.

The Cincinnati Gun Club was represented by Arthur Gambell, J. E. Schreck, M. J. Welch and J. B. Clement. The officers of the club, to whom credit is due for the smooth manner in which everything was pulled off, are: A. Simpson, President; John V. Dea, Vice-President; J. M. Cochran, Secretary and Treasurer.

E. H. Nesbitt was official referee. The grounds were open for practice on the 23d, and several of the out-of-town shooters availed themselves of the opportunity presented to get acquainted with the flight of the targets and the surroundings. The scores:

Table with 2 columns of names and scores. Includes entries like \*C O LeCompte 154, J B Lallance 149, R H Bruns 154, T H Clay 158, A S La Follette 146, A Gambell 143, C B Strother 155, \*W Henderson 166, C R Wheeler 141, J E Schreck 153, H Clark 163, C B Cage 106, \*Professionals.

Table for Kentucky State challenge cup, 100 targets. Includes entries like C B Strother 92, T H Clay 91, W H Hall 90, J E Schreck 85.

Paleface Gun Club.

BOSTON, Mass., April 26.—The two-day shoot held here was a mighty interesting affair. Snow, from Boston A. A., shot a great program, getting 383 out of 400 for the two days, missing 9 the first day, and 8 the second. Ralph Spotts, of New York A. C., was second with 381; E. A. Randall, of Portland, third with 375. Lester German was top for wads only with 378. Scores:

Large table with 4 columns: Name, 1st Day, 2d Day, Total. Includes entries like \*Fanning 171, Largerquist 166, Snow 191, \*Ballou 175, Richardson 155, Proctor 187, Blinn 172, Davis 176, Keeler 163, Marden 177, \*German 187, Hinds 181, Clarke 177, E A Randall 190, \*Hammond 157, Billings 174, \*H A Keller 174, \*Chapin 181, \*Darton 181, \*Stevens 181, Griffith 180, Gray 161, \*Sibley 174, Blanchard 175, Littlefield 157, McArdle 184, Arnold 172, Spotts 188, Hadden 176, McMahon 186, Gilman 160, Burr 187, Weymouth 166, Bowen 179, Staples 187, Brooks 164, S W Dimick 169, Blanchard 169, Biff 157, Bob Smith 157, Bergin 180, Taylor 163, Burnes 177, Steeler 184, Whitney 159, Haines 122, Newton 180, Andres 160, \*Dickey 171, Hilliard 178, \*Fay 183, Searles 177, Spencer 164, Eaton 169, H W Knights 171, \*H Keller 179, S V Putnam 189, Farmer 178, \*Wheeler 177, Charles 167, Osborn 176, Wigglesworth 179, Doten 180, Emory 169, Carlton 52.

Cincinnati Gun Club.

IN spite of the threatening weather on April 27, there was a very good attendance at the weekly shoot of the club. Several of the officers stationed at Fort Thomas were present on April 26 and took part in the various events. In the 100-target race Hammerschmidt was high man with 92, Medico being his nearest competitor with 89. In the team match the civilians put it over the military by a margin of 16 targets, Irwin, of the former team making high individual score of the match.

The day was not the best for shooting, a strong wind affecting the flight of the targets, and heavy rain in the forenoon cut the attendance quite a little. On the 27th, rain about noon kept many from starting to the grounds, and the number was smaller than usual. There was a puzzling wind which made the targets climb skyward every once in a while, and caused more than one of the misses. C. O. LeCompte tied with H. C. Connelly for high gun on 90. Schreck divided second place honors with A. Gambell on 86. L. C. LeCompte, who is pretty nearly as big as his "Pa," gives promise of making "Charlie" go some in the near future. Two team matches were shot, and both were closely contested, but one target separating the teams at the finish.

Hammerschmidt arrived at the grounds late in the afternoon, and only shot at 50 targets. The first 25 he broke straight, and then, in a match with Butz, he broke 21, the latter tying him with the handicap of 2 targets. Davies also made a nice score of 24, shooting with Hammerschmidt. In an extra event at 25 targets, C. O. LeCompte broke 23, Butz 19, Sander 17, Frohlinger 20 and Cox 19.

The next contest in the inter-city team matches between Dayton, Springfield and Cincinnati has been postponed from April 26 to May 24, and will be shot at Dayton instead of at Springfield, as at first scheduled. The flood caused this change in the plans. The last

match will take place at Springfield soon after the Grand American.

Table for April 26, 100-targets race. Includes entries like Donaldson 74, Medico 89, Munson 47, Hammerschmidt 92, Rethers 47, Stegeman 67, Smith 76, Irwin 83, Wilburn 63.

Table for Team match 25 targets per man. Includes Officers (Medico 19, Smith 15, Welburn 12-46) and Civilians (Donaldson 20, Irwin 22, Stegeman 20-62).

Table for April 27, 100 targets. Includes entries like C O LeCompte 90, Frohlinger 75, C Cox 79, Connelly 90, A Gambell 86, Sander 81, Butz 87-163, Schreck 86, L C LeCompte 64.

Table for Team match, 100 targets. Includes entries like Gambell 85, Butz 84-169, Team match, 25 targets: L Gambell 22, Sander 18-40, A Gambell 22, Butz 19-41.

Dead Shot Averages.

THE following have won points on the "dead shot" high average trophy:

Table with 2 columns: Name, Points. Includes entries like Nic Arie, Houston, Texas 6, H Kennicott, Glen View, Ill. 6, II J Rebhausen, North Platte, Neb. 4, Harry Dixon, Oronogo, Mo. 3, Harry H Sloan, Philadelphia 2, J S Young, Chicago, Ill. 1, A J Brown, Kankakee, Ill. 1, J F Wulf, Milwaukee, Wis. 1.

Daniel Boone Gun Club.

MARTHASVILLE, Mo., April 26.—Ahmann again landed the Du Pont job for the week. If he wins it again next week it will be his, and will be out of the competition, but we expect a good attendance and a hard race at that time. Scores:

Table with 4 columns: Name, Shot at, Broke, Name, Shot at, Broke. Includes entries like Ahmann 50, Mutert 50, Bollmann 50, Underwood 50, Fortmann 50, Koelling 25, Berg 25, Wilson 25, Meyer 25.

New Hanover Gun Club.

WILMINGTON, N. C., April 26.—The following scores were made at the regular Friday afternoon shoot:

Table with 4 columns: Name, Score, Name, Score. Includes entries like Grant 49, Boylan 45, Penny 45, Grant 43, Underwood 41, Pierce 40, Dreher 43, Underwood 41, Pierce 40.

NEW HANDY OIL CAN

Hunters and All Sportsmen wanted their 3-in-One in a can, so we got out Handy Oil Can—The Can that Can't Leak. It's just hip pocket size. Contains 3 1/2 oz. of oil—Costs 25c.

You can buy it at any hardware or sporting goods store. If your favorite dealer hasn't secured Handy Oil Cans yet, we will send you one by parcel post prepaid on receipt of 30c. in stamps.

Leading gun manufacturers for years have used and urged all hunters to use 3-in-One gun oil. It's the only oil on earth fit for fine guns or revolvers.

3-in-One lubricates perfectly lock, trigger, ejector, break joints. Cleans and polishes barrels, also wooden stock. Positively prevents rust.

FREE Write today for a hunter's generous free sample.

Sold everywhere also in 3-size bottles: 1 oz. 10c.; 3 oz. 25c.; 8 oz. (1/2 pint) 50c.

THREE-IN-ONE OIL CO. 112 New Street New York

After You Get Through Talking

about the good points in any particular gun—the proof of its worth to you—is what the gun will do.

FOX GUN

\$25

Fox-Sterlingworth

is a reasonably priced gun—embodying all the superior features of FOX GUNS—and carrying with it the Fox Guarantee and Inspection Certificate. It will perform like a high-priced gun—and come home with the game.

There is more value in a FOX-STERLINGWORTH at \$25 than any gun ever made.

Ask Any Sporting Goods Dealer

to show you the FOX-STERLINGWORTH. It's the gun for the man who wants a good gun without any fancy frills. Handle and test it. You will wonder at its superior worth.

If your dealer cannot supply you, write us, giving his name, and we will send catalog and "20 Reasons Why" FOX Guns are superior.

The A. H. FOX GUN CO. 4655 N. 18th St., PHILADELPHIA

**Marine and Field Club.**

GRAVESEND BAY, N. Y., April 26.—Gravesend Bay yachtsmen shot their final match for this season to-day, and some handsome scores resulted. The shoot-off for March cup resulted in a full 100 for J. M. Knox, shooting from a handicap of 12. In this event E. H. Lott broke 95 from scratch. On April cup, at 300 scalers, P. R. Towne won with 280 from 4. C. D. Sayre was second with 270 from 6.

The special shoot from scratch at 25 rocks was a hummer. C. D. Sayre, E. H. Lott and H. M. Brigham each ran 25 straight, and in shoot-off Sayre broke 24, Brigham 23, and Lott 22. Sayre was almost invincible. He ran 49 out of 50, and fell down on his last aerosaucer.

This has been a decidedly successful season among sailing and motor boating clay disc crackers, and augurs well for a big squad next year.

April cup, 300 targets:					
P R Towne.....	4	280	C B Ludwig.....	10	264
C D Sayre.....	6	270	C M Camp.....	8	242

**Secaucus Gun Club.**

SECAUCUS, N. J., April 27.—At the regular shoot of the Secaucus Gun Club, held to-day, ten of the members took part. Owing to a high wind that blew in from the traps, filling our eyes with dust, the scores are a little below the average. Scores follow:

Shot at. Broke		Shot at. Broke	
Toussaint.....	114 70	Post.....	62 26
Matthies.....	114 63	Morgan.....	62 30
Strobel.....	87 57	Meerbott.....	25 5
Duke.....	87 36	Frohberg.....	25 2
Walhanke.....	75 14	H Kroll.....	62 46

Our next shoot will be held on Sunday, May 3, at 2 P. M. sharp. The club house is situated on Mill Creek. Take White Line car and get off at Lausicker's residence on the Patterson Plank road, near the power house. Plenty of shells. Targets one cent each.

R. MORGAN, Sec'y.

**Day New Jersey Champion.**

ORANGE, N. J., April 26.—C. H. Day, Jr., ripped the nails from the case in which for some little time has laid the trophy designating the Jersey clay bird championship. He shot a good race, winning by one bird, with 47 out of 50.

**ALONG THE CAROLINA COAST.**

Continued from page 560.

congregate in the marshes, sloughs and ponds. The natives kill vast quantities, or did several years back at the time of our visit. But they derive small financial profit therefrom, having few facilities for reaching quickly the best markets. What they sell is usually to professional gunners, who visit the beaches in small coasting boats, both sail and motor, who besides slaughtering much themselves, buy all that is offered at a very low figure, then transport it to Newberne, Beaufort and other convenient railroad towns. How they pass through local restrictions as to exporting undue quantities of game is one of the mysteries, which, while apparent enough to anybody who cares to keep his eyes open, is under the surface difficult to solve.

There are few, if any, canvasback or red-heads about Hatteras. We saw a great plenty of mallard, pintail, black duck, teal, brant, and were told that in the spring, wild geese and swan assembled in this part of Pamlico Sound preparatory to their northward flight.

A few miles southwest of Cape Hatteras is Ocracoke Inlet, with a small village of that name near; and beyond that is another one, Portsmouth. We did not go there, but they present pretty much the same characteristics as those of Chickamacomico, Big Kinnakeet and Hatteras. At Ocracoke is said to be one of the finest ranges for brant shooting on the coast, as many as two hundred having been killed by one gun in one day, so we were told. There are no sporting clubs in this coast section south of New Inlet. The general inaccessibility of the region probably being the reason. It takes a week from Washington; and the time and labor, not to speak of the expense, involved, keeps sportsmen away. So many privileges are offered by clubs along the west shores of Pamlico and Albemarle Sounds, that where time as well as money are an object, these primitive but attractive places on the outer coast rim, are passed by. Again, the exposure to storms that occur during the winter season requires certain qualities of stoic endurance that many do not possess. Yet, to those who are willing to accept the difficulties, and the dangers, there is much good sport and enjoyment to be had at a comparatively small cost.

Another thing I must not pass over. I do believe there are more raccoons on Cape Hatteras than any place I ever hunted over. The inextricably rough, close character of the vegetation, combined with the debris constantly cast up by the sea, and the inexhaustible fish supply washing up against the Sound shore line all go to make Br'er 'Coon wax fat and fierce. Though the pelts are rated low in the fur market, the field for trapping when the fur is at its best is a good one. You will hardly find a domestic cat on the island for, despite pussy's deputed nine lives, the 'coon soon disposes of them all. One moonlight night we went out with a Capt. Etherige and one of his coast guards, and came home in the small hours with

over a dozen 'coons, all fat and fit in every way.

Perhaps one reason for Br'er 'Coon's flourishing so here is that his hereditary foe, the darky and his 'coon dog, is singularly absent. A Southern 'coon hunt without the African and his dog, is not unlike Hamlet with the melancholy prince left out. To us it looked as if the coast rim about Hatteras would be an ideal spot for our colored brother, who likes to live without work. All he would need would be an old army musket, a cast net, a few fish lines, a shanty built out of beach-comber's lumber, and a good 'coon dog. It looked as if this locality would beat even the Yazoo Swamps in Mississippi, as the spot where Sambo might sit back, and out of a "full belly," warble his old song:

"'Possum up a gum tree, 'coon in de holler,  
Rabbit in de briar patch, fat as he kin waller."

But the negro simply is not in it along the seaboard rim of North Carolina, especially about Hatteras. The white natives simply will not have him about at any price—as a permanent residenter. It may be, however, that the driving storms, and the constant thunder of old ocean roaring the year round so nearby, has something to do with it. With all its crude abundance, this narrow eastern edge of the old North State is, in many ways, a strenuous country to live in.

After a final week of enjoyment and open hospitality on the part of our friends the coast guards, to whom we must add the people and families at the lighthouse, Ben Bolt and the writer at last voyaged back toward old Virginia via the inland waters of the sounds.

It being well on toward winter, and northers prevailing, the little coasting sloop that bore us took another week to beat up through Pamlico, Albemarle, Croatan and Currituck Sounds. In fact, it was a "long leg and a short one" all the way up, and the "long leg" was not so lengthy after all. We were zig-zagging from one tack to the other nearly the whole way back; and we realized the perversity of nature when, almost within sight of the railroad that would take us back to Norfolk, the wind veered, backed and finally settled into a steady southeaster, which probably lasted as long as the other. But we did not care. We were back again, safe, well tanned and hearty. If we had it all to do over again another year, it is likely that we would not kick, provided we could spare the time which grubbing after reluctant dollars that "must be had" imposes on our unwilling souls.

to put up the swim of my life. But the best I could do did not make much headway against that current. One of the fellers that had been a little more chummy than the rest came closer an' tried in every way to encourage me.

"Try an' make this rock, Ben," he said, "an' I'll try to hold you there a minute till you breathe a spell. Now a little further; quick! Now you'll make it," but here I happened to git my eye on my other self jest in time to see him startin' to roll over the ledge into the water. I forgot to wriggle. My pard shouted: 'You're lost, Ben! Good-bye, old boy!'

"Splash came the body into the ice cold water, an' I was back in my old frame ag'in, but still had the problem of savin' myself from goin' over the falls. I tell you, gentlemen, it was a close call; nothin' but those slippery rocks to hold to an' the falls only ten feet behind me an' a sight of rapid water ahead. I was five minutes makin' that swim of one rod. It seemed like five hours, but somehow I could see Jane before me all the time lookin' more anxious than I ever seen her. Waal, when I got out an'

wrung the water out of my clothes an' got in the warm sun, I felt like another man. Somehow, I knew that every bit of laziness had left my system, an' it really had.

"I walked straight back, found my axe an' went to cuttin' harder than I ever did before. That night when I come in dad an' ma looked at each other, but never said a word. Next mornin' I was the fust one up, an' done the chores 'fore dad got up. Mam looked surprised an' worried like. Didn't say a word to me when I shouldered my axe an' went out. They could hear my axe ringin' all mornin' an' 'bout to o'clock mam come out with a lunch an' set down on the log where I couldn't chop. Said she: 'I've brung you a little lunch, Ben; can you eat it?'

"'Guess I kin,' says I, an' begun eatin' like a wood chopper. Mam kept eyein' me all the time. Seemed as ef somethin' was on her mind. Finally she said: 'What's the matter with you Ben?'

"'Nothin', I said; 'why?'

"'This change,' she said.

"'What do you mean?' says I.

"'Why, all this work inside twenty-four hours. Are you real well?'

"I jest busted out into a shoutin' laugh. Mam she jumped as ef she were afeard of me an' kind of sidled away from me. Then she said: 'I must be goin'.'

"I watched her till she was out of sight, then went to my choppin'. At noon dad says to me: 'Ben, you'd better not go out ag'in; you don't look well.'

"'I never felt better in my life,' says I. 'I done more these last two days than I ever did in a year afore.'

"'We know that Ben, an' that' what's a-worryin' us.'

"Well, that tickled me. To think their worryin' 'bout me for not workin' for ten years, then when I did begin, they'd worry 'bout that. So I jest give another laugh like I did down in the woods. They both looked at each other jest the same way as ef they understood. Dad whispered to mam. Then they both got up an' dad said: 'Will you stay here five minutes, Ben?'

"I said I would. They went out an' in less than no time got back, both of them a-holden to Jane.

"She looked at me quite curious like for a minnte, then said: 'What's the matter, Ben?'

"'Why, nothin,' Jane, only I've been workin' an' what's more, I intend to keep a-workin'. I'm a-goin' to clear this ten acres for dad, an' then I'm a-goin' to clear ten more an' build a cabin ef you'll take care of it for me.'

"This last came out afore I knowed it, an' all the time I was a-sayin' it I was a-lookin' straight into Jane's eyes, as I never had afore. When I fust commenced talkin', she looked kinder surprised like. Then as I kept on, her eyes begun to brighten, gitten' brighter an' brighter till I finished, an' then I realized what I had done. I wished I could have slunk out where dad an' mam couldn't hear me git refused.

"But they didn't hear it, for she walked straight over to me an' took my big hand in hern, an' said: 'You'll do it Ben, I know you will, an' what's more I'll help you make the cabin a home.'

# MY BOOK IS FREE

## "A Sportsman's Handbook"

My new book will interest every lover of Outdoor life. It contains not only accurate description of Tents, Camp Outfits, Firearms, Fishing Tackle, and Athletic Goods, but many pages tell of my experiences in the big outdoors.

Experiences when camping, hunting and fishing, with advice as to pitching a tent, paddling a canoe, choosing a rifle or shotgun, how to learn bait- or fly-casting, what to take camping, selecting clothing and provisions, how to use a compass, preparing game and fish for mounting and other "kinks" in wildcraft.

Accept this book with my compliments.

Send me your name and address in exchange for this profusely illustrated 472 page "Handbook." Please mention No. 570.

## SHOOTING FOR RENT

In South Carolina, fifty miles south of Charleston, the shooting over ten thousand acres of land in one body, lying on both sides of the Atlantic Coast Line R. R. Very fine partridge (quail) shooting. Deer hunting. Ducking in rice fields. Fishing in Combahee River. Apply to **MRS. F. R. BLAKE**, Arden P. O., Buncombe County, N. C.

## Hints for Campers.

BY LORNA.

As usually cooked, dehydrated potatoes result in a soapy mess, reminding one of the watery mashed potatoes of a tenth rate boarding house, only more so. This need not be. Tie the potatoes, or other dehydrated vegetable, in a square of cheese cloth by gathering up the corners and loops; soak the bag of potatoes, so formed, in cold water for two hours or more; place the bag in a kettle of salted boiling water and boil thirty-five minutes. The potatoes in all respects should be equal to good mashed potatoes produced from the fresh vegetable. The "riced" form of the potato may be more perfectly preserved by steaming the bag instead of placing it in the boiling water, but this requires skill and experience, and is apt to result in failure.

**Boiled Cabbage.**—As often cooked at home and in camp, boiled cabbage is yellow, slimy and odorous. To boil it properly, the cabbage should be cut in quarters and placed in a kettle half full of boiling water with half a tea spoon of soda. Do not let the water boil over, but boil with the kettle uncovered hard and steadily for thirty minutes. Add salt during the boiling. Remove the cabbage. If you have not tried this before, you will be surprised at the improvement over the old way, and the family camping on the other side of the lake need not know that you have cabbage for dinner. Note the shortness of time required.

**Hollandaise Potatoes.**—If you are baking potatoes with meat, put an onion with the potatoes. It keeps the potatoes from getting hard and imparts a delicate flavor.

**Polishing Aluminum.**—Rhubarb contains an acid that has its own effect on aluminum. While it is true that aluminum does not oxidize, it does corrode, and it does discolor. To remove corrosion and discoloration, stew rhubarb (some call it pie plant) in the aluminum vessel to be cleaned and rub the nasty slimy stuff over the inside and outside of the kettle or other article. Then wash and dry. A new silver dollar will hide its face in shame.

## New Game Preserve Formed.

THE first public hearing, held under Chapter 470 of the Acts of 1911, State of Massachusetts, relative to establishing fish and game preserves in the State, held by the Fish and Game Commission, was productive of a game preserve upon the land of Frederick Cunningham and Paul B. Morton, a tract of nearly 3,000 acres with three large artificial ponds. Most of the land is ideal cover for ruffed grouse, and these birds should increase rapidly under the protection of the State. All vermin will be killed and the birds given all possible protection. It is the belief of the commissioners that if several of these preserves can be established in each county of the Commonwealth, and birds given all possible protection, that the old New England partridge will remain with us and furnish sport for our children's children.

Chapter 470 provides that any person or persons or any town may petition the commission on fisheries and game to close a certain area for a period not exceeding five years at a time.

# Big Fishing

**THE NEW ENGLAND LINES**

Room 723 South Station, Boston, Mass.

## Plan Game Protection.

THE sportsmen of Dayton, Minn., have organized the Minnesota Game and Fish Protective League, having for its object conservation of game and fish in the State. It plans to co-operate with similar organizations and to aid the State game and fish commission in the enforcement of the laws.

The new league grew out of the feeling that commercialized hunting is being done on a large scale in Minnesota. Members believe that if prompt action is not taken Minnesota game and fish are in danger of extermination. The following officers were elected the other day: Dr. Charles Nootnagel, President; P. W. Guilford, Vice-President; E. H. Bass, Secretary and Treasurer.

## Elk Shipped Into Wyoming.

THE forest office at Custer City, S. D., R. P. Imes, supervisor, has been notified of another shipment of elk from the Yellowstone National Park to the Sundance, Wyo., National Forest Reserve. This shipment contains twenty-five animals and they will be shipped over the Burlington from Billings, Montana, to Savoy, in the Spearfish cañon, where they will be unloaded and when weather conditions permit, they will be driven over the Wyoming line. For some time the matter of obtaining some of these animals for the Harney Peak Forest Reserve has been under negotiation, and it is likely that in the near future a shipment will be secured.

## Want New Game Laws.

A recodification of the Minnesota game laws is urged, and that conferences be held with the legislatures of North and South Dakota and Wisconsin. Among those who have conferred with the legislators were George Copeland, E. E. Bass, Dr. O. R. Bryant and A. M. Packer, of the Minnesota Game and Fish Protective League. The delegation asks that turtle dove be taken from the list of game birds, that the limit on prairie chickens, partridge, grouse and ducks be cut to twenty-five. Protest was made against the bill by Senator Charles Cook, establishing a closed prairie chicken season until 1916. The question of providing for a later opening of the hunting season was also discussed.

# Break Your Trip to the Pacific Coast — stop off at Glacier Park

No matter whether your trip to the coast be for business or pleasure, plan to spend at least a few days in this great scenic wonderland.

Every moment of your stay will be brim full of enjoyment. Every pine-laden breath brings you vigor and strength. Every preparation has been made for your comfort. A new \$150,000 hotel has just been completed. A wonderful chain of Swiss chalets provides for an ideal stopping place at each stage of your trip through the Park. Rates, \$3 per day. (American plan.)

Tours by automobile, horseback, launch and stage, also camping and walking tours—\$1 to \$5 per day. For example, a four-day trip to the heart of the park will cost you but \$22—all expenses included.

## Unique Aeroplane Map and Special Booklet FREE

Write at once for completely illustrated descriptive literature and Aeroplane View map of the entire park in colors—all free. Any possible advice or assistance in planning or arranging your trip will cheerfully be rendered.

## A Contraband Incident

### CHAPTER III.

#### A Story of the Forties Written by Nessmuk

*Illustrations from "Woodcraft."*

**T**HEN the man told us the story.

"And what did you do that they cut you up in that way?" asked Kelly. "I reckon you must 'a' been a pretty hard case."

"No, massa, I neber was a hard case; allus did my bes' to please 'em an' wasn't sassy. Dey cut me up 'cause I wanted my freedom an' run away. Massa 'greed to let me buy myse'f for seven hun'ed dollars, an' when I'se paid him four hun'ed of de money, he jes' backed out an' wanted me to take de money back ag'in; but he offered me fair, I mus' say dat for him; he offered me five hun'ed dollars in hard money. He said he couldn't let such a boy as me go nohow; I mus' stay wid him till I was an ole man, an' den he'd take care of me, but I wanted my freedom jes' as bad as tho' I was white, an' when I see da wasn't no odder chance, I run away."

"And got caught and flogged?"

"No, sah, not de fust time. Dey cotch me, but massa wouldn't 'low no floggin' 'bout it; he talked to me 'bout my wickedness an' got me to promise an' try to be contented, but I couldn't. It seemed to me as tho' I mus' get my freedom or die, so I run away again, but it 'peared like de Lord had turned ag'in me. Dey cotch'd me an' bro't me back, and dat time massa was gone away, so de oberseer could jes' do as he wanted to, an' he had an ole spite to pay off, so he took me down in de woods out ob hearin' ob de folks at de house an' tied me up. I dunno how long he whipped me; 'pears like it mus' bin half a day—whipped me till I was jes' done gone; didn't know nuffin' 'tall 'bout it, an den washed me down wid salt an' water. Seem's tho, a man couldn't suffer as I did dat night an' live, but de berry next day he took me out an' whipped me ag'in. I hope de wust inimy I hab in de wurl' neber 'll suffer as I did dat day, but it come to an end at last. Massa come home while de whippin' was goin' on an' de han's tole him 'bout it. He neber said a word, but run his hoss down to de grove an' jes' lit on dat oberseer like a mad pointer. De oberseer was grit, too, so he turned an' fit his bes', but Lord! 'twant no good, massa handled him like a baby. He got him down an' choked him till he couldn't git up, an' den jumpt on him wid de boot heels an' kicked him right smart. I neber see a white man git sech a lickin'. Arter dat dey used me well. I was took up to de house an' missus doc-

tored me herself till I got able to work; dat took more 'n' two months. De oberseer was sent off an' dey hired a new one—a peart man he was, an' didn't jaw an' flog like de old one, but when he did flog—oh g'way! wa'n't he ugly! When I got round ag'in, massa took me for his coachman an' promised me dat I shouldn't be flogged nor sold so long as I'd behave myse'f, an' I promised to serve him faithful. I would

SHANTY TENT AND CAMP-FIRE.

'a' done it, too, ef it hadn't bin for de new oberseer."

"What about him?" asked Jason; "did he give you that huge scar there under your shoul-der?"

"Yes, massa, 'twas him did it. De new oberseer took to follerin' my wife an' botherin' her eb'ry chance he could get. She didn't want nuffin' to do wid him, an' tried to keep out of his way, but he wouldn't be put off; he kep' follerin' her up 'till he got so troublesome dat she complained to massa, but he only laughed an' sed he reckoned de oberseer wouldn't hurt her. When we was married, missus made de weddin' for us an' had her own minister to marry us jes' like white folks. She talked to

us, an' de minister he talked 'bout bein' true an' faithful to one anoder like true Christians, so when our trouble come an' de oberseer wouldn't leabe us alone an' massa wouldn't make him behave, Anne (dat's her name, massa), she went to missus an' begged to have her speak to de oberseer so he'd behave hisself decent. Missus was a Christian if dey eber was one, an' she took de oberseer to do 'bout it, an' tole him if he troubled us ag'in he'd be sent off quicker. She gib him a good talkin' to an' tole him dat dat way oughter be 'shamed to show his face 'mong 'spectable white folks. Dat jes' made him sabage; he didn't say much, but de way de han's had to stan' roun' arter dat was a caution.

"'Bout a week arter missus scolded de oberseer, I had to take massa to Richmond in de coach, an' when I got back I foun' Anne in our cabin a-cryin' as ef her heart would break. She was a-layin' on her face an' her back was all covered wid blood where de oberseer 'd bin whippin' her. Oh, Lord! gen'l'men, dat was hard to bear. He'd managed to pick a quar'l wid her 'bout jes' nuffin' at all, an' he knowed she was mos' as bashful like as a white woman, so he made her strip afore all de field han's, an' cut her up ugly wid a cowskin. He wanted to whip her more, but missus cotched him at it an' made him stop. I never see anybody so mad as missus was about dat whippin'. She was a mighty ambitious\* woman, an' she 'clared if de oberseer wasn't turned off, she'd take de pistols an' shoot him herself, but, massa, he wouldn't hear of it. De oberseer got more work out ob de han's dan any oder man could, an' massa knowed it, so he pacified missus an' made believe he'd turn him off as soon's he could find a better one, an' gib orders neber to strike me or my wife ag'in while he staid on de plantation. 'Peared den as ef we might take some comfort yet ef dat oberseer 'd only leabe us alone, but he wouldn't.

"One day I had to go down to de pasture arter de hosses, an' when I got dar I heard a woman's voice in de thicket clos' by a beggin' to be let alone, an' den I heard a man's voice, rough an' sabage, tellin' her to shet up, to hole her tongue, or he'd skin her. I knowed well enuff 'twas dat oberseer makin' us trouble again, but I didn't dar' to get ober de fence. I knowed

\*The slaves and poor whites at the South often used the word ambition for high spirit or temper.

I should kill him ef I did. I prayed de Lord to help poor Anne in her trouble, an' tried to catch de hosses an' hurry away out of hearin' afore I got into mischief, but de Lord ordered it different. Afore I could get away I heard Anne give a screech, an' den I shook like I had de ager, but I wouldn't go dar, 'cause you see 'twon't do for a slave to strike a white man, an' I thought mebbe she'd get away from him arter all, but she didn't. I heard her screech two or three times arter dat, an' den she made a kine of smoderin' noise as ef he had his han' ober her mouf or was a chokin' her. I raily can't tell what happened arter dat. De fust I knowed arterward, 'bout a dozen ob 'em was a holdin' me an' massa was a docterin' de oberseer. He was pounded up mighty bad, was de oberseer. A piece of his ear was gone, an' one eye was clean knocked out ob his head. He looked awful bad, an' dey said I done it. Ef I did, I didn't know it, but dey tied me han' an' foot an' den went arter de doctor for de oberseer. For two days an' nights dey kep' me in an ole log stable, an' when de oberseer got well enough to 'tend to me, dey had some more gen'l'men from Richmond an' 'round de neighborhood to see what should be done wid me. Some of 'em was for giving me up to de law, an' some was for whippin' me an' scillin' me down South. I wanted 'em to sen' me to jail an' let me be tried, but dey wouldn't hear nuffin' I had to say. Dey agreed to let de oberseer whip me an' den sell me for what I'd fetch; 'twouldn't be much, I knew dat mighty well. De next mornin' I was tied up in dat ole log stable an' de whippin' was begun. De oberseer did it. He had much as twenty cowskins an' gads, an' he took his coat off an' rolled up his sleeves jes' as calm like he meant to do a day's work, an' he 'lowed he'd see my backbone afore night. Den I knowed he meant to flog me to death, an' I begged of massa to shoot me right on de spot, for 't 'peared as ef I couldn't stan' sech torment no way, but massa hc'd turned ag'in' me an' dere wan't no hope nowhar. All de forenoon dat debil ob an oberseer whipped me by spells. He'd whip me from de neck down till he got tired, den he'd rest an' take a drink ob whiskey, den hc'd begin an' whip up awhile, an' den take anoder drink. When he knocked off for dinner an' washed me down, dere wan't a spot on my back as big as your thumbnail but was raw, an' de wust was to come yet. I prayed an' agonized wid de Lord to take me right away afore I could suffer any more, but I wasn't to die yet. After dinner dat ole debil come back ag'in, an' he was so drunk he couldn't even flog decent. He took one of de gads an' come at me like a mad bull; he hit me over de head, on de arms an' legs an' everywhere he could. I kep' my face away from him, but he marked me awful."

Here the poor fellow showed a number of ugly welts on his legs, arms and head, after which he continued the simple recital of his wrongs.

"He got tired ob dat arter awhile an' went off to de spring to wash his face an' sober up a little, an' when he come back I see he meant mischief. He took off his coat an' went to whippin' slow an' stiddy, like he did in de mornin', only dis time he picked out de bigges' gad an' struck all de time in de same place. 'Now, damn you, I'll cut your heart out.' Dat's what

he said, an' he meant it true an' airnest. 'Pears as do people couldn't know how wese made to suffer or dey'd rise up ag'in' it. Ebry blow dat debil give me it seemed as ef it went right fro' to my breas' bone, but jes' when I was mos' gone, de door was bust open an' missus come in. She'd bin talkin' to Anne an' got at de whole trufe o' de matter an' her ambition was up awful. She pulled de gad out o' de oberseer's han's an' jes' laid it ober his face an' eyes beautiful, an' when massa come in wid her brudder an' two more gen'l'men an' tried to pacify her, she talked to 'em like a preacher. She tole 'em dat slavery was a cuss an' a disgrace to de Souf, dat it made brutes of de mas'rs, an' de slaves, too, an' dishonor'd deir wives an' darters. She said dat me an' my wife

OUTDOOR COOKING RANGE.

wid twenty more ob de sarvants b'longed to her, an' she called her maker to witness dat she'd free us afore six months was gone ef she lived. She tole massa dat him an' de oberseer 'd murdered me in de face an' eyes ob right an' jestic, an' she made 'em all clar out, massa an' all. Den she got some ob de stoutest han's an' had me carried to my own cabin an' tole Anne she needn't do any more work, but jes' tend me till I got well.

[CONCLUDED NEXT WEEK.]

Beneath a hemlock grim and dark,  
Where shrub and vine are intertwining,  
Our shanty stands, well roofed with bark,  
On which the cheerful blaze is shining.  
The smoke ascends in spiral wreath,  
With upward curve the sparks are trending;  
The coffee kettle sings beneath  
Where sparks and smoke with leaves are blending.

And on the stream a light canoe  
Floats like a freshly fallen feather,  
A fairy thing, that will not do  
For broader seas and stormy weather.  
Her sides no thicker than the shell  
Of Ole Bull's Cremona fiddle,  
The man who rides her will do well  
To part his scalp-lock in the middle.  
—From "Woodcraft" by Nessmuk.

THERE are two great sources of power—wealth and brains.—Herbert Kaufman.

### An Echo from the Past.

BOSTON, Mass., April 25.—*Editor Forest and Stream:* One of my young joys was that series of fishing yarns known to us as "The Camps of the Kingfishers." In those days I hunted for that first before settling down for my enjoyment of FOREST AND STREAM, and if it contained an instalment, my happiness was complete. Old Knots, Sam and the rest were living friends to me, regardless of the fact that I never met them in the flesh.

Now, a whole generation has come up since then, including, I believe, part or all of the editorial staff. All this condensed happiness is locked away in the pages of the past, and these youngsters know it not. At this late date I have no idea how much page space it would take to reproduce it, and perhaps it might be well to edit out some sections; nevertheless, wouldn't it be worth while to make some issue of FOREST AND STREAM a special number, and give us a reprint of them under one cover? What if it does necessitate a double number. I, for one, would be glad to pay my twenty-five or fifty cents if need be for that special. What does the Old Guard say? (I suppose they'll let me into their ranks now when I claim to have been townsman and friend of J. G. Rich, mighty in bear slaying). Let's all send a postal to the editor about it and let him count noses and see if it would pay. Send yours, brother; yes—yours.  
JOHN PRESTON TRUE.

### A New Protection Organ.

GAME NEWS is the title of an interesting club organ issued monthly by the Erie County Society for the protection of birds, fish and game. It is published from Buffalo, N. Y., under editorship of A. R. Smith. The field covered by this little bulletin is wide, in that it discusses proposed legislation as well as suggesting improvements in game and fish laws already in force. Its present big agitation, and a most worthy one, is reclamation for the fishermen of Niagara River and Lake Erie. Success to this little publication and the greater cause.

### "Traveling" with Nessmuk.

PROVIDENCE, R. I., April 19.—*Editor Forest and Stream:* I want to congratulate you on being able to give us something new from the pen of "Nessmuk," as I do congratulate myself that I am to be able to peruse the same. I have traveled over much country with "Nessmuk"—on paper—and he has seemed very much like an old friend to me and was mourned as such when he passed over the Great Divide.

SAMUEL B. BURNHAM.

WYOMING, Ohio, March 19.—*Editor Forest and Stream:* I have been a FOREST AND STREAM subscriber for years on and off. Have been "off" some time and now got "on" again. Used to write letters on gun matters, and you published them, too, without kicking as far as I know. Am an archer also and twenty-nine years ago made a record at Chautauqua, N. Y., at the annual tournament of the N. A. A., which has never been equalled before or since. Hence I am interested in archery, and as you have lifted FOREST AND STREAM up to that first class sport, I am with you again. WM. A. CLARK.

# Trout Fishing in New South Wales

By H. K. ANDERSON

AUSTRALIA is now at the end of the 1912-13 trout fishing season, which extends from Nov. 1 to April 30, and while loth to do so, have to admit that it has been on the whole disappointing as regards the number and size of the trout caught.

Several of our rivers literally teem with rainbow trout, of the famous Shasta River stock, imported some twenty-five years ago, and it is truly marvelous to note the manner in which they have adapted themselves to our climate.

In Monaro the climate is cool, frosty nights occurring right up to Christmas, which conditions seem to suit the rainbow trout admirably. In winter frosts in this part are very severe, and in the higher altitudes the thermometer gets well down below zero. This will be news to many who look on Australia as a "hot country."

Among the rivers which are very heavily stocked may be mentioned the Snowy, Murrumbidgee, Goodradigbee, Jounama and a number of smaller streams. These appear to be particularly adapted to the requirements of the fish, as they have increased enormously, and it is in many places possible when rising three flies to catch a fish on each at one cast many times during a day's fishing.

The result of this over-stocking is that the trout have deteriorated in size, and where five years ago four to six-pounders were common, one is lucky now to secure a trout of one to one and a half pounds in weight. This is of course due to a great extent to the depleted food supply. The native minnows, which were the only fish in some of the streams before the trout were introduced, have all been devoured. The fresh water crayfish, shrimps, beetles and aquatic insects have been so reduced in numbers as to have become an almost negligible quantity, far from sufficient to feed the great numbers of trout which have a continual fight for existence, hence grow long for their weight and not too long at that.

There are one or two streams where this great multiplication has not taken place, which are still only (comparatively speaking) lightly stocked. The Badja River for instance, which is well fished year after year, but contains and will always contain large trout. It is very weedy, the weed beds teem with natural food, and as there are many deep pools, ample harbor is available for big fish.

Another such river is the Upper Queanbeyan, sluggish, weedy and full of sunken snags. Some of the pools are twenty feet deep, fringed right round with weeds over which it is necessary to cast the fly in order to catch a trout. Having hooked him he must be played in the small patch of open water and landed or lost according to the skill (and luck) of the angler.

It was on this stream that the writer and friend, W. Bollard, of Captains Flat, N. S. W., spent their week's holiday in March last, of which trip the following is a brief outline:

Leaving Sydney on March 8 at 8:25 p. m. with the thermometer registering something in the eighties, it was refreshing to step on the

platform at Bungendore, 180 miles away, at 3:30 next morning and find the temperature somewhere about freezing point, at an altitude of only 2,292 feet. An early start was made by coach for Captains Flat, whence a further twenty miles drive brought the party to the Upper Waters of the Queanbeyan River, a distance of forty-eight miles by road, up hill most of the way, and about 5,000 feet above sea level.

Drizzling rain and sleet set in just as the wagonette drew up at the camp (which had been previously occupied on several occasions), but tents were speedily rigged and all made snug. On that night, March 8, the memorable storm which inundated many parts of Sydney and the suburbs and wrought a deal of damage, passed over the camp. Fortunately it was sheltered by a bluff from the force of the storm. The wind roared down the valley, leveling everything before it. Trees were crashing down in all directions for a space of half an hour by which time the storm, in that locality at all events, had expended its devastating power. Rain fell all night and all day Sunday, but after midnight the clouds broke a little, and by 4 a. m. on Monday there was not a cloud in the sky.

At daylight the ground was white with frost. Although so much rain had fallen, the river only rose about a foot, and was almost clear, as it flows through granite country and nothing short of a flood will make it muddy.

The anglers proceeded up stream, Mr. Bollard taking the right bank, the writer the left, and on reaching the first pool, Mr. Bollard hooked a big fish which put up a game fight, rushed into the weeds, out again, leaped a dozen times into the air, and finally came to the gaff, a glittering 8-pound *irideus*, perfect in shape and coloring, and in the pink of condition. A little further up stream the writer rose a fish, but missed him. At the next cast he came again and the hook went home—a wild rush up stream, down again, out of the water time after time, then down he went and remained with his head on the bottom, his tail perpendicularly above, defying the best efforts of the angler to move him for quite three minutes. With a rush he came to the surface and dashed round the pool with a series of leaps. Changing his tactics, he came straight for a bed of weeds some ten feet across, reaching from the angler's feet outward, and penetrated some distance into them. This proved his undoing, as he was getting tired, and after holding him in the dense weeds for about ten minutes, a track was broken through them with a sapling, and the almost dead fish led to the bank. He weighed eight and a half pounds.

Mr. Bollard, who had watched the battle from the opposite bank, moved a little way further up stream, and at first cast struck a splendid fish, which tore off a great deal of line, but fortunately kept out in the open. By skillful handling, she was brought back, and played to a finish, and on receiving the gaff registered nine and a quarter pounds, the best fish of the trip, a lovely hen fish, fat, and with rich salmon colored flesh.

Finding a crossing place, the anglers who had a long way to go decided to bury the fish in a rabbit burrow, so collected a lot of green ti-tree bushes to line the burrow, placed the three big fish in it, and covered them with ti-tree, placing a log over the entrance to keep out any stray fox which might come along, as reynard is partial to trout.

It was some distance to the next pool, and on reaching it a nip and a smoke were indulged in, watching the water the while to see if any trout were moving. Not a rise was seen, but this is frequently the case, and the angler must provide temptation in these waters; not wait for the trout to take the initiative. There is no current, but one soon learns to know where to expect a fish, and a naturally worked artificial fly will very often "draw" a good fish that is lying in his holt surrounded by natural food.

By the end of the day, eight very fine trout weighing 9¼, 8½, 7½, 7, 6½ pounds and three others over 4 pounds were caught besides which quite a number of heavy fish were lost in the snags and weed beds.

On the following days six trout, largest eight and a half pounds, by Mr. Bollard, were caught. This magnificent fish put up the best fight either of the anglers had ever seen. It was in an extremely difficult place, and the fish was a lively one, but Mr. Bollard, who is a very clever angler, after allowing the trout one run of perhaps twenty yards, brought him back and kept him swimming round and round in a circle of open water not more than twenty feet in diameter, thwarting rush after rush, and actually fighting the fish at the rod point. A dozen times it attempted to rush into the weeds, and as often was turned, only to repeat the charge in another direction. It was the finest piece of work the writer, with thirty years' experience among fish of all kinds had ever seen, as the trout was very strong, and the fly, a cochy-bondhu on No. 4 hook, had only a light hold in its jaw. The writer's bag was one seven-pound and one six and a half-pound rainbow.

The next day was bleak and cold, and only one fish was so much as moved. He came to a coachman on the writer's first cast and weighed about six pounds. Not another rise was seen during the whole day.

The last two days' fishing found the anglers with heavy baskets, both securing some large fish, from four to eight pounds. During the trip one half-pound fish and one one and a half-pound fish were caught and returned to the water. There were two three-pound fish and all the rest were over four pounds in weight. Several four to five-pounders, big with spawn, were promptly liberated.

The flies used were the cochy-bondhu, which accounted for 50 per cent. of the fish, claret and teal, teal and red, zulu fished deep, and in the evening the coachman near the surface. The total number of trout for five and one-half days was thirty-five, and the average weight five and a quarter pounds (live weight).

Over a hundredweight of cleaned rainbow trout were taken into Captains Flat on the return journey. Such a fine lot had never been seen there before, and the writer brought to Sydney about eighty pounds of trout which were distributed among friends and neighbors in perfect condition, as they were sprinkled with salt, and the weather was deliciously cool.

# Newfoundland Salmon Fishing

By G. H. F.

I WILL give some information for the benefit of the brotherhood. This is to assist in taking the first degree, and may be uninteresting to those who have it all "by the book." Arthur C. Fox, 175 Claremont avenue, New York city, followed my information obtained from you two years ago, and as he is a man of sober truth, and happy to help anyone in New York desiring to sift me down to the wheat, had best see him. He will be disposed to let the secrets out for the common good. I am a fisherman of sixty-six years of age, forty years at fly-fishing, so many years "young," of inflamed red corpuscles, and so refer to someone to corroborate me.

Now for information. For Newfoundland

other way to journey: Take train over B. & M. at 8 A. M. to Portland; thence Maine Central to McAdam Junction, N. B., where the C. P. R. train takes you to St. John, N. B., arriving about 10:30 P. M., where you change cars in the station and take sleeper to Truro, Nova Scotia, and arrive about 6:30 A. M., where you stop till about 9 A. M. and take same train you would take had you taken the steamer at about noon the second day before. You can calculate the difference in the running time from this as about twenty hours.

The steamers leave North Sydney every day but Sunday, if they do as last year, and as they have put on a new steamer, I have no doubt that they now have two new steamers and leave

within twenty rods. The river is away about a third of a mile. It is an open farming country, not too deep for wading, having sandy beaches, the banks in places fringed with alders, wide enough for casting with a good, long line; boats not used except way down toward the mouth.

The black flies are not very bad, if there is a breeze, and there is usually one after 9 A. M. The mosquitoes are not at all "thick" and scarcely seen at night at the house, and not at all in daytime. One should be provided with "dope," and I have never found any difficulty in fishing at all times on account of flies, although a very sensitive person might find some fault on some days.

The fishing begins about June 25 and lasts until the middle of September, but the best of it is from July 1 to Aug. 20. The fish in Little River are the largest on the island, but they are not so numerous and the "off days" are many. When the fish are "off" we go on the train up to the Grand Codroy in the morning and back at night, or else stop at another boarding place of the Tompkins Bros. at South Branch, called the "Bungalow." That place can accommodate only about ten people. The price of board is \$1.50 per day. Guides get \$2 and board themselves unless you lunch out, when you pay 25 cents for that. Tompkins Bros. hunt you up guides.

There is no camping allowed on that Little River. One can fish without a guide, if he prefers, but he misses the information which he needs, and the knowing ones are apt to get ahead on the pools. It is not best to try it, if comfort and success is worth having. In August there is apt to be all the rods on this stream that it is equal to, but I have never been unable to get a fair chance when the fishing was good, for that makes a greater number of fishing points.

When the water is low, the fishermen get discouraged, and the persistent ones profit by their discouragements. A good guide helps most on those occasions. He braces you up and won't let you fall out by the way.

The temperature on the island is low for summer, about like May in New England. The nights are cool. The rains are not any too frequent to keep the streams up to fishing height, but when it rains, it pours and blows "great guns."

So much for that stream. If one goes as early as the 10th of June, he can go to Doyle's at the lower end of the Grand Codroy and fish up about three miles. Doyle Bros. keep boarders and look after guides and boats. But that is a point where the fishing does not last beyond the last of June with much certainty. Doyle Bros. keep a good place. I have never stopped there, but know that the early fishing is fine. The trains pass only about a half mile from their place. They keep a country store at the station. This station is up about four miles from Tompkins. From Tompkins we go up to their bungalow, twelve miles, and get off at South Branch station. That is the post office. The boarding place is close by. There is no

SOLID COMFORT.

salmon fishing we may as well start the facts from Boston, assuming that anyone can easily find that point.

Two ways of going: By steamer to Yarmouth, Nova Scotia, leaving Boston at about noon, and reaching Yarmouth in the morning, and from there taking Dominion Atlantic train through Digby to Windsor Junction, and from there to Truro, where remain over night and take the train about nine in the morning for North Sydney; arrive there about 7:30 P. M., going to steamer landing. At about 11 P. M. take steamer for Port Aux Basques, N. F., where you will be examined by custom-house officer perfunctorily and have to deposit duty on rods and cameras until your return, when it will be given back to you, if you bring back your rods. Maybe this is a good thing, so as to have some cash to spend on the way home. Pay \$10 for a license to fish, and fish as much as you wish to and anywhere. Get the license there. An-

as above stated. The passage across to Port Aux Basques takes about seven hours and is usually a smooth one. At P. B. take train about 7:45 A. M. and arrive at the first salmon river at 9:15 A. M.—that is, Tompkins, on Little Codroy River. The only boarding place there is with Tompkins Bros., farmers, who cater very well and have quite a number of rooms—enough to take care of all that come. The table is not what is "high grade," but is as good as can be expected in a fishing camp. There is abundance of fairly well cooked food, fairly well served, and the beds are good. Fastidious fishermen are scarce, and must enjoy their own peculiarities as best they may.

The people one encounters there are of a good class, educated and interesting, and accustomed to put up with the absence of luxuries, depending on the substitution of salmon for what they left at home that was "way-up."

The boarding place is close to the train,

other boarding place there. Mike Tompkins runs it, and is a most obliging and attentive host.

The Grand Codroy is in sight there. This is a wide stream, very rocky and ledgy, shallow, and the fishing extends down stream about four miles, and up stream nine. The railroad runs so near the river that one can get off the train at all the larger pools (the trains make a practice of stopping), and by walking half a mile or so, get to the fishing. Then at the end of the afternoon he can flag the train and come back to the bungalow or Tompkins. The trains run every day, or did last season. The best and largest pools are the Forks near the bungalow; next below Big Salmon Pool; next, Spin Top; next, Reynolds; next, Mollychigneck; then Lime Stone. Between these are many chances to fish in "runs."

The Forks Pool is a very long one, and usually affords a chance for three or more rods. There is considerable camping on this river at this point and below, but none above. This occurs usually in June and July, but not much later. Above these lower pools are Smoke House, two miles away; Five-Mile Pool that distance from the bungalow; Seven-Mile Pool, then Six Birches, nine miles away, and the Siding Run a mile further. These are all famous, but a little later than the lower pools. About the 5th of July the salmon are found in these upper pools. The South Branch comes in at the railroad bridge above the bungalow and has some good pools, though somewhat less certain. By going up on that branch four miles the fishing is at an end.

The fishing begins at the lower pools about the 10th of June, and holds good, with interruptions from low water, to about the middle of July. From then on it keeps coming with every rise of water from showers or rains. More grilse are found in this river. Perhaps two-thirds of the fish after July 20 are grilse that one gets. They can usually be got at almost any time whether the water is high or low.

The next rivers are Robinson's and others nearby. These are early rivers—June and the first half of July. The fishing at Robinson's is mainly near the mouth. To go further up one needs a camp, and those are all private, belonging to sportsmen. In August they are used by people who care to go up. It is about ten to twelve miles to the upper fishing, and severe tramping along the stream over rocky bottom. George Shear, address Robinson's, N. F., is a camp owner and guide, and will take the best of care of anyone wanting to go to Robinson's. If one desires fine grilse fishing, with a few salmon, in August he can be pretty sure of it with him. There is no better guide in the country.

There, I guess I have gone far enough for your information bureau.

I am not advertising any of these places, therefore, notwithstanding my exuberance of interest in salmon fishing, I am sure that a man who has the red fishing-blood in him will not go astray from following my speel of information. I won't guarantee that he will catch, but I can say that from a "greenhorn" in Mr. Fox I have got a man who can keep up with any of them, not by crowding other fishermen—which he will never do—but by just patiently

plodding each day where the chance is likely and not getting down-hearted.

I went up there a year ago last season when the rods seemed to be rather plenty, but I just journeyed where they did not think of going and surprised the whole "kit." I just followed the same course last year and did even better. There are lots of lazy men who want to fish where it is easy to get, and they have to endure the sight of rival rods; but there is always a chance to fish somewhere.

The average new hand gets discouraged because he can't get a lot of fish every time he tries, but if he did, the sport would be "plug fishing." That is, it would be no more sport than that. At my age of sixty-six and a weight of 135 pounds, I am no athlete, but no man needs to be an athlete to swing a rod that weighs no more than a pound, using both arms. We don't have to cast a line forty rods to reach fish. No good trout fly-fisherman need be long in getting the "hang" of sending out fifty feet to reach his fish. The fish are usually right in sight and forty feet of line will go where they are. You don't have to keep casting until the fish rises, but let them have time to change their whims. That change comes sooner or later. Lie down and let the flies eat you, and then go at it again. The black flies are sometimes troublesome on the Grand Codroy, but there is more trouble arising from a growling disposition that sets one a chafing than from flies. If one is afraid of dope, then he must suffer at times, but it is all moonshine that it is too insufferable to be endured for good fishing. Get used to using the "medicine" and shut up growling, and all will be happy.

If I were a woman I wouldn't go salmon fishing until I had cut off my hair. But many women fish on the Grand River and find nothing to growl about.

Now for tackle: Rod, split bamboo, 13½ feet long or about; weight, a pound. Don't get one made too stout. Don't get a greenheart of greater length than 13 feet. Flies of size No. 6 and 8. Loop gut. The Pennel-eyed do not set the hook in well. I like Limerick. Need about a dozen of each kind. Kinds: Jock Scott, black dose, silver doctor, silver gray, dusty miller, inky boy, black dog; six of each size.

Leaders: Nine-foot, salmon single X and XX; cost of X, 5s.; XX cost 10 per cent. off. These sizes are strong enough, and of excellent gut. People buy leaders that cost \$3, and I never had one of the kind I buy break from a strain of fish. They are smaller and make less show in the water. One ought to have about eight to stand the wear. I can make one last two or three weeks, but of course a leader will fret some in casting. I keep three soaked up all the time, and shift leaders, instead of shifting flies on the leader. That saves cutting off a part of the leader in shifting, for the better way is to cut the loop off your leader, and tie the fly on the end, and thus have less to fret the water and disturb the fish. Use either long rubber wading boots up to your crotch, or get the wading stockings and large canvas brogans, with hob nails. You will be surprised at the amount of room the hose will take between your wading stockings and brogans. We use heavy yarn hose outside the waders to keep the sand from cutting the waders, and a man who wears seven boots will want about ten and a half

waders, and nine or ten of brogans. Try the waders and stockings and brogans to be sure you are right, because it won't be happy to find the brogans tight. You must not expect them to look pretty. But I have made great use of tall rubber waders, and have found them all right. Only get the heavy ones or they will hurt you against the rocks. If a pair lasts three weeks, they will do well, or you will be pretty careful and quiet. Waders last a long trip.

A gaff of a spread of four to four and a half inches is about right. Those without any handle are best, for you can cut a handle and save carrying a useless piece of wood. I never bother with these fancy handles, for they are not as long as the guides like. A short rubber jacket is better than a long rubber coat to use when it rains. Better have knickerbockers, for long trousers are hot in the waders or rubber boots. I take a pair of disused trousers, and the tailor makes knickerbockers of them.

It is cool enough to wear flannel shirts, and a soft hat is better than any cap that ever burned a man's nose off.

For a reel, get a 4¼-inch diameter, single gear, nickel plate. German silver adds nothing to usefulness. Line, forty yards, vacuum finish enamel, backed by sixty yards of silk or linen, lashed on so to run through the guides and tapered. Size as for trout or landlocked salmon trolling. Don't get the larger size salmon line, for while good in windy weather, it makes too much "splish" in the water. Don't get one too fine, for it won't cast in any wind. *In medio tutissimus ibis*. The English or Scotch lines are better than our enamel lines. I have tried them both.

Now I have given you lots of points of use to those who are new to this fishing. It would not be just right for New Brunswick or Canada, for they use larger flies and rods there, but it fits the demands of Newfoundland to a T. I would not advise a man to get wading trousers, unless he were to fish very early in June, when the water is high. They are hot and heavy in July, and not at all necessary. Soft feeling waders are the best, and the English and Scotch beat us to a "frazzle." Thin silk ones are fine, but I do not think they are so durable, and they cost a good bit. A good wading stocking ought to cost about \$7.50.

A. Barton Hepburn, chairman of Chase National Bank, of New York city, who has been shooting big game in British East Africa, and has a large "bag" to his credit, has started home from Mombassa.

## A New Campaign

### To Stop the Importation of Wild Birds' Plumage for Millinery.

[From Zoological Society Bulletin for May.]

FULLY one hundred species of the most beautiful and curious birds of the world are now being exterminated to meet the demands of the feather trade, for plumes, feathers and skins to use on the hats of thoughtless women. If the American women of society and of fashion could be made to know the details of this trade, and what it means, they would be among the first to support the movement for the protection of birds from the feather trade. The stories published by the Audubon Societies, of the starvation of egret nestlings through the slaughter of parent birds, are incontestably true, and those telling of the extermination of certain birds of paradise are also true.

Remember that the feather trade is attacking the existence of an immense variety of birds, ranging from the condors and vultures, egrets, hawks, owls, birds of paradise and emus, down to the pheasants, ducks, callistes and humming-birds. No beautiful bird is spared unless fully protected by law.

The New York Zoological Society is strongly and permanently opposed to this slaughter. It challenges the right of the feather trade to exterminate the most beautiful birds of the world for millinery purposes. It objects to bird slaughter in New Guinea just as strongly as to bird slaughter in Florida! Every civilized nation has a duty in this matter which cannot be ignored.

On Jan. 30, the Executive Committee of the Society asked the Ways and Means Committee of Congress to incorporate in the new tariff bill, now being framed, a provision that will absolutely stop the feather-millinery traffic throughout the United States. The argument, brief and exhibits of the Society's representative appear in full in "Tariff Hearings No. 23."

The full text of the Zoological Society's proposed provision is as follows:

At the end of Section No. 438 of the new Tariff Law, add the following:

"Provided, That the importation of aigrettes, egret plumes or 'osprey' plumes, and the feathers, quills, heads, wings, tails, skins or parts of skins, of wild birds, either raw or manufactured and not for scientific or educational purposes, is hereby prohibited; but this provision shall not apply to the feathers or plumes of ostriches, or to the feathers of domestic fowls of any kind."

On April 7 the new Tariff bill that was presented to Congress contained this clause.

The Society is now endeavoring to place before the American people an impressive summary of facts regarding the awful extent and destructiveness of the feather trade. A large four-page circular, filled with information, has

gone to every State, and that portion of the newspaper press which pays attention to the needs of wild life has been asked to assist in spreading the facts. We are asking the people to make their wishes known to Congress, and particularly to members of the House of Representatives.

It is important that all the world should know that at least 100 species of the most beautiful and most curious birds of the world are being exterminated for the feather trade. Unfortunately, there is not the slightest exaggeration in this statement. No wild-bird species that is pursued and killed for valuable plumage can possibly escape ultimate extinction. Even the countless millions of the passenger pigeon went down before the guns, clubs and nets of the market-hunters, and only one bird now remains alive.

For years the Royal Society (of London) for the Protection of Birds, aided by James Buckland, has besieged the British Parliament for a law to stop the London traffic in the plumage of wild birds. While considerable progress has been made, success has not yet been attained because of the fierce opposition of the feather trade, backed by the Chamber of Commerce! "The Trade" wants the money!

In America several States have stopped the sale of the plumage of North American birds for milliners' use, but the sale of such foreign birds as birds of paradise still goes on generally! This is entirely wrong.

We have asked Congress to take the action that will forever wash our hands of the blood of these beautiful creatures, so far as millinery is concerned. The National Association of Audubon Societies is with us—or we are with it, whichever it may be! Australia has already enacted such a law as we are asking for. In that country the national watchword is "Advance, Australia!" The Australians have done so, and we are sorry we were not the first to reach the goal.

The cause is a great one—well worth striving for. It is worth while to work for a cause that, when successful, sweeps a shame and an abuse from half a continent! While the matter is not so great as the migratory bird bill, it is still so great, so far-reaching and so admirable when done that it may well claim the attention and the efforts of the best people of America.

The time has now arrived when every American woman, and also every man, who desires to strike a hard blow in defense of the persecuted birds of the world can do so. It can be delivered by writing in behalf of the Society's provision, directly and immediately, to all members of Congress outside the State of New York. New York members need no urging.

Think what it would mean to end, for the whole United States, by only six lines of national law, the disgraceful bird-slaughter that now is going on in response to the demands of the traders in American fashions!

Of course, the National Milliners' Association will vigorously oppose our measure. It will denounce it as "unconstitutional," "confiscatory," "class legislation" and "oppressive." We expect all that, and more. Possibly one-tenth of one per cent. of the American people will be represented by that opposition; but will they prevail against the 99.9 per cent. who are firmly opposed to bird slaughter for the enrichment of "the feather trade"?

Ask your Congressmen to maintain our clause, unchanged!

HENRY FAIRFIELD OSBORN,  
President New York Zoological Society.  
MADISON GRANT,  
Chairman Executive Committee.  
WILLIAM T. HORNADAY,  
Director New York Zoological Park.

### As to Carp Eating Trout Eggs.

ALBANY, N. Y., May 3.—*Editor Forest and Stream:* In your issue of April 19, Verdi Burch, of Branchport, asked if trout spawn ever had been found in a carp's stomach. It seemed to me that I remembered a specimen jar in Dr. Bean's collection when I was secretary of the old Fish and Game Commission, that contained a carp's stomach in which there were trout eggs among those of other species. I wrote Dr. Bean about this and his interesting answer says:

"I do not remember an instance of finding trout spawn in a carp's stomach, although I have no doubt that the carp will eat trout eggs just as readily as the rainbow trout and dolly varden trout and brook trout will eat eggs of other fishes as well as individuals of their own species. The yellow perch and the bullhead are inveterate destroyers of fish eggs of any species within reach. Some of the minnows and the suckers are also very destructive of spawn.

"I doubt if I have seen the bottled specimen to which you refer, as I am not now in possession of the old collections, but we had in the office in the Capitol a box of yellow perch caught in Keuka Lake, and in every perch stomach there were from 150 to 200 or more lake trout eggs. Our men took between 3,000 and 4,000 yellow perch at one haul of a net over a lake trout spawning bed in that lake, showing a probability of the loss of about a half million lake trout eggs on one bed in a single night through the depredations of the perch."

JOHN D. WHISH.

### Mastodon Skull Found in Indiana.

A. C. DAVISON, a dredge owner of Rochester, Ind., has a complete mastodon skull which was uncovered by his dredge on the Charles Yankee farm. The skull, which is in a perfect state of preservation, measures about 27 by 19 inches. Two oval-shaped teeth, one in either side of the lower jaw, carry their enamel almost as well as in life.

# GAME BAG AND GUN

## Observations on a 20-Gauge Shotgun

By H. E. W.

**M**OST shooters with considerable shotgun experience at times acquire a hankering desire to use a 20 rather than a 12-gauge gun. That they don't make the change is because they doubt their ability and the change is expensive. Practically every bird-shot has learned on a 12-gauge; they know its possibilities and its limitations and dependable information as to how a 20-gauge shoots, and how well one can shoot such a toy is not readily accessible outside of the maker's catalogue, and these are notoriously prejudiced.

It is, therefore, worth while to jot down some observations accumulated through several years in the hope that some basis of comparison can be set up, and the average man can determine whether he belongs in the 20 class without the expense and waste of time necessary to make the experiment for himself.

I have shot all my life—for I didn't begin to live till I killed my first bird at the age of eight or nine, and that was forty years ago. For the past thirteen years I have had a 12-gauge low priced Smith hammerless that fits me to perfection, and that I love as I love a member of my family; with it I can shoot quail, woodcock, prairie chickens and partridges under any conditions a little better than I ought to. In other words, it kills at times when it ought to miss. Ever had a gun like that? But, as I give a good deal of time to shooting, and have very dependable sport in a southern club, have for some years felt I ought to shoot a 20-gauge; so, four years ago I presented one to my boy, who was then a shooter in embryo—six years old. By this my self-respect was preserved, for I could try it out on the sly, and still keep "Sweet Love" near by for emergencies. The first autumn I used it in Virginia in company with "the best shot in America" (the quotation is my own). I missed abominably, shot low, killed raggedly, and was frequently greeted with such commiserating comments from my friend as: "You are losing your eyesight, old man—you are getting out by age." This went on till my last morning in the field, when after a nasty miss or two, and a howl of ribald laughter, accompanied by "nothing the matter with the gun—it's the man behind the gun," I retorted, "Gus, for God's sake, let's change guns, and let me find out where I actually am." The change was made, and Gus missed five birds out of six, and killed his sixth like a school boy with a smooth bore. I got five straight with his spatterbox, and we both sat down to study. Gus hit upon the trouble maker almost instantly—the trigger pull was too heavy, and made us both slow and nervous, flinchy, as it were.

First lesson: Don't try to shoot a 20-bore with a trigger pull of more than three to four

pounds. Returning home, I had no further chance to use the gun that year, but the opening of the season in 1910 saw me again in a stubble field in Virginia, with my 20 in the case at the farmhouse and dear old "Sweet Love" under my arm. She was as reliable as ever, and I suppose I averaged 60 to 70 per cent. for several days. One afternoon I reluctantly tried the 20-gauge, and to my surprise, killed birds with wonderful success and speed. I don't recollect, though I keep a record of every shot, but am quite sure I killed six or seven birds straight; it was open and easy shooting, of course, and I suppose the strength

rarely more than one on covey rises, and then either misses or ragged kills on singles. I was shooting a little below my average, but far better than he, until the last day he was with me, when I began to fall off. The day after he left I got eleven out of twenty-one shells, and the next day six out of twenty-eight shells—the worst I had done in years. The following day I got four with ten shells in the morning, seven with fourteen shells right after lunch, when I had a big covey scattered in open ground. I did everything I could think of—aimed carefully, carried the gun through after the shot, watched my footing, led the bird, and worked

FURS WORTH ABOUT TWO THOUSAND DOLLARS.

Photograph by J. C. Tolman.

gained from using a somewhat heavy gun for a week or more made me handle this gun with greater facility. I then put "Sweet Love" away in her case for good, and have never shot a 12-gauge since, except at ducks.

My experience the past three years has been greatly varied—each season I have a rotten spell—this year the worst of all. The past two years I have had a guest each year, different men, both cracks, and both using a 20-gauge for the first time last year. My guest used the gun three days, then gave it up in disgust and went back to his 12 that he fortunately had with him. This year my friend began fairly well, but got worse, and his last few days were worm-eaten and bitter; he only had one gun and I two 20s. He tried his gun and mine, and then his own again, but all with the same results—

every device known to an experienced shooter who gets to missing unaccountably. I was not discouraged for I had passed through just such things before with the 20 and "came back," though without being able to account for my trouble. All at once the truth came over me. I saw the whole trouble, and said to my guide, "Sam, now look out, there will be some business doing from this minute on." Sam doubtfully nodded, "Well, Mr. W., sompin' ought to happen, I never see you shoot so bad." Well, I got the next ten straight—second barrel on two—and am out of that slough for life.

The fact is we all were in the same difficulty. As long as we shot freely and confidently, taking the natural advantage of our light-weight gun, we killed our birds—smothered them, in fact; but when we began to be care-

ful, as happened after we had made an unfortunate miss or two, or had a bad night's sleep, or drank too much of the strong niggerhead coffee we always made for lunch, we got slow, and this is a fatal defect with a 20—with a small-bore gun. If you can shoot quickly, and do shoot quickly, you will kill your birds clean and beautifully. Therefore, I recommend a 20-gauge to a quick shot, and if he has trouble, let him snap his birds for a few times; but a slow shot, however good, has no use for a 20. The average number of pellets is only 2/3 those in a 12, while the pattern is just as wide, therefore it is cruelty to shoot a 20 cylinder when a bird is more than thirty-five or forty yards, and it should not be necessary with a gun weighing 5½ to 5¾ pounds.

I shot for a week longer, and while I had an occasional bad spell, it only lasted three or four shots, when I would become aware that I was slowing up and would begin to pick them off the tops of the grass.

An interesting incident happened on my last day but one. The dog pointed a covey in open oak scrub "cut down land." About thirty feet in front of the dog stood a pine sapling; a small covey of eight or ten birds got up. I picked out a bird, as usual, the leader, and fired as it passed round the sapling. To my surprise, I saw three birds fall together, and out of the corner of my eye got the impression of something like an oak leaf flutter off to my left almost at right angles to my line of shot, and about fifteen feet away. The guide also saw the three birds fall, and was equally astonished. We walked over to retrieve, but only found two birds, the third was evidently crippled. As it was getting dusk and we had several miles to drive, we gave up the search shortly, and started for our horses. I bethought myself of this leaf-like thing I saw as I fired, and casually went over to see what it was, and there found a bird literally shot to pieces. What had evidently happened was that I not only knocked three as the bunch tried to round the sapling and crowded together, but a bird had flown into the charge near enough to the muzzle of the gun to be blown to pieces. Twice before I have gotten three quail at a shot, but this was the first time that I ever seemed in imminent danger of getting four.

### Hunting in California.

BY GOLDEN GATE.

SPORTSMEN throughout the State, and all those interested in the conservation of wild life, are much interested in the many game bills that have been introduced in the State Legislature. The non-sale of game bill is one of the most important of these and the indications are that this will be passed, provided the Legislature can find time to give it attention. The Senate has just passed a meritorious measure which forbids the killing until April 1, 1918, of any dove, woodducks, ibis, wild pigeons or shore birds such as stilts, dunlins, willets, plovers, curlews, killdeers, rails or oyster-catchers. An attempt was made to amend the bill so that doves might be killed in the lower San Joaquin Valley, but this failed.

The prolonged storms in the mountains east of Chico have driven the deer down from the high levels into the foothills section, and farm-

ers are having trouble to protect their orchards and gardens. More deer have been seen in that section of late than for several years past. Quail are also very plentiful in Butte county for reasons not apparent.

### Another Game Warden Sacrifices his Life

BY GOLDEN GATE.

FOR the third time in less than three months a game warden in the employ of the Fish and Game Commission of California has been assaulted with murderous intent, the last attack resulting in the death of the public official and one of his assailants. This grim tragedy occurred off the Marin shore, when Ernest Raynaud and M. S. Clark overtook a boat containing Italian fishermen and placed the occupants under arrest for using nets of an illegal size. Other fishermen came to the rescue of their countrymen and began a sudden attack upon the deputies. Raynaud was knocked down and beaten to death with a heavy club and Clerk was knocked into the bay, but not before he had shot two of the Italians, killing one of them. Repeated attempts were made by the fishermen to run down the deputy struggling in the water, but he managed to keep his head and dived under the power boat each time. Assistance soon came, and he was rescued. It is feared that the fishermen who killed Raynaud have escaped. The killing of Bert Blanchard in the Berkeley hills on Feb. 8, and the shooting of John W. Gallaway on March 10 by desperate Marin county law-breakers, followed by the killing of Raynaud, has aroused a tense feeling and deputies making arrests are being cautioned to take absolutely no chances.

### Buffalo.

LAS ANIMAS, Colo., April 25.—*Editor Forest and Stream:* Your correspondent, D. M. Edgerton, in speaking of the buffalo in your issue of April 19, has his data somewhat mixed. The fort he refers to in Western Kentucky was Wallace instead of Russell. Fort Russell is at Cheyenne, Wyo. The old K. P. is a part of the U. P. system. The big killing was made in 1873. During that year tens of thousands of hides were stacked along the railroad tracks at Wallace awaiting shipment.

I rode with old Pete Martin on his engine when he was compelled to stop his train to allow the buffalo to cross the track. The buffalo could be seen at the way stations along the line during a blizzard seeking shelter on the lee side of box cars on the sidings. Many of them were unable to see by reason of the snow and sleet that had been driven into their woolly pates.

Buffalo traveled or fed against the wind. This was the rule except in the most severe storms, as their head and shoulders were protected by long hair and fine wool which was not the case with their hind quarters.

Mr. Edgerton speaks of the buffalo wallows, but says nothing of the more interesting rings. The wallows were made by the animals rolling in a small pool of rain water. The mud adhering to their wool was carried away, and thus a depression was made which was increased by the wind scooping out the soil after it had dried and pulverized, and by successive rollings. The ring was much larger than the wallow, being

sometimes several hundred feet in diameter, and was made by a herd rounded up by wolves. The outside was guarded by the bulls and old cows who broke the sod by pawing, and thus allowed the seed of the long blue stem to take root where had been the short buffalo grass. Many years after the disappearance of the buffalo these well defined rings, like an old circus ring, could be seen on the Kansas prairies. F. T. WEBBER.

### Iowa Fish and Game Laws.

FORT DODGE, Iowa, April 26.—*Editor Forest and Stream:* I am sorry to report that our Legislature adjourned without doing much in the way of legislation to improve the conditions for the protection of game and fish. True, the Legislature raised the State game warden's salary and passed an act prohibiting the spearing of carp, buffalo and suckers, except during the months of April and May, and forbidding the use of trot lines within 300 feet of dams. Ducks can be shot in Iowa from Sept. 1 to April 15. Thousands were shot here in the past five or six weeks.

The open season on the fast vanishing remnant of the pinnated grouse, or prairie chicken, in this State is still Sept. 1 to Dec. 1. We need a closed season for at least five years on these birds if we are to have any left. I forgot one act, the Legislature passed. It placed the quail in the song bird class, thus giving protection to these birds the year round.

Our State game warden was credited by the press with saying he could not protect quail if placed in the class with song birds. I can scarcely believe the warden would make such an assertion. However, the Legislature passed an act requiring the warden to protect song birds.

The statute now gives the warden the right to kill or confine wild deer "when found necessary." This measure is evidently aimed at the destruction of a few deer near Wabausee in the southwestern part of the State, which broke out from some private herd and have multiplied to some extent in the timber along the Missouri River. These deer are credited with all sorts of depredations, from murder to missing mass, by the local press, including total destruction of all crops in their range. Hence, the bill for their extermination. Wouldn't it be a pity if these harmless animals were permitted to increase? C. A. BRYANT.

### Three Alaska Trappers.

SEWARD, Alaska, March 31.—*Editor Forest and Stream:* I inclose herewith a print which I took on one of my recent trips to Lower Kenai Lake region, checking up the trappers and their catches. These three men had headquarters at what is known as "Kings Co. Cabin" on Lower Kenai Lake, and trapped from there to Kelly River. From left to right is "Windy" Wagner holding red fox and wolverine; Frank Stanifer, silver gray, black and two cross foxes; R. N. McFadden, fifteen mink and twelve ermine. They have been trapping there since November. Their catch should bring them about \$2,000. They shipped them by the last steamer from here. Stanifer and Wagner caught one black fox and quite a lot of lesser valued fur at the same place last winter a year.

J. C. TOLMAN, Sr. Game Warden.

[See illustration on page 591.]

# SEA AND RIVER FISHING

## Conditions in the Trout Country.

SULLIVAN COUNTY, N. Y., April 26.—*Editor Forest and Stream:* After three days of bitterly cold north winds, we are having June temperatures at the end of April. A warm haze hangs over the hills, and even the nights are not cold. Vegetation is being forced as in a green house or conservatory. The streams are in beautiful order—clear and at a good height for fishing. Insects are hatching in small numbers, but will soon be plentiful.

The outlook for sport is remarkably good at the moment, yet it is quite possible that after this period of calm warm weather we may experience great changes. However, it is surely an early spring, and thousands of anglers are eagerly anticipating the opening of the trout season on May 1. We wish them all good weather and tight lines. Usually the dark flies in duns, browns, etc., kill well early in the season, but conditions are rather unusual this year.

The larva of insects may have suffered again from floods and changes in the stream beds. It is good to be out in such weather, even if one is not very successful in taking trout. One must be prepared for sudden changes in temperature and take a few warm duds with him from the city. I have seen the trout rising.

THEODORE GORDON.

## Fishing in California.

BY GOLDEN GATE.

THE sixth annual picnic, field day and barbecue of the California Anglers' Association was held at Point Reyes, on Paper Mill Creek, a few miles from San Francisco, on April 20, under most favorable circumstances. The weather was perfect for an outing of this kind and fully six hundred enthusiastic anglers were on hand to enjoy the fishing and the program of sports. The day was too bright for successful fly-fishing and most of those who tried their fortune along the crowded stream used bait. A large list of prizes was offered and contestants were allowed to fish on Paper Mill Creek and its tributaries, including tide water. The catches were not as heavy as usual, due largely to weather conditions and the size of the crowd. The morning was given over to fishing and shortly after noon the baskets were examined by the judges, Frank Gorman, F. X. De Witt, Henry Abrahms and Floyd Spence. Prizes were awarded as follows: Best general catch—Charles Urfer; second, J. A. Edmond; third, S. Hermann. Best catch with fly only—L. Lamb; second, C. Stevenson. Largest trout taken—Chas. Arp; second, E. T. Preuse. Women's prizes: Best catch—Miss Sarah Andrews; second, Mrs. V. C. Howe; third, Miss Thelma Berberi, and fourth, Miss Lydia Andrews. Following the distribution of prizes a great barbecue was enjoyed and field sports then occupied the attention of the anglers until time to return home.

Fishing in coast streams generally has been quite satisfactory this season, but the sport promises to be of short duration, as streams are falling rapidly and some will probably be almost dry by mid-summer. While fish seem to be quite plentiful, it is the general report that they are small in size, with but few large ones being landed. Marin county streams seem to be yielding the most satisfactory results at the present time, due to the fact that these are still carrying a fair volume of water. Some of the streams down the coast are also still in good shape, especially the San Lorenzo River. This stream has been yielding limit baskets of steelhead trout ever since the opening of the season, and big catches are still being made there. Coyote Creek is also in good shape and the same large trout are being taken from this stream. Recently E. H. Humphreys landed two beautiful specimens of steelhead trout there, these weighing six and fifteen pounds respectively.

On the Klamath River some large steelhead trout are being taken, but the cool weather and high water is serving to keep all but the most enthusiastic of anglers away. Al M. Cummings has been there for some time and has sent word that the streams are high, but that good baskets of fish are being taken. Cottonwood and Shovel creeks are declared to be alive with fish. After the first of May, when trout will be general throughout the State, a great exodus is expected to Sierra streams, especially those in the Feather River country recently opened to the traveling public by rail. The late snows in the mountains have been quite heavy and the indications are that streams will be in at least as good shape as they were last year.

## New Trout Fishing Laws Proposed for California.

BY GOLDEN GATE.

A BILL has been introduced into the State Legislature designed to make a number of changes of importance in the laws regulating trout fishing, including a re-districting of the State. This bill has been reported favorably out of committee and it is believed that it will be passed. The new districts, with the principal features of the proposed law are as follows:

District No. 1.—Modoc, Lassen, Shasta, Siskiyou, Trinity and Tehama counties. Season commences May 1, and ends Nov. 30. Limit fifty trout or ten pounds in one day.

District No. 2.—Mendocino, Del Norte, Humboldt, Lake, Sonoma, Glenn, Colusa, Solano, Yolo and Marin countries. Season from April 16 to Oct. 31. Limit, fifty fish or ten pounds, steelhead trout excepted.

District No. 3.—Plumas, Sierra, Butte, Placer, Sutter, Yuba, Amador, San Joaquin, Sacramento, Calaveras, Mariposa and Tuolumne. Season from May 1 to Oct. 31. This district

includes Lake Tahoe within its boundaries and special provisions are made for angling in that body of water. The sale of Tahoe trout, cut-throat or black-spotted trout is to be permitted only when these exceed twelve inches in length and twenty will be a day's limit. Dates are named between which it will be unlawful to take trout in any of the streams flowing into the lake for a certain distance from their mouth.

District No. 4.—Tulare, Stanislaus, parts of Kern, Fresno and Kings counties. Season from May 1 to Nov. 30, with a limit of fifty fish, or ten pounds in one day, except steelheads.

District No. 5.—This district comprises the rest of the counties in the State, extending from San Francisco south along the coast to the Mexican line. The open season is from April 1 to Oct. 1, with a limit of fifty trout, or ten pounds in one day.

Steelhead trout are protected above tide water by a close season extending from Nov. 1 to April 1.

## Ice on Lake George.

ALBANY, N. Y., April 25.—*Editor Forest and Stream:* Information as to when inland waters freeze over, and when the ice on them breaks up, often is of value to the out-of-door man. Following is the record of recent years for Lake George in this State, furnished me from actual records, by Arthur S. Knight, editor of the Lake George Mirror:

Froze over, Jan. 5, 1908; cleared, April 11, 1908.

Froze over, Dec. 27, 1909; cleared, March 26, 1910.

Froze over, Dec. 30, 1910; cleared, April 26, 1911.

Froze over, Dec. 15, 1911; cleared, April 24, 1912.

Froze over, Feb. 10, 1913; cleared, March 27, 1913.

The year 1913, as the record shows, was a remarkably open winter, and the ice was unusually late in forming, and was far from the usual thickness.

The natives consider the average date for ice to close the lake as Dec. 30, and the average date of clearing as April 10.

The lake is practically a great spring of unusually clear and cold water, having in some places a depth of 180 feet. J. D. WHISH.

## New York Anglers' Club.

THE tournament committee is arranging for the annual spring tournament to be held on the club platform in Central Park on the afternoons of May 15 and 16, and all day on Saturday the 17th. Mark these dates off and be on hand.

An interesting list of events is being arranged, giving the novice as well as the expert a chance for the prizes. A full program of the events will be mailed later.

J. G. FULTON, Chairman.

# The Irish Terrier

By WALTER H. DEARING

*Illustrated by most perfect types in America to-day.*

**T**O say something new, or to advance an original theory, regarding the origin, breeding or general characteristics of the Irish terrier, would be almost as difficult as to present a theory concerning the blending of colors or the relative values of accuracy of detail as opposed to strength of impression in the art of painting that has not already been advanced by the impressionists, post impressionists, futurists and what-nots in their particular fields of endeavor.

I shall not consequently claim originality, unless, indeed, there be originality in the initiative of paying one more tribute to the intelligent, courageous and warm-hearted little fellow, who, like his compatriot the policeman, has helped to make Ireland famous the world over. For the rest I have gathered most of my infor-

Red Sea, he became engulfed when the waters rolled back, and (you couldn't drown him) swam safely to the other side. From thence he may have joined the Israelites and traveled to the Holy Land, and having been taken to by the Romans, eventually found his way to Ireland, where his known history first begins. He may have done all this, because records have been found of a red dog with a green head, represented in an Egyptian cortege, which many lovers of the breed insist can be no other than their little red-coated favorite. Perhaps they are right; they surely have more grounds for claiming him as their own than have the lovers of any other breed.

But, much as it pleases our fancy to roam back in our imagination to the early days in Ireland, and to live for a moment with the

easy to see why the best judges are generally of the opinion that the terrier is descended from this breed of dogs. The Irish terrier of the earlier periods ran strongly to red and fawn although to quote the words of Dr. Carey, secretary of the Irish Terrier Club of that time, the terriers competing in the shows were "of all sorts, sizes and colors."

The type of the Irish terrier of to-day is vastly different from that of the recognized type of the breed when it was being standardized in 1879 and 1880. I have before me the photograph of Ch. Erin, considered the best dog of his time, and said to be one of the best Irish terriers that has ever been bred. Comparing it with the models of to-day, the contrast becomes quite laughable. Erin appears to have been a much stockier dog than the present day type of Irish terrier. He has less of the racy line about the waist, and his head lacks that polar bear-like appearance that characterizes the modern terrier. The length of head has been aimed at in producing the present standard.

As one looks at the old and the new types of Irish terrier, he cannot but be amused at the striking resemblance to two separate types of

mation of a statistical nature, from personal interviews with Singleton Van Schaick, secretary of the Irish Terrier Club of America.

There seems to be no authentic record as to when, or how, the Irish terrier as a breed first sprang into existence, but from all the information that can be gathered from those who have made a close study of the breed, he appears to be a direct descendant of the Irish wolfhound, and may for all that we can conjecture have been roving the high hills and green valleys of Ireland during the time of the old Druids, or sitting by the side of his Celtic master, listening to Saint Patrick's famous exposition on the Trinity during the latter's debates with the learned teachers of the Emerald Isle.

He may have done all this, yes, and more. He may even have strolled by the side of the dusky desert sheiks, or followed at the heels of Egyptian kings, or been a witness to the slavery of the Israelites during the reign of the early Pharaohs, and camped with the army of the pursuing hosts that followed Moses and his colleagues to destruction.

We might follow this hypothesis to a logical conclusion if we so fancied; why not? Having accompanied the hosts of Pharaoh to the

ancient characters of Biblical and early Egyptian times, there to find one of our old friends and playmates basking in the sunlight of the land of Shamrock and shillaly, or walking with his customary air of assurance about the sacred temples of Isis and Osiris, we are forced to abandon this day-dreamy state of mind and awaken to the fact that the object of our reveries is barking right outside our door. At least, he is barking at my door. I hope, for your sake, he also barks at yours. Now, how did he get there?

We have said that he is probably descended from the Irish wolfhound, a dog which inhabited the North of Ireland, and which resembled in appearance a rough, coarse-coated greyhound more nearly than any other breed of dog to which it could be likened. It is rather difficult at first thought to imagine that the alert, audacious little animal that we know as the Irish terrier is descended from an ancestor that bore any resemblance to a rough-coated greyhound. But even the most casual observer of dogs cannot fail to notice, if he looks closely, the hound-like appearance of his head and hind quarters. And when the fact that the wolfhound was red or fawn in color is taken into consideration, it is

the Irishman which we often come in contact with. It was customary to crop the ears of the early Irish terriers, and this appears to have lent a sharpness to their features that makes the contrast between them more marked. I don't know as I can convey the impression that I get by looking at the two photographs, but I almost feel that Erin would say, if he could talk, "G'wan now, get off the grass wid ye, or I'll take ye to the station house," and I feel equally sure the modern dog would reply, "Well, neow, shure ye may be roight, and thin ye may be wrong in ordhering me off the premises, but whither right or wrong, ye'd have to prove yer authority before I'd go." The result of such a conversation between two Irishmen would be too obvious to call for any further comment.

There appears to be some difference of opinion as to who brought the first Irish terrier to America. James Watson claims this honor, as he states that his bitch Kathleen was the first to be brought to this country. Kathleen was shown in America in the year 1880, but prior to that time Singleton Van Schaick had shown a couple of Irish terriers, they being the only ones entered in their class at the time exhibited. The remarkable growth and popularity of the

breed since its advent in America is in itself the highest tribute that could possibly be paid to it.

As a companion the Irish terrier has no superiors and few equals. Since the breed has become standardized, the "Irishman" has found his way into the homes of thousands of people of all classes and stations of life, and no matter what his environments, he fills his place with equal credit to himself and to his master.

He is a "one man dog," and always looks upon his owner as the only person on earth worth bothering about, and his owner will invariably tell you that he "has the greatest dog on earth," and doesn't care who knows it.

Singleton Van Schaick tells of a very amusing incident that happened to a friend of his, just arrived from England, on his first visit to America, and who, despite his English birth, had never had much to do with the Irish terrier, consequently did not understand his ways.

Van Schaick and his friend, following a hearty supper, had decided upon a friendly set-to with the gloves as an excellent aid to digestion, and had gone to the barn where they proceeded to lead and counter. There still remains a difference of opinion as to how the bout might have ended, as just when things were becoming interesting, there was a series of shrill yelps, and ten or more of Van Schaick's Irish terriers came galloping around the corner. Van Schaick saw the danger and warned his friend to cease sparring, but the latter did not take the warning seriously, and started to press what looked to him like a good chance to score some points. The points were all scored by the terriers, however, and Van Schaick was hard put to it to rescue his friend from the irate dogs, who were evidently bent on impressing upon their English guest the fact that home rule had been established in America, if not in Ireland.

As a retriever, the Irish terrier has been trained to give the utmost satisfaction. Indeed, there are many who hold him to be the equal

of any breed on this line of work. His unusual intelligence aids him in learning very rapidly, while his thick coat acts as a great protection in doing any form of water work, as he can swim for long stretches without becoming chilled.

He has also been trained to course rabbits, and while he does not of course possess anything approaching the tremendous speed of the greyhound, a coursing match between a couple of Irish terriers is a most interesting spectacle. He does not toss the rabbit like the greyhound, but catches him as he would any other prey. As a ratter the terrier is on a par with any dog, and will rid a barn of the rat pest almost as effectually as a cat. He makes an excellent coach dog.

Taken all together, he is one of the most useful and companionable members of the canine family, and when I see him, as I often have, stretched out on the door mat of some poor man's home, guarding it as faithfully as he would a palatial dwelling, he always recalls to my mind that famous speech of Senator Vest's, which often has been recognized as one of the greatest eulogies on the dog: "A man's dog stands by him in prosperity and in poverty, in health and in sickness. He will sleep on the cold ground, where the wintry winds blow, and the snow drives fiercely, if only he may be near his master's side. He will kiss the hand that has no food to offer, he will lick the wound and sores that come in encounter with the roughness of the world. He guards the sleep of his pauper master as if he were a prince. When all other friends desert, he remains. When riches take wings and reputation falls to pieces, he is constant in his love as the sun in its journey to the heavens."

#### A New Bird Sanctuary in South Australia.

THE South Australian Ornithological Association has leased the Coorong Islands, South Australia, for a bird sanctuary and has placed them in care of a custodian.

## Let's Be Brothers.

BY A. G. GREEN.

BIRDS of a feather flock together, and in like manner different varieties of the human species tend to fraternize, according to their mutual tastes or interests. I belong, for instance, to a family of the hunter tribe, whose totem is the fish. I am a fisherman, and I love the society of other fishermen. Fishermen usually love one another. Selfishness reigns supreme in most phases of earthly existence, but there is less of selfishness, and less of the other base instincts, among fishermen than among most any other people. In all my life I have known but two fishermen who were asses and not gentlemen.

I am a rather lonesome member of another clan—that of the bowmen. Until recently I had thought this totem was about extinct. But I discovered these columns in *FOREST AND STREAM*, and my heart was glad. Now, I know that I am not the only bow bug left alive. But I also perceive dissension among the bowmen, which is not as it should be. Let us hasten to fan the sputtering flamelet of brotherhood into a warmer life. Let me read a heart to heart lecture to Robert Page Lincoln, whose article I read with pain, for his attitude toward Brother Rendtorff. Judge not, lest you be judged, Brother Lincoln. Remember the fishermen, and be kind. Do not take a brother to task for failing to give you practical information, and monopolize the time of others through four columns of type without yourself offering any meat. Here are a few items of information, suggested by reading your article, that should interest an amateur such as you claim to be.

There probably really have been such things in the world as fifty-five-pound (weight) bows, and even worse than that, Brother Lincoln, believe me. I can cite you to the report of a United States army officer of the early days descriptive of such a weapon. He found it in the possession of an Indian buffalo hunter—a Sioux, if I remember correctly. With this weapon this mighty hunter had shot an arrow completely through the body of a buffalo, which was some bow, you must admit. None but the Indian were able to draw this bow. The white men placed it upon the ground, with their feet upon it, and grasping the cord with both hands were unable to bend it by main strength to any appreciable distance. There were no notches at the end of this bow for the string to slip in, such as Mr. Lincoln speaks of. They would have caused it to split. Only toy bows are made that way by real bowmen, such as savage hunters are. Real Indian bows had the string fixed at either end, and it was looped across the ends to bend the bow. This is the correct way to make a bow, despite the white man's practice of employing a sliding loop and a notched horn cap at the weapon's end.

As to common woods for bow making by amateurs, listen. The best of woods is sassafras. The next best is the osage orange. These are not easy to get, however, and for amateur purposes the best American wood is the white ash, which is common most everywhere. Go to the nearest handle factory, where you will be able to pick out a rough, squared shaft of it of just the right size and length to begin on.

IN changing address, the old as well as the new should be given.

Published Weekly by the

FOREST AND STREAM PUBLISHING COMPANY,  
CHARLES OTIS, President.

W. G. BEECROFT, Secretary. W. J. GALLAGHER, Treasurer.  
127 Franklin Street, New York.

**CORRESPONDENCE**—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

**SUBSCRIPTIONS:** \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

**ADVERTISEMENTS:** Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

### THE OBJECT OF THIS JOURNAL

will be to studiously promote a healthful interest in outdoor recreation, and to cultivate a refined taste for natural objects.

—FOREST AND STREAM, Aug. 14, 1873.

### SOME GUIDES AND THEIR WAYS.

We have adverted before now to the way some Maine hotel keepers have of recommending as guides incompetent individuals who happen to be in their debt for board, and who work it out in this way. The whole subject of the relations existing between the visiting sportsmen, the hotel or camp keeper and the guide might profitably be discussed, for there is no question that some features of the prevailing system are essentially adverse to the interests of the visitor. It would manifestly be a gross error to make any sweeping assertion which should apply to all resorts and all guides. Human nature in Maine is just the plain every day human nature we find the world over. Some men are honest and some are dishonest. Men in the Maine woods have a living to make, and precisely as with other folks outside of the woods some make the living honestly and some dishonestly. Premising that nine out of ten are honest, the tenth is so ubiquitous as to warrant our giving him some attention.

Among the numerous camps for sportsmen in Maine may now and then be found one which is conducted in a way not very different from the manner in which it would be conducted if its chief purpose were to sell as much whiskey as possible in a season. And there are guides whose chief intent appears to be to keep their "sports" within the sound of the dinner horn of the camp to which they are attached. Ostensibly in the employ of the man from Boston or New York or Philadelphia or Chicago, they are actually in the service of the camp proprietor, and look to his interest first, last and all the time. Many an honest fellow, indeed, is in virtual bondage to the camp proprietor, and the slavery galls him. He is not playing fair with

the man he is guiding, and he knows it. When he tells his employer that old stock story that the fish are not biting to-day, but they did last week, he lies, and because he lies he despises himself for the lie and would get out of the necessity of lying if he could. He cannot emancipate himself, however, because of his real or fancied double obligation to his two employers with their diverse interests—the only interest of the camp keeper to keep the visitor at his own place, and the true interest of the visitor to go to some other place. As one guide has well put it, such a person has two fires to tend.

The evils here outlined are very real and very widespread. A correspondent says that his unfortunate experience has been always to employ guides with axes to grind. The remedy he had resort to was to study up his own fishing country, lay out his own routes and persists in pursuing them in the face of the protests of his guide. His experience appears to have made him impatient of all guides and distrustful of their capacity and honesty of intention, a conclusion, we need not say, unnecessary. There are many so-called guides who are lost the instant they stray from a familiar trail or get off from the buckboard road. But there are others who are competent and skilled masters of woodcraft, natural hunters, explorers and woodsmen, and who would be honest, too, with the man who employed them if they were accountable to him alone. They would be thus solely answerable to the sportsman if employed by him directly, without any intermediaries. The remedy of the whole trouble is to be found in direct employment of independent guides, instead of indirect employment through camp keepers. Then the guide will feel that he is answerable to the visitor alone; that he may serve the true interest of the sportsman, and not be in peril of the woods' boycott. For there is a woods' boycott. It works in this way: If the guide hired for the sportsman by the camp keeper does not exploit the sportsman for the camp keeper's benefit, he does not get employment next time.

A system of independent engagements between the guide and the guided would surely work to the benefit of the Maine visitor, and it would as certainly be welcomed by the guides and elevate the standard of the pursuit and the self-respect and responsibility of the men engaged in it.

### AN IDEALIZATION OF SPRING.

CLAD in soft green garments, spring comes tripping o'er the field. Her bright young smile and rippling laughter dispel the deep-set frown and melancholy sigh of winter and drive him back to his barren haunts. She glances upward and the dull gray sky is a transparent blue flecked here and there with a transient, billowy cloud. She beams on the wind-tossed trees with her cheery smile and sends them a kiss with her zephyr breath. The gentle rains come a-wooing and patter like fairy feet upon the timid buds.

Spring opens the gates of the ice-bound brook and frozen stream, and they gurgle and laugh at their glad release. She treads the meadows that were bare and brown and a verdant green bedecks the earth. At the touch of her petal pink fingers, the hard impenetrable earth turns to soft yielding moss. The fern unfurls her banner in the dell and hails the lark

to greet the dawn. The violet looks up and nods her head. The blue flag rises from the marsh to welcome the red-winged blackbird to her home.

Spring's persuading voice is heard from the distant wood and in echoing answer the stream and field and sky sing out, "Awake, arise, be glad, rejoice and live, for spring is here!"

Man is touched by the wondrous spirit and his heart is again made young. He dreams he is out on a long tramp through wood and dell. He reaches the crest of the highest hill just as the sun glances up and gilds the swaying trees with light. The path he traveled is half hidden by the verdant shrubs. He sees the winding mystic stream now blue, now green, running joyously on. He hears the faint but insistent call of the brook, and rod in hand he wades knee deep into the quiet pool just above the falls. He follows the uncertain margin of the brook until he reaches the turbulent river, where he plunges in for an invigorating dip. He goes paddling in a light canoe, down stream to the long chain of lakes and through the ever-varying waterways to the little camp in a hermit spot among the pungent pines. A chorus of well known voices greets him, and he joins his friends at their savory breakfast. Hard by the tent on a mossy bank, and in view of the lake and the hills, he lies down to rest, giving fretful cares to the wind and dreaming of balmy days, the glow of sunset, of grass-grown pools and sunny meads.

[These fluffy sentiments were indicted by Miss Elsie Schneider, of Cleveland, Ohio.—EDITOR.]

### NESSMUK.

IT is no little gratification to us to find how tremendously popular has been the new serial by Nessmuk, now appearing in FOREST AND STREAM. Not only has this story created a demand for the magazine, but it also has renewed the sale of "Woodcraft" and other of George W. Sears' works. The next issue will be the last instalment of "A Contraband Incident," and in all probability the last Nessmuk story ever to be published. If you haven't read it, get a copy of April 26, in which the first chapter was printed. After reading Chapter I, you won't need to be urged to get subsequent numbers. You will kick if you can't get them. Incidentally, we have in the hopper a lot of other great big features that will interest you.

### "THE LONGEST POLE KNOCKS THE PERSIMMON."

AS usual, last month, FOREST AND STREAM carried more advertising than any of the other outdoor publications. This was done under normal conditions without special effort of any kind. We append the customary table, compiled by Printers' Ink, showing the total number of agate lines of advertising carried by six of the sportsmen's magazines during April.

Publication.	April, 1913.
1. Forest and Stream.....	14,822
2. Outing Magazine .....	12,600
3. Field & Stream.....	12,271
4. Outers' Book .....	8,960
5. Outdoor Life .....	7,952
6. Outdoor World .....	6,445

# CANOEING

## International Canoe Race.

CANOEISTS, particularly members of the American Canoe Association, are leaning well to leeward with excitement over the coming race for the international challenge cup. To the tiny craft sailors this event is paramount to the challenge by Sir Thomas Lipton for America's cup with the big single stickers. Conditions in this event are identical to those in the big cup defender matter. The cup has been successfully defended since offered in 1886, and like the inertia among the big sisters, no race has been sailed for some years back, 1895 having been the last international canoe race.

The challenger this time is the Gananoque Canoe and Motor Boat Club of Canada, while the defender will represent the club whose entrant wins the majority of trial races in which any canoe club may start as many boats as it desires. In this respect, conditions are much fairer than those imposed by rules under which the America's cup races are sailed, wherein the defender must be owned by the member or members of the New York Y. C.

The following races for the international challenge cup have been sailed:

1886.

Challengers—W. Baden-Powell (Nautilus), Royal of London; Walter Stewart (Pearl), Royal of London.

Defenders—C. Bowyer Vaux (Lassie), New York; William Whitlock (Guenn), Brooklyn.  
Won by the New York C. C.

1888.

Challenger—Walter Stewart (Charm), Royal of London.

Defender—Reginald S. Blake (Eclipse), Brooklyn.

Won by the New York C. C.

1890.

Challenger—Ford Jones (Canuck), Brockville, Canada.

Defender—H. Lansing Quick (Uno), Yonkers.

Won by the New York C. C.

1891.

Challenger—Ford Jones (Canuck), Brockville, Canada.

Defender—T. E. H. Barrington (Toltec), New York.

Won by the New York C. C.

1892.

Challenger—Ford Jones (Canuck), Brockville, Canada.

Defender—T. S. Oxholm (Glenwood), Yonkers.

Won by the New York C. C.

1895.

Challenger—Charles E. Archbald (Mab), Royal, Montreal.

Defender—Paul Butler (Wasp), New York.  
Won by the New York C. C.

## A. C. A. Membership.

### NEW MEMBERS PROPOSED.

Atlantic Division.—W. Arthur Lyons, 14 West Forty-third street, Bayonne, N. J., by Edmond vom Steeg, Jr.

Central Division.—Fred C. Belmer, 111 West Brighton avenue, Syracuse, N. Y.; Mager V. Gilbert, 405 Cedar street, Syracuse, N. Y., and Curtiss C. Brown, 208 McAllister avenue, Syracuse, N. Y., all by A. Frederic Saunders.

### NEW MEMBERS ELECTED.

Atlantic Division.—6645, J. Durbin S. Wood, 47-49 Liberty street, New York city.

Eastern Division.—6644, Henry George Butler, 278 Cranston street, Providence, R. I.

## Canoeists, Please Write.

"THE Lord helpeth him who helpeth himself" never was said for canoeists. It is what we get from the other fellow that helps us.

With this idea in mind, we have laid out (or rather Mr. Ahrens of the A. C. A. laid out) a series of questions that we—and he—hope all those who have taken trips will fill in and return to our canoe editor. No matter where you have canoed, help the other fellow on his way.

Return the attached blank and accept the gratitude of all canoeists:

### TITLE OF TRIP.

Start .....	Days of paddling .....
Number of Miles .....	Best time of year .....
Guide necessary .....	Fishing License .....
Are maps necessary? .....	Sailing .....
Fishing (kind) .....	Permit to camp on private property .....
Insects .....	Customs Point .....
Drinking water .....	Is territory thickly populated? .....
What kind of country ....	Rapids .....
Hire canoe .....	Outfit necessary .....
Buy at .....	Can food be bought on way through? .....
Total cost .....	Side trips .....
Canoe .....	Transportation .....
Incidentals .....	Food .....
End .....	
Camp Sites .....	

### REMARKS:

NEW YORK C. C. INTERNATIONAL CHALLENGE CUP.

Forest and Stream is the official organ of the National Archery Association.

### Bows and their "Weights."

BATAVIA, Ill., April 20.—*Editor Forest and Stream:* The recent article by R. P. Lincoln gave me some amusement, but toward what end was it written, and what was his motive? It is not much less than an attack on all archers belonging to organizations for target practice. And he assumes to seek information for some particular or imaginary body of "downright crude beginners" who evidently judge archery to be a children's pastime. Archery is really not a sport particularly adapted to children. It looks as if his own ignorance was mostly assumed, as he makes a continuous parade of it and seems to take great pride in the exhibition.

If he really wishes to benefit the sport of archery, his remarks and comparisons of "tournament ginks" and "amateurs" are a long ways out of place. Let me here remark that we are all amateurs. The fact that some are good shots does not change their standing.

It would be quite as fair to start a war on the trapshooters on the same grounds as those on which the attack is made on the clubs of archers who practice target shooting, where they may have the good luck to get the ground for a range.

For one, I did not suppose there was any person of mature years with an actual interest in archery who did not know that the weight of a bow is the term commonly used to denote the strength of pull in number of pounds.

That writer is quite correct in one of his statements. It is not possible to pull and shoot a six-foot man's bow by grasping the string between the thumb and fore-finger, as children do their little toy weapons. Anyone familiar with history knows that the great war bows with which the old English archers pierced the armor of the French knights were a long ways from toys.

Mention was somewhere made of a five dollar fishing rod. Why should that be? The writer is not consistent. Why does he not fashion his fish pole from some old wood; even as he says a right true amateur archer should make his bow?

There is no hard wood grown in North America that will make a bow that will approach those made from the hard woods of tropical countries. That most commonly used is known under the name of lemonwood. It lasts very well and has a sharp, strong cast. It is the lemonwood bow that is in use by the majority of archers. If you want to know what a good bow is, just invest four dollars in a lemonwood that is suited to your strength. After you have given it a fair trial, you will just naturally forget about trying to make some old kind of a bow out of our native hard woods, most of which are unfit for bow timber.

My father is an old-time archer and the writer himself has been using a bow for several

years. We have made some fair bows from different kinds of hard woods native to this part of the country.

Hickory and black ash are tough, but are not snappy enough. They also are likely to break off short without warning after a short use. Blue beech, hard hack and rock elm are smarter, but they will not stand the strain much better. Red elm, commonly known as slippery elm, furnishes the best bow timber to be found in these parts. It is fairly smart and will stand the strain well. I shot one recently that was made in 1880, and it is in very good condition now.

Texas osage is a little snappier than red elm, but not in the class with the South American hard woods.

The yew of Oregon is probably the best bow timber that grows in the United States, and it makes a weapon superior to any hard wood.

Kiln dried lumber loses its life and is no good for bows.

It must be allowed to season thoroughly, which process depends on the size and condition of the timber. If it is obtained in the shape of a green plank, it should be sawed up into pieces near the size of the bows and hung from one end to season in a dry place away from sunlight and artificial heat. The seasoning will take at least six months, and double that time would probably be better.

When ready, the bow may be roughly shaped with a double handled draw knife, then finished with a plane and sandpaper. If the strength is found to be right on stringing and pulling it, a couple coats of shellac varnish should be applied to prevent warping.

For a man of ordinary strength a red elm bow ought to pull from forty to forty-five pounds. It should be six feet long, about one and a half inches wide by one and a quarter inches deep at the center, each limb tapering to about one-third that size at the ends.

When ready for use, leather or any other material to suit individual taste may be glued around the center to form a hand hold.

I would advise any beginner to invest a dime in an archery guide. He would find some information that might be of benefit; among other things that it is not necessary to use a moving van to carry a heavy bow.

To judge Mr. Lincoln's skill from the tone of his article, I should say that he might be able to hit the side of a barn if he were inside and the doors were closed, providing he had good luck.

However, I agree with him that a bow if fifty-five pounds pull is certainly "some bow." And my advice to any beginner on how to pull a bow of that strength is—just let it alone.

Unless a man is far above average strength he can do better shooting with a bow that pulls less than fifty pounds, than with one of greater weight. It is always best to use a weapon well within the archer's individual power—one that

can be pulled out the full arrow's length and held steadily while aiming and loosing, and from which you can shoot one hundred arrows in half a day and be physically able to shoot some more if you desired.

A person of average power can control a weapon of from thirty-eight to forty-five pounds. I am quite strong in hands and arms, but cannot hold and shoot a bow to make good scores that pulls more than forty-seven pounds, and can do even better with one of forty-three pounds, unless I am in particularly good condition. At the beginning of the season, when soft and out of practice, I use a "weak thirty-five-pound bow," and have made some large scores with it.

There are books on archery for the beginner as well as the more advanced followers of the sport. The manufacturing side of it has been left for the greater part in the hands of experts who make a business of producing archery tackle.

It is a far more difficult piece of work to make a good reliable arrow than to make a fair bow, and it is many times yet more difficult to make several arrows that will shoot alike.

It takes a good archer, who is sure of his skill, shooting under the best conditions at a target a known distance to test a set of arrows and throw out those that will not shoot like the rest of the set. The most skillful archer that ever lived cannot do good work with arrows that are not tried and known to be true. I test my arrows at fifty and sixty yards, as at a less distance defects are not so apparent, while at a greater range the possibility of personal error is too large.

However slow or weak a bow may be, it will suffice to cast an arrow, but making the arrow itself demands the utmost care and skill. It cannot be made too good.

In conclusion, I may remark that it would be a real pleasure to answer any questions relating to archery, put in good faith with a sincere desire for information from anyone who takes an interest in the sport. G. L. NICHOLS.

### A Single York Round.

SEATTLE, Wash., April 23.—*Editor Forest and Stream:* Stirred by the invitation issued by the archers of Newton Center, Mass., to shoot on Saturday, April 19, a "team round" and report the scores to FOREST AND STREAM, I complied in spirit, though not in detail, shooting a single York round instead of a team round, as I get great pleasure out of the one hundred yards and eighty ranges, and none whatever out of the sixty yards' range. The result indicates that I should have been very low in the lists had I completed a team round. The weather was ideal, and my scoring with a 40-pound bow was very good, indeed.

100yds.	80yds.	60yds.	Total.
50	224	22	113
		110	553

WILL H. THOMPSON.

**The Newton Archers.**

NEWTON CENTER, Mass., May 3.—*Editor Forest and Stream:* Saturday, May 3, was an ideal day for archery, and fourteen of The Newton Archers took advantage of the fine weather and appeared on the archery range with their tackle in the afternoon.

The men shot the American round first, and then started in to shoot the team round, but most of them found the two rounds rather too much for one afternoon at the beginning of the season, and so did not finish the team round. The ladies shot a Columbia and a national and the juniors shot the junior team round (ninety-six arrows at 30 yards). The following scores were turned in:

American round:					
	60yds.	50yds.	40yds.	Total.	
C. T. Switzler	29 147	30 158	30 202	89 567	
B. P. Grav	27 117	27 155	28 158	82 430	
S. W. Wilder	25 113	28 144	30 154	83 411	
C. E. Dallin	21 97	26 115	29 153	76 365	
L. C. Smith	20 90	23 111	29 157	72 358	
E. L. Ovington	17 78	22 102	28 148	67 328	
Team round:					
C. T. Switzler	22 102	20 96	22 134	22 114	86 446
S. W. Wilder	19 83	21 99	20 88	21 101	81 369
L. C. Smith	17 63	20 92	18 76	19 59	79 290
Columbia round:					
	50yds.	40yds.	30yds.	Total.	
Mrs. L. C. Smith	16 78	23 119	24 152	63 349	
Mrs. B. P. Gray	17 85	21 91	24 131	62 310	
Miss R. Brewer	5 23	6 32	10 46	21 101	
National round:					
	60yds.	50yds.	Total.		
Mrs. L. C. Smith	33 125	18 88	51 213		
Mrs. B. P. Gray	32 150	13 51	45 201		
Juvenile team round:					
N Cabot	53 186	P. Wilder	39 145		

Ellis Spear Joseph Bishop and Charles W. Bond shot, but did not turn in any scores.

There are two of the above American round scores that are worthy of note.

E. L. Ovington (who by the way is the noted aviator) secured his tackle late last fall and used it only once before the winter set in. His first shooting this spring was on April 19, so that he has really had only about three weeks' practice with the long bow, and yet he made a score Saturday in the American round of 67 hits 328 score, with only two misses and a total of 148 at the 40-yard range. The writer ventures the opinion that very few novices have done better than this after only three weeks' practice.

C. T. Switzler took up archery in the latter part of last summer and is, therefore, a novice of less than six months' experience. He has already shot several American rounds over 550, and on Saturday he lost only one arrow, making a total of 89 hits out of a possible 90.

LOUIS C. SMITH,  
Secretary The Newton Archers.

**Archery Meetings Abroad.**

CHICAGO, Ill., April 30.—*Editor Forest and Stream:* The following information is taken from the Archer's Register for 1912-1913:

Dates of the prominent archery meetings to be held in Great Britain and France, in 1913.

The Sixtieth Leamington and Midland Counties Grand Archery Meeting will take place June 11 and 12, at Jephson Gardens, Leamington Spa.

The Fifth Le Touquet (France) Archery Meeting will be held June 18, 19 and 20.

The Fifty-first Grand Western Archery Society Meeting will be held July 16, 17 and 18 at Salisbury.

The Grand National Archery Society will hold its seventieth annual meeting July 30 and 31 and Aug. 1, at Edgbaston.

The Northern Counties Archery Society will

hold its thirty-fourth meeting at Derby on Aug. 27, 28 and 29.

The eleventh annual meeting of the Southern Counties will be held at Weybridge, on Sept. 16, 17 and 18.

The Scorton Arrow Meeting, established 239 years ago, will be held at Clitheroe, Sept. 9.

The Nineteenth Annual Hereford Round Meeting will be held at Herefordshire County Cricket Ground, Oct. 1, 2 and 3.

The Hereford Round is not shot in the United States. It is a woman's round, made up of 72 arrows at 80 yards, 48 arrows at 60 yards and 24 arrows at 50 yards.

In the interesting preface to the Archer's Register, the double York round score of 223 hits, 1067 score, made by H. P. Nesham at the Southern meeting, is given as the highest made in forty-five years.

The scores made at our last national meeting, which are reported in full in the Register, show that George Philips Bryant made 230 hits, 1094 score; the highest score save one, made at a national meeting in this country or in England since Ford made his record score in 1857. In 1910, Henry B. Richardson, of Boston, made 231 hits, 1111 score.

EDWARD B. WESTON.

**Effect of Varying Light.**

BY G. L. NICHOLS.

AS I usually use a light bow and a high draw, my point of aim is on or quite near the target at all distances in the American round. I find I can judge distances better and consequently do my best shooting when the day is cloudy. In bright days the reflection from the gold center of the target was a great annoyance and a strain on the eyes. The Chicago archers have removed this source of trouble by using a dull yellow for the center instead of gold. There is also likely to be a confusing reflection from the polished steel pile when the sun is at certain angles. I have tried blackening the piles and find it a very distinct help. So far I have not been able to hit on a method to blacken the pile that would leave it smooth, and yet not be worn off in a short time by the friction when shot through the target (or into the green).

One of our writers has noted the fact that greater elevation is required later in the day than was necessary at an earlier hour in the afternoon. He ascribes this to the poorer quality of light. I think that if he started at 9 A. M. and shot 200 arrows, he would notice that more elevation would be necessary at noon than when he started. Of course, in that case the failing light could not be the cause. And again, if he unstrung his bow and gave it and himself two or three hours' rest, on returning to the range he would find his point of aim right back where it was in the early part of the day.

I know that difference in light does not affect the elevation of my point of sight, though it does affect the general accuracy of my shooting.

All the bows I have ever used will get tired after two or three hours' shooting and lose some of the sharpness of cast. In addition, there is a probability of the bow string stretching a little.

The archer is also likely to have become somewhat weary and not pull his shaft quite so far out. The difference may be only a small

fraction of an inch, but all things work toward the same result. And yet again, tired fingers will not give the sharp, smooth loose that was easy at the beginning of the shooting.

Consequently, it is my opinion that with the strength of light constant, or even increasing, more elevation would be necessary at the end of a couple of rounds than at the start.

**Cattle Ranges in the East.**

"AT one time the New England States furnished nearly all the meat and most of the wool used in the United States, but New England now gets five-sixths of its meat from other States and its wool manufacturers have to depend on other States and foreign countries to provide their raw material," said E. L. Pearson in the Washington Post.

"I have been over the ranges of Wyoming and Montana and I say they cannot compare with the unused ranges of Vermont and New Hampshire. It is rather amusing to hear it said that range cattle or sheep cannot be sustained on the grass that is grown there, and that the snow is too deep.

"For over a hundred years sheep and cattle survived and that country would to-day be producing great quantities of wool and an immense amount of beef if it were in the hands of Western men, who would see that the right kind of grass was grown. In five years the great ranges of those States could with proper attention greatly reduce the price of meat and wool. Some day—and it will not be far distant—Virginia and other Eastern States will tear down fences of abandoned farms and convert them into cattle ranges."

**Revival of Archery**

Archery outfits are now in demand—lovers of the sport and "Country Clubs" are taking it up. Outfits supplied from \$5.00 upwards.

 Oct. 14.—Rising Sun (Md.) G. C. H. L. Worthington, Vice-Pres.

Oklahoma State Sportsmen's Association.

POND CREEK, Okla., May 1.—Thirty-five thousand targets scaled into space here yesterday and to-day before the guns of some of the most expert disc exterminators in amateur and pro. scatter-gun army. Seventy-one lined up en squad during the two-day tournament of Oklahoma State Sportsmen's Association. One-quarter of the dried mud distributors were from the "for-wads-and-honor-only" division. Bart Lewis took away the royal sum for high average, with 282 out of 300. Second high went to Joe Appleman, with 276. High pro. getter was R. W. Clancy, who, from a classy field of Gilbert, Marshall, Crosby, Henderson, Spencer, Clark, Heer, and the like, won with 284, while the bases were filled by Spencer, Crosby and Heer with a batting average of 283. The winner of State championship was so carefully concealed that we are unable to pick him from the bunch.

DRIVERS AND TWISTERS.

Boston A. A. will end its season on May 30, winding up with the club championship. The much-talked-up match with New York A. C. will be shot May 10. The usual 200 rocks to the man will be pulled.

If the weather withholds a damp hand and cloudy head, those who shoot at Greenwich Gun Club Decoration Day tournament should make rattling scores. The new traps are so arranged as to give an absolutely sky background, sans trees, buildings and other attention attractors.

The Northern Kentucky Gun Club, of Dayton, Ky., has changed its dates for holding the registered tournament arranged for May 8 and 9 to August 7 and 8. The club grounds were greatly damaged by the flood and it will be impossible to restore trap houses and put the grounds in shape for use in May.

W. G. BEECROFT.

Ossining G. C.

OSSINING, N. Y., April 28.—On May 14, the Ossining Gun Club will hold their annual spring tournament. Program to consist of a 100-target event (added bird handicap). An exceptionally fine assortment of merchandise will be in evidence. The Westchester county championship is the feature of the program, for which high scratch score will be awarded a handsome loving cup, emblematic of the championship. Trade representatives invited to attend (and shoot for targets only). Shooting starts promptly at 1 P. M.  
 R. P. H. Wood, Capt.

Hudson Gun Club.

JERSEY CITY, N. J., May 4.—Appended find scores of the regular bi-monthly shoot of the Hudson Gun Club, held this morning at Jersey City.

to be held at Red Bank, in June, come out and show us what you can do.

Table with columns for Events, Targets, and names of participants with their scores for the Jersey City Gun Club event.

Jersey City Gun Club.

JERSEY CITY, N. J., May 3.—This was the warmest day of the season to date, and a good crowd took advantage of the fine weather to get in a good day's sport.

Table with columns for Events, Targets, and names of participants with their scores for the Jersey City Gun Club event.

These are great days for shooting now, and as we keep open until the last of June, we hope to entertain good crowds each Saturday and extend an invitation to all who care to try their hand at the game to pay us a visit—either see or show us how it is done.

Detroit Pastime G. C.

DETROIT, Mich.—About fifty shooters gathered at the slaughter at the last club meeting. The day was very fair, but no very great shooting was done, except probably Kirkwood, a Chicago member, who dropped only 6 targets during the entire program.

Table with columns for Shot at, Broke, and names of participants with their scores for the Detroit Pastime G. C. event.

Newburgh Gun and Rifle Association.

THE Newburgh Gun and Rifle Association will hold its first annual two-day shoot on May 20-21. Ten events daily and extra events optional with the shooters.

Platteville G. C.

PLATTEVILLE, Wis., April 27.—Scores of March trophy follow, 50 targets per man:

Table with columns for names of participants and their scores for the Platteville G. C. event.

INDEPENDENCE GUN CLUB.

**Northern Kentucky Gun Club.**

The first shoot held on the grounds since the flood was pulled off on May 3, over thirty shooters taking part. The club entertained two squads of the army officers, stationed at Fort Thomas, at a dinner served in the club house, and in the afternoon the guests gave a good account of themselves at the traps, Capt. Rethers and Lieut. Harmon making high scores of 83 and 81 respectively. Capt. P. L. Smith was not far behind his brother officers, getting the best of both in the last two events, breaking 88 per cent.

A squad of the Westwood Gun Club was also present, J. Schneider setting the pace with a 92 per cent. clip in the last two events. High amateur honors for the day were captured by Fort Thomas, Harry R. Irwin putting up a score of 95, missing only two targets in the last 50. Ralph Trimble, the well-known local professional, was high gun for the day with 96, going straight in his first and last events. L. J. Squier, of Pittsburgh, Pa., was tied with Irwin on 95. Emil Hammerschmidt, the crack of the Cincinnati Club, got in second high amateur place with 93, dropping but one target in the last 50. It was a close race for place between him and Capt. Dameron, the latter losing out by one target in the last 50. "Medico" shot a fine race all the way through, going out with 91.

The conditions early in the afternoon were rather hard, as the wind affected the flight of the targets to some extent, and caused some of the misses. Later the wind died out and scores improved. The Fort Thomas contingent was highly elated over the fact that the list of amateurs was headed by a fellow townsman, and a team from that place is one of the possibilities in the near future. When this materializes the local gun clubs will have their work cut out for them. The grounds were left in very bad shape by the flood, but are now in fairly good condition, although the beautiful lawn is ruined, and it will take more than one season to replace it. The grass was completely buried under a coating of mud and clay, several inches deep, and this has dried into a hard crust through which it is impossible for the grass blades to penetrate. The old stone club house was washed away. The roof now reposes in an adjoining field, and only a small portion of the walls left standing. Managers H. R. Irwin and Capt. George Dameron are sticklers, however, and propose to pull off the series of popular one-day tournaments this season just the same, although they will have to cut the number short.

The scores:

Events:	1	2	3	4	Events:	1	2	3	4

**Analostan Gun Club.**

WASHINGTON, D. C., May 3.—Following are the scores of the Analostan Gun Club shoot, held to-day:

E. W. Ford led the members to-day with 94 out of 100. Lieuts. Baum and Withers made goodly scores with 20-gauge guns. Lieut. Baum broke 63 saucers out of 115, while Lieut. Withers broke 55 out of 100. Dr. A. V. Parsons and W. D. Dulaney each broke 16 out of 24 in the doubles.

Shot at. Broke	Shot at. Broke
Peck .....	100 88
Culver .....	100 77
Itner .....	100 82
Green .....	80 38
J. R. Sharpe .....	50 18
*Withers .....	100 55
Bray .....	75 45
Duvall .....	50 31

Dulaney, Jr. ....	20 12
Parsons .....	100 82
D. S. Watson .....	50 31

In an event at 12 pairs of doubles, the following scores were made: Parsons 16, Dulaney 16, M. Taylor 15, Kirk 14, Graves 13, Davis 9.

**Princeton University Gun Club.**

PRINCETON, N. J., April 30.—At a little shoot we had here this afternoon, H. H. Stevens was our guest. He gave an exhibition at fast flying targets (60yds. flight) with a stiff wind blowing, breaking 71 out of 75. There was a competition among the members for two cups, one scratch and one handicap. N. R. White and E. R. Simpson tied for the former at 42 out of 50, White finally won in the shoot-off, breaking 24 to Simpson's 23. D. Nichols also broke 42, and with a handicap of one took the handicap trophy. Scores:

Shot at. Broke	Shot at. Broke

# WINCHESTER

"Trap" and "Pigeon" Grades

## 20 Gauge Model 1912 Shotguns

### "PIGEON" GRADE

SPECIFICATIONS:— "Pigeon" Grade, 20 gauge, 25-inch Nickel Steel full choked barrel, with handsome matted rib, chambered for 2½ inch shells. Selected fancy walnut, hand-made, oil-finished stock, with either straight or pistol grip, checked, and checked rubber butt plate. Action slide handle of fancy walnut, oil-finished and checked.

The standard style of stock has straight grip and the following dimensions: Length 13¾ inches, drop at comb 1½ inch, drop at heel 2⅛ inches. The comb is heavy and rounding. As the stock is hand-made, any length of drop desired will be furnished without extra charge; but in the absence of special specifications, standard stocks as above will be supplied. Weight of gun about 6¼ pounds.

The frame is elaborately engraved and considerable hand-work put upon the gun.

List Price, \$105.00

### "TRAP" GRADE

The specifications of the "Trap" grade, 20 gauge, are the same as the "Pigeon" grade. The only difference in the two guns is that the "Trap" grade is not engraved.

List Price, \$55.00

When specified, barrels with cylinder bore or modified choke will be furnished without extra charge.

**Wisconsin and Upper Peninsula of Michigan Trapshooters' Association.**

THE State tournament of the Wisconsin and Upper Peninsula of Michigan Trapshooters' Association will be held at Green Bay by the Green Bay Game and Gun Club, July 18, 19 and 20. This tournament we held in Green Bay in 1912, and the shooters all left the city with all praise for the management of the shoot, hotel service and incidentally the weather.

The club has three traps installed on an absolutely level field with clear background, and all the shooters were a unit in admitting the grounds to be the equal of any in the country.

Last year, with an entry of one hundred shooters, the program was finished by four o'clock. The local club will use every effort to make the coming shoot even more successful and will greatly appreciate any space you may give us in the sporting columns of your publication to announce this tournament.

SECRETARY.

**La Crosse Gun Club.**

LA CROSSE, Wis., April 27.—With a stiff wind blowing in the face of the shooter, which made the flight of the targets very erratic, the following scores were made:

At 50 targets: Mitchell 43, Smith 41, Bozard 40, Bartl 40, Schwalbe 40, Miller 40, Tausche 35, Starr 31, Licht 30.  
At 12 pairs: Mitchell 20, Smith 12, Bozard 11, Bartl 9, Schwalbe 11, Tausche 10, Starr 17, Licht 7.

"steel where steel belongs"

Peters Shells

WIN SOUTHWESTERN HANDICAP

The P brand was the "whole cheese" at the Inter-State Association's First Southwestern Handicap Tournament, San Antonio, April 8-10, winning practically all the honors.

SOUTHWESTERN HANDICAP, won by H. R. Bosley, 19 yards, score 92 ex 100

Mr. Bosley tied with two others and won in the shoot-off.

PRELIMINARY HANDICAP, won by R. B. Barnes, 18 yards, score 96 ex 100

HIGH PROFESSIONAL AVERAGE, J. S. Day (tie), - - score 339 ex 350

SECOND HIGH AMATEUR AVERAGE, Barton Lewis, - score 334 ex 350

HIGH AMATEUR AVERAGE, April 11, Barton Lewis, - score 195 ex 200

At New Orleans, April 15-16, HIGH AMATEUR AVERAGE, Barton Lewis, - score 387 ex 400

Peters SHELLS demonstrate their superiority in this, the first big tournament of the season. Trap shooters are wise to the fact that the P brand of shells gives them a "hunch" in any race. Insist on having "steel where steel belongs."

THE PETERS CARTRIDGE COMPANY, CINCINNATI, OHIO

NEW YORK: 98 Chambers St., T. H. Keller, Manager.

SAN FRANCISCO: 608-612 Howard St., J. S. French, Manager.

NEW ORLEANS: 321 Magazine St., Lee Omohundro, Manager.

Meadow Spring—Du Pont.

PHILADELPHIA, May 3.—A broken trap upset the entire program to-day, thus postponing the finish of the Philadelphia Trapsshooters' League wind-up. When Meadow Spring and Du Pont lined up for the shoot upon which hinged the championship, a record-breaking list entered for the day. If Du Pont had won they would have taken title to championship. Had Meadow Spring won it meant the tying of Du Pont for first place. Both clubs agreed to shoot the delayed match on May 17, with sanction of the committee.

The League now stands:

Table with 3 columns: Club Name, Points Scored, Targets Broken. Lists Meadow Spring, Du Pont, Lansdale, Highland, Camden, Clearview, and Glen Willow.

Ten Meadow Spring men had shot over the traps at Fifty-seventh and Lancaster avenue, and eight Du Ponts had finished up their scores before the break ended hostilities for the day. The scores follow:

Table with 3 columns: Meadow Spring, Du Pont, and individual shooter names with scores.

Lansdale—Edge Hill.

PHILADELPHIA, May 3.—Lansdale won the final League match for Highland to-day at Edge Hill, 420 to 415. Many of the home team, as well as all of the visitors, went home with the idea that Highland had won the shoot by two targets, but all had counted in the 47 made by Vincent Oliver, who was the high gun of the day, but who was said to be ineligible, as he had previously shot for the Clearview Club. This score made a big difference, but the Lansdale shooters were of the opinion that competing for Highland, Oliver must necessarily be a qualified member, and they had counted in his score. Oliver belongs to the Edge Hill Club, but he is also a member of Clearview, and it was said that he elected to shoot under the latter's colors in Trapsshooters' League matches, which made him ineligible to be counted for Highland.

Lansdale had seven shooters with totals of 40 or

better, and though they were forced to take in a 35, it was the speed of Munch with 46, the Swartz brothers with 45 a piece, and H. Nice with 44, that helped materially to win. Scores:

Table with 3 columns: Club Name, Shooter Name, Score. Lists Lansdale and Highland shooters.

Glen Willows—White.

PHILADELPHIA, May 3.—From a wholly unexpected source came the downfall of S. S. White Gun Club team in the race for championship of Philadelphia Trapsshooters' League. Glen Willow, heretofore trodden on by every team in the League, to-day came up with the punch that put away the Dentists. Glen Willon's ten high men did not fall below 43, Steen with 48 leading. The Whites did not have a member fall below the 43 total, but there were three of those with 48, C. H. Newcomb was high for the losers with 48. Scores:

Table with 3 columns: Club Name, Shooter Name, Score. Lists Glen Willow and S. S. White shooters.

Camden—Clearview.

PHILADELPHIA, May 3.—Camden beat Clearview to-day, 464 to 423. Lawrence, Gideon and Fisher broke 49 out of 50. Scores:

Table with 3 columns: Club Name, Shooter Name, Score. Lists Camden and Clearview shooters.

Herron Hill Gun Club.

PITTSBURGH, Pa., May 5.—The opening shoot of the Herron Hill Gun Club, of this place, was held May 3 and proved a success with ideal weather and grounds in splendid condition. Twenty-two of the traps shooting fraternity in attendance. The special feature of the afternoon was the sterling silver spoon race, awarded according to the Lewis class system. Geo. Cochran and Oscar Kirsch tied for Class A spoon with 47. In the shoot-off, which was very close, Kirsch captured the trophy. Crothers won the Class B spoon. Pearson the Class C, and Sherrer the Class D.

Jim Lewis was high professional, and being the originator of the class system, comes in very handy around the shooting grounds on such occasions as this, and you will generally find him in the office. Joe Garland was present and redeemed his record of a few weeks ago. Scores:

Table with 3 columns: Shooter Name, Score. Lists Kirsch, Cochran, Painter, Irwin, Crothers, Gillespie, Bishop, Brooks, Denman, Pearson, Bennett, Ullery, Kable, Bradbury, Sherrer, O'Brien, Murray, Thompson, Beck, Lewis, and Garland.

Shoot-off: Kirsch 14, Cochran 13. The next shoot will be held Saturday, May 17. Come and bring your friends.

E. E. LAUTENSLAGER, Asst. Sec'y.

Pahquioque Rod and Gun Club.

BRIDGEPORT, Conn., May 3.—C. W. Stevens won the Stevens trophy at Pahquioque Rod and Gun Club to-day with 188 out of 200. W. A. Gregory took second place with 185. The last leg was won by Harold Mecker, who broke 40 out of 50. His total was 185 out of 200.

W. A. Gregory broke the ground record for the longest run, cracking 77, finishing with 96 out of 100.

Table with 4 columns: Shooter Name, B. H. T., Grand Total. Lists Mecker, Gregory, Stevens, Bailey, Downs, Sunderland, Plancon, Mecker, Bowman, Giard, Coughlin, and Sec'y.

**Lehigh Rod and Gun Club.**

RITTSVILLE, Pa., May 3.—The registered tournament held under the auspices of the Lehigh Rod and Gun Club was a success. The weather was ideal in every respect. A. J. Mengel, of Reading termed it the "Dandelion Garden of the East." A clear background gave the shooters an opportunity to show their ability. High professional honors were won by J. Mowell Hawkins with 147 to his credit. Neaf Apgar won second professional honors with 140. Neaf shot straight in events 1, 2 and 3, an accident in the fourth event reducing his scores during the remainder of the tournament. A. S. Heil, of Allentown, won high amateur honors with 142.

There was some sensational shooting between Heil and Schlicher, of Allentown, Smith, of Easton, and Mengel, of Reading. A. J. Mengel had the bacon in his hand up to the last event, when he dropped two targets, landing 141 to his credit, tying Schlicher and Smith for second honors. J. Heil, of Easton, won third amateur honors for the day, and was followed closely by Englert, of Catasauqua, and G. W. Young, of Easton. J. Maurer shot some classy gait, with 129 from his quota. O. J. Fluck fell some shy with 126, which is below his average.

E. F. Sobers, the heavyweight, shot a good clip with 117, but John L. Englert had him outclassed at the chicken dinner fete. John has no capacity like Sobers, but he got away with the goods. That Leghorn roaster of Mr. Lewis is certainly some cock.

H. F. Koch, Secretary, dropped to 118. John C. Bitterling had some misfires, which caused him to drop to 127 in this race. W. Shrader shot well with 128. H. S. Keiper, of Easton, caused Mr. Young, his chum, to go some, Young leading him but one target.

E. W. Moorhouse, of Allentown, who handles the blasting division of the Du Pont Powder Co., and A. K. Ludwig, secretary of the Hercules Gun Club, of Reading, seemed to have a class of their own to-day. Moorehouse broke 81 out of his quota, while Ludwig led his by 3 targets. Certainly these chums showed some class to these boys.

Frank D. Miller, of Albany, fell some shy, as he hastened to get home at 3:30 P. M. Grainville Brown, of Catasauqua, was missed to-day. E. O. Smith ran straight in four events with a run of 77; Heil ran straight in five events, Mengel and Young in two, as well as J. Heil of Easton, Schlicher of Allentown in four events.

Lloyd R. Lewis had charge of the office and was assisted by A. K. Ludwig on the scores and squad hustling. About 4,845 targets were thrown in practice and regular program.

A number of the boys promised to come to Temple, Pa., Aug. 23, 1913, when the Hercules Gun Club will hold their annual registered tournament. The boys are cleaning their arms now to attend the State shoot next week at York.

The scores at 150 targets follow:

*L R Lewis .....	130	O J Fluck .....	126
*Neaf Apgar .....	140	E F Sobers .....	117
*C Von Lengerke .....	127	A Walker .....	122
*J M Hawkins .....	147	C S King .....	116
*E W Moorhouse.....	81	A S Heil .....	142
J L Englert .....	134	H F Koch .....	118

Posh .....	100 59	Bullard .....	25 9
Schnett .....	100 56	Mead .....	25 9
Wolf .....	75 48		

Fred Dailey with a total score of 188 out of 200 won the Stevens trophy. H. E. WHITE, Sec'y.

**Norfolk-Portsmouth G. C.**

PORTSMOUTH, Va., May 2.—The Norfolk-Portsmouth Gun Club held its first weekly shoot of the season yesterday. The fine spring weather drew out a good bunch of shooters. While the scores were not high, enthusiasm ran over, and all predict a live club this season. Gunther was high in the club shoot of 50 targets with 46. Boyd second with 43. The scores follow:

Gunther .....	46	Gallagher .....	34
Boyd .....	43	Talbot .....	32
Laird .....	42	Dr Petty .....	32
Dr Byrd .....	42	Dr Corbell .....	30
Edmonds .....	40	Ballance .....	29
Borrowdale .....	38	Cook .....	26
Jones .....	37	Wiggins .....	23
McCloskey .....	36	White .....	(25) 18
Bagby .....	35		

W. T. E., Sec'y.

**Greenwich Gun Club.**

THE amateur championship of Westchester and Fairfield counties, under auspices of Greenwich Gun Club, will be held May 30 at Island Beach, Greenwich, Conn. This shoot is registered by the Interstate Association. Covered platforms and grounds. Two automatic traps, with clear sky background. Program commences at 10:30, and consists of nine events—eight at 20 targets each, entrance 70 cents, and one (No. 9) a special at 10 pairs double, 40 cents entrance, for an engraved silver cup. Nos. 1-5, sweeps optional, \$10; Nos. 6, 7, and 8 are for merchandise prizes. Events 4, 5, 6, 7 and 8 constitute the championship; winner to receive the Island Beach cup. Rose system division of sweeps, 5, 3, 2, 1. Targets deducted at one cent each. Contestants may shoot for targets only at 1½ cents. Engraved trophy for high amateur in all events. Engraved medal for high amateur run. Prize for high professional in events 1 to 8, inclusive. Prize for high woman in events 4 to 8 inclusive. Contestants may re-enter in the special; high score to count.

Shoots will be held every Saturday afternoon beginning May 31, regardless of weather. Boats leave Island Beach dock, near railroad station, every half hour, beginning

at 9 A. M. Boats will also leave Scrobogna's dock, Stamford, at 10 A. M. Ship guns or shells prepaid to Island Beach Corporation. For further information address J. H. Finch, 93 East Elm St., Greenwich, Conn.

**Fulton Game and Gun Club.**

FULTON, N. Y., May 3.—A good crowd turned out at the weekly shoot to-day, as the weather was fine. Many good scores were made. The new trap, which will be used on our registered tournament on May 14, was tried out for the first time. Scores:

### 3 GRIZZLIES IN UNDER 1 MINUTE

Feb. 10, 1913—Writing to tell you how pleased I am with the .280 Ross. Last season in Cassiar, B. C. I went after 13 head and bagged the lot, at ranges varying from 60 to 500 yards in 27 shots. My bag consisted of 3 Black Bear, 4 Grizzlies, 2 Goat, 2 Cariboo, 2 Moose. In my estimation there is no rifle to compare with the "Ross .280."

The balance is perfect, the action fast and smooth while the flatness of trajectory quite does away with the judging of distances.

I shot a goat at over 500 Yards with exactly same Sight that I take at 100 yards. The 3 grizzlies were killed in under one minute. Cluny C. Luke, Alberni, B. C. (Extract letter to Ross Rifle Co.)

The "Ross" .280 High Velocity is now retailed in New York City, duty paid for \$55.00 and the Ross .280 Ammunition, with copper tube expanding bullet, patented, specially adapted for it, at \$7.50 per 100.

Get one NOW for your next trip. If your dealer cannot show one write for illustrated catalogue.

**ROSS RIFLE CO., Dept. S-14 QUEBEC, Canada.** Wholesale Agents for U.S.: POST & FLOTO, 14 Reade St., New York City.

### The New Columbus Gun Club.

COLUMBUS, Ohio, May 1.—Johnny Keifer's ox roast and the one-day tournament at the Columbus Gun Club to-day brought out 200 shooters and their friends, who participated in one of the most enjoyable affairs of the season. Fires were started in the big steel oven at four o'clock in the morning, and by the time the first squad was called at 9:45, the bouillon was ready to serve, and was served all day long, together with the finest ox that has been served here. Large tables were set in the club dining room, and dinner served all day, in addition to the serving at the big oven down stairs. The weather was ideal, very little wind, and warm enough to shoot with your coat off. All together in the neighborhood of 20,000 targets were trapped, and the Phellis trophy race, in which six six-man teams were entered, was not completed on account of darkness. Sociability and real enjoyment was the feature of the shoot, and the club was congratulated on all sides for the splendid manner in which it entertained the visitors.

Johnny Keifer, of Columbus, was given a vote of thanks by the club for the way he pulled off the ox roast, as we all found out that "Johnny" was there.

Shooters were here from all parts of the State, and the high man for the amateurs was Dr. F. M. Edwards, of Columbus, O., who went out with the good score of 145 out of 150. K. P. Johnston, of Kenton, O., was second with 144, and C. D. Coburn, of Mechanicsburg, third, with 143. The high professional was John R. Taylor, of Columbus, O., with 145; Chas. A. oYung, of Springfield, O., second, with 144, and Rolla O. Heikes, of Dayton, O., third, with 143.

The Circleville team won the closely contested Phellis trophy race with the fine score of 278 out of 300, each man shooting a good average. Mechanicsburg team was close up with 277, and Springfield, 274. They shot in the fast fading daylight, Columbus finishing after dark, as did also Kenton, Ohio. The Sunbury team, with John A. Loar captain, shot a good race, but were handicapped by the darkness.

The Columbus Gun Club is getting ready for the twentieth century limited shoot on the dates of Aug. 14 and 15, and have already set the mark of attendance at the 500 mark. In addition to being a novelty shoot, in so far as the New Columbus Gun Club pays your round trip fare from any point in Ohio and furnishes your shells (any load) free of charge, and to residents outside of Ohio pay the round trip fare from where they strike the Ohio line coming in to Columbus and return to said point, this shoot will be a live one in every respect, and our large list of applications for programs already demonstrates that "coming events cast their shadows before." We have been asked how many traps we would use for this twentieth century limit shoot. Six traps will be used, and when you get the program you will want to come.

During the summer and fall season the club will

have several social shoots, among them the "corn roast," the "turtle shoot" and the "Boston bean bake." Doc Edwards took an olive oil tablet just before his squad was up first.

Roundy Chamberlain handled the office with the assistance of the old reliable Luther J., and everything went along in the finest fashion.

Charlie North, in addition to having the traps so full of oil and ginger that there wasn't a break, pushed the slow gin fuz squads along the line on the double quick.

Lank Grubbs, of Thornville, owing to the scarcity of honey, disposed of a quarter hay stack and landed in time for the ox.

Bert Cooper just came over to practice a little for the "limited."

Deacon Coffman, the blacksmith from Dublin, was on the job in the regular and the team race.

Frank Ford, in addition to telling a large line of fish stories, took care of the shell game.

F. J. Coburn, of Mechanicsburg, shot his usual good clip.

H. M. Brown showed up to fine advantage in the team race.

F. G. Phellis was pleased with his team's showing and said he had the time of his life.

H. Hildinger was in evidence. He is one of the old regulars.

Pop Heikes is about to introduce his new version on how to keep young. He might tell some of us how, but could we do it like "Pop"?

The congenial Teddy Barstow and his charming wife came over from St. Louis and were with us over the doings. The boys were all glad to see "Teddy" and Mrs. W. N. Camp, of the old East Side Club, was in and said this was sure a time.

J. E. Nutt will have to brush up a little for the "limited."

Billy Webster said he was a little loggy somehow, and he believed if they would let him stand in a tub of water while he shot he would do better, as it might seem more like fishing.

Harry Smith broke 49 out of 50 in the dark. Harry doesn't need any lantern to hunt night crawlers.

Johnny Keifer—well he is some roaster. He is always eating himself, and he'd make you hungry to look at him.

Rolla, Guy, Saxbee, Phellis, C. and F. J. Coburn and H. M. Brown was certainly a fine turnout from old Mechanicsburg. We want to see that squad at the Twentieth Century.

Stouty, Hedges, Ward, Welters, Caldwell and Moeller—the Circleville six—eat like sixty, shot like sixty, and scored eighteen over two hundred and sixty, and that ought to keep them in good humor for a while.

Frank Hall said that he would be ashamed to look an ox in the face after Thursday's roast, for fear he would look at him with suspicion.

Ora Shilling said that on page 92 of "Harry's" latest edition it specifically states that before attending an ox roast the victim should grease his stomach with goose grease to avoid any late discomfort.

John Ritt, the Circleville booster, said, "Keep your eye on us for the Ohio State shoot, June 2, 4, 5 and 6."

Our old friend Purbough, from Mt. Vernon, got the fever and came over. John says there is no place like old Columbus for a shoot.

W. G. Alkire, of Mt. Sterling is showing good form, and we hope to have him with us often this season.

J. H. Loar, Dr. Van Houten, Rudy Rutan, Slaughter and Baird—the Sunbury team—came over in machines and shot through all the events. Sunbury Gun Club are just putting in a new trap, and we will have to look out.

L. W. Cumberland came over from Pennsylvania for the ox roast, and after taking a look at the ox, he ped Roundy and Luther finish up the office. He said that "Bouillon would cure where patent medicines fail." But that did not change Doc Edwards' opinion of "olive oil."

Kent Johnston, of Kenton, O., was sick all day, but his scores did not look sick. Brother Johnston has the faculty of going to one or two shoots a year—always the G. A. H.—shooting into the money without apparently any practice. He may have a blue rock farm, however, concealed about that burg.

J. H. Smith, the hardware man of Columbus, was on hand and had a few stories for the boys, and said, after taking eleven cups of bouillon, he felt much younger—that may be one of "Pop's" receipts.

Charley Young doesn't change any, is getting better all the time and is a good exemplification of what "down on the farm" and a little shooting will do for you.

Billy Poole, of Springfield, is certainly one of the finest. He is not a policeman, but he is a good mixer just the same.

"Bad Bill Weiman" was into everything, as usual, and licked the swearing room door, and Johnny Keifer was looking for an auger to bore his way out or bore "Bill"—hard to tell.

George Tinkham, the angler, fisherman, shooter and all-round sportsman, took in the big show, and said there is nothing to it, you can't stop Columbus—she is bound to be a sport.

Bowman Reinmund was there with his smile and made a hit with the ox. He showed his old friend, Dolson, from Chillicothe, that this was the place to come for excitement, recreation and a sure cure for the blues.

#### The scores follow:

FRED SHATTUCK.

### Pipestone G. C.

THE first annual registered tournament of Pipestone Gun Club, of Pipestone, Minn., will be held May 14-15. The program will consist of ten 15-target events each day. There will also be two special 25-target events, \$2.50 entrance, \$20 added, which will be shot on a handicap of from 16 to 21 yds., based on the scores made in the regular program. Prizes will be divided class shooting, four equal moneys. Shooting will begin at 9 A. M. sharp. Regular loads, with leading powders and several makes of shells, will be for sale on the grounds at regular prices. Western McCrear trap and White Flyer targets will be used. A good lunch will be served on the grounds. Bus accommodations from trains to the grounds. Possible chance to win several gold medals. The Squier money-back system will be used in the regular program. Grounds open for practice Tuesday, May 13. Practice targets trapped at one cent each.

At the shoot held April 27, Atkinson won out in the shoot-off for Du Pont job, after a tie in which three others had a finger in the pie; 22 out of 25 did the trick. Shepherd went him one better in practice after an unfortunate start. Schapler, a new man, set his high mark at 21 out of 25. Scores footed up as follows, 50 targets per man: Atkinson 40, Shepherd 40, Kerr 37, Schapler 37, Pratt 32, Nelson 27, Peterson (shot at 75) 51.

A. PETERSON, Sec'y.

Boston A. A.

BOSTON, Mass., May 2.—The weekly handicap shoot and the second shoot for the team prizes were held by the Boston Athletic Association Gun Club to-day. Staples was high gun for the scratch trophy and Farmer won the handicap take-home trophy.

Team No. 2 took the lead in the team shoot, its totals for the first shoot and that of yesterday totaling 889, which is six targets ahead of team No. 1, Capt. Faye, which led in the first shoot. The scores:

Table with 3 columns: Name, McCrea, Sargent, Total. Lists scores for various shooters like Farmer, Staples, Osborn, etc.

Team shoot for the Snow medals: Team No. 1, Team No. 2, Team No. 3, Team No. 4. Lists scores for various shooters like Faye, William, Ellis, etc.

C. B. TUCKER, Capt.

Cleveland Gun Club.

SOUTH EUCLID, O., May 3.—Weekly club shoot of the Cleveland Gun Club was held this afternoon at Shooting Park, Mayfield road, and was a real summer day shoot, the first this year that made the shooters look for shade and the first shoot from under the covered butts, and everybody enjoyed it.

Semi-annual trophy, 50 targets, 16yds.: Blakeslee 47, Doolittle 47, Stepp 45, Ledgett 44, Stott 43, Jones 42, Hogen 42, Rogers 49, Noble 41, Stevens 38, Hopkins 37, Tobey 36, Thorp 35, Rockwell 34, Parks 33, Clark 32, Hall 31, Hartman 29.

Smith Gun Club.

NEWARK, N. J., May 1.—Only a few enthusiasts turned out here to-day in the cracking contest. Scores in the sweep follow: R A. Hensler 16, 20; H. Hassinger 17, 17; J. C. Weiler, 18, 17; L. Colquitt 23, 22, 25, 24, 22, 23; H. Higgs 24, 23, 21, 22, 23, 25; Doc Van Neas 24, 25, 22, 23; George Ohl, Jr., 22, 23, 24, 25; Jim Whetton 21, 24, 23, 21; T. Kelly 24, 22, 21, 23, 20; L. Lawton 20, 19, 18, 19, 16; B. Croft 20, 19, 20, 20, 20; J. W. Alker 22, 24, 23, 25; W. Johnson 24, 22, 23, 25.

Everett Gun Club.

EVERETT, Mass., May 3.—Seven trappists shot in the Stevens trophy event to-day at Everett Gun Club traps at West Everett. Dr. S. won with a full from 2. Harrington was second with 24 from 8. Kempton took the place with 23 from a start of 2. Scores:

Table with 2 columns: Name, Score. Lists scores for Dr S, Harrington, Kempton, Bryant.

Siwanoy Country Club Wins From Orange G. C.

MT. VERNON, N. Y., May 3.—Under beautiful weather conditions, the Siwanoy Country Club defeated the Orange Gun Club by the score of 217 to 186. This was an interclub shoot for 50 targets in strings of 25, the five high men on each club to constitute the team.

Table comparing Siwanoy Country Club and Orange Gun Club scores for individual shooters like Z C Offutt, G F Pelham, etc.

E. L. Haas, of the Siwanoy Club, made 40, which entitles him to a team medal. On shoot-off for the team high scores, Offutt with 23 won the cup presented jointly by Messrs. Haas and Guggenheim. G. F. Pelham with 22 won the club trophy.

Twenty-five targets each for the Stevens and Du Pont handicap trophies were shot at and the following members made full scores:

Stevens trophy: C. H. Hadlock, H. J. Smith, G. L. Yates and A. M. Dalton.

Du Pont trophy: Dr. A. W. Currie, G. A. Wylie, M. R. Guggenheim, W. M. Wylie and H. J. Smith.

Table with 2 columns: Name, Score. Lists scores for C H Hadlock, L G Bond, G L Yates, H J Smith, E L Haas.

Du Pont trophy: H J Smith, Dr A W Currie, M R Guggenheim, L G Bond, G L Yates.

High gun, scratch, 100 targets: G F Pelham, Z C Offutt, E von Lengerke, T Dukes, G L Yates, M R Guggenheim, J H Finch, J Thompson, Dr R J Held, H J Smith, P Gillespie, E L Haas, C H Hadlock, G A Wylie.

Table with 2 columns: Name, Score. Lists scores for high gun, scratch, 100 targets.

FRANCIS P. O'NEIL, A Booster from Beverly.

Francis P. O'Neil, of Beverly, Mass., is keenly interested in trapshooting. He is a member of United Shoe Gun Club, and has done a great deal in his home city to boost this popular sport. He is a member of several fraternal organizations.

Cerro Gordo Gun Club.

MASON CITY, Ia., May 4.—The weather conditions were only fair, as a strong wind made the targets "very elusive," as expressed by one of the shooters. The business end of the shoot was very efficiently handled by Gaylord H. Ford, now a resident of Cedar

A SINGLE TRIGGER Lefever Gun

in the hands of L. H. REID, Seattle broke 2115 x 2200 = 96.14% with ordinary factory loaded shells purchased from local dealers.

Mr. Reid, shooting at Interstate Association Registered Tournaments throughout the 1912 season, has the high average for the Pacific Coast.

The loads were regular factory loads; the LEFEVER bore, famous for the even pattern and penetration, assisted MR. REID to make this record.

Why don't you shoot a LEFEVER Single Trigger this year?

**While They Last—the 7 Back Numbers and a Year's Subscription to "FLYING" - - \$3.00**  
**FLYING, 420 West 13th Street, NEW YORK CITY**

**Indianapolis Gun Club.**

INDIANAPOLIS, Ind., May 3.—The annual election of the Gun Club resulted as follows: J. C. Dixon, President; T. H. Parry, Vice-President; Walter Hofer, Secretary; J. H. Neighbors, Treasurer. These, with H. W. Vietmeyer, C. E. Edmonson and Gustav Moller, will constitute the Board of Directors.

The shooting to-day was a bit ragged, but Edmonson was again high, although Dixon led for a time and was but one behind at the finish. Shooting up a back number in the trophy contest, Dixon broke 58 out of 60, while Parry was best in the current event with 55. Dixon, Barr, Moller, Parry each drew a straight—Edmonson two of them. Scores:

Edmonson	Shot at. Broke	*Vietmeyer	Shot at. Broke
Dixon	140 127	Lewis	100 76
Parry	140 120	Alig	80 62
Moller	140 104	Tanner	60 44
*Barr	100 87	Harcourt	40 34
Neighbors	120 82	*Van Nest	40 31
Stutte	100 80	Teegarden	40 29
Britton	100 78		

April 26.—The summary, which includes both practice and cup scores, shows Edmonson was high in the totals, but Parry beat him by 55 to 54 in the latter event. Parry also posted the only straight of the day. Scores:

Edmonson	165 152	*Van Nest	100 84
Parry	145 132	Hofer	80 64
Stutte	125 83	Wilson	60 45
Appel	120 78	Piel	60 38
*Vietmeyer	100 86	Neighbors	60 39
Lewis	100 85	Coss	20 16
Alig	100 70	Trester	20 14

\*Professionals.

**Birmingham G. C.**

BIRMINGHAM, Ala., May 3.—Fourteen shooters were at the weekly shoot of the Birmingham Gun Club on Friday, and fifteen shooters on Saturday. On Friday we had with us the noted professionals, George Maxwell and C. E. Goodrich. On Saturday Leland was the only professional. Some good scores were made on each day. C. E. Goodrich was high professional, and John Warren high amateur on Friday. Gentry Hillman still continues his good work, and shot high on Saturday. We had with us on Saturday, Mr. Dickerman, of Chicago and Cleveland, who made a splendid score on both doubles and singles. Also several of the Ensley Gun Club shot with us. We are fast getting two squads in trim for the Southern Handicap, and hope some of the Birmingham club will win out this year.

Scores made on Friday follow:

C E Goodrich	Shot at. Broke	Randolph	Shot at. Broke
J K Warren	100 96	Pitt	100 72
G Maxwell	100 94	Dick Brown	100 71
E M Cornell	100 93	Lee Moody	50 57
Geo Hillman	100 87	Kitchen	50 41
Jas Hillman	100 80	G Hillman	25 32
Dr Sellers	100 79	Garl	25 22

Saturday's scores:

G Hillman	100 93	Garl	75 59
H Ryding	100 92	Kitchell	75 52
J Hillman	100 88	Dickerman	50 48
Dr Sellers	100 85	Sid Lee	75 47
E Cornell	100 80	Oden	75 43
Dick Leland	100 76	Gay	50 40
C Barr	100 69	Pitt	50 33
R Myers	100 67		

**Cincinnati Gun Club.**

THERE was plenty doing at the grounds on May 4, the members turning out well, and several visitors were present, among the latter, Ike Brandenburg and Ed. Cain, of Dayton; R. H. Bruns, of Brookville, Ind., and W. R. Randall, of Mason, O. The conditions were very good, and some high scores were made. First honors went to Brandenburg on 95, just one target better than the score put up by Hammerschmidt, the local crack. Supt. Gambell gave the leaders a run for their money, finishing only one target behind Hammer. Then came Gaskill and Bruns tied on 92, and Cain, of Dayton, with 91. A number of practice events were shot, and a couple of team matches finished the sport.

