Work Accomplished by Experimental Stations. Washington .- Dr. E. W. Allen, Assistant Director of the Experimental Stations in the Agricultural Department, has just returned from a prolonged tour of the West, made for the purpose of inspecting the various stations in that section of the country. He states that one of the most interesting lines of investigation which is being pursued in these stations is that with regard to cheese making. The station in Wisconsin is taking the lead in this especial work, and discoveries have been made there which revolutionize the European theory that the ripening of cheese is due to bacteria. The American experiments demonstate beyond doubt that the principal change in the albuminoids which takes place in the ripening process is dependent

AGRICULTURE IN THE WEST.

upon a ferment which is contained in the milk itself and not to the bacteria. manfacture in the future. In the stations throughout the semi-

dissenting vote. Throughout Japan the gratest desire prevails to make a thoroughly effective lisplay. Over 5000 exhibitors have applied for space, though not more in an appearance, owing to the inability of the exhibition to grant sufficient room. Kashiro Saito, assistant commissioner, says that the exhibit will, as much as possible, be confined to lines which are peculiar to Japan, or in which she particularly excels. Thus furniture, decoration, silk fabrics and other artistic articles will abound. The Japanese department of mines is preparing a complete collection of all Japanese minerals; the department of forestry will exhibit a similar collection of all native woods and seeds; the fisheries department will exhibit an aquarium containing specimens of all freshwater fish, especially such as are peculiar to Japan, such as red carp and three-tailed fish. The collection

of art treasures will be the finest ever This is the Only Store CE made.

A Protest Against the Dingley Tariff Presented to the Government.

Berlin .- The Agrarian Press publishes statistics on the subject of the remarkable decrease in the sugar exports to the United States from 308,-000 tons during the first six months of 1897, to 87,000 tons in 1899. A collective protest against the effects of attention in the aristocratic circle in the Dingley tariff bill on German industries has been presented by the Bund der Industriellen to the Government. It has been answered by the Imperial Secretary for the Interior, Herr von Posadowsky-Wehner, who says the protest has been submitted to the economic committee of the empire. The valuable data contained in the protest will be used in negotiating further commercial treaties with the United States.

Premier Laurier was shown the Washington dispatch in which F. W. Fitzpatrick describes his reception in Moderate Charges. Ottawa as having been a chilly one, and gives the substance of the remarks mittee. #### dispensation the year of jublice followed seven Sabbaths of years-that is, forty-nine years, the fiftieth being that designated in this peculiar manner. It was a year in which the lands were to rest, slaves set free, debts can-

celed or settled and general peace and good will established. As it is now celebrated the custom was originally borrowed from the Jews, and the observances have been, of course, greatly modified to meet the changed conditions and requirements of life. It became the time for the remission of temporal punishment due for wrongdoing. for gaining the indulgence of the jubilee are a sincere and hearty sorrow for sin, with a firm purpose of amendment, a full and perfect confession and reception of absolution. To these conditions are joined almsgiving and a stated number of visits to designated churches, where prayers are said for

the intention of the Pope."

Whether the judge who recently charged all women with being liars has himself given the most convincing argument for the superiority of his own sex in the matter is a question that men and women must settle between themselves. The forces of literature seem to be arrayed against the woman. In the recently published life of Mrs. Oliphant that lady tells of a visit to the Tennysons, when the poet, listening to the farewell amenities exchanged between his wife and Mrs. Oliphant, remarked: "What liars you gation of the mater, I am satisfied women are!" In a late novel the truthloving hero is repelled by the way in which the heroine openly expresses contempt for her musical guest while the latter is performing at the piano, and then as openly bestows fulsome compliments upon the player. Some venture to believe that the feeble fibs of femininity offered at the altar of convention are more than offset by the masculine misrepresentations that so often occur in trade. The businessman sands the sugar of his sales in the name of gain, while the worldly woman sugars the sands of society in the cause of geniality. Which is worse? Lying is no longer a study in blacks over which Dr. Toplady presided, and and whites, but the art of shading with the restored tower of which bears witintermediate grays. "Beauty is truth, ness to Sir W. H. Willis' solicitude truth beauty-that is all ye know on for objects of archeological interest. earth and all ye need to know," said

the poet. It is a great deal to know.

Michigan wheels into line with Min-

Such is the tendency to specialism in | initiative measure for the establishment of a wiser system of forestry. Governor Pingree has set his signature inent object on the right hand to anyto a law passed by the recent Legislature establishing a State forestry commission of three members, one of whom shall be the commissioner of the of which grow many a fern, while on State land office. The members, like those of the Minnesota commission, are to serve without pay, but an appropriation of \$2,000 is made for the payment of expenses. Their duties are made to correspond in substance with those of the Minnesota commission. They lack, however, the aid of any such useful

official as the Minnesota State fire warden. But that the present measure was regarded by the Legislature as with the above history, it can be read merely tentative or preparatory is with added intelligence and underpepsia than any organic trouble of the shown by the numerous provisions standing: stomach. This conclusion, if generally made for the gathering of information which shall take form (in the words of th the act) in "a report which shall embody a definite forestry policy for the State of Michigan." An important feature of the act is the requirement that, on the recommendation of the forestry commission, the commissioner of the land office shall withdraw from sale 200,000 acres of "State tax homestead lands and swamp lands," and withhold the same until after the adjournment of the legislative meeting after such reservation. This points to the probability of the forestry commision being given jurisdiction hereafter over very extensive domains. If the admirable law proposed to the Legislature of Wisconsin last winter had not failed of passage, and if Ohio could be induced to adopt a similar measure, we should now have a belt of territory extending from the coast of Massachusetts to the eastern border of the Dakotas in which the advocates of scientific forestry have won the preliminary victories of what, it is to be hoped, will prove the conquest of a continent. It is confidently thought that between now and the next session of their State Legislatures public sentiment will have been so far educated as to insure the closing of the gaps referred to and the initiation of forestry measures in several other States. In California, the law for the protection of the State from forest fires having failed, a private organization has been formed for the purpose, which proposes to furnish the protection, so far as possible, at its own expense. Probably this patriotic movement will shame the Legislature into action when next it meets.

### RELIGIOUS COLUMN.

TEMS OF INTEREST TO ALL DE-NOMINATIONS.

Words of Wisdom, and Thoughts Worth Pondering Upon Spiritual and Moral Subjects-Gathered from the Religious and Secular Press.

> N a recent letter written to Dean Le-Froy, by Sir William Henry Willis, a member of parliament for Bristol, he made a very curious statement which has naturally excited a great deal of interest in the ecclesiastical world. The story which has just been

> > points.

brought out by Sir William in his own words is as follows: "During the reading of some old documents recently, I came across a statement in regard to Toplady's inspiration for his famous hymn which seems to prove that the original Rock of Ages is in Burrington Coombe, which is on the edge of my place, and after a careful investithat the story is true in every particular. It appears that one day the distinguished author was caught in a heavy thunderstorm in Burrington Coombe, and there, taking shelter between two massive piers of our native limestone rock, he penned his famous hymn that has immortalized him."

In all England there is probably no more beautiful, weird or romantic spot than Burrington Coombe-a deep indenture in the dark, swelling hill known as Black Down, which rising to the height of 1,100 feet, forms the summit of Mendip Range. The place is within easy reach of Blagdon parish church, The road winds through Burrington Coombe, between lofty, and in some

places, precipitous slopes, where the gray rock shows boldly among the neapolis in the adoption of an excellent bracken. At one point there is a conspicuous crag of mountain limestone seventy or eighty feet in height, a promone approaching from Blagdon road. Right down the center of this mass of stone is a deep fissure, in the recesses the hiliside around are trees, whose stunted growth and wind-worn appearance tell of the scanty soil and the exposed situation. This was the fissure in which Toplady took refuge, and it was this "cleft" and this rock which suggested the central idea of his beautiful hymn.

This is the beginning of the hymn as Toplady wrote it, and in connection

"Rock of a Let me hide myself in thee, Let the water and the blood. From thy side a healing flood. Be of sin, the double cure, Save from wrath and keep me pure."

brave defenders of their country's interests because they were good soldiers of Jesus Christ. If you will take Christ as your Master and serve Him, you will find it possible to live more noble, manly lives for God and the world than by any other means .- Methodist Times.

One-Sided Vigilance. He that would watch successfully against temptation, must watch at every point. One who has become alarmed over what he calls his weakness is apt to imagine that, if he can only exercise sleepless vigilance at that one point, he will be safe from the enemy. But the man who undertakes to protect his house at night by standing guard at the front door, only invites the burglar to enter by the back way; and the Christian who seals his lips and settles down to guard them under the impression that his tongue is his only danger, not only exposes himself at other points, but opens up by his very silence a new avenue for the tempter. There are things in life to think about besides one's known weak

-----

-

A writer in Vick's Monthly says: I have been using potash, or concen-

trated lye, in a new way lately-at least new to me. I have been using it Innumerable plans have been broachas an insecticide and have found it ed for firmly anchoring the corner post most effective, especially for house that is to receive the pull and tension paints. I use the pulverized sort, put of a wire fence, but the one here illusup in small tin boxes. I dissolve two trated is one of the best of all. At the tablespoonfuls of this in three gallons back of the post in the bottom of the hole is placed a block of wood, and in

of water and spray the plants thoroughly with the solution. I have never known it to injure even the most delicate plants, and for the greater number it could be used much stronger.

For the mealy bug, aphis, red spider and almost all insects infesting plants it is sure death. The use of the potash also keeps the leaves bright and clean, and is useful to remove the black scum' which sometimes gathers on the leaves of greenhouse plants. It also acts as a fertilizer, making the plants more vigorous and floriferous.

As a spray or wash for fruit trees it is of great value. Trees thoroughly sprayed with a strong solution of potash, applied before the leaves start, will not be troubled with the San Jose scale.

#### Races of Bees.

business of the "Don't Worry clubs," and cause "hard times" among the compounders of tonics and tablets.

