[1]Statistics consider EU Countries plus Albania, Bosnia and Herzegovina, Montenegro, North Macedonia, Norway, Serbia, United Kingdom.
[2]The maximum value of the fire danger forecast module of EFFIS, which generates forecasted fire danger level using numerical weather predictions. Source: JRC-EFFIS
[3]The burnt areas mapped in EFFIS represent about 80% of the total area burned by wildfires, since only fires larger than 30 ha are mapped. Areas burnt by fires smaller than 30 ha are not mapped in EFFIS. More info on limitations and the use of these data on: JRC EFFIS Rapid Damage Assessment.
*Kosovo: This designation is without prejudice to positions on status, and is in line with UNSCR 1244/1999 and the ICJ Opinion on the Kosovo Declaration of Independence.
