PETUNIA - VAUGHAN'S ALL DOUBLE DWARF MIXTURE

Vaughan's Seed Store

CHICAGO . . . NEW YORK

Vaughan's Giant Pansies

Vaughan's Improved Swiss Giant Mixture

The flowers of this strain are of enormous size, 3 inches and over in diameter. They are perfectly round with overlapping petals, borne on strong stalks well above the remarkably luxuriant foliage. Thick petals, of a rich velvety texture, give this strain of pansy the required substance so necessary to a perfect pansy.

The superb colors and color combinations—salmons, pinks, rich reds and blues, are their distinctive feature. Excellent for greenhouse culture. Trade pkt., 50c; 1/8 oz., \$1.00; 1/4 oz., \$1.80; oz., \$6.00; 2 oz., \$11.50; 4 oz., \$20.00; lb., \$70.00.

Swiss Rhinegold. Canary yellow with dark blotches. Trade pkt., 50c; 1/8 oz., \$1.00; 1/4 oz., \$1.75; oz., \$6.00.

Swiss DWARF Mixed

For those who desire a dwarfer plant than the original type, we have had our grower make this selection. The colors are the same as in the original strain but the plant itself is considerably shorter. Trade pkt., 50c; 1/8 oz., \$1.00; 1/4 oz., \$1.80; oz., \$6.00; 4 oz., \$20.00.

Vaughan's Maple Leaf Giant Mixed

A distinct variety we introduced several years ago, having very large leaves and flowers of gigantic size, 4 to 5 inches across, perfectly round, of heavy substance in many attractive colors and color combinations. A prize winner. Trade pkt., 50c; 1/8 oz., \$1.00; 1/4 oz., \$1.80; oz., \$6.00; 4 oz., \$20.00; lb., \$70.00.

Vaughan's Super Maple Leaf Mixture

This strain is even finer than the above, with flowers of unbelievable size and texture, larger than in any other strain; while the plants are also of compact growth and the extra large foliage is a rich, dark green. Trade pkt., 75c; 1/8 oz., \$1.30; 1/4 oz., \$2.50; oz., \$9.00.

Vaughan's Giant Mixture

Besides a good share of the "Fancy" strains such as Masterpiece, Swiss Giants, etc., this mixture contains all the self colors such as white, yellow, blue, purple, red, bronze, etc., and is probably the best "general" high grade mixture obtainable. All the flowers are of the "Giant" type and of good shape and texture. Trade pkt., 50c; 1/4 oz., \$1.25; oz., \$4.00.

Vaughan's International Mixture

This is a mixture of special strains such as Bugnot, Masterpiece, Swiss Giants, Triumph of the Giants, Boulogne Giants—all 3 and 5-spotted flowers of largest size and great substance in the most varied colors and color combinations. Since this mixture contains but very few self-colors, such as white, blue and yellow, these should be ordered separately if desired. Trade pkt., 50c; 1/8 oz., 90c; 1/4 oz., \$1.65; oz., \$6.00; 4 oz., \$20.00.

How to Sow Pansy Seeds. Sow the seeds in a cold frame in light soil without any fertilizer. Cover the seeds very lightly with the same soil and keep moist. Shade the seed bed with cheesecloth or a muslin screen, and as soon as all the plants are up remove the screen. Or you may sow them in a large pot or seed pan.

To be certain of fine, strong Pansy plants, we suggest the following, applying as a top-dressing by the end of March or early April:
2 parts dried blood 2 parts steamed bone meal 1 part potash

NEW SWEET PEA

Spencer Multiflora Abundance is the fitting name given this new creation, because it stands alone as the fore-runner of a new type distinguished by the abundance of flowers on each spray. Six flowers on the stem is the rule, but seven and eight are not uncommon and occasionally sprays are found with nine flowers. Stems are long and strong and flowers of good size and well placed. The color of the flowers is a bright, clear, warm mauve, approaching the deep Cattleya-orchid shade. Trade pkt., 35c.

Spencer Bonnie Ruffles. Salmon-pink on rich cream, the pink becoming a little deeper towards the edges of standard and wings. The salmon-pink, which completely overlays a background of rich primrose, gives a unique golden pink appearance. Oz., 50c; lb., \$5.00.

Spencer Bridal Veil. The first real white sweet pea without a trace of blush. Received Gold Medal Award Scottish Sweet Pea Society, 1935. Oz., 45c; lb., \$4.00.

Spencer Burpee Blue. Flowers are large, beautifully waved, heavily ruffled and duplexed, and of a distinct dark blue, bright and clear and uniform throughout. Vigor of growth, length of stem, size of flower, and purity of color are well combined in this New Giant Ruffled Burpee Blue Sweet Pea. Oz., 30c; lb., \$3.00.

Sweet Pea Early-Flowering Spencer

Princess Blue. A delightful and pleasing shade of silvery or Delphinium blue. The flowers have large bold standards and wide spreading wings, both standard and wings holding to the same rich blue color. A vigorous grower. Oz., \$1.00; 4 oz., \$3.50; lb., \$12.00.

Tahoe is a mid-blue, a shade between Mrs. Herbert Hoover and Blue Bonnet, but comes with large wavy flowers. It is a "Chicory blue deepening to mauve." The large wavy standards and ruffled wings have the same delightful shades of mid-blue, and in addition the flowers are well placed on long stems. The plant is a vigorous, strong grower. Oz., \$1.00; 4 oz., \$3.50; lb., \$12.00.

