A PROCLAMATION

WHEREAS the act of August 18, 1942, 56 Stat. 746, contains in part the following provisions:

"Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the district courts shall have original jurisdiction of all prizes captured during the present war on the high seas if said capture was made by authority of the United States or was adopted and ratified by the President of the United States and the prize was brought into the territorial waters of a cobelligerent or was taken or appropriated for the use of the United States on the high seas or in such territorial waters, including jurisdiction of all proceedings for the condemnation of such property taken as prize.

Reciprocal recognition and full faith and credit shall be given to the jurisdiction acquired by courts of a cobelligerent hereunder and to all proceedings had or judgments rendered in exercise of such jurisdiction."

WHEREAS the Government of India, a cobelligerent, has consented to the exercise of the jurisdiction conferred by the said act with respect to prizes of the United States brought into the territorial waters of India and to the taking or appropriation of such prizes within the territorial waters of India for the use of the United States:

NOW, THEREFORE, I, FRANKLIN D. Allotments, authorized controlled material orders and authorized production schedules are not specific authorization to use aluminum within the meaning of this order. In addition, no person shall use aluminum² in manufacture except to make the following items, or parts or sub-assemblies therefor, or for the purposes indicated, and then he shall use only low-grade aluminum ingot (or parts or material made therefrom) where the description of the item or purpose is qualified by the words "low-grade aluminum ingot only" or similar phraseology:

(1) Combat end products complete for tactical operations when they are prescribed for field or combat use by and are being produced for the Army or Navy of the United States, the Maritime Commission or the War Shipping Administration, or when they are prescribed for field or combat use by any army or navy of a foreign country and are being produced for any foreign country pursuant to the Act of March 11, 1942, entitled "An Act to Promote the Defense of the United States" (Lend-Lease Act). However, the use of aluminum must be restricted to the grade and to the amounts required by the latest issue of specifications (including performance specifications) of the appropriate government agency or, in the case of Lend-Lease products, the use of aluminum must be restricted to the grade and the amounts required by the specifications applicable to similar combat end products of the appropriate United States government agency.

(c) *Repair.* The restrictions of this order shall not apply to making repair parts for a specific repair of a used article, or to a person repairing a used article, when aluminum parts or aluminum material is used to replace aluminum or a scarcer material. Order M-1-d requires that any part or material replaced be turned over to a scrap dealer if it contains aluminum and is good only for scrap.

(d) *Requests for authorization to use aluminum.* Any person who seeks to obtain specific authorization of the War Production Board to use aluminum for a purpose not permitted by paragraphs (b) or (c) of this order should do so by applying by letter to the Aluminum and Magnesium Division, War Production Board, Washington 25, D. C., Reference M-1-1, which letter should be filed in duplicate and contain substantially the information, numbered as shown below.

(6) If previous requests for this use have been authorized or denied, give reference number of most recent authorization or denial.

Special consideration will be given to requests for the use of aluminum in connection with approved programs of the War Production Board, where the use of aluminum would mean a substantial saving in man-hours or of material scarcer than aluminum, increase in production or increased efficiency of the product.

(e) *Contamination.* No person shall contaminate aluminum with any other metal or material, except that a producer or approved smelter may mix aluminum with other metals in the production of aluminum alloys, or except that any person may mix aluminum with other metals in the production of other alloys subject to the provisions of paragraph (b) hereof. (See also the provisions of Supplementary Order M-1-d with respect to aluminum scrap.)

(f) *Restrictions on deliveries.* No person shall deliver any aluminum if he knows or has reason to believe that such aluminum is to be used in violation of the terms of this order.

PART 1188—RAILROAD EQUIPMENT

[General Limitation Order L-97, as Amended
Dec. 4, 1943]

NEW LOCOMOTIVES

Section 1188.1 *General Limitation Order L-97* is hereby amended to read as follows:

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of critical materials entering into the production of new locomotives for defense, for private account and for export; and the following order is deemed necessary and

appropriate in the public interest and to promote the national defense:

§ 1188.1 *General Limitation Order L-97*—(a) *Purpose and scope*. This order covers the production and delivery of new locomotives. The previous control in this order over used locomotives is no longer effective.

(b) *Definitions*. For the purpose of this order: (1) "Locomotives" means all types of new locomotives, including but not limited to steam, electric, diesel, diesel-electric, gasoline and gasoline-electric locomotives. This definition does not include underground mine-type locomotives.

(2) "Producer" means any person engaged in the production of new locomotives.

(c) *Restrictions on production and delivery of locomotives*. Irrespective of the terms of any contract of sale or purchase or of any other commitment, no producer shall produce or deliver any locomotives except as authorized pursuant to the provisions of paragraph (d) of this order.

(d) *Production and delivery schedules*.

(1) Each producer shall schedule (or reschedule, if necessary) his production and make deliveries of locomotives in accordance with such specific written directions as may be issued from time to time by the War Production Board.

(2) The production and delivery schedules established by any specific direction issued pursuant to paragraph (d) (1) above shall be maintained without regard to any preference ratings already assigned or hereafter assigned to particular contracts, commitments, or purchase orders, and may be altered only upon specific written direction of the War Production Board.

(3) If it becomes impossible for any producer to maintain production and delivery of locomotives in accordance with any such schedule, he shall immediately notify the War Production Board, and, unless otherwise directed by the War Production Board, he shall continue to produce and deliver locomotives in the order set forth in such schedule and shall postpone production and delivery of any such locomotives only to the extent required by the circumstances causing his failure to maintain production and delivery as required by such schedule.

(e) *Violations*. Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(f) *Applicability of regulations*. This order and all transactions affected by it are subject to all applicable regulations of the War Production Board, as amended from time to time.

(g) *Communications.* All communications concerning this order shall be addressed to War Production Board, Transportation Equipment Division, Washington 25, D. C., Ref.: L-97.

Issued this 4th day of December 1943.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

INTERPRETATION 2

The question has arisen to what extent a production and delivery schedule for a given number of locomotives, prescribed for a producer by the War Production Board pursuant to paragraph (d) (1) of Order L-97, takes precedence over any preference ratings which may be applied or extended to him, either for the locomotives themselves or for parts thereof.

A production and delivery schedule so established is protected by paragraph (d) (2), which provides that it "shall be maintained without regard to any preference ratings already assigned or hereafter assigned . . .". This protection of the schedule under Order L-97 extends not only to locomotives in completed form, but also to any locomotive parts manufactured by the producer which enter into the scheduled locomotives, to the extent that the diversion of such parts to fill rated orders would interfere with fulfillment of the prescribed schedule. (Issued April 12, 1943.)

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of critical materials entering into the production of new railroad-type cars for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 1188.2 *Limitation Order L-97-a—*

(a) *Purpose and scope.* This order, as amended December 4, 1943, covers production and delivery of all new railroad-type cars, including new industrial cars formerly covered by Order L-97-b, which has been revoked. The previous control in that order over used industrial cars is no longer effective.

(b) *Definitions.* For the purpose of this order:

(1) "Producer" means any person engaged in the production of new cars.

(2) "Cars" means all cars of the railroad type with a nominal capacity of ten (10) tons or over, whether for use in railroad service or industrial intraplant service, which have never been sold or used.

(3) "Railroad type" car means any car, except units which are self-propelled, falling within the "Classification of Cars, Definitions and Designating Letters Of", as described in section L of the "Manual of Standard and Recommended Practice" of the Mechanical Division, Operations and Maintenance Department, Association of American Railroads, effective as of January 1, 1943.

(c) *Restrictions on production and delivery.* Irrespective of the terms of any contract of sale or purchase or of any other commitment, no producer shall produce or deliver any car except as authorized pursuant to the provisions of paragraph (d) of this order.

(d) *Production and delivery schedules.* (1) Each producer shall schedule (or reschedule, if necessary) his production and make deliveries of new cars in accordance with such specific written directions as may be issued from time to time by the War Production Board.

(2) The production and delivery schedules established by any direction issued pursuant to paragraph (d) (1) shall be maintained without regard to any preference ratings already assigned or hereafter assigned to particular contracts, commitments, or purchase orders, and may be altered only upon specific written direction of the War Production Board.

(3) If it becomes impossible for any producer to maintain production or delivery of cars in accordance with any such schedule, he shall immediately notify the War Production Board, and, unless otherwise directed in writing by the War Production Board, he shall continue to produce and deliver cars in the order set forth in such schedule and shall postpone production or delivery of any such cars only to the extent required by the circumstances causing his failure to maintain production or delivery as required by such schedule.

(e) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(f) *Applicability of regulations.* This order and all transactions affected by it are subject to all applicable regulations of the War Production Board, as amended from time to time.

(g) *Reports.* Producers must file semi-monthly on Form WPB-1334 reports of their deliveries of cars, in ac-

cordance with the instructions on the form. This reporting requirement has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(h) *Communications.* All communications concerning this order shall, unless otherwise directed, be addressed to: War Production Board, Transportation Equipment Division, Washington 25, D. C., Ref.: L-97-a.

Issued this 4th day of December 1943.

Section 1188.4 *General Limitation Order L-97-b* is hereby revoked. This revocation does not affect any liabilities incurred under the order. With respect to new industrial cars, the order is superseded by Limitation Order L-97-a, as amended simultaneously with this revocation. PART 3270—CONTAINERS

[Supplemental Order L-232-a as Amended Dec. 4, 1943]

WOODEN SHIPPING CONTAINERS FOR ORANGES AND GRAPEFRUIT

§ 3270.58 *Supplemental Order L-232-a—(a) Purpose.* The purpose of this supplemental order is to restrict the use of wooden shipping containers by permitting only a specified percentage of oranges and grapefruit to be shipped in them with the intent that the balance will be shipped in bags or otherwise than in wooden shipping containers.

(b) *Definitions.* For the purpose of this supplemental order:

(1) "Wooden shipping container" means any new or used shipping container made wholly or partially of wood.

(2) "Seasonal year" shall mean the period from November 1, 1943 to October 31, 1944, and the quarters of the seasonal year shall be each succeeding three month period beginning November 1, 1943.

(c) *Restrictions.* (1) No person making shipments of oranges and grapefruit originating in the areas listed below shall commercially ship in wooden shipping containers in any quarter of the seasonal year a greater proportion of the total volume of his shipments of oranges and grapefruit (not including shipments for

canning, juice or other processing) than the following:

	Percent
Shippers making shipments originating in Texas.....	85
Shippers making shipments originating in California and Arizona.....	96

(2) Any person shipping less than his quota of oranges and grapefruit in wooden shipping containers in any quarter may increase his quota of shipments in wooden shipping containers in the following quarters by the amount of the difference between his quota and what he actually shipped in the preceding quarters.

(3) This restriction shall not apply to any shipper who ships less than one carload of oranges and grapefruit, or its equivalent, in any quarter.

(4) Shippers located in the Florida area have not been included in the restrictions provided for by this order because the Florida Citrus Commission is placing and administering quota restrictions to the end that not more than 90% of the total shipments in the seasonal year of oranges and grapefruit from Florida shall be in wooden shipping containers.

(d) *Transfer of quotas.* Any shipper who does not ship his permitted amount of oranges and grapefruit in wooden shipping containers may transfer his unused quota to another shipper in the same area.

(e) *Miscellaneous provisions*—(1) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter referring to the particular provision appealed from and stating fully the grounds of appeal.

(2) *Records.* All persons affected by this order shall keep for at least two years records concerning the shipments of oranges and grapefruit in wooden shipping containers and shipments by other means, and also records concerning the transfer of quotas, including the names and addresses of parties involved and the amount transferred, and shall make reports on same, if required.

(3) *Violations.* Any person who willfully violates any provision of this order, or who, in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from accepting further deliveries of, or making deliveries in wooden shipping containers.

(4) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable provisions of the regulations of the War Production Board, as amended from time to time.

(5) *Communications.* All communications concerning this order shall, unless otherwise directed, be addressed to: War Production Board, Containers Di-

vision, Washington 25, D. C., Ref: L-232-a.

51 and higher	140/2	140/2	120/2	120/2	80/2	80/2	1350

(c) The standard leg length of women's full-fashioned stockings shall be as follows:

	Minus tolerance Inches	Inches
Viscose or cuprammonium rayon stockings	29	1 1/2
Acetate rayon stockings	30 1/2	1 1/2
Cotton stockings	30	1

With reasonable plus tolerances

Any person who manufactured proportioned length hosiery outside the tolerances permitted by this paragraph (c) in 1942 may apply to the War Production Board for permission to continue such manufacture. Such application shall be in writing, and shall set forth all pertinent facts. The War Production Board may take such action on such application as it may deem proper.

(d) (1) In standard or conventional welt constructions, the minimum length of the double welt shall be 3 1/2 inches.

(2) An afterwelt is required in rayon stockings except where the main or leg yarn is 100 denier or coarser.

(3) Double welts of less than 3 1/2 inches, and special welt constructions including single thickness welts, are permissible, providing the welt yarn is heavier than the main end used in knitting the leg and providing the single thickness portion of welt or afterwelt is no finer than—

150 denier filament rayon or its equivalent in other fibers for 48 gauge or coarser, 100 denier filament rayon or its equivalent in other fibers for 51 gauge or finer.

In such special welt constructions, a proportionately lower number of courses than specified in Table I are permissible.

(4) When a standard or conventional double welt in rayon or in cotton full-fashioned hosiery is knit of a higher denier than that specified as the minimum in the table, it is permissible to reduce the minimum total courses at a rate of one course less per each denier used, over the specified minimum. That is to say, if 125 denier is used in the welt instead of the specified minimum of 100 denier, the minimum number of courses may be reduced by 25 courses in the welt but not in knitting the leg portion. In applying this provision to cotton welts, the denier equivalent of the cotton count shall be employed.

(5) In rayon hosiery, the total over-all length of welt plus the after-welt shall not be less than 5 inches, except as provided in paragraph (d) (2) of this schedule.

(e) All rayon stockings of 75 denier or finer made with either a cotton or rayon welt shall be made with an overlap of at least two (2) courses immediately following the after-welt, in which the yarn of the afterwelt is to be knit together with the main end used in

knitting the leg for a minimum of two (2) courses.

(f) The minimum number of needles used in knitting hosiery shall be the full 14 inch bar less two needles at each end of the bar on all gauges except in the case of drop needle or needle out constructions of cotton, wool or spun rayon, or combinations thereof.

(g) The minimum number of courses are to be counted in conventional or legger-footer construction, from the first course in the welt to the loose course in the heel; in single unit or rack-back constructions, from the first course in the welt to the course in the heel on which the widest course in the rackback falls.

(h) The heel splicing shall measure 4 1/2 inches from the bottom of the heel with a 1/2 inch tolerance, plus or minus.

(i) All seams shall be made with a minimum of 16 stitches to the inch and be made of a good quality two or three ply seaming yarn.

(j) Based on a 14-inch head, the maximum number of total flare and calf narrowings in the leg of full-fashioned plain knit hosiery shall be:

	Back-Back	
	Round Heel	Legger-Footer
39 gauge	44	40 narrowings
42 gauge	46	42
45 gauge	48	44
48 gauge	54	46
51 gauge	58	50
54 gauge and up	optional	optional

(k) The reinforcing yarn in the toe must start within 10 courses from the first toe narrowing.

(l) Where two-ply cotton yarns are specified the equivalent count in single yarns may be used. Where definite counts of cotton (but not rayon) yarn are specified in the table, no finer counts of cotton yarn may be used, but combination yarns of cotton and rayon, or cotton, rayon and wool mixed yarns, and coarser counts of cotton yarns, or spun rayon yarn of total equivalent denier or heavier may be used. No spun rayon yarn may be used as a toe splicing or toe reinforcing yarn.

(m) Plied ends of single rayon yarn may be used if they make the equivalent denier of yarns shown in the table. Sixty-five denier cuprammonium rayon yarn shall be deemed equivalent to 75 denier viscose yarn and may be used as an alternate wherever 75 denier is specified in the table. The use of acetate rayon yarn is not permissible in deniers finer than 75.

(n) No lace bands, fancy designs or numerals are to be knit in welts, or in after welts of plain knit stockings. No picot stitches are to be placed more closely than 3/4 inch apart except for the top 1/2 inch of the welt.

(o) For any spring-summer or fall-winter line, no manufacturer shall put in dye or knit ingrain more than 7 basic body colors, and no more than 5 of these 7 shall be in any one style. In addition to the foregoing, white is also permitted.

SCHEDULE B—WOMEN'S SEAMLESS, CIRCULAR KNIT HOSIERY

NOTE: Table I amended; paragraphs (f) through (h) redesignated (g) through (i) Dec. 4, 1943.

(a) No manufacturer shall produce any women's seamless or circular knit hosiery unless it meets the minimum specifications shown on Table II.

400	75	20 turns	1,344	100	10 turns	1,368	140/2				

(b) Where definite counts of cotton (but not rayon) yarn are specified in the table, no finer counts of cotton yarn may be used, but combination yarns of cotton and rayon, or cotton, rayon and wool mixed yarns, and coarser counts of cotton yarns, or spun rayon yarn of total equivalent denier or heavier may be used. No spun rayon yarn may be used as a splicing or reinforcing yarn in heel or toe.

(c) Where two-ply cotton yarns are specified in the table the equivalent counts in single yarns may be used.

(d) The leg length of women's seamless rayon hosiery shall be 30 inches with a 1 1/2 inch minus tolerance and a reasonable plus tolerance. All welts to finish a minimum of 4 inches.

(e) The specified minimum total courses are to be counted from the first course in the welt to the end of the high splicing where the reciprocating motion is started for the heel.

(f) When the welt of a woman's seamless stocking is knit of higher denier than that specified as the minimum in the table, it is permissible to reduce the minimum total courses at a rate of one course less per each denier used over the specified minimum. This total reduction in courses shall be adjusted to the nearest number divisible by 12. That is to say, if 125 denier is used in the welt instead of the specified minimum of 100 denier the minimum number of courses may be reduced by 24 courses in the welt, but not in knitting the leg portion. In applying this provision to cotton welts the denier equivalent of the cotton counts shall be employed.

(g) Mesh or tuck stitch constructions in women's circular knit hosiery are restricted to the following constructions:

(1) On single-end tuck stitch knitting, no finer than one end of 100 denier rayon yarn or its equivalent in other fibres may be used in the leg, on any machine regardless of number of needles.

(2) On double-end mesh knitting no finer than 75 denier rayon yarn or its equivalent in other fibres may be used in the leg, on any machine regardless of number of needles.

(3) Minimum number of turns per inch in the rayon yarn in mesh or tuck stitch constructions are to be the same as shown in Table II for plain knit constructions for similar deniers.

(h) All sole splicing yarns are prohibited in women's circular knit all-over cotton hosiery and in women's circular knit rayon hosiery when the main end is 100 denier rayon yarn or heavier.

(i) For any spring-summer or fall-winter line, no manufacturer of women's seamless hosiery shall put in dye or knit ingrain more than 7 basic body colors, and no more than

5 of these 7 colors in any one style. In addition to the foregoing colors, white is also permitted.

SCHEDULE C—MEN'S HOSIERY

NOTE: Paragraphs (b) through (f) redesignated (c) through (g) respectively, Dec. 4, 1943.

(a) The following limitations apply to men's hosiery but do not apply to the manufacture of men's work socks or bundle socks made of wool, part wool, or cotton.

(b) No manufacturer may produce men's hosiery with an over-all leg length other than those specified in paragraph (h) of this schedule or in accordance with Schedule E.

(c) No manufacturer may produce in any mill men's hosiery in fancy patterns which were not in actual production in such mill during the sixty-day (60) period immediately prior to April 2, 1943. Any machines that have been idle for this entire period may be set-up on patterns of the mill's choosing, but when so set-up, they are subject to the limitations of this clause.

(d) (1) For any spring-summer or fall-winter line no one mill shall put in dye or knit ingrain more than 7 basic body colors and no more than 5 of such 7 basic colors in any one style, to which may be added white and three War Service colors.

(2) No limitations are placed upon the use of various colors in yarns used purely for decorative purposes in men's fancy hosiery.

(e) No men's cotton hosiery is to be manufactured with any splicing or reinforcing yarn in the sole.

(f) True-ribbed tops, those knitted separately and transferred, or those knitted automatically on H-H or Komet machines, shall not be doubled, turned or hemmed. None of the limitations of this paragraph shall apply to men's hosiery made on R. I. machines.

(g) No men's hosiery is to be manufactured with any mock-seams.

(h) The over-all leg length of men's half hose shall be as follows: 13 1/2-inch minimum; 15 1/2-inch maximum.

The over-all leg length of men's short socks or slacks shall be 10 inches maximum, including a top portion of not more than 2 inches.

SCHEDULE D—INFANTS', CHILDREN'S, BOYS' AND MISSES' HOSIERY AND WOMEN'S ANKLETS

NOTE: Paragraph (b) deleted and paragraphs (c) through (f) redesignated (b) through (e) respectively Dec. 4, 1943.

(a) No manufacturer shall put in production any fancy or novelty patterns or designs, not actually in production in the period between October 1st, 1942, and April 2, 1943.

(b) (1) The total finished leg-length of all women's, misses', children's, and infants' anklets either straight-up or cuff-top is not to exceed the measurements shown in Table #10 of U. S. Commercial Standards, C. S. 46-40, as follows:

PART 3291—CONSUMERS DURABLE GOODS
 [General Limitation Order L-260-a]
FURNITURE

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of wood for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3291.66 *General Limitation Order L-260-a*—(a) *Restriction on use of wood.* Beginning with the first quarter of 1944, no person may use in any quarter in the manufacture and crating of furniture more than 21% of the amount of wood which he used for these purposes in 1943. Use of wood shall be measured in board feet, and wood shall be considered used in the quarter in which it is first changed from the form in which received or is first assembled in that form. In computing his use of wood bought otherwise than by board measurement, a manufacturer may convert it to board feet by any reasonable and consistent method, which he must explain in reporting under paragraph (d) below. This paragraph (a) does not apply to the use of plywood or veneer, and the use of these materials in 1943 must be excluded in determining the base on which the percentage is reckoned.

(b) *Restriction on receipts of wood.* After December 31, 1943 no furniture manufacturer may accept any delivery of wood which, added to all inventory on hand, will give him a supply, at the rate of operation permitted by this order, for more than six months from the date of receipt in the case of lumber (excluding dimension stock), or for more than three months from the date of receipt in the case of wood purchased in other forms (including dimension stock, plywood, and veneer). (For example, a manufacturer who is permitted under paragraph (a) to use 20,000 board feet a month and buys half of it in the form of lumber and half in other forms may not accept deliveries which will result in an inventory of more than 60,000 board feet of lumber and 30,000 board feet of wood in other forms.) The restrictions of this paragraph (b) do not apply to:

- (1) Receipt, by a manufacturer whose inventory is within the above limits, of the minimum quantity in which he normally buys.
- (2) Receipt of wood which was in the inventory of another furniture manufacturer before January 1, 1944.
- (3) A delivery which is specifically permitted by the War Production Board, upon application addressed to the Board, Washington 25, D. C. Ref: L-260-a.

(c) *Freezing of certain grades and species and report to Central Procurement Agency.* (1) Every furniture manufacturer must file a report with the Central Procurement Agency of the U. S. Army Engineers, Washington 25, D. C., not later than December 15, 1943, describing by species, grade, size and amount, all graded lumber which he has in inventory of grade #1 common or better of the following species: ash, beech, yellow birch, hickory, hard maple, oak, rock elm. Each species is to be listed on separate sheets approximately 8½ x 11 inches in size. This does not apply to manufacturers who have less than a carload of these woods in the aggregate. A copy of the letter must also be sent to the War Production Board, Washington 25, D. C., Ref: L-260-a.

(2) Beginning not later than April 15, 1944 and every 3 months afterwards (July 15, October 15, January 15, April 15) every furniture manufacturer must file with the Central Procurement Agency and the War Production Board a similar report listing all graded lumber of the same species, but covering only grades above #1 common, which he has received or has sorted out of ungraded lumber between the date of the previous report and the day of filing.

(3) A manufacturer may, if he prefers, file reports as often as he accumulates a carload or more of lumber of the specified grades to be reported.

(4) A furniture manufacturer who has or receives ungraded lumber of the above species may not use it until he has graded it so that the required grades can be reported.

(5) A furniture manufacturer may not use or dispose of any of the lumber required to be included in the above reports

except that (i) during December 1943 he may use for furniture 30% of the amount of these species used for furniture in the third quarter of 1943; (ii) he may use it to make furniture to be delivered under contract or subcontract to or for the account of the United States Army or Navy, the Maritime Commission, or the War Shipping Administration, to the extent required by the applicable specifications; (iii) he may sell it to the Central Procurement Agency; (iv) he may use or dispose of it for other purposes if the Central Procurement Agency has told him that it does not wish to buy it; (v) any lumber reported and remaining in inventory 60 days after date of reporting may be used or disposed of. Any such use must be within the total limits permitted by paragraph (a) of this order.

(6) Physical segregation of inventories is not required in complying with this paragraph (c) as long as the restrictions are observed with respect to equivalent amounts of lumber of the same grade and species and size.

(d) *Other reports.* (1) On or before January 15, 1944, every furniture manufacturer and also every person who manufactured furniture during 1941 even if he no longer manufactures it, must file with the War Production Board, Ref: L-260-a, a report by letter showing the total number of board feet of wood (excluding plywood and veneer) used in the manufacture and crating of furniture during 1941 and 1943.

(2) This paragraph (d) does not apply to a furniture manufacturer who makes only furniture parts for sale to other furniture manufacturers.

(e) *Limitations on types.* After December 31, 1943, no furniture manufacturer may use any wood in making furniture except furniture of the types listed in Schedule A at the end of this order.

(f) *Equitable distribution to retailers.* It is the policy of the War Production Board that furniture not required to fill rated orders be distributed equitably to retailers giving due regard to established trade connections but also to the needs of dealers whose usual supplies have been cut off and diverted, and to the increased needs of certain areas caused by war conditions. If voluntary compliance with this policy is not found to be sufficient, the War Production Board may direct furniture manufacturers or wholesalers to sell to specified outlets or to outlets in specified areas.

(g) *Used and waste wood excluded.* This order does not apply to wood that has been previously used or to waste consisting of pieces of one board foot or less normally trimmed or edged in the course of production at a sawmill or elsewhere.

(h) *Small manufacturers excluded.* This order does not apply to any furniture manufacturer in any quarter in which his sales of furniture are less than \$5,000 provided that his sales did not exceed \$20,000 in any of the years 1941, 1942 or 1943.

(i) *Definitions.* (1) The term "furniture manufacturer" as used in this or-

der includes any person who makes or assembles any furniture or wooden parts for furniture.

(2) "Furniture" includes all articles commonly known as furniture, but does not include refrigerators, lockers, shelving, factory and industrial equipment, and built in cabinets.

(j) *Budget Bureau approval.* All reporting requirements in this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 4th day of December, 1943.

GENERAL RESTRICTIONS ON CONSUMPTION

§ 4600.02 *Quota restrictions.* No person shall consume crude rubber, latex or reclaimed rubber without a quota assigned by quota directive or other au-

thorization specifying the amounts of crude rubber, latex or reclaimed rubber which he may consume, and no person shall exceed the quantities which he is specifically authorized to consume in any designated period.

The requirements of persons submitting monthly reports on Form WPB-3410 will continue to be anticipated by the issuance from time to time of quota directives. Persons who are not authorized consumers may apply for quotas by writing a letter to the Office of Rubber Director, War Production Board, Washington 25, D. C., setting forth all pertinent facts.

After December 31, 1943, this section shall not apply to consumption of reclaimed rubber which may thereafter be consumed without limitation as to amount in the manufacture of any product for which the use of reclaimed rubber is permitted by this Order.

§ 4600.03 Product restrictions. No person shall use rubber or general purpose synthetics in the manufacture of products except in accordance with the following restrictions:

(a) *Schedule A products.* Rubber and general purpose synthetics may be consumed in the manufacture of those products listed on Schedule A, Appendix I, for which the particular type of rubber or general purpose synthetic is specifically permitted by Schedule A subject to any applicable manufacturing regulations.

Manufacturing regulations for any listed product are set forth in Schedule A unless reference is made in Schedule A to an applicable list of Appendix II, in which case the list also regulates the manufacture of the particular product.

The amounts of crude rubber, latex or reclaimed rubber which may be consumed are subject to limitations imposed by quota or other specific authorization issued to the consumer in accordance with § 4600.02. General purpose synthetics and scrap rubber, however, may be consumed for permitted uses without limitation as to amount.

(b) *Products not listed on Schedule A.* To fill Government orders only, general purpose synthetics, reclaimed and scrap rubber may be consumed in the manufacture of products not listed on Schedule A, Appendix I, unless the product is specifically prohibited for Government orders by Schedule B (Prohibited products).

§ 4600.04 Additional permitted uses. No person shall consume rubber or general purpose synthetics for any purpose

not permitted by § 4600.03 without specific authorization except as follows:

(a) *Scrap rubber for production of reclaimed rubber.* Scrap rubber may be consumed to produce reclaimed rubber.

(b) *Experimental use of general purpose synthetics.* Any person who consumes rubber, synthetic rubber or balata in the manufacture of products permitted by this order may consume two hundred pounds of general purpose synthetics in any thirty day period for experimental purposes. Purchase requests for general purpose synthetics produced in Government plants in lots of 200 pounds or less, for experimental use may be made directly to Rubber Reserve Company, Washington, D. C.

§ 4600.05 Special purpose synthetics and chlorinated rubber. No person shall consume special purpose synthetics or chlorinated rubber except upon specific authorization of the War Production Board. Requests for authorization are made by filing Form WPB-2877 in duplicate with the Office of Rubber Director, Washington 25, D. C., in accordance with the instructions accompanying the form.

§ 4600.06 Balata. No person shall consume balata except upon specific authorization of the War Production Board. Requests for authorization to consume balata may be made by letter to the Office of Rubber Director, War Production Board, Washington 25, D. C.

§ 4600.07 Finished and semi-finished products. No person shall consume any finished or semi-finished product which is usable for a purpose for which it was designed, and which contains in the aggregate more than 10% by weight of rubber or general purpose synthetics except to consume the same in accordance with the provisions of this order applicable to the consumption of rubber, synthetic rubber and balata.

§ 4600.08 Special restrictions by directive. War Production Board may from time to time by special directive limit the consumption of rubber or general purpose synthetics in the manufacture of any product whether to fill Government or civilian orders.

§ 4600.09 Schedule B: Prohibited products. No rubber or synthetic rubber may be consumed in the manufacture of any product listed in Schedule B, Appendix I. Schedule B is applicable to Government and civilian orders, and is compiled for the purpose of indicating the products which ordinarily do not receive favorable consideration on appeal.

In case of conflict between the provisions of Schedule A and Schedule B, Schedule B shall govern.

RESTRICTIONS ON DELIVERIES

§ 4600.10 Delivery and acquisition of rubber, chlorinated rubber, synthetic rubber and balata. No person shall deliver rubber, synthetic rubber, chlorinated rubber, or balata except as permitted by regulations of Rubber Reserve Company or as specifically authorized by the War Production Board. Tire and tube products are classified for inventory and procurement purposes in § 4600.14.

