DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

O Apps W. O

22 October 1948

SUBJECT: Re holding the opening Ceremony of the Model Health Center

TO : Commanding Officer
Shikoku Military Government Region

Since the Kotohira Health Center was designated as a model health center in Kagawa Prefecture, we are thanking you very much for your special support and direction and now it is nearly complited.

We are holding the opening ceremony under the mentioned program and shall be much obliged if you kindly present at the ceremony with a view of stimulating the same working.

Keikichi Minuhara
Governor, Kagawa Prefecture

Date: 0930, 1st November 1948

Place: Auditorium of the Kotohira Health Center

After the ceremony, continually to the 3rd, the demonstration will take place under the program attached.

The First Day (1 Nov. '48)

| | | |
|---|---|---|
| 0930 - 1030 | Explanation about the model health center. | By chief, Prefectural Department(Health) |
| 1030 - 1130 | Explanation about the public health nurse working. | By Nishimoto, Chief Nurse |
| 1130 - 1200 | Explanation about the receiving arrangement by health center. | By Mr. Toda Head of Kotohira Health Center |
| | .( Resting ) | |
| 1300 - 1330 | Re TB. preventive working & TB. consultation service. | Dr. Takaki |

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

| | | |
|---|---|---|
| 1330 - 1400 | Practice for TB. patients' house visiting | Public Health Nurses |
| 1400 - 1430 | Explanation about VD. | Dr. Ikihara |
| 1430 - 1510 | Practice for VD. patients' house visiting | Public Health Nurses |
| 1510 - 1540 | Re dental health | Akamatsu, dentist |
| 1540 - 1690 | TB. judge (playing) | Kishimoto, chief nurse |

The 2nd day ( 2 Nov. '48)

| | | |
|---|---|---|
| 0900 - 0930 | Explanation about Health Education | Dr. Koyama |
| 0930 - 1000 | Doll playing practice | Public Health Nurses |
| 1000 - 1100 | TB. Artificial Pneumathrax Dental clinic practice | |
| 1100 - 1130 | Explanation about Nutrition | |
| 1130 - 1200 | Nutrition clinic connection practice training | |

( Resting )

| | | |
|---|---|---|

| 1400 - 1430 | Baby clinic training (internal) | Dr. Ikihara |
| 1430 - 1530 | Group diagnosis | Dr. Takagi and Engineer Yamaguchi |
| 1530 - 1600 | Activities of Sanitary team | Mr. Shinohara |

The 3rd day (3 Nov. '48)

| | | |
|---|---|---|
| 0900 - 0930 | Sanitary statistics | Yano, officer |
| 0930 - 1000 | Prevention of epidemics | Engineer, Kagawa |
| 1000 - 1030 | Examination test. | Engineer, Kagawa |

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

| | | |
|---|---|---|
| 1030 - 1100 | Food-staff, veterinary | Engineer, Ando |
| 1100 - 1200 | Preventive epidemic demonstration | Kagawa, Takaki and Koyama |

( Resting )

| | | |
|---|---|---|
| 1300 - 1330 | Budget, supply (General affair Dept.) | Chief, Sano |
| 1330 - 1500 | Food-staff, sanitation supervision training (external) | |
| 1500 - 1530 | Discussing Contest. | |

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

## ORGANIZATION OF MODEL HEALTH CENTER

The details involved in getting a model health center set up so that you can organize the actual services, of course, vary. Every place will have different problems. With that in mind, I will pick for my subject one specific health center and the procedures necessary to set it up according to model standards.

Kotohira Health Center was picked in Kagawa Prefecture as the model because it had a fair building to start with, sufficient rooms were available for all clinics and it only needed to be renovated, cleaned up and a few additional rooms added to serve very statisfactorily as a rural health center building. Dr. Jope, the Regional Health Officer, made the decision to use the Kotohira Health Center as the model for the above reasons. However, the local health officer decides that if it was going to be a model health center it must be a new building. He procedes immediately to get a budget of ¥6,000 passed by the local assembly. The greater part of this budget was for the building of this new building. Much effort was put forth by the Regional Health Officer and the Regional Nurse in order to make the local health officer see that only additions were needed and not a brand new building and that more of the money should be utilized for equipment and services. It finally resulted in a conference with the Governor and everything was smoothed out. Proper renovations, additional rooms, and etc., are now progressing rapidly. The health center will open within the next few weeks and at present is being used as a center for demonstrations in order to perfect their services so that when the formal opening arrives they will be letter perfect in their local organization.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

