

THE INVESTOR'S MONTHLY MANUAL. The INVESTOR'S MONTHLY MANUAL for April gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains

A FINANCIAL RECORD OF THE MONTH; A FINANCIAL RECORD OF THE MONTH; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Insurance, and Miscellaneous Companies. New Companies and New Capital. Prices made up to April 21. Advertisements for the next number, to be published on Mar 20 much be sent to impure insertion on before

May 29, must be sent, to insure insertion, on or before May 27.

OFFICE-340 Strand.

THE CONDITION OF THE MONEY MARKET.

WE showed a fortnight since that the critical element in the immediate future of the money market was the policy of the German Government. If it bought gold in this market so as to prevent it from accumulating in the Bank of England, the value of money would remain much as at present; and if it did not so buy, gold would accumulate, and the value of money would tend to fall. Up to the present time the latter half of the alternative has been the one which has occurred. The Germans have not bought; and if they do not do so soon the value of money may be expected to fall.

First, he appeals to precedent, and says, that America now, and England in 1819, announced their intention long before-hand, and gradually prepared for its performance. Why should not France, therefore, he asks, adopt a course which certainly succeeded in England, and which probably will succeed in America? But the reply is, that both in America and in England, the circumstances were different. In both countries there was at the time of the adoption of the resolution to return' to specie payments an important premium on gold. In America it was nearly 12 per cent.; in England about $4\frac{1}{2}$ per cent. In consequence, an immediate return to specie payments was impossible. Those countries did not then voluntarily postpone the step, of which they announced the determination. They were obliged to postpone it. But in France, on the contrary, the postponement is voluntary; there is not the slightest premium on gold in Paris, as com-pared with paper, and it is long since there has been any. The stores of gold and silver in the Bank of France are the greatest which the world has ever seen in any similar position, and the greatest which it has ever had. There is not, therefore, any reason in France for imitating the policy of States which were unprepared to resume specie payments. As far as can be judged, France is as well prepared for that step as she is likely to be, and almost as she can be.

The second argument is more peculiar. M. Léon Say says, that the loan of 58,800,0007 received from the Bank of France during the Franco-German war is as yet unpaid, and Only two considerations can be mentioned to qualify this that, therefore, the return to specie payments must be

THE ECONOMIST.

postponed until it is so. At first sight there se ems no connection between the two operations ; but what M. Léon Say means is, as we understand, this. During the war the French Government borrowed from the Bank of France the large sum which has been stated at one per cent., and, at the same time allowed the Bank of France to increase its issue of notes and not to pay them in specie. The Bank derived large profits from that increased issue, and the Government had a share in it, because it obtained a loan at the very low rate of 1 per cent. But if specie payments are resumed, possibly the note circula-tion of the Bank of France might fall : the issue consequent on the suspension would cease, and the level of the circulation might approach to that current before the war. The equivalent for which the Bank lent its money at a low rate being thus withdrawn, that money, it is argued, ought in fairness to be repaid. And certainly either the money ought to be repaid, or the rate of interest adjusted. But as far as we can judge, it would be better to adjust the rate than to pay the money. The evils which an inconvertible currency inflicts on a country -the uncertainty which it introduces into all dealings between man and man; the impossibility of long credit; the exclusion from exchange business, to which any kind of uncertainty in the currency is fatal-are so great that the obtaining a limited sum of money at a cheap rate for a short time is not to be weighed, for an instant; in comparison with them; the good so obtained is not to be thought of as a compensation for the loss incurred. Especially in France, where industry is subjected to so many burdens, and where it requires every aid, there is no worse finance than to save a small sum in taxation at the cost of making commerce uncertain, and of enfeebling the productive power of the country.

We cannot but hope, therefore, that in the interval of more than two years that are to run between this and the 1st January, 1878, these arguments may be reconsidered, and that it may be decided that France should at once resume the specie payments which will so much aid its industry, and for which it has made such large and costly preparations.

THE SITUATION OF THE GOVERNMENT.

THERE can be no doubt but that for the time the policy of the present Government coincides with the present wishes of the nation. The Government proposes no large changes, and the nation wishes for none; the Government excites the nation by no eloquence, and the nation does not wish to be excited. The measures which the Government have introduced, though not individually of great magnitude, are in the aggregate of considerable importance; and they have been almost always framed with care, and with an evident anxiety to do only what is best in subjects both complex and difficult. The foreign policy of the country, so far as it has been made public, has been so easy that it affords little matter either for praise or blame; Lord Derby's name has probably rarely been for years less in mens' mouths than during the last few Lord Carnarvon, on the contrary, has had to conmonths. tend with unusual difficulties in the Colonial department, and so far as the results of his policy are known, and can be tested, they appear to be very good. Judged as a casual observer judges, the position of the Government would seem to be excellent. Few Governments would seem to have ever had so good a one.

But, nevertheless, the Government is in a great difficulty, and one which is likely not to diminish but to increase as time goes on. It is by no accident that we speak of "a "Government" by the name of the Prime Minister—that we speak of Lord Palmerston's Administration, Lord Aberdeen's Administration, or Mr Gladstone's. In each of these cases the Prime Minister was the governing, animating, pervading spirit of the Government; its whole acts, policy, and history would have been different if he had been taken from it, or if he had been a different man. Now it is impossible for any literary man not to write of Mr Disraeli with the keenest interest and the greatest wish to say only what is good; he is our one literary Premier—the one man who, characteristically and more than anything else an author and artist, has risen to spheres to which authors and artists rarely climb. He made himself first known by his pen—if it had not been for his pen he would not be where he is, and therefore all penmen will speak well of him. Nevertheless, it is impossible for any one to say that he is adequate to the position he fills. Possibly he has come to it too late, at any rate he has not sufficient vigour for it now. He never was a man of

business, and the amount of business which an English Prime Minister has to think of is very great. He ought to be able to guide his collesgues in difficulty—to mediate and keep the peace between them—to be the chairman of the Cabinet and to guide it—to see that its decisions have unity and consistency (which of themselves, and unless looked after by a presiding mind, the decisions of twelve clever men never will have)-to maintain a consecutive and confidential communication with the Queen. If we examine the memoirs of past Premiers—say those of Lord Liverpool, whose corre-spondence is the latest which we possess as a whole — we shall see at the first glance how great those functions are-how trying, and how much they strain the powers of the most active and vigorous man of business. But Mr Disraeli never was a man of business, is no longer young, and no longer in the strongest health. Such tasks as he must have to undertake must be more than he is adequate to perform. Un-numbered stories float about to prove that this is so-that he gives his colleagues no help; that he has not force enough to move the heavy materials round him; that though, as it has been phrased, "His judgment would be good if he knew "anything, yet he does not know anything, and so it is not "good." Of course, such stories are not, in themselves, much to be attended to; they are only to be believed when intrinsically probable, and intrinsic probability is a fertile source of false legends. But the facts, as they are known to the public, confirm them. The part of public business, which Mr Disraeli was supposed more peculiarly to under-stand, was the conduct of the business of Parliament, and even in this he has shown of late signs that the pressure of office, or some other cause, has made him less efficient than he was. Nothing impairs keenness of first perception like nervous fatigue, and certainly this year Mr Disraeli's tact, far the finest of his faculties, has not been so fine as formerly. In no other session would he have told the House of Commons in May, that they should continue House of to sit till the Government had passed all the measures which it brought in. In no other session would he have proposed to take the Budget at a morning sitting, when the "City" cannot attend, and a principal element of financial debates must be wanting. And under the pressure of the difficult question as to the Privilege of the House, Mr Disraeli collapsed at once. He wanted for the first time that singular way of viewing English questions ab extra, as an intelligent and impartial spectator, to which he owes so much of his influence. He has generally had something new to say on a new question—something of his own—something which no other man would have said. But in this case he only talked worn-out plausibilities, appealed to the authority of Sir George Grey and Mr Bouverie—excellent persons in their way, but the last people to consult in a new case—and seemed to imagine that the English Parliamentary system was some curious mystery to which only a few old gentlemen, by tradition, had the clue. "Would you," he said, "codify the law of had the clue. "Would you," he said, "codify the law of "Parliament? Years ago that most sagacious man, Lord "Lyndhurst, advised me not to do so;" as if putting down rules distinctly, and on paper, were at all likely to frighten the present generation, and as if we did not know that whenever the Tory party were guided by Lord Lyndhurst, they were always guided wrong. There could be no less adequate appre-ciation of the age than to fancy that codification of itself would frighten it, or that Lord Lyndhurst's authority of itself would deter it. These, it may be said, are small matters, and so in themselves they are. But though minutia, they are significant minutia. They show a failure of power in the Prime Minister just where that power used to be strongest, and therefore incline us to believe what rumour and probability both say as to a similar failure of power in other case

The subject is of the greatest importance, or else we should not discuss it, for personalities are never pleasant to us, and this is not the sort of personality to be pleasant to any one. But the English nation is too great a concern to manage itself, and experience shows that in management no excellence in subordinates will compensate for the want of an incessant and a vigorous presiding mind.

GERMANY AND BELGIUM.

THE Belgian "incident" has two sides. If we look only at the attempt of the German Government to dictate to the neutral kingdom as to the direction in which it should reform

[May 22, 1875.

its laws, the political evils of such dictation are apparent. But when we consider the subject-matter of the suggestions that the German Minister at Brussels has laid before Count d'Aspremont Lynden, we must acknowledge that they raise, and fairly raise, some most important legal questions, which sooner or later the civilised world must settle. We do not at all see why the responsibility of taking the first steps in this difficult path of reform should be thrown upon Belgium, and the Belgian Minister for Foreign Affairs is within his right when he professes to wait for the action of the greater European Powers in the revision of the penal law. If such a revision as is demanded by the German Envoy should be accepted, "it would," says Count d'Aspremont Lynden, "be " the duty of Belgium to examine this grave problem of penal " law, and she would probably follow a movement in which, " it would seem, it hardly belongs to her to take the initia-"tive." But is it likely that the great Powers-England, France, Italy, Germany herself — will revise the penal law so as to secure the punishment of such offences as that which is attributed to the boiler-maker, Duchesne? Is it probable that public law in Europe will be changed by general consent, " so as to punish a verbal or written proposal made with a " view to find an accomplice in a projected crime or offence, "even where such proposal, so far from being accepted, should "have been rejected with indignation ?" We cannot say whether these changes are likely or not; in some European countries the public mind is quite ripe for the consideration of them; in others, including our own, there is a jealousy of what is loosely known as the right of asylum, that would require very delicate handling. But it is certain that the time is come when the entire group of questions, of which Duchesne's case represents one, may be profitably discussed, and some attempt be made to trace the main lines of an international agreement. If the German Government are anxious to have the doubtful points determined, and the laxity of existing obli-gations made more stringent, it will do well to abstain from using a dictatorial tone and from mixing up demands for the limitation of free speech, even in the mouths of Roman Catholic prelates, with suggestions of amendment in the laws relating to conspiracies to murder. In 1858, there can be little doubt that the British Parliament would have adopted very severe legislation against conspiracies to assassiadopted very severe registration against conspirate to action nate foreign princes, if it had not been for the insolent tone of Count Walewski's despatch to Count Persigny. The German Minister's tone in addressing the Belgian Government had not the ring of military overbearingness about it, but it is offensive enough in its didactic admonitions. Belgian is reminded that, "The most powerful nations have regulated "their heritaria in the most powerful nations have regulated "their legislation in this sense [*i. e.* of suppressing attacks "calculated to disturb the peace of neighbouring States] and "enforced it in case of necessity. The duty of every State "not to allow its territory to be the basis of attacks against "the basis of attacks against "the peace of the neighbouring States, and against the "security of their subjects, applies with greater force to a "State which enjoys the privilege of neutrality : the perfect "fulfilment of this duty belongs to the tacitly presumed con-"ditions of its neutrality." The German Minister would find it difficult to point out the legislation by which England, or France, or Italy, or even Germany herself, has checked such "freedoms" as the publication of the Paderborn Pastoral in Belgium. As to the laxity complained of in the law of conspiracy shown by the Duchesne case, the German Government has itself admitted that the defective state of the law is not an exceptional demerit in the Belgian code, inasmuch as the jurists of the new Empire are at present labouring to im-prove the Imperial Constitution in this very particular.

But the defect nevertheless exists, and must, sooner or later, be remedied in all systems of civilised jurisprudence. Duchesne's offence was what any plain man would say was a crime—supposing, that is, that his proposition was seriously intended, and not a mere mad freak or hoax, which would be questions to be settled by evidence. He had written deliberately to the Archbishop of Paris offering, on the receipt of a specified sum of money, to murder Prince Bismarck. No overt sct followed, and the watchfulness of the Belgian police has had a negative success. The circumstances of Duchesne's atrocious proposal are fully known; but the Belgian law cannot reach him. Count d'Aspremont Lynden says—"An " attempt is not punishable unless manifested by external " acts forming a commencement of execution. The simple " thought is without the reach of the law. The undersigned

THE ECONOMIST.

" is not acquainted with any law now in force in a foreign " country according to which the act of Duchesne Poncelet " could be qualified as a crime or offence." We in this country may ask whether, if evidence were forthcoming, the law would not reach a Westmeath Ribbonman who should write to his parish priest, offering to shoot an obnoxious landlord for a five-pound note. But it may be said that this is because the law has exceptional powers in Ireland. If it be the case, that in no other country can such a proposal be punished, we can only say that the question has not been raised at all too soon by the German Government, whatever may be our opinion of the manner in which it was raised. A serious deliberate attempt to incite another person to join in planning the commission of such a crime as murder, even though the person incited should not be asked to assume the principal part, but only that of an accessory, ought to be punishable by the criminal law. And if this be admitted, a plan to assassinate a foreign ruler or statesman, existing only in expressed intention, without any overt act, ought not to escape. If it were recognised as a crime for a man to offer to procure the death of an Irish landlord, we could not refuse to place a proposal threatening a French Emperor or a German Chancellor in the same category. The practical difficulty would arise on the demand for the inclusion of such offences in treaties of extradition. We should not find it easy to draw the line between political and nen-political offences, so as to save the right of asylum. But without doubt the line could be drawn to the satisfaction of all reasonable people. Whatever may be the precise boundary adopted, it is quite clear that a direct proposition to assassinate a foreign sovereign ought to fall on the criminal side of it.