RESTRICTIONS ON INVENTORIES

§ 4600.13 Inventories of materials. No person, other than Rubber Reserve Company, shall accept delivery of crude rubber, latex, reclaimed rubber, synthetic rubber or balata in quantities which shall result in such person having an inventory of crude rubber, latex, reclaimed rubber, synthetic rubber, or

balata which can reasonably be expected to last more than 60 days. Nothing contained in this § 4600.13 nor in § 944.14 (Priorities Regulation No. 1 as amended) shall be deemed to prohibit any person engaged in the business of reclaiming rubber from holding or acquiring such inventories of reclaimed rubber as he may deem advisable.

§ 4600.14 *Tire and tube manufacturers' inventories of tires and tubes.* No person shall consume any rubber, synthetic rubber or balata, in quantities which shall result in such person having an inventory of any of the following groups of products in excess of a minimum practicable working inventory:

Group No.

1. Passenger and motorcycle tires.
2. Passenger and motorcycle tubes.
3. Truck, bus and special purpose tires.
4. Truck, bus and special purpose tubes.
5. Farm tractor-implement tires.
6. Farm tractor-implement tubes.
7. Bicycle tires.
8. Bicycle tubes.
9. Airplane tires.
10. Airplane tubes.
11. Solid truck-trailer tires.
12. Pneumatic industrial tires.
13. Pneumatic industrial tubes.
14. Solid industrial tires.

An inventory (including only inventory at factory, wholesale warehouse points, and "in transit" to wholesale warehouse points) shall be deemed in excess of a minimum practicable working inventory, if such inventory, by total number of products in any one of the above groups is in excess of total unit sales of the products in that group during the previous 60 days, or in excess of 1/3 of the total unit sales of products in that group during the previous 180 days, whichever is the greater.

For the purpose of this section and §§ 4600.15-4600.17 inclusive, the above groups shall be deemed to refer only to new products.

§ 4600.15 *Reseller's inventories of airplane, bicycle and industrial tires and tubes.* No person shall deliver any new airplane, bicycle or industrial tires or tubes (as listed in Groups 7-10 inclusive and 12-14 inclusive, of § 4600.14) to a person regularly engaged in the business of reselling such products, unless the reseller acquiring the products shall attach to his purchase order a certification in substantially the following form signed by an authorized official either manually or as provided in Priorities Regulation No. 7:

The undersigned hereby certifies to _____ and to _____ (insert name and address of seller) the War Production Board that he is familiar with Rubber Order R-1 as amended, and that the number of units to be acquired by this order will not result in his inventory of airplane, bicycle or industrial tires or tubes, on hand and on order, in any single group of § 4600.14 in which the products fall, being greater than his total unit sales of products in that group during the 60 days preceding his

order, or greater than 1/3 of the total unit sales of products in that group during the 180 days preceding his order, whichever is greater.

_____ Date
 _____ Name of Purchaser
 _____ Authorized Official

This § 4600.15 shall not apply to any purchase order originating outside the continental limits of the United States.

(Similar certification is required for products in Groups 1 to 6 inclusive and Group 11 of § 4600.14 by the Office of Price Administration in Amendment No. 57 to OPA Ration Order 1-A.)

§ 4600.16 *Original equipment manufacturers' inventories of tires and tubes.* No person shall deliver any product listed in groups 1 to 14 inclusive of § 4600.14 to any vehicle manufacturer requiring such product as a part of the original equipment of the vehicles he manufactures, unless the vehicle manufacturer shall attach to his purchase order a certification (in addition to any other certification which may be required by regulations of the War Production Board) in substantially the following form signed by an authorized official either manually or as provided in Priorities Regulation No. 7:

The undersigned hereby certifies to _____ and to _____ (insert name and address of seller) the War Production Board that he is familiar with Rubber Order R-1 and that acceptance of delivery of the products listed on this purchase order will not increase his inventory of products within the particular group listed in § 4600.14 of Rubber Order R-1 in which the products fall, in excess of such products required for his production of vehicles during the ensuing 30 days.

_____ Date
 _____ Name of Purchaser
 _____ Authorized Official

A vehicle manufacturer may certify a purchase order or contract which calls for scheduled deliveries during a period of more than thirty days without making certification for each thirty days' production. Under these circumstances, use of the foregoing certification constitutes a representation that the deliveries scheduled will not result in the acquisition of more products than are required for the particular manufacturer's production of vehicles during the thirty-day period following each scheduled delivery. In the event of a decrease in the number of products actually required, the manufacturer shall notify his supplier of the reduction, and the scheduled deliveries shall be revised accordingly.

§ 4600.17 *User's inventories of industrial tires and tubes and solid tires; procurement for replacement purposes.* (a) No person shall deliver or accept delivery of any pneumatic tire described in paragraph (b) below for replacement on any passenger automobile, motorcycle, bus,

farm implement, farm tractor or commercial motor vehicle except in accordance with OPA Ration Order 1A. The following certification procedure is applicable only to new pneumatic tires and tubes of the sizes and types described below for replacement on other types of vehicles and equipment and to any industrial or highway solid tire for replacement purposes regardless of the type of vehicle or equipment.

For example, a person who wishes to replace a straight side pneumatic tire in size 4.00-12 on a passenger car or small delivery truck, may do so only under the Ration Order. On the other hand, a person who requires the same tire for replacement on material handling equipment such as an industrial power truck uses the certification procedure.

Replacement tires or tubes classified in Groups 1-6 inclusive of § 4600.14 (regular passenger, motorcycle, bus, farm tractor-implement or special purpose types) are also subject to the provisions of the Ration Order, even though the tires or tubes are required for industrial equipment.

(b) *Certification of purchase orders.* No person shall deliver any tires or tubes for replacement purposes (except as provided in OPA Ration Order 1A) in the following classifications:

(1) Any straight side pneumatic tire designed primarily for industrial use up to and including size 4.50-12 and the following sizes: 6.00-9, 7.50-10, 7.50-15 (4-ply, smooth tread only) and 9.00-10;

(2) Any single tube pneumatic tire designed primarily for industrial use;

(3) Any industrial or highway solid tire;

unless the person acquiring the same shall attach to his purchase order a certification in substantially the following form signed by an authorized official either manually or as provided in Priorities Regulation No. 7.

The undersigned hereby certifies to _____ (insert name and address of seller) and to the War Production Board that he is familiar with Rubber Order R-1 and that the products listed on this purchase order are required by him for replacement purposes within 30 days from the date of this certification and do not include any pneumatic tires or tubes for any passenger automobile, motorcycle, bus, farm implement, farm tractor, or commercial motor vehicle.

_____ Date
 _____ Name of Purchaser
 _____ Authorized Official

Definitions of the vehicles and equipment for which replacement tires or tubes may not be secured by certification are set forth in OPA Ration Order 1-A.

(c) *Preference ratings.* Tires and tubes which are subject to the foregoing certification procedure may be produced or delivered to fill civilian orders for replacement purposes (identified by certification), without regard to preference ratings. Any rating purporting to be applied or extended to any such tires or tubes for replacement purposes shall be void and no person shall give any effect to it except in filling Government orders. This suspension of ratings does not affect rated orders certified by original equipment manufacturers in accordance with § 4600.16.

Any person who is unable under this section to obtain timely delivery of replacement tires or tubes required by him to avoid imminent break-down in operations directly related to the war effort may apply by letter to the War Production Board for written permission to use his MRO rating. This letter of application should specify the minimum number of tires or tubes required and describe briefly the type of operation and the condition of the equipment.

(d) *Effective date.* This section supersedes existing § 4600.17 (as amended by Amendment 3 issued September 7, 1943) on December 15, 1943.

RESTRICTIONS ON OPERATIONS

§ 4600.18 *Regrooving tires.* No person shall regroove the tread or tread surface of any tire or tire casing (except airplane and bus mileage contract tire casings) whether by cutting, scraping, grinding, burning, heating, remolding or any other means. This restriction does not apply to the regrooving of tires in the course of recapping or retreading or restoring the original design to tread sectional repairs.

§ 4600.19 *Recapping or retreading tires.* No person shall recap or retread a tire unless the tire is worn smooth in the middle of the tread. As used herein, a tire is "worn smooth" when the tread design is no longer visible.

§ 4600.20 *Destruction of tires and scrap rubber.* No person shall destroy, damage, cut or tear apart any tire, tire casing or tire tube, or any scrap rubber, whether by burning or any other means and whether for the purpose of making or repairing products or materials from or with all or any of its constituent parts, except that this restriction shall not apply to the following:

(a) The consumption of any scrap rubber in the manufacture of any product for which rubber or synthetic rubber may be consumed under the provisions of this order.

(b) The consumption of any scrap rubber by any person producing reclaimed rubber as a necessary incident to such reclaiming operations.

(c) The cutting of any scrap tire tube for the purpose of splicing together seg-

ments of two or more such tire tubes to form a serviceable tire tube.

(d) The destruction of any scrap rubber (without destroying the rubber therein) for the purpose of selling its component parts to Rubber Reserve Company or to a scrap dealer in accordance with the regulations prescribed from time to time by Rubber Reserve Company.

(e) The destruction of the following articles when through obsolescence, use or deterioration the articles have entirely served their usefulness in their present state:

(1) Used battery containers and separators and parts thereof.

(2) Rough bore (metal reinforced) oil suction and discharge hose and hose containing asbestos combined with rubber.

(3) Rubber insulation on wire and cable.

(4) That part of rubber bonded to metal which cannot be separated from the metal by mechanical means.

(5) Brake linings and clutch facings.

(6) Metal-inserted packing.

(7) Metal-inserted running boards.

(8) Gasoline pump hose.

(9) Friction tape and adhesive tape (except in-process scrap).

(10) Burnt rubber all of which has been exposed to open flame (but not scorched rubber compounds).

(11) Gasket compounds containing cork.

(12) Typewriter platens.

(13) Tire beads.

(f) The destruction pursuant to specific authorization of the War Production Board, of scrap rubber which has no further value for reclaiming or other use.

(g) Ordinary wear and tear incident to the normal use of any article for a purpose for which it was designed.

§ 4600.21 [Deleted December 4, 1943]

RESTRICTIONS ON IMPORTATION

§ 4600.22 *Importation of rubber, synthetic rubber, balata and products thereof.* No person shall import any rubber, synthetic rubber or balata, or any finished or semi-finished product of which 10% or more by weight is composed of rubber, synthetic rubber or balata or any combination thereof except Rubber Reserve Company, Rubber Development Corporation, or any Corporation organized under section (5) (d) of the Reconstruction Finance Corporation Act, as amended, or any agent acting for one or more of them. Nothing contained in this § 4600.22 shall be deemed to prohibit:

(a) The importation by any person during any calendar month of products or materials (except tires, tire casings and tire tubes) which contain an aggregate of not more than twenty-five pounds of rubber, synthetic rubber and balata, provided such products or materials are not imported for the purpose of manufacturing, processing, sale or resale;

(i) The importation from the Dominion of Canada by any person of rubber, synthetic rubber or balata or any products thereof manufactured in the continental United States, Canada or the British Isles.

PURCHASE PROCEDURE

§ 4600.23 *Purchase requests for crude rubber, natural latex or general purpose synthetics.* Purchase requests for crude rubber, natural latex or general purpose synthetics produced in Government plants are made by letter in quadruplicate to the Manager of Allocations, Office of Rubber Director, War Production Board, Washington 25, D. C., specifying the month in which delivery is required and stating the type, grade and number of pounds of material requested. For natural latex, the request should also specify percentage of concentration, type of container, specific use, and usual source of supply.

Requests for purchase of Government plant general purpose synthetics for experimental use in lots of 200 pounds or less are made directly to Rubber Reserve Company, Washington, D. C., (See § 4600.04).

Requests for purchase of general purpose synthetics which are privately produced are made directly to the producer.

APPENDIX I

NOTE: Appendix I amended in its entirety December 4, 1943.

SCHEDULE A—PERMITTED PRODUCTS FOR GOVERNMENT OR CIVILIAN ORDERS

Scope of Schedule A. Schedule A lists the only products which may be manufactured to fill Government or civilian orders, using crude rubber or latex. It also lists the only products which may be manufactured from general purpose synthetics, reclaimed or scrap rubber to fill civilian orders. It does not

restrict the manufacture of *unlisted* products for Government orders, using general purpose synthetics, reclaimed or scrap rubber. (See § 4600.03 (b) for products not listed on Schedule A.)

Crude rubber and latex. Regulations for the consumption of crude rubber and latex in the manufacture of products are set forth in the columns of the schedule unless reference is made to an Appendix II list in which case the list governs the manufacture of the particular product.

Reclaimed rubber. Class 1 reclaimed rubber may be consumed in the manufacture of any product on Schedule A, unless another class is specifically designated on the schedule or by Appendix II list.

The classes of reclaimed rubber are defined as follows: Class 1—Hydrocarbon content of more than 50% by weight; Class 2—Hydrocarbon content of more than 42% by weight but not more than 50% by weight; Class 3—Hydrocarbon content of 42% by weight or less.

General purpose synthetics. General purpose synthetics may be consumed in the manufacture of any product on Schedule A, subject to any special restriction applicable to the product on the Schedule.

Scrap rubber. Scrap rubber is divided into the following classes: Class 1—Ground tire peels and tread buffings; uncured tire cord friction scrap; vulcanized scrap tires and tire parts (except tire beads) and inner tubes; any cured or uncured scrap having a specific gravity of 1.15 or less; Class 2—any other scrap rubber.

Class 1 and Class 2 scrap rubber may be consumed without limitation as to amount for permitted uses. Class 2 scrap may be used in the manufacture of any product on Schedule A. Class 1 scrap may be used only in the manufacture of those products for which Class 1 scrap is specifically designated on Schedule A.

SYMBOLS USED IN SCHEDULE A

Appendix II column: Refers to applicable regulations in Appendix II by list number. The word, "No" is used where no Appendix II regulations apply.

Crude rubber column: Indicates when crude rubber is permitted and regulates its use by showing the maximum percentage of the total volume of the compound, which may be crude rubber.

"X" indicates that crude rubber may be consumed in the minimum quantities required by the manufacturer. This column is blank when regulations are set forth in Appendix II.

Latex column: Indicates when latex is permitted and regulates its use by showing the maximum percentage of the total volume of the compound, which may be latex.

"X" indicates that latex may be consumed in the minimum quantities required by the manufacturer. This column is blank when regulations are set forth in Appendix II.

Special restrictions column: Indicates special restrictions applicable to the particular product. If the column is blank, no special restrictions apply. This column is also used to indicate where Class 1 scrap is permitted.

Where "special authorization" is required for a product each manufacturer must secure a specific allocation before consuming *crude rubber, natural latex, or general purpose synthetics after December 31, 1943.* In some cases, this requirement is confined to crude rubber. Applications may be made by letter to the War Production Board.

Where a product is limited to "government only", it may not be manufactured except to fill government orders.

(a) *Applicability.* (1) This Appendix sets forth certain compounding proportions and manufacturing regulations for many of the products listed in Schedule A of Appendix

I. No person may manufacture the products governed by the lists attached to this Appendix unless such product is manufactured in accordance with the applicable regulations set forth in this Appendix.

(2) All regulations apply to all purchase orders, including both Government and Civilian orders, except where otherwise designated in the appropriate list.

(3) Regulations in this Appendix do not apply to the manufacture of experimental products or experimental compounds designed for:

(1) The substitution of synthetic rubber, reclaimed rubber or scrap rubber for crude rubber and latex.

(1) The conservation of crude rubber, latex, synthetic rubber, reclaimed rubber or scrap rubber.

(b) *General provisions.* (1) The total rubber hydrocarbon (sometimes designated RHC in this Appendix) is the sum total of crude rubber and the average rubber hydrocarbon value of reclaimed rubber, expressed on a volume basis. The average rubber hydrocarbon value of reclaimed rubber shall be calculated from the rubber value of reclaimed rubber as certified by the manufacturer of the reclaimed rubber and shall be determined by the "difference (or indirect)" method.

(2) References to Army, Navy, Federal, Railroad, etc., specifications by number mean the latest issue or amendment of the particular specifications.

(2) The foregoing production pattern establishes the order of preference in which each manufacturer's interchangeable facilities must be used in the manufacture of tire and tube products and applies to facilities in each group or sub-group or in as many groups as are covered by the manufacturer's facilities.

(3) Where there is any degree of interchangeability in the use of the manufacturer's facilities, these facilities shall be extended to a lower group or sub-group in accordance with the production pattern when the manufacturer has established an inventory position not exceeding 15 days' supply in each higher group or sub-group for which the facilities are used. Inventories thus established shall be maintained in accordance with the production pattern.

For the purposes of this list, a 15-day inventory position means one-fourth of the manufacturer's sales during the preceding 60 day period.

For example: Assume that a 15-day position has been established in groups 1 and 2. This releases interchangeable facilities for the remaining groups in order of preference. When inventories are exhausted in groups 1 and 2, then any interchangeable facilities which are used in a lower group in the pattern must be diverted to groups 1 and 2 as soon as possible in order to re-establish an inventory not exceeding a 15-days' supply in groups 1 and 2 in accordance with the pattern.

Another example: Requirements for Item f of group 2—truck tires of 15 inch and 16 inch bead diameter through 7.50 cross section (these are also passenger type sizes) must be met to the extent of an inventory not exceeding a 15 days' supply before production facilities shall be used for regular passenger tire. in group 6.

(4) The use of interchangeable tire and tube production facilities, except in accordance with the foregoing production pattern, is prohibited unless specific authorization in writing is secured from the Office of Rubber Director, War Production Board.

(b) *Miscellaneous provisions.* (1) Because of the urgency for maximum tire and tube production and in view of the critical manpower shortage, no manufacturer shall perform the following operations:

(1) Painting of tires and tubes for the sake of appearance.

(ii) Wrapping of tires, regardless of end use.

(iii) Clipping or shearing of curing-vent overflow.

(iv) Removal of minor light spots and surface imperfections not actually harmful from a service standpoint.

(2) Deviations from normal manufacturing practices which are set forth in this subdivision (b) shall not be interpreted as permitting any relaxation of essential inspection of the finished product.

LIST 22—REGULATIONS FOR THE MANUFACTURE OF COMPOUNDS FOR TIRES AND TIRE CASINGS

(a) *Applicability.* These regulations govern the manufacture of compounds for tires and tire casings. Other lists attached to Appendix II will govern the use of these compounds in the manufacture of finished products. These compounds need be used only when required by other regulations contained in lists attached to Appendix II. The variations permitted by this List 22 are allowed in the manufacture of finished products covered by other applicable lists unless expressly prohibited by such other lists.

(b) *Natural rubber compounds.* The composition of natural rubber compounds shall be governed by the regulations set forth in the following table:

Description of compound	Percent by volume				
	Grade	Crude rubber and latex		Total RHC	
		Maximum	Minimum	Maximum	Minimum
Tread compounds	A	73.0	71.0	75.0	71.0
	B	59.5	57.5	74.6	65.0
	E	26.0	24.0	70.8	54.0

(c) *Synthetic rubber compounds.* (1) No regulations are now designated for the manufacture of synthetic rubber compounds for tires and tire casings.

(2) The identification of the various types of synthetic rubber is effected by designating each type by a letter and a color.

Letter	Color	Type of synthetic
S	Red	GR-S (Buna S).
M	Yellow	GR-M (Neoprene).
I	Light blue	GR-I (Butyl).

(d) *Synthetic tire constructions.* (1) The distribution of synthetic rubber in tires and tire casings is controlled by the following synthetic construction identification numbers, which indicate the proportion of synthetic rubber to crude rubber, and the placement of the synthetic rubber.

Synthetic construction identification numbers:	Type of synthetic
S-1, S-2, S-3, etc.	GR-S
M-1, M-2, M-3, etc.	GR-M
I-1, I-2, I-3, etc.	GR-I

(2) S-3 denotes 100% GR-S tread on a 100% GR-S carcass, except that:

(1) Crude rubber may be used throughout the tire at the manufacturer's discretion, but shall not exceed, by weight, two percent of the sum of the crude rubber, GR-S synthetic rubber and reclaimed rubber hydrocarbon contents. Individual sizes may exceed the two percent maximum, provided that the average crude rubber content of all sizes of the same type of tire does not exceed the two percent maximum.

(11) Reclaimed rubber may be used throughout the tire at the manufacturer's discretion.

(111) Latex may be used in cord treatment solution.

(3) S-4 denotes approximately 90% GR-S and 10% crude rubber, distributed through-

out the tire at the manufacturer's discretion, except that:

(1) Crude rubber may be used only to the extent permitted by the "maximum content crude rubber" designated.

(ii) Reclaimed rubber may be used throughout the tire at the manufacturer's discretion.

(iii) Latex may be used in cord treatment solution.

(4) S-5 denotes 100% GR-S tread on a natural rubber carcass, except that:

(1) Crude rubber may be used only in cements, in tread and sidewall splice gum strips and in the tire body, but only to the extent permitted by the "maximum content crude rubber" designated.

(ii) Reclaimed rubber may be used throughout the tire at the manufacturer's discretion.

(iii) Latex may be used in cord treatment solution.

(5) S-6 denotes approximately 70% GR-S and 30% crude rubber, distributed throughout the tire at the manufacturer's discretion, except that:

(1) Crude rubber may be used to the extent permitted by the "maximum content crude rubber" designated.

(ii) Reclaimed rubber may be used throughout the tire at the manufacturer's discretion.

(iii) Latex may be used in the cord treatment solution.

(6) S-7 denotes approximately 35% GR-S and 65% crude rubber, distributed throughout the tire at the manufacturer's discretion, except that:

(i) Crude rubber may be used only to the extent permitted by the "maximum content crude rubber" designated.

(ii) Reclaimed rubber may be used throughout the tire at the manufacturer's discretion.

(iii) Latex may be used in cord treatment solution.

(7) M-2 denotes 100% GR-M tread on a GR-S carcass.

(8) M-3 denotes 100% GR-M tread on a 100% GR-M carcass.

(9) M-5 denotes 100% GR-M tread on a natural rubber carcass.

(10) I-3 denotes 100% GR-I tread on a 100% GR-I carcass.

LIST 23—REGULATIONS FOR THE MANUFACTURE OF TIRE AND TUBE REPAIR MATERIALS

(a) *General provisions.* Only one grade of product may be manufactured in each item governed by this List 23, and that grade must be consistent with maintaining a quality adequate for the service for which the product is designed.

(b) *Manufacturing regulations.* The manufacture of tire- and tube repair materials shall be limited to the items shown in this sub-division (b), subject to the compound regulations designated therefor.

LIST 24—REGULATIONS FOR THE MANUFACTURE OF TIRES AND TIRE CASINGS (EXCEPT AIRPLANE AND BICYCLE TIRES)

(a) *General provisions.* (1) The crude rubber content of any tire or tire casing governed by this List 24 shall not include processing losses, crude rubber used in curing bags or latex used in the cord treatment.

(2) On those sizes of natural rubber tires for which no "maximum content crude rubber" is designated, the compound grades shown under "compound designation" shall apply (the first letter designating the friction and the second letter designating the tread compound grade) and the composition of the compounds shall conform to the regulations set forth in List 22, Appendix II.

(3) On those sizes of synthetic rubber tires for which no "maximum content crude rubber" is designated, the tire construction shall be of the synthetic type designated and the compounds thereof shall conform to the appropriate regulations set forth in List 22, Appendix II.

(4) The use of rayon in the manufacture of tires and tire casings governed by this List 24 shall conform to the regulations set forth in List 32, Appendix II.

(5) When the cord used in any tire is made of rayon or is of a gauge less than .027 inch as measured by the current ASTM standards in effect, the "maximum content crude rubber" permitted shall be reduced by 6 percent.

(6) Only one grade of tire may be manufactured in any size, ply and type, and that grade must be consistent with maintaining a quality adequate for the service for which the tire is designed.

(7) Where "Mud-Snow" type tread is designated in this List 24, tires with either directional or non-directional (ND) tread designs may be manufactured.

(8) Single marked high pressure type tires or single marked balloon type tires may be substituted for dual marked type tires.

(9) S-7 synthetic construction may be substituted for S-5 synthetic construction wherever S-5 is designated in this List 24, subject, for Government orders, to the approval of the procuring agency. The "maximum content crude rubber" designated for S-5 shall also apply to S-7.

(b) *Manufacturing regulations.* (1) Pneumatic tires of any size, ply and tread type may be manufactured provided that they conform to the regulations for S-3 synthetic construction tires in List 22, Appendix II.

(2) Solid or hollow center tires, casters and wheels of any size and type may be manufactured, provided that

(1) Crude rubber is consumed only in cements and/or tie-gum (or hard base) and does not exceed, by weight, ten percent of the sum of crude rubber, synthetic rubber and reclaimed rubber hydrocarbon contents.

(ii) General purpose synthetic rubber, reclaimed rubber and Classes 1 and 2 scrap rubber may be used in any amounts and in any proportion desired.

(3) The manufacture of tires and tire casings consuming more crude rubber than permitted by sub-divisions (b) (1) and (b) (2) of this List 24 shall be limited to the sizes, plies and tread types listed in this sub-division (b) (3), subject to the maximum crude rubber contents or compound grades designated therefor.

(c) *Branding of tires.* (1) All natural rubber tires or tire casings manufactured to fill Civilian orders shall bear, on the serial side and near the serial number, a brand with the words "War Tire" and the letters designated under "Compound Designation". Letters used to brand tires of a cross-section of 6.50 inches or more shall be at least one-fourth inch high, while those used to brand smaller tires shall be at least one-eighth inch high. This "War Tire" brand may (but need not) be applied to natural rubber tires or tire casings manufactured to fill Government orders, at the discretion of the manufacturer.

(2) All synthetic rubber tires or tire casings manufactured to fill either Civilian or Government orders shall have a colored dot, either circular or rectangular (with or without rounded corners or ends) and with an average effective dimension of at least one inch, vulcanized on both sides of the tire, the appropriate color to be determined from sub-division (c) (2) of said List 22. In addition, all synthetic rubber *pneumatic* tires or tire casings shall bear, on both sides of the tire and in characters at least five-eighths inch high, a brand showing the appropriate synthetic construction identification. The colored dot and the brand shall be permanent and may be superimposed if desired. The colored dot and synthetic construction identification may be smaller than the designated minimum on sizes of tires for which the designated minimum is unreasonably large.

(d) *Tolerances.* (1) On those sizes of natural rubber tires, in this List 24, for which no "maximum content crude rubber" is designated, but for which friction and tread compound grades are designated, a manufacturer can calculate the maximum amount of crude rubber and total RHC which may be used in the manufacture of a tire or tire casing of any such size. Within the maximum amounts thus calculated, a manufacturer may, at his discretion, shift the amounts between friction and tread.

(2) On those sizes, in this List 24, for which a "maximum content crude rubber" is designated, a manufacturer shall have, in each respective size, an operating tolerance on the content of crude rubber limited only by the maximum content designated.

(3) On those sizes, in this List 24, for which no "maximum content crude rubber" is designated but for which friction and tread compound grades are designated, the tolerance set forth in said List 22 shall apply.

(e) *Definitions.* (1) Where used in this List 24, "Standard Highway" as applied to tread type means regular skid-depth, "100" level, on-the-road type.

(2) Where used in this List 24, "Mud-Snow" as applied to tread type means extra-traction, on-and-off-the-road type.

(3) Unless otherwise permitted on appeal the manufacture of Earthmover, Rock Service, and Ribbed and Traction Road Builder and Road Grader tires shall be confined, for each manufacturer, to those designs of molds which he has regularly used for such types of tires previous to January 1, 1942, or has specially acquired since then for such purposes.

LIST 25—REGULATIONS FOR THE MANUFACTURE OF TIRE TUBES (EXCEPT AIRPLANE AND BICYCLE TIRE TUBES)

(a) *General provisions.* (1) The crude rubber content of any tube governed by this List 25 shall not include processing losses or crude rubber used in valves.

(2) Only one grade of tube may be manufactured in any size and type, and that grade must be consistent with maintaining a quality adequate for the service for which the tube is designed.

(3) The restrictions of this List 25 shall not apply to tubes for city and intercity bus mileage contract tires of cross-sections 10.00 and larger.

(4) General purpose synthetic rubber may be used in any tube for which a "maximum content crude rubber" is designated, subject, for Government orders, to the approval of the procuring agency. When general purpose synthetic rubber is used, the tube volume may exceed the designated maximum provided that the crude rubber content does not exceed seventy-five percent of the designated maximum.

(b) *Manufacturing regulations.* (1) Tubes of any size and type may be manufactured, *Provided, That:*

(i) Crude rubber and latex may be consumed only in valves, valve adhesion pads, splicing gum strips and cements, and identification inks and cements.

(ii) General purpose synthetic rubber and reclaimed rubber may be used in any amounts and in any proportion desired.

(2) The manufacture of tubes for Civilian orders consuming more crude rubber than permitted by sub-division (b) (1) of this List 25 shall be limited to the sizes and types listed in this sub-division (b) (2), subject to the maximum tube volumes and crude rubber contents designated therefor.

(a) *General provisions.* (1) The crude rubber content of any tire or tire casing governed by this List 29 shall not include processing losses, crude rubber used in curing bags or latex used in the cord treatment.

(2) On those sizes of natural rubber tires for which no "maximum content crude rubber" is designated, the compound grades shown under "compound designation" shall apply (the first letter designating the friction and the second letter designating the tread compound grade) and the composition of the compounds shall conform to the regulations set forth in List 22, Appendix II.

(3) On those sizes of synthetic rubber tires for which no "maximum content crude rubber" is designated, the tire construction shall be of the synthetic type designated and the compounds thereof shall conform to the appropriate regulations set forth in List 22, Appendix II.

(4) S-7 synthetic construction may be substituted for S-5 synthetic construction wherever S-5 is designated in this List 29, subject for Government orders, to the approval of the procuring agency. The "maximum content crude rubber" designated for S-5 shall also apply to S-7.

(5) The regulations contained in Army-Navy Aeronautical Specification AN-C-55b (Casings: Aircraft Landing, Auxiliary and Beaching Tire), as amended, shall govern the following:

(1) The type of tread design used on tires listed in this List 29.

(11) The use of rayon in tires listed in this List 29 (see also List 32 attached to this Appendix II).

(b) *Manufacturing regulations.* The manufacture of airplane tires and tire casings shall be limited to the sizes, plies and tread types listed in this sub-division (b), subject to the maximum crude rubber contents or compound grades designated therefor.

PART 1226—GENERAL INDUSTRIAL EQUIPMENT

[General Limitation Order L-292, Interpretation 1]

FOOD PROCESSING MACHINERY

The following interpretation has been issued with respect to General Limitation Order L-292:

Paragraph (a) (6), in defining "approved orders" for food processing machinery, includes orders bearing a preference rating of AA-5 or higher assigned on certain specified forms (WPB-617, 576, 748, etc.). These forms in some cases call for the name and address of the supplier.

In these cases, the information intended is the name and address of the probable supplier. Provided the model actually obtained is substantially identical in value, quality, size, operation and function with that named in the application form, the preference rating may be used to get the product from any manufacturer, dealer or processor who has the product on hand or is authorized to manufacture or acquire it. For example, a rating assigned to purchase a 1" centrifugal sanitary pump may ordinarily be used to purchase that size pump from any manufacturer if the value is substantially the same as that of the pump described in the application. On the other hand, a rating assigned for a 6-can-per-minute dairy can washer costing \$1000 may not be used to get a 6-can-per-minute can washer costing \$2500. Similarly, a rating for a copper lined cheese vat may not be used to get a stainless steel cheese vat.

Approval of the form does not operate to authorize the supplier, whether or not named, to manufacture or acquire the product if that is otherwise prohibited.

