### CATALOGUE No. 3

THE PHOENIX NURSERY CO.

A. E. DeMANGE, President

SIDNEY TUTTLE, Vice-President CAPITAL STOCK, \$200,000.00 W. E. ROSSNEY, Secretary and Treasurer

There Is Nothing That Will Improve Your Property and Surroundings and Add to Their Value, and Your Pleasure, at So Small A Cost, as the Planting of Trees, Shrubs and Hardy Plants

OUR TRADE MARK—RED TAG TREES. We are the first nurserymen to adopt a Trade Mark for their entire stock. Some nurserymen have adopted a Trade Mark for one or two items for the purpose of restraining others from sell-ing or propagating these items, while with us the purpose is en-tirely different. We have trade marked our product solely for the purpose of protecting our customers. The RED TAG identi-fies all our products, and we have had it registered in the Patent Office of Washington L C Office at Washington, D. C.

## LOOK FOR THE RED TAG ON EVERY PHOENIX TREE; IT IS YOUR PROTECTION AND OUR GUARANTEE.

#### READ CAREFULLY

IN THIS CATALOGUE we have endeavored to make our IN THIS CATALOGUE we have endeavored to make our prices as low as possible to furnish first class stock, consistent with the proper handling and careful packing. We have tried to make our terms and prices so plain that our patrons can at once make up their orders and figure out the cost, and thus avoid the necessity of sending their lists to us for prices, which in most cases, in the busy season, causes delay, and the prices if quoted by letter would be the same as contained in this catalogue.

FREE PACKING-Our prices include packing on all orders.

FREE DELIVERY—**Freight Prepaid** on all orders. FREE DELIVERY—**Freight Prepaid** on all orders amount-ing to \$10.00 or more, where cash accompanies the order for the full amount at prices and terms in this catalogue. All greenhouse plants should be sent by express or mail. All orders to be sent C. O. D. must be accompanied by one-fourth the amount in cash. When remitting please send us bank draft, express or postoffice money order, or send currency by registered mail. We cannot accept personal checks. WE DO NOT FILL ORDERS FOR LESS THAN \$1.00. All shipments are guaranteed by us to reach you in good condition.

condition.

BOTH FRUIT AND ORNAMENTAL STOCK we grow in large quantities. All the desirable old and new varieties carefully grown, by the best skilled nursery men. We have unusual facil-ities for the handling of large and small orders, and feel confi-dent that we can give entire satisfaction to all who may favor us with their orders. with their orders

ORDERS WILL BE PRICED AS FOLLOWS: 1, 2, 3, and 4 trees of a kind, variety and size at each rate; 5 to 30 trees of a kind, variety and size at ten rate; 30 to 300 trees of a kind, va-riety and size at housand rate; 300 tree and over of a kind, va-riety and size at thousand rate. When an order is entitled to the hundred or thousand rates, the trees must be of the same kind, as all Apples, or all Peaches, Pears, Cherries, etc., and in sorts of not less than ten of a variety, as for instance, in apples, ten Ben Davis, ten Grimes' Golden, etc. In Pears, ten Keiffer, ten Bartlett, etc. In ornamental trees, shrubs, etc., the same rule will apply. Prices are for first class stock of the sizes and ages quoted and are subject to change without notice.

As to our responsibility we refer to the Peoples Bank, State National Bank, German-American Bank, and McLean County Bank of this city. We have been in business continuously for 60 years.

TIME OF SHIPMENT—We usually commence shipping in the SPRING about MARCH 10th and continue up to the last of May and in the FALL about OCTOBER 1st and continue into Lecember.

OUR SHIPPING FACILITIES are unexcelled. Blooming-ton being an important railroad center, we are enabled to ob-tain very low freight rates, and forward promptly to all sec-tions. With the Illinois Central R. R., Chicago & Alton R. R., Illinois Traction System, Lake Erie & Western R. R. (now of the Lake Shore System), and the C. C. C. & St. L. R. R. (Big Four) and their branches, we have direct communication with Chicago, St. Louis, Cleveland, Cincinnati, Louisville, Columbus, Kansas City, Indianapolis, Dubuque, Madison, Sloux City, Omaha, Cairo and New Orleans, by daily freight trains without trans-fer. WE GUARANTEE OUR STOCK TO REACH YOU IN GOOD CONDITION.

Direct all letters to

THE PHOENIX NURSERY CO., P.O. Box 625, Bloomington, Ill.

#### PLANTING AND CARE OF TREES.

PLANTING AND CARE OF TREES. PREPARATION FOR PLANTING—Plow and subsoil re-peatedly, so as to pulverize thoroughly to a depth of 12 to 18 inches. When planting on the lawn or grass plots, remove the sod for a diameter of 4 to 5 feet and keep this space well worked and free from weeds. Dig the hole deeper and larger than is necessary to admit all the roots in their natural position, keep-ing the surface and subsoil separate. Cut off broken and bruised roots and shorten the tops to half a dozen good buds, except for fall planting, when it is better to defer top pruning until the following spring. If not prepared to plant when your stock arrives, "heel in" by digging a trench deep enough to admit all the roots, and setting the trees therein as close as they can stand, carefully packing the earth about the roots, taking up when required. Never leave the roots exposed and "puddle" be-fore planting. fore planting.

PLANTING—Fill up the hole with surface soil, so that the tree will stand about as it did in the nursery after the earth is settled, except for dwarf pears, which should be planted deep enough to cover 2 or 3 inches of the quince stock upon which they are budded. Work the soil thoroughly among the roots, and, when well covered, tramp firmly. Set the tree firm as a post, but leave the surface filling (of poorer soil) light and loose. No staking will be required except for very tall trees. Never let manure come in contact with the roots.

MULCHING—After trees or bushes are planted it is a great advantage in Spring or Fall, to mulch with a layer of litter or coarse manure 4 to 5 inches deep, extending 2 to 3 feet out from the trunks all around and sufficient to cover all the roots be-neath. This prevents the ground cracking or baking, and keeps the earth moist and of an even temperature.

AFTERCULTURE—No grass or weeds of any description should be allowed to grow around young trees or plants. To get the best results the ground should be kept clean and loose around them, at least until they begin to bear. Where the ground is poor, surface applications of manure are needed. Pruning should be done regularly every Spring before the buds swell; in this way removal of large branches is avoided.

FREE ADVICE-To our customers in reference to the care and culture of all trees and plants cheerfully given. Don't hesitate to write us.

#### DISTANCES FOR PLANTING.

Cherries	20	6.6	44
Duke and Morello Cherries	18		**

#### NUMBER OF TREES TO AN ACRE.

30	feet	apart	each	way 50	10	feet	apart	each	way 435
				way 70					way 680
				way110					way1210
				way135					way1742
				way205	4	feet	apart	each	way2723
12	feet	apart	each	way300	3	feet	apart	each	way4840

RULE—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which, divided into the number of feet in an acre (43,560), will give the number of trees to the acre.

### CERTIFICATE OF INSPECTION.

OFFICE OF THE ILLINOIS STATE ENTOMOLOGIST.

Urbana, Illinois, August 14, 1911.

This is to certify that the growing nursery stock and premises of The Phoenix Nursery Co., situated at Bloomington and Normal, Ill., have been inspected by H. J. VanCleave, a duly appointed inspector of this office, according to the provisions of an Act to prevent the introduction and spread in Illinois of the San Jose scale and other dangerous insects and contagious diseases of fruits, in force July 1, 1907, and that said nursery and premises are apparently free from the San Jose scale and other dan-gerous insects and dangerous plant diseases. This certificate applies only to the condition of this nursery for the year end-ing July 5, 1912. S. A. FORBES, State Entomologist. No. 29 (Copy).

Greenhouse and Decorativee Plants-Continued

PARTIAL VIEW OF OUR GREENHOUSE

## FRUIT TREES APPLES

The Apple is the first fruit, both in im-portance and general culture. Its usefulness, unlike that of other fruits, extends nearly through the year. Our collection comprises about all the best and most popular kinds, and with a judicious selection a constant suc-cession of this indispensable fruit can be easily obtained for family use. Planted at the rate of 50 trees to the acre, rows of peach trees can be planted between the apple trees, and the peaches, growing more rapidly than the apples, can be removed after their use-fulness is over, leaving the apple orchard all the better for their protection. Apple trees will thrive on nearly all well-drained soils **CENTERAL LIST OF APPLES** 

#### **GENERAL LIST OF APPLES** SUMMER VARIETIES

ASTRACHAN RED—Large; yellow, nearly covered with crimson; fine bloom; juley, crisp, acid; tree a medium grower; bears young and profusely. The finest of all early apples. August

BENONI--Pale yellow, marbled, with dark

**BENONI**—Pale yellow, marbled, with dark crimson; flesh yellow, juicy, tender; fruit rather helow medium; roundish, conical; tree vigorous, hardy and productive. August 1st. **CAROLINA RED JUNE**—Medium, dark red; flesh white, tender, sub-acid. August. **DUCHESS OF OLDENBURG**—Large size, roundish; streaked with red and yellow; flesh whitish, julcy; flavor sprightly, subacid; tree a vigorous grower; very hardy; succeeds in the northwest where many kinds fail. Aug-ust, September and October. **EARLY HAEVEST**—Medium to large; pale yellow; tender, rich, sub-acid, fine flavor; a superb apple. Middle to end of August.

August

**EARLY RED STREAK**—Medium, roundish; yellow, marbled d splashed with red; flesh white, tender, and juicy. September. marbled and

**EARLY PENNOCK**—Large, 'striped, showy: an early and profuse bearer; tree vigorous and hardy; a very profitable and popular kind. August and September.

**GOLDEN SWEET**—A large, handsome, yellow apple; fine: sweet; a free grower, rather spreading and irregular; produc-tive. August and September.

**KESWICK CODLIN**—Large, pale yellow; oblong; excellent for cooking and market; erect grower, vigorous and hardy; pro-fuse bearer; popular throughout the West. August and Sepexcellenť tember

tember. SOPS OF WINE—Medium size; oblong, dark red; texture and flavor peculiar and highly esteemed; very hardy, erect and dis-tinct growth; market. August and September. SWEET JUNE—Rather small; roundish, regular; smooth, light yellow; flesh yellowish, very sweet and rich; free and up-right grower; productive. YELLOW TRANSPARENT—Medium, yellow; good quality; productive; excellent, bears early. Middle of August.

#### AUTUMN VARIETIES.

**ALEXANDER**—A large, heautiful, deep crimson apple, of Russian origin; good quality; moderate grower and rather shy bearer; tree very hardy. October.

AUTUMN STRAWBEBEY—Medium; striped; crisp, juicy and of delicious quality; vigorous, upright grower; hardy, and bears young and abundantly. September and October. BAILEY'S SWEET—Large, crimson, superb; sweet, tender, excellent, vigorous, hardy, and productive. October and No-

vember.

**BUCKINGHAM**—Very large; yellow, with bright red cheek and crimson stripes; flesh yellow, subacid, very rich and juicy; tree compact and vigorous grower, and hears young. A mag-nificient apple Very popular South and West. October to December.

**COLVERT**—Large, flat; yellowish-green and brown; fine for cooking; tree hardy, heautiful and productive; a favorite va-riety. October and November.

**CHENANGO STEAWBEREY**—Large, oblong; red and yel-low; handsome; best quality and very handsome appearance; vigorous and productive. September.

FALL ORANGE—Large, nearly round; yellow; sometimes shaded with red; rather acid; excellent for cooking; an early and ahundant bearer. November.

FALL PIPPIN—Largest size; roundish oblong; flesh tender and rich; fine bearer. October to December. FAMEUSE—(Snow) Medium; deep crimson; flesh snowy white,

tender melting and delicious; excellent quality; vigorous growth, dark wood. November to January.

dark wood, November to January. **FULTON**—Medium; striped, with pink flesh; excellent qual-ity; stout, vigorous growth; productive; September. **GRAVENSTEIN**—Large, rather flat; yellow, beautifully dashed with light and deep red; flesh firm, tender, crisp and highly perfumed, and considered the finest flavored apple grown. October

**HAAS**—Large, flat; yellowish-green striped with dull red; flesh white, tender, julcy, subacid, good; especially popular West and Southwest. September and October. **HUBBARDSTON'S NONESUCH**—Large with yellow and red stripes; tender and julcy; fine; very productive. November to January.

**WINTEE BANANA**—This valuable new variety was origi-nated on the farm of D. M. Flory, Cass County, Indiana, and was introduced several years since by us. Fruit large, fine grained, a beautiful golden yellow shaded with bright red, un-usually handsome. Flesh of golden yellow, very large and highly perfumed, and considered the finest flavored apple grown. An excellent table variety. Tree hardy and well adapted to the Northern states. An early and prolific bearer.

JERSEY SWEET-Medium, greenish-yellow with faint stripe; early and good bearer. August and September.

**LOWELL**—Large, roundish; green, changing to rich yellow; flesh yellowish-white; subacid, excellent; good bearer. Septem-ber and October.

**MAIDEN'S BLUSH**—Large, flat; pale yellow with red cheek; rv popular; good bearer. September and October. **MASON'S ORANGE**—Extremely hardy; the strongest grower have; fruit excellent, large golden yellow; very productive;

late keeper.

**RAMBO**—Medium; striped immense grower and bearer; very popular. October to December. **RAMSDELL'S SWEET**—Medium; striped; excellent; vigor-ous, upright grower; very productive; moderately hardy. Octo-ber and November.

**BED BIETIGHEIMER**. Very large; pale cream, covered with dark crimson; firm, subacid, with brisk pleasant flavor; a good grower and an abundant bearer. September and October. a good

SWEET RUSSET-Small, roundish; yellow, covered with light russet; tender, juicy and rich; upright grower; produc-tive. October.

**TWENTY OUNCE**—A very large, showy, striped apple, of fair quality; good grower and fine bearer; excellent for baking: popular market kind. October to January.

. WEALTHY—Medium, roundish; smooth, nearly covered with dark red; flesh white, fine, juicy, subacid; quality very good; good grower and productive; valuable on account of extreme hardiness. October.

#### WINTER VARIETIES

ARKANSAS BLACK—Large, round, smooth; often very black; flesh yellow, juicy and delicious; fine for cooking or market; vigorous, hardy and abundant; splendid keeper. BALDWIN—Large; bright red; crisp, juicy, and rich; tree vigorous, upright and productive; popular market kind. No-vemher to February.

BEN DAVIS-Large, handsome, striped; good; hardy, vigor-ous and productive; late keeper; very showy; most profitable market variety. December to March.

**BELLEFLOWER YELLOW**—Large, yellow, delicious; qual-best; finc keeper; fruit sells well; tree vigorous spreading, rdy. November to February. hardy.

hardy. November to February. **BISMARCK DWARF**—This most valuable new dwarf apple was introduced from New Zealand a few years ago, through the agency of a celebrated arboretum in Germany. It has already been fully tested in Russia, Germany, France, England, United States and Canada, and wherever grown it has proved a most astonishing revelation, not only in high quality, but also in hardiness, and especially in earliness of fruiting. The color of the fruit is a beautiful golden vellow, and its size is the larg-est. The tree bears most profusely and the showy fruits are eagerly sought after, always bringing the highest market price.

### **APPLES---Continued**

APPLES--Bismarck trees bear at an earlier age than any other apple and the fruit keeps well into March. As a dessert apple it has no equal owing to its distinct and most delicious flavor. It is also found especially suitable for cooking purposes. It has been grown in large quantities as a pot plant for table and greenhouse decoration. **CLAYTON**—Large; yellow, striped; flesh yellow, subacid; favorite cooking apple. January to May. **DETEROIT RED**—Large; dark polished purplish red; showy, with whitish specks. Early winter. **DELAWARE BED WINTER**—Medium to large; bright red, highly colored; flesh fine grained, crisp, juicy, subacid; excel-lent quality; remarkable for its long keeping qualities; an early and abundant bearer. **ENGLISH GOLDEN BUSSET**—Medium; very regular; green-ish yellow, nearly covered with russet; flesh yellowish white, firm and crisp, with pleasant flavor. January to May. **FALAWARERE**—Very large and handsome; green; nearly covered with dull red; quality good; vigorous grower; bears young and abundantly. January to April. **FLORA BELLE**—Medium; yellow; thrifty and hardy. **GENMES' GOLDEN PIPPIN**—Medium: golden yellow, with

hardy. **GEIMES' GOLDEN PIPPIN**—Medium; golden yellow, with white dots; crisp, tender and juicy; excellent; tree vigorous, hardy and productive. January to April. **GANO**—Good size, smooth and very attractive; deep red; resembles Bcn Davis, but is an improvement on that variety, being handsomer and better colored. December to March. **HUNTSMAN'S FAVORITE**—Large; yellow, with brownish cheek; juicy, aromatic, delicious. December to February. **HAWLEY**—Very large; pale green to yellow, sometimes with faint orange cheek, very tender, with mild, rich, fine flavor; rather slow grower. **HIBENAL**—Large; handsomely strined with red: keens till

faint orange cheek, very tender, with mild, rich, fine flavor; rather slow grower. HIBERNAL—Large; handsomely striped with red; keeps till mid-winter; very hardy. INGBAM—Medium; yellow, covered with red; subacid, brisk, pleasant; hardy; good bearer; keeps till June. ISHAM'S SWEET—Large, dark red; rich, sweet and juicy; irregular grower; hardy. JANET—(Rawle's.)—Medium to small; yellow striped with dull red; juicy, rich, delicious; tree hardy and productive; blooms late; very popular West and Southwest. December to April. April.

April. JONATHAN—Medium: red and yellow; very showy; juicy. excellent; tree slender and spreading; bears early; very produc-tive. November to February. KING OF TOMPKINS COUNTY—Large, red, superb: tree vigorous, but tender; resembles Baldwin, but large, and less productive. November to January. LIMBER TWIG—Medium; yellow shaded with dull crimson; flesh whitish, not very tender; juicy, with a brisk, subacid flavor. LAWVER—Large, round: bright red, with small dots; flesh

flesh whitish, not very tender; juicy, with a brisk, subacid flavor. LAWVER—Large, round; bright red, with small dots; flesh white, firm, crisp, mild subacid; fine keeper; shy bearer. Janu-ary to May. LONGFIELD—Medium to large; yellowish green, covered with red stripes; blush on sunny side; rich, sprightly; free, upright grower; early and abundant bearer. December to March. MANN—Medium to large; deep yellow, shaded with brownish red; juicy and subacid; tree hardy and vigorous, keeps till April. MILAN—Slightly below medium; red, handsome and popular; tree vigorous and productive, but not perfectly hardy. November to March. MINKLER—Medium; red, handsome; very popu-lar throughout the West; immense grower and very productive. December to April. MISOURI PIPFIN—Medium; dark, purplish crimson; striped; quality good; good grower; early and prolific bearer; highly esteemed throughout the Southwest. MINTOSH RED—Medium; dark red, with blush; very handsome flash very fine Mison flash very fine sinter flash very fine distance flash very fine sinter flash

Southwest. McINTOSH RED—Medium; dark red, with blush; very handsome flesh, very fine grained; tender, juicy and mild; very hardy and an enormous bearer; very popular in the Northwest. January. MAMMOTH BLACK TWIG—Large; deep red; subacid; early and abundant bearer; keeps well; tree strong grower; resembles Winesap, but is superior in many ways, and fully a third larger. January to April.

