

YEMEN – Complex Emergency

- On 21 April, Saudi Arabia announced the end of the military campaign in Yemen. Aerial bombardments by the coalition are expected to stop, but the air and sea blockade of the country will continue. In addition, conflict on the ground has intensified with different local parties continuing their fighting.
- As of 17 April (WHO), 944 people have been killed and 3 487 injured.
- In Amran governorate, at least 3 512 households were internally displaced.
- In Haradh, a town close to the Saudi border hosting thousands of African migrants on their way to Saudi Arabia, the situation is reportedly dire. The district has experienced airstrikes in recent days and the situation is tense due to its proximity to the Saudi border.
- UN agencies and their humanitarian partners in Yemen are planning a first mission of international staff to the country on 26 and 27 April.