Issued this 4th day of December 1943.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

[Limitation Order L-38, as Amended Dec. 6, 1943]

INDUSTRIAL AND COMMERCIAL REFRIGERATING AND AIR CONDITIONING MACHINERY AND EQUIPMENT

Section 1226.6¹ *Limitation Order L-38* is hereby amended to read as follows:

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of steel, copper, and other materials for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 1226.6 *Limitation Order L-38*—(a) *Purpose and scope.* This order tells how to get new refrigerating or air conditioning "systems" and "parts". With certain exceptions, these may be delivered only for essential uses as explained in Lists B and C, and pursuant to an "approved order" rated AA-5 or higher. In some cases a purchaser is allowed to apply his MRO or other ratings without any special authorization, but in other cases he must apply to the War Production Board for approval. The order also states how much a producer may manufacture during any calendar quarter. It will be noted that certain types of equipment, such as domestic refrigerators, are not included in this order, since they are covered by other orders of the War Production Board.

Definitions

(b) *Definitions.* For the purpose of this order:

(1) "System" means any refrigerating or air conditioning system, consisting of an assembly or combination of machinery, equipment, or other apparatus designed primarily to lower temperature or remove water vapor, directly or indirectly, by mechanical, chemical or physical means. The term does not include a domestic mechanical refrigerator, a domestic ice refrigerator, or heat exchanger equipment, as defined, respectively, in paragraphs (b) (5), (b) (6) and (b) (9) of this order; or coils or low sides which are incorporated into "food processing machinery" (as defined in Order L-292).

(2) "Parts" includes any assemblies of parts, equipment, insulated enclosures and cold storage doors (except insulation materials used therein), accessories, implements or devices designed or intended for incorporation or use in a system or for installation therewith in causing it to perform its functions, except the following materials:

Liquid or gaseous refrigerants
Oil or other lubricants
Cleaning fluids or other solvents
Anti-freeze fluids
Drying agents
Paints, enamels, varnishes, thinners and seam fillers

¹ Formerly Part 1071, § 1071.1.

Wax polishes and rust preventives
Soldering and brazing fluxes and welding rods

Non-metallic filters
Belts and belting
Gaskets
Packing
Insulation materials
Small hardware, such as nuts, bolts, washers, screws and cotter pins

(3) "Producer" means any person to the extent that he is engaged in the manufacture, fabrication, or assembly of new systems or parts, or industrial type extended surface heating equipment, or industrial type humidifying equipment. The term does not include any sales or distribution outlet of a producer.

(4) "Deliver" means: (i) to transfer physical possession, title, or ownership; or (ii) to install for use (but not including a temporary installation solely for the purpose of testing the system or part, or the moving of an installed system from one point on the owner's property to another); or (iii) to place in the hands of any carrier or otherwise in transit for transfer of possession to another person; (regardless of whether such transfer, installation, or shipment is for the purpose of sale, trade, loan, lease, consignment, or other type of transaction).

(5) "Domestic mechanical refrigerator" means any refrigerator for household use which operates either by compression or absorption and which has a net capacity of 16 cubic feet or less (National Electric Manufacturing Association rating), but does not include any low temperature mechanical refrigerator designed for the storage of frozen foods or for the quick freezing of food where the low temperature compartment customarily operates at a temperature of not higher than 15 degrees above zero Fahrenheit and contains 75% or more of the total refrigerating space in the refrigerator.

(6) "Domestic ice refrigerator" means any non-mechanical ice chest or ice box for home use.

(7) "Industrial type extended surface heating equipment" means any apparatus employing a heat transfer element and designed primarily to increase the temperature of gaseous matter, in connection with the operation of any refrigerating or air conditioning system.

(8) "Industrial type humidifying equipment" means any apparatus designed primarily to add water vapor to gaseous matter, in connection with the operation of any industrial or commercial refrigerating or air conditioning system, or for any purpose other than the health or comfort of persons.

(9) "Heat exchanger equipment" means an assembly, bundle or nest of bare or finned tubes installed in a shell or pressure vessel, and designed for the transfer or exchange of heat between two or more fluids (liquids, gases, or vapors), without the use, as a refrigerant, of (i) ammonia, carbon dioxide, methyl chloride, sulphur dioxide, or chlorinated hydro-carbon refrigerants (trichloromonofluoromethanes, dichlorodifluoromethane, dichloromonofluoromethane, trichlorotrifluoroethane, and

dichlorotetrafluoroethane), or (ii) brine or water which has been cooled by the use of ice or any of such refrigerants.

(10) "For direct use by the Army, Navy, Maritime Commission or War Shipping Administration" means for direct use by the regular personnel or regular employees of such an agency only (or "for military exchanges or service departments" under Priorities Regulation 17), but regardless of whether delivery is made by the producer or dealer directly to such an agency, or through or to an intermediate dealer or contractor. The term does not mean for use in any privately operated plant or shipyard financed by, or controlled by, any of such agencies, or operated on a cost-plus-fixed-fee basis.

Deliveries: Approved Orders

(c) *Restrictions on deliveries*—(1) *No deliveries except on approved orders.* No person shall deliver, and no person shall accept delivery of, any new system or new parts except pursuant to an approved order, as defined in paragraph (d). Exceptions to this general rule are stated in paragraph (e). Additional restrictions on delivery are stated below in subparagraphs (c) (2), (3), (4) and (5).

(2) *List B items.* No person shall knowingly deliver, and no person shall accept delivery of, any new item on List B, (i) unless the item is for direct use by the ultimate consumer and for the specified use, if any, as shown on that list, or (ii) unless delivery is otherwise permitted pursuant to an approved order of a kind specified in subparagraphs (d) (1) or (d) (4).

(3) *Items for a use permitted by List C.* No person shall knowingly deliver, and no person shall accept delivery of, any new system or parts not shown on Lists A or B, unless the system or parts are to be used by the ultimate consumer for an essential purpose specified on List C. This subparagraph (c) (3) does not affect the delivery of parts for the maintenance or repair of any existing system.

(4) *Parts for items performing List A functions.* No person shall knowingly deliver, and no person shall accept delivery of, any new parts for assembly into any item to perform the same functions as an item on List A. For example, a new condensing unit, low-side, refrigerant connections, or valves, etc., may not be acquired (together or separately) for assembly into or with an insulated enclosure to perform the functions of a "farm freezer" or "frozen food cabinet."

(5) *Heating or humidifying equipment.* No person shall deliver, and no person shall accept delivery of, any new industrial type extended surface heating equipment or industrial type humidifying equipment, except pursuant to an approved order.

(d) *Approved orders.* The following types of purchase orders for delivery of any new system or parts, or industrial type extended surface heating equipment or industrial type humidifying equipment, when rated AA-5 or higher, are "approved orders":

(1) Orders for direct use by the Army, Navy, Maritime Commission, or War Shipping Administration.

(2) Orders by a person and for a direct use, if any, as shown on List B. These orders, when not otherwise rated, are hereby assigned a preference rating of AA-5 within the limited uses specified in List B. The rating may be applied and extended in accordance with Priorities Regulation No. 3.

(3) Orders placed in accordance with any CMP Regulation (including CMP Regulation 1), any preference rating order of the War Production Board (including P-126), or Priorities Regulation 9.

(4) Other orders specifically rated and authorized as follows by the War Production Board on application of the proposed purchaser. The appropriate application form is indicated below:

Resale: Forms WPB-541 (PD-1A) or WPB-547 (PD-1X). These forms may be used by dealers or others who are not producers and who are purchasing for inventory or resale. The correct form depends on the nature of the purchase and of the buyer's business.

Export: Form WPB-541 (PD-1A). This form may be used where the applicant desires to export or acquire for export. Delivery of items by the exporter is subject to the restrictions of List C (see paragraph (c) (3)).

Large installation by ultimate consumer: Form WPB-617. This form is to be used if installation of a system is involved and the cost of the construction (exclusive of the cost of the prime mover, compressor (condensing unit), condenser, receiver, evaporator surface (low-side), controls, indirect cooling units, and cooling tower) is more than \$5,000. The applicant should apply for the whole project, including the system, on this form.

All other applications by ultimate consumer: Forms WPB-2448 or 2449. These forms are to be used in all cases other than those above specified. Form WPB-2449 is to be used when the system or parts are required for use in any cold storage warehouse, industrial or commercial ice plant, frozen food locker plant, food processing plant (except a dairy or ice cream plant requiring equipment having a capacity of 5 H. P. or 5 tons (A. S. R. E. specifications) or less), industrial processing of products other than food, refrigerated railroad car, truck or ship, or any air conditioning installation of any size. For all other uses, Form WPB-2448 is the correct form. If authorization is granted on either of these applications, it will be accompanied by any necessary permission to "begin construction" under Conservation Order L-41, and no separate application for that purpose need be made under that order.

Exemptions

(e) *Exemptions*—(1) *List A items.* An approved order under paragraph (c) (1) is not necessary for the delivery of any complete item on List A which is fabricated and in stock, or which may be produced in accordance with paragraph (g).

(2) *Loans not exceeding thirty days.* An approved order is not necessary for the lease or loan of a new system or parts for a period not to exceed thirty days pending the performance of maintenance and repair service to a used system or parts, nor for the redelivery of the leased or loaned system to the lessor.

(3) *Bankruptcy, etc.* An approved order is not necessary for the transfer (to a trustee or receiver for the benefit of creditors) of title to, and/or delivery of, any new system or parts, through voluntary act or by operation of law in bankruptcy, receivership or assignment.

(4) *"Upstream" deliveries.* An approved order is not necessary for the return of unused systems or parts to the person from whom they were purchased.

Utilization of Replaced Parts

(f) *Required utilization of replaced parts.* (1) When any part is delivered for maintenance or repair to any person acquiring the same for use, he must dispose of the replaced used part, if it is made of metal, through regular scrap channels, within thirty (30) days after installation of the new part, unless he returns the same to his supplier (for such reconditioning or disposition as the latter may make). All replaced parts thus obtained by a dealer or producer during any calendar quarter must be either repaired and placed in his inventory, or returned to his supplier of new parts, or disposed of through regular scrap channels, during or within thirty (30) days after the end of that quarter. No black tin pipe shall be replaced unless an equal quantity thereof is returned to the supplier.

(2) The provisions of the preceding subparagraph (f) (1) shall not apply:

(i) Where parts are delivered for installation in any system located outside of the continental United States at the time of such delivery; or

(ii) Where the system requiring repair is being used directly by the Army, Navy, Maritime Commission, or War Shipping Administration; or

(iii) Where the system requiring repair is owned by any Federal, State, or local governmental agency, bureau, department, or political subdivision which is prohibited by law from disposing of such replaced parts in the manner explained in the preceding subparagraph (f) (1).

Restrictions on Production

(g) *List A items.* No producer shall manufacture or assemble any item on List A, unless (1) 75% (by weight) of the total material to be incorporated in the item was fabricated and in the producer's inventory prior to April 6, 1943, and (2) the material cannot be used in the assembly of any system or parts not shown on List A. The manufacture and assembly of these List A items is subject also to all applicable provisions of Order L-126 and all other applicable orders of the War Production Board.

(h) *Other items.* During the calendar quarter starting January 1, 1944, and during each later calendar quarter, no producer shall manufacture or assemble more of any "class" of new systems and parts (other than parts for maintenance and repair) as shown on List D, than his quota for that class. This quota for any class is in terms of aggregate dollar volume (producer's sales price at the factory, exclusive of installation charges), and is the greater of the following two quantities:

(1) His dollar volume of all unfilled orders on hand rated AA-5 or higher for that class of new systems and parts, or

(2) One-sixteenth of the aggregate dollar volume of that class of new systems and parts (other than items on List A) manufactured by him during the calendar year 1940, in addition to his current production required to fill all orders for direct use by the Army, Navy, Maritime Commission or War Shipping Administration.

Producers may manufacture and assemble parts for maintenance and repair without reference to these restrictions, and should not include them in the above quotas.

Miscellaneous Provisions

(i) *Miscellaneous provisions—(1) Applicability of regulations.* This order and all transactions affected by it are subject to all applicable regulations of the War Production Board, as amended from time to time, unless this order states otherwise.

(2) *Violations.* Any person who willfully violates any provision of this order, or who, in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, materials under priority control, and may be deprived of priorities assistance.

(3) *Appeals.* Any appeal from the provisions of this order (or of Conservation Orders M-9-c or M-126 applicable to any systems, parts, or other equipment subject to the terms of this order) shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal. This letter must be filed with the field office of the War Production Board for the district in which is located the plant or branch of the appellant to which the appeal relates.

(4) *Communications.* All reports to be filed and other communications concerning this order (except appeals), unless otherwise directed, should be addressed to: War Production Board, General Industrial Equipment Division, Washington 25, D. C., Ref: L-38.

Issued this 6th day of December 1943.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,

Equitable Distribution

(j) *Equitable distribution.* It is the policy of the War Production Board that items covered by this order not required to fill rated orders shall be distributed equitably. In making such distribution, due regard should be given to essential civilian needs, and there should be no discrimination in the acceptance or filling of orders as between persons who meet the seller's regularly established prices and terms of sale or payment. Under this policy every seller of the items, so far as practicable, should make available an equitable proportion of his merchandise to his customers periodically, without prejudice because of their size, location, or relationship as affiliated outlets. It is not the intention to interfere with established channels and methods of distribution unless necessary to meet war or essential civilian needs. If voluntary observance of the policy outlined is inadequate to achieve equitable distribution, the War Production Board may issue specific directions to named concerns. A failure to comply with a specific direction shall be deemed a violation.

Amended Dec. 6, 1943]

CORDAGE FIBER, CORDAGE YARN AND CORDAGE

§ 3290.221 *General Preference Order M-84—(a) Definitions.* For the purposes of this order:

(1) "Cordage fiber" means any spinable vegetable fiber which is, or which may be, commercially utilized for the manufacture of rope or twine including binder and baler twine, but does not include cotton or processor's mill waste.

(2) "Manila" means fiber which is commonly known in the trade by this term and also known as abaca or Manila hemp, wherever grown (either striped or decorticated), but does not mean the fiber grades of T2 and T3, O or Y, or equivalent, as established by the Insular Government of the Philippine Islands, or processor's mill waste.

(3) "Agave" means agave fiber of the species of agave sisalana, agave fourcroydes, and agave cantala, of all grades and qualities including tow, waste and fiber under 20" in length, commonly known in the trade as sisal, henequen, cantala, and maguey, and sometimes preceded by an adjective designating the country or district of origin, but does not include processor's mill waste.

(4) "Jute" means jute fiber, including butts (often called cuttings), also meshta, urena lobata (commonly called congo jute), and punga.

(5) "Istle" means istle fiber, including but not limited to the types or grades commonly known as juamave, tula, palma, pita, and yucca.

(6) "Hemp" means true hemp fiber, line or tow, of the species cannabisa sativa, whether grown in the United States or elsewhere.

(7) "Coir" means the fiber obtained from the fibrous shell of the coconut.

(8) "Coir yarn" means yarn spun from coir fiber.

(9) "Rope" means any rope or cable, treated or untreated, composed of three or more strands, manufactured from cotton or any cordage fiber, each strand composed of two or more yarns, but does not include strings and twines of whatever construction which are commonly used for tying, sewing, baling or other commercial packaging use.

(10) "Twine" means any single or plied yarn or roving including marlin and tarred seizings manufactured from any cordage fiber, or from any other fiber, for use as a tying material, for sewing, or for any similar purpose, but shall not include any product falling within the definition of "rope" or "binder twine" or "baler twine".

(11) "Cordage yarn" means yarns or rovings spun from any of the fibers referred to in definitions (1)-(8), including cotton, and from other vegetable fibers not referred to in this order when spun into rope or twine.

(12) "Binder twine" means a single yarn twine usually made of agave fiber, but also of manila, istle, jute, hemp, coir, cotton, or paper, and used in connection with the growing, harvesting or delivering of agricultural products.

(13) "Baler twine" means a single yarn usually made of agave fiber and used in a self-tying machine for baling hay, straw or other fodder crops.

(14) "Basic monthly poundage" of manila fiber with respect to any processor shall be the average number of pounds per month of manila cordage sold by such processor during the period January 1 through December 31, 1939. Where

this order specifies a percentage of the basic monthly poundage to be processed, sold or delivered during any period, any processor keeping his books on a weekly basis shall apply the said percentage to the weekly periods most nearly approximating the period specified.

(15) "Basic monthly poundage" of agave fiber with respect to any processor for any month shall be the average number of pounds per month of both manila and agave cordage sold by such processor during the period from January 1, 1939 to December 31, 1941, minus 37% of such person's manila fiber basic monthly poundage calculated as prescribed in paragraph (a) (14): *Provided*, That any processor keeping his books on a weekly basis may calculate his basic monthly poundage from the fifty-two week period of the 1939 calendar year and adjust any other calculations or quota under this order.

(16) "Processor" means any person (other than a U. S. Government agency) who spins, weaves, or twists, or otherwise uses any cordage fiber or cordage yarn in the production of rope, twine, or any other product.

(b) *Allocation of cordage fiber and yarn.* No processor shall make or accept delivery of any cordage fiber or cordage yarn contrary to directions which from time to time the War Production Board may issue. The War Production Board may from time to time allocate to processors the available supplies of cordage fibers and cordage yarns, and specifically direct the time, manner, and quantities, in which deliveries to processors shall be made or withheld.

(c) *Specific restrictions on processing.* The War Production Board may issue specific directions to processors who have received cordage fiber or yarn by allocation under this order or any other War Production Board order or by delivery from any United States Government agency, as to the purpose for which the fiber or yarn may be processed and as to the extension of more critical fibers by mixture with less critical ones in the manufacture of any product.

(d) *Provisions relating to processing of fiber into rope.* (1) No processor may put into process any cordage fiber, yarn or roving to manufacture rope except:

(i) For an end use allowed for rope manufactured from that fiber or yarn in the rope end use schedule, Schedule A, attached to this order, or

(ii) To fill orders placed by or for the account of any United States Government agency having in effect a plan approved by the War Production Board, to screen its orders and requisitions for rope and to eliminate unnecessary end

uses of rope manufactured from critical fibers. Only the Army, Navy, and Maritime Commission now have such approved plans in effect. Any agency having an approved plan may, however, instruct its suppliers to deliver rope in accordance with the end use restrictions of this order or any part of them, and to the extent they are thus adopted by such agency the restrictions will apply to its orders.

(2) No processor may in any calendar quarter put into process for the manufacture of rope more manila and agave fiber than the following percentages of his basic monthly poundages:

- (i) Manila—111%
- (ii) Agave—530%

Use of "extenders", including agave fourcroydes, and spinnable tow, shall not be charged against the permitted quantity of agave. Specific directions may be issued to exceed the above percentages, of either fiber, to permit increased deliveries to particular claimant agencies. If a processor is permitted to exceed his quota of either fiber, he may be required to accept a corresponding decrease in his quota of the other fiber.

(3) Preference Rating AA-3 is assigned to processors to get istle and jute yarns for processing into rope.

(e) *Provisions relating to the processing of fiber into other products.* (1) No processor may put into process any manila or agave fiber for the manufacture of products other than rope, except to produce twine as specified in Schedule B, and other products to the extent and for the purposes specifically authorized or directed by the War Production Board. However, use of agave, other than cantala, or sisalana from Java, Africa, Haiti, or Madagascar, will be authorized from time to time for binder or baler twine.

(2) Manufacturers of wire rope are assigned a rating of AA-1 to get yarn or roving for component parts of wire rope. Material delivered pursuant to this preference rating shall be charged against the processor's non-military quota referred to in paragraph (g).

(f) *Restrictions on delivery of rope and twine.* (1) No processor or dealer may sell, deliver, or accept delivery of rope, or twine produced in whole or in part from agave fiber, except for the purposes for which the product may, under this order, be manufactured. However, there is no restriction on the delivery of rope of foreign origin in Puerto Rico and other West Indian possessions. There is no restriction on sale of rope by retailers from coils already cut on October 27, 1943.

(2) No person may sell or deliver binder or baler twine if he knows or has reason to believe that it is not to be used

for the purposes listed in paragraphs (a) (12) and (a) (13) respectively.

(g) *Allocation of cordage.* (1) The cordage industry will be required to set aside during each quarter the following percentages of the total production of rope:

Manila rope.....	12%
Agave rope (sisal).....	23%
Jute rope.....	60%

Rope so set aside may be delivered only to fill non-military orders, which for purposes of this paragraph means orders other than orders placed by, or for the account of, the Army, Navy, Maritime Commission, War Shipping Administration, and for other marine uses. However, delivery of rope for harbor and river tugs, ferries, barges, stevedoring, and fishing, and wire rope centers, is classed as non-military, except as orders for these purposes are placed by the above government agencies. These percentages may be varied if additional processing quotas are assigned to permit increased deliveries to particular claimant agencies.

(2) To obtain from the industry the percentages stated above, the War Production Board will assign by letter, to each processor, quotas to be set aside based on the ratio his production of rope for non-military purposes during 1941 bears to the total production of rope for those purposes that year. Therefore, the assigned quota of non-military rope of any processor may be a greater or smaller percentage of all his production than the figure in paragraph (1).

(3) Rated orders (other than AAA) must not be filled if filling them would interfere with delivery of the non-military quota. Processors must advise dealers and distributors who purchase rope from them whether or not it was set aside for the non-military quota. No dealer or distributor who has been advised that rope delivered to him is for the non-military quota may deliver the rope except to fill non-military orders.

(4) Further directions will be given specifying percentages of the non-military quota to be set aside for particular claimants or particular end uses.

(5) The War Production Board may issue directions to processors and dealers for the establishment of emergency stocks of rope for maritime use.

(h) *End use information.* No person may sell or deliver any product controlled by this order to any person who he knows or has reason to believe will use the product in a manner which this order does not permit. He should satisfy himself as to this in some reasonable manner before delivering. He may, but need not, require a statement in writing showing the specific purpose or use for which the item is ordered.

(i) *Restrictions on the use of damaged material.* Any processor or dealer who has in his possession damaged or defective cordage fiber, cordage yarn or cordage may report by letter the extent of the damage and state to the War Production Board the percentage not suitable for the manufacture of products permitted by this order. He may then upon receipt of acknowledgment, without objection from the War Production Board, use or dispose of any portion unsuitable for the manufacture of products permitted by this order, free from its restrictions. This reporting requirement has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(j) *Saving clause.* Specific instructions under M-36, M-63, M-84, or any other order as to processing, use or disposition of cordage fibers, cordage yarn, rope and twine, shall continue in effect under this order until they expire by their terms or are revoked or superseded.

(k) *Invalidity of oral instructions.* Instructions, allocations and directions, under this order, will be by telegram or letter unless otherwise specified, and in the name of the War Production Board. No one is bound by any oral instructions.

(l) *Reports.* Every processor of manila and agave fiber shall report monthly supplying the information required on Form WPB 2901 (formerly PD-128). Processors of all other cordage fibers will report their sales monthly on Form WPB 2901 (formerly PD-128). Processors of all cordage fibers other than manila and agave shall report quarterly, supplying other information required on Form WPB 914 (formerly PD-469). These reporting requirements have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(m) *Imports.* The importation of cordage fibers, cordage yarns, and cordage shall be made in conformity with the provisions of General Imports Order M-63, as amended from time to time.

(n) *Appeals.* Any appeal from the provisions of this order should be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the ground of the appeal.

(o) *Applicability of regulations.* Except as specifically otherwise provided this order and all transactions affected thereby are subject to all applicable provisions of the regulations of the War Production Board as amended from time to time.

(p) *Violations.* Any person who willfully violates any provision of this order, or who in connection with this order willfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority control and may be deprived of priorities assistance by the War Production Board.

(q) *Communications.* All reports required to be filed hereunder, and all communications concerning this order, shall, unless otherwise directed, be addressed to the Textile, Clothing and Leather Division, War Production Board, Washington 25, D. C., Ref.: M-84.

Issued this 6th day of December 1943.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

SCHEDULE A—CORDAGE END USE

This list specifies the permitted end uses for which rope may be manufactured for non-military end uses from Manila, Agave and other fibers. However, it does not restrict manufacture for and delivery to the Army, Navy, and Maritime Commission. The left hand column lists the permitted end uses. Rope for end uses not listed may not be manufactured. The second column explains more fully the character of the end uses which are permitted. The third column indicates what products may be made of Manila, the fourth, of agave, and the fifth indicates any restrictions on use of fibers other than Manila and Agave, for this product. In the case of Manila and Agave, the word "yes" in the appropriate column means that use of the fiber is permitted, otherwise, it is prohibited. Any restrictions on use of fibers other than Manila and Agave will be specifically stated in column five. If there is a blank in column five, any fiber other than manila and agave may be used.

INTERPRETATION 1

[Superseded by paragraph (f) of M-84 on October 27, 1943]

[F. R. Doc. 43-19456; Filed, December 6, 1943; 11:01 a. m.]

PART 3290—TEXTILE, CLOTHING, AND LEATHER

[Conservation Order M-328, as Amended, Dec. 6, 1943]

PROVISIONS APPLICABLE TO TEXTILE, CLOTHING, LEATHER AND RELATED PRODUCTS

The fulfillment of requirements for the defense of the United States has created shortages in the supplies of textiles, clothing, leather and related products for defense, for private account and for export; and the following order is

deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3290.118 *Conservation Order M-328—(a) Restrictions on preference ratings for textiles, clothing, leather, etc.* (This paragraph states conditions which must be met to make ratings for items on Schedule A valid. However, even though a rating is not valid for the items, this does not prevent anyone from filling a purchase order if he can do so without disregarding valid ratings on other purchase orders or disregarding other orders or directions of the War Production Board.)

No person shall apply, extend or give any effect to any preference rating heretofore or hereafter assigned, applied, or extended to the delivery of any item on Schedule A unless:

(1) The rating has been assigned by a preference rating form or letter issued by or under the authority of the War Production Board to a named applicant and the form or letter specifically describes the item and specifies the quantity, description and type which may be obtained by the rating. No rating assigned by any L, M, P or other order or by any regulation (such as CMP-5 or CMP-5A) shall be valid for any item on Schedule A, except as permitted by paragraphs (a) (2), (a) (3) or (a) (4). For example, the rating for any fabric to comply with this subparagraph must be assigned on a War Production Board form or letter naming the person to whom the rating is assigned and stating the yardage, type and construction of the fabric for which the rating is assigned, or

(2) The rating has been assigned by or pursuant to a form, order or regulation of the War Production Board and is used to obtain the item for direct or ultimate delivery to, or for incorporation into any material for ultimate delivery to the Army or Navy of the United States (including military exchanges and service departments when the order bears the appropriate endorsement referred to in paragraph (c) of Priorities Regulation 17), the Maritime Commission or War Shipping Administration; or

(3) The rating has been assigned by or pursuant to any supplement to this order or the particular order specified after the item on Schedule A.

(4) The material to be delivered is actually required as, or is required for incorporation in, a functioning part of industrial machinery and is one of the following numbered items on Schedule A: 1, 4, 5, 6, 7, 11, 15, 17, 19.

SCHEDULE A

2. Closures, apparel and all others which are restricted by L-68.
3. Clothing, footwear (including safety shoes), hats, gloves and all other outer or under garments or apparel, if made in whole or in part of leather or textile yarn, staple fiber or fabrics. This order does not apply to the following when specifically designed and used to furnish protection against specific occupational hazards (other than weather):
 - Asbestos clothing.

18. Wool and wool yarn.
19. Wool woven, knitted, felted or braided fabric.

(b) *Notation on purchase orders bearing a preference rating.* (1) Any person applying or extending a preference rating shall satisfy the certification requirements of Priorities Regulation 3. In addition, any person applying or extending a preference rating which is permitted by paragraph (a) (1), (a) (2) or (a) (4) shall place upon the purchase order a notation substantially as follows:

This rating can be used under Order No. M-328.

However, the Army or Navy of the United States, the Maritime Commission and the War Shipping Administration shall not be required to place this notation on their direct purchase orders.

If the rating is assigned by any order listed on Schedule A, the person applying or extending the same shall place upon the purchase order a notation substantially as follows:

This rating has been assigned by Order No. _____ (insert number of order on Schedule A assigning the rating).

If, however, the purchase order contains the specific identifying certification prescribed by an order on Schedule A or by M-148, the notation prescribed by this paragraph shall not be necessary.

(2) *Restriction on extension of ratings.* Notwithstanding the provisions of Priorities Regulation 3, no rating specifically permitted to be used by paragraphs (a) (1), (a) (3) or (a) (4) to obtain any item on Schedule A shall be extended for the delivery of any other item on Schedule A for physical incorporation into the item. For example, a rating for fabric may not be extended to obtain yarn unless to fill an Army, Navy, Maritime Commission or War Shipping Administration order as permitted by subparagraph (a) (2).

(c) *Specific directives.* The War Production Board may issue specific directions to individual producers or processors of items listed in Schedule A, with respect to the production, fabrication, processing or delivery of items to meet particular military or civilian requirements, and no producer or processor shall produce, fabricate, process, deliver or accept delivery contrary to directions.

(d) *Equitable distribution.* (This paragraph does not apply to sales by retailers, inasmuch as the Fair Distribution Policy for retailers is defined in Declaration of Policy of July 15, 1943.) Preference ratings are given to certain orders to further the war program. It is the policy of the War Production Board that items listed in Schedule A not re-

quired to fill rated orders shall be distributed equitably. In making such distribution due regard should be given to essential civilian needs, and there should be no discrimination in the acceptance or filing of orders as between persons who meet the seller's regularly established prices and terms of sale or payment.

Under this policy every seller of the items, so far as practicable, should make available an equitable proportion of his merchandise to his customers periodically, without prejudice because of their size, location or relationship as affiliated outlets.

It is not the intention to interfere with established channels and methods of distribution unless necessary to meet war or essential civilian needs. If voluntary observance of the policy outlined is inadequate to achieve equitable distribution, the War Production Board may issue specific directions to named concerns. A failure to comply with a specific direction shall be deemed a violation.

(e) *Rejects, over-runs and seconds—*

(1) *Definitions.* "Rejects" means anything made to fill a rated order which (i) is so defective that it will be refused if tendered, (ii) the purchaser has refused, or (iii) the purchaser has notified the seller will be refused because of defects, failure to deliver on time, or termination of the procurement of the United States Government or any of its agencies for which the product was ordered. The term also is used to include seconds, over-runs or by products. A "Second" is anything made to fill a rated order but not actually offered or tendered to the purchaser because of defects, or for any other reason. An "Over-run" is anything made to fill a rated order but not delivered because in excess of the quantity actually needed to fill the order. A "By-product" is anything produced entirely or partly from a reject.

(2) *No one may purposely make a reject.* No manufacturer, processor or converter shall manufacture, process or order any product on Schedule A which he knows or should know will be a reject. This paragraph does not prohibit the production of seconds, over-runs or by-products to the extent that they are unavoidable in the manufacturer's operations.

(3) *Restrictions on the disposition of rejects.* No manufacturer, processor or converter shall sell or deliver a reject listed on Schedules B or C, and no one may accept delivery of such reject except as permitted by this subparagraph (e) (3) or by the schedule on which it is listed.

Rejected hides, skins and leather and products made primarily therefrom may be disposed of only as authorized under General Conservation Order M-310.