M. LEON SAY ON FRENCH FINANCE.

M. LEON SAT'S report on the French Budget of 1876, and the proposed new agreement with the Bank of France, serve to clear up satisfactorily the present position of French finance. The view which we expressed a little while ago, on the report of the late Minister, M. Mathieu-Bodet, is especially confirmed. The so-called deficit of which so much is heard is only a nominal one; and France is not only paying its way at present, and something more, but at no distant date, if peace is preserved, a very great amelioration is in prospect.

The main figures of the question are very simple. The budget of 1876 is made up as follows :--

| Receipts Expenditure : | | | £ 102,933,000 |
|---------------------------|------------------------------|-------------|------------------|
| | For Debt | £47.292.000 | Style in 1 |
| | - Ministries | 44,831,000 | |
| | - Collection of Revenue, &c | 10,647,000 | |
| | changed and the state of the | | 102,771,000 |
| . Switz | Surplus | | 162,000 |

The account is the more satisfactory if we take other matters into consideration. First, as we showed when we last wrote, the deficit for several years has also been nominal. In 1872, 1873, and 1874, the aggregate nominal deficit was 17,000,000%, but the repayment to the Bank of France was 24,000,000l, so that there was a real surplus. In 1875, again, though the figures are yet incomplete, there would be a similar real surplus. Now in 1876, when more time has been given for the new taxes to become operative, and the budget is therefore more "normal," this surplus is estimated at 6,000,000*l*. This estimate, moreover, has every appearance of being moderate. It is based, we are told, on the actual returns of 1874, corrections only being made for some minor proposals of new taxes under consideration, for the increased yield of indirect taxes which will be levied during the whole of 1876 but were not levied during some portion of 1874, and for similar causes of variation. The progressive augmentation of revenue is not taken into account. But in all probability there will be such an augmentation. As was shown by the summary of the return of indirect taxes for the first quarter of 1875, given by our Paris correspondent on May 1st, the yield of these taxes exceeded by 339,0001 the

THE ECONOMIST.

[May 22, 1875.

yield in the same quarter of 1874. This was after making allowance for new taxes voted and similar corrections. It is every way probable, therefore, that the actual yield of 1874 will be considerably exceeded in 1876, and that the estimated surplus of 6,000,000*l*, if there is no additional expenditure, will be much increased. We know of no time for many years in which so good an account could have been given of the deficit or surplus in French finance.

It is no doubt quite true that there is a "budget of liqui-"dation," which ought to be taken into account. But if any necessity for new loans on this account had been foreseen, the interest at least would have been included in the present budget, and we may assume that, for the present at least, no farther addition to the annual burdens of France is to be made in consequence of this expenditure. That the expenditure itself—for repair of fortresses, re-equipment of the army, and the like is extraordinary, does not admit of dispute, although the inconvenience of having a budget in which ordinary charges may be hidden away is also obvious. As there must be such a budget, however, if the policy of re-equipment of the army is to be followed at all, all that can be done for the present is to see that the new interest charges created are properly allowed for in the budgets and accounts. It is of course in the highest degree unlikely that there can be any such capital expenditure in a year or two as will absorb 6,000,000*l* and upwards of annual interest.

Altogether, then, there is little to qualify the satisfaction which the French may feel in their present financial position. After a war which has cost them about 27,000,0001 annually in new taxes, and which has raised their expenditure, exclusive of the repayment of debt, to 97,000,000l, they find themselves raising a revenue of 103,000,000l and upwards, not merely on paper but in actual fact. To have such a surplus after such efforts, and yet to have it without so crippling the nation that the elasticity of the revenue itself is destroyed, is a singular proof of the wealth and financial honesty of the nation. At this rate, and allowing for a moderate degree of elasticity in the revenue, and for the reduction of interest on the 5 per cent. debt, there is a fair prospect that in a few years some progress will be made in reducing the capital of the debt, and in remitting or reducing the worst taxes which have been imposed in haste. The effort is the more remarkable because the revenue is not raised in the best possible way ; France has a weightier burden to bear than it need have from the mere amount of its taxes. But the enormous burden is borne without flinching, and the trade and revenue of the country are once more showing elasticity.

M. Léon Say, as a sound economist, is necessarily anxious to see the end of all the provisional arrangements which the war had caused. He has in view altogether three principal changes, which will mark, in various ways, the progress which has been made since the war. One is the resumption of specie payments, which, for reasons which we discuss elsewhere, he connects with the repayment to the Bank of France. He has made a new agreement, somewhat altering the dates of repayment, and the point for our present purpose is, that the process will be so far advanced by the end of 1877 as to permit that date to be fixed for the resumption. The agreement provides, as regards the outstanding balance of the original advance of 58,800,000*l*, that—

| £ 4,400,000 | will be paid in | 1876 |
|-------------|-----------------|------|
| 11,600,000 | - | 1877 |
| 5,400,000 | | 1878 |
| 5,400,000 | - | 1879 |

But, in addition, the sum of 2,000,000l of a new advance of 3,200,000l, obtained in June, 1874, will be repaid in 1877, and 600,000l in each of the following years. The appropriations in the budget, however, are made somewhat differently,—the sum of 6,000,000l being set aside in 1876, although the Bank of France will only be entitled to receive 4,400,000l in that year. The appropriation is, in fact, increased, in order to prepare for the large amount falling due in 1877. It is difficult, imdeed, to perceive why the agreement should have stipulated for a reduction of the payment in 1876 to a less amount than the appropriation in that year; but there is probably some detail in connection with the dates which outside critics need not meddle with. At first sight, also, 1877 will be overcharged, and a new loan must in that year be necessary; but taking into account the fact of the excess appropriation in 1876, amounting to 40,000,000f, or 1,600,000l, the probability of a surplus in 1876 itse_{lf}

which will farther increase that excess, the farther probability that in 1877 the annual real surplus of 6,000,000l now reckoned on may be increased a good deal, and the probability that if necessary, a part of the surplus in the following years may be anticipated, the appropriation for the Bank of France in those years being still only 6,000,000l, as in 1876,—we are inclined to think that M. Léon Say contemplates paying off the debt to the Bank of France without any new loan, which will be entirely unnecessary. The wealth of France is such that the war-borrowing may be considered to have ceased.

This view is farther confirmed by M. Say's expressed intentions with regard to the creation of a new sinking fund—the second point we referred to as marking the progress made by France financially since the war. "It remains to us," he says, "to see if we can employ new ordinary resources in fature for "a larger extinction of debt. The new treaty with the "Bank of France, will enable us to make that study "at leisure." The treaty, in fact, postpones a part of the payment to the Bank of France, but no serious postponement beyond 1876 is really contemplated, as is shown by the great amount of the charge reserved for 1877. The provision of smaller instalments for 1878 and 1879 can only mean that in those years the hope is entertained of making an impression on the interest-bearing debt. This hope is by no means chimerical, especially when it is recollected how much may be done meanwhile by converting the 5 per cent. debt into debt bearing less interest.

The third point which M. Say discusses is the expediency of revising the taxes. The present moment, he says, has not been considered favourable for undertaking a reform, but he mentions reasons which give room for hoping that some of the worst evils in the present system will be remedied. The criticism of an outside Free-trader on French finance at this criticism of an outside Free-trader on French finance at this moment would be that too little is raised by direct taxes, and that the indirect taxes are unnecessarily bad. But M. Say contemplates increasing the direct taxes; and nothing is done now, because "the inquiries "which have been commenced by your commissions, " and by the administration as to the revisal of the " cadastral valuations, and the equalisation of the land tax, " are not sufficiently advanced for a useful discussion this "session." As regards the indirect taxes, he states the pro-blem to be the replacement of taxes which fetter industry by taxes on consumption, which will be more evenly distributed, and all he suggests is that it is expedient now to wait before taking a decision. But if the direct taxes can be increased, and there is a moderate degree of elasticity in the revenue, it is quite clear that the problem of dealing with the indirect taxes will also be simplified, even allowing for large appropriations for the extinction of debt. It could hardly have been thought a few years ago, after all the disasters of the war, that so much progress could have been made as to bring problems like these distinctly into view. It seemed much more likely that a revision of taxes would have become necessary, because of the difficulty of getting in money in any way to meet the ordinary expenditure of the State. But France has a large surplus, and the problem is in all respects more easy.

BUSINESS NOTES.

POST DAYS ON 'CHANGE .- An "Exchange Broker," in yesterday's City article of the Times, refers to a recent instance of the absurdity of the old system of delaying the payment for bills bought on 'Change to the next post day, on which we have often commented. As the subject has been much talked of in the City, it may be useful to give the exact account as furnished by the exchange broker. He says : "A house, the "suspension of which was announced in the Times of Wednes-"day, bought on 'Change on Friday last, sight checks on Paris "and Antwerp to a considerable amount, which were, in the " ordinary course, presented and paid in those cities on the "next day. Upon applying on Tuesday last for payment, ac-"cording to custom, the unfortunate firms who had sold the "draughts were met with the announcement that the house "in question had suspended payment, and that their claims "must rank with the ordinary liabilities of the estate." The absurdity of the old custom at the present time, however

naturally it may have arisen in a period when "post days" were important, could not be better illustrated, and perhaps the sufferers will now agitate effectually to have the rule changed. The truth is that in modern times there is no necessity for post days at all in Exchange business; every day is really a post day, and at least as regards sight drafts on places with which communication is now so speedy that they are paid the day after they are drawn, the absurdity of the seller giving credit to the buyer, as is now unintentionally done by the rule of paying next post day, is flagrant. The custom itself is one of those curious survivals in business which are familiar to all concerned, but are found so difficult to change; and it will be interesting to see whether its tenacity of life will be proof against this fresh experience.

THE MONETARY CRISIS AT RIO DE JANEIRO .- The outbreak of a monetary crisis at Rio de Janeiro having occurred almost simultaneously with the article which we wrote last week on the general causes of the financial distress in South America, we need do little more now in noticing the subject than refer our readers to that article. The low prices of sugar, cotton, and other Brazilian pro-duce during the last year, following upon a period of inflation in business, and this in a country which commits the two great economic blunders of having a vicious fiscal system, including heavy duties on exports, and an inconvertible paper currency, are quite sufficient to account for the outbreak of a very serious crisis. There must have been a great amount of individual bad business also to lead up to such a crisis, but if the surrounding circumstances in which special mistakes are made are also unfavourable, the resulting evil is intensified. The remedy proposed to get over the crisis, the issue of 25 contos of reis of Government paper, a partial increase, therefore, of the paper currency of the country, is so far a natural one, and one which has always an excuse in time of crisis. When credit is generally shaken, no Government can refuse coming to the rescue with its own credit. The difficulty in Brazil, as in all countries which suffer from the evil of an inconvertible paper currency, is the risk of aggravating the very malady which has helped to bring about the crisis. The paper once issued is apt to stay out, and lead to farther depreciation, and the difficulties in Brazil on that account have already been enormous. The paper currency now in existence in Brazil, according to Mr Consul Lennon-Hunt's report, to which we referred last week, amounts to 149,546,631 milreis, or about 15,000,000l, besides 16,104,000 milreis of Treasury bills; and Mr Lennon-Hunt states that the fluctuations had been so great within the last five or six years, that the exchange descended from nearly par, 2s 3d, to 1s 2d, a recovery, however, having taken place at the time he was writing to 2s 21d. The danger of a crisis, leading to farther issues of paper in such a country, is very serious. No doubt it is stated that the paper to be issued will be a species of Treasury bill, rather than inconvertible paper, as the amount is to be repayable at short dates, and the bills are to carry interest not exceeding $5\frac{1}{2}$ per cent. But this last provision seems to point to a new difficulty. We can hardly understand a government promising to pay interest on money which it does not really require for its own purposes, while so high a rate as 51 per cent. appears inconsistent with the degree of credit which Brazil enjoys in the London money market. The measure proposed to alleviate the Brazilian crisis would thus appear to require farther explanation, for which, in spite of the telegraph, we must wait for farther details by mail.

THE TELEGRAPH IN A MONEY CRISIS.—When the American crisis of 1873 occurred, we pointed cut how much it had been mitigated by the use of the telegraph, which instantly conveyed the news to London, so that assistance could be rendered at once, while news of that relief being on the way could also be telegraphed to New York. The telegraph probably reduced considerably the total amount of money required to be sent from this side, compared with what would otherwise have been necessary, and the knowledge that relief would be given also etayed the panic. The same use has obviously been found for the telegraph, though on a smaller scale, in the case of the present crisis at Rio. The intelligence received within the last few days, has already caused the dispatch of some bullion to Rio, and more will follow by next mail, and meanwhile news that this relief will be given has no doubt been transmitted to that capital. Probably the

THE ECONOMIST.

telegraph is even more useful now than it was in the case o the New York panic, because the distances are so much greater. If there had been no telegraph, we should not probably have heard of the Brazilian crisis at all for a month after it broke out, and another month would have been consumed in sending assistance, while that assistance must also have been sent very much in the dark without any knowledge of the real requirements of the Rio market, and it could not be known for another two months, what the effect had been. Now the event is known, and the relief sent within a few days of the crisis, and the knowledge that relief is coming may also begin at once to act on the panic feeling. The economy thus arising to the great banks and merchants connected with Rio must be very great, while many of the worst evils of an aggravated and prolonged panic must be wholly prevented.

