# THE LABOUR GAZETTE

PREPARED AND EDITED IN  
THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

VOLUME 24]

JANUARY, 1924

[NUMBER 1

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

IN addition to the regular monthly articles this issue of the **LABOUR GAZETTE** contains a number of special articles on subjects relating to labour and industry. These include an account of unemployment in various countries, the development of vocational education in Canada, and occupational diseases in the painting industry. There are also two statistical articles, one a review of prices in Canada and other countries in 1923, and the other statistics of wage rates in Canada in 1923 and previous years.

### Monthly summary

Reports from the offices of the Employment Service of Canada for the month of November, 1923, showed a decrease in the number of vacancies, applications and placements reported, as compared with October, but an increase in comparison with the corresponding month of the previous year.

At the beginning of December the percentage of unemployment among members of trade unions was 6.2 as compared with 4.8 per cent at the beginning of November and 6.2 per cent at the beginning of December, 1922.

The average cost of a weekly family budget of twenty-nine staple foods was \$10.73 at the beginning of December, as compared with \$10.69 for November; \$10.39 for December, 1922; \$11 for December, 1921; \$16.92 for June, 1920, the peak; and \$7.96 for December, 1914. In wholesale prices the index number calculated by the Dominion Bureau of Statistics, based upon prices in 1913 as 100, stood at 153.5 for December, as compared with 153.3 for November, 150.9 for December, 1922; 154.3 for December, 1921; and 256.9 for May, 1920 (the peak).

The time loss due to industrial disputes during December was less than during either November, 1923, or December, 1922. Thirteen disputes began or were in progress during the month, involving 2,280 employees and a time loss estimated at 28,023 working days. Corresponding figures for the previous month were 17 disputes involving 2,651 employees and an estimated time loss of 64,000 working days, and for December, 1922, 15 disputes involving 2,950 employees and a time loss of 55,986 working days. At the end of December there were 11 disputes in progress involving 520 workpeople.

### Imperial Economic Conference

An Imperial Economic Conference was held at London, England, during October, 1923, on the invitation of the British Government. There were present representatives from all the British Dominions, India and various crown colonies. The Dominion of Canada was represented by the Honourable Sir Lomer Gouin, Minister of Justice, and the Honourable George P. Graham, Minister of Railways and Canals. At this conference three resolutions were passed relating to workmen's compensation laws, as affecting non-resident workmen, seamen and aliens. The texts of these resolutions are as follows:—

(1) *Non-resident workmen.*—That this Imperial Economic Conference, taking note of the existing restrictions in the workmen's compensation laws of certain parts of the British Empire on the payment of benefits to workmen and their dependants on the ground of non-residence in the State in which the accident happened, and having regard to the tendency of such restrictions to discourage movement within the Empire, is of opinion that no British subject who is permanently incapacitated, and no dependant of a British

subject who has been killed, by accident due to his employment in any part of the Empire should be excluded from any benefit to which he would otherwise be entitled under the Workmen's Compensation law of that part of the Empire on the ground of his removal to or residence in another part of the Empire.

(2) *Seamen*.—That this Imperial Economic Conference, having had its attention drawn to cases where British sailors injured by accident while serving on ships registered in some part of the Empire have had no claim to compensation owing to the law of that part of the Empire being restricted, in its application to seamen, to accidents occurring within territorial waters or other limited area, is of opinion that the Government of any such part of the Empire should ensure that the benefits of its compensation law will extend to all accidents to seamen serving on ships registered within such part of the Empire wherever the ship may be when the accident takes place. And furthermore the Conference invites the Government of any British Colony or Protectorate where there is a register of shipping, but where legislation giving compensation rights to seamen does not at present exist, to consider the adoption of such legislation.

(3) *Aliens*.—That this Imperial Economic Conference, taking note of the disabilities imposed under the Workmen's Compensation laws of certain foreign countries on British subjects residing in those countries and their dependants, invites each Government of the Empire, regard being had to its own particular conditions, to consider the possibility of adopting in workmen's compensation legislation, the principle of reciprocity, that is, that the benefits of such legislation should be accorded to subjects of foreign countries upon the condition that and to the extent to which such foreign countries accord reciprocal treatment to British subjects.

#### Alberta coal operators and workmen's compensation

A delegation from the Western Canada Coal Operators' Association waited upon Premier Greenfield and members of the provincial government of Alberta in December, and requested that amendments be made to the Workmen's Compensation Act along the following lines: that the percentage payable in disability cases be reduced from 55 per cent to 50 per cent; that the weekly payment for disability be limited to a maximum of \$15, the said \$15 being approximately the average maximum payment in Canada and the United States; that the increase in compensation benefits to dependants since 1918 be modified by one-half of the said increase so that payments shall be—to a widow or invalid husband

\$27.50 per month; to children not orphaned, \$5.25 per month; to orphaned children, \$11.25 per month; to parents, \$25 per month; that the maximum monthly payment to widows and children in any one case shall not exceed the sum of \$52.50 per month; that the maximum monthly payment to other dependants shall not exceed the sum of \$47.50 per month.

Elsewhere in this issue an account is given of amendments to the Act which were proposed by the Alberta Federation of Labour. The premier promised that full consideration would be given to both sides of the matter before the legislature would be asked to revise the Act.

#### Quebec legislature in session

The sixteenth legislature of the province of Quebec commenced its first session on December 17. The opening speech of the Lieutenant Governor stated the opinion of the Government that the progress of the province can be best assured by increased aid to colonization and agriculture, a prudent and far-sighted exploitation of the forests, the development of water power and of fisheries, the spread of education, vigorous promotion of public health and the execution of road work. The Speech also stated that the Commission recently appointed to investigate the subject of workmen's compensation with a view to the improvement of the existing act was active and would present a report at the current session. Among the government measures foreshadowed was one to strengthen provincial control over municipal finance by a system of accounting and audit which would uphold the credit of the province and enable the government to co-operate in local work for which help is needed; another bill will aim at providing further protection for the savings of the people; and authority will be sought for the appointment, under the Provincial Superintendent of Public Education, of a school official possessed of wide authority to deal with questions affecting the Protestant minority, so that the interests of the two main religious bodies may be looked after impartially. An

account of the work of the session in connection with labour matters will be given in a future issue of the **LABOUR GAZETTE**.

**British Columbia legislature and ex-service men**

The Legislative Assembly of British Columbia, on December 15, unanimously passed two resolutions on the

subject of the re-establishment of ex-service men in Canada. The first resolution was as follows:

Whereas by Order in Council dated November 3, 1923, the Government of Canada limited further payments of war service gratuity in cases where applications are filed before March 31, 1924: And whereas this gratuity was given to ex-service men on discharge to assist their re-establishment into civil life: Whereas, further, the whole question of re-establishment of ex-service men was recently reviewed by the Ralston Commission, which visited and took evidence in all the Provinces of the Dominion, and made it manifest that re-establishment of ex-service men was yet far from completed: Therefore be it resolved, that this Legislature of British Columbia respectfully requests the Government of Canada to leave open the way for the presentation, reception, and payment of claims of war service gratuity, working pay, separation allowances, and other matters related to overseas service until the last claim has been adjusted.

The second resolution was as follows:

Whereas many ex-service men in the Province of British Columbia are receiving treatment, either at their own expense or at the expense of the province or municipalities, for illness or disabilities which it is claimed is a result of war service: and whereas many ex-service men in British Columbia are physically unable, because of illness or disability, which is claimed to be a result of war service, to earn a livelihood for themselves and their dependants: whereas, further, it has been suggested that the present pension bonus is to be eliminated, thereby reducing the amounts payable to ex-service men and dependants very considerably: therefore be it resolved that this Legislature respectfully prays the Government of Canada: (a) to make permanent the present pension bonus on the pension of ex-service men and their dependants during the existence of such pensions: (b) to give explicit and detailed instructions to departmental heads of the Board of Pension Commissioners and the Department of Soldiers' Civil Re-establishment in Ottawa to assist in every way possible the operations of the newly organized Federal Appeal Board and the Soldiers' Advisers, so that all inequalities and injustices affecting treatment of pensions of ex-service men may be eliminated with the least possible delay.

**Superannuation for Toronto civic employees**

A superannuation plan for the benefit of municipal employees at Toronto has been under consideration of the

Board of Control during the past year. Early in the year it was proposed to establish a fund which would be maintained by joint contributions from the municipality and the employees, and a committee consisting of the heads of the various departments was appointed by the city. This committee held investigations which made it appear that the city would be obliged to pay about \$300,000 a year for five years until the superannuation fund should be established. The proposal was then allowed to remain dormant until near the close of the year when the Council appointed a new special committee to report upon the feasibility of a civic employees' pension or endowment scheme. Among other suggestions it is proposed as a means of avoiding large contributions from the city that assessments on employees should begin some years before any payments are made, the establishment of a pension fund being essential to the stable operation of the scheme. The committee is to meet shortly after the inaugural session of the city council of 1924.

**International emigration conference**

On the invitation of the Italian government an International Emigration Conference will be held in Rome in the

early part of the present year. The object of this conference which is to be entirely technical in character is to endeavour to establish general principles, which might serve as bases for general international conventions or for conventions between individual states or for agreements between the administrative services of the various countries with regard to the following questions: (a) transport of emigrants; (b) hygiene and sanitary services; (c) co-operation between emigration and immigration services of different countries; (d) private aid associations for emigrants in the ports of embarkation, or immigrants in the ports of disembarkation, and for im-

migrants already arrived in the country; special assistance for women and children; (e) assisting emigrants to satisfy the demand for labour in countries of immigration; means to be adopted for this purpose (information service concerning the labour markets, employment facilities, settlement undertakings); (f) development of co-operation, social insurance, and mutual aid among emigrants; (g) principles to which emigration treaties should conform.

**British  
Workmen's  
Compensation  
Act**

The Workmen's Compensation Act, 1923, passed by the British parliament at its last session became law on November 16. The acts of 1917 and 1919 are repealed and a number of important changes are made in the act of 1906. The maximum amount of compensation payable to dependants is raised from £300 to £600. In fatal cases if the workman leaves dependants wholly dependent on his earnings the amount of compensation shall be a sum equal to his earnings during the three preceding years or £200 whichever is the larger. In non-fatal cases compensation will be payable in respect of the first three days of disablement if the incapacity last for four weeks or more. Persons employed otherwise than by way of manual labour are to be regarded as workmen for purposes of the workmen's compensation acts, if their annual remuneration does not exceed £350. The posting up of summaries of acts is made to apply to ships as well as to mines, quarries, factories and workshops. An accident book must be kept in which the injured workman or someone on his behalf may enter particulars of the accident, and this entry is sufficient notice for the purposes of the acts. A weekly compensation payment may be reviewed at any time after six months. A County Court judge may order partial incapacity to be treated as total incapacity in certain cases when a partially recovered man proves that he is unable to obtain light employment suited to his incapacity. A section of the act makes it possible by Order in

Council to give effect to conventions with foreign States providing for reciprocity in matters relating to workmen's compensation. Formerly an act of parliament was necessary. The Home Secretary is empowered to extend the workmen's compensation acts to workmen employed on aircraft when outside of Great Britain. He is also empowered to require the occupier of any factory to make special provision for the safety of employees when he considers it necessary in view of the number and nature of accidents occurring therein.

**Trade Boards  
in Great  
Britain**

A report on the administration of the Trade Boards Acts from January 1, 1922 to March 31, 1923 has recently been issued by H.M. Stationery Office, London (price 6d.). The administration of the trade boards in Ireland has been taken over by the Government of Northern Ireland and by the Irish Free State respectively. The government of Northern Ireland have since withdrawn the flax and hemp trade from the operations of the acts. The number of trades under the acts is 37 and the number of trade boards is 44, no fresh trade having been brought under the acts and no new trade board formed during the period under review, although a request was made for their application to agriculture, and inquiries were made as to the possibility of applying them to twelve other trades. The government however decided that agriculture could not be properly dealt with under the acts, and no decision was taken in regard to the other cases. Minimum rates of wages proposed by the Grocery and Provision Trade Boards had remained unconfirmed by the Minister of Labour. The total number of representatives on the 44 trade boards is 1,716 of whom 136 are appointed members, 790 employers' representatives and 790 workers' representatives. Ninety-four per cent of the employers' representatives are actual employers in the trades concerned and 489 workers' representatives are actual workers, the remaining 301 being full-time trade union officials. There was a continuous

reduction in trade board rates during the period covered by the report, 34 boards reducing the rates for male workers and 39 for female workers. There were 188,405 firms on trade board lists on January 1, 1923. Inspections were made of 4,723 firms and the wages of 94,960 workers were checked. Action was taken to recover some £33,000 of arrears of wages owing to about 8,000 workpeople.

**Earnings and infant mortality in the United States**

An analysis of infant mortality in the United States birth-registration area, prepared by the Director of the Statistical division of the Children's Bureau and published in the eleventh annual report of the Bureau to the United States Secretary of Labour, shows a marked decrease of 24 per cent for the six-year period from 1915 to 1921. The infant mortality rate of 76 in 1921 was the lowest ever recorded for the United States birth-registration area. The decrease, it is claimed, was due almost wholly to improvement in health conditions and was explained only in small part by the expansion of the area. It is the intention of the Bureau to publish during the present year an analysis of the causes contributing to infant mortality in the United States as revealed in intensive field investigations made by the Bureau in eight American cities. These investigations show that the mortality rate of infants whose fathers earned less than \$450 a year was nearly three times as high as that which prevailed in families in which the fathers earned \$1,250 and over. The influence of economic pressure upon infant mortality is shown to be independent of race or nationality, since the same close relationship between the father's earnings and the infant mortality rate is found in each race and nationality group; and the analysis indicates that it is not due to any greater prevalence of artificial feeding in the low income groups, since in fact the infants in these groups receive relatively more breast feeding than those in groups more favourably situated as to income. It was found that if

mothers through gainful employment added to family earnings, the infant mortality rate was raised, the disadvantages associated with the mother's employment more than offset the advantages derived from the income available from her earnings. The influence which the father's earnings exert upon infant mortality is thus augmented by the connection between low earnings and the mother's employment, as it is by that between low earnings and poor housing. So far as low income is responsible for the prevalence of employment of mothers, and for poor housing—conditions which themselves influence infant mortality—the adverse influence of these factors should be charged to it as the underlying cause.

**Labour saving inventions**

The extent to which inventive genius, making possible enlarged production per worker, has stimulated industrial production in America was outlined by Julius H. Barnes, president of the Chamber of Commerce of the United States, before the annual meeting of the American Economic Association which was held at Washington, D.C., on December 26.

While inspired invention is the product of no single nation or people, yet invention, Mr. Barnes declared, requires the support of quick and sure and large reward for successful consummation. The very structure of American industry, he added, and its adaptability to new invention, as well as the readiness of the American consumer to welcome new devices, hold out the sureness of generous reward for superior inventive ability. Mr. Barnes cited typical industries in which inventions have enlarged to a remarkable degree the production per worker. Some of these examples are:

In the steel industry, one or two men now with unloaders replace twelve to twenty men unloading by hand. In furnace charging, by use of skip hoist, larry car and automatic weigher, two men replace fourteen. In pig casting, seven men with casting machine replace sixty. In open hearth operation, one operator with charging machine replaces

forty hand chargers. With travelling cranes, twelve men pouring, replace thirty-seven. Two men unloading pig iron with electric magnet and crane replace one hundred and twenty-eight.

In the clothing industry, six men operating two boarding machines replace twenty. One girl operating rib cutting machine produces twenty-five times more than by hand. In men's clothing, in various processes, machines with a single operator replace six and eight workers. In the shoe industry one last-making machine produces the equivalent of six to ten hand workers. In the glass industry, one type bottle making machine replaces 54 workers. In window glass, production with a machine blower increases 30 to 50 times. In coal mines an automatic conveyer for pier unloading with 12 men replaces 150 men. In cigar making, four operators with machines produce the equivalent of 15 by hand. In wrapping machinery for bread, tobacco, chewing gum, cigarettes, soap, sugar and razor blades one wrapping machine with one operator replaces two and five, and eight, and even forty.

"This tendency" Mr. Barnes said "extends through all industry, from foundry work and material handling to bread baking and the manufacture of books; it extends even into office equipment, where adding and calculating and book keeping machines expand human service three and five and ten times. It extends even into agriculture, which does not lend itself so readily to machine production, but the old standard of farm ploughing of one man, one acre per day, has been displaced on a Montana farm adapted to tractor ploughing with the result of 22 acres per man per day. In wheat raising, the average wheat crop of to-day may be fairly estimated to require 7 million days' work; while on the methods before the day of the harvester and reaper and its successors the crop would have required 130 million days' labour.

"It is well at this point to recall that this labour is not released to unemployment, but that only thus has it been possible in America to secure the personnel for enlarged old industry and for the

established new ones which inventive progress continually suggests."

**Labour banks in United States** Reference has been made in the LABOUR GAZETTE from time to time to the establishment of labour banks by various labour organizations in the United States.

These organizations are continuing to open new banks in various districts. According to Mr. Warren S. Stone, Grand Chief of the Brotherhood of Locomotive Engineers, about 20 labour banks have been established in the United States during the last three years and about twenty more are contemplated. The Locomotive Engineers' Co-operative Trust Company was opened in New York on December 29. This is the ninth bank formed by the International Brotherhood of Locomotive Engineers and the fourth labour union bank in New York. It is stated that the first bank of this organization which was opened at Cleveland, Ohio, in 1920 with \$600,000 capital has now resources amounting to \$25,000,000. The Co-operative Trust Company is a branch of this bank. Mr. Stone in outlining the bank's policy said that any person could open a checking account in any sum whereas most New York banks require from \$200 up; 4 per cent would be paid on savings compounded quarterly and 2½ per cent on the daily balance of checking accounts. It is also proposed to perform various services for their customers such as providing railway or steamship reservations, etc. Other labour banks that have recently been established are the bank of the International Ladies' Garment Workers Union and other needle workers' unions in New York and the Brotherhood of Railway Clerks' International Bank in Cincinnati.

**Expiry of eight-hour day in Germany**

The government orders establishing the eight-hour day for manual and non-manual workers respectively in Germany expired on November 17, 1923, and as they were not extended the legal eight-hour day ceased to be operative from that date, except for miners whose

hours are fixed by special legislation. The first of these orders was issued on November 23, 1919, and their period of operation had been extended from time to time. With regard to the hours of labour in the mines and the iron and steel industries of the Ruhr district, an agreement providing for a ten-hour day made through the intervention of the Minister of Labour, was submitted to the trade union members on a referendum on December 20. The result was 42,900 votes in favour of the agreement and 539 against, while 69,000 members abstained from voting. The agreement provides that in the industries in which the hours of labour were less than ten before the war, the same period of work is to be maintained. Unskilled workers will not work more than 54 hours weekly, and all other workers will be required to labour 57½ hours weekly. This will insure the men a half holiday on Saturday. The arrangement is to stand until July 1, 1924.

The annual report of the Department of Labour for the fiscal year ending March 31, 1923, has recently been issued. The report contains chapters dealing with the various activities of the Department including work under the Industrial Disputes Investigation Act, conciliation work, fair wages, and the work of the statistical branch, the LABOUR GAZETTE, the Employment Service, technical education, and the Dominion Government Annuities. There is also a chapter dealing with the International Labour Conference of the League of Nations.

Representatives of the employers, the workers and the government of New Brunswick met in conference early in January, at the call of the Provincial Prime Minister to discuss the various difficulties which have arisen in connection with the Workmen's Compensation Act and its administration in New Brunswick. Prior to this conference the employers and the workers met separately, and proposals for the amendment of the Act were prepared by each party.

In connection with the provincial inquiry into the subject of workmen's

compensation which is now in progress in Quebec, the Federated Trades and Labour Council of the city of Quebec recommended that compensation in cases of death by accident should be fixed at an amount equal to four times the amount of the yearly income of the deceased workman, and that in disability cases compensation payments should be equal to at least two-thirds of the worker's average wages. The inclusion of provision in case of industrial diseases was also recommended.

The Minister of Public Works of Manitoba announced recently that the provincial government would contribute one-quarter of the expenditure incurred by municipalities in the province, including Winnipeg, in the relief of unemployment. The grant is made on condition that relief be given only to persons with dependants. The provincial contribution in the preceding year was one-third of the total amount expended.

By an order of the Minimum Wage Board of Alberta, dated December 31, the existing order fixing a minimum wage for female employees in offices, was amended to make the order applicable to stenographers, book-keepers and similar classes of female workers who are employed elsewhere than in an office. Order 5 read "No person, firm, or corporation shall employ an experienced female...in an office as stenographer, book-keeper, etc. at a rate of wages less than \$14 per week." The new order strikes out the words "in an office."

The city of Levis, Quebec, has adopted a system of group insurance for its employees, and the City Treasurer has been authorized to deduct from the salaries of the employees who wish to avail themselves of it, the amount necessary for the payment of the premiums.

A report of the British Ministry of Transport upon the accidents that occurred on the railways of Great Britain during the year 1922 shows 728 persons killed and 19,462 injured, of whom 340 killed and 15,968 injured were employees of the railway companies or contractors. Of the accidents to employees, 4 were killed and 83 injured by

accidents to trains, rolling-stock, permanent way, etc., 203 were killed and 2,864 injured by other accidents in which the movement of trains was concerned, and 33 were killed and 13,021 injured by other accidents. Of the latter class 12,484 or 96 per cent are described as industrial accidents of a more or less non-preventable character. They include 6 killed and 3,918 injured while engaged in handling goods, 2 killed and 1,894 injured when attending to engines at rest, 11 killed and 2,575 injured by falls on railway premises, 4 killed and 2,793 injured upon the permanent way, and 10 killed and 1,841 injured from other causes. The number of employees of the railway companies and contractors on March 25, 1922, was 678,105.

At a recent convention of the Associated Dress Industries of America it was decided to take the initiative in a movement to prohibit the distribution of prison-made merchandise on the open market because of alleged unfair competition. To the resolution there was added a clause suggesting that since the employment of prison labour cannot be eliminated the merchandise thus

manufactured could be distributed among publicly supported institutions throughout the country.

The annual number and cost of industrial accidents in the United States has been estimated by Mr. Carl Hookstadt of the United States Bureau of Labour Statistics in a recent article in the *Monthly Labour Review* as follows: number of accidents, 2,453,418; working days lost, 227,169,970, and wage loss (\$4.50 per day), \$1,022,264,866. The number of fatal accidents is estimated at 21,232, the days lost due to these accidents, 127,392,000 and the wage loss, \$573,264,000. Permanent total disabilities are estimated at 1,728; permanent partial disabilities at 105,629, and temporary total disabilities, 2,324,829. Among the permanent disabilities injuries to thumbs and fingers ranked highest, and injuries to eyes came second. The number of employees in the industries, based upon the United States Census of Occupation for 1920 is given as 29,679,763, and it is claimed that the average weekly earnings for the industries in which most of the accidents occurred ranged from \$24 to \$30 per week.

## GENERAL REVIEW OF THE INDUSTRIAL SITUATION

### The Labour Situation, Strikes, Prices

#### The Labour Situation

THE volume of employment indicated by employers at the beginning of December showed a further decline, which caused the index number to be practically the same as at the same period of 1922, although the situation continued to be much better than in the same period of 1921. At the beginning of December the percentage of unemployment among members of trade unions was 6.2 as compared with 4.8 per cent at the beginning of November and 6.2 per cent at the beginning of December, 1922.

The offices of the Employment Service of Canada reported a decline in the business of the offices during the month of November, 1923, as compared

with the preceding month. Slight improvement in employment over the same period of preceding year is indicated, however.

The following gives the employment situation at the end of December, 1923, as reported by the superintendents of the employment offices:—

In the Maritime Provinces employment conditions were changed very little from the previous month, only a few requests for farm workers being received. Although a sharp decline was evidenced in construction work there were jobs available for many on city sewers and street repairs, transmission lines and dam construction. The approaching holiday season caused a drop in the demand for bushmen, but pros-

pects were bright for improved employment in this group in the new year. A number of vacancies for domestic workers were reported, but on the whole there was little work offering in this group.

In Quebec a decline was noted in the number of orders for agricultural workers. The logging industry showed a considerable reduction, very few vacancies being offered for work in the camps. The building trades were actively employed, vacancies being reported for plasterers, carpenters, steamfitters and joiners. No demand was received for building labourers and outdoor workers. A slight difficulty was experienced in supplying the demand for domestic servants, but the increased calls for casual workers for the holiday season were more easily met.

In Ontario, with a declining demand for farm workers the offices were able to place a number of applicants at points near Toronto, Oshawa and Ottawa. Many districts reported a further decline in the demand for labour for construction work and other outside employment. At several municipalities arrangements were in progress whereby work on sewer and water-main construction and other excavations would be available for the registered unemployed. Men for railway maintenance and track laying were still required in some localities. The close of navigation and the cessation of all work at the ports for the winter has thrown many out of work, a number of whom have been placed at the lumber camps. In the latter group, however, demand had shown a considerable slackening due to the approach of the holiday season, but the offices anticipated a marked expansion in the near future. Seasonal quietness continued in the manufacturing industries. A slight lessening in the number of vacancies for women household workers was reported, although the supply of experienced applicants was not yet sufficient to meet the requirements.

A continued demand was recorded in the agricultural group in Manitoba with little difficulty felt in filling the vacancies available. There was a reduction in

the number of orders received for construction workers, the offices at Portage la Prairie and Winnipeg reporting a number of vacancies for labour for municipal public works. A steady demand of a nominal character was registered in logging. The requirements were for experienced bushmen, tie makers, pulpwood and cordwood cutters, a difficulty being experienced in making placements due to the approach of the holiday season.

In Saskatchewan the demand for farm workers showed a continued decrease with applicants slightly less in number than the vacancies for work. While there was some construction under way much had been held up on account of bad weather. For this reason applications for work increased considerably and the number of casual jobs offering were inadequate to meet the need. Carpenters and plasterers were required as were also a small number of gang and section labourers for the completion of railway maintenance work. Reduced activities were shown in the logging group, many of the camps reporting a sufficient number of workers engaged until the beginning of the new year. Quietness characterized the women's section, the calls being for day workers and experienced household help.

A steady though declining demand for farm workers was reported in Alberta, although improvement was anticipated at the close of the holiday season. Construction activities had slackened considerably at the end of December, nevertheless the number of those out of work in consequence was not appreciable. A few municipalities had in progress work on sewer and water-mains which offered employment to many. The scarcity of experienced tie-makers created a keen demand but on the whole few calls were received for workers in the logging group. The mining industry was very slack. An increased call for women for house work of a temporary nature was received.

Vacancies for both loggers and tie-makers were registered at many of the offices in British Columbia though the number of workers available showed a

slight decrease from the previous period. Many of the camps were supplied with sufficient workers until colder weather set in. In the meantime, construction and outside work was progressing favourably and while few vacancies were offered in this group, the number of unemployed workers was not great. A number of carpenters and labourers were required for repair and alteration work. Several machine miners were in demand at Prince Rupert and Vancouver, but on the whole little activity was evidenced in the mining group. Improvement in demand for women, especially for casual jobs for Christmas week, was shown with a fair number of placements effected.

#### EMPLOYERS' REPORTS

Further contractions in employment were reported to the Dominion Bureau of Statistics by employers of labour at the beginning of December. The downward movement repeats that indicated early in December, 1922 and 1921, although the shrinkage then was less than for the period under review. The losses in construction at the beginning of December, 1923, continued to be very heavy; these were supplemented by large declines in shipping and stevedoring, in sawmills and in the iron and steel industries. The reductions, however, were offset to some extent by seasonal gains in logging camps and in retail stores. The volume of employment in all provinces was smaller than at the beginning of November. The greatest decline was recorded in Quebec and the smallest in the Prairie Provinces. Manufacturing and construction showed the largest losses in all districts, although the decline in water transportation in Quebec was very severe, owing to the closing of the summer ports. Shipping and stevedoring in the Eastern Provinces on the other hand, reported considerable improvement in preparation for the winter's work and coal mining in the same district recorded improvement. Logging and trade in every province were decidedly more active. An analysis of the returns by cities shows that the situation in Toronto was more satisfactory than

at the beginning of November, while in Montreal, Ottawa, Hamilton, Winnipeg and Vancouver the tendency was downward. In Toronto the net additions to staffs were small; decided expansion in retail trade and gains on a somewhat smaller scale in abattoirs, on telephones and street railways were largely offset by contractions in knitting mills and other textile factories, in iron and steel and in construction. In Montreal the heaviest shrinkage occurred in shipping and stevedoring and was seasonal in character. The railway car plants also released a large number of workers and garment and other textile, glass, jewellery, brass, bronze and copper works and construction were slacker. On the other hand, boot, shoe and electrical apparatus factories and trade showed decided increases in Montreal. The most pronounced change in Ottawa was a large decline in sawmilling operations, while the construction industries also registered reduced employment. Rolling mills, railway car, agricultural implement and electrical appliance plants in Hamilton reported smaller working forces than at the beginning of November; the contractions in those industries were partly offset by increases in knitting mills. Retail trade in Winnipeg absorbed a great many extra persons, but construction and manufacturing showed curtailment. In Vancouver increased activity was recorded in shipping and stevedoring; electric current, street railways and construction, however, afforded less employment. Within the manufacturing industries the largest losses occurred in sawmills, in railway car shops and in some other branches of the iron and steel divisions. Pulp, paper, garment, clay, stone, electric current, non-ferrous metal and mineral product factories also reported lessened activity. The favourable movement indicated in boot and shoe works in the last report continued at the beginning of December and considerable improvement was also shown in rubber and electrical appliance works. Although logging operations in some parts of the country were retarded by lack of snow, there was nevertheless an increase of 33 per

cent in the employment afforded on such work. Trade also showed improvement; retail stores in particular indicated greatly increased employment in anticipation of the holiday trade. Water transportation, in spite of improvement in the Maritime Provinces and British Columbia, was decidedly slacker on the whole, owing to the closing of the summer ports. The seasonal losses in construction, noted in the last few reports, continued to be very severe during the month under review. Hotels and restaurants also recorded smaller working forces.

An article elsewhere in this issue gives in some detail the employment situation as on December 1, 1923.

#### TRADE UNION REPORTS

The volume of unemployment at the end of November as reported by 1,456 labour organizations with a combined membership of 153,366 persons was greater than in the previous month, 6.2 per cent of the members being unemployed as compared with 4.8 per cent at the close of October. In comparison with November of the previous year the same level of employment was maintained, 6.2 per cent of the members being out of work on November 30, 1922. (Unemployment as used here has reference to involuntary idleness due to economic causes. Persons engaged in work other than their own trades or who are idle because of illness or as a direct result of strikes or lockouts are not considered as unemployed. As the number of unions making returns varies from month to month with consequent variation in membership upon which the percentage of unemployment is based it should be understood that such figures have reference only to the organizations reporting.) The situation in all provinces with the exception of Nova Scotia was less favourable than in October the largest percentage declines being shown in Quebec and Alberta due, for the most part in Quebec, to between season idleness among building tradesmen and in garment establishments in Montreal. compared with November of the previous year Nova Scotia, Manitoba and British

Columbia were the only provinces to register improvement. In the manufacturing industries as reported by 407 unions with 46,965 members, slightly more unemployment was shown; textile, garment, cigar and tobacco, wood and jewellery workers all reporting less activity. The situation for bakers and confectioners, printing tradesmen, metal polishers, leather, iron and steel and glass workers, however, was better. Coal miners in Nova Scotia were busier, but in Alberta they were considerably less active. In the British Columbia coal mines and asbestos mines of Quebec no members were reported out of work. The 167 unions in the building and construction group with a membership of 14,759 persons reported considerably more unemployment than in October. Bridge and structural iron workers and painters, decorators and paperhangers were the only tradesmen to register improvement, while employment for electrical workers remained on the same level as in October. In comparison with the previous November steam shovel and dredgemen, bridge and structural iron workers, electrical workers, painters, decorators and paperhangers and hod carriers were all better employed, but the increase in employment in these trades was more than offset by lessened activity for bricklayers, masons and plasterers, carpenters and joiners, granite and stone cutters, plumbers and steamfitters, tile layers, lathers and roofers. The percentage out of work in the transportation industries was slightly larger in November than in the previous month, lessened activity being shown in the shipping division and among steam railway employees and teamsters and chauffeurs. Street and electric railway employees, however, were slightly busier. More unemployment in the transportation industries was registered during the period under review than in the previous November. Fishermen indicated a slightly larger proportion of their members as being employed than in the preceding month. Practically no change occurred among retail clerks. Hotel and restaurant and theatre and stage employees, barbers and stationary

engineers and firemen all reported more inactivity.

During the month of November, 1923, the OFFICE REPORTS of the Employment Service made 31,985 references to positions and effected a total of 30,309 placements. Of these the placements in regular employment totalled 23,652, of which 20,668 were of men and 2,984 of women. The placements in casual work were 6,657. The number of applications for employment was 44,359, of which 34,605 were from men and 9,754 from women. Vacancies notified by employers during the period numbered 25,240 for men and 7,636 for women, a total of 38,876. Compared with the same period of 1922 conditions showed a slight improvement, though a decline is reported from the period ended October 30, 1923. A report in detail of the work of the offices for the month of November will be found elsewhere in this issue.

#### BUILDING PERMITS AND CONTRACTS AWARDED

According to the Dominion Bureau of Statistics, the value of building permits issued in 56 cities during November, 1923, declined to \$8,003,601 from \$9,701,080 in the previous month, and \$10,085,415 in November, 1922.

According to the *MacLean Building Review*, issued by MacLean Building Reports, Limited, the value of the contracts awarded in Canada during December amounted to \$21,507,500, compared with \$15,632,200 in November, and \$52,472,400 in December, 1922. Residential buildings amounted to \$6,100,200, business buildings to \$3,420,600, industrial buildings to \$805,000, and contracts for engineering work, \$11,181,700. Of the total value of contracts awarded in Canada, \$14,336,300 was to be spent in Ontario and \$4,865,400 in Quebec. The figures for 1923 show total construction undertaken to a value of \$314,254,300 compared with \$331,843,800 in 1922. During the year there was a falling off of 11 per cent in residential buildings. The maintenance of marked activity in engineering construction is

the outstanding feature of the year. Projects undertaken in this department were 34.9 per cent of the total. The figures for 1923 as given for the various classes of building are: residential, \$97,645,200; business, \$80,436,800; industrial, \$27,022,000; engineering, \$109,150,300.

#### PRODUCTION REPORTS

The Dominion Bureau of Statistics reports that the production of pig iron in Canada during November was 62,202 gross tons, a decline of 11,396 tons from the October output of 73,598 tons. Malleable iron made for sale showed a decline of 43 per cent from the October production of 15,235 tons, the amount produced being 8,676 tons. The amount of basic iron produced during November was 38,110 tons, and of foundry iron, 15,416 tons. The cumulative production for the eleven months ending November by grades was 513,774 tons of basic iron, 209,188 tons of foundry iron and 97,434 tons of malleable iron or a total output of 820,396 tons all grades. Compared with the same eleven months of other years, the 1923 production of all grades showed an increase of 114 per cent over that of 1922 which was 383,057 tons, and 48 per cent over 1921 at 554,437 tons. The average monthly production for the eleven months of 1923 was 75,000 tons, and during the last five years this average was only exceeded in 1920, when the average production was about 84,000 tons. During November, one furnace was banked at Port Colborne, Ont., leaving six furnaces in blast at the end of the month including three at Sydney, N.S., two at Hamilton, Ont., and one at Sault Ste. Marie, Ont. There was a decline in the production of ferro-alloys from 3,013 in October to 2,824 in November.

The production of steel ingots and castings amounted to 54,674 gross tons in November as compared with 67,496 tons in the previous month. Steel ingots at 51,426 tons showed a decline of 18 per cent from the October production, and steel castings dropped to 3,248 tons, a decline of 30 per cent from the 4,626 tons produced in the preceding month.

The cumulative production of ingots and castings for the eleven months ending November, 1923, was 843,522 tons, as compared with 438,988 tons in 1922 and 624,831 tons in 1921. The average monthly production for the eleven months was 77,000 tons as compared with a monthly average for the five-year period 1919 to the end of November, 1923, of about 69,000 tons.

A report from the Department's correspondent at Cobalt states that 18 cars of silver ore were shipped during the month from the Cobalt camp, containing approximately 1,239,002 pounds of ore as compared with 21 cars of silver ore containing 1,588,670 pounds in the previous month. The Nipissing mine shipped 399 bars containing 461,334.49 ounces of silver, and the Mining Corporation of Canada shipped 165 bars containing 165,329.10 ounces of silver, making a total of 564 bars containing 626,663.59 ounces of silver for the month of November, as compared with 236 bars containing 251,054.35 ounces for the previous month.

A report from the British Columbia Forestry Branch shows that 206,764,786 feet board measure of timber was scaled in the province during November. The total includes Douglas fir, 87,470,314 feet; red cedar, 45,388,449 feet; spruce, 23,446,497 feet; hemlock, 33,797,987 feet; balsam, 7,932,301 feet; yellow pine, 2,299,759 feet; white pine, 1,602,155 feet; jack pine, 1,487,729 feet; larch, 3,169,629 feet; cottonwood, 149,112 feet; and other species, 20,854 feet.

The gross earnings of the Canadian National Railways, including affiliated lines in the United States, according to a preliminary statement issued, amounted to \$24,209,224 in November as compared with \$26,391,994 in October. The gross earnings for the first eleven months of 1923 amounted to \$232,159,446 as compared with \$212,886,299 for the same period in 1922.

The gross earnings of the Canadian Pacific Railway for November were given in a preliminary statement as \$22,244,319 in comparison with \$21,421,078 in the same month of the previous year; and for the eleven months ending

November 30, 1923, as \$176,700,415, while for the same period for 1922 they amounted to \$169,309,396.

#### Strikes

Time loss due to industrial disputes reported to the Department during December was less than during either November, 1923, or December, 1922. There were in existence at some time or other during the month 13 disputes, involving 2,280 employees and a time loss of 28,023 working days, as compared with 17 strikes in November, involving 2,651 employees and a time loss of 64,000 working days. In December, 1922, there were recorded 15 disputes involving 2,950 employees and a time loss of 55,986 working days. One new strike commenced during December with a time loss of 1,538 working days. One of the strikes commencing prior to December and one strike commencing during December terminated during the month. At the end of the month, therefore, there were 11 disputes involving 520 workpeople.

#### Prices

The level of retail food prices showed little change, being only slightly higher than in November. The cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average retail prices in some sixty cities was \$10.73 at the beginning of December as compared with \$10.69 for November; \$10.39 for December, 1922; \$11 for December, 1921; \$16.92 for June, 1920 (the peak); and \$7.96 for December, 1914. Eggs showed the only important increase in price but there were smaller increases in the prices of butter, milk and mutton. The chief declines occurred in beef, fresh and salt pork, and in bacon with slight declines in cheese, bread, rolled oats, prunes and sugar. Including the cost of fuel and rent with that of foods the total budget averaged \$21.21 at the beginning of December as compared with \$21.19 for November; \$20.97 for December, 1922; \$21.49 for December, 1921; \$26.92 for July, 1920 (the peak); and \$14.26 for December, 1914. Fuel and rent were practically unchanged. As compared

with December, 1922, and December, 1921, neither fuel nor rent have changed substantially, but as compared with December, 1920, fuel was appreciably lower while rent was higher.

The movement of wholesale prices as indicated by the index number of the Dominion Bureau of Statistics was again slight but continued to be upward. Based upon average prices in 1913 as 100, the index stood at 153.5 for December as compared with 153.3 for November; 150.9 for December, 1922; 154.3 for December, 1921; and 256.9 for May, 1920 (the peak). In the grouping according to chief component material the Vegetable Products group, the Wood Products group and the Chemical group each were lower while four of the other five main groups advanced, the most important advance being in the Animals group and the Textile group.

The index number, based upon prices of 271 commodities in 1890-1899 as 100, published by the Department of Labour

since 1910 was slightly higher at 222.6 for December as compared with 221.7 for November; 223.0 for December, 1922; 230.7 for December, 1921; 356.6 for May, 1920, the peak, and 137.0 for December, 1914. The principal advances occurred in dairy products, fruits and vegetables, textiles, metals, paints and oils and in raw furs. The most important declines occurred in grains, meats, miscellaneous groceries and in chemicals.

The special index of fifty commodities selected from the 271 in the Departmental list advanced slightly to 153.7 as compared with 152.0 for November; 154.2 for December, 1922; 150.1 for December, 1921; and 260.5 for May, 1920 (the peak).

Professor Michell's index of forty articles showed a slight advance from 176.9 for November to 177.3 for December. Foods were down somewhat but this decline was more than offset by the advance in manufacturers' goods.

## CANADIAN IMPORTS AND EXPORTS DURING NOVEMBER, 1923

THE figures shown below are derived from a statement prepared by the Department of Customs and Excise showing the imports of various classes of commodities, free and dutiable, for the months of November, 1922 and 1923, and for the eight months ending November of these years, and the ex-

ports, domestic and foreign, of similar classes of goods for the same periods.

The following table shows the value of imports free and dutiable entered for home consumption, and the exports domestic and foreign, of the various classes of products, for the month of November, 1923:—

Classes of goods	Imports		Exports	
	Free	Dutiable	Domestic	Foreign
	\$	\$	\$	\$
Agricultural and vegetable products, mainly foods.....	1,681,357	8,809,211	78,107,964	47,790
Agricultural and vegetable products, other than foods.....	1,762,810	2,813,659	5,634,850	51,559
Animals and animal products.....	1,751,879	2,137,215	14,507,315	44,424
Fibres, textiles and textile products..	6,693,689	7,530,510	682,666	95,606
Wood, wood products and paper.....	1,260,800	2,131,526	23,436,941	22,621
Iron and its products.....	1,252,672	10,897,297	5,661,741	236,772
Non-ferrous metals and their products.....	811,222	2,651,011	4,653,828	31,432
Non-metallic minerals and products.....	7,154,617	5,960,565	2,338,146	167,111
Chemicals and allied products.....	1,032,847	1,362,881	1,396,018	21,585
Miscellaneous commodities.....	1,807,267	2,581,269	1,668,404	198,350
Totals.....	25,209,160	46,875,144	138,087,873	917,250

In November, 1923, the duty collected amounted to \$10,659,442 as compared with \$11,605,259 in November, 1922.

The following comparative table shows the value of merchandise entered

for consumption, and the merchandise, domestic and foreign, exported in the months of November, 1922 and 1923, and in the eight months ending November of these years respectively:—

	Month of November		Eight months ending November	
	1922	1923	1922	1923
	\$	\$	\$	\$
Merchandise entered for consumption.....	76,264,250	72,084,304	507,055,187	612,755,275
Merchandise, domestic exported.....	130,796,673	138,087,873	621,705,316	691,981,142
Totals.....	207,060,923	210,172,177	1,128,760,503	1,304,736,417
Merchandise, foreign, exported.....	1,029,309	917,250	9,484,863	9,354,617
Grand total, Canadian trade.....	208,090,232	211,089,427	1,138,245,366	1,314,091,034

### PROCEEDINGS OF THE CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

SIX new decisions of the Canadian Railway Board of Adjustment No. 1 have been received by the Department. (Summaries of earlier decisions of the Board appeared in the LABOUR GAZETTE for October, 1923, on pages 1074 to 1084 and in previous issues). In all the cases, the company interested was the Canadian National Railways. Case No. 182 has reference to the claim of yardmen for the work of switching which was performed by a train crew. Case No. 183 has reference to a claim for a minimum day for extra service made by a train crew. Case No. 184 relates to a claim of employees for payment for terminal detention. Case No. 185 has reference to a claim for the reinstatement of a conductor. Case No. 186 has reference to a claim of passenger trainmen for payment for time taken in putting away train equipment. Case No. 187 has reference to a claim of a conductor for the difference between conductor's and trackmen's rate after he had been relieved from acting as spare conductor.

**Case No. 182.—The Canadian National Railways, Central Region, and the Brotherhood of Railroad Trainmen.**

A conductor and crew of the Canadian National Railways was sent from Capreol to Hanmer Pit to bring in

some crippled cars. On their return to Capreol at 12.20 p.m. they were kept on duty until 6 p.m., performing such switching as was necessary in chaining up cars and making slight repairs to brakes. Two spare yardmen who were in Capreol yard at the time claimed that they were entitled to this work under Article 8, clause (a) of the yardmen's schedule which reads as follows:—

(a) Where yardmen are employed they will do all switching, transfer and industrial work in connection with the terminal.

On account of yardmen not being used in this case they claimed one day's pay.

On behalf of the Railways it was claimed that the switching was solely incidental to the bringing in of the train by the road crew and the work for which they were called, and that the yard crew could not be used while there were road crews available for the trip from Capreol to Hanmer Pit.

By decision of the Board the claim of the employees was denied.

**Case No. 183.—The Canadian National Railways, Western Region, and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen.**

A conductor and crew were in charge of a mixed train of the Canadian National Railways, which was scheduled to run between Port Arthur and White-

fish on five days of the week and through to North Bay on Wednesdays. On two Saturdays they were required to go 4.4 miles beyond Whitefish to Mackies and back. The conductor and trainmen contended that the trip from Whitefish to Mackies and return on these days was a side trip outside of their regular assignment, and would therefore come under Rule 6, conductors' schedule and Rule 11, trainmen's schedule, which provide for a minimum day of 100 miles.

The railways contended that the actual mileage for the regular trip would be 86.8 miles, and that the extra service performed on the two days in question would make a total mileage for the round trip 95.6 miles for which the conductor and crew would be paid 100 miles. The Company offered and paid terminal switching rates, or the equivalent through freight rates for the time occupied in making the extra trip from Whitefish to Mackies and return, and contended that this was a reasonable remuneration for the service and that there was nothing specifically in the schedule that required payment for 100 miles under the circumstances.

By decision of the Board the claim of the employees was sustained.

**Case No. 184.—The Canadian National Railways, Western Region, and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen.**

Rule No. 59 of the conductors' schedule and Rule No. 71 of the trainmen's schedule provide that the limits of Port Arthur yard will be the Port Arthur Passenger station and the west switch, Fort William loop, and that the switching performed between the west switch Fort William loop and the west switch at Mount will be paid for under terminal time rule. A double track was laid from the west switch Fort William loop to Midway Diamond Crossing in the fall of 1922, being part of the double track then completed, and put into operation as such between Port Arthur and Midway.

The employees contended that previous to the laying of the track between the west switch, Fort William loop, and Midway, crews were paid terminal de-

tention for all time westbound until they left the west switch Fort William loop, including time for delays in meeting trains, etc. After the track was laid to Midway the delays which formerly took place at the west switch, Fort William loop then took place at Midway and the employees claimed that Midway was now in reality the west switch Fort William loop, and that they were entitled to payment for all delay up to the time of leaving the latter point.

The contention of the railways was as follows:—

"The clauses in the schedules above quoted clearly specify that the west switch of the Fort William loop will constitute the westerly limit of Port Arthur yard. The building of double track from Port Arthur to Midway (of which the half mile of track between the west switch Fort William loop and Midway referred to by the men was a part), was to facilitate the handling of traffic, and this does not furnish any justification for extending the yard limits, nor do the schedules call for payment of these claims."

By decision of the Board the contention of the employees was denied on the ground "that the point at which terminal yard time ceases and road time commences was definitely fixed by agreement as between the representatives of the railways and of the employees, in the way of a switch which is still retained at the same point. Therefore, the only manner in which the limits can be extended is by a new agreement between the parties."

**Case No. 185.—The Canadian National Railways, Western Region, and the Order of Railway Conductors.**

A freight conductor of the Canadian Northern Railway was dismissed on December 26, 1919, for responsibility in connection with handling of train. The conductor was in charge of a freight train running from North Battleford to Humboldt. The engine was not steaming well and made slow time. On arrival at Howell, after being on duty for fourteen hours, the engineer wired the dispatcher at Humboldt that he would

go through to Humboldt with the caboose or take eight hours rest. The despatcher advised him to try and take the train into Humboldt, but he refused to do so, and finally the despatcher advised him to go through to Humboldt light, which he did. For not bringing in his train to Humboldt, the conductor was dismissed. A few weeks later he took service with the Grand Trunk Pacific as switchman and when the lines were united he became an employee of the Canadian National Railways. He then sought the restoration of his former seniority rights which he had possessed when an employee of the Canadian Northern Railway.

It was claimed by the employees that under Rule 28 of the conductors' schedule, conductors are entitled to take rest on the road at the expiration of fourteen hours.

On behalf of the Railways it was stated that the freight on this train consisted mostly of commercial coal, the prompt movement of which was exceptionally urgent at the time as there was suffering throughout the West on account of shortage of coal and extremely severe weather. It was claimed that the conductor was physically fit to take the train through to the terminal as were the rest of the crew who were quite willing to do so, and that it was a flagrant instance of an employee disregarding the need of his fellowmen, for which reason he did not merit reinstatement.

The decision of the Board was as follows:—

Under all circumstances in this case the Board cannot see its way clear to reverse the position taken by the Railways. It is suggested, however, that the matter be taken under further consideration by the officers of the Railways, with a view to deciding whether or not, under all the circumstances, the discipline as already applied might not sufficiently meet the case.

**Case No. 136.—The Canadian National Railways, Western Region, and the Brotherhood of Railroad Trainmen.**

The passenger trainmen of the Canadian National Railways, Western Region, made a claim for pay for time occupied in putting away their train equipment after arriving at the terminal.

The employees contended that under the second paragraph of Clause D, Article 1, of the trainmen's schedule, the trainmen held on duty for any purpose after the train had been registered, were entitled to payment for time so held whether for the purpose of putting away their train equipment or otherwise. It was claimed that some crews were being paid thus under the schedule and to others payment was being denied at various points on the line. The paragraph under which the claim was made reads as follows:—

Trainmen (passenger) held at terminal points after arrival of train has been registered shall be paid for such time at overtime rates.

The company held that the claim made for time occupied by the men in putting away their train boxes after arrival was not a payment to be made under the schedule.

The decision of the Board was as follows:—

It is the opinion of this Board that the term "held," second paragraph, clause D, Article 1, of the trainmen's schedule, is not intended to cover time ordinarily occupied in putting away train boxes, etc., and the Board so decides.

When, however, due to local or other conditions, trainmen are unduly delayed in performing work of this character, the Board decides that clause D, Article 1, applies.

**Case No. 137.—The Canadian National Railways, Western Region, and the Order of Railway Conductors.**

A conductor of the Canadian National Railways laid off duty at Port Arthur, and Conductor J. being the senior available conductor, took his car. Five days later J. was relieved on this car by another conductor who was a senior man who had been previously holding a temporary vacancy as conductor on another car. It was contended by the employees that no regular conductors' spare board was established at Port Arthur, and therefore Rule 23, conductors' schedule applied, which provides that where no conductors' spare board is kept, the oldest available spare conductor will be entitled to car on run if it is to be vacant for less than ten days. It was claimed that it was not known whether the regular conductor would be laid off for ten days or not until that

time had passed and consequently Conductor J. should not have been relieved before the ten days were up, and he was therefore entitled to the difference between brakemen's pay and conductors' pay up to the end of that period.

The Railways contended that owing to the limited number of crews working out of Port Arthur only one man was required to cover the spare work, although it frequently happened that there would be more than one vacancy at one time, when the senior available man would be called. The senior conductor who replaced J. was doing spare conductor's work on another train when the vacancy which J. filled occurred, and J.

as the next senior man, was called for this position, which he held until the vacancy which the other conductor was filling had expired. The Company held that the claim of the men was extremely technical and unreasonable and submitted that the arrangement carried out complied with the spirit of the schedule.

The decision of the Board was as follows:—

The evidence was contradictory as to the existence of a spare board at Port Arthur. If it is established that there was a spare board at Port Arthur, in accordance with the provisions of the schedule, the claim of the employees is denied. If, however, it is shown that there was not a spare board there, the claim of the employees is sustained.

### STRIKES AND LOCKOUTS IN CANADA DURING DECEMBER, 1923

THE number of strikes and lockouts in Canada in existence at some time or other during the month of December was four less than in November. The time loss for December was less than in December, 1922, being 28,023 working days as compared with 55,986 working days lost in the corresponding month of the previous year.

and pressmen, Halifax, and motormen and conductors at Niagara Falls.

One strike listed in the statistical table was reported as terminated prior to December but had not previously been so reported.

One of the strikes terminating during December resulted in favour of the employers, while the second one resulted in favour of the employees. The one new strike commencing during December was against the discharge of employees.

The record of the Department includes lockouts as well as strikes, but a lockout or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical tables, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting more than one working day. Disputes of only one day's duration or less, and disputes involving less than six employees are not included in the published record, but a separate record of such disputes is maintained in the Department and the figures are given in the annual review.

The following notes give information in regard to certain disputes additional to that shown in the tabular statement.

Date	Number of Disputes	Number of employees involved	Time loss in working days
December, 1923.....	13	2,280	28,023
November, 1923.....	17	2,651	64,000
December, 1922.....	15	2,950	55,986

Eleven disputes involving 2,075 work-people were carried over from November. One of the strikes commencing prior to December and one strike commencing during December terminated during the month. At the end of December, therefore, there were on record 11 strikes: coal miners, Edson, Alta.; clothing workers, Winnipeg; printing compositors, Hamilton; three strikes of printing compositors at Montreal; printing compositors, Ottawa; printing compositors, Toronto; printing compositors, Winnipeg; printing compositors

**COAL MINERS, EDSON, ALTA.**—The strike of coal miners at Edson, Alta., which commenced November 23, was still in existence. Work was resumed in one of the mines involved in the dispute early in December. The Fair Wages Officer of the Department of Labour for the District held several conferences with the parties concerned but no settlement had been reached at the end of the month.

**SHOEWORKERS, MONTREAL, QUE.**—On December 10, some 205 shoeworkers at Montreal went on strike against the discharge of three union employees, alleged to have been doing organization work for the union, involving intimidation, during working hours. Negotiations were carried on as a result of which the men were reinstated and work was resumed on December 19, with certain changes in working conditions.

**PRINTING TRADES IN TEN CITIES.**—During December information was received in the Department that the strike of printing compositors in job offices at Vancouver had been declared off by the International Union on November 10. Of the eighteen em-

ployers involved at the beginning of the strike, twelve had granted the union's demands for the 44-hour week, the remaining six still operating non-union shops. Those on strike had gradually secured work, until only six employees were on strike. Information received regarding the photo engravers at Montreal indicated that employment conditions were no longer affected as the strikers had secured work elsewhere. Strikes of printing compositors and pressmen still continued in eight cities, 510 employees being involved with a time loss of 12,850 working days.

**LONGSHOREMEN, VANCOUVER, B.C.**—The strike of longshoremen at Vancouver and certain other Pacific Coast ports which began in October terminated the first week of December. The negotiations initiated by the Fair Wages Officer of the Department at Vancouver resulted in a settlement under which the strikers registered for employment at the employment service office and the shipping companies secured men required from that office at the same rate of pay and under the same conditions as before the strike.

STRIKES AND LOCKOUTS DURING DECEMBER, 1923

Industry, occupation and locality	Number of employees involved	Time loss in working days	Remarks
-----------------------------------	------------------------------	---------------------------	---------

(a) Strikes and lockouts commencing prior to December, 1923.

MINING, NON-FERROUS SMELTING AND QUARRYING—			
Coal miners, Edson, Alta. ....	80	2,000	Commenced November 23, for recognition of the union. Underminated.
MANUFACTURING—			
Clothing:			
Clothing workers, Winnipeg, Man.	23	575	Commenced September 6, against a reduction in wages. Underminated.
Printing and Publishing:			
Photo engravers, Montreal, Que.	7	.....	Commenced May 2, 1921. For shorter hours. Information received indicates employment conditions no longer affected.
Printing compositors, Hamilton, Ont.	10	250	Commenced May 2, 1921. Alleged violation by employers of 44-hour clause in agreement. Underminated.
Printing compositors, Montreal, Que.	10	250	Commenced June 14, 1921. Objection of men to perform work that came from shop where strike existed.
Printing compositors, Montreal, Que.	140	3,500	Commenced July 1, 1921. For increased wages and 44-hour week. Underminated.
Printing compositors, Montreal, Que.	12	300	Commenced September 15, 1922. Employer refused to negotiate a new agreement with the union. Underminated.

STRIKES AND LOCKOUTS DURING DECEMBER, 1923—*Concluded*

Industry, occupation and locality	Number of employees involved	Time loss in working days	Remarks
<b>(a) Strikes and lockouts commencing prior to December, 1923—Concluded.</b>			
<b>MANUFACTURING—Concluded</b>			
<i>Printing and Publishing—Con.</i>			
Printing compositors, Ottawa, Ont.	25	625	Commenced June 1, 1921. For increased wages and 44-hour week. Underminated.
Printing compositors, Toronto, Ont.	256	6,500	Commenced June 1, 1921. For increased wages and 44-hour week. Underminated.
Printing compositors, Vancouver, B.C.	11	.....	Commenced May 2, 1921. For increased wages and 44-hour week. Workers secured work elsewhere and strike declared off November 10.
Printing compositors, Winnipeg, Man.	39	975	Commenced July 1, 1921. Alleged lockout following refusal of employers to renew agreement. Underminated.
Printing compositors and pressmen, Halifax, N.S.	18	450	Commenced May 2, 1921. For shorter hours with same weekly pay. Underminated.
<b>TRANSPORTATION—</b>			
<i>Street and Electric Railways:</i>			
Motormen and conductors, Niagara Falls, Ont.	7	175	Commenced July 2, 1922. For recognition of union. Underminated.
<i>Water Transportation:</i>			
Longshoremen, Miramichi, N.B.	250	.....	Commenced July 9, for increased wages and shorter hours. Information received indicates employment conditions no longer affected.
Longshoremen, Vancouver, Victoria, New Westminster, Chemainus and Alberni, B.C.	1,555	10,885	Commenced October 9, for increased wages and alteration in working conditions. Settlement by mediation of Departmental Officer and work resumed December 10.
<b>(b) Strikes and lockouts commencing during December, 1923.</b>			
<b>MANUFACTURING—</b>			
<i>Leather, fur and products:</i>			
Shoe workers, Montreal, Que.	205	1,538	Commenced December 10, against discharge of employees. After negotiations work was resumed December 19.

## STRIKES AND LOCKOUTS IN GREAT BRITAIN AND NORTHERN IRELAND DURING NOVEMBER, 1923

THE British *Ministry of Labour Gazette* for December contains the following information respecting strikes and lockouts in Great Britain and Northern Ireland during November, 1923, based upon returns from employers and employees:—

**NUMBER, MAGNITUDE AND DURATION.**  
—The number of trade disputes involving a stoppage of work, reported to the department as beginning in November in Great Britain and Northern Ireland, was 38, as compared with 41 in the previous month, and 34 in November, 1922. In these new disputes about 10,000 workpeople were directly in-

involved, and 1,000 indirectly involved (i.e., thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes). In addition, about 43,000 workpeople were involved, either directly or indirectly, in 15 disputes which began before November and were still in progress at the beginning of that month. The number of new and old disputes was thus 53, involving about 54,000 workpeople, and resulting in a loss during November of about 1,016,000 working days.

The dispute involving members of the United Society of Boilermakers and Iron

and Steel Shipbuilders in federated shipyards, which began on April 30, came to an end on November 24.

CAUSES.—Of the 38 disputes beginning in November, three, directly involving 1,500 workpeople, arose out of proposed reductions in wages; 14, directly involving 1,500 workpeople, on other wages questions; three, directly involving 1,700 workpeople, on questions affecting working hours; five, directly involving 1,200 workpeople, on details of working arrangements; six, directly involving 2,900 workpeople, on questions of unionism and non-unionism; and seven, directly involving 800 workpeople, on questions respecting the employment of particular classes or persons.

RESULTS.—Settlements were effected during November in the case of 28 new disputes, directly involving 7,000 workpeople, and eight old disputes, directly involving 13,000 workpeople. Of these new and old disputes, seven, directly

involving 2,000 workpeople, were settled in favour of the workpeople; 11, directly involving 4,000 workpeople, in favour of the employers; and 18, directly involving 14,000 workpeople, were compromised. In the case of six disputes, directly involving 1,300 workpeople, work was resumed pending negotiations

Groups of industries	Number of disputes in progress in November			Number of work people involved in all disputes in progress in Nov.	Aggregate duration in working days of all disputes in progress in Nov.
	Started before Nov.1	Started in Nov.	Total		
Mining and quarrying.....	1	13	14	9,000	32,000
Metal, engineering and shipbuilding.....	5	6	11	41,000	956,000
Transport.....	1	4	5	1,000	11,000
Other trades.....	8	15	23	3,000	17,000
Total, Nov., 1923	15	38	53	54,000	1,016,000
Total, Oct., 1923	18	41	59	56,000	1,167,000
Total, Nov., 1922	21	34	55	9,000	68,000

### UNEMPLOYMENT IN VARIOUS COUNTRIES

THE following paragraphs contain a summary of the latest available statistics on unemployment in the United States of America and in overseas countries.

#### United States

Reports concerning the volume of employment in October, 1923, were received by the Bureau of Labour Statistics from 7,233 representative establishments in fifty-one manufacturing industries covering 2,428,247 employees. Reports from the same establishments in September showed 2,433,120 employees on the payroll, so that the decrease shown by the October figures is 0.2 per cent. Increases in the number of workpeople employed were noted in twenty-six of the fifty-one industries, the greatest (8 per cent) being in the confectionery and ice cream industry; dyeing and finishing textiles comes next with 4.7 per cent, followed by paper boxes (3.6), chewing and smoking tobacco (3.3), shirts and collars (2.7) and glass (2.2);

the remaining twenty-one increases were under 2 per cent. The carriage and wagon industry was the only one showing a large decrease in employment (8.2 per cent), the other decreases being 3 per cent or less.

Comparing the month of October, 1923, and the corresponding month of 1922, returns from 3,185 establishments in forty-three industries show a net increase of 9.2 per cent in the number of workers employed. Thirty-one of the forty-three industries show increases in the number of workpeople employed, the highest being 51 per cent in the pottery industry (reflecting the strike of 1922) and 23.7 per cent in the automobile industry. The greatest decreases were shown by the automobile tire industry with 18.4 per cent, and the carriage and wagon industry with 17 per cent.

#### Great Britain

Reports received by the Ministry of Labour from employers, employment exchanges and trade unions showed a

slight improvement in employment during the month of November, chiefly in pig-iron manufacture, iron and steel manufacture and the cotton industry. Returns received from trade unions, having a membership of 1,149,056, showed the percentage of unemployed to be 10.5 at the end of November, compared with 10.9 at the end of October, and 14.2 at the end of November, 1922. Among workpeople insured under the Unemployment Insurance Acts, who number approximately 11,500,000 and work in almost every industry except agriculture and private domestic service, the percentage of unemployed on November 26, 1923, was 11.5, compared with 11.7 on October 22, and 12.7 at the end of November, 1922. The percentage of unemployed males was 12.1 on November 26 in comparison with 12.4 on October 22. The figures for females for the same dates were 9.7 and 9.8. On November 26 there were on the live registers of the employment exchanges approximately 1,257,000 workpeople, of whom 945,000 were men and 240,000 were women, the remaining 72,000 being boys and girls. On October 29, the total number registered was 1,296,000, of whom 970,000 were men and 246,000 were women. These figures do not include those unemployed persons who have no valid claim to unemployment benefit and who, therefore, do not register at the employment exchanges.

#### Austria

The November issue of *Statistische Nachrichten*, published by the Austrian Department of Statistics, gives the number of persons in receipt of unemployment relief at the end of October as 75,775, in comparison with 78,801 at the end of the previous month and 58,008 at the end of October, 1922. Vienna alone had 50,354 persons in receipt of unemployment relief at the end of October, as against 52,599 at the end of the previous month.

#### Denmark

Reports to the Danish Statistical Department from trade unions and from the Central Employment Exchange pub-

lished in *Statistiske Efterretninger* for November 10, 1923, show that out of a total of 249,586 persons 7.6 per cent were unemployed on October 26, as against 7.3 per cent in the preceding week and 11.3 per cent at the end of October, 1922. Figures are given covering the period from January, 1920, to October, 1923, and these show the proportion of unemployed in the months from June to October of the present year to have ranged from 7 to 8 per cent, the lowest level reached since November, 1920.

#### France

The *Bulletin du Marché du Travail* for December 7, 1923, gives the number of unemployed persons on the "live register" at the employment exchanges in the week ended December 1, 1923, as 10,828 (7,131 men and 3,697 women). The total for the previous week was 11,287 and for the corresponding week of 1922 it was 11,637. Unfilled vacancies numbered 7,800 in comparison with 8,541 during the previous week and 7,455 in the corresponding week of 1922. Placements made by the exchanges totalled 26,137 persons (20,982 men and 5,155 women), exclusive of 2,982 foreign immigrants for whom employment was found. According to returns received up to December 6, 1923, two departmental and eighteen municipal unemployment funds were in operation. The total number of unemployed persons receiving aid is 399 (341 men and 58 women), compared with 434 (377 men and 57 women) the preceding week. In the corresponding week of 1922 three departmental and thirty-two municipal unemployment funds were in operation and aided a total of 2,877 unemployed persons. It will be noted that the number of beneficiaries under the unemployment funds does not represent the exact number of unemployed as these funds do not exist in all localities, and where they are in operation their records of unemployed persons are not complete.

#### Germany

According to recent reports to the German Ministry of Labour, which are given in *Reichsarbeitsblatt* for Decem-

ber 1, 1923, unemployment in Germany has reached proportions hitherto unknown in that country. Reports from trade unions show that of 4,812,000 members in 37 unions, 917,384, or 19 per cent were wholly unemployed on October 27, as against 9.9 per cent at the end of the previous month and 1.4 per cent in October, 1922. In addition there were about two million out of four and one-quarter million workers (47.3 per cent) on short time. The report states that, owing to the great increase in short-time working, these figures must be accepted with reserve.

In accordance with a recent order, returns of the number of unemployed in receipt of unemployment benefit are supplied by the employment exchanges. Provisional figures show on November 15, 1,249,855 totally unemployed persons and 1,772,108 partially unemployed persons being assisted by out-of-work donations. It is pointed out that there may be some overlapping in these figures which would make the total slightly lower. Applications for work in October numbered 1,660,000, compared with 1,380,000 in the preceding month, while vacancies notified by employers were 276,885, as against 343,084 in September.

#### Belgium

The *Revue du Travail* for November 30, 1923, gives revised figures of unemployment for September, 1923, and provisional figures for October. In September the Ministry of Labour received returns covering 651,568 members of approved unemployment insurance societies. Of these 3,008 (0.5 per cent) were totally and 6,922 partially unemployed on the last working day of the month. The percentage of totally unemployed in August was 0.6 per cent and in September, 1922, 1.4 per cent.

Provisional figures for October are made up from returns from 1,586 unemployment insurance societies with a total membership of 656,247, of whom 12,691 were either wholly or partially unemployed on November 3; 134,652 days were lost through unemployment during the month, or 0.68 per cent of the aggregate possible working days. This

compares with a percentage of 0.79 in the preceding month and 2.05 in October, 1922.

Applications for employment received by the employment exchanges during the month of October numbered 13,280 in comparison with 12,565 in the preceding month. Offers of employment during the month totalled 12,166, compared with 12,476 in September.

#### Netherlands

The December number of the *British Ministry of Labour Gazette*, gives figures supplied by H.M. Commercial Secretary at the Hague, in a despatch to the Department of Overseas Trade. These figures, which were issued by the State Department of Unemployment Insurance, during the week ended November 10, show that out of 267,226 members of unemployment funds 28,698, or 10.7 per cent were unemployed for six days in the week, and 6,590, or 2.5 per cent for less than six days. The percentages for the corresponding week in October were 10.4 and 2.8, and in the week ended November 11, 1922, 8.5 and 2.2.

#### Norway

Information received by the Ministry of Labour, Great Britain, through the courtesy of the Norwegian Central Bureau of Statistics, gives returns from certain trade unions having a membership of 14,111, of whom 7.3 per cent were unemployed at the end of October, 1923, compared with 7.5 per cent in the previous month and 10.5 per cent in October, 1922.

#### Sweden

*Sociala Meddelanden*, November 11, 1923, published by the Social Board, gives returns from trade unions having a membership of 135,994, of whom 10,752, or 7.9 per cent were unemployed on September 30, 1923, as against 8.7 per cent in the previous month and 15.2 per cent on September 30, 1922.

#### Switzerland

*Der Schweizerische Arbeitsmarkt* for December 15, 1923, published by the Federal Labour Office of Switzerland, reports that the total number of unem-

ployed persons on the "live register" of the employment exchanges at the end of November was 27,029, as compared with 24,013 at the end of October and 51,128 at the end of November, 1922. Relief works absorbed 7,330 persons, leaving 19,699 totally unemployed. In addition there were 14,368 partially unemployed. There was less unemployment in the watchmaking trade and in the several branches of domestic service. On the other hand, the unskilled trades, building and allied trades, textiles and food and tobacco industries were among

those showing an increase in the number of unemployed. Vacancies notified by employers numbered 1,811, as against 2,135 in October and 1,161 in November, 1922.