Any item listed on Schedule A, but not listed on Schedules B or C, or covered as to disposition of rejects by M-310 or by any direction issued pursuant to this order, may be disposed of for use in the United States or to fill a rated order

without regard to the limitations of § 944.11 of Priorities Regulation 1.

(4) *How to get needed permission to dispose of a reject.* Any manufacturer who under the terms of this order needs specific permission to dispose of a reject may apply by letter to the War Production Board stating the number of the contract, the amount of material to be produced under it, the kinds of such material, a detailed statement of quantities and kinds of rejects, a copy of the rejection, and a statement of the efforts he has made to dispose of the rejects to the buyer. If the War Production Board decides he ought to be allowed to dispose of the reject, it will give him specific instructions.

(5) *Effect of specific instructions on disposition.* The War Production Board may issue specific instructions in writing to anyone respecting the use and disposition of rejects or material obtained with priorities assistance, but not used for the purpose for which the priorities assistance was given. These instructions may relate to rejects not yet manufactured on the date of their issuance. They must be obeyed even if they conflict with other provisions of this order.

(6) *Reports.* Manufacturers of textile, clothing and leather products shall report their rejects at such times and in such manner as the War Production Board may from time to time require, subject to the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

(7) *Records.* All persons affected by this order shall keep for at least two (2) years records showing the quantities and kinds of rejects produced by them and the disposition thereof.

NOTE: Former Schedules C and E deleted; new Schedule C (formerly D) added Dec. 6, 1943.

(2) *Violations and false statements*. Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

PART 1417—ANTIMONY

[MPR 497]

ANTIMONY METAL AND ANTIMONY COMPOUNDS

In the judgment of the Price Administrator it is necessary and proper to replace the General Maximum Price Regulation with a separate regulation establishing maximum prices for antimony metal and antimony compounds.

A statement of the considerations involved in the issuance of this Maximum Price Regulation No. 497 has been issued simultaneously herewith and filed with the Division of the Federal Register.*

In the judgment of the Price Administrator, the maximum prices established by this regulation are and will be generally fair and equitable and will effectuate the purposes of the Emergency Price Control Act of 1942, as amended, and of Executive Orders Nos. 9250 and 9328. So far as practicable, the Price Administrator has advised and consulted with representative members of the industries which will be affected by this regulation.

SECTION 1. *Applicability of this Maximum Price Regulation No. 497.* (a) The provisions of this Maximum Price Regulation No. 497 supersede the provisions of

the General Maximum Price Regulation¹ with respect to sales and deliveries for which maximum prices are established by this regulation.

(b) This regulation does not apply to sales and deliveries of antimony ores and antimony ore concentrates.

(c) Nothing in this Maximum Price Regulation No. 497, or in the General Maximum Price Regulation shall apply to sales of laboratory reagent grades of any of the commodities subject to this regulation;

(1) To a person who will use such commodity for analytical and educational purposes, for the purpose of scientific and medical research, or for quality control of industrial products, or

(2) To a person who purchases for resale to a person mentioned in subparagraph (1).

(c) The provisions of this regulation shall apply only to the forty-eight states of the United States and to the District of Columbia.

SEC. 2. *Meaning of terms used.* (a) When used in this Maximum Price Regulation No. 497 the term:

(1) "Antimony salt" means any metallic derivative of an acid whether the antimony occupies a positive or negative position in the structure.

(2) "Dealer" includes "jobbers" and "distributors" and means any person who purchases antimony metal for resale.

(3) "Person" includes an individual, corporation, partnership, association, or any other organized group of persons, or legal successor or representative of any of the foregoing, and includes the United States or any agency thereof, or any other government, or any of its political subdivisions, or any agency of the foregoing.

(4) "Producer" means any person who recovers antimony in the form of metal from material containing antimony.

(5) "Producer's agent" means any person who sells antimony metal for a producer on a commission basis without taking title to the antimony metal.

(b) Unless the context otherwise requires, the definitions set forth in section 302 of the Emergency Price Control Act of 1942, as amended, shall apply to other terms used herein.

SEC. 3. *Maximum prices for antimony metal—(a) Base prices.*

Grade	Base price per pound
(1) 99.8% antimony metal and above. Maximum arsenic impurity to be no more than 0.05%; no other single impurity to be in excess of 0.1%-----	15¢
(2) 99.0% antimony metal up to, but not including 99.8%; 99.8% antimony metal and above, not meeting the specifications of (1) above-----	14½¢

Antimony metal which fails to meet the standards set forth above shall be sold at a price not in excess of 13¼¢ per pound of antimony content.

(b) *Maximum prices—(1) Carload lots—(i) Delivered buyer's receiving point.* The maximum price per pound for antimony metal in carload lots delivered buyer's receiving point shall be the

base price set forth above plus carload freight from Laredo, Texas, to the buyer's receiving point.

(ii) *F. o. b. point of shipment.* Antimony metal in carload lots may be sold on an f. o. b. point of shipment basis, in which case the f. o. b. point of shipment price plus the actual freight to be paid by the buyer shall not exceed the maximum carload delivered price per pound established in subparagraph (1) (i), above.

(2) *Less-than-carload lots—(i) Delivered buyer's receiving point.* The maximum price per pound for antimony metal in less-than-carload lots delivered buyer's receiving point shall be the maximum carload delivered price at the seller's distributing point nearest the buyer's receiving point plus the less-than-carload freight from such distributing point to the buyer's receiving point. For the purpose of calculating a maximum less-than-carload delivered price under this subparagraph (2) (i), when the seller's distributing point nearest the buyer's receiving point is Bradley, Idaho, Kellogg, Idaho, Shont, Idaho or Silver King, Idaho, the seller shall use as the carload delivered price at such distributing point 15.50¢ per pound for the highest grade metal, 15.00¢ per pound for the next lower grade of metal and .50¢ per pound above the base price for other antimony metal. A seller's distributing point nearest the buyer's receiving point may be the seller's plant or warehouse.

(ii) *F. o. b. point of shipment.* Antimony metal in less-than-carload lots may be sold on an f. o. b. point of shipment basis, in which case the f. o. b. point of shipment price plus the actual freight to be paid by the buyer shall not exceed the maximum less-than-carload delivered price per pound established in subparagraph (2) (i) above.

(c) *Quantity differentials.* On sales of antimony metal in less-than-carload lots, the quantity differentials set forth in the following table may be added to the maximum prices established by this regulation:

Amount	Sales by producers or producers' agents	Sales by dealers, distributors, jobbers
	Cents	Cents
10,000 pounds and less than a carload.....	1/4	1/4
224 pounds and less than 10,000 pounds.....	1/2	1
Less than 224 pounds.....	2	3

(d) *Maximum packaging charges.* A maximum additional charge of 1/4¢ per pound may be added to the maximum prices established in this section in the case of any sale or delivery of antimony metal packed in cases or boxes. In such cases, for the purpose of computing transportation charges that enter into the calculation of maximum prices under this section, the combined weight of the antimony metal and of the packages shall be considered the weight of the antimony.

(e) *Treatment of the 3% transportation tax.* The tax on the transportation

of property imposed by section 620 of the Revenue Act of 1942 shall, for the purposes of figuring the applicable maximum price, be treated as though it were an increase of 3% in the amount charged by every person engaged in the business of transporting property for hire. Accordingly, whenever transportation charges enter into the calculation of a maximum price under this section, the freight charges shall be computed as though they were 3% higher than they actually are.

SEC. 4. Maximum prices for antimony compounds. (a) A seller's maximum price for any of the following commodities:

Antimony oxide
Antimony sulphide
Antimony pentasulphide
Needle antimony (liquated antimony sulphide, crude antimony sulphide)
Ground antimony sulphide
Granulated antimony sulphide
Antimony fines
Antimony trichloride
Antimony oxychloride
Antimony fluoride
Antimony lactate
Antimony pentachloride
Antimony potassium tartrate
Antimony salt (de Haens Salt), and
Antimony salts (see definition, sec. 2)

shall be (1) the highest price charged by the seller for the same commodity on a delivery made during March 1942 to a purchaser of the same class, or, if no such delivery was made during March 1942, (2) the highest offering price for delivery during March 1942 of the same commodity to a purchaser of the same class. "Purchaser of the same class" refers to the practice adopted by the seller in setting different prices for commodities on sales to different purchasers or kinds of purchasers.

(b) Whenever any seller of any of the commodities listed in this section is unable to determine his maximum price under paragraph (a) of this section, his maximum price shall be determined as follows:

(1) If his maximum price was determined prior to December 9, 1943, pursuant to the provisions of the General Maximum Price Regulation, that price shall be the seller's maximum price under this regulation.

(2) In all other cases, the seller shall calculate a price at which he proposes to sell this commodity and shall then file such price with the Office of Price Administration for approval as his maximum price. Such selling price should be a price in line with the selling prices of competitors during March, 1942 for the same commodity.

(3) When filing such a proposed price with the Office of Price Administration, the seller shall set forth all discounts, allowances, and differentials for all classes of buyers, a description of the commodity including specifications, a statement indicating why the commodity cannot be priced under subparagraphs (a) (1), (a) (2) and (b) (1) above, and a statement setting forth the method used in calculating the proposed price.

The proposed price may be filed before any sale is made and must be filed within fifteen days after the first sale is made at

the proposed price. Pending action by the Office of Price Administration on prices submitted for approval, any seller may sell and deliver or offer to sell and deliver, and any person may buy, offer to buy, or receive from the seller in the course of trade or business, such commodity at the price submitted for approval. If, however, the Office of Price Administration determines that the price submitted is not in line with the selling prices of competitors during March, 1942 for the same commodity, the price submitted will be disapproved and the selling price shall be revised downward to the maximum price which may be approved, and any payment made in excess of the price so approved may be required to be refunded to the buyer. In the absence of notice to the contrary from the Office of Price Administration within 30 days after the receipt by the Office of Price Administration of a request for approval of a selling price, the price filed shall stand approved and shall be the maximum price applicable.

SEC. 5. Exports and Imports—(a) Exports. The maximum price at which any person may export any of the commodities covered by this regulation shall be determined in accordance with the provisions of the Second Revised Maximum Export Price Regulation² issued by the Office of Price Administration.

(b) *Imports—(1) Antimony metal.* Neither this regulation nor any other regulation issued by the Office of Price Administration shall apply to the importation into the continental United States of any antimony metal. This regulation, however, applies to the domestic resale of any such antimony metal which has been imported.

(2) *Antimony compounds.* The provisions of the Maximum Import Price Regulation³ issued by the Office of Price Administration, with the exception of sections 1 and 10 of that regulation, shall apply to all imports of the commodities listed in section 4 of this regulation: *Provided, however,* That for the purposes of this regulation, any reference in the Maximum Import Price Regulation to the General Maximum Price Regulation shall be deemed a reference to Maximum Price Regulation No. 497.

SEC. 6. Special sales of industrial materials. The provisions of Revised Maximum Price Regulation No. 204⁴ for special sales of industrial materials shall apply to special sales, as defined in section 2 of that regulation, of industrial materials covered by this regulation.

SEC. 7. Prohibition against dealing at prices above maximum prices. On and after December 9, 1943, regardless of any contract, agreement or other obligation:

(a) No person shall sell or deliver any of the commodities subject to this regulation at a price higher than the maximum prices established by this Maximum Price Regulation No. 497.

(b) No person shall buy or receive in the course of trade or business, any of the commodities subject to this regula-

tion at a price higher than the maximum prices established by this Maximum Price Regulation No. 497.

(c) No person shall agree, offer, solicit, or attempt to do any of the foregoing.

SEC. 8. *Less than maximum prices.* Lower prices than those established by this regulation may be charged, demanded, paid or offered.

SEC. 9. *Adjustable pricing.* Any person may agree to sell at a price which can be increased up to the maximum price in effect at the time of delivery; but no person may, unless authorized by the Office of Price Administration, deliver or agree to deliver at prices to be adjusted upward in accordance with action taken by the Office of Price Administration after delivery. Such authorization may be given when a request for a change in the applicable maximum price is pending, but only if the authorization is necessary to promote distribution or production and if it will not interfere with the purposes of the Emergency Price Control Act of 1942, as amended. The authorization will be given by order and may be given by the Administrator or by any official of the Office of Price Administration to whom the authority to grant such authorization has been delegated.

SEC. 10. *Prohibited evasive practices.* Any practice or device which is an attempt to get the effect of a price higher than the maximum without actually charging a higher price is prohibited and is as much a violation of this regulation as an outright excessive price. This applies to devices involving commissions, services, transportation arrangements, premiums, special privileges, tying-agreements, trade understandings and the like.

SEC. 11. *Records.* Every person making purchases or sales of any commodity covered by this regulation after December 8, 1943, shall keep for inspection by the Office of Price Administration for so long as the Emergency Price Control Act of 1942, as amended, remains in effect, purchase invoices or sale slips covering each such purchase or sale, showing the date thereof, the name and address of the seller or the buyer, the price paid or received, and the quantity of each kind or grade purchased or sold.

SEC. 12. *Enforcement.* Persons violating any provision of this Maximum Price Regulation No. 497 are subject to the criminal penalties, civil enforcement actions, and suits for treble damages provided for by the Emergency Price Control Act of 1942, as amended.

SEC. 13. *Licensing.* The provisions of Licensing Order No. 1,⁷ licensing all persons who make sales under price control, are applicable to all sellers subject to this regulation. A seller's license may be suspended for violation of the license or of any one or more maximum price regulations. A person whose license is suspended may not, during the period of suspension, make any sale for which his license has been suspended.

SEC. 14. *Petitions for amendment.* Any person seeking a modification of any

provision of this Maximum Price Regulation No. 497, may file a petition for an amendment in accordance with the provisions of Revised Procedural Regulation No. 1,⁸ issued by the Office of Price Administration.

This Maximum Price Regulation No. 497 shall become effective December 9, 1943.

NOTE: All record keeping requirements of this Maximum Price Regulation No. 497 have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

ARTICLE I—APPLICABILITY, PURPOSES AND DEFINITIONS

SECTION 1. *Commodities covered and operation of this regulation.* (a) This regulation covers the fresh fruits and vegetables set forth in the Appendices to Article III, section 15, whether imported or domestic, except when sold for commercial processing.

(b) It is the purpose of this regulation to establish flexible price control for fresh fruits and vegetables (except when sold for commercial processing) in such manner that flat ceiling prices in dollars and cents may be computed and published in each community, or by zones or regions.

(c) For this purpose, this regulation provides either (1) a method for establishing dollar-and-cents ceilings for sales of fresh fruits and vegetables in carlots or trucklots at any wholesale receiving point and in less than carlots or less than trucklots in the markets served from the particular wholesale receiving point, or (2) a method for establishing dollar-and-cents ceilings for sales of fresh fruits and vegetables to retailers and institutional users. Sales by retailers are to be covered by other regulations now in effect, or to be issued.

(d) A general plan is set up by this regulation for establishing ceiling prices for fresh fruits and vegetables. Each fresh fruit and vegetable will be separately considered. Special provisions

⁵ 7 F.R. 8961; 8 F.R. 3313, 3533, 6173, 11806.

may be made for particular fresh fruits and vegetables, which do not apply generally. If any special provision is contrary to or inconsistent with any general provision, the special provision shall be controlling. The general provision shall apply to the extent that it is not contrary to or inconsistent with the special provision.

(e) The general plan is to establish maximum prices at certain points or levels in the distribution of fresh fruits and vegetables. The points of control will not necessarily be the same for all commodities. The ceiling prices may differ by season, regions, varieties, grades, or other factors. Ceiling prices or methods of computing ceiling prices for each commodity will be contained in an Appendix specifically covering that commodity. For example, the method for establishing lettuce prices will be found in Appendix A, that for cabbage in Appendix B, and so forth.

(f) Points of control, at which maximum prices are established will generally be one or more of the following:

(1) *Carlot or trucklot sales at any wholesale receiving point.* A ceiling price is established for sales in carlots, or trucklots at the wholesale receiving point. The ceiling price may be named in dollars and cents, at a particular wholesale receiving point (or by area or region) or a method may be given by which the ceiling price at a particular wholesale receiving point may be computed by adding to a given basing point price the freight from the basing point to the wholesale receiving point. The ceiling price for carlot or trucklot sales at a particular wholesale receiving point is the same regardless of the number and type of prior handlers, regardless of the seller's size or type of operation, and regardless of the purchaser's size or type of operation.

A pool car or pool truck, (that is, a car or truck containing one commodity owned by more than one seller or sold to more than one purchaser) shall be considered a carlot or trucklot.

[Above paragraph as amended by Am. 3, 8 F.R. 10673, effective 7-29-43]

A "carlot sale" or a "trucklot sale" means a sale of a quantity of fresh fruits or vegetables transported in one car or truck or other conveyance at one time out of which 75% or more by weight is sold to one person. The sale of the remaining quantity to another person or persons may be considered a less-than-carlot sale, or less-than-trucklot sale. The sale of that portion of the fresh fruits or vegetables moving in a mixed carlot or mixed trucklot with another commodity or commodities, must be on the basis of a "carlot sale" or "trucklot sale" if the entire carlot or trucklot or 75% thereof by weight is sold to one person.

It is necessary to compute a ceiling price for carlot or trucklot sales even though no such sales are made at the particular wholesale receiving point because the ceiling prices for carlot or trucklot sales are the base upon which the ceiling prices for less than carlot

or less than trucklot sales are computed (See Appendices in Article III, Section 15). For instance, there is a carlot rate for lettuce from Salinas, California to Moline, Illinois. However, Moline cannot customarily handle straight cars of lettuce, so it is customary to ship L. C. L. from Chicago, Illinois to Moline. Under the definition of freight contained in Section 8 (a) (7), freight in this case would be the customary combination of carlot and less-than-carlot rates. That is, the ceiling price for carlot or trucklot sales in Moline, Illinois is the basing point price at Salinas, plus the freight at the carlot rate to Chicago, plus the freight at the less-than-carlot rate from Chicago to Moline. As another example, there is no carlot rate from Salinas, California to Pueblo, Colorado. However, there is a carlot rate from Salinas to Denver, Colorado and a less-than-carlot rate from Denver to Pueblo. In this case too, a ceiling price for carlot or trucklot sales must be computed for Pueblo. This is the basing point price at Salinas, plus the freight at the carlot rate to Denver, plus the freight at the less-than-carlot rate from Denver to Pueblo.

(2) *Less than carlot or trucklot sales in the market.* A ceiling price is established for sales in less than carlots or trucklots in the market. The ceiling price is computed from the carlot or trucklot ceiling price at the particular wholesale receiving point from which the market is served by adding a dollar-and-cent markup. The ceiling price is the same regardless of the number and type of prior handlers, regardless of the seller's size or type of operation, and regardless of the purchaser's size or type of operation.

(3) *Sales through commission merchants.* If a commission merchant makes a carlot or a trucklot sale to any wholesale receiving point, his maximum price for that sale shall be the ceiling price applicable to carlot or trucklot sales at that wholesale receiving point. If a commission merchant makes a less-than-carlot or less-than-trucklot sale, his maximum price for that sale shall be the ceiling price applicable to carlot or trucklot sales at the wholesale receiving point from which he is selling, plus either his usual charge or the markup established for less-than-carlot or less-than-trucklot sales of the particular fruit or vegetable, whichever is lower.

[Subparagraph (3) as amended by Am. 3, 8 F.R. 10673, effective 7-29-43]

(4) *Sales to retailers and institutional users.* In some cases, ceiling prices are not established for carlot and trucklot sales at the wholesale receiving point or for less-than-carlot and less-than-trucklot sales in the market. In such cases, ceiling prices are established only for sales to retailers and institutional users.

(5) *Notification of "minimum net weight".* The first person (including a grower) who packs fresh fruits or vegetables in a crate, box, lug or other container shall place, in legible printing or

writing, the "minimum net weight" of the fruit or vegetable, on the container.

[Subparagraph (5) as amended by Am. 12, effective 12-3-43]

(g) Whenever used in this regulation, the terms "ceiling", "ceiling price", and "maximum price" all have the same meaning.

[NOTE: Revised Supplementary Order No. 34 (8 F.R. 12404) permits special packing expenses to be added to maximum prices on sales to procurement agencies of the United States.]

SEC. 2. Adjustment of maximum prices.

(a) Any regional office of the Office of Price Administration, or such other offices as may be authorized by the appropriate regional office, may by order adjust downwards the less than carlot or less than trucklot ceiling price established for any market within its jurisdiction either (1) generally or (2) with respect to particular classes of sellers in any case in which it appears that such ceiling price will permit sellers generally or particular classes of sellers to obtain excessive margins. In determining whether or not margins are abnormal or excessive, the appropriate office shall consider margins prevailing in the particular market during the period July 1, 1942 to October 31, 1942, as being normal operating margins.

(b) Any regional office of the Office of Price Administration, or such other offices as may be authorized by the appropriate regional office, may by order adjust upwards the less than carlot or less than trucklot ceiling price established for any market within its jurisdiction either (1) generally or (2) with respect to particular classes of sellers in any case in which it appears that such ceiling price will prevent sellers generally or particular classes of sellers from providing adequate distribution. The appropriate office shall then adjust the ceiling price to provide normal operating margins for sellers necessary to maintain distribution. In determining normal operating margins, the appropriate office shall consider operating margins prevailing in the particular market during the period July 1, 1942 to October 31, 1942, as being normal operating margins.

In instances where there is additional handling outside of the free delivery zone of any intermediate seller at any wholesale receiving point for which a ceiling price is established, any regional office of the Office of Price Administration, or such offices as may be authorized by the appropriate regional office, may make an adjustment to include such charges but such adjustment shall not exceed the actual cartage from the wholesale receiving point to the buyer's place of business, at lowest rates for available transportation.

(c) In addition to the adjustments mentioned in paragraphs (a) and (b) above, any regional office of the Office of Price Administration or such other offices as may be authorized by the appropriate regional office may make those certain adjustments which may be specifically provided for in any appendix, or paragraph or subparagraph of an ap-

pendix, to this regulation with respect to the particular fresh fruits or vegetables mentioned therein.

[Paragraph (c) added by Am. 3, 8 F.R. 10673, effective 7-29-43]

SEC. 3. Types of sales covered. This regulation applies to each of the types of sales specified in the Appendices of Article III, section 15.

SEC. 4. Geographical applicability. The provisions of this regulation shall be applicable to the forty-eight states of the United States and the District of Columbia.

SEC. 5. Exempt sales. This regulation shall not apply to sales and deliveries at retail.

SEC. 6. Export sales. The maximum prices, at which a person may export the fresh fruits and vegetables covered by this regulation shall be determined in accordance with the provisions of the Second Revised Maximum Export Price Regulation,¹ issued by the Office of Price Administration.

SEC. 7. Prohibition against sales above maximum prices. On and after July 20, 1943, regardless of any contract or other obligation, no person shall sell or deliver and no person, in the course of trade or business shall buy or receive fresh fruits and vegetables at prices higher than the maximum prices established by this regulation, and no person shall agree, offer, solicit, or attempt to do any of the foregoing. Lower prices than the maximum prices may be charged and paid.

[NOTE: Supplementary Order No. 7 (7 F.R. 5176) provides that war procurement agencies and governments whose defense is vital to the defense of the United States shall be relieved of liability, civil or criminal, imposed by price regulations issued by the Office of Price Administration.]

[NOTE: Supplementary Order No. 42 (8 F.R. 4968) provides that no price regulation of the OPA shall apply to sales or deliveries of any commodity or service made to Government agencies pursuant to secret contracts or sub-contracts.]

SEC. 8. Definitions. (a) When used in this regulation the term:

(1) "Person" includes individual, corporation, partnership, association, or any other organized group of persons, or legal successor or representative of any of the foregoing, and includes the United States or any agency thereof, or any other government, or any of its political subdivisions, or any agency of any of the foregoing.

(2) "Grower" means a person who produces fresh fruits or vegetables.

(3) "Ultimate consumer" is a person who purchases fresh fruits or vegetables for table use or for home processing. It does not include institutional users or procurement agencies of the United States or any State.

(4) "Retailer" means a person, other than an intermediate seller who makes sales and deliveries to ultimate consumers.

(5) "Sales at retail" means sales by retailers to ultimate consumers.

(6) "Intermediate seller" means any person who purchases fresh fruits or vegetables and who resells in less-than-carlot or less-than-trucklot quantities to any person who is not an ultimate consumer.

(7) "Freight from basing point to wholesale receiving point" or "freight from shipping point to wholesale receiving point" means the cost per package for transportation by the cheapest customary and generally available means. Freight shall not include the cost of refrigeration or other protective services or local cartage or unloading; but the transportation tax imposed by section 620 of the Revenue Act of 1942 may be included to the principal markets. This freight rate factor will ordinarily be based on the railroad carlot rate from the basing point or f. o. b. shipping point to the smaller markets. It may be based on the railroad carlot rate from the basing point or the f. o. b. shipping point to a large city near such smaller market plus the less-than-carlot rate from the larger city to the smaller market. For example, if a carlot of lettuce is shipped from Salinas, California to Denver, Colorado, part of which is intended for Pueblo, Colorado, the freight factor in this instance would be the railroad carlot rate to Denver plus the less-than-carlot rate from Denver to Pueblo. In other cases, the customary truck rate from the larger to the smaller city would be used. In still other instances, the freight factor at two smaller markets might be the same based upon the railroad carlot rate to the market more distant from the basing point plus the published charge of the rail carriers for storage in transit or for partial unloading.

For carlot or trucklot sales to any wholesale receiving point the maximum price shall not exceed the applicable basing point or f. o. b. shipping point price plus the applicable freight (using the most direct method of transportation available) from the basing point or shipping point to that wholesale receiving point.

Regional offices of the Office of Price Administration or such offices as may be authorized by the appropriate regional offices shall determine the cheapest method of transportation which is customary and generally available from basing points into each market, and shall compute the freight to be used for each market within its jurisdiction.

[Subparagraph (7) amended by Am. 3, 8 F.R. 10673, effective 7-29-43, and Am. 8, 8 F.R. 12951, effective 9-29-43]

(8) "Basing point" means a selected point in an area of production designated as a basing point by the Appendices of Article III, section 15, from which freight to the wholesale receiving point is computed for the purposes of calculating a maximum price.

(9) "Basing point price" includes all charges for protective services, including icing, refrigeration and charges under appropriate railroad refrigeration rules such as rules 240, 242, 247, etc. It includes all charges except freight as defined in this regulation. If a person purchases fresh fruits or vegetables, f. o. b. country shipping point, all charges for re-icing in transit, demurrage, or other similar charges, shall be paid by such purchaser out of the maximum price provided for him.

[Subparagraph (9) as amended by Am. 3, effective 7-29-43]

(10) "Net weight" means the actual weight of fresh fruits or vegetables without including the weight of the container or ice.

(11) "Records" means books of account, ledgers, sales and price lists, sales slips, receipts, invoices, bills of lading and other papers and documents.

(12) "Wholesale receiving point" means any place at which an intermediate seller receives fresh fruits or vegetables.

(13) "Market" means any area in which intermediate sellers sell fresh fruits and vegetables received at a particular wholesale receiving point.

(b) Unless the context otherwise requires, the definitions set forth in Section 302 of the Emergency Price Control Act of 1942, as amended, shall apply to other terms used herein.

¹ If a grower makes a sale to an ultimate consumer, his maximum price for such sale shall be the ceiling price established under Col. 7 above for the particular market where such sale is being made by the grower, multiplied by 1.40.

² The first person (including a grower) who packs lettuce in L. A. or Salinas crates shall place, in legible printing or writing, the "minimum net weight" upon such crate.

[Table as amended by Am. 3, 8 F.R. 10673, effective 7-20-43]

Explanations and examples of operation of regulation. (1) Iceberg lettuce in an L. A. crate if the net weight is 60 pounds or more, shall be sold under the provisions applicable to Item No. 1 in paragraph (a) of this section. If the net weight of iceberg lettuce in an L. A. crate is less than 60 pounds, or if it is sold in any other type of container, it shall be sold under the provisions applicable to Item No. 2. The provisions of Item No. 2 shall apply to all sales of lettuce in any type of container except hothouse lettuce and except iceberg lettuce in L. A. crates with a net weight of 60 pounds or more. Hothouse lettuce in any type of container shall be sold under the provisions of Item

No. 3 and shall be marked as hothouse lettuce upon the container.

(2) Examples:

(i) **Example 1.** The maximum price for carlot or trucklot sales at Chicago, Illinois, for iceberg lettuce in L. A. crates (5 dozen, net weight 62 pounds) shall be determined as follows:

Basing point price (includes charges for all protective services, additional freight for ice, etc.)	\$3.25
Freight from Salinas, California (basing point to Chicago, Illinois, market)	1.12
Maximum price for carlot or trucklot sales	4.37

The maximum price for less than carlot or less than trucklot sales is the maximum price for carlot or trucklot sales (\$4.37) plus \$60 or \$4.97.

(ii) **Example 2.** The maximum price for carlot or trucklot sales at Chicago, Illinois, for iceberg lettuce or other lettuce (except hothouse lettuce) packed in 1½ bushel hampers with a net weight of 25 pounds shall be determined as follows:

Maximum price for carlot or trucklot sales for iceberg lettuce in 1½ bushel hampers with a net weight of 25 pounds is \$4.37 (Item 1, Col. 6) divided by 60, or 7.3 cents per pound, or \$1.83 for a hamper containing 25 pounds.

The maximum price for less than carlot or less than trucklot sales is the maximum price per pound for carlot and trucklot sales (7.3 cents, Col. 6) plus 1 cent, or 8.3 cents per pound, multiplied by 25, or \$2.08.

(iii) Example 3. The maximum price for carlot or trucklot sales at Chicago, Illinois, for hothouse lettuce in a 10 pound container shall be determined as follows:

Maximum price per pound for carlot or trucklot sales for all lettuce except hothouse lettuce (Item 2, Col. 6) is 7.3 cents,

Plus differential of 8 cents for hothouse lettuce or 15.3 cents;

Or maximum price for 10 pound hamper (10x15.3) or \$1.53.

Maximum price for less than carlot or less than trucklot sales is the maximum price per pound for carlot or trucklot sales (15.3 cents, Col. 6) plus 1 cent per pound or 16.3 cents per pound or \$1.63 per 10 pound containers.

(b) Authority is delegated to all regional offices, or such of their district offices as they in turn may authorize, to adjust the maximum price of lettuce upward in sales to United States agencies to account for any increase in costs which is caused by special trimming or cutting to meet the specifications required by such purchasers for overseas shipment.

[Subparagraph (3) amended by Am. 3, 8 F.R. 10673, effective 7-29-43, and Am. 10, 8 F.R. 15610, effective 11-15-43]

(4) For sales of carlots or trucklots to retailers and institutional users, the maximum prices per pound shall be .6 cents less than the maximum prices for less than carlot or less than trucklot sales for each of the periods and freight rate classes listed above.

(5) If a grower makes a sale to an ultimate consumer, his maximum price for such sale shall be the ceiling price under paragraph 1 or paragraph 3 of this Appendix for the particular market where such sale is being made by the grower multiplied by 1.40.

(6) On sales of cabbage to Government procurement agencies, the maximum price shall be the prices listed in the table above for Zone I, II and III plus the amount by which the actual freight from the shipping point to the customary receiving point of the Government purchaser exceeds the following amounts:

- Zone I—\$1.10 per cwt.
- Zone II—80¢ per cwt.
- Zone III—45¢ per cwt.

[Subparagraph (6) added by Am. 8, 8 F.R. 12951, 14012, effective 9-29-43]

(b) Explanation and examples of determining maximum prices under Appendix B.