Butz	89	Brandenburg	95
Gaskill	92	Cain	91
Sander	87	Bagley	38
Hammerschmidt	94	Randall	83
Gambell	93	Bruns	92
Smith	89	Holliday	90
Schreck	81	F. Holliday	17

**Practice events:**

Butz	Shot at. Broke	Brandenburg	Shot at. Broke
Hammerschmidt	120 89	Cain	40 33
Gambell	100 86	Bruns	40 32
Smith	80 68	Holliday	20 17
Schreck	20 14	Holliday	40 28
	20 12		

Team match, 100 targets per man:	Gaskill	92	
Gambell	89	Smith	89-181
Hammerschmidt	90-179		
Team match, 100 targets per man:	Hammerschmidt	3 93	
Gambell	92	Sander	87-180
Butz	76-168		

**Westwood Gun Club.**

E. FROHLIGER put up the high score at the weekly shoot on May 4, breaking 61 out of 75, with G. Oskamp a close second on 57. Bradford made a very creditable showing, as this is only his second trial at the traps. P. Ruehlman was also in good form, going at an 88 per cent. clip. The club has recently installed an automatic trap in place of the set of experts. The Stevens trophy contest was concluded at the last meet, and was won by Gordon Oskamp on a score of 83, and with his handicap a total of 97 out of 100. C. Rybolt was the runner-up with 96. At practice, C. Kuball broke 42 out of 50, and La Boiteaux, 23 out of 25. The members will visit the Cincinnati Club on May 11. Scores:

A La Boiteaux	Shot at. Broke	Frohliger	Shot at. Broke
F Disser	25 14	W Oskamp	75 61
Rabe, Sr.	75 31	G Oskamp	75 46
Rabe, Jr.	75 44	Bradford	50 28
Ruehlman	50 44	Kaufman	50 32

**Roanoke G. C.**

ROANOKE, Va., May 3.—A large and enthusiastic crowd of shooters faced the trap to-day, with ideal weather conditions prevailing. Much interest is being manifested by the shooters of the various classes in the contests for trophies offered in their class. These weekly trophies were won by the following contestants to-day:

Scratch class—Dr. E. C. Watson first; S. Atkinson second.  
Class A—S. H. Holland, first; W. C. Bringman, second.  
Class B—Dyer first; Geo. Moore, second.

Class C—F. Jones, first; D. W. Richards, second. Stevens trophy—Dr. E. C. Watson and P. T. Jamison tied with perfect scores.

The scores made by the respective shooters, 50 targets per man, follow:

Dr E Watson	Broke. Pr.C't.	Moore	Broke. Pr.C't.
Atkinson	49 98.0	Scholl	38 76.0
Jamison	46 92.0	D W Richards	38 76.0
*Willis	113 90.4	Elliott	38 76.0
Holland	45 90.0	F Jones	35 70.0
Wilkinson	44 88.0	Stanley	35 70.0
E Poindexter	44 88.0	Blankenship	33 66.0
Shepherd	43 86.0	J Poindexter	33 66.0
Price	43 86.0	Boyd	32 64.0
Dyer	43 86.0	Cooksey	30 60.0
Bringman	42 84.0	Nelson	25 50.0
W S Jones	40 80.0	Van Pelt	24 48.0
J B Cumble	39 78.0		

\*Professional; shot at 125 targets.

SECRETARY.

**Robin Hood G. C.**

STATEN ISLAND, N. Y., April 26.—In the handicap event on 50 rocks for a Winchester pump, Conelley made a full from a free start of 13. Beyersdorf from 5 made 47.

In the Du Pont fob event on 25 scalers, Conelley again topped the bunch, getting 24 from 7.

Stevens fob went to Beyersdorf with a full 25 from 3, while take-home trophy was "took" by Hutchings with 21 from 1. The scores:

Winchester gun, 50 targets, Handicap:			
Conelley	13 50	Mandelli	5 45
Beyersdorf	5 47	Hutchings	1 42
Gerbolini	5 45		

Du Pont fob, 25 targets, handicap:			
Conelley	7 24	Mandelli	3 19
Hutchings	1 23	Gerbolini	3 21
Beyersdorf	3 21		

Stevens fob, 25 targets, Handicap:			
Beyersdorf	3 25	Gerbolini	3 18
Mandelli	3 24	Conelley	4 21
Hutchings	1 20		

Take-home trophy (Du Pont picture), 25 targets, handicap:			
Hutchings	1 21	Gerbolini	3 18
Beyersdorf	3 19	Mandelli	3 17
Conelley	4 19		

G. CONELLEY, Sec'y.

**Edgefield G. C.**

EDGEFIELD, S. C., May 2.—Only five busied themselves wad putting to-day with a 25-rock event as incentive. J. W. Stewart missed only his 18th scaler, while H. A. Smith missed his 12th and 16th. J. C. Hughes was third with 17 down, and 5 still scaling. Scores: J. W. Stewart 24, A. A. Smith 23, B. F. Zimmerman 16, S. E. Margan 13, J. C. Hughes 17.

**Crows.**

BY SANDY GRISWOLD.

SPEAKING about the crows in FOREST AND STREAM some time ago, reminds me that the "old wild hemp field" a couple of miles north-east of Calhoun, used to be a famous feeding and marshaling place of the crows. Thousands of these ebony-feathered buffoons used to congregate there every afternoon, especially in the fall, and one day late in November, several years ago, I was up there with the Barrister dove shooting. We were up on the little oak ridge that runs along the west side of the old field, and all during the afternoon we saw the crows come scurrying in, with their querulous cawing, and settle down in the big open clover field just north of the hemp pasture, and having my curiosity excited, I told Bill that I was going to make a sneak down through the tall, thick hemp stalks and see what the crows were doing.

"Holding court," said Bill, as I moved off.

I got down in the hemp field and worked myself stealthily to its very edge, without alarming a single crow, and there spread out before me, some of them almost within touching distance of my hand, were at least several thousand crows. I stood and watched them closely for something like an hour, and when the birds quit coming in, there seemed to be some sort of an understanding among them; in fact, it seemed as if a meeting had been called, and although I couldn't make out which of the innumerable big black fellows was the leader, I

felt that they had one. Prior to this action they had all been busily harrowing the clover for beetles and other insects, but suddenly, at a commanding squawk from some quarter, they all came to a halt, sat up straight and were all attention, and the roll was called, each member answering that same shrill, imperative squawk, separately, and when this was over, they all joined in a chorus of caws, hopping contentedly about over the sward for a few moments, and then rising, flapped their way in long, streaming lines of black, to the woods along the further ridge, where they roosted.

One evening last fall, while duck shooting in the Loup with Sam Richmond and Charlie Dollarhide, we noticed three crows in a row on the limb of a tree, two of them being strangely perturbed, and making all kinds of fuss, while the other was perfectly quiet and looked like an invalid. His feathers seemed all to grow the wrong way, and a more miserable looking crow I never beheld. Sam wanted to rake the trio off the limb with his old Parker, but I restrained him, and told him that I thought the middle crow had already been wounded by some hunter or was sick, and the other two were looking after him. So we waited and watched. After a while we saw the two outsiders make a start to fly, like starting for a race, but as the one in the middle did not start, they immediately came back to score over. This they repeated four or five times, the center crow paying no attention to them, and suddenly they turned on him and began to give it to him with wings, beak and claws, until he squawked for mercy, and then they started again, and got away finely, all going together in a line just as they sat on the limb of the tree. I have thought much about this incident, but have never

## The Trail of the Bull Dog

An account of the wonderful 50,000 mile auto trip of Charles G. Percival, M.D., written by himself.

**IF YOU LOVE OUT-DOOR LIFE** you will revel in this book. It incarnates the spirit of the woods and silent plains, the mountains, lakes and rivers.

From the White House at Washington, where Dr. Percival delivered a message to President Taft, to the wilds of Alaska and the Yukon is a big step, but Dr. Percival made it, and was the first man who did by auto, traversing 44 states on the way, climbing 11,000 feet by auto, crossing deserts where he almost lost his life, and calling on Diaz, Madero, the Lord Governor-General of Canada, the Governor of Alaska, thirty-nine state officials and four hundred mayors.

### INVALUABLE FOR TOURISTS AND CAMPERS

The authoritative information on food and equipment for out-door life given in this book is alone worth many times the price of the volume. And it will disclose to you places near at hand and far afield that you will wish to visit for fishing, hunting or sight seeing. Illustrated by over 200 splendid views. Reads like a tale of adventure where pleasures and hardships are agreeably mixed, yet is the true story of the most remarkable trip ever made by automobile.

**YOURS** with one year's subscription to **HEALTH MAGAZINE** for only \$1.10. **HEALTH** is the oldest magazine in America devoted to physical culture and out-door life, an illustrated monthly. Regular subscription price \$1 yearly. **HEALTH MAGAZINE CO., Dept. 25, HOLYOKE, MASS.**

been able to satisfactorily explain it to myself, but you can rest assured it raised many degrees the high esteem in which I have always held this bird since my earliest boyhood.

The duck shooters in February are waiting for the ides of March, with their boisterous winds and the oncoming of the ducks and geese. Until then there is nothing to it but recollections of the past fall, with its beautiful golden days and joyous comradeship. Then again, perhaps, we may tread the old paths and look once more upon those familiar scenes, now marvelously changed by the mysterious alchemy of nature from what they were a brief four months ago.

But it is almost as pleasing to look back and in imagination once more gather about the big log fire. We see the tule and rice stalks yet standing breast high, stripped of leaves and fluffy tassels, still bordering the open bayous, and a matted mass of dank hay, once fresh and fragrant, lies on the ground, showing where our tent stood. An old broken oar and abandoned tent pins are scattered about, and a headless decoy or two adds a touch of sadness to the scene. Yonder is a pile of empty tomato, pea and corn cans and off yonder is a heterogeneous assortment of bottles bearing familiar labels with the magic word "Yellowstone," prominent among them. The old well or water hole where we kept our butter is unchanged, and the winding river, though man may come and man may go, flows on forever. There are not so many birds in the air as there were the last time we were there, or as much of anything else, unless it be memories. The marsh spreads out before us cold and uninviting, but when the winds blow balmy from the south at daybreak and nightfall, we will expect to see them again pouring in and out in thrilling flight.

There are but two sounds that break the stillness of the old camp the first night out—the ludicrous medley of the coyote, and the weird wail of the winds around the canvas corners and over the verdureless plain.

There are lots and lots of men who do not know the most effective way to dry out a pair of wet rubber boots or waders; there are others who do not understand how to make the safety on a gun independent; who do not know the proper load for different sorts of game; the best ground on which to camp; how to build a blind; the habit of birds and so forth. And there are anglers who don't know one fly from another, how to string a hook or attach a leader, the proper seasons and the bait for certain fish and a thousand and one other things that would only adopt my plan. For instance, I learned while shooting in the sandhills one fall that the best way to dry a wet pair of waders is to stuff them full of old newspapers, set them by a warm fire until heated through, then pull the paper out and hang the boots in a tree or on the fence or on top of the house with the open leg pointing in the direction the wind is coming from. Try it when you have occasion.

The robins that have already put in appearance in this locality according to report, are undoubtedly a bit premature, although I know that they often remain here all winter, and when the weather is much tougher, too, than it has been at any time this winter. However, I have

not heard of any of the birds staying here this winter, and it is safe to say that the few that have come in will again be hurrying southward at the first intimation of blast from the polar regions. As I intimated above, I think the birds left the neighborhood completely the past fall, for on my frequent trips up into the woods they usually haunt, I have failed to see a sign of a single bird.

But he is a noble little fellow under any circumstances and in the dark days of early spring comes to us like a beacon of hope. See him throw out his chest and rear back. How proud he is! Possessed of such a well knit figure, fine head and erect carriage, who can blame him if he exhibits a trifling conceit? What a familiar figure he is in April, May and June days on our lawns, now hopping quickly along, now running swiftly, pausing after each dash, and rearing up to look around. See him as he makes another swift run of a few feet, then bends eagerly forward, appearing to listen intently. Suddenly he darts his bill down, and we see him drag a long worm from out the roots of the grasses. I have never been able to determine with any satisfaction to myself whether it is his sense of hearing or sight which guides him to his food. His attitude of intense attention for a moment before darting on his prey would seem to indicate that the former was the case, but again, he may be only watching intently, as it is possible that the squirming of the worm as he pushes his way to the surface may cause a tremor among the blades of grass, not visible to our coarser vision, but easily perceptible to our little keen-eyed friend. At all events, there is a moment's pause each time before the final lunge, which almost invariably results in capture. This is always in May. If the tender morsel happens to be an extra large one, it is amusing to see him freshen his grip, as it were, and back off, until stretched to its utmost, out comes the worm, and its wiggling length appears but a second only, as redbreast unceremoniously grips him down.

A good songster, he is at his best during the breeding season, and it is a surprise to many who, familiar with only his monotonous short-noted chirp, to hear him launch into such an ecstasy of delight, but later, along in the late fall, his whole nature changes, congregating in large flocks, he becomes exceedingly shy and wary, and is really a hard bird to approach. At this season he is indeed a rare morsel for the table, but here with us it is considered a crime to kill him. The robin, well, I guess he is the most beloved bird of all the feathered family.

#### Quail for Rhode Island.

THE Chief Deputy Bird Commissioner of Rhode Island, Frank W. Hennessy, and Deputy Bird Commissioner, William Murray, liberated 500 quail in the northern part of Rhode Island. This section has been practically depleted of this species of bird for some years past.

The majority of the quail are young birds, although there are a plentiful number of older ones included in the shipment. They are all properly mated. The quail will be put in coveys by the commissioners and plenty of food, consisting of barley, oats, rye and buckwheat, has been scattered in such a way that the birds will become accustomed to the vicinity and remain there.

#### Plant of Many Uses.

IN 1830 the Congress of Mexico issued an order that none of the State documents should be indited upon any material other than the paper made from maguey. This is the national plant, and some have insisted that the very word Mexico was derived from the word mex-til, which means maguey.

The stalk of the blossoms grows twenty-five feet high and looks like a giant candlestick. It often carries several thousand blossoms. There are fields or maguey miles in length in Mexico, and scarcely a bit of the plant cannot be utilized.

It makes splendid fodder for cows; portions of it are baked and prove very palatable. It is used to thatch roofs, burn as fuel, and out of it are manufactured thread and paper. The sharp spike at the tip of the stalk often is made into a needle, its tall pole used for the ridge-pole of a peasant cottage, and the favorite Mexican drink, pulque, is manufactured from the honey water by cutting a hollow in the stem and fermenting the juice.

#### Quinine Factories in Java.

JAVA produces about two-thirds of the world's supply of cinchona, and it has for years been regularly shipped to Holland. The large quinine manufactories, mostly situated in Germany, supply themselves with the raw material in the Dutch market, and of late years the manufacturers have combined to keep the prices at such low level as to render the cinchona cultivation unprofitable, although the manufacturers of quinine have been earning large dividends.

To meet this combination, says the New York Sun, it was resolved to establish a quinine factory in Java, says the British Consul at Batavia, and this has been done at Bandung, where the first Java quinine has been produced. This is described as of excellent quality and equal in all respects to the best European brands. Last year the total production of cinchona in the islands was over eight and one-half million pounds avoirdupois.

#### Lured Dogs to Death.

VAN NELSON, of East Pittsfield, Me., lost a valuable Texas foxhound in a peculiar manner. The dog was giving a fox a hot chase when Reynard took to the railroad track and led him close up to an approaching train. Just as the train was about to strike the fox, writes a Waterville correspondent of the Portland Press, it jumped to safety; but the hound, intent on following the trail, was run over and killed.

Subsequently it has been learned that the mangled remains of several other dogs with sporting blood in their veins have been found on or beside the tracks on the same stretch of railroad.

Tracks found in the snow and other indications all go to show that they met their fate in a similar manner. It is the current opinion here that the same cunning old fox deliberately led them all to their doom. Nelson's dog was valued at \$500.

#### Cleaning Gun Barrels.

I HAVE been told by an expert who has been doing nothing for years but plating guns for a firm that turns out thousands of guns and rifles that you cannot have a better all-round oil than pure neatfoot oil, allowed to stand and clear in the sun, and then poured off; and another, the most fashionable in London, I am told puts nothing else in the barrels but pure vaseline. I may say I have up to now used chiefly the latter for years, but of course if there is a better, I am only too glad to hear of it. My gun is a hammerless ejector, and the oil we want is one you can get into the parts freely and not corrode.—A. T. C. in Shooting Times.

For Sale.

# At the 2d Annual Championship Rifle Matches STEVENS INDOOR TARGET RIFLES

did the usual thing—carried off all the important honors.

Photo by Hanson,  
Portland, Me.

In the 20-man Board of Trade Team Match the Stevens scored 1631 points—the record of 20-man team in the State of Maine.

In the School Boy Championship Match, the first prize was won by Mr. Philip M. Johnson of the Deering High School, who scored 100 points. The second and third prizes were tied for by Mr. George St. John of the Deering High School, and Mr. Richard T. Schlosberg of the Portland High School, each scoring 99 out of 100 points—all using Stevens Rifles.

Mr. Johnson is the individual school boy champion of the country and won his place on the International Team with the Stevens Rifle.

Send to-day for Stevens catalogue of Rifles, Shotguns, Pistols and Rifle Telescopes—profusely illustrated and with detailed description of all our arms.

### Temptation of Noah.

One day old Mister Satan come a-walkin' 'cross de brine;  
He say, "Good mawnin', Noah! De fishin's mighty fine.  
Why don't you git dem two worms out fo' ketch yo'sef  
some fish;  
An' live as high upon de ark as any man could wish?"

"Good mawnin', Mistah Noah!  
De fishin's mighty fine,  
Why don't you git dem two worms out  
An' set yo'sef a line?  
Can't you heah de catfish seratchin'  
Dey backs again de keel,  
An' de punkinseeds jess bellerin'  
Fo' git deyselves a meal?"

You should a-seen ol' Noah light on a marlin spike;  
He made dat fellow Satan pick up his heels an' hike.  
He hit him one big wallop across de horns an' say,  
"Git out o' hyah, Temptation, an' mind you stay away!"

Git out o' hyah, Temptation,  
An' mind you stay away!  
Dis chile ain't goin' fishin',  
No matter what you say.  
De Lawd's done put his faith in him  
To bring dem worms asho',  
An' don't you make no such fool cracks  
Aroun' hyah any mo'."  
—St. Louis Post-Dispatch.

### Hot Days in the Arctic.

"JULY was intolerably hot. We had no thermometer, but I feel sure," says Stefansson, the explorer, in Harper's Magazine, "that many a day the temperature must have been over 100 degrees in the sun, and sometimes for weeks on end there was not a cloud in the sky. At midnight the sun was what we would say an hour high, so that it beat down on us without rest the twenty-four hours through.

"The hottest period of the day was about 8 o'clock in the evening, and the coolest perhaps 4 or 5 in the morning. The mosquitoes were so bad that several of our dogs were completely blind for the time through the swelling of their eyes, and all of them were lame from running sores caused by the mosquito stings on the line where the hair meets the pad of the foot. It is true that on our entire expedition we had no experience that more nearly deserved the name of suffering than this of the combined heat and mosquitoes of our Coppermine River summer."

### When the Fishin' Pole is Noddin'.

Through the scented woodlands, far away from town,  
Rest in the world, and you will win it;  
The cork's a-goin' down, boys, the cork's a-goin' down.  
For the fishin' pole's a-noddin' every minute.

Wish time,  
And fish time;  
Don't call me back to town,  
Fishin' pole's a-noddin',  
An' the cork's a-goin' down!

I hear the far-off tinkle of drowsy cattle-bells,  
The river keeps the oak's cool shadow in it;  
To the trouble of the city I am waitin' my farewells,  
For the fishin' pole's a-noddin' every minute!

Beams here,  
And dreams here—  
Don't call me back to town,  
Fishin' pole's a-noddin',  
An' the cork's a-goin' down!  
—Atlanta Constitution.

### Queer Eskimo Customs.

EVERY ten years the Eskimos hold the Dance of the Dead, when ghosts are supposed to come out of their coffins and visit the Kos-ga, are given a feast, and retire for another ten years well filled. Sometimes the food is taken to the burying-ground to save the spirits the trouble of moving.

When a child is born among the islanders it takes the name of the last deceased member of the family, and on it devolves the duty of feeding its foster-father's spirit. The Eskimos, says the Wide World, have a horror of being childless, because their spirits will languish and their name be forgotten. As they say, "Spose no mik-a-nina (children)—ghost plenty hungry." Often an Eskimo will beggar himself, giving a great feast in honor of his illustrious ancestor; but he gains great renown thereby, and places all his visitors under life-long obligations to him.

# Williams PATENTED Holder Top Shaving Stick

"The kind that won't smart or dry on the face."

The same dependable soap with an added convenience. The top furnishes a holding surface that makes the stick as easy of manipulation when its last available fraction is left as when it is entirely new.

And from first shave to last, you will have that abundant, creamy, soothing lather that has always distinguished Williams' Shaving Soaps.

### Four forms of the same good quality:

## A Contraband Incident

CHAPTER IV.—Conclusion

### A Story of the Forties Written by Nessmuk

*With illustrations from "Woodcraft."*

"**T** WAS a year ago las' 'July dat I took sech an awful whippin', an' ef I hadn't bin mighty tuff, I shouldn't be alive now. I'se a little lame 'bout dat shoulder yet, but ef I can get to Canada I'se good for two men's work any day."

"And did your mistress keep her word about freeing her share of the slaves?" inquired farmer Kelly.

"No, sah. She tried to, but massa an' de lawyers made her a heap ob trouble about it, an' kep' puttin' her off. Finally massa got it made up to send ten ob us down to Orleans an' sell us dar, an' we happened to find it out de very day afore we was to go. De next mornin' dere was ten niggers missin' on dat plantation, bet on dat! Missus didn't know nuffin 'tall 'bout it. Oh, no! Ob course not! She come round arter we was done work an' shook han's wid us kind a sly an' quiet like, an' sed she knowed we wouldn't neber think ob runnin' away, 'specially you, Jim,' she said. 'You've bin used so nice an' neber flogged, you know, an' your wife has bin treated like a lady on dis plantation; you'll neber turn your face to de norf star.' And den she looked so knowin' an' raily handed me ten dollars. Lord! She might jes' as well tole me to run in plain words. She said five hun' red dollars was safe in de bank at Richmond, an' ef I ever got in a place whar I needed it, to let some frien' dat I could trust send to her for it, an' she would see dat I got it all safe, but Lord! I reckon de ole colonel 'll take care ob dat money. You see, it will help pay for some niggers dat he lost one night. Arter dark missus come roun' ag'in wid her yaller gal Nance, an' dey had as much cake an' bread an' sech stuff as dey could carry in a big basket. She allus trusted Nance wid ebery t'ing, 'cause she said, mebbe we hadn't had any dinner an' might get hungry 'fore mornin'. When she was goin' away she jes' jumpt up an' cotched hole ob my wool an' pulled my head down an' whispered dat I'd find a team an' wagin up de road 'bout 10 o'clock, ef I should happen to feel like takin' a ride. Lord! But she was cute, massa, an' de lawyers didn't fool her so bad arter all. We found de team jes' as she said, an' a man wid his head all bundled up was dar a-waitin' for us an' tole us to jump in quick. I knowed who de man was, but I didn't let on to know dat 'twas missuses brudder, so we got in an' de man druv all night. He druv de hosses right smart, an' 'bout an hour 'fore daybreak he stop-

ped clost to a big piece of woods an' tole us he couldn't go no funder; we mus' take our chance alone de rest ob de way. De Lord knows how we eber got so fur as dis wid dat poor little chile to tote, but He led us on an' we'se got 'mong frien's at las'."

As the man told of his adventures in a simple, childlike manner that carried conviction with

girl and sleep till we call you; you needn't be uneasy; you shan't be hurt or taken; I'll give you my word for that."

The great hulking black fellow lay down by his child and drew the coarse blanket about her shoulders, oh, how tenderly, and patted the crisp damp hair on the little suffering head, gently as you, oh mother, in Israel, member of a most respectable church, patted the head of your own darling when you watched her calmly sleeping after hovering for days on the confines of the grave, and the humble, heartfelt words of gratitude which you offered at His shrine then were no more sincere, no more heartfelt than the low-murmured, broken, prayerful words with which that poor fugitive thanked his Maker, as with his great black hand resting lightly on his child he fell asleep. We all slept. The three white men leaning against the crotched posts or log sides of the shanty, the contrabands on the more luxurious bed of dried marsh grass and spruce boughs.

We—the whites—hardly thought to do more than to get partially rested and catch a light cat-nap or two, but we were roused from rather sound sleep by a rough voice which startled us with "Hurrah, there! turn out and gaze round."

In an instant we were on our feet, and instinctively grasping for our weapons before our eyes were fairly open, but a glance convinced us it was all right. Slave hunters do not usually travel on horseback with bundles of clothing tied up in home-made counterpanes at their saddle bows and baskets of ready cooked provisions on their arms. The newcomers were four in number—all mounted—and the rough speaker, whom farmer Kelly addressed as Bell, stirred himself with a handy readiness which left a suspicion on the mind that he was an "auld used hand" at this sort of thing.

"There," throwing a huge bundle into the shanty. "That's woman's gearin' and some duds for the little gal. And here's shirts, trousers and an old overcoat for the man; reckon they're too small for him, but they'll do till he can get some bigger and better ones, and—got some hot water on that fire? Good! Make 'em a strong cup of tea and put a drop of something in it, while they're dressin'; there's no time to lose."

"And what about my Ben? You've seen him, of course, and that other chap?" said Kelly.

"Your Ben's all right, and the other chap's in jail by this time," answered Bell.

"Well, that is neat; how did it happen?"

KNAPSACK AND DITTY BAG.

every word, one felt not only that it was true, but that much had been passed over which was well worth listening to.

"Well, boys, it's nearly 4 o'clock, and some of this crowd may have a good piece to go afore another night. You, Jim, if that's your name—"

"Yes, massa, dat's my name."

"Well, you'd better lay down with your little

"Oh, he got in too big a hurry for Shank's mare, and borried one of my hosses to help him on. You see, Ben got to my house 'bout 1 o'clock, and nothing would do but I must jump up and get the team harnessed. While I was gettin' my dry goods on, Ben he told me the story, 'short and sweet, and when we got out to the yard where the hosses was, there was my gentleman's track in the snow, and my best hoss gone. Ben he knowed the track by the moccasin, so he left me to manage matters 'bout raisin' the party, and some fixin's for the darkies, while he went on to Smith's for a warrant and the constable. The chap was headin' for Crown P'int, and had about an hour the start. They've nailed him afore this, and I'll appear ag'in him for hoss stealin'. How do I know he meant to fetch the hoss back? I don't b'lieve he did; a slave hunter's mean enough to steal hosses or sheep, either."

"So you see," said farmer Kelly, "it's just as I told you. There won't be any scrimmage. It's as well to be lively, though. No telling but we may be overhauled by parties from below with reg'lar papers and a posse to back 'em. Jason, you tend to the breakfast, while I—"

He was interrupted by a wail of anguish so wild, so full of agony, that we all paused involuntarily, and for a moment every man of us seemed frozen in his tracks. A glance at the back end of the shanty explained all.

There sat the poor octoroon mother, her hair in long disheveled waves flowing over her nude arms and shoulders, moaning and rocking to and fro in her misery, and frantically hugging her little girl to her breast. The child was dead, had been dead, none of us could even guess how long. It was pitiful, heartrending.

But there was brief time for mourning. The fugitives were made to drink some hot tea and whiskey, hustled into clean, dry clothes, and hurried off through the woods to where a spring wagon and a smart team awaited them. As the woman utterly refused to leave her dead child behind, it was wrapped in a blanket and committed to the strong arms of the father for a last, sad journey, and the mournful procession disappeared in the direction of the main road, leaving me alone in camp.

In a couple of hours farmer Kelly returned with Jason, and reported the party safely off—not for Canada, but Wisconsin, where they would be helped in settling a claim, and just as safe from pursuit.

I had given the woman my address, and she had promised to write without fail, for she could write a little, but I never expected to hear from her. In a little less than two years, however, a letter came from a remote town in Wisconsin to say that they were settled on a quarter section of land, with a log cabin, barn and ten acres of cleared fields. But the climate did not agree with them, and there was a despondent, homesick tone throughout the letter that led me to believe they were pining for the South. I wrote them a cheerful, encouraging letter, and there the correspondence ended.

Nineteen years passed away. It was in May, 1861. The country was in a warlike ferment, and more men were volunteering than could be mustered in under the law, or armed. A Massachusetts regiment—mostly unarmed—had been mobbed in the streets of Baltimore. Camp

Curtin, near Harrisburg, was alive with troops, and regiments from the West were daily coming and going, making this camp their objective point of armed departure.

Among others, the ——th Wisconsin unloaded from the cars near camp one morning, and taking possession of the road that was ankle deep in dust, proceeded to practice the tactics of "street firing" for three mortal hours. They were going through Baltimore on the morrow, armed, and with sixty rounds of "buck and ball" to the man. They thought it well to be prepared for mobbing. As a regiment, it was heavier and taller than any that had yet stopped at Camp Curtin, and attracted a good deal of attention.

When they had their tents up and campfires going, I walked over to their quarters to scrape acquaintance and do a little interviewing. It was a pleasant surprise to run against an old schoolmate, Johnny S., who was Lieutenant of

FROG BAIT.

THREE-HOOK GANG.

Company E. Together we sauntered up the narrow street between the tents, stopping at the fires for a minute to chat with the men, until arriving at the officers' quarters, my attention was attracted by a tall, stooping ducky, busily engaged in cooking. For a minute I was in doubt. But as he looked up and our eyes met, I knew him at once.

It was the fugitive of more than twenty years ago.

It was not strange that I should know him, for a grown ducky does not change like a white man, but I thought it a little remarkable that he should recognize me at once, as he did, and he could not have been more rejoiced had I been an own brother. Short stories must suffice in war time. Lieutenant S. had duties that called him to his company. Jim managed, while attending to his duties as cook, to give me a few brief notes of his free life. His wife had died soon after they had received my letter, and he could not write. He still held his land, but farming had not been a success with him. The

war, however, had stirred him thoroughly, and he talked almost insanelly about it. He had not enlisted, but had "hired out" as cook, and to look after the colonel's things generally. "What I mos'ly wants ter see is a battle," he said. "I wants ter see de anger ob de Lord come down on de 'pressor. I does so. An' when de day ob battle comes, I'se goin' to be dar. Dat day dey'll hab to do deir own cookin'."

In the early dawn of the next morning the regiment piled on to a train of flat cars and left for Washington. I was told that their march through Baltimore was grand. They marched in close order, to martial music, in slow time, and it was thought best not to assault or insult them.

It was in July, two days after the battle of Bull Run, that I found myself in Washington. The state of the city beggars' description and the general demoralization was almost past belief. It was a terror-stricken city. Five thousand well disciplined troops could have taken it almost without loss. The streets were filled with beaten, broken up, disorganized volunteers. No man seemed to know where his regiment was, or if he had a regiment or company, and all were unarmed, save officers, who mostly retained their side-arms.

I met several acquaintances who had been through the fight and got a different version of the affair from each one, as each saw it from his individual standpoint, I suppose. All agreed that the day was virtually with the Federals, until the Confederate reinforcements came on the field; also as to the terrible flight and panic which ensued, and they agreed on little else.

I met several of the ——th Wisconsin, and at last found Lieutenant S. in a drinking saloon, with a corporal and several privates of Company E. He was trying to get his company together for mustering out, as their three months had nearly expired. When questioned about his regiment, he said: "Regiment! Well, I don't know as we've got one. At best I can't find it. We are badly cut up. We fought until late in the afternoon and took three batteries, but I think they were taken back for lack of troops to hold them. Perhaps we may muster half the regiment when the stragglers are all in."

"Do you know what has become of big Jim, the ducky?" I asked.

"Oh, him. Yes; he's accounted for. He would have done well enough had he obeyed orders, but he left the officers' baggage to take care of itself, and came straggling on to our left flank just as we were going to charge a battery. He had picked up an old Harper's Ferry musket, and was just boiling over with fight. I didn't see him killed myself, but—oh, here's Sergeant Boyce. Sergeant, Jim was right near you when he was killed, wasn't he? Here's a gentleman would like to hear particulars."

The sergeant was a tall, fine looking fellow, with one eye in a patch and his left arm in a sling. At my invitation he got himself on the outside of some commissary whiskey, and then briefly told his little story about as follows:

"Jim tailed on to our left flank just afore we made our first charge, and I told him to go back to the wagons; he hadn't any business there. But he allowed he was the sword of the Lord and Gideon, and was jest goin' in. I must say he fought like the devil. It was encouraging to see the way he went in, with the old musket

clubbed, and he didn't get a scratch on the first charge. Second time he wasn't so lucky. We were on the run, within fifty yards of the battery, when a shell busted right in front of us. Me and four others went down mighty quick. Two of the boys was killed; one had a leg broke and we left him. I got my arm tore and an eye badly hurt, and Jim, the darky—worst sight I saw that day. Piece of shell took him in the face and scattered wool, skull and brains all over us."

[THE END.]

### At Anchor.

I am going a journey, brother. Or, would it be better to say,  
I am just ending up a long voyage, and dropping my keedge in the bay.  
Coming home, and in debt to the purser, with never a dollar to pay.  
Six decades. 'Twas a wearisome voyage, made over a mystical sea,  
In a poorly rigged, plebeian lugger, that always was drifting a-lee;  
And where are the lofty square-riggers that started the voyage with me?  
They passed me far up to the windward, with stunsails aloft and alow,  
Some heading for tropical islands, some bound for the islands of snow.  
And where are the weatherly clippers, the merchants delighted to know?  
Some drowsily swing to their anchors, as the meandering tides go by;  
Some battle in frozen oceans, where the northerly gales are high;  
Some drift in the seething tropics, with keels upturned to the sky.  
Oh, grand is the lofty clipper, as she dashes the yeasty brine  
From the crest of the midnight billow, where the waters flash and shine.  
But I love the plebeian lugger—the little lugger is mine.  
And lofty clipper or lugger, it comes to the same at last,  
Or whether we count as wreckage, or hold to our moorings fast,  
When we swing to a final anchor, and the voyage of life is past.

—From "Forest Runes," by "Nessmuk."

### Hens That Hatch Fish.

As is generally known, a big quantity of fish spawn is annually lost. To avoid this, fish rearers in China, says the Scotsman, carefully collect spawn from the surface of the water, and when they have secured a sufficient quantity, they take a number of hens' eggs, the contents of which have been carefully emptied through a small aperture, and refill the shells with the spawn. The holes are then sealed up, and the eggs put under broody hens. The hens are allowed to incubate the eggs for a certain number of days, when the eggs are again broken and their contents put into water that has been previously warmed by the sun. In a very short space of time the spawn hatches, and the young fry are then kept in pure fresh water until they attain a sufficient size to be put into the ponds containing older fish. The Chinese have long understood all the intricacies of incubation, and were among the first to use incubators for the hatching of hen eggs, long before such machines were made in this country. At one time a considerable business was done in this style of spawn hatching.

# The Land of the Pleasant Sunrise

By ROBERT PAGE LINCOLN

THE call of the outdoor world is never so strong as in the early summer or late spring, when the earth has universally caught the spirit of resurrection and spends every sunshiny day at its command to fill the cup of goodness to overflowing. Leaving the staid old winter to its own unfathomable dreams and unpromise, the return of the mystic season of warmth and cheer is felt by everyone; there is an inspiration in everything one may turn to; there is a breadth and view and fullness of expression in every movement of the transcending nature. Those who are able to leave behind them their business worries and cares, and hie away to the sequestered places now for a month or so, are indeed fortunate, I may say,

would find me belittling this feature of the great American pastime. You will name far away places, but I well remember that I have written on and experienced the glories of near-to-home camping, so I know a little something about it. But there is a class of people who are able to take their vacations in other parts of the country sufficiently far from home that they deem themselves in primeval grounds. I will not try to tell you how these people are able to do this. There are a number who are not so very well off, as far as the money question is concerned, who become reckless and have recognized, as I have recognized, that giving to yourself all there is in it as a gift—make a stake and then blow it on yourself. If this stake is used to good

ONE OF MANY STREAMS TEEMING WITH FIGHTERS.

doubly fortunate. When we remember just for one minute that there are thousands upon thousands who never have a vacation of the true sort, much less in summer than in winter, even of one week or two weeks, we who are able to take a sojourn into the quiet spots should count ourselves kings. A little rumination on this vividly emphasized fact should make it possible for you to enjoy your liberal lease all the more; a tour of the woods, a tent by some lake, where one might rest and recuperate, fish and idle to the fullest limit of contentment—such pleasures as these are for kings, and not for everyone to gain by.

To the average man vacation in the outdoor world means the taking of a tent to some neighboring lake and setting it up in some quiet and secluded spot, his companions the trees; or it may be that he is so fortunate as to have a wife and a child. Such vacations as these are wonderfully appealing, and far be it from that you

effect, your body will gain and not be trampled over.

I will not tell you how the majority of those who take the train and some time later find themselves in ideal country made their money; it does not matter. To such as are able to get away, outdoor pilgrims, reckless single men and others with some outdoor bug or another on the brain, I am here to drop in a word regarding the wonderful beauty and the countless opportunities that lie in wait for one in the country directly to the north of us—Canada and Ontario especially. You have heard of Ontario, and I charge you to tell me for what Ontario is famous. Her outdoor aspect, of course. You mention Ontario, and directly you see a land of clear blue skies, a thousand sparkling lakes, crashing streams, big forests, and the many other things that the Creator endowed this blessed country with. Ontario is an outdoor kingdom—the true king-

dom of God, whether this personage be abstract or concrete. My God is not a God of written creeds, you know. I am nothing, if not plain in my edict; my God is a God where the giant mountains tower toward the sun, losing their peaks in floating mists and mellowed sunshine; where the great pines pierce the atmosphere and stand there like immortal sentinels, guarding intrinsic treasures; where water-falls crash, and where the fish lie fanning the clearest of water; where the sky looks down into transparent lakes and forgets itself in a rapt reverie, startled by its own likeness; where there are no rumbling wagons, drays, automobiles, cars, smoke, dust, commercialized humans, frozen smiles, mocking voices—out where everything is free and still, so still that you can stand in those great aisles and drop a pin and hear it fall upon the tender carpeted earth. In such places I am brought face to face with nature God. In such a place I hear the immortal voices, and the call is strong within me for striving for the greater things in life; it is only there you will realize the bigger ideals.

The great wilderness territory of the past has been drowned by the tides of civilization; further and further into those blessed aisles of the forest man has intruded with his methods and mechanical devices, his improved methods of making the land yield its utmost in one thing or another—and I presume it must be so, for there is no stopping the great, great reaching out for power and supremacy. These factors level the forests, uproot nature and her immortality and plant cabbages where once the mighty pine held sway. To the set of people on one side of the fence this looks highly encouraging, I presume. To the lovers of nature this looks about as much the opposite as anything in the world could. I never see a tree chopped down without feeling a sense of the greatest sorrow; the biting ax-blade sneers me into insignificance, the plow-share contemptuously turns the furrows in my face. So much to the nature lover is just memory upon memory, what was at one time and what hints one may have of her before the final curtain is drawn. To such of you as love nature and have the wherewithal to see such a place, you will find it in Ontario. This is the last big primeval ground to which the people of the East might look, and the eyes of many a nature lover is yearly fixed upon this region. Take Algonquin National Park, for instance; this is the pride of Canada. Had Canada nothing else behind it but Algonquin National Park, it would be sufficient to put it on the map for all time. God grant that this last great wilderness be conserved and allowed to remain as it is, unstained by the bitter commercial spirit and guarded and "pampered," to safe-guard its survival. And I think this region will remain as it is—a bright spot on the map of Canada, to which lovers of nature might turn with confidence and hope.

Algonquin National Park contains in the neighborhood of two million acres of almost complete wilderness, a land of numerous lakes and streams, where the fisherman, canoeist and the camper revel in opportunities untold. To either of the three there is an abundance of territory to choose from—a virgin country and one of the few left in the world to-day—where one is assured of the best and nothing else.

There is also a fullness and completeness benignly associated with it, and a summer spent in Algonquin is a summer well spent.

Tapped on the south by the Grand Trunk Railroad, one finds that it is easy to start out from this point and hit for the interior without any inconvenience whatsoever. The railroad, until it was built to enter this region, was the missing link. Now the chain is complete and the years to come will witness the putting of Algonquin National Park on the list to stay. As year by year goes on, its popularity must become more and more pronounced, for with its magnificent outlay of virgin forest land, inimitable lakes and picturesque streams, it yields to the ardent lover of the big, vast, unconquered earth a hint of how close one is able to get to God and still remain in human flesh and blood. Truly a region of plenty. Here one may revel in the fruit of the out-of-doors and

OUR PERMANENT CAMP.

the fullness thereof. Here you will be able to regain your lost youth and your strength, if you have worn your body out on the grindstone of commercialism, and realizing the emptiness of your life, have chosen the long, long trail as the means of resurrecting the vigor and health everyone worships before. This sounds like a railroad advertisement, does it not? Well, it is a scheme to separate you from your home and loved ones, which may be your blessed cartwheels. It is the indissoluble fact. I come to put you next. I am the guy with one foot in heaven and one on good solid earth, and I am jealous of the fact that some sneering wrath, actuated by human thought and action, would say, "Now where is your wilderness?"

I have come to tell you it is right to the northward, and if you ever come to go there, you will find out how true is every word I have used. This is the home of the good old pugnacious black bass—"inch for inch the gamest fish that swims." If you belong to the clan who yearly paste the lily-pads with frogs and various and sundry artificial baits, then let your mind rest long and lovingly upon this region, the lakes of which teem with an abundance of the right sort—fish that are worthy of being called "inch for inch the gamest fish that swims."

I have taken quite a number of black bass in my day. Black bass have been my specialty for years, and I have studied, fished and lived with the critter, and I flatter myself to say that in outfitting for bass I could give you some valuable pointers; but this is not pre-eminently an outfitting article. As I say, you will find the true black bass here with some dash and vim in every atom from tail to tip of the nose. None of the sluggish fellows you are used to calling bass which lay drowsing away in half stagnant waters, but bass alive and alert and born fighters; the water is always cold, and that is the infinite reason they are different. The water is transparent to such an extent that you can bend over the edge of the boat and see the bottom as clearly as though it were but a few feet down. Such water as this one is able to call water without being assaulted.

The brook trout found in Algonquin Park are certainly some of the finest in this country; in the lakes they will run up to four and five pounds in weight, though the general run is, of course, far smaller, to create a set average. They are well turned, and live up to the name of being one of the most beautiful and poetic fishes that swim. They are caught by trolling with spoon hooks, with minnows, still-fishing, and with flies, casting. The salmon trout taken here run up to fifteen pounds in weight and are notable for the gameness they show. The angler who gets a salmon trout on the end of his line is certain of a tussle and no end of excitement.

It is hereby made note of that there are two hotels in the park, for the accommodation of such tourists, or outers, not inclined to tap the region further in by means of canoe, camping or fishing, and one has but to be there once to realize the completeness of it, and the courtesy and good-will manifest will bare the fact that this is a place where you can live, leaving hide-bound conventionality behind. "Live in comfort and let style take care of itself," is the motto. All seem to live up to it.

You will find here stores where you are able to outfit for your trip inland; there is nothing you desire in the line of an outfit that is not there. Canoes, tents, clothing, fishing paraphernalia, supplies, etc., are procurable upon a moment's notice; so if you think of going there and do not want to ship an outfit you are able to get things there almost as cheap, some things cheaper, and you will be assured of the best, remember that. Shipping an outfit to the starting point is one thing and to get it right at the spot is another. The man who has tried it will know that a whole lot of bother is saved by choosing the latter course.

For the nature lover who is in search of variety, who is a student of the ways of the wild animals and birds, who finds rapture in adding to his store of experience as a wood-crafter, and who has a penchant for taking pictures, I certainly would recommend this section of the land. For the simple reason that it is what you might call primeval grounds; you have it here seemingly the same as when the Creator left it "on the seventh day"—to add a phrase from the written creeds. When you get the picture of an animal here, it is one of innocence and charm depicted in every feature—no self-conscious and shrinking types brought on by the intrusion of man, but the nobility of

the world of nature, amply illustrated. There is an abundance of deer, moose and caribou within the confines of the reserve, and night flashlight pictures have been taken time and time again here by well-known artists of the camera school. This being an era of photography, no person should enter this region without a picture machine of some sort, for one will be amply repaid, since there is nothing in the world that will equal a story told in photographs—the mute film depicts as no human tongue can serve to depict every gloried sensation the trip made possible.

The birds found here are many and varied, among them being the ivory-billed woodpecker, the cardinal, the hermit-thrush, the merganser duck, the eagle, the golden pheasant and a multitude of other songbirds. All these serve to keep the bird lover in touch with the infinite. The Government of Canada is introducing into the park all varieties of well known, and almost extinct birds, for it is realized that with such a magnificent place wherein to breed, the opportunities for the future are manifold, if a little care and concentration is taken in the beginning. A bird named the capercailzie has been introduced from Norway to the park. This bird is a species of the grouse family, and it is said it is certain to live and become abundant there.

Beside there being found deer, moose and caribou in the park, there are also black bear and any number of beaver, the latter being protected, and which has multiplied to such an extent that rivers have been dammed over and rangers have been forced to trap some of them off to keep the population in trim and at a more reasonable average. It is also noted that there are any number of wolves in the park. One ranger trapped and poisoned in the neighborhood of fifty-three the winter of 1911.

Nor is this park entirely a summer resort. It has become associated so closely with the pastimes of summer that anything else may seem out of place, but the fact remains that many are enjoying Algonquin in the winter with as much fervor as the summer brings on. Rugged old King Winter is a gallant soul, but he woos you pretty vigorously; if you are of the right grain, he holds for you a treasure store of wealth and beauty the languid summer never could impart to you. Snowshoeing fills in many odd nooks for the person who would greet winter in the right spirit, but one must brave the battalions of the north with a smile and not a curse. Undoubtedly there are many enjoying Algonquin in the winter and finding there something life withholds for those of a more tender ilk.

Such an immense tract as that furnished by the Algonquin National Park offers within its limits about all that the man of outdoor tendencies desires; but its twin brother, the Temagami Forest Reserve, has become so famous that a word about it here would not be amiss. Formerly access to this reserve was a matter of more or less difficulty, but the building of a railroad into the heart of it banished this undesirable feature, and now, if one cares to enjoy the wonders of Temagami, he can do so without the great difficulty of the past. Within the boundary lines of this famed region the angler, camper, canoeist and nature lover will find the out-of-doors complete in every respect—there is nothing he need wish for and find

lacking. This is a region written of in prose and in song by some of the brightest lights in the literary world, idealized by the redmen who lived in that fabled region, and remembered by all who have been within its confines as one of the most enchanted spots in all the world.

The reserve is practically an entire wilderness and contains something like 5,900 square miles of forest and water. The lake itself contains about 100 square miles of water, has about 1,400 islands dotting its sparkling surface and over 3,000 miles of shore line. The hills of this region are of solid rock—no opportunity for the sneering man who would deride you for mentioning that there are still places where man has not intruded. This region was evidently meant by the Creator as a place where the work-worn and unhealthy could come and recuperate in peace—away from the sound of whistle and automobile horn, away from the

GETTING A BITE.

clash and clangor. It is the playground triumphant, the paradise of the outdoor man.

Crystal Temagami—peerless Temagami—the land of summer charm and fulfillment. One could sit by those shores and write forever, and still have something to say of its manifold wonders, and its blessed opportunities. The encroaching of civilization has left this spot unharmed; it will always remain as it is, to invite and bring joy to the hearts of untold generations, for it is immortal.

In speaking of this region one is called upon to use superlatives; one cannot think of it without uttering melodious adverbs, adjectives or phrases, for the simple reason it is complete. This would make a kingdom for the lumberman, but the ax is withheld. Through those solemn aisles will ring no ax-blades, only the wind stirring those funereal tops into beaded music, the morning to lend its benediction and the lowering shadows to call forth the vesper. Hill upon hill, blue water on blue water, and green upon green—it is nature in her unstinted magnificence, revealed in an unspoiled wilderness and open to the care-worn and jaded. Yet do not think for one minute that accommodations are lacking. The accommodation is of the best and a credit of no mean order. A fleet of steamers ply from place to place, on their route being three splendid hotels with all up-to-date propensities and modern improvements

to satisfy the most exacting nature. It is a region of charm untold—the revel of the canoeist, angler and camper.

The climate is of such an order as to furnish clear, warm days and invigorating, cool nights. It is a geological wonder; the air is light and has not the pressure so often found in the climatic atmosphere in the States. The water of the lake is of the most transparent clearness one could imagine, and the bottom is either rocky or is formed of sand—there is no mud and other disagreeable features one cannot but couple with our lakes in the States. As a canoe glides over those shimmering reaches you may gently lean over and gaze down, down into the water, to the depth of thirty feet, and see the rotund fishes idly moving along the watery trails, content and sleek. It is a charmed picture, once beheld, always remembered.

A scribe in speaking of the dry, clear atmosphere, has said:

"The writer has frequently carried on conversation with people camped on an island a full mile away. To appreciate this, measure off in your mind a mile from where you sit, and imagine shouting to and being heard by a person sitting at the other end of that mile. This is wireless telegraphy without sending or receiving instrument, except the ears and the throats of two lusty campers. In the still, clear Temagami evenings the weird cry of the solitary loon, the sharp yelp of the questing wolf, the hoarse bellow of the angry bull-moose come over the quiet waters, mingled with the incessant bark of the Indian dogs, the lightsome laugh of some care-free tourist, and the dip, dip of some belated paddle. Everywhere in Temagami is the echo rock. Anywhere between the islands you can get as many as six distinct echoes. Some August nights, when the moon is sailing between fleecy clouds, and the planets shine like points of light in the crystal depths below your canoe, let a clear baritone voice roll over the waters, and you might think the gods themselves had awakened and that every rock and islet was the home of some musical spirit, voicing the theme of the night in silver song."

It is in such places as these that we learn to love nature in her various moods; nature gay, always, the strength and ruggedness showing in every feature, and the superb grandeur making this part of her the home of a great peace. You will find many of your kind here in the summertime; you will find their tents here and there showing white against the background of blue or black; you will hear their voices, see their craft upon the inimitable waters, and at night witness the gleam of their fires. But one will travel sometimes for weeks without sight or sign of human presence. If you are seeking utter wilderness, you will find it here. The revel of the canoeist, truly!

There are bays and inlets without number; quiet places where the ghostly canoe will tinklingly part the waters and creep forward like an apparition from the deep. There are hours of reverence; the beauty of nature personified. By all means, remember Temagami if your vacation takes you to the land of the North.

In changing address, the old as well as the new should be given.

# The Behavior of Surf Lines

First Paper

By SWITCH REEL

**T**HE choice of line for the best work in surf tournament casting is an easy matter. It is apparent at once that the most suitable line is the smallest in caliber, the smoothest and the lightest. When the casting is done over water, a line in which the sizing has been well worked out gives the best results, but since accurate measuring is impossible in casting over water, and sometimes for reasons of convenience, many surf-casting contests are held on grass courts.

In the latter class of work a well-sized line cast dry is by far the best line. Unless a line

an effort is to moisten only a few of the outer layers of the line, the degree of moisture rapidly decreasing beyond the first layer.

Even though the sea or other body of water be conveniently handy to permit a thorough wetting of the entire cast, it is clear that the slight advantage gained in dispensing with the thumb-stall is lost after the first cast because the line is half dry by the time it is rewound upon the reel. Although a half dry line can probably be thumbed with the bare thumb, yet every surf-caster knows how dangerous it is to put "shoulder" into a cast when the line is in

The necessity for the delicate thumbing of the heavy line toward the end of the cast is due to the drag of the line on the flying sinker. After the sinker has reached the highest point in its trajectory, its downward course is rendered more abrupt with a heavy line behind it than it would be with a light line.

This failure of the sinker to maintain the speed of its forward progress is what renders delicately increasing thumb pressure necessary at the reel. And it is also the justification for the wet line argument.

One point upon which the exponents of the wet line must agree with their opponents is that it is next to impossible to keep the line wet enough for good results after the first or second cast without going over to the lake for another soaking.

Right here, then, let us consider the behavior of the lines in their flight behind a well cast sinker. First, there is a rapidly moving weight of lead imparting something of rigidity in motion or tension to the line following. Second, a rapidly revolving reel, whose tendency is to deliver line faster than the lead takes it, and thus destroy the rigidity of the line, must be checked to just the right point. And, third, a tendency of the line moving forward to fall. This tendency is probably proportionate to the weight of the line into its rigidity in motion, if that expression may be permitted. Stiffness is hardly the term, but a condition of the moving line exists similar to that which maintains a bicycle upright as it moves forward.

Now, let us imagine the caster, having put his power into the lead, standing at the casting point, thumbing his reel. The line we will say is a 21 special, and he has imparted a little extra weight to it by wetting it. If his thumbing is correct, he is just controlling the reel and not retarding the sinker. But the weight factor in the line causes it to fall away from the trajectory of the lead. Thus a certain area of line, equal to its diameter multiplied by the length of its fall at any given instant, is acting as a drag or retarding influence on the sinker at that instant. This causes a loss of speed in the sinker which in turn means a loss of rigidity in the line, which in its turn permits a greater fall from the trajectory, and so occurs a progressive slackening of speed in the lead, and its somewhat abrupt drop after it has reached the highest point in its flight when the wet line-caster gets in his delicate work on the reel with his unprotected thumb.

Now, let us drag the forty-pound striper through this state of affairs and see if we can't improve things a little. Here is the big fact. The casters of dry nine-thread line have found that they can remove their thumbs entirely from the reel when the lead has reached the highest point in its flight, so that the thumb-stall is not interfering during the finish of the cast. But it is there to prevent a blister when the thumb is jammed down good and hard as the lead hits the ground.

THE SURF CASTER.

is particularly smooth, its minute projecting threads add perceptibly to the air resistance and may easily rob a long cast of one or two feet. Some casters argue that as the fisherman's line is constantly wet, and that as delicate thumbing is only possible with an unprotected thumb on a wet line, therefore, the line should be wet down well in casting on the turf.

There are holes in this argument large enough to haul a forty-pound striper through if it be carefully examined.

In the first place it is impossible to thoroughly wet a line wound on a reel by squeezing a few spongefuls of water on it, or by holding the reel under a tap. The result of such

a sticky, half dry state. An "over-run" and a "back-lash" with the possibility of parting the line are all too frequently the result.

It is a noticeable fact that the advocates of the wet line, in casting over the turf, speak from experience based entirely upon the use of the heavier lines, such as 15 regular and 21 special.

In so far as such lines are concerned, their position is good. The delicate thumbing toward the end of a long cast with a heavy line is best performed with the bare thumb, while to cast a dry line without a thumb-stall or other protection means a big blister and no more casting for a couple of weeks.

## The Muskoxen

Go through the previous study with a dry nine-thread line substituted for the wet 21 special. In the first place, there is a reduction in weight, consequently a greater speed, which means more rigidity and less fall from the trajectory. Its smaller caliber means less drag on the lead, consequently less abruptness in the downward journey. The thumb-stall has been doing yeoman work early in the cast, but the pressure has been lightening until the speed of the reel just equals that of the sinker and the thumb is no longer touching.

Modified by the influence of the wind, this ideal can be reached by any one who will devote a little time to study and practice. It would seem that one glimpse of the nine-thread line hanging for an instant high in the air as the lead strikes the earth, and then crumpling and sinking slowly downward, should be enough to convert the last advocate of the wet line to the dry.

The prophetic eye perceives, stepping to the casting point, a contestant with a dry nine-thread line. His rod is powerful, tried and true, an American surf rod. His reel oiled and adjusted to a hair. A light air is blowing on his back. All the conditions are in his favor, as he measures with his eye the length of line from tip to sinker. Carefully he throws the switch on his reel and takes a long reach backward. Then, swinging the power of every muscle in legs, hips, back, shoulders, arms and wrists in succession, into that rod as it moves forward, he sends through it a wave of force, which terminates in a pronounced "whip" as it reaches the tip, and away goes the lead. A hundred, two hundred, three hundred feet—will it never stop? The measurers turn and run toward the back of the lot as it passes them. One of them throws his hat into the air. Excitedly, they measure back to the 300-foot line. They announce the cast is 350 feet, and a great shout breaks out as it is realized that the world's record has come to America.

"Fine!" say the wet line casters. "Why don't you do it?"

"Somebody will do it," reply the dry line fellows, "but perhaps he is still losing chances with a wet line."

### Shooting in British Columbia.

VANCOUVER, B. C., May 1.—*Editor Forest and Stream:* I beg to acknowledge receipt of your letter of the 19th ult., and note that you are contemplating a hunting trip this fall.

I have no hesitation in advising you to go into the Cassiar District, where you are quite certain to obtain good sport—moose, caribou, sheep, goat and bear, and you will also have no difficulty in obtaining a reliable guide and equipage.

I would suggest that you communicate with Messrs. Hyland and Belfrey, outfitters at Telegraph Creek, as they are in touch with all the guides and have always given satisfaction to sportsmen in making arrangements for them. They will also give you full information as to communications, etc., and prices for the trip.

If you have not the time to spare to go into the Cassiar, you could take a shorter trip in the Lillooet District, where you would be certain to get good sheep and mule deer.

A. BRYAN WILLIAMS,  
Provincial Game Warden.

PERHAPS no naturalist has done so much to throw light on the larger, hoofed game of North America as Dr. J. A. Allen, of the American Museum of Natural History. His monograph on the American Bison, Recent and Extinct, is the final word on this group. He has written much on the wild sheep of America, and recently has published as one of the Memoirs of the American Museum of Natural History a large and interesting quarto volume on the muskoxen, dealing with their development and variations, and giving a systematic review of the muskox group, recent and extinct.

Of late years, since the Arctic regions came to be more and more frequently visited and crossed, much has been learned about the muskoxen, which were once scattered over northern North America, as well as northern Europe. They constitute a circumpolar group, formerly

forms; tells of the prospects of the extermination of the species, something of the methods of hunting it, and of the muskox in zoological gardens, of which New York probably has the largest representation of specimens. Following this is a description of fossil forms closely related to the muskox, an explanation of the eight beautiful plates, and of the 45 text figures, and a bibliography of the muskox, running from 1720 to 1912.

Although the muskox is a species of circumpolar distribution, and although its ancestors were distributed over the old world and the new, recent muskoxen are known only from North America and Greenland. Up to within a comparatively short time it was believed that the Mackenzie River was its westernmost limit, although as long ago as 1826 muskox remains were found in Alaska. Since that time abundant

MUSK-OX CALVES.

Photograph copyright by New York Zoological Society.

found, in one form or another, as far south as the Ohio River, Arkansas and New Mexico in the new world, and France, Germany and Austria in the old. Of recent material, the American Museum of Natural History possesses nearly 140 specimens, and in other museums there is additional recent material, besides several so-called fossil forms.

Dr. Allen's paper opens with a discussion of the development of the horns, from the foetal stage to old age, of the teeth, skull, pelage and coloration. It considers individual variation, as indicated by the skull; gives tables of measurements and conclusions drawn from them, and has something to say about secondary sexual differentiation. The second part of the work, from page 157 to its close, page 226, is devoted to a systematic review of the muskox group, discussing its discovery, geographical distribution, relationships, and a comparison with certain fossil forms. He gives descriptions and the distribution of the existing recognized

remains have been found there, and recently Dr. R. M. Anderson and V. Stefansson brought back from Alaska accounts which seem to show that within forty or fifty years these animals ranged over the tundra of northern Alaska. Mr. Stefansson tells of a man who died near Cape Smythe (Point Barrow) who had seen live muskoxen in that neighborhood. He is supposed to have been born between 1845 and 1850. Another northern traveler, Frank Russell, quotes the natives at Point Barrow as saying that their fathers killed the muskoxen, which were then abundant. There is much more interesting material about the distribution of the muskox and its extinction within modern times from regions where once it was abundant.

The systematic position of the muskox has been much discussed by naturalists, none of whom had adequate material for the study of the species. This material, as already stated, Dr. Allen possesses, and he finds that the commonly accepted statement that the muskox is

intermediate between the cattle and the sheep is not founded on fact. The truth is that the nearest living relative of the muskox appears to be the American bison, though in certain respects—especially in the development of its horns—it resembles the Cape buffalo.

An extremely interesting point about this species is that although it has been supposed that it could not endure the climate of temperate regions, it nevertheless seems to be doing well in captivity in the park of the New York Zoological Society, where six specimens are now on exhibition. One of these is a female, now four years old; the other five, four males and one female, which are three years old. It is hoped that the muskoxen may breed in captivity. If this should happen it would be a fact of extraordinary interest.

The question of the extermination of the muskoxen, a form as unique as is the vanishing prong-horn antelope, merits careful consideration by the only government that can take up the matter—the Dominion of Canada. The species ought to be rigidly protected by law, and traffic in the skin of the muskoxen should either be absolutely forbidden, or so heavily penalized as to make it unprofitable.

Naturalists and big game hunters are to be congratulated on the appearance of this most interesting contribution to the literature of one of America's most peculiar mammals. The splendid paper, gotten out in the sumptuous style of all the productions of the American Museum of Natural History, is worthy of the great reputation of its author, and of the institution which publishes it.

Sometimes it is all for naught, and again from one to four foxes are driven to cover under the flag, surrounded by a wall of men two to four deep. Often the foxes are auctioned off to the highest bidders, the money paying for notices, or going to some worthy charity. No shooting is permitted, and dogs are tabooed except on chain and led by the owner. At times many rabbits and other game are seen, and the whole occasion is one of reunion, jollity and enjoyment to all.

Not strictly in accord with the heading of this article, but more lucrative to its devotees as well as more serious to the fox population, are two other methods of getting them and their valuable skins—i. e., trapping and snaring. Catching them in steel traps is quite an art, and requires more than casual knowledge of their habits to be successful, while the use of snares demands little skill, and knowledge only of best places to set them. A noose is made of fine, pliant copper wire, three or four strands, and hung where Sir Reynard is likely to pass, and when once he feels "the halter draw," he is more secure than a dog on chain. Much cruelty is occasioned by this method, the snares costing so little as compared with traps, that they are set in far larger numbers and over a greater territory, thus not being attended so frequently, and some are quite forgotten, while others are carelessly left at the end of the season to hold the unlucky victim until starvation ends his agony. Foxes are found in these snares with the skin nearly cut through, yet alive. The snarer usually drags behind him the carcass of some animal, a rabbit or muskrat from which the skin has been taken, when setting and attending his snares, and every fox that crosses this trail is likely to have enough curiosity to follow it.

Many dogs are caught in these snares, some to starve, while others are found by their owners and liberated. Some men have regretted their attempts to do kindness to a strange dog fast and angry in a copper wire snare. This winter a farmer missed his dog, and suspecting he might have been caught in a snare, hunted his woods over and found him as expected. He found also twenty-five snares and learned they had been set by a man from Massachusetts, who had them set for thirty miles from home in several directions, and some of the more distant ones attended by local trappers and boys on shares.

The first two classes of fox hunters named above, the fashionable set and lover of foxhound music, have the greatest contempt for the man who can descend so low as to kill a fox in cold blood with a shotgun, but then as Mark Twain remarked, "If it were not for a difference of opinion, there would be no horse racing."

The lover of shooting over dogs, whether his favorite game is the speedy, bustling quail, the booming, startling ruffed grouse, whistling woodcock or bounding rabbit, may contemplate with equanimity the enhancing values of fox skins and activity of the classes above described, for the sly reynard hunts when the ground is covered with snow to appease his or her hunger, and fully as hard in May and June when our game birds are nesting to satisfy the hunger of themselves and several whelps as well. Many a quail, grouse and rabbit is lifted from its nest of eggs or young to make a reynard's breakfast.

## The Many Phases of Taking Foxes

By E. P. ROBINSON

**N**OT every kind of hunting is conducted in as many various ways as is fox hunting. The society man and woman in fashionable attire, astride their well-bred hunters, follow the hounds o'er hill and dale, across brooks and ditches, over walls and fences, deeming the sport as great a social function as ball or reception.

The lover of fox hunting usually hunts in smaller parties, making not so much a horse race of the hunt as do the society people, but more of the hounds' work and music. He hunts sometimes at night, the music in the stillness

forts to get some sleep, and is likely to expose himself fatally.

Another kind of old-timer, instead of rifle will take with him a spade, or probably trust to borrowing one at a nearby farmhouse, and dig out the fox he has tracked to his burrow or den. One of my neighbors last winter got a fine fox in this way, and found evidence of his having eaten four ruffed grouse the night before.

Yet another method practiced largely in the Middle West is to get up fox drives, usually during February or March. Notice is given in

GATHERING FOR AN OHIO FOX HUNT.

being at its best. The actual catching of a fox is to him not important; in fact, if foxes are not plentiful, he thinks:

The fox that runs and gets away  
May furnish sport some other day.

The New England style of fox hunting in most common practice is for one or more hunters to follow the hound or hounds on foot, and when a fox is started to watch in some likely place and kill with coarse shot as he runs by. If he can find a fox's track not too old, he will follow it all day if necessary, and one shot usually is enough. The fox will grow more and more careless if repeatedly disturbed in his ef-

the local paper or by bills posted in conspicuous places that on a certain day a fox drive will take place, naming hour of starting, boundaries and field in which round-up is to take place. In the center of this field a few sticks of wood or some brush is placed, barely enough for a fox to hide in, and marked by a flag. The hunters, farmers for miles around and city lovers of excitement, gather at the boundary nearest to them and walk slowly in a direct line for the round-up, striking bushes, kicking brush piles, blowing horns, etc., to drive any fox unlucky enough to be within the boundaries toward the field selected for the finish of the

**Trout Season Two Weeks Early.**

SULLIVAN COUNTY, N. Y., May 13.—*Editor Forest and Stream:* Gather ye roses while ye may, for time is still a-flying" (or fleeting).

May has come in with a burst of heat, which if continued will shorten the period of best fishing for trout this season. The trout are in fine condition and fed freely from about 11 A. M. on the 1st of May, but each day is warmer, and there was a short rise at dusk last night; very unusual for early May. In the afternoon it was so warm that the fish were lazy and indifferent, but put up a good fight if they could be persuaded to rise. The streams have become so rapid of late years that at times the wet fly is very killing in good hands early in the season.

If I dared to forecast the weather I would advise anglers who can do so to visit their beloved streams as early as possible.

At the moment, indications point to dry, sunny days and falling waters. You remember the protracted heat in May two years ago, followed by rain and cool weather after the 9th of June? The flies out have been varied in size and color and of several species—ephemeridæ, perlidæ, caddis, etc., and I have not seen a really good rise, yet I know that there has been such for a short time. Of course, I speak only from observations confined to a few hours each day. If the trout flop at the floating fly or are not well hooked, try reducing the size. If one finds rising trout and they refuse or do not notice the fly on the cast, it may pay to spend a little time getting the color of the natural. To me this is most interesting and amusing. I spent two hours over half a dozen trout that were rising occasionally on Friday, and at last caught four of them. One wants only a few fish if he is near a stream. It is only on short trips that the angler wishes to kill a basket of trout.

THEODORE GORDON.

**Jewfish Kills Shark.**

A FIGHT to the death between a large oil shark and a monster jewfish took place off the Municipal Pier at Santa Monica, Cal., recently. Mackerel fishing was good and several schools swarmed in the waters near the pier.

Soon after the mackerel began to bite a large oil shark put in an appearance. Then a huge jewfish was seen and the battle was on. For thirty minutes the battle waged and then their struggles grew weaker and finally ceased.

A few minutes later the body of the shark was seen floating near the end of the pier dead. Later the jewfish, almost dead, was washed up on the sand near the pier. The jewfish measured about six feet in length. The shark measured more than seven feet.

IN changing address, the old as well as the new should be given.

**San Francisco Fly-Casting Club.**

SAN FRANCISCO, Cal.—*Editor Forest and Stream:* Herewith is a complete list of dates of contests for the season of 1913 as follows:

Saturdays.—March 29, April 12, April 26, May 10, May 24, June 7 (re-entry), Aug. 30, Sept. 13, Sept. 27, Oct. 11, Oct. 25, Nov. 8 (re-entry).

Sundays.—March 30, April 13, April 27, May 11, May 25, June 8 (re-entry), Aug. 31, Sept. 14, Sept. 28, Oct. 12, Oct. 26, Nov. 9 (re-entry).

## Notes from New Zealand

By DRUMMOND SHARPE

JUST at the time when anglers in older countries are looking forward to months of sport, the New Zealand fishing season is getting near its end; but we have received much to make us thankful, and have every reason to expect more of the same. The mid-season fishing has been first class right through, and the big migratory trout are now coming up from the sea, so there is good hope of record specimens. I have seen thirty-pounders—have seen them weighed, and tested the scales afterward—though, sad to say, they were not caught by any legitimate means. I think the bait employed in their capture was a rifle or spear, according to the manner of the back-blocks where they lived; but always in the last months of a New Zealand season, one goes down to a snow river, with an idea of some such prize as a reward for scientific effort. In a single year, the Pollock brothers landed six, weighing between twenty and thirty pounds each, from the Rangitata and Opihi; and at the present moment I am almost on speaking terms with four great fish, who have taken up a temporary home under a traffic bridge. Doubtless, after a long sojourn in the South Pacific, they want to see a little life.

The chief and important bar to a successful campaign against these big migratory trout, is their undesirable possession of a most capricious appetite. When they feed at all, it is usually at night, and though I never saw a New Zealand thermometer mark more than one degree below, even a half inch by scale of autumn frost is not conducive to an angler's comfort. I speak feelingly on the subject, for recently I stood in a river from dark to dawn, with a

result of several eight- or ten-pounders among the rest, and a vivid recollection of numbed fingers. Night fishing is an eerie chilly business, and the hour before dawn seems longer than all the others put in one. Horrible to relate, an evil black ten-pounder contained a tiny day-old kitten, which probably had been thrown into the river from a farm above. Here, perhaps, is a new "deadly bait," but no, perish the thought, I could not angle with a kitten.

Another curious incident occurred. A friend who fished with me hooked a trout, or thought he had, and this fish was supposed to be sulking obstinately near some willows; so, after a long time he gave me the rod, with many cautions to deal gently with his prize. Then he retired to warm himself upon the bank, and putting on a strong helping strain, something seemed to come toward me and then go back. It was a sullen sort of movement, but I was not prepared to say that it might not be an exceedingly big fish, and spent many moments in trying to make sure. Several times we managed to play the capture almost within stroke of gaff, but always it succeeded in escaping back under the branches, and my friend alternately was in a state of wild excitement and awful fear of losing his "record fish." Presently dawn came, by which time I had got rather more than three-quarters wet, in vain attempts to use the gaff, so I forded the river lower down and went around by the willows. There I found a cord attached to the eel basket that had given us this exciting sport; and in spite of all my friend said to the contrary, it was a good hard working basket of its kind, for besides our minnows, it had already trapped a couple of big eels.

Preparations for the deer stalking are proceeding apace, a number of hunters having already gone south to the Otago ranges. In each succeeding year stalkers are on the ground at an earlier date, and it is becoming usual to send a man on ahead to make a camp, as long as a month before it is likely to be wanted. Such a camp is supposed to give a right to the stalking over certain territory, and it would also follow that a man might occupy a favorite camping ground throughout the years; so in future a limit is to be set. Most New Zealanders might be very willing to undertake the job of seeing poor little old England through any little trouble with all the rest of the world; but among themselves, they have exceedingly definite ideas of equal rights, and on one occasion a match removed a standing camp from a district and led to ill feeling all round. However, this matter is to be regulated, and many fine heads are reported both in the northern and southern hills. Two exceptionally big stags exist on the Mākaroza run, where a twenty-pointer was shot a year ago. We are told that the ordinary shooting season will be opened for a month in various districts, and not at all in others. The different acclimatization societies will order this arrangement according to the quantity of game in their own part of the country. Licenses to shoot or trap opossums are being issued at a sovereign each. These animals have become extremely numerous, and are mischievous in orchards and gardens; now the trapper will take a hand.

I was shown a sale note for seventy skins at a price of about three dollars each—twelve shillings and sixpence—so it seems probable that New Zealand may soon develop a fur trade of its own kind.

### The Asbury Park Fishing Club.

THE seventh annual casting tournament of the Asbury Park Fishing Club will be held on Aug. 2, at the corner of Eighth and Park avenues, Asbury Park, N. J., from 8 A. M. to 6 P. M. The program follows:

Event No. 1.—The best average of five casts in a lane thirty feet in width with three-ounce lead for club members only.

Event No. 2.—The best average of five casts in a lane thirty feet in width with a four-ounce lead, for club members only.

Event No. 3.—Three casts at a stake 140 feet from the starting line, nearest cast recorded, for club members only.

Event No. 4.—The best average of five casts in a V-shaped court, said court to be thirty feet wide at 100 feet, 60 feet wide at 200 feet, and 90 feet wide at 300 feet; three or four-ounce lead, open to all.

Event No. 5.—The longest individual cast, five casts allowed each contestant, in open field; three or four-ounce lead, open to all.

Event No. 6.—The best average of five casts in open field, three or four-ounce lead, open event for ladies.

For further information apply to J. C. English, Chairman, 9 Embury avenue, Ocean Grove, N. J.

In changing address, the old as well as the new should be given.

**The Bass are Gettin' Wise.**

BY JOSEPH CAWTHORN.

I've thought it out for many days  
 And here's the way I size  
 The fishin' situation up—  
 The bass are gettin' wise.  
 Each man has got some theory  
 Why the fishin' is so poor.  
 "The seinin' in the rivers," or  
 "They hain't along the shore";  
 But all that talk is "moonshine";  
 No use to swear and cuss,  
 The whole thing in a nutshell is  
 The bass are on to us.  
 There's plenty of 'em out there  
 And just 'twixt me and you,  
 From the looks of Seger's bass list  
 They're goin' to stay there, too.  
 They say they're gettin' scarcer,  
 But put that talk in hock  
 For there's no one 'round these diggin's  
 That's depletin' of the stock.

And that don't happen often,  
 For a bass' strike, b'jove  
 Is just about as scarce  
 As draught beer in Ocean Grove.  
 The bass are gettin' wise, boys,  
 They've got it down so fine  
 They know we're on the beach before  
 We even wet a line.  
 Before a rigin' settles  
 They could tell, if they was asked,  
 The name, and age, and address  
 Of the man what made the cast.  
 You'd hear 'em say, "Look out, boys!  
 Jim Gentle's on the beach;  
 He's always on the job  
 So we'd best keep out of reach."  
 "And here's our o'd friend Scotty,  
 With his fierce, determined look,  
 I'll bet he'd tear our heads off  
 If he got us on his hook."  
 The bass all kind of snicker  
 When Jim Edge's bait appears:

He sells bait to all us "pinheads"  
 Then goes south and catches fish.  
 Now here's some good advice, boys,  
 Bear in mind it comes from he  
 Who's worn his right-hand thumb off  
 Easin' shedders out to sea.  
 Let's all go dig some sandbugs  
 For a shady bank we'll make  
 And we'll each take home a good big mess  
 Of catfish from the lake.

**North Shore Casting Club.**

CHICAGO, Ill., May 4.—*Editor Forest and Stream:* Jupiter Pluvius, our friend of three years, assisted us as usual in our opening event of the 1913 season (darn his hide, I wish he would cut us off of his visiting list), with a result that we had to cast in a gale of wind with occasional showers.

While the subjoined scores are not at all up to our usual standard, under the circumstances the work was good, and the salmon scores show that the National record will go by the board this season. We have set our mark for this season at 150 feet, and we will reach it without doubt.

The scores:

	½-ounce, Accuracy.	Accuracy, Fly.	Salmon Fly—Ft.

C. D. DORCHESTER, Sec'y-Treas.

JOSEPH CAWTHORN ON BEACH AT ASBURY PARK.

It stands to reason, don't it,  
 That a fish 'll live and learn  
 Just like any other critter?  
 I wouldn't give a dern  
 If old man Neptune stepped ashore,  
 I'd look him in the eyes,  
 And tell him to his whiskers  
 That the bass are gettin' wise.  
 It ust to be a striped bass 'ud  
 Come along our shore  
 And jump at every temptin'  
 Piece of shedder that he saw.  
 But now the varmint's foxy;  
 He snooks around instead.  
 And makes sure it isn't fastened  
 To a four-ounce chunk of lead.  
 Them fish that's swimmin' out there  
 Has seen their parents caught,  
 And pulled out through the breakers  
 No matter how they fought;  
 They've learned a lesson from it  
 And studied up the rules,  
 For fish have educations  
 That's why they go in schools.  
 If you saw your old father  
 Go to take a little bite,  
 Get yanked clear off his feet and pulled  
 Completely out of sight,  
 Do you reckon that you'd try it?  
 Well I'll bet you thirty cents  
 That you wouldn't—that's providin'  
 That of course you've got fish sense.  
 I s'pose that there is times  
 That a bass gets care'less-like  
 And grabs at somethin' temptin'  
 And then we get a strike.

He ain't helped thin their numbers  
 For many, many years.  
 And if Jim hooked a big one  
 He'd never see a fin;  
 For it's dollars to a doughnut  
 The bass 'ud pull him in.  
 They all know Billy Applegate—  
 Bass, kingfish, dog and skate;  
 Bill tears the whole durned beach up  
 When he slings in a bait.  
 Lloyd Marshall, Burton, Barto,  
 Rube Norris, Tom O'Brien—  
 As patient bunch of anglers  
 As ever heaved a line.  
 And dear old Captain Fenimore—  
 It seems I'd wa'k a mile  
 To watch him beach a striper  
 And then just see him smile.  
 There's ex-Mayor Charley Atkins,  
 A fisherman for fair,  
 And didn't Charley used to  
 Horse 'em in when he was mayor.  
 But that's before they learned so much  
 And got our ways down pat,  
 So Charley's long suit now is  
 Catchin' drum at Barnegat.  
 The bass have got us buffaloed  
 And at fishin' all us bucks  
 Have got as good a chance as  
 Charley Cook has shootin' ducks.  
 John Seger's got the right idea,  
 That old yarn fits him fine  
 'Bout the man that owned the restaurant  
 And went somewhere's else to dine.  
 Well, that's the way John dopes it,  
 Good luck to him I wish

**Tuxedo Fishing Notes.**

TUXEDO PARK, N. Y., May 10.—*Editor Forest and Stream:* The results of the first week's fishing at Tuxedo has given great promise of an unusually successful angling season. The trout fishing in the brooks is excellent, and nearly every member of the club has returned with overflowing creel. The hatch of flies on both stream and lake has been heavy and the fish seem gorged with insect life of various kinds.

At the club boat house, where the majority of fishing parties land, there has been recorded for the week, 170 ouananiche, 21 steelhead trout and 4 chinook salmon. As the steelheads have only just finished spawning by the last of April, they do not, as a rule, take hold to any extent until June, and last season most of the chinook salmon were taken during September. Silver soldiers, nickle, pearl and white enamel spoons, rigged with single hooks and baited with angle worms have all proved taking lures. Fly-fishing on the lake as yet has been rather slow, but with the next hatch of Ephemeridæ, good sport shall no doubt be enjoyed by those who love light tackle.

W. M. KEIL.

**The Salmon's Leap.**

A SALMON can leap to a height of 20 feet. This has been demonstrated by the Fishery Commissioners of Norway, who, by means of standards erected below waterfalls, have measured the leaps of this agile fish.—*Angler's News.*

Published Weekly by the  
 FOREST AND STREAM PUBLISHING COMPANY,  
 CHARLES OTIS, President.  
 W. G. BEECROFT, Secretary. W. J. GALLAGHER, Treasurer.  
 127 Franklin Street, New York.

**CORRESPONDENCE**—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

**SUBSCRIPTIONS:** \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

**ADVERTISEMENTS:** Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

Entered as second-class matter at the Post-Office, New York, N. Y.

**THE OBJECT OF THIS JOURNAL**  
 will be to studiously promote a healthful interest in outdoor recreation, and to cultivate a refined taste for natural objects.

—FOREST AND STREAM, Aug. 14, 1873.

#### A TAX ON CARTRIDGES.

We have received a letter from a gentleman at Tompkins Corners, N. Y., in which the writer sets forth that there should be "a Federal tax on cartridges." His argument is laid on unique lines. He says: "It is entirely possible and practicable, by a moderate tax, to lessen the wanton, purposeless shooting of small birds by village idlers and the conscienceless class of hunters generally." Apparently local observation has led our correspondent to his conclusion. However, taxes collected from the corner grocery bird destroyer would not pay the postage on Senator McLean's personal mail, much less help in paying expenses of enforcing the Weeks-McLean law.

The tax on cartridges would affect thousands of men who shoot at the traps—and to whom clay bird breaking is the principal recreation. To tax cartridges would mean the curtailing of one of the pleasantest recreations offered the young man of to-day—and he would be taxed to no purpose. He breaks clay targets at a cost of from one to three cents for each disc, harms no living thing any more than does the man who drives a golf ball about the golf links. Shall we tax the ball or the club? Just as reasonable to do this as to tax a man for cartridges with which to break clay targets. The shooter pays for a license to carry a gun, he pays for his shells, targets and club membership, after which he has arrived at a stage in his expense account when his shooting is almost prohibitive.

Add to this a tax to increase the cost of cartridges and he must give up a recreation that to him has become a tonic to brace him up after his week's work, a medicine his system demands as well as a most pleasurable sport. Our friend from up York State deserves a full meas-

ure of credit for protecting the birds, but he had better work along other lines. The village idler who can buy cartridges at their present price would find, perhaps, a little more trouble in raising the increase, but he would raise it at a cost to some of the neighbors, not to himself; whereas, the trapshooter, who uses from 100 to 300 shells a week, would pay the penalty for the village idler's depredation which, to say the least, is a burden in the wrong place. We would suggest calling attention of the local game warden, rather than the Federal Government, to the village loafer and his unlawful killings.

#### THE POINT OF VIEW.

AN article in this issue, "The Many Phases of Fox Hunting," dwells on the social degrees found among those who pursue the brush. The writer avers, and perhaps not without cause, that one class looks down upon or up to the other as lacking in the qualities of sportsmen, which shows clearly how entirely modern views of sport are founded on sentiment and custom than the widely differing ideas held about it in different parts of the world. Even the signification of the word is unfixed. Originally it seems to have meant to take pleasure in some active way. In America in the early days of the last century a sportsman was a professional gambler. Then a competition of some kind, especially one on which money was staked. Even to-day the New York tough, speaking of himself as a "dead game sport," means that he drinks, gambles, is ready—if necessary from his point of view—to commit murder. People who bet on horse races, play poker and sometimes drink to excess are apt rather proudly to call themselves "sporty."

In but these modern days sport, sportsman and sportsmanship have a somewhat different meaning from any of these, and refer chiefly to outdoor recreations, such as shooting, fishing, yachting, mountain climbing and canoeing, conducted in the best and most approved fashion, and after methods which call forth the more manly and higher qualities of the men and women who indulge in them.

With the primitive man, sport, as we use the term, did not exist. He killed game or fish in order to support life. The killing was his business, not his pleasure. It was work, not play. If he journeyed from one point to another, he wished to cover the ground between them as speedily as possible. Sport is an outgrowth of civilization—even of modern civilization—though the lust for blood, and the killing merely for the sake of killing, has always existed and still exists.

In this country the sports of the field at first were practiced chiefly in the Southern States, partly because the settlers there were more pleasure loving than the stern Puritans who settled in New England, and partly because the mild climate during the season when agricultural pursuits could not be carried on fostered the indulgence in shooting, fox hunting and fishing.

On the continent in Britain and in the United States, how different the definitions of this word. The Belgian or the Frenchman shoots larks and other birds, and proudly terms this "le sport"; the British wildfowler shoots at night, and in wild weather sculls his punt up close to the raft of sleeping ducks, and then

turns loose his cannon on them and proudly gathers the slain and shoots over such cripples as he can find; the New England fox hunter lying in wait behind a stone wall or in a fence corner shoots with a shotgun the fox which plays before his hounds; the Southern sportsman in headlong pursuit follows on horseback the pack that presses closely on reynard's heels. Are all these forms of recreation sport? Is any one of them? This must largely be a matter of custom, education, opinion. The Briton sneers as he speaks of the Frenchman's game; the American thinks the British punt shooter a murderer; contempt too deep for words is felt by the Southern fox hunter for him of the North.

#### NESSMUK.

HEREWITH we present the last instalment of the last article ever written, so far as we know, by George W. Sears. It has been an interesting narrative, and though there may be some resentful of the anti-slavery sentiment, it will not be fostered by those who knew Nessmuk or his work. The acquainted host never will question this great writer's spirit of fairness, for they know at least one of his predominant principles to have been "malice toward none, charity to all." In all his writings, particularly his best verse, which appears in book form under the title of "Forest Runes," flows a current of protection of birds, animals and natural resources and helpfulness to fellow-man. We illustrated the story with drawings taken from that great camper's manual, "Woodcraft," as this seemed to us to be something of Nessmuk's own; for while he didn't make the drawings, he personally saw to it that each was accurate and properly descriptive. We have tried to present his last work as he would have had it done, and we hope we have succeeded.

#### ANTI-CIGARETTE LAW.

It isn't reasonable to suppose that sons of sportsmen smoke cigarettes, nor do we presume that so long as there was a good gad on a nearby tree, a sportsman would allow his boy to suck on the paper-covered weed; nevertheless, for the boy's sake and for the sake of his less fortunate brother whose father is not a sportsman, it is better that temptation be not put into his way. Pennsylvania legislators have seen to it that sonny shall not puff the iniquitous, seductive lung destroyer by passing a law prohibiting the sale of cigarettes to minors. We congratulate the people of the Keystone State in their selection of legislators—at least in this instance.

#### COLONEL ACKLIN RETIRES.

AFTER ten years' efficient service as a State game warden of Tennessee, Hon. Joseph H. Acklin retires in favor of Hon. W. D. Houser. Tennessee has had many good things done in the way of game protective measures during Colonel Acklin's administration, for which his State owes him much thanks. We hope the new incumbent of this important office may have the sportsmen's support in carrying out the work of the Department of Game, Fish and Forestry of the State of Tennessee. Our best wishes to the new and the old game protector.

Forest and Stream is the official organ of the National Archery Association.

## Notes on Bow Making

By J. M. CHALLISS

**A**RCHERY as a pastime, either at the targets, or in pursuit of game, is sufficient unto itself, and yet it has an added pleasure for its devotees if they will manufacture their own gear. Professional bowyers have brought the art to a high degree of perfection, but the beauty, symmetry and perfection of a Barnes product need not discourage one who has a fair degree of proficiency in using wood-working tools. It is for the purpose of possibly aiding those who have the courage to try that the following observations of an amateur, based on actual experience, are given.

The selection of the material from which to make the bow is, of course, the first step. In works upon the subject it is generally stated that bows are made of "yew, washaba or lance." That statement generally is sufficient to put an end to further inquiry or progress. The Century Dictionary does not even define "washaba." If you are able to secure these expensive imported woods, well and good, but as a rule, they are not to be procured outside of the large cities. This is not to be regretted, however, as there are at hand many American woods from which excellent bows may be made. Chief among these, and, in fact, as good as can be procured anywhere, is the Oregon yew. It is with this native wood that Barnes has attained an international reputation as a bowyer. But yew is not on the market, and unless you live where you may gather it yourself—that is, in California, Oregon or Washington—it is not available for our purpose.

When we consider the nature of a bow, and the duty it has to perform, it is apparent that any wood which is sound and free from defects will make a bow. Its quality and durability will depend upon what wood has been selected. The wood most commonly used for boys' bows is hickory, and many a graybeard will extoll at length the virtues of such a bow, when, as a matter of fact, it is about as unsuitable for use in making a self bow as any wood that may be selected. After use, hickory seems to lose its cast, due to the fibre of the wood becoming crushed in the belly of the bow. In use there is a severe crushing or pressing strain put on the belly of the bow, while the tendency is to pull or stretch the fibers of the back. Hickory will stand this pulling and stretching, but fails when it comes to the crushing test. Bow-makers take advantage of this characteristic of hickory in using it for the backs of backed bows, and none, outside of yew, makes a better back.

If you have access to growing timber, you may select your bow wood from a large number of native trees at hand. If, unfortunately,

you live in the city, you may be forced to search through the lumber yard or wagon shop and be content with old and brash wood, which in all probability will be kiln dried, and consequently ruined. Select a sapling or young tree of from three to five inches in diameter, the trunk of which is straight and free from knots and limbs. In making your selection you can take either mulberry, black locust, sassafras, black walnut, osage orange, rock elm, ash, hemlock, dogwood, redbud, southern cedar, and if nothing better is found, hickory. This list is not exhaustive. Experiment and you may find a better wood than any of them. Good bows have been made from all named. When you have selected your tree, cut a piece from the trunk at least six feet and three inches long, and remove the bark from same. Saw the trunk lengthwise through the middle, and if you have selected a tree large enough you can saw each half through to make a bow. You will find that there is a marked difference between the sap and heart of the wood, both in looks and quality, and we take advantage of this fact later on.

Before proceeding further, it will be necessary to season the wood. Aldred, the English bowyer, seasons his wood five years, but we will take a shorter cut and get some results, though not so good. The sticks should be immersed in the bed of a running stream, and weighted to keep them under the water and left there from two to six weeks, depending upon the nature of the wood and its size. A wood with close, compact grain will require more time than one more open and porous. The theory of this method of seasoning—and it is proven in practice—is that the sap of the wood is supplanted by the water, and when the water is subsequently driven out, the grain of the wood is left tough and elastic rather than dry and brittle, as would be the case if the wood was allowed to season in the air. This is shown by the fact that kiln-dried timber is almost invariably brash and liable to fracture upon the slightest strain. If it is impossible to secure a stream to immerse your sticks in they may be soaked in a cistern or tank; the running water simply accelerates the elimination of the sap. After the sticks have soaked a sufficient length of time they should be taken from the water, wiped dry and placed in the shade for a week and then hung up over the kitchen range for another week for final seasoning. They are still far from being thoroughly seasoned, but they will do to experiment with.

The strength, and consequently the casting power of a bow is determined by the number of pounds it is necessary to pull upon the string in order to pull it back the full length of

the arrow, and is referred to as the weight of the bow. This statement, as far as the casting power of a bow is concerned, is only partially true, as some bow woods are much quicker than others, and with two bows of equal weight, but made of different woods, one is liable to have a further cast than the other. It is this quickness of cast that makes yew so valuable; not this alone, however, as snakewood has a quicker cast, but is rejected by veteran archers on account of its being heavy in the hand, liability to jar and fragility. The weight of the bow is determined by its length, the amount of material left in it and the quality of the wood. The hard, dense woods, such as ash, hickory and osage orange, will require less bulk than the softer woods, such as sassafras and cedar. A lance or osage orange bow one inch in diameter at its largest part will weigh sixty-five pounds, while a sassafras bow of the same size will weigh about twenty-five pounds. The shorter a bow of given size the more it will weigh. We cannot determine in advance just how large the finished bow will be, but will have to determine that by experiment and repeated trials, so a safe rule is to make your bow larger than you have reason to believe will be acceptable and then reduce it to the required weight.

For your first trial select your poorest stick to practice upon. If you are successful in the first instance you have in reserve a better stick, more thoroughly seasoned, and can make a better bow. After determining the length you want your bow, which for a man should be six feet, measure your stick and cut it to the exact length if it is your intention to use horn tips on the ends of the bow. If you are not going to use horn tips, but intend to cut notches in the bow itself to carry the string, the stick should be cut three inches longer than you want the finished bow. The sap of the wood is tough and elastic, so we must use it for the back, while the older and more dense heart wood is used for the belly or inside of the bow. Square up your stick along the edges with a drawing knife, so that it may be firmly held in the vise with the sap uppermost. In doing so you can shave it down, removing an equal amount from either side until it is  $1\frac{1}{4}$  inches wide, but do all of this work on the edges, not on the heart or sap of the stick. Right here we might as well say that the indispensable tools in bow making are a bench, vise and drawing knife. Desirable tools are a small plane, spoke shave, wood rasp, rat-tail file, scraper and sand paper; but the first three you must have, at least we require them. After squaring up your stick on the edges and planing the edges parallel and straight with the jack plane, place the stick in the vise, sap uppermost. Study the grain of the wood. The life and virtue of your bow will depend upon attention to these details. Does the grain run true, flat and even or does

it dip and thicken up in places? If it dips, does the same increased thickness show upon both sides of the stick? Now we must reduce this sap, so that we will leave a layer  $\frac{1}{8}$  to  $\frac{3}{16}$  of an inch in thickness along the back of our bow, and in doing so we must follow the grain of the wood as nearly as possible. Of course, any slight wave or depression we can ignore, and make our back practically level and flat; but if we encounter a pronounced bend or depression in the grain of the wood, we must follow it. In other words, a bow that has the grain of the wood "running out" or cut across on the back, will not last. The cheap lance and lemonwood bows are finished with the back perfectly smooth, while there will be found in the hands of expert archers yew bows costing as much as a hundred dollars, in which the back is far from straight, owing to the grain of the wood being followed in their making. However, the sides or edges of these are perfectly straight, as all bows must be, and when strung up and you look along the string toward the belly of the bow, the string is seen to divide the bow equally.

If the instructions above have been followed, you have a billet of wood that is straight with parallel sides  $1\frac{1}{4}$  inches apart and with a layer of sap along its entire length of about 3-16 of an inch thick, and the stick more or less rounding, depending upon the size of the original sapling. If this convexity is too pronounced, the back may be reduced along its center, so as to make it almost flat—that is, flat across the grain. Now measure your stick and find its center and mark it. From the center measure a point  $1\frac{1}{4}$  inches and mark that, and mark a point three inches below the center. Draw lines straight across the back through these last two points. With a chalk line pulled very taut, mark the center of the back from end to end, or rather from where you intend to have your nocks or notches for the string. At both ends of the stick make a mark 5-16 of an inch from either side of the chalk mark if you are using a heavy dense wood, and 1-16 of an inch more if you are using a lighter and more bulky wood. From these marks draw with a straight edge a line to the ends of the cross lines that you have made near the center of the stick, and which mark the handle. These lines are to guide you in reducing the sides of the stick, which you will proceed to do with the drawing knife and finish with the plane, leaving the sides at right angles with the plane of the back.

Now turn your stick on its side and mark a point  $\frac{5}{8}$  or  $\frac{3}{4}$  of an inch from the back at either end of the stick, and another point  $1\frac{1}{4}$  inches from the back at either end of the handle and connect these points with a line and reduce the belly as you did the sides. You may not be able to work your stick out in this square, tapered form, on account of having selected too small a sapling for the purpose, so that in place of having the advantage of lines actually drawn for your guidance on the sides you will have to approximate the lines with your eye. The main thing, however, are the lines on the back. You now have a stick that is  $\frac{5}{8}$  or  $\frac{3}{4}$  of an inch square at the ends and  $1\frac{1}{4}$  inches square at either end of the proposed handle. The handle—so far untouched—should be rounded on the inside, care being taken from now on that the back remains untouched. The handle should be noticeably larger than the finished limbs of

the bow. When the bow is fully drawn it should not bend, even the slightest, in the handle, for this reason we are compelled to leave more wood at this point.

The measurements we have been working to will in all probability produce a bow much stronger than we desire, especially if we have used hard wood, but we do this in order to leave enough wood in the handle—an important point. The handle should be no wider than the widest part of the limbs, but it should be, if possible, at least  $\frac{1}{4}$  inch deeper through from back to belly. A bow that bends in the hands is useless for any purpose, excepting to produce blisters and headaches. The squared and tapered stick should now be held in the vise  
(Continued on page 642.)

**Beechview Bon Air Match.**

PITTSBURGH, Pa., May 8.—*Editor Forest and Stream:* The scores of the Beechview Bon Air archers for Saturday, May 3, are as follows:

American round:					
W. J. Holmes.....	84	495	S. M. Stauffer.....	51	187
O. L. Hertig.....	83	423	J. S. Jes.....	71	398
Team round, 96 arrows, 60yds.:					
W. J. Holmes.....	95	517	S. M. Stauffer.....	47	171

Mr. Holmes' shooting is remarkable. He no doubt would have made a perfect hit score, had it not been for the breaking of his bow string near the middle of the round, which necessitated the use of a strange string. The Keystone team is to be congratulated on having such a good man as Mr. Holmes to help make up the firing line at Boston.

Thanks to a couple of substantial accident policies and prompt medical treatment, the writer, who suffered a severe injury to his left hand from a broken arrow, was able to negotiate a single American round just two weeks after the accident happened.

Aside from a little "gun shyness" and a feeling of unsteadiness in the left arm, the round was shot in comfort tempered with a feeling of thankfulness for so prompt a recovery.

O. L. HERTIG.

**Tournament Notice.**

Will each archer, who may by any possibility attend the national tournament at Boston this August, at once drop a postal to the secretary, expressing his or her preference whether the meeting shall be the 12th to the 15th or the 19th to the 22d of August? The committee is holding its decision awaiting the answers.

GEORGE PHILLIPS BRYANT,  
Secretary-Treasurer.

750 Tremont Building, Boston, Mass.

**Hussey, of Des Moines.**

CHICAGO, Ill., May 8.—*Editor Forest and Stream:* At the first tournament, held in Chicago in 1879, the Des Moines, Iowa, team was made up of Tac. Hussey, Geo. F. Henry, Charles A. Finkbine and Robert Fullerton.

And wonderful to relate, all are still living, and the first two named are still faithful archers.

Mr. Hussey is remembered by all the older archers with great respect and affection.

The following score made by him on May 3, and reported by Mrs. Helen Webb Turner, one of the good lady archers of Des Moines, is wonderful archery, when it is remembered that

he has reached the grand age of eighty-two years.

The score is reported by ends, so that it may be seen how steady the shooting was:

American round, 30 arrows at each, 60, 50 and 40yds.:			
60yds.	50yds.	40yds.	
6 30	6 34	6 34	
5 31	6 26	6 40	
6 32	6 40	6 44	
6 26	6 38	6 38	
6 28	6 36	6 40	
29 147	30 164	30 196=89 507	

Many an archer, half the age of "Tac.," would be proud to make such a score. And many archers of years of experience never have made so high a score.

This shooting might be used as an argument to show that archery was conducive to longevity.

E. J. Rendtorff has been a month out of the hospital, where he was confined with a severe case of pleuro-pneumonia. He is ready to believe that had it not been for archery, he would not now be where he is, and again making good scores.

The following good archery practice scores have recently been made by members of the Chicago Archery Club:

Double York round:				
100yds.	80yds.	60yds.	Total.	
Homer S. Taylor.....	50 218	33 133	23 121	106 472
	52 208	45 239	24 112	121 559
	102 426	78 372	47 233	227 1031
American round:				
60yds.	50yds.	40yds.	Total.	
Geo. L. Nichols.....	29 169	30 184	30 218	89 571
Team round, 96 arrows at 60yds.:				
E. J. Rendtorff.....	93 541			

**Revival of Archery**

Archery outfits are now in demand—lovers of the sport and "Country Clubs" are taking it up. Outfits supplied from \$5.00 upwards.

# YACHTING

Forest and Stream will give a weekly digest of Yachting and Motor Boating events from all over the country.

## Perry Centennial Regatta.

THE one hundredth anniversary of the battle of Lake Erie and of the beginning of peace between Canada and the United States will be commemorated on Lake Erie this summer by a ten weeks' celebration and the erection of a memorial in honor of Commodore Oliver Hazard Perry, the hero of 1813. The United States Government and nine of the States whose soldiers and sailors took part in the naval and land engagements in the famous campaign in the Northwest, have backed this big undertaking with appropriations of nearly \$1,000,000.

The Inter-Lake Yachting Association, composed of many active clubs, having nearly 5,000 individual members, and with a history of twenty-five years of annual regattas on Lake Erie, will have charge of the Perry Centennial Regatta, which includes all the aquatic sports in connection with the Perry Celebration of 1913.

The regatta will consist of sail yacht, power boat, aviation and other sports programs covering four periods of a week each, as below. The regatta will be held at Put-in-Bay, on Lake Erie. Numerous steamer lines from Detroit, Toledo, Sandusky, Port Clinton and Cleveland make daily trips to and from Put-in-Bay. Yachts can cruise to the Bay in a few hours from either of the ports named.

Put-in-Bay is an ideal location for this great regatta, with protected anchorages, good clean water, freedom from commercial shipping, good clear regatta courses, and fine viewpoints for thousands of spectators. All courses will be patrolled by U. S. Revenue Cutters, assisted by yachtsmen and naval militiamen during other sports week.

Sail yachts, July 20-27; \$5,000 prizes. Power boats, July 27-Aug. 2; \$5,000 prizes.

Aviation, week of Aug. 17-24: Hydroaeroplane and flying boat exhibitions and contests.

Other sports, week of Aug. 24-31: Canoe regatta for stock and racing canoes and sailing dinghies. Under rules of American Canoe Association.

Clubs and individuals may write for information regarding entries, rules, list of officials, reservations at hotels and full details to Other Sports Committee, Chas. D. Lynch, Chairman, 860 Lemcke Annex, Indianapolis, Ind.

## Yachts Change Hands.

THE Hollis Burgess Yacht Agency has sold the 53-foot motor boat Octalee VI., owned by E. H. Tarbell, of Boston, to Ingersoll Amory, of Boston, a member of the Eastern Y. C. Octalee VI. is one of the handsomest motor boats in Boston waters and was built last year by Britt Brothers, of Lynn, Mass., from designs of John Small. She is equipped with a 50 horsepower motor. Also the 41-foot motor boat Cynthia, formerly Doris B II., owned by Philip D. Campbell, of Kansas City, Mo., to G. K.

Benson, of New York; the 25-foot waterline Class A interclub sloop yacht Novice, owned by Cyrus K. Small, ex-Commodore of the Mosquito Fleet Y. C., to Dennison Lyon, of Brookline, Mass., who will use her on Buzzard's Bay; the 21-foot knockabout Clarita, owned by Arthur Willis, of Brookline, Mass., to J. Francis Rich, of the Savin Hill Y. C.; the sonder boat Wag, owned by R. L. Agassiz, of Hamilton, Mass., to W. Wilton Wood, Jr., of Huntington, L. I.; and the 31-foot motor boat Belterre, owned by Charles E. Phelan, of Charlestown, Mass., to Barton B. Hill, of Lowell, Mass.

## Atlantic Y. C.

THE schedule of races of the Atlantic Y. C. for the season of 1913 follows:

May 30.—Opening regatta; Classes M and below; start, 3 P. M.

\*June 7.—Open regatta; Classes M and below; start, 3 P. M.

\*June 28.—Open regatta; Classes M and below; start, 3 P. M.

\*July 5.—Open regatta; Classes M and below; start, 3 P. M.

\*July 12.—Open regatta; Classes M and below; start, 3 P. M.

\*Aug. 15.—Open regatta; Classes M and below; start, 3 P. M.

Aug. 19.—Race week, all classes, special circular.

Aug. 20.—Race week, all classes, special circular.

Aug. 21.—Race week, all classes, special circular.

Aug. 22.—Race week, all classes, special circular.

Sept. 1.—Annual regatta, all classes, special circular; starting at 11 A. M.

\*Sept. 13.—Open regatta; Classes M and below; start, 3 P. M.

### SPECIAL RACES—CRESCENT A. C.

During the race week there will be a series of races of Class S boats for a cup offered, through the Crescent A. C., by Sir Thomas Lip-ton, under conditions similar to those governing the Thompson cup series for the Q class.

CARLOS DE ZAFRA, Chairman.

FRANK P. CURRIER,

RUDOLPH H. WEBER,

Office of the Chairman, Atlantic Y. C., Sea Gate, or 322 West Fifty-seventh street, New York. Telephone, Tremont 2800.

\*To count on championship of Gravesend Bay.

## Canoeing

### A. C. A. Membership.

NEW MEMBERS PROPOSED.

Central Division.—Harry W. Barker, 28

Manchester Place, Buffalo, N. Y., by Lyman T. Coppins.

### NEW MEMBERS ELECTED.

Atlantic Division.—6646, S. Traner Buck, 29 North Thirteenth street, Philadelphia, Pa.; 6647, Milton A. Shopp, 53 Brinkerhoff street, Jersey City, N. J.

Central Division.—6648, William E. Bishop, 104 Dudley street, Syracuse, N. Y.; 6649, Karl J. Viola, Jr., 2004 Midland avenue, Syracuse, N. Y.; 6650, Lloyd E. Leland, 335 Hudson street, Buffalo, N. Y.; 6651, Norman B. Campbell, 39 St. James Place, Buffalo, N. Y.; 6652, Carleton Kelsey, 503 Forest avenue, Buffalo, N. Y.; 6653, Harry P. Kerr, 85 Seneca street, Buffalo, N. Y.; 6654, Leroy M. Wheeler, 121 Claremont avenue, Buffalo, N. Y.; 6655, Harry T. Ramsdell, Jr., 126 Chapin Parkway, Buffalo, N. Y.; 6656, Charles Haibt, 207 Warham street, Syracuse (N. Y.

## The International Challenge Cup.

BY C. BOWYER VAUX.

WARRINGTON BADEN-POWELL was the first canoeist who designed a canoe that would sail to windward. E. B. Tredwen was his closest rival for sailing honors in the canoe sailing regattas of the Royal C. C. at Hendon Lake, near London. The first sailing canoes in this country were built from designs sent over by Baden-Powell from England about 1877.

Sailing races in canoes was put on a firm basis as a sport at the August, 1884, meet of the A. C. A., Grindstone Island. The racing there was reported in the daily papers and fully described in FOREST AND STREAM, The American Canoeist and in the English papers devoted to sport.

Early in the summer of 1885, both Tredwen and Baden-Powell notified their canoeing friends in New York that they would attend the 1886 A. C. A. meet. Kirk Munroe was then commodore of the New York C. C. (organized in 1871). He at once proposed that the New York C. C. offer an international challenge cup, to be raced for on similar lines to the America's cup. The club endorsed the suggestion and ordered the cup. The first published announcement was made in August, 1885. The conditions to govern the challenges and the races were adopted at a club meeting, Oct. 27, 1885, and a letter giving all the particulars about the New York C. C. international challenge cup was then sent to the secretary of the Royal C. C., London, England.

The A. C. A. trophy was first proposed at the meeting of the executive committee, Oswego, N. Y., Nov. 12, 1885.

Tredwen did not come to America in 1886, but Baden-Powell and his friend, Walter Stewart, did. They attended the A. C. A. meet in August. The cup races were sailed on New York Bay, Sept. 4, 6 and 8.

# TRAP SHOOTING

Forest and Stream is an Honorary Member of the Interstate Association for the Promotion of Trapshooting.

**Fixtures.**

If you want your shoot to be announced here, send a notice like the following:

**REGISTERED TOURNAMENTS.**

- May 17.—Phillipsburg, N. J.—Alert G. C. Edw. F. Markley, Mgr.

- June 17-20.—Dayton, O.—Interstate Association's fourteenth Grand American Handicap tournament, on grounds of N. C. R. Gun Club; \$1,500 added. Winner of first prize guaranteed \$600 and a trophy; winners of second and third places guaranteed \$500 and \$400 respectively. Elmer E. Shaner, Mgr., Pittsburgh.
- June 17.—Thief River Falls (Minn.) G. C. P. O. Myrum, Sec'y.

donated by the Hercules Powder Co. to both amateurs and professionals, under the following conditions: To any amateur who in the regular program event at any registered tournament shall break 100 straight or better when using either E. C. or Infallible (or both powders). Should an amateur, who has already won a Hercules 1913 long run trophy, make at any time prior to Jan. 1, 1914, one or more long runs of 100 straight or better under the above conditions, he will be awarded a solid gold bar. The same conditions prevail so far as professionals are concerned, except that professionals are required to break 125 straight or better.

The Hercules 1913 Gun Club trophy is similar in design to the long-run trophy, except that it is made of sterling silver instead of gold. The conditions under which this trophy is donated to gun clubs are exceedingly simple, and will be left largely to the club managements, but the Hercules Powder Co. is not willing to donate one of its trophies as a prize at any merchandise shoot or for a tournament. The idea is to make it "the bone of contention" in a series of events at regular club shoots, and among the members of the club only. An ideal competition would be a series of monthly contests at 25 or 50 targets each, such series to consist of at least six, eight, ten or more contests. Allowances to be awarded the weaker shots in any way agreeable to the club management. The winner to be the man making the highest aggregate in four, six or more such contests—four, if only six contests are held; six if there are eight contests, and so on.

W. G. BEECROFT.

**DuPont Gun Club.**

WILMINGTON, Del., May 10.—Du Pont set sail for Hercules, but couldn't develop enough shot power to get away with the race, consequently Eugene E. du Pont is not Delaware State champion aerosaucer stopper, while Edwards Banks still has the wing in his gallery. "Tis said that neither shooter was in true form, but when one thinks over 90 rocks blasted out of 100 drilled, it's not so bad as to be rotten form. The final score was: Banks 90, Du Pont 75. By innings it looks somewhat like this: Banks 22, 24, 23, 21; Du Pont 17, 17, 22, 19, which latter is not unbing form for E. E. D. P.

The regular Coleman du Pont spoon event was shot with thirty-eight entries. J. B. McHugh was high man in Class A with 24 out of 25; H. B. Bush high in Class B with 22; Class C—E. M. Ross, 16; Class D—E. R. Jenks, 17; Class E—W. F. Webster, 14. Those who made high scores were: J. B. McHugh, 91 out of 100; J. H. Minnick 91 out of 100; W. S. Colfax, Jr., 90.

**DRIVERS AND TWISTERS.**

The great big annual tournament of Avondale Gun Club, Chicago, Ill., will be held on July 27. Ask Secretary James F. Clancy, 2826 North Troy street, for information.

Theodore Roosevelt (put this into English to follow me) did not emulate the great T. R.'s shooting in Africa, as the press agent tells it. This new T. R. shot in the Eagle Grove (Iowa) tournament—see another page—and was a day and a half late at the shoot, and broke—well, look it up.

Oh yiz. If ye have nought else to do—or, if what ye have scheduled for doing is not a date beyond wreckage—go where your watch is your time-table, and see Du Pont tear the stuffs out of Meadow Springs in the final (?) shoot for championship of Philadelphia Trapshooters' League. Should be some shoot.

From Robin Hood comes this: "A good 'old fashioned shoot,' this. Don't say what chance have we got? come down and have some fun. Here is your chance to win a prize at a shoot if you shoot your average. Robin Hood Gun Club, Concord, Staten Island, N. Y., Tuesday, June 3, at 10 A. M. Take Staten Island Ferry to St. George, then Richmond trolley car."

Hercules 1913 long run trophy is a solid gold watch fob, of an extremely handsome design, and will be

**A. L. Burns High Gun.**

A VERY interesting shoot was held at the White Plains Gun Club on Saturday, May 10. While the wind was very strong and deflected the targets in all directions, nevertheless some very good scores were made. A. L. Burns was high gun for the day with a total of 88. W. B. Ogden, of the New York Athletic Club, was high gun for the visitors, and T. Davis, of the Winchester Arms Co., was high gun for the professionals. Burns also won a leg on the Schieffelin trophy. J. T. Hyland was high gun in the 25 double-target event with a total of 34. There were twenty-seven shooters who took part in the contest, numbered among whom were three ladies. The ladies did exceedingly well, considering the difficult targets they had to contend with. Scores:

**Any Old Hundred Straight!**

BY GEORG W. PECK, JR.

EVERY blooming amateur believes that, soon or late, he's going to shoot up the horizon and run his hundred straight. Sometimes it's only 75, and again it's 98, and then he dreams of the shoot to come, when he'll run that hundred straight. How he longs for that dainty medal—that precious bit of loot, which calls for 100 even, at a registered tournament shoot. It's a clever stipulation, for the man on the other side—the man who peddles the attractive medals that appeal to the shooter's pride. 'Cause you know those registered tournaments are limited in their scope, and the lads are few and far between who get in on the medal dope. Now, if the amateur is worth a cent to the man who runs the mill, he's worth much more, and a perfect score should open the medal till. No matter when he makes it, if he shoots it on the square, and has shot your stuff, it's quite enough, so why not treat him fair? Where is the loading company that's strictly up-to-date, that will start this medal music for any old hundred straight? [Some one named Taylor says this seditious is original of Peck's bad boy.—Editor.]

**Sikeston Gun Club.**

SIKESTON, Mo., May 9.—Out of 50 clay pigeons the following scores were made to-day: W. H. Tanner 47, H. A. Smith 43, Clem Marshall 42, C. H. Yanson 33, Dr. D. E. Sawyer 33, Alf. Carr 29. We hold practice contests every Friday at 1 P. M. Visitors welcome. WM. H. TANNER, Sec'y.

**Beideman G. C.**

PHILADELPHIA, Pa., May 10.—Two silver spoons were awarded as prizes to-day, one for high in the first fifty going to Brogan, who broke 38, and the other for high for the afternoon, HineLine, the former champion of South Jersey, winning it, breaking 79 out of 100. The scores:

Slear.....	87	Pierson.....	53
Hitchcock.....	63	Lawrence.....	63
Brogan.....	73	Dougherty.....	73
Cleanding.....	38	Gilbert.....	56
Kling.....	73	Von Nieda.....	65
Fort.....	68	Dorp.....	73
HineLine.....	79		

The scores made by Slear and Lawrence, professionals, did not figure in the prize awards.

**Tyndall G. C.**

TYNDALL, S. D., May 17.—Those zephyrs, so pleasant

as you sit on the beach in August, and so 'damdon-pleasant when you holler pull, ogle down the blue steel, pull the trigger, look for the fragments and find the rock sailing along 40yds. away and two yards above your line of fire, was here to-day—some sentence that. However, M. H. Torney, either outguessed or outgeneralized the rest of the bunch, including the "I'm-here-to-prove-it" outfit, with the exception of George Kreger, who was there for 140, or 3 more than the upper amateur. Among those present were twenty for a division of the swag, and four demonstrators. Five thousand rocks were thrown. Scores:

*The Man Who Sells You Arms and Ammunition*

ARE you interested in him? You should be, for selfish reasons. It is to your advantage that he keep abreast of the times—in his ideas, in his stock.

Much depends on your interest in him and his in you.

Is he one of the alert thousands who are specializing in Remington U.M.C.?

Does he keep his assortment complete?

Can he give you the loads you want for the game you are after, in the Remington ammunition you ought to have?

If he is a leader, he specializes in Remington U.M.C.—take that for granted. For reasons of uniform quality and because it is the ammunition that flatters any make of gun.

The question for you is, is he giving you the benefit of the full Remington service—the biggest thing in ammunition circles today?

## Grand American Handicap.

A GREAT big, good-looking program is indicated by advance sheets just received, for the Grand American Handicap at Dayton, O., June 17, 18, 19 and 20. Secretary E. Reed Shaner's description entirely covers the matter, so it here follows:

The Interstate Association's fourteenth Grand American Handicap tournament will be held at Dayton, O., on the grounds of the N. C. R. Gun Club, June 17 to 20, inclusive.

The selection of Dayton as the place for holding the Grand American Handicap has been urged for years past by some of the most staunch supporters of the Interstate Association, and as the Dayton people are liberal in their views, the Association decided at its last annual meeting that they were entitled to recognition on account of their energy, public spirit and loyalty—essentials which have largely made the Grand American Handicap tournament a success in past years—and, therefore, yielded to their wishes. As Dayton is known the world over to spell success, there is no fear of the successful outcome of the tournament. That city's civic pride will make anything successful, and in addition to its pride, it has always shown material backing. The word "fail" is unknown to Dayton.

So much has been written about the shooting grounds of the N. C. R. Gun Club in the columns of the sportsmen's journals, that it is almost unnecessary to state that they are up-to-date in every respect. They are provided with every modern equipment that the most captious can suggest. The grounds are only seven minutes' trolley car ride from the center of the city of Dayton, and the club house with its five sets of traps, occupies an inclosure of several acres under grass. With such marked advantages, therefore, in favor of Dayton, it is hard to calculate with any degree of accuracy or positiveness as to the probable number of entrants for the Grand American Handicap of 1913.

The Grand American Handicap tournament has become so well known and its prominence so generally conceded that an extended introductory notice is unnecessary. It is gratifying to the Interstate Association that its efforts have won public praise and appreciation. The same standards followed in the past—the securing of the greatest benefit for the greatest number—will be adhered to. They have heretofore given satisfaction, and will undoubtedly do so in the future.

Attention is called to the schedule of events arranged for each day of the tournament. The conditions of the handicap events merit—and will, of course, receive—careful study as usual. The Association with its well-known interest and grasp of trapshooting matters, has generously extended itself to meet the requirements of the main event—the G. A. II.—and has guaranteed \$600, \$500 and \$400 to the winners of first, second and third places respectively.

Special mention must be made of the fact that the Association adheres to its rule of barring paid experts, and all who come under the name of manufacturers' agents, from participating in all events, with the exception of the national professional championship at single targets and the professional championship at doubles.

If the details of the program are carefully scanned it will be found that the interests of the amateur trapshooter have been fully considered. The Association feels confident that the coming event will meet with the same hearty approval as have its previous tournaments.

The G. A. H. was first held in 1900 at Interstate Park, New York, on June 14, and had 74 entries; it was won by R. O. Heikes (22yds.) with 91 out of 100. In 1901, held at the same park, on June 18, with 75 entries, and was won by E. C. Griffith (19yds.) with 95. In 1902 it was held at the same park, on May 8, with 91 entries, and was won by C. W. Floyd (18yds.) with 94. In 1903, it was held at Kansas City, Mo., with 192 entries, and was won by M. Diefenderfer (16yds.) with 94. In 1904 it was held at Indianapolis, Ind., on June 23, with 336 entries, and was won by R. D. Gupill (19yds.) with 96. In 1905 it was held at Indianapolis, Ind., on June 29, with 352 entries, and was won by R. R. Barber (16yds.) with 99. In 1906 it was held at Indianapolis, Ind., on June 21, with 290 entries, and was won by F. E. Rogers (17yds.) with 94. In 1907, it was held at Chicago, Ill., on June 20, with 495 entries, and was won by Jeff J. Blanks (17yds.) with 96. In 1908, it was held at Columbus, O., on June 25, with 302 entries, and was won by Fred Harlow (16yds.) with 92. In 1909 it was held at Chicago, on June 24, with 457 entries, and was won by Fred Shattuck, (18yds.) with 96. In 1910 it was held at Chicago, on June 23, with 383 entries, and was won by Riley Thompson (19yds.) with 100. In 1911 it was held at Columbus, O., on June 22, and was won by Harvey Dixon, (20yds.) with 99. In 1912 it was held at Springfield, Ill., on June 20, with 377 entries, and was won by W. E. Phillips, with 96.

The conditions governing the Grand American Handicap are as follows:

Open to amateurs only, 100 targets, unknown angles, handicaps 16 to 23yds., high guns (not class shooting); \$500 added to the purse. The number of moneys into which the purse will be divided will be determined by the number of entries. Entrance \$10, targets included.

The winner of first money is guaranteed \$600 or more and a trophy; the winner of second money is guaranteed \$500 or more, and the winner of third money is guaranteed \$400 or more. If first, second and third moneys fall below these amounts the difference will be made good by the Interstate Association.

Regular entries must be made on or before Saturday, June 7, 1913, and must be accompanied by \$5 forfeit. The remaining \$5 must be paid before 5 P. M. Wednesday, June 18, at the cashier's office on the shooting grounds. Entries mailed in envelopes bearing postmarks dated June 7 will be accepted as regular entries.

Penalty entries may be made after Saturday, June 7, up to 5 P. M., Tuesday, June 17, by paying \$15 entrance, targets included.

All entries must be made on application blanks, and they will be received by Elmer E. Shaner, Treasurer the Interstate Association, 219 Coltart avenue, Pittsburgh, Pa.

The purses in all events, with the exception of

practice day, will be divided according to the high gun system. Two places are created for each ten entries or fraction thereof up to 250.

The Handicap Committee is constituted as follows: G. V. Dering, Columbus, Wis., Chairman; J. Ed. Cain, Dayton, O.; C. H. Newcomb, Philadelphia, Pa.; Harvey Dixon, Oronogo, Mo.; F. M. Edwards, Columbus, O. The committee will meet at Dayton, O., Saturday, June 14, but handicaps will not be announced until the next day.

### DON'TS.

The following "Don'ts" have been compiled for the benefit of all concerned, and they refer to actual experiences in connection with past Grand American Handicap tournaments:

Don't expect your entry to be accepted if it is not made in time.

Don't forget to insert your percentage on the application blank.

Don't forget to sign the application blank in making your entry.

Don't ask the postmaster to back date the envelope containing your entry. He may refuse to do so.

Don't expect to compete as an amateur if you fail to sign the amateur certificate on the application blank.

Don't telegraph money to Dayton to the treasurer. He will not have time to go to the telegraph office to get it.

Don't expect to compete as an amateur if you are receiving a concession from a manufacturer or from an agent of a manufacturer.

Don't expect an exception to be made in your case when three hundred to four hundred other entrants have complied with the rules.

Don't send money to Dayton by registered mail or special delivery to the treasurer. Ten chances to one, it will not reach him.

Don't send money to Pittsburgh to the treasurer after June 11. His office will be closed from June 14 to June 21, inclusive, and mail will not be forwarded.

Don't drop your entry into the mail box at the last moment. It may result in the envelope being post-marked too late. Mail collectors have been known to overlook making a collection.

All entries for the Grand American Handicap must be made on application blanks, a copy of which will be found in the program. Do not wait until the last moment to make your entry. Last year's Grand American Handicap would have been the greater by several entries had some over-deliberate applicants been permitted to enter after entries were closed. No exception was made in favor of any one. The same rule is in force this year. If you do not make your entry in time it will not be accepted.

Each contestant who makes application to enter the fourteenth Grand American Handicap is required to set forth his average. Any contestant failing to comply with this demand, as exacted by a ruling of the Interstate Association, or who materially falsifies his classification, will be allotted the back mark in the Grand American Handicap as a penalty. This applies to all contestants, amateurs and professionals.

### PRACTICE DAY, JUNE 16—MONDAY.

Five events of 20 single targets each, 18yds. rise, entrance \$2 per event, at 9 A. M. Also five events of 20 single targets each, 18yds. rise, entrance \$2 per event, at 1 P. M. Use system, 8, 5, 3, 2. Sweepstakes optional. Squads will not be divided into sections this day.

### FIRST DAY, JUNE 17—TUESDAY.

The National Amateur Championship, open to amateurs only, 200 single targets, unknown angles, \$20 entrance, targets included, 18yds. rise, high guns (not class shooting), \$200 added to the purse. In addition to first money the winner will receive a trophy, presented by the Interstate Association.

The National Professional Championship—Open to professionals only, 200 single targets, unknown angles, \$20 entrance, targets included, 18yds. rise, high guns (not class shooting). In addition to first money the winner will receive a trophy, presented by the Interstate Association.

### SECOND DAY, JUNE 18—WEDNESDAY.

Preliminary Handicap—Open to amateurs only, 100 single targets, \$7 entrance, targets included, handicaps 16 to 23yds., high guns (not class shooting), \$100 added to the purse. The handicaps contestants receive for the Grand American Handicap will govern in this event. The number of moneys into which the purse will be divided will be determined by the number of entries, as is fully explained in the program. The amateur contestant who makes the highest score will receive a trophy, presented by the Interstate Association. If you want to take part in the Preliminary Handicap you must make entry at the cashier's office, on the shooting grounds, before 5 P. M., Tuesday, June 17. Penalty entries will not be accepted. An entry is not transferable, and entrance money cannot be withdrawn after entry has been made. Manufacturers' agents, paid representatives, etc., may shoot in the above event for targets only.

### THIRD DAY, JUNE 19—THURSDAY.

The Grand American Handicap—Open to amateurs only, 100 single targets, unknown angles, \$10 entrance, targets included, handicaps 16 to 23yds., high guns (not class shooting); \$500 added to the purse. The number of moneys into which the purse will be divided will be determined by the number of entries, as is fully explained elsewhere in this program. The winner of first money is guaranteed \$600 or more; the winner of second money is guaranteed \$500 or more, and the winner of third money is guaranteed \$400 or more. If first, second and third moneys fall below these amounts, the difference will be made good by the Interstate Association. In addition to first money, the winner will receive a trophy, presented by the Interstate Association. Regular entries must be made on or before Saturday, June 7, and must be accompanied by \$5 forfeit. Penalty entries may be made after June 7 up to 5 P. M. Tuesday, June 17, by paying \$15 entrance, targets included. An entry

is not transferable, and entrance money cannot be withdrawn after entry has been made. Manufacturers' agents, paid representatives, etc., may shoot in the above event, but for targets only.

### FOURTH DAY, JUNE 20—FRIDAY.

Consolation Handicap—Open to amateurs only, 100 single targets, \$7 entrance, targets included, handicaps 16 to 23yds., high guns (not class shooting), \$600 added to the purse. The handicaps contestants received in the Grand American Handicap will govern in this event. The number of moneys into which the purse will be divided will be determined by the number of entries. The amateur contestant who makes the highest score will receive a trophy, presented by the Interstate Association. Five hundred dollars of this added money is given by the N. C. R. Gun Club for the benefit of the amateur shooters.

Any amateur who has been a money winner (regardless of how small the amount) in the National Amateur Championship, Preliminary Handicap or Grand American Handicap will not be eligible to take part in this event.

If you want to take part in the Consolation Handicap, make entry at the cashier's office, on the shooting grounds, before 5 P. M., Thursday, June 19. An entry is not transferable, and entrance money cannot be withdrawn after entry has been made. Manufacturers' agents, paid representatives, etc., may shoot in the above event, but for targets only.

Amateur Championship at Double Targets—Open to amateurs only, 50 double targets, \$10 entrance, targets included, 16yds. rise, high guns (not class shooting), \$100 added to the purse. In addition to first money, the winner will receive a trophy, presented by the Interstate Association.

Professional Championship at Double Targets—Open to professionals only, 50 double targets, \$10 entrance, targets included, 16yds. rise, high guns (not class shooting). In addition to first money the winner will receive a trophy, presented by the Interstate Association.

### ADDED MONEY.

There will be \$2,000 added money, and it will be applied as follows: \$500 to the Grand American Handicap; \$200 to the National Amateur Championship; \$100 to the Preliminary Handicap; \$600 to the Consolation Handicap (\$500 by the N. C. R. Gun Club); \$100 to the Amateur Championship at Double Targets; \$100 for trophy for winner of Grand American Handicap; \$100 for trophy for winner of National Amateur Championship; \$50 for trophy for winner of Preliminary Handicap; \$50 for trophy for winner of Consolation Handicap; \$50 for trophy for winner of Amateur Championship at Double Targets; \$50 for trophy for high professional in the Grand American Handicap; \$50 for trophy for winner of National Professional Championship; \$50 for trophy for winner of Professional championship at Double Targets.

### SPECIAL NOTICE.

It is requested that entries for the Grand American Handicap at targets be made in ample time to permit the sending of receipt, and for it to reach the maker of entry prior to his departure for Dayton. All entries must be accompanied by the maker's full name and address.

When making an entry by mail, remittances covering the amount of forfeit (\$5) should be made by bank check, draft, post-office money order, express money order or registered letter.

Bank checks, drafts or bills of exchange will not be received at the cashier's office in payment of entrance; nor will any check, draft or bill of exchange be cashed during the tournament. This rule will be strictly enforced.

To reach the shooting grounds (from hotels in Dayton) take Main street cars, going south, at corner of Main and Third streets and get off at the bridge, Stop 2. The N. C. R. Gun Club grounds are only 30 yards east of the bridge. Five-cent car fare, seven minute service, and only ten minutes' ride from hotels and center of city. Ample car service will be provided.

Admittance to the shooting grounds will be free to all during the entire tournament.

The comfort and convenience of contestants, as well as spectators, will be looked after carefully.

A splendid dinner will be served at the club grounds each day for 50 cents per plate; also a good lunch à la carte, at reasonable rates.

The N. C. R. Gun Club will provide a room containing lockers for guns, shells, clothing, etc., and a separate roomy locker will be assigned to each contestant desiring one. Lockers will be furnished gratis by the N. C. R. Gun Club to entrants in the G. A. H. Each applicant will be required to deposit \$1, which amount will be refunded on return of the key when through with the locker. Lockers can be reserved in advance by addressing W. F. MacCandless, Secretary N. C. R. Gun Club, Dayton, O.

Guns, ammunition, etc., shipped by express must be prepaid and sent to W. F. MacCandless, Secretary N. C. R. Gun Club, Dayton, O. Mark your own name on the box that goods are shipped in, and it will be carefully cared for and delivered to the shooting grounds without charge.

Please note that shipments on which charges have not been prepaid will positively not be received.

There will not be any reduced railroad rates. The lines identified with the Central Passenger Association refuse to grant reduced rates unless an attendance of one thousand or more is guaranteed.

### CERTIFICATE OF AMATEUR STANDING.

Grand American Handicap Tournament, June 17-20, 1913.

Acting in accordance with a ruling made by the Interstate Association, and in force at this tournament, I do hereby declare that I am not a manufacturers' representative, as defined by the said Association in its special rule governing same. That no portion of my expenses in attending this tournament is paid or is to be paid by any manufacturer of guns, shells or powder, or by any of his agents. That none of the shells that I have been using for the past twelve months, nor of the shells which I am using and intend to use in this

tournament, have been donated to me by any manufacturer of guns, shells or powder, or by any of his agents. That no manufacturer of guns, shells or powder, nor any of his agents, has paid me any sum for using his gun, shells or powder, or for any other purpose for trade reasons for the past twelve months, and that by the above it is clearly understood that I have at all times during the past twelve months paid not less than regular wholesale market prices for all such goods used by me.

In testimony whereof I hereto affix my full name and place of residence.

Name .....

Address .....

Date....., 1913.

**NOTE**—Any contestant desiring to take part in this tournament as an amateur, must sign the foregoing Certificate at the time he makes application to enter the Grand American Handicap; otherwise he will be classed as a manufacturers' agent.

**Chicago G. C.**

CHICAGO, Ill., May 3.—The opening of our summer season's program was not attended by as many as expected, on account of the threatening weather conditions, the marksmen having to stop several times because of heavy showers. A strong wind was also blowing, which at times made the shooting very difficult.

Cutler made his first appearance at our park after a lay-off from the traps for nine months, and landed first place honors with Ed. Graham and J. W. Amberg, each of whom finished with a total of 93 out of 100. Bosley landed second place with 92. Ballou took first in the practice event with 13 out of 15, while Graham broke 24 out of 25 in event 3, being crowded along by H. J. Foster, a visiting shooter, who broke 23. Both Amberg and Dr. Shaw used to be regulars at the traps, but of late years have not done much target shooting, and we should be pleased to see them out more regularly in the future. Scores follow:

Events	1	2	3	4
Targets:	100	15	25	25
W S Cutler .....	8 93	..	..	..
J H Amberg.....	18 93	..	..	..
E S Graham.....	0 93	..	24	..

E L Harpham.....	13 77	..	16	..
Dr S Shaw.....	..	11	..	..
F B Fox.....	..	..	17	..
T V Cannon.....	..	..	6	7
H J Foster.....	..	..	23	..

May 4.—Despite the threatening weather, with the wind blowing a gale, a field of thirty-one shooters came out to start the first Sunday of our summer season program. Most of the marksmen found the flying spheres hard to connect with in their erratic flight. Young turned in the high score of the day, breaking 93 out of the 100 in the program event. Seelig and Kammerer finished with a total of 92 and tied for second, while Winkler landed third with Dr. Griffith.

In the practice event at 15 targets, Seelig, Winkler, Riley and Bills each broke 14; Young and Thomas finished with 12 each. Doc May finished in fourth place with 9. He has been badly crippled for the past few days with a severe attack of rheumatism in the knees, which made it difficult for him to navigate.

Now that the weather will be pleasant for outdoor recreation, we should have a good attendance at all our weekly shoots, both Saturdays and Sundays.

Remember the dates of the Interstate League shoots, the first of which will be shot next Sunday, May 11; also our fourth annual Interstate five-man team and individual championship, to be shot on Sunday, May 18. We look for a record attendance at both these shoots, so arrange to be with us and enjoy yourself smashing targets.

J S Young.....	0 93	P J Slagle.....	18 82
C R Seelig.....	8 92	W S Johnston.....	18 80
B L Kammerer.....	8 92	P J Johnson.....	18 79

# WINCHESTER

“Trap” and “Pigeon” Grades

## 20 Gauge Model 1912 Shotguns

### “PIGEON” GRADE

**SPECIFICATIONS:**—“Pigeon” Grade, 20 gauge, 25-inch Nickel Steel full choked barrel, with handsome matted rib, chambered for 2½ inch shells. Selected fancy walnut, hand-made, oil-finished stock, with either straight or pistol grip, checked, and checked rubber butt plate. Action slide handle of fancy walnut, oil-finished and checked.

The standard style of stock has straight grip and the following dimensions: Length 13¾ inches, drop at comb 1½ inch, drop at heel 2⅛ inches. The comb is heavy and rounding. As the stock is hand-made, any length of drop desired will be furnished without extra charge; but in the absence of special specifications, standard stocks as above will be supplied. Weight of gun about 6¼ pounds.

The frame is elaborately engraved and considerable hand-work put upon the gun.

List Price, \$105.00

### “TRAP” GRADE

The specifications of the “Trap” grade, 20 gauge, are the same as the “Pigeon” grade. The only difference in the two guns is that the “Trap” grade is not engraved.

List Price, \$55.00

When specified, barrels with cylinder bore or modified choke will be furnished without extra charge.

Ask your dealer to show you

## The Repeater of Light-Weight, Strength and Beauty

### Roanoke G. C.

ROANOKE, Va., May 11.—A high wind which prevailed during our shoot yesterday, made good scores impossible. This condition no doubt likewise kept a number of the regulars from the traps, for the attendance was not as large as usual. The weekly trophies offered by the club were won by the following contestants:

Scratch Class—P. F. Jamison first, H. C. Elliott, second, Class A—J. W. Poindexter first, W. C. Bringman second, Class B—H. C. Dyer first, Geo. C. Moore second, Class C—I. F. Jones first, A. M. Nelson, Jr., second, Stevens trophy—F. Jones.

The scores made by the respective shooters were as follows, 50 targets per man:

	Per	Broke.	Cent.		Per	Broke.	Cent.
Jamison.....	45	90	E Poindexter...	39	78		
Elliott.....	44	88	Holland.....	38	76		
J Poindexter.....	44	88	Boyd.....	37	74		
C C Richards...	43	86	F Jones.....	35	70		
Dyer.....	43	86	Scholl.....	33	66		
W S Jones.....	40	80	Moore.....	31	62		
Bringman.....	40	80	D W Richards...	27	54		
Shepherd.....	39	78	Davis.....	21	42		

Bushong, official referee.

### Smith Gun Club.

NEWARK, N. J., May 10.—In the prize event a new method of handicapping was tried out. The men were divided into classes A, B and C, according to their general average of shooting. Men accustomed to shooting above 80 per cent. were put in Class A; those shooting from 65 to 80 per cent. in Class B, and those below 65 per cent. in Class C. According to class the shooters were handicapped by yards.

By breaking 46 out of 50 E. Sickley took first. Louis Colquitt was second with 43; William Trowbridge third with 42; Sam Thornton fourth with 42; J. C. Weiler fifth with 39; R. A. Heusler sixth with 32, and E. Townley seventh with 29. The scores: J. Thompson, 20, 23, 25, 22, 38; W. H. Dickenhorst, 22, 19, 16, 19, 17, 39; E. Sickley, 21, 18, 19, 22, 22, 46; B. Heard, 19, 22, 21, 22, 29; R. A. Hensler, 18, 18, 19, 18, 32; H. Hassinger, 15, 17, 32; W. Hassinger, 17, 22, 25, 23, 38; Sam Thornton, 19, 21, 20, 42; T. Howard, 21, 19, 22, 20, 38; C. Hughes, 14, 21, 16, 20, 39; J. C. Weiler, 20, 19, 22, 39; William Trowbridge, 18, 19, 20, 22, 42; E. Townley, 19, 18, 19, 29; Louis Colquitt, 23, 25, 23, 18, 20, 43; F. Moffett, 22, 21, 20, 35; F. Compton, 21, 21, 21, 34; H. Higgs, 22, 24, 24, 41; George Onl, Jr., 17, 16, 18, 27; J. Wheaton, 17, 15, 18, 28.

#### Indianapolis Gun Club.

INDIANAPOLIS, Ind., May 7.—At the annual meeting of the Indianapolis Gun Club, held May 3, the following officers were elected for the ensuing year: C. A. Edmonson, President; Thomas Parry, Vice-President; Walter C. Hofer, Secretary; John Neighbors, Treasurer; Dr. O. F. Britton, Jos. Dixon and Gus Muller, Directors.

The club announces an all-day Twentieth Century Limited tournament May 22. The program calls for ten 15-target events, \$6 entrance, including targets, and any standard make of shells. Prizes to be awarded to all classes of shooters. Shooting starts promptly at 10 A. M., and a chicken dinner will be served at the club house.

Through the courtesy of Du Pont Powder Co., H. W. Vietmeyer will cashier the shoot. Professionals will not participate for prizes.

May 10.—The Indianapolis Gun Club held its weekly

target shoot at its grounds yesterday afternoon, and considering the high wind blowing across the traps, making shooting difficult, good scores were made, as follows:

Edmonson	140	127	Cope	100	84
Moller	140	126	*Hymer	100	82
Parry	140	126	Alig	100	68
Loughlin	140	102	Wilson	80	72
Dixon	120	101	Lewis	80	70
*Barstrow	120	87	Appel	80	57
Neighbors	120	76	Tanner	80	51
Britton	100	92	Hofer	60	53
*Vietmeyer	100	90			

\*Professionals.

W. C. HOFER, Sec'y.

#### Daniel Boone Gun Club.

MARTHASVILLE, Mo., May 1.—This being a holiday here, the club agreed to shoot to-day for regular practice instead of Saturday. A. F. Ahmann lost the Du Pont fob for the week. Four members tied on 23 out of 25, the first round, while Ahmann got but 22.

The secretary was away from home for a few days, hence the lateness of this report. Scores:

Hempelmann	75	67	Freese	50	40
Dr Underwood	75	63	Bollmann	50	39
Wm Koch	75	60	F Koelling	50	37
L Koch	75	54	Meyer	50	32
T Stock	75	51	E Suhre	50	30
J Mutert	50	47	Ahmann	25	22
Wyatt	50	47	Struebbe	25	20
Kite	50	46	Berg	25	19

May 10.—Only six shooters out, but they had some fun when H. W. Meyer won the Du Pont fob from John Mutert for the week. Mutert says he was watching Ahmann, who has won it two times, and that Meyer slipped up on him. Scores:

J Mutert	50	43	Bollmann	50	34
Meyer	50	38	F Koelling	25	20
Ahmann	50	38	L Suhre	25	15

J. O. WILSON, Sec'y.

#### Mt. Kisco Gun Club.

MOUNT KISCO, N. Y., May 12.—On May 21 the Mount Kisco Gun Club will hold an afternoon shoot on their grounds at Mt. Kisco, N. Y. The programme will consist of 100 targets—50 targets high gun, five very valuable prizes, 50 targets, added-bird handicap, five prizes; also two lady prizes. Prize for high gun, pair of trousers, to be made to order, to the winner, donated by A. Betti; value, \$8. The members of the Mt. Kisco Gun Club extend an invitation to their friends. Shooting to commence at 1 P. M. sharp. Train leaves Grand Central Station at 11:14 A. M.; arrive at Mt. Kisco 12:23. Professionals are invited to shoot for targets only at one cent.

A. BETTY, Sec'y.

#### Birmingham G. C.

BIRMINGHAM, Ala., May 12.—There was shooting at the Birmingham Gun Club on Friday and Saturday. We had with us on Friday, J. T. Skelly, of the Hercules Powder Co., who has not paid us a visit for a long time. His many friends in Birmingham were glad to greet him again. P. B. Plummer shot high for the day with a score of 91. The conditions were very bad on account of the rain and dark clouds.

John Lambeth was high amateur with a good score under the conditions. Mr. Heckler, of Richmond, Va., is with us for a time, and shot with us each shooting day.

On Friday the weather was fair and good shooting was done. Gentry Hillman went out with 99 out of 100, missing his 64th target. P. B. Plummer was again high professional, and second high average with 94. H. C. Ryding also broke 93. Lee Moody was high on doubles, breaking 34 out of 48. Scores:

Friday's scores:

P B Plummer	100	91	Dr Sellers	100	76
J Lambeth	100	87	O Garl	75	66
Jas Hillman	100	86	Lee Moody	100	65
E M Cornwell	100	84	W Pitt	100	60
J F Skelly	100	78	M Heckler	75	55
Mrs Garl	100	77			

Saturday's scores:

G Hillman	100	99	Dr Sellers	100	76
P B Plummer	100	94	C Barr	100	75
H C Ryding	100	93	Garl	75	63
Dick Leland	100	81	Kidd	100	56
Lee Moody	100	80	Pitt	75	50
Mrs Garl	100	80	Bowen	50	30
Bob Smith	100	79	Heckler	50	35

Doubles, 24 pairs: Lee Moody 32, G. Hillman 31, H. Ryding 29, C. Carr 21, Sellers (24) 13.

#### Westboro G. C.

WESTBORO, Mass., May 6.—We held a practice shoot Wednesday afternoon with fifteen members shooting. We entertained as guests H. P. Emery, of the Worcester Gun Club. It was a windy day, and the scores were good, considering the weather.

On May 3, we held our second shoot of the season with seventeen members shooting. There was a large gathering of trapshooting enthusiasts out to cheer up the boys, and as a result, some of the scores were good for beginning. There were two events, one at 15 and one at 10 targets. The scores follow:

Events:	1	2	Events:	1	2
Targets:	10	15	Targets:	10	15
H Metcalf	5	10	Wagner	5	6
Hoffman	5	2	E F Marsh	5	4
Taft	7	11	Hemmenway	5	9
W Metcalf	3	1	E Marsh	1	1
Gannon	1	0	Hunter	0	..
White	2	7	Burhoe	6	11
Leland	1	0	Harrington	4	2
Knight	1	3	De Armond	0	2
Fowler	2	1	Nash	0	0

**Eagle Grove G. C.**

EAGLE GROVE, Ia., May 17.—While there is nothing strange about seeing Harry Kahler starred at a trap shoot, it do seem odd to get a score sheet with his name preceded by the \* that denotes the for-promotion-only shooter. Such was the case here during the two-day shoot just ended, and he was top pro. of the five present and accounted for, although he was trimmed by eight of those doughty Westerners generally found in the cash. And, speaking of amateurs, Billy Hoon was among the elite on the score sheet with 381 out of 400, but right across the aisle sat a young chap from Minnesota, who did not stop until he cracked 386. This gentleman appears in the directory of Keister, Minn, as Ross Appleman—you have heard his name before this, no doubt. Incidentally to you, and chiefly to powder manufacturers, there were fifty shooters present, and to cheer the unfortunate target makers, let's whisper that 18,420 aerosaucers were scaled into space. Scores:

**Holland Gun Club.**

BATAVIA, N. Y., May 10.—Instead of one regular program prize to-day we offered five, a \$50 panoramic camera, three cut-glass prizes and a Du Pont picture. We made it open to all local shooters, i. e., non-members and no entrance, just 1 cent each for targets, and at that it only brought out seven shooters. Will some one please supply the answer. Again the writer states, as he has previously in these columns, that it is the price of ammunition. I'd like to get a raise out of some fellow who is in the game for the fun of it and who is in moderate financial circumstances so he can give an unbiased opinion. The first event was for a Du Pont picture, and was won by Walls. The fifth event was for the yearly Du Pont trophy, also won by Walls. The second, third and fourth events were for the merchandise, and this is the way we handicapped them: All shot at 50 targets, corrected score was based on a basis of 25 targets. The 90 per cent. men, so placed on the list by the committee, had their misses out of the 50 deducted from 25 for total score. The 85 per cent. men had their misses out of the first 40 deducted from 25 for their total. The 75 per cent. men had their misses out of their first 30 deducted for their total. The 70 per cent. men got all their actual breaks out of their first 26 targets. The 65 per cent. men got all their actual breaks out of their first 28 targets. The 60 per cent. men got all their actual breaks out of their first 30 targets. Some club try this handicap and write me how they like it. Scores follow:

Targets:	25	15	20	15	25	25
Brugmann	19	9	17	10	19	18
Tomlinson	17	11	16	10	22	...
Watson	16	12	11	8	17	...
Kinney	14	16	13	10	21	18
Gardiner	19	14	17	12	22	...
Walls	21	11	18	13	23	...
Brumber	14	9	14	12	14	...

Merchandise, high gun: Walls and Gardiner tied for first and second, Walls winning on the shoot-off. Kinney and Brumber tied for third and fourth, Kinney winning on the shoot-off. Tomlinson won fifth. CHAS. W. GARDINER, Sec'y.

**60—1      50—1      40—1**

The above are the odds you are taking against winning first, second or third money respectively in the

**Grand American Handicap**

Dayton, Ohio, June 17-20, 1913

A Solid Gold Trophy, Value \$100, will also be donated to the winner, by the Interstate Association.

**FIRST MONEY, \$600.00 GUARANTEED**

**SECOND MONEY, \$500.00 GUARANTEED**

**THIRD MONEY, \$400.00 GUARANTEED**

This Tournament will be held under the auspices of the N. C. R. Gun Club, and gives promise of an entry list that will surpass all previous records.

**\$2,000 ADDED MONEY**

Programs may be had on application to

Elmer E. Shaner, Manager

**THE INTERSTATE ASSOCIATION**

219 Coltart Avenue

Pittsburgh, Pa.

**Camden Gun Club.**

CAMDEN, Ark., May 8.—The Interstate Association contributed \$50 to the registered tournament held by the Camden Gun Club to-day. The program consisted of ten 20-target events, \$5 being added to each event. The club also contributed \$50, \$5 being added to each of the ten events. The money was divided Rose system. The scores, 200 targets per man:

W H Simpson	170	*Alec Mcrmod	184
E J Voss	180	J W Myar	185

**Portsmouth Gun Club.**

PORTSMOUTH, Va., May 10.—The regular weekly shoot of the Norfolk-Portsmouth Gun Club was held May 8. Weather was fine, attendance good, and some excellent scores made. Storr, professional, broke 49 out of 50, which was the feature of the shoot. Laird, Holt and Borrowdale tied with 44 each in the club shoot. The club scores follow:

Shot at.	Broke	Shot at.	Broke
*Storr	50 49	Davis	50 40
*Huseman	50 47	Ballance	50 36
Laird	50 44	Ostenhaus	50 36
Borrowdale	50 44	Talbot	50 35
Edmonds	50 43	Cook	50 25
Gunther	50 41	White	25 21

We want to get acquainted with you! So here is a special introductory offer. We'll send you a two-piece, five-foot bait rod—split bamboo tip, solid wood butt, nickel fittings—and a three months' trial subscription to FIELD AND STREAM, both for \$1.00

Split bamboo rod, regular price \$1.50 3-month subscription to F. & S. .45 Both for \$1.00

Send us your name and address, and mention where you saw this adv., together with a One-Dollar "William" today, for this offer is limited to a supply of 150 rods we have been able to secure at a special rate.

FIELD AND STREAM, 450 Fourth Ave., New York City

Gem City G. C.

LARAMIE, Wyo., May 5.—In the two-day tournament ending here to-day, Sarcander won Post trophy with 94 out of 100. Mrs. Ad. Topperwein tied him, but of course was not eligible for the trophy.

Table with columns: Trophy, First Day, Second Day, Shot at, Broke. Lists names and scores for various participants.

Montpelier G. C.

MONTPELIER, Vt., May 17.—Thirty Down East gunners put in two pleasant days at our tournament yesterday and to-day. Dr. C. H. Burr, of the home club, won high honors for the two days with the excellent score of 370 out of 400.

H. H. Stevens, of Remington-U. M. C. Co., was high score pro, with 381, and right here I want to add that this same Stevens is high scorer. His score sheet was the best we have had this year, for the purpose of publication, and saving of editorial time.

Lynchburg G. C.

LYNCHBURG, Va., May 6.—To-day was the opening of the season at the Lynchburg Gun Club. There was a small attendance, but what was lacking in quantity was made up in quality, as T. H. Fox made the fine score of 97 out of 100.

Table with columns: Name, Score. Lists names and scores for participants in the Lynchburg G. C. tournament.

Guernsey G. C.

GUERNSEY, Ia., May 3.—The first registered tournament of our club, on April 28-29, was a success. Mr. Foley was high gun on the first day on the 100-target jack rabbit shoot, with 95. Dr. J. C. Traister followed Foley with 94. Al. Yearous and A. Grabin were third high with 91 each.

J. E. Dickey, the Du Pont man, was high professional with 141. Billy Gerrett, the U. M. C. man, was second with 132, and F. C. Whitney, the Winchester, and F. K. Eastman, of Hercules, both broke 130.

Foley carried off the high average money for the first day, and Billy Hoon took the high average money the second day. Belle Plains Club had a full squad shooting the program, and while nearly all of the boys are beginners, they did very good work, and especially Sweet, who broke 128 out of 150.

Mrs. J. W. Dobbins made her first attempt at shooting in a tournament. She used a strange gun, and while she was not satisfied with such a low score, some of the more experienced said that her average was very good, considering her short experience.

The writer attributes his low scores to the fact that he had too much to do and a new gun. Scores follow:

Table with columns: Name, Shot at, Broke. Lists names and scores for participants in the Guernsey G. C. tournament.

Anaconda G. C.

ANACONDA, Mont., May 4.—Twenty-two marksmen cracked clays here to-day, although it snowed like Billy-baded during the cracking process. Gemmet won Kepler medal. Munn won second event with 25 straight. The fifth event, for the Confar trophy, at 15 singles and 5 pairs went to Goddard with 23. The totals of the first four events count in the contest for the Panama-Pacific exposition prize trip.

Table with columns: Name, Events, Targets. Lists names and scores for participants in the Anaconda G. C. tournament.

No. 1 was for Kepler medal; No. 2 for Twoby medal; Nos. 3, 4 and 6 were practice events; No. 5, for Confar medal; No. 7, Panama-Pacific Exposition event.

Evanston G. C.

EVANSTON, Ill., May 5.—Eighteen enthusiasts turned out at the traps of the Evanston Gun Club on Saturday, and some excellent scores were registered. Fred Bills, the popular Winchester representative, made a perfect score, getting 100 straight. Bills's exhibition was the prettiest shooting that has ever been seen on the local grounds.

Table with columns: Name, Shot at, Broke. Lists names and scores for participants in the Evanston G. C. tournament.

Boston A. A.

Boston, Mass., May 10.—The five from down Travers Island way got Bostonized here to-day by five gunners from Classic Boston. The New York A. C. representatives couldn't seem to find the rocks, as they knew how. Final score was 884 to 852. Three Boston shooters were higher than New York's high, Ralph Spotts with 177. Faye pulled down 189, as did Staples, while Snow ground up 178. Church, for N. Y. A. C. shot to the tune of 163. It will take another shoot to call either team supreme, as Boston fell before New York on April 3, when the winning team made only 799. Corbett and Rainey were substituted for to-day by Church and Hall, while Williams and Adams to-day took place of Davis and Ellis.

Regular weekly events were shot as usual, Davis being high with 95 from 4; Osborn second, 93 from 6; Farmer third, 91 from 6.

The team shoots for Snow trophy went to Team No. 3 with 416, which, added to previous scores gives the pinnacle to this team after match No. 3 with 1305. No. 1 is second both in to-day's shoot and in total, with 415 and 1298. Third team is No. 3 with 399 and 1240.

Team race of 200 targets per man, between N. Y. A. C. and B. A. A., at Riverside, Mass.:

Table titled 'Quarterly contest, 25 targets, handicap added targets:' listing scores for Heikes, Stepp, Stevens, Brainard, Rogers, Weeden.

Table titled 'Sixth city trophy, 25 targets, handicap added targets:' listing scores for Heikes, Rogers, Freeman, Hogen, Noble, Grant.

F. H. WALLACE, Mgr.

Intercollegiate Traps.

PRINCETON, N. J., May 10.—Looks like Princeton found the rabbit's foot this year. First, Mr. Wilson wins the Marathon to Washington, then unexpectedly the Tiger oarsmen wallop Harvard et al. on the Charles River in the long boats—known as shells. Then the five Nassau gunners get more shells and crackle out of Yale and Dartmouth in the tri-cornered trap event. Capt. White, who is some shooter, was too busy between New York and Boston to send us the detailed scores, while Brother Banks, who also performs a like function—when Yale wins—didn't send us any. Without looking, however, we feel safe in gambling that Banks did his share among the five blues. Capt. White, of the home team, was top gun with 87.

Intercollegiate Championship.

PRINCETON, N. J., May 10.—With a bad north wind sweeping across the traps that made it difficult at times to stand and shoot, Princeton won the intercollegiate championship at clay birds this morning by the greatest margin that has ever separated any two intercollegiate teams, beating Yale, the former champions, by 55 targets. The final result was Princeton 407, Yale 312, Dartmouth 294, and Harvard by default.

Capt. N. R. White, of Princeton, defended his title as individual champion by winning for the second consecutive time with 87 out of 100, closely pressed by E. R. Simpson, a team mate, who finished with 85.

Yesterday afternoon Dartmouth and Princeton engaged in a dual match which the latter easily won by the score of 202 to 166. N. R. White, of Princeton, was high gun, breaking 46 out of 50. Simpson was second with 43. A northwest wind prevailed.