#### Australia

The Quarterly Summary of Australian Statistics, issued by the Commonwealth Bureau of Census and Statistics, gives the percentage of members of trade unions unemployed in the third quarter of 1923 as 7.4 compared with 7.1 in the preceding quarter and 9.6 in the third quarter of 1922.

## RECENT LABOUR LEGISLATION IN BRITISH COLUMBIA

### Summary of Acts passed at Recent Session of Provincial Legislature

THE fourth session of the Fifteenth Legislature of British Columbia began on October 29 and continued until December 21. Several important measures affecting labour were passed, the act to establish a general eight-hour day for industrial workers being the first Canadian act to give practical effect, without reservation or condition, to the Draft Convention on the subject of working hours which was adopted by the International Labour Conference at Washington, in 1919.

#### Hours of Work Act

The most outstanding legislation of the session was the "Hours of Work Act, 1923," limiting the hours of work in industrial undertakings. The Speech from the Throne at the close of the session anticipated that this act would tend towards the betterment of labour conditions and the stabilizing of industrial undertakings in the province. It will be remembered that the British Columbia legislature, in the first session of 1921, enacted a series of measures intended to give effect to the Draft Conventions and Recommendations of the First International Labour Conference with the reservation, however, that these Acts should, with one exception, remain in abeyance until similar measures were passed by the other Provinces of Canada. Among these acts was the

Hours of Work Act (statutes of 1921, Chapter 22), which, subject to the condition mentioned above, provided for an 8-hour day in industrial undertakings. Bills were introduced at subsequent sessions to remove the contingent section and render the act operative without undue delay; but the amending bills were defeated. During the session just passed, however, the Hours of Work Act, 1923, was introduced and passed as a Government measure, its provisions being similar to those of the earlier act but with some important differences, for instance, instead of the arrangement whereby regulations under the act were to be made by the Lieutenant-Governor in Council, a Board of Adjustment is to administer the act and grant exceptions therefrom. The new act will take effect from January 1, 1925. Its provisions are briefly as follows: Industrial undertakings are defined in practically the same terms as in the earlier act, both acts applying to mines and quarries, factories, shipbuilding yards, power stations, etc.; railway construction and maintenance and other construction work, but excluding the agricultural and horticultural industry. The working hours of persons employed in any public or private industrial undertaking as so defined (other than one in which only members of the same family are employed) must not exceed eight in the

day and forty-eight in the week, supervisors, managers and persons employed in a confidential capacity being excepted. Provision is made whereby this time limit may be exceeded in cases where a different arrangement of daily hours is made by agreement between the workers and their employers, provided that the working hours must not in any case be more than nine hours in any day, or more than 48 in any week. Exception to this rule is permitted in cases of accident or other contingency, or in work connected with continuous processes, the limit of working hours in the last mentioned exception being increased to 56 hours for the average week. A Board of Adjustment composed of three members appointed by the Government with the Deputy Minister of Labour as chairman will have charge of administering the Act, with full power to hold inquiries and to make regulations in regard to industries temporarily or permanently excepted from the limitation of hours. Such exceptions may only be made after inquiry, the Board being also required to fix the maximum number of additional hours permitted in each industry so excepted; and to see that the rates of pay for overtime shall be at least 25 per cent more than the regular rate. The Board has also power to confirm agreements already in effect in regard to the length of the working day, provided that the average number of working hours per week covered by such agreement shall not exceed 48. Employers may be required by the Board to fix notices at their works setting forth the hours to be worked, the rest intervals, etc., and to keep a record of additional hours worked. The Board has power generally to exempt after inquiry any industrial undertaking or class of undertakings, in whole or in part, from the operation of the act. Offences against the act are punishable on summary conviction by a fine up to \$1,000. The provisions of the act do not limit or affect in any way the provisions of the Coal Mines Regulation Act, the Metalliferous Mines Inspection Act or the Labour Regulation Act. In the debate upon the bill the Minister of Labour stated that

the employers and the employees would each be represented by one member on the Board. He declined to accept a suggestion that labour appoint its own representative, but promised that labour organizations would be consulted when the appointment was under consideration.

An amendment to the Shops Regulation Act gave authority to Municipal Councils to prohibit hawkers and pedlars from selling their wares during the hours when shops within the municipality are closed under the Weekly Half Holiday Act.

The age at which boys may be employed in factories was by an amendment to the Factories Act, raised from 14 to 15 years, the minimum age of employment being now the same for children of both sexes, and also corresponding to the age limit for the compulsory attendance of children at school.

The Women's and Girls' Protection Act gives authority to municipal police chiefs and provincial police inspectors to control the employment of a white woman or girl, or of an Indian woman or girl in any place of business or amusement owned, kept or managed by a person of questionable character, Chinese or other, or the frequenting of such places by white or by Indian women. The section which was added to the Municipal Act in 1919, prohibiting the presence of white women in Chinese places of business, was repealed.

The Police and Prisons Regulations Act (Revised Statutes of 1911, Chapter 180) was revised and amended in several sections relating to the administration of police affairs. The section of the original act which permitted the employment of prisoners outside gaol was retained, the Attorney-General explaining that this practice was necessary in rural prisons where no occupation could be afforded to prisoners.

The hours of labour of firefighters in certain municipalities were the subject of two acts, the Fire Departments Two-Platoon Act, and the Fire Departments Hours of Labour Act. The first of these acts makes the two-platoon system operative in the municipalities of Van-

couver, Victoria, New Westminster, Point Grey, and South Vancouver. The second act allows one day off in seven to firemen in the same municipalities, in addition to the periods during which they are off duty under the provisions of the Two-Platoon Act. These acts are similar in their provisions to acts now in force in Ontario (Statutes of 1920, Chapter 88; 1921, chapter 80.)

The Coal Mines Regulation Act was amended in the sections relating to the notification of accidents in mines, such notification being called for not only in cases of fatal accident, as formerly, but in every accident due to ignition of gas or dust underground (other than ignition of gas in a safety-lamp); underground fires, breakages of ropes or chains, overwinding cages, inrush of water from old workings, and any other dangerous occurrence. Penalties up to two years' imprisonment were provided for persons knowingly making false reports. The maximum penalty for general offences against the act was raised from \$10 to \$100 for the first offence, and from \$100 to \$1,000 for an offence continued after warning has been received.

The legislature unanimously passed a resolution on November 27, strongly condemning, on economic and social grounds, any proposal to allow an Ori-

ental to vote in the Province, either in Provincial or Dominion elections; and urging the Federal Government "to take no steps that would interfere with the undoubted right of the Province to prescribe the form and extent of its own franchise, and further urge the Government of Canada, when defining its Dominion franchise, not to enfranchise Orientals." The preamble to the resolution recited that proposals to the effect that Canada should enfranchise natives of India had been laid before the Imperial Conference; that practically the whole Hindu population of Canada resides in British Columbia; that the franchise in India is so limited that if the Canadian franchise were on the same basis less than a score would be able to vote, and that the Hindu residents have expressed no desire for the franchise.

Another unanimous resolution of the legislature urged upon the Federal Government and the Directorate of the Canadian National Railways the advisability of investigating thoroughly the suggested railway route from Prince George to the Peace River district, as the most economic for the movement of grain from the Peace River to the Pacific Coast; and also as promising to open up a greater area of territory having traffic possibilities for the Canadian National Railways.

---

## LEGISLATIVE PROGRAMME OF ALBERTA FEDERATION OF LABOUR

### Delegation presents labour demands to Provincial Government

A DELEGATION representing the Alberta Federation of Labour and District 18, United Mine Workers of America, waited on the premier and cabinet of Alberta on December 10, to submit a programme of proposed legislation and amendments to existing acts. In his reply Premier Greenfield intimated that a number of the requests appeared to be reasonable and would receive the serious consideration of the Government. The memorandum pre-

sent by the delegates contained the following requests:—

1. Amendments to the Workmen's Compensation Act providing for extension of the scope and for larger benefits.

2. Amendments to the Mines' Act, providing for greater protection for employees.

3. A new Mechanics' Lien Act, which will guarantee adequate protection to the wages of all workers, and provide

that wages will have preference over all other claims.

4. In connection with the administration of sanitarium for the care and treatment of consumptives that provision be made which will guarantee that treatment and care given in these institutions shall be free to all.

5. Legislation that will compel operators of industries—where townsite and houses are owned exclusively by operators—to provide adequate family accommodation for their employees and rooming accommodation for single men with not more than two persons to a room.

6. An amendment to the schools ordinance making it compulsory for all children to attend school until they reach the age of sixteen years.

7. The adoption of the proportional representation method of voting in the election of members to the provincial legislature.

8. The enactment of a law providing for a full day's holiday each week for employees of permanent fire departments.

9. Amendments to Mothers' Allowance Act, to include wives where desertion occurs and to provide an allowance compatible with the cost of living.

10. Pending a permanent scheme of unemployment insurance, that the government provide employment through public works. Failing such that relief be granted to meet all needy cases.

11. That legislation be passed which will put into operation the eight-hour day and forty-eight-hour week as provided by the Labour conference in connection with the League of Nations and Part 13 of the Treaty of Versailles.

12. That the Alberta legislature assume financial obligations in connection with the promotion and maintenance of educational facilities of the province with provisions that all school supplies be furnished free to all school children and that a system of free medical, surgical, dental and optical treatment to all school children be put into operation.

12a. Amendments to teachers' contracts which will provide: (1) For an appeal in the case of unjust dismissal.

(2) For representation on behalf of the teacher at school board meeting called for the purpose of discussing reasons for dismissal. (3) For sufficient notice of such a meeting to permit teacher to prepare a defense.

13. Amendments to the Motor Vehicle Act which will provide that drivers of motor vehicles must possess proper qualifications.

13a. The enactment of an Industrial Conditions Act.

14. Amendments to the Minimum Wage Act which will provide:

(a) The elimination of conferences between employers and employees as a basis of determining wages.

(b) Empowering the board to regulate overtime and remuneration for same.

(c) Empowering the board to have a check on training of apprentices where special rates are made for such employees.

(d) That the Act apply to all towns with a population of 1,000 or over.

(e) That male minors under the age of 18 years be included.

In connection with the operation of the Minimum Wage Act, the memorandum states: "We desire to bring to the attention of the government what we consider to be unjust action on the part of the Minimum Wage Board. A year ago, after a thorough investigation throughout the province, the board adopted a report and made certain awards under the Act. A minimum wage of \$14 per week was fixed for female employees in industry. This decision of the board was unanimous. The orders were to go into effect on April 1 of this year, but just prior to that date the board met and suspended the \$14 minimum wage in orders Nos. 1, 2 and 6 until September 1. Early in September the \$14 minimum in orders 1, 2 and 6, was again suspended until November 15 and finally until December 1. In the meantime the board held conferences between employers and employees and decided to reduce the minimum in Orders Nos. 1, 2 and 6 to \$12.50 per

week. This was done in spite of the fact that, as has been pointed out before, the \$14 minimum was arrived at after a thorough investigation throughout the whole province and the decision was unanimous. There has been no decrease in the cost of living which would warrant a decrease in the minimum wage. On the contrary, there has been a slight increase according to the *Labour Gazette*." The memorandum concludes:

"We desire to protest against the form of conferences held between employers

and employees. We have every reason to believe that there was intimidation of employees and the very fact that unorganized women and girls were compelled to give evidence in the presence of their own employers should be sufficient evidence of the impossibility of securing proper representations on behalf of the girls through such conferences. The only cases where employees differed with their employers at the conference were cases in which the employees were protected by being members of a trade union."

### THE DEVELOPMENT OF VOCATIONAL EDUCATION IN CANADA

UNDER the provisions of the Technical Education Act the Dominion Government shares equally with each of the provincial governments in all expenditures on approved vocational education of secondary grade. The Act has been in operation since July 1919, and during the four years ended last March the Dominion Government has paid to the provinces a total of \$2,135,699. Somewhat more than this amount was expended by the provincial governments owing to the fact that Ontario and Alberta have earned more money than was available under the provisions of the Act during each of the past three years. The total expenditures from all sources on work coming within the provisions of the Act during the past four years exceeds \$10,000,000. This does not include expenditures on agricultural education, manual training or the domestic science classes in connection with the regular public and high school work. There is available for the use of the provinces during the current year the sum of \$1,866,966.57, which is distributed as follows: British Columbia, \$128,989.99; Alberta, \$77,725.40; Saskatchewan, \$201,058.96; Manitoba, \$173,711.30; Ontario, \$347,636.30; Quebec, \$588,376.47; New Brunswick, \$127,321.23; Nova Scotia, \$169,256.82, and Prince Edward Island, \$52,920.10.

At the close of the past school year, there were in Canada 70,300 pupils in approved vocational classes in 156

centres. The enrolment was distributed as follows: 16,242 in 54 day schools, 53,080 in 156 evening schools and 978 in correspondence departments maintained by Nova Scotia, Alberta and British Columbia. The teachers employed numbered 2,674, and 290 teachers and prospective teachers received special instruction in summer training schools conducted by four provinces.

Some idea of the character and extent of the work being assisted by federal grants may be obtained from the following brief summaries of the principal developments in the various provinces during the past year.

The work in Prince Edward Island was confined to the Provincial Agricultural and Technical School at Charlottetown with an enrolment of 177 students. Plans are being made for extending the work to include household arts courses for girls and women.

There was an increased enrolment in every branch of the work in Nova Scotia. New classes for men engaged in the deep sea fisheries were organized. The correspondence division has succeeded in establishing combined correspondence and evening classes for plumbing apprentices, and efforts are being made to provide similar classes for other industries. The students in all classes numbered 4,111.

The total enrolment in vocational classes in New Brunswick was 1,227.

Short term classes for automobile mechanics were introduced during the winter and the Vocational Education Act was amended so as to centralize the control of all educational work under the Provincial Board of Education. The summer training school was attended by 92 teachers from all parts of the province.

Approximately 6,650 pupils attended vocational classes in Quebec during the past year. A provincial school of fine arts was opened in Quebec City and another was under construction in Montreal. A pulp and paper school was opened in Three Rivers, and plans are under way for establishing apprentice classes in Montreal.

There was a continued growth in all branches of the work in Ontario. The total enrolment in all classes was 42,983, and schools were conducted in 52 centres. Over \$5,000,000 has been spent on buildings for vocational classes during the past three years, and new day schools were opened or were in course of construction in eleven cities. Extensive changes were made in the courses of study, and the work was improved in many ways.

Vocational education made no progress in Manitoba during the year, but arrangements were made for a new summer course in home-making at Winnipeg for girls from all parts of the province. The total enrolment in all classes was 3,485.

In Saskatchewan there was very little change during the year. Two new collegiate buildings were in course of construction at Regina and Saskatoon, in both of which vocational classes will be accommodated. The reported enrolment in all vocational classes was 2,361.

Alberta has an enrolment of 3,770 in day, evening and correspondence classes, 281 of whom attended the Provincial Institute of Technology at Calgary. A new technical school was opened at Edmonton.

In British Columbia the enrolment in vocational classes of all kinds was 5,536. The teacher-training activities were extended to include courses for commercial teachers, home-making teachers and shop teachers, in addition to the more elementary course for manual training instructors.

## WORKMEN'S COMPENSATION IN NEW BRUNSWICK

### Rates of Assessment of Employers in Various Industries

REFERENCE has been made in recent issues of the LABOUR GAZETTE to the rates of assessment under the Workmen's Compensation Act of New Brunswick (September, 1923, page 977; August, 1923, page 829, etc.), and the objections which had been made by certain employers, especially in the lumbering group, to the amount levied upon their industry by the Board.

In accordance with the provisions of the Act (sections 47 and following) the Board has given notice of assessment of the various industries at the rates mentioned below, the assessments being based upon estimates of the amounts necessary to provide funds in each of the classes sufficient to meet all claims

for compensation payable during the year 1924. Employers were required to furnish the Board before January 1 with an estimate of their probable pay-roll for the year, together with other information required for the purposes of the Board, employers who refuse to furnish such estimate or information being liable to a penalty up to \$20 a day for each day of default. The rates of assessment vary according to the risks of the industry from \$10 for diving, to 20 cents for "safe" occupations such as the manufacture of clothing, whitewear, etc. The rates of assessment for 1924 in industries which are assessed over \$1 are as follows, the corresponding figures for 1923 being also shown:—

**Class I (mining, quarrying, etc.)**

	1924	1923
Glass products, etc.....	\$1.00	\$1.00
Quarrying, etc.....	3.00	2.50
Coal mining.....	3.50	2.50
Mining (other than coal).....	2.00	2.00
Stripping operations in coal mining.....	2.75	1.50
Manufacture of bricks, tiles, etc.....	2.00	1.00
Manufacture of cement, etc.....	2.00	1.50
Boring gas, and oil wells, etc.....	3.00	3.00
Manufacture of oil from shale.....	2.50	2.50

**Class II (lumbering, saw mills, etc.)**

Saw-mills, shingle mills, etc.....	4.00	3.00
Planing mills, etc.....	2.00	2.00
Logging, river driving, etc.....	4.00	4.00

**Class III (manufacturing steel, etc.)**

Manufacture of saws, skates, stoves, pumps, tools, implements, etc.....	1.25	1.00
Car building; engines, iron and steel foundries, machine shops, boilers, etc.....	1.25	1.00
Erection of steel buildings.....	7.00	7.00
Garages, etc.....	1.00	0.80
Installation of machinery.....	1.50	1.50
Manufacture of bolts, nuts, etc.....	2.00	1.00
Manufacture of oxygen gas, etc.....	2.00	2.00
Steel shipbuilding and repairing.....	2.50	2.50
Wagons, balcksmith shops, etc.....	1.00	1.00
Battery service.....	2.00	1.00

**Class IV (Manufacturing—miscellaneous)**

	1924	1923
Cutting and storing ice.....	\$1.70	\$1.70
Compression of hay (not farming).....	1.00	1.00
Canning fruit, fish, etc.....	1.50	1.00
Manufacture of beverages, etc.....	1.00	0.90
Flour mills, etc.....	1.00	1.00
Fertilizers.....	1.50	2.00
Sugar refineries.....	1.50	1.20
Tanneries, etc.....	1.60	1.20
Warehousing.....	1.00	0.90
Junk shops.....	1.00	1.00
Window cleaning as a business.....	3.00	3.00
Caretakers.....	1.00	1.00
Distribution fuel oil for steamers, etc.....	2.00	2.00

**Class V (building construction)**

General construction.....	2.20	2.20
Chimney stacks.....	3.00	3.00
Shipbuilding (wood).....	2.50	2.50
Electric wiring, plumbing.....	1.00	1.00
Housewrecking or moving.....	5.00	5.00
Work on high steel structures.....	5.00	5.00
Moving of machinery, etc.....	2.50	2.50

**Class VI (Construction of bridges, electric railways, etc.)**

Bridges (wood).....	4.00	2.50
Bridges (steel).....	7.00	7.00
Concrete work.....	2.00	2.00
Electric power lines, etc.....	1.00	1.20
Excavations.....	4.00	4.00
Roads and streets.....	1.80	1.50
Paving material.....	1.00	1.00
Water works maintenance.....	1.00	1.20
Sewers and water works.....	2.00	2.50
Trenching for pipes.....	1.50	1.50
Telegraph and telephone operation, extension, repairs, etc.....	2.00	2.00
Painting bridges.....	5.00	5.00
Wood stave pipe insulation.....	2.00	2.00

**Class VII (storage dredging, etc.)**

Construction of docks, etc.....	2.00	2.00
Diving.....	10.00	10.00
Express companies.....	1.00	0.90
Fishing vessels, ferries, river and harbour steamers, tugs, etc.....	2.00	2.00
Fish traps.....	2.20	2.20
Marine wreckage and salvage.....	5.00	5.00
Railway operation.....	2.00	2.00
Dry docks, maintenance.....	2.50	2.50
Stevedoring (scows and cars).....	1.50	1.50
“ (Bay of Fundy).....	3.50	3.25
“ (other than Bay of Fundy).....	3.00	2.75
Tunnelling, rockwork, blasting.....	5.50	5.50
Marine warehousing, etc.....	1.50	1.50
Railway construction.....	3.50	3.00
Concrete or wood dam construction.....	3.00	3.00

**WORKMEN'S COMPENSATION IN BRITISH COLUMBIA**

THE Workmen's Compensation Board of British Columbia has prepared the following statement for the information of employers and others who are not familiar with the provisions of the workmen's compensation act and its practical working:—

1. However small the operation may be every employer engaged in any industry within the scope of the Act is required to report to the Board previous to the commencement of same. Failure to do so renders him liable for the costs of all accidents occurring before making such report.

2. The amount of assessments required from the employer in any class depends directly upon the cost of the accidents in that particular class, so that to the exact extent to which you prevent accidents, you reduce assessments upon your class with a consequent saving in cost to you. You should familiarize yourself with the Accident Prevention Regulations. Failure to install the necessary accident prevention requirements makes you

responsible for additional assessments as well as the cost of each accident occurring as a result of such failure.

3. Assessments are based on the estimated pay-roll of each employer and are called up in instalments as the money is needed to pay the cost of accidents that have occurred. Only enough instalments are requested as are needed to pay for the year's accidents. These instalments do not cover any particular definite portion of the year. When the operation ceases, or the end of the year comes, an audit is made of the pay-rolls and an adjusted assessment is sent out for the underpayment, or a credit is given for the overpayment. Proper pay-rolls should be kept for production when required.

4. By the system in force no "reserves" are accumulated. The assessments collected during the year pay the complete cost of the accidents for the year. That cost also includes the total cost of the pensions to the workmen permanently crippled and to the dependents of those killed in industry during the year. This pension fund is not a "reserve" but is simply a fund already expended,

but for the time being held in trust for those to whom it belongs. Employers commencing operations in the years to come consequently are not burdened with any portion of the cost of accidents occurring in the years prior to their commencing business.

5. All employers, whose operations are under the Act, are required by the Act to deduct from the wages of their employees one cent for each day or part of a day worked by them, and to remit the same to the Board for the credit of the Medical Aid Fund, on the first days of January, April, July and October of each year, without any notice from the Board.

6. Special attention is called to the "Optional Protection" clause. The employer, members of his family (as defined by the Act), or partners in a firm are not covered under the Act except by special application. If it is desired that the employer personally, or any members of his family employed by him, be entitled to the same benefits under the Act as are afforded the workmen, a request should be made to the Board for the proper form on which to make application for such protection. This protection terminates at the end of the calendar year when a fresh application for a continuance must be submitted. The minimum amount of wages of an employer acceptable in such application for optional insurance is \$1,200 per calendar year or any part thereof. The maximum amount of wages to any workman upon which compensation is paid is \$2,000 per year. The amount at which such protection is given is to be included in the pay-roll, and assessments are payable in respect of same, in addition to the Medical Aid dues. Personal coverage to employers ceases when they cease to employ workmen.

7. The Act provides that on the failure to make prompt payment of assessments to the Accident Fund or Medical Aid Fund, a penalty of 5 per cent is imposed for the first month of default, and 1 per cent for each additional month thereafter, together with the

costs of any accidents occurring during any period of delinquency.

8. The injured workman, (except those covered by Approved Medical Aid plans), has the right to select his own physician. Employers are requested not to interfere with this right. Should a change of doctor be desired by him, written permission for change must first be obtained from the Board.

9. First Aid equipment should be maintained in accordance with the First Aid Regulations, and be readily accessible at all times. Prompt use of this service will prevent trifling injuries from developing into costly claims.

10. When hospital treatment is necessary the employer is required to provide the injured workman with immediate transportation to the nearest hospital where the necessary treatment is available for the particular injury sustained.

11. All accidents should be thoroughly investigated by the employer, or responsible official, and his report containing complete and accurate particulars, should be submitted at once to the Board. Information so supplied is treated as strictly confidential. The practice of permitting junior officials to complete employer's reports on accidents is dangerous. A report on your behalf favourable to a claimant is tantamount to a request to the Board to pay the cost of the accident. The person signing your reports should be a person whom you would entrust with handling your funds. The cost of claims allowed fixes absolutely the amount which it is necessary to collect from employers by way of assessments.

12. Forms for reporting accidents may be obtained from any Government agent, or by applying to the Board, 402 Pender Street West, Vancouver, B.C.

The co-operation given to the Board in the past has been appreciated and we trust that the same co-operation will continue in the future.

## OCCUPATIONAL DISEASES IN THE PAINTING INDUSTRY

THE Journeymen Painters and Allied Crafts Health Department of New York city, a department opened in July, 1922, by the New York section of the Brotherhood of Painters, Decorators and Paperhangers of America for the prevention of trade diseases, has recently issued a report on the first 267 men examined. Only two per cent of the men were over 55 years of age and 12 per cent were between the ages of 45 and 54 years. All the men were supposedly in good health, as all members came in turn for examination regardless of physical con-

dition, each local sending its quota. The studies which were divided into three sections dealt, first with men of the average age of 30½ years who had been in the trade over 7 years with 90 per cent of them over 15 years, and second with men of the average age of 38½ years who had been in the trade over ten years with 84 per cent of them over 15 years, and third with men whose average age was 45 years, 85 per cent of whom had given from 16 to 39 years of labour to the painting trade and 9 per cent of whom had been painters for 40

years or over. The record showed that 33 per cent of the men in the latter group were suffering from organic heart trouble, there was one case of active lead poisoning, two men were lead suspects and four had a history of lead poisoning. The following gives the percentages of men suffering from various symptoms in these classes as shown by the report:—

Symptom	Average age of 30 years	Average age of 38½ years	Average age of 45 years
	Per cent	Per cent	Per cent
Loss of weight.....	40	49	46
Headaches.....	13	12	.....
Muscular rheumatism.....	23	31	35
Constipation.....	43	47	41
General weakness.....	10	.....	.....
Stomach trouble.....	26	31	20
Anemia.....	57	60	.....
Arteriosclerosis.....	34	30	60*

\*5 per cent indicated hardening of the arteries to a marked degree.

A summary of the analysis shows that of the 267 painters examined, 165 men, or 60.33 per cent, had occupational dis-

eases—5 men (1.9 per cent) were severe cases; 24 men (9 per cent) were moderately severe cases; 34 men (12.7 per cent) were chronic cases; and 102 men (38.17 per cent) were suffering from various diseases brought on by their trade—88 men, or 35 per cent had non-occupational diseases, and only 14 men, or 5.2 per cent, were in normal health. The conclusions drawn from the findings showed that the painter is exposed to constant dangers from the use of poisonous materials; that the painters' trade is a hazardous one from the standpoint of accidents, the risk being over twice as great as that of the general population; that the dangers of the trade are undermining the health of the young men to an alarming degree; and that exposure to the combined risks of poisonous dusts, fumes and accidents shortens the average life of a painter by at least 16 years. The records of the Brotherhood of Painters, Decorators and Paperhangers of America, covering the years 1914-1921, show that out of 5,484 death claims, 10 per cent, a total of 554, were paid for deaths caused by accidents.

## ANNUAL REPORT OF THE LABOUR DEPARTMENT OF QUEBEC

THE report of the Labour Department of the Province of Quebec for the last yearly period forms part of the general report of the Provincial Minister of Public Works and Labour for the year ending June 30, 1923, recently published. The Deputy Minister of Labour in his annual statement reports on the rapid and marked results which have followed the Act of 1921 for the protection of public buildings against fire, both in actual prevention of fires and also in advancing the interests of the electricians, contractors and workmen affected. This Act, the provisions of which were outlined in the *Labour Gazette* for May, 1921 (page 680), provided for the licensing and inspection of electrical construction work and of heating systems and for the examination and licensing of electrical engineers. Contractors and electricians generally welcomed the application of

the Act when its provisions were understood. Certificates and licenses were issued during the period under review to 2,115 electrical contractors, journeymen electricians, moving picture operators, maintenance and repairmen and other operators, while 360 renewals were registered. The Provincial Bureau of Electrician Examiners held meetings during the year at Ottawa with the Canadian Engineering Standard Association, at which representatives of the other provinces were also present, the purpose being to draw up a uniform code of regulations governing electrical installations which would in time be adopted by all the provinces in Canada.

Good results also followed from the amendments of 1919 to the Industrial Establishments Act, providing that boys and girls aged from 14 to 16 years who wish to obtain work must first apply to the provincial labour department

and obtain employment certificates. On July 1, 1922, the Department had registered 14,024 children, and in the course of last year 2,110 others were added, making the total number of children registered 16,134 on June 30, 1923.

The work of the Department in connection with the securing of fair wages for work under provincial government contracts was advanced during the year by the preparation of a scale of fair wages based on the standards already established by the Federal Government and by municipal authorities, and on actual contractors' wage scales. The new fair wage scale was used by contractors during the year, but owing to a revival of activity in the construction industries the question of fair wages was not often under discussion toward the close of the period under review.

The reports of the Provincial Employment Bureaus indicate a marked improvement in labour conditions over the previous year, especially at Montreal. The building industry obtained the largest number of workers; the

lumber and logging industry came second, and the metal industry third. The demand for farm workers and domestic help always exceeded the available supply. The number of situations filled by the Bureaus during the year was 18,076, compared with 11,903 in 1922; 12,237 in 1921; 13,508 in 1920; and 5,688 in 1919.

Conciliation and arbitration proceedings under the Quebec Trades Disputes Act (Revised Statutes of 1909, article 2489 etc.) were concerned with a dispute in the building industry at Quebec, and in the lumber industry at St. Romuald, at which the department's representatives used their good offices to further agreements. In the case of a dispute between the City of Montreal and its policemen, the Council of Arbitration appointed under the Municipal Strike and Lockout Act (Statutes of 1921, chapter 46) recommended a scale of pay and the granting of one day's leave per week to the policemen. These recommendations were accepted by the policemen's union but not by the City.

## PENSION PLAN OF GRAND TRUNK RAILWAY

### Extension to employees on Western and other lines

THE directors of the Canadian National Railways recently appointed a committee from their own body with powers to extend, as from June 1, 1923, the pension benefits now granted under the Grand Trunk system's pension rules, to employees on western and other lines who had not been included in any existing pension scheme. This extension of the present Grand Trunk plan is, however, a temporary expedient, and will in time be superseded by a new general pension plan covering all Canadian National Railways' employees.

Some of the rules and regulations for the administration of the existing Grand Trunk scheme are outlined below. The scheme was adopted under the provisions of the Grand Trunk Act of 1906-7 (chapter 89) which enabled the Com-

pany to establish a pension fund for their employees. The fund is administered by a pension committee appointed by the board of directors of the Company. Its present members were reappointed last September as follows: W. D. Robb, vice-president; J. E. Dalrymple, vice-president; Dr. J. Alex. Hutchison, chief medical officer; W. C. Chisholm, K.C., assistant general counsel; J. M. Rosevear, general comptroller; J. A. Yates, general treasurer; C. G. Bowker, general manager. All actions and decisions of the pension committee must be confirmed by the Board of Directors. Subject to such confirmation the committee has authority to determine the eligibility of employees to receive pension allowances; to fix the amount of such allowances; and to prescribe the conditions under which such

allowances may be granted; and they may for the government of their own proceedings, make rules not inconsistent with these regulations.

The benefits of the pension system apply to those persons only who are now or hereafter may be in the service of the Company and who have been required to give their entire time and attention to the business of the Company or of the Company and some controlled company jointly. In cases of such joint employment the pension committee will decide the amount of the employees' pay to be taken into account in determining the pension allowance.

It is intended that in future all officers and employees shall be retired on reaching the age of 65 years. The pension committee may, however, upon the recommendation of the Superior Officer, approve of the continuance in the service of the Company of any Officer or employee for such further period as the committee may determine.

The pension committee has power under special circumstances to retire an employee prior to his reaching the prescribed age limit. Any employee after the age of 60 years, with not less than 20 years' continuous service, claiming to be unfitted by reason of permanent physical or mental disability from following his usual or any other suitable employment in the Company's service, may be retired if the Company's chief medical officer certifies to such disability.

Any employee after 10 years' continuous service, who becomes incapable of continuing his service by reason of injuries received whilst actually at work in the employment of the Company, so long as his incapacity continues, is eligible for pension or allowance.

All employees aged 50 years or upwards, and who have been for 15 years or upwards in the continuous service of the Company, may on their discharge (otherwise than for misconduct), be considered eligible for pensions or allowances.

An employee retiring on attaining the age limit of 65 years, provided he has been not less than 15 years in the Com-

pany's service, and an employee retiring under other circumstances or entitled to benefit as above stated, may be granted an annual pension or allowance calculated at the rate of one per cent for each year of continuous service on the highest average rate of his wages or pay during any ten consecutive years of service, the calculation to be made on the gross amount from time to time credited to the employee on the payrolls without deduction of any kind.

(Example.—An employee in continuous service from the age of 30 years to 70 with the highest average rates of wages between 40 and 50 of \$1,000 per annum, would receive forty hundredths of \$1,000, or \$400 per annum.)

For the purpose of ascertaining the length of service of an employee, the period of service, if any, of the employee under the Grand Trunk Western Railway Company, the Detroit Grand Haven and Milwaukee Railway Company or any other railway company controlled by the Company, is considered as if such service had been for the Company.

The pension allowance of a joint employee is based upon the proportionate amount of his wages paid by the Company.

No pension may be at a lower rate than \$200 per annum, except in cases of joint employees.

No employee who sues the Company for damages on account of personal injuries sustained by him in the course of his service has any claim for pension or allowance under these rules.

Pensions are payable monthly in arrears at some station of the Company's System. Pensions, at the request of the recipient paid elsewhere, are subject to the deduction of the cost of transmission.

The date of the compulsory retirement of any employee and of the commencement of his pension is the first day of the calendar month following that on which the specified age is attained.

Absence on leave, suspension or discharge followed by reinstatement within a year, or temporary layoff on account of reduction of force, need not neces-

sarily be considered as a break of continuity of service. If during such absence whether on leave or from suspension, discharge or layoff the employee has entered other employment, it is in the discretion of the pension committee to determine whether or not by reason thereof there has been a break in the continuity of service.

No pension or allowance is assignable, and in the event and during the continuance of any seizure, attachment or garnishment, ceases to be paid. The pension committee may also withhold permanently or temporarily the payment of any pension or allowance in case of any misconduct on the part of the recipient of the same, or of any action on his part inimical to the interests of the Company.

The Secretary keeps himself informed of the whereabouts of all employees who have been retired from the service, and requires satisfactory evidence from each of such employees at least once a year that he still comes within the rules and regulations. The proportion of unpaid pensions of deceased employees is paid up to and including date of death as the pension committee decides.

The acceptance of a pension allowance does not debar a retired employee from engaging in other business, but such retired employee cannot so engage in other business or re-enter the service of the Company, except with the consent of the

pension committee, without forfeiting his pension allowance.

It is not intended in future to appoint to the permanent staff of the Company any person above the age of 50 years, and any one whose employment may be authorized after that age is not eligible for pension.

It is expressly provided that neither by establishing out of its revenues a system of pensions by the Company nor by any other action now or hereafter taken by them or by the pension committee, shall it be construed as giving to any official, agent or employee of the Company a right to be retained in the service or any legal right or claim to have any pension whatsoever, and the Company expressly reserves its right and privilege to discharge at any time such official, agent or employee when the interests of the Company in its judgment may so require, without liability for any claim for pension or other allowance than salary or wages due or unpaid.

The foregoing rules are not intended to apply to employees who are now eligible for pensions from the Superannuation and Provident Fund Association established in connection with the Company so long as they remain so eligible, and they will therefore not be deemed entitled to pensions or allowances under these rules unless and until they withdraw from the said Superannuation and Provident Fund Association.

## MINIMUM WAGES FOR FEMALE EMPLOYEES IN ONTARIO

### Orders governing (1) electrical trades throughout the Province; (2) Departmental stores in Toronto employing more than 150 female workers

THE Minimum Wage Board of Ontario recently issued two orders, one to govern female employment in electrical trades throughout the Prov-

ince, and the other to govern employment in departmental stores in Toronto which employ more than 150 female workers.

#### Electrical Trades

The minimum rates of wages for the various classes of female employees in

electrical trades throughout the Province are shown in the following table:—

Population groups	Experienced adults (over 18 yrs)	Inexperienced adults (over 18 years)	Young girls (under 18 years)
	\$	\$	\$
Toronto.....	12 50	6 months at 10 00 " 11 00	6 months at 8 00 " 9 00 " 10 00
Cities of 30,000 population or over.....	11 50	6 months at 9 50 " 10 50	6 months at 8 00 " 9 00 " 10 00
Cities and towns between 5,000 and 30,000 population	11 00	6 months at 9 00 " 10 00	6 months at 7 00 " 8 50 " 10 00
All below 5,000 population and rural parts.....	10 00	6 months at 9 00 " 10 00	6 months at 6 00 " 7 50 " 9 00

No worker who begins her employment as a young girl is to receive, after she reaches the age of eighteen years, less than the wages prescribed for an inexperienced adult.

The number of inexperienced adults or young girls in any establishment is not to exceed one-third of the total female working force, and the number of these two classes combined must not exceed one-half of the total working force. Temporary employees, that is, those whose term of employment is not more than a month, and establishments employing only four or less female workers, are not subject to the foregoing rule.

The rule with regard to piece-workers is that the wages paid during the first six months' experience must conform to the order, while for piece-workers of more than six months' experience it is sufficient if at least 80 per cent of such workers receive wages which conform

with the order. Wage rates may be averaged for any piece-worker, provided the average is maintained at each payment. Wages received before the order became effective, or more than three months before the date of the payment concerned, are not to be considered in the calculation.

No deduction below the minimum wage line for absence may exceed the value of the time lost, reckoned in proportion to the normal working hours in vogue in the establishments concerned.

An employee required to wait on the premises must be paid for the time so spent, piece-workers being paid for waiting at a rate not less than that fixed for their class.

The Board reserves the right to issue permits for lower wages to handicapped workers.

The order, which is subject to annual revision, became effective on January 1, 1924.

**Large Departmental Stores in Toronto**

The following table shows the minimum rates of wages for the various classes of female employees in departmental stores in Toronto which employ more than 150 employees. (The order governing retail stores in Toronto was outlined in the LABOUR GAZETTE for September, 1921, page 1157, and for retail stores elsewhere in Ontario in the issue of December, 1921, page 1485.)

Class of employees	Minimum wage per week
Experienced adults (18 years or over)	\$ 12.50
Inexperienced adults (18 years or over)	1st 6 months 10.00
	2nd " 11.00*
Young girls (under 18 years) age at commencement—16 years	1st 6 months 8.00
	2nd " 9.00
	3rd " 10.00
	4th " 11.00*
" " 16½ years	1st 6 months 8.50
	2nd " 9.50
	3rd " 10.50*
" " 17 years	1st 6 months 9.00
	2nd " 10.00
	3rd " 11.00*
" " 17½ years	1st 6 months 9.50
	2nd " 10.50*
Saleswomen reaching age of 18 years without experience	1st 6 months 11.00*

\* Thereafter full minimum wage for experienced adults

The number of inexperienced adults or young girls must not in either case exceed 25 per cent of the total female working force.

Females working for less than 36 hours in any one week are to be considered as part-time employees and paid at rates not less than the established minimum rate reckoned on an hourly basis for the time they have worked in proportion to the normal week in vogue in the store or shop.

This order governs the selling office and mail order employees, but not the restaurant or operative employees. It took effect from September 1, 1923.

**Working Hours in Laundries**

The Minimum Wage Board is now reported to be engaged at the present

time in making a careful survey of the hours of labour in several industries. The subject of working hours in laundries, dyeworks and dry-cleaning establishments in Ontario was discussed before the Minimum Wage Board at a meeting held at Toronto in December, the views of the employers and workers being presented by representatives of each party. The Board subsequently fixed the working hours in the laundry industry at fifty in the week for all Ontario. These hours constitute the maximum period in which the minimum wage may be earned, and all hours worked in excess of fifty per week must be paid for as overtime. The laundry workers delegates requested a minimum week of 40 hours and a maximum of 44 hours, and further, that the minimum wage for experienced laundry workers should be raised to \$15 per week. Suggestions made on behalf of the laundry owners included the following draft rules:—

The working period for which the minimum wages shall be paid shall not be less than 44 nor more than 50 per week.

Work in excess of 50 hours per week shall be counted as overtime and shall be paid for at not less than the minimum wage rate fixed by this order and reckoned on the basis of a 50-hour week.

Work for less than 44 hours per week may be counted as short-time, and shall be paid at an hourly rate not less than the minimum wage rate fixed by this order, reckoned on the basis of a 50-hour week.

The wage minimums shall be payable for the work period actually in vogue in any establishment, within the limits of from 44 to 50 hours per week. Pay may be proportionately deducted from any worker for time lost.

## LABOUR AND WAGES IN VARIOUS INDUSTRIES IN CANADA

### Report of the Dominion Bureau of Statistics on Dairy Factories of Canada

THE Dominion Bureau of Statistics recently issued a report on the dairy factories of Canada for the calendar year 1922. Previous reports in this series relating to various industries were outlined in the issue of the *LABOUR GAZETTE* for November 1923 and in previous issues.

#### Statistics of Dairy Factories

The number of dairy factories in operation in Canada in 1922 was 3,095, comprising 1,166 creameries, 1,554 cheese factories, 352 combined butter and cheese factories, and 23 condensed milk factories. Compared with the previous year, the creameries show an

increase in number of 74, while the cheese factories, combined factories and condenseries show decreases respectively of 65, 24 and four. The total number of patrons (farmers who supply milk and cream to dairy factories) for all the factories in 1922 was 313,792, compared with 312,369 in 1921 and 276,693 in 1920. The following table shows by provinces the number of factories for 1922 and the two preceding years. In the general tables the creameries, cheese factories and factories making both butter and cheese are combined and the statistics of the condensed milk factories are given separately.

Province	Butter and Cheese Factories									Condensed Milk Factories		
	Creameries			Cheese Factories			Combined Factories					
	1920	1921	1922	1920	1921	1922	1920	1921	1922	1920	1921	1922
Prince Edward Island.....	12	12	12	20	18	18	4	4	3	1		
Nova Scotia.....	22	23	23	2	1	1				2	2	1
New Brunswick.....	15	14	14	22	24	21	1					
Quebec.....	634	677	739	813	759	706	361	330	307	1	1	
Ontario.....	188	202	204	816	803	795	33	35	34	21	22	20
Manitoba.....	53	45	44	4	6	3						
Saskatchewan.....	46	55	59	1	1	1						
Alberta.....	48	40	46	2	5	6	5	5	8			
British Columbia.....	27	24	25	3	2	3	1	2		3	2	2
Total.....	1,045	1,092	1,166	1,683	1,619	1,554	405	376	352	28	27	23

Of the total number of butter and cheese factories, 405 were operated by co-operative associations, 517 by joint stock companies and 2,150 by individuals and partnerships; and of the condenseries, 22 were operated by joint stock companies and one was individually operated. The number of butter and cheese factories in operation for periods of from 120 to 179 days was 918, and for periods of from 180 to 239 days, 1,073. The factories operating for periods of 240 days and over numbered 905, and for periods of less than 120 days, 176. Nearly all the condenseries were in operation for the full year, 20 being in the group of those operating 240 days and over, one in the

group of 180 to 239 days, and two in the group of 120 to 179 days.

The total value of capital employed in the operation of dairy factories in 1922 was \$36,824,319 of which \$30,648,068 was invested in the butter and cheese factories and \$6,176,251 in the condensed milk factories. Of the \$30,648,068 invested in the butter and cheese factories, \$13,331,506 was invested in the province of Ontario and \$7,409,683 in the province of Quebec. The total value of production of all factories in 1922 was \$104,972,046, comprising butter, \$53,453,282; cheese, \$21,824,760; condensed products, \$6,839,232; whole milk and cream sold, \$17,916,443; ice cream, \$3,669,564; and miscellaneous, \$1,268,-

765. The total quantity of milk required to supply the factories in 1922 was 5,716,061,818 pounds (including butter fat content of cream delivered, 104,113,601 pounds) an increase over the previous year of 229,159,845 pounds. The number of cows furnishing the milk supplied to the factories was estimated at 1,943,977 in 1922 as compared with 1,851,199 in 1921 and 1,718,999 in 1920. The number of persons employed in the dairy factories in 1922 was 11,156 and in 1921, 11,155. The expenditure for the operation of the factories during 1922 was \$98,742,196, including \$9,351,329 for salaries and wages, and the amount of \$76,477,009 paid to patrons. In 1921 the capital invested in the dairy factories was \$35,257,831; the value of production, \$111,924,017; and the expenditures, \$106,320,990, including salaries and wages \$9,211,093 and

amount paid to patrons \$81,422,226. The following table shows the average price throughout the Dominion of dairy products in the years 1920, 1921 and 1922. Prices for milk and cream are those received by the patrons. The prices for butter and cheese are wholesale prices received by the factories:—

Products	Prices		
	1920	1921	1922
Milk (per 100 pounds).....	\$ 2 40	\$ 1 57	\$ 1 42
Cream (per pound of butter fat).....	0 56	0 39	0 36
Creamery butter (per pound).....	0 56	0 37	0 35
Cheese (per pound).....	0 26	0 17	0 16

The number of employees of different classes and the amount paid in salaries and wages are shown in the following table:—

Class of employment	Butter and Cheese factories		Condensed milk factories	
	No. of employees	Salaries and wages	No. of employees	Salaries and wages
		\$		\$
Superintendents and managers (including head butter and cheese makers).....	1,675	2,051,240	48	110,747
Other salaried employees.....	2,036	1,442,553	78	107,281
Employees on wages.....	6,683	5,093,176	636	546,332
Total.....	10,394	8,586,969	762	764,360

In 1921 there were in the condensed milk factories 1,081 employees receiving salaries and wages amounting to \$1,006,627, and in 1920 there were 1,369 persons employed receiving salaries and

wages \$1,144,228. A summary of the total number of employees in the butter and cheese factories in 1922 is shown by provinces in the following table:—

Provinces	Employees			Salaries and Wages		
	1920	1921	1922	1920	1921	1922
				\$	\$	\$
Prince Edward Island.....	92	96	95	36,556	50,661	55,267
Nova Scotia.....	96	138	182	64,207	88,357	116,831
New Brunswick.....	110	120	122	77,027	82,577	86,538
Quebec.....	2,657	2,699	2,695	1,535,965	1,505,945	1,412,792
Ontario.....	4,408	4,712	4,829	3,474,608	3,474,608	3,880,982
Manitoba.....	723	729	810	885,671	861,960	1,011,223
Saskatchewan.....	483	503	543	463,668	507,647	583,493
Alberta.....	814	781	782	838,487	807,732	816,496
British Columbia.....	320	296	336	447,672	418,605	427,774
Total.....	9,703	10,074	10,394	7,823,861	8,204,466	8,586,969

The number of wage-earners employed in the butter and cheese factories on the fifteenth of each month showed a gradual rise from 2,725 in January to 6,683 in July and a gradual decline from July to December 15 when the

number employed was 3,725. In the condensed milk factories, the number rose gradually from 498 in January to 651 in September then showed a decline to December 15, when the employees numbered 550.

### CHILD LABOUR IN THE UNITED STATES

THE eleventh annual report of the Children's Bureau of the United States Department of Labour for the fiscal year ended June 30, 1923, has recently been received. The report states that since the Federal child labour tax law was declared unconstitutional by the Supreme Court in May, 1922, four States—California, Nevada, Washington, and Wisconsin—have petitioned Congress to submit to the States an amendment to the Federal Constitution making possible Federal prohibition and regulation of child labour. A proposed amendment to the Constitution enabling Congress to pass legislation with reference to child labour was favourably received by both Houses but did not come to a vote in either House before adjournment. In 32 of the States the standards of protection afforded children by the State child-labour law were in some particulars below the standard which the Federal law had in effect established. Information obtained by the Bureau showed that in eight of the States—Delaware, Maine, Michigan, Missouri, North Dakota, Rhode Island, South Dakota and Wyoming—improvements had been made in the age and hour standards of the child-labour law but in none of them were the State standards brought up to the Federal Law in every particular. In Rhode Island, the minimum age for work during school hours was raised to 15 years, but the new law is not effective until September, 1924. Maine reduced the maximum daily hours of work for children from nine to eight. Delaware reduced the legal hours of employment for children less than fourteen years of age in canneries and under certain conditions in

other occupations. In Michigan and Missouri, it is stated, the raising of one standard was accompanied by the lowering of another. For three of the States—North Carolina, South Carolina and Georgia—where no action was taken during the year, the following information is given; In North Carolina boys may and do still enter the mills at the age of 12, and boys and girls between 14 and 16 may be employed 11 hours a day. In South Carolina children between 14 and 16 years of age may work 10 hours a day and 55 hours a week. In Georgia children may go to work in factories at 12 years of age if they are orphans or have widowed mothers dependent upon them for support, and they may work 60 hours a week and any number of hours a day. After they reach the age of fourteen and a half years they may legally work all night.

During the year the Bureau received data on the number of children to whom work permits or employment certificates were issued in a number of cities. The figures showed that the increase in child labour which occurred during the war years in practically every important industrial and commercial city in the United States, and which reached its peak in 1918, began to decline in the late summer of 1920, at the beginning of the recent business and industrial depression. With better times in 1922, the number of children taking out their first work permits began to mount. Of the 35 cities for which statistics were secured, 21 reported increases (5 reporting increases of over 100 per cent) and 14 reported decreases. The increases reported were more marked in the latter half of 1922 and the first six months of 1923.

Continuing a series of studies in rural child labour, and its relation to school attendance begun in 1920, the industrial division during the year completed field work in connection with two such surveys and began a third. Approximately 11,000 children under 16 years of age in 14 States working in the cotton fields, on truck crops, in beet and tobacco fields, and on farms in the wheat and corn belts were included in the surveys. From 15 to 40 per cent of the children at work were found to be under 10 years of age; only from 17 to 29 per cent were between 14 and 16 years of age. Approximately 4,600 worked on the home farm, but 3,700 were hired labourers, and of these over 1,000 were seasonal labourers migrating from the cities chiefly for harvest work. From 30 to 60 per cent of the children who did farm work were absent from school to do this work, and about one-fifth of the absentees had missed at least 40 days at school. Largely as a result of their irregular school attendance, from 38 to 69 per cent of the whites and from 71 to 84 per cent of the coloured children were from one to six years behind the grades which at their ages they should normally have reached. In all areas in which comparative material was secured the amount of retardation was much greater among working than among non-working children attending the same schools. Illiteracy was found to be more general in the country than in the city. The report points out that "while it might be assumed that a good compulsory school-attendance law is all that is required to control child labour in the rural districts, the experience everywhere has been that it is impossible to enforce a school-attendance law when the community sanctions or does not prohibit child labour; and too often rural children have suffered from the community's approval or tolerance of their employment so long as it was confined to farm work." The States of Ohio and Nebraska were mentioned as having legislation intended to reach the rural children. In Ohio the child-labour law adopted in 1921 prohibits the employment of children under 16 years of age during school hours except in "ir-

regular service" ("Irregular service" is defined as service which does not involve confinement; does not require continuous physical strain; is interrupted with rest or recreation periods; and does not require more than four hours of work in any day or twenty-four in any week).

Other investigations of child labour included children in street trades, employment of children in Atlanta, work opportunities for subnormal minors, industrial accidents to minors and the minimum wage for minors. In regard to the latter investigation it is stated that thirteen States—Arizona, Arkansas, California, Colorado, Kansas, Massachusetts, Minnesota, North Dakota, Oregon, South Dakota, Utah, Washington and Wisconsin—the District of Columbia and Porto Rico, have enacted minimum-wage legislation which is still on the statute books, and that Texas and Nebraska have passed minimum wage laws which were afterwards repealed. The South Dakota law was enacted in 1923. In addition to women and girls, boys under 18 years of age are included in the laws of California, Colorado, Kansas, Massachusetts, North Dakota, Oregon and Washington, and boys to the age of 21 are included in the Minnesota and Wisconsin laws.

In a summary of child welfare legislation in 1923 it is stated that North Carolina and Rhode Island have adopted the system of public aid to children in their own homes. Changes in the method of administration and the general application of mothers' pension laws were made in Alaska, Arkansas, California, Connecticut, Delaware, Idaho, Illinois, Iowa, Michigan, Minnesota, New York, North Dakota, Pennsylvania, West Virginia, and Wisconsin. Illinois and North Dakota raised the age limit of children for whom aid may be given from 14 to 16, and West Virginia from 13 to 14. Pennsylvania increased its biennial State appropriation for mothers' allowances from \$1,000,000 to \$1,750,000. Colorado provided for aid to mothers for six months before and after childbirth, to be administered as the mother's compensation act is administered.

### THE EMPLOYMENT SITUATION AT THE BEGINNING OF DECEMBER, 1923, AS REPORTED BY EMPLOYERS

THE trend of employment at the beginning of December, as indicated in reports from employers of labour tabulated by the Dominion Bureau of Statistics, was retrogressive, continuing the downward movement which commenced during August. These recent declines, as reflected in the curve in the accompanying chart, were very slight until December 1, when the contraction affected about 3 per cent of the payroll and caused the curve to be on practically the same level as in December, 1922. It was still, however, considerably higher than in the corresponding period of 1921. The tendency at the first of December, 1922 and 1921, had also been unfavourable, although the decreases recorded then were less extensive than in

increases in personnel, almost 8,000 men having been sent to the bush by the reporting firms during the month. Retail stores, moreover, were decidedly busier, as is usual at the time of year.

Employment in all provinces declined; the losses in Quebec, of more than 10,000 persons or 4.6 per cent of the payroll, were especially heavy, while in the Prairie provinces the contractions affected only about 200 workers or .2 per cent. In the Maritime district the largest reductions were reported in lumber mills and on highway and railway construction. Fish canning, iron and steel and building construction also showed curtailment. On the other hand, logging, coal mining, railway and water transportation recorded

1923. The heaviest reductions during the period being surveyed occurred in the construction industries, in sawmills and in iron and steel, as well as in some

According to returns from 5,828 firms, their payrolls aggregated 787,666 persons as compared with 812,664 on November 1, a decline of 3.1 per cent. The losses in construction affected approximately 17,500 workers; these were the largest indicated in that group during 1923. The contractions in sawmills were also very extensive and important decreases were registered in iron and steel and water transportation. Seasonal activity in logging caused substantial the other hand, increases on a large scale were reported in logging and trade. other branches of manufacturing. On

considerable expansion, and retail trade reported seasonal gains. The closing of the summer ports affected employment very extensively in Quebec, some 4,500 persons being released from the shipping and stevedoring group. Railway car and other iron and steel works, sawmills, pulp and paper, stone and clay factories, highway, building and railway construction all showed substantial curtailment of employment at the beginning of December. Leather, rubber and electrical appliance factories, logging camps and retail stores, on the other hand, reported considerably increased activity. In Ontario construction and sawmills registered especially heavy declines, but iron, steel, textile and some other manufactures were de-

cidedly slacker as was also transportation. In this province there was a large increase in personnel in logging camps; retail trade, street railways and edible plant product works also recorded substantial improvement. In the Prairie provinces the construction industries reported especially heavy declines, which, however, were largely offset by substantial increases in logging, on steam railways and in trade. There was a general downward tendency in British Columbia, where sawmills, construction and some branches of manufacturing showed pronounced curtailment. In this province, as in others, logging camps recorded decided expansion; shipping and stevedoring also afforded increased employment. The index numbers of employment in these districts are given in the following table:—

District	Relative weight	Dec. 1, 1923	Nov. 1, 1923	Dec. 1, 1922	Dec. 1, 1921
Maritime Provinces.....	8.7	91.2	95.2	92.1	89.5
Quebec.....	27.6	98.5	103.2	93.9	83.7
Ontario.....	42.0	93.4	96.0	94.4	85.9
Prairie Provinces.....	13.4	99.3	99.2	101.5	95.6
British Columbia.....	8.3	97.8	102.8	95.6	88.9
Canada.....	100.	95.7	98.8	95.1	87.2

Toronto alone of the six cities of which special tabulations are made, showed an increase in employment. The gain there, however, was very slight, the 790 firms making returns having increased their payrolls by 194 persons to 98,395. This increase of .2 per cent was chiefly due to improvement in retail stores, on the street railway and in abattoirs and meat packing plants. Printing shops and telephone works also afforded more employment. On the other hand, construction was decidedly slacker; textiles, iron, steel and confectionery factories also suffered losses. The closing of the summer ports affected employment in Montreal to a considerable extent. Railway car shops, textiles, jewellery, clay and stone works, road and building construction also reported curtailment of employment. Electrical appliance and boot and shoe plants were decidedly busier, and retail trade reported the customary increase at this time of year.

Statements were received from 728 employers, whose payrolls stood at 108,269, as compared with 114,618 in the preceding month. This was a decline of over 5 per cent. Seasonal slackness in sawmilling operations, together with decreases in building and highway construction caused a falling off of about 9 per cent in the employment afforded by the 126 firms in Ottawa making returns. Their payrolls declined from 10,992 persons on November 1 to 10,001 on December 1. The changes in Hamilton were on a smaller scale, those in the iron and steel group being the largest. The production of electrical appliances also showed a reduction. Textiles and some other branches of manufacturing, however, reported improvement, and retail trade registered expansion. An aggregate working force of 26,970 persons was indicated by the 198 employers making returns, whose payrolls had comprised 27,346 workers in the last report. The most decided change in Winnipeg was an increase in retail trade, but declines in a number of industries, notably construction, caused the balance of employment to be unfavourable. Reports were received from 286 firms in that city employing 24,644 persons, or 305 less than at the beginning of November. There was a rather small decrease in employment in Vancouver, 157 persons having been released by the 225 firms whose reports were tabulated. Their payrolls totalled 21,036 persons whereas in the month before they had employed 21,193. A large increase was registered in shipping and stevedoring, but sawmills, electric current plants, street railways and building construction afforded less employment. The following table shows the index numbers of employment in these cities:—

City	Relative weight	Dec. 1, 1923	Nov. 1, 1923	Dec. 1, 1922
Montreal.....	13.8	93.6	99.1	94.7
Toronto.....	12.5	90.2	89.9	92.9
Ottawa.....	1.3	94.3	103.8	98.6
Hamilton.....	3.4	88.5	89.7	88.2
Winnipeg.....	3.1	88.2	88.6	97.8
Vancouver.....	2.7	98.1	98.6	90.7

### The Manufacturing Industries

In spite of improvement in some lines, employment in manufacturing showed on the whole a downward tendency. Sawmills continued to register very heavy seasonal losses; the iron and steel industries also showed considerable contractions and declines on a somewhat smaller scale were indicated in pulp, paper, garment, knitting, clay, stone, electric current, non-ferrous metal and mineral product works. On the other hand, boot, shoe, rubber and electrical appliance factories were decidedly busier, as were also meat packing and slaughtering establishments. Reports were compiled from 3,793 manufacturers employing an aggregate payroll of 435,416 persons, as compared with 449,487 in the preceding month. This was a recession of 3 per cent, which with the single exception of the decrease recorded at the first of the year, was the largest registered during 1923. A very slightly upward movement had been shown at the beginning of December, 1922, but the index number then stood lower by less than one point.

**ANIMAL PRODUCTS—EDIBLE.**—Continued losses were indicated in fish canneries in the Maritime provinces, but abattoirs and meat packing houses were considerably more fully engaged in Ontario and the Prairie provinces. The balance of employment in the edible animal products division was very slightly favourable, there being a net increase of under 1 per cent. The payroll of the 143 reporting firms aggregated 13,469 persons as compared with 13,376 at the beginning of November. Employment during the corresponding period of last year had decreased, but the index number then stood slightly higher than at the period under survey.

**LEATHER PRODUCTS.**—Further expansion was indicated in this industry at the beginning of December, when 550 persons were added to the staffs of the 203 firms making returns. Their payrolls aggregated 17,841 or 3.2 per cent more than in the preceding month. Boot and shoe factories in Quebec and Ontario reported the bulk of the increases, the

gains in the former province being larger. An upward tendency, though on a somewhat smaller scale, had also been shown at the beginning of December, 1922, but employment then was in somewhat greater volume.

**LUMBER PRODUCTS.**—Rough and dressed lumber mills continued to release large numbers of men, while a little improvement was shown in furniture works. According to returns from 715 manufacturers, they employed 44,788 persons as compared with 52,892 at the beginning of November; this represented a decline of 15.3 per cent. All provinces shared in the contraction, but the largest actual loss occurred in Ontario, where some 3,300 men were released from employment in the lumber group. A shrinkage that affected a somewhat smaller number of persons had been shown at the beginning of December, 1922, when the index number stood about 2 points higher than in the same month of 1923.

**PLANT PRODUCTS—EDIBLE.**—Marked improvement was shown in sugar refineries, but fruit and vegetable canneries, chocolate and confectionery works were less fully engaged than on November 1. The additions to staffs were reported largely in Ontario. Statements were received from 287 employers in this division, whose payrolls comprised 27,513 persons or 61 less than in the previous month. The index number of employment in this industry coincided with that reported on December 1, 1922, although employment at that time had shown greater curtailment.

**PULP AND PAPER PRODUCTS.**—Very large reductions in personnel were recorded in pulp and paper mills at the beginning of December, but the losses were partly offset by increases in the production of paper goods and in printing and publishing shops. The decreases were registered chiefly in Quebec and Ontario. The downward trend indicated at the beginning of December repeats that shown during the corresponding period of 1922, when conditions were not quite as favourable as at the present time. A combined payroll

of 52,327 persons was recorded by the 457 firms from which returns were received; this was smaller by 754 persons or 8.1 per cent than the working forces employed by the same concerns on November 1.

**RUBBER PRODUCTS.**—Rubber footwear factories in Quebec afforded increased employment, chiefly owing to the resumption of operations in a large plant which had been closed down for some little time. According to information from 31 manufacturers, their payrolls were increased from 9,337 workers on November 1 to 9,879 at the beginning of December; the difference represented an increase of 5.8 per cent. Moderate improvement had been indicated at the same period of the previous year, but the index number then stood slightly higher than at the beginning of December.

**TEXTILE PRODUCTS.**—The production of thread, yarn and cloth afforded rather more employment than on November 1, while garment, personal furnishing, hosiery, knitting and bedding factories were slacker. The 554 firms making returns, whose payrolls covered 70,140 persons, reported that they had released 775 persons since the last return. Over half of this decline of 1.1 per cent occurred in Ontario, but the tendency in all provinces was unfavourable. The contractions recorded repeat those indicated at the beginning of December, 1922; employment then was on a rather higher level.

**CLAY, GLASS AND STONE PRODUCTS.**—Factories manufacturing clay and stone products showed considerable curtailment of employment at the beginning of December, while no change on the whole was indicated in glass works. An aggregate working force of 9,295 persons was reported by the 117 employers making returns; these firms had 9,923 persons working for them in the month before. This decline of 6.3 per cent was reported largely in Quebec and the Prairie Provinces. An upward tendency had been indicated during the corresponding period of 1922, when the situation had been somewhat better.

**ELECTRIC CURRENT.**—The volume of employment afforded in electric current works was somewhat smaller than in the preceding month, the working force of the 86 operators making returns being 363 less than on November 1. Their payrolls comprised 11,105 persons as compared with 11,468 in the preceding report. A large share of this decline of 3.2 per cent occurred in the Prairie Provinces and British Columbia. The index number of employment in the industry stood some 5 points higher than on December 1, 1922, when contractions, though on a smaller scale, had also been registered.

**ELECTRICAL APPARATUS.**—The trend of employment in electrical appliance works continued to be favourable and the situation was considerably better than during the corresponding period of 1922. Improvement had also been indicated then; the gains then, however, were somewhat less extensive. Statements were tabulated from 31 employers with an aggregate working force of 8,547 persons in comparison with 8,190 at the beginning of November. Firms in Quebec reported practically all of this expansion of 4.4 per cent.

**IRON AND STEEL PRODUCTS.**—Considerable curtailment of operations was indicated by manufacturers in this group at the beginning of December, when 4,201 persons were let out from the staffs of the 634 firms making returns. Their working forces comprised 122,074 persons, whereas at the beginning of November they had employed 126,275 workers. About half of this 3.3 per cent reduction occurred in Quebec, while there were also large losses in Ontario and decreases on a smaller scale in British Columbia. The recessions were most pronounced in railway car shops, while employment in rolling and forging mills, general machinery, fabrication, heating appliance, shipyard, pipe, hardware and sheet metal works also declined. A large increase in activity had been in evidence at the beginning of December, 1922, but the index number then stood very slightly lower than at the present time.

**NON-FERROUS METAL PRODUCTS.**—Smelting, refining, gold, silver, platinum, lead, tin, zinc and copper works were less fully engaged than in the preceding month. Reports were compiled from 109 employers in the non-ferrous metal products division, whose staffs included 11,806 persons as compared with 12,307 on December 1. The difference represented a decrease of 4.1 per cent, of which the greater part was reported in Quebec, Ontario and British Columbia. Employment during the period being surveyed was on a higher level than at the same period of 1922, although employment then had shown an increase.

**MINERAL PRODUCTS.**—Petroleum and gas works, chiefly in Ontario, were slacker than in November; this curtailment of operations repeats that indicated on December 1, 1922. The index then was lower than for the month being reviewed. A total working force of 9,060 persons was indicated by the 72 concerns making returns, who had employed 9,244 in the preceding month. A considerable share of the recession was registered in Ontario.

#### Logging

Continued and very large additions to staffs were reported at the beginning of December in logging camps. The increases exceeded those recorded at the beginning of December, 1922, but the index number then stood slightly higher than at the present time. Returns were tabulated from 225 operators employing 31,714 persons or 7,877 more than on November 1. While all provinces shared in this expansion, the gains in Ontario were the largest.

#### Mining

**COAL MINING.**—Employment in the Maritime coal fields showed an increase, which was partly offset by the declines in British Columbia. The 91 reporting mines indicated a working force of 30,324, which was larger by 161 persons or .5 per cent than in the preceding month. Substantial declines had been registered at the same period of last year, but employment then was in

rather greater volume than during the month being surveyed.

**NON-METALLIC MINERALS OTHER THAN COAL.**—Employment in this division showed a fairly extensive decrease, 423 persons having been released by the 71 employers making returns. As their payrolls comprised 6,310 persons as compared with 6,733 in the preceding month, this represented a reduction of over 6 per cent. Slackness in natural gas production in Alberta contributed largely to the shrinkage. The index number in the month under review stood several points higher than at the beginning of December, 1922; contractions had also been reported at that time.

#### Transportation

**STREET RAILWAY AND CARTAGE.**—Considerable improvement was indicated by street railways in Ontario, while in British Columbia reductions were recorded; elsewhere the situation showed little change. A combined working force of 20,884 persons was recorded by the 107 concerns making returns who had employed 20,535 workers in the preceding month. The difference represented an increase of nearly 2 per cent. The index number was slightly higher than during the corresponding period of 1922, when heavy declines had taken place.

**STEAM RAILWAYS.**—Fluctuations in different districts produced a net increase of .1 per cent in the employment afforded by the operation departments of the railways. In the Maritime and Prairie provinces there were additions to staffs, those in the latter district being considerable. On the other hand, curtailment was registered in Quebec, Ontario and British Columbia. The level of employment, however, continued to be well above that indicated at the same period of the preceding year, when substantial declines had been recorded. For December 1, 1923, 105 concerns and divisional superintendents reported an aggregate working force of 81,784 persons, as compared with 81,698 at the beginning of November.

SHIPPING AND STEVEDORING.—Activity, due to the reopening of the winter ports caused increased employment in this division in the Maritime Provinces, but the closing of the summer ports had a reverse effect upon the situation in Quebec and Ontario. In British Columbia, however, there were increases in payroll. Statements were tabulated from 63 employers whose payrolls comprised 11,911 persons as against 15,582 in the preceding month. Nearly all of this decrease of 23.6 per cent was recorded in Quebec. Employment during the corresponding period of last year had shown an upward movement and the index number stood several points higher than on December 1, 1923.

**Construction and Maintenance**

BUILDING CONSTRUCTION.—Continued curtailment of operations was reported by building contractors at the beginning of December, some 2,700 persons having been released by the 302 builders making returns. Their working forces declined from 27,249 persons on November 1, to 24,506 at the beginning of December. The reductions in Ontario were especially heavy, but shrinkage was recorded everywhere. Declines on a somewhat smaller scale had been registered at the beginning of December, 1922, but the situation then was not as good as during the month under review.

HIGHWAY CONSTRUCTION.—Further heavy reductions were indicated in the employment afforded on highway construction and maintenance; this seasonal recession was also in evidence at the same period of the preceding year, when the index number of employment stood higher. Statements were received from 92 employers, whose payrolls aggregated 8,710 persons, in comparison with 14,556 in the preceding month. Quebec and Ontario firms released the majority of the persons laid off.

tenance departments of the railways continued to release large numbers of workers, especially in Ontario, although there were declines in every district. Thirty-two concerns and divisional superintendents employed 31,087 persons, which was a reduction of 8,866 or 22 per cent from their working forces on November 1. This contraction brought the index number for the first time since the end of April, below the 100 mark, and caused it to be slightly lower than during the corresponding period of last year, when marked curtailment had also been shown.

#### Services

**HOTELS AND RESTAURANTS.**—Employment in this industry showed a slight diminution, chiefly in Ontario. A combined working force of 6,713 persons was reported by the 68 firms making returns, who had employed 6,960 persons at the beginning of November. Shrinkage had also been indicated at the same period of last year; the index number then stood several points lower than during the month being surveyed.