In organizing the nursing services it was first necessary to ascertain the number of villages and population, the number of nurses in both health centers, villages and school, andthe number of doctors and other personnel available. After securing these figures the area was divided into districts according to population. Many other things had to be taken into consideration; such as roads, available transportation etc. The map that you see here is the final plan for the districting of the nurses. You will note that two areas are covered only by village nurses. The village mayor or town chief was seen and he is allowing his nurses to work as part of the health center under the supervision of the health officer and head nurse. The calendar you see shows how clinical nurses have been distributed over the entire area; each nurse knows exactly what days and what village she will have and specific clinics and what doctor will be coming to that clinic. We are encouraging the nurses to live in their area and when she is not occupied by the scheduled clinic in her area to devote her time to the general organization, home visiting, health education and the various other health services. Since we are particularly short of nurses and there are two clinical nurses hired by the health center, they will be trained to do the clinical services within the health center building itself. We have 130 pneumothorax a week. One of the clinical nurses is assigned to this clinic as it is held everyday. The other nurse is assigned to the health center building to keep supplies ready, and to work in other clinics as needed. The town of Kotohira has its nurse the same as any other village. The number of clinics, number of nurses has been planned according to population. Most of the clinics are being held out in the area rather than in the health center itself. All of the clinical work for the town of Kotohira will be held in the health center.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

The health center itself will also be used for demonstrations for other health center nurses and doctors.

Every health center has to be planned according to the population, the number of nurses and the needs of the community. No one health center can be an exact model for another, but the basic concepts of a good program can be demonstrated and used as a pattern by other health center.

2. The following figures were received from the Welfare Ministry and they might be of interest.

| Prefecture | No. of P.H.N. | No. of P.H.N. employed by H.C. | No. of H.C. | No. of P.H. Nurses' bags applied for to Ministry |
|---|---|---|---|---|
| Ehime | 381 | 50 | 15 | - |
| Kagawa | 151 | - | 8 | 15 |
| Kochi | 133 | 58 - | 5 | 40 |
| Tokushima | 156 | 37 | 7 | - |

3. The following information was received from Eighth Army Headquarters. It is a list of nurses employed in the prefectures by the Reclamation Bureau under the Ministry of Agriculture and Forestry. These are supposed to be public health nurses, however they have had practically no training in public health nursing and it seems that all effort should be made to contact

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

these nurses and acquaint them with the health center within their area and encourage them to work in cooperation with that health center. There is also information that the Reclamation Bureau plans on setting up health centers of their own. This seems like a duplication of effort and with proper orientation of these nurses into real public health work, a better program would be, as suggested above, cooperation with the existing health centers.

| Prefecture | Name of District | Location |
|---|---|---|
| Ehime | Ozu | Kita-gun, Ozu-machi |
| " | Futatsuno | Higashiuwa-gun, Nomura-machi |

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

28 June 1949

SUBJECT: Clinical Nurse Instructors Course

TO: Regional Nurses

1. A four months dinical nurse instructors course is being planned by the Nursing Section, Welfare Ministry, Tokyo. Exact date (probably September) and name, location of institution where course is to be held will be announced later. The prefectural public health departments will be notified.

2. The course is to be financed by the Welfare Ministry and the prefectural government. Each prefecture will be asked to send one nurse. The name of nurse with record of physical examination, educational and experience background to be mailed to Nursing Section of the Ministry. The nurse should be a high school graduate or its equivalent (special nursing courses or good clinical nurse experience). This course will follow Miss Harter's clinical nurse course outline.

3. It is recommended the candidates be selected from anticipated "A" schools.

RUTH JOHNSON, Chief
Nursing Consultant
Public Health Branch

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

I Hatsu No. 526
17 June 1949

SUBJECT: Openning of Re-training course for Leading Clinical Nurses

TO : Chief of Branch Office

FROM : Chief of Medical Affairs Bureau, Welfare Ministry

Regarding the above said training course of the last year proved satisfactory due to your cooperation. The program for this year as shown in a separate sheet has been decided to carry out, for which we expect your further cooperation.