H. H. Stevens, J. Fanning and Mr. Pratt took charge of affairs. We feel greatly indebted to them in order for making the shoot the success it was. Indeed Mr. Stevens, who has visited us three times, we have a friend, by reason of whose advice and pointers we feel our success this season has been largely due. J. M. Hawkins has been very kind in that respect as well.

Mr. Fanning presented White with the Du Pont gold stick pin for winning the highest average among college shooters, he having won some high gun trophies in intercollegiate matches this year.

After the intercollegiate match the Princeton Freshmen defeated the Yale youngsters by the score of 157 to 148. Reed, of Princeton was high gun with 44. The scores:

Table showing scores for Princeton and Yale teams, including individual shooter scores like N. R. White, J. R. McAlpin, E. R. Simpson, F. B. Nimick, Tom L. Horn, B. H. Scott, L. Thompson, B. Newton, J. Banks, O. C. Hoyt, C. L. Swenson, P. R. Alexander, C. H. Foster.

Harvard team defaulted at last moment.

Princeton-Yale Freshmen match, 50 targets per man:

Table showing scores for Princeton and Yale in the Freshmen match, including individual shooter scores like Reed, Turner, Shanley, Ames, Johnston, Halstead, Cassell, Tayler, Bissell, Rogers.

Detroit Pastime G. C.

DETROIT, Mich., May 10.—Ideal weather prevailed at the last regular club shoot, but the scores were very poor—nobody could get going. In some of the prize events straightes were made, but they were far between.

In the 25-bird club event Mrs. Vogle was high in Class A with 23. Mr. McIntosh broke 23 in Class B, while Browley came through with 20 in Class C. In the club trophy Mr. Conely and Mrs. Vogle tied with 13 out of 15 and were high.

The fact that the trout season opened May 1 detracted from the attendance. The scores:

Table showing scores for various shooters in the Detroit Pastime G. C. event, including Shumaker, Stonehouse, Cole, Winslow, Conely, Krumming, J. Hartford, Braddock, McIntosh, Finzle, De Lasko, Tristem, Slattery, Tyler, Bromley, Stark, Sevigny, Finley, Knipper, Clark, Mrs. Vogle, Robertson, E. Hartford, Potter, Cooper, Covers, Ford, Hitchcock, Sweitzer, Schumaker, Wray, Fisher, Bogardus, Rug, Boyce, Walgase, Buesser, Wilson.

G. S., Capt.

Marysville Sportsmen's A. A.

MARYSVILLE, Pa., May 10.—Nothing very startling in way of scores happened here to-day at our annual registered tournament. High amateur, C. E. Seidel, got away with the big money on 134 out of 150, three less than J. M. Hawkins, way up for wads only exponent. Must have been punk weather, though, for Neaf Apgar found only 135 of his efforts. Thirty-nine were present; 5,670 targets thrown. Scores:

Table showing scores for various shooters in the Marysville Sportsmen's A. A. event, including Jack Wise, C. E. Seidel, F. Steese, W. H. Wilson, C. Clendenin, J. G. Martin, L. A. Worden, \*L. Cumberland, H. B. Shoop, \*G. Hassam, D. H. Herrold, J. H. Shaffer, F. V. Benion, Jones, Geo. Coil, \*J. M. Hawkins, \*F. M. Fay, \*L. Lewis, \*N. Apgar, R. Walker, C. W. Bigelow, Hill, J. Keller, S. H. Hoffman, H. E. Hawkins, C. H. Cupples, J. Englert, Curtis, C. A. Klucker, J. Waltz, J. Davis, W. Lefferty, S. M. Benion, C. C. Hackett, L. A. Egolf, A. S. Benner, S. H. Garland, Mrs. Brown.

A SINGLE TRIGGER

Lefever Gun

in the hands of L. H. REID, Seattle broke 2115 x 2200 = 96.14% with ordinary factory loaded shells purchased from local dealers.

Mr. Reid, shooting at Interstate Association Registered Tournaments throughout the 1912 season, has the high average for the Pacific Coast.

The loads were regular factory loads; the LEFEVER bore, famous for the even pattern and penetration, assisted MR. REID to make this record.

Why don't you shoot a LEFEVER Single Trigger this year?

## HANDY OIL CAN HANDIEST

It's the same Old Reliable 3-in-One Gun Oil you have always bought, but the can is new. Can't leak, can't break and just fits your hip pocket. Has patent self-sealing spout. 3 1/2 oz., 25 cents. 3-in-One oils perfectly lock, trigger, ejector, break joints. Cleans and polishes barrels inside and out; also wooden stock. Absolutely prevents rust.

FREE—Write to-day for a generous sample. 3-in-One is sold by all hardware, sporting goods and general stores, in 3 size bottles: 1 oz., 10c; 3 oz., 25c; 8 oz., 1/2 pint) 50c. Handy Oil Can, 3 1/2 oz., 25c. If your dealer can't supply you we will send a Handy Oil Can, full, by parcel post for 30c.

THREE-IN-ONE OIL CO. 112 New Street New York

## You like to HUNT and FISH

## You like to go CAMPING—

then surely you will enjoy the National Sportsman magazine, with its 160 richly illustrated pages, full of overflowing with interesting stories and valuable information about guns, fishing tackle, camp outfits—the best places to go for fish and game, and a thousand and one valuable "How to" hints for sportsmen. The National Sportsman is just like a big camp fire in the woods where thousands of good fellows gather once a month and spin stirring yarns about their experiences with rod, dog, rifle and gun. Think of it, twelve round trips to the woods for a \$1.00 bill.

### SPECIAL TRIAL OFFER

Just to show you what it's like, we will send you the National Sportsman magazine for three months and your choice of a handsome National Sportsman Brotherhood emblem in the form of a Lapel Button, a Scarf Pin, or a Watch Fob, as here shown, on receipt of 25c in stamps or coin. Don't delay—join our great big Hunting, Fishing, Camping, Nature-loving National Sportsman Brotherhood today.

National Sportsman Magazine, 83 Federal St., Boston

# WOODCRAFT

By "NESSMUK"

Cloth, 160 pages. Illustrated. Price, \$1.00.

A book written for the instruction and guidance of those who go for pleasure to the woods. Its author, having had a great deal of experience in camp life, has succeeded admirably in putting the wisdom so acquired into plain and intelligible English.

FOREST AND STREAM PUBLISHING CO.

## Cincinnati Gun Club.

SUNDAY, May 11, was an ideal day for outdoor sport of any kind, and a big crowd was expected, but owing to the street car strike inaugurated on the previous day, none but downtown and Kentucky shooters could get to the grounds. The team match with the Westwood Gun Club was postponed on this account until the 18th inst., if normal conditions have been restored by that time. Good scores were made. Schreck and Trimble tying for first honors on 93, shooting an even race throughout. Gambell kept the leaders close company and was only one behind at the finish.

In the team race Gambell and Hammer put it over Gaskill and Smith, although the latter team had the best of the first two rounds.

The Du Pont trophy contest was finished to-day, two scores being shot to catch up with time lost on account of the flood. There were six contests scheduled, four best scores to count, and the finish found Schreck and Sander tied on four perfects, including their handicap. Their scores in the contest, actual breaks, were: Schreck, 46, 47, 44, 49; Sander, 33, 38, 36, 37, 39, 41. The tie will be shot off on May 18.

In the contests to-day Trimble, Schreck and Gambell were high in actual breaks with 50, 49 and 48 respectively. The club is making arrangements for a big time on the 30th, and expects a good attendance of local shooters.

John R. Taylor was in town on the 10th on his way to the Southern Handicap, but had to leave too early to get into the shoot here. L. J. Squier accompanied Taylor on his trip South. The scores:

Practice, 100 targets:			
Trimble	93	Higgins	85
Schreck	93	Gaskill	85
Gambell	92	J B C	83
Hammerschmidt	89	J V Dea	82
Rybolt	88	Sander	80
Davies	88	Ertel	77
Smith	85	Butz	73

Team race, 100 targets per man:			
Gambell	91	Gaskill	85
Hammerschmidt	91-182	Smith	85-170

Du Pont trophy, 50 targets:			
Gambell	48	Davies	43
Hammerschmidt	46	Higgins	43
Gaskill	46	Sunderbruch	40
Schreck	44	Butz	39
Trimble	44	Sander	39
Rybolt	44	Ertel	39
Dea	44	Butz	37
Smith	44		

Du Pont trophy, 50 targets:			
Trimble	50	Rybolt	44
Schreck	49	Hammerschmidt	43
J B C	45	Higgins	42
Sunderbruch	45	Sander	41
Davies	45	Ertel	38
Gambell	44	Dea	37

## New Jersey State Sportsmen's Association.

The tenth annual tournament of the State Sportsmen's Association will be held June 5-7, under auspices of Riverside Gun Club, Red Bank, Monmouth county, N. J. The grounds are located on Shrewsbury avenue, and are easily reached by trolley.

Red Bank, the metropolis of Monmouth county, has a population of about 8,000, and is situated at the navigable head of the North Shrewsbury River, about thirty miles from New York and six miles from the Atlantic Ocean. It is the terminus of the Merchants' Steamboat Company's line, whose boats run daily to and from New York, and it is on the line of the New York & Long Branch Railroad, thereby enjoying the advantage of the excellent train service of the Central Railroad Company of New Jersey, and the Pennsylvania Railroad to and from New York city. It is also a junction for trains between New York, Lakewood and Atlantic City. The fact that one hundred trains daily in the summer season and nearly as many the entire year, connect Red Bank with New York city, makes it a suburb of that city. The Riverside Gun Club was formed at Red Bank in the year 1884, but no regular organization was effected until 1886. Dr. Edwin Field was its first President, and John P. Cooper, Secretary and Treasurer. Mr. Cooper occupied that office continuously for nearly twenty years.

In the year 1890 the club leased grounds on the south side of Beech street, erecting a club house and enclosing the property. There it remained for many years, an active and flourishing gun club. For a time after the State abolished live-bird matches, interest in target shooting declined, and the club grounds were given up. Subsequently some of the members, principally Albert L. Ivins, the present president of the club, succeeded in arousing sufficient interest among the friends of trapshooting to re-establish the Riverside Gun Club on its present firm footing, thereby giving us all a chance to enjoy a mighty attractive and healthful sport.

New grounds were secured and a club house erected. The membership now is about one hundred and comprises the representative citizens of Red Bank and the neighboring communities, and is rapidly increasing. A cordial invitation is extended to all, ladies as well as gentlemen, who are interested in target shooting, to attend the tournament and share in its success.

To reach grounds take Long Branch trolley cars at railroad station direct to grounds. Shooting will commence each day at 9:30 A. M. sharp. The events are open to residents of New Jersey only. In the team championships, after the price of targets is deducted, the balance will be divided among the three high teams, 40, 30 and 20 per cent. respectively. Winners also to receive cups, which they hold subject to challenge every thirty days until the following annual shoot, when they must return them to the State Association. This shoot is to be run under the Squier money-back system, and any shooter who shoots in all regular events (championships and merchandise not included) and fails to win

back the price of his entrance, will be paid back his money, less price of targets.

The annual meeting of the State Association to be held on Friday afternoon on the grounds at 4 P. M. Special sweeps will be run if time permits. The Riverside Gun Club will run an all-day open shoot on Decoration Day; eight 20-bird events, \$1.40 entrance, and extends to all shooters an invitation to come and get some practice on the grounds before the State shoot.

The winner of the amateur State championship to receive cup and 50 per cent. of the total entrance after the price of targets has been deducted, and the balance to second and third, 30 and 20 per cent. respectively.

The Laffin & Rand trophy, which is emblematic of the amateur State championship, will be shot for in event 8, which consists of 50 targets at 16yds. risc. Any shooter in the State is eligible to compete for same, whether his club is a member of the State Association or not, the title and trophy going to the winner, who is subject to challenge every thirty days by any amateur, a resident of the State, but the trophy must be returned to the Association before the next annual tournament for open competition among the members. The winner of the trophy must execute a bond for its return or let it remain with the Association.

## Frontier Rod and Gun Club.

BUFFALO, N. Y., May 12.—The attendance to-day was small, although the weather was fair but cool. The regular meeting will be held on Wednesday, May 21, at 8 o'clock, in the club house and a good attendance is looked for to open the summer season.

The scores:						
Events:						
Targets:	1	2	3	4	5	
Eichberg	10	15	25	25	25	
Eberhardt	8	12	18	22	18	
Wakefield	7	10	10	13	17	
Thompkins	5	10	16	15	..	
Squelch	4	7	15	18	..	
Vedder	8	12	14	24	..	
Hewitt	7	5	16	17	..	
Harrison	8	11	18	21	19	
Utz	..	..	13	18	22	..
Suckow	..	..	..	15	..	..
T F	..	..	..	..	14	9
Childs	..	..	..	..	..	12
Wall	..	..	..	..	..	15

Point winners: Event No. 3, cup race: Class A—Eichberg 18; Class B—H. Utz 18; Class C—Squelch 14. Handicap event No. 4—Squelch 24.

H. C. Utz, Sec'y.

## Analostan Gun Club.

WASHINGTON, D. C., May 11.—Yesterday was cold and raw, and during the day a very high wind prevailed. This accounts for the small turnout at the Analostan traps, and the very poor scores that were made. Capt. Peck was the leader to-day with 81 out of 100, followed by Ford with 77, and the best Kirk and Graves could do was 72 each. Ford distinguished himself when it came to the doubles, and scored 22 out of 24. Following are the scores made during the afternoon:

Shot at. Broke		Shot at. Broke	
Peck	100 81	Duvall	100 59
Ford	100 77	Green	100 51
Kirk	100 72	Barnes	80 60
Graves	100 72	Parsons	75 59
Stine	100 69	J R Sharpe	50 18
Culver	100 60	C S Wilson	25 15

Du Pont trophy contest, 25 targets, handicap:			
Duvall	10 25	Green	16 25
Barnes	3 21	Stine	3 17
Kirk	1 22	Graves	4 25
Peck	1 19	Ford	0 17
Culver	2 17	J R Sharpe	13 21
Parsons	2 23	C S Wilson	6 21

Doubles, 12 pairs. Ford 22, Kirk 17, Culver 14, Graves 13, Parsons 13, Barnes 11, Taylor 10, Bray 7.

MYLES TAYLOR, Sec'y.

## Fulton Game and Gun Club.

FULTON, N. Y., May 10.—Nineteen enthusiasts shot trapward to-day in practice, and some scores commendable were made, considering Old Boreas and his friend gale, who did their best to persuade the targets out of the straight and narrow path. J. C. Hunter smeared the afternoon sunbeams with 82 scalars out of 100 loosed. There were two 78's, one going to C. Hobbie, the other to B. O. Grady. Scores:

Shot at. Broke		Shot at. Broke	
F Weise	100 73	H N Woods	75 55
J Hunter, Jr.	100 75	H McMurphy	75 62
C Hobbie	100 78	W Eastman	75 39
J C Hunter	100 82	Chapman	50 36
B O'Grady	100 78	F Mathias	50 27
R Hunter	100 73	B Buell	50 32
F Dilts	100 71	G Nichols	50 34
B Bennett	100 54	Ed Davenport	50 26
H B Armstrong	75 37	G Dingle	25 14
A P Curtis	75 63		

## Meadow Springs Gun Club.

PHILADELPHIA, Pa., May 10.—Harry H. Sloan was top gun here to-day, getting 88 out of 100. This gave him the dipper offered by the club for the best actual score. Thompson carried home the spoon donated for the high score, handicaps included. He totaled 93, 81 actual breaks.

In the 50 blue rock merchandise event, Sloan landed the first prize with 48 out of his fifty. Rothaker and Thompson tied for second trophy with 45 each, and on the shoot-off at ten flyers Thompson won by breaking 8.

**Dominion of Canada Trapshooting Association.**

THE thirteenth annual tournament of the above association will be held at Hamilton, Ont., Aug. 11-14, inclusive, under the auspices of the Hamilton, Ont. Gun Club. Low fares can be secured on all railroads on account of tournament being held during Hamilton Centennial celebration. This will be the banner shoot of Canada. Every shooter participating will be guaranteed his money back, less price of targets. Added money, \$1,200. Also valuable trophies and prizes. The tournament is open to Canadian amateurs who are members of an affiliated gun club, or who have paid individual affiliation fee. All clubs must affiliate before June 15 to save penalty. The affiliation fee for clubs is \$5, which entitles all its members to shoot. The individual fee is \$1 for shooters who are not members of an affiliated club. Penalty affiliations may be made after June 15 by paying \$10 for clubs and \$2.00 for individuals. Fees should be sent to T. Claude Cook, Hon. Secretary-Treasurer of the Association, P. O. Box 1724, Montreal, Que.

The shoot will be held at the Hamilton Gun Club Park. Ideal shooting conditions. Background absolutely clear, facing on Hamilton Bay.

Program will be out soon. Yours for the asking from F. W. Watson, President, or Donald A. Wilson, Local Secretary, 48 Holton avenue S., Hamilton, Ont.

**Pipestone G. C.**

PIPESTONE, Minn., May 4.—Several visitors shot with us at our weekly shoot to-day, in preparation for the registered tournament, which will be held here May 14-15. Percentages averaged well up toward the 90s, and this despite the disappointing work of a trap sadly in need of repairs.

O'Leary won the Du Pont trophy with 21. Scores:

Shot at, Broke		Shot at, Broke	
Guptill	115 106	Atkinson	75 59
Shepherd	100 90	Peterson	120 92
Neale	60 52	Briffett	60 45
Pratt	100 85	Coke	45 31
Kear	55 46	Donovan	60 41
Heckstad	45 37	Demoray	45 27
Gibe	60 48	Beede	25 15
O'Leary	85 67		

A. PETERSON, Sec'y.

**Bon Air G. C.**

PITTSBURGH, Pa., May 5.—To-day's practice brought out several new shooters with an ambition to learn the game that has no peer. Boon wrecked 24 out of 25 flights, while Ruhlewald destroyed 21. King filled the trio by eliminating 20 out of his 25 aerosaucers. Scores: King 20, Ruhlewald 21, Dales 5, Boon 24, Sperling 10, Gray 14, Bradshaw 14, King 12, Rectleman 17, Born 10, Sperling 13, Bradshaw 14, Dale 14, M. Kelly 6.

M. H. MILLER, Sec'y.

**Bristol Channel Eels for Danish Lakes.**

EXPERIMENTS in the transplanting of an eel brood from England in the Danish Lakes have been carried on for some years, and have resulted very satisfactorily, says London Standard. Dr. Hoffmeyer, a State commissioner, is therefore about to come to England to make arrangements for an extensive import to Denmark of these young eels, which, coming from the Atlantic Ocean, are forced toward the English coast, and are there to be found in enormous quantities, especially in the Bristol Channel. The experiments have shown that the young eels thrive well in Danish waters, and after a stay there of from six to seven years they reach perfect size and quality.

**Gives \$20,000 to Amundsen.**

THE National Geographic Society has subscribed \$20,000 to Capt. Roald Amundsen, who will leave San Francisco in June, 1914, in an attempt to traverse the frozen polar regions of northern Canada, Alaska and the Asiatic coast.

Amundsen in his ship Fram will go from San Francisco to Bering Strait, where he will allow his vessel to drift as the current carries him across the unexplored regions, passing close or through the north pole area into European waters. It is expected he will be ice-bound four years.

**Luscious Crab Meat.**

WITH the unreasonably high and increasing price of lobsters there comes a great opportunity for the crab. Though never, perhaps, as aristocratic as the lobster, the crab has never been humble; though simple, homely and cheap, it has always been good to eat; and, what with the greater scarcity of lobsters and increasing demand for crab meat for salads and so on, after centuries of comparative neglect in the higher circles the crab seems likely now to come into its own.

**Woman Planning Fox, Mink and Marten Farm**

FOXES, marten and mink have been added to the long list of things grown and able to be grown in Beltrami county. At Spooner, Mrs. A. Ryan has purchased a two-acre farm and will undertake to raise these animals on a large scale for commercial purposes. Mrs. Ryan has already disposed of fourteen foxes to furriers. Only black and silver gray foxes will be raised, and a large demand for Minnesota fur is expected.

**Sheep as Beasts of Burden.**

IN Tibet, sheep and goats are used as pack-animals, and a flock of these animals, well loaded, journey from there to the Rampur Fair, in India, taking over a month on the journey, traversing several high passes, where most other pack animals would be useless. When their loads are delivered, they are kept on the plains during the winter and then sent back with a stock of grain for Tibet and regions on the border where foodstuffs are scarce.

**A Big Wildcat.**

THE largest wildcat ever killed in Marathon county was presented at the office of the county clerk there in March for bounty. The pelt, says the Milwaukee Sentinel, measured 5 feet and 6 inches from tip to tip. It was trapped by William Laffin in the town of Hewitt. Lee Catlin, of the town of Kronenwetter, brought in a wolf for the bounty. Mr. Gatlin has killed twenty wolves in the last three years.

By executive order, issued by President Wilson on March 19, 1913, the destruction of any plumage birds in the Canal Zone has been prohibited under heavy penalty for infraction. The order has been put into effect by the Canal Commission.

**A Modern Phyllis.**

BY MARIE ELGY.

Corydon and Phyllis stood  
In ye edgeward of ye woode.

"Come," cried Corydon, "and goe  
With me where ye daisies bloe."

Phyllis stared at Corydon,  
As she might ye Evil One.

"Fede your daisies to ye goate;  
I'm on my waye," she sayde, "to vote."

**Let's Go Fishin'.**

Gee, it makes you feel so yawny, kind of gappy, kind of tired.  
And your mind ain't on the labor and there's nothing that's inspired;  
And your thoughts are always rambling, framing visions of delight.  
When the days are getting sultry and the fish begin to bite.

## NOTES ON BOW MAKING.

Continued from page 610.

by the handle, belly up, and with a drawing knife or spoke shave the corners of the belly should be rounded off, so that a section of the bow at any point if sawed through would look like a letter U, which was almost if not quite as deep as it was wide. The proportion of depth to width varies among different bowyers, so you are free to make a deep or flat bow as your fancy dictates. Of course, there are limits in either direction. In reducing the belly of the bow, care must be taken that an even amount of wood is removed from either side or corner. It will be observed that the grain

of the wood runs out, on account of the taper, and it is most desirable that the pointed ends of the grain be kept in line with the center line of the bow, so that it will resemble the leaves of a buggy spring. The handle should gradually taper into each limb.

Care should be taken in reducing the belly of the bow to follow the lines of the bow as determined by the back. The back is the base line from which we work, and if there is a kink or depression in it we must have a corresponding bulge or raised place in the belly. Knots are a constant source of trouble and ruin many good sticks; but if it is a small sound knot, we do not have to condemn the stick, but may

save it by "raising the knot," which is done by leaving the knot and the wood surrounding it higher than the limb on either side of the knot. This makes an unsightly bulge, but if properly done, it will not militate against the shooting qualities of the bow.

If you are using a heavy, dense wood, you may make your bow "whipped" or a gradual taper from handle to nock; but if you are using the more bulky or softer woods, the bow will be too bulky at the ends, so that it will be best to taper it on the sides for three or four inches from the neck to lighten it and take away the stubby appearance. Before it is possible to complete the bow, it will be necessary to string it in order to determine its weight and equalize the amount of curve in the limbs. Notches should be filed in the sides of the bow at the ends, using a small rat-tail file, and making the notches deep enough to securely hold the string. Do not notch the back. Horn tips can be easily made and are a great improvement over notches.

At the earliest possible moment you should string your bow and carefully examine it, to ascertain if it bends evenly throughout its entire length. Look along the back lengthwise and see if it bends even and flat, or if it is pulled out of shape by the string. If the latter is the case and the string does not cut the middle of the bow, it will be necessary to cure this defect by scraping that side of the belly which is opposite the portion of the back which is bulged out; in other words, scrape the low side of the belly. Do this very gradually and carefully, and closely watch the result of your efforts. If one limb bends more than the other, the stronger limb must be reduced to correspond. The handle must not bend in the least, and each limb must bend in an even, graceful curve from handle to tip. If the bow is too heavy and it is necessary to reduce it, care must be taken to see that an equal amount is removed from either limb. After getting the bow to bend to suit you, it should be weighed. To do this, weigh out in a cloth bag as much earth or sand as will correspond to the weight you desire for the bow, and affix a hook to the bag. At a convenient point on the wall of your shop drive two large nails four inches apart. Mark a point 28 inches below these nails, hang the bow on these nails at the handle and hook the bag of sand in the center of the string. When the bag of sand will pull the string down to the mark, you have a bow of the desired weight. For safety, the hook on the bag should be sufficiently long to allow the bag to rest on the floor when the bow is drawn 28 inches. Of course, in making this test you must not allow the bow to be under strain any length of time; hang on your weight, ease it down to the point where the bow will hold it, note the distance and immediately remove the weight.

You will remember that the exact center of the bow is not the center of the handle; the upper end of the handle is  $1\frac{1}{4}$  inches above the center and the lower is three inches from the center. This causes the upper limb to be longer than the lower, and in consequence it bends the most, as it should do. In perfectly made bows this is quite noticeable when the bow is braced. Measurement from string to belly halfway up the limb will show a difference of  $\frac{1}{2}$  inch in either limb, so that in reducing

## "Tenement Tommy" Asks for A Square Deal

**H**E lives in New York's stuffy tenement district, the most congested spot in America.

In his sultry three-room home there is scarcely space to eat and sleep. His playground is the blistering pavement of the ill-smelling streets, hemmed in by scorching brick walls.

No trees, no grass, not even a whiff of fresh air,—in the only world Tommy knows. Ash cans are his background, and the rattle and roar of traffic his environment.

Tommy's widowed mother is broken with worry; his sisters and brothers are as pallid and frail as he. The winter struggle has sapped their vitality. They are starving for air.

No medicine will help Tommy. What he, his mother and the other children need are: a chance to breathe something pure and fresh,—a taste of sunshine and outdoor freedom,—an outing in the country or at the seashore.

But between Tommy and his needs stands poverty, the result of misfortune. He must suffer just as if it were all his fault.

And that is why Tommy appeals for a square deal. Nor does he wish you to forget his mother, or his "pals" and their mothers,—all in the same plight.

This Association every summer sends thousands of "Tenement Tommies", mothers and babies to the country and to Sea Breeze, its fresh air home at Coney Island. A dollar bill, a five dollar check, or any amount you care to contribute, will help us to answer Tommy's appeal.

Send contributions to Robert Shaw Minturn, Treasurer, Room 204, 105 East 22nd Street, New York City.

your bow by careful scraping you must bear this point in mind. Also, as soon as you get the bow to bend evenly and in the string, if necessary to reduce it, scrape from both sides evenly in order to preserve the balance. Do not scrape to the size you want finally, but leave some wood to be removed by sand paper. It is surprising how a bow may be reduced in weight by finishing with sand paper.

The size of the finished bow will depend upon the wood selected, and will range from an inch to an inch and a quarter in diameter next to the handle to half to three-quarters of an inch at the ends. The larger measurements for the softer woods and the smaller for the dense hardwoods. At the back of the handle glue on a piece of white pine the size of the handle 1/4 inch thick and round its edges and ends. Cover the handle with velvet or plush, glued on, or follow Barnes' lead and wind on strips of split leather. It makes an excellent handle. The bow should be finished with three coats of rubbing varnish, well rubbed between each coat.

If you have selected a soft wood for your bow, it should be protected on the left side just above the handle by having let into it a piece of mother of pearl, bone or ivory to take the wear of the arrow. This is called the arrow plate. The bow we have described is known as a self bow. The making of backed and grafted bows is another story.

**Idaho License Ready.**

FISH and game licenses have been issued by State Game Warden Barber, of Idaho, and have been placed in cities and towns that they can easily be secured. In order to fish, sportsmen must have a license. The last season's licenses expired April 1 of the present year, and the new licenses are good for a year.

**The Loafer.**

You kin always tell a loafer, if there's loafin' in the crew;  
You kin always tell a loafer 'cause he has so much to do;  
When the men are in the maintop he is fussin' with a jib;  
On the drive he's always lookin' fer a chance away to snib;  
In the woods the smallest timber is the timber he will find,  
In the yard the twelve-by-twenty is the kind he leaves behind.  
He will fuss an' he will fiddle huntin' up the softest snap;  
Life is one eternal treadmill fer the take-it-easy chap.  
Yet it takes a lot of trouble skippin' labor day by day;  
Fer a fellah has to figger how to dodge it all the way.  
On the drive er in the timber, in the mill er in the yard,  
You kin always tell a loafer 'cause he works so bloomin' hard.

—American Lumberman.

**Arctic Dogs in Switzerland.**

An attempt is being made in Switzerland to make use of Arctic dogs as beasts of burden. The value of such animals was proved by Capt. Amundsen in his dash to the south pole. There seems to be no reason Arctic dogs cannot be made use of in Switzerland in much the same way as on the barren wastes of the Antarctic.

Four dogs were recently brought to Switzerland and they will be used to draw sleds on the Jungfrau and the Eiger glacier. The dogs are being trained by making them carry letters and packages from Wengen to the Eiger glacier and the first experiments have been very successful. The only difficulty seems to be the high altitude to which the animals are not accustomed.

During the summer the dogs will have their home high up on the neck of the Jungfrau.

For Sale.

**GAME BIRDS**

Hungarian Partridges, Quail, Ring-neck Pheasants, Wild Turkeys, Capercaillie, Black Game, Wild Ducks, Decoys, Beautiful Swans, Fancy Pheasants, Peafowl, Cranes, Storks, Ornamental Ducks and Geese.

STARTING FOR A DAY'S TROUTING IN MAINE

## The Butte, Mont., Daily Post, Prints this Interesting Little Item:

"F. A. Anderson and Joseph Lorenz, two members of the Rocky Mountain Rifle Club, selected to shoot on the team of fifty men to represent America in the International Match for small-bore rifles, shot their official targets last night before a fair sized audience, and to the delight of the spectators succeeded in placing 100 shots in the bullseye, giving both men a perfect score of 500. If you think this is an easy thing to do, take your .22 rifle out some day and see if you can hit an American half-dime 100 times at a distance of 75 feet.

"The old rifle which was used in winning the championship in 1910 demonstrated that the Stevens Rifle backed up by Butte marksmen are a hard combination to beat.

"If the World's Championship is not won by America, Butte can proudly say that it was no fault of hers."

And **Stevens** can say the same thing! There is no fault in the **Stevens** Arms, because they are made with the greatest regard to accuracy and precision. And they are made to last. They may grow old, but they never grow obsolete.

Send for our illustrated catalog—profusely illustrated with pictures of our entire line of Rifles, Shotguns, Pistols and Rifle Telescopes.

# One Big Buck

By WILL C. PARSONS

**T**HROW her head a little to the left, and I think we can make it." The camp was out of meat. We were storm bound, for Lake Superior had had its back up, and for days had dashed its giant waves against the Pictured Rocks with a force that made the ground tremble. Twenty miles away, in the lee of Grand Island, the sailboats that were to have come for us were riding out the storm.

The commissary was low—very low, and it was up to someone to "bring home the 'coon skin." So two of us started.

A mile or so back from camp nestled a pine-locked lake. At one end a circular bay, its amber waters dotted with lily pads, sent its flow into the parent body through a swift little arm.

Dead and gaunt trees, some fire killed, some storm twisted, stood up like the bristles on a department store bargain scrub brush. The night was about as dark as the inside of a lump of anthracite coal, and the bushes were some wet and stung spitefully as we brushed through, stumbling over the pesky spruce roots and trying to make the jacklight do for two.

At last we were afloat, and the birch was sent silently toward the bay. I paddled. Frank knelt in the bow, and as his head turned from side to side, the rays from the light brought into relief deadened snags in the black water, the gleam of a closed water lily here and there, and once picked up out of the blackness a pair of ducks that hustled away on buzzing wings.

The storm that was hammering the coast did not reach us, so sheltered was the lake, but a fine mist did, and as the canoe stole in toward the inlet, we were cramped and cold. Suddenly as the rushes scraped the sides of the craft with a whispering sound, there came a splash from the shore, and the next instant something landed in the canoe with a sound like the blow on a bass drum.

There was silence for about one long breath, and then a series of beats that rang out like the long roll at midnight. Great Scott! What was that? Only a black bass feeding close to shore! He weighed three pounds and met his Waterloo with a rap from the paddle. "That settles it," said Frank. "We've scared everything between here and Duluth."

Stemming the swift current, for we were bound to skirt the shore a dozen times, scare or no scare, the canoe reached the bay and began its slow monotonous journey, creeping in to shore, avoiding snags, and peering and prying into each little opening where the lily roots lay in shallow water, and a deer would be likely to feed.

The bay was the "stillest" piece of water we had ever struck, and the splash of a leaping fish sounded in that ghostly silence like the crack of a nitro shell. As the light picked up objects one after another, it disclosed a low marshy shore, fringed with rank alder growth, while the deadening bristled like the teeth of a giant comb. Once, twice the round was made. Nothing was doing; not even the stealthy plash that heralds the stealing away of a very suspicious buck. The deadening, the rank smell of herbage, and the sweeping of the light hither and yon gave both of us a creepy feeling that cannot be de-

scribed, only felt. To add to the weirdness, a wolf was howling back along the main lake, and a loon added his tremulo to the discord.

For the third time the canoe turned and started on its stalk. Then in the spot light we saw him. Two luminous spots; a shadowy figure. As the eye became accustomed to the scene, and the canoe drifted, propelled by the last noiseless thrusts, a noble head came into view, and from the mouth hung the dripping lily roots he had just garnered from the black ooze of the bay.

We followed (shame to tell it, but we were out of meat) the double roar of a ten-gauge "soft coal burner" loaded with No. 13 buckshot per roar. Then came a mighty splash and a threshing of the waters; came a blinding of the stern man as Frank swung around throwing the bullseye straight in the paddler's face; came Frank's victorious pæan, "Got him!"

Then other things came, or rather happened. Came one badly wounded, but belligerent, sharp-toed buck for one frail birch canoe; came the ripping of the thin, delicately molded sides; came an upset; came darkness. The light was out; the fight was on. Of course Frank's gun was in two feet and a half of water, and only the bay knows how much muck. Of course a maple paddle isn't the best thing in the world to caress a wounded buck with, and in the blackness, the bleakness, the wetness of the night there was enacted a scene for which the microscope fellows would have given a small fortune. While the buck was disengaging his legs from the canoe, and Frank was diving like a dipper duck for his lost artillery, I was backing away, hunting for the knife I thought I had—and didn't.

In some manner the buck's horns and my hands came in contact. With a grip like unto the nip of a Mississippi catfish on a section of the internal arrangements of a dead hen, I clung. Never play that "clung" number in life's policy game. Here is what happened: The buck threw up his head and then slammed it down. With his application of carpet beating tactics, he landed me stomach first on the bosom of the disturbed waters, and to tell you the truth, that hurts me yet when I think of it.

Fortunately the disturbed aqueous mixture closed over my slender frame before the lord of the woods had a chance to upper-cut with his antlers, or to straight jab with his sharp hoofs. For this, Mr. Buck, I return many thanks.

Now, Frank weighs about as much as two and a half of me, and after failing to recover his "soft coal burner," and after getting his eyes and nostrils clear from good old pond lily muck, he waded in (literally), and by some means unknown to the plaintiff, secured an unfair advantage over said buck by grasping that part that is supposed to keep the flies away. There's where Frank got in bad with the domestic economy of the deer. The old fellow—the buck, not Frank—reared back and sat down on the meat hunter. Frank again disappeared under the "drink" and the buck turned his attention to the canoe he had again run afoul of in the darkness. Now, my companion is no coward.

He is also some scrapper; also a "few" on lurid and expressive language. He also had not forgotten his knife and left it in a tent a mile or so away in the blackness. This knife was not one of the handsome deer-footed handled affairs you get for fifty tobacco tags, but was a regular old butcher product made by a cutler friend who knew what a knife ought to be. Frank found it, and getting a neck hold on the quarry and in spite of all efforts to shake him; Frank actually held on and cut the deer's throat. With a last despairing bleat, the show was over; that is, the meat-getting part.

We had the meat, but it was a question for a minute whether the shoe was not on the other  
(Continued on page 673.)

## Go Fishing WITH OLD PETE

His camp's down on Moosehead Lake. He knows every fishing pool from Kineo to Canada. He will show you trout and salmon fishing that in 3 days will take 10 years off your life.

Pete is one of nearly 1000 registered guides, white and Indian, in the Maine fishing country, and there are 5000 lakes and streams full of hungry, fighting game fish,

## In Maine Woods

Pete's some cook—broiled fish, fried potatoes, griddle cakes and maple syrup, hot biscuit, coffee. He'll make you think camp-fire cooking's the finest in the world.

Pete knows how to make a fellow comfortable on a bed of hemlock boughs under a tent beside a camp-fire.

It's the greatest outing in America. And it's EASY TO GO.

## Recreation, Sport and Other Uncertainties

By WILLIAM SIMPSON

*Photographs by the Author.*

IT is said every interesting life is imbued with a ruling spirit. However that may be, certainly there is a strong desire in the hearts of persons of varied occupations to spend periodically a portion of their time in out-of-door recreation and to seek, amid scenes close to nature, relaxation from the routine of daily toil.

There is a keen and fraternal interest between the participants in the various pastimes pursued in field, forest and stream. The principle of human nature, on which all depend, is the same, "undying spirit of contest," relief

fatuation of anglers for their joyous pastime. Cheerfulness is the spring from which their enjoyment flows; it is the parent of their friendship, and friendship is the key to their happiness, and if nothing happens to prevent, they just go fishing.

No angler ought to go away on a fishing trip without taking along some of the choicest fishing literature, "Little Rivers" and "Fisher-man's Luck," literature by Dr. Henry Van Dyke, who, in his contributions to fishing literature, is like the Statue of Liberty in New York Bay, towering alone in classic dignity. His books

went along. That is certainly the greatest fishing story ever told. It is two thousand years old, and undoubtedly will endure to the end of time.

Angling, by choice, my chief form of recreation, is the earliest art practiced and enjoyed by man. No one knows its origin. It antedates history. We fishermen have an excellent right to be proud of our pastime. It takes us away from the bustle and commonplace of busy existence to indulge and revel in physical, mental and comparatively seclusive enjoyment. It takes us out to the forest primeval, where

ON THE SPENCER STREAM.

SPORTSMAN'S HAPPY HOME.

from the humdrum of monotony and, life for awhile, in a state of primitive simplicity.

Many of the troubles of highly civilized life are caused by high-strung tension, too often worked up to nerve-breaking point by precise nicety. One day follows the other in a minute regularity of smooth monotonous existence. We look back over the past, and for a time we see a regular performance and we predict that to-morrow, the next day and the day after, will be like yesterday. But stop! You are surely dallying with uncertainty. "All work and no play makes Jack a dull boy," and is the path that leads to the office of the doctor, who often reverses the proceedings, and we have to acknowledge with Robert Burns that—

The best laid schemes o' mice and men  
Gang aft a-gley.

Only those who have been inoculated with the true spirit of outdoor life wonder at the in-

will brighten your camp, and if you are gloomy, they will dispel the gloom. Don't forget to add a copy of "Fishing Jimmy," by Annie Turnbull Slosson. It is the most touching and pathetic of stories and is told in a quaint inimitable manner. "Men I Have Fished With" and "My Angling Friends," by Fred Mather, are a source of great pleasure, full of quaint and delightful humor, and if you desire to enter the realm of a salmon fisherman, read "With Fly Rod and Camera," beautifully written by Edward A. Samuels, who relates his observations as an expert salmon fisher with a charm of manner, illustrated profusely with reproductions from many truly beautiful photographs.

Never were the hearts of men moved by deeper emotions than were those who listened to Peter at the Sea of Tiberias, when he said, "I go a-fishing." At any rate, they said, "We also go with thee," and it is recorded they all

at every turn new and unexplored features claim our wonder and admiration, where nothing is commonplace or tame, while the scenery is sure to please and enrich the memory.

To have your guide—the child of expedience—prepare at noon in the open your dinner, which you enjoy with keen appetite that only can be derived from active life in the bracing mountain air, and to return to your camp in the cool of the evening to the music of the flute-like song of the hermit thrush leading a concert of feathered songsters, and at the close of the day to enjoy that sleep that comes so easily and sweetly to the tired fisherman. There may be better pastimes, but if there are, they are unknown to me.

Some of the pleasantest recollections of my life are those looking from their hiding places in memory a half century ago, on the heathery banks of a Scotch burn with a youth-

ful companion when we were wee laddies, fishing in the big pools of a small burn with a boortree rod and a hook and line baited with a wriggling worm. I have a dim recollection of certain persons using a rattan under painful circumstances in conjunction with these outings during the age of "spare the rod and spoil the child." In the boyhood days, what a treat it was to think that the school would not keep on Saturdays, when we could go for a whole day fishing in the Fidich, or perhaps cast our line into the clear waters of the Spey for big trout or silvery salmon, and, on school vacation, fish the amber waters of the Deveron or white rapid waters of the Dee, if, perchance, the needful—which in those days was not always certain—could be acquired.

We twa hae paid 't i' the burn  
 Frae morning sun till dine;  
 But seas between us braid hae roar'd  
 Sin' auld lang syne.

—Robert Burns.

Some of the greatest pleasures of life come from friction with its difficulties. I know that anything that is easily acquired is generally of insignificant value, and the fruits of easy toil have a bad taste. During these three-score years I have learned the lesson that life is neither a pain nor a pleasure, but a serious business for us to live out and to terminate with honor.

It is a long way, and there is many a watery wave between the heather-clad hills of Scotland and the pine-covered mountains of the Adirondacks or the white birch woods of Maine, but the sport is the same and the spirit of angling is identical. Izaak Walton called it the "gentle art"; but for me to write of Walton on angling would be to hold a lighted taper to illuminate the sun.

The mystic call had commenced to get into my system, the show of Easter flowers in the florist's windows, or the beds of bright-colored tulips in the parks, may have been the origin of it in this case, or maybe it was the out-of-doors flavor of the articles in the magazines devoted to outdoor life. One or two rainy days furnished a reasonable excuse for overhauling the fishing paraphernalia, and by the middle of May I had all the symptoms of a well-defined case of fly-fishing fever. About the time spring was melting into the margin of summer, I felt the trend of vagrant inclination.

I looked carefully over the situation, and came to the conclusion that I would arrange for a trip to Franklin county, Maine, as the most inviting place to spend a vacation where we could have a greater variety of fishing within a radius of a few miles, such as could conveniently be enjoyed in a short vacation. It combined the Spencer Stream, where the fishing was superb, and near it from Eustis up the Dead River, which, in fact, is as lively a little stream as one could find. Tim Pond, a small sheet of water where Laura Louise and I spent two weeks, is a small pond less than two miles across, with sandy shores. The pond has no inlet or outlet, but is fed by springs. The water rises and falls a few feet, as natural conditions permit, and it contains a great many small bright-colored trout from a half to one and a half pounds each. I tried to get them to rise to my flies during the middle of the day, but they would not. About a half hour before sun-

down and during the hour of twilight they would take the fly actively. The surface of the water on the margin of the lily pads would seem fairly alive with these beautiful bright-colored trout, which were cooked to perfection, at the camp of about twelve log cabins, built to accommodate small parties, with one big roomy cabin that served as a sort of "casino" or "banquet hall."

We had a warm reception on our arrival—the whole camp seemed abandoned to merriment, as we passed to the cabin assigned us. We could hear amateur musicians rendering on various instruments, old familiar tunes, and we were ushered into the dining cabin to the strains of "The Cure For All Care," and never did an assembly of fishermen display a jollier galaxy of countenances. Those that were not handsome, at least showed every indication of being happy.

The meals were varied even more than one would expect, considering the rocky road over which we traveled from Eustis. The dinner commenced, continued and concluded with trout cooked with the high art of simplicity, in every conceivable style, to a turn, with a perfection of flavor that I have rarely seen equalled, except at Morrison Rogers' restaurant on Sixth avenue, New York city.

When the sun was high and the days were warm, we often strolled along the trails in the shade, gathering a few wild flowers, and often found wild berries and sometimes wild honey. It may not be the most fashionable form of summer diversion, but it was enjoyable and left no dregs in the cup. Nature is always as young as ever, even if some of her lovers have a few gray hairs, and, if you chance to meet another in the same path, you will quite likely unfold a new blossom of friendship; but any one who is prejudiced against chance can not consistently undertake this innocent pastime. Nature does not appoint a day on the calendar or a place on the map for her wild flower exhibitions.

It is in quaint wanderings through such scenery, that the mind enjoys the beauty and majesty of nature and the imagination quickens into rapture, and we revel in incommunicable luxury of thought.

In the curriculum of life, many branches of learning are taught, but the great lesson we learned from those pilgrimages was the secret of contentment.

After a pleasant sojourn at Tim Pond, we reluctantly bade a farewell to this hospitable camp, where nature's face was fair, and whose spell not only impressed the senses and excited the imagination, but where we had trout fishing to our heart's content.

A rough ride on a buckboard and a short journey on the railroad brought us to the Rangeley Lakes, far famed for large trout. There we made a conquest of some of the large ones, and certainly we had little chance of committing the judicial error of killing any trout under size. We employed our greatest perseverance and measured patience with our longest yard stick, but success smiled on our efforts at rarely more than one a day, all big ones. Those Rangeley trout are giants; but like all monsters, their size was at expense of beautiful features and graceful form. They seemed to be old and over-fed, and over in-

dulgence has on trout probably the same effect as on higher animals with which we are more or less familiar; per se the green turtle soup—old burgundy—port-wine complected and corpulent gormand, which type of individual, fortunately, rarely is seen on the banks of streams or with a fly-rod in canoe. He is more likely to be met with in the horse racing paddock, which leads us from the chance in trout-fishing to other outdoor forms of sport wherein the fickle goddess is omnipresent.

Baseball—that all popular American game—has been played in its various forms for a century, and for probably half of that time has been recognized as the American National game. The honor of its place of origin is disputed. Philadelphia claims to have been its birthplace, while New York insists on taking title to its discovery, and if the question were to be disputed on the field between the votaries of the game in those two cities, the umpire would have my heartfelt sympathy.

The baseball "fan" has a fairly good excuse for contracting ball fever and for sitting on the "bleachers" on hot summer afternoons with the thermometer at 100 in the shade, and goodness knows how much more in the hot burning sun. The impelling force of great numbers seems to keep the amusement active, probably because it requires only a couple of hours to see a game, necessitating only short absence from business, as professionally it is played in towns and cities well populated.

If judged by the fault-finding with the umpire who, on some occasions is as unpopular as a rainy holiday, where often some fans get so mad that if they bit themselves they would probably get hydrophobia. Nevertheless, we ought to be patriotic, as it is purely an American affair from the small boy with his dearly cherished ball and bat, to the gray-haired, sun-tanned veteran with a season ticket.

The game of golf, like a good many other things we enjoy, is of Scotch origin. James the Sixth of Scotland, and First of England, arranged the game, and it is claimed for him that he was a great scholar. But if all that is written of him be true, he often assumed the role of a pronounced pedant, and believed in "the divine right of kings." Often he played golf with his courtiers on the Scotch links. This game has become a leveler of all ranks of society, to the extent that the famous "oil man" of many millions frequently plays the game with his neighbor the "ice man," and although up in years, he is still young. His complexion, perhaps a little wrinkled, still is rosy, while some of his sour-complected critics of lesser importance and fewer years are like a bundle of kindling wood—all broken up.

A troublesome temper very rarely mellows or sweetens with age, and a sharp, vicious tongue is the only double-edged weapon that I ever knew to grow keener through constant use.

The world is indebted to the genius of the Scotch for many things, and so, as a natural consequence, they called upon these industrious people for something to occupy spare moments, after nature's mantle of green had disappeared under a covering of snow and ice.

Curling, that intensely Scotch game, the origin of which we know not of, though no one will dispute it as being one of the oldest

games played in modern times, thus found its way to existence. Where Scotchmen are and sufficient ice is, the game will flourish. Like the other Scotch classic—golf—it is enjoyed by all classes of society in almost every village in Scotland. Votaries of the sport, from the village cobbler to the 'laird himsel', will be found side by side on the curling rink. In the land of the Star-Spangled Banner, not only in the public parks, but also on the private rinks, "Croesus", the fiercest of all democrats, can be heard discussing the fine points of the game with his poor, but much respected neighbor. Historian, college professor, engineer and builder of great modern structures, meet and mingle on equal footing with the busy sons of traffic.

It is interesting to observe on the curling rinks these men, some of whom have created their own greatness, while many have sprung up under great disadvantage. Nature seems to glory in her chance productions, while some that have been cuddled in the lap of luxury—"born with a silver spoon in their mouths"—have been choked with the thorns and brambles of an easy life, and almost all of them have been sprinkled a little with the "heather dew."

Pride is certainly the least becoming of all vices in the players of any game, while chance in all pastime "showeth her handiwork," and pride is likely to meet with disappointment.

But to appreciate these things to the highest degree, you must not be content with reading of them. You must go to them, and once you form the habit, you will never regret it. If, however, I have been able to rub out some of the wrinkles from the care-worn brow, or perhaps beguiled the heavy heart or helped the reader to get into better humor with himself or his fellows, then my efforts have not been entirely in vain.

### Reprint "The Red Gods."

ALBANY, N. Y., May 25.—*Editor Forest and Stream:* If you ever do reprint any of those good old communications, for which readers sometimes ask, why not add those stirring ones on "The Red Gods"?

Personally, I'd like nothing better for a present. As a tempting ad. for the best open air publication, what could be better. The idea has possibilities. What say the brethren?

J. D. W.

### Pet Foxes Do Damage.

MANY persons secure young foxes, raise them as pets, and, after keeping them for a while, turn them loose on the public, saying that "it would be a pity to kill the poor things."

These liberated foxes, having become somewhat domesticated, yet never having been schooled as to how to obtain a living, do not hesitate to visit the poultry yard; in fact, they could not be expected to seek food elsewhere when they are positive as to where there is an abundance of it. One of these partially tamed foxes will do more damage in one or two nights than a wild fox will do during his entire lifetime.

In changing address, the old as well as the new should be given.

# How I Found a Salmon River

By H. A. P. S.

**M**Y office of Sheriff takes me to many parts of the county in which I live. And it was upon one of these trips that I unexpectedly found a salmon river. For many years a sawmill had been in operation just at the point where the salt water from St. Mary's Bay reaches the narrowest part of the river of which I write, through its short estuary. In due time the timber was cut off for some miles up stream, and the old mill was allowed to rot down, but for years afterward the dam still held, and prevented every fish from getting any further up the river (there being no fishway provided for that purpose). I knew that salmon had been seen trying to leap this obstruction, and also that a wandering pair of prospectors had killed some dozen fish with dyna-

some fishing for the king of all sporting fish right in my own county haunted me night and day for the next two weeks. Consequently, my young son and I planned a trip with canoe and tent, starting at the head of my newly found salmon river, ending at tide water. I knew that no salmon could possibly get past the first mill dam, some two and a half miles from the sea, and also that fine strings of trout, of goodly size, had been taken from the upper reaches of the river. So we decided to take a trout rod and fish for trout until we passed Saulnier's Mill, after which I should put up my salmon rod and carefully fish every pool which looked likely to hold a salmon.

The kid's birthday being on the 28th of April, that date was decided upon for the de-

FOOT OF MILL POOL, WHERE OLD DAM STOOD.

CLIFFORD'S RIVER AND SHERIFF'S POOL.

mite one spring, in the deep hole under the old dam.

Eight years ago the fall rains had swollen the river to an unusual height, and the heavy pressure thus placed on the old dam caused it to burst, and in a couple of hours every trace of it had gone to sea, save an old log or two stuck up here and there, which bowed and courtesied as the heavy freshet smote their nodding ends. The following April it became my duty to travel on business to within about a half mile above where the dam used to be. I was admiring the river as I drove along the muddy road, which follows the river's course for some miles, when I happened to notice a couple of small boys fishing with wattles and hooks baited with worms. Two small fish lay on a point of greensward near their feet, when something about their shape and color arrested my attention. I jumped from the wagon to examine the tiny fish. I saw at a glance they were salmon fry—their small, gamy heads and silver scales left no doubt. The boys said they had caught the two fish from where they stood. I drove on, but my thoughts were not of business. I knew that where those little fry were salmon had been, and the prospect of getting

parture of our little expedition of exploration. On the afternoon of the above date we stood on the platform of the siding and watched the freight train disappear around the curve. It was only about half a mile to the river over a hardwood ridge, and I with the canoe and part of the grub, and the boy with the rest of our duffel, were soon unloading our burdens, both mental and physical, near the stream. Having trimmed our canoe and taken our seats therein, the Kid in the bow and myself in the stern, we pushed through the overflow and the fringe of the hard hacks that lined the water's edge, and were afloat on my river. Plenty of water prevailed, and paddling with the stream was easy work, until a rapids boomed and hissed ahead. We landed and walked along the bank to see if it would be safe to run the rapids or more prudent to portage through the heavy undergrowth to quiet water below. We decided to stick to our canoe and run through. So settling ourselves in the bottom of our good little craft, pushed out to the middle of the river and soon were racing through the "white" water. We made a mess of it, for our canoe got aslant, and round she spun. However, to our utter astonishment, we did not

touch a rock, but waltzed through somehow into a deep basin that looked propitious for trout. Here we paused to have a cast. Backing the canoe, I held her in position by the overhanging limbs, while the master of ceremonies set up his new five-ounce Hardy split-cane rod and selected a "professor" for the tail fly and a "Montreal" for the dropper.

It was an ideal pool for trout, with the back eddy fringed with foam. Scarcely had the flies touched water, when we knew there were large trout lying in its cool depths. In a jiffy the reel sang, and the little rod bent to the strain of a heavy fish. It was the largest trout the boy ever had hooked, and, of course, the first one of the season; but the tiny bamboo stood the combined strain of the heavy water and weight of fish, and slowly with circular rushes, ever shortening, he came at last to net. As I lifted him over the gunwale I saw he was an unusually large trout for Nova Scotia waters, so the scales were hunted out from the bottom of our duffle basket and registered exactly  $2\frac{1}{2}$  pounds. It was decided to save him to send home with other big ones we might take to Digby, via the mail team, when we reached civilization on the morrow; but he was destined along with even heavier fish never to reach their intended destination. In a few minutes another beauty of two pounds and yet another of  $1\frac{3}{4}$  pounds were flopping in the bottom of our canoe.

But now the shadows were beginning to creep, and reluctantly we pushed through the pool, shot another rapids, this time our paddles working in unison, and with a twist here and a push there, we dodged under some overhanging alders into a quiet still water. A green cove looked so tempting that it was decided to make our first camp there. While I busied myself with cutting wood and pitching the tent, my partner tried a few casts into the still water, soon securing enough fish for supper. Trout cooked in salt pork scraps in a hot frying-pan are good, particularly good when you taste them for the first time in the season. Well, these were no exception, and while the kettle threw out the sweet aroma of tea, and the frying-pan sang, life seemed worth living.

Long after the regular breathing of the boy proclaimed his tired sleep, I lay smoking and wondering if it could be possible that I had made my first trip to the woods a mere kid like he. The years I had loved the woods and streams and the adventures I had met with in virgin forest, were they to be repeated by my own flesh and blood? And I wondered, after all, if anything else could be worth while. Here at least was one spot where politics, religion or finance could not disturb the mind. I awoke with a shiver, for a white frost had fallen during the night, even creeping up to the fringe of dead embers about our little fire-place and congealing the water in our tin pail, which hung on the pot stick. Plenty of birch grew near, and it was only a minute until enough bark was stripped from a goodly sized tree to light the blackened embers again, and as the sun rose, we fried more trout and drained our "noggin" of tea.

Down the still water we paddled, while the sun warmed the earth and the birds began to sing. My, but the woods were full of song! Among all the songsters only one made us rest

upon our paddles as we listened to his sweet, clear notes. That most accomplished musician of all Nova Scotia birds—the white-throated sparrow—never failed to arrest our quiet attention as he sang to us from the top of some lonely pine. The world seemed a good place to live in this spring morning, and so carried away with the beauty of it all were we, that it was only by a quick twist of our paddles we shot our canoe into the bank, just avoiding having to run an unknown rapids that hissed and thundered around the sharp bend in the river ahead of us. Viewing the water as it tumbled and raced and foamed, I had grave doubts about running this rapid, but the boy was so anxious to try it, and to him it was such delightful fun, we took the chance. Directly mid-stream was reached, I wished we had not been so venturesome. However, it was too late to regain the shore and we flew through like lightning. My paddle scraped more than one jagged granite boulder before we jumped into a quiet reach of river 300 yards below. It was a wild ride and a dangerous one, but we both laughed as we took a look back, knowing the danger was behind and safely passed.

This still water was alive with trout. They jumped and rolled on all sides of us, showing their fins, but the May flies were here, too, in countless myriads, and fish as carefully as he might, the Kid could not tempt a fish with his imitations. Stuck in the last page of the fly-book was a single dry-fly, an imitation of the spent May fly. This as a last resource was bent on to the leader, and it worked a sudden change. At every cast a trout was hooked, and in an incredibly short time thirteen beauties were brought to net. Time was flying, and still we had many miles ahead of us; but now the fishing fever was upon me, and I longed for the tug of a heavy fish in heavy water.

Some twenty-five years ago the first rise of a salmon at my silver-doctor fly down on the Medway River had lured me from all other members of the finny tribe, and the keen interest in trout fishing which, as a boy, I possessed, departed then and there forever. Presently, the gnawing at our stomachs proclaimed dinner time, and coming to a sandy cove, we paddled ashore to "bile" the kettle. While bending over the water cleaning some of our smallest fish for dinner, it suddenly occurred to me how very quiet the woods seemed—every singer was silent. Glancing up, the cause was apparent. A sparrow hawk had singled out a blackbird for his meal, and made a vicious swoop at him, while the pursued and terrified bird made frantic efforts to dodge and reach a point of bushes across the river. At the second attempt the hawk struck his victim, scattering the black feathers of his plumage in all directions, and knocking the bird into the water. The hawk hovered above, afraid to dart again, for fear of getting into the stream himself, while the terrified bird flopped along the surface, at last gaining a footing under some drift stuff a much bedraggled bird, whereupon the hawk flew off. During this little tragedy not a bird was heard. However, they soon forgot it, and presently the woods were filled with song again.

[CONCLUDED NEXT WEEK.]

## THE TOP RAIL.

HAVE you noticed how hard, practically impossible, it is to get, at any price, a well broken bird dog? A raft of breeders or brokers advertise "thoroughly broken" stock. All outdoor magazines have the temerity to carry these advertisements, whereas if most of the magazine publishers knew a bird dog when they saw it, they would cease aggravating sportsmen with the copy that followed the workings of Phineas Taylor Barnum—humbug, for that's what it is.

I've fallen for the breeders' bunk a good many times and once only have I found the dog bird wise. About the only way to get a sure enough hunting bird dog is to buy a pup from a known family tree and send it to a trainer, of whom there are a few left, practically all in the South, and before you do even this get advice from someone who knows, not from magazine information departments who play up their advertisers, but from a kennel editor or well-known dog man; otherwise you will be fattening the coffers of a man closely related morally to the proverbial horse trader.

I have taken city gunners for ruffed grouse over one of my dogs, that I knew to be only partly broken, but who knew how I hunted, where he had found the birds on previous occasions, and how I expected him to act. The sportsmen went into ecstasies over the brute, offering me a price greater than I intended asking, after six months' more work on the pup. The temptation to sell was great, but I knew as sure as shooting that when that man, stranger to the dog, took the pup into strange country, he would be surprised and disappointed at the ignorance of that "almost human" bird dog. The temptation to a dog dealer would have been so great that he would have refused the offer and raised the ante. The question is whether or not the dealer would be wrong in selling on the demonstration when he knew in his own mind the dog was playing his lead well after many rehearsals on the same stage with the same setting, following the time worn cues. To my way of thinking, the dealer would have been wrong in selling at any price, but then even a dog dealer is human in spots—particularly hundred spots.

### Notice to Subscribers.

WE still have on hand some copies of the index for Volume LXXIX, (July-December, 1912) and will be glad to send copies to our readers upon receipt of a postal. The index for the current volume (LXXX.) will be ready for distribution about July 15. In order to facilitate delivery, requests should be received at this office before July 1.

# The Irish Setter

By WALTER H. DEARING

**T**HE history of the Irish setter, like that of the terrier, appears to be shrouded in a misty haze, out of which a number of conflicting theories have been advanced.

That he springs from the same origin as his cousin, the English setter, and that both breeds are offsprings of the spaniel, is conceded by most authorities, but even accepting this hypothesis at its face value, we are still left in the dark as to what other breeds were used in developing him to his present standard.

It has been stated by some that the Spanish pointer has probably played an important part in the inter-breeding which finally produced the setter dog, and it cannot be denied that many of the chief characteristics possessed by the breed are essentially the same as those of the old Spanish pointer. The Spanish pointer was noted for its extremely delicate scent, and drew up to its game in much the same manner as the setter. If the Irish terrier speaks of the combativeness of the Irish race, the setter speaks with equal force of its poetry. The psychology of the dog may not always show a connection with that of the inhabitants of the country and clime in which it has been raised, but Irish dogs unmistakably bear the stamp of Erin, and the Irish setter is no exception to the rule. Watching his graceful movements, whether at work in the field or at home, calls to mind the aspirations of the Irish race. Instinctively as one looks at his beautiful form and observes the noble aspect of his raised head, he brings to the memories thoughts of the Irish bards and Irish statesmen. His every motion seems like a breath of fresh air from his native heath. He speaks of O'Connell and Emmet, of Shane O'Neil and Brian Boru, of Tom Moore and the Bard of Armagh. His poetry of looks and motion is distinctly characteristic of his country, and in him we see the airy lightness of the will-o'-the-wisp combined with a strength and endurance that is the more charming because of the delicacy of outline which lends such an æsthetic beauty to his outward appearance.

Although the color of golden chestnut is recognized as the correct coat for the Irish setter, most people are apt to refer to it as light red, and like the tint of a person's hair, it may be seriously questioned whether the words chestnut, etc., are not used as much for their effect as for any other reason, and whether the various shades would not look just as pretty and sparkle in the sunlight with just as much brilliancy if they were referred to as light and dark red. "A rose by any other name would smell as sweet" and the young lady's hair looked none the less beautiful to her ardent wooer when her father referred to its Titian tints as being "red as a fox's tail."

It is said that the original Irish setter was usually red and white in color, and that the all red setter was a very rare specimen in the days when the breed was first known. The fact that the terrier, setter and spaniel of Ireland are all red dogs has given rise to the opinion among some writers that red may have been a favorite Milesian color, and that this accounts for the

disappearance of the red and white-spotted dogs and the predominance of the dark red and golden chestnut of the present breeds.

There seems to be good ground for the supposition that the red setter was considered the better dog for field work among the early Irish breeders, as references have been found which show that many of them thought the red dog superior to the spotted variety for this line of work. As this was of course the principal quality which was sought, it is reasonable to suppose the red dog gained ascendancy through design rather than by accident.

In the field the Irish setter works along the same lines as the English setter, but his methods are too well known to call for any comment. Years ago, when the setter was approaching the game, it was his custom to drop flat on the

the world over, and few of them would be willing to jeopardize their chances of a successful day's hunting for the sake of having the home bred dog at their heels.

As a matter of fact, the Irish setter has time and again successfully competed with the best bred and best trained dogs in the British Isles. They are proverbially speedy, and the neatness and dispatch with which they perform their work in field trials has called forth the unfeigned admiration of the best judges.

Some authorities are of the opinion that the Spanish pointer, which found great favor with English sportsmen during the end of the seventeenth century, largely because of his comparative sluggishness which made it possible for the huntsman to use his old-fashioned flint-lock gun in harmony with the dog's slow movements, was crossed with the foxhound when the improvements in guns made the field work much faster. It would seem to be a possibility if we accept this theory, that the strain of the foxhound may have been inherited more strongly in the Irish setter than in the other setter dogs,

MR. L. L. CAMPBELL'S IRISH SETTER FINGLASS, JR., (A. K. C. 31,189).

ground, but the crouching position which he has since been taught to assume has evidently proved more advantageous to the huntsman, as the old style of setting seems to have been abandoned altogether. His method of approach is much more nearly like that of the pointer than in former years.

It has sometimes been said of the Irish setter that he is too strong-headed, and cannot always be depended upon because of this Hibernian characteristic, as he is apt to spoil his otherwise excellent work by sudden bursts of impetuosity, but that the charge has never been proved to the satisfaction of Irish sportsmen is evidenced in the fact that he is used in Ireland to the exclusion of most all other varieties of the breed. While this may be largely due to a feeling of patriotic loyalty on the part of the Irish hunting fraternity, it is not probable that the native dog would be so extensively used if he had not shown himself at least the equal of other sporting dogs. Sportsmen are sportsmen

providing of course that the descent of the setter from the Spanish pointer be taken for granted. This would account for the impetuosity which some sportsmen have claimed is his worst fault, as the foxhound is naturally one of the most impetuous of dogs. There are no records to prove the truth of this hypothesis, however. It is merely advanced as a possible explanation of the dog's supposed tendency toward an occasional display of bullheadedness. Indeed, any apology on this score would seem almost out of place, and when his splendid record is compared with that of other sporting dogs, it seems strange that he has not found more favor as a field worker outside of his native country.

His remarkable stamina is one of the strongest points in his favor, and some of the feats of endurance which he has performed would put to shame the efforts of a more powerful dog. One of the most notable exhibitions of endurance ever given by an Irish setter was that of

the noted dog Wrestler, which competed in the Irish setter trial of 1891. The dog is said to have accompanied the cars to the moors each morning during the trials, usually running ahead most of the way, and at the end of his ten-mile journey was as eager to run as though he had just left his kennels.

The utility of the Irish setter as a hunting dog is not the only thing that makes him a desirable dog to own. His appeal to the dog fancy is equally as strong as to the hunting fraternity. In England, he seems to have gained more favor as a show dog than as a field worker. At least he appears to have captivated the ladies of that country with his winning Irish ways and his pleasant disposition. They have shown him a preference over the other setters, which is undoubtedly pleasing to his Celtic nature, and he is always strongly in evidence wherever lady exhibitors are to be found. He is not as particular with whom he associates as some other dogs, and will usually make friends with almost any one who treats him kindly, although a bit shy until he becomes acquainted. While this trait may be resented by some as a lack of loyalty to his master, it has its redeeming feature. It is a comfortable feeling for one to be assured that he can leave his house in charge of his dog and rest content that when he returns he will find everything just as he left it because the faithful animal will not allow a stranger to enter his home except over his dead body. But it is also a comfortable feeling for him to possess the knowledge that his faithful dog will not be overzealous in the performance of his duty and endeavor to dispossess his neighbor's child, or his best friend, of their clothing through a case of mistaken identity, so that there is something to be said on both sides. And after all, the Irish setter often makes an excellent watch dog, and will give warning just as resolutely on the approach of what looks to him like a suspicious character as many dogs of a more combative disposition.

He is somewhat of a rover, and why should he not be when we take into consideration the nature of his calling, and the fact that the sporting blood of generation upon generation is coursing through his veins? But he always finds his way home, and a pretty sight he makes as we watch him coming lightly back across the stubble fields during the shadowy twilight of a fall evening, treading gently from hillock to hillock, now lifting his handsome head to sniff the air, now lowering it again, running first to one side, then to the other, until finally, after having apparently examined the entire field to his satisfaction, he reaches his point of destination, and with a joyful bark springs to his master's side, and looking up for an approving pat, speaks as no human language can—of moors and root crops, of red grouse and partridge, of gentle breezes and fall sunsets, the eternal kinship of nature.

### His Way.

PORTRAYED BY "FLIGHTS OF FANCY."

They asked him, if with bait or fly  
He lured fish to their death,  
And got from him this apt reply:  
"I fish with bated breath."

## American Protective and Propagation Association.

### History of First Year's Work.

IMMEDIATELY after the organization was perfected, communication was established with the game commissioners of each State and with the different game protective bodies throughout the country, and assistance was offered in enforcing the game laws and instructing game wardens. A number of States availed themselves of this offer, notably Delaware, where in two weeks one of the association's wardens brought about more convictions for violating the game law than were secured in all the preceding years. Similar work has been done in Virginia, Massachusetts, Arkansas, Mississippi, Texas, Vermont, Connecticut, New York and other States.

In Massachusetts a man who had baffled the local authorities for years was brought to justice by one of the association's wardens, convicted, heavily fined and imprisoned. A special agent of the association assisted in organizing a State game protective association in Texas, and numerous local societies in other parts of the country. He also made a trip in the interest of the many deer which were starving in Mississippi on account of last season's floods. Food was provided for these animals, and hundreds of them were saved through his efforts. Contributions have been sent to assist game protective work in California, Kentucky, Mississippi, Arkansas and Virginia.

The game laws of New York and Vermont have been codified with the assistance of the association. An active part was taken in obtaining the passage of a law prohibiting the sale of game in Massachusetts, and the association's officers have appeared before numerous conventions and meetings of game protectors, addressing them on the subject of game protection. Addresses of this kind were made before the Biennial Convention of Game Commissioners at Denver, Colorado, in August, 1912, and before the Conservation Congress held in Indianapolis, October, 1912, with a result that this body passed a resolution urging the enactment of the Weeks-McLean bill. At the annual meeting of the West Virginia Fish and Game Protective Association and at many similar gatherings, addresses have been made. An exhibit of birds raised on the association's farm was shown at the Virginia State Fair and exhibits were also given at the State fairs of Massachusetts and New York. At all of these, literature was distributed, and the exhibitors daily addressed large crowds on the subject of game protection.

In addition to work of this kind carried on by the association's officers and agents, J. Alden Loring, one of the naturalists who accompanied Colonel Roosevelt on his African expedition, was engaged as a special lecturer. His work in this line was conducted in half a dozen States, with the aid of colored slides showing many forms of native bird and animal life.

The association was instrumental in having a specialist from the United States Bureau of Animal Industry sent to Utah to investigate and remedy a disease which killed two million ducks there in 1910 and recurred in the summer of 1912.

In April, 1912, the association established a game farm on Cape Cod, where birds are raised

which are distributed to members. A large number were sent out the first year, and it is expected that ten thousand will be reared during the season of 1913. The farm consists of 5,700 acres of marsh, field, lake and woodland, and is admirably suited for the pheasants, quail, ruffed grouse, black, wood, mallard and pintail ducks, Canada and snow geese and wild turkeys which have been placed there.

In the first year of its life the association enrolled about 3,000 members, including eighty-seven clubs and State organizations which have large memberships, so that it represents several hundred thousand sportsmen and game protectionists. There are members in every State of the Union except Nevada.

### A Federal Tax on Cartridges.

TOMPKINS CORNERS, N. Y., May 1.—*Editor Forest and Stream:* I hope that you approve of the proposition which I have been urging for a Federal tax on cartridges. At their best, cartridges are a luxury; at their worst, an instrument of crime. Nobody proposes to tax them out of existence. Nobody proposes a tax which would make a gunner hesitate to discharge his weapon at any legitimate game. But it is entirely possible and practicable, by a moderate tax, to lessen the wanton, purposeless shooting of small birds by village idlers and the conscienceless class of hunters generally.

It will be generally admitted, I think, that a tax on cartridges, sufficient to pay the expense of the enforcement of the migratory bird law, would be entirely just. It is the use—and misuse—of cartridges which makes necessary that law and practically all other game laws. The wild creatures belong to all the people. Living, they may be enjoyed by all. Slain, they profit only the killer. If the people as a whole concede to a portion the right to slay, that portion should not object to paying the cost of the necessary regulation of their privilege.

If you are able to give the proposition your support, those whom I represent, as well as myself, will be greatly gratified and encouraged by the fact. I am convinced that it is only a question of time until its justice and expediency will be generally recognized.

THOMAS M. UPP,

National Organizer, Order of Backwoodsmen.

[Our opinion on this was expressed in an editorial in last week's issue.—EDITOR.]

### Gulls at Sea.

AMERICAN gulls are said to follow a ship all the way across the Atlantic and back. They will go as far as the English Channel and from there they take up the trail of a west-bound steamer home again. They like the ships that carry immigrants best because the more passengers a vessel carries, the greater quantity of scraps are liable to be thrown overboard. In the same way that American gulls cross eastward and back, English gulls convoy liners westward and back. The English gulls differ from those which are familiar in this section in that they have black feet, yellow bellies and gray-white wings and backs.

"FOR right down comfort, give me an old shu."—Josh Billings.

# GAME BAG AND GUN

## Sprigtail Drake and Quail Shots.

PHILADELPHIA, Pa., May 13.—*Editor Forest and Stream:* Perhaps my description of the condition of the sprigtail drake, alluded to by your Packer, Conn., correspondent in your issue of the 3d inst., did not sufficiently make clear the result of the careful examination. I meant to convey that the live duck was not "badly injured," but so far as I could discover, entirely uninjured—only very much emaciated by lack of food while keeping watch alongside his slaughtered mate. The spot in the meadow where the birds were found is perhaps a quarter of a mile from the Delaware River, and there are no telephone or telegraph wires for at least twice the distance inland. Visiting the place two weeks later, I discovered the body of the female duck had been torn up and practically the "remains" consisted of the wings. Consequently, I concluded the drake after his experience with me had given up his vigil.

By H. E. W.'s article on the 20-gauge in last week's paper, I am reminded of a curious event which happened several years ago, and fortunately the main incident can be vouched for. I was quail shooting in the scrub oak section of New Jersey during the last of November in company with a friend whose business had not permitted any field shooting for several years. Knowing his old-time fondness for the sport, I was desirous of giving him what opportunity there might be of lightening the burden in his shell vest. Consequently when the dogs pointed in the middle of a triangular-shaped clearing, he was instructed to advance toward the dogs while I stood at one side to watch the main flight of the covey, being well assured from previous experience in the same locality, that a few birds would probably cross the open space and make for the "oak suckers" to our right. When they flushed, I noted the main portion flew straight away to the nearest cover in front, but that apparently three birds, several yards apart, made across the clearing. It was about 4 P. M. and the sky overcast, so I selected a bird which was clearly outlined just above the tops of the scrub oaks, and as he crumpled at the report of the gun, I quickly turned to watch the result of my friend's two barrels, as well as to determine the exact direction to take for securing the birds in front. To my question of "What luck?" he pointed to some drifting feathers and ruefully replied, "That's all I got." I walked perhaps thirty-five yards to where my bird had fallen, picked it up and turned a few steps toward my friend, when I heard the convulsive flutter of a dying bird. I looked back, and gathering it up, remarked on my luck in bagging a pair while only seeing one in line with my gun. We held a council of war as to the best plan for going after the scattered birds and finally decided to spend a few minutes searching for the other two birds I had seen flying to the right before tackling the others, which had

flown in the general direction of our route. The short way across the field took us right over the spot where I had previously picked up the two birds, and there lay a third one on the ground. Surprise is not the word to describe my condition. I was actually flabbergasted. Nor did I attempt to pick up that bird until after I had put my hand in the game pocket of my coat and actually felt the warm bodies of the other two, then examined the pocket for a hole, well knowing we had no shooting since dinner, when all our game had been left at the farm house. "Truth was stranger than fiction that day," and it was some time before I puzzled it out. The covey had evidently been feeding when flushed. Consequently two later-rising and lower-flying birds had come in line with the shot aimed at the one above the scrub oaks. I think your readers who have experienced shooting among these scrubs, whose leaves never seem to drop off, will agree they make an almost impossible background, and therefore that my theory is correct.

Well, I finally mustered courage enough to pick up that last bird, and, even like little Oliver, looked round for "more"—though I did not ask—before we struck into the oaks to the right and the dogs finally flushed one which we "scratched down" and bagged, then to the rest of the covey where my friend had no luck owing to the dense briars.

Sometimes the eye plays us strange tricks. I recall a case where my friend and self unexpectedly came close together in a little opening in the woods where a covey flushed within fifteen yards, and each made a quick shot with one barrel. We both noted the fact that one bird had fallen and naturally accused each other of having shot at the same bird. When I stepped forward to pick it up I discovered another within not over ten feet of the first, thus disproving entirely our first impression. SCOLOPAX.

## New Game Laws in Montana.

THE 1913 game and fish laws of Montana, just issued by State Warden J. L. De Hart, contain some radical changes from previous laws.

Previously angling knew no restriction. Now not more than twenty-five pounds of any game fish (cleaned) may be taken in one day, nor more than ten fish under six inches. Only one doe may be killed, although the old limit of three deer still stands. Elk, with many county exceptions, are protected until 1918. Ewe and lamb Rocky Mountain sheep are protected. Song birds may not be taken at any time. Game birds, killed in other States, may be possessed and sold at any time.

THE Legislature of Pennsylvania has passed the bill for a hunter's license law, a law prohibiting the sale of plumage of American birds for millinery, and to place the herons, eagles, ravens and shrikes on the list of protected birds.

## More About Geography.

OCONOMOWOC, Wis., May 15.—*Editor Forest and Stream:* Your Las Animas, Colo., correspondent, F. T. Webber, is quite correct regarding my inadvertence in naming Fort Wallace, then in Western Kansas (not Kentucky, as he has it) as Fort Russell, in Wyoming, and in the buffalo story N. P. should have read U. P.

I am glad to have the address of Mr. Webber, as he may be able to gratify me with information of old friends of those days when his town did not exist, it being myself that located and laid it out in '72-3, and to which point we built a branch road, later taken up. Fort Russell, near Cheyenne, is still maintained and was formerly called Fort D. A. Russell. Forts Hays, Wallace and Lyon, near Las Animas, are long abandoned.

The habit of the buffalo in facing cold winds and storms applied also to the antelope, its coarse open hair affording protection to its body in only that way.

The experience of Martin and other train engineers in being held up by buffalo crossing the track was, as related to me, far exceeded when the steamboats of the old line between St. Louis and Fort Benton, Montana, antedating the Pacific railroads, were at times compelled to stop and tie up, awaiting the slow crossing of the Upper Missouri River by great herds of buffalo, then in quiet possession of its borders.

D. M. EDGERTON.

## Carrying Game Through New Jersey.

THE CITY OF NEW YORK, Office of the President of the Borough of Brooklyn, May 16.—*Editor Forest and Stream:* On Sunday night, Jan. 5, 1913, while returning from the home of Fred G. Metzger, Postmaster of Yulan, Sullivan county, N. Y., in company of my wife, G. M. Wainwright and sister-in-law, we were arrested at Jersey City terminal of the Erie R. R. by Deputy David Besant and another game warden on charges of carrying a shotgun and having in our possession one rabbit, a present of Mr. Metzger. We were taken, without much ceremony, to Hoboken, where Justice of the Peace John J. O'Brien was holding Sunday night court. His awe-inspiring presence and his features reflecting a life of study and learning, together with the knowledge that he represented the majesty of the law which we had so grossly violated and held in contempt, was sufficient to strike terror into the hearts of our little band, and creepy sensations crept up and down the spines of us all as we were dragged before him for his punishment. The proceedings were entirely informal, no complaint being read off to me, but simply a few memoranda taken by O'Brien. After much cogitation and with many mournful but wise shakes of the head, first glancing on the floor now at the ceiling as though there to find some solution whereby we would feel the weight of his wrath, he seemed to be visited by an idea, for he said, '\$46.80 or

thirty days in jail." Amid much protestation I parted with the \$46.80 in this way to satisfy justice in the person of Mr. O'Brien. Of course O'Brien is not a lawyer.

I took an appeal from the decision and the case was called in the Court of Common Pleas yesterday (my lawyer, William M. Rysdyk, Jersey City, N. J.) The State, through its assistant attorney general, Mr. Stryker, made no defense as the charges were admitted entirely without warrant, and consent was given by the official mentioned to this manner of settlement. Judge Sullivan thereupon stated he would sign an order of the court, directing the return of the fine imposed. The deep reverence and awe we had entertained for Justice O'Brien, the author of our difficulties, gave way to feelings of surprise and amusement when we met that gentleman in full uniform and cap, running the elevator in the court house. In Jersey City an elevator man and at night and Sundays in Hoboken, a Justice of the Peace. I would like you to give this case space in your valuable publication to serve as a warning to others who may be trapped in the same manner as I.

WM. RUTTER.

TRENTON, N. J., Nov. 26.—*Editor Forest and Stream:* Any New York gunner shooting game in the State of New York and reaching his home in New York State via a railroad which traverses New Jersey, should not be held up or fined for carrying such game, provided he exhibits a New York hunting license and can satisfactorily prove that such game was not killed within the State of New Jersey.

If there is any question about such gunner satisfactorily proving his right to carry such game through our State at the time of his being prevented, I think in all justice to the Fish and Game Commission of New Jersey he should leave a deposit in a suitable amount which deposit should be returned to him when he furnishes such proof by affidavit or otherwise that the game was killed without our boundaries.

It is not the intention of this commission to persecute anyone, and we do not propose to allow any warden or deputy to extort unjustly any fines that are not perfectly proper, and at any time we are glad to take up and carefully examine into any cases that may occur about which there is any question. Attempts are made so often to infringe and impose upon our laws that we simply in self defense must throw every possible safeguard about them, and I can assure you that no injustice shall be done anyone if it is in the power of this commission to avoid it.

ERNEST NAPIER,

President New Jersey Fish and Game Com.

[Reprinted from issue of Dec. 7, 1912.—EDITOR.]

### Notes from Orchard Lake Club.

FISHING this spring has been very good. The first three days in the season twelve rods took 340 fish. The following week one rod took 165 fish in five days. A man cannot really want much better fishing than that. None of these fish of course was wasted. They were either used or returned to the water unharmed. Possibly that principle is one of the causes of the good fishing in Orchard Lake.

### Canandaigua Sportsmen's Club.

At a meeting of the Canandaigua Sportsmen's Club, held May 8, steps were taken with a view to reorganizing the club. The important changes made in the constitution were the amendment limiting the membership to sixty-five, which was increased to a hundred; initiation fee and annual dues were increased \$1, making membership fee \$3 and annual dues \$2.

A committee will take measures to incorporate the club at once, so that it may acquire and own property in view of club house plans which contemplate securing a desirable site for an ample home of the bungalow type for the club, additional traps and an up-to-date shooting ground and equipment.

Many new members have expressed themselves ready to take advantage of the opportunities of this arrangement, and it is planned to have the new quarters ready for the annual tournament in August.

For the present, the club shoots, beginning Friday, May 16, and every two weeks through the season, will be held at the Lakeside Park traps.

A fine gold medal trophy, donated by J. H. Chamberlain, has been inscribed for the club championship emblem for 1913. The shooters will also compete at each regular shoot for silver and cut-glass prizes, and high average for the season will win imported, hand-painted china, five prizes in all. The club this season will use White Flyer targets exclusively and obtain a new trap to throw "doubles," regarded as the best practice for the game hunter.

Present at the meeting were C. A. Soule, W. J. Kibbe, A. A. Sterling, M. L. Frone, Louis Briggs, J. H. Goodno, W. L. Reed, A. E. Mason, A. C. Brink, E. L. Van Wormer, Fred Woollett and Thomas Manning.

### Hunting in California.

BERKELEY, Cal., May 13.—*Editor Forest and Stream:* The efforts of the Spring Valley Water Company to rid its holdings in San Mateo county of predatory animals have been meeting with much success, and since trappers have been placed at work there more than one hundred coyotes have been killed, not to mention a large number of skunks, weasels and other game destroyers. In Mendocino county a determined effort is being made to reduce the number of mountain lions and several hunting parties are out earning bounty money. One party killed three of the animals in one day and another on the following day. Deer are reported to be very plentiful in that section this year. The season opens there on July 1, but efforts are being made to have the opening date a month later.

The California State Legislature is so busily engaged on other matters that game legislation is not being given much attention, and it is doubtful whether or not there will be many changes made in the present laws, although some are badly needed. The non-sale of game bill has attracted more attention than any other measure along this line and has passed the Assembly, but has been amended in the Senate to permit the sale of wild ducks during November.

The third serious shooting affray in as many

months in which State game wardens have figured took place late in April near Tule Lake in Northern California, when Game Warden Frank P. Cady and U. S. Deputy Marshal Mellenger were attacked by eleven South Fork Indians whom they had arrested. The Indians were being taken to Madeline, when suddenly they turned upon Cady, seized his rifle and shot him in the back. The deputy marshal was shot twice through the body and lost two fingers. The Indians escaped, but it is believed that several were injured.

GOLDEN GATE.

### Useful African Birds.

SIR HARRY JOHNSTON, the famous African expert geographer and zoologist, has been engaged in a lively correspondence with the chairman and secretary of the Plumage Committee and Textile Trade Section of the London Chamber of Commerce, concerning the enormous amount of mischief in different directions brought about by the wholesale destruction in all parts of the world of insect-eating birds, for the sake of their plumage. The plumage officers pressed him for facts in support of his contentions, among others, that many of the slaughtered birds were the natural foes of the deadly tsetse flies, which are responsible for sleeping sickness and other maladies. He replies:

"This argument, of course, only applies to Africa, the home exclusively of the detestable *Glossina* genus of blood-sucking flies. Well, in Africa, especially in West and Central Africa, the principal—almost the only—foes of the tsetse are the glossy starlings (and ox-peckers), the bee-eaters, the Halcyon kingfishers, the rollers, the white and smaller herons above all (including the several species which supply egret plumes), guinea fowl, francolin, quail, snipe, plover, pratincoles, swallows, swifts, fly-catchers, shrikes, barbets, drongos, the smaller cuckoos, the trogon and certain rails. Many of these birds also prey on the mosquitoes; or, if they are aquatic, like ducks, ibises and flamingoes, devour the mosquito larvæ in the water. They also prey upon the larger blood-sucking gad-flies and on the several germ-conveying ticks. Who has seen them do this? I have, during twenty-seven years' study of tropical Africa. Who else? George Grenfell, the missionary; Sir Alfred Sharpe, M. Auguste Chevalier, Alexander Whyte, David Livingstone, James Chapman and many German, French, Swiss and American travelers of trained powers of observation."

### New Publication.

WINGS AND HACKLE. By Raymond Hill, 8vo, 288 pages. E. B. Horwood & Co., Ltd., London, England.

A contribution to fishing literature, rather too much, as its sub-title describes it, a pot pourri, to be of great value to the fisherman's library. Candidly, it is much more interesting than instructive. Sandwiched in between things piscatorial is a bit about birds, a particularly attractive chapter being devoted to angler's birds, those commonly observed along streams during fishing time. This phase of the work is absolutely unique among anglers' works. As a descriptive writer, Mr. Hill excels.

# SEA AND RIVER FISHING

## Surf Casting

### Second Paper

By SWITCH REEL

ONCE upon a time a New Jersey surf fisherman was heard to state that he could cast better in the northeast wind than in a west wind.

This was greatly surprising, as the coast of that State from Sandy Hook to Barnegat Inlet swings but little west of a line drawn from north to south, and casting in a northeaster means casting almost into its teeth. While our friend's reputation as a fisherman and a man of truth is high, yet his reputation as a caster might be somewhat better, but still the connection between his lack in that direction and his remark about the northeast wind was not at once apparent.

Once upon another time a New York surf fisherman was heard holding forth at an anglers' club tournament upon the necessity for carrying the swing of the rod completely through, as the bat and the golf stick are carried through. My friend of the northeast wind is notoriously bad at carrying the swing through. When facing east, he generally stops his rod with the tip pointing about south or perhaps a little east of south.

Last season the longest cast recorded in any tournament within the writer's knowledge, 292 feet, was made by a caster who does not quite carry his rod through. Yet in practice some of his unsuccessful opponents had far exceeded that distance.

All these statements are of truth. What, then, is the factor which is to harmonize their seeming contradictions? The philosophers tell us that truth is harmony, so there must be some way to reconcile them.

For want of a better term, the writer would name this factor "pointing," meaning thereby the direction in which the rod is pointing while the lead is tearing yard after yard of line through the air.

A previous article mentioned what appears to the writer to be a fact, to wit: that a surf line, during the progress of a cast, possesses a sort of rigidity in motion. In other words, it absorbs somewhat of the quality of a flying bullet or a flying sinker to resist deflection from its course. Unquestionably the course of a surf line is the curve it occupies from the sinker to the reel. After the caster has imparted his power to the lead and lets go, he has no control over it except to stop it. Therefore, he may disregard the lead and devote his whole thought and care to the line. And, discounting "birds' nests" and "back lashes," the limit of his ability is reached in preventing deflection as far as possible. If the lead could only make

a hole in the atmosphere which the line would follow, we should see what would be considered wonderful casts to-day.

But the weight of the line tends to deflect it downward, and modified by speed and wind, will show a potent influence also. The down-

A FIFTY-POUND CHANNEL BASS.  
Taken on New Jersey Coast.

ward tendency of weight can be modified by cutting weight down and using the lightest suitable line for the purpose, and after that is done the downward tendency may be disregarded.

The only remaining influence to be considered then is the wind.

Now let us see why the first mentioned caster casts better in a northeast wind. A northeast wind along the upper Jersey coast is about an 11 o'clock wind to the caster. Our friend stops his rod when it points to about 2 o'clock,

and the 11 o'clock wind carries the progressing line more and more into the 2 o'clock direction. The result of this is that there is less and less abrupt deflection of the line at the tip of the rod and a comparatively good cast results. But since the prevailing summer winds along the coast are west and south; in other words, 5 to 8 o'clock winds, their effect upon a line passing through the tip of a rod, pointed at 2 o'clock, is to throw a more or less acute deflection, and the worst of friction right at the tip, and that's where our friend's reputation as a caster is lost. Should he carry the swing through and avoid the abrupt angle, made by the line in passing through the tip of the rod, his cast would be considerably lengthened when the wind is in the prevailing quarter, i. e., 5 to 8 o'clock. But his habitual pointing is best only in the 11 o'clock wind.

No argument need be brought forward in support of the plea to carry the rod entirely through. The common sense of it is apparent at a glance. It is obviously the thing to do when the wind is at one's back, for then the correct pointing is obtained. But in the 9 o'clock wind, which held strong all day when the winning 292 feet, cast above mentioned was made, the unconscious "form" of the winner caused him to stop the motion of his hands when the tip of his rod was pointing about 1 or 2 o'clock.

"Pointing," then, seems to be the factor which reconciles our triangle of contradictions. The application of this factor to surf-casting, and possibly to light bait-casting with single-handed rods, would call upon the caster to keep his eyes on his line at the tip of the rod and just beyond. If an angle appears in the line, a slight movement of the tip dissipates it ere much damage is done. Let us not think that the whole secret of casting lies in thumbing, once the weight has been properly started on its journey. Thumbing is a fine art and must be mastered first, but after it comes the art of sustaining a smooth and uninterrupted curve in the line from reel to sinker, and these words are written to aid in the capture of that art through "pointing."

Pointing is applicable to side casting and to overhead style. It is more easily accomplished, perhaps, in the former style, but can be added to the latter after the cast has been made in the usual manner and the rod brought to rest by at once moving the tip to the necessary direction if there be an unfavorable wind.

### Facts About Nebraska.

THE population of Nebraska is 1,192,214; farm homes, 129,678; total homes, 223,000. Average acres per farm, 297.8; average value per farm, \$16.038; farms run by owners 80,237; farms run by renters, 49,441; automobiles in the State, 29,591; farm-owned automobiles, 23,969; number per capita, 1 to 39.9 population; number of farm-owned autos per farm, 1 to 5.4 farms.

**National Ass'n of Scientific Angling Clubs**

THE proposed amendment to the constitution of the National Association of Scientific Angling Clubs is as follows: That Section 5 of Article II, be amended as follows: A professional is defined as follows—One who is or ever has been a market fisherman; one who is or ever has been a teacher of casting for pay; one who is acting as a paid guide; one who makes use of his own or a fellow caster's ability for any purpose of advertising; one who advertises or solicits for the sale of any casting device or any article of fishing tackle on the grounds of any casting club.

N. C. HESTON,  
A. F. SWISHER,  
C. P. CLIFFORD,  
GEO. A. MURRELL.

**Big Brook Trout.**

ALBANY, N. Y., May 25.—*Editor Forest and Stream:* In your issue of May 3, M. E. O'Brien, of Valentine, Neb., tells of his big brook trout (5 pounds 6 ounces) and asks how large the brook trout grows and what is the record fish. I've been waiting for some of the older brethren to enlighten him, but since they are too busy fishing, let me try to help out.

In New York State big trout are not frequent, at least not in recent years. But specimens weighing from three to six pounds are not uncommon, according to our standard book—"The Fishes of New York." It also is recorded that the famous Rangeley Lakes have produced many specimens of large fish and one of eleven pounds' weight is mentioned. Seth Green recorded that he took one weighing twelve pounds in the Sault Ste. Marie. Dr. Bean's book also says that Hallöck mentions a brook trout weighing seventeen pounds, and thus far I have never seen a fish of greater weight recorded.

In artificial fish culture a trout four years old is estimated to weigh one pound in our State. The growth, of course, depends on the feeding as well as on the water.

Nevertheless, anglers in this section will take their hats off to the Nebraska brother and wish him some more such luck. Also let us hope he had the big one mounted, or at least photographed. In the latter case he ought to send the picture with some account of the catching of the fish to FOREST AND STREAM.

JOHN D. WISH.

**Fishing in California.**

BY GOLDEN GATE.

BERKELEY, Cal., May 13.—*Editor Forest and Stream:* Trout fishing is now general throughout the entire State, and from almost every section where trout streams are to be found reports are coming in to the effect that already excellent sport is being enjoyed. Both Sierra and Coast range streams are low for this season of the year, and in some places good fly-fishing was in order on the opening date. There is now but little snow in the mountains, and as streams promise to be extremely low, the early fishing will undoubtedly be the best. Very low water was the rule last summer, but conditions are expected to be even worse this season.

A large number of anglers from San Francisco spent the opening day of the season on the Truckee River, following a long established custom, many of these being members of the California Anglers' Association and the San Francisco Fly-Casting Club. The latter organization maintains headquarters near Union Mills, and this is a rendezvous for anglers from the Bay City. Just before the opening day the flood gates at the source of the river were lifted and the stream was high, but by the time fishing was in order the river was in fair shape and some splendid catches were made, even where flies were used exclusively. Bait fishing, however, yielded the best results.

The best sport along the Truckee River was just across the State line in Nevada, but California anglers who desired to try their fortune there were called upon to pay the non-resident license fee of \$10 for the privilege. It is believed that fishing on the California side will be much better this season than was the case a year ago, and that larger fish will be taken, as the new fish ladder at the Derby Dam is now in working order, enabling the fish to get upstream without difficulty. Last year tons of splendid trout perished at the foot of this dam.

On the upper stretches of the Sacramento River and its tributaries fly-fishing is now in order with trout rising best to a salmon fly lure and gray hackle with yellow body. The main river is still a little high for fly-fishing, but is falling rapidly. In the vicinity of Sims anglers using bait have been experiencing the best sport in years, there being absolutely no difficulty experienced in securing limit baskets. A number of San Francisco anglers have visited the McCloud River during the past week, among these being Dr. J. A. Wiborn and wife, Al Cummings, William Ellery and Harry Blatchley. This stream is noted for its large trout.

The Feather River country was given considerable attention during the opening week of the season, but is scarcely ready for the best sport. The river is falling rapidly, however, and by the first of June fishing should be at its best. Long Valley Creek, near Cromberg, is yielding good baskets of small trout, and the Feather River above this point is in fair condition. There is still snow in the lake country near here, and this will not be open for some weeks. But few anglers are preparing to go into the Big Meadows country this season, as the meadows are being transformed into a great lake by a power concern, and conditions there are unsettled.

The season for black bass fishing opens the first of June, and some great sport with this game fish is expected. In a few localities this fish is still protected by local ordinances to enable it to get a fair start, but in the San Joaquin and Sacramento rivers it is to be found in great numbers. It is surprising the manner in which this fish adapts itself to different conditions, and is now to be found in many of the rivers and lakes throughout the State. Word has been received from J. R. Meyers, of Kauai, Hawaii, by a local sportsman to the effect that the fifty black bass fry taken from San Francisco to the islands less than three years ago have thrived wonderfully, and that some have been caught weighing over three pounds. The black and striped bass introduced into California a

few years ago have proved to be the most valuable food fish ever brought here.

The Cassidy fish bill has been passed by the upper house of the State Legislature and is now being considered by the Assembly. The bill provides that a reservation for all kinds of fish, shellfish, crabs and shrimps shall be created, this to consist of all the sloughs, rivers, streams and creeks directly tributary to the Bay of San Francisco and San Pablo Bay, but not including the San Joaquin and Sacramento Rivers or the Straits of Carquinez. According to this measure it will be unlawful for anyone to use nets, seines or traps of any kind for the purpose of catching fish or shellfish in these waters.

**Illinois Casting Club.**

CHICAGO, Ill., May 12.—*Editor Forest and Stream:* Owing to the inclement conditions Saturday, May 10, the meeting was postponed to the following day, when with a clear sky, light northeast wind of twelve miles an hour and with twenty-one members present, seventeen taking part in the contests, the four events for the day were cast.

Two noteworthy occurrences of the day were Brother Whitby's excellent score, at an opening event, of 99.4 in the half-ounce accuracy bait, and Brother Tournier's entrance into the 99 class with a score of 99.2. The scores were as follows:

Half-ounce accuracy bait:		
Swisher .....	97.2	C. W. Grant..... 96.3
Amman .....	98.7	Kernaghan .....
Tournier .....	99.2	Pierson .....
W. T. Grant.....	94.7	Hornstein .....
Cal McCarthy .....	98.1	Peacock .....
Huntley .....	95.6	Moffett .....
Whitby .....	99.4	De Garmo .....
Tice .....	98.4	
Distance fly:		
Amman .....	98	C. McCarthy .....
W. T. Grant.....	85	De Garmo .....
C. W. Grant.....	88	
Half-ounce distance bait:

There will be no contest on May 25, as that is the date of the State tournament, held by the Chicago Fly-Casting Club, at Anglers' Pool, Garfield Park, to which the members of the Illinois Casting Club are most cordially invited. It is hoped our club will seize this opportunity to offer the same courtesy shown us by the Chicago Fly at our tournament.

The casting will begin at 10 A. M. sharp, and the events will be dry fly accuracy, accuracy fly, quarter-ounce and half-ounce accuracy bait. Cups will be awarded to visiting members in each event and ribbons for second and third places.

J. D. ANWAY, Sec'y.

THE colonel came down to breakfast, the morning after the party, with a bandaged hand. "Why, Colonel, what's the matter with your hand?" they asked him. Confound it all." the Colonel answered, "we had a little party last night, and one of the younger men got intoxicated and trod on my hand as he was walking across the room."—Shooting Times and British Sportsman.

**San Francisco Fly-Casting Club.**

THE fly-casting contests of the San Francisco Fly-Casting Club follow:

Medal contests, series 1913—Saturday, contest No. 4, held at Stow Lake, May 10; wind, light; weather, fair.

The Long distance light tackle event had scores as follows: Forbes 78 feet, Burgin 75, Kewell 81, Wells 95, A. Sperry 72, H. B. Sperry 80, Cooper 82, Bell 79, Wells (re-entry) 95.

Judges, Stanley Forbes, C. H. Kewell, James Watt; Referee, C. G. Young; Clerk, E. O. Ritter.

# The Angling Rod in Central Ohio

Forest and Stream thanks the members of the Columbus Anglers' Club for the honor of having been made their official organ

Third of a Series of Articles on Clubs

By GEORGE M. CLOUSE

Photograph by Author.

**S**PORTSMEN of the rod are looking for a magazine that will have much to say about scientific angling—something that will teach the correct tackle, how to repair it and how to take care of it; habits and haunts of different kinds of fish; some ichthyology; how to cast; or, in other words, a practical knowledge of how to creel desirable fish.

Why should we rehash these too much self-taught subjects? Because of the lack of uni-

formity of the art of angling, and because there are thousands each year of novices who take up the rod for recreative sport and are eager to be taught correctly scientific angling. But, says one, we can learn all this in books written on these subjects. If so, then why should we have any magazines at all on any other subjects? No, you cannot learn it all in books—they have their place, and so do magazines.

To plead for this kind of sportsmen's

journal, we can hear the wail of the editors to the effect that they cannot get writers; that other outdoor sports would want for a representative publication; that they must practice altruism, etc. While this is more or less true, and while there is an inter-weaving of the love of the rod and gun in the hearts of sportsmen, nevertheless, in my opinion, the enthusiastic interest for the rod is on the increase, while that of the gun is on the decrease. This is almost a natural result, for, to go with the gun much longer means extinction of its quest; then add to this condition the rapid placing of homes, the advance of agriculture and destroying of all suitable cover. To destroy the home of the game means its annihilation. No, Ohio's cover for game is diminishing year by year never to return. Again, the high cost of living has made the expense of a gunning outfit and ammunition, etc., an item to be considered.

Now as to the rod: The first cost for an outfit as compared to the gun is about one-tenth as much, and the upkeep is probably one-fiftieth, and the habitats for fish can be practically continued as nature had planned; and the State will continue to plant billions of fish in all of her suitable waters without cost to anglers. Then why not the rod? It will lead you to beauty spots of nature, there to breathe in more ozone, to make more red blood, and make life worth while. You have more opportunities to get next to nature and with a greater number of congenial associates, even with the fair sex. Children and the aged, rich and poor, all walks of life, and all types of humanity participate in this custom of outdoor sport which was begun by the pre-Adamic race.

Let me tell you about the Columbus Anglers' Club.

In Ohio's capital city there was organized in May, 1911, an angling club of about twenty members—we now have 1,200—and every indication points to a membership of 2,000 in a comparatively short time. I will challenge any similar organization of like number to produce more men—men of affairs—voting citizens, more wealth, more broadmindedness, more politeness, yes, more brains, than is found in this body of anglers. Our purpose is the protection of game fish and the creation of a healthy interest in scientific angling. And we stand for the co-operation with Ohio's fish and game laws; for stocking our waters with suitable fish and the protection of same; for personal opposition to illegal fishing and pollution of streams; for using our influence to obtain more efficient legislation for the protection and propagation of fish and game. We affiliate with the National Association of Scientific Anglers' Club. Our tournaments create a friendly rivalry, social entertainment and an opportunity for the novice to receive instructions in the art of casting.

With appreciation and pride we can announce the co-operation of the Park Commission which grants us the right to use the lagoon in Goodale Park for a fish hatchery, into which water two carloads of one to two-pound bass have been planted. And the lagoon in Franklin Park has our permanent targets of tournament regulations, and it is here we hold our spring and fall tournaments, and

"BIG DARBY."

Published Weekly by the

FOREST AND STREAM PUBLISHING COMPANY,  
CHARLES OTIS, President.

W. G. BEECROFT, Secretary. W. J. GALLAGHER, Treasurer.  
127 Franklin Street, New York.

**CORRESPONDENCE**—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

**SUBSCRIPTIONS:** \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

**ADVERTISEMENTS:** Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

### NEW YORK STATE FORESTRY BILLS.

It is only the possibility of being overlooked in the excitement of enthusiasm over direct primaries that can prevent Governor Sulzer's signing that most worthy bill—McLelland-Jones (Assembly 2733) recently passed by the New York State Legislature. The bill is backed by the Empire State Forest Products Association, the Adirondack League Club, the New York State Fish, Game and Forest League, the Association for the Preservation of the Adirondacks, the Camp-Fire Club of America and the New York Board of Trade and Transportation, and practically all other authorities on forestry in the Empire State. Concisely, the bill asks an optional State control of lumbering on private lands, where forestry devastation is carried on to its greatest extent. It solves the problem of preservation and rehabilitation of State forests and the protection of watersheds.

Every reader of FOREST AND STREAM, of course, will support the McLelland-Jones bill.

### WHY KILL AFRICAN BIRDS?

FURTHER evidence of the broadening interest in bird preservation is offered by correspondence abstracted in another column, between Sir Harry Johnston, the African traveler, and officials of the Plumage Committee and Textile Trade Section of the London Chamber of Commerce.

Sir Harry Johnston bears witness to the great usefulness of insect-eating birds, which are now so rapidly being destroyed for the sake of their plumage—testimony which cannot fail to prove an effective weapon in the hands of the bird protectionists of the Old World, as it has been in the New.

The extraordinary stupidity of spending vast sums of money to fight certain diseases carried by blood-sucking insects, and at the same time permitting the most effective enemies of these blood-sucking insects to be destroyed for commercial purposes, must be obvious to anyone. The only question is as to the facts, and all students of birds and of insects are agreed that birds are the most efficient enemies of the harm-

ful species, whether they destroy property, timber or crops, or life, by conveying diseases.

It is interesting to note that the species of herons which furnish egret plumes, are the enemies of the tsetse fly, which we are told is responsible for such tremendous loss of human life in Africa.

FOREST AND STREAM has for many years insisted that in the birds the farmer has a vast army of unpaid servants, working for him all day long, for 365 days in each year. To a less extent the same may be said for the medical man—at all events in certain quarters of the globe.

### BARN SWALLOWS.

PARADOXICAL as it may sound, swallows increase rather than diminish the milk supply. Of course we refer to the members of the *Hirundinidae* family and not to the action of the esophagus. In making this observation we quote C. D. Howe, State ornithologist of Vermont, who says:

"The barn swallow has a direct relation to the milk supply, for it feeds upon the flies that are about the barns and trouble the cattle. Holes should be made in the gables of barns to allow them a chance to get in and nest among the rafters, or a cleat be nailed along under the eaves to allow them a chance to nest there."

And even if this little graceful passerine ate no flies and saved no milk, what is prettier than its volplaning about the barnyard and over the orchard. Its grace alone entitles it to protection.

### AMERICAN GAME PROTECTIVE AND PROPAGATION ASSOCIATION.

ON another page we print the summary of the first year's work of the American Game Protective and Propagation Association, incorporated Sept. 25, 1911. The annual report shows a remarkable bit of history in conviction of game law violators, bird propagation and protection, as well as the history of its greatest achievement—the enactment of the Weeks-McLean bill, for to more than any other organization credit belongs to John B. Burnham and his associates for this migratory bird protection law.

Financially and numerically the association is in excellent condition. The support of every red-copusceled human should be given the American Protective and Propagation Association. The new offices of the association are in the Woolworth Building.

### "THE WAY OF THE WOODS."

EVERY time we look over "Eddie" Breck's guide book, the more we are impressed by his knowledge of the outdoors and all that therein is. Many times have we perused "The Way of the Woods" and just that many times have we found, between its covers, something almost indispensable to the camper. Just now we have cured a severe case of ivy poisoning with a Breck remedy, and it wasn't a whiskey solution, either; just ordinary baking soda—bicarbonate—dissolved in water and applied frequently. For this solution and for hundreds of other solutions to harder problems we recommend "The Way of the Woods" to every one about to call upon dame nature.

### CARRYING GAME THROUGH NEW JERSEY.

IN another column appears a letter from a resident of New York State who was put to considerable expense and inconvenience for carrying game through New Jersey. We print his letter, not so much because the warden was not within his prerogative in making the arrest, but because the court proceeding constituted a travesty on justice. Appended to the subscriber's complaint is a letter from C. H. Napier, President of the New Jersey Game Commission, explaining in detail his ideas on the subject, which to us seem reasonable and fair. However, if we interpret correctly, Mr. Napier's idea of a "reasonable deposit," he should get together with the justices in Jersey City and impress upon them the fact that \$48.80 is not a "reasonable deposit" for the possession of one snowshoe hare in transit from Sullivan county to New York county.

### NO MORE BIRD PLUMES FOR HAT DECORATION.

THE House of Representatives has passed the tariff bill, and present indications are most favorable to its passage by the Senate. Schedule N in this bill contains a clause (Section 357) that means wonderful things to wild bird life. It forbids the importation of bird plumage, except for scientific purposes, and was made possible through concentrated efforts of the various influences whose work and whose names are too well known to need further mention. To all those concerned in this great work, and to those nature lovers in future generations, we extend our hearty congratulations. To the National Milliners' Association we offer condolences.

### A SUGGESTION TO SUBSCRIBERS.

THE time for shifting to summer homes is coming, and many subscribers to FOREST AND STREAM naturally will desire the addresses of the copy of the paper which goes to them changed from winter to summer residences. This is a matter that it is well to attend to in time, so that no issues of the paper may be lost to the reader.

Readers who are not subscribers, but who purchase the paper from week to week at the news stands, or have it furnished them by their local dealer, may, by taking short time subscriptions, have the paper sent to them for any period from one to three months. The charge for sending FOREST AND STREAM is twenty-five cents for one month, fifty cents for two months, or seventy-five cents for three months' subscription. This may be convenient for those who are spending the summer within reach of a post office, yet at a distance from news stands.

### MONTANA GAME LAWS.

It is unfortunate that in the 1913 game laws of Montana, set forth in another column, game birds in other States may be possessed and sold publicly. This is not only unfair to the neighboring States, but is retrogression rather than progress in national game protection.

# YACHTING

Forest and Stream will give a weekly digest of Yachting and Motor Boating events from all over the country.

## Ticks From the Ship's Clock.

FLAGSHIP *ALCEDO*, Corinthian Y. C., Harbor of Essington, May 1, 1913.—General Orders No. 1: The commodore hereby assumes command of the squadron. George Herbert Millett is appointed fleet captain, and Dr. Hobart A. Hare, fleet surgeon.

G. W. C. DREXEL, Commodore.

## Watch Your Boats.

EVIDENTLY the gang of boat thieves that were so active on Long Island Sound all last summer have commenced operations early. A new dinghy was cut from the davits of the yacht *Albion*, lying off City Island, on the night of the 14th.

A suspicious looking boat had been seen in the harbor during the day and was missing next morning. The police of City Island are looking for this crew.

The dinghy was a 14-foot cedar and mahogany bright finish—a very handsome boat.

*Albion* belongs to the fleet of the Larchmont Y. C. and is owned by James G. Wilson.

## Yachts Change Hands.

THE Hollis Burgess yacht agency has sold the 33-foot waterline auxiliary cruising yawl *Idler*, owned by J. A. Tower, of Westwood, Mass., to Robert W. Scott, of Boston; the 25-foot waterline auxiliary yawl *Cavalier*, owned by F. P. Valentine, of Newton, Mass., to Charles D. M. Cole, of New York, who will use her at Newport, R. I.; the 40-foot motor boat *Chalen*, owned by Commodore William W. Brooks, of the Jeffries Y. C., of East Boston, to Alexander Forbes, of Milton, Mass., who will use her for cruising along the Maine coast, and the champion 17-foot Eastern Y. C. one-design class knockabout *Scarab*, to the Eastern Y. C., to be used as a club boat.

A STRONG indication that the coming yachting season will be an unusually active one is the large number of craft which are changing hands. Among the recent transactions effected through Cox & Stevens, of New York, are:

The 130-foot over all auxiliary schooner yacht *Arbella*, sold for Washington B. Thomas, of Boston, to Ogden T. McClurg, of Chicago, for extensive cruising on the Atlantic coast and the Great Lakes. Name has been changed to *Talofa*.

The 115-foot steam house yacht *Margaret*, sold for Capt. Isaac E. Emerson, of Baltimore, to a prominent Western yachtsman.

The 100-foot cruising power yacht *North Wind*, chartered for Charles M. Clark, of New York, to a prominent Boston yachtsman for the season.

The 85-foot gasolene cruising yacht *Kalmia*, sold for Hobart J. Park, New York Y. C., to

Oliver C. Grinnell, of New York, for cruising on Long Island Sound and adjacent waters.

The 100-foot houseboat *Sleepy Hollow*, sold for Alfred K. Wright, of New York, to a prominent member of the New York Y. C., for use off Glen Cove, L. I.

The 85-foot gasolene houseboat sold for Wilbur C. Fisk, of New York, to J. H. Wichert, of Brooklyn, for cruising in local waters.

The 75-foot cruising power yacht *Achelous*, sold for Edward P. Lawson, of New York, to Arthur Stanley Zell, of Baltimore, for cruising on Chesapeake Bay. Recently left for her new home port.

The 77-foot steam yacht *Reposo*, sold for a local yachtsman to Dr. E. J. Montague, of Binghamton, N. Y., for use on the Jersey coast.

The 70-foot cruising power yacht *Ocoee*, sold for W. S. Milne, of Cleveland, Tenn., to Edward I. Welsh, for cruising on Narragansett Bay and Eastern waters.

The 70-foot over all schooner yacht *Simitar* sold for Geo. S. Runk, of New York Y. C., to William J. Baxter, of New York, for cruising on Long Island Sound.

The 60-foot gasolene cruiser *Amina*, sold for Arthur Stanley Zell, of Baltimore, to Charles S. McCulloh, Larchmont Y. C. Has been renamed *Dido*.

The 65-foot gasolene cruiser *Caroline*, sold for M. Frank Dennis, of New York, to Charles Coryell, of Bay City, Mich. The *Caroline* won the New York-Halifax Reciprocity Race in 1911.

The 65-foot cruising motor yacht *Weow*, sold for E. E. Gray, of Boston, to A. E. Willard, of Mexico. Recently shipped to Tampico.

The 60-foot gasolene cruiser *Chipper*, sold for Mrs. John Price Wetherill, of Philadelphia, to Isaac L. Hunt, for local cruising.

The 60-foot high speed launch *Pampero*, sold for Clement B. Newbold, of Philadelphia, to Alessandro Fabbri, New York Y. C., for use at Bay Harbor, Me. Will be renamed *Wibs*.

The 55-foot bridge deck gasolene cruiser *Vixen*, sold for Robert L. Rayner, Columbia Y. C., to a local yachtsman for Long Island Sound cruising.

The 45-foot gasolene cruiser *Alirene*, sold for James Bromiley, of Philadelphia, to Nathan H. Weed, of New York, for cruising among the Thousand Islands.

The 45-foot steam launch *Yenlo*, sold for George H. Olney, to Pennsylvania Water & Power Co., of Baltimore, for use on Susquehanna River, Pa.

The 40-foot bridge deck cruiser *Mary Isabella*, sold for Lucius T. Cochran, of Youngstown, Ohio, to Alexander G. Rea, of Philadelphia, for Florida cruising.

The 40-foot gasolene cruiser *Helen*, sold for D. S. Jaycox, Park Ridge, N. J., to George J. Fermier, of Jersey City.

The 36-foot over all sloop yacht *Portia*, sold for Robert Goeller, of New York, to Edward

Willis, of New York, for use on Barnegat Bay.

The 40-foot over all auxiliary catboat *Gaycheen*, sold for W. F. and H. I. Keller, to J. F. Ringen and William Kottmier, of New York.

The 35-foot over all auxiliary catboat *Pilot*, sold for R. B. Cook, of Brooklyn, to H. S. Poppinger for use on the Shrewsbury River.

The 30-foot raised deck cruiser *Minnow*, sold for R. S. Blake, of Montclair, N. J., to the U. S. Government for use at Porto Rico.

THE following sales have been made through the office of Stanley M. Seaman:

The 64-foot power yacht *Tenegan*, sold for F. F. Chrystie to F. T. Rogers, of Providence, R. I., who will use her for extended cruising.

The 60-foot raised deck cruiser *Orsen*, for G. C. St. John, of Greenwich, Conn., to A. Kessell, Jr., this city. *Orsen* is a brand new cruiser, representing the latest development of the type and will be used for extended cruising.

The Lawley 55-foot raised deck cruiser *Mydial*, sold for Geo. F. Foote to R. A. Dowler, of this city. The yacht is now in commission with owner living aboard.

The 55-foot power cruiser *Mavourneen*, sold for Frank deK. Huyler to Capt. F. G. Palmer, who is now fitting her out for an extended cruise through the Great Lakes from where she will proceed to Florida via the Mississippi River in the fall.

The 50-foot water line cruising schooner yacht *Ilikamo*, sold for E. W. Converse to Chas. S. Hamilton, of New Haven, Conn. Mr. Hamilton is now fitting out for an extended cruise to the Labrador coast.

The auxiliary schooner yacht *Eleana*, for Henry C. Pearson to E. P. Hicks, of the Larchmont Y. C. Mr. Hicks will use her as his home this summer.

The 80-foot power yacht *Nautilus*, sold for T. B. Bleecker to Mrs. Annie M. Poth, of New York.

The 35-foot waterline Lawley sloop *Adeltha*, sold for John W. Bird to F. F. Kuialla, of New York.

The 57-foot sloop yacht *Petrel*, sold for Irving W. Van Wart to Joseph Pulitzer, Jr., St. Louis, Mo., who will use her on the coast of Maine.

The 47-foot launch *Amrita*, sold for Dr. Emil Houel to John C. Taylor, of this city, who has shipped her to Warren, Minn.

The 40-foot raised deck cruiser *Blue Peter V.*, sold for James H. Brookfield, New York Y. C. to Albert Nachmann, of this city. *Blue Peter V.* is well remembered as the winner of the Marblehead race of 1910 and Manhasset Bay cup and Larchmont race of 1911. She is an unusually able sea boat and will be used for offshore cruising by her new owner.

The 40-foot raised deck cruiser *Bud*, sold for A. W. Probst to Le Roy Jones, of this city. The New York Y. C. 30-footer *Nautilus*,

sold for E. E. Dickenson to Chas. W. Mitchell, of New Britain, Conn., who will enter her in all races for this class.

The auxiliary yawl Gertrude for G. W. Holloway to C. W. Maeland, of Philadelphia.

The sloop Lucy, sold for H. A. Macpherson to R. A. Van Houten, of New York.

The auxiliary sloop Hal, sold for Chas. W. Weaver to N. D. F. Baker, of New York.

The H. B. Tortoise, chartered for A. P. Plumb to R. S. Childs, who will use her as his home this summer, laying off Greenwich, Conn.

The catboat Ace, sold for D. S. Morcein to A. F. Hatch, of Stamford, Conn.

The sloop Vagabond for E. H. Pike to L. B. Buttey, of New York.

Seawanhaka catboat Keewaydin III. for F. D. Trapp to R. H. M. Potter.

Knockabout Colliwog for H. P. Davidson, of J. P. Morgan & Co., to R. Floyd Clarke, of this city.

The jewel one-design class knockabout Brilliant, for Henry W. J. Bucknall to Dr. J. C. Ayer, of the New York Y. C.

The launch Anahma, for Atkin Wheeler Co., of Huntington, L. I., to Conrad Stein, of New York.

### Yachting on San Francisco Bay.

THE yachting season on San Francisco Bay is now in full swing, all of the clubs having held their formal opening events. A number of important races are scheduled for the present month, and from now on until the 1st of November there will not be a week without some yachting event of note. The San Francisco Y. C. held its opening exercises on the afternoon and evening of May 3 and entertained a great crowd of guests at its club house at Sausalito. This club enjoys the distinction of being the third oldest of its kind in America, having been formed forty-five years ago. This organization now has the greatest membership in its history, as well as the greatest number of boats flying its flag. It is now completing the erection of a fine new club house at Sausalito, and will shortly be called upon to defend the San Francisco perpetual challenge cup, so that a busy season is ahead.

The Aeolian Y. C., of Alameda, held its opening exercises on May 3, and on the following day a cruise in squadron was held, visits being paid to the headquarters of other clubs about the bay. A number of clubs held their opening cruises a week earlier, among these being the Corinthian Y. C., the California Y. C., the Sausalito Y. C. and the newly formed Oakland Y. C.

The Fleur de Lis, Captain C. McCarthy, the winner of the perpetual challenge cup race a year ago, has been rebuilt and is now twelve feet longer than formerly. Alert, Thomas Kendall owner, has also been lengthened and presents an improved appearance. Fulton G., one of the best known yachts on the bay, will be sailed this season by George Wagner and Fred Farnkopf.

Commodore Picker, of the Corinthian Y. C., is absent on a pleasure trip to Tahiti, but his sloop Harpoon is in commission under the direction of former Commodore John Pew.

IN changing address, the old as well as the new should be given.

## Canoeing

### Raquette Lake Canoe Trip.

AN A. C. A. member writes as follows:

"I shall be very glad if you will advise me in regard to the trip beginning at Old Forge, N. Y., on Raquette Lake, and ending on Lower Saranac Lake or Lake Placid.

"I particularly would like information in regard to supply stores, hotels that may be on the route, portages, etc."

If any of our canoe readers have taken this trip, please outline and send to our canoe editor.

### Atlantic Division, A. C. A.

BURLINGTON, N. J., May 14.—*Editor Forest and Stream:* The cruise over Decoration Day of this year will be down the Delaware, from Phillipsburg, N. J., to Park Island, a distance of about forty-six miles, and it is hoped the change from Rancocas Creek will be appreciated and that there will be a large turnout.

#### ITINERARY.

Thursday evening, May 29. Arrive and make headquarters at Karldon Hotel, Easton, Pa. Good site at Carpenterville, about five miles below Phillipsburg.

Friday. Leave Phillipsburg 10:30 A. M., picking up those who camped. Lunch at Milford; camp at Point Pleasant.

Saturday. Leave at 10 A. M. Lunch at Lambertville, camp at Park Island, dinner and breakfast on Sunday morning at the usual cost. (Provisions for all other meals should be provided by the cruiser, or meals can be had at hotels en route.)

Sunday. Lower Delaware River men will continue down the Delaware in the morning.

Canoes and duffle should be shipped via freight or express as follows:

From New York and points east and north, over the Lehigh Valley R. R. or Central R. R. Co. of N. J., to Phillipsburg, N. J.

From Philadelphia and points south, over Pennsylvania R. R. to same destination. (Those desiring to camp at Carpenterville, N. J., will ship to that point instead of Phillipsburg.)

Canoes can also be shipped as excess baggage on passenger trains, but notice of same should be given the railroad company, stating date and train number to facilitate handling in baggage car.

Cruisers should go as "light" as possible.

#### TRAIN SERVICE.

From West Twenty-third Street, New York—Over Lehigh Valley R. R.: Leave 3:50, 5:05, 5:50 P. M. and 7:28 A. M. Arrive Phillipsburg: 6:17, 8:05, 8:17 P. M. and 9:45 A. M.

Over Central R. R. of New Jersey—Leave 4:20, 4:50, 5:50 P. M. and 7:05 A. M. Arrive Phillipsburg: 7:10, 7, 8:29 P. M. and 10:03 A. M.

From Broad Street Station, Philadelphia (Pennsylvania R. R.)—Leave: 5:03 and 7 P. M. and 7 A. M. Arrive Carpenterville 7:52, 9:43 P. M. and 9:35 A. M. Arrive Phillipsburg: 8:05, 10 P. M. and 9:54 A. M.

Trains leaving Market Street Ferry, Philadelphia (Pennsylvania R. R.) at 4:28, 6 P. M. and 6:12 A. M. connect at Trenton with above

trains from Broad Street Station, Philadelphia. And the last word is: Come with us and we will promise lots of fun.

HENRY B. FORT, Chairman.  
DAVID S. HILL,  
J. W. BROOMHEAD,  
J. STANLEY PAGE,  
Committee.

### A. C. A. Membership.

#### NEW MEMBERS PROPOSED.

Atlantic Division.—Gustave Ross, 326 West Twenty-eighth street, New York city, by Clarence Sandstrom.

Eastern Division.—William Wallace Heckman, 19 Windemere Road, Auburndale, Mass., by B. L. Goodwin; John J. Smith, 333 Pine street, Providence, R. I., and Fred A. Schmidt, 33 Stadden street, Providence, R. I., both by Fred C. Rexford; Gravers Graverson, 814 Main street, Waltham, Mass.; Everett Willard Smith, 145 Brown street, Waltham, Mass., and Joseph F. Spoettle, 17½ Robbins street, Waltham, Mass., all by F. R. Clemmens.

#### NEW MEMBERS ELECTED.

Atlantic Division.—6660, W. Arthur Lyons, 14 West Forty-third street, Bayonne, N. J.

Central Division.—6657, Fred C. Belmer, 111 West Brighton avenue, Syracuse, N. Y.; 6658, Mager V. Gilbert, 405 Cedar street, Syracuse, N. Y.; 6659, Curtiss C. Brown, 208 McAllister avenue, Syracuse, N. Y.

## Revival of Archery

Archery outfits are now in demand—lovers of the sport and "Country Clubs" are taking it up. Outfits supplied from \$5.00 upwards.

## An Archer's Scrap-Book

CHICAGO, Ill., April 4.—*Editor Forest and Stream:* In published letters and articles we often find themes for discussion. In one of your recent issues there was a letter from Euclid D. Miller, of Nashville, in which he speaks of his scrap book, and of the good things from FOREST AND STREAM with which he is filling it.

In the past Mr. Miller has written entertainingly on archery topics, and now that he has started again, we hope that he will keep it up. My scrap book will grow on his contributions.

I suppose every one, some time in his life,

all the printed matter relating to it which has come to my notice.

I now have seventeen archery scrap books. In size they average 10 by 12 inches and 160 pages.

It has been no hardship to make these books, for I never allow the clippings to accumulate, and as a rule only a few hours elapse after they are received before they are securely put in their last resting place. Many of my friends have helped me in this work, and to those who have not done so I shall be thankful if they will.

PITTSBURGH A. C. ARCHERY RANGE.

has made a scrap book, or books. I own to being a crank on the subject. My first was made so long ago that if I should give you its date you might think I am an old man. It contained clippings about birds and insects and general matters. Then politics and political conventions and campaigns received attention. Medical subjects were not neglected.

In 1878 archery began to be the chief thing collected and preserved. In those early days the work was not done very systematically, though I have interesting newspaper reports of the early tournaments of the National, the Eastern, the Ohio State and other associations and of local meets.

From 1884 I was out of archery for nineteen years. At this time I had copies of FOREST AND STREAM covering all the early archery days. Not expecting ever to be able to return to the sport, I disposed of the magazines, after moving them about for several years. It has been a real sorrow that I did so.

For the last ten years I have kept quite closely in touch with the sport, and have kept

Many facts have thus been recorded which perhaps could not be found elsewhere.

Tac Hussey, of Des Moines, and Louis W. Maxson, of Washington, have preserved much valuable material, and I know of a number who are making a record of the archery doings of the day.

Let me suggest to my archer friends that they keep scrap books not only for their own pleasure, but because they will thus be the means of preserving the history of the sport.

EDWARD B. WESTON.

### "The Ladies Who Golf and Shoot."

BY TACITUS HUSSEY.

On velvet turf 'neath sunny skies,  
With cheeks aglow like sunset tints,  
With bended bow or golf clubs 'true,  
And eyes reflecting starry glints,  
Behold our ladies of the lawn,  
With fluffy hair from wind's salute,  
With twanging bow or fleeting ball,  
Our ladies fair, "who golf and shoot."

Oh, targets, with your colored rings!  
Oh, bended bow, with well-aimed shaft!

How sweet the song the bow cord sings,  
How soft and low the feathery laugh  
Of arrows in their hurried flight,  
Loosed from the hand of archer bold,  
And tell-tale murmur of delight  
Whene'er her shaft has reached the gold!

And oh, the joy which fills the heart  
When ends the chase of fleeting sphere,  
When hole is made from distant field  
To hear the watchers clap and cheer:  
"Hurrah! Hurrah! She's won the day  
With two holes up, and one to play!"  
If I were old and lame to boot,  
I'd cheer the girls who "golf and shoot!"

There's music in the arrow's thud,  
When through the air it flies apace,  
Unerring in its steady flight,  
Eager to kiss the target's face!  
It's fun to watch an arrow's flight  
From twanging string, like sound of lute—  
It brings to me my boyhood days  
To watch the "ladies golf and shoot!"

When world is fair and spirits gay,  
When fields and woods by sun are kissed,  
How strange, in stuffy, stifling rooms,  
Women sit down to solemn whist;  
And shuffle cards and ask, "What's trumps?"  
And rise, mayhap, with burning face  
When conscious of that sin of sins,  
That she has "trumped her partner's ace!"

Better the bowstring's thrilling twang;  
Better the golf ball's flight sublime;  
Better, by far, an outdoor life  
Spent in the "good old summer time!"  
If I approached Methuselah's age,  
Sans teeth and "balder than a coot,"  
I'd never cease to sound the praise  
Of ladies fair "who golf and shoot!"

### English Archery Scores.

CHICAGO, Ill., May 14.—*Editor Forest and Stream:* The following scores are taken from The Field, London, April 26:

- June 24.—Fulton (Mo.) G. C. Fred C. Wells, Sec'y.
- June 24.—Rockaway Beach, N. Y.—Rockaway G. C. Paul von Boeckman, Sec'y.
- June 24-25.—Crookston, Minn.—Minnesota State tournament, auspices Crookston G. C. T. Morris, Pres.

### Fulton Game and Gun Club.

FULTON, N. Y., May 15.—Enclosed kindly find the scores that were made at our registered tournament here yesterday. You will find that we had sixty one shooters. George R. Ginn, of Winchester Arms Co., took charge of our office for us, and managed same in a very satisfactory manner indeed. We felt very much pleased to have his assistance.

C. L. Frantz and T. E. Clay tied for high amateur average with a score of 132 out of 145. There were but two professionals who shot, H. McMurchy winning high average with 137, and Sim Glover second high average with 133. We had one merchandise event with forty-three prizes, and forty-three out of the sixty-one shooters went home happy, as they had each won a prize in this event. One event was open at 15 pairs, with the privilege of re-entering. The first prize was a \$37.50 L. C. Smith gun, and the second prize \$5 in cash. W. R. Patrick, of Gouverneur, N. Y., won the first prize in this event with the remarkably good score of 28 out of 15 pair. D. Wadsworth, of Auburn, N. Y., won the second with a score of 25 out of 15 pairs.

Sim Glover, for Du Pont presented to the winner of the high amateur average a gold stickpin. Frantz and Clay tied for the same and decided to shoot off at 25 targets. The score resulted: Clay 19, Frantz 18. The program consisted of nine events—seven at 15 and two at 20 targets. Scores:

Merchandise event, 25 targets, handicap:

### DRIVERS AND TWISTERS.

Yes, the Westy Hogans' shoot will be pulled at Atlantic City—new grounds—Sept. 17-19. Our old chum, Bernard Elsesser, will tell you all about it.

Warm Springs tournament, under auspices Merriweather Gun Club, will be held June 10-11, at Warm Springs, Ga. It is predicted that from forty to fifty smoke makers will be present. Each day's program calls for ten events of 20 targets at 2 cents per saucer; four moneys, class shooting.

In accordance with a resolution adopted by the Interstate Association, at its annual meeting in 1910, Secretary E. Reed Shaner advises that F. T. Joerg, Columbus, Ga., was the winner of the eighth Southern Handicap, shot at Montgomery, Ala., May 15. Mr. Joerg used a Remington pump gun, U. M. C. shells and Dead Shot powder.

Du Pont got an awful bunch of hits off C. P. Trap, who had proved an enigma to other visiting teams. His swift straight ones and his sweeping curves were knocked all over the lot. Pinch hitter Williams went in the last inning and hit in the 900 per cent. class—some hitting, eh, what? Our new straw hats are lifted to the Brandywine solvers of aerostatics.

W. G. BEECROFT.

### Smith Gun Club.

NEWARK, N. J., May 10.—The weather was disagreeable and only a few target smashers showed up. B. M. Shanley, Jr., took high with 180 out of 200. The scores: B. M. Shanley, Jr., 23, 23, 23, 24, 22, 24, 21, 20; W. Hassinger, 21, 21, 21, 22, 23, 24, 21; J. Read, 19, 22, 18, 19, 21, 20, 22, 19; H. Hassinger, 19, 20, 20, 21; W. H. Dickenhorst, 15, 13, 19, 15, 15; P. Hensler, 13, 16, 17, 13; O. Ellison, 14, 18, 19.

### Portsmouth G. C.

PORTSMOUTH, Va., May 16.—There was a large and enthusiastic bunch of shooters in attendance at the weekly shoot of the N. P. Gun Club yesterday afternoon. Conditions were somewhat difficult, but some good scores were made. Gunther and Boyd each broke 90 out of 100. In the club shoot at 50 targets, Richardson and Edmonds each scored 46 breaks. The club scores:

Shot at Broke		Shot at Broke			
Edmonds.....	50	46	Dr Corbell.....	50	36
Richardson.....	50	46	Doughtridge.....	50	36
Boyd.....	50	45	Borrowdale.....	50	36

**Portland G. C.**

PORTLAND, Me., May 12.—There were fourteen shooters at the weekly shoot of the Portland, Me., Gun Club, May 10. In one of the greatest exhibitions of shooting seen at the traps of the Portland Gun Club in several years, Silas B. Adams broke 92 targets out of 100 on Saturday afternoon. His second event he ran straight.

Ninety-two is a good record at any time, but when such a score is made under such conditions as prevailed Saturday, it is wonderful. Not only was the wind strong, but it was gusty, and the birds on leaving the traps took all kinds of flights. The conditions were the most difficult ever seen at the grounds, and recalled the time in 1911, when Silas Adams, by making the magnificent total of 98 under conditions very similar, won the New England individual championship at singles.

A feature of the shooting this afternoon was the work of Gil Wheeler, who came up from Brunswick to take part in the event. Wheeler did the best shooting he has ever done at the Portland grounds, and was right on the heels of Billy Hill, the crack pro., all through. He got a margin of a bird in his favor in the first event, when he scored 22 to Hill's 21, but in the second string, Hill was snuffing pigeons, and was down only one, while Gil dropped 4. The third event was a tie, but in the fourth, Wheeler gained a bird and finished but one in the rear. Scores:

Adams.....	23	25	22	22	92
*Hill.....	21	24	23	23	91
*Wheeler.....	22	21	23	24	90

P. O. MYHRUM, Sec'y.

**New York State Sportsmen's Association.**

NEW YORK, N. Y.—With reference to the forthcoming State shoot, arrangements are practically complete, and programs will be in readiness for mailing on May 24. The list of prizes for the annual merchandise event, while not yet complete, we feel assured that a sufficient number will be provided that each shooter in attendance will receive one, even should the number of shooters be double that of the few years previous.

The merchandise and added money will be awarded under the provisions of the Lewis system, thereby insuring to the less skillful shooters prizes worth while. And the term "less skillful shooters" brings to mind one of the sayings of Abraham Lincoln, for on this class must depend the success of this or any like tournament.

At the head of Class A is a piano, which prize has seemingly become a necessity at our State shoots. Class B is headed by a Victrola, and Class C carries as first prize an L. C. Smith single trigger gun with case, listed at \$160. Each of these classes will carry not less than forty prizes, very few of which are worth less than the cost of entrance.

The tournament will be held in Kenilworth Park,

which will be remembered as the scene of the 1909 Eastern Handicap. C. F. LAMBERT, Sec'y-Treas.

**Daniel Boone Gun Club.**

MARTHASVILLE, Mo., May 17.—The busy season still keeps our attendance small at the weekly practice shoots. A. F. Ahmann won the Du Pont fob to-day, making the third time he has won it, so that now it is out of competition. Ahman uses a Winchester automatic gun, Ballistite powder and Nitro Club shells.

To-morrow a few of our members will be in St. Charles, Mo., to shoot at an opening shoot there. Last Monday our club shot at Warrenton in a club match. We had seventeen shooters there, and they had fifteen shooting. We counted the ten highest scores on each side, and they won by 8 targets. Their ten best broke 439 out of 500, and ours 431. All shooting shot at 60 targets.

The scores of our club shoot follow, 50 targets each: Ahman 45, G. Fortmann 42, E. Suhre 36, Meyer 34, O. Johannaber 27. J. O. WILSON, Sec'y.

**60—1      50—1      40—1**

The above are the odds you are taking against your winning first, second or third money respectively in the

**Grand American Handicap**

Dayton, Ohio, June 17-20, 1913

**A Solid Gold Trophy, Value \$100, will also be donated to the winner, by the Interstate Association.**

**FIRST MONEY, \$600.00 GUARANTEED  
SECOND MONEY, \$500.00 GUARANTEED  
THIRD MONEY, \$400.00 GUARANTEED**

This Tournament will be held under the auspices of the N. C. R. Gun Club, and gives promise of an entry list that will surpass all previous records.

**\$2,000 ADDED MONEY**

Programs may be had on application to

Pittsburgh, Pa.

# The Southern Handicap

## Montgomery, Ala., May 13-15

MONTGOMERY, Ala., May 17.—The Interstate Association's eighth Southern Handicap tournament was held at Montgomery, Ala., May 13-15, under the auspices of the Capital City Gun Club. The personnel of the attendance could not be excelled, and it proved to be an interesting study to one who knows trapshooters and the game of trapshooting. From all over the country came the men who like to shoot at the discs. In fact, it was a tournament attended by the best bunch of aerosaucer exterminators in the country, which year after year increases in numbers without lowering in quality.

There was no preliminary speech-making or the touching of an electrical button when the shooting began on practice day. The chief managers of the tournament were all present, and their time was taken up more in starting off the squads than in saying nice things to each other about the wonderful success of their enterprise and foresight. Moses Moore, president, and A. A. Ross, treasurer of the Capital City Gun Club, to whom principal credit is due for the success of the tournament, were the first to appear on the grounds and go into conference with Manager Elmer E. Shaner, of the Interstate Association, and it was only a matter of a few minutes to get things going.

The traps, placed in position and managed by H. E. Winans, gave perfect satisfaction, and as predicted, increased the shooting averages of a number of amateurs. There were no repairs necessary, and the traps received very little attention during the day other than given them by the trapper boys. Mr. Winans found plenty of time to assist the local management, and his services were of high class and appreciated.

### PRACTICE DAY, MAY 12.

The first squad came to call promptly at 1 o'clock. The shooting was fast, squads handled quickly, and at a few minutes of 4 o'clock the last shot was fired and the seventy-three entrants and the audience started for the city.

With several of the best shots in America present, the scores were high, but this was to be expected. Among the amateurs G. H. Waddell and G. L. Lyon were in first place with 97 out of the 100 targets shot at. T. L. Salter and T. W. Hightower were in second place with 96, and J. R. Livingston in third place with 95.

Among the professionals, W. R. Crosby was in first place with a score of 100 straight. W. H. Heer was second with 99, and E. R. Holt and Homer Clark third with 98. The scores of practice day follow:

*Walter Huff	95	S W Anthony	87

### FIRST DAY, MAY 13.

Fine weather, a clear sky and practically no wind brought out the highest scores ever recorded at a shooting tournament on the grounds of the Capital City Gun Club. Montgomery can justly boast of having one of the finest trapshooting grounds for pulling off a tournament of any city in the United States. A few years ago a score of 90 per cent. was exceptional, but in the Southern Handicap tournament day by day several shooters averaged 95 per cent. or over, which will give an idea of how proficient has become the trapshooter of to-day.

The program called for ten events of 15 targets each, a total of 150 single targets, and one event of 25 double targets, making a grand total of 200 targets for the day.

Among the amateurs, G. H. Waddell, J. S. Young and E. R. Alexander were in first place with a total of 146 out of 150 single targets shot at. G. L. Lyon was second with 144, and A. J. Hill and Bart Lewis were third with 143. Waddell was also first with 47 out of 25 double targets shot at. W. H. Jones was second with 46, and J. K. Warren third with 43.

Among the professionals, W. H. Heer was in first place with 150 out of 150 single targets shot at. W. R. Crosby was second with 149, and Fred Gilbert was third

with 148. J. R. Graham was first in the doubles with 48 out of 50 targets shot at. Fred Gilbert was second with 45 and H. Clark third with 44. The scores of the first day follow:

	25	150		25	150
	Prs.	Sgls.		Prs.	Sgls.

### SECOND DAY, MAY 14.

The second day's program drew out a larger number of entrants than the first day presented. With fine events of 20 targets each and the Preliminary Handicap at 100 targets, there was shooting from 9 o'clock in the morning until 4:30 in the afternoon, with an adjournment of one hour and thirty minutes for luncheon, which was furnished by the ladies of the local churches.

The Preliminary Handicap at 100 targets resulted in a tie for high honors between Messrs. J. K. Warren and E. R. Alexander. The tie was shot off at 20 targets to decide the winner of first money and the trophy. Warren broke 29 and Alexander 17, and Warren was declared the winner.

A feature of the day was the fine work of squad No. 6, composed of Messrs. F. G. Bills, W. R. Crosby, F. Gilbert, J. R. Graham and W. H. Heer, in the regular events. This squad in events 1, 3 and 5 broke 100 straight in each event. The squad went out with a total of 493<sup>1</sup> out of 500 single targets shot at, which is claimed to be a world's record. The squad was followed by a large gallery, and their work was loudly applauded.

Among the amateurs in the regular events at 100 targets, Vassa Cate and G. L. Lyon were in first place with 97. H. E. Dickerman, W. H. Jones and Bart Lewis were second with 96. N. Tucker, J. K. Warren, W. A. Waddington, George Crosby, E. R. Alexander, T. L. Salter and J. S. Young were in third place with 95.

Among the professionals in the regular events, F. G. Bills, J. R. Graham, W. H. Heer, R. W. Clancy and J. R. Taylor were in first place with 99. W. R. Crosby, Fred Gilbert and L. S. German were second with 98. Walter Huff, H. D. Gidds, W. Henderson, C. G. Spencer, Homer Clark and H. D. Freeman were third with 97. The scores of the second day follow:

M Moore	81	M H Sullivan	83
J H Hillman	89	*T E Doremus	84
W E Carpenter	85	*G O Fisher	94
A H Hill	85	A A Ross	87

### Record 496 out of 500.

WILMINGTON, Del., May 16.—Editor Forest and Stream: I notice in the daily papers that they announced that a world's record was made at the traps during the Southern Handicap tournament at Montgomery, Ala., the 13th to 15th inst., inclusive, the record being given as 493 out of 500. As a matter of fact, on Nov. 21, 1907, the following squad broke 496 out of 500. On the grounds of the Gun Club at Leesburg, Fla.: W. R. Crosby and J. R. Taylor, 100 straight each; J. M. Hawkins and Lee Barkley, 99; Fred Gilbert 96. I saw the record made myself, and I know that the members of the Leesburg Gun Club who were present, as well as a few experts, who were traveling with the squad at that time, will agree with me that the targets were by no means as easy as they would appear to have been from the score made. EDWARD BANKS.

### THIRD DAY, MAY 15.

The final day of the tournament attracted 101 entrants. A large number of the followers of the sport were on hand early in the morning and stayed until the close of the most successful tournament that was ever held in this vicinity. The crowd, which had increased day by day, occupied every bench in the spectators' tent. F. T. Joerg, of Columbus, Ga., won the main event of the tournament, the Southern Handicap, by breaking 93 out of 100 from 16yds. C. L. Green, R. H. Bruns, Bart

Lewis, W. H. Jones and E. R. Alexander were close followers with 92 each; D. A. Edwards, J. A. Blunt and J. K. Warren were third with 91.

E. A. Holt (17yds.) and O. McDade (16yds.) made 95 in the Southern Handicap and were in first place among the professionals. Fred Gilbert (23yds.) and Walter Huff (20yds.) were second with 93. H. D. Freeman (21yds.) was third with 91.

In the regular events among the amateurs, R. H. Bruns was first with 100 straight. W. H. Jones and George Crosby were second with 99 each, and Bart Lewis and J. H. McDuffie were third with 98 each.

In the regular events among the professionals, W. H. Heer and Homer Clark were first with 99 out of 100 targets shot at. W. R. Crosby and F. Gilbert were second with 98 each, and L. S. German, J. T. Skelly and Walter Huff were third with 97 each.

The Columbus (Ga.) cup was won by W. H. Jones, of Macon, Ga., with 563 out of 600 targets shot at. The Columbus (Ga.) cup event included all single, double and handicap events scheduled for the tournament, with the exception of practice day.

During the tournament a total of 63,070 targets were trapped.

The handicap committee was composed of W. T. Laslie, Tuskegee, Ala.; G. Hillman, Birmingham, Ala.; Charles Green, Laurel, Miss.; G. H. Waddell, Columbus, Ga., and A. A. Ross, Montgomery, Ala.

The trophies were presented to the respective winners by J. T. Skelly, president of the Interstate Association. Mr. Skelly also presented, in behalf of the Capital City Gun Club, gold-handled umbrellas to Squier, Winans and Shaner, in appreciation of services rendered during the tournament.

After speeches were made by Messrs. Warren, and Joerg, the trophy winners, and by Messrs. Squier, Winans, and Shaner, the tournament was officially declared closed. The scores of the third day follow:

M Moore	78	W W Coker	93
J H Hillman	88	E H Eubanks	88
*O McDade	94	*L M Norwood	83

# WINCHESTER

## High for All Targets Shot in Southern Handicap Tournament

### SHELLS

This honor went to Fred Gilbert with a score of 575 x 600. Winchester Loaded Shells were used by four out of the five-man squad which established a new squad record in competition with a score of 493 x 500. The shooters using Winchester "Leader" Shells and their scores were: Bills, 99; J. R. Graham, 99; Crosby, 98; and Gilbert 98. In the Double events J. R. Graham was high with a score of 48 x 50 shooting Winchester "Leader" Shells.

### Tied for High Score in the Southern Handicap

### GUNS

Elbert A. Holt of Montgomery, Ala., shooting a Winchester Repeating Shotgun from the 17 yard mark tied with a 16 yard shooter on 95 for High Professional in the event. This score was high over all for the Handicap. In the Preliminary Handicap, E. R. Alexander of Tuskegee, Ala., shooting a Winchester Repeating Shotgun, tied the winner of the event with a score of 94, but was beaten in the shootoff.

**Fort Thomas G. C.**

At the weekly shoot of the club, May 18, there were nineteen shooters present, and some good scores were recorded. The club was recently organized among the officers of the Army who are stationed at the Post, and the members are showing steady improvement. The shooting is done over a set of expert traps, and the targets thrown have been very irregular in their flight, making high scores almost impossible. The club will install a Leggett automatic trap the coming week, and the result will be seen at their next meet in fewer misses. High score for the day was made by H. R. Irwin, who dropped but 3 targets in the first 50, and went out with 92. H. Stegeman also shot a very good race, getting in second place with 90. J. Day was the only shooter to go straight in any one of the 25-target events, but hard luck in the first event cut his score down below normal, and he got in third place on 89. In the last 75 he missed but 3 targets. Capt. Smith was high man among the officers, getting 83, and breaking 90 per cent. in the last 50. He was followed by Lieut. Harmon, who tied with A. Stegeman on 81. Two Du Pont trophies, sterling silver watch fobs were shot for, the first being won by Capt. Welborn, and the second by Capt. Munson. Shooting at doubles, J. Day broke 38 out of 25 pairs, and Lieut. Hobson scored 21 out of 12 pairs. Irwin made the long run of the day, 35. The conditions were not of the best, the background not being very good, and the wind causing the targets to be uneven in their flight.

Capt Smith	83	Lt Hearn	76
H R Irwin	92	Lt Hobson	75
A Stegeman	81	Capt Kinney	39
H Stegeman	90	Dr Tedd	43
Capt Munson	73	Capt Rethers	36

Col Crane	46	Capt Welborn	74
Capt Davids	70	J Day	89
Lt Harmon	81		

**Cincinnati Gun Club.**

TWENTY shooters were at the grounds, May 18, for the weekly shoot. The expected team shoot with the Westwood Club was again postponed, as the team was unable to get over. In the shoot-off of the tie for the Du Pont trophy between John Schreck and Sander, at 100 targets, the former won on a score of 89 to 76, the latter having a handicap. The weather conditions were not of the best, a strong cross-wind affecting the flight of the targets to a considerable extent. Hammerschmidt and Smith tied for first place on 93 each. Medico was in the lead at the close of the third event with 90 straight, but dropped his fourth target in the fourth event, getting a run of 63. He finished with only one down in the last event, and tied for second place with Trimble, Welsh and Day on 92. Davies shot a fast clip until the last event, and went out in third place on 91. Gambell, Buckeye and Sander went up against Schreck, Hammerschmidt and Butz in a team match at 25 targets each, the latter team winning by 1 target.

In a second match the result was the same, Schreck's

team winning by one target, although both teams did better work than in the first contest. Sander did very nice work for his team in the second match, dropping but one target.

High individual score in the matches was made by Buckeye in the first contest, a straight 25. Butz also did better work in the matches than in the regular events.

The club will be represented at the Kentucky State shoot at Winchester on May 22-23, and on the 24th, the team will visit Dayton, O., for the second contest in the series of intercity team matches with that city and Springfield.

Shooting at 10 pairs of doubles, Le Compte broke 14. Holliday, Jr., had his troubles in the second event when he tried to shoot a strange gun, and the score shows the result of the change. McArdle shot for the first time since his return from Florida, and considering his lack of practice did well. J. B. C. was not quite in his usual form, but the wind was a trifle too much for him. Gambell was a little off until he got in the second team race, when he shot a 96 per cent. clip. F. M. Holliday does not get into the game very often, but he has not forgotten how, and can give some of the regulars a run for their money.

Shot at, Broke		Shot at, Broke	
Gambell	100 84	Le Compte	100 60

**Boston A. A.**

Boston, Mass., May 17.—As most members of the B. A. A. Gun Club were at the shoot at Beverly to-day, only a small squad turned out here. The take-home trophy was won by Hamblin. Mr. Whittemore offered a trophy at 100 targets. It was won by Carleton with 97 from 24. Hamblin won the regular event with 94 from 6 and for second in Carleton event with same score. The scores:

Regular handicap, 100 targets:			
Hamblin	6 94	Whitney	12 84
Owen	16 92	Acorn	24 83
Farmer	6 88	Carleton	24 78
Ellis	3 88		
Whittemore trophy, 100 targets:			
Carleton	24 97	Ellis	3 91
Hamblin	6 94	Whitney	12 88
Whittemore	10 93	Owen	16 76
Acorn	24 92	Farmer	6 74

Philadelphia Trapshooters' League.

PHILADELPHIA, Pa., May 17.—After winning every match of the series, Du Pont, by putting it over on Meadow Springs to-day, won the championship of Philadelphia Trapshooters' League, with W. S. Colfax, Jr., of Du Pont, individual champion of the series.

To-day's match was won by only six aerosaucers, and was shot in a blinding rainstorm. A new shooter with the Du Pont bunch, Vernon Williams, was high for the day with 48, a full on first 25, two lost on second. The ten high men on each side were:

Table with 2 columns: Du Pont Team and Meadow Springs Team. Lists names and scores for various shooters.

The scores of the other shooters were as follows: Du Pont Gun Club—Richardson 40, Bush 39, Springer 34, Edmanson 43, Green 25, Simon 38, Ross 40, Magahern 45, Robinson (25) 20, Turner (25) 20, Jensen 30, Galvin 40, Hammond 35, Dr. Betts 37, Leedom 41, Coyan 46, T. W. Mathewson 29, Jenks 37, Martin 46, Anderson, Jr., 39, Lord 19, Foord 45, Curly 22, N. K. Smith 36, Coyne 33, Dr. Patterson 37, Jarrell 45, Guest 45, V. PARKER GUNS REMAIN UNEXCELLED IN THEIR POWER OF HOLDING TOGETHER THE SHOT CHARGES UNDER HIGH VELOCITY AT EXTREME RANGES.

PARKER BROS. Meriden, Conn.

N. Y. Salesrooms: 32 Warren St. A. W. duBray, Res. Agt., Box 102, San Francisco, Cal.

Chicago Interurban League.

CHICAGO, Ill., May 11.—The first shoot of the Chicago Interurban League of Gun Clubs was held on the grounds of the Chicago Gun Club under most favorable conditions.

The Evanston Club carried off the honors of the day with a team score of 220. The South Shore and Chicago gun clubs tied for second on 218 each.

G. Coleman, of the Evanston Club, took the high individual honors with 48 out of 50, Geo. Eck being second with 46, while Kennicott, Adams, Silver, Johnson, Moore and Becker each broke 45.

Scoreboard for Chicago Interurban League showing team and individual scores for Evanston G. C., South Shore C. C., Chicago G. C., and Long Lake G. C.

Professional scores for Chicago Interurban League.

Hunters Club.

ONONDAGA, N. Y.—Here are scores of Hunters Club for April 27 and May 11:

Scoreboard for Hunters Club for April 27 and May 11, showing scores for various shooters.

Scoreboard for Hunters Club for May 11, showing scores for various shooters.

Roanoke G. C.

A VERY enthusiastic and delightful shoot of the club was held on the 17th inst., there being a number of visitors present, among whom was Mr. Storr, the courteous representative of the Peters Cartridge Co.

Scratch Class—P. T. Jamison first; W. A. Bloxton, second. Class A—J. W. Poindexter first; Holland second. Class B—Did not fill. Class C—F. Jones first, A. M. Nelson, Jr., second.

Scoreboard for Roanoke G. C. showing scores for various shooters.

THE CAMPER'S OWN BOOK 1913—SECOND SUCCESSFUL YEAR—1913

This is that BIG little book of the open—America's new outdoor annual. It comes to you bound as you see it here. It is "woody" from cover to cover—stirred by lake breezes and redolent of pine.

In the appropriate green T-cloth, \$1.00. In the paper (as shown in cut), 50c. If your dealer cannot supply you, we will send postpaid on receipt of price.

THE LOG CABIN PRESS :: :: :: 146 Worth Street, NEW YORK CITY

Siwanoy C. C.

Mr. VERNON, N. Y., May 17.—An even dozen shooters reported at the traps, most of whom had high scores in the Stevens handicap trophy, which was concluded this afternoon.

Stevens trophy, handicap, 50 targets: L G Bond... 11 48 H J Smith... 11 43 G A Wylie... 14 47 H V Morgan... 15 41

Du Pont trophy, handicap, 50 targets: C H Hadlock... 9 48 M R Guggenheim... 12 42 E L Haas... 10 45 H V Morgan... 16 41

Scratch scores for Siwanoy C. C. showing scores for C H Hadlock, M R Guggenheim, G A Wylie, etc.

Columbus (O.) G. C.

COLUMBUS, O., May 10.—It was very windy this afternoon and the Blues were hard to find. The professionals present were Messrs. Chamberlain and Call.

Targets and scores for Columbus (O.) G. C. showing scores for C Wolf, F Wolf, etc.

The applications for programs for the Twentieth Century Limited shoot continue to roll in. The attraction will be here for a large tournament, and we see no reason to be alarmed regarding our prediction of 500.

Mount Airy G. C.

Mr. AIRY, Ind., May 14.—A tournament without a professional is a rarity, but this was one. Steve Crowbart won the championship of Montgomery, Howard, Carroll and Frederick counties with the high score of 134.

Scoreboard for Mount Airy G. C. showing scores for W E Brown, S Crowbart, C Jenkins, etc.

Canandaigua Sportsmen's Club.

CANANDAIGUA, N. Y., May 16.—The first practice shoot of the Canandaigua Sportsmen's Club was good for exactly the morning order of rolls—one dozen crackers in this instance filling the order.