#### Trade

Seasonal improvement on a large scale was shown in the trade group at the beginning of December, 2,386 persons being added to the sales force of the 566 establishments making returns. They enlarged their payrolls from 55,418 on November 1, to 57,804 during the month under review. A very large share of this increase of 4.6 per cent occurred in the retail division, where it occurred to some extent in all provinces. The situation during the corresponding period of last year had also shown improvement, though on a somewhat smaller scale.

The table on page 47 gives the index numbers of employment by industries as on November 1 and December 1, 1923, and December 1, 1922 and 1921. As usual, the first column shows the proportion of employees in each industrial group in relation to the total number of workers reported in all groups for the indicated month. (Number of workers employed in January, 1920, equals 100).

### EMPLOYMENT OFFICE REPORTS FOR NOVEMBER, 1923

**T**HE decline occasioned by the cessation of the demand for harvesters and thresher hands at the end of October was followed by a further drop in the business of the offices of the Employment Service during November, 1923. The decrease during the month was due, mainly, to the completion of a large number of the contracts on roads, highways and public buildings, and with the approach of winter few new projects were opening up. Compared with the same period of 1922, however, slightly improved conditions are indicated. The accompanying chart, which presents the returns from the offices on the basis of daily averages over half-month periods, shows a continuous and gradual decline in the curves of applications, vacancies and placements during November, their levels at the end of the month being higher than the same time in the previous year. The reports in-

dicating that applications for work averaged 1,794 daily during the first half of November as compared with 1,977 during the previous period and with 1,658 during the same period a year ago. The average number of applications registered daily during the second half of November was 1,618 as compared with 1,611 during the same period in 1922. The vacancies notified by employers to the Service averaged 1,456 and 1,073 during the first and second half of November respectively, as compared with 1,156 and 1,101 during the corresponding periods in November, 1922. During the latter half of October, 1923, vacancies averaged 1,754 daily. The offices of the Service effected an average of 1,286 placements daily during the first half of November, of which 1,034 were in regular employment and 252 in casual work, as compared with a total of 1,111

during the first half of November, 1922. The placements effected in regular employment during the latter half of the month under review numbered 786, while those in casual work were 260, representing a total average of 1,046 placements daily, as compared with 999 during the same period a year ago. Placements effected during the latter half of October, 1923, averaged 1,527 daily.

The following table gives the placements effected to date by the offices of the Employment Service:—

Year	Placements		
	Regular	Casual	Total
1919 (10 months).....	268,001	37,904	305,905
1920.....	366,547	79,265	445,812
1921.....	280,518	75,238	355,756
1922.....	297,827	95,695	393,522
1923 (11 months).....	332,488	107,913	440,401

During the month of November the offices referred 31,985 persons to employment and effected a total of 30,309 placements. Of the placements in regular employment which numbered 23,652, those of men totalled 20,668 and of women 2,984, while the placements in casual work were 6,657. Vacancies notified during the period totalled 38,876, of which 25,240 were

for men and 7,636 for women. Applications for employment were received from 34,605 men and 9,754 women, a total of 44,359 registrations.

Placements in regular employment by provinces were as follows:—Nova Scotia, 411 men, 61 women; New Brunswick, 558 men, 143 women; Quebec, 1,482 men, 369 women; Ontario, 7,591 men, 1,105 women; Manitoba, 2,796 men, 406 women; Saskatchewan, 2,892 men, 355 women; Alberta, 2,903 men, 326 women; British Columbia, 2,035 men, 219 women.

MARITIME PROVINCES

Practically all outside construction was nearing completion although at New Glasgow and Halifax, work continued on the erection of transmission lines, dams, and sewer construction. Some small repair jobs were available at Moncton and St. John. The majority of the offices reported an increase in the number of registrations of building labourers and tradesmen. Aside from a few track repairs there was little work offered in the railway construction group. Handicapped by wet weather the logging group showed considerable slackness, although a number of vacancies for experienced bushmen were offered with placements made from

Amherst, New Glasgow, Moncton, Chatham and St. John.

#### QUEBEC

Although work on highway and road construction was nearing completion, the building and construction groups showed considerable activity, with many calls for building labourers and tradesmen. There was a large demand for bushmen, loggers and tie makers, at the offices at Hull and Montreal with sufficient applicants available to meet the demand. Requests for longshoremen and freight handlers were received and filled from the offices at Montreal. A slight decline was noted in the demand for domestic workers, with a scarcity of experienced workers.

#### ONTARIO

The offices reported a small but continuous demand for farm help, the placements being effected chiefly in the vicinity of Chatham, Belleville, Hamilton and London. Due to the slackening of road and highway construction in all parts of the Province many men were unemployed, though for the most part vacancies in the bush were available in sufficient numbers to give work to many. Building remained fairly active with a brisk call for carpenters, bricklayers and building mechanics at Toronto, Timmins and Kitchener. The demand for railway construction work had declined, a number of men being required for section work at Cobalt and Fort William, and for local track laying at Toronto. At this time the largest number of opportunities for employment was in the logging group, the offices at Cobalt, Belleville, Fort William, Sudbury, Timmins and Toronto, reporting many shipments of men to the lumber camps in the northern part of the province. At North Bay and Pembroke there was a call for tie makers, with a slight shortage of experienced workers. There was a general decline in the number of vacancies offered and placements made in the manufacturing industries, especially at Toronto, but at Belleville a few vacancies were offered for factory workers. Longshore work was brisk at

Port Arthur and Fort William, where the shipment of grain was heavy. In the women's section slight difficulty was experienced in filling positions for permanent household work, although the number of women applying for day work was greater than the demand.

#### MANITOBA

While the number of vacancies for thresher hands had declined there was an increased call for men and married couples for winter farm work. Quietness prevailed in the business and construction group, many building tradesmen being unemployed, while work on highway and road construction had been suspended. There was a declining demand for railway and section hands. Labour conditions were much quieter, the employment offered being confined largely to the logging group with an increased movement of labour to the camps. The predominating demand was for general bushmen, pulp wood cutters and tie makers, the offices at Winnipeg and Dauphin reporting an inadequate supply of labour. There was an increase in the regular employment offered for women, but a slight decline in the number of vacancies available for casual work.

#### SASKATCHEWAN

While a contraction from last month was reported in the agricultural group the calls for farm helpers for winter work remained fairly numerous with a good supply of applicants. Building tradesmen were actively employed, a number of offices experiencing slight difficulty in securing sufficient carpenters. A continued call for extra gang and steel workers was reported at North Battleford, Regina and Saskatoon. Prospects in the logging group indicated an improved demand as soon as colder weather set in. Large numbers of men were shipped into the camps north of Prince Albert and to points in Manitoba from the offices at Moose Jaw, North Battleford and Regina. There was a continued call for miners and mine labourers at Estevan and Bienfait, with no difficulty in securing ex-

\* 5 Placements effected by offices since closed.

perienced workers. The domestic workers for rural and urban districts were in demand, though not in so great numbers as previously.

#### ALBERTA

A decided falling off in vacancies in the agricultural group was recorded although many placements for farm workers for the winter were effected by the offices. Continued activity was noted in the number of calls for building labourers, while at Edmonton the prospects were good for work in the near future. Vacancies were offered in large numbers in the railway construction and maintenance group at Calgary, Lethbridge and Drumheller. A lessened demand for loggers was reported in the northern sections due to the approach of the holiday season. However, placements in this group remained very high. At Drumheller pick-miners for coal mines were required. There was a falling off in the demand for women workers with an increase in the number of applicants for casual jobs.

#### BRITISH COLUMBIA

While activities in the construction group were not so brisk, building tradesmen, carpenters, painters and plasterers, were well employed. A number of repair jobs were available and work was progressing fairly rapidly on roads and irrigation projects at Penticton, Vernon, Revelstoke and Kamloops. The seasonal demand for loggers, tie makers, teamsters and swampers, was greater than the supply of workers, although placements in the logging group continued to form a large part of the business of the offices at Kamloops, Fernie, Prince Rupert and Vancouver. The mining group showed considerable slackness, the supply of workers being in excess of the demand, although several machine miners for the quartz mines could be placed at Cranbrook. The demand for domestic workers was fairly brisk with a slight slackening in the number of workers applying.

#### The Movement of Labour

During November, 1923, the offices of the Employment Service effected

23,652 placements in regular employment, of which 16,432 were of persons for whom the employment found was outside the immediate locality of the offices at which they were registered. Of the latter 5,863 were granted the Employment Service reduced rate, 3,540 going to points within the same province as the despatching office and 2,323 to other provinces.

The offices in Quebec issued 391 certificates, 29 to bushmen going to points within the province and 362 to bushmen going to camps in the vicinity of Sault Ste. Marie, Sudbury and Timmins, Ont. The number of reduced rate certificates issued in Ontario was 1,503, of which 8 were to bushmen going to camps in the Province of Quebec. The majority of the provincial transfers were of bushmen sent to various camps in the vicinity of North Bay, Sudbury, Timmins, Cobalt and Sault Ste. Marie. Three were of farm hands going from Windsor and Sudbury to Guelph, 1 was of a miner from Pembroke to Timmins, 9 were of labourers going from North Bay to Timmins, with several cooks and a few carpenters going to various points in the province. Manitoba offices despatched 1,678 workers at the special rate, 191 of whom, chiefly farm workers and bushmen, were going to various points in the province. The offices transferred 5 bushmen and 12 farm hands to Prince Albert, Saskatoon and Regina in Saskatchewan, and 1,470 workers, including bushmen, tiemakers, blacksmiths, teamsters and kitchen help, to the vicinity of Port Arthur and Fort William, Ont. Of the 1,433 transferred at the special rate from Saskatchewan offices, 3 were of miners going from Regina to Vancouver, 15 were of farm hands from Regina and Saskatoon to the vicinity of Edmonton and Calgary, Alta., while 88 were of bushmen from Prince Albert and Saskatoon to points north of Dauphin, Man., and 69 of bushmen going to the districts near Port Arthur, Ont. Of the 1,258 provincial transfers more than 75 per cent were of bushmen, the remainder including farmers, labourers and housekeepers. The 291 transfers from Alberta offices to

British Columbia were of camp workers and carpenters destined to Fernie and Prince George. The provincial certificates were issued to more than 200 bushmen, 6 miners and mine labourers, one stone mason, 2 bricklayers, machinists and farm workers, going to points near Edmonton. British Columbia offices granted 319 certificates to persons going to points within the province, of which nearly 200 were to bushmen and mill hands, 38 to miners going to Nelson, Cranbrook and Prince Rupert, 6 to car-

penters bound for Kamloops, 16 to railway construction labourers in the Prince Rupert zone and several to housekeepers and bookkeepers going from the Vancouver office.

Of the 5,863 workers who benefited by the Employment Service reduced rate, 3,946 were carried by the Canadian National Railways, 1,896 by the Canadian Pacific Railway, and 21 by the Temiskaming and Northern Ontario Railway.

### BUILDING PERMITS ISSUED DURING NOVEMBER, 1923

ACCORDING to reports tabulated by the Dominion Bureau of Statistics, there was a decline in the value of the building permits issued during November as compared with October. The permits issued during the month under review also had a lower valuation than those issued in November, 1922. Statements were furnished by 56 cities, showing that the authorized building to the value of \$8,003,601, as compared with \$9,701,080 in October, 1923, and \$10,085,415 in November of last year. There was, therefore, a decrease of \$1,694,479, or 17.5 per cent, in the first and of \$2,078,814 or 20.6 per cent in the second comparison.

Detailed statements were furnished by 45 cities, which issued approximately 1,100 permits for dwellings at an estimated cost of more than \$4,800,000 and for 2,100 other buildings valued at slightly over \$3,100,000. During October detailed reports were tabulated from 47 cities, which issued approximately 1,400 permits for dwellings estimated to cost nearly \$6,200,000 and for over 3,000 other buildings at a proposed cost of approximately \$3,400,000. The number of buildings to be erected is usually in excess of the number of permits issued, since the construction of several buildings may be authorized by a single permit.

Manitoba and Prince Edward Island reported increases in the value of the permits issued as compared with October; in the former province there was

a gain of 9.4 per cent. The largest actual decrease in the remaining provinces occurred in Ontario, where the value of projected building declined by \$962,685 or 19.1 per cent. The most pronounced percentage decrease, however, was that of 79.8 per cent in New Brunswick.

As compared with November, 1922, Quebec, Manitoba and British Columbia reported increased in the estimated value of building. Quebec showed the largest actual increase, of \$431,499, or 20.3 per cent, while Manitoba registered the greatest proportional increase, of \$228,363, or 99.9 per cent. Ontario, with a decline of \$2,620,924, or 39.1 per cent, recorded the most pronounced actual loss, but the largest proportional reduction occurred in Alberta, when the value of building permits showed a falling off of \$326,849, or 81.4 per cent.

Winnipeg and Vancouver recorded expansion in the value of the permits issued as compared with October, 1923, and November, 1922; in Montreal there was a decline as compared with the preceding month, but an increase over November of last year, while the value of building authorized in Toronto was higher than in October, 1923, and less than in November, 1922. Quebec, Brantford, Chatham, Niagara Falls, Stratford, Welland, Nanaimo and New Westminster recorder increases in the building permits issued in both comparisons.

The value of the building permits issued during the first eleven months of 1923 was lower by 9 per cent than during the same period of last year, but was about 13 per cent higher than during the first eleven months of 1921. The totals for 1923, 1922 and 1921 stand at

\$123,333,235, \$135,543,521 and \$108,929,544 respectively.

The table on this page shows the value of the building permits issued during November, 1923, as compared with October, 1923, and November, 1922. The 35 cities for which records are available since 1910 are marked by asterisks.

## FAIR WAGE CONTRACTS, DECEMBER, 1923

**D**URING December, the Department of Labour received for insertion in the LABOUR GAZETTE the following information relative to twenty-nine fair wage contracts. Twenty-eight of the contracts contained the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the

legitimate rights of the labour employed. The remaining one contained a fair wage schedule.

A statement was also received as to supplies ordered by the Post Office Department, subject to the regulations for the suppression of the sweating system and the securing of fair wages, etc.

## DEPARTMENT OF PUBLIC WORKS

Dredging Eastern Harbour Entrance Channel, Cheticamp, N.S. Name of contractors, Glasgow Dredging Com-

pany, Limited, New Glasgow, N.S. Date of contract, November 5, 1923. Amount of contract, Class "B" 63 cents per cubic yard (scow measure).

Dredging Grand Trunk Pacific railway dock, Burrard Inlet, Vancouver, B.C. Name of contractors, Northwestern Dredging Company, Limited, Vancouver, B.C. Date of contract, December 6, 1923. Amount of contract, Class "B" 35 cents per cubic yard place measure.

Construction of a section of rubble mound breakwater, Main Harbour North, Port Arthur, Ont. Name of contractors, The Canadian Dredging Co., Limited, Midland, Ont. Date of contract, November 12, 1923. Amount of contract, \$1.20 per ton of stone.

Superstructure of greenhouse at Experimental Farm, Ottawa, Ont. Name of contractors, The King Construction Company, Limited, Toronto, Ont. Date of contract, November 27, 1923. Amount of contract, \$12,000.

Extension to breakwater, Port Lorne, N.S. Name of contractors, The Reid Construction Company, Grand Ferry, N.S. Date of contract, November 24, 1923. Amount of contract, 10  $\frac{7}{10}$  cents per cubic foot of cribwork.

Extension to breakwater, Tiverton, N.S. Name of contractors, I. K. Thurston, R. W. Durkee and J. D. Thurston, Sanford, N.S. Date of contract, November 22, 1923. Amount of contract, unit prices.

Construction of wharf, Beach Point, P.E.I. Name of contractor, Henry James Phillips, Charlottetown, P.E.I. Date of contract, November 27, 1923. Amount of contract, unit prices.

Supply and installation of electric wiring and fitting in public building, Liverpool, N.S. Name of contractor, W. W. Hoyt, Halifax, N.S. Date of contract, December 4, 1923. Amount of contract, \$575.

Extension to wharf, Burlington Centre, N.S. Name of contractor, A. E. Cunningham, Sydney, N.S. Date of contract, November 29, 1923. Amount of contract, unit prices.

Alterations, etc., to heating system in public building, Edmonton, Alta. Name

of contractor, Ideal Plumbing and Heating Co., Limited, Edmonton, Alta. Date of contract, November 20, 1923. Amount of contract, \$8,203.

Construction of government telegraph office building, Invermere, B.C. Name of contractors, A. J. Dobbie and G. H. Cartwright, Invermere, B.C. Date of contract, September 14, 1923. Amount of contract, \$2,695.

Post office fittings in public building, Grande Prairie, Alta. Name of contractor, Harry Leonard Shaver, Grande Prairie, Alta. Date of contract, November 20, 1923. Amount of contract, \$1,475.

Harbour improvements (east pier and sheet pile wall), Port Stanley, Ont. Name of contractors, The Port Arthur Construction Co., Limited, Toronto, Ont. Date of contract, December 8, 1923. Amount of contract, unit prices.

Construction of huts and buildings and erection of wire fences, Bentinck Island, B.C. (Lazaretto). Name of contractor, Eli Hume, Victoria, B.C. Date of contract, November 20, 1923. Amount of contract, \$14,000.

Construction of breakwater, St. Francis Harbour, N.S. Name of contractors, Naugle and Hiltz, East Lawrencetown, N.S. Date of contract, December 8, 1923. Amount of contract, unit prices.

Construction of harbour protection wall, Belle River, Ont. Name of contractors, Detroit River Construction Company, Windsor, Ont. Date of contract, December 4, 1923. Amount of contract, unit prices.

Addition to ore dressing laboratory, Ottawa, Ont. Name of contractors, Taylor and Lackey, Ottawa, Ont. Date of contract, December 20, 1923. Amount of contract, \$3,094.

Construction of wharf, Sturgeon Falls, Ont. Name of contractor, Thomas P. Charleson. Date of contract, December 21, 1923. Amount of contract, unit prices.

Construction of public building, Sackville, N.S. Name of contractors, E. F. Powers Construction Company, St. John, N.B. Date of contract, December 19, 1923. Amount of contract, \$29,802.55 and \$1.25 per cubic yard for

excavation and \$14 per cubic yard for mass concrete including forms.

Reconstruction of wharf, St. Pierre les Becquets, Que. Name of contractor, Onésime Poliquin, Portneuf, Que. Date of contract, December 19, 1923. Amount of contract, unit prices.

Reconstruction of breakwater, Igonish, N.S. Name of contractor, Thomas D. Morrison, D'Escousse, N.S. Date of contract, December 20, 1923. Amount of contract, unit prices.

Repairs, renewals, etc., to tug Hercules. Name of contractors, The Toronto Dry Dock Company, Limited, Toronto, Ont. Date of contract, December 22, 1923. Amount of contract, \$5,955.

Repairs, etc., to two steel hopper scows Numbers 14 and 15. Name of contractors, The Toronto Dry Dock Company, Limited, Toronto, Ont. Date of contract, December 22, 1923. Amount of contract, \$10,378.

For towing scows Numbers 14 and 15, from Goderich to Toronto. Name of contractors, The Toronto Dry Dock Company, Limited, Toronto, Ont. Date of contract, December 22, 1923. Amount of contract, \$2,000.

Addition to northern end of dormitory building, Royal Military College, Kingston, Ont. Name of contractor, H. M. Watts, Kingston, Ont. Date of contract, December 26, 1923. Amount of contract, \$103,000 and \$14 per cubic yard for additional concrete required.

Supply and installation of post office fittings in public building, Sussex, N.B. Name of contractor, Frederick Howland, Sussex, N.B. Date of contract, December 19, 1923. Amount of contract, \$800.

Construction of office building at Dominion Astrophysical Laboratory, Victoria, B.C. Name of contractors, Williams, Trerise and Williams, Victoria, B.C. Date of contract, December 21, 1923. Amount of contract, \$23,950.

Construction of wharf, Baie St. Paul, Que. Name of contractors, E. Méthot and N. Fournier, Montmagny, Que. Date of contract, December 26, 1923. Amount of contract, unit prices.

Construction of botanical laboratory, Experimental Farm, Ottawa, Ont. Name

of contractors, Taylor and Lackey, Ottawa, Ont. Date of contract, December 27, 1923. Amount of contract, \$24,084 and \$1 per cubic yard for extra excavation and \$15 per cubic yard for extra concrete required including forms. The fair wage schedule inserted in the contract was as follows:

Trade or class of labour	Rate of wages not less than	
	Per hour	Hours per day

#### POST OFFICE DEPARTMENT

The following is a statement of payments made in December, 1923, for supplies ordered by the Post Office Department subject to the regulations for the suppression of the sweating system, the securing of fair wages, and the performance of work under sanitary conditions:

Nature of Order	Amount of order
	\$
Making metal dating stamps and type and other hand stamps and brass crown seals.....	743 67
Making and repairing rubber stamps, daters, etc.....	143 26
Making up and supplying letter carriers' uniforms, etc.....	13,430 19
Scales, new and repaired.....	86 50
Repairing boxes and hampers, etc.....	169 80
Supplying ink.....	314 30
Mail bag fittings.....	8,838 53
Letter carriers' satchels.....	2,343 32
Mail bagging.....	110,342 05

**PRICES, RETAIL AND WHOLESALE, IN CANADA, DECEMBER, 1923**

**T**HE movement in prices during the month was slight; both the family budget in terms of retail prices and the various index numbers of wholesale prices, however, continued upward.

The cost per week of a list of twenty-nine foods for an average family of five in terms of the average retail prices in some sixty cities was \$10.73 at the beginning of December as compared with \$10.69 for November; \$10.39 for December, 1922; \$11 for December, 1921; \$14.84 for December, 1920; \$16.92 for June, 1920 (the peak); \$13.65 for December, 1918; and \$7.96 for December, 1914. Eggs showed the only important increase in price but there were smaller increases in the prices of butter, milk, and mutton. The chief declines occurred in beef, fresh and salt pork, and in bacon, with slight declines in cheese, bread, rolled oats, prunes and sugar. Including the cost of fuel and rent with that of foods the total budget averaged \$21.21 for December as compared with \$21.19 for November; \$20.97 for December, 1922; \$21.49 for December, 1921; \$25.67 for December, 1920; \$26.92 for July, 1920 (the peak); and \$14.26 for December, 1914. Fuel and rent were practically unchanged. As compared with December, 1922, and December, 1921, neither fuel nor rent have changed substantially, but as compared with December, 1920, fuel is appreciably lower while rent is higher.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics, based upon the average prices of 238 commodities in 1913 as 100, weighted according to the importance of the commodities, advanced slightly to 153.5 for December as compared with 153.3 for November; 150.9 for December, 1922; 154.3 for December, 1921; 212.1 for December, 1920; and 256.9 for May, 1920 (the peak). According to this calculation prices reached the low point in September, 1922, having fallen 43.4 per cent from the peak of 1920. Since September, 1922, the price level advanced till April, 1923, being then 7.5 per cent above the

low point. Since April little change has occurred though the general level is now somewhat below the April figures.

In the grouping according to chief component material three of the eight main groups were lower while four advanced. The Vegetable Products group declined chiefly because of lower prices for grains, flour, and fruits, and in spite of substantial increases in sugar and vegetables. Lower prices for lumber and pulp caused a decline in the Wood Products group. The Textiles group and the Animals group showed the greatest advances, the former mainly because of higher prices for raw cotton and cotton yarns. In the latter group substantial declines in hides, furs, meats and poultry were more than offset by the advances in milk and its products and in eggs. The Iron group advanced somewhat due partly to higher prices for pig iron.

In the grouping according to purpose, consumers' goods advanced, while producers' goods declined. In the former group the increase was due to higher prices for foods. Breadstuffs, meats, and fruits declined but these were more than offset by advances in dairy products, sugar, vegetables, and eggs. The lower level for producers' goods was due mainly to declines in the prices of materials for the Leather Industry, the Milling Industry, and the Fur Industry, though there were advances in the prices of materials for the Metal Industries and the Textile Industry.

In the grouping according to origin the indexes for domestic farm products and for articles of mineral origin advanced while the indexes for articles of marine origin and of forest origin declined.

The index number based upon prices of 271 commodities in 1890-1899 as 100 published by the Department of Labour since 1910 advanced slightly to 222.6 for December, as compared with 221.7 for November; 223.0 for December, 1922; 230.7 for December, 1921; 290.5 for December, 1920; 356.6 for May, 1920 (the peak); and 137.0 for December, 1914. The chief advances occurred

in the prices of butter, eggs, milk, apples, sugar, woollen yarn, pig iron, bar silver, lead, and in mink skins, while the prices of grains, hogs, bacon, fowl, turkeys, lemons, flour, raw silk, horse hides, linseed oil, and turpentine showed the chief declines. Compared with December, 1922, all the main groups were lower except dairy products, fruits and vegetables, miscellaneous groceries, textiles, metals and implements, and building materials which were higher.

The index number published by the Department since 1910 has been reconstructed back to January 1919, by the Dominion Bureau of Statistics, the new index being weighted and based upon the prices of 238 commodities in 1913 (LABOUR GAZETTE, June, 1923, pp. 689-695). Ultimately the reconstructed index will be carried back to an earlier date, but in the meantime the Department will continue to calculate and publish the old series in summary form in the LABOUR GAZETTE in order to afford comparisons with price levels prior to 1913. For the detailed analysis from month to month, however, the new index number of the Bureau of Statistics will be used.

The accompanying tables give the index numbers of the Dominion Bureau of Statistics by the principal groups in the three methods of classification and with those of the classification according to purpose or use in detail. The index number of the Department of Labour is given by the principal groupings, but the sub-groups in detail shown monthly since 1912 are omitted. The special index number of 50 commodities described in the following paragraph is also given for the purpose of continuing the record.

The special index number (comprising fifty of the more important commodities selected from the 271 in the departmental list) including twenty foods, fifteen raw materials, and fifteen manufactured goods, based upon price levels in 1913 as 100, advanced to 153.7 for December as compared with 152.0 for November; 154.2 for December, 1922; 150.1 for December, 1921; 199.9

for December, 1920; and 260.5 for May, 1920, the peak. This increase was due largely to seasonal increases in the prices of eggs, milk and butter, and in spite of substantial declines in the prices of grains, hogs, bacon, and turpentine.

The index of wholesale prices in Canada published by the United States Federal Reserve Board, including thirty-three raw materials, twenty-eight semi-manufactured or producers' goods, and thirty-eight finished or consumers' goods, based upon price levels in 1913 as 100, again declined slightly to 147 for October as compared with 148 for September; 149 for August; and 145 for October, 1922. The indexes for goods imported and producers' goods advanced while those for all other groups were lower.

Professor Michell's index of wholesale prices based on forty articles, twenty foods and twenty manufacturers' goods, with prices during 1900 to 1909 as 100, advanced to 177.3 for December as compared with 176.9 for November; 170.2 for December, 1922; 217.4 for December, 1920; and 118.6 for December, 1914. The slight decline in the index for foods was more than offset by the advance in manufacturers' goods.

The table of retail prices and rentals shows the prices at the beginning of December of seventy-two staple foodstuffs, groceries, coal, wood and coal oil, and the rent for six-roomed houses in some sixty cities throughout Canada. All prices are for delivered goods. The exact quality, for which the quotation is given, is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity, in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Department and to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. The prices of fuel and the rates for rent are reported

INDEX NUMBERS OF WHOLESALE PRICES (WEIGHTED) CALCULATED BY THE DOMINION BUREAU OF STATISTICS

(Continued on page 60.)

by the correspondents of the LABOUR GAZETTE.

Statistics similar to these were published each month from 1910 to 1920, the figures during this period being secured at the middle of each month by the correspondents of the LABOUR GAZETTE resident in each locality from dealers doing a considerable business with workingmen's households. From 1910 to 1915 the table contained a list of only the twenty-nine foods included in the family budget, with laundry starch, coal, wood, coal oil and rent. In 1915, when monthly publication of the budget in the LABOUR GAZETTE was begun, it was decided to extend the list of foods to 40, and in 1920 the list of foods and groceries was still further extended to include over 100 items.

Beginning with October 1922, a number of commodities were dropped from the list, and in the case of a number of articles the average prices of the grades most sold have been given, owing to the impossibility of securing prices

for uniform grades for the various cities from month to month.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central, without modern conveniences.

The weekly budget of a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, these being the items for which statistics have been obtained each month and published in the LABOUR GAZETTE since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to

INDEX NUMBERS OF WHOLESALE PRICES (WEIGHTED) CALCULATED BY

the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various classes of foods tends to be maintained. At times when

the price of an article heavily weighted for this purpose rises (or falls) abnormally the increase (or decrease) in food prices so indicated is exaggerated, and this should be taken into account in using the budget as an indicator of changes in the cost of living. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba

†Nine commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915.

and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. It was estimated, when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditures of an ordinary family, according to the total income. For the average family of five the expenditure on these items of foods, fuel, light and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not

purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were adopted as affording a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruit, fresh and canned vegetables, etc., so that comparative expenditure would be little changed.

**Cost of Electric Current for Housholders**

With rates in 1913 as 100, index numbers of electric light rates were: 1900, 141.4; 1905, 135.6; 1910, 118.1; 1911, 113.4; 1912, 109.1; 1913, 100.0; 1914,

#### Retail Prices

Meat prices again averaged lower. Sirloin steak declined from an average of 27.8c. per pound in November to 26.9c. in December, nearly all localities showed a decrease. Round steak was down from an average of 22.6c. per pound in November to 21.7c. in December. Rib roast also showed a general decline, averaging 20c. per pound. Shoulder roast fell from 15c. per pound in November to 14.4c. in December. Veal averaged lower at 17.9c. as compared with 18.5c. in November. Mutton was up slightly from an average of 26.6c. per pound in November to 27c. in December. Pork roast fell from an average of 25.9c. per pound to 24.6c., and mess pork from 25.2c. per pound to 24.3c. Bacon also was slightly lower, averaging 37.5c. per pound. Fresh fish was little changed. Salt herring advanced slightly but salt cod and finnan haddie were lower.

Eggs showed a general advance, fresh averaging 60.1c. per dozen in December as compared with 52c. in November and 44.3c., in October, and cooking averaging 47c. per dozen in December, 44c. in November, and 39.7c. in October. Milk advanced in the average from 12c. per quart in November to 12.2c. in December. Increases occurred in Three Rivers, St. Hyacinthe, St. John's, Thetford Mines, Montreal, Belleville, St. Catharines, Port Arthur and Fort William. Both dairy and creamery butter advanced, the former from an average of 40.6c. per pound in November to 41.7c. in December and the latter from 44.9c. per pound in November to 46.1c. in December. Cheese was slightly higher, averaging 34c. per pound.

Bread declined in New Glasgow, Amherst, and Stratford. Soda biscuits and flour showed little change. Tapioca advanced from an average of 14.7c. per pound in November to 15.1c. in December. Canned tomatoes, peas, and corn

were slightly higher. Beans and onions were steady. Potatoes averaged \$1.41 per 90 pounds in December as compared with \$1.39 in November, and \$1.58 in October. Evaporated apples were down slightly from an average of 18.9c. per pound to 18.7c. Prunes were 1c. per pound lower at 16.9c. Raisins and currants also declined slightly, the former averaging 18.6c. per pound and the latter 21.6c. per pound. Raspberry jam showed little change. Canned peaches were down from an average of 31.4c. per tin in November to 30.8c. in December. Granulated sugar showed a general decline, averaging 12.2c. per pound in November and 12c. in December. Coffee was down from 54.5c. per pound to 53.7c. Cocoa also was slightly lower, averaging 27.5c. per pound. Cream of tartar declined from 68.5c. per pound to 66.3c.

Anthracite coal averaged \$18.01 per ton in December as compared with \$17.92 in November. Increases occurred in Belleville, St. Catharines, and Winnipeg. Bituminous coal and hard wood were practically unchanged. Soft wood, four feet long, averaged \$9.46 per cord in December and \$9.53 in November. Rent advanced slightly at Orillia.

#### Wholesale Prices

The following is a summary of the statement on price changes during the month issued by the Dominion Bureau of Statistics.

Grain prices continued downward. No. 1 Manitoba Northern at Winnipeg averaged 93½c. per bushel in December as compared with 97½c. in November. American corn at Toronto declined from \$1.17 per bushel in November to 89c. in December. Western oats were down from 39c. per bushel to 36¾c. Rolled oats also were lower at \$3 per sack. Flour declined 20c. per barrel to \$6.10. Potatoes at Montreal rose from 97½c. per bag in November to \$1.05 in December. Apples, No. 1 Spy, at Toronto, declined from \$7-\$8 per barrel to \$6-\$7. Oranges also were lower at \$3.75-\$4.25 per case in December as compared with \$6.50-\$7.50 in November. Hogs at Toronto continued to decline, averaging \$8.10 per cwt. in De-

g. Higher price for semi-anthracite. f. Poplar, etc. h. In British Columbia coal oil is sold to a great extent in tins costing houses as high as \$40 per month. s. Vinegar sold extensively in bottles at higher prices than in bulk. †Mining company houses

cember as compared with \$8.40 in November. About the end of December, however, prices rose to \$8.53 per cwt. Bacon and hams were lower, the former declining from 27c. per pound to 25½c. and the latter from 28c. per pound to 25c. Beef hides again declined, being 8c.-9c. per pound in December as compared with 9c.-10c. in November. Seasonal influences were again evident in the prices of dairy products and eggs. Milk at Montreal was up from 25c. per gallon to 29c. Butter, creamery prints, at Toronto, rose 4c. per pound to 46c. and dairy prints 3¼c. per pound to 36½c. Fresh eggs were up from 60c.-70c. per dozen to 75c.-85c. Reports of a short cotton crop caused a further advance in prices from an average of 34½c. per pound in November to

36c. in December. Cotton yarn was also higher at 58c. per pound as compared with 54c. in November. Gingham at Toronto was up from 17½c. per yard to 19½c. The slowing up of building operations was reflected in certain lumber prices. Flooring in British Columbia was down from \$55 per M to \$48.50. White pine at Toronto fell from \$55 per M to \$52, and cedar shingles from \$6.25 per M to \$5.75. In pulp, unbleached sulphite, news grade, fell from \$60 per ton to \$57.50. Pig iron advanced \$1 per ton to \$26. Lead pipe was up from \$12.60 per cwt. to \$13.50. Silver advanced from 63¼c. per ounce to 65c. Tin was up 7c. per pound to 54c. Spelter was lower at \$7.90 per cwt. Solder was up 2c. per pound to 30c.

---

## PRICES IN CANADA AND IN OTHER COUNTRIES DURING 1923

THE feature of the movement of prices in most of the countries throughout the world during 1923 was the prevalence of fluctuations without any pronounced trend such as has been characteristic of the price movement for many years. From 1870 to 1896 the prices movement in the principal commercial countries of the world showed a trend downward followed by a fairly general upward movement until 1913 which was succeeded by the steeply upward movement from 1914 to 1920 due to war and post-war conditions. The reaction from the high level reached at the middle of 1920 continued until about the end of the year 1921 when the downward movement came to an end in countries with a currency on a gold basis (or a basis nearly equivalent), after which there appeared a slight upward movement modified from time to time by fluctuations in various commodities, mostly seasonal in character. During 1921 and 1922 there were some recoveries in prices of raw materials and farm products accompanied by reductions in some manufactured goods which had not fallen as steeply as others. There appeared a tendency for prices to stabilize at a general level 50 to 60 per cent above 1913 levels in countries on a gold basis, (or nearly so), such as the United States, Canada, Great Britain and Japan. Raw materials, with certain exceptions, and farm products appeared to be less than 50 per cent above 1913 levels and with a slightly downward tendency. Prices of textiles, furs, sugar, tobacco, house furnishings, coal and lumber, however, were nearly 100 per cent above 1913 levels. At the end of 1923 a number of authorities stated that the readjustment from the war and post-war conditions

of trade and industry appeared to have been completed in most lines so that development and progress on lines likely to be comparatively free from disturbance should now be experienced. On the other hand in countries which had not yet succeeded in bringing their currency from the inflated conditions of war time, price levels remained much above pre-war levels and in some cases were still rising. At the end of 1923 in France, Belgium and Italy prices were from four to six times as high as in 1913, while in Germany, Poland and Russia with prices in paper currency several millions times as high as in 1913, the currency was nearly at a point where it would become valueless in purchasing power or for trading purposes, and new currency issues on a gold or other sound basis would be necessary to make possible the continuation of trade.

In most of the other countries where inflation had become extreme it was checked by 1922 and this was followed by a gradual recession in prices during 1923 as trade and industry were adjusted to a basis on peace conditions.

The accompanying tables with those in the preceding article enable the movement of prices to be examined in detail by comparing the movement in various countries or by comparing the movement by various groups or classes of commodities in Canada.

The accompanying table of index numbers of rates of exchange for various countries, calculated and published by the United States Federal Reserve Board, indicates the relative value of currencies in several countries in international trade. In this connection it is necessary to have in mind that the United States is the only great com-

mercantile country on a gold basis, that is the currency is payable in gold on demand and those countries with a rate of exchange near par are practically on a gold basis, or on a silver basis, such as Mexico and China.

### ✓ Retail Prices and Cost of Living in Canada

As stated in the first report on prices issued by the Department, "Wholesale Prices in Canada, 1890-1909," it was intended to construct a retail prices index number in order to indicate more accurately from month to month the changes in the cost of living. In the meantime, the Department began the

publication in the February, 1910, issue of the LABOUR GAZETTE, of the retail prices of staple foods, coal, wood, coal oil, and rent in nearly sixty cities. These figures were averaged for each year and published in appendices to the Department's annual reviews of Wholesale Prices in Canada from 1911 to 1917.

During the investigation into the Cost of Living in Canada by the Board of Inquiry, appointed in December, 1913, statistics for this list of goods were obtained for December, 1900, and December, 1905. From these figures and from those published in the LABOUR GAZETTE for December, 1910, 1911, 1912, and 1913, respectively, series of index

numbers of food, and of fuel, light, and rent were calculated, the results being published in the report of the Board. Calculations were also made of the cost of a family budget of these commodities in terms of these prices, and this calculation has been kept up to date month by month and published in the LABOUR GAZETTE each month since August, 1915.

In addition to the statistics as to retail prices of food and fuel, and as to rates for rent, the Department, since 1919, secured figures as to retail prices of staple lines of clothing, including footwear, from retail dealers throughout Canada, for the years 1913-1920. The

figures relate to prices prevailing at the end of the year in each case, but since 1920 prices during the spring have been secured. From these quotations the percentages of changes in the cost of clothing have been calculated. Information was also secured as to the prices of household supplies, furniture, furnishings, etc., and an estimate has been made as to the percentage changes in the cost of miscellaneous items, the effect of the information gathered showing that such changes are approximately equal to the average changes in other items. The percentage changes in food, fuel and rent have been calculated from the weekly budgets published in the

(a) Quarter beginning in specified month. (b) Average for year. (c) Figure for previous month. (d) Following month. (e) Middle of month. (f) 230 commodities, 1890-1899; 272, 1910-1914; from 1915, 271. (g) First of month. (h) End of

LABOUR GAZETTE from month to month, and the accompanying table summarizes the changes from year to year by groups, the figures for each group and for all items weighted according to the family budget method. This table therefore contains a tentative cost of living index number, based on prices in 1913, pending the calculation of a more complete index number in process of construction. The figures in clothing and sundries are to be regarded as merely approximate owing to difficulties in dealing with apparent changes in the

grades of the items for which quotations are obtained.

The accompanying tables show the movement by commodities in terms of average prices for the Dominion and by groups for each province.

It will be seen that meats declined during 1921 and 1922 but rose slightly during the summer of 1923, falling off slightly in the autumn as was usual before the war. Eggs and dairy products fluctuated according to season but were substantially lower in 1922 than in 1921, recovering slightly during 1923. Bread

month. (j) Monthly average. (k) New index number is joined to old index number (38 commodities) and all converted to base 1913=100. For 1920 and 1921, 76 quotations are included, and from January, 1922, 100 quotations.

and flour declined in price until the summer of 1923 and were steady thereafter. Rolled oats and rice similarly declined. Beans recovered slightly in 1923. Evaporated apples and prunes continued to decline gradually. Sugar fell steeply until the end of 1921, recovered, and by the beginning of 1923 was as high as at the beginning of 1921, but eased off thereafter. Tea recovered after the end of 1921 but coffee continued to ease off. Potatoes fluctuated according to seasonal conditions but throughout were considerably lower than in 1921. Anthracite coal eased off until the spring of

1922 but during the strike of miners in the spring and summer of that year recovered. Prices eased off again by the spring of 1923, advancing during the summer and autumn as was usual before the war, but after March were on lower levels than in the previous year. Bituminous coal changed similarly. Wood followed prices of coal to a great extent. Coal oil fell slightly from 1920 to the end of 1923. Rent advanced until the end of 1922 but was comparatively steady thereafter. In clothing and sundry items, declines occurred until the spring of 1922, after which practically no change

in general levels appeared. The accompanying table and chart show the relative changes by groups since 1913. It will be seen that food rose first and most steeply, followed by clothing and fuel. Rent had averaged lower during 1914 and 1915 owing to steep decreases in some western cities and in some industrial cities in the east. By the end of 1918, however, rent had recovered to pre-war levels and rose steeply till 1922, but attained a level less than 50 per cent above pre-war rates at about the same relative height as food prices. By the end of 1923, therefore, fuel only was considerably more than 50 per cent above pre-war levels.

#### Index Number of Wholesale Prices in Canada

A special index number of the wholesale prices of 50 commodities was constructed and published in 1921 to meet a demand for an index number showing the movement from month to month for some years prior to the war in order to make possible certain comparisons with other barometers of trade and industry. As the index number of 272 commodities, based on prices in 1890-1899 as 100, published by the Department since 1910, covering the movement by years back to 1890, contained a large number of commodities which reacted slowly to market conditions, the special

				3751				164			

index number was confined to 50 of the most important and most representative commodities. For each article the index number was calculated by months from 1910 back to 1901, and the average for each month, 1901 to date, was converted to the base of 1913 as 100. The list of 50 commodities included 20 foods, 15 raw or semi-manufactured materials and 15 manufactured articles. The figures for the period 1910 to 1921 were given in the issue of the LABOUR GAZETTE for July, 1921. As there has been considerable demand for figures back to 1901 by months, the figures for the whole year are given here.

Since that time the Canadian Bank of Commerce has constructed and pub-

lished an index number back to 1906 giving monthly figures but divided into two groups, 24 articles chiefly imported and 24 articles chiefly exported.

The Dominion Bureau of Statistics has recently published an index number of 238 commodities, weighted, with 1913 as the base period, and three systems of grouping designed to afford figures for analysis from various points of view, but the figures go back to 1919 only, and by groups by months are available as yet only as far back as January, 1922. These figures are given in each issue of the LABOUR GAZETTE. The general index number by months, 1919 to 1923, is given in the accompanying table. For the years prior to 1919, the Department

(a) Figure for previous month. (b) Average for year. (c) Index published quarterly. (d) 15th of month up to (g) 15th of month. (h) Four chief cities. (i) January 1913-December 1920, 22 foods. (k) Cost of food budget.

of Labour index number of 272 commodities was reconstructed by the Bureau, to the base of 1913 as 100, using 238 commodities but the number was un-weighted and has not been continued after 1921. The weighted number is expected to be calculated by months for the earlier years. In the meantime the special index number of 50 commodities by months back to 1901 affords an interesting study of the prices movement. The accompanying chart shows that the movement is nearly always by fluctuating changes, a rise being frequently fol-

lowed by a slight fall, sometimes due to seasonal changes, sometimes to those reactions from the trend prevalent at the moment to which prices of raw materials and many other farm products are particularly subject.

Pending the publication of the new index number of the Dominion Bureau of Statistics by months and groups for the earlier years, the Department is continuing the publication in the LABOUR GAZETTE of the index number of 272 commodities and the accompanying table shows the group figures by months

end of 1920; beginning of month thereafter. (e) Beginning of month. (f) Base is average for six capital towns.

for 1923 and for certain months in 1921 and 1922.

By January, 1921, there had been a substantial decline since May, 1920, and the decline continued until October after which there were slight increases until May, 1923, followed by slight declines

and at the end of 1923, the level was about the same as at the beginning of the year. The low point in the movement for many of the groups, as for all articles, was in the latter part of 1922, but raw materials were usually at the low point toward the end of 1921.

# DEPARTMENT OF LABOUR, CANADA

MINISTER—THE HONOURABLE JAMES MURDOCK

DEPUTY MINISTER—H. H. WARD

---

## Functions of the Department

**Industrial Disputes Investigation Act, 1907.**—The administration of the Industrial Disputes Investigation Act, 1907, which provides for the establishment of Boards of Conciliation and Investigation in cases of disputes affecting mines and public utilities.

**Conciliation.**—The maintenance of a staff of officers at various points whose services are utilized in the adjustment of labour disputes.

**Fair Wages.**—The administration of the Fair Wages policy of the Government of Canada which provides for the observance of the current wages rates and hours of the district on Government contracts and on railway construction towards which financial aid has been voted by Parliament.

**Labour Statistics and Information.**—The collection, compilation and publication of statistics of wages, hours, prices, cost of living, strikes and lockouts, industrial accidents and industrial agreements; also of labour organization and organization in industry, commerce and the professions; the conduct of investigational and research work bearing on industrial relations and labour conditions; the publication of bulletins of information on these subjects.

**Labour Gazette.**—The monthly publication of the "Labour Gazette" containing a review of the industrial situation throughout Canada, a record of proceedings under the Industrial Disputes Investigation Act, statistics of wages and hours, wholesale and retail prices in Canada and other countries, strikes and lockouts, industrial accidents, summaries of laws and legal decisions affecting labour and other information on current matters of industrial and labour interest.

**Labour Legislation in Canada.**—The compilation and publication of reports containing the texts of the labour laws of the Dominion Parliament and of the Provincial Legislatures.

**Library.**—The maintenance of a library of publications on labour and economic subjects.

**Employment Service of Canada.**—The administration of the Employment Offices' Co-ordination Act under which, in co-operation with various provincial governments, free public employment offices are maintained in 68 centres; statistical information relative to employment conditions is also collected and published.

**International Labour Organization (League of Nations).**—The collection and transmission of information required by the International Labour Conference and Office; correspondence with Federal and Provincial Government departments and with organizations of employers and employees relative thereto; the representation of Canada at the International Labour Conference and on the Governing Body of the International Labour Office.

**Technical Education.**—The administration of the Technical Education Act which provides for grants to the provinces for the purpose of promoting technical education; the collection and publication of information in the form of bulletins and otherwise.

**Canadian Government Annuities.**—The administration of the Government Annuities Act, 1908, whereby provision may be made for old age by the purchase of annuities by individuals, or associations on behalf of their members, or by employers on behalf of their employees.

**Combines Investigation Act, 1923.**—The administration of the Combines Investigation Act, 1923, which provides means for investigation of alleged combines.

# THE LABOUR GAZETTE

*The Official Journal of the Department  
of Labour of Canada*

PUBLISHED MONTHLY, in English and French.

SUBSCRIPTION RATES—Canada, United States, and Mexico, 20 cents per annum, postage prepaid; all other countries \$1.00 per annum; postage prepaid. All subscriptions payable in advance. Single copies three cents each.

CHANGE OF ADDRESS—When a change of address is ordered, both the new and the old address must be given. The notice should be sent to the Circulation Manager, Department of Labour, Ottawa.

HOW TO REMIT—Remittances should be sent by Postal Note or Money-Order, payable to the order of the Labour Gazette. Cash should be sent in Registered Letter. Remittances must not be made in postage stamps.

LETTERS should be sent to The Editor if in reference to the subject matter of the publication, and to the Circulation Manager if in reference to subscription; in each case the address being the Labour Gazette, The Department of Labour, Ottawa. Communications thus addressed, may be sent free from any part of the Dominion, if addressed in care of the Deputy Minister.

# THE LABOUR GAZETTE

PREPARED AND EDITED IN  
THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

VOLUME 24]

FEBRUARY, 1924

[NUMBER 2

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

**T**HIS issue of the *LABOUR GAZETTE* contains the regular quarterly articles on unemployment in trade unions, fatal industrial accidents and immigration, as well as the regular monthly articles. It also contains annual reviews for the year 1923 of strikes and lockouts and building permits. There are also various special articles on subjects relating to labour and industry, among which may be mentioned one on employees' superannuation in Canada.

The Report of the Royal Commission appointed on September 22, 1923, to investigate industrial unrest among the steel workers at Sydney, N.S., is issued as a supplement to this number of the *LABOUR GAZETTE*.

### Monthly summary

Reports from the Employment Service of Canada for the month of December, 1923, showed a rather large decrease in the number of vacancies, applications and placements reported, as compared with November, but compared with December, 1922, approximately the same level of business was maintained.

At the beginning of January the percentage of unemployment among members of trade unions was 7.2 per cent as compared with 6.2 per cent at the beginning of December, and 6.4 per cent at the beginning of January, 1923.

The average cost of a weekly family budget of twenty-nine staple foods was \$10.78 at the beginning of January as compared with \$10.73 for December, 1923; \$10.52 for January, 1923; \$11.03 for January, 1922; \$14.48 for January, 1921; \$16.92 for June, 1920 (the peak); \$15.30 for January, 1920; \$12.42 for January, 1918; and \$7.73 for January, 1914. In wholesale prices the index number calculated by the Dominion

Bureau of Statistics based upon prices in 1913 as 100 stood at 156.7 in January as compared with 153.5 for December, 1923; 151.4 for January, 1923; 149.8 for January, 1922; 201.7 for January, 1921; and 256.9 for May, 1920 (the peak).

The time loss due to industrial disputes during January was greater than during either December, 1923, or January, 1923. Fourteen disputes began or were in progress during the month, involving 12,793 employees and a time loss estimated at 186,078 working days. Corresponding figures for the previous month were 13 disputes involving 2,446 employees and a time loss of 28,693 working days, and for January, 1923, 18 disputes involving 2,852 employees and a time loss of 170,150 working days.

### Proceedings under the Industrial Disputes Investigation Act

Three applications were received for the appointment of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act, 1907. In each case the application for a Board was subsequently withdrawn and the matters in dispute were settled by direct negotiations between the parties concerned.

### A correction

In the December, 1923, issue of the *LABOUR GAZETTE*, on page 1378, in referring to the hours of labour for women in factories, it was stated that "with regard to meal hours, the Nova Scotia law directs that three-quarters of an hour shall be allowed on each normal day for a noon-day meal while the other provinces give one hour." This should have read "With regard to meal hours all provincial laws direct that one hour shall be allowed each day for a noonday meal."

**Appeal against judgment respecting validity of I.D.I. Act**

In the issue of the **LABOUR GAZETTE** for October, 1923, on pages 1126-1130, the text was given of a judgment delivered in the High Court Division of the Supreme Court of Ontario by Mr. Justice Orde in the case of the Toronto Electric Commissioners vs. Snider et al. This case had reference to the validity of the Industrial Disputes Investigation Act, 1907, the defendants being members of a Board of Conciliation and Investigation appointed under the Act. In accordance with this judgment an interim injunction was issued to restrain the defendants from interfering in any way with the business of the plaintiffs, or from exercising any of the powers given them by section 38 of the Act. Application was then made for a permanent injunction before Mr. Justice Mowat of the same Court. This application was refused in a judgment delivered on December 15 the text of which was given in the December, 1923, issue of the **LABOUR GAZETTE** on pages 1452 to 1455. Owing to the difference in opinion between the two judges, the matter was referred for determination to an appellate division of the Supreme Court. The case was argued before this Court in January but judgment had not been rendered at the end of the month.

**Dominion loans to provinces for housing**

The report of the Housing Division of the Department of Health of Canada is included in the general report of the Department for the financial year ended March 31, 1923, recently received. The report shows that the total amounts loaned to the provinces since the enactment of the Order in Council P.C. 2997, dated December 3, 1918, until March 31, 1923, were as follows:—

Manitoba.. . . .	\$1,975,000
New Brunswick.. . . .	1,525,000
Ontario.. . . .	9,350,000
British Columbia.. . . .	1,701,500
Quebec.. . . .	4,194,906
Nova Scotia.. . . .	1,537,000
Prince Edward Island.. . . .	50,000
	<hr/>
	\$20,333,406

The total number of houses erected under the scheme was 4,612, and 223 houses were planned or were under construction. These do not include the houses erected or planned in New Brunswick, the figures for which were not available. One hundred and sixty municipalities took advantage of the Dominion loan. Provincial housing acts and schemes have been enacted by all the provinces except Alberta. Loans were allocated to the provinces on the basis of population, and Manitoba, New Brunswick and British Columbia participated to their full quota, while Ontario, Quebec, Nova Scotia and Prince Edward Island availed themselves also in part of the additional amount payable under a revote of \$9,550,080, which was approved by Parliament for the fiscal year 1922-23. The work undertaken in the various provinces under the Dominion Housing loan has been noted in previous issues of the **LABOUR GAZETTE** (February, 1922, page 200, and other issues.)

A pamphlet has been prepared by the Explosives Division of the Department of Mines, Ottawa, addressed to local authorities, inviting attention to the prevalence of accidents with explosives. These accidents are attributed to the failure of persons using them to exercise sufficient care in their safe keeping, coupled with the ignorance of their dangerous properties on the part of others—principally children—who may pick up unguarded or unclaimed explosives. The pamphlet contains rules for the keeping and use of explosives suggested for inclusion in municipal by-laws. Information is given with regard to 135 accidents with explosives during the year 1922. Of these, eight, causing the death of two persons and injury to another (four being minor and noted by reason of technical interest), occurred in the manufacture of explosives, and none in the keeping or conveyance of explosives under circumstances immediately controlled by the Explosives Act of Canada. Three occurred in mine magazines, and 65 in

connection with shot firing, the regulation of which is outside the scope of the Explosives Act. Twenty-seven accidents (injuring 32 persons) arose from playing with detonators, 11 (killing two and injuring 11 persons) from playing with other explosives, and 21 (causing the death of one person and injuring 18 others) were due to various causes which were in most cases associated with ignorance, carelessness or recklessness on the part of someone, not necessarily the victim, in handling explosives. "The main source of the trouble," the pamphlet states, "is to be found in the very temporary arrangements made, and the too often very casual methods adopted by work parties, such as are employed on road work, or in cities in the excavation of foundations, opening sewers and the like. These parties require relatively small quantities of explosives, and these for a short time. Although the quantity of explosives is rarely so large as to call for storage in a licensed magazine, the persons keeping explosives in operations of this character are required, equally with the retail dealer, to keep them in a secure and proper place." Municipal authorities are asked to see that engineers or others inspecting or supervising such operations on their behalf direct that special attention be given to the precautions which should be exercised in the handling of explosives. When blasting operations are being conducted in a neighbourhood, it is suggested that the school teacher warn the children of the danger of handling detonators. A brief note on the appearance, use and danger of detonators is contained in the pamphlet. The following are some of the "don'ts" to which persons handling explosives are directed: don't hide explosives—lock them up; don't keep explosives with tools; don't keep detonators and blasting explosives together; don't leave explosives accessible to children; don't smoke or have fire or naked lights near explosives; don't neglect to check all explosives issued, used and left over each day; don't forget to lock up unused explosives.

**Manitoba  
employers'  
legislative  
programme**

The Employers' Association of Manitoba, in the January issue of their organ, *The Payroll* (Winnipeg), published a "constructive legislative programme" containing the following proposals: prohibition of strikes in public utilities; protection of agreements entered into between employers and their workers against arbitrary violations; prevention of arbitrary restrictions on production; prohibition of "peaceful picketing"; prohibition of the calling of strikes before negotiation and mediation have failed; incorporation and registration of all unions, and the making of unions responsible for the acts of officers and members in connection with industrial disputes; protection of the right to maintain "open shops" as far as employers are concerned, and of the right to remain outside of labour organizations as far as the workers are concerned; and revision of the rules of apprenticeship.

**Appeal against  
sentence for  
seditious libel**

In the issue of the *Labour Gazette* for November, 1923, on page 1274, it was stated that the charge under which warrants were issued for the arrest of Messrs. Dan Livingston and J. B. McLachlan was that of "unlawfully publishing a false tale whereby injury or mischief was likely to be occasioned to a public interest, namely, the government and provincial police of Nova Scotia, contrary to section 136 of the Criminal Code." At the trial of Mr. McLachlan the charge laid against him was that of seditious libel, and it was for this offence he was found guilty and sentenced to two years in the penitentiary.

On January 29, an application was made before the Supreme Court of the province on behalf of J. B. McLachlan for special leave to appeal the case to the Judicial Committee of the Privy Council in England. On February 16, leave to appeal was granted.

**New duties of Manitoba Labour Bureau** The Bureau of Labour of Manitoba took over at the beginning of February the inspection work of the Fire Prevention Department of the city of Winnipeg. The Government's intention, it is stated, is to co-operate with municipalities in the province so as to prevent overlapping in the duties of the various officials. The Prevention of Fires Act (Statutes of Manitoba, 1917, chapter 35) provides that the chief of the fire department of every municipality in which a fire department is established, and the clerk of every municipality, shall be by virtue of their office assistants to the Provincial Fire Commissioner. This official has the authority to enforce all laws and regulations of the province relating to the prevention of fires, construction of fire escapes, exits from factories, churches, schools and other public buildings, and the investigation of fires.

**Maritime Safety League** of the LABOUR GAZETTE (page 1270), among the recent developments in safety work in Canada there was mentioned the formation of the Quebec Safety League as a section of the Canadian National Safety League. A more recent development is the formation of the Maritime Safety League, which took place at a meeting held under the auspices of the Canadian National Safety League at Moncton, New Brunswick, on January 30, 1924. The meeting was attended by about fifty persons, being representatives of the business, professional, industrial and transportation interests, representatives of the various provincial governments and the leaders of labour organizations in the various provinces. The new league has been formed as a branch of the Dominion organization and will comprise the provinces of Nova Scotia, New Brunswick and Prince Edward Island. Its objects are similar to those of the Quebec League, being described as follows:—

(a) To protect and safeguard the public, especially children, from the dangers of auto-

mobiles, railroads, street railways and all forms of vehicular traffic on the public highways in these provinces.

(b) To educate the public, through schools, churches, literature and all channels of publicity upon matters pertinent to public safety.

(c) To minimize the injuring and killing of persons employed in stores, factories, workshops, mines and all departments of industrial and mercantile activity, including lumbering, by instilling into the mines of employer and employee the full meaning of "Safety Always."

(d) To co-operate as far as lies in the power of the League in preventing the useless destruction of life, property and forests by fire.

(e) To advocate and secure possible remedies and preventives, and to assist in the enactment and enforcement of ordinances requisite to carry out the foregoing.

(f) To encourage the formation of local safety leagues throughout the Maritime provinces.

It was decided that the headquarters of the league should be at Moncton, New Brunswick, and that there should be an executive committee within the city of Moncton, and district committees at St. John, Halifax and Charlottetown and any other places deemed desirable by the executive; all such members to be members of the executive committee. An executive committee was appointed composed of the mayors of various cities, heads of school boards, officers and managers of tramway companies, representatives of organized labour unions, ladies representing school organizations, and about thirty-five other representative men with power to add to their number. Mr. A. T. Weldon, traffic manager of the Canadian National Railways, was chosen as president of the league. Mr. H. R. Thompson of Amherst, Nova Scotia, secretary of the Accident Prevention Association of Nova Scotia, pledged to the league the assistance and co-operation of the Association to the fullest extent.

**Hours of painters and Workers' Health Bureau** A five day or forty-hour week has been established for painters, members of the Brotherhood of Painters, Decorators and Paperhangers of America, in a number of cities and towns of the United States including New York, Brooklyn and practically their entire vicinity; Boston and its surroundings; Chicago (Sign.

Scene and Pictorial Painters); Seattle, and several other Pacific coast cities. It is estimated that about one-fifth of the membership will now have forty-eight hours' rest to throw off the poisons inhaled resulting from the use of turpentine, benzine, naphtha and other poisonous substances. Employers in New York City have also joined in the creation of a joint board for the prevention of insanitary conditions in the industry. The health clause which appears in the agreement is stated to be the first of its kind in any painters' agreement. It reads as follows: "The Joint Trade Board will make adequate and proper provisions for the health and safety of the men in connection with their work, and as far as possible protect them from the hazards of the trade." These conditions have been brought about mainly as a result of a campaign launched on February 17, 1923, in New York City by members of the Brotherhood when about 10,000 members of District Council No. 9 attended the meeting. The basis for the Brotherhood's health programme was a report compiled by District Council No. 9, in which were included the medical findings of 267 painters examined by the Journeymen Painters and Allied Crafts Health Department, an account of which was given in the January issue of the *Labour Gazette*, (pages 31 and 32).

This health movement began in 1921 with the organization of the Workers' Health Bureau in New York City. The Bureau has three functions: (1) Analysis and research to secure exact information regarding occupational hazards. (2) The establishment and supervision of trade union health departments to provide careful periodic physical examinations for all members, and special care for those suffering from occupational disease. (3) Health instruction for the translation of technical data into language which workers understand, in order to teach them how to safeguard themselves against occupational and other diseases. The Bureau functions as an international office for all affiliated trade unions and

is supported by them on the basis of a yearly per capita affiliation fee of twenty-five cents. On the Bureau's advisory committee are Dr. Emery R. Hayhurst, professor of industrial hygiene, Ohio State University; Dr. Alice Hamilton, assistant professor of industrial hygiene, Harvard University, and Dr. C. E. A. Winslow, professor of public health, Yale University. Grace M. Burnham, the director of the Bureau, reports that the Bureau is becoming the health clearing house for the trade union movement of America. She says:

It is supplying the labour press with a bi-monthly news release entitled "Health Facts for Trade Unions." It is preparing a health textbook for labour colleges. It has compiled data for improving health standards in various localities. It has analyzed the health hazards in forty-four trades affiliated with the American Federation of Labour and is prepared to organize a health programme for any of these trades. It has found that lead poisoning and tuberculosis are the outstanding health hazards in no less than fifteen trades. For example, among the potters the rate of lead poisoning has increased from 4½ to 15 per cent within the last twenty years. The introduction of the pneumatic tool in the granite stone industry has been followed by an increased death rate from tuberculosis alone of 144 per cent.

The Painters' Union was the first to adopt the Workers' Health Bureau programme. In July, 1922, six locals of New York City organized the Journeymen Painters and Allied Crafts Health Department. It has a membership of 3,500. The Workers' Health Bureau planned the entire department; recommended and secured the equipment and supplies needed; interviewed nurses, doctors, dentists and other members of the staff; worked out the medical and dental and forms used; and arranged every detail in order to secure the lowest cost of operation and the highest grade of medical service. Members receive careful examination of the body, mouth examination and cleansing of the teeth; tests of the blood and water, and X-ray examination where needed. This kind of examination and advice usually costs from \$20 to \$25. The painters have reduced the cost to \$3 for the first year's per capita assessment. All mem-

bers of trade union health departments pay the assessment—no extra fees are charged where members require special service. The fortunate member who has been able to resist the harmful effects of his trade and therefore needs no special X-ray or extra laboratory tests, pays for the more intensive service needed by his less fortunate brother. The staff consists of a medical director, dentist, nurse, laboratory technician and X-ray operator who is also a physician.

**International  
congress of  
industrial health**

A Swiss organization committee has been constituted for the purpose of convening an International Congress of Industrial Health which is to be held at Geneva from July 18 to 20, 1924. This congress will deal with questions of industrial lighting and eye strain, improvement of air in factories, and an examination of the value of fatigue tests. The committee has asked prominent men of science who have given special attention to these questions to draw up expert reports on them. The importance of these questions is recognized in that three reporters are to be designated for each of the above questions. Those wishing to correspond with the committee will find their offices at the Institute of Hygiene of the University of Geneva.

**Medical  
inspection of  
factories**

In connection with the discussions of the Fifth International Labour Conference (League of Nations) on the general principles for the organization of factory inspection, the International Labour Office has published in proof a comparative study of the organization and work of the medical inspection in various countries. The report is based on information received in reply to a questionnaire dealing with the most important functions which are or might be entrusted to the service. The questionnaire was sent to those States Members of the Organization which actually possess a medical inspection service or have taken steps to provide for medical collaboration in

their factory inspection service. The replies from which the information contained in the report is derived were received from the following countries: South Africa, Germany, Australia, Austria, Belgium, Canada, France, Great Britain, Greece, Hungary, Italy, Japan, Norway, Netherlands, Poland, Czechoslovakia, Serb-Croat-Slovene Kingdom, Sweden and Switzerland. Unofficial information on medical factory inspection in Soviet Russia was also obtained. The report concludes with an account of the technical training of medical inspectors, and the modification proposed in the existing system of medical factory inspection.

**Employment of  
disabled men**

In the September, 1923, issue of the LABOUR GAZETTE on pages 968 and 969 an account was given of a meeting of experts at Geneva on July 31 to August 2, which was convened by the International Labour Office (League of Nations) for the study of methods of finding employment for disabled men. The International Labour Office has published a report of this meeting entitled "Employment of Disabled Men". Seventeen experts attended the meeting from the following countries: Australia, Austria, Belgium, Canada, Czechoslovakia, France, Germany, Great Britain, Italy, New Zealand, Poland and South Africa. The Permanent Inter-Allied Committee for the Study of Questions concerning War Disabled Men was represented by its general secretary. The document, which contains about 300 pages, includes the report submitted to the experts, the minutes of the proceedings of the meeting, and the resolutions adopted by the experts. Appendices are included covering detailed information on employment of disabled ex-service men in France, Great Britain, Italy, Germany, Austria and Poland.

**Trade Boards  
Act, Northern  
Ireland**

The parliament of Northern Ireland at its recent session passed a law establishing trade boards, which received the Royal Assent on

November 27, 1923. The act embodies practically all the recommendations of an advisory committee on trade boards which was set up in November under the chairmanship of the Marquis of Dufferin and Ava. The principle of application is in accordance with the main conclusion of the Dufferin Committee that "the necessary statutory regulation of wages should be confined to affording protection by giving to the workers a wage which will secure to them an adequate subsistence and which the trade can bear." The principal modifications of the British Trade Boards Acts, which have been introduced in the law, are as follows:—

(1) Provisional Order procedure instead of Special Order procedure is to be followed in applying the Act to a trade or in suspending or withdrawing its application in the case of a trade to which it has been applied. (2) The fixing of a piece-work basis time-rate as a protection for piece-workers becomes an obligation on a trade board in addition to the duty of fixing a general minimum time-rate. (3) The power to fix guaranteed time-rates and the duty to fix special minimum piece-rates on the application of an individual employer are withdrawn. (4) The power to fix general minimum piece-rates for in-workers is subject to a proviso that the question as to whether such rates shall be fixed shall be determined by agreement between the representative sides of the Board. (5) In the fixing of general minimum piece-rates for out-workers the rates fixed "shall be not less than the piece-rates which would be paid for the work if done on the employers' premises." (6) Provision is made for the safeguarding of juvenile workers employed on piece-work by the requirement that during the first six months of their employment in the trade they must receive for piece-work at least the same amount of money as they would have been entitled to if employed on time-work. If employed subsequently on piece-work they must be paid at piece-rates which would comply with the provisions of the Act if paid to a worker other than a juvenile worker employed on the same piece-work operations. (7) The period within which a trade board may receive objections to proposals to fix, vary or cancel rates has been reduced from two months to one month in the case of proposals to fix rates, and to fourteen days in the case of proposals to cancel or vary rates. (8) The period within which the Ministry shall make an Order confirming the fixing, cancelling or varying of a rate, as the case may be, has been reduced from one month to fourteen days. (9) Trade Boards may grant permits of exemption from the provisions of the Act in re-

gard to minimum rates to time-workers who are incapable of earning the minimum rates owing to age or other disability, as well as to those suffering from infirmity or physical injury. (10) The Ministry is empowered to extend the jurisdiction of a trade board over two or more trades which in the opinion of the Ministry are of an allied or kindred nature. (11) The Ministry, on representations from employers or workers in any trade for which a trade board has been established that a district trade committee is necessary or desirable in that trade, may establish a District Trade Committee to which the trade board may delegate any of their powers and duties under the act other than their rate-fixing powers and duties. District trade committees are required, however, to make recommendations to the trade board as respects minimum rates for the district concerned. (12) The number of appointed members on each trade board has been limited to one, who will act as chairman. (13) The provisions in regard to legal proceedings have been amended, and follow more closely the procedure under the Factory and Workshop Acts.

#### **Industrial Training of women in England**

The Central Committee on Women's Training and Employment of Great Britain has issued an interim report on their work for the period ending December 31, 1922. The committee was originally appointed at the outbreak of the war to administer the Queen's Work for Women Fund, a fund raised by public subscription to relieve distress amongst women arising from the war. The Queen's Work for Women Fund became part of the National Relief Fund, and the work of the Central Committee was carried on in collaboration with that body and with the Government Committee on the Prevention and Relief of Distress. At the outset the activities of the committee were mainly concentrated upon the direct prevention and relief of unemployment; but during 1915 the increased demand for women's labour greatly reduced industrial distress, and as a result of the decreased claims upon their funds the committee had still a balance to their credit at the end of the war.