This is peculiarly an age of experts. It is peculiarly an age when the man who expects to succeed must very early choose his calling, must choose it with reference to his tastes and his abilities, must in early life give himself the benefit of special training in the direction indicated, must concentrate his whole mind, heart and strength upon the subject which he is pursuing and must not turn aside to the right hand or to the left.

The Chicago Penny Saving society, operating through the public school teachers, last year received from the children of that city over \$70,000. This means that at least \$40,000 less a year is being spent for candy and chewing gum, and that over 4,000 children are becoming capitalists at the rate of 5 cents a day. This item is of much more practical interest to young readers than the popular speculations upon Kipling's income at a shilling a word.

The kissing bug has been causing trouble in the East. This insect, according to the dispatches, has a habit of alighting upon the mouths of people and biting them. The lips swell to enormous proportions, and sometimes the whole face becomes affected, taking on the general appearance of a rare ripe pumpkin. Doctors recommend various lotions for the trouble but it is not likely that it will ever be wholly done away with until the young man becomes thoroughly addicted to the habit of first making sure that her father isn't looking.

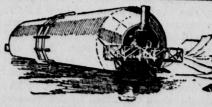

The suit of Charles J. Field against Adelaide McGlumphy, principal of the Keystone public school, for refusal to admit to the school an unvaccinated child of the plaintiff is noteworthy only in view of its being one of the infrequent outbreaks against the established efficacy of vaccination. At this distance of time from the wonderful discovery of Jenner and in view of the known results of vaccination as a preventive of smallpox it seems strange that there are still intelligent individuals who contend that vaccination is a useless mutilation of the human body and wholly inefficacious in doing what medical science and established records have proven it will do-viz., render immunity from smallpox.

The papal decree designating the year 1900 to a holy (or jubilee) year recalls an old provision of the Levitical law which was, ages ago, of great significance and importance. Under the ald vice given us.

#### God Knows,

God knows all about you-the best and the worst of you. All your weaknesses, your struggles, your successes, your failures, your joys and your heartaches are open to the eyes of him with whom you have to do. As Dr. Mathews beautifully said in a recent sermon, | Roche would say, but of "relations," empire with which the good Victoria is unacquainted; but there is one throne against which every human perplexity beats in such a manner as to provoke a sympathetic response. If you are a sincere man, this thought cannot fail to be a source of comfort to you. Your fellow-man may pass you by without any notice at all, or if they deign to regard you, may misconstrue your conduct and misinterpret your character, but your Father in heaven will never suffer you to slip away from his observant eye nor judge you save in truth and tenderness. Be courageous, therefore, and confident in the midst of even your most trying difficulties.

#### Sentence Sermons.

The direst poverty is poverty of soul. The Sabbath is the savings bank of life.

The only way to have a friend is to be one.

He that would have the fruit must climb the tree.

It is better to be remembered in a good man's prayers than in a rich man's will.

That is not the best sermon that makes the hearers go away talking to one another and praising the preacher. but that which makes them go away thoughtful and serious, and hastening away alone.-The Watchman.

The Christian Life Is a Useful Life. The men and women who have best fulfilled life's duties, and most nobly served their day and generation, have been followers of Jesus Christ. That clever French writer, Rousseau, once said that Christians could not make good citizens or good soldiers "because their hearts being fixed upon another world, they must of necessity be indifferent to the success or failure of such work as they take up here." What a mistaken idea to have, and one that is contradicted by all history and experience! The most useful citizens and the bravest soldiers the world has ever known have been true and loyal servants of Jesus Christ. John Bright and William Ewart Gladstone were great statesmen because they were good men. Havelock and Gordon were

ture is the wide limits to which relationship is extended. "Do you know Pat Meehan?" a peasant was asked. "Of course I do," was the answer. "Why, he's a near relation of mine. He wance proposed for my sisther Kate." When faction-fighting was rife in Ireland it was to a man's interest to "increase his followin'" by extending the number of his relations by every possible device. Happily faction-fighting is dead in Ireland, and a man has no need now to have behind him a long line, not of "ancestors," as Sir Boyle "There are many woes in the British as was imperatively necessary when the "bhoys" were accustomed to "hould dishcussion with sticks" at every fair. It is after he is dead that his relations "come in handy" to the Irishman. They give him a "grand bury-in'." "Wel, Mary," said a friend of mine to a domestic who had been attending a "buryin'," "had Mat Maloney a good funeral?" "Oh, he had a grate wan, sir," said Mary. "An' why wouldn't he? Wasn't he related to the whole barony? Faith, it reminded me of a Land League meetin'."-Letter in London Spectator.

#### Feathered Ventriloquists.

Many birds form their sounds without opening their bills. The pigeon is a well-known instance of this. Its cooing can be distinctly heard, although it does not open its bill. The call is formed internally in the throat and chest, and is only rendered audible by resonance. Similar ways may be observed in many birds and other animals. The clear, loud call of the cuckoo, according to one naturalist, is the resonance of a of the snipe, which betrays the approach of the bird to the hunter, is an duced internally, and which are audi-

just so many hours to be awake, and day the shorter his life will be. A man might live to be 200 if he could sleep most of the time. The proper way to economize time, therefore, is to sleep when there is nothing better to do.

Average Age of Marriage. The average age at which women marry in civilized countries is said to be 221/2 years.

"What is so rare as a day in June?" asks the poet. Well, there's the 29th day of February.

The faith cure may be all right in some cases, but want of faith is the only thing that will cure love

ek too soon is not to be compared with the loss arising from cutting a week too late. There is a differ- turkeys that I have ever raised, says a ence between dried grass and hay made from matured grass, but if the stock is allowed to choose they will take the dried grass. If we do not begin to make hay until it is just right, bad weather or other untoward circumstances may cause delays that will afford the grass time to get too ripe, and once this happens it is impossible to make good hay of it.

wire fence.--New York Tribune.

Making Hay.

begin a few days before the meadow is

quite ready to cut. The loss from cut-

In making hay it is always best to

There will be a very little clover hav in the West this year, and the main dependence must be on timothy and prairie hay. Timothy cutting should begin by the time the blossoms fall from the heads.

We prefer to begin cutting as soon as the dew is off in the morning. If the weather is fair this is left until the next day, when it is raked and allowed to lie in the windrow an hour or two and is then piled into well-built cocks, where it can stand until the next day, or two or three days, if necessary. In these cocks it begins to sweat, and pitching the hay on the wagon and off into the mow airs it out in a way that causes it to cure perfectly in the mow, coming out a bright green and smelling as sweet as new-mown hay.

The use of a hay loader hastens the work of haymaking, but is not conducive to the making of the best of hay, as it can be properly cured only by standing in the cock for a time.

#### Ventilating Farm Buildings.

Too little attention is paid to the proper ventilation of farm buildings in summer. To put horses into a stanote formed in the bird. The whirring ble where there is no circulation of air and have them come out all wet with sweat is harder on them than the work act of ventriloquism. Even the night- they do. Basement stables as a rule ingale has certain notes which are pro- are more poorly ventilated than stables above ground, for the reason that there is little chance for air to circulate as only one end of the stable allows air to

come in. A cellar stable that is damp and musty does not furnish pure air for stock and they should not be kept that the more of them he uses up in a in such a place long at a time. Stables should be as dark as possible to keep flies from bothering the horses at this time of the year. An animal rests but little at noon or out of harness if it has a man of rare and incorruptible honto keep up a continual switching and stamping to keep the flies from eating

#### To Rid the Barn of Rats. Take a tight barrel or keg, fill it a

foot or so deep with water, tie a stout paper over the barrel and place any bait that will attract them to the place. Place board from floor to top of barrel, let them have free access to bait for a few nights, then cut across it in middle of paper large enough to admit a rat;

years, and I will say that as a practical farm bird they have no equal in any writer in Michigan Farmer. The rich buff does not show dirt as white does. and they are a larger bird than the White Holland; are just as easy to raise, and do not stay around the barn so close that they do not thrive unless fed all summer, but are between the bronze and White Holland. Never go to the neighbors, but still get a good living in the fields.

Then the bronze are so fond of roaming; you never know where the hen is. She lays all over the farm, and visits the farmers all around. And in regard to extra size, I will say that by Christmas my buffs will weigh as much as bronzes, and be fat and fine, while the bronze tom is all lean and lank till the middle of February, and, in fact, at that time the market quotes heavy toms 2 cents per pound less than hens or light toms.

#### Time for Sowing Turnips.

While occasionally, under favorable conditions, a good crop of turnips may be grown by sowing as late as the middle of August, generally the best results will be secured by sowing not later than the middle of July. Have the soil in a good tilth and reasonably rich, so that the plants may get a good start to grow before the weather gets too hot and dry.

One advantage with turnips is that if they can not be eaten or sold to an advantage they can always be fed to stock profitably.

Government Hog Cholera Remedy. Department of Agriculture's remedy for the cure of hog cholera: Pulverize and mix thoroughly: One part wood charcoal. One part sulphur. Two parts sodium chloride (salt). Two parts sodium bicarbonate (soda), Two parts sodium hyposulphite. One part sodium sulphate. One part antimony sulphide. Dose, one tablespoonful for each 200 pounds weight of hog once a day.

#### Honest Answer.

The stories told of Snetzler, a famous Swiss organ-builder, prove that he was esty.

At one time the parish officers of a country church applied to Snetzler to examine their organ and make improvements in it.

"Gentlemen," said Snetzler, after careful examination of the instrument in question, "your organ be wort vor hundred pound joost now. Vell, I will spend you von hundred pound on itand it shall den be vort fifty!"

We should remember that the God then suspend a broiled meat skin, pota- of providence is the God of love en wisdom.

Sleep. Some doctors believe that a man has

ble while the bill is closed.

#### THE EVENING STAR!

When sunset light Gives place to night On mountain tops afar, With light more soft, In heaven aloft Appears the evening star.

Its beauty seems, As high it gleams, To lull the heart to rest. We mourn the day, But gladly say We love the starlight best.

When grieved in heart, Though 'tis our part To know more night than day, The star of hope Forbids us mope, And cheers with soothing ray. -Waverley Magazine.

\*

Almost a Burglary.