(1) Cabbage of all types, grades, sizes, varieties and in any type of container or in bulk shall be sold under the provisions applicable to Appendix B. Cabbage sold under these provisions shall be "well trimmed" as defined in the United States Department of Agriculture standards for cabbage. The maximum prices established shall apply to sales by any person or persons to retailers and institutional users and are specified on a per pound basis. Maximum prices for sales of cabbage in any container shall be determined by multiplying the "net weight" of cabbage contained in the particular container, and so specified on the crate or other container, by the maximum price per pound for the particular market in which it is being sold.

(2) For the period December 1 to May 31, maximum prices for sales to retailers and institutional users in less than carlots or less than trucklots in a particular market shall be determined by determining the freight rate from the basing point specified for that particular market and finding the maximum price which corresponds to that particular freight rate in Table 1 above.

(i) Example 1. The basing point for Chicago, Illinois, during the months, December to April, is Brownsville, Texas. The freight rate per 100 pounds for cabbage from Brownsville, Texas, to Chicago, Illinois, is \$1.02 and

falls within the freight rate class, \$1.00 to \$1.095 as listed in column 1 of Table 1. The maximum price per pound to retailers and institutional users in less than carlots or less than trucklots in Chicago, Illinois, for December, January and February is then 4.4 cents per pound, as found in column 2, corresponding to the freight rate class \$1.00-\$1.095. For March and April the price in Chicago is 4.7 cents per pound and May, 4.4 cents per pound. The maximum price for a 50 pound sack of cabbage sold to a retailer in less than carlot or less than trucklot quantities in Chicago during December, January and February is 50 x 4.4¢ or \$2.20; in March and April 50 x 4.7¢ or \$2.35.

(ii) Example 2. The basing point for Atlanta, Georgia, is Belleglade, Florida. The freight rate from Belleglade to Atlanta is \$.55 per 100 pounds and falls within the freight rate class of Table 1 of \$.50-.595. Thus, the maximum price per pound by any seller to retailers and institutional users in less than carlots or less than trucklots in Atlanta, Georgia, is 3.9 cents for December, January and February, 4.2 cents for March and April and 3.9 cents for May.

(3) For the months June through November the regulation provides maximum prices for sales to retailers and institutional users in less than carlots or less than trucklots for all markets in the United States. There are no basing points. Each market has the same price. For example, as named in Section 3, the maximum price per pound at which any seller can sell to any retailer or institutional user in any market in the United States in less than carlot or less than trucklot quantities during June is 3.6 cents, 3.3 cents in July and August, 3.1 cents in September and 2.9 cents in October and November. Thus, the maximum price of an L. A. crate of cabbage with a net weight of 85 pounds sold to a retailer in less than carlot or less than trucklot quantities in all markets in the United States during July and August is 85 x 3.3 or \$2.81.

(4) For sales to retailers or institutional users in carlot or trucklot quantities in Chicago, Illinois, during December, January and February, the maximum price per pound is 4.4 cents (maximum price for less than carlot or trucklot sales) minus .6 cents, or 3.8 cents. Thus the maximum price of a 50 pound sack of cabbage sold to a retailer in carlot or trucklot quantities is 50 x 3.8, or \$1.90.

APPENDIX C—MAXIMUM PRICES FOR FRUITS AND VEGETABLES BASED ON MAXIMUM PRICES F. O. B. COUNTRY SHIPPING POINT

(a) This appendix establishes maximum prices for certain fruits and vegetables, f. o. b. country shipping point. For these commodities

ties, the maximum prices for carlot or trucklot sales at any wholesale receiving point and the maximum prices for less-than-carlot or less-than-trucklot sales in any market are computed respectively from the maximum price, f. o. b. country shipping point, by the addition of the cost of transportation (including refrigeration and other protective services) and a stipulated dollar-and-cent markup.

(b) When used in this regulation, the term:

(1) "Country shipping point" means a farm or other place in or near the producing area from which fruits and vegetables are sold, shipped, delivered or otherwise transferred to any person, or at which fruits and vegetables are prepared for sale, shipment, delivery, or other transfer to any person. "Prepared" means, for example, loading, sacking, grading, sizing or harvesting.

(2) "Cost of transportation" means:

(i) If shipment is by a common carrier whose maximum rates and charges are regulated by the Interstate Commerce Commission or other Federal or State regulatory body, the amount actually paid to the carrier, in conformance with its lawfully established rates and charges, including charges for pre-cooling, icing and other protective or accessorial services actually performed. Any allowance made by the carrier to a shipper or consignee for performing pre-cooling or other services may, nevertheless, be included in "cost of transportation" and may be retained by the person performing the services for which the allowance is made. The amount of the transportation tax imposed by section 620 of the Revenue Act of 1942 may be added.

(ii) If shipment is by a carrier for hire other than a common carrier (such as a contract carrier) the amount actually paid to the carrier but not in excess of the maximum charges as determined by the General Maximum Price Regulation, amendments, and supplementary regulations thereto, or such other regulations of the Office of Price Administration as may be applicable to the services of such carrier at the time of movement. The amount of the transportation tax imposed by section 620 of the Revenue Act of 1942 may be added.

(iii) If shipment is by a carrier other than described in (i) and (ii) above (such as an unregulated common carrier or a private carrier) the amount actually paid to the carrier but not in excess of an amount computed by applying to the actual weight of the shipment the lowest published rail carload rate between the rail stations nearest to the points of origin and destination plus rail charges for protective and accessorial services if equivalent services are performed. If the shipment is less than 20,000 pounds, an additional charge of 2 cents per 100 pounds may be made, *Provided*: That the total charge for a shipment of less than 20,000 shall not exceed the charge for a shipment of 20,000 pounds. In applying rail accessorial and protective charges which are stated in amounts per car, the per car charge may be made against a shipment of 20,000 pounds or more moving in a single conveyance, but only the proportion of such per car charge which the weight of the shipment bears to 20,000 pounds, may be made against a shipment of less than 20,000 pounds. When pre-cooling or icing, not included in the carrier's rates and

charges, is performed by or for account of the shipper, the cost of this service, but not to exceed maximum prices prescribed by Maximum Price Regulation No. 165, may be added. The amount of the transportation tax imposed by section 620 of the Revenue Act of 1942, may be added, if the shipment is subject to that tax.

(iv) If shipment is by a means owned or controlled by the seller an amount not in excess of the lowest of the rates mentioned in (i), (ii), or (iii) above, available to the seller. The amount of the transportation

tax imposed by section 620 of the Revenue Act of 1942, may be added if the shipment is subject to that tax.

(c) The first person (including a grower) and every person thereafter who makes sales of any of the fruits or vegetables covered by this Appendix C shall notify his purchaser on his invoice or other written evidence of the sale the exact amount of the "cost of transportation" as defined herein.

(d) The maximum prices for sales of red sour cherries shall be as follows:

Column 1	Column 2	Column 3
Maximum prices per pound, f. o. b. country shipping point.	Maximum prices per pound, for carlot or trucklot sales at any wholesale receiving point.	Maximum prices for less than carlot or less than trucklot sales to any person other than ultimate consumers.
10 cents per pound.....	10 cents per pound plus "cost of transportation" as defined above.	10 cents per pound plus "cost of transportation" as defined above, plus 1 1/2 cents per pound.

(e) The maximum prices for sales of fresh berries in any container shall be as follows:

(1) For sales of any fresh berries covered by this Appendix by hotel or institutional supply houses, the maximum price shall be the maximum prices stated in column 2 above, plus 5¢ per quart or 3¢ per pint.

(2) In sales by growers to ultimate consumers the maximum price shall be the price stated in column 3 above, multiplied by 1.34.

(3) Any of the above-listed berries may be sold by the pint or by the quart or in cases of pints or quarts or mixed pints and quarts. A quart, dry measure shall contain 20 ounces, avoirdupois, or more, and a pint shall contain 10 ounces, avoirdupois, or more. The per pound prices listed above may be converted to per quart prices as follows: For a 20 ounce avd. quart the price shall be 20/16 of the per pound price listed above; for a 30 ounce avd. quart the price shall be 30/16 of the per pound price listed above, and so on. In all cases where the maximum price results in a fraction of a cent the figure shall be rounded to the nearest cent.

(4) *Adjustment provisions.* (See also section 2 of Article 1.) Any regional office or such district office of the Office of Price Administration as may be authorized by the appropriate regional office, may, by order, adjust the maximum prices for raspberries as follows: The upward limit to which prices in Column I may be adjusted is the lower of (a) the average price received by growers for the 1942 crop in the region or district wherein the adjusted price is to be effected as determined by the regional or district office from official United States Department of Agriculture market news sources plus 8 cents per pound or (b) 18 cents per pound plus an amount equal to the freight between the area for which the adjustment is being made and the shipping point, in Oregon, Washington, New York, Pennsylvania, Ohio and Michigan, which is nearest to that area. The prices in Column I so adjusted shall be substituted for the corresponding base figures in Column II and III.

No adjustment upward may be made for raspberries grown or sold in the states of Oregon, Washington, New York, Pennsylvania, Ohio, or Michigan.

PART 1340—FUEL

[MPR 120, Amdt. 74]

BITUMINOUS COAL DELIVERED FROM MINE OR PREPARATION PLANT

A statement of the considerations involved in the issuance of this amendment issued simultaneously herewith has been filed with the Division of Federal Register.*

Maximum Price Regulation No. 120 is amended in the following respect:

In § 1340.207, paragraph (e) is designated paragraph (f) and new paragraph (e) is added to read as follows:

(e) A producer may obtain temporary adjustment of the maximum prices for the sale of coal from a mine:

(1) Where the mine is one at which the wages of the mine workers are computed in accordance with the provisions of the Memorandum of Agreement en-

tered into between the Secretary of the Interior and the President of the United Mine Workers of America dated November 3, 1943, or in accordance with the provisions of a legal wage agreement substantially similar thereto.

(2) Where the mine is operating on a six-day work week basis.

(3) If the mine has not, subsequent to November 30, 1943, been granted any adjustment of maximum prices either individually, as one of a group or on a district-wide basis.

(4) If the producer has filed an application for adjustment on OPA Form No. 653-632 (or on OPA Form No. 653-572 where his mine's daily capacity is less than 50 tons) simultaneously with OPA Form No. 653-633 by sending an original and one copy of both such forms by registered mail to the Secretary, Office of Price Administration, Washington 25, D. C.

(5) If the producer has notified the Solid Fuels Branch, Office of Price Administration, Washington 25, D. C. by telegraph of the amount of the price adjustment computed on Form No. 653-638, prior to charging such adjustment.

(6) If the producer includes a statement on each invoice rendered during the period the temporary relief is in effect that the amount charged includes a temporary adjustment computed on OPA Form No. 653-638 and shows the amount per ton so added.

As soon as the producer has mailed such forms by registered mail and has given notice by telegraph he may add the amount of the adjustment properly computed on Form No. 653-638 uniformly to all of his maximum prices regardless of size, use or method of shipment until advised to the contrary by the Office of Price Administration or until advised of action on his application.

In the event it appears that the computation on OPA Form No. 653-638 was improperly made or that the adjustment was excessive in amount that fact will be taken into consideration by the Price Administrator in acting upon the application or in the maximum prices subsequently effective. Computations made on a basis other than that provided in OPA Form No. 653-638, or failure to comply with any other provision of this paragraph (e), will be considered an evasion of this regulation and will be subject to the criminal penalties, civil enforcement actions and suits for treble damages provided for by the Emergency Price Control Act of 1942, as amended.

This amendment shall become effective December 3, 1943.

NOTE: The reporting and record-keeping requirements of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

PART 1394—RATIONING OF FUEL AND FUEL PRODUCTS

[RO 5C, Amdt. 87]

MILEAGE RATIONING: GASOLINE REGULATIONS

A rationale accompanying this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.*

1. Section 1394.7551 (a) (10) is amended by deleting the phrase "exchange certificates on Form OPA R-548 issued by a Board in return for other evidences received."

2. Section 1394.7551 (a) (51) is added to read as follows:

(51) "Folder" means an identification folder for use in connection with serially numbered coupons issued in strips, to identify such coupons with the person to whom, and any vehicle or fleet for which the coupons are issued.

3. Section 1394.7803 is amended to read as follows:

§ 1394.7803 *Transport ration coupons.*

(a) Class T coupons, and, in the case of motorcycles owned or leased by the armed forces, Class D books marked "Transport" shall be issued as transport rations. Class T coupons shall each have a value of one unit. All Class T coupons issued for use after December 31, 1943 shall be issued in strips, and the coupons issued shall bear serial numbers in consecutive order. A folder shall be issued with such coupons, which shall identify the coupons with the vehicle or fleet and the owner of the vehicle or fleet for which the ration is issued.

(b) Coupons contained in a transport ration book shall authorize the transfer of gasoline to a consumer only during the period noted thereon by the Board. Serially numbered Class T coupons issued in strip form shall authorize the transfer of gasoline to a consumer only during the period noted by the Board on the folder which it issues with such coupons.

4. Section 1394.7805 is amended to read as follows:

§ 1394.7805 *Allowance and issuance of transport rations—(a) Presentation of certificate of war necessity.* No transport ration shall be issued unless:

(1) The applicant has presented to the Board, at the time of application, a currently valid single unit certificate or, in the case of a fleet, a fleet certificate issued for the fleet for which a ration is sought; or

(2) The ration is sought for use with a motor vehicle owned or leased by the armed forces as provided in paragraph (c) of this section.

(b) *Allowance of ration for vehicles operated under certificate of war necessity.* When an application is made for a transport ration for use with a motor vehicle operated under a certificate of war necessity, the Board shall examine the single unit certificate or the fleet cer-

tificate submitted and shall insert at the appropriate place provided in the application the maximum number of gallons of gasoline allowed by the certificate for the quarterly periods indicated thereon. The Board shall allow the maximum number of gallons of gasoline certified in the certificate of war necessity for the quarterly period for which the ration is sought, or the quantity of gasoline which the applicant states he requires for that period, whichever amount is less. However, no transport ration may be issued which will allow the applicant to acquire gasoline in excess of the amount allowed by such certificate for the calendar quarterly period for which the ration is sought. The Board shall issue ration evidences in accordance with the provisions of paragraph (d) of this section, to provide the number of gallons of gasoline which it has allowed.

(c) *Allowance of rations for vehicles owned or leased by the armed forces.* When an application is made for a ration for use with a motor vehicle which is owned or leased by the military or naval forces of the United States or State military forces organized pursuant to section 61 of the National Defense Act, as amended, no certificate of war necessity is required. In such a case, the Board shall allow the applicant the number of gallons of gasoline requested by the applicant for the calendar quarterly period during which the ration is to be used. The Board shall issue ration evidences in accordance with the provisions of paragraph (d) of this section, to provide the number of gallons of gasoline which it has allowed.

(d) *Issuance of transport rations.* In respect to motor vehicles, other than motorcycles, the Board shall issue a sufficient number of Class T coupons, bearing consecutive serial numbers, to provide the number of gallons of gasoline allowed. The Board shall issue with such coupons a folder, and shall note on the folder the serial numbers of the coupons issued, the date of issuance and expiration, the identification of the vehicle or fleet and the name and address of the owner of the vehicle or fleet.

In respect to motorcycles, the Board shall issue Class D books marked "Transport" containing coupons only in sufficient number to provide the number of gallons of gasoline allowed and shall remove and cancel all coupons in excess of the number required to supply the gallonage allowed.

However, if it is necessary for the applicant to receive bulk transfers of gasoline and if he meets the requirements of § 1394.8006 in regard to bulk transfers the Board shall issue the ration in the form and manner provided in § 1394.8003, to the extent of the transport ration gallonage allowed by it for which bulk transfers are required. The Board shall make a record of its action on the application.

(e) *Compliance with orders of the Office of Defense Transportation.* No transport ration issued for a vehicle for the operation of which a certificate of war necessity is required may be used with any vehicle on which the tires have

not been inspected and approved in accordance with any applicable rule, regulation or order of the Office of Defense Transportation, or of the Office of Price Administration.

5. Section 1394.7807 is amended to read as follows:

§ 1394.7807 *Interchangeable transport rations.* An applicant for a transport ration for use with fleet vehicles may request the Board to note, on the folder accompanying the Class T coupons, (or, in the case of motorcycles, upon the Class D ration book), a clearly discernible name or other identification of the fleet, or if the vehicles bear no clearly discernible name or identification, the serial number of the fleet certificate issued for such vehicles, instead of the registration number of a particular vehicle. The Board may grant such a request with respect to any vehicles in the fleet which are used interchangeably and which bear a clearly discernible fleet name, identification or designation, or, in the absence of such designation, with respect to any vehicles for which a fleet certificate has been issued. Whenever any folder issued in connection with Class T coupons or any ration book issued as a transport ration bears a notation made by the issuing Board of a fleet identification or a fleet certificate number, the coupons contained in such book or identified on such folder may be used interchangeably for all vehicles in the fleet bearing such identification or covered by such fleet certificate.

6. Section 1394.7852 (b) is amended to read as follows:

(b) (1) If the Board grants the application, it shall determine and allow the quantity of gasoline which is essential to the applicant for the accomplishment of the purpose stated in the application from the date of its decision to the end of the period (not exceeding six months) for which the ration is sought. However, the quantity so determined and allowed shall not exceed any applicable limitations upon amount of rations or mileage set forth in § 1394.7851.

(2) The Board shall issue to the applicant coupons of any appropriate class, except Class A coupons, in sufficient number to afford the applicant the quantity of gasoline allowed by the Board upon the basis of the current gallonage value of such coupons. The coupons so issued shall be contained in a ration book, or, in the case of serially numbered coupons, shall be accompanied by an appropriate folder. The person issuing the ration shall remove from any ration book and shall cancel any coupons in excess of the number representing the allowed gallonage. He shall mark on any book or folder which is so issued the word "Special," the date of issuance, the date on which the ration expires and that the ration will expire on that date, the identification of any vehicle for which the ration is issued and the name and address of the owner. He shall also write in any folder which is so issued the serial num-

bers of the coupons issued. He shall also make a record of the Board's action on the application.

(3) The coupons so issued shall be valid for transfers of gasoline to consumers from the date of issuance and shall expire at the end of the period for which the ration is issued.

(4) If the total quantity of gasoline allowed by the Board does not exceed twenty gallons, the Board may issue, instead of coupons, one or more gasoline purchase permits (Form OPA R-571) to provide the amount of gasoline allowed. The Board shall note upon the face of each such permit the information required by the form. No one gasoline purchase permit shall be issued for an amount in excess of ten gallons of gasoline nor for a fractional part of a gallon, and the total gallonage value of gasoline purchase permits issued to any applicant upon the basis of one application shall not exceed twenty gallons.

7. The heading immediately preceding § 1394.7951 is amended to read as follows: "Issuance of Ration Evidences and Acknowledgments of Delivery by the Office of Price Administration, Washington, D. C."

8. Section 1394.7951 is amended to read as follows:

§ 1394.7951 *Issuance of ration evidences for secret governmental work.* The Office of Price Administration, Washington, D. C., in its discretion, may issue in blank gasoline ration evidences of all types to the Army, Navy, Marine Corps, Coast Guard and law enforcement agencies of the United States, solely for the use of such agencies and for distribution to and use by their officers, agents or employees in the performance of official duties which depend upon secrecy. Any such agency which requires ration evidences for use by such officers, agents or employees, shall make written application therefor to the Office of Price Administration, Washington, D. C., and shall state the number and type of ration evidences required, and the use for which such evidences are intended.

9. Section 1394.8004 is amended to read as follows:

§ 1394.8004 *Notations on ration books, folders, applications, coupons and tire inspection records—(a) Notations by Board on application.* The Board shall make a record on every application of the action taken with respect thereto.

(b) *Notations by Board on rations issued for motor vehicles.* At the time of issuance of any ration coupons for use with a registered or commercial motor vehicle, the person issuing the ration shall make a clear notation, on the cover of the ration book or folder, in ink, indelible pencil or by typewriter, of the following information:

(1) The registration number, if any, of the vehicle for which it is issued, or the official or fleet designation of the vehicles with which it may be used interchangeably;

(2) The name and address of the owner of such vehicle, and

(3) In the case of any ration other than a basic ration, the date when the ration becomes valid, and, as the case may be, the expiration date or the earliest renewal date of the ration.

(c) *Notations by Board on non-highway rations.* At the time of issuance of any non-highway ration represented by coupons, the Board shall make a notation, on the cover of the ration book or folder of the name and address of the applicant, the date on which the ration becomes valid for use and the earliest renewal date of the ration.

(d) *Notations by Board on tire inspection records.* (1) At the time of issuance of any ration in connection with which the presentation of a tire inspection record is required pursuant to § 1394.8010, the person issuing the ration shall write clearly in ink, indelible pencil, or by typewriter on the tire inspection record the following information:

(i) The date of issuance;

(ii) The class of ration issued;

(iii) Either the serial number of the ration book, if any, issued or the serial numbers, if any, of the ration evidences issued;

(2) Upon the renewal of a basic ration the Board shall transcribe and record on the new tire inspection record the following information:

(i) The date of the last previous tire inspection and approval;

(ii) All notations appearing on the old tire inspection record relating to violations and to revocations or denials of rations, and

(iii) The class, serial number and earliest renewal date of any currently valid supplemental ration which has been issued for use with the vehicle.

(e) *Notations by ration holder.* Immediately upon receipt of any ration coupons each person to whom such coupons are issued shall write, stamp or print, clearly and in ink, on the face of the coupons issued to him the following information:

(1) In the case of Class A coupons, the license number and state of registration of the vehicle for which such ration was issued.

(2) In the case of Class B, C, D and T coupons, the license number and state of registration of the vehicle for which the ration was issued. However, in the case of interchangeable ration books and folders accompanying serially numbered coupons issued for use interchangeably among fleet or official vehicles, the information shall be the official or fleet designation (or the certificate of war necessity number in the case of commercial vehicles not bearing fleet designations) and the state and city or town in which the principal office of the fleet operator is located.

(3) In the case of Class E and R coupons no notation need be made upon receipt of the ration, but when a transfer is made to a consumer at a place off of his premises, the ration holder shall write, stamp or print on the coupons exchanged, the name and address of the person to whom the ration was issued.

10. Section 1394.8005 is amended to read as follows:

§ 1394.8005 *Change in motor vehicle registration number.* (a) Whenever any change is made in the registration number of a vehicle, the holder of a tire inspection record, or ration book, or serially numbered coupons accompanied by a folder issued for such vehicle (other than a ration book or folder bearing an official or fleet identification) shall cancel the former registration number appearing on the tire inspection record and coupon book or folder and shall note thereon, in ink, indelible pencil or by typewriter, the new registration number issued for such vehicle.

(b) The holder of any book or identification folder bearing an official or fleet identification shall upon any change in the name, identification or designation of such official or fleet vehicles, submit such book or folder to the Board which issued it for appropriate modification. Upon ascertaining the new name, identification or designation of such official or fleet vehicles, the Board shall change the designation of such book or folder to correspond thereto.

(c) Nothing in this section shall be construed to authorize the continued use of a ration after a change in ownership of the vehicle for which it was issued.

11. Section 1394.8006 is amended to read as follows:

§ 1394.8006 *Authorization of bulk purchase.* (a) Any applicant for a ration who desires to acquire gasoline in drums or other containers or who desires to receive gasoline by transfers into a storage tank or by other bulk transfer may, when applying for a ration, request the Board to issue gasoline deposit certificates instead of any ration evidences which would otherwise be issued. He may also request the Board to authorize him to use for bulk transfers any Class A, B, C, D or T coupons issued to him.

(b) (1) If the applicant will acquire 960 gallons or more per month by bulk transfer the Board shall issue one or more gasoline deposit certificates to the extent of, the gallonage allowed by it for which gasoline deposit certificates are requested. The Board shall first determine the type of ration and the earliest renewal date or expiration date of the ration and the number of coupons or gallons to which the applicant is entitled; it shall then issue one or more gasoline deposit certificates to the extent required by the applicant, but not in excess of the gallonage value of the coupons to which the applicant is entitled. If only a part of the ration is issued in gasoline deposit certificates the remaining portion of the ration shall be issued in the usual manner in appropriate coupons. The Board may also authorize the use of such coupons for bulk transfer in the same manner as directed in subparagraph (2) of this paragraph. Upon the renewal of such an applicant's ration the Board may issue gasoline deposit certificates even though the applicant's need for acquiring gasoline by bulk transfer may be slightly less than 960 gallons per month.

(1) At the time of issuance of any gasoline deposit certificate the Board shall note upon the application for a gasoline ration the serial number and gallonage of the gasoline deposit certificate issued, the date of issuance of the ration and, as the case may be, the expiration date or earliest renewal date of the ration.

(ii) Each gasoline deposit certificate shall contain the designation of the issuing Board, the signature of the issuing officer, the name and address of the applicant, the gallonage, in words and numerals, for which the certificate is issued, the type of ration or rations issued in the certificate, and the gallonage of each such type.

(2) If the applicant will acquire less than 960 gallons per month by bulk transfer the Board shall issue the ration in the usual manner, and shall make a notation upon the coupon book or upon the folder accompanying the coupons, as the case may be, indicating that the coupons contained in such book or accompanying such folder may be used for a bulk transfer of gasoline.

12. Section 1394.8007 is amended to read as follows:

§ 1394.8007 *Lost, stolen, destroyed, mutilated or wrongfully withheld coupon books, folders or serially numbered coupons—*(a) *Coupon books and serially numbered coupons.* In the event of loss, theft, destruction, or mutilation of any coupon book or serially numbered coupons or the wrongful withholding of such book or coupons from the rightful holder, the person entitled to their possession may apply for the replacement of such book or coupons in accordance with the provisions of Procedural Regulation No. 12. However, if the application is for replacement of a coupon book or serially numbered coupons that have been lost or stolen, the Board shall waive all waiting periods provided for in § 1300.954 of Procedural Regulation No. 12, where the requirement of such waiting periods would result in extreme hardship upon the individual, impede essential transportation, or be contrary to the public interest. If application is made to a Board other than the Board which originally issued the coupon book or coupons an additional copy of the application shall be made, to be forwarded to the Board which originally issued the ration.

(b) *Folders.* In the event a folder is lost, stolen, destroyed, mutilated or wrongfully withheld from the rightful holder, the person entitled to possession of the folder may apply to the issuing Board for a new folder. The Board shall issue such a folder of appropriate class, bearing notations of the following information, which the Board shall obtain from the application on the basis of which the ration was granted:

(1) The serial numbers of the coupons with which the original folder was issued;

(2) Their date of issuance and their expiration or earliest renewal date;

(3) The identification of any vehicle or fleet for which the original folder was issued; and

(4) The name and address of the owner of the vehicle or fleet, or the applicant, as the form may require.

13. In § 1394.3103 (a) the first sentence is amended to read as follows:

Upon cessation of use or change in ownership of any vehicle, boat or equipment, any ration issued for such vehicle, boat or equipment shall expire and the person to whom such ration was issued shall, within five (5) days after its expiration, surrender to the issuing Board all unused coupons and books and any folder for serially numbered coupons issued therefor.

14. In § 1394.8104 (a) the phrase "other evidences and tire inspection records" is amended to read "other evidences, folders and tire inspection records" in the two places where such phrase appears.

15. In § 1394.8104 (e) the last sentence is amended to read as follows:

Such order shall also require the ration holder to surrender to a specified board or officer all revoked coupons and any folder outstanding in connection therewith, and a certified ration check payable to the Office of Price Administration for all revoked credits in a ration bank account.

16. In § 1394.8104 (f) the first sentence is amended by inserting the phrase "or a folder" after the words "ration evidences".

17. In § 1394.8105 (a) (1) the parenthetical phrase is amended to read "(and in such a case require the surrender to it of coupons, coupon books or other ration evidences and any folder outstanding in connection therewith)".

18. In § 1394.8105 (a) (2) (i) the second sentence is amended by inserting after the phrase "direct him to surrender to it the coupons, coupon books or other ration evidences issued to him" the words "and any folder outstanding in connection therewith".

19. Section 1394.8112 is revoked.

20. Section 1394.8116 is revoked.

21. Section 1394.8153 (a) is amended to read as follows:

(a) *Coupons issued for registered and commercial motor vehicles.* Transfers may be made and accepted under the following conditions in exchange for Class A, B, C, D, or T coupons having an aggregate unit value equal to the amount of gasoline transferred. However, if the transferee is able to accept only a portion of the amount of gasoline represented by the unit value of the coupon, the transferor shall nevertheless require the surrender of an entire coupon.

(1) In the case of a coupon issued in a ration book, the transferor at the time of transfer, must require presentation of the coupon book and must detach therefrom coupons having an aggregate unit value equal to the amount of gasoline transferred. No transfer may be made pursuant to this subparagraph in exchange for a coupon detached before the presentation of the coupon book to the transferor.

(2) In the case of a serially numbered coupon issued in strips in connection with an identifying folder, the trans-

feror, at the time of transfer, must require presentation of the coupons and the identifying folder. No transfer may be made pursuant to this subparagraph in exchange for a coupon which does not bear a serial number included in the sequence of serial numbers specified on the cover of the identifying folder.

(3) Transfer may be made only into the fuel tank of a motor vehicle identified on the coupon book or folder presented and only if a sticker corresponding to the class of coupon book or coupon presented is conspicuously displayed on such vehicle, as required by the provisions of § 1394.8165 relating to stickers. These rules, however, are subject to the following three exceptions:

(i) Upon the presentation of a Class A book, transfer may be made into the fuel tank of a passenger automobile identified on such book if a Class B or C sticker is displayed.

(ii) If the ration book or identifying folder bears a notation by a Board indicating that bulk transfer is authorized, a bulk transfer may be made in exchange for a coupon contained in such book or bearing a serial number included in the serial numbers specified on such folder.

(iii) Bulk transfer may also be made, of an amount of gasoline not in excess of one unit, to enable a vehicle stranded for lack of gasoline to reach a source of supply; in such case the transferor shall retain the ration book presented, or the identifying folder and coupons presented, until the vehicle is brought to the place of transfer for identification.

(4) Transfer may be made only on and after the validity date noted on the cover of the ration book or identifying folder presented or, in the case of a Class A book only during the valid period of the coupon in exchange for which the transfer is to be made. In the case of rations issued for leased vehicles and special rations which bear an expiration date, and of Class T coupons, transfers may be made only during the valid period noted on the cover of the book or identifying folder which is presented.

(5) Transfer may be made only in exchange for coupons bearing the notations required by § 1394.8004 (d).

(6) (i) No transfer may be made before July 1, 1943 or after December 31, 1943 in exchange for coupons contained in Class T-1 or Class T-2 books issued on Form OPA R-532B or Form OPA R-533B (coupons which bear the printed double letters "TT" on the face of each coupon).

(ii) No transfer may be made in exchange for coupons contained in Class T-1 or Class T-2 books issued on Form OPA R-532A or Form OPA R-533A (book coupons which bear the printed single letter "T" on the face of each coupon).

(7) Notwithstanding any other provisions contained in this section, no transfer may be made on or after September 1, 1943, in exchange for Class B or C coupons issued on Form OPA R-527, Form OPA R-527A, Form OPA R-528 or Form OPA R-528A.