On January 5, 1920, to alleviate the distress among women caused by the transition from war to peace conditions, the Minister of Labour reappointed the committee "To consider, devise, and

carry out special schemes of work and training for women unemployed, or women whose earning capacities and opportunities have been injuriously affected as a result of conditions arising out of the war". On April 8, 1921, the committee was further empowered to undertake the provision of equipment to candidates trained by them who were unable to set up in trade owing to the lack of necessary appliances; and the provision of equipment for women who did not require assistance from the committee to enable them to train, but who, without equipment, were unable to obtain employment. Under the new terms of reference the committee employed their funds, augmented by grants from the National Relief Fund and the Ministry of Labour, mainly for training women for suitable occupations under various schemes, as follows:—

*Scholarship Scheme.*—Under this scheme grants were made to selected candidates to enable them to receive training in non-industrial occupations, such as teaching, massage, nursery nursing, midwifery, cookery, etc., assistance being given in the form of scholarship grants to cover the cost of fees at recognized training schools, and, where necessary maintenance during training. On January 1, 1923, 2,511 women had completed training under this scheme, of whom 1,567 were known to have obtained posts in the occupation for which they were trained, while 1,333 were in training or awaiting training.

*Home Crafts Scheme.*—This scheme has provided training (with maintenance) in domestic subjects for over 10,000 unemployed women undertaking to enter resident domestic service. During the period May, 1921, to December 31, 1922, 214 courses were provided.

*Domestic Outfits Scheme.*—Under this scheme 2,538 outfits of clothing at an average cost of £3 12s. 3d., were given to women who were qualified for and willing to enter domestic service without further training, but were unable to accept suitable employment owing to the lack of an adequate outfit.

*Homemakers Scheme.*—This scheme has provided training (with maintenance) in domestic subjects for 1,560 unemployed women, who were awaiting the opportunity to return to their own trades. It thus differs from the Home Crafts scheme described above, which is intended to train women for resident domestic service. The curriculum was designed with a view to assisting women with the domestic work of their own homes and the syllabus was modified in various respects from that laid down for the Homecraft Centres.

Early in 1922, in view of the prospect of their funds coming to an end, and of the industrial distress still being acute, the committee decided to concentrate upon the Homecrafts and Homemakers courses, and March 1, 1922, was appointed as the final date for the receipt of applications for training under the scholarships scheme. With the aid of a further grant from the Ministry of Labour in 1922, the Committee were able to continue the Homecraft courses throughout the whole of that year, and it is stated they hope to maintain this branch of their work as long as unemployment among women remains abnormal.

**Report of  
British  
committee on  
domestic service**

In April last, the British Minister of Labour appointed a committee under the chairmanship of Mrs. E. M. Wood, C.B.E., "to enquire into present conditions as to the supply of female domestic servants, and in particular to enquire into the effect of the Unemployment Insurance Scheme in this connection and to make recommendations." A report based on information obtained from persons in touch with large numbers of actual or potential domestic workers, or with long experience of their troubles or desires has recently been received. In the report the committee draw attention to the fact that the radical changes and improvements in the moral and material conditions of industrial life generally during the past half century have not been so marked in domestic work; while formerly the conditions in the latter were

very superior to those appertaining to workshop or factory, the failure further to advance them has resulted in the relative attractions of domestic and industrial life being reversed. The committee add that a great deal of unnecessary expenditure of time and energy might be obviated by a wider use of labour-saving devices, which they believe would do much to make domestic life more attractive to educated girls. Attention is drawn to the desirability of unofficial organizations, such as the Young Women's Christian Association, etc., and private individuals, furthering by possible means the provision of better social, recreational, and educational advantages for domestic workers and the upholding of the dignity of domestic service as a skilled and honourable profession. The committee make the following recommendations:—

*Training.*—Instruction in domestic science in all elementary schools for every girl between the ages of twelve and fourteen; instruction in domestic science carried to a further point for all girls in central and secondary schools, and, in Scotland, in the schools corresponding to these; the provision of advanced scholarships or bursaries for girls desirous of completing a specialized training; the provision of whole-time vocational courses in suitable centres for girls over the age of fourteen; the giving of maintenance grants where necessary to individual pupils; the establishment of open examinations with certificates or proficiency. Thus a child could be trained in domestic subjects either at an elementary school followed by a vocational course, or at an elementary school and central school, whether or not followed by a vocational course, or at an elementary school and secondary school, and then, in suitable cases, by a further course at a technical school, to enable her to qualify for a teacher or for other superior posts, or at an elementary school followed by private training.

In all cases examinations will enable students to provide themselves with definite certificates of proficiency. Until these sources of supply are developed the courses arranged by the Central Committee for Women's Training (or similar ones) should be available for older girls or adults wishing to transfer into the occupations; and, where these are not available, courses with a maintenance grant in lieu of unemployment benefit should be instituted where the facilities for training can be arranged.

*Unemployment Benefit.*—The artificial distinction between various types of domestic workers should be obliterated as far as pos-

sible, by bringing all female domestic workers, wherever employed, under a scheme of insurance in addition to National Health Insurance; but in the case of women and girls in private domestic employment there should be, as an alternative to Unemployment Benefit, a scheme whereby a pension of 15s. a week should be obtainable at the age of fifty-five, and should continue until the Old Age Pension becomes payable, when it should be reduced to the amount of that pension. Contributors to the pension scheme should have the option of a cash payment on marriage in lieu of pension. Benefits under this scheme should come into operation as soon as possible, and in any case not later than three years hence.

*Distribution.*—The making of bylaws for the proper control and supervision of registry offices should be made compulsory upon Local Authorities.

*General.*—(a) Special sub-committees should be established by the Local Employment Committees attached to Employment Exchanges to consider the problems in connection with domestic work and to endeavour to form local associations of employers and employees to agree upon conditions in their area; (b) Female domestic workers who have attained the statutory age should be entitled to the Parliamentary vote on the same resident qualification as men.

It is reported in the *Monthly Labour Review* of the United States Department of Labour that the Southern Pacific Railway Company has contracted for a group life insurance policy amounting to about \$100,000,000 for the benefit of its 90,000 employees. Under the law, acceptance by 75 per cent of the eligible employees is required before it can be put into effect. It is expected that this condition would be fulfilled at the beginning of the year. Employees with six months' service with the company will be insured free to the amount of \$250, increasing to \$500 at the end of one year's service. Employees one year or more in the service may purchase additional insurance up to \$3,000 according to the monthly rate of pay of each, paying therefor 70 cents for each additional \$1,000 of insurance, the difference between this amount of premium and the actual cost being borne by the company. In case of permanent total disability through sickness or accident

**Group insurance plan of Southern Pacific Railway**

before an insured employee reaches 60 years of age, no further premium will be collected and the total amount of insurance will be paid in monthly instalments. In the event of death any unpaid instalments will be paid in a lump sum to the designated beneficiary. The company may, at its option, continue the insurance for a period not exceeding 90 days in the case of employees who are temporarily absent from service through no fault of their own, and in the case of unavoidable absence because of sickness or accident, the insurance will be continued. Employees retiring on a pension before the effective date of the plan will be treated as actual employees in regard to the free insurance given by the company, and employees retired on a pension after the plan becomes effective may retain both the free and additional insurance carried by them, without change of rate. The group insurance plan does not in any way affect the rules and regulations of or the benefits resulting from the present Southern Pacific hospital service and pension system.

**Profit sharing  
and works  
committees plans  
of Norway**

At the end of 1918, a Royal Commission was appointed by the Norwegian Government to investigate the question of profit-sharing and workers' control. The commission completed its work in the autumn of 1922. Two draft bills accompanied the report of the commission on profit-sharing. One submitted by six members of the commission, including the chairman, provides that the net profits of all industrial, handicraft, commercial or transport undertakings, public or private, with certain exceptions, shall be divided between the employers and workers in accordance with certain provisions of the Bill and that a profit-sharing plan be drawn up for each individual undertaking. The net profits are defined as including the profits remaining after deduction of all working expenses, including the necessary sums to be written off, suitable remuneration to the employer for his personal work in the concern, the funds allocated to

reserve as allowed under the scheme and as required by statutory provisions, such commissions as may be allowed to the management under the scheme, and interest from the capital invested. The net profits shall be divided in the ratio of the wages bill for the financial year to the returns on capital. The Bill also provides for limitation of profits in order that the amount distributed in specially profitable undertakings shall not be excessive. Of the wage-earners' share of the profits at least half shall be distributed to them individually, while the remainder may be disposed of by the employer, in accordance with the scheme, for welfare arrangements. The other draft bill was submitted by the employers' representative on the Commission and a measure based mainly on this proposal, the Provisional Act on Workers' Committees in Industrial Concerns, was introduced by the Conservative party and passed by parliament. Under the terms of this Act, workers' committees shall be established at the request of one-fourth of the workers in industrial and certain other concerns which regularly employ at least fifty workers throughout the year. The committee shall consist of not less than two and not more than ten members, who shall be elected for a period of one year from among the workers employed in the concern over twenty-one years of age. All workers in the undertaking over eighteen years of age, except salaried employees, shall be entitled to vote. The works committee is to discuss and express an opinion on the affairs of the undertaking in so far as they relate to the following: (1) Important changes in management which will affect conditions of work; (2) ordinary wages regulations, fixed piece work tariffs, hours of work, overtime, the plan of work to be adopted in the case of restriction of operations, holidays and other working conditions; (3) workshop rules; (4) the establishment or management of welfare arrangements for the benefit of the workers. The committee is entitled, and on request of any interested party is bound, to discuss and try to settle disputes relating to work-

ing conditions or to the dismissal of workers. The Bill provides further that in the case of seasonal work and in undertakings employing not less than five wage earners or more than twenty entitled to vote and three qualified for election, instead of work councils, representatives shall be elected with the same rights and duties. The report of the Commission will be submitted to important organizations of employers and workers for their opinion and, it is stated, some time will elapse before the State authorities can take up their point of view with regard to these proposals.

#### **Labour courts in Czecho- Slovakia**

A bill is being drafted in the Czecho-Slovakian Ministry of Justice to provide for the extension of the powers of existing industrial courts. In future these will be known as Labour Courts, and will deal with disputes of all kinds, between employers and workers arising out of employment, both individual and collective. It is proposed to institute labour courts in all localities where they are required. They will consist of a chairman and a substitute who are judges by profession, together with a certain number of assessors, one half of whom would be employers and one half workers. These courts will be competent to deal with all disputes relating to the following matters: Deductions from wages, fines, etc.; questions relating to entry upon, continuance and cessation of employment; claims regarding pensions or other relief funds; issue and contents of certificates of service, testimonials, etc.; matters relating to notice to quit and rent of houses leased by the employer to his workpeople, and disputes between employees in an undertaking regarding work undertaken jointly.

#### **Co-operative movement in Japan**

An Act was promulgated in Japan on April 6, 1923, establishing a central credit institution for co-operative societies. It is provided that the funds of this institution shall amount to 30 million yen (\$15,000,000), to be

constituted by the issue of 300,000 shares of 100 yen each. Only the Government and the co-operative societies are allowed to hold shares. The Government is to contribute a sum of 15 million yen, of which 5 million yen are to be paid within a year of the establishment of the institution. The main functions of this institution are to advance loans to unions of co-operative societies or to individual societies which are members of it, to discount bills for such societies and to hold deposits of unions of co-operative societies, etc. The number of co-operative societies at present in Japan is about 14,000, with a membership of about three and a half millions. A national union of purchasing societies has recently been constituted. At present there are about 10,000 co-operative societies, which are solely or partly purchasing societies, and over 100 unions of such societies. The national union of these purchasing societies will undertake the manufacture, or the wholesale purchase of goods required by their members. The majority of these societies deal with the purchase and sale of agricultural implements and materials for the agricultural population.

Notice has been received by the Department of conventions of the following Canadian labour organizations and international labour organizations having affiliations in Canada:

National Association of Marine Engineers of Canada, at Ottawa, on February 26, 1924.

Amalgamated Association of Iron, Steel and Tin Workers, at Pittsburgh, Pa., on April 1, 1924.

Some features of the Mothers' Allowance Act of Ontario were criticized by the Toronto District Trades and Labour Council at a meeting early in January. The territorial plan of awarding allowances, under which women residing in a city receive more than those just outside the city limits, was said to lead in practice to unfair distinctions and to result in a movement of widows from outside districts into the cities.

The Council would favour an increase in the amount of allowances, and the extension of benefits to a widow with one child.

A recent amendment was made to the order of the Minimum Wage Board of Alberta governing clerical workers which was noted in the last issue of the *LABOUR GAZETTE* (page 7). In the amended order the words "in an office" were omitted, the minimum wage of \$14 a week now applying to an experienced female employed anywhere as a stenographer, book-keeper, typist, billing clerk, filing clerk, checker, invoicer, cashier, comptometer operator, auditor, attendant in physicians' and dentists' offices, in clerical work of any description, as a cash girl, or as a telephone or telegraph operator. The amendment followed upon the decision of a test case instituted by the Minimum Wage Board against a Calgary merchant in the magistrate's court. The magistrate dismissed the charge, pointing out that order No. 5 applied only to certain help employed "in an office," whereas in the case before him the employee worked in a store, ringing up cash in a register and not keeping books of any kind.

Regulations for licensed drivers of motor vehicles in Ontario were issued on January 10, under authority of section 17 of The Highway Traffic Act (Statutes of Ontario, 1923, chapter 48). Section 17 prescribes the conditions under which licenses may be issued to chauffeurs, that is persons who operate motor vehicles and receive compensation for so doing. The new regulations, besides the usual provisions as to badges, examinations, fees, etc., lay down that every licensee is to notify the Provincial Department of Public Highways of every change of employer, giving the name and address of his employer from time to time, and the number of the permit of the motor which he operates. Any person passing the examination prescribed in the act, but who does not drive for hire, pay or gain, may be granted Departmental registration and a non-professional certificate of

competence upon payment of a fee of one dollar.

The Street Railwaymen's Union at London, Ontario, have announced that they will include a demand for an eight-hour working day with other demands when the union holds its annual negotiations with the company. The men now have a working day of nine hours, with time and a quarter for overtime. Resolutions in favour of the eight-hour day and of an annual two-weeks vacation with pay were passed at the annual convention of the Amalgamated Association of Street and Electric Railway Employees of America.

The Workmen's Compensation Board of New Brunswick employ an expert in "first aid to the injured" who instructs the employees in logging camps, mills and other industries coming under the act.

The Canadian Pacific Railway Company, according to evidence presented at the recent Workmen's Compensation Conference in New Brunswick, has had a system of "first aid" in practice for many years, and today about 20,000 employees are capable of giving "first" aid until the arrival of a surgeon. This system has saved many lives and minimized serious injuries, it was stated. The railway's policy is to hold an investigation into every accident. In the shops it is the duty of the foreman to see that accidents are prevented or kept to the lowest possible minimum, and careless employees who are likely to injure themselves or others are not retained in the service of the company. (Reference has been made to first aid instruction on Canadian railways in the *LABOUR GAZETTE*, May, 1922, and other issues.)

The announcement is made by Mr. W. D. Robb, vice-president of the Canadian National Railways of the appointment of Mr. W. A. Booth, chief draftsman, motive power department, Montreal, as director of safety and first aid for the Canadian National Railways. Mr. Booth will direct the instruction of all employees in the proper use of tools and in the exercise of care in their work. Instruction will be given to men working

in the shops in many parts of the System, and also all those employed in the operation of trains and in the maintenance of the right of way. Instruction in first aid has been carried out by the Canadian National Railways for some time there being about 60 classes of men and women receiving instruction at the present time, and it is estimated that about 18,000 employees have received instruction.

Sir Percy Sherwood of Ottawa recently donated a shield which is to be competed for, in first aid, by policemen throughout Canada, each team being made up of five men. A team from "A" Division, Royal Canadian Mounted Police, Ottawa, had the initial honour of having their name engraved upon it.

Mr. Arthur Gaboury, Montreal, has been appointed general manager and secretary of the Quebec Safety League.

At the recent annual convention of the Shoe Manufacturers' Association of Canada held at Montreal a resolution was adopted in favour of an immediate effort by the Dominion and provincial governments to induce immigration on a large scale.

A fund to provide pensions for employees' widows has been established by Messrs. Cadbury Brothers, Limited, at Bourneville, England. In the event of the death of an employee who has attained pension age, his widow will be entitled to a pension equal to one-half of her husband's normal pension. The fund which was to start on a contributory basis from December 17, 1923, will be supported by contributions of equal amount made by the company and by the employees. An employee's contribution will be at the rate of one-third of his normal contributions to the Men's Pension Fund. The company has agreed to bear the whole cost of the scheme in respect of periods of service prior to December 17, 1923, and has agreed to pay over this sum to the trustees as a back service gift. The actuary estimates this cost at a sum of about £95,000.

Several convictions have been secured recently in the province of Quebec for infringements of the Lord's Day Act. A locomotive company was fined \$50 for

working over 100 men on a Sunday, and a similar fine was imposed on a firm of building contractors. On the other hand a steel company was acquitted of the charge, on the ground that the work complained of, the removal of ashes, was a "work of necessity."

In a report "Ten Years Work for Children" published by the Children's Bureau of the United States Department of Labour it is stated that in the decade following the creation of the Bureau in 1912, similar bureaus were created in Belgium, Czecho-slovakia, Germany, Russia, Poland and Jugoslavia. In the United States the Division of Vital Statistics of the Bureau of Census established the birth-registration area which now includes 30 States and the District of Columbia, 72.2 per cent of the population; the number of States which have special bureaus or divisions dealing with child health has increased from one to 46; 40 States have availed themselves of the benefits which the maternity and infancy act of 1921 offers; more than half the States have created commissions to make comprehensive enquiries into all aspects of child welfare, with a view to a recodification of existing laws and such improvements in law and administration as are found to be needed to bring the State's care of its children up to standard; and the number of States which provide, through mothers' pensions, public aid for dependent children in their own homes has increased from two to 42. While the Children's Bureau does not claim credit for these changes, its investigations furnished the facts on which action was frequently based.

The International Labour Office has been informed, in reply to a questionnaire sent out by it, that anthrax infection in Roumania resulted in 62 deaths during the year 1922. There was a total of 704 cases of anthrax infection during the year, 463 men and 241 women, resulting in death to 37 men and 25 women. The general death rate was 8.8 per cent. Women formed 34.23 per cent of the total number of cases, but the death rate among women (10.4 per cent) was higher than among men (7.9 per cent.)

## GENERAL REVIEW OF THE INDUSTRIAL SITUATION

### The Labour Situation, Strikes, Prices

#### The Labour Situation

**E**MPLOYMENT as indicated by employers at the beginning of January showed the large contraction that is always recorded at this time of year. The situation, however, was slightly better than in the corresponding period of 1923 and considerably more favourable than in 1922. At the beginning of January the percentage of employment among members of trade unions was 7.2 as compared with 6.2 at the beginning of December 1923 and 6.4 at the beginning of January 1923.

The offices of the Employment Service of Canada reported a decline in the business of the offices during the month of December, as compared with the preceding month, but the amount of business was approximately the same as in December, 1922.

The following is a summary of employment conditions at the end of January, 1924, as shown by the Superintendents of the Employment Service of Canada.

Considerable activity was reported in the logging industry in the Maritime Provinces. The recent snow storms and cold weather brought about the anticipated increase in demand for lumbermen. Seasonal slackness was evidenced in the construction group, the work available being offered only on civic projects and on dam and transmission line construction near New Glasgow. An increased registration of labourers and skilled workmen was reported at all the offices with an insufficient number of vacancies available.

In Quebec employment conditions were about normal for the time of year. There was practically no demand for farm workers. The logging camps have all the help they need, and a few orders for loaders and teamsters only were received during the month. Reduced staffs were reported in the mining districts in the vicinity of Hull and Sherbrooke. Manufacturing industries gen-

erally were quiet. A decrease in textiles—principally cloth and silk mills—was reported, but some activity was shown in boot and shoe manufacturing. In the building trades some employment was offered for plasterers, bricklayers and steamfitters, but no work was available for carpenters and painters or for building labourers. There has been no demand for transport workers. Orders for snow shovellers during the latter part of the month gave temporary employment to large numbers of workers. There was a general slackness in trade and merchants are proceeding with their inventories. There has been quite a brisk demand for domestics with enough applicants to fill all orders received. Few requests were received for hotel and restaurant workers.

In Ontario seasonal industrial depression was very marked with little prospect of expansion until the spring. In addition, owing to the colder weather, large numbers of construction workers were unemployed, and while many municipalities had undertaken road, sewer and watermain construction, this work was not entirely sufficient to care for the many skilled workers registered. However a number of districts have passed through the early stages of the winter without as yet having to face an acute unemployment problem, and this in comparison with conditions in previous years is most encouraging. The mining industry continued fairly active but few vacancies were offered. Demand in the logging industry remained very brisk and in the Northern districts the improved weather conditions was reflected in an increased demand. A number of the offices continued to supply the farmers with experienced hands for the winter months.

In Manitoba a fair demand for farm workers for the remainder of the winter was shown at all the offices with an improved response. The steady call for bushmen, cord wood cutters, teamsters

and tie makers was reported especially at Winnipeg, the latter office being responsible for the transfer of large numbers of workers to camps near Port Arthur and Sudbury, Ontario. Quietness prevailed in the construction group few opportunities being offered with a heavy demand for casual labour. There was a decided improvement in the women's section, employment of a regular character being afforded to many experienced household workers. Casual work for women was available in about the same volume as formerly.

The farming group in Saskatchewan showed renewed activities with the supply of workers about equal to the demand. Construction remained much as previously reported, very few vacancies offering for skilled tradesmen, although the number of applicants registered was not great. A number of men were employed in some districts in casual work shovelling snow and clearing railway tracks. A falling off in logging activities was evidenced due to the fact that the majority of camps has a complement of workers.

Although conditions were quiet in the agricultural sections of Alberta many placements were made by the offices. Indications point toward a very keen demand for farm workers in the spring. No new developments were in progress in the building and construction groups, few vacancies being offered for tradesmen. Municipal public projects such as sewer construction provided employment for numbers of applicants registered as out of work. Some labourers were placed on railway maintenance work at Medicine Hat. The requests in the logging group continued to form the large part of the work of the offices and numbers of men were transferred daily to camps in Northern Alberta and British Columbia. The mining industry was fairly active, pick miners being in demand at Drumheller and Lethbridge.

In British Columbia only a nominal demand for farm workers was evidenced. While there is much construction under way, including power plant, bridge building and sewer construction much of this had been held up on account of bad

weather. For this reason applications for work were steadily increasing in numbers with out of town arrivals forming a serious addition in the urban districts. No appreciable change was recorded in logging, the demand for all classes of workers being met fairly satisfactorily with the exception of tie makers, a scarcity of experienced workers being reported. There was a steady call for women household workers, the supply being unsatisfactory from the point of view of experience.

The volume of employment at the beginning of January, 1924, showed the large contraction

REPORTS  
 incidental to this time of year, although the declines were considerably less than at the beginning of January, 1923. The tendency in all industries, except logging and retail trade, in which there were seasonal gains, was downward. The heaviest reductions were reported in manufacturing, largely owing to temporary shutdowns over the holidays and for inventories. Shrinkage was recorded in all provinces but the losses in Ontario and Quebec were the largest. The Maritime District, on account of seasonal gains in logging and transportation, was least affected by the general curtailment of operations. Reductions in employment were recorded in all of the six cities for which separate tabulations are made. They were very extensive in Montreal, where pronounced contractions due to the closing of railway car, tobacco, textile and many other manufacturing plants were supplemented by large losses in shipping and stevedoring and building construction. The pay-rolls of the firms reporting in that city were over 7 per cent less than at the beginning of December. In Toronto there was a large increase in retail trade, but textile, confectionery, iron, steel and many other factories reported substantial curtailment; the street railways afforded less employment and there were considerable declines in building construction. There was a reduction in employment in this city of between 4 and 5 per cent. Sawmills and building construction again suf-

ferred the heaviest losses in Ottawa, where there was a decrease of more than 3 per cent in the employment afforded by the reporting firms. Very large losses in railway car wire and other iron and steel works, in textile and other manufacturing establishments in Hamilton caused the index number to decline by about 10 per cent. In Winnipeg there were general but rather small reductions in a number of groups, the result being a contraction of 3 per cent. Continued curtailment of operations in sawmills was reported in Vancouver; there were also declines in shipping and stevedoring and some other industries, employment falling off by 7 per cent. Without exception, the trend of employment in manufacturing was downward.

Over 39,000 workers were released by the manufacturers reporting; this represented a decline of 9 per cent. The most pronounced decreases were those in iron and steel, which affected over 9,600 persons. This reduction was generally distributed among the different groups in this division, but the losses in railway car shops were the most extensive. Lumber, hosiery, knitting, fabric, garment, leather, meat packing, furniture, biscuit, canning, chocolate, sugar, pulp, paper, rubber, tobacco, clay, glass, stone and non-ferrous metal product works also registered substantial curtailment. Many of these plants will, however, have resumed operations shortly after the first of the month. The declines in manufacturing as a whole at the beginning of the present month were less than during the same period of last year. In logging there was an increase in personnel of over 3,700 workers or nearly 12 per cent, which was very much larger than the expansion recorded on January 1, 1923. While the volume of employment afforded in retail trade was not as great on January 1 as it was just before Christmas, nevertheless it was about 5 per cent higher than at the beginning of December. This increase largely exceeded that recorded at the same period of last year. In mining, communication, transportation and construction there were considerable declines.

An article elsewhere in this issue gives in some detail the employment situation as at the beginning of January, 1924.

#### TRADE UNION REPORTS

Reports received from 1,532 labour organizations with a membership of 162,313 persons showed that 7.2 per cent of the members were unemployed at the end of December as compared with 6.2 per cent at the close of November and with 6.4 per cent on December 31, 1922. (Unemployment as used here has reference to involuntary idleness due to economic causes. Persons engaged in work other than their own trades, or who are idle because of illness, or as a direct result of strikes or lockouts are not considered as unemployed. As the number of unions making returns varies from month to month with consequent variation in membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.) The situation in Nova Scotia, Ontario, Manitoba, Saskatchewan and British Columbia was not so favourable as in November, due, for the most part, to winter seasonal dullness in the building trades, though coal miners in Nova Scotia, garment workers in Ontario, and fishermen, steam railway employees and workers in the shipping division in British Columbia also reported lessened activity. Improvement in the textile trades in Quebec caused employment in that province to be on a higher level than in November and gains on a smaller scale were shown in New Brunswick and Alberta. When making a comparison with the preceding December all provinces except New Brunswick, Manitoba and British Columbia registered less employment. The improvement in British Columbia was quite pronounced. The situation in the manufacturing industries, as a whole, was better, at the close of December, 1923, than in the preceding month. Reports tabulated from 429 unions with a membership of 49,241 persons showed that 7.8 per cent of the members were out of work as compared with 10.4 per cent

at the end of November. Within the manufacturing group, however, fluctuations occurred. Garment workers were considerably better employed and improvement in lesser degree was shown by brewery, textile, carpet and jewellery workers and printing tradesmen. Cigar-makers, iron and steel workers, metal polishers and glass workers were not quite so fully engaged. In the iron and steel division boilermakers, machinists, sheet metal workers, moulders and patternmakers were not so active, while blacksmiths and railway carmen were slightly better employed. More employment was reported in the manufacturing division than in December, 1922. Coal miners in Nova Scotia and British Columbia were not so active as in November, but in Alberta some improvement was shown. In the building and construction group as reported by 176 unions with a membership of 18,335 persons, 21.7 per cent were reported unemployed, as compared with 13.0 per cent in November. All tradesmen in the group reported less activity, the largest percentage reductions being shown by bridge and structural iron workers, painters, decorators and paper-hangers, tile layers, lathers and roofers, steam shovel and dredgemen, hod carriers and building labourers, bricklayers, masons and plasterers and granite and stone cutters. In comparison with the previous December steam shovel and dredgemen, carpenters and joiners, tile layers, lathers and roofers and hod carriers and building labourers reported more employment, but all other tradesmen in the group registered less employment. In the transportation group slightly less employment was reported at the end of December than in November, 4.0 per cent of the members being out of work as compared with 3.3 per cent in the preceding month. Steam and electric railway employees and workers in the shipping division all shared in the slight decline. More unemployment was registered by transportation workers than in December, 1922. Fishermen were not so busy as in November, lumber workers reported no idle members, and retail

clerks were not quite so fully engaged. Hotel and restaurant employees, theatre and stage employees, and barbers reported more activity, but stationary engineers and firemen were not so busy.

**EMPLOYMENT OFFICE REPORTS.** During the month of December 1923 the offices of the Employment Service of Canada made 23,287 references to positions and effected a total of 22,151 placements. The number of placements made in regular employment during the month was 14,677, of which 12,337 were of men and 2,340 were of women workers. In casual work the offices made 7,474 placements. Employers notified the Service of 23,833 vacancies, of which 17,034 were of men and 6,799 of women. The number of registrations for work was 28,063 of men and 7,496 of women, a total of 35,559 applications. Compared with the preceding month a considerable decline is shown in the volume of business, but a comparison with the corresponding period a year ago shows that approximately the same level was maintained throughout the month. A report in detail of the work of the offices for the month of December may be found elsewhere in this issue and on another page will be found a statement of the activities of the offices for the last quarter of the year.

**BUILDING PERMITS AND CONTRACTS AWARDED.** According to the Dominion Bureau of Statistics, the value of building permits issued in 56 cities during December, 1923, showed a decline to \$6,906,650 from \$8,006,601 in the previous month, and \$9,436,867 in December 1922.

According to the *MacLean Building Review*, issued by MacLean Building Reports, Limited, the value of the contracts awarded in Canada during January amounted to \$6,538,600 compared with \$21,507,500 in December last and \$9,840,800 in January, 1923. Residential buildings accounted for 38 per cent of the January total, amounting to \$2,487,800; business buildings amounted to \$2,123,900 or 32.5 per cent; industrial build-

ings to \$217,300 or 3.3 per cent; and public works and utilities, \$1,709,600 or 26.2 per cent. The activity was distributed amongst the groups as follows: Ontario, 60.3 per cent; Quebec, 28 per cent; Western provinces, 7.5 per cent, and Maritime provinces, 4.2 per cent, the amounts to be spent being \$3,944,300 in Ontario, \$1,832,300 in Quebec, \$488,600 in Western provinces, and \$273,400 in the Maritimes.

The Dominion Bureau of Statistics reports that the production of pig iron in Canada during December, 1923, was 59,662 gross tons as compared with the November output of 62,202 tons. There was a decline in basic pig iron of 1,750 tons and in malleable iron of 5,163 tons, while the production of foundry iron increased 4,333 tons to a total of 19,749. The cumulative production for the twelve months ending December was 880,018 tons as compared with 383,057 tons in 1922, an increase of 496,961 tons or 130 per cent. The minimum monthly output was 40,739 tons reported in January, rising steadily to a peak of 101,533 tons in May. The average per capita production of pig iron in Canada in 1923 was 215.5 pounds as compared with 95.6 pounds in 1922 and 151.4 pounds in 1921. There were six furnaces in blast at the end of December, three at Sydney, Nova Scotia, two at Hamilton, Ontario, and one at Sault Ste. Marie, Ontario.

The production of steel ingots and castings amounted to 41,248 tons, which was 25 per cent below the 54,674 tons produced in November. The decline was principally in the quantity of open-hearth steel ingots produced for the use of the reporting firms, this grade dropping 24 per cent from 51,426 in November to 39,018 in December. The cumulative production for the twelve months was 884,770 tons or 82 per cent over the output of 485,643 for 1922, and 33 per cent over the 667,484 tons in 1921. The average per capita production of steel in Canada in 1923 was 217 pounds as compared with 121 pounds in 1922 and 170 pounds in 1921.

A report from the Department's correspondent at Cobalt states that ten cars of silver ore were shipped during December from the Cobalt camp, containing approximately 730,616 pounds of ore, as compared with 18 cars of silver ore containing 1,239,002 pounds in the previous month. The Nipissing Mine shipped 220 bars containing 253,807.73 ounces of silver, and The Mining Corporation of Canada shipped 123 bars containing 123,630.25 ounces of silver, making a total of 343 bars containing 377,437.98 ounces of silver for the month of December, as compared with 564 bars containing 626,663.59 ounces for the previous month.

A report from the British Columbia Forestry Branch shows that 201,517,053 feet, board measure, of timber was scaled in the province during December. The total includes Douglas fir, 89,957,367, red cedar, 41,631,394; spruce, 20,787,010; hemlock, 26,390,606; balsam, 5,990,690 feet; yellow pine, 5,525,314 feet; white pine, 2,239,161 feet; jack pine, 1,396,773 feet, larch, 7,226,242 feet, cotton wood, 345,342 feet; other species, 27,154 feet.

The gross earnings of the Canadian Pacific Railway for December were given in a preliminary statement as \$19,136,674 in comparison with \$17,365,639 in the same month of the previous year; and for the calendar year 1923 as \$195,837,090, while for the same period for 1922 they amounted to \$186,675,036.

A summary of Canadian Foreign Trade prepared by the Department of Customs and Excise shows that

in December, 1923, the merchandise entered for consumption amounted to \$65,456,071 as compared with \$70,204,888 in December, 1922. There was an increase of slightly over \$13,000,000 in the value of domestic merchandise exported which amounted to \$123,880,430 in December, 1923, compared with \$110,870,825 in the corresponding month of the previous year. For the nine months ending December the grand total of Canadian trade was \$1,504,462,832, in 1923 as compared with \$1,320,485,675 in 1922. The chief imports in December, 1923, were fibres, textiles and textile

products amounting to \$13,041,467, non-metallic minerals and products amounting to \$11,693,912, and iron and its products amounting to \$10,939,179. The chief exports during the same month, were in the group of agricultural and vegetable products, mainly foods, which amounted to \$68,796,945, the next being wood, wood products and paper, amounting to \$19,914,748, followed by animal and animal products to the value of \$12,157,264. During the nine months of the fiscal year ending with December, exports of agricultural and vegetable products, mainly foods, were valued at \$322,543,841, exports of wood, wood products and paper amounted to \$208,023,812, and exports of animal and animal products to \$111,517,559.

### Strikes

Time loss due to industrial disputes reported to the department during January was greater than during either December, 1923, or January, 1923. There were in existence at some time or other during the month 14 disputes, involving 12,793 employees and a time loss of 186,078 working days, as compared with 13 strikes in December, involving 2,446 employees and a time loss of 28,693 working days. In January, 1923, there were recorded 18 disputes involving 2,852 employees and a time loss of 53,966 working days. Three new strikes commenced during January with a time loss of 170,150 working days. One of the strikes commencing prior to January and one strike commencing during January terminated during the month. At the end of the month, therefore, there were 12 strikes involving 11,203 work-people.

### Prices

The level of retail food prices in January was little changed from December, there being only a slight seasonal rise. The cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average retail prices in some sixty cities was \$10.78 at the beginning of January as compared with \$10.73 for December, 1923; \$10.52 for January, 1923; \$11.03

for January, 1922; \$14.48 for January, 1921; \$16.92 for June, 1920 (the peak); \$15.30 for January, 1920; \$12.42 for January, 1918; and \$7.73 for January, 1914. Prices of eggs, milk, and butter continued upward and there were also increases in beef, veal, salt pork, and potatoes while small declines occurred in the prices of pork roast, cheese, and flour. Including the cost of fuel and rent with that of foods the total budget averaged \$21.23 for January as compared with \$21.21 for December, 1923; \$21.13 for January, 1923; \$21.52 for January, 1922; \$25.30 for January, 1921; \$26.92 for July, 1920 (the peak); \$24.15 for January, 1920; \$19.80 for January, 1918; and \$14.49 for January, 1914. Fuel averaged slightly lower while rents were unchanged.

The movement of wholesale prices as indicated by the index number of the Dominion Bureau of Statistics was substantially upward, the figure for January being 156.7 (the highest point reached since September, 1921) as compared with 153.5 for December, 1923; 151.4 for January, 1923; 149.8 for January, 1922; 201.7 for January, 1921; and 256.9 for May, 1920 (the peak). In the grouping according to the chief component material the Vegetable Products group, the Textile group, the Non-Metallic Minerals group, and the Chemicals group were each substantially higher, while the other four main groups were lower, the Animals group showing a substantial decline.

The index number based upon prices of 271 commodities in 1890-1899 as 100, published by the Department of Labour since 1910, stood at 222.7 for January as compared with 222.6 for December, 1923; 223.0 for January, 1923; 227.7 for January, 1922; 281.3 for January, 1921; 356.6 for May, 1920 (the peak); 336.4 for January, 1920; 258.7 for January, 1918; and 136.5 for January, 1914. The chief declines occurred in eggs, hogs, bacon, corn, fruits, sugar, furniture, glassware, crockery, bar silver, and raw rubber, while advances occurred in grains, fodder, cattle, beef, sheep, butter, potatoes, canned

vegetables, wool, cotton, metals, linseed oil, and turpentine.

The special index of fifty commodities selected from the 271 in the departmental list advanced slightly to 154.4 for January as compared with 153.7 for December, 1923; 153.1 for January,

1923; 148.0 for January, 1922; 195.2 for January, 1921; and 260.5 for May, 1920 (the peak).

The Canadian Bank of Commerce index advanced to 157.55 for January from 155.87 in December, 1923. Both imports and exports were higher.

### PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907, DURING THE MONTH OF JANUARY, 1924

**D**URING the month of January, 1924, the Department received three applications for the establishment of Boards of Conciliation and Investigation. All three applications were from certain employees of the Canadian Pacific Railway Company at the port of St. John, New Brunswick, being respectively:

(1) Truckers, coopers, etc., employed on the West St. John wharf, members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.

(2) Foremen, checkers, etc., employed on the West St. John wharf, members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.

(3) Grain elevator employees at St. John, N.B., being members of Local 121, International Longshoremen's Association.

As a result of the mediation of the Department of Labour negotiations between the disputants were resumed in all these cases and settlements were reached without Board procedure. In each case the application for a Board was withdrawn.

### STRIKES AND LOCK-OUTS IN CANADA DURING JANUARY, 1924

**T**HE number of strikes and lock-outs in Canada in existence at some time or other during the month of January, was fourteen, one more than in December. The time loss for January was greater than in January, 1923, due chiefly to a dispute involving coal mines in Nova Scotia, being 186,078 working days as compared with 53,966 working days lost in the same month of the previous year.

Eleven disputes involving 668 work-people were carried over from December. One of the strikes commencing prior to January and one strike commencing during January terminated during the month. At the end of January, therefore, there were on record twelve disputes, lumber workers, Cranbrook and Golden districts, B.C.; coal miners, Nova Scotia; clothing workers, Winnipeg; printing compositors, Hamilton; three strikes of printing compositors at Montreal; printing compositors, Ottawa; printing compositors, Toronto; printing compositors, Winnipeg; printing compositors and pressmen, Halifax, and motormen and conductors, Niagara Falls.

Date	Number of disputes	Number of employees involved	Time loss in working days
January, 1924.....	14	12,793	186,078
December, 1923.....	13	2,446	28,693
January, 1923.....	18	2,852	53,966

Of the two strikes which terminated during the month one resulted in favour of the employers, while the second one resulted in favour of the employees. Two of the disputes commencing during January were for increased wages and other changes, while the third one was against a reduction in wages.

The record of the Department includes lock-outs as well as strikes, but a lock-out, or an industrial condition which is undoubtedly a lock-out, is rarely encountered. In the statistical tables, therefore, strikes and lockouts are recorded together. A strike or lock-out, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting more than one working day. Disputes of only one day's duration or less, and disputes involving less than six employees are not included in the published record, but a separate record of such disputes is maintained in the Department and the figures are given in the annual review.

The following notes give information in regard to certain disputes additional to that shown in the tabular statement.

**LUMBER WORKERS, CRANBROOK AND GOLDEN DISTRICTS, B.C.**—A strike of 1,000 lumber workers in various lumber camps throughout the neighbourhood of Cranbrook and Golden occurred on January 2, for an increase in wages including an advance in the minimum rate from \$3.25 to \$4 per day, an 8-hour day, and for no discrimination against members of the Lumber Workers' Industrial Union No. 120, Industrial Workers of the World. Towards the end of the month Mr. J. D. McNiven, Deputy Minister of Labour for the Province of British Columbia, visited the scene of the strike in order to effect a settlement, but at the end of January the strike was still in existence.

**COAL MINERS, EDSON, ALTA.**—In the strike of coal miners at Edson, Alta., which commenced on November 23, 1923, work was resumed on January 14, when the strikers were replaced by new workers.

**COAL MINERS, NOVA SCOTIA.**—In a dispute as to the renewal of an agreement which expired on January 15, a cessation of work occurred on January 16, involving 9,625 coal miners in the employ of the British Empire Steel Corporation's subsidiary companies operating coal mines. The localities affected by the dispute included Glace Bay, Sydney Mines, Thorburn, Stellarton and Springhill. During negotiations prior to January 15, the employees contended for the restoration of the 1921 wage scale, which would mean an increase of about twenty per cent, and on January 15, the employers posted a notice of a reduction in wages of twenty per cent.

The representatives of the miners proposed that a Board of Conciliation and Investigation appointed under the Industrial Disputes Investigation Act, 1907, be applied for, and that the 1923 rates of wages should be continued pending its report, but this was refused by the employer. The Premier of Nova Scotia proposed that negotiations should be resumed, work in the mines to be resumed for fifteen days, but this was not agreed to by the miners. At the end of January the dispute was still unsettled but early in February arrangements were made to resume the negotiations and a settlement was reached on February 11. Rates for men on day wages on the surface were increased by 25 cents per day (labourers increasing from \$3.25 to \$3.50), for those underground by 30 cents (labourers increasing from \$3.30 to \$3.60), tonnage rates were advanced by six cents to eight cents per ton, and local contract rates by six per cent, the new agreement to be for one year. This settlement was subject to a referendum of the miners.

**PRINTING TRADES IN EIGHT CITIES.**—The strike of printing trades in job offices in various cities which began in the spring and early summer of 1921, for the 44-hour week, was still in progress in eight cities and involved 548 employees, resulting in a time loss of 14,248 working days during January.

CLOTHING WORKERS, MONTREAL, QUE. —Clothing workers at Montreal to the number of 1,500 went on strike on January 21 for increased wages. Negotiations were carried on and work was resumed January 31 at higher rates.

## STRIKES AND LOCKOUTS DURING JANUARY, 1924

Industry, occupation and locality	Number of employees involved	Time loss in working days	Remarks
<b>(a) Strikes and lockouts commencing prior to January, 1924.</b>			
<b>MINING, NON-FERROUS SMELTING AND QUARRYING.—</b>			
Coal miners, Edson, Alta.....	90	900	Commenced November 23, for recognition of the union and district union rates. Work was resumed January 14, strikers being replaced.
<b>MANUFACTURING.—</b>			
<i>Clothing—</i>			
Clothing workers, Winnipeg, Man.....	23	598	Commenced September 6, against a reduction in wages. Underminated.
<i>Printing and Publishing:—</i>			
Printing compositors, Hamilton, Ont.	10	260	Commenced May 2, 1921. Alleged violation by employers of 44-hour clause in agreement. Underminated.
Printing compositors, Montreal Que.	8	208	Commenced June 14, 1921. Objection of men to perform work that came from shop where strike existed. Underminated.
Printing compositors, Montreal, Que.	117	3,042	Commenced July 1, 1921. For increased wages and 44-hour week. Underminated.
Printing compositors, Montreal, Que.	12	312	Commenced September 15, 1922. Employer refused to negotiate a new agreement with the union. Underminated.
Printing compositors, Ottawa, Ont.	25	650	Commenced June 1, 1921. For increased wages and 44-hour week. Underminated.
Printing compositors, Toronto, Ont.	313	8,138	Commenced June 1, 1921. For increased wages and 44-hour week. Underminated.
Printing compositors, Winnipeg, Man.	43	1,118	Commenced July 1, 1921. Alleged lockout following refusal of employers to renew agreement. Underminated.
Printing compositors and pressmen, Halifax, N.S.	20	520	Commenced May 2, 1921. For shorter hours with same weekly pay. Underminated.
<b>TRANSPORTATION.—</b>			
<i>Street and electric railway:—</i>			
Motormen and conductors, Niagara Falls, Ont.	7	182	Commenced July 2, 1922. For recognition of union. Underminated.
<b>(b) Strikes and lockouts commencing during January, 1924.</b>			
<b>LOGGING.—</b>			
Lumber workers, Cranbrook and Golden District, B.C.	1,000	20,400	Commenced January 2, for increased wages and other changes. Underminated.
<b>MINING, NON-FERROUS SMELTING AND QUARRYING:—</b>			
Coal miners, Nova Scotia....	9,625	134,750	Commenced January 16, against a reduction in wages. Underminated.
<b>MANUFACTURING.—</b>			
<i>Clothing:—</i>			
Clothing workers, Montreal, Que.	1,500	15,000	Commenced January 21, for higher wages. Settled by negotiations and work resumed January 31.

## STRIKES AND LOCK-OUTS IN CANADA DURING 1923

THE feature of the record of strikes and lock-outs for the year 1923 was the reduction in the time loss to 768,494 working days, the lowest since 1918. The number of strikes and lock-outs in existence was slightly greater than in 1922, having increased from 85 to 91 disputes of which 77 began during 1923, as compared with 70 during 1922. The number of employees involved was also somewhat lower, being 32,868 as compared with 41,050. Of the two million days' time loss in 1922, approximately one-half was due to a single strike of some 7,000 coal miners in Alberta and south eastern British Columbia from April to August, and a strike of some 14,000 coal miners in Nova Scotia, in August, for three weeks caused a time loss of over 250,000 working days. In 1923 no strike caused a time loss of such outstanding magnitude, but a strike of steel workers at Sydney in June for higher wages and other changes in working conditions and three strikes of coal miners in sympathy with it caused a time loss of approximately 250,000 working days, nearly one-third of the total for the year. Ten disputes in the printing trades, in various cities, for the 44-hour week, which began in 1921, caused a time loss of 252,184 working days. Two of these terminated during 1923. The only other dispute of considerable magnitude in time loss was that of longshoremen in Vancouver for higher wages, involving 1,555 employees for 53 days, with a time loss of 82,415 days.

The record of the Department includes lock-outs as well as strikes, but a lock-out, or an industrial condition which is undoubtedly a lock-out, is rarely encountered. In the statistical tables, therefore, strikes and lock-outs are recorded together, the term dispute being used with reference to either.

A strike or lock-out, included as such in the records of the Department, is a

cessation of work involving six or more employees and lasting more than one working day. Disputes of only one day's duration or less, and disputes involving less than six employees have not been included in the published record, but a separate record of such disputes has been maintained in the Department during 1923. Any such disputes involving a time loss of ten working days or more have been included in the published record, there being twelve of these involving 1,447 employees and resulting in a time loss of 1,405 working days. In addition there was one such dispute involving only thirty employees for one hour with a time loss, therefore, of less than ten days, and it was a strike of coal miners in sympathy with other coal miners who resumed work that day.

The accompanying chart of the time loss in working days by groups of industries for each year back to 1901, shows that in mining considerable time loss occurred in 1903, 1909, 1910, 1911 and 1913, and again in 1917, 1919, 1922 and 1923. In metal trades no great time loss appeared except in 1919, when the strikes in the metal trades in various cities and the general strike in Winnipeg in sympathy with the metal trades' strike there, caused a time loss of about two million days. In 1918, 1920 and 1923, however, the time losses (in these trades) were larger than in other years. In building and construction considerable time loss appeared in 1903, 1907, 1911 and 1919. In transportation there was considerable time loss only in 1901, due to a strike of trackmen, in 1908, due to a strike of railway shop machinists and in 1918 and 1919 due to numbers of strikes in street railway operation, as well as among freight handlers, in local transportation, cartage, etc.

From the chart showing results of the settlement arrived at it appears that the majority of employees were successful in 1905, 1906, 1915, 1917 and 1918, periods of steadily rising prices and ex-

### TIME LOSS IN WORKING DAYS THROUGH STRIKES AND LOCKOUTS BY GROUPS OF INDUSTRIES EACH YEAR, 1901-1923

RESULTS OF STRIKES AND LOCKOUTS ACCORDING TO NUMBERS OF MEN INVOLVED.

panding business, but were unsuccessful in 1908, 1919 and 1920, years of uncertainty in industry.

An analysis by the number of employees involved, Table II, shows over 10,000 employees in only one dispute, 1.1 per cent of all disputes but this strike (the sympathetic strike of coal miners in Cape Breton Island) caused a time loss of 216,700 days, 28.2 per cent of the total for the year. Outside of this strike, disputes involving between 1,500 and 2,500 employees, between 500 and 1,000 employees, and between 100 and 250 employees caused much time loss.

An analysis by industries, Table VI, shows the greatest amount of time loss in mining, with printing a close second, and considerable amounts in water transportation and iron and steel in manufacturing. The same industries showed large numbers of employees involved.

Among causes of disputes, Table VII, it appears that the largest number were for increases in wages, 27 out of 91, involving 3,207 employees out of 32,868 and resulting in a time loss of 42,541 working days out of 768,494. Sympathetic strikes showed the largest number of employees involved and also the greatest time loss, the three coal miners' strikes in June being the chief factor. There were however, large numbers of strikes for recognition of union 10, and against discharge of employees, 12, but these did not involve large numbers of employees nor result in great time loss.

By methods of settlement, Table VIII, the largest number of disputes, 36, were settled by negotiations between the parties, but in 19 there was a return to work on employers' terms.

A comparison of figures by months for the past four years, Table X, shows the greatest time loss, as well as the largest number of employees involved, in the spring and summer months, each year.

An analysis of the figures by time loss, Table III, shows 44 per cent of the total for the year due to two strikes, with over 100,000 working days lost, the one

of Cape Breton coal miners and the other the printers' strike at Toronto, and 17.5 per cent of the time loss due to two strikes with between 50,000 and 100,000 working days, that of longshoremen at Vancouver causing a loss of 82,415 days and that of steel workers at Sydney causing 52,000 days' time loss.

In duration of disputes, Table IV, the greatest number lasted less than five days, but these caused comparatively little time loss. Considerable time loss occurred in disputes lasting from 20 to 30 days involving 12,921 employees, but a large proportion of it, 32.9 per cent, was due to 10 disputes carried over into 1923, of which eight were in the printing trades, carried over from 1921.

By provinces, Table V, the greatest time loss occurred in Nova Scotia with 319,434 days, 41.6 per cent of the total for the year, while Ontario experienced a time loss of 165,681 days, 21.6 per cent of the total, and British Columbia 108,554 days, 14.1 per cent of the total for the year.

TABLE I.—RECORD OF STRIKES AND LOCKOUTS BY YEARS

Year	Number of disputes		Disputes in existence in the year		
	In existence in the year	Beginning in the year	Em-ployers in-volved	Em- ployees in- volved	Time loss in working days
1901.....	104	104	273	28,086	632,311
1902.....	121	121	420	12,264	120,940

## STRIKES AND LOCKOUTS IN GREAT BRITAIN AND NORTHERN IRELAND DURING DECEMBER, 1923

THE British *Ministry of Labour Gazette* for January contains the following information respecting strikes and lockouts in Great Britain and Northern Ireland during December, 1923, based upon returns from employers and employees:—

**NUMBER, MAGNITUDE AND DURATION.**—The number of trade disputes involving a stoppage of work, reported to the Department as beginning in December in Great Britain and Northern Ireland, was 12, as compared with 38 in the previous month, and 21 in December, 1922. In these new disputes about 4,700 workpeople were directly involved, and 3,600 indirectly involved (i.e., thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes). In addition, about 2,000 workpeople were involved, either directly or indirectly, in 12 disputes which began before December and were still in progress at the beginning of that month. The number of new and old disputes was thus 24, involving about 10,300 workpeople, and resulting in a loss during December of about 83,000 working days. The number of disputes in progress was smaller than in any month since January, 1917. The number of workpeople involved in disputes and the number of working days lost were also lower than in any month during the same period except November and December, 1922, when slightly lower figures were recorded.

**CAUSES.**—Of the 12 disputes beginning in December, 9, directly involving

4,500 workpeople, arose out of questions respecting wages, and 3, directly involving 200 workpeople, from other causes.

**RESULTS.**—Settlements were effected during December in the case of 9 new disputes, directly involving 1,900 workpeople, and 5 old disputes, directly involving 1,100 workpeople. Of these new and old disputes, 6 were settled in favour of the workpeople, 4 in favour of the employees, and 4 were compromised. In the case of one dispute, directly involving 100 workpeople, work was resumed pending negotiations.

The following table analyses the disputes in progress in December, in Great Britain and Northern Ireland, by groups of industries, and indicates the number of workpeople involved (whether directly or indirectly) at the establishments concerned, and the approximate time lost during the month in all disputes in progress:—

Groups of industries	Number of disputes in progress in December			Number of workpeople involved in all disputes in progress in Dec.	Aggregate duration in working days of all disputes in progress in Dec.
	Started before Dec. 1	Started in Dec.	Total		
Mining and quarrying.....	2	2	4	5,400	62,000
Metal, engineering and shipbuilding.	2	3	5	4,000	13,000
Other trades.....	8	7	15	900	8,000
Total, Dec. 1923...	12	12	24	10,300	83,000
Total, Nov. 1923..	15	38	53	54,000*	1,016,000*
Total, Dec. 1922...	28	21	49	7,400	72,000

\*A dispute was in progress in November, 1923, involving about 40,000 shipyard employees.

The Minimum Wage Board of Ontario held a public hearing early in February in connection with a proposed order governing the wages of female employees in places of amusement in Toronto. The proposed minimum wage is \$12.50 per week for employees working more than 40 hours per week. Em-

ployees working less than 40 hours would be paid at least 30 cents per hour. No working period under two hours is taken into account. It is noted that no apprenticeship period is necessary in this trade. Similar public hearings are held in connection with all proposed orders of the Board before they are issued.

## LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

### Further Ratifications by Various Countries of Draft Conventions of International Labour Conference

A CONSIDERABLE increase during the past year is noted in the number of ratifications by various countries of the several Draft Conventions adopted by the International Labour Conference (League of Nations) at its annual meetings.

The number of ratifications which at the end of November, 1922, had been formally communicated to the League of Nations, was recorded in the *LABOUR GAZETTE* for January, 1923 (page 64) as being 62. A year later in November, 1923, the number of ratifications actually registered by the Secretary-General had increased to 86, while, in addition, there were 23 cases in which ratification had been authorized by the competent authority of the state concerned, but had not yet been formally communicated. Moreover, ratifications to the number of 131 had been recommended to the competent authority by the respective governments, but in these cases the approval of such authority had not so far been signified. In addition to these ratifications, actual or pending, of the several Draft Conventions, twelve countries have notified their adherence to the Berne Convention of 1906 to prohibit the use of white phosphorus in the manufacture of matches, which Convention was adopted by the Washington Conference as the last of its own Draft Conventions. A number of states and dominions had already, prior to 1919, signified their adherence to the Berne Convention, Canada being among the countries which not only adhered to the Convention, but also enacted legislation to give it practical effect.

Since November, 1923, new ratifications of the several Conventions of the first four sessions of the conference have been received, the new states signifying adherence to additional Draft Conventions including China,

Esthonia, Hungary, Japan and Sweden. Belgium authorized the ratification of the Conventions regarding the minimum age for the employment of children, and the prohibition of night work for young persons. China has passed a law in conformity with the Convention regarding the employment of women before and after childbirth. The government of Esthonia has recommended the ratification of the Convention against the use of white phosphorus in the manufacture of matches, and this State has also ratified the Draft Convention relating to weekly rest days in industry. The government of Argentine has recommended the ratification of the Draft Conventions adopted at the second session fixing the minimum age for the employment of youths at sea, regarding the employment of seamen, and regarding the unemployment indemnity, and has approved the recommendations relating to hours of work in the fishing industry, inland navigation and the seamen's code, and has in preparation a bill in conformity with the recommendation relating to unemployment insurance. Finland has passed a law relating to reciprocity of treatment of foreign workers. The government of Hungary has recommended the ratification of the Draft Conventions relating to the minimum age of employment in industry, night work of young persons, use of white phosphorus, unemployment indemnity, and employment for seamen; the age of admission, rights of association and workmen's compensation in agriculture; the use of white lead in painting, the weekly rest day in industry, the minimum age for trimmers and stokers, and the medical examination of young persons at sea; and has also recommended the approval of the Recommendations relating to unemployment, the reciprocity of treatment of foreign workers, lead poisoning, government health services, hours of work in the

fishing industry, inland navigation, the national seamen's code, unemployment insurance, technical agricultural education, social insurance in agriculture, and the weekly rest day in commercial establishments; the government of Hungary has also introduced a bill in conformity with the recommendation made at the fourth session relating to emigration statistics. Japan has ratified the Draft Convention relating to the age for admission of children to employment in agriculture. Poland has ratified the Draft Conventions concerning unemployment, fixing the minimum age for admission of children to industrial employment, concerning the night work of young persons employed in industry, fixing the minimum age for admission of children to employment at sea, concerning unemployment indemnity in case of loss or foundering of the ship, for establishing facilities for finding employment for seamen, and the

seven conventions adopted at the third session of the conference relating to the minimum age for the admission of young persons to employment as trimmers or stokers; the compulsory medical examination of children and young persons employed at sea; the use of white lead in painting; the rights of association and combination of agricultural workers; workmen's compensation in agriculture; the age of admission of children to employment in agriculture; and the weekly rest in industrial undertakings. The government of Sweden has prepared a bill on the lines of the Draft Convention relating to the employment of women before and after childbirth, and the same State has ratified the Draft Conventions relating to the age of children employed in agriculture, the right of association of agricultural workers, workmen's compensation in agriculture, and the use of white lead.

## LABOUR LEGISLATION IN CANADA IN 1923

### Dominion and Provincial Laws Collected and Published by the Department of Labour of Canada

THE Department of Labour has lately completed its annual compilation of laws affecting labour which were enacted during the past year by the Dominion Parliament and by the legislatures of the several provinces of Canada. This publication constitutes the third annual supplement to the volume entitled "Labour Legislation in Canada as existing on December 31, 1920," which presented in easily accessible form the text of the labour laws enacted up to that date. Similar volumes are published by the department at intervals of five years, the labour legislation of each intervening year being presented in an annual supplement, to be incorporated later in the next quinquennial volume. A useful feature included in each annual supplement is the Cumulative Index to Labour Legislation, which gives references to the various subject matters of legislation contained

in the last preceding volume of consolidated laws and in the various supplements thereto. This index is a fairly complete guide to labour legislation in its manifold application to industrial workers and to the problems of industry. It provides a ready means of comparing the laws of the various provinces falling within the same category. With the help of the index, for example, it is easy to trace the differences and the common characteristics of the various workmen's compensation, factory, minimum wage and other groups of provincial laws. This series is therefore a contribution to the movement which has been manifest during recent years towards greater uniformity in the field of provincial legislation.

The text of the labour laws, as well as the Cumulative Index to the subjects with which they deal, bring out clearly the fact that the bulk of labour legisla-

tion in Canada deals with subjects which under our constitution fall within the sphere of provincial rather than Dominion jurisdiction. On the other hand the powers of the Dominion Parliament extend to many matters which affect labour directly or indirectly, such subjects including immigration, industrial disputes in interprovincial and other major industries, railways and navigation, criminal law, and other matters, which, however, affect the general public as well as the classes specially associated with labour:

Of the legislation which was enacted during 1923 the Hours of Work Act of British Columbia was one of the most outstanding measures from the fact that it was the first Act passed in Canada to give unqualified effect to the "8-hour day" Draft Convention of the International Labour Conference held at Washington, D.C., in 1919. The new Act provides that the Government shall appoint a Board of Adjustment to administer it, with authority to grant exemptions after full inquiry and within certain well-defined limits. The Dominion Immigration Act was amended in several of the sections which were incorporated in the Act in 1919, and the Chinese Immigration Act was also revised with a view to the more effective restriction of the immigration of Orientals into Canada. No legislative session was completed during the year in the province of Quebec, but the Royal Commission to investigate labour matters with special reference to workmen's compensation which was provided for by an Act passed at the close of 1922, began its labours towards the close of 1923 and is expected to present a report to the Legislature at its present session.

Important amendments were made to the Coal Mines Regulation of Nova

Scotia, the employment underground of boys under 16 being absolutely forbidden, and new rules being made with a view to the better protection of miners. New safety provisions were added also to the British Columbia Mines Act, and in the same province the age for the employment of boys in factories was raised from 14 to 15 years. In the "wages" group an important act was the thorough revision and consolidation which was affected in the Mechanics' and Wage Earners' Lien Act of Ontario. No important changes were made during the year in any of the Workmen's Compensation or Minimum Wage Acts. Some important regulations, however, were issued in the latter group by the competent authority, among these being an order of the Alberta Minimum Wage Board limiting to 48 in the week the hours of work in all employments covered by orders of the Board. In Manitoba the Winnipeg charter was amended to give the city council power to prohibit the employment of women in Chinese restaurants, the provincial law of 1913 prohibiting such employment not yet having been proclaimed in force. On the other hand, the British Columbia Legislature rejected a bill aimed at the employment of women by Orientals, passing instead an Act giving police officials authority to prohibit the employment of female labour in a place of business kept by a person of questionable character of whatever race. Several Acts were passed during the year for the furtherance of technical education and manual training, and to improve the standing of teachers. In Nova Scotia a public service retirement Act was passed, which however has not yet been proclaimed as in force, similar in its general lines to the Superannuation Acts of Quebec, Ontario and Alberta.

---

A provincial economic conference will be held at Winnipeg on March 12 and 13 by various industrial organizations in Manitoba, including the farm-

ing interests. The Winnipeg Trades and Labour Council will be represented by three delegates, including the president and secretary.

## LEGISLATIVE PROGRAMME OF ORGANIZED LABOUR

### Requests for Dominion Legislation

ON January 14, the Executive Council of the Trades and Labour Congress of Canada submitted to the members of the Dominion Government the legislative programme of the Trades and Labour Congress and a number of resolutions on other subjects which were passed at the last annual convention of the Congress.

Legislation on the following subjects was requested:

(1) Limitation of the hours of labour to not more than eight per day. (2) Provision of insurance for unemployed persons. (3) Provision for one day's rest in seven. (4) Amendments to the Criminal Code:—(a) to re-establish the right of peaceful picketing and prevent misuse of injunctions in labour disputes; (b) to restore the right of freedom of speech, press and assembly; (c) to define sympathetic strikes; (d) to eliminate reference to sedition, seditious conspiracy, etc. (5) Amendments to Immigration Act; (a) to repeal provisions which discriminate against British born citizens; (b) to prohibit entry of contract labour unless secured through Employment Service of Canada; (c) to guarantee the right of trial by jury before deportation for political offences; (d) to repeal amendments of session of 1919 which bring within the prohibited classes those exercising the reasonable right of assembly and freedom of speech. (6) Amendments to the Industrial Disputes Investigation Act: (a) to provide for clearer definition as to whom the Act applies; (b) equal application of the act to employers and workers alike; (c) substitution of "a declaration of failure to reach agreement by direct negotiation" for present oath "to the belief of the declarant a strike or lock-out will be declared". (7) Protection of the Health of Workers: (a) by controlling the use of white lead in painting; (b) by prevention of anthrax. (8) Old age pensions. (9) The enactment of a law in place of the present regula-

tions to provide for the payment of fair wages on public works. (10) The registration of union labels. (11) Amendments to the Shipping Act: (a) To fix minimum age of admission of employment of children; (b) to improve working conditions of marine engineers. (12) Abolition of Sales Tax. (13) The establishment of Health Insurance. (14) The enactment of a law to give effect to the recommendations of the Special Advisory Committee on Prison Reform, 1921. (15) Amendments to the Militia Act to provide against the misuse of military forces during industrial disputes. (16) Amendments to the Bank Act to assure depositors against loss. (17) The enactment of a law to guarantee the right of all workers to organize. (18) Amendments to the Election Act: (a) to provide for proportional representation in group constituencies and transferable vote in single constituencies; (b) to make election day a public holiday throughout the Dominion; (c) to abolish forfeiture of election deposits; (d) to repeal Clause 10, Franchise Act, 1920, which prohibits trade unions and similar organizations contributing to election campaign funds.

The attention of the Government was also called to the action of the Congress on the following subjects: immigration, unemployment, fair wage policies, the International Labour Organization, the Tariff Commission, the Senate, the Civil Service and the Canadian National Railways. The proceedings of the Trades and Labour Congress with reference to these matters were set forth in the issue of the LABOUR GAZETTE for October, 1923.

### Requests for Legislation in Quebec

On January 22, a delegation of the Trades and Labour Congress of Canada waited on the provincial government of Quebec and submitted certain requests for legislation. It was requested that legislation be enacted with reference to the following subjects: (1) The enactment of legislation carrying out recom-

mendations of the International Labour Organization (League of Nations). (2) Amendments to the law with reference to Sunday labour and provision of one day's rest in seven for employees of hotels, clubs and restaurants. (3) Amendments to the education laws providing for (a) free instruction at public schools; (b) the sale of school books at cost price; (c) uniformity of all school books in the province; (d) free instruction in all schools subsidized by the government (technical and others); (e) making it compulsory for every person less than twenty-one years of age employed in factories and workshops, who cannot read or write one of the two official languages to attend a night school; (f) fixing a minimum salary for teachers and permitting school boards to be prosecuted that pay less than the minimum salary; (g) the appointment of a Minister of Education whose function would be to supervise the boards of education and also put into operation the programme of teaching adopted by the bureaus of education (Catholic and Protestant). (4) Adoption of a law with reference to the fair wage clause in public contracts. (5) The abolition of private employment offices. (6) The prevention of over-capitalization of companies and the sale of fraudulent stock. (7) The appointment of a minimum wage commission for women. (8) The appointment of a commission to study the high rents and

another to control the price of food and other necessaries of life. (9) The enactment of a daylight saving law. (10) The adoption of health regulations with reference to (a) removal of old wall paper before placing new paper on walls; (b) prohibition of the use of spraying machines for painting or at least provisions for controlling their use according to the necessary hygienic rules to protect the health of workers. (e) The sanitary inspection of barber shops. (11) the control of cold storage plants.

#### Requests for Legislation in Ontario

A deputation representing jointly the Trades and Labour Congress and the Ontario Labour Educational Association interviewed the Ontario Government before the session now in progress. Legislation was asked for which would affect the employment of women and children; also amendments to the Workmen's Compensation Act; insertion of a fair wage clause in all government contracts; prohibition of "one-man" cars and provision that a motorman and conductor should be placed on all street cars; amendments to the Election Act to provide for proportional representation, the making of election day a public holiday, one vote only for one elector, and the abolition of the property qualification for voting on money by-laws. It was also proposed that widows with one child be given benefits under the Mothers' Allowance Act.

## EMPLOYEES' SUPERANNUATION IN CANADA

### Existing Public and Private Schemes for Retirement Insurance

PROVISION for employees on their retirement is made in Canada by the Dominion Government, by most of the provincial governments, by several of the larger municipalities under powers conferred upon them by their charters, and by a growing number of private employers. In the latter group superannuation and other forms of employees' welfare work have been undertaken in recent years both from a

philanthropic motive and also as a means of stabilizing employment by reducing the waste that has hitherto been caused in industry by an undue amount of "labour turnover," and in order to increase the efficiency of the workers by easing their conditions of living and removing their anxiety for the future. Private superannuation schemes mostly differ from those of the benefit of public employees in being on

a non-contributory basis, as far as the employees are concerned, while public service superannuation is based on the principle that the employees contribute fixed amounts which are supplemented by the payment of equal amounts by the public authority concerned. Municipal schemes are in some cities confined to members of the police and fire-fighters' organizations, but at the present time considerable progress is being made in providing safeguards for all civic employees against the contingency of their retirement under normal conditions.

In future articles some account will be given of municipal and private superannuation schemes. The following paragraphs describe the provisions made in several provinces for the superannuation of provincial civil servants.

#### **Superannuation for Provincial Employees**

Superannuation benefits for provincial government employees are provided by statute in Quebec, Ontario, British Columbia, Alberta and Nova Scotia. Pensions for civil servants in the Province of Quebec were first given under an act of 1877. This act includes many features which are still preserved in more recent legislation, and is noteworthy as being the first legislation enacted in Canada to provide pensions for the widows and children of employees.

A Public Service Superannuation Act was enacted in Ontario in 1920. Provision had previously been made under the Ontario Public Service Act (Revised Statutes of Ontario, chapter 14, section 18) for the payment of gratuities to employees discharged by reason of age, ill-health or infirmity, in consequence of departmental changes, or for any other cause than misconduct. The gratuity was paid to the employee personally, to his representatives or any member of his family, upon the order of the Lieutenant-Governor in Council, and was limited to a sum equal to the amount of one month's pay for each year of his service. The act of 1920, however, first established superannuation allowances as a right of the employees of the government.

A Superannuation Act was placed upon the statute book of British Columbia at the first session of 1921 (Statutes of 1921, chapter 60). This act includes provision for superannuation allowances, not only for provincial government employees but for those of municipalities and school boards and also for such employees in general industry in the province as might choose to enter into an agreement with their employer to take advantage of the act. The British Columbia act differs also in many other respects from other provincial acts.

