

CITY OF SOMERVILLE
MASSACHUSETTS
ANNUAL REPORTS

1913

With Mayor's Inaugural Address
Delivered Jan. 5, 1914

SOMERVILLE JOURNAL PRINT
1914

INAUGURAL ADDRESS

DELIVERED BY

Mayor Zebedee E. Cliff

MONDAY, JANUARY 5, 1914

Gentlemen of the Board of Aldermen:—

Again in accordance with a time-honored custom we gather for the purpose of taking our several oaths of office and to then assume, as servants of the people, all the great cares and solemn responsibilities of conducting the affairs of our beloved city.

We are privileged to be the first city government to be inaugurated in this beautiful auditorium. A large common meeting place of this kind has long been needed, and its value to high school life and for general municipal purposes will be more and more appreciated as time goes on.

The duty of governing the municipality we now assume, and we must be faithful and true to our citizens who honored us by their suffrage.

Never before in the history of our city have the business men, plain, honest and practical people, the bed rock of the municipality, taken so much interest in public questions vital to their interests, comfort and prosperity.

The earnest, progressive citizen of today is not content in municipal affairs to blindly follow partisan leadership, but he is thinking for himself. Let us, then, as far as possible, ignore party affiliations, as we are, and should always be, a city government of and for all the people.

Your hearty co-operation with the mayor is necessary to a successful performance of our duties, and be assured that the mayor will co-operate with you in anything and in everything that will tend to the advancement of the people's welfare and happiness.

The expenditure and safeguarding of the citizens' money is a sacred trust; economy must prevail, and this without in any way crippling any of our departments.

unimproved real estate suitable for building purposes. By compelling such land to pay its rightful proportion, we not only equalize taxation, but we induce the building of more taxable property.

It is my intention to take up with the boards of trade the matter of bringing new industries into our city, as well as many other matters which will further our commercial success. These boards are wisely conducted and earnest in their work, and I shall be only too glad to co-operate with them in their efforts for the advancement and prosperity of our city.

City Charter.

There will undoubtedly be introduced in the legislature the present year, as in every year, one or more proposed amendments to the charter. These should receive your careful attention. Any such amendments as will help to better the administration of city affairs should receive our hearty support, but amendments introduced without good reason, and simply as an experiment in municipal government, should be strenuously opposed. Let us sink all political differences and personal prejudice in our consideration of such measures, and strive to obtain for our city the best possible form of government.

It seems to me that we have too frequent elections, and that the annual change in administrations does not tend to a settled policy in municipal affairs. I would recommend that the charter be so amended as to provide for biennial elections.

Planning Board.

Somerville, in common with other cities of the state, has added to her government a new body known as the planning board. This board, which is appointed in compliance with a legislative act of last year, is required to make careful studies of the resources, possibilities and needs of the city, particularly with respect to conditions which may be injurious to the public health or otherwise injurious in and about rented dwellings, and to make plans for the development of the municipality, with special reference to the proper housing of its people. The board is required to make an annual report to the city council, giving information regarding the condition of the city, and any plans or proposals for development, and estimates of the cost thereof. It is the apparent intent of the law that the board shall act, to a

certain extent, in harmony with the homestead commission of the commonwealth, which was created in 1911.

This board is permitted a wide latitude in its studies, and it should proceed with the greatest deliberation in reaching its conclusions.

Workmen's Compensation Acts.

At the last city election the voters accepted the act to provide for compensating laborers, workmen and mechanics for injuries sustained in public employment. This means that in the future the liability of the city for injuries in public employment will be the same as provided in the statutes relating to employees in ordinary business, known as the Workmen's Compensation Acts. In private business the employer generally insures, but in municipal business the expense of insurance would be a considerable item. We should carefully estimate, to the best of our ability, basing our estimate upon the municipal experience of the past, the probable cost to the city upon an insuring or non-insuring basis. We have for years eliminated the insurance cost in the maintenance of our public buildings, and the wisdom of the practice has been demonstrated, but fire risks to buildings, separated by wide areas, and accidental risks to our employees hardly furnish a basis of comparison as to the economy in insurance. This matter of provision for liability is one that should be given most careful consideration.

Fire Districts.

I desire to bring to your attention the need of fire districts, which I have advocated for years. I believe a beginning should be made, at an early date, in establishing such districts where the danger from fire seems greatest.

Streets.

Never more than at the present time have good roads been demanded. With the advent of heavy auto trucks and increased traffic everywhere, we must keep up with our neighbors in meeting this demand. Methods of construction have reached an advanced stage. Highland avenue and the recently-constructed Tufts street are commendable examples of good road work. No matter how good the original construction, constant supervision is necessary. Immediate repairs of worn surfaces will go far in keeping our roads in proper condition.

The cry for clean streets is universal. We all hear it, but not enough heed it. With a little more care we can make our city a model in this respect.

Grade Crossings.

The construction work of the abolition of grade crossings was placed by the decree of the court in charge of the Boston & Maine Railroad. At Somerville avenue, Medford street, Webster avenue and Dane street, during the last five years, the work of construction has been substantially completed. By statute law the duty is placed upon the city of taking charge of claims and actions for damages to estates caused by the change of grade of public ways. The city solicitor informs me that there were about 175 such claims. Up to the present time more than 125 claims have been adjusted by agreement with owners of estates, and only three actions in court have been brought to trial.

Street Railways.

The public service commission of the commonwealth, acting under chapter 402 of the Acts of 1907, on December 23 granted authority to the Boston Elevated Railway Company to act as a common carrier of baggage and freight in this city. Under this law the company is subject to such regulations and restrictions as may from time to time be made by the local authorities, subject to the approval of the commissioners, and in the grant of the commission it is expressly provided that the exercise of the authority shall not in any way interfere with the conduct of the passenger service. The people of Somerville are among the largest patrons of this corporation and are entitled to the best service that can be given. If it appears that the carrying of baggage and freight interferes with the proper carrying on of passenger transportation, the city government should take immediate action to impose further restrictions.

High School.

For several years the high school has been administered under trying conditions on account of the lack of sufficient seating accommodations. These conditions have been overcome by the recent construction of additions to the buildings and a re-

arrangement of the various rooms. The entire school is now enabled to return to a single session and to normal conditions.

The improved conditions and the opportunity which is thus given for the school to put into effect its plans for instruction and study seem to be greatly appreciated by all who are interested in the educational affairs of the city. This auditorium furnishes an opportunity for the gathering of the entire school and faculty at one time. These gatherings are sure to develop a better school spirit, and will in other directions be beneficial to the school activities.

I believe that a system of water service and hydrants should be constructed in connection with the buildings on Central Hill park. These buildings are not protected by fire insurance, and the comparatively small amount of money necessary for this equipment would safeguard property valued at more than \$500,000.

Public Library.

The new library building on this hill has been recently finished and dedicated. This was completed within the appropriation, and the trustees' estimates for this year's maintenance in the new structure are the same as for last year in the old. Economy will be possible because of better grouping of the parts of the service. This building is one of the best public buildings in the city, both from an architectural and a practical point of view. In its construction and equipment, careful attention has been given to all matters of detail, and I congratulate our citizens on possessing today one of the best library buildings in the commonwealth.

City Hall Annex.

Some disposition should be made at once of this building, as it not only detracts from the architectural beauty of the new library, but, in its present location, spoils the artistic effect of the whole park. I am somewhat surprised that provision has not already been made to carry out the original intention, which I have understood was definitely agreed upon, to remove this building on or before the completion of the new one. The interior of the old library building can be remodeled at small expense to furnish accommodations for departments now quartered in the annex, but there should certainly be provided quarters for the Grand Army no less comfortable than they now

have. If your board decides that the building should be removed to another location, the present quarters can be maintained; if you decide that the building should be torn down, suitable provision should be made in the old library building. Let us not go backward in honoring our veterans. Governor Guild, in his oration at the unveiling of the noble monument which stands on this beautiful hill, said:—

“From the days when on Prospect Hill the first flag of the united colonies, the stars and crosses, was hoisted by Israel Putnam at the siege of Boston, Somerville has been nobly worthy of Middlesex and Massachusetts. In the great struggle that decided that slavery was to end, the long roll of service shows that this city was represented not in the Fifth nor in the Thirty-ninth alone, but that it shared, through one representative or another, in well-nigh every achievement by Massachusetts for the Union, afloat or ashore.”

Somerville Hospital.

I am very glad to renew the annual recommendation that the usual sum of \$5,000 be appropriated for the work of this admirable institution. My only regret is that the city is not financially able to do much more, as I consider this one of the most needed and valuable institutions in our city.

No-license.

The attitude of our city in the matter of the sale of intoxicating liquor is one in which we take great pride. The vote at the last city election was particularly gratifying, the majority for no-license being the largest in our history.

I desire to acknowledge the courteous response of the various heads of departments to my requests for information. I have refrained at this time from making any statement of the work of departments, as I wish to acquaint myself more thoroughly with the details of their management. For the same reason, I have refrained from commendation or criticism. I enter the office of mayor under obligation to no man to do other than my duty as mayor. As I stated many times during the late campaign, both in public and in private, I intend to get down to bed rock and know just what is being done in all departments. It is my purpose, if I find that any department is not properly conducted, to correct the wrong, and if proper

business methods are not in use, to endeavor to install them.

I believe that every honest man in public life welcomes fair, decent criticism, but the spirit of fault-finding with city governments of today, generally without reason, has a bad influence in any community. A "booster" is better than a "knocker." If the members of the city government feel that they have the confidence and support of the people, they will do better work.

To you, members of the board of aldermen, I have just a word to say in closing. I have served in the board of aldermen and know the value to the city of hearty co-operation between the legislative and executive branches. I pledge you mine, and earnestly ask for yours. Do not let us for one moment forget that we are the servants of the people. We are the creatures of the moment, selected by our citizens to honorably and manfully conduct the city's affairs for the current year. Let us so live our official lives that at the end of our term of office it may be said that we have faithfully and conscientiously exerted our best efforts for the welfare, comfort and happiness of all the people. Our duty is a sacred one.

Financial Statement.

Funded Debt.—The funded debt of the city January 1, 1913, was as follows:—

City Loan	\$1,216,000 00
Sewer Loan	331,000 00
Water Loan	38,000 00
Metropolitan Park Assessment Loan	17,000 00
Lowell Street Bridge Loan	37,000 00
Municipal Loan	35,000 00
	<hr/>
	\$1,674,000,00

The debt was increased during the year by appropriations made by the board of aldermen as follows:—

High School Addition, Furnishing and Equipment	\$14,000 00
S. Newton Cutler School, Grading Land	1,300 00
Central Heating Plant	30,000 00
Bingham School, Construction of Hall	2,000 00
Bell School, Additional Window Space	1,200 00
Highways Construction	20,000 00
	<hr/>
Amount carried forward	\$68,500 00

Amount brought forward	\$68,500 00
Highway Department, Steam Roller	4,500 00
Highways, Shade Trees	500 00
Sidewalks Construction	20,000 00
Sewers Construction	30,000 00
New Cells, Police Station	5,000 00
Electrical Department, Underground Construction	3,000 00
Playgrounds Extension	2,500 00
Lincoln Park, Shower Baths	1,000 00
Municipal Loan	87,000 00
	<hr/>
	\$222,000 00

The debt was reduced during the year by maturities as follows:—

City Loan	\$160,000 00
Sewer Loan	19,000 00
Water Loan	6,000 00
Metropolitan Park Assessment Loan	1,000 00
Lowell Street Bridge Loan	1,000 00
Municipal Loan	35,000 00
	<hr/>
	\$222,000 00

Leaving the funded debt of the city January 1, 1914, \$1,674,000, in bonds classified as follows:—

City Loan, at $3\frac{1}{2}$ per cent.	\$208,000 00
City Loan, at 4 per cent.	848,000 00
City Loan, at $4\frac{1}{4}$ per cent.	105,000 00
Sewer Loan, at $3\frac{1}{2}$ per cent.	80,000 00
Sewer Loan, at 4 per cent.	232,000 00
Sewer Loan, at $4\frac{1}{4}$ per cent.	30,000 00
Water Loan, at 4 per cent.	32,000 00
Metropolitan Park Assessment Loan, at $3\frac{1}{2}$ per cent.	16,000 00
Lowell Street Bridge Loan, at $3\frac{1}{2}$ per cent.	36,000 00
Municipal Loan, at $4\frac{1}{2}$ per cent.	87,000 00
	<hr/>
	\$1,674,000 00

Taxes.—The assessors' warrant for the tax levy assessed upon the polls and estates of the inhabitants, as of April 1, 1913, was duly submitted to the collector.

The total amount of taxable property, not including non-resident bank shares, was \$71,906,464.00, and the rate established was \$19.80 on each \$1,000 valuation, as follows:—

Real estate, valuation	\$64,077,600 00
Personal estate, valuation	7,768,300 00
Resident bank shares	60,564 00

Total valuation \$71,906,464 00

At the rate of \$19.80 on each \$1,000 valuation	\$1,423,747 99
Polls, 23,262 at \$2	46,524 00
Street Sprinkling	34,854 95
Extermination Gypsy and Brown-tail moths	580 04

\$1,505,706 98

Non-resident bank shares, \$86,436 at \$19.80	1,711 43
---	----------

Total amount of tax levy \$1,507,418 41

Appropriations were made as follows:—

General Government	\$76,298 00
Protection of Life and Property	226,200 00
Health and Sanitation	141,500 00
Highways	123,000 00
Charities	36,300 00
Soldiers' Benefits	39,200 00
Education	407,000 00
Libraries	39,100 00
Recreation	17,025 00
Unclassified	3,277 00
Municipal Indebtedness	300,151 80
Water Works	185,800 00

Amounting in the aggregate to \$1,594,851 80

Less estimated revenue	\$446,760 34
Less unexpended balance, 1912	13,419 70

460,180 04

Amount to be raised by taxation \$1,134,671 76

Amount carried forward \$1,134,671 76

Amount brought forward \$1,134,671 76

STATE AND COUNTY TAXES, ETC. :—

State Tax	\$126,000 00
County Tax	63,565 14
Grade Crossing Tax	12,091 27
State Highway Tax	58 00
Abatement of Smoke, Boston and vicinity	247 44
Metropolitan Sewer Assessment	69,725 37
Metropolitan Park Assessment	36,157 60
Charles River Basin Assessment	6,349 56
Alewife Brook Assessment	1,222 50
Wellington Bridge Assessment	631 31
Overlay and Abatement	19,552 04
Street Sprinkling	34,854 95
Extermination of Gypsy and Brown-tail Moths	580 04
	<hr/>
	\$1,505,706 98
Collected for state on non-resident bank shares	1,711 43
	<hr/>
	\$1,507,418 41

The following tables, giving a condensed history of the city's finances, are herewith presented for reference:—

YEAR.	Amount of Funded Debt.	Increase of Funded Debt.	Reduction of Funded Debt.	Tax Rate per \$1,000 Valuation on Account of Reduction of Funded Debt.

REPORT OF THE CITY TREASURER AND COLLECTOR OF TAXES.

Treasurer's Office, February 26, 1914.

To the Honorable, the Mayor, and the Board of Aldermen of
the City of Somerville:—

Gentlemen: The undersigned presents herewith the forty-second annual report of the financial condition of the city, and a statement showing, in detail, the receipts and disbursements for the year ending December 31, 1913.

Public Property.

The property acquired during the year was as follows:—

New Cells, Police Station	\$953 19
Fire Department, Additional Apparatus	5,800 00

Funded Debt.

The funded debt December 31, 1912, as per Table B of the last annual report, was \$1,674,000.00.

The debt was increased during the year by appropriations as follows:—

Loan dated April 1, 1913:—

Highways Construction	\$20,000 00
Sidewalks Construction	20,000 00
Highways, Shade Trees	500 00
Highway Department, Steam Roller	4,500 00
Electrical Department, Underground Construction	3,000 00
Playgrounds Extension	2,500 00
Lincoln Park, Shower Baths	1,000 00

Amount carried forward \$51,500 00

Amount brought forward	\$51,500 00	
High School Addition, Furnishing and Equipment	14,000 00	
New Cells, Police Station	5,000 00	
Central Heating Plant	30,000 00	
S. Newton Cutler School, Grading Land	1,300 00	
Bingham School, Constructing Hall	2,000 00	
Bell School, Additional Window Space, Sewers Construction	1,200 00	
	30,000 00	
		\$135,000 00
Municipal Loan, dated July 1, 1913:—		
Fire Department, Additional Apparatus	\$20,000 00	
Highways Construction	7,000 00	
Fire Department	10,000 00	
Police Department	4,000 00	
Contagious Hospital	4,000 00	
Refuse Disposal	7,000 00	
Central Library	4,000 00	
School Contingent	4,000 00	
School Teachers' Salaries	14,000 00	
Contingent Fund	13,000 00	
		87,000 00
Total amount of appropriations on Funded Debt account		\$222,000 00

To provide for the above-mentioned appropriations, coupon bonds to the amount of \$222,000 were issued, viz.:—

Dated April 1, 1913, 4¼ per cent.

City Loan Bonds:—

Nos. 4461 to 4471, payable 1914	\$11,000 00
Nos. 4472 to 4482, payable 1915	11,000 00
Nos. 4483 to 4493, payable 1916	11,000 00
Nos. 4494 to 4504, payable 1917	11,000 00
Nos. 4505 to 4515, payable 1918	11,000 00
Nos. 4516 to 4525, payable 1919	10,000 00
Nos. 4526 to 4535, payable 1920	10,000 00
Nos. 4536 to 4545, payable 1921	10,000 00
Nos. 4546 to 4555, payable 1922	10,000 00
Nos. 4556 to 4565, payable 1923	10,000 00

Sewer Loan Bonds:—

Nos. 564 to 593, payable 1914 to 1943	30,000 00
---	-----------

\$135,000 00

Dated July 1, 1913, 4½ per cent.

Municipal Loan Bonds:—

Nos. 4566 to 4575, payable 1914	\$10,000 00
Nos. 4576 to 4585, payable 1915	10,000 00
Nos. 4586 to 4595, payable 1916	10,000 00
Nos. 4596 to 4605, payable 1917	10,000 00
Nos. 4606 to 4613, payable 1918	8,000 00
Nos. 4614 to 4621, payable 1919	8,000 00
Nos. 4622 to 4629, payable 1920	8,000 00
Nos. 4630 to 4637, payable 1921	8,000 00
Nos. 4638 to 4645, payable 1922	8,000 00
Nos. 4646 to 4652, payable 1923	7,000 00

87,000 00

\$222,000 00

The following bonds became due during the year:—

City Loan Bonds:—

Nos. 1722 to 1727, interest 4 per cent.	\$6,000 00
Nos. 2019 to 2031, interest 4 per cent.	13,000 00
No. Reg. 197, interest 4 per cent.	1,000 00
Nos. 2196 to 2201, interest 4 per cent.	6,000 00
Nos. 2345 to 2348, interest 4 per cent.	4,000 00
Nos. 2486 to 2490, interest 4 per cent.	5,000 00
Nos. 2604 to 2607, interest 4 per cent.	4,000 00
Nos. 2746 to 2748, interest 3½ per cent.	3,000 00
No. Reg. 78, interest 3½ per cent.	1,000 00
Nos. 2858 to 2861, interest 3½ per cent.	4,000 00
Nos. 2988 to 2990, interest 3½ per cent.	3,000 00
Nos. 3101 to 3109, interest 4 per cent.	9,000 00
Nos. 3262 to 3266, 3268 to 3269, interest 4 per cent.	7,000 00
Nos. 3267, 3270, interest 4 per cent.	1,000 00

REPORT OF THE SCHOOL COMMITTEE.

School Committee Rooms, January 2, 1914.

Ordered, that the annual report of the Superintendent be adopted as the annual report of the Board of School Committee, it being understood that such adoption does not commit the Board to the opinions or recommendations made therein; that it be incorporated in the reports of the City Officers; and that 1,000 copies be printed separately.

CHARLES S. CLARK,
Secretary of School Board.

SCHOOL COMMITTEE, 1913.

HENRY H. FOLSOM,	Chairman
GEORGE C. MAHONEY,	Vice-Chairman

Members.

	Term expires January

Finance.—Ashton, Stone, Kelley, Clancy, Whitaker, Folsom, Fiske, Burns, Dunklee.

Text-books and Courses of Study.—Whitaker, Kelley, Clancy, Stone, Folsom, Mrs. Brewer, Cholerton.

Industrial Education.—Ashton, Mrs. Whiting, Clancy, Kelley, Mrs. Brewer, Hogan, Stone.

School Accommodations.—Clancy, Hogan, Whitaker, Stone, MacDonald, Mrs. Brewer, Cholerton, Burns, Dunklee.

Teachers.—Fiske, Whitaker, Bradley, Folsom, Mahoney.

Playgrounds and School Hygiene.—Mrs. Whiting, Mrs. Brewer, Cholerton, Kelley, MacDonald.

Rules and Regulations.—Bradley, Fiske, Mahoney.

REPORT OF THE SUPERINTENDENT OF SCHOOLS.

To the School Committee of Somerville:—

I have the honor to present the following report of the conditions of the schools for the year 1913. This is the forty-second annual report of the schools and the sixth which I have written.

I have compiled the statistical tables showing the facts of attendance, cost, etc., for the school year ended June 30, 1913. This change was made because by State Law School Committees are required to furnish such statistics to the State Board of Education and because the custom is general for cities to show school statistics for the school year. I have added, however, tables showing the use made of the appropriations for the municipal year. My comments upon the state of the schools relate in general to the municipal year.

It has seemed to me desirable to make a general report of the undertakings which the School Committee have under their charge and to leave detailed statements of special activities to the officers having them in charge.

The Obligations of Public Education.

In seeking to understand the work of any agency the investigator would do well to find the influences which condition that work and to estimate its efficiency with reference to these influences. So in making a report upon the work of public schools for another year it seems worth the while to note at the beginning what it is that public schools are today called upon to do in order that a just comparison may be made between their accomplishment and their obligations. In this way only can be brought to view what the schools are doing and why, and in this way only can be made clear what they should do that they are not doing.

Schools are the means by which society seeks to fit its youth to participate in, to maintain and improve the organized social body. The development of the individual is sought not for himself alone but also for the benefit of the society of which he is a part. It therefore follows that the efforts of the schools to prepare youth for social conditions must be shaped by reference to these conditions. Static conditions justify unchanged methods. Changing conditions demand new efforts. That social conditions are static today few are blind enough to affirm. On the contrary it is quite apparent that social conditions are in a state of flux, of economic, industrial, and vocational change. Other changes there are besides these. The order of a decade or two ago has passed away and a new order is at hand. The schools to perform their mission must adapt their efforts to the new conditions, which they must meet by

altering old methods where necessary, and by making new ones where new ones are needed.

For the needs of earlier days it was conceived to be the chief duty of the schools to impart knowledge to the young, on the theory that by means of the information thus obtained and the mental training secured from the process of learning the youth would become fitted for useful living and for bearing part in support of the institutions of the State. Consequently schools were organized with the end in view of imparting knowledge, and schoolhouses were built with this purpose solely in view. Teachers were trained in normal schools and colleges to be skilful in imparting knowledge, grades of information were established to mark the progress of the learner and all the children were offered the same courses, were held to the same requirements and were advanced according to their ability to master the requirements which were set up because of the aim which the schools held in view. All honor to the achievements of the schools during these days! It is not disparagement of them to say that the purpose which dominated them is not sufficient for today and that a new purpose has taken the place of the old and has brought with it many consequent changes and will bring many others in the future.

The new motive is regard for the child as an individual and one to assume in due time a place as a supporter of the State. As an individual the child should develop in health, happiness, knowledge, and power to do; as a future citizen he should be trained to an inclination and a capacity for useful service. A sound body, a clean heart, a well-informed mind, and faculties trained to service useful to himself and to others are the characteristics which the new motive in education seeks for each individual.

Significant of the new view in education are the recognition of the fact that children vary greatly from one another in physical powers, in aptitudes and inclinations, in home and economic conditions, and in probable length of schooling, and the attempt to provide suitable agencies of education to meet the needs which these varying conditions create. Hence today, while the graded system of schools invented as the best means of imparting knowledge to the youth of a community remains as the framework of the modern city school system the additions thereto to meet the new demands are numerous and important. A list of these additions would include the following: Health supervision, including school hygiene; physical training; provisions for exceptional children such as physically or mentally defective, wayward, slow or brilliant children; manual training, domestic art and domestic science; vocational education and its complement, the vocational advising of children; playgrounds and their supervision; home and school gar-

dening; classes for new Americans, ignorant of the language; continuation and part time classes for the youth compelled early to go to work, and night classes of all kinds for youth and adults. If this list seems staggering in its length and significance it must be remembered that the undertaking of the schools is to develop the youth of a community and to fit them for living in a complex social organization. And life is many-sided for the youth of a community as well as for the adults thereof. To meet these needs of children society turns to the schools as in the changes due to growth of cities the homes become less adequate for performing the part in the training of youth which formerly they assumed.

The Educational Offering of Somerville.

This brief survey of the tendencies of public education at the present time gives a standard of comparison for the educational establishment of Somerville. The large body of youth of our city present all the variations of need which are to be found in any city of corresponding size. The absence of industries from the city does not lessen the need of vocational education, for of a certainty the youth must be prepared to earn a livelihood, but it does increase the difficulties of providing such opportunity because of the lack of co-operation from industrial establishments. The increasing number of children and adults coming directly to our city from foreign countries presents a serious problem of properly meeting the needs of non-English speaking pupils.

To meet these standards and local needs Somerville makes provision for

- A. General Development and Culture.
- B. Specific Development and Efficiency.
- C. Exceptional Development.

A. For General Development and Culture there are:—

1. *Day.*

Kindergartens.

Elementary Schools.

A High School with general courses.

2. *Night.*

Elementary Schools.

A High School with general courses.

B. For Specific Development and Efficiency there are:—

1. *Day.*

Vocational School for Boys.

Vocational School for Girls.

High School with a vocational course.

2. *Night.*

Industrial classes for women.

High School with vocational courses.

C. For Exceptional Development there are:—

1. *Day.*

Atypical (2).

Ungraded (1).

Non-English Speaking (1).

2. *Night.*

Non-English Speaking (2).

A. *General Development and Culture.* The aim in this undertaking is to enable every pupil to gain knowledge of himself, his powers and limitations, to get possession of the elements of culture and to become fit for social service. The means by which these ends are sought in the elementary schools are the school arts,—reading, writing, and arithmetic, language and literature, history and geography, hygiene, including instruction concerning the effects of alcohol and tobacco, manual and domestic arts, music, drawing, and physical training.

1. Day Schools. (a) *Elementary Schools.* As the most important of these elements of general culture the three R's occupy the most time and receive the greatest attention. In the treatment of these subjects teachers are guided by the course of study but are allowed great freedom for individual initiative and judgment. Closely associated with reading are language and literature, history and geography. These subjects are treated as major studies and have a large relative allotment of school time. Penmanship, music and drawing, manual training and sewing in the classroom, all are conducted under expert supervision and all show the benefit which such supervision always confers. One noteworthy achievement of the year has been the re-shaping of the course of instruction in sewing so as to lay emphasis upon making garments rather than upon making stitches. Under the new plan the child practices making stitches as an incident to making a garment in which her interest is mainly centred. The same educational principle is followed in all other forms of hand work, whether in the classrooms or in the manual training shops.

Taken all in all the elementary schools are organized upon the plan adopted in the early days mainly according to progressive stages or divisions of information. Upon this structure have been placed the new subjects of the curriculum. The whole conduct of the educational activities so organized is animated, however, by sympathy for the individual and by the desire to place his interests in the position of first importance. Good work abounds and good results are secured. Due to

faults of organization, however, the work of the teachers is rendered harder than it should be and the progress of pupils is made slower. One of the chief of these faults is the presence in many classes of exceptional pupils who should be taught in classes by themselves. A few such classes are already established and their value is beyond doubt. No single change in the elementary schools produces more valuable results than the grouping of exceptional children in classes by themselves.

Another fault in the organization of the elementary schools is that which limits the supervision of supervising principals or masters to buildings having the ninth grade. It would be better to change this rule so as to give to teachers in the smaller buildings the benefit of such supervision. The rule which requires masters to teach not less than ten hours each week in the highest grade should also be changed so that the master may dispose of his teaching time as his judgment dictates. In order that they may properly carry into effect the good provisions of Section 82 that masters "shall instruct classes, examine and grade pupils, and supervise the instruction of teachers in their own schools" masters should have some of those ten hours for that purpose. It is altogether to the interest of the schools that masters have opportunity to teach and do teach in every classroom under their jurisdiction.

(b) *High Schools.* The high school offers three courses whose major purpose is to give general development and culture. These are the preparatory, the manual arts, and the general courses. Each has a well defined secondary purpose. The preparatory course fits pupils for higher institutions of learning; the manual arts course fits pupils to enter on advantageous terms high grade industries; the general course helps pupils whose natural proclivities are not strongly defined to find themselves. To some extent the materials of these courses are the same, but in method of presentation, adaptation to aim and intensity of pursuit each course makes use of them in a manner suited to its needs. The programme of these courses includes ancient and modern languages, history and government, mathematics and natural science, literature, art, manual arts and domestic arts.

1. Of these courses the preparatory is the oldest, being the lineal descendant of the old Latin High School. Many of the teachers of this course taught for years in the Latin High School, are familiar with its history and traditions, are devoted to its aims, and are proud of its reputation. All of these values they are zealously working to conserve and they assert confidence in the work they are doing under the new conditions. Their associates, teachers in the course who were not formerly in the Latin High, have all been selected for this work because of special fitness for it. All of these teachers under the leader-

ship of the Head of the Preparatory Course, formerly a teacher in the Latin High, are working to make this course equal in every respect to the purpose which it serves. Last June from this course eighty-seven pupils were sent to nineteen higher institutions of learning. So far as records are procurable they are wholly creditable to the work of this course.

2. The Manual Arts course was derived from elements which existed in the English High School. The interest of the course centres around the manual arts, freehand and mechanical drawing and construction work with tools and machinery. To some extent the book subjects of the course are related to the manual work. It is proposed to make this relation closer and more vital. The purpose of this course is to give opportunity for the development in the individual of the creative faculty, initiative, and judgment through the exercises which are carried on in the shops. All of the shop work is of a practical, commercial character. As the new rooms provided for this course by the additions to the high school building were not equipped when the school opened in the fall the boys improved the opportunity for doing real work of construction by building benches, lumber racks, partitions and tool rooms. This course now has an equipment for two years in tool and machine work. There are rooms for a third and a fourth year and it is hoped that the third year room will be equipped this year.

For girls the manual arts course provides instruction in domestic science and in domestic art, the latter having recently been introduced. The present and proposed equipment for domestic science is adequate, but that for domestic arts is insufficient. At present it shares with an academic subject the use of a classroom.

What technical high schools represent to cities which support them, the manual arts course of our high school represents to Somerville.

3. The General course offers many of the subjects which are found in the preparatory course but under different conditions and limitations. The complaint that the colleges dominate high school instruction can have no force in this course. Here instruction is free from constraint and is shaped to interest the pupils in the subject matter itself. This course is somewhat experimental in its nature as by its title and its aim its limitations are not defined. As one of its aims is to help pupils to find themselves, this freedom to experiment is advantageous.

These are the offerings of the high school to the cause of general development and culture. The courses are well organized, well provided with officers and teachers, and with the exception of the Manual Arts course, well equipped. They will return to the city full value for the money invested and will meet the needs of the pupils efficiently within the limits of their

undertaking. However, it should be pointed out that this offering is deficient in one particular of first importance: It makes no provision for physical training or for athletics for either sex. As a sound body should be assured for the trained mind the omission of all care for the physical development of high school pupils is leaving to chance a matter of great significance. A physical director with suitable assistance from within or without the faculty should be provided to have charge of the physical training of the students and to develop and encourage all kinds of desirable out-of-door sports for both sexes.

Before leaving this subject I cannot forbear saying that I think the exactions of home and school duties are too severe for some high school pupils. Again some pupils are restrained from pursuing desirable work or studies out of school because home study takes all of their time. It seems to me this is neither a necessary nor a desirable condition. Its remedy can be found in allowing diploma credits to outside work so that it might be offered in substitution for some of the requirements for graduation. This idea has been worked out in some places and has in it that which is in harmony with the present tendency to make the work of the schools articulate more closely with outside interests. The administrative difficulties are such as could easily be solved once the principle were accepted.

2. The Night School. (a) Two elementary schools and one high school are maintained at night in the interest of the general development and culture of those who cannot attend school by day. The elementary schools provide instruction for illiterate minors who are compelled by law to attend night school and for others who attend voluntarily because of their eagerness to add to their command of the school arts. These night school attendants by their self-denial in devoting four nights in a week to study after the labor of the day give the strongest kind of an appeal to sympathy and appreciation. By such efforts they merit a good return and I am glad to say that they get it in these schools. Experienced principals and proficient teachers make these schools of the first order of value. In view of the social conditions to which I refer in the first part of this report I expect to see the work of these schools continue to grow in importance.

(b) The high school carries on the good work begun in the elementary schools and fills its own field with equal success. Its programme of studies includes English and mathematics, free-hand and mechanical drawing, bookkeeping, stenography and typewriting, physics, Spanish, and chemistry. The attendance this year has been the largest in the history of the school. As the members of the faculty are all experts in their specialties

the instruction offered is of a high order. Four years spent in this school will yield rich returns to the student.

Thus the offering of the City of Somerville in night school instruction spans the interval from the illiterate's beginnings in reading to the high school graduate's specialization in work of a continuation nature.

B. For Specific Development and Efficiency.

1. Day Schools. The aim in this work is to fit pupils for profitable employment in certain vocations while giving them opportunities for self-development by means of related academic work. This effort belongs to the period of secondary education and is furnished by Vocational Schools and by the High School. The Vocational Schools are organized under the provisions of chapter 471 of the Acts of 1911, are under the supervision of the Massachusetts Board of Education, and receive financial aid from the State to the amount of one-half of the cost of maintenance. Admission is given to pupils over fourteen years of age who appear able to carry on the work successfully. The vocational work of the High School is offered in a Commercial course, which fits pupils for certain forms of employment in business.

(a) *The Vocational School for Boys.* This school is now in its fourth year. It occupies the four-room school building on Tufts street known as the Davis school building. The faculty consists of a principal and three instructors. The capacity of the school as now organized is limited to fifty pupils. Instruction in two trades covering a period of two years is offered. The trades are machine work in metal, and tool and machine work in wood. The aim is to fit boys to enter these trades as advanced apprentices. In connection with the trade work instruction is given in the school arts, civics, geography, and hygiene. This work is to a large extent individual, as the variations of the pupils in attainment in school subjects is considerable. The school is doing its work well and has shown that it is established on right principles and meets a real need. Its success as measured by growth is hindered by conditions beyond its control. The whole of the space in the building available for use is occupied by the work of the school. Expansion of work will require more room, but all efforts to get more space so far have failed. Probably the best way to get a small addition of room is to adapt the basement of the building to school use. This could be done at small cost, expenditure being required mainly for a new heating outfit. The boys could make most of the construction alteration.

A just estimate of the vocational training which this school gives as a part of a scheme of secondary education will not be satisfied by a provision apparently inferior to that given to

other phases of secondary education. It will perceive that here is an educational opportunity of the utmost value to many more boys than are now sharing it, and it will insist that this educational opportunity be so presented to boys as to show them its real worth to them as preparation for usefulness. For details concerning the work of the school during the past year I invite your attention to the report of Mr. Morse, principal of the school.

(b) *The Vocational School for Girls.* This school fits girls for profitable employment in millinery and dressmaking establishments and in the domestic arts, while providing a training in related academic subjects. The school occupies a dwelling house at the corner of Atherton and Harvard streets which has been adapted to the various activities of the school in a fairly satisfactory manner. During the last year a Tea Room and Food Shop was opened at 109 Highland avenue as an adjunct to the activities of the school. At present the course at the Vocational School for Girls is two years in duration. The faculty consists of a principal and eight teachers. The success of this school is shown in its growth in attendance, the enthusiasm of its pupils, and the success of those who have gone from its courses into employment. The plan on which the school operates is broad enough to furnish educational opportunities for many more girls but the school building is already crowded, and little additional work can be done until more room can be secured. Like the Vocational School for Boys this school suffers from the appearance of inferiority which its small and crowded building gives it. When other accommodations can be provided it will be desirable to do so because of the success and promise of the school. A full report of the work of the school for the past year is furnished in the report of Miss Brown, the principal.

(c) *The High School Commercial Course.* This course originated in the English High School. At first it consisted mainly of typewriting, stenography, and bookkeeping offered in the junior and senior years, after a general course in the first two years. Now the course is so arranged as to give specific commercial instruction during any or all of the four years of the High School course. This course is distinctly vocational because its aim is to fit pupils for employment at wages in various forms of business. Consequently a large proportion of time is given to various kinds of office work, such as bookkeeping, typewriting, and stenography. Connected with this practical work there are other studies intended to supplement the practical studies and to enlarge the capacity of the pupils. Recognizing the fact that many pupils cannot remain in school the whole four years of the High School Course a grouping of the practical work in the first two years has been made for the bene-

fit of such pupils. Here can be had all the advantage which the study of two years can give. That this course is not the equivalent of one four years in length is obvious. As it is desirable that all who can shall remain the full four years pupils who complete the two years' course will be allowed to continue the work if they so desire. The vocational work of the Commercial Course of the High School is more popular than that of the other schools, judged by the numbers of pupils who select each. That the reasons which dictate this disparity are sound and wholesome may well be doubted. If they are unsound in part, it would seem to be the duty of those who shape educational policies to discover why such reasons prevail and to endeavor to substitute therefor better ones.

2. Night Schools. (a) Classes in household arts have been conducted in two centres. At the Girls' Vocational school millinery and dressmaking were taught. At the Clark Bennett school, in addition to these two subjects, cooking was offered. The conduct of these classes was in accordance with provisions of the law designed to encourage women who are employed during the day at work or in the home to attend such courses for the purpose of becoming better workers. These schools were under the supervision of the State Board of Education and received State aid. Their success was such as to warrant opening again another year.

(b) *Night High School.* Vocational work in the night high school follows the lines of the commercial work in the day high school. It differs, however, greatly from the day school work in the range of intensity among the attendants. Night school scholars are all employed during the day. Some attend night school for the purpose of fitting themselves for a change of occupation, while others do so to perfect themselves in the work in which they are engaged. The latter are generally the more accomplished in their night school work and represent a higher degree of vocational-work effort. From this point of view chemistry and mechanical drawing are included in the list of vocational subjects offered at the evening high school.

C. Exceptional Development. The aim of this undertaking is to enable exceptional pupils to develop their powers under conditions which are adapted to their needs and are favorable to their development. A secondary purpose of this provision is to promote the efficient conduct of the regular classes by removing therefrom pupils whose exceptional characteristics make them misfits there.