THE BAILWAY COMMISSION ON PASSENGER TRAFFIC .- We have lately had to notice with approval the decisions of the Railway Commission, in regard to the facilities to be given for goods traffic, the one we noticed last being an order to exhibit a book of goods' fares for sidings at the station where the traffic of the district is conducted. An equally important, if not more important, decision was given last week in regard to passenger traffic, the judgment being also of a nature which would hardly have been within the competence of an ordinary court of law. The question at issue was the arrangements for the traffic between the metropolis and the stations on the Wimbledon, Merton, and Tooting Railway-a joint line of the London and Brighton and London and South-Western Companies. The residents complained that the fares from Wimbledon to London Bridge, Victoria, and Ludgate Hill, vid Tooting, were higher than from Wimbledon to Waterloo by the main line of the South-Western Company ; that the trains from stations on the local line to the metropolitan stations were not run at the hours most convenient for passengers, and the service to Victoria had been discontinued altogether; that passengers from Wimbledon and the joint line to Victoria, vid Clapham Junction, required to re-book at Clapham Junction ; that from the joint line to Waterloo it was also necessary to re-book at Wimbledon, a disproportionate charge being also made from the local station to Wimbledon ; and that the station at Merton was inconvenient, being 130 yards from any highway, and without sufficient shelter from the weather. The whole service, it was complained, was so arranged as not to divert traffic from the main line of the London and South-Western Company between Wimbledon and Waterloo, whereas Western Company between wimbledon and waterloo, whereas the other metropolitan stations above named were more con-venient for the majority of residents than Waterloo. The Railway Commission has substantially allowed the case of the residents on the joint line, except in the question of competing fares. They have intimated that the trains ought to be run at more convenient hours, that the service to Victoria ought to be restored, that through booking ought also to be allowed to Victoria vid Clapham Junction, and from the local line by way of Wimbledon to Waterloo, and that the station ought to be improved either by the formation of a highway from the nearest road, or by removal to a more convenient site. The residents at Merton have thus obtained a great deal of the redress which they required from the Commission, although it is hardly con ceivable that a court of law could have dealt with such questions of convenience at all. There are also two minor points in the decision of the Commission which show the convenience of its constitution. While intimating an opinion on such points as the inconvenient hours of running trains and the site of the Merton station, the Commissioners leave it to the companies themselves to choose the specific remedy to be applied, subject to a new application if the residents are not satisfied. In this way the ommission in fact proposes to exercise a continuous control, the only way in which the public interests can be protected in such matters without an amount of dictation in regard to the business details of the railways themselves which would be intolerable. The decision in regard to the re-establishment of the direct service to Victoria is also a suggestion that the object can be accomplished by allowing an interchange of traffic at a particular station, which is passed by another set of trains communicating with Victoria. The complaint of the companies that the accommodation required could not be

THE ECONOMIST.

[May 22, 1875.

given without additional expense, is thus completely got over, although it is obvious that an ordinary judicial tribunal would have hesitated at making such merely technical suggestions. The course taken in these cases, and the mere fact of a court like the Bailway Commission being in existence, should be great safeguards to the public against caprices of administration into which the management of great undertakings like railways, as of Government departments, is apt to fall.

CEACROFT'S BANK RETURNS.—We have received a specimen sheet of this publication, containing an elaborate diagram showing the variations in the most important items of the Baak of England weekly returns for the year 1873, and on the opposite page an explanation of the plate, a summary of the financial history of the year, and a chronology of the leading political and financial events. The work is to comprise all the years since 1844, in which the Bank accounts have been published in the present form, each year being treated in the same manner, and in this way the book will form a most convenient and unique work of reference. Mr Cracroft's Consol Chart and other statistical publications are well known, and no other recommendation of the present work than the importance of the subject should be required, though we observe that Mr Goschen, to whom the work was submitted for consideration, has authorised Mr Cracroft to quote his opinion as to the publication being very valuable. It is also mentioned in the prospectus accompanying the specimen sheet, that no fewer than 180 stones are required for the production of the work, the preparation of which has extended over several years.

FIRE INSURANCE IN RUSSIA.—Fire insurance, as a system, is in no very developed state in Russia, but the property assured at the end of 1874 represented a value of 500,000,000l, according to the estimate of a St Petersburg journal. This sum does not represent more than a fraction of property so assurable in Russia, for the statistics for 1874 show the total claims for losses paid by the companies in that year to have been only 700,0001, while the damage caused by fires throughout the Empire was 81 millions. Last year was, it must also be noticed, a year of exceptional losses for the companies, and the dividends paid by them were lower than for the last eight years, three companies paying nothing at all in 1874, while the average of the rest sank to 6.95 per cent. These losses appear to have been largely the result of unavoidable causes, 4.L e above-mentioned sum of 81 millions comparing with only 64 millions sterling as the total loss of property in 1873; and the management of the companies appears to be conducted in a prudent manner, reassurances having been effected on the average of 55 per cent. of the values assured during 1874. The following list shows the great variation in net receipts to which assurance companies in Russia are subject, notwithstanding the use of actuarial tables and such precautions as the above in distributing the risk :-

| Treasury account | 22,575,130 |
| Discounts | 21,322,503 |

The abundance of unemployed capital is again shown by a further decrease in the discounts and an augmentation of 35 millions in the private deposits in Paris. The payment of the quarterly dividend of the five per cents. since the 15th

THE ECONOMIST.

and for which a sum of 85 millions is required, has caused a diminution in the Treasury account. The Treasury has also paid off a sum of 10 millions of its debt to the Bank.

The ease in the discount market is undiminished, and the outside rate for either bankers or commercial bills is 3½. The exchange on London, after a momentary weakness, is again firmer; the price for drafts at sight or for long paper is 25f 21½c and for short paper 25f 20c. The only change of note in the rates on the other places is in the improved value of paper on Italy, the discount having fallen to 7½ per cent.

The mid-monthly settlement was got through with marvel-The mid-monthly settlement was got through with marvel-lous facility, as frequently happens when great apprehensions of difficulties have previously existed. Aided by the abund-ance of money, the ground had been well cleared before the official date of the liquidation, and on Monday the *reports* had fallen to insignificant rates, many securities being carried over even. The disquietude as to the relations between France and Prussia having vanished, the settlement became the starting point for a fresh rise, and the Five per Cents. on Tuesday closed at 103f 67[‡]c, the highest rate yet reached con-sidering that the coupon was detached only a fortnight back. The Threes also reached 65f 10c. The defeat of the Govern-ment in the Assembly on Tuesday evening, and realisations The Threes also reached 651 loc. The defeat of the Govern-ment in the Assembly on Tuesday evening, and realisations on Wednesday continued to-day, have caused a part of the rise to be lost, but Rente is still $\frac{3}{4}$ higher than a week back. Options for the Fives at the end of June, *dont* 50 centimes, are paid 104f 15c to 104f 55c. A notice has been issued by the Treasury that the scrip in arrear of the loan of three milliards has been sold on the Bourse, and that the holders, to obtain the balance due to them, must send in their applica-tions on stamped paper, accompanied with the certificates, to tions on stamped paper, accompanied with the certificates, to the Ministry of Finance.

In the foreign funds Italian Rente shows the greatest buoy-ancy, and reached 73f on Tuesday, but has since receded $\frac{1}{2}$, gaining, however, 1 in the week. The publication of M. Minghetti's Budget, showing that the deficit has become reduced to 23 millions, and the improvement in the exchange gives great firmness to this stock. Turkish Fives also reached 44ff on Tuesday, but that rate has not been maintained. The bankers who hold quantities of the last loan neglect no oppor-tunity of lightening their portfolios when the rates reach a point which leaves them a small profit, and any rise is rapidly followed by realisations. The bonds of 1873 closed to-day at 267f. Egyptian bonds of 1870 are steady, at 405f, and the 1873 at 393f. Spanish Threes have improved, in sympathy with other securities. In the foreign funds Italian Rente shows the greatest buoywith other securities.

Bank of France shares have been in better request, notwith-standing the continued diminution in the discounts. Banque de Paris shares have also recovered from their late fall. This company holds its meeting to-morrow, when a dividend of 10 per cent. on the paid-up capital will be proposed, equal to 74f on the present price of the shares. Credit Foncier shares have regained a part of the loss of 25f last week, caused by the revival, by the Municipal Council of Paris, of an old claim for 17 millions in the settlement of an account as far back as 1858. Credit Mobilier shares have recovered 30f, and Franco-Hallandaise Bank shares 11f 25c, at 321f 25c. The fall in Hollandaise Bank shares 11f 25c, at 321f 25c. The fall in Spanish Credit Mobilier has also been arrested, and shares have advanced from 760f to 795f.

The railway companies continue to issue brilliant returns, The railway companies continue to issue brilliant returns, that for the seventeenth week showing an increase of over a million and a quarter on the same week last year. The percentage of increase on the different lines since the 1st January is as follows:—Northern, old network, 9:20; new, 11.79; Western, old, 3:34; new, 0:67; Orleans, old, 17:02; new, 13:13; Eastern, old, 5:27; new, 7:20; Paris to Mediter-ranean, old, 4:91; new, 7:71; Southern, old, 7:37; new, 3:24. M. Philippart's La Vendee lines have also an augmentation of 25:14 per cent. All railway shares have improved from 5f to 25.14 per cent. All railway shares have improved from 5f to 15f. Transatlantic shares have risen from 230 to 270; and Suez Canal shares have been stronger, but after reaching 690 the offers have driven them back to 660. Messageries shares have suffered from the perspective of a termination of the contract of that company for the mail service to the East, referred to below. Subjoined are to-day's prices for the account :

lions, which the Bank of France by its treaty of August, 1874, engaged to advance to the Treasury as a temporary advance in that year and in 1875. Other chapters of income are, however, increased by about 12 millions, and receipts amounting to 27⁴/₄ millions are set down as the probable yield of augmentations of taxes proposed by M. Léon Say's predecessor, and on which the Assembly has yet to pronounce. On the other hand, the credits for the different public services are increased by 26⁴/₄ millions, while the charges for interests and reduction of the public debt are diminished by nearly 41 millions. The reim-bursement of the debt to the Bank of France is in reality reduced by 50 millions, but certain new charges have reduced reduced by 50 millions, but certain new charges have reduced the alleviation in this item of expenditure by about nine millions. A divergency may be remarked between the reduction in the amount of the reimbursement—from 200 millions to 150—and the terms of the new treaty with the Bank of France. By the convention just signed the reimbursement in France. By the convention just signed the reinbursement in 1876 may be reduced to 110 millions. The Minister of Finance nevertheless maintains the credit in his budget at 150 millions, so as not to charge too heavily the following year, 1877, when the reimbursement must be increased by the sum withheld in 1876, as well as by 50 millions for the temporary advance of 80 millions in 1874 and 1875. M. Léon Say has wisely taken precautions against a deficit in the yield of the indirect taxes by moderating his estimates. Registration dues and stamps are both set down to produce rather less than in 1875, and, together, only 7½ millions more than in 1874, although both received additions or augmentations in that year. The yield of the sugar duty, estimated at 176 millions for 1875, is reduced to 157 millions in 1876, notwithstanding the coming exercise of the refiners, which is expected to benefit the Treasury. Nor has the Minister been influenced by the increase on the estimates of indirect taxes in the first four increase on the estimates of indirect taxes in the first four months of this year, so that if it is continued in 1876 he will have a good margin to meet any unforeseen requirements

have a good margin to meet any unforeseen requirements. The French Government has presented to the Assembly a Bill to terminate the contract with the Messageries Company for the conveyance of the mails in the Mediterranean, and Black Sea, and to India and China. The contract origin-ally made was for a period of twenty-four years, but the Go-vernment reserved the right to denounce it at the end of twelve years, which date expires on the 22nd July next. The preamble of the bill makes a comparison between the contract of the Peninsular and Oriental Company with the English Government. The former, for a service of 1,171,092 miles, re-ceives 10,750,000f, while the latter for 631,514 miles, or little more than one-half, receives at present 9,995,950f, or nearly as much. The profits of the two companies were in the same ceives 10,750,0007, while the latter for 631,514 miles, or little more than one-half, receives at present 9,995,950f, or nearly as much. The profits of the two companies were in the same proportion : thus in 1873 those of the Messageries amounted to 19 per cent., of which 9 per cent. was distributed to the shareholders, and 10 per cent. was added to the reserve, which at the end of that year amounted to 58 millions of francs, for a capital of 60 millions only; while the Peninsular and Oriental had never, until the last two years, made profits of more than 6 per cent., and possessed a reserve of 10 millions only, including that for insurance. The Government expects to effect a saving of 7 millions a year by putting the mail services now performed by the Messageries up for tender. Two contracts, which had already expired and been offered for competition, were taken by other companies at greatly reduced prices; the service from the continent to Corsica, for which 640,000f had been previously paid, is now performed for 375,000f, and that between Calais and Dover was reduced from 190,000f to 100,000f. Apart from financial reasons a reduction of the subvention is expected to benefit steam navigation by permitting other lines of vessels to compete in the carrying trade to the east, which they had been unable to do while the Messageries steamers were so richly endowed. richly endowed.

THE ECONOMIST.

[May 22, 1875.