A Superannuation Act was passed in Alberta in 1922 (Statutes of 1922, chapter 11). One of the distinctive features of the Alberta and Ontario acts is that they are administered by boards which include representatives of the provincial Civil Service Association. The co-operation of the employees is also secured to some extent under the British Columbia act, but in that province the employees' representative acts only in the capacity of adviser to the Civil Service Commission.

The Nova Scotia Public Service Superannuation Act (Statutes of 1923, chapter 5) became law at the session of 1923, but has not yet been proclaimed as in force.

The various acts outlined below have many features in common. All require contributions from the employees, similar amounts being contributed by the respective governments. The age of retirement is mostly at sixty-five years, and benefits are given not only to the retired employees but, in the event of their death, to their widows or children under eighteen years of age. The minimum period of employment required to qualify for an allowance is ten years in most provinces, and the maximum period during which contributions may be deducted from the salaries of employees is thirty-five years. The main variation is in regard to the calculation of the amount of allowances. Some provinces require employees' contributions at a fixed rate of deduction from their salaries, the benefit being calculated in relation to the amount standing to the employee's

credit, while in others the amount of benefit is fixed directly on the basis of the employee's salary, the percentage of deduction from salary being so adjusted as to provide means for paying that amount.

An outline of the various superannuation acts is given below in the order of the date of their enactment.

### Quebec

The Quebec Act of 1877 provided for the payment of pensions to permanent civil servants of ten years' standing on attaining the age of sixty years or on becoming incapable of discharging their ordinary duties by reason of physical or mental infirmity, provided such infirmity was not caused by bad conduct. Under this act pensions were calculated according to the number of years of service and the average yearly salary received during the last three years' employment, that is, for ten years' service, ten-fiftieths of this average; for eleven years' service, eleven-fiftieths; for twelve years' service, twelve-fiftieths, and so on, adding one-fiftieth of the average salary for every additional year's service, up to thirty-five years, inclusively. By an amendment of 1916 the basis of calculation of the amount of pensions was altered from that laid down by the act of 1877. Under the amended plan the pension of an employee is reckoned as a sum equal to two per cent of the total salary received by him during the last thirty-five years, or if his period of service was less than thirty-five years, then as a sum equal to two per cent of the total salary received during the whole period of his service. The act of 1877 laid down thirty-five years as the maximum period considered in calculating the amount of pension. The Lieutenant-Governor in Council was given authority to order reductions in pension on the ground of unsatisfactory service.

The arrangements in the act of 1877 in regard to employees' contributions were as follows: Deductions were made from their annual salaries of five per cent for the first three years and of three per cent for the subsequent years of their service,

the sums so deducted being paid monthly into the consolidated revenue fund. The amount of contributions required of employees was raised in 1916 to five per cent of income without any subsequent reduction. Only those employees who have been subject to deductions from their salaries for fifteen years receive the full pension, and if a pension becomes due before that time deductions from pension payments are made until the combined period of reductions from salary and from pension has reached the required length of fifteen years.

The act of 1877 provided for the widows and children of deceased employees as follows: From the first day of the month following the death of an employee half the pension which he received, or would have received if he had been superannuated, was to be paid to the widow for life during her widowhood; if the wife of an employee died before him, or if, having survived him she died or remarried, one-half was to be paid to the children of the deceased under eighteen years of age. This feature of the act of 1877 was modified in 1916, when a limit of six hundred dollars was fixed for the amount of pension that could be paid to the widow or to the children of a deceased employee; and a limit of three hundred dollars for the amount of pension of a child in any case where only one child was entitled to a pension. Another amendment of 1916 provided that if a widow's pension was less than fifty dollars annually she should have the option of receiving, instead of the pension, the amount of the deceased employee's contributions with interest at the rate of four per cent per annum compound yearly, less any sums received by him during his lifetime therefrom. The Lieutenant-Governor-in-Council was, by another amendment of 1916, authorized to make a similar election on behalf of any child entitled to a pension of less than fifty dollars. The amendments of 1916 affected only public employees appointed after their enactment as law.

Employees retiring voluntarily, or because their office was abolished, re-

ceive back from the consolidated revenue fund the sums previously deducted from their salary, without interest, the same rule applying to employees retiring on account of physical or mental infirmity, and to the widows or children of employees dying before the time when pensions can be granted to them. Employees superannuated on account of infirmity are subject up to the age of sixty years to be called upon for such service as they may be capable of discharging, provided such service is not inferior in rank and emoluments to their former occupation, and that it involves residence either at the seat of government or at the last place of employment. An employee refusing to discharge such duties on request by so doing forfeits all further pension rights. No reimbursement is made under the Quebec Act to any public officer or employee who has been dismissed. The pension paid to employees, and the half pension paid to their dependents, is not liable to seizure. No pensions are payable to persons residing outside the province, except by permission of the Lieutenant-Governor-in-Council.

The Act of 1877 was subsequently amended by the addition of a section, which, however, was repealed in 1916, granting special privileges as to pensions to persons having special technical or professional qualifications who were appointed to positions in the Civil Service after the age of thirty years, the Lieutenant-Governor-in-Council being given authority to add a further number of years, not to exceed ten, to the number actually served by such persons. The Act as now amended makes provision for a preliminary inquiry by the Treasury Board to ascertain the eligibility of a person proposed for superannuation and whether or not an allowance would be in the public interest, no superannuation allowance being made until the Board has made a favourable report thereon.

A Commission appointed during 1923 to investigate the conditions under which Civil Servants are now working is expected to present a report to the provincial legislature during its present ses-

sion. It is anticipated that this Commission will recommend the inclusion of pension benefits to "outside" Civil Servants in addition to the "inside" staff, the latter branch only being covered by the existing superannuation scheme.

### Ontario

The Ontario Public Service Superannuation Act, 1920, set up a Superannuation Fund, formed of contributions from the salaries of the employees supplemented by contributions of equal amount by the provincial government. Retirement is compulsory for employees on their attaining the age of seventy years, unless their continuance is deemed to be in the public interest, and is optional at sixty-five years for those who have served for thirty years. Continuous service for ten years qualifies employees for a pension, including those who have been retired on the ground of ill-health or physical incapacity. Male employees, if married either at the date of entering, or before the completion of ten years' service, are required to have carried life insurance for a period of at least ten years to the extent of \$2,000, otherwise the cost of such insurance is deducted from their salary. In the event of the death of an employee who would have been qualified for superannuation, his representatives receive a lump sum equal either to one year's salary of the deceased at the rate of the average salary of the last three years of service, or to the amount of the contributions made by him with interest at five per cent, compounded annually, whichever is the greater. If the deceased employee leaves a widow or infant children under eighteen years, one-half of the superannuation allowance due to him is paid to his widow, or, if she dies or marries again, to his children under eighteen years of age. The contributions made by an employee who retires from the service, or dies, before he has completed ten years' service, are returned to him or to his representatives with interest at five per cent. Employees' contributions are deducted from their monthly salaries, the amount of the deduction varying with the employees' age from  $2\frac{1}{2}$

per cent for those under twenty-one to five per cent for those over forty-five years of age. If the Public Service Superannuation Fund should be unequal to the demands made upon it for the payment of benefits, the deficiency is made up out of the Consolidated Revenue Fund.

The amount of the allowance is calculated upon the average yearly salary of the employee during the last three years of his service, and must not exceed one-fiftieth of this average multiplied by the number of years of service up to thirty years. No allowance is to be more than \$2,000 a year or than the employee's final annual salary. An employee's interest in the Superannuation Fund is exempt from provincial and municipal taxes and from any legal process, and is unassignable. The act is administered by the Public Service Superannuation Board, consisting of the President of the Executive Council, as chairman, the Civil Service Commissioner, one representative to be appointed by each of the recognized political parties in the legislature, and a representative of the Ontario Civil Service Association. This Board passes on all allowance cases and draws up regulations in regard to proofs, etc. The government, however, itself decides questions which arise as to the application of the act to particular employees or claims of employees.

#### British Columbia

Under the Superannuation Act of British Columbia government employees receive allowances on their retirement at the age of sixty-five years, or if, being male persons between the ages of sixty and sixty-five, or female persons between fifty-five and sixty years of age, they are retired from the service on their own application, such retirement having been found to be in the public interest. Allowances are made also to persons who have become incapacitated by mental or physical disability from properly performing their duties. Six months' notice must be given by the Civil Service Commission to the employee before the date of his retirement. Employees retiring under

the age of sixty are subject to re-engagement at the same rank as they formerly held, and if they refuse such re-engagement they forfeit their allowance, receiving back only the amount of their own contributions.

The Superannuation Fund is made up of equal contributions by the employees and the employers, the latter term including the Crown. The employee's contribution is made by a deduction from his salary of four per cent, this amount being retained by the Minister of Finance. A larger deduction may be made, at the employee's request, up to eight per cent, if he is over fifty years of age, up to seven per cent if he is over forty-five, up to six per cent if he is over forty and up to five per cent if he is under forty.

The "employer", who in the case of Civil Servants is the provincial government, sets aside an amount equal to the amount of the employee's contributions, the whole sum being paid into the Superannuation Fund. Deductions from an employee's salary may be discontinued after thirty-five years if the employee so requests the Civil Service Commission in writing. On the other hand, the Minister of Finance may receive special voluntary contributions on behalf of any contributor in addition to the prescribed deductions from his salary. A separate account is kept for each employee and each employer showing the amount to his credit in the Superannuation Fund. Interest is credited to each account half-yearly at five per cent until the rate of interest is changed by regulation. Civil Servants and other contributors who were employed prior to the passing of the act are provided for in regard to their services at that time out of a special reserve in the Superannuation Fund made up of unused and returned government contributions, and of monies specially appropriated by the legislature for the purpose. (Private employers coming under the scheme are subject to a special levy, for the special reserve, of one per cent of their payroll until sufficient funds have been accumulated in their accounts to meet all claims made upon them).

The amount of an allowance to an employee is the sum to which the amount at his credit in the Superannuation Fund would entitle him according to the prescribed tables then in force, supplemented by any additional sum which may be due, based upon special contributions or upon the employee's claim to a special allowance from the special reserve for services prior to the passing of the act. The allowance may be in three forms, at the employee's choice: (1) single life, payable for the life of the contributor; (2) guaranteed allowance, payable for the life of the contributor, or for a term of years certain, which ever period is the longer; (3) joint life and last survivor, payable during the joint life of the contributor and any person nominated by him prior to the granting of the allowance, and during the life of the survivor. Any deficiencies in the Superannuation Fund are to be met out of the Consolidated Revenue Fund of the province. If an employee dies before he receives an allowance the amount at his credit in the Fund is paid to his legal representatives; if he is dismissed or has resigned, it is also returned to him on application. The provincial secretary is responsible for the administration of the act, but the actual work of investigating particular cases is done by the provincial Civil Service Commission. The employees in a particular group, upon notice signed by at least twenty per cent of their number, may elect a representative to act in an advisory capacity to the commission in the administration of the act as it affects their group.

Beneficiaries are required to report at least once a year to the Commission, or furnish such credentials as may be required.

The Lieutenant-Governor in Council is authorized to make regulations to govern the rate of interest credited, paid or charged, prescribing tables for determining the value of allowances forms for collecting facts as to employees, conditions of exemption in certain cases, and other matters, for the purpose of carrying into effect the provisions of the act.

### Alberta

The Alberta Superannuation Act of 1922 applies to all permanent employees except those of a class which is otherwise provided for satisfactorily and which requests exclusion, and also excepting those who may be exempted by subsequent order in council. Male employees are required to retire at sixty-five years of age, and female employees at sixty, unless re-engaged. If they have been employed continuously for ten years they are eligible for annuities.

Two types of annuity are provided for under the Act, one being the regular or contributory type, and the other non-contributory and applicable only in the initial stages of the scheme. Contributory annuities are made up of employees' contributions supplemented by equal contributions from the Government. Deductions are made from the salary of every employee at the rate of four per cent per annum of salary and paid into the Government's General Revenue Fund, together with a like sum as a government contribution, a separate account being kept by the Civil Service Commissioner in respect of each employee. The Superannuation Fund thus formed bears interest at the rate of five per cent per annum, payable half yearly. Employees are subject to such deductions for not more than thirty-five years. As under the British Columbia scheme, the contributory annuity may be, at the option of the employee, a life annuity; an annuity payable for the life, or one payable during the joint lives of the employee and a nominee and during the life of the survivor. A contributory annuity must be at least as large as the annuity of the same class which could be purchased by the employee from the Dominion Government or from an insurance company of high standing for a sum equal to that standing to his credit on the books of the Civil Service Commissioner at the time of his retirement or disability. The Board administering the Act has the option of paying a lump sum in cases where the annuity payable is too small to be of practical service. If at any time the Superannuation Fund should be insufficient to meet the de-

mands upon it, the Provincial Treasurer is authorized to supplement it to the extent required.

The non-contributory annuity may be granted by the Lieutenant Governor to any duly qualified employee, whether he is in receipt of a contributory annuity or not, and "shall not exceed as many fiftieths of the average salary paid to him as an employee for the ten years immediately prior to July 1, 1922, as he has been years continuously employed prior to that date." Where an employee has not served ten years prior to July 1, 1922, his average salary is computed from his actual period of service before that date. Temporary employees, under an amendment of 1923, were given the right to non-contributory allowances under certain conditions. The employee has the same choice in regard to the form of annuity under either system, and the non-contributory allowance may also be paid in a lump sum as a gratuity. The non-contributory allowances are paid out of a special reserve which is formed from occasional payments into the Superannuation Fund by the Provincial Treasurer.

When an employee dies before reaching the age of retirement, the amount of the Government contributions made on his behalf with interest, is applied by the Board as it sees fit for the benefit of the widow and children, while the employee's contributions are divided among the dependants in the proportion in which they would share in his property if he died intestate. If the deceased employee has not qualified for an annuity the deductions from his salary are returned with interest to his dependents or personal representatives.

Employees have no right to demand or enforce the payment of a gratuity, and the Board's decision as to the status of an employee is final.

The employee's interest in the fund and in any annuity under the Act is not subject to any legal process, except in respect to a failure to account for public moneys, and is unassignable.

### Nova Scotia

Under the Public Service Superannuation Act of Nova Scotia ten years' continuous service is necessary to qualify an employee for superannuation. This begins when he reaches the age of sixty-five years or on his becoming incapable of discharging his official duties. In cases of disability the payment of superannuation is subject to the condition that the employee must accept re-engagement if he recovers. In the event of the death of a prospective beneficiary, his widow, until she marries again, or his children under eighteen years of age, if the wife should be dead, receives one-half of the allowance to which he would have been entitled if he had survived; if the deceased leaves no widow or young children, the members of his immediate family who were dependent upon him receive the same consideration; otherwise the amount of the employee's contributions, with interest at five per cent, are returned to his personal representatives. The amount of the employee's contributions is also returned with interest if he is dismissed or resigns from the service before completing the necessary ten years of continuous employment, and in the event of his death, to his personal representative. Similar arrangements are made for the benefit of the dependants of a former employee who at the time of his death was in actual receipt of a superannuation allowance.

The employee's contributions are made by means of a deduction from his salary at each monthly payment, the amount of the deduction being fixed by the Governor in Council. The sum so deducted, together with a Government contribution of a like amount, is paid into the Superannuation Fund, interest at five per cent or at such other rate as the Governor in Council may prescribe, compounded half-yearly, being added by the Provincial Treasurer. Statutory deductions and Government contributions are discontinued after payments have been made for thirty-five years, unless the Governor in Council should otherwise direct, but the half-yearly payments of interest

continue. If the Superannuation Fund should at any time be insufficient to meet all the demands made upon it, the Provincial Treasurer is to supplement it out of the Consolidated Revenue Fund, as required.

The amount of the superannuation allowance is calculated upon the average yearly salary during the last three years of service. This average is divided by fifty, and if the employee has served for ten years he is entitled to receive ten-fiftieths, if he has served for eleven years, eleven-fiftieths, and so on with an additional one-fiftieth for each additional year of service up to thirty-five years, and up to a maximum total annual allowance of \$3,000. Retirement is compulsory at the age of sixty-five years, unless an employee is specially retained, in the public interest, by order of the Governor in Council. Special provision is made for employees who were in the public service at the

coming into force of the Act, and reach the age of retirement before they have made ten years' contributions to the Superannuation Fund. If such employees have served at least ten years on reaching the age of retirement they receive allowances in the same scale as regular beneficiaries, the amount being calculated on the total number of years of service. Employees benefiting under any other superannuation scheme to which the Province contributes are not eligible for an allowance. The interest of any employee in the fund, or in an allowance, is not subject to any legal process, and is unassignable.

The administration of the Act is the immediate care of the Governor in Council, whose powers include the determination of the amount of deductions from salary, the making of rules as to evidence in regard to claims for allowances and other duties assigned to it by the Act.

## WORKMEN'S COMPENSATION IN QUEBEC, NEW BRUNSWICK AND MANITOBA

### Quebec Employers and Workmen's Compensation

THE appointment of a commission in the Province of Quebec in conformity with an act of the Legislature in 1922 to study the subject of workmen's compensation and labour conditions generally in the province, has been noted in the *LABOUR GAZETTE* (October, 1923, page 1054, etc.). The views of the employers on the subject have lately been stated for the information of the Commission by a special committee of the Montreal Branch of the Canadian Manufacturers' Association. The members of the committee were Messrs. Julian C. Smith, vice-president of the Shawinigan Water and Power Company (chairman); Paul E. Joubert, chairman of the Quebec division of the Canadian Manufacturers' Association; H. M. Jaquays; W. S. Atwood; T. P. Howard; J. N. Doyle; and R. W. Gould, secretary of the Quebec division of the Canadian Manufacturers' Association. The committee, it

is stated, began its work about two years ago when it invited to a conference representatives of the international and of the Catholic unions, in the hope of reaching an agreement as to possible amendments to the act. The international representatives withdrew from the conference after a few meetings had been held, but those of the Catholic unions remained and agreed to the proposals subsequently embodied by the committee in their report. A joint meeting was held at Montreal on January 8, at which there were representatives of the Board of Trade, the Builders' Exchange, the Canadian Pulp and Paper Association, the *Chambre de Commerce*, and other organizations of Montreal, as well as of the Three Rivers Board of Trade and the Canadian Manufacturers' Association branch at the same city. At this meeting it was agreed that the present act was inadequate to meet the needs of modern

industry, and a number of proposed amendments were approved. The committee practically completed its report early in January. Its most striking feature is a recommendation that employers should be compelled to insure their workers against accident or death with a reliable company, and thus protect injured workmen or their dependents in the event of an employer becoming insolvent. The committee propose further that the act should be made to apply to the lumbering and pulpwood industries, which are not at present covered by its provisions. They recommend that the limit of capital which could be claimed in lieu of annuities in cases of death or disablement be raised from \$3,000 (the present limit), to \$4,000; the minimum and maximum payments in cases of death being raised from \$1,500 and \$3,000, the present amounts, to \$2,000 and \$4,000 respectively. Under the Quebec Act the amount of compensation for death consists of a sum equal to four times the average yearly wage, subject to the limits above mentioned; that the amount of funeral benefits be raised from \$50 to \$100, and that medical expenses, instead of being included, as at present, in the amount allowed for funeral benefit should be

provided for by a separate allowance. To this end they proposed the following amendment:

“ Each employer shall be required to furnish necessary medical and hospital treatment, free of charge, to the workman in cases where the employee meets with injury while in his employ, the choice of doctors and hospitals to be under the control and direction of the employer.”

The committee further proposes to make the act applicable to a much larger number of workmen by raising the maximum annual earnings of workmen coming under the act from \$1,000 to \$2,000. Such an amendment, it is thought, would eliminate actions by workmen under common law, which are now frequent. The committee disapproves of lump sum settlements of claims for compensation, and suggested that the courts be given power to decide whether the compensation is to be paid as an annuity or in one payment. It is further proposed that disputes as to the extent and nature of injuries be settled finally by a medical board or boards appointed by the Provincial Government, and that employers must give notice in writing of every accident to men in their employ within 15 days.

### **Provincial Conference on Workmen's Compensation in New Brunswick**

The Workmen's Compensation Act of New Brunswick and its administration were discussed at a conference of employers, employees, the provincial government and the Workmen's Compensation Board which met at St. John, N.B. on January 10 to 12. The conference was summoned by the provincial premier, the Honourable P. J. Veniot, owing to recent difficulties in connection with the act, especially in its application to the lumbering and logging industries. The employers of the province were represented at the conference by counsel, the only exception being the Canadian Pacific Railway Company, who intimated that they had no complaint and had nothing to do with the proposed changes in the act. The provincial government was also

assisted by expert advice, while the interests of the workmen were represented by a delegation from the New Brunswick Federation of Labour, assisted by Mr. W. L. Best, Dominion legislative representative of the International Brotherhood of Locomotive Firemen and Engineers, and others.

#### **The Employers' Case**

The proposals of the employers were as follows:—

(1) That the scale of compensation and benefits as laid down in the original act, before the amendments of 1920, be restored. (The amendments for 1920 were outlined in the *Labour Gazette* for July, 1920, benefits under the act were increased as follows: maximum payment for permanent partial disability was raised from \$1,500 to \$2,500; burial allowance was raised from \$75 to \$100; monthly payment to widow was raised from \$20 to \$30,

and the allowance for a child from \$5 to \$7.50 per month; the age of children for whom allowances are to be made was raised in the case of girls from 16 to 18 years, and the clause of the act of 1918 limiting the total amount of compensation to \$3,500 was repealed, provision was also made for the furnishing of medical, surgical and hospital aid and skilled nursing service, the cost to be borne by the Accident Fund; and the Board was authorized to direct the installation of first aid appliances and services in any industries).

(2) In order to remedy the defects in the administration of the act and to secure its enforcement in letter and spirit we suggest that the Board be reconstituted. We suggest that a man of recognized capacity and a thorough knowledge of industrial conditions be placed in charge of the administration at a salary sufficient to command his full time, and that he be supported by two other men giving such time as may be necessary to the work at a remuneration based on the time employed.

(3) That in view of the doubt whether a state insurance scheme can be successfully operated in New Brunswick we ask that if the changes above recommended are not made the employers be given the option to carry their own insurance, the employer in each case giving a satisfactory guarantee by bond or insurance policy that the claims for compensation will be duly paid; a reasonable fixed limit being placed on the employer's liability.

(4) That in order to perform their functions under the act the associations representing the classes of employers shall be entitled to obtain through assessment under the act, without being under any special obligation to the Board therefor, such funds as they may require from time to time to carry on their work for the prevention of accidents, etc.

Counsel for the employers charged the Workmen's Compensation Board with having failed to carry out all the provisions of the act, and with substituting purposes of its own therefor; for example, section 67 of the act required that on April 1 in each year assessments should be adjusted on each class according to the payrolls, but evidently this had not been done, as the rates actually charged showed no evidence of such adjustment. The Board should have collected the full amount for each class, but instead of doing so it was alleged that they transferred heavily burdened industries to other classes; thus the stevedore class had been obliged to finance the lumbering class, and the stationary lumber mill owners were carrying part of the burden which should have been carried by portable

mill owners. Again, although section 52 of the act enables the Board to establish sub-classifications, differentials, and proportions in rates as between the different kinds of employment in the same class, no such provision for particular hazards in certain occupations, it was claimed, had been made by the Board, this condition of affairs being against the intention of the act. The employers' counsel further asserted that the Board had failed to co-operate with the employer organizations in carrying out safety plans. He condemned the practice of the Board in setting aside reserves, and expressed preference for the system of surcharges on industry which was followed in Germany before the war. The surcharge method, he claimed, was superior to the method of capitalization, and made employers pay constant attention to the problems of industrial safety and to the reduction of the rate levied upon their industry as a result of its accident record.

During the discussion it was stated that the special difficulties experienced by the Board in connection with the lumbering industry were due to the peculiar circumstances under which logging and lumbering are conducted in New Brunswick as compared with other provinces. Ontario, for example, has not the casual system in which many men in New Brunswick engage in lumbering for only two or three months, and in farming or fishing for the greater part of the year.

#### The Workers' Case

The workers' representatives opposed the proposals submitted to the conference by the employers for the following reasons:—

A reduction in the present rates of compensation, such as the employers recommended, would defeat the primary object of the act, which was to prevent dependants from becoming a charge upon the community; the present cost of living suggested no such reduction, and the tendency in other provinces since 1920 had been to increase rather than reduce the existing scale.

The proposal to reconstruct the Board and place the administration of the act in the hands of one man was

opposed on the ground that an act of such importance called for the combined judgment of at least three commissioners.

The recommendation that the employers be allowed to carry their own insurance was alleged by the labour delegation to be economically unsound, since a much smaller percentage of the assessments reached the injured workers or their dependants in states or countries which made use of private insurance companies than in those having state compensation funds.

In regard to the fourth proposal of the employers, that their respective associations should through assessments under the act obtain such funds as they require to carry on safety and other work, the labour men claimed that the workmen should be represented upon such safety associations. At the same time they were in favour of co-operation between the Board and the employers in the prevention of accidents.

Premier Veniot, in reference to the foregoing suggestion as to employers' representation, said he would personally oppose it, and advised the workers to form their own safety associations and co-operate with that of their employer.

Mr. Best, for the labour delegation, replied that better co-operation could be secured through one unit than by setting up two organizations. He asserted that the employers' case contained no specific charges regarding the past administration of the Workmen's Compensation Act by the Board. Labour, he said, proposed that the powers of the Board be extended by an amendment which would make its decisions in regard to assessments absolute and without appeal therefrom. In regard to this point, Premier Veniot suggested that there should be provision for an appeal to the court in the event of the Board's misinterpreting the act, and the employers' counsel proposed that there should be no appeal on a question of fact, but that an appeal should be allowed in questions of jurisdiction or interpretation.

Referring to the alleged practice of malingering by the workers, the Premier said: "There is no use mincing

matters: malingering is prevalent and is being abetted by members of the medical profession." In his opinion malingering would affect 15 to 20 per cent of the employees, but this percentage might be lower in organized labour.

On behalf of the medical profession it was denied that the doctors were responsible for malingering, the medical referee having authority to discontinue the treatment of injured workers at any time.

#### Defence of the Board

The accounting expert engaged by the provincial government claimed that the employers' counsel had blamed the Board for many things for which it was not responsible, but he admitted several mistakes and errors of judgment on the part of the Board in the past. He denied the charge that the Board had failed to carry out the provisions of the Act and had substituted its own ideas. Referring to the grouping of various occupations in the same class he remarked that some employers' groups were too small to be dealt with separately and should be placed in a larger class. As the result of his enquiry he maintained that the Board had been legally correct in its administration of the act: he had found two errors made by the Board, which however were in matters of opinion only, but he could not find that the Board had broken down, as the employers' counsel claimed.

Premier Veniot, in closing the conference, said that the Government would try to draw conclusions from the evidence adduced at the conference. He urged the various organizations concerned to get together and let legislature know what they wanted before the House met. He was particularly anxious to find out what labour thought on the question whether or not a maximum limit for the amount of compensation paid in a particular case should be retained in the act. He believed that labour would ask for increases in rates and that the employers would ask for a reduction. The legislature would have to decide as to the best course to be followed in view of these conflicting claims.

## Amendments to Manitoba Workmen's Compensation Law Suggested by Employers

A memorandum was submitted to the provincial government of Manitoba in January by the legislative committee of the Employers' Association of Manitoba giving their views on certain laws which they claimed added largely to the cost of living. The following amendments to the Workmen's Compensation Act were suggested in the memorandum:—

That minimum compensation to employees receiving \$15 per week or less be reduced to \$10 per week. (By an amendment to the Act in 1921 the minimum weekly compensation in cases of permanent total disability was raised from \$6 to \$15, even when the injured employee had received less than that amount in wages.

That where workmen at present under the act are allowed one year to report upon an accident, the time be limited to sixty days.

That the government contribute toward the administration of the act as in force in other provinces of the Dominion.

That employees contribute one cent per day toward medical aid, as now in force in some of the other provinces of the Dominion.

That the maximum amount paid to any workman or his dependents be \$4,000, instead of an unlimited amount as now in force under the act.

That the present general rate of compensation of 66½ be reduced to 55 per cent.

That when an injured workman leaves the jurisdiction of the board or the province, compensation shall cease.

That when a workman fails to give notice of accident, as provided in the act, compensation shall date from time of notice and not from time of accident.

---

### Eight-Hour Day Restored in Germany

In the January issue of the LABOUR GAZETTE, on page 6, it was noted that the orders of the Government of Germany establishing an eight-hour day in industries had expired on November 17, 1923. A provisional order was issued regulating working hours which came into force on January 1, 1924. This new order reaffirmed the principles of the two that had lapsed. It provides that the regular working day, excluding intervals, must not exceed eight hours for workers in all industrial undertakings, including industries subsidiary to agriculture, which are on an industrial basis. Any loss of time on industrial working days may be made up on other working days after consultation with the works council. In classes of labour in which the workers are merely on call for a considerable portion of a day exemptions from the eight-hour day may be permitted by collective agreements or by the Minis-

ter of Labour after consulting with the employers' associations and trade unions. The workers in any undertaking may be employed for two hours overtime on thirty days in the year at the discretion of the employer after consultation with the works council. Also after consultation with the works council, female workers and male workers under 16 may work one hour overtime, and male workers over 16 may work two hours overtime, daily, in the following kinds of work: (1) watching, cleaning and repairing work which is absolutely necessary for the regular continuance of their own or another undertaking. (2) Work on which the resumption or maintenance of the whole undertaking technically depends. (3) Loading or unloading of ships in harbour, and loading, unloading and moving of railway wagons, if the overtime is necessary to avoid stoppages in transport or to keep within the legal lading period. (4) Supervising.

## VIEWS OF ALBERTA MANUFACTURERS ON PROVINCIAL LAWS

A DEPUTATION representing the Alberta Manufacturers' Association waited upon the premier and other members of the Provincial Government in January with reference to the programme of labour legislation recently demanded by the Alberta Federation of Labour\* and to other matters affecting the manufacturers in the province. They stated that "manufacturers had already been taxed to an extent that it has become unbearable," and alleged that "labour has not kept pace with the demands of the community, has not endeavoured to increase production, and has not sought means of reducing the financial burdens of the province."

On the subject of Workmen's Compensation the deputation urged that the Labour Federation's proposed amendments to the Act be not granted\*; that the present scale of compensation be reduced from 55 to 50 per cent of the wage rate, this decrease being justified by the falling cost of living; that allowances to all dependants under the act be reduced by 50 per cent of the increase since 1918; that all industries, including agriculture, be brought under the act, and that assessment be made upon the productive payroll only, eliminating the clerical and selling employees. It was alleged that the legis-

lation proposed by the Labour Federation would involve an additional cost to the manufacturers of \$343,700 a year. If for instance, the rate of compensation were to be raised to 75 per cent of wages, as proposed, it would mean that Alberta would be paying the highest rate in the world.

The manufacturers also objected to the proposal that health insurance should be charged to the manufacturers, claiming that it should be a charge upon the community at large. Similarly, objection was made to old age pensions, and the protection of employees while on their way to or from work, the point being that the risks involved were common to all citizens and were not peculiar to the employed classes. The proposal for insurance against unemployment was condemned by the deputation, having, it was claimed, nowhere proved successful, and local measures were recommended instead. The proposals to provide an eight-hour day and free school books were condemned as dealing with subjects unsuitable for compulsory legislation. The manufacturers opposed any legislation that would add to the present burden upon industry, and asked that the aim should be to reduce rather than increase expenditure.

## ANNUAL CONFERENCE OF ASSOCIATION OF CANADIAN BUILDING AND CONSTRUCTION INDUSTRIES

THE sixth annual conference of the Association of Canadian Building and Construction Industries was held at Windsor, Ont., on January 22 to 25. The delegates represented various branches of the construction industry and came from as far east as New Brunswick and as far west as Saskatchewan. Mayor F. J. Mitchell of Windsor, and Mr. F. W. Wilson, M.P.P., officially welcomed the convention.

The Manufacturing and Supply Section arranged the third exhibit of materials and apparatus used in construction, and at the opening session of the conference each representative of the different exhibitors introduced his firm and materials manufactured.

The address of President J. M. Pigott reviewed the work of the association during the past year and summarized the general conditions existing in the industry in Canada to-day.

A discussion was held on the subject of immigration in the course of which two addresses were given, each from a widely different standpoint. Dr. Willford I. King, of the National Bureau of Economic Research, spoke on the advantages of a restricted immigration, while Mr. F. Maclure Sclanders, Commissioner of the Border Chamber of Commerce, advocated the encouragement and admission of all immigrants who could be absorbed. Seasonal employment was dealt with in a paper presented by Mr. Douglas Bremner, president of the Montreal Exchange.

A competition between carpenter and bricklayer apprentices who were sent by members from Ottawa, Toronto, Hamilton and London, was held in the Windsor-Walkerville Technical School. The object of the contest was to stimulate interest in the question of apprenticeship, and direct public attention to the efforts that are being made by the association to have a comprehensive apprenticeship plan undertaken by the various provincial governments.

The reports of the various committees adopted by the conference reaffirmed the apprenticeship plan adopted last year at Quebec, strongly approved of the immigration policy adopted by the Federal Government, and emphasized the need for skilled mechanics in the bricklaying and plastering trades; it was suggested, however, that these mechanics be urged to come to Canada in the spring of the year rather than the fall, owing to the seasonal nature

of the industry due to climatic conditions. No indication of lower costs in construction was apparent at the present time, although the volume in 1924 is expected to be a little better than in 1923. A plea for consideration of the third party, the public, in all negotiations with labour was made by the Committee on Labour Relations.

The contractors at the conference were especially interested in the construction clinic conducted by Gordon Tamblin, of Denver, Colorado, on "Estimating." A new feature was the presentation of short papers by members, dealing with special problems encountered in their work during the past year.

Officers elected for the ensuing year were as follows: Messrs. Joseph M. Pigott, Hamilton, Ont., president; John V. Gray, Toronto, Ont., first vice-president; K. D. Church, Montreal, Que., eastern vice-president; William Wilson, Regina, Saskatchewan, western vice-president; J. B. Carswell, Toronto, Ont., past president; E. G. Brousseau, Quebec, Que., honorary secretary; F. B. McFarren, Toronto, Ont., honorary treasurer; S. E. Dinsmore, Windsor, Ont., representing general contractors; R. J. Fitzsimmons, Hamilton, Ont., representing trade contractors; H. J. Mero, Walkerville, Ont., representing manufacturing and supply section.

The association on the invitation of the Montreal Exchange decided to hold its next conference at Montreal.

### Apprenticeship Training in Pulp and Paper Industry

The apprenticeship committee of the Canadian Pulp and Paper Association, in a recent report to the Association on their activities during the past year stated that they had taken steps to secure the co-operation of the Technical Association of the Pulp and Paper Industry, so that, if possible, a uniform system of apprentice training might be provided for all mills both in Canada and the United States. They had also enlisted the co-operation of the Ameri-

can Superintendents' Association, the superintendents being largely responsible for the training of the apprentices in their mills. Accordingly a meeting of representatives of these associations was held at Buffalo, New York, in September, 1923, when a joint international committee on education was organized. Much preliminary work had already been done, it was reported, but no definite apprenticeship scheme was ready so far to be submitted for the approval of the Association.

## INDUSTRIAL ACCIDENTS IN PENNSYLVANIA

AN advance report of the Pennsylvania Bureau of Workmen's Compensation for the year 1923 has been received at the Department. There were reported to the Bureau last year 200,435 accidents of which 2,412 were fatal and 198,023 were non-fatal. This was an increase of 54,180 accidents over the number reported in 1922 and is the largest number reported in any one year since 1917. Of the accidents reported 92,651 were non-compensable. Since the Act came into force on January 1, 1916, 1,482,750 accidents have been reported to the Bureau and were approved in 538,828 cases incurring compensation liability of \$83,036,388. During the past year compensation payments were terminated in about 85,000 cases, most of which may be re-opened within 500 weeks from the date of the agreement upon recurrence of disability due to the original injury. On December 31 there were 22,605 cases in which compensation was being paid. In 97 per cent of the cases compensation was paid under voluntary agreements made between the employer and the employee or insurance carrier and only three per cent of the cases were contested before the referee.

The Bureau has an adjustment division with a field force of eight men who

have been the means of settling many disputed cases which otherwise would have resulted in legal expense to employers and employees. During 1923, 2,084 compensation agreements were secured and approved, 413 non-compensable cases were adjusted, where only medical expenses were involved, 303 settlements were made under the Federal Liability Act in fatal railroad accidents, 83 subrogative cases were investigated, and 365 investigations were made in miscellaneous cases. There were in all 5,189 cases investigated and adjusted in 1923.

The Workmen's Compensation Bureau also administers the Act where state employees injured during the course of their employment, compensation as well as bills for medical, surgical and hospital expenses within the limitations of the Act are paid by requisition made on the Auditor General. The total expenditures on behalf of State employees during the year amounted to \$56,030. The number of cases on which compensation was still being paid at the end of the year included 39 fatal and 22 permanent disability cases.

A campaign to reduce the number of accidents is now being conducted in Pennsylvania.

---

## THE EMPLOYMENT SITUATION AT THE BEGINNING OF JANUARY, 1924, AS REPORTED BY EMPLOYERS

THE downward movement in employment that began some months ago continued with increasing force during December, until at the beginning of January the index number declined to 88.7 from 95.7 on December 1. On January 1, 1923, this index had stood at 86.3, in 1922 at 77.9, and in 1921 at 87.7. The decreases recorded at this time of year are largely seasonal in character, representing to a considerable extent losses due to temporary shutdowns in factories for inventories

and over the holidays. In other lines of employment the contractions are usually caused by unfavourable weather conditions. The shrinkage in payroll indicated in reports furnished the Dominion Bureau of Statistics by employers of labour involved the release of about 7 per cent of the working forces; this was somewhat less than that registered at the beginning of January, 1923. The curve in the accompanying chart illustrates the more precipitate decline that occurred at the beginning of last

year and of the year before, as well as the fact that employment remains on a higher level than at the same period of 1923, 1922 or 1921,

Returns were received from 5,768 employers of labour with a combined working force of 729,950 persons; in the month before they had employed 787,531 workers. There was, therefore, a decline of slightly more than 7 per cent, which compared with loss of over 9 per cent at the beginning of January, 1923, and of about 10 per cent on January 1, 1922 and 1921. Heavy contractions were indicated in manufacturing, while seasonal recessions again occurred in construction, transportation, communication and mining. On the other hand, logging camps increased their

facturing and construction reported the most extensive curtailment, while logging and retail trade in every part of the country showed more or less expansion as compared with December 1. The following table gives the index numbers of employment by districts.

District	Relative weight	Jan. 1, 1924	Dec. 1, 1923	Jan. 1, 1923	Jan. 1, 1922	Jan. 1, 1921
Maritime provinces.....	8.8	86.3	91.2	90.8	78.1	95.9
Quebec.....	27.3	90.5	98.5	83.5	74.4	88.3
Ontario.....	41.9	86.1	93.4	85.6	78.3	83.4
Prairie provinces.....	13.7	94.3	99.3	90.0	82.8	95.7
British Columbia.....	8.3	90.9	97.8	88.3	79.9	86.6
Canada.....	100.	88.7	95.7	86.3	77.9	87.7

Employment in the six cities for which separate tabulations are made

personnel by nearly 12 per cent, and retail trade, although the general peak of activity was passed by January 1, nevertheless afforded about 5 per cent more employment than in the preceding month.

All provinces shared in the reductions in working force; those in Quebec and Ontario were especially heavy, affecting some 17,900 persons in the former province and over 25,800 in the latter. These were percentage declines of 8.2 and 7.8 respectively. In the remaining provinces there were also pronounced contractions. Activity in logging and in consequence of the re-opening of the winter ports in the maritime provinces, offset a large share of the decline in that district. There were general reductions in all provinces; manu-

facturing and construction reported the most extensive curtailment, while logging and retail trade in every part of the country showed more or less expansion as compared with December 1. The following table gives the index numbers of employment by districts.

showed declines. The actual losses were heaviest in Montreal, where the 722 firms making returns reported the release of 8,429 persons or 7.8 per cent of the pay-roll. They employed 99,254 workers as compared with 107,683 at the beginning of December. This reduction was largely due to cessation of operations in factories during the holiday and inventory period, particularly in works turning out railway cars and parts, in tobacco, biscuit, confectionery and sugar factories. Very pronounced contractions were also indicated on the whole in shipping and stevedoring, and in construction, both seasonal movements. Electrical appliance factories and retail stores increased their staffs to some extent in this city. In Toronto nearly 5 per cent of the working pay-

roll were affected by the recessions reported. According to returns from 794 firms, they employed 93,642 persons as compared with 98,405 in the preceding month. As in Montreal, a very large share of this decrease occurred in manufacturing. The declines in textile, sugar, confectionery, meat slaughtering and packing, iron and steel establishments were most extensive in Toronto. Employment on street railways showed some reaction from the large increases registered at the beginning of December, and construction continued to report seasonal contractions. Considerable increases in working force were indicated by departmental stores. The most important reductions in Ottawa were registered in saw mills and in construction, while some improvement was shown by pulp and paper mills. Statements were received from 123 firms in that city employing an aggregate payroll of 9,590 persons, as compared with 9,913 at the beginning of December. The difference represented a decrease of 3.4 per cent. The reductions in Hamilton were proportionally larger than in any other city for which a separate tabulation is made, affecting about 11 per cent of the pay-roll. The iron, steel and textile industries suffered the heaviest losses in that city, although all branches of manufacturing were slacker than in the last report. According to reports from 197 concerns in Hamilton, their pay-rolls declined from 26,891 on December 1 to 23,844 for the month under review. In Winnipeg there were decreases in a number of industries, but the individual losses were not large; the most pronounced were registered in textiles, iron, steel and building construction. On the other hand, retail trade afforded rather more employment than at the beginning of December. The working force of the 288 reporting firms aggregated 23,805 persons, as compared with 24,568 in the preceding month. This was a decline of 3 per cent. Saw mills, shipping and stevedoring in Vancouver reported the most extensive declines, but paper, and textile works were not so fully engaged, nor did construction afford as much employment as in

the preceding month. Reports were tabulated from 217 firms whose pay-rolls totalled 19,810 as compared with 21,329 on December 1; the difference represented a decrease of 7.1 per cent. The following table shows the index number of employment in these cities.

City	Relative weight	Jan. 1, 1924	Dec. 1, 1923	Jan. 1, 1923	Jan. 1, 1922
Montreal.....	13.6	86.3	93.6	79.8	73.2
Toronto.....	12.8	85.6	90.2	84.7	85.1
Ottawa.....	1.3	91.0	94.3	94.4	.....
Hamilton.....	3.3	79.0	88.5	81.5	.....
Winnipeg.....	3.3	85.3	88.2	92.6	85.2
Vancouver.....	2.7	91.1	98.1	87.7	79.9

### The Manufacturing Industries

Without exception, employment in the various divisions of manufacturing showed a downward tendency; some 39,200 persons were released in the shutdowns over the holidays and for inventories. Many of these closings would be of brief duration. The iron, steel, lumber and textile industries recorded the most marked declines, affecting in each case between 6,000 and 9,600 workers. The contractions in meat packing, leather, boot, shoe, pulp, paper, rubber, tobacco, brick, glass, cement, and non-ferrous metal factories also were large, although they were less extensive than in the industries enumerated above. Reports were tabulated from 3,765 manufacturers employing 395,371 persons as compared with 434,617 in the month before. This decrease of 9 per cent was somewhat smaller than that registered at the beginning of January, 1923, when the manufacturers making returns let out over 47,000 persons or 10.9 per cent of the payroll. The index number during the month being reviewed stood slightly higher than at the beginning of the year 1923 or 1921, and a good deal higher than on January 1, 1922.

ANIMAL PRODUCTS—EDIBLE. — The volume of employment afforded in dairies, meat packing and slaughtering establishments and in fish smoking and curing was considerably less than at the beginning of December. According to returns from 136 firms in the edible

animal product industries, they employed 12,256 persons as compared with 13,532 in the month before. This was a decline of slightly over 9 per cent, of which the greater part was recorded in Ontario. The tendency in all provinces, however, was unfavourable. The downward movement repeats that experienced at the corresponding period of last year, when the index number stood very slightly higher.

**FUR PRODUCTS.**—Fur factories shared in the general contraction, 142 persons having been released by the 23 employers reporting. Firms in Quebec registered a large share of this decrease of 10.8 per cent. A somewhat similar reduction in personnel had been reported at the beginning of January, 1923, but the level of employment then was rather higher than at the present time.

**LEATHER PRODUCTS.**—Statements were tabulated from 202 manufacturers of leather goods, whose staffs comprised 16,410 workers as compared with 17,944 at the beginning of December. About 75 per cent of this decrease of 8.5 per cent occurred in boot and shoe factories, but plants manufacturing miscellaneous leather goods were also slacker. The leather industry is largely centred in Quebec and Ontario; these two provinces, therefore, registered the bulk of the decline. At the beginning of January, 1923, contractions on a somewhat smaller scale had been indicated by the reporting firms, and the situation then was more favourable than during the period under review.

**LUMBER AND PRODUCTS.**—A further reduction of over 15 per cent was indicated in the employment afforded in the lumber industry. Extensive recessions had also been recorded at the same time last year, when the index number was somewhat higher. An aggregate working force of 37,414 persons was shown by the 695 employers making returns for January 1, 1924; they had employed 44,476 in the last report. Firms in all provinces except the prairie provinces shared in the contractions, but those in Ontario were the largest.

**MUSICAL INSTRUMENTS.**—The production of musical instruments showed a falling off at the beginning of January. Reports were tabulated from 38 concerns, whose staffs diminished from 3,025 on December 1 to 2,676 at the beginning of January. This decrease of 11.5 per cent was reported mainly in Ontario. Activity at the same period of last year had also declined to some extent, but employment then was in greater volume than at the present time.

**PLANT PRODUCTS—EDIBLE.**—Activity in all branches of this industry showed curtailment. Especially heavy decreases were reported in biscuit, chocolate, confectionery, sugar and syrup works, and in fruit and vegetable canneries, while flour, cereal, starch and glucose factories were also slacker. All provinces shared in the downward movement, but the losses in Ontario were heaviest. The 290 manufacturers making returns in the edible plant industry reported a combined payroll of 23,341 persons as compared with 27,562 in the month before. There was, therefore, a decrease of 15 per cent, which was rather less than that recorded during the corresponding period of last year. The index number then stood slightly lower than at the present time.

**PULP AND PAPER PRODUCTS.**—The downward movement in employment in this division that commenced at the end of October continued with unabated force during December, until at the beginning of January, 1,746 persons were released by the 448 firms making returns. Their working force comprised 50,282 persons or 3.4 per cent less than on December 1. This decrease was largely confined to mills in Quebec, Ontario and British Columbia. Within the group the most pronounced shrinkage was indicated in pulp and paper mills, but the production of paper goods also showed a substantial loss. Contractions effecting practically the same number of workers had been reported during the corresponding period of last year, but the situation then was rather less favourable than on January 1, 1924.

**RUBBER PRODUCTS.**—The trend of employment in this industry was downward, but considerable recovery may be expected in the next report. Statements tabulated from 31 manufacturers showed that their payrolls of 9,897 persons on December 1 had declined to 8,287 at the beginning of January. This recession of 16 per cent was reported almost wholly in Quebec and Ontario, where plants producing rubber footwear and tires were slacker. Very slightly larger decreases had been indicated early in January, 1923, when the index number stood about a point higher.

**TEXTILE PRODUCTS.**—Thread, yarn, cloth, hosiery, knitting, garment and personal furnishing factories reported substantial curtailment of operations at the beginning of January. All provinces shared to some extent in this reduction. An aggregate working force of 64,361 persons was reported by the 570 textile firms making returns, who had employed 70,755 workers in the month before. This decline of 9 per cent slightly exceeded that recorded during the corresponding period of 1923, when conditions had been rather more favourable than at the present time.

**TOBACCO, DISTILLED AND MALT LIQUORS.**—According to reports from 99 manufacturers in this division, 10,258 persons were employed as compared with 11,731 at the beginning of the month before; this indicated a contraction of 12.6 per cent. The greater part of the reduction occurred in tobacco works in Quebec, but there were also losses in Ontario. Employment in this industry had declined more abruptly during the corresponding period of last year, and the index number stood considerably lower than at the present time.

**CHEMICALS AND ALLIED PRODUCTS.**—There was a downward tendency in the employment afforded in this industry at the beginning of January, when 262 persons or 3.8 per cent were released by the 115 firms making returns. Their payrolls aggregated 6,546 persons as compared with 6,808 workers on December 1. The decline occurred mainly in factories turning out drugs, medicines

and pharmaceutical preparations in Ontario. A somewhat larger reduction in personnel had been indicated at the same period of last year, when the index number stood very slightly lower.

**CLAY, GLASS AND STONE PRODUCTS.**—Further extensive losses were reported in this division at the beginning of January, chiefly in brick and other clay products works. Glass and stone plants also recorded some curtailment. The contraction was registered very largely in Quebec and Ontario, although all provinces shared in the downward movement. Returns were compiled from 116 manufacturers employing 7,829 persons as compared with 9,250 on December 1. This was a decline of over 15 per cent. The recessions reported on January 1, 1923, had affected a slightly smaller number of persons, and employment then was in rather greater volume than during the period being surveyed.

**ELECTRIC CURRENT.**—Another though small reduction in personnel was indicated by the 87 firms making returns in this group. Their payrolls, standing at 10,931 persons, were smaller by 173 or 1.6 per cent than in the month before. There were slight losses in all provinces except British Columbia. The tendency at the same period of last year had also been retrogressive, and activity then was not quite as great as at the present time.

**ELECTRICAL APPARATUS.**—The volume of employment afforded in this industry showed a slight falling off on the whole in spite of improvement in Quebec. The decrease was registered mainly in Ontario. Reports were received from 33 concerns in this division with a total payroll of 8,437 persons as compared with 8,615 at the beginning of December. This decline of 2 per cent slightly exceeded that recorded at the same time last year, although the index number on January 1, 1924, stood about 20 points higher.

**IRON AND STEEL PRODUCTS.**—General contractions were reported in the iron and steel industry at the beginning of January. The most important reductions were registered in railway car

shops, but the losses in rolling and forging mills, automobile, heating appliance, iron and steel fabrication, agricultural implement, machinery, sheet metal and other iron and steel works were also large. All provinces except British Columbia shared to some extent in the recessions, but firms in Ontario recorded nearly half of the total loss. An aggregate working force of 111,563 persons was indicated by the 627 firms making returns, who had employed 121,173 persons in the preceding month. The difference represented a decline of 7.9 per cent. During the corresponding period of last year curtailment of operations on a very much larger scale had been indicated, and the index number stood about 8 points lower than at the present time.

**NON-FERROUS METAL PRODUCTS.**—Lead, tin, zinc, copper, gold, silver and platinum works were less fully employed than at the beginning of December; 1,218 persons were released by the 110 firms reporting, a contraction of 10.3 per cent. Their payrolls comprised 10,617 persons as compared with 11,835 in the month before. The bulk of this decrease occurred in Quebec and Ontario. The tendency in the corresponding period of the year before had also been downward; the shrinkage had affected a rather larger number of workers than that reported on January 1, 1924. The situation then was not so favourable as for the month under review.

**MINERAL PRODUCTS.**—Another and larger reduction in personnel was indicated in the mineral products industries at the beginning of January, chiefly in Quebec, but to some extent in all provinces. The contraction affected very much the same number of persons as that indicated on January 1, 1923, when the index number stood some 4 points lower than at the present time. Statements for the month under review were received from 72 manufacturers employing 8,689 persons as compared with 9,064 on December 1. This decrease of 375 workers represented 4 per cent of the pay-roll.

**MISCELLANEOUS MANUFACTURING INDUSTRIES.**—Roofing, broom, umbrella and photographic appliance works in Quebec and Ontario were rather less fully employed than in the month before. Reports tabulated from 62 firms in the miscellaneous manufacturing industries group showed that they employed 3,604 persons as compared with 3,743 at the beginning of December.

#### **Logging**

Considerable improvement was reported by logging camps; the increases were very much larger than those recorded during the same period of the previous year, and to some extent reflected activity due to the late snowfalls. According to returns from 230 firms, they enlarged their pay-rolls from 31,785 persons on December 1 to 35,489 for the period being reviewed. This increase of 11.7 per cent was fairly generally distributed over the country except in British Columbia, where there was curtailment. The situation was better than at the beginning of the year 1923.

#### **Mining**

**COAL MINING.**—Very large reductions in employment in coal mining were indicated in the maritime provinces. There were fair sized increases in the prairie provinces and British Columbia, but these were not sufficient to offset the declines in the Nova Scotian coal fields. The pay-rolls of the 93 operators reporting aggregated 28,778 persons as compared with 30,340 on December 1. During the corresponding period of last year a very slight falling off in employment had been registered, and the index number then stood very much higher than at the present time.

**METALLIC ORES.**—For the first time in the twelve months, employment in this division showed a decline, which, however, was somewhat smaller than that recorded on January 1, 1923, when the situation was not so good. Statements for the period under review were tabulated from 45 concerns employing 12,278 persons as compared with 12,398 on December 1. The difference was a

decrease of 1 per cent, which was reported in British Columbia. In Ontario improvement was registered.

**NON-METALLIC MINERALS (OTHER THAN COAL).**—Continued seasonal reductions were recorded in asbestos mines in Quebec and in stone quarries and salt mines in Ontario. According to reports from 64 employers in this division, their staffs declined from 6,236 on December 1 to 5,526 during the period under review. This contraction of 11.4 per cent was larger than that registered at the beginning of 1923, when the situation was less favourable than in the month being surveyed.

**Communication**

Employment in the communication group showed a further slight decline. This repeats the downward movement indicated at the beginning of January, 1923, although the losses then affected a larger number of persons and the index number was on a slightly lower level. The losses in the telegraph and telephone divisions were about the same size, and were the result of slight curtailment in all provinces except British Columbia. An aggregate pay-roll of 21,216 persons was indicated by the 160 firms making returns who had employed 21,543 persons in the preceding month. There was, therefore, a decrease of 1.5 per cent.

**Transportation**

**STREET RAILWAYS AND CARTAGE.**—The number of persons employed in this division was smaller than in the month before. Reports compiled from 106 firms showed that their pay-rolls declined from 20,884 at the beginning of December to 19,887 on January 1. A large share of this reduction of 4.8 per cent was reported in Ontario and Quebec. Employment during the corresponding period of last year had shown a more extensive decline and the situation then was not as favourable as on January 1, 1924.

**STEAM RAILWAYS.**—According to returns from 102 concerns and divisional superintendents in the steam railway

operation division, there was a decline of 3.6 per cent in the employment they afforded. Their working forces aggre-

gated 79,234 persons as compared with 82,194 in the preceding month. In the Maritime Provinces there were decided gains in railway transportation, owing to the resumption of operations at the winter ports. In the remaining provinces, however, decreases were reported, those in the prairie provinces and Ontario being extensive. The reductions registered on January 1, 1923, affected a slightly smaller number of persons, but employment then was not in as great volume as during the period under review.

**SHIPPING AND STEVEDORING.**—Seasonal movements had a considerable influence upon employment in shipping and stevedoring at the beginning of January; activity at the winter ports had a beneficial effect upon the situation in the maritime provinces, while the closing of the summer ports continued to cause substantial declines in personnel in Quebec and Ontario. In British Columbia there were also reductions in pay-roll. A combined working force of 9,450 persons was reported by the 60 concerns making returns, who had employed 11,910 workers on December 1. The difference represented a contraction of 20.7 per cent. Very much heavier declines had been recorded during the corresponding period of the previous year, and the index number of employment then was higher.

#### Construction and Maintenance

All three branches of the construction and maintenance division reported curtailment. The losses in building construction affected approximately 5,700 persons or 23 per cent of the pay-roll; those in railway construction involved the release of about 4,600 workers or 15 per cent, while some 3,800 persons were let out from employment on road construction, a contraction of 42 per cent. Statements were tabulated from 418 concerns in the construction division with a combined pay-roll of 50,832 per-

sons as compared with 64,937 on December 1. This was a group decline of 21.7 per cent. Activity in all three branches of construction showed a falling off in every province. Recessions on a slightly smaller scale had been indicated by the firms making returns for the same period of last year, when the index number was a few points lower than at the present time.

#### Trade

The index number of employment in retail trade was higher on January 1, 1924, than at the beginning of any month of 1923, standing over a point above the peak of last year, which also occurred on January 1. Wholesale trade, however, was not as busy during the month under review as at the beginning of December. In the trade group 554 employers reported that their pay-rolls, aggregating 58,671 persons, were larger by 1,243 workers or 2.2 per cent than on December 1. There were increases in retail trade in all provinces except British Columbia and the maritime provinces, where there was some curtailment following Christmas. In wholesale trade there was a generally downward tendency throughout the country.

The table on page 147 gives the index numbers of employment by industries as on January 1, 1924, December 1 and January 1, 1923, January 1, 1922 and 1921. The first column shows the proportion of employees in each industrial group in relation to the total number of workers reported in all groups for the month under review. (Number of workers employed in January, 1920, equals 100).

The Board of Control of the City of Ottawa promised to consider a proposal made to them early in February by the Ottawa Trades and Labour Council that in future all labour employed by the city should be engaged through the Government Employment Bureau.

## UNEMPLOYMENT IN TRADE UNIONS DURING THE QUARTER ENDING DECEMBER 31, 1923, AS REPORTED BY UNIONS MAKING RETURNS

**T**HE present article on unemployment among members of trade unions deals with the situation reported during the quarter ending December 31, 1923. Due to seasonal inactivity the volume of employment as reported by trade unions has been steadily declining since the end of September, the percentage out of work at that date being 2.0 as compared with percentages of 4.8 on October 31, 6.2 on November 30, and 7.2 on December 31, 1923. The percentage out of work at the end of December, 1922, was 6.4 or .8 per cent less than at

have reference only to the organizations reporting.)

The accompanying chart shows the curve of unemployment as reported by trade unions by quarters for 1916-17-18 and by months for 1919-20-21-22-23. The curve which has been projecting favourably each month since March of last year took a sharp turn during the quarter under review and followed a course parallel to that of the corresponding quarter of 1922.

In October, all provinces reported less activity than in the previous month, the

the close of the quarter under review. (Unemployment as used here has reference to involuntary idleness due to economic causes. Persons engaged in work other than their own trades, or who are idle because of illness, or as a direct result of strikes or lockouts are not considered as unemployed. As the number of unions making returns varies from month to month with consequent variation in membership upon which the percentage of unemployment is based, it should be understood that such figures

largest percentage decrease being shown in Quebec, due to lessened employment for garment workers.

In November Nova Scotia was the only province to register improvement over October. Of the provinces reporting decreases those in Quebec and Alberta were the most pronounced.

During December, New Brunswick, Quebec and Alberta registered improvement over November, but in the other provinces more unemployment was shown.

Table I on this page summarizes the returns by provinces and table II on page 151 shows the percentages of unemployment reported in the different groups of industries.

In October fishermen were much better employed than in the same month of last year. The situation in the manufacturing industries was not so favourable, garment workers, printing tradesmen and wood workers all reporting more unemployment. Iron and steel and glass workers, however, were more fully engaged. Building tradesmen reported a slightly lesser volume of employment. A nominal change only was registered by transportation workers.

Luring November the manufacturing industries reported slight improvement over the corresponding period of last year. Cigar and tobacco workers, bakers, paper makers, glass and leather workers were better employed, but the improvement registered was almost counterbalanced by lessened activity for printing tradesmen, garment and wood workers. Employment for fishermen was on a considerably higher level, but less work was afforded both building and transportation workers.

In December the percentage out of work in the manufacturing industries was slightly less than in the same month of last year, paper makers, printing tradesmen, iron and steel, glass and woodworkers all reporting more employment. Textile and garment workers, however, were not so fully engaged. In the mining, building and transportation groups employment was on a lower level. Fishermen were considerably better employed.

The accompanying tabulations (table III) show in some detail the returns for the month ending December 31, 1923. Reports were received from 1,532 labour

organizations with an aggregate membership of 162,313 persons, of whom 11,767 or a percentage of 7.2 were out of work. The table also gives the general percentages of unemployment in the various trades and industries for October and November.

## EMPLOYMENT OFFICE REPORTS FOR DECEMBER, 1923

THE volume of business transacted by the offices of the Employment Service of Canada during the month of December, 1923, declined considerably from the preceding month, although maintaining on the whole the same relative position as during December, 1922. The accompanying chart, which presents the returns from the offices on the basis of daily averages over half-month periods, shows a continuation of the downward trend of vacancies and placements until the middle of December, 1923, when a slight upward movement is indicated. The curve of applications shows a decided decline throughout the month, although, together with the curves of vacancies and placements, it did not drop so far as during the same period of 1922.

The reports from the offices show that the average number of applications reported daily during the first half of December was 1,572 as compared with 1,618 during the preceding period and with 1,403 during the same period of the previous year. Applications for work averaged 1,259 daily during the latter half of the month as compared with 1,219 in December, 1922. The number of vacancies reported by employers to the Service averaged 936 daily during the first half and 972 during the latter half of December in comparison with 952 and 1,007 during the same month of the previous year. Vacancies averaged 1,073 daily during the latter part of November, 1923. The average number of placements effected during the first half of December was 860, of which 622 were in regular employment and 238 in casual work, as compared with a total average of 1,046 during the preceding period, and with 853 during the corresponding period in 1922. During the latter half of the month placements and 365 in casual work) in contrast with 821 during the same period of the previous year.

The following table gives the placements effected to date by the offices of the Employment Service:—

Year	Regular	Casual	Total
1919 (10 months).....	268,001	37,904	305,905
1920.....	366,547	79,265	445,812
1921.....	280,518	75,238	355,756
1922.....	297,827	95,695	393,522
1923.....	347,165	115,387	462,552

During the month of December the number of references to employment totalled 23,287 while the placements effected were 22,151. Of these, those in regular employment numbered 14,677, of which 12,337 were of men and 2,340 of women, while the placements made in casual jobs totalled 7,474. The number of applications for work registered at the offices was 35,559 of which 28,063 were of men and 7,496 of women. Opportunities for work numbered 17,034 for men and 6,799 for women, a total of 23,833.

Placements in regular employment by provinces were as follows:—Nova Scotia 285 men, 57 women; New Brunswick 265 men, 86 women; Quebec 542 men, 321 women; Ontario 5,324 men, 798 women; Manitoba 1,677 men, 301 women; Saskatchewan 1,641 men, 289 women; Alberta 1,272 men, 315 women; British Columbia 1,331 men, 173 women.

### MARITIME PROVINCES

The mild weather and the holiday season hindered logging operations in the Maritime provinces, there being a decided falling off in the calls for bushmen and wood-choppers. Experienced tie-makers were in demand though few workers were available. Construction work was at a standstill in most centres, and to offset the increased number of workers registered at the offices several municipalities had started work on sewers and water mains. At St. John a large number of rough carpenters were

required, and at Halifax harbour work kept many labourers employed. The Moncton office reported a few vacancies for casual jobs at snow shovelling for the railways, etc. The demand for women domestics continued very active, the situation being somewhat eased by several applicants brought in from the Old Country.

QUEBEC

The offices in the province of Quebec reported very few vacancies for work on farms. The construction group was fairly active, outdoor labour being less in demand, with a number of vacancies registered for plasterers, carpenters and steamfitters. A marked reduction was recorded in the logging group, although the transfer of numbers of men to the camps in Ontario and Quebec continued from Montreal and Hull. The calls for domestic servants were met with difficulty.

ONTARIO

The offices in Ontario reported an increased number of unemployed workers registered due in part to the cessation of work on roads and highways. Owing to the continued mild weather, however, other branches of the construction group

remained active with several vacancies offering. The policy of former years, of the construction of storm sewers, water mains, etc., was continued by many municipalities with a resulting betterment in the employment situation. At Belleville, Kingston, Ottawa and St. Thomas, carpenters, plasterers and inside finishers were in demand, and few skilled building workers were unemployed. Labourers were required in considerable numbers for power house and dam construction and for railway rock cutting near North Bay, Sault Ste. Marie, Timmins and Cobalt. Slackness was reported in the logging group due to the holiday season and also in some measure to unfavourable weather conditions. The heavy fall of snow toward the latter part of the month tended to increase the requirements in this group. The offices at Fort William, Port Arthur, Ottawa, North Bay and Timmins sent many men to the camps. At the lake ports the number of those out of work had increased considerably due to the close of navigation, but at Sarnia it was reported that ship repairing, etc., would employ many workers. The manufacturing industries were quiet with slight increase in the number of temporary positions offered to women workers.

The demand for domestic help remained about the same from week to week, but few experienced women were registered at the offices and a scarcity of cook generals was reported.

#### MANITOBA

Curtailed activities were shown in the agricultural group, the declining demand for workers being met fairly satisfactorily. In the construction groups there were more applicants registered than could be readily absorbed by the work offered. A number of municipalities had under way several short jobs such as repairs to sewers and streets, which materially relieved the situation. While little railway maintenance or construction work was in progress, the office at Winnipeg had placed a number of labourers for station work. Little movement was reported in the logging group but the cold weather toward the latter part of the month was reflected in the increased demand for general bushmen for the camps in the Northern part of the Province and in Ontario. There was slight difficulty in securing experienced tie-makers. The calls for urban women workers remained steady with a declining demand for workers for the rural sections.

#### SASKATCHEWAN

A comparatively small demand for farm workers was shown at the offices with sufficient applicants to supply all needs. Very little work for married couples was offered on farms. Although no work was available in the building group few tradesmen and mechanics were unemployed. Several calls for elevator carpenters were received and filled. Railway construction workers, steel gangs and section labourers, were placed in small numbers from the offices at Moose Jaw, Saskatoon and Swift Current though railway maintenance work had fallen off since the approach of colder weather. Logging operations were not very brisk, although a slight increase in the number of orders for experienced bushmen was noted toward the end of the month. The mining group was quiet, at Estevan a slight increase in demand was shown. A shortage of

experienced women applicants was reported from the Regina and Saskatoon offices.

#### ALBERTA

While a marked falling off was shown in the number of vacancies in the building and construction groups, as yet there was slight increase in the number of registrations for work. Occasional calls were received at Drumheller and Medicine Hat for labour for work on the completion of civic sewers and other public projects. Placements of men on farms continued in approximately the same number as reported during November, vacancies offered showing a slight decline. Weather conditions were responsible for a decided slackness in the demand in the logging group, although difficulty was experienced in supplying tie-makers for camps in Alberta and British Columbia.

#### BRITISH COLUMBIA

Continued contraction was shown in the construction group, although at Fernie, Kamloops, Nanaimo and Nelson, power house construction, bridge building and road work was still in progress. In some sections all outdoor work was completed, the calls for workers being mainly for residential repair jobs and other casual work. The registrations of building tradesmen had increased considerably during the month. Workers for the majority of the logging camps were not required until after the holiday, when, if colder weather set in, expansion was anticipated. The calls for experienced tie-makers were met with difficulty. Increased registration of applicants was noted, due in some measure to the number of longshoremen and dock labourers who had registered and were placed from the offices, especially at Vancouver. There was a small demand for men for the mines at Cranbrook. Calls for domestic workers were less in number than during the preceding month.

#### Movement of Labour

During December, 1923, the offices of the Employment Service of Canada made 14,667 placements in regular em-

ployment, of which 9,322 were of persons for whom the employment found was outside the immediate locality of the offices at which they were registered. Of these latter 2,560 were granted the Employment Service reduced rate, 1,666 travelled to points within the same province as the despatching office and 894 to other provinces.

The offices in Quebec issued 210 certificates during the month, 179 to bushmen going to lumber camps near Sault Ste. Marie and North Bay, Ont., 31 bushmen to camps near Montreal and Quebec. Of the 609 persons who benefited by the Employment Service reduced rate in Ontario, 31 were bushmen transferred from Ottawa and Pembroke to camps in the Hull, Que., zone, and 3 were coalminers going from Kitchener to Moncton, N.B. The provincial transfers numbered 575, of which 3 were riveters going from Hamilton to Kingston, 5 were machinists from Toronto to Timmins, 2 were carpenters from Toronto to Port Arthur and one machine operator and 2 bricklayers travelling from Pembroke to Timmins. The remaining certificates were issued to bushmen going to camps in the vicinity of Sudbury, Pembroke, North Bay, Sault Ste. Marie and Port Arthur. In Manitoba 730 transfers at the reduced rate were effected, of which 96 were of persons going to points within the province, 537 to points in Ontario and 97 to Saskatchewan offices. The workers sent to the latter province include 2 farm workers, one hotel worker, 4 cooks and 90 bushmen going to Prince Albert, Regina, Saskatoon and Yorkton. To the districts near Port Arthur, Fort William and Timmins, Ontario, were sent station men, teamsters, sawyers, cooks, waitresses and more than 420 bushmen. From the office at Winnipeg more than 60 farm workers were sent to surrounding districts, while bushmen, several blacksmiths, one hotel cook and 3 teamsters were transferred at the reduced rate to points within the province. Saskatchewan offices despatched 631

persons to points within the province and 5 to other provinces. From Regina one electrician was sent at the reduced rate to Timmins, Ont.; from Saskatoon, one bushman travelled to Port Arthur, Ont. Two bushmen were transferred from Saskatoon to Dauphin, Man., and from Regina one domestic was sent to employment at Prince George, B.C. Of the provincial transfers 583 were of bushmen and tie-makers going to camps near Prince Albert, 30 were of farm hands from Moose Jaw, Regina and Saskatoon, four were of elevator carpenters and the remainder were of women domestics going to employment in the rural districts. Of the 189 workers travelling at the reduced rate from Alberta offices, 40 were bushmen going from Edmonton to Prince George, B.C., one was a farm hand going to North Battleford, Sask., and one a cook to Saskatoon. In addition the Edmonton office issued certificates to 116 workers, including bushmen, sawyers, teamsters, one miner, and a few household workers going to points within the province. From Calgary 9 farm hands were placed at a distance and 17 bushmen were sent to camps near Lethbridge and Edmonton.