No. 242—10

22. Section 1394.8153 (c) (3) is amended to read as follows:

(3) No transfer may be made in exchange for any 100-gallon bulk coupon. On and after January 22, 1943 no transfer may be made in exchange for any one gallon bulk coupon which does not bear the word "gasoline" imprinted thereon and which is not issued on Form OPA R-554A.

23. Section 1394.8153 (c) (5) is revoked.

24. Section 1394.8165 is amended by substituting for the words "a Class A, B, C, T-1 or T-2 book coupon," the words "a Class A, B, C, or T coupon,".

25. Section 1394.8167 (a) (1) is amended by deleting the words "in the limitation area and in the states set forth in § 1394.7904".

26. Section 1394.8167 (a) (2) is amended by deleting the words "in the limitation area and in the states set forth in § 1394.7904 (b)".

27. Section 1394.8177 (b) is amended to read as follows:

(b) No person shall transfer or assign and no person shall accept a transfer or assignment of any gasoline deposit certificate, folder, or any coupon book, inventory or other coupon (whether or not such book was issued as a ration book and whether or not such coupon was issued as a ration or as part of a ration book) or other evidence, except in accordance with the provisions of Ration Order No. 5C.

28. Section 1394.8177 (c) is amended to read as follows:

(c) No person shall have in his possession any gasoline deposit certificate, folder, or any coupon book, inventory or other coupon (whether or not such book was issued as a ration book and whether or not such coupon was issued as a ration or as part of a ration book) or other evidence, or any identifying folder, except the person, or the agent of the person, to whom such book, coupon, certificate or folder was issued or by whom it was acquired in accordance with the provisions of Ration Book No. 5C.

29. Section 1394.8177 (e) is amended by redesignating the present paragraph (e) as paragraph (g) and amending the same and adding new paragraphs (e) and (f) all as set forth below:

(e) No person shall have in his possession any serially numbered ration coupon without an appropriate folder identifying such coupon except a dealer or distributor who has lawfully acquired such coupon in exchange for a transfer of gasoline.

(f) Any person to whom serially numbered ration coupons have been issued shall maintain such coupons with the appropriate folder identifying such coupons by number, and shall present such folder for inspection whenever he surrenders any such coupon in exchange for a transfer of gasoline.

(g) The provisions of paragraphs (a), (b), (c) and (e) of this section shall not

be applicable to public officials acting in the performance of their official duties.

30. Section 1394.8178 is amended to read as follows:

§ 1394.8178 *Mutilation, destruction or counterfeiting of ration evidences or folders.* (a) No person other than a person authorized pursuant to Ration Order No. 5C shall deface, mutilate, alter, burn or otherwise destroy any folder or gasoline deposit certificate, or any coupon book, inventory or other coupon (whether or not such book was issued as a ration book and whether or not such coupon was issued as a ration or as a part of a ration book) or other evidence.

(b) No person shall counterfeit or forge any folder or gasoline deposit certificate, or any coupon book, inventory or other coupon, or any other evidence.

(c) No person shall transfer, receive a transfer of, possess, or use any forged, altered, or counterfeited folder, coupon book, gasoline deposit certificate, inventory or other coupon, or any other evidence.

(d) Any defacement, mutilation or alteration of a folder, gasoline deposit certificate, coupon book, inventory or other coupon, or any other ration evidence in violation of any provision of this section shall render such folder, gasoline deposit certificate, coupon, evidence or coupon book and the coupons therein, invalid. The detachment of any coupon from a ration book, except in accordance with the provisions of § 1394.8153, shall render such coupon invalid.

(e) The provisions of paragraphs (a), (c) and (d) of this section shall not be applicable to public officials acting in the performance of their official duties.

31. Section 1394.8206b (a) (7) is amended by deleting the parenthetical phrase "(coupons which do not bear the printed double letters "TT" on the face of each coupon)".

This amendment shall become effective December 9, 1943.

PART 1407—RATIONING OF FOOD AND FOOD
PRODUCTS

[RO 16, Amdt. 86]

MEAT, FATS, FISH AND CHEESES

A rationale for this amendment has been issued simultaneously herewith and has been filed with the Division of the Federal Register.*

1. A new Article XXVI is added to read as follows:

ARTICLE XXVI—HOUSEHOLD SALVAGE FATS

SEC. 26.1 *Explanation of the terms renderer and rendering establishment—*

(a) *Rendering establishment.* Any place at which a "person" processes "household salvage fats" to produce tallow, grease, tankage, fatty acids, or detergent is a "rendering establishment". (This does not include a household in which a person processes such fats for use in that household only.)

(b) *Renderer.* Any person who has a rendering establishment is a "renderer".

SEC. 26.2 *Renderers must register between December 9 and December 11, 1943, inclusive—*(a) *General.* Every renderer must register his rendering establishment on OPA Form R-315 with the district office for the place where his establishment is located at any time from December 9, 1943, to December 11, 1943, inclusive. If he has more than one rendering establishment, he may register them together or separately. If he registers them together, he must register all on a single registration form and file that form with the district office for the place where his principal business office is located. If he registers each of them separately, he must file a separate registration form for each establishment with the district office for the place where that establishment is located. Each separately registered establishment is to be treated and operated separately for all the purposes of this order, just as if the establishments were owned by different persons.

(b) *Report of acquisitions of household salvage fats.* As part of his registration, the renderer must attach a statement showing the number of pounds of household salvage fats which he "acquired"

each month during July, August, September, and October 1943. This statement must show:

(1) The name and address of each "independent collector", if any, from whom he acquired household salvage fats, and the number of pounds acquired from each during each month;

(2) The number of pounds of household salvage fats he acquired from all other sources during each month;

(3) The total number of pounds of household salvage fats he acquired each month, and the total acquired in the four month period.

If he has more than one rendering establishment, and registers them together, he must attach a separate statement for each.

SEC. 26.3 *Renderers may receive allotments—*(a) *General.* A renderer is given an allotment of points to enable him to obtain household salvage fats for processing. Allotments are given for fixed periods, called allotment periods. The first allotment period is from December 13, 1943, through March 31, 1944. The second period is from April 1, 1944, through June 30, 1944. The third period is from July 1, 1944, through September 30, 1944. The fourth period is from October 1, 1944, through December 31, 1944.

(b) *Application for allotments.* A renderer's registration is treated as his application for an allotment for the first allotment period. The report, as described in section 26.4, which he submits for the last month of an allotment period will be treated as his application for the succeeding allotment period. The application may, in the discretion of the district office, be made at any time during the allotment period, but if it is made more than 10 days after the beginning of the period the allotment shall be reduced in proportion to the part of the allotment period which has elapsed at the time the application is made.

(c) *Amount of allotment.* A renderer's allotment for the first allotment period is determined by multiplying the number of pounds of household salvage fats which he acquired in July, August, September and October 1943 by 2.4. For the second allotment period, his allotment is determined by multiplying the number of pounds of household salvage fats he acquired from January 1, 1944, through March 31, 1944, by 2. For each succeeding allotment period his allotment is determined by multiplying the number of pounds of household salvage fats he acquired in the allotment period preceding the period in question by a factor to be fixed in a supplement to this order. He will receive for each allotment period a certificate for the amount of his allotment less the number of points he has remaining from prior allotments for household salvage fats.

(d) *Renderers who need additional points.* If a renderer has acquired, during any allotment period, household salvage fats for which he has given up at least 75% of his allotment of points for that period, and does not have sufficient points to acquire all the household salvage fats he can obtain for the remain-

*8 F.R. 13128, 13394.

der of that period, he may apply on OPA Form R-315 for additional points to the district office where he is registered. His application must show:

(1) The amount of his allotment for that period and the number of points he has on hand and in his household salvage fats ration bank account;

(2) The number of pounds of household salvage fats he acquired since the beginning of the allotment period;

(3) The average number of pounds of household salvage fats he has acquired daily since the beginning of the allotment period. (This figure to be determined by dividing the amount shown in (2) above by the number of days, including Sundays, from the beginning of the allotment period to the date of his application); and,

(4) The number of points he needs until the end of the period. If the district office finds that he needs additional points, it will issue to him a certificate for the number of points he needs, on the basis of his average daily acquisitions of household salvage fats (less the points he has on hand and in his ration bank account) to acquire such fats through the end of the allotment period, or the number of points requested by him, whichever is less.

SEC. 26.4 Renderers must file reports—

(a) *General.* Every renderer must file a report of his acquisitions of household salvage fats during each month beginning December, 1943. (However, this report for December, 1943 shall cover only the period from December 13, through December 31, 1943.) This report must be filed at the district office where he is registered within 10 days after the end of the month which it covers. If he has more than one rendering establishment he must file a separate report for each, whether or not they are registered together. The report must be signed by him or by his authorized agent, and is considered filed on time if the envelope in which it is enclosed is postmarked on or before the date it is due.

(b) *Information to be given.* The report must show:

(1) The name and address of each independent collector from whom he acquired household salvage fats during the allotment period covered in the report, and the number of pounds acquired from each in each month in that period;

(2) The number of pounds of household salvage fats acquired each month during the period from all other sources; and

(3) The number of points he has on hand and in his household salvage fats ration bank account at the end of the allotment period.

SEC. 26.5 Renderers must keep records.

(a) Beginning December 13, 1943, every renderer must keep, at his rendering establishment, a record showing, for that establishment, his acquisitions of household salvage fats by weight, in each month of the allotment period; the name

and address of each independent collector from whom he acquired household salvage fats during each month, the number of pounds acquired from each; and the date on which he acquired such fats. If he has more than one establishment and they are registered together, the record may be kept at his principal business office, but a separate record must be kept for each of his establishments.

SEC. 26.6 Explanation of the terms independent collector and independent collector establishment. (a) A place other than a "retail", "wholesale", or "primary distributor establishment", where a person who deals in household salvage fats regularly keeps, for sale or "transfer", stocks of those fats, is an "independent collector establishment".

(b) Any person who has an independent collector establishment is an "independent collector".

(c) Where an independent collector does not operate from any fixed place, his independent collector operations as a whole are regarded as a single independent collector establishment.

SEC. 26.7 Independent collectors may register and apply for an allowable inventory—(a) *General.* An independent collector may register on or after December 9, 1943, on OPA Form R-315, for an allowable inventory of points to acquire household salvage fats. His registration must be filed with the district office for the place where his independent collector establishment is located. His registration must show:

(1) The number of pounds of household salvage fats he has on hand; and

(2) The number of pounds of household salvage fats he acquired for sale or transfer during October 1943.

If he has more than one independent collector establishment he may register them together or separately. If he registers them together, he must register all on a single registration form and file that form with the district office for the place where his principal business office is located. If he registers each of them separately, he must file a separate registration form for each establishment with the district office for the place where that establishment is located. Each separately registered establishment is to be treated and operated separately for all the purposes of this order, just as if the establishments were owned by different persons.

(b) An independent collector who registers is given an allowable inventory of points to enable him to acquire household salvage fats for sale or transfer. This allowable inventory is his working capital and is determined by multiplying by 2 the number of pounds he has on hand on the date of his application. The district office will issue to him a certificate in this amount. An independent collector who does not register will have to operate on the basis of the stocks he has and the points he obtains from the persons to whom he sells or transfers such stocks.

SEC. 26.8 Independent collectors must keep records. (a) Beginning December 13, 1943, every independent collector must keep at his independent collector establishment a record, for that establishment, of his acquisitions and transfers, each month, of household salvage fats, by weight. If he has more than one establishment and they are registered together, the record may be kept at his principal business office.

SEC. 26.9 Who may have ration bank accounts—(a) *Renderer.* Every renderer must open a ration bank account for household salvage fats for his rendering establishment. If he has more than one rendering establishment and they are registered separately, he must open a separate account for each. If they are registered together, he may open one account for all, or a separate account for each or for any group of them, but all must have an account.

(b) *Independent collector.* Every independent collector who acquired for sale or transfer 15,000 pounds or more of household salvage fats in any month since July 1943, may open a ration bank account for household salvage fats for his independent collector establishment. If he has more than one independent collector establishment and they are registered separately he may open such accounts only for those establishments at which he acquired for sale or transfer 15,000 pounds or more of household salvage fats in any month since July 1943. If he has more than one independent collector establishment and they are registered together he may open accounts for any one or any group of them which acquired 15,000 pounds or more during any month since July 1943. No other independent collector may open an account.

SEC. 26.10 How household salvage fats bank accounts are used—(a) *General.* Every renderer and every independent collector who has or is required to have a bank account under section 26.9, must deposit in that account all points he receives for household salvage fats.

(b) *How household salvage fats checks are issued.* Any renderer or independent collector who issues a ration check for household salvage fats must in stating the name of his account on the check add thereto the words "Salvage Fats Account".

(c) *Use of household salvage fats checks.* Any person other than a renderer or independent collector, who has or is required to have a ration bank account under section 9.2, must deposit in that account checks which he receives which were issued as provided in paragraph (b). Any person who receives such a check and who does not have and is not required to have a ration bank account may endorse it and transfer it to his supplier for "foods covered by this order".

SEC. 26.11 Points must be given up for household salvage fats—(a) *General.* Beginning December 13, 1943, no person

may sell or transfer household salvage fats and no person may buy or acquire household salvage fats unless points are given up in the way this order requires.

(b) *How points are given up.* (1) Household salvage fats have a point value of one point for each one-half pound. No points may be given for any fraction of less than one-half pound.

(2) A person who acquires household salvage fats from a consumer or a Group I institutional user must give such person ration stamps or ration coupons (designated by the Office of Price Administration to be used for the acquisition of foods covered by this order).

(3) A person who has or who is required to have a ration bank account for household salvage fats and who acquires household salvage fats from persons other than consumers or Group I institutional users must give up points in the following way:

(i) If he acquired 100 pounds or more of household salvage fats he must issue a household salvage fats ration check for the number of points due to the person from whom he acquired the fats;

(ii) If he acquired less than 100 pounds he must make point payments for such fats in ration coupons designated for the acquisition of foods covered by this order. He may obtain ration coupons for this purpose by issuing a household salvage fats ration check to the order of his board and exchange such check at the board for ration coupons in such denominations as he needs.

(4) An independent collector who does not have and is not required to have a ration bank account for household salvage fats and who receives a household salvage fats ration check may endorse and exchange such check at any board for ration coupons designated for the acquisition of foods covered by this order.

(c) *When points must be given up.* (1) Points for household salvage fats must be given up to a consumer or Group I institutional user at the time of the transfer of the household salvage fats.

(2) Points for household salvage fats must be given up to all other persons within 30 days after the time the transfer is made. However, if money payment for the household salvage fats is made in less than 30 days, the points must be given up not later than the time the money payment is made.

(d) *General.* Points may be transferred freely between establishments of the same type operated by the same person, which are registered together, and points of one of those establishments may be used to get household salvage fats for another of them.

SEC. 26.12 *Point-free transfers.* (1) No points need be given up for a delivery of household salvage fats to a renderer or independent collector if such fats were in transit to him on December 12, 1943.

(2) Consumers may exchange, point-free, household salvage fats for foods

ORGANIZATION AND MISSION

§ 7.1 *Origin of the Corps.* The United States Marine Corps dates from the War of the Revolution and became a permanent organization under the Act of July 11, 1798 (1 Stat. 594). It serves with the Navy except when detached for service with the Army. (R.S. 1621; 34 U.S.C. 715)

§ 7.1-1 *Duties.* The following duties may be performed by the Marine Corps, when so directed by the Secretary of the Navy:

(a) To furnish organizations for duty afloat on board armed transports for service either with fleets, squadrons, or divisions, or on detached service.

(b) To garrison the different navy yards and naval stations, both within and beyond the continental limits of the United States.

(c) To furnish the first line of the mobile defenses of naval bases and naval stations beyond the continental limits of the United States.

(d) To man such naval defenses and aid in manning, if necessary, such other defenses as may be erected for the defense of naval bases and naval stations beyond the continental limits of the United States.

(e) To furnish such garrisons and expeditionary forces for duties beyond the seas as may be necessary in time of peace. [Art. 552 (8), Navy Regulations]

§ 7.1-55 *Birthday of the Marine Corps.* The following will be read to the command on the 10th of November of each year:

(a) On November 10, 1775, a Corps of Marines was created by a resolution of the Continental Congress. Since that date many thousand men have borne the name Marine. In memory of them it is fitting that we who are marines should commemorate the birthday of our corps by calling to mind the glories of its long and illustrious history.

(b) The record of our Corps is one which will bear comparison with that of the most famous military organizations in the world's history. During the greater part of its existence the Marine Corps has been in action against the Nation's foes. Since the Battle of Trenton, marines have won foremost honors in war, and in the long eras of tranquillity at home, generation after generation of marines have grown gray in war in both hemispheres, and in every corner of the seven seas, that our country and its citizens might enjoy peace and security.

(c) In every battle and skirmish since the birth of our Corps marines have acquitted themselves with the greatest distinction, winning new honors on each occasion until the term "marine" has come to signify all that is highest in military efficiency and soldierly virtue.

(d) This high name of distinction and soldierly repute we who are marines today have received from those who preceded us in the Corps. With it we also receive from them the eternal spirit which has animated our Corps from generation to generation and has been the distinguishing mark of the marines in every age. So long as that spirit continues to flourish marines will be found equal to every emergency in the future as they have been in the past, and the men of our Nation will regard us as worthy successors to the long line of illustrious men who have served as "Soldiers of the Sea" since the founding of the Corps.

(1) Must be citizens of the United States who are not more than 21 years of age on April 1 of the year in which appointed.

(2) Must have been in the Marine Corps Reserve at least 1 year by July 1 of the year in which appointed. In this computation, service in the Marine Corps Reserve, Naval Reserve, in the Regular Navy, and in the Regular Marine Corps shall be credited.

(3) Must be attached to or associated with a unit of the Organized Marine Corps Reserve and have maintained efficiency by attending therewith at least 27 drills or periods of equivalent instruction or duty during the period between July 1 of the year preceding appointment and the third Wednesday in the following April, which is the date of mental examination for admission. Not more than seven of these periods may be periods of individual equivalent instruction or duty.

(4) Must have a good record.

(5) Must submit application prior to October 1 of the year preceding appointment. This application should be addressed to the Commandant of the Marine Corps and routed for further endorsement as to qualification via official channels. (b) Any enlisted man of the Marine Corps Reserve making application for appointment to the Naval Academy who has made a false statement as to his age when applying for enlistment, or subsequent thereto, shall be automatically barred from competing for such appointment, and his further retention as a member of the Marine Corps Reserve will be decided on the merits of the case and the recommendations of his commanding officer.

§ 7.13-15 *Physical disability and medical treatment—(a) Physical injury.* In time of peace if any officer or enlisted man of the Marine Corps Reserve is injured in line of duty while performing active duty, authorized training duty, drills, equivalent instruction or duty, appropriate duty, or other prescribed duty or while performing authorized travel to or from such duty; or dies as the result of such physical injury, whether or not he received pay for such service, he or his beneficiaries shall be entitled to all benefits prescribed by law for civil employees of the United States who are physically injured in line of duty, or who die as the result thereof; and the United States Employees' Com-

pensation Commission shall have jurisdiction in such cases, and shall perform the same duties with reference to them as in the cases of civil employees of the United States so injured (34 U. S. C. 855c).

(b) *Application of Pension Act of 1937.* Where a person who is eligible for the above benefits is also eligible for pension under the provisions of the act of June 23, 1937, entitled, "An Act to Amend the Provisions of the Pension Laws for Peacetime Service to Include Reserve Officers and Members of the Enlisted Reserve," he shall elect which benefit he shall receive (34 U. S. C. 855c).

(c) *Medical treatment and hospitalization.* Reservists who become ill or contract disease in line of duty during the performance of active or training duty, with or without pay, shall be entitled, at Government expense, to such medical, hospital, or other treatment as is necessary for the appropriate treatment of such illness or disease until the resulting disability cannot be materially improved by hospitalization or treatment. They are further entitled to necessary transportation and subsistence incident to such medical and hospital treatment and to be returned to their homes when discharged from treatment. However, treatment or hospitalization for such illness or disease shall not be continued for more than ten weeks following discharge from active or training duty, except on the approved recommendation of a board of medical survey, consisting of one or more medical officers of the Navy, or when authorized by the Surgeon General of the Navy, based on the certificate of a reputable physician. Such certificate must show that the illness or disease is a continuation of the illness or disease which was sustained or contracted during the period of active or training duty and that further benefit will result from continued treatment.

(d) *Sickness or disease not an injury.* In no case shall sickness or disease be regarded as an injury within the meaning of this section.

(e) *Medical treatment for injuries.* If an injury is incurred in the vicinity of a place where a United States Government activity employs civil personnel, the official in charge thereof shall be communicated with for information concerning a United States hospital or dispensary, or hospital or dispensary designated by the United States Employees' Commission, to which men may be sent for examination and first-aid treatment. If such facilities are available, the injured person must report for treatment without delay. If no such facilities are available in the vicinity, and the injury is such as to make hospital treatment necessary, the injured person may be taken to any available hospital. In such case he may select the hospital, but the Employees' Compensation Commission will pay for hospital service in a general ward only. The injured person may obtain service in a private room, provided he pays the difference between the rate for a private room and the rate for a general-ward patient. If hospital treatment is not necessary, but medical

treatment for the injury is required, it may be secured in the same general manner as prescribed above.

(f) *Report of injuries.* The commanding officer, or other person in authority having immediate knowledge of the circumstances, shall immediately make a written report via the commanding officer of the battalion, aviation squadron, or Reserve district concerned, to the Commandant of the Marine Corps setting forth the circumstances under which the person was injured, the nature and extent of the injury, so far as known, and what action, if any, has been taken to provide treatment, as well as any other information that may be of value in establishing the injured person's right to compensation, or medical or hospital service.

(g) *Minor injuries to be recorded.* It is important that every minor injury be made a matter of record, including a statement of what first-aid treatment was rendered, as experience in handling claims of civil employees shows that injuries, thought to be of no importance when incurred, are subsequently made the basis of claims for compensation, hospitalization, or medical treatment.

(h) *Forms for report of injury.* The action indicated in the foregoing paragraphs having been taken, the commanding officer of the battalion, aviation squadron, Reserve district, or the official in charge of the nearest United States Government activity employing civil personnel, must be consulted, and the necessary forms obtained for making the additional reports required by the United States Employees' Compensation Commission.

(i) *Claim for compensation, when filed.* The compensation act requires that no claims for benefits on account of an injury can be considered unless filed within 1 year from the date of the injury so incurred, or in case death results, within 1 year from the date of death.

(j) *Class I (b), (c), and (d) reservists.* For hospitalization and medical treatment of Class I (b), (c), and (d), reservists, see article 3-31 (5).¹

(k) *Funeral expenses.* If death occurs while on active duty the expense of funeral and local burial, or of transportation of remains to place in the United States designated by the next of kin, is payable by the Navy Department from the appropriation "Care of the Dead."

§ 7.13-15a *Eligibility for benefits.* All officers, warrant officers, and enlisted men of the United States Marine Corps Reserve, who, if called or ordered into active naval or military service by the Federal Government for extended naval or military service in excess of 30 days, suffer disability or death in line of duty from disease or injury while so employed, shall be deemed to have been in the active naval service during such period, and they or their beneficiaries shall be in all respects entitled to re-

ceive the same pensions, compensation, retirement pay, and hospital benefits as are now or may hereafter be provided by law or regulation for officers, warrant officers, and enlisted men of corresponding grades and length of service of the Regular Marine Corps. A person eligible for the benefits prescribed herein and who is also eligible for pension under the provisions of the act of June 23, 1937 (50 Stat. 305), compensation from the United States Employees' Compensation Commission under the provisions of section 304 of the Naval Reserve Act of 1938 (52 Stat. 1181; 34 U.S.C. 855c) or retired pay under the provisions of section 310 of the Reserve Act of 1938 (52 Stat. 1183; 34 U.S.C. 855f), shall elect which benefit he shall receive (Act of 27 August 1940). The benefits contained in this section include the 6 months' pay to beneficiaries of personnel of the Marine Corps Reserve ordered to active duty in excess of 30 days and who die while so employed. (Acts of 27 Aug. 1940 and 17 Mar. 1941.)

§ 7.13-16 *Government insurance.* All members of the Marine Corps Reserve are entitled to take out Government insurance after having served on active or training duty for a period of 16 or more days, provided application is made to the Administrator of Veterans' Affairs within 120 days after reporting for such duty.

§ 7.13-17 *Naval Militia.* (a) Any officer or man of the Marine Corps branch of the Naval Militia may, in the discretion of the Secretary of the Navy, be temporarily appointed or regularly enlisted in the Marine Corps Reserve and assigned to the Organized Reserve in the rank, not above that of captain, which he holds in the Naval Militia. Within a year from the date of appointment, such officers are required to qualify for the rank in which they were appointed in accordance with the regular provision for appointment to and promotion in the Marine Corps Reserve; failing qualifications, their temporary commissions will be revoked.

(b) The Commandant of the Marine Corps will specify the standard for the organization, administration, and training of marine companies of the Naval Militia.

(c) Officers or men of the Marine Corps Reserve who are members of the Naval Militia of any State, Territory, or the District of Columbia shall stand relieved from all service or duty with the Naval Militia when on active duty in time of war or national emergency, or when ordered to such duty.

DISCIPLINE

§ 7.13-30 *Laws and regulations governing.* Officers and men of the Marine Corps Reserve, when employed on active duty, authorized training duty, with or without pay, drill, or other equivalent instruction or duty, or when employed in authorized travel and to and from such duty, or appropriate duty, drill, or instruction, or during such times as they may by law be required to perform active duty, or while wearing a uniform prescribed for the Reserve, shall be subject to the laws, regulations, and orders for the government of the Navy.

§ 7.13-31 *Inactive-duty status.* Disciplinary action for an offense committed while so subject to the laws, regulations, and orders for the government of the Navy shall not be barred by release from active-duty status of the officer or man concerned. For the purpose of carrying out the above provisions, members of the Marine Corps Reserve may be retained on or returned to an active-duty status without their consent, but not for a longer period than may be required for disciplinary action.

§ 7.13-32 *Retired status.* Officers and men who have heretofore been or may hereafter be transferred to the retired list of the Marine Corps Reserve, with pay, shall be subject to the laws, regulations, and orders for the government of the Navy.

§ 7.13-33 *Report of offenses.* Recommendations for disciplinary action in cases of such seriousness as to warrant trials by courts martial will be reported to the Commandant of the Marine Corps. Such reports will be submitted as prescribed by Navy Regulations and Naval Courts and Boards.

RANK AND PRECEDENCE

§ 7.13-40 *Distribution of officers in grade—(a) Organized Marine Corps Reserve.* (1) The total number of officers in the Organized Reserve in the grades of major general, brigadier general, colonel, and lieutenant colonel shall not exceed one-half of 1 percent of the actual number of enlisted men regularly assigned to the units of the Organized Reserve (including aviation) and entitled to pay therefor, one of which may be allowed in the grade of major general or brigadier general (34 U.S.C. 855e).

(2) Computation to determine the number of officers above the rank of major will be made annually as of January 1 of each year. No officer shall be reduced in rank as the result of such computation.

(3) Whenever a final fraction occurs in computing the authorized number of officers in said higher grades, the nearest whole number shall be regarded as the authorized number.

(4) The total number of officers in the Organized Reserve in the grades of major, captain, first lieutenant, and second lieutenant shall not exceed, without authority of the Commandant of the Marine Corps, the number of officers in such respective grades required to complete the authorized allowance of officers

in the various units of the Organized Reserve.

(b) *Volunteer Marine Corps Reserve.* The number of officers appointed or promoted to the grades of major, lieutenant colonel, and colonel in the Volunteer Reserve shall not exceed mobilization needs for such officers for duties appropriate to these grades. The number of officers in the sections of the special-service unit will be limited by the allowances prescribed therefor by the Commandant of the Marine Corps.

§ 7.13-41 *Precedence—(a) Within the Marine Corps Reserve.* Commissioned officers of the same rank and warrant officers of the Marine Corps Reserve shall take precedence among themselves according to dates and numbers of commissions or warrants. Commissioned officers of the same rank and warrant officers who are transferred in accordance with the provisions of the Naval Reserve Act of 1938 shall take precedence among themselves and with other officers of the Marine Corps Reserve according to the dates and numbers of the commissions or provisional assignments of rank or grade held by them at the time of transfer.

(b) *During war or national emergency.* (1) While serving with the Regular Marine Corps during war or a national emergency, each officer of the Marine Corps Reserve shall take precedence next after that officer of the Regular Marine Corps of the same rank or grade whose length of service in such rank or grade on the date of the declaration of such national emergency or war is one-half or the nearest one-half of that of the Reserve officer. This applies to all Reserve officers who were commissioned prior to the date of declaration of war or a national emergency, regardless of the date of reporting for such duty. A Marine Corps Reserve officer appointed after the declaration of war or national emergency shall take precedence, upon reporting for active duty in time of war or a national emergency, next after the officer of the Regular Marine Corps of the same rank or grade whose length of service in such rank or grade on the date the Reserve officer reports for such active duty is one-half or the nearest one-half of that of the Reserve officer. Thereafter officers of the Marine Corps Reserve who are advanced to higher grades while performing active duty, other than training duty, shall during the continuance of such active duty take precedence among themselves and with officers of the Regular Marine Corps in accordance with the date of such advancement or promotion. In time of peace each officer of the Marine Corps Reserve who reports for active duty, other than training duty, on or after July 1, 1938, shall take precedence next after that officer of the Regular Marine Corps of the same rank or grade whose length of service in such rank or grade on the date the active duty began is one-half or the nearest one-half of that of the Reserve officer in that rank or grade. In the event the date an officer last reported for active duty should be prior to July 1, 1938, for purposes of precedence he will be

considered as having reported for active duty on that date. Thereafter officers of the Marine Corps Reserve who are advanced to higher grades while performing active duty, other than training duty, shall during the continuance of such active duty take precedence among themselves and with officers of the Regular Marine Corps in accordance with date of such advancement or promotion.

(2) In the event the computation of one-half of the Reserve officer's service in grade on date of mobilization as provided in paragraph (b) (1) of this section gives him a date of precedence identical with the date of rank of an officer or group of officers of the Regular Marine Corps, the Reserve officer takes precedence next after the junior officer of the Regular Marine Corps, having the same date of rank. If the computation results in a date of precedence for the Reserve officer between the dates of rank of two officers or two groups of officers of the Regular Marine Corps, the following rules shall apply:

(i) If the date for the Reserve officer is actually midway between two officers or two groups of Regular Marine officers, or above that point, the Reserve officer shall take precedence next after the junior officer immediately preceding.

(ii) If the date for the Reserve officer is below the midway point between two officers or two groups of Regular Marine officers, the Reserve officer shall take precedence next after the senior officer next following.

(3) In case there is no officer of the same rank or grade in the Regular Marine Corps senior in date of rank to the date of precedence of the Reserve officer on mobilization, the Reserve officer shall take precedence next after the senior officer of the Marine Corps in his grade.

(c) *Command of combined forces.* For the purpose of determining who shall exercise command over a combined force, composed of units commanded by officers of the Marine Corps Reserve and units commanded by officers of the Regular Marine Corps or Navy, acting in conjunction, an officer of the Reserve of or above the rank of major will be regarded as junior to majors and lieutenant commanders of the Regular Marine Corps and Navy, respectively.