In carrying out the program it is desired to be in cooperating with Local Military Government, Local Prefecture sanitary Department, Local Nursing Association. Regarding the necessary expenditures it will be reinbursed directory by the Welfare Ministry; therefore, it is expected to report in making out a budget in detail as well as the place to meat. (The budget should be limited within the amount of ¥80,000)

As it is specified in a separate sheet it is requested for the Sanitary Dep't chiefs to be cooperated with the program.

To the local military gov'ts through the 8th Army Headquarters necessary notice has been sent out in coping with the said program.

Details of Regional Refresher course for leading clinical nurses

1. Object : Retraining of clinical nurses who are working in hospitals and sanatoriums in order to improve them and nursing.

2. Term : 3 months

3. Qualification : Nurses who are working in hospitals (including national) at present as head nurses or nurses who have ability of leadership. They must be well enough to take 3 month's course.

4. Number of Nurses : 40 - 50 in one place.

5. Place and opening time and nurses quarters in each region :

| | | | |
|---|---|---|---|
| (1) | Hokkaido | End of August | |
| (2) | Tohoku | Beginning of August | Yamagata National Hospital |
| (3) | Kanto Shinetsu | Beginning of Sept. | |
| (4) | Tokai Hokuriku | " | Nagoya R. C. Hospital |

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

REPORT OF REFRESHER COURSE STUDENTS

SPRING 1949

Feb - March - April - May 27, 1949

HOKKAIDO

Kasai, Misao: Sapporo National Hospital

This student was above average both in classroom work and in her teaching. The organization and presentation of her class were good. She should be a great help to Miss Takahashi who is already in charge of education at the Sapporo National Hospital

Yamazaki, Katsue: Sapporo University Hospital

This student did excellent work both in her class work and in her teaching. She got the second highest average in the class of 52. She was urged to take the initiative in planning the education in the school and have Miss Kasai help organize the wards and help with the teaching.

Kasai, Kyoshi: Sapporo University Hospital

This student was only an average student. Her teaching lacked vigor.

Ogawa, Misayo: Asahigawa Red Cross Hospital

This student did only average classwork. Her teaching was better than average however. I do not feel that if this student is expected to have charge of the ward and also to teach in the school that much will be accomplished. She thinks that that is what she is to do when she goes home.

Watanabe, Naoko: Hakodata Municipal Hospital

This student made an excellent record both in her classwork and in her teaching. She exhibited enthusiasm, interest and initiative. She should make an excellent little leader if she gets any cooperation at all.

Hayashi, Fujie: Yakumo National Hospital

It seems a shame that this student is not returning to a hospital with a school. She intends to help with Refresher courses and to organize the wards in her hospital. She made one of the highest class averages. She feels a definite need for some stablizing force in her life and as with many others her age she is looking around for a philosophy she can live by. She needs understanding guidance. She possesses enthusiasm,

intelligence and leadership.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

TOHOKU

Tokunaga, Kiyo: Niigata Medical College Hospital

This student made better than average grades both in her class work and in her teaching. She says that she will probably just return to being Head Nurse of the operating room when she goes back because there is not nurse supposed to be in charge of the school. It was suggested that she try to get Miss Miller to help her get placed in the school.

Takahashi, Sue: Hirosaki National Hospital

Miss takahashi was not a good student. She did quite poorly in her classes byt this was probably partly due to her age. Her teaching was fairly good. In fact it was amazing how well she did in contrast to her classwork. I think she could be a big help in teaching Nursing Arts in Refresher Courses. Their hospital does not as yet have a school. She and Miss Kimura from the last Refresher Course for instructors, are supposed to plan for one. However, since neither of them seemed to grasp the material presented, it would not seem wise to establisha school there.

Konno, Fumi; Sendai National Hospital

This student was a little better than average student. I think she will be a great help to Miss Onodera who attended the course in the fall and is now Dir. Of nursing Education.

Mizukami, Tomi: Sendai National Hospital

Miss Mizukami was a little better than average student. She did quite well in her teaching class. She is to return to a dual position in Sendai. She is to be the nurse in charge of Medical Affairs Bureau there and will be in charge of Refresher Courses in that area. Also she is to help in the Sendai National Hospital with the teaching. It would seem like a very big job for her.

