 Commanding Officer, 35th Infantry, APO 25

1. It is directed that the maximum amount of information concerning the condition of roads and bridges in your respective Zone of Responsibility be obtained to include the following:

- a. Location of all slide areas by grid co-ordinates on main routes and important lateral routes.
- b. General conditions of main routes and laterals to include:
 - (1) Width (specify whether one-way or two way roads).
 - (2) Type and condition of surface.
 - (3) Type and capacity of bridges and location by grid co-ordinate of bridges under ten (10) tons.
 - (4) Location of extremely sharp turns and other pertinent features.

2. The above information will be obtained by special and periodic reconnaissance by I and R sections and through Civil Affairs Teams enlisting the assistance of Japanese Prefectural Road Engineers. Regional Post Engineers can obtain a great deal of information from this source.

3. It is desired that the information obtained be accurate and in detail and that continuous checks be made as often as is necessary to keep the information up to date and complete.

4. All information will be transmitted by the most expeditious method to this headquarters, Attention: G-2 The Commanding Officer, 65th Engineer Combat Battalion will then be given this information for compilation and recording.