British Columbia offices granted 186 certificates to workers going to points within the province, of which 130 were to bushmen, tie-makers, swampers, etc., going to the vicinity of Prince George, Prince Rupert and Kamloops. From Vancouver 18 machine miners and 12 mine labourers were sent to work at Nelson, 2 carpenters to Fernie and 2 cooks to points within the zone. From Prince Rupert were sent 9 miners, 2 flunkies, 9 railway construction labourers, 1 steel sharpener and one cook to various points within the zone.

Of the 2,560 persons benefiting by the Employment Service reduced rate 1,938 were carried by Canadian National Railways, 617 by the Canadian Pacific Railway, 4 by the Temiskaming and Northern Ontario Railway and one by the Pacific Great Eastern Railway.

## REPORT OF THE EMPLOYMENT SERVICE OF CANADA DURING THE PERIOD OCTOBER-DECEMBER, 1923

A REVIEW of the activities of the offices of the Employment Service of Canada during the last quarter of the year 1923 indicates that a greater volume of business was transacted during this period than in the corresponding quarter of the year 1922; the gains being approximately six per cent in the number of applications for employment, nine per cent in the number of opportunities for employment offered, and eight per cent in the number of placements effected. These gains are mainly attributable to increased activity in bush work, where some 7,000 more placements were effected than during October-December, 1922. Placements in farming and transportation were about 3,500 and 1,400 higher respectively, while the manufacturing industries absorbed about 2,600 persons less than during the corresponding quarter of the previous year. These improved conditions, for the quarter under review over the corresponding period of the previous year, repeat the favourable comparison which has been reported for each of the preceding quarters of 1923, and give an increase for the whole year over 1922 of over fifteen per cent in opportunities for employment, seven and one-half per cent in the number of applicants seeking employment, and seventeen and one-half per cent more placements effected. The total placements for 1923 equalled 462,552 and exceed by nearly 17,000 the best year previously since the Service was established, which was in 1920 when 445,812 placements were made.

From the chart on page 157, which accompanies the article on the work of

the employment offices for December, it will be noticed that during the first half of October a sharp upward movement was recorded, due to heavy placements of threshing hands in the prairie provinces. A decrease similar to that of September is recorded during the latter half of the month. This downward movement was continued in November and during the first half of December, but a recovery in vacancies and placements is recorded during the last half of December.

During the period October-December the offices reported that they had made 114,373 references to positions and had effected a total of 109,377 placements, 86,286 of which were in regular employment (77,422 men and 8,864 women) and 23,091 in work of one week's duration or less. During the same quarter of 1922 placements effected totalled 101,402. Vacancies notified by employers to the Service totalled 120,299, of which 96,141 were for men and 24,158 for women, as compared with a total of 110,590 vacancies during the same period of the previous year. The number of applications for employment registered at the offices was 148,240 (119,377 of men and 28,863 of women) in comparison with 140,070 during the last quarter of 1922.

The accompanying table gives the vacancies and placements by industries of the offices of the Employment Service of Canada in the various provinces during the period October-December, 1923. Elsewhere in this issue will be found a report in detail of the transactions of the employment offices for the month of December, 1923.

## BUILDING PERMITS ISSUED DURING DECEMBER, 1923

THE value of the building permits issued during December showed a reduction of 13.7 per cent from the November, 1923, level and of 26.8 per cent from the level of December, 1922. The estimated value of building authorized by 56 cities during the month under review, according to returns tabulated by the Dominion Bureau of Statistics, was \$6,906,650, whereas in the preceding month the total had stood at \$8,006,601 and in December, 1922, at \$9,436,867.

In New Brunswick and Ontario there were very slight increases in the value of the building permits issued as compared with November, 1923, but in all other provinces there were decreases. The declines of \$562,559 or 22 per cent in Quebec and of \$408,525 or 89.4 per cent in Manitoba were much the largest.

As compared with the returns for December, 1922, Prince Edward Island, Manitoba and British Columbia recorded increases; that of \$446,489 or 182.9 per cent in the last named province was the most pronounced. Of the reductions in the remaining provinces, those in Quebec of \$1,956,207 or 49.5 per cent and in Alberta of \$1,414,925 or 98.1 per cent were the largest.

Toronto and Vancouver registered slight increases in the value of building permits issued as compared with November, 1923, and December, 1922. In Montreal there were declines in both comparisons, while in Winnipeg the value of estimated building was considerably less than in November, but very slightly higher than in December, 1922. The value of the building authorized in Sherbrooke, Fort William, Kingston, Oshawa, Ottawa, Peterborough and St. Catharines was greater than in November, 1923, and December, 1922.

The value of the permits issued during December, 1923, was smaller than during 1922, but it was in excess of the value for 1921. The total for 1923, based upon unrevised figures, was \$130,239,885, as compared with aggregates of \$144,980,388 and \$114,423,974 in 1922 and 1921, respectively. The latter figures are compiled from revised statements furnished by city officials.

The accompanying table shows the value of the building permits issued during December, 1923, as compared with November, 1923, and December, 1922. The 35 cities for which records are available since 1910 are marked by asterisks.

**BUILDING PERMITS ISSUED IN CANADA DURING 1923**

**A**CTIVITY in building, as indicated by statistics of building permits tabulated by the Dominion Bureau of Statistics, was somewhat less in 1923 than during 1922, but much greater than in both 1921 and 1920. According to revised statements furnished by municipal officials, the value of building authorized in 56 cities during 1923 was \$129,906,946; in 1922 it was \$144,980,388; in 1921, \$114,423,974, and in 1920, \$114,239,273. There was, therefore, a decline of 10.4 per cent as compared with 1922, but increases of 13.5 and 13.7 per cent, respectively, as compared with 1921 and 1920. Table I on page 166 gives the value of building permits issued in these cities during the last four years.

An analysis of the returns by provinces shows that the value of the building permits issued in Quebec and Ontario was higher than in 1922, 1921 or 1920. The former province, with a total of \$35,483,853, registered increases of 17 per cent, 23 per cent and 63 per cent, respectively, over those years. In Ontario there was a decrease of 9.0 per cent as compared with 1922, but a gain of 24.4 per cent over 1921 and of 27.2 per cent over 1920. The aggregate for the province in 1923 was \$71,378,679. In Ontario reports were furnished by 26 cities; these centres granted permits for approximately 55 per cent of the total value of the permits issued in the 56 cities. In Nova Scotia, New Brunswick, Manitoba, Saskatchewan and Alberta there were considerable declines as compared with the three preceding years. In British Columbia the volume of building authorized was less by 23 per cent than in 1922, but it exceeded the totals for 1921 and 1920 by 17 and 48 per cent respectively. The six cities in Quebec reported some 27 per cent of the aggregate for the 56 cities, while nearly 9 per cent of the total was registered in British Columbia.

The largest aggregate of building permits issued in any one city was again reported in Toronto, with a total of

\$30,609,227. The value of authorized building in 1922 was \$35,237,927, which was 13.1 per cent higher than in 1923. The value for last year, however, exceeded that for 1921 and 1920 by 28 per cent and 19 per cent, respectively. Montreal recorded the next largest total with estimated building to the value of \$27,125,863. This was higher by 28, 27 and 93 per cent than in 1922, 1921 or 1920, respectively. In the township of York (a suburban area adjoining Toronto) the value of authorized building aggregated \$8,921,650, which was the third largest total in the Dominion. The value there was rather less than in the year before, although it exceeded the figures for both 1921 and 1920. Considerable activity was shown in Vancouver, where the estimated value of building totalled \$6,277,574. This was 28 per cent less than in 1922, but permits then had been exceptionally high on account of authority having been granted for the construction of a government pier at a cost of some \$5,000,000. The total for Vancouver in 1923 was 106 per cent higher than the aggregate for 1921 and 76 per cent above the total for 1920. The city of Hamilton, with permits issued to the value of \$5,452,930, took fifth place in the record of individual cities. This total was higher than in any of the three preceding years. Quebec, Windsor and Winnipeg came next in order; the permits issued in each of these cities were valued at between four and five millions. In the last named centre the total in 1923 was lower than in 1922, 1921 or 1920. Building to the value of over a million was recorded in Ottawa, London, Port Arthur, Point Grey, Westmount, Oshawa, Kitchener, Edmonton, Fort William, Regina and Victoria.

A review of the reports by months shows that the highest total was recorded in April, when the permits issued were valued at \$19,207,171. This was 15 per cent of the total for the 12 months. During the following eight months the value of building author-

ized showed successive contractions. During 1922 the largest aggregate (\$19,312,716) was recorded in May.

Reports as to the number and value of permits for houses, other buildings and engineering contracts were furnished by a number of cities. Forty-four centres made returns showing that they had issued permits for some 12,900 dwellings, valued at approximately \$56,906,000; this would indicate an average estimated cost of about \$4,400 per dwelling. The number of permits issued for other buildings, including garages, stables, stores, factories, etc., was almost 22,200, valued at nearly \$52,543,000. The estimated cost of these buildings, therefore, averaged about \$2,400. In addition, permits for some 200 engineering projects at a valuation of more than \$4,500,000 were granted.

Table II on page 167 shows the value by provinces of building permits issued during the years 1910-1923 in the 35 cities originally used in these tabulations. In Table I these cities are marked

by asterisks. The average index numbers of prices of building materials compiled by this bureau are shown for each year since 1913 at the foot of Table II.

While the total for the 35 cities in 1923 (\$111,174,325) was 9.4 per cent lower than in 1922, it was higher than in any other year since 1913. Building during the four years 1910-1913 was on an exceptionally high level; prices then were very much lower than in recent years and the total of building permits indicated an extremely large amount of actual building. As was pointed out in the review for 1922, immigration during the period 1911-1913 was on an unusually high level and part of the enormous volume of building indicated then by building permits was necessary to meet the housing requirements of the immigrants.

Activity in the central provinces has been well maintained during the last two years; the total for Quebec in 1923 (\$35,358,863) is slightly higher than the previous high mark of the record, which occurred in 1913. Permits in that

year were issued to the value of \$34,-893,449. The aggregate for Ontario during 1923 and 1922 exceeded the total for any other year of the record.

The three prairie provinces showed a pronounced falling off in building activity as compared with earlier years. In 1923 the seven cities for which statistics are recorded in that district, issued permits to the value of \$9,383,620, while in 1912, the peak year, the authorized building was estimated at \$77,548,756. This was 88 per cent higher than in 1923. During the war, however, building was on a considerably lower level in the prairie provinces than in recent years. The 1923 total exceeded that for 1915 by over six millions or about 224 per cent.

In British Columbia the value of the permits issued in 1923 was less than in

1922 this, as has already been pointed out, was due to the fact that a permit was granted in the latter year for a government pier in Vancouver at an estimated cost of \$5,000,000. The total for the year under review was \$7,678,-582 as compared with \$10,026,749. This was a decline of 23 per cent. The highest total recorded in the fourteen years by the three British Columbian cities making returns was \$29,090,352 in 1912; this was greater than in 1923 by 74 per cent.

Activity in Nova Scotia attained its highest level in the period immediately succeeding the Halifax explosion of 1918. The total for that province in 1923 was smaller than in any other year of the record. The value of building authorized in New Brunswick was less than in any other post-war year.

## FAIR WAGE CONTRACTS, JANUARY, 1924

**D**URING January the Department of Labour received for insertion in the *LABOUR GAZETTE* the following information relative to twenty fair wage contracts awarded by the Department of Public Works of Canada. Nineteen of the contracts contained the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour employed. The remaining one contained a fair wage schedule.

A statement was also received as to supplies ordered by the Post Office Department, subject to the regulations for the suppression of the sweating system and the securing of fair wages, etc.

### DEPARTMENT OF PUBLIC WORKS

Dredging (Burnham and Merrill wharf and International Coal Mining Company's pier), Pictou, N.S. Name of contractor, Atlantic Dredging Company, Limited, Louisburg, N.S. Date of contract, January 9, 1924. Amount of contract, Class "B" 65 cents per cubic yard (scow measure), and 68 cents per cubic yard, for hard sand and mud (scow measure).

Supply and installation of water main, Lawlor's Island, Quarantine Station, Halifax, N.S. Name of contractor, C. R. Heben & Company, Halifax, N.S. Date of contract, December 19, 1923. Amount of contract, \$4,400.

Construction of wharf, Renata, B.C. Name of contractors, D. C. Fraser, J. G. Webster, and Thomas P. Lean, Nelson, B.C. Date of contract, December 8, 1923. Amount of contract, \$7,295.

Construction of a dam, Craven, Last Mountain, Saskatchewan. Name of contractor, C. G. Anderson, Regina, Sask. Date of contract, December 27, 1923. Amount of contract, unit prices as set forth in contract.

Supply and installation of electric light system in Lazaretto, Tracadie, N.B. Name of contractor, S. R. Leger, Caraquet, N.B. Date of contract, December 12, 1923. Amount of contract, \$5,500.

Construction of public building, Alexandria, Ont. Name of contractors, Ross-Meagher & Company, Ottawa, Ont. Date of contract, January 3, 1924. Amount of contract, \$31,979.

Construction of sewer outfall extension in connection with diversion of Assiniboine River, Portage la Prairie, Man. Name of contractors, Fowler, Young & Holden Company, Limited, Winnipeg, Man. Date of contract, December 27, 1923. Amount of contract, unit prices as set forth in contract.

Construction of boom at Ragged Islands, B.C., and construction of anchorages at Grief Point, B.C. Name of contractors, The Vancouver Pile Driving and Contracting Company, Vancouver, B.C. Date of contract, December 28, 1923. Amount of contract, \$7,282.24.

Extension of wharf, New Westminster, B.C. Name of contractor, Fraser River Pile Driving Company, Limited, New Westminster, B.C. Date of contract, December 27, 1923. Amount of contract, \$2,964.87.

Alteration to public building, Windsor, Ont. Name of contractor, David Hunter, Windsor, Ont. Date of contract, December 31, 1923. Amount of contract, \$4,100.

Construction of bank protection of West Nicomen Island by water matting from toe of bank to 60 feet in Fraser River, B.C. New Westminster District (West Nicomen Island), B.C. Name of contractors, Vancouver Pile Driving and Contracting Company, Limited, Vancouver, B.C. Date of contract, December 28, 1923. Amount of contract, unit prices as set forth in contract.

Construction of wharf and approach, Cocagne Cape, N.B. Name of contractors, John McManus Company, Limited, Memramcook, N.B. Date of contract, December 26, 1923. Amount of contract, unit prices as set forth in contract.

Extension to breakwater, Cannes-de-Roches, Gaspé County, Quebec. Name of contractor, Arthur Nadeau, Chandler, Que. Date of contract, December 19, 1923. Amount of contract, \$2.95 per cubic yard for cribwork full ballasted.

Reconstruction of wharf, Arrow Park, B.C. Name of contractors D. C. Fraser, T. P. Lean and J. G. Webster, Nelson, B.C. Date of contract, December 26, 1923. Amount of contract, \$9,450.

Reconstruction of public floating wharf, Fraser's Landing, B.C. Name of contractors, McCharles & McDougall, Nelson, B.C. Date of contract, December 27, 1923. Amount of contract, \$4,789.50.

Electric wiring and fittings in public building, Emerson, Man. Name of contractors, Star Electric Company, Limited, Winnipeg, Man. Date of contract, December 17, 1923. Amount of contract, \$760.

Reconstruction of portion of old wharf, Rimouski, Que. Name of contractor, Ludger Lemieux, Rimouski, Que. Date of contract, January 22, 1924. Amount of contract, unit prices as set forth in contract.

Wood floor in armoury, Listowel, Ont. Name of contractors, Canadian Engineering and Contracting Company, Limited, Hamilton, Ont. Date of contract, January 27, 1924. Amount of contract, \$2,360.

Construction of a pier, Dartmouth, N.S. Name of contractor, Halifax Dredging Company, Limited, and Standard Construction Company, Limited, Halifax, N.S. Date of contract, January 23, 1924. Amount of contract, unit prices as set forth in contract.

Addition to archives, Ottawa, Ont. Name of contractors, P. Lyall & Sons

Construction Company, Limited, Montreal, Que. Date of contract, January 10, 1924. Amount of contract, \$294,797 and \$4 per cubic yard for extra excavation, \$12 per cubic yard for extra concrete, including forms. The fair wage schedule inserted in the contract was as follows:—

Trade or class of labour	Rate of wages not less than	
	Per hour	Hours per day

## RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received by the Department. Such agreements are summarized each month in the LABOUR GAZETTE. In the majority of cases the agreements are signed by both employers and employees. Verbal agreements, which are also included in the records, are schedules of rates of wages, hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In addition to these, important schedules of wages are summarized, including civic schedules. In the case of each agreement or schedule, the rates of wages for the principal classes of labour are given, with other information of general interest.

### Manufacturing: Printing and Publishing

VANCOUVER, BRITISH COLUMBIA.—PROPRIETORS OF BOOK AND JOB OFFICES AND INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL No. 226.—Agreement to be in effect from October 1, 1923, to December 31, 1924, unless 30 days' notice has been given to reopen same.

Only good standing members of the local to be employed in composing rooms, except in the case of apprentices.

Hours per day, eight; Saturdays, four; and per night, eight hours on five nights and four hours on one night per week. Hours per week, forty-four.

Foremen to be union members and to be paid as agreed between employer and employee.

Wages per week: day work, \$42.00; night work, \$45.50.

Agreement to be extended from year to year if arrangements be made to settle wages and hours by local conciliation or arbitration after December 31, 1924. Provided an arbitration agreement is later arrived at, satisfactory to both parties, the individual employer agrees to become a party to one arbitration proceeding representing the employing printers of greater Vancouver, findings to be binding upon him.

Operators to receive same rate per hour as paid in news offices until December 31, 1925. Machinist operators, \$3 per week in excess of operators' scale. Overtime rate, time and one-half; Sundays and holidays, double time. No journeyman in a job office to be employed for less than one-half day.

Apprentices: One to be employed with eight journeymen; two with more than eight; no office to have more than two such apprentices and one who is in his fifth year of apprenticeship. Apprentices must be at least sixteen years of age. Apprentice to be examined on entrance into office or within three months. An apprentice to work same hours as journeymen, and to be allowed to work overtime up to six hours, and providing journeymen are also working overtime.

Scale for apprentices: third year, not less than one-third of journeyman's wage; fourth year, not less than one-half; fifth year, not less than two-thirds.

A "two-thirder" has the right to remain in the same office until he becomes a fully recognized member of the union.

Conciliation and arbitration to govern the adjustment of any dispute which may arise under the terms of the contract.

Where bonuses above the scale (equal to the wage increase provided in the agreement) are being paid, the increase not to apply.

VICTORIA, BRITISH COLUMBIA.—CERTAIN LOCAL EMPLOYERS AND INTERNATIONAL BROTHERHOOD OF BOOKBINDERS, LOCAL No. 147.—Agreement to be effective from January 1 to December 31, 1924, and thereafter, with 30 days' notice of expiry, or until a new contract is made.

All work in bindery to be time work. No one to be employed for less than a full day, or to accept less than a full day's pay, except in case of discharge during working hours for valid causes.

Minimum wages per week, journeymen, \$42; journeywomen, \$21.

Hours per week, 44.

Overtime, first three hours, time and one-half; thereafter and Sundays and holidays, double time.

No union member to be allowed to work in a bindery where bonuses are paid on output.

Only union members to be employed on certain specified classes of work.

Boys, apprentices to the trade, to be paid scale ranging from not less than 35 per cent of journeyman's scale for first six months to not less than 90 per cent for eighth six months, and thereafter not less than minimum scale.

Wages of bindery girls, per week, first six months, \$11; end of first six months, \$12; end of first year, \$13; end of 1½ years, \$14; end of 2 years, \$16; end of 2½ years, \$18.50; end of 3 years, regular scale.

Apprentices to work overtime only when journeywomen are working.

#### Construction: Buildings and Structures

TORONTO, ONTARIO.—MASONS' AND GENERAL CONTRACTORS' SECTIONS AFFILIATED WITH THE BUILDERS' EXCHANGE, AND INTERNATIONAL UNION OF BRICKLAYERS, MASONS AND PLASTERERS, BRICKLAYERS' LOCAL No. 2 AND STONE MASONS' LOCAL No. 26.—Agreement to be in effect from January 1 to December 31, 1924. Notice of change to be given three months prior to date of expiry, and the new agreement to be signed by November 1, 1924.

Wages per hour, from January 1 to April 30, 1924, \$1; from May 1 to December 31, 1924, \$1.25.

Hours per day or night, eight, with one hour for meals midway in shift. Overtime, time and one-half; work on Saturday afternoons, Sundays and holidays, double time.

Toronto jurisdiction to include the whole of York County and certain other surrounding districts.

Any member desiring to sub-contract must resign from the union for twelve months.

No members to work under an employer who pays by piece work.

A Joint Arbitration Committee of three members of each local and three

employers to be appointed, and to meet once every three months.

Union not to order a strike unless matter is brought before the Joint Arbitration Committee. No sympathetic strike to be engaged in except under authority of the international executive officers.

Violations of agreement to be reported to and dealt with by the Joint Arbitration Committee.

Union members to have preference of employment. No members to work for firms employing non-union stone masons and bricklayers.

Minimum rates of wages per hour for apprentices: first year, 25 cents; second year, 35 cents; third year, 45 cents; fourth year, 60 cents.

#### Transportation: Water

HALIFAX, NOVA SCOTIA.—CERTAIN STEAMSHIP COMPANIES DOING BUSINESS AT THE PORT OF HALIFAX, AND INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCAL No. 269.—Agreement to be effective from November 30, 1923, to November 30, 1924, and from year to year thereafter unless notice is given to the contrary 30 days prior to November 30.

Minimum wages per hour, day work, 65 cents; night work, 75 cents; for full cargoes of cement and for handling bulk grain, day work, 75 cents; night work, 85 cents; for work on ships with cargo on fire, day work, \$1.30; night work, \$1.50 (the last to apply only to hatches affected by fire, smoke, steam or gas); for work on Sundays and certain holidays, double rates, except in case of ships with cargo on fire, rate then being: day work, \$1.95; night work, \$2.25.

During meal hours, double time, this to continue until men are relieved or work is completed.

Work lasting longer than 20 successive hours to be optional.

Waiting time—7 a.m. to midnight, full rate for first hour of each period and half rate thereafter until midnight. After midnight, full rate.

When work is not to be carried on after midnight, day's work to be concluded at 11 p.m.; this not to apply

where a job is nearing completion or in case of a shunt of perishable cargo. No work after 6 p.m. on Saturday except in a case of necessity.

Work on wrecked vessels to be paid from time men leave pier until they return.

Non-union men employed during shortage of union men not to be replaced by union men during the day they were hired.

In event of disputes, business manager of the union to confer with employer; settlement to be binding. Disputes, grievances, etc., to be dealt with by officers of the union.

#### Services: Personal and Domestic

CALGARY, ALBERTA.—THE CITY CAFÉ AND HOTEL AND RESTAURANT EMPLOYEES' INTERNATIONAL ALLIANCE, LOCAL No. 597.—Agreement effective from November 15, 1923, until changed after 30 days' notice.

Minimum wages per week, waiters and waitresses on counter, \$21; on tables, \$15; miscellaneous employees, \$13.

Hours: 8½ consecutive hours with 30 minutes for a meal on employer's time to be a straight shift on the counter; six days a week.

One split shift to be allowed on the counter, shift consisting of 8½ hours over a spread of 12 hours, with 30 minutes for a meal in employer's time; six days per week. Three meals per day to be included while working. No member to walk out in the middle of a shift except when the employer assents.

Hours on tables: 8½ straight, or split over a spread of 12 hours. Extra time on the counter to be paid at rate of 75 cents per hour.

In houses working mixed crews, boys must be replaced by boys and girls by girls when possible.

Union members to be allowed to wear union buttons while on duty; union members to have preference of employment.

Linen to be furnished by employees (except in case of a special uniform being requested) and laundered at employer's expense.

#### Services: Laundering: Dyeing and Cleaning

OTTAWA, ONTARIO.—OTTAWA SANITARY LAUNDRY AND LAUNDRY WORKERS' INTERNATIONAL UNION, LOCAL No. 275.—Agreement to be effective from January 7, 1924, to January 7, 1925, and thereafter from year to year unless changed on 30 days' notice in writing.

Only union members to be employed when available. Otherwise employer may hire non-union help, who must become members of the union after three weeks or be discharged.

Hours per day, 8, with 4 on Saturdays.

Double time on holidays; no work to be done on Labour Day.

Employees in the mangle department who have not had any previous experience shall serve three months as apprentices.

Minimum wages per week: mangle hands, shakers, checkers, ironers, body ironers, press hands and starchers, \$12; markers, \$13; assistant washers, \$24.50; washer's helper, \$15; head wringer man, tumbler man, \$18; in dyeing and cleaning department, \$30 and \$40.

Representative of the International Union to be allowed to inspect shop conditions and use of the union label.

Differences to be submitted to a Board of Arbitration having three members from each party, and, if necessary, a seventh elected by them.

Drivers not to be required to work more than six hours on Saturdays, and drivers, even if they finish work before that time, to receive a full week's pay. Minimum wages per week, \$23.50, with 5 per cent on all cleaning work and 10 per cent on all dyeing work.

Employees paid rates higher than those mentioned in the agreement not to suffer a reduction. Employees not to lose time unless they lay themselves off.

In event of employer having to lay employees off, those laid off to have preference of re-employment.

Employees working less than four hours on a holiday to be paid for at least one half-day. Employees in classes not mentioned in the agreement to receive not less than \$12 per week.

## PRICES, RETAIL AND WHOLESALE, IN CANADA, JANUARY, 1924

### Cost of Living, Prices of Staple Articles and Index Numbers

THE movement in prices during the month continued upward. The increase in the family budget of retail prices was very slight but there was a substantial advance in the Bureau of Statistics index number of wholesale prices.

The cost per week of a list of twenty-nine foods for an average family of five in terms of the average retail prices in some sixty cities was \$10.78 at the beginning of January, as compared with \$10.73 for December, 1923; \$10.52 for January, 1923; \$11.03 for January, 1922; \$14.48 for January, 1921; \$16.92 for June, 1920 (the peak); \$15.30 for January, 1920; \$12.42 for January, 1918; and \$7.73 for January, 1914. Prices for eggs, milk, and butter continued upward and there were also increases in beef, veal, salt pork, and potatoes, while small declines occurred in the prices of pork roast, cheese, and flour. Including the cost of fuel and rent with that of foods the total budget averaged \$21.23 at the beginning of January as compared with \$21.21 for December, 1923; \$21.13 for January, 1923; \$21.52 for January, 1922; \$25.30 for January, 1921; \$26.92 for July, 1920 (the peak); \$24.15 for January, 1920; \$19.80 for January, 1918; and \$14.49 for January, 1914. Fuel averaged slightly lower. No changes were reported in rent.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics, based upon the average prices of 238 commodities in 1913 as 100, weighted according to the importance of the commodities, was substantially higher, the figure for January being 156.7 (the highest point reached since September, 1921) as compared with 153.5 for December, 1923; 151.4 for January, 1923; 149.8 for January, 1922; 201.7 for January, 1921; and 256.9 for May, 1920 (the peak).

In the grouping according to chief component material four of the main groups were substantially higher while four were lower, the animals group show-

ing the only large decline. The increase in the vegetable products group was due mainly to the higher prices in grains and vegetables. Advances in the prices of cotton fabrics and wool caused an increase in the textile group. The non-metallic minerals group rose because of advances in the prices of petroleum products.

In the grouping according to purpose, both consumers' goods and producers' of articles of marine origin and of goods advanced. In the former group declines in the prices of sugar and eggs caused a slight fall in foods but this was more than offset by advances in household equipment and in miscellaneous consumers' goods. In producers' goods the index of building materials advanced as did also the indexes of materials for the textile, the leather, the meat packing, and the milling industries.

In the grouping according to origin the indexes of domestic farm products, of articles of marine origin and of articles of mineral origin advanced while the index of articles of forest origin was lower.

The index number based upon prices of 271 commodities in 1890-1899 as 100 published by the Department of Labour since 1910 stood at 222.7 for January as compared with 222.6 for December, 1923; 223.0 for January, 1923; 227.7 for January, 1922; 281.3 for January, 1921; 356.6 for May, 1920 (the peak); 336.4 for January, 1920; 258.7 for January, 1918; and 136.5 for January, 1914. The chief declines occurred in eggs, hogs, bacon, corn, fruits, sugar, coal, furniture, glassware and crockery, bar silver and raw rubber, while advances occurred in prices of grains, fodder, cattle, beef, sheep, butter, potatoes, canned vegetables, wool, cotton, metals, linseed oil and turpentine.

The index number published by the Department since 1910 has been reconstructed back to January 1919, by the Dominion Bureau of Statistics, the new index being weighted and based upon the prices of 238 commodities in 1913

(LABOUR GAZETTE, June, 1923, pp. 689-695). Ultimately the reconstructed index will be carried back to an earlier date, but in the meantime the Department will continue to calculate and publish the old series in summary form in the LABOUR GAZETTE in order to afford comparisons with price levels prior to 1913. For the detailed analysis from month to month, however, the new index number of the Bureau of Statistics will be used.

The accompanying tables give the index numbers of the Dominion Bureau of Statistics by the principal groups in the three methods of classification and with those of the classification according to purpose or use in detail. The index number of the Department of Labour is given by the principal groupings, but the sub-groups in detail shown monthly since 1912 are omitted. The special index number of 50 commodities described in the following paragraph is also given for the purpose of continuing the record.

The special index number comprising fifty of the more important commodities selected from the 271 in the Departmental list, including twenty foods, fifteen raw materials and fifteen manufactured goods, based upon price levels in 1913 as 100, advanced to 154.4 for January as compared with 153.7 for December, 1923; 153.1 for January, 1923; 148.0 for January, 1922; 195.2 for January, 1921; and 260.5 for May, 1920 (the peak). Declines in eggs, hogs, bacon, sugar, and coal were more than offset by advances in grains, cattle, beef, sheep, butter, cheese, potatoes, canned tomatoes, wool, linseed oil and turpentine.

The index of wholesale prices in Canada published by the United States Federal Reserve Board, including thirty-three raw materials, twenty-eight semi-manufactured or producers' goods, and thirty-eight finished or consumers' goods, based upon price levels in 1913 as 100, again declined to 144 for November, 1923, as compared with 147 for October; 148 for September; and 147 for November, 1922. All groups were lower except goods imported which was unchanged.

The Bank of Commerce index of imports advanced to 165.29 for January as compared with 164.67 for December, 1923; that for exports was 149.81 for January as compared with 147.07 for December, 1923. The combined index rose from 155.87 to 157.55.

The table of retail prices and rentals shows the prices at the beginning of January of seventy-two staple food-stuffs, groceries, coal, wood and coal oil, and the rent for six-roomed houses in some sixty cities throughout Canada. All prices are for delivered goods. The exact quality, for which the quotation is given, is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity, in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Department and to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. The prices of fuel and the rates for rent are reported by the correspondents of the LABOUR GAZETTE.

Statistics similar to these were published each month from 1910 to 1920, the figures during this period being secured at the middle of each month by the correspondents of the LABOUR GAZETTE resident in each locality from dealers doing a considerable business with workingmen's households. From 1910 to 1915 the table contained a list of only the twenty-nine foods included in the family budget, with laundry starch, coal, wood, coal oil and rent. In 1915, when monthly publication of the budget in the LABOUR GAZETTE was begun, it was decided to extend the list of foods to 40, and in 1920 the list of foods and groceries was still further extended to include over 100 items.

Beginning with October, 1922, a number of commodities were dropped from the list and in the case of a number of articles the average prices of the grades most sold have been given owing to the impossibility of securing

INDEX NUMBERS OF WHOLESALE PRICES (WEIGHTED) CALCULATED BY THE DOMINION BUREAU OF STATISTICS\*

\*Figures for 1923 revised.

prices for uniform grades for the various cities from month to month.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class

is of houses in good condition, favourably located in such districts, with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central, without modern conveniences.

†Nine commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915.

The weekly budget of a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal wood, coal oil, and rent, these being the items for which statistics have been obtained each month and published in the LABOUR GAZETTE since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. But as market conditions affecting these usual-

ly affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various classes of foods tends to be maintained. At times when the price of an article heavily weighted for this purpose rises (or falls) abnormally the increase (or decrease) in food prices so indicated is exaggerated, and this should be taken into account in using the budget as an indicator of changes in the cost of living. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in

(Continued on page 178)

the heating value of the various fuels. It was estimated, when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditure of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were adopted as affording a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruit, fresh and canned vegetables, etc., so that comparative expenditure would be little changed.

#### Cost of Electric Current for Householders\*

With rates in 1913 as 100, index numbers of electric light rates were: 1900, 141.4; 1905, 135.6; 1910, 118.1; 1911, 113.4; 1912, 109.1; 1913, 100.0; 1914, 96.5; 1915, 90.8; 1916, 87.6; 1917, 87.2; 1918, 85.8; 1919, 85.8; 1920, 84.2; 1921, 84.9; 1922, 82.7; 1923, 79.5.

#### Retail Prices

Beef showed little change during the month. Sirloin steak averaged 26.9c. per pound in December, 1923, and 27c. per pound in January, 1924. Round steak averaged 21.7c. per pound in December and 21.8c. in January. Rib roast advanced from an average of 20c. per pound in December, to 20.4c. in January. Shoulder roast advanced slightly to an average of 14.7c. per pound. Stewing beef was slightly higher at 11.2c. per pound. Veal, roast, rose from an average of 17.9c. per pound in December to 18.6c. in January. Mutton

was steady, averaging 26.9c. per pound. Fresh pork, roast, averaged 24.1c. per pound in January as compared with 24.6c. the previous month. Salt pork and bacon were also lower, the former averaging 23.8c. per pound in January and 24.3c. in December and the latter 37c. per pound in January and 37.5c. in December. Boiled ham declined slightly, averaging 58.3c. per pound. In fresh fish cod, halibut and whitefish were slightly higher. Salt herrings were down somewhat in the average, while salt cod were slightly higher. Lard was steady.

Fresh eggs were again slightly higher, averaging 61.3c. in January as compared with 60.1c. in December and 52c. in November. Milk was up from an average of 12.2c. per quart to 12.4c. Prices were higher in New Glasgow, St. John, Three Rivers, Sorel, St. Hyacinthe, Thetford Mines, Peterborough, Cobalt, Medicine Hat and Calgary. Butter again showed a general advance, dairy averaging 42.7c. per pound in January as compared with 41.7c. last month and creamery 48.3c. per pound in January and 46.1c. in December. Cheese fell from an average of 34c. per pound to 33.2c.

Bread and soda biscuits were unchanged. Flour averaged 4.2c. per pound in January and 4.3c. the previous month. Rolled oats and rice were steady. Tapioca declined slightly to 14.8c. per pound. Canned tomatoes advanced from an average of 18.2c. per can to 18.5c., and canned corn from an average of 16.6c. per can to 17c. Beans and onions showed little change. Potatoes averaged \$1.43 per 90 pounds in January as compared with \$1.41 in December. Evaporated apples and prunes showed little change. Raisins were slightly lower, averaging 18.2c. per pound as compared with 18.6c. last month. Currants also declined from 21.6c. per pound in December to 21.3c. in January. Orange marmalade was slightly lower, averaging 80.7c. per 4 pound tin. Granulated sugar averaged 12.1c. per pound in January and 12c. in December. Tea and coffee were steady.

\* See article in LABOUR GAZETTE, December, 1923, page 1442.

Anthracite coal was down from an average of \$18.01 per ton in December to \$17.84 in January. Prices advanced somewhat in Fredericton but were lower in Peterborough, Niagara Falls, St. Catharines, Cobalt, Woodstock and Brandon. Bituminous coal was also down from an average of \$11.44 per ton in December to \$11.29 in January. Hard wood showed little change, being \$12.65 per cord, increases in some localities being offset by decreases in others. Soft wood, four feet long, declined from an average of \$9.46 per cord to \$9.25. Lower prices were reported from Halifax, Charlottetown, Cobalt, Winnipeg, and Moose Jaw. Coal oil showed little change.

No changes were reported in rents.

#### Wholesale Prices

The following is a summary of a statement on prices changes during the month issued by the Dominion Bureau of Statistics:

Grains for the most part were higher. No. 1 Manitoba Northern wheat averaged 96 $\frac{3}{4}$  cents per bushel in January as compared with 93 $\frac{1}{4}$  cents in December. Oats advanced from an average of 36 $\frac{3}{4}$  cents per bushel in December to 39 $\frac{1}{4}$  cents in January. Flour was 10 cents per barrel higher at \$6.20. Raw rubber continued to decline, being  $\frac{1}{2}$  cent per pound lower at 26 cents. Potatoes at Montreal advanced to \$1.40 per bag as compared with \$1.05 the previous month. Canned tomatoes were up from \$1.90 per dozen tins to \$2.10. Raw sugar declined from \$7.06 per

hundred pounds in December to \$6.58 in January. Granulated sugar also was lower at \$9.60 per hundred pounds as compared with \$9.79 in December, but rose again, however, toward the end of January. Linseed oil was up from \$1.11 per gallon to \$1.17 $\frac{3}{4}$ . A representative line of smoking tobacco was up from \$1.55 per pound to \$1.63. Prices of cattle were higher; western at Winnipeg were \$5.72 per hundred pounds as compared with \$5.08 in December, and choice steers at Toronto were \$6.69 per hundred pounds in January as against \$6.25 in December. Bacon was down 2 cents per pound at 23 $\frac{1}{2}$  cents. Butter was higher, creamery advancing from 41 $\frac{1}{2}$  cents per pound to 44 cents. Fresh eggs declined from 75-85 cents per dozen in December to 60-65 cents in January. Raw cotton at New York was down from an average of 36 cents per pound in December to 34 $\frac{1}{4}$  cents in January. Denim rose from 72 cents per pound to 80 cents and shirting from 80.47 cents per pound to 89.17 cents. Raw wool showed the first advance in four months, Eastern domestic, averaging 33 cents per pound as compared with 31 cents in December. Copper after recovering slightly at the end of the year resumed its downward trend. Silver was slightly lower at 64 $\frac{3}{8}$  cents per ounce. Gasoline advanced 1 $\frac{1}{2}$  cents per gallon to 25 $\frac{1}{2}$  cents and coal oil 1 cent per gallon to 20 cents. Window glass declined from \$5.40 per box in December to \$5.13 in January. Crude coal tar rose to \$9.60 per barrel. Laundry soap was up from \$6.08 per case to \$6.40.

f. Poplar, etc. g. Higher price for semi-anthracite. h. In British Columbia coal oil is sold to a great extent in tins costing houses as high as \$40.00 per month. †Mining company houses \$20.00. Others \$45-\$60. ‡For new tenants \$30-\$35 and \$20-\$25.

## PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes give the latest information available as to the movement of prices in other countries as compared with Canada. The index numbers of retail prices are from official sources unless otherwise stated. The authorities for the wholesale prices index numbers are named in all cases.

Wholesale prices during the last quarter of 1923 tended to rise in Canada, Great Britain, and in practically all countries of continental Europe, with the exception of Sweden. For Asiatic countries the available data are not sufficiently late to show the tendency during the period except in the case of prices in China, which were rising. Prices in New Zealand were declining. Prices in the United States exhibited stability, with no marked tendency either upwards or downwards. In the retail prices and cost of living figures the same tendencies were shown in general. In Europe, the cost of living tended to rise, except in Sweden, Finland and Czecho-Slovakia. In the East, food prices rose in India and New Zealand and declined in Australia. In the United States the cost of living showed very little change during the period.

### Great Britain

WHOLESALE PRICES.—The *Statist* index number (in continuation of Sauerbeck's figures) showed slight advances both in November and December of 3.7 per cent and 0.6 per cent respectively. In November the largest gain was in textiles, due to advances in cotton. In December there were slight changes in all groups except that of sugar, coffee and tea, which fell 3 per cent. The total index number at December 31 was 133.2, an advance of 3.2 per cent on the figure of one year previous.

The *Economist* index number continued in December the steady rise of the previous four months, reaching 208.2 on the base 100 in 1901-05, or 1.1 per cent above the previous month's level. The increase was shown by all groups except textiles, which declined slightly owing to

a reaction of cotton prices from the high levels at the end of November. Meat prices advanced, partly owing to the spread of foot and mouth disease. There was a sharp rise in the group of "other foods" owing to an increase in the price of sugar.

The Board of Trade index number of wholesale prices at the end of 1923 stood at 161.1, and 163.6 for November and December respectively. For December both foods and non-foods increased in price, 0.7 per cent and 2 per cent respectively, the largest increases being 4.1 per cent in cotton, 3.5 per cent in other textiles, and 2.9 per cent in iron and steel. The miscellaneous group was the only one to show a decline.

COST OF LIVING.—The cost of living index number of the Ministry of Labour showed no change for January, remaining at 177. Foods declined one point to 175; fuel and light declined 5 points to 180; clothing rose slightly, and rent and sundries showed no change. The cost of living index number for February rose to 179, foods having risen two points to 177, and fuel and light having risen to 187½.

### Austria

WHOLESALE PRICES.—A new and more comprehensive official index number was recently substituted for that previously calculated by the Official Statistical Office. The commodities chosen were 22 foods and 20 industrial materials, of significance to the whole community. The base period was the first six months of 1914=1, the method followed being that of a weighted arithmetic average, based on consumption. The figures published were for 1923, by months, those for all commodities at intervals during the year being as follows: January, 16,986; April, 18,758; July, 17,893; October, 17,597; November, 17,795; December, 18,181.

COST OF LIVING.—The official index number showed successive increases during the last four months of 1923, reach-

ing 11,249 in December, on the base 1 in July, 1914. Foods and clothing continued to advance during the period, reaching 12,860 and 18,673 respectively. Heating and lighting declined during November and December to 14,525, and rentals remained at 724.

#### Belgium

WHOLESALE PRICES.—The index number of wholesale prices on the base 100 in April, 1914, rose from 514 in September to 531 in November, or 3.3 per cent. During the two months textiles rose 13.1 per cent; foods, 9 per cent; fuels, 5.5 per cent, and fertilizer 4.9 per cent. Hides and leather goods fell 4.3 per cent and clay products fell 2.3 per cent. Other groups varied slightly or showed no change.

COST OF LIVING.—The Ministry of Industry and Labour recently began the publication of index numbers of cost of living for three categories of working class families, as well as one for a middle class family with moderate income. The base is cost of living in 1921=100, and the indexes are monthly from January, 1922. The figures of December, 1923, for the different elements of the budget for the lowest category of working class family were as follows: food, 117.87; rent and lodging, 137.18; heat and light, 126.32; clothing, 121.22; sundries, 104.33; cost of living, 119.55. The corresponding figures for the middle class family were: food, 123.38; rent and lodging, 138.12; heat and light, 123.41; clothing, 123.28; sundries, 102.99; cost of living 123.21.

#### France

COST OF LIVING.—The official index number, compiled by the Commission of Studies on the Cost of Living, showed that during the fourth quarter of 1923 the cost of living in Paris stood at 345 on the base 100 in 1914, an increase of 14 points, or 4.2 per cent, above the level for the previous quarter. Foods rose 6.3 per cent to 354 during the period under review. Heat and light rose 2.9 per cent to 350, and clothing rose 1.8 per cent to 392. Rent showed

no change, remaining at 200, and sundries stood at 400, as in the previous quarter.

#### Germany

WHOLESALE PRICES.—The official index number for the latter part of 1923 was calculated and published both in paper mark and in gold mark prices. From the latter part of November the index number was published for gold prices alone, as the new currency unit, the rentenmark, had a theoretical value of one gold mark. On the basis 100 in 1913 the gold prices index number for foods for the monthly average in December was 111.2 and for industrial materials, 154.1. During the same month, home-produced goods had an index of 119.3 and imported goods of 160.3.

COST OF LIVING.—The official weekly index number of cost of living rose to its greatest height on November 26, when it was 1,535 billion times the pre-war level. After that date it declined slightly each week, reaching 1,130 billion times the pre-war level on January 7, the latest date available. The official monthly index number for December was 89.8 per cent above that for November, the figures for all groups being nearly doubled, with the exception of the rent index which increased from 22 billion to 218 billion times the pre-war price. The cost of living calculations are based on prices in paper marks.

#### Italy

WHOLESALE PRICES.—The index number of the Milan Chamber of Commerce rose to 534.80 in December (on the base 1913=100), or 0.1 per cent above the level for November. All groups, with the exception of chemical products and miscellaneous industrial materials, advanced during the period. The most marked advance was one of 3.72 per cent in textiles. This brings the index number of the group, textile materials, to 743.92, the highest level reached by any group since the beginning of the record. The yearly average for 1923 was 535.78 as compared with 529.35 for 1922.

### India

**COST OF LIVING.**—The official index number compiled by the Bombay Labour Office rose 2.6 per cent to 157 in December, as compared with 153 in November, on the base 100 in July, 1914. Foods rose 3.4 per cent to 152; clothing declined 2.7 per cent to 219; fuel and lighting and rent showed no change, remaining at 161 and 165 respectively.

### United States

**WHOLESALE PRICES.**—The index number of the Bureau of Labour Statistics showed in November and December a continuation of the downward movement begun in October. In December, as compared with October, farm products, cloths and clothing, and chemicals and drugs were slightly higher in price. Fuel and lighting materials fell 5.8 per cent during the period under review, and foods, building materials, house furnishing goods and miscellaneous goods declined slightly. Metals and metal products showed no change.

*Bradstreet's* index number of wholesale prices for February 1 was \$13.1966, as against \$13.2710 on January 1, a decrease of 0.5 per cent. This was a decrease of 3.8 per cent from prices of one year previous. During January there were increases in six groups: breadstuffs, hides and leather, metals, coal and coke, oils and naval stores. Six groups showed declines, including textiles, provisions, live stock, fruits, building materials, and miscellaneous products; while chemicals and drugs showed no change.

*Dun's* index number rose 0.6 per cent to \$191.095 at February 1, as compared with \$189.930 at January 1. The only notable change in the index numbers of groups was an advance of 5.7 per cent in breadstuffs, while slight increases were shown in meat, metals and miscellaneous articles, and other groups showed decreases.

**COST OF LIVING.**—The cost of living index number of the Bureau of Labour

Statistics on the base 100 in 1913 stood in December 0.6 per cent above the September level, thus reaching 173.2. The index numbers for the elements of the budget were as follows: food, 150.3; clothing, 176.3; housing, 166.5; fuel and light, 184.0; furniture, 222.4; sundries, 201.7.

The cost of living index number of the National Industrial Conference Board fell 0.3 points to 165.0 in December, on the base 100 in July, 1914. Foods fell 1 point to 175. Shelter, fuel and light, and sundries showed no change.

The official index number for Massachusetts, compiled by the Special Commission on the Necessaries of Life, on the base 100 in 1913, fell 0.7 per cent to 160.5 in November and rose again 0.5 per cent in December. Foods fell to 142.0 in November and rose to 144.1 in December; clothing rose to 187.0 and fell again to 186.1; fuel and light rose to 182.1 and fell again to 181.7. Shelter and sundries showed no change during the period, remaining at the October levels of 167.5 and 170.5 respectively.

It is reported that in France 160,000 gardens, specially set aside for industrial workers, are now cultivated. This is an increase of 72,000 over the number in cultivation in 1919, when the eight-hour day came into general application. In some part this result has been achieved by the propaganda of such organizations as the Cottage and Small Holdings League, in some part by the fact that practically all cottages in the reconstructed and new towns of the devastated area are provided with gardens or with garden lots not too far from the homes. In this movement the Association of Mine Owners has taken a leading part. It not only provides land but carries on an educational campaign; individual companies often distribute seeds and manure free of cost or promote gardening competitions.

## FATAL INDUSTRIAL ACCIDENTS DURING THE LAST QUARTER OF 1923

INFORMATION received by the Department for the last quarter of 1923 shows 371 fatalities in the industries and trades of Canada as compared with 371 in the previous quarter (20 of which appear in the supplementary list below) and 341 in the corresponding quarter of last year. There were in all 1,397 fatalities reported during the year as compared with 1,127 in 1922, 924 in 1921, and 1,192 in 1920. Comparative figures for the years 1922 and 1923 are indicated in the following table:

---	1922	1923
January.....	54	95
February.....	58	121
March.....	65	88
April.....	96	107
May.....	81	127
June.....	94	117
July.....	112	129
August.....	117	138
September.....	109	104
October.....	106	137
November.....	106	130
December.....	129	104
	*1,127	*1,397

\*Revised figures. See accompanying supplement, also supplementary list for 1922 in the LABOUR GAZETTE, May, 1923.

During the quarter under review there were 92 fatalities in the transportation and public utilities group as compared with 103 in the previous quarter. Of these 42 occurred in the water transportation group and 34 on the steam railways. In the former group

five deaths were due to the breaking of a steam pipe and a boiler explosion, five to falling into the holds of vessels, and two to being struck by swinging lumber while loading. In the steam railways group six deaths were due to falls from trains, and in the public utilities group three were caused by electricity. In the manufacturing group 62 deaths were reported, 9 of which were due to being caught in machinery, 7 to burns, 4 to elevators and other hoisting apparatus, and three to the flying off of parts of machinery. In the logging group falling trees were the chief causes among the 54 fatalities reported, while in the construction group falls of persons accounted for the greatest number of the 49 fatalities, four deaths in this group, however, being due to the breaking of ropes, etc., and one was due to the explosion of dynamite caps being carried in a pocket. There were 42 fatalities in the agricultural group and while the greatest number of these were caused by falls from vehicles and by the farm animals, 4 were due to being caught in belts, etc., two to being crushed while placing machinery, one to the breaking of a saw and one to falling into a machine while threshing, and two to explosions while blasting stumps.

The following table has been prepared from information received from all sources available, but does not necessarily include all the industrial accidents that may have occurred:

## FATAL INDUSTRIAL ACCIDENTS DURING THE LAST QUARTER OF 1923

Trade or Industry	Locality	Date	Age	Cause of Fatality
<b>AGRICULTURE—</b>				
Farmer.....	Radville, Sask.....	Oct. 4	.....	Fell from a load.
Farmer.....	Owen Sound, Ont.....	" 7	.....	Fell from wagon when horses bolted.
Farm hand.....	Covan, Sask.....	" 9	35	Thrown from wagon. Horses took fright when tongue dropped.
Farmer.....	Dundalk, Ont.....	" 9	.....	Gored by a bull.
Farm hand.....	Brampton, Ont.....	" 10	.....	Thrown from wagon when horses bolted.
Farmer.....	Stave River Gardens, B.C.	" 15	.....	Believed due to short fuse while blasting stumps.
Farmer.....	Fort Frances, Ont.....	" 17	.....	Injured while blasting stumps.
Thresher.....	Crossfield, Alta.....	" 19	34	Crushed between engine and separator. Engine backed while adjusting clutch.
Farmer.....	Allumette Island, Ont..	" 19	74	Gored by a bull.
Farmer.....	Cloan, Sask.....	" 26	52	Crushed beneath wagon which upset when team ran away.
Farmer.....	Lilac District, Sask....	" 27	66	Fell off a hay rack.
Farmer.....	London, Ont.....	" 28	46	Kicked by a horse.
Thresher.....	Woodbridge, Ont.....	" 29	55	Crushed between barn door and machine.
Farmer.....	St. George de Beauce, Que.	" 29	74	Crushed by a horse in a stall.
Apple picker.....	Maple, Ont.....	" 29	61	Fell when limb of tree broke.
Farmer.....	Richlea, Sask.....	" 30	.....	Caught in belt of threshing machine.
Farmer.....	Neudorf, Sask.....	" 30	19	Caught in governor of gasoline engine.
Farmer.....	Didsbury, Alta.....	" 31	.....	Fell from loft of barn.
Thresher.....	Vegreville, Alta.....	Nov. 2	.....	Crushed under water wagon.
Farmer.....	Picton, Ont.....	" 2	65	Kicked by a colt.
Thresher.....	Near Calgary, Alta....	" 2	33	Caught in feeder belt of separator.
Farmer.....	Maple Grove, Ont.....	" 5	.....	Fall (no further particulars).
Farmer.....	St. Pierre, Man.....	" 8	68	Burned in fire which destroyed barn.
Farmer.....	Arran, Sask.....	" 9	80	Butted by ram.
Farmer.....	Conquest, Sask.....	" 13	aged	Thrown to ground when team ran away.
Farmer.....	Burpee Township, Ont..	" 13	.....	Fell from a load of straw.
Farmer.....	Carlyle, Sask.....	" 13	67	Over-exertion while attempting to stop runaway horse.
Farmer.....	Lindsay, Ont.....	" 18	69 over	Gored by a bull.
Thresher.....	Innisfail, Alta.....	" 23	21	While working over cylinder of separator, lost balance and fell on carriers.
Harvester.....	Kelfield, Sask.....	" 23	.....	Fell from a wagon.
Farm hand.....	Cereal, Alta.....	" 24	17	Thrown from load when horses stepped forward.
Helper.....	Korah, Ont.....	" 24	16	Fell from load of straw.
Farmer.....	Seeley's Bay, Ont.....	" 26	64	Over-exertion catching runaway horse.
Farmer.....	High Bluff, Man.....	" 28	18	Caught in belt of cutting machine.
Farmer.....	Sidney, B.C.....	Dec. 3	.....	Gored by a bull.
Farmer.....	Chilliwack, B.C.....	" 8	50	Thrown from wagon. Horses took fright when bolt dropped from whiffletree.
Farmer.....	Peterboro, Ont.....	" 8	.....	Kicked by a horse.
Farmer.....	Portneuf, Que.....	" 18	72	Struck by falling branch from tree he was felling.
Farmer.....	Ensign District, Alta...	" 22	68	Thrown against rock by horse leaving barn.
Farmers's son.....	Moline, Man.....	" 20	25	Struck by piece of circular saw which broke when sawing poles.
Farmer.....	Leeds Co., Ont.....	" 22	.....	Kicked by a horse.
Farmer.....	Near Cochrane, Ont.....	" 31	.....	Kicked by a horse.
<b>LOGGING—</b>				
Logger.....	Topaz Harbour, B.C....	Oct. 1	27	Struck by falling tree.
Chokerman.....	Harrison Lake, B.C....	" 2	22	Struck by falling snag that caught in tackle.
Logger.....	Cowichan Lake, B.C....	" 4	21	Struck by rolling log.
Whistle boy.....	Ladysmith, B.C.....	" 11	14	Struck by fallen tree which flew up when hit by a log.
Filer.....	Sault Ste. Marie, Ont....	" 14	77	Crushed foot.
Woodsman.....	Island Brook, Que.....	" 15	52	Struck by falling tree.
Woodsman.....	Brule Lake, Ont.....	" 16	.....	Drowned.
Logger.....	Campbell River, B.C....	" 17	38	Struck by branch of falling tree.
Woodsman.....	Mushaboon, N.S.....	" 19	.....	Struck by falling tree.
Blacksmith.....	Mara Lake, B.C.....	" 20	34	Struck by log which jumped chute.
Logger.....	Comox-Alberni, B.C....	" 26	60	Crushed by moving train.
Employee.....	Port Moody, B.C.....	" 25	.....	Fell from dock.
Boomman.....	Headquarters, B.C.....	" 26	59	Caught between brow log and cars.

Trade or Industry	Locality	Date	Age	Cause of Fatality
<b>LOGGING—Concluded</b>				
Logger.....	Nanoose Bay, B.C.....	Oct. 27..	28	Crushed by log which fell from load when hook broke.
Labourer.....	Rockcroft, Ont.....	" 29..	.....	Drowned.
Log driver.....	Kootenay Lake, B.C.....	" 31..	.....	Drowned when booming logs.
Logger.....	Sutley Channel, B.C.....	Nov. 1..	41	Crushed by log which slid from pole.
Logger.....	Silverton, B.C.....	" 3..	25	Struck by pole coming from chute.
Woodsmen.....	Pelly, Sask.....	" 5..	58	Crushed by falling tree.
Woodsmen.....	Dollarton, B.C.....	" 7..	31	Jumped from lumber pile on to wharf, slipped and fell into inlet.
Woodsmen.....	Norquay, Sask.....	" 7..	.....	Struck by falling tree.
Woodsmen.....	Massey, Ont.....	" 10..	63	Crushed by tree.
Drayman.....	Blairmore, Alta.....	" 12..	.....	Struck by logs which broke away while being skidded.
Woodsmen.....	Woman River, Ont.....	" 13..	22	Drowned.
Woodsmen.....	Allanwater, Ont.....	" 15..	35	Struck by tree.
Woodsmen.....	30 miles from Cartier, Ont.	" 16..	.....	Struck by falling tree.
Woodsmen.....	St. Tite, Que.....	" 16..	18	Drowned in lake.
Logger.....	Hutton, B.C.....	" 17..	46	Struck by falling tree.
Woodsmen.....	Sudbury, Ont.....	" 19..	.....	Struck by falling tree.
Labourer.....	Haley's Station, Ont.....	" 20..	50	Struck by tree.
Labourer.....	Restigouche Co., N.B.....	" 20..	26	Struck by sling logs.
Setter.....	Port Alice, B.C.....	" 21..	35	Struck by log and crushed against carriage.
Woodsmen.....	Mistatim, Sask.....	" 21..	.....	Burned in fire which destroyed cook shack.
Logger.....	Call Creek, B.C.....	" 21..	40	Struck by falling limb.
Foreman.....	Lynn Creek, B.C.....	Nov. 22..	44	Crushed under load which upset.
Track layer.....	Cowichan Lake, B.C.....	" 26..	48	Powder explosion while relighting fuse.
Hooktender.....	Reid Bay, B.C.....	" 25..	30	Struck by swinging log.
Woodsmen.....	Carrot River, Man.....	" 27..	19	Crushed by falling tree.
Engineer.....	Duncan Bay, B.C.....	" 28..	40	Crushed under engine which tipped when guy rope broke.
Rigging slinger.....	Haney, B.C.....	" 29..	43	Struck by tail snag which broke when hit by dragging log.
Woodsmen.....	Le Pas, Man.....	" 30..	50	Crushed by falling tree.
Surveyor.....	Upham, N.B.....	" 30..	51	Clothing caught in shafting. Died after long journey to hospital.
Woodsmen (2).....	White River, Ont.....	Dec. 4..	.....	Ice broke when crossing river with provisions.
Woodsmen.....	Pickerel, Ont.....	" 7..	42	Struck by logs.
Woodsmen.....	Nesterville, Ont.....	" 7..	.....	Struck by tree.
Woodsmen.....	Upper Five Islands, N.S.....	" 7..	.....	Struck by falling tree.
Tie maker.....	Rocky Mountain House, Alta.	" 8..	21	Struck by falling tree.
Woodsmen.....	Loring, Ont.....	" 7..	.....	Struck by falling tree.
Engineer.....	Munson's Landing, B.C.....	" 12..	24	Boiler explosion.
Woodsmen.....	Le Pas, Man.....	" 12..	35	Struck by falling tree.
Employee.....	Campbell River, B.C.....	" 4..	50	Fell from loft.
Woodsmen.....	Portneuf, Que.....	" 17..	76	Struck by falling tree.
Woodsmen.....	Flanders, Ont.....	" 22..	25	Struck by tree.
<b>FISHING AND TRAPPING—</b>				
Fisherman.....	Near Portland, Me.....	Oct. 30..	.....	Swept overboard by large wave.
Fisherman.....	Sands Head, Steveston, B.C.	" 31..	35	Found lashed to boat. Believed to have been caught in wind storm.
Fishermen (2).....	Prince Rupert, B.C.....	Nov. 15..	{29 35}	Swept overboard in storm.
Fisherman.....	Estevan Sound, B.C.....	" 2..	34	Thrown overboard when boat lurched.
Mate on fishing boat.....	Near Yakutat, B.C.....	" 15..	60	Swept overboard by heavy sea.
Fishermen (4).....	Lake Manitoba.....	" 27..	.....	Ice gave way while setting nets—drowned.
Fisherman.....	Near Lockeport, N.S.....	Dec. 28..	.....	Cast adrift in storm.
<b>MINING, NON-FERROUS SMELTING AND QUARRYING—</b>				
<i>Metalliferous Mining:</i>				
Chute blaster.....	Creighton Mines, Ont.....	Oct. 10..	27	Fell through an ore pass.
Miner.....	Nelson, B.C.....	" 11..	.....	Fell down tunnel.
Miner.....	Silver Centre, Ont.....	" 12..	37	Struck by falling steel.

<b>MINING, NON-FERROUS SMELTING AND QUARRYING—</b>				
<i>Concluded</i>				
<i>Metalliferous Mining—</i>				
<i>Concluded</i>				
Miner.....	Timmins, Ont.....	Oct. 26.....		Fall of rock.
Labourer.....	South Porcupine, Ont....	" 31.....		Fall of rock.
Muckers (2).....	Timmins, Ont.....	Nov. 1.....	{26}	Dynamite explosion. Flame from lamp came in contact with explosive.
Miner.....	Surf Inlet, B.C.....	" 3.....	19	Fell from skip.
Miner.....	Surf Inlet, B.C.....	" 3.....	23	Fell into ore pass.
Mucker.....	Cobalt, Ont.....	" 13.....	21	Fall of rock in stope.
Miner.....	Galetta, Ont.....	" 19.....		Fall of rock.
Motorman at mine.....	Schumacher, Ont.....	" 22.....	23	Fall of rock.
Miner.....	Connaught, Ont.....	" 28.....	32	Fell down shaft.
			over	
Miner.....	South Porcupine, Ont....	Dec. 5.....	21	Fell down stope.
Motorman's helper.....	Le Roi Mine, B.C.....	" 20.....	51	Jumped off moving motor, foot caught throwing him down—run over.
Labourer.....	Cobalt, Ont.....	" 30.....	42	Caught in skip.
<i>Coal Mining:</i>				
Chain runner.....	Inverness, N.S.....	Oct. 5.....		Thrown against slope roof when boxes left track.
Miner.....	Cumberland, B.C.....	" 10.....		Fall of rock.
Miner.....	Rosedale, Alta.....	" 10.....		Fall of rock when examining result of blast too soon.
Miner.....	Aerial, Alta.....	" 12.....	41	Fall of roof.
Cager.....	Edmonton, Alta.....	" 12.....	24	Struck by descending hoist.
Miner.....	Glance Bay, N.S.....	" 16.....		Fall of stone from roof.
Miner.....	Canmore, Alta.....	" 22.....	35	Fall of rock.
Miner.....	Montague, N.S.....	" 28.....	29	Fell from skip.
Miner.....	Little Bras d'Or, N.S....	" 29.....		Touched live wire in flooded mine.
Miner.....	Glance Bay, N.S.....	" 30.....		Fall of coal.
Miner.....	Wayne, Alta.....	Nov. 17.....	45	Fall of roof rock fractured leg—blood-poisoning.
Shooter and loader.....	New Waterford, N.S....	" 24.....		Crushed against full box and rib.
Miner.....	Nanaimo, B.C.....	" 26.....	44	Fall of rock.
Miner.....	Nordegg, Alta.....	Dec. 3.....	54	Fall of rock.
Miner.....	Springhill, N.S.....	" 20.....	30	"Bump" caused fall of rock.
Miner.....	Birch Grove, N.S.....	" 22.....		Fall of coal.
Miner.....	Dominion, N.S.....	" 27.....		Delayed blast.
<i>Non-Metallic mineral mining and quarrying:</i>				
Foreman.....	Black Lake, Que.....	Oct. 13.....	45	Electrocuted. Signal bell came in contact with blasting wires.
Labourer.....	Woods Harbour, N.S....	" 23.....		Buried in slide in gravel pit.
Teamster.....	Brookville, N.S.....	Nov. 14.....		Caught by slide of mud and gypsum from top of quarry.
Foreman.....	Black Lake, Que.....	" 15.....	31	Fall of roof rock.
Mine foreman.....	Theftord Mines, Que....	" 20.....	31	Struck by falling rock.
Powdermen (2).....	Montreal, Que.....	" 1.....	{41 {30}	Explosion while tamping dynamite in drill hole.
			{42 {24 {25 {20}	
Teamsters (4).....	Kenogami, Que.....	Dec. 18.....		Buried under gravel slide.
<b>MANUFACTURING—</b>				
<i>Vegetable foods, drink and tobacco:</i>				
Bread deliveryman.....	Brantford, Ont.....	Nov. 1.....	40	Train struck wagon.
<i>Animal edible products:</i>				
Cannery worker....	Lagoon Bay, B.C.....	Oct. 12.....	54	Struck by iron when retort for cooking salmon exploded.
Milk deliverer.....	Lyndhurst, Ont.....	" 15.....	66	Thrown from wagon.
Clerk with milk company.....	Brockville, Ont.....	" 18.....	28	Burned.
Employee at dairy.....	Toronto, Ont.....	Nov. 29.....	23	Crushed by elevator.
Employee at packing plant.....	Toronto, Ont.....	Dec. 3.....		Electrocuted. Touched live wire while operating elevator against orders.

## FATAL INDUSTRIAL ACCIDENTS DURING THE LAST QUARTER OF 1923 (Continued)

Trade or Industry	Locality	Date	Age	Cause of Fatality
<b>MANUFACTURING—Con.</b>				
<i>Textiles:</i>				
Wool picker.....	Guelph, Ont.....	Nov. 16 ..	50	Caught in machinery.
Operators (2).....	Hamilton, Ont.....	Dec. 5 ..	{ <sup>21</sup> ..}	Burned. Spark from blower believed to have ignited dyed cotton being spread in bin.
Card tender.....	Guelph, Ont.....	" 21 ..	16	Caught in shafting suspended from ceiling while placing belt on pulley.
<i>Rubber goods:</i>				
Employee of rubber works.	Merritton, Ont.....	Nov. 27 ..	36	Crushed under heavy weight when moving same.
<i>Pulp, paper and paper goods:</i>				
Employee of paper mill.	Belleville, Ont.....	Oct. 15 ..	66	Caught in shafting.
Employee of paper mill.	Kapuskasung, Ont.....	Nov. 13 ..	22	Drowned while crossing river to main office.
Employee of paper mill.	Iroquois Falls, Ont.....	" 22 ..	56	Struck by block from pile.
Employee at paper mill.	Sault Ste. Marie, Ont....	" 24 ..	15	Skull fractured (no further particulars).
Printer with paper company.	New Toronto, Ont.....	Dec. 11 ..	41	Fell off platform.
Employee at paper mill.	Iroquois Falls, Ont.....	" 11 ..	53	Struck by block from pile.
Teamster at paper mill.	Sturgeon Falls, Ont.....	" 15 ..	38	Crushed by cylinder.
<i>Saw and planing mills:</i>				
Labourer.....	Fraser Mills, B.C.....	Oct. 1 ..	65	Caught between timber on wharf and crane.
Labourer.....	New Westminster, B.C..	" 4 ..	39	Crushed between rolls.
Shingle Sawyer.....	Marpole, B.C.....	" 12 ..	48	While changing saws tooth pierced chin— infection.
Mill hand.....	Victoria, B.C.....	" 16 ..	66	Struck by lath bolt which flew from machine.
Employee at saw-mill.	Blind River, Ont.....	" 24 ..	18	Eye penetrated by splinter which flew back from machine.
Labourer.....	Edmonton, Alta.....	" 26 ..	50	Fell off motor truck.
Oiler.....	Fraser Mills, B.C.....	Nov. 2 ..	61	Clothing caught in revolving shaft.
Teamster.....	Gogame, Ont.....	" 4 ..	23	Kicked by a horse.
Mill hand.....	St. Jacques, N.B.....	" 19 ..	26	Struck by belt which slipped from pulley.
Mill hand.....	Campbellton, N.B.....	" 20 ..	26	Struck by log. Chain holding logs together broke while hoisting.
Block piler.....	Vancouver, B.C.....	" 21 ..	36	Struck by saw which flew from shaft.
Labourer.....	Georgetown Mills, B.C..	" 24 ..	36	Struck by stick which caught while putting belt on pulley.
Shingle mill employee.	Seymour Creek, B.C.....	Dec. 5 ..	48	Crushed when tree fell on bunkhouse.
Mill hand.....	York Co., N.B.....	" 11 ..	26	Clothing caught in belting.
Mill hand.....	Merritt, B.C.....	" 13 ..	28	Thrown onto saw when carriage moved forward while removing sawdust.
Mill hand.....	Vancouver, B.C.....	" 13 ..	28	Caught in swing saw after trimming cant.
Mill hand.....	West Montrose, Ont.....	" 19 ..	38	Fell on saw.
Foreman.....	Stewiacke, N.S.....	" 31 ..	38	Clothing caught in revolving shaft.
<i>Iron, steel and products</i>				
Watchman.....	Swansea, Ont.....	Oct. 1 ..	65	Burned. Benzol ignited and set fire to his clothing.
Watchman.....	Hamilton, Ont.....	" 1 ..	63	Fell off ladder.
Employee.....	Hamilton, Ont.....	" 1 ..	56	Crushed beneath dynamo casting which toppled while sand was being removed from base.
Workman at auto works.	Merritton, Ont.....	" 10 ..	47	Struck by revolving pin and knocked from step ladder.
Machinist.....	Parkhill, Ont.....	" 15 ..	48	Crushed finger.
Employee at foundry.	Three Rivers, Que.....	" 17 ..	20	Burned by molten metal when cauldron upset.
Employee at steel works.	Sydney, N.S.....	" 18 ..	20	(No particulars).
Employee at car shop.	Montreal, Que.....	" 19 ..	39	Struck by wood flying from circular saw.