SALVIA Splendens Fire Charm. A very dwarf form of Fireball. Very early flowering, fine for planting combination baskets or boxes. Sow late in spring for early summer bloom. This sort will flower in a two inch pot. 500 seeds, \$1.00; 1000 seeds, \$2.00; ¼ oz., \$3.50.

VIOLA Cornuta Supreme Mixture. This blend of bright gay colors far surpasses any mixture of Violas. The bright shades of self-colors of red, yellow, blue and apricot, combined with many shades which are blotched, undoubtedly makes these Violas a supreme mixture. Trade pkt., 50c; ¼ oz., \$1.20; oz., \$4.00.

ZINNIA Linearis. This is a new strain of our Midget type, bearing single flowers of deep golden orange, with a contrasting yellow stripe, an attractive combination. ZINNIA Navajo Mixed Colors. Flowers are of medium size, double and semi-double, and composed of long narrow petals, some of which are slightly incurved or fluted. The bicolor effect of each petal, being heavily tipped white, creamy white or creamy yellow for about one-third its length, is most unusual and attractive. Colors run through lilac, lavender, russet, crimson, orange, yellow, pink and other pastel shades. 1½ ft. tall. ⅛ oz., 20c; ¼ oz., 30c; oz., 85c.

DELPHINIUM *Hybrida. Art Shades.* Many unusual shades in dainty and attractive colors. Trade pkt., \$1.25; 1/8 oz., \$2.50; 1/4 oz., \$4.50; 1/2 oz., \$7.00; oz., \$12.00.

HOLLYHOCK *Allegheny Rosette.* A fine shade of bright pink. Blooms are particularly large with a rosette center with a wide row of guard petals which emphasizes the rosette center. The bloom is the same color throughout. Trade pkt., 35c; 1/4 oz., 50c; oz., \$1.80.

INCARVILLEA *Hybrida Bee's Pink.* Large light rose Begonia-like flowers with deep yellow throat, produced all summer. A hardy perennial which succeeds well in borders and is equally valuable for green house decoration. Trade pkt., \$1.00.

LUPINUS *Polyphyllus "Russell."* The chief features of this wonderful strain are, firstly, the giant size of the spikes of bloom, which are often 3 1/2 ft. and more in length, secondly, the fan-like shape of the large individual flowers, the standard being expanded like that of a Sweet Pea, and thirdly, and most distinctive, the enormous range and unique character of their coloring. A Gold Medal was awarded to the Russell Lupins at the R.H.S. meeting, June 8th, 1937. 50 seeds, 65c; 120 seeds, \$1.25.

POPPY *Oriental New Varieties.* Seed collected from the field of a firm who make a specialty of the newer named sorts, and the plants from this seed should furnish many varieties which will be attractive additions in the garden. Trade pkt., 25c; 1/4 oz., 60c; oz., \$2.00.

PYRETHRUM *Roseum Robinson's Hybrids.* A selection made by an English specialist. This wonderful strain has a fine color range of single overlapping petals carried on long, stiff stems. Trade pkt., 50c; 1/4 oz., 90c; oz., \$3.00.

RUDBECKIA *Hirta Herbstwald, Autumn Tints.* A perennial which blooms the first year from seed, if sown in March, is a most valuable addition since it furnishes admirable cut flowers until late in fall. The plants grow to a height of 2 ft. and produce well-formed, large star-flowers on long stems. The colors range through all the gorgeous, fiery, autumn tints. Trade pkt., 50c; 1/4 oz., \$1.00.

RUDBECKIA *Hirta My Joy (Giant Black-Eyed Susan).* Large orange-yellow flowers. Trade pkt., 25c; 1/4 oz., 40c; oz., \$1.40.

SCABIOSA *Fischeri.* An attractive Scabious of Manchurian origin, easy to grow and a long lived perennial. Height about 2 1/2 feet and requires no stakes, being of neat and tidy habit. Flower is 2 1/2 inches across and is beautiful blue-purple color and not easy to describe. Flowering growths are clothed with smaller, finely-cut foliage up to the height of a foot or more, these ending in a long, naked flower stem which makes the plant a useful subject for cutting. Trade pkt., 25c; 1/4 oz., 70c; oz., \$2.40.

SWEET WILLIAM *Midget Single Mixed.* You will be charmed with this splendid plant. Though small, it is extremely lovely, with plants growing about six inches high and making a compact spread of a foot or more. When in bloom, the foliage is completely hidden by flowers. There are many showy and rich colors. Trade pkt., 35c; 1/4 oz., 90c; oz., \$3.00.

Carl Cropp, vice president of Vaughan's Seed Store, rating 1938 All-American trials, of which he is one of the judges. To right, view of Vaughan's 1938 flower seed trials at Western Springs, Ill.

Vaughan's Flower Seed Trials

You are invited to pay a visit to Vaughan's Trial Ground, which is at Western Springs, Ill., near our greenhouse, along the Burlington tracks on Reid St. Here you will see hundreds of varieties, the major florist items, since we have specialized in the florists' trade since 1876. A seed merchant must gather the seeds he sells from all over the world. Seeds cannot be judged, as are most goods, by inspection. They must be taken on faith in the purveyor's assurances, until the seeds can be grown. The trial ground affords us a final check on the reliability of our growers. In 1937 it occupied four acres.

An interesting feature of our trials each summer is the planting of entries in the flower seed section of the famous All-America trials, to determine the year's most meritorious introductions.

These are identified by number only, but are always interesting to visitors since they represent the latest improvements which have been accomplished by the outstanding breeders of the whole world.