#### \*

RS. DRISCOLL had a mind of her own.

Some uncharitable people went so far as to say that if she had not had so much mind her husband might have been living to-day. Be that as it may, he died and left her sole mistress of a handsome property, with no one to oppose her will.

She adopted one of his nieces, and loved her as well as she could love any one but herself. The niece grew up a winsome lassie,

and had lovers, as maidens will. Luckily her choice was her aunt's as well, and the day was set for her mar-

riage with Harry Winship without opposition, the only condition being that they should return to Mrs. Driscoll's home after a brief wedding tour.

"Well, Kate," said the stately lady, the day before the wedding, "everything is ready, and I must say that I never saw preparations more complete -not even for your uncle's funeral, poor man! I always meant to give you a handsome marriage portion, so get your hat-we'll go to the bank."

What girl would delay under similar circumstances?

The carriage was speedily ordered, and soon stopped before the bank.

Except the bank officials, there was in the building only George Travis, one of Kate's discarded suitors, who was getting an insignificant check cashed. Mrs. Driscoll was not slow to see an opportunity to flutter her sails, as her worthy husband had been accustomed to say.

Drawing her check book she smilingly wrote a check for £2,000 and presented it to the cashier.

"Payable to Miss Kate-a marriage portion, I presume. Ah, very generous of you! Miss Kate, I congratulate you," said the cashier. "Shall I make the new book in your own name?"

"She wants no book-at least not yet," retorted Mrs. Driscoll, sharply. "When I give a thing, I give it. I want good, solid money for that checkbright, yellow gold."

"But-why-you live fully a mile from a neighbor. Have you-do you think of the temptation?" he said, hesi-

"The farm is only a mile further on. Send him about his business," answered her mistress. Norah went out.

Soon a figure clothed in rags went by the open window. The man turned and shook his clinch-

ed fist at the astonished lady. "Of all things! The impudent thing,"

she gasped. "Oh, but, aunt, I'm sure he has heard all that we said about that horrid money!" faltered Kate.

Mrs. Driscoll's face told the concern which she felt, but she turned her back upon her niece and took up a book.

Darkness came. The lights in the house were extin-

guished at the usual time. Kate could not sleep. In vain she

counted slowly from one hundred to one, and said the letters of the alphabet backward.

She heard the village clock slowly strike the hour of midnight, then one, two, and three.

Kate's apartment was dark, but the moon shone dimly into her aunt's room just across the hall.

Suddenly a form stood in the doorway, then vanished within.

Was it the tramp? Was that something in his hand a knife?

Kate stole softly through the doorway, listening breathlessly. Then she darted into a small room, near Mrs. Driscoll's door.

Suddenly the door was noiselessly closed, and a man stood so near her hiding-place that she could hear his hurried breathing.

The faint odor of chloroform told why the door was closed.

What if he gave an overdose? Kate loved the stern woman, and notwithstanding her timidity, that thought nerved her to action. She sprang from the room with a

shrill cry, clinching both hands in the hair of the intruder. It is needless to say that he was startled out of what little common sense he possessed.

He threw her violently aside with a muttered oath and fled. But he left a generous lock of hair in her hands.

Her head struck a corner of the door in falling, and it was dawn when she awoke to full consciousness of what had happened.

Womanlike, she rushed to see if the iron box was still safe. It had not been disturbed. Then she threw open the door of Mrs. Driscoll's room. That lady was unconscious, but breathing evenly. Kate's courage returned.

Silently she opened the window, letting the fresh morning air draw freely through the room. Then she crept into her own bed to await developments. Before sunrise Mrs. Driscoll awoke.

"Mercy on us!" she screamed. "Norah did not shut the window last night. I shall get my death of cold. Kate!" had been called several times; then she answered drowsily.

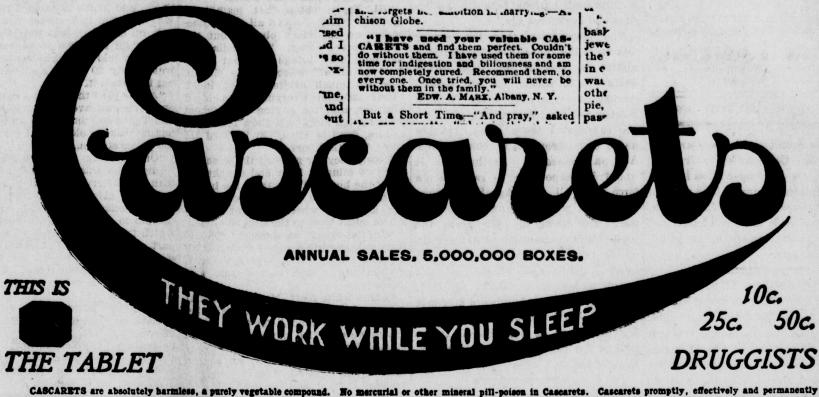

"Get up, child! It's your wedding day, too, and I in danger of pneumonia," called her aunt. Kate shut the window, and helped

the irate lady to dress, touching her she arranged it.

## Biliousness

You're bilious, you have a throbbing sensation in your head, a bad taste in your mouth, your eyes burn, your skin is yellow with dark rings under your eyes, your lips are parched and you feel ugly and mean, as if you wanted to kick a lame infant or kill a canary bird. Your system is full of bile not properly passed off, and what you need is a cleaning up inside. Don't continue being a bilious nuisance to yourself and those who love you, but send out at once for a box of Cascarets and feel bright and cheerful all the time.

Be sure you get CASCARETS! Don't let them sell you a fake substitute!

ure every disorder of the Stomach, Liver and Intestines. They not only cure constipation, but correct any and every form of irregularity of the bowels, including diarrhoea and dysentery. Pleasant, palatable, potent. Taste good, do good. Never sicken, weaken or gripe. Be sure you get the genuine ! Beware of imitations and substitutes ! Buy a box of CASCARETS to-day, and if not pleased in every respect, get your money back ! Write us for booklet and free sample ! Address STERLING REMEDY COMPANY, CHICAGO or NEW YORK.

#### SHORT WORDS.

Here Are Some, and They Are Right to the Point.

The following paragraph on "The Use of Short, Words" is attributed to Horatio Seymour. It practices what it preached therein, since there is no word in it with more than two syllables, save such as are quoted for purposes of illustration:

"We must not only think in words, but we must also try to use the best words and those which in speech will put what is in our minds into the minds of others. This is the great art which those must gain who wish to teach in the school, the church, at the bar or through the press. To do this in But Kate did not stir until her name the right way they should use the short words which we learn in early life and which have the same sense to all classes of men. The English of our Bible is good. Now and then some long words are found, and they always hurt the verses in which you find them.

Take that which says, 'O ye generation hair with dainty, soothing fingers at. of vipers, who hath warned you to flee from the wrath to come? There is one The household arose and went abort | long word which ought not to be in it--Visitors came and went. namely, 'generation.' In the old version the old word 'brood' is used. Read the verse with the term, and you will feel its full force: 'O ye viper's brood, who hath warned you to flee from the wrath to come? Crime sometimes does not look like crime when it is set before us in the many folds of a long word. When a man steals and we call it a 'defalcation,' we are at a loss to know if it is a plunder or a crime. If he does not tell the truth, and we are told that it is a case of 'prevarication,' it takes us some time to know just what we should think of it. No man will ever cheat himself into wrongdo-

#### Her View of It.

The conversation had flagged a'little, and he felt it his duty to say some thing.

"In an address made in Boston," he remarked, "a reverend gentleman greatly deplores the use of arms."

"Bostonians are so cold, anyway,"

Ladies' fine Vici Kid Lace Shoes, with silk embroidered Vesting tops, new coin toes and tips. Reduced from \$2.50 to \$1.95. All widths and sizes. We want your trade. Send us a trial order. Money refunded if goods are not satisfactory.

Country orders solicited.

t satisfactory.

tatingly.

"Did I ask your advice?" snapped Mrs. Driscoll. "I am able to take care of my own property, and, if it will not break the bank, I want it in gold."

"Certainly, madam. My conscience is clear if you wake up to find yourself murdered to-morrow morning. This bank can pay ten times that sum at sight, madam," was the dignified reply, to which Mrs. Driscoll listened in curt dlence.

The cashier went into the vault, closing the door behind him.

George Travis, having counted the money received on his check, went out without a glance at the two ladies.

"There! Now I reckon Travis begins to realize what he has lost," nodded Mrs. Driscoll.

Kate blushed slightly.

"But, aunt," she said, uneasily, "wouldn't it be better for me to take a book with the money left to my credit? Harry will not be here until to-morrow, and-and think of the risk! It is unsafe."

"How long is it since I came to be told my duty by a miss of 18?" breathed Mrs. Driscoll, scornfully. "What a coward you are! If you don't want the money, say so, and I'll let it remain where it is. M you do want it, hold your tongue, and help me take care of it until I can give you both into Harry Winship's keeping."

Further conversation was prevented by the cashier's return.

He carried a strong iron box.

"Count it!" commanded Mrs. Driscoll, One by one the golden coins were counted under her admiring eyes.

"There, that is money! That is like a wedding gift!" she ejaculated, in a satisfied tone.

"Better let me give you a receipt for it and put it into the safe to-night," suggested the cashier.

"Put it into my carriage!" was the sharp order to the bank porter.

The man obeyed and watched with a puzzled face the carriage out of sight. "She beats all I ever saw," he said. "I don't wonder her husband died."

Meanwhile Mrs. Driscoll returned home well satisfied with the world and herself in particular.

She had had her own way.

"I shall not put this under my pillow as I generally do," she said to Kate. "This box is harder than feathers. I shall put it under the corner of your bed."

"Thanks, aunt! Iron is as soft as feathers for me to lie on," laughed Kate.

"You needn't lie upon that side of the bed at all," was the cool reply.

"There's a man in the kitchen as says he's had not a mouthful to eat for ten days," said Norah, the servant, appearing at the door.

tasks. Kate kept her secret well. The ceremony was over which made her a wife. The bridal dress was exchanged for a traveling costume.