Suzuki, Asako: Tohoku University Hospital

This student did much better than average in her classroom work but not so well in her teaching. I think she has ability but need practice. In their school they took 20 A students and 80 B students this spring. That will make a total of 220 students and they only have 2 classrooms. I think she realizes that this is inadequate. Probably with the 1000 beds in the hospital the experience could be adequate. I doubt if she has the ability to carry the whole organization by herself, however,

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Saino, Mine: Women's Medical College Hospital

This student lacked force and leadership. I doubt if too much can be expected of her. Perhaps together with Miss Watanabe who attended the course last year, she can accomplish something. She states that in their hospital they have a new Medical School and that everyone is interested in the doctors but there is not interest in nursing. This is not going to help her organize a school.

TOKAI-HOKURIKU

Hayashi, Sada: Nagoya National Hospital

Miss Hayashi was only an average teacher in the classroom. She seems to think that she will have to carry both the position of Director of nurses and Director of Education when she returns. I do not feel that she could carry both of these with any kind of satisfaction or accomplishment. I recommended that she try immediately to find someone else for Director of Nurses so that she could devote her time to the student program.

Seki, Yone: Mie Medical College Hospital

This student did better than average in her class-wrok. However in teaching she lacked force and life. I do not feel that she will be able to carry both the job of Director of Nurses and Director of Nursing Education when she returns.

Mikami, Kamiko: Toyama Red Cross Hospital

This student did better than average in her classwork. However she did poorly in her teaching. The presentation of the class seemed quite good but the preparation of the material was poor. She states that she does not really like teaching but was just sent to the course. She likes bedside nursing. It was suggested that she concentrate on the reorganization of the wards when she returned.

Take, Haruko: Kanazawa National Hospital

Miss Take tried very hard and was an average student. She has enthusiasm and interest and should do well if encouraged. Miss Asada, from the Fall Refresher Course, is Director of Nursing Education in her hospital so she should find Miss Take a real help. Miss Asada was a good student.

KINKI

Sumii, Yaeko: Osaka National Hospital

This student did very well both in her classwork and in her

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

teaching. She is quite shy but has real ability, I think. She seems a little young for her years and is very unsure of herself. I think with responsibility and experience she will develop into a good little teacher.

Nagai, Toshi: Kinki Region Office, Medical Bureau of Welfare Ministry.

This student also made an average of 94% which was the next to the highest grade in the class. She was an excellent teacher and gave the impression that she had taught for many years. She stated that as she finished the course she realized how much there still was that she didn't know. This is certainly a very healthy sign. She has great ability and should be a great help in the region.

Ito, Toshiko: Otsu Red Cross Hospital

Miss Ito was one of the best students in the class. There were only two students who made an average of 95% and she was one of them. She shows very great promise. She feels shy about going back and trying to take charge of the work of the school because there is now an older nurse who holds that position but who has no special preparation. Perhaps Mrs. Morris could help her, with this problem.

Makao, Chizue: Kobe Prefectural College Hospital

This student was a little better than average in both her classwork and her teaching. I feel that she does not have the ability to carry both the position of Director of Nurses and the Director of Nursing Education.

Yoshikawa, Tatsue: Nara Prefectural Medical College Hospital

This student was only average in teaching but she had an average of 91% in her classwork. She should go ahead and get her Clinical Nurse License as soon as possible. I would not say that that she has much leadership ability.

Morishita, Mitsu: Mazuru National Hospital

This student did better than average in both classroom and teaching work. She is alert and shows much interest and initiative. There are two other nurses who came to the course in the fall and they are in charge of the school. She will work with improving the ward experience. She feels that they could have a good Central Supply Room in their hospital.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

CHUGOKU

Fukuzawa, Masako: Tottori Red Cross Hospital

This student was better than average in her work. Her teaching was good as far as presentation was concerned; however, she had some trouble with planning and did not give enough on real nursing. I think that she should be a good teacher after she has had a little experience. She seems to realize what her problems are at the hospital and it really planning to try to solve them when she returns.

Ogawa, Yayoi: Matsue Red Cross Hospital

Miss Ogawa did better in her classwork than in her teaching. I think she has ability but her class showed that she lacked confidence. I think that she will improve with experience. She is working in a hospital with two other students who had attended the first course for teachers. They should make a good team.