In many ways, and fully a third larger. January NORTHWESTERN GREENING—Large, smooth, greenish yellow; flesh fine grained, firm and juicy; good quality; extremely hardy and a strong, hand-some grower; is being largely planted. December to April.

**NORTHERN**, SPY—Large; striped; magnificent; considered the best flavored apple grown; tree beau-tiful, hardy and blooms late. November to February

ary. **PRICE'S SWEET**—Medium, or above: yellow, with red check; fair quality; upright, strong grower: early bearer; very hardy valuable for the North. November to January. **PEWAUKEE**—Large; reddish, mottled; very hardy, vigorous and productive; flavor moderate. December to March. **RHODE ISLAND GREENING**—Large, greenish yellow; tender, juicy, and rich, with rather an acid flavor; strong, spreading grower; an abundant bear-er. Good keeper. **ROCK PIFPIN**—Medium size, yellow, and bronzed

er. Good keeper. **ROCK PIFFIN**—Medium size, yellow, and bronzed in the sun; flesh firm and a good keeper. Very hardy, strong handsome grower.

BOMAN STEM—Medium; yellow, sometimes with red check; excellent, vigorous, upright, productive. profitable. November to February.

SEEK-NO-FURTHER—Medium to large; striped with dull red and slightly russetted; tender, rich and excellent; good grower. November to February. SALOME—Medium; yellow and red; very handsome; hardy, productive, and of unsurpassed keeping qualities. SUTTON BEAUTY—Large; roundish; yellow and crimson; slightly subacid. November to April. SMITH'S CIDER—Medium, pale, striped; flavor moderate; tree productive. November to March. STAYMAN'S WINESAP—Seedling of Winesap; vigorous grower; early and abundant; fruit medium to large, much re-sembling Winesap; quality unsurpassed; late keeper. STRIPED SWEET PIPPIN—Rather large; roundish; striped rich red on bright yellow; very mild, subacid, of good quality. Early winter.

STRĪPED SWEET PIPPIN—Rather large; roundish; striped rich red on bright yellow; very mild, subacid, of good quality. Early winter. STABK—Large; striped; tender and juicy; pleasant flavor; very productive and moderately hardy. December to March. ST. LAWRENCE—Large, roundish, greenish yellow, striped with very dark red; very handsome and productive; of second rate flavor, early winter. TALMAN'S SWEET—Medium; pale yellow; good; very hardy, vigorous, and productive; most popular winter sweet; greatly esteemed in the North. December to April. UTTER'S LARGE RED—Large and handsome; very uniform in size; quality good; a profuse bearer; one of the most hardy sorts. December and January. WALBRIDGE—Medium; striped; good; tree extremely hardy; an immense grower and a good bearer. December to March. WAGENER—Medium to large; deep red in the sun; flesh firm; subacid and excellent; handsome, upright grower, and very productive. December to May. WHITE WINTEB FEARMAIN—Medium; pale yellow, thickly sprinkled with brown dots, flesh yellowish, tender, crisp, juicy; very pleasant subacid flavor. December to April. WHITE PIPPIN—Resembles Newtown Pippin in appearance, but quality not so good; an upright, vigorous grower, moderately bardw. November to February.

WHITE PIPPIN—Resembles Newtown Pippin in appearance, but quality not so good; an upright, vigorous grower, moderately hardy. November to February. WINE SAP—Medium; roundish; deep red; firm, crisp, julcy; excellent quality; moderate grower and good bearer; succeeds well throughout the West; very profitable. December to May. WILLOW TWIG—Large; striped; hardy here; vigorous, early and splendid bearer; very valuable and popular as a long keeper. December to April

and splendid bearer; very valuable and popular as a long keeper. December to April. **WOLF RIVER**—Large and handsome; greenish-yellow, shaded with light and dark red; tree a strong grower and good bearer; extremely hardy and succeeds well throughout the Northwest. January and February. **YATES**—Rather small; dark red, dotted with white spots; flesh firm, juicy and aromatic; immense bearer and good keeper. **YORK IMPERIAL**—Medium to large; yellow, shaded with red; firm, juicy, subacid; an excellent shipper. December to April.

NORTHWESTERN GREENING

### **APPLES**---Continued

### **CRAB APPLES**

We call special attention to our list of new and popular well known crab apples. On account of their extreme hardiness and fine bearing qualities, they are a boon to many less favored sec-tions. All are valuable for preserving, and many for table use. ALASKA—Fruit larger than Transcedent; long keeper; flavor excellent; tree a strong grower and perfectly hardy. GEN. GEANT—Fruit large; yellow, striped with red; flesh white, fine grained, mild subacid; fruits in dense clusters. Oc-tober

**GIDEON'S No. 4**—Fruit large, about the size of Martha. Color waxy white, slightly golden on sunny side. **Tree** very much resembles Duchess of Oldenburg both in habit and growth. Very hardy and productive.

much resembles Duchess of Oldenburg both in habit and growth. Very hardy and productive. GOLDEN BEAUTY—Very large and handsome; fine amber or golden yellow color. HYSLOP—Dark crimson, with bloom; very showy and popu-lar on account of its hardiness. IRISH PEACH—Fruit large, handsome and of excellent qual-ity; seedling of Transcendent.

DUCHESS OF OLDENBURG.

The Pear is one of our most satisfactory fruits. The trees live long and bear regularly and abundantly. We do not offer a long list of varieties but we include about all that our experi-ence warrants us in recommending for general planting.

We wish to call special attention to the New Rossney Pear, whose handsome appearance and fine flavor entitle it to first place, also to the Longworth's No. 1 Pear, whose extreme hardi-ness seems to have solved the problem of pears for the Northwest.

We offer both Standard and Dwarf trees, indicating by the S, means that we can supply Standards only; D., Dwarfs only; S. D., either Standards or Dwarfs. Dwarf Pears bear earlier, but Standards are longer lived

#### PEARS, DWARF

Dwarfs must always be planted sufficiently deep to cover the junction of the Pear and Quince stock, upon which they are budded, 2 to 3 inches, the soil made rich and well tilled, and about half the previous summer's growth cut off each spring. SPECIAL Varieties of STANDARD pears.

### **Special Varieties of Standard Pears**

#### LINCOLN PEAR

This is an excellent variety which originated at Lincoln, Illinois. Tree hardy, strong grower. Fruit large and of a beau-tiful golden yellow, of the best quality. An abundant bearer and it is said it has never been known to blight. We have propa-gated this variety for fifteen years or more, and it has never blighted with us, and is always in great demand.

### LONGWORTH'S No. 1 PEAR

The Pear For the Northwest

This is a very hardy seedling pear of recent introduction; originated at Dubuque, Iowa, and was grown from seed some forty years since by the veteran nurseryman and horticulturist, Wm. Longworth. The tree is a strong upright grower, entirely FREE FROM BLIGHT, and an enormous bearer. Fruit, med-ium to large, nearly round; skin yellow with warm blush on the sunny side; flesh rather coarse, julcy, sugary, good flavor. Rip-ens from first to middle of September.

**MARTHA**—Bright glossy yellow, shaded with light red; surpasses all other crabs for cooking; bears enormously. Septem-

NORTHFIELD BEAUTY—Fruit of good size; light straw color with brownish cheek; one of the handsomest. November to February.

ORANGE-Medium size; rich yellow; flavor very good. Early winter.

**QUAKER BEAUTY**-New; fruit good size; light straw color, with brownish cheek. November to February.

**RED SIBERIAN**-Rather small; yellow, with scarlet cheek; tree an erect grower and bears very young. September.

**TETOFSKY**—Pale yellow; ten-der, juicy; good quality; fruit large; slow grower; very early bearer. September.

**TRANSCENDENT**—Large; yel-low, with red cheek and fine bloom, very beautiful and popular; growth rapid and irregular; a great bearer. October.

WHITNEY'S No. 20 — Very large; green, striped and splashed with bright red; juicy and of a delightful flavor; a handsome and vigorous grower and perfectly hardy. September.

WHITE ARCTIC-Strong, up-right grower; fruit very large; white, tender, rich and juicy; very valuable.

YELLOW SIBERIAN-Large, of a beautiful golden yellow color.

### **Dwarf Apples**

ASTRACHAN RED AUTUMN STRAWBERRY BALDWIN BISMARCK DUCHESS OF OLDENBURG KING OF TOMPKINS CO. MAIDEN'S BLUSH SWEET BOUGH WEALTHY YELLOW TRANSPARENT

For description of these varieties see pp. 9, 10 and 11.

### PEARS

Having thoroughly tested this variety, we have no hesitancy in recommending it to the public for general planting. This pear has withstood our severest winters without the slightest injury, while other varieties were frozen to the ground. Being free from blight and EXTREMELY HARDY, it is a very desir-able variety, and should be planted largely.

#### THE ROSSNEY PEAR

**THE BOSSNEY PEAR** A chance seedling grown near Salt Lake City, Utah. Ripens about two weeks after Bartlett, averages larger, excellent keeper and shipper, uniform size, shape and color, one of the hand-somest; creamy skin with crimson blush; flesh melting, juicy, sweet and tender, of superior flavor. A vigorous grower, hardy both in wood and fruit bud, and very productive. Combines excellent quality with large size, fine form and superior ship-ping qualities. Should be tested everywhere. Luther Burbank, the most noted horticulturist of the age, says: "The samples of Rossney Pear arrived in due season. The large size, hand-some form, and creamy yellow skin with crimson blush gives the fruit a tempting appearance; and the tender creamy flesh, of just the right texture, with no hard spots and an unusually small core, with its superior flavor, makes it about the best tive, would prefer it to any other, even the standards, Bartlett or Seckel." For history, description and colored plate of Ross-ney Pear, see page 402, Year Book of the Department of Agri-culture, 1904. **SUMMER VARIETIES** 

#### SUMMER VARIETIES

SUMMER VARIETIES BARTLETT-S. D. Large size; color rich yellow with often a beautiful blush next the sun. Buttery, very juicy and highly flavored. Bears early and abundantly. August and September. DOYENNE D'ETE-S. Small; russety yellow, with rosy cheek; juicy and sugary; grows in clusters; ripens to perfec-tion on the trees. July to September. EARLY HARVEST-S. D. Large, golden yellow, with fine red cheek; flavor not the best but sells well on account of its handsome appearance. August. KOONCE-S. D. Medium; yellow, with bright red cheek; very handsome; tree upright and vigorous; bears well; is profi-table on account of earliness. August. LAWSON-S. Showy; yellow and crimson; a profitable mar-ket variety.

**LECONTE**—S. Very productive; a strong upright grower decidedly ornamental; fruit pale lemon yellow; grows well any-where. September.

### PEARS---Continued

**OSBAND'S SUMMER**.S. One of the finest early pears; of medium size; clear yellow, with red cheek; melting, sweet and perfumed. August.

perfumed. August. **TYSON**—S. D. Slightly above medium; melting, juicy and sweet, tree upright, hardy and vigorous; productive, but not so early to bear; admirable for the West. August and September. **WILDER'S EARLY**—S. D. Medium; yellow, with dark red cheek; melting, sweet, good; very attractive; of vigorous and symmetrical growth. First of August.

#### AUTUMN VARIETIES

**BARTLETT-SECKEL**—S. Cross between the well known Bartlett and Seckel. Tree hardy, vigorous and productive; fruit above medium size, yellow and red; combines the richness and quality of these two well known sorts. Ripens September and October. Octob

**BELLE LUCRATIVE**—S. Large; melting, delicious; tree a fine grower and abundant bearer; very successful throughout the West.

**BURRE D'ANJOU**—S. D. Large; greenish yellow sprinkled with russet, sometimes with red cheek; melting, perfumed, ex-cellent; productive. October. **BEURRE BOSC**—S. Large; beautiful, russety, melting, de-licious, highly flavored; moderate, irregular grower; bears well October.

October. **BEURRE CLAIRGEAU**—S. Large; yellow, shaded with crim-son; sugary; perfumed; beautiful; bears well; a magnificent pear. October and November. **BESSEMIANKI**—S. Medium size; green russet, with blush on sunny side; flesh tender and juicy; upright grower. **BUFFUM**—S. D. Medium, or below; fruit of variable qual-ity; tree of remarkable vigor and beauty; rather hardy. Sep-tember

tember

**CLAPP'S FAVORITE**S. D. Large; yellow shaded with red; juicy, melting, perfumed; a great bearer. August and September.

ber. DOYENNE BOUSSOCK—S. Large; buttery; excellent; strong grower and productive. September. DUCHESS D'ANGOULEME—S. D'. Fruit of largest size, of-ten weighing over a pound; very juicy, with rich, excellent flavor; vigorous, bears heavily and regularly; succeeds especially well as a dwarf. October and November. FLEMISH BEAUTY—S. Very large; pale yellow with red-dish-brown cheek; sugary, rich, juicy, melting; vigorous; an enormous bearer; should be gathered and house-ripened. Sep-tember.

tembe

TREDERICK CLAPP—S. Above medium; smooth, clear, lemon yellow; flesh fine-grained, very juicy and melting; rich, perfumed, and of best quality; vigorous grower. October.
 GARBER—S. Resembles Keiffer very closely but ripens earlier; a thrifty grower.
 GOODALE—S. Fruit large; flesh white, juicy, melting, of excellent flavor and quality; tree upright in growth, hardy and productive. October.

excellent flavor and quality; tree upright in growth, herting, of productive. October. **HOWELL**-S. D. Large; light waxen-yellow; melting, sweet, rich, a vigorous grower and profuse bearer. September. **KEIFFER**-S. D. A vigorous grower, with healthy, dark green foliage and an early bearer; very productive; fruit large, golden yellow, with red cheek; fine for preserving, but must be thoroughly ripened for eating. Excellent when ripened in cool, dry cellar. October.

LOUISE BONNE DE JERSEY—S. D. Large yellow and red, beautiful and good; vigorous grower and immense bearer; most esteemed as a dwarf. September and October. j

**ONONDAGA**—S. Large; yellow; vinous, variable, early and good bearer; popular in the West. October and November.

**SECKEL**—S. D. A most delicious little pear, unsurpassed in flavor, small, yellowish-brown with red cheek; rich, spicy, sweet. September.

**SHELDON**—S. Medium; first rate in every way; tree vigor-ous and productive; very hardy and succeeds in the North. **VERMONT BEAUTY**—S. Medium; yellow, with red cheek; rich, juicy, best quality; tree hardy and vigorous and an early and abundant bearer. October.

PLUMS AMERICAN OR IMPROVED NATIVE PLUMS

Note our plums are all grown on plum roots, and made an unusually strong growth the past season Nothing will yield better returns for the money invested than a plum orchard.

**CHENEY**—Large, round-ish, oblong; color dull mot-tled red, on greenish yel-low ground; flesh yellow, quite firm, quality good; yery valuable variety.

**DE SOTO**—Medium size; bright red, of good quality; very hardy and productive. September.

FOREST GARDEN Large dark red; good, very productive; vigorous growêr.

HAWKEYE-Large, flesh firm; a good shipper; cling-stone; a regular bear-er and very hardy.

MILTON — Large; fine, deep red; skin thin, and flesh firm; good quality;

**WASHINGTON**—S. Medium; smooth, clear yellow with red dots on sunny side; very juicy, melting, perfumed and unusually sweet; growth vigorous.

WINTER VARIETIES DUCHESS DE BORDEAUX.—S. Large size, with a very thick, tough skin which renders it a most valuable keeper for winter use; flesh melting, juicy, rich. December to March. LAWRENCE.—S. Medium; pale, lemon-yellow with brown dots; sweet, juicy, good; tree a vigorous grower. November and December. MOUNT VERNON.—S. D. Medium; light russet, reddish in the sun; flesh yellowish, juicy and aromatic; early bearer. De-cember. PRESIDENT DECUCATION

cember. **PRESIDENT DROUARD**—S. Very large and handsome; melting and juicy, with delicate perfume. March to May. **VICAR OF WINKFIELD**—S. D. Large, long, beautiful, good; tree hardy, very vigorous and immensely productive; a very popular winter pear. November to January.

ROSSNEY PEAR

ripens about a week earlier than Wild Goose; a strong grower, and very productive; clingstone; extremely hardy.

**POTTAWATTOMIE**—Large; yellow ground, overspread with red, and sprinkled with white dots; a strong, vigorous grower, and an immense bearer, hardy.

**ROBINSON**—Medium size; yellow, nearly covered with light red, showy; tree vigorous and enormously productive; a pro-fitable market variety.

**WEAVER.**—Large; very dark purplish red with blue bloom; good quality; a constant and regular bearer; prolific; tree very hardy. August.

WILD GOOSE—Hardy, native, large, deep red, with purplish bloom. Flesh yellow, juicy and sweet. Rapid grower, early and abundant bearer. One of the best natives. July and August.

**WOLF**—Large; a perfect freestone; very popular; immensely productive; vigorous grower and very hardy.

**WYANT**—Large; purplish red; flesh yellow, rich and juicy; excellent quality; semi-cling; early; perfectly hardy. **Probably** the most popular of the American Species.

### **PLUMS---Continued**

#### EUROPEAN PLUMS

**BEAUTY OF NAPLES**—Large; greenish flesh firm, juicy and of fine flavor. September. greenish yellow;

**BRADSHAW**—Large; dark, violet red; flesh green and juicy; a fine early plum; vigorous and productive. August.

COE'S GOLDEN DROP-Large; light yellow; fine; showy, late.

**DAMSON**—Fruit medium; juicy, rather tart; skin dark purple covered with thick blue bloom; fine for preserving; enormously productive. September.

GERMAN PRUNE-Large, long; pur ive. September. purple, rich, popular; hardy and productive.

GUEII-Large; bluish purple; flesh yellowish green, rather coarse, sweet pleasant flavor. September.

**IMPERIAL GAGE**—Medium; greenish yellow; juicy, rich; very hardy and a good bearer. August.

**JEFFERSON**—Large; golden-yellow with purplish red cheek; rich, juicy, high flavored; regular bearer; poor grower. August.

**LOMBARD**—Medium and above; reddish purple; good quality; very hardy, vigorous and immensely pro-ductive, unsurpassed for the West. Last of August.

**MOORE'S ARCTIC**—Of medium size; very dark pur ple with blue bloom, flesh greenish yellow; juicy wit sweet, pleasant flavor; long keeper; very hardy. with

**QUACKENBOSS**—Large oval; deep purple; juicy and sweet, but rather coarse-grained; partial cling-stone. September.

RED EGG-Large, red, firm flesh. Subacid. September.

**REINE CLAUDE DE BAVAY**—Large; greenish yel-low; juicy, rich and excellent; very productive; hardy nd popu-lar. September. 10.32

**SARATOGA**—Medium size; reddish purple covered with hand-ne bloom; supposed to be a cross between Lombard and some Bradshaw.

SHIPPER'S PEIDE—Large; dark purple; very showy; fine, juicy and sweet. September.

SHROPSHIRE DAMSON-Rather small; dark purple; im-mense bearer; one of the most prolific grown. September.

**TATGE**—Origin, Iowa. Very much resembles Lombard; fruit larger and of better quality; bears young; very productive and hardy. September.