(d) *Platoon leaders and aviation cadets.* (1) The position on the lineal list, among themselves, of officers commissioned second lieutenants in the Marine Corps Reserve from the platoon leaders' classes will be determined by the final standing in the class from which commissioned for those of the same date of commission; the commission to rank as of 1 July for those graduated from college in June of any year (otherwise as of actual date of graduation from college) or as of date of graduation from the platoon leaders' class whichever date is later, such later date to be the control date. The commission of any individual who for any reason (physical, business, lack of promptness, etc.) fails to submit the required evidence of qualification within thirty days from his control date

will, if commissioned later, rank from the date he is found qualified for appointment by the Marine Corps Reserve Examining Board.

(2) The position on the lineal list, among themselves, of officers commissioned second lieutenants in the Marine Corps Reserve from aviation cadets will be determined by the final marks attained by them upon completion of their flight training.

(3) The relative position on the lineal list of officers commissioned in the Marine Corps Reserve, with the same date of rank, from the platoon leaders' classes, aviation cadets, and other sources not herein specified, will be as determined by the Commandant of the Marine Corps.

(4) The precedence of Marine Corps Reserve aviation cadets is determined as follows:

- (i) Second lieutenants (USMC and USMCR).
- (ii) Commissioned warrant officers (USMC and USMCR).
- (iii) Aviation cadets.
- (iv) Midshipmen.
- (v) Warrant officers (USMC and USMCR).

§ 7.13-50 Eligibility for membership.

(a) Male citizens of the United States and of the insular possessions of the United States who have attained the age of 17 years and who, by appointment or enlistment therein, or by transfer thereto, obligate themselves to serve in the Marine Corps in time of war or during the existence of a national emergency declared by the President are eligible for membership in the Marine Corps Reserve.

(b) A person who has a claim pending for or who is drawing a pension, disability allowance, disability compensation, or retired pay from the Government of the United States is not eligible for membership in the Marine Corps Reserve. (See § 7.13-150 (c) (2).)

(c) A member of any other naval or military organization, State or Federal (except the Marine Corps branch of the Naval Militia), is not eligible for membership in the Marine Corps Reserve.

(d) Ordinarily appointments to commissioned or warrant rank in the Marine Corps Reserve of foreign-born persons who have been naturalized less than 10 years will not be made. If the officer interviewing a candidate who has been naturalized less than 10 years considers the case exceptional and desires to recommend appointment, he should state fully his reasons therefor in his report to the Commandant of the Marine Corps.

(e) A civilian employee of the Marine Corps or Navy is not eligible for membership in the Organized or Volunteer Marine Corps Reserve, unless an officer is required in his present civilian position in time of war or emergency.

(f) The basic requisite for the existence of the Marine Corps Reserve is the immediate availability of its members for mobilization. It is therefore undesirable to accept individuals as members of the Marine Corps Reserve who, upon mobilization, would be required to sever

their connection with their normal civil occupation, provided such occupation be of a nature vital to the service of the armed forces.

§ 7.13-51 Eligibility for commission—

(a) *Meritorious noncommissioned officers.* (1) Meritorious noncommissioned officers of the Regular Marine Corps and Marine Corps Reserve may be commissioned second lieutenants in the Marine Corps Reserve, depending on the needs of the Service, provided they meet the following conditions:

§ 7.13-52 Eligibility for warrant.

Warrant officers may be appointed from noncommissioned officers of the Reserve and from civil life and will be required to pass a physical examination and present satisfactory evidence of their moral, mental, and professional qualifications. As evidence of moral character it will be necessary to furnish five letters from reputable citizens as to the character of the candidate. The professional qualifications required will be as prescribed in article 2-21 (2).¹

§ 7.13-53 Appointment. Persons appointed to commissioned grades in the Reserve will be commissioned to serve during the pleasure of the President. Warrant officers, aviation cadets, and midshipmen will be appointed to serve during the pleasure of the Secretary of the Navy.

(2) At least 2 years' service in the Organized Marine Corps Reserve, Naval Reserve, Army Reserve, Naval Militia, or National Guard.

(3) No previous military experience, upon authorization of the Commandant of the Marine Corps.

(e) *Term of enlistment, and extensions thereof.* The term of enlistment or reenlistment in the Marine Corps Reserve is 4 years. The enlistment or reenlistment may be extended in accordance with the regulations governing extensions of enlistment in the Regular Marine Corps. A minority enlistment is counted as 4 years' service. Any enlistment terminated within 3 months prior to its expiration is counted as a full term of service for which enlisted.

(f) *Physical requirements.* (1) The physical requirements for enlistment in or assignment to the Fleet, Organized, or Volunteer Marine Corps Reserve will be the same as those prescribed for enlistment in the Regular Marine Corps, except that waivers may be granted by the Commandant of the Marine Corps for enlistment in the Volunteer Marine Corps Reserve in the case of applicants whose physical defects are not such as to prevent them from performing limited duty on shore in the United States, or specialist duties. (See § 7.13-102 (b).)

(2) Particular attention is invited to article 2-121 (6)¹ which prescribes the maximum and minimum sizes of clothing for which applicants may be accepted and also the final provision which states that the applicant must be rejected if he cannot wear issue clothing.

(g) *Age limit.* To be acceptable for first enlistment in the Marine Corps Reserve, applicants must be not less than 17 nor more than 35 years of age, except that in cases where the applicant has served honorably in the Regular Marine Corps and in other exceptional cases, the upper age limit may be waived by the Commandant of the Marine Corps. The consent of wife or waiver of marriage by the Commandant of the Marine Corps is not required for enlistment. ¹ Article 2-121 (6), Marine Corps Manual, is available at Headquarters, U. S. Marine Corps, Washington, D. C.

(h) *Request for waivers.* Requests for waivers of physical defects or age limit will be forwarded to the Commandant of the Marine Corps for approval prior to enlistment. Requests for physical waivers will be submitted on NMC Form 588 in triplicate.

(i) *Reappointment to rank above private upon reenlistment.* Enlisted reservists above the rank of private who reenlist in the Marine Corps Reserve will be reappointed by the enlisting officer, upon reenlistment in the Reserve, to the rank and kind of warrant held when discharged. If assigned to a unit of the Organized Reserve, appointment to such rank will depend on vacancies in the authorized allowance of the organization to which assigned, except as provided in paragraph (m) of this section.

(j) *Former marines discharged on grounds of dependency.* F o r m e r Marines discharged on grounds of dependency may be enlisted in the Marine Corps Reserve without reference to the Commandant of the Marine Corps, provided they qualify in every other respect.

(k) *Compliance with article 2-115.¹* The provisions of article 2-115 will be complied with in all cases of men applying for reenlistment either from the Regular Marine Corps, the Marine Corps Reserve, or from other armed branches of the United States Services, except as provided in paragraphs (m), (n), (o), and (p) of this section.

(n) *Choice of station and assignment to active duty.* (1) Insofar as practicable, men enlisted in Class IV will be given their choice of initial station, within the Reserve District in which enlisted. Before enlistment, however, they will be informed that no definite promise of choice of station can be guaranteed them nor that they will remain permanently at their initial duty station.

(3) Assignments from recruit depots will be effected in accordance with instructions published by the Commandant of the Marine Corps.

(o) *Pay and allowances.* (1) The pay and allowances of members of Class IV will be governed by laws and regulations applying to other classes of the Marine Corps Reserve. Regardless of their rank, Class IV reservists, under the law are entitled to allowances for quarters and subsistence and to transportation of dependents and household effects in the same manner and under the same conditions as are authorized for men of the first three pay grades of the Marine Corps Reserve. However:

(i) Transportation of dependents and household effects is not authorized until assignment to permanent station has been made, recruit training being considered temporary duty.

(ii) Transportation of recruits from the place of enlistment shall be limited to the same class of transportation and sleeping car accommodations as are enlisted men of the Marine Corps of like grades.

(2) Men having dependents are entitled to commutation of quarters from the date of their enlistment, provided no Government quarters have been furnished them for their dependents. Commanding officers will inform these men of their rights under the law as set forth herein.

(p) *Enlistment of specialists.* (1) Men who possess special qualifications which can be utilized by the Marine Corps in time of war or national emergency, but who are not qualified for enlistment for general service by reason of age, physical defects, or the like, may be enlisted in the Marine Corps Reserve as "specialists" upon approval of the Commandant of the Marine Corps.

(2) Recommendation for the enlistment of a specialist will be made to the Commandant of the Marine Corps and will state his special qualifications in detail, as well as his disqualification for regular enlistment. If the disqualification is due to a physical defect, report of rejection on Form NMC-588 will accompany the recommendation.

(3) Men enlisted for specialist duties will be assigned to Class V (b), Volunteer Marine Corps Reserve (see § 7.13-20 (e)), and the face of the service-record book will be plainly marked to show the special qualification for which enlisted, as "Stenographer," "Mechanic," "Radio technician," etc.

NOTE 1: For administrative designation of specialist reservists, see § 7.13-10 (a) (2).

PROMOTION

§ 7.13-60 *Method of promotion for officers*—(a) *Second lieutenants, first lieutenants, and captains.* Second lieutenants, first lieutenants, and captains shall be promoted by seniority to the next higher rank when eligible and qualified physically, mentally, morally, and professionally for promotion.

(b) *Major and above.* Officers of the rank of major and above shall be promoted only upon the recommendation of a selection board, in the order selected by the board, when their running mates in the Regular Marine Corps are promoted, subject to physical, mental, moral, and professional examinations. The date of rank on promotion of such selected officers will be the date of rank on promotion of their running mates in the Regular Marine Corps, except that in no case shall such date of rank antedate the date of the vacancy in the grade to which promoted in the Marine Corps Reserve.

(c) *Running mates.* For the purposes of eligibility for selection and for promotion, each Reserve officer of the rank of major and above will be assigned as a running mate the officer of the same rank in the Regular Marine Corps whose date of rank is the same or nearest subsequent date of rank. Each such Reserve officer shall become eligible for consideration for selection when his running mate in the Regular service has been selected for promotion.

§ 7.13-61 *Selection boards.* Selection boards will be convened by the Secretary of the Navy, from time to time, as may be required. Each such board will be composed of not less than five officers of or above the grade for which selections are to be made, one of whom may be an officer of the Marine Corps Reserve. Selection boards shall make recommendations for promotion to the grades of lieutenant colonel, colonel, and brigadier or major general in numbers not exceeding those directed by the Secretary of the Navy.

§ 7.13-62 *Eligibility for promotion of officers.* In time of peace, officers of the Marine Corps Reserve will be eligible for promotion as follows:

(a) *Second Lieutenants.* Upon completion of 3 years in grade.

(b) *First Lieutenants.* Upon completion of 4 years in grade.

(c) *Captains.* Upon completion of 5 years in grade.

(d) *Majors, lieutenant colonels, and colonels.* Officers of and above the rank

of major shall become eligible for promotion when their running mates become eligible for selection for promotion.

§ 7.13-63 *Examination for promotion of officers*—(a) *General.* When a Reserve officer is eligible for promotion, he will be examined to determine his physical, mental, moral, and professional fitness.

(b) *Physical and mental.* Physical and mental examinations will be conducted in accordance with §§ 7.13-66 (b) (1) and 7.13-101.

(c) *Moral.* The board will inquire into the moral character of the candidate to determine his moral fitness. It may call witnesses, question the candidate, or afford him opportunity to submit a statement relative to unfavorable matter on his record.

(d) *Professional.* The Marine Corps Reserve Examining Board will determine the candidate's professional qualification for promotion by an examination, appropriate to his rank and duty, based on the specified correspondence course as prescribed in § 7.13-121 (b) (4); or if exempted therefrom, by the provisions of § 7.13-65. The examining board may exclude from the examination any sub-course of the prescribed course which the candidate has completed.

(e) *Deficiency in professional qualifications.* When an officer of the Marine Corps Reserve becomes due for promotion and has not qualified professionally by the completion of the required correspondence course, the Director, Personnel Department, will address a letter to said officer requesting information as to whether or not the officer desires to be examined professionally for promotion. If he does not so desire to be examined, this notification and rejection by said officer of the opportunity for this examination will be considered as one failure of examination for promotion, and appropriate action in his case will be taken by the Commandant of the Marine Corps as set forth in § 7.13-66 (b) (3).

§ 7.13-64 *Examining boards.* (a) (1) Recommendations for appointment of offices of the Marine Corps Reserve shall be made by the Director, Personnel Department, who will certify to the Commandant of the Marine Corps that, in accordance with regulations and the instructions issued by that officer, the applicant is mentally, morally, and professionally qualified for appointment; *Provided*, That no applicant be initially appointed in the rank of lieutenant colonel or above except upon recommendation therefor by a selection board.

(2) Examinations for promotion of officers of the Marine Corps Reserve shall be conducted by boards appointed by the Commandant of the Marine Corps and in accordance with instructions issued by that officer, who is authorized to act on the reports of such boards. The examining boards will follow the procedure outlined in Naval Courts and Boards, with such modifications as may be prescribed by the Commandant of the Marine Corps.

(b) Supervisory examining boards will be appointed by the Commandant of the Marine Corps, or by his authority, and will function as prescribed in Naval Courts and Boards for regular officers, with such modifications as the Commandant of the Marine Corps may prescribe.

§ 7.13-65 *Exceptions to prescribed professional examination requirements.* In lieu of examination, the Marine Corps Reserve Examining Board may determine the candidate's professional qualification by:

(a) Satisfactory completion of a correspondence course, appropriate to the rank and duty for which he is a candidate for promotion, as prescribed in § 7.13-121 (b) (4); or

(b) Completion of 1 year of syllabus training in grade as a pilot; or

(c) One year's continuous active duty in grade; or

(d) Two years' duty in grade with an organized unit and attendance at two annual training camps; or

(e) Graduation from the Reserve officers class, Marine Corps Schools (second lieutenants only); or

(1) Three for promotion to first lieutenant;

(2) Two for promotion to captain, major, or above.

§ 7.13-66 *Failure to qualify for promotion*—(a) *Failure to be selected.* Officers twice passed over for selection for promotion will be placed on the honorary retired list.

(2) *Morally.* An officer who fails to qualify morally shall be discharged from the Marine Corps Reserve in accordance with § 7.13-111.

(3) *Professionally.* An officer who fails to qualify professionally may be honorably discharged or, in the discretion of the Commandant of the Marine Corps, be suspended from promotion for a period of 1 year from the date of his examination, with the loss of 1 year's numbers from the date he originally became due for promotion. Should he then qualify, his loss of numbers will be that of all officers of his rank, junior to him, who have been promoted during the year. At the end of 1 year should he fail to qualify upon reexamination, he shall be honorably discharged (see § 7.13-111), placed on the honorary retired list (see § 7.13-113), or retained in the Marine Corps Reserve as an extra number in grade until attaining 40 years of age in the grade of second lieutenant or first lieutenant; 46 years of age in grade of captain; 52 years of age in the grade of major; or 58 years of age in the grade

of lieutenant colonel; at which time he shall be honorably discharged or placed on the honorary retired list (34 U.S.C. 855g). While so serving as an extra number in grade, he may request reexamination and, if and when so qualified, may be reassigned to the regular lineal list with a consequent loss of numbers.

§ 7.13-68 *Temporary commissions, Class I.* When a vacancy exists in an organization in which no officer of appropriate rank is available, the commanding officer may recommend to the Commandant of the Marine Corps the temporary promotion of an officer to fill such vacancy. With the approval of the Commandant of the Marine Corps the officer recommended will be temporarily commissioned in the higher grade, subject to physical qualification, and will be carried as an extra number in such grade. His commission will be confirmed, if he is found qualified at the time he is due for promotion. If he fails to qualify, the provisions of § 7.13-66 apply. Temporary commissions may be revoked by the Commandant of the Marine Corps for sufficient cause. If relieved from his unit by reason of transfer, after 4 years' satisfactory service in grade therein, he will be carried as an extra number in grade until eligible for permanent commission, at which time his commission will be confirmed if he is found qualified; otherwise, the provisions of § 7.13-66 apply.

§ 7.13-69 *Promotion in time of war or national emergency.* (a) In time of war or national emergency, officers on the active list of the Marine Corps Reserve employed on active duty shall be advanced in grade in the same manner as prescribed for officers of the Regular Marine Corps. When so advanced they shall take precedence among themselves and with other officers of the Marine Corps in accordance with date of such advancement or promotion.

(b) No officer of the Marine Corps Reserve shall be advanced to a higher rank until he has qualified therefor by such physical, mental, moral, and professional examinations as the Secretary of the Navy may prescribe.

(c) Promotion or advancement: For the effective date for pay purposes see article 24-59 (2).¹

(d) The above provisions do not apply to officers who have been, or may hereafter be, retired from the Marine Corps Reserve.

§ 7.13-70 *Promotion of aviation cadets.* (a) Aviation cadets may, if qualified after completion of training, be commissioned second lieutenants in the Marine Corps Reserve. (See § 7.13-182).

(b) Second lieutenants commissioned from aviation cadets may, after 3 years' service as such and if found qualified after examination, be commissioned first lieutenants.

§ 7.13-71 *Promotion of warrant officers.* Warrant officers will be eligible for promotion to chief warrant rank upon

the completion of 6 years of service from date of rank. They will be examined for chief warrant rank in accordance with article 6-3.¹

(d) *Promotion in time of war.* In time of war or national emergency enlisted men of the Marine Corps Reserve employed on active duty will be promoted under the same regulations as those applying to enlisted men of the Regular Marine Corps.

INTERCLASS TRANSFER

§ 7.13-90 *General.* (a) Officers and enlisted men whose services are determined to be of greater value to the Government in time of war, in present civilian occupation than they would be if mobilized as reservists, will be discharged, but without prejudice to their later reappointment or reenlistment in the rank held at the time of discharge, provided they are qualified in accordance with current regulations.

(b) Transfer in case of waivers. Reservists who were granted waivers of physical defects or over age for appointment or enlistment in the Marine Corps Reserve, will not be transferred to the Organized Marine Corps Reserve except upon approval of the Commandant of the Marine Corps.

specific authority of the Commandant of the Marine Corps.

§ 7.13-92 *Enlisted men*—(a) *To Class II (b)*. (b) *From Class II (b)*. Commanding officers of battalions or squadrons are authorized to transfer members of Class II (b), Organized Marine Corps Reserve, from their commands to Class III, on request of the member concerned, or by reason of removal from company or unit station, or inability to attend drills or to train.

(e) *To Class IV*. Transfer to Class IV, Limited Service Marine Corps Reserve, from any other class will be effected only upon authority of the Commandant of the Marine Corps. Application for transfer to Class IV must be made via official channels, and must be accompanied by certificate of a medical officer, that the man concerned is not considered physically fit for combat duty, but meets the reduced physical standards for assignment to Class IV. The nature and degree of physical defects must be stated. The age of the applicant and existing vacancies in the Limited Service Marine Corps Reserve are governing factors in the consideration of such requests.

(f) *From Class IV*. Men enlisted in Class IV will not be transferred from that class except upon their own written request and approval of the Commandant of the Marine Corps. Requests for transfer will be made via official channels and will be accompanied by proof of qualification for assignment to the class to which transfer is desired. Men transferred from Class IV will not be eligible for the benefits as provided by law for

the Limited Service Marine Corps Reserve. This should be explained to each man who requests such transfer.

(g) *From Class V (b)*. Members of Class V (b) will not be transferred from that class nor, when on active duty, from the organization and duty to which assigned, except upon specific authority of the Commandant of the Marine Corps.

§ 7.13-100 *Physical standards*. The physical standards prescribed for the Marine Corps Reserve are the same as those prescribed for the regular Marine Corps, with due consideration however for age in grade and the character of duty to be assigned in the event of war or national emergency.

§ 7.13-101 *Physical examination of officers*—(a) *When required*. All officers of the Marine Corps Reserve shall be examined physically as follows:

(1) Quadrennially, or more often if deemed necessary.

as necessary to determine whether or not his health has been adversely affected by such duty.

(3) *Repeated training duty*. (f) *For transfer to Class II*. Officers will be examined physically and found qualified for active duty prior to being transferred to Class II.

(g) *Special examinations*. Special examinations and examinations by boards of medical survey may be ordered as required or at the request of a Reserve officer, to determine his fitness for retention, retirement, discharge, or other disposition. Reserve officers on continuous active duty shall report for physical examination annually in accordance with the requirements for officers of the Regular Marine Corps.

(h) *By whom conducted*. (1) Physical examinations for appointment and promotion shall, if practicable, be conducted by statutory boards of medical officers composed of medical officers of the Regular Navy, or the Naval Reserve, or of both. If impracticable to assemble the required board without incurring mileage or other expense, the physical examination may be conducted by one medical officer of the Regular Navy or of the Naval Reserve, or if this be impracticable the Commandant of the Marine Corps will direct the method by which the examination may be conducted. When the examination is not conducted by a statutory board, the report of medical examination, together with the medical history of the candidate on file with the Department, will be acted upon by the medical members of the Marine Corps Reserve examining board.

(2) Quadrennial physical examinations and physical examinations for transfer to Class II, and for active or training duty, and release therefrom, with or without pay, shall be conducted by a medical officer of the Regular Navy or Naval Reserve, if available. If no such medical officer is available without incurring mileage or other expense, such examinations may be conducted by a medical officer of the Army, Army Reserve, Public Health Service, Veterans' Administration, or in special cases by a reputable physician. Reports of such

examinations are received by the Bureau of Medicine and Surgery, together with the medical history of the officer on file in the Department.

(3) Physical examinations for duty involving the flying of aircraft shall be conducted by an officer of the Regular Navy or Naval Reserve who is qualified and designated to conduct such examination.

Health records of members of organized units of the Reserve will be kept at the headquarters of such units, and those of all other members of the Reserve will be kept at the headquarters of the Reserve district to which the reservists concerned are attached.

(b) *Entries in health record.* The result of every physical examination shall be entered in the reservist's health record and will become a part of his medical history. Should health record be not available for such entry, report will be made to the officer in whose charge the record may be, for attachment thereto or entry by him.

(c) *Report of physical examination of all officers.* (1) The results of all physical examinations of officers, other than those for appointments and duty involving flying in actual control of aircraft, shall be prepared on Bureau of Medicine and Surgery Form Y, in duplicate, and forwarded to the Bureau of Medicine and Surgery via the commanding officer concerned and the Commandant of the Marine Corps.

(e) *Purpose of examination indicated on report.* The Form Y or NMS-1 should clearly indicate the purposes of the examination at the top of the form.

(f) *Recommendations when not physically qualified.* If a reservist is found not physically qualified, the commanding officer concerned and the Commandant of the Marine Corps shall make appropriate recommendation as to retention, waiver, discharge, or transfer to the honorary retired list or to another class.

§ 7.13-104 *Vaccination and typhoid prophylaxis*—(a) *Class II.* (1) Marine Corps Reserve personnel shall be vaccinated and have typhoid prophylaxis administered in accordance with the provisions of the Medical Department Manual, United States Navy, when assigned to the Organized Marine Corps Reserve, or as soon thereafter as practicable. (2) Upon reporting for active or training duty, members of Class I and Class III will be vaccinated and inoculated in accordance with the provisions of the Medical Department Manual, United States Navy, unless their health records indicate that such medical service has already been rendered.

Instructors shall prepare and deliver such lectures and assist in the planning and execution of instructions of both officers and men, as may be practicable, upon the request of commanding officers. As an inspector, the Inspector-Instructor is a direct representative of the Commandant of the Marine Corps, and as such his duties include the requirement to ascertain by inspections that required standards are met relative to troops, armory, Government property, records, etc. All inspections should be made with a view toward the correction of errors and mistakes, and compliance with regulations, orders, and instructions. (b) *Change sheets.* Change sheets will be accomplished and forwarded in accordance with art. 10-17,¹ except that local changes in the address of Class II (b) and Class III (b) will not be shown. (d) *Report of death.* Upon notification of the death of a reservist, the organization or Reserve district commander concerned will, if possible, procure a death certificate from the authorities where the death occurred and forward it to the Director, Personnel Department. When a reservist dies, while on active duty or training duty, the same procedure will be followed as prescribed for the Regular Marine Corps.

§ 7.13-148 *Individual reports*—(a) *Officers employed by the Civilian Conservation Corps.* Officers of the Marine Corps Reserve who are employed by the Civilian Conservation Corps in a civil status will submit a report to the Commandant of the Marine Corps, via their

commanding officer or Reserve district commander, giving the following information: Date of employment with the Civilian Conservation Corps; name and place of duty; nature of duty, such as camp or company commander, exchange officer, mess officer, or other duties assigned; together with any pertinent information which should be made a part of the officers' military record.

(b) *Change of address.* Reservists will report any change in home address to their organization or district commander. If change of address is permanent, and is in another Reserve district, the district commander or organization commander will transfer the staff returns and all records of the reservist concerned to the headquarters of the organization or district to which transferred. and probable duration of the absence from the United States or nonavailability, to the organization or Reserve district commander concerned. When residing outside the United States for indefinite periods, members of the Marine Corps Reserve must report their addresses to the nearest U. S. (c) *Restrictions—*(1) *On active or training duty.* Pay for drills, equivalent instruction or duty, appropriate duties, or for administrative duties, shall not accrue to any officer or enlisted man during a period when he shall be lawfully entitled to pay for active or training duty.

(2) *Pensions, disability allowance, etc.* No member of the Marine Corps Reserve

is entitled to compensation for active duty, training duty, for performing drills, equivalent instruction or duties, appropriate duties, or administrative duties, or for uniform gratuity, who may be drawing a pension, disability allowance, disability compensation, or retired pay from the Government of the United States, and "retired pay" as here used shall not include the pay of transferred members of reserve forces of the United States. (See annual naval appropriation act.)

(3) *Sundays, holidays, etc.* Compensation is not payable for drills held on a legal holiday, as defined in article 330, Navy Regulations, nor for drills held during the weeks in which fall Thanksgiving Day or Christmas Day. This restriction, however, does not apply to appropriate duty and equivalent instruction or duty. Officers and enlisted men of the Marine Corps Reserve shall receive compensation for all regular authorized drills performed on Sunday.

(d) *Fraudulent enlistment.* (1) Fraud is a willful concealing of facts that would, if known, disqualify the individual from enlisting in the Marine Corps Reserve, and, unless the Government, with knowledge of the fraud, waives its rights and permits the contract of enlistment to stand, no payments of pay or allowances may be made to the individual subsequent to the discovery of the fraud.

(2) Therefore, no individual will be certified for pay or allowances, subsequent to the actual knowledge or suspicion of fraud. Pay rolls will show in remarks "Presumption of fraudulent enlistment," and any amounts due the individual will be shown as "Due and unpaid," until such time as final disposition is made of the case by competent authority.

(3) It shall be the duty of the commanding officer, upon receiving information of a presumption of fraud, to immediately notify the paymaster carrying the accounts of the organization to which the individual is attached, by letter, that there is a presumption of fraud in his case.

§ 7.13-151 *Payment to reservists—*(a) *First payment to members of Class I (a) and Class I (e).* When an officer is appointed and assigned to class I (a) or a man is enlisted and assigned to Class I (e), the Reserve district commander, or other proper commanding officer, will certify to the Paymaster, Marine Corps, such individuals for annual advance payment of \$20.

(b) *First payment of men transferred to Class I (e).* The first annual payment of men transferred from the Regular Marine Corps to Class I (e) will be made as prescribed in article 4-25 (3).¹

(c) *Certification for pay of members of Class I (a) and I (e).* On or about the first of each month Reserve district commanders, or other proper commanding officers, will certify to the Paymaster,

¹Article 4-25 (3), Marine Corps Manual, is available at Headquarters, U. S. Marine Corps, Washington, D. C.

Marine Corps, for payment, all members of Class I (a) and I (e) who were due for an annual advance payment of \$20 during the preceding month, giving names, addresses, and anniversary dates. Prior to certifying members of Class I (a) and I (e) for payment, district commanders or other proper commanding officers will obtain a certificate from each man who is due for an anniversary payment to the effect that he is not drawing a pension, disability allowance, disability compensation, or retired pay from the United States Government, and district commanders will state in their certificate to the Paymaster that each individual has certified as herein. The Reserve district commander will enter "Certified for anniversary payment (date)" in the service-record book of each man so certified. The proper disbursing officer of the Paymaster's Office, Headquarters, Marine Corps, will make a card payment of \$20 (but not before the anniversary date), forwarding the check to the payee direct. After payment, the Paymaster will inform the certifying officer of the check number and date of payment. The right of a member of Class I (a) or I (e) to receive and retain the advance payment of \$20 per annum is not affected by reason of active duty performed during his period of assignment to Class I (a) or I (e) (6 Comp. Gen. 19).

(d) *Payment of Class I reservists.* Payments to transferred and assigned members of the Fleet Marine Corps Reserve will be made, except as provided for by chapter 4,¹ by the Paymaster, Retired and Reserve Allotment Section, Headquarters, U. S. Marine Corps. Checks covering such payments will be mailed to reservists direct.

(e) *Paymaster to be notified of transfers.* The Reserve district commander will promptly notify the Paymaster, Retired and Reserve Accounts, Headquarters, U. S. Marine Corps, Washington, D. C., by change sheet, showing new address of reservist, of all transfers of Class I reservists from his reserve district to another reserve district.

(f) *Designation of disbursing officers.* Compensation for drills, equivalent instruction or duties, appropriate duties, or administrative duties, will be paid on the basis of the fiscal quarter, by the Disbursing Officer, Paymaster Department, in the Pay Area in which the headquarters of the Reserve organization is located. The boundaries of the various pay areas are published in circular letters by the Paymaster. Paymasters paying drill pay rolls of Organized Marine Corps Reserve battalions and Reserve aviation squadrons when preparing the transcript, will make an extra copy (Form NMC-434-J) and forward it to the Director, Personnel Department, Headquarters Marine Corps, Washington, D. C.

(g) *Transmission of checks.* Checks for compensation, other than pay and allowances while on active or training duty, will be transmitted direct to the commanding officer of the battalion,

company, battery, or aviation squadron to which the reservist is attached.

(h) *Disposition of checks not delivered.* (1) In the event of the reservist's transfer prior to receipt of check the commanding officer will return the check to the issuing paymaster together with the reservist's recorded address. Checks in the cases of officers and men transferred during the quarter to Class I or Class III, will be mailed by the paymaster direct to the reservist concerned to the address as shown in the remarks on the pay roll.

(2) If, after the drill roll is rendered, and prior to the delivery of the check, it is discovered that the man is in debt to the Government, or for any other reason should not be paid, the check will be returned to the disbursing officer.

(3) The disbursing officer concerned will furnish a schedule of checks mailed to an organization commander, showing the number, date, payee, and amount of check, the payee to sign his name and date of receipt opposite these entries. Upon completion of the schedule it is to be returned to the disbursing officer (Standard Form 1025 may be adapted to this use).

(4) Checks received by reserve organizations, and not delivered to the payee within 15 days from the date of receipt, will be returned to the disbursing officer with a statement of the reason for non-delivery in each case. In case checks are returned, the disbursing officer will make one final attempt to pay the man by mailing his check to the last-known address.

§ 7.13-152 *General instructions for pay roll*—(a) *Basic unit for pay purposes, Class II.* For purposes of rendition of organization pay rolls either for pay while on active or training duty, or for drill pay, the company or battery will be considered the basic unit of a Marine Corps Reserve line organization. For such purposes, the squadron will be considered the basic unit of a Marine Corps Reserve aviation organization. Commanding officers of such basic units will prepare and submit pay rolls as prescribed in the following paragraphs of this section.