Vaughan's ^{The} World's Best Flower Seeds

Seeds cannot be judged, like other goods, by inspection. The buyer's sole protection is in the skill and honesty of the merchant. The merchant, in turn, must gather his seeds from all over the world, finding the best of each type in that section of the globe most favorable to its culture, or where technical skill is most highly developed.

Since 1876 Vaughan's Seed Store's officers have been searching the world for the finest seeds. They have maintained the closest contact with the seed growing industry in every country. The outstanding breeders who produce improved strains of flowers and vegetables everywhere have been their friends.

Constant vigilance is necessary to insure that sources which have proved reliable in the past continue to be so. Seed crops in this country must be inspected at least twice a year. Trips to Europe must be taken frequently. It is necessary to know each grower, his crops, his methods, and his standards of quality; and then to compare the types and varieties of one with another. In that way only can we know where to find each variety at its best.

Neither time nor expense is spared to insure that we can offer to our customers the best seeds obtainable in the world.

Many items on our list are grown exclusively for us under most favorable conditions all over the world, and this added control of roguing and supervision is further guarantee of highest quality.

TESTING AND TRIALS Every lot of flower seed sold by us is tested in OUR OWN laboratory, where we prove the germination and make certain that the percentage is up to the high level of our standards. Trueness to type is determined and checked by the hundreds of tests grown in our greenhouses and trial grounds. This summer we conducted a series of approximately five hundred trials of various varieties to further check on the reliability of our seed.

Vaughan's Wilt Resistant Asters

Aster growers have been troubled with pests of recent years. This family has been widely attacked by the Fusarium Wilt, which condition has been overcome in growing the Wilt Resistant Strains which, although grown in infected soil, proved immune from the disease. Aster Yellows is also an enemy. This has been found to be transferred to the plants by tiny insects called leaf hoppers. The only means to overcome this is to grow the plants under a cheesecloth cover.

BABY DELIGHT MIXED

Few small-flowered pansies are more lovely than this baby type. In height it does not exceed 4 inches, with compact bushy growth like that of the Viola Cornuta Mixed colors. Valuable for border or rockery. Trade pkt., 50c; ½ oz., 80c.

See Perennial pages for Viola Cornuta or "Horned Violet". These may be treated as annuals and are extremely useful for edgings or small beds. They delight in the sun and bloom continuously all summer.

How to Sow Pansy Seeds. Sow the seeds in a cold frame in light soil without any fertilizer. Cover the seeds very lightly with the same soil and keep moist. Shade the seed bed with cheesecloth or a muslin screen, and as soon as all the plants are up remove the screen. Or you may sow them in a large pot or seed pan. To be sure of fine, strong Pansy plants, we suggest the following, applying as a top-dressing by the end of March or early April:
2 parts dried blood 2 parts steamed bone meal 1 part potash

PLEASE NOTE:

Highly bred double petunia seed is not as vigorous in growth as is that of single strains. To some extent this lack of vigor extends to the seed. Seed of our all double strains has been carefully tested in soil, and, if carefully handled, we know it will germinate 60-70%. For this reason and because of its high cost we cannot entertain claims of non-germination of this seed. If handled with due care, we know it will grow.

Streptocarpus New English Hybrids (Cape Primrose)

A superb strain with a wide range of colors. Lovely in shades of pink, mauve, lavender, white, deep rose, carmine and blue, some with white throats, others penciled. The flowers attain a diameter of 2 inches and over, similar to Gloxinias. They are borne on wiry stems and last long when cut. A fine pot plant for winter blooming when sown in January or February. The seeds are small and require very little covering. For soil, use the same as that in which Gloxinias thrive. They should be grown rather cooler than Gloxinias.

Sweet Peas Early Flowering Spencer Novelties

INTRODUCERS' DESCRIPTIONS

4 ounces and upward of one variety supplied at pound rate. Less than 4 ounces of one variety at ounce rate, unless otherwise noted Duplexed varieties often have 3 to 4 standards and the same number of wings, giving the appearance of a semi-double flower

SWEET PEAS EARLY FLOWERING DAPHNE.

All our Sweet Pea seed sent to you will be treated with Cuproside (red copper oxide), unless ordered without this treatment.

Various sowings have proved that Sweet Pea seeds treated with Cuproside are less liable to rot, especially during the germination period in the ground. We believe that seeds treated with Cuproside will give you a greater percentage of germination than untreated seeds, which have a tendency to rot in soil that is too wet.

Sweet Pea seed treated with Cuproside **must not be soaked before sowing.**

Seeds of Biennials and Hardy Perennials

Perennials fill a large and interesting place in the operations of an up-to-date florist establishment. Some are as easily raised as annuals, quite a few may be forced, others make fine pot plants and many furnish splendid cutting material. The rock garden requirements absorb all the low-growing varieties and the florist with his eye to the future will devote considerable space to perennials of all kinds. They require little heat, if any, and not much care.

SEED GERMINATES SLOWLY AND IRREGULARLY

of the following varieties and seed bed should be prepared where it will be undisturbed for a year or more.

Acanthus Mollis, Aconitum, Adonis Vernalis, Anemone, Asperula Odorata, Clematis, Delphinium Cardinale, Delphinium Zalil, Delphinium Nudicaule, Dictamnus, Dielytra, Dornicum, Gentiana, Hel-leborus Niger, Incarvillea, Iris, Peony, Phlox Decussata, Primulas (Alpine) Trollius and nearly all Alpines.