**WASHINGTON**—Large; green, somewhat reddened, juicy, sweet, and fine; very productive. August and September.

#### JAPAN PLUMS

AMERICA—Originated by Luther Burbank and pronounced one of his best. The fruit is somewhat larger than the average of the Japan varieties, is much superior in size and quality to any of the native American sorts. Fruit is large to very large, glossy, coral-red; flesh light yellow, firm, of best quality; a splendid keeper and shipper. Ripens about two weeks earlier than Burbank.

**ABUNDANCE**—(Botan.) Beautiful lemon-yellow ground, nearly over-spread with bright cherry and with a heavy bloom. Large to very large, oblong, tapering to the point like Wild Goose. Flesh orange-yellow, melting, rich and highly perfumed. Abundant and annual bearer. Tree a vigorous, upright grower. Has been thoroughly tested. July. **BURBANK**—Very similar to the

Has been thoroughly tested. July. **BURBANK**—Very similar to Abundance, but of deeper color, and ripens later in the season. The fruit is large, nearly globu-lar, clear cherry-red, with a thin lilac bloom. Flesh a deep yellow, very sweet, with a peculiar and agreeable flavor. The tree is a vigorous grower with large and broad leaves; usually begins to bear second year after transplanting. August. **CHALCO**—The fruit is large, flat like a tomato, deep reddish purple with very sweet, rather firm, exceedingly fragrant yellow flesh and small seeds. The fruit is as stemless as a peach and completely surrounds the older branches as thick as it can stick, like kernels on a huge ear of corn. A superior shipping

The cherry everywhere requires a dry soil; they do best on our poorest and dryest soil and if planted in rich, black land, should be planted in the sod, and kept with low heads. Except in a few localities, the sweet varieties do not succeed well in the west.

#### GENERAL LIST OF CHERRIES.

#### Sour Varieties.

BELLE DE CHOISY-Medium, pale red; beautiful and de-licious, but shy; last of June.

**BELLE MAGNIFIQUE**—Large, light red, juicy; moderate grower, productive; late, July and August. One of the most valuable for the west.

**EARLY BICHMOND**—(May of the West.) Medium; red; early; hardy, immensely productive; worth nearly all others for the West; ripens June 15th here.

#### BURBANK PLUM

plum, ripens well when picked green, and keep's nearly or quite a month

**CLIMAX**—Fruit heart shaped, as large as Wickson, and more highly colored, so fragrant that a whole house is perfumed with a single fruit; delicious as could be desired or imagined, and above all, it ripens nearly a month before Wickson.

above all, it ripens nearly a month before Wickson. **OGON**—Medium size. Clear lemon-yellow with light bloom. Flesh thick, meaty, dry, firm. Freestone, long keeper, excellent for canning, moderately productive. August. **BED JUNE**—A vigorous, hardy, upright spreading tree, as productive as Abundance. Fruit medium to large, deep ver-million red, with handsome bloom, very showy. Flesh light lemon-yellow, slightly sub-acid, of good and pleasant quality. Half cling, pit small. Early. Best in quality of any of the early varieties. A thoroughly valuable market variety. **SATUMA** Envit medium to large, broadly conject with a

**SATSUMA**—Fruit medium to large; broadly conical, with a blunt short point. Suture very deep, skin very dark and dull red all over, with greenish dots and an under color of brown-red. Firm, very juicy, quality good, free. Midseason. It is a very valuable sort.

SHIRO-The fruit is produced in the utmost profusion, 18 medium to large, very uniform in size, clear light yellow, and so transparent that the pit can be seen through the flesh, which is firm yet juicy, rich, pleasant, subacid, clingstone; ripens two weeks before the Burbank, and is nearly, or perhaps, quite as productive.

**SULTAN**—The flesh is remarkably firm and solid fragrant, subacid or sweet; dark crimson, beautifully clouded and shaded with light pink, salmon and light yellow. Remarkable for the great proportion of flesh compared with the diminutive seed. The tree grows very rapidly, but is compact and with wood and leaves as much like the Napoleon cherry as like a plum. Exceedingly productive, ripening a week before Burbank; fails like apples as soon as ripe; a great keeper.

**WICKSON**—A sturdy upright grower, productive almost to a fault. Fruit remarkably handsome, deep maroon-red, covered with white bloom; stone small; flesh fine-textured, firm, sugary and delicious. Excellent keeper and shipper; will keep two weeks after ripening.

### CHERRIES

**DYEHOUSE**—A very early and sure bearer; fruit large; rip-ens a week before Early Richmond; very productive, color red.

EMPRESS EUGENTE-Fruit large, dark red, very rich, ten-der and subacid. A superior variety. July.

**ENGLISM MOBELLO**—Large, nearly black; slow grower, but very hardy; rather late; immensely productive and valuable; fruit-bud hardiest of all. July.

LATE DUKE-Large, light red; fine but very shy here; last week in June.

LATE KENTISH—(Common Red.) Like Early Richmond, but ten or twelve days later; hardy and very valuable. Worth the whole race of sweet cherries at the West.

LOUIS PHILLIPPE-Large, dark red, almost black, slightly mild acid, stone small. July.

MAY DUKE-Large, dark red, delicious, early; tree hardy;

MONTMORENCY ORDINAIRE

bears well usually (not always), and quite distinct; most valu-able Duke variety.

MONTMORENCY ORDINAIRE-Mr. Ellwanger says of this variety, "This is no doubt, one of the finest red acid cherries in cultivation, ripening about a week after Early Richmond. The tree is a great bearer and very hardy; fruit of good size and fine flavor, of a shining red color."

NORTHWEST-Originated with D. B. Weir; medium; bright red; very good; hardy.

PEACHES

The peach will succeed best on light gravelly soil; with proper cultivation on almost any soil. Trees one year old from the bud are best suited for planting. The orchard should be kept cultivated and given an occasional dressing of wood ashes. kept cultivated and given an occasional dressing of wood ashes. Keep the heads low, the trunks ought not to exceed three feet in height. Every spring the orchard should be pruned and the shoots of the previous year's growth shortened in. This keeps the head round, full and well furnished with bearing wood. The weaker shoots should be cut back about one-half, and stronger ones one-third; but be sure that you leave a sufficient supply of fruit buds, as the fruit is produced on the wood of the last season's growth. In planting, prune the tops and the roots carefully, reducing the top to a clean whit, and removing bruised and broken roots.

We offer herewith an excellent collection of varieties which will afford good selection for any section of the country where peaches will succeed.

**ALEXANDER**—Logan county, Illinois. Fruit rather large, dark red; flesh thick, white, free; flavor rich, very good; tree vigorous and productive. July. **AMSDEN**—Carthage, Mo. Medium, dark red, very promis-ing; white flesh, partly free. July.

**BEER'S SMOCK**—Large size; yellow flesh; an improvement on Smock Free; a few days later and an annual bearer; Sep-tember and October.

**BLOOD-LEAVED**\_Leaves blood red, very ornametnal; it also bears good, white fruit.

**BOKABA**, No. 3—Grown from seed imported from Bokara, Asia. Very hardy; free stone. Fruit yellow with red cheek. Skin tough and has good keeping qualities. Middle of August.

**CARMAN**—Large, broadly oval; pointed; color white dotted, splashed and flushed with shades of red. Flesh creamy white, tinged with red, vinous, sprightly, good. Claimed to have the same origin as Elberta. Season, early.

**CHAMPION**—Fruit large, delicious, sweet, juicy; best qual-ity of all early varieties; skin creamy white, with red cheek; handsome, hardy and productive and a good shipper. Early August.

CHINA CLING--Large, white, excellent; fine quality; esteemed south. September.

teemed south. September. **CEOSBY**—Medium size; bright yellow, streaked with carm-ine; annual bearer; hardy. Last of August. **CRAWFORD'S EARLY**—A magnificant American sort; very large; yellow with red cheek; productive and extremely popular for market. Middle of August. **CRAWFORD'S LATE**—Superb; yellow and red. Like pre-ceding, but two weeks later. **EARLY BAENARD**—A large yellow peach of good quality; very rich and juicy; a hardy and heavy bearer; popular market variety. July.

ripens

**EARLY CANADA**—Resembles Alexander very closely; ripens same time; medium size; good quality; handsome freestone. **ELBEETA**—Very large; yellow with red cheek; juicy and high flavor; flesh yellow; very profitable and an excellent ship-ping variety. Last of August.

**FITZGERALD**—Fruit large, bright yellow, covered with red; best quality. Early September. **FOSTER**—Very large and handsome; similar to Crawford's Early but ripens a few days earlier.

**OLIVET**—A French variety; this sort takes a place not here-tofore occupied among early cherries. Fruit large and globular, with a very shining, deep red color; flesh red, tender, and vin-ous, sweet; subacid flavor.

**OSTHEIM**—Hardy; fruit large, dark red, juicy, almost sweet, ductive. June. productive.

REINE HORTENSE-Large, bright red, good; splendid but shy; July

ROYAL DUKE-Splendid, large red, hardy; July. Moderate bearer.

**WRAGG**—Very hardy, productive and of fine quality. Nearly black, an excellent late market variety. July.

#### SWEET VARIETIES

BLACK EAGLE-Large, tender, rich; productive; last of June.

BLACK TARTARIAN-Very large, productive; popular, not the most hardy; last of June. **GOVERNOR WOOD**—Large, light red on yellow; excellent, rather hardy; last of June.

KNIGHT'S EARLY BLACK-Large; productive and fine; 20th

of June. LUELLING-

**LUEILING**—(Black Republican.) Originated in Oregon, valuable acquisition; late, hardy, black and very sweet. Co into bearing early; very profitable for market. Comes

NAPOLEON-Large, firm; pale yellow with red cheek; pro-ductive; last of June.

ROCKFORT-Large, amber and red; sweet; new; last of June

WINDSOR—Fruit large, liver colored; distinct; flesh re-markably firm and of fine quality; very prolific. A valuable late variety. From Canada. July.

**YELLOW SPANISH**—Large, pale yellow, with red cheek; firm, juley and excellent; one of the best light colored cherries; productive. June.

GREENSBORO-Very large, color crimson, flesh white. Early July.

GLOBE-Very large, golden yellow; fine flavor. End of September.

GOLD DROF-Large, good quality; hardy, profitable; highly esteemed in Michigan. Last of August.

GOVEBNOR GABLAND—From Ark. Fruit medium, of hand-some form, roundish; deep red; fragrant; flesh thick, juicy, ten-der. Good keeper. July.

**HEATH CLING**—Large, white, productive. Late and very popular market variety.

HILL'S CHILI-Large, skin dull yellow; flesh yellow. Sweet, rich, hardy, productive. Always in demand. September.

### PEACHES—Continued

INDIAN BLOOD CLING-Very large and peculiar peach; flesh red, like that of a beet. Esteemed for pickling and preserving.

JACQUE'S BARERIPE-Very large, surface deep yell-marbled with red, flesh yellow, juicy. Middle of September. yellow, LEMON CLING-Large, orange yellow and red. Superb. September.

LOVETT'S EARLY WHITE—Large to very large, roundish; color creamy white, with considerable bloom. Flesh, creamy white to the plt, tender; and quite rich. Free stone. A popular white variety East and South.

MARSHALL'S LATE-Large, deep yellow; productive. October

**MAYFLOWEE**—The introducers, claim for this new variety, that it is the earliest peach yet produced and nearly a week earlier than Sneed. The fruit is absolutely red all over, even before it gets ripe enough to ship. Fruit large, averaging eight inches in circumference. The tree is a strong, thrifty grower; very prolific, rather inclined to overbear and should always be thinned. Good shipner thinned. Good shipper.

**MOUNTAIN BOSE**—Large, red skin, white flesh; excellent quality. First of August.

OLD MIXON CLING-Large, yellowish white and red; good. September first.

**OLD MIXON FREE**—Large greenish white and red; juicy and rich; most popular. September 15th.

#### APRICOTS

An excellent, early, beautiful fruit. The tree is peculiarly adapted to thorough training on a fence, wall or trellis, where it can be easily protected. **ALEXANDER**—(Russian.) A prolific bearer; fruit yellow,

spotted red. July. ALEXIS-(Russian.) An abundant bearer; yellow, with red

CATHERINE-(Russian.) Strong grower; productive; yellow.

July

in July. GIBB-

GIBE-(Russian.) Fruit years, including prolific bearer;
 J. L. BUDD-(Russian.) Vigorous grower; prolific bearer;
 fruit almost white, with dull red cheek. August.
 MOORPARK-Large; yellow and red; productive and firm.

PEACH--Large; orange and yellow, mottled brown; excel-

#### NECTARINES

The nectarine is much like the peach, save that it has a smooth skin. BOSTON-Large; yellow and red; flesh yellow, sweet and

September good.

**EARLY VIOLET**—Fruit rather large; skin pale yellow; flesh whitish; flavor delicious, melting, juicy, rich. End of August. **STANWICK**—Late; above medium size; roundish oval; skin pale, greenish white; flesh white, tender, juicy, rich.

#### QUINCES

long

BEA'S MAMMOTH—A seedling of the Orange; one-third ger; of the same form and color; fair, handsome, equally as larger; good, and productive.

#### ALMONDS

HARD SHELL-A fine hardy variety, with large, plump kernel; quite ornamental. SOFT SHELL-(Paper Shell.) Rather tender; kernel large,

white and sweet.

#### DEWBERRY

**LUCRETIA**—The best of all dewberries; extremely hardy and very productive; ripens a week to ten days earlier than any blackberry; fruit large and handsome, sweet luscious and a glossy black. The trailing habit renders winter protection very easy in severely cold climates without snow, where that protection may be necessary.

#### HUCKLEBERRY

Well-known in many parts of the country. Succeeds moder-ately well on the prairies, and is in growing demand for its excellent, well-known fruit.

SALWAY—Large yellow, mottled with red cheek; ye flesh; very productive; very valuable late market variety. tober. yellow Oc-

SNEED—Medium, white, excellent quality, productive. The earliest peach known. July. SCHUMAKER—Alexander type; larger, higher color; better

shipper. July

shipper. July. SUSQUEHANNA—Large, superb yellow peach; melting and fine; very handsome. September. STUMP THE WORLD—Very large; creamy white with red cheek; white fiesh, rich and high flavor; productive; valuable for market. September. TRIUMPH—Fruit good size; yellow with crimson cheek; abundant bearer; the earliest yellow flesh peach. July 1st. WAGER—Very large yellow; julcy and fine flavor. Last of

August. WHEATLAND—Large; quality best; deep golden yellow; great bearer. September 1st. WONDERFUL—Large; yellow marbled with crimson; flesh yellow, rich, firm. Ripens very late.

#### THE WORLD'S FAIR PEACH

Originated in eastern Missouri; is a seedling and one of the earliest peaches ever known—ripening on the parent tree as early as the 4th of June. The tree is hardy and vigorous. Fruit very large, roundish and handsome. Color, deep red in the sun, softening to yellowish ground in shade. Juicy and of most excellent flavor. Ripens from 10th to 15th of June.

BUTTERNUT

WHITE WALNUT—A fine native tree, producing large, round-ish nut, which is prized for its sweet, oily, nutritious kernel.

CHESTNUT AMERICAN SWEET—A valuable native tree; useful and or-namental; timber very valuable; nut sweet, of delicate flavor. JAPAN—Dwarf in habit and distinct from other chestnuts. Bears three years after transplanting, producing nuts of im-

**SPANISH**—Makes a handsome round headed tree, bears abundantly; producing very large nuts that find a ready market at high prices.

HICKORY

SHELLBARK—This nut possesses a peculiar, rich, nutty flavor excelled by none. The tree is of sturdy growth; the wood, on account of its great strength, is highly prized. PECAN

BREDA-Small, orange and red; rich, productive. Last of

EARLY GOLDEN-Small; yellow and sweet; productive. Early

-(Russian.) Fruit yellow; medium; early; productive.

August

ROYAL—Large; yellow, with an orange cheek; juicy, rich and delicious. End of July.

AMERICAN BLACK-Well-known and very valuable, both for the toothsome fruit and the timber. ENGLISH or MADEIRA NUT-Excellent fruit; not quite

hardy here. JAPAN—(Sieboldi.) Perfectly hardy here; rapid grower; handsome form; large leaves; very ornamental; nuts produced in clusters; resembles butternut, but smaller, with smooth and thinner shell.

Well-known native; very valuable nut tree. She ly planted. Fruit delicious, popular and salable. the paper shell variety.

#### MULBERRIES

AMERICAN BLACK-Native, productive, valuable. MERICAN WHITE-Well-known, vigorous, productive, hardy

DOWNING'S EVERBEARING-Fruit medium, black; in long BICK'S and NEW AMERICAN-Both similar to Downing's

Everbearing

**BUSSIAN**—Well-known and largely planted; is a very rapid grower and early bearer; color of fruit varies some, but is gen-erally black. Planted largely for hedges.

#### PERSIMMON, NATIVE

Well known, a pretty, small tree with glossy foliage; per-fectly hardy as far north as Bureau county, Ill., fifty miles north of Bloomington. The fruit, after frost, is luscious and much liked.

#### PAWPAW

**NOBTHEEN BANANA**—Perfectly hardy here. Foliage or-namental and fruit relished by most people. Somewhat resem-bles the banana in flesh.

### SMALL FRUITS

#### JUNEBERRY

SHAD or SERVICE BERRY—Tree, blossoms and fruit, all very ornamental and desirable, the latter very delicious fresh or cooked; very hardy.

#### CURRANTS

BLACK NAPLES-Fruit large and productive; the best black currant.

CHERRY-Largest; magnificent red; very vigorous and productive.

FAY'S PROLIFIC-Well-known; a great bearer; quality firstclass; considered by some the best red.

### SMALL FRUITS—Continued

LUCRETIA DEWBERRY

#### CURRANTS-Continued.

**ENIGHT'S LARGE RED**—This is a very choice, large red acid berry for family use; productive.

LEE'S **PROLIFIC**—(Black); considered one of the best black rrants. Fruit large; produces abundantly. Never attacked insects of any kind. Valuable for making jellies, jam and currants wine.

**LONDON MARKET**—For many years this variety has been fruiting in Michigan where it is now planted extensively and regarded as the best market variety of that great fruit state. Plant is extremely vigorous with perfect foliage, which it re-tains through the season, an enormous cropper. Ripens with Victoria, is larger in both bunch and berry, a better bearer. For any use—home garden or market—one of the best.

For any use-nome garden or market—one of the best.
 LONG BUNCH HOLLAND—Very hardy; of distinct growth and foliage; fruit large red in long clusters.
 NOETH STAR—Very strong grower; should be given plenty of room; considered one of the best red varieties; very pro-ductive and hardy; good quality.
 PERFECTION—Bright red, fruit large; cluster long. Very productive. Claimed to be superior to all other red currants.

productive. Claimed Quality unsurpassed.

**POMONA**—Fruit clear bright red, almost transparent; has but few small seeds; hangs a long time after ripe; vigorous, healthy, hardy; most productive; quality best; good shipper.

**RED DUTCH**—The good old standard red sort; immensely productive and always reliable; fruit medium and moderately acid, but good.

**VERSAILLAISE**—Large, deep red; bunches long; productive and good; much like Cherry.

VICTORIA-Splendid; large, bright red; very long bunches; growth slow; good.

WHITE DUTCH-Excellent; productive; popular.