The Bill to extend the action of the Saving Banks in France was brought up for discussion a few days back, and was with-drawn after three of its chief provisions had been rejected. It proposed to charge the post offices and local treasurers to receive deposits, to increase the maximum of deposits from 1,000f to 2,000f, or 2,500f with interests, to permit minors and women to open accounts and withdraw their deposits when no enposition was made by the parents of the one or the bus women to open accounts and withdraw their deposits when no opposition was made by the parents of the one or the hus-bands of the other. Of the three propositions, the first alone was voted. With respect to the second, the usual argument of the danger of the State charging itself with too large a sum of money to fructify was brought forward; and relative to the third, possession of property by minors was characterised as an encroachment on the paternal authority, and the right of women to deposit was considered as likely to give rise to abuses; if with the consent of the husband, the rights of creditors might be defrauded, and if without his knowledge, the result might be abstraction of money belonging to the conjugal patrimony. The refusal of the Assembly to permit deposits by minors and married women is the most to be regretted, although it is probable that the promoters of the Bill attached more importance to the clause for the increase of the maximum. The facilities of investing small sums in good securities, or in small plots of investing small sums in good securities, or in small plots of ground, are so great, that the population is not accustomed to allow their savings to remain long placed at the small rate of interest allowed by the savings banks. The subdivision of the titles of Rent into coupures of 3 frances of the Three per Cents., or 5 frances of the Fives, and the issue by all the munici-nalities and million of the Fives. palities and railway companies of their loans in bonds of an average of 300f, attract most of the economies of the working classes in the towns; while, in the rural districts, when the savings reach a few hundred francs, they go to increase the size of the little plot of ground which forms the family free-hold. The extension of the field of action of the savings hands by the nois of the root office to districts in which none banks, by the aid of the post-office, to districts in which none now exist, will be of greater utility than the augmentation of the maximum, which statistics show to have been little needed. the maximum, which statistics show to have been little needed. In 1844, the savings banks held a sum of 393 millions of france, belonging to 575,000 depositors; in 1860, the sum had fallen to 377 millions, while the number of depositors had increased to 1,125,000, showing that the average amount due to each depositor had decreased by one-half. If, therefore, the total deposits held by the savings banks in France are little more than one-third of those in England, the cause is not limited to the amount of the deposits here. In countries where the land is held by a powerful aristocracy and where where the land is held by a powerful aristocracy, and where no encouragement is offered to small investments in the public funds, or in secure industrial undertakings, the savings of the populations find no other refuge than in the savings banks. The provident habits of the French peasantry and working classes are beyond doubt; and if the savings banks hold so small a portion of their little fortunes, it is because they find a better use for them.

The remaining two of the great railway companies have now held their annual meetings and published their reports for 1874. That of the Eastern Company shows that their capital account was increased during the year by nearly 39 millions of francs, and amounted on the 31st December last to 1,177 millions. As merged the period by an increased by an increased by an increased by a second by an increased by a second millions. As usual, the new capital was raised by an issue of Three per Cent. bonds of 500f, and the average price at which they were sold was 271f 44c, or an improvement of about 2 per cent. on the rates at which they were placed in 1873. Of the total capital realised, shares are represented by only 292 millions, or less than one-fourth, and the remainder by bonds. millions, or less than one-fourth, and the remainder by bonds. The receipts, old and new networks combined, amounted to 90,013,489f against 93,688,033f. The diminution was in the goods traffic alone, the passenger receipts having slightly increased. The working expenses represent 49°11 per cent. on the old network and 62°18 on the new. The net revenue of the old network was 17,297,436f, to which has to be added 16,352,346f of the annuity of 20½ millions paid by the Government for the lines on the territory appeared to Germany, and for which the territory annexed to Germany, and for which an allowance was made by Prussia in the war indem-nity; together 33,649,782f. The profits reserved for distribution to the shareholders being fixed at 28,945,950f, a sum of 4,703,832f remained to be transferred to the account of the new network. The net earnings of the new network, comprising its share of the Government annuity and the balance from the old, amounted to 22,614,56)f. The charges for in-terest and redemption of bonds being 34,755,072 f, recourse is had to the Government guarantee for the difference of 12,140,511 f. The total debt to the Government under the head of the guarantee, now exceeds 90 millions, after deduction of 47 millions for the charges of the linear orded 47 millions for the share of the lines ceded.

The capital account of the Southern Company was also increased by 29 millions in 1874, and amounted at the end of the year to 785,613,000f. The total receipts were 63,713,000f, or an increase of more than half a million on 1873. The pro-portion of working expenses to gross returns was 371 per cent. on the old network, and 73 per cent. on the new. The

account of the old or dividend-paying network was as under: —Receipts, 46,236,000f; expenses, 17,360,000f; net income, 28,876,000f; the reserved revenue permitting a dividend of 8 per cent., amounting to 22,236,000f, a sum of 6,840,000f is transferred to the new working, with the net yield ef 4,728,000f, a total of 11,568,000f, to meet charges of 14,536,000f. The difference of 2,968,000f is obtained from the Government guarantee

A suit of some interest between the French railway compa A suit of some interest between the French railway compa-nies and the City of Paris is down for hearing before the Civil Court of Paris. During the Commune of 1871, the railway companies were constrained to pay to the agents of the Commune the sums due to the State for the stamp and transfer duties deducted from the coupons paid. When the authority of the Government was re-established in Paris, and authority of the Government was re-established in Paris, and the companies had to settle their accounts with the Treasury, a deduction was first allowed for the sums paid to the insur-rectional Government under coercion. Subsequently, however, the Treasury repudiated its liability, and the affair coming before the Tribunal, judgment was given against the railway companies, and they were condemned to pay a second time a sum of about three millions, already paid to the Commune. The City of Paris has since received from the State 140 millions of frances to indemnify private individuals for their losses from the insurrection, and the companies have now made a claim for the reimbursement of the three millions, and for compensation for acts of pillage in some of their stations. stations.

GERMANY AND AUSTRIA. (FROM OUR OWN CORRESPONDENT.)

VIENNA, May 18.

In the Prussian Landtag an important law concerning the protection of forests was passed last week after the third reading. In general one may consider Germany as a model for the good condition of its forests; this is, however, really the case only in Southern and Central Germany, for the last statistical returns showed that the forests in the plains of Northern Germany amounted but to 11 per cent. of the total area, whilst in the South they reached the amount of 33 per cent. In some parts of the country, as for instance, in what was for-merly the Grand Duchy of Nassau, woods amounted to 50 per cent. of the whole territory. What may by rights be called a standard forest, can to the present moment be found in Nassau, in Thuringia, in Baden, in Würtemberg, in Bavaria, and in Austria alone. It is but ten years that forests economy has forest were used and in Austria alone. It is but ten years that forest-economy has flourished in Austria,—before that time forests were used and devastated when any financial embarrassment was to be got out of. Any one who fifteen years ago stood on the Watzmann or on any other mountain in the neighbourhood of Berchtesgaden, coald easily ditinguish the boundary between Bavaria and Austria from the difference in the thickness of the woods. At present Austria has undergone a change for the better. Great surprise was caused when the fact came to be known, that Northern Germany, with its finances in such excellent condition, had been so careless about its woods. By mea-surements of the exactest kind, the fact has been observed that the normal height of water in the Prussian rivers has sunk a the normal height of water in the Prussian rivers has sunk a good deal—a fact which is entirely owing to the devastation of forests in the country. Within the last fifty years the height of the water has sunk by 56 centimetres in the Rhine, 40 cent. in the Elbe, 40 cent. in the Oder, and 61 cent. in the Vistula. Side by side with this inconvenience, another danger has appeared—the danger of inundations—which with the Oder, for instance, has already been very considerable. It is a fact universally known that forests hold back both rain and snow for a time and do not let them flow into rivers exand snow for a time, and do not let them flow into rivers except gradually, whereby inundations are rendered improbable. For the same reason, countries in lower districts are exposed to inundations, if in the countries above forests are neglected or badly managed. Thus, at the time of the terrible inunda-tions in Switzerland in 1868, which caused a damage of 14 millions of francs, the Canton of St. Gallen suffered merely through the fault of the Canton of Grisons, which is situated above it, and which had hewn down most of its forests. It was for this reason that the Federal legislators were obliged to prescribe special clauses in the Constitution, which puts the

THE ECONOMIST.

administration of forests in the Alps under the control of Government. Prussia goes still further in the new Act.

Two organic measures have been determined upon, viz.:-1. The establishment of forests for the protection of the country. 2. The establishment of forest-associations effecting the first of these measures. The law determines that-proprietors, communes, and country-police may demand the establishment of forests for the protection of the country in the following cases:-(a.) Where sandy ground shows a disposition to carry its sand into neighbouring territory. (b.) Where new waterfalls endanger the grounds, the roads, or houses below. (c.) Where the devastation of a forest on riversides causes danger to land and buildings, or where the neighbourhood of a lake exposes fertile land and villages to sharp winds.

sharp winds. The law subjects proprietors to all the dispositions necessary for the purpose of establishing such protective forests. They are, however, to receive indemnifications for any damage they may suffer, or if their income be in any way curtailed. These indemnifications will be paid by those whom the devastation of forests would endanger. The latter will also have to pay the costs for the culture of forests grown in their interest. If, however, the proprietors draw any advantage from woods grown for the protection of the land below, they will have to bear a part of the costs, proportionate to the amount of the advantage drawn. A special "court of justice for the protection of forests," will be entrusted with the settlement of any dispute arising between the different parties concerned.

Forest associations will be founded in districts where forests belong to a great many proprietors, and where advantageous administration becomes possible only if the divided property is placed under a single management. The institution of such an association can be demanded by the proprietors themselves, by the communes, the authorities, or the country police. The yearly amount of expenses to be paid by each proprietor taking part in an association, as well as the part he receives of the yearly profits will be valued according to the state of his forests, and the amount of income he had drawn from them up to the moment when he entered the association.

The Bill on Co-operative Workmen's Friendly Societies, which we mentioned in our last, and in which both masters and men are to take a part, is being greatly approved of by wholesale manufacturers, whilst the leaders of social democracy strongly oppose it. An experience of the fact that workmen themselves are less ardent in supporting their own interests than are their masters, has been made in another direction also. A report of the Controller of the Manufactories at Berlin, lately published, states the fact that all the rules established for the protection of workmen against the dangers caused them by machines have been conscientiously kept up by the proprietors themselves. The same cannot be said of the workmen, who become the more careless the more they are acquainted with the danger. An Imperial Act holds proprietors responsible for any harm encountered by a workman, and obliges the former to indemnify the latter in any such case. The Commercial High Court of Justice in Leipzig interpreted this Act in a way which condemns the proprietor in all cases in which he cannot prove that the workman's own fault was the cause of his misfortune.

In Berlin the fact is still being observed that gold coins are bought up at a premium amounting to 4 per mille, and exported to Belgium and Denmark. One of the Berlin journals, ordinarily under the influence of Government, went so far as to name the bank-house, which is principally carrying on this sort of business, and to express its disapproval of it. This lack of tact gave cause to an article in one of the financial papers, which reminds the public that the above fact is not owing to unfair dealings in commerce, but to a mistake on the part of Government. It calls the attention of the public again to the fact that the new currency was too slowly coined, and that the old silver thalers were not soon enough withdrawn.

The German Bündesrath determined upon causing a new census to be made at the end of the year. Next year, statistical operations will be undertaken on forests, on cultivated land, and on harvests. Within the last three years, an extraordinary diminution in the export, and an increase in the import, of corn from and into Germany took place, owing principally to the insufficient harvests of 1873, and to the sudden expansion of industry, just before the outbreak of the crisis. The import of corn into Germany amounted to 23,864,300 cwt in 1872; to 33,700,100 cwt in 1873; to 40,885,900 cwt in 1874.

Side by side with this increase of import, the export of wheat alone diminished as follows :--

| | | | Cwt | |
|----|------|-----------------------|--------------|--|
| In | 1869 | it amounted t | o 13,449,100 | |
| | 1870 | | 10,332,200 | |
| In | 1871 | | 10,935,500 | |
| In | 1872 | Stort- in | 7,459,000 | |
| In | 1873 | a state of the second | 6,966,800 | |
| In | 1874 | | 7,900,000 | |

The Austrian Board of Agriculture has just published the statistics of the harvest for 1874. These statistics prove the last harvest to have been the richest in Austria since 1868. The amount of product of different kinds within the last six years has been the following, in millions of Austrian "metzen" (a metzen corresponds to 0.516 imperial quarter) :--

| | 1869. | 15 | 1870. | 1871 | . Are | 1872. 18.2 | 1873. | 1 | 1874. |
|--------------|-------|----|-------|----------|-------|---------------|----------|---|-------|
| Wheat | 18.9 | | 20.9 | 20.7 | | 18.2 | 18.6 | | 24.1 |
| Rye | 42.8 | | 44.4 | 42.6 | | 37.5 | 32.4 | | 46.2 |
| Barley | | | | | | 26.8 | | | |
| Oats | 44.6 | | 46.3 | 52.5 | | 55.3 | 48.7 | | 45.6 |
| Turkish corn | 7.9 | | 6.8 | 6.3 | | 8.1 | 8.4 | | 9.4 |

In the course of 1874 the price of corn sunk in consequence of these harvest results. Thus, wheat cost 8 guiden per metzen at the beginning of the year, and 5 guiden at the end.

The final determination in the question of the Turkish and Austrian Railway Junction is impatiently expected. The last news from Constantinople states that the Sultan begins to take interest in the Austrian Society, to which the concession for both the building of the junction railways and the management are to be granted. The final determination is expected at the end of June. The returns for 1874 of most of the important Austrian railways have been published, and show that business has gone very much backward. More than even in business a decrease in the net returns has been observed, on account of the diminution in the conveyance of passengers.