"I shall take the iron box to the bank as we go to the train, auntle," Kate said as she bade her good-by. "As you please. I've had my say about it, and no harm came of it,

either," was the tart reply. No one knew of the tragedy which did not take place in the silent watches of the night

No one knew until Kate, nestling in her husband's clasp as the train sped onward, told him the story in her own way and time.

"But the hair-did you save it? It is a clew," he said quickly.

"I burned it," was the calm reply. "I did not need to save it, for I knew whose it was. I always thought he

liked aunt's money better than me. Now I know that he coveted the dowry more than the bride. But the money is safe in the bank, and wasn't it

strange that he should be there to see it deposited?"

"Not George Travis?" ejaculated Harry.

"Yes. Let him go," she whispered softly, nestling closer. "Think what he lost-what you gained, Harry, dear. Let his own conscience punish himif he has any. We'll never let aunt know. We will keep our first secret forever."

Harry Winship was a man. He could not refuse his wife's first request, and Mrs. Driscoll does not know to this day what danger menaced her .- Chicago Times-Herald.

Ten Thousand Feet Limit of Depth. Mining engineers agree that the limit to which shafts may be sunk into the earth with the present machinery and equipments is 10,000 feet. The deepest shaft ever dug is the one now in existence in one of the copper mines on Lake Superior. It has a sheer depth of 5,000 feet. Dr. A. C. Lane, the assistant geologist for Michigan, in an article in Mineral Industry on "How Deep Can We Mine?" places the probable limit at 10,000 feet. He sees. however, that enormously rich deposits might lead man to dig to 15,000 feet with profit. The element of danger is not considered in these calculations. In conclusion he says. "The present knowledge cannot foresee reaching a depth of 20,000 feet."

More Foreigners than Natives. Wisconsin, Minnesota, North Dakots and California were the four states which by the federal census of 1890 had a larger foreign-born than nativeborn male population of voting age.

ing, nor will he be at a loss to judge of others if he thinks and speaks of acts in clear, crisp terms. It is a good rule, if one is at a loss to know if an act is right or wrong, to write it down in short, straightout English."

A FEAT IN GLASS BLOWING. The Trick Which a Russian Sprung

on the Experts.

Emperor Nicholas wished to illuminate theAlexander column in a grand style. The size of the round lamps to be used for the purpose were indicated and the glasses ordered at the manufactory, where the workmen exerted themselves in vain and almost blew the breath out of their bodies in the endeavor to obtain the desired size.

The commission must be executed, that was self evident, but how?

A great premium was offered to the one who could solve the problem. Again the human bellows toiled and puffed. Their object seemed unattainable, when at last a long bearded Russian stepped forward and declared that he could do it; he had strong lungs; he would only rinse his mouth first with a little water to refresh them.

He applied his mouth to the pipe and puffed to such purpose that the vitreous ball swelled and puffed nearly to the required dimensions, up to them, beyond them.

"Hold! Hold!" cried the lookers on. "You are doing too much. And how did you do it all?"

"The matter is simple enough," answered the long beard, "but first, where is my premium?"

And when he clutched the promised bounty he explained. He had retained some of the water

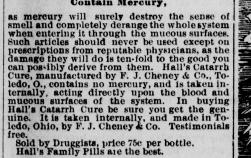

in his mouth, which had passed thence into the glowing ball and then, becoming steam, had rendered him this good service .-- Chicago Inter Ocean.

nious Insects Construct.

A curious species of insect is the depth of six or eight inches. It is alwith an ingeniously constructed door. like a cork in a bottle, another is as thin as a piece of paper.

In all cases the door opens outward. and when the nest is placed, as it usually is, on a sloping bank, it opens upward, so that there is no fear of its gaping. The object of the trapdoor is to conceal the nest, and consequently it is always made to resemble the general surface of the ground. Sometimes, however, an enemy attempts to open the door, and then the inmate braces its legs against the sides of the nest and holds it as fast as possible.

Still other spiders have inner doors besides outer, so that if their first defense be carried they may have another behind which to retreat. More curi-

#### IT WAS A REAL DUEL.

WO DANISH OFFICERS FOUGHT IT OUT WITH BROADSWORDS.

The Furious Conflict Took Place Before an Audience In a Gymnasium In Washington In a Building Which Adjoined the Police Station.

"I have figured in quite a number of varied events during over a quarter of torial life," explained an old newspaper writer to a Star reporter, "but I never got in but one duel when it was to a finish, and in the instance I refer to it was to a finish, I assure you. I was only an onlooker, it is true, but I saw more than I wanted to see, and more than I would willingly again see. It was nearly 20 years ago, but I have not forgotten it.

"At the time there was a gymnasium on Louisiana avenue, between Ninth the police station.

"One evening I was invited by a friend, who was a former newspaper man, but afterward a patent attorney, and who also acted as the resident Danish consul, to attend the gymnasium to witness a sword combat, in which two of his friends were to take part. I was told that three or four others would be present, and the combat would be rather lively. I realized that part of it fully, to my complete satisfaction.

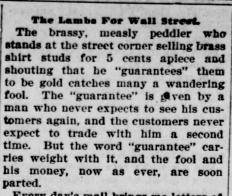

"With the others, three newspaper writers, a couple of actors and a couple of sporting men, we got to the gymnasium about 9 o'clock, but were told that the combat would not take place until the gymnasium classes had been dismissed, as it was desirel that the onlookers should be as few as possible. "None of us had any idea as to who the participants would be or the particular reason for it, but we were told that it was desired that we should be present to see that everything was conducted properly. From this we inferred that there was a stake or something at issue, and we were to be the judges as well as referees, as it were.

"At 10 o'clock two carriages arrived. in each of which was a single occupant, trapdoor spider, whose nest consists of each having a sword, what is commona tube excavated in the earth to the ly known as a broadsword, like that which men-of-war's men have. They ways lined with silk, and it is closed had but little to say, and in a few minutes they were properly attired in the One sort of door closes into the nest gymnasium suits and announced that they were ready for the battle.

"I had seen some professional broadsword combats and rather looked for some heavy work, but in less than a minute we all realized that there seemed to be more earnestness about the combat than was customary in meetings of professionals, it mattered not how large the stakes were.

"The men wore the customary wire head covering, and it was well they did so, otherwise there would have been one or two heads scattered about on the floor, for the fight was fast and furious. At the expiration of ten minutes these was a halt called so that a terrible gash on the sword arm of one of the combatants could be bandaged by a physician who conveniently drop-

size that return in huge numbers year after year with such absolute regular-

day. One such swarm of fish forms the occasion of an annual holiday and feast at Samoa. The fish is not unlike the whitebait for which the English Thames has so long been celebrated, and each year it arrives at Samoa on the same day in the month of October, remains for a day, or at the most two days, and then disappears entirely till the same day of the following year. Why it comes or whence no curious

naturalist has yet discovered, nor has anybody traced its onward course when it leaves the Samoan group, but the fact is unquestionable that suddenly, without notice, the still waters of the lagoon which surround each island within the fringing reef become alive with millions of fishes, passing through them for a single day and night and then disappearing for a year as though they had never come.-Lippincott's.

#### Chicago Modesty.

"Chicago beats the world," announced the tall, slim traveling man after he had taken a late lunch in the hotel be economically utilized to the last cafe. "It claims everything and conown benefit the situations found in exploited the universe, stocked it, waevery Western State which our present tered the stock, issued half a dozen civilization neglects. There are hun- series of bonds and ran it ever since.

"What do you think I went up against in that town last winter? I was coming out of one of the theaters when a cadaverous looking genius with ten inch hair asked me if I was a lawyer. I humored him to learn what his game was. 'Well, sir,' he continued, 'you have a chance to make a fortune. You have seen this play, strong on the stage and strong in the box office. It's superb, yet it's a bald faced, unmitigated, cold blooded plagiarism. I wrote it, every word of it. Not a situation, climax or sentence is changed. Go after the author for damages, and I'll give you half.'

"I dodged through the crowd ahead of us and made my escape." "What was the play?" " "The Rivals.' "-Detroit Free Pre

and tongs at each other, and in 12 minutes one of the men was lying on the floor with a terrible gash in his shoulder and a rap on his head which sounded so loud that it was heard in the police station adjoining. The clothing of the men was as fully covered with blood as if they had been painted with

"That ended it. Both men had received at least a dozen wounds, and the victor fell in a faint in less than a minute after he was declared the conqueror. My friend, on behalf of the participants, thanked us for our attendance, and we left after seeing the men lifted into carriages and taken away.

"It was several weeks before we knew to a certainty what it all meant and were not told then until both men had fully recovered. It transpired that the participants were both Danish officers; that they had quarreled in New York in regard to an official matter, and that a challenge passed and was accepted, and that all the details of the settlement had been left to the Danish consul, and that the whole party of us had innocently presided over a real duel.

"The strange part of it was that it took place within sound of the police station."-Washington Star.

Any Time You Want at the Pole. Those who are conversant with the use of globes know that all the meridians of longitude starting from the equator converge toward and meet at the pole. They know, too, that longitude signifies time, and that difference of longitude is difference in time. They know very well that when it is neon in London it is about 7 o'clock in the morning in Boston, and that when it is noon in San Francisco it is about a quarter past 3 in the afternoon in New York.

Now, as the meridian of London extends to the north pole, it necessarily ensues that when it is noon in the English capital it must also be noon at the north pole. In a similar manner when it is noon at Boston, or in San Francisco, or at Peking, or any other place situated in the northern hemisphere, it follows that it must also be noon at the pole, because all the meridians of those places unite at the north pole. Therefore it is noon all day long at the pole.

Thus there is an entire absence of time at the pole. But it would be just as correct to say that it is a place where there is a preponderance of time, for it is practically any time of day during the whole 24 hours, or indeed through the year. In fact, a resident at the north pole could make it any time of day he might choose to select, with the consciousness that it would be the right time .-- Youth's Companion.