Mason and Soule tied for first prize. Mason won after shooting off the tie on 20 targets. A. A. Sterling won the club championship medal for first possession at 25 targets.

Scoreboard for Canandaigua Sportsmen's Club showing scores for Mason, Soule, Sterling, etc.

Shoot at Waukesha Beach.

WAUKESHA, Wis., May 11.—Out of a possible 50 the following scores were made: Greb 43, Akin 43, Knight 41, Vanderburg 39, Williams 38, Hartford 38, Frizz 31, Wolf 29, Green 23, Stanley 19, Holmes 18.

Greb and Williams tied for the first win on the T. M. Todd trophy, and in the shoot-off tied again, and will shoot off on the following Sunday to decide the winner.

Pipestone G. C.

PIPESTONE, Minn., May 17.—The Pipestone Gun Club's first annual registered shooting tournament, held May 14-15, has passed into local history as a successful meet, despite the limitations of a drizzling rain the first day. A shooter being born with the divine "afflatus," cares nothing for a little thing like that; but to a spectator it is not pleasant to stand on a wet field absorbing moisture from the atmosphere. The shotgun artists, who came from all quarters, enjoyed themselves thoroughly, and were put into a still more happy state of mind by the fine, fragrant coffee and accessories served by the ladies of the Episcopal Ladies' Guild. The gun club feels grateful to them for thus helping us in the entertainment of our visitors.

Table with 4 columns: Name, 1st Day, 2d Day, Total Score. Lists names like H G Taylor, W A Brown, B Hanson, etc.

Two extra events of 25 targets each followed the regular program each day, contestants being handicapped on basis of scores made in regular program. Twenty dollars was added to each event; purse divided, class shooting, four equal moneys. Entrance \$2.50; targets, two cents each, deducted. The scores:

Table with 4 columns: Name, Hdp. Yards, 1st Day, 2d Day. Lists names like H G Taylor, W A Brown, B Hanson, etc.

ALFRED PETERSON, Sec'y.

Evanston G. C.

EVANSTON, May 12.—Saturday was cold and windy, and as a consequence only fourteen marksmen turned out. Kennicott was high with 72 out of 75. Phalen won the club silver spoon after shooting off a tie with Kennicott. Coleman's Colts won the team shoot for the Tichenor trophies from Kennicott's Blues by a score of 682 to 602, and each of the following gentlemen on the winning teams received a handsome watch fob: Coleman, Harpham, Millen, Carman, Phalen, Watson, Searle, Hanson, De Clercq and Milner. Scores:

Table with 4 columns: Name, Shot at, Broke, Total Score. Lists names like Phalen, Scowley, Ballou, etc.

Sunday most of the members attended the Inter-urban League shoot at the Chicago Gun Club, the event being won by the Evanston team.

W. J. PHALEN, Sec'y-Treas.

Cleveland Gun Club.

CLEVELAND, O., May 17.—The following scores were made at the weekly shoot of the Cleveland Gun Club to-day:

Table with 4 columns: Event No., Name, Score, Handicap. Lists names like Doolittle, Grant, Brown, etc.

Freeman 39, Thorp 34, Brown 39, Stevens 33, Dible 37, Rockwell 36, Bowland 34.

Event No. 3, 25 targets, handicap added targets: Doolittle 25, Grant (6) 25, Thorp (8) 25, Rogers 24, Stone (1) 24, Stepp 23, Brown (2) 23, Judd (1) 23, Stevens (3) 21, Freeman 20, Brainard 20, Hartman 13.

Event No. 4, sixth city trophy, 25 targets: Stone 25, Doolittle 24, Grant 24, Stepp 24, Rogers 24, Brown 24, Hartman 17, Stevens 15.

Event No. 5, special, 25 targets: Rogers 24, Grant 23, Brown 22, Doolittle 20.

Event No. 6, special, 25 targets: Grant 24, Rogers 23, Doolittle 22, Stone 22.

F. H. WALLACE, Mgr.

Chicago G. C.

CHICAGO, Ill., May 11.—Twenty-six shooters shot the club program during the afternoon, and quite a number of practice and extra events also were shot. Five traps were in operation, and nearly 15,000 targets were trapped. Quite a number of excellent scores were made, Taggart and Bosley making the even 100 with their added handicap. Ed. Graham broke 98 out of his century; Kennicott, Silver and Burton all breaking in the 90s.

Table with 4 columns: Name, Score, Name, Score. Lists names like J A Taggart, M E Bosley, H Kennicott, etc.

May 10.—Only eight shooters came out for our weekly shoot to-day, some of our members attending other shoots. Fetherstone landed the top honors with 96, Lyon coming in for second place with 93, while Young broke 92 for third. Events 8 and 9 were distance handicaps. The scores:

Table with 4 columns: Name, Score, Name, Score. Lists names like E Lyon, J S Young, J M Schutz, etc.

Waterloo G. C.

WATERLOO, Ia., May 14-15.—"Really Lou, 'tis Waterloo." Rained likell, blew like Billybelowed, and was dreary as the bunch wandering on the shores of Acheron for lack of an obolus, with a weather man as hard-hearted as Charon. Thirty-seven rockers drilled at 12,680 rocks out of which Billy Hoon spoiled 355, being out-cracked only by H. C. Hirschy, from the "for-wads-only" squad, who located two more flying enigmas than did Billy. Second lucre was separated into two little stacks by Geo. Nichol and N. Muncy, who is neither from Indiana nor related to the magazine trust. Each stack had fragments of 250 saucers in it.

Table with 4 columns: Name, 1st Day, 2d Day, Total Score. Lists names like W S Hoon, H W Kahler, J T Garrett, etc.

New York State Shoot.

BUFFALO, N. Y., May 19.—That shooters may, without question, receive programs for the forthcoming State shoot, from six to twelve of these will be sent under one cover to secretaries of gun clubs throughout the State. Each program will bear a stamp, ready for the shooter's address, and it is our earnest wish that each secretary shall address and mail to those of his club whom he believes will be most likely to attend the shoot. With the lot of programs will be inclosed a card addressed to the secretary-treasurer of the association, on which is printed a request for names of shooters to whom the programs are sent, thereby enabling the committee to secure a list of such names for future reference.

Our prize list for the merchandise event now totals more than \$3,000, and this will be added to for at least one more week. In the list of specials are valuable cups presented by Mayor Fuhrman, Harry D. Kirkover, the Iroquois Hotel management of this city, and Harry Harris, of Rochester.

Mr Kirkover also offers a trophy to each member of the winning team in the annual contest for the Dean Richmond cup.

C. F. LAMBERT, Sec'y-Treas.

## Schoverling Daly & Gales

302-304 BROADWAY . . . . . NEW YORK CITY

### 3 GRIZZLIES IN UNDER 1 MINUTE

Feb. 10, 1913—Writing to tell you how pleased I am with the .280 Ross. Last season in Cassiar, B. C. I went after 13 head and bagged the lot, at ranges varying from 60 to 500 yards in 27 shots. My bag consisted of 3 Black Bear, 4 Grizzlies, 2 Goat, 2 Cariboo, 2 Moose. In my estimation **there is no rifle to compare with the "Ross .280."**

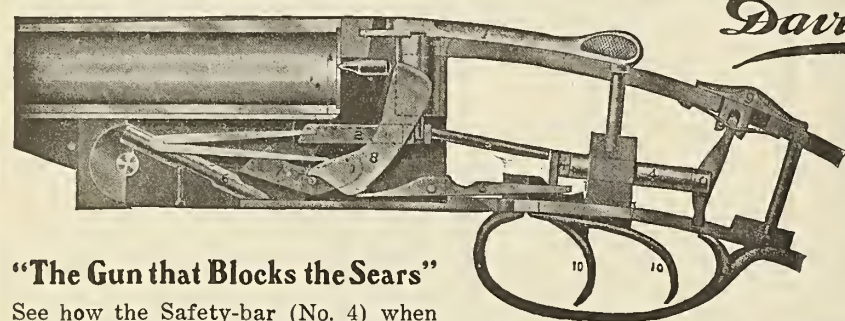

The balance is perfect, the action fast and smooth while the flatness of trajectory quite does away with the judging of distances.

**I shot a goat at over 500 Yards with exactly same Sight** that I take at 100 yards. The 3 grizzlies were killed in under one minute. Cluny C. Luke, Alberni, B. C. (Extract letter to Ross Rifle Co.)

**\$55.00** The "Ross" .280 High Velocity is now retailed in New York City, duty paid for \$55.00 and the Ross .280 Ammunition, with copper tube expanding bullet, patented, specially adapted for it, at \$7.50 per 100.

Get one NOW for your next trip. If your dealer cannot show one write for illustrated catalogue.

#### Hudson Gun Club.

JERSEY CITY, N. J., May 18.—Find scores appended of the regular club shoot of the Hudson Gun Club, twenty shooters taking part. The day was ideal, being bright and pleasant, with no wind to bother the flight of the targets, and some very good scores were returned. There were no straight scores made, as straight scores are as scarce as hens' teeth at our grounds, but D. Engle, W. Emmons and W. Roach had made a good bid for one, breaking 24, but 24 is not a straight, so it does not count. High gun for the day went to Tom Kelley with 83. Billy Emmons, all the way from Hartford, Conn., was second with 82, while his brother Al, from the good old State of Jersey, was a close contender with 81.

Billy Emmons, who used to handle the office at the Hudson G. C. before he moved to the farm lands of Hartford, thought that he would put one over on us this morning, so he landed at the grounds, cocked and primed for some shooting, with a chip on his shoulder. He started the argument with his brother Al, who put

him under cover in the first two events. He then thought he would try to trim Kelley in a 100-bird race, but broke only 75 to Kelley's 83. After a few more tries with the rest of the bunch, we passed around the hat to enable Billy to get his car fare home, so that he will come soon again with some of his farmer shooters from Hartford, so that they can learn a few of the fine points of the shooting game. Let us know, Billy, when you are coming, so that we can ease up on the traps so as to help you make a few good scores.

Our next shooting date is June 1, when Walter Raymond, who has challenged the champion double-bird shot of Yonkers, N. Y., Dr. O'Brien, to shoot a match at 50 doubles for the gold medal that the Doctor now holds. We look forward to a keen contest, as the Doctor is some double-bird shot. (We can vouch that the Doctor broke a pair of doubles once in a contest.) Don't forget the date, June 1, just a few days before the New Jersey State shoot that will be held at Red Bank, N. J., so if you want some good hard practice, come out to the Hudson Gun Club traps. Everybody welcome.

#### Audubon G. C.

BUFFALO, N. Y., May 17.—Frank Kelsey demonstrated very forcibly by his shooting to-day that he is not in any but the best of form, and if he continues at the present clip, he will take some beating at the Decoration Day shoot and the State shoot on June 9-12. To-day there were thirty-two shooters in attendance, and many straight scores were turned in. Kelsey was high gun with 94. Parker and Covert broke 93, Rommel 91, and Wright 90.

Great preparations are being made for the State shoot, at which prizes and cups to the value of \$3,500 will be contested for.

On May 30 the Audubon Club will hold its annual Decoration Day tournament, at which added money and merchandise to the value of \$400 will be contested for. This tournament will be held on the same grounds on which the State shoot will be held, namely Kenilworth Racetrack. To-days scores follow:

Targets:	15	20	20	20	25
Kelsey	15	20	19	17	23
Parker	14	19	17	20	23
Covert	13	20	20	18	22

#### Birmingham G. C.

BIRMINGHAM, Ala., May 19.—There was shooting at the Birmingham Gun Club on Friday and Saturday. For the two days James Day and Walter Huff tied with 96 out of their 100 shot at. H. C. Ryding and Gentry Hillman tied for high amateur with 91 each. We had with us T. E. Doremus, of Du Pont Powder Co. It is his first visit to our club, and we wish he would come often. Dick Leland was there also, representing his company, making in all four professionals. Lee Moody was second amateur with the best score he has made in a long time.

Scores were made as follows, 100 targets per man:

James Day	96	Doremus	79
Walter Hull	96	C J Broyles	79
H C Ryding	91	C J Barr	78
Gentry Hillman	91	I Sellers	78
Lee Moody	89	Randolph	76
Mrs Garl	83	D Leland	74
O L Garl	83	R Baugh	72
R Mvers	82	Stephens (75 tgts)	48
Y Lecroy	80		

#### Sikeston (Mo.) Gun Club.

THE twenty-seventh annual tournament will be held at Sikeston, Mo., and a large entry is expected. We print full program, as it shows new system of money division, whereby every shooter breaking 8 or better in each event, excepting first and last, gets a piece of the money. Ten dollars added coin in event 1 is divided in four 25s. class shooting. Practice day, Monday, May 26, begins at 3 P. M., four events 25 rocks each, entrance 25 cents per man. The program consists of twelve events: one at 25 targets, 50 cents entrance, \$10 added; events: No. 1, at 25 targets, 50 cents entrance, \$10 added; Nos. 2-11, 15 targets each, 30 cents entrance, \$15 added to each event, and No. 12, miss-and-out, \$1 entrance. One re-entry allowed in event 12, winner takes purse, less two cents for each target thrown. Trade representatives may shoot for targets only in event 12.

The \$15 added to each 15-target event, divided as follows: \$1.50 between contestants breaking 15; \$2.50 between those breaking 14; \$3.50 between those breaking 13; \$3.00 between those breaking 12; \$2.50 between those breaking 11; \$1 between those breaking 10; 50 cents between those breaking 8 or 9.

Shelbyville County G. C.

SHELBYVILLE, Ill., May 13.—G. S. Robbins with 143 out of 150 was high gun at the registered tournament held to-day, tying C. L. Baker, professional. Dr. J. R. Lieb was second with 142, tying W. D. Stannard, trade exponent. Third went to H. W. Cadwallader, who cracked 139. Thirty-eight shooters shot at 7,500 scalers.

Table with two columns: Shot at, Broke and Shot at, Broke. Lists names and scores for various participants like G. E. Mathews, C. L. Baker, etc.

Portland Gun Club.

PORTLAND, Me., May 17.—Good fishing in the nearby lakes was the cause for the small attendance at the weekly shoot of the Portland Gun Club to-day. By far the most interesting feature of to-day's event was the contest between Dana Miles and his young son. Neither the father or boy had ever shot at clay pigeons before, but they went after the birds like veterans.

Table with two columns: Name and Score. Lists names like Hill, Blanchard, Dimick, Hinds, Darton, Hayden and their scores.

Westboro G. C.

WESTBORO, Mass., May 19.—Wednesday afternoon, on invitation of the Brampton Gun Club, seven members of the Westboro Gun Club took part in a 50-target event and ranked high in the scores. The following members went over: Hemenway, Geo. Taft, Metcalf, Judge Fowler, Capt. Johnson, Hunter and Leland. They reported a fine time, and hope the Hopkinton boys will come over and shoot on their traps in the near future.

The third shoot of the Westboro Gun Club was held Saturday afternoon at the traps on Nason field. There were three events, with eight members competing. Two 15 and one 20-target events were shot. Taft was high man of the afternoon. The scores were as follows:

Event No. 1, 15 targets: Burhoe 6, Treadway 3, Hunter 6, Taft 10, W. Metcalf 9, H. Metcalf 9, Fowler 1, Hoffman 9.

There were other members of the club present who did not compete in the events. Great interest is shown by members, who turn out at every opportunity.

Medford (Okla.) Gun Club.

MEDFORD, Okla., May 16.—The following are the scores made this afternoon:

Table with two columns: Shot at, Broke and Shot at, Broke. Lists names like Wilson, Hardy, Bunch and their scores.

The Great Sleeper Shark.

THE great sleeper shark is a most stupid, gluttonous species—as, in fact, are most of the sharks—and spends most of its time dozing on the surface of the sea. When aroused or hungry, it attacks whales, porpoises, or, in fact, anything it can find, and bites pieces from its victims with its knife-like teeth.

ONE BIG BUCK.

Continued from page 647.

foot. Well, we hauled Mr. Horns ashore. Then, thanks to watertight matchesafes, and logs that sometimes have dry under sides, and thanks also to a dead birch we barked our shins upon in the dark, we made a fire. That fire was the most cheerful thing (except pay day) I had ever seen.

We lightened the deer of those digestive, respiratory and other organs he had no further use for, and then tying his legs together and cutting a pole, we essayed that beautiful scene depicted in the sporting press as "taking the quarry to camp." Now, that looks well in a picture; fine and dandy. Did you ever try it through the virgin forest about 2 A. M. with a drizzly rain falling, with wet clothes, spruce root traps, many tumbles, switching and scratching undergrowth, and—the lantern in the bottom of the bay? Gee! I'll never forget that night; neither will Frank.

Finally, about first coffee time in the morning, we struck camp. "Get one?" asked the sluggard of the party who hadn't even arisen. "Yes, you lunk-headed Scandinavian," we cried in chorus, as with the last ounce of strength left in our frames we heaved the bloody, wet and hairy monarch on top of Mr. Lazy, and he slept on a canvas cot at that. Tableau!

Oh, about the gun? We got that the next afternoon, but it was a cold job. We also recovered what was left of the canoe and the paddles. The lantern is still there.

THE ANGLING ROD IN CENTRAL OHIO.

Continued from page 659.

where the members also go to practice casting at any time. Our first tournament was held here May 18, 1911, when about 200 interested people enjoyed a good time and about \$100 worth of fishing tackle was distributed among the jovial contestants. This is the first angling tournament ever held in Central Ohio, and I am told it is the first in the State. Next tournament is May 30, afternoon. Memorial services in morning.

Our worthy State Fish and Game Warden, Col. J. C. Speaks, who is one of our esteemed townsmen and one of our members, says he will deputize every member of this club to bring to bay any illegal catching of fish. So you understand that illicit fishing in Franklin county has too many eyes to dodge, and has too much cash and talent to fight, and, mind you, we have a score of the best legal talent in Central Ohio. A number of arrests have already been made.

Columbus and vicinity have more, if not the best, inland fresh waters than any other section of equal size in the State for good game fish such as the bass, as follows: Scioto and Olentangy rivers, Big Darby, Little Darby, Big Walnut, Black Lick, Deer Creek, Paint Creek, Alum Creek. Also Greenwood Lake at Delaware (twenty-four miles), about one-half square mile; Buckeye Lake near Newark (thirty-three miles) has about fifteen square miles, and Indian Lake at Lewistown (sixty-four miles) has about twenty square miles, and Grand Lake at St. Marys (ninety-three miles) has twenty-six square miles. This is the largest artificial lake in the world. At one time oil wells were sunk in

Kennel.

Cable Address "Designer," Boston

the bottom of this lake, and as a result, many of the fish were killed, and the remainder rendered unpotable from the taste of oil. But about ten years ago these wells were plugged, since which time the fish have again become plenty and edible. By shuttling of 603 steam and electric trains every twenty-four hours you can make the trip for one or two cents a mile to each of the waters mentioned. Add to these whirling wheels the street cars and the automobiles with the network of boulevards, and we become amazed at the great facility surrounding us to go a-fishing.

The League of Ohio Sportsmen was regularly incorporated Feb. 7, 1913. While this is a distinct organization, yet it is the outgrowth of, and is mothered by the Columbus Anglers' Club. This State-wide movement has for its purpose the protection of fish, game and song birds, and creating interest in outdoor sports and open air amusements. It provides for eighty-eight vice-presidents, one for each county in the State, who will handle the League's business.

Ohio appropriated last year \$28,000 for the Fish and Game Commission, an amount far too small for great results. The League expects within two years to have to its credit \$200,000. Why not? By a conservative estimate, we have 800,000 voting fishermen in Ohio; and if each would pay twenty-five cents, the Commission would have a power that would keep a plenty of fish in every State water, so that for an hour or two of recreation a potable fish or two could be creeled.

**Ownership of Shore Lands in Germany.**

PRIOR to Jan. 1, 1900, the general Roman law, which provides that all flowing waters, the sea, and the seacoast to the utmost limit of the highest tide, should belong to the State, was applicable in the larger part of the German Empire. Since the date named there has been a development of legal principles in this country, according to which the following rules are now operative:

"Private ownership of property does not vest in those things which, according to their natural state and condition, are beyond the mastery of human agencies. Therefore, while the shores of the sea might in themselves become subject to private civil law, they are looked upon everywhere in Germany as the property of the Government, and in order to determine the limits of this ownership in all probability the old Roman principle of the reach of the highest tide would govern. Therefore private privileges on the seacoast in the German Empire can be acquired only through special agreements with the State which exercises sovereignty in the territory.

"The possibility of private ownership of territories situated on public rivers and waterways in the interior, as well as brooks, ponds, and streams, exists; but the local law of each particular German State applies, there being no Imperial water law. All continually flowing waterways are public and are not subject to private control. Lakes in the interior are regarded as closed waters and may be owned privately."—U. S. Consul-General Robert P. Skinner, Hamburg.

LET every dawn of morning be to you as the beginning of life, and every setting sun be to you as its close; then let every one of these short lives leave its sure record of some kindly thing done for others, some goodly strength or knowledge gained for yourselves.—John Ruskin.

Our new Catalogue will interest every lover of the Big Outdoors. It contains not only accurate description of Camp Outfits, Firearms, Fishing Tackle, and Athletic Goods, but many pages are devoted to

**How, When and Where To Camp, Fish and Hunt**

It tells of actual experiences when camping, with advice as to pitching a tent, paddling a canoe, choosing a rifle or shot gun, how to learn bait or fly-casting, what to take camping, selecting clothing and provisions, how to use a compass, preparing game and fish for mounting and other "kinks" in wildcraft.

It contains 472 pages, profusely illustrated, and will be sent to your address free, upon request, if you mention No. 570.

**New York Sporting Goods Co.**

**15 and 17 Warren Street, - New York**

**The Breadfruit Tree.**

ONE of the gifts of the Eastern tropics to the Western is the breadfruit, which is now extensively planted in the West Indies. This can be done only by cuttings, as the cultivated variety develops no seeds; in the wild form the chestnut-like seeds are eaten, but the pulp is disregarded. The tree is of moderate height, says Harper's Weekly, but spreads a broad crown of large, ragged-edged, glossy leaves, making an excellent shade. The fruit, which is a compound of the massive clusters of blossoms, is about the size of a coconut, and is incased in a rough rind. This, when baked in hot embers, or in an oven, broken open and scooped out with a spoon, tastes like mashed potatoes and milk, or like sweet bread, which it also resembles in appearance. It is a little fibrous toward the center, but elsewhere is quite smooth and "puddingy." Sometimes a curry or stew is made of it; and it goes well as a vegetable with meat or gravy. "With sugar, milk, butter or treacle," Wallace wrote, "it is a delicious pudding, having a very slight but delicate and characteristic flavor, which, like that of good bread and potatoes, one never gets tired of." It is also highly nutritious. The genus (artocarpus) contains several species, one of which, the jackfruit, is also cultivated for eating. The timber of the tree is also useful, the bark can be prepared for a sort of cloth, and the sap forms, when boiled with oil, a mucilaginous liquid very useful for making the seams of wooden pails, canoes and the like watertight.

TRAPSHOOTING NOTES.

Independent G. C.

READING, Pa., May 24.—The following scores were made by members of our club at our regular monthly shoot. Event No. 1 was for the Du Pont fob; No. 2 was for the Stevens fob; Nos. 3, 4, 5, 6 and 7 were for club prizes; No. 8, \$1.50 entrance, won by Jones; Nos. 9, 10, 11, 12 and 13, \$7.50 entrance won by Firing with 74. The scores:

Table with columns for Events (1-13) and Targets (25-25) and rows for various shooters including Eck, Swisher, Schmehl, Jones, Firing, Haag, Murtorf, Young, Blind, Davis, Seiling, Less, Bowman, Groff, Stricker, Hofer, Schaeffer, Wolfskel, Engel, Sweigart, Weidner, Dick, Miller, Mader, Sloat, and Lutz.

Cincinnati Gun Club.

CINCINNATI, O.—E. Hammerschmidt, the Covington amateur, was in his best form May 25, at the weekly shoot, and easily headed the list with 97, breaking his first 46 straight. Johnson got in second place with 83, having a close race with Butz, who finished only one target behind. Most of the regulars had had their fill of shooting during the past week, and did not show up, only nine men facing the traps. Early in the afternoon the wind was something of a handicap, but later the conditions were ideal.

In a team match, which wound up the shooting, Hammerschmidt and Sander were defeated by Gambell and Butz. Gambell was the last to shoot his score, and found it necessary to shoot at only 18 targets, his score of 16 giving his team the victory. Sander and Butz tied in a race at 25 targets, on 20 each.

The Latonia Gun Club will hold a shoot on these grounds on May 30. The program will consist of ten 15-target events, with a special event for merchandise prizes. The shoot will start at 9:30 in the morning, and promises to be one of the best which has been held in this locality for a long time. Everyone is invited to come over.

Table with columns for Shot at, Broke, and Ham'sr Schmidt, and rows for Johnson, O. J. Holaday, Holaday, Sr., Frohlinger, Binkley, Gambell, and Butz.

Roanoke G. C.

THE usual week-end shoot of the club was held on its grounds on May 24 with a good number of the faithful ones in attendance. The club was also glad to have with it Messrs. Willis and Goodloe, who participated in the sport. The club is always glad to have with it visitors. The weekly trophies offered by the club were won by the following members:

Scratch Class: Jamison first; Bloxton and Elliott tied for second.

Class A—Boyd first; Holland second. Class B—Dyer first; Heins second. Class C—Cooksey first; Richards, second. Stevens trophy—Dyer.

The respective scores made by the several shooters are as follows:

Table with columns for Broke, Pr.ct., and rows for \*Willis, Holland, Jamison, Boye, Dyer, Elliott, Bloxton, D W R'chards, and Shepherd.

Berlin (Md.) G. C.

UNUSUAL interest seems to be centered in the coming shoot at Ocean City, Md., under the auspices of the Berlin, Md., Gun Club. This tournament will be held the week following the Eastern Handicap tournament at Wilmington, and will enable the Eastern Handicap contestants participating in another classy tournament.

The Ocean City shoot will be under the direct supervision of H. Linn Worthington. Every indication points

to an unusually successful affair and no pains are being spared or no expense considered by the Berlin boys to insure the success of this tournament.

The added money will be considerable, and as Ocean City is an ideal summer resort, the Berlin boys have everything in their favor. Already many shooters have signified their intentions of attending.

Columbus (O.) G. C.

COLUMBUS, Neb., May 21.—Fifteen thousand targets skidded on the slippery atmosphere here yesterday and to-day. With 363 out of 400 Geo. Grubb took the initial roll, followed by Chas. Gammon with 362 (score sheet gave R. H. Thurston 362, but he broke only 262). E. D. O'Brien was pro winner with 382. D. D. Gross cashiered and sent in cracking clear score sheet.

Table with columns for 1st Day, 2d Day, and rows for \*Ed O'Brien, \*L S German, \*G Kreger, \*H D Freeman, \*W A Brown, \*D D Gross, L A Gates, A Bartholmew, G Gutzmer, D D Bray, W Kaufman, J F Colwell, \*Geo Carter, R D Morgan, J K Arnold, G Nicolai, H Dixon, Geo Grubb, and Chas Gammon.

M. C. F. and G. Association.

ALBIA, Ia., May 20.—Billy Hoon made another clean up to-day in the tournament of the Monroe County Fish and Game Protective Association. His spoilage was 143 out of 150 perfectly good targets. J. C. Graham took second gold with 138. I. N. Price led the "for-targets-only" outfit with 142, and some one met Harry Kahler sitting on a stack of 36 unbroken discs with the balance of his 150 strewn about him. Thirty-seven shooters, among them six pros, distributed the dust of 6,040 rocks. Harry O. Rake cashiered.

Table with columns for names and scores, including F K Eastman, W T Garrett, W S Hoon, \*I N Price, \*H W Kahler, D K Douthett, C C Kendall, W M Hall, O Reckwith, \*E T Lednum, J Foley, J E Traister, E E Reynolds, \*F C Whitney, J Craven, C A Hilton, C A Hunter, and T B Perry, Jr.

Onondaga G. C.

SYRACUSE, N. Y., May 22.—With 148 out of 150, O. E. Carpenter won the tournament here to-day. Harry Stevens, a pro cracker, broke 149. O. C. Denning was second spoil divider with 145, while Sim Glover took second largest wad division with 147. T. E. Clay successfully cashiered on 8180 rocks.

Table with columns for Mdse. and rows for C L Frantz, C C Snook, J G S Dey, D Lillis, C E Gammage, J De Bee, A C Denning, A T Davenport, D J Hausman, G W Sherman, \*S Glover, A W Meager, \*N Appar, W E Hookway, J S Conley, T E Clay, H V Fellows, O Carpenter, \*H H Stevens, J C Marsellus, J Broderick, H Blackmer, W E Corfield, H W Smith, D Wadsworth, and L J Sanford.

Meadow Springs G. C.

PHILADELPHIA, Pa., May 24.—H. Kelly broke 95 and got high net score. Vincent Oliver made 93 actual, and Coyle 94.

In the shoot for high total on 50, E. H. Turner, P. J. Ford and A. J. Renner tied. In the shoot-off Ford was the victor by half a target. E. H. Turner, however, secured a dipper for high total on 100. In addition the following secured points toward the yearly prizes: E. H. Turner, A. J. Renner, E. C. Chandler, P. J. Ford, James Coyle, Thomas Kirsch and Charles Keenan, each 5; C. Woodward, 3; G. Deily, 2, and G. F. Rothaker and G. C. Muller, each 1.

Oakwood G. C.

LYNCHBURG, Va., May 20.—Fox was high to-day with 96 out of 100 on full program. R. Winfree won regular event with 47 out of 50 and was second on full program with 92 out of 100. No. 1 was the club event; No. 2 an extra event. Scores:

Table with columns for Events (1-2) and rows for Fox, R Winfree, \*Scholl, Stockley, Anderson, Terry, Dawson, L Winfree, \*Lee, Scott, J Fisher, Lingle, and \*Coffin.

## Grand Portage A Forgotten American Highway

A Long Trip in Short Instalments—Number One

By S. H. HOWARD

**I**N the unpublished diary of David Thompson in the vaults of the Provincial Parliament Buildings, in Queen's Park, Toronto, occur these entries, dated Grande Portage, 1799:

June 11. Le Lary arrived with 19 packs of fur, 80 lbs. each.

June 14. The Lake Winnipeg, Isle Portage, Rainy Lake and Montreal canoes arrive.

June 16. Four canoes of MacGillivray's and Sager's from Fond du Lac arrive late at night.

June 18. The Montreal canoes arrive.

June 24. Harrison, and 5 canoes loaded with goods and provisions arrive at 10 A. M. The sloop Otter with furs sailed for the Falls of St. Mary.

June 25. Several Northwest Company canoes arrive from Montreal.

June 30. In the afternoon Mr. Todd from Fort des Prairies (Edmonton) arrives, and several canoes at the other end of Portage.

July 1. Roderick MacKenzie in a large canoe arrives from Montreal with letters.

July 2.—Grant, McLeod, McTavish and James Mackenzie arrive from Athabasca and English River, and McKay from the Swamp country.

July 10. In the afternoon McDougall, McLeod, Roderick and James Mackenzie went off for Athabasca.

July 12. Alexander Mackenzie arrives.

These old entries, in the faded, brown ink and the fine crabbed writing, give an insight into the place and importance of Grande Portage one hundred years ago. David Thompson was an explorer and astronomer for the fur companies, and it was he who surveyed much of the international boundary west of the lakes. Grande Portage in his day was the principal point on Lake Superior, and indeed one of the important points of the continent.

Before the first conception of the Union Pacific or the Central Pacific R. R., before even the Oregon or the Dawson trails, the one link between the Great Lakes and the great West was a footpath nine months long, known as La Grande Portage, or in English the Big Carry, and it is still there. They pronounce it a little

differently nowadays, but the name is still the same. And you may cross the nine miles of road to the Cascades at Pigeon River on a path that has been in more or less use ever since the French period in this country and likely enough long before. It's a fairly straight road cut through the bush about wheel wide. The Pigeon River Lumber Company brushed it out two or three years ago, and they take stuff into their camps that way sometimes in the winter. Great burned pine logs and blackened stubs stick up through the young spruce, birch and poplar each side, save in one short section where the great fire of 1845 must have skipped. Grande Portage cut right through a great pinery when the Northwesters used it. You come out nowadays at the Cascades, where you'll find a lively lumber camp on the Canadian side, across an engineering marvel they call a dam. The Pigeon River pitches itself into a cavernous gorge at this point, and the lumber jacks have built a but-

tressed barrier across the top and a gate for the logs by which they are led several flights downstairs. Previously they had blasted out a new channel to the left and sheeted the jagged rocks with iron so that the logs would glance. But this channel had a right angled turn, and the timber used to go round so fast the logs broke. So they made a straight stairway of it, and run them down after the dam accumulates enough water for a flood. In mid-summer water is low, and they have only enough sometimes for one flood in a day.

One hundred years ago Port Charlotte stood on the river a short distance above this camp, and rather than build dams and follow the tumbling Pigeon to its mouth, the Northwest Company wisely unloaded their cargoes there and cut across a corner of modern Minnesota, to Lake Superior at Grande Portage Bay.

The pack strap and the paddle formed the principal means of livelihood in that country

GARGANTUA RIVER, NORTH SHORE OF LAKE SUPERIOR.

in those days, and at Grande Portage the pack strap took precedence. Men used to load as much as three sixty-pound bags of flour on their backs and walk across the Grande Portage and return with the same weight of furs as late as John McLaurin's day. In the time of the Northwest Company, when voyaging was at the height of its glory, no doubt the rivalry among a thousand men led to feats very much greater than that. Seven hundred pounds is an old story—for a short distance—while some narrators will go as high as nine and tell you exactly how the load was adjusted. Old John McLaurin, of Fort William, who used to pack over this portage, is very proud of the fact that he could put a keg of pork on top of a bag of flour and get the barrel up by himself. His wife (an Indian woman from the South Shore) could carry as much as he could, "but then," says John, "there were men who could walk off with me—pack and all." The Hudson Bay Company used to pack in brigades and relays, putting down the packs at every 1,000 paces, and going back for another load. "We rested walking back," says John McLaurin.

There is a steady up-grade from Lake Superior until about six miles are covered, when the land relents and lets the burden bearer gently down to the valley of the Pigeon. Several steep gullies cut across the route, meaning a climb of perhaps 100 feet each time, and in wet weather there are at least four brooks, and as many swampy beaver meadows. Over this road the supplies for the Canadian Northwest and the Oregon used to be transported on men's backs.

Here on this old trail, where Batiste Trudeau and his kind toiled and sweated, with the glory of accomplishment and a Spanish dollar per hundred pounds a trip for his reward, we may pass to-day over the same hills and realize the exact conditions under which he labored, and in doing so we turn back the nineteenth century wonder book to the first page and the preface.

When you go to Grande Portage nowadays you go by palace steamer. You also leave the silent "e" out of "Grande" and pronounce "portage" like you do cartage, and no French nonsense about it. And all is comparatively up-to-date, including the Duluth capitalist and the majority of the passengers. At 2 o'clock in the afternoon the boat noses into a channel, with a wooded mountain on the right and a wooded island on the left. And between you see to the "bottom of a bay which forms an amphitheater and is cleared of wood." Sir Alexander Mackenzie describes this place in his book, published in 1801. You note "the hill three or four hundred feet high in the left corner, crowned by others of still greater height." But in place of the fort at the base of this hill, as in Mackenzie's time, surrounded by cedar palisades eighteen feet high, you see the scattered white log cabins of an Indian village, for Grande Portage is now a "reserve" in the State of Minnesota.

The close green forest of spruce and birch and pine looks down from mounting tiers of terraces upon a shallow harbor. We'd call these carpet-spread Laurentians "mountains" in old Ontario or in Michigan, but Sir Alexander Mackenzie came from the Highlands of Scot-

land and he called them "hills." They slope back from the village, rising to the height of about 1,000 feet, thrusting encircling arms out into Lake Superior as if to trap the evasive little island.

In the channel near this island the steamboat comes to a stop, and you look down from the deck at the pebbles on the bottom through water as clear as air, yet tinged with green. A wherry loaded with people puts out from a corner of the island, where you notice a clearing and a little dock. Three men standing at the sweeps, facing forward, lean and sway, two pushing on the oars amidships, one sculling in the stern. They bring up under the fore port gangway, throw a U. S. mail bag aboard, and one by one a dozen of Indian men, women and children clamber up the ladder, followed by a few stubble-bearded lumberjacks.

Then somebody shouts: "Anybody getting off at Grande Portage? Hurry up—we've only got a minute here."

A moment more and you sit under the swelling bilge of the steamer and see the rusty rivets descend the full curve into the clear green water and disappear underneath the hull. You have clambered down a six-stepped ladder from civilization into the wilderness, from the present into the past.

The steamer glides away and disappears from the little forest harbor. You go ashore with Pete Gagnon and his men, all silent as smugglers. Nobody asks any questions of the stranger. The heavy wherry, the great sweeps, the hard-lined faces, the swaying jersey-clad bodies, the rocks, the clear green water—all bear suggestion of the sea and the pictures of that great American artist, Howard Pyle.

At the dock a huge Newfoundland dog, black as ebony, comes gravely to meet the passenger, followed by a St. Bernard, which, though quite an average of its bulky kind, seems dwarfed by the giant black fellow with the long straight legs and the white foot.

A fish shed stands at the end of the wharf and several Mackinaw boats and dories lie there or at their moorings, or beached on the big gnarled pebbles of the shore. Half a dozen log warehouses or dwellings stand in a clearing, and a frame house with a verandah stands back up the slope of the point, close to the wall of the bush. In this house Peter Gagnon, once of Quebec, lives this long since with his wife, an Ojibway woman, and Pete does all the business now done at Grande Portage. His island is the island Mackenzie notes as screening "a pleasant bay from all winds save the south."

Pete is a character worthy of Robert Louis Stevenson. Silent, hard-faced, big of feature, he walks with a loose, wide-braced stride, his shoulders rounded and loose, his long arms hanging as though resting relaxed from a heavy lift or a long haul. But that silent man is the prevailing personality of the place. He works with his brain. He is efficient. Peter originally was a fisherman. Now he buys and sells fish. At Peter's house men pay to stop for a meal or a night, on the way to and from the camps. When on certain days and nights the steamboat calls, Peter puts the passengers on or takes them off, and always they land on his island. Should they desire to go ashore, he sends them to the mainland in one of his skiffs by one of his

men, at fifty cents a head. He handles the United States mail also, and keeps a store. Fishermen come in from the fog or the storm or the calm, as it may be, at any hour of the day or night, in dories, in sailboats, in gasoline launches, and steam tugs, from that great, cold, grim, fresh-water sea they call Lake Superior, with fish to go on ice or be packed in brine. And they land at Pete's place and wake him up, if necessary, and he buys their fish at about six cents a pound—great Superior trout, silver white like salmon, or black and spotted gray like huge colorless brook trout; whitefish, herring, mullet, suckers and sometimes sturgeon. And then Pete takes them up to his little store, with its low, log-beamed ceiling and its square timber walls, and sells the fishermen scantlings of tobacco a foot long, indestructible butter at fifty cents a pound, potatoes, onions, overalls, gasoline, rabbit-skin blankets, pork, flour, matches—anything they want. If ever an artist seeks a study for a store of the pioneer days he should go to Pete Gagnon's some night.

Some night when Dutchy and his partner come in from Pine Bay with fish and moose, Dutchy of the gaunt frame and the windmill arms, he in the tight blue jersey, who used to fish the North Sea and off the coast of Maine; and when comes Francis, the hawk-nosed half-breed, with the ragged mustache, and the thick black hair, and the silent, smooth-cheeked Indian youth who sails with him; when the "land-looker" in the flannel shirt and the shoe packs comes across from the Portage, fresh out of the Minnesota woods; when the Pigeon River log drivers "going out" with their "time" loaf in the background; when all these, and a few more, including Indian boys and the huge sleigh dogs, gather in the little store to buy supplies or look on—one lantern on the floor, another on the wall to light the weather-beaten laughing faces and the lithe, heavy-built forms—then it is one sees a picture of Old Times, a picture with Peter Gagnon in the center; Pete, the inscrutable, behind his narrow little counter—silent, watchful, adroit, handing out the right thing with the right word, and the practical suggestion, always ready with a clinching argument in brief, getting his price, and keeping his personality in some subtle way supreme. And his French-Canadian-American clerk, in the khaki shirt, bustles and talks and chaffs and gets joshed for the two of them, talking Indian (he, too, is married to a squaw), French or American, with equal indifference. You wonder presently when it was you lived before and met the Duluth capitalist. It is hard to realize that this is but the evening of the self-same afternoon.

Peter Gagnon sleeps on Saturday night. The rest of the week he is awake. The down-bound coasting steamers call at about midnight every night but Saturday, and Pete has to meet them out in the channel. When the lighted monster appears in the dark little harbor the great dogs set up a dull, deep-throated baying, and Pete comes forth. Also Pete buys fish to sell to the Fish Company and that is a business that won't keep. It requires ice and salt on the instant. So Pete is always on the job. He makes the least possible fuss, and says what he does say with the least possible effort. He needs his nervous vitality in his business. He wastes none of it. Even his smile is one of

reserved strength, dry, save in one corner, where a wrinkle has been allowed to accumulate for a special purpose. Pete maintains his sympathetic human communication with that wrinkle. It is the bridge that connects friend and strangers with his business-rapt detachment. For his efficiency and for his silence Peter Gagnon is respected; for that wrinkle Pete is liked, and his popularity extends up and down the north shore and away back into the woods.

But Pete could not tell much about the old trail and the old piers under the water, which one can see on a calm day looking down from that hill of which Sir Alexander speaks. They have always been there—nobody seems to know who built them. Four feet under the surface, stretching out at an angle with the shore, you can follow the line of old timbers piled with stones to a point perhaps one hundred yards from the beach. Here the pier forms an apex like a V, pointing lakewards, and returns at a sharp angle halfway to shore. Within the protection of this angle up to within one hundred and some odd years ago, the North West Company loaded and unloaded their Montreal canoes.

You can take a boat from Pete's island place and row across the bay. The distance is about a mile and a quarter. Sight on the high sugar-loaf hill in the left-hand bottom corner of the bay. When near the beach look down into the water. Presently you'll see a heaped-up pile of stones. Follow it, and you will come to the cribbed square-timbers, notched for cross-pieces, bored with augers, and spiked with round iron bars. The wood looks as sound and as sharp-cornered as new, though a slight mossy growth clings in places. At the apex of the piers the cross-pieces are still perfect, four feet down. A gap for the entrance was left on the eastern side, and the eastern pier ends sharply and entirely at this gateway. The longer or western side has lost its shore connection through the action of the anchor ice, while the top of the pier above the stone-weighted foundations—the part that was exposed to the waves and the air—has long since rotted and been carried away.

On the low flat land opposite this old canoe harbor can be seen only sandy earth, loose rocks and low bushes. But presently you discover that the rocks take a certain uniformity of line. They appear also always as if in a kind of healed-over trench. You distinguish quadrangles. These loose, insignificant boulders formed the foundation of the old North West Company's trading fort at Grande Portage, at one time the most important point on Lake Superior, and the last depot for the unclaimed country of the great Northwest.

Behind the flat of alluvial soil on which these ruins lie, and at the base of the 300-foot Laurentian "Sugar-loaf," extends a cliff of rock shale like a wall, forty feet high, and it curves at its west end to meet the lake. A trout creek runs into the lake on the east end of the plot, and along the edge of the level ground above the creek, by the straight, slightly-ruffled little ridge of mounds, may be traced the line of the palisades. The area thus inclosed forms an irregular field grown over with berry bushes and young scrubby trees, killed with fire. The whole space does not contain much more room than a country school

yard, yet millions of dollars worth of business was conducted there one time, and once a year busy men swarmed within and without the palisades.

Here to this unmarked spot every summer one hundred years ago came the "North Men" of the fur trade from the ends of the known earth, back-laden with furs, gathered at a time when the plains were populous, and northern woods and barrens thick with game. Here every summer to meet them came the great Rabiscaw canoes from Montreal, manned by the "Pork Eaters," laden with Manchester cottons, milled blankets, arms, ammunition, twist and carrot tobacco, thread, lines and twine, cutlery, brass and copper kettles, silk and cotton handkerchiefs, beads, and last, but by no means least in those fierce days, rum. Here it was that the Canadian fur trade was organized on a solid basis, and pushed to the limit that the traffic would bear. In the palmy days of Grande Portage, the Hudson's Bay Company was a slow-going, semi-dormant institution on the shores of the salt waters, with office management in London. The North-West Company was an aggressive, forceful, ruthless, inland organization with headquarters at Montreal and entrepot at Grande Portage. It was at Grande Portage the brains of the business centered. It was at Grand Portage the Montreal agents met the wintering partners and planned those aggressive campaigns which made the Northwest Company the biggest business institution in the North America of its day. It was at Grande Portage that Scotchmen reorganized the loose ends of the French fur trade and put it on a system, and the impetus of their example and of their competition awoke the James Bay factors and the London Committee from their long sleep. When the two companies merged in 1821, the merger operated on the old Northwest Company's Grand Portage lines, and grew to commercial greatness and prosperity unknown before. And the Hudson Bay Company stands solid to-day, the oldest chartered company in the world.

[SECOND CARRY NEXT WEEK.]

### Out of Doors Near Home.

NEW YORK, May 20.—*Editor Forest and Stream:* I fancy there is no sportsman—no one in whose veins runs the real red blood—but feels some thrill of excitement when a ruffed grouse gets up close to him. The average Eastern man, from Virginia to Canada—and west through the range of that splendid bird—believes that the ruffed grouse is the king of the game birds, and is eager to have it protected and preserved, that the days of the species may be long in the land.

In "American Game Bird Shooting" a statement is made to the effect that the ruffed grouse will long be found in small numbers in much of the wooded country that he used to occupy in great numbers, and I believe that this is true. Only last Sunday I saw something that justifies this belief.

During an afternoon walk we crossed a tract of land recently sold for improvement—meaning the cutting up into building lots and covering with small frame houses—which border on woods that have been good partridge

ground for the last forty years. Close under a fence at the back of this lot, but still in the open field, is a partridge nest which contains eighteen eggs.

Something that a neighbor had said to me with regard to the actions of partridges only a few weeks ago led me to go down through this piece of land; and a feeling that I can hardly explain caused me to snap the chain into my dog's collar, and keep him absolutely in my hand. I looked with more or less care through a couple of brushy lots, without seeing anything of particular interest, and then, crossing over into the lot to be improved, followed up the fence which separates it at the back from a cedar-grown, pasture knoll.

I was looking everywhere to see what I could discover, when suddenly in a pile of leaves under some rails that had fallen down, I saw the eye, and then the whole profile of a partridge. She was crouched rather close, yet her crest was a little raised, and at the place where the nest was, being the highest point of a pile of leaves, the bird's tail was clearly visible above the leaves. I was perhaps eight feet from the bird. As I turned my head to speak to my companion, the partridge, which had undoubtedly caught my eye, left the nest and darted east, with a wavering, hesitating flight; presumably with the purpose of inducing the dog to follow her. We walked a little closer to the nest, which was deeply cupped, and which, as I say, held eighteen eggs. May they all hatch, and may every one of them survive to maturity, and reach the breeding age! I shall hope to see this old hen again before her chicks are hatched.

That Sunday there were not a few warblers in the trees. The summer residents have all come, but the black-polls, black-throated blues, chestnut-sided, and perhaps bay-breasted warblers seem still passing along.

Sitting by an old wall, near what was anciently a barway, a little movement on the left caused me to turn my head slowly, and there, sitting in the roadway, was a rabbit, which looked about without care, and presently hopped along a few yards and again stopped and looked, and so kept hopping and stopping until he had gone fifty yards or so, when he vanished among the thick ferns.

When we came in at night one of us carried a good bunch of lady slippers (*Cypripedium acaule*), which were very beautiful.

E. C. G.

### Giving Pleasure to his Friends.

RIDGE SPRING, S. C., May 15.—*Editor Forest and Stream:* Inclosed please find check for \$3 for which send FOREST AND STREAM for one year to C. M. Asbill, Columbia, S. C.

Thanking you in advance for prompt attention and with my very best wishes for the continued success of FOREST AND STREAM, I am,  
F. G. ASBILL, M.D.

Mats from Hot Water Bottles.—Rubber hot water bottles that are past repair make excellent mats to place under flower pots, which are liable to dampen a varnished surface. Mats may be cut from sides of the water bottle.

# Trout Fishing Emergencies

By SAMUEL C. CAMP

Photograph by the Author.

**F**LY-FISHING for trout to the uninitiated is a "cut and dried" matter, success appearing to follow the exercise of an adequate amount of skill—plus good tackle and fair luck—much as a matter of course. On the face of it the game seems not to offer much variety. In reality it would seem that every good trout added to the creel represents an individual victory—an emergency which has risen (to the fly) and has been successfully met by the angler.

A day on a trout stream is by way of being a sequence of emergencies; the successful fly-fisherman is he who can most consistently rise to the occasion, when the "occasion" has, or has not, risen to the fly. All of which is another way of saying that trout fishing emergencies are generally of two sorts, those arising prior and those subsequent to the rise of the trout. Assuming that the angler is one of average ability with an efficient outfit tackle-wise, let us consider some of the situations, or emergencies, wherein personality and ability to suit immediate means to an end figure heavily in the ultimate score.

There's the matter of "striking" your fish. On a good day this is an emergency often repeated; always it calls for quick and concerted action of eye, brain and hand. Every fly-fisherman can recall with facility days when many chances were offered and few taken. True it is that sometimes "short" rises are the cause of repeated misses in striking, but it is probably safe to say that in the majority of cases the fault lies with the fisherman. The "psychological moment" is well exemplified by the swift rise of a trout to the fly—instant action is imperative or the emergency has tried the angler and found him wanting.

It is not customary to speak of "condition" in connection with a sport reputedly so non-athletic as angling. There are various kinds of fishing. Some of them demand merely infinite patience and the ability to wear out a boat seat. Masterly inactivity of this sort is far removed from stream fly-fishing for brook trout. In its very essence the game is one of constant activity—and condition does, indeed, play no little part in the fly-fisherman's success.

The man who exercises solely in a swivel-chair cannot for long stand the grief of wading and whipping the average rugged trout stream. Muscles and nerves weaken in concert and a tired-out man with shaky nerves is better off at home. To merely rise to the occasion in every instance—or a majority of them—when a trout offers to the fly requires good muscular condition and a steady nerve; moreover, ability to strike your fish is only one of the many emergencies of fly-fishing which render the pastime one of exhausting interest to the gentlemen of sedentary habits.

Also there's the trifling formality of landing your trout after you have struck him—if you have. Experts have formulated a few good rules for the proper handling of tackle when a

fish is on—which is all very well when the quarry campaigns in the orthodox way. Knowing the general nature of the trout with which you have connected, whether brook, brown or rainbow, one is supposed to know about what the fish will do in the way of resistance, to-wit: A rainbow when hooked almost invariably jumps; a brown trout most frequently makes a long, swift run eventually followed by one or more leaps; a brook trout bores down and away. But this is wholly omitting the unexpected moves of individual fish. Really, in

"THE PSYCHOLOGICAL MOMENT."

landing trout, it is the unexpected which most frequently happens, thereby bringing things to a focus most clearly centered upon the presence of mind and deftness of hand of the angler.

One has seen a brown trout, after a long, stubborn resistance, slowly nursed in to the fisherman, when it leaped high above the water and came back squarely in the landing net. If the net had been elsewhere. Again, one has seen a fine "brownie" safely landed by a mere twist of the gut leader about its gills, the fly having come away in the fight. In point of fact, nearly every fruitful day on the stream is a tale of emergencies met or succumbed to in the way of landing your trout. While general rules have been laid down as to the safe handling of a hooked trout, the angler should never lose

sight of the fact that the eccentricities of resistance of individual fish cannot be foreseen, and that, in the absence of any forewarning, ability to do the right thing at the right time, instantly, intuitively, is the price of success.

The leap of a trout affords a crisis sufficiently acute to tax the nerve of veteran and tenderfoot alike. The Eastern brook trout, *Salvelinus fontinalis*, does not, as a rule, leap unless the angler holds him very hard, but if forced he will throw himself out in a vicious effort to break the connection. The brown trout, *Salmo fario*, leaps quite often when being played on the rod, but not with the facility and frequency of the rainbow, *Salmo irideus*. This latter fish is a chronic and very capable leaper; it is fun to see even the little fellows, the quarter-pounders, come out of the water with all the vicious energy of a three-pound black bass.

The counter-move of the orthodox and quick-thinking angler is to drop the rod-point a little. Unless this is done very quickly the fish is back in the water—very probably to stay there. At any rate, the leap of a two-pound trout is a "real live" emergency—a matter of acute anxiety at the time and a memory sweet or bitter in accordance with the outcome.

Not, by any means, that all the crises of the trout fly-fisherman's day on the stream have to do with the rise, the strike and the subsequent play fortunate, or the contrary, as the case may be. After all, there is but one form of genuine angling—fly-fishing. Of fly-fishing for trout, broadly speaking, there are two kinds; the light, refined fishing for educated trout in the public well-whipped streams of civilization, and the heavier, less scientific and exacting sport found on the practically virgin waters of the wilderness. The genuine angler loves the easy and very resultful fishing in the big woods for the forest itself. As for fishing purely, the finesse, strategy and all-round cleverness of hand and expedient imperative for success on the civilized trout stream make the game more worth while.

A passable creel of trout at the end of a day on one of our near-home Eastern trout streams represents good hard work and the solving of more than one difficulty in the way of inducing a trout to rise to a "counterfeit fly." Moreover, in the process of thus imitating the natural ephemera with deadly intent arise tactical emergencies which demand good judgment and no little knowledge of stream-life plus the power of accurate observation. In fly-fishing, even as in still-hunting, it is the pursuit, not the kill, which affords the essential fascination of the sport.

Of course, in the final analysis, fly-fishing is a gambling transaction; but science has much weight in determining which way the cat will jump. As an instance, take the case of the dry-fly fisherman who has just spotted the rise of a good trout in a quiet pool. As a rule, with educated trout, when the fish is feeding upon

# The Dry Fly Man's Handbook

By THEODORE GORDON

the natural insect only a very good imitation in both appearance and action of the fly which is being taken will produce a rise. Our dry-fly fisherman, then, closely scans the surface of the pool to determine, if possible, to what natural insect the fish rose. Eventually he comes to a conclusion as to this—a conclusion quite possibly, entirely erroneous.

The question of what fly decided, the angler addresses his attention to the matter of how to cast the fly over the fish to the best advantage. The fly must come floating down to the trout, on the surface and with wings erect, even as the little natural dun to which the trout has just risen. The casting must be done with all possible unobtrusiveness and the caster must not be seen. Also the cast must be so made that conflicting currents will not drag the fly one way and the line another.

It should be obvious that if the trout is a particularly good one, one which the angler is naturally very eager to take, our dry-fly man will decide all these points—every one of them an emergency in the making—with the utmost care. And when the cast is made, with all the skill the angler can command, the odds are heavy that it is made with many misgivings—very often entirely justified in the event. On the other hand, if the angler's judgment and execution have been correct, and in consequence the trout rises and is fastened, the angler has every reason to believe that luck has had mighty little to do with the affair.

Fishing all the water as in wet-fly fishing, casting where you have reason to believe a trout may be, is entirely a matter of judgment, also a matter of infinite variety. Angling conditions on the same stream are never alike two days in succession—or two hours, for that matter—and the stream fly-fisherman must be prepared to meet emergencies of wind, weather and water with the proper tackle and methods for the time being.

To know what flies to use and how to use them in order to meet disadvantageous fly-fishing conditions is the whole secret of successful fishing with the fly. When everything is "right" even the tyro may make a good showing. It is when the angler is up against a hard proposition that the stream experience and angling knowledge of the veteran turn defeat into victory. In such an emergency it is, indeed, true that luck, pure and simple, may at times figure to the fisherman's advantage; in the long run, however, knowing how to fish with the fly under any and all conditions—knowledge won on many a long day on the stream—tells the story.

Not all the emergencies of a day on the stream have to do with the taking of trout; that is, the situation often concerns most intimately the matter of tackle. Smash-ups, even with the very best of tackle in the most skilled hands, will sometimes occur; an emergency of this sort is, indeed, serious; to meet it adequately the angler must possess no little knowledge of splices, invisible windings, how to remove ferrules, and so on. Additionally, it is to be hoped that the fisherman, dimly suspecting something of the sort, has fortified himself against disaster by carrying a little "emergency kit."

KANSAS now has five-year close seasons to quail and pinnated grouse.

THE publication of a book fresh from the hand of F. N. Halford is always an event in the angling world in America and France (already translated), as well as in England, and into this latest work has been condensed all the knowledge and experience gained in forty years upon the chalk streams of the South of England. American fly-fishers began to read "Floating Flies" and "Dry Fly Fishing in Theory and Practice" more than twenty years ago, and their attention was directed to the use of floating flies upon their own waters. They soon learned to adapt English methods to the conditions as found in various portions of the United States. Mountain rivers of rapid descent differ widely from the placid chalk streams, but there are many streams in this country where somewhat similar conditions may be found. In this "Handbook" Mr. Halford has called to his assistance three experts to demonstrate the fine

"DO NOT WADE THE SHALLOWS."

sport that may be had in lake, loch and reservoir fishing for large trout with the dry fly. Of these the article by John Henderson on the "Dry Fly on Loch Arrow" in Ireland is probably most instructive and thorough, as this gentleman has spent ten years in working out methods and flies for taking the splendid trout (of from three to eight pounds) which formerly were supposed to rise only during the May fly season and to the natural insects, fished with a "blow line" of floss silk, which was wafted out by the breeze and gently dapped upon the water. (By the way, the new Shokan dam, in the Catskills, will afford the finest trout fishing in America, if properly treated, and not spoiled by the introduction of other predatory fish. It will be stocked naturally from the Esopus with the rainbow and European trout of good size and quality.)

As the number of dry fly men has increased, the fishing upon the best streams in England has become more and more a cult, almost a profession, and the value of good water has increased enormously. There are purists and ultra purists.

and the latter will never, never cast an artificial fly until after they have seen a real insect taken by a trout. They may remain all day in contemplation of the clear, flowing stream, often with the aid of a pair of binoculars, but unless there is a rise or "hatch" of ephemerae, caddis flies or diptera, the fly-rod remains idle, spiked in the ground. Many English rods have a spike in the butt to hold the rod upright when changing flies, and to save it from being trampled upon.

In the chapter upon the "The Ethics of the Dry Fly," Mr. Halford is very severe in his treatment of all those anglers who are not purists. He objects most decidedly to the use of wet flies and down stream fishing, upon dry fly waters, and gives quite a long list of "Don'ts."

Do not hammer a trout; that is, do not cast again and again over the same trout, as it may make it shy.

Do not fish after it is too dark to see the fly. Do not wade the shallows. It makes the trout shy.

Do not use wet flies or large glittering lures. Take heed of the example supplied by purists and ultra purists and imitate them in all things.

Of recent years a school of anglers has sprung up in England who are experts with the dry fly, yet not entirely wedded to it. When trout are feeding upon nymphs coming up to hatch upon the surface, "bulging" it is called, or "tailing"; that is, rooting in weeds or shallows for larva, shrimps and snails, these men imitate the nymph or larva and cast up stream to these feeding fish which are usually difficult to catch. The flies they use are certainly wet, but many fishermen consider it fine sport, as this method enables them to take a few good trout on days when the dry fly is useless. As one of these masters of the wet and dry fly remarks, "I should always instinctively fish the dry [fly] if my intelligence did not often tell me that the wet is the sounder method at the moment." This point of view will be approved by many American anglers, but we quite understand Mr. Halford's position and opinions formed upon waters which command a high rental, and which are stocked, nursed into fine condition, and protected in order that they may afford the best of fishing for large trout and the very best sport with the dry fly only.

In our own experience in America we have frequently continued to fish the floating fly when we knew positively that a couple of wet flies cast up stream would prove more remunerative. One loves to see the tiny fly dancing with its little wings "cocked" as it floats toward us. The rise is more plainly to be seen and nothing in the world of sport is more fascinating than to cast to large trout that can be seen, or which are rising at natural water-bred insects. We have fished streams in this country where the trout were as shy and stalking them as necessary as anywhere in the world. Also one had to exercise the same care in the presentation of the counterfeit fly delicately and accurately as one would upon a chalk stream where all bait-casting is barred. No angler can read the Halford series

without pleasure and profit. There is much information in regard to making and maintaining a "Fishery." Many of our best streams could maintain a much greater head of trout than at present. The determination and damage by floods could be greatly lessened and breaks put upon the violence of the streams of rapid descent. We have been talking gravel and Portland cement, or reinforced concrete for several years, and Mr. Halford gives an instance of successful use of the former in old bags.

There is much valuable information in regard to insects. We have a greater variety and many more large flies in this country, but that was to be expected. Careful instruction in casting in the English style with most useful instantaneous photographs illustrating the various methods is given; in fact, this "Handbook" is a handbook, and there is no doubt that this work will (as Mr. Halford expects) live after the death of the author and perpetuate his memory.

## THE TOP RAIL.

THE man with a grouch writes:

Men seldom if ever take their wives on a camping trip. That gentle consideration is the one link that connects the Confirmed Camper with the human race. It is well for the peace of mind of those who would remedy the divorce evil that the wives stay home.

Instead of taking his wife, the camper looks up a friend of long standing, and in the guise of that friendship asks him to go along. Bacon and beans become a steady and monotonous diet. You tried to make flapjacks one night, and since then your right hand has been wrapped up. It seems that you are not very proficient in flipping the flapjacks, and instead of the doughy, half-cooked mess—you'd eat only when camping—turning over in the air and lighting in the pan raw side down, it only turned half way and landed on the handle of the frying-pan where your wrist rested.

The tall timber has heard many new and original cuss words.

You start as brothers and return in that amiable spirit that characterizes two strange bulldogs who have been thrown a bone.

Let me inject right here that it is my honest advice to all who contemplate camping out to take a guide along. A guide can be secured for a reasonable outlay, and he'll come in mighty handy in preparing your meals. And if you tramp day in and day out for two weeks without seeing anything to shoot at, there is always the guide. I have heard of guides being mistaken for deer. It is said they make first rate targets.

GRIZZLY KING.

WISCONSIN killed in committee, by a vote of 6 to 1, a bill intended to reopen spring shooting.

# Through the Adirondacks by Canoe

Including Fulton Chain, Tupper Lake, Raquette, Blue Mountain and Long Lake

By KENNETH R. SMITH

**M**ANY would-be campers and canoeists hesitate about taking a trip through unfamiliar territory because of the lack of information as to conditions they will meet, provisions best carried, and where they can be procured along the route.

For these reasons we have written this account of a two weeks' canoe trip for two amateurs who have had little or no experience in camping.

The Adirondack Mountains afford a splendid field for beginners because of the semi-settled conditions of some parts, the wilderness of others, and the ease with which habitation can be reached.

The best trip through these mountains is from the foot of the Fulton Chain up through

1 rubber poncho about 45 in. by 70 in., used also as a blanket.

1 flannel shirt.

1 pair khaki trousers.

1 pair moccasins or waterproof shoes.

1 soft hat.

1 change underwear and socks.

Personal toilet articles. We also suggest a camera.

As everyone will have some of this wearing apparel at home, we think \$10 or \$15 will cover what is lacking.

These can be purchased at any large sporting goods store.

### CAMP OUTFIT.

1 tent.

1 pack strap.

"FREE FROM PERMANENT HABITATION."

the various lakes and rivers to Tupper Lake. On this trip you get a great variety of scenery and good opportunities to show your paddling ability. Quite a lot of portage work has to be done which adds a change from paddling all day.

It is unnecessary to hire a guide, as the way is perfectly clear and easy to follow.

Before outlining the trip we will give a detailed list of what is necessary to take. Most beginners make a great mistake by taking too much duffel with them.

It is a great temptation to take this or that because you yourself might need it.

The following articles, which are absolutely essential to the trip, can be arranged in two lists, personal and camp outfit:

### PERSONAL.

1 heavy double woolen blanket.

1 sweater, which makes a good pillow when not used otherwise.

1 small frying-pan.

1 folding broiler.

2 small cooking pots with detachable handles.

1 pint Thermos bottle.

1 grate (folding one).

1 covered tin can for water.

3 knives, forks, spoon.

1 large cutting knife and 1 large spoon.

1 can opener.

3 tin plates and cups.

1 acetylene lamp and 1 can carbon.

Matches.

15-inch handle axe.

1 can (small) canoe cement.

1 set Government topographical maps.

We carried everything mentioned in these two lists, and the cost amounted to exactly \$25 a piece.

In selecting a tent, you must use good judg-

ment. One 7 x 7 is fully large enough for two to sleep in and will hold all your duffle in case of rain.

One made of balloon silk is the best kind to carry, but is rather expensive. We have used what is known as a miner's tent of drab colored canvas and found it satisfactory for a cheap tent, but very heavy.

A good way to preserve matches from water is to dip a bundle of twenty-five or so in melted paraffine and mold them into a cake. They may then be pulled off one at a time.

You will notice we have not mentioned a coffee pot, strainer, etc. We used a very good brand of prepared coffee in powder form, which eliminated all those articles.

The Government maps are essential and can be procured by writing to the U. S. Geological Survey Department, Washington, D. C. They are five cents a piece, payable by money order or cash. The ones needed for this trip are named Old Forge, West Canada Lakes, Raquette Lake, Blue Mountain Lake and Long Lake. You will find these of great service, as all the carries you will have are clearly shown, together with the lakes, rivers and towns.

The first thing to do after arriving at Old Forge early Sunday morning is to find the old native that rents canoes. He is a very fine affable old gentleman, and has a large variety of canoes, any of which may be rented for \$5 a week. You can also hire a pack basket and a yoke for fifty cents extra. These two things you must have.

After making these arrangements and finishing your breakfast at the hotel, you are ready to start your trip.

As no stores are open at Old Forge, you will have to start without provisions. We found that the best plan was to paddle up to the head of Fourth Lake and put up at a hotel over night. The distance through First, Second, Third and Fourth lakes is a good twelve-mile pull, and for the first day out is enough.

Monday morning pack your city clothes in your suitcases, and the hotel proprietor will gladly keep them for a nominal fee until you return. It would be impracticable to take your cases along with you.

If you don't care to put up at a hotel, you will have to camp on Third Lake, as Fourth is covered with hotels and private residences.

Starting out Monday morning, you paddle through Fourth Lake Inlet to Fifth. The water here is likely to be very shallow, and the current strong enough to warrant about five minutes' hard work to buck through it.

Fifth Lake is nothing but a small pond with the carry at its head. This, your first carry, is about one-quarter mile over a broad highway and causes but little trouble. It is much better to make the carries in two trips, taking the canoe and paddles the first trip and the packs the second. You will find this rather hard work at first, but after two or three carries have been made, you will get accustomed to it. You need have no fear about leaving your property right out in the open, for no one touches or molests it in any way.

At Sixth Lake you will find a provision store, and here you lay in your first supplies. There is a store at Fourth Lake Inlet, but as

# Complete Physical Development by New Methods of Rowing

By A. L. WOOD, M.D.

**R**OWING is one of the most perfect of all methods of exercise for the physical development of the body when practiced according to the following directions. As usually practiced, rowing is a valuable exercise, but it is imperfect, bringing into action and developing only certain sets of muscles, while by the new methods in connection with the modified old, nearly every muscle of the body is brought into action and strengthened, and the functioning of all the bodily organs greatly improved.

The above remarks apply to rowing in a boat on a lake or other body of water where the great benefits of perfect freedom of action in all directions, pure air free from dust, life-giving sunshine and beautiful and interesting surroundings to stimulate the mind, aid in improving health and perfecting physical development.

Rowing on a machine indoors is good when nothing better can be obtained, but is of slight value compared with the other.

Some will naturally ask what are the benefits of the new methods of rowing. Besides being the most perfect single method of physical development for the entire muscular system, it equalizes the circulation of the blood throughout the body, which is one of the most important conditions for health, thus preventing congestions and inflammations, with all their serious consequences. It most effectually purifies the blood by compelling the inhalation of large quantities of pure air into the lungs where it comes in contact with the rapidly circulating blood to which it imparts its life-giving oxygen.

It is one of the most valuable remedies for all forms of indigestion, dyspepsia, constipation, torpid liver, etc. It is a very important means of soothing, quieting and strengthening the nervous system and promoting sound sleep. It produces a free action of the skin, thus helping to eliminate certain poisons and waste matters from the body.

By increasing the action of the skin it relieves the kidneys of part of their work and thus acts to prevent disease and disorganization of those vital organs. It enlarges the chest, strengthens and develops the lungs, and is one of the best methods of guarding against that great enemy of man, consumption.

It is also an important agency in curing consumption in the first stages of its existence.

To obtain the greatest benefit from rowing, the following directions must be carefully followed:

The old and prevailing style of rowing backward should be performed in the following manner: The body should not be bent, but held erect with the chest well in front. In bending forward and backward the motion should be entirely at the hip joints. This position of the body allows free action of the lungs, which is very important and a vital requisite for securing the best results.

In beginning this stroke the hands should

be pushed as far forward as possible with the arms extended, at the same time forcibly, and as fully as possible, expelling the air from the lungs. Then make as long a stroke as possible, bending the body far back and pressing the feet firmly against a rib of the boat or other support, at the same time filling the lungs to the fullest extent, inhaling through the nose. Never breathe through the mouth, but always through the nose.

Mouth breathing is a very injurious habit. It dries the membranes of the mouth and throat and allows the dust and germ-laden air direct access to the lungs, and if the air is cold, it chills the delicate lining tissues.

In breathing through the nose, the air filters through the hairs in the nostrils, the object being to remove the dust and germs, and becomes warmed in passing through the long, tortuous channels of the nose on its way to the lungs.

Deep breathing, which should always accompany any form of rowing, should be constantly kept in mind. Until the habit is fully established, it is a good plan to repeat mentally when exhaling or breathing out, the word "breathe" and when inhaling the word "deep."

It is well to change the manner of breathing occasionally by inhaling while bending forward and exhaling while bending backward.

When commencing this deep breathing practice, which is one of the greatest benefits of rowing, it may bring on a slight feeling of dizziness. In such case stop and rest until it passes away.

Breathe deep. Breathe deep. Acquire the habit and continue it through life. It is a habit everyone should acquire. It is one of the most efficient means of promoting health of body and mind, of increasing one's stock of vitality and of insuring a vigorous, long life.

In commencing rowing, begin with moderation, as should be done with any new exercise, and increase the amount as the strength increases. As soon as you begin to feel tired, stop and rest.

It is well to vary backward rowing by alternating the strokes. While one hand pulls on the oar, the other pushes. This gives a twisting motion to the body and brings other muscles into action. It is especially good in cases of indigestion, constipation and torpid liver. Inhale with one stroke and exhale with the other. Breathe deep.

After rowing five minutes more or less, according to one's strength in each of the above ways, change to the next described mode of rowing, which is the best of all for physical development, although one cannot row quite as fast.

Aside from its value as an exercise, it has the great advantage of going forward instead of backward, enabling the rower to see where he is going without turning his head around and looking behind him. Many accidents can be avoided by this style of rowing.

(Continued on page 695.)

This stroke is the reverse of the first one described. Commence the stroke by bending the body far back and throwing the elbows as far back as possible, keeping the body straight, chest well out in front and bending only at the hips as in the first method.

Push the hands and bend the body forward, at the same time exhaling the air from the lungs. This of course is done with the oars in the water. Return to the first position with the oars out of the water, and while doing so completely fill the lungs with air.

Always remember to keep the chest well out in front and the shoulders and hips back, bending only at the hips.

When pushing the hands forward, press the heels against a rib of the boat or have a strap fastened to the bottom of the boat for the heels to press against. This exercises the flexor muscles of the legs and materially helps in the rowing.

Do not forget the deep breathing. Breathe deep. Breathe deep at every stroke.

The forward rowing should be varied in the same way as the backward rowing by alternating the strokes, pushing forward with one hand and pulling back with the other.

Forward rowing strengthens the muscles of the abdomen, the extensor muscles of the arms and the pectoral muscles of the chest, muscles that ordinarily do not get as much exercise as most others.

All these varieties of rowing, together with deep breathing which should always accompany them, bring into strong action nearly all the muscles of the body. By alternating the different strokes, one set of muscles is brought into action while another set is resting, thus enabling one to row a much longer distance without getting unduly fatigued.

Beginners should be very careful not to overdo. Avoid much fatigue. As soon as you begin to feel tired, stop and take a complete rest. Too much exercise weakens the muscles instead of strengthening them, and also poisons the system by generating poisons faster than the excretory organs can eliminate them.

The best speed for rowing in connection with deep breathing is eighteen strokes per minute.

As an aid to deep breathing in connection with rowing, until the habit is fully established, repeat mentally at each inhalation the word "breathe," and at each exhalation the word "deep." This keeps the attention fixed on the deep breathing and makes it more effective.

#### The Paramount Need.

My house needs paint, my wife needs clothes,  
My boy needs shoes.  
Among their needs, you may suppose,  
It's hard to choose.

No man could be in a worse strait  
Between two fires.  
I guess they all will have to wait;  
My car needs tires.

—Louisville Courier-Journal.

I've bought the shoes for the car, instead  
Of the boy, who'll walk on nature's tread—  
And now my pocket is shy every bean,  
They have raised the price of gasoline.

Editor FOREST AND STREAM.

# The Cocker Spaniel

By WALTER H. DEARING

**A** CHANGE in environment has often been the cause of a corresponding change in the vocation of men, and the effect of a changed surrounding upon the life habits of a dog is apt to be equally salutary in its effects. The difference in the two cases lies in the fact that the transformation in the first instance is usually more or less voluntary, while in the second it is more often than not inflicted upon the subject, often very much against his will and the natural bent of his inclinations.

That something of this nature has happened to our cheery chum, the cocker spaniel, during the past few years appears to be almost indisputable, as he has practically been removed from

is with keen regret that many admirers of the breed have seen their favorite hunting dog reduced in size through the enforcement of the twenty-five-pound limit decree which has necessarily produced a breed of dog averaging a trifle over twenty-one pounds. That even this more or less Draconic ruling has failed to eliminate the cocker from his natural calling is shown in the fact that there are still a considerable number of sportsmen who are using him to the gun, and finding ample proof that he has lost none of his old-time cunning and still retains the same exquisite delicacy of scent and persistency of purpose that has made him famous in days gone by. In England and France he is still recog-

JEANS AND NETTIE—A PAIR OF CHAMPIONS.

his favorite occupation as a field dog, and compelled to consume most of his time about the house amusing his master with his funny little pranks and winning ways. The popularity he has attained as a show dog has practically removed him from his natural element in the field, and in this instance the natural beauty of his silken coat and great merit as a bench dog appears to have cost him dear.

The relegation of the cocker to the rear in the world of sport has been as rapid as it has been seemingly unnecessary, and the fact that a strong effort is being made to bring this sporty little fellow into his own seems to indicate the fact that the owners and breeders of the dog are recognizing the fact that he is too valuable an acquisition to the sport of hunting to be overlooked, and are bent upon restoring him to his former standing as a gun dog.

The reduction in the weight limit of the cocker has been the principal reason for his withdrawal from the field in America, and it

nized as a sporting dog of great merit, and the success that has invariably attended the efforts of the spaniel clubs in these countries at their annual field trials is a matter of record. The reaction in feeling against the reduced weight limit appears to be well grounded, as a dog of twenty-one pounds is hardly heavy enough to stand the wear and tear of swamp and field, and a return to a standard more nearly approximating the one adopted by the American Spaniel Club (eighteen to twenty-eight pounds) years ago would seem to be in order. This standard met with universal approval at the time of its adoption. Many of the English breeders favored the American standard, although the recognized limit in England at that time was eighteen to twenty-five pounds. In former years all field spaniels were classified under the same heading, the only distinction made being that of weight. It is a notable fact that a very large portion of the prizes were carried off by the miniature spaniels, which would seem to indicate that the cocker

was more than a match for many of his larger rivals, as the smaller spaniel of that period would undoubtedly have been classified as a cocker to-day.

One of the chief characteristics which has proven of inestimable value to the breed in the field is its almost unlimited powers of endurance. His wonderful capacity for traveling long distances over the fields and in and out among the hedge rows, has endeared him to all who have been fortunate enough to enjoy his company in a day's tramp after game. The end of the journey usually finds him trotting merrily along with an apparent indifference to fatigue that makes the huntsman feel as though he were starting on his long tramp, rather than returning from a trip over hill and dale. His power

itself to any change of climate is a cause of wonder to dog experts the world over, and sportsmen who have had occasion to use him in all countries, and under every possible condition of climatic change, say that he retains all of his old-time dash and vim, no matter where he is placed. Like Thomas Paine, the famous internationalist, "the world is his country, mankind is his friend, his religion is to do good." If you don't believe it, listen to this thrilling account of an incident which happened in India, and which is so remarkable that I should hesitate to mention it had it come to me through a less reliable source than the writing of Captain Williamson in his book of "Oriental Field Sport": "I was shooting near some under-wood, rather thinly scattered among reeds, grow-

THE DAILY LESSON.

of scent is as delicate as could well be found in any of the sporting breeds, and he is particularly careful in retrieving his game, seldom tearing it in the least, a trait which is naturally looked upon with high favor, and greatly sought after by all who are in quest of a good sporting dog.

A. C. Wilmerding, President of the Cocker Spaniel Club of America, relates an incident which proves the care with which the dog may be taught to retrieve when properly broken. During the field trials, which were held some years ago, Mr. Wilmerding had entered a black cocker spaniel which had been competing nip and tuck with some of the other dogs, and a difference of opinion as to the winner having arisen, the question was finally settled by the dog's retrieving an egg, a stunt which Mr. Wilmerding had reserved until the last, and which he says the animal had performed many times before.

The readiness with which the cocker adapts

ing on the edges of a large water course, which took its rise near the foot of the large hill at Muckon Gunge, when suddenly one of a brace of fine cocker spaniels I had with me ran around a large bush greatly agitated, and apparently on some game which I expected to put up.

"I followed as fast as I could but Paris, which was the dog's name, was too quick for me, and before I could well get around the bush, which was about ten yards from the brink of the ravine, he had come to a stand, his ears pricked, his tail wagging like lightning, and his whole frame in a seeming state of ecstasy. I expected that he had got a hare under a bank, and as the situation was in favor of a shot, I ran toward him with more speed than I should have done had I known that instead of a hare I should find, as I did, a tiger sitting on his rump and staring Paris in the face. They were not above two yards asunder."

(Continued on page 705.)

## Important Changes in New York State Fish and Game Laws.

THE open season on varying hares and cottontail rabbits on Long Island is made from Nov. 1 to Dec. 31, both inclusive. The use of ferrets is at all times prohibited, except that the commission may by resolution permit ferrets to be used in particular counties. A person may take six varying hares or cottontail rabbits, either all of one kind or partly of each in one day. Mink and sable may be taken either in the day time or at night and in any manner. Raccoon may be taken in the day time or at night in any manner except with traps and possessed from Oct. 1 to April 20, both inclusive, and may be taken in any manner from Nov. 1 to April 20. Skunks may be taken in the day time or at night, but they shall not be taken from holes or dens by digging, smoking or the use of chemicals, and they may be possessed from Nov. 1 to Jan. 31, both inclusive. Muskrat, open season from Nov. 1 to April 20. No open season for quail before Oct. 1, 1918 (Long Island excepted). Six male pheasants and four grouse in any one day is the bag limit, and fifty quail, thirty-six male pheasants and twenty grouse in the open season on Long Island. Lake trout and whitefish may be taken in Lakes Erie and Ontario in any number from Dec. 31 to Oct. 31, inclusive, and may be bought and sold provided a license has been obtained. Lake trout not less than fifteen inches in length and whitefish not less than one and three-quarter pounds in the round taken without the State may be imported into the State at any time, and may be bought and sold. Fishing through the ice using set and trap lines, spearing, grappling hooks, naked hooks or snatch hooks are prohibited in waters inhabited by trout unless an order specifying the waters and fixing the season shall first be made by the commission. No person, except under authority of the commission, shall take fish from the waters of any fish hatchery. The law also provides that it shall be the duty of the attorney-general on request of any regular game protector, accompanied with the approval of the commission, to appear in and defend as attorney any action brought against the protector on account of any act of his while in the discharge of his duties. Brook trout may be taken from April 15 to Aug. 31, inclusive.

## Salmon in Trout Streams.

WHILE fishing on a brook some distance out of Stroudwater, Me., a few days ago, George Green hooked a fish which fought too hard for a brook trout. After a few moments the fish was brought out of the water. It was found to be a landlocked salmon, weighing one pound.

Mr. Green was very much surprised to land the fish in a trout brook so far removed from Sebago Lake.

It is believed that the salmon may have run down the Stroudwater River and finally located in one of the pools in the brook which is not far removed from the so-called Pig Knoll Hill.

NEW JERSEY and New York have begun legislative war on stray cats. The New Jersey Assembly passed the cat license bill, but in the Senate it was defeated.

# SEA AND RIVER FISHING

## Anglers' Club of New York.

The eighth annual fly- and bait-casting tournament of the Anglers' Club of New York was held at the Big Lake, Central Park, New York city, on May 15, 16 and 17.

Event No. 1.—Bait-casting for distance; quarter-ounce weight; average of five casts to count:

(a) 120-Foot class. Open to only those who have never cast more than 120 feet in any contest or tournament. Five overhead casts shall be made with a quarter-ounce weight. Highest average score to win. Weight to be furnished by the committee. No limit to weight of rod or line. Reel must be free running.

C. H. Higby..... 108 1-5	A. B. Hubbell..... 89 9-10
P. D. Frazer..... 99 9-10	O. T. Mackey..... 50
Dr. J. G. Fulton.. 96 3-10	

Longest cast, Dr. J. G. Fulton, 107 feet.

(b) Open class. Same conditions as (a) except that the event is open to all amateurs.

Dr. R. J. Held.... 141 2-5	Dr. J. G. Fulton .. 81 4-5
C. H. Higby .... 118 1-5	A. B. Hubbell ... 77 1-5

Longest cast, Dr. R. J. Held, 149 feet.

Event No. 2.—Bait-casting for accuracy; quarter-ounce weight:

Open class. Five overhead casts shall be made at each of five targets placed 60, 70 and 80 feet from the casting point. Highest score to win.

Dr. R. J. Held.... 96 13-15	J. L. Kirk ..... 92 2-15
Dr. J. G. Fulton.. 92 3-15	A. B. Hubbell ... 90 10-15

Event No. 3.—Trout fly-casting for distance; four-ounce rods:

(a) 70-Foot class. Open only to those who have never cast more than 70 feet in any contest or tournament with a four-ounce or lighter rod. Leader must not exceed length of rod more than two feet.

Dr. J. G. Fulton..... 70	O. T. Mackey ..... 60
C. O. Kienbusch..... 70	

(b) Open class. Same conditions as (a) except that the event is open to all amateurs.

Dr. R. J. Held..... 89	C. H. Higby ..... 80
P. D. Frazer ..... 86	A. B. Hubbell ..... 75
J. L. Kirk ..... 83	

Event No. 4.—Trout fly-casting for distance; five-ounce rods:

(a) 75-Foot class. Same conditions as in event 3 (a) except that the rod may weigh five ounces.

O. T. Mackey..... 71.6	Dr. J. G. Fulton ..... 71
------------------------	---------------------------

(b) 85-Foot class. Same conditions as (a) except that it is open only to those who never cast more than 85 feet in any contest or tournament.

P. D. Frazer ..... 95	G. R. Jenkins ..... 83
J. L. Kirk ..... 84.6	C. H. Higby ..... 83

(c) Open class. Same conditions as (a) except that it is open to all amateurs.

Dr. R. J. Held ..... 92	C. H. Higby ..... 86
P. D. Frazer ..... 88	J. L. Kirk ..... 85

Event No. 5.—Dry fly-casting for distance; five-ounce rods; average of five casts to win:

Dr. R. J. Held .... 66	L. J. Kirk ..... 48 1-5
G. R. Jenkins ..... 58 1-5	

Average Feet.      Average Feet.  
Longest cast, Dr. Held, 72 feet.

Event No. 6.—Dry fly-casting for accuracy and style.

This event was not cast.

Event No. 7.—Bait-casting for distance; half-ounce weight; average of five casts to count:

(a) 150-Foot class. Open only to those who have never cast more than 150 feet in any contest or tournament.

J. L. Kirk ..... 123	Dr. J. G. Fulton ..... 98
O. T. Mackey ..... 65	

Average Feet.      Average Feet.  
Best cast, O. T. Mackey, 140 feet.

(b) 175-Foot class. Same conditions as (a) except the distance.

C. H. Higby ..... 129 3-5	Dr. J. G. Fulton .. 105 3-5
O. T. Mackey ..... 119 3-5	J. L. Kirk ..... 91

Longest cast, C. H. Higby, 150 feet.

(c) Open class. Open to all amateurs.

A. J. Marsh ..... 177	Dr. R. J. Held ..... 169
-----------------------	--------------------------

(d) Open handicap class. Professionals and amateurs.

Handicap allowance to be half the distance between best records of contestants.

Dr. R. J. Held 0	185.2	C. H. Higby.. 25.7	141.9
A. J. Marsh... 5.3	181.1	J. L. Kirk... 37.3	135.9

Event No. 8.—Bait-casting for accuracy; half-ounce weight:

Same conditions as Event No. 2, except the weight must be half-ounce.

A. J. Marsh..... 98 8-15	Dr. F. G. Fulton.. 93 12-15
H. Friedman ..... 97	

Event No. 9.—Fly-casting for distance; heavy rod; weight of line and length of leader unrestricted; rod to be single-handed and not to exceed 11½ feet in length:

- (a) 85-Foot class.
- (b) 100-Foot class.
- (c) Open class.
- (d) Open handicap. Professionals and amateurs.

Handicap allowance as in No. 7 (d).

P. D. Frazer ..... 106	R. J. Held ..... 95
J. L. Kirk ..... 100	W. McGuckin ..... 78
W. C. Metcalfe ..... 98	A. J. Marsh ..... 75

Kirk .... 5½	104½	Held .... 7	98
Frazer .. 0	103	Doughty. 9	94
Friedman 9 10-12	101 10-12	Metcalfe . 6½	100½

Event No. 10.—Salmon casting; rods not to exceed 15 feet in length:

(a) 100-Foot class.	
I. Doughty ..... 113	Dr. J. G. Fulton ..... 98

(b) 115-Foot class.

W. C. Metcalfe ..... 125	H. Friedman ..... 114
--------------------------	-----------------------

(c) Open class.

R. J. Held ..... 117	J. L. Kirk ..... 111
----------------------	----------------------

(d) Open handicap. Professionals and amateurs.

Handicap allowance as in event No. 7 (d).

In each event the first prize was a cup; the other prizes were medals.

W. C. Metcalfe 8½	133½	J. L. Kirk..... 6	117
J. Doughty ... 16	129	Dr. R. J. Held 0	117

The tournament committee of the Anglers' Club of New York follows: A. B. A. Bradley, Dr. R. Johnson Held, C. H. Higby, John L. Kirk, G. M. L. La Branche, W. C. Metcalf, Dr. J. Gordon Fulton, Chairman.

## Invading the Trout Waters.

ALBANY, N. Y., May 21.—*Editor Forest and Stream:* An amendment made to the so-called "uniform" fish and game law at the instance of the Conservation Commission by the last Legislature authorizes the commission to issue permits to fish through the ice in waters inhabited by trout. This is a power that never has heretofore been sought by a commission supposedly engaged in the protection of fish, and I give its history for the information of those interested.

At the beginning of the winter the Fort William Henry Hotel, at the head of Lake George, advertised as one of its attractions, "Fishing through the ice." As a member of the association formed to protect the lake, I advised the Conservation Commission that this could not be permitted, as the lake had been stocked with several species of trout. This was at first disputed, but when my contention was proved by the records, the consent of the commission was withdrawn. Then, under date of Feb. 14, an official Bulletin (No. 232) issued by the Commission, stated that Assemblyman Daley had introduced a bill "prepared by George A. Lawyer, President of the New York State Fish, Game and Forest League, to meet the league's views." Tucked away in the latter part of this document was the statement, "Instead of repealing Section 252 (prohibiting the taking of fish through the ice in waters inhabited by trout), it is amended by authorizing the Commission to grant permits, if deemed advisable." This statement was unfounded, as the league of clubs never favored any such amendment, and when I called the attention of members of the Commission to the fact, I was told that the Bulletin was not authorized by that body. It was, however, prepared by Lawyer in their office and issued by their publicity bureau.

The reason now given for the amendment is that in many places people wanted to fish through the ice to rid trout waters of suckers and other spawn-destroying fish. Before the "uniform" law was inflicted on the people, it was lawful to take such fish in several counties through the ice, but never in trout waters. I suggested that the proper time to take suckers was in the spring when the fish run up streams to spawn, but no notice was taken of the suggestion. It may as well be understood also that

no attention will be paid by the Conservation Commission to any suggestion to improve the present inadequate statute. It was drawn by professional politicians, cost the people of the State \$20,000 or more, is neither scientific nor sensible, but it has the magic title "uniform" attached, and the Commission insists that it is too nice a statute to be modified, even along conservation lines.

JOHN D. WHISH.

**North Shore Casting Club.**

CHICAGO, Ill., May 19.—*Editor Forest and Stream:* We will have to "elevate our sights" another notch, as we are shooting too low.

There is no use kicking, the day was fine, weather conditions all that could be asked for, and just because you could not see your weight, because of that big tree making a poor background (which was no fault of the tree, as it did the best it could), is no reason for the following scores.

Now, you see you can't play this game off the reel. You have got to practice. You fellows must think that the cans are taken up Saturday night just to keep them dry, and that they are replaced the next contest day. If you would come out some other afternoon than Saturday, you would see them swimming gaily with a lot of tame wild mallards quietly roosting on the collars; that is, when they were not roosting on something else. Come on, boys, let's get started right now. Scores follow:

Half-ounce accuracy bait: Ellsworth, 97.9 feet.  
 Half-ounce distance bait:

	Average Feet.	Longest Cast Feet.
Forsyth	172 2-5	196.6
Dorchester	123	152
Church	26	130
Barrett	57 2-5	137
Ellsworth	102 3-5	182
Kappler	61 3-9	153
Dr. Waters	131	159

Distance fly:

	Feet.	Feet.
Forsyth	103	88
Dorchester	86	

Quarter-ounce accuracy, bait:

Forsyth	96.9	Ercanbrock	96.5
Dorchester	97.3	Barrett	96.2
Marshall	98.3	Sauermann	72.3
Hinterleitner	97.3	Lambert	93.4
Lyons	97.1	Ellsworth	98
Church	97.5		

Light tackle, dry-fly accuracy:

Forsyth	98 11-15	Calley	96 4-15
Dorchester	98 10-15		

Light tackle, distance fly:

	Feet.	Feet.	
Forsyth	97	Calley	94
Dorchester	87		

C. O. DORCHESTER, Sec'y.

**St. Louis Fly- and Bait-Casting Club.**

ST. LOUIS, Mo., May 23.—*Editor Forest and Stream:* The St. Louis Fly- and Bait-Casting Club had a very successful Sunday in spite of a heavy wind that was blowing. The following scores were made:

Event No. 1, ¼-ounce accuracy, per cent.:

Z. Geist	97 5-10	R. G. Robards	97 2-10
Fred Werner	97 3-10		

Event No. 2, ½-ounce accuracy, per cent.:

Fred Werner	98 3-10	R. G. Robards	98 1-10
I. K. Hellman	98 2-10		

Event No. 3, ¼-ounce distance, average feet:

Z. Geist	135 4-5	Fred Werner	92 2-5
----------	---------	-------------	--------

Event No. 4, ½-ounce distance, average feet:

Z. Geist	165 8-10	D. G. Robards	128
Fred Werner	165		

Event No. 5, fly, distance, feet:

M. J. Brennan	91	H. J. Steinmesch	81
I. K. Hellman	87		

Event No. 6, fly, accuracy, per cent.:

Geo. Ashton	99 6-15	M. J. Brennan	97 10-15
H. J. Steinmesch	98 8-15		

**Columbus Anglers' Club.**

THE Columbus Anglers' Club elected officers for the ensuing year, May 22, as follows: President, Millard Gibson; First Vice-President, Dr. L. E. Day; Second Vice-President, Chas. M. Argenbright; Secretary, Nelson L. Bulkley; Treasurer, Dr. Geo. M. Clouse; Trustees, Geo. G. Tinkham, Dr. S. S. Wilcox, B. F. Williamson, F. M. Brooks.

The report of the treasurer for last year

showed that \$1,273.94 had been received, and that \$454.14 paid out, leaving a balance of \$819.80 cash on hand.

The report of the secretary shows a membership of 1,376, which soon will reach an increase to 2,000. Four fly- and bait-casting tournaments have been held under the auspices of this club, the last being a State tournament.

**Asbury Park Fishing Club.**

THE list of awards to be given by the Asbury Park Fishing Club, as announced by the prize committee for the season, is more extensive than ever before, thanks to the unremitting zeal of the prize committee, there being no less than 135 prizes to be distributed.

There are three distinct characters of fishing designations—beach fishing, which also includes any structure or pier connection with the beach; boat fishing, which includes sea, bay or river, and last but not least, ladies' prizes for beach fishing.

In all the prizes offered where special prizes are designated, the latter do not conflict with the regular list, and in this way make it pos-

sible for a member to win two prizes with one fish.

The following is an enumeration of prizes: Beach fishing, striped bass, regular prizes, 17; special prizes, 15; total, 32. Channel bass, regular, 11; special, 5; total, 16. Kingfish, regular, 8; special, 8; total, 16. Bluefish, regular, 8; special, 6; total, 14. Weakfish, regular, 9; special, 8; total, 17. Plaice or fluke, regular, 5; special, 2; total, 7.

Boat Fishing—Tuna, regular, 3; special, 3; total, 6. Bluefish, regular, 1; special, 2; total, 3. Weakfish, regular, 2; special, 1; total, 3. Sea bass, regular, 1; special, 1; total, 2. Blackfish, regular, 1; special, 1; total, 2.

Ladies' Prizes, Beach Fishing—Striped bass, regular, 4; special, 1; total, 5. Kingfish, regular, 2; special, 1; total, 3. Weakfish, regular, 2; special, 1; total, 3. Bluefish, regular, 2. Plaice or fluke, regular, 2. Channel bass, regular, 2. Total prizes, 135.

**Newark Bait- and Fly-Casting Club.**

ONE event was cast to-day in the opening meet of the club; the rain killed the balance. The quarter-ounce accuracy bait event was the only one held between showers. In this event the men cast at the target at five distances—60, 65, 70, 75 and 80 feet from the platform. Each contestant had three casts at each distance. The following per cents. were made: George Enderby, 88.8; J. Doughty, 97.8; R. Eichlin, 96.8; Frank Gruver, 96.7; Philip Blumenhein, 80.9; P. F. Muldoon, 95.6; J. S. Jacobus, 98; A. J. Marsh, 97.8.

**The Anglers' Casting Club of Chicago.**

CHICAGO, Ill., May 21.—*Editor Forest and Stream:* Following is the result of our first tournament this season, held Sunday, May 18:

Half-ounce accuracy:

Town	98	Fey	97
Gray	98.5	Dickinson	98
Ames	96.4	Maloney	96.8
C. Nordholm	98.4	Wagner	94.7
McCarthy	98.6	Aurisch	94.4
Johnson	97.5	Lingenfelter	96.9
T Nordholm	97.5	J. Nordholm	95.8

Half-ounce distance:

Town	158.8	T. Nordholm	145.4
Ames	93.4	Lingenfelter	195.8

Accuracy fly:

Ames	99 13-15	Lingenfelter	93 1-15
McCarthy	99 6-15	Campbell	98 10-15

E. S. GRAY, Sec'y.

**New Publication.**

THE SPELL OF THE ITALIAN LAKES. By W. D. McCracken, L. C. Page & Co., Boston, \$2.50 net.

"A deep vale Shut out by alpine hills from the rude world, Near a clear lake, margined by fruits of gold And whispering myrtles, glassing softest skies— As cloudless, save with rare and roseate shadows, As I would have thy fate."

Under the title, "The Spell of the Italian Lakes," W. D. McCracken's work on Italian Lakes has been revised, enlarged and reprinted uniform with the "Spell Series," so well known among papers on travel. The book is tremendously interesting in its new form, being beautifully illustrated in half tone, delightfully natural, velvety reproductions of scenes among the Italian Lakes. It is a valuable addition to the series of "Spell Binders" to travelers, and a volume worthy of place in the most carefully selected library.

Paris: Brentano's.

**ADVERTISEMENTS:** Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

### THE OBJECT OF THIS JOURNAL

will be to studiously promote a healthful interest in outdoor recreation, and to cultivate a refined taste for natural objects.

—FOREST AND STREAM, Aug. 14, 1873.

### DO AMERICANS DIE FROM OVERWORK?

THE BILLBOARD, America's leading magazine devoted to things dramatic—and we say this with due credit to myriads of other publications that make up the firmament of literary dramatics—printed in a recent issue an editorial too good to be denied the outdoor man. Excepting for its Carnegieisms and its necessary lapses into the vernacular, it is identical with a thought that long has been on the verge of transfer from our incubator of thought to a more prominent place on paper:

James Sterling said, "The deepest-rooted cause of American disease is that overworking of the brain and over-excitement of the nervous system, which are the necessary consequences of their intense activity—hence, nervous dyspepsia, with consumption, insanity and all its brood of fell disorders in its train. In a word, the American man works himself to death."

There is some truth in that sage observation, but it is mostly bunk. That worth-while Americans overwork as a rule, is true enuf, but that any appreciable number work themselves to death is untrue.

Most of them get next to themselves coincidentally with the first wallop that nature takes at them. Thereafter instead of "resting" over a high-ball or a beer in the smoke-laden bars or seeking their diversion from cards or an easy chair and a novel, they take to walks in the parks or country. Those that can afford it take up horseback riding or golf. Those that are light and lithe go in for tennis. But so long as it is exercise in the open air, it does not matter what form it takes. It is the oxygen, ozone and sunshine, together with the exercise (which must be diverting) that are important.

These men, far from finding that they have to quit work, discover that their capacity is increased—that they are not only capable of greater output, but that it is better in quality.

Work never killed anyone in America or anywhere else—nor does it bring on nervous dyspepsia, consumption, insanity, et al. Worry does. And it is lack of exercise and recreation in the fresh air and sunshine that brings on worry.

Work is a blessing. We are not sure that we know what a blessing is, but anyhow, work is one great big boon.

### THE AMATEUR FARMER.

THIS is the season when the would-be humorist makes merry at the expense of the suburbanite. For it is the time of suburban gardening, which each year promises to double the crop yield of the world, and ends with a contribution of one broken hoe and four messes of lettuce salad and a bunch of stringy radishes.

But the amateur agriculturist is neither to be laughed at nor pitied. True, his statistics never materialize, and his theories of intensive farming require considerable revision. His gain is in his labor, his triumph that of hope over experience.

His cherished carnation seeds may produce spring onions, but then the asparagus bed is just as likely to yield lilies of the valley. It's all one to him; he finds the useful beautiful and the beautiful useful. Best of all, he touches nature.

All about the garden, just before breakfast, the world is full of life and song; in fact, life runs to song. A bird warbles in the tree nearby. He knows it is a thrush by the red throat and the gray breast streaked with brown. He, too, is filled with inspiration. For is not inspiration a breathing in? And is he not drunk with the breath of the morning? Was not the manna, the bread from heaven, found on the dew, and did it not have to be gathered before the sun was well up? If it is sunshine, he is glad. If the rain falls, he recalls the Arab proverb, "All sunshine makes the desert." There come to his mind the words of the poet with the heart of a child, who loved nature so much that he never had time to get a hair cut:

The rain is raining all around,  
It falls on field and tree;  
It rains on the umbrellas here,  
And on the ships at sea.

And he sings under the cloud, as well as in the sunshine, for did not Stevenson also write:

The children sing in far Japan,  
The children sing in Spain;  
The organ with the organ man  
Is singing in the rain.

Do not pity the suburban gardener. It is rather for him to pity others.

### ANOTHER CHANGE IN THE TROUT LAW

ONCE more the legislative tinkers have taken a fling at the New York State brook trout law. The Sanner bill, endorsed by the Conservation Commission, just passed and signed, opens the trout season April 15 instead of May 1 as at present. This reverts to the law of 1912, and, while there is no reason why trout should not be caught as early as April 15, it would be a great convenience to anglers if the law could stay "put" and not shifted like a checker at the will of legislative players.

### REVISED MAINE FISH LAWS.

BEFORE you get the last of your tackle packed for your Maine fishing trip, you would do well to glance over the revision of the Maine fishing laws which go into effect July 11. It is important to note that the bass season does not open until June 15, closing Sept. 30, while trout, salmon and landlocked salmon may not be taken after Sept. 15 in brooks and streams above tide water.

### FOLEY REVOLVER LAW.

GOVERNOR SULZER has signed the Foley small arms bill, which amends Sections 1897 and 1914, penal law of New York State, making it a felony for a person to carry or possess a bomb or bomb-shell, and providing for the issuance by a magistrate of a license for carrying a concealed weapon, to a commissioner of correction of a city or any warden, superintendent or head keeper of a penal institution, also to any householder, merchant, storekeeper or bank messenger of good moral character, such weapon to be kept in the house or store or in the case of the messenger while in the employ of a bank, and also to any other person of good moral character where proper cause exists for the issuance of a license.

This new law, although put through as an amendment to the Sullivan law, amounts practically to a new law. If properly enforced it should give the householder the relief denied in the old law, that of having a revolver in the home, and while there seldom is use for a revolver in the house, its possession gives the occupants that indefinable feeling of security, so easily engulfed by darkness of night. Therefore, if the Foley law does nothing else, it will lend many a householder a package of moral courage and increase the business of the sporting goods dealer. It is a great improvement on the Sullivan law, and we congratulate the Empire State legislators on their developing intelligence. The new law goes into effect Sept. 1, 1913.

### Home, Sweet Home.

BY J. M. LEWIS.

To knot my shoes together by the strings,  
To wad my stockings into them, and go  
Down dusty roads I knew in bygone springs,  
To kick up dust and get a stone-bruised toe;  
To loiter on the bridge across the run  
And dangle my feet there till day grew dim,  
And watch the timid minnows dart and swim.

Those were the days! Rare days, sweet days and good;  
The creeks sang songs, and their each song was new;  
Birds sang new songs in every shady wood,  
And never since have skies been such a blue;  
And never since have clouds been half so white,  
And never since has life seemed half so sweet;  
Stars do not shine as stars then shone at night,  
Paths now are not so coaxing to my feet.

Why, I can take a greenheart rod and flies,  
The costliest, and whip a woodland stream  
For hours and hours, and never get a rise,  
And never see a speckled beauty gleam  
In the brown deeps, when in the olden days  
A wriggling worm hung on a bent-pin hook,  
Tied to a cotton line would catch the gaze  
And lure the finest beauties from the brook.

And I could whistle then! No mocker now  
Can half way mock the tunes I whistled shrill,  
Till music seemed to drip from every bough  
And echo back to me from the far hill;  
And now I cannot even purse my lips  
To get more than the shadow of a croon;  
My whistle now is discords, shrills and skips,  
And all day trying would not bring a tune.

The years have given me more than most men  
Have gathered from the years which pass them by,  
And no man can win back to youth again—  
Spring's colors cannot always tint the sky;  
But if I could go barefoot just once more,  
Along the dusty road in the sweet gloom,  
And if I could call back the skill of yore,  
The hills should echo back my "Home, Sweet Home."

# YACHTING

Forest and Stream gives a weekly digest of Yachting and Motor Boating events from all over the country.

## New Universal Rating

THERE seems to be a universal feeling of satisfaction among the American yachtsmen over the fact that the New York Y. C. consented to race under the present rule of measurement and time allowance, instead of the obsolete rule, which produces a flimsy racing machine, pure and simple.

The new universal rating, quite similar to the European international rule, has developed a good, wholesome type of yacht. All freaks are penalized. Length is measured on the quarter beam line, overhang is regulated in proportion to the water line length, and any excess is added to the water line length in computing the rating.

The rating is 18 per cent. of the product of length multiplied by the square root of the sail area divided by the cube root of the displacement. The limit of draft is 16 per cent. of the load waterline length plus 1.75. The cube root of the displacement must not exceed 20 per cent. of the load water line length plus .50.

The rule puts a premium on displacement and a penalty on driving power.

The old water line and sail area, or Seawanhaka rule, was the rule for the practical racing man and racing boats; in fact, many very fast ones were turned out under this rule, not only from the drafting table, but from whittled models. The new rule, or universal rating rule, is the rule of the scientific naval architect and one under which a boat can be produced only after much study.

Since this rule went into effect among the more prominent yacht clubs and yacht racing associations of the Atlantic Coast and Great Lakes, a number of very fast racing yachts have entered the field of this sport. The great majority of these rating boats built since 1904 with their designers, class and the year built, are as follows:

Alden—Sidney, C. B., 17-rater, 1912; Shirley, Class Q, 1913.

Boardman—No rating yachts built.

Burgess—Orestes, Class Q, 1906; Secret, Class R, 1907; Onda II., Class P, 1908; Achilles, Class Q, 1908; Onda III., Class P, 1913.

Crane—Spider, Class Q, 1906; Soya, Class Q, 1906; Spider II., Class Q, 1910; Soya II., Class Q, 1910.

Crowninshield—Essex, Class Q, 1907; May-be, Class Q, 1907.

Gardner—Dorothy, Class Q, 1907; Manhasset, 26-rater, 1907; Windward, Class P, 1909; Grayjacket, Class Q, 1910; Class S boat, 1911; Medora, 46-rater, 1912; Michicago, Class P, 1912; Olympia, Class P, 1913; two class Q boats, 1913; Radiant, 65-foot schooner, 1913.

Gielow—Crescent, Class P, 1905; Jig Step, Class P, 1905; Sue, Class P, 1905; Effort, 60-rating sloop, 1906; Class Q sloop, 1907; two class R boats, 1908; Odysseus II., Class N, 1909.

Herreshoff—Doris, Class L, 1905; Irolita,

ex-Queen, Class B, 1906; Aurora, Class 65-raters, 1907; Avenger, Class L, 1907; Seneca, Class P, 1907; Dorothy Q, Class Q, 1907; Eleanor, Class Q, 1907; Shimna, Class L, 1909; Adventuress, Class N, 1909; Cara Mia, Class P, 1909; Hamburg II., ex-Westward, Class A, 1910; Vagrant, Class F, 1910; Elena, Class A, 1911; Joyant, Class P, 1911; Corinthian, Class P, 1911; Vagrant, Class D, 1913; New York Y. C. one-design 50-footers, 1913.

Lawley—Alice, Class N, 1910.

Mower—More Trouble, Class Q, 1905; Joy, Class Q, 1907; Chaperone, Class Q, 1907; Crescent, Class R, 1907; Class Q, sloop, 1911; Watertown, Class R, 1911; Nealmo, Class R, 1913.

Owen—Little Rhody II., 1907; Kathleen, Class N, 1908; Wianno, Class P, 1909; Timandra, Class P, 1909; Mavourneen, Class P, 1910; Amoret, Class P, 1910; Swamba, Class R, 1910; Sumarki, Class R, 1910; Italia, Class P, 1911; Sayonar, Class P, 1911; Patricia, Class P, 1911; Viva II., Class R, 1911; Dorello II., Class M, 1912; Nirwana, Class R, 1912; Scrapper II., Class R, 1912; Stranger, Class P, 1913; South Shore, Class P, 1913; Sayonara II., Class P, 1913; Mantaqua, Class Q, 1913; Class Q, sloop, 1913; Class S, sloop, 1913.

The list shows that four of the American designers have produced the majority of these rating racers, namely, Herreshoff, William Gardner, George Owen and Charles Mower.

Herreshoff has designed twenty-five rating boats, George Owen twenty-two boats, William Gardner eleven boats and Mower seven boats. Of Herreshoff's twenty-five boats, three were of the one-design Aurora class of 65-raters, and nine of the new 50-foot New York Y. C. one-design class.

### Yachts Change Hands.

THE Boston Marine Agency has sold the 25-foot speed boat Bunny for J. F. Cooper, of South Boston, to Herbert Kears, of Dorchester; the 21-foot waterline knockabout Ellinor for L. E. Barnes to S. P. Capen, of Worcester; the 18-foot auxiliary knockabout Noma for M. B. Shepard, of Cambridge to Peter Legere, of South Boston; the 25-foot cabin catboat Navajo for J. P. Atkins, of Worcester, to H. F. Webb; the 20-foot power boat Jaberwock for Guy Hamilton to Arthur Weldon West, of Somerville; the 30-foot cabin catboat Della A., for J. Mulcahy, of Brockton, to I. E. Lengren, of Malden; the 18-foot knockabout Janet for W. H. Howell, of Baltimore, to James W. F. Parsons, of Revere; the 25-foot auxiliary yawl Arlema for H. E. Ayers to W. C. Brewer.

ABOUT all the boats in most of the yacht clubs were at their moorings Memorial Day, on which date many clubs went into commission.

### Ticks From the Ship's Clock.

THE April fool bunch at Bayside hung a good one on the Butterfly class last Saturday. As the club was not in commission, W. H. MacGregor, chairman of the race committee, announced that all rules would be suspended. Taking this literally, joker E. C. Sprague headed his boat Moth for the shore immediately after the starting gun was fired. When the beach was reached, a crowd of willing humorists loaded the Moth on to a truck, hauled her to within fifty feet of the finish line, put her overboard and crossed the line a winner by about ten minutes. Although protested by the sober-minded, the regatta committee awarded the prize to auto skipper Sprague on the announcement of "rules suspended." Although the Bayside Y. C. is a dry organization, it is rumored that Captain Sprague has not had to buy a thing in Bayside all week. It isn't a no-license berg—it's its part of Greater New York.

WHAT could be more tickling to the heart of the waterman, not yet converted to power boating, than the fact that the three flag officers of the New York Y. C. this year command sailing yachts. Commodore Pratt sails his schooner Sea Fox, Vice-Commodore Baker owns one of the new fifties, the Ventura, while Commodore Morgan will sail another fifty, the Grayling. The gasolene bug still has a lot of missionary work to do among wind jammers.

THE start of the Bermuda race will be on June 7.

CAPT. BYRON MILLER, of the Squantum Y. C.; Charles Braunback, of Boston, the owner; Charles H. Ramsdell, of Somerville; Richard Tomfohrde, of Boston, and Charles J. Martell, of Boston, have completed a cruise from Norfolk, Va., to Boston, by the inside route, bringing up the 46-foot cruiser Amohalko. The description of the trip through the fish weirs of the Chesapeake, Elk River, Chesapeake and Delaware Canal, Delaware River to Burlington, N. J., and then by way of the Raritan Canal, through the low hills of New Jersey to Perth Amboy, thence to New York, makes an interesting story. There were no accidents on the trip, but there was enough excitement among the fish weirs, the locks of the canals and on the sheltered waters around New York to give pleasant thrills.

BASED on an estimate by Federal authorities, Rhode Island has a larger percentage of power boats for its population than any State, with the exception of those on the Pacific. There are 3,000, making about six power boats to every 1,000 inhabitants.

It is intimated, by a bird—not one of those durned English sparrows, maybe a sea gull—that William Gardner, in addition to building an aeroplane up the Hudson, is designing an international cup defender for W. Butler Duncan.

THE Linekin Bay (Me.) Y. C., composed mostly of summer residents, has mapped out its program for the summer. William McKenney, of Boston, is commodore. The entertainment

committee consists of Frank G. Davison, Albert E. Shipman, Malcolm D. Barrows and Lyman M. McDougall.

At the Boothbay Harbor (Me.) Club the members are preparing for a lively season. Commodore Scherer will have more boats in commission this summer than ever, and the membership list is increasing constantly.

A NEW yacht club, named Nokomis, has just been organized at Gardiner, Me.

ZENAS W. BLISS'S new 55-foot cruiser Lydia III. was launched last week. Lydia III. is 55 feet over all, 50 feet water line, 11 feet 6 inches beam. She has provision for a mast and will be driven by a 40-50 Bearer engine. She was designed and built by Frederic S. Nock.

THE city of Fall River will maintain a public float at the city wharf for local and visiting yachtsmen beginning Memorial Day. Visitors may have their mail addressed to the harbor master, city of Fall River, and can be assured of safe delivery.

A BOSTON cup defender, designed by a syndicate of Boston naval architects, backed by popular subscription, was the proposition laid before members of the Eastern, Corinthian and Boston yacht clubs at a recent meeting by Rear-Commodore Charles H. W. Foster, of the Eastern Y. C. The suggestion embodies combined designs by George Owen, Bowdoin B. Crowninshield, Edwin A. Boardman, W. Starling Burgess, John G. Alden and Fred Lawley, leading New England designers.

JUNE 7 will be Flag Day. The spring cruise of the Philadelphia Y. C. was held on the Chesapeake Bay, May 29, with a rendezvous off Ford's Landing, on the Elk River, May 30.

It is stated word has been received from Bristol that "Nat" Herreshoff, designer and builder of the successful cup defenders for the past twenty years, has declined tentatively to enter a competition for the design of the 1914 defender. Mr. Herreshoff is said to have expressed his decision to Harold S. Vanderbilt, Oliver Iselin, Jr., and Amos Johnston when they were at Bristol to take part in the launching of Vagrant II., Mr. Vanderbilt's latest schooner.

### Two Well-Known Yachtsmen Pass Away.

Two prominent yachtsmen have passed away during the past week. One is J. Henry Ruwe, a former commodore of the Unqua-Corinthian Y. C. and Prof. William Hallock, official measurer of the New York Y. C., who died in the Rhode Island Hospital at Providence, after an attack of apoplexy while measuring Harry Payne Whitney's new 50-footer at Bristol recently. These two gentlemen will be missed greatly.

### New York Y. C. Fifties.

THE first tryout of the New York Y. C. fifties was sailed last Saturday off Glen Cove, L. I. Although the wind was almost nil and what happened to blow in was fluky, the class proved mighty interesting. Nine boats started.

Iroquois II., owned by Ralph N. Ellis, won by 17m., leading from the first leg.

	Finish.	Elapsed.
Iroquois II., R. N. Ellis.....	6 45 47	3 50 47
Barbara, H. P. Whitney.....	7 02 51	4 07 51
Ventura, G. F. Baker, Jr.....	7 05 46	4 10 46
Acushla, G. M. Heckscher.....	7 06 03	4 11 03
Spartan, E. Randolph.....	7 06 35	4 11 35
Pleione, C. C. Rumrill.....	7 20 10	4 25 10
Grayling, J. P. Morgan.....	7 25 34	4 30 34

### Bayside Y. C.

BAYSIDE, L. I., May 24.—In the try-out of the new Butterfly class here to-day, Wm. H. John's Diana proved the fastest in a fluky, light wind, having 26s. to spare over W. Teller's Ariadne. The summary.

	Finish.	Elapsed.
Moth, E. C. Sprague.....	5 00 05	0 45 05
Diana, W. H. Johns.....	5 10 53	0 55 53
Ariadne, W. Teller.....	5 11 19	0 56 19
Papillon, Mat Rock.....	5 14 23	0 59 23
Yehl, C. R. Agnew.....	5 16 00	1 01 00
Vanessa, J. D. Adams.....	5 17 16	1 02 16
Gabbi, Austin Healy.....	5 18 10	1 03 10
Clio, N. P. Scofield.....	5 18 31	1 05 31
Cabbage, G. T. Hopewell.....	5 18 33	1 03 32
Fluterby, Dr. G. A. Wilson, Jr.....	5 21 00	1 06 00

### Philadelphia Corinthian Y. C.

THE opening regatta of the Philadelphia Corinthian Y. C. on May 24 showed the following results:

#### Raceabout Class.

	Elapsed.
Cyrilla, W. B. Henry.....	1 19 55
Eleanor, A. F. Bancroft.....	1 21 04
Quakeress III., E. S. Godschalk.....	1 22 49
Grilse IV., R. Toland.....	1 29 02

#### Bang-and-Go-Back Race.

Merlin, Dr. Alex. Glass.....	8 16 20
Shark, S. Collom.....	8 17 35
Nancy, Judge W. Martin.....	3 17 40

### Manhasset Bay Y. C.

THE annual regatta of the Manhasset Bay Y. C. will be sailed on Saturday, June 7, 1913, for all regular classes of sloops, one-design and handicap classes.

The race will be started off the Red and Black Buoy to the northward and eastward of Execution Light.

The starting and finishing line will be between a white flag on the committee steamer and a stake boat floating the club burgee, starting from west to east, finishing from east to west.

Course No. 1.—From the starting line to and around red spar buoy 24½ off Wolsey's Reef, leaving it to starboard, thence to black spar buoy 15½ off Oak Neck Point leaving it to starboard, thence to finishing line. Distance, 21¾ miles.

Course No. 2.—From the starting line to black and white buoy "A" off Parsonage Point leaving it to starboard, thence to black spar buoy 15½ off Oak Neck Point, leaving it to starboard, thence to finishing line. Distance, 15¾ miles.

Course No. 3.—From the starting line to and around red gas buoy off Scotch Caps leaving same to starboard, thence to black spar buoy "E 1" off Week's Point leaving same to starboard, thence to finishing line. Distance, 9 miles.

Course No. 4.—From the starting line to and around black spar buoy "S 1" off Delancy Point leaving same to starboard, thence to and around bell buoy off Prospect Point leaving same to starboard, thence to finishing line. Distance, 6 miles.

The starting signals will be given from the committee steamer in the order shown below. Attention to each signal will be called by gun or whistle:

12:00 noon. Warning; a square white flag.  
12:05 P. M. Preparatory; blue peter.

Will sail Course No. 1: 12:10 P. M. start; 50-foot one-design class, one red ball. 12:15 P. M. start; Class K. L and M and Stamford schooner, one white ball.

Will sail Course No. 2: 12:20 P. M. start; Class N, P and Q, one blue ball. 12:25 P. M. start; New York Y. C. thirties, two red balls.

Will sail Course No. 3: 12:30 P. M. start; Sound schooners, two white balls. 12:35 P. M. start; Classes R and S, two blue balls. 12:40 P. M. start; American Y. C. raceabouts, first and second divisions, handicap classes, one white and one red ball. 12:45 P. M. start; Larchmont inter-club class, one white and one blue ball. 12:50 P. M. start; third and fourth divisions, handicap class, one blue and one red ball. 12:55 P. M. start; Manhasset Bay twenties; Jewel S class and Bayside birds, one red ball under white flag.

Will sail Course No. 4: 1 P. M. start; Manhasset Bay raceabouts, Manhasset Bay bugs, star class, one white ball under white flag. 1:05 P. M. start; Bayside and Port Washington one-design classes and American Y. C. dories, one blue ball under white flag. 1:10 P. M. start; all other small one-design classes, one red and one white ball under white flag.

Each starting signal will be class preparatory signal for the next class to start.

Preparatory signals will be lowered thirty seconds before setting of starting signal.

Postponement of the start of the race, if necessary, will be for fifteen minutes, or a multiple thereof, and will be signalled by code flag "G."

If it should be necessary to sail course in opposite direction, it will be signalled by code flag "B." Marks will then be turned to port.

Should a yacht cross the starting line before her starting signal is given, she will be hailed and must return, giving way to other yachts crossing the line at the proper time.

Race-off for the day will be signalled by code flag "H."

All yachts in regular classes must file 1913 measurement certificates.

All one-design and restricted classes must comply with Section 2, Rule 7, of the Racing Rules of the Yacht Racing Association of Long Island Sound.

(No one-design or restricted class will be timed unless class rules are filed with the regatta committee, or the secretary of the Yacht Racing Association.)

No protest of any kind will be considered unless made in writing and given to the race committee prior to noon of June 9.

If two or more yachts start in a class, a first prize will be awarded. If four or more, a second prize, and six or more a third prize will be awarded. No sail-over prizes will be given.

The rules of the Yacht Racing Association of Long Island Sound will govern, except where otherwise specified.

Entries must be received by the chairman of the race committee at the Forty-second street Building, New York city, before 4 P. M., June 6. (Telephone 6347 Murray Hill.)

No special classes will be arranged on the day of the race. If owners of two or more yachts not provided for wish to arrange a special match, arrangements must be made at least

twenty-four hours prior to the start. No subdivisions of one-design classes will be made.

JAMES W. ALKER, Chairman.

WILLIAM GARDNER,

A. W. NILSSON,

Race Committee.

## Canoeing

### Associated Canoe Clubs of the Hudson.

It is the call of the canoeist again, for the annual camp and race meet of the Associated Canoe Clubs of the Hudson will be held over Decoration Day, May 31 and June 1, 1913, at Hermit Point.

Ferry for Hermit Point will leave the Inwood Canoe Club at 8 A. M., 9 A. M., 10 A. M. and return from Hermit Point at 5:30 P. M., 6:30 P. M. and 7:30 P. M., daily. Fare, twenty cents.

The Associated Canoe Clubs of the Hudson extend to all American Canoe Association members a most cordial invitation to attend this regatta.

The racing program follows:

Sailing.—Open canoes, 40-foot sail area, 3 miles; decked canoes, 90-foot sail area, 3 miles; handicap race, unlimited sail area, 3 miles.

Paddling, Junior Department.—One-man double blade, ½ mile; one-man single blade, ½ mile; tandem double blade, ½ mile; tandem single blade, ½ mile.

Paddling, Senior Department.—One-man double blade, ½ mile; one-man single blade, ½ mile; tandem double blade, ½ mile; tandem single blade, ½ mile.

Tournament.—Mixed tandem double blade, ¼ mile; tilting, handicap, 8 fouts; tail end race, ¼ mile; rescue race, ¼ mile.

Club Fours.—Double blade, race, ½ mile; single blade trophy race, ½ mile; war canoe race.

Point Trophy.—Club scoring most points.

The Associated Canoe Clubs of the Hudson consists of Ft. Washington Canoe Club, Edgewater, N. J.; Inwood Canoe Club, New York City; Yonkers Canoe Club, Yonkers, N. Y.

Following are the officers: President, Jule F. Marshall, Inwood Canoe Club; Secretary-Treasurer, Thomas Zuk, Ft. Washington Canoe Club. Committee—Eugene C. Kelly, Chairman, Paddling Races; R. A. Weiss, Sailing Races; D. J. Finn, Camp Site; A. Von Doln, Entertainment. Starter and Referee—Harold N. Wilson A. C. A.

### A. C. A. Membership.

#### NEW MEMBERS PROPOSED.

Atlantic Division.—W. C. Tschinkel, 535 West 160th street, New York city, by Harold N. Wilson.

Eastern Division.—Herbert D. Ashley, 89 Vernon street, Waltham, Mass.; George A. Baxter, 40 Prospect street, Waltham, Mass.; Raymond A. Morse, 20 Whitlowe Road, West Newton, Mass.; William W. Ferguson, 16 Prospect Park avenue, Waltham, Mass., and Karl Hoyt Spooner, 66 Prospect street, Waltham, Mass., all by Herbert B. Arnold.

#### NEW MEMBERS ELECTED.

Central Division.—6661, Harry W. Barker, 28 Manchester Place, Buffalo, N. Y.

### THROUGH THE ADIRONDACKS BY CANOE.

Continued from page 687.

you would only have to carry anything you had bought over to Sixth, it is best to wait.

Of course everyone's choice in the matter of food differs, but you have to bear in mind that when camping you must carry as little as possible. Canned soups, beans, smoked beef, bacon, bread and butter are essential. Butter is best kept in a small glass jar with a tight fitting cover. Buy a quarter pound at a time, for it goes bad very quickly. Do not stock up too much here, as you will come to the Raquette Lake store the next day. After purchasing your supplies you have a fairly long pull through Sixth and Seventh lakes. These two lakes are as a rule a bit rough and windy. You are apt to have a little trouble finding the carry at the end of Seventh Lake, but keep a sharp lookout for a lot of dead trees half submerged by water. A channel is formed through these trees which leads you to the carry.

This carry is about one mile in length, along a trail in the woods, and brings you out on the shores of Eighth Lake, one of the most beautiful lakes of the whole trip. It is Government property and free from permanent habitation.

There are three or four ideal camping spots along the left shore and one on the island. The best one is about opposite the island and contains a spring.

By the time you pick out your camp and get your tent up, it will be nearly time to build your fire and get supper. It is advisable to start camp not later than 4 P. M., for it is very inconvenient to have darkness come upon you before you have cooked supper or made your camp for the night. A very comfortable bed can be made by cutting branches from the pine and fir trees and spreading them upon your rubber poncho.

The following morning after breaking camp you are ready to tackle Eighth Lake carry. This is the worst one of all, the trail being about one and a half miles long, constructed mostly of badly damaged corduroy roads, making the footing most uncertain, especially with a canoe on your head.

It will take most of the morning to make this carry, which brings you out on Brown's Tract Inlet, one of the dreariest places imaginable. I believe at one time it was a forest, but is now composed of swamp land and dead trees. It is about three miles long and has eighty-six turns in it.

At the end of this tedious paddle you enter into the beautiful Raquette Lake. Here you will find a large store where you can replenish your larder with everything needed. Fresh meat can be obtained here, and nothing goes better than a camp steak or chops once in a while. As it will be two days before reaching another store, buy sufficient to last you for that length of time.

You have got to follow your map closely, as this lake contains numerous islands and inlets which are apt to confuse one. Several camping spots for the night can be found at the upper end of the lake.

The following day finds you ready to carry over to Forked Lake. This is a short, one on a good road and takes but little time.

Forked is the wildest lake you will find on the whole trip, and in the early morning quite

a few deer may be seen if the camper cares to get up in time.

As this lake is private land, the only camping place is far down to the left of the carry.

If at any time during the day you meet campers going your way, arrange to take the next carry together. This carry is five miles long, and while you can make this on foot, it is well worth the cost of hiring a wagon. The charge is \$4.00 for a single canoe, but if two canoes make the trip as one party, the charge is only \$5 for both canoes. So you see it is well worth picking up another party.

While one should reach this camp early in the afternoon, it is better to wait until the following morning before making the carry.

The end of this carry is at Long Lake, a magnificent body of water, fourteen miles in length. You paddle for a mile or two through swamp grass. Leaving this, you have a six-mile pull to Long Lake village, which is easily located by the bridge that spans the lake.

This is a good sized town with four, or five stores where you can stock up. Purchase plenty here, for you will not find another store for three days.

The paddle up to the end of the lake from the town is a long stretch, but the surrounding country is wonderful with constant change of scenery. A fine camp for the night will be found at the end of the lake. It is on the left shore and can be located by a large boulder resting on a short stretch of sandy beach. There is a very fine spring a little way in the woods. From this spot, if the evening is clear, you can see all of the largest mountains in the Adirondacks.

The next morning you enter Raquette River. You have to pick out the channel here, as the water is very shallow. This river is about thirty miles long and winds in and out the whole distance. At the widest part the river is not over thirty feet. You have to keep a careful lookout for submerged rocks. With the exception of three small settlements, the river is absolutely wild. These settlements are about eight miles apart.

Paddling for a couple of hours you come to the rapids where you have to hire a wagon. It is well worth \$1.50, for a rougher road would be hard to find in the Adirondacks.

Another three hours' paddle brings you to Axton. You will find it advisable to camp here and spend the rest of the day in walking over to Saranac Lake. It is only about three miles, and on the way you pass the Cories postoffice, which is the best place to have any of your mail sent.

Getting under way the next morning, you have about sixteen miles further to go before you reach Tupper Lake. Tupper Lake is the biggest town you will find on the whole trip.

We will leave you here to either continue down the Tupper Lake or to retrace your steps back to Old Forge. You need have no fear as to the return trip being tiresome, as new experiences are met with every day.

If you have a couple of days to spare, paddle through the Marion River, Utowana and Eagle Lakes to Blue Mountain Lake. These three lakes are well worth seeing, and the view from the top of Blue Mountain is magnificent.

It is with deep regret to the true camper when his trip is over that he has to board the train at Old Forge and start back to the hot city.

Forest and Stream is the official organ of the National Archery Association.

### Putting the Cherry in Archery.

KANSAS CITY, Kan., May 18.—*Editor Forest and Stream:* I wish to congratulate your journal and the devotees of archery at large on the recent addition to the literature of archery contributed by my Kansas friend Challis upon the art of bow making. This is certainly a classic, and covers the ground so thoroughly that I believe, if carefully studied and followed by even the merest tyro in the use of tools, an effective weapon could be supplied by him, and even if all the expert bowmakers of the world should be cut off, the followers of this grand sport would be able to supply themselves with ideal bows.

Mr. Challis I know can speak with authority. He has carried out his own ideas successfully. He has even made a bow that can be folded up and put in the pocket, and he has a plant up there in the woods of Atchison equipped with a five horsepower gasoline with which he can perform any stunt from sawing a slit in the tooth of a fine tooth comb to cutting a thread on a microscopic watch screw.

If the archers of this country will only assimilate the ideas of Challis, Rendtorff and Nichols, it will not be very long before we must make our target faces of hard wood in order to preserve them from instant mutilation.

At last we have got on the map. We are very modest about sending in scores, but you want to look out for a cyclone from the West, when Canfield gets his arrows properly feathered.

FRED T. LEPORT,  
Sec'y Kansas City Archery Club.

### An Archer Inquires.

NEWTON, Mass., April 25.—*Editor Forest and Stream:* You may be contemplating another "Robert Page Lincoln Edition" of your valuable paper, as your issue of April 12 might reasonably be termed, containing, as it did, two lengthy (i. e., wordy) articles by him, and it is with the view of suggesting for his treatment a subject of interest to many, if not all, of your readers, that I write. I would request that you give this letter space, for I hope it may inspire your lucid correspondent to shed the needed light on the little subject unhappily darkened by the shadow of his colossal frame—taking for granted it is colossal upon the theory that a large base is necessary to support a large head-piece.

In his masterly article, "Something About Bait-Casting," Robert Page Lincoln, than whom none would appear to so well merit being termed the one real and only Izaak Walton of all present day fishermen, sagely remarks: "I use the bait I think will get the most fish for the day." Ponder that! An entirely new procedure, and so contrary, too, to general practice! Verily,

the age in which we live is thus marked the greatest of mankind, and upon the scroll of achievements recording its distinctions must be emblazoned this new thing of using the bait which one thinks will get the most fish.

Then Mr. Lincoln adds: "I find out in the early morning hours what bait the bass are taking best that day, and then gauge my proceedings accordingly. Therefore, I have with me both live and artificial, selected with care." And now, revealing a profundity of knowledge approaching the infinite, "the frogs I choose are not too small, and not too large. I know just what size attracts the bass, and follow it up."

There, Mr. Editor, is where we want the light to shine. It should be focussed on those few lines. There are hundreds of us amateur anglers anticipating some bass fishing, but before we wet a line, we would know something of how this wonderful genius proceeds to determine early of a morning what bait the bass are taking best that day? And then, why, oh why, after determining the one best bait for the day he should always take with him both live and artificial, something which he takes the time to carefully select, yet which his marvelous deductions have already determined will be of no avail? Every man who fishes is thirsting for this hidden knowledge, is eager and anxious for it, and I feel, Mr. Editor, that I can assure you that every such man is a suppliant for detailed information, and that all will feel obligated to you for your service of obtaining and publishing it.

Then there is the question of the frogs. Does he tell us miserable amateurs, he of "intellectual highbrow" distinction, how he avoids taking frogs that are too long or too short; how he always manages to select those of the right length? Tell? Oh, no; not he. With strange modesty, yea even bashfully and hesitatingly, he takes us into his confidence just a wee bit—just enough to inform us bluntly that he knows all about it; that he knows the size that attracts the bass, and is clever enough to follow it up. We are delighted that he knows, but is his mere declaration fair to those who are beguiled into reading his article by its title, "Something About Bait-Casting," with the legitimate idea that they are to learn something on the subject? We learn that Robert Page Lincoln knows, that he knows what he knows, and that is all. But what benefit is that to those who seek real information about bait-casting? Would this eminent authority condemn as presumptuous, even worthless, a statement of "fact" when made by another if unaccompanied by proof or not supported by theory? We incline to the belief that language sufficiently vehement and caustic could not be found to supply his demand, and that thus being deprived of relieving himself of the sulphuric gases rising from his boiling indignation, he would explode. We find that when state-

ments are made as facts and accompanied by argument so strong, even if too technical for the layman, as to be proof which at least satisfies the one who in making them is endeavoring to advance the subject in which he is interested, Mr. Lincoln, because he holds a contrary view, indulges in no end of intemperate language in criticising them, as instance his article on archery, under the caption "About Teaching Beginners" in your issue of April 12. His article contained nothing about teaching beginners, but was a diatribe worthy of the king of an alley.

But this gentleman, in his bait-casting article, may have been benevolently inclined. That is the better view, and we wish to retain it, though he fails to supply us with such a precedent or cause for this charitable supposition. He may have intended to give us some real benefit, and what I consider lacking in his article was possibly inadvertently omitted. So I appeal to him that he unlock and open wide the store house of his secrets that we who go for bass may return to our homes more contented with our catches than ever before. What we are in doubt about and would particularly like to know is whether in choosing frogs he prefers railroad frogs, horned toads, tree frogs, eighteen-inch bull frogs, or are they carefully selected artificial frogs, and if the latter whether they should be imported or domestic? If railroad frogs, how much do they weigh, how long are they, how does he transport them from place to place, how many does he take for a day's fishing, and how does he fasten them on his hook? If horned toads, does he select them because of any ability to play enticing music upon their horns, and if so, does he select males or females, does he use them dressed or undressed, and what of the popular airs or operas does he have them play to lure the wary bass? Then, if tree frogs, are they taken to provide shade on a hot, sunny day, or at his command can they imitate a bark and thus possess value as the means to frighten away all bad boys who might be disposed to disturb his fishing siestas? If bull frogs, must they be taken from a pond in a cow pasture, from a pool in a steer lot?

These are important questions, though to those who know the answers they may seem frivolous. But to possess more information than my questions disclose could not be expected of me when I am credited with having read Mr. Lincoln's article, and the generous and courteous spirit of your able correspondent will not allow him to expect more, or deny the information I crave when he learns that I am only an amateur archer, that I shoot a forty-pound bow, sometimes a heavier one, and actually carry them about with me.

C. T. SWITZLER.

"CONSIDER the postage stamp, my son, its usefulness consists in being able to stick to a thing until it gets there."—Josh Billings.

# TRAP SHOOTING

Forest and Stream is an Honorary Member of the Interstate Association for the Promotion of Trapshooting.

### Fixtures.

If you want your shoot to be announced here, send a notice like the following:

#### REGISTERED TOURNAMENTS.

- June 2.—Bunker Hill (Ill.) G. C. E. Pettengill, Sec'y.
- June 2.—Utica, Ill.—Interurban T. S. A. A. L. Jaques, Sec'y.
- June 3.—Maquoketa (Ia.) G. C. E. L. Hinckley, Sec'y.
- June 3.—Delta (Colo.) G. C. R. A. King, Mgr.
- June 3.—Capron (Ill.) G. C. Alex. Vance, Sec'y.
- June 3.—Fulda (Minn.) G. C. H. W. Converse, Sec'y.
- June 3-4.—Sisseton, S. D.—South Dakota State tournament, under auspices of South Dakota State S. A. Maurice Schindler, Sec'y.
- June 3-4.—Baltimore, Md.—Maryland State tournament, auspices Maryland S. S. A. H. L. Worthington, Sec'y.
- June 3-5.—St. John (N. C.) G. C. W. W. Gerow, Sec'y.
- June 3-5.—Eugene, Ore.—Oregon State tournament, under auspices of Eugene G. C. E. A. Bean, Sec'y.
- June 4.—Keota (Ia.) G. C. John R. Jahn, Sec'y.
- June 4-6.—Circleville, O.—Ohio State tournament, under auspices of Ideal G. C. J. S. Ritt, Sec'y.
- June 4-6.—Marshall, Mo.—Missouri State tournament, under auspices of Marshall G. C. E. W. Brown, Sec'y.
- June 5.—Plattsburg (N. Y.) R. & G. C. F. J. Riley, Pres.
- June 5.—Bristol (Va.) G. C. H. F. Lewis, Sec'y.
- June 5.—S. Madison, Wis.—Triangle G. C. H. G. Waterman, Sec'y.
- June 5.—Lowell (Ind.) G. C. H. O. Burnham, Sec'y.
- June 5-7.—Red Bank, N. J.—New Jersey State tournament, under auspices of River Side G. C. Albert L. Ivins, Pres.
- June 5.—Milbank (S. D.) G. C. W. J. Martens, Sec'y.
- June 5.—Spring Valley (Minn.) G. C. J. Bowden, Sec'y.
- June 6.—Bradford (Ill.) G. C. H. A. Swearingen, Sec'y.
- June 6-7.—Worcester, Mass.—Massachusetts State tournament, under auspices of Massachusetts S. T. S. A. F. E. Sheldon, Sec'y.
- June 7.—Roversford (Pa.) G. C. F. A. Anderson, Sec'y.
- June 7.—Oneonta (N. Y.) F., G. & G. C. George Wohlleben, Sec'y.
- June 7-8.—Milwaukee, Wis.—Badger G. C. C. P. Shumway, Sec'y.
- June 9-12.—Buffalo, N. Y.—N. Y. State Sportsmen's Association tournament. C. F. Lambert, Sec'y.
- June 10.—Janesville (Wis.) G. C. L. L. Nickerson, Sec'y.
- June 10.—Brownsville, Pa.—Western Pennsylvania T. S. L. tournament, under auspices of Brownsville G. C. Louis Lautenslager, Pres.
- June 10-11.—Warm Springs Ga.—Merriweather Gun Club. T. B. Slade, Sec'y.

### DRIVERS AND TWISTERS.

Paragould (Ark.) Gun Club dates have been changed to July 15-16.

The dates of the Maryland State Sportsmen's Association's State tournament, scheduled for Baltimore, Md., have been changed from June 5-6 to June 3-4.

Shamokin Gun Club's tournament, scheduled for Shamokin, Pa., June 18, has been canceled, as has the tournament registered for Baudette Gun Club, Baudette, Minn., June 21.

The Long Beach Gun Club will hold a two-day trapshooting tournament under auspices of Hotel Nassau, at Long Beach, Long Island. Information from Jack Fanning, care Abercrombie & Fitch Company, 55-57 West Thirty-sixth street, New York city, or Secretary W. H. Barse, Hotel Nassau, Long Beach.

Frank Huseman, until recently one of the top-notch amateurs, now a "for-wads-only" exponent, is being congratulated on the arrival of his storkship with an eleven-pound cargo of baby Huseman. We add our congratulatory editorial mite to the cute human mite, and wish Mr. and Mrs. Huseman "mighty" and continued happiness.

W. G. BEECROFT.

### Windsor G. C.

WINDSOR, Mo., May 21.—Wind and rain combined to turn scores here to-day. C. B. Eaton was about the only keen-eyed amateur present, his breakage amounting to 185 out of 200. George K. Mackie, Harry Thomas and Wienzemed tied for place on 177. Art Killiam was top "for smoke and glory only" shooter, getting 183 of his efforts. Seventeen amateurs and six professionals shot at 4,420 saucers. W. T. Jordan cashiered the shoot. The scores:

C B Eaton	185	John McGrath	159
* Art Killiam	183	J H Whitton	156
* J L Head	180	W C Woodmancey	151
Geo K Mackie	177	Wm Sherman	150
H Thomas	177	W A Smith	149
H Wienzemed	177	W T Jordan	147
* A Mermod	174	* Dave Elliott	141
* Ward Burton	169	Henry Shaw	138
A McLaughlin	167	W R Zener	135
Jim Thomas	167	W L Moore	(120) 78
A Mastain	164	O W McGhee	(100) 66
* Dan Dovee	161		

\*Professionals.

### Brazil Rod and Gun Club.

BRAZIL, Ind., May 21.—Billy Heer smashed 193 out of 200 for high score here to-day. Top amateur was W. L. Stranghn with a crackage of 181. M. M. Glover finding second notch with 175. C. A. Edmonson filling the place with 173.

President Harry Elliott cashiered for sixteen amateurs and five professionals on 4,555 targets. The scores:

* Wm Heer	193	J B Mershon	164
R O Miller	166	* H W Vietmeyer	144
M M Glover	175	G D Hannay	166
W Kivits	150	W E Rice	169
W Roach	164	* W R Chamberlain	169
R C Jenkins	152	T H Parry	165
R M Jenkins	146	Dr F Britton	147
A Sims	170	W L Straight	181
C C Hudson	153	C A Edmonson	173
* T G Barstow	125	* W S Magill	(85) 60
Dr H Elliott	126		

\*Professional.

### Norfolk-Portsmouth G. C.

PORTSMOUTH, Va., May 24.—The weekly shoot of the Norfolk-Portsmouth Club was held Thursday afternoon, May 22, with conditions about as hard as you usually get them. A perfect gale was blowing most of the time, and no one but Gunther seemed able to shoot in the wind. Gunther, with his Daly Trap gun, was high in the club shoot with 46 out of 50; he also broke 47 in an extra 50. The club shoot follows, 50 targets per man: Gunther 46, Davis 39, Boyd 38, Laird 35, Morrisette 34, Edmonds 33, Dr. Byrd 33, Holt 33, Richardson 31, Ballance 31, Talbot 30, Langhorne 28, Capt. Easton 27, Hilton 25, Gallagher (25) 21, White (25) 15.

W. T. EDMONDS, Sec'y.

### Greenwich G. C.

GREENSBORO, Ala., May 24.—The following scores were made over our traps during the past week:

May 24, at 75 targets—Dr. Lawson 62, Cad. Erwin 58, E. C. Singley 54, C. Y. Stollenwerck 54.

May 21, 75 targets—E. R. Holt 72, J. A. Blunt 67, Dr. Lawson 63, Cad. Erwin 60, C. W. Wheeler 58. At 50 targets—H. M. Hardenburg 39, L. J. Lawson, Jr., 36, E. C. Singley 35, J. B. Stickney 34, Dr. C. A. Poellnitz 31, C. A. Ramsey 28.

May 22, 50 targets—J. A. Blunt 46, Dr. Lawson 41, Cad. Erwin 41, C. W. Wheeler 43, M. Fields 41, L. J. Lawson, Jr., 39, H. M. Hardenburg 36, C. Y. Stollenwerck 29.

E. V. OTTS.

Pennsylvania State Shoot

York, Pa., May 15.—The conditions for shooting were excellent. The skyline and background, which are as near perfect as possible, afforded the shooters the opportunity of making good scores, and the figures in the appended table show that the conditions for shooting are calculated to produce some records before the program is shot out. H. H. Stevens, pro., led with 148 out of 150; J. M. Hawkins was second with 145. Carl Moore third with 140.

PRACTICE DAY.

Table listing scores for Practice Day, including names like H. H. Stevens, J. M. Hawkins, and C. D. Henline with their respective scores.

FIRST DAY.

Sixty-five competed to-day. Harry Welles was high pro., and high over all with 144 out of 150. J. M. Hawkins was second with 143, and Neaf Apgar third with 142.

High amateur went to R. J. West, of Brownsville, who broke 141. Vincent Oliver, of Philadelphia, and R. J. Budd, secretary of the Sheridan Gun Club, of Tower City, tied for second place.

E. N. Gillespie, of Pittsburgh, won the State amateur championship at double targets. He broke 37 targets out of 25 pairs. For winning this event, Mr. Gillespie has a leg on the Wolstencroft trophy, a solid gold medal. Vincent Oliver, of the Highland Gun Club, of Philadelphia, was second in this event. He broke 36.

The Milt Lindsey trophy, emblematic of the two-man championship of the State, was won by the Harrisburg Sportsmen's Association team—L. B. Worden, president of the Pennsylvania State Sportsmen's Association, and D. A. Herrold. They shot at 25 singles and 5 pairs, making a total of 62 breaks.

J. S. Speer, of St. Marys; E. N. Gillespie, of Pittsburgh, and E. B. Johnson, of Williamsport, each broke 5 pairs, and tied for the Colonial Hotel trophy. Scores:

Table listing scores for the first day, including names like H. S. Welles, J. M. Hawkins, and R. E. Shearer with their respective scores.

Wolstencroft trophy, State amateur championship at 25 doubles: D. W. Baker..... 34 E. N. Gillespie..... 37 J. S. Speer..... 22 W. H. Stroh..... 32 R. B. Johnson..... 34 V. Oliver..... 36

Table listing scores for the second day, including names like D. W. Baker, J. S. Speer, and R. B. Johnson with their respective scores.

SECOND DAY.

Teams representing the Harrisburg Sportsmen's Association carried off the honors in the second day's program. The club's team, composed of Herrold, Worden, Shoop and Martin, with a score of 90 out of 100 targets, won the Reading trophy, emblematic of the

four-man team championship of the State. Herrold, Worden and Shoop also won the Harrisburg trophy, emblematic of the three-man team championship of the State. The team broke 70 out of 75. The Highland Gun Club, of Philadelphia, was second in both team races.

John S. Speer, of St. Marys, won the Colonial Hotel trophy on shoot-off.

L. B. Worden, of Harrisburg, president of the Pennsylvania State Sportsmen's Association, won high amateur with 143 out of 150. V. Oliver, of the Highland Gun Club, of Philadelphia, present holder of the Du Pont challenge trophy, emblematic of the State amateur championship at double targets, and who is defending the trophy, was second with 142. C. D. Henline, of the Bradford Gun Club, and treasurer of the P. S. S. A., was third with 141.

H. H. Stevens won first place in the pro ranks with 144. J. M. Hawkins and W. B. Joslyn tied for second with 143.

Table listing scores for the second day, including names like H. H. Stevens, J. M. Hawkins, and C. D. Henline with their respective scores.

Four-man team race:

Table listing scores for the Sunbury Team, including names like Schoffstall and Foster with their respective scores.

ANNUAL MEETING.

At the annual meeting of the Pennsylvania State Sportsmen's Association, which was held in the parlor of the Colonial Hotel, last evening, all the old officers of the Association were re-elected. They are: President, Lockwood B. Worden, of Harrisburg; Vice-President, Elmer E. Sianer, of Pittsburgh; Secretary, Bernard Elssner, of York; Treasurer, Claude D. Henline, of Bradford; Directors: John S. Speer, of St. Marys; Chas. Foster, of Selms Grove; Francis S. Cantrell, Jr., Esq., of Philadelphia; J. A. De Pew, of Delano, and Norwood Johnson, of Pittsburg, Counsel, Francis S. Cantrell, Jr.

The Herron Hill Gun Club, of Pittsburg, was awarded the State tournament for 1914. Nineteen clubs, members of the Association, were represented at the meeting. Dr. Joseph Kalbfus, secretary of the State Game Commission, was in attendance.

President Worden, in his report, which was heartily endorsed by the meeting, reviewed the legislation enacted by the State Legislature in the interest of fish, forest and game in the State. He made a number of recommendations, which were approved and acted upon by the meeting.

Norwood Johnson, C. C. Irwin and R. R. Bennett, of Pittsburg, were elected members of the program committee for the next State shoot.

LAST DAY.

High amateur honors for the day went to B. Shoop, of the Harrisburg Sportsmen's Association, who broke 138. R. J. Budd, of Lykens; E. N. Gillespie, of Pitts-

burgh, and Claude D. Henline, of Bradford, tied for place with 137.

High amateur average for the entire tournament went to R. J. Budd, of Lykens, who broke 416 out of 450. Second high was won by H. B. Shoop, of Harrisburg, who broke 411, while P. S. Barnhart, of the Eagle Gun Club, of Hanover; Vincent Oliver, of Philadelphia; R. J. West, of Brownsville, and Claude D. Henline, of Bradford, tied for third high with 410.

H. H. Stevens carried off the pro honors of the tournament by breaking all but 23 of the 450 targets shot at. J. Mowell Hawkins won second high pro with 426, and Neaf Apgar third with 422. Scores:

Table listing scores for the last day, including names like H. H. Stevens, J. M. Hawkins, and C. T. Grove with their respective scores.

Analostan G. C.

WASHINGTON, D. C., May 26.—The members of the Analostan Gun Club were blessed with fine weather today, but were bothered somewhat with a stiff breeze full in their faces, which handicapped them a great deal. Notwithstanding this disagreeable feature, some good scores were posted. Lynn Worthington was a welcome visitor and promised to be with us more frequently, now that he is making his home in Baltimore. Frank Huseman, who is now a professional, shot well in the singles, but by the time the boys commenced on the doubles his mind had become engrossed with pleasant thoughts concerning that eleven-pouud daughter that the stork brought to his home last Wednesday, and he did not shoot up to form. Following are the scores made during the afternoon:

Table listing scores for the Analostan G. C. tournament, including names like Ford, Hunter, Huseman, and Stubener with their respective scores.

Du Pont trophy, 25 targets, handicap:

Table listing scores for the Du Pont trophy, including names like Peck, Huseman, Brown, Barnes, Stine, Emmons, Ford, Bradford, Green, and Culver with their respective scores.

Doubles:

Table listing scores for the doubles event, including names like Kirk, Parsons, Huseman, and Graves with their respective scores.

Shoot on May 17 was postponed on account of rain. MYLES TAYLOR.

Bradford G. C.

BRADFORD, Pa., May 24.—L. E. Mallory, Jr., was elected President of the Bradford Gun Club; C. D. Henline, Vice-President, and A. W. Vernon, Secretary-Treasurer.

In the regular Saturday shoot, C. D. Henline carried off the honors of the day by breaking 48 out of 50. L. E. Mallory, Jr., and Geo. A. Bodine were close seconds, each having 47. In a hotly contested protection match, E. Korner and C. D. Henline won by breaking 40 without a miss. The scores of the day follow: Henline 48, Mallory, Jr., 47, Bodine 47. E. Korner 45, Farnum 45, Van Nottle 44, F. Korner 45, Glenn 43, Vernon 43, Curtis 41, Mallory, Sr., 39, Eygabroat 39, Crittenden 38, Connors 37, Jack 35.

**Pacific Indians.**

THE usual clever book of the Pacific Indians has just been issued by Herald Frank Riehl. It contains much of interest, with the sad obituary of Tyll Ishkum Yahwa, John A. Forbes, to whom this little verse has been indited:

Pause we beside the northern trail,  
Whence erst our valiant hunter came,  
And, where true manhood doth prevail,  
Carved for himself a gen'rous fame.

The foreword is too interesting to overlook, so it is herewith printed:

'Tis a far call, Fellow Braves, from the midcontinental plains, from the fair hills of Allegheny, and the country north of Niagara, to the sunny slopes of the Pacific; yet not so distant that what is good for the warriors of the older lands may not be better for those following the newer trails. Therefore, it is as natural as the rapids of our own pure mountain streams that the Pacific Indians should associate themselves together under these fairer skies to emulate the worthy achievements of their kindred over the Great Divide.

Wherefore, acknowledging our inspirational debt to the American Indians, yet acting independently in our own premises, we have met and passed the pledge to rear the tepee and light the council fires of the Pacific Indians. To all that has signalized the great success of this central idea of mutual good fellowship among the lovers of the gun, rod and kindred outdoor sports, we assign allegiance. We will welcome to the circle every warrior who walks upright in everything before his fellowmen, and who follows the trail, not for slaughter, but for the love of the hunt. To pass muster before his fellows the candidate for chieftainship must bend a fair and honest bow, and speed the shaft of comradeship true to the mark. This, as judged by his peers in annual conclave assembled, shall be the sole test of individual fitness either for admission or retention of his tribal name and insignia.

When the council there shall be recognized no grade or class, except that duly elected or appointive officers shall be deferred to when acting within the limits of the prerogatives of their positions. In all competitions each and every contestant shall stand on the same basis, except in so far as individual prowess may enable him to excel. Neither shall mercenary motives, commonly known as trade interests, be countenanced or have any part in such competitive events as the chief advisors may arrange.

The sixth annual tournament will be held at Raymond, Wash., July 22-25, with practice day on the 21st. The program will consist of ten 15-target events each day, \$1.50 entrance; \$1 for money-back system.

**SPECIALS.**

The Tribe's new departure last year in offering thirty special solid gold medals was so immediately popular that it was voted to repeat same this year. Only one medal will be awarded to any one contestant, so that in the end the thirty honor medals must go to thirty different contestants in the regular program.

The Chingren challenge trophy will be shot for on the fourth day of the meet, or sooner during tourney, if deemed advisable. Any other special events will also be contested on the fourth day, as will any portion of the program that, for any reason, may not be finished in the three days preceding.

The annual meeting of the Tribe will be held in the wigwam of the Raymond Gun Club at 8 P. M., July 23, and annual business meeting and election of officers and new members on the evening following.

The railroads will accord us the usual special rates, which is to say, one-third fare for return trip, if as many as fifty certificates are obtained by members and visitors on going trip. Almost every year many attendants overlook this item in purchasing tickets, thereby depriving themselves of the benefit in saving of fare, and there is also the danger that, by one's neglect of this important point, all may be deprived of the benefit of rates.

Make up your mind that you will be one of those in line with certificate for the secretary's signature. This rate applies from all points in the Northwest not less than 50 miles from the point of meeting.

Official headquarters at Raymond, Hotel Raymond. Further particulars as to local arrangements may be had from Stanley Bell, Raymond, Wash., or F. C. Riehl, Secretary, Forty-first and Baltimore streets, Tacoma, Wash.

**Plenty of Room in Dayton.**

WILMINGTON, Del., May 20.—*Editor Forest and Stream:* During the recent Southern Handicap at Montgomery, Ala., on the 13th-15th inst., there was a good deal of discussion as to the possibilities of the N. C. R. Gun Club, and of the City of Dayton, O., being able to provide in a suitable manner for the enjoyment and comfort of those who would attend the Grand American Handicap, which is to be held under the auspices of the N. C. R. Gun Club, June 17-20 next.

From what I have been told by Mr. Elmer E. Shaner, manager of our Association, and from what I have learned from others, there is no doubt whatever in my mind as to everything being in good running order by the time the first Grand American Handicap contestants put in their appearance at Dayton. The officials of the N. C. R. Gun Club and the individual members of the club, especially Messrs. W. F. Bippus, the vice-president, and W. F. MacCandless, its secretary, all seem to be imbued with the same "go-ahead-and-do-it" spirit, which President John H. Patterson, of the National Cash Register Company, of Dayton, proved so incontestably was the main feature of his make-up, by the way in which he took charge of and directed so much of the successful rescue work, when the terrible flood in the late spring threatened to wipe Dayton off the

map, and when the guiding hand of a born leader was so badly needed.