WHITE GBAPE—Very large; yellowish white; sweet or very mild acid; quality excellent, the finest of the white sorts; very productive.

#### GOOSEBERRIES

CLUSTER—(American Seedling.) An immense grower and bearer, much like the Houghton, but fruit smaller, rounder, thicker skin. CROWN BOB—(English.) Large, red, oblong, hairy; good.

**DOWNING'S SEEDLING**—One of the best American varie-ties; large, greenish, productive; fine; free from mildew; planted more largely than any other variety.

**HOUGHTON**—Hardy; entirely free from mildew; well known rt; color pale red; sweet, tender, good; enormously productive. sort;

**INDUSTRY**—(English.) Berries of large size, excellent flav-or, pleasant and rich; color dark red; strong upright grower; immense cropper; less subject to mildew than most foreign sorts.

**KEEPSAKE**—Fruit large; straw colored, excellent flavor; good market sort; one of the best English sorts for this climate. excellent flavor:

**PEABL**—Very prolific; has been tested and ranks among the best in vigor of growth, freedom from mildew and productive-ness; same color as Downing, fruit rather larger and just as prolific.

**BED JACKET**—(Josselyn.) Has no rival; an American seed-ling of large size; prolific and hardy; a success everywhere; en-tirely free from mildew both in leaf and fruit; a wonderful bearer; strong grower.

**WHITE SMITH**—(English.) Large, roundish oval; yellow-ish white; lightly downy; of good quality.

#### BLACKBERRIES

**ANCIENT BRITON**—One of the hardy varieties; vigc berries of good size and fine quality; a good market berry. vigorous:

**EARLY HARVEST**—One of the most valuable where it succeeds; not entirely hardy in the north, and needs winter protection; very early; one of the first to ripen; its good shipping qualities make it profitable.

**EARLY KING**—"The Money Maker." The finest early berry grown. Perfectly hardy, stands 28 degrees below zero and bears a good crop the following year. An annual bearer of choice fruit. Berries are as large or larger than Snyder and better quality. One acre of these berries will net the grower a handsome profit.

**ELDORADO**—Among the good points of this valuable new blackberry are great productiveness, hardiness, extra fine qual-ity and sweetness of flavor; without core; the berries are large, jet black, borne in clusters and ripen well together; sweet, melting, rich and pleasant to the taste.

ERIE--Vigorous, productive and early; berries large and of good quality.

**KITTITINNY**—Usually quite hardy and immensely produc-tive; fruit large, long and sweet.

Extre-vigorous, productive and carly; berries large and of good quity.
Intrituing on an aver.
Intrituing the long and sevet.
Introduct, having been brought from that Arctic country fourteen years ago, and has been fruited by M. La Grange in Vermilion county, Illinois, for the past twelve years and in that time has not received any injury from cold winters. It is the hardiest berry yet introduced; it grows on canes like the Lawton or Snyder, but differs from them as regards fruit stems. This plant sends out its fruit stems from the ground up and each fruit stem has ample foliage, each berry having a leaf. The fruit ripens in the shade, which material and at the fourt stems from the first bloom are about two-thirds grown, there comes on a second crop of bloom as profuse as the first bloom end, and where fruits from second bloom begin. The first fruit ripens about two-thirds grown, there comes on a second crop of bloom as profuse. It is not an everbaarer. It is very productive, one-ninth of an arce yielding 571 quarts. Rev. J. R. Reasoner estimated 5,000 quarts per arce. It is free from the first bloom end, and where fruits flom agrow that is not an everbaarer. It is very productive, one-ninth of an arce yielding 571 quarts. Rev. J. R. Reasoner estimated 5,000 quarts per arce. It is free from disease than any blackberries he has ever seen. (See report of Horticultied Society, writes under date of November 14. How they be the form of a stree argues the server are seened. **BATHBUN**—Strong grower, hardy, having endured twenty degrees below zero and producing a good crop. Forms a neat, compact bush, producing its immense fruit abundantly. Fruit is sweet and luscious, no hard core, of extra high flavor, stand-ing at the head of all for quality, jet black, small seeds. Firm enough to ship and handle well. Berries an enormous size.

**STONE'S HARDY**—Strong grower; stocky; ripens early; of medium size; black and glossy.

**SNYDEE**—A strong grower; very hardy and very produc-tive; of medium size. Good, salable and profitable. The fruit has no hard, sour core, but is sweet to the center; reliable. Seven acres yield 43,000 quarts.

**TAYLOR'S PROLIFIC**—One of the largest blackberries grown; fruit of the best quality, melting and without core.

### RASPBERRIES

We advise that Black Raspberry plants in small lots be shipped by express to insure safe arrival. Strong grower

We advise that Black Raspberry plants in small **BLACK DIAMOND**—From Michigan, 1901. Strong grower and hardy; berry medium, very sweet, highly recommended. **CARDINAL**—New. The berries are large, dark red; firm, with an agreeable, pure, rich flavor, which is brought to its highest perfection when canned or cooked in pies. Season is rather late. Berry adheres well. Its growth is of the strongest, the canes growing 15 to 20 feet, and making from 10 to 15 canes from one hill or plant. Very few thorns. Foliage perfect. Won-derful producer and most hardy. **CLUMEIAN**—New; deep purplish red; sweet and highly flavored; extra strong canes. Wonderfully productive; berry large.

large

**CUMPERLAND**—In size the fruit is simply enormous, far surpassing any other Black cap, quality equal to Gregg; very firm, excellent shipper; strong grower and unusually prolific. firm, Mids

Midseason. **CUTHBERT**—One of the best, most profitable berries for general planting; upright, very hardy, prolific; fruit brilliant red, juicy, excellent quality. **EUREKA**—Very early and productive; fruit large; black: strong grower; hardy; an excellent market variety. **GREGG**—Reliable; hardy; the very largest and most produc-tive black cap. **COLDEN OUEEN**—The best vallow receberry yet introduced

GOLDEN QUEEN—The best yellow raspberry yet introduced; vigorous, hardy and remarkably productive; upright. HAYMAKER—An Ohio seedling of the Columbian and Shaffer type, but more productive than either. Fruit larger and firmer. Claimed to be the most profitable Raspberry on earth. HILBORN—New; black cap; superior quality; fruit large; very hardy; originated in Canada. HOOSIER—Black cap is perfectly hardy. Does not winter kill in the least, and matures its entire crop of extra large, jet black, glossy and fine flavored berries. One week earlier than Cumberland and more productive. It resists drought, owing to its vigorous roots going so deep into the soil, and has positively never been injured by anthracnose. It is the pocket-book filler, and has well earned the distinction of being the "Dollar a gal-lon berry." KANSAS—New; ripens just after Souhegan; berry as large or larger than the Gregg; very vigorous and productive; Black Cap

**LOUDON**—The best red raspberry yet introduced and the most productive; large size; bright color; very hardy; good shipper.

MAMMOTH CLUSTER--Old and reliable; large black cap.

MAMMOTH CLUSTER—Old and reliable; large black cap. MILLER—New; red; large and very productive. NEMEHA—New; black cap; very hardy; ripens with Gregg and resembles it in fruit. OLDER—Very hardy, vigorous and productive; herries sweet and rich, of large size; jet black; ripens before Gregg. PLUM FARMER—This is one of the greatest black cap rasp-berries that has been introduced for years. Succeeds everywhere; perfectly hardy. The plants are very healthy, free from an-thracnose and a strong grower; have a silvery bluish appearance, when matured in the fall. The fruit is grayish black, very large and firm, attractive, of the very highest flavor, and is adapted for evaporating, as well as for fresh market or home use. It is simply enormously productive. The fruit ripens quite early and most of it in one week. An excellent shipper. ST. REGIS EVERBEARING—The "early 'till late" Raspber-

**ST. REGIS EVERBEARING**—The "early 'till late" Raspber-—Raspberries for four months—that's what you get when you and St. Regis—the new everbearing variety. Moreover, they e not only raspberries, but raspberries of the very highest ade—in size, in brilliant crimson color, in firmness, in flavor, be variety has been very aptly termed "the early 'till late" plant are re not rade—i The

ots be shipped by express to insure safe arrival. variety; for it is the first red raspberry to give ripe fruit, while it continues to produce berries without intermission until late in October. St. Regis is of pure American blood and of iron-clad hardincss; the canes enduring the severest cold uninjured and are wonderfully prolific. In addition to the bright crimson color and large size of its fruit, it is so firm and rich in sugar that it will stand shipping two hundred miles, arriving at mar-ket in first class order; and it can readily be kept in perfect condition for several days after being gathered. In brief, it is such a marvel as to size, beauty and excellence, it has been given the name St. Regis; the finest hotel in the world, with guests who are most fastidious and discriminating of all epicures. Un-like any other raspberry, the St. Regis yields a crop of fruit the season it is planted. Plants of it planted in early April gave ripe berries on June 20th of the same year. For four weeks thereafter the yield was heavy and the canes continued to produce ripe fruit freely without intermission, until the mid-dle of October. The berries were large and beautiful, firm and full flavored to the very last. St. Regis was awarded a certifi-cate of merit by the AMERICAN INSTITUTE, September 20. 1910. 1910

SHAFFER'S COLOSSAL-New; purple; large, very productix

**SOUHEGAN**—Early; black cap; very productive. **TURNER**—Upright; almost thornless; vigorous; red; bears to 150 bushels to the acre. 125TYLER-Black cap; early; of best quality and very prolific.

LOUDON RASPBERRY

## STRAWBERRIES

To insure safe arrival Strawberry plants must be sent by express or mail. Varieties marked S. are Staminates or self fertilizers and those marked P. are Pistillate or imperfect flowering varieties and should be planted with Staminate varieties.

(S) BRANDY WINE-This is the handsomest berry grown. Fancy market variety of fine rich flavor and large size. It is dark red to center.

(S) BEDERWOOD — Most productive. Con-sidered the very best early variety.

(P) BUBACH'S No. 5 ---Very strong, exceed-ingly stocky. Fruit large, wonderfully prolific, very

popular. (S) CAPTAIN JACK-Vigorous, hardy, very early. One of the best.

(P) CRESCENT SEED-LING - Celebrated, a LING - Celebrated, a wonderful bearer.

(S) CHAS. DOWNING —Old reliable; one of the best.

#### SENATOR DUNLAP STRAWBERRY

(S) CLYDE—New; abundant bearer; fruit large; strong grower, succeeds everywhere.
 (S) EMPRESS—Plant large and vigorous. Color dark red, beautiful form; very large, conical. Season late.

(S) ENHANCE-Very productive, well tested and satisfac-(S) HAVILAND SEEDLING—Said to be the earliest large berry yet produced.
 (S) JESSIE From Wisconsin; it has no defects worth nam-

ing

(S) MANCHESTER-Vigorous; enormously productive, fruit

 (S) MANCHESTER—Vigorous, chormously productive, fruit large, firm, late.
 (S) BUBY—Fruit large; color bright crimson; firm; quality very best; exceedingly prolific; strong grower; succeeds every-where; good shipper. When better known will be planted largely.
 (P) SAMPLE—A vigorous grower; productive; berries me-dium to large in size; bright blood red. Quality fair. Season late.

(5) SENATOR DUNLAP—Introduced 1900, by Rev. J. R. Reasoner, Champaign county, Illinois; is in bearing here and has given the greatest satisfaction as to hardiness, productiveness and quality; blossoms perfect; fruit generally large, bright, or slightly dark red, very glossy, firm, a splendid keeper and ship-per, and one of the best canning berries. Of the Warfield type.

(5) SPLENDID—From Northern Illinois; the best berry for home market and table use yet produced; better and larger than Crescent and ripens one week earlier; berries even in size, all ripening about the same time; very prolific; flavor excellent; ripening about self-fertilizer.

(S) SHARPLESS SEEDLING-Largest, most productive of all strawberries.

(S) The "3W"—We have tested this berry for four years and it has given satisfaction in every way. The plant is an ex-tra strong grower and withstands drought and frost. Stools very strong. Foliage very abundant. Blooms perfect. An enormous bearer. Fruit, luscious, extra large dark red. The very steat for shipping. enormous bearer. Frui very best for shipping.

(P) WARFIELD'S No. 2-Most highly esteemed for its large, uniform size and good shipping qualities.

### GRAPES

Our grapes are strong, healthy plants and will be graded up to the highest standard.

AGAWAM-(Roger's No. 15.) Old, reliable, large, red, one of the very best; ripens early.

**BRIGHTON**—Bunch large, well formed; berries above med-ium; excellent flavor and quality; early.

**CAMPBELL'S EARLY**—Strong grower; large healthy foli-age; productive; good keeper and shipper; ripens with Moore's Early; bunch and berry large; glossy black.

CATAWBA—Berries large, round; copper color when fully ripe; one of the latest; sweet, rich, musky flavor.

CHAMPION--(Talman.) Black, very early; bunch and berry medium; quality good.

**CLINTON**—Black, bunch small to medium; compact; flesh juicy; berries small; wine grape.

**CONCORD**—Black, early; decidedly the most popular grape in America and deservedly so; bunch and berries large; hardy, healthy and productive.

**COTTAGE**—Black; a seedling of Concord; very similar in growth, size and quality; ripens a few days earlier.

**DELAWARE**—Red; bunch small; compact; skin thin but firm; flesh juicy, very sweet; of best quality; ripens with Con-cord; hardy and productive. thin

**DIANA**—Red; bunch medium, very compact; berries medium of good quality for both table and wine.

**DBACUT AMBER**—Red; very early; bunch and berry large; flesh quite foxy; hardy and productive; valuable in high altitudes.

**EATON**—Black; similar in foliage to Concord, in growth, health, hardiness of vine, and every other respect its equal. Bunch and berry much larger. Ripens a little before Concord.

**ELVIRA**—White; bunch and berry medium; very compact; strong, healthy and productive; ripens before Catawba. **EMPIRE STATE**—White; bunch medium, long, compact, ber-ries medium; quality best; ripens early.

**EUMELAN**—Black, bunch medium, shouldered, compact; ber-s medium; flesh tender, rich and vinous; ripens a little before Concord.

**HARTFORD**—Rlack; bunch large, shouldered; berries large; flesh sweet, pulpy; hardy and vigorous; productive; very early. ISABELLA-Black; bunch large, berries large; quality good; vigorous; ripens late.

**IVES**—Black; bunch long, medium to large; berries medium; flesh sweet, somewhat foxy; hardy and vigorous; early.

**JEFFERSON**—Bright red; bunch large, double-shouldered; berry medium to large; skin thick, flesh tender; sweet of the very best quality; late.

LINDLEY-(Roger's No. 9.) Red, bunch medium; not us-ually shouldered, berries large, flesh tender; sweet, with high aromatic flavor, of best quality; vigorous and hardy; ripens with Delaware.

MCPIKE—We have in this new wonderful black grape, great size, superior quality, hardy wood and bud, very large leath-ery leaves; fruit ripens same as Worden. This new grape ripens evenly and has only one and two seeds. Skin tender and pulp melting.

MARTHA—(White Concord.) Bunch medium, compact; shouldered; tender; flesh very sweet; quality good; vigorous and healthy.

MERRIMAC-(Roger's No. 19.) One of Roger's best black grapes; bunch very large; berries large; flesh sweet, tender, good.

**MOORE'S EARLY**—Bunch large, berry round, black, very early; ripens ten days before Hartford Prolific. With high culti-vation produces a heavy crop.

**MOORE'S DIAMOND**—White; well known; bunch and berries large, skin thin but tough; flesh tender; hardy, productive, early; fine quality.

**MOYER**—A red grape from Canada; resembles the Delaware but more vigorous in growth; early.

NIAGARA-The most popular white grape; berry and bunch ry large and handsome; ripens with Concord; very vigorous and productive.

NORTON'S VIRGINIA-Black; bunch long; berry small; flesh tender, very late. One of the most reliable wine grapes.

**POCKLINGTON**—Golden yellow; bunch large, very compact; berries large, covered with a beautiful white bloom; sweet and juicy; large, healthy foliage; vigorous and productive. **SALEM**—(Roger's No. 53.) Berry large, round, coppery red; bunch large and compact; one of the very best; hardy and pro-ductive.

ductive.

**VERGENNES**—Dark red; bunch medium to large, berries large, firm, sweet, juicy; quality best; hardy.

**WORDEN**—One of the best black grapes; berry and bunch large; very productive and hardy.

WODRUFF RED-Strong and vigorous grower; very large, handsome, hardy; unusually productive; ripens with Concord. WYOMING RED-Best early red; double the size of Dela-ware; ripens a week to ten days in advance of Concord.

### GARDEN ROOTS

#### ASPARAGUS

To succeed with Asparagus the ground should be plowed thoroughly or spaded to a depth of not less than 12 inches, and well pulverized. For garden culture the plants should be set from 12 to 15 inches apart each way, and planted from 3 to 5 inches below the level of the ground. For cultivating with horse power, the plants should be set from 12 to 18 inches apart in rows, and rows 4 feet apart. Where planting for market the number of plants to the acre, 12 inches by 4 feet, 10,890; 15 inches by 4 feet, 8,712, and 18 inches by 4 feet, 7,260.

BARR'S PHILADELPHIA MAMMOTH-Enormous in size. With good cultivation comes in earlier and twice as large as Conover's Colossal.

COLUMBIAN MAMMOTH WHITE-This is a most distinct variety. Stalks are very large, produced abundantly and very early.

CONOVER'S COLOSSAL-The well known old standard variety.

PALMETTO-Large growing, bright green, productive sort; quite early.

**STARKEY'S MAMMOTH EARLY PROLIFIC**—A highly val-uable, new, early sort, from ten days to two weeks earlier than other varieties. The color is notably different from other sorts.. Stalks are mammoth in size, tender and succulent. It is be-yond question the finest, largest, earliest and most profitable Asparagus yet produced. Keeps well after being cut.

#### HORSE RADISH

Well known; should have a place in every garden.

#### RHUBARB-(Pieplant)

LINNAEUS-Very large, productive, excellent. VICTORIA-Very large, long, great market sort.

### ORNAMENTAL DEPARTMENT

#### HEDGE PLANTS

BERBERRY Common-Very desirable, foliage green; hardy, red berries.

**BERBERRY PURPLE LEAVED**—Leaves, flowers and berries purple. One of the best hardy shrubs. Makes a beautiful hedge for the lawn or garden.

**BERBERRY THUNBERGII**—From Japan; of dwarf grace-ful habit; foliage small, changing to beautiful bright red early in autumn. Very showy.

**BUCKTHORN FRANGULA**—This variety of the Buckthorn makes a beautiful hedge. It is perfectly hardy and an unusually rapid grower. The foliage is very striking. It can be used either for a garden or lawn hedge. It will make a hedge ten feet in height if permitted to grow that tall, or it can be kept trimmed to any desired height. It is well adapted to the north on account of its hardiness.

**BUCKTHORN ENGLISH**—(Rhamnus Catharticus)—A robust, hardy shrub with dark green foliage. Flowers white. Black small fruit. Makes an excellent ornamental hedge.

HONEY LOCUST-Very rapid, thorny, useful, ornamental; hardy.

**LOCUST**—(Black or yellow.) Of rapid growth; very valuable for timber, as well as ornamental; flowers white, very fragrant, in long racemes.