Within the last week the sessions of the seventeen Austrian Landtags have taken place. In the discussions on commercial policy the party of protectionists tried to use their influence, but on hearing the declaration of the Government of Hungary, they no longer proposed abolishing the Treaties of Commerce. They merely demanded "friendly regards" for some branches of industry, such as wool, iron, etc., when the renewal of the treaties takes place. Free-traders, however, insist upon seeing the proofs of the necessity of such "regards," in plain figures.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1865, a deficiency of 6,537,9101; in 1872, a deficiency of 4,786,2101; in 1873, a deficiency of 7,050,2471; and in 1874, a deficiency of 534,9851. In 1875, there is a deficiency of 685,7211.

In 1865, the value of money was sustained by the threatening aspect of politics, Mexico and the United States being so antagonistic as to cause a fall of $\frac{1}{2}$ in Consols. Rumours of further mercantile failures in the Eastern trade had imparted depression to the shares of joint-stock banks.

parted depression to the shares of joint-stock banks. In 1872, rates were drooping. The gold which arrived was chiefly taken to Germany. In 1873, a fresh advance in the Bank rate took place, as

In 1873, a fresh advance in the Bank rate took place, as before on the Saturday; but the open market gradually gave way owing to more reassuring reports as to the panics on the continent. M. Thiers was attempting to make the Republic definitive, and the political agitation in France helped to create depression among foreign securities, which had recently fallen conspicuously.

In 1874, the value of money was tending downwards, but the outer market was rather bare of supplies owing to re-

payments to the Bank. The probability of the Bank of France reducing its rate and returning to specie payments was the eventuality chiefly discussed. Politics in France were unsettled owing to the defeat and resignation of the Duc de Broglie.

The account of the Bank of France for the week ending May 20 shows the following changes :---

| Assers. | May 20. | May 13. | Increase. | Decrease. |
|---------------------|------------|----------------|---------------|---------------|
| Cash | 61,985,000 | 61,321.000 | 664,000 | *** |

* Converting the relcha-marc at 1s: the Austrian florin at 2s; and the franc at 25f per 14. American currency is reduced into English money at 3s 5d per dol, the item specie being taken at 4s 2d per dol. Net deposits are left in dols on accounts of the mixture of currency and specie.

DISCOUNT AND MONEY MARKET.-Now that the usual increase of demand and shortness of supply at the beginning of May have passed over, the tendency of the market towards easier rates has been renewed. A large amount has been repaid to the Bank during the week, but in spite of this there has been increased ease in the open market, and the minimum this afternoon for two and three months' Bank bills is only 31 per cent., with exceptional transactions at lower rates, while the rate at call on English Government securities is only 3 per cent., with a moderate demand. The ease is the more noticeable, because coin on balance does not yet come back from the country, the demand for Scotland neutralising what comes back from the English provinces, while the stoppage of the South Wales strike probably also diminishes the return from the latter quarter. There is no alteration in the continental exchange rates, and considerable sums are still arriving from America and elsewhere, although the outbreak of a serious monetary crisis at Rio, during which the well-known firm of Maua and Co. have failed, has farther stimulated the export of sovereigns thither which has been going on for some time.

The changes in the Bank return hardly show so great an improvement as might have been expected after the large influx of gold from abroad during the week, the Scotch demand and the cessation of the South Wales strike having been even more powerful influences than might have been supposed. The influx of gold on balance from abroad was 511,000*l*, but the total increase above-shown is only 97,000*l*, which gives 404,000*l* as the amount taken for Scotland and the country on balance. The circulation, however, has diminished 258,000*l*, and there is a total improvement of 355,000*l* in the reserve. The great extent of the repayments to the Bank is shown in the reduction of 1,476,000*l* in the private securities, and as the public deposits have diminished 118,000*l*, and the private deposits 962,000*l*, while the reserve, as above stated, has increased, the proportion of reserve to liabilities is much higher, although the reserve itself is still at a low figure. The next return will probably show a considerable farther improvement, as the Scotch demand is understood to

THE STOCK MARKETS .- The stock markets have generally been steady, with an important improvement in some cases, although there have been great exceptions to this general tone, and after rather a sharp rise on Tuesday and Wednesday on the resumption of business, prices have been rather irregular on realisations. This last characteristic has been especially applicable to the home railway market, where the rise was partly determined by the anticipation of the Whitsuntide traffics, and sales were made after the event. But business is also inactive, and while this is the case, and there are also large amounts of stock in the hands of speculators, "irregu-"larities" in prices are easily produced, however confident operators in the rise may be, and however quickly a reaction may be recovered from. Among the principal exceptions to the generally better tone has been the market for Erie and Atlantic and Great Western descriptions, where the rise at the end of last week has been completely lost by the disaparing mount of Market and the the disappointing report of Mr Jewett, and the conse-quent renewal of apprehensions that the final "smash" is coming-apprehensions which are of course sedulously fostered by operators for the fall. Panic sales have accordingly been made, and Eries have been lower than for several years. In the foreign market also there is some lingering weakness, on account of sales arising out of the Philippart collapse, although the more solid securities dealt in in the Paris market, French Rentes, &c., appear to be all the stronger, on account of the misdirected speculation in neglected miscellaneous securities being at an end. To-day the tone was firm at the opening, but prices again became "irregular" late in the afternoon on reports of further large failures which are alleged to be imminent, though the more important of the difficulties which have been the subject of rumour are understood, in well-informed quarters, to have been arranged.

ENGLISH GOVERNMENT SECURITIES.—This department keeps firm in tone in consequence of the direction given to investment by the high price now reached by railway debenture stocks and other securities, while Consols have for a long period hardly advanced. Small amounts are also being purchased for the sinking fund. There has been a reaction at the close this afternoon in sympathy with the other markets.

COLONIAL GOVERNMENT SECURITIES.-Beyond an advance of 1 in Candian, there is no marked change in values.

FOREIGN GOVERNMENT SECURITIES.—The movement here has been singularly small, the most noticeable feature being the marked advance in French Rentes, now that the Philippart collapse has freed the market from a perpetual source of misdirection and embarrassment. The rise is also, in all probability, stimulated by M. Say's report on the budget for 1876, which holds out a promise of no more borrowing, even to repay the debt to the Bank of France, and foreshadows the probability of largely-increased sinking fund operations by another year. Among the more speculative securities, Turkish stocks have been firm, but Peruvian have been unsteady, on account, it is supposed, of some operators in this stock having been mixed up with the Philippart group, and the delay in concluding the new guano contract. The less speculative stocks continue steady, and Italian, Austrian, and Hungarian stocks have advanced. This afternoon the general tone has been flat, from the general causes above referred to; but on balance there is no great change for the week.

The following are the changes for the week, taking the latest unofficial quotations :--

ENGLISH BAILWAYS.—The market here was very firm on Saturday, in anticipation of the Whitsuntide holiday traffic, and also on Tuesday, on the publication of the Brighton and South-Eastern returns, which were justly held to foreshadow good "takes" for the others; but on Wednesday prices became irregular, in consequence of the usual realisations when the returns were actually published. The returns really show a remarkable increase, amounting to 140,000*l* on the lines included in our usual table; but business is inactive, and a few realisations have consequently a great effect, especially on a market which has been made sensitive by the opening of a large account for the rise. On balance there is still a moderate gain for the week, although rather heavy sales by a few operators were made this afternoon, and prices in an inactive market were quickly depressed.

Reports have again been in circulation as to the fusion between the South-Eastern and Chatham and Dover Companies being completed, but no definite announcement has yet been male.

The traffic receipts on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending May 15 to 1,042,464*l*, being an increase of 139,529*l* as compared with the corresponding week of last year. The aggregate receipts for the half-year to date now amount to 17,198,641l, an increase of 652,624l as compared with the corresponding period last year. Owing to the commencement of the Whitsuntide holidays-a week earlier than last year-there is a very general improvement, North-Eastern showing the specially large increase of 27,3821; the week last year was in that case one of strikes in the district through which the line runs. FOREIGN AND COLONIAL RAILWAYS .- Lombardo-Venetian shares have again been weak, on account of sales which are made by weak operators, who were involved in the Philippart collapse, and who are realising such securities in their possession as are saleable. Grand Trunk and Great Western of Canada stocks are also flat, in sympathy with the depression in the American market

AMERICAN SECURITIES .- As above stated the feature this week has been the collapse in Erie and Atlantic and Great Western securities, on the publication of a summary of Mr Jewett's report, as referred to below in our Notices and Reports. The publication had been preceded by the circulation, in an authoritative manner, of rather flourishing accounts of the present position of the line; so that the fall, following an advance which these accounts had occasioned, was all the more sudden and extreme. The following are the changes :-

JOINT STOCK BANKS .- There is very little movement in The following have advanced :these shares this week. Hong Kong and Shanghai, 1; Imperial, 1; London and County, $\frac{1}{2}$; Provincial of Ireland, 2; Imperial Ottoman, $\frac{1}{4}$. On the other side, Anglo-Austrian have fallen $\frac{1}{4}$; Anglo-Hungarian, $\frac{1}{8}$; Anglo-Peruvian, $\frac{1}{2}$; English Bank of Rio Janeiro, $\frac{1}{4}$; London and River Plate, 1; Mercantile of the Biver Plate, 1; Land Mortgage of India, 8.

On the subject of the Anglo-Hungarian Bank accounts, we have been favoured with a communication from Herr M. Weiss, managing director at Budapesth, containing the fol-

Weiss, managing director at Budapesth, containing the Idi-lowing statements :— The balance sheet and accounts which we have published are correct, and I vouch for the fact that the bank may consider itself possessed of a net capital of 3,000,000ff, after having allowed for every probable contingency or eventuality. We shall, I trust, be able to reorganise the bank, to reinstate it in an honourable position, and soon to make it again a paying concern. The whole of our liabilities do not now exceed about 50,000/, whereas our assets are about 350,000/. We were only waiting that our contracts with the Government should be rescinded, the last of which has been ratified only recently, to place our position waiting that our contracts with the Government should be resended, the last of which has been ratified only recently, to place our position before the shareholders. The market value of our shares I cannot cen-trol; it has been much affected by the proposal of a call. The payment of the call will enable us to liquidate our existing assets advantage-ously, and to resume banking operations at once. Results so disastrons are owing entirely to the bank having entered into those industrial un-dertakings. These operations will honceforth be entirely excluded.

TELEGRAPHS.—The following have advanced :—Black Sea. 2; Newfoundland Trust, $\frac{1}{2}$; Hooper's Works, $\frac{1}{4}$; India-Rubber Works, 1. On the other side, Anglo-American have recently fallen heavily, while Direct Cable tended to recover ground, the former now being 14 lower for the week, and the latter 1. Western and Brazilian are also 11 lower ; Brazilian Submarine, 1 ; Great Northern, 1.

MINES.-In British mining shares, the feature is a further advance of 2 in West Chiverton. Foreign are without general movement. Richmond Consolidated are 1 higher, Eberhardt have fallen 1, and St John del Rey 10.

MISCELLANEOUS.-Values show little special alteration or general tendency. Among bonds, &c., Boston City Loans are 1 higher; Roumanian Iron Bridges, 1; Share Investment Preference, 1. Among financial companies' shares, Credit Freference, 1. Among inductal companies shares, create Foncier of Mauritius are $\frac{1}{2}$ higher; London Financial, $\frac{1}{3}$; National Discount, $\frac{1}{4}$. On the other side, General Credit are $\frac{1}{2}$ lower; International Financial, $\frac{1}{4}$. There is, further, a rise of 3 in North British Australasian Land, and of 5 in Francis Canal Preference shares. The following have fallen :---Penin-sular and Oriental Steam, 3; Royal Mail, 2; British Indian Tes, 1; Darjeeling, 1; New Sombrero Phosphate, 1. BULLION.—The following is taken from the eircular of

Mesars Pixley and Abell on the transactions in bullion during the week :-

Gold .- The arrivals since our circular of last week have been ve large, about 950,000/ having come to hand, including 436,000/per P. and O. steamer from Australia, and about 380,000/ from New York. There is steamer from Australia, and about 380,000/ from New York. There is no export demand whatever, and the whole of the above will be pur-chased by the Bank of England, about 781,000/ having been already so disposed of. About 4,000/ in gold coin, was shipped per Tagus to the West Indies. 70,000 sovereigns have been withdrawn from the Bank for the Brazils, and 10,000/ was shipped per P. and O. steamer Decean, leaving Sonthampton May 20, to Singapore. Silver.—Our market is very flat and inactive, and quotations almost nominal, the nearest price being 563d per oz standard. Recent arrivals have not yet been disposed of. The Sorata, from the Pacific, brought

THE ECONOMIST.

95,000/; the Tasmanian, from the West Indies, 34,000/; and about 35,000/ has arrived from New York.

35,0007; the Tasmana, from the West Indies, 32,0007; the Jasmana, from New York.
Mexican Dollars.—About 52,0007 arrived per French steamer, via St Nazaire, and 30,0007 per Royal Mail steamer Tasmanian; the bulk of these have been sold at 56d per oz, which is the present quotation. The P. and O. steamer Deccan, leaving Southampton this day, takes 4,4807 to Singapore, 25,0007 to Hong Kong, and 10,8657 to Shanghai. Exchange on India for banks' drafts at 60 days' sight is 1s 94d per rupee. Teuders for the India Council bills were received yesterday. The amounts allotted were: to Calcutta, 478,0007; Bombay, 211,0007; and to Madras, 11,0007. Applications on all three Presidences, at Is 94d per rupee, receive 7 per cent.
Quotations for Bullion.—Gold.—Bar gold, 77s 9d per oz std; ditto, fine, 77s 10d per es std; ditto refineable, 77s 11d per oz std; ditto, States gold cein, 76s 34d per oz. Silver—Bar silver, fine, 4s 84d per oz std. nearest; Mexican dollars, 4s 8d per oz, last price.
According to the Gazette return of this evening the movement in the precious metals during the week ended May 19,

ment in the precious metals during the week ended May 19, has been as follows:-Gold-Import, 993,6731; export, 3,4601. Silver-Import, 216,8431; export, 73,1801. The The sum of 216,000l in gold was taken to the Bank to-day.