Public education undertakes to educate all the children of the community—a large undertaking. But while engaged in this effort with great numbers of children the schools must deal with the problem as one affecting individuals, not masses

of individuals, for education is an individual matter. But individualizing education does not mean that each child must be taught separately. To do this would not be to the interest of the child even if it were economically possible to do so. Therefore children are taught to advantage in groups. But the success of this plan depends upon the character of the grouping as well as upon the number of individuals composing the groups. A general likeness among the members of the group must exist if general instruction is to be effective and the well being of members of the group promoted. It was the recognition of this principle which led to the establishment of graded schools. The divisions or grades of the school system were determined chiefly upon the basis of information, all other considerations being disregarded. With changing social conditions, increasing enforcement of laws for compulsory school attendance, increasing perception of the physical and mental deficiencies of many children and solicitude for their amelioration, and with increasing numbers of pupils entering the schools without knowledge of the English language, new elements have entered the problem of grading and forced themselves upon the attention of teachers and others familiar with the work of schools. Formerly the plea was for ungraded classes to take care of slow or retarded pupils. Now the need amounts to demand that special provision shall be made for exceptional development. We have already established several classes for exceptional pupils.

1. Day. (a) *Atypical Classes.* There are now two classes for children of subnormal mental development, a new class having been established this year. There is a class in the Bell school and one in the Hodgkins school. The former has had a waiting list all through the year. The latter being a new class has not had an attendance equal to its capacity. This condition is due to the fact that parents of children of defective mentality are often unwilling to recognize the deficiency and to allow their children to attend the class provided for them. This attitude, while natural and inspired by parental love, is not a wise one, for it is now well established by expert knowledge and experience that such subnormal children can profit little by the exercises of the regular school, that they can never acquire a useful mastery of the school arts, but that they can attain health, happiness, and the mastery of certain manual arts if their efforts are properly directed. I think it is important that pupils of this kind should attend atypical classes wherever it is possible to do so and that additional classes be formed.

(b) *Non-English Class.* A class for non-English speaking pupils has been formed in the Clark Bennett school. Application for admission to our schools is increasing of those but recently arrived from foreign countries. These applicants vary

in age, nationality, aptitude, mentality, and education in their own language. In attainment in English they are inferior to first grade children. What shall be done with them? Manifestly it is not desirable to place them in first grades, if they are beyond the years of primary instruction. Nor do they usually fit anywhere else in the regular scheme of organization. Their welfare as well as the welfare of the community and the State demands that proper provision shall be made for the education and assimilation of these would-be Americans. The class for non-English speaking pupils at the Clark Bennett school has done well; others are needed.

2. Night. The elementary evening schools have long been dealing with this problem successfully, but it is assuming larger proportions there. Under the new law relating to the employment of minors, night school attendance is required of all minors over sixteen years of age who do not possess educational qualifications equivalent to those necessary for completion of the fourth grade of the elementary schools. By this law all new arrivals between sixteen and twenty-one years of age who are ignorant of our language swell the number of non-English speaking pupils in the night school. This work is being well done, however, and is organized on a scale sufficient for present needs.

Schoolhouses. The elementary schools have used the same buildings as last year. Not a new schoolhouse has been built for them. Rooms which were unused last year in the Edgerly, Clark Bennett, Hodgkins, and Lowe Schools have been occupied since September. Application for admission to the Cutler School in September was greatly in excess of the capacity of that building, making it necessary to send to the Hodgkins School many pupils who belonged in the Cutler School, and to provide for them to send some Hodgkins pupils to the Highland School. While this transferring resulted in providing a sitting in an all-day school for all pupils and in fairly even-sized classes in all three schools the transferring of pupils was contrary to the wishes of parents and consequently disagreeable to them. For similar reasons it was necessary to transfer a whole first grade class from the Brown School to the Lowe School. In the eastern part of the city half-time classes were avoided in the fall only by distributing attendance among the several buildings so as to make use of every sitting, in many cases contrary to the customary rule of attendance and the wishes of parents. In other reports I have pointed out that this disagreeable necessity is due to the fluctuations of school population and to the necessity of organizing the elementary school attendance in building units too small and numerous to meet the need in a more satisfactory

way. At the present time every schoolroom in the elementary buildings is in use except one in the Proctor School, and in several buildings rooms are used for classes which were not intended for that purpose. Of course the Lincoln School building, which has been unused over a year, is not included in this statement. This condition is one whose significance must be fully considered. First of all it puts a very rigid limitation upon developing new undertakings. No new special class of any kind can be opened without a room as its home. Nor can an additional grade class be opened except in the Lincoln and Proctor Schools without recourse to half-time classes. Increase of attendance in the near future may be expected in the eastern and western parts of the city and also in Ward Two. In the eastern part the increase will soon make an enrollment too great for the school buildings in that region. Additional accommodation will, therefore, soon be needed there. Whenever it is provided it should be made in connection with an existing school building or in substitution for one of them, as a twenty or twenty-four room building in place of the Edgerly or Prescott Schoolhouses. This principle of development should be applied to future additions to the elementary school plants both in the interest of educational organization and of economy in the cost of administration. Happily this principle of growth has been applied in the plans for the Cutler schoolhouse and it is only necessary to complete the building according to the architect's plan to have ample accommodations there and a thoroughly satisfactory building. It is desirable to complete this building as soon as means can be provided for doing so. While it may be possible to accommodate the West Somerville pupils without opening the Lincoln Schoolhouse before next September I think it would be better to place two or more classes there at the beginning of the next semester. By so doing the new pupils entering at that time can be cared for and some needed relief can be given to the Cutler and Hodgkins Schools.

Three unusual improvements to elementary schoolhouses were made during the summer vacation. The attic of the Bingham School was remodeled into a large and well-lighted assembly hall. Now for the first time in many years one of our grammar schoolhouses has a hall adequate to its needs.

At the Bell Schoolhouse a generous addition of windows was made, greatly improving the lighting of that building. This improvement is so valuable and so much appreciated by pupils and teachers alike as to make it a good plea for a like provision in the other schoolhouses where one is needed.

By slight alterations in the basement of the Bell Schoolhouse the ward room has been enlarged and made a suitable place for school and neighborhood meetings.

The third improvement referred to was made at the Forster School, where a brick fire-escape was built at one side of the main building.

Other repairs and improvements of a lesser extent were made at other schools, all contributing to the comfort and safety of the pupils. This work should continue unchecked, however, until all the deficiencies which have been reported are made good. It would seem good policy, moreover, to add at least one assembly room a year to the grammar schools. At the Hodgkins School is an opportunity for making a hall like the one at the Bingham. As the cost of such a change is small I hope it can be made in 1914.

But the great improvement of the year was made in enlarging the high school plant and adding to it a large assembly hall. The additions consist of two three-story wings on the north side of the west building, each wing having nine rooms above the basement, and two three-story additions to the south side of the same building, one at each end. By these additions the south front of the building was lengthened by two rooms. A three-story connecting structure was built between the east and west buildings. Interior remodeling of the two small halls and other parts of the two buildings was made in the effort to increase the seating capacity of the plant. By these means there were added to the buildings twenty-six recitation and study rooms, thirteen laboratories and shops, and eight smaller rooms for office, store-rooms, etc. Although these alterations were not begun until April first they were so nearly completed by September 15 that sessions of the school were resumed on that date in accordance with announcement made at the close of school in June, and the whole student body again attended the same single daily session. The hall which was begun ten weeks later than the other additions was finished late in December. On Tuesday, December 23, the hall was dedicated. As was fitting the first public exercise held in it was a school celebration, when for the first time the student body assembled with the faculty. In the evening there was held in the hall a public meeting and the building was thrown open to the inspection of the public. What have these additions done to help solve our High School problem? The best answer that can be made is a general one. The additions have made possible conducting the school again on a single session plan. Since September every pupil has had a sitting of his own. They have also provided a few more laboratories and workshops, giving place for additional work in sciences and manual arts. As the space of the buildings is now divided between laboratories of one kind and another and sittings for pupils, the provision for the former is pinched, is a minimum allowance, while the space devoted to sittings is a

generous maximum. Under present conditions, however, the work can be carried on with a comfort which seems great when compared with the limitations and discomforts of the past. But when at the beginning of the next semester 210 more pupils enter the school the seating capacity will be severely taxed to accommodate them. Thus it will be seen that the high school problem is not yet solved. A very great first step has been taken and high school pupils and faculty will work rejoicing in that step, but the march of development of provisions for secondary education in this city will inexorably force this problem upon public attention until greatly increased facilities are provided for the secondary education of our youth. While there is the time of waiting for this next advance it is worthy of the most thoughtful study to determine what the character of the advance should be.

Organization. Our schools are organized in the following order:—

- Kindergartens.
- Elementary Schools.
 - 9 grades.
 - 4 special classes.
- Secondary Schools.
 - High School.
 - 2 Vocational Schools.

The programme of studies for the elementary schools is uniform for schools of a given grade, though large liberty is permitted principals and teachers in its application to their individual classes. This organization of the elementary school has come down from earlier days and until the last decade has been accepted without question though the eight-year elementary course was common outside of New England. Within the last decade this grouping of the elementary educational efforts has been seriously attacked by educators of high standing and other plans of organization have been advocated by them. Within the last few years many cities have adopted plans of organization varying in a greater or less degree from the traditional plan. Briefly stated these new plans have in common agreement upon the following division of the scheme of education:—

	Kindergarten	4 to 6	years of age.
Grades 1 to 6	Elementary	6 to 12	“ “ “
“ 7 to 8	Intermediate	12 to 14	“ “ “
	Secondary	14 to 18	“ “ “

The kindergarten feature is the same as in the present scheme, varying from one to two years according to the resources of the community.

The elementary period from the first to the sixth grade in-

clusive corresponds in general to the same grades of the present scheme. The teaching of the school arts is the principal function of this group. History, geography, and literature are included much as they are in the usual curriculum. The period is recognized, however, as a unit of treatment and as belonging to the pre-adolescent stage of child development.

The intermediate stage includes the last two years of the elementary course, the seventh and eighth years, in which the age of the pupils ranges from twelve to fourteen years. This is the early adolescent stage of development. This is the period when childhood is receding and there is a looking forward to maturity. The programme of the intermediate schools differs from that of the last two years of the traditional elementary course in that it presents several parallel courses of instruction from which the pupil may select one most suited to his aptitudes. These courses lead up to and articulate with corresponding courses in secondary schools, either High or Vocational. In adaptation of the Intermediate School idea to local conditions communities differ in practice. Some apply the principle to the upper grammar grades which remain in the same building with other grades. The plan most strongly recommended, however, is to segregate the seventh and eighth grades in buildings by themselves, conduct the work on a departmental plan, and offer the differentiated courses with a single equipment for special studies serving a large group of pupils. For this plan are claimed superior efficiency, economy in accommodations, and economy in cost of instruction.

From the Interim Report of the Committee on School Inquiry, Board of Estimate and Apportionment, of the City of New York, recently published, I quote the following paragraph from the report of Professor Hanus, which as well as anything I have read sets forth the function of intermediate schools:—

“They afford, as already said, an unusually good opportunity to adapt instruction during the last two years of the elementary school to individual and social needs through differentiated courses of study. The pupils of an intermediate school have reached the age when they are passing through the stage of later childhood and early youth. The physical and mental changes of early adolescence, and the dawning interest in social responsibilities, demand much more careful consideration than they usually receive. The segregation of such pupils in a separate school brings all the special problems of their education into prominence. Consequently the teachers of such schools may, under wise guidance, develop peculiar skill in dealing with them. Such problems are the appropriate differentiation of courses of study to meet individual and local needs; segregation of the sexes, with appropriate modification of

teaching and management for each sex; grouping the pupils in accordance with varying abilities, health, industry, ambitions, and home conditions; articulation of the different courses of study, with high schools and with vocational schools; vocational guidance; organization of pupils for self-government, athletics, club work, social activities; in general, problems connected with the larger freedom appropriate to the age of the pupils, through which they may exercise and develop the insight and self-direction that makes all the rest of their lives now and later more significant and valuable."

In this scheme the High School occupies the same part as in the older order. But it is claimed that both the elementary and the high schools are benefited by the better approach to the high school which is afforded by the differentiated courses of the intermediate schools.

While I do not advocate applying this principle generally to our schools at this time, I think there are elements in our situation to which I have alluded in other parts of this report that make it worth our while to examine this plan to see if it would help us solve some of our problems.

Attendance. The facts of attendance of pupils during the last school year are set forth in the usual statistical tables, where a comparison can be made with other years. It is of immediate interest, however, to know what the present attendance is, how it compares with last year and what its effect is upon the organization of the schools. The following figures will give such information:—

	1911	October 1912	1913	Change 1912-13
Whole membership.....	11,872	11,978	12,422	+444
Membership in high school...	1,781	1,819	1,814	—5
“ “ elementary schools.....	9,786	9,847	10,272	+425
“ “ kindergartens	214	211	221	+10
“ “ vocational schools.....	91	101	115	+14
Teachers employed	343	349	365	+16

Sixteen teachers more are employed now than at the same time last year. Of these, two are employed in the high school, two in the Vocational School for Girls, five in the elementary schools, three are cadet teachers and four special teachers. The five additional elementary teachers are distributed as follows: One fifth-grade teacher at the Edgerly, one first-grade teacher each at the Lowe, Hanscom and Bennett, and one assistant at the Hodgkins. The special teachers are distributed as follows: One sewing teacher, one teacher of an atypical class in the Hodgkins School, one teacher of a non-English speaking class and one teacher of an ungraded class at the Bennett School. The two high school teachers are in the Commercial depart-

ment, one a teacher of Stenography and the other a teacher of Spanish and Commercial subjects.

The increase in membership in the elementary schools shown above was 425. On the basis of forty-two pupils to a teacher this increase in the membership would call for an increase of ten teachers. Because of the distribution of the pupils over the city this growth in attendance was met by the addition of five elementary teachers, of whom one is an assistant, two are cadet teachers, and two are regular grade teachers.

Cost of the Schools. For the present fiscal year an appropriation of \$320,000 was made for teachers' salaries and \$36,000 for contingent expenses. Of these sums \$318,957.18 were expended for teachers' salaries and \$35,971.06 for contingent expenses. The corresponding expenditures for 1912 were for teachers' salaries \$305,873.97 and for contingent expenses \$37,030.37. The larger expenditure for teachers' salaries for the last year is in part due to the increase of the salaries of elementary teachers and in part to the increase in the number of teachers employed.

The details of expenditure in the Contingent fund are given in a statement submitted as a part of this report. The salaries paid to teachers and the number of teachers and their individual salaries are also shown. These are the elements which produce the cost of the schools.

Conclusion. In this review of the year I have not repeated the discussion of needs which were presented last year. It is pleasant to note that this year's achievements include provision for some of those needs; others still remain for care. Therefore I include them among the recommendations which I submit below.

The subjects which I specially recommend to the attention of the School Committee are the following:—

Additional provision for exceptional children in the elementary schools including

- A. Ungraded classes.
- B. Classes for non-English speaking pupils.
- C. Classes for older boys who do not fit their scholarship grade.

The provision for teaching cooking to girls in elementary schools.

Additional window space in several buildings.

Extension of the supervision of masters over smaller schools.

Change of Section 82 requiring masters to teach ten hours each in ninth grades so that they may teach more in other grades in their schools.

Consideration of the application of the plan of intermediate schools to local needs.

Introduction of physical training in the high school and the appointment of a physical director who shall also direct sports.

Consideration of the feasibility of awarding diploma credits to High School pupils for outside work of certain kinds.

Completion of the Cutler School at an early date.

Building an assembly hall in the Hodgkins School.

Provision of additional accommodations for elementary schools in East Somerville.

Provision of additional accommodations for the Vocational Schools.

Re-opening of the Lincoln School either in February or September.

Consideration of the best way to provide for the future development of secondary education.

As a closing sentiment I wish to record my appreciation of the spirit of cordiality and co-operation which has existed throughout the schools during the year and to thank the members of the School Committee for their unfailing kindness and support.

Respectfully submitted,

CHARLES S. CLARK,
Superintendent of Schools.

January 2, 1914.

HIGH SCHOOL REPORT FOR YEAR 1913.

Somerville, Massachusetts,
January 12, 1914.

Mr. Charles S. Clark,
Superintendent of Schools,
Somerville, Massachusetts.

Dear Sir: I take pleasure in presenting the following report of the high school activities for the preceding year.

The year of 1913 has marked an epoch in the history of the Somerville High School. Lack of sufficient room has been for fifteen years a source of great inconvenience, a constant hampering of school work, and a decided menace to the health and safety of pupils and teachers. These difficulties are now temporarily removed through the building of additions to the school of twenty-six new rooms, with a large hall and lunch room. For the first time in years pupils and teachers are now meeting in single session, though, to secure this, several rooms are used jointly as home rooms and for the teaching of specific subjects such as mechanical drawing, typewriting, and sewing.

One Session Plan. As a result of these additions the school returned in September to a one session plan after three years of double sessions. This special plan of extended or double sessions has thus been thoroughly tested. It was adopted as the only possible means of housing 2,000 pupils in a building much too small. It was entered upon with unbiased minds and was modified and improved each year. Having given this plan careful observation and study, I am convinced that such an arrangement is neither practical nor advisable for the following reasons:—

(a) *Extension of the school day at both ends.* School began at eight o'clock and closed at four-thirty. This meant inconvenience to the homes because of very early breakfasts; it also meant sending pupils home late in the afternoon. In the winter, particularly, they were obliged to go home after dark.

(b) *Artificial light.* For a large part of the year, the pupils of the afternoon session had to do most of their work by artificial light.

(c) *Double use of desks.* The morning pupils were obliged to share their desks with afternoon pupils. Although this was carried on without confusion, yet it was a source of great inconvenience.

(d) *Little opportunity for conference with pupils.* As the intermission between the sessions was necessarily short, morning pupils were obliged to leave the building promptly and so had little chance to confer with their teachers. On the other

hand, teachers were very much restricted in their power to retain pupils after school for purposes of discipline or instruction.

(e) *A factory method of furnishing an education.* Everything had to be done by clock work and hurriedly. The opportunity for the development of many of the broader issues of school life, such as musical, literary, and debating organizations, was decidedly curtailed.

(f) *A hardship to teachers.* A special arrangement was made for practically every teacher. The greater number were on duty either the first six or the last six periods of the day. The opportunity for conference with teachers, the holding of department meetings and general teachers' meetings were decidedly affected because of this plan, and the school was put to a very great inconvenience.

I am unreservedly of the opinion, therefore, that it is a great gain to the school to be enabled to meet and pursue its activities in one session and as one school with a united force of teachers and body of pupils.

Reorganization of Faculty and Rearrangement of Pupils.

The problem of reorganization and arrangement involved three considerations: First, a plan to avoid excessive traveling on the part of teachers and pupils; second, a plan to group together pupils and teachers pursuing similar courses, and, third, a redistribution of the executive and administrative force to secure the best possible conduct and administration. The placing of the entire commercial department in one building and the preparatory work in the other was perhaps the greatest factor in bringing about relief from congestion, and in securing a decided decrease in walking and stair climbing between periods.

Capacity of the Building. Although we appreciate sincerely this return to normal conditions we must not lose sight of the exact situation regarding the capacity of the building. There are at the present time forty-four class rooms containing in all 1,691 desks. By a double use of drawing rooms, sewing rooms, typewriting rooms, and lecture rooms so that these rooms may be also used as home rooms the total capacity is 1,949. The largest number of pupils present at any one time this past fall was 1,865. The incoming freshman class of 210 will make a membership in February of approximately 2,000. It is very apparent from these figures that the maximum capacity of the school will be reached at that time and that plans must be immediately devised to accommodate the natural growth of the school.

Educational Work of the School. The division of the work of the school into courses under competent heads has led to many interesting innovations and changes.

Preparatory Course. This course, always strong in the personnel of its teachers and in the character of its work, has in no sense suffered by the various changes and additions in its teaching force and course of study, and is in a position, I am confident, to do better work than ever. The resignation last spring of the head of this course, Mr. Sprague, was followed by the election of Mr. Wilkins, for many years an able teacher of preparatory subjects in this school. Mr. Wilkins brings to this course a thorough knowledge of its needs, competent leadership and much enthusiasm.

Pupils were sent from this school in September, 1913, to the following higher institutions:—

Boston University.....	8
Dartmouth College.....	8
Harvard College.....	4
Jackson College.....	1
Mt. Holyoke College.....	2
Massachusetts Institute of Technology.....	6
Radcliffe College.....	3
Simmons College.....	4
Smith College.....	1
Tufts College.....	12
Tufts Dental School.....	3

Massachusetts Agricultural College.....	4
University of Wisconsin.....	1
Worcester Polytechnic School.....	1
Framingham Normal School.....	4
Lowell Normal School.....	1
Salem Normal School.....	12
Massachusetts Normal Art School.....	5

Total	87
-------------	----

The present Senior class is preparing for the following schools and colleges:—

Boston University.....	3
Colby College.....	1
Dartmouth College.....	4
Framingham Normal School.....	3
Fitchburg Normal School.....	1
Harvard College.....	20
Holy Cross.....	1
Jackson College.....	1
Normal Art School.....	4
Massachusetts Agricultural College.....	6
Massachusetts Institute of Technology.....	13
Radcliffe College.....	7
Salem Normal School.....	7
Simmons College.....	5
Sargent School.....	2
Smith College.....	2
Tufts College.....	16
Tufts Dental School.....	2
Tufts Medical School.....	1
Wellesley	3

Total	102
-------------	-----

The school has had for many years the privilege of sending pupils by certificate to the colleges represented by the New England College Entrance Examination Board. This Board represents practically all of the colleges of New England, excepting Harvard and Yale. This certificate privilege is granted every three years on the basis of the excellence of the records maintained in college by the pupils sent from the school. In April, 1913, the certificate right of our high school was renewed for three years.

Commercial Course. This department has materially profited this year in equipment and space allotment. Two well equipped bookkeeping rooms, two typewriting rooms, a commercial geography room, three rooms devoted exclusively to stenography, all combine to place the department on a much better working basis. The organization of a school bank (in conjunction with one of the savings banks of the city) is contemplated in the near future.

General Course. This course remains one of the steady hard working courses of the school. One innovation during the past year has been the establishment of a Community Civics course for first year classes. It is the purpose of this course to interest and acquaint pupils with the civic conditions of their own city and to study various matters such as health protection, taxation and government at close range.

Manual Arts Course. A considerable opportunity for development has been accorded this course during the past year, and with the new rooms, wholly or partially equipped, much more extensive and thorough work is possible. The boys taking Manual Training have made all of the benches in one of the new rooms, besides many partitions, and tool closets. A newly equipped sewing room for girls is very popular and supplies a long felt want. In the cooking department the girls have turned their work to practical use by supplying lunches for a limited number of teachers and pupils.

Departments. The heads of departments have been making a concerted effort to systematize the work and to adapt the subject matter and method of treatment in each class to its particular course. The following table shows the number of teachers and pupils coming under the direct supervision of each department head:—

	No. of Teachers or Part Teachers.	No. of Classes.	No. of Pupils.
English	13	64	1,850
History	10	40	1,152
Mathematics	12	41	1,174
Latin	10	23	550
Greek, German.....	9	20	331
French, Spanish.....	10	36	913
Manual Training and Mechanical Drawing...	5	28	494
Drawing	2	18	240
Science	5	23	626
Stenography and Typewriting.....	5	36	776
Bookkeeping, Business Practice, etc.....	6	32	866
Domestic Science and Arts.....	2	14	194

Subjects and Their Cost. The different subjects taught in the school with the proportionate cost for instruction is given in the following table:—

	No. of Pupils.	No. of Classes.	Average No. of Pupils per Class.	Total No. of Recitation Periods.	Individual Pupil Recitation Units.	Total Cost of Instruction.	Cost per Pupil per Recitation.
English	1,850	64	29	253	7,400	\$10,660	.036
Elocution	649	23	28	23	649	900	.034
History	1,152	40	29	133	3,881	5,309	.034
Mathematics	1,174	41	29	170	4,910	7,176	.036
Greek	66	5	13	25	330	1,530	.115
Latin	550	23	24	115	2,750	7,006	.063
German	365	15	24	75	1,825	3,363	.046
French	594	24	25	120	2,970	5,134	.043
Spanish	189	7	27	35	945	1,900	.05
Biology	54	3	18	18	324	570	.043
Chemistry	121	5	24	30	726	1,590	.054
Physics	150	5	30	30	900	1,873	.052
Science Lectures	97	2	49	5	233	371	.039
Physiology	204	8	26	8	204	330	.04
Manual Training	204	13	13	64	1,031	3,208	.077
Mechanical Drawing	290	15	21	38	725	2,909	.10
Freehand Drawing	226	10	15	50	732	1,434	.048
Stenography	428	16	27	74	2,002	2,650	.033
Typewriting	490	20	24	60	1,250	1,400	.028
Bookkeeping	123	6	21	30	615	938	.038
Penmanship	121	3	40	6	242	377	.038
Business Practice	394	13	30	65	1,970	2,577	.032
Commercial Law	47	2	24	5	117	412	.088
Commercial Geography	79	4	20	10	197	696	.088
Cooking	99	6	17	18	297	900	.075
Sewing	95	8	12	16	190	400	.052

Afternoon Conferences. A new plan has been recently put into operation whereby each teacher is in attendance one afternoon each week to help and advise pupils. Backward pupils, pupils who have lost recitations through absence, and pupils who need help to overcome some doubtful point will thus have opportunity to work with the teacher personally. I am confident that this plan will result in great profit to pupils and teachers alike.

The Large School: Its Strong Points. After more than two years' experience in a school of approximately 2,000 pupils, I am prepared to speak enthusiastically of the following strong features of the large school:—

(a) *Supervision by trained experts.* Heads of courses and of departments, chosen because of their peculiar fitness in their own lines, are prepared to give trained supervision and expert advice to the teachers under their charge.

(b) *Specialized teachers.* Teachers are engaged to teach subjects in which they have made especial preparation and are especially trained. This plan secures the focusing of effort and more careful and skilled instruction.

(c) *Larger equipment.* The cost of equipping well one large school is not only much less than that for several smaller schools, but also allows the purchase of special equipment without material increase of expense.

With sincere appreciation for the many good things that have come to the school during the past year and with hopeful anticipation for a successful year under new conditions, I am

Very respectfully yours,

JOHN A. AVERY,

Head Master.

REPORT OF THE VOCATIONAL SCHOOL FOR GIRLS.

Mr. Charles S. Clark,
Superintendent of Schools.

Dear Sir: The courses offered at the Vocational School for Girls remain the same as last year; except that some lines of work have broadened considerably, namely in the Household Arts course, where home making includes dressmaking and millinery with trade standards, and where cooking and the allied subjects of household management are taught intensively with a view to earning value.

This Household Arts course also offers to those with ability, distinctive lines of training for catering, food shop, lunch room or institutional management. In the Tea Room, which is operated in connection with the school, experience is gained in serving lunch daily and in planning menus the cost of which will not exceed a certain sum. Both at the school and Tea Room the subjects are treated in a practical way that will be of help to the individual student.

The demand for trained accommodators has been greater than the school can supply. Several of the girls are training in this accommodator work especially and will give additional study to it next year.

It is interesting to see what food has been prepared for sale since September. The following is a partial list: Twenty dozen small cakes, eleven large cakes, twelve dozen macaroons, cookies, etc., twenty-eight dozen rolls, four wedding cakes, preserves, chowchow, jelly, etc.

Every week ten loaves of bread and three to six dozen macaroons are sent to a tea room in Boston; besides these are the pies and plain and fancy cakes that have been used in the Tea Room.

This year the first class will graduate. This class includes all the students who have worked at least three months at their trade previous to graduation. Tests have been given during the year to trade workers by part time work in the shops, and to the household arts students by housekeeping and the preparation of meals in their own homes, and order cooking and accommodator service at school.

Five girls in the millinery class were placed last spring and worked for the season. At the beginning of the dull time other positions were found for them, which proved so satisfactory that only one girl returned to the trade. Earning a living by millinery is felt to be so precarious that students entering the school are advised to take the fuller Household Arts course as this offers greater opportunity for steady employment.

Four girls were placed in dressmaking shops and still hold these positions at advanced wages. Gratifying reports have come from employers regarding these girls—reports of their adaptability, interest, good training, with assurances of steady employment. A list of the employment and earning wage of the pupils placed last March follows:—

One placed in a dressmaking shop at \$6.00, now earning \$7.00; one placed in a dressmaking shop at \$6.00, now earning \$7.50; one placed in a dressmaking shop at \$5.00, now earning \$6.50; one placed in a dressmaking shop at \$6.00, now earning \$6.50 (has worked one month); one placed in a millinery shop at \$6.00 for season, afterwards in manufacturing company as stock girl, later assistant bookkeeper at \$8.50; one placed in millinery shop at \$6.00 for season, afterwards in manufacturing at dressmaking and neckwear at \$8.50; one placed in a millinery shop at \$6.00, now assistant trimmer at \$9.00; one placed in a millinery shop at \$5.00, now working at photography at \$6.00; one placed in a millinery shop two seasons, now preparing food at home for an exchange; one placed at lunch counter at \$5.00, now earning \$7.50 to \$8.50 in salesroom.

It has been interesting to learn what some of the girls are doing at home with the instruction given at school.

Nearly all are doing some cooking, and eight are preparing meals regularly. One girl reports that her father prefers her cooking to her mother's and so it is nearly all done by the girl herself. She prepares at home what has been learned at school that day. Another girl had entire charge of the house, the buying of food and preparation of the meals for the three weeks her parents were away.

One girl helps pay her tuition by mending and altering clothes at home.

Another saved money to buy a dress form, and is not only making her own dresses, but several simple house dresses and skirts for a neighbor.

Notes of appreciation have come from some of the parents. When word was sent to one mother that her daughter would graduate this year, she replied that she preferred that her daughter should stay in school another year as she realized all the good the school had done for the girl.

Another girl was placed this winter and proved satisfactory, but came back to school at the request of her mother. This has all been very gratifying to those who have labored so faithfully, for it shows that while the girls can make good in trade the extra time given to school is desired by the parents.

Evening Classes.

The evening classes have been well attended, the enrollment being eighty at the Vocational School, with a waiting list,

and forty-five at the Clark Bennett. The short unit course has proved popular, for it enables a woman who cannot give up many evenings during the winter, to come for a short term until she has learned to accomplish one definite thing, as the making of a dress, the making of a hat. The courses vary in length from ten to twenty lessons according to the subject taught, and the success of this arrangement has been demonstrated by the fact that those on the waiting list could not be accommodated until January, when some of the courses were finished.

It has been interesting to learn that some of these students are doing dressmaking outside for friends; that one woman has been advanced in the shop where she is working, and another has been helping a dressmaker two days a week, with her most important work.

High School.

In October cooking for first year students was started at the High School, 105 electing this study. Lunch is served four days a week to twenty-four teachers and about forty girls. It is expected that when the new lunch room and kitchen are opened the advanced classes will have cooking on a larger scale that will furnish a hot lunch to 500 students.

Classes in dressmaking were started in November elected by seventy-four students. It is planned to carry this course through the four years so that at the end of that time a student will have such a thorough knowledge of dressmaking in all its branches that she can do her own home sewing or go into business for herself.

Grade Sewing Classes.

The sewing in the graded schools has been somewhat changed to give the pupils more definite problems that will lead to the High School or the Vocational School without repetition of work in either of those schools.

Most of the model work has been discarded and work is applied directly to the undergarments and children's dresses that are made.

With machines introduced into the seventh and eighth grades it will be possible for the teacher to see that the child has her instruction under competent supervision and no sewing will be taken out of the class until completed.

It is hoped that in the near future dressmaking can be taught in the ninth grades for the benefit of children who are obliged to leave school at the completion of their grammar school education.

Very respectfully,

MARY HENLEIGH BROWN,
Director.

REPORT OF THE SOMERVILLE VOCATIONAL SCHOOL FOR BOYS.

Mr. Charles S. Clark,

Superintendent of Schools.

Dear Sir: The Vocational School for Boys offers, at present, four trade courses, namely, cabinet making, pattern making and carpentry in the department of woodworking, and general machine shop practice in the department of metal working.

Since September, 1913, the division of time has been: Two days in the shop, and one day in the classroom devoted to related and non-related subjects including drawing, English, mathematics, history, civics and hygiene. Thus the entire school is composed of three divisions. Each division has its metal workers and its woodworkers, also its proper quota of first year boys and second year boys. This time allotment has proven entirely satisfactory and meets the needs of the students and of the shop and study work much better than the former half and half arrangement.

As the waiting list does not hold on for more than three months after the opening of school the membership at present is forty-seven, or one less than the capacity of the school. Of these two are from the local high school, six from the Morse school, five from the Knapp, five from St. Joseph's parochial school, three from the Pope, two each from Edgerly, Forster, Glines, Highland, Bingham and Carr schools, and one each from the Bell, Bennett and Prescott schools. Three are non-residents, of whom two are from Stoneham, one from Peabody, and three others are new residents. Classified by grades, five are from high schools, seven are grammar school graduates, three are from the ninth grade, seven from the eighth, twelve from the seventh, eleven from the sixth, and two from the fifth grade. During this school year (from September, 1913) fifty-seven boys have been enrolled. The present membership of forty-seven is thus 82.5 per cent. of the enrollment as compared with a membership of 64.7 per cent. at this time last year. Each year some excellent boys have entered the school and have remained to finish their course. Each year has witnessed the enrollment of a larger number of such boys and this year, as a comparison of the registrations will in some respects show, the highest average of all has been reached. In this particular, as in some others, the school is better able to demonstrate its worth to the boy, to the city, and to the state. But even better things are to be expected. This type of school is not "intended for naturally backward or defective children" nor for "any boy who needs or wants to learn how to work." He must be fit to follow a

skilled trade and make a success of it. He must be fit therefore to receive instruction and training required for such a trade. The satisfactory completion of the grammar school course is, in general, a sufficient qualification for entrance. Exceptions to such a rule should be made only by the principal after due investigation.

Fifteen boys completed their courses in 1913, six from the wood department and nine from the metal department. Of these six woodworkers and seven machinists found places at their trades, some in shops and others in house building and contract work. One of the others was needed in his father's store and one decided to take a position with a banking house. Fifteen will be graduated in 1914, nine woodworkers and six machinists, and their prospects, in view of the probable improvement in industrial activities, are at least as bright as those of their predecessors.

A somewhat detailed investigation of the record of boys who have spent six months or more in the school leads to the conclusion that as compared with those who drop out of the grammar schools, ostensibly to find work, their circumstances have been improved by their attendance. They hold their jobs longer, find places more quickly, and their progress is more rapid.

The call for a department of automobile repairing is growing more insistent. The school auto was finished during the year and has been in commission as delivery truck for the school for several months. It is operated by a student who is duly licensed, and it is giving entire satisfaction both in efficiency and economy. But it needs a place to stay. During December seven students took a job at the water works shops rebuilding a Packard touring car for truck service. This car was found by the Vocational School for the Water Department but the school had no place to keep it while putting it in shape to use. Auto repairing and building has come to be one of the principal branches of mechanical industry and offers an attractive field for trained men. This line of training is interesting in itself, it presents a wide variety of good practice and is in demand by the boys.

The school has reached its limit of growth until more room is provided. Much valuable space is wasted in the basement and should be cleared and reclaimed for shop use, for which it is highly suitable.

If room could be found in any convenient part of the city it would be desirable to establish a department of electricity and also one of printing. Both these departments could be entirely self supporting if work were supplied from city requirements. These trades are thriving and stand high in wages and opportunities.

Financial Statement.

(Calendar Year 1913.)

EXPENSES.

Construction	\$232 29
Equipment	394 99
One-half maintenance	3,171 50
Supervision	83 88

Net cost of school for year			\$2,811 54
Per capita cost (membership of 52)			54 07

Number of commercially valuable jobs done in year:

Wood department 128 jobs
 Metal department 147 jobs

Total 275 jobs or 5 3-10 jobs per boy.

Respectfully submitted,

E. MINOR MORSE,

Principal.

REPORT OF THE SUPERVISOR OF MANUAL ARTS.

Mr. Charles S. Clark,
Superintendent of Schools,
Somerville, Mass.

Dear Sir: The work in Manual Arts for the school year 1912-1913 has followed the outline in last year's report. The work completed and the results accomplished have been in accordance with the aim of the course, without, I think, taking time and effort from the other subjects of the curriculum.

In the lower grades the Manual Arts has come to be recognized less as a separate subject, and more as an assistant to greater interest in other subjects.

In the upper grades the drawing is correlated with the different lines of handwork.

The so-called "busy work" of previous years has almost entirely disappeared and "centre work" is again emphasized. In this work the teacher as well as the pupil has become intensely interested, thereby keeping in touch with vocational and industrial activities which were not thought of heretofore. The work gives an outlet for the child's physical energy, providing means of occupation with familiar material, and enabling him to acquire a technique and a degree of skill in the fundamental operations of vocational activities. The centres selected have been school, home and personal activities, which have proven so absorbingly interesting that much research work has been brought forth.

This has been a great surprise and pleasure to the teachers and I believe a great profit to the pupils.

I wish to commend Miss Gale, supervisor of the elementary schools, and the teachers for their keen interest and for the excellent results obtained.

No radical movement has been made to industrialize the Manual Arts in the grades, yet the work at present lays the foundation for any industrial work that the school system may undertake in the future.

In introducing any craft in the curriculum of our schools, it is of the utmost importance that we carefully scrutinize its educational possibilities, learn just wherein its values lie, and decide the approach which will yield most abundantly in return for the time spent.

Sufficient numbers of teachers must soon be trained, and broadly trained, to teach the Manual Arts, not as mere workmen, but as individuals who realize that education for the

masses today involves a practical and a broad knowledge of many things and the specific knowledge of, and power to do some particular thing.

In the meantime it will be the endeavor of the present work to give a general knowledge of the arts which will be of service to the pupils after they leave school and at the same time assist in the development of judgment, culture and taste.

An increase in the amount of time given in the upper grades to the drawing and manual training has resulted in expected improvement. I recommend that every boy receive instruction in freehand drawing and design.

In the high school the work has become more and more industrial in character.

The new course of study has been planned as follows:—

First—The Manual Arts work of the first two years to be both cultural and industrial in character and to represent as many fundamental mechanical activities as possible. It should be taken by all students.

Second—The Manual Arts of the last two years to be specifically industrial in character and designed to serve the needs of those who will enter vocational service upon leaving High School.

The Manual Arts Course and the manual training of all the courses have been extended to the third and fourth years and work in advanced wood work, sheet metal, machine and electrical work is now outlined.

The new equipment is now being installed by the pupils as a part of their regular work, with good results.