Kawasaki, Fusze: Yamaguchi Hospital

I feel that Miss Kawasaki was the most outstanding student in the class. She had initiative, poise, insight and an ability to reason. She is inclined to be quite a perfectionist which is going to make life difficult for her. She must learn to adapt her standards to a reasonably workable level. Of course we need people to hold standards high if it will not discourage both herself and others. These things were discussed with her in conference. Give this student much responsibility and expect much from her.

Nozaka, Takeko: Okayama National Hospital

This student was better in her classwork than in her teaching. I do not feel that she is too interested in teaching but is more interested in doing hscpital ward administration and teaching. I would suggest that this would be the best way to use her on her return.

Arisada, Tae: Hiroshima Red Cross Hospital

This student was above average in both teaching and classwork. She seemed mature and able to think things through. She too is to be both Director of Nurses and Director of Education when she returns. Although I do not approve of any one Japanese nurse trying to handle both of these jobs alone, I think Miss Arisada could do it if anyone could. I do not think it would be good for her health, however, because she takes her responsibility far too seriously.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

SHIKOKU

Yasuoka, Miyoko: Kochi Red Cross Hospital

Miss Yasuoka made the highest grades in the class. She had an average of 95%. Only 2 other students attained this average. She taught beautifully and appeared to have taught for years. In conference we discussed her biggest problem which is that she takes things too personnaly and lets them hurt her. She realizes this.

Ishii, Yukiko: Matsuyama National Hospital

This student was below average in her classwork and teaching. She says that theyare not planning to have a school in her hospital which is probably just as well. In individual conference, her chief problem seemed to be the problem of the union. Apparently everyone has to belong in order to work there. She will work on education of the graduates when she returns.

Imai, Moruyo: Besshi Hospital

Miss Imai is an average student. She is interested and would really like to accomplish something but she feels that she will not be given a chance because Miss Kawamura who came to the last refresher course has never been allowed to do anything in the school. She says that no nurses teach in the school but only "corpsmen". However Miss Waterworth is planning to spend some time in the school soon so probably these problem will be ironed out.

Inoshita, Hisae: Zentsuji National Hospital

Miss Inoshita was a fine little student and really taught a good class. She even remembered to emphasize how one could improvize for the equipment in the home. She also did very well in her classwork. She will be incharge of the first year students when she returns to the hospital and she should do it very well.

Mizuguchi, Hatsuko: Tokushima National Hospital

This student was about average. There is no school in her hospital at present but she thinks Military Govt. has been out to consult with the heads of the hospital about a school. I do not feel this student could plan any program alone and carry through on it.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

KYUSHU

Hosono, Seiko: Kumamoto National Hospital

Miss Hosono was about an average student. Without strong leadership I doubt if she will take the initiative to forge ahead.

Sonoda, Ayako: Kamegawa National Hospital

I feel that Miss Sonoda is capable of much better work than she did here. Her grades were only average but I know that she has better than average ability. I think that you can expect a great deal of her when she returns. She will return to work with Miss Toyoda and Miss Izumi who were both good students so they should be able to produce something good there.

Inouye, Sadako: Chikushi National Hospital

This student shows great promise. She seemed to have considerable self-confidence in her teaching. Miss Takase, who did quite well in the last course, is Director of Nursing Education in her hospital now, and she will return to be a full time instructor. They should work together well.

Imamura, Miyoko: Kyushu University School of Nursing

This student was about average in her class-work but did a much better job of actual teaching than most of the rest of the class. When she returns this hospital will have 5 students who have had this Refresher Course but this student states that they can accomplish very little because the director of the hospital is firm in his belief that the hospital is for the education of doctors not nurses. He does not feel that the hospital his any responsibility to student nurses.

Maeda, Masuyo: Sasebo Municipal Hospital

This is a better than average student. She will be director of Nursing Education when she returns. They admitted 20high school graduates this spring. She has a nurse who worked in St. Luke's hospital for 10 years to help her and also three instructors who had a 3 months refresher course somewhere. She says that the M.G. team comesout often to see tham so they are improving.

Goi, Tsuyako: Miyazaki Prefectural Hospital

Miss Goi was an average student. She will be in charge of the school for B students.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

**KANTO**

Munemura, Shii: Matsumoto Medical College

This student did considerably below average work. I think that her age was against her. She really tried hard. She did fairly well in her actual classroom teaching in nursing arts. I do not think too much can be expected of her.