OSAGE ORANGE-Best for hedges; rapid grower and defensive.

**PRIVET**—Amoor. (Amuriense.) This variety is of a slender, graceful growth. Foliage lighter than the Common Privet. Retains its color remarkably well during the winter. Is hardy and makes a fine hedge.

**PRIVET**—California. Makes one of the most handsome hedges, has proven very hardy here.

We also have other varieties suitable for ornamental hedges, such as Syringas, Upright Honeysuckles, Lilacs, Pyrus Japonica or Quince Japan, Hydrangea P. G., Snowberry, Spireas, etc., which will be found under shrubs.

### **EVERGREENS**

#### ARBOR VITAE

AMERICAN—Fine form; lightish green, flat foliage; vigor-ous, excellent for screens and hedges.

CHINESE OR ORIENTALIS—Beautiful, upright, vigorous; foliage light colored; has proven hardy here; a great favorite South; stands the sun well.

COMPACTA-Of dwarf, compact habit, and deep green foliage

**GLOBOSA**—Of dwarf globose form, with slender branches and bright green foliage. Perfectly hardy and very desirable. **PLICATA**—A handsome hardy variety; foliage plaited, mas-sive and of a rich, dark green color.

**PYRAMIDAL**—Very upright, same habit as Irish Juniper; growth very dense, with rich, dark, luxuriant, green foliage. Its superior hardiness entitles it to a place in every yard or lawn.

SIBERIAN-Of slow, compact, perfectly hardy growth and beautiful form; most esteemed ornamental variety.

**VERVAENEANA**—A distinct, handsome variety, foliage beau-tifully marked with golden spots.

#### BALSAM FIR

The most popular American Evergreen; form pyramidal; fol-iage dark, rich green above, silvery beneath; hardy.

#### BOX DWARF

Very beautiful with fine, light green foliage. Used princi-pally for borders and edging, for which purpose it is the best plant in cultivation.

#### HEMLOCK

very beautiful native variety. Thrives well everywhere and is exceedingly ornamental.

#### JUNIPER

ENGLISH-A handsome, compact, small tree.

**IBISH**—The most esteemed variety; growth vigorous, very right and compact; of excellent color, and hardy. **PROSTRATE OR TRAILING**—Low, creeping, vigorous and upright pretty.

### **DECIDUOUS ORNAMENTAL TREES**

#### AILANTHUS

Commonly known as the Tree of Heaven. Very tall, fast growing tree, transplants easily.

#### ASH

AMERICAN WHITE—Native, well known; hardy, vigorous, upright. Ornamental and exceedingly valuable. EXCELSIOR—European. A tree of rapid growth with spread-ing head. Very desirable for the lawn or street planting.

#### ALDER

**EUROPEAN**—A very rapid growing tree, height 40 to 60 feet. Foliage roundish, wedge-shaped. Especially adapted to most situations. BEECH

**PURPLE LEAVED**—Most superb; striking deep foliage; usually hardy and a fine lawn tree.

#### BIRCH

**EUROPEAN WHITE**—A very graceful tree, with silvery ite bark. Vigorous grower which assumes an elegant weepwhite bark. ing habit.

#### BUCKEYE

A fine native tree, having pale green leaves and yellow flow-ers. With age the tree forms a globular head twenty to forty feet in height.

#### CATALPA

**BUNGEI**—The beautiful umbrella-shaped Catalpa. Forms a symmetrical head. Leaves large, heart shaped, and of a very dark green. Very desirable for the lawn, park and cemetery.

**SPECIOSA**—(The hardy Catalpa.) Highly esteemed and is being largely planted as a timber tree; and while it is thus use-ful, there is no more ornamental tree grown. Large heart-shaped leaves and immense clusters of tri-colored flowers.

**JAPAN**—(Kaempferii.) This is one of the finest lawn trees. Blooms profusely when two or three years old. Flowers sweet scented. Hardy and vigorous.

#### CHERRY

WILD BLACK—Extremely hardy. Most valuable timber tree. Unusually rapid grower. Very ornamental, and when in bloom a grand sight. Flowers sweet-scented.

#### CRAB APPLE, DOUBLE FLOWERING

**BECHTEL'S DOUBLE FLOWERING CRAB**—Most beautiful of all Flowering Crabs. At a distance the pretty medium sized tree seems to be covered with dainty little roses of a delicate pink color. Very fragrant, blooms when young.

AMERICAN WHITE—Most notable and desirable shade tree; succeeds everywhere. Used largely for street planting. Rapid grower and very hardy. ENGLISH—(Campestris.) A lofty tree of rapid growth. Leaves smaller and finer cut than the American. Bark darker colored; makes a handsome tree of noble appearance. SCOTCH—A rapid growing spreading tract with large nearby

**SCOTCH**—A rapid growing, spreading tree; with large, rough, dark green leaves. Very valuable

SAVIN-Low, spreading, with dense, rich, dark green foli-age; unequaled for low screens or clumps; perfectly hardy; foreign.

**SWEDISH**—Very handsome, upright, hardy, with beautiful light green foliage; contrasts finely with the Irish.

#### MAHONIA AQUAFOLIA

HOLLY-Very beautiful, shining green leaves and red berries. PINE

AUSTRIAN OR BLACK-Truly magnificent; growth hardy and remarkably strong, with long, stiff, yellowish leaves; thrives admirably west.

SCOTCH-Immense grower and very popular; of beautiful form and color; leaves short, bright green, a most superb tree.

**WHITE**—Noblest American sort; very vigorous here; excel-lent to transplant, and of fine form and color; in breadth and massiveness only equaled by the Norway Spruce.

#### RED CEDAR

Well known, valuable, very vigorous, fine for screens, and bears clipping into almost any shape.

#### RHODODENDRON

This, wherever known, is universally acknowledged to be the most showy, magnificent, hardy Evergreen shrub that grows. Blooming in June it is a grand sight. Should have partial shade during summer, and protected with leaves and brush over win-

#### SPRUCE

WHITE AMERICAN—A well known native; growth moder-e, regular, beautiful; considerably like the Norway Spruce ate, regular, and popular.

**NORWAY**—Most esteemed hardy Evergreen; of vigorous and regular growth; foliage bright green, dense; superb for screens and hedges.

**KOSTEE'S BLUE**—A rare, elegant tree with foliage of a rich blue. One of the most distinct and striking of the Spruce family. A free grower and perfectly hardy.

#### HACKBERRY

**NETTLE TREE**—A rare native tree, with elm-like habit. Very hardy and ornamental. Makes a very fine street tree and is desirable.

#### HORSE CHESTNUT

**EUROPEAN OR WHITE-FLOWERED**—Well known. Forms a handsome, large sized tree of regular outline. Hardy and free from disease. Large spikes of white flowers slightly marked with red; May. As a lawn or street tree it has no superior.

#### JUDAS TREE

**RED BUD**—A beautiful, hardy native. Should be in every collection. Flowers reddish purple, appearing before the leaves.

#### KENTUCKY COFFEE TREE

Hardy native. Very sparse, coarse shoots. Foliage hand-some. Splendid lawn tree.

#### LARCH

**EUROPEAN**—Elegant picturesque form. Valuable for ber. Should be planted in early spring. Does well here. Valuable for tim-

#### LINDEN

AMERICAN—(Basswood.) Foliage large, very vigorous and namental. Transplants well. When in flower, is most adornamental. Tra mirable for bees.

CATALPA BUNGEI

### **DECIDUOUS ORNAMENTAL TREES**—Continued

#### MAGNOLIA

**ACUMINATA**—Magnificent, vigorous and valuable. Foliage large; blossoms blush. Hardy.

SOULANGEANA-Large, beautiful purple and white flowers. Thrives well here. Blooms early and profusely.

#### MAPLE

**ASH-LEAVED**—(Box Elder.) An esteemed native variety. Fine form and peculiar foliage. Vigorous and hardy.

**NORWAY**—A compact, handsome tree with large dark green leaves. Perfectly hardy. One of the best for shade, lawn and park.

**SCHWEDLERII**—A handsome variety of Norway maple; young shoots and leaves bright purplish and crimson, changing to purplish green in the older leaves. Very desirable.

**SILVER LEAVED**—(White or soft.) A well known timber and shade tree. Very rapid grower, hardy. Can furnish in large quantities and of many sizes.

**SUGAR**—(Hard.) Most valuable and beautiful native Maple; of slow growth, great hardiness and permanence.

**SYCAMORE LEAVED**—A fine, hardy, vigorous variety, much resembling the Norway Maple.

**WIER'S CUT LEAVED**—A handsome variety of the Silver Leaved type. Equally hardy and vigorous. Of drooping, grace-ful habit. Leaves regularly cut. We consider this one of our handsomest lawn trees.

MAPLE, ASH LEAVED

**EUROPEAN**—Very hardy, vigorous and handsome, with superb clusters of scarlet berries. Popular, succeeds everywhere. Beautiful fine foliage.

**OAK LEAVED**—A variety of the preceding with dense, beau-tiful head and hoary, lobed leaves; fruits early and profusely; fine.

#### OAK

ENGLISH BOYAL-Of spreading, slow growth. Very orna-mental and desirable.

**PIN**—(Palustris.) Foliage dark green, finely divided. Highly ornamental. Assumes drooping habit with age. Used largely for park planting.

#### PAULOWNIA

**IMPERIALIS**—A tree of tropical appearance from Japan Of unusually rapid growth. Leaves, twelve to fifteen inches in diameter. Flowers in large upright panicles, in May.

#### PEACH

**DOUBLE FLOWERING**—Very ornamental. Flowers double, white and pink like small roses.

#### PLUM

**PRUNUS PISSAEDI**—(Purple Leaved Plum.) Very orna-mental; makes a beautiful, medium sized tree, with dark purple foliage. Desirable and hardy.

#### POPLAR

**BALM OF GILEAD**—Native species; large glossy leaves and vigorous growth.

**CABOLINA**—Of robust growth, pyramidal in form; large glossy leaves, pale to deep green; one of the best. Is now being used largely for street planting, wind breaks and screens.

**LOMBARDY**—Well known; remarkable for its erect, rapid growth, often attaining a height of 100 feet. Planted largely in landscape work.

**SILVER LEAVED**—A tree of remarkably rapid growth and spreading habit. Leaves large glossy green above and white or silvery beneath. Succeeds everywhere.

#### SALISBURIA

**MAIDEN HAIR OR GINKGO**—A rare and beautiful tree with fern-like foliage; tree medium size and rapid growth; desirable for lawn planting.

#### SYCAMORE

**AMERICAN**—(Buttonwood.) Large, well-formed, fast grow-ing tree, bearing profusion of curiously pendant balls; excellent shade and street tree.

**JAPAN**—(Oriental Plane.) A lofty, wide-spreading tree; heart shaped leaves. Valuable for its handsome foliage and free growth, often attaining a height of 100 feet.

#### TULIP TREE

**WHITEWOOD**—Superb and valuable native tree of the Mag-nolia family; growth very rapid, with glossy foliage and tulip-like flowers succeeds admirably here. The timber is much used in cabinet work; has no superior as a shade or lawn tree. Have a fine stock of them.

#### THORNS

**PAUL'S DOUBLE SCARLET**—Very beautiful; flowers of a bright scarlet red. The best of its color.

**DOUBLE WHITE**—Very ornamental on account of both fol-iage and flowers; flowers small double white.

#### WILLOW

GOLD BARK-Rapid, st ornamental, hardy, valuable. stately growth, showy golden bark;

**LAUREL LEAVED**—Large, shining leaves, resembling the Laurel; very beautiful tree.

**BOSEMARY**—A very distinct and ornamental tree, with long, glossy silvery foliage. Makes a beautiful tree for the lawn. Of medium size.

**TRIANDRA**—One of the very largest, most vigorous and hardy Willows. Foliage long, dark and glossy.

WHITE OR GRAY-Tall, hardy, vigorous grower; unsur-passed for wind breaks.

MAPLE, WIER'S CUT LEAVED

MOUNTAIN ASH

## WEEPING TREES

#### ASH

EUROPEAN WEEPING-Well known; rapid growing; one of the finest for lawns.

### BIRCH

**CUT LEAVED WEEPING**—Erect. stately, rapid, hardy, with long, fine pendant branches and delicately cut leaves; the trunk very white; no tree more elegant for the lawn or yard. Un-doubtedly the most popular of all weeping trees.

#### CHERRY

**WEEFING**—Very ornamental; makes a small round headed tree with very slender, drooping branches.

**CAMPERDOWN**—A Scotch variety; grafted five or six feet high, it forms a very umbrella-like head; large shiny leaves. Very fine.

#### LINDEN

**WEEPING**—White leaved. A distinct variety; grafted five or six feet high; magnificent large leaves, silver white below and dark green above; branches drooping, stout and heavy.

#### MOUNTAIN ASH

WEEPING-A strong growing and remarkably pendant; very striking with its handsome foliage and red berries. Hardy.

#### MULBERRY

**TEAS' WEEPING**—A variety of the well known Russian Mulberry. Forms a perfect unbrella-shaped head, with long, slender branches which droop to the ground, parallel with the stem. Very beautiful and hardy. WILLOW

**COMMON WEEPING**—Our common, well known Weeping Willow. Always beautiful but sometimes not hardy.

**KILMARNOCK WEEPING**—Superb variety; hardy, vigorous, with a very regular, graceful pendant habit.

### **ORNAMENTAL SHRUBS**

#### ALMOND

DOUBLE FLOWERING-Dwarf, pink; flowers like small roses; very double; early; profuse.

**DOUBLE FLOWERING**—Dwarf, white; robust, hardy; flow-ers equally as profuse as the above. Exceedingly beautiful.

ALTHEA

**ROSE OF SHARON**—Esteemed for summer and autumn flow-ers. We have a select assortment of the best named varieties, double and single, some twenty sorts, including the following choice varieties:

oice varieties: Ardens—Double, violet-rose. Boule de Feu—Very Double, bright red, late bloomer. De la Reine—Semi-double white. Juc de Brabant—Very double dark red. Fastuosus—Semi-double, rose-white. Jeanne de Arc—Double white. Lady Stanley—Large, semi-double rosy-white. Pompon Rouge—Very double, purplish-red. Pulcherrimus—Large, double, rosy-white. Speciosus—Double, flesh-white. Totus Albus—Single, pure white. We have them in Tree as well as Bush form. WashEda TED LEAVED—A very handsome variety w **VARIEGATED LEAVED**—A very handsome variety with fol-iage finely marked with light yellow. Flowers double purple.

### BERBERRY

**RED-FRUITED**—(Common.) Very hardy; growth dense; has nice little flowers, and becomes most profusely covered with tart, red berries all winter.

BERBERRY THUNBERGII

#### WILLOW-Continued

NEW AMERICAN-Slender, vigorous, hardy, very ornamental.

**BOSEMARY**—Forms a very handsome, striking, round headed small tree, with slender branches and silvery foliage. WISCONSIN WEEPING-A large tree with long, droopin branches, similar to the Common Weeping, but much hardier. drooping

#### TEAS WEEPING MULBERRY

#### BERBERRY-Continued

**FURPLE-LEAVED**—Leaves, flowers and berries purple () of the very best hardy shrubs. Makes a beautiful clump.

**THUNBERGII**—A very pretty variety from Japan; of dwarf, graceful habit; foliage small, changing to beautiful bright red early in fall; very showy.

#### CALYCANTHUS

**CAROLINA ALLSPICE**—Sweet scented shrub. Wood and flowers deliciously fragrant; hardy; very popular; flowers double, purple.

#### CHIONANTHUS

**WHITE FRINGE**—A very showy shrub, with large glossy foliage, and delicate, fringe-like white flowers in drooping racemes. May and June.

### CORNUS-Dogwood

SANGUINEA—White leaves and red branches, ing in winter on account of its dark crimson bark. Very strik-

MASCULA—(Cornelian Cherry.) A large bushy growing shrub, with a mass of bright yellow flowers in early spring.

FLORIDA—White. Hardy small tree, beautiful; large white flowers in May. Exceedingly ornamental. profuse. SIBERICA-A remarkable variety; very choice. Bark bright red in winter.

#### CURRANT

FRAGRANT MISSOURI-Profuse, early, yellow, fragrant, hardy

FLOREROSEA-Double flowering, pink; very beautiful; early.

#### DAPHNE

**MEZEREON**—A small, erect shrub; the earliest flowering shrub; pink, in clusters.

#### DESMODIUM

**PENDULIFLORUM**—From Japan. Makes a beautiful shrub with drooping branches, covered with numerous pea-shaped pur-ple flowers. From August to frost.

#### DEUTZIA

CANDIDISSIMA-Double white flowering; very profuse. CRENATA LEAVED-Profuse white flowers in May; fine and

unusually hardy. **GRACILIS**—Beautiful dwarf: flowers pure white. Fine pot culture; blooms freely at a low temperature in winter. GRACILIS-Beautiful dwarf: flowers pure Fine for

GRACILIS MARGINATA AUREA-Same as the preceeding ex-cept in foliage, which is streaked golden color.

PRIDE OF ROCHESTER-Large, double white flowers, slightly tinted rose; very popular.

**WATERERII**—Probably the most popular of all Deutzias. Flowers pure white, extra large, and flower spikes especially long.

### **ORNAMENTAL SHRUBS**—Continued

#### EUONYMOUS

STRAWBERRY TREE-Foliage handsome; fine crimson fruit in autumn.

#### ELDER

GOLDEN LEAVED-A striking variety with golden yellow foliage.

CUT LEAVED-A single variety with very finely cut leaves. DOUBLE FLOWERED-A very beautiful shrub with double flowers.

#### ELEAGNUS

LONGIPES—A vigorous shrub only a few feet in height, producing fruit half an inch long, of a bright red color. Very ornamental.

ELEAGNUS--Longpipes

#### FORSYTHIA-GOLDEN BELL

VIRIDIS-Deep green, very early, yellow flowering. SUSPENSA-Large, rather lighter yellow bloom, very hardy, very profuse, extra fine.

**FORTUNEII**—A strong upright grower; very distinct foli-age; flowers bright yellow.

#### HONEYSUCKLE

An upright, most admirable shrub of fine form; of vigorous growth, perfectly hardy, with profuse flowers, followed by dif-ferent colored berries; varieties, Tartarian, pink and white; Al-berti, violet colored flowers; Grandiflora, bright red.

### HYDRANGEA

**AREORESCENS GEANDIFLORA ALBA**—The Latest Novel-ty. This beautiful hardy American shrub is the finest addition to this class of plants found in many years. The blooms are very large, of pure snow-white color, resembling a little the hardy shrub so well known, the Snowball, in color and make-up, only they are much larger in size and much more striking. One of its most valuable features is its coming into bloom just after the passing of all the early spring shrubs, while its long sea-son of bloom, from early June through August, renders it a valuable plant to the owner of every garden. It is perfectly hardy, standing twenty degrees below zero. **PANICULATA GEANDIFLORA**—Too well known to require description. Probably the most popular of all shrubs. Blooms in August and September. Flowers white, borne in pyramidal panicles often a foot in length. We also have them in tree form.

form.