In our Trial Grounds we have grown Delphinium Iceberg and Summer Cloud, and they both look as though they were the same strain. Iceberg is really superior to Summer Cloud in growth, but the flower spikes and color are identical. They both belong in the Belladonna group because they have slender spikes of blooms. They are good for percentage of white.

LILIAM Formosanum Giant Pure White.

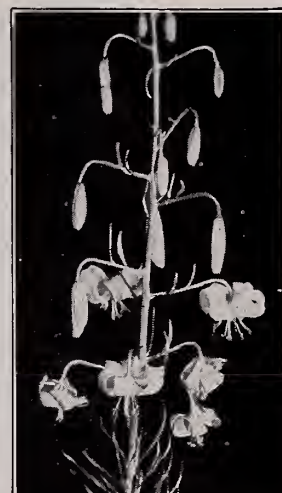

LILIES FROM SEED

The seed can be sown almost anytime, in flats, pans or pots. The soil should be a porous loam of good fertility with no raw manures. A compost of rotted sod and sharp sand, with well rotted organic matter, cannot be improved upon.

For indoor culture, the seed is not to be covered more than 1/4 inch with a sandy soil. When large enough to handle, the seedlings should be pricked off into 2 inch pots, and then set out after danger of frost is over.

Some lilies have the habit, under some circumstances, of waiting until the second year before top growth takes place. Often germination takes place the first year with no growth above the surface.

Lilies can be transplanted at almost any stage of development. They are not exacting in the types of soils to which they are adapted, except that it be porous. They do not like a baked, plastic clay, or lean, loose sands, unless such soils are ameliorated by the incorporation of an abundance of organic matter which changes their substance.

Seeds of Biennials and Hardy Perennials

VIOLA Cornuta. In Flower All Summer.

PYRETHRUM Roseum Double White.

Rudbeckia Hirta (Herbstswald) Autumn tints. A splendid new cut flower. This new perennial, which blooms the first year from seed, if sown in March, is a most valuable addition since it furnishes admirable cut flowers until late in fall. The plant grows to a height of 2 ft. and produces its well-formed, large starflowers on long, ivory stems. They are long-lasting and most desirable for all sorts of arrangements. They are of easiest culture, preferring a sunny location. In general appearance they resemble Gerberas, and to call them the "Gerberas of the north" would be a most suitable name for them.

The colors range through all the gorgeous, fiery, autumn tints. ¼ oz., \$1.00; trade pkt., 50c.

DOUBLE BEGONIA

ACHIMENES

AMARYLLIS

Large Flowering Hybrids

One of the finest strains of Amaryllis we have ever seen, raised by eminent growers whose stock and hybridization for many years we have purchased in its entirety. Flowers are immense, borne as a rule four to a stem, in an amazing and beautiful range of colors, blended, splashed and striped in a manner not seen in other strains.

2-2½ inch.....	\$2.00	\$15.00

ACHIMENES

This is closely related to the gloxinia. Plant 6 to 7 bulbs in a 5-inch pot, or 9 to 10 in a 6-inch pot. The soil used for potting should be rich in humus and of an open, porous nature, allowing perfect drainage. A good mixture to use is equal parts of loam, leaf mold and sand. About one-third of the depth of the pots or pans should be occupied with drainage. After the young growth appears, great care should be taken to keep the soil moist, for a single severe drying will ruin the plant. Blooming time 8 to 10 weeks after planting.

Purple or Light Blue.....	\$0.35	\$ 2.00	\$15.00

BEGONIAS

Tuberous-Rooted

Every florist should grow some of these bulbs, as they make showy plants that find ready sales in the spring and summer. Use 4-inch pots and shift later to 5 and 6-inch pots if larger plants are wanted. A compost of one part rotted cow manure to two parts loam and one part leaf mould will give good results. Water sparingly until growth is started. They like a 55-58 degree temperature at night.

Vaughan's Vigor Strawberry Plants

Grown in Northern Michigan's Ideal Fruit Soil and Climate—Not Available for Shipment after May 15.

Our plants are grown under ideal conditions. Note illustration for root development of a single specimen. They have been developed from selected plants and we know you will be pleased. Varieties below are up to date.

Write for pamphlet on Strawberry Culture.

AROMA. (Per.) Late. One of the most popular late varieties. Fruit large to very large; holds its size well throughout all the pickings. Berry is roundish, conical, smooth and perfect in form and of a beautiful bright glossy red in color; very firm and of high quality. Its rich aromatic flavor has suggested its name. The habit of spreading which this variety possesses opens the way for the sunlight to reach the crown. The leaves are broad, clean and smooth and of a dark green color. Price, 100, 90c; 500, \$3.50; 1000, \$6.25.

COOPER. The large size and the beautiful brilliant color of the berries immediately attracts the attention of every one, but the greatest feature of all is that peculiar mild, delicious flavor not found in any other Strawberry. Due to the wonderful vigor of the plant, this variety is adaptable to a wider range of soils and to a wider range of climates than any other variety. The foliage is immense, the big broad leaves often growing a foot high. This is due to the great root system, which goes down for moisture and enables the plants to produce the enormous load of big berries even during continued dry weather. The

unusual vitality of the plant carries every berry to perfect maturity—the last to ripen are as large as the first. Cooper is strongly staminate and can be grown alone and is an ideal mate of any of the pistillate or imperfect varieties, due to the long blooming season. Price, 100, \$1.00; 500, \$3.50; 1000, \$6.50.

