P E T I T I O N

9 February 1950

Colonel F. A. Hollingshead,
Chief of the Kanto Civil Affairs Region

We have the honor of requesting your kind attention to the following matter.

To complete the irrigation and drainage facilities of arable land is an indispensable condition for increase and preservation of food production for a highland as Nagano Prefecture. We, farmers of Nagano Prefecture, have strived for increase of food production and completion of food delivery after utilizing in maximum our mountain farmland, which differs from those of the other prefectures in geographical features, and managing our irrigation and drainage facilities at all costs.

6% of the paddy rice-field in Nagano Prefecture have to rely upon the electric power in their irrigation and drainage. Field facilities management expenses in these areas have been greatly increased owing to high cost of electric power charge raised repeatedly since 1945, and production costs of their crops are much larger when compared with those of other areas. But the Government's purchase price of delivered crops from these areas have been decided without any deliberation on this fact. And, moreover, the cost exemption in imposition of the agricultural income tax is very small. It is the great disadvantage for these areas to be treated in the same way with the other areas which share in the benefit of nature. It has

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

been the severe sufferings for the farm management of these areas.

Lately the Government has steeply raised the rate of electric power and has abolished the rate discount system of power consumed for irrigation and drainage. Then the charge of power to be used for management of the farm facilities in these areas will be increased, as shown on the tables attached herewith, from 2 to 8 times as much as before. Such being the case, serious consequences to production and delivery of food will, we fear, be brought out, inasmuch as the farmers' husbandry in these areas is forced to be deadlocked and their cultivation be abandoned. To subsidize the farmers' irrigation and drainage management expenses by the national Treasury and to decrease the electric charge of irrigation and drainage facilities are the most urgent matter for elevation of the farmers' social position and development of national economy.

We, the undersigned farmers of Nagano Prefecture, should feel very much obliged if you would take pertinent measures in connection with the above mentioned matter.
