Separate Table (2)

Minimum Performance Standard

The electrical properties of the receiver at the medium frequency broadcasting band shall meet with the following Minimum Performance Standard:

(1) Receivable Frequency Band

The receiver shall be capable of receiving broadcast waves of from 550 KC/S to 1500 KC/S.

(2) Sensitivity

Under standard test condition, (which is, the working condition of a receiver connected to an artificial antenna of static capacity 150 micro micro F, inductance 14 micro H, resistance 50 ohms and designated power source, and operated with a modulated wave of carrier frequency of from 550 KC/S to 1500 KC/S modulated with 400 C/S at 40% modulation), the antenna input voltage to obtain 50 mw electrical power output out of a non-inductive resistance connected at the plate circuit of last tube with klirr factor less than 15%, shall be not more than 0.4 mv.

The difference of the maximum and minimum sensitivity shall be within 14 db.

And the difference of sensitivity at the supply voltage of 90 V and 100 V shall be within 5 db.