DR. BURRELL. (Per.) Midseason. The berries are large, delicious and beautifully formed. The surface of the berry is a deep glossy red. The meat is solid. If you are looking for a good dependable all-purpose variety you will make no mistake in planting Dr. Burrell. In manner of plant growth this variety closely resembles Senator Dunlap, but will produce more, bigger and better berries, ripening a few days earlier than Dunlap. Price, 100, 90c; 500, \$3.15; 1000, \$5.50.

GIBSON. (Per.) Medium early. Berries are large and regular in shape, holding their size well to the end of the season. Color rich red. Flavor is neither sweet nor sour, but just right for canning. Extremely productive, in fact we know of no variety that will produce more quarts of berries per acre than the Gibson. It makes a strong vigorous plant that withstands adverse conditions admirably. This variety seems to embody every requirement necessary for a profitable berry. We recommend it and know you will not make any mistake in planting Gibson. Price, 100, 90c; 500, \$3.40; 1000, \$6.00.

CATSKILL. (Per.) Midseason. A fine new variety developed and introduced by the New York Agricultural Experiment Station. Large, well-formed berries of beautiful color and rich aromatic flavor. Has been proved highly suitable for shipping or canning. Strong, vigorous growth, thrives in many types of soil. Catskill is a heavy producer and seems to hold its own with any variety. Price, 100, \$1.20; 500, \$4.25; 1000, \$7.50.

PREMIER. (Per.) Early. Berries are large, beautifully formed, red through and through; flavor delicious. A splendid shipper. The deep heavy rooting system makes the plant a strong drought resister, and it is especially adapted to any soil or climate, giving you a big crop of fancy berries which will sell at highest prices. When extra fancy early fruit is wanted we advise this. Price, 100, \$1.10; 500, \$4.50; 1000, \$8.00.

SENATOR DUNLAP. (Per.) Midseason. The fruit is dark red with glossy finish, shading to a deep scarlet on the underside. The meat is a bright red all through and exceedingly juicy. It succeeds everywhere and with everybody—the beginner as well as with the veteran grower—but should not be allowed to mat too thickly. For a medium-sized, productive, early-to-midseason berry, you need not hesitate to plant Dunlap. One of the best and most popular. Price, 100, \$1.00; 500, \$3.70; 1000, \$6.50.

MASTODON—Genuine Perfected. (Everbearing.) The world's greatest everbearer because nothing like it was ever achieved before. Produces nearly 6000 quarts per acre during August, September, October and November. In size, quality, flavor and appearance Mastodon heads the list. Unlike other everbearers, the plants of Mastodon are large, vigorous, heavily crowned and deep rooted. This explains their ability to produce enormous loads of fine fruit even under adverse conditions. Regardless of your past experience with everbearing Strawberries we urge you to plant this wonderful new everbearer this spring. It will amaze you with the tremendous load of extra fine fruit produced by every plant. Price, 100, \$1.75; 500, \$7.00; 1000, \$13.00.

DWARF BURNING BUSH

BEAUTY BUSH (Kolkwitzia Amabilis)

PHILADELPHUS VIRGINAL

OUR shrubs are nursery-grown and are transplanted every two or three years. They are nice, shapely bushes with plenty of good fibrous roots, and are such plants as are in demand by the first class retail trade. They should not be compared to stock that is never moved from the cutting or seeding beds until sold. Our Nursery is located at Western Springs, 15 miles west of Chicago, on the C. B. & Q. R. R., two blocks south of 47th Street, on Wolf Road. Visitors are invited to inspect our stock at any time. We have a choice lot of specimens such as are not usually seen. Our customers will be pleased with the class of stock we send them.

Shipping Directions: All stock is sold F. O. B. Western Springs. Packing charges to be added on all orders for shrubs, dormant roses, fruits, trees, evergreens, and vines, at cost. Always give full and explicit shipping directions, as our responsibility ends on delivery to the express or freight office in good condition. All trees, shrubs and plants shipped subject to customer assuming risk regarding their own State Nursery Inspection Regulations. Certificate furnished with each shipment. Where personal selection of stock is made at our Nursery we charge according to its value.

Vegetable Plants With a Pedigree

Vaughan's Seeds of Table Quality Varieties are a Sure Selling Specialty

MARION MARKET.

Resistant Plants of Cabbage

Marion Market. 75 days. The third yellows-resistant cabbage to mature. Of an excellent Copenhagen Market type, though later than select Copenhagen, coming a short time before Glory of Enkhousen. Oz., 50c; $\frac{1}{4}$ lb., \$1.50; lb., \$5.00.

CALIFORNIA WONDER.

Standard Bred Cabbages

Reselected Copenhagen Market Extra Early. Matures in about 62 days. Earliest of the large heading cabbages, maturing even before the conical types. Market growers have reported their entire crop of this strain harvested before heads from other seed of this variety were ready to cut.

Reselected Tested Stock. Oz., 40c; $\frac{1}{4}$ lb., \$1.25; lb., \$4.00.

Golden Acre. Matures in about 60 days. This early round headed variety is slightly earlier than our reselected extra early Copenhagen Market and is similar in most other respects, except that its heads are slightly smaller, weighing 4 to 5 lbs. Oz., 30c; $\frac{1}{4}$ lb., 90c; lb., \$3.00.

Glory of Enkhousen. Matures in about 80 days. This globe shaped, medium early variety is of excellent flavor and crispness, producing heads weighing eight to ten pounds, and more uniform than the earlier types. Oz., 25c; $\frac{1}{4}$ lb., 70c; lb., \$2.25.

