PREFACE

IN SUBMITTING this, the first volume of a directory published by myself for New Bern, I call especial attention to some of the new features of the work.

In the Alphabetical Department a complete list of the residents of New Bern is given, together with their home and business address and occupation, and all married people are denoted by the wife's name appearing in parenthesis, thus (Mary).

The Miscellaneous Department gives detailed information regarding the city and county governments, churches, fraternal orders, etc.

The Business and Professional Department gives business and professional information under separate headings.

The Street Guide gives streets arranged in alphabetical order where the street may be found in parenthesis, thus (17) viz :

In addition to the four censuses taken, a full and accurate census of the population of which will be found in this volume.

I wish to thank the patrons who have supported this work and the Chamber of Commerce for their earnest cooperation.

Very respectfully,
The Author

Advertising

Is the exponent to good business. Luck is just another name for good, hard persistent plugging. Luck is with the merchant who advertises, not because he advertises, but because he keeps on advertising indefinitely—which—

Means Success

Advertising

Is the exponent to good business. Luck is just another name for good, hard persistent plugging. Luck is with the merchant who advertises, not because he advertises, but because he keeps on advertising indefinitely—which—

Means Success
