NORFOLK CO., MASS., August 9, 1920.
I purchased plants of you a few years ago and they continued to bear until this year when the severe winter injured them. The "Early Jersey Giant" was especially a fine strawberry as well as all the others. They produced enormous strawberries and were very prolific. They were admired by all my neighbors that I sent samples to and all of them sent me for your catalog. I never saw larger, finer or better tasting strawberries, and my strawberry garden was admired by every one who saw it. HENRY C. WARD.

RASPBERRIES.

Note. As tip plants of black cap and other raspberries should not be planted in autumn, we omit them from this list.

Alton. It is said to be perfectly hardy, and to be the most productive of all red raspberries. It begins to ripen in early June and continues for a long season—throughout July, August and September. Sucker plants, dozen, \$1.50; 100, \$10.00.

Brilliant. The brightest in color and the most beautiful of red Raspberries, as it is also the firmest. Sucker plants, dozen, \$1.00; 100, \$5.00.

Cuthbert. An old and well-known variety, introduced by us in 1878. Berries of large size, bluntly conical, deep crimson, moderately firm and of high quality, being rich and sprightly. Sucker plants, dozen, \$1.00; 100, \$4.50; transplanted, dozen, \$1.50. 100, \$8.00.

King. Unites earliness, bright color, firmness and excellent quality of its berries with vigorous growth, productiveness and hardiness of cane. Sucker plants, dozen, \$1.00; 100, \$4.50.

Ohta. The Ohta was produced by that most successful originator of new fruits, Professor Hansen. Said to be "a fall or everbearing raspberry with an ironclad cane and producing berries as large and as good as the grand old Cuthbert, of brighter color and greater beauty." Sucker plants, dozen, \$1.00; 100, \$5.00; transplanted, dozen, \$1.50; 100, \$8.00.

Strawberry-Raspberry. It produces ripe berries from early in July until frost, which are sparkling crimson, of globular shape and often of great size. In the fresh state the fruit lacks flavor, when cooked, however, it is excellent. Dozen, \$1.00, 100, \$6.00.

Welch. A midseason variety with berries of extra large size, good bright crimson color and honey sweetness, melting and luscious; the finest in quality of any offered. Sucker plants, dozen, \$1.00; 100, \$5.00; transplanted, dozen, \$1.50; 100, \$8.00.

ST. REGIS EVERBEARING OR RANERE.

All things considered, the most valuable Raspberry that has appeared in the last quarter of a century. It was introduced by us in 1910 and by sheer merit has forged ahead until now it stands at the top of the list of red varieties. The berries, though not of largest size, are bright red and of excellent quality. It ripens very early—in advance of all other red varieties—and the canes, in addition to being very hardy and drought-resistant, are exceedingly prolific. Its leaves do not scald nor rust, hence it succeeds on hot, sandy soil, where other varieties fail.

Besides giving an immense crop in summer, it also gives an autumn crop; continuing to produce perfect berries in generous quantity until the ground freezes. Unlike all other Raspberries, it yields a moderate crop of berries the first season, if planted in autumn or early spring.

The St. Regis sends up suckers or young plants excessively and unless these are kept down (to a single row of plants or three to four plants to the hill), with hoe or otherwise, treating the surplus ones as weeds, the crop of fruit will be small, both in quantity and size of the berries.

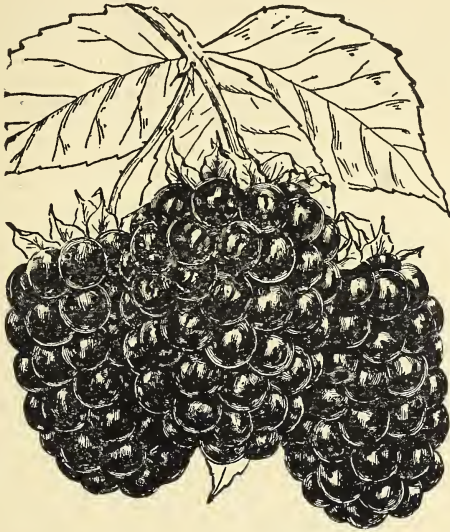

Selected suckers, dozen, \$1.00; 100, \$4.50. Transplanted plants, dozen, \$1.50; 100, \$8.00.

LINN CO., IOWA, July 22d, 1920.—Had a fine crop of St. Regis Raspberries this Spring. Many as large as Cuthberts. They are absolutely hardy.—W. C. Howe.

J. T. LOVETT, LITTLE SILVER, NEW JERSEY.

NASSAU CO., N. Y., Sept. 2, 1920.

Our grape vines have done wonders. Have never seen finer "outdoor" grapes anywhere.

MRS. A. D. CARVER.

PEORIA CO., ILL., Sept. 14, 1920.

The Caco grapes are bearing an immense crop this year. Some of the bunches on the vines are making the ones shown in your catalog look comparatively small. Caco is a remarkable grape.

OTTO V. SEEGER.

DELAWARE CO., PA., March 25, 1920.

I got a Caco grape vine from you several years ago and it has done fine; never missed bearing every year since it commenced, and most years loaded. Never any mildew, and a very strong grower and hardy. Every one pronounces the fruit extra fine.

GEO. S. CHEYNEY.
