

Polytops history

1981

SEAC patented polymer headed fasteners.
POLYTOPS® trade mark registered.
Made Polytop® pins, nails, screws & rivets in **Zinc Plated Steel** for internal caravan use.

1984

Demand for application outdoors - PVC fascia and cladding.
Added **A2 Stainless Steel** option for corrosion resistance.

1990

Received feedback for application near coast that after 2 yrs, the A2 Stainless Steel nails had **evidence of corrosion**.

1991

Upgraded A2 to **A4 Stainless Steel**.
Passed all corrosion tests.
No feedback on corrosion ever received.

2014

Studied alternative forms of fastener - Nano coating.
Corrosion tests on all types of nails done by UCAS accredited lab. All corrode badly except A4 Stainless Steel Nials.

2015

Attained **CE Mark EN14592** for Polytop pins (25, 30, 40mm) and nails (40, 50 & 65mm).