ONE of the most profitable spring crops for the greenhouse or hot-bed plant is seedling vegetable plants for home gardeners. Grow your plants from Vaughan's seeds and advertise the fact. It will bring you discriminating customers and higher prices. On this page we describe some of the varieties which we recommend for vigorous and fast selling plants.

For other varieties, see the vegetable list on the following pages or write for a copy of our retail catalog, which gives a complete list of vegetables with full descriptions. By advertising that your plants are grown from Vaughan's seeds you will attract custom from the thousands who have received this catalog.

Cauliflower

Vaughan's New Snowball. Matures in about 55 days. For early out-

door planting and forcing, as well as for late sowing for the fall crop, this variety is standard. A well grown head measures 9 to 10 inches across with depth in proportion and a perfectly white core. Pkt., 25c; $\frac{1}{4}$ oz., 70c; $\frac{1}{2}$ oz., \$1.25; 1 oz., \$2.00.

Egg Plant

Black Beauty. 110 days. Twelve days earlier than New York. In shape it is broad and thick, perfectly spineless and smooth; beautiful, rich purple color and handsome lustre. Oz., 50c; $\frac{1}{4}$ lb., \$1.50; lb., \$5.00.

Peppers

Vaughan's Giant Magnum Dulce.

This fine mild pepper can be grown to immense size—seven inches long and 4 inches through—but when grown so large the yield is small. To get a large yield of medium sized peppers, pinch off the "king flowers," the first ones to open. Pkt., 15c; $\frac{1}{2}$ oz., 35c; oz., 60c; $\frac{1}{4}$ lb., \$2.00.

California Wonder. A mild, sweet, mid-season variety, very large, measuring 4 $\frac{1}{2}$ inches in length by 4 inches in diameter. It resembles Chinese Giant in form, but has much thicker flesh. It has a crimson fruit. One of the heaviest peppers grown, not as prolific as some, but much more desirable. $\frac{1}{2}$ oz., 35c; oz., 65c; $\frac{1}{4}$ lb., \$2.00.

Large Bell. Large blocky fruit, usually mild. $\frac{1}{2}$ oz., 25c; oz., 45c; $\frac{1}{4}$ lb., \$1.25.

Tomatoes

For Plants Resistant to Wilt

Early Baltimore. 108 days. Illinois University selection, thriving on all soils, smaller fruit, brighter color, heavier yielder than Marglobe. Oz., 50c; $\frac{1}{4}$ lb., \$1.50; lb., \$5.00.

Standard Bred Tomatoes

Bonny Best. 103 days. A shade later than John Baer. Smooth, large and uniform fruit; yields well until frost. Oz., 30c; $\frac{1}{4}$ lb., 90c; lb., \$3.00.

Crimson Cushion or Beefsteak. 120 days. Is very large, round and regular; bright scarlet skin, solid flesh of best quality, seed cells small. Plants are very prolific, fine appearance. Pkt., 10c; $\frac{1}{2}$ oz., 30c; oz., 50c; $\frac{1}{4}$ lb., \$1.50; lb., \$4.75.

Ponderosa—The Giant Tomato Matures in about 118 days. Of the large fruited varieties, this one is most popular. Oz., 45c; $\frac{1}{4}$ lb., \$1.25; lb., \$4.00.

Oxheart. Matures in about 120 days. Popular because of its shape, large size, and excellent table qualities. Not a heavy yielder. Skin pink, almost seedless; firm, sweet flesh. Pkt., 10c; oz., 65c; $\frac{1}{4}$ lb., \$2.00; lb., \$7.50.

Golden Ponderosa. 118 days. A yellow gem. This is a yellow Ponderosa equal in size to that magnificent variety. Oz., 60c; $\frac{1}{4}$ lb., \$1.75; lb., \$6.00.

Vaughan's Select Earliana. 94 days. Earliest large, smooth bright red tomato. Compact in growth, with stout jointed branches; the vines yield well and the fruit is solid and of fine quality. Oz., 40c; $\frac{1}{4}$ lb., 90c; lb., \$3.00.

John Baer. 108 days. Extra early red. Not quite so early as Earliana. John Baer yields a much heavier crop of larger, more uniform and more attractive fruits. Oz., 30c; $\frac{1}{4}$ lb., 90c; lb., \$3.00.

Dwarf Stone. The Largest Dwarf Tomato. 132 days. The fruit is red, and specimens weighing $\frac{3}{4}$ pound are not uncommon. Oz., 45c; $\frac{1}{4}$ lb., \$1.25; lb., \$4.00.

Resistant Celery

Michigan Golden. (College Golden.) Developed at Michigan State Agricultural College. A new strain of self-blanching celery resistant to root rot or crown rot "Fusarium Yellows", bred from the tall strain of Golden self-blanching. Pkt., 40c; $\frac{1}{2}$ oz., \$1.00; oz., \$1.75; $\frac{1}{4}$ lb., \$6.00.

CAULIFLOWER

Vaughan's Extra Select Snowball, pkt., 25c; ¼ oz., 75c; ½ oz., \$1.35; oz., \$2.50; ¼ lb., \$9.00.