Louisiana Bonds .- At a meeting of bondholders the following

Louisiand Bonds.—At a meeting of bondholders the following resolutions were passed :— That, whilst adhering to the protest against the arbitrary reduction of principal and interest imposed upon holders of bonds of the State of Louisiana, by the provisions of the Funding Law of January 1874, the bondholders now assembled, having considered the present state of affairs, and the report of their committee, appointed at the general meeting, held in March 1874, are of opinion that the outstanding bonds be presented for conversion under protest, and that on receiving satis-factory evidence of the conversion, the Council of Foreign Bond-holders be invited to issue certificates of claim for the loss forced upon the bondholders. That the Council of Foreign Bondholders be hereby the bondholders. That the Council of Foreign Bondholders be hereby requested and authorised to adopt all measures that may seem necessary or advisable to them for ensuring the co-operation of the various committees of bondholders for obtaining a quotation of the certificates of claim upon the various stock exchanges and bourses, and to incur e necessary expenses. New South Wales Government Debentures.-The bank of New

South Wales, as agents for the Government, have given notice that they will pay, on the 1st proximo, the principal sum of the debentures and coupons falling due that day issued under Acts Nos. 4 and 5 Victoria, 29.

RAILWAY COMPANIES.

RAILWAY COMPANIES. Eastern Bengal.—The surplus profits for the half-year ended. December, after paying guaranteed interest, were 10,472, from which the Government has required 14,414 rupees to be set aside to meet extraordinary renewals of ballast. The set aside to meet extraordinary renewals of ballast. The company's moiety is 4,570l, which will allow of a dividend at [CONTINUED ON PAGE 620.]

THE ECONOMIST.

[May 22, 1875.

[CONTINUED FROM PAGE 617.]

the rate of 4s per 100%, in addition to the usual 5 per cent. guaranteed. The gross revenue, when compared with the corresponding period of 1873, shows an increase of 11,829%; and the gross receipts for the first 14 weeks of the current half-year were 82,337%, comparing unfavourably with 121,147% at the same time last year, when the increase was, however, partly owing to grain carried in connection with the famine. It is mentioned that 5 per cent. debentures amounting to 166,950% became due in November, of which only a small por-tion were renewed for tan years at 4 per cent. Besolutions 166,950/ became due in November, of which only a small por-tion were renewed for ten years at 4 per cent. Resolutions will be proposed at the meeting authorising the re-borrowing of the amount of the debentures paid off, or to raise it by the issue of shares or debenture stock.

Eric.—A telegram has been posted in the Stock Exchange from Mr Jewett, president of the company, purporting to give an epitome of the report just drawn up by him. He gives no reason for stopping the publication of the monthly traffic returns, &c., but states that for the nine months to April 1st, the decreased gross carryings were \$2,082,113, decreased or the decreased gross earnings were \$2,082,113; decreased ex-penses, \$1,717,108; and decreased net earnings, \$365,004. It is also stated that in consequence of the depressed condition of the trade of the country, and the largely reduced rates caused by competition between two leading trunk lines, increased earnings have been rendered impossible. Reasons are given for not recognising the lease of the Atlantic and Great Western line to the Eric, among others that the Atlantic and Great Western accounts, upon which it was based, omitted important charges to revenue, by which the net revenue would have been reduced to much less than 28 per cent. of the gross earnings. Mr Jewett states that he has faith in the value of the property, and confidence in its future if, when business is restored, means are taken to pay the floating debt, thereby decreasing the expenses, and also to secure a permanent management in whom the shareholders have confidence, and to whom they will give the requisite material and *financial* aid. He considers that if this course is taken there is no to whom they will give in this course is taken there is no aid. He considers that if this course is taken there is no doubt of the line being able to realise the expectations of its owners, but that otherwise the end will be disastroms. Mr Jewett concludes by inviting procies in favour of two gentle-mon, he names, who he states will carry out whatever views may be indicated with regard to the future organisation of the board. The London Banking Association deny a state-ment in the telegram to the effect that there is "a balance of 508,431*l* in the hands of the London Banking Association and Mr James M'Henry to meet claims which cannot be recognised Mr James M'Henry to meet claims which cannot be recognised by [Erie] Company." Erie-Second Consolidated Mortgage 7 per Cent. Sterling Bonds. -Messrs M'Culloch and Co. announce that they will be pre-

pared to pay the coupons, due 1st of June, at their counting-house on that date.

Great Northern .- The directors are prepared to receive Great Northern.—The directors are prepared to receive tenders for the construction of a new tunnel, running parallel with the existing tunnel under the Metropolitan Cattle Market, also for the construction of 50 new locomotives. Madras.—The directors have made a call of 51 per share on the new 201 shares, payable on the 28th June. Riga-Dunaburg.—The numbers are published of 208 obliga-tions, which have been drawn for repayment on the 13th July here, here repayment on the 13th July

here, by Messrs Robinson and Cottam.

BANKS.

Anglo-Egyptian Banking.—At the meeting, an interim dividend was declared at the rate of 10 per cent. per annum, or 1*l* per share for the six months ended 28th February.

share for the six months ended 28th February. Anglo-Hungarian.—At an informal meeting, the proposition by the Pesth directors to make a call of 10 florins per share was generally accepted, the alternative being liquidation, which would necessitate a call of 5 florins, while at the same time leaving little prospect of any return in the future. It was arranged that, if the business be continued, and the present London divergence its transactions at Pesth London directors remain in office, its transactions at Pesth will be limited to sound banking operations, carried on in the presence of a co-manager, to be appointed on behalf of the English shareholders.

Bank of Rotterdam.—The balance sheet for the year ending December, 1874, shows that the sum of 276,157f 50c was paid as a three per cent. dividend, free of taxes. Balance to new account, 1,320f 33c.

City and County Bank, Limited.—This undertaking has sus-pended payment, with liabilities amounting, it is stated, to about 96,000!. Of the capital of about 60,000!, only about 00,000! of the capital of about 60,000!, only about 25,0001 is paid up. A dividend was paid for the half-year ended 31st December, at the r te of 7 per cent. per annum. A lock-up of capital, and the failure of certain arrange-ments for the transfer of the business, is stated to be the

ments for the transfer of the business, is stated to be the cause of the failure. *Deutsche.*—The report states the net profits for 1874 at 1,219,488 thalers, of which the directors recommend to appro-priate T750,000 to the payment of a yearly dividend at the rate of 5 per cent. per annum, and to add the remaining T469,488 to the ordinary and special reserve funds, which will then stand at T780,523.

Provincial of Ireland.—At the meeting, the accounts showed a net profit, which enables the directors to declare a dividend at the reduced rate of 18 per cent, per annum. During the past six months a heavy loss, estimated at 75,000/, has been sustained in consequence of the failures of several firms in the North of Tabada are not firm and firms in the North of Ireland engr ged in the linen and flax spinning trades; but it has been defrayed out of the "rest," and also to the extent of 32,200/ from a fund set aside in previous

years to meet any unforeseen misfortune. Standard of British South Africa.—At the meeting, the re-solutions altering the articles of association, passed on the 30th April, were confirmed. ASSURANCE COMPANIES.

ASSURANCE COMPANIES. General Expenditure Assurance.—The directors have declared an interim dividend at the rate of 10 per cent. per annum. National Mutual Shipping Assurance Association, Limited.—Vice-Chancellor Sir R. Malins has appointed Mr James Cooper, of Johnstone, Cooper, Wintle and Co., official liquidator, in place of Mr George Whiffin, resigned. MISCELLANEOUS COMPANIES. Anglo-American Telegraph.—The transfer books of the "Trust Fund of the Anglo-American and New York, Newfoundland, and London Telegraph Companies," will be closed on the 24th inst., preparatory to the distribution of the trust fund.

inst., preparatory to the distribution of the trust fund. City of London Real Property.—The directors recommend, from a balance of 16,672l (including the amount brought forward), a dividend of 6 per cent. for the year, of which an interim dividend of 2 per cent. has been paid, leaving 2,310l. Hong Kong and China Gas.—A dividend has been declared,

Hong Kong and China Gas.—A dividend has been declared, at the rate of 12 per cent. per annum. New Zealand Trust and Loan.—An extraordinary meeting is called for the 2nd June to authorise an increase of capital from the existing 500,000/ to 1,000,000/, part of which increase may be issued in preference shares of 25/ each. San Paulo Gas.—At the meeting, a dividend at the rate of 5 per cent. per annum was declared, in addition to one of the same amount paid for the half-year ended June last year. Trust and Agency of Australasia.—It is stated that the avail-able balance, while more than sufficient to pay the dividend, will not provide for the current year, it is proposed to appropriate 4,000/ from reserve. A dividend and bonus, equal together to 3s per share, is accordingly recommended, free of income tax, making with the interim payment a total distribution for the twelve months of 4s per share, or 20 per cent, and leaving 294/. cent., and leaving 2941.

cent., and leaving 2944. Trust and Loan of Canada.—The report for the half-year ended 31st March shows that the available balance, including 2,923t brought forward, is 23,499!, from which a dividend at the rate of 8 per cent. per annum and a bonus of 1 per cent. are recommended, and 7,449! is proposed to be added to the reserve fund, making it 117,832!. This leaves 2,299! to be carried forward. During the above period the reserve fund has been charged with 420! for losses on realisation of securi-ties. ties.

MINING COMPANIES

MINING COMPANIES. New Quebrada.—An agreement has been made with the Bolivar Railway Company for a tentative alteration of the terminus from Brava Island to Tucacas. The railway works are progressing, the earthworks being, it is believed, com-pleted to a point nearly 35 miles from the coast. The last advices from the mines "are that the opening of the mine has so far advanced as to admit of the extraction of a consihas so far advanced as to admit of the extraction of a consi-

derable supply of ore." New Zealand Quartz Crushing and Gold Mining, Limited.--Creditors are requested to send in their claims by the 21st June.

St. Just Amalgamated Mining, Limited.—An order has been made for the winding-up, and Mr F. Warwick has been ap-

made for the winding-up, and Mr F. Warwick has been ap-pointed official liquidator. *Vancouver Coal Mining and Land.*—An available balance is shown of 3,528*l*, and it is recommended that in view of the satisfactory prospects of the undertaking, 602*l* shall be taken from reserve to make up the necessary amount for a dividend for the half-year at the rate of 10 per cent. per annum. The output of coal during the six months was 22,175 tons, and the quantity shipped and sold was 18,283 tons.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Prices in the grain trade have again given way a little. There is nothing in the weather to complain of, the desired rain having fallen this week, and the trade is settling down, so gradually as to excite some surprise, into a state of low prices corresponding to the present ample supplies and fine agricultural prospects. This appears to be the only tendency which can be detected in the value of wheat more especially. Consumption is no doubt large this year, the scarcity of feeding-stuffs, together with the low price of wheat, having brought the latter into increased use; but foreign wheat is arriving freely, and the promising appear-ance of the growing crops is an inducement to bring forward home supplies. Shipments from America, excepting Cali-fornia, are not keeping up, but supplies from continental and so gradually as to excite some surprise, into a state of low fornia, are not keeping up, but supplies from continental and Russian ports show every sign of making up for any such falling off. The trade, on the whole, appears little likely to show much movement in either direction unless the weather becomes adverse. Mr Beerholm's Corn Trade Review states that the existing chances of some decided shortcoming in the crop in California or in the United States, or in both, are amongst the elements which might produce a sudden change in the trade, as speculation is doubtless liable to become very animated in the States, from whence so large a proportion of our supplies had been derived during the last few years.

our supplies had been derived during the last few years. Manufacturing trades have been so much interfered with by the Whitsuntide holidays, that business in the markets has been very nominal. A good tone is reported in cotton never-theless, the Manchester market showing firmness for goods and yarns alike. In wool, prices for colonial are maintained, but home-grown is only kept firm in value by the low stocks in users' hands, purchases being deferred to a large extent until the new clip comes freely on the market. Employment in the woollen districts appears to be fair, except at Bradford. Thence complaints of dull demand are reported as very bitter, especially in the piece trade, where there is extreme difficulty especially in the piece trade, where there is extreme difficulty in obtaining large or remunerative orders; spinners are re-ceiving few new orders, and prices are a little weak. The linen trade still shows firmness and activity in consequence, apparently, of the increased dearness of the flax markets at home and abroad. Jute remains a weak spot in the manafacturing system.

Whatever dulness was apparent in the iron trade hitherto, has been increased by the holidays this week. In the north of England easier prices for forward delivery are quoted, and prices in many cases are a shade weaker, although the special depression resulting from recent financial mishaps has passed away. In South Staffordshire the makers of bars find

THE ECONOMIST.

[May 22, 1875.

themselves undersold by Welsh and North of England makers, and quotations are there also lower for the week. These concessions, resulting mainly from cheaper pig iron and coal, have brought out more inquiry, and the orders received in most of the main and minor districts are on the whole less

in most of the main and minor districts are on the whole less scanty, if scarcely more profitable, this week. The markets for imported produce have shown little move-ment during the past week, business being broken by the holidays. Sugar shows little change; business has been limited in the market and in cargoes afloat, as also in refined descriptions. Coffee, except Brazil kinds, which are at pre-sent in good supply at the ports and afloat, has been in spirited demand, apparently in anticipation of small crops in Java and Brazil. Tea and rice dull. Metals quiet, but Chili copper and Straits tin are sustained in price, the latter showing a rise. rise.