With such officials, therefore, at the head of the N. C. R. Gun Club, and in charge of all arrangements for the enjoyment and comfort of all its guests at the coming Grand American Handicap, and also, as stated above, with what I have learned about the situation of affairs at Dayton at the present time, I feel I can safely say to all the trapshooters of North America, that all those among their ranks who are thinking of attending the Grand American, will find everything quite to their liking, when Manager Shaner calls the first squad to the scene on practice day, June 16 next.

J. T. SKELLY,  
Pres. Interstate Association.

**Paleface G. C.**

MEDFORD, Mass., May 24.—There were only five entries to-day. The day's trophy went to Burns, with 95, and Newton second with one less. The scores: Burns 95, Newton 94, Sweet 88, Harvey 83, Kemp-ton 46.

# WINCHESTER

## Rifle and Revolver Cartridges

### At the Government Tests

### New High Record Established In Revolver Competition

THE following table gives the relative standing of the different makes of revolver ammunition tested by the Government at Sea Girt, and shows that Winchester revolver ammunition established a New High Record for such competitions. This record is so much superior to any previously made, that it cannot fail to convince anyone of the unapproached high quality of Winchester cartridges. Just note these figures carefully and draw your own conclusions:

	50 Yards, Mean Radius	75 Yards, Mean Radius	Mean of Means
Winchester,	1.101 inches	1.524 inches	1.313 inches
Western,	1.133 "	1.987 "	1.560 "
United States,	1.195 "	2.155 "	1.675 "
U. M. C.,	1.408 "	2.407 "	1.909 "
Frankford Arsenal,	1.576 "	2.746 "	2.161 "

### RIFLE MATCHES

	300 Metres, Mean Radius
Winchester,	1.761 inches
United States,	1.895 "
U. M. C.,	2.554 "
Frankford Arsenal,	2.978 "

The result of this competition shows that Winchester Revolver and Rifle cartridges are the most accurate made. You will remember that Winchester cartridges are the only ones that ever won the Government Tests two years in succession. All Winchester cartridges, of whatever caliber, such as you will find on sale at all dealers, are made after exactly the same manner as those that have recently won the Government Tests. For consistent scores, use Winchester cartridges,

# THE W BRAND

**Scranton R. and G. C.**

SCRANTON, Pa., May 22.—A fair crowd looked over the situation here to-day, with W. R. Dawes most successful breakist. He took top gun with 133, with three ties for place on 130. J. Mowell Hawkins added one more to his string of high pro kidnappings with 146. M. F. Bohn cashiered.

## Newmanstown (Pa.) Gun Club.

THE seventh annual registered tournament of the Newmanstown Gun Club on May 24 was a great success, considering the threatening weather. High professional honors were won by J. M. Hawkins with 102 out of 105. Darkness set in on the professionals and they did not shoot the full program, making way for the amateur guns. Hawkins had a run of 59 straight. Neaf Apgar finished second with 101 to his credit, and had an unfinished run of 56 to honor him. Sked and Hassam tied on 97 for third. Lloyd R. Lewis was managing the shoot, but was taken sick and was succeeded by A. A. Fink, of Reading.

Forty gunners faced the traps. High amateur was A. J. Mengel, the Mohinton, Pa., crack, with 144. Mengel has won many a match in numerous competitions throughout the State. W. E. Daub, of Minnesota, another gamester, won second with one target less than Mengel. H. E. Buckwalter and E. H. Adams, of Reading, divided third with 142.

Bucky kept them guessing to-day. Ed. showed them that he was still in form, even if he didn't compete at the recent state shoot. Mengel had a run of 58, and Daub one of 56 straight. Adams one of 42 and Behm one of 41; Heil one of 46. Shoop, of Harrisburg, shot a very creditable race, with 138.

John L. Englert, of Catawauqua, must have had a whole rooster to-day when he smashed 139. "Very honorable, John."

John G. Martin, present State champion wing shot of Harrisburg, Pa., went below his average to-day. Last week he honored in every team race in at the State shoot. Oh, those dark days, John.

C. H. Newcomb could not reach the topnotch to-day. "Some flies on my gun to-day, boys."

R. J. Budd, the Lykens crack shot, landed 133, a little

lower than usual. E. T. Sobers, the heavy-weight of Bethlehem, of the "Dandelion Garden" of the East, landed 115, showing the boys he is still with them. H. P. Stapleton, who was laid down for four weeks with typhoid fever, shot well with 114 to his credit. Ambrose Mayer, the oldest contestant on the grounds, shot well. C. E. Seidel, of Marysville, was out of form to-day, and fell down to 120. Anderson, Bucky, Ziegler, Weinert and Yingst, the Royersford squad, showed some excellent form. Bucky shot straight in four events. John C. Bitterling, of Allentown, showed some marksmanship to-day. He never dropped below 12 to-day in any event. Good for John. He touched them all.

A. S. Heil, the amateur double champion of the United States, was some shy to-day, dropping down to 138 out of his quota. It's a shame, Al. I wonder what Louis will say.

Billy Werth, the Lebanon crack shot, was out of the game for some time, but showed the boys that he can still break them. Melchior, the South End Gun Club coacher, could not land among the topnotchers to-day, but kept up his usual cheery stories to the boys. E. H. Adams shot straight in four events, and four events with 14, which is very commendable. W. S. Behm, of Esterly, also shot straight in four events, but had 2 drops to 11. Too bad, Walter.

Buster fell some shy, too. Young, of the Indianapolis Gun Club, shot some form to-day. J. J. Marberger, the present county amateur champion, went down, down to-day. His gun is at the factory, and he used a strange one to-day, which accounts for his low average. Watch the coming events, when he gets it back, boys. Something doing them.

A. K. Ludwig, of the Hercules, could not get off from the P. O. Department to-day, and his chums missed him.

Much credit is due to Secretary F. S. Rader for the success of the tournament, who worked hard for the

last three months to make it a success. Marberger, Behm and Eck expect to compete at the Delaware State shoot.

The fourth annual registered target shoot of the Royersford Gun Club will be held June 7, when quite a number of the Reading crack shots and boosters will figure. Buster says the bacon will come to Reading sure.

LUDDY.

## Mount Morris G. C.

MOUNT MORRIS, Ill., May 23.—Inclosed find scores made at our registered tournament, held yesterday, which was a decided success, even if the attendance was not as large as it would have been had the weather been more favorable. Many contestants were unable to come from neighboring cities on account of the roads being impassable for autos.

Thirty-five amateurs and seven professionals shot the entire program, after which twenty entered for the special conducted under the Jack Rabbit system. Many excellent scores were made, and all contestants were well pleased with their average.

The originators and the promoters of the Interstate Association have well earned the highest compliments from all amateurs for that which they have done in modern trapshooting by assisting the country clubs.

## New Jersey State Tournament.

THE New Jersey State Sportsmen's Association will hold its tenth annual tournament on the grounds of the Riverside Gun Club, Red Bank, N. J., on June 5, 6 and 7. Red Bank is situated on the North Shrewsbury River, with an extensive shore line along that stream lined with beautifully laid out grounds surrounding fine country homes, the greater part of them occupied by their owners throughout the entire year.

The transportation facilities of Red Bank are of the very best. The express running time to and from New York by the New Jersey Central and Pennsylvania railroads is less than one hour, daily trips are made to and from the metropolis by a line of fine steamboats operated by the Merchant Transportation Company. Trolley lines to all nearby towns and coast resorts afford every convenience for local travel. Red Bank has a permanent population of about 8000. The Riverside Gun Club is located on Shrewsbury avenue, on a slight rise, and directly along the line of the Red Bank and Long Branch trolleys, being only a few miles from the once famous Elkwood Park, which was the scene of the Interstate Association's Grand American Handicap at live birds in 1898.

Attractive features of the club are the perfect sky background and the rolling green country beyond. The equipment consists of three western automatic traps.

Neither time or expense has been spared by the committee in charge of the tournament to make it a success, both from the shooter's standpoint and that of the State Association. The indications are that there will be a larger attendance than ever before in the history of the New Jersey State Sportsmen's Association.

For programs of the tournament and other information, address A. L. Ivins, president, 42 Broad street, Red Bank, N. J.

Du Pont Gun Club.

WILMINGTON, Del., May 24.—As usual, to-day some surprises emanated from Du Pont Gun Club, the most interesting being a new ground record made by W. S. Colfax, Jr., who ran 152 straight, and broke 198 out of 200—cussed be the two that slipped through the shot.

Some other shooters, in fact, most of 'em, were spurred by the good example and broke ground (dried clay) recklessly. Clyde Leedom, true to his name, led 'em at 100 discs with 94, seconded by Stanley Touchton with 91. In the fifties some good eyes were present, L. L. Jarrell breaking 48. C. T. Martin 47. At 25, H. P. Carlon ran straight, and W. J. Highfield and Dr. A. Patterson got 24.

E. R. Jenkins and H. T. Reed tied at 21 in Class C, and W. W. Robelen and D. R. Rutter tied at 18 in Class D. In Class E, T. W. Baker made a score of 15 out of 25. The scores follow:

Table with 2 columns: Name and Score. Lists names like S. J. Newman, E. M. Ross, H. W. Bush, etc., with their respective scores.

The results in the E. E. du Pont team trophy contest were:

Table with 2 columns: Name and Score. Lists names like E. M. Ross, J. H. Minnick, Highfield, etc., with their respective scores.

Alert G. C.

PHILLIPSBURG, N. J., May 17.—The thirteenth annual tournament was held to-day, bringing out one of the largest crowds that ever attended a shoot in this locality. In all, there were forty-four shooters, forty-one finishing entire program. The total number of targets thrown during the day, including practice events, was about 8,500. Despite unfavorable weather conditions, high scores were in evidence. H. H. Stevens was high for wads-only with 144, followed by Appgar with 143, missing two in the last 135 shot at, and getting 99 out of his last 100.

In the amateur class, Housman and Dr. F. W. Matthews tied for first place with 142 breaks, and in the shoot-off for first place and Du Pont trophy, Housman made 25 straight, while Matthews broke 21. This gave Housman 99 breaks out of his last 100, the ground record. Second high went to E. L. Wilson, of Frenchtown, with 140, followed by Englert with 138, and Schlicher and Keiper and Maurer, each with 137.

Table with 2 columns: Name and Score. Lists names like H. Schlicher, F. Ziegler, J. L. Englert, etc., with their respective scores.

EDWARD F. MARKLEY, Mgr.

Shoot at Waukesha Beach.

WAUKESHA, Wis., May 18.—Following is the result of the regular shoot of the Spring City Gun Club, held at Waukesha Beach, May 18:

In the shoot-off between Williams and Greb for a win on the Toll trophy for May 11, Williams won. Muckelstone and Knight tied for a win to-day on the same trophy and will shoot off for the same on May 25. Wm. Wegner, an old friend of the boys, was a welcome visitor to-day.

Table with 4 columns: Name, Shot at, Broke, Name, Shot at, Broke. Lists names like Muckelstone, Frizz, Knight, Wolf, Kimball, Wegner, Greb, Williams, and H. E. White, Sec'y.

The Reliability and Regularity of

Smokeless Powders

Demonstrated by Long Runs Made by Shooters

ACTIONS speak louder than words—especially when referring to the performance of powders. To date the following Long Runs have been made by shooters using Du Pont Powders:

Table with 5 columns: Name and Address, Date, Location, Run, Powder. Lists names like W. H. Heer, Guthrie, O'Fallon, etc., with their long run details.

\*Denotes Extra Bars won since Trophy was awarded. ALL STRAIGHT RUNS.

LEADERS IN CONTEST FOR VALUABLE PRIZES

Amateur: W. H. Jones leads in number of Long Runs made to date. Three gold watches will be given to the three Amateurs winning the greatest number of Long Run Trophy Bars.

Professional: W. R. Crosby leads in number of Long Runs made to date. Fifty dollars in gold or trophy of equal value will be given to the Professional winning the greatest number of Long Run Trophy Bars.

For full particulars regarding Long Run Trophies and Other Prizes, address Department 3.

FULL SIZE

Salem G. C.

CLAYTON, O., May 20.—With 133, F. C. Koch kopped the kale at our registered tournament, tying Rolla Heikes, second, for-joy-only shooter. F. M. Edwards with 132 was second, with C. D. Coburn third on 128. Snuff Taylor was upper pro. with 143. Scores:

Table with 2 columns: Name and Score. Lists names like J. R. Taylor, R. O. Heikes, F. C. Koch, etc., with their respective scores.

The New Columbus Gun Club.

COLUMBUS, Ohio, May 24.—It was quite cool and windy this afternoon. The Stephens trophy race of 25 targets found Mr. Snook the high man with 25 straight, which was a very neat performance. Mr. Snook is practically one of our new shooters, having had very little practice with the shotgun. He has, however, done very creditable shooting with rifle and pistol, winning some splendid trophies, and his work here to-day proclaims that he is an all-round good shot.

Wm. Webster broke 23 in the Stephens trophy, and Mr. Camp 23 and Mr. Drake 22.

The Du Pont trophy race resulted in Webster breaking 23, which was high; Snook 21, Camp 22, Drake 20 and Weinman 22. Six practice events were shot, and for the wind, good scores were made.

Nearly every mail brings another inquiry about the "Twentieth Century Limited" shoot on Aug. 14 and 15. Railroad fare from all points in Ohio, round trip, are paid by the club, including shells free of charge, and all contestants from other States railroad fare, round trip, paid from State line points. Write for a program. This will be a novelty shoot, and one of the best of the season. FRED SHATTUCK.

PARKER GUNS BUILT TO ORDER

THE manufacturers of the "OLD RELIABLE" PARKER GUN wish to announce that the present is a particularly opportune time to place orders for guns built to individual requirements, a feature of the gunmaking business to which they have paid particular attention.

Parker Bros. are prepared to supply guns in all gauges from 8 to 28 bore, stocked to suit any purchaser's requirements, and bored to give any distribution of the shot required from cylinder to full choke.

PARKER GUNS REMAIN UNEXCELLED IN THEIR POWER OF HOLDING TOGETHER THE SHOT CHARGES UNDER HIGH VELOCITY AT EXTREME RANGES.

PARKER BROS. Meriden, Conn. N. Y. Salesrooms: 32 Warren St. A. W. duBray, Res. Agt., Box 102, San Francisco, Cal.

P. T. S. L. Averages.

AFTER smoke and wreckage had been cleared away, it was found by Secretary W. E. Robinson that W. S. Colfax, Jr., of the Du Pont Gun Club, had a percentage of 92 6-7, representing 325 broken targets out of 350 fired at in seven shoots, leading individual shot of the Philadelphia Trapshooters' League. Jesse C. Griffith, of the S. S. Whites Club, and Harry H. Sloan, of Meadow Spring, tied for second within a fraction of a point of the winner.

On the averages based on five shoots the three leaders were also very closely bunched, but Griffith nosed out Sloan and Colfax by a fraction of 4-5, he finished with 94 4-5 per cent., and Sloan and Colfax with an even 94. In this class C. H. Newcomb, S. S. Whites, and Harry Fisher, Clearview, tied for fourth and fifth trophies with 92 4-5 per cent.

The averages of all the gunmen who competed in five or seven shoots follow:

Table with columns for names and percentages. Includes Class A (e.g., Colfax, D. P. 92 6-7) and Class B (e.g., Minnick, D. P. 86).

Table with columns for names and percentages. Includes Class C (e.g., Bush, D. P. 78) and Class D (e.g., Puff, Clearview 65 1-7).

Table with columns for names and percentages. Includes Class A (e.g., Griffith, S. S. W. 94 4-5) and Class B (e.g., Sloan, M. S. 94).

Table with columns for names and percentages. Includes Class A (e.g., Griffith, S. S. W. 94 4-5) and Class B (e.g., Sloan, M. S. 94).

Table with columns for names and percentages. Includes Metz, Lansdale 80 3-5; Severn, S. S. W. 89 1-5; Torpey, M. S. 89 1-5; Tansey, High 89 1-5; McCarty, High 89 1-5; Richardson, D. P. 88 2-5; Robertson, D. P. 88 2-5.

Table with columns for names and percentages. Includes Class B (e.g., Rodgers, Lansdale 86) and Class C (e.g., Soley, M. S. 78).

Charleston G. C.

Table with columns for names and percentages. Includes Charleston, W. Va., May 17.—The scores made at the weekly shoot of the Charleston Gun Club follow: Fultz 92; Crider 84; Geshorn 87; Nicholson (50) 43; Davis 86; J. A. de Gruyter, Sec'y.

Inter-City Team Race.

THE second match in the series between Dayton, Cincinnati and Springfield, was shot May 24 on the N. C. R. Gun Club's grounds at Dayton. These grounds, which will be the scene of the G. A. H. next month, are rapidly being put in shape. The five traps are in place, and all traces of the damage done by the flood will be obliterated before the banner Grand American starts.

Each city had its full quota, fifteen shooters, entered, and including those who took part in the practice events, about sixty shooters were present. The race was much closer than in the first contest, only 5 targets separating the first and last teams. The scores made were also a big improvement, Dayton gaining 30, Springfield 23 and Cincinnati 9 targets. The close of the first round found Springfield leading, 4 targets over Dayton and 3 over Cincinnati, but in the second round Dayton took the lead and maintained that position to the finish, going out in first place with 3 targets the best of Cincinnati and 5 targets ahead of Springfield. High individual scores were made by R. O. Heikes and J. H. Pumphrey, of the winning team, 96 each. C. A. Young, of Springfield, was second with 95. R. L. Trimble was high man on the Queen City team with 90. The Cincinnati team is in the lead in the series with a total score of 1709; Dayton 1694, and Springfield 1690. The last match of the series will be shot at Springfield, but the date has not been decided upon. Weather conditions were good. The match was started about 3 P. M., and was run off over the five traps with no delays.

The executive committee of the club having in charge the preparations for the G. A. H. consists of R. O. Heikes, W. F. Bippus, J. M. Markham, H. L. Monbeck, S. W. Everett, R. R. Dickey, F. H. Rike, and W. F. MacCandless, all hustlers and hard workers.

Among the visitors were Chief Hoochee Cochee, Chief Bald Eagle, and Chief White Scalp, of the Indians. Chief Buckley was also in the city on his way home from the Kentucky State shoot, and conferred with his brother braves on matters relating to the tournament to be given at Cedar Point, O., on July 8-10.

MacCandless never got a chance to get on the firing line, his duties in the office kept him busy, and he never neglects duty for pleasure. As usual at a shoot, Squier's services were in demand, and he once again proved his mastery of details. His help was appreciated. Scores:

Table with columns for names and scores. Includes A Gambell 77, H S Monbeck 77, H W Heikes 92, O R Dickey 70, Holaday 88, R O Heikes 96, E Cain 85, A H Sunderbruch 87, V A Hubler 86, H N Smith 82, C A Winkler 74, C Rybolt 83, E B Barker 85, C A Young 95, G H Hessler 84, C Butz 82, H C Downey 85, A B Shobe 86, D W Gilbert 80, E Hammerschmidt 89, A Sander 77, B Downs 68, A Hill 76, F C Koch 82, F H Oswald 81, R F Davies 86, C Hayes 81, A Foley 88, C C Cox 68, R F Folkert 77, W R Randall 85, R McGregor 73, C D Coburn 88, L J Squier 81, H R Irwin 82, C Ludman 87, J H Pumphrey 96, J M Markham 76, F De Witt 67, F Bagenhart 90, Wm Pool 65, W F Bippus 81, W G Sander 81, R L Trimble 98, C Henderson 81.

Jersey City Gun Club.

JERSEY CITY, N. J., May 24.—The disagreeable weather kept the crowd small to-day, as it was raining part of the time, and when not raining, it was so dark one could hardly see the birds. Geo. Piercy was high gun again to-day with an average of 84 per cent., and R. S. Kearney was second with 80 per cent. Kearney also scored the only straight, the same being the first scored by him since being a member. This shows that he means to make the rest of us hustle to keep in his class. The scores follow:

Table with columns for names and scores. Includes Targets (e.g., Dixon 25) and names like Pinkerton, Dr Ittner, Piercy, Engle, Haas, Boothroyd, Harvey, Fearney, Summerfield, Jones, Brown.

On May 31 the club will put up the usual take-home trophies to be awarded the two highest scores of members counting added bird handicap.

SECRETARY.

Central Pennsylvania Trapshooters' League.

ALTOONA, Pa., May 22.—The Central Pennsylvania Trapshooters' League held its initial shoot of the season at the Altoona Driving Park yesterday, and it was the biggest tourney ever held in this section of the State, with the exception of the international shoot held at Wopsonnock some years ago.

In the team shooting for the league trophy, the Lewistown team, composed of Charles Steinbach, Roy Walker, C. J. Singer, W. Letterman, J. J. Slatterbach, finished first with a total of 602, and were credited with 3 points.

The Altoona shooters were a trifle handicapped in the day's sport, and that their showing was not better is due to the fact that they were the busy entertainers of the league shoot.

Table with 2 columns: Name and Score. Includes Wm McClarren 112, W P Thompson 84, M M Fraley 99, J D Keiper 113, R Scanlin 100, L A Bosserman 20, A M Bennett 125, J Peach 111, W H Smith 99, W C Smith 61, J J Slatterbach 108, W E Varner 103, R Herr 101, R Curray 108, C Biglow 67, J Richards 67, W Riggs 109, L J Elkins 103, W Trainor 100, C R Pilkington 45, W C Shaffer 103, E E Goss 105, A F Baker 56, F Ebricht 111, W T Edmunson 126, Ed Hellger 139, J Chilcoat 101, F Metz 118, L Medler 84, H E Tomlinson 108, J Stockmiller 100, E R Springer 82, Ed Empfield 67, W D Gates 74, G Sherry 71.

Mt. Kisco G. C.

MOUNT KISCO, N. Y., May 21.—The invitation shoot of the Mt. Kisco G. C. was held to-day. The weather was somewhat unfavorable, which prevented a large attendance, although twenty-five shooters faced the traps.

Three ladies were at the score and each showed remarkably fine shooting. Miss Thorp broke 74 out of 100, Miss L. M. Boles 52 and Mrs. Rodgers 50.

In the 50-target open merchandise event, Rodgers was first, A. Betti second and M. R. Guggenheim third. In the 50 target, added bird handicap, Chas. H. Banks was first, Von Lengerke second and Shannon third.

Table with 2 columns: Name and Score. Includes Miss J Thorp 36, W Thorp 33, Von Lengerke 42, M R Guggenheim 46, A Betti 46, L C Remsen 45, Miss L M Boles 27, T B Smith 42, T F Rogers 48, E E Wood 27, Mrs. Rogers 19, H E Meeker 32, L W Meeker 39, W Huff 45, L M Gerard 40, T A Davis 20, I H Finch 44, Shannon 36, G E Sutton 36, F H Miller 40, Coughlin 38, C H Banks 27, H H Parks 41, A Cornell 37.

Table with 2 columns: Name and Score. Includes Miss J Thorp 14, W Thorp 17, Von Lengerke 8, M R Guggenheim 4, A Betti 4, L C Remsen 5, Miss L. M. Boles 23, T B Smith 8, T F Rogers 2, F E Wood 23, Mrs. Rodgers 31, H E Meeker 18, L W Meeker 11, W Huff 47, L M Gerard 30, T A Davis 8, I H Finch 6, Shannon 14, G E Sutton 14, G H Miller 10, C H Banks 13, H H Parks 9, A Cornell 23, Gregory 0.

Fresno Blue Rock Club.

FRESNO, Cal., May 19.—There were 14,272 targets pulled at the two-day tournament just ended here. D. C. Davidson won the handicap from 18yds. mark with 96 out of 100, A. P. Halibarton, from 17yds., broke 93 for second, followed by Geo. B. Smith on 16yds. line with 92.

Table with 3 columns: Name, 1st Day, Handicap. Includes Dick Reed 191, D Ostendorf 192, A P Haliburton 175, C B Jackson 180, D J Kuhstaller 176, O N Ford 190, Ray Hogg 178, I W Trout 180, R H Bungay 187, V Fuller 179, Fred Willett 190, Hy Garrison 183, T D Riley 161, W J Eilert 177, Jack Clark 173, W A Simonton 165, C A Haight 170, L S Hawkhurst 180, J Chamberlin 175, E B Van Arman 153, W J Higgins 148, Geo B Smith 162, F Hoelle 185, A S Tong 143, H Thompson 174, H W Ogilvie 92, G A Adams 80, F L Gibson 84, Guy Lovelace 78, G H Stone 84, D C Davison 86.

Freeport G. C.

FREEPORT, Ill., May 15.—Scores were received so late that we print only a brief story. Forty-two entrants registered, thirty-seven amateurs and five professionals. Graper was top gun with 143. The scores, 16yds., 150 targets each:

Table with 2 columns: Name and Score. Includes J B Rudy 115, C J Price 131, C W Hymer 128, Ward Burton 131, Murray Ballou, Jr. 126, W B Stannard 140, C P Shumway 137, H W Cadwallader 141, F A Graper 143, B B Postle 121, J D Pollard 90, Al Lamm 130, R G Weir 109, M E Norton 108, Joe M Brown 53, J M Carey 91, H F Jensen 103, Roy Daws 95, R B Rosenstiel 121, P M Breyer 97, J N Rice 116, W L Karcher 113, E Trickle 122, W Santee 92, Frank Gender 122, Art Steffen 96, C B Helm 135, G W Smith 115, Fred Timoney 107, Alex Vance 132, O J Olson 119, Al Luecke 82, Albert Southard 133, Eugene Anderson 131, H C Loechel 137.

Seven contestants were unable to arrive in time to shoot the entire program and consequently only shot in the last three events. The following are the scores at 45 targets:

Table with 2 columns: Name and Score. Includes H J Vierke 32, C E Plum 30, L C Freeman 27, W M Andrews 29, Henry Scharman 27, Joe Reeh 34, O F May 28.

In the professional shoots in the morning, H. W. Cadwallader was high gun, with 141, and W. D. Stannard second with 140.

Following are the scores of the Eglin-Freeport team shoot, 25 targets per man at 16yds. mark:

Table with 2 columns: Name and Score. Includes Vierke 19, Plumb 18, Freeman 13, Andrews 17, Reeh 15-82, Lamm 23, Karcher 22, Rosenstiel 18, Weir 16, Norton 15-94.

Platteville G. C.

PLATTEVILLE, Wis., May 18.—Enclosed find scores of to-day's shoot. A very strong side wind made it quite difficult to judge the targets, in spite of which we had some fair scores. Each man shot at 50 targets: B. H. Doescher 48, Ed. Bellmeyer 46, C. H. Burg, 44, C. E. Gilmore 42, Emery Bellmeyer 33, Tom Bridges 37.

I am mailing you a photo of our club house, showing a deer six of us got last fall. Our house is located on the grounds owned by the Du Pont Powder Co., who extend to us unlimited courtesy. No more picturesque grounds are to be found anywhere.

We extend to all clubs a hearty welcome to our nature's retreat on the date of our tournament, June 12. C. E. GILMORE, Sec'y.

A SINGLE TRIGGER Lefever Gun

in the hands of L. H. REID, Seattle broke 2115 x 2200 = 96.14% with ordinary factory loaded shells purchased from local dealers.

Mr. Reid, shooting at Interstate Association Registered Tournaments throughout the 1912 season, has the high average for the Pacific Coast.

The loads were regular factory loads; the LEFEVER bore, famous for the even pattern and penetration, assisted MR. REID to make this record.

Why don't you shoot a LEFEVER Single Trigger this year?

**Detroit Pastime G. C.**

DETROIT, Mich., May 24.—On the entire day's events of 100 targets, at the last regular club shoot, Mrs. Vogle was high with 93 per cent. She also won the 25-bird shoot in the first division with 24, and tied in the trophy event with four other members with a 15 straight. Conely won the second division with 24. Bromley the third with 21 out of 25 targets.

There will be quite an aggregation at the G. A. H. from here. The summary:

CAPTAIN.

**Cleveland Gun Club.**

CLEVELAND, O., May 25.—Regular weekly shoot of the Cleveland Gun Club, held yesterday, was some meeting, twenty-four shooters taking part. The day was known at the club as Wallace Day, as the same being our manager's sixty-third birthday, the boys turned out to give him a royal welcome. Mr. Wallace has been a member and an officer of the Cleveland Gun Club for thirty-three years, and is known as the father of the club, he having organized it June 10, 1880, in the days when glass balls were the targets. For thirty-one years he has been the club's financial secretary, and for the last ten years has held the office of both financial secretary and manager. He is a lover of the game. The gun has been his hobby from a boy, and when he is not shooting he is like a boat without a rudder.

The weather conditions were fine for the sport, but before the day's shooting was over, President A. J. Stevens, in behalf of some of the members of the club, took Manager Wallace and his good wife into camp and presented them with a beautiful flat sterling silver table set of twenty-four pieces. The gift was such a surprise to the manager, that his heart filled up with so many good words that he wanted to say that he could not say any of them; but after the storm was over he thanked his friends for Mrs. Wallace and himself for the beautiful gift, and said he was glad to know that they would have the pleasure of having the silver spoon in their last years of life, as many have had it in their first days.

A nice lunch was served by the manager and his wife, of which all partook, and put the good things away. The high gun of the day was C. E. Doolittle, with a score of 95 out of 100 in the first two events. State, of Akron, O., got in on this shoot with a score of 90.

Sheldon was just one bird to the bad of State, but Sheldon said he did not care for one bird. Scores:

Event No. 1, semi-annual trophy, 50 targets, 16vds.: Doolittle 47, Hogen 47, Jones 47, Genner 45, Newcomb 45, Noble 45, State 44, Dibble 44, Archer 43, Sheldon 42, Judd 42, Tobey 42, Scott 44, Payne 43, Stepp 41, Hopkins 41, Rogers 40, Stone 40, Hartman 40, Riley 39, Brown 38, Stevens 37, Freeman 37, Thorp 36.

Event No. 2, annual trophy, 50 targets: Doolittle 48, Archer 46, State 45, Sheldon 44, Stepp 44, Rogers 44, Jones 44, Scott 44, Payne 43, Genner 43, Dibble 42, Stone 42, Hogen 41, Noble 41, Tobey 40, Riley 39, Freeman 39, Hopkins 36, Brown 36, Thorp 33, Hartman 32, Jackson 31, Steen 30.

Event No. 3, 25 targets, added target handicap: Rogers (2) 25, Tobey (2) 25, Jones (3) 25, Noble (8) 25, Doolittle (0) 24, Hogen (0) 24, Stepp (2) 24, Genner (2) 24, Stone (0) 24, Sheldon (3) 23, State (3) 23, Archer (0) 23, Hartman (6) 23, Brown (2) 23, Thorp (1) 22, Hopkins (5) 22, Freeman (0) 21, Dibble (0) 21, Stevens (5) 20, Scott (0) 20, Payne (0) 20.

Event No. 4, 25 targets, added target handicap: Doolittle (0) 25, Sheldon (3) 25, State (2) 25, Hogen (0) 25, Payne (1) 25, Stipp (1) 24, Stone (0) 24, Noble (0) 24, Stevens (5) 23, Genner (1) 23, Hartman (6) 23, Brown (2) 23, Freeman (2) 22, Dibble (2) 21, Newcomb (0) 21, Thorp (2) 21, Jones (1) 20, Scott (0) 20, Tobey (0) 15, Cramer (0) 15.

GEO. P. FREEMAN, Capt.

**Frontier Rod and Gun Club.**

BUFFALO, N. Y., May 26.—Ideal weather favored a small attendance of gunners at the Frontier's regular shoot. Leonard and Barrett, visitors, tied for high with 81 per cent., followed by Eichberg with 80. Scores:

Targets:	10	15	25	25	25
Leonson .....	10	13	21	19	14

Patterson .....	5	7	15	20	13

Point winners.—Event No. 3, cup race: Class A, Wakefield, 19; Class B, H. Utz, 18; Class C, Squelch, 16. Event 4, handicap: Eichberg (22) 22, Squelch (22) 19. H. C. Utz, Sec'y.

**Portland Gun Club.**

PORTLAND, Me., May 24.—A peculiar condition existed at the grounds of the Portland Gun Club to-day. A heavy fog bank lay just off shore, and owing to the mist the smoke hung low for a while, making it very difficult to find the birds. The shooters soon overcame this difficulty and made some fine scores. Cliff Randall was high gun with a total of 95, while George Blanchard was second with a score of 93, leading Steve Dimick by only one bird. Billy Hill, Pat Osborne and George Blanchard were the three men to turn in straight strings of 25 during the afternoon. An interesting contest was that between Geo. Darton and Pat Osborne, the former won by a margin of one bird.

DOWN EASTER.

**Chicago G. C.**

CHICAGO, Ill., May 18.—We were favored with a splendid day for our fourth annual five-man team and individual championship shoot, ninety-three shooters shooting the program, although over a hundred shooters were in attendance, many of them shooting in the practice and extra events.

Five sets of traps were working and nearly 20,000 targets were thrown. J. Kammermann, of Grant Park, Ill., carried off the high individual honors, and a beautiful silver urn on the splendid score of 98 out of 100.

The Lowell, Ind., team carried away the team championship, Kammermann, Burnham, Gragg, Surprise and Carsten each taking home a fine silver cup. The total score of the first team was 455, the Badger Gun Club, of Milwaukee, Wis., being a close second with 453. Chicago Gun Club came in for third place with 445.

Hammerschmidt, of Milwaukee, and Shaw, of Chicago, tied for second high individual. Young third with 95. Gregg, Dickerman and Silver each broke 94, quite a number of others breaking in the 90s.

The scores in the individual championship follow:

G McDermott .....	92	W Stump .....	83
F Dailey .....	91	John Eck .....	83
P J Graham .....	91	J H Amberg .....	79
C R Seelig .....	89	J A Taggart .....	78
U C Thomas .....	84	M Gelder .....	68
T Graham .....	84	J Lino .....	65
Geo Eck .....	84

## Importing German "Police" Dogs.

NINE German sheep dogs, the largest importation of trained police dogs, has been made by I. De Winter, of the Winterview Kennels, Guttenburg, N. J., last week. They were bought from various police departments throughout Germany. The collection includes six bitches and three dogs.

The best of the nine, in point of physique as well as training, is the black bitch Dina von Buron, which Mr. De Winter considers the best police dog yet brought into this country. He got her in the town of Kaufbeuren, where she had established a widespread reputation as a canine detective of unusual ability. Several American fanciers are said to have tried to purchase Diana last year, but she was then not for sale.

Mr. De Winter, who specializes in German and Belgian sheep dogs, intends to start his new collection at the police dog trials to be held at the Devon (Pa.) show on June 14. He has

## AMERICAN KENNEL CLUB STUD BOOK

1 Liberty Street . . . . New York

### THE NEW STUD BOOK

The Stud Book for 1912 has been published and is on sale in this office, in its new form. Beside the regular volume, containing all breeds, it has five Sections separated in Breeds, as follows:

Section I.—Beagles, Bloodhounds, Chesapeake, Deerhounds, Foxhounds, Greyhounds, Griffons (Sporting), Pointers, Retrievers, Setters, Spaniels, Whippets, Wolfhounds, also Great Danes and Dachshunde to balance the sections.

Section II.—Bulldogs, Chow Chows, Dalmatians, French Bulldogs, Mastiffs, Pinschers, Poodles, St. Bernards, and all the Toy dogs.

Section III.—Collies and Sheepdogs.

Section IV.—Airedales, Bedlington, Manchester, Bullterriers, Dandie Dinmonts, Foxterriers, Irish Terriers, Scottish Terriers, Sealyham Terriers, West Highland White, and Welsh Terriers.

Section V.—Boston Terriers.

The sections are \$1 each, and the regular volume \$5.

been a big winner with sheep dogs, his Herta von Herregrund having "cleaned up" at the Westminster show.

These dogs were on duty from 6 o'clock in the evening until six in the morning. They are absolutely fearless of firearms and are great followers of a trail. Most of them are able to make a standing high jump of at least eight feet, can trip a man with remarkable ease and once they get a hold cannot be shaken off unless killed or ordered to let go by their masters.

## Kennel Notes.

THE following additional specials are to be offered at the Wissahickon (Pa.) Kennel Club show: The Western Airedale Terrier Club offers the challenge gold medal for the best Airedale terrier owned by a member. Each win will score the number of points at which the show is rated and medal will become the property of competitor scoring the greatest number of points with the same dog during the year 1913.

GEORGE GOULD recently shipped a team of his shooting dogs to England for this fall's shooting. They will be obliged to comply with the ninety day quarantine law, which is the cause of their early shipment. The team comprises four retrievers, including the noted Furlough Bruce, a trio of pointers and two English setters brought up from Furlough Lodge, North Carolina.

VIX BLARNEY, an Irish setter bitch, owned by E. M. Burrowes, was adjudged the champion of the show, held by the recently organized Tioga Kennel Club in Philadelphia.

THE American Kennel Club's new rule regarding points in the Middle West, now is in effect. The revised ratings hold good for the territory between the westerly boundaries of Montana, Wyoming, Colorado and New Mexico and the easterly lines of Louisiana, Arkansas, Missouri, Iowa and Minnesota. Dog shows in that district will be rated as follows: Five hundred dogs or more, five points; 400 dogs, four points; 300 dogs, three points; 200 dogs, two points, and less than 200, one point.

## THE COCKER SPANIEL.

Continued from page 689.

"As soon as the dog found me at his side, he barked, and giving a spring down, dashed at the tiger. What happened for some moments I really cannot say. The same surprise and danger which suddenly affected me banished at once that presence of mind which many boast to possess on all emergencies. I frankly confess that my senses were clouded and that the tiger might have devoured me without me knowing a word of the matter. However, as soon as my fright had subsided I began, like a person waking from a dream, to look about, and saw the tiger cantering away at about 150 yards distance with his tail erect, and followed by Paris, who kept bark-

THOSE who read FOREST AND STREAM are responsible people. You can get their business by having your advertisement before them.

ing, but when the tiger arrived at the thick cover he disappeared.

"I had begun to compose a requiem for my poor dog as I saw him chasing the tiger, which I expected every moment would turn about and let Paris know that he had fought a tartar. Though Paris had certainly brought me to the gate of destruction, yet he had certainly saved me. I felt myself indebted to him for preservation, and consequently was not a little pleased to see him return safe."

After reading this account one is almost inclined to believe the claim sometimes advanced by the cocker's admirers that his courage is equal to that of the bulldog. At least, there seems to be no question that this claim would be a trifle too modest in India, if not in other countries. The bulldog is said to become a veritable poltroon under the influence of the enervating climate of the land of the Hindoos, as indeed is the case with nearly every other breed of dog.

But if his valiant courage would indicate that he is totally lacking in discretion, it leads to an entirely erroneous conclusion as anyone who has used him as a field dog can testify. He is, on the contrary, one of the most tractable and easily trained of dogs, and responds more readily to instructions than almost any other breed of the hunting dog. That this fact has been recognized by the hunting fraternity is evidenced in that cocker spaniels are frequently employed in conjunction with setters and pointers and trained to stay at heel, while a larger dog is pointing the game. As a field companion the cocker possesses qualities that make him a constant source of interest and amusement to the man who has an eye for noting the individual qualities of the dog and is fond of studying animals purely for the enjoyment he can derive from watching their eccentricities. And after all this is one of the principal enjoyments most men have in owning a dog of any breed, whether they use it in the field or merely as a house pet, or as a playmate for their children. The light-hearted plucky little cocker tramps joyfully through its task no matter where it may lead him, or what the nature of it may be, and even though the huntsman be unsuccessful in his day's search for game, he may, if he is possessed of ears that hear, and eyes that see, learn a lesson from his tireless energy and unremitting perseverance in the face of apparent defeat that will enhance his knowledge of practical philosophy more than the perusal of many volumes of essays from the pens of sages past and present.

It seems almost superfluous to dwell on the cocker's qualities as a house dog and family pet. His precociousness in learning to perform tricks, and his faculty of making himself generally agreeable, are known to all who are in any way familiar with the dog. Indeed, the spaniel family has for generations been famous as a pet, and the cocker possesses the attributes that have tended toward giving this species of dog a world wide reputation in this regard.

Long ago, the King Charles spaniel, which although belonging to the toy spaniel variety is undoubtedly descended from the same stock as all other breeds of spaniels, was being pampered by the monarch whose name it bears. The affectionate disposition of the dog caused it to become a great favorite with ladies of fashion. In this connection Dr. Caius, Queen Elizabeth's

physician, writes as follows: "These dogges are little, pretty, proper and fyne, and sought for to satisfie the delicatenesse of daintie dames and wanton women's will, instruments of folly for them to play and dally withall, to tryfle away the treasure of time, to withdraw their mindes from their commendable excersises. These puppies the smaller they be, the more pleasure they provoke as more meet playfellows for mincing mistresses to beare in their bosoms, to keepe company withall in their chambers, to soccour with sleepe in bed, and nourish with meate at board, to lie in their lappes, and lick their lippes as they ride in their waggons, and good reason it should be so, for coarseness with fynesse hath no fellowship, but featenesse with neatnesse hath neighborhood enough."

That the robust little cocker could never degenerate into such a useless member of the canine community as to call forth such a description as this goes without saying, but it is nevertheless an encouraging sign that the men who have the welfare of the breed at heart are seriously considering holding field trials for the purpose of restoring him to his former popularity as a hunting dog, an occupation which he has conclusively proven his ability to fill with the highest honors.

### TRAPSHOOTING NOTES.

#### Indianapolis Gun Club.

At the weekly target shoot of the Indianapolis Gun Club, Heer, a professional, was high man with only 2 misses. He was closely followed by his teammate, Heikes, who was 2 targets behind him. Dixon led the local gunners with a total of 98. Scores follow:

Shot at, Broke		Shot at, Broke	
*Vietmeyer	100 82	Moller	105 94
Lewis	75 60	Dixon	105 98
Neighbors	90 70	Loughlin	105 76

Parry	105 91	Hofer	105 74
Britton	90 73	Ott	30 17

\*Professionals.

May 22.—The Indianapolis Gun Club held its Twentieth Century Limited target tournament, and considering the dark, cold and windy day, which caused hard shooting conditions, good scores were made. Hillis and Jewett tied for high amateur with 135 each. On the shoot-off at 20 targets Hillis won, breaking 20 straight, closely followed by his opponent with 19.

Indiana, Ohio and Illinois were strongly represented. The tournament was a novelty, and drew out the largest crowd of target fans since 1906, when the Grand American Handicap was held on the same grounds.

Scores as follows:

Shot at, Broke		Shot at, Broke	
*Heer	150 146	Fairchild	150 109

#### The Indians' Tournament.

THE fourteenth annual tournament and pow-wow of the Indians will be held at Cedar Point, Sandusky, O., July 8, 9, 10, 1913. The tournament is registered by the Interstate Association and given under the Squier money-back system; \$900 in cash and trophies will be added.

July 7 will be practice day. There will be six 15-target and three 20-target events, total 150 targets, entrance, price of targets (2 cents) in each event; optional \$2 sweep in each event, money divided 50, 30 and 20 per cent. Shooting to commence at 1 P. M.

On July 8 there will be two special events at 25 targets each; entrance 50 cents and optional \$2 sweep in each, money divided 40, 30, 20 and 10 per cent. Winner in each event receives a pair of solid gold cuff buttons. Only one pair of buttons can be won by the same contestant, the second pair going to the next highest score.

Regular program, ten 15-target events, entrance \$1 in each, money divided Rose system, 5, 3, 2, 1. The extra \$1 for the money-back is included in the entrance. The Indians will add \$150 to the Squier money-back purse. Losses will be paid back at the end of the day, and surplus divided according to the Squier money-back system of division. Trophy for amateur making high score in the regular events at 150 targets; and also for the amateur long run for the day. Optional sweep on the day's regular program, 150 targets, \$3. Optional sweep on entire regular program events, 300 targets, \$5. Money in optionals divided high guns, three moneys for each ten entries, or fraction thereof. All ties for trophies to be shot off at 25 targets. This program will be repeated on the third day, July 10.

July 9 starts off with two special 25-target events, same conditions and trophies as on the first day. Event No. 3, Indian handicap, 100 targets, entrance \$7; \$200 added money; handicap 16 to 21yds. Event No. 4, Mallory Bros., cup, 50 targets, entrance \$3; handicap 16 to 23 yards.

The Indians will divide \$50 among the ten low guns, shooting through the regular and special events of the program, 450 targets; \$5.00 to each.

In addition to the trophies already mentioned there will be offered a trophy for high score on the entire program of the three days, 600 targets, open to Indians only.

Trophy for high general average on all 16yds. targets (450), open to all amateurs.

Trophy for high general average on all 16yds. targets (450), open to professionals only.

Amateurs will be permitted to shoot for "targets only," but will not be eligible to share in the Squier money-back nor in the surplus or average moneys, but may contest for the trophies.

For further information and programs, write to D. H. Eaton, Secretary, 318 East Fourth street, Cincinnati, Ohio.

#### Pillow G. C.

PILLOW, Pa., May 20.—With fine large weather and an equally large attendance, to-day's tournament was successful. B. Teats shot away up on the amateur bunch, showering fragments of 147 out of 150. W. E. Daub was second with 139. Budd and Sharp tied with 136 for third. J. Mowell Hawkins had the big displacement among the distinguished cruisers from Arms and Ammunition Bay with a draft of 145. Scores:

Geo Howell	137	Moeschlin	84
J W Schoffstall	134	Budd	136
B Teats	147	D W Reitz	110
*O S Sked	143	J G Hand	134
W E Daub	139	J A Scoffer	104
C J Witmer	131	T Everman	106
C Rubendal	122	H C Deibler	138
*W M Hammond	139	E E Dockey	83
J W Witmer	108	*G Hassam	131
*R L Klotz	93	Keller	132
*J M Hawkins	145	Hoffman	121
*L R Lewis	120	Shoop	135
Hartman	126	J Martin	136

#### Birmingham G. C.

BIRMINGHAM, Ala., May 24.—The weather was fine at the regular shoot of the Birmingham Gun Club to-day. But for some reason the scores are not as good as usual. H. C. Ryding managed to break 91 out of his 100, and Gentry Hillman 90, with C. J. Broyles in third place with 89. Quite a number of the shooters are beginners. Mr. Heckler, of Richmond, Va., will be located here and will be one of our regulars hereafter.

Scores made to-day follow:

Shot at, Broke		Shot at, Broke	
H C Ryding	100 91	Kidd	100 64
G Hillman	100 90	C J Barr	100 64
J C Broyles	100 89	Lee Moody	75 50
E M Cornwell	100 85	O Garl	50 45
R H Baugh	100 81	Heckler	50 43
Randolph	100 74	Oden	57 37
Dr Sellers	100 74	Long	75 29
Dick Leland	100 79	Rowe	50 21

#### New Hanover G. C.

WILMINGTON, N. C., May 23.—The wind was blowing harder to-day than it did on our regular Friday afternoon shoot, still some very good scores were made. We tackled our first doubles. While the scores were not so good, yet they might have been worse. The scores: Event at 50 singles: Penny 45, Underwood 44, Grant 42, Boylan 42, Dreher 37. At 12 doubles: Penny 14, Grant 16, Boylan 9, Dreher 16.

Boston A. A.

Boston, Mass., May 24.—Whittemore had it in his pocket to-day, right fresh from the port after quarter of a fine Lepus Curricularis emanating from the final resting place of the Pilgrim fathers.

The interest keeps up with the competition in the team shoot. To-day team No. 1 got away on top with 422, No. 3 second with 416. Team No. 3 still leads by one point the scores to date.

Table with 2 columns: Team No. 3 and Team No. 2. Lists names and scores for various team members.

Table with 2 columns: Team No. 1 and Team No. 4. Lists names and scores for various team members.

Table with 2 columns: Special 100-targets race for Adams trophies, handicap. Lists names and scores.

Table with 2 columns: Take-home trophy, handicap. Lists names and scores.

C. B. TUCKER, Capt.

Ossining G. C.

THE annual spring shoot of the Ossining Gun Club was held at the club grounds on May 14. Ideal weather conditions prevailed, bringing a fair number of out-of-town shooters.

A 100-target event (added birds handicap), including merchandise and Westchester county championship (a scratch event), comprised the program.

Table with 2 columns: Hdcp. Lists names and scores for various participants.

La Crosse G. C.

LA CROSSE, Wis.—Despite the high wind, some very good scores were made at the La Crosse Gun Club on May 18. Ten members of the Coon Valley Gun Club shot with the local gun club, and we hope that they will come again, as they are roval good fellows and mighty good shots.

Table with 2 columns: Events. Lists names and scores for various events.

Bon Air G. C.

PITTSBURGH, Pa., May 24.—There were just six of us to-day, but interest was keen. Stahl got away with 41 out of his 50 opportunities, copping the big shovel of kale.

Rifle Shooting

Interscholastic Rifle Shooting Championship of the United States For 1913.

ASTOR CUP MATCH.

THE fifth competition for the Astor cup is notable in only one respect, that of the winning score, which was four points higher than the previous interscholastic record.

Only nineteen schools entered the competition, of which twelve were public high schools and the balance military schools.

The honor of making the highest interscholastic score was shared by three competitors, Lawrence Burns and Frank Konvolinka, of Iowa City High, and Reed Tucker of Susquehanna High, each having made the top score of 198 of the possible 200.

*Remington-UMC*  
GUNS and SHELLS

## Win Southern Handicap

*The "Perfect Shooting Combination" was High in All Important Events at the Big Montgomery Meet*

**Southern Handicap:** Won by Frank Joerg, of Columbus, Ga., 93 x 100, shooting *Remington-UMC* Pump Gun and Arrow Speed Shells.

**High Professional Average in Handicap:** Tied for by Oscar McDade, 95 x 100, shooting *Remington-UMC* Pump Gun and Arrow Speed Shells.

**Preliminary Handicap:** Won by John K. Warren, of Birmingham, Ala., 94 x 100; Mr. Warren tied with E. R. Alexander, of Tuskegee, Ala., winning in the shoot-off with 19 x 20, both using *Remington-UMC* Arrow Speed Shells.

**High Professional in Preliminary Handicap:** Won by H. D. Gibbs, 97 x 100, shooting Remington Pump Gun and Arrow Speed Shells.

**High Professional Average on 16-yd. Targets:** Won by W. H. Heer, 348 x 350, with Remington Pump Gun and Arrow Speed Shells.

**High Amateur Average on 16-yd. Targets:** Won by Jesse S. Young, of Chicago, 338 x 350.

2d. George L. Lyon, of Durham, N. C., 337 x 350.

3d. Tied for by George H. Waddell, of Columbus, Ga., 336 x 350.

All shooting *Remington-UMC* Pump Guns and Arrow Speed Shells.

**High Amateur Average on All Targets:** Won by W. H. Jones, of Macon, Ga., 563 x 600.

2d. George H. Waddell, of Columbus, Ga., 560 x 600.

3d. George L. Lyon, of Durham, N. C., 555 x 600.

All shooting Arrow Speed Shells and the last two shooting Remington Pump Guns.

**Long Run of Tournament:** Won by W. H. Heer, with the exceptionally high score of 279 straight, with Remington Pump Gun and Arrow Speed Shells.

**Some Gun Statistics:** { 39 of the 101 shooters used Remington Guns—35 of the 39 were Remington Pumps. Nearest competitor was represented by 25 guns only.

### MAKE ROOM FOR THREE MORE *Remington-UMC* STATE CHAMPIONSHIPS

**PENNSYLVANIA** shooters rally to Handicap Winning Guns and Shells

**State Championship:** Won by R. J. Budd, of Lykens, 416 x 450, shooting Remington-UMC Pump Gun and Nitro Club Speed Shells.

2d. Harry Shoop, of Harrisburg, 412 x 450, shooting Nitro Club Speed Shells.

3d. Tied for by R. J. West, of Brownsville, and P. C. Barnhart, of Hanover, both using Nitro Club Speed Shells.

**High Professional Average:** Won by H. H. Stevens, 427 x 450, shooting Remington-UMC Pump Gun and Arrow Speed Shells.

**Long Run of Tournament:** Won by H. S. Welles, 115 straight, with Arrow Speed Shells.

**Big Scores in KANSAS State Shoot with Remington-UMC**

**State Championship:** Won by Frank Gray, of Atlanta, 47 x 50, with Remington-UMC Arrow Speed Shells.

Mr. Gray was tied by C. G. Willard, of Hutchinson, who lost in the shoot-off. Mr. Willard used Nitro Club Speed Shells.

R. D. Morgan, of Greeley, Neb., broke the only 50 straight in the Championship event, shooting Remington Pump Gun and Nitro Club Speed Shells.

**GEORGIA Gets in Line with a Long String of Victories**

**State Championship:** Won by J. M. Barrett, of Augusta, 98 x 100, shooting Remington Pump Gun and Arrow Speed Shells.

**High Amateur Average:** Won by W. H. Jones, of Macon, 387 x 400, shooting Remington-UMC Speed Shells.

Mr. Jones also made the Long Run of Tournament, 145 straight.

The next six high amateurs used the same handicap winning ammunition.

**High Over All:** Won by Homer Clark, 389 x 400, shooting Remington Pump Gun.

**The Latest is KENTUCKY!** J. D. Gay, of Pine Grove, wins State Championship with the exceptional score of 98 x 100, shooting Remington-UMC Nitro Club Speed Shells.

### TRAPSHOOTING NOTES.

#### Scores Received too Late for Publication in Last Week's Issue.

##### Little Falls G. C.

LITTLE FALLS, N. J., May 24.—The popularity of the Little Falls Gun Club increases with every shoot, if you can judge from the number of good shooters who are not only attending the shoots but are joining the club as well. To-day twenty-three took part. There were three prize events with the following winners: First event: Sam Comly and H. S. Sindle, 25 straight, Comly winning on shoot-off; J. H. Francisco and C. Speer. Second event: J. H. Francisco, Sam Comly, W. Hassinger and J. Thompson. Third event: W. Hassinger, J. H. Francisco, Ed. Smith, E. L. Klotz and Ed. Jacobus.

The best work of the day was accomplished by W. Hassinger, who broke 73 straight. C. W. Billings 49, and H. S. Sindle 37.

The high score was captured by H. S. Sindle with 96 out of 100, while W. Hassinger and J. H. Francisco each secured 95 out of a possible 100.

The deciding match with the North Side Rod and Gun Club, of Paterson will probably take place Saturday, June 14, and will be held on the grounds of the Little Falls Gun Club.

##### Chicago G. C.

CHICAGO, Ill., May 24.—We were favored with a very pleasant day for our weekly club shoot for to-day, but only eleven shooters came out to enjoy the sport.

Fetherston landed top honors in the main event, breaking 96, making a full with handicap. Dickerson was giving him a close race, and finished with 99. Schutz also got 99. Silver and Lyson divided third with 97 each. Scores:

Events:	1	2	3	4	5

Events 4 and 5 shot from 22yds.

May 25.—Although the weather was rather cold and raw, twenty shooters shot through the several events of the afternoon. Silver was high in the main event with 99. Moore landing second with 98, while Kammerer, Seelig and Miller divided third with 95. Winkler took first in the doubles, with Dave Thomas only one target behind him. Moore landed first in the practice event with 14 out of 15. Eck took the lead in event No. 5, which was shot from 20yds., breaking 22. Dave Thomas then broke 23 out of 25, from the 22yd. mark in event 6.

##### Western Connecticut T. S. L.

SEC'Y KEENAN sent us scores too late for use in last issue, hence the delay in publication. The scores were as neat as a pin—congratulations for this, at least. Seventy-eight gunners and one gunneress droned pull, bringing disaster to 11,710 acrosaucers. R. D. Cate kopped kaptol kale with 140 out of 150. C. Wilson, one target away, was second, and L. H. Bradley third with 138. The little lady from Sivanoy Country Club, Miss Thorpe, was high Juno with 95 out of 150. Of the ten professionals, Harry Stevens, of Winchester, was uppermost with 147. E. M. Funk second with 143. Ed Banks, of Hercules, third with 142. Scores:

Flavoring Tomatoes.—When cutting a tomato, pass the knife frequently over the freshly-cut surface of a large onion. The resulting flavor is indescribably delicate.

*Clothes That Give Freedom of Action*

OLIVAUTO CLOTH, made by the American Woolen Company, is not equalled as a fabric for golf suits. It is pure wool, comfortable, gives your muscles free play, and holds its shape. Splendid, also, for motoring, riding and other outdoor pastimes. Doesn't show dust or grease spots readily.

Fashionable Olive-brown, closely woven, medium weight only.

For fishing, hunting and hiking clothes, FORESTRY CLOTH (Shade 65), is a long-wearing, right-looking, comfort-giving fabric. Soft gray-green, all weights. This is the fabric adopted by U. S. Forest Service.

Any custom tailor or store can obtain OLIVAUTO CLOTH and FORESTRY CLOTH for you. They may be had also in correct sporting garments, ready-to-wear, from Abercrombie & Fitch Co., Russell Uniform Co., New York, and other outfitters. If you don't find them, write for samples and prices.

**His Majesty's Russian Retriever.**

HIS MAJESTY KING GEORGE has just added to his kennel of gun dogs by becoming the owner of that beautiful Russian retriever, St. Hubert's Peter, who, it will be remembered, won a first prize and a championship at Cruft's. The dog was bred, and until it became the property of King George, was owned, by the Hon. Colonel Le Poer Trench, and is considered the best male specimen of the breed in this country. Not only is he a show dog, but, what is so important, a thoroughly broken worker, who has been shot over on many occasions. It may not be generally known that Mr. Dudley Marjoribanks, and not Colonel Trench, as is generally supposed, introduced the breed into this country. As far back as 1858 Mr. Marjoribanks bought some of the dogs from a Russian gentleman. But it was

left to Colonel Trench to learn the part of Russia from which they originated. He discovered that they came from the high altitudes of the Caucasus, where they are used by the shepherds as watchdogs, stockdogs, and poaching companions. There seems to be an opinion that members of our Royal Family really take little interest in their dogs and pets in general; but this is by no means the case. We believe we are correct in saying that all the members are passionately fond of animals, and their dogs and horses in particular. Queen Alexandra, when she is at home, visits her kennels every day, and personally exercises many of the inmates. King George and Queen Mary, moreover, take the same interest in their dogs at every opportunity, and there are no dogs His Majesty admires more than well-broken gun-dogs.—Shooting Times and British Sportsman.

## In Nessmuk's Country

By CHARLES LOSE

THE older readers of FOREST AND STREAM will probably remember that Nessmuk's home during the greater part of his life was at Wellsboro, Pa., and that from this place Nessmuk started on his hunting, camping and canoe trips, and that of the streams in this vicinity and the section of country lying around Wellsboro much of his writing was done. Much of "Woodcraft" and of "Forest Runes" was probably written here. Wellsboro is one of the most beautiful as well as one of the best kept towns in the country. It contains many wealthy, well-educated people. Some of these knew Nessmuk intimately and can tell some good stories of his original views of life. From Wellsboro it is possible to reach in an hour's ride Pine Creek, Marsh Creek, Asaph Run, and many smaller streams that are still well stocked with our beautiful speckled trout. It is also possible in a short trip to get into mountains and among forests that are still known to the shy deer and the slouching bear. The monument erected over Nessmuk's grave in the beautiful Wellsboro cemetery by FOREST AND STREAM is always a great center of interest to the visitors to the town.

I took the train for Wellsboro at Williamsport at 1 P. M., dressed and equipped to start fishing within ten minutes after I left the cars. The ride north through the Pine Creek valley on the New York Central past Waterville, Slate Run, Cedar Run, Trout Run, etc., and between towering mountains, with long stretches of Pine Creek nearly always in view, is worth anybody's while. For great distances the stream and the mountains are the only things to be seen from the train. The stations, set far apart, consist of a few buildings located at the mouths of narrow valleys down which are sliding and falling little mountain brooks. For fifty miles the railroad follows the creek, and curves in and out with the stream.

The engineer kindly slowed up the train at Owasse, the Indian name for bear, I think, and I alighted with rod and creel prepared to fish until dark. Across the stream I saw three or four beautiful cottages hanging against the mountain side. The caretaker of one of these crossed with his boat and took me over, and on his wide cool porch I put my rod together and rigged up my cast. I was to fish down to Stone about a mile below, where ex-Governor Stone and Mr. Harrison, of Wellsboro, have large comfortable cottages at the mouth of Four-Mile Run. Here I was to be joined by a friend from Wellsboro, who intended to come down on the evening train.

Of my fishing there is not much to tell. The stream was of the color and consistency of coffee, due to the liquid that the Galeton tannery turns into the headwaters of Pine Creek whenever it wishes to get rid of it. It is possible that the protests that are made against this practice will some day have their effect. Nessmuk in his time wrote vigorously against it. At times this liquid, which seems to be the exhausted material from the vats, makes the creek fairly stink. It does not seem to be particularly deadly to trout, but it spoils the fishing for

were caught the bass began to take their turn. Out in the middle of the stream a big fish had struck for me several times. I suspected that it was a bass, but hoped that it was a trout. Finally I hooked it, and after a considerable fight, slid it out on the beach only to find that I had a big yellow bass. While the fight was going on I was joined by three little Italian boys, sons of the section foreman. They were much interested in the catch and particularly of the bass, which, I told them, I could not keep because of the close season. While I was

"WITH ONLY THE DOG ON GUARD."

the time. Occasionally there comes from these tanneries a liquid that does kill fish, and every stream on which there is a tannery has at some time or other suffered from it. It seems rather foolish to prosecute and fine a man who catches one more trout than the legal limit and at the same time permit a corporation to kill more fish in a day than the man will catch during his lifetime.

At Bear Run riffle I saw fish rising, but after hooking and landing several, I found that they were all either bass or chub. Only once during my way down did I get a rise from a trout. This was a big fish and I missed it. The man who cares for the Harrison cottage showed me a riffle where he thought I might get a trout or two. Here I caught four, all of which struck with plenty of vigor. After the trout

straightening out my cast the bass disappeared. I thought it had kicked itself back into the stream, until I noticed that the largest of the boys had a string tied tightly around his trousers near the ankle, and that inside his trouser leg was a great lump. After that every bass that I did not retrieve quickly and return to the stream found its way down that trouser leg, I think. Of course, you can't prove it by me, for I did not see any go down there. Maybe they all kicked themselves back into the water. But when the fishing was done and after I had dragged out some twelve or fifteen bass, the boy walked as if he had a wooden leg. They were interesting little chaps with the most beautiful eyes I have ever seen. I tried to rig them out as best I could with hooks and lines so that they might do their own fishing,

They spent the entire year shut in between the mountains and I felt that they were entitled to some diversion.

My companion joined me at 6:30, and from that time until 8:00 we fished industriously. But the results were nothing but bass. My companion is a very expert angler, and he was sure that he could get some trout. But each fish that he towed out—and he towed out a goodly number—was another fighting bass. There were trout there, but they were not feeding; the tannery water discouraged them, probably. This section of Pine Creek, and the whole stream, in fact, is great water for bass. They are there in countless numbers and will some day so completely exhaust the food that they will likely abandon the stream for a time. They feed even now largely on flies, and I know of no place under the sun where a man who likes to catch bass on a fly can have a better time. My friend had wonderful stories of how he fishes with a fly and a little spinner in August and September and what catches he makes.

My companion had arranged for a trip the following afternoon to Pine Creek above Ansonia, where the valley widens out and where the stream is not so rough. The train left Wellsboro at 12 o'clock and deposited us at Ansonia in about three-quarters of an hour. We had to walk a mile before striking the stream where it was thought we should begin. It was hot and close and to our utter discouragement we had been fishing only a few minutes when the water began to turn brown. For an hour we fished without seeing a sign of a trout. I finally suggested that we try minnows instead of flies. My companion, who is always prepared for any emergency, produced from the bottom of his creel a minnow net, and while I was changing from flies to a leader with swivels and a No. 24 Cincinnati bass hook, he proceeded to hunt the eddies for minnows. They seemed to be very scarce, but in the course of a few minutes he brought me a fine red-sided minnow. This was a genuine trout minnow with a small head, and in a deep dark pool I soon got a sharp strike and after a short struggle landed a fine broad speckled trout. I always particularly enjoy a little minnow fishing for trout. As a steady diet it cannot compare with fly-fishing; but the minnow fisherman, it must be remembered, sees his fish strike. He seldom gets a little fish, and he is almost sure to land his fish, if he takes his time to it.

Well, we spent the rest of the afternoon catching minnows and then catching trout. In all, we got nearly a dozen fine fellows. But the minnows were so scarce that it took more time to get a minnow than it did to get a trout. In a piece of broad, shallow, flat water I towed out two lusty trout that I caught on the same minnow. Once I saw a fish rise to a fly and since my companion said that there were no bass in this part of the stream I put on my flies and started in to get a fine trout. But long ago there was something said about the plans of mice and men that is still true, for when I had hooked and played him in fine style for a few minutes he gave a mighty leap and displayed himself as a lusty bass.

On the mountain side just above us all the while we were fishing we could see a great forest fire raging. At times, when it apparently struck new material, it would send out great

volumes of dark smoke that completely hid the sun and darkened the sky. Once we were so near it that we could hear the noise and see the flames. Toward evening it died down and that night went entirely out under a heavy rain. The State is planting some of the bare mountain sides of this section with young pine trees. I had talked the evening before with Mr. Cox, of Wellsboro, who with a gang of men, had set out that day some nine thousand little trees on the sides of Mount Tom, a mountain that was stripped bare of its timber many years ago. This planting is great work, but a forest fire may do as much damage in a day as can be repaired by planting in fifty years. I shall have more faith in reforesting our waste land when fire regulations are more strict. I never tasted better trout than those we cooked that evening in Wellsboro from our catch of the afternoon. Trout to be at their best should be cooked on the day they are caught.

The next morning it was raining, and all day long there were showers and clearing spells that raised the anglers' hopes, only to dash them again with another downpour. My companion and I went again to Nessmuk's grave and looked for the hundredth time at the monument, every detail of which is so familiar to both of us. Then a bucket full of fine trout minnows were caught to be ready for the next day. We did not propose to be caught again on Pine Creek without bait.

All night the rain poured down, but in the morning blue sky began to show itself again. But what of the streams? The little brook flowing through the town was almost a river. Still my companion, whom unqualified successes with rod and gun have made sanguine, urged me to go. He knew that Pine Creek above Ansonia would be clear. My train went at 6:40 and I was compelled to make up my mind promptly. My companion was to work that day, and I must go alone. Before I reached the junction I decided that there could be no fishing in Pine Creek; there was too much water everywhere. I then concluded to go to Asaph Run if for no other reason than to be able to say that I had fished one of Nessmuk's old streams.

Many years ago I read an article by Nessmuk on "Catching Trout on the June Rise." He told of how he had crossed the mountain one afternoon in June from Wellsboro to Asaph Run; how he had fished down this run until evening and then had stayed all night in a woodsman's cabin; and how next morning in fishing on down the stream he had found in a large pool such great numbers of trout that in two hours he caught all he could carry. These trout had been lying in Marsh Creek at the mouth of Asaph in the cool water until a flood had allowed them to go up the smaller stream in a body. Nessmuk had found them before they had scattered along the stream. Once, and only once in forty years of trout fishing have I caught them on the June rise. I, too, got all I could carry. I wanted to fish the Asaph because of Nessmuk's story. When I got off the train and went to look at the stream, I knew I should make no great catch. The stream, being a mountain stream, was comparatively clear, but it was very high. There was only here and there a place that could be fished, and when wading it I should need to be careful to keep from being washed away. At the end of a long

stretch that in ordinary water must be a beautiful pool, I set my minnow bucket in the edge of the stream and rigged up. My minnow had been pulled only a few feet, when a trout flashed up and took it. The trout never let go and I soon slid it out on the gravel, where the current went into a deep pool at right angles. Here I got three good trout that bit and hung on in a way that always makes the bait fisherman's heart glad. I had to leave the stream at noon to return by train to Wellsboro, and by that time my big basket was half filled and I had all the trout I needed. Wherever I could find a little relatively still water of any depth I could catch a nice trout. Below a little fall in a deep pool that the high water could not affect seriously I coaxed up and caught a number of good-sized trout. It was such an attractive place that I spent nearly an hour over it and enjoyed the time thoroughly. I wish I could have seen the stream at its best. It runs through a lonely country, between high mountains, and I know how Nessmuk must have loved getting away from the close work in his shop to a place like this by the side of a clear singing stream under the blue sky. He probably camped here at times and saw the moon and the stars cross this lonely valley at night and the sun rise at dawn over the purple mountain tops. Thanks to intelligent stockings, Asaph Run, as well as the other mountain streams in this locality are nearly as well supplied with trout as when Nessmuk fished here.

That evening I returned home. At the Junction I took a chair car on the New York Central in order that I might face the stream without inconvenience. In the lives of all of us are certain experiences that remain with us as long as life lasts, and I am quite sure that this ride down through the Pine Creek gorge is something that I shall recall again and again. It was near the close of day, and yet there was plenty of light to see everything distinctly. Pine Creek was bank full and running wild from mountain to mountain. This alone would have been a sight worth going far to see. But the particular thing that made the ride memorable was the number of streams of water falling from the mountain sides. There were scores of these—sometimes in a single mile there would be ten or twelve. They fell at times sheer down from the tops of the mountains, and some single leaps must have been for several hundred feet. They were white water and could be distinctly traced against the dark mountain sides from where they sprang from the side of the precipice or leaped over the top until they spread out in a white fan where they entered the creek. Occasionally I would get a view up a narrow mountain valley that was sending down a broader white stream that had in it falls higher than those of Niagara. The heavy rains of the previous days and nights had apparently filled the mountains with water, and this was escaping into the main stream at every possible point. The train ran carefully, fearing washouts, and I had plenty of time to drink my fill of the most wonderful succession of scenes that it has ever been my good fortune to see.

But finally night shut down and the trip to Nessmuk's country was nearly over. As I rode on through the dark my thoughts dwelt steadily on the man who in spite of some adverse circumstances got so much out of living. Like

George Borrows, gypsy Nessmuk would have said to one who inquired about the pleasures of this life: "There's night and day, brother, both sweet things; sun, moon and stars, all sweet things; there's likewise the wind on the hearth. Life is very sweet." To Nessmuk life was very sweet, as it is to anyone who loves God's great outdoors as Nessmuk did.

### The Sort of Letter we Like to Get.

CLEARWATER, Fla., May 25.—*Editor Forest and Stream:* Yours of the 22d to hand and contents considered.

Replying to your question, will say that what I miss in your publication is what other old readers express, "the lack of native hunting stories." Those like "Nessmuk's and Rowland E. Robinson's" that have the natural tang and flavor of these United States.

Those of Canada, Africa and Alaska are interesting, but grow monotonous by constant repetition.

I for one should like to see a few now and then from the Jersey coast, the Chesapeake, around the Great Lakes or the Mississippi valley. There are certainly plenty of hunters and fishermen who still use these regions with pleasure and profit, and their names are good ones I know, though they seldom get into print in your magazine.

The old hunting ground in "the sunken lands" of the Mississippi are not shot out yet any more than the bass streams and lakes there are fished clean; and the adventures of hunters and tales of game bagged under difficult conditions make as interesting reading as in the old days.

Few of your readers know of the fine trout and the skill and difficulty of making big creels in the streams of the Carolinas, or of the deer and bear, turkey and geese found in the sounds on Pocassins of the coast.

The marshes of Louisiana, the river bottoms of the Mississippi, and the bays and marshes of the Texas coast still hold plenty of game, and the getting of it is often as difficult and adventurous as the most daring would care for. A few yarns from game wardens, of poachers and fish pirates would open the eyes of the blasé reader. This State offers plenty of material if properly used. (Dimock has but scratched the surface.)

Please don't take these remarks as complaints, for I know the materials are handy and often hear the yarns told and live some of them myself.

However, your publishing Nessmuk's last story has aroused my interest again, and in the hope you may have other material of like character, I am renewing my subscription, for which please find check inclosed.

I have read your paper since boyhood and would really miss it. PHILIP C. TUCKER.

QUOTH the editor:

"Is life worth living?"

"Nope."

"Why not?"

"Because so many people have a day off on my busiest day and come in to ask fool questions."

# Surf Casting

## Third Paper

By SWITCH REEL

**A**SIDE from the pleasures of contemplation, retrospection and anticipation, the time for the first of which is, in surf fishing, perhaps greater than in any other branch of the gentle sport, the opinion is here ventured that the chief charm of the pleasurable pursuit lies in the joy of the cast.

With tackle "as costly as his purse will afford," your surf angler along the sandy beaches of our coast lays out more line in his cast than any other brother of the angle, and he knows it and he revels in the joy of it.

It is not uncommon to witness casts of over two hundred feet on the beaches of Long Island and New Jersey, and, at a notable tour-

theirs. He watches the man a couple of hundred feet up the beach. Away goes the lead an incredible distance out to sea and it makes a white splash as it drops into the blue water. He swings on his own rod and the fore-shortening effect makes it appear that the lead goes only about half as far as that of his friend. So it is strain, strain for distance. What boots it that the old sharps who beach the 30- and 40-pounders say, "Boys, you're overcasting your fish. Drop your bait just over the break. Let it lie just beyond the over-hang." The good advice sticks in the memory for one or two casts, and the third one must hit the bar or it's not right!

Let us look at the tools, the use of which gives such great joy. First the rod—split bamboo, greenheart, snakewood, De Gama, or what not. Individual taste may dictate something different, but the following is a description of probably the best rod ever made by the most famous surf rod builder on the Atlantic seaboard. It is entirely of greenheart, butt and tip. The former is 30 inches long and of the type known as the "spring" butt. The tip is 6 feet 6 inches long over the ferrule, but exclusive of dowel and when assembled is 8 feet 9 $\frac{3}{8}$  inches in length. The butt weighs 14 ounces, and the tip 16 ounces. The top guide is of the offset style, and it, as well as the two tip guides, are detachable, this arrangement making it possible to fish them on either side of the rod, and to remove them entirely when traveling. All three are agate lined. The reel used in conjunction with this rod is a double multiplier No. 2-o, equipped with throw-off handle, and is as finely balanced as Michaelson, the well-known Brooklyn manufacturer can make it. When filled with line a twirl of the handle and the quick use of the throw-off will cause the barrel to revolve for over five minutes.

The rules under which surf casting has been carried on along this coast in tournaments of recent years have called for linen lines of not smaller than nine threads, and have prohibited reinforcing.

It is beyond all question that the lightest line will yield the longest cast, there being less weight for the lead to pull forward and less surface to offer resistance to the air. Some casters have feared to use a nine-thread line with a four-ounce sinker. Close observation will reveal, however, that the breakdowns occur with casters who take a very short lead, dropping the sinker only a foot or eighteen inches from the tip of the rod, while those who take a lead of thirty inches or more rarely or never break down. The reasons for these results are: 1. That there is more shock-absorbing quality in the elasticity of thirty inches of line than in twelve or eighteen. 2. The short lead requires a sudden application of power which with the longer lead is spread over not only a greater length of line, but over a longer period of time. The difference is like that between quick burning and slow burning powder in a gun. The

THE AUTHOR AND HIS CATCH.

nament in 1910, one cast of 314 feet 10 inches was measured. What wonder then if the surf rod wields so potent a charm over its devotees that oftentimes all other rods are abandoned in its favor?

Truly in surf casting "distance lends enchantment." The powerful rod, the finely balanced reel, the long slender line and the absolute nicety with which the successful cast must be delivered are all elements in the combination which gives the surf caster his joyful reward when the lead drops smoothly into the sea beyond the breakers.

Failures only make him more determined to succeed. He sees others shoot out a couple of hundred feet of line—once in a while when everything goes right—and he must do it time after time without a break. He fails. He remembers his failures. They fail. He forgets

former gives greater strain at the breech and more recoil than the latter.

Many splendid casters, however, are unable to get results with the long lead, having acquired a style based on the short lead. In casting a dry line on the surf they sometimes break down. It may be that the tendency of the line to part under these circumstances would be lessened by thoroughly wetting three or four feet of it next to the sinker but not enough of it to reach to the reel and cause sogginess or stickiness, the idea being that the shrinking caused by the moisture will impart additional elasticity to the short lead.

Various styles of swinging are seen, the most common being a combination of the side swing and the overhead. This seems to be the form into which the majority of casters unconsciously fall and much is to be said in its favor. The least effective cast is the underhand. Unusually fine work has been done in the style advocated by Mr. Rice and Dr. Held, in which an absolutely perpendicular swing is sought, but the rods best adapted to this particular style do not find favor with the rules committees along our coast. Consequently this style has not received the trial which its able exponents must feel that it deserves.

Mr. La Branche once asked in the writer's presence the question: "What are we all striving for?" And immediately answered it by saying: "To make the longest cast in the world." It would seem that this puts the matter in a nutshell. We must not feel that tackle has reached its ultimate stage of development, nor should we by rules and restrictions wholly prevent change. Therefore, there is ground for at least a little regret that there is not one surf event in one casting tournament somewhere in this vast country of ours with the lid completely off and no restriction applied to either rod, reel or line. Such an event would afford a battle ground upon which the old and the new could fight to a finish. The results would depend not upon words, but upon deeds.

The writer witnessed Mr. Rice's 305-foot cast at Asbury Park a few years ago. The next year, Mr. Moran, using less of a perpendicular swing, accomplished 314 feet 10 inches. Both used a 3-ounce lead. Mr. Rice used a silk line reinforced with a heavier linen line to take the strain at starting. There is, I believe, an English record of 320 feet and an Australian record of 336 feet, both with a 4-ounce lead, and probably rods of about fourteen feet in length. Last year's rules in three Atlantic Coast clubs, respectively, permitted rods up to 8½, 9 and 10 feet in length. Such rods would seem to be heavily handicapped in going after the 336-foot record of a 14-foot rod. But it is by no means a hopeless matter. The writer's experience in practice casting with the rod described in the early part of this article firmly convinces him that under favorable conditions, and in the hands of the right man, it will lay out 350 feet of 9-thread line. We have several giants of surf casting in this country. What, then, would one of them do with a happily proportioned rod of ten feet in length?

While the long, lithe rod of our British cousins gives them much advantage over us, yet our reels go far toward evening matters up, and it is only the somewhat unfortunate official selection of 2½ ounces as the standard

weight in this country that has held us back in that supreme event—"the longest cast in the world." But with 3-ounce leads and 10-foot rods permitted in the tournament of the Anglers' Club of New York, and with 4-ounce leads permitted at Belmar and Asbury Park, although rods are there restricted to 8½ and 9-foot lengths, respectively, the goal is almost within reach.

These points are respectively submitted to the consideration of tournament committees: A 10-foot rod and a 4-ounce lead are strictly fishing tools. Why not include both in tournament rules and go after the world's record?

### North Carolina Notes.

HENDERSONVILLE, N. C., May 27.—*Editor Forest and Stream*: It is said that "variety is the spice of life," and if this is applicable to the weather, then we have had it here the past twelve months.

Really the months appear to have got mixed in the shuffle. April was largely February weather and a part of April came in January. Even this month has shown frost. But at last spring is with us in full force in spite of the occasional lapses to colder weather.

The birds came also on time regardless of late spring, and I have seen young robins large enough to fly. Everything is green that grows leaves, and the early rhododendrons were in bloom when I was fishing Green River over two weeks, yes three weeks ago. And thanks to a growing sentiment in favor of the birds, the songsters have enlivened the woods with their songs.

I have not had a really good day's fishing, yet I have each time that I have been fishing killed more than the home folks would eat, so they were passed on to a neighbor. I think I have creeled so far the largest of the season—a rainbow trout 17½ inches in length.

We have made our usual planting of trout this spring in Green River and its tributaries, and the interest seems to be from among the people who live all along the stream. They never fail to meet the train that brings the fish regardless of weather conditions. I have not as yet been to a brook trout stream, though the upper stretches of Green River are stocked with brook trout. Last time I was on the river I caught a brook trout when I had no idea of doing so on that stretch of water, and as I brought it to net, I saw a large rainbow apparently after it. This brook trout was something like eight inches in length. A little later I hope to have some sport with the brook trout on the Chatooga River in Jackson county, and shall then report results.

I am glad to note that you do not approve of taxing cartridges. It would hardly be right to make true sportsmen pay a tax because of game hogs and small boys shooting birds in and out of season. Surely, we should not wish to make everyone who shoots suffer because some men do wrong. It is the duty of game wardens to protect the birds, and it is the duty we all owe to use our utmost efforts to have good laws enforced, and to this end have game wardens. Taxing cartridges would not stop the killing of birds.

I am sorry to say in this State we have no

warden system and still cling to the old and foolish county game law plan.

ERNEST L. EWBANK.

### What Becomes of the Covey?

SALTVILLE, Va., May 30.—*Editor Forest and Stream*: In a great many cases a covey of quail passes through the hunting season and winter safely and arrives at the breeding season without much loss in numbers, but the following fall but one covey is found, made up of the two old birds, left from the old covey and their young. What becomes of the remainder of the original covey?

Is there not a large amount of inbreeding among quail? If so, why is it that they don't "run out"?

I have never read nor heard any satisfactory answers to these questions, and I would appreciate it very much if you would answer them through the columns of FOREST AND STREAM.

M. BLAKE MOUNT.

### The Hair Rope Myth.

BALTIMORE, Md., May 21.—*Editor Forest and Stream*: I read with interest the article by Chas. Stuart Moody on "The Hair Rope Myth" and to-day came across the inclosed in the American Field:

"Tarantulas and snakes crawl about the ground, but for these the old miners have less fear, when sleeping on the ground at night, than the average layman has when at home on his Ostermoor. These men of the hills carry a hair rope, and after spreading out their blankets at night, coil this about the bed as a protection against all crawling insects, for none will cross the dividing line."

I have never seen the experiment tried, as Mr. Moody writes he tried it, but while a "cowboy" in Colorado and afterward a "wool grower" in Texas, I heard the assertion frequently made and never questioned. It would be interesting to hear from some of the people who do believe it and the reason they have for believing.

M. K. T.

### The Rising Generation.

JERSEY CITY, N. J., May 14.—*Editor Forest and Stream*: Count me in favor of the suggestion of your correspondent, John Preston True, in May 10 issue. Then we shall see whether the good old stories seem as fine in flavor at fifty or fifty-five as they did at twenty or twenty-five years. But don't worry when we speak with tears in our voice about Nessmuk, Kingfisher, Sam Lovel, et al. It's only our way of having fun with you youngsters. We are growing old as gracefully as possible, but sometimes without even a grudging acknowledgment of that fact we recall the swelling joys we drew of yore from your columns.

Then we were looking at the future; to-day we are—I will not say it.

To-day, too, youth looks at the future, and when to-day's youth reach our age, they will write your successors about the days of Robert Page Lincoln and Ernest L. Ewbank and Emlyn M. Gill, and a whole lot of other good folks who just can't make their pens keep still.

SWITCH REEL.

# How I Found a Salmon River

By H. A. P. S.

(Concluded from week before last; page 652.)

**I**N the cove, on the gravel, where we lunched, two moose—a cow and calf—had just left, their recent tracks along the sand being sprinkled with the water dropped from their bellies, they evidently having swam the river and got our scent, as we had been approaching them from windward. Our river now widened, and for a long way we paddled the reaches with plenty of water under us, when all at once we were in civilization again, for the Nova Scotia snake-pole fences appeared and the cow bells tinkled in the pastures. With an occasional pause to take a cast for some exceptionally large rising trout, and in which the boy was usually successful, we reached Harrington's Dam. From here the heaviest and longest rapids stretched below us, and it was with much reluctance I agreed to take the chances of shooting through. However, we were out for fun and adventure, so trusting to our expertness with the paddles, and a whole lot more to luck, we pushed off. The next second trees on the banks were rushing by.

Now there can be no more delightful sensation than shooting rapids in a canoe when you can keep her straight and the skilfully wielded paddles control your flight. A canoe surely is peer of all floating things, as she cuts through the white water of a rapids, sending spray out from the bow, while she jumps and skims over rocks scarcely a foot beneath her bottom; but there is nothing meaner when slanted ever so little sideways to the current. We nearly came to grief on a flat boulder. The next instant a pole bridge loomed up ahead. It looked scarcely three feet above the water, but we had no alternative except to try and shoot under. I shouted, "Get down flat!" All would have been well had the bow paddler not become rattled. He ducked, and then thinking there was not room enough to pass beneath, raised his arm and caught a pole in the bridge. Round we spun. Seeing a spill was coming, I shouted, "Swim!" as the water poured into us amidships, and over we went. I found myself bumping the bottom of the river with the canoe on top of me and my legs caught under the end thwart. At last I freed myself and rose to the surface. There below me was the canoe bottom up, traveling down with the mighty current. Not seeing the Kid, my heart sank as I surmised he must be underneath her. Half full of water I swam after the canoe, when right in front of me the Kid's head popped up. Both being excellent swimmers, we swam side by side until our feet touched the welcome sand of the river's bottom. With hands clasped, we waded and staggered to the bank. I said—Oh, well; it doesn't matter what we said standing there under the trees, but I shall always remember how proud I felt that the Kid had been tried out in a tight place and not found wanting. In years to come, if ever we get into another scrape where quick action and a cool head count, he can be depended upon. The nearest house was Harrington's, a

mile away, and evening was falling as we two half-drowned sports at last dragged our tired and wet bodies to the door. A warm welcome the good people gave us, and as we sat in the farmer's borrowed clothes and thawed out over the kitchen stove, we were sights to behold.

Next morning we found our canoe, still bottom up, in an eddy two miles or more down the river, and wonder of wonders, we eventually fished up nearly all our duffle, and to the great joy of the kid, his rod intact. The blazing sun soon dried our outfit, and by 10 o'clock we resumed our passage, reaching Saulnier's Mill at noon without further adventure. As the mail team jogged along the dusty road, we regretfully thought of the nice basket of big

farmhouses we were to stop, and as I had on previous occasions made this place my home when on business, we were sure of welcome. Within fifty yards of Henry's (now called "Melanson House"), and where the river leaves the lake, is now about the best pool on the river for salmon.

Henry and his good wife were delighted to see us, and after supper I told him of the object of our visit and our plans for the morrow. In answer to my inquiry, Henry said he had not seen or heard of any salmon being in the river. So when my old salmon rod was put up, the next morning, and I explained to him the use of the gaff and flies, he had but little faith in the result. However, at 8 o'clock I

SEVEN MILE POOL ON GRAND CODROY.

trout we intended sending home. It was all big river and clear sailing from Saulnier's to Doucet Lake. Paddling through the "Narrows," we were in the beautiful Salmon River Lake with its white sand shore and meadows and hay fields sloping down to the river. Farmhouses here and there, and men plowing the uplands.

The people living here are all French descendants of the Acadians, who scattered along St. Mary's Bay at the time of their expulsion from Grand Pré and the Annapolis Valley, a thrifty, well-to-do, hard-working people, retaining all the traditions of their race. The women still wear black silk handkerchiefs for a head dress, while their spinning wheels buzz and home-made looms click in the houses. All talk their native tongue. It was at one of these

made my first cast in Salmon River, beginning where the river left the lake in the "Upper Pool," an ideal spot from which to fish—not a twig to catch your back cast. The river here is about fifty yards wide, pebbly bottom and some six to ten feet deep. How good the kick and pump of the old rod felt as the enameled line laid out and the No. 4 silver-doctor dropped in the most likely looking swirls and eddies! But nothing moved. So I continued down past the river's bend, fishing all likely looking water until tide head was reached. Long before this the Kid and Henry had become tired of watching for a rise and had returned to the house, so when I walked in late for dinner, I was not surprised to find they had gone to Gaspereau Brook for trout.

In the afternoon I drove up stream to

where I had seen the small boys with the two salmon fry and carefully fished along the meadows back to the lake, but without a sign of *Salmo salar*. At supper time the Kid and Henry returned with a well filled creel of pretty trout. I was, of course, the object of much good-natured raillery when my day's fishing had to be announced as a failure.

No notice was taken of me, when, after supper, I mosied down stream again with rod and gaff. My faith in the river was certainly not great, but it felt good to cast, and besides there was a quarter mile of untouched water to fish. At last a foot bridge crossing the river was reached. Standing upon it, the conditions were perfect for long casting. More and more line was pulled from the reel and shot through the bridge rings, until thoughts of how each lengthening cast would win at the Guides Meet in July, and all competitors would be left hopelessly behind in the long distance events, possessed me. Then something happened away out there where the brook and river met. In the tumbling foam-flecked current, the dorsal fin of the king of all fish appeared. He did not jump, but I got a splendid view of his huge form as his broad back and wide tail stiffened for the downward plunge. He simply rolled. A heavy tug straightened out the drowned enamel-covered line as tight as a fiddle. The very weight of him drove the barbed hook home.

To the writer there are three occasions which eclipse all other thrills in salmon fishing. The first is after one has raised a fish, and following the short rest one gives him, one begins to cast again, gradually allowing the fly to drop lower down to where his Lordship lies. 'Tis hard to lay the line and leader out cleanly when expecting, with nerves strung, an immediate strike. The next most anxious moment to me is when the line and rod vibrate with the electric quiver that precedes the first leap of a hooked fish. You see his size and guess his weight as he shoots out of the water, and as he hits it again on his side with a smack, and the tip of the rod dips toward him, the feeling takes possession of you that he is free, leaving you with a sense of mortification and "love's labor

lost." The third and possibly most trying of all is when he begins to "jig" and jerk sideways at your hook. Then it is that your tip nods toward him at every tug, and you feel as if the line has caught and fails to run freely; every second you feel he must tear loose.

When a salmon finds himself fast, in nine cases out of ten he returns to the bottom, whence your fly coaxed him, and seems puzzled and undecided what to do, and this fish was no exception. Running to the end of the bridge and jumping into the swollen and boiling river, I was ready for his rush by the time he found himself. Another second, and the reel screeched zee-zee e-zee-ee-eee as he streaked down stream, and what that salmon did to me for the next ten minutes was a sin and a shame. With my shins bruised and bleeding, I slipped, fell and splashed my way over slippery rocks after him; down around the bend we went into a deep pool. With a sigh of relief I noticed at a glance a few more precious strands of line remained on the drum of the reel. Giving him the butt, I felt him yield, and a few more priceless feet of line were recovered as the reel slowly clicked their return. He now took a short dash up toward the rapids, but the combined strain of the greenheart, and heavy water, bore him back, and with gasping mouth he drifted close beside me lying on his side. A poorly placed stroke of the gaff in my trembling hand only scratched his mighty back and awoke new life in him. Away he darted again with his wide tail churning the surface like the blades of a propeller, and a long jump at the end of the run showed there was yet some fight in his tired body.

But now slowly, but surely, the reel clicked as the line ever shortened between us, and then he rolled and feebly jigged. Yes, at last the rod had won, for I could now lead him, rolling and jigging, his silvery sides alternately shimmering through the eddy of the pool. The naked gaff was ready waiting, and carefully placing it over his wide shoulder, just right this time, I struck, at the same time stepping back toward the shore. My heel caught and slipped. One mighty flounce as the sharp steel cut him,

and the gaff was wrenched free from my grasp, the next second I lay on my back half out of water. Scrambling to my feet, I saw the end of the gaff handle zig-zagging through the eddy as the steel yet stuck to his side. In the rapids beyond the eddy it floated loose and went bobbing down toward the sea, but the fly still held in the fish's jaw, and rapidly reeling in, I soon had him close to shore again. He was killed, as dead as fish was ever killed; in fact, so dead was he that not a wiggle was left to help the rod in beaching him. I tried the butt once more in hopes to strand him, when the extra pressure tore loose the hook, and backward into the river my salmon fell.

Can you, dear reader, divine my feelings as sitting on the bank I poured the water from my waders, and rubbed my battered shins? It has been my good fortune to kill many fine fish in Salmon River since that day, but I have yet to live to see *that* salmon's peer.

That night Henry, the Kid and the writer named the pools in my river. Who that casts a fly in its waters to-day does not know the "Upper Pool," "Middle Pool," "Mill Pool," "Sheriff's Pool" and "Lower Pool." Through my bedroom window that night the purr and rumble of the river smote my ears (a virgin river until to-day!) as I lay thinking of the fish I killed and lost. News even in the country soon flies, and to-day this dear little river is fished to death by day, and netted by night, until at times I wish it had never been discovered.

'Tis really marvelous the rapidity with which the natives have become expert with rod and line. Small boys a-plenty who had never seen a salmon rod until they envied mine, now talk of Jack-Scott, Durham-ranger, silver-doctor flies as a matter of course, and cast as pretty a line as one may wish to see. Sixty-dollar split bamboo rods compete every day in the season with the home-made productions of ash and maple. Yes, and let it be said softly, the latter generally get more than their share of the gamy fish that swim in fresh from the cold salt sea of St. Mary's Bay, and whose flesh is as pink as the pinkest May flowers that grow along the banks of their native river.

## Grand Portage

### A Forgotten American Highway

#### A Long Trip in Short Instalments—Number Two

By S. H. HOWARD

**S**IR ALEXANDER MACKENZIE describes something of the scene at Grand Portage, when the partners arrived in the summer and the old canoe pier grew busy with the loading and unloading of freight.

"The houses," he says, "were calculated for every convenience of trade, as well as to accommodate the proprietors and clerks during their short residence there every season." The North men lived under tents, presumably on the level lowland which extends along the shore

east of the creek, where the scattered Indian village is to-day. The "pork-eaters" slept under huge canoes. Meadows for the cattle spread further along the arc of the bay, and on a natural terrace a little further back, where the weather-beaten church and the Indian graveyard now looks down.

The officers of the company, the clerks, guides and interpreters to the number of a hundred or so, dined in one large hall at several tables. They lived tolerably well, according to

accounts, having the resources of a virgin wilderness to add to what the canoes brought up from Montreal. Lake Superior is always icy cold, and its keen air gives hunger zest. Appetites of healthy vigorous men were brought to those loaded tables in the mess room, where good wheat bread, butter, salt pork, beef, fish, venison, peas, Indian corn, potatoes, tea and milk were served, with wine and spirits in liberal measure besides. The canoe men, however, fared less luxuriously. Their rations con-

sisted of one very simple and sustaining dish, namely, corn and melted fat. No doubt they added to this menu when occasion offered, for the lake abounded with fish and the hills to this day breed plenty of partridges. Moose, they say, have only drifted into this section in recent years, but caribou used to be plentiful. Hominy, however, formed the backbone which carried the packs on the Grand Portage, and it is worth while quoting the recipe.

A quart of Indian corn is boiled for two hours in a gallon of water. Two ounces of melted suet or pork fat are added after an interval of boiling. The corn splits thereupon and forms a thick pudding. A little salt is then added, when the strength-producer is ready to serve. The amount quoted sufficed a man for twenty-four hours, unless strenuously engaged, when he ate more. The cost to the company would amount to about twenty cents, after paying transportation charges to Grande Portage from Detroit.

The wages of a common canoeman, or, as he was called, a middleman, came to about thirty cents a day. If he bore the distinction of paddling bow or stern, he was worth about thirty-seven cents a day. Tobacco and clothing to a stated amount were furnished by the company. The bowsman and the steersman had to run the canoes through the rapids or carry them on the portages, and their pay was apportioned higher accordingly.

The canoes worked as a rule in brigades, with a guide in charge of the fleet. There were in Mackenzie's time thirty-five of these guides in charge of 1,120 canoemen. Three hundred and fifty voyageurs were kept on the run between Montreal and Grande Portage and employed only during the five months of navigation from May 1 until the end of September, being recruited chiefly from the river and the parishes around Montreal. The "North" men who formed the balance came to Grande Portage from the different posts in the Upper Country, the "Pays d'en Haut," and returned there after getting their share of the goods across the portage and enjoying a brief carousal, to remain in the service all winter, being hired by the year or for three years, as the case might be. The annual Grande Portage gathering of the North men and the arrival of the Montreal brigades made Grande Portage a scene which few places on this continent, save Fort William, have ever witnessed. It meant the total strength of the canoe brigades brought from all the

wilderness to one spot. The whole curving sand beach of Grande Portage was lined with canoes for the time of this annual gathering. For the Indians of the district all gathered there, too, to make camp and add to the carnival. Blue spirals of camp smoke ascended as from a city, while at night, when work was over for the day and the packstraps laid aside, the flare of hundreds of camp-fires shone across the calm surface of the water. Then it was that Bedlam broke loose, for rum was plenty, and no law reached past the Sault. Canada and the Church were far away. Meanwhile behind the closed gates, the partners—McTavish, the Frobishers, McGillivray, the Mackenzies, Alexander Henry—and the rest of that famous group of worthies who combined business logic with roystering good fellowship to such an extraordinary degree, made merry in the knightly way of old, drinking the best of wines, singing the best of old Scotch songs, re-telling the best and broadest of old Scotch stories. Over six hundred thousand dollars worth of business was done by these hard-headed old wassailers in 1789, and the bulk of it was handled at Grande Portage. The quantity of furs involved would easily bring three million dollars at present valuation, while money was worth much more then than it is to-day. The North West Company's turnover exceeded anything known in America at that time.

And to-day the scene of the North West's interior stronghold is a waste of sand and scrub.

The history of Grande Portage goes back to 1678, when Dalhut established a post there. It was rebuilt by Lanove in 1717. After the Conquest in 1759, the English-speaking traders began very slowly to find their way to the upper lakes, first at Michilimackinac, then at the Sault, then at the Kaministiquia, then the Pigeon River. Grande Portage began to be frequented by English traders about 1767. Soon it became a midway station for a dozen or more, each jealous of the other, and doing his best to spoil his chance of success. They used to send their canoes inland to the Saskatchewan country, which was at first about the limit of their operations. In 1784, these Grande Portage traders combined and formed the North-West Company, and trouble for the Hudson Bay Company commenced in earnest. The ambition of the new organization knew no limits. The partners had been in the field. They knew the conditions. A fine new post was built at

Grande Portage and the North-West men were encouraged to spread out. And spread out they did, reaching the Arctic Ocean on the north and the Pacific on the west. And all their furs from these far distant wastes gathered at Fort Charlotte and came across Grande Portage.

In 1798, Alexander Mackenzie seceded from the North-West Company and formed the X. Y. Company. He built a rival fort at Grande Portage, and it remained in business there even after the boundary was fixed and the North-Westerners abandoned their post and moved to Fort William. In 1806, the X. Y. Company shipped 2,332 packs of 90 pounds, including among other furs, 74,000 beaver, 40,000 martens, 4,000 otter, 4,300 mink and 51,000 muskrat. So it must be admitted that Grande Portage was an important center in its day.

Long after the amalgamation of the companies in 1821, and the changing of the routes by which the bulk of the North-West fur reached London by way of James and Hudson Bays, Grande Portage remained a road for the fur-traders. The Hudson Bay Company continued to use it in addition to the Kaministiquia route, and Batiste Collin, aged 102, is one of those still living, who have "danced the Grande Portage" under a Hudson Bay Company pack. He was foreman of a brigade at that time.

Another man who knows Grande Portage well is Mr. John McLaurin, of Fort William, whose old log house, in which he lived while in business as a free trader at the Portage in 1860, is still standing. His store and fur loft were pulled down by the Indian agent a few weeks ago, and last August the old fur press was to be seen lying on the ground by the lumber of the dismantled building. John McLaurin afterward moved to Fort William, to buck the Hudson Bay Company. He built a log store there. The C. P. R. bought it a few years ago for \$18,000, and Elevator "D" now occupies the site. John's life would make several volumes of adventure.

The Grande Portage road to-day is still a wilderness pathway. You see moose tracks and those of red deer when you cross it. Twenty-three partridges were counted on the trip over and back. But the old trail is as good as ever, save for the rotted log bridges. It is a historic American foot-path which neglect has chanced to preserve.

[LAST PORTAGE.]

## GAME BAG AND GUN

### New York State Game Laws for 1913.

THERE shall be no open season for quail before Oct. 1, 1918, excepting on Long Island, where the open season shall be from Nov. 1 to Dec. 31, during which time one person shall not take more than 50 quail, 10 in one day; 36 male pheasants, 6 in a day; 20 grouse, 4 in a day.

Varying hares may be taken and possessed from Oct. 1 to Jan. 31, except on Long Island, where the season for varying hares and cottontail rabbits shall be from Nov. 1 to Dec. 31, inclusive.

Black, gray and fox squirrels. Open season Oct. 1 to Nov. 15, except on Long Island, where they shall be taken and possessed Nov. 1 to Dec. 31.

Varying hares and cottontails when brought from without the State may be bought and sold at any time.

Wild deer. Only those having horns not less than three inches in length may be taken from Oct. 1 to Nov. 15.

A person who has not been a resident of the State for at least six months, or an unnaturalized person, or an alien resident, or non-

resident, shall take out licenses, the cost of which will be \$20.50. If a resident of the State for over six months and a citizen, the charge shall be \$1.10.

### New Jersey Game Law.

SYNOPSIS of acts of the New Jersey Legislature relating to fish and game adopted at the session of 1913, all of which are now in effect:

Chapter 36.—Prohibits the placing of any rye or food in salt water within 400 feet of any ice, marsh or meadow, bar or bank, or heaped sea weed not covered with water, for the purpose of decoying water wildfowl so that the same may be shot at while feeding; also prohibits the shooting at water wildfowl while feeding where food of any kind is known to have been sown, deposited or placed.

Chapter 55.—Open season for black bass, Oswego bass, white bass, calico bass, crappie or pike perch, from June 15 to Nov. 30, both dates inclusive. Open season for pike and pickerel, May 20 to Nov. 30, both dates inclusive.

Chapter 56.—Provides that hatchery raised trout may be sold at any time for food purposes if properly tagged, and said tag shall be removed only by the consumer. (Open season for brook trout, April 1 to July 15, both dates inclusive.)

Chapter 73.—Prohibits the hunting of water wildfowl from any sandbar not covered by water.

Chapter 114.—Permits regularly organized or incorporated associations holding what is commonly known as "field trials," but only upon license obtained from the board of fish and game commissioners.

Chapter 120.—Open season for quail, rabbit, squirrel, only the male English or ring-necked pheasant, ruffed grouse, prairie chicken, wild turkey or Hungarian partridge, from Nov. 10 to Dec. 15, both dates inclusive. Penalty for taking any of the above between October 10 and Nov. 9, both dates inclusive, \$100.

Open season for woodcock, Oct. 10 to Dec. 15, both dates inclusive.

Chapter 126.—Unlawful by moonlight or with the aid of any artificial light to shoot or kill any skunk, mink, muskrat or otter, or to take any of the foregoing except by means of a trap, or to disturb or destroy any muskrat lodge.

Open season for trapping skunk, mink, muskrat or otter, Nov. 15 to April 1 following, both dates inclusive.

Chapter 135.—Unlawful to sell any squirrel, deer, game bird or song bird, but ducks, geese, brant and rabbit are excepted; provided that black and mallard ducks, pheasants and deer raised on game preserves or coming from another State may be sold at all times if properly tagged.

Chapter 147.—Provides for the issuance of a license to any person desiring to engage in the business of raising and selling domesticated English ring-necked, Mongolian and other pheasants, mallard and black ducks and deer, or any of them, in a wholly inclosed preserve. Cost of license, \$5 yearly. Licenses heretofore granted at \$25 each remain in force until Dec. 31, 1916.

Chapter 157.—Unlawful to hunt with a hound or firearms, or to go into the woods or fields with a hound or firearms, except only

during the season for quail, etc., but this prohibition does not interfere with hunting for snipe, woodcock and deer in the legal season therefor. By special permission of the Board, foxes may be hunted with hounds from Dec. 15 to March 30, the last date mentioned inclusive.

Chapter 162.—Prohibits the taking of any lobster in Cape May county, within three nautical miles of the coast line for five years.

Chapter 176.—Unlawful to take in any part of the State any crappie or calico bass measuring less than six inches.

Chapter 186.—Unlawful to manufacture, sell, barter, loan, give, buy, or have in possession, or use or shoot any air gun, spring gun or pistol or other weapon of similar nature, in which the propelling force is spring or air, ejecting a bullet or missile smaller than three-eighths of an inch in diameter with sufficient force to injure a person. (This is a general act of the State, the enforcement of which does not devolve upon the fish and game commission.)

Chapter 248.—Prohibits taking of striped bass in salt or fresh waters by means of a net except from Nov. 15 to March 1, both dates inclusive, and prohibits the catching, killing or possession at any time any striped bass less than ten inches in length.

Chapter 303.—Authorizes the board of fish and game commissioners to give permission to kill and destroy the European starling when the governing body of any municipality shall decide that they are so numerous in such municipality as to become a nuisance.

Chapter 307.—Makes it unlawful to fish with pound nets in any of the fresh or salt waters of the State, excepting Atlantic Ocean, Sandy Hook and Raritan Bay, and that portion of Delaware Bay within Cape May county.

### Important Changes Made in California Game Laws.

BY GOLDEN GATE.

THE fortieth Legislature is now at an end after having passed a number of measures of interest to sportsmen and others interested in the conservation of game. Early in the session a strong effort was made to remove ducks from the list of game that might be sold and the controversy over this created quite a stir. That those interested in this measure becoming a law gained a substantial victory may be judged from the fact that the act that was passed provides that wild ducks may be sold only during the month of November instead of through the season of four and a half months as formerly, and the limit has been reduced from twenty-five a day and fifty a week to fifteen a day and thirty a week. Rabbits and wild geese may be sold, but no other protected game. The limit on valley quail has been lowered from twenty a day and 140 a week to fifteen a day and thirty a week, the same as on ducks. The daily limit on mountain quail is ten, on doves twenty and on grouse four.

The new law provides that the open season on ducks in districts one and six shall be from Oct. 1 to March 1, two weeks longer than formerly. In the other four districts it will be from Oct. 1 to Feb. 15.

The deer season has also been changed and will be open in districts one and three between Aug. 15 and Oct. 15. It formerly lasted until

Oct. 30. In districts two and five, it will be from August 1 to Oct. 1, and in four and seven from Sept. 1 to Nov. 1.

The trout season in districts one and four will open April 1 and extend to Nov. 30, instead of Nov. 1, as formerly. An important change has been made in the steelhead trout law in that the use of nets is prohibited. Formerly the fish could be taken by this means in tide water. A closed season has been placed on fishing in and above tide water during January, February and March, but tide water fishing will be allowed during December. Salmon fishing is allowed the year around, but during the season closed to market fishermen not more than three a day may be taken by line or spear.

### Nessmuk.

LOCKPORT, N. Y.—*Editor Forest and Stream:* My last week's FOREST AND STREAM was only received this evening, and then through the courtesy of B. V. Covert, to whom it was delivered by mistake, with his own, Saturday when he was away from home. I have read the final chapter of Nessmuk's last story and the poem, "At Anchor" from Forest Runes, which I have read much since the story was commenced; and that reminds me that about forty years ago I received a communication from Nessmuk in answer to a letter I sent to him through FOREST AND STREAM, which had published an article of his about the price of hunting dogs. Someone had paid \$250 for a dog, and Nessmuk claimed that no dog was worth that amount. That the best dog he ever saw was a black pointer that Frank Delong, of Lockport, N. Y., paid only \$10 for.

I had just had some experience with a black pointer, and I wrote Nessmuk about it. He wrote that he lived in Lockport in 1845 (probably after the "Contraband Incident") and one day he borrowed Mr. Delong's dog to go for quail south of the (then) village of Lockport; he said the dog duly found the quail, and he (Nessmuk) duly missed the first two birds. The dog was duly disgusted, and putting his tail between his legs, started for home.

I afterward learned that George W. Sears (Nessmuk) worked at his trade (shoemaking) on the second floor of an old wooden building on the corner of Main and Market streets, afterward occupied by an old shooting friend (also a shoemaker), John R. Macdonald, with whom I had many hunting trips for quail, woodcock and snipe.

J. L. DAVISON.

### To Kill Rats.

MIGHTY few country places but what have their full quota of rodents—poultry killers, grain destroyers and disease carriers.

No one need suffer from rattish depredation if they will use the following prescription: Soak balls of cotton in carbon bisulphide, drop into the rat holes and go away. Carbon bisulphide, being heavier than air, will search out every nook and cranny of the hole, and after following Mr. Rat to his last stand, overpowers and strangles him to death.

OREGON has enacted a no-sale-of-game law, and her Legislature has importuned California to do likewise.

## An Angling Reminiscence

By H. H. THOMPSON

A BROOK that crossed our farm coursed through a gulf, at the lower end of which on the hillside was a spring which emptied into a pool in the brook at the foot of a large tree, from behind which one could get his baited hook into the water "unknown" to the wary trout. Behind that tree I made my first acquaintance with brook trout, plus a fondness for that sort of angling that increased with the years and culminated in mid-life in bringing to my creel in the Adirondacks a string never equalled in that region within my knowledge.

In one of my annual excursions to those grand old woods three of my intimate friends were my companions—Prof. I. N. Loomis, E. J. Benson and the artist, Augustus Rockwell. Our first camp was where the Cold River joins the Raquette River below the foot of Long Lake. We arrived one Thursday noon, finding an old camping ground unoccupied for some time, redolent of litter and decay. The whole afternoon was spent by all hands in renovation, and before night we had a new shanty, open in front, and roof and sides of freshly-peeled spruce bark whose white and fragrant sides made the interior of our tabernacle intensely enjoyable. The solid comfort of this sylvan cabin was perfected by the artist's unique contribution to the general hilarity. Though neither hunter nor angler, he always found some way of endearing himself to any party fortunate enough to include him. He had the guides drag to camp some small hemlock trees, the tips of whose limbs we clipped with our jack-knives, and against the log supporting the lower ends of our rafters we set upright a row of these and against them another row, and so on, until we had a level, compact hemlock mattress—the *ne plus ultra* of a camp bed. It was late August and the trout had left the rapids for deeper and cooler waters up stream, but we got plenty of small ones at the landing for a hearty supper.

Next morning, Loomis and I started up the Cold in one of the boats which we soon had to abandon, finding the river wide, shallow and bedded with stones from pebble size up. After laborious wading for about four miles without sight of deep water or trout signs, a halt was called. It was my first outing for a twelve-month and I was nearly fatigue-blown and the tall, heavy Professor became vociferously skeptical on the subject of Adirondack trout. We stood where the Cold was joined by a rivulet between high shelving banks roofed by the branches of large forest trees, and he proposed to investigate it. I approved, and noticing a bend of the river above, said I would go

up there, and finding no game, would consent to beat a retreat toward camp.

Judge of my rapture on finding above an immense pile of floodthrash a wide, deep pool which, my woods experience told me, covered a cold spring to which large trout had retreated. Sure of this, I sat down on the bank, lunched, imbibed and smoked. From the shore the water was quite shallow for several feet to a narrow, deep channel beyond, which was a large, flat stone from which one could watch the center of the blessed pool. The step over that channel on to the slimy stone—a foot under water—was risky, but my sureness of good luck and the hobnails of my wading shoes took me over safely and the fun began.

My first cast hooked a leviathan that, for fear of disturbing the rest of the family, was at once withdrawn from the pool. Getting the line into my fingers, he was drawn with speed and care hand over hand to the shallow, roily water, where I stood. When his belly struck a stone and the hook was released, I pitched down and gripped my right across his neck. His size and beauty excited me and so did his two-pound weight. The second capture weighed exactly the same.

As soon as the Professor came down to the river I beckoned him up, and wading across the stream above the bend, he plied his rod opposite me until the trout got onto our little game and sulked. In such places, however active they may be for a while, trout will suddenly stop biting and the jig is up. No more two-pounders were taken, but we had the toil and pleasure of backing to camp twenty-six trout that weighed thirty pounds—a string I never saw matched anywhere.

The next day the Professor piloted Benson up to the spring hole and they made a very fine catch. That night the latter went up to the lake and bagged a fat deer, so that our camp could not be in better condition for a Sunday's restful enjoyment, while the guides, from the deer's mect, were curing the best jerked venison I ever saw.

### Tulare Lake Opened to Seine Fishermen.

BY GOLDEN GATE.

THE anti-seining ordinance which has been in force in Kings county for the past four years has been removed by the board of supervisors at the suggestion of Deputy Fish and Game Commissioner A. D. Ferguson, of Fresno, and Tulare Lake is now open to fishermen, with the exception of a small area at the point where Kings River empties into that body of water. The lake is rapidly diminishing in size, and as

the present season is an extremely dry one, there will be but little waste water emptied into it. Thousands of acres of its waters are now very shallow, and tons of splendid food fish will be destroyed if something is not done to meet the conditions. It is pointed out that Tulare Lake contains more large catfish and black bass than the rest of the State put together, and that the fish will find a ready market. Black bass are being taken that weigh from twelve to fifteen pounds and splendid sport is enjoyed there with hook and line. The new seining ordinance went into effect on May 24.

### Conviction Secured in Important Case.

BY GOLDEN GATE.

GEORGE KNIGHT, an angler arrested recently following a fishing trip to Bear Valley, was tried before F. F. Oster, of San Bernardino, and found guilty of having more than the legal limit of trout in his possession. The case attracted much attention as it hinged entirely upon the identification of the species of fish taken and established a precedent that will be followed in the future by fishermen in that section. One hundred and fifty pounds of trout confiscated by the State were held as evidence against Knight, who is well known as an angler in Southern California. Knight contended that the fish were steelhead, and that he had a right to take fifty of them in a day while the State officials declared that the trout were rainbow, and that therefore ten pounds and one fish was the legal limit. It developed at the trial that steelheads had been planted in Bear Valley, and that rainbow trout had been placed in the lake. N. B. Scofield, an expert from San Francisco, explained the difference between the two species of fish and convinced the jurors the fish before them were rainbow trout. In passing judgment Judge F. F. Oster took occasion to criticize the present game laws, but ordered the defendant to pay a fine of \$100, which was done on the spot. The second charge of shipping an illegal number of trout was dismissed.

### Fishing in California.

BY GOLDEN GATE.

THE season has been rather late in opening on most of the streams in Northern California in spite of the fact that the waters of most of these are lower than is usually the case. Light showers have been falling with regularity, and the large streams have been too muddy for successful sport. Cold weather has been the rule, and in but few places is fly-fishing successful.

In the Feather River country some fair sport is being enjoyed in the small streams, but in the main river the water is muddy and live bait is the best lure. There is but little snow now on the ground, and with a cessation of the showers the streams should soon get into excellent shape. On Long Valley and Poplar

Creeks, near Cromberg, some good catches are being made, and a number of San Francisco folks are camping there. Among these are Clyde and Clifford Lane, Mrs. Winifred Patterson, Mrs. Thomas Taylor and Fred J. Goble and wife. The fish there run to small sizes, but are quite plentiful. At Blairsden but few fish are being taken, and the roads to the lakes back of that place have not been opened as yet, as the snow is still on the ground. At Eureka Lake several limit catches of Eastern brook trout have been made. Beldon will be visited on June 1 by a delegation of anglers from the California Anglers' Association, and several of the party will make a hurried trip up the North Fork, where some very large fish are being landed. Among others who will make this trip will be Dr. L. T. Cranz.

Sport on the Klamath and Eel rivers was interfered with recently by a heavy rain storm, but the water is now clearing, and a big run of steelhead trout is now in progress. Steelhead fishing is generally good in coast stream, the cool weather having prevented the sudden shrinkage in the water supply that was expected.

Some very good striped bass fishing is being enjoyed around San Francisco Bay, but only a few devotees are making visits to the fishing grounds, many anglers preferring to fish for trout while they are still plentiful. At Belvidere Point, Al. Wilson recently landed a 13-pound striped bass, and Louis Eaton secured two large fish at Wingo Slough on a recent trip. That some large bass are now to be had can be judged from a recent catch made by net fishermen in Sonoma Creek. A fish was taken there by Martinez Toza and two companions that weighed seventy-eight pounds, and which almost destroyed the nets before it could be landed.

In case the bill now before Governor Johnson is signed, amateur fishermen over eighteen years of age will be called upon to pay an annual license of \$1, and those fishing for profit will have to pay \$10.

GARDEN CITY, N. Y., May 28.—*Editor Forest and Stream:* I get FOREST AND STREAM regularly and look forward to its coming, so greatly do I enjoy it.

LYNN BOGUE HUNT.

"Lo, Jim, fishin'?"  
"Naw, Drownin' worms."

—From Harper's Weekly.

## Sensational Dry-Fly in Nova Scotia

By EDWARD BRECK

SCENE: Shelburn River, May 10, water full and rapid, but very smooth. Cabot's canoe and mine hanging to rocks. Weather lovely. Air and water full of May flies, the first, dark-bodied, filmy-winged kind with the two very long tail feelers. Trout estimated, by the rises, at between two and three millions. Aha! Now Cabot shall see the real thing—watch. This little hair's-ear looks something like the flies on the water, or this tiny March brown—wait, here's a still nearer one; don't know what it is. Quickly I attach it to the sweet, fine, orange-colored leader that Mr. Orr, of Portland, just sent me to try. My word, you can't see the leader, but—a gentle swish—how lightly it settles on the water, and how prettily it lies there cocked and floats down stream right over the spot where that one chap has, by actual count, gulped down a half a dozen Mays. Ha! There it goes! Now for that famous "turn of the wrist." Hullo, what's the matter? A guffaw from Cabot. "He wasn't after your fly—he took one just next to it!" I try him again, and again, and once more, and then two or three times after that—rien—nichts—nothing. No matter, there are some five or six rises on the surface continuously. He isn't the only fish in this pool by about three million. Watch this, it's bound to float over that spot where that bunch are feeding below that rock. Look! isn't that bully? None of your wet fly for me! Just glue your eye to this cast. Now! False cast; false cast; false cast; then back, pause, forward out over. The fly takes a little jump into the air and falls as softly as my hand strokes my pet porcupine. "Hm," grunts Cabot.

"Pretty enough, but how about transferring a couple of those fish to the frying-pan? I'm getting peckish. Scoffer! Barbarian! Dweller in outer darkness! Fasten your optic to that Hardy masterpiece. There it goes! Down, down; there it is now just over the spot! Now, now, now—well, I'll be eternally gall-dinged! What's the matter with the dratted fish?" "Hee hee!" from Cabot. Same scene repeated in different parts of the pool with several flies. At last came the time. There was a splash, a check and a fish had my dry fly. "There you are, you old croaker. Now, watch me play him." And I did so, with a display of grace and sagacity meant for Cabot's admiration. Finally, after the fish was all in, Charles the Strong (he of the "Tent Dwellers") met him with the net and held up to our eager gaze one medium-sized yellow perch, the only one caught that day.

Seriously, dear editor, there is no exaggeration in the above account. I did indeed, in our sixteen days of glorious fishing, take three small trout on the dry fly, two of them (quarter-pounders) on a red tag, the smallest fly I ever possessed, but I think the fish were drunk. We did, however, have great sport with the dry fly—fished wet. I used it half the time, except in heavy water, and had fine success. Dave Abercrombie tells me that his experience with the dry fly in northern waters has been about as described above.

Note.—If you watch the flies on the water that the fish are feeding on, you will see that in these waters at least their legs and feelers are in motion. Those of a dry fly are not. Q. E. D.!

## Muscalonge in Northern Minnesota

By W. D.

AS to muscalonge in Northern Minnesota: While an occasional musky, or 'lunge, as the fish is called in Canada, of thirty to thirty-five pounds, or even larger, is taken, it may be set down that the day of these large muskies has past. The party starting out now on a fishing trip with the expectation of taking several of these fish of this size is doomed to be disappointed.

A 15-pound musky is now regarded as a pretty fair fish, and anything over twenty pounds is considered a big one. With a rod of about eight ounces the angler has a good deal of sport with a 'lunge even as small as say ten or twelve pounds.

People who know how to fish for them and are satisfied with muskies running from small ones up to say twelve or fifteen pounds ought to be able to enjoy a vacation spent on the Mantrap chain of lakes in Northern Minnesota. These are fine lakes, reached by the Great Northern Railroad, from St. Paul and Minneapolis.

Leaving these cities in the morning, Dorset is reached about 6 o'clock in the afternoon.

Dorset is the railroad station for these lakes. There are several good places to stop if one enjoys being out in the woods.

The proprietors meet expected guests at Dorset with conveyances, and the drive from the station is from two to ten miles, according to which place you choose. There are log cabins comfortably furnished and well screened. The board is good and they have pretty good boats. The charges are reasonable for what one gets.

There are guides whom the angler may employ or not as he chooses. Unless the angler is on to the game and knows his business, he had better take a guide. If he knows the game as well as they do, he doesn't need them.

Ordinarily July is pretty fair for muskies there and September, after the roth, still better, but seasons vary and sometimes August has proved good. It depends on the season. The experienced man knows how it is. Sometimes he gets them and sometimes he doesn't; he can't control conditions.

The people about Mantrap Lakes use a Skinner spoon No. 7 nickel. It is all right.

Lowe's combination spoon No. 7 or 8 is a killer there, too. The writer prefers that and a hand-made double spoon, copper and brass, which he uses.

To recapitulate:

Place—Dorset, Hubbard county, Minnesota.

Waters—Mantrap Lakes.

Resort—Several.

Surroundings—Woods and lakes.

Lodgings—Comfortable log cabins.

Table Board—Good.

Boats—Rowboats but quite good.

Terms—Reasonable for the service.

Most Successful Spoons—Lowe's No. 7 or 8 combination; Skinner's No. 7 nickel, copper.

### Illinois Casting Club.

CHICAGO, Ill., May 26.—*Editor Forest and Stream:* On the 24th, with a clear sky, the wind varying from the southeast to the southwest, the velocity twenty-one to thirty miles an hour, the quarter-ounce accuracy bait, quarter-ounce distance bait and the light tackle distance fly were run off.

Owing to the high wind, the light tackle accuracy, dry fly, was postponed. The scores of the events completed are as follows:

Quarter-ounce, accuracy bait:	
Wehle .....	98.5
DeGarmo .....	99.4
Amman .....	99
Whitby .....	99.6
Pierson .....	99.1
C. P. Clifford .....	97.3
Quarter-ounce, distance bait, feet:	
McFarland .....	49 2-5
DeGarmo .....	98 1-5
Wehle .....	78 4-5
Light tackle, distance fly, feet:	
DeGarmo .....	95
Humphreys .....	98.7
Lindcr .....	99
McFarland .....	97.4
Hornstein .....	97.7
Hartley .....	99

Whitby .....	132 3-5
Amman .....	62 2-5
Amman .....	87

There was no contest at our pool on Sunday, May 25, in order that the members might accept the invitation to the tournament of the Chicago Fly-Casting Club at their pool in Garfield Park.

Notwithstanding the cloudy sky and very low temperature, our club was well represented by members and ladies, and the casting began on schedule time with a large gathering of casters from all the clubs in this vicinity, including those whose names are familiar as leaders wherever the game is played.

Two events were concluded during the morning hours—quarter-ounce accuracy bait and accuracy dry fly.

The large assemblage of ladies and gentlemen was now called to a banquet tent erected on the lawn near the pool, where, on bountifully supplied tables, lunch and steaming coffee were served.

After the refreshments the remaining two events, half-ounce bait and accuracy fly were cast.

The apparent good natured rivalry was fast and fervent throughout the day, and the Illinois Casting Club quite maintained its reputation.

Brother DeGarmo was awarded the beautiful cup in the dry fly accuracy for a score of 99 7/15; Brother Amman was second with a score of 98 2/15.

In the accuracy fly, Brother Amman received the cup, his score being 99 5/15.

Brother Whitby secured three ribbons for place in the two bait and one of the fly events, while Brother Hartley's score of 98.9 gave him second place in the half-ounce accuracy bait event.

The Chicago Fly Casting Club, with its ladies, was most delightfully cordial in its reception of the visiting members of the other clubs and their ladies, and all came away declaring they had a very enjoyable day.

J. D. ANWAY, Sec'y.

### San Francisco Fly-Casting Club.

THE medal contest series of 1913 of the San Francisco Fly-Casting Club are as follows:

Contest No. 5, held at Stow Lake, Saturday, May 24; wind, variable; weather fair.

Event No. 2, Accuracy, per cent.:			
L. G. Burpee .....	97.44	Stanley Forbes .....	98.56
C. H. Gardner .....	98.20	C. H. Kewell .....	93.40
J. F. Burgin .....	98.40	C. G. Young .....	98.32
E. A. Mocker .....	97.52		

Re-entries:			
E. A. Mocker .....	96.23	L. G. Burpee .....	97.12

Event No. 3, delicacy:			
	Accuracy, Per Cent.	Delicacy, Per Cent.	Net Per Cent.
L. G. Burpee .....	97.52	98	97.56
C. H. Gardner .....	97.24	97.50	97.37
J. F. Burgin .....	98.24	97.30	97.57
E. A. Mocker .....	98.20	99.30	98.55
Stanley Forbes .....	98.12	99.10	98.41
C. H. Kewell .....	98.36	99.10	98.53
C. G. Young .....	98.20	99.30	98.55

Re-entries:			
E. A. Mocker .....	97.52	98.40	98.16
L. G. Burpee .....	98.32	97.30	98.1

Event No. 4, half-ounce lure casting, per cent.:			
L. G. Burpee .....	90.8	Stanley Forbes .....	97
C. H. Gardner .....	97.6	C. H. Kewell .....	91.5
J. F. Burgin .....	94.1	C. G. Young .....	95.2

Dr. W. E. Brooks .....	95.7		

Re-entries:			
E. A. Mocker .....	91.2	F. J. Cooper .....	96.5
H. B. Sperry .....	97.4	Paul M. Nippert .....	99

Event No. 5, half-ounce lure casting, average feet:			
C. H. Gardner .....	130	Sam Wells .....	52
C. H. Kewell .....	27	Paul M. Nippert .....	110
Stanley Forbes .....	137	F. J. Cooper .....	71
Dr. W. E. Brooks .....	90		

Event No. 7, light tackle, long distance, feet:			
C. G. Young .....	69	Dr. W. E. Brooks .....	82
J. F. Burgin .....	74	Sam Wells .....	85
E. A. Mocker .....	78	Paul M. Nippert .....	75
Stanley Forbes .....	80	H. B. Sperry .....	79
C. H. Kewell .....	82	F. J. Cooper .....	83

The longest cast in distance lure, half-ounce was 205 feet made by F. J. Cooper.

Judges, F. G. Cooper, C. H. Kewell, J. F. Burgin; Referee, C. G. Young; Clerk, E. O. Ritter.

THE shell of a crab when once hardened cannot grow and the crab is forced to moult or cast off his outgrowth shell from time to time and grow a new one a little larger. A crab, says the Virginian Pilot, when growing this new shell is known as a soft shell or "soft crab," and at such times he is, of course, especially subject to attack from his enemies, as the shell which is his natural armor is wanting. In museums there are exhibits of as many as fourteen cast-off shells of a single crab, beginning with a very tiny one, and each one just a size larger than the last.

"INDIANS" OF ILLINOIS CASTING CLUB.

Published Weekly by the  
 FOREST AND STREAM PUBLISHING COMPANY,  
 CHARLES OTIS, President.  
 W. G. BEECROFT, Secretary. W. J. GALLAGHER, Treasurer.  
 127 Franklin Street, New York.

**CORRESPONDENCE**—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

**SUBSCRIPTIONS:** \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

**ADVERTISEMENTS:** Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

### ARE YOU A NESSMUK?

It is so seldom we get a subscription cancellation that when such a thing does happen, it is a matter of comment from President to office boy, with an implication from the entire office force that the editor isn't on to his job. With a guilty conscience the editor took up one of these "matters of comment" the other day and wrote the gentleman who was divorcing himself from our happy family. We asked him to tell us why our menu wasn't as filling and palatable as it used to be. In a few words he said it was just as filling, but not so satisfying. He missed Nessmuk, Rowland Robinson and others, all of whom, unfortunately, are in the land beyond.

We print in another column the letter complete, and we *urge* every subscriber to read it. First of all in digesting the contents of the communication you will get news in the way of fishing and shooting territory; secondly, it possibly will recall to some experience they have had in this and other sections, which, if put on paper, would develop material identical to that suggested by our correspondent, "native hunting stories," those "that have the natural tang and flavor of the United States."

Nessmuk, Kingfisher, Rowland E. Robinson, Mather and the like were not discovered; they found themselves and wrote in their homely way their experience to FOREST AND STREAM. Our editors encouraged and helped them over the rough ground of authorship, until finally they "arrived," and upon their final departure left an unfilled void.

No writer is "discovered"; he must find himself. This he does by putting on paper an experience or in fiction an imagination. He sends it to an editor who, if not too busy, reads it, makes suggestions and improvements, and announces that he has "discovered" a great writer, advertising the fact in much the same way a prospector promotes a mine, the difference being that the prospector dug and the editor read a story and recognized a possibility.

There are many, many Nessmuks, et al., among our readers; all they need is developing.

Probably you have a good story of an experience thus far unwritten. If so, send it to us. Never mind your inexperience as a writer; our editor will chip off the corners and plane down the rough without taking away "the natural tang" or human interest.

So once more we say—read our correspondent's letter and write us your story. In the meantime we thank Philip C. Tucker, of Clearwater, Florida, for furnishing material for this editorial, and for coming back, as he did, into the great big happy FOREST AND STREAM family spread all over the civilized world.

### FREDERICK A. OBER.

FREDERICK ALBION OBER, one of the very earliest writers for FOREST AND STREAM, died May 31, at his home in Hackensack, N. J., after an illness of several weeks.

Forty years and more ago Florida was not the fashionable resort that it has since become. The Everglades were then spoken of as a region of mystery, and the peninsula of Florida was supposed to hold a multitude of great lakes that were the home of beasts, birds, reptiles and fishes, many of which were thought to be unknown. In 1873 and 1874 FOREST AND STREAM, in connection with the Smithsonian Institution, sent Fred Ober—who then wrote over the pseudonym Fred Beverley—into the Lake Okechobee region, and the reports of his explorations there were printed in the earliest volumes of FOREST AND STREAM. Following that, in 1876, 1878 and 1880, Mr. Ober collected birds in some of the lesser Antilles. He discovered twenty-two new species of birds, and the results of his investigations were published in the Proceedings of the Smithsonian Institution. In 1881, 1883 and 1885 he traveled in Mexico, and later in Spain, Africa, South America and the West Indies.

Mr. Ober was a great traveler. He was a member of the Explorers' Club, New York Academy of Sciences and American Antiquarian Society. He served as United States Commissioner for the Columbian Exposition at Chicago in 1893, having charge of exhibits of birds.

Mr. Ober was the author of about forty books dealing with the countries in which he had traveled. Most of these are boys' books, which had a good popularity.

Mr. Ober was born in February, 1849. He is survived by a widow and two children.

### THE TRAP, PRESENT AND FUTURE.

THE present extraordinary activity in the sport of clay target shooting throughout the United States has a felicitous significance for its permanency and broader growth. It is a situation specially gratifying to two classes in a manner distinct from each other, namely, those who are interested in trapshooting as a matter of sport, and those who are interested in it as a matter of business. On the one side are all the target shooters; on the other side are all the manufacturers, while a third indeterminate class, by no means small, may be said to be related to both classes.

This general activity augurs well for this form of competition, as it pertains to the future. Therefore, it must possess all the essentials of a true and beneficent sport for the public, else

it would not evoke such general enthusiasm or so firmly hold the constant interest and participation of its devotees.

It is doubtful whether target shooting has ever been so general in the United States, considering the activity of the clubs of the small towns as well as those of the great cities, and the unusually great number of tournaments held and to be held in every section. New trapshooters, especially among yacht and country clubs, are engaging in the sport in great numbers, and but few are retiring from it. Thus sport and business are both flourishing in a sound, broad manner.

Another decidedly encouraging sign is the number of women taking part in this wholesome sport. Hardly a club event is found nowadays without at least one woman entrant. To us, this is a sure sign of increasing popularity of the sport. It now begins to interest the whole family—a wholesome state of affairs, surely.

### THE VAGRANT DOG IN THE GAME FIELD

A FACTOR in the maintenance of the game supply of a region is the vagrant dog which is permitted to run at large in the cover in close season. It makes no difference whether the animal is well bred or cur. A dog, when permitted to wander about at will, exercises many of his wild traits of a predatory nature. He has no perception whatever of property rights. He will chase rabbits with unbounded enjoyment. He will rob the nests of game birds, kill and eat the young quail and partridges, and betimes he will harry and kill sheep. Hounds in particular are conspicuous offenders. They have an insatiable appetite, are eminently vagrant and predatory in their habits, and from their keen sense of smell, great endurance and skill in pack work, have superlative powers of predatory destructiveness. If they fail in their efforts to secure rabbits, the eggs of quail, partridges, hens, etc., they do not hesitate to invade cornfields when the corn is in the milk, tear it down and feed on it much after the manner of hogs. In the south the vagrant cur is particularly and offensively destructive. No owner has any right to permit his dog or dogs to run at large, and the more offensive or destructive vagrant dogs become, the less value will dogs have in the eye of the law. The vagrant dog is one of the chief problems which game preserve owners have to meet, but there is no doubt that when it becomes serious enough it will be fully settled, and not at all to the advantage of the dog.

### BASS IN NEW JERSEY.

ELSEWHERE in this issue we print a synopsis of the fish and game laws of New Jersey adopted at the 1913 session of the State Legislature. Its principal features are the opening of the bass season from June 15 instead of May 30, and the open season for rabbits, squirrels and upland game birds from Nov. 10 to Dec. 15, instead of Nov. 1 to Dec. 31, and change in date of the open season on woodcock from Oct. 15 to Dec. 31 to Oct. 10 to Dec. 15.

Chapter 303 permits killing of European starlings under proper authorization. This last paragraph was incorporated to give relief to Montclair and other villages where the starling has become a pest.

Forest and Stream is the official organ of the National Archery Association.

# The Point of Aim

By EDWARD B. WESTON

**I**N shooting the long bow in target practice, the archer aims, or sights, as really as does the rifleman, but his method is different. For instance, at most ranges he does not sight the spot he intends to hit.

The right hand is always drawn to the same place, whatever the shooting distance may be, so in order to cover a longer distance, the left, or bow hand, must be raised. In a word, the archer changes his front sight instead of his rear sight, as a man using a rifle would do, in shooting different distances.

The spot aimed at is called the "point of aim."

To illustrate, let us consider that a man of average strength and skill is shooting a York round, which is made up of the 100, 80 and 60 yard ranges. We take it for granted that every step in making a shot is correctly done, for if it is not, the fact that his "point" is right will not enable him to hit the gold.

Let us suppose that our archer is shooting at the 80-yard range, for at that distance the gold and the point of aim are more likely to coincide than at any other distance. Now, as he is ready to loose, let him see the gold immediately above the point of his arrow.

If all conditions are favorable, and the shot perfectly executed, a gold should be scored.

At 100 yards the point of aim will not coincide with the gold, but will be a distance above it.

He finds a spot on a tree, or on a building, or if not a spot, he can quite accurately estimate the proper distance above the target to sight at. Let him look directly at the "point," and indirectly at the gold. He will have no trouble in seeing both, if he keeps both eyes open.

At the shorter range of 60 yards the point of aim will not coincide with the gold, but will be a distance below, or in front of it.

The "point" will now be some distinct spot on the ground, or an estimated distance in front of the target.

Let your direct vision be on the "point," and your indirect vision on the gold.

At the short ranges where the point of aim is in front of the target, some good archers look directly at the gold, and indirectly at the point of aim.

If you adopt this method, be careful that you do not look so intently at the gold that you neglect the "point" altogether.

This is the hunter's method, looking only

at the object to be hit, and will not do for target shooting.

Let us now refer to our diagram (next page).

The archer is supposed to be shooting at 60 yards.

A is the point of aim. The line produced from the archer's eye over the point of the arrow to A represents his direct vision. The line C represents his indirect vision, and the line D the flight of the arrow.

The dark line represents a straight line from the archer to a spot directly below the gold, on which, on a calm day, the point of aim must be located.

If the archer adopts the second method of aiming, the line C represents his direct vision, and the line to A his secondary vision.

If there is no distinct "point" to be seen, the dotted line B represents a distance estimated by indirect vision, to where the "point" should be.

In the practice of archery there are a few fundamental principles which must be followed, while to the ordinary rules for shooting there are exceptions, which the archer may follow as better suited to his individuality than are the rules themselves.

Fig. 1.

Fig. 2.

Fig. 3.

Fig. 4.

DIAGRAM REFERRED TO ON PRECEDING PAGE.

This brief article is not a treatise on archery, but only a few suggestions for the beginner.

In the figures one of the white lines is drawn from the archer to the target, and the other at right angles to the first and parallel with the target.

Figure 1—The archer has taken his position (observe the position of the feet) and nocked his arrow.

Figure 2—The left arm has been extended, the bow carried to the line running from the archer to the target, and turned to a nearly vertical position.

Figure 3—The left hand has been raised,

and the right hand drawn to its usual stopping place, both at the same time, and at the same time the point of the arrow has been brought as nearly as possible on to the point of aim.

The aim is taken. Now comes the critical moment.

With the arrow within one-half inch of full draw, the draw is completed, slowly and without a jerk, and the arrow loosed.

Figure 4—This shows the archer's left arm, right hand and elbow, as they should remain for about two seconds after the arrow has been loosed.

Study the figures critically; they speak for themselves.

**Old Scores of a Young Archer.**

CHICAGO, Ill., June 1.—*Editor Forest and Stream:* In 1910 we had reason to believe that Mary Williams would some day become one of the greatest archers in the world. She had been instructed by her father, Dr. Carver Williams. Though only twelve years old, she had already taken part in two National tournaments.

On June 11, at a regular meeting of the Chicago Archery Club, she made the following National round score, the highest ever made by a Chicago woman archer:

	60yds.	50yds.	Total.
Mary Williams .....	43 251	22 130	65 381

In the six great public meetings in England, in the previous year, the following were the only higher scores made:

At the Grand National, Miss Legh scored 70-396, and at the Leamington meeting, Mrs. Foster made 68-382.

On the next day, June 12, she made a Columbia round of 69-437, and on June 15 she made a team round of 75-451.

Since that year her time has been taken up with her school work, and her archery has been neglected. But we have no doubt that in the near future she and her sister Priscilla will return to the sport regularly and astonish us with more high scores. She was a child wonder.

EDWARD B. WESTON.

# YACHTING

Forest and Stream will give a weekly digest of Yachting and Motor Boating events from all over the country.

**Ticks From the Ship's Clock.**

EVEN the ever ready bellows of the genial Secretary Sinkinson couldn't augment the air-supply sufficiently to make a sailing breeze for the Knickerbocker Y. C. regatta last Saturday.

THAT lusty baby, now a year old, known as the Little Neck Y. C., celebrated its onth birthday last Saturday with a nautical talk by Commodore Bill Parkinson. He says—and it's therefore true—that the fleet has doubled since last year. He even goes so far as to promise a regatta soon.

WORK of improving the channel in Pawtuxet (R. I.) Cove may be postponed until after the present yachting season, as the result of objections entered at a hearing given by the commission in charge of the work at the Rhode Island Y. C. last week.

There was an appropriation of \$3,500 by the last session of the General Assembly to complete the work begun last year, when an appropriation of \$5,000 was spent.

FOUR of the one-design 17-footers building at Stearns & McKay's for Buzzards Bay are finished and the keel of the fifth is out.

JOHN ALDEN has brought to New York the

auxiliary yawl Polly, recently purchased by John W. Kendrick, of New York. A new auxiliary engine was installed in the yawl last week by Murray & Tregurtha.

THE tenth annual Block Island race of the New York Athletic Club will be started off Wortleberry Island, June 21. This is open to all decked or cabin yachts in cruising trim of 20 to 35 feet waterline. Time allowance will be ten minutes per over all foot; yawls and auxiliaries will receive 5 per cent. additional. In addition to the sailing race the sixth annual power boat race to Block Island will also be started the same day. Boats taking part in this race will compete for the Day Cup and the Lip-ton Viking trophy.

THE Ponce, Philip F. du Pont's boat, was the real surprise in the Philadelphia-Overfalls Lightship race. The Ponce was not built for racing, but she finished third, not far behind Caliph and Dream, and beat out such heavily powered boats as the Marguerite II., Barbara II. and Black Duck

THE trial races for the selection of American motor boats to compete for the British international trophy in English waters in August will be held on Monday, Tuesday and Wednes-

day, July 7, 8 and 9. The course will be five miles, place not yet decided upon.

**Chicago Y. C.**

CHICAGO, Ill., May 31.—Giddy Gaddy won the second "pup" race of the season, sailed over the Chicago Y. C.'s course to-day, making her second win in two races. The next big race of the season is the Columbia Y. C.'s annual Michigan City contest, in which there are more than thirty boats already entered. This race is the banner event of the early part of the season, and more boats, power and sail, take part in it than in any other contest of the year.

The challenge of the Manhasset Bay Y. C., received this week, makes the third challenge received from the East, and this big yacht race will be one of the most important ever sailed on Lake Michigan, for it brings the East and the West together in conflict for the first time in history. The long discussed question of whether Eastern sailors are better than the men of the Great Lakes will be settled in this race, for there will be three Eastern craft and four Western boats in the going. Summary:

	Start, 3:00.	Finish.	Elapsed.
Giddy Gaddy, A. P. Church.....	4 12 49	4 12 49	1 12 49
Fido, R. A. Lippincott .....	4 14 10	4 14 10	1 14 10

**Eureka Yacht Lifts San Francisco Cup.**

FOR the first time since the race for the Perpetual Challenge Cup was inaugurated in 1895, and this event became the yachting classic of the coast, the coveted trophy will leave this port. The yacht Oreades, of Eureka, turned the trick on May 25, and the cup is now in custody of Commodore A. W. Way. Typical San Francisco Bay weather ruled during the race, or rather, the event, as an accident to the defending yacht, the Challenger, placed that craft out of commission soon after the start. The local yacht secured a strong lead immediately after the start had been made and was thoroughly at home in the stiff beat to windward and in the choppy sea. Less than half-way out to the Presidio buoy, however, a new bronze turnbuckle on the bobstay parted, and the mast snapped with a crash, throwing the canvas to the deck and slightly injuring several of the crew. The disabled craft was towed to Sausalito, while the Oreades continued over the course.

At first it seemed as though the visiting craft could not possibly cover the fourteen-mile course in the four-hour time limit, as such slow progress was made on the beat out, but later the wind died down slightly and the course was covered in 3h. 40m. 43s. actual time.

Oreades was handled by Skipper W. S. Way, R. J. Kellen, W. S. Clark, Bernard Bartlett, J. E. Clark, Rex L. H. Hicks, Jr., and William Kressman. The Challenger was manned by Skipper W. G. Morrow, A. F. Stevens, Gordon Morrow, Ludwig Koster, Harry Hellen, Alban Wray and W. K. Smith.

**Quincy Y. C.**

QUINCY, Mass., May 31.—Mudjekeewiss won in Class D. In Class B, Waweenock had a walkover, being the only entry in the class. In Class C, "Jack" Kitson's Hush finished first, but lost to Dr. Jones' Gleamer on time allowance. The judges were Hon. John O. Haul, George S. Morse, W. A. Huy and G. M. Wight. The summary:

Class D.

Comet, T. W. Turner .....	1 06 35

**Buckeye Y. C.**

WORTHINGTON, Ohio, May 30.—L. A. Sackett and Commodore H. D. Freeman, in the Windward, won the catboat race in the regatta events.

Paul Horst, with his Nomad, won both the quarter and mile canoe races. The motor boat race was won by Dewey Luchtenberg, while Guy Sackett and William M. Frisbie were the victors in the comedy duck-collecting race in their motor boat, the Folly.

L. A. Sackett and Frank Mooney, a team that never has met defeat, gained an easy victory in the canoe-tilting contest. Mrs. Frank Mooney, in the Dancing Sally, won first prize in the ladies' sailboat race.

**Barrington Y. C.**

BARRINGTON, R. I., May 31.—The Barrington Y. C. held its spring meeting to-night and elected a regatta committee as follows: Thomas Delano, Jr., Charles H. McKenna, Isaac F. Foster, William L. Cross, Emerson Pease, Henry H. Tingley and William J. Kenyon. The house committee was directed to have an opening day, June 14.

**Canoeing**

**Associated Canoe Clubs of the Hudson.**

THE annual regatta, on Decoration Day, of the Associated Canoe Clubs of the Hudson resulted as follows:

1. One man, double blade, junior, half mile: First, J. Clark; second, F. Molnar; third, J. Earlsen. Points—Ft. Washington 4; Inwood, 5.
2. One man, single blade, senior, half mile: First, E. Kelly; second, G. Esselborn; third, T. Zuk. Points—Ft. Washington, 6; Inwood 3.
3. Tandem, double blade, junior, half mile: First, Fisher and Clark; second, Marshall and Esselborn; third, Molnar and Earlsen. Points—Ft. Washington, 1; Inwood, 8.
4. Tandem, single blade, senior, half mile: First, Zuk and Earlsen; second, Molnar and Kelly; third, Marshall and Finn. Points—Ft. Washington, 8; Inwood, 1.
5. Club four, double blade, half mile: First, Inwood C. C., Marshall, Esselborn, Clark and Kelly; second,

- Ft. Washington C. C.; third, Yonkers C. C. Points—Yonkers, 1; Ft. Washington, 3; Inwood, 5.
7. Open canoe sailing, 40ft. sail area, three miles: First, L. Friede; second, R. Weiss; third, E. Ahrens. Points—Yonkers, 3.
8. Deeked canoe sailing, 90ft. sail area, three miles: First, L. Friede; second, E. Harrison; third, H. L. Zuick. Points—Yonkers, 1.
9. Mixed tandem, single blade, quarter mile: First, Miss Marshall and T. Zuk; second, Miss Gibbons and E. Kelly; third, Mr. and Mrs. Perkins. Points—Ft. Washington, 8; Inwood, 1.
10. Handicap sailing, unlimited sail area, three miles: First, L. Friede; second, E. Harrison; third, H. L. Quick. Points—Yonkers, 1.
12. Tilting handicap, finals: First, Esselborn and Holmgren; second, Finn and Baldwin; third, Marshall and Perkins; fourth, Clark and Fisher. Points—Inwood, 9.
13. One man, single blade, junior, half mile: First, Wm. Bartholomae; second, J. Clark; third, D. Finn. Points—Inwood, 9.
14. One man, double blade, senior, half mile: First, E. Kelly; second, F. Molnar; third, E. Fisher. Points—Ft. Washington, 8; Inwood, 1.
15. Tandem, single blade, junior, half mile: First, Bartholomae and Neumann; second, Clark and Fisher; third, Legrant and Thom. Points—Yonkers, 3; Inwood, 6.
16. Tandem, double blade, senior, half mile: First, Molnar and Vandoll; second, Esselborn and Ahrens; third, Kelly and Zuk. Points—Ft. Washington, 6; Inwood, 1½.
17. Tail-end race, one-eighth mile: First, J. Marshall; second, D. Finn; third, F. Baldwin. Points—Inwood, 9.
18. A. C. C. H. trophy (held one year), half mile; club four, single blade: First, Ft. Washington C. C., Kelly, Molnar, Earlsen and Zuk; second, Inwood C. C.; third, Yonkers C. C. Points—Ft. Washington, 5; Inwood, 3; Yonkers, 1.
19. War canoe race, half mile: First, Yonkers C. C.; second, Ft. Washington C. C.; third, Inwood C. C. Points—Yonkers, 5; Ft. Washington, 3; Inwood, 1.
20. Point trophy (held one year): First, Inwood C. C., 62½ points; second, Ft. Washington C. C., 52 points; third, Yonkers C. C., 15 points; unattached, 22½ points.

awarded the various winners of events. The winners were:

Freak Single—Won by J. J. Smith, Swastika Club; Clarence Pheteplace, Samoset Club, second.

Tail-end Race—Won by Gus Reiss, Swastika Club; C. St. Pierre, Swastika Club, second.

Mile and a Half Around the Island—Won by William French, Cocheco Club; Gus Reiss, Swastika, second.

Each canoe carried one passenger.

Tilting (Combination Crews)—Winchester (Pheteplace and French) beat Medford (Smith and Newman).

**A. C. A. Membership.**

**NEW MEMBERS PROPOSED.**

Atlantic Division.—Samuel S. Whyard, 969 Summit avenue, New York city, by Frederick Grant.

Central Division.—James E. Murray, 341 Barnes street, Wilksburg, Pa.; S. Arthur Hazen, 5627 Rural avenue, Pittsburgh, Pa.; E. R. Albrecht, 302 Gray Building, Wilksburg, Pa.; all by F. D. Newbury; Adolph H. Knodel, 826 North State street, Syracuse, N. Y., by A. F. Saunders.

**NEW MEMBERS ELECTED.**

Atlantic Division.—6663, Gustave Ross, 326 West Twenty-eighth street, New York city.

Eastern Division.—6662, William W. Heckman, 176 Federal street, Boston, Mass.; 6664, John J. Smith, 333 Pine street, Providence, R. I.; 6665, Fred A. Schmidt, 33 Stadden street, Providence, R. I.; 6666, Gravers Graverson, 814 Main street, Waltham, Mass.; 6667, Everett W. Smith, 145 Brown street, Waltham, Mass.; 6668, Joseph F. Spoettle, 17½ Robbins street, Waltham, Mass.

**Eastern Division A. C. A.**

LAWRENCE, Mass., May 31.—Novelty stunts and features of paddling comprised the schedule of events this afternoon at Fish Brook on the Merrimack, the camp of the Eastern Division of the American Canoe Association. The sport was watched by a large number of canoe enthusiasts.

The tilting crews were the big card of the afternoon. Commodore Fred W. Cramphorn, of Woburn, was in charge. Loving cups were

- June 14.—Philadelphia, Pa.—Meadow Spring G. C. Wm. F. Letford, Sec'y.

**DRIVERS AND TWISTERS.**

If your score isn't in this issue, it's either because you didn't send it, late arrival, or that it was crowded out for lack of space due to tremendous amount of copy from the three open shooting days. Look for it next week. Please bear in mind, that copy for current issue must be in our office not later than Tuesday noon.

Greenwich Gun Club, of Greenwich, Conn., will hold shoots every Saturday, rain or shine. All shooters are invited. Covered platforms and grounds. Two automatic traps. Two events at 25 targets each, 25 cents entrance,

added target handicap for Du Pont, Hercules and Stevens trophies; two specials at 25 targets each, 25 cents entrance. Monthly prize for highest gross score. Optional sweepstakes. Large assortment of standard loads and shells for sale at 65c. per box. Boats leave Island Beach dock, near railroad station, every hour, on the hour. Boat also leaves Scobogna's dock, Stamford, at 12, 2 and 4 P. M. The ideal location for trapshooting, rain or shine. Refreshments on grounds. Registered tournament on July 4, Aug. 2 and Sept. 1.

W. G. BEECROFT.

**Mt. Holly G. C.**

Mt. HOLLY, N. J., May 28.—Inclement weather reduced the attendance and the interest here to-day. H. P. Wilson was top of the entire shoot with 147 out of 150. Neaf Apgar was high pro with 146. Scores:

*N Apgar .....	146	W Clatts .....	133

**Nebraska Team Shoot.**

NORTH PLATTE, Neb., May 29.—Three days of as fine shooting as one would ask were ended here to-day. The program called for 200 rocks on days one and two, and 150 on day three. Lester German, who tells how good Du Pont brands are, was first pro with 531 out of 550. Harvey Dixon, from the amateur ranks, outshot the whole outfit with 535. The State championship, at 50 targets, in strings of 25, was won by C. C. Tappan with two perfects.

*The Ammunition You Use  
and the Dealer Who Sells It*

IN every part of this country where there is a dealer who is alive to the developments taking place in the ammunition world, sportsmen are getting Remington-UMC.

Remington is spreading faster than any other name in the ammunition history of America.

The dealer who is specializing in Remington-UMC., is taking the aggressive lead in the ammunition trade of each community.

He is a man worth finding if you are critical about getting uniform and reliable loads.

Whether you shoot a Remington or content yourself with some other make of gun—you are interested in this man because you want good ammunition.

The biggest name in the arms and ammunition world today is Remington-UMC. The ammunition that carries it is used from one end of the country to the other—not only in Remington firearms, but in every standard make of shotgun, rifle and pistol used in the world of sport.

*The exact load you want for the  
kind of game you are after.*

**Remington Arms-Union Metallic Cartridge Co.**  
299-301 Broadway, New York

**Canandaigua Sportsmen's Club.**

SYRACUSE, N. Y., May 29.—Canandaigua Sportsmen's Club held a shoot at Lakeside Park to-day. There were two principal matches, one a handicap event that brought out fourteen contestants, and the other a jack rabbit series that had nine shooters. The handicap event resulted as follows:

Soule.....	4	60	Eiseline.....	13	50
Kibbe.....	7	50	Stoddard.....	0	32
Mason.....	4	46	Gilligan.....	15	50
Briggs.....	0	41	Martin.....	0	31
Sterling.....	6	46	Wilbur.....	15	32
Van Wormer.....	12	50	Caple.....	0	23
Barringer.....	0	37	Boyce.....	0	35

The result showed a tie between Soule, Kibbe, Van Wormer, Eiseline and Gilligan. Eiseline won on the shoot-off, Soule taking second place.

The jack rabbit event resulted as follows:

Mason.....	45	Gilligan.....	22
Sterling.....	38	Kibbe.....	40
Harrison.....	44	Stoddard.....	41
Patterson.....	40	Weller.....	43
Kinney.....	46		

The surplus remaining of the entrance moneys, which was \$1 per entrant, was divided among those whose scores were in the 10, 9 and 8 class, at the rate of 50, 30 and 20.

**Elm Leaf G. C.**

READING, Pa., May 31.—I enclose scores of Elm Leaf Gun Club, located on Mt. Penn, over 1800 feet above sea level. This is an ideal shooting ground—cement walks and trap house. A fine lawn and a fine shady park are back of the firing-line, with lots of benches and a pure sky for a background.

Reed, 21, 18; J. Baldwin, 20, 19, 15; H. Sindle, 21; S. G. Francisco, 14; J. H. Francisco, 18; W. Kussmail, 18; F. M. Sindle, 16, 23; E. Klotz, 20; W. Hassinger, 23, 24, 20; H. Hassinger, 15; W. Story, 18; B. Morris, 12; E. Damm, 18; J. Weiler, 19; J. Smith, 15; J. E. Leslie, 20; C. E. Bedford, 17; D. Kern, 12; William Freese, 10; M. Weiler, 17.