In addition to the regular class instruction in the courses, I submit a partial list of work completed by pupils for the permanent school equipment:—

One office desk; one office table; twenty-four galvanometers for Physics Department; twenty-four inclined planes for Physics Department; fifteen tables for Physics Department; three meter stands for Physics Department; twenty-five bulletin boards; twenty-four book racks; four sand trays for grades; one lumber rack; three stock rooms; three hat and coat stands; four cabinets; one glue table; one cold air box; two coat lockers; one desk platform; one shelf and coat hanger; one partition; two wall closets; rebuilding foundry benches; building benches. rooms nine and ten; one blue print frame; resurfacing twenty-five benches; rebuilding drawing board case; frame for fitting room; rebuilding case in cooking room; fifty blackboard rulers; one notebook cabinet; repairing twenty-six chairs; repairing ten desk covers; refinishing ten desk covers; twenty-eight ink stands for drawing room; one tool cabinet; one oak table top; one office cabinet; two work boxes; six keyboards; two letter files; lockers for benches, room nine; shelving in

ten closets; setting up engine lathe; repairing shafting, belting, lathes, lathe parts, etc.; moving and re-adjusting entire Manual Training Department.

Respectfully yours,

HARRY L. JONES.

December 24, 1913.

REPORT UPON QUESTIONNAIRE.

On November 25, 1912, the School Committee authorized the Superintendent of Schools to send two high school teachers to the training course in vocational guidance which was being conducted by the Vocation Bureau, 6 Beacon Street, Boston. In accordance with this action two teachers, a man and a woman, were asked by the Superintendent of Schools to take this course. The former was obliged by unexpected causes to withdraw from the course soon after beginning it but the latter continued through the year. In accordance with the policy of instruction followed in the course, this teacher was asked to take some phase of high school experience for investigation, study and report. After consultation with the Superintendent of Schools she determined to make the subject of her study, the transition from grammar school to high school, and the attitude of high school pupils towards the opportunities provided in the latter. Accordingly a questionnaire was prepared, printed at the expense of the School Committee and given to pupils as hereafter described. The Somerville High School then had a morning session for the three upper classes and an afternoon session for the lowest class.

Nearly eighteen hundred papers were returned in answer to this questionnaire, of which more than twelve hundred have been examined and the answers thereon tabulated by the teacher, with the assistance of high school girls. The results of this study are embodied in the following tentative report which Miss Bessie D. Davis, the teacher who made the investigation, has prepared. It is now proposed to carry on the work thus begun by examining the remaining five hundred answer papers, reviewing the data already used to verify its conclusions and adding such new studies of the matter as may seem profitable. To this work two teachers who now represent the Somerville High School in the Vocational Course will devote their efforts, as Miss Davis has had to give it up by reason of removal to New York City.

CHARLES S. CLARK,
Superintendent of Schools.

December 1, 1913.

Questionnaire for High School Pupils

Name	Age	Yrs.	Mos.	Class	Room
------	-----	------	------	-------	------

1. Do you expect to complete a course of four years in the High School?
2. If not, how many years do you expect to stay?
3. If you do not expect to remain four years, what is the reason:—
 - (a) Financial conditions?
 - (b) Lack of success in school work?
 - (c) Desire to go to work?
 - (d) Loss of interest?
4. Please underline the course which you are now taking:—
 - (a) General; (b) Coliege Preparatory; (c) Manual Arts; (d) Commercial; (e) 2 year Commercial.
5. What led you to choose this course:—
 - (a) Advice of parents, teachers, friends?
 - (b) Success of others?
 - (c) Belief in your personal qualifications and ability for the work of this course?
6. Do you know what studies are included in this course:—
 - (a) In the first year?
 - (b) In the second year?
 - (c) In the third year?
 - (d) In the fourth year?
7. What qualifications do you think you have for the work of this course?
8. What line of work do you intend to follow after you leave High School?
9. What do you understand to be the requirements of this work?
10. How have you ascertained these requirements?
11. Is this the work which you really desire to do?
12. What have your parents advised?
13. To what extent, if any, have possible financial benefits influenced your choice?
14. If this is not the work which you really desire to do, why are you not preparing to follow your personal choice?
15. What service to the community are you planning to render through your vocation?

EXTRA:

- A. For College Preparatory Pupils:—
1. For what college are you preparing?
 2. Why have you chosen this college?
 3. What are its requirements?
- B. For Scientific, Normal School, Normal Art School, etc., Preparatory Pupils:—
1. For what school are you preparing?
 2. Why have you chosen this school?
 3. What are its requirements?

NOTE:—Please answer questions in full where space is given; otherwise, as briefly as possible. The purpose of this inquiry is to help in the conduct of the school rather than to be inquisitive concerning the personal affairs of the pupils. Please answer frankly. Replies will be considered confidential.

January, 1913.

BESSIE D. DAVIS.

A printed copy of this questionnaire was, without warning, given each pupil of the upper three classes one morning last February. One period, about forty-five minutes, was allowed for the answering of the questions. No attempt was made to have absent pupils answer them later. The same plan was followed a week or so later in an afternoon session with first year pupils.

The present report is based on only 1,226 of these papers. It has been impossible to complete it; some 528 yet remain. These 1,226 include, however, every year and every course, and are, therefore, enough from which to draw conclusions. No attempt has been made to reduce all the answers to tables and schedules. The writer prefers to give summaries or actual quotations which give real insight into the pupil's mind and heart.

For the first two questions, however, a table seems most illuminating:—

QUESTION No. 1.

Years	No of Pupils	Average Age	Yes	No	?
1913.....	188	18.27	184	0	2
1914.....	240	17.29	233	1	5
1915-A-B.....	394	16.55	361	16	5
1916-A-B.....	230	15.36	187	32	7
1917-A.....	174	14.72	137	29	6
	1,226		1,102	78	25

QUESTION No. 2.

Years	-1	1 yr.	1--2	2	2--3	3	5	?
1913.....					3			3
1914.....						2	5	1
1915-A-B.....		1	1	11		3	1	1
1916-A-B.....		2	3	23	3	1		4
1917-A.....	1	3	3	20	1			
	<hr/>	<hr/>	<hr/>	<hr/>	<hr/>	<hr/>	<hr/>	<hr/>
	1	6	7	54	7	6	6	9

It is evident that there is less certainty in the minds of first and second year pupils regarding the length of stay in the school. The large number of two year statements is doubtless due to the fact that most of these pupils belong to the two year Commercial Class. The reasons given for less than four years stay fall under the respective headings as follows:—

	a	b	c	d	Other
					Reasons
1913.....					
1914.....	1	1	2	2	4—to prepare at Exeter Academy.
1915-A-B....	1	2	4	1	4—3 other schools; 1 moved away.
1916-A-B....	9	3	8	1	6—5 other schools or business.
1917-A.....	10	0	9	2	5—4 other schools; 1 “account of knowledge.”
	<hr/>	<hr/>	<hr/>	<hr/>	
	21	6	23	6	19

Financial conditions and desire to go to work are evidently the chief reasons.

Of the 1,226 pupils 154 are in the General Course; 489 in the College Preparatory, which includes Normal and Scientific pupils also; 29 in the Manual Arts Course, which is new and not well understood; 480 in the Commercial Course; 56 in the two year Commercial, and 1 special student. In the Senior and the Junior classes more are in the College divisions; in the Sophomore and the Freshman classes, the Commercial Course predominates.

It is in the reasons for choice of these courses that special interest lies; and in the changes of course. Of the latter 11 were mentioned. Several of these are worth mentioning:—

1. Started in B. Changed to A—due to poor marks and death of father.
2. Changed to A because he had not definite plan at first.
3. Changed from A to B at the beginning of the fourth year, etc. That they and others needed guidance is shown by such reasons for choice as these:—
 1. “Chosen at random.”
 2. (D) “Mostly because there was nothing I really wanted, and I had to take something.”

3. (A) "Did not intend to go to college or take business course.

4. (D) "Didn't know what else to take."

In view of these answers, one is not surprised to find that of 1,157 answers to question six, only 426 indicate knowledge of the work of the four years; 145 of three years; 272 of two years; and 275 of the first year. The first and the second year pupils know little about the years ahead; no wonder they make serious errors in choice.

Their ideas of their qualifications for the course taken range from "None" or "I'm sure I don't know" to statements of personal factors, special abilities or interests, etc. Among the most interesting are these:—

"Ability to do mathematics better than many girls."

"A brain and ability to study until I get what I want."

"Willingness to work hard."

"Ambition, honesty, commonsense, good health, etc."

The occupations to be followed later cover much ground. I have divided them into four groups for comparison:

1. Commercial, including Bookkeeping, Stenography, etc.

2. Future study, including College, Normal School, etc.; Professional and Semi-Professional work, including Medicine, Law, Music, Art, etc., and Trades. Of the 1,226 only 11 indicated desire to engage in the work of trades. Many already know what profession they purpose to engage in, and many plan to go into Commercial life; 172 as stenographers; 36 as bookkeepers; and 56 in office work.

Knowledge of the requirements of these occupations is limited. Personal factors are named in much the same way as in answer to question seven. Business factors: ability to work; appreciate the value of time; willingness to do what is required, and more if necessary are mentioned. Special demands are spoken of in very few instances; viz: apprenticeship or special training. Is it any wonder that lacking information concerning employments, one says later, "There is nothing to take to be a nurse"; and another, that he made a mistake in taking the wrong course and cannot, therefore, prepare for the vocation he desires?

Information has been gained from many sources: people, reading, inquiry, experience, observation, and thought. One suggested examining and checking off subjects already taken. And one, bewildered, asked for advice. His case was followed up with care.

In the majority of cases pupils are doing the work they really wish to do. Answers to question 14 show that

financial conditions and family objections are the chief obstacles. But I also find as reasons:—

“I made a mistake in taking the wrong course.”

“I couldn't change my course.”

“I do not want to carry out the course.”

“No personal ability for any line of work.”

These are the people likely to become discouraged and leave school.

That parents know too little about the school, and play too small a part in the child's choice of work there, is indicated by the next group of answers:—

	Agree.	Disagree.	Nothing.	Own Choice.	General Advice.
1913.....	127	10	7	16	6
1914.....	145	25	13	24	1
1915-A-B.....	287	27	8	17	
1916-A-B.....	130	18	7	5	3
1917-A.....	111	15	4	5	12
	<hr/>	<hr/>	<hr/>	<hr/>	<hr/>
	800	95	39	67	22

Unfortunately too many of the first group may be like the case of one pupil, who said parental advice was, “Think and decide; then let me know to approve or disapprove.” One has reason to believe that such is often the case, because so many say that they made their own choice. As one puts it, “They have given a good deal of advice, but let me be guided by my own wishes.” Another says: “Nothing. I chose this work of my own accord. I am putting myself through school.” Still another says, “No advice to give.” And a boy whose longing for ornithology has not yet been met by information or help, wrote concerning parents' advice, “Nothing. Absolutely nothing.” His mother died only a few years ago.

Financial benefits have much to do with choices. 283 say frankly that it did. One says that he has a brother going to college. Another, “Must support parents.” “Family need support; father is not living.” “College graduates obtain better paying positions.” “Want to earn money for a musical career.” “Most money in it for me.” “I shall have to work my way if I go to college.” “If I really knew what I should like to become, I should go to college: but I think that it would be a waste of time to do something that I do not know anything about.” Can anyone with sympathetic spirit and understanding heart fail to respond to the appeal in this statement? The opening is there; one needs only to follow up the boy, and he is appreciative and grateful.

Service to the community was to many a new idea. Twenty admitted that they had no thought about it, and fifty-eight did not know what they could do. Some cared little for others.

One said, "None. I am going to look after myself first." "None. I expect to be a peaceful citizen," answered another.

Many, however, showed much thought and understanding of what service might mean. I grouped the answers under the headings: through work, social help, as a citizen, through character, all possible. Some were, like the last, mentioned vaguely. Others were very specific. Here are several typical replies:—

"Hope to be instrumental in alleviating suffering caused by cancer."

"Aid city government."

"Be a credit to S——." (Somerville.)

"The better I am educated, the more I can do for the community."

"To better conditions where I live."

"To lay out better cities."

"Design public buildings so that they will last."

"Defend innocent men and women who are accused of crime."

"Help unfortunate people."

And with unintentional humor, and perhaps, sad comment on what he has heard and read, "Justify wrong." To awaken the minds of *all* pupils to the idea of "Noblesse Oblige" is surely the duty of any school.

Of these pupils many are going to colleges and other higher institutions. Harvard, Tufts, and Massachusetts Institute of Technology attract the larger number of boys; Radcliffe, Wellesley, Simmons, Salem Normal School, and Boston Normal Art School, of the girls.

Answers with regard to choosing college, etc., and requirements, were fewer in number. Only 357 answered the former, and 282 the latter. Location, standard of scholarship and instruction courses offered, time required, reputation, experience and recommendations of others, type of graduates, cost of tuition, etc., all are mentioned in some way or other. It is, however, plain that information is general and limited. Knowledge of requirements seems to be still less. Perhaps many, like one, "leave it to the principal" or keep "a book of requirements at home," etc. Apparently they little realize that requirements differ as do colleges.

It is rather encouraging to find some opposition on the part of the parents, which must arouse the pupil. Some parents urge the choice of definite instead of indefinite or drifting atti-

tude; some have such radically different choices as music, *not* stenography, or private school instead of office work. Even parents disagree, and we find father wanting his boy to be a surveyor, and mother choosing for him a business course.

Not, however, until grammar school masters and teachers work more closely with high school masters and teachers, and both groups work with pupils and parents, can the needs indicated in these papers be met. Every master of a grammar school should visit the high schools of his city, study their work, and be ready with co-operation of the high school teachers to give such information as will help pupils to choose carefully courses which will look far ahead. Then in the high school there should be flexibility enough to permit of re-adjustments. There is no reason why those in the wrong course by mistake must stay there. Finally, the high school must give to the pupils, whether they ask it or not, definite, clear, simple information regarding the work they may do in the world. Not until all this is adequately done will the gap between high school and grammar school on the one hand, and high school and after-life on the other be bridged.

RECOMMENDATIONS.

A.

I. That in the High School one or two teachers be officially designated Vocational Counsellors with time allowed for Vocational Guidance among the pupils. If possible one of these Counsellors should be a man.

II. That a committee of five or more teachers be appointed to work with these Counsellors in such ways as the latter may find necessary and advisable.

III. That a group of citizens, men and women of recognized character, experience, and standing in profession, business, and trade, be invited to co-operate with Counsellors and committee by allowing themselves to be interviewed by such boys and girls as the aforesaid Counsellors may deem it necessary to send to them for information or advice.

IV. That by means of talks, books read, compositions, etc., *all* pupils be given at least a general idea of occupations and their requirements.

V. That the questionnaire papers of last year be at once used in "follow up" work among the pupils. Special attention should be given papers marked or starred.

VI. That advisors endeavor at once to make sure that pupils have read the entire course of study, understand what is offered throughout the four years, and have reasonable basis for choice of course.

VII. That effort be made to have pupils going to higher institutions obtain and read carefully the catalogue, etc., of the school or the college which they plan to enter, find out as much as possible about the requirements and the life of that and other schools and colleges, and choose with some thought and reason.

VIII. That if possible information be obtained and given pupils, especially those of third or fourth year, concerning scholarships, loans, etc., offered by state, clubs, societies, colleges, etc., to first year students in colleges and kindred institutions.

IX. That pupils obviously unfitted for the work of any course be transferred *as soon as possible* to the course to which they may be found by teachers and Counsellors to be adapted.

X. That through meetings or personal conferences (possibly through the formation of a Parents' Association) greater co-operation be brought about between High School teachers and parents, and High School teachers and Grammar School masters and teachers.

XI. That in Ethics, in conferences with advisors, in class-work, or through some other means, greater emphasis be placed on personal service as the ultimate goal to be sought, whatever the lifework chosen and the return due for the education received.

B.

I. That the Superintendent make a request, equivalent to demand, that *every* Grammar School master visit, while it is in session, the High School, and acquaint himself or herself with the course of study and the requirements of the school.

II. That the Grammar School masters and assistants be required early in the year to study their pupils, find out what they plan to do at the end of their Grammar School course, and seek to help them choose carefully and wisely school and course of study or occupation, using all possible effort to prevent their choice of work for which they are plainly not fitted.

III. That, as the Superintendent suggested last year, meetings of parents and graduating classes of Grammar Schools be held at intervals during the year in the respective schools, such meetings to be addressed by heads of departments or those in charge of the various courses in High School and Vocational Schools.

C.

I. That in all schools effort be made to find out when and why pupils leave school, and to keep in touch with them after they have left.

II. That pupils be required if possible, as in Boston, to give teacher or Vocational Counsellor one week's notice of intention to leave.

III. That through conference between parent and teacher, and pupil and teacher, effort be made to keep the pupil in school if possible.

IV. That pupils be sent for employment certificates only after careful investigation of the merits and the needs of their respective cases.

Somerville Playgrounds Association.

The playground season for 1913 opened on July 7 with paid supervision on the following grounds:—

BOYS' GROUNDS.	GIRLS' GROUNDS.
Broadway	Bingham
City Field	Broadway
Glen Street	Central
Tufts Street	Davis
Joy Street	Hodgkins
Kent Street	Kent
Lincoln Park	Perry
	Bennett

As in former years the work was conducted under the joint control of the Playgrounds Association and the School Committee. The closing events were an athletic meet for boys, held on Monday, August 18, and a play festival on Central Hill held on Tuesday, August 19.

Following is a statement of receipts and expenditures for the season:—

Receipts:—

Balance from previous account	\$117 51
Donations and subscriptions	1,326 22
Interest on deposit in bank	2 79

\$1,446 52

Expenditures:—

Instructors	\$708 40
Supplies	341 32
Printing	47 50
Band for Festival	70 40
Rent of Fiske Avenue land for school garden	15 42
Labor	68 67
Services of janitors	75 00
Services of policeman	45 00
Baths	1 98
Teaming, expressing and postage	26 10

\$1,399 79

Balance on hand

46 73

\$1,446 52

\$1,446 52

PLAYGROUNDS.

Receipts and Expenditures, 1913.

Amount appropriated by City Government		\$2,500 00	
Revenue from baths		37 57	
Bills paid from Contingent Fund Account		381 27	
Paid for salaries of supervisors and instructors	\$1,689 00		
Paid for equipment:—			
Swings, teeters, giant strides, slides, etc., (including material used for installing)	\$422 00		
Trees	15 48		
Hose	14 35		
Labor and teaming	76 52		
			528 35

**REPORT OF THE DENTAL DISPENSARY FROM DECEMBER 4,
1912, TO JUNE 25, 1913.**

Mr. Charles S. Clark,
Superintendent of Schools.

Dear Sir: The dispensary opened in December, with a large number of patients on hand. We soon found it necessary to have a stated number of patients assigned for each day's work.

Minor extraction, cleaning and relief of toothache constituted most of the work for a short time.

It was soon apparent, however, if each patient was to have a completed treatment more time must be given the individual. Parents were thus interested through the work of the dispensary to have a more extended treatment of their children, and many local dentists were patronized in consequence.

The work was finally systematized as follows: A different school was assigned for each day and sent five of its most needy patients. The selection was at first left to the principals and teachers. Later the medical examiners were requested to make charts of the decayed teeth.

As neither method was accurate enough it was found advisable for the school dentist to make a careful examination at each school, leaving a list of the needy children with the principal. As stated five patients were sent to the dispensary each day and then reappointments were given them if necessary to complete their work. One day a week was set aside for this purpose, which was soon taken up more than a month in advance, showing not only the great necessity of the work but also the interest of a large per cent. of the patients treated in extending their work beyond immediate necessity.

This dispensary had proven to be a success previous to this year's work and the dentists that so willingly gave their time to help start this new form of relief and educational work are deserving of much credit.

From December 1, 1910, to December 1, 1911, there were 225 children treated. This was with voluntary service. From December 4, 1912, to June 25, 1913, there were 506 cases treated. Not only were the number of cases more than doubled in much less time, but more work to the individual was accomplished. With very few exceptions this work was done for children who would not have had it done otherwise. The result would have been the ultimate loss of the infected teeth, preceded by much suffering and ill health.

One of the many special cases we had was that of a boy whose throat and nasal passages were badly obstructed. Through the aid of the dispensary this case received the necessary treatment. We are in hopes the coming year to increase to a large extent the interest of parents and public generally in

the importance of a clean mouth as a most valuable asset in a child's education.

Children suffering from many ills consequent to decayed teeth are badly handicapped in their efforts for an education.

This report is designed to give an outline of the work and importance of the Somerville School Dental Dispensary.

We are always glad to receive visitors and explain the work. The dispensary has been able with the small fees charged to purchase all supplies.

DR. R. H. NORTON,
School Dentist.

REPORT UPON THE WORK OF THE SCHOOL NURSE.

Mr. Charles S. Clark,
Superintendent of Schools.

Dear Sir: In the annual appropriation of the Health department for the year 1913, the Board of Aldermen made provision for a School Nurse. After conference between the Board of Health and the School Committee, it was decided that the School Nurse should be under the direction of the Superintendent of Schools, and that her work should be defined by him. It was decided that her field of operation should include all of the elementary schools and an itinerary of visits was planned which would give a visit to every school building each week. It was decided to be advisable for the nurse to deal first with the diseases which produced the greatest amount of absence from school, with a view of reducing the amount of such absence. Visits to the homes of pupils who were excluded from school by medical inspectors on account of minor diseases was decided to be an important part of the work which the School Nurse should perform. It was decided also to be an important part of the work of the School Nurse to try to induce parents to act upon reports sent to them from the schools concerning physical defects of their children. Specifically this work aims to secure treatment for such children in hospitals, and to secure for them glasses in cases of defective vision.

On September 4, 1913, the Board of Health appointed Miss Ella B. Hornbrook school nurse and she entered upon the duties of her office with the opening of the schools in September. While her work for the first few months of her term of office was largely experimental and intended to find the facts in her field of action and to provide the best way for dealing with them, the following report will show some of the principal features of the work during the last four months of the year:—

Two hundred eighty-six visits to the schools; 378 visits to the homes, 394 pupils examined (eighty of these were treated in the schools), eighty-nine for pediculosis, ninety-two for uncleanness. Pupils taken to clinics for treatment: One eyes, three ears, three nose and throat, one medical, two skin diseases, eight tonsils and adenoids (operations performed). Cases of contagious disease discovered: Two ring worm, two scarlet fever, six scabies, two mumps, varicella, whooping cough. Other diseases discovered: Mal-nutrition, impetigo.

Respectfully submitted,

ELLA B. HORNBOOK,

School Nurse.

REQUIEM BY GIUSEPPE VERDI

Presented by pupils of the Somerville High School at Symphony Hall, Boston, April 21, 1913.

Mme. Wilhelmina Wright Calvert.....	Soprano
Miss Adelaide Griggs.....	Contralto
Mr. Harold S. Tripp.....	Tenor
Mr. Willard Flint.....	Basso

Chorus of Six Hundred Voices.

Sixty Players from the Symphony Orchestra.

Mr. Jacques Hoffman.....	Principal
Mr. Joshua Phippen.....	Organist

S. Henry Hadley, Conductor.

This performance of Verdi's Requiem is the sixth of a series of concerts presented by the pupils of the Somerville High Schools under the direction of Mr. Hadley. The five preceding concerts were Gaul's "Holy City" in 1896; Gaul's "Joan of Arc" in 1899; Haydn's "Creation" in 1903; Haydn's "Seasons" in 1906; Mendelssohn's "Elijah" in 1910.

The proceeds of this concert will be used to purchase pictures, casts, and other works of art for the school buildings, with especial attention to the decoration of the new classrooms and auditorium.

SOMERVILLE TEACHERS' ASSOCIATION.**Officers, 1913-1914.**

President, Walter I. Chapman.
 Vice-President, E. Minor Morse.
 Vice-President, John M. Jaynes.
 Secretary-Treasurer, May E. Small.

Executive Committee:—

Superintendent Charles S. Clark, ex-officio.

Jennie H. Luce, Prescott.	Edna F. Scott, Forster.
Elizabeth M. Collins, Hanscom.	Harry F. Hathaway, Bingham.
Mrs. Nettie L. Fay, Bennett.	Mrs. M. Florence Eustis, Carr.
Maria D. McLeod, Baxter.	Blanche E. Thompson, Morse.
Minnie Alice Perry, Knapp.	Abbie A. Gurney, Proctor.
Edith L. French, Pope.	Alice M. Dicker, Durell.
Eva R. Barton, Bell.	Ardelle Abbott, Burns.
Elizabeth L. Hersey, Cummings.	George I. Bowden, Brown.
Edith M. Snell, Edgerly.	Elizabeth S. Smith, Highland.
Isabel J. Tiffit, Glines.	Isabelle M. Brunton, Hodgkins.
Helen C. French, Girls' Vocational.	Elizabeth R. Henderson, Cutler.
	Katherine E. Hourahan, Lowe.

The meetings held under the auspices of this association in the year 1913 were as follows:—

February 12—Dr. Albert Marian Hyde. Subject: "Abraham Lincoln—America's Greatest Educator."

April 2—Mr. Stuart A. Curtis, Supervisor of Testing Work, Boston. Subject: "Some Recent Tests in Arithmetic."

April 5—Social evening.

October meeting omitted on account of lack of accommodations.

December 17—Professor Ernest C. Moore of the Department of Education, Harvard University. Subject: "Fundamentals in Education."

SOMERVILLE TEACHERS' CLUB.**Officers, 1913 1914.**

President, Miss Eliza H. Lunt.

Vice-Presidents, { Miss Charlotte Holmes.
 { Miss Lillian Nealley.

Recording Secretary, Miss Rena S. Hezelton.

Corresponding Secretary, Miss Martha A. Jencks.

Treasurer, Miss Elizabeth J. Baker.

Auditor, Miss Marion P. Crawford.

Object.

The object shall be to secure a close union among the women teachers in Somerville; to promote the spirit of mutual helpfulness; to advance professional interests; to create a deeper sense of the dignity of the profession; to unite the interests of home and school.

Programme.

January 22—Guest night. Edward Abner Thompson. Readings from "Hiawatha."

February 11—Valentine party. Ella Eastman. Monologues.

March 11—Chafing dish party.

April 8—Judge Henry A. Shute, "A Real Diary of a Real Boy."

May 27—Annual meeting.

October 14—"The Symbolism of Ibsen and Maeterlinck" with illustrative readings, Mrs. E. Charlton Black.

November 11—Informal talk on Indian Baskets and Blankets, Mrs. Robert M. Read.

December 9—An opera talk: "Tales of Hoffman," Havrah Hubbard.

At the meeting of the School Board held on January 2, 1914, the Committee voted to record on the minutes its appreciation of the high character and service of Mary J. Malaney, Master's assistant at the Knapp School, whose death occurred on November 28, 1913.

CONTENTS OF APPENDIX.**SUMMARY OF STATISTICS.**

Population and school census
 School buildings
 Teachers
 Attendance for year
 Cost of school maintenance
 Teachers' salaries
 Results of eye and ear tests

MISCELLANEOUS TABLES.**CONCERNING FINANCE**

No. of Table

1. Schedule of school property
2. Cost of maintaining schools, school year 1912-1913
3. Cost per capita of maintaining schools, school year 1912-1913
4. Cost of maintaining schools for a series of years
5. Cost per capita for maintaining schools for a series of years
6. Amount spent annually for new school buildings and for repairs for a series of years

CONCERNING PUPILS

7. Population and school census
8. Attendance, etc., of the schools for school year 1912-1913
9. Statistics of the high schools, for school year 1912-1913
10. Pupils by grades October, 1912-1913
11. Separate statistics for grammar and primary schools, for school year 1912-1913
12. Admissions to first grade in February and September
13. Number of grammar school graduates, 1913
14. Truant statistics for a series of years
15. Evening school statistics, 1912-1913
16. Grammar school graduates for a series of years
17. Attendance statistics of all schools for a series of years
18. Statistics of the high school for a series of years
19. Promotions, 1913
- 19-A. Distribution of pupils by ages, October 1, 1913
- 19-B. Distribution of pupils, 14 but not 15, October 1, 1913

CONCERNING TEACHERS

20. Resignations of teachers, 1913
21. Teachers elected in 1913
22. Leave of absence of teachers
23. Transfers of teachers
24. Number of teachers employed for a series of years

STATISTICAL AND GENERAL TABLES

25. Changes in text-books, 1913
26. High school graduation exercises, 1913
27. Grammar school graduation exercises, 1913
28. Organization of school board for 1914
29. Teachers in service January, 1914
30. Officers in service January, 1914
31. School janitors

SUMMARY OF STATISTICS.

1.—POPULATION AND SCHOOL CENSUS.

* School Year.

Cost of the Schools. The total amount spent for the maintenance of the schools of Somerville for the school year ending June 30, 1913, is \$402,091.89.

This includes the sums spent for care of school buildings, including janitors' services, fuel, lights, and school telephones; the amount paid for salaries of officers, and the amount spent for school supplies; and the sum paid for salaries of teachers.

The expenditure for care of school buildings is wholly in charge of the City Government. The expenditures for salaries of officers, for school supplies and the salaries of teachers are in charge of the School Committee.

The amount paid for janitors is.....	\$32,939.41
The cost of fuel is.....	16,055.27
The cost of light is.....	5,841.42
The cost of the school telephones is.....	541.78
Rent of school rooms.....	92.50
A total cost of.....	55,470.38
The cost per capita.....	4.65
Cost of repairs.....	19,341.35

The second important expenditure is wholly under the control of the School Committee, and is covered by what is known as the "School Contingent" appropriation. The following is the itemized account:—

Expenditures.	Total.	DAY SCHOOLS.		EVENING SCHOOLS.	
		High.	Elementary.	High.	Elementary.
Officers' Salaries	\$7,520.01
Office Expenses	2,092.29
Textbooks	9,318.60	\$4,058.86	\$5,217.55	\$.75	\$41.44
Stationery and Supplies	13,091.90	4,297.00	8,207.71	491.89	95.30
Other Expenses	289.50	23.25	216.25
Miscellaneous (Tuition, etc.)	1,134.36
Total	\$33,396.66	\$8,379.11	\$13,641.51	\$492.64	\$136.74

The third, and by far the largest, element of the cost of schools is the sum spent for the salaries of teachers. This expenditure is under the control of the school committee.

The following statement shows the distribution of the sums paid for salaries:—

Expenditures.	Total.	DAY SCHOOLS.		EVENING SCHOOLS.	
		High.	Elementary.	High.	Elementary.
Supervisors	\$5,181.25	\$398.32	\$4,782.93
Principals	39,243 70	3,200.00	34,966.70	\$354.00	\$723.00
Teachers	268,799.50	73,826.75	187,935.25	3,699.50	3,338.00
Total	\$313,224.45	\$77,425.07	\$227,684.88	\$4,053.50	\$4,061.00

The total outlay for all school purposes includes all of the preceding and the sums spent for schoolhouse repairs and new buildings.

The total outlay for the school year ending June 30, 1913 is as follows:—

Care	\$55,470.78
Contingent	33,396.66
Salaries	313,224.45
Total for school maintenance.....	\$402,091.89
Paid for repairs.....	19,341.35
Paid for new buildings.....	34,866.27
Total for all school purposes.....	\$456,299.51

Each dollar of the sum spent for the support of schools has been divided in the following proportion:—

	1908.	1909.	1910.	1911.	1912.	1913.
Janitors' salaries.....	\$0.070	\$0.071	\$0.070	\$0.071	\$0.071	\$0.082
Heat and light.....	0.051	0.052	0.054	0.053	0.054	0.055
Administration	0.015	0.015	0.017	0.019	0.020	0.018
School supplies.....	0.072	0.061	0.071	0.068	0.076	0.065
Teachers' salaries....	0.792	0.801	0.788	0.789	0.779	0.780
Total	\$1.000	\$1.000	\$1.000	\$1.000	\$1.000	\$1.000

Per Capita Cost. The proper method of comparison of the cost of schools year by year is to consider the sum spent for each pupil in the average membership. In this computation we exclude the cost of evening schools. The following shows

THE PER CAPITA COST OF DAY SCHOOLS FOR 1912 AND 1913.

	High Schools.			Grammar and Primary Schools.			All Day Schools.		
	1912.	1913.	Change	1912.	1913.	Change	1912.	1913.	Change
Instruction . . .	\$41 13	\$42 85	+\$1 72	\$21 99	\$22 36	+\$0 37	\$24 97	\$26 20	+1 23
Supplies	5 63	5 24	-0 39	1 71	1 35	-0 36	2 34	2 09	--0 25
Care	5 39	5 45	+0 06	3 94	4 17	+0 23	4 16	4 55	+0 39
Total	\$52 15	\$53 54	+\$1 39	\$27 64	\$27 88	+\$0 24	\$31 47	\$32 84	+\$1 37

Including the cost of maintenance of evening schools, the per capita cost is as follows:—

	1910.	1911.	1912.	1913.
Cost of instruction.....	\$23.05	\$23.50	\$23.61	\$24.57
Cost of supplies.....	2.03	1.95	2.12	2.03
Cost of care'.....	3.59	3.62	3.99	4.35
Total	\$28.67	\$29.07	\$29.72	\$30.95

An examination of these tables shows that we have paid \$1.72 more for the instruction of each pupil in the high school than in 1912, and thirty-nine cents less per pupil for supplies.

The grammar and primary schools have cost thirty-seven cents more per pupil for instruction, and thirty-six cents less for supplies.

The amount spent for the school year 1913 was \$5.60, or four cents more than was spent in 1912. The amount yielded for each child in the average membership of the schools for 1913, not including the industrial schools, was \$30.63.

Comparative Per Capita. According to the annual report of the State Board of Education for 1912-13, the amount yielded for each child in the average membership of the public

schools was \$33.41, giving to Somerville the rank of ninety-eight among the cities and towns of Massachusetts. In 1911-12 the rank was 106. By the same report it is shown that Somerville appropriated to the support of the public schools \$5.98 for each thousand dollars of valuation, and had the rank of 139. The year before the amount spent was \$5.95 and the rank 138.

Teachers' Salaries. The salaries paid to teachers in January, 1914, are as follows:—

1 man	\$3,200	12 women	\$875
1 man	2,250	4 women	850
3 men	2,000	13 women	825
10 men, 2 women.....	1,900	1 man, 161 women.....	800
1 man	1,850	25 women	750
3 men, 1 woman.....	1,800	21 women	700
6 men	1,700	14 women	650
2 men	1,600	11 women	600
5 men, 1 woman.....	1,500	1 woman	550
1 man, 3 women.....	1,200	3 women	525
2 men	1,150	3 women	500
1 woman	1,100	2 women	425
2 men	1,050	4 women	400
13 women	1,000	3 women	350
6 women	950	4 women	200
1 man, 18 women.....	900

TABLE 9.—STATISTICS OF HIGH SCHOOL FOR SCHOOL YEAR, SEPTEMBER 9, 1912, TO JUNE 26, 1913.

Number of teachers, including head master	69
Number of days school kept	180
Number enrolled	2,081
Average number belonging	1,839.3
Average daily attendance	1,745.9
Per cent. of attendance	94.9
Tardiness	2,736
Dismissals	384
In Class I-B September, 1912	511
June	432
Per cent. of loss	15.5
In Class I-A February, 1913	190
June	165
Per cent. of loss	13.2
In Class II-A September, 1912	158
June	137
Per cent. of loss	13.2
In Class II-B September, 1912	433
June	390
Per cent. of loss	9.9
In Class III-A September, 1912	61
June	49
Per cent. of loss	19.7
In Class III-B September, 1912	356
June	326
Per cent. of loss	4.9
In Class IV. September, 1912	323
June	307
Per cent. of loss	4.9
Special students, September, 1912	17
June	8
Total. September, 1912	1,859
June	1,814
Per cent. of loss	2.4
Number of graduates, male	125
Number of graduates, female	171
Total	296
Average age, male graduates	18yrs. 7mos.
Average age, female graduates	18yrs. 6mos.
Number entering college	51
Number of graduates entering technical schools	13
Number of graduates entering normal schools	24
Cost of instruction	\$77,026 75
Cost of supplies	9,664 30
Total cost	86,691 05
Per capita cost of instruction	41 88
Per capita cost of supplies	5 25
Total cost per capita	47 13

TABLE 26.—GRADUATION EXERCISES, 1913.**High School.**

The graduation exercises of the high school occurred on Wednesday, June 18, at the First Methodist Episcopal Church, in the presence of a large audience of parents and friends.

The formal address to graduates was given by Augustine L. Rafter, Assistant Superintendent of Schools, Boston.

At the close of the address, the chairman of the School Committee, Henry H. Folsom, presented diplomas to the 297 members of the graduating class.

Order of Exercises.

Henry H. Folsom, Chairman of School Committee, presiding.

1. Overture.
High School Orchestra, Raymond Chaffee, Leader.
2. Singing.
"Kyrie" from "Requiem." Verdi
(with piano and organ)
Soloists—Sopranos—Misses Trolsaas, Davis, Montgomery, Johnson, Bernson.
Altos—Misses Coy, Barber, Sawyer, Underhill, Bourne, Carter, Moran.
Tenors—Messrs. Given and Fuller.
Basses—Messrs. Worthley and West.
3. Prayer.
Rev. George L. Parker.
4. Singing.
"The Lord is My Shepherd." Schubert
(Girls' Voices)
5. Address to Graduates.
Mr. Augustine L. Rafter,
Assistant Superintendent of Schools, Boston.
6. Singing.
Excerpts from opera "Il Trovatore." Verdi
7. Presentation of Diplomas to Girls.
8. Singing.
"Kentucky Babe" (Plantation). Geibel
Boys' Glee Club.
9. Presentation of Diplomas to Boys.
10. Singing.
"Lachrymosa" from "Requiem." Verdi
(Soloists as above)
11. Postlude.
High School Orchestra.

Diplomas will be presented to graduates by Henry H. Folsom, Chairman of School Committee.

Pianist, Miss Mary Ingraham; organist, J. Albert Wilson; conductor, S. Henry Hadley.

All music arranged by Mr. Hadley, Teacher of Music in the High and Grammar Schools.

Piano used is from Chickering & Sons.

To the Honorable, the Mayor, and the Board of Aldermen of
the City of Somerville:—

Gentlemen.—The forty-first annual report of the trustees of the public library is herewith respectfully submitted accompanied by the report of the librarian, condensed tables of statistics of operation and some account of the new building with the addresses at the dedication on December 17.

Very respectfully,

THOS. M. DURELL,

President.

Adopted by the Board of Trustees
January 27, 1914,

THE PUBLIC LIBRARY.

Central Building, Highland Avenue.

Week days, holidays excepted, 9 a. m. to 9 p. m. Sundays, reading and reference only, 3 to 6 p. m. Children's room, school days, 3 to 8 p. m.; other week days, 9 a. m. to 8 p. m.; Sundays, 3 to 6 p. m.

Branches.

Week days only, holidays excepted.

WEST SOMERVILLE, 40 College Avenue—1 to 9 p. m.

Saturday, 9 a. m. to 1 p. m., also.

EAST SOMERVILLE, 153 Perkins Street, 2 to 9 p. m.