#### LOST ON THE OCEAN.

#### BEA DISASTERS THAT ARE SEEM-INGLY INEXPLICABLE.

Instances Where Great Ships Have Disappeared, Some of Them in Calm, Bright Weather and on Untroubled Waters, Leaving No Trace,

It seems passing strange, considering the enormous amount of ocean traffic carried on nowadays, that it should be possible for a vessel to put out to sea in fit condition, only to vanish from the face of the waters and leave no indication of its fate. True, there are hundreds of unidentified derelicts floating about the seas and some of them may be the vessels which have so mysteriously vanished. It is appalling to think of such mysteries as the fates of these vessels, which, setting sail with hundreds of passengers to whom the voyage perhaps promises happiness, wealth and all the joys of life, never reach their destina-

tion and are never again heard of. Take the case of the Burvie Castle as a striking example. She vanished not in mid-ocean, but between the ports of London and Plymouth. Into the latter port she should have put on her way to Australia. But she never reached Plymouth and not a living soul knows how or where she vanished. It is most extraordinary that she should have been lost so near to land without so much as a spar being washed ashore to tell of her fearful fate.

Equally mysterious is the case of the Atalanta. This famous training vessel was stationed off Bermuda with more than 250 souls aboard. Early in 1880 she set sail for a short cruise and from that day to this she has never been heard of.

A very considerable percentage of the vessels which disappeared forever in this mysterious manner were running between England and America at the time. It might be thought that the terrific seas of the vast Atlantic were responsible, but it has been proved that many vessels were lost when the ocean was almost at dead calm.

A large sailing ship left New Orleans some years ago for London. Thrice she was spoken and reported all well, and she was facing exquisite weather and a smooth sea at the third Hme. Yet, it is known, she was lost with all hands within twenty-four hours, and to this day no trace of her has been discovered.

In the early part of 1892 a five-masted bark, the Maria, a newly constructed vessel, and at that time the third largest in the mercantile marine, set sail, in beautiful weather, from one of the biggest ports in Cochin-China for voyage. But she never reached Germany. She vanished shortly after being spoken off the west coast of Africa, and nothing has been found since to indicate the fate that befell her.

Another vessel running between England and America which met an end of a kind none but those who shared It ever knew, was the first-class steam-York for a journey to Liverpool, in the ligence and enterprise across the ocean

throttle to its last notch, the excited hosemen tried to turn the torrent; but with its force of fifteen hundred gallons to the minute it was too quick for them, and with one mighty kerchug it broke away and sent the nozzle flying round like a windmill.

Then suddenly, as we opened the

Before they knew what had struck them the ten men holding the nozzle were knocked prostrate, and two small boys were whisked off into the river like so much dust. A dozen lightning wriggles of the hose, and the frenzied cataract shot a third boy into the office of our friend, Don Capitan.

Inside the door, on a wooden settee, were sitting some of the family servants holding their infants, and the same stream on which the boy traveled through the door washed the whole party, settee and all, across the hallway into a heap at the foot of the stairs.

The crowd stampeded, and then, before further mischief was done, we managed to shut off steam.

"White Dandy," by Velma Caldwell Melville, is a companion story to "Black Beauty." It concludes with "An Old Horse's Appeal" in poetry. Mrs. Voynich has dramatized her novel, "The Gadfly," and it will be performed in this country next fall. Henry Holt & Co. have issued the seventeenth impression of the novel.

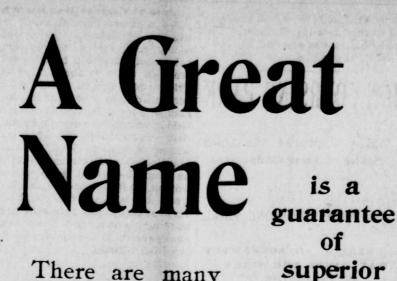

Some one has said that "a woman of genius is a wolf with wings, and paws on the ground, pinions in the air-a shudder and a struggle between the two kinds of locomotion; a tearing apart of body and spirit; a general unrest.

Sidney Lee, the editor of the "Dictionary of National Biography," and author of the "Life of Shakspeare," appeals to Englishmen owning copies of the first follos of Shakspeare to keep a firm grip upon them, as that country is being rapidly drained of these treasures by the United States.

The title of James Lane Allen's forthcoming novel is "The Mettle of the Pasture." Shakspeare lovers will remember the stirring lines in "Henry V." in which the phrase occurs. It is

to be another novel of Kentucky life; the largest and the most important work he has yet written. Mr. Allen expects to have the work ready for publication in the autumn.

The Nineteen Hundred, an illustrated Paris (France) periodical, now appears Hamburg, with every promise of a fair regularly in both the English and French languages. Editor Frederic Mayer has made a great success of the journal, which treats of the coming Paris exposition from a literary and pictorial standpoint. The directors and leading architects of the exposition and several literary men and women of Paris are contributors to the Nineteen Hundred, which is a most

#### A FIRE-ENGINE IN MANILA. Powerful Machine Made a Decided Sen

sation About the Quay.

In "Yesterdays in the Philippines' Mr. Stevens gives an account of the testing of a new fire-engine which had been imported from the United States for a wealthy resident of Manila. El Capitan was delighted with the appearance of the machine, glistening with brass and nickel, and invited all the prominent people of the city to witness its trial. The important day came and a crowd assembled, curious and expecfire-engine could do.

The engine had been placed out on the quay; all around stood groups of open-mouthed natives.

My associate and I felt fairly important as we gruffly bade the police clear the ground for action, and blew the whistle to scare the crowd.

The huge suction-hose was run into the river and ten natives were stationed at the nozzle of the four-inch hose, which was pointed up the small plaza running back from the quay. The bell rang and steam was turned on.

It worked well, and the big stream went so far as to soak down a lot of baled tobacco lying on a street corner at the next block, suposedly beyond reach. The owner of the tobacco came to the door to see what had happened, and as the engine began to work better the stream of water knocked him over and played around the entrance to his storehouse.

To avoid complications of this sort we shut off steam long enough to shift the hose over for a more unobstructed spurt along the river.

A few minutes later an open throttle caused a huge torrent to belch from the long nozzle with such force as to make the ten hosemen feel nervous, and in their excitement they turned the stream toward a lighter which was being poled down the Pasig by two Malays. The foremost of these was washed backward into the lighter, and the hindmost swept off into the river. A Chinaman who was paddling a load suffered a simlar fate.

Half-Dead A child-like faith in the arithmetic

life insurance agent who, says the News, wrote a policy on the life of a leaning forward touched the other on Chinaman-the first ever written for a the arm, saying: man of that race in Pittsburg.

How the insurance man did it he alone knows. The Chinaman had no very clear idea. He only understood that if he paid the premiums promptly he would be entitled to five thousand dollars some time. He began bothering the agent for the money after a couple of weeks had passed, and the agent tried to explain to him that he would have to die before any one could get it. Then the Chinaman fell down a cellarway on Grant street and was badly hurt. His friends tried to attend to him without calling in a doctor. When they did call in one, two days later, the doctor was angry.

"Why didn't you call me sooner?" he

asked. "This man is half-dead now." Next day the injured man's brother was at the insurance office with a claim for twenty-five hundred dollars. "You're not entitled to anything on

this," said the insurance man, "until the man is dead."

"Doctor say him half-dead," answered the brother. "Why he no get half?"

#### Sunday Letters in Holland.

In Holland the Sunday delivery is opposed by the religious classes to some extent, and those who do not wish that a letter be delivered on Sunday leave the small notice attached to the stamp, and the letter remains over till Monday in the postoffice. Those who do not care if the letter is delivered on Sunday, or, rather, who wish it delivered on that day if it arrives at its destination, simply tear off the small restriction clause. Therefore, the matter simply is the delivery of the letter on arrival, and has nothing to do with its travels on Sunday.

#### Old Names in Kansas.

An old deed unearthed at the Rock Island offices in Topeka discloses the fact that at one time the Kansas river was known as the "Camp" river and the bluffs at Kansas City as the "foothills of the Rocky mountains of Missouri."

When there is a wedding in the neighborhood, work is suspended all day while the women keep count of how often the express wagon stops at the house.

Most things taste as if the cook had of vegetables in a hollow tree-trunk put them on the fire, and had gone off and had forgotten them.

"Won't you have my seat?"

"Are you going to get out?" asked the standee.

"No, ma'am," replied this tactless creature, "but you are older than I, and"- but the sentence was never finished. If a glance could slay, that young person would have fallen on the floor dead.

"Thank you. When I am too old to stand up, I shall not enter a public conveyance."

That was all. The junior woman slunk back into the seat, and some of the passengers tittered. - Cincinnati Enquirer.

#### A Great Excuse.

Mother to Frank-How is it that you're late home nearly every night? Frank-Well, no wonder; we've got such a big clock in our school. Mother-Why, what has the clock to

do with it?

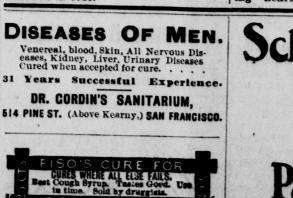

Frank-'Cause it's so big it takes the hands an awful long while to get round it. If we had a clock like papa's little one, I'd get home a great deal quicker.

#### His Generosity.

Manager (to actress, who has made a hit)-Bravo, my dear; I'll raise your salary-

Actress-Oh, how good of you-Manager (continuing)-On the four sheet posters, from \$200 to \$300 per week: but, as this will involve a little printing bill, you will have to stand a small cut of \$15 a week until further notice."-Cleveland Leader.

The first postoffice was opened in Paris in 1462; in England in 1581; in America in 1710.

"Upon my word, but I must have going to ask her for a feather. Mrs. Buzzard, my compliments!"

The buzzard grinned and giggled and tried to look shy, and meanwhile the jackal ate up the c her half of the hare.

"Here-how's this-where's my part?" exclaimed the buzzard, as she got to see what had happened.

"Oh, we took the meat and you have the taffy!" replied the jackal as he licked his chops and walked off.

Moral.-When craft will not avail and argument goes for naught, flattery will always win.-Buffalo News.

#### A Newsboy's Trimmph.

A pretty young lady dropped her dainty lace handkerchief at a State street corner the other afternoon. A

dapper young man and a newsboy both saw it drop and simultaneously made a grab for it, and each got a corner.