**Bon Air G. C.**

PITTSBURGH, Pa., May 30.—Following are the scores made to-day by the Bon Air Gun Club:  
First Class—Snee 90, Born 89, Lautenslager 87.  
Second Class—Whalen 84, Slater 79, Stahl 78.  
Third Class—Rectenwald 77, Marshall 77, Bradshaw 69.  
Fourth Class—King 51, Hagerling 37, Staring 34.

Siwanoy C. C.

MT. VERNON, N. Y., May 30.—A dozen of the reliables turned out for the Decoration Day shoot, which constituted the finals in the Du Pont and captain's trophies.

C. H. Hadlock won the Du Pont trophy by making a total score of 165, his nearest competitors being M. R. Guggenheim with 159, and L. G. Bond with 158.

Dr. R. J. Held won the club championship in the 100 target scratch event by breaking 89. G. L. Yates and M. R. Guggenheim, with 87 each, tied for second place.

The first take-home trophy was won by G. L. Yates with a full score, and the second take-home trophy by W. M. Wylie on the shoot-off, just beating Miss Jessie Thorpe for the honor by one bird.

The captain's trophy, which is based on the miss-and-out plan, requires ten straight targets to constitute a leg. Messrs. Z. C. O'Hutt and J. P. Donovan had each won a leg on this trophy at previous shoots; neither were present at the shoot to-day. Dr. R. J. Held succeeded in winning a leg on this trophy, which became his by default on account of the other two winners not being present to shoot off. Scores:

Table with 2 columns: Name and Score. Includes Du Pont Trophy, 25 targets, handicap; Take-home trophy, 25 targets, handicap; Club championship, 100 targets, scratch.

Buffalo Audubon G. C.

BUFFALO, N. Y., May 30.—Under most favorable weather conditions, on beautiful grounds, sixty-one shooters shot through to-day's program. Jennings was high gun with 168 out of 175. Mrs. L. G. Vogel shot a splendid race, getting 156. Seventy-one shooters shot in the merchandise event, King of Geneva pulling down a beautiful \$50 watch with 25 straight from 18yds.

Under the personal direction of Geo. Ginn, ably assisted by Mr. Winters, the office end of the program was efficiently taken care of, and a very short time after the last gun was fired, the word went out, "Come and get your money, boys." The merchandise event, a handicap affair, 16yds. to 23yds., at 25 targets, constituted an extra event and is not included in the following scores. The shooters expressed their appreciation of the prompt manner in which the tournament was conducted, and all stated they were coming to the State shoot on the same grounds, June 9, 10, 11 and 12. The regular program was finished by 1:30 P. M. The special event, the "Audubon Wa'k Back," attracted a large number

of shooters and proved a source of considerable profit to the club. Frank Wright won the first prize in this event. The following are the scores:

Table with 2 columns: Name and Score. Lists various shooters and their scores for different events.

Marion G. C.

MARION, O., May 29.—Forty-four shot through to-day. F. M. Edwards missed only 3 of his 150, which gave him top gun.

Table with 2 columns: Name and Score. Lists various shooters and their scores for different events.

Vergas R. and G. C.

VERGAS, Minn., May 29.—Only eleven shooters looked us over to-day. F. H. Allen took first money, tying Geo. Trent, top pro with 142. Vern Sugrue tied Ferguson, a pro gunner, on 141 for place.

Table with 2 columns: Name and Score. Lists various shooters and their scores for different events.

Cleveland G. C.

CLEVELAND, O., May 30.—The Decoration Day tournament of the Cleveland Gun Club was one of the most successful events of the kind ever run off on the grounds. Over ten thousand targets were thrown and two sets of traps were kept running all the time. Fifty-four shooters took part in the contest. Some of the scores were good and some very poor. The out-of-town boys walked away with most of the goods they came after. The scores follow:

Table with 2 columns: Name and Score. Lists various shooters and their scores for different events.

Table with 2 columns: Name and Score. Lists various shooters and their scores for different events.

Table with 2 columns: Name and Score. Lists various shooters and their scores for different events.

F. H. WALLACE, Mgr.

Brodhead G. C.

BRODHEAD, Wis., May 27.—C. P. Shumway was high over all to-day with 145 out of 150. The scores:

Table with 2 columns: Name and Score. Lists various shooters and their scores for different events.

Wilmington G. C.

CHESAPEAKE CITY, Md., May 28.—Rained all day, which no doubt cut the attendance in half. T. Martin won on 134. H. Linn Worthington was top pro on 142.

Table with 2 columns: Name and Score. Lists various shooters and their scores for different events.

BRADFORD GUN CLUB. BRADFORD, PA.

Hudson Gun Club.

JERSEY CITY, N. J., June 1.—Scores made at the Hudson Gun Club bi-monthly shoot, held this morning, with sixteen shooters taking part. Dave Engle, who has been having a lot of trouble with a new gun of late, came back to life this morning, and found out how to hold it so as to win high average with 89 per cent. Dave left the club house as happy as a lark, and promised to do better at the next shoot. Tom Kelley was the runner up with 83, and also trimmed young Hetherington in a 50-bird race with a score of 43 to 40. The day was one of the pleasantest that we have had at our grounds for the last two months, and the management was disappointed at the small attendance, but trust that on our next shooting date, June 15, they will turn out and make excuses why they all did not win the State championship at Red Bank on June 5, 6 and 7.

Dick Young, of the Jersey City Gun Club, was at the grounds this morning with his usual game of "bull," talking shoot and showing his roll, but when the long green was flashed by Joe Whitley, Dick got under cover very quickly, and found out that he had business elsewhere. No bluffs here, Dick; they don't go.

Table with 3 columns: Name, Score 1, Score 2, Score 3, Score 4, Score 5. Includes names like B Beyersdoft, J Pape, W Drew, J Williams, W Roach, C von Lengkerke, D D Engle, W Gebhardt, H Pape, J W Hetherington, Jr., T Kelley, G Hutchings, J Whitley, H Ruffer, S Metz, T Lynch.

Anolotan G. C.

WASHINGTON, D. C., June 1.—The Anolotan Gun Club, of this city, held a very successful shoot on the afternoon of May 30. It was a merchandise affair at 100 targets, shot in five 20-target events. The shooters were divided into three classes—A, B and C. Jos. H. Hunter won first in Class A, scoring 94; C. B. Wise was second with 93; E. W. Ford third with 91, and Miles Taylor fourth with 88, while G. D. Kirk, shooting a new single gun, scored 84 and was tied by J. A. Brown.

W. D. Monroe, O. F. James and Capt. Wm. Mitchell tied on 82 for first place in Class B; Geo. W. Peck scored 82 for second place and was all alone, while M. D. Hogan was third with 79, and Eugene Culver was fourth with 78.

In Class C, W. C. Duvall and Geo. A. Emmons were first with 73; C. S. Wilson second with 71; Dr. Barnes third with 70, and W. A. Wenner won fourth with 66.

The targets were thrown fully 50yds. The afternoon was dark, with rain threatening, which finally broke about 3 o'clock, delaying the shooting for half an hour. All the participants received a prize, and from the highest to the lowest, they were all worth carrying home. None of them could be placed in the "plunder" class. Following are the scores:

Table with 2 columns: Name, Score. Includes names like Hunter, C B Wise, E W Ford, M Taylor, J A Brown, G D Kirk, W D Monroe, O F James, Capt Mitchell, Geo Peck, Jr., M D Hogan, E Culver, Dr A B Stine, Dr A Parsons, W C Duvall, G A Emmons, C S Wilson, W W Barnes, W A Wenner, R T Bray, Lieut Withers, Lieut Baum, J M Green, Walter Ferguson, H Bohnke, Myles Taylor.

Robin Hood G. C.

THE regular holiday shoot of the Robin Hood Gun Club, of Staten Island, New York, was held on Decoration Day, it being the final shoot for the 20-gauge Winchester gun given by G. F. Hutchings on Washington's Birthday, to be competed for until Decoration Day, the best score at 50 targets to be the winner. Three men tied on 50 with the aid of their handicaps. Scores:

Table with 2 columns: Name, Score. Includes names like Hutchings, Meyers, Beyersdoft, Gerbolini, Nick, Curry, Conelley, Creighton, Pauly, Bush, Scofield, Smith, Wohlforth, Gerbolini, Curry, Creighton, Hutchings, Scofield, Beyersdoft, Conelley, Re-entry for Winchester gun, Shoot-off of tie for Winchester gun.

Pastime G. C.

STRATFORD, Ont., May 24.—R. Day and J. E. Jennings tied for high gun to-day with 142 out of 150. In the shoot-off Day cracked 24 against 23 for Jennings, thereby tucking the trophy in his trunk. N. Long broke 140 for place. F. M. Fay, of Stevens Arms Co., was high over all with 144. White, of Du Pont, second with 143. Watson, of Dominion Cartridge Co., third with 112.

In the two-man team race Day and Glover won out with 47 out of 50. Fisher broke straight, and, with Turnbull, got second.

Wm. Boles handled the secretary's job to a nicety.

Table with 2 columns: Name, Score. Includes names like E G White, J E Jennings, S G Vance, R Day, K C Turnbull, J Payne, T Taylor, A W Fisher, R M Watson, B Glover, W Miller, I P Aitchison, W Boles, F M Fay, T Savage, W Mander, W Pow, G Tilson, A Hare, J Vance, N Long, R Jordan, R Leitch.

# FOUR STATE SHOOTS

Testify to

Won by H. W. Cadwallader.....74 x 75
- Smith Cup  
Won by Jas. Scott.....25 x 25  
and 20 straight in each of 3 shoot-offs

It's so easy to see and understand why "*steel where steel belongs*" shells are the best, that they are the choice of shrewd, up-to-date trap-shooters everywhere. Are they successful? The above is just one chapter of the story.

### THE PETERS CARTRIDGE COMPANY, CINCINNATI, OHIO

NEW YORK: 60-62 Warren Street - T. H. Keller, Manager  
 SAN FRANCISCO: 583-585 Howard Street - J. S. French, Manager  
 NEW ORLEANS: 321 Magazine Street - Lee Omohundro, Manager

#### Latonia G. C.

If the first registered shoot of the club, held on the Cincinnati Gun Club's grounds, May 30, is a sample of what the club proposes to do in the future, then it will surely take a leading position in this section of the trapshooting world. Over forty shooters were present, nearly all of them shooting through the program of ten 15-target events, and over half of them entering the special event for the valuable merchandise prizes which were put up by the club. Not only were the local shooters well represented, but there were many out-of-town visitors, among the latter being: J. A. Simpson, W. G. Green and Uncle John Dea, of Maysville, Ky.; J. A. Penn, J. I. Brandenburg and Ed. Cain, of Dayton, O.; J. G. Francis and Dr. O. D. Maddox, of Harrison, O.; Wm. Link, David J. Smyers, E. C. Shafer and E. L. Walker, of Hamilton, O.; T. J. and T. E. Donald, of Felicity; A. H. Sunderbruch, of Williamsburg, O.; L. J. Squier, Pittsburg, Pa., and George W. Maxwell, of Hastings, Neb. There was a big crowd of spectators, which included many of the fair sex, and the latter seemed to appreciate the good work of the contestants thoroughly.

The day was hot, well up in the 90s, but a strong wind made the heat endurable, although it played the mischief with the flight of the targets, and caused some of the boys to fall in their average.

The dinner served by Mrs. Gambell in the club house was fully up to the reputation she has earned as a caterer to the appetites of shooters, and not one but did ample justice to the good things provided.

Shooting began about 10 o'clock over one trap, and after dinner it was found necessary to put the second trap in commission, in order to finish the program. Everything worked smoothly, and the last event was brought to a close in good season. The office was in charge of L. J. Squier, which means that there were no

delays or mixups of any sort. Roger Davies lent a hand in the afternoon, and the winners were at the window receiving their wealth soon after the regular program was finished. J. A. Simpson was high amateur with 142; Ike Brandenburg, came second with 139; W. G. Green and F. C. Koch tied for third place on 136; then came Ed Sampson, one of the old-time cracks of the Cincinnati Club, with 134. Ed. Cain and R. F. Davies divided sixth money on 133 each.

Of the professionals, G. W. Maxwell was high with 138, which is a lower score than he averages. R. L. Trimble came second with 134. The money-back purse was made up of one cent for each target trapped, amounting to \$63.90; the \$1 extra included in the entrance, \$36.80; added by Interstate Association, \$50; total, \$150.70. The losses footed up \$77.65, in sums ranging from 40 cents to \$6.30, leaving a surplus of \$73.05, which was divided among the six high guns in the usual way. The special event had twenty-two entries, and as there were the same number of prizes, every one went home happy. The high men were given the first choice, the others following in order of their scores. The list of prizes included hams, carving sets, amber shooting glasses, .22-cal. rifle, shell case, books, orders for Gambell photos, etc. Cain and Link tied for high score on 46; T. E. Donald second with 45; Ike L. Bittner and Wilber in third place with 44 each. The first choice in the ties was decided by drawing lots, as the time did not permit shooting off.

#### Texas State Tournament.

TEMPLE, Tex., May 22.—Scorer suffered from wiggles. Even the printer can't read his hallucinations. There were eighty shooters present, 48,000 targets thrown. H. R. Biseley, of Dallas, Tex., won State championship, 47 out of 50. J. Jones and T. Bryant, of Temple, Tex., won team championship, 47 out of 50. In an event at 25 pairs, Forrest McNeir and Tul Bryant tied on 38, and Bryant won out in shoot-off at 10 pairs, with 15 to 14.

**Colonie G. C.**

ALBANY, N. Y., May 30.—The Colonie Gun Club, of Albany, held its first tournament to-day. This was an amateur tournament. It was the first tournament for a number of the boys. The program consisted of eight 20 and one 15-target events, a total of 175 targets. A stiff gale of wind prevailed all day, and it made hard shooting. The background is the skyline. It is the best ground in this respect that there is in this part of the State. We had the pleasure of having one professional with us. This was the only Sim Glover, of Du Pont and Ballistite fame. He had an easy walkover in pulling down the high average professional prize. Sim faithfully promised to display this prize at the coming State shoot. The club donated fourteen average prizes to those who shot through the entire program.

We had visitors with us from Gloversville, Amsterdam, Schenectady, Glens Falls, Mechanicsville, Troy and Red Hook. Mr. Bain, of Red Hook, is now organizing the Hudson River Trapshooters' League.

H. H. VALENTINE.

**Roanoke G. C.**

THE largest and most enthusiastic crowd of shooters since the opening shoot, faced the traps on Saturday afternoon at 3 o'clock, under conditions favorable, which made the sport very enjoyable. By reason of these facts the competition in each class was close and spirited. The weekly trophies offered by the club were won by the following members:

Scratch Class—Jamison first, Bloxton second.

Class A—Brigman first, Holland second.

Class B—Cox first, Huff second.

Class C—Nelson, Jr., first; Richards, second.

Stevens trophy—A N Nelson, Jr.

The scores made by the respective shooters were as follows:

Broke.	Pr.ct.	Broke.	Pr.ct.
*Goodrich	98 98	Shepherd	40 80
Jamison	48 96	J Poindexter	40 80

\*Professionals, and shot at 100 targets each.

**Westwood G. C.**

NINETEEN members attended the club shoot May 30, and the scores made show a great improvement over those which were put up in the early days of the organization. Before the snow flies again some of the boys will be able to give the top-notchers a run for their money, and they will not ask any handicap at that.

The trophy was won by J. A. La Boiteaux with 94 per cent., including his handicap. Other scores in the trophy match, including handicaps, were: Wm. Bohnert 89, F. Disser 89, A. Goda 93, Kaufman 89, O. Kling 83; A. C. Kuball 89, C. Kuball 92, J. Nocheck 91, C. Rybolt 92, Ruehlman 92, M. Stopper 92, J. Schneider 92, J. Connor 89, and C. Fox 92. The shooting of La Boiteaux has been very consistent, and he is rapidly approaching his old-time form. C. Rybolt is also getting into line again, and is doing some of the stunts he used to do in the palmy days at St. Bernard.

Shot at.	Broke	Shot at.	Broke
J Schneider	125 99	B Goda	75 48
C Kuball	100 79	O Kling	125 91

**New York State Shoot.**

BUFFALO, N. Y., May 31.—About the only conditions needful to make the State shoot an unqualified success are fine weather and a good attendance. Those who attend will find about everything in the way of prizes to satisfy the most exacting. Special prizes are still being received, the latest of which is an elegant trophy, to be presented by that sterling sportsman and all-round fine gentleman James G. S. Dey, of Syracuse, to the New York State amateur shooter making the highest score in the first 100 targets of the second day's regular program.

Should there be ties on this, the first 100 targets of the third day's regular program will decide this; and should there be further ties, they will be shot miss-and-out.

Some of our Buffalo Audubon Club members have donated a fine cup, to be presented to the amateur shooter, resident of any State other than New York, this including Canada, making the highest average for the three days' regular program. There will doubtless be several additions to the special prizes, which will be listed in due time.

Programs are out and are being mailed to shooters and club secretaries.  
C. F. LAMBERT, Sec'y.

# PARKER GUNS BUILT TO ORDER

THE manufacturers of the "OLD RELIABLE" PARKER GUN wish to announce that the present is a particularly opportune time to place orders for guns built to individual requirements, a feature of the gunmaking business to which they have paid particular attention.

Parker Bros. are prepared to supply guns in all gauges from 8 to 28 bore, stocked to suit any purchaser's requirements, and bored to give any distribution of the shot required from cylinder to full choke.

**PARKER GUNS REMAIN UNEXCELLED IN THEIR POWER OF HOLDING TOGETHER THE SHOT CHARGES UNDER HIGH VELOCITY AT EXTREME RANGES.**

## PARKER BROS. Meriden, Conn.

**THE CAMPER'S OWN BOOK**  
1913—SECOND SUCCESSFUL YEAR—1913

This is that BIG little book of the open—America's new outdoor annual. It comes to you bound as you see it here. It is "woody" from cover to cover—stirred by lake breezes and redolent of pine. It is endorsed by outdoor men everywhere.

Authors of country-wide repute have, with their enthusiasm and familiar knowledge, aided its making. Dan Beard, Emlen M. Gill, Captain Kenealy, Oliver Kemp, Dr. E. H. Forbush—these and others join this camp-fire council. They say their say about a hundred practical details that hold close interest for you; and they spin a yarn or two by the way.

"The Camper's Own Book" measures 8 x 5 3/8 inches over all. It is a goodly generous volume, with over 200 pages and 21 of the finest illustrations you've ever seen. Everybody should have a copy who believes that a day under the free sky makes the pomp of emperors ridiculous. And you're one—you know you are.

**PRICES PER VOLUME** All New Pictures

In the appropriate green T-cloth, \$1.00, postage 7c. In the paper (as shown in cut), 50c, postage 6c. If your dealer cannot supply you, we will send on receipt of price. We have on hand also a few copies in cloth of the 1912 issue (now out of print) at \$1.00 each, postage 6c.

**THE LOG CABIN PRESS :: :: 146 Worth Street, NEW YORK CITY**

## NEWFOUNDLAND

**A Country of Fish and Game. A Paradise for the Camper and Angler. Ideal Canoe Trips.**

The country traversed by the Reid Newfoundland Company's system is exceedingly rich in all kinds of fish and Game. [All along the route of the Railway are streams famous for their SALMON and TROUT fishing, also Caribou barrens. [Americans who have been fishing and hunting in Newfoundland say there is no other country in the world in which so good fishing and hunting can be secured and with such ease as in Newfoundland. Information, together with Illustrated Booklet and Folder, cheerfully forwarded upon application to

J. W. N. JOHNSTONE, General Passenger Agent, Reid Newfoundland Company, St. John's, Newfoundland.

### Delaware State Sportsmen's Association.

WILMINGTON, Del., May 31.—The second annual tournament of the Delaware State Sportsmen's Association, ending to-day, was highly successful. The entry list was over 100, a fact that speaks for itself as in favor with the popular idea. A few of the Du Pont Gun Club's lady members took part in the shoot for prizes, and showed good form with their tiny 20-gauge guns. Eleven pros shot along in the event for targets only, so that as there were about eighty prizes, pretty nearly every entry carried something back home with him.

For the 300 targets on the two days' program O. R. Dickey and W. L. Colfax, Jr., tied for high average among the professionals; J. T. Skelly and H. H. Stevens tied for second on 280, while Neaf Apgar was third on 278.

The chief honors must, however, be given to the amateurs, who outshot their professional friends by a solid majority. For the two days, C. H. Newcomb was high with 289, losing only 11 out of his 300; next to him came G. S. McCarty and Allen Heil with 287; in third place alone was A. B. Richardson, and H. E. Buckwalter with his 284 was in fourth place, but tied, so far as his individual score went, with that of the high professionals.

As the Caldwell trophy, won last year by Harry W. Kahler, goes to the amateur breaking the most targets in the 300 on the regular events for the two days, another Philadelphian, C. H. Newcomb, now holds the trophy until the next shoot. After the contests for the trophy in 1914 and in 1915 have been decided, all the winners of the trophy will have a shoot-off at 100 targets per man for final ownership. This will surely make a shoot-off well worth watching.

The Traffic Department of the Du Pont Company gave last year a sterling silver cup, to be competed for on lines similar to those under which the Caldwell trophy is competed for, with the single exception that the competition for the trophy is open only to amateurs who are resident of the State of Delaware. Alden B. Richardson, of Dover, won it in 1912 and duplicated his victory by taking it again this year with 286 out of 300. W. M. Foord was second with 261, and J. H. Minnick was third with 180.

The open State championship, a sterling silver trophy, open to any Delawarean, professional or amateur, was placed in open competition, and was the subject of a close fight with a plucky finish. The result was a win for James T. Skelly, who made the excellent score of 98 out of 100 targets, running his last 67 straight. His score of 98 was three targets better than his nearest opponents—Colfax and Minnick, who broke 95 each, Richardson landing with 94. Mr. Skelly's victory was a decidedly popular one, but it seems he is not to be allowed to wear his honors long without fighting for them, as it is understood that W. S. Colfax has already put in a written challenge to the present holder for a contest for the trophy at an early date.

Two runs of over 100 straight were made during the tournament, G. S. McCarty making a run of 109, while Buckwalter ran 106. The scores:

State of Vermont Shoot.

Four special prizes will be given at the registered tournament given under the auspices of the Springfield Gun Club on June 18-19, at Springfield, Vt. The Squier money-back system will be used, to which the Interstate Association donates \$100, which, together with the 1 cent per target and extra fee of \$1 charged each shooter, should take care of the losses of contestants who fail to win back their entrance fees, less price of targets.

The program for first day is 150 targets. Money divided Rose system, ratio points, 5, 3, 2, 1. Second day, 150 targets; two extras at 25 targets each; total 200 targets, \$20 entrance, \$100 added; total entrance \$12; division of money, same as first day.

The team championship contest will be events Nos. 11 and 12 on the program of the first day; these events will also be open as sweepstakes to all amateurs. Conditions: Open to any club of the Vermont State Trapshooters' League, five men per team, 50 targets per man, entrance \$10 per team; \$10 from each team divided 60 per cent. to highest and 40 per cent. to next high team, winning team to be adjudged the champion team of the State. Trophies for men of winning team. Competitors in team may at the same time enter for the sweeps. Entrance for the teams must not be paid to the tournament cashier.

The conditions governing the Vermont State championship trophy follow: To be shot for in open competition at this tournament, 100 targets per man. The shooter making the highest total in the 100 targets to be adjudged the owner of the trophy and the title of State champion at targets. All ties to be shot off at 25 targets per man. Any amateur who is a member of this Association shall be entitled to compete for the trophy. The Springfield Gun Club donates the trophy, to be emblematic of the individual amateur target championship of Vermont. This event will be the last 100 targets shot at on the second day of the tournament, beginning with the last 5 targets of event 7 and continuing through events 8, 9, 10, 11 and 12, all of which are open as sweepstakes to all amateurs.

Cincinnati Gun Club.

The attendance at the weekly shoot on June 1 was not up to the mark, the local shooters having had their fill on Decoration Day. John Sebreck, of Covington, was high man with 93, Butz and Le Compte being his nearest competitors with 90 each. J. Day did his best work, shooting at doubles, breaking 45 out of 25 pairs, but accounting for only 3 out of 50 singles.

The Foucar cup will be put in competition on June 8. The conditions are five contests at 100 targets each, shot in five 20-target events. Contestants must shoot in four of the five matches to qualify, total score for the entire series to count. All start on equal terms and handicap themselves for each succeeding contest, being allowed enough added targets to make their total 94; that is, if a contestant breaks 80 in his first shoot, he will be allowed 14 added targets in the second match; if he breaks 90 in the second contest, his handicap for the third will be only 4 targets, and so on. The matches will be held every other week.

Following are the scores of the weekly shoot: Sander 81, Willie 56, Butz 90, Gambell 85, Schreck 93, Sampson 84, Le Compte 90.

# Outdoor Life Means Appetite!

And foods with flavor and zest are doubly welcome on your outing—if they lighten the daily task of cooking.

place of dairy butter. Doesn't melt or become rancid. Delicious for sandwiches.

Take along a liberal assortment of Heinz 57 Varieties. And you'll have a meal always ready with little or no preparation.

Heinz Spaghetti (Italian style) —a new Heinz product already immensely popular—is just the thing for outing meals.

Take lots of Heinz Baked Beans. They're really *baked*—not steamed. Serve them hot or cold. They're tasty and nutritious.

Heinz Tomato Ketchup, Heinz Pickles, sweet and sour, Heinz Olives are among the "necessaries." And Heinz Fruit Preserves, Butters and Jellies will be appreciated.

Heinz Peanut Butter—use it in

Send for List of the "57 Varieties"

## H. J. Heinz Co., Pittsburgh, Pa.

Portland Gun Club.

PORTLAND, Me., May 30.—Memorial Day proved to be clear and fine, but the weather conditions were better suited for a yacht race than for trapshooting. A north-west gale prevailed during the forenoon, which caused the targets to do some wonderful stunts, but some good scores were made, regardless of the wind. Cliff Randall broke 91 out of his 100, but Billy Hill, the professional, broke one better. Hill's 92 made him high gun against the field. Steve Dimick and Silas Adams tied for second place with 88 dead, and Al Dow claimed third place with 81 dead. Will Darton and Pat Osborne broke 87 and 77 respectively. The shoot was one of the best Memorial Day events we have had for many years. The scores:

*Hill	92	W N Taylor	84
C Randall	91	E Randall	82
Dimick	88	Hinds	82
Adams	88	Weymouth	79
*Darton	87	*Osborne	77
Al Dow	86	Johnson	74
Coleman	84		

\*Professionals

Greensboro G. C.

THE following scores were made at practice shoots during the past week at our club. Some of our members are trying to get in shape for the G. A. H. and other tournaments nearer home. We are certainly glad to notice that Mr. Erwin has improved so much, and that Mr. Wheeler has found out "how" since he returned from Montgomery.

Scores made afternoon of May 27, 50 targets each:			
C W Wheeler	41	Fields	39
C Erwin	46	E C Singley	35
Dr Lawson	45	C Y Stollenwerck	26
J A Blunt	39		

Scores made afternoon May 29, 50 targets each:			
C W Wheeler	47	Dr A Lawson	42
C Erwin	45	M Fields	37
H M Hardenburg	44	E C Singley	28
J A Blunt	42		

Scores made afternoon of May 30, 100 targets each:			
J A Blunt	95	C Erwin (50)	46
C W Wheeler	89

**Northern Kentucky G. C.**

THE Northern Kentucky Gun Club will hold an all-day shoot on June 8, the program to consist of ten 15-target events, total entrance \$10, under the Squier money-back system. On June 15, a simi'ar shot will be given, especially for the benefit of shooters passing through Cincinnati on their way to Dayton for the Grand American. Everyone is invited to embrace this opportunity for a last day of practice before the big event, and the fact that Messrs. Irwin and Damcron are to manage these shoots insures a good time to all who attend. The club's grounds are beginning to look as before the flood once more, and in a short while all traces of the damage will be hidden. Come and have a good time and win something toward your expense account.

**Lehigh Rod and Gun Club.**

BETHLEHEM, Pa., May 31.—Fifteen hundred targets were thrown in the match between Lehigh Rod and Gun Club, Catasauqua Bryden Gun Club and the Allentown North End Gun Club. The five-man team match, 50 targets per man, was won by the Lehigh Club with a score of 225. Catasauqua's score was 218, and Allentown's was 190. The scores:

Lehigh Rod and Gun Club—Sobers 45, C. Miller 43, Bruch 47, Schrader 43, Werst 47; total, 225.
Bryden Gun Club—Brown 47, Steele 47, Peacock 36, Wilson 41, Richards 45; total, 218.
North End Gun Club—Kline 42, Licini 31, O. Miller 46, Kramer 38, Erdman 33; total, 190.

**Daniel Boone G. C.**

MARTHASVILLE, Mo., May 31.—Hot weather and farm work kept our attendance down again to-day. The following scores were made: John Mutert shot at 50 and broke 42; C. Kite (35) 34; Ahmann (25) 21; Koe'ling (25) 21; Bollman (25) 19; Meyer (25) 18.

J. O. WILSON, Sec'y.

**A SINGLE TRIGGER**

# Lefever Gun

in the hands of L. H. REID, Seattle broke 2115 x 2200 = 96.14% with ordinary factory loaded shells purchased from local dealers.

Mr. Reid, shooting at Interstate Association Registered Tournaments throughout the 1912 season, has the high average for the Pacific Coast.

The loads were regular factory loads; the LEFEVER bore, famous for the even pattern and penetration, assisted MR. REID to make this record.

Why don't you shoot a LEFEVER Single Trigger this year?

**Boston Terrier Club Show.**

ON the 28th the Boston Terrier Club held its specialty show at the Hotel McAlpin, New York city. Princess Iris, a bitch pup, from the kennels of Samuel Doran, showed for the first time and took the blue ribbon. She won also in the novice and limit classes. Her winning was checked by Mrs. George Pell's Wampagne Queen of Hearts. In the limit class for bitches, 17 and under 22 pounds, The Empress, by Dick Raffles and Sailor's Bud, owned by Franz J. Heilbron, won not only in competition for the best bitch, but best in the show as well. In the winners, Mrs. Pell's Wampagne Queen of Hearts got reserve. Mrs. George Pell won the Albarmarle-Hoffman trophy for the best exhibit. The Gregorian trophy went to Samuel Doran.

**Buying a Hunting Dog.**

It is remarkable how few breeders of high class hunting dogs realize the interest taken in field dogs in the great city of New York. Thousands and thousands of sportsmen, who live in all parts of the East, and many in the West and South, do business in Manhattan. In addition to attending to their commercial affairs, they talk shooting and fall trips with their New York city associates. It generally follows that while on the subject of hunting they get a line on a bang-up bird, rabbit or fox dog—owned probably in some small town out in the woods of some other State, but known about in the "center of commerce" through having been advertised there. It is safe to say the advertisement was found in and the dog bought through either FOREST AND STREAM or the New York Herald, and incidentally this last publication devotes a great amount of space to kennel news—written by men who know and read by men who want to know. When you are in New York town you'll find it worth while to get the Sunday Herald, and if you have high class shooting dogs to sell you'll do well to advertise in it.

By "NESSMUK"

Cloth, 160 pages. Illustrated. Price, \$1.00.

A book written for the instruction and guidance of those who go for pleasure to the woods. Its author, having had a great deal of experience in camp life, has succeeded admirably in putting the wisdom so acquired into plain and intelligible English.

**FOREST AND STREAM PUBLISHING CO.**

TRAPSHOOTING NOTES.

Greenwich G. C.

GREENWICH, Conn., May 30.—There were not as many shooters present to-day as the attractions warranted. J. Williams had a rabbit's foot day, getting everything but the championship of Westchester and Fairfield counties. This was won on a cracking good score of 94 out of 100 by W. A. Flinn, of Greenwich, Conn., who also tied for high gun, but was beaten in shoot-off by Williams with 19 out of 20. This latter gentleman made high run trophy on 60 straight, and doubles went with 34 out of 20 pair, after a tie with Wilson. Some of Siwanoy crowd came over, but too late for full program.

Table with columns: Name, Shot at, Broke, Doubles. Lists names like C G Blandford, J H Moran, F F Rodgers, etc.

Genesee G. C.

UTICA, N. Y., May 30.—About thirty-five marksmen from this city, Syracuse and other nearby places attended the annual Declaration Day tournament of the Genesee Gun Club, and although sharp shooting was out of the question, there was keen competition for position in every squad. The purse went to O. E. Carpenter, of Syracuse, with 122 out of 150. J. De Bee, of Chadwicks, and J. S. Conley, of Herkimer, divided second with 120. The scores:

Table with columns: Name, Targets, Scores. Lists names like Palmiter, Klock, Denning, etc.

Birmingham G. C.

THERE were eighteen shooters at the weekly shoot of the Birmingham Gun Club. Some good shooting was done, but nothing phenomenal. Some of the new shooters are improving nicely. We had with us Mr. Geo. Hillman and Clyde Hunter as professionals.

This was Mr. Taylor's first visit to the Birmingham Gun Club. Mr. Matchett was making his first attempt at targets. He is one of the Du Pont office force and promises to come often. The scores:

Table with columns: Name, Shot at, Broke. Lists names like O S Carl, H C Ryding, C J Penn, etc.

A Western Welcome Awaits You At Glacier National Park

From the moment you arrive at this great scenic wonderland, you are at home. The spirit of western hospitality envelopes you. Nothing that could possibly contribute to your comfort and enjoyment is left undone. You will find service without servility, liberty without license and real, genuine luxury in the very heart of the wildest and most beautiful spot in America.

Tours by Automobile, Four-Horse Stage, Launch or Horseback—\$1 to \$5 Per Day

One of the finest as well as the most novel hotels in America has just been completed at Glacier Park Station, the eastern gateway to the park. It is built entirely of huge logs, four feet in diameter and forty feet long. It offers accommodations for 200 guests. Every room is electrically lighted and heated. Has every modern feature including plunge pool, shower baths, sun parlor, huge fire places and open campfire in lounging room. Cuisine and service of the highest order. Rates—American Plan—\$3 per day. Tours by automobile, four-horse stage, launch and horseback, also camping and walking tours with competent guides—\$1 to \$5 per day. The famous chain of Swiss Chalet Camps throughout the Park provides unrivalled accommodations at the end of each day's journey. The Blackfeet Indians, whose reservation adjoins the park, are a feature of unusual interest. Visitors to the Park will be afforded frequent opportunities to be present at their tribal ceremonies and dances.

Novel Aeroplane Map in Colors and Travel Literature FREE

A postal or letter will bring you complete descriptive literature, fully illustrated, including a unique aeroplane map of the entire Park, all free. An interview with one of our representatives who has personally toured the Park may be arranged for upon request without any obligation upon your part whatever.

Write for full information today. H. A. NOBLE, General Passenger Agent Great Northern Railway

Dep't 101 St. Paul, Minn. 123a

Jersey City Gun Club.

JERSEY CITY, N. J., May 31.—There were twenty shooters out for the regular monthly prize shoot to-day, and as the day was superb for our business, the boys had a good time of it. In the 100-bird shoot for the two take-home prizes, Dr. Ittner won the first by hitting 83, and with an added bird handicap of 20 more, he romped home with the bacon with plenty to spare. J. W. Hetherington, Jr., won the second with 77 real hits and a batch of 16 for luck, making 93 for a total. The high scratch gun was G. H. Piercy with an average of 84 per cent., and Dixon, Burlington and Dr. Ittner tying for second place with 78 per cent. The scores follow:

Table with columns: Name, Targets, Scores. Lists names like Williams, Hetherington, Jr, Slater, etc.

Robinson G. C.

GLOUCESTER CITY, N. J., May 31.—In a blue rock shooting match on the grounds of the Robinson Gun Club, held here this afternoon, John Anderson defeated ten other marksmen by breaking nine out of ten targets, after an interesting contest. The scores follow: John Anderson hit 9, Edward Monahan 8, W. Bennett 8, W. Murray 7, J. Shea 7, Michael Monahan 7, W. Bechtel 6, John Mack 6, Thomas Neary 6, M. Miller 6, and W. Robinson 6.

Galion G. C.

GALION, O., May 28.—C. D. Coburn cracked 142 for first gilt to-day. Snuff Taylor was high pro with 144. A B Shobe..... 144 H H May..... 127 \*J R Taylor..... 143 A Ledgeth..... 125 C D Coburn..... 142 L Burton..... 124 F M Edwards..... 141 C T Stevens..... 124 H J Hopkins..... 141 J E Deisem..... 123 \*R O Heikes..... 141 E S Potts..... 120 U E Campbell..... 139 H D Smart..... 119 H Hirth..... 137 \*T G Barstow..... 124 J E Cain..... 136 \*L J Squier..... 119 Geo Miller..... 136 \*W R Chamberlain..... 141 H W Heikes..... 135 W H Bessinger..... 116 H Feidner..... 133 G F Round..... 114 Wm Webster..... 133 R R Shull..... 114 W H Archer..... 130 H H Freese..... 111 C D Manahan..... 129 A B Jones..... 108 R Whitney..... 128 J Stevens..... 86 J C Krupp..... 127 L H Hover..... 58

Medford G. C.

MEDFORD, Okla., May 30.—Several members of the Pond Creek Gun Club shot with us this afternoon. Considering the wind and the heat, the scores were good. Our club holds a 100-target matinee on Monday, June 16. Program will be five 20-target events, with \$5 added to each and \$5 to winner of high average, and 100 shells to the five low men. All sportsmen are invited. Scores made to-day:

Table with columns: Name, Shot at, Broke. Lists names like Siefert, Strider, Moore, etc.

New Hanover G. C.

WILMINGTON, N. C., May 30.—At our regular Friday afternoon shoot L. C. Grant made a clean score of 50. The rest of us were not in his class. The scores: Grant 50, Dreher 45, Penny 43, Underwood 38. J. H. D., Sec'y.

N C R Gun Club Grounds at Dayton, Ohio, Where Grand American Handicap Will Be Held

### Some Dayton Hotels

The Algonquin Hotel

The Beckel House

The Phillips House

The Atlas Hotel

# The Grand American Handicap

June 17-20, 1913

**D**AYTON is waiting to extend a welcome to the trapshooters of America and their friends at the Grand American Handicap, June 17-20.

The city is centrally located and quickly reached from all parts of the country. The Dayton Hotel Association is making special preparations for you, and there will be no other convention in the city at the time.

The N C R Gun Club Grounds, where the meet will be held, is one of the finest in America. The skyline is unbroken, hills at the back form a natural amphitheater and the shooters face the north. Special buildings, tents and equipment are being added for the shoot. It is situated on the city car lines, yet it is but seven minutes from the hotels and the Union Station. The management of the meet will be in the hands of the same men who handled the Ohio State Shoot so well in 1912.

**Come to Dayton and make the 1913 Interstate Association Meet the Greatest Grand American Handicap that has ever been held.**

TRAPSHOOTING NOTES.

Roanoke G. C.

THOSE who faced the traps on the club grounds on June 7, did so under the worst conditions, for they were compelled to shoot through a driving and blinding rain, which marred the sport and made good scores impossible. The weather conditions likewise kept away from the traps a number of the faithful ones. Attention is called to the fact that the shooting hereafter will not begin before 3:30 P. M. The weekly trophies offered by the club were won by the following members:

Scratch Class—First, G. S. Scholl; second, tie, Jamison and Shepherd. Class A—First, J. W. Poindexter; second, tie, Boyd and Hooper. Class B—First, M. R. Cox; second, Geo. Moore. Class C—First, F. Jones; second, E. C. Cocksey.

The scores made by the respective shooters are as follows:

Table with columns: Name, Shot at, Broke, Per Cent. Lists scores for various shooters like Scholl, Shepherd, Jamison, etc.

Buffalo Audubon Club.

BUFFALO, N. Y., June 7.—The first shoot of the Buffalo Audubon Club brought out only a fair number of shooters. No doubt more would have availed themselves of the opportunity of a little practice in preparation for the State shoot next week, had the weather been more propitious. As it was, only twenty-three gunners faced the traps. John Ebberts was high gun for the day with 88, and considering the high wind, this was a very creditable performance.

Great preparations are being made for the State shoot next week, and from all indications, a large crowd will attend. Prizes for the State shoot will be exhibited in Walbridge & Co.'s window the coming week. Scores:

Table with columns: Events, Targets, Name, Score. Lists scores for various events and shooters like Broderick, Kelsey, Covert, etc.

Herron Hill G. C.

PITTSBURGH, Pa., June 7.—The regular shoot this afternoon of the club was quite a success. The two 50-target races caused some enthusiasm among the faithful few assembled. The results of the sterling silver spoon race were as follows, 50 targets per man:

Table with columns: Name, Score. Lists scores for shooters like C. C. Irwin, Geo. Cochran, G. E. Painter, etc.

C. C. Irwin won Class A spoon; E. N. Gillespie, Class B spoon; Geo. Cochran, Class C spoon; J. M. Kable, Class D spoon. The result of the clock race, 50 targets per man:

Table with columns: Name, Score. Lists scores for shooters like G. Cochran, A. H. King, C. C. Irwin, etc.

Geo. Cochran won in Class A; E. W. Gillespie in Class B; A. S. Bishop, in Class C; M. D. Ullery in Class D.

Worcester Sportsmen's Club.

WORCESTER, Mass., June 7.—Weather conditions bad. Windy first day; second day thunder came up in middle of State championship event. Very dark and down-pour for about an hour; 1.6 inches fell in that time. Office run by A. E. Sibley, of American Powder Mills, and F. E. H. Sheldon, Stevens Arms Co.

The Massachusetts State championship was won by J. S. Snow, Boston A. A., with 96 out of 100. The two-man team shoot on the first day was won by Putnam and Griffith with 188 out of 200. First handicap cup second day was won by J. Clark, Jr.; second by L. Davis. Scores:

Table with columns: Name, 1st Day, 2d Day, Name, 1st Day, 2d Day. Lists scores for shooters like G. H. Chapin, J. Clark, Jr., C. W. Dotsen, etc.

Columbus G. C.

THE dates of the Twentieth Century Limited tournament have been changed from Aug. 14 and 15 to Aug. 21 and 22, as the big meeting and shoot of the Elks comes on the dates first set.

At this tournament six sets of traps will be used, and from the enthusiasm with which the announcement of the shoot has been received and the constant receipt of inquiries from all sections, the five-hundred mark will undoubtedly be reached in attendance.

The many different features contained in this program will appeal to the shooters in general, and for a small and a good time we intend to make this tournament a marker.

We are centrally located and have the facilities to handle all who come. The programs will be ready for mailing about the 15th of July. All applications for programs are being registered and same will be promptly mailed when out. Address Fred Shattuck, West Fifth avenue, Columbus, Ohio.

Lowell G. C.

LOWELL, Ind., June 5.—A very bad wind kept the targets going fast. The following scores were made at 200 targets:

Table with columns: Name, Score. Lists scores for shooters like W. Henderson, J. M. Barr, H. W. Vietmeyer, etc.

Cincinnati G. C.

THE weekly shoot on June 8 was fairly well attended. The day was pleasant, but a high wind made the targets extremely difficult. The Foucar trophy was placed in competition to-day, and will be shot for every other week until Aug. 3, when the final contest will be held. Westcott was high man in actual breaks with 90. Trimble was second with 87, and Sampson third with 86. Gamble and Butz defeated Schreck and Sander by 3 targets in a match at 100 targets. Scores:

Table with columns: Name, Score. Lists scores for shooters like Sampson, Randall, Rybolt, etc.

Team race, 100 targets per man: Gambell 83, Schreck 87, Butz 77-160, Sander 70-157.

J. KANNOFSKY, PRACTICAL GLASS BLOWER

and manufacturer of artificial eyes for birds, animals and manufacturing purposes a specialty. Send for prices. All kinds of heads and skulls for furriers and taxidermists. 369 Canal Street, New York.

Please mention "Forest and Stream."

THIRTY FIVE OUTING HANDBOOKS

THE NEW TEXT-BOOKS FOR OUT-DOOR WORK AND PLAY.

Already have been published. They deal with gardening, hunting, fishing, camping, dogs, horses, boats, exercise and 27 other divisions of outdoor life.

The Lexington Herald says "they are positively invaluable. Each one is prepared by an authority and each is complete in itself; yet so perfect a component part of all that

it is a pity to miss a single one of the little dark green volumes."

Superfluous paper and fancy binding are eliminated. Just meaty, interesting reading in attractive form. Price per volume 70 cents. Ask your bookseller or send for free OUTING Handbook catalogue.

OUTING PUB. CO. 141 W. 36 ST. N. Y.

Robin Hood G. C.

STATEN ISLAND, N. Y., June 3.—Fine weather brought a small attendance to the merchandise shoot of the Robin Hood Gun Club, held on June 3, but a very pleasant afternoon was spent smashing clays. Edgar Smith was there with his eagle eye, getting 108 out of 25. Carl von Lengerke ran the office, and everything was run off in grand style. Following are the scores:

Table with columns: Name, Score. Lists scores for shooters like Thompson, Roach, Hainhorst, etc.

Team shoot, \$50 a side, 25 targets per man: Capt. Realia 7, Capt. Rogani 9, Smith 22, Gerbolini 16, Thompson 20, Conelley 16, Kelley 16, Roach 19, von Lengerke 20, Beyersdorf 21, Dannefelser 11, Rohlfis 17, Martinitz 14-110, Hainhorst 8-106.

## Chicken Shooting in Minnesota

By AMOS BURHANS

**G**OOD chicken shooting to-day certainly does not compare with the execution of birds that was once made by the pot and market hunters throughout the Dakotas, Minnesota and Nebraska. But nevertheless there are a few birds left which under careful guarding have increased in many sections until now the painstaking shooter who will have patience and a fair dog can bag a dozen birds during a day's hunt.

Some seasons ago in these pages I called chicken shooting the ideal sport for the average sportsman who had a dog and shooting stick. At that time I was one of the great army of field hunting enthusiasts who could only get away from the grind of business about a week or ten days during the fall. It was easy enough to board the train with dog and gun, and be met by driver friend who would take one out to the chicken country to be ready for the hunting the following morning. At certain points in the sandhills of Nebraska along the northwestern line railway or on the Burlington along the "high" line or its feeders that run up into the sandhill country, one can still get fair shooting and plenty of tramping. There is more or less work in getting to the birds now owing to the scarcity of them and their taking to higher, and more difficult to approach, feeding grounds.

South Dakota has a short open season on chickens this year after being closed for some time. The birds have multiplied well, so I am informed by those who have been over the country and know the conditions. This past spring the unusual dryness during the nesting season was conducive to early mating and a perfect hatching season. I have been through the better chicken country of Northern Dakota this year and find that many reports of an abundance of birds will be ready for the clever hunter at the opening of the season.

Last fall two friends and myself went to the central portion of Minnesota that lies along the Minnesota River and its tributaries. Our method of travel was with the outfit shown in the picture. The rigging that approaches the old-time schooner gives one a great opportunity for observing the country, and by going out one way and back another a constant change of scene is assured. During the fall there are thousands of just such outfits going and coming from the hunting fields all over the Central West and into the mountain country. And it is to those who travel in this manner, and who contemplate it, that I am going to make a few suggestions.

Those who have been there before need not be told that a camp stove for wood is essential,

especially if the weather turns nasty during the month of September or October. A small gasolene stove is also handy and means quick coffee and meals at all times. Have a small tent and other necessary equipment, plenty of tinned supplies and lots of small change to buy little articles along the way. Farmers' wives from whom you buy do not have change at hand to break bills. This little precaution has actually afforded me

of our party spoke German and he seized the opportunity to use it to advantage, when he saw that our bear host was of that nationality. After introducing ourselves and telling where we were from, we asked to buy a lodging for the night for the team and to camp under the grove nearby. We bought a dollar's worth of eggs, butter and milk, bread and what-not, paid in advance for the team's hay and stable room, and told

MINNESOTA CHICKEN HUNTING RIG.

good shooting over grounds that I could not have entered if I had not been prepared to pay for all our party bought of a certain farm woman. The little attentions one pays to the farmers along the way will put you in touch with the best shooting in those localities if you are careful in acquaintances and their treatment.

On our last trip out we did not find a farm that was not posted, "No hunting allowed." Yet from every farmer we asked we had permission to go upon his land and hunt as much as we wanted. A little diplomacy in approaching the farmers, a sincere honesty of purpose in buying provender, stable room for your horses, feed and hay, will often afford you a fine camping place in the farm yard, a good well at hand and a guide to help spot the game.

One farmer in particular I will not forget. We had been out on the road the whole day and traveled late. The farm house sat back from the road a half mile and we skirmished up that way afoot to get a stopping place. One

him we might be gone before he was up in the morning. He was impressed with our honesty and asked us to stay and shoot out some cover he had watched for a couple of seasons. We said we would if he would go along with us. Having an extra gun or two we gave one to him and supplied the ammunition for it. He showed us some great shooting down in a dry marsh where the birds had gone to seek or be near water, and after a morning in which he was much interested in the work of the dogs, he told us where certain duck ponds were and we visited them. Three days of shooting about this locality gave us a nice supply of birds, and we shipped for home.

This farmer made us acquainted with all the farmer hunters in his section and 'phoned to others telling them who we were and that he wanted us to hunt over his friends' farms. And when you consider that farms in the West run from 600 acres to 1,000, you will appreciate that we had some excellent country to cover. The

mornings were devoted to chicken hunting, and during the middle of the day we cared for the dogs and got a meal. Late in the afternoon we began going out to the blinds, one or two at each of the several good ponds and rice sloughs, keeping the birds on the move. Many different farmers took advantage of being in duck blinds while we kept the birds moving. We divided game up equally and tried to make the men who owned the land and water feel that we wanted but enough for table uses and a few to send home iced.

Chicken shooting is very hard on dogs that have not been well fitted for it. They get sore-footed from the tough grass and stubble, have poor wind, and generally shoot their bolt before the hunting is reached, if they are not kept on chain till the grounds are reached. It is a good plan to have a coarse sponge and an old pail along, where dogs are going to be used, to wash sore feet and care for possible wounds from wire fences. A little alum water to soak a dog's feet in will harden them up. A light feeding at noon if the animal is very hungry is good, but a big feed, all the dog will eat, should be given at night. Morning is no time for feeding a working dog. Have patience with him; keep him chained when not at work. Lead him to the grounds where the hunting is. If he is head strong, do not curb him too quickly. After he gets into the first game of the season you will know more about handling him. When the dog's work is done, clean out the weed seed and burrs, brush him well, and put him to sleep in a place where he will not stiffen up. A warm place to sleep, not a damp one, a good bed and good supper, will make him feel like a new dog the next day. Dog boots are good if you are going into a sand burr country, and one or two are good anyhow to carry, as one can never tell when a dog will bruise a foot and need a light bandage.

### Hypnotics of the Rattler.

HARTFORD, Conn., April 13—*Editor Forest and Stream*: I note a very interesting article by Game Commissioner Cranston in *FOREST AND STREAM*. It is my opinion that this rattler was sunning himself on a ledge. These rattlers have a hypnotic stare with which they can induce an animal to come very close to them. He probably hypnotized an animal of some sort in this way and struck him. This animal, livelier than the cottontail, leaped from the ledge and later died from the effects of the bite. This was the "flash" you saw. The snake, failing to handle his first victim, decides to try a cottontail. He induces this cottontail to come within striking distance and strikes him once, twice, three times and slips off the ledge.

All of his poison being used upon his first victim, there was not enough accumulated in so short a time to kill a second animal. So the rabbit, as soon as the snake's spell lifted and he came out of his trance, went about his business none the worse for his experience, except for a few pin pricks.

C. W. TREAT.

In Massachusetts three bills to reopen the spring shooting of water fowl have been defeated, as well as a bill to permit the shooting of gulls.

# The Surf Angler's Creed

## Fourth Paper

By SWITCH REEL

**W**ALTON says:

"I care not, I, to fish in seas,  
Fresh rivers best my mind do please;  
Whose sweet calm course I contemplate,  
And seek in life to imitate."

But also he tells us "that in ancient times a debate hath risen, and it remains yet unresolved, whether the happiness of man in this world doth consist more in contemplation or action."

Would that Sir Izaak could have tasted the gentle joys of the surf angler of to-day as he

UNHOOKING A 35-POUND CHANNEL BASS.

follows his pastime by the sea! What is more conducive to contemplation than long hours on the clean white beach, or on some rugged rock there awaiting the great strike which is to bring action to the fore? Here, then, is the answer to the ancient question. What if it be ten days of contemplation to one hour of action? Article One in the Creed is long hours and small pay. It is a common remark along the beach when reference is made to some individual who has tried for a few days and quit, that "he couldn't stand the gaff," a very pointed way of stating that he lacked the perseverance necessary to due appreciation of this branch of the sport of fishing, so let him go in perfect pity—he does not subscribe to the second article, dogged persistence.

And again, when two or three chummers come ashore with a dozen or twenty channel bass of twenty to forty pounds each, while a dozen or twenty of the faithful have taken but two or three on the beach, wonder is sometimes expressed that all hands do not flock to the

boats. But just here the third and greatest article of the Creed intervenes—they must come to the beach or we don't want them.

The moderation of Walton is not greater nor more laudable than that of the toiler by the sea. Without discouragement the latter will go day after day to the beach and return with empty hands but with joyful heart. He has drunk long draughts of the pure salt air and laved in the glorious sunshine; or, perchance, in slicker and so'wester, he has breasted all day a lashing northeast storm, but however be it, he has done his part and time and again swung on the perfect rod and shot a four-ounce lead and a lunch of blood worms far into the restless breakers. He has been ready every instant lest a big one take him unawares, but—they didn't come to the beach, and so they are still in the sea—that's all.

To-morrow, next week, next month, perchance next year, the great instant arrives. Of a sudden the lead leaps to life. It's true! It's true! The big fellow has struck at last! A pressure on the reel enough to throw his weight on the hook without quite stopping him and the barb sinks in. He is racing for the bar 400 feet away, and the line says "Zit, zit, zit" as it slips from the reel under the steady pressure of the thumb, for we must make him pay in strength for every yard of line he takes. With the butt of the rod in the cup of the rod belt, the tip is held well up, and the graceful bowing of the trusty stick thrills every heart in view.

He's out to the bar by now, and if he succeeds in crossing it in the face of the seas running over it, there will be trouble ahead. But no, the heavy pressure throughout his run has taxed his strength sorely, and we feel him turning back. Now is the time to regain line against his next run when he has recovered his wind, if it be correct to use the expression. So it is pump and reel, pump and reel, as he shoots obliquely across the channel. Perhaps 75 or 100 yards is regained ere he turns his tail toward the beach and stops the process, for there is no surer way of losing a big fish than trying to move him backward.

As long as the angler can keep the head of the fish toward him, he controls the situation, but once the fish gets his tail toward the angler, the fish is in control and must be given line.

Up the beach this time at top speed he goes against the current, which, bearing strongly against the lengthening line tends to bend his course more and more inward until, finding himself almost into the breakers, he makes a quick shift and starts down the beach heading out. Here again the angler may ply the reel industriously to accumulate insurance in the shape of line against contingencies. As the fish comes abeam and races past, the taut line is slicing off the top of the green wave that is rolling in and a spray of bright pearls curves gaily up into the wind. Now he is by and is taking line again. And again is heard that "Zit, zit" as the thumb-stall bears on the reel with deadly earnestness.

## Keeping an Appointment

By LILLIAN S. LOVELAND

And again the current bearing against the line heads him in toward the breakers to avoid which he boldly heads up the beach once more. Perhaps this time he will stop abreast of this mysterious strain and roll and swirl a bit on the surface. Now a strong pull at the right instant will swing his head toward the beach and more pumping can be done. This time it is possible that he may be brought so near that he exposes his grand length to view against the green background of an approaching breaker as he turns and plows off once more toward the bar, and we know then that he's a big striper or a big channel bass, as the case may be.

With swelling heart and almost choking with excitement we make him pay dearly for every foot of line he takes, and if we stand our ground, he again begins to follow the course of an elongated figure 8 up and down the channel in the seas that sweep toward the beach. At last pluck and endurance must yield to thumb pressure and skill, and the fish is brought into the combing breakers. A critical stage of the battle is now on. Watching one's chance he is dropped into the tumbling front of an incoming wave, and the reel is plied with all the speed at one's command to keep his head toward the beach, the rodman stepping backward if necessary to accomplish this.

If he fails to ground on the first wave he must be allowed to go back with as much pressure applied as is safe in order that his head be kept toward the beach ready for the approach of the next incoming sea.

This process is kept up until he either grounds or the angler is able to lay a heavy hand upon him and press him to the sand until the wave has receded, when the forefinger, which with the beach fisherman takes the place of the gaff, can be slipped into a safe pocket under his jaw and thus he is dragged to safety—by the man who hooked and fought him—for, the last article in the Creed provides that no assistance must be lent to the angler. Of course this article cannot apply to rocky coasts where a gaffer is a necessity, but on the sands the man who cannot beach his fish unaided should forego him.

The succeeding steps are taking the weight, accepting congratulations and possibly the return of the fish to the sea. If he happens to be in the forty or sixty-pound class, the lucky captor may live in a seventh heaven of delight indefinitely, for surely the taking of one of these fish is reward enough for many blank days.

Believe me, a reformed black bass fisherman, an ex-devotee of the Rangeleys and the Adirondacks; when I say that I have taken enough of small fish, and am happy to subscribe to the creed of the surf angler and to wait with indifference a week or a month or a year for one big one.

NEW YORK CITY, May 30.—*Editor Forest and Stream:* Your excellent issue of May 24 was very interesting. Please send me 150 copies. I want to mail them to my friends. I think your paper is improving every week.

MORRISON ROGERS.

PEOPLE soon learn to shun the man who never offers them anything but advice—even a ragged man can tell you how to get rich.—*Florida Times-Union.*

WHILE spending our vacation at Pelican Lake, one of the larger lakes in Northern Minnesota, my husband, my father and myself delighted in going off together on voyages of exploration.

We would start off about an hour after dinner, and the men would row two or three miles to another shore of the lake, then we would all get out and walk over the sandy roads or on pine needle carpeted wood paths, or we would strike blindly through the underbrush and timber just to see where we would come out, or what other lake or farmhouse, postoffice or school house we might discover.

One afternoon we landed on the east shore where we had heard a new summer cottage was

KEEPING THE APPOINTMENT.

being built. We found the cottage already completed and Captain and Mrs. Eberly, the owners, nicely settled.

After sitting on the porch awhile, my father said: "They tell me there is another little lake—Loutche's or Loughy's Lake near here. How do you get to it?"

"Loughy's Lake! Oh, yes," Captain Eberly answered. "It's only a quarter of a mile. I cut a path through the woods yesterday. I have an errand over there. Wait a minute, and I will walk over with you."

I noticed that he was carrying his fishing reel and frog box, but he did not mention fishing. We went single file through a fern-bordered woody path, just 573 paces, the captain said, until we came to a beautiful little lake nestling among the pine-clad hills.

"See that stump there?" said the captain, pointing to a water-soaked log not twenty feet from shore. "I have an appointment with a bass who lives there."

"Appointment with a bass, how's that?" my husband questioned.

"I was over yesterday with a spoon hook, and he came up and looked at it, but he didn't like it. I promised him I would come back today and feed him some frogs."

"You don't suppose he is waiting there yet for you, do you?" I asked.

"Well, I am sure that's where the old fellow

lives, and I think he will keep the appointment. I hope he is hungry."

"Good luck to you," we told him, as we went on according to his directions to find the postoffice of Ossipee.

We followed the lake shore to the opposite side, delighting in the lavender carpet of wild flowers, something like violets, which grew so thickly in the sand until we came to an old boat and a path through the thick timber toward the northeast. The path led through the woods, then along the split rail fence around a field past laden hazelnut bushes, ripe blackberries and red raspberries, blueberries and wintergreen, which according to our custom we nibbled at as we walked. Then we reached the public highway, a well-traveled sandy road, and in a few minutes came to a large, rambling farmhouse. It was entirely covered with tar paper on the outside. The original house was a log cabin, and the other rooms were built of the cheapest sheathing.

The postoffice of Ossipee consisted of a little closet-like room about four by six in the corner of the main living room. The postmaster was not in, but his wife was.

"I would like ten postal cards," my father said.

"I dunno as we hev that many; I'll see," said she, pulling out a drawer of a case which was marked "Corticelli Sewing Silk." "There's five—six—seven. That's all he's got."

Father handed her a dime, but she couldn't make change. "Well, here, I'll take six," he said; "I have a nickel and a penny. Have you any fresh eggs to sell?"

"I let most of 'em go yesterday, but I got some more this morning. You kin hev a dozen."

"All right. How much are they?"

"Fifteen cents." We had been paying thirty in camp.

"That's too cheap," father told her; "here's a quarter."

"No, sir; I hain't going to take more than other people pay me. Fifteen cents is all I get anywhere."

They finally compromised on twenty cents. We inquired about the abandoned cabin across the road, and she told us it used to be a store, but it didn't pay. In the distance we saw a white school house, and she proudly explained that it was "het" with a furnace; that the district received State aid—\$75 a year, and they bought \$10 worth of books every year for the library—and that all the people in the district could have the books to read. We learned later that there were only eight children in the whole school, and that they had to go all the way from one to three miles; that school started the first of September and continued until Christmas; then when the thermometer was forty and fifty below zero, school was closed. It began again the first of March and lasted until the first of July.

We had gone out of the farm yard and were walking down the road when we heard Mrs. Postmaster calling after us. That extra five cents for the eggs was evidently still bothering her, for before we knew it she had gathered

an apron full of nice ripe plums and insisted upon our taking them. "I only wish the apples were ripe, but they won't be ready for two weeks yet," she told us regretfully.

We circled around a different way, passing two pretty little lakes—the Twin Lakes. How many Twin Lakes are there in this country, I wonder? Then we cut directly through the woods, coming out on the other side of Captain Eberly's cottage, about 7 o'clock.

They were seated at a table on the front porch, and we could just see their heads and shoulders above the railing, and both faces wore that contented, satisfied expression that comes after an enjoyable feast.

As we came around the corner of the cottage, my husband called to Captain Eberly, "Did you get your bass?"

"I did that," the captain answered; "he grabbed the first frog I threw him. We've just finished eating him."

"Good!" we all exclaimed.

"I am glad he kept the appointment," I said, and my husband added, "you certainly had fresh fish for your supper."

### New Publication.

THE annual issue of the Canadian Alpine Journal has just come to hand, and it is worthy of a reading by anyone interested in mammals, birds and flora. It contains the reports of the Smithsonian Institution expedition, which collaborated with the Alpine Club of Canada in a trip through the Mount Robeson region of British Columbia and Alberta. The collections were made by N. Hollister, assistant curator of the museum, and J. H. Riley, of the bird section of the U. S. National Museum. It devotes ninety-seven pages of mighty interesting and instructive reading to the subject in hand, and is profusely illustrated with original plates. In addition there is a topographical map in color showing Mount Robeson and the mountains of the Continental Divide north of Yellowhead Pass. The cost of the book is \$1 and may be purchased from the Alpine Club of Canada, Banff, Alberta.

### Short Cut for Anglers.

THE construction of the Hampden Railroad running sixteen miles from Bondsville on the Central Massachusetts to Springfield, thereby connecting the Boston & Maine with the New York, New Haven & Hartford, has made possible an avoidance of the transfer between the North and South stations in Boston for passengers going to and from New York, Boston and points in Maine and New Hampshire, thereby making time and convenience for anglers going into Maine. This route will be in operation June 23.

Two new through trains will be put on between New York and the North station, Boston. The running time will be six hours and stops will be made at Ware, Barre, Oakdale, Hudson and Waltham. Three new trains will also be installed between Northampton and Boston via Springfield. A change of trains in the North station will be necessary for through passengers. Under the new schedule a train will leave Boston for New York at 11 A. M., and one will leave New York for Boston at 10:50 A. M. The night trains will leave New York and Boston at 11:33 and 11:35 o'clock, respectively.

# Around Manhattan Island in a Canoe

By CHARLES J. SODERBERY

RECENTLY I read an article in which President Finley, of the College of the City of New York, described a walk taken by him around the water front of Manhattan Island, showing what is known to few—the wealth of country scenes as well as a diversity of city life; that farms, meadows, hills and valleys, as well as castles and tenements of brick and stone; that broad shaded lanes as well as crowded city streets; that little changed Indian haunts, as well as those of modern man, are to be found within the bounds of Manhattan Island. Although not in the same way, I made the trip around the island—I went in a canoe.

At 10 o'clock on a Sunday morning I pushed away from the float of the Knickerbocker Canoe Club at 167th street and the Hudson, and paddled south. I dropped swiftly down the river with the ebb tide. I did not make a particularly auspicious start, for at 130th street the Fort Lee ferry boat narrowly missed me. A little more and I would have made the trip on foot, if at all. Gliding by the Recreation Pier, I passed along Riverside Park topped with its homes of brick and stone. Here, too, is the home of the motor boat. Everywhere the motor boat, with its rush and wash, the seeming enemy of the quiet, smooth-moving canoe; darting here and there, as if seeking to exterminate the red man's craft. But everywhere they are, swarming all over the river and multiplying every year. Truly, I seemed to be passing through the Little Italy and Little Germany of the water.

All this was left behind at Seventy-second street, to which point from the south business has claimed the shore front from pleasure. Stern looking docks took the place of grassy slopes. Vessels of commerce took the place of boats of sport. Here the water began to take on a little roll. Here I had my first view of the homes of industry; the Metropolitan Building, Flat Iron Building, and Times Building. Only a glimpse, may be, but more impressive than a near by view. Down, down I went with the stream; Fifth-ninth, Forty-second and Thirty-fourth streets were passed in no time. At Twenty-third street another ferry boat came at me, but this time I dodged behind a pier. A ship's yawl headed north, full of sailormen struggling against the strong tide, went by, or more properly speaking, I went by them. "Pretty soft for you," one sang out. "You're going the wrong way," I replied. At Fourteenth street, a young boy spying me, ran out to the pier end, shouting, "Hi, fellers, look! Look at the Indian boat!" It seemed incredible that a canoe so well known a few miles up the river could be such a rare sight in these waters. But as I went down deckhands, longshoremen and fishermen would drop their work or pleasure and eye me keenly, withal kindly, but with a little suspicion. They seemed to feel that I had suddenly come from strange land in the far North. More and more the water became turbulent as I went down. Pier after pier sped by, ocean liners tied up to many. Looking up I saw "Carpathia"—ship of ships!

As I approached the Battery, I began to think about the turn of the tide. It was all very well to be rushed south, but I did not want too much of a good thing. It was equally if not more important that I go at the same pace up the East River, and this could only be accomplished by the aid of the new incoming flood tide. I calculated that the tide would turn at 1 o'clock, but as the turn of the tide does not coincide with the time of high and low water as published—there being a discrepancy of apparently three hours, I thought it well to verify my calculation by those who ought to know. I succeeded only in satisfactorily verifying that trait in human nature that a man will pass his days amid conditions the most prominent of which he will fail to observe. "What time does the tide turn?" I shouted to a dock watchman. "Pretty soon, I guess," came the answer, while the tide then was still going out like a mill race.

To another man who looked as if he might have nothing to do but observe and study the attraction of the moon, I repeated the question. "Quarter to twelve," came the ready response. He must have forgotten his watch, for it was then ten minutes to twelve with the ebb tide showing no sign of slacking.

A tug boat captain ought to know, and to a man eyeing me up from out the pilot house window of his boat fast to a dock I put the question again. "The tide will be running out until 1:15." This seemed like real information, as it approximated my computed time; but the subject had appeared so obtuse I thought it best to have two authorities. At this point I had made the Battery, and to save myself being carried to Coney Island, I swung around into the shelter of the south side of Pier 1. Here was another watchman watching the water and my second authority I hoped. Again the question. He pulled out his watch, looked at it intently, and said, "I really don't know."

"Ask over there," he continued, waving his hand toward Pier A. Over there was the police boat "Patrol." On deck (eyeing me up) were a colored chef and a policeman in uniform. As I understand there is a tide in the affairs of every policeman which, taken at the flood, etc., I thought the question would be easy for them. "Can you tell me the time the tide will turn?" I repeated. "Sure," was the answer. They immediately went into consultation. After some deliberation the chef as spokesman sang out, "Three o'clock." I found voice to say, "Thanks; but are you sure of that?" "Wait a minute," he replied. He then went into his kitchen. Reappearing in a few seconds, he said, "No; I was wrong. It was 3 o'clock yesterday. It's 4 o'clock to-day." I said nothing, but my belief is that the chef consulted his bill of fare instead of a tide table.

[CONCLUDED NEXT WEEK.]

THERE are no slums in Omaha, and no tenements. There are a few flats and apartment houses. The most of Omaha's population live in their own cozy houses.

# GAME BAG AND GUN

## The Devastating Dog.

NEW YORK CITY, June 2.—*Editor Forest and Stream:* Two or three years ago FOREST AND STREAM urged strongly that the different States pass laws forbidding owners of dogs to permit them to run at large. Bills to carry out this suggestion were introduced in several States, but met with opposition. The fox hunters especially were indignant that anybody should suggest that the hounds that they found so effective in chasing foxes would interfere with ground-nesting birds.

On the other hand, gunners and naturalists declared their belief, and gave their reasons, that the farmer's dog, and the foxhound, and, in fact, any other dog that runs loose through the summer, is very destructive to all ground-nesting birds, and that means of course to all game birds.

The late Bernard Waters, whose experience was probably far greater than that of anyone who reads these words, often declared that the self-hunting dog was far more dangerous to wild birds than was the self-hunting cat. I believe there is no doubt about that.

Occasionally I am fortunate enough to be able to spend Sunday in the country, usually in Connecticut. Within two or three weeks some examples of the harm done, or likely to be done, by dogs running at large have come under my observation:

A little niece who rides much on horseback and is usually followed by one or two of the household dogs, told me that the week before last while riding slowly along the road by a swamp the family foxhound that had followed her came out of the woods with a dying partridge—ruffed grouse—in its mouth. A day or two later, riding along a wood road, a great dane which was following her, made a sort of lunge at a brush pile not far away, from which brush pile emerged a partridge—ruffed grouse—which by pretending to be injured lured the dog onward for forty or fifty yards and then left it. Except for the device of the bird, the dog would probably have found the partridge's nest and destroyed it. Another member of the family out walking within half a mile of where this last incident occurred, accompanied by the foxhound above mentioned, saw the foxhound go into a little covert and immediately emerge again, following an apparently wounded partridge, which presently took wing. Finally, on June 1, as I was on my way to inspect a nest where for two or three weeks I had been watching a sitting partridge, I intercepted two dogs—one bearing some resemblance to a foxhound, the other a cur—apparently on the way to this nest and close to it. I drove them away by the use of clubs and bad language, and when I reached the nest, found that the bird had hatched a day or two earlier, and apparently taken her little ones off in safety.

I believe, and I think most upland shooters and naturalists will agree, that in the summer dogs destroy far more birds than do cats. Of

course, cats kill an occasional individual bird, but the dogs gobble up a whole nest full of eggs, or the young ones, if they have hatched.

It seems to me that FOREST AND STREAM, as the organ of the sportsmen, could not perform a more useful service than to try next winter to induce State Legislatures to pass laws prohibiting dogs from running at large, and to see that these laws are enforced. Certain associations which have done much for the preservation of wild life, as the New York Zoological Society, the National Audubon Societies and the American Game Protective Association, ought to give this matter their attention.

OLD MAN.

## North Carolina Fox Hunting.

RALEIGH, N. C., June 1.—*Editor Forest and Stream:* North Carolina has always been a notable State for fox hunting. The hunting has been for sport and not for style, and so there have been no scarlet coats or any sort of flubdub about the hunters, and the past and present one have gone in simply and solely for catching foxes, using the very best hounds they could possibly buy or breed. One of the famous old packs, now broken up, was owned by the late John A. Carver, of Fayetteville, and he had a record of 512 foxes caught, with a wonderfully small percentage of misses. People from a number of States have been out with his pack, the existence of which covered the period from directly after the close of the Civil War until about 1895. Another widely known pack was that of the late William Boylan, of Raleigh, a man of large wealth and devoted to outdoor sports. He considered fox hunting the greatest of all sports and kept a large pack of hounds, known in all this section of the State. He, too, hunted after the Civil War and until a period not more than fifteen years ago, and had a record of hundreds of foxes caught in Wake, Johnston, Chatham, Harnett and other counties in this section. He also hunted much in Mississippi, where he was a large landowner. His son, William Boylan, now living in Raleigh, rode with his father from his earliest boyhood in many a fine chase of the gray fox, the only kind found in this section of North Carolina, red foxes being rare in this State. One of the features of all the hunts was "Old Charles," who had been Mr. Boylan's slave, and who was absolutely devoted to him. Sometimes, when foxes could not be found, the dogs were for exercise allowed to catch rabbits. On one occasion, a few days before the Christmas holidays, Mr. Boylan and "Old Charles" and a number of invited gentlemen had such a rabbit hunt and caught several. One of the gentlemen pulled out a \$5 bill and handed it to Charles, telling him it would "come in mighty good" for him and his "Old Woman" Christmas time. Charles took the bill in his hand, and the giver said: "Uncle Charles, I give you this on condition that when we ride into Raleigh you hang the rabbits at your saddle

bow." Old Charles looked at the gentleman very earnestly, and at the same time handed back the bill to him, saying, in his most decided yet amiable way: "Boss, I simply couldn't take dat money. Ef I wuz ter ride inter Raleigh wid rabbits er hangin' on my saddle, I would think I wuz eternally disgraced, and I could not look Marse William Boylan in de face no mo'."

Charles would have liked to have had that \$5 bill, but a veteran hunter who had ridden so many times with one fox and sometimes two at his saddle could not afford to demean himself by bringing in rabbits in any such fashion. He added: "My ole woman, an' she's my sweetheart ef we has ben married nigh on to forty year, would be ashamed uv me, an' lackwise would be de boss and dese dawgs." Old Charles was a sportsman right, and his first thought was of Mr. Boylan and his next of "dem houn's." He was a perfect type of the faithful old darkey, without any frills, but as dependable as the polestar itself. Mr. Boylan, true sportsman that he was, was not at all surprised at Charles' declination of that \$5 bill.

FRED A. OLDS.

## Ohio Game and Fish Laws.

COLUMBUS, Ohio, June 5.—*Editor Forest and Stream:* A new edition of the fish and game laws is being printed and will be ready for distribution some time during the next ten days.

The principal changes made by the General Assembly at its recent session were, first, prohibiting the killing of quail, ruffed grouse, pheasant and Carolina dove until 1915.

A resident hunters' license law was enacted, fee being \$1 with 25 cents additional, which is granted county clerks for issuing them.

The most important alteration was the consolidation of the fish and game with seven other State departments under one board, to be known as the Agricultural Commission. This does away with the old commissioners of fish and game. Otherwise the laws and their administration remain intact.

The Agricultural Commission is authorized to create bureaus and departments, and it is the common understanding that a bureau of fish and game, with a directing head, will be established. At the present writing, however, efforts are being made to submit the law to a referendum vote. We will know definitely regarding this about the middle of July.

A new law prohibits the killing of skunk except from the 15th day of November to the 1st day of February, also makes it unlawful to take such animals from their dens or burrows, or to have their pelts in possession at any time other than the open season. These were the only changes relating to game.

None of the inland fishing laws were amended. Some few changes occurred in the laws relating to commercial fishing on Lake Erie.

JOHN C. SPEAKS,

Chief Warden.

**Revised Game and Fish Laws of Delaware**

THE revised game and fish laws of Delaware for the open seasons follow:

Quail, Nov. 15 to Dec. 31; partridge, Nov. 15 to Dec. 31; hare and rabbit, Nov. 15 to Dec. 31; reedbird, Sept. 1 to Nov. 1; rail, Sept. 1 to Nov. 1; wild goose, Oct. 1 to March 15; brant, Oct. 1 to March 15; summer duck, Sept. 1 to Oct. 31; wild duck, Oct. 1 to March 15; raccoon, Oct. 1 to Feb. 15; squirrel, Nov. 15 to Dec. 31; woodcock, Nov. 15 to Dec. 31; dove, (Kent and Sussex counties only), Aug. 1 to Dec. 31; muskrat and skunk (New Castle county), Dec. 1 to March 10; mink and otter (Kent and Sussex counties), Nov. 20 to March 15; fox, Oct. 1 to April 30; opossum, Oct. 1 to Feb. 15; frog, July 1 to Dec. 1; bass, pike and pickerel, May 20 to Nov. 30; pike (Sussex county), May 20 to April 1; trout, April 16 to Aug. 15; German carp, Sept. 1 to May 31; diamond-back terrapin, Nov. 15 to March 15.

**New Missouri Game Laws.**

FOLLOWING are the revisions in the Missouri game and fish laws for 1913:

Sec. 6516—Open season on quail made from Dec. 1 to 31 of each year.

Sec. 6520—Amended to make it unlawful to hunt or chase deer with dogs.

Sec. 6521—Repealed and Sections 6521 and 6521a enacted in lieu. Sec. 6521 makes open season on squirrels from July 1 to Nov. 30. Sec. 6521a makes open season on fur-bearing animals from Nov. 1 to Feb. 1, with penalty of \$25.

Sec. 6522—Amended and bag limit cut to ten birds per person per day and not over fifteen in possession at any one time.

Sec. 6549—Amended so as to permit fishing with pole, line, single hook and natural bait within 200 feet of fish ladders.

Secs. 1, 2, 3—(New sections.) Unlawful for person to go on inclosed premises of another for trapping purposes without written permission of owner or agent.

**Hunting in California.**

George Robinson, a Tehama county hunter, has been meeting with great success of late in killing mountain lions, having killed as many as twelve of these in one month. The State pays a bounty of \$20 each for these, and in addition the pelts are branded and returned, and these have been sold at from \$10 to \$15 each.

The bill designed to establish a game refuge on Mount Tamalpais was defeated by the recent Legislature in spite of the showing made that the present practice of allowing hunting there is dangerous to human life, owing to the many people who frequent the mountain slopes.

A herd of cattle grazing near Lake Lagunitas were recently stampeded by a mountain lion and plunged over a fifty-foot cliff. Four were killed outright, six others had to be shot at once and fifteen were seriously injured. The lion leaped upon the back of one of the steers within sight of the herders.

To Frost a Window.—It is easy to make a window opaque without darkening the room, by painting the glass with a strong solution of epsom salts in hot water. This may be quickly washed off, if clear glass is afterward desired.

**Salmon Fishing in Newfoundland**

**Where to Go and Tackle to Use**

By ERNEST C. MOORE

THE salmon fishing season in Newfoundland is open, and undoubtedly many anglers who have never visited the island before will go up there in pursuit of this grand sport.

A few words of advice to those who have not visited the island before might add greatly to the enjoyment of their trip, because reliable information, or in fact any information at all, is very difficult to obtain through ordinary channels.

If one wants really good salmon fishing, there probably is no better place than Newfoundland. It is quite true that there is good salmon fishing in New Brunswick, but the best pools and rivers are in the hands of clubs, and the number of places one can fish in is very limited, while in Newfoundland there are no leased waters. Every stream is open, and one can place his tent on the bank of a stream anywhere.

While it is probably true that salmon are caught in every river in Newfoundland, yet it sometimes occurs that one will go up there and return without any fish. This cannot be true, however, with proper information. It is most important to know the proper date to go to a certain river. One of the best features of the Newfoundland fishing is the fact that there is good fishing there from the first of June to the 15th of September, but not on the same river. I know of a party which fitted out a vessel and went to the Sandy Hill River in Labrador, probably one of the best salmon rivers in the world, but they landed there in the middle of August, which was too late, and they did not catch a single salmon.

In Newfoundland the fishing in the Grand Codroy is best early in June and not good after the middle of July. The Little Codroy is just the reverse; there is no fishing here at all until July—sometimes as late as the 15th—and it improves right up to the close of the season.

Up at Hawkes Bay, which is one of the best fishing grounds in Newfoundland, the same thing applies. The East River is the early river, then the River of Ponds, then the Torrent River, where the fishing is best at the close of the season.

A successful fishing trip to Newfoundland depends, therefore, on striking the river at the right time and then having the right tackle. With regard to tackle the best results are obtained with a full length rod, or one at least fourteen feet long, for the reason that in many places there is no fishing except when the wind blows and causes a ripple on the pools, and casting up in the wind requires a heavy long rod.

The most important thing, however, is the flies, and it frequently occurs with fishermen unfamiliar with Newfoundland waters that they

equip themselves with flies entirely too large. A No. 6 single fly or a No. 8 double is large enough; in fact, many prefer the No. 8 single flies.

The black dose No. 6 seemed to me the best all around fly I could get. The jock scott, silver doctor, brown fairy and dusty miller in sizes six single and eight double and single seemed ample for all occasions.

It is notable that the late streams usually carry the largest fish. The 41-pound salmon caught at Tomkins on the Little Codroy was caught about the 1st of September.

Black flies are rather plentiful, and if one is camping, a fine netting for the interior of his tent to keep out the midges at night will add much to his comfort.

Almost all the fishing is done in waders, and while many have the wading pants coming up to the waist, the stockings are preferable. I have seen several instances when the tops were cut off the pants. Walking in the pants is much more difficult and tiresome, and a sufficient depth for safety in the swift waters can be had with the stockings.

**North Shore Casting Club.**

CHICAGO, Ill., June 2.—*Editor Forest and Stream:* The attendance has not been large to date; but now the platforms will be crowded because summer is here. Below are the scores made in the last two tournaments:

On May 17, Dr. Waters scored 87.7 with ¼oz. accuracy bait.

	¼oz. Bait.		½oz. Accy. Bait.
	A.	L. C.	
Dr. Waters .....	...	...	97.6
T. A. Forsyth.....	56	147	98.5
Dr. Dorchester.....	136	149	98.5
C. M. Ercanbrock.....	93	126	...
Church .....	72	115	97.8
D. H. Ellsworth.....	99	146	96.7
W. Liddell .....	...	...	97.5
E. Lambert .....	...	...	98.4

**St. Louis Fly- and Bait-Casting Club.**

St. LOUIS, Mo., May 29.—*Editor Forest and Stream:* The St. Louis Fly- and Bait-Casting Club will hold its tournament at Forest Park, Sunday, June 1, commencing at 9:30 A. M. sharp. No one will be allowed to compete in any event after same has started. Program:

Bait-Casting—Half-ounce accuracy, half-ounce distance, half-ounce regular fishing tackle, distance, half-ounce regular fishing tackle, accuracy.

Fly-Casting—Distance, accuracy.

The tackle in the regular fishing tackle event must consist of a No. 8 test line or heavier, no free running reels to be used, weight to be used half-ounce. H. J. STEINMESCH, Sec'y.

# The Australian Bass

(*Percalates fluviatilis*)

By H. K. ANDERSON

THE Australian fresh water perch, which has been called by David G. Stead, F.L.S., Fisheries Expert to the New South Wales Government, and member of the U. S. Fisheries Congress, the "Australian bass," is our best indigenous fresh water fish. In appearance it is not unlike the bass of America, and for the table we know nothing which can surpass it. Its flesh is white and flaky with a delicate flavor, lacking the "dryness" so noticeable in rainbow trout (in this country at all events).

The Australian bass frequents deep waters, in the summer lying near the surface, under overhanging banks, rocks or bushes on the look-out for food—insects, beetles, frogs, young birds

Our bass is a grand sporting fish and inhabits all the streams running eastward in New South Wales and well up into Queensland. It grows to very considerable size, the largest on record having been caught this year, about 8½ pounds, while several others a little smaller were caught about the same time.

A 4-pound bass is considered a large one, and anglers are well satisfied if they land a 3-pounder or two during a day's fishing. The plan usually adopted is for two anglers to work together from a light skiff. One sits well back in the boat facing the bow so that he can see where he is going and watch the angler, and gently propels the boat from one likely spot to

'DO YOU CALL THIS FISHING WITH A FLY, SIR?'

brought along by the current or the wind, and for smaller fish of any kind on which he preys.

In the winter the bass retires to deep water, and prior to our very necessary close season being enforced, was frequently caught all through the winter with natural bait. It was most unsportsmanlike, as the fish were more or less gravid, out of condition and unfit to provide sport or palatable food.

We now have a close season from June 30 to Oct. 31, which carries the fish well over the spawning season. The majority of our bass spawn in September and early October. The eggs are very small, and somewhere about 60,000 are deposited by each female. They are demersal and adhesive and adhere to logs, rocks, etc., at or near the bottom of the pools.

Mr. Stead has in view some experimental work in connection with our bass, and already has some in captivity in natural ponds through which a gentle stream, regulated at will, is allowed to flow. It is his intention to go in for pond culture in respect to these fish, leaving them to spawn and fertilize the eggs in a natural manner, then remove the parent fish from the pond.

another, while the angler sits on a raised seat in the nose of the boat and covers all the water within reach with his fly or spinner.

As the bass in summer lies near the bank in the shade of bushes, rocks or overhanging banks or rushes, the boat is usually moved very slowly up or down stream within easy casting distance of the bank, and the fly or spinner is cast right to the edge, either a fly-rod or American bait-casting rod being used, according to the snaginess or otherwise of the water. If snaggy a heavy spinner is out of place, as it is impossible in many places to work it among the fallen timber, hence most successful anglers use a very light spinner made with a thin brass wire shaft and aluminum "propeller" and tied with peacock feathers streaked with red and white. This is cast like a fly, and although measuring two to three inches is no heavier than an ordinary salmon fly, and if manipulated with skill and care will not injure an ordinary single-handed trout fly-rod. The writer's Crown Houghton rod, used as above for years, is still as straight as the day it was made. It has caught, spinning as above, a very large number of bass, probably running into four figures, and

almost as many trout on the fly, the largest 8½ pounds, in March last, so it is evident that the spinner has no ill effect on a light fly-rod.

A friend of the writer's has just returned from a trip in the Hillgrove district where he had some splendid bass fishing on the Upper Macleay River. The stream runs through a deep valley densely timbered, and the descent to it is down the side of precipitous mountains.

Reaching the bottom it was necessary to ride along the bank, forcing a track through the undergrowth, until a spot could be found where a shelving gravelly beach ran down to the water. Here the anglers put up their rods and rode out into the stream as far as convenient without getting wet and fished far from the saddle. Almost the first cast brought a fish and the fun was fast and furious. The bass had never seen a spinning bait of this type before, and came at it viciously, sometimes following it right up to the horse's legs, and when retrieved to make a fresh cast, the disappointed fish could be seen swimming around looking for the vanished bait which his own tardiness had allowed to escape his maw.

On one occasion the angler hooked a good fish, which charged straight toward him and became entangled in the horse's legs. After some engineering it was disengaged and brought to the net. It weighed nearly four pounds. The total catch of bass for three days' fishing was one hundred, twenty of which weighed over three pounds. Every stream on the whole of the eastern watershed of New South Wales teems with bass, and it is only necessary to travel thirty or forty miles from the city of Sydney to find good sport.

## The Anglers' Casting Club.

CHICAGO, Ill., June 6.—*Editor Forest and Stream:* Scores for June 1 are as follows:

Quarter-ounce accuracy:	
Ames .....	97.3
Burke .....	98.0
Gray .....	97.5
Hartley .....	98.5
Johnson .....	98.0
Kleinfeldt .....	95.5
Lingenfelter .....	97.7
Loes .....	98.0
Malone .....	68.4
Town .....	98.4
Wagner .....	96.1
Wernecke .....	97.8
Quarter-ounce distance:	
Ames .....	116.5
Kleinfeldt .....	57.0
Lingenfelter .....	172.9
Loes .....	59.5
Town .....	130.9

## First Channel Bass.

THE 1913 channel bass season on the New Jersey coast opened promisingly. The following catches have been recorded at Corson's Inlet: June 5, 20 pounds 2 ounces taken by R. N. Helfenstein; June 6, 47½ pounds taken by R. N. Helfenstein; June 6, 33½ pounds, taken by Phil Schraidt.

HOURS for visitors at the New York Aquarium have been extended from 5 P. M. to 6 P. M. for the summer season.

OMAHA leads all the cities in the United States on the value per capita of manufactured products, leading Chicago or New York by about 75 per cent.

IN Elk River Game Preserve, B. C., elk have increased to such an extent that some people are clamoring for an "open season."

Forest and Stream is the official organ of the National Archery Association.

## Notes on Bow Making

By JAMES M. CHALLISS

**I**N a former article the subject of making self bows from native material was treated in a general way. Such suggestions as were given, and those that will follow, are not advanced as being original or perfect, but are simply the observations of the crudest sort of an amateur, based upon actual experience. It is not proposed that every archer shall make his own bows. The writer does not, for he knows that Duff and Barnes can make an infinitely better bow than he can, and for that reason he habitually carries in the field a bow fashioned by the hands of these master workmen. On a recent hunting trip for big game in British Columbia he carried with him a 65-pound yew of Barnes and a six-foot three-inch 65-pound lance of Duff, both most excellent weapons. But the excellence of the product of the professional bowyer does not militate against the pleasure of using a bow of less merit when fashioned by one's own hands. The making of a self, one-piece bow is comparatively easy, as has been heretofore shown. The chief obstacle is to get a clear piece of material of sufficient length. It is quite easy at times to get a piece of perfect bow wood three feet long and impossible to get one of six feet. This is especially true of yew, and it will be found that most all yew bows are made of two short pieces joined in the handle. This makes what is known as a pieced or grafted bow. I have never been so fortunate as to have a piece of yew to experiment with, and my experience in grafted bows, that is, the making of them, has been confined to mulberry and osage orange with satisfactory results. There is no reason why all bow woods may not be grafted in the same way. There is another reason for the grafted bow, beside scarcity of material. Expert bowyers claim that there is a difference in the quality of the wood in either end of a six-foot stick, and for that reason endorse the grafted bow for that it enables them to have in either limb of the bow wood of identical quality by taking two pieces from the same stick and grafting them together.

Those who are ambitious may make a grafted bow with but little more labor than a one-piece weapon. Secure two pieces of material at least three and one-half feet long. If you are able to make your selection in the woods, you may follow the directions heretofore given for making a one-piece bow. Reduce the sap as described and prepare the butt ends of both pieces which will enable you to square the joint ends to one and a quarter inches at least for a distance of four inches. This squared end must be mechanically square and its lines must

be parallel with the axis of the stick. If your stick is crooked from back to belly, it is not vital, but if it is crooked from side to side, you had better select another piece. The lines of the squared ends must lie in planes parallel to the plane which cuts through the back and belly.

The joint is what is known as a fish joint and when properly made is as strong or stronger than the original wood. It affords about sixteen square inches of glue joint of advantageous form and when properly reinforced by whipping is practically unbreakable. To mark out the pattern of the joint you should prepare duplicate copies of the lines to be followed on paper, having an original and a carbon. To make this pattern rule two parallel lines three and one-half inches long and as wide apart as the width of your squared ends. Connect the ends with straight lines. This gives you a parallelogram three and one-half inches long by, say, one and a quarter inches wide. Divide one end into two equal parts and the other in three. Draw lines from the corners of the equally divided end to the division points at the opposite end, as well as two lines from the center of the equally divided end to the same points. Your pattern will then look like this:

Before disarranging your papers, mark the figure with the letters and figures as above. Now, if you have held the papers carefully in place while drawing the pattern, you have exact duplicate copies. Now, carefully cut out your pattern on the outside lines, excepting on one pattern leave the figure 1 at one end and on the other leave the figure 2. Take the pattern marked 1 and paste it on the back side of the squared end of one of the limbs, being careful that it is flush with the squared end and parallel with the sides, with the figure 1 toward the tip end of the limb. Do the same thing with the pattern marked 2 on the other limb. It is now apparent that if the wood under the triangles A, B and C on the limb marked 1 is removed, and the wood under the triangles D and E on the limb marked 2 is removed, the two pieces will exactly fit into each other. If care has been used in pasting the pattern on so they are straight with the axis of the stick, and in working out the wood the lines have been accurately followed, the joint

will be perfect, and the joined stick will be straight throughout its course.

After your patterns are dry take the limb numbered 1 and place it upright in the vise, and with a fine-toothed saw remove the wood in the triangle B, being careful that the saw is held at right angles to the back of the limb. This is of the utmost importance. The best saw for this purpose is a thin-bladed backed saw. The bottom of the notch you are cutting may be cleaned out with a knife-edged file. The wood in triangles A and C may be removed with the drawing knife and plane. The limb numbered 2 is prepared by removing the wood in triangles D and E, which is done with the saw and thin file, the same care being exercised to see that the saw is held at right angles to the plane of the back. Now, fit the pieces together and see how nearly a fit you have secured. The main points to be watched are to see that you have the best possible joint on both the back and the belly, and that when the pieces are pushed home, that the stick is straight. If it is not straight, you will have to cut and try, even at the expense of a perfect joint. Do not be discouraged if your joint is not perfect, so long as your stick is straight. I have examined professionally made fish joints in bows that would have put an amateur to shame, and yet they held. I have even seen open places filled with shims or wedges of wood, which with a filling of glue made a satisfactory joint.

After you have prepared your joint to a satisfactory point, you will find that when forcibly pushed together it holds with a remarkable tenacity, and it is easy to understand why such a point will hold with the aid of glue. The glue should be the best you can possibly procure, perfectly fresh, soaked soft in cold water, heated in a water bath and applied boiling hot. Thoroughly coat the joint in every portion with the glue and fit it together, driving them smartly home with a mallet. If your vise jaws are just the width of the joint, well and good; if not, cut two pieces of hard wood one and a quarter inch square, the length of the joint, and placing one on either side of the joint, clamp the joint very firmly in the vise, exerting pressure sufficient to squeeze out all surplus glue, and yet not crush the wood. Let it dry for three days, when it should be removed from the vise and the surplus glue removed from the joint on the back and the same be made perfectly smooth. Now glue on the back of the joint a piece of wood the length and width of the joint and one-eighth inch thick.

[CONCLUDED NEXT WEEK.]

# How to Learn Archery

By W. H. WILLS

**A**RCHERY is beyond question the most fascinating of sport in the world to its devotees. No other compares with it. At the same time it is a difficult "game," and this is one reason why many beginners are discouraged at the outset and fail to persevere until they attain the degree of skill requisite for the full enjoyment of this "sport of kings." To attain this skill, intelligent and persistent practice with correct methods is necessary. Slipshod work will never get one anywhere.

If personal instruction is not available, the beginner can accomplish much by following carefully the elementary rules of archery, and it is for the benefit of such that the following is written.

The first requisite is an outfit adapted to your strength. If a man of moderate muscular development, a bow pulling 43 pounds is about right. If fairly strong, a 45-pound bow should be used. A woman needs a 22- to 28-pound bow.

A dozen good arrows, a target, fingertips or gloves, and an arm guard are essential, and these make a complete equipment, except for a woman, who needs a quiver, in the absence of a hip pocket, which serves as a man's "quiver." This entire outfit will cost about \$15. Targets cost \$6 to \$10 each, and the cost is shared by the persons using them. Three or even four persons may shoot on a target even at unequal distances. The rule is for each in turn to shoot three arrows, then another three. These six constitute an "end," at the finish of which all go to the target and mark the scores.

Now as to the technique of bow handling: First, string the bow. Place the end of the lower limb (the one on which the string is tied) against the hollow of your right foot, on which your weight rests as you stand. Grasp the handle of the bow with your right (or left) hand, its back toward you; place the ball of the other hand on the back of the upper limb near the horn, and press, holding the handle rigid. As the bow bends, push the loop of the string up with the fingers until the loop is in the nock of the horn. A little practice will accomplish this feat. To unstring, reverse the process.

Now stand forty or fifty yards in front of the target, which is hung on its tripod, the lower edge four feet from the ground. Stand with the left side (unless you are left-handed, in which case all processes are reversed), square to the target so that both shoulders are in exact line with the bullseye, or gold. Heels should be about six inches apart, toes turned out. Grasp the bow lightly in the left hand, upper limb to the right, so that the thumb and forefinger encircle the handle at its top. Keep the closed hand straight with the wrist all through; in this way the string will have a clean sweep when the arrow is discharged.

Take an arrow by the shaft in your right hand and place it on top of the horizontal bow, and while you hold it there with the thumb or forefinger of the left hand, adjust the nock on the string with the right fingers, keeping the odd feather up. When nocked, arrow is held in place on the string between the first and second

fingers, which should not pinch. With the three fingers hooked on to the string, half way up to the first joint, the draw is made.

The shaft of the arrow lies in the groove made by the bow hand against the bow immediately above the handle. Tilt the bow to the right about 15 degrees, to prevent the arrow from falling away. The best finger protector for a beginner is an old kid glove. Cut away the thumb and little finger and reinforce the last joints of the remaining fingers with a smooth pliable piece of pigskin, cut to fit, and sewed on. This isn't as hard on the fingers as regulation tips, is more easily managed, and will enable one to harden the fingers without discomfort.

Now you are ready for the draw. A beautiful style of drawing, much in favor in this country, is to extend the bow arm, arrow undrawn, get a point of aim (to be described later), draw fully, steady on aim, and loose. It is a more difficult style of learning than the orthodox English method, and had better be deferred till the rudiments have been mastered. Then the archer can adopt that style if it pleases.

The usual way is to straighten the left arm downward, and with arrow in place and drawn about six inches to start with, elevate the left arm straight up, gradually and steadily, at the same time pulling the arrow. When the arrow is fully drawn to the pile or steel point, the endeavor should be to have the point of the arrow on the point of aim. Then steady on the point of aim for a second and loose. The entire operation of drawing and loosing should be accomplished in a very few seconds. Avoid haste and all jerking, but don't make the other mistake of sluggish work, and especially of holding too long on the draw.

Many old pictures show the arrow drawn opposite the right eye. It is doubtful if any real archer ever shot that way. To do so would necessitate an allowance in the aiming, as will be seen later. North American Indians seem to have drawn in a helter-skelter way, generally as low as the waist, and caught an instinctive aim, as in revolver shooting. Their style of shooting, as well as their crude implements, made it necessary for them to steal up very close to their game, all marvelous tales of their marksmanship to the contrary notwithstanding.

Ancient archers apparently drew to the chest, and it was for this reason that the Amazons, according to legend, found their left breasts in the way and had them cut off; whence the origin of their name. Horace A. Ford, the great English archer of sixty years ago, who made incomparable scores, started the practice of drawing to the chin, immediately under the right eye, and that method is now universally followed here and in England, except in a very few cases where archers choose to draw lower, a very difficult style. To shoot true, the arrow must be wholly within the plane of a straight line running from the eye focus, across the knuckle where the arrow touches the bow, to the object shot at. It is easiest to keep within that plane by drawing to the chin under the eye, as it gives a definite point of contact. When an arrow flies

to the right or left, it is pretty surely due, provided the bow arm be held absolutely firm at the time of release, to the arrow having been drawn a trifle outside the plane spoken of. This can be corrected at the next shot.

Having gone thus far in the process of shooting, the loose claims, and always will claim, utmost attention. It is accomplished, not by opening the three fingers, for that will give a sluggish loose and besides will likely jerk the arrow out of the eye-plane, but the fingers are pulled off the string smoothly, deliberately and firmly. On no account, after the draw is completed and while steadying on the aim, must the pull be relaxed. Keep the pull on till the final action of release. This pulling off the string is not done by the fingers or hand alone, but by both, combined with an entire arm movement, which, however, should be very slight. It is the most difficult feature of shooting, and only by unremitting attention can it be mastered. The shooting will steadily improve as the loose is perfected.

[CONCLUDED NEXT WEEK.]

## Wayne Archery Prizes.

WAYNE, Pa., June 2.—*Editor Forest and Stream:* At a meeting of the committee in charge of the Fourth of July festivities in Wayne it was announced that the prizes offered to the archers will not be cups. The majority thought that articles which would be quite as ornamental and far more useful would be more acceptable to most of the contestants, and so the final choice fell on two large, engraved, silver salvers or meat platters. From the descriptions given, these will be very handsome pieces of plate calculated to stimulate the zeal of every shooter.

Let us hope that each one who has entered the Eastern Association's tournament will practice his hardest during the month of June, for the honor and the prize are both well worth winning.

ROBERT P. ELMER.

## Forest and Stream is Supreme.

FOREST GROVE, Ohio, June 2.—*Editor Forest and Stream:* I have not your name at hand to address you, and as I am very weak from long illness, I am "letting that go," as the saying is. I wish to apologize for the long delay in sending my "pew rent," but long sickness has kept me totally in the dark as to the wants or even sights of the good minister. Good minister, did I say? Yes, FOREST AND STREAM is supreme in all its qualities and what you are doing for archery, and I can only believe in other lines, is what has long been needed.

Inclosed please find \$3. Thank you for your patience.

F. S. BARNES.

## Tournament Notice.

BOSTON, Mass., May 31.—*Editor Forest and Stream:* The national tournament will be held at Boston on Aug. 19, 20, 21 and 22, 1913. Notice of the events, program, etc., will be published and mailed within a few days. Members of the association are requested to send in their annual dues of \$2 as soon as possible if not already sent.

GEORGE PHILLIPS BRYANT,

N. A. A., Sec'y-Treas.

750 Tremont Building, Boston, Mass.

**International Athletic Championship Association.**

CHICAGO, Ill., May 23.—*To All Archers:* As most of you know, plans have been made by the International Athletic Championship Association to hold the biggest series of athletic contests yet staged in this country in Chicago, June 28 to July 6. Athletes of other countries are invited to participate.

Archery is to have a place on the program, and the days allotted us are Thursday, Friday and Saturday, July 3, 4 and 5. The program will be a York and an American round, and a National and a Columbia round, on each of the first two days. For each of these double rounds the association offers a gold, a silver and a bronze medal. On the third day the team round will be shot, and no prizes are offered. But the pleasure of shooting and meeting friends is worth more than an ordinary prize or medal.

The entrance fee admitting to all the contests is \$3. The rules for shooting will be those of the National Archery Association, except that the method of scoring will follow the precedent set at the Olympic Games in London, in 1908, viz.: in case of tie in gross score, the prize shall be adjudged to the one who has the greatest number of hits.

Complete details of the meeting will be given in the official program. We invite you most cordially to attend this meeting. Whether your score be high or low, plan to come and have a good time. Remember that the value of your attendance is not measured by your score.

There is one thing you can do now, and that is to reply to this letter, and at once. Tell us whether or not you expect to come. If you cannot give any positive information, write what the probabilities are. Write anyway. Urge all your archer friends to come to help make a big showing.

We regret that the date of this meeting conflicts with that of the Eastern Archery Association, to be held in Wayne, Pa., but it could not be avoided. A meeting at the time mentioned will not interfere with the National meeting in Boston. Some would come here who could not go to Boston under any circumstances. Those who plan to go to Boston will go anyway, and should they come here first, it will be good practice for the meet to come later.

We need the help and good will of all in this work for archery.

EDWARD B. WESTON,  
Chairman Archery Committee.

**Scottish-American Tourney.**

BEFORE a crowd of 2,200 spectators on the afternoon of May 30 (Decoration Day) the above club turned out, and to the war-like strains of forty pipers, shot as did their sires of old, only on this occasion peace was proclaimed for the day, and targets took the place so long occupied by the adherents of the English kings. Two competitions were shot during the afternoon, both at the American round with the following results:

Dr. R. P. Elmer.....	25 113	27 153	30 198	82 466
E. I. Cole.....	15 76	30 152	29 167	73 395
J. M. Cleland.....	8 50	22 104	27 143	57 297
G. Milne.....	10 58	21 97	28 120	59 275

Dr. Elmer won first, gold medal; E. I. Cole, second, silver medal; J. M. Cleland, first handicap prize, and G. Milne second handicap prize.

Immediately after shooting ended the range

was turned over to the general public, and bows and arrows supplied, and in order to keep down the rush a charge of six shots for ten cents was made, and two prizes given, one for the highest score out of one set of six arrows, and the other for the best shot made during the day. That this last competition was highly popular can be seen from the fact that a sum of \$25.40 was taken at the range in the short time that was left before darkness set in.

Quite a few of the shooters who on this occasion tasted blood for the first time have expressed their intention of affiliating with the Jersey archers, and there is a talk now of a ladies' club in the immediate future, thus proving that there is something in the words of the old song, "Taste and try before you buy."

A surprising feature of the afternoon was the display of our genial Dr. Elmer from Wayne, Pa. As an archer most of us know his ability, but few of us know how versatile an individual we have among us. We watched him annexing the only bit of gold plate, which gave no surprise, sample the famed waters from the Scottish mountains like a native born, and last but not least, play a reel on the bagpipes in the big hall that set all the laddies and lassies dancing. As our drum major remarked, "MacElmer's a' richt."

E. I. Cole, of Ossining, N. Y., must have improved greatly in health since the National tournament at Boston last year, where he shot for the first time, though poorly, as he was just recovering from sickness. At any rate he was able on this day to lift the silver medal, which brings to mind the saying that some people are born with a silver spoon in their mouth. To take part in two tournaments in the first two years of his archery career, speaks well for Mr. Cole's courage and good sense, but to sneak a prize each time is something some of us have to learn yet.

The Scottish-American archers have been promised quite a number of prizes for their next open meeting which will take place probably in October on their own ground. Mr. Cole has shot on our range and says it is one of the best. Mr. Jiles and Dr. Hertig are going to visit us shortly, and on Saturday first we are to be honored by F. N. Clay, late of the Chicago Archers, who is our near neighbor now at Bloomfield, N. J.

GEORGE MILNE, Sec'y.

**Pittsburgh Archery.**

PITTSBURGH, Pa., May 31.—*Editor Forest and Stream:* A deluge of rain on Decoration Day, lasting from 1 P. M. to 3:30 P. M., spoiled what would have been a delightful afternoon for the Pittsburgh archers. Many stayed away from the grounds, and the program as originally planned was not carried out. However, a few enthusiasts braving the discomforts of the wet grass shot an American round with the following scores:

	60yds.	50yds.	40yds.	
O. L. Hertig.....	29 161	30 166	29 181	88 508
W. J. Holmes.....	28 148	29 152	30 192	87 493
G. W. Postgate... ..	24 112	25 125	30 164	79 401
Jas. S. Jiles.....	19 97	24 110	30 176	73 383
M. P. Sorber.....	18 82	27 127	30 170	75 379
O. M. Sorber.....	19 67	18 96	26 134	63 297
S. M. Stauffer.....	5 25	15 65	19 67	39 157
V. Long.....	6 24	9 37	12 60	27 121

Mr. Postgate is jubilant over his defeat of Mr. Jiles, and also over his fine score of 401 points. Mr. Jiles, who made one end at 40

yards of four golds and two reds totaling 50, avers that "Posty" cannot do it again.

Recent practice scores in the American round:

Holmes.....	83 479	Postgate.....	78 382
Sorber.....	87 483	Dr. Hertig.....	90 530
Jiles.....	77 443		

Practice, 100yds., 72 arrows:

Holmes.....	28 92	Dr. Hertig.....	48 184
Jiles.....	29 99	Dr. Hertig.....	40 144
Sorber.....	27 105		

An end at 100 yards was made after dark, totaling 777333—6—30.

PITTSBURGH, Pa., June 9.—*Editor Forest and Stream:* Dr. W. H. Haines entertained a number of his archer friends Saturday afternoon at the Oakmont Country Club. An American round was shot. Scores:

G. W. Postgate... ..	83 439	O. M. Sorber.....	71 343
J. S. Jiles.....	75 375	L. B. Fleming....	61 239
W. H. Haines.....	63 275	O. L. Hertig.....	90 552
S. M. Stauffer....	60 244		

On the Beechview range, June 8, a team round match was shot, with Mr. Jiles and Mr. Holmes on one side and Mr. Postgate and Dr. Hertig on the other. The race was very even and Mr. Jiles got revenge on Mr. Postgate for his defeat of the day before. Scores, 96 arrows, 60 yards:

J. S. Jiles.....	66 266	G. W. Postgate... ..	54 234
W. J. Holmes.....	91 439	O. L. Hertig.....	91 493
	157 705		145 727

The wind was very strong and interfered decidedly with the comfort of shooting.

O. L. HERTIG.

**New York Archery Club.**

THE archery season in New York city opened with a week's tournament in John Wanamaker's store, under the auspices of E. I. Horsman Co. W. H. Wills, the well-known archer, and president of the New York Archery Association, was in charge of the meet.

The tournament having been decided on by the dealers as a fitting way to usher in the season in New York, which really marks the revival of archery here after a lapse of about thirty years. The services of Mr. Wills were invoked and he consented to take charge and arrange the program and manage the tournament. The dates are June 10 to and including June 14 every afternoon. Those whose marksmanship during the four days' shooting has enabled them to qualify will be eligible for the final events which will take place Saturday, 10 to 1 o'clock. This will be prize day. A handsome cup, donated by FOREST AND STREAM, will be the chief prize to be contested for, and the eligibles will be well rewarded for good work during the week by being admitted to this contest. Other prizes also are to be awarded. Winners will be announced next week.

**The Edward B. Weston Trophy.**

A SILVER gilt cup, competed for at the annual tournaments of the National Archery Association of the United States, on the following conditions:

Awarded to the archer making most golds at any end of six arrows, shot during any event on the program, and to become the property of a thrice consecutive winner.

First won in 1910, by Henry B. Richardson, of Boston, with four golds at 60 yards. Second, won by Frank E. Canfield, Chicago, with five golds at 50 yards. Third, won by George Phillips Bryant, with four golds at 40 yards.

# YACHTING

Forest and Stream will give a weekly digest of Yachting and Motor Boating events from all over the country.

## Southern Y. C.'s 64th Annual Regatta.

*International Champion Machine Sloop Massachusetts Defeated on Lake Pontchartrain Course, New Orleans.*

BY OUR STAFF CORRESPONDENT.

SAILING in a wind more suited to rowboats than to "white wings," Commodore S. F. Healslip's machine sloop Stranger turned all the dope topsy-turvy Saturday, May 31, by defeating the international champion Massachusetts by 3m. 36s. over the triangular course of the Southern Y. C. on Lake Pontchartrain, near New Orleans. The Southern champion Seawanhaka, Captain Eddie Montgomery, was a poor third, 1m. 21s. corrected time behind Massachusetts, while Captain "Peter" Cooke's Kathryn I. finished almost in the dark, 4m. 48s. back of Seawanhaka. Senorita, Captain Olsen's racer, did not complete the course within time limit.

The occasion was the sixty-fourth annual regatta of the Southern Y. C., second in point of years of all the yachting organizations in the New World, the New York Y. C. alone exceeding it in age. The day marked also the formal opening of the yachting season in New Orleans waters. Minor races and "tuning ups" have been held on previous Saturdays, but this was the first official meeting.

The crowd was large, gayly dressed, and finely boated, which is to say that about 100 boats, filled with spectators, the chivalry and beauty of New Orleans, were present. Boats of every description, from palatial motor yachts to humble catboats and even rowboats, dotted the waters alongside and in front of the club house on Lake Pontchartrain (West End). The United States revenue cutter Winona, stationed at Mobile, came up Friday morning and anchored off the club house, while a number of Government motor launches, manned by marines, buzzed about the course, keeping it clear for the graceful racers. Beautiful steam, motor and sailing yachts floated majestically on the lake, while from their decks vari-colored crowds watched the contest. The Conservation Commission's luxurious yacht Daisy, bearing the commissioners M. L. Alexander, Edgar T. Leche and J. A. Dayries, with a party of friends, led the pleasure fleet, in which were noted Wendy, Kalolah, Seaweed and Glendower, each carrying large parties of pleasure seekers. The absence of Semper Idem, a palatial motor yacht, once leader of the fleet here, but now in Central American waters, was remarked by most of the rocking chair squadron. Those tried and true dry land sailors and highball steerers, however, soon forgot all other questions in trying to figure out just how Stranger, practically a dark horse in the race, got away with first place so handily.

With the preparatory gun, at 2:30 in the afternoon, the wind seemed to die down, and even when 5 o'clock came, the usual breeze

failed to materialize, and only a trifling six-knot wind, dying down much of the time to perfect calm, helped the racers home. At that some of them did not get home at all until after the closing gun.

The prettiest race was reserved for the last—prettiest, that is to say, from the viewpoint of the sailor. This was among the dories, where only ability at the helm counts. Squab, St. John and Sprite broke about even as they swam across the line in this event, but Squab soon upset the beans as did Stranger in the machine sloop event and beat St. John, the favorite, handily. The race was finely run; in fact, it is difficult to see how the little boats could have been handled better in the prevailing low wind, and held the

CROSSING STARTING LINE.

Senorita leading, Massachusetts second, Stranger (winner) third.

interest of the crowd even better than did the races of the larger boats.

The finishes were straggling. As has been said, Senorita failed to finish in Class A and was called in. In Class B both Agnes and Albatross failed to finish before dark, and were called in, as were also all the boats in Classes C and E. Thistle and Alga failed to finish their race, and so did Shinner, Rascal and Juanita.

Sea Wolf finished under pressure, making the twelve miles of its course in 1h. 30m. 54s. Mohawk and Schemer, open sloops of Class F, failed to finish within time and were called in. In the little catboat race all entries finished except Mildred, which withdrew after the first round.

In the cabin sloops Chewink withdrew, leaving the race a walkover for Cadillac. The summary:

	Start.	1st Round.	2d Round.	3d Round.
Senorita	2 45 52	4 02 00	6 09 45	*
Massachusetts	2 46 00	3 53 18	5 13 45	7 22 51

Seminole	2 21 45	2 21 45	2 21 09
Gwawis	1 39 24	1 39 24	1 44 11
Lida May	1 34 16	1 34 16	1 37 54
Chiquita	2 38 50	2 38 50	2 37 37
Scamp	2 28 48	2 28 48	2 37 31
Squad	1 41 38	1 41 38	1 41 38
St. John	1 43 57	1 43 57	1 43 57

It was generally agreed that Captain James Rainey, who sailed Stranger, is a sailorman who has come into much honor in his own country, for any other handling than that which he gave the "India rubber boat" would have resulted in a decisive defeat for her. As it stands, no one understands how the champion Massachusetts came to be beaten, the more especially as Lawrence Healslip, some noted as a skipper in this neck o' the woods, was steering her.

\*Called off.

Paris: Brentano's.

**ADVERTISEMENTS:** Display and classified, 20 cts. per agate line (\$2.50 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

### THE BOY AND THE DOG.

THERE is no more entertaining column in the average daily newspaper than that in which the editor gives his readers a free forum in which to air their views on all conceivable subjects, from the mast-heading of a city hall flag to the solution of the dog problem.

The dog problem in town, it need not be said, is for those who like dogs to maintain their dogs and live in amity with their neighbors who detest dogs. In congested centers of population the dog is not infrequently an occasion of bitterness and back-biting between very respectable citizens who otherwise would be disposed to keep the peace.

In the country, where folks live under less restraint and without the vexatious friction of the town, the youngster who joys in the possession of a pet—blue blood or mongrel—knows none of this heartburning which for his city cousin diminishes in some degree the satisfaction found in owning a dog. There is no truer friendship than that of the boy and the dog. There are no happier days to which the grown man may look back with a tender regret for their passing than the days spent in the old home fields with the faithful four-footed companion of youth. Confidence between boy and dog was perfect. The dog perhaps was not a thoroughbred and had come into the world minus a pedigree, but the boy accepted him for what he was, and in the blessed ingenuousness of youth may even have found an occasion of added pride in the dog in some characteristic which he now knows was highly to the animal's discredit as determined by the bench show standards.

And as for the dog, on his part, too, he took the boy for what he was, asking of him no more than that he should condescend to make of himself a demigod for unstinted confidence, affection and worship.

If the scientists would devise a way to represent the care-free happiness of boyhood days in some equivalent of foot pounds, the amount of it justly accredited to the companionship of boy and dog would be expressed in many tons.

### VACATION TIME.

WE are now in the height of the outdoor season, and for a few months the consideration of the vacation soon to come will have a large share in our thoughts.

It is a trite saying that each of us is at heart a savage, and desires, at least once a year, to return for a little while to the habits of those primitive ancestors who depended for support on the flesh of the beasts which they hunted, the fish which they caught from the waters, or the roots and fruits yielded by the soil. This may be true, but whether it is so or not will probably never be known. It seems more probable that since the pleasures of life consist chiefly in its changes and its contrasts, so we, who are civilized, who live in cities, towns, villages, or at all events in houses, and are bound by all the restraints of civilized society, find our highest pleasure in escaping for a time from that society and the restraining fetters consequent on our ordinary close association with men. We long for a freedom unknown in our daily life, for an independence known only to natural things who wander at will, when and where they please, and who lie down and sleep at their own good pleasure. We long to go where we please, to stop when we feel like it, to eat when we are hungry and not at set times, to lounge in camp in our oldest clothes, or without any clothes at all, to be for a little time our own masters.

One and all the civilized people of the world are struggling in a race for such measure of wealth as shall give them absolute independence, shall enable them to do precisely as they please. Not one of them ever attains the sum of his desires. The man who has become a multi-millionaire has formed the habit of making millions, and this habit has become stronger far than was his old desire for freedom, for a time when he could travel, could spend his days in fishing or shooting, or in studying natural history, or could buy back the old farm where he was born and go there to be for the rest of his life a farmer.

Yet, for a little time, each one of us who spends his vacation in the forests, or among the mountains, or on the seashore, who makes his fishing trip, his hunt for big game, or spends two or three weeks cruising on yacht or tiny catboat, is richer far than any of these multi-millionaires, for he is doing the things that he has longed for and looked forward to; he has thrown aside for a little while all sense of responsibility, and has once more become a child with the child's freedom from care, but with far more than the child's capacity for enjoyment. Let him make the most of his good time. It will not last long, and a whole year may elapse before it comes again.

### OHIO GAME LAWS.

THE great big wholesome State of Ohio at last has come to the realization that many of its important game birds must be protected, and so has closed until 1915 the season on quail, ruffed grouse, pheasant and Carolina doves. A resident license now adds to the income for game propagation. Well done, Ohio, well done. Digest of the new laws appears elsewhere in this issue.

### LESS WEBSTER AND MORE LEGISLATION.

COME, now, men and brethren, let us reason together. Is it worth while, just because a shooter shoots more game than we think is fitting, to launch out in unbridled invective upon him and call him bad names? Is conformity to an ill-defined and fluctuating standard of game shooting of such transcendent moment that in the rebuke of its transgression we must say good-bye to the observance of good breeding and common decency in our speech to or respecting our fellow men? Can intemperance in game-killing be reformed only by intemperance in speech? Is the "game hog" to be turned from his ways only by the unparliamentary vocabulary of a strenuous blackguard? We do not believe it. But if the promotion of game protection does depend upon publicly shouting bad names, most of us are in the position of the good old Quaker of the story, who, when he was spattered by mud in the street, called the street gamin to him and said, "I will give thee a penny to swear for me."

### PROTECT THE FLOWERS.

PROTECTION is getting to be the habit in Pennsylvania. They have protected the small boy from the deadly cigarette, the birds of plumage against the ravages of the milliner, and now Prof. Marion Mackenzie has issued a circular praying for the protection of wild flowers and calling for legislative action. He names a score of the State's beauties which he claims are in peril of extinction from their native haunts, among them many of the common variety.

Conservation is a great blessing, but it does seem like carrying it too far to take away from the children, and grown-up city folk, who go afield now and then, the greatest joy of the outing, the plucking of a bunch of wild flowers, to take back to the heated city where flowers are found only in parks and florist shop windows.

### REVISED GAME LAWS.

JUST as fast as we obtain them, the 1913 game laws of different States will appear in FOREST AND STREAM. Only important revisions will be printed, because of limited space. Complete amendments may be had by subscribers on application to the editor of FOREST AND STREAM.

Mrs. NORMA FREDERIC GIBBONEY, one of the prettiest young women in the South, noted for her sportsmanship and prominent in social circles, has been appointed game warden for Mobile county to protect game birds and fish near her country home.

This is the first known instance of a woman holding such a position.

### The Arch Archer 'of All.

BY LONG BOW.

Of bows and strings,  
Your poet sings,  
Of archery's revival;  
And yet to me  
All praise should be  
For archery's survival.

My renown'd skill  
Forever will  
Make other efforts stupid;  
Each score a miss,  
Fer, note you this,  
I am bold Dan Cupid.

Ticks From the Ship's Clock.

SIR THOMAS LIPTON has placed the command of his new America's cup challenger, Shamrock IV., in the hands of W. P. Burton.

THE next big race on the Delaware River will be the Delaware River Y. R. A. cruiser race to Overfalls light and return, under the auspices of the Camden Motor Boat Club.

THE annual cruise of the Portland Y. C. will take place July 10, 11 and 12 and will be confined entirely to Casco Bay waters.

THREE new cups have just been presented to the regatta committee of the Atlantic Y. C.—Dr. Atkinson's cup to the Bird boat that scores the greatest number of points during the season.

THE Larchmont Y. C. went in to commission last Saturday. Commodore Smithers has offered three cups for club championships.

J. STUART BLACKTON has donated a trophy said to be valued at \$1,500 for the power boat making one mile (5,280 feet) in one minute at the second annual Chicago water carnival, which begins Aug. 16.

OWNERS of the New York Y. C. fifties have subscribed \$1,000 to be offered as prize money for the crews. Twelve races are to be sailed during the season with professionals in charge.

THE 1913 Year Book of the Narragansett Bay Yacht Racing Association, now ready for distribution by Secretary-Treasurer W. Louis Frost, contains a few changes in the rules, none, however, affecting materially the racing end.

THE sloop Avenger, launched last week at the Herreshoff yard, will race in the new 50-foot class of sloops enrolled in the New York Y. C.

Manhasset Bay Regatta.

AN almighty stiff breeze was in evidence today and made ideal racing. The "leading feature" was the New York Y. C. 50-foot class. Ventura, owned by Vice-Commodore George F. Baker, of the New York Y. C., won by one minute from Henry Payne Whitney's Barbara, and 1m. 15s. ahead of Carolina II., owned by Pembroke Jones.

with the booms to port, the second a reach and the third a beat. The summary:

**A Hand 30ft. V-Bottom Day Cruiser.**

(See plans on opposite page.)

At the shops of Wardwell & Goddard, of Bristol, R. I., there is now building for a summer resident of Chatham, Mass., a very attractive fast V-bottom day cruiser, from the plans of Wm. H. Hand, Jr., of New Bedford, Mass.

The new boat, while primarily a runabout, has cabin accommodations for two with necessary conveniences for over night shooting and fishing trips, for which the owner intends using the new boat. In lines this new 30-footer is a development from Old Glory II., the remarkably successful little 24-foot runabout which made the splendid trip to Digby, N. S., and return last summer.

The cabin arrangement which is shown well by the plans, provides sleeping accommodations for two on pipe berths, with a convenient galley and toilet. The cockpit control seat is raised higher than is usual, and protected by a breakwater with a khaki weather cloth extending aft from aft end of the breakwater to the backboard on control tank. The main cockpit floor is four inches lower than flooring under control seat, and is arranged with fixed side and end seat, with locker space below. The cockpit is watertight and self bailing. The location of motor and gasoline tank approximately amidships insures easy action in rough water and will allow of the boat being kept in perfect trim, regardless of the quantity of gasoline in tank. The motor is a 40 horsepower 4-cylinder Loew-Victor, installed with automobile control, and a speed of from fourteen to fifteen miles per hour is expected under service conditions.

This new Hand V-bottom presents a very trim, ship-shape appearance and will undoubtedly prove an excellent boat for use in rough water about Cape Cod, in which the boat will be used.

In design the boat is strictly wholesome in all ways, and the full buoyant lines of this highly developed V-bottom insure stability, comfort and dry going at all times.

The dimensions are, length over all, 30 feet; beam, extreme, 8 feet; draft, 2 feet 3 inches.

**Columbia (N. Y.) Y. C.**

THE annual regatta of the Columbia (N. Y.) Y. C. resulted as follows:

Class 1, Division 1.—Open boats, rating 55 and less; twice over triangular course; distance, 10 nautical miles; start, 2:15:

	Finish.	Elapsed.
Sea Robin, C. E. Gibson.....	3 16 16	1 01 16
Elise, T. Kick .....	3 15 25	1 00 25
Bunk III., C. Firth .....	3 21 58	1 06 58
Fabien, W. E. Thomas .....	3 16 12	1 01 12
Gray Hare, Haas.....	3 24 54	1 09 54

Corrected time: Sea Robin, 0.54.57; Elise, 0.56.13; Bunk III., 0.58.24; Fabien, 1.00.31; Gray Hare, 1.01.29.

Class 1, Division 2.—Open boats rating 55 to 75; three times over triangular course; distance, 15 nautical miles; start, 2:20:

Eastern Star, E. W. Finch.....	3 43 26	1 23 26
--------------------------------	---------	---------

Corrected time: Eastern Star, 1.15.37; Rookie, Buccaneer, Question and Dolphin II., did not start.

Class 2, Division 1.—Displacement speed boats rating more than 75 to Ardsley and return; distance, 30 nautical miles; start, 2:35:

Edith II., A. E. Smith .....	3 57 16	1 22 16
Cinderella, J. Simpson .....	Did not finish.	

Corrected time: Edith II., 1.01.16; Ace II., He'en and Limit did not start.

Class 2, Division 2.—Hydroplanes, all ratings; to Ardsley and return; distance, 30 nautical miles; start 2:40:

Tiny Tad, Dr. H. L. Pratt .....	4 10 42	1 30 42
Gun Fire, Jr., W. J. Brunard .....	4 14 05	1 46 05
Peter Pan V., I. Simpson .....	Disabled.	
Little Joker, H. S. Ford.....	Disabled.	

Corrected time: Tiny Tad, 1.14.00; Gun Fire, Jr., 1.22.40.

Class 3, Division 1.—Cruisers less than 38ft. over a 1 in length; twice over triangular course; distance, 10 nautical miles; start, 2:55:

Alfred S., Soeldner .....	4 35 24	1 40 24
Virginia, H. M. Betts .....	4 23 12	1 28 12
Blixten, J. H. Hallberg.....	4 21 30	1 26 30
Isis, C. C. Hunt .....	4 35 41	1 40 41
Mary Augusta, W. Fairchild.....	4 23 50	1 28 50
Gim Crack, W. S. Deannett .....	4 29 28	1 34 28
Gracie B., C. H. Leyton.....	Did not finish.	
Vic IV., C. L. Nagely.....	Did not finish.	

Corrected time: Alfred S., 1.00.37; Virginia, 1.04.42; Blixten, 1.21.11; Isis, 1.12.58; Mary Augusta, 1.19.49; Gim Crack, 1.30.45

Class 3, Division 2.—Cruisers, at least 38ft. over all in length; twice over triangular course; distance, 10 nautical miles; start, 3:00:

Senorita, J. J. Rutherford .....	3 56 34	0 56 34
Idle Time, M. B. Behrman.....	4 14 31	1 14 31
Sultana, J. L. Martin.....	4 15 37	1 15 37
Josephine, C. J. Stern .....	4 14 47	1 14 47
Tammany, J. J. Hagan .....	Did not finish.	

Corrected time: Senorita, 0.56.34; Idle Time, 1.00.10; Sultana, 1.04.37; Josephine, 1.06.55

**Gravesend Bay Regatta.**

FOLLOWING is the summary of the Gravesend Bay regatta:

Sloops, Class Q—Start, 3:30—Course, 6 Miles.

	Finish.	Elapsed.
Suelw, E. T. Luckenback.....	4 10 10	1 10 10

**Yachts Change Hands.**

THE Hollis Burgess yacht agency has sold the well-known schooner yacht Vision, owned by Henry A. Morse, of Boston, ex-Commodore of the Corinthian Y. C., and a prominent member of the Eastern Y. C., to Norman H. White, of Brookline, Mass. Vision was designed by Fred Lawley and built by George Lawley at South Boston in 1905. She is 65 feet 5 inches overall, 43 feet waterline, 14 feet 4 inches beam and 8 feet draft, and is an exceptionally handsome and speedy schooner yacht. Also the 30-foot waterline schooner yacht Fame, owned by Vice-Commodore Roger Upton, of the Boston Y. C., to G. Walter Vialle, of Concord, Mass., a prominent member of the Boston Y. C.; the 27-foot waterline cruising yawl Clio, owned by N. F. Ambrusen and W. L. Church, of Boston, to John S. Phillips, of New York; the auxiliary yawl Mapiiti, owned by Stephen R. Bartlett, of Boston, to F. P. Speare, of Boston; the 22-foot waterline sloop Gringo, owned by William H. and S. H. Brown, of Marblehead, Mass., to a prominent member of the Boston Y. C.; the 26-foot cabin motor boat Winsome, owned by F. P. Speare, of Boston, to a Boston Y. C. member, and the catboat Bantam to W. H. Brown, of Marblehead.

The same agency has also chartered the 103-foot houseboat Clarina, owned by Arthur Perrin, of Brookline, Mass., to Edward B. Green, of Buffalo, N. Y., who will use her in Marblehead this season.

STANLEY M. SEAMAN has sold the following:

The 50-foot power cruiser Sim Too for ex-Commodore A. C. Soper to Dustin Farnam.

The 50-foot power cruiser Santee for Francis L. Field, of the New York Y. C., to Commodore Wm. W. Brooks, of the Jeffries Y. C., East Boston.

The 72-foot auxiliary yawl Sivad for Dr. F. T. Rogers, of Providence, R. I., to James W. Stevens, who is now fitting her out for extended cruising along the coast.

The 59-foot sloop Adyta II. for Dr. Richard von Foregger to Lowell M. Palmer, Jr., of this city.

The raised deck cruiser Ruth II. for Remsen S. Mills, of Brooklyn, N. Y., to Arthur A. Grant, of the same place.

The auxiliary sloop Dorothy for E. M. Wright to Rudolph Oelsner, of New York city.

The 35-foot launch Idarim for George S. Evans, of New York, to the Southern Paper Company, of Pasacagoula, Miss.

The knockabout Mic Mac II. for Frederick Gade, of New Rochelle, to H. H. Lewis, of New York city.

The 30-foot launch Mercedes for Paul of New York, to Charles Ward Hall, of the Larchmont Y. C.

The 35-foot launch Alogy for S. A. French, of New York, to H. H. Lewis, of New York city.

**Canoeing**

**A. C. A. Membership.**

NEW MEMBERS PROPOSED.

Central Division.—John F. Fairbain, 131 Allen street, Buffalo, N. Y., and Harry Turner, 374 Bird avenue, Buffalo, N. Y., both by J. H. Teach; Edmund B. Ralph, 88 Pascal, Buffalo, N. Y., and A. C. Davis, Chamber of Commerce Building, Buffalo, N. Y., both by Lyman T. Coppins.

NEW MEMBERS ELECTED.

Atlantic Division.—6674, W. C. Tschinkel, 535 West 160th street, New York city.

Eastern Division.—6669, Herbert D. Ashley, 89 Vernon street, Waltham, Mass.; 6670, George A. Baxter, 40 Prospect street, Waltham, Mass.; 6671, Raymond A. Morse, 20 Whitlowe road, West Newton, Mass.; 6672, William W. Ferguson, 16 Prospect street, Waltham, Mass.; 6673, Karl Hoyt Spooner, 66 Prospect street, Waltham, Mass.

**The Drudge.**

I've got no millions piled away,

Few men have heard of me;

I have no diamonds to display,

I've never crossed the sea;

No doctor ever wants to know

About my appetite;

I'm never interviewed, but, oh,

How sound I sleep at night!

The markets wouldn't sag a bit

If I should die to-day;

I've got to work for all I git,

I've little time for play;

The world would roll on steadily

If I was out of sight;

I've never made my mark, but, gee,

How sound I sleep at night!

I've troubles now and then, of course,

For they're a part of life,

But I'm not wantin' no divorce,

Nor neither is my wife,

And there's a little tot whose glee

Increases my delight;

I'm just a sort of drudge, but, gee,

How sound I sleep at night!

—Chicago Record-Herald.

# TRAP SHOOTING

Forest and Stream is an Honorary Member of the Interstate Association for the Promotion of Trapshooting.

**Fixtures.**

If you want your shoot to be announced here, send a notice like the following:

**REGISTERED TOURNAMENTS.**

- June 16-18.—Boise, Idaho.—Idaho State tournament, under auspices Idaho State S. A. E. F. Walton, Sec'y.
- June 17-20.—Dayton, O.—Interstate Association's fourteenth Grand American Handicap tournament, on grounds of N. C. R. Gun Club; \$2,000 added. Winner of first prize guaranteed \$600 and a trophy; winners of second and third places guaranteed \$500 and \$400 respectively. Elmer E. Shaner, Mgr., Pittsburgh.
- June 17.—Thief River Falls (Minn.) G. C. P. O. Myrum, Sec'y.
- June 18-19.—Springfield, Vt.—Vermont State tournament, auspices Springfield G. C. I. L. Hall, Sec'y.
- June 19-20.—Warroad (Minn.) G. C. D. F. Miller, Pres.
- June 21.—Billings (Mont.) R. and G. C. C. M. Ray, Pres.
- June 21.—Johnstown, Pa.—Central Pennsylvania T. S. L. tournament, under auspices of Johnstown G. C. Harry A. Shields, Sec'y.
- June 21.—Bridgeport, Conn.—Western Connecticut Trapshooters' League tournament, under auspices of Sea Side G. C. Earl R. Lewis, Sec'y.
- June 22-26.—Devil's Lake, N. D.—Queen City G. C. J. F. Duis, Pres.
- June 23-25.—Pueblo, Colo.—Colorado, New Mexico and Wyoming State tournament, under auspices of the Pueblo G. C. C. H. Spooner, Sec'y.
- June 24.—Fulton (Mo.) G. C. Fred C. Wells, Sec'y.
- June 24.—Rockaway Beach, N. Y.—Rockaway G. C. Paul von Boeckman, Sec'y.
- June 24-26.—Crookston, Minn.—Minnesota State tournament, auspices Crookston G. C. T. Morris, Pres.
- June 25.—Robinson (Ill.) G. C. C. M. Franke, Sec'y.
- June 25-26.—Du Bois (Pa.) G. C. E. W. Kelly, Sec'y.
- June 26.—Tolcdo (O.) G. C. George Volk, Sec'y.
- June 26.—Sedalia (Mo.) G. C. John McGrath, Sec'y.
- June 26.—Ada (Minn.) G. C. A. P. McDowell, Pres.
- June 26.—Fayetteville (N. Y.) G. C. C. C. Snook, Sec'y.
- June 26-27.—Adel (Ia.) G. C. Chas. F. Clarke, Sec'y.
- June 27-28.—Grand Forks, N. D.—North Dakota State tournament, under auspices of North Dakota State S. A. Clarence A. Hale, Pres.
- June 28.—Catasauqua, Pa.—Bryden G. C. E. C. Jones, Sec.
- June 28-29.—San Jose (Cal.) Blue Rock Club. O. N. Ford, Sec'y.
- June 28-July 1.—Niagara-on-the-Lake, Canada.—Canadian Indians. W. T. Ely, High Scribe.
- June 30.—Craifton (W. Va.) G. C. R. Gerstell, Jr., Sec'y.
- June 30.—Dickson City (Pa.) R. & G. C. Thos. F. Padon, Pres.
- June 30-July 1.—Vancouver (B. C., Canada) G. C. C. A. Porter, Sec'y.
- June 30-July 1.—Fargo, N. D.—Gate City G. C. A. E. Rose, Sec'y.
- July 1.—Red Deer (Alberta, Can.) G. C. G. B. Parker, Sec'y.
- July 1.—McKeesport, Pa.—Western Pennsylvania T. S. L. tournament, under auspices of McKeesport G. C. Louis Lautenslager, Pres.
- July 2.—Vicksburg, Miss.—Hill City G. C. J. J. Bradford, Mgr.
- July 3.—Calgary (Can.) G. C. John Barr, Sec'y.
- July 4.—Waukesha, Wis.—Spring City G. C. Homer E. White, Sec'y.
- July 4.—Greenwich (Conn.) G. C. J. H. Finch, Pres.
- July 4.—Nepoleon (O.) S. A. H. R. Glass, Mgr.
- July 4.—Coalgate (Okla.) G. C. F. C. Varner, Sec'y.
- July 4.—Syracuse, N. Y.—Hunters' Club of Onondaga County. Chas. H. Stanard, Sec'y.
- July 4.—Lynchburg (Va.) G. C. J. M. Fisher, Sec'y.

**DRIVERS AND TWISTERS.**

J. M. Henderson has been elected president, and H. H. Neil, secretary-treasurer of that flourishing gun club in Anaconda, Mont.

Secretary A. K. Ludwig, of the Hercules Gun Club, Temple, Pa., announces a grand target shoot at 120 targets—eight events—entrance \$8.80, under the percentage system, for Saturday, June 14, 1914. Ideal Leggett trap and bluerocks will be used. All amateurs invited to attend.

There was on exhibition at the Du Pont Gun Club house last Saturday, one of the silver cups donated by Eugene du Pont, to be shot for during the balance of 1913. Mr. Du Pont has donated one cup for each of the five classes, A, B, C, D and E. These cups are to be shot for under conditions similar to those governing the 1912 cups. Frank L. Connable has donated a sterling silver cup, to be shot for under conditions similar to the cup he presented in the early part of 1912. This makes the third trophy Mr. Connable has donated the club.

The second annual clay bird shoot of the Queens Club will be held at its grounds, Queens, L. I. on Saturday, June 21, 150 birds, added handicap, 16yds. rise. Shooting starts at 10 A. M. No entrance accepted after first squad begins the third event of 25 targets. All ties will be shot off at 25 targets each. No shooter may win but one of the 50-bird prizes, and one of the prizes in the main 150-bird handicap event. Ten prizes in all. Special prize for high scratch score for entire program of 150 birds. Six handicap prizes for entire program. One prize for winner of each of the 50-bird events. An optional \$1 sweepstake on each 25-bird event, and a \$4 extra optional sweepstake on the entire program of 150 birds. Class shooting, money divided 40, 30, 20 and 10. Entrance, including lunch and refreshments, \$5. To reach grounds take L. I. R. R. electric train at Flatbush avenue station, Brooklyn, or Pennsylvania R. R. station, N. Y. city. By automobile, to Jamaica, then Hillside avenue or Fulton street direct to Queens. All standard ammunition can be purchased at the club grounds.

W. G. BEECROFT.

**Smith Gun Club**

NEWARK, N. J., June 7.—The sweepstake shoot was as follows: J. Riley 20, 21, 19, 22; John Smith 18, 20, 18, 17; J. Gevette 7, 9, 9, 6; W. McMahon 19, 19, 21, 20; Fred Lewis 7, 10, 6, 9; Frank Van Ness 10, 13, 13, 12; Sam Castle 21, 22, 20, 18; I. Castle 23, 24, 24; E. E. Gardner 18, 15, 17; R. Bereaugh 22, 20, 21.

**Transact Your Business Early.**

PITTSBURGH, Pa., June 5.—Editor Forest and Stream: We will thank you to announce in the Trap Department of FOREST AND STREAM that, on account of the Grand American Handicap tournament, the office of the secretary of the Interstate Association will be closed from June 14 to June 21 inclusive. This announcement is made for the benefit of gun clubs that may have registered tournament matters to take up with us within the dates specified.

THE INTERSTATE ASSN.,  
E. Reed Shaner, Sec'y.

**Frontier Rod and Gun Club.**

BUFFALO, N. Y., June 9.—With fair weather a small crowd of shooters visited the traps of the Frontier Gun Club. Leonard was high with 87 per cent. The scores:

Events:	1	2	3	4	5
Targets:	10	15	25	25	25
Schnitzer .....	5	9	14	14	..
Leonard .....	10	12	23	22	20
Wakefield .....	9	11	15	16	16
Hewitt .....	8	11	14	20	..
Vedder .....	6	9	20	20	..
Kern .....	7	8	10	11	..

JOHN BOWDEN.

**Maryland State Shoot.**

BALTIMORE, Md., June 4.—The first day of the annual tournament of the Maryland State Sportsman's Association brought out fifty-five shooters. C. O. Williams, of the Rising Sun Gun Club, was the high amateur. Williams shot a steady race all through. Billmeyer, of the Cumberland Gun Club, was second with 135, while E. A. Jenkins, of Carroll county, and E. W. Ford, of Washington, D. C., tied for third with 133. J. Mowell Hawkins, of Baltimore, and E. H. Storr, of Richmond, were the high professionals, tying with 139.

In the team race the Anolostan Gun Club team won the first prize, 138 out of 150. Second went to Electric Park Gun Club, with 132. Third to the Rising Sun Gun Club with 130, and fourth to the Baltimore Shooting Association, with 129.

At the annual meeting of the association, Talbot Denmead, of Baltimore, and E. Lee Lecompte, of Cambridge, Md., talked on game protection. H. D. Billmeyer, of Cumberland, Md., was re-elected president; Joseph S. Gifford, of Rising Sun, Md., vice-president, and H. Linn Worthington, of Baltimore, secretary. The board of directors continued in office with the exception of Dr. C. A. Krantz, of Baltimore, who was elected to fill the vacancy caused by E. H. Storr, leaving the State.

**SECOND DAY.**

The weather was ideal and the scores were better than yesterday. J. E. Eyler, Arlington, Md., was high amateur for the day with 142 out of 150. Ford, second, with 140, and the pair tied for the general average for the day. The Lexington trophy was won by Eyler, 47 out of 50. The third amateur for the day was Billmeyer, with 132, which placed him second on the list for the two days. Of the professionals, Hawkins was high, with 281 out of 300, followed by Storr, with 279, and Stevens was third, with 265.

In the State championship William Holland and Dwight Mallory tied on 48 out of 50, the latter winning shoot-off and won the Arthur C. Macy trophy. Holland took second, and Ford third. About 23,000 targets were thrown during the tournament.

*The Ammunition You Use  
and the Dealer Who Sells It*

**I**N every part of this country where there is a dealer who is alive to the developments taking place in the ammunition world, sportsmen are getting Remington-UMC.

Remington is spreading faster than any other name in the ammunition history of America.

The dealer who is specializing in Remington-UMC., is taking the aggressive lead in the ammunition trade of each community.

He is a man worth finding if you are critical about getting uniform and reliable loads.

Whether you shoot a Remington or content yourself with some other make of gun—you are interested in this man because you want good ammunition.

The biggest name in the arms and ammunition world today is Remington-UMC. The ammunition that carries it is used from one end of the country to the other—not only in Remington firearms, but in every standard make of shotgun, rifle and pistol used in the world of sport.

*The exact load you want for the  
kind of game you are after.*

# The Ohio State Shoot

## Circleville, June 4 to 6

THE twenty-seventh annual tournament of the Ohio State Trapshooters' League was held at Circleville, on June 4, 5 and 6, under auspices of the Ideal Gun Club, of that city. The attendance was not what had been hoped for. However, the shoot was a decided success, and those who were present enjoyed a pleasant week's sport and went home satisfied. The club was favored with ideal weather throughout the shoot, the only rain of the week coming on Tuesday night. The days were pleasant and cool until Friday, which was uncomfortably warm in the afternoon. There was more or less wind each day, but only enough to make the shooting a little more interesting and never enough to seriously interfere with the flight of the targets. The local officers of the League exerted themselves to see that every man present should enjoy himself, both at the grounds and during the evening, and their efforts were highly successful. The grounds are about a mile north of the city, and are reached by the traction cars, although this week private automobiles provided transportation for most of the contestants going and returning, making frequent trips between the hotel and club house.

The contestants on the firing line faced the east, but this caused little inconvenience even at the start, as the sun was well up before the program was begun. It would be impossible to find grounds with a better background, the targets were thrown against a perfectly clear sky, and were clearly visible the instant they appeared above the trap house. This was favorably commented upon by almost every shooter.

In the office Luther J. Squier handled the work in his usual efficient manner, some of the minor details being looked after by assistants.

Shooting was begun promptly each day, and was finished in good season, allowing ample time for extra events, and many of these were pulled off. E. M. Stout and J. S. Ritt had charge of arranging the grounds for the tournament, and were both kept busy during the week with the various ground details, which all help to make a successful shoot.

The field force performed its duties satisfactorily. At trap No. 1, Lloyd Tompkins was referee; J. C. Jeffries, scorer; Fred Tool, puller, and M. De Long, trapper. At trap No. 2, H. Leist, referee; Ed. Smith, scorer; H. Tool, puller; C. Peters trapper. At trap No. 3, Paul Reed, referee; E. Stout, scorer; J. Snyder, puller; George Burns, trapper.

In addition to the trade representatives who took part in the program events, there were present Messrs. Y. Dibble and Burton Call. The tournament was registered, and was given under the Squier money-back system.

Headquarters for the shooters were established at the American Hotel, and every courtesy was extended to the visitors by the management, for which the league is duly grateful, and wishes to express acknowledgment of the members.

### PRACTICE DAY—JUNE 3.

Thirty-four shooters were at the grounds soon after noon. E. M. Stout was on hand to give them the glad hand, and L. J. Squier at the cashier's window, waiting to take in their shakels in exchange for the privilege of having a round at the clays. Later in the afternoon Pop and Horace Heikes came out, together with Doc. F. M. Edwards and Joe Rummel, in time to shoot in the last three events. There was nice work done, and some pretty races developed before the finish. W. H. Heer and Lester German hooked up at the start, the latter getting a lead of one target in the first event, but tying with Heer in the third event. Heer lost a target in his first time up, but after that went straight, recording a run of 97, and finishing in a tie with German on 99. J. S. Day, C. F. Moore, W. R. Chamberlain and J. R. Taylor, all professionals, tied for second place on 97. Then came J. W. Garrett, professional, tied with J. M. Markham and Homer Hirth, amateurs, on 96. German went out with his last 51 straight, a good foundation for a run. R. O. Heikes, Horace Heikes and F. M. Edwards shot a 96 per cent. pace in the last three events. C. F. Moore broke his last 67 straight. During the evening there were many new arrivals, and the hotel lobby was a lively place until bedtime. Scores:

### FIRST DAY—JUNE 4.

The special event was started at 8:45, nearly all of the fifty-odd shooters present taking part in it. Immediately after it was finished, the regular program was started. Six events were finished at noon, and a brief rest for dinner was called. Before 3 o'clock the last event was finished. Many of the townspeople were out at different times during the day and were treated to an exhibition of shooting which they will not see again for a long time. W. H. Heer, with a credit of 97 straight breaks from the day before, continued his fine work, and blew the clays to powder up to the eighth event, when he

failed to score his eighth bird, and the run was finished with a total of 234. After that he went straight and quit at night with 62 straight for the second day. He missed but one target out of 200 in the specials and regular program events, which was conceded to be some shooting. In the regular events he was high professional with 149; J. S. Day gave him a pretty good run, going out with 146, and R. W. Clancy came third with 145. The amateurs, while they did not measure quite up to their professional brothers, had no cause to feel ashamed of their showing. J. A. Smith and F. C. Koch tied for first place with 144 each, which is 96 per cent., and not to be laughed at. F. M. Edwards and W. I. Spangler were second with 142 each, and Joe Rummel got third on 140. Perfect scores in the special events were fairly plentiful among the amateurs as well as among the professionals, but Heer was the only one to go straight in both. German began the day with his last 51 targets of the previous day to his credit, and increased this number until the ninth target in the second event in the regular program, when his run came to an end with 99. C. F. Moore registered 76 without a miss.

In the Ideal Gun Club special four amateurs tied with Heer and German on perfect scores of 25. Frank D. Alkire, at one time one of the best known amateurs in Ohio, has been out of the game for two or three years, but has not yet forgotten how to shoot, and was a welcome visitor at the tournament. He is an advocate of the 20-gauge, and to show that he has the courage of his convictions, used it in all the events here, not breaking so many as in the old days, but still being a long way from the foot of the list. It would be impossible to hold a State shoot without Doc. Wm. Shattuck, of Coal Grove; Doc. knew this, and made a special effort to be present. He did not break quite so many as usual, but kept some of the younger ones hustling to keep up with him.

The team match for the Review trophy was started at the close of the regular program, with eleven teams entered, a decided falling off from the entry of last year, when there were twenty-seven contestants. The winning team was composed of C. L. Culbertson and C. T. Stevens, of Zanesville, the former scoring 25, and the latter 24. Scores:

*J S Day.....	146	F Caldwell.....	123

The Review trophy, emblematic of the team championship of Ohio, was presented to the League by the Sportsmen's Review. The first contest took place on May 11, 1892, at Dayton, and was won by the Buckeye Gun Club, of that city. The winning team was challenged by the Grassy Point Gun Club, of Toledo, and lost the cup by default. This club was challenged by the North Baltimore Gun Club, which was defeated in August, 1892. The third contest was between the Grassy Point Club and the Sherman Gun Club, of Columbus, and was held in that city, the home team winning by a score of 177 to 170. On Oct. 12 of the same year, the Plain City Gun Club challenged and was defeated at Circleville, 172 to 145. At Columbus, in May, 1893, the

Sherman Gun Club's team No. 2 defeated team No. 6 of the same club by a score of 95 to 88. This was the fifth contest for the trophy, and the number of men on a team was reduced from four to two. The sixth contest, June 27, 1894, was won by the Buckeye Gun Club team, defeating the Sherman Club team by a score of 181 to 180; four men shot on each team at 50 targets per man. The winners were challenged by the Sherman Club, and the seventh match was shot on Oct. 5 of the same year, the Buckeye again winning; score 152 to 126. The eighth match took place at Dayton during the league tournament, May 14, 1895, and resulted in a tie between the Cleveland Gun Club teams, No. 1 and 2, on 46; the Cleveland team won the shoot-off 41 to 40. The teams consisted of two men, shooting at 25 targets each and this condition was made permanent. The ninth contest was held at Dayton in June of the same year, the Buckeye Gun Club winning with a score of 49. The tenth contest was held at Springfield in 1897, and the Buckeye Club was again victorious with a score of 49. The next match was also held at Springfield, on June 1, 1898, and resulted in a tie between the Buckeye Club team and a team of the Mechanicsburg Gun Club, on 49. The Buckeye team won the shoot-off, 48 to 45. At Columbus, June 6, 1899, the twelfth contest was won by the Sherman Gun Club team No. 1, after shooting off a tie with a team from Springfield. The next league tournament was held at Columbus, June 5 to 7, 1900, when the thirteenth contest took place. This year the contestants were given a handicap of added targets. The Columbus team scored a total of 50, their handicap of 5 targets giving them a perfect score. They were tied by the Cincinnati Gun Club team. In the shoot-off the former team scored 50 with their handicap, on the latter's 49. At Circleville, June 5, 1901, Alkire and Rhoades won the fourteenth contest with 49. The fifteenth contest was held at Cleveland on June 4, 1902, and was won by Heikes and Rike, each breaking 24. The sixteenth contest was held at Cincinnati, June 10, 1903, and was won by Rhoades and Young with 47. At Akron, June 15, 1904, the seventeenth contest was won by Galt and Kreider with 49. The eighteenth match was at Canton, June 14, 1905, and was won by the Newark team with 49. At Dayton, June 14, 1906, the Dayton team tied the Newark team with 48. The former team won the shoot-off with 46 to 39. The twentieth contest took place at Columbus, June 4 to 6, 1907; thirty-seven teams entered, and the trophy was won by George Volk and F. Foltz with 47. The winners received a silver loving cup as a memento of their win. In this contest C. A. Young and L. H. Reid with 49 were high, but it was decided that they were not eligible for the trophy. The twenty-first contest was held at Columbus during the league tournament, June 2 to 5, 1908, twenty-two teams being entered. The Toledo team was again the winner with 48. The Portsmouth team came second with 47. The next league tournament was held at Columbus in 1909, and twenty-four teams entered the twenty-second contest for the trophy. The result was a tie on 50 straight between the Toledo team, winners in the two previous contests, and a team from Dayton. In the shoot-off the latter team won with 49 to 48. The twenty-third contest was held at the league tournament at Cleveland, June 1-3, 1910. The interest was not so great as in previous years, only eighteen teams entering on June 2. The Toledo team tied with the Pomeroy team on 48, each of the four men scoring 24. The latter team was given the trophy, as the Toledo team failed to shoot off the tie. The twenty-fourth contest was shot on June 8, 1911, during the League tournament at Columbus; twenty-two teams were entered, and the result was a tie between four teams—Cleveland No. 2, Columbus No. 1, Portsmouth, and Toledo. The shoot-off was won by the Columbus team with a total of 47. The league tournament was held at Dayton, June 4 to 6, 1912, and the twenty-fifth contest was shot on June 5, with twenty-seven teams entered. The Hicksville Team No. 1 tied with the Custer Gun Club team on 48. In the shoot-off the latter team won, 43 to 40.

### The scores of the twenty-sixth match follow:

Dayton No. 1.....	23	Columbus.....	24
H W Heikes.....	23	F M Edwards.....	24
J M Markham.....	24-47	Wm Webster.....	23-47
Galion.....			
H Hirth.....	22	Circleville No. 2.....	22
U E Campbell.....	22-44	J E Walters.....	20
Circleville No. 1.....			
E M Stout.....	23	Asheville.....	20
W I Spangler.....	23-46	J B Cromley.....	24-44
London.....			
C D Coburn.....	23	Zanesville.....	25
J A Smith.....	24-47	C L Culbertson.....	25
Dayton No. 2.....			
F C Koch.....	23	Circleville No. 3.....	23
J E Cain.....	23-46	Chas Ward.....	22
Celina.....			
Geo Kistler.....	23	F Varwig.....	20-43

W. H. Heer was the maker of the long run for the day. Starting with 62 from Tuesday, he broke straight in the special, but dropped his fourth target in the first regular event, having a total of 90. He then broke them all up to the 13th in the last event, which gave him a run of 143. J. Rummel broke 54, J. A. Smith 57, and R. W. Clancy 58 straight.

### ANNUAL MEETING.

President W. I. Spangler presided at the annual meeting of the league, which was held June 4 and was well attended. Thirteen clubs of the twenty in the league were represented, viz.: London, Mechanicsburg, Dublin, Salem, Cincinnati, Galion, Columbus, N. C. R. of Dayton, Zanesville, Dayton, Celina, Portsmouth, and Ideal of Circleville. Two new clubs, Mahoning Valley, of Niles, and Seneca Gun Club were admitted to the league.

Two ballots were required in selecting the place for the 1914 tournament. Cincinnati and Circleville were tied on the first ballot, with Columbus having several votes. The latter withdrew, and on the second ballot

the representatives chose Circleville. The applications of several cities were presented. L. J. Squier, Cincinnati; J. R. Taylor, Columbus, and E. M. Stout championed Circleville. T. A. Marshall, R. O. Heikes and T. G. Barstow were appointed tellers. The election of officers followed. After nominations for President had been made, J. R. Taylor moved that the same officers be re-elected, as the shoot was to be given here again. The motion was carried without discussion. President, W. I. Spangler, Tarlton; Vice-President, E. M. Stout, Circleville; J. S. Ritt, Secretary-Treasurer, Circleville; Executive Committee: Dr. F. M. Edwards, Columbus; J. H. Smith, Columbus; Wm. Shattuck, Coal Grove; E. S. Rogers, Cleveland; H. D. Smart, Galion.