Miyabuchi, Yoshino: Hidachi City Hospital

I think this student will do very well in her teaching. She has ability to plan a class and to carry it through with considerable poise and confidence. Evidently her hospital is most interested in the education of nurses and her Director was eager for her to get this education so that she could return and start organizing things to have a school.

Nakamura, Harue: Chiba University Hospital

This student did quite well in her classwork but not so well in her teaching. She did not prepare her class vary well and gave a poor presentation. I do not feel she had too good a grasp of the material when she left.

Sato, Sai: Tochigi National Hospital

This student's performance was below average. She has no gift for teaching and has no idea what she will do when she returns and doesn't know why she chosen to attend the course.

Samejima, Mieko: Saitama Prefectural Office

I think that this student has leadership ability. She is shy and lacks confidence. She now wishes that she could be returning to teach in a hospital with student nurses rather than graduates; but I think that that is because she is conscious of her age. She should really do well.

Komuro, Kikuko: Tokyo To Office

This student did not seem well during the course. She had mastoiditis and colds and consequently did not do too well in her classwork. However she did and excellent job of teaching in her own practice teaching class. I think she will do very well. However she lacks self-confidence. She will have to be guided and pushed.

Shibata, Skiko: Tokyo To Office

She was one of our three top students. She made a 95% average. She was a poised and forceful teacher and exhibited initiatuve and interest.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Watanabe, Natsuko: 1st National Hospital

This student did only average work. With guidance she will be able to help in a teaching program. I think that Miss Furuya can give that guidance.

Haginomori, Toshiko: 1st National Hospital

This student did not do well. Perhaps with help and experience she will be able to help. At least she will have an insight into what the education of nurses involves and will be able to help with it.

Umikawa, Haruyo: Central Red Cross Hospital

This student did about average work. She will never be an outstanding teacher. She lacks force.

Mori, Fukuko: Central Red Cross Hospital

Miss Mori could do a great deal better than she did. She was trying to carry both her responsibility in the school offices and the course. So she did neither too well. She has intelligence and ability however and should do well.

Yoshida, Tokiko: St. Luke's Hospital

I think that Miss Yoshida understands her weak points. She has the possibilities of being a fine teacher. I feel that she needs to do a more careful correlation of what is taught in the classroom and what is done on the wards. I think she is ready to try to do better correlation.

Miyauchi, Setsuko: St. Luke's Hospital

Miss Miyauchi was an excellent little student. She did well in her classes and taught well. She should be given progressive responsibility to develop selfconfidence.

Hirano, Teruko: Kurihama National Hospital

This was just an average student. She will be working with Misses Tanaka and Otani who attended the first Refresher course when she goes back.

The graduation exercise for the class of nurses at Zentsuji will be held 27 May 1 pm. The above people will received invitations from the hospital but I thought I would notify you in advance.

The class is comprised of 52 nurses from 22 different hospital from all 4 prefectures. All nurses are graduate nurses and are at Zentsuji for a retraining course. They are expected to return to their own hospitals and hold classes for the rest of the nurses in their own hospitals. 5 of the hospitals will be opening training schools. The program for the graduation is attached.

It was decided to plan the 1948-49 educational program on a regional level rather than prefectural. The following prefectures were chosen as the meeting places in the nine regions:

1. Hokkaido (Sapporo)
2. Aomori
3. Tokyo
4. Kanagawa
5. Shiga (Kibukawa)
6. Aichi (Nagoya)
7. Okayama
8. ~~Ehime~~ Kagawa - Aug 30-31
9. Saga

VIRGINIA M. OHLSON
Public Health Nursing Consultant

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

HEADQUARTERS EIGHTH ARMY
Military Government Section
APO 343

21 June 1948

TO: Regional Public Health Nurses

SUBJECT: 1948-1949 Regional Public Health Nursing Program.

This course is to be given any time after August. The Japanese public health nurses in the region will be in charge of the program and select nurses to take part. The military government nurses should give needed assistance in planning the program.

Each nurse will be responsible for her room, food and travel expenses while attending the course. The health centers and prefectural government might give some financial assistance to their nurses.

Ruth Johnson