"Let go; I've got it," whispered the fellow to the boy. "Let go yourself!" shouted the

newsy. "I've got it."

While the man was apparently whispering a bribe to the boy the latter suddenly jerked the handkerchief out of his hands and handed it to the smiling girl, with the remark: "Dat guy wanted to make a mash, I

guess, but I caught de snuffer first." The crowd laughed, and the "guy" suddenly moved on.-Chicago News.

Favor and Favour. Now I am not going to argue about

the matter, but it may interest the reader to know that the first canvassing card which Mr. Gladstone ever issued, when he was a young Tory candidate at Newark, was printed in this way: "Mr. Gladstone to solicit the favor of your vote and interest."

So those misguided creatures who say that "favor" is a modern Amerieanism must explain how an ultra blue Oxford Tory, educated up to the eyebrows, came to use that form of spelling nearly 70 years ago.

DREYFUS' FAITHFUL WIFE. The Experience Through Which She

Passed During Five Years. Mme. Lucie Dreyfus, the devoted wife of the former prisoner of Devil's Island, five years ago was the handsome, honored companion of an officer to whom the most brilliant prospects were conceded. Nothing was lacking to their happiness. They had all the money they cared for, the welcome and friendship of the best society, a beautiful home and lovely children. Then, like a thunderbolt from a blue sky, came the disgrace. His wife, and his wife alone, believed in his piteous wail, "I am innocent." Twelve of his broth-

MME. DREYFUS.

er officers had examined Dreyfus and pronounced him a traitor. But she knew him and loved him; and when imported Chinese and Japs have also he appealed to her not to believe the verdict, she knew in her heart that her husband was doomed unjustly.

Later, when her efforts had succeeded in arousing a new interest in his summer vacation is bound to amount cause, six ministers of war affirmed and affirmed again: "Dreyfus is a traitor. Rest in peace, good people, he suffers justly."

But her love proved better than these great men's judgments. She protested bravely, "He is not a traitor!"

And in her modest retreat she repeat ed daily to the children of the prisoner: "Papa has not betrayed France. Pray that papa may come back to us!" And she was not allowed even to write of what was being done to secure him a new trial. She longed to be near him. She was not allowed to go. Little wonder she was at times she can't eat with any comfort. nearly beside herself with impotent rage. Her friends have told of those

#### It Was Lucky.

ment.-La Salle Tribune.

The little boy's mother awoke the other night and remembered that something had been left unlocked in the lower part of the house. So she quietly stole down the stairs and attended to the errand. She was on her way upstairs again when a hoarse little whisper assailed her ears:

"Who's that?"

She looked up quickly, and there on the top step, outlined against the gloom, stood the tiny white figure. And the figure's arm was outstretched, and in the small hand was a gleaming toy pistol.

Of course he knew as soon as she spoke, and was presently back in bed again, with his precious shooting iron beneath his head.

At the table next morning he gravely remarked:

"It was a mighty lucky thing for you mamma, that you spoke when you did."

#### A Gigantic Horse.

The weight of the heaviest horse ever known was 3,000 pounds, or very nearly 1 ton 7 hundredweight. This Clydesdale horse was exhibited at New York in 1889. It was 201/2 hands high, and although only 5 years old, measured 32 inches round the arm, 45 inches round the stifle or knee-joint, 95 inches girth, 341/2 inches round the hip, and 11 feet 4 inches in length. It was of perfect proportions, with a head 36 inches in length.

Hawaiians Eat Devilfish. The mere thought of eating an octopus is enough to make the everyday civilized being shudder, yet in the Hawallan islands these devilfish, as they are comonly called, are a much-prized delicacy among the natives, while the acquired the taste.

Any boy who will voluntarily hire himself out to a farmer during his to something. There are so few of them that people will have no difficulty keeping their future careers in mind.

The penalty fame brings to a man is that every girl he ever treated to ice cream claims to have once jilted him.

It must be a great satisfaction to a woman to get on a dress that is not a shirt waist, and have no fears of a parting in the back.

If a woman has any style to her, she is always dressed in such a way that

dark moments when she paced the than the circus itself. A circus crowd is always more fas

#### ARE WE SLAVES TO CHILDREN ? | by the passion for dolls, which is said

OMEBODY has said recently that 2 to their children, and that what was needed more than anything else in fine lady. The doll mother is but a this country was a "revolt of the parent" and a complete downfall of the tyrant.

This wise observer also remarked that what made the American child so thoroughly disagreeable was the system of indulgence practiced by parents, beginning in the cradle.

It is not the province of the writer to discuss the pro and con of the question, but to relate an incident which perhaps bears directly on the subject. The other day the cars on a suburban train were filled to overflowing. Men and women were standing in the aisles unable to get seats, and were jostled to and fro by the motion of the train, which was flying swiftly toward town. One seat was occupied by a woman and a 2-year-old baby, who insisted on standing up and looking out of the window. He would not allow his mamma to sit up close to him and give someone a seat beside her. No. The little fellow insisted on occupying one-half of the seat, and in making mamma keep the other.

Elderly women gazed at the seat longingly, but that made no difference to the fond parent. King Baby must a bath daily if you wish to keep your have his way. He had intimated in a forcible manner that mamma was not to sit near him, and no matter how many old people were standing, she was a slave to the young tyrant.

But when the conductor came along there was a change. Baby's seat had not been paid for, and he had no right to it.

"Please move along, madam, and let this lady sit down."

Mamma had to move up close to King Baby, leaving ample room for a tired old woman to sit down, for his tiny feet only took a few inches of space. But he was a little crowded, so he turned round and, seeing the situa- ed on deep yokes, the skirts of our tion, began to howl. It lasted only a gowns will not fit over them. It would minute, though mamma looked at the be madness to attempt wearing the oldwoman beside her as if she were a decided interloper.

Who wonders that the American child becomes a tyrant and that parents fear him?

#### A Famous Horse's Owner.

Miss Virginia Harness, the owner of the now famous mare, Imp, which upset all tradition by winning the Suburban handicap recent-

has won forty-three races, and yet Miss Harness, without referring to notes, can tell exactly the time,

placed horses and the date of each race.

to be inborn in every right-minded girl. Doll playing is really doll dressing. Americans are really in bondage Every bit of gew-gaw is eagerly sought to bedeck this miniature travesty of a prophecy of the child mother. If doll playing is the legitimate occupation of girlhood, we ought to have dolls which do not cultivate a taste for wash waists and the trivialities of fashion.

#### Summer Aids to Feminine Beauty.

Cucumber peelings, boiled in water, will be found good for the skin. A slice of cucumber may be rubbed on the face instead of soap. Lemon juice will remove sunburn. Dill-water is as good for the complexion as rose water. though it makes the skin paler.

Elderflower water is famous for its coloring properties, as is also lavender water.

Never go out in blustery weather without a veil unless you wish a tanned skin or freckles.

Do not forget, when drying the face after washing, to rub upward toward the nose. This will prevent wrinkles, and will help to smooth out to a great extent the crease alongside the nose. Use neither hot nor cold water exclusively in bathing. A good rule to follow is a hot bath at night and a cold one in the morning, but be sure to take

skin in good condition. Do not wear tight shoes if you desire a graceful carriage; no woman can walk comfortably or well in shoes that are too small for her feet. Do not wear

too small gloves. Avoid tight lacing and any, form of dressing which compresses any organ of the body .- Mrs. Humphry, in the Ladies' Home Journal.

#### A Petticoat Precaution.

The next occupation, after one's gowns have been put in order, is to turn attention to our petticoats, for, unless they are every one properly mountstyle petticoat with drawing-string fastening in the back. We shall find, in altering wash skirts made in this style, that the gores will need altering as well. Less fullness is absolutely necessary at the top-in fact, only enough is required to set the petticoat into the yoke with ease.

Our house petticoats for summer wear require to be long, as well as prettily flounced, and made up of sheer ly, is a true lover of lawns. Two rows of flounces laid in a fine horse. Imp inch plaits, with a lace edge, always look well, and such a petticoat does not cost a small fortune to be laundered, as the more elaborate ones do .-- Vogue.

The Unpopular Girl. The girl whose talk is all of I, I, I, the names of the who takes no interest in anybody else, and cares for nothing but

#### BOY WITH X RAY EYES.

the strange faculty possessed by Altred Lionel Brett, the 11-year-old son of Dr. Frank Brett

of South Braintree, Mass. When in a hypnotic condition, induced by his father, the boy is able to see through solids. He cau see the bones of a living man, and his power has often been used by his father in cases of fracture which he has been called upon to treat. Conclusive proof that there is no sham about the boy's wonderfui

faculty has been furnished by Prof. Leslie J. Meach-

ALFRED BRETT. am, who is conaected with the Medical College of Cor-

nell University. One of Prof. Meacham's arms was broken some time ago, and in healing the bones did not knlt perfectly. Last December an X ray photograph was taken of the arm showing the imperfect joint at the elbow. Recently Prof. Meacham went to the boy's home at South Braintree, and introduced himself to the family. At his request young Alfred was thrown into the hypnotic condition by his father, and asked to describe Prof. Meacham's elbow. He did so, and his description is fully confirmed by what is shown by the X ray photograph. Neither the boy nor his father attempts any explanation of the boy's strange faculty.

#### VENGEANCE OF A BRIDE.

She Put a Bullet Into the Heart of a

Deceitful Husband. Not long ago there was a murder on the main street in Tahlequah, I. T., and

although the killing was done in plain sight there was no demand of arrest or a trial for the slayer. It was the beautiful wife of Cherokee Jim, the Indian gentleman, who put a bullet into his heart, her object being to avenge her father's death and also to repay the deceitful Indian for his attempt upon her own life. The story is one of the most remarkable in the history of the romantic West.