On motion made by J. R. Taylor, covering a suggestion by Thos. A. Marshall, was passed, and the following resolution drawn up, and the secretary instructed to write to the Association:

"Whereas, the Ohio State Sportsmen's Association, members of the American Game Protective and Propagation Association, in annual convention assembled, do most heartily endorse the work and methods of our parent organization in their fight for the protection and propagation of game.

"W. I. Spangler, Pres.  
"J. S. Ritt, Sec'y.

L. J. Squier suggested that an effort should be made to get more of the gun clubs into the league. He stated that there were at least one hundred and fifty active clubs in the State, and of that number only twenty belong to the league. J. M. Markham moved that the secretary be instructed to write to every gun club in the State, not now a member of the Association, urging the advantages of coming into the league. The motion was carried. J. R. Taylor thought that the traveling representatives should help in this matter, and promised to do so.

Voted, on motion of J. M. Markham, that the money received from club dues should be used for the purchase of trophies, and as added money to the 1914 tournament. This motion was amended to read that trophies should be bought with the money, and was carried. It was suggested that the officers should consult with J. R. Taylor and L. J. Squier as to the selection of trophies. Adjourned.

SECOND DAY—JUNE 5.

Thursday was clear and cool, more wind than yesterday, but not enough to seriously interfere with the flight. At 9:45 the special was begun with forty-two entries. Of these, seven went straight; thirteen broke 24, and only three fell below 20. Three of the events were finished at noon, and a halt called for dinner. The regular program events were finished about 3:20. The match for the amateur five-man team championship of the State was started over No. 3 trap at 2:45, while the tenth event was being shot over trap No. 1. At 3:30 everything was over but the shouting, and some of the shooters had good reason to be well satisfied with their showing. The amateurs were shooting in the same class with the pros. to-day, F. C. Koch tying for high gun on 148 with Heer and German; C. D. Coburn tied for second place with J. W. Garrett; Homer Hirth shot right up with C. F. Moore and R. W. Clancy, sharing third place honors on 144; A. B. Shobe was in fourth place with R. O. Heikes and T. A. Marshall on 143; fifth high amateurs were Webster, W. G. Alkire, U. E. Campbell and F. M. Edwards with 140 each. Heer and German had another strenuous time to-day, which ended in a tie. At the end of the first three events each had dropped one target; in the fourth event, German let another get away, giving Heer one lead. Their positions did not change until the last event, when Heer lost another bird, and German went straight. Hirth broke his first 94 birds straight; J. S. Day got a run of 67; C. D. Coburn broke 117 straight; F. C. Koch made a run of 64, and another of 68 in the regular events; J. W. Garrett broke the last 88 of the regular events. W. G. Alkire broke 54 straight; L. S. German broke the last 91 of the regular events, and went straight in the last special, making an unfinished run of 116; R. O. Heikes also left the grounds with an unfinished run of 94 in the regular and special events. On Tuesday R. W. Clancy broke 64 straight.

The five-man team match for the Shooting and Fishing trophy had only four entries and was won by the Dayton team with a margin of 5 targets over the Columbus team, 118 to 113; Circleville team No. 1 was one target behind Columbus. Several new shooters were at the grounds to-day, and the places of those who left on the night before were more than filled. There were fifty-nine shooters who took part in one or more of the events to-day. Among the visitors at the grounds during the day was George Haswell, a few years ago one of the most active trapshooters in the State, a hustler in the local gun club affairs, and secretary of the Ohio Field Trial Association. Among the new shooters to arrive to-day were H. E. and J. H. Smith, of Columbus. The former cracked out a straight for his team, but the latter could not quite keep up that pace, or the result would have been different.

The Okobiji Tribe was strongly represented at the tournament, and pushed the Indian tournament at all times. Among the noted Chiefs were Round Head, Bloody Ground, Woodpecker, Buckeye, White Scalp, Make 'Em Fly, Long Talk, Bald Eagle, Hoochee Coochee, High Point and Crowfoot. The tournament committee of the tribe promises those who visit Cedar Point, July 8 to 10, when the big war dance and doings are to be pulled off, the time of their lives, and invites every sportsman to attend and bring the squaws and papposeses. Scores:

*J S Day..... 142	U E Campbell..... 140

# The Picked Riflemen of the World Will Use **WINCHESTER** Cartridges, at the coming International Shoot

Winchester Rifle Cartridges outshot all other makes in the 300 Meter test recently conducted by the Board of Government Experts to select ammunition for the International Matches. The following figures, showing the mean radius of the targets made, tell the story of Winchester superiority:

WINCHESTER - - - -	1.761 inches
U. S. Cartridge Co. - - - -	1.895 inches
Remington-UMC Co. - - - -	2.554 inches
Frankford Arsenal - - - -	2.978 inches

## Winchester Revolver Cartridges Establish a New World's Record

In the tests of revolver cartridges, Winchester, the **W** brand, not only outshot all other makes, but established a new World's Record for accuracy. The mean of means for the two distances shot, follow:

WINCHESTER - - - -	1.313 inches
Western - - - -	1.560 inches
U. S. Cartridge Co. - - - -	1.675 inches
Remington-UMC Co. - - - -	1.908 inches
Frankford Arsenal - - - -	2.161 inches

## It Pays to Shoot Winchester, the Cartridges of Known Reputation and Proved Superiority.

### THIRD DAY—JUNE 6.

Friday, get-away day, was pleasant, partly cloudy in the afternoon. The contest for the amateur championship of Ohio brought out several new shooters, the entries being larger than either of the previous days. Seventy-one shooters were present. First squad was not called until 9:15. The regular program was shot first to-day, the championship race at 50 targets following. The first six events were finished at noon, and every one went to dinner, starting shooting again about 12:30. At 4:15 the tournament was brought to a close, and soon after the moneys were ready for distribution, the trophies had been delivered to their respective winners, and the 1913 meet of the league was a matter of history. Squad records were made to-day: No. 1—J. S. Day, C. F. Moore, W. R. Chamberlain, H. F. Roberts and C. L. Moeller—went straight in the second event, and later in the day squad No. 4—T. A. Marshall, W. H. Heer, L. S. German, J. E. Cain and J. A. Smith—did the same trick in event 9. Squad 3—J. R. Taylor, C. T. Stevens, C. D. Coburn, F. M. Edwards and A. B. Shobe—in event 2, went out with 74—we won't say who missed the target, but Stevens was seen struggling toward the tent with a load of guns.

J. R. Taylor was the bright star of the day and tournament. He broke the entire 200 targets to-day, and was of course high professional, with 150; German and Heer again locked horns for supremacy, and the former got in second place with 148, Heer tying with R. O. Heikes for third place on 147; then came J. S. Day with 146. The amateurs finished well up with the pros again to-day, J. A. Smith having 148, E. M. Stout 147, Geo. Kistler 145, F. M. Edwards, F. C. Koch and Lon Fisher 143 each.

On the three days, 450 targets, W. H. Heer was high pro. with 444; L. S. German, 438; R. O. Heikes, 434; R. W. Clancy, 433. First high amateur average went to F. C. Koch, with 435; J. A. Smith, 426; F. M. Edwards, 425; H. Hirth and C. D. Coburn 423 each. Several good runs were made. Beginning with Taylor, who went

out with an unfinished run of 211, including 11 from the previous day. Garrett added 4 to the 88 of Thursday, making 92; German brought his unfinished run of the second day, 116, up to 140, and then made another run of 61. R. O. Heikes made his unfinished run of 94 one of 99, missing the sixth target in the first event; F. C. Koch missed the third target in the third event, giving him a run of 100, with the last 68 of the previous day, and winning him a Du Pont trophy. W. R. Chamberlain had 61 from Thursday, and added enough to-day to make 131, thus winning a Du Pont professional long-run trophy, his first. E. M. Stout just missed the century mark, breaking his first 73, which gave him 93 with the last 20 of the day before. W. H. Heer ran 81; J. A. Smith 83, missing his ninth target in the seventh event, and then started in and went out with a run of 101, unfinished, and got his Du Pont trophy. J. S. Day 75; L. S. German 65; R. O. Heikes 86. The winners of Du Pont long-run trophies at this tournament were: F. C. Koch and J. A. Smith, amateurs; W. H. Heer, J. R. Taylor and L. S. German professionals.

The amateur Ohio State championship was won by J. A. Smith, of South Colon, on a score of 50, and was presented with the trophy, a fine solid gold watch fob. The trophy for amateur long-run of the tournament was won by C. D. Coburn with 117. The trophy was a pair of solid gold cuff buttons.

### MONEY-BACK PURSE.

First day, 8,400 targets.....	\$84.00
Extra \$1 .....	41.60
Second day, 8,610 targets.....	86.10
Extra \$1 .....	42.90
Third day, 9,615 targets.....	96.15
Extra, \$1 .....	43.70
Added by Interstate Association.....	300.00
	\$694.45
Losses .....	107.40
Surplus .....	\$587.05

The losses were based on an entrance of \$21 for the three days, and the losers were reimbursed in sums ranging from 55 cents to \$14.65.

PROVE THE SUPERIORITY OF

# SMOKELESS POWDERS

The St. Louis Trapshooters' Association and Iowa State Tournament Add to the List of Spectacular Achievements with Du Pont Smokeless Powders

CONFIDENCE in the quality of his powder and its uniform behavior make possible the Long Runs and Averages. The following are offered as illustrations of what accuracy and Du Pont Powders accomplish.

### LONG RUNS MADE AT ST. LOUIS TRAPSHOOTERS' TOURNAMENT MAY 24-25, 1913.

Name.	Score.	Powder.
Chas. G. Spencer, St. Louis, Mo.	273	SCHULTZE
W. Henderson, Lexington, Ky.	160	SCHULTZE
W. H. Heer, Guthrie, Okla.	147-136	DU PONT
Homer Clark, Alton, Ill.	143-116	DU PONT
Fred Gilbert, Spirit Lake, Ia.	112	DU PONT

### HIGH AVERAGES.

Name.	Score.	Powder.	Average.
Homer Clark, Alton, Ill.	396 x 400	DU PONT	99.00%
Chas. G. Spencer, St. Louis, Mo.	395 x 400	SCHULTZE	98.75%
W. H. Heer, Guthrie, Okla.	394 x 400	DU PONT	98.50%
W. Henderson, Lexington, Ky.	391 x 400	DU PONT	97.75%
J. W. Bell, St. Louis, Mo.	385 x 400	SCHULTZE	96.25%
W. H. Clay, St. Louis, Mo.	378 x 400	DU PONT	94.50%
Dr. W. S. Spencer, St. Louis, Mo.	378 x 400	SCHULTZE	94.50%

### DU PONT POWDER WINS IOWA CHAMPIONSHIP

At Fort Dodge (Ia.) Gun Club on May 29, W. S. Hoon, of Jewell, Ia., broke 99 x 100 targets, shooting DU PONT, and captured the State Championship.

### LONG RUNS MADE WITH DU PONT POWDERS

W. S. Hoon, 195, 134, 113, shooting DU PONT; Chas. G. Spencer, 133, shooting SCHULTZE; Chas. Hummel, 129, shooting DU PONT; J. W. Dickey, 113, shooting DU PONT; J. A. Schmitz, 111, shooting BALLISTITE.

### HIGH AVERAGES MADE AT THE TOURNAMENT

W. S. Hoon, Jewell, Ia., 443 x 450 DU PONT; J. E. Dickey, Minneapolis, Minn., 430 x 450 DU PONT; Chas. G. Spencer, St. Louis, Mo., 441 x 450 SCHULTZE; Chas. Hummel, La Porte, Ia., 420 x 450 DU PONT; Ross Appleman, Keister, Minn., 434 x 450 BALLISTITE; Fred Gilbert, Spirit Lake, Ia., 426 x 450 DU PONT.

## SHOOT DU PONT POWDERS. Ask for Du Pont, Ballistite, Schultze or Empire Loads When Buying Shells.

### Capron G. C.

CAPRON, Ill., June 3.—Almost a half century in the squads here to-day, and high gun was won on 135, and that by F. A. Graper. High professional was J. R. Graham, 145. The scores:

### Norfolk-Portsmouth G. C.

THE usual weekly shoot of the Norfolk-Portsmouth Gun Club was held on Thursday, June 5 with fifteen shooters on the line. Conditions were fine and some excellent scores were made. Dr. Boyd and Mr. Gunther each broke 90 out of 100 targets. Edmonds was high in the club shoot with 48 smashes. The scores follow, 50 targets per man:

Edmonds	48	Dr Corbell	33
Dr Byrd	46	Laird	32
Gunther	43	Capt. Easton	30
Boyd	40	Gordon	30
Ballance	36	Talbot	25
Richardson	36	Cook	25
Davis	34	White	(25) 16
Borrowdale	33		

PARKER GUNS BUILT TO ORDER

THE manufacturers of the "OLD RELIABLE" PARKER GUN wish to announce that the present is a particularly opportune time to place orders for guns built to individual requirements, a feature of the gunmaking business to which they have paid particular attention.

Parker Bros. are prepared to supply guns in all gauges from 8 to 28 bore, stocked to suit any purchaser's requirements, and bored to give any distribution of the shot required from cylinder to full choke.

PARKER GUNS REMAIN UNEXCELLED IN THEIR POWER OF HOLDING TOGETHER THE SHOT CHARGES UNDER HIGH VELOCITY AT EXTREME RANGES.

PARKER BROS. Meriden, Conn.

N. Y. Salesrooms: 32 Warren St. A. W. duBray, Res. Agt., Box 102, San Francisco, Cal.

Iowa State Shoot.

FORT DODGE, Ia., May 29.—The Iowa State Sportsmen's Association's thirty-sixth annual tournament came to a close to-day after three days of glorious weather, grand sport, and the greatest shooting ever participated in by any members of the scatter gun fraternity.

Last evening at the annual meeting of the Iowa Sportsmen's Association, held at the Waukousa Hotel, all matters of interest pertaining to the Association were thoroughly gone over, and the following officers elected: E. C. Hinshaw, State game warden, of Spirit Lake, Ia., President; J. Foster, of Mason City, Ia., Vice-President; Jos. Kautzky, Sr., of this city, Secretary and Treasurer. All were unanimously re-elected.

Mr. Hazelwood, Mr. Waldburger and John Peterson were elected as a Board of Directors.

The next State shoot will be held at Mason City. A new committee was appointed, not formally holding office, called an honorary committee, whose duty shall consist of the handling of the next State shoot.

Resolutions were prepared and read in behalf of the protection of the State lakes, that are in danger of being drained.

After the ten regular scheduled events on the first day's program had been finished, two extra events were shot off. The first was for the Smith cup, at 25 singles. This cup was held last year by John Hooker, now of Minneapolis, Minn. There were thirty entries, and the cup was won by Billy Hoon, of Jewell, Ia., on a shoot-off with Jos. Kautzky, of this city, each breaking 25 straight. On the shoot-off Hoon broke 25 and Kautzky 23. The second event was the Kahkonsa cup event, at 15 pairs; thirty shooters entered. This cup was held last year by A. L. Yearous, of Eagle Grove, Ia., and was won this year by Wm. Wettleaf, of Nichols, Ia., with a straight score.

The extra event on the program for the second day was the shoot-off for the Ottumwa diamond badge, held last year by Wettleaf, and was won this year by a dark horse and late entry, J. A. Schmitz, of Storm Lake, Ia., who shot in grand shape, breaking 49 out of 50.

The Iowa State championship event consisting of 100 targets, entrance \$3, was also won by Billy Hoon, by a score of 99, beating out Kip Elbert, of Des Moines, and Chas. Hummel, of La Porte City, the runners up with 98 each, and Williams, of Lake City, and Short, of Cedar Falls, with 96.

Guy Ford, of Cedar Falls, Ia., again very ably helped the squads and kept them moving lively, and we heartily recommend his services to gun clubs wishing the day's program rushed through on time.

Iowa's pride, Frank Gotch, proved that he is not only the best wrestler in the world, but a mighty good shot, and the best of fellows and entertainer; of course somewhat bothersome to Capt. Whitney, worrying him with "heads up."

Mrs. Washold, of Fargo, N. D., shot a string of 150 and finished with a good score.

Hazelwood, alias Hazzel, or the other names that were heaped on the shoulders of the venerable shooter, never skipped or missed a chance to entertain the visiting shooters with some of his original school day stories, and later in the evening his room at the hotel was occupied by his legion of friends to pay homage to his ability.

Runs of 100 straight were made by the amateurs Hoon, Hummel, Appelman and Harker, and by several of the professionals.

Joe Konoughluka, of Mason City, acted the roll of Doctor, and his prescriptions before an event were sometimes greatly needed.

Kip Elbert's greatest worry was on account of the muddy roads. He had to leave his buzz wagon at Des Moines, and therefore could not show his friends, Whitney and Layman, the rural sights between here and the capital city.

Just think of \$751.80 average money, forty-seven shooters participating in the distribution of this. We guess that's going some. Over half of the shooters received average money.

Table with 4 columns: Name, 1st Day, 2d Day, 3d Day. Lists names like Wm Ridley, N Layman, W S Hoon, etc., with their scores.

Table with 3 columns: Name, Score 1, Score 2. Lists names like F C Sullivan, F R Welch, H Dorton, etc., with scores.

Chicago G. C.

CHICAGO, Ill., May 30.—Silver took first, breaking 90 out of 150; W. A. Davis taking second with 88, while J. H. May came in for third with 85. Cook finished with 84, while Crocker broke 80.

Table with 5 columns: Events, Targets, Name, Score 1, Score 2. Lists names like E Silver, W A Davis, J H May, etc., with scores.

May 31.—Silver repeated his win of yesterday, breaking 95, which, with his handicap, gave him a perfect score. Schutz broke 90, and Egan came along with 73, which gave them each a total of 100. De Wolf took second with 98, while Lynn took third with 97. Fetherston was high in the handicap event with 54 out of 60, Northcott and Wood each scoring 50.

Table with 5 columns: Targets, Name, Score 1, Score 2, Score 3. Lists names like E Silver, J M Schutz, J W Eagan, etc., with scores.

Event No. 2 was distance handicap, 19yds.

June 1.—Again Silver won first with 98; Stemmer second with 97; Thomas, Seelig and Keller third with 96 each. Silver also took first in distance handicap, breaking 46 out of 50 from 18yds., Geo. Eck winning second with 44.

Following are the winners of series of shoots for May, 300 targets each: First, E. Silver, 299; second, L. M. Fetherston, 296; third, J. M. Schutz, 294; fourth, C. K. Seelig, A. Moore, E. L. Harpham, 289 each.

Table with 5 columns: Targets, Name, Score 1, Score 2, Score 3. Lists names like E Silver, D E Thomas, C R Seelig, etc., with scores.

Events Nos. 7 and 8 were distance handicaps. W. F. MERKLE, Supt.

Spring City G. C.

WAUKESHA, Wis., June 1.—Result of to-day's shoot: The beach opened for the season to-day, so there will be something doing all the time from now on. Frizz celebrated with his new Smith by winning a leg on the Toll trophy.

Table with 4 columns: Name, Shot at, Broke, Shot at, Broke. Lists names like Mucklestone, Knight, Frizz, etc., with scores.

New Jersey State Sportsmen's Association.

RED BANK, N. J., June 5.—The tenth annual trap-shooting tournament of the New Jersey State Sportsmen's Association, at the Riverside Gun Club grounds on Shrewsbury avenue, ended here to-day. Three-man team race was won by Riverside Club with 139 out of 150. The Jersey City team finished second with 137, and the Smith Gun Club, of Newark, third with 136. State championship was won by E. B. Springer, of Cape May Courthouse. Scores:

Table with 3 columns: Name, 1st Day Reg. Mdse., 2d Day Reg. Mdse., 3d Day Reg. Mdse. Lists names like H H Stevens, H S Welles, W A Joslyn, etc.

New Jersey State Championship, 50 targets:

Table with 2 columns: Name, Score. Lists names like H H Stevens, H S Welles, W A Joslyn, etc.

Royersford G. C.

ROYERSFORD, Pa., June 7.—Charles H. Newcomb, of Philadelphia, broke 142 out of 150 targets, taking first money. Neaf Apgar was top pro, breaking 144. Engler, second; Adams, third. Scores:

Table with 2 columns: Name, Score. Lists names like J Bitterling, J Engler, F M Taylor, etc.

Afro-American Trapshooters' League.

PLEASANT HILL, Mo., June 6.—Editor Forest and Stream: Will you grant the colored shooting world permission to digress through the columns of your valuable paper, in order to reach and appeal to the directors of the Interstate Association, scheduled to meet at Dayton, O., during Grand American Handicap, June 17-20, as to why they should make a liberal donation to tenth Grand Afro-American Handicap, registered to be held at Muskogee, Okla., Aug. 7 and 8, though we were just a little too late in registering to secure any of the \$20,000 set aside by Interstate Association for 1913 registered tournament, but the Secretary, Mr. E. Reed Shaner, informed us to write him again before the middle of June, calling his attention to our request, and our appeal would be given consideration at this scheduled meeting of Directors, at Dayton, O., during Grand American Handicap. So we are praying that the Interstate Association may give us, a debarred race, the right consideration as to the necessity of making a good donation to this annual gathering of the colored tribe, for it is the only one of the year that our shooters from far and near can look forward to attend, for you know it to be a positive fact that we cannot attend any of your big shoots, from Grand American Handicap down, or any State, or even one- or two-day registered shoot in any part of the country, for if you will carefully note many of the programs you will find something to inform you that this is a shoot for "white shooters only," and this is generally from the fact that in that immediate territory colored shooters at different times in little minor all-day shoots participated with the whites, but when a shoot

amounts to anything, they will then draw the color line. Is there anything alarming as to why the colored shooting brother is not heard from oftener in the big shoots? Then is it not a positive fact that the Interstate Association, whose object is the "encouragement of trap-shooting," should they not also help to encourage it among a debarred race, comprising about 10 per cent. of the citizens of this country, since they have to use the products of your concerns? And the Anglo-Saxon being in control of everything, maintains, as is the custom, separate schools, churches, etc., so why not encourage the colored shooting fraternity, for we need encouragement from the fact that our programs should be very attractive, as we are scattered so far apart, and if we do meet it has to be at this one annual gathering, which should be made inviting enough to draw the best ones from afar, as well as nearby. And now since the tenth Grand Afro-American Handicap is to be held where our people are much in evidence, and under the auspices of a club composed of our leading men, bankers, doctors, merchants, lawyers, etc., will you not make us, at this late hour, a liberal donation? T. H. COHRON, Sec'y Afro-Am. T. S. League.

Maquoketa G. C.

MAQUOKETA, Ia., June 3.—E. C. Sinshaw cracked 191 out of 200 for top amateur. Price was top pro with 185.

Table with 2 columns: Name, Score. Lists names like F K Eastman, C A Sweet, R W Gordon, etc.

Milbank G. C.

MILBANK, S. D., June 6.—W. D. Higgins, of the Remington-U. M. C. Co., cashed our tournament in a very capable manner. Every contestant was paid the amount due him twenty minutes after the shoot. Our club appreciates very much the courtesy of the Remington-U. M. C. Co. in sending a man to help with this work. Targets were thrown directly against the wind, which made the shooting very difficult. Scores:

Table with 2 columns: Name, Score. Lists names like W A Brown, M Schindler, J E Harker, etc.

Fulda G. C.

FULDA, Minn., June 3.—We had a very nice crowd at our second annual registered tournament, and every one seemed to enjoy themselves. The day was ideal, with the exception of a head wind, which made the targets duck some. On account of the severe rainy weather, which has made the roads very rough, we did not have as large a crowd as we would have had could parties have been able to get here with their autos.

F. C. Rinkle, representing the Winchester Co., was very kind to cashier the shoot for us, and R. D. Guptill, representing the U. M. C. Co., also Fitzpatrick, of the Peters Cartridge Co., were very busy in helping where they could, and we wish to thank these boys very kindly for their assistance. Scores:

Table with 2 columns: Name, Score. Lists names like J C Buzzell, F L Long, E H Beadle, etc.

Over the Traps At the Southern Handicap May 15, 1913

Mr. R. H. Bruns broke the 100 straight on the 16-yard targets, being the only one of all the contestants to do so. He was shooting a

### Waynesboro G. C.

WAYNESBORO, Va., May 30.—A splendid program was gotten up, there being \$155 in cash prizes, and \$238 in merchandise prizes. The shoot was a very successful one from every standpoint, there being about forty shooters all told, among them eight professionals from various parts of the country. Ed. Danniel, of Lynchburg, Va., broke 197 out of 200, making the highest average among the professionals. High amateur for the day was S. T. Day, of the local club, breaking 192 out of 200, while P. B. Woodfin copped low average, breaking 149.

In the special event of 25 targets, W. D. Runneke, of Staunton, Va., won first prize, with Jas. Craig, of the locals, running second, breaking 23 and 21 respectively.

### Evanston G. C.

EVANSTON, Ill., June 2.—The Decoration Day shoot at the Evanston Gun Club was a great success. In the first event Darby carried off the honors with a score of 24, and Millen was second with 23. In the second, A. Neals, with a handicap of 5, had a perfect score; Darby second with 24. Doyle, Peck, Adams and Millen tied with 23 for third, Adams winning in the shoot-off. In the third event Doyle, with a handicap of 3, and Bisson with a handicap of 10, were tied for first, Bisson winning in the shoot-off. Peck, Adams, Cowan and Bristle tied for third, Adams winning in the shoot-off. Robbins and Carman were tied for first honors in the fourth event, Robbins winning in the shoot-off. Phalen, Bristle and Gamble tied for third; the shoot-off was won by Gamble. Scowley and Doyle tied for first in the fifth, Scowley taking the shoot-off. Pace and Adams were tied for third, which was won by Pace.

In the sixth Cowan and Bisson tied for first, which was won by Cowan. Bisson took second prize. For third, Phalen and Robbins were tied, Phalen winning. In the seventh event Phalen was first and Doyle second.

In each event the winners of first, second and third

received prizes. Adams was high for the day, breaking 206 out of 225. The scores for the day follow:

### Detroit Pastime G. C.

DETROIT, Mich.—The shooting in general at the last regular shoot was very poor, but in some of the events some good work was done. In the 25-target club event Ballard broke 24 in Class A, Conely 23 in Class B, and Robertson 24 in Class C. In the club trophy at 15 targets, Winslow, Benson, Owens, Fingle and Tyler all went straight. About half of the boys finished the entire program of 100 targets, they came stringing in all afternoon, and entered as they arrived. It is urged they all compete in the entire program, but no more, as too much shooting interferes with the attendance.

### Triangle G. C.

SOUTH MADISON, Wis., June 5.—Owing to the rain the shoot did not start until after 10 o'clock, and was run off in fine shape by 3:30 P. M., fifty-seven shooters taking part and shooting in a soaking rain. Just after the close of the shooting the sun came out and the sky cleared. Everyone went away satisfied, and with nothing but good words for the management and the shoot. Two Western autotraps were used. Scores:

Cleveland G. C.

CLEVELAND, O., June 8.—The following are the scores made to-day at the grounds of the Cleveland Gun Club: Event No. 1, semi-annual trophy, 50 targets, handicap 16yds.: Guy Jackson 48, Judd 48, Hogan 44, Stepp 43, Freeman 42, Stone 42, Stevens 41, Noble 38, Weeden 38, Thorp 37, Brown 37, Allen 41, Harris 36, Rockwell 35, Murray 34, Bell 32. Event No. 2, annual trophy, 50 targets, handicap, 16yds.: Guy Jackson 48, Weeden 45, Freeman 44, Wind- ing 44, Stepp 43, Hogan 43, Ward 42, Judd 42, Allen 41, Stone 39, Noble 39, Brown 37, Stevens 36, Thorp 35, Rockwell 33, Harris 33. Event No. 3, quarterly added target handicap, 25 targets: Stevens (8) 25, Hogan (6) 23, Judd (3) 23, Allen 23, Weeden (3) 25, Stepp 22, Freeman (3) 21, Noble 21, Stone 20, Thorp (4) 20. Event No. 4, added target handicap, 25 targets: Stepp (2) 25, Allen 23, Stone 23, Noble 23, Weeden 21, Wallace 21, Wieding (2) 25, Murray (2) 20, Jackson 20. The Cleveland Gun Club will hold a shoot on the Fourth of July. F. H. WALLACE, Mgr.

White Plains G. C.

WHITE PLAINS, N. Y., June 7.—A regular shoot was held at the White Plains Gun Club grounds to-day. A high wind prevailed throughout the afternoon, making the targets very difficult to secure a good score. Mrs. F. F. Rodgers, shooting a 20-gauge, made an excellent score of 29 out of 50. Below are the scores made on this date: T. H. Lawrence 87, H. O. Allyn 85, Z. C. Offutt 83, Dr. Martin 82, E. F. Ward 82, A. L. Burns 80, F. F. Rodgers 74, T. L. De Nyse 73, R. E. Pardee 50, J. Y. Shoaff 49, Mrs. Rodgers 43, J. R. Shoaff 32, Miss Brown 21, A. D. Scovel 12.

Portland Gun Club.

PORTLAND, Me., June 7.—Weather conditions were fine to-day, and the shooters at the regular Saturday event of the Portland Gun Club made some good scores. Cliff Randall was high man with 97. The scores: C. Randall 97, Hinds 94, Weymouth 92, Osborne (professional) 92, E. Randall 90, G. Darton 90, Gray 81, Dr. Gilman 79, Dr. Hayden 78, Thurston 55. DOWN EASTER.

Kennel.

WANTED—A well-bred English Bulldog, good watchdog, congenial companion, house broken, registered. Write full particulars with price to LOUIS C. NEWHALL, Yarmouthport, Mass.

The Trail of the Bull Dog

An account of the wonderful 50,000 mile auto trip of Charles G. Percival, M.D., written by himself.

IF YOU LOVE OUT-DOOR LIFE you will revel in this book. It incarnates the spirit of the woods and silent plains, the mountains, lakes and rivers.

From the White House at Washington, where Dr. Percival delivered a message to President Taft, to the wilds of Alaska and the Yukon is a big step, but Dr. Percival made it, and was the first man who did by auto, traversing 44 states on the way, climbing 11,000 feet by auto, crossing deserts where he almost lost his life, and calling on Diaz, Madero, the Lord Governor-General of Canada, the Governor of Alaska, thirty-nine state officials and four hundred mayors.

INVALUABLE FOR TOURISTS AND CAMPERS

The authoritative information on food and equipment for out-door life given in this book is alone worth many times the price of the volume. And it will disclose to you places near at hand and far afield that you will wish to visit for fishing, hunting or sight seeing. Illustrated by over 200 splendid views. Reads like a tale of adventure where pleasures and hardships are agreeably mixed, yet is the true story of the most remarkable trip ever made by automobile.

YOURS with one year's subscription to HEALTH MAGAZINE for only \$1.10. HEALTH is the oldest magazine in America devoted to physical culture and out-door life, an illustrated monthly. Regular subscription price \$1 yearly. HEALTH MAGAZINE CO., Dept. 25, HOLYOKE, MASS.

Anacoda G. C.

ANACONDA, Mont., June 1.—James Drumgoole, of Anacoda, was high man in the monthly shoot of the Anacoda Gun Club to-day with 98 out of 100. He now leads in the shooting for the two Panama-Pacific Exposition prizes with a score of 523. Goddard, of Butte, is second with 525, and Gemmett, of Anacoda, third, with 517.

This was the sixth of twenty shoots for the two prizes. The contests are to extend over two years, with a shoot each month for ten months in the year. One prize, offered by the Anacoda Gun Club, is a round-trip fare to the exposition in San Francisco, and the other is \$100, offered by E. P. Mathewson.

Two medals were the prizes for to-day. The Klepetko medal, shooting 20 pairs, for which Drumgoole and O'Neill tied on 29 each. In the shoot-off O'Neill won. Drumgoole won the Brownlee challenge medal with 49 out of 50.

The first event in the following score is for the Klepetko medal and the fourth for the Brownlee medal. The scores:

Table with columns: Events, 1, 2, 3, 4, 5, 6, 7, 8, 9. Rows include Drumgoole, Williams, Larabee, Smith, Burgess, \*Flanagan, Kaiser, Munn, Gemmett, Mathewson, Nell, O'Neill, McMillen, Hasley, Willoughby, Rowe, Allen, Weatherwax, Rutledge, Bryan, McDermott, Bielenberg, Heinen, Emerson, Goddard, Poore, Roach, Mahan, Benton, Tippet. \*Professional.

Analostan G. C.

WASHINGTON, D. C., June 7.—Twenty-one enthusiasts were on the shooting pegs to-day at the regular shoot of the Analostan Gun Club. We enjoyed a visit from two professionals—both popular—Emory H. Storr and Jas. A. Anderson. Following are the scores:

Table with columns: Shot at Broke, Brown, Shot at Broke. Rows include Stubener, Green, Mayor, Anderson, Ford, Kirk, Duvall, Stine, Graves, Storr, Culver, DuPont trophy, handicap, 25 targets: Reed, Green, Kirk, Stine, Barnes, Duvall, Graves, Culver, Peck, Stubener.

Table with columns: Shot at Broke, Brown, Shot at Broke. Rows include Reed, Green, Kirk, Stine, Barnes, Duvall, Graves, Culver, Peck, Stubener.

In the spoon shoot, Mayor won first on 48, Stine second on 41, Graves third after shooting out Brown, on 38, and Dr. Davis won fourth on 28. This shoot was at 50 targets.

MILES TAYLOR.

Newport News-Fort Monroe G. C.

The following scores were made on May 30, at Newport News, Va., in a fine-man team shoot between the Newport News and Fort Monroe gun clubs. Each man shot at 50 targets:

Table with columns: Newport News G. C., Ft. Monroe G. C. Rows include Sinton, McGee, Shumate, Hartwell, Marston, Sunderland, Buck, Strong, Martin, Carson.

Bon Air G. C.

PITTSBURGH, Pa., June 7.—Only eight out, but keep up courage, the missionary work is telling. Garland was top breaker to-day. Scores:

Table with columns: Names, Scores. Rows include Garland, Whalen, Sperling, Wolfe, Miller, Gray, Bradshaw, Freedman.

## Novels for Summer Reading

DESERT  
GOLD

By  
Zane Grey

"As our English cousins would say, this stirring romance of the Arizona desert is simply 'ripping'—even better than 'Riders of the Purple Sage'—Philadelphia Dispatch. "As a story this is one of the best of the season."—San Francisco Chronicle.

Illustrated. Cloth, \$1.30 net.

## ISOBEL

By  
James Oliver Curwood

Scene—the Arctic barrens near Hudson's Bay.

Hero—a Sergeant of the famous Royal Mounted Police.

"It is both a man's book and a woman's book. The friendship of man for man, and the love of man for woman are strikingly depicted."—Grand Rapids Evening Press.

Frontispiece. \$1.25 net.

**Never Sick! Readers of the Health Culture Magazine**

Teaching the art of building and preserving health without the use of drugs. Edited by Elmer Lee, M.D., one of the brightest and most advanced writers on the Art of Living, whose teachings on the causes of diseases and drugless methods of treatment are attracting wide-spread attention. The Relation to Health of Food, Air, Exercise, etc., is considered. Its aim is to make its readers better Physically, Mentally and Morally, to save the lives of children, adding to the length of life, and the cure of disease by the use of drugless methods. Opposed to the use of drugs, vaccination and serums, and needless surgical operations. There is no other just like it. \$1.00 a year; 15c. a number; 6 months "On Trial" only 25c. Money back if desired.

The Health Culture Co., 1133R Broadway, New York

**WOODCRAFT**

By "NESSMUK"

Cloth, 160 pages. Illustrated. Price, \$1.00.

A book written for the instruction and guidance of those who go for pleasure to the woods. Its author, having had a great deal of experience in camp life, has succeeded admirably in putting the wisdom so acquired into plain and intelligible English.

**In Memoriam.**

THE members of the South End Gun Club, of Reading, Pa., at a special meeting framed the following resolutions:

Whereas, Our friend and faithful Secretary,

PETER TEXTER,

who was one of the charter members and secretary of the club since its organization, has passed into everlasting life, May 13, 1913. Therefore be it

Resolved, That by his death the club has lost a member whose interest in its welfare was always of the best. His genial and kindly nature will ever be cherished in the hearts of his fellow-members, and his loss deeply mourned. Further be it

Resolved, That these resolutions be engrossed and sent to the family, and that the club attend his funeral.

FRANK GERHART,  
CHARLES MILLS,  
CHAS. G. WILLSON,  
Committee.

W. W. ESSICK,  
Secretary pro tem.

**DRIVERS AND TWISTERS.**

Keep your eye peeled for the Indian shoot at Cedar Point, Ia., July 3, 9, 10.

Our trap department closed on Monday, this week, because our trap editor left Monday night for the Grand American Handicap. Scores sent us and not published to-day will appear next issue.

Programs are ready for the eighth Eastern Handicap at Du Pont Gun Club, Wilmington, Del., July 15, 16, 17. Special attractions are offered the family man through special railroad rates to Atlantic City and other popular watering places. You'll have lots of time to go out to Cedar Point and take the "sagwaw" and get back for a draught of Brandywine.

The seventh annual tournament of the Chicopee Falls Rod and Gun Club will be held at Chicopee Falls, Mass., June 28. Shooting will start at 9:30 o'clock, rain or shine. Program calls for 150 birds; \$23 added money; \$10 for high amateur; \$50 worth of merchandise prizes. Targets, 2 cents each, included in entrance. Percentage system, 40, 30, 20 and 10 per cent. Sweeps are optional. Ship shells to F. E. H. Sheldon, Chicopee Falls, Mass., prepaid. Grounds open for practice 2 P. M. Friday, June 27. Event 4 will be a merchandise event, entrance \$1. This event will also be a sweep. Free feed.

The Youghiogheny Country Club, of McKeesport, Pa., will hold a series of open three-class system, 50-bird shoots on the following dates: June 28, July 4 and 26; Aug. 8 and 30; Sept. 20; Oct. 11. There will be three prizes given at the end of the season; one for each class. All those who qualify in each class shall shoot off at the end of the season at 100 targets for the prize. In case of a tie on this 100-target shoot, it shall be shot off in each class, miss and out. The only entrance fee charged will be the regular one cent each for birds shot at. All shoots will begin on the arrival of the 2 o'clock Buena Vista car from foot of Locust street, McKeesport, except the last one, on Oct. 11, which will begin on the arrival of the 1 o'clock car. This is to give ample time for the prize shoot-off.

W. G. BEECROFT.

**Hercules G. C.**

TEMPLE, Pa., June 14.—The tournament of the Hercules Gun Club proved a success; the attendance was low, but the scores are recorded in its history as record-breakers. Ed. H. Adams, of Reading, broke 99 out of his 100. He lost his 90th target, making a straight run of 89. Out of 600 targets he broke 579, which is 94.79 per cent. shooting. At Shillington he broke 96 out of 100; at South End grounds, 96; at Newmantown 95; at Carsonia Park, 99; at Roversford, 94, and at Temple, Hercules' grounds, 99 out of 100.

J. J. Marberger, the present Berks county championship trophy holder, was close to Adams with 93, and W. S. Behm with 91, using a strange gun at that.

Billy Werth, of Lebanon, paid his respects to the boys and scored 65 out of his 75.

Frank Miller shot straight in the second event—85 is a good clip.

Lloyd Miller, who was away from the trap for over a year, has returned and scored 74 out of his 90.

**Spend This Summer Sightseeing in Glacier National Park**

**THE new National Playground—Glacier National Park—invites you to spend your vacation among its mountains, its glaciers, cataracts and trout streams. The scenic grandeur of this 1,500 square mile amphitheatre, located in Northwestern Montana, provides a memorable vacation trip.**

**Vacations—\$1 to \$5 Per Day**

A magnificent new hotel, operated in connection with the chain of Swiss Chalets throughout the Park, assures ideal accommodations. Tours through the Park by auto, stage, horseback, launch, or afoot may be made at \$1 to \$5 a day. Low round trip summer tourist fares via the Great Northern Railway to Spokane, Portland, Tacoma, Seattle and many other Pacific Coast points permit stop overs at Glacier National Park. Special convention fares on certain dates.

**This Literature Sent Free**

A set of interesting booklets illustrating and describing the wonders of Glacier National Park, together with an aeroplane map-folder containing full information as to the cost of the trip, will be sent free to you upon request. Write for this literature before you make your vacation decision.

**BAIT CASTING OUTFIT, Complete, \$3.90**

Genuine DOWAGIAC SPLIT BAMBOO ROD, nickel plated quadruple wide spool reel, imitation jeweled bearings, 50 yards finest silk line, 2 enamelled wood minnows, assorted colors. An exceptionally fine outfit. Send for bargain list of fishing tackle.

**GOULD & GOULD, BOX 5143, BOSTON, MASS.**

There was sensational shooting throughout the whole program.

Eck lost but 4 out of his 75, making two straights of 15, and thus showing some skill.

Young, a senior member in the game, smashed 47 out of 50, which is very commendable.

Schmoyer shot well with 33 out of 40. Eisenhour arrived late, shot two events, a total of 25, and lost but one target.

Secretary Ludwig was too busy, so he spoiled the scores, breaking but 20 out of his 50. The other eleven amateurs shot 785 and broke 710, which is a 90 per cent. gait on the whole program. This is certainly going some on Melchior's goat.

The Hercules Gun Club will hold their annual registered tournament on Saturday, Aug. 23, and the South End Gun, of Reading, on their new grounds at Carsonia Park on Saturday, Aug. 2.

Ideal Leggett traps and bluerocks will be used at each of these tournaments.

A team race of ten men, between Harrisburg, Allentown, Philadelphia and Reading teams will be shot on Aug. 2. Secretary H. I. Melchior is making arrangements for the meet. Scores:

Shot at. Broke		Shot at. Broke	
Adams	100 99	Rahn	30 23
Behm	100 91	Ludwig	50 20
Werth	75 65	Eck	75 71
Marberger	100 98	Young	50 47
F Miller	100 85	Schmoyer	40 33
L Miller	90 74	Eisenhour	25 24

LUDDY.

**Jersey City Gun Club.**

JERSEY CITY, N. J., June 14.—Dave Engle came out with another new gun to-day and got away to a flying start and remained in front until the finish; and when it was all over he had an average of 97 per cent., but even at that he had to go some, as Harry was right after him and finished only one point behind him. Shannon was over for the first time to-day in about three months and picked up some easy money in side bets on the different events, as the boys had forgotten how good he could shoot at times. The scores follow in strings of 25:

Engle	21	19	24	21	24	..	..	..
Boothroyd	15	10	14	17	..	..	..	..
Kearney	21	15	20	21	20	19	..	..
Alpers	13	4	7	12	..	..	..	..
Harvey	20	24	23	22	19	..	..	..
Dixon	20	18	19	18	15	..	..	..
Huggins	12	16	14	15	17	..	..	..
Jones	16	16	18	12	..	..	..	..
Brown	13	9	13	6	..	..	..	..
Shannon	20	22	16	19	18	20	22	20
Slater	8	12	15	12	..	..	..	..
McLemore	17	21	22	18	20	16	..	..
Finnegan	7	8	10	6	..	..	..	..

Don't forget the next two Saturdays will be the last shoots until some time in October, when notices will be mailed the members announcing the opening date.

(Trapshooting Notes continued on page 791.)

## The Toling Dog—Or Little River Duck Dog A Remarkable Dog, Little Known Outside Newfoundland

By H. A. P. S.

WITH nose as true as the pointer's, with sight as keen as the greyhound's, with endurance as great as the foxhound's, with courage equalling the bulldog's, with disposition as playful as the spaniel's, with coat as dense as the otter's, and with love for his master more fervent than that of any other living thing, and his color is fox-red, from the end of his nose to the tip of his busy bushy tail, save a white dash on his broad chest, and in some specimens, a white blaze in the face; his weight about fifty pounds (bitches forty), his height at the shoulder twenty inches, wide-skulled, with moderately large pendant ears. The above is a fair description of the Toling dog, whose equal as a duck dog the writer has yet to meet. He has all the traits of his progenitor, the Labrador retriever, with the added ability to attract or tole his game. The photograph of the Labrador dog in FOREST AND STREAM of April 26 could easily be mistaken for a Toling dog, but for his color. So alike in head are they that at first glance I thought Mr. Henwood had preceded me in writing of my favorite, the "Toler."

It no doubt will be news to many of the readers of FOREST AND STREAM to know that the "playing" of the Toling dog near the water will attract the wild duck. In Nova Scotia our best game ducks are the blue-wing duck (or black-duck) and the blue-bill (or broad-bill), and both these birds will tole to the antics of the Toling dog. The butterball and merganser ducks will also tole, but the whistler will jump into the air at the sight of him as if a gun was discharged in their midst. Sea ducks and fish ducks, such as the coot, etc., seem to take no notice of the dog, and he has no attraction for them.

The idea of this toling ducks came from the fact that the fox has been known for many years to possess the power to attract the wildfowl by reason of his color and his movements along the shore, and many a fat blackduck has paid the penalty of his curiosity and furnished a meal for foxy old Reynard on the shores of our inland lakes. It was my privilege and delight to see a fox at work on one occasion. We were hunting moose near the Boundary Rock in Nova Scotia, and as our canoe turned a bend in the Coufang River, I saw directly ahead of us and in plain sight, four blackducks. Wondering why they did not fly at sight of us, I glanced ahead of them, and there on the top of a flat rock which projected into the water lay a fox with his nose between his paws. Every second

or so he would raise his brush and give it a flip from side to side. The ducks were swimming directly toward him intently watching that white-tipped tail, and not more than fifteen yards away from his waiting hungry jaws. Just then my hunting companion coming down the river in the canoe behind us, and catching sight of the fox, shot at him. The bullet from his Winchester hit the rock beneath him and spoiled what otherwise would have without a doubt ended in a little tragedy, and would have been a sight which very few have ever witnessed.

I have always felt perfectly certain that that fox would have carried away with him one of

in the water? How far will ducks come to the dog? Do the dogs know they attract the birds? Will they retrieve the birds you shoot? But if time is limited, you would likely get the answer: Oh, they are duck dogs, or just dog, I guess.

But we will suppose you are a duck shooter and are also sceptical, and came from Missouri and want to be shown, and it is finally agreed that we repair to where we know blackducks congregate. It is not yet daylight when we reach our "blind" on the edge of the sandy shore of the bay. This blind is one I have toled many a fine shot from, and is composed of three

"BUFF," A FINE SPECIMEN OF TOLER.

those four birds, a victim of curiosity. But what a transformation that bullet worked! Into the air went fox, ducks, and pieces of granite boulder, and as my hunting companion remarked as he lowered the rifle between his knees, "I guess that rock was red hot, the way that fox took to the air."

If you are a dog man, the first time you see a Toling dog, your attention will be at once arrested. Therefore let us suppose that you meet the writer with a pair of Toler's at heel, and after looking critically at them, you remark—as hundreds have done before—what kind of dogs are those, Chesapeake Bays, or what? If time is no object, the answer will probably be, they are Toling dogs, and when the explanation is forthcoming that they are used to tole ducks within range of the gun, your questions will come thick and fast, such as: Do they go

or four old lobster pots, which have been cast ashore in the surf, and a few old roots of trees—the whole covered with dead seaweed, and just large enough to conveniently hide us and the dog. Making ourselves as comfortable as possible, and pulling our coat collars up and our wool caps well down (for the month is December and terribly cold, the lakes are frozen and the ducks are now in their winter feeding grounds), you turn your head and see the yellow flicker of a lamp through the kitchen window in the farmhouse across the great salt marsh behind us, and where we enjoyed the warmth from the big wood stove an hour ago, as our breakfast of fresh eggs and biscuit, washed down with steaming tea, was eaten, and you half wish yourself back there again. It is "star calm," not a breath of air, and very frosty. Our dog is curled up tight, his nose covered by

his fox-like tail, and he is the only one of the three of us comfortably warm. But just listen to those blackducks as their trembling quack reaches us from out there in the bay! Buff hears them, too, and quick as lightning his ears prick as he raises his head. If you touch him now you will feel him trembling, but not with cold, only suppressed excitement. And now the east begins to pale, and presently objects are dimly discernible. Those old stake butts out there stuck up through the sand look like a flock of geese, while in the gray light, the bridge spanning the North Creek looms up like a church spire. We hear the linnow of wings as ducks fly from the salt creeks where they have spent the night, and as they join their companions in the bay in front of us they create quite a commotion among them.

Presently we see a black line on the glassy surface of the water, which slowly develops into a flock of twenty birds or more. The tide is almost up to our blind this morning, and everything seems to favor us. The ducks are now in plain sight—foxy old beggars. Some of them know the danger zone of this shore from years of constant persecution. About two hundred yards away they flap their wings and preen their feathers as the rising sun begins to warm them, and now I guess we will "show the dog." Reaching into the back pocket of my hunting coat, I pull out a hard rubber ball. Just look at "Buff," he has been waiting my every movement; see the pupils of his eyes dilate as he sees the ball! Did you ever see such concentration as he watches that sphere of rubber! Next to his master, it is the dearest thing to him on earth. One bounce of it upon the kitchen floor will lure him from the finest dish of roast beef scraps and gravy without a moment's hesitation.

I can divine your thoughts without much study now. You are thinking "what a shame to scare those ducks," and that perhaps they may come on shore later on as the tide begins to fall, and you can not help feeling certain that every duck will "jump" as soon as they see the dog. But wait, you watch the ducks, and whatever you do, don't shoot until I give the word, for it is the sure ruination of a Toling dog to shoot over him while he is outside the blind. If you do so, your dog will soon want the first shot himself, and when the birds come close, in all probability he will plunge in after them without waiting for the gun.

Smooth patches of sand stretch out upon each side of us and afford a perfect footing for the dog, and we can play him upon either side of the blind. I toss the ball, and away goes Buff; picking it up, he canters back and drops it in my hand. Out again goes ball and dog. I watch your face and it is a study, as through the "peekhole" in the seaweed you anxiously watch the birds, and this is what you see: With stretched necks and wondering eyes, every duck looks intently at the dog, and as the ball falls in among some dead seaweed, causing him to use his nose to find it, his busy tail works and wiggles above the beach grass, and a dozen birds turn and swim for shore, their necks a second ago stretched so long now disappear, as they fold them in, and with soft meamp-amp, meamp they swim rapidly toward us with just a gentle air of wind behind them. Buff plays beautifully, returning with the ball even faster

than he romps after it. How round the birds look with their necks drawn in, giving them a stupid appearance, and the sunlight shimmering from the yellow bills of the drakes. Now as the dog comes toward us again, the hot scent of blackduck smites his sensitive nostrils; and stopping with upraised paw, he looks toward them, but a chirp brings him back to us. Not for worlds would he refuse to "play." See him tremble as we push up the safeties of our guns. Here are the birds right against us, though not well bunched, being strung out across our front. They are only thirty-five yards or so away when Buff drops the ball into my open palm for the last time, and I whisper, "Down." Now then, there is one of two things to do, we may either raise up and shoot, picking out our birds and trying to stop one with each barrel, or remain quiet until the ducks begin to get uneasy, and not seeing the dog, start to swim away, when they will invariably bunch.

If you can forget the freezing nights and blustery days, when you have almost perished waiting for a shot, or perhaps the long crawls through slush or mud, when trying to stalk these wariest of all their kind, then let us each try and make a double and be satisfied. But if you have only occasionally had a flock shot and would like one now, we will hold our fire and so decide to do. See that old drake stretch his neck and swim up and down, looking with the keenest of all eyes, and turning slowly from us; the birds swim together, with their heads turned sideways, looking over their shoulders at the blind. I nod, and the two pairs of 12-bore barrels loaded with  $3\frac{1}{2}$  drams of Dead Shot smokeless and  $1\frac{1}{4}$  oz. No. 2, poke out above the fringe of scaweed of the blind. As we raise to shoot, Buff peeks over the blind beside me. With a whimper and stiffened sinews, he awaits the report. Both shots snap out as one, and into the air seven terrified birds spring straight up, three of their number falling to our second barrels. There are two cripples, one of which swims about in little circles, shot through the head in front of the eyes, and wading off as far as hip rubbers will allow, we each kill our bird.

Buff by this time has almost reached the nearest drifting victims. Watch him swim! There is only one breed of dog could catch him now, and that the Toling dog. No need to tell him to retrieve. Dropping his bird on the sand, he plunges in again and again until the eighth and last duck is safely recovered. Buff takes a roll in the sand and a shake, and trotting up to me, rubs against my leg, and while he looks up into my face, I stroke his wet hair—wet only on the outside, for no water ever penetrates to the skin through that otter coat—and if he and I were alone, I would take his honest head between my hands and whisper in his ear, "Good boy," while with a funny little growl in his throat he would say in his own way, "We did the trick." He always looks for this following a successful tole.

As a surf dog the Toler has no equal, and will persevere again and again until at last he stems the undertow. Last winter I feared I had lost Buff upon two occasions. Shooting from this very blind, I wing-broke a blackduck, and giving chase, the dog swam after his bird right out to sea beyond my anxious sight. The tide had turned, and I ran along the shore with

frantic haste trying to locate a boat, away past Read Head there, you see, two miles below us, until at last I gave it up and sorrowfully returned to fetch my gun, which I left behind in the blind. My dog's few little imperfections were all forgotten, and every cross word spoken to him regretted; but to my utter surprise and joy, upon reaching the blind, there lay the game little dog with the duck beside him. The distance he swam by conservative estimation through the ice-cold water, must have exceeded three miles, and he seemed none the worse for it.

Upon the other occasion while flight shooting by moonlight up the wide creek you see beyond the bridge there, a wing-tipped duck fell among the floating, grinding ice cakes, rushing together with the force of the heavy incoming tide. Away went Buff right into the worst of it, both dog and bird disappearing beneath the floe. It seemed ages until his head at last appeared in the moon blaze with the bird safely held between his jaws. And now let me tell you that ducks will not tole to windward. They will come to the dog across wind, or as you have just seen, from the windward, and also when there is no wind. Blackducks tole with their heads drawn down, bluebills with their heads up and necks stuck out, butterballs on their tails almost, and all the mergansers with heads erect and necks straight up. Perhaps the Toling dog is most deadly when shooting ducks before they leave the lakes in the fall, and when the birds are young. I have seen young blackducks swim so near the blind, that their pads could be distinctly seen beneath the water. Bluebills are said to be the easiest of all birds to tole, but although I have had many fine shots at them in this manner, my personal experience teaches me that the blackduck toles the best, and I have seen old wary birds in the month of January, act like perfect fools at sight of a well played dog. They seem to be hypnotized, and when once their gaze has become centered upon the dog, will scarcely notice moving objects.

It is as natural for a Toling dog to retrieve and play with a stick or other object thrown, as it is for a setter to point, or a coach dog to follow a team. Most duck shooters use a stick to tole their dogs with, and some a lot of sticks, but the properly trained dog needs but the one object to work upon. If space permitted, I should like to give my method of training these dogs, but I must forbear.

The history of the Toling dog from all I can gather, is as follows: In the late sixties, James Allen, of Yarmouth, Nova Scotia, secured from the captain of a corn-laden schooner, a female flat-coated English retriever; color, dark red; weight, about forty pounds. Mr. Allen had her lined with a Labrador dog, which was a fine retriever. The first litter of pups made very large dogs, even larger than their parents, and were splendid duck dogs. Several of these bitches were bred to a brown cocker spaniel, imported into this province from Massachusetts. These dogs had been bred throughout Yarmouth county, particularly at Little River and Comeau's Hill, and the majority of them are a reddish-brown color. Later on a cross of the Irish setter was introduced. Occasionally a black pup appears, and of course makes just as good a retriever and water dog as his red brothers, but is not so valuable, because he can-

not be used as a toler. Only this year distemper in its most virulent type destroyed a number of these dogs, including valuable bitches, together with their young litters. I am so fortunate as to own a dog and two bitches, and shall try to perpetuate the breed. This grand dog should be carefully bred and given a class at the dog shows, for he certainly is, on account of his toling ability, in a class all his own.

### Humor in the Daily News.

A TRAPSHOOTER, more or less prominent, of course not attending the G. A. H., pulled the bell rope on a Cincinnati trolley because he said he was "tired of being a perpendicular sardine." In court the railroad lawyer said insinuatingly: "Are you a drinking man, Mr. Blank?" "That's my business," said the ballistic exponent, with necessary dignity. "Right," said the lawyer. "Now tell the court, Mr. Blank, if you have any other business." Ballistics exploded.

SECRETARY OF COMMERCE REDFIELD approves the plan to reduce the high cost of living on the Pacific coast by introducing Eastern lobsters into Western waters. Good enough, sir. We might ask the commissioner if he ever had been in sin-sin-nati. Plenty of lobsters over the Rhine.

PHILADELPHIA, Pa., June 5.—Howard E. Busby, local agent for an Angelsea fish company, while cleaning a fish this morning, found a diamond ring valued at about \$250 securely caught in its gills. Sounds more like a spearing than a diamond ring.

NEW YORK, May 21.—John Wilson, a farmer living near Caldwell, N. J., was knocked down by a wild deer yesterday, and was rendered unconscious for several minutes. He had a gash in his face from the animal's hoofs which required several stitches. Sounds as though the need of stitches in the deer-foot must have been caused by a hard object—strong suspicion of a bone head here.

THE steamship Bermudian (which was no press agent) arrived recently from Bermuda with a yarn about a fifty-foot whale that was killed by a thrasher shark and a swordfish 406 miles south-southeast of Sandy Hook. Captain Frazier, through binoculars, saw the marine buccaneers tackle the whale off the ship's starboard bow (the narrative is as specific as one of Captain John Smith's). While the thrasher, which has a tail as long as its body, was using it, flail like, on the whale, the swordfish was running the whale through and through. And when the swordfish sheathed its sword and the thrasher coiled up its tail, the sea was red with the blood of the whale. But presently along came a monster electric eel, readily detected by the wireless operator, who felt a shock the moment the eel hove in sight, and wrapping its tail around the tail of the shark and fastening its teeth on the sword of the swordfish, it turned on its current. Exit leviathan. All whales in line of Bermuda steamers now carry lightning rods.

IN changing address, the old as well as the new should be given.

# Fishin' With 'er Jonah

By MIQUE WEBB

**D**ID you ever go fishin' with a Jonah—a scientific Jonah? I did once, and I would like to go with another if I was assured as much fun as I had with this one. We caught no fish, or rather anything my scientific friend would call a fish.

But let's define what a real Jonah is. Referring to the Bible I find that Jonah was a gentleman that God had selected to perform a certain mission; but being a coward, he decided to run away and—presumably—go 'er fishin', for he sneaked into a fishing boat, that was lying at anchor, and hid himself. God was angry at his action, and when the ship had sailed out into

he awakened my interest, and I decided to go. He was one of those fellows who did everything by rule. He applied science, and to hear him tell it, he was an expert. He could shoot the head off a flying quail. He could hook a fish in the right jaw, left jaw, upper or lower, and could tell you before the fish came out of the water just where the hook was set. This was all wonderful, and I wanted to see it done.

He lived just out of town on the road we would have to travel to get to our destination. He left it to me to get a rig, a lunch and other refreshments, and pick him up on the way out. When I went to get the lunch I measured it by

"OHO, THIS IS THE PLACE WHERE THE BIG TROUT ARE, IS IT? THEN THIS IS THE SORT OF FLY, I THINK."

the sea, he caused a great storm to come upon the waters, thus intending to punish Jonah. The boat's crew, being superstitious, began to look for the cause of the storm. They found Jonah—a stowaway—hidden in the hold of their vessel. They questioned him and found out all, and after casting lots, they were sure they had the right man, for Jonah was elected. To pacify God, they threw him into the sea. The balance of the story is too familiar to chronicle, hence I jump to my deductions and conclusions—a Jonah is a person who goes to catch fish, but instead is caught by the fish. And again, it is applied to a fellow who brings hard luck.

My friend was a Jonah, but I didn't know it. They look just like other people. They wear no sign to give them away. He came into my office one hot, sweltering July day and wanted me to go fishing with him the next day. It was one of those gleamy, dreamy, lazy, hazy days on which one had rather go to sleep than do anything else. I felt that way. I didn't want to go fishing. I expressed myself that way, but Mr. Jonah Scientific would not listen. After a time, with his smooth tongue and scientific gab,

the way I felt. I had no appetite at the time, and the lunch matched the appetite. I had my grocer pack one box of sardines (I didn't like the greasy things, or at the time I thought I didn't), some cheese and crackers and a few other little odds and ends—about enough for a well-advanced convalescent.

I picked him up, as agreed, the next morning. On the way out he said: "We are going to a place that I have fished since I was a boy. I was raised in the neighborhood, and know the creek from A to Izzard. Out of hole number one we will take four nice trout. I know I can put the bait right into their mouths. Then we won't waste any more time there. We will 'mosey' on down to hole two. There we will take out six that weigh from a pound and a half to two pounds." And so on until he had covered about a dozen holes. I figured we would have about one hundred pounds of fish when we finished the day, and my hopes, spirits and enthusiasm grew as his assertions lengthened.

We arrived at a farm house in good time, and after making our horse comfortable, we wended our way to a small branch, and soon

"I say, Jack, are there any fish in this pond?"  
 "There may be, but I should think they were werry small, 'cause there was no water in this here pond afore that there rain yesterday."

had a couple of buckets of as fine steel-back minnows as you would want to look at. With fishing tackle, minnows, lunch and other impedimenta, we commenced our journey to the creek—about half a mile away. Crossing a field toward a bluff under which my friend said the first hole was, I noticed him from time to time stop and listen. He would throw his hand to the back of his ear and strain himself to hear. Finally I asked the cause. "I am a leetle hard o' hearin'." Don't you hear singin' now and then?" he asked. I did not, but a little later I did. It was a hymn. A couple of lines would be sung, and then quiet would reign. As the singing was wafted to us on the soft summer air, it was, to my ears, beautiful. There were the deep, resonant, reverberating bass of the male, punctuated with the shrill treble of the female, swelling in cadences, in waves of harmonious sound, making the sweetest music mortal ear ever heard—the melody of our Southern darkies—the finest voices in the world.

We gained the top of the bluff and looked down upon a scene that is novel to many, but was old to us—a scene that caused my friend to swear sibilantly between his teeth and a gleam of death intent to come into his eyes. It was a colored baptismal, and, as we gazed down upon about 200 blacks, swaying their bodies rhythmically to the music they produced, with one old sister shouting "Glory, glory, glory, hallyluuyah; Amen, Amen, I'se got—I'se got it, I'se got it," my friend looked long and steadily at me. "Well," I said, "Do you want to stay here and get religion?" "No!" he almost shouted. "If I stay here much longer I'll kill about a dozen of those coons." "Let's mosy, then," I said.

So we "mosied," going on down to the next hole. This one was a beauty. It was almost round, and the dark green water looked cool and inviting as we were sweltering with our loads and exertions. On the side of the stream on which we were, the bank of solid earth was about eight feet above the water, the sides running sheer and straight down. We were in a wood lot, but there was much undergrowth and brush under the giant beeches. But for a space of about a dozen yards, extending back from the edge of the bank, it was clear of all obstruction, with a carpet of blue grass. We seated ourselves on the bank of the proscenium of what afterward became a stage, and let our legs dangle over the water, after caring for our minnows and selecting two nice ones to begin our fishing.

When we were comfortable, my friend began

to "soak" me with a dissertation on fishing and how to fish. I grew tired of it and engaged my mind with the music a pair of deep bell-mouthed hounds were making in the distance and in the rear of our position. The sounds they made were wafted on the breezes, first far and then near, swelling and declining in volume as they seemed to go and come. The hounds seemed to be on a hot chase after something, and I began to speculate on what it was. Watching a cork is hard work—pleasant when fish are biting fast, but irksome when they are not. Which would live the longest—a cork watcher or a rock breaker? I asked myself, finally mentally placing my money on the rock breaker.

The hounds were coming nearer. They were in full cry; they were bearing down on our position. If they did not turn I would see what they were after. I turned to look behind, and the racket was so great my friend turned also. There was a crashing of brush, a waving of small trees, and then the outskirts of the undergrowth parted, and the head of a huge old boar shot through and into the clearing on which we sat. The distance from its border to us was about thirty feet. The boar seemed to be in a great hurry. He cleared the intervening space with great leaps until he had come within less than five feet of us, and then he went into the air, rising like an aeroplane over our heads, landing in the center of the pool. As he went over, I figured his weight to be about 300 pounds or more. We were in a cul-de-sac, the creek being the only outlet. Had we had the time, we would not have been able to escape. As it was, the action of the hog being so quick, we did nothing. We did not have time to get excited.

The hog landed in the center of the pool and the impact of his heavy body changed every drop of water in that pool to the thinnest of mist. For the space of a moment I was looking down into the hole at the bare bottom. The mind acts very quickly in moments of stress, and mine recorded from the eyes the fact that, the only fish in the pool now, a hole in the ground, were our two minnows. I saw them wallowing and wriggling on the hard clay and our corks lay flat on the bottom. A moment more and the water was coming down on us in sheets, bucketfuls, tubfuls, and then the whole pool came with a slosh, a deluge, and much of it ran back into the pool through our clothing and shoes. I am no liar. I can prove this to anyone's satisfaction if he will furnish a hog, a pair of dogs and go with me to this pool and let us enact the same scene over again. Who says this is not a fair proposition? It should at least put all doubting Thomases to rout.

We dried our clothes as best we could, built a fire and wasted two hours of precious time. My friend looked at me and I looked at him. Our looks were accusatory. Who was the Jonah? "Well," said I, "what are you going to do about it?" He glumly shook his head. He was "up against it." "It looks like the 1st of October to me," I said. "What do you mean?" said he. "That's moving day, you know, and this is moving day with us. We can't pay the rent. We must move. I am glad that hog jumped in that pool, though."

"Why!" he snapped.

"Because," I snapped back, "there were no fish in it, and we would have wasted this whole

day and would not have been any wiser, but for that hog."

"I fail to follow you."

Then I told him about seeing the bottom and asked if he had seen any fish in the spray. He had not. We moved.

Our next hole was under a bluff. In making a short cut we came to it on the bluff side and on top of the bluff. My friend was in advance. When the pool came into his view he let go of all his impedimenta, and I was startled with the rattle and clash of it to the ground. We had had so much bad luck our sources of conversation were dried up. It was the only dry thing about us. I came forward and he silently pointed, with unconcealed disgust, at the water below. There were about 200 head of fat beef cattle in the pool. The steers were standing from knee deep to almost total submersion. Their long tails were flying in every direction. They were fighting flies and the mop of hair on the ends of their tails was soaking up the water, and the flirting of so many caudal appendages made a mist over all. It was the best and cheapest irrigating scheme I ever saw. They were throwing the water out of the hole faster than it could run in. The creek below the hole was falling perceptibly. My friend looked at me and I looked at him. Move again? Yes. But my friend showed very plainly that he wanted to "shake me." He suggested that I stay at this hole until he found one that was free to the use of fishermen. He would come back for me when he had found what he wanted. I am independent by nature.

So he dropped everything but his tackle and minnows and strode away. He was rather huffy, I thought. I sat down on the out-cropping roots of a giant old beech. The thick shade and cool breeze was delightful. I lit my pipe and made myself comfortable. I thought of my minnows. I picked them up, and at the same time noticed the one on my hook was still gasping. I picked up the pole and made my way down a cut in the bluff at the lower end, which led me out on a sand bar. Here I submerged the inner tank of my minnow bucket in water that was at least six inches over the top of it, when the tank rested on the bottom. I tied the cord attached to it to a root, and then made my way further out on the bar to where the pool had its outlet.

[CONCLUDED NEXT WEEK.]

# GAME BAG AND GUN

## Massachusetts Fish and Game League

**J**OHAN B. SMITH appeals to the sportsmen of Massachusetts for thorough State-wide organization as the only means of obtaining constructive legislation essential to the timely and adequate restocking of our depleted lakes, ponds, streams and covers.

*To the Sportsmen of Massachusetts:*

It is time to stop mourning over the failures and follies of the past and to get into line for present and future action. The Massachusetts Fish and Game League is organized for the accomplishment of purposes dear to the hearts of every fisherman and hunter in the Commonwealth, and it will effect its aims and objects with your own personal co-operation only.

You all want more fish and more game for Massachusetts. The old saying, "Money makes the mare go," is as true to-day as it ever was. In order to adequately restock our depleted waters and covers, the construction of a number of first class fish and game hatcheries should be started at the earliest possible moment. Before our commissioners can begin the building of these hatcheries, a large sum of money must be forthcoming yearly.

The State pleads poverty and economy, and the average legislator sees nothing especially attractive in measures calculated to better conditions pertaining to inland fisheries and game, backed neither by powerful lobby interests nor united voting constituencies. Perhaps through the force of habit alone he has come to regard them as being of very secondary importance.

At the present session a bill was introduced, known as the combination hunter-fisherman license measure. No more logical, economic, constructive and meritorious bill ever graced the legislative halls of a free and enlightened State. This bill petitioned the Legislature to grant sportsmen the lawful right to pay into the Treasury of the State the approximate sum of \$200,000 yearly, to be used by the fish and game commissioners for the building and maintaining of fish and game hatcheries in order that we might soon realize a return of the "good old," and also that future generations might be insured against a recurrence of the deplorable conditions existing to-day, with regard to inland fisheries and game.

How was this sane and much needed measure treated? It was smothered in committee, without being given the right of debate, as you all doubtless know, and I would respectfully submit that a greater injustice was never inflicted upon the sportsmen of the State.

Do you suppose that had this bill or one of equal merit been introduced by the Massachusetts State Grange, it would have been turned down? Not on your life! Its 30,000 members constitute a united voting constituency, ready at all times to back up just and meritorious legis-

lative measures calculated to advance its interests, and sportsmen have none but themselves to blame for not having an organization equally as strong.

We sportsmen are remiss in our duty in compelling our commissioners to go before our legislators on bended knees, begging for a paltry \$10,000 with which to build an isolated hatchery. It is not the function of our fish and game commissioners to raise money. It is their function to outline, and to wisely and economically expend, for the propagation and distribution of more fish and more game and the proper protection of the same, such funds as our legislators shall appropriate, or empower sportsmen to contribute; and it is the bounden duty of sportsmen to organize and to place ourselves in a position where, if necessary, we can demand the enactment of constructive legislation that will give us the legal right to provide the funds essential to the adequate restocking of our too long depleted lakes, ponds, streams and covers.

The State of New York hatched and planted 730,000,000 fish last year, consisting of thirty varieties, and will increase the output materially this year. This output cost the State about \$60,000. It has one game farm. Last year they raised and distributed about 12,000 pheasants' eggs and 2,500 pheasants. This year they expect to hatch 25,000 eggs and 5,000 pheasants for distribution.

Compare these results (especially as to the output of fish) with the miserly policy of Massachusetts, and it spells immediate State-wide organization.

The Massachusetts Fish and Game League is a worthy organization, with worthy motives. Its officers are men who deserve the confidence and co-operation of every true sportsman.

Let every sportsman who wants a square deal get busy. Not only should he join the league, but he should reach out among his friends and fellow sportsmen and call their attention to its merits and the importance of their becoming members thereof.

JOHN B. SMITH,  
Sec'y-Treas. Massachusetts Fish and Game League.

### Game Animals in Nevada.

REPORTS from the mountainous country about Caliente and Elgin, Nev., indicate a fine opportunity for mountain lions, cougars, deer, wildcats, 'coons, coyotes and bear shooting. The southern spur of the Sierra Nevada Mountains is a rough country profuse in sage brush and spruce and with mountain streams abundant with gamy trout.

OMAHA is the largest range horse market in the world.

## Fish and Game Laws of Vermont.

BY JOHN W. TITCOMB, STATE FISH AND GAME COMMISSIONER.

FISH—OPEN SEASON—WHEN LAWFUL TO TAKE SAME

(Open season includes the first, but not the last date given.)

Trout, landlocked salmon, lake trout or longe in brooks and streams, April 15 to Sept. 1; in ponds and lakes, May 1 to Sept. 1. May be fished for from one hour before sunrise until two hours after sunset. Trout less than six inches in length not to be taken or possessed. Not more than five pounds of trout to be had at one time. Not more than fifteen pounds of landlocked salmon, lake trout or longe to be had at one time. Black bass, June 15 to Jan. 1. Bass less than ten inches in length not to be taken. Not more than twenty-four bass to one person in a day. When two or more are fishing from the same boat, thirty-six to the party. Muskallonge (except Lake Champlain), June 15 to April 15. Pickerel, pike-perch (wall-eyed pike), except Lake Champlain, May 1 to March 1. Pickerel less than twelve inches in length not to be taken. Pike-perch less than ten inches in length not to be taken. It is lawful to fish through the ice, except in waters inhabited by trout, with not more than ten tended lines to a person. Not more than twenty-five pounds of pickerel to a person. See special laws for Lakes Bomoseen, Morey, Fairlee, Silver Lake, Chittenden Dam, Elmore Pond, Joe's Pond, East Long Pond, Greenwood Lake, Sabin Pond and certain ponds in Bennington county. It is unlawful to take any of the above fish in any other manner than by angling, to take any fish by means of explosives, by shutting off water, by the use of lime, creosote or poisons; by the use of a net, set-line, spear, snare, fish-trap, jacklight, fishing otter, trawl or any electrical device for killing or stunning fish. Exception: Pickerel of lawful length may be shot in the waters of Lake Champlain by persons having hunting licenses from March 15 to May 15. Angling is permissible on Lake Champlain throughout the year, having due regard for the close season on black bass.

GAME—OPEN SEASON—WHEN LAWFUL TO KILL SAME.

Moose, caribou and elk, protected at all times. Deer, with horns not less than three inches long, Nov. 10 to Dec. 1, both dates inclusive, Sundays excepted. Not to be taken between 5 P. M. and 5 A. M.; nor by the use of a snare, trap, salt lick, artificial light or a dog. A hound in the woods, hunting or logging camp, or club house during open season for deer is presumptive evidence of its unlawful use. Not more than one deer to a person, and person killing deer must report fact to game warden and exhibit to him deer's head. Hounds not to be permitted at large in forests inhabited by deer. Rabbits or hares, Sept. 15 to March 1. Not more than five rabbits or hares to a person. Not to be taken by use of ferrets, except

to be shot with gun. Gray squirrels, Sept. 15 to Dec. 1. Gray squirrels, Sept. 15 to Dec. 1. Not more than five gray squirrels in a day.

#### FUR-BEARING ANIMALS.

Marten, mink, raccoon, fisher and muskrats, Nov. 1 to May 1. Muskrat houses not to be disturbed. Muskrats: No open season in Grand Isle county until Nov. 1, 1914. In Addison county, except during months of March and April. Fox and skunk, Nov. 1 to May 1. Beaver, protected at all times. Otter, Nov. 1 to March 1. Trappers must have a hunting license. Persons may kill noxious animals at any time for the protection of their property.

#### GAME BIRDS.

Ruffed grouse (partridges), quail and woodcock, Sept. 15 to Dec. 1. Not more than four of any of the above birds in one day, nor more than twenty-five woodcock or partridges during the open season for same. English snipe, plover (other than upland plover) and shore birds, Sept. 15 to Dec. 1. Wild ducks and geese, Sept. 1 to Jan. 1. Not more than twenty wild ducks in a day. Not to be hunted with torch or boats propelled otherwise than by hand. Pheasants or European partridge, upland plover and woodduck, no open season. Game birds not to be sold for traffic or gain. Eggs of above birds not to be taken, destroyed or possessed.

#### INSECTIVOROUS OR SONG BIRDS.

Wild and undomesticated birds, except the game birds specified above, are protected at all times, and it is unlawful to have in possession the plumage of any protected birds. Birds not protected are the English sparrow, crow black-bird, crow, starling, hawk, snow owl, great horned owl and kingfisher. All game quadrupeds and all game birds shall be taken only in the day time after sunrise and before sunset. It is unlawful to hunt any wild animal, wildfowl or bird in this State at any time without first procuring a hunting license from a town clerk. Fee for residents and certain owners of real estate, seventy-five cents. Fee for non-residents, \$10.50. It is unlawful to take any protected game (except fur-bearing animals in the open season) by means of a snare, trap or net; to expose salt licks or other bait for protected game, or for any common carrier to transport fish or game in close season.

### The Cowards.

BY C. BURNHAM MADDOCK.

"Cowardly! that's what you are!  
Tain't so dark, see, there's a star!  
An' right through the trees ahead,  
I can see the sunset's red!"

"Here, you take the chestnuts quick!  
Look, I'll take this great big stick,  
Hurry up! it hain't so far,  
Cowardly! that's what you are!"

"Hang on to them chestnuts tight!  
Next time, you won't go alright,  
Careful now, you'll have a spill!  
What could hurt us on this hill?"

"Such a 'fraid-cat as you be!  
(What's that black thing 'gainst the tree?)  
O, go on, old poky-slow!  
Cowardly! that's—O! O! O!"

FROM Wyoming there comes an estimate that in all that State outside the Yellowstone Park there are at this time not more than 100 mountain sheep!

## What Kind of a Gun Shall I Get.

BY THE OLD MAROONER.

AGUAN, Spanish Honduras, May 14.—*Editor Forest and Stream:* Gun manufacturers' catalogues generally say that they receive many inquiries like the above title, which I would prefer to change to "What Kinds of Guns," and their general reply is that it depends upon what you want it for, which anyone knows, and then proceed to recommend their own products, so I will give you something more to the point. You must first decide upon smokeless or black powder, as it requires some work to keep the bore from rusting when used with black powder under conditions of boat, camp and frontier, and a very industrious man to keep a gun in shooting condition when using smokeless anywhere. I recommend to those who are not built for steady work and don't buy a gun to increase the amount already imposed upon them, the old-fashioned black powder such as I use myself. Eliminating target practice, I will answer for prospective hunters and settlers, as there is something in knowing before you go to distant wilds to find yourself on the ground with a defective outfit for its game.

For those who cannot afford to spend much on gun, ammunition and outfit and want a general purpose gun to cover as many uses as possible, a .32 caliber or 8mm. is undoubtedly the best. The sights should be white for the great semi-dark tropical woods, cloudy days and field hunting. For birds, squirrels, lizards, etc., at close range use a very light (50 grains) charge and a very sharp-pointed hollow slug which may be set down upon a light charge (15 grains) of black powder. This will not be carrying or wasting more of either than is necessary nor will it ruin such small game, and you will hardly ever need to take a wing shot in the tropics.

For raccoons, bush dogs, guatusos, kinkajous, monkeys, etc., use 20 grains of powder and a 100 grain full-faced cupped bolt. If not set firm on powder, fill space with solid wood or sawdust to prevent excessive fouling. For monkeys the gun should be a repeater, for though you may want but one, it takes nearly a dozen bullets to settle that one, and he may hang by his tail long after he is dead.

Hunting the active kinds is jolly fun, and they are the choicest table dish of the tropics. For deer, felines, ant bears, capibaras, manatees, porpoises and big fish, use full charge of 40 grains and 150 grain slug. This gun would not be adapted to tapirs and the great land and sea game of the North and Arctics. Its caliber may be, but it requires an interchangeable barrel with high velocity charges. Alligators and crocodiles do not need a bullet at usual ranges and height of gun, but I would use a good charge and hold gun low. The same of big fish if you can get near them. I think an alligator's ears should be below the surface, but have not experimented. Hook the critter's head up on to the boat's rail and give a chop back of it, or he may knock you overboard an hour or two later and perhaps swallow you.

Long range guns of the above caliber may be obtained very cheaply of the large gun dealers and lightened by cutting down to a sufficient length for hunting. They will stand rough usage and accidents beyond reach of repair shops

and last you and your heirs long after a sporting arm is buried and forgotten. I use no others when in distant lands as far as practicable.

If a gun only for water birds is desired, which is the only kind required on our Southern coasts, a heavy single .22 breechloader like the Winchester single shot, musket model, makes a good boat gun. Such a gun is the kind used by skin collectors, but it must be made by a reliable maker or you can hit nothing at fifty feet. The rule is to get near enough to see the bird's eye and fire at his head, which is afterward cut off, and the skin having neither shot holes nor blood brings a better price. Birds for natural history specimens may be shot through the body. BB's and CB's are the ammunition used which at about \$2 per thousand should represent the total cost of meat to the frontiersman or coast settler for every meal in the year. The short cartridge is better for fifty yards, costs but \$2.67, and you need no stronger ones. Where birds occur in bunches like whistling hens or flushed coveys as at the North, a short 20-gauge is necessary, and a full bird gun for economy of ammunition would be a combination .22-20-gauge. You may say if cylinder-bored, it will take ball or buckshot for animals. But you can't change cartridges quickly enough for animals as you can for birds. A deer gun should be a combination for ball and buckshot to take them standing or running, as they are most always in company.

A full general purpose gun covering all points would be a .22-45-20-gauge, but I don't know where you can get one unless you have it made to order. The revolver should be .45 caliber also; then both will take .44 or .45 cartridges. Whether shotgun, rifle or combination, the barrel and breech work should be of one piece, "solid frame" for strength and durability.

The explorer on foot cannot carry shotgun ammunition, and in Spanish-American countries it is very expensive, but he needs a light gun for provisions rather than defense. A double rifle carrying a .22 bullet and a heavy charge behind a .38 or .40 full-faced cupped slug will do all the execution he expects, or he may carry some solid long bone-smashers for the very large animals if in their country. The Hudson Bay trappers used to start out with a pound of round bullets and half a pound of powder for the season's provisions, but whether that amount would last everyone depends upon the size of the animals killed.

I am opposed to repeaters, breechloaders, take-downs and tip-ups, yet each has its proper sphere. What we really need is an assorted battery to choose from including light and heavy guns, single and double muzzleloaders, flint-lock and set-gun, according to conditions and needs each time that we use one. The old kinds are not to be despised. The old naturalists, scouts and our revolutionary liberators did their best work with them. They still have their place and will do as good work as ever if appreciated and not sneered at.

To the boy who likes a lot of action and noise, the little Maynard will give him a chance to work its machinery, but to him who will carry a shotgun, let me commend a single muzzle-loader for its lightness. It will not make his back ache, but teach the boy and older beginner coolness, calmness, care and accuracy.

# How to Build a Fish Ladder, or Chute, with Specifications

As Adopted for Use in Missouri Streams by Jesse A. Tolerton, State Game and Fish Commissioner

### CRIB OR BULKHEAD.

**C**ONSTRUCT of white oak, cypress, pine or other durable wood 2 x 12 "joist stuff." Miter and bolt the corners thoroughly in order to resist the drift which might float down and strike bulkhead. Bolt the sides of bulkhead at the bottom at corners with strap irons, full length on sides, and nut and washer on under side of bottom. The top crib on top of bulkhead should project or stand out of the water at least two feet higher than the main chute.

Fill the crib and bulkhead with heavy stone or concrete, sufficient in weight to anchor the chute firmly down to dam. Always recess the chute into dam, sufficient to let full current of water flow through the fishway at low water mark; the top of the chute must always be under water.

If current is too strong to put chute in place, a temporary coffer dam of sand bags may be constructed in checking the flow of water until chute is in place and bulkhead weighted down. Sand bags should be removed when chute is completed.

### CHUTE OR RUNWAY.

Construct the chute of two-inch material (white oak). Build first the chute from the crib, letting 2 x 12 bottom pieces extend through under bulkhead. In making joints see to it that they come on the arms. Bolt the 2 x 12 arms to bottom and top with two one-half inch bolts

to each arm, letting them run clear through. Also use plenty of spikes in securing all parts together. The runway of the chute must extend to within two feet of the bottom of the river, and into the pool below the dam. It may be placed at either one side or in the center of the dam, but must be placed in the channel of the stream and where the greatest depth is always to be found.

Cover the entire chute with two-inch white oak planks, leaving a two-inch space between the planks for the purpose of cleaning out the pockets. Use plenty of wire nails in the construction. Support the slanting chute from the bottom of the stream by knees or horses on proper and sufficiently strong supports. The length of the chute is determined by the height of the dam, the fall being four feet to every one foot of height of the dam. In securing the chute to the horses or knees, place an iron band over the chute and extend down and bolt on to the upright supports in order that the two will be securely made fast together.

At the bottom of horses or supports find or form a solid bottom, and bolt firmly a cross arm from one to the other, extending on either side about 2 feet in the clear of the runway, and on this arm secure by wiring sufficient weight to anchor and hold fast the lower end of chute to within two feet of bottom of stream during high or low water, so it will not be inclined to

float. Keep both these lower and upper ends of the chutes always clear of debris for the free passage of fish.

In connecting the slanting part of chute to the level part which lays in the dam, use strap irons bolted to each section securely, place one across each joint, on sides, top and bottom. Should dam be of such height as to need several sections, always put sufficient supports, well secured and bolted and weighted down.

Estimated amount of material needed to construct a fish chute five feet wide upon dam with eight feet fall, the top of dam being six feet wide. It will be noted that eight feet is far in excess of the height of most dams.

	Feet.
9-2x12x8 bulkhead and crib sides.....	144
5-2x12x12 bulkhead bottom & level chute.....	120
10-2x12x16 chute bottom, 32-foot run.....	320
5-2x12x16 chute sides, 32-foot run.....	160
10-2x10x16 chute top, 32-foot run.....	268

# Sensational Dry-Fly in Nova Scotia

By THEODORE GORDON

WAY back in 1912 I wrote to Dr. Breck to the effect that if he would send me a few of his Nova Scotia May flies in a weak solution of formalin, I would try to imitate them to the best of my ability. This offer was made in good faith, but Dr. Breck has probably not realized that it meant the expenditure of considerable labor and pains.

It might be necessary to test the flies and correct the coloration from life, but once the pattern is found to kill well, good fly-makers can be found to duplicate it.

Dr. Breck's writings are always interesting, and his experience has been great, but in this instance he has a theory that the dry fly is no use in Nova Scotia. Given the natural flies and the trout taking them freely and the whole question resolves itself into a good imitation presented in a natural way. I have had his experience on many streams where there was a really heavy rise of the species of natural fly day after day. Men would complain that before the rise they were having sport; after the flies appeared they had poor success. Invariably so far as my experience goes, it was necessary only to offer a really good imitation in size and color. One might have to dress half a dozen before one could please the trout. Again a rather poor copy would kill if the trout were strong on the feed.

The conditions described by Dr. Breck are first those which interest the lover of the floating fly. They call upon him to do his darndest to succeed. I am no purist or ultra purist, and fish wet when I feel inclined that way, but the more one fishes the greater his enjoyment when problems of this kind present themselves. The Perlidæ, caddis flies, etc., flutter and buzz, but the Ephemeridæ usually sail down serenely after coming out of the nymphal stage. Nowadays they are not so plentiful as they were ten years ago, but we had good rises nearly every day during that nasty weather in May.

I have been ill and am even more stupid in expressing myself than usual. I willingly admit that conditions vary greatly in different waters, but given the flies in the water and trout feeding upon them, I feel confident that the persevering dry-fly man will succeed not only in taking fish, but some of the very largest, provided that they are rising steadily. No doubt there is a very great deal in the manner in which the artificial fly is presented. The best of our artificials are far from perfect, but if one can get the effect of the natural fly in the water, he usually has sport. One gets a pretty good pattern occasionally at the first attempt, but more frequently improvements are required. I have fussed with a bug for two seasons before I felt satisfied that I could do no better.

It is not necessary to go to Nova Scotia to have Dr. Breck's delightful experience. I have had the same in New York and Pennsylvania, and at least once in Maine. It is a beautiful problem and well worth a little study and effort.

If Dr. Breck wishes to fish the dry fly from a canoe, he must either handle the canoe him-

self or have a man who understands what he is trying to do. Why use an orange leader?

It is far more difficult to fish quiet water than where the surface is ruffled or rippled by breeze or currents. With a strong bias against the floating fly in the United States, I doubt if it would be worth while to work hard on imitations.

## In Defense of the Bait Fisherman.

BY TALBOT DENMEAD.

WITH abject apologies to the dry-fly fisherman, I wish to state that bait fishing for brook trout is a science.

Because said dry-fly fisherman can take a foreign fraud and a four-ounce rod and fish up stream and take a goodly trout, there is no reason why he should put himself on a pedestal and look down upon his more lowly brother of the wet-fly or the garden hackle, who is less expert perhaps, but who loves the mountain streams and the speckled beauties just as much as the dry-fly artist. It really is not nice of him to be so uncharitable to his brother angler.

Mind, I am not saying a word against the dry- or wet-fly fisherman, or that his way is not the right way or maybe the best way, but the angler for brook trout with light tackle and bait should not unceremoniously be cast with the pot fisher, the fish hog and other such swine; there must be some middle ground where the man with the bait can fish in peace and not have some one always stepping on his toes. I am not a bait-fisherman for trout altogether, having caught them with fly as well as with bait, but I have found there are certain streams, generally very small ones, which contain deep holes running under roots and into deep banks and around stumps and logs where it is absolutely impossible to catch a trout on a fly for the very simple reason that fish cannot see through a solid substance, and a fly on the surface of the water outside of his lair might just as well be in Simple Simon's Mother's pail for all the good it will do. Of course, the dyed-in-the-wool dry-fly expert will say wait until he comes out. Very nice, but he rarely comes out until some one sends a nice juicy worm bouncing along the bottom where Sir Fontinalis can at least get a look at it.

Then when he does come out of said dark and covered hole after the aforesaid tempting morsel, have you got him? No sir! It is one trick to coax him out, another trick to hook him without tangling your whole outfit in the overgrowth, another to keep him from taking a turn around some projecting snag, and a few more to get him out on the high bank, where you can get your hands on him, or sit on him if you like—anything to prevent him from jumping off the hook and gracefully balancing himself on the end of his tail and projecting himself back into the water. Oh! it is a science all right—if you get any fish. I can show Mr. Dry-Fly Man a dear little babbling brook not far from civilization where there are a few fat fish left, but he won't hurt them. He will come

out of that jungle minus his tackle and his religion, if he has any, but no fish.

I hear some one in the amen corner say, "But it is not all of fishing to fish." Very true, that is why so many of the fraternity go after tadpoles instead of trout—perhaps. Personally I like to see a fish or two with speckles on their sides when I go after trout; I want them over eight inches long from tip to tip; I want to catch them on light tackle; I don't want them all, but would leave some for the other fellow. If I really did not want to catch a trout or two I would not go and neither would you.

Remember, I am not criticising the fly fishermen, but I simply want to say a word in behalf of some very good sportsmen who have been accused of taking an unfair advantage of one of the greatest fish the world produces by using the fish's natural food—men who would not take an unfair advantage of a comrade, who would stand aside and let said comrade fish the most likely hole, or take the shot over the standing dog, and whose tackle box is always open to the fisherman "up a tree."

Please do not consign these men to the Fishermen's Purgatory. We do not ask for love, but for goodness sake be charitable. Do you get me?

Remember, the Immortal Izaak was a bait fisher. "Nay, good scholar; I caught my last trout with a worm; now I will put on a minnow."

## Illinois Casting Club.

CHICAGO, Ill., June 9.—*Editor Forest and Stream:* The unpropitious wind, having a velocity of thirty-two miles an hour, on Saturday, June 7, precluded all events scheduled for that day. The following day was only a little better, the velocity being twenty miles, but the head winds were so variable that good scores were impossible. However, the half-ounce accuracy and half-ounce distance baits were cast, and the accuracy and salmon fly postponed. The scores of June 8 follow:

Half-ounce accuracy bait:			
C. McCarthy	98.5	Tice	97.6
C. W. Grant	98.7	Humphreys	96.8
Amman	97.9	McFarlin	97.5
Huntly	96.7	Anway	95.4
Whitby	98.	Kernaghan	98.9
Swisher	98.2	Hornstein	97.1
Moffett	97.	Hoxey	97.7
McCandless	97.	Heller	90.8
Tournier	97.4		
Re-entry:			
McCandless	95.8		
Half-ounce distance bait, feet:			
Kernaghan	143	Whele	130
Swisher	117	Moffett	41 3-5
C. McCarthy	140 2-5	Amman	53 1-5
C. W. Grant	114 4-5	*C. E. Lingenfelter	208 3-5

\*Guest.

Brother Linder's score in the quarter-ounce bait, May 24, should have been 99.1, and Brother Amman's in the dry-fly accuracy at the Chicago Fly-Casting Club's tournament, May 25, 99 2/15.

The next contest will be June 21, and the events will be quarter-ounce bait, quarter-ounce distance bait, delicacy fly and light tackle dry-fly accuracy.

J. D. ANWAY, Sec'y.

NEW YORK'S Senators and Assemblymen are going to kill three bills to reopen the shooting of wildfowl in January, and two bills to reopen the sale of game.

# Around Manhattan Island in a Canoe

By CHARLES J. SODERBERY

(Concluded from last week.)

IT was now 12 o'clock. I concluded to wait until 1 o'clock to make the start up the East River. I realized I had the hardest part of the trip before me. But the weather was ideal. Never could there be a much more perfect October day; the air clear and cool, the sun just warm enough to make it enjoyable, and a gentle northwest wind blowing. If the journey could not be made to-day, it never could. In nearly every venture we make in life there is a point where we are permitted to stand and look ahead and look back; a point where we must decide whether we shall retrace our steps in safety or go on with the venture; a point beyond which there can be no turning back. We leave comfort and happiness for gain and adventure. Up to a certain point in our quest we are our own masters; but one step beyond and conditions close in upon us. Either we go down to destruction or we hew our way out ahead. I had reached such a point in my trip. I could go back up the Hudson with the new tide and in two hours be home, or I could go on, trusting to find a way out ahead. Here all doubts and indecisions must be settled. I concluded to go on. With this I got out my luncheon and ate while I hobbled up and down with the swells between the two piers.

At 12:45 I said good-bye to the chef (policeman wasn't in sight) and paddled out in front of the Battery. Here it was almost like a mill pond. Usually the water is choppy; but to-day I might have imagined I was at the other end of the island, so unruffled was the water's surface. Was this a good omen, or was fate giving me an extra chance to double back on my course and take the certain way home? But I went on. The Battery sea wall was lined with people. From the expression on the faces of many they seemed to expect a turning in their lives to come with the turning of the tide. Rounding into the East River three ferry boats this time charged me at once, as if to give me a last warning to go back home. But I only swung around in a circle and the next minute shot across their wake. Now I was in the East River and the tide had turned.

Up to the Brooklyn Bridge all went well. Here the water roughened, and it seemed impossible to keep near shore. It felt as if an invisible something wanted to pull me out to the middle of the river. Just north of the Manhattan Bridge conditions closed in on me. Waves came in all directions. For a few minutes I was paddling in all directions. Wave after wave broke over my boat, and had it not been for my canvas cover, this letter, Mr. Editor, would have ended right here, or, more likely, would never have begun. There was no turning back. I had forfeited my last chance. This tide was even stronger than that which brought me down the Hudson. Finally I got out of the clutches of this bad spot, but all along up under the Williamsburg Bridge and for two or three miles beyond the East River lived up to its reputation for ugly water.

"Oh, you Robinson Crusoe!" some called. "What makes you do so?" Glancing back over my shoulder I saw a man on a scow. I felt like answering, "Because I am a blame fool, I guess." But he no doubt thought he read the right answer and understood it all, as he noted I was headed directly for Blackwell's Island—or is it on Ward's Island that the insane are confined?

Shortly I swung under the stern of a friendly barge to rest a bit. Coming up the river the rough water gave me little chance for observation of much beyond the pier line. Comparison strongly favors the Hudson water front. Of stately ocean-going steamships there was none. The best the East River could boast of were barges, scows and freight boats. The lower river had showed splendid sailing ships which are strangers to the Hudson. One thing that impressed me was the absence of life on the docks. Where in the morning on the Hudson every street end held a group of men and boys, they were absent from the East River water front in the afternoon. Perhaps Dr. Finley can explain.

Before I picked up my paddles again I tried to anticipate the rest to my trip, or at least the next three miles, the only stretch about which I felt any concern as to successfully making my way out. Ahead I could see the narrow strip of water between Blackwell's Island and the New York shore. I figured that this could not be much worse than that I had put behind me. Beyond the narrow strip of water was Hell Gate. What that held in store for me I could not tell, but as I let the tide grip me again, I was not reassured by the hail of a tug boat man, "Tow you through the Gate for \$3."

Along the shore opposite Blackwell's Island I found the water good; it was less rough than any from the Battery, though here I noticed a "boiling" motion. In places the water seemed to come up from the river bottom in perpendicular columns, spreading in all directions on reaching the surface, causing my boat to slacken when striking such spots, with a tendency to swing around. Almost under the Queensborough Bridge I happened to look toward my right, and in the center of the river I saw the nastiest water yet. From no apparent cause the water seemed to leap into the air. Instinctively I tried to hug the shore a little closer, and turning there toward the left I saw a life saving station, the crew waiting as if ready to haul out the unfortunate who should be caught in that swirling tide.

This was a good place to leave behind me, so I bent to my paddles and at times I must have gone at the rate of ten miles per hour. Glancing across the narrow water to Blackwell's Island, I noticed that it appeared about as well populated as I had found the North River piers to be in the morning. I made a quick inference that this accounted for the absence of life on the East River piers recently passed. But I guess that is not the right ex-

planation. I don't imagine so many have moved across the river. Now I was approaching Hell Gate. Ahead I could see the "Harlem" of the Astoria Ferry Line crossing. Evidently, this kind of craft had given up the attack on me. She was churning up the water mightily, and I wondered if I was to get through. Now I was at East River Park. A line of people looked out over the angry waters. What the expression on their faces was, or whether they, too, were waiting for their tide to turn, I did not try to see, and I did not care. I knew I had only about 500 feet more to go to know I had won my way out ahead; that in my struggle with conditions I had come out on top. These 500 feet of jumping water were covered somehow, and I found myself floating on the calm Harlem River, in front of another well placed life-saving station. It was just 2:30 o'clock. Looking around during a few minutes' rest, I noted what I took to be one of the Maine Steamship Company's vessels about to enter Hell Gate going south. I speculated on what would have happened if she had been five minutes earlier—what would have happened if we had both tried to make the narrow passage at the same time.

I had counted on a comparatively easy paddle in the Harlem, but I at once saw there was work ahead. Sometimes we paddle with nerves and muscle; sometimes with our muscle alone. Before me was a task requiring only the one factor—just a simple back-breaking job. I knew that somewhere in the Harlem I would meet the tide coming from the north and would have to "buck" it; but I had supposed that that point was some distance ahead of me. One might imagine that the flood tide coming up the East River would continue up the Harlem out through Spuyten Duyvil and join with the flood tide going up the Hudson. But not so. The flood tide comes up the Hudson, turns into Spuyten Duyvil and down the Harlem. Thus we have water flowing north in the Hudson and less than a mile to the east the same water running south in the Harlem. I knew of this, but did not know just where the south flow in the Harlem was to be met. Now I had found out. It runs all the way to Hell Gate before meeting the flood tide coming up the East River. It seems that the waters of the Hudson via the Harlem join with the East River to flow into the Sound. This meant a long, hard pull before me. "Oh, you Times Square!" I felt like saying. "A paddle up Broadway is a heap sight easier than this." But I bent to it.

Foot by foot I made my way. Now the water front began to show life again. Men and boys were taking advantage of the bright afternoon. Here I came again to the zone of the motor boat; and gradually the shore was giving up business for pleasure. Rowing clubs were numerous and many crews were out. I asked a lad on shore what street I was at, and he replied 149th street. I confess to a desire to go cross lots home. Or I might lay up the canoe on a float of one of the rowing clubs and call it a day's work. I resisted the temptation.

I pulled over under the Speedway wall to escape the tide as much as possible. Here again a line of people looking out over the water. At these faces I took time to look carefully. There was no mistaking it; for one and all the tide seemed to have had a favorable turning.

Looking up suddenly I saw painted in large letters on the Speedway wall the sign "FINISH." I laughed outright. Here was certainly a good excuse to bring my trip to an end. I crossed the line with a spurt, like the rowing crews for whose benefit the mark had been placed, but I kept on going. A little further and I noticed the tide had begun to slacken. I had traversed the whole flood tide and now was approaching the new ebb. For this I was thankful. Still a little further and I was leaving all sign of the city behind me. Soon

I was skirting meadow land. And now the base of high wooded hills. Shady lanes were not far off, but it was growing dark. Just a faint glow was in the western sky as I passed into the Hudson and turned south again. The moon was beginning to show through the treetops. Far ahead I could see the two red lights on Fort Washington Point. Now I was passing a beautiful part of the island. As I headed for the lights I could hardly believe there were such things as docks, ferries, bridges, steamers and scows. What a variety of shore front this day

had showed me! But right here was the best; this water edge under the high trees nearly as nature had left it. In fancy I could see the Indians in their canoes stealing silently here and there. Their camp-fires might be those on shore lighted by the late fishermen.

Passing the Point the searchlight of the steamer "Trojan" played on me for a minute and then its wash sent me toward the rocks. But nothing could harm me now. Another quarter mile and I pulled in at 167th street at 7 o'clock, having made the thirty odd miles in nine hours.

Forest and Stream will give a weekly digest of Yachting and Motor Boating events from all over the country.

### New York Y. C. 66th Annual Regatta.

THE sixty-sixth annual regatta of the New York Y. C. will be held on June 26, 1913.

Entries.—Entries should be filed with the committee before 4 P. M., June 25, but entries may be received until the "warning signal."

Time Limit.—A class race in which one yacht has not finished before one-half hour after sunset will be declared off.

Courses.—The courses are indicated and described on the Glen Cove racing chart, and are distinguished by numbers and by letters indicating marks. If a different course from those described on the chart is selected, the committee will signal the course by setting code signals designating the marks in the order of rounding.

Course Signals.—The courses for the fleet divisions will be shown before the preparatory signal is made by displaying each division letter and the course number (or code signals indicating the course).

If a course is to be sailed twice around, the course number (or code signals) will be set above figure 2.

Division A, Classes.—A, B, C, D, E, F, G, H, J, K, L, "fifties"; M, N, P and New York Y. C. "thirties."

Division B, Class.—Sound schooners.

Starting Signals.—Attention will be called to each signal by a gun or whistle. A starting signal will be the preparatory signal for the next class to start.

12 M.—Warning, one white ball.

12:05 P. M.—Preparatory, blue peter ball.

12:10 P. M.—Start for Classes A, B, C, D, E and F, one red ball.

12:15 P. M.—Start for Classes G, H, J, K and "fifties," two red balls.

12:20 P. M.—Start for Classes L, M and N, three red balls.

12:25 P. M.—Start for Classes P and New York Y. C. "thirties," four red balls.

12:30 P. M.—Start for Sound schooners, five red balls.

All starts will be "one gun starts."

Recall Signal.—White ball with red band. The committee will hail the yacht, but failure to set the ball will not relieve the penalty for

having crossed the starting line before the proper signal.

Special Signals.—G, race postponed until later day, at fifteen minutes intervals; H, race postponed for the day; J, race declared off; M, race will finish at this mark.

When at the finish, the committee boat will hoist a red ball; and in fog will, "at intervals of not more than one minute, ring the bell rapidly for above five seconds," and at intervals of two minutes will sound three short whistle blasts.

Prizes.—There will be a prize for first, if two or more start; a prize for second, if four or more start; and a prize for third, if eight or more start in any class.

New York Y. C. fifties, thirties and Sound schooners will sail as one-design classes under their respective class rules.

The New York Y. C. course cups, offered by Commodore James Gordon Bennett, in 1871, for yachts enrolled in the club, will be sailed for under the deed of 1909, in addition to the class prizes offered by the club. A cup for schooners and a cup for single-masted vessels and yawls. Yachts competing for these cups will sail at their rating measurements.

Extra copies of these sailing directions, or charts of the course, may be obtained from the regatta committee at the club house.

H. DE B. PARSONS, Chairman.

J. M. MACDONOUGH,

C. SHERMAN HOYT,

Regatta Committee.

### Dream Wins Bermuda Race.

DREAM, owned by Commodore Chas. E. Lagen, of Philadelphia, with a handicap of 16h. 44m. 36s., won the Philadelphia to Bermuda race and finished June 11. Her time for the 734 miles was 87h. 25m. The scratch boat Barbara II, owned by Vice-Commodore W. H. Duncan, of the Staten Island Y. C., arrived first, but owing to her tremendous handicap, was given second place. A return race will be run to the Crescent A. C., of Brooklyn, for another prize. This is Dream's second consecutive win in the Bermuda race.

### New Courses at Larchmont.

LARCHMONT, Y. C., June 14.—Sixty-two yachts were entered last Saturday. The winners were Elena, Grayling, Josephine, Elemah, Okee, Moira, Sally IV., Redwing, Natoma, Mignon, Festina, Loon, Mlle. Boss, Snake and Virginia in their respective classes. The summary:

Schooners, Class B—Start, 1:25—Course, 21 Miles.			
Elapsed.	Elapsed.		
Irolita .....	3 04 38	Elena .....	2 52 15
N. Y. Y. C., 50ft. One-Design Class—Start, 1:30—Course, 9½ Miles.

**Marblehead Corinthian.**

MARBLEHEAD, Mass., June 14.—The new boats had their innings in the North Shore championship races held by the Corinthian Y. C. to-day.

On her first appearance, Vernon F. West's 31-rater, Sayonara II. got a good start toward this year's leg on the Lipton cup of Massachusetts Bay. Charles P. Curtis' sonder Ellen made her maiden effort and won her race with a good margin. Vera III., owned by H. Lundberg, won from Mildred IV. in the Bar Harbor class. The summary:

Class P—31-Raters.			
Corrected.		Corrected.	
Sayonara II. ....	2 05 17	Monataqua .....	2 05 40
Amoret .....	2 05 26	Stranger .....	2 07 43
Italia .....	2 06 35		
Bar Harbor 31-Raters.			
Elapsed.		Elapsed.	
Vera III. ....	2 09 45	Leelane .....	2 10 35
Mildred IV. ....	2 10 25	Cricketer .....	2 11 06

Diana .....	1 13 25	Vanessa .....	1 44 40
Cabbage .....	1 13 05	Berenice .....	1 30 25
Flutterby .....	1 24 20		

**Southern Y. C. Second Regatta of 1913.**

BY OUR STAFF CORRESPONDENT.

In a remarkable reversal of form, either of her sailing abilities or her captain's seamanship, the machine sloop Massachusetts, the Northern cup defender, decisively defeated Stranger over the Lake Pontchartrain triangular course of the Southern Y. C. at New Orleans, Saturday, June 7. I say "reversal of form," because on the Saturday previous Stranger even more decisively sailed away from Massachusetts. In their second race Stranger made a poor fourth, and possibly would have been fifth had not Senorita been withdrawn.

	Start.	Elapsed.	Corrected.
Kathryn .....	2 32 12	3 09 10	3 07 51
Senorita .....	2 33 14	Withdraw.	
Massachusetts .....	2 34 07	3 02 03	3 02 03
Seawanhaka .....	2 34 22	3 17 18	3 16 15
Stranger .....	2 35 22	3 24 40	3 23 08
Target .....	2 46 36	3 12 25	3 12 25

Seawanhaka, the old-time champion of the South, and of which more was expected, finished a bad fourth, and evidently is entirely outclassed by the new machine sloops which were brought here especially for the 1913 season.

**POWER BOAT CONTESTS.**

While the machine sloop race was interesting to those who know and appreciate the fine points of sailboats and their handling, the majority of the crowd at West End were drawn by the promise of good races among gasoline craft. In this they were disappointed to the extent that only one race had as many as three entries, and that, as a result of a dispute over the class of the speedy Maid of Orleans, her owner, E. L. Jahncke, threatens to withdraw from the club after having been a member for about ten years. Osprey, Beatrice and Violet entered in this race. The time was slow, though the water was smooth, and there was no head wind. Violet, however, had four minutes' handicap on Osprey, and on corrected time beat the latter boat by 1m. 59s. Beatrice came in 19s. behind Osprey on corrected time. The summary:

	Start.	Finish.
Osprey .....	4 10 17	5 13 08
Beatrice .....	4 10 24	5 19 02
Violet .....	4 11 11	5 15 49

Interest in the regatta, however, was centered around the event for racing motor boats, but the speed produced in this class also was disappointing, as four boats—Sterling, Belladonna, Oriole and Kitsey—were found on measurement to belong in three classes. Belladonna and Kitsey were entered in Class S, but Belladonna shipped water on one of the turns as she passed another boat, and her engines were put out of commission. Leonard K. Nicholson, one of Belladonna's owners, was thrown from the boat, and she lost ten minutes picking him up, in addition to the disaster to her engines. Belladonna's trouble left Kitsey alone to finish Class S.

Class R, Sterling, racing alone, made the course in 49.22, while Class T, composed of Oriole I, made the rounds in 51.10.

The following table shows the actual elapsed and corrected times of the eight motor boats which finished in the races Saturday, according to the timing system of the American Power Boat Association:

	Elapsed.	Corrected.
Osprey .....	1 02 51	1 02 51
Beatrice .....	1 08 38	1 03 10
Violet .....	1 04 38	1 00 52
Elizabeth .....	0 54 24	0 54 24

Sterling .....	0 49 22	0 49 22
Oriole .....	0 51 10	0 51 10
Kitsey .....	0 41 02	0 41 02
Maid of Orleans .....	0 40 49	0 40 49

On Sunday, June 8, the unfinished sailing races from the last Saturday in May were run off at the Southern Y. C. Two classes—knockabouts and cabin sloops—sailed. The cabin sloop Agnes, owned by Abe Leverich, beat Albatross by nearly 19m. corrected time, also defeating the knockabout Rascal by almost 2m.

The following table shows the elapsed and corrected times of Sunday's races:

	Start.	Elapsed.	Corrected.
Agnes .....	3 05 35	2 17 48	2 17 48
Albatross .....	3 04 04	2 38 24	2 36 49
Sinner .....	3 01 50	Withdraw.	
Juanita .....	3 02 44	Withdraw.	
Rascal .....	3 01 32	2 19 22	2 19 22

**Mar-Windor Wins at Hingham.**

HINGHAM, Mass., June 14.—Mar-Windor, owned by C. M. Scudder, was the winner of the Hingham Y. C. races for one-design 15-footers, held off this station this afternoon. The summary:

	Elapsed.	Elapsed.	
Mar-Windor .....	1 33 45	Polly-Wog .....	1 45 00
Puzzle .....	1 34 00		

Mischief, C. A. Randall, fouled the turning buoy and withdrew.

**Michigan City—Chicago.**

MICHIGAN CITY, Ind., June 14.—*Editor Forest and Stream:* The classic of the Great Lakes, the annual race from Chicago to Michigan City, Ind., was won to-day by the 65-foot schooner Valmore, beating Polaris only by six minutes. Michigan and Mavourneen tied for third. Forty-three yachts took part. The winner's time was 3h. 31m.

**A. C. A. Membership.**

**NEW MEMBERS PROPOSED.**

Atlantic Division.—Alan S. Young, 36 St. Paul's Road, Ardmore, Pa., by Frank T. Wilson.

Central Division.—Lewis J. Davey, 505 Winsor street, Jamestown, N. Y., by L. T. Coppins; Harry W. Wohlers, 622 Chamber of Commerce, Buffalo, N. Y.; Frank T. Day, 762 Elmwood avenue, Buffalo, N. Y., and B. P. Toles, Fidelity Building, Buffalo, N. Y., all by J. H. Teach; Fred. Rose Gildersleeve, 466 Biddle avenue, Wilkinsburg, Pa., and Clarence Sidney Harris, 543 Penn street, Verona, Pa., both by F. D. Newbury.

Western Division.—Benjamin R. Belsley, 125 Maplewood avenue, Peoria, Ill., by G. R. Baumbach; Kenneth D. Clark, 5121 Kimbark avenue, Chicago, Ill., by Arthur E. Sunny; Frank L. Pinckney, Y. M. C. A., Oak Park, Ill.; Fred N. Legerstrom, Dundee, Ill.; Frederick L. Rainbow, Jr., Dundee, Ill., and W. F. Demien, Dundee, Ill., all by T. C. Angell; William L. Graening, Dundee, Ill., by H. L. Boynton; Frank C. Wright, 914 East Sixty-sixth street, Chicago, Ill., by Robert F. Abercrombie; A. D. Mayer, U. S. Naval Academy, Annapolis, Md., by J. K. Hand.

**NEW MEMBERS ELECTED.**

Atlantic Division.—6678. Samuel S. Whyard, 969 Summit avenue, New York city.

Central Division.—6675, James E. Murray, 341 Barnes street, Wilkinsburg, Pa.; 6676, S. Arthur Hazen, 5627 Rural avenue, Pittsburgh, Pa.; 6677, E. R. Albrecht, 302 Gray Building, Wilkinsburg, Pa.; 6679, Adolph H. Knodel, 826 North State street, Syracuse, N. Y.

**CORRESPONDENCE**—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

**SUBSCRIPTIONS:** \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

**ADVERTISEMENTS:** Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

Entered as second-class matter at the Post-Office, New York, N. Y.

### MANY MEN OF MANY MINDS.

A WEST VIRGINIA correspondent wrote the other day in criticism of the New England mode of fox hunting, which is to drive the fox by dogs within gun range and then to shoot it. The West Virginia view was that this was not sportsmanlike, but that the better way was the one pursued in the South, of driving the fox with hounds until it is overtaken and killed by dog or huntsman. And in illustration of truly sportsmanlike fox hunting, two famous cases were cited. In one thirty hounds started a fox in the morning and kept him going all day until eight dogs having stayed in to the finish, at the end of thirteen hours, the fox was overtaken and killed. In the other case cited three hounds having started a fox on a Saturday morning went out of hearing of the hunters who had put them out, and ran the fox until sundown next day—Sunday—when, at a point of seventy-five miles from the start, being cheered on by three men who had been attracted by the cries of the chase, "the dogs quickened up a bit and caught the fox. All fell in a heap and could not be persuaded to move a step." Whether the fox died of exhaustion or not is not told. In this case it appears that the sportsmanship consisted in starting the dogs on the trail of the fox and leaving them to do the rest; to keep up the hunt through the night while the huntsman was asleep in his bed at home, and during Sunday while he was in church and enjoying his Sunday dinner and his siesta. It would be more nearly accurate to say, however, that while this incident affords an illustration of the extraordinary staying powers of fox and hound, it is not a typical Southern fox hunt, in which the hounds are followed by mounted huntsmen, and the enchantment of the sport is found in the glorious cross country riding.

When a fox hunter, by which is meant the rider to hounds, contemplates the New England mode of hunting the game with dogs and gun—where the hunter concealed behind the stone wall shoots the fox when it comes within range

—he very naturally decries and condemns the sport because it is in all respects so different from his own hunting. And on the other hand the fox hunter of the New England hills, where riding to hounds is unknown and for many reasons impracticable, makes an equally strong argument in advocating his methods as the one best adapted to local conditions and affording abundant satisfaction in its successful, or on occasion unsuccessful, pursuit.

### TRAPSHOOTING AS A GAME CONSERVER

HAS it ever occurred to you, who are interested in protection of game, to what extent the development of trapshooting works toward bird and animal preservation? It is a fact, unopen to question, that a man who has good health, is largely carnivorous, and that the animal in human nature compels the destruction of something. Sometimes the destroying of the social system, sometimes the killing of birds and animals, but always destruction of one kind or another.

Practice with revolver originated through desire to kill in case of attack by the marauding human. Rifle practice was first taken up with intent to kill animals, and finally trapshooting at clay targets was to whet skill's edge for bird shooting. As the man in each of these lines of marksmanship became more and more expert, he sought competition among his fellows—the pistol shooter forgot the burglar, the rifle man sought other marksmen for a match, the trapshooter became infatuated with the high art required to break "a hundred straight," and his interest in field shooting became a long deferred hope, as he went from place to place in quest of a match at clay discs, and before he knew it, that vacation he had intended to devote to bird shooting had been spent in "killing" the artificial, and conservation had gained a hundred-fold. The desire to destroy had been satisfied at no cost to nature, and at a handsome profit to the manufacturer of clay targets, arms and ammunition. Men had benefited in health and skill, their red corpuscles increased immeasurably and destroyed no living thing, whereas, had it not been for the present perfection of traps and clay pigeons and the promotion efforts of the Interstate Association in making trapshooting attractive, the fields and bird covers during shooting time would be over-run with gunners seeking to satisfy the animal—to destroy for the sake of destroying. And so it is that the inanimate bird has to a great extent superseded the animate.

### AN ILL FLOOD THAT BRINGS NO GOOD.

To paraphrase Walter Floyd, of Indiana, "It is an ill flood that does nobody any good." When the waters of the rivers tributary to the Ohio were submerging Dayton, Columbus, Hamilton and other cities, the farmers living below the falls at Louisville spent the most of their time chuckling, for although properties were flooded, alluvial deposits of greater value than any purchased from dealers in the form of fertilizers would come to them from the turbulent waters.

When the muddy waters of the Ohio swept over their farms, the agriculturists of Southern Indiana camped upon high ground, lighted their pipes and smoked the product of the hillsides

across the river without a thought other than that an observing Providence had provided an unexpected boon.

Corn was knee high in two weeks, according to report. Nothing approaching the remarkable growth of vegetation along the Ohio River has been recalled within the memory of anyone now living. The big flood which swept away the habitations of the people of Columbus, Dayton and Hamilton, brought to the people of down river points fertilization of inestimable value. And so the wind was tempered to the shorn lamb.

### VACATION.

THE early spring trout fishing is over, and summer trips are now beginning. Yachtsmen have fitted up their boats, and now every spare moment is spent on the water, preparing for races or cruises to take place during the next three or four months. Until the summer is well over, the sports of the water will be the only ones presenting themselves to most readers of FOREST AND STREAM, but close upon them will follow trips into the mountains for big game, the strenuous climb after mountain sheep and goats, the careful stalk of the sleek deer and the high-fronted bull elk. As the heat of summer wanes, men will begin to get their dogs in condition, and the covers of the East and the prairies of the West will be crossed and re-crossed by the active ranging beauties, and the flat crack of the shotgun, with its smokeless powder, will awaken echoes all over the land. Later still, when sharp frosts have killed vegetation North and South, and the air is bracing and the ground rings hard under the foot, quail and ruffed grouse will be followed, and from the North will begin to appear the wildfowl, sometimes in such numbers as to almost darken the skies, and then as it grows colder and colder, and winter is at hand, the duck shooter's time has come, and hidden in blind or battery he takes toll of the swift-flying birds that dart to his decoys.

There is a wonderful variety of fur and feather and fin in this broad land of ours, and if population, civilization and progress have covered much of it so thickly that there is no longer place there for the wild creatures that we love to pursue, yet there still remain many spots, far from the haunts of man, where good shooting and fishing may be had. In all directions the country is traversed by railroad lines, anxious to give good service to the sportsman, and to induce him to travel over their roads. Of steamship lines the same is true.

### THE RESULT OF RESULTS.

A VALUABLE lesson can be learned from the following figures, which show how FOREST AND STREAM advertisers, after years of experience and an expenditure of thousands of money, class the sportsmen's magazines as advertising mediums. The table, compiled from Printers' Ink, gives the total number of agate lines of advertising carried by five outdoor magazines during May:

Publication.	May, 1913.
1. Forest and Stream.....	17,099
2. Outing Magazine .....	16,632
3. Field & Stream.....	15,064
4. Outer's Book .....	12,936
5. Outdoor World .....	9,984

Forest and Stream is the official organ of the National Archery Association.

## How to Learn Archery

By W. H. WILLS

(Concluded from last week.)

**A**NOTHER essential from which the attention cannot be released a single moment is the management of the bow hand. This must be held absolutely firm. And this doesn't require bull strength, unless the archer is over-bowed; i. e., using a weapon beyond his strength. Grasp the handle lightly at the beginning of the draw and keep it so till the moment the draw is being completed; then squeeze the handle as if you would crush it. That produces rigidity all through the left arm and will maintain this rigidity till the arrow is gone. Don't relax the squeeze and drop the bow hand the moment you loose; that is sure to result in dropping the arrow and spoiling the shot. Keep the pull on the string fingers till the loose, and keep the bow hand firmly extended till the arrow is well gone. Never take the attention from these cardinal points.

Now comes the point of aim. Since the arrow cannot be "sighted" like a gun barrel, on account of the acute angle it makes with the line from eye to object, the aiming must be from the tip of the arrow to the object. The object is a relative one. If fifty yards is the distance, with a fifty-pound bow the arrow should fly nearly horizontal, so that in aiming the bow hand must be depressed till the steel finds a point on the ground this side the target which will make the shaft about parallel with the ground. The exact spot depends on the strength of the bow and the archer's skill. It must be found by experiment.

To shoot sixty yards, the point will be nearer the target, as the arrow will describe a low arch, and to shoot 100 yards there is a decided trajectory, and the point of aim will lie above the target on some object in the background. In all cases, whether on the near or far side of the target, this object must be in line with the gold of the target, and in elevating to the point of aim the arrow should take a straight upward line. In drawing, do not start out of a straight line, so that you will have to swing around in a curve.

The arrow, as has been said, should be drawn to the steel pile. The length of the arrow should be such that when it is full drawn this will be the case. For the man and woman of average arm length, twenty-eight inches and twenty-five inches, respectively, are right. Rarely does one require longer arrows, but many short-armed persons take twenty-seven and twenty-four inches, respectively.

The "game" is simple. For men there is

the York round—six dozen arrows at 100 yards, four dozen at 80 yards and two dozen at 60 yards; and the American round, distinctive to this country, consisting of ninety arrows, divided equally at 60, 50 and 40 yards. For women the National round—four dozen arrows at 60 yards and two dozen at 50—corresponds to the York, while their short range is the Columbia round, seventy-two arrows divided at 50, 40 and 30 yards. The English do not recognize the short ranges, and in this country there is a lively dispute between the advocates of long and short range shooting. From personal experience the writer, who has been accredited with having made very rapid progress to the first rank, would recommend the beginner to shoot at 50 yards, if a man, and 40 yards if a woman, until fair facility in handling the implements has been attained; then stick to the long range. This is on the theory that having become able to hit the target at the long range, the short ranges follow as a matter of course.

The values of the colors on the target are as follows: Gold, 9; red, 7; blue, 5; black, 3; white, 1. If all six arrows at an "end" hit the target, one on each color, that "end" would be scored thus: 6-25, meaning six hits, 25 points. An arrow on the dividing line between two colors counts for the higher. If an arrow rebounds, or passes entirely through the target, under American rules, it counts 5. To compute a score simply add up the "ends." A beginner should get a blank book and from the start keep his record. It will afford him much satisfaction some day.

### New York Archery Club.

THE archery tournament in Wanamaker's store, New York, June 10 to 14, under the auspices of the New York Archery Association and FOREST AND STREAM, was more successful than its most sanguine well wishers expected. The Wanamaker concern was much interested by the increase in calls for archery tackle recently, and conceived the idea of boosting the cause by this public meet. The Wanamaker store gets its archery supplies from E. I. Horsman Company, the veteran archery goods headquarters. W. H. Wills, President of the New York Archery Association, superintended the matches, and was on hand part of the day during the week.

The prize contested for was a handsome cup, given by FOREST AND STREAM, which was on display during the week. The meet developed

some unusually good archery talent. None of the contestants had ever handled bow and arrow before, but at the rate at which they mastered the rudiments of the sport and improved their scores from day to day was highly creditable. The shooting for the cup took place Saturday forenoon, and was confined to those who by their four days' record had qualified. About twenty-five got on the eligible list, which was surprising, seeing that the standard was fairly high.

Saturday's contest quickly narrowed down to Edwin L. Malone, 332 East Seventeenth street; H. L. Towle, 12 West Eighth street, and Charles Tisdall, of the Victoria Hotel. Mr. Malone finished first with a score of 23-157; Mr. Towle second, with 23-137, and Mr. Tisdall third, with 21-129. Mr. Malone accordingly received the cup.

Those who deserved honorable mention were Miss Sadie Davidson, 43 West Seventy-fifth street; Miss Frances Smith, 605 West 156th street; E. T. Vandewater, 403 East 115th street; S. S. Colodney, 2122 Eighty-third street, Brooklyn; Mrs. Hattie Darling, 210 West Seventy-eighth street; Miss Margaret Desmond, 62 Madison avenue; C. R. Cockey, Ridgewood, N. J.; L. Strauss, Far Rockaway; H. R. Goldberg, 205 West 142d street, and C. A. Frutchey, of the Park Avenue Hotel.

Not only was the week's shooting participated in by an unexpectedly large number of ladies and gentlemen, but a still larger crowd was always on hand to watch the shooting. The occasion was successful in every way and has furnished a number of very promising young archers as members of the New York Archery Association, whose season is now under way.

Anyone interested in joining the association should communicate with W. H. Wills, 116 Nassau street.

### Now I Wonder About That!

BOSTON, Mass., June 15.—*Editor Forest and Stream:* If memory serves, we read in history that the archers of Rameses drew to the ear, while the Greeks drew to the chest. The 'Gyptian won out because those extra inches gave the longer range, even as Togo swatted the Russ. Also, the English at Crecy and Poitiers were to-the-ears drawers, were they not? An artist would picture such drawing to the eye. Once I saw a man whose arrow hand went back level with his hat brim and seemed to circle his ear before loosing, and he was pin-cushioning the gold right along at about 100 yards. His shaft was apparently level with his eye at loose. I heard a man say admiringly: "He's a splendid archer." He certainly got scores. I wonder if I have misread Mr. Wills? If so, others may also.

JOHN PRESTON TRUE.

# Notes on Bow Making

By JAMES M. CHALLISS

(Concluded from last week.)

AS soon as this dries it should be dressed on the sides and edges so as to make it nicely rounding, and the belly at this point should be rounded into shape for the handle. As stated in the former article your finished bow will vary between an inch and an inch and a quarter, at the largest part of the limb, depending upon the wood being used. The handle must be larger than the largest part of the limbs, so there will be no bending there. When you have shaped the handle, you must put on a whipping of very stout cord or cotton tape, starting well outside the ends of the joint, winding close, smooth and as tight as your whipping will allow. The whipping should be laid on in glue, and if it will not make the handle too bulky, there should be at least three layers of it. There is a severe strain on this joint, and you cannot make it with too much care or too strong. The more whipping you put on and tighter you draw it, the stronger will be your joint. Let the glue in this whipping dry at least a week before you attempt to brace the bow, which of course you have not attempted heretofore. The bow will be finished the same as a one-piece bow, excepting the handle will receive two coats of varnish to make it waterproof.

The backed bow is a most excellent weapon, and one in which hickory demonstrates its peculiar merit, as most all backed bows are made with such backs. Yew of course is preferable, but is not to be had excepting by the elect. The backed bow is made of two different varieties of wood, the belly of one kind, the back of another. The belly may be all one stick or it may be grafted as described above, excepting there will be no thin piece glued on the back of the joint to make the handle; glue it on the back opposite the handle. To make such a bow, secure a piece of well-seasoned, straight-grained, second growth white hickory of the width and length you want your bow. This is to be planed perfectly flat and smooth and reduced to three-sixteenth inch in thickness. Excellent backs may be secured by procuring from a carriage maker or hardwood dealer a buggy coupling or reach. These are six feet long and one and a quarter inches square. By looking over a large stock you can most likely find one in which the grain is straight and even and does not run out, which when taken to a planing mill and ripped on a sharp circular saw will afford material for three or four backs. Be sure the saw is sharp; if not, the heat from it will warp the strips. Carefully dress the back you select with a fore-plane, seeing that it is the same thickness throughout. The belly will be made along the lines indicated for making a self bow, excepting it will be all of heart wood, and will not be as thick as a self bow. It should be as wide as the back for fourteen inches on either side of the handle. It is not advisable to taper it at all until the back is glued on. The back of the belly should be planed smooth, true and straight, and upon this true surface the back is to be glued. The back of the belly and the under side of the back should be scored by combing them with

the teeth of a fine saw. There are planes made for this purpose, but a saw will answer very well. This is done for the purpose of making the glue hold better. The glue must be of the best, in perfect solution, and applied boiling hot. As soon as it is applied to all portions of the surfaces to be glued, immense pressure must be applied to the two pieces to force out all excess glue. This pressure may be applied by clamps or wedges. If clamps are used, lay the bow back down on a two-inch board and apply as many cabinet makers' clamps as you can borrow, beg or steal. One every six inches is not too many. If your belly is thin and flexible, the clamps must be closer together than if it is more rigid. If you wish to use wedges, nail two two-inch boards on your bench parallel to each other and about three inches apart. Provide a series of short double wedges for the entire length of the bow, and so arranged that the small square end of one is snug against the large end of the next one and so on. By driving the end wedge, all are thus moved, and a uniform pressure is exerted throughout the entire length of the bow. The back of course is against one of the boards, and the wedges are applied to the belly. Another method, used by the professionals, is to provide a series of strap iron loops on the edge of a board the same thickness as the bow and drive wedges under these loops, or rather between the loops and the belly of the bow. Immense pressure is the secret of any good glue joint, and if you keep this constantly in mind and apply pressure at every available point, and by every means at hand, the result will justify the pains. The bow should not be taken out of the clamps for at least a week in order to give the glue a chance to thoroughly dry, and after taking it from the clamps, it should dry for a few days before you attempt to brace it. Dress down and finish as for a self bow, excepting you will do no work whatever on the back, save rounding the corners and sandpapering it. The belly must be shaped so that when the bow is braced, the back is flat and smooth and without any twist. A backed bow should always be provided with horn tips and protected from dampness by three coats of good varnish, well rubbed.

## The Wrists.

BY ROBERT P. ELMER.

It is probable that all skillful archers hold the wrist of the left, or bow hand, perfectly rigid. In fact, I do not see how they could do otherwise, because it forms an integral part of the line of support from the bow to the shoulder which should act as a strut during the act of aiming and loosing.

With the right wrist it is different. Here the aim is not a straight rod braced to receive a shocking stress, but is rather a combination of two levers and a hook. The levers are the upper arm and forearm acted on by the scapular muscles and biceps, and the hook is the hand. It is my opinion that except when opening the fingers for the loose, the hand should act simply

as an inert hook following obediently and without modification the pull of the forearm at the wrist joint. This can be accomplished only if the wrist be allowed to remain soft and pliable. It is the mode of the violinist who retains perfect control of the violin bow with a wrist which is all suppleness, and who loses that control if it be allowed to stiffen.

A deflection of the arrow is often caused by a lateral tug given to the string at the moment of loosing. This will seldom happen unless the wrist be stiff, as anyone can prove to himself by trying. With a limp wrist, the hand will naturally pull directly backward in the line of the shaft.

It is not easy to acquire sufficient muscular control to allow a relaxation of this joint in the arm when all the others are in a state of great strain. Nevertheless the trick can be learned, and if consistently applied, will nearly always add to one's powers.

## English Archery Meets.

THE following English scores are taken from The Field, for May 24. We hope that our archers will not fail to notice that archers abroad do not hesitate to report their scores because they are not always high. We should be as good sportsmen as they:

### CHELTENHAM ARCHERS.

Target meeting, May 15.

	60yds.	50yds.	Total.
Miss Legh .....	38 178	24 150	62 328
Miss O. Newall .....	37 177	22 110	59 287
Miss Browett .....	37 169	21 117	58 286
Miss Newall .....	36 148	19 95	55 243
Miss May Williams .....	29 135	14 68	43 203
Mrs. Bagnall-Oakeley .....	31 119	17 71	48 190

### BERKELEY VALE ARCHERY SOCIETY.

Target Day, May 19.—Weather fine, very cold, with a high wind.

	60yds.	50yds.	Total.
Mrs. C. Chester-Master .....	39 171	20 108	59 279
Miss Vaughan .....	12 56	11 51	23 107
Mrs. Jolly .....	12 40	10 42	22 82
Mrs. Lloyd .....	12 26	11 29	23 55
Mrs. Harle .....	7 33	1 1	8 34
Miss Butler .....	2 10	4 10	6 20

### ROYAL TOXOPHILITE SOCIETY.

Extra Target, May 22.—Fine.

# TRAP SHOOTING

Forest and Stream is an Honorary Member of the Interstate Association for the Promotion of Trapshooting.

## Directors and Honorary Members of the Interstate Association

**MURRAY BALLOU,**  
American Powder Mills.

**T**HE Interstate Association was incorporated Dec. 23, 1892, under title Interstate Manufacturers and Dealers' Association. Its incorporators were: George H. Sampson, Chas. Fatham and John A. H. Dressel

The first Grand American Handicap at targets, the one from which the present, number 14, dates, was shot June 12 to 15, 1900, at Interstate Park, New York. A summary, as applied to the Interstate management of the event, written by Bernard Waters, then trap editor of FOREST AND STREAM, is interesting:

"The shoot ran from start to finish without a hitch. Every part came in prompt sequence. The organization as to departments and details was complete. Elmer E. Shaner was manager, and he superintended the tournament with the skill and competency for which he is noted. The cashier's office was in charge of Mr. A. H. Meyerhoff, assisted by Mr. J. K. Storr. Mr. J. D. Regan was compiler of scores, a position which he was well fitted for by reason of experience and ability in a similar office at G. A. H., and he was ably assisted by Mr. H. H. Stevens.

"The referees and scorers were as follows: At No. 1 set of traps: Mr. H. P. Fessenden referee; Johnnie Fleming scorer, H. L. Merrifield messenger. At No. 2. Chas. E. Mink referee, W. H. Purcell scorer, Mr. A. Lavigne messenger. At No. 3: Mr. Philip O'Brien referee, Mr. Wm. Everhard scorer, Wm. Cox messenger. At No. 4: Mr. H. A. Kerr referee, Mr. W. M. S. Dobson scorer, Mr. Fred Keating messenger. Mr. F. C. Snyder was squad hustler for Nos. 1 and 2. Mr. Charles North for Nos. 3 and 4. Mr. John Wright, of Pittsburgh, was blackboard man, and the neat lettering of the names on the board was pleasing to gaze upon, and quite plain as printed copy.

"The handicap committee as originally formed had for its members Messrs. Jacob Pentz, E. E. Shaner, W. R. Hobart, W. K. Park and B. Waters."

From the first tournament up to 1906, when Indianapolis held the event for the second time, there was a steady increase in attendance. Chicago boosted it back into popularity in 1907, and on the return engagement, two years later, raised their own record by one, which was the biggest shooting attendance until the present meet, which at time of going to press is far and away beyond anything previous.

Riley Thompson holds the record for high score, with 190 straight, made in Chicago in 1910. Last year's winner, W. E. Phillips, broke % out of 100.

The Grand American Handicap, while one of the great developments of the Interstate Association, is but a detail of the tremendous work it has done for clay target shooters. Briefly, this work is similar to that of the Amateur Athletic Union, only a great deal more thorough and dependable.

The officers and directors of the Interstate Association are able, unbiased and non-partisan, and while each group represents a different manufacturer, no attempt is made by any member to detract from the value of products of others. The combined efforts of the Association is toward development of trapshooting and to keeping up its present high standard. The mixed ale shoot has had its day, and there is no place for the rounder in trapshooting; so long as the Interstate puts its name on a shoot, every one is assured of a square deal. The club that does not know for what the hall mark of Interstate Association stands should immediately write for particulars.

Speaking of photographs, we sent a request to every officer and director of the Interstate Association, the backbone of trapshooting development, and to every publication that is an honorary member, and whose publicity keeps the work of the Interstate Association before the trapshooting world, for photographs to run in this issue. That all trap editors and directors are not shown herewith must be charged to the gentlemen who have not sent photographs as requested. We regret our inability to make this souvenir number complete, as we feel it would have been had every one complied with

There never has been a repeat, and we predict a new name will be added to the list this week.

**Where the G. A. H. Will be Shot.**

**HISTORY OF THE N. C. R. GUN CLUB, DAYTON, O.**  
(From Forest and Stream, March 1, 1913.)

Late one Saturday afternoon in April, 1909, three tired but happy snipe hunters sat on a log in the Big Beaver Swamp, resting from their tramp through the swamp. They had shot a few of the flavory jacksnipe, but, best of all, they had fully enjoyed the pleasure and companionship of several hours in the glorious outdoors, with the warm sunshine, green grass and wild flowers, the many robins, thrushes and other song birds chirping and flying back and forth, and the fresh, balmy air of spring (nature at her best). How their red blood had tingled whenever a wily jack rose suddenly from some grassy tuft, and with a shrill "skack" darted away like a flash on his zig-zagging course across the swamp. These men—Harvey L. Monbeck, Fred W. Oswald and W. F. MacCandless—employees of the National Cash Register Company, were regretting the fact that it was the last Saturday afternoon of the open snipe season, and that they could not be together outdoors for any shooting until the next fall. Suddenly the idea occurred of forming a shotgun club to shoot clay birds on Saturday afternoons. Harvey had taken a very active part in trapshooting for over sixteen years. Fred was also a well-known amateur shooter with several years' experience on the firing line. "Mac" had never shot in any blurock shoots, but he recalled how, when a boy of twelve, he had once or twice crouched in a large box and loaded an expert trap while some men "boomed" at the targets with black powder shells. However, for years he read and admired the scores made by "Pop" Heikes and other leading shooters. They talked of plans for a club all the way home, and the next week they began trying to interest the shooters among their fellow workers. On Thursday evening, May 29, Monbeck, Oswald, MacCandless, C. A. Sheets, W. G. Souders, Frank Oswald, J. S. Neff, W. C. Breen, E. Allen, J. L. Shropshire, C. B. Wertz and G. R. Schoenberger met and organized a club; as they were all employees of that company, they named it N. C. R. Gun Club. Each of these twelve men contributed \$1 to the first treasury fund to buy loaded shells and targets. The officers chosen were: President, Wertz; Captain, Monbeck; Secretary, Sheets; Treasurer, Fred Oswald. On the following Saturday afternoon, May 22, the club's first shoot was held, using two expert traps, which Monbeck had owned for several

*You and a Remington Dealer  
Ought to Get Together*

**Y**OU will be buying ammunition to-day or to-morrow—shot shells for trapshooting or metallics for target work. It would pay you to look into the whole ammunition question.

One thing you will find universally true, whether it is the alert dealer you are talking with, or the keen sportsman of your section.

The better qualified a man is to speak authoritatively the more surely you find his interest centered on REMINGTON as *the* live issue of the ammunition world to-day.

You will find, too, that the dealer who is making the biggest dent in the ammunition business of your community is the one who is specializing in Remington-UMC—who carries a full and representative stock.

Talk to your dealer. Remington-UMC is the ammunition you want. See that he can give it to you—the load you need for the kind of game you are after: Remington-UMC shot shells and metallics, not only for Remington-UMC shotguns and rifles, but for every standard make of arm.

**Remington Arms-Union Metallic Cartridge Co.**

299-301 Broadway, New York

years, the company having readily granted permission to place the traps in their field at a safe distance from the baseball diamond. Then three more members were secured, and each of the fifteen contributed \$1, and a second-hand blackbird trap was bought. From then on the membership fee was made \$2, so that all members would be on the same basis.

It had been the company's policy for years to assist and encourage its employees in clean, manly outdoor sports, and they made several baseball diamonds, tennis courts, and a cinder track for foot racing, furnished the equipment and kept everything in fine shape for use on Saturday afternoons, holidays and summer evenings. The company did these things because they not only liked to see their people happily enjoying these games, but they also felt sure that such recreation would make them healthier and more efficient workers. So they gladly built a trap house, firing line and small shelter house, with seats around the sides, for the gun club.

The first part of June, Sheets and Oswald resigned

their offices of secretary and treasurer. W. F. MacCandless was then elected secretary and treasurer, and has been kept in that office ever since. When he accepted the office he told the members that "it was his hopes and aim to help them build up a gun club that would win the respect and esteem of all followers of trapshooting throughout the United States, become one of the most popular and best-known clubs, make this finest of all manly sports more popular, hold the Ohio State shoot, and finally secure the coveted privilege and honor of holding the greatest of all shooting events, the Grand American Handicap. His ideas were instantly and unanimously approved and the club made this standard their goal. He also received the club's approval of his suggestion to publish only the best scores of any and all shooters taking part in their practice shoots and to omit them entirely if they broke less than four-fifths of their targets. That policy brought many beginners into the sport, and been deeply appreciated by expert amateurs, when they had a "bad day over the traps."

H. L. MONBECK, PRESIDENT.

W. F. MacCANDLESS, SECRETARY-TREASURER.

The club announced that all shooters were invited and welcome to enjoy the sport with them every time they had a shoot. Rolla ("Pop") Heikes came out to their second shoot, gave them encouragement and splendid advice. He was made an honorary member, and has been their guiding star ever since.

The first New Year's shoot was held over that one trap on Jan. 1, 1910, and over sixty shooters were present. The latter part of May, 1910, the company granted the club a new location in the southeastern part of N. C. R. Field and started building a roomy, comfortable club house, large, concrete trap house, gravel firing line and a suspension foot bridge over the canal. As the club's membership had increased and they were entertaining a large number of shooters every Saturday, the Ohio Electric Railway was induced to make a regular stop (for both city and interurban cars) at the foot bridge,

thus bringing shooters within 30 yards of the club house. On July 2, 1910, the opening shoot was held on the new grounds, E. A. Deeds, general manager of the company, firing the first shot by request of the club, and scoring a "dead bird."

The club installed a new western McCrea trap, and many large pleasant shoots were held. Wertz resigned in September, 1910, and H. L. Monbeck was chosen president, and still holds that office. Harvey well deserves that honor, as he has been one of Ohio's best-known amateurs for over twenty years, and has done a great deal to build up and encourage trapshooting. Sheets, a big, jolly fellow, and a crack shot, was made captain.

Sixty-six shooters attended the New Year's shoot, Jan. 2, 1911. The club never tried to make money on its big shoots. It has always been in it for "the pleasure of shooting" and the "good of the sport," and always gave every concession and privilege they possibly could, and figured to make their shoots more attractive and enjoyable and less costly to the shooters. The club's membership now included some of the company's officers and several prominent department managers. Such splendid men as Luther J. Squier, Tom A. Marshall, John R. Taylor, W. R. Chamberlain, Fred Gilbert, Lester German and others were visiting them often, boosting them, and part of the club's hopes were being realized.

On June 8, the president and secretary-treasurer were sent to the Ohio State shoot at Columbus, O., to try and secure that tournament for 1912. They had the good fortune to land it, and the club immediately began working to make the event a record-breaker. About seventy shooters attended the third annual New Year's shoot on Jan. 1, 1912. Sheets had resigned as captain the latter part of December, 1911, because of his taking a Saturday course in higher mechanics. S. W. Everett, a prominent amateur, splendid shot, and former manager of the Harshman Gun Club, was chosen captain, and still holds that office.

On March 1, 1912, the office of vice-president was created, and W. F. Bippus, treasurer of the company, was elected to that office. He is still vice-president, and although he never shot a clay bird until July, 1909, he has become one of the club's best shots, is always among the leaders at big shoots, and is a popular favorite with all. As only employees of the company were eligible to join, the club made fifteen of Dayton's leading prominent business men (who had been regular visitors and boosters) honorary members in March, 1912. Such sterling men as F. H. Rike, I. G. Kumlner, J. M. Markham, R. R. Dickey, C. E. Mead and others were included. The company built two more trap houses and firing lines, enlarged the club house and made other improvements to enable the club to properly handle the Ohio State shoot; they also printed the programs, etc.

The club leased an Ideal-Leggett trap, thus making two traps for practice.

One hundred shooters was their mark for the State shoot, but they did better, having 104, 107 and 110 shooting in the Ohio State shoot, June 5, 6 and 7 respectively. That was the largest and best State tournament held in the United States during that year, and was only beaten by the one at Cincinnati many years ago. The club gave \$350 (all the money they had received for advertising and part of their profits on the shoot) to the prize moneys, in addition to the \$300 given by the Interstate Association. All the visiting shooters said it was one of the best conducted and most enjoyable tournaments they ever attended, and they drew up resolutions asking the Interstate Association to send the Grand American Handicap to Dayton, O., in 1913, and here it is, gentlemen.

W. F. BIPPUS, VICE-PRESIDENT.

S. W. EVERETT, CAPTAIN.

**Independent G. C.**

EASTON, Pa., June 14.—The Independent Gun Club held its regular monthly shoot to-day. J. Maurer was high for the Stevens trophy with 24. Cross and Wenner were high for the Du Pont trophy with 23.

The club will hold its next regular shoot on July 12, when G. Cross and J. Maurer will shoot a match for the club's challenge cup. The scores of to-day follow:

Stevens trophy, 25 targets, handicap:			
J Maurer	..... 0 24	W Ivey	..... 2 20
G Cross	..... 0 20	C Eckert	..... 0 14
B Wenner	..... 5 20		

Du Pont trophy, 25 targets, handicap:			
J Maurer	..... 1 22	W Ivey	..... 6 21
G Cross	..... 3 23	C Eckert	..... 0 22
B Wenner	..... 4 23		

Twenty-five target event:			
J Maurer	..... 24	B Wenner	..... 20
G Cross	..... 19	W Ivey	..... 15

N. C. R. GUN CLUB GROUNDS AT DAYTON, O.

New York State Sportsmen's Association.

BUFFALO, N. Y., June 12.—It was a veritable G. A. H. in attendance and interest, nearly 300 crackers being present. J. K. Greene took away high average for three days with 520 out of 550, getting 190 in each 200 event and 140 out of 150. A. E. Conley was second with 517, F. S. Wright third with 514. Among the "for targets only" fraternity J. R. Graham and Bill Crosby tied for upper register with 530, with Lester German on third step with 523. Three teams competed for Dean Richmond trophy, Buffalo Audubon winning with 68 to 67, after shooting off a tie at 69 out of 75 with Onondaga Gun Club. Three teams shot for Greater New York cup. This was won by Buffalo with 183, thus making a tie for the cup with Bergen Beach. As the latter did not enter to-day cup goes to Buffalo on forfeit. The scores:

Table with columns: 1st Day, 2d Day, 3d Day, Ave., Mdse. Lists names and scores for various events like Dean Richmond trophy race, Greater New York cup, etc.

Maryland My Maryland CAN BE CLAIMED BY WINCHESTER Factory Loaded Shells

It's all on account of the way the Maryland State Shoot went. Winchester Shells certainly showed a clean pair of heels in all the events and convinced the believers in the "just-as-good-as" into saying "there ain't any such." Now a recapitulation is in order. Here it is:

J. M. HAWKINS

AMATEUR STATE CHAMPIONSHIP: Won by Dwight F. Mallory, who tied Wm. Holland on 45 x 50, and then made 15 straight in the shoot-off. Both shot Winchester "Repeater" Factory Loaded Shells.

HIGH AMATEUR AVERAGE: (Lexington Trophy) Won by I. E. Eyler, who scored 273 x 300 and 47 x 50 in the shoot-off. He shot Winchester "Leader" Factory Loaded Shells.

HIGH GENERAL AVERAGE: Won by J. M. Hawkins, who scored 281 x 300. He shot Winchester Factory Loaded Shells and a Winchester Repeating Shotgun.

All is now said and it all speaks for Winchester Factory Loaded Shells. It's another voice that emphasizes the good shooting qualities of Winchester shells — the shells that make trap shooting records and hence trap shooting fame. For consistently improving scores

### English Trap Championship.

THE twenty-first annual open clay bird shooting championship will be held at the grounds of the Middlesex Gun Club, Hendon, London, N.W., on June 26, 27 and 28.

First Day: No. 1, the Middlesex Gun Club competition, handicap, 10 birds down the line; prizes, M. G. C. cup and £5 specie; entrance fees, first entry 4/6, second entry 3/6. No. 2, the Shooting Times competition, handicap, 10 birds down the line, right barrel kills count 3, left barrel kills 2; maximum handicap 7 points; prizes, chiming clock and three other prizes; entrance fee 5/.

Second Day: No. 8, the "Trovers and Tyros," handicap, 10 birds down the line; Trovers—class A, prize £5 specie, open to scratch and 1-point men and to all those who have won a prize at the meeting; Tyros, class B, "Walkers Parker" prize and three other prizes, open only to 2-point men and over who have not won a prize at the meeting; entrance fees, first entry, 4/6, second entry 3/6. No. 9, "County Gentleman and Land and Water" event, scratch, 5 pairs of birds, single fire, one from the trench and one from the tower, gun down; Prizes, The County Gentleman and Land and Water gold watch prize, and three other prizes; entrance fee, 7/.

Third Day: No. 14, the "Country Life" competition, handicap (Trovers and Tyros), 10 birds down the line; Trovers, class A, Country Life prizes and three other prizes, open to scratch and 1-point men, and to all competitors who have won a prize at the meeting; Tyros,

class B, Country Life prize and three other prizes, open only to 2-point men and over, who have not won a prize at the meeting; entrance fees, first entry 6/ second entry 4/. No. 15, International shield, scratch, National teams of six, 20 birds down the line; prizes, holdership of shield (value £75), and gold medals, gold star medal to the competitor making the highest score in each team; entrance fee, £4 10s. for each team. No. 16, the C. B. S. A. "majority" competition, handicap, 5 birds down the line, decimal handicapping; prizes, silver cup to be won outright and £25 specie added by the C. B. S. A.; entrance fees, first entry 12/6, second entry 10/. No. 17, the championship competition, scratch, 30 birds down the line, and 10 single fire, 5 from No. 2 and 5 from No.

4 mark; prizes, holdership of championship cup (value 50 guineas), added silver trophy, N. R. A. life membership, and five other prizes; entrance fee, 12/6. No. 18, the bronze star (aggregate), scratch, shot concurrently with Nos. 14 and 17 (first 30 birds only), 50 birds down the line, kills alone count; prize, the bronze star; entrance fee, 2/. No. 19, the gold star (aggregate), scratch, 100 birds; to be won by the shooter whose highest scores for 100 birds included in the aggregates in the bronze star competitions show the largest total of kills; prize, the gold star; free prize to competitors entered for bronze stars.

### Western Pennsylvania Trapshooters' League.

BROWNSVILLE, Pa., June 10.—Ninety shooters put in for the day here, and while scores were not so much, enthusiasm, which like beauty in a woman, covers a multitude of shortcomings, ran high. C. C. Irwin carried the dough bag with 140 out of 150. The scores:

H E Brooks.....	117	*L J Squier.....	126
J W Sherrer.....	119	G E Painter.....	136
*W Henderson.....	112	S M Crothers.....	129

CHARLEY NORTH,

The man who makes the pieces fly.

Badger G. C.

MILWAUKEE, Wis., June 8.—Dering was high gun for the entire two days with 277, second went to Bushman. High "break 'em for luck" was Fred Bills, 281. The scores, 150 targets per man: :

FIRST DAY.

Table of scores for the first day of the Badger G. C. trapshooting event, listing names and target counts.

SECOND DAY.

Table of scores for the second day of the Badger G. C. trapshooting event, listing names and target counts.

Chicago G. C.

CHICAGO, Ill., June 8.—The following scores were made in the weekly club shoot, thirty shooters participating in the different events. The weather was quite cool with a strong incoming wind. Event No. 7 was a distance handicap, 21yds.:

Table of scores for the Chicago G. C. trapshooting event, listing names and target counts.

THE PREMIER TRAPSHOOTING EVENT OF THE WORLD

The Grand American Handicap

Will demonstrate to every one the Reliability and Regularity of the famous

DU PONT SMOKELESS POWDERS

AT Dayton, Ohio, on the grounds of the N. C. R. Gun Club, June 17-20th, inclusive, Trapshooters from all sections will assemble to compete for trophies and to win fame as Trapshooters.

THE results this year will show that the victors chose Du Pont Smokeless Powders. With keen competition prevalent, the importance of reliability and regularity in powders is at once apparent.

THE experience of over a century in powder making is our guarantee to trapshooters that they may place implicit confidence in Dupont, Ballistite, Schultze or Empire Smokeless Powders.

E. I. du Pont de Nemours Powder Company WILMINGTON, DELAWARE

Established 1802

Pioneer Powder Makers of America

Platteville G. C.

PLATTEVILLE, Wis., June 12.—It took only 139 dead ones to win to-day, and these were credited to C. P. Shumway. E. S. Graham got away with elevated rank in for-wads-only division on 142. Scores:

Table of scores for the Platteville G. C. trapshooting event, listing names and target counts.

Table of scores for the Platteville G. C. trapshooting event, listing names and target counts.

Events Nos. 5 and 6 were at 12 pairs.

**PARKER GUNS  
BUILT TO ORDER**

THE manufacturers of the "OLD RELIABLE" PARKER GUN wish to announce that the present is a particularly opportune time to place orders for guns built to individual requirements, a feature of the gunmaking business to which they have paid particular attention.

Parker Bros. are prepared to supply guns in all gauges from 8 to 28 bore, stocked to suit any purchaser's requirements, and bored to give any distribution of the shot required from cylinder to full choke.

**PARKER GUNS REMAIN UNEXCELLED IN THEIR POWER OF HOLDING TOGETHER THE SHOT CHARGES UNDER HIGH VELOCITY AT EXTREME RANGES.**

**PARKER BROS. Meriden, Conn.**

N. Y. Salesrooms: 32 Warren St. A. W. duBray, Res. Agt., Box 102, San Francisco, Cal.

**You Recognize Them as Masterpieces**

HANDLE these guns and know their "feel." The desire for possession will glow all through you. You know they're masterpieces. You know it by the perfection of their mechanism; by the elegance of their lines; by the superiority of their steel; by the unusual beauty of their engraving, finish, etc. And when you see how low the prices of these masterpieces are, a surprise greets you.

Call at your regular sporting goods dealer and see the handsome 1913 Re-Designed Smith Guns. Or write us for complete catalog showing grades from \$25 to \$1000 net today.

**L. C. SMITH GUNS**

"6 Times 23 Years' Experience"

HUNTER ARMS COMPANY, 676 Hubbard Street, FULTON, NEW YORK

**THE "ROSS" SPORTING RIFLE**

is so much better than ordinary rifles that it is worth your while to postpone your purchase until you have looked into its merits.

Its trajectory is extraordinarily flat owing to great muzzle velocity and it anchors game in a most wonderful way.

