*OLDEST NURSERY IN NEW HAMPSHIRE
ESTABLISHED SINCE 1840*

THE DOW NURSERIES ARE LOCATED IN NORTH EPPING, N. H., THREE MILES NORTH OF EPPING VILLAGE AND R. R. STATION ON MOTOR ROAD TO DURHAM AND DOVER.

VISITORS ARE CORDIALLY INVITED TO INSPECT OUR NURSERIES.

IMPORTANT.

We have at the nursery varieties which are not listed in this catalogue, and larger specimens of various kinds. If you cannot visit our nursery and make your own selections send us your want list for quotations.

GUARANTEE: While we aim to have our trees and plants true to label, and hold ourselves prepared to replace on proper proof, all that may prove untrue, we do not give any warranty expressed or implied, and in case of any error on our part, it is mutually agreed between the purchaser and ourselves that we shall not, at any time, be held responsible for a greater amount than the original price paid for the stock.

TERMS: CASH WITH ORDERS OR ON DELIVERY. PRICES NET.

ALL PRICES herein named are for stock at Nursery or delivered at Railroad Station. **NO CHARGE** will be made for boxing and packing.

When possible we recommend delivery by truck, thus insuring prompt and safe delivery. All trucking delivery at actual cost.

PARCEL POST SHIPMENTS.

The present Post Office laws enable us to ship larger packages than formerly. This method gives prompt and safe delivery. Simply add 10 per cent to your order.

SUNDAYS.

WE WELCOME SUNDAY VISITORS, to look over our Nursery, and make selections for future shipments. We do not dig orders or make shipments on Sunday.

NOTICE.

The varieties of fruit and small fruits listed in this catalogue have been approved by horticulturists at the Experiment Stations of all the New England states. We offer only varieties which are desirable for planting in New England.

Fruit Trees

The varieties of fruits and small fruits listed in this catalog have been approved by horticulturists at the Experiment Stations of all the New England states. We offer only varieties which are desirable for planting in New England.

All our trees are root pruned and top pruned, ready for planting before they are shipped.

**On Quantity Lots we Give Greatly Reduced Prices.
Send Your List for Special Quotations.**

Can be shipped Parcel Post. Add 10% for postage.

Washington. New variety. Especially rust resistant.

Asparagus Roots. Make trenches 3 to 4 ft. apart and set the crowns 8 in. deep and 18 in. apart. Cover with 2 in. of soil when planting and fill in as shoots come up.

EVERGREENS

There is no finer plant than an evergreen for ornamental purposes. They give you year round delight, require little care and most of them will stand any amount of shaping. It is a mistake, however, to use them indiscriminately. Each variety has its proper place, either in foundation, individual, hedge or windbreak planting. Let us advise you their proper place about your home.

They may be planted from early spring until June, and from August until mid-fall. Each plant when transplanted will have a large ball of earth wrapped in burlap. We have a few varieties in our Nursery, which we have not listed, as well as some large specimens. Tell us your wants and quantities, and we will give special prices.

SEE LANDSCAPE DEPARTMENT ON PAGE 24

Evergreen Trees

ARBORVITAE, AMERICAN Thuya Occidentalis

An excellent lawn tree. The best of	1 ft.	\$.25
all Evergreens for hedges and screens.	2 ft.	1.00
Can be easily shaped by shearing.	3 ft.	1.75
	4 ft.	3.00

- Woodbine. (Virginia Creepers).** Well-known rapid growing climber. Large deep green leaves, taking on vivid color in the fall. 40c.

ROSES.

We try to carry for our customers the most suitable and hardy roses for our New England climate. Hybrid Perpetual Roses are the hardiest, but have a slightly shorter blooming season than the Hybrid Tea Roses, which though not quite so hardy, bloom over a longer period of time. Extra care should be taken in planting: food and water given throughout the summer, and in the fall, mulching, by putting evergreen boughs or straw around the bushes, or better still, mounding the soil at least a foot high around each plant. This extra care and protection will show results in strong, healthy plants with large blooms. All the bushes that we offer are strictly A No. 1, two to three year-old roses, and will surely bloom the first season, if planted early in the spring. 60c each. Any five \$2.50.

Can be shipped Parcel Post. Add 10% for postage.

American Beauty. (H. P.) Has many large bright red blooms. Very popular.

Columbia. (H. T.) One of the best pink roses. Very good for cutting, and the blooms keep well.

Frau Karl Druschki. (H. P.) The very best white rose. A great bloomer, fine for cutting, and will grow anywhere.

General Jacqueminot. (H. P.) Know as the Jack Rose. Has rich velvety, bright crimson blooms. One of the best for your garden.

Gruss an Teplitz. (H. T.) A great bloomer. Has fragrant scarlet, free-growing blossoms. Is hardy, and blooms all summer.

