## INTRODUCTION

This annual publication brings together comprehensive data collected by county and State Agricultural Stabilization and Conservation Committees relative to conservation measures performed on farms participating in the 1961 Agricultural Conservation Program.

The tables and maps in this publication are designed to permit detailed analyses of the various conservation practices and program provisions, including information with respect to 1961 participation, assistance, pooling agreements, the Naval Stores Conservation Program and other related data. Summary and comparison tables showing selected pertinent data from previous years are included for use in comparing and evaluating 1961 and earlier program results.

Information on the extent of conservation measures performed under the 1961 Agricultural Conservation Program and amounts of assistance for such measures was obtained from a complete tabulation of individual farm data. The amounts shown under "Assistance" are tabulations of the Federal cost-shares paid to farmers for performing practices. The "Assistance" shown for each practice does not include any of the funds for "Small Cost-share Increases" which are required by law.

This publication also contains information relative to the 1961 Supplemental ACP (Emergency) practices.

Information for previous years has been published in earlier issues of this series, in "Agricultural Statistics", and in annual reports of the Chief of the Agricultural Adjustment Agency and the Administrator of the Production and Marketing Administration.

1/ Includes only cash assistance and properly used CMS. Does not include funds used for small cost-share increases, program and technical services, or funds for unused CMS.

2/ Includes Puerto Rico and Virgin Islands.

3/ Includes administrative divisions in Puerto Rico and Virgin Islands.

4/ Does not include any acreage for which assistance for these materials was given under another practice.

5/ Includes only the acreage for which adequate drainage was obtained under the 1961 ACP.

6/ All data except the amount of assistance may duplicate.

7/ The extent represents all of the irrigated acreage on farms performing the practice.

8/ Applicable to trees previously worked, specially selected, or 10 inches or larger.

9/ Assistance for these practices supplemented the regular ACP practices. Funds were authorized under Public Laws 85-58, 85-170, 85-766, and 87-332.

10/ Includes funds used for: practice cost-shares, small cost-share increases, program services, nondeductible CMS, and technical services furnished by other agencies.

Excludes funds used for the purchase of unused CMS and funds advanced for small cost-share increases in connection with such CMS.

\* Includes components performed under the 1961 ACP which do not represent the complete practice.

# 0.005% or less.

^ Will include some duplication where more than one practice performed on the same acre.

▲ Number of farms exceeds number of participants receiving cost-shares because of multiple farm ownership.

▲▲ Number of farms exceeds number of participants receiving cost-shares because of pooling agreements.