For accuracy, power, handiness and finish you cannot improve on the "Ross." The Ross .280 Sporting Cartridge with copper tube expanding bullet (patented) is specially recommended for use in the High Velocity Ross. It retails at \$7.50 per 100. If no dealer in your vicinity can show it, write direct for catalogue (post free) to

**THE CAMPER'S OWN BOOK  
1913—SECOND SUCCESSFUL YEAR—1913**

This is that BIG little book of the open—America's new outdoor annual. It comes to you bound as you see it here. It is "woody" from cover to cover—stirred by lake breezes and redolent of pine. It is endorsed by outdoor men everywhere.

Authors of country-wide repute have, with their enthusiasm and familiar knowledge, aided its making. Dan Beard, Emlyn M. Gill, Captain Kenealy, Oliver Kemp, Dr. E. H. Forbush—these and others join this camp-fire council. They say their say about a hundred practical details that hold close interest for you; and they spin a yarn or two by the way.

"The Camper's Own Book" measures 8 x 5 3-8 inches over all. It is a goodly generous volume, with over 200 pages and 21 of the finest illustrations you've ever seen. Everybody should have a copy who believes that a day under the free sky makes the pomp of emperors ridiculous. And you're one—you know you are.

**All New Articles PRICES PER VOLUME All New Pictures**  
In the appropriate green T-cloth, \$1.00, postage 7c. In the paper (as shown in cut), 50c, postage 6c. If your dealer cannot supply you, we will send on receipt of price. We have on hand also a few copies in cloth of the 1912 issue (now out of print) at \$1.00 each, postage 6c.

**THE LOG CABIN PRESS :: :: 146 Worth Street, NEW YORK CITY**

**Canandaigua Sportsman's Club.**

A. A. STERLING was high last Saturday with 48 out of 50, breaking 39 straight. Eiseline and Wilbur shot off a tie for second prize, Eiseline winning. The scores:

Sterling	2 50	Sage	0 33
Eiseline	8 47	Brink	0 29
Wilbur	15 47	Bacon	0 23
Mason	3 41	Clark	0 17
Van W	7 39	Evans	0 18
Kibbe	2 35	Darling	0 5
Soule	0 34		

**Medford G. C.**

MEDFORD, Okla., June 14.—Several members of the Pond Creek Club shot with us this afternoon, getting used to the grounds. Scores were as follows:

	Shot at.	Broke		Shot at.	Broke
Stalker	75	50	Bunch	50	35
Moore	75	43	Soucek	50	39
Strider	75	54	Wilson	30	25
Siefert	50	43	Hardy	30	25
Hite	50	43	Chism	25	14

L. V. HARDY, Sec'y.

**Nassau G. C.**

LONG BEACH, L. I., June 12.—The following scores were made at the two-day tournament run by the Hotel Nassau at Long Beach, L. I., on June 10 and 11. Shooting was right on the beach. The program consisted of 150 targets each day; but owing to the large attendance, which was not expected, it had to be cut to 125. About \$400 worth of valuable presents or prizes were given to the ten high guns each day. Two cups to the two highest ladies. High gun for the two days went to Paul Von Boeckman with 226 out of 250, and second to E. B. Stephensen with 226 out of 250, and N. S. Heinck taking third on 223. Each received cups. There was also a cup for long run.

Every shooter present spoke highly of the ideal location and place, so it was decided to have another shoot in the fall.

**Birmingham G. C.**

ON Saturday, June 14, H. C. Gibbs paid the Birmingham Gun Club a visit and shot high at our regular weekly shoot. Owing to his being sick, his score is not as good as he usually makes. Dr. Sellers was shooting several different guns, but managed to land well up after all. Lec Moody and Cornwell were shooting well again. The scores, 100 targets per man:

H D Gibbs	92	E M Cornwell	84
John Fletcher	90	Mrs Garl	83
Randolph	88	V Heckler	78
Dr Sellers	86	R L Kennon	60
Lee Moody	85	O Garl	(75) 53

**Norfolk—Portsmouth G. C.**

PORTSMOUTH, Va., June 13.—Nine shooters braved the weather and shot targets between showers. Gunther was in good form and smashed 71 out of 75. The club scores at 50 targets follow: Gunther 47, Edmonds 44, Davis 42, Boyd 40, Land 40, Cook 27, Talbot 25, Vaughn 25, Wiggins 25. W. T. E., Sec'y.

**Soo Gun Club Tournament**

THE registered three-day tournament of this club was successfully conducted at Sioux City, Ia., on June 10, 11 and 12. There was an attendance of eighty-seven amateurs and eight professionals, and the program called for thirty-six events, a total of 600 targets. The records show that, including practice and all other events, a total of 47,685 targets were trapped. The Interstate Association contributed \$100, of which \$80 was applied to averages (\$5 each to eight high and eight low averages), and \$20 to purses. The club contribution of \$400 was added to the purses. Money was divided Jack Rabbit system. The interstate championship trophy event was won by L. A. Gates. Scores:

**St. Joe Valley G. C.**

SOUTH BEND, Ind., June 13.—The scores at the shoot to-day were as follows: Gustafson 80 per cent., Casbon 44, Walworth 55, Keeney 48, Kale 84, Baird 78, Maurer 50, and Freeman 50.

This week's shoot being on Friday, a number of the shooters were not out. It seemed to be an off day, for some of the best men landed around 80 per cent., and the best score was 84.

On June 7, the following scores were made: Kale 95 per cent., Baird 85, Morris 70, Cimmerman 68, Gustafson 65, Rough 60, Babcock 72.

The second annual tournament will be held on July 26. F. M. CIMMERMAN, Sec'y-Treas.

**"The Gun that Blocks the Sears"**

See how the Safety-bar (No. 4) when pushed back over the L-shaped ends of the Sears (No. 5) completely blocks them, making accidental discharge absolutely impossible. Every Davis Hammerless Gun has the Safety that "Blocks the Sears". It is a *Safe* "Safety".

**N. R. DAVIS & SONS, Lock Box 707, ASSONET, MASS., U. S. A.**  
Established 1853

**South Charleston (Ohio) G. C.**

THE one-day registered tournament on the 12th had an attendance of 67 lovers of the gun, who kept things moving at a lively pace during the lovely June day. J. A. Smith was high gun for the day with 143 out of 150. Clarence Coburn registering 140 kills for second, while third was tied for by F. Coburn, C. M. Stout and A. C. Drees, who were only one target in the rear. Total moneys amounted to \$242.50, \$32.50 in merchandise, \$20 in trophies, and forty shooters won either money or merchandise. George H. Slaughter was the efficient secretary. The scores:

J A Smith..... 143	E M Maddex ..... 118
C Coburn ..... 140	C Slagle ..... 116

**Island Beach G. C.**

GREENWICH, Conn., June 14.—Dr. Currie from Siwanoy took the initial limb on Du Pont trophy, while J. R. Talcott nipped a ring into Stevens trophy. Miss Bowles and Miss Brown supplied ballistics in the co-educational department. Everyone smiles happily at the way their scores improve—M. R. Guggenheim, please notice—without detracting from any glory coming to the score improvers, the layout at Island Beach calls for increased kills. The scores follow in strings of 25:

**Roanoke G. C.**

ONE of the largest and best attended shoots of the season was held on the club grounds on Saturday afternoon, June 14. Not only were a large number of the members of the club present and shooting, but a number of visitors, all of whom were welcome. The club is always glad to have any of its friends bring visitors to the club.

The weekly trophies offered by the club were won by the following members: Scratch Class, first, tie by Scholl and Bloxton; second, W. S. Jones. Class A, first, J. W. Poindexter; second, W. C. Bringman. Class B, first, H. R. Cox; second, B. J. Fishburne. Class C, first, Frank Jones; second, A. S. Payne. The Stephens trophy was won by Frank Jones. The scores:

**Airedales as Detectives.**

THE best detectives to-day are the Airedale terriers. Major Richardson, a British army officer, who lives at Harrow, England, has had remarkable success in training dogs for public and war purposes. He uses Airedales exclusively, having found this game, hardy, wire-haired breed, the largest of the terriers, is best adapted for work which requires pluck, activity and a high degree of intelligence.

The German Army is training Airedales for scouting, and finding dead and wounded soldiers, having abandoned the effort to train a long-haired native breed of larger size.

The latest achievement of one of Major Richardson's Airedales has been reported from Singapore. "Jack," the hero of the exploit, was bred and trained by him, and sold to the Singapore police.

When the detective station there got word that a Chinese, serving a life sentence in the local prison, had escaped, Jack was assigned to the case. It was two hours after the Chinese had got away, and Jack reached the prison. He took up the trail at once, and ran the man down in a jungle.

This was a remarkable exhibition of scenting powers for a terrier, but the Airedale enthusiasts say that this breed can be utilized for a greater variety of field sports than any other dog. In the Jackson Hole country, in Wyoming, there are packs of Airedales used for hunting bears, and in the Southern States the Airedale is used for the exciting night sport of treeing the wary 'coon. He is also an excellent bird dog, land or water retriever, wonderful companion for a child, sleigh dog, and truly invaluable to the rancher or farmer, as he will herd cattle and sheep like a collie.

This remarkable breed is a cross between the otter hound, a splendid water dog, and the old-fashioned Skye terrier, although a great many breeders claim pointer, setter, bull terrier and collie are used in his make-up, says the Southern Kennel. Bench shows did not recognize the Airedale as a separate breed until comparatively recent years, and the breed was practically unknown forty years ago.

He is an up-standing, long-legged fellow, resembling the Irish terrier in conformation, but

Hinds .....	45	Dr Gilman .....	44

\*Professionals.

The shoot was finished at 6:30 P. M., and then Johnny Whitney served one of his famous clam chowders, and every man present ate all that his stomach could contain. After supper, the next event was the annual meeting.

The Portland Gun Club was organized in 1888 and has a very successful history. As we have arrived to the dignity of owning property, we decided to make the Gun Club an incorporate body, and act of incorporation was unanimously accepted. The following named officers were elected: President, Orrin P. Weymouth; Vice-President, Dr. F. A. Hayden; Secretary-Treasurer, Stephen W. Dimick; Shoot Manager, George Blanchard; Directors, Dr. C. W. Bray, Silas B. Adams and William N. Taylor.

The retiring president, E. E. Thurston, has been president six years, and much of the success of the club is due to his able management. Steve Dimick has been secretary-treasurer of the old club, re-elected to the same position in the new incorporated gun club, is the right man for the place, a more genial, tactful man could not be found. The new officers of the club are prominent business men, and, as we have a large active membership, the future success of the Portland Gun Club is assured.

DOWN EASTER.

**Columbus G. C.**

COLUMBUS, O., June 14.—A lively few hours' shoot for G. A. H. Practice to-day was participated in by Rudy and Dr. Van Houten, of Sunbury, O., and Charlie Ward, of Circleville, the program was mostly shot from handicap. Will Fishinger, from Hilliard, also dropped in. Will is one of the old-timers, and has entered for the Grand American, and says it is his first shooting for many a day.

Within about thirty days from this date a turtle shoot will be on for one day at the Columbus Gun Club, at which time considerable rivalry will be on as to who can get away with the most turtle. This shoot will be a one-day program, and a few novelties will be introduced as a little surprise to the boys. The program will consist of ten 15-target events, and for a good old-fashioned social time, this shoot will run about 97 per cent. Program to be mailed about July 1.

Dr. Van Houten, of Sunbury, says they have a fine new grounds there, with a Leggett automatic trap and all the comforts of home, and will issue a call for a fine little shoot on July 4.

**Little Chief Hare.**

VERNON BAILEY writes in the Canadian Alpine Journal of the pika, cony, or little chief hare: "The ochotonas live among the rocks, high up in the mountains, mainly near timber-line, from New Mexico and California to Alaska, and while often abundant, are comparatively little known. They are approximately of the size and form of the guinea-pig, with rounded ears, short legs, and no visible tail. Their alarm note is a nasal squeak somewhat resembling the bleat of a very young lamb.

During late summer and the short autumn these little animals are busy gathering their winter store of hay, including plants of many species that they cut and stack in dry places under the shelter of broken rocks that lie in masses on the steep mountain slopes. Often a bushel or more of well-cured vegetation is gathered into one of these sheltered deposits and a dozen or more stacks are sometimes found within the area of a not very extensive rock slide. Almost every plant within reach is gathered, with apparently little specific discrimination. In one place on the side of Pecos Baldy in New Mexico thirty-four species were recognized in the hay. \* \* \*

"Nothing is known of the habits of these animals in winter when they and their haystacks are buried deep under the snow, except that in the spring the haystacks are found reduced to a few dry sticks and stems and the

ochotonas seem to have survived the arctic winter in good condition."

The greatest enemy of the cony is the weasel, and this carnivore is frequently found living in close proximity to their slides, where he doubtless finds an easy and comfortable existence.

Six specimens of pikas were preserved on our trip, one from Moose Pass, British Columbia, and five from the head of the Moose Pass branch of the Smoky River, Alberta.

**Caviar.**

FRESH caviar, or sturgeon roe, is of a light color, and is contained in a membrane. The caviar is cut out and placed on an iron sieve, through which it is rubbed carefully without breaking the grain, in order that it may be rid of any refuse. It falls into a preparation of brine, and after remaining therein for three or four hours is emptied into a sack, when the brine gradually drains off, leaving the caviar ready for consumption. For local consumption, or when it can be kept continually on ice for a few days, the slight salting is omitted.

Salted caviar, according to Harper's Weekly, is prepared in the same way as fresh, except that the brine is stronger and the caviar remains one day in the sack to drain, after which it is pressed to get rid of the brine. For the production of good caviar the brine must be boiled and cooled.

Red caviar is produced from the taran fish. The roe is cut out and thrown into a preparation of brine made of nine pounds of salt and twelve drams of saltpeter. It is then carefully mixed and all the refuse is cleaned off, when it is ready for packing.

For about a month this caviar is soft, but it gradually becomes solid. For good results cold weather is required and the roe must be taken out of the fish the day it is caught. This caviar is more perishable than the black. Whole roe red caviar is prepared from the fish soudak. It is strongly salted and carefully packed to keep it whole.

**Rocky Mountain Caribou.**

ONE of the most surprising results of the summer's trip in the Mount Robson region was the discovery of an undescribed species of caribou, says the Alpine Journal. The material collected shows the animal of this region to be distinct from the two species previously known from the mountains of Western Canada. *Rangifer montanus* of the Selkirk and Gold ranges, and *Rangifer osborni* of the Cassiar Mountain country of Northern British Columbia. The limits of distribution and exact relationships of these three forms of the caribou from the Western mountains are, of course, imperfectly known, but the great difference exhibited by the new species on comparison with the others, make it seem very doubtful if there is inter-gradation between them. The new species is apparently the largest caribou of North America, and probably the largest known species, old world or new. Aside from its great bulk and dark colors, the species is differentiated from all other forms by the great size of the teeth and other cranial and dental characters.

**Sense of Smell in Fishes.**

THAT fishes scent their food in the water much as many land animals do in the air is a belief that is held by many fishermen. This opinion has led to the practice of chumming or baiting up; i. e., of spreading bait in a region preparatory to fishing it, a practice that, in the case of sharks, mackerel and bluefish, seems to be justified by the results. Such practice is based on the assumption that fishes have a sense of smell, but this opinion has been unsupported by physiological evidence, for up to the present time investigators of the subject have not been able to demonstrate any form of stimulation or reaction characteristic of the olfactory apparatus in water-inhabiting vertebrates.—Bulletin of the Bureau of Fisheries.

# A Few More Stevens Victories Scattered Over The Civilized World

## No. 1—In W. Virginia

The Intercollegiate Rifle Shooting Championship of the United States was won by the West Virginia University Rifle Team of Morgantown.

This team used the Stevens Semi-Military Model Rifle No. 414—breaking the Intercollegiate record.

## No. 2—In Australia

Stevens Rifles won all the leading prizes in the National Miniature Rifle Association meet at Adelaide, South Australia.

33% of the winning rifles used in this important Australian tournament were the Stevens Ideal Models.

## No. 3—In Georgia

Mr. J. K. Warren won the Championship of Georgia at Doubles with a Stevens Repeating Shotgun—44 out of 50.

This score was made at the State tournament, Americus, Georgia.

## No. 4—In Connecticut

In the Short Range Rifle League, the Park Rifle Club of Bridgeport, holders of the world's record for indoor rifle shooting, 998 x 1,000, use Stevens rifles exclusively.

## No. 5—In Ontario

Mr. Fred M. Fay was high over all at Stratford in the Registered Tournament with a score of 144 out of 150. Mr. Fay invariably uses a Stevens Repeating Shotgun.

## No. 6—In Alabama

The Preliminary Southern Handicap at Montgomery was won by Mr. J. K. Warren, 94 out of 100, with E. E. Little second, 93 out of 100.

Both these gentlemen used Stevens Repeating Shotguns.

When you get all through trying Shotguns and Rifles of various kinds and makes—then buy one of the old reliable Stevens—the arms with a reputation which has been won with actual scores.

Write to-day for our beautiful illustrated catalog describing in detail the big assortment of Stevens Rifles, Shotguns, Pistols and Rifle Telescopes.

## THE SPORTSMAN TOURIST

### Maine.

#### Come to Jones' Camps.

Best fishing in Maine. Salmon and Trout. For circulars, address **GEO. C. JONES**, Mosquito, Me.

#### Come to Chase Pond—I'll Use You Right.

There are plenty of trout that are ready to bite. Write for circular. **GUY CHADBOURNE**, Bingham, Maine.

### Nova Scotia.

#### KEDGEMAKOOGEE LAKE

##### In the Wilderness

A vast virgin forest, 90 miles long. Club House easily accessible by automobile.

A net-work of beautiful streams. Splendid canoeing. Trout abundant, large and gamy.

Non-members cordially welcomed at the Club House. \$12.00 a week. Cabins for families. Special provision for ladies.

Modern conveniences: Electric lights, telephone, daily mail. Experienced guides and full equipment for long or short trips. For interesting illustrated booklet write **J. W. THOMPSON**, Mgr., Kedgemakooogee Rod and Gun Club, New Grafton, Nova Scotia.

### Newfoundland.

#### NEWFOUNDLAND.

A land teeming with SALMON, TROUT and CARIBOU, besides other game. I provide outfits and guides. For particulars apply

**J. R. WHITAKER**, "The Bungalow," Grand Lake, Newfoundland.

### New York.

#### TROUT FISHING.

Six miles from Livingston Manor. Altitude 1800 feet. Ten miles of trout fishing free to guests. One mile from Hunters Lake; good bass fishing. Casino, baseball, tennis and croquet grounds. Garage and supplies. Early breakfast and late supper for fishermen. Comfort and amusement for families. Address **HEARTHSTONE INN** (Mrs. Elizabeth Royce, Proprietress), De Bruce, Sullivan County, New York.

### Montana.

#### TOUR THROUGH YELLOWSTONE PARK

To Index Peak Camps. Fishing plentiful in beautiful mountain streams and lakes. Elk, deer, mountain sheep, black, brown and silver-tip bears. All of this game can be had in thirty days. Come and get yours. The camp is located at the foot of Hoodoo Mountains, Upper Clark's Fork River, east side of Yellowstone Park. Paradise for photographer. Well equipped outfits. **W. H. KITCHENS**, Manager and Guide, P. O., Cook, Montana.

Wire Message, Cody, Wyoming.

### Minnesota.

#### "AN IDEAL RETREAT AMONG THE PINES." FISHERMAN'S LODGE, Dorset, Minnesota

On Bottle and Mantrap Lakes and surrounded by a country fitted by Nature for Recreation and Sport. Rustic cabins, clean and comfortable. Muskalonge and Bass fishing at the door. Send for booklet. **A. O. WAMBOED**, Prop.

### The Practice of Hygiene and Therapeutics by Animals.

BY FRANK HEYWOOD.

If human beings made a study of themselves, their wants and weaknesses, how to provide for the common ailments and the proper treatment of themselves under ordinary and extraordinary circumstances as well and as successfully as do most animals, members of the medical profession would not fill so large a directory as is the case. Close observers of the animal kingdom have noted with great interest the methods of its intelligent members from the least to the greatest. No doubt the practice of medicine by animals is such as is taught by experience, and like that of the inferior human races is largely empirical, guided by instinct. In their diet as well the same is true. Animals instinctively choose such food as is best suited to them. This is not always the case with the human species, nor is it always the practice of medical men in dealing with their patients.

M. Delaunay, an eminent authority, maintained that the human race shows this instinct and blames physicians for not paying sufficient respect to the likes and dislikes of their patients, which he believed to be a guide to be depended upon. The writer knew of a case in point. A lady was stricken with cholera during one of the epidemics that visited this country. She had two of the best physicians in her city, who were apparently unable to cope with the disease, and the patient was in what seemed a hopeless condition, as the physicians finally said they had exhausted their skill, and that the young lady would probably survive but a short time. She faintly called an attendant and asked for a lemon. The physicians were horrified, and forbade it, but at length yielded, for the reason that as she had but a short time to live, she might as well be gratified. A large fresh lemon was brought, the patient feebly took it and sucked the juice with great avidity. To the surprise of all the alarming symptoms disappeared, the patient began to mend, and in two hours was out of danger. She continued to improve and was soon convalescing, ultimately entirely recovering.

Nature knew more than the physicians. Women are more often hungry than men, and they do not as a rule like the same kinds of food, nevertheless in asylums for aged poor, men and women are usually put on the same regimen. People who like salt, vinegar, etc., ought to be allowed to satisfy their tastes. As a general thing people's likings are the best guide. Many animals wash themselves, and if possible take an all-over bath. Concerning the question of reproduction, it is well known that all mammals suckle their young, keep them clean,

### New Brunswick.

#### BIG GAME HUNTING IN NEW BRUNSWICK.

I am located on Ramsy River, Gray Brooks, and have one of the finest Big Game Country in New Brunswick. Can provide parties with abundant fishing and hunting. Have good camps and tents, also guides, and I guide myself. We are so far in the forest that we are not disturbed by every-day happenings of civilization. **LORENZO D. SAVAGE**, Penniac, York Co., N. B.

#### BIG GAME IN NORTHERN NEW BRUNSWICK

Sportsmen, send for our free illustrated booklet, which fully describes our six hunting camps for moose, caribou, bear and deer in northern New Brunswick. Imhoff Brothers' Hunting Camps, Imhoff, Gloucester County, N. B., Canada.

### Virginia.

#### MODERN HOTEL \$2.00-\$2.50 per day

—\$3.00 with Bath— Cottages, rent or sale on fishing grounds. Guides and power boat, 1 man, \$3; 2 men, \$4 day. Channel Bass, Kings, Trout, Hogfish galore. Send for booklet. **A. H. G. MEARS**, Wachapreague, Eastern Shore, Virginia.

### Wyoming.

#### Big Game and Yellowstone Park Trips

Now is the time to make arrangements for your Big Game Hunt for this coming Fall. Remember that the best guides and the best dates during the season are secured by those who make their plans early. Big game season; including Deer, Elk, Mountain Sheep, Lion, Lyax, etc., September 1st to December 1st. We have complete outfits, horses, pack outfits, etc., for big game trips, and also fishing and camping trips through the Yellowstone Park and Rocky Mountains. **RUMSEY & RUFF**, Pinto Ranch, Cody, Wyo.

### Property for Sale.

## Muskoka Island For Sale.

In the Canadian Highlands, the summerland of the North. Large island, 152 acres; large, completely furnished house. Wharf, many trees and beauty spots. Among many other offerings, this is conspicuously attractive. Correspondence solicited and personal attention given to clients. Address **R. A. DONALD**, Union Bank Building, Toronto. Acting in conjunction with the Muskoka Lakes Navigation and Hotel Company.

### SOUTHERN PLANTATION

#### 4600 Acres near Georgetown, S. C.

One-half virgin timber, one-half rice fields. Old homestead on the property could be remodeled into a gentleman's beautiful country home. Suitable for sportsman's club. Ideal location for game preserve. Excellent feeding ground for ducks, which are plentiful in season. Abundant deer and other kinds of game on property. For price and detailed information address **PLANTATION**, care Forest and Stream.

FOR SALE—600 acres of the best hunting grounds in Sullivan County, New York, near Erie R. R. Inquire of **CHARLES WINTERS**, North White Lake, New York.

wear them at the proper time, and in this way educate them.

Many a lesson to man in hygiene is taught by the lower animals. Animals get rid of their parasites by using dust, mud, clay, etc. When suffering from fever, they restrict their diet, keep quiet, seek the quiet airy places, drink water and sometimes plunge into it. When a dog loses its appetite it eats that species of grass known as dog grass (*Chiendent*) which acts as a purgative. Cats also eat grass. Give a dull moping cat a handful of catnip and see what she will do. In ten minutes she will be like a new creature. Sheep and cows when out of sorts seek out certain herbs. Horses are particularly careful of their diet, and when "off their feed" and generally feeling as bad as a bilious man can feel, they know just what will help them, and they get it if they can.

The writer owned a fine, high-bred, intelligent mare that knew pretty nearly as much as most men—probably more than we do about the proper care of themselves. She knew where to find a certain clump of burdock plants and took a few leaves as regularly as she did her oats. If she was stabled, the leaves were supplied to her at least once a week. She knew also where a certain box containing salt and ashes, thoroughly mixed together, was to be found, and as regularly each week or oftener took a small quantity of this. She could never be tempted with bread, cake, candy or sweetmeats of any kind, but a good juicy sour apple just "hit the spot." She never knew what it was to be "out of kilter" for a minute in the course of seven years or longer, was always in good spirits and ready for a twenty-mile drive any day or in any weather.

An animal can "doctor" itself well enough when the means are found, and to the science of surgery is not a stranger. When it has a wounded leg or arm hanging on, it completes the operation with its teeth. A dog, on being stung by a viper, has been seen to plunge its head repeatedly for several days into running water, and eventually recovered. A fine setter belonging to a friend was run over by a carriage. The dog dragged itself to a brook of running water, where it remained in the water for three weeks during quite cold weather. Its food was taken to it regularly, and the animal recovered. A terrier injured its eye, and kept itself in a dark place under a store counter, avoiding both light and heat, though customarily to be found near a good fire. It adopted a general sensible treatment, rest and abstinence from food. The local treatment consisted in licking the upper surface of the paw which it applied to the wounded eye, again licking the paw when it became dry.

Cats also when hurt adopt this system of simple continuous irrigation. Animals suffering from traumatic fever treat themselves by the continued application of cold, which is considered by many eminent physicians as more certain in its curative effects than any other. Innumerable instances might be quoted from the experience and observations of owners of animals to prove that hygiene and therapeutics as practiced by the brute creation may be studied with advantage.

OMAHA is the second largest sheep market in the world.

# WHAT DOES 324 SIGNIFY TO A BASS FISHERMAN

To those who use good Bait Casting Silk Lines, this number on a label is a guarantee that every line is inspected in detail before reaching the angler, and that the special braiding process makes the tension equal from the inner core to the outer cover.

## THE CAMPER'S OWN BOOK 1913—SECOND SUCCESSFUL YEAR—1913

! This is that BIG little book of the open—America's new outdoor annual. It comes to you bound as you see it here. It is "woods-y" from cover to cover—stirred by lake breezes and redolent of pine. It is endorsed by outdoor men everywhere.

Authors of country-wide repute have, with their enthusiasm and familiar knowledge, aided its making. Dan Beard, Emlyn M. Gill, Captain Kenealy, Oliver Kemp, Dr. E. H. Forbush—these and others join this camp-fire council. They say their say about a hundred practical details that hold close interest for you; and they spin a yarn or two by the way.

"The Camper's Own Book" measures 3 x 5 3/8 inches over all. It is a goodly generous volume, with over 200 pages and 21 of the finest illustrations you've ever seen. Everybody should have a copy who believes that a day under the free sky makes the pomp of emperors ridiculous. And you're one—you know you are.

THE LOG CABIN PRESS :: :: 146 Worth Street, NEW YORK CITY

### Mares for the Farm.

THE man, who keeps geldings or mules for his farm work, secures only their labor in return, while the man who keeps draft mares receives not only their labor, but in addition their colts. It is true, says the Pacific Homestead, that somewhat more team force must be kept where the work is done by geldings, but when we consider that three mares can be counted upon to do as much as any team of geldings of an equal weight and strength, that the difference in feed cost will not exceed \$60 per year, and that the three mares can be counted upon to produce in addition to their labor, at least two colts, that are worth \$100 each as yearlings, it is apparent that the mares are the most profitable. The comparison just made is on the basis of grade mares; where pure bred mares are kept, the returns will be much greater.

### Bird Plumage.

HUNDREDS of thousands of plumes and skins of birds from every part of the world are annually sold at auction in London. The dealers have their agents in all the tropical countries, who employ the natives to snare and slaughter the birds. New Guinea, the Malay Peninsula, Burma, China, India, the Indian archipelago, the South Sea Islands, the West Indies, and the equatorial countries of South America are the fields of this industry. A condor skin sells in London for from \$3.50 to \$5.75; the plumes of the birds of paradise, of which there are many varieties, from \$1.14 to \$24.60; cassowary plumes for \$3.48 an ounce; "osprey" skins for \$1.08 to \$2.78; emu skins for \$4.80; the African golden cuckoo, \$1.68; crown pigeon heads, \$2.50; the argus pheasant's skin, \$3.85, and the humming bird, of which many thousands are killed, as low as two cents.

## Strange Hunting in the Sea

By HARRY H. DUNN

*Photograph by the Author.*

**T**HE wanderer, especially the newspaper correspondent, comes across strange men and strange sports, the more strange the further he travels from the beaten tracks of the automobile and the Pullman. Chinese fishing with cormorants, Samoans killing sharks with knives made from the teeth of other sharks, Totonaca Indians slaying jaguars with fire-hardened wooden spears, and Chiapanecos planting the same sort of sticks in hidden pits to impale deer driven upon them by beaters—all these are curious in their way, but I believe the most peculiar hunting trip I ever went on was after octopi, along the rock-lined coasts of Manzanillo harbor, on the west coast of Mexico.

Some might consider this, or these, for there were two of them, in the light of fishing excursions, but, in reality, one was a trapping trip and the other real hunting. The first was with a Japanese, who said he was a fisherman, and that his name was I. Saki. What his first name is I never knew, for he asked that I call him "plain Saki, as American men call each other, by their last names."

Apparently he was a simple fisherman, in the employ of the Japanese fishing company which controls the vastly valuable concession of the fishing and fresh-water food preparation at Manzanillo, but his knowledge of the sea was uncanny, and I have an opinion of what his position would be in the Japanese navy, had his emperor occasion to call on him. But that is another story. On the March morning in question, accompanied by a Japanese oarsman, we started in an ordinary, American-made row-boat, from the little landing at the Santiago Hacienda on the Bahía de San Juan, a tributary estuary to the main harbor of Manzanillo.

Saki, who, it appears had taken a liking to me when I gave him a tow one hot afternoon behind a motorboat in the main harbor, had provided lunch, and besides this, the boat contained only a waterglass, merely a bamboo tube six inches in diameter and bottomed with glass; a grappling hook and rope, and a queer, three-bladed, handled affair, which looked something like a steel potato masher about three feet long. He had informed me that we were going after octopi, first in Spanish, and then, finding that I also spoke a little English, he spoke as fluently in that language as in Spanish.

I have found that it is best to ask an Oriental few questions, so we talked about the weather, the all-year-round weather of Man-

zanillo, how octopi are prepared for the market—everything in short, but the hunting in hand. Now, the coast of the Bay of San Juan as well as Manzanillo Bay proper, is largely submerged coral rock, ranging from a few inches under the blue water to fifty feet, when the floor becomes sandy, or of broken coral fragments. Along this edge we rowed slowly, pausing the first time above a tangled mass of dark rock. Saki peered over the edge of the boat, through the water glass, into the shallow sea, shook his head and the boatman rowed along.

Again we stopped, the bamboo tube was put over the side, and again we moved on. I was a bit mystified, but, as I had a comfortable seat in the stern, and umbrella over my head, a bottle (of cold tea) at my feet, I kept on saying nothing. We went through the process once more, and then I noticed, on the shore opposite each place where we stopped, three sticks, each

about three or four feet long, set up in a rude tripod, evidently marking the places for the halts. But why the stops?

The answer came at the fourth "station" of sticks. Saki, staring through his glass, made a motion to his rower. The latter handed him the grappling hook and the rope. Over the side it went, and both men laid hold on the rope. Up it came, hand over hand, after a moment's feeling about on the bottom, and with it three arms, each about two feet long, lashing wildly in the air, clutching now and again the rope, then throwing themselves about as if seeking what they might grasp.

At the lower end of these arms appeared a baked clay jar, with a rope handle, into which the grappling hook had caught. Within the jar, a parrot-like beak, backed by two enormous glassy, unpupiled eyes—the body of the cuttlefish to which the arms belonged. Gripping the outside of the jar were four more arms, but two

OCTOPUS,

Showing underside of body and the "suckers" or tentacles with which the devilfish seizes its prey.

of them soon released their hold and joined the other three in grasping nothingness through the air. They looked like the arms, the whole creature seemed the body, of something long dead beneath the sea—a creature of the color, indeed, of death, with eyes that seemed to have seen All and Beyond. Myriad white suckers, looking like monstrous sea anemones, opened and closed in their places on the great tentacles, seeking something on which they could fasten their deadly grip. Surely Poe never saw an octopus, or we should have had a poem beside which *Ulalume* would seem a pæan of gladness.

The Jap, however, though he doubtless had read everything the morbid creator of "The Raven" ever wrote, evidently had no such thoughts, for he seized the steel "potato masher," sprung a joint into the handle with one hand, and, as they dragged the clay jar upon the bow of the little boat, drove the razor-sharp blades straight into the beak and horrid eyes. No blood came, but in its place a black flood, ink-like, which splattered men and boat. In a moment the tentacles fell quiet, the two men pulled the sack-like body from the jar, packed it in a covered bamboo case which I had not noticed, under the little fragmentary deck at the bow, and lowered the jar back into the depths.

Thus we circled the bay, taking eight of the creatures, which looked like nothing so much as some long-time dwellers in the River Styx, before we turned out into the broader Manzanillo Harbor. Then, as we had about a mile of rowing across deep water, Saki told me of this octopus-trapping industry, which has grown to quite respectable proportions in the harbors of Manzanillo, Mazatlan, San Blas, and Acapulco. The octopus, being soft bodied, is continuously seeking a hole in the rocks in which to stow his body, while his long arms reach out, searching the currents for food for his rapacious maw.

The Jap fishermen, not averse to making money while making soundings of the Mexican coast for their home government, have taken advantage of this habit of the cuttlefish, and provides him with artificial holes in which to hide, in the shape of clay jars, lowered into niches in the coral reef. Inside the smaller harbors, the location of these traps is marked by the tripods of sticks. Outside, as in Manzanillo Harbor proper, the water-glass is used, only the approximate location of each trap being remembered.

The traps are emptied every day, and are of small size, so that only the smaller octopi, those most suited for food, and, at the same time least dangerous, are taken. The supply according to Saki, is endless, and the dried, salted bodies find ready markets, both in Japan and among some of the Indian tribes of Mexico, notably those of Yucatan and the territory of Tepic.

One other day, in April, some years before this octopus-trapping trip with the Jap, I rowed out into Manzanillo Harbor with another hunter of the sea, this time a Mexican Indian. I believe, originally, he had been a Huichol tribesman, or, possibly, of that queer sister tribe, the Coras, but he had lived so long among better grades of Indians that he had learned Spanish and was at least fifty years ahead of the rest of his tribesmen in the hills of the West Coast.

He rowed alone save when I helped him,

which was seldom, for even the April sun in Manzanillo is not conducive to exercise, especially to one whose heaviest work for fifteen years has been the pounding of a typewriter. This fisherman, or sea-hunter, whichever you like to call him, was armed with a spear, or rather three spears, each about five feet in length, with long, slender, wooden shafts and sheet iron heads with barbs at least two inches in length. The head of each spear was about seven inches in length and it had two of these long barbs on either side. The cutting edges, both of the point and of each of the barbs as well as their ends, were razor-sharp, evidently ground down by long labor with some hard stone. The object of the long barbs appeared later.

Quite evidently they were throwing, and not stabbing spears; the heads were fast to the shanks and to each spear handle, at the base of the head, was attached a thin but apparently strong rope, made of henequen fiber and woven by native rope makers. This rope was less than three-sixteenths of an inch in diameter, yet I believe would have sustained a weight of 150 to 200 pounds with ease, notwithstanding that it was home-made and not so closely woven as are most modern ropes.

However, we did not linger along the shore on this trip, but struck right out across the sun-kissed little harbor toward the open sea. Even the water was warm, and the great sharks, hunting much more expertly than we ever could hope to do, passed us at frequent intervals, seemingly following regular game trails through the sea. Once in a while a school of flying fish, disturbed by a shark or a manta, would rise and "fly" for a few hundred feet, or a big yellow tail three or four feet in length would leap a meter out of the sea, attempting to escape in turn a shark larger even than he.

Once clear of the harbor and on the smooth, oily ground swell of the Pacific, we hoisted the mast (an oar) and hung out a lateen sail, which, with the light breeze, was just enough to carry us along a trifle faster than Gratiano (the boatman) could row. We had covered perhaps half a mile, when the Indian, who stood in the bow while I steered, waved his right hand; I turned the boat in the direction indicated, holding her over until his hand dropped, and, in a minute or two, we were running about thirty feet from and to one side of a gray mass floating like a huge jellyfish, on the sea. It was an octopus, but so different in appearance from the ones which come out of the pot-traps in the little bay.

The long arms were stretched out in straight lines behind the round, sack-like body, which propelled itself slowly by a jerky motion, apparently something like that of the squids of the deep sea—caused by the alternate sucking in and sudden ejection of water. For the most part, however, the creature seemed to be floating idly on the swell, and we crept a trifle closer, until Gratiano picked up one of the spears and motioned me to hold the temporary catboat straight ahead.

Then, just as we were abreast of the floating devilfish, he cast the spear. The throw was good, and the barbs sank into the foot-wide sack which forms the main body of the octopus. The very water broke into life; the great arms leaped like snakes from the sea, and for a moment it seemed that the octopus was going to

shake out the light spear. An inky black fluid—the same that I was to see later in the trip with the Japanese—dyed the water until we could scarcely see the devilfish.

Gratiano waited until the struggles had ceased, and then hauled the creature in, hand over hand. The long barbs held, even in the soft, leathery body, and soon pierced through and through the flabby sack and the seven long arms were in the boat, to be stowed away in a well filled with salt water stronger than that of the sea in the bottom of the little craft.

We hunted all the remainder of that day, and saw eleven of the octopi asleep, or swimming slowly, on the ocean. At no time were we more than three hundred yards from shore, except once, when we pursued and lost an enormous cuttlefish, which I am rather glad we did not get, for once he raised one of his arms, and it seemed a good twenty feet in length. As it was, we secured seven through Gratiano's skill with the spear, and he informed me that this was a much better bag than he usually made.

### "Under and Over" Pistols.

In referring to early examples of double-barreled firearms having their barrels placed one above the other mention has been made of the extensive vogue formerly enjoyed by flint-lock pistols of this kind. Muzzleloading guns and rifles were often constructed after this fashion, with the barrels turning on a pivot, so that one lock served to discharge both. Pistols, otherwise of a similar kind, had usually two locks and fixed barrels. They resembled as nearly as possible the ordinary double pistols with barrels side by side, but their flat shape enabled them to be carried more conveniently in holster or pocket. The pistol referred to bears upon both locks the name "Garner," and upon the top barrel "London" is engraved. Two bands of inlaid gold decorate the breech, there is a silver escutcheon on the butt, and both the touch holes are of platinum. The platinum plugs are set in midway between the two barrels. That on the right-hand side is bored diagonally upward, to communicate with the center of the cupped breech of the top barrel, and that on the left diagonally downwards to reach the lower barrel. The locks are extended forward along the barrels and are secured by hook-shaped metal projections one on either side of the lower barrel. The usual pin or side nail going through both locks fixes them in the stock. External safeties, sliding on the lock plates, serve to bolt the cocks in the half-cock position, the "hammers" being down and the pans covered. The pistol bears Birmingham proof marks, and these suggest for its production a date subsequent to the year 1813, when these marks were first used. The conventional style of engraving adopted would be appropriate for the period of transition from the flint to the detonating systems. The name Garner does not occur in lists of London gun-makers from 1812-1820, which have been consulted, but these lists are by no means exhaustive. Thanks are due to Mr. Thomas Turner, the proof master of Birmingham, for the loan of this interesting specimen from his collection of old firearms.—London Field.

# A Few Remnants of Aborigines

## Chippewas of Lake Superior

By RALPH PENBROOK

THE group of Chippewa Indians and half-breeds in the picture is remarkable for several reasons. It contains the oldest and last of the lines of hereditary chiefs of the Chippewas, who died a few years ago, aged 103 years; his half brother, another chief, who died at the age of 92; the halfbreed, Cadotte, who was a descendant of a prominent French official sent from France in 1736. He was a typical *coureur du bois*, a man of strange and remarkable characteristics, inheriting the bad traits of his Indian and French ancestors with few of the good ones, and regarded as an undesirable mixture of both. The others are of mixed blood and notable men in the "Soo" country, where they lived all their lives. The picture, which was made a short time ago, grew out of an incident which brought them all together as principals or witnesses in a suit brought by the United States Government to oust one Gurno from an island in the St. Mary's River, which had been occupied by him from time immemorial and from quite an interesting story which has never been fully told in the press, although the litigation and some of the incidents were told at the time of its occurrence.

The writer knew personally the subjects in the group and has been "shot" down the Soo rapids in the batteau of Baptiste Cadotte more than once with not, it must be admitted, any great sense of comfort or safety under the guidance of the reckless halfbreed, and with more or less thankfulness when the trip was over.

When the treaty was negotiated between the Chippewas at Sault Ste. Marie and the United States, somewhere about 1850, whereby the Indians gave up their tribal relations and became citizens of the United States, a certain island, known as "Chiefs Island," was granted by the terms of the treaty to Chief Sha-wa-no and his heirs forever. The old chief had lived on this island for many years, and rumor had it that it had always been the home of the head chief of the Chippewa nation. It gradually became almost completely joined to the mainland, owing to improvements made in the Sault Canal locks. Some twenty-five or thirty years ago, shortly before the death of the chief, a deed was executed by the old chief and his wife to one Geo. W. Brown, or at least such was Brown's claim.

Brown at that time filled the offices of Register of Deeds, County Clerk, lawyer and general Poo-Bah at the Sault. The year after the alleged deed was given, the old chief died, having resided on the island until his death; and his son, the succeeding chief, and he who is shown in the group, continued to reside on the island.

About 1891, at the time the Government decided to improve the locks, it was decided also that they must have this island. Brown stated to the representatives of the Government and produced deeds in proof of his statement "from the chief to his daughter, from the daughter to his wife, etc.," and as all seemed perfectly regular and correct, the Government paid Brown

\$5,000 and took title to the island in question. It afterward appeared that the consideration in the deed from the chief to Brown was \$250.

After the purchase by the Government the chief was notified to get off the island, which he refused to do. An ejection suit against the heirs of Chief Sho-wa-no was begun in the United States Court at Marquette. The case for the defendant Indians was undertaken by Harry Chipman, of Detroit, who, we believe, is a grandson of the old chief. In this trial the Government won their case. On the last day before the expiration of the time allowed for a motion for a new trial, under the statute, the costs were paid by a commercial agent of the United States, then of Sault Ste. Marie. Wm. B. Cody, of Detroit, was then asked to take up the case and bring it to trial in 1897, F. M. Clergue, then at the head of the Lake Superior Power Co., of the Canadian Sault, having interested himself in behalf of the Indian claimants. The Government was defeated this time, the title of the Indians being undisturbed, it being shown that the deed from the old chief to Brown had not been executed. The persons in the group were in court as witnesses and named as follows:

No. 1, upper left hand corner, John Boucher, a halfbreed Frenchman about seventy-five years old, who has always lived at or about the Sault; has been a fisherman, guide and hunter. Boucher has always been in demand for woods hunting as well as a safe guide in shooting the rapids

with his batteau. He was a fine type of the early *coureur du bois* and *voyageur*.

No. 2, right hand upper corner, Louis Jean Baptiste Cadotte, a different kind of man altogether. He was grandson of Jean Baptiste Cadotte, who came from France to Quebec as factotum of M. Pierre le Gardeur, Sieur de Repentigny, who was buried in Montreal in 1736. This family of Repentigny might be cited as an example of how prolific are the French when transplanted to the banks of the St. Lawrence. Pierre le Gardeur was the eldest son of the twenty-one children of Jean Baptiste le Gardeur de Repentigny and Marguerite Nicolet. The Cadottes were Bourgeois in their home country, but respected by their superiors. This Sault Cadotte, the subject of the picture, was rather a remarkable man, being considered a daring, reckless character two-thirds Indian, one-third French, a typical vagabond Indian. He was not sought for as the man to take one safely through the rapids.

No. 3, lower left hand, in the row, is Louis Sha-wa-no, a Chippewa chief, and one of the litigants in the "island case." An educated man who received a collegiate education at Brown University and was intended for the ministry. After graduation he became interpreter for the Canadian and U. S. Governments in the negotiations of the treaty between the Indian tribes in their respective territory. He read and wrote French and English and was familiar with a

PIERRE CADOTTE AND GROUP OF CHIPPEWA INDIANS.

large number of Indian dialects. He was half brother to the man sitting at his left, who is Kaw-baw-gam, the hereditary chief of the Chipewas. The old chief died in extreme poverty several years ago at the age of 103. Kaw-baw-gam was a tall, intelligent-looking Indian, quite a remarkable type of the original owner of the soil, and in his little cabin on Presque Isle, a short distance from the city of Marquette, was much sought after and lionized by tourists and those interested in viewing the relics of a vanishing race. Kaw-baw-gam was not averse to getting out his Indian chief's costume—feathers, leggins, bow, arrows and all, and attiring himself in these cheap glories, posing for kodak artists in search of novel subjects, from whom he accepted small gifts of cash, tobacco or whatever happened to be a "circulating medium." Very rarely did the old chief indulge in the fire water which had wrecked his race.

### We Have Seen It.

CHICAGO, Ill., June 12.—*Editor Forest and Stream:* I have just had the pleasure of reading your editorial on The Amateur Farmer in which you say, "A bird warbles in the trees near by. He knows it is a thrush by the red throat and the gray breast streaked with brown." I wish to tread softly, but what thrush does have a "red throat and a gray breast streaked with brown?"

The inspiration the early riser gets from the birds' concerts in the early morning hours of the spring is worth the price of shortened slumber. We get the most enjoyment from several pairs of brown thrashers nesting around our house, one pair having builded their nest in a thorn tree which rubs the corner of the veranda. During the early morning hours one of them takes his position on the topmost branch of an oak tree and gives a classical concert which is startling in its brilliancy.

Last summer I saw a thrasher engaging a snake on our lawn. The thrasher had a nest in a small thicket, and to all appearances the snake was being driven away from it by the attacks of the bird, which consisted of short rushes and a savage prick whenever the snake would uncoil and start to move. The brave bird won, and the snake, which was a small one, made his escape.

RUPERT STARBIRD.

In changing address, the old as well as the new should be given.

# Fishin' With 'er Jonah

By MIQUE WEBB

(Concluded from last week.)

THE outlet was not more than four feet across. With one foot on the bar and the other stretched toward the bank, I could almost straddle it. The water in it was very shallow, but swift. Thinking to save the life of my minnow on the hook, I dropped him into the outlet. I dropped my pole on the sand and noticed as I turned away that the water was not deep enough to hide the stiff gut snood which was sticking above the surface.

I retraced my steps and took my seat on the root. My pipe gave out and I grew drowsy and fell asleep. While asleep I dreamed that I was in a desert. I was awfully thirsty and hungry. A cloud came up and blotted out the sun. I welcomed it. I looked up at it. It was a curious cloud. It seemed to be boiling. I watched it closely. Yes, it was boiling. What was that I saw in it? A speck of brilliant green and then of red, and then little things like grains of corn. It was phenomenal. What was it? As I watched it I grew more and more in need of food. Suddenly it began to rain. A drop or two hit me. I looked at one of them closely, and being very thirsty I sucked the cloth where it struck. Wonders! It was soup—vegetable soup. I felt something hard in my pocket. Running my hand therein I pulled out a fork. I woke up. Surely, this was a day of hard luck. Caught in the desert—starving and thirsting, raining soup—and me with a fork in my pocket.

But I was awake. It was all a dream. Yet my hunger was just as much awake as when I was asleep. I looked around and there was the lunch. But I must wait for my friend. It would not be the act of a gentleman to eat his half of a lunch, while his friend was away. I must wait a reasonable time, anyway. I tried to wait, but the stomach was insistent. It was torment. I stood it as long as I could, then broke the seal of the paper around it. I broke it slowly, hoping my friend would reappear while I was in the act. The lunch was open. He did not come. I cut the box of sardines. They looked so good in the glistening oil. I placed one on a cracker and before I knew it was greedily devouring it. I would not eat over half of the lunch. I promised this to myself when I found I had really started and could not easily stop. In a short time my half of the sardines were on the inside of me. I tried the cheese. It was dry eating in comparison to the sardines. I choked on it. Had to go to the creek for water. On returning my throat began to hurt me. I would eat one more sardine. The oil would relieve the pain. The stomach demanded more, and I kept on nibbling on them until all were gone. How would I explain this to my friend? I was mortified over my hoggishness. I had an argument with myself. I changed I to we and we had it up and down. It was like a convention. Conscience, brain, stomach, eyes and nearly all the other organs of the body had something to say. After all what would we do about it? Cunning and crafty came up with their sneaking, devising advice. I listened to

them and we fixed up a scheme. We would take the sardine can and bury it and say nothing about sardines. We would let it appear as if we had not brought any sardines with us.

So I took the empty can down to the creek, secured a sharp stick, dug a hole in the sand and was about to consign it to mother earth when I noticed my minnow bucket was extending up and out of the water several inches. I set the can down and ran to it. I opened the lid to find that about half of my fine minnows were dead. Some of them were dead—very dead—so dead that their stomachs were distended. Some were just dead, while others were gasping their last gasp. I took all of the dead, very dead, sick and dying out of the bucket and laid them out on a smooth stone. Then I took the balance back to the creek and resubmerged them. I had to go much further out to get to water deep enough to hide the bucket. The cattle in their irrigating process were causing the creek to fall rapidly. I then went back to finish burying the can and happened to notice the minnows on the rock. Suddenly I had an idea.

Old crafty put me wise. The sardines and the minnows looked very much alike. All the minnows needed to make them duplicates of the sardines was oil. I had the oil in the can. This is about as near as I ever came to old John D. I "iled" the minnows. When I got through they looked so good I was tempted to try one. But here a doubt arose in my mind. Were the heads cut off of the sardines or not? I had a dozen in me, but could not answer the question. I cut the head off of one. There was a little blood. I decided that heads on was best. I tried to pack them back into the box. They wouldn't fit. Sardines are compressed into the box. I couldn't compress the minnows. I compressed by putting only six where a dozen had been before. This worked, and I carried them back to the lunch paper and fixed all as it was before.

Conscience was giving me a little trouble by this time, and like a murderer I wanted to get away from the scene of my crime. I feared the return of my friend, and I would be unable to keep my face straight. I decided I would get my tackle and minnows and go up the creek. I went back to where I had left my pole. I picked it up and began reeling in. The hook was hung to something solid. I caught the line and gave it a hard pull. It would not give way under the strain. The water being shallow, I decided I would run my hand down and release the hook. My hand went down to the snood and on. It came in contact with something smooth and slick, and the next second my index finger was in a vise. I jerked my hand violently out of the water and out of the vise. My finger was cut and bleeding. The pain of the bite, for this was what it was, I was sure, was enough to make me shake my finger violently and screw up my face. I was very much alarmed and my alarm increased as time went by. I raced back

to the tree and found a flask. Needless to say what was in it. I connected with it, and in a short time could hear myself think. I was sure I had been bitten by a snake. When this conclusion sank into my brain, I connected with the flask again, and as the "kick" became stronger, my courage began to return. Doubt and reason asserted themselves, and I secured a sharp stick and returned to the stream.

I pulled hard on the line and dug into the bottom with the stick. In time I raised the enormous head of a bullhead catfish into view. He was a monster. I finally got him out on the sand and judged his weight to be about eight pounds. He was over two feet long. Some fish! How on earth could he have concealed himself in so shallow water? I must unravel the mys-

ter; many fish—the sardines and the cat. Who was the Jonah?

I still wanted to get away before my friend came in. I dragged my cat up to a bush and cut loose from him, leaving line enough for a halter. After tying, I dropped him back into the water and gathered up my rod and proceeded up the creek.

I returned about two hours later and found my friend sitting on one of the roots of the tree. He looked disconsolate—down in the mouth—all in and ready to go home. I did not come upon him suddenly. He was much larger. I slipped around and came on him from behind. I had a view of the surroundings before I disturbed him. I saw the sardine can lying empty on the ground. It looked as if it had been

reaches a certain stage of life. Sometimes they miss this exact stage—pass beyond it—and then they must grow up and be tadpoles all the balance of their lives. It is a freak of nature. When this happens we have what the negroes call a bullhead cat." Having delivered himself and having, as he thought, turned the Jonah on me through superior knowledge, he climbed the bluff and was soon complacently sending wreaths of smoke curling upward as he seated himself on one of the roots.

I put my fish back into the stream, gathered up my tackle and joined him. I was not feeling very good. What he had said about my fish was rankling in my brain. I however had made up my mind to take the fish back to town with me. As I joined him I asked with suppressed quietness, "Did you get your lunch?" He nodded and showed a disposition not to be social. I was relieved as he had said nothing about the sardines.

I left him and went back up the creek again and while I was gone he played a mean trick on me. He gave my fish to a darkey, explaining that the thing was not fit to eat, to me, when I returned. We had some words about this. I expressed myself rather emphatically. The fish had been caught in such a remarkable manner that if the story were told to others on our return, we would need evidence to prove it. The fish was gone and my most tangible proof was gone. I wanted to tell the tale. I wanted to prove my friend a Jonah when we returned. I thought the matter over and wanted to know which way the negro went, thinking I would follow him up and get my fish back. My friend didn't know or his answers were evasive. I never recovered my fish.

I was rather disgusted and proposed that we go home. To this he readily assented. We didn't thaw out to each other the whole way back, but at one time I nearly exploded with laughter and came near giving myself away on the sardine joke. He asked me for a tooth pick. I gave him one and soon saw him gouging away at his teeth. And then he ran his finger in his mouth and brought a little fleck or scale out on it. It was a little fish scale off of one of the steel-back minnows. He turned to me and said: "Where did you get those sardines?"

"I got them from Mr. B.'s grocery. Did you notice the brand? They were the 'steel-back' brand. Mr. B. said they were very fine. I don't like sardines, and I left them all for you. How did you like them?" I said all of this very rapidly to cover my pent-up laughter.

"Well," he answered between picks on his teeth, "they were the rawest tasting sardines I ever struck." I nearly fell out of the rig.

When we reached home I couldn't keep my experience with the catfish to myself. I related the story to others. They went to my friend for proof. I had also branded him a Jonah. He solemnly and emphatically stated that I had had some kind of a dream. That no catfish or any other kind of a fish had been caught except the minnows. I retaliated with the joke about the sardines and made him own up on all when we went to the grocer's for proof.

The happy man who always sings  
And who is free from debt,  
Is he who does not want the things  
He knows he cannot get.

—Cincinnati Enquirer.

"I SLIPPED AROUND AND CAME ON HIM FROM BEHIND."

tery. I picked up a board out of a pile of drift near by and dropped it in the water just above the place where I had dug him out, edge down, thus damming the current for a moment. In this way I got a view of the bare bottom. The fish had been buried in the soft mud. There was his grave filled with muddy water. And there were also the tracks of the steers on the bottom. It was all explained. By actual and circumstantial evidence. I figured it all out. The fish had been run out of his swimming hole by the steers and had tried to make his escape through the channel, but had been trod upon by one of them and mashed into the mud, the softness of the mud probably saving his life. He was lucky and so was I. He was starving and I had dropped food into his mouth. I was alone; my friend was away. I had caught fish in his ab-

scoured. The bottom of it was as bright as a new dollar. I was reassured and boldly accosted him.

"What luck?" I asked.

"Same old seven and six," said he.

"What! you didn't find any more baptizings, did you?"

"No, but I didn't catch any fish, which is just as bad or worse. You had any luck?"

"Yes—a little."

"Let's see what you got?"

Here he showed a little more interest. We went down to the creek and I pulled up my bullhead cat. I explained all. He looked sheepish, finally saying, "That's no fish; that's a tadpole." And then he went into another dissertation about fish and tadpoles. He said: "The tadpole, you know, turns to a frog when he

# The Pointer

By WALTER H. DEARING

THE evolution of the gun has played such an important part in the development of the pointer that the relationship of these two adjuncts to the hunting field appears to be so closely intertwined in their gradual changes of outward aspect, and their method of fulfilling their respective inanimate and animate duties, as to almost leave an impression that the two have been ordained by the hand of fate to travel along the same road to their journey's end. No doubt if the countries in which the pointer has been reared and developed were inclined toward the Mohammedan belief that "the fate of every man (and every dog) is hanged about his neck," there would be a general tendency to believe that the pointer is destined to keep on developing until the period of universal peace shall have come, when the lion shall lie down alongside of the lamb," etc., and the need of firearms shall have disappeared from the face of the earth. At least, we would seem to be justified in accepting some such belief as this, were it not that our methodical methods of reasoning lead us to look from cause to effect, and in so doing we are forced to the conclusion that the gunsmith has been the cause and the pointer the effect, and that the hand of fate has had very little to do with the whole business.

At any rate, the old Spanish pointer is quite generally supposed to have gained his popularity when the flint lock gun first made its appearance on the hunting field. Up to that time hunting had been carried on by means of a net, and setters and spaniels had been used almost exclusively. It was customary at that period to drive the game into the net, and when the gun was finally brought into use in the hunting field, the Spanish pointer was evidently found to be better adapted to its use than the old-fashioned spaniels and setters of that day, and in consequence of his natural adaptability to this line of work he practically superseded all other breeds as a field dog.

But the old flint lock gun with its clumsy appendages could not satisfy the inventive genius of man for long, and it disappeared as most clumsy inventions do, to give place to the lighter firearms of a later period, and with the change came a demand for a faster dog to keep pace with the more modern gun. In consequence of this demand, the Spanish pointer appears to have been crossed and recrossed with one or more of the other breeds, probably the greyhound, or with an indirect cross of the greyhound, through the foxhound, or possibly both. So that if the old Spanish pointer became popular through the advent of the gun in the hunting field, he also became distinctly unpopular through its later developments, and was eventually forced to give place to the modern pointer through a series of crosses and recrosses that led from the keen-scented but clumsy old dog to the lithe-limbed animal of to-day; then from the old-time blunderbuss to the modern shotgun.

There were those who contended that while speed and beauty had undoubtedly been attained by the development of the pointer, he had during the process lost much that his ancestor, the

Spanish pointer, had possessed. The extreme delicacy of scent of the latter had always been one of his greatest advantages, and it was thought by these critics that in crossing with the hound the pointer had inherited the hound tendency to track its game through the foot scent, rather than through the body scent, and

STAUNCH IN ANY POSITION.

that this tendency led to pottering (nosing about with their heads to the ground). Continuous breeding to the best strains has produced a breed of dog that would be hard to surpass, however, and the habit of "low hunting" or looking for the foot scent is not met with to anything like the extent that it was in former years. The modern pointer possesses all of the fineness of scent of the old-time breed, combined with the speed of the foxhound. In some cases he is almost as fast as a slow greyhound, and has all of the latter's graceful beauty of outline, accentuated by an appearance of strength and stability that is all his own.

The pointers of some thirty years ago were said to remain on point for hours unless dis-

turbed, and it is thought by many of the early writers that some of them would have stayed in a state of catalepsy until exhausted for want of food had they been allowed to do so. It seems improbable that any of the modern pointers would stay at point for such a length of time, and it would not be a particularly advantageous attribute for them to possess even if they would.

It would hardly be a source of gratification to an owner of a well-bred young dog to know that the animal was liable to wander off some day, and upon discovering a pig stall or cow barn, become suddenly cataleptic and refuse to leave the spot until told to do so. And as many young dogs are apt to point at almost anything they come across during the first stages of their training, especially when trained by amateurs, such an incident might very easily occur. Even a pointer might find it advantageous at times to know when to quit.

It would not be appropriate for me to try to pass upon the much mooted question of the merits of the pointer as opposed to those of the setter. Both dogs have their adherents who swear by them as the *summum bonum* of perfection, and both of these opinions undoubtedly are correct. They each have their particular advantages for particular varieties of country and clime, but aside from this the question probably rests largely on individual experiences, and where you find one man upholding one breed, you will quite probably find his next door neighbor upholding the other with equal force and logic. Both would be right in the light of their individual experiences. A great deal depends upon the dog—and the man that owns him. For this reason I prefer not to rush in "where angels fear to tread" in an attempt to settle a question that has been argued by men who have grown gray in the dog and hunting fraternities without any apparent advantage on either side.

Mr. Root, who for many years acted as secretary of the Pointer Club, claims a distinct advantage for the breed in the fact that the pointer does not as a rule need to be broken to his work twice within a year. When once broken, he seldom forgets, and a man who has properly trained his dog in the early part of the year need not fear that he will be put to the arduous, though not unpleasant task, of breaking him again in the fall, when the hunting season sets in. This is naturally a great advantage to the man of small means who has little time to himself, and who cannot afford to employ a professional trainer, or to the business man who cannot get away from his desk for more than a limited period of time and prefers breaking his own dogs for the pleasure he derives from it.

The claim that the pointer cannot stand the heat upon the heather of the moors, or endure the cold as well as the setter, because his feet are not as well protected and his coat is thinner, and he does not possess the advantages of the setter's thick hair, is often refuted by sportsmen who have used him as a hunting dog in a country where he has been forced to meet with all of these adverse conditions, and has come off with flying colors. They are willing to admit that nature has protected the setter in the points mentioned to a greater extent than has been the case with the pointer, but claim that the latter performs his work under all cir-

cumstances without the slightest hesitation, and with very little inconvenience to his physical well being. Here again the individual ability and disposition of the dog probably has a great deal to do with the answer to the point at issue.

The pointer is said to be steadier than the setter, but not quite so fast. That he can travel fast enough to suit the average individual, and to meet the requirements of the hunting field would hardly be disputed, even by the greatest speed crank that ever tried to smash the world's record in a ninety horsepower automobile. The renowned English pointer Drake is said to have possessed speed enough to cover ground at the ratio of fifty miles an hour, which appears to be going some, all things considered. The best part of Drake's performance was that he could stop with a suddenness that made the spectator gasp for breath, and always landed about the same distance from his game, giving evidence of his wonderful scent and discretion. It is said that he possessed "a quiet benevolent countenance while walking about the grounds prior to the

trials." Benevolence was no doubt one of his marks of true greatness, and it is not to be wondered at that he brought 150 guineas at Tattersalls. He seems to have been worth it.

Of course all pointers do not cover the ground with the same tremendous speed that Drake possessed, but as a friend of mine once said of them, "They can usually run fast enough to make a fat man think of home and mother when they once get going." In warm climates there can be no doubt but that the pointer has a distinct advantage over other hunting dogs. His thin coat and lack of woolly hair makes it easy for him to stand the heat better than a dog of a thicker coat could possibly stand it. In the South the pointer has found such favor that he is used almost to the exclusion of other breeds. It is the custom to hunt on horseback in Dixieland, and the well-trained pointer will stay at the point while the sportsman dismounts, and proceeds to take a shot at his game. This method of shooting no doubt suits the sunny Southern temperament, and possibly gives the huntsman a chance to take a refreshing draught

from his bottle of mint juleps (if they use such things) before taking aim at his quarry. Perhaps this is one reason why he is so fond of the pointer whose faithful attendance to duty helps him to hunt without the undue haste and worry that characterizes the Yankee in everything he does.

As a show dog, the pointer is rapidly gaining favor, and can usually be found at any of the bench shows where high class dogs are exhibited. He has not, however, been bred for the show ring to the extent that other hunting breeds have been, and this would appear to be in his favor as a field dog. He is possessed of a high degree of intelligence, and makes an excellent companion about the house or in the open. But his natural atmosphere is so intimately connected with the field that it is difficult to think of him as anything other than a hunting dog, and even when roaming about the house he carries with him an air of outdoor life that almost makes one feel like letting him out to lead the way on a long tramp over the surrounding country.

## Regulations as to Migratory Birds

**A**S directed by the Act of March 4, 1913, the Department of Agriculture has adopted the following regulations:

### Regulations 1. Definitions.

For the purposes of these regulations the following shall be considered migratory game birds:

(a) Anatidæ or waterfowl, including brant, wild ducks, geese and swans.

(b) Gruidæ or cranes, including little brown, sandhill and whooping cranes.

(c) Rallidæ or rails, including coots, gallinules and sora and other rails.

(d) Limicolæ or shore birds, including avocets, curlew, dowitchers, godwits, knots, oyster catchers, phalaropes, plover, sandpipers, snipe, stilts, surf birds, turnstones, willet, woodcock and yellow legs.

(e) Columbidae or pigeons, including doves and wild pigeons.

For the purposes of these regulations the following shall be considered migratory insectivorous birds:

(f) Bobolinks, catbirds, chickadees, cuckoos, flycatchers, grosbeaks, hummingbirds, kinglets, martins, meadow larks, night hawks or bullbats, nuthatches, orioles, robins, shrikes, swallows, swifts, tanagers, titmice, thrushes, vireos, warblers, waxwings, whippoorwills, woodpeckers and wrens, and all other perching birds which feed entirely or chiefly on insects.

### Regulation 2. Closed Seasons at Night.

A daily closed season on all migratory game and insectivorous birds shall extend from sunset to sunrise.

### Regulation 3. Closed Season on Insectivorous Birds.

A closed season on migratory insectivorous birds shall continue to Dec. 31, 1913, and each year thereafter shall begin Jan. 1 and continue to Dec. 31, both dates inclusive; but birds may be collected for scientific purposes according to the laws of the respective States and Territories and the District of Columbia, and provided further that the closed season on reedbirds or ricebirds in Delaware, Maryland, the District of Columbia, Virginia and South Carolina shall begin Nov. 1 and end Aug. 31 next following, both dates inclusive.

### Regulation 4. Five-Year Closed Seasons on Certain Game Birds.

A closed season shall continue until Sept. 1, 1918, on the following migratory game birds: Band-tailed pigeons, little brown, sandhill and whooping cranes, swans, curlew and all shore birds except the black-breasted and golden plover, Wilson or jack snipe, woodcock and the greater and lesser yellowlegs.

A closed season shall also continue until Sept. 1, 1918, on woodducks in Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Ohio, Indiana, Michigan, West Virginia and Wisconsin; on rails in California and Vermont; and on woodcock in Illinois and Missouri.

### Regulation 5. Closed Season on Certain Navigable Rivers.

A closed season shall continue between Jan. 1 and Oct. 31, both dates inclusive, of each year,

on all migratory birds passing over or at rest on any of the waters of the main streams of the following navigable rivers, to wit: Mississippi River between New Orleans, La., and Minneapolis, Minn.; the Ohio River between its mouth and Pittsburgh, Pa., and the Missouri River between its mouth and Bismarck, N. D.; and on the killing or capture of any of such birds on or over the shores of any of said rivers, or at any point within the limits aforesaid from any boat, raft or other device, floating or otherwise, in or on any such waters.

### Regulation 6. Zones.

The following zones for the protection of migratory game and insectivorous birds are hereby established:

Zone No. 1, the breeding zone, comprising States lying wholly or in part north of latitude 40 degrees, and the Ohio River and including Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, North Dakota, South Dakota, Nebraska, Colorado, Wyoming, Montana, Idaho, Oregon and Washington—twenty-five States.

Zone No. 2, the wintering zone, comprising States lying wholly or in part south of latitude 40 degrees and the Ohio River and including Delaware, Maryland, the District of Columbia, West Virginia, Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Tennessee, Kentucky, Missouri, Arkansas, Louisiana, Texas, Oklahoma, Kansas, New Mexico, Arizona, California, Nevada and Utah—twenty-three States and the District of Columbia.

### Regulation 7. Construction.

For the purposes of regulations 8 and 9,

each period of time therein prescribed as a closed season shall be construed to include the first day and to exclude the last day thereof.

#### Regulation 8. Closed Seasons in Zone No. 1.

Closed seasons in zone No. 1 shall be as follows:

Waterfowl.—The closed season on waterfowl shall be between Dec. 16 and Sept. 1 next following, except as follows:

Exceptions: In Massachusetts the closed season shall be between Jan. 1 and Sept. 15. In Minnesota and North Dakota the closed season shall be between Dec. 16 and Sept. 7. In South Dakota the closed season shall be between Dec. 16 and Sept. 10. In New York, other than on Long Island, and in Oregon the closed season shall be between Dec. 16 and Sept. 16. In New Hampshire, Long Island, New Jersey and Washington the closed season shall be between Jan. 16 and Oct. 1.

Rails.—The closed season on rails, coots and gallinules shall be between Dec. 1 and Sept. 1 next following, except as follows:

Exceptions: In Massachusetts and Rhode Island the closed season shall be between Dec. 1 and Aug. 1. In New York and on Long Island the closed season shall be between Dec. 1 and Sept. 16, and on rails in California and Vermont the closed season shall be until Sept. 1, 1918.

Woodcock.—The closed season on woodcock shall be between Dec. 1 and Oct. 1 next following, except as follows:

Exceptions: In Maine and Vermont the closed season shall be between Dec. 1 and Sept. 15. In Massachusetts, Connecticut and New Jersey the closed season shall be between Dec. 1 and Oct. 10. In Rhode Island, Pennsylvania and on Long Island the closed season shall be between Dec. 1 and Oct. 15, and in Illinois and Missouri the closed season shall be until Sept. 1, 1918.

Shore Birds.—The closed season on black-breasted and golden plover, jacksnipe or Wilson snipe and greater or lesser yellowlegs shall be between Dec. 16 and Sept. 1 next following, except as follows:

Exceptions: In Maine, Massachusetts and on Long Island the closed season shall be between Dec. 16 and Aug. 1. In Minnesota and North Dakota the closed season shall be between Dec. 16 and Sept. 7. In South Dakota the closed season shall be between Dec. 16 and Sept. 10. In New York, other than Long Island, and in Oregon the closed season shall be between Dec. 16 and Sept. 16, and in New Hampshire and Washington the closed season shall be between Dec. 16 and Oct. 1.

#### Regulation 9. Closed Seasons in Zone No. 2.

Closed seasons in zone No. 2 shall be as follows:

Waterfowl.—The closed season on waterfowl shall be between Jan. 16 and Oct. 1 next following, except as follows:

Exceptions: In Kansas, Oklahoma, New Mexico and Arizona the closed season shall be between Dec. 16 and Sept. 1, and in Maryland, Virginia, North Carolina and South Carolina the closed season shall be between Feb. 1 and Nov. 1.

Rails.—The closed season on rails, coots and gallinules shall be between Dec. 1 and Sept. 1 next following, except as follows:

Exceptions: In Tennessee and Louisiana the closed season shall be between Dec. 1 and Oct. 1, and in Arizona the closed season shall be between Dec. 1 and Oct. 15.

Woodcock.—The closed season on woodcock shall be between Jan. 1 and Nov. 1, except as follows:

Exceptions: In Louisiana the closed season shall be between Jan. 1 and Nov. 15, and in Georgia the closed season shall be between Jan. 1 and Dec. 1.

Shore Birds.—The closed season on black-breasted and golden plover, jacksnipe or Wilson snipe and greater and lesser yellowlegs shall be between Dec. 16 and Sept. 1, next following, except as follows:

Exceptions: In Alabama the closed season shall be between Dec. 16 and Nov. 1. In Louisiana and Tennessee the closed season shall be between Dec. 16 and Oct. 1. In Arizona the closed season shall be between Dec. 16 and Oct. 15. In Utah, on snipe the closed season shall be between Dec. 16 and Oct. 1, and on plover and yellowlegs shall be until Sept. 1, 1918.

#### Regulation 10. Hearings.

Persons recommending changes in the regulations or desiring to submit evidence in person or by attorney as to the necessity for such changes should make application to the Secretary of Agriculture. Whenever possible hearings will be arranged at central points, and due notice thereof given by publication or otherwise as may be deemed appropriate. Persons recommending changes should be prepared to show the necessity for such action and to submit evidence other than that based on reasons of personal convenience or a desire to kill game during a longer open season.

### N. A. Herons and their Allies.

THE Bureau of Biological Survey, of which Henry W. Henshaw is chief, has just issued an interesting bulletin, No. 45, by Wells W. Cooke, so well known for his studies of bird migration.

It is entitled "Distribution and Migration of North American Herons and their Allies," and includes thirty-two species of which, however, ten are tropical, not ranging north to the United States, and one is a straggler from Europe. Among the species named are several that have no permanent place in the United States fauna, and others that seem to be almost on the verge of extinction. The scarlet ibis and the jabiru have been noted as accidental visitors. The flamingo once bred in the United States, but now occurs only as a rare visitor. The roseate spoonbill, the egret and the snowy egret seem to be approaching extinction, because they have been for so many years—and to some extent still are—shot on the breeding grounds at the breeding time, with the result that parents and young alike are destroyed, and the particular rookery where the shooting takes place is wiped out forever.

It is worth while to read with care these introductory paragraphs of Mr. Cooke's paper:

"The herons have attracted wide attention during late years, particularly because of the earnest efforts that have been made to prevent the utter destruction of the egret-bearing members of the family. The horrors necessarily

attending the collection of the aigrettes have aroused bird lovers to unprecedented activity. As a result, in some parts of the Union stringent laws have been enacted, and the State machinery for bird preservation has been supplemented by large private subscriptions. Probably no family of birds ever had fuller protection on the statute books than is now enjoyed by the herons, while certainly no birds have ever been the recipients of more zealous care than is now accorded to the remaining colonies of the larger and smaller egrets.

"The friends of the birds became aroused none too soon. The large breeding colonies of egrets have been completely destroyed, and only a few scattered remnants exist to serve as centers for re-establishing the species.

"Most herons are colony breeding birds, and this fact has been one of the most potent factors in bringing about their destruction. A colony could easily be discovered by watching the lines of flight to and from the feeding grounds, and the succeeding operations were woefully simple. The hunter merely waited until the egg hatched, and then, taking his stand within the colony, shot the parent birds as they brought food to the young. No matter how much shooting was done, the old birds—then bearing the nuptial plumes in their greatest perfection—continued to return to their hungry young until the last one was killed. The starving of the young and the utter extinction of the colony were necessary sequels.

"So long as these plumes could be sold for their weight in gold, and there was an unlimited market for them, neither State laws nor the efforts of zealous game wardens availed much in checking the slaughter. More hopeful conditions are being secured at the present time by decreasing the market. Already in several of the States it has been made unlawful to sell the aigrettes or even to have them in possession with intent to sell. Could such a law be made general throughout the United States, the killing of egret-bearing birds would cease, because the slaughtered would have no market for his plumes. The birds will never be safe until this condition exists.

"The larger egret and the snowy egret are the two species that have suffered most severely from the persecutions of the plume hunters, but the millinery trade has also levied a heavy toll on many other members of the group. The flamingo has ceased to breed anywhere in the United States. The roseate spoonbill has become extinct over more than half of its former range in the United States, and its total numbers are probably less than 5 per cent. of what they were fifty years ago.

"The reduction of numbers in the other herons and in the ibises has not been so pronounced, but several of the species have been driven from the northern two-thirds of their former breeding range and are now restricted to the wildest and most inaccessible parts of the Gulf States."

#### Optimism.

There is no use as I can see  
In growling all the time;  
The rough bark of a hickory tree  
Ne'er stopped a cheerful lad, if he  
Had made his mind to climb.

—Detroit Free Press.

**Fish Food.**

PASSAIC, N. J., June 1.—*Editor Forest and Stream:* In these days of general lamentation about the high cost of living I am wondering why through ignorance or prejudice so many species of fish are entirely overlooked by market men or private families. Hugh Smith, the new head of the Fisheries Bureau, is undoubtedly correct in thinking that the consumption of fish might be almost doubled. There must be an immense quantity of palatable food in our fresh and salt waters not utilized at all. I hope the new broom will sweep from existence the idiocy of rejecting from our list of edible fishes many a species that is savored with pleasure in other countries. I would like to see Federal instrumentalities put in motion to correct such anomalies.

In my younger days I was fishing once in Butterfield Lake, Northern New York, where my boatmate hooked a four or five-pound fish so strong and active that it took some time to get it on board. The guide said it was a dog-fish and scorned the idea of its being eatable. Here is what Mr. Smith says about this fish: "There is no better fish for table use. The flesh is sweet, tender and delicate, far better than some of our recognized food fishes. It is simply a young shark, and in ten more years we will be eating full-sized sharks and scores of other fishes that we shudder at now. The fish are all right; we don't know they are good, that's all."

More power to the elbows of the new head of the Fisheries Bureau who says "there are scores of varieties of fish that never reach the market." Now, no one knows why exactly.

H. H. T.

**Columbus Anglers' Club.**

COLUMBUS, Ohio, June 14.—*Editor Forest and Stream:* Our Decoration Day tournament was a great success in way of attendance and good time, although the weather was very bad for casting the bait or fly. This kept the scores very low, as you will note by our score sheet.

We had many out-of-town men from other clubs with us which helped to make the interest run high. The scores follow:

Half-ounce accuracy bait casting, per cent.:			
N. L. Bulkley.....	98 9-15	Ralph Pavey.....	95 7-15
Budge Wilcox.....	98 7-15	Al Marriott.....	95 2-3
F. M. Brooks.....	98 3-15	E. R. Rockwell....	97
Dr. S. S. Wilcox... 97 13-15		Dr. L. E. Day.....	93 8-15
A. E. Shatford.... 97 6-15		W. C. Green.....	91 7-15
G. G. Tinkham.... 97 2-15			
Half-ounce long distance bait casting, average three casts, feet:			
N. L. Bulkley.....	145 2-3	A. E. Shatford.....	83
F. M. Brooks.....	132	Ralph Pavey.....	76
Dr. L. E. Day.....	120		
Quarter-ounce bait casting for accuracy, per cent.:			
F. M. Brooks.....	98 2-3	E. R. Rockwell....	97
N. L. Bulkley.....	97 1-5	Dr. S. S. Wilcox..	96 8-15

Accuracy fly contest for club medal—Won by H. Hamilton with 97 8-9 per cent.			
Long distance fly contest for club medal—Won by V. D. Reese, score 61 1-3 per cent.			

We hold our next bait- and fly-casting tournament at Olentangy Park, June 28, and invite any interested angler to contest with us. There will be no entrance fee charges, and prizes will be given the first five winners in each event. The events will be as follows:

- First—Half-ounce accuracy bait-casting.
- Second—Half-ounce long distance bait-casting.
- Third—Quarter-ounce accuracy bait-casting.
- Fourth—Quarter-ounce long distance bait-casting.
- Fifth—Accuracy fly-casting.
- Sixth—Long distance fly-casting.

All events will be run under the N. A. of S. A. rules. The tournament will begin at 2 o'clock P. M.

NELSON L. BULKLEY, Sec'y.

**St. Louis Bait- and Fly-Casting Club.**

ON Sunday, June 15, the St. Louis Fly- and Bait-Casting Club held its regular tournament at the foot of Art Hill in Forest Park. The following events were cast off: Quarter-ounce accuracy, quarter-ounce distance, fishing tackle accuracy, fishing tackle distance, fly distance, fly accuracy, with the following scores:

Accuracy, quarter-ounce, per cent.:			
Solomon.....	93 9-10	Pingree.....	97 3-10
Schloeman.....	98 2-10	Fred Werner.....	98 3-10
Hellman.....	97 7-10	Ed. Werner.....	97 1-10
Geist.....	97 6-10	Steinmesch.....	93 9-10
Ashton.....	97 2-10		
Distance, quarter-ounce, average five casts, feet:			
Solomon.....	61 2-5	Pingree.....	66
Schloeman.....	104 2-5	Fred Werner.....	46 2-5
Hellman.....	84	Ed. Werner.....	55 1-5
Geist.....	133 3-5	Steinmesch.....	64 1-5
Ashton.....	59 3-5	Robirds.....	107 4-5
Accuracy, half-ounce fishing tackle, per cent.:			
Solomon.....	95 4-10	Fred Werner.....	97 7-10
Schloeman.....	99	Ed. Werner.....	97 8-10
Hellman.....	97 9-10	Steinmesch.....	92 1-10
Geist.....	97 6-10	Heyman.....	91 2-10
Ashton.....	94 4-10	Martin.....	94 8-10
Pingree.....	96 6-10		
Distance, half-ounce fishing tackle, average five casts, feet:			
Solomon.....	68 3-5	Pingree.....	118 2-5

Elgin Anglers' Club.

ELGIN, Ill., June 15.—Editor Forest and Stream: The scores of the Elgin Anglers' Club contest of June 15 are as follows:

Table with columns for names, quarter-ounce distance and accuracy, and half-ounce distance and accuracy.

R. F. KADOW, Sec'y.

The Anglers' Casting Club of Chicago.

CHICAGO, Ill., June 15.—Editor Forest and Stream: Following are the scores of the Anglers' Casting Club of Chicago which were held to-day:

Table with columns for names, half-ounce accuracy, half-ounce distance, and accuracy fly.

Record Striped Bass Season.

A PHENOMENAL run of large striped bass has been recorded at Asbury Park and vicinity. Eight stripers were caught, weighing 229 pounds 6 ounces, averaging 30 pounds each. Scores:

Table listing dates and names of anglers with their respective scores in pounds and ounces.

Forest and Stream will give a weekly digest of Yachting and Motor Boating events from all over the country.

Seawanhaka-Corinthian Y. C.

IN a windless race, the New York Y. C. 50's and 30's "contested" to-day. It was necessary to shorten courses in order to finish in daylight. If protests are not entertained, results are as follows:

Table listing race results for Seawanhaka-Corinthian Y. C., including N. Y. Y. C. Fifties, Thirties, and various class races.

Crescent A. C.

GHERARDI DAVIS's Alice, in Class Q, won the principal prize in the annual spring regatta of the Crescent Athletic Club, sailed on Gravesend Bay last Saturday. M. & F. II. and Cyril, S class racers, had a close fight, M. & F. winning. The division was won by Oriole. For the third straight time Skylark led home the knockabouts. The race was managed by C. A. Kelly and W. F. Straukamp of the regatta committee of the Crescent Athletic Club. The summary:

Table listing race results for Crescent A. C., including Sloops, Handicap Class, and Gravesend Birds.

Bayside Y. C.

GEORGE CORRY's Little Dipper and Billy Newman's Evening Star, had a set-to, with Corry a winner by 4s. The summaries:

Table listing race results for Bayside Y. C., including Star Class, Bayside Birds, and Special Class.

Chicago Y. C.

CHICAGO, Ill., June 22.—With Lawrence Heyworth at the wheel, J. O. Heyworth's yawl Polaris won the triangular race, the last leg from St. Joseph to Chicago, ending the cruise. Details of the last leg were received too late for publication in this issue.

Polaris was first over the line at St. Joseph, leading the schooner Valmore by 24m., adding time allowance. Polaris won by 35m. 57s.

The schooner Valmore was the scratch boat and crossed the line at 4:00:30, taking seven hours and thirty seconds to make the beat from Michigan City. The new class P racer Olympian, sailed by J. O. Heyworth, finished 1m. 52s. corrected time behind Valmore, walking easily away from Michigan, which beat her yesterday from Chicago to Michigan City. The summary:

Table listing race results for Chicago Y. C., including Polaris, Valmore, and Olympian.

Tocsam Wins Ocean Race.

THE motor boat Tocsam, owned by William Mulford, of Ocean City, N. J., crossed the finish line off Bay Ridge, Brooklyn, at 4 A. M. Saturday, winning the Crescent Athletic Club trophy for a return race from Bermuda. Barbara II. crossed the finish line at 9:24 o'clock Friday night, but because of the rating could not win

with less than an eleven-hour margin. The two boats, having competed in the Philadelphia-Bermuda race, left Hamilton for the return at 6:27, June 17. Dream, winner of that race, did not participate in the return contest.

Valiant III. Victor on Jamaica Bay.

VALIANT III. won the first race of the Diamond Point Y. C.'s season on Jamaica Bay. Four boats took part in the contest. The points scored count on a season's prize. The summary:

Table listing race results for Valiant III. on Jamaica Bay.

A. C. A. Membership.

NEW MEMBERS PROPOSED.

Atlantic Division.—J. Cashman Flynn, Mount Vernon, N. Y., by R. W. J. Flynn; Robert H. MacDonald, 158 Wright street, Newark, N. J., by Edmund vom Steeg, Jr.; Charles A. Crumm, 495 West 130th street, New York, N. Y., by F. C. Buchenberger; J. Walter Greenbowe, 401 Monastery street, West Hoboken, N. J., and J. Fred Greenbowe, 401 Monastery street, West Hoboken, N. J., both by Thomas Zuk.

Central Division.—Earl B. Zahn, 127 College street, Buffalo, N. Y.; Philip W. Colby, 99 Livingston street, Buffalo, N. Y.; Alexander D. Brush, 321 Fargo avenue, Buffalo, N. Y.; Ray Barrett, 61 California street, Buffalo, N. Y.; Frank Schneider, 43 Potomac street, Buffalo, N. Y.; Alfred J. Bell, 210 Prospect avenue, Buffalo, N. Y., and Milo H. Jones, 341 Bird avenue, Buffalo, N. Y., all by Arthur Hubbard; George W. Billings, 35 Granger Place, Buffalo, N. Y., by W. B. H. McClelland.

Western Division.—Charles C. Dunbar, 1115 Lake avenue, Wilmette, Ill., by A. W. Friese; Donald G. Clark, 5921 Kenmore avenue, Chicago, Ill., by Robert F. Abercrombie.

NEW MEMBERS ELECTED.

Central Division.—6680, John F. Fairbain, 131 Allen street, Buffalo, N. Y.; 6681, Harry Turner, 374 Bird avenue, Buffalo, N. Y.; 6682, Edmund B. Ralph, 88 Pascal, Buffalo, N. Y.; 6683, A. C. Davis, Chamber of Commerce Building, Buffalo, N. Y.

**That Record Breaking Score.**

LAKE FOREST, Ill., June 9.—*Editor Forest and Stream:* Your letter pertaining to my American round score of 90-682, made on Monday, June 2, while shooting with Prof. Thomas, is at hand. Had I shot the round alone I would under no circumstances have divulged the score, and even now hesitate giving the matter publicity. I will let you know the details on condition that it be kept secret until Prof. Thomas himself writes to you, and confirms the various items. Whatever he may write, you may use as you please, but I am not anxious for more notoriety than has fallen to my share during the last year. Following are the details:

Prof. Thomas came to my grounds at 3 P. M. on Monday afternoon, and we started to shoot the team round. We counted our first end of arrows. The first thirty arrows at 60 yards scored as follows:

6 44	6 44	6 44	6 46	6 46	Total.
					30 224

This was ten better than I had ever shot before, and as I felt free from my almost chronic nervousness and in good form I got the idea that if I would ever equal Maxson's score of 90-666, then was the time to do so. I therefore asked Prof. Thomas to change the intended round from the team to the American, which he kindly consented to do. At 50 yards my scores were:

6 46	6 50	6 40	6 40	6 52	Total.
					30 228

After shooting the fourth end I became aware that the chance to win was slipping away, so I forced myself to take a brace and got 6-52 for the fifth end. My score for the 40 yards distance was:

6 46	6 48	6 50	6 44	6 42	Total.
					30 230

The last two ends at 40 yards are comparatively poor. I knew I had the record beaten, and the strain broke the camel's back. Consequently the poor work in the last two ends. The final scores was 90-682.

I do not imagine that I could ever again duplicate this score; it was simply a flash and away ahead of my true form.

The light was fair; that is, not too strong, and the wind moderate; rather below our Lake Forest average. I had distinctly seen no point of aim at 60 yards, but judged its location subconsciously. At 50 yards a small space of bare ground helped me, while at 40 yards a darker patch of grass proved of assistance. In every case I had my direct vision on the gold and the indirect or secondary vision on the point of aim, which I need for elevation purposes only and not for lateral alignment. It is but fair to say that I had a good idea of the location of the required points of aim from previous shooting on the same range, though these vary from day to day, depending upon various con-

ditions, such as the condition of my bow, the release, the height of the grass, wind and illumination.

I did not get any arrows in the white circle, and but one in the black, at one of the ends at 60 yards. The number of golds I do not know, as I failed to score each separate arrow. I suppose forty would be a fair average, as I do not remember having less than two at any end. The best end was at 50 yards, viz.: 9, 9, 9, 9, 9, 7, 6-52. At 50 yards and also at 40 yards the next best ends were 9, 9, 9, 9, 7, 6-50.

E. J. RENDTORFF.

The following letter is from Prof. Thomas, of Lake Forest College:

Lake Forest, Ill., June 10, 1913.

I have intended for some time to send the inclosed scores made by Mr. Rendtorff, on June 2, and this is in reply to your note of inquiry to him. It was magnificent shooting. My score was but little more than half of his.

(Signed) M. BROSS THOMAS.

The practice score which Mr. Rendtorff displaces was made by Louis W. Maxson, of Washington, D. C., July 11, 1890:

Mr. Maxson was one of the greatest archers we have ever had, and his score which has withstood all attacks for twenty-three years was:

60yds.	50yds.	40yds.
6 36	6 52	6 52
6 46	6 36	6 52
6 46	6 42	6 46
6 36	6 44	6 42
6 46	6 42	6 48
30 210	30 216	30 240
	Total, 90 666	

Once at the 50-yard range and twice at the 40 yard, he made ends of five golds and a red. This score was the third made on the same day; the others were 90-630 and 90-648.

He used a horseman's yew, backed with a hickory 48-pound bow. He also had a positive point of aim. At 60 yards it was at the top of the target, at 50 yards at the lower edge of the target, and at 40 yards at the bottom of the rear leg of the stand. He drew to the corner of the mouth. At full draw his fingers rested firmly at the same spot on his chin, and he "released with a sharp straightening of the fingers from that absolute rest."

It seems almost too bad that the shooting was changed from the team to the American round, for although as far as we know the best American score was beaten, there was a fine chance to surpass any 60-yard shooting yet done in this country.

The score of Mr. Rendtorff's first twenty-four arrows at 60 yards was 24-178. It is not probable that he would have kept up this rate for ninety-six arrows. But could he have done so, he would have made a team round of 96-712. We like to day-dream of these things.

Other high scores made in this country with twenty-four arrows at 60 yards are given below:

M. Thompson..... 24 176	W. A. Clark ..... 24 176
Col. Williams, Jr... 24 176	F. C. Havens..... 24 168

The following English scores are reported in the Archery Guide, by Will H. Thompson:

H. A. Ford ..... 24 188	C. E. Nesham .... 24 160
H. A. Ford ..... 24 164	W. Butt ..... 24 160
C. H. Fisher ..... 24 166	

Should any errors in these figures be noticed, or if any high scores have been omitted, we trust that we shall be notified of the same.

**Send in Your Scores.**

CHICAGO, Ill., June 9.—*Editor Forest and Stream:* Thompson wrote years ago: "To the earnest and thoughtful toxophilite, the study of the fine performances of his brother archers is always a source of pleasure, and is not without valuable results. It is said that 'we grow like that we contemplate,' and the careful examination of the records left us by the veterans of our craft reveals to us the wonderful possibilities of the bow when wielded by the trained hand of the finished archer."

Why is it that archers are so backward about sending in their scores? I believe they make as interesting reading as anything published, and yet in your two last issues there was not a score, which was made this year.

It seems to me that it is a duty which every club owes to the sport, to send in the complete scores made in all club meetings. I should not expect one who went out alone, and made a poor score, to report it; but if in practice an unusually high score should be made, neither modesty nor the fear that an equally high one might not be made in a subsequent public meeting should prevent its being published.

I have been requested not to make public some of the scores, which I am sending you, but I am breaking no promise in doing so.

E. J. Rendtorff has recently made the following scores:

Double American round:			
60yds.	50yds.	40yds.	Total.
30 178	30 204	30 222	90 604
30 180	30 206	30 240	90 626
			180 1230
Double York round:			
100yds.	80yds.	60yds.	Total.
57 269	47 255	24 134	125 658
56 260	40 208	24 136	120 604
			248 1262
Team round, 96 arrows, 60yds.:			
24 166	24 148	24 130	24 144
			Total. 96 588

In this round, shot in the Chicago Archery Club weekly meet, there was one end of five golds and a blue, and another of five golds and a black.

In FOREST AND STREAM for April 19 there was published a wonderfully fine 20-yard score, 30 arrows, 30 hits, 262 score, made by the Rev.

(Continued on page 835).

### THE OBJECT OF THIS JOURNAL

will be to studiously promote a healthful interest in outdoor recreation, and to cultivate a refined taste for natural objects.

—FOREST AND STREAM, Aug. 14, 1873.

### FEDERAL SHOOTING REGULATIONS.

The regulations called for by the Agricultural Appropriation Bill, placing all migratory birds under the care of the Department of Agriculture, have been issued. They constitute a document of extraordinary interest to all who use the shotgun.

As will be remembered, the bill provides that these regulations shall be made public, and that a period of three months shall be allowed during which said regulations may be examined and considered before their final adoption. Public hearings on the regulations may be held when deemed proper, and after their final adoption the regulations shall be approved by the President of the United States.

In drawing up these regulations the Department has had in mind certain important principles. Its purpose has been to prevent spring shooting; to protect migratory birds between sunset and sunrise; to provide protected flight lines along at least three great navigable rivers; to make seasons approximately equal in different parts of the country; to limit the shooting season to a maximum of three or three and one-half months; to regulate these seasons so that there may be a reasonable opportunity for having thirty days' shooting of any species at any given place; to provide separate seasons for waterfowl, rail, shore birds and woodcock, and to utilize all the protection now extended by close seasons under State laws.

The various groups of birds are defined by the common names adopted by the American Ornithologists' Union. Night shooting is forbidden everywhere, as already it is forbidden in about one-fourth of the States. All insectivorous birds are protected. On certain species—most shore birds, cranes, and in some States on rails, woodcock and some other birds—a five years' close season is established.

The country is divided into two zones—one known as the breeding zone lying north of latitude 40 degrees and the Ohio River; the other the wintering zone, comprising the territory lying wholly, or in part, south of latitude 40 degrees and the Ohio River. For these certain seasons are established, but as will be seen in another column, there are some exceptions to the seasons established.

In forming these regulations, the effort has been to work for the greatest good of the greatest number, and so, in certain localities where peculiar conditions exist, the regulations may not be wholly satisfactory. At any hearings which may take place in the next three months, the conditions which cover each species of birds through its harangue should be considered rather than those of any particular territory. The regulations will go into effect Oct. 1, 1913.

Sportsmen will do well to study carefully the regulations as printed elsewhere.

### CALIFORNIA VICTORIES.

The fight in behalf of wild life in California which has been going on for the past six or eight months seems to have resulted in the triumph of the right, and this in the face of a number of handicaps. A great change seems to have come over public sentiment in California, and while that State for many years has been more or less inert and careless about the protection of game, the present Legislature has passed a number of excellent amendments which are now in the Governor's hands, and two or three of them, it is understood, have been favorably acted on.

The change began in November last, when at a meeting held in San Francisco, at the rooms of the Sierra Club, the California Associated Societies for the Conservation of Wild Life was suggested. Headquarters were established at the California Museum of Vertebrate Zoology, and about 10,000 people brought together with a view to educating the public and stimulating legislation in behalf of this great natural asset. Money was raised, publications issued, and the work energetically carried on. There was plenty of opposition, notably from the Hotel Men's Association of California, and from certain newspapers.

Spurred on by this organization, a variety of important bills were passed by the Legislature as follows: (1) Sale of band-tailed pigeons and wild ducks forbidden, but ducks may be sold during November; (2) shipment of protected wild game forbidden; (3) civil service for fish and game wardens; (4) propagation of wild game in captivity provided for; (5) use as food of birds shot destroying crops prohibited; (6) possession of plumage of wild birds prohibited; (7 and 8) bag limit on ducks and quail fifteen a day and thirty a week; (9) license to hunt or fish; (10 and 11) fish and game commission may carry on educational work or scientific investigation as necessary, and appropriation of \$5,000 for this purpose; (12) aliens prohibited from hunting and bearing fire arms; (13) absolute protection to all rails, shore birds, except Wilson snipe, band-tailed pigeon, woodduck, ibis, sea otter.

The Governor is reported to have signed the no sale, no shipment bills.

Various efforts were made to open a season

on certain song and "fish-eating birds," but these all failed. On the whole, therefore, California is to be congratulated on having won real victories. An interesting feature of these victories appears to be that they have been won largely through the efforts of the scientific men of the State.

This is a point with regard to the conservation of wild life which we are seeing everywhere now. Scientific men, having at last awakened to the danger which threatens so many species, are earnestly at work in its behalf, and the union of science and sport is effective.

If all hands who desire the conservation of natural things will work together in harmony, they can accomplish almost anything. But if the different bodies are jealous of each other, eager for their own self-advertising and credit rather than for triumph of the cause, success will come very slowly.

All Californians are to be congratulated on what has been accomplished during the last session of the Legislature. All honor to the men who did the work.

### FLORIDA PROTECTIVE LAW.

SPORTSMEN and those interested in the conservation of wild life generally will be interested to know that the Florida Legislature has passed an up-to-date protective law. Information to this effect has reached the American Game Protective and Propagation Association of New York city, which was instrumental in promoting this legislation. Colonel John H. Wallace, Jr., game commissioner of Alabama, who interested himself largely in this matter, has wired the association that the Governor's approval of the bill is confidently expected.

The importance of Florida as a breeding ground, and the fact that the State has been a slaughter place for all sorts of wild life for years past, make the news of the present legislation unusually welcome to those who are working for adequate conservation of these important resources of the nation. The bill that passed is modeled on the excellent Alabama law, modifications having been made in certain instances to meet local conditions. Protection is provided under the new law for song, insectivorous and plumage birds.

### A Spring Tonic.

BY JAMES A. CLARY.

It's mighty hard to hang around  
And work from morn till night,  
When days are warm and sultry,  
And the fish begin to bite;  
When every pool and riffle  
Contains a trout or two  
That just seem really anxious  
To make a meal for you.  
'Tis then that nature calls you  
To get your rod and hook,  
And sneak among the willows  
Of some well favored brook.  
Your hook just touches water  
When, like the lightning's flash,  
A beauty darts from cover—  
You see the water splash;  
You feel the tug of conflict,  
And all your pulses thrill,  
Until you land the beauty  
With rare and rapid skill.  
If you are tired and dopey,  
Don't lie around and pout,  
But hike into the country,  
And fish for speckled trout.

# TRAP SHOOTING

Forest and Stream is an Honorary Member of the Interstate Association for the Promotion of Trapshooting.

**Fixtures.**

If you want your shoot to be announced here, send a notice like the following:

**REGISTERED TOURNAMENTS.**

- June 28.—Catasauqua, Pa.—Bryden G. C. E. C. Jones, Sec.
- June 28-29.—San Jose (Cal.) Blue Rock Club. O. N. Ford, Sec'y.
- June 30.—Grafton (W. Va.) G. C. R. Gerstell, Jr., Sec'y.
- June 30.—Dickson City (Pa.) R. & G. C. Thos. F. Padon, Pres.
- June 30-July 1.—Vancouver (B. C., Canada) G. C. C. A. Porter, Sec'y.
- June 30-July 1.—Fargo, N. D.—Gate City G. C. A. E. Rose, Sec'y.
- July 1.—Red Deer (Alberta, Can.) G. C. G. B. Parker, Sec'y.
- July 1.—McKeesport, Pa.—Western Pennsylvania T. S. L. tournament, under auspices of McKeesport G. C. Louis Lautenslager, Pres.
- July 2.—Vicksburg, Miss.—Hill City G. C. J. J. Bradford, Mgr.
- July 3.—Calgary (Can.) G. C. John Barr, Sec'y.
- July 4.—Waukesha, Wis.—Spring City G. C. Homer E. White, Sec'y.
- July 4.—Greenwich (Conn.) G. C. J. H. Finch, Pres.
- July 4.—Nepoleon (O.) S. A. H. R. Glass, Mgr.
- July 4.—Coalgate (Okla.) G. C. F. C. Varner, Sec'y.
- July 4.—Syracuse, N. Y.—Hunters' Club of Onondaga County. Chas. H. Stanard, Sec'y.
- July 4.—Lynchburg (Va.) G. C. J. M. Fisher, Sec'y.
- July 4-5.—Harrisburg (Pa.) S. A. L. B. Worden, Mgr.

Winner of first guaranteed \$200 and a trophy; winners of second and third places guaranteed \$150 and \$100 respectively. Elmer E. Shaner, Manager, Pittsburgh, Pa.
- Oct. 2.—Elkton (Md.) G. C. H. L. Worthington, Sec'y.
- Oct. 14.—Rising Sun (Md.) G. C. H. L. Worthington, Vice-Pres.

1914.

Jan. 21-24.—Pinehurst (N. C.) Country Club. Leonard Tufts, Sec'y.

**DRIVERS AND TWISTERS.**

Milton Sportsmen's Association, of Milton, Pa., will hold a tournament on July 7 and 8. Mr. and Mrs. Adolph Topperwein will give an exhibition. The committee comprise the following: Geo. W. Clinger, President; Fred-

eric A. Godcharles, Captain; Arthur L. Hursh, Secretary; G. Dal. Fox, D. R. Rishel.

The Mount Kisco Gun Club extends an invitation to you and your friends to attend an afternoon shoot on their grounds at Mount Kisco, N. Y., on July 4. Shooting to commence at 1 P. M. sharp. The program consists of four 25-target events and two events at 50 targets, seven prizes in each; entrance \$3.50. Valuable prize for high gun. Two ladies' prizes. Consolation prize for low gun. The collection of prizes is very attractive. Train leaves Grand Central Terminal, New York City, at 11.14 A. M. A. Betti, Mt. Kisco, N. Y., is the secretary.

A Pre-Olympic carnival trapshooting tournament will be held under the auspices of the Chicago Gun Club on July 3, 4 and 5. The program follows:

July 3.—Event No. 1, 100 targets, entrance \$1; targets 2 cents; handicaps, 16 to 22yds. Open to all amateurs of the world; first high gun, gold medal; second, silver medal; third, bronze medal. Event No. 2, professional championship, open to the world, at 100 targets, 18yds. rise, entrance \$1; targets, 2 cents; continued on July 4 and 5, 100 each day; total 300 targets; first high gun, gold medal; second, silver medal; third, bronze medal.

July 4.—Event No. 3, International amateur team race for championship of the world, five-man teams, 100 targets per man, 16yds. rise; \$1 entrance per man; targets, 2 cents. Members of each team to be residents of the State they represent of the United States. No limit to the number of teams from each state. International teams may enter their teams from their own country. No limit to the number of teams from each country. Five gold medals to members of winning team; five silver medals to second high team; five bronze medals to third high team. Event No. 4, following the team race, international amateur championship of world at double targets, 25 pairs, 16yds. rise; \$1 entrance; targets 2 cents; first high gun, gold medal; second, silver medal; third, bronze medal. Event No. 2, professional championship of the world, 100 targets, 18yds.; entrance \$1; targets 2 cents, a continuation of the 300-target race, July 3, 4 and 5.

July 5.—Event No. 5, international amateur championship, open to all amateurs of the world, 100 targets, 16yds.; \$1 entrance; targets, 2 cents; first high gun, gold medal; second, silver medal; third, bronze medal. Event No. 2, continuation of the 300 target race, July 3, 4 and 5.

W. G. BEECROFT.

**Independent G. C.**

READING, Pa., June 21.—Herewith please find scores made to-day by members of our club. The two 25-target events were for the Du Pont job and the Stevens job. The scores:

Events:	1	2	3	4	5	6
Targets:	15	15	15	15	25	25
W Eck	12	10	15	12	19	20
Jones	14	12	9	9	17	22
Quinter	11	9	12	10	18	19
Haag	9	13	12	11	19	20
Swisher	1	15	13	13	21	22
Schmeck	13	12	7	9	13	17
Kofroth	14	12	12	12	16	14

M. F. KOFROTH.

**Smith Gun Club**

NEWARK, N. J., June 21.—The sweepstakes scores follow: W. Hassinger, 20, 17, 20, 20, 21, 22, 21, 21; J. Reed, 25, 18, 21, 21, 21, 22; E. Jewell, 15, 17, 19, 18; H. Higgs, 24, 22, 21, 21, 23; H. Hassinger, 21, 20, 19, 21; V. Leary, 17, 18, 16; Dr. Moeller, 19, 18, 19, 20, 21, 22, 19, 21; George Ohl, Jr., 18, 21, 22; J. Lehn, 17, 21, 19, 17, 21, 22; W. McMahon, 20, 21, 22; J. Wheaton, 20, 19, 20; I. Castles, 20, 19, 21; A. Castles, 19, 18, 20.

# Grand American Handicap

## The Fourteenth Premier Shooting Tournament

Dayton, Ohio, June 17-20

PATTERSON, Dayton, N. C. R., call it anything you like, but every time the thousand trapshooters and trap fans hear the bell of a cash register, they will recall one of the most pleasant trapshooting conventions they ever have experienced. We have our American Henley, Newport tennis tournaments, National golf meets, Meadow Brook polo matches and what not else, but none of these can take precedence over the Grand American Handicap, wherein more than 500 clear-eyed, smooth-skinned, trained-muscled and iron-nerved men indulge in the gentle art of sending chilled No. 8 shot after the fleeting elusive aerosaucer, heading for the fifty-yard mark at the speed of a flushed woodcock. Resplendent in flags, with snow-white tents glimmering in the June sun, the grounds of the N. C. R. Gun Club nestled in the hollow of verdant hills, dotted here and there with contrasting tents of red, a beauty spot yet to be duplicated for a four days' trapshooting holiday. And such a myriad of willing hands and open hearts to feel that even the best in view is not good enough for the bidden guest. The herculean effort of the little gun club that wot not of nature's fickleness when they invited these hundreds of sportsmen into their midst were evidenced beyond the most sanguine expectations. All had hoped the G. A. H. would be pulled at Dayton—after a fashion—but none had looked forward to any such comparative magnificence as that offered. First of all to the directors of the Interstate Association should be given thanks for their astuteness in appreciating a situation and knowing how to act under given conditions. Then to that brave quartet of officers of the N. C. R. Gun Club, Bill Macandless, W. F. Bippus, H. Monbeck and Everett, who had courage sufficient to forget local adversities and go forward in keeping with their promise, made at the annual meeting of the Interstate Association a promise that any human readily would have relinquished; and last, but by no means least, should we compliment that great organization, the National Cash Register Company and its worthy president, Dayton's idealized citizen, John H. Patterson, on their personal interest in the welfare of the shooters and their friends.

After the broiling days, made as comfortable as possible by rest and refreshment tents, hose-sprinkled grounds and other comforters, the squads took their places for the preliminary handicap. It was a great event, finally ending in a tie, 96 x 100, between Captain Andy Meaders, of Nashville, Tenn., and A. B. Richardson, of the Du Pont Gun Club, and recently a Delaware State champion. In the shoot-off, youth told her story, and Richardson won with 18 x 20 against 16 for the older man. Among the trade exponents, Walter Huff was high gun with 96 x 100. On Thursday morning, bright and early, the fifty-odd gunners were eager for the American shooting classic, and no less than a dozen shooters tuned up with a gallop over hills and dales on the hunters sent over by the officers of the N. C. R. Co. Promptly at 9 o'clock the only Elmer Shaner delivered his final oration to the shooters, so that none should fail to know the conditions of the big event. What he said doesn't matter, for it always savors of fact rather than of rhetoric, and everyone was on the *qui vive*—some said tip toe—for the query, "Are you ready?" Owing to the number of entries only eighty targets were pulled on Thursday, the remaining twenty going over to Friday morning. At the close of the day G. A. Graper was in the upper register with 78 x 80, while J. A. Blunt, from Greensboro, Ala, and M. S. Hootman, of Hicksville, Ohio, were tied on 77. In the morning Hootman ran twenty straight, while Blunt and Graper dropped one rock each. This brought a tie shoot-off at twenty discs, scored as follows:

Graper .....	I I I I I I I I I I I I I I I I I I I I
Hootman .....	I I I I I I I I I I I I I I I I I I I I
Blunt .....	I I I I I I I I I I I I I I I I I I I I

Although as usual by prearrangement the purse was divided in three 500's. Hootman, a blacksmith, won the G. A. H. and the diamond medal. High pro honors went to the veteran Walter Huff with 97. After the shoot-off of the tie of the Consolation Handicap, for which, besides the regular purse, J. H. Patterson donated one-half of the receipts from the refreshment tent, was shot. This was won with 96 by B. F. Covert, of Lockport, N. Y., G. Grubb, of Wetmore, Kans., getting place with 96. Ed. O'Brien won among pros with 97. Now came the prettiest event of the tournament that is most interesting to spectators—the double amateur and professional championship at 100 aerosaucers pulled in pairs. The only record of the classic was broken in this event, and that by as graceful a shooter as ever pulled a trigger, George L. Lyon, of Durham, N. C. He broke 94 out of the hundred allotted, starting with 19, then losing two, then getting all but one, following with a straight twenty, then letting two straight always get through his shot. It was as fine a piece of shooting as one wants to see. The old reliable Allen Heil got second with 81 and M. Aric filling the upper rungs with 80. For the "wads only" gentlemen, J. R. Graham smashed 88 for high, Bill Crosby 85 and that youngster heading for lofty places in the shooting history, W. S. Colfax, Jr., trailing with 83 and a cold in the head. Thus ended the greatest trapshooting event known in ballistic history.

June 16.

PRACTICE DAY.

Monday, June 16, was given over to practice events, five 20s being shot in the morning, and the same program repeated in the afternoon. There was an unusually large number of shooters who took advantage of the opportunity to visit the grounds and try the traps under the conditions that were to prevail the balance of the week. Then, too, many of them were curious to see if the N. C. R. Gun Club had made good its promises to give them an ideal shooting park for the banner event of the year. In this respect they found that their wildest dreams were more than realized, and that this G. A. H. was to be pulled off under conditions which left nothing to be desired.

The field force was on hand, and looked refreshing in their uniforms of white coats and trousers. Secretary Shaner had made a good selection for this important factor in the smooth and satisfactory running of a tournament.

At trap No. 1: Referee, John S. Neff; scorers, C. W. Graham and J. H. McGregor; puller, C. G. Peters; trapper, G. Neff.

Trap No. 2: Referee, G. G. Weeks; scorers, E. G. Hall and H. Riley; puller, D. O. McElroy; trapper, F. Pfehler.

Trap No. 3: Referee, G. M. Wilson; scorers, H. T. Burchard and J. Mann; puller, E. Bramble; trapper, D. W. McElroy.

Trap No. 4: Referee, D. B. Sortman; scorers, W. Dill and A. H. Wise; puller, H. F. Schoonover; trapper, R. S. Brown.

Trap No. 5: Referee, L. R. Brewer; scorers, A. D. Cooper and J. Eberhardt; puller, C. W. Hickernall; trapper, W. Schaefer.

Relief force: Referee, S. W. Everett; scorers, C. H. Etz and W. Clevenew; puller, Ross Monbeck; trapper, L. Stengel.

Bulletin board, P. Stanley; assistant ground superintendent, T. Walsh.

There were twenty-nine squads entered in the morning program, forty-one professionals being among the number of shooters. The first squad started at No. 1 trap at 9:10, and from that time until late in the afternoon the popping of the guns was continuous.

L. S. German was in a class by himself in the morning, breaking the entire 100, and in the afternoon program, starting off at the same clip, but dropping his 22d target, and ending his run with 121. E. M. Daniels kept up with him for 84 targets, but lost his 85th, going out with 89, which is considered a very fair score by most shooters. Closely following Daniels came W. H. Heer, Walter Huff, J. M. Hawkins, with 97 each.

The amateurs did nice work also, but were not quite up to the mark set by the professionals. J. Foley, M. Aric, J. S. Young, E. Hellyer, Jr., tied for high place on 97; A. B. Richardson, P. J. Graham, W. Raup and W. Ridley got in second with 95 each.

In the afternoon the attendance was increased by five squads, many new arrivals in the city coming out

### Photograph Captions.

ON opposite page appear views taken at the fourteenth G. A. H. last week. Some of these were taken by N. C. R. Company, others by our own photographer. No. 1, A. R. Richardson, winner of preliminary handicap; No. 2, Capt. Everett, N. C. R. G. C.; Nos. 3, 4 and 5, winners of G. A. H.—Graper, Hootman, Blunt; No. 6, F. B. Patterson; No. 7, Bart Lewis, amateur champion, showing his newly won medal; No. 8, Bill MacCandless, Secretary N. C. R. G. C.; No. 9, J. T. Skelly, President Interstate Association; No. 10, J. R. Graham, winner double championship, professional; No. 11, view of grounds; No. 12, J. H. Patterson, President N. C. R. Company, and the most popular man in Ohio to-day; No. 13, our editor—we wouldn't put 13 on any one else; No. 14, Mrs. Ad. Topperwein joshing E. Reed Shaner, Secretary Interstate Association; No. 15, young Patterson getting final instructions from W. F. Bippus on how to win the G. A. H.; No. 16, Elmer E. Shaner, Secretary Interstate Association; No. 17, Tom Keller, of Peters yellow boys; No. 18, Frank G. Drew, of Winchester; No. 19, A. H. Durston, Lefever Arms Co., alleged by some to have been the handsomest man on the grounds; No. 20, John Phillip Sousa; No. 21, Tom Marshall (the man who made Illinois famous), W. F. Bippus, Treasurer N. C. R. Co., and two lady fans; No. 22, F. B. Clark, the exceedingly popular Remington-U. M. C. sales manager; No. 23—not just the proper numeral for the man who knows more trapshooters than almost any one man—this is Cashier Whitney.

for the practice. The number of professionals was 42, several who were in the morning program dropping out and their places being filled by the late comers. The amateurs made a better showing than in the morning, high score being made by R. Gerstell, who dropped but one of the 100 targets; he was followed by Horace W. Heikes and A. Heil with 98 each; F. M. Edwards and J. P. White each broke 97; B. S. Cooper and C. B. Eaton 96 each. Walter Huff was high professional with 98; L. S. German, Mrs. Topperwein, Fred Gilbert and J. R. Graham, 96 each; W. R. Crosby, and G. W. Maxwell, 95 each.

In the evening the Dayton Chamber of Commerce gave a complimentary dinner to John Philip Sousa, at the Country Club, to which members of the Interstate Association and the press correspondents were invited. G. B. Smith, President of the Chamber of Commerce acted as toast master, and most cordially welcomed the shooters to the city. Among the speakers were J. P. Sousa, J. T. Skelly, President of the Interstate Association; Elmer E. Shaner, tournament manager for Interstate Association; T. A. Marshall; Rolla O. Heikes and W. F. Bippus, Vice-President of the N. C. R. Gun Club. The affair was entirely informal, and a most delightful time was enjoyed.

using the event with a couple of targets to spare. A. B. Richardson climbed into second place with 193 each. H. H. Hicks, who had been overlooked by the dope seekers in the first 100, finished in third place by himself with 192. Jennings, R. H. Bruns, Ridley, Heil and F. O. Williams divided fourth place on 191 each. J. P. White came next on 190. There were six in the next place with 189 each; five were in the next place on 188. There were six 187s and seven 186s, which was the lowest score to get in the money.

In the professional contest scores were good, in the first 100, though, the star performers, C. A. Young, of Springfield, Ohio, and C. G. Spencer, St. Louis, Mo., did not quite reach Lewis' mark, falling one target below him, with 98. W. Huff, J. W. Garrett, H. D. Freeman and H. G. Taylor were next with 97 each. W. R. Crosby, R. W. Clancy, W. S. Colfax, Jr., L. S. German and O. R. Dickey, 96 each. The finish found C. A. Young in the lead, and the winner of the coveted title on a score of 197, which is some shooting. In second place were W. R. Crosby and H. G. Taylor, 195 each; C. G. Spencer and W. H. Heer were third with 194 each, L. S. German and H. D. Freeman 193 each, J. W. Garrett and E. A. W. Everett 192 each, W. S. Colfax, Jr., and Fred Gilbert 191 each.

During the day Allen Heil made a run of 103 straight, winning a Du Pont amateur long run trophy. R. H. Bruns completed an unfinished run from the day before, getting a total of 108, which gave him a bar for his Du Pont long run trophy. C. D. Henline got 64 straight and C. H. Newcomb 66.

Penalty entries for the Grand American Handicap and Preliminary Handicap closed at 5 o'clock. The former with 501 and the latter with 371. Fred B. Patterson, son of Mr. J. H. Patterson, made the 501st entry just before the closing, and the fact was dramatically staged by Secretary MacCandless, as befitted the occasion.

The national professional championship had fifty-three regular entries, thirty for targets only, leaving twenty-three entries at \$16, making a purse of \$368. There were six moneys—First, \$110.40; second, \$73.60; third, \$55.20; fourth, \$47.85; fifth, \$44.15; sixth, \$36.80. The 195s took the first two moneys; 194s received \$51.52 each; 193 took fifth, and 192 sixth money.

The national amateur championship had 157 entries at \$16, or \$2,512, with \$200 added by the Interstate Association, making a purse of \$2,712. There were thirty-two moneys—First, \$271.20; 2d, \$244.10; 3d, \$216.95; 4th, \$189.85; 5th, \$162.70; 6th \$135.60; 7th, \$108.50; 8th to 12th, \$81.35 each; 13th to 28th, \$54.25 each; 29th to 32d, \$27.10 each. The 193s received \$230.50 each; 192, third money, \$189.85; 191s, next five moneys, \$113.90 each; 190 next money, \$81.35; six 189s got \$63.30 each; five 188s, got \$54.25 each; six 187s got \$54.25 each, and seven 186s got \$23.25 each.

June 17.

FIRST DAY.

The contests for the National Amateur and Professional championships were scheduled for this day. In the former there were thirty-two squads entered, and in the latter eleven squads. The contest was at 200 targets, 18yds. rise, shot in ten strings of 20 targets each.

A feature commented upon and much appreciated by the waiting squads, was the awning erected over the shooters' chairs back of each firing station. The rain of the previous evening had cooled the air a little, and light clouds partially obscured the sun, but at that a trip down the line was attended by some discomfort. Mr. Elmer E. Shaner gave his usual little talk to the shooters and workers, so that it was 9:15 when the first squads in the sections started in on their fight for honors and wealth. What proved to be the squad record of the week was made by No. 32 in the second event, shot their fourth time up. This squad was composed of W. A. Brown, J. M. Hawkins, G. W. Maxwell, D. D. Gross and H. G. Taylor, none of whom dropped a target, scoring a total of 100. Squad 15, in the second section, C. D. Henline, C. H. Newcomb, J. S. Young, G. L. Dearing, and H. Dixon, a fair bunch of amateurs, came near doing the same stunt in event No. 1, their fifth time up, when they totaled 99, and duplicated this record in event 7. At the half-way post (100 targets), Bart Lewis was way in the lead with only one down. W. Ridley, E. L. Lyon, G. Grubb, C. H. Newcomb and H. W. Heikes came next with 97 each. In the third flight were A. B. Richardson, R. F. Appleman, J. E. Jennings, F. O. Williams, W. V. Jackson, R. D. Morgan, J. Kammerman and M. Arie with 96 each. The pace was a trifle warm for some of these leaders, however, and the finish found places shifted a little. Bart Lewis, Auburn, Ill., still kept in the lead, and went out with 195, win-

## You and a Remington Dealer Ought to Get Together

**Y**OU will be buying ammunition to-day or to-morrow—shot shells for trapshooting or metallics for target work. It would pay you to look into the whole ammunition question.

One thing you will find universally true, whether it is the alert dealer you are talking with, or the keen sportsman of your section.

The better qualified a man is to speak authoritatively the more surely you find his interest centered on REMINGTON as *the* live issue of the ammunition world to-day.

You will find, too, that the dealer who is making the biggest dent in the ammunition business of your community is the one who is specializing in Remington-UMC—who carries a full and representative stock.

Talk to your dealer. Remington-UMC is the ammunition you want. See that he can give it to you—the load you need for the kind of game you are after: Remington-UMC shot shells and metallics, not only for Remington-UMC shotguns and rifles, but for every standard make of arm.

**Remington Arms-Union Metallic Cartridge Co.**  
299-301 Broadway, New York

Don't Shoulder The Gun Makers' Problems

Your own problems—Distance, Weather, Game Weariness, etc.—are enough. Every problem of Mechanism should be already solved for you by the gun maker. Any shortcoming—big or little—merely doubles your difficulty.
'Six times 23 Years' Experience'—the six Hunter brothers' twenty-three years of absolute Concentration of Purpose—insures you against shot-gun shortcomings.

It has conquered—one by one—all the gun makers' problems, big and little—until today improvements and inventions cease to stand out against the perfection of the entire Smith Gun—the gun with "No Shortcomings." Just examine the new 1913 Smith Guns at your dealer's. Or send for the Book of Smith Guns which shows colored plates of handsome styles from \$25 to \$1000 net. Write for it now—before you lay this magazine aside.

RANDOM EIGHTS.

There were 190,500 targets thrown during the six days' events.

A blacksmith beat a banker in the race for G. A. H. honors.

A dozen or more trapshooters could be seen every morning galloping over the Patterson estate. Fortunately, all were not scored on their riding ability.

Covert was the only eastern shooter to get into the money.

John Phillip Sousa, Tom Marshall, Walter Huff and brother Bippus shared honors among the gentle sex. Tom was about four up at the finish.

President Patterson was at the grounds at six in the morning casting his trained and all-seeing eye about for things that could be improved. After the third visit there wasn't anything that needed betterment.

Among the special features on the grounds was a free, tipless barbershop, stenographer for free use of shooters, telephone, telegraph, railroad ticket office, post office, hospital with registered physician and trained nurse and 1,000 full length free lockers.

The N. C. R. band discoursed music every afternoon.

A special meeting of the Interstate Association was held on the roof of the Algonquin Hotel (the only comfortable place about the house) for the purpose of rescinding the by-laws that prohibits holding the G. A. H. two years in succession in the same place. Needless to say, Dayton may have the event next year, although it must formally be assigned at the annual meeting in December.

John Phillip Sousa, a keen trapshooter, made the remark that Dayton, like Venus, emerged from her bath much improved.

Charley North is reported to have found a comfortable room in Dayton. Wilmington papers please copy.

At the banquet Thursday night Vice-President Deeds announced to the tune of much encore that the N. C.

R. Company had plans drawn for a new million-dollar hotel in Dayton. This will be the greatest boon and most needed improvement now lacking in one of the most courageous and hospitable cities in the world.

Bill MacCandless didn't stop long enough to eat a meal during the week. To him belongs a full share of credit for the success of the fourteenth G. A. H.

At the meeting following the banquet some one made the suggestion that all shooters wear white coats and blue trousers. Mrs. Ad. Topperwein rose to a point of order.

It's a fact that the bell boys in the Algonquin suggested to Jim Skelly that he go up in the freight elevator, and he went (passenger L was busted).

E. Reed Shaner, with the precepts of his father, took care of all the details without allowing a hitch, while Elmer was everywhere with a cheery word and a smile. Some day Elmer is going to quit active work at the G. A. H., but we hope the day is a long way off.

Will Luther Squier please send his lost speech to Chairman Deeds for publication in the N. C. R. special edition.

Wouldn't J. H. Patterson make a delightful and valuable honorary member in the Interstate Association. We should be glad to share our place at table with him.

At a meeting of the Westy Hogans, held during the Grand American Handicap, it was finally decided to hold the tournament on the dates originally scheduled, at Venice Park, Atlantic City. The impression that a shoot would not be held is incorrect. The reason for that wrong impression, no doubt, was because the Hlogans could not get a pier, there being none available this year, but they have positive assurance that next year a pier will be at their disposal.

Oakwood G. C.

LYNCHBURG, Va., June 17.—O. Fisher broke 81 straight in the events, and continued shooting, making 100 straight—an unfinished run. The scores:

Table with 2 columns of names and scores: O Fisher 93, Jones 84, Lingle 87, Mooman 80, Dawson 94, J Fisher 42, Watson 78, Stockley 83

J. FISHER, Sec'y.

Northwestern Sportsmen's Association.

Spokane, Wash., June 14.—On June 10, 11 and 12, the Northwestern Sportsmen's Association's registered tournament was held here with an attendance of some sixty devotees of the scatter gun. The program consisted of the regulation fifteen 10-target events on each day. Among the amateurs S. A. Huntley shone forth as the bright particular star, with the fine score of 434 for the three days, H. W. McElroy second on 422, while F. M. Troeh and G. J. Chingren tied for third position on 420. For first professional L. H. Reid pined up 437, A. N. Woodward 419 for second place, F. C. Riehl in third hole with 418. The scores:

Table with 4 columns: Name, 1st Day, 2d Day, 3d Day. Lists scores for various participants like A N Woodward, C N Owens, H Smith, etc.

\*Professionals.

Roanoke G. C.

VERY poor scores resulted at the week end shoot held on the club grounds on Saturday afternoon June 21, due to the wind, which took a prominent hand in the sport and played various and sundry tricks with the targets whenever they made their appearance.

The weekly trophies offered by the club were won by the following contestants: Scratch class, first, tie, Jamison and Price; second, Elliott and E. W. Poindexter. Class A, first, J. W. Poindexter; second, D. R. Hunt; Class B, first, tie, B. J. Fishburne and H. R. Cox; second, Dyer. Class C, first, tie, Payne and Berkley; second, F. Jones. Stevens trophy, R. R. Cox.

The scores made by the respective shooters were as follows, 50 targets each:

Table with 2 columns of names and scores: J W Poindexter 45, Jamison 41, Dyer 41, Price 41, Elliott 40, E W Poindexter 40, Hunt 39, Holland 39, Bloxton 39, Bringman 37, Shepherd 37, Wilkinson 37, Boyd 36, W S Jones 36, B J Fishburne 35, Cooksey 34, Cox 34, Berkley 33, D W Richards 32, W E Henson 28, Payne 28, T T Fishburne 22, Nelson 22, W J Henson 19

Bushong was official referee.

Avondale G. C

CHICAGO, Ill., June 8.—The following are the scores made to-day at the shoot of the Avondale Gun Club:

Table with 4 columns: Name, Shot at, Broke, Name, Shot at, Broke. Lists scores for O Carlson, J Strauss, Jr., H Carlson, etc.

J. F. CLANCY, Sec'y.

Chicago Gun Club.

CHICAGO, Ill., June 14.—The following scores were made to-day, the first day of the Grand Chicago Handicap tournament. Although the weather was quite warm, conditions were good for target shooting, and most of the marksmen made splendid scores:

Table of scores for Chicago Gun Club. Columns include names and scores. Includes names like R A King, E N Gragg, C C Collins, etc.

Table of scores for Professionals. Columns include names and scores. Includes names like C Spencer, J R Graham, W Crosby, etc.

June 15.—Apparently the scorching heat of to-day was a help to the marksmen, as many excellent scores were made. Ed. Graham topped the list with 100 straight. Fifty-seven shooters scored ninety or better. The scores:

Table of scores for Morning sweepstakes, 100 targets. Columns include names and scores. Includes names like E N Gragg, H Kennicott, R A King, etc.

Table of scores for Professionals. Columns include names and scores. Includes names like E S Graham, H G Taylor, H W Cadwallader, etc.

Analostan G. C.

WASHINGTON, D. C., June 22.—Seventeen shooters sweltered and shot through a sultry afternoon on June 14 at the Analostan Gun Club's grounds. Ford is scintillating now, like a star of the first magnitude, the astronomers will know just how bright that is, and the laymen among our gun men will understand how effulgent it is when I tell them that he scored 97 out of 100. Following are the scores made on the above date:

Table of scores for Shot at, Broke. Columns include names and scores. Includes names like Ford, Johnson, Kirk, etc.

On June 21, twenty-one of the faithful were on the firing line at the regular weekly matinee of the Analostan Gun Club. Jos. H. Hunter was the star of the cast on this occasion at 100 targets, scoring 93 of them. Frank H. Huseman, professional, scored ninety-one out of his century and Taylor scored 90. The afternoon was very warm and a strong wind from the south bore the targets down and made the shooting difficult. The last two events, when the wind had charged and blew strong from the north, was the downfall of many of the boys. Ford shot a championship gait on 50, scoring 48, when he had to leave the grounds on important business. Following are the scores:

Table of scores for Shot at, Broke. Columns include names and scores. Includes names like Ford, Culver, Stine, etc.

Hudson City G. C.

JERSEY CITY, N. J., June 21.—Appended are the scores of the regular club shoot of the Hudson Gun Club, held on June 15. There were only eleven shooters that took part in the day's program, and some very good scores were returned, the shooting of Dave Engle being the best with an average of 88 per cent. Tom Kelley was the runner up with 86 per cent., with Ben Beyersdoff a good third for an average of 85 per cent. Dave Engle says that when he gets his 37-inch barrel working, we had better all look out for him, as he intends to hang up a record for the Hudson's traps by breaking 100 straight, and win the prize that has been waiting for a claimant for the past twenty-six years, for the man that can do it.

The morning was cool and pleasant for the game, and while the attendance was not up to the usual number, we had a very nice sociable time. The scores:

Table of scores for Events. Columns include names and scores. Includes names like Williams, Burbridge, Eaton, etc.

Spring City G. C.

WAUKESHA, Wis., June 15.—The following is the result of the regular shoot of the Spring City Gun Club, held at Washington Beach to-day:

Table of scores for Shot at, Broke. Columns include names and scores. Includes names like Knight, Mucklestone, Williams, etc.

Over the Traps At the Southern Handicap May 15, 1913

Mr. R. H. Brunns broke the 100 straight on the 16-yard targets, being the only one of all the contestants to do so. He was shooting a

## THE BEST SCORE OF THE WEEK

On single targets was the one made by W. H. Heer in The Consolation Handicap. Mr. Heer used **THREE DRAMS OF "E. C."** and made the wonderful record of

### 98 ex 100 from 22 yards

**Mr. Heer also Won High Average in all Regular Program Events, Losing Only 35 Targets out of 600 shot at:**

200 in the Professional Championship at Singles.....	— 18 yards
100 in the Preliminary Handicap.....	— 22 yards
100 in the Grand American Handicap.....	— 22 yards
100 in the Consolation Handicap.....	— 22 yards
100 in the Professional Championship at Doubles.....	— 16 yards

An average of over 94 per cent. Mr. Heer shot nothing but Three-Dram Loads of "E. C."

**Also Won First and Second Places in the Professional Championship at Doubles**

J. R. GRAHAM.....	88 ex 100.....	3 DRAMS OF "E. C."
W. H. HEER.....	87 ex 100.....	3 DRAMS OF "E. C."

Captain A. Meaders of Nashville, Tenn., shooting "E. C." tied for **First Place in the Preliminary Handicap** with 96 ex 100, from 18 yards.

Mr. W. V. Jackson of Ingleside, Ill., tied for **Second Place in the Preliminary Handicap** with 95 ex 100, from the 20-yard mark. Mr. Jackson also tied for **Second Place in the Amateur Championship at Singles.** His score was 193 ex 200, from 18 yards.

Captain Meaders and Mr. Jackson both used "E. C." Smokeless Shotgun Powder.  
 "An old name but a new powder."

**HERCULES POWDER CO.**

**Wilmington, Delaware, U. S. A.**

Western Connecticut Trap Shooters' League.

The fifteenth registered tournament of the Western Connecticut Trapshooters' League was held at the grounds of the Sea Side Gun Club, Bridgeport, Conn., June 21. A heavy rainstorm on the day before and continuing up to a late hour on the morning of the shoot, kept the attendance well down below the average, but what was lacking in numbers was made up in class, so that it was a most successful affair in every respect.

High gun honors for the day were captured by E. W. Mumford, Hartford, with 144 out of 150, closely followed by N. L. C. Wilson, Bridgeport, 142, also ten others with scores of 90 per cent. and better, for the entire program. The most noticeable performance of the day was the 105 straight breaks made by S. P. Senior, Bridgeport, establishing a record which is likely to stand for some time to come among shooters of New England, and thereby capturing one of the much coveted prizes offered by the Du Pont Powder Co. to any amateur breaking 100 straight, it being a very handsome solid gold watch fob, bearing suitable inscription of the event. A hearty round of applause was accorded Mr. Senior upon the breaking of his 100th bird, which was well deserved.

The five-man team match was again won by the Sea Side Gun Club, Bridgeport, it being their third consecutive win of the season, and hanging up a new record for the league of 462 out of 500, beating their previous record of 460, made at Bethel on May 3.

Keen interest was shown in the special event at 25 targets, distance handicap, and was hotly contested to the end. E. G. Southey, 20yds., and Chas. Fox, 18yds., tied with 23 each for first honors, Southey winning out in the shoot-off and taking the \$50 Victrola, Fox taking second, which was a Smitn & Wesson target revolver. Other winners in this event were: Homer Sherman, third; E. R. Lewis, fourth; Dr. G. N. Martin, fifth, and C. C. Smith, sixth, they having all tied at 22, and in the shoot-off finished in the order named.

Hank Stevens captured high gun honors in the professional ranks, making the same score as the high amateur of the day, 144 out of 150.

Much grace was added to the occasion by the presence of many of the ladies, who came out to enjoy the sport of the day, and the well established hospitality of the Sea Side boys.

A sheep roast was served between 12 and 2, that being one of the really good features of the day, and where everybody made good scores. The next shoot will be held at Danbury, July 26.

Table listing trap shoot scores for Western Connecticut Trap Shooters' League, including names like H H Stevens, A E Sibley, H A Keller, etc., and their scores.

Youghiogheny C. C.

MCKEESPORT, Pa., June 16.—Saturday afternoon was ideal for trapshooting. Scores:

Table listing trap shoot scores for Youghiogheny C. C., including names like Calhoun, Dr Heisey, Dr Aber, etc., and their scores.

There being an odd number of shooters, lots were drawn as to the division and the lot fell to a 4-4-4 division, Calhoun qualifying at the head of Class A with 46 and no ties, Simpson qualifying at the head of Class B with 38 and no ties, Dr. Hodgson qualifying at the head of Class C with 34, Pendleton and Young also qualifying with im with scores of 34. According to the arrangement of this shoot these five men having qualified in their respective classes for a shoot-off at the end of the season for a prize to be given to the winner in each class. In event of any one of these men qualifying in a subsequent shoot in a higher class, he will be automatically eliminated from the class in which he has already qualified, as no man can shoot off at the end of the season in more than one class.

Immediately following the 50-bird contest a shoot at 25 pairs of doubles was run off, resulting as follows:

Table listing trap shoot scores for Youghiogheny C. C. (Doubles), including names like Calhoun, Dr Heisey, etc., and their scores.

Calhoun was an easy winner. Along with the 50-bird class system shoot, there is being shot off an interesting club member handicap shoot.

Dr Heisey being the winner in the first shoot of the series, the result being as follows:

Table listing trap shoot scores for Dr Heisey and others, including names like Dr Heisey, Simpson, Napier, Parke, etc., and their scores.

Altoona G. C.

ALTOONA, Pa., June 23.—The second tournament of the Central Pennsylvania Trapshooters' League was held at Johnstown to-day. Carl Moore left Dayton, where he ran up a good score in the Grand American Handicap, and traveled most of Friday night to be on hand in Johnstown. He broke 139 out of 150.

The most remarkable affair of the day was the shooting of Edward Hellyer, Jr., of Alexandria, who shot at Dayton, and was in the money at the Grand American Handicap. He jumped to Johnstown over night and ran high gun, breaking 142 out of 150. Mr. Hellyer has been shooting at the traps only three years, but is one of the most consistent shooters in the State.

Our "Uncle Bill" McClarren, the Ebensburg veteran, was on hand, and by breaking 117 out of 150, demonstrates that his seventy-nine years have not put him out of business.

Chas. Newcomb, of Philadelphia, stopped off and shot at 75 targets, breaking 73, to show that he can still see them.

Jack Waltz, of this city, was in charge of the office, and needless to say, handled it to the satisfaction of everybody.

The next shoot will be held at Lewistown on July 24. Dubois will have a shoot on the 25th and 26th of this month, and some of the Altoona gunners will attend.

The results of the team shooting Saturday follow:

Table listing team shooting results for Altoona G. C., including names like Johnstown, Big Bend, Altoona, etc., and their scores.

The league standing to date is as follows:

Table listing league standing to date for Altoona G. C., including names like Lewistown, Johnstown, Big Bend, etc., and their scores.

Following are the individual scores, all shooting at 150 targets each:

Large table listing individual scores for Altoona G. C., categorized by Class A, B, C, D, and names like E Hellyer, Jr., A M Bennett, etc., and their scores.

Little Falls G. C.

LAST Saturday the Little Falls Gun Club held what will probably be the last shoot on their traps until the fall, but it all depends on how long the shooters can be held down, and that may not be long, for it was 7:30 last Saturday before the last shooter left the traps.

The 100-bird prize shoot was very interesting, there being great rivalry among some of the shooters, the finishing being close, as shown by the scores. The winners were H. S. Sindle, G. A. Hobart, C. Speer, T. Dukes, T. Howard, E. Gardner, C. Canizzaro, W. Kussmaul, S. Comly and E. L. Klotz.

There was also a special match after the regular program for a cut glass bowl and was won by C. Speer, who tied with S. G. Francisco, H. S. Sindle, S. Comly and Ed. Smith. On the shoot-off Speer made 25 straight. The scores:

Table listing trap shoot scores for Little Falls G. C., including names like T Howard, H H Miller, E Gardner, etc., and their scores.

Special event, 25 birds:

Table listing trap shoot scores for Little Falls G. C. (Special event), including names like E Jacobus, W Whitty, S G Francisco, etc., and their scores.

Vermont State Shoot.

SPRINGFIELD, Vt., June 18-19.—At the registered tournament held by the Springfield Gun Club the program called for twenty events, a total of 300 targets. There were thirty-seven amateurs and six professionals that took part. The scores:

Table listing trap shoot scores for Vermont State Shoot, including names like G H Chapin, H H Stevens, A E Sibley, etc., and their scores.

The Vermont State championship, 100 targets, was won by F. E. Adams, of Barre, Vt., on 93.

Central League.

JOHNSTOWN, Pa., June 21.—Following are the scores of the shoot held by the Central League here to-day, the program consisting of 150 targets per man:

Table listing trap shoot scores for Central League, including names like Bosserman, Bennett, Baker, etc., and their scores.

Sunrise G. C.

SUNRISE, Wyo., June 15.—Following are the scores made by the Sunrise Gun Club to-day:

Table listing trap shoot scores for Sunrise G. C., including names like O S Booth, Van Buskirk, B Hamilton, etc., and their scores.

Birmingham G. C.

ON Saturday P. B. Plummer paid the Birmingham Gun Club a visit, and the Ensley Club on Wednesday and shot high professional. He has been doing some good shooting lately, shooting high professional and high general average at the recent Bristol, Tenn., tournament. J. C. Broyles shot well, as did also H. C. Ryding. The scores, 100 targets per man:

Table listing trap shoot scores for Birmingham G. C., including names like John Fletcher, P B Plummer, J Broyles, etc., and their scores.

AMERICAN KENNEL CLUB STUD BOOK

1 Liberty Street - - - - New York

THE NEW STUD BOOK

The Stud Book for 1912 has been published and is on sale in this office, in its new form. Beside the regular volume, containing all breeds, it has five Sections separated in Breeds, as follows:

Section I.—Beagles, Bloodhounds, Chesapeake, Deerhounds, Foxhounds, Greyhounds, Griffons (Sporting), Pointers, Retrievers, Setters, Spaniels, Whippets, Wolfhounds, also Great Danes and Dachshunde to balance the sections.

Section II.—Bulldogs, Chow Chows, Dalmatians, French Bulldogs, Mastiffs, Pinschers, Poodles, St. Bernards, and all the Toy dogs.

Section III.—Collies and Sheepdogs.

Section IV.—Airedales, Bedlingtons, Manchester, Bullterriers, Dandie Dinmonts, Foxterriers, Irish Terriers, Scottish Terriers, Sealyham Terriers, West Highland White, and Welsh Terriers.

Section V.—Boston Terriers.

The sections are \$1 each, and the regular volume \$5.

Portland Gun Club.

PORTLAND, Me., June 14.—E. A. Randall won individual state championship with 98 out of 100. Steel, of Boston, was high amateur with 93; Blanchard, of Portland, second with 87; Sibley, of Boston, high pro. The wind blew a gale on the last day. Scores:

Table with 4 columns: Name, 1st Day, 2d Day, 1st Day, 2d Day. Lists scores for various participants like Wheeler, Mill, Darton, etc.

Newburgh G. C.

NEWBURGH, N. Y., June 21.—Dr. E. O. Mitchell was the high gun at the traps of the Newburgh Gun and Rifle Association to-day and won the second leg of the Lawson Hardware trophy with 23, which with his handicap, gave him 29. Under the rules, however, all of those whose gross score equals or exceeds 25 must shoot off for the cup, and Dr. Mitchell won over H. J. Jova, Charles Martin, Harry Kernahan, W. C. Gibb, George Mould and C. E. Leicht. In the shoot-off he again broke 23. Harry Kernahan has one leg on the trophy. For the Du Pont trophy George Mentz took the sixth leg. The scores for the Lawson trophy were:

Table with 4 columns: Name, Score, Name, Score. Lists participants like Dr. E. O. Mitchell, H. J. Jova, C. Martin, etc.

Du Pont G. C.

WILMINGTON, Del., June 21.—L. D. Willis made 194 to-day with a run of 99. John H. Minnick broke 96 straight and W. M. Hamond broke 87 straight. Other scores were:

A. Neely 18, C. Leedom 24, N. K. Smith 18, C. T. Martin 23, W. Jensen 14, E. Jackson 9, W. Coyne 18, J. E. Miller 14, L. D. Rothensies 10, S. A. Baker 20, S. J. Newman 22, J. Minnick 25, L. D. Webster, 14, H. Winchester 24, W. Tomlinson 23, W. Hammond, 24, W. G. Robelen 19, J. B. Grier 16, Dr. H. Betts 23, William Francis 8, Victor du Pont 12, W. G. Wood 24, R. F. Willis 21, Dr. Patterson 20, E. H. Anderson 13, C. D. Prickett 21.

Class A: J. H. Minnick 25. Class B: C. Leedom 24, H. Winchester 24, T. W. Matthewson 24. Class C: S. J. Newman 22. Class D: W. G. Robelen 19. Doubles: L. L. Jarrell, Clyde Leedom, H. Carlton, 14 out of 10 pairs. Leedom first, Carlton second and Jarrell third.

Norfolk—Portsmouth G. C.

PORTSMOUTH, Va., June 20.—There was a big field of marksmen at the weekly shoot of Norfolk-Portsmouth Gun Club yesterday afternoon. Mr. Lee, of the Winchester Arms Co., and Mr. Baskerville, of the Du Pont Powder Co., were present and participated in the shooting. Dr. Byrd and C. N. Boyd tied for high place on 44 each in the club shoot. Several others made very good scores in the extra events. The scores, 50 targets per man:

Table with 2 columns: Name, Score. Lists participants like Dr. Byrd, Boyd, Gunther, Talbot, Edmonds, Davis, Laird, Borrowdale, Baskerville, Gallagher, Lee, Morrisette, Cook, Langhorne, Ballance, White, Wiggins.

Herron Hill Spoon Shoot.

PITTSBURGH, Pa., June 21.—The fourth semi-monthly spoon shoot of the season was held to-day at Herron Hill Gun Club, on Davis Island grounds. G. E. Painter broke 48 birds out of 50 in the first event, winning the Class A prize. John Bradbury, A. Sutton and J. M. Kable won the Class B, C, and D prizes respectively.

Both G. E. Painter and D. W. Baker shot 49 in the second event. Baker won the trophy on the toss of a coin. Dr. F. L. McCready won in Class B. Kable, Sutton and Ullery had to shoot off for the Class C spoon, Kable winning. Bradbury won the Class D spoon after shooting off with Bennett. The scores:

First event: G. E. Painter 48, Dr. F. L. McCready 47, D. W. Baker 46, C. C. Irwin 46, John Bradbury 43, M. D. Ullery 42, R. R. Bennett 41, Sutton 40, F. G. Houch 40, John Kable 40, J. M. Kable 39, Thomas Woods 39, H. C. Resser 35, B. D. Kohlmeier 26.

Second event: G. E. Painter 49, D. W. Baker 49, C. C. Irwin 48, Dr. F. L. McCready 46, Sutton 43, M. D. Ullery 43, J. M. Kable 43, Thomas Woods 41, H. C. Resser 39, John Bradbury 38, R. R. Bennett 38, F. G. Houch, 36.

F. H. WALLACE, Mgt.

Century Shoot.

THE first of the series of the Century shoot took place on the grounds of the Pillow Gun Club on June 14. The weather conditions were ideal. The attendance was large. Four more century shoots will constitute the series. The scores:

Table with 2 columns: Name, Score. Lists participants like J A Bingham, Jay Bingham, D W Rests, etc.

J. A. BINGAMAN, Sec'y.

Rifle Shooting

Fort Pitt Rifles.

PITTSBURGH, Pa., June 21.—Fort Pitt riflemen shot in the 1000-yard match on the Highland range yesterday afternoon. Adverse weather conditions prevailed during the match, preventing high scores. First place was taken by T. C. Beal with the score of 47, very good, considering conditions, followed by H. E. Arthurs and P. Paulson, each with the score of 44, Arthurs' score out-ranking Paulson's. Very little shooting was done at the shorter ranges, owing to the incessant rain. The club will hold two events next Saturday, 20yds. surprise fire and 50yds. revolver matches. The scores:

Table of scores for Fort Pitt Rifles. Columns include names (T. C. Beal, H. E. Arthurs, P. Paulsen, etc.) and scores for various matches (1000-Yard match, 200-Yard record, etc.).

W. C. WOOTTON, Sec'y.

Bon Air G. C.

PITTSBURGH, Pa., June 14.—Garland shot 25 straight on a wagon. The following are the scores made to-day:

Table of scores for Bon Air G. C. listing names like Miller, Garland, and scores for various events.

June 21.—The following scores were made to-day: Wolfe 25, Freedman 59, Whalen 46, M. H. MILLER, Sec'y.

Holland G. C.

BATAVIA, N. Y., June 14.—Tomlinson won the Du Pont picture, and Bruggmann won the cut glass trophy for the regular program, after a tie with Gardiner, and three strings of 25 before the decision. The scores:

Table of scores for Holland G. C. listing names like Bruggmann, Tomlinson, and scores for various events.

New Hanover G. C.

WILMINGTON, N. C., June 20.—The following scores were made to-day:

Table of scores for New Hanover G. C. listing names like Grant, Decher, and scores for various events.

Chicago G. C.

CHICAGO, Ill., June 21.—L. M. Fetherston led to-day, being 92, which, with his added handicap of 4, put him 96. C. F. Stenner copped second place by being 89, plus a handicap of 6, which gave him 95; Cannon (33) 92; J. G. Parke (15) 71.

SEND IN YOUR SCORES.

Continued from page 819.

... Cole, of Ossining, N. Y. He has sent in the following good scores, 30 arrows at 40 yards, which he has recently made: 30-214, 30-214, 30-220, 30-214, 30-218, 30-220, 30-226.

With 30 arrows at 50 yards—a range at which he has practiced but little—he has made 30-152. As yet he has done little work at 60 yards. This is all fine work for a novice.

EDWARD B. WESTON.

Aggies Win Intercollegiate.

WASHINGTON, D. C., June 21.—Massachusetts Agriculture College, with a record of 825 out of the possible 900, won the ninth annual competition on outdoor ranges for the intercollegiate rifle shooting championship of the United States from the other nine competing universities and colleges. Harvard, the present holder of the championship trophy, finished second with 791.

Gems from the Tombs.

OF the making of curious epitaphs there is no end. A recent traveler in the Forest of Dean, in England, Mr. Arthur O. Cooke, has discovered this one to the memory of a young man named Yem:

As I was riding on the road, Not knowing what was coming, A Bull that was loggered and pressed, After me came a-running, He with his logger did me strike, He being sore offended, I from my horse was forced to fall, And thus my days were ended.

"Logger," it may be noted, is a block of wood attached to an animal to prevent it breaking through hedges; such may be often seen worn round the neck of an old ewe. There seems a fairly obvious connection with "loggerhead."

In the old Norman churchyard at Harrow-on-the-Hill, England, a stone has been erected to the memory of William Port, who was fatally injured in a railway accident, in 1847. He seems to have been a commuter, as witness these lines:

Bright rose the morn, and vigorous rose poor Port, Gay on the train he used his wonted sport, Ere noon arrived a mangled form they bore, With pain distracted and o'erwhelmed with gore, Ere evening came to close the fatal day, A mutilated corpse the sufferer lay.

—Harper's Weekly.

The Kind of Game He Meant.

A young man in Kansas City was invited out to dinner the other evening; a spur of the moment invitation it was that caught him fifteen minutes before dinner time. However, being a hungry young man and knowing his host too well to stand on ceremony, he went. The host met him in the front hall, smiling expansively.

"Awfully glad we caught you, old man," he said, grasping his hand; "we wanted you particularly, you see, because we are going to have a little game this evening."

"Why—er—that is—" gasped the guest; "to be frank with you, I've only got 49 cents with me—if you'd let me know—"

The host roared. "No, no, you goat," he said. "I don't mean the kind of game you do—it's wild duck, and it's waiting to be carved."—Kansas City Star.

# WINCHES

Loaded Shells and Repeating Shot

WIN

## The Grand American Handicap

**THE WINNER:** Mark Stanley Hootman of Hicksville, Ohio. **HANDICAP:** 17 yard. **GUN:** Winchester. **SHELL:** Winchester Loaded "Repeater." **SCORE:** 97 x 100, and 20 straight on the shoot-off. Two other shooters broke 97; but in the shoot-off Mr. Hootman, with his Winchester Gun and Winchester Shells, outshot them both.

The winner's score of 117 x 120 targets made in a grueling contest in which 453 shooters participated, was a convincing demonstration of the possibilities of great skill and nerve when coupled with the always dependable combination of Winchester Shells and Guns.

**SECOND:** B. F. Elbert of Des Moines, Ia., and F. J. Coburn of Mechanicsburg, Ohio, shooting Winchester Repeating Shotguns and Winchester Loaded Shells; and E. M. Gillespie of Freeport, Pa. and Sam Leever of Goshen, Ohio, shooting Winchester Loaded Shells; tied with 96 x 100, all shooting from the 19-yard mark.

**HIGH PROFESSIONAL:** Walter Huff of Macon, Ga. **HANDICAP:** 21 yards. **SHELL:** Winchester Loaded "Leader." **SCORE:** 97 x 100.

### THE PRELIMINARY HANDICAP WON WITH WINCHESTER LOADED "LEADER" SHELLS

**THE WINNER:** A. B. Richardson of Dover, Del. **HANDICAP:** 20 yards. **SHELL:** Winchester Loaded "Leader." **SCORE:** 96 x 100, and 18 x 20 in the shoot-off. **RUNNER-UP:** Capt. Andy Meaders of Nashville, Tenn. **HANDICAP:** 18 yards. **SHELL:** Winchester Loaded "Leader." **SCORE:** 96 x 100, and 15 x 20.

**SECOND:** F. M. Edwards of Columbus, Ohio, shooting a Winchester Repeating Shotgun, tied with others on 95 x 100.

**HIGH PROFESSIONAL:** Walter Huff, of Macon, Ga. **HANDICAP:** 21 yards. **SHELLS:** Winchester Loaded "Leader." **SCORE:** 96 x 100.

### THE PROFESSIONAL CHAMPIONSHIP WON WITH A WINCHESTER REPEATING SHOTGUN

**THE WINNER:** C. A. Young of Springfield, Ohio. **GUN:** Winchester Repeater. **SCORE:** 197 x 200.

**SECOND:** W. R. Crosby of O'Fallon, Ill. **SHELL:** Winchester Loaded "Leader," tied with one other shooter. **SCORE:** 195 x 200.

### THE CONSOLATION HANDICAP WON WITH WINCHESTER SHELLS AND GUN

**THE WINNER:** B. V. Covert of Lockport, N. Y. **HANDICAP:** 18 yards. **GUN:** Winchester Repeater. **SHELLS:** Winchester Loaded "Leader." **SCORE:** 96 x 100.

**SECOND:** V. Oliver of Philadelphia, Pa., shooting a Winchester Gun and Winchester Loaded "Leader" Shells, and G. Grubb of Wetmore, Kansas, shooting Winchester "Leader" Shells, tied with a score of 95 x 100, both shooting from 18-yard mark.

#### HIGH GENERAL AVERAGE FOR ALL SINGLE TARGETS

**THE WINNER:** Walter Huff of Macon, Ga. **SHELLS:** Winchester Loaded "Leader." **SCORE:** 671 x 700, .958%.

**SECOND:** W. R. Crosby of O'Fallon, Ill. **SHELLS:** Winchester Loaded "Leader." **SCORE:** 664 x 700.

#### HIGH AMATEUR AVERAGE FOR ALL SINGLE TARGETS

**THE WINNER:** Mark Arie of Thomasboro, Ill. **GUN:** Winchester Repeater. **SCORE:** 653 x 700, .932%.

A. B. Richardson of Dover, Del., shooting Winchester Shells, was High Amateur for "Single" Targets, including Practice Day, exclusive of the Consolation Handicap, which he was ineligible to participate in, his score being 569 x 600, .948%.

#### HIGH GENERAL AVERAGE for SINGLE and DOUBLE TARGETS

**THE WINNER:** Walter Huff of Macon, Ga. **SHELLS:** Winchester Loaded "Leader." **SCORE:** 752 x 800, 94%.

**SECOND:** W. R. Crosby of O'Fallon, Ill. **SHELLS:** Winchester Loaded "Leader." **SCORE:** 749 x 800, 93.6%.

#### HIGH AMATEUR AVERAGE for SINGLE and DOUBLE TARGETS

**THE WINNER:** Mark Arie of Thomasboro, Ill. **GUN:** Winchester Repeater. **SCORE:** 733 x 800, 91.6%.

#### LONG RUN OF TOURNAMENT

Allen Heil of Allentown, Pa. **SHELLS:** Winchester Loaded "Leader" **SCORE:** 114 straight.
