

Lohokama
28th January 1871

To Ohuma Langi Esq

Dear Sir -

The small engine and saws which we have at present in our yard were ordered by authority of Sua Shema specially for the Light house Department and I have already given you my opinion regarding their value to us -

If you give me definite orders to send them to another department I, of course, shall be bound to obey, but I think such orders will be very hard upon our department -

Especially as mentioned in my last letter a saw mill in perfect working order with engine &c complete can be procured in Lohokama for 1,200 dollars - or several such machines the property of the Government exist in Lohokama -

Further I would desire to mention that
this saw mill is not complete - The engine
& saws alone have been sent out from England
The tables for the saws to work on, the spindle
for the saws. the pulleys, beltting and several
other small things require to be made in our
yard - I therefore think you would find it more
convenient to get the complete saw mill which
I have mentioned is for sale in Co. Wickham

I will await your further reply
to this letter ==

I am
Yours truly
Wm. King
