

明治八年文部省交付

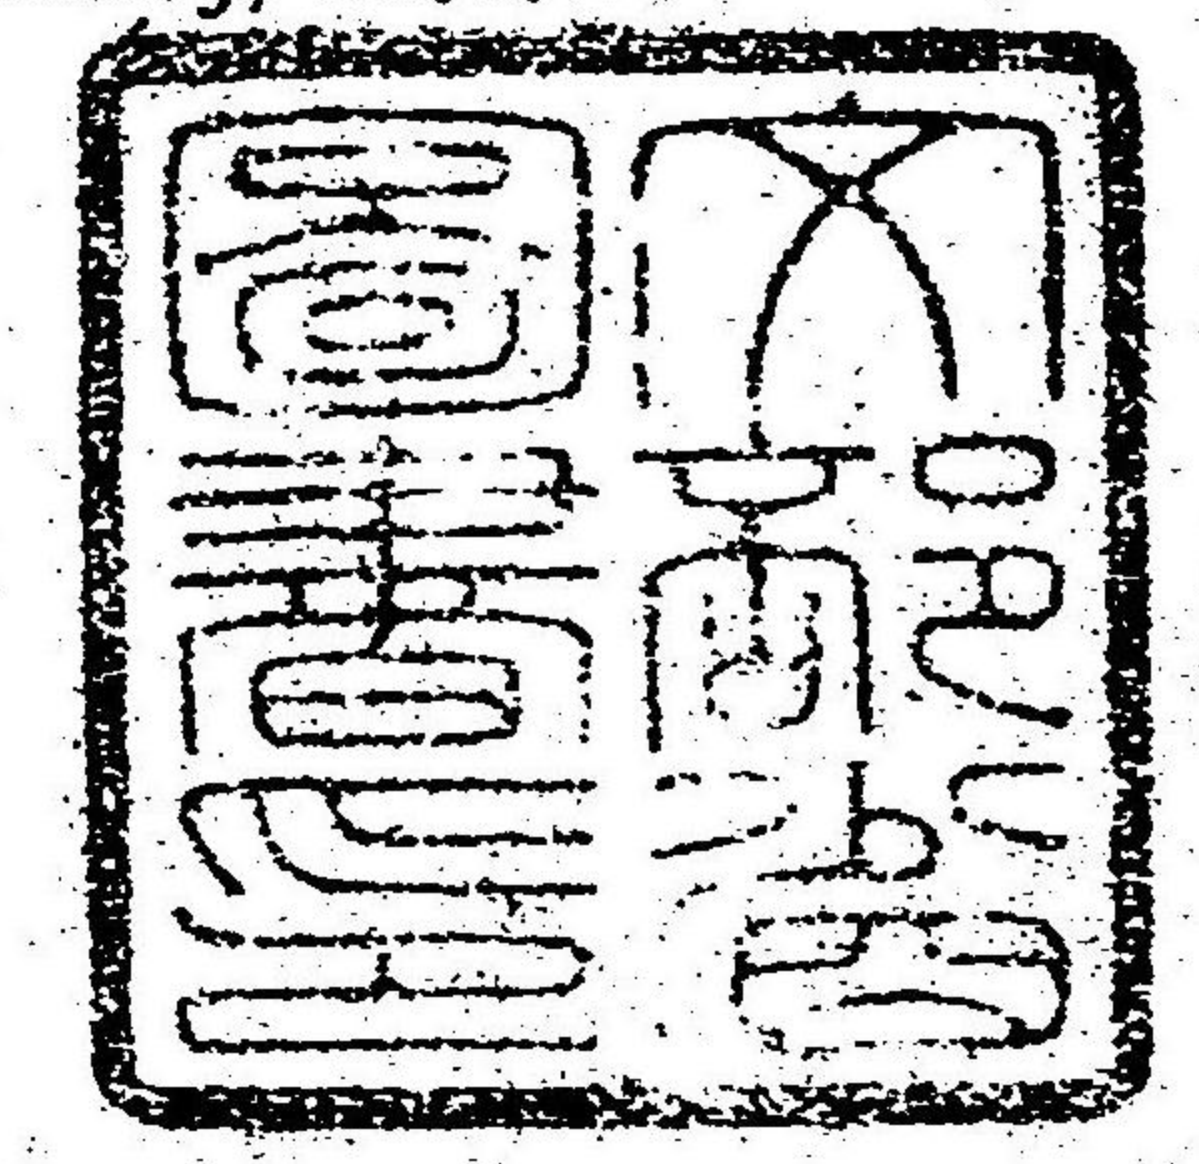

THE Commercial Status of a country is to be judged of by the amount and the quality of its productions. Every one who is anxious for the prosperity of his country, and his own advancement in wealth, should possess a thorough knowledge of such matters. Already more than ten years have elapsed since Japan entered into Commercial relations with foreign nations; and although during that period, statistics of the fluctuation of trade and of the accumulation of stocks have been officially published, it cannot be said that the details of those statistics were carefully prepared.

Beginning with the first month of the present year, therefore, a Return will be prepared here of Imports, Exports, values, quantities, and shipping, conveniently arranged for general information, and published under the title of "Table of Imports and Exports at all the Ports."

Calculations are in Gold Yen.

IMPERIAL CUSTOMS,