EXTRACTS FROM TRADE CIRCULARS.

EXTRACTS FROM TRADE CIRCULARS. (From Messrs W. Nicol and Co.'s Weekly Overland Circular, dated Bombay, April 24.)—Cotton—Dealers, accepting the situation less reluctantly than heretofore, have been free sellers at prices 3 rs to 5 rs per candy under those quoted in our last circular. Arrivals by rail and sea are heavy, and the upward movement in sterling exchange necessarily reduces the first cost which shippers are enabled to pay. Quality— Some very nice parcels of machine-ginned Broach are still obtainable, but the average of what is offering is only about "good fair." Dhollera descriptions are failing rapidly in quality, and, in a very short time, "good fair." will be the highest classification obtainable. Imports, &c.—Following are the figures for the week, viz. : are the figures for the week, viz. :-

| | 1874. bales. | 1875. bales, | |
|-----------------------------------|-----------------|-----------------|--|
| Total clearances from January 1st | 577,417 | 658,779 | |
| Receipts during week | 76,796 | 68,214 | |
| Exports ditto | 70,628 | 54,221 | |
| Afloat in harbour | 137,726 | 105,179 | |
| Estimated stock | 98,457 | 69,603 | |

clusively confined, and the scarcity of coarse Taysaams is some-what felt. There is no alteration in the position of other Asiatic silks, business being limited and prices unchanged. The first private telegrams from China, respecting the new crop, have just come to hand, and report a probability of the quantity being about the same as last season. From the South of Europe, the reports of the crop are so far favourable, but the result cannot be known for another fortnight at least. Deliveries are good, and consumption of silk goods on the increase. The clearances of silk from the 1st to the 19th instant have been 2.804 hales.

increase. The clearances of sik from the 1st to the 1st in instant have been 2,804 bales. (From Messrs Mohr Brothers' Rice Circular, dated Akyab, April 20.)—A further rise in prices has taken place in the Rangoon market, but shippers here firmly hold out for the old rate, notwithstanding that the requirements for the tonnage in port are most pressing and a considerable number of in port are most pressing, and a considerable number of vessels is again on demurrage. The holidays are now over, and as the stocks in the interior are still very considerable, it is generally expected that the growers will sell freely, and even the native speculators, in face of the firmness of shippers, show signs of willingness to realise their stocks. The tonnage loading amounts to 44,214 tons, against 13,300 tons in 1874, and 15,400 tons in 1873; and exports to Europe have reached 64,700 tons, against 80,000 tons in 1874, and 86,000 tons in 1873.

(From Messrs William Moran and Co.'s Indigo Report, dated Calcutta, April 23.)—We have heard of some factories in Jessore having, since our last report, had rain; but gene-rally throughout Lower Bengal it is anxiously looked for, and if within the next few days there is not a good fall, sowings cannot be completed. We hear of some factories proposing to break up lands, but it is very doubtful, if rain falls within the next few days, if such sowings could be successful. Ac-counts from Tirboot, Champarun, and Chuprah continue good, but rain would now be accentable in these districts also. but rain would now be acceptable in these districts also. Ex-ports of indigo from November 1 to 21st instant: - To Great Britain, 12,812 cheats 48,985 maunds; total, 20,626 chests

78,551 maunds. (From Messrs M. Clark and Co.'s Wine Circular, dated May 12.)—The market for wines and spirits has been dull since our last report. The Board of Trade returns for April show a considerably increased home consumption of all deshow a considerably increased noise consumption of all de-scriptions of wines as compared with same month of 1874, the specially large increase in ports affording a gratifying proof of the extension of this branch of our commerce. Dealers, however, still restrict purchases to actual requirements, pre-ferring to work on small stocks, and take their chance of the

future course of prices. Brandies are without material altera tion, and we do not see any feature that is likely to improve quotations. Home consumption continues to increase steadily each month.

COTTON TRADE. THE

LIVERPOOL-MAY 20.

The cotton market, which closed firmly last week, opened after the Whitsuntide holidays with steadiness, but with a limited business, quotations remain unchanged. In Sea Island the sales have been restricted, but at firm prices, and the Island the sales have been restricted, but at firm prices, and the lower grades of Florida are rather dearer. American has been in moderate request, without change in prices. In Brazilian a small business has been done at last week's quotations. Egyptian has been in limited demand at last week's quota-tions. In West Indian and Peruvian the business is small at previous rates. East Indian continues to be freely offered, and last week's quotations are barely maintained. In cotton " to arrive" and for future delivery the transac-tions have been limited, with a decline of $\frac{1}{16}$ d per lb. The sales of the week (four days) amount to 38,360 bales, of which 2,080 are on speculation, and 4,650 declared for export, leaving 31,630 bales to the trade. Forwarded this week 5,030 bales, of which 2,850 are American, 660 Brazil, 570 Egyptian, and 950 bales Surat. MAX 21.—The sales to-day will probably amount to about 8,000 bales, the market without change. PRICES CURRENT.

In speculation there is an increase of 28,520 bales. The imports this week have amounted to 70,366 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to date) is 135,000 bales, against 238,000 bales at the corresponding period last year. The actual exports have been 6,531 bales this week.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, May 20 .- We have no information to furnish of any importance relating to our markets for this week, the period being observed as a general holiday. Where any inquiry, however, has been made, prices have been steadily maintained, and we have every expectation that upon resumption of business, a fair trade will be concluded.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

anticipating a larger and better assortment from the new clip, and to be watching the course of the market. The piece market is very tame. Some fair orders have been placed, especially on French account, for next spring. Prices are without change.

LEEDS.—Work is stopped at the mills, and many of the largest warehouses are closed. A good prospect seems to be held out to the clothiers, and it is quite certain that higher prices will have to be demanded so long as wool, labour, and tuel keep at the present extreme rates.

ROCHDALE .- The market was thinly attended. Manufacturers are pretty well engaged on orde

NOTTINGHAM.—Owing to the Whitsuntide holidays, many of the factories have been entirely closed. The lace trade is quiet, the principal demand being confined to cotton fancy goods for trimming purposes and curtains.

MIDDLESBOROUGH .- Owing to the Whitsuntide holidays there was a smaller gathering than usual at the market. Fresh orders have lately been secured for rails, and a large number of puddling furnaces and another rails, and a large number of puddling furnaces and another rail mill are to be started. There is now a good breadth of work in the rail trade of the North of England in hand. There has been a fair supply of orders for plates and bars, and some of the firms are well off for work.

BIRMINGHAM.—Work is nominally resumed at the iron mills and forges, but little will be done this week either in the coal or iron trades. There was only a limited attendance at the weekly iron market. Prices were not quotably changed, but unmarked bars in some instances were slightly easier. Marked iron is steady and in somewhat improved request.

WOLVERHAMPTON .- Offers of South Wales and North of England iron were freely made on 'Change, at 5s per ton under the latest figures for which Staffordshire iron could be bought. Welsh and Cleveland bars were both quoted at 8l 5s bought. Welsh and Cleveland bars were both quoted at 84 bs delivered in Wolverhampton. Some South Staffordshire bars were to be had at 2s 6d under the prices declared by makers last week.

BELFAST.—Flax—Demand for both home and foreign flax continues good, and prices are firm. Linen yarns—The im-provement which has lately set in continues, and a brisk business has been done on both home and export account during the past week, so that stocks in spinners' hands have become much reduced, and they refuse now to sell under an advance of 11d per bundle for fine welft lines. Not much doing in tow yarns, but prices keep steady.

DUNDEE.—The unsettled feeling produced by the recent failures has to some extent disappeared, but there is no general improvement in business. A reduction in the wages, and considerable further stoppage of machinery has been made in the jute branch. The flax market continues very steady. Accounts from the continent and Ireland, about the growing flax crop, are more favourable. Linens not so active as could be wished, although manufacturers are still fairly employed.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS. NEW YORK-May 7.

The flour market has shown an upward tendency during the past week, and a pretty general advance in prices has been established. Receipts have been small, and the production of local mills has been curtailed somewhat. The business for export to Great Britain has been checked by the advance and by the scarcity of suitable grades, but there has been a good business for the West Indies and South America, while a brisk inquiry from the provinces was the principal cause of the advance in extreme low grades. Crop accounts have been various and contradictory; many of them evidently were put forth for speculative purposes. The situation, on the whole, however, is not so favourable as one year ago-not for winter wheat, nor spring wheat, nor the California crop. The wheat market has been very dull. The milling demand and shippers have pertinaciously held off, though favoured by low ocean freights, and a good market for exchange. The offerings on sale have, however, been quite small, and fluctuations have not been great. Receipts show some increase, and the visible supply a moderate accumulation. Indian corn has been drooping. Rye more active and firmer. Oats latterly dull and weak, stocks being pretty large at this point, and receipts at the West so liberal as to dispel all apprehensions that any scarcity will be felt during the summer months. The following are the closing quotations :-Flour: Superfine

scarcity will be felt during the summer months. The following are the closing quotations :—Flour : Superfine State and Western, \$4.85 to \$5.10 ; extra State, &c., \$5.20 to \$5.50; Western spring wheat extras, \$5.20 to \$5.60; ditto winter wheat X. and XX., \$5.85 to \$8.25; city shipping extras, \$5.40 to \$5.90; city trade and family brands, \$6.25 to \$7.75; Southern bakers' and family brands, \$7.25 to \$8.25; Southern shipping extras, \$6.00 to \$7.00; rye flour, superfine, \$5.10 to \$5.40; corn meal, Western, &c., \$4.10 to \$4.40 per brl.

THE ECONOMIST.

Wheat, No. 1 spring, \$1.27 to \$1.31; white, \$1.40 7. Corn, Western mixed, 88c to 90c. Rye, \$1.00 to Oats, mixed, 73¹/₂c to 76c. Peas, Canada, \$1.20 to Grain : \$1.47 to \$1.4 \$1.08. \$1.40 per bushel.

The visible supply of grain, including the stocks in granary at the principal points of accumulation, at lake and sea-board ports, and in transit by rail, May 1, 1875 :--

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARE LANE, FRIDAY EVENING. With continued fine weather for the growing crops, the With continued nne weather for the growing crops, the trade in every department shows prolonged heaviness, and a further downward tendency in the value of all kinds of grain. Wheat is still sent forward freely by home growers, and the imports of foreign into the United Kingdom are large. Prices have, during the week, further reached 1s per qr in most of the provincial markets, but at Mark lane, where the receipts are comparatively light, no per qr in most of the provincial markets, but at Mark lane, where the receipts are comparatively light, no actual decline can be quoted, although the bias of the trade is in that direction. English ranges up to 45s for white and 43s for red. Moderate foreign supplies offering here comprise Dantzic white wheat at 45s to 48s; red at 43s to 44s; Konigs-burg white, 45s to 47s; red, 43s to 44s. Lower Baltic prime red, 47s to 48s; inferior grades, 44s to 45s. American spring, good, 45s to 46s; common, 42s to 43s, with a small sprinkling of Australian at 44s to 46s for white and 40s to 42s for red. From the continent the quotations come firm, and leave as a rule but little, if any, profits upon shipments to this country at but little, if any, profits upon shipments to this country present current rates. Dantzic letters mention a demand for the interior of Germany, as drawing supplies from that port that might otherwise be directed to this market. The floating trade has been equally dull with that on the spot, and the limited business done establishes a further decline of 1s per qr. Milwaukie arrived has sold at 41s 9d down to 41s 3d. Californian at 45s and 44s 9d usual terms. In wheat, on passage, or for shipment, there is next to nothing doing, Flour remains neglected, and to sell lower rates would

have to be taken. Almost all descriptions of feeding stuffs are adversely affected in the London market by the continued depression in the value of oats, which since Friday last have depression in the value of o ats, which since Friday last have further given way 1s 6d per qr, making a fall of 8s or 9s from the high rates that were obtained a short time back. To-day common light Russian, of which the full supplies on offer almost entirely consist, were sold as low as 20s 6d to 20s 9d per 304 lbs. Feeding barley is an extremely dull sale. Malting descriptions are also difficult to move. Maize also droops in value and hange on hand. Beens in most markets have sized value and hangs on hand. Beans in most markets have given way 1s per qr. Peas continue comparatively well supported.

COLONIAL AND FOREIGN PRODUCE MARKET 4. TRANSACTIONS OF THE WEEK.

[May 22, 1875.

FOR REPORT OF THIS DAY'S MARKETS SEE POSTSCRIPT. MINCING LANE, FRIDAY EVENING. SUGAR.—The market has not experienced any further alteration, being rather quiet, but a steady demand continues to prevail for refining qualities of West India, the importers selling freely, and occa-sionally at easier rates. Crystalised sorts are dull. Including the various parcels by auction, 1,788 casks sold on Tuesday and yesterday. Barbedose 20s to 22s.

Jaggery.-2,500 bags reported sold at 16s 9d. Natal.-706 bags part sold at 19s to 22s 6d.

Egyptian.—421 bags were taken in above the value. Other Foreign.—494 casks 113 barrels Porto Rico were taken in at 22s to 24s for low to middling yellow of the new crop, and a part since sold at 21s 6d to 23s 6d.

sold at 21s 6d to 23s 6d. Floating Cargoes.—One of Havana: 370 casks 400 boxes grainy at 25s, with 290 casks molasses sugar at 20s: one Trinidad de Cuba: 804 casks 50 barrels at 22s, without guarantee; one of Tobago at 21s 3d, all for ports of the United Kingdom. Refined.—Dry goods continue quiet. Common titlers, 29s 6d to 30s. Save laware have sold for Java at the reduced price of 29s; other fine

Say's loaves have sold for Java at the reduced price of 29s; other fine loaves at 28s 6d. Pieces dull. Clyde crushed has been unaltered. RUM.—Several sales have been made in West India, including Jamaica, at 4s 1d to 4s 8d, as in quality. Demerara at 2s 2d to 2s 3d proof; Leewards, 2s 1d; brown, of superior quality, at 2s 3d to 2s 4d; Surinam at 2s 1d per proof gallon.