#### EYDRANGEA ARBORESCENS

#### KOELREUTERIA

**FANICULATA**—A small round-headed tree; handsome foliage and large panicles of showy yellow flowers in July.

#### LILAC

ALFONSE LAVAILE—Double-flowering bluish lilac. BELLE de NANCY—Pink with white center, double. CHAS. JOLY—Dark purplish red, one of the darkest. CHARLES THE TENTH—A strong growing variety, with large, shining leaves; trusses large, reddish purple. CONGO—Flowers large, wine red.

CONDORCET—Blue. EMILE LEMOINE—Very large; globular form, rosy lilac. FRANCISQUE MOREL—Large; center bluish rose. GRAND DUC CONSTANTINE—Compact; lilac color. JOSIKAE—Fine distinct species. Thick leaves, purple flow-ers in June; much later than common lilacs.

LA MARCE—Panicles large. Color rosy lilac. Superb. LEMOINE—Lilac pink. Individual flowers large, douhle

MADAME LEMOINE-Double pure white flowers, borne in large clusters.

MARC NICHELI-Lilac; beautiful; double.

MICHAEL BUCHNER-Dwarf; panicles erect, very large and double, color pale lilac, distinct and fine. MONUMENT-Double. Very large. Light blue. Fine.

PERSIAN PURPLE-Flowers bright purple; foliage small:

very desirable. PERSIAN WHITE-Delicate white fragrant flowers. A su-

perb variety. **PRESIDENT CARNOT**-Double. Flowers pretty lilac tinted

Marked in center with white. **PRES. GREVY**—Beautiful blue. Individual flowers double and large. The panicles magnificent and very large. One of the finest lilacs.

PURPLE-A standard variety; always good; profuse bloom-

er. **VILLOSA**—From Japan. Large branching panicles. Flow-ers light purple in bud, white when open. Late, fragrant, hand-some, very large. **WHITE**—A well known white lilac, flowers slightly cream-

colore

WM, BOBINSON-Violet, double.

TARTARIAN HONEYSUCKLE-IN FRUIT

### **ORNAMENTAL SHRUBS**—Continued

#### PURPLE FRINGE

**SMOKE TREE**—A beautiful shrub, much admired for its long feathery flower-stalks, which give it the appearance of being covered with a cloud of smoke. Hardy, very ornamental. July.

#### PLUM

**TRILOBA**—Splendid, flowers very early; beautiful, full double, delicate pink; foliage like the plum; very PRUNUS TRILOBAnearly fu desirable. OUINCE

JAPAN SCABLET — Among our choicest shrubs; its brilliant flowers are among the first in spring, and they appear in great profusion, covering the entire bush, before the leaves are developed.

#### RHODOTIPUS

**KEREIOIDES**—Handsome foliage and single white flowers in May, followed by a small fruit. Very ornamental.

#### DEUTZIA PRIDE OF ROCHESTER

#### SNOWBERRY

WAX BEBBY-White flowers and neat, small berries, white wax-like, produced profusely all summer. and

**BED FRUITED** (Dwarf)—Sometimes called Indian Currant. very pretty shrub, pendulous. Fruit and flowers small.

#### SNOWBALL

**COMMON**—A magnificent old favorite, tall growing shrub with very showy, pure white flowers produced in large balls. No lawn or yard complete without it.

**JAPAN**—Handsome foliage. Globe shaped heads of pure white flowers, early in June. It surpasses the common variety in many respects. Very desirable.

#### SPIREA

AUEEA—Golden Leaved, flowers tinted, very conspicuous, strong grower and distinct. June. ANTHONY WATEREE—New, dwarf, very beautiful. Flow-ers dark crimson, perpetual bloomer; very profuse.

BILLARDI-Rose colored, in long succession.

**COLOSA ALBA**—Dwarf, white. **OPULIFOLIA**—A strong, growing variety, perfectly hardy; y striking. Flowers white. Suitable for single specimens or for hedge purposes.

**PRUNIFOLIA**—Flowers pure white like daisies. May; re-mains in flower a long time; very desirable.

SPIREA VA HOUTEI

#### SPIREA --- Continued

**BEEVESII**—A charming shrub with narrow pointed leaves and large, round clusters of white flowers that cover the whole plant. June.

SEMPERFLORENS-Flowers red; a continuous bloomer; habit dwarf.

**THUNBERGII** very graceful habit. -New, dwarf, white, flowering early in spring;

**VAN HOUTEI**—The most beautiful of all Spireas; immense bomer. Pure snow white flowers; early; hardy; makes a beaubloomer. tiful hedge.

#### SYRINGA OR MOCK ORANGE

AUREA--A very handsome shrub, golden yellow foliage; very desirable.

**CORONARIUS**—Produces white very sweet-scented flowers, in profusion; very pretty.

DOUBLE WHITE-(Flora Plena.) Partially double, very fragrant flowers.

DIANTHIFLORUS-A handsome dwarf variety; double cream colored flowers.

GERBE DE NIEGE-A vastly improved variety, very large, sweetly fragrant flowers.

**GRANDIFLOBA**—Large, pure white flowers, later than others.

**LEMOINEI**—Very distict; flowers creamy white, very frag-rant and produced from the ground to the tips of the branches; very fine.

#### SYRINGA OR MOCK ORANGE

#### TAMARIX

A beautiful shrub with small leaves somewhat like the Juni-per. A delicate small flower in spikes; June to August; rapid growers. In three different shades of foliage. AFRICANA, JA-PONICA PLUMOSA and INDICA. Beautiful as single specimens or grouping.

#### TREE PAEONIA

**MOUTAN**—A remarkably handsome shrub. The flowers, which appear in May, are very large and numerous and of vari-ous brilliant colors, often measuring six to nine inches across. With proper care the plant has been known to attain a height of six to eight feet. Succeeds best with slight protection over winter winter.

#### TREE CRANBERRY

**HIGH BUSH**—Bears profuse clusters of beautiful berries; hardy and very ornamental.

#### WEIGELIAS

Beautiful shrubs that bloom in June and July; well known. The flowers are produced in great profusion, as almost entirely to hide the follage. They are very desirable for the border or for grouping, and as specimen plants for the lawn. ALBA, white; CANDIDA, white; FLORABUNDA, rosy pink; GBOENE-WEGENII, dark rose; HOBTENSIS, deep red; BOSEA, rose col-ored, well known; STELZNEELI, deep red; VABLEGATED LEAVED, flowers nearly white; GEGANT, white with pink cen-ter; FRES. DUCHARTBE, dark red; MAD. BILLABD, rose col-ored; VERSCHAFFELTI, rose colored, similar to Rosea; EVA RATHKE, new, flowers brilliant crimson, a continuous bloomer, a very distinct variety and valuable.

#### YUCCA FILAMENTOSA

**SPANISH BAYONET**—With its stout, lance-shaped foliage, and stems rising some four or five feet, forming a pyramid of branching panicles of large, drooping, cream-white flowers; it certainly presents a grand appearance and is truly handsome. Fine for borders or in clumps.

## HARDY VINES AND CREEPERS

### AKEBIA QUINATA

Hardy, climbing shrub, with fine foliage and dark purple flowers.

#### AMPELOPSIS

## **VIRGINIA CREEPER**—Or American Ivy, vigorous, beautiful, an extra fine stock, Japan or well known.

**VEITCHII**—(Boston Ivy.) Hardy, clinging to the smoothest surface; colors finely in autumn to a bright red; most beautiful climber.

#### ARISTOLOCHIA SIPHO

**DUTCHMAN'S PIPE**—A very handsome climber of rapid growth, with light green foliage and curious pipe-shaped yel-lowish-brown flowers.

### EIGNONIA

RADICAN'S GRANDIFLORA-(Trumpet Creeper.) Foliage handsome, flowers large scarlet; hardy; August.

#### CELASTROUS

BITTER SWEET-Vigorous, with yellow flowers and orange colored berries; hardy.

#### CLEMATIS

All hardy. Home grown. On own roots. An unusually fine stock.

DUCHESS OF EDINBURGH-Double white, of vigorous hab-

it, free bloomer, very fragrant. **FLAMULA**—Sweet scented Produces large clusters of small white flowers. Most fragrant of all clematis.

**HENRYII**—New, and one of the best perpetual hybrids; of robust habit and very free bloomer. The flowers are large, white and very showy.

**JACKMANII**—Deep violet purple, flowers produced in masses; one of the best, especially for bedding.

**JACKMANII ALBA**—Without exception this is the best hardy climbing plant that has been sent out for many years. It has all the characteristics of the Jackmanii, being free blooming and as vigorous. The flowers are nearly pure white, and make a fine contrast when planted near Jackmanii. It has been tested for years and has always won favor wherever grown. Strong plants. **MADAM BARON VEILLARD**—The flowers are a satiny lavender pink. Very distinct.

**MADAM EDOUARD ANDRE**—A new French variety, entirely distinct and most novel. The nearest approach to a bright red yet produced. The plant is a strong, vigorous grower, being a hybrid of the popular Jackmanii variety, which it resembles in freedom of bloom, strong, vigorous growth, shape and size of flowers.

**PANICULATA**—A strong, vigorous grower, very free flower-ing, pure white, unusually fragrant.

#### CLEMATIS-Continued

**RAMONA**—A strong, rampant grower and very hardy. Free and perpetual bloomer; flowers large; color, a deep sky blue. Free

**STAR OF INDIA**—A very showy, free flowering sort, with large flowers, first of a reddish plum color, changing to a violet purple, with turkey red bar in the center of each flower leaf. A distinct variety of great merit. July to October. VIRGIN'S BOWEE-Common white flowering.

VITICELLA-Common purple.

#### CLEMATIS JACKMANII

#### EUONYMOUS RADICANS

A hardy evergreen vine with small leaves of a rich lustrous en. Unsurpassed for covering stone or brick walls. green.

#### HONEYSUCKLE

HONFYSUCKLE ALBERTI—Bell-shaped violet colored flowers; leaves nar-row. Hardy. Somewhat creeping. FRAGRANT MONTHLY—(Belgica.) Blooms all summer; delightful fragrant, buff and pink. HALLEYANA—Evergreen: of the greatest value, being hardy, strong and vigorous, with pure white, fragrant flowers changing to yellow. JAFAN GOLD LEAVED—(Aurea Reticulata.) Variegated leaves, yellow, pur-ple and green; flowers white, shaded yellow, and very fragrant; hardy. SCARLET TRUMPET—One of the handsomest in cul-tivation; coral flowers; very vigorous and hardy; blooming all summer. summer.

#### MATRIMONY VINE

(CHINESE.)—A vigorous climber, branching freely and cov-ered with bright purple, star-shaped flowers, succeeded by bril-liant scarlet berries almost an inch long; the contrast between the glossy, dark green foliage and shining scarlet fruit being exceedingly beautiful.

#### PERIPLOCA GRAECA

SILK VINE—A rapid growing beautiful climber, with dark glossy leaves and curious brown flowers; hardy.

#### WISTARIA

GLYCINE—(American.) One of the finest climbers, of rapid growth and perfectly hardy, with long, pendulous clusters of blue, in short bunches. A fine free bloomer; hardy. SINENSIS —(Chinese.) Hardy, rapid grower. Flowers in long pendulous clusters; pale blue. May and June and in autumn. SINENSIS ALBA—(Chinese double white.) Pure white; borne in long drooping clusters. Very beautiful.

## ROSES

We make the growing of roses a specialty. Our list of varieties has been carefully selected so as to include only the very best. We are constantly buying the newer varieties, and after giving them a fair trial, discard such as are not found worthy of cultivation and distinct character. OUR ROSES are all our own growing either on their own roots from cuttings or layers or budded.

MRS. JOHN LAING ROSE

### HYBRID PERPETUAL ROSES

#### 2 YEARS, DORMANT, FIELD GROWN, STRONG PLANTS

Alfred Colomb, bright carmine.

Anna de Diesbach, brilliant crimson,

Barron de Bonstettin, large, very dou-ble, rich, dark velvety red.

Caroline de Sansal, pale flesh.

Coquette des Alps, white.

Earl of Dufferin, rich velvety crimson.

Enfant Mt. Carmel, dark blush.

Fisher Holmes, rich crimson, shaded scarlet, large and free.

Francois Levet, cherry red.

Frau Karl Druschki, The White American Beauty.

Gen. Jacqueminot, deep cherry red.

Gruss au Teplitz, bright scarlet crimson, free bloomer, superb.

John Keynes, rosy scarlet, full and double.

La Reine, clear, rose pink.

#### **CLIMBING ROSES**

DORMANT, 2 YEARS, FIELD GROWN

Anna Maria, rosy pink. Baltimore Belle, blush, becoming white. Pride of Washington, red and crimson; very desirable. Prairie Queen, rosy, in clusters. Russel's Cottage, pale red. Seven Sisters, crimson, changing all shades to white. CLIMBING CLOTHILDE SOUPERT—The best known and most popular Polyantha. It is as free-blooming as a rose can be, commencing to bloom when but three or four inches high, and is never after without bloom. The full double flowers are pro-duced in sprays of three or more. The outer petals are pearl white, shading to a center of rosy pink.

### MISCELLANEOUS HARDY ROSES

**BOSA BUGOSA BUBRA**—Foliage shiny bright green, flow-ers deep rose, produced in clusters. Beautiful bright red ber-ries in autumn.

ers deep rose, produced in clusters. Beautiful bright red ber-ries in autumn. BOSA BUGOSA ALBA—Similar to above in habit of growth, freedom of bloom and form of flower. Pure white. WICHURIANA—It readily adapts itself to any soil, and will do well under any conditions. The pure white single flowers appear in greatest profusion during the month of July, after the June Roses are past, while its almost evergreen foliage makes it very desirable at all seasons of the year. **MERICAN EEAUTY**—The most popular of all American roses, large, deep pink, shaded carmine. **DROTHY PERKINS**—This sort was originated from seed of the Japanese variety, Rosa Wichuriana, and hybridized with Mme. Gabriel Luizet. The qualities of both parents are com-bined to a remarkable degree in the hybrid, which was one of a lot of two hundred seedlings hybridized in the same manner. Very hardy, having withstood 20 below zero and not injured in the least. The flowers are large for this class rose, are borne in clusters of from ten to thirty, and are very double and sweet scented. The buds are remarkably pretty, being pointed. The color is a most beautiful clear, shell-pink and holds a long time without fading. A strong grower; single shoots making from ten to twelve feet in one season; in habit of growth it very much resembles the Crimson Rambler. The foliage is of a thick, leathery texture. An excellent stock for this season.

DOBOTHY PERKINS ROSE

### **MOSS ROSES-Own roots** DORMANT 2 YEARS

Blanche Moreau, pure white. Countess de Murinais, pure white. Crested, blush pink.

Luxembourg, bright crimson

Princess Adelaide, blush. Perpetual White, beautiful white. Raphael, light blush. Red Moss, delightful shade of red. Salet, fine pink.

Madam Charles Wood, bright fiery scar-let, changing to rosy crimson. One of the best.

Marshall P. Wilder, bright cherry red

Prince Camile de Rohan, deep velvety

Ulrich Brunner, cherry red; good size

Victor Verdier, bright rose, with car-

Madam Masson, dark red. Madam Alfred Carriere, white.

Magna Charta, large, pink.

Madam Plantier, pure white.

Mrs. John Laing, soft pink.

Paul Neyron, large, pink.

Mad. Gabriel Luizet, pink, large,

Reine Marie Henrietta, rosy pink. Robert Duncan, bright rose, large, full,

mine center, very free.

carmine.

crimson.

well formed.

and form.

### **BABY RAMBLER-Crimson**

#### THE EVER BLOOMING DWARF ROSE

The greatest bedding and house rose in existence. It blooms every day of the year in the house. Out of doors from May until November.

The plants are very vigorous, grow to a height of about 24 inches.

The foliage is dark, glossy, profuse and remarkably free from

The follage is dark, glossy, profiles and followers to insects and fungus. The flowers are borne in clusters, 20, 30 and 40 flowers to a cluster. They are in every way just like those of the Climb-ing Crimson Rambler and are produced perpetually. It is certainly a fine Rose for indoors, and for bedding and massing in private grounds, parks, cemeteries, etc.

**BABY DOROTHY**—New Pink Baby Rambler. (Maman Levavasseur.) This new pink Baby Rambler is the latest introduction of the well known introducers of the now famous Crimson Baby Rambler. It is similar in all respects to that variety, except the flowers are a clear, brilliant pink, and very freely produced, and while it is only a short time since its introduction, it has already become extremely popular for bedding purposes, and for pot plants.

WHITE BABY RAMELER—A hardy Rambler Rose of the popular dwarf type. The flowers are delicately tinted, and borne in full clusters. It is perfectly double, and blooms with the unceasing freedom of the red and pinks of the Baby Rambler class. Very desirable and popular.

#### TREE ROSES

Budded 4 to 5 feet high, and consist mostly of the Hybrid Perpetual varieties and Crimson Rambler. Very beautiful when in bloom.

#### RAMBLER ROSE--LADY GAY

This new variety, a seedling from the popular Crimson Rambler, which it closely resembles in habit of growth and general effect, is destined to become one of the most popular Easter plants, for which purpose it is especially adapted on ac-count of its delicately tinted flowers, which are of a delicate cherry-pink, which gradually changes to a soft-tinted white. The plant is a strong, vigorous grower, with profuse, glossy, deep green foliage.

scarlet.

### **ROSES**—Continued

### RAMBLER ROSES

**CRIMSON BAMBLER**—A grand rose from Japan. The plant is of very vigorous growth, making shoots of from 6 to 10 feet during the season, rendering it a charming pillar rose. It is also magnificent in bush form. The flowers are of a glowing crimson, and are produced in great pyramidal panicles or truss-es, each carrying from 30 to 40 blooms, the individual flowers measuring about 1 to 1 1-2 inches in diameter, and remain per-fect on the plant for upwards of two weeks. The foliage is bright green and glossy and perfectly healthy. We find this rose perfectly hardy here. We have an unusually fine stock of well grown plants for this season.

**FIRE BAMBLER**—Resembles Crimson Rambler in every re-spect but color, which in this is clear pink. One of the most attractive of the set. The mature flowers often change to creamy white when fully matured.

**WHITE RAMBLER**—A worthy companion plant for Crimson Rambler. It is similar in habit of growth and form of flow-ers, perfectly hardy, and flowers in good sized clusters. The pearly white flowers contrast nicely with those of Crimson Rambler, and make a beautiful display when planted with it. Its flowers are quite fragrant and last for a long time after being cut being

being cut. **YELLOW RAMBLER**—(Aglaia.) This rose is, we are con-fident, an even more valuable introduction than the Crimson Rambler, for it is the hardiest yellow climbing rose yet in-troduced, and quality of hardiness has been an extremely diffi-cult one to combine with yellow color. We believe that with very slight protection, it can be grown everywhere that other roses succeed. Yellow Rambler is a blood relation to the Crimson Rambler, which it much resembles in growth and foli-age. It also blooms after the same manner as Crimson Ram-

We fully recommend pot-grown Monthly and Hybrid Tea Roses for spring planting. They are easier to transplant than larger dormant plants and especially for late planting. The pot plants we ship with ball of earth attached to roots, and they do not feel the shock of transplanting like dormant plants and start to grow at once and bloom all season

HYBRID TEA AND MONTHLY-From 4 inch pots, including Teas, China, Noisette and Bourbon. Bride, pure white. Etoile de Lyon, clear yellow.