UNION SQUARE, Washington Street and Bonner Avenue—2 to 9 p. m.; after 6 p. m. children under fourteen admitted only for exchange of books.

SOUTH AGENCY, 518 Somerville Avenue.

THE STAFF.

DREW B. HALL, Librarian.

NELLIE M. WHIPPLE, Assistant Librarian.

EXECUTIVE AND DEPARTMENT HEADS.

Lucy B. Crain, Supervisor of Children's and School work.

Edith B. Hayes, Branch Librarian, East Somerville.

Esther M. Mayhew, Cataloguer.

Gertrude F. Root, in charge, West Somerville Branch.

Lucinda F. Spofford, Branch Librarian, Union Square.

Mabel E. Bunker, Assistant Branch Librarian, West Somerville.

Bessie L. Duddy, Stenographer and Bookkeeper.

Marion Lovis, High School Librarian.

Anna L. Stone, Shelf List Curator.

Mabel Williams, Reference Librarian.

Mary S. Woodman, Classifier.

ON SPECIAL APPOINTMENTS.

Frances Rathbone Coe, in charge of extension of catalogue.

Mary Morgan, Typewriter.

Gordon Hall, Stack.

SENIOR ASSISTANTS.

Bessie S. Cobb, West Somerville. Ethel M. Nute, Union Square.

Annise B. Kane, Cataloguing. Ruby G. White, East Somerville.

A. Myrtle Merrill, Cataloguing.

JUNIOR ASSISTANTS.

Susan W. Curtis, children.

Juliana Donovan.

Ruth S. Fales.

Zoe E. Nelson.

Myrtle Nicholson.

A. Lisette Parker.

Anna B. Truesdale.

Edna C. Woodbury.

MESSENGERS.

Mae L. Gormley
Joseph K. Kelleher.

Hugh E. Maguire.

HIGH SCHOOL ATTENDANTS AND PAGES ON PART TIME.

Grace Boothby.
Marion Hunt.
Bertha C. Mellett.
Alice M. L. Patterson.
Agnes Riley.
Beatrice Wilson.

Walter Dickson.
William J. Hession.
Albert Howard, Jr.
Ronald Moore.
Harold Ruggles.

JANITORS.

Under the Commissioner of Public Buildings.

Charles A. Southwick, Central.
Thomas F. O'Day, West Somerville Branch.
George A. McGunnigle, East Somerville Branch.
Thomas Dame, Union Square Branch.

REPORT OF THE LIBRARIAN.

To the Trustees of the Public Library of the City of Somerville:—

Gentlemen,—The forty-first annual report of the librarian is herewith submitted, being that for the year 1913.

New Building.

The most noticeable event of the year has been the completion and the dedication, on December 17, of the new building. It is agreed by all to be beautiful, dignified and unusually well adapted to the comfort and quick service of readers and to the convenience of the library staff and economical in administration. Its Book Room for adults can accommodate one hundred and forty readers at tables and has space for over 40,000 volumes on its shelves, which are arranged on the alcove plan, giving fine light and a considerable amount of quiet seclusion to the person interested in any particular subject.

The Children's Room has space for seventy-five seats and about 7,000 volumes on open shelves and is very light and attractive. Both these rooms have direct access without the intervention of corridors to the Storage Stack, which has space for upwards of 140,000 volumes on over two and a quarter miles of shelving. The moving of the library is now rapidly under way and everything will be in place for the opening the first week of January. I do not look for a great increase in the home use of fiction, which has always been the most easily accessible class of books; but there can hardly fail to be a doubling or trebling of the reference work and a very considerable increase in the use of attractive non-fiction such as travel, biography, etc., which for the first time will be easily accessible for the examination and browsing which lead to home use and the "fitting of the right book to the right person."

At this time of moving also there is being made the separation of the library into two great groups, those of continual interest and use, and those of infrequent use and of little account to the great majority of our readers. This means a careful consideration of the community's needs and of the intrinsic value of the books of the library. For a year and a half especial attention has been given to this revision of the catalogue and selection of 35,000 volumes out of the 90,000 on hand; the amount and quality of this special work accomplished with only one special reviser added to the regular staff has been remarkable and accomplished only by every member of the force working at high pressure and in many cases over time.

Branches.

The three branches have continued to serve their communities most effectively. The West Somerville Branch, which cele-

THE NEW SOMERVILLE PUBLIC LIBRARY

brates its fifth birthday next May, is for its size of building and book collection one of the most largely used in New England, but so far it has not been possible to offer the opportunities for quiet reading and reference work which you desire and which the community is more and more demanding because of the presence of the children in what is really the adult room. There is no children's attendant, as there is no children's room separate, and practically no attention can be given to the children and their reading; as a result the large number of children who come into the branch fail to get what they desire and are an annoyance to the adults and a still larger number of children in the district do not use the building at all. The need of a children's room, which could be very easily provided with a separate entrance in the basement, is perhaps most clearly shown by the following comparison; although West Somerville is a much larger district than the fields of the East Somerville and Union Square branches and the proportion of reading children probably higher, still in West Somerville the percentage of the total circulation taken by children was twenty-three per cent. as against thirty-three per cent. at East Somerville and forty-five per cent. at Union Square.

Two years ago the first of February the East Somerville Branch was opened and in its small room is doing a very large work. A month later the Union Square Branch was opened in a room twice as large and pleasant in the old Prospect Hill schoolhouse; its success while not so immediate has been even greater perhaps. At both of these buildings the crying need again, which their constituents are more and more demanding, is children's rooms. The building at East Somerville contains no space that can be used, but at Union Square there is space which could very economically be made available. I am firmly convinced that nowhere in the city's activities would a few hundreds (not thousands) of dollars do so much for the pleasure and the intellectual and moral well being and good order of the community, as spent in providing children's rooms at West Somerville and Union Square. At East Somerville the need is as great but the expense much larger.

Accessions of Books.

Eight thousand seven hundred sixty-one volumes were added during the year and 7,227 worn out and withdrawn; as it requires about as much time to "withdraw" a book and check all the records as to add a volume, the handling of these additions and subtractions is practically equivalent to the cataloguing of their sum of 16,000 volumes. This means that beside the work of revision and selection already referred to a tremendous number of operations on new books has been accomplished by the cataloguing force; a number running up into the

hundreds of thousands of clearly distinguishable acts. The total number of volumes on our records stands at 109,236.

Of the 8,761 volumes added, the greatest number in one class was 4,000 fiction, a subject setting forth human nature, activities and modes of life and attractive to and giving refreshment and width of horizon and experience to all sorts of readers; next were 750 volumes to travel and history, over 500 volumes to useful arts, 500 volumes of literature, 350 bound periodicals, 325 fine arts, 235 biography, 220 of science, 150 religion, 135 music, 100 philosophy and so on.

Borrowers.

The re-registration of borrowers together with the registration of new persons has continued quietly and smoothly. Three thousand six hundred and sixty-two names have been added to our records and 7,513 former readers have been re-registered, a total of 11,175 names and addresses verified and carefully distinguished by exact data. Some thousands of cards on the old registration still in use will gradually be retired during the coming year. It appears that between 16,000 and 18,000 different citizens have drawn books during the year for use at home, not to mention other thousands who use the various buildings for the reading of periodicals and newspapers or for reference questions or who by telephone apply for all sorts of information. The library is reaching the citizens more and more each year and they are more and more expecting and demanding what it alone can give. The library staff realizes from its day to day contact with these tens of thousands of citizens what are these needs and demands, more fully than can any individual or other body of city officials or employees. The citizens want good books and assistance in their use and are willing to support the institution that can furnish them freely and economically. The library offers freely everything it has and it does so economically, for how else can be had for one cent a week, the per capita cost of the library system, all the library offers so freely? That the citizens demand library facilities and the economies effected by the co-operative principle of the public library is shown by the fact that all of the branches have resulted from local demands, and movements initiated and carried to completion by local organizations.

Home Use.

Last year I predicted a circulation of 100,000 from the two new branches; it has proved to be over 125,000. At Central there has been a decrease due to the closing of the building the last two weeks and especially to the fact that the children's room was closed the middle of June to make way for a new

municipal heating plant, and that the major portion of the school library books have for the same reason been unavailable during the fall.

General Administration.

The general administration has been carried on I think with increasing efficiency and better service. All members of the staff have worked to the best of their ability and certainly the limit of strength; certain reassignments have proved wise and the general personnel was never superior.

Mrs. Spofford and Misses Hayes, Cobb and Curtis have followed courses of Simmons College and the University Extension Bureau.

The library has been represented by the librarian, or by one or more other members of the staff who have taken more or less distinctive parts at four meetings of librarians in this state and at the national meeting in June at Kaaterskill. And your board has invited the Massachusetts Library Club to meet here on January 22 next.

The New York State Library School asked permission, which was granted, for two of its students to spend the month of March here at their own expense in practice work, and in April some twenty-five students and the head of the Pratt Institute Library School from Brooklyn spent the day investigating the several buildings and our processes.

At the annual meeting of the Massachusetts Library Club in Williamstown the librarian was elected president.

The school committee of the city, as a result of suggestions made a year and a half ago and more completely worked out during the last two months, has elected to its teaching force as high school librarian a member of the public library staff, who will devote her attention to the interests of the high school teachers and pupils, spending half her time in the school and the other half in the library reference rooms; her salary to be divided between the two departments.

To the members of the staff and their willing co-operation and earnest endeavor are due the accomplishments of the year and to them are indebted the librarian, the trustees and the citizens.

To you, gentlemen, who as trustees have cheerfully given unrewarded, and largely unappreciated, your time and care, the staff are under great obligations and the citizens, in larger measure than they know, for the guiding wisdom which during this year as during the forty years past has worked to the development of a public library second to none in similar circumstances.

Very respectfully,

DREW B. HALL,

Librarian.

January 2, 1914.

APPENDIX C.**FACTS ABOUT SOMERVILLE.**

Residential suburb, north of and adjoining Boston, east of Cambridge (Harvard Square one mile), and "twenty minutes from Park Street."

Area, 4.2 square miles.

Assessed valuation, 1913, \$71,906, 464.

Funded debt. 1914. \$1,674,000.

Public property. \$5,700,000.

Population, 80,000.

Pupils, in school, 15,000; school buildings, 30.

Central library building on Central Hill Park.

West Somerville Branch, 1½ miles from Central; East Somerville Branch, ¾ miles, and Union Square Branch, ¾ miles from Central. The latter two are ¾ miles apart also.

THE BOOK ROOM

THE
PUBLIC LIBRARY OF THE CITY OF SOMERVILLE

BRIEF HISTORY OF THE NEW BUILDING
AND
THE ADDRESSES AT ITS DEDICATION

On June 27, 1911, in regular meeting, the Trustees, the lack of facilities for the citizens in the old building having been called to their previous consideration by the Librarian in personal interviews, agreed to an effort to secure a new building.

During the fall various letters were exchanged with the representatives of Mr. Carnegie, setting forth the condition of the library.

On December 21, a letter was received suggesting failure in making clear to Mr. Carnegie the crowded and unsafe condition of the old building.

On December 26 the librarian suggested in regular meeting that a report on the situation by a skilled library architect would help in making clear the matter and recommended, as such a specialist, the architect of the beautiful and convenient City Library of Springfield, Mr. Edward L. Tilton. It was agreed that such a report be obtained and arrangements were shortly completed for an inspection of the old building by Mr. Tilton on January 3, 1912.

On January 1, 1912, a letter was received expressing Mr. Carnegie's regrets that the information at hand was not satisfactory and that he did not see his way to the making of a grant.

This refusal seemed conclusive; but the arrangements for the architect's inspection were not countermanded, in the hope that his technical report might be of some avail.

On January 22, the report was forwarded to New York, accompanied by a statistical statement signed by President Durell of the trustees and by Mayor Burns, and sworn to by the Librarian; supplemented on January 29 by a further statement.

On February 8, a reply was received that "Mr. Carnegie notes that the city is willing to take over the present library for general offices and turn the cost of the same, \$45,000, for behoof of new building. Mr. Carnegie will be glad to add \$80,000 to such \$45,000 for a library building, complete and ready to occupy. The city must pledge maintenance at a minimum of ten per cent. annually and must also provide a suitable site and make the plans such as Mr. Carnegie will approve."

That evening the matter was laid before the Board of Aldermen.

On March 14, the Board of Aldermen, having granted a hearing to the Board of Trustees, and having investigated library buildings, passed the building order.

On March 21, Mayor Burns appointed an advisory committee of nine, city officials, trustees and citizens, which on the 27th met and agreed with his Honor the Mayor in the appointment of Mr. Tilton as architect.

During the next three months plans were presented, and considered and matured. On July 12, 1912, the contract for the construction of the building was awarded to the Kennedy & Peterson Construction Company of Boston.

Ground was broken in September; progress has been steady during the intervening fifteen months and on today, December 17, the building is thrown open to the public to be dedicated by their inspection and acceptance. The brief addresses at half past eight in the evening follow.

The building is Renaissance in style, is 123 x 75 feet in size, has two stories with a half-floor cellar in the rear and is constructed of Persian gray brick with terra cotta trimmings and green tile roof. It is beautiful in simple dignity, economical in construction, and efficient in operation.

The storage stack of two levels containing 140,000 volumes has been placed in the centre entirely dependent upon artificial light, and readers have been placed between the stack and the daylight next the windows. This reverses the type of plan with the reading room in the centre and the books outside, of which the Library of Congress is an example.

The adults, the largest group of readers, are given the entire main floor extending over the storage stack. This room contains wooden cases upon the alcove plan for 45,000 volumes and seats for 140 readers and has light on all four sides and overhead. The children occupy one end of the ground floor with direct access to the storage stack. Their room shelves 7,000 volumes and seats seventy-five. The cataloguing room is at the other end of the storage stack; at the rear are rooms for staff convenience and at the right of the entrance a small lecture hall seating eighty. In the cellar are the boiler, fan, janitor, and work rooms.

Artificial light is by electricity from overhead; indirect on the ground floor, direct in the Book Room, whose height, some twenty-three to thirty feet, raises the lamps above the line of vision. Tables and book cases are all movable, allowing the re-arrangement of space as desired. There is an electric elevator with five stops reaching all floors and a very complete equipment of telephone and other appliances for comfortable, rapid work.

THE ADDRESSES

BY

Mayor Burns, Commissioner Littlefield, President Durell, Librarian Hall, Superintendent Clark, Dr. Noyes, Trustee.

Mayor Burns presided and made the opening address:—

“Fellow Citizens: It is seldom that any municipality has the privilege of dedicating such a beautiful public building as we are dedicating here tonight. This building is erected for the use of the people, not only of today, but of succeeding generations, and Somerville will not have to consider the matter of a central library building for many years to come. Such a far-sighted policy should govern the erection of any municipal building.

“It became evident some time ago that, on account of our very large increase in population, our library building was too small for carrying on the work efficiently and economically. The question of enlarging the building was taken up, but, after going over this matter carefully, it did not seem advisable. Then it became known to the trustees of our public library that Andrew Carnegie, one of the world’s greatest benefactors, would be willing to contribute a sum of money toward the erection of a new public library building in our city. Mr. Carnegie had already given the city the fine West Somerville branch library building, and it had not been expected that he would further favor us with a still larger gift toward a central library building. That he was willing to do this shows his deep interest in the welfare of such a community of readers as ours—that commendable interest which he has demonstrated again and again by his many gifts of library buildings to cities and towns throughout our beloved country. Somerville is grateful indeed to her benefactor.

“The question was gone into with the Board of Aldermen of the year 1912: only \$45,000 was appropriated by the city, and Mr. Carnegie gave \$80,000, making a total of \$125,000. The building has been constructed and completed within that sum and as you see it here tonight.

“Edward L. Tilton, the architect, has performed his work well, and he should receive the congratulations of all the people. The contractors, the Kennedy & Peterson Construction Company, have carried out the contract to the minutest detail, and their work has been a credit, not only to them, but to the city.

“The Mayor has had the assistance of the commissioner of public buildings, the board of trustees of the public library, and an advisory committee, and I desire to return my thanks to all who have in any way assisted in the erection of this beautiful building.

“It is erected on a beautiful and historic spot, and we—all who have been vitally interested in its construction—believe it is as finely appointed a building as may be found in the com-

monwealth. We have a beautiful room set apart for the children where they can assemble in large numbers and enjoy the privileges which have been accorded to them. We have a small hall in the building where the Somerville Historical Society and other similar organizations may assemble for lectures and similar purposes.

“‘The public library is the people’s university,’ one of the best assets that any community can have—and I take this opportunity as Mayor of our city to congratulate the people of Somerville on the erection and completion of this beautiful, commodious and well-appointed structure.”

Building Commissioner Littlefield said:—

“On July 12, 1912, the contract was awarded for the construction of this building, which now completed speaks for itself. I believe this city possesses one of the best library buildings in the commonwealth. After months of patient toil the different building trades have completed the work which it has been my duty to supervise. I have had the assistance of the Mayor, members of the city government, Mr. Tilton, the architect, and the board of library trustees in securing for the city full value for the money expended, and I wish to thank them all. My duty now is to surrender the building to the board of library trustees through its honored president, Dr. Durell, and to him I present the keys to this building which is a veritable modern temple of literature.”

Dr. Durell accepted the keys and spoke as follows on “What the Trustees Hope to Give the Citizens”:—

“Mr. Commissioner and Mr. Mayor: In receiving these keys, we, the trustees of the public library, accept in behalf of all the citizens, control and management of this building, from you who have erected, completed and tonight dedicated it.

“The trustees wish to express to Andrew Carnegie our heartfelt thanks for his generous gift. To Mayor Burns the city owes a deep debt of gratitude for his unfailing interest from the very inception of the idea of a new library building. To the architect, Edward L. Tilton, it is indebted not only for the beauty of the structure but also for the warm, personal interest which he has taken in the project from the start. To Commissioner Littlefield hearty thanks are rendered for his expert suggestions and supervision.

“The building itself is not only a beautiful and ornamental structure, but also one of the most complete and economical working libraries in existence, most carefully planned by the librarian, so that we ask only the same appropriation for 1914 as was required this year in the old building.

“From tonight we, the trustees and the staff, accept the duty and the pleasure of making it the centre of books and

"It is said that Americans are interested about two-thirds in business and one-third in love. It is certainly true, the average business man, when he comes home, tired from the strain of the day, must relax and be amused. And just here comes the function of fiction—if literature is an art and libraries are to be reservoirs of literature, certainly libraries could not be complete without art's most human appeal—amusement.

"Great good has been done by writers of fiction—Dickens remodeled the work houses; Charles Reade changed the whole method of caring for the insane; Harriet Beecher Stowe did more toward freeing the slaves with 'Uncle Tom's Cabin' than all the great speeches in Congress; and of late Upton Sinclair, with his horrible book, 'The Jungle,' has done more for clean, wholesome food than Dr. Wiley and all the medical experts.

"Great care is and should be taken in the selection of books, especially for the young, for good habits in reading if acquired early are apt to be persistent; and we are giving especial attention to the development of children's work, both in the schools and in the several library buildings, making it a strong, systematically managed department.

"At the building of King Solomon's temple we are told that the work came to a stop for the want of a keystone to a certain arch, which none had orders to furnish. Upon inquiry it was found that such a stone had been presented, but the overseers, not knowing its purpose, agreed to throw it over among the rubbish of the temple. Now the reason of this almost fatal mistake was ignorance on the part of the overseers.

"This temple, so beautiful in all its proportions, has been erected to combat ignorance. It stands here as a monument of light and enlightenment.

"We trust that it will fulfill its promise and that it may prove, not a storehouse of books, but a centre for the diffusion of knowledge through this good city of ours."

Drew Bert Hall, Somerville's librarian, spoke as follows on "The Aims of the Library of Today":—

"The progress of a city depends upon the development of the bodies, of the minds and of the spirits of its citizens. Your bodies of muscle and brain must have wise care and harmless recreation. Your minds must be educated in all the wisdom built up of the successes and failures of your forerunners. And your spirits, they are the sacred fires whose bright or dull burnings put power or weakness into the machinery of your bodies and minds.

"Where have men found comfort for their bodies, and knowledge for their minds, and inspiration for their spirits, more than in the records of other men's successes and failures;

which are books? The greatest force in the world is the inspiration men receive from a book, the Book of Books.

“Caesar and Napoleon gained knowledge for the activities of war and government from the books of law and history of their days. And Abraham Lincoln read Artemus Ward’s humorous fiction just before submitting to his cabinet officers the Proclamation of Emancipation.

“So long has this power of books been recognized and so widely is it spread that today all things under the heavens, or in the sea, or on the earth are dealt with in printed pages. To succeed every man must read. Yet unaided he knows not which of the volumes before him is best for his purpose; neither is he able to own privately all those he sometime must read. To meet this need for thousands of books on hundreds of subjects, and for guidance in their choice and use, there have been created the co-operative libraries of the public.

“They have grown like green bay trees until their leaves offer shade to the people of all the cities.

“Yet this service, great as it is, is but a beginning of what shall be. For there is not a child or a young man, a housewife or a merchant, a laborer or a banker, a mechanic or a lady in this land tonight who does not need something to be found in good books; whether it be comfort for their sorrows of the day, or of knowledge for their struggles of the morrow, or of inspiration for their visions of the future.

“Great as is the service offered, still greater is the economy effected. For the cost of its maintenance, the public library system of this city yearly renders service which if purchased individually would cost its citizens half a million dollars. The co-operative principle of a public library takes the dollars of its appropriation and multiplies them, some ten fold, some twenty fold, and some thirty fold, as can no other institution. For it alone deals with what may be consumed and consumed again, what may be read and re-read, and be still able to give each new reader whatever part of itself he can understand and take unto himself, until the ink is faded and the page worn thin.

“And the common people use their library gladly, place 35,000 of their names on its register, and support it willingly, for it is all the inhabitants, not merely the payers of taxes, who support a city.

“That they might have the service of books nearer their homes the people to the west erected a branch and call upon it so largely that only thirteen cities in Massachusetts use their entire library systems more than is this one branch building whose central supply is from today in this structure. And then the people toward the east and toward Union Square found more and more good in books; and that this good might come

nearer their homes also, they too established other branches. And each is a refuge and tower of strength to its people.

“To give this good service of books, there are required three things—buildings, books and actuating force.

“Buildings suitable for economical and efficient work, and since libraries house the minds and the spirits of the great, and offer them continually to citizens both young and old, buildings beautiful to uplift the living and honor the dead!

“Books; of the making of them there is no end; books great and little, books useful and useless, books never dying and books never alive! Inaccurate books and out-of-date editions are worse than none; duplication of matter already owned in one volume is confusing and wasteful. So the choosing of the best books and their skilful use have become a profession, and their classification and cataloguing an exact science.

“If the building be the body, and the books be the mind, there must be the third part, the heart and the spirit. This is the library staff of sympathetic, forceful and well educated persons breathing warmth into the body of cold brick, and life into the mind of quiescent books; ready at all times to serve the city, ‘regarding, not chiefly its passing cravings, but those things which alone can finally satisfy it.’

“All these elements in good measure lie within your public library, and aim always to bear still more useful and intimate parts in the progress of the city and in the development of your individual lives.

“‘Culture is of the individual, civilization is of the community. No city is truly civilized until it maintains for the common welfare from the common wealth of the city all that is essential to the common good, these things of the higher life, especially included. A public library rightly regarded is the civic centre of a community. In it more than anywhere else, all citizens meet and have a common social home’; where every child or youth, or old man may receive from the personalities of the staff some influence toward refinement and culture and garner from the pages of the books some comfort or knowledge, or inspiration for the day’s work.”

“The Public Library as a Public Educator” was the theme of Superintendent Charles S. Clark, who spoke as follows:—

“Two ideas are here expressed, the one as old as the human race, the other the offspring of the most recent times.

“All through the ages man has secured education by means of processes easily reducible to two general terms, self-activity and instruction. Self-activity has developed his spiritual, intellectual, and physical powers; instruction has supplemented his natural powers by furnishing them the tools or agencies of improvement which others have invented. In the early days of the race when man was little more than an animal, instruction was

limited, being confined to the experiences communicated directly from one to another. As the race grew older, tradition was added to experience and later still information recorded through signs and symbols was drawn upon in the education of man. When writing was invented knowledge was put in permanent form, available for all who could make use of written documents. During all these ages man had been rising in the scale of civilization through the exercise and improvement of his natural powers and through the influence of instruction which was constantly increasing in importance because of the increasing dissemination of knowledge.

“But it was not until the intervention of the printing press that instruction was freed from the shackles of mechanical difficulties. From that time until the present day the volume of recorded information has increased until now books, the treasure-houses of information, are as numberless as the sands of the seashore. What today is education? Is it not for any individual that development of his physical, intellectual and spiritual power which will best fit him for his physical and social environment? Such a definition comprehends all of the upward struggles of the soul of any individual from his earliest infancy until he passes from this life into the great unknown.

“By what means shall education be secured today? Only by means of self-activity and instruction. The schools provide instruction, but the days of the school are limited as compared with the days of the life of the individual. Beyond the school where may instruction be found? Today the answer is not far to seek. Thanks to the multiplication of printing presses the experiences and knowledge of the race are now recorded in books and are available for instruction of all who will make use of them. What a wonderful change! The horizon of any individual is no longer the horizon of his own limited vicinity but may become a world horizon. The possibilities of instruction are now as broad as the life and the accumulated knowledge of the race.

“How then shall instruction be made available to all who must seek it in books which it is beyond their power to own? Modern times has furnished the answer to this question. The public library is the last great gift of civilization to public education. Within the walls of the public library are gathered the intellectual riches of the world. The public library performs the mission of offering universal instruction; it supplements the work of teachers and schools. The learner, in whatever walk of life, is afforded access to those means of education which lie outside of his native powers. This boon, formerly denied to mankind, is now freely offered to all by the public library. It is impossible to overestimate the value of this offering. As an agent in public education, the public library is today entitled

to take its place at the side of those other great agents in the elevation of mankind, the home, the church, and the school. Within a lifetime the whole problem of public education has thus been changed by the rise of the public library. Its influence is as beneficent as it is universal."

Dr. Charles L. Noyes closed the programme with a brilliant and scholarly address on "The Public Library and Life." He spoke as follows:—

"What does it mean that a city should build, equip, man and maintain a library like this? Understand that, and you explain the meaning of our civic life today. A modern library is a mirror held up to modern life in its latest phase. Approve it you cannot unless you believe in the movement of humanity in which we are a part. Condemn it and you indict civilization, you stand against the stream of our life as a people today. For what are the people doing, and meaning ever more to do? Day before yesterday they were asserting their right to rule, a democracy of power: yesterday they were, as they are still, claiming privilege,—every class, condition, sex for itself—a democracy of opportunity; today the people are combining in nations and cities to give to all citizens, all the good that life has to bring—a democracy of service. 'The best is not too good for the common people,' is our creed and our inspiration. The richest and the fairest, in health and comfort and happiness and beauty and intelligence, is to be the common heritage of all, so far as we can make it, and they will merit it. The symbol of that civic zeal and ideal is before us in this noble library. Standing in the present and pointing to the future—a vivid and eloquent expression in the hard reality of brick and stone of the ideal to which we are moving.

"A modern city library is, I think, the finest and clearest interpretation of the spirit of the times. It shows the city ministering to its whole citizenship, at the highest range of human life in the things of richest worth. It is, indeed, but one organ in the complex and complete municipal ministry. All kindred institutions—hospitals, schools, parks, play and pleasure grounds—are but the people acting collectively for the benefit and betterment of all. But I hope it will seem no partiality in me to say that the library serves in things which are the most indispensable, and of the highest rank. To heal and develop the body is a primary task, but surely for a human being a subordinate one. The library serves and perfects him in all that makes life worth living as a creature of reason, feeling, imagination, conscience and freedom.

"A public library shows humanity educating itself for human life—improving its efficiency, perfecting its nature, enriching its capacities and resources. We have had a glimpse, in a previous address, of the library as fellow servant with the pub-

lic schools, but beyond that it is itself the school for large numbers, who failed of schooling, or ended it too soon. For all of us it takes up education where school or even college must leave it. All our learning in these institutions has its best value as a preparation for after study and training. The library is a post-graduate university for all men, and the universal vocation school, enabling even the mechanic to be a master in his craft.

“But the supreme task for the democracy of the future is to educate itself for its work as a democracy. Popular government must be intelligent. A democracy cannot survive, still less prosper without libraries or their equivalent. A monarchy might. It is enough there that one man or a few should be wise, and relatively small wisdom is needed for its simple and stationary existence. But the problems of life and government under popular rule are many and multiplying, new every morning and fresh every evening, complicated and complex to the last degree, and we the people must solve them. Mere zeal and good will have not enabled us to dispose of such comparatively simple issues as temperance, charity, slavery. What shall we do when we deal with the more debated and difficult subjects, such as commission government, referendums, public ownership, trust control, eugenics, and all the reforms which are thrust upon us, to adopt offhand? One thing is sure, it will not do, no matter who summons us, to leap forward with our eyes shut. We must look ahead with the help of reason and argument, backward over the dearly bought experience of the race, and outward for all the light and leading of fellow experimenters in other lands. In some measure all of us and above all our guides and leaders must sit at the feet of thinkers and experts, and study the experience and wisdom of the generations behind, and the wide world about us; and all these complete, classified, clarified, with trained and willing assistants, are to be found, and found only in our libraries.

“But the spirit of the library turns on us sad eyes of rebuke when we dwell too long on her function as educator of workers and voters. She first and last offers to us, at their best, the things for which we work and live. She gives us books gathered from all lands and ages, selected, adapted to mood and taste and capacity, and books are not only or chiefly tools of trade, but the nourishment and tonic and solace of the soul. Come to this palace of reading, she calls, accept the freedom of its tables and shelves, command the best attendance and advice we can give, and spend your hour or your evening here in the company of the brightest minds, the noblest characters, the bravest workers of your kind; and go hence, as after a mental and moral bath, and a feast at a full table, not only better fitted for your calling as worker and citizen, but a wiser, larger, purer,

happier man; for here as nowhere else in such opulence, you will find 'the friendship of books,' whose acquaintance and influence 'quicken the intelligence, refine the taste, enlarge the understanding, diversify the experience, warm the heart and clarify the soul.' Of all the ministries of a city to its citizens is there any to surpass, to equal this? It invites all the people into the aristocracy of intelligence and character. The best that life has to give man, at his best and highest, it makes the universal prerogative of the whole body of citizenship.

"Shall our Somerville be a city of the latest and coming type, in which the ideal of citizenship is not only to share power, and to seize privilege, but to serve the welfare of all? This library is a pledge that such our city means to be. Its building is an embodied vision of the library of the future in the city of the future. Let us, my fellow citizens, use it, support it, in full faith and generosity, and the vision of today will be the fact of tomorrow."

REPORT OF THE BOARD OF HEALTH.

OFFICE OF THE BOARD OF HEALTH, }
City Hall, January 1, 1914. }

To His Honor, the Mayor, and the Board of Aldermen:—

Gentlemen,—We respectfully submit the following as the thirty-sixth annual report of the Board of Health, in which is presented a statement, tabulated and otherwise, of the sanitary condition of the city and the business of the board for the year ending December 31, 1913:—

Nuisances.

A record of nuisances abated during the year, in compliance with notices issued by the board, or under the board's direction, is presented in the following table:—

Complaints investigated and causes removed:—

Animals offensive	10
Blacksmith shops whitewashed	9
Cellars, water in	13
Cellars, filthy	14
Cesspools removed	2
Defective garbage houses	5
Dirty milk utensils	7
Factories filthy	1
Fish exposed for sale	2
Garbage thrown in yards	14
Hens being kept without permit	34
Hens running at large	6
Manure heaps, foul odors from	12
Milk license not posted	8
Milk must be kept on ice	14
Milk rooms, screens not on	8
Plumbing unsanitary	16
Privy vaults, foul odors from	2
Roosters annoying neighbors	9
Rubbish on vacant land	7
Sewer openings, foul odors from	3
Slops thrown on ground or from window	2
Stables offensive	19
Stables whitewashed	65
Stables ventilated	7
Stores (bakeries) whitewashed	7
Stores and utensils dirty	26
Tenements filthy	2
Tenements unsanitary	10
Unlicensed animals	7
Unclassified	33
Water-closets, foul odors from	15
Water-closets without water	6
Water pipes burst	2
Water turned off, house not tenantable	2
Yards filthy	79
Total	478
Complaints referred from 1912	8
Complaints received 1913	478
Total	486

Complaints referred to 1914	6
Nuisances abated 1913	480
Second, third, and fourth notices sent on nuisances	27
Total notices sent	507

In addition to the above, 244 dead animals have been removed from the public streets, and many nuisances have been abated on verbal notice from the agent, without action by the board, of which no record has been made. Each spring the whole city is examined, and cellars, yards and alleyways where rubbish and filth have collected are required to be cleaned.

Glanders.—Sixty-five cases of glanders have been reported during the year. Prompt action was taken in every case, and fifty-five of the horses were killed, ten being released from quarantine by order of the cattle commissioners.

Permits.

The record of permits to keep cows, swine, goats and hens, and to collect grease is as follows:—

Cows.—Twenty-one applications were received for permits to keep fifty-seven cows. Eighteen permits to keep forty cows were granted, and three permits were refused.

Swine.—Nine applications were received for permits to keep seventeen swine, all of which were granted. The fee is one dollar for each swine.

Goats.—Three applications were received for permits to keep three goats which were granted. The fee is one dollar for each goat.

Hens.—One hundred and sixteen applications for permits to keep 2,107 hens were received. Eighty-nine permits to keep 1,634 hens were granted, and twenty-seven permits were refused.

Grease.—Ten applications were received for permits for twelve teams to collect grease. Ten permits were granted. The fee is two dollars for each team.

Melting and Rendering.—Two parties have been licensed to carry on the business of melting and rendering, under the provisions of the revised laws of 1902, chapter 75, section 111, for which a fee of one dollar is charged.

Pedlers.

Two hundred and eighty-four certificates of registration were issued to hawkers and pedlers during the year under the provisions of ordinance number 29—an increase of thirty over the year 1912. Each pedler is required to present a statement from the sealer of weights and measures, showing that his measures and scales have been properly sealed, before a certificate is issued to him. Pedlers are also required to present

their vehicles at the police station the first Monday of each month for inspection by the agent of the board, that he may see if they are kept in a clean condition, and are properly marked with the owner's name and number. A fee of one dollar is charged for each registration.

Stables.

Under the provisions of sections 69 and 70 of chapter 102 of the revised laws of 1902, twenty-four petitions for licenses to erect and use stables were received, sixteen were granted, seven were refused, and action on one is still pending.

Board of Infants.

Twenty-eight parties, whose applications were first approved by this board, have been licensed by the state board of charity to care for fifty-six children in this city, under the provisions of chapter 83 of the revised laws of 1902.

Deaths.

There were 993 deaths and fifty-one stillbirths in the city during the year, as specified in the following table, which shows an increase of deaths over the previous year of ten:—

Deaths at Somerville hospital during the year	61
Deaths at hospital for contagious diseases and tuberculosis	34
Deaths at home for aged poor (Highland avenue),	53
Deaths at city home	11
Deaths at other institutions	21

DEATHS BY AGES.

AGES.	Total.	Male.	Female.

Population (estimated) 82,000
 Death rate per thousand 12.11

Diseases Dangerous to the Public Health.

This board has adjudged that the diseases known as actinomycosis, anterior poliomyelitis, Asiatic cholera, cerebrospinal meningitis, diphtheria, glanders, leprosy, malignant pustule, measles, ophthalmia neonatorum, scarlet fever, smallpox, tetanus, trachoma, trichinosis, tuberculosis, typhoid fever, typhus fever, varicella, whooping cough and yellow fever are infectious, or contagious, and dangerous to the public health and safety within the meaning of the statutes. Physicians are required to report immediately to the board every case of either of these diseases coming under their care, and postal cards conveniently printed and addressed are supplied to them for the purpose. On receipt of a card from a physician, the superintendent of schools, the principal of the school in the district in which the patient resides, the librarian of the public library and the state board of health are notified.

Scarlet Fever.—Two hundred eight cases of scarlet fever have been reported during the year, four of which resulted fatally. In 1912 there were 157 cases, two of which resulted fatally.

Diphtheria.—One hundred sixty-one cases of diphtheria have been reported during the year, thirteen of which were fatal. In 1912 there were 101 cases, fourteen of which proved fatal. Anti-toxin has been provided by the state board of health, and placed by this board in central locations for use by physicians. Culture tubes for diphtheria and sputum bottles for suspected tuberculosis are obtainable at the same stations.

Warning cards are used in dealing with scarlet fever and diphtheria, and the premises are fumigated by the use of formaldehyde gas immediately after the termination of the case. An inspection is made by the agent of the board of the premises where diphtheria is reported, and all sanitary defects discovered are required to be remedied as soon as possible.

Tuberculosis.—One hundred eighty cases of tuberculosis have been reported during the year. There were sixty-nine deaths from this disease.

Typhoid Fever.—Sixty-six cases of typhoid fever have been reported during the year, six of which have proved fatal. In 1912 there were forty-three cases reported, four of which were fatal.

Number of persons with diphtheria or scarlet fever taken in ambulance to hospital by agent	173
Number of cases of scarlet fever and diphtheria for which houses were placarded	225
Number of premises disinfected by agent	618

It will be seen by the foregoing figures that 618 premises were disinfected. Twenty disinfections were made at the request of attending physicians whose patients had been ill with typhoid fever, cancer, or other diseases. One hundred twenty-one schoolrooms were disinfected, eighty-nine for scarlet fever,

thirty-two for diphtheria, and 163 premises for tuberculosis, in compliance with the regulations passed by this board.

Many library books have also been disinfected, and quantities of infected bedding and other material have been burned.

TABLES.

The prevalence of scarlet fever, diphtheria, and typhoid fever in the city during the several months of the year 1913 is shown by the following table, and in the table next following is given the number of deaths from these three diseases, by months, during the last ten years:—

Scarlet Fever, Diphtheria and Typhoid Fever Reported in 1913.

Medical Inspection of Schools.

The medical inspection of the schools of Somerville, which was instituted in December, 1907, has been continued during the year. The value of the system has been constantly demonstrated, and the work has been done in a very satisfactory manner. There has been harmony of action between the board of health and the school board, and the school principals and teachers have very generally co-operated with the inspectors in making the system as successful as possible.

The inspectors make daily visits to the schools under their charge, and to them are referred all children who show evidences of disease or abnormal conditions. Children who are found to be unfit to remain in school are sent home, accompanied by a slip properly filled out advising that the family physician be consulted. The inspectors also make an annual inspection of all the children in the schools, and any defects discovered are called to the attention of the parents. Monthly inspections of the school buildings and premises are made, and suggestions or criticisms are referred to the proper authorities. Every effort is made to protect the health of the children and to co-operate with the parents in keeping the children in as normal a condition as possible.

