

# ***Updating the French communities of communes***

***When a wikipedian experiments Wikidata***

# *A interesting object to describe*

- Same kind but very different
- They are everywhere
- Nobody cares about them

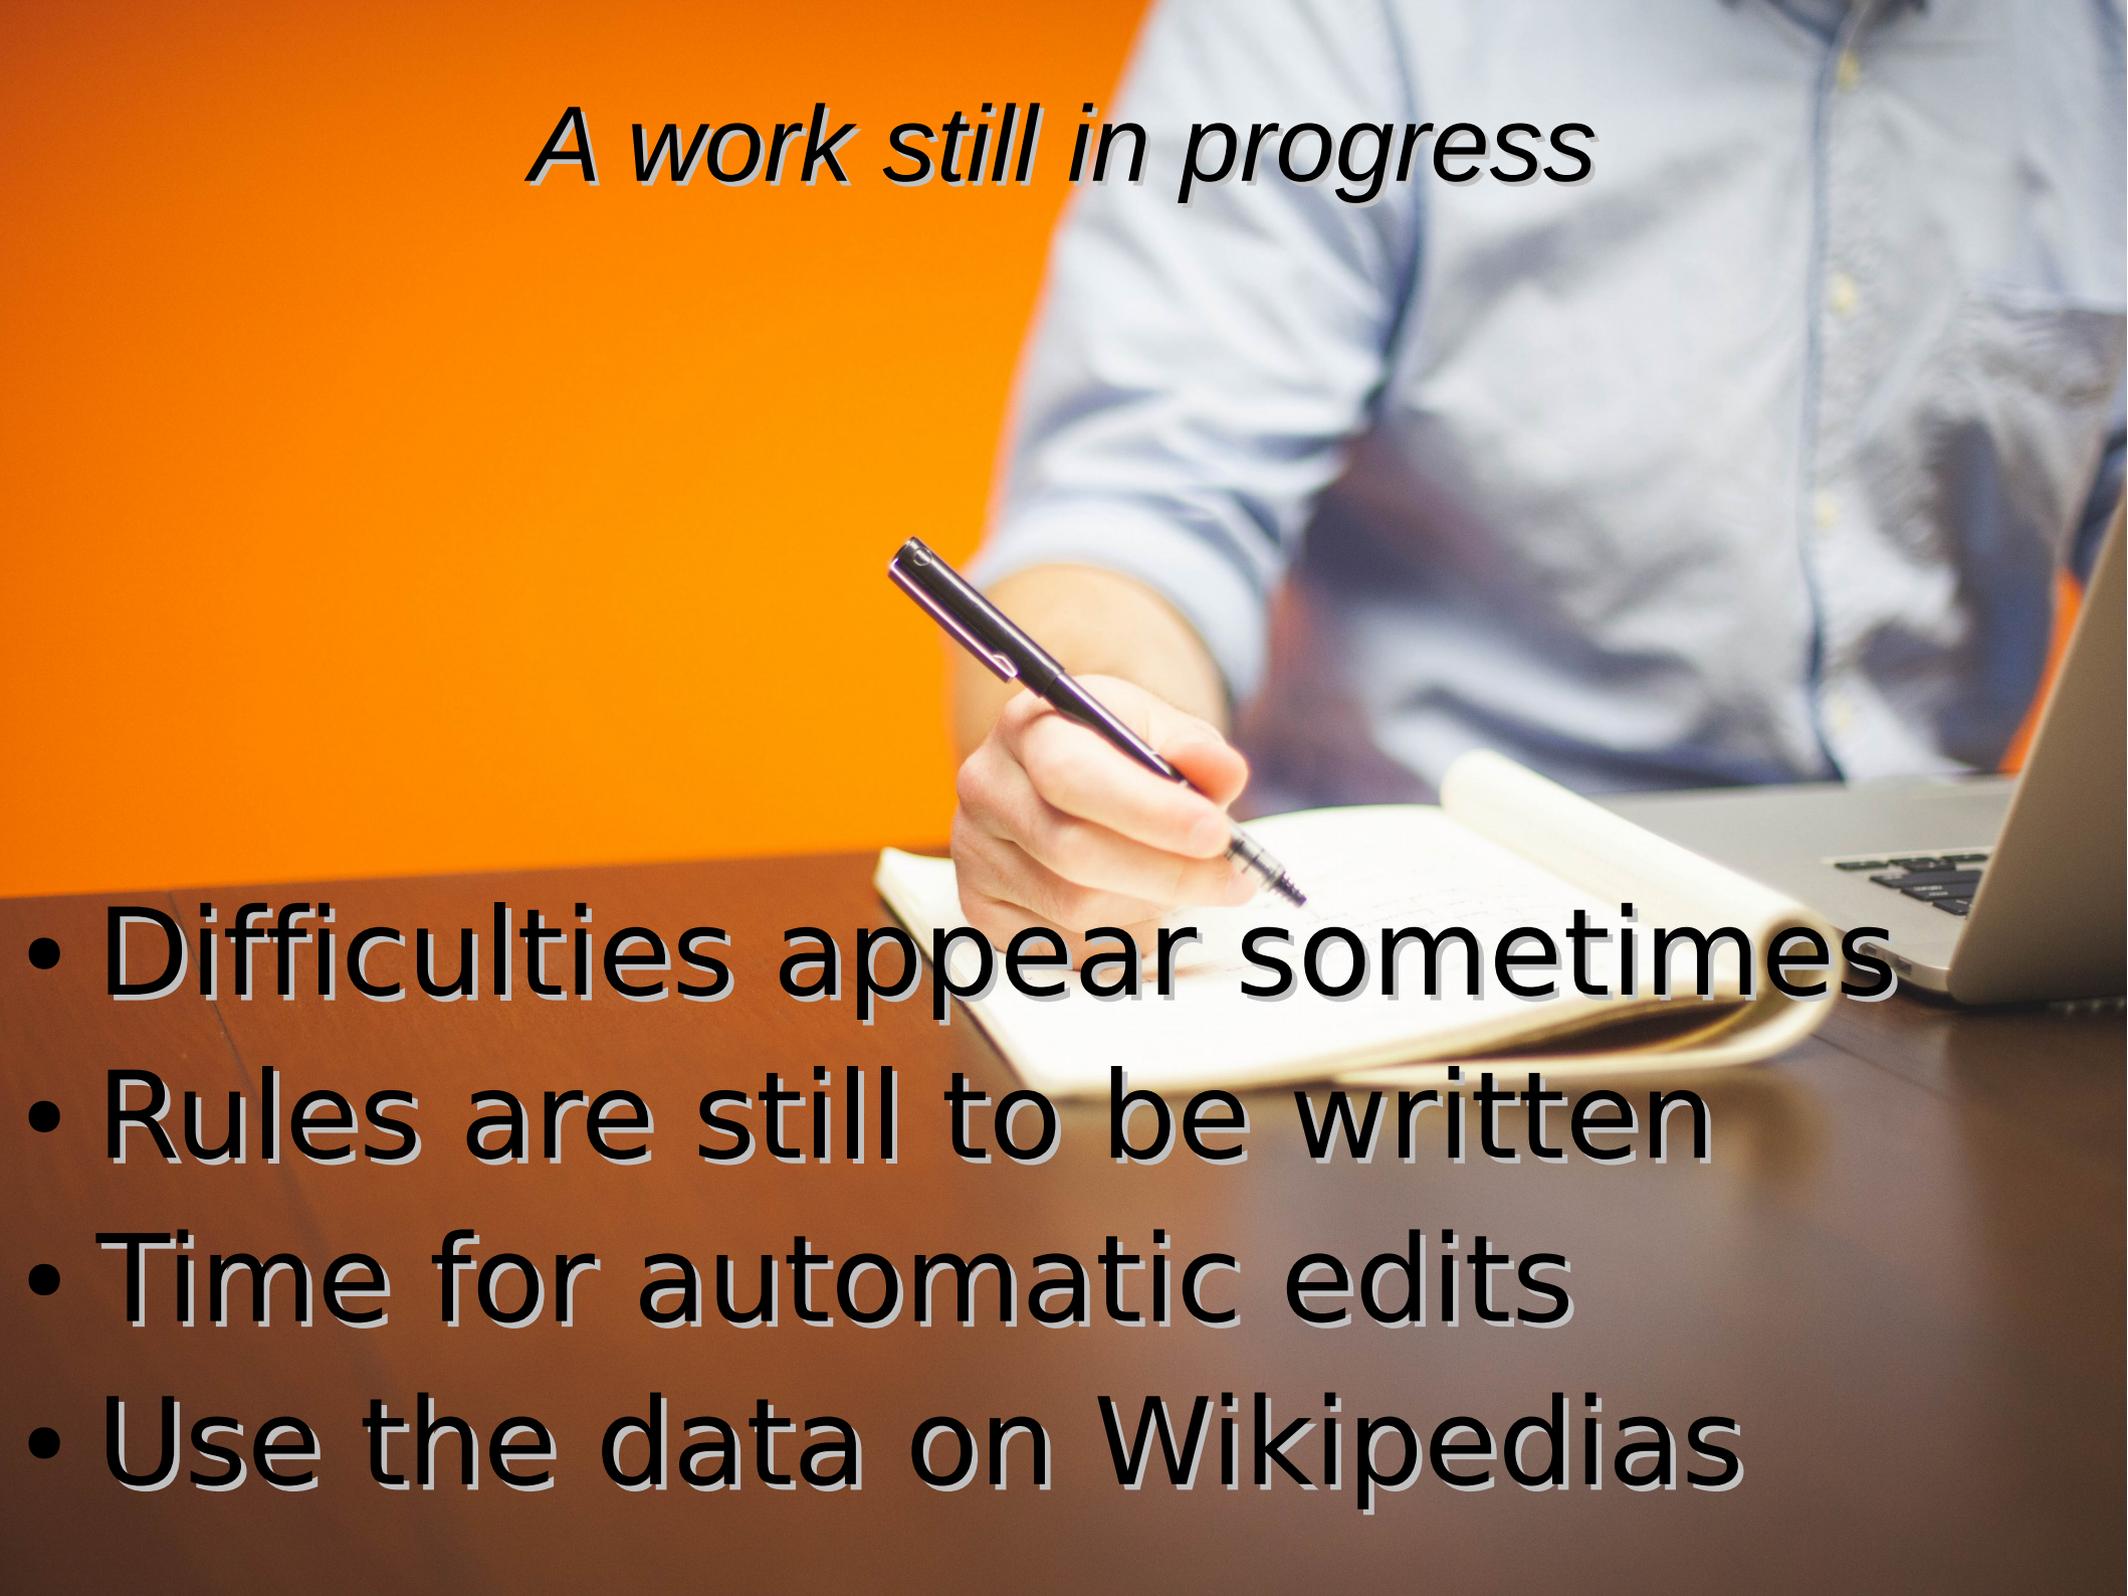

# *How intercommunal structures were described on Wikidata?*

- Most of the time: very few data
- No connection between items
- No unique identifier

# *Starting to build a comprehensive dataset*

- Building a query
- Checking every item

*A work still in progress*

- Difficulties appear sometimes
- Rules are still to be written
- Time for automatic edits
- Use the data on Wikipedias