Jamaici, at 28 10 to 48 50, as in quarty. Denserara at 28 20 to 28 50 proof; Leewards, 28 1d; brown, of superior quality, at 28 3d to 28 4d;
Surinam at 28 1d per proof gallon.
MOLASSES.—No sales reported in West India. 330 casks Australian, ex sales, sold at 14s 6d per cwt.
COFFEE.—The Dutch sale on Wednesday having gone rather above valuations, viz., 56 ic to 56 c for good ordinary Java, this market continues steady. Further arrivals have increased the rather heavy stock in first hands. At the public sales 1,462 casks 83 barrels 919 bags plantation Ceylon chiefly found buyers: low middling to middling colory, 103s to 108s; good to fine bold, 108s 6d to 114s 6d; pale and grey, 102s to 106s; bold, 106s 6d to 168s. There have not been any public sales of native. S casks 17 barrels 1,266 bags Jamaica chiefly sold: ordinary to fine ordinary, 84s 6d to 90s. Foreign descriptions do not find roady buyers, especially common kinds. The chief part of 6,705 bags by auction was taken in or withdrawn. Some few parcels Costa Rica sold at 95s to 101s 6d; Guatemala, 91s to 104s 6d. 2,559 bags kiln-dried coffee, salvage per Border Chieftain from Colombo, withdrawn. A cargo of Brazil has sold at 83s 6d per cwt for a near port. port.

COCHINEAL.—The market is without improvement. 668 bags Tene-riffe, by auction, about half sold, at last sale's prices. Silver, Is 8d to 1s 11d; black, 1s 8d to 3s 6d. 136 bags Honduras part found buyers. Silver, 1s 6d to 1s 11d; ordinary blacks, 1s 10d to 1s 11d per 1b, being rather easier rates.

OTHER DRYSALTERY GOODS .- Several sales have been made in Gambier, at 25s 3d to 25s 6d, in various positions, including some to arrive. Business in Madras turmeric at 21s 6d. Transactions on other articles continue upon rather a limited scale. Some cutch ex recent sale has sold at 23s 3d to 24s for good quality. 360 cases China galls part sold at 52s 6d per cwt.

SHELLAC.—There were not any public sales to yesterday. By private contract, business reported in D C orange at 13/ 15s per cwt. The market is rather pending some public sales to-day. METALS.—There has been a quiet market this week, and transactions

METALS.—There has been a quiet market this week, and transactions generally upon a moderate scale. During the past two days rather more business reported in copper. Chili at 82/ to 82/ 10s, including some to arrive. Yesterday the market was dull. Burra' has sold at 87/ 10s. No change in English. English lead snpports the late advance but is quiet. Sales of Silician spelter has been made at 24/and 24/ 7s 6d, May to June in warehouse. The iron markets do not present any new features, either as regards demand or prices, excepting for Secteh nic which is lower. Latest sales reported at 63s to 63s 6d per Verter as set. new features, either as regards demand or prices, excepting for Scotch pig, which is lower. Latest sales reported at 63s to 63s 6d per ton cash. A few sales have been made in Straits tin during the week at 82/ to 82/ 10s, and in Australian at 81/ 10s to 82/. Yesterday the market was more active. Business done in the former at 82/ 10s to 83/. Quicksilver 12/ per bottle. 145 tons sheet zine rolled at the London Docks, chiefly sold at advanced rates, from 27/ 10s to 27/ 12s 6d per ton. HAMP.—There has been a very limited business in Manila by private treaty. Of 369 bales by auction, about 300 bales were taken in. 69 bales brown realised 28/ 10s to 28/ 15s. 480 bales other kinds were bought in. 369 bales Sisal part sold at prices not given. The remainder taken in at 26/ to 30/ per ton.

taken in at 26l to 30l per ton.

taken in at 267 to 307 per ton. JUTE.—Transactions on the spot and to arrive have been upon a small scale, and the market is dull. The Dundee reports with reference to markets do not present any new features. Jute and manufactures remain dull. The reduction in the works has made further progress.

remain dull. The reduction in the works has made further progress. Ons.—There has not been any new feature to report in olive, and the market is quiet. Sperm can be bought at 107/ per tun, recent arrivals chiefly held by the trade. Palm inactive. Fine Lagos, 34/ 10s. No change in cocoa-nut, and transactions have been moderate in extent. The market for linseed oil is lower, and rather dull. Quotations on the spot, 25/ to 25/ 2s 6d; May to June, 25/ 5s; last six months, 25/ 10s to 25/ 15s. Rape steady. English brown, 30/ to 30/ 5s; June to August, 30/ 15s; last four months, 31/ 15s to 32/. Refined, 32/ to 32/ 10s; foreign, 33/. English refined lard cil can be bought at 70/ per ton. PETROLEUM OIL firmer at 9d on the spot, and 10gd to 10gd per gallon, paid for delivery in the last four months. SFIRITE TURPENTINE.—On the spot American sold at 23s 6d. Quo-

SPIRITS TURPENTINE -On the spot American sold at 23s 6d. Quo-tation for the last six months, 23s 6d to 24s per cwt.

LINSEED.—A rather unsettled market. Calcutta has sold to arrive at 52s 6d to 53s 3d, according to date of shipment, being lower. Bombay to arrive at 54s 3d. No change in seed on the spot. Bombay quoted 55s to 55s 6d. A cargo of Azov, June to August shipment, has sold at 54s per quarter.

TALLOW.—A quiet tone pervades this market. Petersburgh new quoted 43s 6d this month and June. The fall in the price of English tallow was report d last Friday. A moderate supply of Australian at to-day's public sales.

POSTSCRIPT.

POSTSCHIPT. FRIDAT EVENING. SUGAR.—The market closes with a quiet appearance. 1,092 casks West India have sold. Crystalised by auction at easier rates. The week's business is 2,881 casks. 4,326 bags Egyptian, 600 bags Bengal, 510 bags Natal, 491 bags Martinique, and 1,316 bags French beet were taken in. 502 bags Mauritius, part sold at 20s for brown Muscovado. 200 bags powdered French refined were bought in at 28s. By private contract 1,200 bags brown Penang sold at 16s 6d per cwt.

at previous quotatio to 104s 6d per cwt.

RICE closes firmer. 30,000 bags Bassein sold at 8s 3d each

SHELLAC.-677 chests, barely half sold. Garnet at 8/ 15s, went 5a lower. Other kinds at easier rates. Good second orange at 12/ 5s to 12/7s 6d. Native livery orange, 10/ 5s. Fine orange bought in at 14/ per cwt.

DRYSALTERY GOODS.-720 mats cube Gambier were taken in at 42s to 3s per cwt. 112 bales Bengal safflower sold at easier rates, including

ADDITIONAL NOTICES.

ADDITIONAL NOTICES. TEA.—The market is very dull and hardly any business has been done since the holidays. Accounts have been received from China, announcing the opening of the new season at Hankow, on the 12th inst. (7 days earlier than last year). The steamers with the crop of 1875-1876, may therefore be expected about the 10th of July. Prices are reported to be considerably higher than last year. Day Faur.—The inactivity which has characterised the past few weeks is still prevalent and no further change has taken place in

DRY FRUIT.--I he machivity which has characterised the past few weeks is still prevalent, and no further change has taken place in prices, good fruit at 31s being if anything, rather firmer. Pyrgos is still offering at 26s, but at this price even very little business is re-ported, and shipping orders seem to be very scarce. Muscatel raisins are in favour, as are Valencias, at late rates. The market is now bare of figs. All Turkey fruit is, however, well held. ENGLISH WOOL.--Rather a better feeling for skin wools, half-bred and long wools neglected.

and long wools neglected.

COLONIAL WOOL.—The public sales are not quite so well attended owing to the holidays, but prices are the same. SILK.—Coarse silk is still in good demand, and realises firm rates. There is also a very large business doing in thrown silk, the stock of

which is much reduced.

SEEDS .- The trade has ruled inactive during the past week, and quotations are unaltered.

FLAX remains in a very quist state. HEMP.—Russian without alteration, and very little passing in Manila. HEMP.—Kussian without alteration, and very little passing in Manila. TOBACCO.—There has been a trifle more demand for American tobacco during the past week, but the transactions are of a very limited character. Large sales would have been effected for exportation, had there been a better selection in the market. At present the supplies of all classes are very limited. Holders remain firm at full prices, and show no inclination to submit to the most trifling concessions. In other qualities a fair business has been done at full prices.

METROPOLITAN CATTLE MARKET.

METROPOLITAN CATTLE MARKET. MONDAY, May 17.—The total imports of foreign stock into London last week amounted to 16,439 head. In the corresponding week in last year we received 15,990; in 1873, 18,571; in 1872, 18,387; in 1871, 21,223; and in 1870, 8,961 head. The cattle trade has been rather quieter, owing in some measure to the holiday. The supplies have been tolerably good, and have included some well-conditioned stock. From our own grazing districts tha receipts of beasts have been on a fair scale, and the condition being generally satisfactory, the actual weight of meat exhibited has been good. There has been less firmness in the trade, and difficulty has been experienced in realising last Monday's quotations. The extreme price for the best Scots and crosses has been 6s per 8 lbs, but 5s 10d per 8 lbs has been frequently accepted. From Norfolk, Suffolk, Essex, and Cambridgeshire we have received about 1,800, from other parts of England, about 250, and from Scotland, 107. On the foreign side of Cambridgeshire we have received about 1,800, from other parts of England, about 250, and from Scotland, 107. On the foreign side of the market there has been a moderate supply, including about 400 Dutch and 450 Danish. The domand has been less active at about late rates. In the sheep pens there has been a fair show, about 14,000 foreign being included in a total supply of some 27,000. The position of the market remains much the same, the demand ruling quiet at about late rates. The best Downs and half-breds have sold at 68 86 to 68 100 per 90 being here here here been in fair results and best breds to 6s 10d per 8 lbs. Lamba have been in fair request, and best breeds have made 8s 6d per 8 lbs. Calves have been dealt in to a moderate extent on former terms. Pigs have been quiet. At Deptford there have been 200 German beasts.

HUBBUCK'S PATENT WHITE ZINC PAINT

INCLUSION S FAILINI WHILE LINC FAINT Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper in use than White Lead Each Cask of Pure White Zinc is stamped—"HUBBUCK'S, LONDON, PATENT." HUBBUCK'S PALE BOILED OIL Being much purer than raw linseed oil, is the only boiled oil that can be used for White and delicate coloured Paints. It dries quick and hard, never blisters, and is more durable.

HUBBUCK'S ANTI-OXIDATION COMPOSITION For Coating Iron and Wood Ships' Bottoms: a preservative against fouling and corrosion. This composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

BUCK'S WHITE LEAD, COLOURS, OILS, AND VARNISHES Are the best and therefore the Cheapest, and are properly packed for Exportation to all Climates. HUBBUCK'S

GREAT IMPROVEMENT IN SPECTACLES.

"NATALINE PEBBLES."

Mounted in Abyssinian Gold Frames, equal in Appearance TO REAL GOLD.

1870. PRIZE MEDAL,

Price 15s 6d per Pair, Forwarded on receipt of P.O.O., payable at Holborn Viaduct. Persons suffering from Weak or Defective Sight will find great relief by wearing the New Speciacles, consist-ing of a brilliant Pebble of high polish, called "NATALINE," which possesses qualities so long needed-LIGHTWESS, ABSENCE of COLOUR and GLARE-which render the wearing of Spectacles no longer an inconve-mience, but an ornament.

Amongst numerous letters of a similar description in their possession, Mesars L. & A. Pyke select the following : [COPY.]

[COPY.] GENTLEMEN,—My old glasses and those supplied by you have come to hand. For the latter I have to tender you my best thanks. I sen truly happy in having found at last, after years of quest, in absolute perfection, all that I could desire in lens and frames. The frames are easy, comfortable, and secure—perfectly luxurious t. wear—and the glasses are cool and glareless. I hope the use of these new pebbles, by those affected with impaired sight, will become as universal as they deserve.—I remain, Gentlemen, yours most obliged. J. KIEKEY (Officer of Inland Revenue).

SOLE MANUFACTURERS AND INVENTORS,

SHIRTS.-FORD'S "EUREKAS." The most perfect-fitting made; double-stitched work, never comes undone. Six for 45s. Illustrated catalogue, with self-measure, post free. Richd. Ford and Co., 41 Poultry; branch 308 Oxford street, London

and Co., 41 Poultry; branch 305 Oxford street, London HOLLOWAYS OINTMENT AND PILLS, —Dyspepsia, Jaundice, —These complaints are the result of a disordered liver, which secretas bile in quality or quantity, incapable of digesting food. Diger-tion requires a free flow of healthy bile, to insure which Holloway's pills and ointment have long been famous, far eclipsing every other medicine. Food, irregularity of living, climates, and other causes, are constantly throwing the liver into disorder, but that important organ can, usder all circumstances, soon be regulated and nealthity adjusted by Holloway's pills and ointment, which act directly upon its wital secreton. The oint-ment, tubbed upon the skin, penetrates immediately to the liver, whose blood and nerves it rectifies. One trial is all that is needed, a cure will soon follow.