(b) *When and how submitted*—(1) *While on active or training duty.* Pay rolls will be submitted when prescribed by the Paymaster, in accordance with, and on the same forms as prescribed for the Regular Marine Corps. When due for discharge while on active duty or training duty, Form NMC 90 will be rendered as prescribed for the Regular Marine Corps.

(2) *For the purpose of drill, equivalent instruction or duty, appropriate duty, and administrative duty pay.* Pay rolls will be prepared quarterly on Forms NMC 891, NMC 891a, and NMC 891c, as soon after the close of the quarter as possible, and submitted to the disbursing officer, in quadruplicate, by mail. Pay rolls should never be folded, but mailed either flat or rolled in mailing tubes.

(c) *Number of copies.* The pay roll will be prepared in quadruplicate (on the typewriter when practicable) and certi-

fied by the commanding officer of the unit or other commissioned officer acting in his absence.

(d) *Return of quadruplicate.* The disbursing officer will, after audit has been completed, compare the quadruplicate copy of the pay roll with the original, enter on the quadruplicate all corrections noted on the original, and return the quadruplicate copy to the organization for its files.

(e) *Notes*—(1) *Special.* Since the pay roll is the record in which reference is made in the adjustment of claims and other questions affecting those whose names are borne thereon, it is important in its preparation that nothing be omitted which properly pertains to the complete understanding of the status of the officer or man as affecting his pay, and in case of doubt an entry will always be preferable to an omission.

(2) *General.* The word "drill" wherever used in these instructions refers only to drill for which pay is claimed. Drills performed, which for administrative reasons are not to be claimed as "pay drills," will not be referred to on the pay roll.

(f) *All members attached to command to be shown.* (1) All officers and enlisted men attached to a command on the first day of the quarter (whether to be paid or not) must be shown on the pay roll for such period of the quarter as so attached.

(2) *Arrangement.* Those attached at the end of the quarter will appear in the body of the roll arranged according to rank; alphabetically in each rank, and numbered consecutively beginning with the number one (1) at the top of the first page.

(3) *Separations.* Those who become separated during the quarter for any cause will be shown on the back of the roll immediately following those attached under an appropriate heading, e. g., "Died," "Detached," "Transferred," "Discharged," "Retired," "Resigned," etc., and numbered separately under each heading. (See paragraph (n) (3).)

(4) *Accounts not extended.* Those separated to join other active organized units rendering drill pay rolls will not have their accounts extended into the ruled columns "Credit," "Debit," and "Amount due," but otherwise they will be stated in full. (See paragraph (n) (3) of this section.)

(5) *Extensions.* Those separated for all other causes will have their accounts extended in full including "Amount due." Where enlisted men are transferred to Class III, Volunteer Marine Corps Reserve, the remarks will show the address of the reservists so as to enable the paymaster to forward the check direct to the reservist concerned. (See paragraph (n) (3) of this section.)

(g) *Transfer of pay date on separation.* Where separations are effected, under paragraph (f) (4) of this section, the new unit commander concerned will be fully informed immediately of the individual pay status of the reservist concerned on Transfer of Pay Data Form as prescribed in § 7.13-153. The information shown on Transfer of Pay Data

¹ Chapter 4, Marine Corps Manual, is available at Headquarters, U. S. Marine Corps, Washington, D. C.

Form will agree with that shown on the pay roll from which transferred, as required by paragraph (n) (3) of this section.

(h) *Ruled spaces.* (1) Spaces have been ruled off for convenience in the preparation and subsequent audit of the pay roll to permit of 15 drills within a quarter. In these spaces the date upon which a drill is performed will be placed in such a manner as to bring the same date in each succeeding account directly under the same date in each preceding account. Drills should not be totaled at the bottom of the page, nor is it necessary to complete the summary on the cover sheet.

(2) Only dates of drills performed with the organization for which the roll is being submitted will appear in the ruled spaces. Drills performed with other organizations will be shown under "Remarks" only. (See paragraph (n) (1) of this section.)

(i) *Certificates*—(1) *Company.* The certificate of the unit commanders will be properly signed on the original of the pay roll in every case prior to submission of the roll to the proper disbursing officer for payment.

(2) *Battalion.* The certificate of the battalion commander will be required only if and when administrative-duty pay is claimed on the pay roll where the battalion commander is next superior in command of the claimant.

(3) *Inspector-instructor.* The certificate for inspector-instructor will be required only if and when administrative-duty pay is claimed upon the pay roll and there is no next superior officer attached to the command.

(j) *Front and back of sheet.* The pay-roll sheets have a front and back. The wide margin is to the left on the front and to the right on the back. Care should be used to prevent accounts belonging on the front being put on the back and vice versa, in order to permit easy binding into permanent records.

(k) *Pages to be identified.* Each page has at the top spaces provided for numbering, for the name of the organization, and the period for which the roll is rendered. These spaces will be filled out on every page to identify the page in the event it should become separated from the remainder of the roll.

(1) *Name, how shown.* The name will be shown, surname first (all capitals), then first name and middle initial.

EXAMPLE: JONES, Robert B.

(m) *Remarks to be shown.* (1) All changes of rank.

(2) All authorized checkages or back credits.

(3) All dates of enlistment and reenlistment.

(4) All extensions of enlistment.

(5) All facts affecting the pay status of reservists joined from or transferred (detached) to other organizations, or otherwise separated.

(6) All other facts affecting the pay of every officer or enlisted man appearing on the pay roll necessary to support the entries under "Credits" and "Debits."

(7) Inclusive dates between which active or training duty was performed.

(8) Presumption of fraud.

(n) *Guide for entry of remarks.* The minimum remarks to support the ordinary routing entries are herewith indicated as a guide. No additional remarks should ordinarily be needed. Periods will not be used after abbreviations for entries in pay rolls. Each entry will be started with a capital letter. For authorized abbreviations, see current Marine Corps Order.

(1) *Where the account of a reservist not appearing on the previous roll is entered.*

(o) *Authorized checkages.* Any overpayments resulting from any cause must be checked, from any sums claimed due from the United States, before payment may be made. Lost, destroyed, or damaged Government property is an authorized checkage if responsibility is acknowledged by the persons to be checked, or the responsibility is determined by a board of survey. For reservists not on continuous active duty, clothing is classed as Government property the same as equipment. Overpayments or short-checkages resulting from administrative analyses will be adjusted by the disbursing officer paying the account, and an explanation thereof furnished the commanding officer for his information. In the case of a reservist checked for lost, destroyed, or damaged Government property, the "Remarks" will show: "Ckd \$---- for PP per req (Name of officer requesting checkage) dated ---- 19--" in the column headed "Item" on blank line, enter "For PP." In the column headed "Debit" on the same line enter the amount. Where such adjustments produced an overpayment the amount of the overpayment will be entered in the "Amount Due" Column and will be plainly marked in red ink "Overpaid \$-----" by the disbursing officer.

(p) *Credits.* (1) Drill pay will be entered on the pay roll showing the dates on which the drills were performed in the ruled spaces. (See paragraph (h) of this section)

(2) *Equivalent instruction or duty pay.* Equivalent instruction or duty will be entered on the pay roll by showing in remarks "EIOD (date or dates)" and, in the space provided for showing the drill date, the letters "EIOD" will be entered.

(3) *Appropriate duty pay.* Appropriate duty pay will be entered on the pay roll by showing in remarks "perf appro d auth CMC ltr dated ---- 19--" and in the ruled spaces the dates upon which the appropriate duties were performed. When the appropriate duty is performed in increments, the date on which the period of appropriate duty is completed will be shown in the ruled space provided for date. A certified copy of the letter authorizing the performance of appropriate duty will be filed with the first pay roll on which credit is claimed.

(4) *Flight pay.* Flight pay will be shown on the pay roll by entering on the first blank line in the individual's pay account "ft pay" and opposite thereof under "Credits," the amount of such flight pay. Form NMC 944, Flight Certificate and Schedule for members of the Organized Marine Corps Reserve, will be submitted with the pay roll to support credit for flight pay.

(5) *Administrative duty pay.* Administrative duty pay will be shown on the pay roll by entering in "Remarks": "Faithfully perf adm d as CO (Name of organization) fr ----- 19-- to ----- 19--."

(6) *Miscellaneous credits.* Short credits or overcheckages noted in the administrative analyses of account will be adjusted by the disbursing officer paying the account, and an explanation furnished the commanding officer for his information. In case an error is discovered by the commanding officer after payment has been made, adjustment will be made on subsequent pay roll and the "remarks" will show: "Cred \$---- for (Explain nature of credit)."

(q) *Responsibility of commanding officers.* Commanding officers or other commissioned officers who sign certificates relative to pay, are held to be peculiarly responsible for payments made on the strength of such certificates.

(r) *Doubtful payments.* A disbursing officer is not authorized to make payments in cases involving disputed questions of law or fact, the proper procedure being to send all such cases to the General Accounting Office, Claims Division, for direct settlement.

(s) *Ditto marks.* The use of the word "ditto" or ditto marks ("") on a pay roll is prohibited.

(t) *Red ink.* The use of red ink on a pay roll is prohibited, except by the office of the disbursing officer paying the roll.

(u) *Credits from prior enlistments prohibited.* Amounts due from a prior enlistment should not be credited in a subsequent enlistment. The individual concerned should be advised of his right to make claim on the General Accounting Office.

(v) *Units disbanded.* Whenever an organization is disbanded and the officers and men are transferred to other organizations, a pay roll for the organization disbanded will be prepared for the fraction of the quarter elapsed prior to disbandment, the transfer pay roll to show the data required by paragraphs (f) (4) and (n) (3) of this section, as may be appropriate.

§ 7.13-153 *Transfer of pay data—*
(a) *Instructions.* The form prescribed in paragraph (b) of this section will be prepared in triplicate in cases of transfer of any reservists.

(1) When transferred to another unit of the Organized Reserve, the original and duplicate will be forwarded to the reservist's new commanding officer, who will file the duplicate with the pay roll for file in the office of the disbursing officer paying the roll. The triplicate will be retained in the files of the originating office.

(2) When transferred to the Volunteer Reserve, the original and duplicate will be securely attached to the "Pay Account Record" page of the service record for future use in the event the reservist is retransferred to the Organized Marine Corps Reserve during the same fiscal year.

(3) The form is furnished as a guide for organizations in preparing transfer pay data. The form will not be fur-

C. 853e, as amended by section 8, Naval Aviation Personnel Act of 1940) for the Reserve Forces of the United States, and shall, when traveling under orders, or under competent authority, receive transportation in kind, mileage, or actual expenses as provided by law for travel performed by officers of the Regular Marine Corps. For the purpose of computing increases in pay of commissioned officers on account of length of service, active service in grade of aviation cadet shall be considered as commissioned service.

(2) *Pay periods:* when Reserve officers, exclusive of chief warrant officers, are authorized by law to receive Federal pay, those serving in grades corresponding to those of colonel, lieutenant colonel, major, captain, first lieutenant, and second lieutenant shall receive the pay of the sixth, fifth, fourth, third, sec-

(b) *Chief warrant officers, warrant officers, and enlisted men.* Chief warrant officers, warrant officers, and enlisted men of the Marine Corps Reserve, including those on the honorary retired list, or who may have been retired, when employed on active or training duty, with pay, or when employed in authorized travel to and from such duty, shall receive the same pay and allowances as received by chief warrant officers, warrant officers, and enlisted men of the Regular Marine Corps of the same rank and of the same length of service, which shall include active service in the Regular Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service; and active service, other than for training, in the Naval Militia and National Naval Volunteers; active service, other than for training, prior to June 30, 1925, in the Naval Reserve, Marine Corps Reserve, and the National Guard. No chief warrant officer promoted to other commissioned grade or warrant officer promoted to chief warrant officer or other commissioned grade shall suffer any reduction of pay by reason of such promotion. All periods, whether active or inactive, during which chief warrant officers have held commissions in the Marine Corps Reserve shall be included in computing their pay as provided in the act of February 16, 1929 (45 Stat. 1186; 37 U.S.C. 5) (Comp. Gen. B-12441, Feb. 6, 1941).

(c) *Beginning and termination of active and training duty pay.* (1) The pay and allowances to which officers and enlisted men of the Naval Reserve are entitled while on active or training duty begin on the date when between the hours of two successive midnights they entrain, and end on the date when between the hours of two successive midnights they could reach their homes, following detachment under orders, over the shortest usually traveled route (7 Comp. Gen. 100).

(2) Released from active duty. When an officer of the Marine Corps Reserve is ordered home, and, upon arrival, to assume an inactive status, pay and allowances, including pay and allowances for the time necessary to travel to his home, will be credited and paid on the current pay voucher prior to his departure from his active duty station.

(d) *Pay for the 31st day of any month.* When officers and men of the Marine Corps Reserve perform active duty or training duty for periods of 30 days or less, such duty performed on the thirty-first day of any month shall be paid for at the same rate as for any other day (34 U.S.C. 853e).

(e) *Aviation.* Officers and enlisted men, while employed on active or training duty, with pay, which involves actual flying in aircraft, shall receive the same increase of pay of their ranks as may be received by officers and enlisted men in similar ranks in the Regular Marine Corps for the performance of similar duty (34 U.S.C. 853e).

(f) *Payment.* Pay and allowances of officers and enlisted men of the Marine Corps Reserve on active or training duty will be paid by subordinate officers of the Paymaster Department in accordance with instructions issued by the Paymaster, United States Marine Corps.

§ 7.13-155 *Uniform gratuity*—(a) *When eligible.* In time of peace, upon first reporting for active or training duty, with pay, at a location where uniforms are required to be worn, or after the authorized performance of fourteen drills, a commissioned or warrant officer of the Marine Corps Reserve shall be paid a sum not to exceed \$100 as reimbursement for the purchase of the required uniforms. Thereafter he shall be paid an additional sum of \$50 for the same purpose upon the completion of each period of not less than 4 years in the Marine Corps Reserve. The last-named amount of \$50 shall not become due any officer until he has completed not less than 150 drills or periods of other equivalent instruction or duty or appropriate duties and 56 days' active or training duty or 75 drills and 84 days' active or training duty, or 112 days' active or training duty. Any officer who has heretofore received a uniform gratuity shall not be entitled to a further uniform gratuity, except in time of war or national emergency, until the expiration of 4 years from the date of the receipt of the last gratuity. Reserve officers will become entitled to the uniform gratuity mentioned above only after they have provided themselves with the uniform and equipment prescribed for them (34 U.S.C. 855a). (b) *During war or national emergency.* In time of war or national emergency a further sum of \$150 for the purchase of required uniforms shall be paid to officers of the Marine Corps Reserve when they first report for active duty. The purchase of uniforms in this latter case is not a prerequisite.

(c) *Payment of uniform gratuities.* (1) When any of the above conditions, with respect to the \$100 and \$50 uniform gratuities have been met, claim will be submitted on Form NMC-890 and NMC-890a to the Paymaster, Headquarters, U. S. Marine Corps, Washington, D. C., for payment.

(2) The payment of the \$150 uniform gratuity to former aviation cadets under section 11, Act of August 4, 1942, or the payment of the \$150 uniform gratuity to commissioned and warrant officers upon first reporting for active duty in time of war or during a national emergency under the last proviso of section 302 of the Naval Reserve Act of 1938, will be made by the disbursing officer first taking up their accounts upon reporting for active duty by crediting the same on their pay vouchers. Disbursing officers subsequently taking up their pay accounts are not authorized to pay this gratuity without authority from Headquarters, Marine Corps.

(d) When claim for uniform gratuity of \$100 is based upon completion of 14

drills, a certificate as to the completion of the required number of drills, signed by the battalion commander, will be submitted with the voucher.

(1) Elimination flight training as a private first class, USMCR (AV). This course will last about 30 days.

(2) Primary and advanced flight training at a designated naval air station, as an aviation cadet of the United States Marine Corps Reserve. This course is conducted in accordance with the same syllabus as is used for the Regular service and covers a period of about 12 months. (c) *Orders.* When the final selection of students has been made at Headquarters Marine Corps, instructions will be issued, by the Commandant of the Marine Corps, for the Inspectors-Instructors to enlist the selected candidates, at Naval Reserve aviation bases, and then assign them active duty for elimination flight training. Upon receipt of Form N. Nav. 139, which should be forwarded to Headquarters Marine Corps at the close of each elimination flight training class, those privates first class, USMCR (AV), who are qualified for further training will be selected within the quota allowed, appointed aviation cadets by the Secretary of the Navy, and orders issued for them to proceed to the naval air station, Pensacola, Fla., and report for active duty undergoing training.

§ 7.13-174 *Designations*—(a) *Student naval aviation pilots.* Privates first class, USMCR (AV), upon assignment to active duty for elimination flight training, will be designated student naval aviation pilots. The issuance of designations will be made by the commanding officer of the Naval Reserve aviation base to which the student is first ordered for elimination flight training, and will be revoked by him or by the officer in command of any training activity to which the student may later be attached at such time as he fails or his training is abandoned. It will not otherwise be revoked while he is in training in an enlisted status on active or inactive duty.

(b) *Student naval aviator.* If a student is appointed as aviation cadet by the Secretary of the Navy and further orders issued for him to report at the naval air station, Pensacola, Fla., he will be designated as a student naval aviator by the commandant, naval air station, Pensacola.

(c) *Active duty.* During the period of active duty as commissioned officers they will receive the pay and allowances of their rank.

(d) *Uniform allowance.* Upon acceptance of appointment as second lieutenant in the Marine Corps Reserve, with immediate assignment to active duty, each officer shall be paid a uniform allowance of \$150. This allowance shall be paid by the paymaster handling the accounts of the officer concerned when he accepts his appointment. This disbursing officer will endorse the original order showing fact and date of such payment. Credit will be entered under "Paymaster's statement" with the following notation opposite the credit: "Uniform allow." A certified copy of the order detaching the officer from training and assigning him to active duty must be filed with the voucher on which credit is given and forwarded with the accounts of the disbursing officer concerned, in support of the payment of the uniform allowance.

(e) *Restriction on pay and allowances.* See § 7.13-150 (c) (2).

(f) *Travel.* For allowances while traveling see article 16-23.¹

In case of injury, or death resulting from injury, commanding officers will be guided by § 7.13-15.

§ 7.13-178 *Bonus.* (a) When officers commissioned in the Marine Corps Reserve pursuant to the Naval Aviation Reserve Act of 1939 are released from active duty that has been continuous for 1 or more years, they are entitled to a lump sum payment of \$500 for each complete year of active service excluding duty as aviation cadets undergoing training, and to pro rata part of such sum for fractional parts of each year of such duty; but if released from active duty at their own request or as a result of disciplinary action, the fractional part of the year in which released will not be included in computing the lump-sum payment. No lump-sum payment is authorized if the period of active service is less than 1 year.

(b) The lump-sum payments authorized herein are in addition to any pay, allowances, compensation, or benefits which such officers may otherwise be entitled to receive (Sec. 6, Naval Aviation Personnel Act of 1940).

§ 7.13-179 *Next of kin.* Enlistment papers and service records shall show the name and address of next of kin. Upon appointment as aviation cadets and in case of any subsequent change in the name or address of next of kin aviation cadets shall report to Headquarters Marine Corps the name and address of their next of kin.

§ 7.13-180 *Discharge.* Upon appointment as aviation cadet, USMCR, a private first class, USMCR (AV), will be issued a discharge as of the day preceding acceptance and oath of office as aviation cadet, and records as enlisted man closed out in accordance with articles 3-11 (e) and 3-22.¹

§ 7.13-181 *Uniforms*—(a) *For elimination flight training.* Upon the reporting of enlisted students for elimination flight training, they will be issued the clothing specified in list I, below, which must last for the entire period of elimination flight training. This clothing will be furnished by the accountable officer of the Marine Corps Reserve avia-

(b) *For active duty undergoing training.* Upon reporting at the naval air station, Pensacola, Fla., for active duty undergoing training, aviation cadets, USMCR, will be issued the additional

uniform clothing specified in list II, below, by the Post Quartermaster, Marine Barracks, Naval Air Station, Pensacola, Fla., as may be necessary. Additional articles of uniform, specified in list III, below, will be obtained from sources indicated and issued to aviation cadets, USMCR, after they have reported at the naval air station, Pensacola, Fla.

in Rawlins, Wyoming, to Edmund Steinauer of Lincoln, Nebraska for a basic cash consideration of \$350,000 pursuant to an agreement dated November 19, 1943.

It appearing to the Commission that it is appropriate in the public interest and in the interest of investors and consumers that a hearing be held with respect to said matter and that said declaration shall not become effective except pursuant to further order of this Commission:

It is ordered, That a hearing on such matter under the applicable provisions of said Act and Rules of the Commission thereunder be held on December 23, 1943 at 10 o'clock a. m., e. w. t., in the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia, Pennsylvania. On such day the hearing room clerk in Room 318 will advise as to the room where such hearing will be held. At such hearing cause shall be shown why such declaration shall become effective. Notice is hereby given that declarations or applications (or both) have been filed by Southern Union Gas Company with this Commission, pursuant to the Public Utility Holding Company Act of 1935, in the form of an amendment designated as Amendment No. 13 to its application, heretofore filed pursuant to section 11 (e) of the said act, for approval of a plan to effectuate the provisions of section 11 (b). This Commission, by order entered on September 19, 1942, and certain subsequent supplemental orders, has approved said Plan as heretofore modified.

All interested persons are referred to said Amendment No. 13, which is on file in the office of the Commission, for a statement of the transactions therein proposed, which are summarized as follows:

As a step in further compliance with the order of the Commission entered September 19, 1942, Southern Union Gas Company proposes to divest itself of all interest in, and all ownership and control of, its physical property located in central Texas.

The amendment states that Southern Union Gas Company proposes to sell to Lone Star Gas Company, a non-affiliated company, the physical property and assets, except cash, comprising its central Texas gas distribution system and plant, located in and adjacent to Hico and Duffau, Texas, for the sum of \$36,500 in cash, subject to certain adjustments as provided in the purchase agreement dated November 12, 1943. The properties proposed to be sold include a gas well and its appurtenant lease in Hamilton County, Texas, which Southern Union Gas Company proposes, initially, to acquire from its subsidiary, Southern Union Production Company, for \$3,000 in cash.

The amendment further states that cash equal to the sale price of the central Texas properties shall be paid to the Harris Trust & Savings Bank, Trustee under the Indenture securing Southern Union Gas Company's First Mortgage Bonds, 3 3/4% Series, due 1962, to be applied toward the retirement of said Bonds.

It appearing to the Commission that it is appropriate in the public interest and in the interest of investors and consumers that a hearing be held in re-

spect to such matters; and that said declarations shall not become effective nor said applications be granted except pursuant to further order of this Commission:

It is ordered, That the proceedings in this matter be reconvened and a hearing, under the applicable provisions of said Act and the rules of the Commission thereunder, be held on December 13, 1943 at 10:00 a. m., e. w. t., at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia, Pennsylvania. All persons desiring to be heard or otherwise wishing to participate in the proceedings should notify the Commission in the manner provided by the rules of practice, Rule XVII, on or before December 10, 1943:

It is further ordered, That Henry C. Lank or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearings at such time. The officer so designated to preside at such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said act and to the Trial Examiner under the Commission's Rules of Practice.

It is further ordered, That, without limiting the scope of the issues, particular attention will be directed at such hearing to the following matters:

(1) Whether the proposed transaction is in furtherance of, and not inconsistent with, the order of this Commission entered herein on September 19, 1942 and is necessary to enable Southern Union Gas Company to comply with the provisions of section 11 (b) of the act.

(2) Whether the consideration for the properties proposed to be sold is adequate.

(3) Whether it is necessary or appropriate in the public interest or for the protection of investors or consumers to impose any terms or conditions in order to ensure compliance with the requirements of the act and of any rules or regulations promulgated thereunder.

It is further ordered, That the Secretary of this Commission shall serve notice of the aforesaid hearing by mailing a copy of this order to the Southern Union Gas Company and to the Texas Railroad Commission by registered mail; and that notice of said hearing be given to all other persons by publication of this order in the FEDERAL REGISTER.

SECURITIES CORPORATION GENERAL
ORDER ELIMINATING CONDITION

At a regular session of the Securities and Exchange Commission, held at its office in the city of Philadelphia, Pennsylvania, on the 2nd day of December, A. D., 1943.

A declaration and application having been filed with this Commission pursuant to sections 7 and 12 (c) of the Public Utility Holding Company Act of 1935 by Securities Corporation General, a subsidiary of International Utilities Cor-

poration, a registered holding company, regarding certain transactions affecting the capital and earned surplus accounts of Securities Corporation General; and

The Commission having, by order dated September 19, 1940, permitted the said declaration to become effective and approved the said application, subject to the condition, among others, that no dividend shall be declared or paid by Securities Corporation General on its common stock without prior approval of this Commission; and

The Commission having, subsequently, by order dated January 30, 1943, permitted a declaration filed by International Utilities Corporation to become effective regarding the sale of its entire holdings in Securities Corporation General (File No. 70-652); the said sale having been consummated, and Securities Corporation General being no longer a subsidiary of a registered holding company under the Public Utility Holding Company Act of 1935; and

It appearing that the said condition to the Commission's order dated September 19, 1940 relating to the payment of dividends by Securities Corporation General should no longer be in effect;

It is ordered, That the said order of the Commission dated September 19, 1940 be modified, as of this date, by the elimination therefrom of the condition relating to the payment of dividends by Securities Corporation General on its common stock without prior approval of this Commission.

GENERAL GAS & ELECTRIC CORPORATION
MEMORANDUM OPINION AND ORDER

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pa., on the 2d day of December 1943.

Declaration of dividends out of capital surplus: Declaration by registered holding company pursuant to section 12 (c) and Rule U-46 permitted to become effective with respect to the payment of dividends to prior preferred shareholders out of capital surplus where no prejudice to security holders or public is found.

Appearances: William W. Golub, for General Gas & Electric Corporation; David I. Bursten, for the Public Utilities Division of the Commission.

General Gas & Electric Corporation (hereinafter called Gengas), a registered holding company, which is a subsidiary of Denis J. Driscoll and Willard L. Thorp, Trustees of Associated Gas and Electric Corporation (hereinafter called Trustees), a registered holding company, has filed a declaration pursuant to the Public Utility Holding Company Act of 1935, in which it proposes to pay out of capital or unearned surplus a quarterly divi-

dend of \$1.25 on its \$5 Prior Preferred Stock. The presently proposed dividend is applicable to the quarterly period ended December 15, 1942.

The entire issue outstanding is 60,000 shares, of which 27,889.1 shares are held by the Trustees, who have, by a letter dated November 26, 1943, waived their right to collect such quarterly dividends, until further order of the Commission. The number of shares in the hands of the public is 32,110.9 so that \$40,138.63 will be required to make the dividend payment.

After appropriate notice, a public hearing was held. No one appeared at the hearing to oppose the proposed payment of the dividend. Having considered the record therein, the Commission makes the following findings:

As at September 30, 1943, the assets of Gengas, per books, available for security holders totalled \$30,039,954. The only securities of, or claims against, Gengas which, according to its books, are senior to the \$5 Prior Preferred Stock, consist of certain obligations payable to the Trustees. These obligations, including interest thereon, aggregate \$2,893,785.

The books of Gengas, as of September 30, 1943, reflect an earned surplus deficit of \$2,637,771.08; the capital surplus is shown as \$13,446,082.74.

Net income of Gengas for the twelve months ended September 30, 1943, amounted to \$486,229.92. As at September 30, 1943, Gengas had cash on hand in the amount of \$1,046,477.70.

A cash forecast for the twelve months ending September 30, 1944, submitted by the company in connection with the filing, indicates that Gengas will be able to meet all its cash requirements, continue to maintain an adequate cash balance, and pursue its present dividend policy. The forecast contemplates that at the end of the period the cash balance will amount to \$1,516,472.20.

In addition to the Prior Preferred Stock of Gengas, which by its terms, is senior to all other publicly held securities, there are various series of Cumulative Preferred Stock, as well as a substantial amount of Class A Common Stock, and some Class B Common Stock, of Gengas outstanding in the hands of the public.

This is the eighth time that Gengas has filed a declaration to pay a quarterly dividend on its publicly held Prior Preferred Stock out of capital surplus. We have on each occasion considered that the assets of Gengas were substantial in relation to the size of the proposed dividend, and that the Prior Preferred Stock is, by its terms, entitled to be paid dividend arrearages in full before dividends can be paid on the other preferred stocks. These same factors are equally cogent with regard to the present declaration.

At this time, we observe no reason for making adverse findings under the applicable sections of the Act and rules promulgated thereunder.

It is therefore ordered, That, pursuant to the applicable provisions of the Public Utility Holding Company, Act of 1935,

the said declaration, as amended, be, and hereby is, permitted to become effective forthwith, subject, however, to the terms and conditions prescribed in Rule U-24 of the General Rules and Regulations.

By the Commission.

Secretary.

OPS proposes to use the entire proceeds received from the sale of said stock, together with cash in its treasury, to pay the purchase price of the common stock of Marion to be acquired from Manufacturers Trust Company as set forth above.

No fees or commissions are to be paid, and the estimated expenses of OPS and Power & Light are to be filed by amendment. OPS and Power & Light state that the Public Utilities Commission of Ohio

has jurisdiction over the proposed purchase by OPS of the common stock of Marion and over the proposed sale by OPS of common stock to Power & Light, and that the laws of Ohio and the requirements of the Ohio Commission, applicable to such transactions, will have been complied with.

It appearing to this Commission that it is appropriate in the public interest and in the interests of investors and consumers that a hearing be held with respect to said matters, and that said application or declaration shall not be granted or permitted to become effective except pursuant to further order of this Commission,

It is ordered, That a hearing on said matters under the applicable provisions of said Act and the rules of this Commission thereunder be held on December 17, 1943, at 10 a. m., e. w. t., at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia, Pa. Further ordered, That, without limiting the scope of the issues presented by said application or declaration (or both), particular attention will be directed at the hearing to the following matters and questions:

1. Whether the proposed acquisition by OPS will tend toward interlocking relations or the concentration of control of public utility companies of a kind or to an extent detrimental to the public interest or the interest of investors or consumers.

2. Whether the proposed consideration, including all fees and other remuneration, to be given, directly or indirectly, in connection with the proposed acquisitions by OPS and Power & Light, is reasonable and bears a fair relation to the sums invested in and the earning capacity of the utility assets underlying the securities proposed to be acquired.

3. Whether the proposed acquisitions will unduly complicate the capital structure of the holding-company system of Power & Light or will be detrimental to the public interest or the interest of investors or consumers or the proper functioning of the holding-company system of Power & Light.

4. Whether the proposed acquisitions will serve the public interest by tending towards the economical and efficient development of an integrated public-utility system.

LOUISIANA DEPARTMENT OF HIGHWAYS

AMENDMENT TO REVOCATION TO PREFERENCE RATING

The order issued on or about July 2, 1943 and amended on or about August 6, 1943, revoking Preference Rating Order P-19-e, Serial No. 29621, is hereby amended by striking paragraph (3) thereof and substituting the following:

(3) *Prohibition of construction.* The builder shall neither perform nor permit the performance of any further construction or installation on the project except further permitted construction being construction necessary to complete the following work:

(i) The installation of storm sewer tile in such open trenches as have been made and the back-filling thereof along with such additional storm water work as is the absolute minimum necessary to prevent undue damage to the work already incorporated.

(ii) The restoration of entrance facilities to adjacent property to the same practicable condition as existed prior to the start of construction.