<i>Iron, steel and products Continued</i>				
Car repairer.....	Mimico, Ont.....	Oct. 19..	27	Struck by car.
Employee at brass works.	Toronto, Ont.....	" 21..	.....	Burned.
Employee of steel works.	Montreal, Que.....	" 20..	58	Shock after rescue from drowning. Thrown between dock and barge when foot caught while descending ladder.
Car repairer.....	Blaine Lake, Sask.....	" 26..	.....	Caught while putting in a clutch on engine.
Carpenter.....	Kapuskasing, Ont.....	Nov. 1..	.....	Struck by light engine.
Mechanic at tool works.	Dundas, Ont.....	" 6..	36	Burned.
Labourer.....	Niagara Falls, Ont.....	" 7..	.....	Electrocuted.
Machinist.....	Hamilton, Ont.....	" 9..	36	Crushed by machine.
Teamster.....	Hamilton, Ont.....	" 20..	37	Struck by falling jib crane boom.
Fitter at railway shop.	Kenora, Ont.....	" 20..	29	Struck by steel bar which flew from wheel spoke when engine moved.
Mechanic.....	Riverside, N.S.....	" 23..	.....	Fell against pipe.
Railway mechanic.	Montreal, Que.....	" 25..	64	Struck by bolt in belting.
Machine runner.....	New Glasgow, N.S.....	Dec. 19..	.....	Hit by connecting rod of machine.
Teamster at stove factory.	Preston, Ont.....	" 22..	37	Fell through roof.
Helper at pipe factory.	Ford, Ont.....	" 31..	21	Fell off platform.
<i>Non-ferrous metal products</i>				
Marble polisher....	Montreal, Que.....	Dec. 5..	35	Struck by descending elevator.
Labourer at nickel works.	Port Colborne, Ont.....	" 14..	36	Fell into coal bin.
<i>Chemical and allied products</i>				
Salesman with chemical company	Powassan, Ont.....	Oct. 10..	27	Thrown from auto.
<b>CONSTRUCTION—</b>				
<i>Buildings and structures</i>				
Carpenter.....	London, Ont.....	Oct. 1..	79	Fell off roof.
Workman at bridge	Prince Albert, Sask.....	" 2..	.....	Fell from pier hold.
Wrecker.....	Hamilton, Ont.....	" 3..	.....	Struck by falling board.
Excavators (2)....	Quebec, Que.....	" 3..	38-48	Collapse of wall.
Foreman at bridge work.	Brantford, Ont.....	" 3..	.....	Electrocuted. Cable broke and fell across railway feed wires.
Workman.....	Kenogami, Que.....	" 6..	.....	Elevator fell down shaft.
Labourer.....	Edmonton, Alta.....	" 6..	18	Fell from building.
Rivetter.....	Montreal, Que.....	" 6..	35	Fall. Missed footing crossing girder.
Electrician.....	Vancouver, B.C.....	" 24..	55	Fell from ladder.
Carpenter.....	Port Moody, B.C.....	" 24..	57	Fell from mill.
Workman.....	London, Ont.....	Nov. 2..	73	Cement block slid on to workman digging a hole.
Carpenter.....	Montreal, Que.....	" 12..	50	Fell from upper floor of building.
Workman at bridge.	Montreal, Que.....	" 13..	60	Fell from bridge.
Labourer.....	Asbestos, Que.....	" 14..	44	Struck by falling beam.
Wrecker.....	Cargill, Ont.....	" 14..	60	Crushed under smoke stack when rope broke.
Roofer.....	Fairview, N.S.....	" 19..	40	Fell from roof.
Plumber.....	Victoriaville, Que.....	" 22..	.....	Electrocuted when pipe touched electric wire.
Wrecker.....	Montreal, Que.....	" 26..	25	Slipped and fell through floor.
Labourer.....	Toronto, Ont.....	Dec. 1..	.....	Fell from scaffold.
Labourer.....	Hamilton, Ont.....	" 1..	.....	Fell from chimney.
Labourer.....	Montreal, Que.....	" 7..	21	Struck by arm of derrick when rope snapped.
Paperhanger.....	Toronto, Ont.....	" 11..	41	Fractured skull. (No further particulars).
Employee at nickel plant.	Port Colborne, Ont.....	" 17..	38	Fell from a scaffold.
Carpenter for mine.	Anyox, B.C.....	" 18..	.....	Fell from ladder.
Workman.....	Montreal, Que.....	" 18..	34	Fell against iron crossbar in shaft.
Rivetter.....	Montreal, Que.....	" 20..	24	Struck head against joist as scaffold fell.
Foreman.....	Toronto, Ont.....	" 20..	.....	Fell off scaffold.
Labourer.....	Port William, Ont.....	" 22..	.....	Crushed by ladder.

## FATAL INDUSTRIAL ACCIDENTS DURING THE LAST QUARTER OF 1923 (Continued)

Trade or Industry	Locality	Date	Age	Cause of Fatality
<b>CONSTRUCTION—Concluded.</b>				
<i>Railway construction</i>				
Labourer.....	Meaford, Ont.....	Oct. 22.....	.....	Cave-in of earth.
Labourer.....	Montreal, Que.....	Dec. 6.....	57	Struck by train.
Labourer.....	Foleyet, Ont.....	" 24.....	.....	Struck by tree.
<i>Shipbuilding</i>				
Teamster.....	Ottawa, Ont.....	Dec. 28.....	.....	Struck by flying windlass when cable broke.
<i>Miscellaneous construction</i>				
Employee at road work.	Litchfield, N.S.....	Oct. 6.....	.....	Explosion of dynamite caps. Was carrying detonators in pocket.
Contractor.....	St. Lazare, Que.....	" 15.....	48	Train struck motor truck.
Corporation labourer.	Quebec, Que.....	Nov. 17.....	35	Struck by automobile.
Municipal employee	Montreal, Que.....	" 20.....	39	Suffocated. Cave-in while widening gully.
Teamster.....	Cochrane, Ont.....	" 28.....	43	Crushed by a horse.
Foreman.....	Island Falls, Ont.....	" 26.....	35	Drowned.
Labourer.....	Island Falls, Ont.....	" 29.....	.....	Drowned.
Employee at power plant.	La Gabelle, Que.....	" 24.....	29	Fell from dam..
Workmen at sewer work (2).	Ottawa, Ont.....	" 27.....	25-26	Cave-in of sewer.
Employee at power plant.	La Gabelle, Que.....	Dec. 4.....	38	Fell from dam.
Labourer.....	La Gabelle, Que.....	" 5.....	26	Fell from scaffold.
Labourer.....	Lunenburg, N.S.....	" 8.....	.....	Fell from motor truck. Artery severed. Bled to death.
Workman at power plant.	Campbellford, Ont.....	" 12.....	20	Struck by rock, knocked off ledge by hoist.
Workman at power plant.	La Gabelle, Que.....	" 21.....	42	Fell from scaffold.
Foreman at power plant.	Stinson, Ont.....	" 26.....	50	Fall. Struck by swinging door of cement carrier while standing on trestle.
<b>TRANSPORTATION AND PUBLIC UTILITIES—</b>				
<i>Steam Railways:</i>				
Yard foreman.....	Rivière du Loup, Que... Oct. 6.....	6.....	42	Fell between cars.
Pumpman.....	Aldersyde, Alta.....	" 6.....	30	Train struck speeder.
Brakeman.....	Montreal, Que.....	" 10.....	35	Struck by train.
Brakeman.....	Wolseley, Sask.....	" 11.....	28	Fell between cars.
Conductor.....	Montreal, Que.....	" 27.....	38	Struck head on car.
Trainman.....	Shawinigan Quarry, Que. " 20.....	20.....	34	Head caught between door of car and wheel.
Switchman.....	Port Arthur, Ont.....	" 22.....	31	Struck and run over by box car.
Brakeman.....	St. Onge, Que.....	" 24.....	42	Collision in yard.
Foreman.....	Ruel, Ont.....	" 25.....	.....	Struck by train.
Yardman.....	Fort William, Ont.....	" 30.....	21	Struck by moving engine.
Conductor.....	Sirdar Sd., B.C.....	Nov. 2.....	55	Fell from steps of moving caboose.
Fireman.....	Winnipeg, Man.....	" 5.....	30	Collision in yard.
Section labourer...	Winnipeg, Man.....	" 9.....	40	Run over by engine.
Hump rider.....	Neebing, Ont.....	" 13.....	.....	Fell from side of car.
Fireman.....	Lindsay, Ont.....	" 13.....	.....	Rear end collision.
Fireman.....	Glenorchy, Ont.....	" 14.....	.....	Fearing a collision jumped from engine.
Yardman.....	Fort William, Ont.....	" 17.....	49	Caught between couplings.
Carman.....	Swift Current, Sask.....	" 23.....	57	Run over by train while coupling air hose.
Brakeman.....	Belle River, Ont.....	" 25.....	34	Head struck car on passing train.
Brakeman.....	Joliette, Que.....	" 25.....	49	Caught between coupling lever and engine.
Sectionman.....	McGuire, B.C.....	Dec. 3.....	48	Struck by train and knocked off bridge.
Section foreman...	Capreol, Ont.....	" 8.....	55	Struck by shunting car.
Coalman.....	Nipigon, Ont.....	" 13.....	.....	Burned. Gasoline explosion.
Ashpitan.....	Sherbrooke, Que.....	" 15.....	36	Run over. Fell when trying to board moving engine.
Engineer and fireman (2).	Ena, Ont.....	" 17.....	40-32	Head-on collision.
Brakeman.....	Ingersoll, Ont.....	" 18.....	27	Run over. Fell when trying to board moving train.
Switchman.....	Drumheller, Alta.....	" 14.....	40	Knocked down and run over by train.

Trade or Industry	Locality	Date	Age	Cause of Fatality
<b>TRANSPORTATION AND PUBLIC UTILITIES—Continued</b>				
<i>Steam Railways—Con.</i>				
Coal shoveller.....	Antigonish Station Yard, N.S.	Dec. 22		Heart failure probably due to over exertion.
Car inspector.....	Transcona, Man.	" 26	28	Run over while coupling cars.
Brakeman.....	Midway, Ont.	" 27	38	Collision in yard.
Sectionman.....	Fort William, Ont.	" 29		Struck by engine..
Fireman.....	Port Arthur, Ont.	" 29		Crushed between cars.
Signalman.....	Port Arthur, Ont.	" 31	59	Dislodging signal-strain.
<i>Electric Railways:</i>				
Motorman.....	near Windsor, Ont.	Nov. 16		Head-on collision.
Section hand.....	Toronto, Ont.	Dec. 3		Struck by work car on switch.
<i>Water transportation:</i>				
Deckhand.....	near Kingston, Ont.	Oct. 1	15	Drowned. Fell from tug railing.
Deckhand.....	Cornwall, Ont.	" 1	18	Crushed. Caught between freighter and stone coping.
Labourer.....	Albert Co., N.B.	" 4	53	Fell into hold of vessel.
Engineer.....	Montreal, Que.	" 5	37	Drowned. Was jumping from steamer to edge of canal.
Sailors (2).....	At sea (700 miles off New York.)	" 5	-60	Swept overboard from water-logged schooner.
Engineer and Fireman (2).....	Selkirk, Man.	" 5	-32	Scalded. Pipe in engine room broke when tugs collided.
Oiler on steamer.....	Montreal, Que.	Nov. 6	24	Drowned. Fell from boat into canal basin.
Cook.....	Montague Harbour, B.C.	" 9		Fell overboard from tug.
Firemen (3).....	Delaware River, U.S.A.	" 11		Explosion of boiler.
Master of tug.....	St. John, N.B.	" 18	56	Drowned. Fell into harbour.
Longshoreman.....	Vancouver, B.C.	" 19	40	Struck by log swinging into hold.
Scowman.....	Courtenay Bay, B.C.	" 19	53	Drowned. Attempted to swim to shore when boat filled with water.
Mate on schooner.....	Ecum Secum, N.S.	" 20		Arm torn off by winch.
Government employee.....	Port Colborne, Ont.	" 20	50	Fell into hold of boat.
Fireman.....	Vancouver, B.C.	" 21	25	Fell overboard—drowned.
Janitor at wharf.....	Halifax, N.S.	" 22		Fell off wharf—drowned.
Longshoreman.....	Vancouver, B.C.	" 23	45	Crushed by swinging lumber.
Fireman.....	Halifax, N.S.	" 28		Washed overboard.
Dredge employee.....	Dartmouth, N.S.	" 25		(No particulars.)
Deckhand.....	Buffalo, N.S.	" 1	22	Fell into hold.
Night watchman on dredge.....	Goderich, Ont.	" 1	31	Drowned.
Engineer on tug.....	Slocan River, B.C.	" 9		Struck by log which jumped during jam.
Sailor.....	Sarnia, Ont.	" 13	27	Drowned.
Coal trimmer.....	Montreal, Que.	" 20	25	Suffocation. Buried under pile of coal in hold.
Stevadore.....	Montreal, Que.	" 30		Drowned. Slipped on wharf edge.
Dockman.....	Finches Siding, Ont.	Dec. 3	31	Struck by car.
Deckhand.....	Lunenburg, N.S.	" 3		Fell over wharf—drowned.
Sailor with oil company.....	near Hamilton, Ont.	" 3		Drowned.
Fireman.....	Montreal, Que.	" 13	35	Drowned while trying to rescue cook as tug capsized.
Lighthouse keeper.....	Georgian Bay, Ont.	" 13		Drowned.
Watchman.....	Sorel, Que.	" 16		Drowned.
Longshoreman.....	Dollarton, B.C.	" 7		Fell overboard—drowned.
Carpenter's helper.....	Vancouver, B.C.	" 21	21	While taking off hatch cover, over-balanced and fell into hold.
Captain, cook, and fireman (3).....	Pedder Bay, B.C.	" 24	64-56-55	Drowned when tug foundered.
Longshoreman.....	Vancouver, B.C.	" 27	34	Tripped over beam and fell down bunker hatch.
Labourer.....	Vancouver, B.C.	" 27	68	Pneumonia resulting from falling overboard from tug.
<i>Storage and local transportation:</i>				
Laundry driver.....	Port Arthur, Ont.	Oct. 4		Slipped off dock while delivering parcel to boat.
Teamster.....	Edmonton, Alta.	" 6		Wagon upset when wheels sank into trench.
Teamster.....	Montrose, N.S.	" 8	65	Fell under wheels while moving a boiler.
Driver.....	St. Clements, Ont.	" 17		Thrown from wagon when ho rses bolted

FATAL INDUSTRIAL ACCIDENTS DURING THE LAST QUARTER OF 1923 (Concluded)

Trade or Industry	Locality	Date	Age	Cause of Fatality
<b>TRANSPORTATION AND PUBLIC UTILITIES—</b>				
<i>Concluded</i>				
<i>Storage and local transportation—Con.</i>				
Driver.....	Shawville, Que.....	Nov. 2..	80	Kicked by horse.
Chauffeur.....	Brockville, Ont.....	" 5..		Burned by back fire of auto truck.
Carter.....	Riviere du Loup, Que..	" 12..	62	Crushed under load of cordwood which upset.
Teamster.....	Yahk, B.C.....	" 16..	41	Struck by rock from blast.
Driver.....	Cypress Hills, Sask....	" 30..		Load of lumber upset in coulee during blizzard.
<i>Public utilities, n.e.s.:</i>				
Workman.....	near Thetford Mines, Que.	Oct. 6..		Electrocuted. Came in contact with high tension wire.
Electrician.....	Ballantyne Pier, B.C....	" 24..		Fell from roof of pier.
Electrician.....	between Montmagny and Cap St. Ignace, Que.	" 31..		Electrocuted. Came in contact with transmission line.
Employee of power commission.	Fingal, Ont.....	" 29..		Fell from tree.
Labourer.....	Great Falls, Man.....	Nov. 20..		Came in contact with high tension cable.
<b>TRADE—</b>				
<i>Wholesale:</i>				
Elevator operator..	Vancouver, B.C.....	Oct. 2..	40	Fell down shaft.
<i>Retail:</i>				
Peddler.....	Truro, N.S.....	Oct. 13..		Horse and wagon overturned in bog.
Labourer.....	Selkirk, Man.....	" 24..		Fell on ice tongs—infection.
Employee.....	Montreal, Que.....	Dec. 6..	35	Struck by descending hoist.
<b>SERVICE—</b>				
<i>Public and municipal, n.e.s.:</i>				
Constable.....	Winkler, Man.....	Oct. 17..		Gasoline explosion.
Fireman.....	Calgary, Alta.....	" 29..	30	Riding on hose wagon when steering gear broke.
Constable.....	Quebec, Que.....	Dec. 13..	34	Thrown from horse.
Fireman.....	Montreal, Que.....	" 20..	33	Collapsed while at work.
<i>Domestic and Personal:</i>				
Window cleaner....	Toronto, Ont.....	Nov. 5..		Fell from window.
Kitchenman.....	Montreal, Que.....	" 27..	40	Scalded. Opened valve by mistake.
Cleaner at theatre.	Montreal, Que.....	Dec. 25..	45	Fell backward while washing stairs.
Furnace man.....	Montreal, Que.....	" 14..	38	Fell down stairs.
Janitor.....	Toronto, Ont.....	" 19..		Fell down stairs.
<b>MISCELLANEOUS—</b>				
Workman.....	Quebec, Que.....	Oct. 15..		Caught between gasoline engine and belt. Fell into machine.
Labourer.....	Fort Clarence, N.S.....	" 29..		Explosion while removing detonator from shell.
Labourer.....	Prince Albert, Sask....	Nov. 22..	43	Fall of elevator when cable slipped from clasps.
Electrician.....	Nicolet, Que.....	Dec. 6..	over 21	Seized live wire while installing radio.

SUPPLEMENTARY LIST OF ACCIDENTS OCCURRING IN 1923 PREVIOUS TO THE  
LAST QUARTER

Trade or Industry	Locality	Date	Age	Cause of Fatality
Woodsman.....	Near Owen Sound, Ont.	Jan. 11..	35	Crushed by falling tree (died Jan. 8, 1924).
Logger.....	Hagensburg, B.C.....	June 29..	55	Struck by log from pile.
Electric railway employee	Toronto, Ont.....	July 7..	.....	Crushed between cars while coupling.
Logger.....	Coquitlam, B.C.....	" 9..	40	Projected material from blast.
Logger.....	Stillwater, B.C.....	" 11..	35	Struck by log falling from train.
Machinist, with rail company.	Stratford, Ont.....	" 18..	56	Fell on floor—hurt back.
Labourer at quarry	Dundas, Ont.....	" 21..	.....	Struck by car.
Car repairer at logging camp.	Vancouver, B.C.....	" 24..	48	While working under car a train load of logs was switched to siding—crushed.
Carpenter.....	Niagara Falls, Ont.....	" 30..	63	Fell from scaffold.
Window cleaner....	Winnipeg, Man.....	Aug. 4..	.....	Fell from window ledge (died Oct. 21, 1923).
Railway foreman...	Myrtle Point, B.C.....	" 16..	46	Crushed while coupling engine.
Logger.....	Cowichan Lake, B.C.....	" 20..	19	Struck by a falling tree.
Priest.....	St. Philomenede, Fortierville, Que.	" 27..	.....	Was blasting rocks on a field clearing.
Workman at building construction.	Niagara Falls, Ont.....	about Sept. 7..	62	Fell from scaffold (died Dec. 7, 1923).
Barge tower.....	St. John, Que.....	" 11..	66	Found dead alongside barge (No further particulars).
Labourer with electric commission.	St. Thomas, Ont.....	" 14..	29	Fell off tree.
Electric railway employee.	Montreal, Que.....	" 18..	35	Arm crushed between couplers.
Employee of bridge company.	Montreal, Que.....	" 19..	19	Fell from scaffold at elevator.
Sailor.....	Montreal, Que.....	Sept. 21..	32	Drowned.
Barker.....	Temiskaming, Que.....	" 22..	over 21	Fell on shaft.
Workman.....	Wyatt Bay, B.C.....	" 26..	44	Struck by falling tree uprooted by another.
Carter.....	Longueuil, Que.....	" 26..	19	Drowned while watering horse at river.

### IMMIGRATION TO CANADA DURING FOURTH QUARTER OF 1923

THE following table compiled from information furnished by the Department of Immigration and Colonization gives some details respecting the total number of immigrants into Canada during the fourth quarter of 1923. For purposes of comparison the figures for the previous quarter and for the corresponding quarter of 1922 are also given.

The table on page 199 gives the nationality, sex, occupation and destination of all immigrants, who entered

Canada during the quarter under review.

#### IMMIGRATION TO CANADA DURING FOURTH QUARTER OF 1923

Period 1923	Great Britain and Ireland	U.S.A.	Other Countries	Totals
October.....	5,651	1,854	4,670	12,175
November.....	4,881	1,328	5,374	11,583
December.....	1,634	1,084	3,871	6,589
Fourth Quarter, 1923.....	12,166	4,266	13,915	30,347
Third Quarter 1923.....	29,408	6,716	17,257	53,381
Fourth Quarter 1922.....	6,184	3,951	3,781	13,916

## RECENT LEGAL DECISIONS AFFECTING LABOUR

THE two legal decisions which are summarized below deal respectively with an action for damages brought by certain workmen on account of a disease contracted when at work, and an action for compensation under the Workmen's Compensation law of Quebec. A note is also added with reference to the aban-

donment of an appeal in a case affecting employment agents in British Columbia. Elsewhere in this issue reference is made to a case concerning the validity of the Industrial Disputes Investigation Act, 1907, and to an appeal against a conviction for seditious libel in Nova Scotia.

### Owner of Contaminated Well Liable for Illness of Workmen Drinking from It

Five bricklayers employed by a contractor in building a warehouse on factory premises contracted typhoid fever. They brought an action against the company owing the property claiming damages for the injury to their health which they attributed to drinking water from a contaminated well on the company's premises.

The case was tried in the High Court Division of the Supreme Court of Ontario before a jury. A number of questions were submitted to the jury which with their answers were as follows:

1. Was the water in the well . . . at the time the plaintiffs were working upon the defendants' premises impregnated with typhoid germs? A. Yes.

2. If so, was the condition of the well caused by or owing to negligence or want of care upon the part of the defendants? A. Yes.

3. If so, in what way were the defendants negligent, or wanting in the exercise of reasonable care, in reference to the well? A. (a) In not having water oftener analysed as recommended by sanitary engineers and owing to insanitary location of said well, especially in summer months; (b) in not advising factory help and other workmen on the premises of the suspicious state of the water in said well; (c) in not digging a new well, as recommended by sanitary engineers.

4. Was the illness of the plaintiffs caused by drinking water from the well? A. Yes.

5. Notwithstanding the negligence of the defendants, if any, could the plain-

tiffs, nevertheless, by the exercise of reasonable care, have avoided the consequences of the defendants' want of care? A. No.

The jury assessed damages to each of the five plaintiffs.

The Court declared in its judgment that if the rights and liabilities of the parties to these actions were governed by the provisions of the Public Health Act or the Factory, Shop and Office Building Act or if the common law relation of master and servant existed between the plaintiffs and defendants, the plaintiffs were entitled to judgment for the amount found by the jury.

It was held, however, by the Court that the relation of master and servant did not exist between the plaintiffs and the defendant company; that the protection of persons working under the conditions and in the interest of the plaintiffs was not within the purview of the Factory, Shop and Office Building Act and that no right of action was conferred on the plaintiffs by the Public Health Act, sections 73 and 74 of which were relied upon by their counsel.

Nevertheless, the plaintiffs were entitled to recover; they were not trespassers either in being upon the land around the well or in drawing and using water from it; they were licensees or invitees, and with higher rights than mere invitees; they were lawfully upon the factory premises, engaged in a work in which their employer, and they through him, and the defendants had a common interest; they had the clearly implied right to avail themselves of the obvious facilities the property afforded

for carrying out the common purpose of the contracting parties. There was no drinking water upon the premises other than that obtained from this well. If the defendants did not expect and intend the employees of the contractor to use it, they should have said so. They did not say so, and they should at least have given warning on June 25, 1920, when these plaintiffs came to work upon the

premises, for they had themselves been warned and knew of the danger two months before.

By decision of the Court the parties were given liberty to amend their pleadings and judgment was granted in each action for the damages assessed with costs.

(Ontario—*Schurr vs. Dominion Cannery Limited*).

#### Method of Fixing Compensation under Quebec Workmen's Compensation Law

In an action for compensation under the Workmen's Compensation law of Quebec there was a difference of opinion between the injured workman and his employer as to the basis upon which the capital sum for permanent partial disability should be calculated. It was admitted that it should be based on annual wages of \$600, and an estimate of 60 per cent as the loss of capacity was agreed upon. The plaintiff was therefore entitled to recover the capital of an annual payment of \$180. The plaintiff claimed that he was entitled to recover on the basis of \$1,635 per \$100, which he contended was the rate charged by a licensed insurance company in the case of a man of his age, part of this sum being for the cost of administra-

tion. On behalf of the defendant employer it was claimed that the cost of annuity for a person of the plaintiff's age calculated at 5 per cent was \$1,345 per \$100 according to the Carlisle mortality tables. It was claimed that the plaintiff was entitled to this capital only, without provision for costs and administration, seeing that there was not to be any administration. By the judgment of the Superior Court it was held that the plaintiff's contention was well founded in law and the capital to which the plaintiff was entitled was therefore calculated at \$1,635 per \$100, making \$2,943 under this head.

(Quebec—*Bouchard vs. Canadian National Railways*.)

#### Appeal against Judgment Fining Employment Agent in British Columbia Abandoned

In the issue of the *Labour Gazette* for November, 1923, on pages 1341 and 1342, a summary is given of an action taken in British Columbia against a private employment agent on information laid by the provincial Department of Labour. The charge was based on the ground that the agency was being operated in violation of the British Columbia Employment Agencies Act, which forbids private employment agencies being conducted for profit. The case was dismissed by the magistrate but on appeal by the Crown to the County Court the appeal was al-

lowed, the court holding that it made no difference whether the agent was paid in a lump sum as a monthly salary, or so much per head. As this was regarded as a test case the minimum fine of \$10 was imposed.

It was stated in the summary that an appeal had been taken in this case, but from information that has since been received it would appear that the appeal is to be abandoned. The judgment of the court therefore stands.

(British Columbia—*The Crown vs. Dumeresq*.)

PREPARED AND EDITED IN  
THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

VOLUME 24]

MARCH, 1924

[NUMBER 3

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

**I**N addition to the regular monthly articles this issue of the *LABOUR GAZETTE* contains a review of industrial accidents in Canada for the year 1923, and various other articles on labour and industrial subjects.

### Monthly summary

Reports from the Employment Service of Canada for the month of January, 1924, show a slight increase in the daily average business as compared with the preceding month, while maintaining approximately the same level as during January, 1923.

At the beginning of February the percentage of unemployment among members of trade unions stood at 7.5 as compared with 7.2 per cent at the beginning of January and 7.8 per cent at the beginning of February, 1923.

The average cost of a weekly family budget of twenty-nine staple foods was \$10.75 at the beginning of February as compared with \$10.78 for January; \$10.53 for February, 1923; \$10.61 for February, 1922; \$14.08 for February, 1921; \$16.92 for June, 1920 (the peak); \$15.77 for February, 1920; \$12.54 for February, 1918; and \$7.75 for February, 1914. In wholesale prices the index number calculated by the Dominion Bureau of Statistics based upon prices in 1913 as 100 stood at 156.6 for February as compared with 156.7 for January; 153.6 for February, 1923; 153.5 for February, 1922; 191.1 for February, 1921; 256.9 for May, 1920 (the peak); and 238.3 for February, 1920.

### Bill to amend Ontario Workmen's Compensation Act

A bill to amend the Workmen's Compensation Act was mentioned in the Speech from the Throne at the opening of the Ontario Legislature of February 6 among other measures to be introduced by the government during the session. A delegation consisting of thirty-four representatives of organized labour in Ontario interviewed Premier Ferguson and members of the provincial government on March 5 in reference to the proposed bill. It was understood that it would abolish the existing Workmen's Compensation Board and place the ad-

ministration of the act in the hands of an administrator, who would dispose of the bulk of claims under the act. The more difficult and problematic cases would be dealt with by a Board of Review, this Board to include two members of the present board, as well as a chairman, with two lawyers, one representing the workers and the other the employers. The delegates reaffirmed the position of labour in regard to workmen's compensation generally, maintaining that it should be the exclusive remedy for injured workmen, that the decisions of the Board should be final, and that there should be at least three members of the Board. They recommended moreover as a means for eliminating complaints, that there should be a careful investigation into the efficiency of the Board's medical staff. Premier Ferguson stated that the aim of the proposed legislation was to provide for the case of a worker who was dissatisfied with the Board's judgment and to have it brought before a new tribunal. Section 60 of the act, which permits the reopening of a case at any time, would not be disturbed, he said. At the invitation of the Premier the labour delegates held a conference on the bill later in the day, Mr. S. Price, chairman of the Compensation Board, and the Honourable W. F. Nickle, Attorney-General, being present. Further mention of the proposed bill will be made in the *LABOUR GAZETTE* in connection with the legislation of the session.

### Quebec commission on workmen's compensation

The Quebec Workmen's Compensation Commission which was appointed under an act passed by the provincial legislature at the second session of 1922 (chapter 38) has already held meetings at various industrial centres in the province, taking evidence from representatives of the workmen and of their employers. The public proceedings of the Commission have been somewhat delayed by the elevation of the chairman to the Bench (The appointment of Mr. Ernest Roy, K.C., of Quebec, as chairman of the Commission was noted in the *LABOUR GAZETTE* for October, 1923, page 1054). Mr. Justice

Roy recently consented to retain his position as chairman, serving without remuneration. The main recommendations of the various parties concerned have already been outlined in the *LABOUR GAZETTE*; those of the employers' organizations were given in the issue of February (page 134) and those of the organized workers were briefly outlined in the issue for January, 1924 (page 7), for December, 1923 (page 1350), and for October, 1923 (page 1095). At the session held at Montreal early in March, Mr. J. T. Foster, president of the Montreal Trades and Labour Council, proposed on behalf of the organization that the provincial workmen's compensation act should be remodelled in accordance with the recommendations of the Dominion-Provincial Commission on the Uniformity of Labour Laws (*LABOUR GAZETTE*, May, 1920). Mr. T. J. Coughlin, representing the Brotherhood of Railway Trainmen offered recommendations on the lines of a draft bill which had been submitted to the Quebec Government in 1922 by representatives of the organizations of locomotive engineers, firemen, conductors and trainmen. This draft act would create a system of collective liability of employers, establish a state fund, and extend the scope of the present act. Representatives of the Catholic and National Unions also recommended the enactment of an entirely new law on the lines of the Workmen's Compensation Act of Ontario. On the other hand the representatives of the branch of the Canadian Manufacturers' Association opposed the proposal that the government should appoint a permanent workmen's compensation commission, and recommended the continuance of the existing system by which workmen establish their claims through court procedure. They expressed condemnation of state control generally and alleged that an act such as labour desired might become a burden on industry, produce malingering on the part of the workers and hamper competition with other countries by increasing the cost of production. It is expected that the commission will present a preliminary report to the legislature during the present session.

**Compensation for non-resident dependants in Ontario**

Three men who came last year to Canada from the United Kingdom to engage in harvesting, afterwards remaining in Canada, were killed during February while

employed by the Canadian National Railways at Mimico, near Toronto. According to a report in *The Globe* (Toronto) an official of the Ontario Workmen's Compensation Board stated that the dependants of these men were entitled to compensation under the Act. The

standing of non-resident dependants of deceased workers is defined in section 8 of the Act. This section provides that such persons are entitled to benefits only to the extent to which a Canadian dependant would be entitled if the circumstances of the case were reversed, and the dependants were Canadians residing in the country concerned. However, an amendment of 1915 conferred discretionary powers upon the Board in dealing with such cases. This amendment provides that the Board may "award such compensation or sum in lieu of compensation to any such non-resident dependant as may be deemed proper, and may pay the same out of the accident fund, or order it to be paid by the employer, as the case may be."

**Selection of doctors under workmen's compensation**

A disagreement arose during February between the Workmen's Compensation Board of British Columbia and the officials of District 18, United Mine Workers of

America, over the appointment of new doctors to attend the miners in the Fernie field, and representatives of the union later conferred with the Board on the subject in Vancouver. The practice of the Board in regard to the selection of physicians to administer medical aid and other treatment is governed by section 21 of the Workmen's Compensation Act which provides in subsection (7) that while the Board has the right to select doctors, yet as a matter of policy the workmen should be allowed as far as possible to select their own doctors. This subsection reads as follows:—

Without in any way limiting the power of the Board under this section to supervise and provide for the furnishing of medical aid in every case where the Board is of the opinion that the exercise of such power is expedient, the Board shall under this section, in all cases where the circumstances, in the opinion of the Board, do not require the exercise of such power in order to procure prompt and efficient medical aid for the injured workman, permit medical aid to be administered, so far as the selection of a physician is concerned, by the physician who may be selected or employed by the injured workman or his employer, to the end that so far as possible all competent physicians without distinction may be employed and be available to injured workmen.

Under section 63 of the Act the Board may appoint physicians as well as a secretary, a chief medical officer and other officers required for the administration of the act.

**Fisheries co-operation in Quebec**

The formation of fishermen's co-operative societies in the province of Quebec, under the provisions of an act passed by the provincial legislature in 1922, was noted in the *LABOUR*

GAZETTE for November, 1923 (page 1184). The duty of encouraging the organization and activities of such societies was assigned to the new Maritime Fisheries Bureau established under the same act as a branch of the Department of Colonization, Mines and Fisheries. The act authorized provincial expenditure up to \$40,000 for a period of ten years to further the project of cold storage plants for fish at Quebec and elsewhere; to pay the expense of pupils, not to exceed three, to study fishing methods abroad; to aid in the establishment of canneries and other provisions for the encouragement of fisheries in the province. Since the passing of the act, according to replies to questions in the legislature, the department has sent one of its employees to the University of Fisheries at Seattle, Wash., to study the curing and preserving of fish. The Government have agreed to pay up to \$16,000 during five years to meet any deficit which may arise from the cold storage warehouse to be erected in the city of Quebec by the Quebec Harbour Commission at a cost of nearly half a million dollars. Six fishermen's co-operative societies in all have been organized with a total membership of 228 fishermen and a subscribed capital of \$2,320. These societies have marketed through the central organization 41,050 pounds of salt cod and 200 pounds of smelt, the fishermen receiving an average of 5 cents a pound for salt cod, 20 cents for No. 1 smelt and 25 cents for extra smelt. The amount of money expended by the province in organizing the societies, including stationery, printing and travelling, was \$1,605, with \$1,827 as salaries for the staff of the central organizations at Montreal. Any profits realized by the transactions of the organization are for the benefit of the fishermen. Their societies receive equipment and other commodities at less than market prices, the co-operative system, as the Minister explained to the legislature, eliminating the middlemen's profit. It was further stated by the Minister that no complaint from the fishermen had been received by the Department of Fisheries indicating dissatisfaction with the results so far obtained, nor had there been any complaints from the trade in general as to the use of public money in competition with private concerns.

**Children's employment permits in Quebec**

According to an official statement in the Legislative Assembly of the province of Quebec on March 3, the number of educational certificates for employment issued in various centres during the past two years by the provincial Depart-

ment of Labour to children under 16 years were as follows:—

	1922	1923
Montreal.. . . . .	2,144	2,136
Quebec.. . . . .	594	453
Hull.. . . . .	113	43
Three Rivers.. . . . .	100	80
Sherbrooke.. . . . .	98	84
Chicoutimi.. . . . .	25	30
St. Hyacinthe.. . . . .	65	25
Valleyfield.. . . . .	218	124
Lachute.. . . . .	14	9

Certificates are issued to children in accordance with amendments of 1919 to the Quebec Industrial Establishments Act. These amendments are as follows:—

Article 3835. It is forbidden for any employer in any industrial establishment, for any person carrying on any industry, trade or business, or practising a profession, for any owner, tenant or manager of a theatre, moving-picture hall, hotel or restaurant, for any telegraph company employing messengers, or in the case of printers or agents who distribute advertisements or hand bills, and for owners of department stores who employ boys or girls as messengers to employ any boy or girl less than sixteen years of age, who is unable to read and write fluently and easily.

Article 3835a. It is likewise forbidden for any boy or girl less than sixteen years of age to sell papers or carry on any business in the streets or public places, unless able to read and write fluently and easily.

Such various occupations may not, however, be continued after eight o'clock in the evening.

Article 3835b. Every boy or girl less than sixteen years of age, employed as aforesaid, in addition to the examination to which he or she may be submitted by the inspector, must have a certificate of study to the inspector's satisfaction, and produce it whenever called upon so to do.

Parents and tutors of boys and young girls must, as far as possible, come before the inspector to have the age certificates or certificates of study required by law, verified.

The form of certificates of study shall be drawn up by the chief inspector and be uniform in all parts of the Province.

Article 3835c. Boys and girls under sixteen years of age, enrolled as pupils of a night school, and who assiduously attend the classes of such school, may be authorized by the inspector to follow or continue their occupation.

No statistics are available from the employers, it was stated in the Legislature, regarding the number of children under 16 years of age who were refused admission to work in factories as not being in possession of certificates issued by the Provincial Department of Labour testifying that they are able to read and write easily.

**Special training Department of Education of in Saskatchewan Saskatchewan for the schools 1922, recently issued, shows**

that the attendance at vocational day schools in the province was 961, this number being made up of 513 students in home economics, 288 in commerce and 160 in industrial work. Vocational evening classes were attended by 1,815 students, the majority

of whom were below the standing of the second year in the high school. During the year 1,292 schools participated in fairs, the pupils who exhibited numbering 30,670. Lectures given during the year in connection with the Better Farming Train (LABOUR GAZETTE, January, 1922, page 2) were attended by 20,347 children. An interesting feature of the report is the account of the School Hygiene Branch, which maintains a staff of fourteen, consisting of a director, a nurse on the staff of each of the provincial normal schools and eleven other nurses. The work of the nurses is stated to have proved of incalculable benefit to the boys and girls of the province, and their numbers will be increased when financial conditions improve. The influence of the School Hygiene Branch on the attitude of the teachers to health education is said to have been very great. The average salaries paid to all classes of teachers during the year were lower than in 1921, the largest decrease being in the salaries of teachers with provisional certificates.

#### **First-aid provisions in Nova Scotia and other provinces**

The Workmen's Compensation Board of Nova Scotia lately issued a regulation requiring employers having more than fifteen workmen to provide and maintain in all factories or places of employment first aid kits or boxes containing specified supplies under charge of suitable persons. This regulation is intended to meet the workers' risk from infection, which is responsible for a large proportion of payments for compensation. The regulation is issued under Section 15A, subsection (9) of the Workmen's Compensation Act, which is as follows: "Employers in any industries in which it is deemed proper may be required by the Board to maintain as may be directed by the Board such first-aid appliances and service, and such transportation for an injured workman, as the Board may direct, and the Board may make such order or regulation respecting the same and how the expense thereof shall be borne as may be deemed just."

A similar provision is contained in the Workmen's Compensation Act of New Brunswick. The Mines Acts of Alberta and Ontario require first aid facilities in the mines of these provinces. The Quebec Industrial Establishments Act requires that competent first-aid agents shall be available in large establishments. In British Columbia the Ambulance Act of 1915 requires the provision of first-aid facilities in mines, camps and industries employing more than thirty persons.

#### **Piece work in clothing industry in Toronto**

The opinion of several clothing manufacturers in Toronto on the subject of the piece work system as practised in the industry were given in a recent issue of *The Globe* (Toronto). The manufacturers, it was stated, were not opposed to the principle of piece work if the conditions in piece work shops could be controlled, but they objected to the existence of "pest shops" both as being an injury to the health and morals of the people who work in them, and also because they create an impression in the public mind that bad working conditions are a general rule in the clothing industry. The better class factories, moreover, are unable to compete with the low prices of goods produced at their establishments. One of the manufacturers interviewed by the newspaper stated that this unfair competition accounts for the closing of six or seven of the largest garment factories in Toronto during the past five years. "Any reasonable person knows," he said, "that the manufacturer who endeavours to give his employees decent working conditions, such as good light, good air, good accommodation, cannot possibly produce an article at the same cost as his competitor who crowds a dozen workers into two small rooms behind a dirty showroom." Conditions were worse, it was stated, in the women's garment than in the men's clothing industry. One manufacturer declared that many workers who were earning \$37 or more for a 44-hour week in his factory, working by day in a clean, well-ventilated room, engaged in piece work in the evenings in their friends' shops, working until midnight, and turning out more coats in that time than they had produced during their 8-hour day. Another manufacturer expressed a preference for the piece work plan, by which the worker received payment according to his ability and speed, while the manufacturer was freed from the strain of maintaining a fixed wage and enabled to sell his product at a lower price to the consumer.

#### **Inquiry into production**

The first two volumes of a compendious inquiry into production have recently been issued from the press of the International Labour Office. The second volume is of particular importance, as it contains statistics on production, imports, exports, and price movements of the chief articles of world commerce for the years 1913 to 1921. The countries represented in these statistics produce nearly nine-tenths of the world's supply of goods. Volume two contains over thirteen hundred pages giving production statis-

tics of the chief articles of commerce and agriculture. There are additional chapters following the movement of textile manufacture, shipbuilding, and building construction in general. The second half of the volume deals with per capita output of labour, the principal statistics for which relate to coal production.

#### **Post offices as employment exchanges**

A novel scheme of placing unemployed workers in the outlying districts of the country is being tried out in New Zealand. Arrangements have been made by the Labour Department in Wellington with the Post and Telegraph Department, by which all postmasters act as employment agents. It is hoped that this will bring the farmers into closer touch with the labour markets in the cities. Under this arrangement, any employer desiring the services of a worker may apply at the nearest post office and if no suitable labour is available in the locality, the postmaster communicates with the nearest office of the Labour Department. Similarly, workers in need of employment communicate with the nearest postmaster, who endeavours to place him.

#### **International Association of Factory Inspectors**

At the fifth annual session of the International Labour Conference, which met at Geneva, Switzerland, early in the winter, an organization was perfected which will be known as the International Association of Factory Inspectors.

As long ago as 1919, the factory inspectors attending the first session of the Conference at Washington as delegates and advisers for their governments, met to exchange views and compare experiences in regard to their work. This has been continued each year at the annual conference, until now they have constituted their association on a definite basis, and have adopted a constitution and by-laws to govern the organization.

The object of the association, as set forth in the constitution, is to promote the international exchange of information among factory inspectors. They have limited their membership to the representatives of any national association of factory inspectors, and the chief inspector, deputy chief inspector, chief technical inspector and divisional inspectors in each country. The subject of admitting persons who are not factory inspectors shall be left to the executive committee. They will operate through the following mediums: General Assembly of Members, the Executive Committee, and a Committee of Corresponding Members, whose duty it is to communicate to each other the problems and ideas of their own members, and reply to inquiries

from other national associations. The assembly is to be held once a year, and the members in each country will elect a representative on the correspondence committee.

It is hoped that the new association will be able to contribute to the development of the international protection of workers.

#### **Joint Maritime Commission**

One of the important questions discussed by the governing body of the International Labour Office at its session in January was the Report of the Third Session of the Joint Maritime Commission, recently held in London. This Commission was definitely set up by the Genoa International Labour Conference in 1920, and it is interesting to note that at its recent session, in spite of the difficult economic circumstances with which the maritime industry is still struggling, shipowners and seamen affirmed their determination to continue to seek in common within the Joint Maritime Commission such solutions as might enable the International Labour Organization to improve the conditions of seamen.

The Commission recommended, in connection with information submitted by the office on the measures taken or contemplated by various governments for the establishment of national seamen's codes, that the office should undertake the publication of a systematic collection of the laws in force in the different countries.

A draft for an international codification of the provisions relating to articles of agreement, submitted by the office, in accordance with a resolution of the Genoa Conference, was also discussed. The Commission adjourned a decision on this draft until its next session, which it is proposed should be held September 16, 1924.

#### **Extension of working hour in Belgium**

Since May 1, 1923, the Government of Belgium has issued decrees permitting a maximum working day of nine hours during the busy season in the following industries: manufacture and repair of motor cars and bicycles; upholstery and decoration; clothing and allied trades; food trades (confectionery and ices, syrups, jams, preserved fruit, cheese, artificial ice, brewing), flax retting in streams, biscuit, ginger bread, marzipan making. The decrees were issued under Article 5 of the Belgian Eight-hour Day Act of June 14, 1921. Generally the months in which a nine-hour day is permitted are specified, and a seven-hour day is fixed for an equivalent number of other specified months, making eight hours the average working day for the year. By another decree of May 22, 1923, persons em-

ployed in the non-mechanical manufacture of firearms are permitted to work 150 hours overtime between April 1 and September 30 with a maximum of 10 hours a day, and an equivalent reduction from October 1 to March 31, and by decree of June 26, 1923, a ten-hour day is permitted in building and public works, surface quarrying and brick-making industries subject to an average eight-hour day spread over the whole year. A decree of May 20, 1923, allows 50 hours overtime per annum on the salting and curing of fish, 100 hours on the preparation of sardines and 200 hours on fruit and vegetable preserving, subject to a maximum 12-hour day and a restriction to a period from May 1 to October 31.

**International Federation of Trade Unions and eight-hour day.**

The Bureau of the International Federation of Trade Unions at a meeting on January 11 adopted a resolution with reference to the eight-hour day which was in part as follows:—

The International Federation of Trade Unions of Amsterdam decides that it is the two-fold duty of the working classes of all countries to oppose with all their might the slightest attack on the eight-hour day, and immediately to demand a share in the real control and management of all industrial, commercial, agricultural and financial undertakings, with a view to the rational organization of maximum output and exchange in every country and between all countries, and to oppose excessive profits, prohibitive tariffs, speculation and profiteering;

The working classes should reply to the campaign of employers against the eight-hour day by a campaign for workers' control and management. If employers wish to prove the sincerity of their assertions against the eight-hour day, they must first allow manual and intellectual workers the share in the control and management of all undertakings to which they are entitled, and on which, if need be, they will insist.

On March 3, the Minister of Labour of Canada tabled in the House of Commons the authentic text of a recommendation concerning the general principle for the organization of systems of inspection to secure the enforcement of the laws and regulations for the protection of workers which was adopted by the International Labour Conference at its Fifth Session in Geneva, October 22 to 29, 1923. In doing so, the Minister said: "The existing laws and regulations in Canada for the protection of workers have in all cases been adopted by the provincial authorities, and this recommendation has accordingly been communicated officially to the respective provincial governments in conformity with the requirements of Article 405 of the Treaty of Versailles and the analogous provisions of the other treaties of peace."

According to a recent official statement in the Legislature of Quebec, Canadians of

French descent formerly resident in the United States returned to the province during the past two years in the following numbers: in 1921-22, 2,471; in 1922-23, 1,123. No statistics are available as to the numbers of French-Canadians emigrating to the United States, but the Provincial Department was informed by its colonizing agents that very few settlers had emigrated to foreign countries since January, 1921.

A proposal to establish a fair wage schedule to govern all contracts let out by the provincial government in connection with the building of an annex to the Montreal Court House was negatived by the Legislative Assembly of the Province of Quebec on February 21 by a vote of 42 to 17.

The Board of Health of the Province of Quebec, established under the Quebec Public Health Act of 1922 (Chapter 20), issued during February a number of regulations to govern dwellings in general in their relation to health.

The British *Ministry of Labour Gazette* publishes the following table showing the total number of workpeople in the industries and services for which statistics were available, whose rates of wages were increased or reduced (so far as reported) in each of the years 1919-1923:

Year	Approximate number of workpeople whose rates of wages were		Total net amount of	
	Increased	Decreased	Increase	Decrease.
			£	£
1919.....	6,160,000	.....	2,432,000	.....
1920.....	7,720,000	.....	4,797,000	.....
1921.....	80,000	7,175,000	14,500	6,041,000
1922.....	75,000	7,633,000	11,000	4,222,000
1923.....	1,198,200	3,027,000	168,300	477,700

The city of Santiago, Chile, has abolished night work in bakeries and it is stated that the Bakers' Union of that country is working to have similar action taken in other countries. In Canada the only province which has dealt with this matter is British Columbia which provides that persons eighteen years of age or under must not be employed in bakeries at night (British Columbia Shops Regulation Act, R.S. 1911, chapter 211, section 34).

It is reported that Switzerland, by a referendum held on February 17, has rejected a proposal to lengthen working hours in factories to 54 weekly by a vote of 433,000 to 316,000. Under a law of 1919 the working

week is 48 hours, but the Federal Council may allow an increase up to 52 hours under exceptional circumstances. The Federal Council proposed an amendment to this law authorizing them to extend the work week to 54 hours in times of serious general economic crisis.

An order was issued in February under the provisions of the Theatres and Cinematographs Act of Saskatchewan changing the existing regulations governing the age limit for moving picture operators. The earlier order fixed the limit for all operators at 18 years, but under the revised order the Provincial Secretary is given power to reduce this age to 16 years in special cases and under conditions prescribed by him, if he is satisfied that such action is required to avoid hardship or public inconvenience. Another order enables the Provincial Secretary to require payment incurred in connection with the examination of an operator or with the inspection of a theatre or public hall where such examination or inspection involves a special journey by the inspector for the purpose.

The Workmen's Compensation Board of Alberta issued during February a regulation (No. 15) providing that "No person shall use or operate, or allow to be used or operated, any machine or other appliance unless the provisions of the Workmen's Compensation Act (Accident Fund) and all regulations made thereunder are complied with."

Electrical safety rules for power-houses and sub-stations have been issued in British Columbia in accordance with the provisions of the Electrical Energy Inspection Act, 1922.

The movement for the observance of Sunday as a day of rest continues to make progress in the province of Quebec. At a public meeting held at Shawinigan Falls at the end of February representatives of the local companies undertook to have all unnecessary Sunday work stopped in future. A representative of the Canadian Belgo Paper Company promised that work would cease in the company's shops at midnight on the following Saturday, and not resume until midnight on Sunday. Similar provisions were made on behalf of the other companies.

A new organization has been incorporated in the province of Quebec under the title of

the Workers' Economic and Social Association, all citizens excepting members of the professions being eligible for membership. It is described as founded upon moderate principles and having in view the protection and welfare of working men. The officers are Messrs. H. Hamelin, president, and L. Gagnon, secretary, both of Montreal.

According to returns received by the Technical Education Branch of the Department of Labour, at the close of the school year 1922-23 there were 2,674 vocational teachers in Canada engaged in training 70,300 vocational students. In 1920 there were 1,423 teachers and 51,827 pupils, an increase of 87 per cent in the number of teachers during the past three years.

The city council of Ottawa recently wrote to various municipalities in Ontario asking their support of certain amendments to the Mothers' Allowance Act which will be submitted to the provincial legislature in a bill during the present session. These amendments provide that the applicant for an allowance must have been resident in Ontario at the time of the death, total disability or desertion of the father of the children on whose behalf the allowance is to be made, and resident in Canada for three years before the application.

A commission under the Public Inquiries Act has been appointed in Nova Scotia to inquire into the causes of an accident in Inverness coal mine on February 7, when four miners lost their lives by a fall of coal, rock and earth. The commission is composed of Judge Allan McDonald, and Messrs. Alexander McDonald of Glace Bay and A. R. McNeill of Inverness. They will investigate the methods of mining in use in the mines of the Inverness Railway Company, and the system most suitable to be adopted, particularly with reference to the safety and welfare of the workmen, and the operation of the collieries in the best interests of the province and of the lessees of the coal areas.

A superannuation system for provincial civil servants in Manitoba on the lines of the Ontario Act of 1920 is reported to be under consideration of the government of the Province. Existing legislation in various Canadian provinces was outlined in the last issue of the LABOUR GAZETTE.

## GENERAL REVIEW OF THE INDUSTRIAL SITUATION

### The Labour Situation, Strikes, Prices

SOME recovery from the losses recorded in the preceding month was indicated in reports from employers of labour at the beginning of February. The situation was slightly better than at the same date of last year and very much more favourable than at the commencement of February, 1922.

At the beginning of February the percentage of unemployment among members of trade unions stood at 7.5 as compared with 7.2 per cent at the beginning of January and 7.8 per cent at the beginning of February, 1923.

The offices of the Employment Service of Canada reported a slight increase in the business of the offices during the month of January, as compared with the preceding month while it was approximately the same as in January, 1923.

The following is a survey of employment at the end of February, 1924, as reported by the superintendents of the offices of the Employment Service of Canada.

The seasonal slackness in the construction group in the maritime provinces showed little betterment from the preceding period, no new work having been undertaken as yet. Optimism prevails, however, for renewed activities for the coming spring. Farming operations were not yet under way and few calls for workers were received. The demand in the logging group remained much as previously reported, and the camps, particularly in northern New Brunswick, were well supplied with workers. The mining industry was quiet, while manufacturing as yet showed little advancement.

In Quebec, the characteristic seasonal lull in employment conditions was reported. Contractions were shown in the building and construction groups, with only a few vacancies offered for inside workers and finishers. In the larger centres a number of men were employed casually shovelling snow after the recent storms. The logging camps were supplied with sufficient workers for the winter cut, and, apart from a few small orders, little demand was felt in this group. A revival in manufacturing industries was anticipated, especially in the metal trades and clothing industries.

In Ontario the continuance of winter conditions retarded business and delayed the opening up of employment during the month. Building and construction activities were at a standstill, with a good outlook for improve-

ment as soon as the weather permits. Casual employment was afforded to increasing numbers of men due to the heavy storms, large gangs of workers for clearing railway lines and cutting surface drains being supplied without difficulty. Ice-cutting continued to employ large numbers of men at various points. Enquiries for general farm help were increasing in number and further expansion was expected with the approach of warmer weather. A slight curtailment of orders was reported in the logging group. At the end of February camps were well supplied with men, with few outstanding orders. The calls for tiemakers were met with difficulty, a shortage of experienced workers being evident. It is probable that requirements in this group will decline slightly until the spring demand for river drivers. The reports indicate that a vast improvement may be expected in industrial conditions, an increasing number of vacancies being afforded in the metal and clothing industries. The demand for women domestic help was very heavy with an unequal supply.

Prospects are good for employment on farms in Manitoba, an increasing number of inquiries for workers being shown. Work in all branches of construction both railway and building is of a normal nature with few permanent jobs open, the calls being mainly for casual and unskilled labourers. A steady demand for bushmen and loggers was shown, but due to the scarcity of men and the lateness of the season, the openings are not so easily filled. In the Women's Section there is still a large demand for workers for city and country, a slight improvement being noted in the number of placements in permanent work.

With the approach of spring the agricultural group in Saskatchewan is showing a slight expansion. Quietness characterized the building and construction groups, only a few calls for carpenters and labourers being received. The continued demand for men in the logging group was met satisfactorily from Regina, Saskatoon and Prince Albert. Increasing requests for women household workers for rural districts formed a considerable part of the business of the Women's Division.

While little construction work was under way in Alberta, indications point to a fairly active season. In the meantime, municipal public works continued to provide work for many. A noticeable, though slight, increase is evident in the demand in the agricultural

group, with a further expansion anticipated for next month. Experienced loggers were found with difficulty to satisfy the small number of orders received at Edmonton and Lethbridge.

A slight improvement in the number of calls for farm workers was reported in British Columbia, the situation remaining approximately the same. The anticipated improvement in conditions in the building and construction group is slow in coming, and, with the exception of a few small bridge construction jobs and municipal relief works, little employment was afforded in this group. While logging operations continue fairly active in the northern sections of the province, the demand has fallen off somewhat. Difficulty is experienced in supplying tiemakers and sawyers in some localities. The demand in the domestic group remains about the same, the orders for permanent household workers being considerably in excess of the supply. Day work and casual employment for women was supplied to an increasing number.

#### EMPLOYERS' REPORTS

At the beginning of February considerable revival from the losses recorded on the first of January was indicated in reports from employers received by the Dominion Bureau of Statistics. The improvement repeats that shown at the same time of year in 1923 and 1922; the recovery is not quite so extensive as in the former year, but the losses that preceded it had not been so large as on February 1, 1923. The tendency in manufacturing was distinctly favourable; logging and mining also showed expansion. On the other hand, transportation, construction and trade recorded curtailment of a seasonal nature. Quebec, Ontario and British Columbia reported increased activity, while in the maritime and prairie provinces employment declined. In Ontario some 14,000 persons were added to the payrolls of the reporting firms, chiefly in the manufacturing division. The improvement in Quebec and British Columbia was also registered largely in factories; in addition, the latter recorded gains in mining. In the maritime provinces employment in iron and steel showed a decrease, partly as a result of a trade dispute in the allied coal-mining industry. Seasonal dullness in construction also affected the situation. Railway transportation in the prairie provinces showed the decline incidental to this time of year, indicating reaction from the heightened activity attendant upon the movement of grain. Employment in Montreal, Hamilton and Winnipeg was in greater volume than at the beginning of January, while continued curtailment

of operations was reported in Toronto, Ottawa, and Vancouver. Tobacco, railway car shops, shipyards, rolling and forging mills and other iron and steel works in Montreal recorded considerable recovery, but trade, construction and textile works continued to show contractions. A large share of the decrease in Toronto was registered in retail stores, although the street railways also afforded less employment. On the other hand, textile, confectionery, printing and iron and steel plants reported increased activity. The largest reductions in Ottawa occurred in stores and in construction. Textile, iron and steel works in Hamilton recorded considerable additions to staffs. The improvement in Winnipeg was of a general character; the largest increases were reported in textiles. Varying conditions in different industries resulted in a very small reduction in employment in Vancouver. Construction and trade in that city were rather slacker, while manufacturing as a whole showed improvement. Practically all branches of manufacturing reported some recovery from the contractions recorded early in January. The resumption of work in many iron and steel plants caused the reinstatement of nearly 9,000 workers. The most extensive increases within this division were registered in automobile and railway car shops and in shipyards, but nearly all branches shared in the revival. In textiles approximately 4,300 persons were added to the payrolls of the reporting concerns; the largest increases occurred in garment and knitting factories. Expansion on a somewhat smaller scale was indicated in sawmills, furniture, boot, shoe, pulp, paper, rubber, tobacco, brick, non-ferrous metal, meat packing and slaughtering establishments. The trend of employment in logging continued to be favourable; mining and railway construction also recorded substantial improvement. On the other hand, transportation, building and highway construction afforded less employment than in the preceding month, and retail stores showed considerable reductions in payroll following the Christmas season.

An article elsewhere in this issue gives in some detail the employment situation as at the beginning of February, 1924.

#### TRADE UNION REPORTS.

Slightly more unemployment than in December was registered at the end of January by the 1,522 unions from which returns were received.

An aggregate membership of 156,272 persons was reported by these unions, 11,768 of whom were out of work, a percentage of 7.5 as compared with percentages of 7.2 at the end of December and with 7.8 on January 31, 1923.

(Unemployment as used here has reference to involuntary idleness due to economic causes. Persons engaged in work other than their own trades or who are idle because of illness or as a direct result of strikes or lockouts are not considered as unemployed. As the number of unions making returns varies from month to month with consequent variation in membership upon which the percentage of unemployment is based it should be understood that such figures have reference only to the organizations reporting.) In Nova Scotia, Ontario, Manitoba and Saskatchewan less work was afforded than in December. In Ontario the greater part of the inactivity was due to unemployment in the manufacturing industries and in the building trades. A better situation was shown in the remaining provinces. In comparison with January of last year all provinces except Nova Scotia, Quebec and Ontario reported more employment. During January some improvement over December was shown by the 425 unions in the manufacturing industries from which returns were tabulated. Bakers, garment and iron and steel workers were more active, but cigar makers, furniture, pulp and paper, textile and glass workers and printing tradesmen were not so fully engaged. Slightly less activity was shown in the manufacturing industries than in January of last year. Coal miners in Nova Scotia were not so busy but in Alberta slightly more employment was registered and in British Columbia no miners were reported idle. Reports tabulated from 179 unions in the building trades with a membership of 17,938 persons showed that 26.3 per cent of the members were out of work as compared with 21.7 per cent at the end of December, 1923. Bricklayers, masons and plasterers, carpenters and joiners, granite and stone cutters, plumbers and steamfitters, tile layers, lathers and roofers, hod carriers and building labourers and steam shovel and dredgemen all reported more idleness, but bridge and structural iron workers, electrical workers and painters, decorators and paperhangers showed some improvement. In comparison with the returns for January, 1923, bricklayers, masons and plasterers, granite and stone cutters, tile layers, lathers and roofers, steam shovel and dredgemen and plumbers and steamfitters all registered slightly less activity. The situation among transportation workers was not quite so favourable due to lessened employment for steam railway employees. In the shipping and stevedoring and street and electric railway divisions, however, more employment was afforded. Transportation workers were better employed than in January, 1923. Fishermen reported considerable idleness. Retail clerks were busier. Hotel and restaur-

ant and theatre and stage employees were more active, but employment for stationary engineers and barbers was not so good.

#### EMPLOYMENT OFFICE REPORTS.

During the month of January, 1924, the offices of the Employment Service of Canada made 31,409 references to employment and effected a total of 29,868 placements. Of these, the number of placements in regular employment was 15,237; of which 12,459 were of men and 2,778 of women, and 14,631 in casual work. Applications for work registered at the offices numbered 44,613, of which 35,173 were from men and 9,440 from women. The number of vacancies notified by employers to the Service was 26,587 for men and 6,984 for women—a total of 33,571. In comparison with the preceding month this represents an increase in the number of vacancies and placements, mostly in casual work, while an increased registration of applications characteristic of the month was shown. A report in detail of the work of the offices for the month of January, 1924, will be found elsewhere in this issue.

#### BUILDING PERMITS AND CONTRACTS AWARDED

According to the Dominion Bureau of Statistics, the value of building permits issued in 56 cities during January, 1924, showed a decline to \$4,021,088 from \$6,906,650 in the previous month and from \$4,057,013 in January, 1923.

According to the *MacLean Building Review*, issued by MacLean Building Reports, Limited, the value of the contracts awarded in Canada during February, 1924, amounted to \$21,249,000, compared with \$6,538,600 in January last, and \$13,311,800 in February, 1923. Residential building accounted for 10.5 per cent of the February total, amounting to \$2,217,800; business building amounted to \$5,519,200, or 25.9 per cent; industrial building to \$415,000, or 2 per cent; and public works and utilities to \$13,097,000, or 61.6 per cent. The activity was distributed amongst the groups as follows: Ontario 80.4 per cent; Quebec, 12.7 per cent; western provinces, 4.6 per cent; and the maritime provinces, 2.3 per cent, the amounts to be spent being \$17,083,200 in Ontario, \$2,697,200 in Quebec, \$498,000 in the maritime provinces, \$731,900 in British Columbia, and \$238,700 in the prairie provinces.

#### PRODUCTION REPORTS

The Dominion Bureau of Statistics reports that the production of pig iron in Canada during January, 1924, showed an advance of 7 per cent over the December output of 59,622 tons to 63,702 tons, and represented a marked increase over

the outputs in January of the last three years. The output of basic pig iron was 39,388 tons; foundry iron amounted to 14,466 tons and malleable iron to 9,848 tons. There were five furnaces in blast at the end of January, of which two were at Hamilton, Ontario, two at Sault Ste. Marie, Ontario, and one at Sydney, Nova Scotia. Two furnaces were banked at Sydney, Nova Scotia, during the month and one was blown in at Sault Ste. Marie, Ontario. There were 2,910 tons of ferro-alloys produced during the month.

The production of steel ingots and castings amounted to 41,309 tons in January as compared with 41,248 tons in December. The January production was 48,000 tons in 1923, 33,000 tons in 1922, and 40,000 tons in 1921. The output of steel ingots amounted to 38,696 tons, and steel castings to 2,703 tons.

A report from the Department's correspondent at Cobalt states that fourteen cars of silver ore were shipped during February from the Cobalt camp, containing approximately 975,792 pounds of ore, as compared with ten cars of silver ore containing 746,737 pounds in January. The Nipissing mine shipped 352 bars containing 403,624.87 ounces of silver, and The Mining Corporation of Canada shipped 53 bars containing 53,159.72 ounces of silver, making a total of 405 bars containing 456,784.59 ounces of silver shipped during the month of February, as compared with 211 bars containing 212,444.52 ounces for January.

A report from the British Columbia Forestry Branch shows that 179,246,115 feet, board measure, of timber was scaled in the province during January. The total includes Douglas fir, 100,656,869 feet; red cedar, 31,226,029 feet; spruce, 13,384,321 feet; hemlock, 20,083,196 feet; balsam, 3,408,987 feet; yellow pine, 1,356,144 feet; white pine, 1,288,544 feet; jack pine, 1,947,011 feet; larch, 3,000,935 feet; cotton wood, 211,237 feet; birch and cypress, 28,402 feet; and other species, 2,654,440 feet.

The gross earnings of the Canadian National Railways, including affiliated lines in the United States, according to a preliminary statement issued, amounted to \$18,328,491 in January, 1924, as compared with \$18,765,458 for January, 1923.

The gross earnings of the Canadian Pacific Railway for January were given in a preliminary statement as \$13,392,432 in comparison with \$13,148,914 in January, 1923.

A summary of Canadian FOREIGN TRADE. trade prepared by the Department of Customs and Excise shows that in January, 1924, the merchandise entered for consumption amounted to \$66,468,060 as compared with \$68,085,845 in January, 1923. There was an increase of

\$4,916,225 in the value of domestic merchandise exported, which amounted to \$69,575,167 in January, 1924, as compared with \$64,658,942 in the corresponding month of the previous year. For the ten months ending January the grand total of Canadian trade was \$1,641,285,624 in 1924 as compared with \$1,454,208,770 in 1923. The chief imports in January, 1924, were fibres, textiles and textile products amounting to \$16,956,348; iron and its products amounting to \$10,408,188; non-metallic minerals and products amounting to \$10,301,177; agricultural and vegetable products mainly foods amounting to \$7,122,228; and agricultural and vegetable products other than foods amounting to \$6,572,428. The chief exports during the same month were in the group of agricultural and vegetable products, mainly foods, which amounted to \$21,804,983, the next being wood, wood products and paper, amounting to \$18,258,274, followed by animals and animal products to the value of \$10,085,683. During the ten months of the fiscal year ending January, 1924, exports of agricultural and vegetable products, mainly foods, were valued at \$344,348,824; exports of wood, wood products and paper amounted to \$226,282,086; and exports of animals and animal products to \$121,603,242.

### Strikes

Time loss due to industrial disputes reported to the Department during February was less than during January, 1924, but greater than during February, 1923. There were in existence at some time or other during the month 16 disputes, involving 11,518 employees and a time loss of 101,968 working days, as compared with 14 strikes in January, involving 12,793 employees and a time loss of 186,078 working days. In February, 1923, there were recorded 20 disputes involving 3,950 workpeople and a time loss of 46,030 working days. Three new strikes commenced during February with a time loss of 2,407 working days. Two of the strikes commencing prior to February and all of the strikes commencing during February terminated during the month. At the end of the month, therefore, there were 11 strikes involving 812 workpeople.

### Prices

Retail food prices were little changed from the levels reached in January. The cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average retail prices in some sixty cities was \$10.75 at the beginning of February as compared with \$10.78 for January; \$10.53 for February, 1923; \$10.61 for February, 1922; \$14.08 for February, 1921; \$16.92 for June, 1920 (the peak); \$15.77 for February, 1920; \$12.54 for

February, 1918; and \$7.75 for February, 1914. Prices of fresh eggs were substantially lower while there were smaller declines in cooking eggs, lard, fresh pork, bacon, sugar and prunes. Advances occurred in the prices of butter, cheese, potatoes, evaporated apples, tea and coffee. Including the cost of fuel and rent with that of foods the total budget averaged \$21.18 for February, as compared with \$21.23 for January; \$21.17 for February, 1923; \$21.07 for February, 1922; \$24.85 for February, 1921; \$26.92 for June, 1920 (the peak); \$24.71 for February, 1920; \$19.80 for February, 1918; and \$14.54 for February, 1914. Fuel averaged slightly lower while rents were unchanged.