It is extremely desirable that one or more additional school nurses should be employed to supplement and make more effective the work of the inspectors, and it is to be hoped that funds will be available to carry out this project. One nurse has been employed since last September.

In accordance with the provisions of the statute, tests, of sight and hearing are made by the principals or teachers.

During the year, 6,603 children have been referred to the inspectors during their daily visits, and 657 have been sent home because of illness.

The following list will show the classes of diseases and defects which have been found in the schools, except defects of sight and hearing:—

LIST OF DISEASES AND NUMBER OF CASES REPORTED.

1. Infectious diseases:—		
Measles	90	
Whooping cough	17	
Chicken pox	43	
Mumps	86	
Scarlet fever	16	
Total		252
2. Diseases of the nose and throat:—		
Enlarged tonsils and adenoids	510	
Inflammatory diseases	53	
Other abnormal conditions	82	
Total		645
3. Diseases of the eyes:—		
Inflammatory conditions of the eyes and lids	37	
Foreign bodies and injuries	3	
Other abnormal conditions	46	
Total		86
4. Diseases of the ears:—		
Inflammatory conditions	6	
Other abnormal conditions	5	
Total		11
5. Diseases of the skin:—		
Pediculosis	960	
Impetigo	56	
Scabies	17	
Eczema	57	
Tinea	6	
Herpes	19	
Miscellaneous conditions	83	
Total		1,198
6. Miscellaneous diseases:—		
Constitutional diseases	43	
Diseases of the digestive system	94	
Diseases of the respiratory system	44	
Diseases of the circulatory system	16	
Diseases of the lymphatic system	34	
Diseases of the nervous system	7	
Diseases of the urinary system	4	

Wounds and injuries	25
Diseases of teeth	265

The districts and inspectors are as follows:—

District No. 1.—Prescott, Hanscom, Davis, and Edgerly schools. Inspector, Dr. Francis Shaw, 57 Cross street.

District No. 2.—Baxter, Knapp, Perry, and Bell schools. Inspector, Dr. Edward J. Dailey, 46 Bow street.

District No. 3.—Bennett, Pope, Cummings, and Proctor schools. Inspector, Dr. L. H. Raymond, 146 Highland avenue.

District No. 4.—Morse, Carr, Durell, and Burns schools. Inspector, Dr. W. L. Bond, 322 Highland avenue.

District No. 5.—Brown, Bingham, and Forster schools. Inspector, Dr. H. M. Stoodley, 283 Highland avenue.

District No. 6.—Lincoln, Hodgkins, Highland, Cutler, and Lowe schools. Inspector, Dr. H. Cholerton, 94 College avenue.

District No. 7.—Glines and High schools. Inspector, Dr. R. F. Gibson, 76 College avenue.

Parochial Schools.—Inspector, Dr. M. W. White, 21 Walnut street.

Hospital for Contagious Diseases.

Scarlet Fever and Diphtheria.—The hospital has continued to demonstrate its value to the city during the past year. The institution is now well equipped and in every way modern and convenient.

Miss Edith M. Grant has continued as matron, and has done excellent work. The hospital has been carried on economically, and in every particular the results have been satisfactory to the board.

The statistical report is included in the report of the medical inspector.

Tuberculosis Hospital.

The tuberculosis hospital has been in operation since March 8 of the year 1911, and has proved conclusively the necessity and desirability of such an institution in our city.

There have been eighty-four patients received at the hospital during 1913.

The conditions shown and the results obtained in the cases received prove, also, the need of continued work along this line on a broader basis. Recent figures show that there are approximately 40,000 cases of tuberculosis in Massachusetts, and that there are accommodations for not more than 4,000 patients. The state is making every effort to save its people, and

each city and town should feel itself, in a manner, responsible for the progress of this work. It is to the credit of the city of Somerville that we are among the first who have established a hospital for tuberculosis, and that our hospital has been approved by the trustees of hospitals for tuberculosis.

The good work accomplished and the outlook for the coming year promise even greater results in the future, both from the standpoint of the work actually done, and the help rendered to the patients, and, last, but by no means least, the information and instruction, which is a great factor on the treatment of this disease, is being steadily pursued and given out, that those who are discharged from the hospital may know how to safeguard and care for others as well as themselves and prevent, so far as is possible, the spread of tuberculosis in the city.

It is very necessary that another building similar in size and construction to the present building should be built at once, as the accommodations are not adequate to provide for patients desiring admission.

Mental Disorders.

Under the provisions of Chapter 394 of the Acts of the Legislature of 1911 the Board of Health is required to provide a place for the care of and to care for persons suffering from certain mental disorders prior to their commitment to an institution. At the present time this Board has no proper place at its command for the detention and care of these cases. A very suitable arrangement could be made for this work in the building suggested above.

Bacteriological Department.

The work of this department was performed by Frank L. Morse, M. D., medical inspector of the board, whose report is appended to this report.

Specimens will be received at the laboratory at the city hall daily, including Sunday, at any time, and they will be examined and reported upon the morning following their reception.

SPECIMENS AND ANTI-TOXIN.

Outfits for specimens to be examined for tuberculosis, diphtheria, and typhoid fever, and diphtheria anti-toxin, vaccine lymph and nitrate of silver solution may be obtained at the laboratory and at the following places:—

Adams Pharmacy, Willow and Highland avenues.

R. A. Peckham, 154 Perkins street.

Bay State Pharmacy, 173 Washington street.

Edward E. Edwards, 25 Union square.

Fred W. Gay, 524 Somerville avenue.

John Morrison, Highland avenue, corner Cedar street.

Percy A. Hall, 2 Studio building, Davis square.

Henry W. Perry, 529 Medford street, Magoon square.

Eugene B. Carpenter, 10 Broadway.

Richardson Pharmacy, 310 Broadway.

George E. Wardrobe, 693 Broadway.

Willis S. Furbush & Co., 1153 Broadway.

After the specimen is collected it must be taken to the culture station or sent directly to the laboratory at the city hall.

Undertakers.

Under the provisions of section 44 of chapter 78 of the revised laws of 1902, twenty-two persons have been duly licensed as undertakers.

Examiners of Plumbers.

The public statutes provide for a board of examiners of plumbers, consisting of the chairman of the board of health, the inspector of buildings, and an expert at plumbing, to be appointed by the board of health. This board appointed Duncan C. Greene, the inspector of plumbing, to fill the place of expert. The number of licenses granted will be found in the report of the inspector of buildings.

WESLEY T. LEE, M. D., Chairman,
 JACKSON CALDWELL,
 JOHN A. BLASER,

Board of Health.

REPORT OF THE MEDICAL INSPECTOR.

Somerville, January 1, 1914.

To the Board of Health of the City of Somerville:—

Gentlemen,—I herewith present the report of the medical inspector for the year 1913, including the statistics of the contagious disease hospital and the bacteriological laboratory.

Scarlet Fever. During the year 208 cases of this disease were reported in the city, an increase of fifty-one in number over the previous year. Every case has been inspected, before the house was fumigated, and 156 visits were made at residences to determine when desquamation was complete.

Diphtheria. During the year 161 cases of diphtheria have been reported in the city, an increase over the previous year, when 101 cases were reported. The same restrictions are placed upon all cases, and before patients are released from quarantine two successive negative cultures must be obtained. It is optional with the attending physician to take the first culture, but the second must be taken by the medical inspector, and during the year 161 visits were made at houses for this purpose.

Typhoid Fever. During the year sixty-six cases of this disease were reported, an increase of twenty-three over the previous year.

Tuberculosis. One hundred and eighty cases of tuberculosis were reported during the year, an increase of twenty-five over the year previous. In November, 1906, following a conference with the overseers of the poor, these cases, which had been previously cared for medically by the city physician, were transferred to the board of health and the medical inspector instructed to care for them. During 1913 such cases have been transferred to the new tuberculosis hospital for treatment.

Ophthalmia Neonatorum. Thirty-three cases of this disease were reported to the board during 1913, all of which were visited and such action taken as was necessary to prevent blindness.

Contagious Disease Hospital.

In September, 1906, following a change in the city charter, the city physician, who, up to this time, had treated the cases at the hospital, was relieved of this duty, and the care of the patients transferred to the medical inspector on October 1. During 1913 this arrangement has continued, 360 visits having been made at the hospital during the year.

Scarlet Fever. During the year eighty-two cases of scarlet fever were admitted, four of which proved fatal, two dying within twenty-four hours. Forty-four of these cases were among males, and thirty-eight among females. Fifteen were under five years of age, thirty-one from five to ten years, and the remainder, thirty-five, were over ten years. Vomiting was a constant symptom, it occurring in forty-nine cases, and a sore throat in sixty-three cases. In four cases the rash occurred on the first day of illness, in thirty-six cases on the second day, in ten instances on the third day, and three on the fourth day. There was membrane present on the tonsils in twenty cases; in four cases the disease was complicated with nephritis; in four cases with rheumatism; in eleven cases with discharging ears, with three mastoid operations; in nine with enlarged cervical glands, two of which were opened, and in addition two had diphtheria on admission, and one mumps. The average stay in the hospital was forty days. One patient developed varicella nine days after admission.

One patient was operated on for suppurating axillary glands, and two patients were attended by their own physician.

Diphtheria. During the year ninety-one cases of diphtheria were admitted, ten of which proved fatal. Of these patients, thirty-seven were among males and fifty-four among females. Nineteen were under five years of age; forty-one were from five to ten, and the remainder, thirty-one, were over ten. Five entered the hospital on the first day of their illness, and all recovered. Twenty-eight entered the second day of the illness, all recovered; nineteen on the third day, with one death; eight on the fourth day, with no deaths; seven on the fifth day, with one death; two on the sixth day, both dying; six on the seventh day, three dying. The importance of early treatment with anti-toxin is thus very obvious. Of the twenty-one laryngeal cases sixteen came to intubation, twelve of whom recovered. In nineteen patients the membrane extended over both tonsils, uvula and palate, fourteen recovering. The throat was clear of membrane in seven cases on the second day, in twelve cases on the third, in ten cases on the fourth, in nineteen cases on the fifth, in eleven on the sixth, in three on the ninth, one on the eleventh, three on the twelfth, and one on the fourteenth. In twenty-nine patients eruptions appeared on the body due to the use of the anti-toxin, and in three patients joint pains occurred from the same cause, two patients had enlarged cervical glands. The average stay in the hospital was seventeen days. Of the ten deaths during the year, three died within one hour of admission, two being intubations and one septic. One case had scarlet fever upon admission. Two cases were attended by their own physicians.

Tuberculosis.

In March, 1911, the tuberculosis hospital, accommodating eighteen patients, was completed by the building commissioner and transferred to the board, the first patient being admitted March 8. During 1913 eighty-four patients ill with this disease have been admitted, and several times during the year the hospital has reached its normal capacity, which indicates its well-founded need.

Many of these patients were in the advanced stage of the disease, thus removing from the patients' homes the danger of infection of the members of the family. Nineteen deaths have been recorded.

Other patients have been discharged with the disease arrested, and others have been transferred to the state hospitals for treatment. The need of this department will be more marked during the coming year, and recommendations should be made to provide for its enlargement.

Other Diseases.

Thirteen other patients have been admitted during the year as follows: Five cases of measles, two of erysipelas, one of tonsillitis, and five mental cases, were also admitted to the hospital, upon the request of the police department, as required by Chapter 394, Acts of 1911. The latter patients were cared for in a room on the first floor of the hospital and attended by police officers if they were males, and nurses if females. The accommodations were visibly inadequate for such patients, and they were usually committed to an insane hospital on the following day.

Bacteriological Department.

During the year 1913, 826 examinations were made of cultures for the diphtheria organism, 294 examinations made of sputum from patients suspected of having tuberculosis, and 156 examinations to detect the Widal reaction in typhoid fever.

Diphtheria. Eight hundred and twenty-six cultures have been examined for diphtheria, 387 being in males, and 439 in females. Diphtheria being a disease of children, 218 of these examinations have been made in children under five years of age, 276 in those from five to ten years of age, 132 from ten to twenty, and 196 in adults over twenty years. In four cases the age of the patient was not stated. Four hundred and two examinations were made for the diagnosis of the case, sixty prov-

ing positive and 342 negative. Of the positive results, fifteen were of cases in which the attending physician's diagnosis of diphtheria was confirmed, thirteen in which the clinical diagnosis was not diphtheria, and thirty-two in which no definite diagnosis was made. Of the 342 negative examinations, forty-one were obtained in which the clinical diagnosis was diphtheria, 111 in which the diagnosis was not diphtheria, and 110 in which no diagnosis had been made.

Four hundred and twenty-four cultures were taken for release of patients from quarantine, eighty-six of which were positive and 339 negative. The importance of taking release cultures is demonstrated by these figures, these patients showing the presence of the bacilli in the throat after the clinical evidence of the disease had disappeared. In two examinations there was no growth upon the serum tube.

Tuberculosis. Two hundred and ninety-four examinations have been made of sputum suspected of containing the tubercle bacillus, 107 of which were positive and 187 negative. In 137 cases a definite diagnosis of this disease had been made by the attending physician, but in sixty-five of them the organism could not be detected. In the remainder of the cases, ninety-one were stated as not showing evidence of the disease, eighteen being positive, and in sixty-six cases no statements were made giving information as to its character, seventeen of which were positive. One hundred and fifty were males and 144 females. Although printed directions accompany each outfit, telling how the specimen should be obtained, it has not been unusual for specimens to be sent to the laboratory containing only saliva from the mouth, with no excretion from the lungs or bronchial tubes. Physicians should be urged to give definite instructions to each patient, relating to the collection of the sputum, for in some instances a negative report would mislead both physician and patient. Consumption to-day is recognized as an infectious disease, and all persons afflicted with it should be instructed in the modern methods for preventing its spread. In some cases this is not done by the attending physician, and during the past ten years your board has required that this disease be reported to you, as other infectious diseases are, and that printed instructions and advice be sent to each patient ill with the disease. The decrease in the death rate of consumption, and the cure of persons afflicted with it, is due to the improved and intelligent manner with which cases are treated, and the prevention of further spread of the disease is a subject which is of importance to all local boards of health.

Typhoid Fever. One hundred and fifty-six examinations of the blood of patients suspected of having typhoid fever have been made, twenty-four of which proved positive. In fifty-

three cases a positive diagnosis of this disease had been made by the attending physician, in twenty-one cases it was stated not to be typhoid fever, and in the remainder no statement was made relating to the diagnosis. Of the negative results, thirty-four were diagnosed as typhoid, twenty-one were said not to be typhoid, and in seventy-seven no diagnosis was made. Ninety-six were males and sixty females.

REPORT OF THE INSPECTOR OF ANIMALS AND PROVISIONS.

Somerville, Mass., January 1, 1914.

To the Board of Health of the City of Somerville:—

Gentlemen,—I herewith present my report for the year ending December 31, 1913:—

Inspections.

Cold storage houses	122
Wholesale meat houses	160
Retail grocery and meat markets	2987
Retail fish markets	456
Retail pedlers wagons	1435
	<hr/>
	5160

The cold storage houses, grocery, meat and fish markets as a rule are kept in a good sanitary condition.

The following list shows the goods condemned during the year:—

Meats.

Fresh beef, 911 pounds; corned beef, 580 pounds; lamb, 576 pounds; poultry, 687 pounds; fresh pork, 192 pounds; salt pork, 97 pounds; liver, 48 pounds; hamburger steak, 34 pounds; tripe, 145 pounds; pigs' feet, 138 pounds; veal, 197 pounds.

Eggs.

Eggs, 21 dozen.

Fish.

Haddock, 615 pounds; halibut, 216 pounds; pollock, 165 pounds; salmon, 107 pounds, swordfish, 69 pounds; shad, 43 pounds; herrings, 1,650 pounds; mackerel, 297 pounds; clams, 6 quarts; clams, 2 bushels; oysters, 2 gallons.

Fruit.

Oranges, 9 boxes; grapefruit, 2 1-2 boxes; lemons, 19 dozen; strawberries, 39 quarts; blackberries, 31 quarts; raspberries, 21 cups; grapes, 17 baskets; bananas, 138 dozen; cantaloupes, 17 crates; apples, 12 bushel.

Vegetables.

Cabbage, 6 barrels; string beans, 9 baskets; celery, 34 bunches; cauliflower, 39 head; rhubarb, 5 crates; tomatoes, 39 baskets; onions, 14 bushels; turnips, 8 barrels; asparagus, 37 bunches; squash, 5 barrels; sweet potatoes, 9 crates; potatoes, 21 bushels; greens, 11 bushels; lettuce 8 dozen.

Slaughter House Inspection.

Each week during the year I have been in attendance at the N. E. D. M. & W. Co., and the N. P. & P. Co., every other week, Sturtevant & Haley Beef & Supply Co.

J. P. Squire once every three weeks and Walter Gordon Co., (poultry and swine) once a week.

It must be understood that I am on call at all times at any of these places when my presence is required.

The following list shows the number of animals slaughtered in this city during the year:—

Swine	1,181,515
Cattle	35,173
Calves	73,608
Sheep	425,665
		<hr/>
		1,715,961

Animals.

A close watch has been kept of all the domestic animals in the city and 468 visits have been made at the stables during the year.

	No.	Quarantined.	Killed	Released
Horses	4,408	65	55	10
Cows	46	4	2	2
Goats	2	0	0	0
Swine	112	0	0	0
Dogs	6	2	0	2
	<hr/>	<hr/>	<hr/>	<hr/>
Total	4,574	71	57	14

All blacksmith shops, cow stables and stables for horses were whitewashed and disinfected during the year.

Bakeries have been required to screen all doors and windows, and 776 inspections have been made.

Barber shops are required to keep in a sanitary condition all the time and to properly sterilize their utensils.

Factories.

There have been 185 inspections of factories during the year. Daily assistance has been rendered Mr. Page in his work as sanitary inspector and in conveying patients to the contagious hospital by ambulance.

Respectfully submitted,

CHARLES M. BERRY,
Inspector of Animals and Provisions.

REPORT OF THE INSPECTOR OF MILK AND VINEGAR.

LABORATORY OF THE INSPECTOR OF MILK AND VINEGAR, }
 City Hall, Somerville, Mass., January 1, 1914. }

To the Board of Health of the City of Somerville:—

Gentlemen,—I herewith present my annual report for the year ending December 31, 1913.

On the above date there were in this city licensed to sell milk, 400 stores and seventy-eight pedlers, and thirteen stores to sell oleomargarine.

Sixty-seven stores have gone out of business or changed hands during the year.

Of the seventy-eight pedlers thirty-five are located in this city and forty-three in the neighboring cities and towns.

There are approximately 6,200 gallons of milk distributed in Somerville daily and sixteen dealers selling pasteurized milk supply over one half of this amount.

Financial Statement.

Appropriation, 1913					\$1,800 00
License fees				\$279 00	
Fees for analysis				194 50	
Fines				62 00	
				\$535 50	
					\$1,264 50
Balance unexpended					29 59
					\$1,234 91
Actual expenses of department					\$1,234 91

Figured on a population of 82,000 and an appropriation of \$1,800 the expenses of this department were (2-1-10) two and one-tenth cents per capita.

City Inspection.

The department work in the city proper covers the supervision of milk at the receiving stations, the taking of temperatures, examination of utensils and wagons, examination of milk from dairies for visible dirt and bacteriological standard, inspection of milk plants and stores and the taking of samples of milk at railroad stations, teams, stores, lunch rooms and hotels.

Laboratory work consists of the analysis of milk, cream, butter, ice cream and vinegar, chemically and bacteriologically, with the exception of butter and vinegar (which are not examined bact.); the sterilization of all apparatus used in this work; notifying dealers of chemical, bacteriological and sanitary violations and the prosecution of court cases where advice and instruction do not accomplish the required results. Ice cream was added to the work of this department in July, when Chapter 743 of the Acts of 1913 became a law.

Nuisances dealt with by this department were as follows: Dirty milk containers, improper tasting of milk, milk containing foreign substance, improper use of milk bottles, dirty tanks, dirty chests, high temperature, unsanitary cow barn, tuberculous cattle, impure certified milk, and milk believed to be infected.

Recommendation.

Bottle Law.

I believe it would be of great advantage to the consumers of milk and this department if this board should enact a regulation prohibiting the sale of milk in any other way than in sealed containers, except in such places where milk is to be consumed upon the premises. This would relieve the department of a great deal of store inspection and the time could be given to advantage to country inspection.

I believe that there is practically no criminal adulteration in the city. Poor quality milk is due to carelessness and negligence and would be largely overcome by a regulation of this character. More time could be devoted, to advantage, to the cleanliness and method of handling at the source of supply.

Letters or orders sent. (See sanitary notices.)					

Country Inspections.**Dairies.**

The inspection of dairies has been principally accomplished by laboratory methods. Occasionally it has been necessary to visit dairies and make suggestions as to desired changes.

By the Lorenz method the milk from each dairy is examined for *visible dirt*; dairies that cannot be examined in this manner, because a strainer has been in use at the farm, are examined bacteriologically and notices are sent, when there is a variation from our requirements.

A milk may be free from *visible dirt* and yet have a *high bacteriological* count if not properly cooled when shipped and stored.

By straining out the dirt you are simply resorting to "washing filth." All the soluble portions which contain the germs (diseased or otherwise) remain in the milk waiting a favorable opportunity to multiply; i. e., when the milk becomes warm to anywhere above 50 degrees Fahrenheit.

Very few dairies have been scored by the United States score card because the inspector's time is devoted almost entirely to the city work, but I hope during the coming year to so arrange the work that a portion of each week will be given to this very necessary dairy inspection.

Only a few things are absolutely necessary, at the farm, to insure pure, clean milk;—cleanliness of animals and utensils and the person milking, a hooded milk pail (see cut) and proper iceing.

Sanitary Hooded Pail, \$1.50.

These things cost only a very small sum and once the habit is contracted it will stay with a man the balance of his life.

There have been nine cases of watered milk traced to the farm during 1913. In one instance the case was turned over to the State authorities and one other case to the federal authorities and the balance were handled by this department.

Infected Milk.

On February 4 and 5, four cases of typhoid fever were reported to this board of health, and upon investigation it was found that all of these patients obtained their milk from a Mr. X. In company with Dr. F. L. Morse, a visit was immediately made to this farm and samples of blood taken from each person who came in contact with the milk.

On examination the same afternoon one showed a positive Widal reaction.

The method of washing bottles was found to be imperfect and the following steps were immediately taken to prevent a further spread of the infection:—

1. The dealer was instructed to boil all cans, pails, bottles and other utensils used in the production and distribution of milk.

2. To pasteurize all milk before delivery the following morning.

3. To isolate the man who responded positively to the Widal reaction, to prevent his coming in contact with the milk, or utensils in any way.

On account of the ineffective apparatus at hand it was found necessary to install a steam boiler in order to carry out the first two requirements; accordingly, *that day*, a boiler was obtained and the milking utensils and bottles thoroughly treated with live steam and the milk pasteurized in the following manner:—

The milk in eight and one-half quart cans was placed in a wooden sink, two by six feet, containing water, and steam forced into it until a temperature of 145 degrees Fahrenheit was reached. The milk was held at this temperature for twenty minutes and constantly stirred, after which it was cooled quickly, bottled and stored for delivery the next day.

The State Board of Health commented favorably on this method in their February report and commended this board upon the promptness and efficiency with which this epidemic was handled. The cases diminished, the last one being ill on February 15, ten days after these measures were instituted and corresponding to the incubation period of the disease. Cambridge and Arlington also suffered at this time, there being forty-four cases in Cambridge with eight deaths; four cases in Arlington with no deaths; thirteen cases in Somerville with one death, a total of sixty-one cases with nine deaths.

Table 5.—Infantile Mortality.

Year.	Births.	Deaths under 1 year, all diseases.	Deaths due to enteric diseases.	Per cent. of deaths from Entero-Colitis under one year of age compared with births.
1909	1582	162	58	3.6
1910	1558	175	54	3.4
1911	1618	166	48	2.9
1912	1839	142	45	2.4
1913	Birth returns incomplete	166	45	...

It will be seen by consulting Table No. 5, that for the past four years the birth rate has been steadily *increasing*. The deaths of children under one year of age have been about the same in number but when compared with the births show a smaller percentage each year, while the percentage of deaths from entero-colitis, compared with births has decreased thirty-three and one-third per cent.

I believe this to be a really remarkable showing. Recent research work has shown that the *rural* death rate is much higher than that of the city and since 1909 the cities have been reducing their death rate very rapidly while the rural death rate remains about the same, showing that the *vigorous protective measures* adopted in the large cities are *producing results*. The value of *pure milk* cannot be overestimated and no amount of care by the consumer can entirely offset the dangers of polluted milk. On the other hand the cleanest milk will speedily become unfit for the infant if improperly handled in the home.

It would be of great assistance to this department if some means could be devised to get the physicians to report all cases of entero-colitis.

At present we are obliged to rely on the death returns for data of enteric diseases in children and only the fatal cases come to our attention. If the physicians would report each case they are called to attend the department could determine much more quickly an epidemic from any particular source of supply.

A postal card addressed to the Board of Health stating the name, address, age of patient and source of milk supply would be all that is necessary.

Table 6.—Results of Bacteriological Examinations of Milk, 1913.

Bacteria per cubic centimeter.	Samples from wagons.		Samples from stores.		Samples from dairies.	
	No.	Per cent.	No.	Per cent.	No.	Per cent.
Below 10,000	35	9.5	0	0.	101	25.2

5,000,000 to 10,000,000	0	0.	2	5.	0	0.
Above 10,000,000	2	.6	3	7.5	0	0.
Total above 500,000	15	4.1	30	75.	21	5.3
Total of samples	370	100.	40	100.	400	100.

Store samples were all from dip tanks.

Legislation.

July 6, 1913, Chapter 743, known as "An Act Relative to the Manufacture and Sale of Ice Cream," became a law. This act provides that all ice cream must contain at least seven per cent. of milk fat and the enforcement is left with the Department of Milk Inspection.

July 10, 1913, Chapter 761, known as "An Act to Safeguard the Public Health Against Unclean Milk Containers and Appliances used in the Treatment and Mixing of Milk," was passed.

This act provides that all milk utensils shall be thoroughly cleaned and free from foreign deposits upon the inside. A penalty of fifty dollars is provided for violations.

June 26, 1913, Chapter 96, known as "A Resolve to provide

for the encouragement of dairying and the production of milk and dairy products of superior quality," was passed. This resolve provides that the State Board of Agriculture shall offer prizes for the *best kept stables*, *best quality of milk*, and *lowest bacteria counts*, or as said board sees fit. An annual appropriation of \$5,000 was provided to cover prizes and traveling expenses.

As a result of this measure on December 2, 3 and 4, 1913, at Springfield, Mass., a milk show was held. This was the largest show of the kind ever held in the world. Cash, ribbons and medals were given as prizes for clean milk, as determined by the Lorenz method, low bacteria counts and perfection from a chemical standpoint. A prize was also given for the best screened stable.

It is a significant fact that both first prizes were won by women.

These measures were the best of a large number that were presented to the legislature of 1913. During the coming year there will doubtless be a still larger number presented for consideration, and I trust that all persons and organizations will bear in mind the fact that what is most needed is not *additional laws* governing the production, transportation and sale of milk but *co-operation* between the various departments who now have the supervision of the matter, i. e., federal, state and municipal. No condition can arise that cannot be controlled by these three departments if given sufficient means to carry on their work. When appropriations are made sufficiently large to enable the various departments to carry on the work assigned them, then satisfactory results will be obtained. The federal authorities have the power to control all interstate problems. State authorities can compel the sanitary production and enforce standards throughout the commonwealth and local authorities can handle any and all conditions within their borders.

Money and men are needed and multiplicity of laws will lead only to confusion and misdirected effort.

Respectfully submitted,

HERBERT E. BOWMAN,
Inspector of Milk and Vinegar.

REPORT OF OVERSEERS OF THE POOR.

Somerville, Mass., December 31, 1913.

To His Honor, the Mayor, and the Board of Aldermen of the City of Somerville:—

Gentlemen,—Herewith the Board of Overseers of the Poor presents its report for the year 1913, which includes the reports of the agent and the warden of the city home.

Our one trouble for the past year, and what is likely to continue, is to interpret the act of the Legislature relating to "aiding mothers with dependent children." While heretofore aid from this department has disqualified recipients from acquiring a residence in our city this act simply annuls this provision and distinctly from its passage places such persons outside the accepted requirements of this board.

This act is so vague in its wording as to make possible a large additional expense for this department.

We trust that further legislation will make it more acceptable. If this is not done, we believe it should be placed outside the work of this department.

The matter of asking a discount on our small two-dollar orders, from dealers over the city, has been discussed many times by this board. We have interviewed all parties to find, if possible, the practical working of this plan. Our judgment is, that it would benefit the city less than it would harm the recipients of our city's charity. What has been said many times of this department we think holds good for the past year. The work has been carefully and faithfully done. All needy ones, so far as we have been able to learn, have received sympathetic and charitable aid.

The work at the home has been, as usual, acceptable, and the hospital has proved its need and usefulness in the treatment of an unusual number of serious cases. But for the unavoidable loss of some of our stock, and rather poor returns from celery, the profits from the farm would have excelled former years. We would again call attention to the need of an office for the warden and some kind of reception room for visitors to the inmates.

Very respectfully,

HENRY F. CURTIS,	} Overseers of the Poor.
A. W. EDMANDS,	
PHILIP KOEN,	

REPORT OF THE GENERAL AGENT.

Somerville, Mass., December 31, 1913.

To the Overseers of the Poor, Somerville, Mass.:—

Gentlemen,—As we look back over the past year, we find that as a whole it has been a very busy one. The most important event for us was the passing by the Legislature of chapter 763 entitled, "An act to provide for suitably aiding mothers with dependent children under fourteen years of age." This has increased our work in the office to quite an extent and I find that the action of the board in supplying a permanent, instead of a temporary, clerk was a very wise and fortunate move, as the work for the board of health has increased and the bookkeeping at the city home of course takes some of her time. The clerk selected has proved herself very efficient and a great help to the agent and warden.

There seems to have been an impression throughout this city, as well as all through the state, that the above mentioned act provided a pension for all widows regardless of their condition or income or fitness to bring up or care for their children, but this is not the case. We have to certify on each notice sent to the state (and we are obliged to send a notice whether they are city or state cases) that the mother is fit to bring up her children and that the other members of the household and the surroundings of the home are such as to make for good character; we also have to certify as to the resources of the family, how many children over fourteen who are able to work and how much they earn, how much the mother can earn without neglecting her family. All of these and many other facts have to be ascertained and certified to in each case. The state visitor then makes a visit to the family and investigates and in some cases does not agree with our findings, but we are generally able to harmonize our differences and agree although we find it is very easy for the last visitor to find fault with whatever the first one does or suggests. After some experience we are led to believe that it will take more than a few weeks or even months to change the way of living, the location of the homes and the habits, etc., of any people, whether they be rich or poor—but if we are patient and keep at our work, wonders can be performed in time, provided we supply the necessary aid to change the conditions. This law was passed and went into effect after our appropriations were made, so of course we were obliged to go to the mayor and aldermen for an additional appropriation to meet the demands made upon us. Applications have been made to us by about fifty different widows or deserted women for aid under this law, but for various reasons we have been obliged to refuse quite a number of them. Some have moved away, but we are aiding at the close of the year about forty families under this law, twelve of them are settled in other cities or towns, and six are families having no settle-

ment in the commonwealth. We send bills to the state for the full amounts in the latter cases, and for the out-of-town cases bills for two-thirds are sent to the place of settlement and one-third to the state. We also send bills to the state under this law for one-third of the amount agreed upon between the city and the state in our city cases.

During the year we distributed about 100 tons of coal amounting to \$862.67, food \$6,520.35, cash paid out \$1,308.46. We caused to be collected and turned over to the Somerville Hospital \$2,079.27, \$3,904.15 was paid other cities and towns. For assistance in burials \$173.00, medicine \$230.02, and for other things as seemed necessary amounting in all to \$21,827.73.

Business has been fairly good and very few men, comparatively, have been out of work.

Once more I wish to thank the members of the board for their kindness and willingness to help and advise at all times. Attached please find tables to show the work in detail.

Very respectfully,

C. C. FOLSOM,

General Agent.

Overdraw	\$445 95

Owing to the loss of one horse through sickness and two horses disposed of on account of old age, the balance in favor of the farm has been reduced this year by the amount of \$650 paid for three new horses to take the place of those disposed of.

Respectfully submitted,

J. FOSTER COLQUHOUN,

Warden.

REPORT OF THE CITY PHYSICIAN.

OFFICE OF THE CITY PHYSICIAN,
Somerville, January 1, 1914.

To His Honor, the Mayor, and the Board of Aldermen:—

Gentlemen,—Services rendered for the city during the year 1913 are summarized in the following abstract:—

Office consultations and treatments	642
Total outside visits	1,242
Confinements	11
Vaccinations	92
Visits at city home	88
Attended at police station	44
Examinations:—	
For legal department	24
For highway department	15
For fire department	3
For water department	2
For school department	2

Respectfully submitted,

C. CLARKE TOWLE,
City Physician.

REPORT OF THE CITY ENGINEER.

OFFICE OF THE CITY ENGINEER,
CITY HALL, SOMERVILLE, JANUARY 22, 1914. }

To His Honor, the Mayor, and the Board of Aldermen:—

Gentlemen,—In accordance with the provisions of the city charter, the following report of the work done and expense incurred for the year ending December 31, 1913, by the Engineering department and appropriations under my charge and supervision, including the accounts of City Engineer, Grade Crossings, Sewers Construction, Sewers Maintenance, Public Grounds, Parks and Playgrounds and other public works, is herewith presented.

ENGINEERING DEPARTMENT.

City Engineer Account.

Statement of Expenses, 1913.

Salary of City Engineer	\$3,000 00	
Salaries of assistants (see itemized statement following)	7,296 34	
Stakes, tools, and general supplies (outside work)	166 71	
Draughting materials and office supplies (inside work)	145 36	
Car fares and miscellaneous expenses (assistants)	185 88	
Maintenance of automobile and motor cycle	637 73	
Setting stone bounds	12 35	
Telephone, postage and expressing	90 98	
Incidentals	32 00	
Total debit		\$11,567 35
CREDIT.		
Appropriation	\$11,500 00	
Amount received for making acceptance plans, transferred from Revenue account	50 00	
Amount received from other accounts, services rendered	17 57	
Total credit		\$11,567 57
Balance unexpended		\$ 0 22

Classification of Expenses, Assistants' Salaries.

Sewers,—comprising surveys, estimates, profiles, lines, grades, titles, plans, assessments, and all engineering work relating to sewers	\$1,316 10
Highways,—comprising plans, estimates, titles, profiles, lines and grades, inspection of paving, and all other engineering relating to the department	912 30
Sidewalks,—comprising profiles, lines, grades, measurements, titles, costs, and assessments	830 40
Bridges and Grade Crossings,—comprising surveys, plans, profiles, estimates, lines and grades, etc.	171 20
Water Works,—comprising lines, grades, locations of mains, gates, hydrants and services, and other matters relating to the department	530 50
Public Grounds and Parks,—comprising surveys, plans, estimates, profiles and grades, including laying out of parks and playgrounds and boulevards	430 30
Public Buildings,—comprising surveys, estimates, lines and grades, and other work relating to construction and laying out of grounds	95 10
Street Numbering,—comprising locations of buildings, plans, and affixing street numbers on houses	153 40
Street Lines and Grades.—comprising establishing of lines, grades, and miscellaneous data given parties for building and grading	270 50
City Survey,—comprising establishing of street lines, acceptance plans, and miscellaneous survey work for city map, etc.	730 30
Middlesex Registry,—comprising copying of plans, and abstracts from deeds and examination of titles filed at East Cambridge, also tracings of street acceptance and sewer taking plans filed for record,	190 20
Private Corporations, Railway, Telephone, Electric Light and Gas Light Companies,—comprising grades, plans, profiles, and office notes, locations of poles and conduits	135 10
Stone Bounds,—locating and setting	71 40
Office Work,—comprising records of all locations, indexing, typewriting, bookkeeping, calculations, reports, and general draughting	810 50
Miscellaneous Work,—comprising preliminary surveys, designs, sketches, etc., relating to various schemes for different committees	140 20
Vacations, Holidays, and Sickness	508 84
Total	<hr/> \$7,296 34

Office Records and Value of Instruments.

Number of survey note-books, sewer permit books, deed books, calculation books and record books,—three hundred and forty.

Number of plans, including sewers, highways, parks, house lots, etc.,—seven thousand and fifty.

Value of field instruments, tools, and office instruments, \$2,500 00

The number of assistants employed during the year on engineering work varied from seven to ten.

The total cost of maintaining the Engineering department

(City Engineer account) since it was established (1872-1913, both years inclusive) has amounted to \$319,791.00.

General Work. Under the title of Engineering Department a varied line of city work is carried on each year, including the designing and superintending of the construction and maintenance of sewers, parks, playgrounds, boulevards, bridges, and other public works as may be authorized; the making of such surveys, plans, profiles, estimates, descriptions of property, specifications and contracts for work as the mayor, board of aldermen, or any committee or department may require; the custody of all plans and data relating to the laying out, widening or discontinuing of streets, the computing of all sewers, sidewalk and street betterment assessments, and the recording and indexing of all work under the control of the city engineer.

The city ordinances require that the city engineer must be consulted on all work where the advice of a civil engineer would be of service; and no structure of any kind can be placed upon, beneath, or above any street by any department of the city, corporation, or individual, until a plan is furnished showing the location and approved by him.

During the year the department made plans and established grades for the acceptance, under the betterment act, of twenty-two new public streets, a total length of 8,785 feet (1 2-3 miles).

Plans have been made of private streets for acceptance as public streets during the year, as ordered, but not as yet made public, and there are plans for acceptance of eleven other private streets, previously made, on file in the office that for various reasons are still unaccepted as public ways.

Stone bounds have been reset in Portland cement concrete at a number of street intersections and angles to define and preserve the true lines of public streets, and this work should be continued as much as possible each year. These bounds are also of great convenience in establishing permanent "Bench Marks" throughout the city for giving grades.

On account of the appropriation but four new bounds were set in 1913, three on Wesley Park, westerly side, at end of street; one on easterly side of Springfield street at Somerville-Cambridge boundary line.

In the report of 1907 a table was compiled from old reports, maps, and office notes, showing the location of stone bounds, as set, for defining street lines and angles; the year when set, and whether existing or removed at the present time, from 1860 to 1907, inclusive, and in the following reports a list of bounds set during each year. There are at the present time 576 stone bounds set in the city for defining street lines.

The total length of public streets in the city is 79.662 miles, and private streets 19.40 miles. (See table in this report for location, width, length, etc.)

Streets Accepted as Public Highways in 1913, under the Betterment Act.

Total	(1.664 miles)	8,785

Length of Public Streets in Each Ward.

