Office of Commander

October 20, 1949

SUBJECT: Status of Traffic Safety Movement carried our during the month of September, 1949.

TO : Commanding Officer, Hq. of Hiroshima Civil Affairs Team.

Concerning the above subject, we hereby report you as disclosed hereunder.

1. Area regulated: Hiroshima Prefecture.

2. Date: Once every week, on any date suitable according to proper plans set up at respective police stations.

3. Matters practised:

I. Propaganda & Education;

Entering into the propaganda stage regarding the revised Road and Traffic Regulation Law, the respective stations have held lecture meetings within their jurisdiction, distributed published matters and endeavored in giving publicity and enlightment towards the general public to its effedt. Much has been accomplished in this field.

II. Activities of Self-governing Traffic Bodies;

1) The self-governing traffic bodies of all plants in Mihara city have accomplished much by observing the traffic during the hours of coming and leaving the plant for work.

2) The self-governing traffic body in the Mitsunosho-machi Junior high school, have given active support by controlling the traffic at busy centers in the town, after sending out traffic students in turns.

3) About 30 pupils of the Tokaichi town Primary School forming groups of four members each, stood at strategic points in the town and called the attention of passer-bys to observe orderly traffic.

4) At Hiroshima, the microphone speaker in the Guide Station located in front of the railway station called upon the passer-bys to enhance standard of traffic dicipline.

4. Regulations:

There are still malicious traffic violation cases observed and drastic procedures are being taken against them to achieve our primary aims. The results of the regulations are as shown in the per attached list.

5. Other matters for regerence:

Seeing the date of enforcing the revised Road and Traffic Regulation Law near at hand, streneous efforts are being made to propagate and spread the new law. Various counter-measures are being now studied to make the coming Traffic Safety Day most effective.

1. Main purpose of the traffic safety campaign.

Although a whole year has already passed since the Road Code ~~of~~ went into effect, grave traffic accidents are still occurring one after another in various directions even now. And the number of those who lose their precious life or are inflicted injury is getting more and more owing to those traffic troubles. It is not the time of control directive of their conducts but the high time of severe control and punishment of offenders with which to annihirate every traffic offense and accidents. The present traffic control mainly aims at this point and secondarily aims at evolving instruction and propaganda.

2. Main points of the traffic safety campaign.

1) Hq. N.R.P.

a. held a liaison conference of chief police officers in charge of traffic affairs of every police station in this prefecture on Dec. 2 and gave directives on strict traffic control as well as made prearrangement necessary for plans of traffic safety campaign.

b. held a conference of branch chiefs of Traffic Safety Society on Dec. 5, at which adopted the budget of 100,000 yen for the expenses of traffic safety campaign and decided to organize a circulating propaganda motor-squad in each branch area. The results were remarkable especially at Tokuyama, Hofu, Yanai and Oshima.

c. requested collaboration from the Yamaguchi Military Government Team and continuously maintained close contact with it during the campaign.

d. asked the Shimonoseki and the Hiroshima Railway Subdivisions for broadcasting about main purpose of the traffic safety campaign by means of loud-speakers provided at railway stations, among which Yamaguchi Station marked the platforms with white lines for passengers to go in carriages in single file. It resulted in cutting down half time than taken for starting hitherto.

e. asked every press of Mainichi, Chugoku, Nishi-Nihon, Bocho located in the city of Yamaguchi to mention in papers the event of traffic safety campaign and twice inserted full-second-column advertisement of each

DECLASSIFIED E.O. 12065 SECTION 3 102, MAR 80

papers under the names of Hq. N.R.P. and Traffic Safety Society.

f. broadcasted about the main purpose of the campaign by means of the Bofu Radio Broadcasting Station during five days previous to the campaign and its week utilizing the hour for Yamaguchi prefectural citizens, and had Chief of Traffic Section, 8 children who won prizes in contest of compositions on traffic safety, and Kiyoshi Kochi who has rendered good service for traffic safety as civilian broadcast for a quarter of an hour from 6.30 p.m. Dec. 14.

g. distributed 10,000 sheets of test-cards to main elementary schools in this prefecture, and chose 10 distinguished answers and gave them prizes on Dec. 21.

h. invited competition of every middle and elementary school students for prize essays on public safety, chose, in collaboration with the Boad of Education, 5 distinguished essays from among 472 essays, had the first grade prize-winner broadcast, and gave prizes to all selected persons on Dec. 31.

i. projected slides formed by Hq. and Yamaguchi Pref. Hq. of National Rural Police on screens at every city, town and village to deepen knowledge of the general public and delivered speeches on the main purpose of the campaign by means of microphone in each cinema-hall.

j. enhanced traffic sense of the public by means of loud-speakers set on a couple of trucks carrying signboard of traffic safety.

k. held on Dec. 21 the testimonial of gratitude donating ceremony in honour of Principal Kiyoshi Kochi of Shinjo-mura Elementary School, Kuga-gun who is the meritorious civilian for traffic safety.

