WASHINGTON, D. C.

GAZETTEER OF NEW GUINEA

A. M. S. T401 NEW GUINEA (1:500,000)

COMPILED BY THE UNITED STATES BOARD ON GEOGRAPHICAL NAMES

This Gazetteer is based on the first edition of the 1:500,000 maps of New Guinea (AMS T401) and is designed to facilitate the finding of inhabited places and natural features such as mountains, streams, capes, and islands named on these maps. Names listed are not necessarily official names approved by the United States Board on Geographical Names. Listings are columnated as follows:

Column 1.

Names are listed as they appear on the maps and are in strict alphabetical order.

Column 2.

Area Designation. For key to code, see table on page 4.

Column 3.

Designation. For key to abbreviations, see page 4.

Column 4.

Grid Reference. The grid reference for each name is composed of two parts, separated by an oblique stroke: (a) the number of the sheet on which it appears; (b) the grid reference of the southwest corner of the grid square in which the name appears.

The grid references are of the normal "military" type, and fall in three grid zones: N. E. I. Equatorial Zone, N. E. I. Southern Zone, and Southern New Guinea Zone. Grid references in all three zones consist of two letters which refer to the 500,000 and 100,000 meter squares respectively and two numbers, the first of which is the number of a line running from north to south, and the second of which is the number of a line running from east to west, across the map. The intersection of the two lines thus numbered is the southwest corner of the 10,000 meter square containing the name concerned.

Column 5.

Geographic Coordinates. Latitude and Longitude respectively are given to the nearest sides of a 5' quadrangle.

An index map at the end of the Gazetteer shows the layout of the sheets in the series.

AREA DESIGNATION CODE FOR NEW GUINEA MAP SERIES

A. NORTHEAST NEW GUINEA      C. NETHERLANDS NEW GUINEA