	Miles.
Ward one	9.745
Ward two	8.936
Ward three	7.560
Ward four	9.797
Ward five	12.100
Ward six	13.150
Ward seven	18.374

Total length of public streets in the city . 79.662

A number of street names have been changed and plans made showing a re-numbering of the buildings, and all old numbering plans revised, new houses plotted, and numbers assigned.

Some of the old main thoroughfares should be re-numbered throughout their entire length, so as to eliminate half numbers and letters now being used, as many of these old streets have outgrown their original numbering.

There are many streets, avenues, courts and places in the city of the same or very similar name, which should be changed to prevent the confusion and inconvenience now existing.

Water street, between South street and the freight yard on the Fitchburg division of the Boston and Maine railroad, a

length of 372 feet, has been paved with granite blocks, averaging four and one-half inches in depth, grouted with pebbles and cement, laid with a sand and cement cushion one inch in thickness, on a Portland cement concrete base five inches in thickness.

This pavement was laid by contract at the following cost:—

James H. Fannon, Somerville, contractor:—

Laying 849 square yards granite block paving, concrete base	\$2,462 10
Extra work, relaying freight track	80 68

Total cost of work	\$2,542 78
------------------------------	------------

Average cost, \$2.90 per square yard for cement-grouted granite block pavement laid on concrete base, including all incidental work.

The easterly side of Elm street between Oak square and Cutter square (excepting the area used by the street railway), a length of 3,540 feet, has been constructed with a Portland cement concrete base, five inches in thickness, and a bituminous wearing surface two and one-half inches in thickness; the excavation, concrete base and granite block brow-stone being done by contract, and the wearing surface by the city's highway department.

The street railway tracks were relaid by the company at their expense, the old granite block pavement between the tracks being grouted with Portland cement.

This work completed cost as follows:—

James H. Fannon, Somerville, contractor:—

Excavation and laying 4,890 square yards concrete base	\$4,397 83
Laying 3,540 linear feet granite block brow-stone	592 97
Extra work, resetting curbstone, etc.	116 24

Cost of work done by contract	\$5,107 04
---	------------

City, Highway Department (day labor):—

Constructing 4,900 square yards bituminous wearing surface:—

Labor, teaming, rolling	990 58
Stone used (trap rock)	1,286 57
"Tarvia" used	972 57

	\$3,249 72
--	------------

Total cost of work	\$8,356 76
------------------------------	------------

Average cost, \$1.70 per square yard for street construction with bituminous wearing surface laid on a concrete base (where car tracks exist).

Tufts street between Washington street and Cross street, a length of 980 feet, has been constructed with a bituminous wearing surface one-half inch in thickness on a Portland cement concrete base five inches in thickness, at the following cost:—

James H. Fannon, Somerville, contractor:—

Excavation and laying 2,933 square yards concrete base	\$2,463 72
Extra work re-laying crossing	60 33

Cost of work done by contract	2,524 05
---	----------

City, Highway Department (day labor):—

Constructing 2,900 square yard bitu- minous wearing surface:—	
Labor, teaming and rolling	291 56
Stone used (trap-rock)	93 80
“Tarvia” used	79 85
Resetting curbstone	255 44

	\$720 65
--	----------

Total cost of work	\$3,244 70
------------------------------	------------

Average cost, \$1.10 per square yard for street construction with bituminous wearing surface laid on a concrete base.

Temple street between Broadway and Derby street, a length of about 990 feet, has been constructed with trap-rock, using “tarvia” for a binder, the work being done by the Highway department, day labor, at the following cost:—

Constructing 4,180 square yards pavement:—

Labor, teaming, rolling	\$2,021 08
Stone used (trap-rock)	1,528 19
“Tarvia” used	844 06

Total cost of work	\$4,393 33
------------------------------	------------

Average cost, \$1.05 per square yard for street construction with bituminous wearing surface (using old street material for sub-grade).

The total length of permanent paved streets in the city amounts to 10.9 miles.

The policy recently adopted of permanently constructing the city's main thoroughfares in preference to side streets has commenced to show good results.

In a few years' time, by the continuation of permanently constructing the remaining roadways, namely, on Broadway (Winter Hill to Arlington line) sections of Summer, Elm, Washington and Beacon streets, and some of the principal cross-town streets, the city will have main thoroughfares that will compare favorably with any city in the state.

Eight new streets have been constructed during the year, with a “tarviated” trap-rock surface, a length of 4,152 feet (0.79 mile) costing \$14,577.92, where betterment assessments have been levied on the abutting property amounting to \$7,135.40; the average cost of this construction being \$1.18 per square yard, which includes the cost of granite paved gutters.

One street has been constructed, “tarvia” being used as a binder, a length of 993 feet (0.19 mile) where no assessment was levied.

One street and part of another has been constructed with a concrete base and a bituminous wearing surface, a length of

2,749 feet, and one street paved with granite blocks on a concrete base, a length of 372 feet.

Five streets have been re-macadamized with a "tarviated" surface, a length of 3,102 feet (0.60 mile) and six streets repaired, a length of 5,753 feet (1.09 miles).

Land has been taken and the roadway widened on Main street at the Somerville-Medford boundary line, and the construction work should be continued on the southwesterly side of this street, its entire length, making a uniform width of roadway.

Many times in the past, streets—newly constructed or where an improved pavement is laid—are torn up and excavations made a short time after being built, when the changes should have been made considerably in advance of the new street construction work.

Previous notice of the city's intended street improvements should be given the various departments and interested private corporations and ample time allowed for making all extensions and repairs of underground work; and no permission should be granted to cut any newly constructed street, except for emergencies or under special conditions, where a sufficient sum of money is paid the city for damages.

Table of Street Construction.

	Square Yds.	Miles.
*Streets paved with granite blocks	99,815	4.12
Streets paved with Hassam pavement	36,802	1.80
Streets paved with asphalt	10,410	0.73
Streets paved with vitrified brick	13,564	0.64
Streets paved with bitulithic	14,639	0.88
Combination pavement (concrete base with bituminous top)	32,652	2.69
Streets macadamized ("tarvia" bound)		13.91
**Streets macadamized (water bound)		52.24
Streets graveled or unimproved		22.05
Total		99.06

*Also 31.9 miles (single track) electric railway paved with granite, asphalt, bitulithic.

**Includes 3.29 miles boulevard and 1.16 miles state highway.

Lines and grades have been given for setting 12,182 linear feet (2.307 miles) of new edgestone, and 1,005 square yards (0.231 mile) of new brick sidewalks, and 17,147 square yards (4.063 miles) of granolithic sidewalks have been laid, and measurements taken for computing assessments; 0.68 of a mile of edgestone has been reset, and 2,700 square yards of brick sidewalks relaid, also on private streets 1.615 miles of granolithic sidewalks have been laid by private parties.

In connection with setting edgestone, 3,907 square yards of new paved gutters have been laid, at an average cost of

Table Showing Sidewalks Constructed (not exceeding one-half cost assessed on abutters) in 1913.

1891	May 1	1700.00

\$2.25 per square yard, and a number of driveways and crossings have been constructed, all requiring lines, grades, and measurements.

(See tables for cost of new work, 1913, and total lengths of sidewalks constructed in the city to date.)

The average cost for the year has been as follows:—

For setting edgestone with gravel sidewalk	\$1.02 per linear foot
Laying brick sidewalk, complete	1.30 per square yard
Laying granolithic sidewalk, complete	1.57 per square yard (city, day labor)
Laying granolithic sidewalk, complete	1.41 per square yard (contract)
And the cost of materials used, furnished by contract:—	
Edgestone (straight) delivered at work	0.55 per linear foot
Edgestone (circle) delivered at work	0.73 per linear foot
Bricks delivered at work	13.15 per M.
Cement (Portland) on cars	1.26 per barrel (net)
Sand and gravel on cars70 per cubic yard (average)
Trap-rock delivered on work	1.42 per ton (average)

In sections of the city where brick sidewalks have been laid many years, and must necessarily be relaid on account of deterioration and unevenness, granolithic should be substituted in the place of brick.

Miles of Edgestone, Gravel, Granolithic and Brick Sidewalks in Each Ward.

	Edgestone.	Gravel Sidewalk.	Brick Sidewalk.	Granolithic Sidewalk.
Ward one	17.845	4.715	12.115	2.193
Ward two	14.703	6.901	6.710	1.092
Ward three	14.085	1.559	11.572	0.954

Ward seven	25.497	7.663	8.387	11.295
	<hr/> 130.526	<hr/> 35.181	<hr/> 71.705	<hr/> 28.018

A considerable quantity of stone still remains on the two parcels of ledge property owned by the city, situated in West Somerville, that can be quarried and used for the foundation of streets, and on sidewalk work, to the city's advantage. By using the stone from these two ledges and purchasing trap-rock, the city will have a sufficient supply of good road material for a number of years to come.

Lines and grades have been given for laying 6,651 linear feet of new city water mains, varying in size from two inches to twelve inches in diameter. Two hundred and thirty new house services, many gates, hydrants, water posts and blow-

offs have been located and recorded, sketches and plans made showing the same, and the large water-works wall maps corrected to date; also a large number of old water services where new meters were installed have been located and recorded.

A set of block plans should be made covering the entire city area from accurate surveys made during the past twenty-five years, and compared section by section with the deed dimensions and areas recorded in the assessors' department, and in this manner the correct areas of land determined.

This set of plans would show the area and dimensions of each lot, all houses and other buildings, sewers, catch basins, house drains, water services, gas mains, underground conduits for wires, street lights, street railway tracks, etc., and be of great value to many departments. Five of these sectional plans have already been made. A separate appropriation should be made for completing these plans.

Plans have been made and photographs taken where accidents have occurred on the city work, or where boundaries were in dispute, special plans and data prepared for the city solicitor's use in court cases and hearings.

All plans of estates in Somerville recorded at the Registry of Deeds, East Cambridge, including land court plans, have been copied, also titles examined, abstracts from deeds made for the purpose of assessments, and the proportional part of the cost of new work computed, and the schedules of assessments made out showing the property owners. Copies have been made of all city plans where land has been taken for highways or sewers, and these have been filed and recorded at the Registry, East Cambridge, as required by law.

Plans have been made by the various companies and corporations, and filed in the city engineer's office, showing the locations of gas mains, poles, tracks, and conduits in this city, which have been granted by the board of aldermen during the year; and the work of placing overhead wires in conduits underground and removing all poles from the streets should be extended as rapidly as possible.

At the present time, there are underground in the city's streets 16.2 miles of telephone conduits, 7.504 miles of electric light conduits, 1.4 miles of electric railway conduits, and about 6.8 miles of underground conduits used for the city's wires.

The Cambridge and Charlestown gas companies have extended their mains in the city's streets 3.84 miles the past year.

Heavy explosions have occurred in the city's streets from underground conduits, owned by private corporations. The city ordinances should be so changed that in the future all underground work constructed by these companies should be rigidly inspected by a competent man employed by the city, so as to eliminate as far as possible faulty construction.

The Boston Elevated railway has made extensive repairs in its roadbed in this city during the past year, replacing the old tracks with new and heavier rails, filling the space between the ties with Portland cement concrete, and grouting the granite block pavement with cement in sections of Elm street and Washington street.

Where double car tracks have been laid in streets, leaving narrow roadways on either side, it is impossible to maintain a macadam surface, even at a heavy expense yearly, and these streets should be permanently paved with a suitable pavement, adapted to the character of the surroundings and amount of traffic and conditions encountered.

There are 31.9 miles of electric railroad (single track location) laid at the present time in the city's streets; and in watering the main thoroughfares, time and expense could be saved by utilizing this trackage for running street-sprinkling cars, the same as operated in a number of cities throughout the state.

The latter part of the year a City Planning Commission was appointed and probably an interesting report will be issued during the coming year.

Bridges and Grade Crossings. An act of the legislature was approved April 5, 1911, authorizing the city of Somerville and town of Arlington, any time within five years, to lay out, construct, and maintain a public way and bridge over Alewife brook, connecting Woodstock street in Somerville with Henderson street in Arlington, subject to the approval of the Metropolitan Park Commission, and assess betterments for the same. In June the street was laid out as a public way and the bridge constructed over Alewife brook, the cost being equally divided between Somerville and Arlington.

The design is an elliptical arch bridge, reinforced concrete construction, fifty-eight feet long, arch span thirty feet, width of arch thirty-one feet, four inches, rise six feet, six inches, under side of arch at centre ten feet, two inches above general elevation of water in brook, thickness of arch at centre ten inches, greatest thickness of arch two feet, one inch, and the total concrete in the structure amounts to 300 cubic yards.

The roadway is twenty feet wide and each sidewalk five feet in width. The bridge was built complete by the Hanscom Construction Company, at a cost of \$6,565.00.

Including the cost of all engineering services and incidentals the city's half-cost amounted to \$3,500.00.

This bridge was dedicated with appropriate exercises October 16, 1913.

Grade Crossings Account.**STATEMENT OF EXPENSES, 1913.**

Account overdrawn, 1912	\$17,413 93	
Paid for damages to property, and land and buildings taken	48,665 58	
Paid various parties for appraisal of prop- erty and damages	488 01	
Photographs, plans and advertising	12 00	
		\$66,579 52
CREDIT.		
Received from Commonwealth of Massachusetts, Bos- ton & Maine Railroad (lessee), and Boston Elevated Railway, apportionment of cost by decree of court and auditor		\$63,549 59
		\$3,029 93

The work of abolishing grade crossings on the Fitchburg division of the Boston & Maine railroad in Somerville is progressing; the work has been practically completed at the Somerville avenue, Webster avenue, Dane street and Medford street crossings.

At Medford street, an automatic pump is to be installed for removing storm water from the subway under the steam railroad tracks, and discharging into a city sewer at a higher elevation—this means of disposal of water being authorized by an act of the legislature.

Probably work will be commenced at the Park-street crossing the coming year.

The construction work for the elimination of these dangerous grade crossings will be continued until completed as decreed by the court, and the total cost of the work, as completed, will be apportioned as follows: The steam railroad company sixty-five per cent.; the state, twenty-five per cent., and the city ten per cent., except at the Somerville-avenue and Webster-avenue crossings, where the steam railroad and the city pay the same percentage of cost as at other crossings, the state twelve and one-half per cent., and the street railway company twelve and one-half per cent.

The plans for abolishment of these crossings were described in previous annual reports, and at two streets the plan adopted is the same as proposed by the city's scheme presented to the commission; at the other three streets the plan adopted is just the reverse of the city's scheme, as presented.

City Boundary Lines. A number of the stone boundary markers, defining the division lines between Somerville-Cambridge and Somerville-Medford, are out of plumb and should be reset; one has been cut off flush with the cellar floor of a new building on Springfield street and a new reference bound placed on the easterly line of the street.

A contemplated change in the boundary line between Somerville and Medford is under consideration by both cities, and probably an exchange of territory can be made that will be equally advantageous.

SEWER DIVISION.**Construction Account.****STATEMENT OF EXPENSES, 1913.**

Constructing "separate system" sewers (assessments levied)	\$311 47	
Constructing "combined system" sewers (assessments levied)	1,213 92

		<hr/>
Balance unexpended		\$4,391 68

The greater part of the new construction work has been done by contract, and the remainder by the city employing day labor where old structures were to be remodeled or replaced by some difficult construction work.

All materials have been furnished by the city, and the prices paid for supplies, for the season, have been by contract with the lowest bidder as follows:—

Sewer pipe (3 ft. lengths)	70 $\frac{1}{8}$ % discount from list price on cars
Sewer pipe fittings	71 $\frac{1}{8}$ % discount from list price on cars
Portland cement per barrel	\$1.26 on cars (net)
Sand per cubic yard	\$0.69 on cars
Sewer bricks, per M.	9.40 on cars or at yard
Iron manhole and catch basin castings, per hundred weight	1.31 on cars
Catch basin traps, each	1.70 on cars or at foundry

A number of sewers have been constructed as petitioned for in various sections of the city, or as considered necessary for the improvement of the drainage system, and portions of the cost of construction assessed on the abutting estates under orders passed by the board of aldermen.

Short lines of storm drains and overflows from congested

sewers have been constructed during the year in the most needed districts.

The "separate system" sewers (those built for house drainage only) have been extended in a number of streets in the older districts, and this system should be extended yearly until all the flooded districts in the city have two complete systems of drainage, the old sewer to be used for storm and surface water. The city pays the entire cost of these new sewer extensions for house drainage, and wherever constructed the house plumbing should be changed where necessary; and the house drains and conductor, or surface water drains, re-connected with both systems as soon as possible.

Rather a novel method of construction was employed in extending a "separate system" sewer main about 1,430 feet in a section of Broadway and Cross street,—a twelve-inch vitrified clay pipe with Portland cement joints being laid in the invert of an existing three and one-half foot storm drain structure (built in 1898) the storm water to a certain depth flowing in newly made channels constructed with Portland cement on either side of the twelve-inch pipe sewer which in times of heavy storms is completely submerged—a number of thousand dollars being saved by this method of construction; whereas, an open cut of about thirteen feet in depth would otherwise have had to be made in a narrow, asphalt-surfaced street where double car tracks exist and many underground pipes and conduits would have been encountered as well as a large amount of rock excavation and caused great inconvenience to travel and business.

New sewers and drains were constructed during the year varying in size from eight-inch pipe to thirty-inch pipe, in the following localities:—

"Separate system" sewers in:—

Aldrich street,—(easterly sidewalk) Pearl street to Flint street.

Broadway,—(laid in storm drain) Garfield avenue to Cross street.

Broadway,—(southerly sidewalk) Glen street to Cutter street.

Brook street,—Cross street to Glen street.

Cross street,—(laid in storm drain) Broadway to Pearl street.

Cutter street,—Broadway to Patten court.

Delaware street,—(southerly sidewalk) Aldrich street to angle in street.

Flint street,—(both sidewalks) Aldrich street to near Cross street.

Fremont street,—East Albion street, northeasterly.

Glen street,—Brook street to near Broadway.

Pearl street,—(southerly sidewalk) Pearl street to Aldrich street.

Rush street,—Brook street to Broadway.

Vermont avenue,—Mystic avenue to near Pennsylvania avenue.

Virginia street,—(both sidewalks) Aldrich street to Jasper street.

“Combined system” sewers in:—

Burnham street,—Broadway to near Powder House Boulevard.

Central road,—Sycamore street to near Central street.

Storm drains in:—

Bartlett street,—Vernon street to near Robinson street.

Elm street,—Davis square to Chester street.

Pearl street,—(southerly sidewalk) Cross street to Aldrich street.

Private lands,—Hall avenue to Francesca avenue.

Vermont avenue,—Mystic avenue to near Pennsylvania avenue.

Vernon street,—Glenwood road to Bartlett street.

Storm relief overflows at Davis square and Pearson road.

Summary of Work. Twenty-three new sewers and drains have been constructed during the year, a total length of 10,608.1 linear feet (2.00 miles) at a cost of \$24,011.55; plans have been made showing these sewers in detail, and assessments levied on a portion of them, amounting to \$1,716.21. (See tabular statement of sewers and drains for 1913, showing itemized statement of work and cost.)

The total length of the city’s drainage system is 107,873 miles; 30.103 miles being on the “separate system” and 8.74 miles of storm drains, and the entire cost of construction has amounted to about \$1,306,901.00, exclusive of the amount paid to the state for assessments for the construction of the North Metropolitan sewerage system.

Thirty-four new catch basins have been constructed in the highways during the year, at an average cost of \$61.50 per basin, and eight removed, making a total of 1,704 basins in the city for street drainage purposes, constructed and maintained as follows:—

By the city (sewer division):—

Located in streets and subways	1,649 basins
Located in city boulevard	30 “
Located in parks (13), other city lots (12)	25 “

Total catch basins constructed and maintained by city 1,704

Metropolitan Sewer Connections. All of the city's connections with the North Metropolitan state sewerage system are in good condition. No new main connections have been required.

Wherever the city's "combined system" sewers are connected with the Metropolitan sewer the flow is automatically regulated so that in times of storms the connection closes and the discharge continues through the old channels to the rivers; the "separate system" connections are always in operation under all conditions. The locations of the connections of the city's mains with the state sewer are shown in the 1912 report.

At the Somerville-avenue-Poplar street connection with the Metropolitan sewer, records compiled from an automatic recording clock placed in the "regulator chamber" on the combined system show this outlet to have been cut off and completely closed an average of 366 hours per year and partly closed 400 hours per year, for the past fourteen years. In the 1912 report a table shows the cut-off as recorded each year.

The city's assessment for the Metropolitan sewer system for the past year was \$44,811.87 on construction account and \$24,913.50 for maintenance, and the total amount paid the commonwealth of Massachusetts for this state sewer has been \$957,146.19 (1892-1913, both years inclusive). The total length of the Metropolitan sewerage system mains running through the city amounts to 3.475 miles.

New Work. The separate system sewers should be extended in the old sections of the city each year, as the appropriation will allow. The construction of the storm drainage system commenced in the vicinity of North Somerville, where buildings and new streets are being rapidly constructed, should continue, the outlet for this district being through the city of Medford into Mystic river; and in connection therewith, the boundary line between Somerville and Medford should be changed in the vicinity of Pearson road and Boston avenue, so that this outlet, Two Penny brook, can be improved by Somerville, and the covered channel extended to the Boston & Maine railroad, to conform with the work already done within the present city limits.

A large storm overflow drain has been contemplated for some time at the East Cambridge line, across private lands from Somerville avenue, discharging into the head of Miller's

river; and this matter of improving the city's drainage system should be carried out without further delay.

Some agreement should be made whereby a storm drain and sewers may be constructed in the valley along the location of the Southern division of the Boston & Maine railroad, between Gilman square and Cedar street, this being the natural outlet for a number of the city's streets and house lots which at the present time have either very poor or no means of drainage, and would abolish two syphons under the railroad tracks.

The proposed storm drain would be of great benefit to the railroad company, and give relief to sections of the city's over-charged drainage system during heavy storms by diverting through this proposed conduit the proper drainage area which is now flowing in other directions.

Maintenance Account.

STATEMENT OF EXPENSES, 1913.

Maintenance of sewers, including cleaning and flushing (107.9 miles)	\$3,291 05	
Maintenance of catch basins, cleaning and flushing (1,704)	8,567 24

Total credit		\$14,170 49
Balance unexpended		05
Value of tools and property on hand used in maintenance of sewers		\$1,500 00

A permanent force of men and teams are kept continually at work flushing, cleaning and repairing the city's drainage system, catch basins, etc., the expense necessarily increasing yearly as lengths of sewers, drains, and catch basins are added to the system, and the distance increased to the dumps.

About 5,525 cubic yards of deposit have been removed from the catch basins and sewers during the year, at an average cost

of \$1.55 per cubic yard, and the average cost per mile for cleaning and flushing the drainage system, including catch basins, has amounted to \$109.90.

Fifty-one catch basins and fifty-four manholes have been repaired and grade or line changed.

A number of repairs have been made on some of the old sewers, alterations made in the outlets, and overflows and extra manholes built for the purpose of improving the system.

Three hundred and fifty permits have been issued to licensed drain layers for connecting buildings with the main sewers, forty-one being for repairs or alterations; all of the work being done under the supervision of the city's inspector.

At the present time there are ten persons licensed as drain layers by the city and under bonds, for the purpose of laying these private drains.

There are to date about 15,349 private drain connections with the city's drainage system.

During the year the sewer department has done considerable miscellaneous work for other city departments and outside companies where alterations and new construction work have been required, furnishing materials and labor, and being reimbursed for the same to the amount of \$470.49.

PARKS AND PLAYGROUNDS DIVISION.

At the present time there are twenty separate parcels of land located in all parts of Somerville, used for parks and playgrounds, amounting to 75.0 acres, and also a boulevard about one and one-third miles in length maintained by the city. Included in this total area are playgrounds where the land is owned by private parties and leased to the city, for use, in the following localities: On Fellsway east, 2.5 acres; Knowlton street, 1.5 acres; Tufts College land, 4.6 acres; and the cemetery lot on Somerville avenue, .7 acre. Satisfactory arrangements have been made during the past year whereby the city has the use of Tufts College playfield during the summer vacation months.

Four of these larger pleasure parks are famous historically.

There are eight baseball "diamonds" and three football fields in use and under the city's supervision, as well as numerous smaller playgrounds, on which are located an outdoor gymnasium, running track, tennis courts, and various kinds of athletic apparatus for recreation and rest, where children can play and enjoy themselves and are safe from the dangers of a thickly-settled city.

These areas are constantly in use by the many athletic teams, the games being arranged for and regularly scheduled on the various grounds throughout the season, about three

hundred ball games being provided for by schedule the past year.

The larger areas have been policed by regular officers from the police department, when required, the expense being paid from the police appropriation; trees and shrubs added to the various grounds, and bulbs, plants, and flowers furnished in their seasons, and during the winter time ponds flooded for skating when the weather was favorable.

This area of parks and playgrounds compares favorably with other cities, Somerville being very small in area and the most densely populated city in the state, averaging about 20,000 in population to a square mile.

At Lincoln park shower-baths have been installed, at Mason street playground and Somerville field tennis courts constructed, and granolithic sidewalks have been constructed on a section of Powder House boulevard.

On the easterly end of Central Hill park a new Public Library building has been completed and the surrounding grounds should be laid out and re-graded, permanently, according to a well-designed and harmonious plan.

On several of the playfields concrete buildings should be constructed in place of some of the old wooden structures, additional apparatus provided on some of the principal parks and playgrounds for the smaller children's pleasure, where a regular park employee can have the care of the same, and some of the smaller playground areas should be enclosed by wire fencing for the protection of children.

At the westerly end of Lincoln park a wading pool having an area of not over 3,000 square feet could be constructed, with a concrete bottom and side walls, at a small cost. This would be a source of much enjoyment to a very large number of children in the immediate vicinity, and maintained exclusively for their use.

In certain localities of the city well-lighted playgrounds, during the summer evenings, should be maintained for the young men and women working in the factories daily.

The city has become so densely populated that portions of some of the larger park areas should be utilized for public recreation and physical training purposes; Broadway park (northerly end), ball field and children's playground; Central Hill park, tennis courts and children's playground; Tufts park, children's playground, gymnastic apparatus, etc.

The Playgrounds Association has continued its good work in the city, and funds contributed by citizens and a sum of \$2,500 appropriated by the city for the special equipment of grounds and supervision of playfields during the summer months have been expended under the direction of the school committee.

Certain areas were used in the city's parks, playgrounds, and schoolyards, which had been equipped with swings, sand boxes, and various kinds of gymnastic apparatus, and instructors were employed during the months of July and August. Many children enjoyed themselves at these outdoor kindergarten schools, while the larger boys were instructed in baseball, basket ball, and other games, and in the use of gymnastic apparatus, teams being formed and athletic competitions held between the various teams, and at the end of the summer season a carnival was held at the city's new athletic field and an exhibition given on Central Hill park.

Probably still better results in this city could be obtained by establishing a system with a permanent director of athletics and gymnastics who would have charge and instruct in every form of athletics and recreation; including all sports and games for the high schools, grammar schools, and all others using the city's playfields and buildings.

The new "Somerville Field" located in the northwesterly part of the city, bordered by Powder House boulevard and Alewife brook, has proven to be very popular with the various clubs and athletic teams in our city, and a number of outside school teams and associations have had the use of this field. The income the city has received during the past year amounted to \$489.00.

Some small improvements have been made during the year, but the temporary shower-baths and sanitariums under the grand-stand should be placed in a permanent building, a section of the grand-stand covered, and progress made in the development of the large ungraded portion of the field; an appropriation should be made annually for this purpose.

If this area is laid out and completed as originally designed, Somerville will have the finest recreation field owned by any city, and would include areas for baseball, football, basket ball, tennis, cricket, croquet, playfield for children, out-door gymnasium, running track, swimming pool, and boating and skating on the brook, a concrete grand-stand and field houses, equipped with shower baths, lavatories, dressing rooms, lockers, etc. In the 1910 report a plan was published showing the proposed laying out.

An area owned by the city, and known as the Collins and Ham ledge property, located on Clarendon Hill, near the Cambridge boundary line, might be developed in the future into a pretty pleasure park, similar in nature to the Powder House park; also the Holland-street ledge property, owned by the city and situated in West Somerville, could be developed in the future by laying out a portion of the area for streets and house lots, and the remainder used for a children's playground.

There are a number of vacant lots in the city owned by

private parties, large enough for the purpose of establishing recreation grounds and breathing spaces, which undoubtedly could be obtained for short-term leases by payment of the taxes to the owner of the property, and be of great benefit to a large number in the congested parts of the city.

With all these various parcels of land referred to properly developed in the future as parks, playgrounds, and resting places, the city will be amply provided for in this line, and second to none in the state.

The city's assessment for Metropolitan parks and boulevards for the year 1913 amounted to \$18,242.95 on construction account, \$17,914.65 being the proportional cost for maintaining the same; in addition to this the city's special assessment for the Charles River Basin construction and maintenance amounted to \$6,349.56; for the improvement of Alewife brook and maintenance of same, \$1,222.50; and for the maintenance of Wellington bridge across Mystic river, \$631.31.

The total of the above assessments amounts to \$44,360.97, being Somerville's proportional payment to the state on account of the Metropolitan park system for the year 1913.

The total assessment paid to the state for parks and boulevards amounts to \$47,836.91, January 1, 1914, and the only length of state boulevard at present constructed in this city consists of seven-tenths of a mile of double roadway, located in the easterly part of the city, and extending between Broadway and Mystic river, and four-tenths of a mile bordering Mystic river at the West Medford line.

In the 1910 report a table was published showing the area, year acquired, cost of land, cost of construction, present valuation, etc., of all city parks and playgrounds.

PARKS AND PLAYGROUNDS.

Maintenance Account.

STATEMENT OF EXPENSES, 1913.

(Playgrounds.)		(Parks.)
	Broadway Park (15.9 acres) :—	
\$215 82	Maintenance of grounds, pond, and general care of property, labor and teams	\$818 26
	Trimming and spraying trees	38 13
	Tools and supplies	15 95
	Repairing tools and property	91 59
	Plants, flowers, bulbs, etc.	194 80
\$215 82		\$1,158 73
	Broadway Parkway (2.0 acres):—	
	Maintenance of grounds, labor and teams	\$123 00
	Plants, flowers, etc.	50 00
		\$173 00

(Playgrounds.)

(Parks.)

	Central Hill Park (13.1 acres):—	
\$51 30	Maintenance of grounds and general care of property, labor and teams	\$919 98
	Trimming and spraying trees	25 60
	Tools and supplies	40 15
	Repairing tools and property	116 05
	Plants, flowers, bulbs, shrubs, etc.	308 30
<hr/>		<hr/>
\$51 30		\$1,410 08
	Lincoln Park (8.3 acres):—	
\$650 40	Maintenance of grounds and general care of property, labor and teams	\$663 21

Appended Table.

Annexed to this report is a table giving names of all streets in the city, public and private, lengths, widths, and the total mileage; in the 1910 report tables were published showing old names of certain streets as formerly known, and names of public squares in the city.

Respectfully submitted,

ERNEST W. BAILEY,
 City Engineer.

TABLE SHOWING THE LOCATION, LENGTH AND WIDTH OF PUBLIC AND PRIVATE STREETS.

Public, 79,662 miles (includes 3,294 mile's boulevards and 1.16 miles State Highway); private, 19,400 miles.

Total length of streets in the city, 99,062 miles.

REPORT OF THE STREET COMMISSIONER.

OFFICE OF THE STREET COMMISSIONER, }
CITY HALL, SOMERVILLE, January 1, 1914. }

To His Honor, the Mayor, and the Board of Aldermen:—

Gentlemen,—I most respectfully submit the thirty-eighth annual report, containing a brief summary of the principal work performed by the highway department during the year 1913, with recommendations for necessary improvements and additions for the coming year.

This department has charge of the construction, alteration, repair, maintenance, and management of ways, streets, sidewalks and bridges, also the setting out and care of shade trees, the suppression of gypsy and brown-tail moths, elm-leaf beetles, street watering and oiling, and the collection and disposal of ashes, garbage and refuse.

Highways Maintenance.

A large amount of this appropriation is expended in the running and operating of the department, thus leaving a small amount for resurfacing streets. By the construction of permanent paving on the main streets and with the good material excavated from them, many of our side streets could be resurfaced with this material, with tarvia or heavy oil for a wearing surface, at a small expense.

Although the mileage of streets to be cared for has steadily increased, the hours of labor shortened and wages increased, there has been practically no increase in the highways maintenance appropriation. The old method of patching streets with loose crushed stone has been abandoned, and the more modern way of patching with stone, gravel, tar or oil mixed, has been adopted with good success.

On all side streets constructed or resurfaced, tarvia was used for a wearing surface.

The average cost of macadam and tarvia construction on side streets was \$1.18 per square yard, which includes granite paving block gutters three feet wide.

Highways Construction.

The department is doing its utmost to meet the demands for good streets, and the improvements made the last few years show good results and approval from the tax-payers.

With the advent of the automobile and auto truck, streets must be constructed with some kind of permanent paving, and after construction, should receive careful attention at all times.

We must not lose sight of the fact that smooth paving, which is pleasing to the automobilist, is more or less slippery for horses. What is satisfactory to one is unsatisfactory to others.

The average cost of macadam and tarvia on a concrete base was \$1.70 per square yard. A contractor laid the concrete at \$.84 per square yard, and the department laid the tarvia top. On Tufts street, a contractor laid the concrete base at \$.84 per square yard, and the department laid a pea stone tarvia top. The total cost was \$1.10 per square yard. These prices include the resetting of edgestones, and repairing sidewalks where needed.

Street Cleaning.

All the citizens could help keep the streets clean by not throwing or sweeping rubbish into the streets, and by using a little care when they set their refuse barrels on the sidewalks for collection, by seeing that the material is so placed that it will not blow out of the barrels, and I would thank them for so doing.

As recommended in the report of 1910, a single team and helper will be placed the coming year in each ward of the city, and a special effort will be made to keep the streets clean.

What the department should have is a flushing or pick-up machine that could be used nights to keep the squares clean. The scarcity of dumps increases the cost of this branch of the work.

Street Sprinkling.

Good work was done in the oiling of our streets by the horse-drawn automatic pressure oilers. With the purchase of an auto truck oiler the work could be done more economically.

This year we used:—

58,544 gallons of Standard No. 4,
 64,065 gallons of Speare's Tasscoil,
 6,512 gallons of "Dustoline,"
 6,901 gallons of Headley's No. 7,
 15,051 gallons of Headley's No. 22,
 25,844 gallons of Barrett's "Tarvia B,"
 32,174 gallons of Speare's "45 Percent,"
 17,515 gallons of Indian oil,
 19,800 gallons of gas house tar,
 1,300 gallons of Speare's "Asphaltoline."

Each abutter is charged \$.05 per linear foot.

There are several reasons why oil or tar is better than water, namely: the large number of gallons of water saved; dust laid for all times; saving the surface of the streets; less street cleaning; and last but not least, no watering carts on the streets Sundays or holidays.

Stone Crusher.

The crushing plant has been in operation 251 1-2 days during the year. There were 7,698 tons of stone crushed, and 3,135.175 tons purchased during the year.

The steam drill has worked 270 days.

Bridges.

The bridges are in good condition. The abolition of the grade crossings on Medford street and Dane street have been completed and the streets opened to the public, thus doing away with two very dangerous crossings.

All the fences at the bridges and grades that the department cares for, were painted and repaired.

Shade Trees.

The city purchased trees and set out the same on several of the main thoroughfares where trees had died or been removed.

Trees purchased by the abutters were set out by the department and all trees were protected by a wire guard and supported by a pole. The conditions with which the shade trees have to contend in the city is a serious drawback to their growth, namely: electric wires, gas leaks, permanent paving, and insects.

One hundred and fifty-one dead and dangerous trees were removed during the year and 613 new trees set out. Three hundred and thirty-six trees were trimmed. A total of 7,252 street and park trees were sprayed by the gasoline spraying machine.

The leopard moth or borer is increasing in the city, and an appropriation should be made to enable the department to make a fight against this pest which is destroying many of our trees.

Gypsy and Brown-tail Moths.

The moths are under control in our city. Most of the work is done in the winter-time because they are in the tent form and easy to find. The employees cut off the brown-tail nests and paint the gypsy nests.

Seven thousand and eighty-six street trees and 10,815 trees on private property were inspected and cared for by the department.

Steam Rollers.

A new Buffalo-Pitts fifteen-ton steam roller was purchased this year. The old ten-ton roller will be kept for emergency. The No. 1 roller has worked forty-eight days, the No. 2 roller 204 days, No. 3, 23 1-2 days, and No. 4, 160 days. The No. 3 roller is a five-ton roller, and is used for rolling the parks in the spring of the year.

Sidewalks.

As recommended in last year's report an appropriation of over \$20,000.00 was made. The city government could use the same amount the coming year. Great improvement was made

in several sections of the city by the completion of the sidewalks, thus giving a continuous walk.

The average cost of gravel sidewalks with edgestones was \$1.02 per linear foot, brick sidewalks \$1.30 per square yard, and granolithic \$1.57 per square yard; this included the resetting of edgestones. A contractor laid granolithic for \$1.35 per square yard, and where the edgestones were reset, where he laid the granolithic, the average cost was \$1.41 per square yard.

The department received more complaints about muddy sidewalks from pedestrians and abutters where the sidewalks are not completed than from any other source. Where the brick or granolithic sidewalks are not completed it is a serious inconvenience to pedestrians in bad weather, and they should be completed so as to make one continuous sidewalk. The abutters are assessed half the cost for constructing sidewalks.

The department used 10,613 bags of Portland cement.

Snow and Ice.

The department expends a considerable sum from the maintenance appropriation for snow and ice. It is the duty of this department to remove the snow and ice from all sidewalks in front of public buildings and grades, and sand the same when they become slippery, for which the department receives no compensation.

The department has four bridges from which it is required to remove snow and ice, due to the abolition of the grade crossings on the Fitchburg Division. Sand boxes are within easy access for the push-cart men who care for the subways, bridges and squares.

Not many years ago the department could let the snow lie in the several squares and on the main streets, but now the city is built up and progressing, and the snow and ice must be teamed away in order that the squares and main streets may be in proper condition for the conduct of business and the convenience of the general public.

Underground Wires.

The work of burying the wires is progressing slowly. Permits for opening the streets were issued to the Edison Electric Illuminating Company and the New England Telephone and Telegraph Company to connect their underground system on the main streets to the first or second pole on the intersecting streets. On all the new streets, and streets to be constructed, the electric and telephone wires should be laid underground. This would help save the trees and beautify the city.

Accepted Streets.

There were twenty-two streets accepted under the Betterment Act during the year, comprising a total length of 8,785

linear feet. There were eight streets constructed under the Betterment Act, with macadam and tarvia, comprising a total length of 4,152 linear feet, at an average cost of \$1.18 per square yard, which included paving the gutters with granite block paving three feet wide. Edgestones were set before the construction work was begun.