Hadley. (H. T.) Deep velvety crimson. Very fragrant and desirable. Very good for cutting.

Harrison Yellow. (H. T.) The old-fashioned bright yellow rose. No garden should be without this bush.

Killarney. (H. T.) An old-fashioned pink rose. Very desirable and is a good bloomer.

Killarney (H. T.) White. The same as above.

Lady Hillingdon. (H. T.) The hardiest tea rose. Beautiful deep apricot yellow. Blooms continuously.

Los Angeles. (H. T.) A very good coral-pink rose.

Magna Charta. (H. P.) Has large, full rosy-red blooms. Good for cutting.

Madam Butterfly. (H. T.) A very beautiful light pink-yellow. Good for cutting. Quite hardy.

Madam Caroline Testout. (H. T.) Bright clear rich pink. Very fragrant and hardy. Desirable.

SPECIAL PRICES FOR QUANTITY ON DEMAND

WHATEVER YOU WANT WRITE US

LANDSCAPE DEPARTMENT.

We have added to our Nursery work a "Landscape Department." Up to this time we have been unable to satisfactorily accommodate our customers in this work. Now, however, we feel sure that we are competent to take charge of the planning and planting of your home.

Successful carrying out of landscape improvements depends to so great an extent upon the knowledge and good taste of the one to whom this work is entrusted that it is important to start right whether the work be small or large.

The undersigned will take charge of the laying out and the planning of your grounds and home. Particular attention will be given as to the best plants adapted to your special soil and conditions.

The Perennial Garden and Rockery offer delightful possibilities in the way of interest that are often overlooked or but meagerly taken advantage of. These Gardens should be carefully planned and one must have a distinct knowledge of plants and planting. Any good Landscape Architect is capable of doing this.

The undersigned is prepared to make visits to your home, inspect your grounds, advise you, make plans, and undertake the construction, planting and carrying out of your landscape work.

Prices: No charge will be made for advice or visits to your home within reasonable mileage distance.

Construction and planting prices will be at cost.

FREDERICK A. DOW

Dow Nurseries

N. Epping, N. H.

DISTANCES FOR PLANTING

Apples, 30-40 feet.	Blackberries, 4x7 to 6x8 feet.
	Red Raspberries, 3x5 feet.
Peaches, 16-20 feet.	Black Raspberries, 3x6 feet.
Pears, 20-25 feet.	Strawberries (Garden), 1x3
Plums, 16-20 feet.	feet.
Sweet Cherries, 20-25 feet.	Strawberries (field), 1x4
Sour Cherries, 15-18 feet.	feet.
Quinces, 10-12 feet.	Asparagus, 1½x3 feet.
Grape Vines, 8-12 feet.	Rhubarb, 1½ feet.

GENERAL PLANTING INSTRUCTIONS.

Care of Stock on Arrival. All stock should be planted immediately on arrival. If this is not possible open the box or bundle and "Heel-in" the stock, that is, plant it temporarily, by digging a trench in a shady, cool place and burying the roots carefully. Never allow the roots to be exposed to the sun or wind. If it is very dry and hot, or the roots have become at all dried out, dip them in muddy water.

Preparation of the Ground. Planting should be done on well-cultivated ground. If this is not possible all sods should be shaken out to kill the grass roots. This is preferable to burying the sods under the tree, since this is likely to cut off the water supply from underneath.

Pruning Before Planting. In digging trees, shrubs, etc., it is impossible to retain the entire root-system. On this account the top of the tree should be cut back to restore the natural balance (except with evergreens). Make all cuts just above an outside but so that an outward growth will be encouraged. Make a clean, slanting cut on the end of all broken or bruised roots, with the cut surface on the under side. Peach trees should have all the branches removed and the top cut back to within two or three feet of the roots, as with apple whips.

Planting. Holes should be sufficiently large to take the roots without cramping or crowding, and deep enough to permit planting about an inch deeper than the tree stood in the nursery. They should not be dug much in advance of planting, as this practice dries out the hole and the soil which is removed. Hold the tree straight and pack the earth firmly on the roots, taking care that no air pockets are left. It is well to put the top-soil nearest the root. In order to do this the top-soil and the sub-soil may be thrown in separate piles when the holes are dug. Be sure to protect the roots from sun and wind during the planting process. Unless drought conditions prevail the use of water should not be necessary. If used at all it should be used liberally, pouring at least a gallon in each partly filled hole and filling the hole after the water has soaked in. After packing the soil firmly with the use of one's heel leave the top-soil loose with a dust mulch to prevent drying out.

Cultivation. Moisture is a limiting factor in the growth of trees. Its conservation by cultivation is advisable. When this is not possible a mulch of straw, coarse manure, hay, or the like, should be maintained to shade the soil and keep down the weeds. Weeds and grass rob the tree of moisture and plant food. Cultivation is fertilization and pays good interest.