Allie Madaris was the only daughter of a wealthy stock raiser at Checatah, Mexico will be invited to place their in the Indian Territory. She was beautiful and accomplished, amiable in disposition and fascinating in manner. Tenderfoot and cowboy wooed her in vain. Her flashing black eyes sent a shaft of passionate love into many a heart, but no returning arrow found lodgment in her affectionate nature until she saw Jim McDonald, "Cherokee

#### in search of her. But he did not go near the New York police.

Apparently heartbroken, he returned to the territory. But he was being shadowed. Among other long country tours he made one to the hut of "Six

Killer," a noted Indian outlaw. When he had left the hut "Six Killer" was placed under arrest. He was scared into telling the purpose of McDonald's visit.

Allie McDonald was there, a prison er under a hut in a cave, and "Six Killer" was being paid \$500 a year to keep her there till death. She had lost all reckoning of time and had abandoned hope of ever being rescued. To her the months of her imprisonment had seemed years. Her health had suffered as much through her hopelessness and despair as through confinement, unwholesome food, bad treatment and her damp prison. It was with the utmost difficulty that she was able to make her way back to Tahlequah with the detective, but .freedom gave her renewed courage and nerved her for the effort.

After she reached Tahlequah, Mrs. McDonald was kept in her room for several days, so that she might be able to recuperate and recover her strength of body and mind. One day she escaped. She had not gone far when she met.her husband on the street, and, without a moment's hesitation, - shot him dead. It was the vengeance of the bride of the Cherokee.

UTAH'S SALT PALACE.

It Is to Be the Main Building in a Permanent Intermountain Exposition. In Salt Lake City, seventeen miles

from Great Salt Lake, and on the edge of the Alkaline plains, the State of Utah has decided to erect a palace of salt. It is to be modeled after the design of the World's Fair buildings in Chicago, which were of wooden frame-

UTAH'S SALT PALACE.

work covered with "staff," or stucco. The salt palace is to be the main building of a permanent intermountain exposition to be held in Salt Lake City. Utah, Nevada, Arizona, Montana, Idaho, Wyoming, Colorado and New products on exhibition.

The salt palace will cover threefourths of the ten acres allotted for the exposition. The salt will be applied to the wooden structure by a spray. The water of Great Salt Lake, which is 25 per cent. salt, will be used, with the addition of a secret chemical that will render the quickly solidifying salt impervious to water. Experiments have been secretly made by Utah chemists that demonstrated beyond a doubt the practicability of the plan.

BLACKING IN BRUSH HANDLE.

#### TALKED TOO FREELY.

#### COACHMAN AND FOOTMAN LOSE THEIR SITUATIONS.

Discussed Their Master and Mistress in Manner Far from Respectful, While the Latter Heard the Conversation from Her Carriage.

Do our servants talk about us? asks Polly Pry in the New York Herald. Well, I should say they did. They note what we do and what we don't do, what we wear and say and eat and drink and generally in an envious and disagreable way. The candor of the kitchen would give us headaches and heartaches if we could hear it, and it's just as well that we don't. But all are not so fortunate.

I know of a good, kindly woman of some means, and with an angel's disposition, who had an experience one evening that is worth repeating. In company with a friend she had driven in her own carriage to the front entrance of a city theater about 8 o'clock at night. They left the carriage and went to the manager's office, where the secoudlady had an appointment regarding a charity benefit. Matters becoming a little dull for my friend, she begged leave to wait in her carriage and came out to it. Neither coachman nor footman was on the box and the indignant woman saw that the horses had been hitched to a lampost. She entered the vehicle, quietly closed the door and awaited developments.

Presently both of the men emerged from a near-by saloon and, wiping their mouths on their coat sleeves, mounted the box after unhitching the horses. Then this conversation floated down to her: "Wonder how long the old girl's going to be?"

"God knows! I wonder what she's up to?"

"I dunno. Maybe she's gone in to see the show."

"No, she ain't. I heard her tell the old man she'd be back in an hour." "He wouldn't care if she didn't come back in a week."

"That's right. Say! she's got him under her thumb, if ever a woman had."

"Well, I don't blame her. He's a hard proposition, he is. I guess he must have married her for her money." "You needn't guess again. You're it."

By this time the poor lady below was in a condition bordering on frenzy. She bit her lips until they almost bled, and her heart grew cold as she thought of the cruel ingratitude of these men, whom she had always treated with kindly consideration. But there was more.

"What's her friend want at the theayter?"

"Well, cook says she thinks she's goin' to play actress."

"Ha! ha! ha! Why, she couldn't go on the stage. They'd give her the laugh sure. She's too old."

Here the much-maligned lady came out, escorted by a polite attache, and different kinds of wood skillfully in-

ates the "Tennessee-Texas" and the "Vancouver-Washington" regiments as illustrations.

Next to the seamen of the United States British seamen get higher wages and better fare and more comfortable conditions of employment than do seamen of any other country. It naturally follows that alien seamen, as a rule, have a liking for service on British ships.

The total mercantile-marine shipbuilding output of 1898 for the whole world is estimated at 1.893,000 tons, and Lloyd's returns show that of this total output 1,367,570 tons gross were launched in the United Kingdom, the number of vessels being 761, of which only seventeen were sailing vessels.

In Minnesota a law authorizes park boards in cities to plant trees when petitioned by property owners concerned and to assess the cost, not to exceed 121/2 cents a front foot, on the property improved, this to include the expense of maintaining the trees for three years and replacing any that may die.

Cassell & Co. have been publishers for school dictionaries in many languages for years. They have green covers with red backs. Recently another firm has commenced to publish school dictionaries similarly bound, and Cassell & Co. have secured an order from the court forbidding such infringement.

Peter Pixley in tearing down his old house at the foot of Three Mile hill, near Great Barrington, Mass., which is said to be one of the oldest found under the floor several old coins, one of which is an old Franklin cent dated 1787. One side bears the date and the inscription, "Mind your own business," and the Latin word "Fugio."

In 1898, Liverpool led all other foreign ports in the world in clearances for the United States, the number being 1,009. In addition there were fourteen clearances for ports that had recently been transferred from the jurisdiction of Spain to that of the United States. Of all these 1,023 clearances, only three of the ships carried the American flag.

A large new clothing store in New York is equipped with lockers, dressing rooms, baths, barber and bootblack for the convenience of business men who desire to attend some gathering in evening dress, and do not wish to go home or to their club to dress, thus placing some of the facilities of club life at the command of the downtown community at nominal expense.

A remarkable electric light column is being erected in front of the new South station in Boston. It is of polished granite, and when finished it will be forty feet in height. The stone at the base weighs fourteen tons, is nine feet in diameter and rests upon a stone foundation fifteen feet deep, under which are twelve piles. Ornamental work will be carved upon the column, and half way up there are to be four bronze lamps with powerful lights. At the top one light will be placed.

E. C. Larrabee of Salem, Mass., has completed a picture of President Mc-Kinley which is composed of twenty joined her half hysterical friend in the laid, the woods used coming from Cuba, Porto Rico, the Philippines, the "Drive home," said the new arrival. Hawaiian Islands and other places with which the administration is identified. The portrait is to be presented to the President by its maker through Congressman Moody. It is a good likeness, and the work is very cleverly done. No less than ten pieces of wood are inlaid in the button on the coat alone.

She has always been very fond of the her own voice. mare Imp, which was given to her by her father, Dan Harness, with the unthe money made. The Harness family making mischief. live in a beautiful country home near Chillicothe, Ohio. Virginia, the owner of the horse, is a beautiful girl, of the heroic type of beauty, a fine horsewoman, and an ardent lover of all outdoor sports, fairly idolized by the men of the family, and loved and respected by all who know her.

#### Brave Women.

The Army Nurses' Association is an organization that, like the Grand Army, cannot be recruited. It is com-

posed of women who saw actual service as army nurses during the civil war. There were many these women while there was need for their services, but

MRS. EWING. now their ranks are thinning year by year. The society was organized in Washington, in 1881, by Dorothea Dix. Mrs. Elizabeth W. Ewing, of Pennsylvania, is the national president.

He Loves Her-Still. When they were married she was fair And he was young and brave; To-day gray threads shine in her hair And he is stout and grave.

She looked into his face and sighed, As loving women will, And then in trembling tones she cried: 'Oh. do you love me still?'

When they were married, years ago, It was his wont to say: "My little one, I love you so!" A dozen times a day.

"And do I love you still?" said he. As gruff old fellows will; "I do"-and added on, ah, me!-"With the accent on the still." -Chicago News.

The Birth of Vanity. Mothers are often responsible for the vanity which they may deplore in their daughters. The atmosphere of the home is too largely one of perhaps millinery and mantua-making. The dress of young children is often so exquisite that continual caution is necessary to prevent its injury, and play is robbed of spontaneity and activity. A mother who had educated her children to all these punctilities of dress, said: "I regret so much the exquisite wardrobe of my little children. I see now that it hurt their character." The dress of little girls should be as simple and substantial as that of boys. Everything which prevents activity and fosters vanity should be conscientiously, avoided. Love of dress is also fostered | lasts crimped for days.

The girl who says unkind things of her friends and relatives in their abderstanding that she was to have all sence, who is always telling tales and

The girl who looks down upon her mother, and snubs her brothers and sisters, and grumbles generally about her home.

The girl who is rude and disagree able to those whom she considers her inferiors, and who never shows any consideration for one poorer than herself.

The girl who is so vain of her personal appearance that she thinks everybody is looking at her, and cannot talk to a man for five minutes without fishing for a compliment.

#### Just a Few Prices. Sash ribbons are inexpensive.

Percale waists, of good pattern, \$1. Pretty neckware from 25 cents up. Some figured neck ribbons at 12 cents.

Leather belts of good quality for 50 cents.

Moire ribbons as cheap as 15 cents. Taffetas for 10 cents. Taffeta shirt waists, for summer. \$3.50. White China silk ones about the

same price. Trimmed pique skirts are not cheap. Take a \$5 bill along, or \$10, if you want a very pretty one.

#### A Matter of Home Discipline.

A child should never be discussed within his own hearing. Unfortunate is that family where the little ones learn that they may appeal successfully from one parent to another, or where upon one falls the onus of every necessary denial or reproof, while the other stands sponsor for every pleasure and indulgence! Let us spare no secret effort, as parents, to appear a unit to the child .- Woman's Home Companion.