Bridesmaid, beautiful pink.

Champion of the World, fine deep rose.

Clothilde Soupert, pinkish amber. Duches de Brabant, clear pink. Golden Gate, white shade pink. Gruss Au Teplitz, dark vel-vety red. Helen Gould, the finest red. Hermosa, light pink. Kaiserin Augusta Victoria, pure white, center yellow.

La France, silvery rose. Maman Cochet, the grandest pink. Marechal Neil, golden yellow. Mrs. DeGraw, deep pink. Papa Gontier, cherry red. President Carnot, beautiful fest color

flesh color.

Perle des Jardin, clear deep yel 10w.

Queen's Scarlet, scarlet. Souv. de Malmaison, creamy flesh.

Sunset, copperv vellow.

## HARDY HERBACEOUS FLOWERING PLANTS

The following assortment embraces the most desirable kinds and varieties, and is in great demand for permanent planting. They are all showy, beautiful plants, of easy cultivation, and flower at different periods, so that a succession of bloom will be obtained, from early in summer until after frosts in the fall. They do not have to be taken up in the fall, or replaced every spring, but remain in the ground for years. To obtain the best results they should be cultivated the same as other plants.

ANEMONE JAPONICA ALBA —A distinct and beautiful va-viety. Flowers 2½ inches in diameter; pure white; center golden. Very profuse. September to November.

golden. Very profuse. September to November. **ANEMONE WHIRLWIND**—A semi-double form of Anemone Japonica Alba, which is supposed to be a cross between this beautiful variety and a Japonica Rosea. In general style and habit it is identical with the white Anemone. It is of the same strong habit of growth, and is even more free-flowering than the original type. The flowers, which are 2¼ to 3 inches across, have several rows of pure white sepals, and the ad-vantage of lasting much longer than the single varieties. **ACHILLEA**—The Pearl. One of the very best white flow-ered border plants; fine for summer cut flowers. **ASCLEPIAS**—Tuberosa. Butterfly flower, brilliant orange red.

red

red. ASTEE, TABTARICA—One of the most showy of the Aster family. Makes strong clumps of bright green, out of which reaches its tall stems of bright purple flowers. Very satisfactory for the hardy border. We also have the white and yellow varieties. AQUILEGIA—Columbine. Chrysantha, yellow and Bi-color plena, double. Popular hardy perennials that bloom very early during spring and summer. BOCCONIA COBDATA—Beautiful in foliage and flower, and admirably adapted for planting in the shrubbery borders, cen-ter of beds, and in bold groups in almost any position. BOLTONIA ASTEROIDES—Showy plants growing 4 to 5 feet high, with broad heads of white. Aster-like flowers. Blooms throughout the season. CINNAMON VINE—Climbing, very handsome, rapid grower. Strong roots.

CINNAMON VINE—Climbing, very handsome, rapid grower. Strong roots. CHRYSANTHEMUMS, Hardy—The queen of Fall flowers. Pompone varieties—Anglique, magnificent yellow; Aileen, deep lilac pink; Nita, beautiful rose pink; Princess Louise, bright red, excellent; Viola, very beautiful dark red. These varieties are very profuse bloomers. CAMPANULA—Beautiful, large, bell-shaped flowers; effect-ive plants for the border. Blue and white. COREOPSIS GRANDIFLORA—A hardy perennial that should be planted in every garden. The flowers are a clear bright yel-low, very attractive. A profuse bloomer and perfectly hardy. Thrives in almost any situation. Invaluable for summer cut flowers.

flowers

flowers. **DELPHINIUM**—Formosum—Blue Larkspur. They are about the only blue hardy flower of any note, and have a long season of blooming. **DELPHINIUM**—Pumilium Album, Dwarf, white. **DIELYTRA SPECTABILIS**—Bleeding Heart. One of the most beautiful hardy border plants. Flowers heart-shaped, rose colored. Perfectly hardy.

DIANTHUS BABBATUS—The well known Sweet William. DIANTHUS—Hardy Pinks. For brilliancy of coloring and marking, as well as beautiful forms of flowers, this family can not be surpassed. DIGITALIS—Fox Glove. Well known. Produces a grand display of showy flowers in July and August. Flowers thimble-shaped; purple. Stalks 3 to 4 feet. EULALIA—Japonica Variegata. Ornamental Grass. Leaves striped green and white. EULALIA—Japonica Zebrina. Zebra

CORFORSIS GRANDIFLORA

GENERAL JACQUEMINOT ROSE

bler, in large trusses. The flowers are very sweetly fragrant and last three to four weeks without fading.

## HARDY HERBACEOUS FLOWERING PLANTS—Continued

EULALIA-Gracillima Univitata. Narrow green leaves with a silvery white midrib.

BULALIA-Grachina Univitata. Narrow green leaves with a silvery white midrib.
 FUNKIA-Day Lily. Very desirable border plant, especially for damp, shady places. White, blue and variegated.
 GAILLARDIA, GRANDIFLORA-This is considered one of the most beautiful and desirable plants in cultivation, beginning to bloom in June; they continue one mass of bloom the entire season. Base of petals are scarlet crimson, bordered golden yellow. A most beautiful combination.
 GYPSOPHYLA PANICULATA-(Baby's Breath)-A beautiful old-fashioned plant, possessing a grace not found in any other perennial, and attracting the eye of everyone. When in bloom during August and September, it forms a symmetrical mass 2 to 3 feet high, and as much through, of minute pure white flowers, forming a beautiful gauze-like appearance. For cutting purposes it is exquisite, especially in combination with high-colored flowers, and some most lovely effects can be produced with it.
 HARDY GARDEN PINKS-See Dianthus.
 HELIANTHUS-Multiflorus. Double, dwarf, Sunflower; dark golden yellow color; grows from 2 to 5 feet in height. Never fails to flower the first season of planting. One of the hardiest and best herbacious plants.

and best herbacious plants. **HELIANTHUS**—Maximilian. An elegant specie; the latest bloomer of its class, as well as one of the latest of all flowers. Clear yellow, from 3 to 5 inches across, with several rows of petals; center full. Handsome in bud and flower. Height, 8 feet

feet. **HELIOPSIS**—Pitcheriana. Very valuable for cut flowers; resembling Sunflowers, but covering a longer season of bloom and earliest in summer. A new form with dwarfer habit, giv-ing a succession of deep orange yellow flowers from June to Outplote

**HEUCHERA**—Sanguinea. Alum Root. One of the very few d flowering, hardy perennials. Flowers in graceful spikes; red profuse very

HEUCHERA-Sanguinea. Alba, white flowering; splendid for cut flowers

for cut flowers. HEMEROCALLIS—The Orange Daily Lily. HOLLYHOCK—These handsome, showy plants are at pres-ent great favorites. Their unique growth gives them a wel-come everywhere. For planting in rows or groups on lawn, or interspersing among shrubs, they are invaluable. The flowers are large, handsome in form and of lively shades, white, sal-mon, yellow, crimson and pink. HIBISCUS—Moscheutos. Flowers 6 inches in diameter; of a light rosy red color with darker eye. HIBISCUS—Crimson Eye. The stems and wood are deep red, and foliage is beautifully veined. Flowers immense. Color a clear snow white, with a brilliant crimson eye. HIBISCUS—Miltaris. Tall growing. Delicate pink—deeper center.

cente

center. IBLS—These magnificent perennials are among the most beautiful of our summer flowering plants. They commence blooming about the middle of June and continue in bloom for weeks. Our collection consists of many of the choicest kinds, in all colors, as follows: IBLS JAPAN—Kaempferi. Named varieties. IBLS GERMAN—Named varieties.

LIGIN (PERMAN).

LIATEIS-Spicata. Blazing Star. Deep purple flowers; June to August.

LYCHNIS-Haageana. Broad heads of showy flowers, varying from orange red to richest crimson.

LOBELIA—Cardinalis. Cardinal Flower. Long spikes of beautifully formed, deep, fiery, cardinal flowers; very effective. **PLATYCODON GEANDIFLORUM**—Blooms constantly from July until late in September; flowers large, bell-shaped, of a deep shade of blue. An extremely rapid growing plant; will do well in any ordinary garden soil. Perfectly hardy, making a dense branching bush 2 to 3 feet high.

POPPY ORIENTAL-Very showy with large deep scarlet flowers.

**FYRETHRUM ULIGINOSUM**—This is considered by many the finest autumn flowering plant we have, growing 4 feet high, and covered with a profusion of large white flowers. Resembles the Paris Daisy in form of flowers. Very useful for fail cut-ting; August to frost.

**PYRETHRUM ROSEUM**—Bushy little plants with ornamen-tal leaves; and abundant long stemmed Daisy-like flowers in shades of rose and pink. tal

A Border of Perennial Phlox.

RUDBECKIA DOUBLE

**DOUBLE** "Golden Glow." A glorious new plant and one that will find a place in every garden here and abroad; of fine habit, vigorous growth, with early, continu-ous and imearly, con and ous and im-mense bloomin<sup>5</sup> qualities. I t will be found excellent excellent also cut flower pur-poses, inasmuch as the stems are long, and often carry a dozen flowers furnished with most beautiful foliage. A large vase filled with these flowers is a beauti-ful sight. RUDBECKIA

Giant Purple Cone Flower)— Entirely dis-tinct from all other perenall other peren-nials in the peculiar forma-tion as well as the color of the flowers which flowers, which are of large size, about 4 inches.

**PHLOX** Hardy Perennial. The improvement made in this beau-tiful class of plants the past few years is perhaps more marked than in any other section of the Hardy Herbaceous family. Instead of the small flowers produced by the the small nowers produced by the older varieties, older varieties, which were almost limited in color to which were almost limited in color to lilac and white, we now have gorgeous flowers combining all the various tints of rose, car-mine, red, purple, white and salmon, with their distinct eyes. They require no care but divid-ing and resetting every second year. Their vigorous growth and freedom of bloom make them very useful plants. Perfectly hardy everywhere. We have an ex-cellent list of named varieties.

PHLOX

From open ground; strong roots. See page 11.

HARDY HERBACEOUS FLOWERING PLANTS-Continued

SHASTA DAISY Probably the popular most hardy and is new new hardy plant, and is sure to become a favorite for cut flower pur-poses. This daisy is a pro-duction of Lu-ther Burbank, and is the re-sult of crossing our native field sult of crossing our native field Daisy with a choice European variety. The flowers a r e borne singly on stems about 12 inches long, and are a clear glistening and are a clear, glistening white, from 3 to 4 inches in diameter. The plant blooms continually through the summer and

summer and SHASTA DAISY. fall, and is perfectly hardy without any protection.

#### VINCA-Minor.

Common Periwinkle or Myrtle, well known.

### VERONICA-Amethystica.

Lavender blue. Verv desirable border plants.

#### YUCCA FILAMENTOSA

Spanish Bayonet. Four feet; June and July. Foliage evergreen and somewhat resembling the Century plant in habit of growth. The flower spikes are many branched and the flowers are borne in huge panicles above the swordshaped foliage. Large white, waxy blooms.

YUCCA FILAMENTOSA

### HERBACEOUS PAEONIFS

**THE GORGEOUS HERBACEOUS PAEONIA**—Rivals the rose in beauty, form and exquisite coloring, and excels it in size. One of the chief points in favor of the paeonia is its hardiness. In the severest climate the plants require no protection. Their vigorous habit, healthy growth, freedom from disease and insects are in favor of their cultivation. When the paeonia is once planted, all that is necessary has been done; they require no further care, and each succeeding year adds to their size and beauty. The foliage is rich and glossy, and of a beautiful deep green color, thus making the plants highly ornamental even when not in flower. The paeonia can be planted either singly, or it can be used to excellent advantage to plant as a border line between lots. A large bed makes a most magnificent appearance. The paeonia is the flower for the many, and a selection of sorts will give continuous bloom from May to July and in every shade of color from pure white to dark purplish crimson. These lovely flowers are indispensable in every garden. They not only combine stateliness of growth with gorgeous coloring, but many of the huge blossoms possess the delicious fragrance of a tea rose. We have a large stock and fine assortment in-cluding many of the newer varieties, both single and double.

A FIELD OF PAEONIES ON PHOENIX NURSERY

### TENDER BULBS AND TUBERS

#### AMARYLLIS JOHNSONI.

This old favorite is almost too well known to need descrip-tion. The immense trumpet-shaped flowers which measure six to eight inches across, are borne on strong fleshy flower spikes, and are a deep, rich velvety crimson, striped white.

#### AMARYLLIS FORMOSISSIMA.

This is a grand variety of the Amarylis. They can be grown in soil, or water and pebbles, like the Chinese Lily. When grown in water they will bloom in from two to three weeks' time, with little care and attention, producing freely flowers of most intense deep scarlet.

#### CANNAS.

We offer the following choice collection of French Cannas, which we consider among the best standard sorts offered. We consider the Canna the grandest and most effective summer bedder, and constantly increasing in popularity.

#### SOUV. DE A. CROZY.

**ALLEMANIA**—Dark scarlet, border yellow. Flowers large. Foliage green. 4 to 5 feet.

BLACK BEAUTY-Broad tropical foliage of the deepest crimson bronze; the finest dark leaved canna; flowers red, 5 to 6 feet.

**BURBANK**—The orchid-flowered; having clear, beautiful yel-low flowers. The plant is a very strong grower, 5 to 6 feet high, with leaves with a texture like rubber. Excellent for planting in shady situations. Foliage green.

**CHAS. HENDERSON**—The standard of excellence of all crimson Cannas. Bright crimson, with pencillings of golden yellow at center. Foliage green. About 4 feet. **CHICAGO**—Clear deep vermillion with a purplish gloss; large flowers open up nearly flat; petals wide, five in number. Foliage green, 5 feet.

**DISCOLOR**—The strongest growing Canna; cannot be sur-passed for tropical effect or massing with its very broad bronze foliage; flowers red, small; 7 feet. **DAVID HABUM**—Dark bronze foliage; strong grower; one of the freest blooming cannas; large flowers with well rounded petals; bright vermilion scarlet, dotted with crimson spots. 3 to 3½ feet.

**EGANDALE**—One of the most popular dark leaved varieties. Foliage dark maroon, of compact habit of growth. Flowers bright cherry red, in good sized trusses. Height about 4½ feet.

EXPLOBATEUR CRAMPBELL-Bright crimson, with darker markings. Foliage green.

FLORENCE VAUGHAN-Golden yellow, spotted red. Foliage green.

FLAMINGO-Finest scarlet bedder. Foliage green.

**EATE GBAY**—Immense flowers, five to ten inches across. Most of the flowers have five petals. The color is a rich orange scarlet, finely flaked and streaked with golden yellow tints.

**KING HUMBERT**—Large heart-shaped leaves of purple madder brown over bronze, the dark ribs sharply defined; crowned with immense heads of orchid-like flowers. Individual

#### CANNAS-Continued

petals measure two to two and one-half inches across; color, velvety orange-scarlet flecked carmine, rose tinted at margin and base. A combination of leaf and blossom incomparably beautiful.

MADAM CROZY-Vermilion scarlet, bordered yellow. Foliage green.

NIAGABA.--We consider "Niagara" the best of the low-growing variegated Cannas. Great handsome trusses; broad, thick, durable petals; color, rich deep crimson with a wide in-regular border of deep, golden-yellow. An excellent grower. Green foliage.

**PENNSYLVANIA**—"Orchid-flowered" type. It is really the only pure deep scarlet in this class of Cannas. The flowers are immense in size, often measuring 6 inches and over across, with single petals 2 to 2½ inches wide. Plant grows 5 to 6 feet high, with its bloom carried well above the handsome bright green foliage.

**ROBUSTA**—A very strong grower; takes its place beside Discolor; small orange flowers. 7 ft.

**SOUV. DE ANTOINE CROZY**—By far the brightest gilt edged Canna grown. Flowers brilliant crimson-scarlet, bordered by a broad band of golden yellow, which serves to set out the brightness of the scarlet. One of the most attractive in the entire collection. About 3½ feet.

#### BEGONIA TUBEROUS-ROOTED.

This showy flower has now become very popular. Beautiful foliage, larger and richer flowers, and color more intense than Geraniums. If planted outside they should have partial shade.

#### CALADIUM ESCULENTUM.

Or Elephant's Ears. One of the most effective plants in cul-tivation for planting out upon the lawn, growing five feet, with handsome leaves, often three feet long and twenty inches wide. They will grow in any good garden soil, and are of easiest cul-tivation. Can be stored in any warm place, in sand, during winter winter.

#### GLADIOLUS.

The most attractive of all summer-flowering bulbs are the Gladioli.

AMERICA-New, large flowers of soft pink, very attractive. MIXED-All colors.

SEPARATE COLOR MIXTURES-White and light, scarlet and red.

PINK AND ROSE, YELLOW AND ORANGE.

STRIPED AND VARIEGATED, SCARLET WITH WHITE THROAT.

#### MADEIRA VINE.

This is a rapid grower, with dense and beautiful foliage. It grows anywhere. Strong bulbs.

#### TRITOMA.

**PFITZERII** (Everblooming Tritoma)—A vast improvement over the well-known Tritoma Uvaria; blooms more freely and shows less yellow. Pfitzerii is an intensely bright orange scar-let, with scarlet predominating.

#### TUBEROSES.

**PEARL**, **DWARF**—Pure white, very free blooming, with ex-quisite double flowers. The best.

#### DAHLIAS.

#### LARGE FLOWERING SHOW DAHLIAS.

A. D. LIVONI-Beautiful soft pink. CLIFFORD W. BRUTON-The best yellow. Immense size.

GOLDEN AGE-Clear sulphur.

HECTOR-Orange red.

HENRY PATRICK—A superb pure white, borne on long stems. KEYSTONE—Pinkish lilac, striped

crimson. MAID OF KENT-Cherry red, tipped

white. MARY D. HALLECK—A fine quilled

canary yellow. **MODESTY**—Creamy white, shaded light pink. Beautiful. **MISS BROWNING**—Yellow tipped white. Fine.

QUEEN OF YELLOWS-A beautiful clear yellow. WHITE SWAN-Pearly white.

WILDFIRE MADGE-Beautiful fiery red. ZULU-The black dahlia; jet black.

A. D. LIVONI (About one-fifth size.)

### **TENDER BULBS AND TUBERS—Continued**

#### DAHLIAS-POMPON.

These differ from the large varieties in being more dwarf in growth, with smaller flowers and added profusion of bloom.

ADMIRATION-Small red, tipped white.

CATHERINE-Bright yellow.

GOLDEN GEM-Pure yellow; small and fine.

GUIDING STAR—Pure white; a great favorite. JULIETTE—Bright yellow, tipped vermilion. LITTLE JULIA—Deep maroon, fine quilled. PURE LOVE—Soft lilac. RAPHAEL—Deep maroon.

## **CHOICE HARDY LILIES**

**AURATUM**—(Gold Banded.) Justly famous as the most beautiful and fragrant of all lilies; flowers white, dotted crimson, with a clear, broad, golden band running through the center of each petal.

CANDIDUM-The old fashioned sweet scented white lily.

**LONGIFLORUM**—Bears clusters of beautiful snow-white, trumpet shaped flowers of rare fragrance; should be in every garden.

**SPECIOSUM ALBUM**—Very fragrant large flowers, pure white with a green band running through the center of each petal. One of the best.