There were nine streets or portions of streets macadamized or resurfaced at a cost of \$2,405.34.

There are 79.662 miles of public streets and 19.4 miles of private streets in the city, making a total length of 99.062 miles. (See table in back of report.)

Sidewalks Maintenance.

The department received a fairly good appropriation for repairing sidewalks this year, but as the cost of repairing gravel sidewalks was charged to this account, and because we have so many miles of gravel or dirt sidewalks to care for, less work was done on the repairing of brick sidewalks. Three thousand five hundred and ninety feet of edgestones were reset, and 2,700 square yards of brick sidewalks relaid.

The more money spent for permanent sidewalks, the less money will be needed for the repair of gravel or dirt sidewalks.

Sanitary Division.

The collection of ashes and garbage increases each year. Take for instance the old nunnery grounds, which about a year ago was vacant land, and where now there are over 152 families from whom to collect ashes, rubbish and garbage. Practically the same condition obtains in the western part of the city.

I think the only solution of the whole problem is for the city to erect large hoppers in the districts where there are no dumps, and haul the material from the hoppers to the dumps with auto trucks. By this system the ashes and rubbish would be removed from the streets much quicker and more economically.

The garbage is teamed to the city yard and sold to the farmers at \$.70 per cord foot, and the combustible material to the incinerator, where it is sorted by a contractor who pays the city \$85.00 a month. For these two items the city received \$10,465.15.

Summary of collections:—

75,194.5	cubic yards of refuse,
3,289	cubic yards of rubbish,
23,079	cubic yards of paper,
1,844.49	CORDS OF GARBAGE.

Two hundred and thirty-seven requests and complaints were received and attended to.

Statement of Tools and Personal Property in the Hands of the Sanitary Division, January 1, 1914.

Horses	\$10,200 00
Carts and implements used with horses	11,204 00
Auto truck	3,375 00
Harnesses and horse clothing	1,970 00
Stable utensils and property	154 90
Tools	158 20
Incinerator stock	103 00
Painting stock	37 56
Stock in harness room	70 80
Stock and tools for horse shoeing	187 78
	<hr/>
	\$27,461 24
	<hr/>

Emergency Call.

The emergency call for this department is 8-8 on the fire alarm system, and is used to call the employees to the stable in case of emergency. The emergency wagon is always ready, day or night, to answer all calls.

Miscellaneous.

Specifications were sent out to all the local and wholesale concerns and bids asked for the furnishing of edgestones, brick, sand, gravel, cement, tools, paving stock, etc. The bids were opened publicly in the office of the mayor, and the contracts were awarded to the lowest bidders, preference being given to Somerville citizens and taxpayers.

The department has been called upon to furnish steam rollers, teams, crushed stone, sand, gravel, cement and ashes to the other departments of the city, being reimbursed for the same.

The department does its own painting, carpentering, blacksmithing, horseshoeing and harness repairing, and maintains shops for these different lines of work at the city stable.

Horses have been purchased, killed or sold as follows:—

	Purchased.	Killed.	Sold.
Street Division	3	1	1
Sanitary Division	3	1	1

I have attended thirty-one meetings of the committee on public works for consultation regarding work and petitions before the committee.

Under the Pension Act for Laborers, accepted in 1912, three laborers have been pensioned. In 1913 the voters of the city accepted the Workmen's Compensation Act.

The following permits were issued during the year:—

Permits for steam rollers, erecting canopy and blasting rock	24
Permits for Cambridge Gas Light Company	233
Permits for Charlestown Gas Company	132
Permits for occupying streets and sidewalks	210
Permits for opening streets and sidewalks	152

Permits for crossing sidewalks	71
Permits for feeding horses	8
Street watering complaints and requests	45
Notifications to other departments and corporations	563
Requests for repairing gravel sidewalks	194
Accidents reported	27
Police reports	528
Streets oiled	384
Brick and granolithic sidewalks repaired	268
Miscellaneous reports and requests	581
Requests to care for moths	9
Poles and guards for trees	519
Drain layers' permits	153
Water department openings	1,045
Ice and snow removed (loads)	118
New signs erected by department	118
Signs repainted by department	74
Sand and gravel used (cubic yards)	1,890
Dirt removed or handled (cubic yards)	15,076
Scrapings removed from streets	11,071
Old macadam used (cubic yards)	1,206
Ashes used (cubic yards)	6,567
Ballast used (loads)	596

Recommendations.

I most respectfully recommend that the south side of Elm street, from Oak square to Cutter square, be constructed similar to the north side, with a concrete base and tarvia macadam top surface.

The unpaved portions of Beacon street, Somerville avenue, College avenue, Broadway, Springfield, and Newton streets should be completed. Portions of Morrison avenue, Willow avenue, Cedar street, School street, and Summer street should be resurfaced.

His honor, Mayor Burns, has petitioned the Massachusetts Highway Commission to accept Middlesex avenue as a State highway.

As recommended in last year's report, the blacksmith shop should be enlarged in order to make accommodations for the wheel-wrights.

I wish to extend my sincere thanks to all for their support and hearty co-operation.

REPORT OF COMMISSIONER OF PUBLIC BUILDINGS.

OFFICE OF COMMISSIONER OF PUBLIC BUILDINGS, }
 CITY HALL, SOMERVILLE, January 1, 1914, }

To the Honorable, the Mayor, and the Board of Aldermen of
 the City of Somerville:—

Gentlemen,—In accordance with the provisions of the City Charter, I submit herewith the annual report of the public buildings department for the year ending December 31, 1913.

The total valuation of the public property which is in the custody of the public buildings department is \$2,358,414.

The total expenditure for the year 1913 for the care and maintenance of this property was \$108,187.06.

The amount was expended as follows:—

Janitor service	\$35,406 30
Fuel	23,105 27
Light	12,811 47
Telephone	529 16
Care and repairs	35,754 10
Pensions	580 76

A table accompanies this report which shows a more detailed explanation of this amount.

Inspection of Buildings.

The Commissioner of Public Buildings is also the inspector of buildings according to the terms of the charter, and as such during the past year has made 1,550 formal inspections of buildings in the process of construction.

The following table shows the number of permits issued for building operations during the year 1913:—

Buildings.	WARDS.							Totals.
	1	2	3	4	5	6	7	
Dwellings	65	13	5	12	29	24	129	277

The number of plumbing permits issued during the year was 457
 Permits for plumbing in new buildings 259
 Permits for plumbing in old buildings 198
 Number of buildings in which soil pipes were tested 389

The total number of permits issued during the year 1913, viz., 429 was two less than during the year 1912, when 431 permits for new buildings and alterations were issued. The total cost of the new buildings and alterations during the year 1913 was \$1,952,179, while the cost in 1912 was \$1,777,719, showing an increase of \$174,460.

School Buildings.

The school buildings of the city are in a very satisfactory condition with a few exceptions. The principal need in several instances, viz., the Knapp, Pope, Glines, Bingham, Carr, Morse, Bennett, Burns and Cummings Schools is outside painting and should be done at once to prevent deterioration. Several of the buildings should also be renovated inside by the tinting of walls and ceilings.

During the year 1913 this department carried out the work of the required needs of the school buildings so far as possible with the money available.

The innumerable calls upon the department for work of every nature in the school buildings require the time and attention constantly of the commissioner who is obliged to select those matters which he considers most important for immediate attention.

During the year 1913 the improvements made at various school buildings were as follows:—

- Prescott School,
 Yard surfacing (partial).
- Knapp School,
 Yard surfacing.

- Pece School,
 Yard extension.
 Bell School,
 Enlargement of assembly room.
 Improvement of lighting.
 Forster School,
 New office for master.
 New teachers' room.
 New fire exit.
 Bingham School,
 New assembly hall.
 Yard surfacing (partial).
 Cummings School,
 Yard surfacing.
 New floors throughout.
 Interior painting.
 Cutler School,
 Yard grading and surfacing (partial).

Fire Buildings.

The fire buildings of the city are in a very satisfactory condition except that additional room should be provided for dormitory and toilet accommodations. The increase of permanent men in the department has brought about this need which is apparent in practically all of the houses of the city. It was found necessary during 1913 to entirely renovate the roofing and metal work at the house of Engine 2. Aside from this the work accomplished was largely routine.

Municipal Buildings.

Under this title are included the City Hall and City Hall Annex. Numerous small matters have been attended to as the needs appeared with regard to care of property and equipment.

Public Library.

The use of the Public Library building for library purposes was discontinued in December, 1913, and the library department was installed in its new building which was dedicated December 17, 1913.

Park Buildings.

New shower baths were installed for men and women in the building at Lincoln Park during the year 1913 and the work completed. This improvement affords the people of that section of the city an opportunity for bathing which they greatly appreciate.

Bathing Beach.

The patronage at the bathing beach was very large during the summer and in fact at times indicated the need of an extension to this popular amusement spot. The beach was im-

proved by the deposit of two hundred tons of beach sand. I hope soon that satisfactory arrangements may be made by the city to establish permanent accommodations at this beach.

Highway Buildings.

The buildings coming under this title are the stables, sheds and workshops used by the Highway department.

The work performed by this department at the Highway buildings was routine work during 1913.

Refuse Buildings.

At the Refuse stable changes were made in the toilet arrangements in order to provide better lobby accommodations for the employees of the department.

City Home Buildings.

The quarters occupied by the superintendent and his family were thoroughly renovated. New floors were installed and the rooms painted and papered throughout. Improvements were also made in the main dining-room to provide for additional room required for the use of inmates.

Hospital Buildings.

The Contagious and Tuberculosis hospitals are in a very satisfactory condition except the arrangement for storing supplies which must be kept under refrigeration. Plans are being made to remedy this matter in the immediate future.

Water Department Buildings.

The buildings used by the Water department need considerable attention to prevent deterioration and plans are being made to improve the condition, more especially the garage section which needs additional heating arrangements and new doors.

High School Addition.

The additions to the High School were constructed during the summer of 1913, and were so nearly completed that the school began its regular work under the one session plan on September 8, 1913.

The plans and specification for these additions were prepared by Harry E. Warren of 6 Beacon Street, Boston, Mass., and the work performed by the following named contractors:—

General Contract..... Walsh Bros.
 Heating Radiation..... Charles A. Sanborn
 Central Plant..... J. J. Hurley & Co.

All of the contractors were diligent and careful in their

work and assisted in the difficult task of finishing the buildings so that the school could open in September.

New Cells, Police Building.

The work of installing the new cells in the Police building which was authorized by an order of the Board of Aldermen, May 9, 1913, has so progressed that the cells will soon be available for use. This improvement will furnish more humane and sanitary accommodations for the unfortunates who are obliged to be confined while awaiting trial after arrest.

Respectfully submitted,

WALTER T. LITTLEFIELD,
Commissioner of Public Buildings.

REPORT OF COMMISSIONER OF ELECTRIC LINES AND LIGHTS.

OFFICE OF COMMISSIONER OF ELECTRIC LINES AND LIGHTS, }
January 1, 1914. }

To the Honorable, the Mayor, and the Board of Aldermen of the City of Somerville:—

Gentlemen,—I most respectfully submit my fifth annual report as commissioner of electric lines and lights for the year ending December 31, 1913.

Inspection of Wiring in Buildings.

The inspection of interior wiring for light, heat and power has been given the same careful attention as in previous years.

The efforts of the electrical inspector are directed towards obtaining better construction which means the safer installation of electric wires and appliances.

It is unfortunate that the inspector often finds it necessary to teach incompetents how to do ordinary electric wiring.

This condition exists in cities and towns where there is no registration or licensing of electricians.

The average property owner knows very little if anything of electrical construction and it is quite natural that he should become the victim of cheap wiremen or that he should turn to the janitor, school boy, gardener or some other equally skilled artisan when extensions to existing wiring or alterations are to be made.

When wiremen of this class have been employed it is necessary that the inspector show them how to do a great deal of the work.

The electrical inspector acting as superintendent of construction on any job of wiring imposes unfair burdens upon him and encourages incompetent wiremen to enter the electrical construction business, and thus works a hardship on legitimate contractors.

It also takes a large amount of time which is needed for other work.

The endeavor to prevent inexperienced and incompetent persons from undertaking electrical construction is proper and would protect the public from being imposed upon by unreliable contractors and lessen the burdens of the electrical inspector.

Number of notifications of new work received	850
Number of inspections of new work	850
Number of re-inspections of new work	690
Number of inspections of old work	290
Number of defective installations of old work	8
Number of defective installations remedied	8
Number of re-inspections of old work	10
Total number of inspections	1,840

Number of permits issued to the Edison Electric Illuminating Company for installing meters, lamps, etc.	1,033
Number of incandescent lamps	16,022
Number of arc lamps	4
Number of motors	96
Horse power of motors	324

Construction, etc., of the Fire and Police Alarm Systems.

FIRE ALARM SYSTEM.

The increasing number of alarms which are received and transmitted each year, requires a modern fire alarm system to be able to handle promptly and accurately alarms when sounded from boxes on the street.

While the present automatic system has given admirable results in the past, there have been times when it has been taxed to its full capacity and only by constant watchfulness have confusing signals been averted.

The signal boxes have been improved by installing modern break wheels and contact springs which removes to a great extent the chances of incorrect signals.

The advent of motor apparatus also necessitates a quicker striking alarm to enable the fire department to make a more prompt response to an alarm of fire. This cannot be obtained with the present system.

The housing of gasoline motor apparatus in the building, the top floor of which is utilized as the headquarters for the fire alarm system, has added greatly to the chances of fire which would be liable to put this signal system out of commission. To properly protect the same it should be removed to a separate fire-proof building.

There have been 343 alarms transmitted during the year, an increase over last year of fifty-six alarms.

One new box has been installed this year:—

No. 151, Pennsylvania avenue, opposite Michigan avenue.

The fire alarm equipment consists of the following:—

125 signal boxes, one eight-circuit automatic repeater, eight tower strikers, thirty-one gongs, seven indicators, two punch registers, forty-three tappers, one automatic steam whistle, twelve private telephones connecting the various stations, 530 cells of storage battery, about 130 miles of overhead wire, and 47,648 feet of underground cable.

There has been run 24,800 feet of new triple braid covered wire and 99,500 feet of old has been removed.

1,000 feet of twisted pair has been run for telephones, etc., and 2,550 feet of old has been removed.

4,688 feet of lead-covered cable, consisting of two, four, sixteen and eighteen conductors have been placed underground on Highland avenue and Holland street from Grove street to Teele square and the old overhead wire has been removed.

POLICE SIGNAL SYSTEM.

The new system which was purchased last year has been installed and is working with entire satisfaction.

Three new signal boxes have been installed as follows:—

- Beacon street, corner of Oxford street.
- Meacham street, corner of Fremont street.
- Lincoln Park.

Supervision of Poles and Wires on the Streets and Underground Conduits and Wires.

The same attention has been given to the condition of poles and wires on the streets as in previous years.

A large number of defective poles have been replaced by the companies owning the same.

New poles have been placed in locations granted for the purpose of supplying light and telephone service, and abandoned poles have been removed.

	New Poles.	Re- placed.	Re- moved.	Re- set.
New England Telephone & Telegraph Co.	4	22	22	6

Permits given to the New England Telephone & Telegraph Co. for attachments to the Edison Co.'s poles				692
Permits given to the Edison Electric Illuminating Co., for attachments to New England Telephone Co.'s poles				55

The Edison Electric Illuminating Company has removed its wires on Pearl street from Mt. Vernon street to Gilman square and placed the same underground.

Street Lighting.

The matter of street lighting has been given the same attention as in previous years and a number of changes have been made in the kind of lamps and the location of the same.

Magnetite lamps have been installed on Holland street, Davis square, Highland avenue, Walnut street, Bow street, Union square, Webster avenue and Prospect street, replacing the old arc lamps.

Recommendations.

I respectfully recommend that:—

The matter of providing suitable quarters for the fire alarm system be considered.

The present fire alarm system be replaced by a modern, quick time system when such suitable quarters are provided.

Conclusion.

I wish to thank his honor, the mayor, the members of the board of aldermen, and the several departments for courtesies received.

Respectfully submitted,

WALTER I. FULLER,

Commissioner of Electric Lines and Lights.

SOMERVILLE WATER WORKS.

SOMERVILLE, MIDDLESEX CO., MASSACHUSETTS.

Location : Somerville City Hall (near centre of the city) is $2\frac{3}{4}$ miles northerly from State House in Boston.

Greatest extent of the City north and south about 4.2 miles.

Greatest extent of the City east and west about 2.1 miles.

Elevation Highland avenue at City Hall 105 feet above mean low water.

Lowest building elevation in the city 13 feet.

Highest building elevation in the city 145 feet.

Area of city, including land and water, about 4.22 square miles.

Land, 2,461.50 acres : water and marsh, 238.50 acres.

Population, census, 77,236.

Entire population on line of pipe and supplied with water.

Water works owned by City of Somerville.

Construction commenced in 1868.

Source of supply : Metropolitan system, taking water of the Nashua river at Clinton, Mass.

Range of pressure on street mains :

Low service 35 to 65 pounds.

High service 45 to 100 pounds.

Mayor

HON. CHARLES A. BURNS.

Water Commissioner

FRANK E. MERRILL.

REPORT OF THE WATER COMMISSIONER.

OFFICE OF THE WATER COMMISSIONER, }
January, 1914. }

To His Honor, the Mayor, and the Board of Aldermen:—

I present herewith my report for the year ending December 31, 1913, this being the fortieth annual report of the water department and my fourteenth as water commissioner:—

Receipts and Expenditures.

Water bills have been issued as follows:—

“Annual” water charges, amounting to	\$75,081 35
“Additional” water charges, amounting to	3,168 92
“Metered” water charges, amounting to	155,455 99
	\$233,706 26

	Annual and Additional.	Metered.	
Abatements on above charges	\$1,102 13	\$295 69	
Refunds on above charges	206 67	18 60	
Abatements on 1912 charges	1 40	
Refunds on 1912 charges	20 00		
	\$1,328 80	\$315 69	\$1,644 49

Income from sale of water	\$232,061 77
Receipts from water service assessments	\$5,079 51
Receipts for labor and materials sold:—	
Municipal departments	975 46
Outside accounts	3,950 31
	10,005 28
Total income of water works	\$242,067 05

This amount was used as follows:—

For water works purposes:—

Water works maintenance	\$33,890 51		
Water works extension	15,144 93		
Pensions	643 83		
Miscellaneous accounts	10,005 28		
	\$59,684 55		
Interest on water loan bonds	1,500 00		
Maturing water loan bonds	6,000 00		
Metropolitan water works assessment	116,320 88		
	\$183,505 43		

For other municipal purposes:—

Appropriated to Highway Department	\$1,000 00
Appropriated to Public Buildings Department	989 35
General revenue, for benefit of all municipal departments	56,572 27
	\$242,067 05

In addition to the appropriations from water income to other municipal purposes enumerated above, water has been furnished without charge to all the city departments that have required its use and it is paid for out of the income from sale of water.

Department Receipts and Disbursements.**WATER MAINTENANCE ACCOUNT.**

	Dr.	Cr.
Amount appropriated by board of aldermen from estimated sales of water and operating receipts of the water department		\$37,000 00

Cost of Water Works.

The total cost of the water works on December 31, 1912, as represented by the expenditures from appropriations for water works extension was	\$963,135 00
Expended during the year 1913, on extension account	15,144 93
Total expenditures, December 31, 1913	<hr/> \$978,279 93

Water Debt.

Water loan bonds have been issued on funded debt account to the amount of \$1,017,000; this has been reduced by \$985,000, leaving the water debt on December 31, 1913, \$32,000.

The outstanding bonds mature as follows:—

YEAR.	AMOUNT.	YEAR.	AMOUNT.
1914	\$6,000	1918	\$5,000
1915	5,000	1919	4,000
1916	5,000	1920	2,000
1917	5,000		

Water Works Income from 1898 and its Distribution.

The water income and its distribution from 1898 to 1913, inclusive, is shown in the following table:—

Total water income, years 1898 to 1913, inclusive . . . 3,622,727 89
Distribution:—

Water Works Account.

Water Works Construction, Renewal, Maintenance and Operation	\$878,768 13	
Water Bonds	242,000 00	
Interest	82,035 00	
Metropolitan Water Assessments	1,313,178 28	
		<u>\$2,515,981 41</u>

Other Municipal Accounts.

Various municipal departments through specific appropriations and general revenue account	\$1,106,746 48
	<u>\$3,622,727 89</u>

Income and Appropriations.

The net income from the sale of water in 1913 was \$232,061.77, a decrease of \$1,790.30, due presumably to the effect of meterage of services. The revenue from metered services has increased four per cent., or to sixty-seven per cent. of the net income from water rates.

While the income from water service assessments and from accounts with municipal departments shows a small gain over the previous year, the general miscellaneous accounts show a large decrease in amount, resulting from the comparatively small requirements of the grade-crossing elimination work of the year, the cost of which has, in recent years, been a considerable item and has been charged back to the railroad company.

There was expended for the maintenance, renewal, operation and extension of the water works in all its branches the sum of \$49,035.44; for pensions, \$643.83; for work done for property owners, grade-crossing changes, etc., \$10,005.28; for interest and maturing water bonds, \$7,500.00; and to the State, as the city's assessment for the Metropolitan water works,

\$116,320.88; a total of \$183,505.43. The surplus balance of income after paying all expenses of the water works was \$58,561.62.

The decrease in demands upon the department for labor in connection with the grade-crossing work shows its effect also in the figures giving the cost of maintenance and operation of the water works, which increases proportionately to the decrease in amount of outside accounts. The total amount of all expenditures for water works maintenance, extension and miscellaneous accounts was \$59,040.72, as compared with \$64,572.49 the previous year.

The appropriations recommended by the water commissioner for the use of the department for the year 1913 were approved by the mayor and passed by the board of aldermen. The estimates submitted covered some expected grade-crossing elimination at Park street, which failed, however, to materialize. As a result thereof there remained at the close of the year an unexpended balance in the department accounts of \$2,290.91, which was turned back into the treasury accounts. The balance would have been considerably in excess of this amount had it not been for an unexpectedly large demand upon the appropriation for service work in connection with permanent street paving jobs toward the close of the year, and for pensions, which had not been included in the budget.

Pensions.

The city having accepted the provisions of Chapter 503, of the Acts of 1912, relative to pensioning laborers in the employ of cities and towns, requests were made during the year by three men for retirement on pensions. These were granted by the mayor as follows:—

Hervéy W. King, from January 6, 1913, at \$7.55 per week.

Richard Whalen, from May 26, 1913, at \$6.24 per week.

Andrew McCaffrey, from August 24, 1913, at \$3.63 per week.

While these payments were directed to be made from the appropriation for water works purposes, the amount so expended does not seem to be strictly chargeable to the maintenance, operation, or construction of the system, so a special item known as Pensions has been set up in the distribution table of the water income.

WATER DISTRIBUTION SYSTEM—CONSTRUCTION.**STREET MAINS.**

The number of feet of street mains laid during the year just closed is 6,769; there has also been laid 106 feet of pipe for hydrant connections and 34 feet for blow-off discharges, making a total of 6,909 feet; 4 feet have been removed or abandoned. The net increase is 6,905 feet, and the total mileage in the city is approximately 98.65.

The sizes and lengths of pipe laid and abandoned are as follows:—

Size.	Feet laid.	Feet abandoned	Size.	Feet laid.	Feet abandoned
1"	42	0	8"	1,656	0
2"	112	0	10"	1,678	0
4"	38	4	12"	271	0
6"	3,112	0			

The principal street mains laid during the year are as follows:—

Street.	Size of main.	Street.	Size of main.
Albion court	2"	Mason street	10"
Bailey street	8"	Michigan avenue	10"
Burnham street	8"	Minnesota avenue	6"
Central hill road	8"	Osgood street	6"
Central road	} 1"	Powder house boulevard	
		(north side).....	12"
Curtis avenue	} 2"	Powder house boulevard	
		(south side)	10"
Hamilton road	8"	Russell road	8"
Hillsdale road	8"	Taylor street	6"
Illinois avenue	6"	Vermont avenue	10"
Indiana avenue	6"	West Quincy street	6"
Leonard street	6"		

Grade Crossings.

No additional grade-crossing elimination work was taken up during the year, efforts being confined to finishing up the streets in connection with the work previously undertaken. The bridge over the railroad tracks at Dane street has now been constructed and the water main carried over it and connected at both ends with the pipes laid in the previous year, so that the job is now completed and the water is in full circulation.

Hydrants, Gates.

There have been seventeen hydrants set and one removed during the year, making the net increase sixteen and the total number in the city, 1,115.

The total number of private hydrants supplied from the city mains is fifty-nine.

Thirty-four gate valves have been set during the year and one has been removed, making a net increase of thirty-three, and a total of 1,599 in the service.

Five blow-offs have been constructed and one has been removed, and the number in the city is increased to 159.

No new waterposts for street sprinkling have been set, but four have been removed, the total number in service being 79. Two new combination drinking fountains have been installed, making the total in the city eight.

Water Services.

The number of new water services laid during the year was 241, a decrease of 23 from the previous year.

The length of all the service pipes installed was 8,947 feet, and the amount received in charges made for the work was \$5,079.51.

Ten service connections were permanently discontinued and the length of pipe abandoned was approximately 435 feet. The number of services in use in the city is estimated to be 12,827, and the total length of service pipe 83.67 miles. Six-inch fire services have been installed at the factories of the American Tube Works on Church street, H. M. Hillson & Co., on Taylor street, and Stephens & Horssman on Newberne street. One four-inch pipe was laid for the Park garage at 161 Broadway for building and elevator service.

Water Meters.

The number of meters installed during the year on new services and on old services hitherto unmetered was 687; seventy-six which had been removed for various causes were reset; seventy-eight were removed on account of permanent or temporary discontinuance of use of water and for substitution of other meters. The net increase in number of operating meters was 685, making the total number of meters and motors in service on December 31, 7,856, or about sixty-one per cent. of the number of service pipes in the city.

The kinds and sizes of all meters now installed are shown in the following table:—

OPERATING METERS DECEMBER 31, 1913.

KIND.	SIZE.								Total.
	5/8"	3/4"	1"	1 1/2"	2"	3"	4"	6"

Totals . . .	7,490	244	64	12	24	8	6	1	7,849
Motor and ele- vator registers									7
									7,856

The meters installed in 1913 were classed as follows:—

Applications of property owners	179
New services	255
General installation	253
Reset	76
Total	763

Meters were removed for the following causes:—

Vacancies and temporary non-use of water	50
Services permanently discontinued	3
Replaced by other meters	25
Total	78

Under the provisions of the Metropolitan Water Act it is necessary that there be installed in this city at least 411 meters each year on services previously unmetered, and meters on all new services when they go into regular use. The number of meters set during the year in excess of the actual requirements of the state law was twenty-one.

The following table gives a summary of the pipes and fixtures of the water system December 31, 1913:—

Summary of Pipes and Fixtures.

Feet of main pipe (approximately)	520,861
Feet of service pipe (approximately)	441,744
Service connections (approximately)	12,827
Public fire hydrants	1,115
Private fire hydrants	59
Gates	1,599
Check valves	7
Meters	7,849
Motor registers	7
Waterposts	79
Blow-offs	159
Drinking fountains and troughs	8

WATER DISTRIBUTION SYSTEM—MAINTENANCE.

The main distribution system continues in good condition, there having been an average of but one leak discovered for each ten miles of street mains. One of these leaks was from a cracked pipe in the old twenty-inch main in Washington street near Boston street, which has given us much trouble from time to time.

The winter of 1912-1913 was a very mild one and no particular trouble was experienced from frozen hydrants and services.

Waterposts and Fountains.

Five waterposts used in the street sprinkling service have been removed. One was reset in a different location and two were combined with drinking fountains in the new free water service stations; the number of cart connections now being seventy-nine.

The water commissioner has recently devised a combination drinking fountain, horse-watering service and watering-cart connection, which is thought by those who have used it to be very economical and practical. The different parts are built in and around an ornamental box and post standing on the sidewalk just inside the curbing, similar in size to a police signal box. Inside the box, which has a locked door, is the system of water pipes and valves for feeding the various fixtures, and a two-inch hose connection for the watering carts. On the sidewalk front of the box is attached an iron basin with a bubbler tip controlled by a self-closing cock for furnishing drinking water to persons, and on the end of the box is a self-closing cock for filling pails for the use of horses; attached to the foot of the post is also a basin for small animals fed by the waste water from the bubbler through the interior of the post. The boxes are conspicuously lettered "City of Somerville, Free Water." One of these service stations has been set up near Teele square and has called forth much favorable comment.

Another has been placed in Gilman square, but is without the drinking attachment for persons, as an individual drinking fountain is located nearby.

Services.

The number of cases of poor pressure on old water services continues to increase, and cleaning out the pipes and fittings and providing a good flow of water has grown into an important branch of the department work. In fact the demands for improved service conditions have now become so frequent as to require practically the sole attention of one gang of men, and there appears to be no likelihood of any relief as the service pipes are continually growing older and in need of attention.

During the latter part of the year a notification was received by the department of contemplated permanent paving in Water street, Tufts street, Temple street and Elm street, and it was deemed advisable to renew the service pipes in those streets before the pavement was laid.

Meters.

The meter system is continually growing under requirements of the State law. The meters as a whole are doing very satisfactory work and giving no more trouble than might be expected from the delicate construction of their operating mechanism. It was found necessary to remove for repairs 243 meters, or approximately only three per cent. of the total number in operation, and the larger part of these troubles arose through no fault of the meter's construction.

Water Assessments and Consumption.

The annual assessments paid by this city as its proportionate part of the cost and operation of the Metropolitan water works are given below:—

Year.	Sinking Fund.	Maintenance.	Interest.	Maturing Bonds.	Total.
1898	No division	made			\$14,250 19
1899	" "	" "			20,975 58
1900	" "	" "			28,689 24
1901	\$12,491 73	\$12,033 79	\$32,291 24		56,816 73
1902	19,014 85	12,955 64	30,427 40		62,397 89
1903	15,748 56	12,763 10	48,776 77		77,288 43
1904	16,404 42	15,393 87	54,938 64		86,736 93
1905	21,358 11	13,666 71	55,535 91		90,560 73
1906	22,345 50	17,412 51	57,402 07		97,160 08
1907	25,365 30	18,880 01	62,089 30		106,334 61
1908	24,865 73	15,221 12	68,604 23		108,691 08
1909	24,812 23	21,220 56	66,540 41		112,573 20
1910	25,018 52	18,212 28	66,825 45		110,056 25
1911	25,424 55	19,573 82	69,849 26	\$246 66	115,094 29
1912	24,469 82	16,111 70	68,205 16	445 46	109,232 14
1913	24,930 94	20,691 19	70,206 83	491 92	116,320 88
					\$1,313,178 28

There has been credited to the city by the commonwealth as its proportion of the amounts received from entrance fees, water supplied outside the district, and water furnished to water companies the sum of \$9,056.10.

The daily consumption of water in Somerville, as recorded by the Venturi meters, operated by the Metropolitan water works, is shown below by months for the year 1913:—

Month.	Gallons per day.	Gallons per capita.	Month.	Gallons per day.	Gallons per capita.
January	6,144,100	75	July	6,226,500	75
February	6,740,400	82	August	5,572,200	67
March	6,219,900	76	September	5,478,400	66
April	6,019,800	73	October	5,445,100	65
May	6,121,700	74	November	5,411,700	65
June	6,357,700	77	December	5,835,200	70

The consumption for the year was: Low-service, 1,710,116,000 gallons; high-service, 464,550,000 gallons; making the total for the year 2,174,666,000 gallons, and an average daily consumption of 5,958,000 gallons.

The average daily quantity of water used in Somerville during 1913 was seventy-two gallons per inhabitant, a decrease of seven gallons over the previous year's consumption and of two gallons over the lowest consumption previously recorded; the average for the entire district was ninety-four gallons daily per capita, a decrease over last year of thirteen gallons per capita.

The following table shows the daily per capita consumption of water in the cities and towns in the Metropolitan water

district for the year 1913, as registered by the Metropolitan meters:—

City or Town.	Jan.	Feb.	Mar.	Apr.	May	June	July.	Aug.	Sept.	Oct.	Nov.	Dec.	Yea
Boston	118	124	109	104	105	107	109	105	107	107	103	103	108

Nahant	45	55	42	58	97	199	347	289	151	77	51	48	123
Swampscott	54	59	47	47	59	83	105	93	66	51	49	47	63
Metropolitan dist.	99	105	94	90	91	95	98	93	92	91	88	88	94

The district, in order of consumption, beginning with the lowest, stands as follows for the year 1913:—

City or Town.	Gallons.		
	Total per Day.	Per Capita per Day.	Per cent. of Services Metered.
1—Milton.....	332,300	39	100
2—Malden	2,225,700	46	98
3—Medford	1,233,700	48	100
4—Stoneham	414,400	53	75
5—Winthrop	689,700	60	100
6—Watertown	868,500	62	100
7—Swampscott	420,100	63	100
7—Arlington	786,300	63	100
8—Everett	2,435,800	65	40
9—Lexington	359,300	67	75
9—Revere	1,385,100	67	50
10—Melrose	1,136,600	68	100
11—Somerville	5,958,000	72	61
12—Belmont	463,600	73	100
13—Quincy	2,699,100	76	86
14—Chelsea	2,879,800	80	100
15—Boston	79,390,600	108	42
16—Nahant	169,100	123	80

It is noted in the above table that the daily per capita consumption in Somerville decreased from the figures of the previous year, being seventy-two, or seven gallons lower than in 1912, and a comparison shows a general decrease throughout the water district, due, undoubtedly, to the mildness of the winter, on account of which less water is allowed to run to waste, and to the steady introduction of water meters.

The table also gives a column showing the percentage of services now metered throughout the Metropolitan water district.

Attention may again be properly called to the need of

stopping all useless wastes of water. The conservation of the water supply has become one of the most important functions of this department, as the water consumption of the city has a direct and large bearing on the annual assessment levied on us by the State Metropolitan Water Board. This assessment is not made, as many suppose, on a rate basis, such as a certain price per million gallons, but is made on a proportionate division of the Metropolitan water district's annual requirements to meet maintenance, sinking fund, interest and maturing bonds; based one-third on the valuation and two-thirds on the water consumption of the several cities and towns in the district. It is never possible, therefore, to determine in advance with much accuracy what our annual assessments for water for another year will be, as much depends upon the proportionate use of water in seventeen other portions of the district. As an example of the operation of this method of division it may be stated that this city's apportionment of the expenses for 1914 will probably be increased some \$3,400.00, and this not because Somerville has not made a good showing in reducing its water waste, for the past year's record was the best in the history of the city, being only seventy-two gallons per capita, but principally because the city of Boston has made such a notable reduction in its former excessive consumption, from 125 down to 108 gallons per capita, which means a large lowering of the water assessment for that city and a consequent increase in that, not only of Somerville, but of most of the other cities and towns in the district. It is of importance, therefore, for all who have the financial interests of the city at heart to see to it that city water, which means city money, is not allowed to needlessly run to waste.

New Legislation.

Legislation has been passed or accepted by the city voters affecting laborers, workmen and mechanics employed in the water and other departments, which has become operative during the year 1913, as follows:—

Section 36, Chapter 19, Revised Laws; being a portion of the Civil Service Act, so-called, as applied to laborers.

Section 42, Chapter 514, Acts of 1909, as affected by Chapter 494, Acts of 1911; being the so-called eight-hour law.

Chapter 503, Acts of 1912, relative to pensions of laborers.

Chapter 807, Acts of 1913; the workmen's compensation act.

Respectfully submitted,

FRANK E. MERRILL,

Water Commissioner.

Gates Set in New Locations.

- Albion court, 2-inch gate, set 4 feet out from west line of Albion court and 5 feet north from south line of Albion street.
- Bailey street, 8-inch gate, set 13 feet 4 inches out from south line, on west line of West Adams street.
- Burnham street, 8-inch gate, set 13 feet 4 inches out from east line, on north line of Broadway.
- Burnham street, 8-inch gate, set 13 feet 4 inches out from east line, on south line of Powder House boulevard.
- Central Hill Municipal buildings, 8-inch gate, set in sidewalk on School street, 75 feet south from south line of Madison street, and 5 feet out from east line of School street.
- Central Hill Municipal buildings, 8-inch gate, set on east line of City Hall, and 13 feet out from north line of City Hall.
- Central road, 6-inch gate, set 3 feet out from south line of Central road, on west line of Sycamore street.

Summary of Statistics.

FOR THE YEAR ENDING DECEMBER 31, 1913.

In form recommended by the New England Water Works Association.

SOMERVILLE WATER WORKS.

SOMERVILLE, MIDDLESEX COUNTY, MASS.

GENERAL STATISTICS.

- Population by census of 1910, 77,236.
- Date of construction: commenced in 1868.
- By whom owned: City of Somerville.
- Source of supply: Metropolitan water system.
- Mode of supply: Water is delivered into the city's mains, under both high and low pressures, by the Metropolitan Water Works.

STATISTICS OF CONSUMPTION OF WATER.

Estimated total population at date, 82,000.
 Estimated population on lines of pipe, 82,000.
 Estimated population supplied, 82,000.
 Total consumption for the year, 2,174,666,000 gallons.
 Average daily consumption, 5,958,000 gallons.
 Gallons per day to each inhabitant, 72.

STATISTICS RELATING TO DISTRIBUTION SYSTEM, 1913.**MAINS.**

Kind of pipe, cast-iron.
 Sizes, from 4-inch to 20-inch.
 Laid 6,909 feet; discontinued 4 feet; net extension, 6,905 feet.
 Total now in use, 98.65 miles.
 Number of leaks per mile, .9.
 Number of hydrants added during year (public, 16; private, 0), 16.
 Number of hydrants (public and private) now in use, 1,174.
 Number of stop gates added during year, 33.
 Number of stop gates now in use, 1,599.
 Number of blow-offs, 159.
 Range of pressure on mains, 35 pounds to 100 pounds.

SERVICES.

Kind of pipe: Lead: wrought iron—lead-lined; wrought iron—
 cement-lined; cast iron.
 Sizes, one-half to six inches.
 Extended less discontinued, 8,508 feet.
 Total now in use, 83.67 miles.
 Number of service taps added, 241; discontinued, 10; net increase,
 231.
 Number now in use, 12,827.
 Number of meters added, 763; discontinued, 78; net increase, 685.
 Number now in use, 7,856.
 Percentage of services metered, 61.
 Percentage of receipts from metered water, 67.
 Number of motors and elevator registers added, 0.
 Number now in use, 7 (included in number of meters).

Died June 3, 1913

Manual Force.

During the year nine (9) men have resigned, two (2) have been pensioned, and one (1) has died; four (4) permanent have been appointed, the force of the department now consisting of seventy (70) permanent and thirty (30) callmen, as follows:—

- 1 Chief engineer.
- 1 First assistant engineer.
- 1 Second assistant engineer.
- 7 Captains.
- 9 Lieutenants.
- 4 Enginemen.
- 4 Assistant enginemen.
- 43 Permanent men.
- 30 Callmen.