#### Her Only Care.

She doesn't care for operas, the drama or the play. She doesn't care for housework-she isn't built that way: She doesn't care for dancing, for flowers or for books.

She doesn't care for bloomers-she doesn't like their looks; She doesn't care for picnics, they freckle

her and tan-The only thing she does care for is a marriageable man. -Chicago News.

Hair Crimpiug a la Mode. Girls in France have discovered something new. In order to get their hair to remain curly or waved for some time, before putting it into pins at night they damp the hair with a little lemon juice and sugar mixed. The effect is quite magical, and the hair

ALLIE M'DONALD.

Jim," a quarter Indian. He had been educated in the East and came back to the Territory with all the refinement and polish of a metropolitan gentleman. He decided to win her and the task proved an easy one. The gentle Desdemona listened not more greedily to the burning words of the dusky Moor than did Allie Madaris to the eloquent heart pleadings of the handsome Cherokee. They were engaged-married-and settled down in the lap of luxury. Her cup of happiness was overflowing, but it was soon to be changed to one of bitterness.

One day her father was found deadshot by an unknown hand. He was rich and she his only heir. Men suspected Cherokee Jim, but there was no evidence. She never dreamed that the man with whom she had embarked her whole soul in the traffic of affection was the man who had murdered her father. But he was. He had set his heart upon the old man's money, and he was determined to have it. But he found after the murder that Madaris had left a will, bequeathing all his estate 'to his daughter and her children, and McDonald was to get it only in case she should die childless.

The murderer had failed to achieve his wealth by his first crime, and it soon became apparent that his wife had a wil of her own and that he would fail to achieve it while she lived. To commit a second murder while the blood of the first was still fresh was too hazardous. Something, he thought, must be done, and done quickly. To wait was intolerable. There must be an entanglement at once of a kind that

would render his wife friendless in her grief and unsought in her apparent worthlessness.

Jim McDonald had the craft to conceive a plot that would serve his ends | they married them. and the "nerve" to carry it into execution. A New York artist had called upon Allie McDonald when she was Allie Madaris. He was still in the neighborhood. Here was Jim's chance. He accused his wife of infidelity and stormed at the innocent artist who for a time bore the upbraiding and threatenings and then, fearing to lose his life. ran away. At the same time Mrs. Mc-Donald disappeared. Jim said they had eloped. He was wild with excitement. He advertised far and wide for her,

offered rewards and went to New York her.

No More We'll Hear the Cry, " Where's

That Polish Box?" A magazine blacking brush, the invention of John J. Howe, of Wilmington, Del., is a thing which will appeal to every man who even occasionally blackens his own shoes. The affair is much the same in appearance as the ordinary brush, which combines dauber and polisher, except that the handle is somewhat larger. This serves as a receptacle for liquid blacking, which flows into the daubing brush by gravity

as the brush is applied to the shoe. This method has the advantage of cleanliness over the old way of using the boxed blacking, and the latter is always the right consistency for use.

properly bossed are happiest. A girl can never understand how a

man likes to be in a hammock alone. A bad man can be just as foolish over a good woman as a good woman over a

bad man. Men wouldn't be so conceited about the way their wives love them if they

knew the things they had loved before A woman's idea of having a good

time is being invited to so many things that she hasn't a different gown to wear to all of them.

To the day of her death a woman is never satisfied with any photograph of her that does not look like the one taken in her graduating gown.

Right after a girl has been disappointed in a man she takes desperately to music, church work, mental science or something that doesn't agree with

carriage

Then she caught her weeping friend in her arms. "Why, Annie, dear, what's the mat-

ter? Drive home, Frank." The coachman hesitated.

"Sha'n't we wait for Mrs. B., madam?"

"She is here in the carriage. She has been here for the last twenty minutes. Drive home."

And home they drove, the chill of horror upon the faithless twain on the box and the heat of indignation generating in the carriage. The two men were discharged that night, and I was glad when I heard that it had been done.

The Maryland Game and Fish Protective Association is buying partridges In Kansas and liberating them throughout Maryland.

A Sheridan, Mo., photographer says he has discovered a process by means of which a proof of a photograph may be taken within a few moments after the sitting.

Though traffic in the Baltic-North Sea canal has not come up to expectation, the Germans are pleased at the discovery that the herring is using the canal as a spawning ground.

An English actor who died on the road was shipped in his coffin to London recently by his manager as "theatrical properties." This cost \$4, whereas if he had gone as a corpse the cost would have been \$60.

Electricity has supplanted steam on the railroad from Milan to Monza, the oldest railroad in Italy, opened for traffic in 1840. Storage batteries are used. the electricity being obtained from the turbines on the Adda at Paderno.

A recent computation shows that, counting only donations of \$5,000 and upward, a partial list of gifts to charitable and educational institutions in the United States during the last six years gives an average of more than \$35,000,000 a year.

It is said that Hawaiian planters realize that the contract system is at an end and are now trying the experiment of profit-sharing with the laborers. So far the plan has worked well and is believed to be the final solution of the labor question.

A correspondent of a Paris paper writing from Manila and describing our army, says that the volunteer regiments are named "for the provinces in which they are raised." He enum

A KING'S PLAYTHINGS.

Abyssinia's Sovereign More Particular than He Used to Be.

To judge from the sub-titles, "Victorious Lion of the Tribe of Judah, King of the Kings of Ethiopia, Lieutenant of God," Menelik II. should be "every inch a king;" but as a matter of fact there are several inches of child, and naughty child at that, under the black, polished skin of this monarch of Abyssinia.

The child in Menelik was once easy to amuse. Very little sufficed to entertain him, and Vicomte de Poncins relates in the Nineteenth Century that the first sugar-loaf which was presented to him threw him into ecstasies of pleasure, and that he and his consort were discovered with that blessed product of civilization between them, lick. ing it vigorously.

But those good times are past; Europeans have brought Menelik so many toys that he has become critical. When a new traveler is announced he now awaits with impatience the customary present, trying to find out beforehand whether it is to be something new, in which case the audience is speedily granted.

He is much interested in all machinery, which, including watches, he invariably takes to pieces. Sometimes he deigns to be present at the unpacking of the traveler's boxes, and to appropriate any little object that pleases him. Such informal examinations please him vastly.

"If I had not been a king," he remarks at times, "I should like to have been a custom-house officer."

Vicomte de Poncins pleased Menelik so much with a pair of hastily darned socks that he insisted on unsocking, for his own benefit, a party of missionaries who passed through Adis Abeba shortly afterward; but nowadays he must receive more costly gifts, and,

like Oliver Twist, he asks for more. Sometimes his majesty, tiring of his presents, gives them away, and a silver soup tureen, part of the gift of a European sovereign, has been seen on the head of one of his armed warriors.

All things come to the man who waits -with the possible exception of the waiter with the things he is waiting

Love in a cottage is all right, only it's hard on the cottage.

## TO MANUFACTURERS

Who desire a location combining every feature conducive to prosperity, sufficiently near to San Francisco to enjoy all the privileges of a site in the metropolis, and yet sufficiently remote to escape the heavy taxation and other burdens incident to the city.

Where a ship canal enables vessels to discharge their cargoes on the various wharves already completed for their accommodation.

Where large ferry boats enter the large ferry slip now in use, and land passengers, freight and whole trains of cars.

Where an independent railroad system gives ample switching privileges to every industry. Where a private water-works plant, with water mains extending throughout the entire manufacturing district, supplies an abundance of pure artesian water at rates far below city prices. Where some of the largest industries in the State are today located and in full operation.

Where hundreds of thousands of dollars have already been spent in perfecting the locality for manufacturing purposes.

Where the South San Francisco Land and Improvement Company own THIRTY-FOUR HUNDRED acres of land and Seven Miles of Water Front on the San Francisco Bay, and on the main line of the Southern Pacific Railroad. Where, in fact, rail, wharf and other privileges are unexcelled for manufacturing purposes by any other locality on the coast.

If you desire such a location come and see what we have in South San Francisco, San Mateo County.

For further information call or address

## SOUTH SAN FRANCISCO LAND & IMPROVEMENT CO.

202 SANSOME ST., SAN FRANCISCO, ICAL

\*\*\*\*\*\*\*\*\*\*\*\*

## **TO HOME-SEEKERS**

The South San Francisco Land and Improvement Company, comprising many San Francisco, Chicago and New York capitalists, created in San Mateo county a new town site known as South San Francisco. This town site is situated on the main line of the Southern Pacific Railroad, and also on the Southern Pacific Bay Shore Railroad, soon to be finished; it is also at the terminus of the San Francisco and San Mateo Electric Railway.

South San Francisco was platted as a town just prior to the great financial panic of 1893 and 1894; during all that period of financial wreck and ruin, when almost every new enterprise and many old-established institutions were actually swept out of existence, she has held her own and is to-day a prosperous community

Upwards of \$2,000,000 in cash have been expended in laying the foundation of this new town. Most of the streets have been graded, curbed and sewered, miles of concrete sidewalk laid, trees planted along the main highways, and a water-works plant completed, giving an abundant supply of pure artesian water for

every purpose. But the foundation laid in what is known as the manufacturing district of this town site constitutes above all others the most positive guarantee for

There is no stability nor permanency so absolute respecting real estate values, and the future growth of any community like that which is based upon industries giving employment to men. The facilities created by the founders of South San Francisco have already secured to her several large manufacturing enterprises, and will soon secure many more; this means not only an increase in population, but an enhancement in real estate values.

South San Francisco has passed the experimental stage, and is now an established town. Many of her lot owners who have properly improved their holdings are even to-day realizing from ten to twenty per cent net on their investments. How many communities as new as South San Francisco can make this boast? An independent community in itself, with its own supporting elements, and at the same time close to the metropolis of California, and in the direction in which

San Francisco must necessarily grow, already reached by some of the city's street car service, and certain to be on the line of any new railroad entering San Francisco, South San Francisco presents to-day opportunities for investment among the safest and best on the Pacific Coast. Detail information cheerfully furnished. Address