Vaughan's New Snowball

One of our Specialties. We know our strain is the equal of any that can be produced. We have tried nearly every other on the market and we have never yet come across anything superior to Vaughan's New Snowball. It is the result of years of careful selection by a most capable and painstaking gardener who grows the seed especially for us on the island of Amagar, near Copenhagen, Denmark, where growing conditions are ideal for the production of perfect seed heads. Vaughan's New Snowball is the best general purpose variety for either spring or fall planting. Heads are usually 9 to 10 inches across, perfectly white, solid, deep and compact. Pkt., 25c; ¼ oz., 70c; ½ oz., \$1.25; oz., \$2.00; ¼ lb., \$7.00. Sure Header. Pkt., 25c; ¼ oz., \$1.00; ½ oz., \$1.75; oz., \$3.00.

Vaughan's Earliest Dwarf Erfurt

Combines all pedigree points—earliness, purity of color, dwarf habit and fine grain. A profitable market garden sort. Pkt., 25c; ¼ oz., 65c; ½ oz., \$1.15; oz., \$2.00; ¼ lb., \$7.00.

Dry Weather

For dry climate and dry seasons. Very sure heading and second early. Heads larger than Snowball and snow white. Pkt., 25c; ¼ oz., 70c; ½ oz., \$1.25; oz., \$2.15; ¼ lb., \$7.50.

Danish Snowball

This is a grand second early. It is the result of long, careful selection, and uniformly produces even, regular heads. Through many seasons it has proven itself reliable. Pkt., 25c; ¼ oz., 65c; oz., \$2.00; ¼ lb., \$7.00.

Vaughan's High Grade Fertilizers

Prices for Florists F.O.B. New York.

The Yield and Quality of Vegetation Depend Upon Continuous and Rapid Growth.

It has been demonstrated that crops of the best quality are those which are grown under conditions which permit of a continuous and rapid development. Plant food of the right amount and kind controls the yield and quality of prod-

ucts more than any other condition, and it is neither wise nor economical to depend upon the natural condition of the soil or the application of stable manure only for profitable crops.

Vaughan's Lawn and Garden Fertilizer. (5-8-6)

Five per cent nitrogen; eight per cent phosphoric acid; six per cent potash. This mixture differs from our balanced plant ration in that it is composed of plant foods in mineral form. The advantages of mineral fertilizer include the absence of objectionable odor, and the quality of being more readily soluble, which makes it more quickly effective upon plant growth.

For a new lawn, broadcast evenly 30 to 40 lbs. per 1000 square feet. To stimulate an old lawn, apply 20 to 30 lbs. per 1000 square feet, during the growing season, wash it down immediately with the hose to prevent burning. For flowers and vegetables, use from 4 to 6 lbs. per 100 square feet. Price, 100 lbs., \$3.00; 1000 lbs., \$23.00; 2000 lbs., \$48.00.

Vaughan's Balanced Plant Ration. (5-8-7)

This is our best brand of concentrated manure, excellent for mixing into potting soil or as a top dressing. It is a money-maker. It is excellent for Carnations if applied by the end of October or in November. It can also be applied as a liquid manure by using an 8-inch potful to a barrel of water. Price, 100 lbs., \$3.25; 1000 lbs., \$23.00; 2000 lbs., \$45.00.

Freshly Packed and Tested Lawn Seed in 1939 for Your Unsold 1938 Stock

Important New Policy

Seed Laws in Many States Require Dated Germination Tests

OUR dealers can now purchase cartons and 5-lb. bags of our branded seed with no fear of carrying over out-dated seed into the following year. We will allow unsold packages to be returned to us and replace them with freshly packed and tested seed the following spring.

This offer is NOT in any way to be considered on a consignment basis but is solely for the protection of our dealers against having to carry into the following year unsaleable, outdated and soiled cartons.

The terms of sale are absolutely the same as heretofore.

This offer does not apply in any way whatsoever to bulk seed or non-branded seed and this is in no way to be considered a guarantee sale. All seed to be exchanged must positively be returned to us by December 1, 1938, and replacement will be made by March 1, 1939.

For Your Protection

All our grass seeds are carefully analyzed in our own fully equipped laboratory and tagged or labelled to conform to the complicated requirements of the state laws. Errors in labelling might be costly and troublesome. Play safe. With each of the deals below we furnish the vividly colored window streamer illustrated on the opposite page.

Vaughan's Chicago Parks Contains NO TIMOTHY

Recommend this mixture for beauty and durability. It produces a fine turf that will endure. The splendid reputation of this mixture for over half a century makes it an easy seller and keeps satisfied customers. For seeding and care of lawn, call customer's attention to lawn booklet enclosed in every carton and bag of Vaughan's lawn seed.

Vaughan's No. 25 Lawn Mixture An Economy Mixture Containing NO TIMOTHY

This blend fills the demand for a mixture which is both inexpensive and at the same time free of objectionable timothy so widely used as a lawn seed adulterant. Our No. 25 has, as its chief ingredient, the grass which is used for winter putting greens on southern golf courses. It comes up as quickly as timothy, will last longer and makes a fine appearance if kept cut.

Not On Sale At
Dime Stores

OUR packet seeds are supplied on consignment on the usual terms, but with unusual display material, and a unique method of direct delivery to you by parcel post. An assortment of flower seeds, or both flower and vegetable seeds as you choose, is sent you on consignment, to be sold at 40% commission. All flower seeds are 10 cents, and some vegetables are 5 cents, some 10 cents. Each rack is dated and bears a seed analyst's certificate of the purity and freshness of its seeds. At the end of the season you return the unsold packets in a bag supplied by us, and destroy the rack. You are credited with the returns and billed for the seeds sold, less 40%.

More Brilliant Color for Our New Display Rack!