Apparatus.

The department apparatus consists of the following:—

- 2 Second size, horse drawn steam fire engines.
- 2 Third size horse drawn steam fire engines.
- 3 Horse drawn combination chemical engine and hose wagons.
- 2 Horse drawn hose wagons.
- 2 Horse drawn ladder trucks.
- 1 Horse drawn combination ladder truck and chemical engine.
- 2 Motor driven combination chemical and hose wagon.
- 1 Motor driven chemical engine.
- 1 Automobile Chief's car.
- 2 Four wheel buggies for assistant chiefs.
- 1 Horse drawn relief hose wagon.
- 7 Horse drawn exercising wagons.
- 1 Horse drawn supply wagon.

Horses.

There are thirty-eight (38) horses in the department, three having been disposed of and three having been purchased during the past year.

The general health of the horses has been fair although there have been some painful accidents necessitating considerable surgical and veterinary service.

The advent of motor driven apparatus will materially reduce the number of horses the coming year.

Hose.

The amount of servicable hose in the department at present is 9,700 feet of two and one-half inch rubber lined cotton hose, and 2,150 feet of three-quarter inch chemical hose.

There has been purchased 1,700 feet of new hose and 1,300 feet condemned, practically replacing old with new.

There should be at least 4,000 feet more to place the department on a safe hose footing.

Brief Resume.

The insurance loss has been unusually large as compared to previous years owing to the increased numbers of fires, par-

ticularly in merchantile establishments which contain much greater values in the same areas than are usually found in residences.

The months of January and February show fully one-half of the total loss of the entire twelve months as is shown by the following table giving the fire losses by months:—

January	\$57,598 70
February	11,842 14
March	3,109 15
April	12,516 00
May	10,992 39
June	3,329 96
July	4,801 00
August	8,836 62
September	9,175 06
October	4,708 00
November	4,546 00
December	7,693 00
		\$139,147 72

There have been twenty-two fires with an insurance loss exceeding \$1,000 as follows:—

On January 7, at 4.32 P. M. the first bell alarm of the year was sounded and the indicators in the several stations showed box 227; the apparatus responded and no fire being found, the department was dismissed, whereas box 237 had been pulled; at 4.40 P. M., box 237 was pulled again, and on arrival of the department, a brisk fire was burning in the six apartment house, 19-21 Harvard street, owned by Mrs. A. S. Hardy, and occupied by E. J. Ackroyd, Charles Perry, M. N. Phillips, William Wood, Mrs. L. Burton and Miss Grace Oliver; damage to building, \$11,821.70; to contents, \$5,750. Cause, from heater in basement. Before this fire was fully extinguished, a large part of the apparatus not having returned to quarters; box 23 was pulled at 6.55 P. M., for fire in the building corner Water and South streets, owned by John P. Squire Estate, and occupied by L. S. Drake & Co. as a rattan factory; a general alarm was sounded for this fire, the Cambridge department rendered valuable assistance at this fire. The loss on building, \$14,600.00; contents, \$15,250.00. Cause, carelessness of employee smoking.

January 17, 9.46 A. M. Box 123, 73-75 Cross street, three-story building, stores and dwelling owned by L. S. Rosenfeld, occupied by Bernard Kipnis, John T. Connor, William A. Robes, H. E. Russell, and P. E. Auclair; damage to building, \$2,500.00; to contents, \$3,614. Cause, carelessness of smoker.

February 4, 12.12 A. M. Box 32, 54 Bonair street three-story wooden dwelling owned by Scully Bros., occupied by James Field, John Hunter and H. E. Pillsbury; damage to building, \$1,884.00; to contents, \$400. Cause, rats and matches.

February 15, 8.55 P. M. Box 32, 17-19 Otis street, three-

story wooden dwelling owned by Harry Schlager, occupied by A. R. Spear, Orest Tregoli and Myrr Grodzen; damage to building, \$1,097; to contents, \$100. Cause, spark from tobacco pipe.

February 27, 2.40 A. M. Box 116 and 156, 89 Mystic avenue, wagon repair shop, owned by H. E. Wright & Son, occupied by Welch, Dwyer & Grady; damage to building, \$1,280; to contents, \$1,950. Cause, incendiary.

March 6, 9.40 A. M. Box 36, 138 Central street, garage owned and occupied by E. J. Kraetzer, adjoining dwelling 140 Central street, owned and occupied by Edgar Fernald; damage to buildings, \$285; to contents, \$1,000. Cause, oil heater in garage drying varnish.

April 25, 12.48 P. M. Box 38, second alarm 12.52 P. M., corner Cedar and Alpine streets, hay and grain sheds, owned and occupied by William J. Thompson; damage to building, \$1,904; to contents, \$1,176. Cause, incendiary.

April 27, 12.30 P. M. Box 25, general alarm sounded, 3-4 Union square, hay and grain sheds owned and occupied by Fulton O'Brien; damage to buildings, \$2,000; to contents, \$1,900; to exposed buildings, \$715. Cause, unknown, probably careless smoker.

May 13, 7.52 P. M. Box 114, general alarm sounded, 17 Poplar street, stable, barrel sheds and dwellings owned and occupied by Michael Gavin; damage to building, \$3,088; to contents, \$1,825. Cause, spark from tobacco pipe.

May 16, 8.38 P. M. Box 443, second alarm 8.45 P. M., car barns of the Boston Elevated Railway Co. on Dover street, occupied by F. A. Teele, Farnham & Mahoney, M. W. Palmer, American Wet Wash Laundry Co., and Home Laundry Co.; damage to building, \$1,000; to contents, \$3,477.56. Cause, incendiary.

July 28, 10.25 P. M. Box 37, 500 Broadway, three-story wooden dwelling and stores owned by J. A. Walker; store occupied by M. Bayard; damaged to building, \$395; to contents, \$3,125. Cause, incendiary.

August 3, 9.00 P. M. Box 24, wood sheds in Boynton's Yard, owned by I. J. Mullin; damage to buildings, \$1,350; to contents, \$1,200. Cause, defective wiring.

August 7, 9.00 A. M. Box 14, 128-A Cross street, three-story dwelling and stores owned by Charles Evans; occupied by S. Kreidberg, H. D. Wickham and J. A. Norris; damage to building, \$305; to contents, \$1,381.07. Cause, match in clothing being pressed.

September 4, 12.55 P. M., Box 326, 41 Meacham street, dwelling owned by Mrs. Sarah Checkoway, occupied by Jacob Faroloman and Samuel Bresnick; damage to building, \$835; to contents, \$250. Cause, spark from tobacco pipe.

September 14, 2.13 A. M. Box 214, 59-59-A Central street, Guild Hall building, owned by the Guild Association, occupied by Benjamin P. Sawyer and J. Ryan; damage to building, \$1,450; to contents, \$1,266.66 Cause, careless throwing away of cigarette.

September 14, 5.00 P. M. Box 23, 18 Webster street, stable owned by John P. Squire Estate, occupied by Frank Callahan and Cambridge Bag Wood Co.; damage to building, \$1,500 to contents, \$150. Cause, spark from tobacco pipe.

September 20, 7.28 P. M. Box 35, 95 Heath street, dwelling owned by Charles W. Knox, occupied by Benjamin Sherer; damage to building, \$1,505.40; to contents, \$690. Cause, going to closet with match.

October 4, 9.05 P. M. Box 23, 53 Willow street, stable and barrel sheds owned and occupied by Nathan Weiner; damage to buildings, \$650; to contents, \$870. Cause, smoking in stable.

October 13, 9.28 P. M. Box 324, 4 Florence terrace dwelling owned and occupied by Abram Weinberg; damage to building, \$1,418; to contents, \$445. Cause, unknown.

November 16, 1.38 P. M. Box 232, 362 Somerville avenue, store and dwelling owned by P. Volpe, occupied by I. Baum; damage to building, \$423; to contents, \$900. Cause, lamp explosion.

December 16, 4.56 P. M. Box 427, 17-19 Cutter avenue, dwelling owned and occupied by James M. Towle and Andrew A. Wilson; damage to building, \$1,750; to contents, \$900. Cause, overheated furnace pipe.

December 24, 3.17 A. M. Box 39, 330 Lowell street, dwelling owned by Elizabeth C. Lowrey, occupied by Peter Mulloney; damage to building, \$861; to contents, \$250. Cause, incendiary.

December 24, 11.49 P. M. Box 421, 59-59-A Central street, Guild Hall building owned by Somerville Guild Association, occupied by Benjamin P. Sawyer and J. Ryan; damage to building, \$486; to contents, \$550. Cause, careless throwing away of cigarette.

December 25, 12.20 A. M. Box 114, 120 Linwood street, dwelling owned by John P. Squire Estate, occupied by Michael Ellison; damage to building, \$750; to contents, \$566. Cause, incendiary.

False alarms are still too numerous and emphasis must again be laid upon an effort being made to stop this criminal thoughtlessness. The city is fast motorizing its apparatus, thereby installing finer and more expensive machinery and eternal care must be exercised to keep this class of apparatus in readiness to respond to legitimate alarms for fires. Appara-

tus responding to a false alarm may, through accident, be put temporarily out of service when its assistance at an actual fire would be of inestimable value.

Careless smokers have been responsible for a very considerable amount of the fire loss. Mercantile establishments should restrict the time and place, when and where its employees may smoke, and the use of cigarettes in such places should be strictly prohibited.

Defective chimneys and cellars littered with rubbish have contributed no small amount to the total loss. The adoption of an annual house-cleaning day with the co-operation of the health department, when all useless collections of old clothes, boxes, papers and rubbish in cellar and garret could be disposed of, would materially reduce this class of fires.

There have been 123 applications for bonfire permits, eighty-four of which were investigated and granted. The number of alarms from this cause has been very materially reduced, owing in a great measure to the activity of the police department in enforcing the "Setting of Fires" ordinance.

During June and July there was an epidemic of incendiarism in the Patch district, so-called, and the department was called upon two or three times daily to extinguish fires, the offices of the police and the state fire marshal being required to put a check upon them.

On March 18, there was delivered to the city from the American La-France Fire Engine Co., of Elmira, N. Y., a six cylinder, double tank combination chemical engine and hose wagon designed for service at the Central Fire Station, but the condition of the apparatus at Hose 5 Station was so insecure that this piece of apparatus was placed in service at that station on March 28.

Considerable attention has been given during the year to the up-keep and appearance of the apparatus: Hose 5 wagon was repainted and placed in Engine 2 station; Engine 4 wagon, painted and varnished; Engine 6 wagon, painted and varnished; Hose 3 painted and varnished, and Ladder 2 was given a thorough overhauling and painted and sent to the Union Square Station to replace Ladder 1, which has been unsafe and unfit for service for a long time.

The machine shop is demonstrating itself to be of the most valuable importance to the department. Owing to the installation of more and larger pieces of motor apparatus, the shop will be called into more frequent use, and for the purpose of meeting an exigency; it has been enlarged to twice its original size and equipped with every needed tool and machine to perform such work as can be satisfactorily done outside the manufacturers' machine shops.

Recommendations.

The enormous fire loss throughout the country is one of the paramount issues of the day and everything is being done to reduce it, and to that end all departments are motorizing their apparatus. Our city has made wonderful progress in this direction, resulting in a marked improvement in the efficiency of the department, and the motorizing of the whole department is desirable. This can be done with the most up-to-date equipment for a sum not exceeding \$38,500 and I suggest that, if it cannot be done in one year, as much as practicable be done each year.

I recommend the immediate motorizing of the horse-drawn combination chemical engine and hose wagon located on Marshall street, Winter Hill. This can be done by the purchase of a chassis, the labor of changing same being done in the department machine shop. This piece of apparatus is scheduled to report to six Medford boxes on first alarms. Alarms from these boxes, together with the Somerville boxes and still alarms responded to in this section has obliged this company to climb Winter Hill sixty-six times this year.

Complete efficiency is the goal for which all fire departments are striving, and to that end, besides having up-to-date machinery, it is necessary to have Johnny-on-the-spot men. It is therefore necessary that the force consist of all permanent men to respond with the rapid moving apparatus, which cannot stop to pick up men while en route to a fire, as has been the custom with horse-drawn apparatus. This can be done by discontinuing the call force, consisting of thirty (30) men, whose salaries total \$6,000 and adding eighteen (18) men to our permanent force, whose salaries the first year will be \$16,200 or an added increase of \$10,200 to the maintenance the first year.

With the advent of motor driven apparatus, a quicker striking fire alarm service is imperative if we intend to get the best, in fact only results, of this improved style of apparatus. The foundation upon which the fire department rests is its fire alarm service. Our present system is very far behind the times and our efficiency depends upon a new and complete equipment.

Somerville's fire hazard is very high owing to lack of defined fire limits and districts, building laws that do not provide adequately against fire, the chief concern seemingly being security against collapse, the large percentage of frame dwellings with shingled roofs, and the small distance between buildings.

I recommend the re-enactment of that part of Chapter 20, Section 60 of the revised ordinances relative to repairing roofs, the shingling ordinance, so-called, also that all side walls of all wooden buildings shall be placed not less than five feet from the line, and where a wooden building is already erected upon

an adjoining lot, there shall be left between the walls of the building erected and the one to be erected if of wood, a clear, open space of ten feet; if a brick wall is substituted for a wooden wall, there shall be no opening in brick wall if less than ten feet from adjoining building.

Again I urge the enactment of an ordinance requiring the inspection of buildings by the fire department. On May 1, I submitted a draft of an inspection ordinance to the board of aldermen. I urge this, or one of similar import be given early attention. Inspection of buildings by the officers and members of the fire department is of the utmost importance, in that they may inform themselves relative to entrances, stairways, trapdoors, elevators, and passageways, the location of cut-offs to gas, water and electricity, and furthermore, ascertain and cause to be corrected any conditions liable to cause fire or any violations of any ordinance of the city affecting the fire hazard.

In Conclusion.

The personnel of the department and the character and appearance of the men together with the fire fighting equipment is of a very high standard; it is very gratifying to be able to state that the efficiency and discipline of the department are unusually good. Too much praise cannot be accorded the officers and members of the department for their readiness and promptness in the performance of the department work.

To His Honor, the Mayor, the Public Safety Committee and the Board of Aldermen unusual credit is due for the generous response to the recommendations in the report of the previous year, all of which has tended to the advancement and greater efficiency of the department.

Respectfully submitted,

SEWALL M. RICH,

Chief Engineer.

REPORT OF THE CHIEF OF POLICE.

OFFICE OF CHIEF OF POLICE, }
CITY OF SOMERVILLE, January 20, 1914. }

To the Honorable, the Mayor, and Board of Aldermen of the City of Somerville:—

Gentlemen,—I herewith respectfully submit for your consideration my fifth annual report as chief of police, giving in detail the amount of work performed by the police department for the year ending December 31, 1913:—

Arrests.

Whole number of arrests made	1,480
With and without warrants	1,081
On summons and notification	399
	1,480
Males	1,400
Females	80
	1,480
Americans	985
Foreign born	495
	1,480
Residents	920
Non-residents	560
	1,480

1.—Crimes and Offenses Against the Person.

Assault	1
Assault on officer	1
Assault with dangerous weapon	4
Assault with intent to murder	2
Assault with intent to rape	2
Assault with intent to rob	1
Assault and battery	106
Assault and battery on officer	1
Manslaughter	2
Rape	2
	122

2.—Crimes and Offenses Against Property.

Arson, attempt	2
Breaking and entering	64
Breaking and entering railroad car	3
Breaking glass, wantonly	8
Burning building	2
Defacing voting list	1
Fraud	1
Larceny	92
Larceny from person	3
Larceny in building	3
Malicious mischief	3
Mortgaged property, concealment of	1
Carried forward	183

Brought forward	183
Receiving stolen property	7
Trespass	17
Unclean milk bottles, in possession of	1
Unlawful appropriation of horse	4
Unlawful taking of team	2
Unlawful use of registered milk cans	5
Wilful injury to real estate	2
	<hr/>

221

3.—Crimes and Offenses Against Public Order, etc.

Bail surrender	5
Bastardy	5
Capias	10
Carrying revolver without license	1
City ordinances, violation of	102
Cruelty to animals	2
Default	5
Delinquent children	2

Violation of milk laws	9	
Violation of parole from industrial school	1	
Violation of public park rules	2	
Violation of school law	1	
Violation of terms of probation	9	
Wayward child	1	
Walking on railroad track	16	
Witness to manslaughter	1	
		1,137

Recapitulation.

(1) Crimes and Offenses Against the Person	122	
(2) Crimes and Offenses Against Property	221	
(3) Crimes and Offenses Against Public Order, Etc.,	1,137	
Whole number of arrests made		1,480
Bailed to appear at other courts	5	
Cases dismissed in police court	11	
Cases in which nolle prosequi was entered	10	
Delivered to jail at East Cambridge, bail surrender	3	
Delivered to jail at East Cambridge, capias	1	
Delivered to jail at East Cambridge, vio., probation,	1	
Delivered to superior court, bail surrender	2	
Delivered to superior court, capias	4	
Delivered to police court Somerville, capias	1	
Delivered to police court Somerville, default	4	
Delivered to United States navy yard, deserter	1	
Released from custody, violation of probation	1	
Released by probation officer, for drunkenness	27	
Surrendered to other officers, institutions, etc.	66	
Witness in manslaughter case, held under bonds	1	
Cases in which no prosecution was made in Somerville		138
Number of cases held for trial		1,342

Note.—Two hundred and seventeen of the above number of cases were juveniles and delinquents.

Miscellaneous Reports.

Abandoned automobiles found	2
Accidents reported	203
Amount of property reported stolen	\$15,504.37
Amount of stolen property recovered	13,058.91
Amount of property reported lost	894.47
Amount of lost property recovered	91.49
Amount of property reported destroyed and damaged	111.50

Angora cat found	1
Assault, attempt	1
Assaults	11
Assault and battery	1
Assault with dangerous weapon	2
Attempts to break and enter, false alarm of	3
Attempts to break and enter	23
Attempt to break open gas meter	1
Attempts to commit arson	2
Attempts to commit larceny	4
Attempts to commit suicide	5
Attempt to rob	1
Automobile, reckless driving of	1
Bogus gas inspector	1
Bridge steps dangerous, from snow	1
Building broken and entered, false alarm of	1
Buildings broken and entered, nothing stolen	30
Building damaged by wind	1
Building dangerous	1
Buildings erected, repaired, etc.	5
Buildings found open	365
Burglary, false alarm of	1
Chimney blown down	1
Coon cat missing	1

Dead horse reported	1
Dead body found	1
Defective billboard	1
Defective boundary stone	1
Defective bridges	7
Defective catch-basins	12
Defective fire alarm box	1
Defective gas gate box	1
Defective hydrants	3
Defective manhole covers	7
Defective park fence	1
Defective poles	7
Defective sidewalks	352
Defective signs and sign posts	10
Defective streets	84
Defective subways	2
Defective telephone service in police signal system	1
Defective water gate boxes	14
Defective water pipe	1
Defective wires	29
Disturbances suppressed	8
Dogs killed	12
Dogs lost	3
Fence dangerous	1
Fires, alarms given for	17
Fire, false alarms of	15
Fires, needless alarms for	2
Fires, incendiary	7
Fires reported	93
Fires, still alarm for	2
Fire alarm boxes, glass broken	10
Fraud	3
Gas leak	1
Goat killed	1
Heat prostration	1

Horses killed	2
Larceny attempt	1
Larceny, false report of	1
Larcenies, no value given	23
Larcenies reported	384
Lost children	4
Lost children found	30
Malicious mischief	5
Missing persons	21
Missing persons found	12
Neglected children	2
Obstructions in streets	22
Obstructions in streets, lighted	2
Obstructions in streets, removed	2
Obstructions on sidewalks	3
Offal uncollected	1
Panes of glass broken	55
Park walk dangerous	1
Permits granted to labor on Lord's Day	88
Persons bitten by dogs	2
Persons helped home	2
Personal property, injury to	1
Property damaged, no value given	5
Property lost, no value given	16
Property found, no value given	20
Prospect Hill tower, railing dangerous	1
Rape	1
Robberies	2
Runaway boys	2
Runaway boys found	3
Runaway teams stopped	5
Sick horse	1
Sidewalks dangerous from snow and ice	31
Slot machines broken	4
Still born infant found	1
Stray dogs	3
Stray dogs found	2
Stray horse	1
Stray horses found	3
Stray teams	2
Stray teams found	5
Street lights reported	4,256
Strike	1
Sudden deaths	3
Suicides	3
Suicide, threatened	1
Summonses served for witnesses and defendants to appear at court at other places	95
Suspicious persons	8

Performance of Duties.

The officers have all performed their trying duties in a creditable manner and the city has been very orderly and I believe there is no city of its size in the country that on the whole is better than this city in this respect.

The liquor laws have been well enforced and the city has been very free from illegal liquor traffic.

The juvenile offenders have been of much annoyance to citizens as usual, yet I think there has been a marked improve-

ment the past year in dealing with this class of offenders after they have been before the court, due to the supervision exercised over them by the two probation officers.

Three officers were detailed for duty at Milford, Mass., for a period of three weeks, to assist the police there during a strike in that town.

A large number of incendiary fires were set during a period of the year. A man was arrested and held for the grand jury, being later indicted and tried in the superior court—the jury disagreed and he was released from custody and on the same day set another fire and was arrested again, bailed and finally sent to an insane hospital.

The large amount of travel through Somerville by automobiles has necessitated the detailing of officers for traffic duty and this duty seems to be increasing.

The moving picture houses, dances, entertainments, etc., have called for a large number of extra details of police.

Recommendations.

I wish to renew my request for more motor vehicles and improvements to be made in the police building, such as laying new floors, painting and refinishing the interior of the building.

The appointment of additional sergeants and patrolmen.

Conclusion.

I wish to express my thanks to the Mayor, Honorable Charles A. Burns, for his hearty support of all good work performed by the members of this department; to Judge L. Roger Wentworth; Clerk of Courts, Daniel H. Bradley; Probation Officers William P. Jones and James T. Mulroy, and to my associates in the police department who have assisted by their fidelity to duty.

Respectfully submitted,

CHARLES A. KENDALL,

Chief of Police.

REPORT OF SEALER OF WEIGHTS AND MEASURES.

OFFICE OF SEALER OF WEIGHTS AND MEASURES, }
City Hall Annex, Somerville, January 1, 1914. }

To His Honor, the Mayor, and the Board of Aldermen:—

The following report of the sealer of weights and measures for the year 1913 is respectfully submitted:—

Section 21, chapter 62, of the Revised Laws provides that sealers of weights and measures shall annually give public notice by advertisement, or by posting, in one or more public places in their respective cities and towns, notices to all inhabitants or persons having usual places of business therein who use weights, measures or balances for the purpose of selling goods, wares, merchandise, or other commodities or for public weighing to bring in their weights, measures and balances to be adjusted and sealed. Such sealers shall attend in one or more convenient places, and shall adjust, seal and record all weights, measures and balances so brought in.

Section 34 of the same chapter provides that each sealer of weights and measures, including the county treasurers, shall receive a fee of one dollar for sealing each platform balance if weighing five thousand pounds or more, and fifty cents if weighing less than that amount, and three cents each for sealing all other weights, measures, scales, beams or balances. He shall also have a reasonable compensation for all necessary repairs, alterations and adjustments made by him.

Where weights, measures and balances are sealed as provided in Section 21 (that is, brought to the office), no fee is charged for sealing.

In compliance with the foregoing Section 21, the customary notice was given by advertising in the Somerville Journal and the Somerville Reporter in March, 1913.

During the year the sealer visited all places in the city where goods were brought or sold, tested all scales, weights and measures, sealed those which were found correct, and condemned all found beyond repair and useless.

214 scales, weights and measures were adjusted before sealing, thirty-nine scales were tagged for repairs, sixteen of which were repaired as ordered, and the remaining fifteen put out of use.

Work done in weights and measures during the year 1913:—

	No. of Tests Made at Office.	No. of Tests Made out of Office.	
Number of scales sealed	523	1,829	
Number of weights sealed	290	4,374	
Number of dry measures sealed	140	116	
Number of tin liquid measures sealed	8,056	1,415	
Number of glass liquid measures sealed	1,728	0	
Number of yard sticks sealed	0	171	
Number of coal and berry baskets sealed	5	0	
Number of miscellaneous sealed	9	9	
Number of store weighings	0	4,150	
	<hr/>	<hr/>	
Total number of all kinds sealed	10,751	12,064	22,815
Number of scales adjusted and sealed	43	34	
Number of weights adjusted and sealed	38	73	
Number of dry measures adjusted and sealed	0	0	
Number of liquid measures adjusted and sealed	26	0	
	<hr/>	<hr/>

Printing books and supplies	120 85	
Amount paid for team	353 50	
Amount paid for helper	33 50	
Salary of sealer	1,100 00	
Salary of deputy sealer	900 00	
	<hr/>	2,533 66
		<hr/>
Unexpended balance		\$442 24

JOHN H. DUSSEAULT,
Sealer of Weights and Measures.

REPORT OF THE CITY SOLICITOR.

Somerville, January 15, 1914.

To the Honorable, the Mayor, and Board of Aldermen of the City of Somerville:—

The following is my report as city solicitor for the year 1913:—

Actions in court and claims for injuries received by reason of defects in public ways were settled for \$30, \$50, \$56, \$60, \$87.50, \$100, \$125, \$225, \$500, \$600, \$600 and \$800. Three of these settlements were made without expense to the city, an abutting owner making the payment of \$50 and the Boston Elevated Railway Co. making the payments of \$225 and \$800. An action brought because of a defect in a public way at an approach to a railroad bridge was discontinued without expense to the city.

An action brought by the town of Norwood to recover expenditures made for the support of a poor person was discontinued without expense to the city.

A petition for a writ of mandamus brought against the mayor to compel the re-instatement of a patrol driver in the police department was dismissed by a justice of the supreme court principally for the reason that the petitioner had not been lawfully employed.

The work of construction in the abolition of grade crossings at Medford street and at Dane street is practically completed. Work has not yet begun at Park street. An action brought by J. Walter Sanborn for damages to land and buildings on Prospect street, in which a verdict for \$3,011.25 was given by the jury, has been settled by the payment of \$2,900, without costs or interest. Many claims for land damages at various crossings have been settled during the year by agreement with the owners.

Two bills before the legislature were successfully opposed, one providing for a change in the basis of apportioning the expenses of the Metropolitan Water District, whereby a larger share would have been placed upon this city, the other requiring various cities and towns to pay a part of the expenses of constructing and maintaining bridges over the Charles River between Cambridge and Boston. A special act was secured to provide for the care of surface water at the new grade of Medford street. An amendment to the building laws of the state was secured, whereby the reasons have been taken away for which the court held to be invalid an ordinance of this city in regard to non-combustible roof coverings.

Very respectfully,

FRANK W. KAAH,
City Solicitor.

REPORT OF THE CITY CLERK.

OFFICE OF THE CITY CLERK, }
January 1, 1914. }

To the Honorable, the Mayor and the Board of Aldermen:—

Gentlemen,—The following is respectfully submitted as the forty-second annual report of the city clerk of the city of Somerville, and is for the year ending December 31, 1913.

All the receipts above specified, except for dog licenses	4,122 37	
	<hr/>	
		\$4,427 77
Total payments		<hr/> \$7,797 97
Balance, January 1, 1914, being for dog li- censes issued in December, 1913:—		
53 males at \$2.00	\$106 00	
	<hr/>	
Amount carried forward	\$106 00	

Amount brought forward	\$106 00	
13 females at \$5.00	65 00	
1 spayed at \$2.00	2 00	
	<hr/>	
	\$173 00	
Less city clerk's fees paid to the city treasurer, 67 at \$.20	13 40	
	<hr/>	
		<u>\$159 60</u>

There have been issued during the year 207 resident hunters' certificates at one dollar each, the fees for which have been paid monthly to the commissioners on fisheries and game of the commonwealth; total, \$207.

Licenses and Permits.

Besides the licenses mentioned in the foregoing list of receipts, licenses and permits have been granted by the board of aldermen, without charge, as follows:—

Auctioneers (to veterans of the Civil War)	2
Children under fifteen to take part in entertainments	7
Newsboys	35
To blast rock or stone	7
To erect or use buildings for gasoline	27
To hold religious services in streets and squares	3
To move buildings through streets	5
To parade in streets, with music, etc.	10
To hold open-air meetings	4
To give band concerts (one permit for seven concerts)	1
To build coal vault in sidewalk	1

Gas and Pole Locations.

The Cambridge Gas Light Company and the Charlestown Gas and Electric Company have been granted permission to lay gas mains in sundry streets.

Permission has also been granted The Edison Electric Illuminating Company of Boston and The New England Telephone and Telegraph Company of Massachusetts for the erection of poles and for the attachment of wires and fixtures, and to the West End Street Railway Company for track locations and electric rights in various streets.

In every order of the board of aldermen granting such permission to use the streets provision is made for the protection of the interests of the city and a suitable agreement, satisfactory in form to the city solicitor, must be filed with the city clerk before the order can become operative.

Births.

1913.

Number of births reported by physicians and midwives for 1913:—

Males	897
Females	846

A canvas of the city is at present being made under the direction of the city clerk as required by section 5, chapter 29, of the Revised Laws, to ascertain the facts required for record relative to all children born therein during the year.

As information derived from such canvas will not be available in time sufficient for its incorporation in this report, a statement in full of the births of 1913 will be given in the city clerk's report for the year 1914.

1912.

The following is a statement in full of the births for 1912:—

Number of births (exclusive of still-births) in Somerville in 1912 registered	1,808
More than previous year	52
Males	935
Females	873
	<hr/> 1,808
Born of American parents	679
Born of foreign parents	756
Born of American father and foreign mother	164
Born of foreign father and American mother	197
Born of American mother and father of unknown nationality	10
Born of foreign mother and father of unknown nationality	1
Born of parents of unknown nationality	1
	<hr/> 1,808
Number of still-births in Somerville in 1912 registered	72
Number of births in other places in 1912 registered	305
	<hr/> 2,185
Number of cases of twins	20

Marriages.

Number of intention certificates issued in 1913	914
More than previous year	1
Marriages registered	971
More than previous year	13
Both parties American	566
Both parties foreign	183
American groom and foreign bride	102
Foreign groom and American bride	120
	<hr/> 971 couples
First marriage of	1,755
Second marriage of	170
Third marriage of	16
Fourth marriage of	1
	<hr/> 971 couples

Deaths

(Exclusive of still-births.)

Number of deaths in Somerville in 1913	993
More than previous year	10
Males	490
Females	503
	<hr/> 993

Under ten years of age	227	
10 and under 20 years of age	26	
20 and under 30 years of age	46	
30 and under 40 years of age	72	
40 and under 50 years of age	72	
50 and under 60 years of age	115	
60 and under 70 years of age	162	
70 and under 80 years of age	173	
80 and under 90 years of age	83	
90 years of age and over	17	
	<hr/>	993
Age of oldest person deceased	98 yrs.	
Born in Somerville	219	
Born in other places in the United States	435	
Of foreign birth	335	
Birthplace unknown	4	
	<hr/>	993
Number of deaths in January	86	
“ “ “ “ February	121	
“ “ “ “ March	84	
“ “ “ “ April	89	
“ “ “ “ May	71	
“ “ “ “ June	75	
“ “ “ “ July	69	
“ “ “ “ August	78	
“ “ “ “ September	69	
“ “ “ “ October	73	
“ “ “ “ November	72	
“ “ “ “ December	106	
	<hr/>	993

The number of still-births recorded during the year was fifty-three. In addition to the above, 189 deaths which occurred elsewhere and two removals were recorded in Somerville, almost the entire number of persons deceased having been residents of this city.

* Census.

ORDINANCES.

Somerville, January 1, 1914.

The following ordinances have been adopted since the printing of the annual reports for the year 1912:—

No. 47.**An Ordinance Relative to Garages.**

Be it ordained by the Board of Aldermen of the City of Somerville, as follows:—

Section 1. The exterior and interior walls of every garage for more than two automobiles shall be constructed of fireproof materials.

Every garage for less than three automobiles may be of wood frame construction if the exposed inner surfaces of walls and roof throughout are covered with non-combustible material satisfactory to the inspector of buildings, and if so constructed shall be not less than five feet from the line of the adjoining lot and not less than ten feet from any other building.

The exterior wall of every garage, if said wall has a window or any other opening, shall be constructed at least ten feet from any other building.

Every garage shall be provided with a system of ventilation satisfactory to the inspector of buildings. The floors of every garage shall be of concrete, granolithic or asphalt. Every garage shall have a roof of non-combustible, or fire-resisting material satisfactory to the inspector of buildings. No method other than electric lighting shall be used to light any garage. No fire shall be made or maintained in the same room with an automobile, motor car or other vehicle hereinafter described or in any place directly connected with said room.

The use and occupation of every garage shall be subject to such further restrictions and regulations as the board of aldermen shall impose.

This ordinance shall apply to every garage hereafter constructed and to every building hereafter used as a garage and not so used at the passage of this ordinance.

By the word "garage" is meant a building in which an automobile, motor car or other vehicle charged with or containing a volatile inflammable liquid for fuel or power is kept, whether said automobile, motor car or other vehicle is kept for use, for sale, for rental, for exhibition, for demonstrating or for any other purpose, and whether temporarily or regularly.

By the words "volatile liquid" is meant any liquid that will emit inflammable vapor at a temperature below one hundred degrees Fahrenheit when tested in open air.

Section 2. Any person who shall violate any provision of this ordinance shall be liable to a penalty of not more than twenty dollars for each offense.

Section 3. This ordinance shall take effect upon its passage.

Approved May 3, 1913.

No. 48.**An Ordinance Concerning Ashes and Offal.**

Be it ordained by the Board of Aldermen of the City of Somerville, as follows:—

Section 1. The following rules relative to the collection of ashes, rubbish and garbage are hereby established and shall be observed:—

A. Ashes, floor sweepings, sawdust, glass, shells, metals, tin cans, and other non-combustible waste things must be kept free from the things mentioned in paragraphs B. and C., and on the day for collection be placed on the outer edge of the sidewalk in suitable receptacles not larger than an ordinary flour barrel.

B. Paper, rags, cloth, leather, straw, excelsior, and similar things must be kept free from the things mentioned in paragraphs A. and C., and on the day for collection be placed on the outer edge of the sidewalk in suitable receptacles or packages, so secured that they will not be blown about or scattered in handling.

C. Garbage, table waste, vegetables, meats, fruit, fish, bones, fat and similar things must be kept free from the things mentioned in paragraphs A. and B. in suitable covered receptacles on the premises of the owner.

Collections will not be made by the city unless the foregoing provisions are complied with.

Earth, gravel, brick, mortar, stones, lime, plaster, cement, concrete, refuse materials from repairs or construction of buildings, refuse materials from manufacturing and business establishments, dead animals, and ashes other than those accumulated from the burning of coal, wood or other fuel for heating or domestic purposes will not be collected by the city.

Fruit tree trimmings, vine cutting, and yard cleanings will be collected only during the spring and summer months.

Section 2. This ordinance shall take effect upon June 1, 1913.

Approved May 3, 1913.

Ordinance No. 49.

Be it ordained by the Board of Aldermen of the City of Somerville, as follows:—

Section 1. Section 12 of Chapter 20 of the Revised Ordinances of 1911 is hereby amended by striking out the word "twelve" and inserting in place thereof the word "fourteen," so that said section shall read as follows:—

Section 12. The cellar of every building where the grade or nature of the ground requires shall be sufficiently protected from water and dampness by a bed at least two inches thick over the whole, of concrete cement and gravel, tar and gravel or asphalt, or by bricks laid in cement. No cellar or basement floor of any building shall be constructed below the grade of fourteen feet above mean low water; provided, however, that the inspector of buildings may authorize cellars, no parts of which are to be used as living or sleeping rooms, to be constructed so much below said grade as he may designate. All metal foundations and all constructional ironwork underground shall be protected material approved by the inspector of buildings.

Section 2. This ordinance shall take effect December 1, 1913.

Approved October 14, 1913.

No. 50.**An Ordinance to Amend Chapter XXVII of the Revised Ordinances of 1911.**

Be it ordained by the Board of Aldermen of the City of Somerville, as follows:—

Section 1. Section 3 of Chapter XXVII of the Revised Ordinances of 1911 is hereby amended by adding at the end of said section the following:—

To erect or use building for the storage of gasoline, \$1.00.

To keep open place of business on the Lord's day for the sale of ice cream, confectionery, soda water and fruit, \$5.00.

Section 2. This ordinance shall take effect upon its passage.

Approved October 25, 1913.

No. 51.**An Ordinance Creating a Planning Board.**

Be it ordained by the Board of Aldermen of the City of Somerville, as follows:—

Sect. 1. The planning board which this city is required to create under the provisions of chapter 494 of the acts of the legislature of Massachusetts for the year 1913 shall be composed of seven residents of this city. Women as well as men shall be eligible to be members of the board.

Sect. 2. The members of the board shall be appointed as soon as this ordinance takes effect, four to serve until the appointment and qualification of their successors in the year 1914, and three to serve until the appointment and qualification of their successors in the year 1915, and after such first appointment they shall be appointed yearly four in one year and three in the alternative year to serve for two years and until the appointment and qualification of their successors. Any vacancy shall be filled by appointment for the balance of the unexpired term.

Sect. 3. The board shall by viva voce choose a chairman and a secretary. The secretary shall not be a member of the board and may receive such compensation as the board may determine.

Sect. 4. This ordinance shall take effect upon its passage.

Approved November 19, 1913.

No. 52.**An Ordinance Concerning Hawkers and Pedlers.**

Be it ordained by the Board of Aldermen of the City of Somerville, as follows:—

Section 1. Section 1 of Chapter XXIX of the Revised Ordinances of 1911 is hereby amended to read as follows:—

No hawker or pedler shall expose for sale or sell any of the articles enumerated in section 15 of chapter 65 of the Revised Laws as amended by chapter 345 of the Acts of the Legislature of Massachusetts of the year 1906 unless he has caused to be recorded his name and place of residence with the board of health and unless he has been assigned a number by said board and unless he holds in his possession at all times while he exposes for sale or sells as aforesaid a valid certificate of such record issued by said board.

A fee of \$1 shall be paid said board for the certificate.

All certificates shall expire and cease to be valid at 12 o'clock noon on the first day of May annually. Said certificate shall be exhibited by him whenever requested by a police officer, or the sealer of weights and measures, or any agent or member of the board of health. He shall procure from the sealer of weights and measures a certificate that all weights, measures and balances used by him have been properly inspected and sealed, and the presence on the team, cart or person of said hawker or pedler of unsealed weights, measures or balances shall render his certificate void.

Sect. 2. This ordinance shall take effect upon its passage.

Approved December 27, 1913.

FREDERIC W. COOK,
City Clerk.
