SUPREME COMMANDER FOR THE ALLIED POWERS

AG 387.6 (20 Nov 46)ESS/IN
(SCAPIN 1347)

APO 500
20 November 1946

MEMORANDUM FOR: THE IMPERIAL JAPANESE GOVERNMENT

THROUGH: Central Liaison Office, Tokyo

SUBJECT: Reparations Selections Within the Light Metals Industry

1. The Imperial Japanese Government is notified that all alumina, aluminum and magnesium plants designated on the attached list are hereby taken into custody and control of the Supreme Commander for the Allied Powers.

2. This is the initial list of plants subject to removal under the interim reparations program and is not to be construed as a final list. Until instructed otherwise by the Commanding General, Eighth United States Army these plants may continue operation. All necessary measures will be taken to prevent discrimination against the plants concerned in allocations of materials, working capital or labor. In all cases, whether or not the designated plants are operated, such measures will be taken as are necessary to insure their proper protection, maintenance and safeguarding as required by Memorandum for the Imperial Japanese Government, file AG 387.6(20 Sept 46)ESS/IN, (SCAPIN-1219), subject: Responsibilities of the Imperial Japanese Government for Preservation and Care of Plants' Equipment and Records Taken into Custody for Reparations Purposes by the Supreme Commander for the Allied Powers, dated 20 September 1946.

3. There will be made available to the Commanding General, Eighth United States Army, all personnel, equipment and supplies deemed necessary by him for the establishment of proper custody, control and protective maintenance.

BASIC: Memo to IJG, file AG 387.6(20 Nov 46)ESS/IN
(SCAPIN 1347), dtd 20 Nov 46, subject,
"Reparations Selections Within the Light
Metals Industry."

4. Within seventy-two (72) hours of the receipt of this memorandum the Imperial Japanese Government will have qualified representatives report to the Commanding General, Eighth United States Army to receive detailed instructions to accomplish the purpose of this memorandum.

FOR THE SUPREME COMMANDER:

4 Incls

1. List of Alumina Plants
2. List of Aluminum Plants
3. List of Magnesium Plants
4. List of Aluminum Rolling and Drawing Plants

R. J. Hersey
for JOHN B. COOLEY,
Colonel, AGD,
Adjutant General.

GENERAL HEADQUARTERS
SUPREME COMMANDER FOR THE ALLIED POWERS

APO 500
20 November 1946

MEMORANDUM:

SUBJECT: Information of General Application Pertaining to Directive Number (SCAPIN 1347) file AG 387.6 (20 Nov 46)ESS/IN, dtd 20 Nov 46, from General Headquarters, Supreme Commander for the Allied Powers, subject: Reparations Selections in the Light Metals Industry.

1. With reference to Memorandum Number (SCAPIN 1347) from General Headquarters, Supreme Commander for the Allied Powers to the Imperial Japanese Government, the following is published for the information of all concerned.

2. The purpose in issuing the attached directive to the Imperial Japanese Government and accompanying letter to the Commanding General, Eighth United States Army, is to insure availability of facilities in listed plants in best possible condition for interim reparations removals.

3. The facilities within listed plants which may be considered suitable for reparations are all major units and auxiliary equipment except those units composed principally of brick and which are not sufficiently inclosed in metal framework as to prevent loosening of the brick during transportation to another site.

4. It is not contemplated that buildings which are part of plants taken under custody and control will be used for reparations or destroyed, except in special cases. Such cases may be those in which part of the building frame forms an overhead crane-way and the steel building skeleton can be easily dismantled for resetting. If any building, other than those likely to be dismantled, is requested by the Japanese and it can be used by them without jeopardizing the primary mission of safeguarding reparations equipment, it may be released to them.

5. The primary reason for allowing continued production in any of the listed plants is to meet the needs of the

BASIC: Memo, Inf. of Gen'l Appl, dtd 20 Nov 46 pertaining to Memo to IJG, (SCAPIN 1347)

Occupation Forces and minimum Civilian Economy. Insofar as possible all production in these plants should be arranged so as to reduce inventories of raw materials, scrap and semi-finished products to practicable working minimums so that shutdowns, when necessary for reparations removal, will have the minimum disruptive effect.

6. It is contemplated that the Japanese will furnish personnel and material required by you; that custodial personnel selected will be individuals previously employed in each factory who are familiar with its equipment and requirements for maintenance.

7. It is expected that the Japanese will perform proper maintenance of equipment to preserve it in good condition. Such maintenance is to include sufficient oiling and greasing with necessary materials to be furnished by the Imperial Japanese Government when not available at any plants.

8. It is expected that a system will be established for spot-checking each installation periodically. When corrective action can be accomplished locally by conference it should be done. In cases of willful violation or neglect, immediate report should be made through military channels for corrective action.

9. A letter of Command instructions pertaining to the execution of the subject memorandum follows through Command channels.