2) Police Stations.

a. gave lectures on traffic control to police staff at every police station to educate them thoroughly.

b. erected notice boards on main highways entering each city, town, village under the jurisdiction of national rural and municipal police stations for good knowledge of the public.

DECLASSIFIED E.O. 11652 SECTION 3 (E)/NND 63

c. completed equipments (semaphore, highway wign, traffic line, safety zone).

d. dispatched competent police officers to as many as schools and organization concerned to traffic and held lecture-meetings and soirees for exaltation of their traffic morals, which brought satisfactory fruits.

e. distributed posters formed by Yamaguchi Pref. Hq. NRP and every police station, among the public and displayed them at railway stations and other public places.

f. provided signboards, crossroad buntings, traffic crows-nest, etc in the area under each police station.

1. Period of control.

The period of traffic control was not particularly determined, but was scheduled according to the real condition of each police station.

2. Sphere of control.

All over the prefecture.

3. Various aspects of control.

1) The Oshima district police instructed its policemen so as to enable them well to recognize the importance of the traffic control as one of the police functions and educated them in practical exercises by means of go-round-inspection in a party.

2) The Toyoura-Nishi police held a meeting of all its policemen for the study of the laws and ordinances concerning traffic control and instructed them so as to be severe in the punishment of traffic offenders. Regarding the enlightenment of the public and propaganda in traffic affairs, the police held lecture-meetings (Subject: Exaltation of moral sense of students in traffic.) at every date prearranged with each of the middle and elementary school heads in its area. By means of this method the police endeavoured for the exaltation of morality in traffic matters not only of the school children but also of their family members through the formers' instruction. Besides the police made efforts in enlightenment of the general passengers in traffic problem by means of posters, sign-writings etc. as well as intraining the traffic services-employees for the observance of laws and ordinances as a matter of course in cooperation with the relative employers.

3) The Abu-Higashi police exercised the traffic instruction and control with its full members and at the same time had a successful control on various acts similar to business in the streets.

4) The Ube municipal police adopted such a method as to let conduct as juvenile policemen in traffic guidance and control a few excellent students who were democratically elected from among the students of every middle and elementary schools in its area. And it sent police officers in charge to the concerns, factories and coal mine which employed over fifteen chauffeurs, and made them interpret the laws and ordinances concerning the traffic affairs as well as educate and train

those people.

5) The Headquarters of National Rural Police gave every police station a directive in which severer controls were emphasized so as to get a converse result of the traffic control whose reports revealed that mostpart of the cases were disposed by admonition and very few by delivery to the procurators' office.

4. The following is the result of the traffic control during September:

1. Although the Road Transportation law was passed and promulgated by the Japanese Government on 16 December 1947, the attitude of the public is still indifferent towards road safety, and shows little improvement.

2. This is due, it is felt, to the failure of the police to prosecute offenders under the law.

3. After a series of 'campaigns' which have failed to inculcate a Japanese road-sense, it is recommended that Teams encourage:

a. Better training of traffic police, particularly in recognising those offenses which constitute a breach of the code.

b. The introduction of regular full-time patrols as part of duties of traffic branch police.

c. The institution of traffic Courts within the aegis of Summary Courts as case load dictates.

d. The proper charging and summoning of all offenders before the bench; the current practice of 'warning' by police to forthwith discontinued.

e. Encourage police and procurators to co-operate in getting down to a simpler form in preparing minor cases for hearing.

f. Suggest the erection of permanent notice boards on main highways entering towns, promulgating the principal features of the Road Code and the major penalties that may be imposed under the code.

4. Results of the enforcement of the code should be reflected in a more alert public and a lower accident incidence in the monthly reports made by Japanese police to Teams.

To : USA military government team/Chugoku area
Okayama Military government team

Since operation of the road traffic regulation 9 months has passed already. Every efforts has been exerted to establish an ideal traffic order, by leading and control for these months. But it has not yet got outof a primary stage. Due to the chaotic traffic situation, many big or small traffic accidents have occured every day, to our great regret. It necessitates more effort to establish safe and smooth traffic, after rehabilitating its order. Besides, due to application from Allied Forces, 2nd traffic safety week will be carried out, basing on the attached plan. Send to you the plan as remark.