**SPECIOSUM MELPOMONE**—Flowers good sized, satiny white, heavily spotted rich blood crimson. No other lily blooms more freely or is more beautifully colored.

SPECIOSUM BOSEUM-White, shaded and spotted with rose.

**SPECIOSUM RUBRUM**—Flowers are white, with a deep rosy or crimson band on each petal, with deeper colored spots between.

**TIGRINUM**—Single Tiger Lily; orange red, spotted with purple-black.

TIGRINUM SPLENDENS-Improved single Tiger Lily.

TIGRINUM FLORA PLENA-Double flowering.

**LILY OF THE VALLEY**—Convalaria Majalis. Fragrant and lasting. A bed of Lily of the Valley once planted flourishes with little attention and gives a wealth of bloom every spring.

### HARDY BULBS—For Fall Planting

HYACINTHS, TULIPS, NARCISSUS, CHINESE SACRED LILY, SNOW DROPS, PREESIAS, CROCUS, ETC. Descriptive Price List Ready in September-Mailed on Application.

## GREENHOUSE AND DECORATIVE PLANTS

Where practicable, small plants will be sent by mail, cost of postage added; we shall, however, send all packages by express at purchaser's expense, unless specially ordered otherwise.

#### AGEBATUM

Imperial Blue. An extremely free bloomer. The individual tufts are very large and dense. The color is intense blue; continuous bloomer; unequalled as a bedding plant. Height 12 to 15 inches.

#### AGERATUM

Little Blue Star. A new true dwarf Ageratum never attaining over six to eight inches in height. An extremely free bloomer. The individual tufts are very large and dense, and the color is an intense blue, the most beautiful ever seen in an Ageratum.

#### ALTERNANTHERA

Beautiful dwarf plants of compact habit, growing about 6 inches high. Adapted for edges, beds or ribbon lines. Highly ornamental. Bright yellow, red and dark colors.

#### ARAUCARIA

Excelsa. Norfolk Island Pine. This beautiful house plant resembles the pine somewhat in appearance, though much finer in texture.

#### ASPARAGUS PLUMOSUS NANUS

A beautiful species of climbing habit; remarkable for the extreme delicacy of its foliage.

#### ASPARAGUS SPRENGERI

A beautiful variety of this graceful class of plants, especially useful to grow as a pot plant, or to plant in hanging baskets, where it makes a graceful drooping plant with branches or fronds 4 to 5 feet in length, of a rich shade of green.

#### ASPIDISTRA LURIDA

A handsome and useful decorative plant, with heavy, dark green foliage. Will stand dry atmosphere.

#### ALYSSUM

These flower profusely throughout the season, thriving in flower garden, window boxes, vases, etc.

#### AZALEA, INDICA.

We have an extra fine lot of this well known house plant which we imported last fall from Belgium and can now furnish plants either in bud or bloom.

APOLLO-(Schulz), double, dark scarlet, early.

DEUTSCHE PERLE-Double, pure white, earliest.

EMPRESS OF INDIA-Double, rich rosy salmon, late.

MME. VAN DER CRUYSSEN-Semi-double, crimson.

MME. MOREUX-Rosy pink, large white margin.

NIOBE-Double white, late.

SIMON MARDNER-Double pink, early.

VERVANEANA-Double rosy salmon, white margin, early.

#### BEGONIA

We have the following well-known flowering varieties. Alba Picta, Argyrostigma, Argentea Guttata, Ingramii, Parvifolia, Rubra, Sandersonia, Schmidtii, Semperflorens Alba, Semperflorens Rubra, Vernon, Weltoniensis and Rex Varieties. **CALLA AETHIOPICA or WHITE CALLA** (Lily of the Nile) —Valued alike for its intrinsic beauty and for its associations. The plants we offer will give the greatest satisfaction. **COLEUS**—A choice selection of bedding varieties.

#### **BEGONIA REX**

#### CARNATIONS.

**ARISTOCEAT**—This is another variety of the Lawson shade. except that it is a trifle deeper in color. Makes fine, large blooms on splendid stems and is quite free in flowering.

**ENCHANTRESS**—Too well known to need any description except to say that in our heavy soil its beautiful daybreak color is intensified enough to make it especially pleasing.

LADY BOUNTIFUL—We have a splendid stock of this excellent white. Not quite so early as some varieties.

**MES. THOMAS W. LAWSON** (Cerise Pink)—Large flower on stiff stem. One of the most productive of Carnations. Very largely grown and a popular favorite.

**NELSON FISHER**—Color an intense cerise bordering on scarlet; as compared with Lawson (its pollen parent) it is much deeper and more solid in color.

**QUEEN**—The new large flowering, snow white carnation, which bids fair to be queen of all snow white carnations yet produced. It is a clear, healthy grower, a most constant and abundant bloomer; the flowers are large, elegantly fringed and richly fragrant.

**QUEEN LOUISE**—This is a grand Carnation. Large, full, perfect flowers; clear snowy white; very fragrant and beautiful.

### **GREENHOUSE AND DECORATIVE PLANTS**—Continued

#### CARNATIONS-Continued

**EOBERT CRAIG**—Color, bright vermillon scarlet, an exact match for the Holly berry; stands the sun perfectly. Color at its best with bright sun. Stems two feet long and up. Has never been beaten on the show table.

never been beaten on the show table. **BOSE PINK ENCHANTEESS**—A lovely rose-pink shade of color put on by the old favorite "Enchantress." The parent's practical, wide-awake habit of growth and trustworthy blooming qualities have always made it popular, and this new coloring but adds greatly to an already first-class reputation. **VARIEGATED LAWSON**—Varlegated sport of Mrs. Lawson. Has a longer stem and a better constitution than its parent. The best variegated on the market. **VICTORY** (Scarlet)—A work pice habit and produces high

VICTORY (Scarlet)—A very nice habit and produces high ade flowers quite freely. One of the best standard scarlets on rade the market.

WHITE ENCHANTRESS—One of the best whites yet pro-duced, of pure quality, large size and immense production. Shape and habit closely follow the parent Enchantress.

WHITE LAWSON-A pure white sport of Mrs. Lawson. An excellent variety.

**WHITE PERFECTION**—All that its name implies. Bloom is abundant, of large size, and immaculate whiteness.

WINSOB—Clear silvery pink, a shade intermediate between Enchantress and Lawson; larger than Lawson and of finer form; one of the best.

#### CHRYSANTHEMUMS.

A. J. BALFOUR—A grand Japanese. Color rose-pink; broad petals of great substance; nothing can touch it in color; a pink that is dazzling.

COL. APPLETON-The best, largest yellow up to date. Extra fine.

**CEOCUS**—A strong growing, healthy variety, easily handled. Flowers are large, loosely incurved, with lower petals gracefully reflexing; colored a beautiful "Bonnaffon" yellow.

**DR. ENGUEHARD**—An excellent variety. Color, pink with-out any trace of purple; stem and foliage perfect; midseason.

GOLDEN WEDDING-Deep yellow, like burnished gold. Extra good.

IVORY-A gem among whites, either for cutting or for bush purposes.

**JEANNIE NONIN**—For Thanksgiving and later this has no rival; of the largest size, perfectly globular, finely finished pure white, a splendid keeper and shipper. Take second crown or terminal bud about Sept. 15.

**JOHN K. SHAW**—Very solid Japanese incurved; large in size, fine light pink, splendid stem and foliage; 3½ feet; October 15.

**JOB BONAFFON**—The most widely grown of yellow Beautifully incurved. One of the best. **BEV CHRISTMAS**—Very late white. Very productive MAJOR sorts. MERRY

and excellent for pot culture. MLLE. JEANNE BOSETTE (1907)—An enormous pink; very full and compact; late; the stem and foliage are perfect, the blooms as deep as they are wide.

MONROVIA-Grand yellow; probably the very best for its date, October 1st and later.

MRS. ELMER D. SMITH-A novelty of 1901. Intens yellow of the very brightest shade. Japanese, incurved. -A novelty of 1901. Intense golden

MRS. HENRY ROBINSON—In actual beauty this variety is still unsurpassed. It reigns supreme among whites.

MRS. JEROME JONES—A beautiful glistening white, Jap-anese incurved, still widely grown and greatly admired. 4 feet. Midseason.

MUTUAL FRIEND-Jap., pure white; bush plant. Semidwarf.

**OCTOBER FROST**—The earliest blooming white. Flowers are seldom large; very early, and shows blossoms six inches and more in diameter. Its color is pure white, with creamy center.

**OMEGA**—October 15. A grand early yellow; a seedling of Sunderbruch, and extraordinarily fine; very large, even for mid-season; fine color.

POLLY BOSE-Fine for pots. The finest, largest and best of the very early whites.

**QUEEN**—The flower excels all in pure whitness; is extra large, broad and deep; the petals are heavy and thick.

**BOI D' ITALIE**—This variety is an extremely handsome yel-low of very brilliant color, incurved into a fine compact globe of rather narrow petals.

ROSIERE-A fine deep rose-pink. It is of dwarf habit, immense blooms.

TIMOTHY EATON-One of the largest of the Japanese in-curved type. Purest white, of true globular shape.

WHITE BONAFFON (Late)—One of the most useful of the white varieties. Color very fine and pure, splendid form; one of the best; three feet; late midseason.

W. H. CHADWICK—Magnificent variety in both form and color, and unsurpassed in size. Not an easy idler, but repays extra trouble. White or blush. Four feet; very late midseason.

**YANARIVA**—A novelty of 1901. Very beautiful reflexing variety of an exquisite shade of light pink.

**YELLOW EATON (Late.)**—Color soft chrome-yellow; a fine example of the broad-petaled incurving Japanese type, showing no center; very large; a fine grower with stiff stems; silver medal at Philadelphia, certificate at Indianapolis.

#### COBEA SCANDENS.

A popular vine of rapid growth attaining a height of twenty feet or more in a season, clinging closely by its tendrils to stone work or trellis. It produces, very freely, large bell-shaped flow-ers of a rich purple. It is very handsome and its quick growth renders it very deslrable for covering unsightly objects.

#### CUPHEA PLATYCEUTRA.

Cigar Plant. Scarlet, pendulous flowers; neat compact habit; constant bloomer.

DRACENA.

**INDIVISA**—This is the variety used so extensively as center plant for the vases, baskets, etc. Its foliage is very gracefully arranged and contrasts nicely with other foliage and flowering plants.

### DUSTY MILLER.

#### Centaurea Gymnocarpa,

A well known decorative plant with beautiful silver-gray fol-iage; extensively used for border work, ribbon planting, baskets, tubs, etc. Excellent for mixing with other foliage. Entirely hardy.

#### FICUS ELASTICA.

The well known Rubber Plant. Nothing better for table or house decoration. Its dark green, shiny, foliage, is always handsome, and its constitution is such that it is able to stand the excessive heat and dryness of the ordinary dwelling house without injury. Fine young plants.

BOSTON FERN.

#### FERNS.

**NEW NEPHEOLEPIS SCOTTI**—Of much dwarfer and bush-ier growth than the Boston Fern. The fronds doop gracefully, and are not as long and coarse as the Boston. It is a rapid grower, and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house fern.

**BOSTON SWORD FERN**—(Nephrolepis Exaltata Bostonlen-sls)—A variation from the ordinary Sword Fern. These fronds arch and droop over very gracefully, on account of which It is frequently called the "Fountain Fern." This drooping habit makes it an excellent plant to grow as a single specimen on a table or pedestal.

**NEPHROLEPIS WHITMANI**—(Improved Ostrich Plume Fern.) The most valuable of this type, with handsome broad, plume-like fronds.

#### FEVERFEW.

Well known, double white. June to frost. Fine for cutting.

#### FUCHSIAS.

**THE BLACK PRINCE**—Bright, waxy carmine. Tube and petals large and broad, with pale green tips; large, open pale pink corolla. The best all-round Fuchsia we know of.

**SPECIOSA**—Pale red tube and sepals; dark red corolla. There are frequently from thirty to forty flowers on a single branch.

**MONSTROSA SUPERBA**—Very large, double flowers; pure white corolla, beautifully reflexed; bright scarlet sepals.

**TRAILING QUEEN**—The habit of this variety is much dlf-ferent from the other varieties in that It trails instead of grow-ing upright. Pretty flowers borne in clusters.

## **GREENHOUSES AND DECORATIVE PLANTS---Continued**

### GERANIUMS.

Double.

ALPHONSE RICARD-Dwarf, brilliant shade of orange red. BEAUTE POITIVINE-Light salmon pink. BUCHNER-One of the finest whites. E. H. TREGO-The best scarlet JEAN VIAUD-The best pink bedder.

**MME.** LANDRY—One of the choicest and most beautiful of the Bruants. Very free and constant in bloom throughout the season. Trusses large, and florets of the finest size and circu-lar in form. Color clear salmon, center shading to copper, with a white eye. Very distinct, and one of the best.

MARY GEERING-Bright pink.

RICHARD BRETT-Fine scarlet.

S. A. NUTT-Brilliant scarlet. The most popular variety. WHITE SWAN-Pure white.

Single.

GEN. GRANT-Fine scarlet. L'AUBE-Pure snow white. M. CHALFANT-Bright red. MRS. GAAR-Pure white. MADAM BRUANT-White with purple edge. MRS. E. G. HILL-Light salmon, enormous trusses.

Ivy Leaved.

CHARLES MONSELET-Fiery red. JOAN DE ARC-White. CHARLES TURNER-Deep bright pink. ROSE SCENTED-Well known.

#### Variegated Leaved.

MAD. SALLEROI-Dwarf; foliage bright green edged white; excellent for border.

#### HELIOTROPE.

Well known, assorted, white and purple.

#### HIBISCUS.

(Chinese.) Strong growing tropical plants with handsome glossy foliage and large, brilliant, showy flowers. In a warm, sunny window they make fine decorative plants and bloom profusely.

#### IMPATIENS SULTANA.

One of the prettiest and most satisfactory house plants for One of the prettest and most satisfactory house plants for winter blooming, as well as a charming feature of the summer garden. These plants commence blooming when very small, are seldom out of bloom, and when at their best display a gorgeous profusion of intense carmine-rose flowers against a rounded background of glossy green leaves.

#### LANTANA-DWARF.

ALBA PERFECTA-Pure white. LEO DEX-Orange Scarlet, changing to dark crimson. EMILE BAYARD-Dark crimson. COUNT BLENCOURT-Lilac and yellow. ULTIMA-Golden yellow.

LANTANA WEEPING

This plant has a most graceful drooping habit, grows very rapidly and blooms continually summer and winter, producing large clusters of flowers of the most delicate lilac or rosy-pink; foliage a beautiful dark green.

#### IVY, GERMAN OR PARLOR.

A most charming and decorative vine. Graceful and airy, yet vigorous, it can be grown in any situation, and is sure to do well even without direct sunlight.

ENGLISH IVY.

#### (Hardy Vine.)

This is the old hardy variety that clings to walls, trellises, etc., used also for planting on graves.

LEMON VERBENA.

Indispensable for the delightful fragrance of its leaves in the construction of bouquets.

#### · LOBELIA.

A dwarf, dense-growing plant with small lace-like leaves that is entirely enveloped during the whole summer with a mass of pretty deep ultra-marine-blue flowers. Exceedingly useful and attractive for borders, succeeding under all conditions.

MOON FLOWER.

Strong, rapid climber; fine for porches.

OLEANDER.

ROSEA-Double pink flowers. The old favorite. Very sweet scented.

#### PALMS.

**KENTIA BELMOREANA**—In our estimation this is one of the very best for all purposes and places. Exceedingly graceful and one of the hardiest.

**KENTIA FORSTERIANA**—Much like Belmoreana, except that it grows taller, with larger, heavier foliage. **CYCAS REVOLUTA**—(Sago Palm) one of the most valuable palms for lawn or house decoration. Have a nice lot of shapely plants.

**ARECA LUTESCENS**—One of the most graceful Palms in cultivation. The foliage is clear glossy green, on slender golden yellow stems. It grows rapidly and makes beautiful specimen plants in a short time.

#### PANDANUS.

**VEITCHII**—This plant, better known as Screw Pine because of the Spiral arrangement of its leaves, is extremely ornamen-tal and makes a charming table or house decorative plant. The leaves are long and gracefully curved and are broadly striped with creamy white on a green ground. This plant is well adapted to culture in the living room. Requires plenty of light and water with good drainage.

#### PARIS DAISY.

**QUEEN ALEXANDRA**—This variety has pure white flowers from 2½ to 3 inches in diameter, the greater percentage coming full double. The remainder of the flowers on the same plant come semi-double and single, all of which are very handsome.

#### PANSIES.

**INTERNATIONAL GIANT MIXTURE**, embraces all shades and colors, including the richest reds, coppers and bronzes, to-gether with the most delicate rose and pink shades. Blooming plants from cold frame, transplanted.

#### PETTINIA.

Fine double assorted, well known and very popular.

#### PRIMROSE.

CHINESE SINGLE—Assorted colors; fine plants. OBSCONCA GRANDIFLORA—The new large flowering, ever-blooming primrose; pure white shading to lilac. Our plants are

very fine. **THE BABY PRIMROSE (Forbesi)**—Blooms early and continues throughout the season. Flowers a delicate rosy lilac with eyes of pale gold.

#### SALVIA.

**ST. LOUIS**—New. The finest Salvia yet produced. It is cer-tainly without a rival. Beautiful flower spikes, fully 12 to 18 inches long and 3 inches in diameter. A very early bloomer and continues to be one mass of scarlet flowers from June until frost.

**ZURICH**—This is the earliest-flowering variety of all, be-ginning to bloom in June, continuing without interruption until frost. The plant is of very dwarf, compact habit, making it suitable for small beds or borders.

#### TRADESCANTIA.

**ZEBRINA-Wandering Jew**-Leaves not so highly colored as Multi-color, but are of a green, variegated with red and purple.

#### VERBENAS.

A fine collection of named varieties. All colors.

#### VINCA.

MAJOR VARIEGATA-Variegated, trailing vine, fine for baskets; well known and popular.

32

# Landscaping

Our Landscape Department is prepared to furnish attractive planting plans for small city lots up to large private grounds, public parks, factory grounds, cemeteries, summer resorts, schools, colleges, libraries, hospital grounds, etc. Our landscape architect is one of the leading men in his profession in the country. In our work we use hardy, flowering shrubs, herbaceous plants and vines, ornamental and shade trees; aiming to give, not alone foliage and flowers from spring to autumn, but pleasing bark and berry effects during the winter months. This work is not expensive, costs but little, and pleases so much, besides enhancing the value of the property. If interested, write for information early as possible as we have many appointments ahead.

# Cut Flower and Plant Store

We wish to call attention to our Cut Flower and Plant Store, 217 NORTH MAIN STREET, (Bell 'Phone 115, Kinloch 'Phone 954,) where we have on sale all varieties of Cut Flowers, Potted Plants, Seeds, Shrubs and all other Florists' Goods. Floral designs for every occasion made on short notice at very reasonable prices. Mail, telegraph and telephone orders receive our prompt attention. Safe delivery guaranteed.

J. O. WILLSON, President F. D. MARQUIS, Cashiel A. E. STEVENSON, Vice-President.

### THE PEOPLES BANK

CAPITAL \$100,000.00