OUR illuminated display rack of exclusive design met with an enthusiastic reception in 1937, and for 1938 the same type rack will be retained with improved display value.

Replacing the simple legend "Vaughan's Seeds" at the top, will be a brilliantly colored panel, illuminated from behind, on which this legend will be intertwined with flowers and vegetables.

The picture shows the 1937 model of our new rack, and only faintly suggests its beauty. The brilliantly colored seed packets, in orderly array against the black background of the rack, are surrounded by a cream-colored frame which resembles the proscenium arch of the theater. It provides, in effect, a stage-setting, which concentrates attention on the merchandise, dramatizing its beauty.

Dimensions: It occupies 8 inches by 26½ inches on the counter and is 34 inches tall. Two racks are supplied with each complete assortment, one for flowers, one for vegetables. Weight of rack, with seed, 8 pounds. Stand it anywhere, on counter, table or glass show case, it will do no damage, is easy to move about, and with an irresistible attraction, will draw the attention of every garden fan who catches sight of its colorful packets.

Our New Packets. All flower seed packets of 1938 will be 3¼ by 4½ inches, same size as vegetable packets, and all racks will be interchangeable, serving for either flower seed or vegetable seed packets or both.

Vaughan's New Illuminated Seed Display in the Beautiful Schiller Flower Shop, 2221 W. Madison St., Chicago.

Two kinds of racks. Which for You?

Illuminated racks are provided with fixture for bulb which fits in reflection chamber back of the legend "Vaughan's Seeds," where it lights up the lettering, and also throws a bright light downward over the brilliantly colored seed packets below. It makes a brilliant, beautiful, modern display, of great decorative value and irresistible sales appeal. A perfect fixture for the fine store.

Not illuminated racks are exactly like the others in appearance but are not wired for the bulbs.

Gladiolus Display Box Holding 500 1st Size Bulbs, 50 each of 10 Named Varieties

F. O. B. Chicago or New York

VAUGHAN'S GLADIOLI are famous. For years they have been nationally advertised. You have only to put this box on your counter to sell out quickly.

We use **FIRST SIZE BULBS**, the size which sells best over the counter. The 10 named varieties (50 each) include the show winners **Picardy, Mammoth White, Mrs. F. Karcher, W. H. Phipps, Rosa Raisa, Edith Mason, Golden Dream, Alma, Kalamazoo, Emile Auburn**—none better known. The price to you is \$9.00 for the box and 500 bulbs of 10 named varieties. You retail them for 45 cents a dozen, or more, because the selection is worth more, doubling your money. Each variety is packed 50 in a bag labeled with its name. You empty one bag into a compartment, and refill in the same manner when it is empty. This prevents mixtures and loss of bulbs. Name labels are provided to paste on the compartments. This box keeps the bulbs in the open air, thus preventing bacterial rot which comes when they are sealed in cartons. The named varieties are kept apart without mixing, which adds greatly to their value.

Varieties Subject to Change Without Notice.

Where Vaughan's Gladioli Are Grown

Illustration Shows a Field Near Ovid, Mich., Under Irrigation

Vaughan's Seed Store, pioneer in gladiolus growing in the United States, continues to be the largest grower of gladiolus bulbs in this country.

The center of our production is at Ovid, Mich., though large plantings are made annually in other sections of the country.

The gladiolus *Princeps*, Dr. W. Van Fleet's epochal creation, first of the modern giant flowered type, was a Vaughan introduction. It has been followed by many other notable varieties, selected from the five acres of new hybrids which we grow each year in Michigan. Those which show the greatest advance in color, or form or both, are chosen to be introduced as new varieties.

Visitors are welcome during the flowering season, from about July 15 to Oct. 1, at our Michigan farms near Ovid, on Michigan route 21, 13 miles west of Owosso.

Vaughan's

Improved Blend of Petunia Dwarf Giants of California

The finest strain now available in the world, of this important florist's item. We say this after inspecting the fields of outstanding growers and testing all obtainable mixtures in our own trial grounds.

The habit of the plants is wonderfully compact, the flowers of uniformly giant size, and the color range embraces the entire scale of variations with a moderate predominance on the darker side.

We offer this as the outstanding strain of them all.

 $\frac{1}{32}$ oz., \$4.00; $\frac{1}{16}$ oz., \$7.00.

VAUGHAN'S DELPHINIUMS

Pacific Hybrids. Giant Blue Shades. (Vetterle and Reinelt.) Expert judges from both Europe and America who saw these delphiniums growing in California this year pronounced them the finest in the world. They excel in the points which are desirable in cut flowers—huge flowers, well spaced on long flowering spikes upheld on straight wiry stems, not too tall, that need no staking. Plants are 65% mildew resistant. **Trade pkt., \$1.00; $\frac{1}{8}$ oz., \$2.00; $\frac{1}{4}$ oz., \$3.50; $\frac{1}{2}$ oz., \$7.00; oz., \$12.00.**

The Wrexham or Hollyhock Strain which we offer is the highest development of this impressive blend. It produces tall heads with large individual flowers showing rich color combinations. **Trade pkt., 50c; $\frac{1}{4}$ oz., \$1.40; oz., \$5.00; lb., \$60.00.**

Blackmore and Langdon. This well-known strain needs no introduction. Its tall tapering spike, with well placed flowers, is generally recognized for its outstanding value as a cut flower. We offer the finest strain procurable. **Trade pkt., 50c; $\frac{1}{4}$ oz., 85c; oz., \$3.00; lb., \$32.00.**