SUBJECT : Report on the results of the Monthly regular Traffic safety Campaign for the month of September 1948
TO : Chugoku Military Government Region
Okayama Military Government Team

Regular Traffic Safety Campaign was conducted for three (3) days from 16 to 18 September 1948, and details of the same are given as follows:-

1. Main points of the Traffic Control:-
(1) Checking-up of the driving without driver-license:-
Continual controls had been exercised in the past without complete success, and emphasis was placed on this point during the period with fair results. Efforts shall be continued in the future.

(2) Checking-up of the cars in operation under disabled conditions (including cars with insufficient structure.)
In spite of the present better improved condition of the repair work shops, a great number of cars are still in use under very dangerous conditions. Such being the situations, continuous controls shall be exercised under the cooperation with the Road Traffic Control Office, and upon discovery of such cars, they shall be ordered to have due examination of the cars with an aim to eliminate such cars in the near future.

(3) Control of "jumping on" or "jumping off" a running car:-
In view of a warning given by the military authorities and of a considerable number of violations being committed by the young generation causing many tragedies, an attempt was made to eradicate such violations completely and good results have been obtained to a great extent.

(4) Checking-up of "Double-riding" on Bicycle:-
Heretofore, the "double riding on a bicycle" had been prohibited only at the traffic busy centers, however, in consideration of a warning given by the military authorities and of the repeated happening of fatal accidents, hereafter, the "bouble-riding" shall not be excused, as a rule, at any place.
Efforts were made to disseminate the regulation and at the same time strict controls were made encountering many violations.
Efforts shall be continued in the future on the controls in this connection.

(5) Controls of "Play in the street":-
With the sport-season approaching on, strict controls were conducted with comparatively good results in an attempt to clear the players from the streets, who were causing a danger traffic.

2. Other remarks:-
Under the joint sponsorship with the Prefectural Traffic Safety Society, car-drivers were called into a meeting at the respective places in the prefecture, which were attended by the police officials of the Traffic Section of NRP Prefectural HQ who gave lectures on the traffic regulations and other matters concerning motor-vehicle to improve the morality as well as the technique of the car-drivers.
Good results have been obtained and the schedule is still going on.

SUBJECT : Report on the results of the Monthly regular Traffic safety Campaign for the month of September 1948
TO : Chugoku Military Government Region
Okayama Military Government Team

Regular Traffic Safety Campaign was conducted for three (3) days from 16 to 18 September 1948, and details of the same are given as follows:-

1. Main points of the Traffic Control:-
(1) Checking-up of the driving without driver-license:-
Continual controls had been exercised in the past without complete success, and emphasis was placed on this point during the period with fair results.
Efforts shall be continued in the future.

(2) Checking-up of the cars in operation under disabled conditions (including cars with insufficient structure.)
In spite of the present better improved condition of the repair work shops, a great number of cars are still in use under very dangerous conditions.
Such being the situations, continuous controls shall be exercised under the cooperation with the Road Traffic Control Office, and upon discovery of such cars, they shall be ordered to have due examination of the cars with an aim to eliminate such cars in the near future.

(3) Control of "jumping on" or "jumping off" a running car:-
In view of a warning given by the military authorities and of a considerable number of violations being committed by the young generation causing many tragedies, an attempt was made to eradicate such violations completely and good results have been obtained to a great extent.

(4) Checking-up of "Double-riding" on Bicycle:-
Heretofore, the "double riding on a bicycle" had been prohibited only at the traffic busy centers, however, in consideration of a warning given by the military authorities and of the repeated happening of fatal accidents, hereafter, the "bouble-riding" shall not be excused, as a rule, at any place.
Efforts were made to disseminate the regulation and at the same time strict controls were made encountering many violations.
Efforts shall be continued in the future on the controls in this connection.

(5) Controls of "Play in the street":-
With the sport-season approaching on, strict controls were conducted with comparatively good results in an attempt to clear the players from the streets, who were causing a danger traffic.

2. Other remarks:-
Under the joint sponsorship with the Prefectural Traffic Safety Society, car-drivers were called into a meeting at the respective places in the prefecture, which were attended by the police officials of the Traffic Section of NRP Prefectural HQ who gave lectures on the traffic regulations and other matters concerning motor-vehicle to improve the morality as well as the technique of the car-drivers.
Good results have been obtained and the schedule is still going on.

SUBJECT : Monthly regular traffic control

TO : Okayama Military Government Team
Chugoku Military Government Region

Regular traffic control has been conducted in each month heretofore, but imperfections have been seen in some respects, and in view of repeated warning of the occupation forces' authorities, instructions were given to and contacts were established with offices concerned for their continuous and increasing efforts in the traffic controls as follows:-

Principle plan of the forthcoming traffic control:-

1. Purpose of the traffic control:-
To raise traffic morality and to establish and maintain traffic safety.

2. Policy:-
In the past, "to give guidance" was the main aim of the control, but now is the time to enforce equally the guidance and the control. To attain this object, three-day campaign period in each month is far from satisfactory, and each local station, therefore, shall work out an appropriate plan and enforce traffic control on each Wednesday in addition to the plan to be worked out and shown from time to time by the Prefectural HQ.

3. Period of the forthcoming traffic control campaign:-
In compliance with a special instruction of the Occupation Forces' authorities, this month will have a seven-day period of 15 - 21 October.

4. Functions:-
(1) Lecture meeting at schools and self-governing traffic control by school pupils:-
Working jointly with the school authorities, lecture meetings will be held at appropriate places to disseminate the regulations as well as to give the pupils the law abiding spirits through their practice of self-governing traffic controls.

(2) Plan to disseminate the traffic regulations through PTA:-
Calls shall be made through PTA to disseminate the regulations and to exterminate "street playing" of children.

(3) "Problem-discussion-meetings" of traffic businessmen:-
Plan shall be worked out and carried out to have such meetings to disseminate the regulations and other necessary matters and to improve charactor as well as technic of auto-drivers.
In this connection, invitations shall be sent to traffic businessmen to join the "auto-drivers' training course" which is now underway.

5. Main points of control:-
(1) Driving without driver license:-
Violation shall be exterminated completely.

(2) "Double-riding" on bicycle:-
Many questions were presented in the past, but in view of repeated accidents, strict control shall be enforced.

(3) Controls on unlighted vehicles:-
In view of the fact that unlighted vehicles are causing traffic accidents in many cases, the regulations shall be disseminate thoroughly and

at the same the violations shall be strictly controlled.

(4) Violation of speed limit:-
Many violations are seen, which shall be checked strictly.

(5) Playing on streets and unlawful occupation of the streets:-
Many violations are anticipated by seasonal reasons, and strict controls shall be enforced.

(6) Controls of the vehicles which fail to observe the regulations to give the "right of way" or to slow down:-
In view of poor results in the past, controls shall be enforced.

(7) Using of vehicles for un-authorized purpose and over-loading:-
In view of the possibility of the using of trucks or motor-cricyle for un-authorized purpose or of overloading of passessgers, strict control of the violations shall be enforced.

(8) Control of the vehicles with incomplete structure.
Controls shall be continued from the last month control.

(9) Additional license of bicycle:-
Guidance shall be given to bicycle riders to carry the additional license with them whenever they ride bicycle.

1. Period Of Enforcemant.

The date of enforcement of Traffic Control Regulation is not fixed by the Headquarters, at each District Police Station it shall be planned and carried out according to its circumstances.

2. Area.

All districts of Yamaguchi Prefecture.

3. The State Of Carrying Out.

a) Ooshima District Police Station.

The thorough understanding on the enforcement of Traffic Control Regulation and the effective measures to carry out actually was made for every personnel of this station.

In this area the effort to draw the keen attention of every civilian for this regulation was made under the close contact with the Traffic Control & Protecting Official (Kotsu-Kango-In), and the big effect has been brought by the enlightenment in home education and propaganda by posters and sign boards.

b) Kuga North District Police Station.

With the voluntary cooperation by the employees of Iwakuni Kamotsu-jidosha Coy. the road cleaning in this district and propaganda to lift people's moral sense for road traffic at the provincial road, Iwakuni river coast, were carried out.

At Hongo village the effect of this regulation was fair. Road cleaning and propaganda were also carried out.

c) Hagi District Police Station.

Under the plan to strengthen the Traffic Control for passengers, automobiles and other carriages the itinerant guidance and standing guidance were carried out by each party consisted of two officials, the standing guidance was placed at four main streets and the itinerant guidance was made through the main streets divided in four parts.

In the night time big effect had been brought on the control of tail lights (including back mirror) and no light cars. The control and guidance for the passengers' 'Keep to the left' after the theaters' closing was carried out.

d) Headquarters Of Yamaguchi Prefecture.
Owing to the recent increasing of violation of speed limits, load limits and the frequency of vehicle accident, the direction and advice to strengthen this regulation were issued on every Police Station of this prefecture.