The movement of wholesale prices as indicated by the index number of the Dominion Bureau of Statistics was very slight, the figure for February being 156.6 as compared with 156.7 for January; 153.6 for February, 1923; 153.5 for February, 1922; 191.1 for February, 1921; 256.9 for May, 1920 (the peak); 238.3 for February, 1920; and 200.5 for February, 1919. In the grouping according to the chief component material the Vegetable Products group, the Non-Ferrous Metal group, and the Non-Metallic Minerals group were

each higher while the Animals group, the Textiles group, the Wood group and the Iron group were each lower. The Chemicals group was unchanged from the January level.

The index number based upon prices of 271 commodities in 1890-1899 as 100, published by the Department of Labour since 1910, advanced to 224.9 for February as compared with 222.7 for January; 224.3 for February, 1923; 229.5 for February, 1922; 270.1 for February, 1921; 356.6 for May, 1920 (the peak); 343.5 for February, 1919; 263.5 for February, 1918; and 136.6 for February, 1914. The groups showing advances were grains, animals and meats, fruits and vegetables, hides, leather and boots, metals, fuel and lighting, paints and oils, and drugs and chemicals; while the groups showing declines were dairy products, fish, textiles, and raw furs.

The special index of fifty commodities selected from the 271 in the departmental list advanced slightly to 155.1 for February as compared with 154.4 for January; 155.2 for February, 1923; 148.4 for February, 1922; 182.2 for February, 1921; 260.1 for May, 1920 (the peak); 237.0 for February, 1920; and 102.9 for February, 1914.

## COST OF LIVING ADJUSTMENT OF WAGES OF VANCOUVER ISLAND COAL MINERS

THE Cost of Living Commission appointed on January 21, 1919, to determine every three months the changes in the cost of living for coal miners on Vancouver Island, and to report the amount by which wage rates should correspondingly be increased or decreased, has forwarded its report to the Department of Labour for the quarter ending December 31, 1923.\* The Commission consisted of Mr. Matthew Gunness, representing the miners; Mr. Tulley Boyce, representing the operators, and Mr. F. E. Harrison, Fair Wages Officer of the Department of Labour, chairman.

As in previous investigations, forms containing a list of groceries, provisions, meats, etc., were sent out to the merchants and dealers with whom the majority of the miners were accustomed to trade in the various localities. The method of computing the changes for the period under review was the same as used for previous adjustments, namely, to determine the percentage of increase or decrease, as the case may be, of prices at the end of the quarter,

over the prices at the end of the preceding quarter, for groceries, provisions, meats, etc., and to add a further two-fifths of this increase (or decrease) as an equivalent to cover similar increase (or decrease) in clothing, etc.

For the quarter ending December 31, 1923, a decrease of 5.8 per cent was ascertained which amounted to a decrease in wages of 2 cents per day in the district where the base rate was \$3.15, such decrease to become effective on February 1, 1924, and to apply to all underground, surface, clerical and office employees.

Sharp increases were noted in canned salmon and cornmeal. Slight increases were noted in jam, canned peas and beans, pickles, buckwheat flour, cookies, butter, tea, beef and mutton. Sharp decreases were noted in syrup, bacon and apricots. Slight decreases were noted in corned beef, brooms, graham flour, wholewheat flour, peaches and pork. No changes were noted in cheese, ham, milk, coffee, cream tartar, flavouring extracts, currants, figs, raisins, sugar, molasses, peas, beans, barley, rice, sago, tapioca, canned corn and tomatoes, roast beef, lunch tongue, soaps, vinegar, pastry flour, rolled oats, oatmeal, soda biscuits, lard, prunes, matches and veal.

\*For previous adjustments see LABOUR GAZETTE, November, 1923.

## PROCEEDINGS OF THE CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

NINE new decisions of the Canadian Railway Board of Adjustment No. 1 have been received by the Department. (Summaries of earlier decisions of the Board appeared in the *LABOUR GAZETTE* for October, 1923, and in previous issues.)

Supplement No. 1 to Case No. 139 has reference to the claim of a yardman of the Canadian Pacific Railway (Western Lines) for payment for a day when he was laid off. Case No. 181 has reference to a claim of an assistant agent of the Canadian Pacific Railway (Western Lines) for payment of wages during holidays. Case No. 188 relates to a claim of an engineer and his fireman on the Canadian National Railways for mileage allowance for terminal service. The remaining cases concerned employees of the Canadian National Railways (Atlantic Region). Case No. 189 has reference to the claim of a crew for mileage for terminal service in addition to road mileage. Case No. 190 has reference to a controversy over a change made in the method of paying engine crews. Case No. 191 relates to the payment of hostlers at St. John, N.B. Case No. 192 has reference to the payment of firemen accompanying dead engines. Case No. 193 has reference to the method of payment of engine crews running suburban trains between Halifax and Windsor Junction. Case No. 194 has reference to the employment of a milk checker between Truro and Halifax.

### Supplement No. 1 to Case No. 139. The Canadian Pacific Railway, Western Lines, and the Brotherhood of Railroad Trainmen.

In Case No. 139, which was dealt with by the Board on October 13, 1922, the Board sustained the claim of the employees to the extent that Sunday time could not be used to apply against the guarantee in the yardmen's schedule providing that regular yardmen held for an entire month are paid for not less than the calendar working days of the month. The case arose from the claim of a certain yardman for payment for Saturday, December 3, 1921, when he was laid off. The Board further declared that the company should designate in the different yards whether the assignment commencing late Saturday night and ending Sunday morning or the assignment commencing late Sunday night and ending Monday morning was the Sunday assignment. Subsequently a difference arose as to whether under the Board's award this yardman should be paid for the shift commencing

at 23.30K (11.30 p.m.) on Saturday, December 3, 1921.

The decision of the Board was as follows:—

The claim for December 3, 1921, should be disposed of, subject to the designation of the shift by the company as the Sunday assignment, in accordance with decision of the Board in Case 139.

### Case No. 181—The Canadian Pacific Railway, Western Lines, and the Order of Railroad Telegraphers.

An assistant agent of the Canadian Pacific Railway did not apply for or receive any annual holidays in 1921. Early in 1922, however, he applied for and was granted leave of absence for two weeks. He then made a claim for pay for the two weeks he was off in 1922 to apply as holidays covering 1921, although he had not complied with the fourth paragraph of article 25 of the telegraphers' schedule, which reads as follows:—

Applications for vacation filed in January each year will be given preference in order of seniority of applicant, and applicants will be advised in February of dates allotted them. January applicants will have preference over later applicants, and applicants after September 30 will not be entitled to salary compensation if the company is unable to relieve them in that year. The company will, as far as practicable, relieve all applicants during the summer season, when so desired.

The company contended that as this assistant agent had not complied with the above paragraph he forfeited his right to compensation for the 1921 holidays. He had simply sacrificed his holidays with pay at his own option, and the responsibility for this could not rest with the company.

The employees contended that the fact that the assistant agent had failed to make written application for holidays in 1921 should not debar him from taking two weeks with pay in 1922. The rule does provide that applicants after September 30 will not be entitled to salary compensation if the company is not able to relieve them in that year, but it was further contended that the provisions with respect to the filing of applications for holidays were to facilitate the work of the officers of the company in making arrangements for relief, and to give the telegraphers their choice of time to be relieved, and there was no language in the rule making it compulsory to file an application or providing a penalty of forfeiture of holidays with pay for failure to do so.

The decision of the Board was as follows:—

The claim of the employees is denied to the extent as provided in article 25, that application for holidays

must be made prior to September 30 in each year. In this case, however, the Board feels that the employee was entitled to holidays and would have received them if they had been applied for as required by schedule, which he evidently failed to do through misunderstanding, and suggests that favourable consideration be given to the employee in this case.

**Case No. 188—The Canadian National Railways, Atlantic Region, and the Brotherhood of Locomotive Engineers and the Brotherhood of Locomotive Firemen and Enginemen.**

An engine crew of the Canadian National Railways on a passenger train running out of St. John, N.B., were required in March, 1923, to report at the roundhouse fifteen minutes earlier. The runs of this train were 171.76 and 138.95 miles on alternate days. The men claimed that an allowance for this extra time was made until it was cut off under the General Superintendent's instructions. They then claimed payment for the additional fifteen minutes as an arbitrary allowance.

It was contended for the Railways that article 3 of the schedule provided that the day's work for road enginemen in passenger service would begin fifteen minutes before the time ordered for, therefore the Railway could order crews sufficiently in advance to permit of train leaving on time and not pay for such time as an arbitrary allowance, but use the same to make up a short day.

The decision of the Board was as follows:—

In view of the runs in question being over one hundred miles in length the claim of the employees is sustained.

**Case No. 189—The Canadian National Railways, Atlantic Region, and the Brotherhood of Locomotive Engineers and the Brotherhood of Locomotive Firemen and Enginemen.**

At Halifax, N.S., the engine house is located about eight miles from the Ocean Terminals Passenger Station. Crews are required to be on duty one hour and fifteen minutes (exclusive of preparatory time which is paid as an arbitrary) before time train is due to leave the station. The crew on train No. 5, whose mileage is 65 miles and time on road two hours and twenty-five minutes, making total time on duty three hours and forty minutes, exclusive of preparatory time, contended that until recently engine crews were allowed compensation as an arbitrary payment for service between the roundhouse and The Ocean Terminal Station. The train in question was run as a one-way assignment and paid for on a twenty miles an hour basis in addition to allowance for preparatory and terminal service time. Under instructions issued the crew was ordered out earlier and the mileage allowance for the trip was cut from 130 to 110

miles. They requested that the difference be restored and that they be reimbursed for deductions made from their earnings.

The contention of the Railways was as follows: "Article 3 of the schedule provides that day's work for road enginemen in passenger service will begin fifteen minutes before time ordered for; therefore, the Railway can order crews sufficiently in advance to permit of an engine being on train and train leave on time, and not pay for such time as an arbitrary allowance, but may use same to make up a short day."

By decision of the Board the claim of the employees was denied in view of the run in question being less than one hundred miles and completed within the limit of the day's work from the time of first reporting for duty.

**Case No. 190—The Canadian National Railways, Atlantic Region, and the Brotherhood of Locomotive Engineers, and the Brotherhood of Locomotive Firemen and Enginemen.**

A controversy arose over a change in the method of paying engine crews of the Canadian National Railways running between Pictou and Oxford Junction, N.S. They had been paid on the single trip basis prior to December, 1923, but this was changed and assignment was made on short turn-around passenger service and paid according to clause B, article 2 of schedule.

The contention of the Railways was that payment of this crew as in short turn-around passenger service was in accordance with clause B, article 2 of the schedule, as no single leg of the trip exceeded 80 miles.

The employees contended that the mileage allowances previously paid were settled by conference and were also in conformity with the five-hour day regulations of the schedule for passenger service and should not now be set aside, and that the total mileage run by this crew before making the return trip was 81.23 miles. In support of this contention reference was made to the ruling of the United States Railway Board of Adjustment No. 1, in Case No. 1. Compensation was claimed for service since the change in method of payment was made.

The decision of the Board was as follows:—

The Board decides, on the evidence submitted, that the run in question may be properly compensated under the eight within ten hour rule (article 2, clause B, of schedule).

**Case No. 191—The Canadian National Railways, Atlantic Region, and the Brotherhood of Locomotive Firemen and Enginemen.**

A controversy arose as to the rate of payment of hostlers at St. John, N.B., during

certain periods in the winter when the coaling plant was shut down for repairs and the hostlers were required to hostle engines between engine house and coal dump. For this work they were paid inside hostler's rate, the same as when they handled engines between the engine house and coaling plant.

The Railways contended that as defined in article 8 of the schedule an inside hostler is one employed handling engines in and around roundhouse, ashpit, storage or shop track, and in the cases in question engines were handled to and from coal storage tracks and the men were not required to handle engines between passenger station and roundhouse or yard, or on main track, which constitutes outside hostler's work, as defined in the same article of the schedule.

The employees stated that at different periods in the past year hostlers were required to handle engines beyond the shop track switches in order to get to the coal dump, and they had to make movements on tracks under the jurisdiction of yard switchmen and outside of shop jurisdiction. Claims were submitted for outside hostlers' rate on these days but were declined. They contended that in accordance with article 8, clause A, of the joint schedule, they were justified in their claims, and they cited a number of former decisions of the Board in support of their contention.

By decision of the Board, the claim of the employees was sustained.

**Case No. 192—The Canadian National Railways, Atlantic Region, and the Brotherhood of Locomotive Engineers, and the Brotherhood of Locomotive Firemen and Enginemen.**

On January 12, 1923, a fireman of the Canadian National Railways left Truro, N.S., in charge of a dead engine for Moncton, a distance of 125 miles. The train in which the engine was handled was tied up by snow blockades and did not arrive at Moncton until January 17. The fireman was paid continuous time at through freight rates under article 12 of the schedule, which reads as follows:—

Engineers and firemen in charge of dead engines will be paid minimum engineers' and firemen's through-freight rates and overtime. Overtime shall be paid for on the minute basis at an hourly rate of three-sixteenths of the daily rate from the time required to report for duty until booked in on roundhouse register. Not more than two dead engines to be handled by one man, and such men not to be sent off their own promotion district, if possible, to avoid doing so.

Subsequently \$60.28 was deducted from his pay as the Railway claimed that the time when the train was tied up should have been

paid for in accordance with clause D of article 31 of the schedule, reading as follows:—

When engineers, firemen and helpers are tied up between terminals, they will be paid continuous time until engine arrives at arriving terminal. When engineers, firemen and helpers are tied up between terminals on account of the line being blockaded, they will be paid continuous time on live engines. If engines are dead, they will be paid 100 miles for each twenty-four hours so held.

The Railways contended that the readjustment of pay which was made on the basis of article 31, clause D, was correct, and that under the circumstances of this case the provisions of article 12 did not apply.

The employees contended that the ruling that the deduction of \$60.28 must be made was in violation of article 12 of their schedule.

By decision of the Board the claim of the employees was sustained.

**Case No. 193—The Canadian National Railways, Atlantic Region, and the Brotherhood of Locomotive Engineers, and the Brotherhood of Locomotive Firemen and Enginemen.**

A dispute arose regarding the method of payment of engine crews of the Canadian National Railways running suburban trains between Halifax and Windsor Junction, a distance of 15.87 miles.

Two round trips had been made between 6.20 p.m. and 11.20 p.m., but an additional round trip was provided for in a new time table between 1.30 p.m. and 2.50 p.m. For the entire service the crews were paid under clause B, article 2, of the schedule—short turn-around passenger clause—road mileage plus light mileage for first ten hours.

The Railways contended that the extra round trip was made part of the regular assignment of this crew, and payment was accepted on this basis until recently when the crew was released at Halifax for two hours after completion of first round trip in accordance with clause B of article 2 of the schedule.

The employees contended that the men should not be released from the engine when it was not taken from the train and a car inspector and machinist were jointly assigned to watch the engine. They alleged that the crew were released for the sole purpose of taking away from them the two hours formerly allowed them for service while held for the return trip. If this claim was not in order they contended that the first round trip should be paid for as a separate service, as they were cancelled after it.

By decision of the Board the claim of the employees was denied.

### Case No. 194—The Canadian National Railways, Atlantic Region, and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen.

Since March, 1921, a milk checker has been employed on two trains of the Canadian National Railways between Truro and Halifax for the purpose of receiving cans of milk in the car, stowing them away and distributing empties on the return trip. The employees stated that the baggagemaster had been assisting in all this work until it was completed, and that prior to the employment of the milk checker the work had always been handled by

the train crew. They contended that the Company should either dispense with the services of the checker whose place should be filled by a trainman, or relieve the baggageman from being required to travel in the milk car for the purpose of assisting him.

The Railways contended that there was no violation of the schedule in using a clerk for this work.

The decision of the Board was as follows:—

The Board decides, on the evidence submitted, that the service rendered by this milk clerk does not constitute a violation of the Trainmen's Schedule. The claim of the employees is, therefore, denied.

## STRIKES AND LOCKOUTS IN CANADA DURING FEBRUARY, 1924

THE number of strikes and lock-outs in Canada in existence at some time or other during the month of February, was sixteen, two more than in January. The time loss for February was greater than in February, 1923, being 101,968 working days as compared with 46,030 working days in the same month of the previous year.

Date	Number of disputes	Number of employees involved	Time loss in working days
February, 1924.....	16	11,518	101,968
January, 1924.....	14	12,793	186,073
February, 1923.....	20	3,950	46,030

Thirteen disputes involving 10,643 work-people were carried over from January. Two of the strikes commencing prior to February and three new strikes commencing during February terminated during the month. At the end of February, therefore, there were on record eleven disputes: lumber workers, Cranbrook and Golden districts, B.C.; clothing workers, Winnipeg; printing compositors, Hamilton; three strikes of printing compositors at Montreal; printing compositors, Ottawa; printing compositors, Toronto; printing compositors, Winnipeg; printing compositors and pressmen, Halifax, and motormen and conductors at Niagara Falls.

Of the five strikes which terminated during the month three resulted in favour of the employees, while two ended in a compromise. One of the strikes commencing during February was for increased wages, another was against the employment of a non-unionist, while the third was for the dismissal of a foreman.

The record of the Department includes lock-outs as well as strikes, but a lock-out, or an industrial condition which is undoubtedly a lock-out, is rarely encountered. In the statistical tables, therefore, strikes and lock-outs are recorded together. A strike or lock-out, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting more than one working day. Disputes of only one day's duration or less, and disputes involving less than six employees are not included in the published record, unless at least ten days time loss is caused, but a separate record of such disputes is maintained in the Department and the figures are given in the annual review.

The following notes give information in regard to certain disputes additional to that shown in the tabular statement.

**LUMBER WORKERS, CRANBROOK AND GOLDEN DISTRICTS, B.C.**—At the end of February 300 lumber workers in various camps throughout the neighbourhood of Cranbrook and Golden who went out on January 2, were still on strike but information received later indicates the strike was declared off early in March.

**COAL MINERS, INVERNESS, N.S.**—A strike of coal miners on February 14, for a change from contract rates to day rates and an increase in the number of men to do the work, involved 368 employees. The employer offered day rates and the assistance of two extra men instead of four. This was not agreed to by the men and they ceased work. As the strike was not authorized by the union, the district officers called off the strike. Work was resumed February 19, on day rates, with a readjustment of the men employed on the work in dispute.

COAL MINERS, MOUNTAIN PARK, ALTA.—A one-day strike occurred on February 19, when 400 coal miners ceased work because a foreman struck an employeé and they demanded that the offender should be dismissed. A district officer negotiated with the employers, the foreman was dismissed and work was resumed the following day.

COAL MINERS, NOVA SCOTIA.—As mentioned in the February issue of the LABOUR GAZETTE the dispute in connection with the renewal of the agreement of District 26, United Mine Workers of America, was unternminated at the end of January, but negotiations were resumed early in February and a settlement was reached on the 11th, on the basis of a six per cent increase in wages. This settlement was subject to a referendum which had not been taken at the end of the month.

COAL MINERS, WAYNE, ALTA.—On February 4, 107 coal miners went on strike against the

employment of a non-unionist. After being out for five days work was resumed February 9, when the employee agreed to join the union.

CLOTHING WORKERS, MONTREAL, QUE.—A dispute involving clothing workers in January was reported in the February issue of the LABOUR GAZETTE. Later information indicated that in some of the establishments work ceased on January 7, and that in several work was not resumed, as in the others, on January 31. By February 21, however, various employers entered into agreements with the union involving higher wages and changes in working conditions.

PRINTING TRADES IN EIGHT CITIES.—The strikes in printing trades in job offices in various cities, for the 44-hour week, were still in progress at the end of the month involving 485 employees and resulting in a time loss of 12,125 working days.

STRIKES AND LOCKOUTS DURING FEBRUARY, 1924

Industry, occupation and locality	Number of employes involved	Time loss in working days	Remarks
<b>(a) Strikes and lockouts commencing prior to February, 1924.</b>			
<b>LOGGING.—</b>			
Lumber workers, Cranbrook and Golden district, B.C.	300	7,500	Commenced January 2, for increased wages and other changes. Unterminated.
<b>MINING, NON-FERROUS SMELTING AND QUARRYING.—</b>			
Coal miners, Nova Scotia.....	9,625	77,000	Commenced January 16, against a reduction in wages. Settled by negotiations February 11, wages increased six to eight per cent.
<b>MANUFACTURING.—</b>			
<i>Clothing—</i>			
Clothing workers, Montreal, Que.	206	2,261	Commenced January 7, for recognition of union and increased wages. Settled by negotiations, work resumed February 21, under union conditions.
Clothing workers, Winnipeg, Man.	23	575	Commenced September 6, against a reduction in wages. Unterminated.
<i>Printing and Publishing—</i>			
Printing compositors, Hamilton, Ont.	10	250	Commenced May 2, 1921. Alleged violation by employers of 44-hour clause in agreement. Un terminated.
Printing compositors, Montreal, Que.	8	200	Commenced June 14, 1921. Objection of men to perform work that came from shop where strike existed. Unterminated.
Printing compositors, Montreal, Que.	117	2,925	Commenced July 1, 1921. For increased wages and 44-hour week. Unterminated.
Printing compositors, Montreal, Que.	12	300	Commenced September 15, 1922. Employer refused to negotiate a new agreement with the union. Unterminated.
Printing compositors, Ottawa, Ont.	23	575	Commenced June 1, 1921. For increased wages and 44-hour week. Unterminated.
Printing compositors, Toronto, Ont.	257	6,425	Commenced June 1, 1921. For increased wages and 44-hour week. Unterminated.
Printing compositors, Winnipeg, Man.	38	950	Commenced July 1, 1921. Alleged lockout following refusal of employers to renew agreement. Un terminated.
Printing compositors and pressmen, Halifax, N.S.	20	500	Commenced May 2, 1921, for shorter hours with same weekly pay. Unterminated.
<b>TRANSPORTATION.—</b>			
<i>Street and electric railways—</i>			
• Motormen and conductors, Niagara Falls, Ont.	4	100	Commenced July 2, 1922. For recognition of union. Unterminated.

STRIKES AND LOCKOUTS DURING FEBRUARY, 1924—*Concluded*

Industry, occupation and locality	Number of employees involved	Time loss in working days	Remarks
<b>(b) Strikes and lockouts commencing during February, 1924.</b>			
<b>MINING, NON-FERROUS SMELTING AND QUARRYING.—</b>			
Coal miners, Mountain Park, Alta.	400	400	Commenced February 19. Settled by negotiations, work resumed February 20; in favour of employees, for dismissal of a foreman.
Coal miners (bank head men), Inverness, N.S.	368	1,472	Commenced February 14, for increased wages. Settled by negotiations and work resumed February 19, compromise.
Coal miners, Wayne, Alta.....	107	535	Commenced February 4, against the employment of a non-unionist. Work resumed February 9, man agreed to join union.

### STRIKES AND LOCKOUTS IN GREAT BRITAIN AND NORTHERN IRELAND DURING JANUARY, 1924

THE British MINISTRY OF LABOUR GAZETTE for February contains the following information respecting strikes and lockouts in Great Britain and Northern Ireland during January, 1924, based upon returns from employers and employees:—

**NUMBER, MAGNITUDE AND DURATION.**—The number of trade disputes involving a stoppage of work, reported to the Department as beginning in January in Great Britain and Northern Ireland, was 37, as compared with 12 in the previous month and 54 in January, 1923. In these new disputes about 79,000 workpeople were involved, either directly or indirectly (i.e. thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes). In addition about 4,000 workpeople were involved, either directly or indirectly, in 11 disputes which began before January and were still in progress at the beginning of that month. The number of new and old disputes was thus 48, involving about 83,000 workpeople, and resulting in a loss during January of about 629,000 working days. The principal new dispute was that involving about 69,000 locomotive engine drivers, firemen and others on railways, throughout Great Britain, which was in progress from January 21 to January 29.

An account of this dispute is given on another page of this issue.

**CAUSES.**—Of the 37 disputes beginning in January, 7, directly involving 800 workpeople, arose out of demands for advances in wages; 7, directly involving 60,200 workpeople, out of proposed reductions in wages; 12, directly involving 4,800 workpeople, on other wages questions; 5, directly involving 2,200 workpeople, on details of working arrangements;

and 6, directly involving 1,000 workpeople, on questions respecting the employment of particular classes or persons.

**RESULTS.**—Settlements were effected in the case of 19 new disputes, directly involving 64,000 workpeople, and 5 old disputes, directly involving 1,000 workpeople. Of these new and old disputes, 7, directly involving 3,000 workpeople, were settled in favour of the workpeople; 7, directly involving 1,000 workpeople, in favour of the employers; and 10, directly involving 61,000 workpeople, were compromised. In the case of 5 disputes, directly involving 1,000 workpeople, work was resumed pending negotiations.

The following table analyses the disputes in progress in January, in Great Britain and Northern Ireland, by groups of industries, and indicates the number of workpeople involved (whether directly or indirectly) at the establishments concerned, and the approximate time lost during the month in all disputes in progress:—

Groups of industries	Number of disputes in progress in January			Number of workpeople involved in all disputes in progress in Jan.	Aggregate duration of all disputes in progress in Jan.
	Start-ed before Jan. 1	Start-ed in Jan.	Total		
Mining and quarrying.....	3	12	15	10,900	111,000
Metal, engineering and shipbuilding.....	1	6	7	600	8,000
Building.....	3	3	6	600	13,000
Transport.....	.....	6	6	69,900	487,000
Other trades.....	4	10	14	800	10,000
Total, Jan., 1924...	11	37	48	82,800	629,000
Total, Dec., 1923..	12	12	24	10,300	83,000
Total, Jan., 1923..	17	54	71	19,000	117,000

## STRIKES OF RAILWAY EMPLOYEES AND DOCKERS IN GREAT BRITAIN

TWO important strikes in transportation trades recently took place in Great Britain, one involving engineers, firemen and cleaners of all the railways, and the other dockers in all the principal ports of the country. A brief summary of these disputes is given below.

### Strike of Railway Employees

The strike of locomotive engineers, firemen and cleaners of the British railways, which began on January 20, was due to the failure of the executive of the Associated Society of Locomotive Engineers and Firemen to reach an agreement with the general managers of the railway companies with regard to wages. The railway companies wished to abolish the sliding scale based on the cost of living, maintaining the standard rate only, and to increase the mileage basis from 120 to 150 miles per day, according to the terms of the award of the National Wages Board which had been rejected by the union. The change would mean a loss of 11s. 6d. to 22s. 6d. a week for engineers and from 9s. to 18s. per week for firemen. It was estimated that about 69,000 employees were directly involved in this dispute a number of whom belonged to the National Union of Railwaymen which had accepted the findings of the National Wages Board. On January 23, the Trade Union General Council appointed a small committee to act as mediators, and through their efforts negotiations were resumed and a settlement arrived at on January 29.

The terms of the agreement provided that the mileage basis should be 130 miles a day from the date of the decision to July, 1924. From the latter date, 140 miles are to equal one day's pay and from January, 1925, the basis is to be 150 miles a day unless, in the interval, it is otherwise agreed. A compromise was also effected, in the matter of engineers doing part-time work in the shunting class and part-time in main line work. The strike was declared off immediately after the agreement was reached.

### Strike of Dockers at British Ports

On February 16 a general strike of dock workers took place which completely tied up work at all British ports. The cause of the dispute was the failure of the Transport and General Worker's Union to reach an agreement with the various employers of dock labour with reference to wages and general conditions of employment. There were also associated with this union the National Amalgamated Union of Labour, the United Order of General Labourers and the Amalgamated Society of Engineers, Motormen and Electricians. The employers' organization concerned was The National Council of Port Labour Employers. The demands of the union were for an advance of two shillings a day in wages on the basic wage of 10 shillings, with corresponding alterations in piece rates; and a guaranteed week. The employers offered an advance of one shilling a day and the restoration of piece work rates of June, 1923, and agreed to submit to arbitration the question of a guaranteed week. This offer, was rejected and the strike was declared, the Ministry of Labour having failed to effect a settlement. It was estimated that about 100,000 dock workers out of 110,000 were involved. During the progress of the strike which lasted from February 16 to February 25 the work of handling freight and luggage almost completely ceased at the ports. The Minister of Labour set up a Court of Inquiry into the strike under the Industrial Courts Act, and steps were taken by the Government to induce the parties to the dispute to resume negotiations. On February 21 the leaders of the workers agreed to an offer of the employers of (1) an increase of 2 shillings a day, one shilling payable immediately and the second as from June 1, and (2) a joint inquiry in regard to the abolition of casual employment and the adjustment of other working conditions. The terms of settlement were accepted by vote of all the local branches of the union and work was resumed on February 26.

## LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

### Agenda of 1925 International Labour Conference

IN view of the fact that a large number of countries are proceeding to revise their legislation on social insurance, it has been decided to include on the Agenda for the 1925 Session of the International Labour Conference the discussion of a report on the general principles for social insurance, and as a second subject the special question of industrial accidents. The latter item will probably result in the adoption of a Draft Convention or Recommendation dealing with workmen's compensation.

### Governing Body of the International Labour Office

The Governing Body of the International Labour Office held its 21st Session at Geneva on January 29-31. The Honourable James Murdock, Minister of Labour of Canada, who is one of the twelve Government representatives on the Governing Body, was unable to attend on this occasion and was represented by Mr. Philippe Roy, Commissioner General of Canada in Paris. A report was received from the Director on the general work of the International Labour Office during the last few months, and the Governing Body proceeded to an exchange of views on the progress of ratifications of the Draft Conventions which have been adopted at the successive annual sessions of the International Labour Conference since 1919. It was reported that 92 formal ratifications of Conventions had been registered from the various States. The representative of the Polish Government informed the meeting of the recent ratification by his country of thirteen Conventions. The representative of the Italian Government announced the impending ratification by Italy of all the Conventions which have been adopted at the several sessions of the Conference, with the exception of the Eight-Hour Convention, which is at present before the Italian Parliament.

The meeting was unanimous in inviting the Director to obtain ratification of the various Conventions and a resolution was adopted instructing him to draw special attention to them by means of suitable publications explaining the reasons which led to their adoption, and the dissemination of all available information as to experience already gained in the application of these Conventions.

The representative of the French employers at the Governing Body meeting, while associating himself with the proposed action in

favour of ratification in general, pointed out that as a matter of fact the eight-hour day had been abandoned in Germany, and the reason adduced to justify the prolongation of the working day was the necessity of increasing production in order to meet the payment of reparations. It seemed to him to be difficult to forbid the German people to work one or two extra hours, since this additional effort would enable Germany to fulfil her obligations.

The German employers' representative intimated that in his opinion, in order to meet her engagements, Germany must first economize and next work harder, and that the extension of hours of work had no other object than the payment of reparations. Moreover, according to the views of German employers, the question was only one of a temporary measure which was made necessary by exceptional circumstances and ought to end when they ended.

The representative of the German Government expressed the view that there was a close connection between the payment of reparations and the need for prolonging the working day. Germany, he said, had only one means of ensuring her reconstruction and freedom—she must work harder. The extension of the working day was not, perhaps, the only method of increasing production; the German Government while recognizing the necessity of authorizing additional hours had taken care to preserve intact, in the recent order on hours of labour, the principle of the eight-hour day. When Germany had regained her economic equilibrium, she would revert to normal conditions with regard to hours of work.

The German workers' delegate asserted that the German workers were as much as or more than anybody willing to pay reparations, but, he added, they could not agree to any attempt to place the whole burden of reparations on the shoulders of the German workers. If production must be increased there were other means more effectual for the purpose than the lengthening of hours of work.

The French workers' representative declared that it was not possible for the Governing Body to endorse the doctrine of the French and German employers' representatives and to recognize the right of any one nation to stand outside the general rule governing hours of labour. The question of reparations was a question of great concern to every Frenchman, to whatever social class he belonged. The French working classes had supported

with all their power every effort which might lead to a solution of the reparations problem and the re-establishment of peace in Europe. But they were opposed to any binding up of the payment of reparations with the extension of hours of work in Germany. They were the more opposed to it because they believed that the prolongation of hours of labour did not imply an increase in production; far from it. In the circumstances of to-day the contrary would be the truth. The task of the International Labour Office was plain; it was to expedite, with all its energies, the ratification of the Washington Hours Convention.

Miss Margaret Bondfield, Parliamentary Secretary of the British Ministry of Labour, who is the representative of the new British Government, on the Governing Body of the International Labour Office, stated that experience in Great Britain had proved that long hours of work had not increased production. For this reason she could not in any way associate herself with the idea that the extension of hours of labour and the payment of reparations were inseparable questions.

The next Session of the Governing Body will be held in Geneva on April 8. Honourable James Murdock, Minister of Labour, who is a member of the Governing Body, has found that he will be unable to attend on this occasion, and Mr. Philippe Roy, Commissioner-General of Canada in Paris, has been appointed by Order in Council as substitute.

#### Amendment of Peace Treaty

At the 1922 Session of the International Labour Conference, a resolution was adopted proposing an amendment to Article 393 of the Treaty of Versailles to provide for an increase in the membership of the Governing Body of the International Labour Office to 32 persons, as follows:—16 representing government, 8 representing employers, 8 representing workers. This amendment has since been ratified by Roumania and a Protocol accepting the proposal has also been signed on behalf of the following States:—Australia, Canada, China, Cuba, France, Great Britain, India, New Zealand, Norway, Poland, Siam, South Africa. Ratification has been recommended to Parliament by:—Austria, Netherlands, Switzerland.

## MINIMUM WAGES IN NOVA SCOTIA AND ONTARIO

### Nova Scotia Act of 1920 to Become Effective on May 1, 1924

THE Minimum Wage for Women Act passed by the Legislature of Nova Scotia in 1920 (Chapter 11) contained the proviso that it was to "come into force on, from and after and not before such day as the Governor in Council orders and declares by proclamation."

A proclamation was issued on February 11, 1924, fixing the first day of May, 1924, as the date on which the Act will come into force.

The provisions of the Minimum Wage for Women Act were outlined in the LABOUR GAZETTE for September, 1920, in the course of a summary of the labour enactments of that year. It will be recalled that the Nova Scotia Act applies only to factories and shops. Factories are defined as in the Factories Act, while a shop is defined as "any retail, auction, or wholesale shop, store, booth, stall, or warehouse in which assistants are employed for hire." The Governor in Council is authorized to appoint a Minimum Wage Board consisting (as in Ontario, Manitoba and Saskatchewan), of five members, including two women. The members of this Board will receive remuneration according to a scale fixed

by the Governor in Council. They will have authority, first, "to ascertain and declare what wages are adequate to furnish the necessary cost of living to employees," and, where not inconsistent with the Factories Act or the Act "Of the Closing of Shops and the Hours of Labour therein for Children and Young Persons" (Revised Statutes of 1900, Chapter 124\*) to ascertain and declare also what was reasonable hours and proper sanitary conditions and requirements for those employed in factories and shops; and secondly, to establish standards of minimum wages and of hours of employment for such employees. The Board is clothed with the full authority of a Commission under the Public Inquiries Act, with power to summon witnesses, issue warrants, etc.

Employers are required by the Act to keep registers of the names, addresses, and actual earnings of all their employees, and to permit any member or representative of the Board to inspect these registers. Special minimum rates may be fixed for defective workers and for apprentices in occupations for which minimum wages have been fixed,

\*This Act was incorporated with the Children's Protection Act (Statutes of 1917, Chapter 2, Sections 67-68).

and the Board may issue special licenses, good for a specified period, to these classes to work for wages below the regular rate. Employees are protected against dismissal or intimidation by their employees for their share in any inquiry by the Board. Employers paying wages below the minimum rate are subject, in respect to each employee so underpaid, to a fine from \$25 to \$100, and the employee, moreover, may recover the amount by which her actual wages were short of the minimum rate for her class, notwithstanding any agreement she may have entered into to work for less wages.

The Act applies only to the cities and incorporated towns of Nova Scotia, but the area of application may be extended at any time by the Governor in Council on the recommendation of the Board.

### Minimum Wages in Ontario

*Order Governing Work in Laundries, etc.*—The Minimum Wage Board of Ontario recently reissued, with some changes, the existing order governing female employees in laundries, dry-cleaning establishments and dye-works in the province, the new order to take effect on March 1, 1924. The original orders governing this group, the earliest orders issued by the Board after their appointment near the close of the year 1920, were outlined in the *LABOUR GAZETTE* for April, 1921 (page 589), and in the summary of various orders which was given in the issue of September of the same year (page 1156).

Following the practice of the Board the amount of the minimum wage varies slightly in different parts of the Province, Toronto as the centre of densest population having the highest rate, followed by other cities, and by the rest of the province excluding such centres. The new order governing workers in laundries, etc., makes some changes in this population basis. Toronto remains in a class by itself, but in the cities of the second class are now included all those having a population of 30,000 or over, instead of only those with 50,000 or over. A larger number of employees therefore have the benefit of a higher minimum rate than formerly, being moved from the third to the second class. The third class, which has the lowest minimum, includes the rest of the province.

Apart from the change just mentioned, the minimum wage for skilled adults remains unaltered, being \$12 a week for Toronto, the

same amount for other cities of over 30,000 population, and \$11 for the rest of the Province. The minimum rates for experienced adults and for young girls also remain as before. A change, however, is made in the proportion of inexperienced to experienced workers which is allowed in any establishment. This proportion was formerly 25 per cent for inexperienced adults and the same for minors, but under the new order the total number of inexperienced adults and minors combined must not exceed 25 per cent of the total number of employees.

The work period for which these minimum wages are to be paid must not be less than 44 or more than 50 hours a week. Work in excess of 50 hours is to be counted as overtime and paid for that not less than the minimum wage rates, reckoned on the basis of a 50-hour week. (The earlier order required that overtime be reckoned on the basis of a week of 48 hours.) On the other hand work for less than 44 hours a week may be counted as "short time," and paid for at not less than the minimum rates reckoned proportionately to the regular weekly work period in the establishment concerned. (The earlier order fixed 40 hours as the limit for "regular" employment.)

The new order raises the maximum charge which may be made for board and lodging, making a distinction between the amounts which may be charged for these services in cities and in country districts. Formerly the charge for lodging was limited (except in Toronto) to \$1.50 per week, but in cities of more than 30,000 a charge of \$2 may now be made; similarly the maximum charge allowed to be made for board is raised from \$4.50 to \$5 in the urban centres, remaining at the smaller figure in the rest of the Province. The charge for single meals must not anywhere exceed 25 cents, the same limit as formerly fixed. No deduction below the minimum wage line for absence may exceed the value of the time lost reckoned in proportion to the normal working hours in vogue in the establishment concerned.

*Other new orders.* The Ontario Minimum Wage Board has recently held public hearings in connection with proposed orders to govern the paper trades (including bookbinding, printing, etc.) in Toronto, and places of amusement outside Toronto. These orders, when issued, will be given in a future issue of the *LABOUR GAZETTE*.

## LABOUR AND WAGES IN VARIOUS INDUSTRIES IN CANADA

### Report from Dominion Bureau of Statistics on (a) Slaughtering and Meat Packing and Allied Industries, 1922, and (b) The Hosiery and Knit Goods Industry, 1921

THE Dominion Bureau of Statistics has recently issued reports on the slaughtering and meat packing industries in Canada for the calendar year 1922 and the hosiery and knit goods industry, 1921. Previous reports in this series relating to various industries were outlined in the *LABOUR GAZETTE* for January, 1924, and previous issues.

#### Slaughtering and Meat Packing and Allied Industries

According to the report slaughtering and meat packing is one of the principal industries in Canada. In 1920 it led the industries in value of production, and in 1919 was second on the list. Cured meats and other manufactured products constitute the larger part of the value of output, these products representing 65 per cent of the total value in 1919; 61 per cent in 1920; 60 per cent in 1921 and 62 per cent in 1922.

In 1922 there were 83 slaughtering and meat packing establishments in operation. Of these 27 were in Ontario, 22 in Quebec, 14 in the maritime provinces, 8 in Alberta and Saskatchewan, 7 in Manitoba and 5 in British Columbia. In 1921 there were 84 establishments operating and in 1920 there were 86. The total value of production in 1922 was \$143,414,693 compared with \$153,136,889 in 1921 and \$240,544,618 in 1920. Average prices of all fresh meats were lower than in 1921. The capital investment of the industry at the end of 1922 represented a total value of \$56,710,481 distributed as follows: \$34,584,160 in Ontario, \$8,112,150 in Quebec, \$6,302,950 in Alberta and Saskatchewan, \$4,540,162 in Manitoba, \$2,605,515 in British Columbia and \$565,544 in the maritime provinces. The number of persons employed in the industry in 1922 was 9,800, comprising 8,857 male and 924 female employees. Of these 2,595 were salaried employees, 7,186 were wage-earners and 19 were outside piece-workers. There were 5,232 employees engaged in Ontario, 1,849 in Quebec, 1,075 in Manitoba, 1,190 in Alberta and Saskatchewan, 335 in British Columbia and 119 in the maritime provinces. The total amount paid in salaries and wages during the year was \$12,366,896, of which \$7,782,241 was paid to wage-earners and \$4,569,184 to salaried employees. The amount paid to outside piece-workers was \$15,471. Of the total amount paid in salaries and wages \$6,806,821, or over half the total amount, was

paid to workers in Ontario, \$2,037,521 to workers in Quebec, \$1,632,158 to workers in Saskatchewan and Alberta, \$1,253,823 to workers in Manitoba, \$522,108 to workers in British Columbia, and \$114,465 to workers in the maritime provinces. The statistics of wage-earners by months shows 7,129 persons employed in January and decreased numbers for the three following months. From May to November there was a steady increase in employment from 6,769 in May to 8,235 in November when the maximum for the year was reached. In December there were 8,080 persons employed. The total cost of animals slaughtered and materials used was \$115,154,525 as compared with a total of \$113,389,835 in 1921.

Factories whose chief or only product was sausage or sausage casings numbered 30, comprising 14 in Ontario, 11 in Quebec, 3 in Manitoba and 2 in British Columbia. The total value of the products of these industries was \$1,188,983, and of this amount products to a value of \$557,393 were produced in Quebec. The total cost of materials used was \$715,878, and the amount of capital invested \$673,421 including \$352,670 in Quebec, \$265,120 in Ontario and \$55,631 in the other two provinces. There were 214 persons employed in the industry, Quebec having 103 of these workers and Ontario 92. Salaries and wages paid amounted to \$273,539, \$138,424 being the sum paid in Quebec, \$113,509 in Ontario and \$21,606 to the 19 workers in Manitoba and British Columbia.

There were seven establishments whose chief and only products were animal oils and fats, five of these were in Ontario, one in Manitoba and one in Quebec. The capital invested was \$202,251, the number of employees 42, salaries and wages \$44,256, cost of materials used \$153,862, and value of products \$326,973.

#### Hosiery and Knit Goods Industry, 1921

The number of individual plants reporting to the Bureau as producing hosiery and knit goods in the year 1921 was 127. The province of Ontario led with 70 per cent (or 88) of the operating plants and 80 per cent of the total value of production, Quebec being second with 18 per cent (or 23) of the plants and 12.5 per cent of the production. There were 4 plants in each of the provinces of British Columbia and Manitoba, 3 in Nova Scotia and 3 in Alberta, and one in each of

the provinces of New Brunswick and Saskatchewan. The total value of production was \$36,689,534; the cost of materials used \$18,960,491, the capital invested, \$37,906,361; employees on salaries 976 (660 male and 316 female) whose earnings were \$1,839,381; employees on wages, 9,471 (2,785 male and 6,686 female) earning \$6,559,892; and outside piece-workers, 485, (4 male and 481 female) earning \$54,789. The total number receiving \$20 or less per week was 1,769 males and 8,070 females whilst those receiving more than \$20 per week numbered 1,503 males and 420

females. Of the number receiving weekly wages, 114 males and 399 females were under 16 years of age and 3,128 males and 8,091 females were over 16 years of age. In Ontario there were employed 486 males and 265 females on salaries whose earnings totalled \$1,454,574 and 2,164 males and 5,674 females on wages whose earnings totalled \$5,360,719. The total number of employees in the industry in 1921 was 10,932 which was a decrease of 3,130 as compared with the previous year, and salaries and wages amounted to \$8,454,062, showing a decrease of \$1,941,460.

## REHABILITATION OF DISABLED WORKERS IN UNITED STATES

**A** NATIONAL Conference on the vocational rehabilitation of disabled civilian workers was held at Washington, D.C., on February 4 to 8. Mr. R. A. Rigg, Director of the Employment Service of Canada, represented the Department of Labour at the conference.

In 1920, the United States Government passed an act establishing the principle of federal aid to state governments in respect of expenditures incurred by the latter in connection with the carrying out of the programme of refitting permanently disabled workers so that they might be restored to full economic independence. The appropriations made were, for the first year, \$750,000 and for each of the three subsequent federal fiscal years ending with June, 1924, \$1,000,000. In addition, an annual appropriation of \$75,000 was made for the purpose of administering the act. The passing of such legislation carries with it the recognition on the part of the federal government of joint responsibility with the state governments for vocational rehabilitation of disabled civilian workers. No provision, however, was made in the act for the federal government itself undertaking any part of this work, the state governments being regarded as the direct authority.

The allotment of the federal appropriation is based on state population, and not upon expenditures incurred by the state, as is the case between the federal and provincial governments in Canada under the terms of the Employment Offices Co-ordination Act. A condition imposed by the federal act is that, for each dollar received by each state government from the appropriation provided, at least an equal amount must be spent by the state government. Thirty-six of the forty-eight states of the Union have entered into agreement with the federal government under this scheme.

In the course of an address delivered to the conference, Dr. R. M. Little, Director of Rehabilitation, State of New York, stated that during the federal fiscal year ended June 30, 1923, 4,530 handicapped civilians had been restored to a state of economic independence through being fitted for and placed in employment at which they could earn their own living. This work was accomplished at a cost of slightly over \$1,100,000, the cost per capita being approximately \$253. It is estimated that in the United States 180,000 persons suffer every year from public and industrial accidents which impose permanent physical disabilities, and that the number of those suffering such disabilities as a result of diseases or congenital defects brings the total of annual disabilities to 225,000. It is further estimated that about one-half of this number is handicapped vocationally by reason of their disabilities.

Dr. H. W. Orr, of Lincoln, Nebraska, a surgeon who has specialized in physical reconstruction, stated that about fifty per cent of the disabled workers were permanently rehabilitated when rehabilitation depended upon the efforts of the disabled person, his family, social workers, the doctor, or friends, but that eighty-five per cent were capable of permanent rehabilitation after proper orthopaedic, reconstruction, surgical, or hospital service had been rendered. The annual report of the Civilian Rehabilitation Division of the Federal Board for Vocational Education, covering the fiscal year 1922-23, states: "Experience under this act, during the brief period elapsed since its passage, has demonstrated conclusively that in a great majority of cases vocational handicaps can be completely overcome and the wage-earning capacity of the disabled person completely restored." The Honourable James J. Davis, United States

Secretary of Labour, declared himself strongly in favour of the continued participation by the federal government in the work of civilian rehabilitation.

When the training or re-training of disabled workers for employment is necessary, it is provided, through the schools, industrial or commercial establishments or private tuition. Dr. Herman Schneider, Dean of the College of Engineering and Commerce, University of Cincinnati, Ohio, stated that re-training was frequently very easily accomplished where the injury was only of a physical character and that many re-trained workers earned more money at their new employ-

ment than in the work in which they had been originally engaged. This, of course, was due to the greater care that had been exercised to fit the re-trained worker for employment for which he was naturally more suited.

It was estimated that the average age at which accidents occur, resulting in vocational disability, was thirty-two years. It was claimed that the rehabilitation work carried on in the United States had demonstrated that the least costly method of dealing with such cases is to make an investment of money and service on behalf of the unfortunate injured, for the purpose of enabling him to again become self-supporting.

## NOTES RELATIVE TO LABOUR UNION ACTIVITIES

THE following international labour organizations, all of which have local branches in Canada, will hold their respective conventions in the localities specified during the month of May, 1924:

International Fur Workers' Union, at Chicago, Ill., on May 5.

Amalgamated Clothing Workers of America, at New York, N.Y., in May.

American Federation of Musicians, at Colorado Springs, Col., on May 12 to 17.

Order of Railroad Telegraphers, at Cleveland, Ohio, on May 12 to 24.

Switchmens' Union of North America, at Denver, Col., in May.

International Alliance of Theatrical Stage Employees and Moving Picture Machine Operators, from May 26 to 31.

International Ladies' Garment Workers' Union, at Boston, Mass., on May 5.

According to reports received in the department from most of the labour organizations operating in Canada, the sum of \$9,651,140 was paid during 1923 as death benefits. For the same period \$1,150,937 was expended on account of sickness and \$8,243,201 was disbursed as strike benefits.

In accordance with the approval of its 1923 convention, the American Federation of Labour has established a Legal Information Bureau, the purpose of which is to act as a central agency for the collecting and collating of legal decisions and decrees (particularly

as such affect labour organizations) and to disseminate the same to all affiliated bodies for their better guidance and protection. The first work of the new bureau, which is under the direction of Mr. Matthew Woll, seventh vice-president of the Federation, was the issuance of a bulletin which deals with recent legal decisions, treating of contempt of court, picketing and other subjects of importance to trade unionists.

By a referendum vote of the membership of the United Brotherhood of Carpenters and Joiners, it was decided by a substantial majority that the organization should establish a home for aged members and also an old age pension. The first step toward the achievement of the former objective was the purchase, recently, of a tract of fruit land, consisting of 1,684 acres at a cost of \$632,393. This large tract is located near Lakeland, Florida.

According to the labour press, a damage suit for \$4,620,525 has been entered in the Philadelphia courts against the American Federation of Labour and its affiliates by Harry S. Jeffery, formerly chairman of the advisory board of the railway employees of Philadelphia and district during the period of government control of the railways. In the suit, the plaintiff charges that the labour organizations have been engaged in a conspiracy during the last four years to effect his social and financial ruin because of his refusal to use his influence to bring about a nation-wide strike after the government had returned the railroads to private control.

## CONVENTION OF UNITED MINE WORKERS OF AMERICA

THE twenty-ninth consecutive and sixth biennial convention of the United Mine Workers of America was held at Indianapolis, Ind., from January 22 to February 2 with over 1,800 delegates present representing a membership of about a half million. The president Mr. John L. Lewis was in the chair.

The secretary-treasurer's report for the two-year and four-month period ending November 30, 1923, gave the total paid-up membership for the sixteen months ending November 30, 1922, as 285,893 and for 1923 as 445,734, this being the highest yearly paid-up membership ever reached by the union. The average number of members exempted from paying dues during the four months ending November 30, 1923, was 67,779. The income of the International Union from all sources, during the whole period, amounted to \$8,747,842 and the expenditures were \$8,703,722. The amount expended as aid to the membership was \$3,771,350, of which \$53,000 was supplied to District 18. The balance on hand on November 30, 1923, was \$1,177,021 with no indebtedness outstanding against the International Union.

In his report to the convention President Lewis proposed a long term wage contract as a means of stabilizing the bituminous coal industry, claiming that a long term contract, without a strike or suspension would be of constructive help in restoring stability to the industry, and would demonstrate to the coal consumer that the industry itself was making a sincere attempt to "place its house in order." The long term agreement also would eliminate the necessity for coal legislation by congress and the various state legislatures, he said. The following report was submitted to the convention by the Scale Committee and was adopted without change:—

(1) We recommend to the convention, in lieu of all resolutions relating to wages and working conditions that have been presented, that the properly accredited representatives of the organization be authorized and instructed to secure the best agreement obtainable from the operators in the Central Competitive Field on the basis of no reduction in wages and that any agreement so secured be submitted to a referendum vote of the membership for ratification.

(2) We recommend that the next wage scale cover a period of four years, beginning April 1, 1924, and ending March 31, 1928.

### Policy

(1) For the purpose of meeting in a practical and constructive way all unforeseen emergencies which may arise a Policy Committee composed of the Scale Committee of the Central Competitive Field, three representatives from each outlying district, the members of the International Executive Board and the International officers, be authorized to take such action for

the protection of our best interests as circumstances may require and to advise the membership on unexpected developments which may arise and which cannot now be foreseen.

(2) The committee recommends that the outlying districts be authorized to enter into wage scale negotiations with their respective operators when the opportunity presents itself, it being understood, however, that no outlying district will conclude an agreement until after an agreement for the Central Competitive Field has been secured, or permission to do so has been granted by the Policy Committee.

(3) The committee recommends that all contracts run concurrently and expire on the same date.

A number of resolutions were presented concerning the suspension of the charter in Nova Scotia and asking for the reinstatement of the district and the deposed officials. In lieu of these resolutions the resolutions committee substituted a review of the case pointing out that the laws of the organization were made for the purpose of governing the United Mine Workers and that these laws were most flagrantly disobeyed. President Lewis reviewed the case in its entirety and the report of the committee was ratified by a standing vote that was almost unanimous.

The convention expressed itself opposed to all resolutions endorsing the Third Internationale (Moscow) claiming that it and other similar organizations have been bitter in their denunciation of organized labour in America as it was now formed and functioning, and that the United Mine Workers had no right to affiliate with such a group.

A resolution was adopted in favour of the principle of nationalization not only of mines but of railroads with a reiteration of the principles of democratic management of nationalized industry and a recommendation that the work of education in this regard be continued. A resolution was adopted asking that the International Executive Board continue its efforts to bring about a better understanding between the men of the mines and the men affiliated with the railroad brotherhoods.

Among other resolutions adopted by the convention were the following: that the International Executive Board be given power to investigate the possibility of radio as a means of saving lives in mine disasters and the advisability of placing a broadcasting station at international headquarters; that the present activities in insurance be confined to local or district death, sick or accident insurance; that the question of continuing the service of the Old Age Pension Committee be left in the hands of the International Executive Board; that the various districts strive

to have legislation enacted classifying the disease, miners' asthma, as an "occupational disease" so as to come under the benefits of the workmen's compensation law. A resolution was adopted favouring the soldiers' bonus and better sanitation of mining camps. Another resolution was adopted favouring a

federal statute prohibiting the courts from issuing injunctions and urging congressional action. By a vote of 2,263 to 2,106 the president's power to appoint organizers was preserved.

It was decided to hold the next convention at Indianapolis, Indiana, in 1926.

### THE EMPLOYMENT SITUATION AT THE BEGINNING OF FEBRUARY, 1924, AS REPORTED BY EMPLOYERS

THE reopening of many plants which had been closed down at the beginning of January provided work for a large number of persons and caused the employment index to rise from 88.7 on January 1 to 90.6 on February 1, 1924. On February 1, 1923, the index was at 89.5, in 1922 at 78.9, and in 1921 at 90.1. The recovery indicated during the period being surveyed parallels that recorded at the same date of last year; both the losses and the revival this year, however, affected a smaller number of workers. The curve in the accompanying chart shows the upward trend that employment has evidenced and also shows that the situation is better than at the corresponding period of the last three years.

An aggregate payroll of 749,363 persons was reported by the 5,896 employers making returns, as compared with 733,623 in the preceding month. The difference represented an increase in personnel of 15,735 workers or over 2 per cent as compared with a gain of rather better than 3 per cent at the beginning of February, 1923. The bulk of the recovery was registered in manufacturing, but logging, mining and railway construction also afforded more employment. On the other hand, transportation, highway and railway construction and trade showed large seasonal losses.

Quebec, Ontario and British Columbia reported improvement in the situation, while in the maritime and prairie provinces further curtailment was indicated. The largest gains in Quebec occurred in iron, steel, rubber, tobacco and lumber factories; logging and railway construction also showed considerable additions to staff. Textiles, pulp and paper, trade, transportation and highway construction, on the other hand, registered reduced activity. The province of Ontario recorded more pronounced expansion than elsewhere; the firms making returns increased their payrolls by over 14,000 persons or 4.6 per cent. The iron, steel, textile, lumber, leather, rubber, pulp, paper, food and non-ferrous metal product divisions registered extensive gains. Logging, metallic ore mining, and railway

transportation also reported improvement on a large scale. Construction, street railway transportation and trade, however, showed large declines, the reductions in the last named being particularly heavy. Manufacturing in British Columbia showed considerable improvement, especially in the lumber, railway car, pulp and paper divisions; mining also was more active. Logging, construction and trade, on the other hand, afforded less employment. Employment in the maritime provinces declined largely in rolling and forging mills, partly as a result of a trade dispute in the allied coal-mining industry; construction, trade and railway transportation recorded contractions. Sugar, pulp, paper, logging, coal mining, shipping and stevedoring, however, were a good deal busier than at the beginning of January. The largest decline in the prairie provinces occurred in railway transportation. This decrease is seasonal in character, representing reaction from the increased activity of the grain moving season. Trade, railway car shops and building construction also recorded reduced employment. Coal mining, railway construction and sawmills, on the other hand, reported fairly large additions to staff. The following table shows the index numbers of employment at the beginning of February as compared with the month before and with the same date of the three preceding years.

District	Relative Weight	Feb. 1 1924	Jan. 1 1924	Feb. 1 1923	Feb. 1 1922	Feb. 1 1921
Maritime provinces.....	8.3	83.2	86.3	90.4	78.6	96.3
Quebec.....	27.4	92.8	90.5	87.7	74.6	90.4
Ontario.....	42.9	90.0	86.1	90.0	79.5	88.1
Prairie provinces.....	13.1	92.1	94.3	91.6	83.0	93.7
British Columbia.....	8.3	92.7	90.9	88.4	84.3	87.2
Canada.....	100	90.6	88.7	89.5	78.9	90.1

Three of the cities for which separate tabulations are made, Montreal, Hamilton and Winnipeg, recorded increased activity, while the remaining three, Toronto, Ottawa and

Vancouver, registered curtailment. In Montreal, railway car and other iron and steel plants reported a large share of the improvement; tobacco and some other branches of manufacturing also afforded increased employment. Textile and electric current works, construction and trade, on the other hand, showed curtailment. Statements were received from 732 employers in that city with an aggregate working force of 100,615 persons as compared with 99,787 in the preceding month. The difference represented an increase of .8 per cent. Textile, pulp, paper, biscuit, iron, steel, electrical apparatus and leather factories in Toronto reported revival, but lumber, local transportation and trade were decidedly less fully engaged. The payrolls of the 810 firms making returns in Toronto stood at 93,044 persons as compared with 93,965 in the preceding month; this was a decline of about one per cent. The changes in Ottawa were comparatively slight, affecting only about 2 per cent of the payroll. Small increases were registered in lumber mills, but construction and trade were not so active. Reports were tabulated from 126 employers in Ottawa, whose payrolls aggregated 9,414 persons, whereas in the month before they had employed 9,671 workers. The most pronounced changes in Hamilton were the large increases that occurred in agricultural implement, wire, car and other iron and steel works and in knitting mills. Building contractors, on the other hand, reported rather large declines. The returns showed that the 204 firms making returns had increased their payrolls from 24,161 persons at beginning of January to 25,836 on February 1; this was an increase of about 6 per cent. A generally upward tendency was apparent in Winnipeg; the majority of industries shared in the improvement. Textiles reported the most important gain, while trade recorded the only reduction of any size. According to reports from 289 Winnipeg employers, their payrolls, standing at 23,862 persons, were larger by 370

than in the month before. Varying conditions in Vancouver resulted in a net decline in staff of 90 workers. The working force of the 232 firms making returns aggregated 20,091 persons. Manufacturing as a whole afforded more employment; there were rather small increases in a large number of industries within the division. Construction and trade, on the other hand, were slacker in Vancouver. The index numbers of employment by cities are shown in the following table:—

City	Relative Weight	Feb. 1 1924	Jan. 1 1924	Feb. 1 1923	Feb. 1 1922
Montreal.....	13.4	87.1	86.3	86.2	73.6
Toronto.....	12.4	84.7	85.6	88.5	81.8
Ottawa.....	1.3	89.7	91.0	95.7	
Hamilton.....	3.4	84.3	79.0	86.0	
Winnipeg.....	3.2	84.7	85.3	89.0	84.1
Vancouver.....	2.7	91.1	91.1	85.8	88.7

**The Manufacturing Industries**

Employment in practically every division of manufacturing showed some recovery from the losses that had been indicated at the beginning of the year. The revival in the iron and steel and textile industries gave employment to a very large number of workers, while the improvement in lumber, leather, rubber, tobacco and non-ferrous metal products works was also extensive. Increases on a rather larger scale had been reported during the corresponding period of last year; these, however, had represented recovery from much larger losses than were indicated at the beginning of January, 1924. Statements were received from 3,836 manufacturers employing 420,872 persons on February 1, 1924, as compared with 397,612 at the beginning of January. This was an increase of 5.8 per cent. The index number was on practically the same level as during the corresponding period of the year before.

**ANIMAL PRODUCTS—EDIBLE.**—Dairies were more fully employed than in the preceding month and meat packing houses also showed some improvement, but fish canning and curing establishments were slacker. According to returns from 140 concerns in the edible animal products group, their payrolls, standing at 12,653, were larger by 137 or one per cent than in the preceding month. This increase occurred very largely in Ontario, while in Quebec curtailment was indicated. Reductions in personnel had been reported during the same period of 1923, when the index number stood very slightly lower.

**LEATHER PRODUCTS.**—Considerable recovery from the contractions registered at the beginning of January was indicated by the 205 manufacturers of leather products making returns. They employed 17,686 persons as compared with 16,533 in the last report. A large share of this increase of 7 per cent occurred in boot and shoe works, but the production of leather and leather goods also afforded increased employment. The greater part of the gain occurred in Ontario, but there was also improvement in Quebec. The increase recorded at the beginning of February was on a very much larger scale than that indicated at the corresponding period of last year, but the index number then was some four points higher than during the period under review.

**LUMBER AND PRODUCTS.**—For the first time since the end of August employment in this industry showed an increase; this favourable movement repeats that registered on the same date in 1923. The improvement then had not, however, been quite as pronounced. The commencement of activity in lumber mills provided employment for a considerable number of workers, while container, furniture, vehicle and other lumber works were busier. A substantial part of the expansion was recorded in Ontario and Quebec, although the tendency everywhere was upward. Statements were compiled from 700 manufacturers in this division, with an aggregate payroll of 40,164 persons as compared with 37,331 in the month before. The difference represented an increase of 7.6 per cent.

**PLANT PRODUCTS—EDIBLE.**—Starch and biscuit factories were decidedly busier than at the beginning of January, when shutdowns had affected many establishments. Sugar and confectionery plants, however, showed further curtailment on the whole. The bulk of the improvement in the group was shown in Ontario; the Maritime Provinces also recorded increased activity, while elsewhere the changes were not large. An aggregate payroll of

24,214 persons was reported by the 306 concerns making returns, who had employed 23,688 workers in the preceding month. Rather more extensive increases had been registered during the corresponding period of 1923, but employment then was in slightly smaller volume.

**PULP AND PAPER.**—Some recovery was shown in the pulp and paper industry at the beginning of February, when 794 persons were added to the staffs of the 457 concerns making returns. As their payrolls comprised 51,367 persons as compared with 50,573 in the month before, this represented an increase of 1.6 per cent. Pulp and paper mills, printing and publishing shops and works turning out miscellaneous paper goods shared fairly evenly in the additions. Some improvement was reported in all provinces except Quebec, that in Ontario being the most extensive. The situation during the corresponding period of last year was not so good; the recovery then was somewhat less pronounced.

**RUBBER PRODUCTS.**—The resumption of operations in rubber factories, whose activity had been temporarily curtailed, resulted in a large increase in employment in this industry. The payrolls of the 31 manufacturers making returns were enlarged from 8,297 persons at the beginning of January to 10,233 on February 1; the difference represented an increase of 23.3 per cent. The improvement was confined to Ontario and Quebec where the production of rubber footwear, tires and miscellaneous rubber goods absorbed many more workers than in the month before. The recovery recorded during the corresponding period of last year had been somewhat larger and the index number stood several points higher than on February 1, 1924.

**TEXTILE PRODUCTS.**—Employment in textile works showed considerable recovery from the heavy losses that had been indicated in the preceding month; 4,293 persons were added to the payrolls of the 580 firms making returns, whose staffs aggregated 68,957 persons on February 1. Hosiery, knitting, garment, headwear and bedding factories recorded the bulk of this increase of 6.6 per cent. Activity in fabric works on the other hand, showed a further decline. Practically all the improvement was registered in Ontario, while in Quebec the tendency was downward. Somewhat less extensive revival had been indicated during the corresponding period of 1923, but the index number then stood slightly higher than at the present time.

**TOBACCO, DISTILLED AND MALT LIQUORS.**—The resumption of operations in large tobacco

works in Quebec caused a substantial increase in employment in this division. The situation was very much more favourable than during the corresponding period of last year, when improvement had also been recorded. Statements were tabulated from 98 firms employing 11,725 persons as compared with 10,405 at the beginning of January. There was, therefore, an increase of 12.7 per cent.

**CLAY, GLASS AND STONE PRODUCTS.**—Brick works reported considerable improvement at the beginning of February. According to returns from 115 employers in the clay, glass and stone division, their payrolls aggregated 8,164 persons as compared with 7,862 in the preceding month. Quebec, the prairie provinces, and British Columbia recorded the bulk of this increase of 3.8 per cent. During the corresponding period of last year contractions had been indicated, but the level of employment then was very slightly higher than at the present time.

**ELECTRIC CURRENT.**—Further curtailment was shown in electric current works at the beginning of February, when 141 persons were laid off by the 87 concerns making returns. As they employed 10,857 persons, as compared with 10,998 in the last report, this represented a decline of 1.3 per cent. The greater part of the contraction occurred in Quebec. The tendency during the corresponding period of last year had also been retrogressive; the situation then was not quite as good as at the present time.

**ELECTRICAL APPARATUS.**—The trend of employment in this industry was upward; the increases recorder on February 1 were more than twice as large as the declines that occurred at the beginning of January. Statements were compiled from 31 manufacturers of electrical appliances whose payrolls comprised 8,798 persons as against 8,399 in the preceding month. Quebec and Ontario recorded practically all the improvement. Additions to staffs had been registered at the beginning of February, 1922, but the index number then stood considerably lower than during the month under review.

**IRON AND STEEL.**—The percentage increase at the beginning of February in payrolls of the reporting iron and steel manufacturers was practically the same as the contraction that had been recorded a month before. Railway car, automobile, shipbuilding, rolling, forging, agricultural implement and wire works, foundries and machine shops reported large increases, while expansion on a somewhat smaller scale was registered by makers of boilers, engines, tanks, general plant machinery, heating appliances, iron pipes, hardware, tools, etc. Firms in Ontario, Quebec and British

Columbia reported improvement. In Nova Scotia curtailment of operations occurred, partly as a result of a trade dispute in the allied coal-mining industry. The prairie provinces also recorded reduced activity largely in railway car shops. An aggregate payroll of 120,905 persons was indicated by the 646 employers making returns; at the beginning of January these firms had employed 112,031 workers. This increase of 7.9 per cent was smaller than that recorded at the beginning of February, 1923, which had represented recovery from very much more extensive contractions than those shown at the commencement of January, 1924. The index numbers for the two periods are practically the same.

**NON-FERROUS METAL PRODUCTS.**—Lead, tin, zinc, copper, gold, silver and platinum works were a great deal busier at the beginning of February than in the preceding month, although recovery from the losses of January 1 was not yet complete. Firms in Ontario and Quebec registered practically all the gains. Reports were tabulated from 110 employers in this division with an aggregate payroll of 11,246 persons as compared with 10,641 in the last report. There was, therefore, an increase of 5.7 per cent. Although the increases indicated during the corresponding period of last year had been considerably larger, the volume of employment was slightly less than during the month being reviewed.

**MISCELLANEOUS MANUFACTURING INDUSTRIES.**—Umbrella and roofing material works in Quebec and Ontario employed a larger number of persons than in the preceding month. The increases in miscellaneous manufactures exceeded the decreases that had been recorded at the beginning of January. The payroll of the 67 employers reporting totalled 3,992 persons, a gain of 209 or 5.5 per cent over their staffs in the preceding month.

### Logging

Employment in logging camps in the maritime provinces, Quebec and Ontario showed further increases, while in the prairie district and British Columbia declines were recorded. The tendency during the corresponding period of last year had also been upward, but the index number then was not quite so high as at the present time. The level of employment at the beginning of February, 1924, was, in fact, higher than at any period of the three preceding years. According to returns from 230 firms, their staffs aggregated 36,808 persons as compared with 35,692 at the beginning of January. This was an increase of 3.1 per cent.

### Mining

**COAL.**—Activity in coal mines in the prairie provinces, British Columbia and some parts

of Nova Scotia increased at the beginning of February, when 1,316 persons were added to the working forces of the 99 operators reporting throughout the country. They employed 30,103 persons or 4.6 per cent more than in the month before. The increase recorded during the month under review was rather larger than that indicated at the same period of last year, but the index number then stood several points higher than at the present time.

**METALLIC ORES.**—Gold, silver, nickel, zinc and copper mines in Ontario and British Columbia were more fully engaged than in the last month. Returns were compiled from 50 employers, whose staffs comprised 12,856 persons as against 12,387 in the preceding month. The difference represented an increase of 3.8 per cent, which is very much larger than that recorded during the corresponding period of last year. The volume of employment then was decidedly less than at the present time.

**NON-METALLIC MINERALS** (other than coal).—Asbestos mines and quarries in Quebec were much slacker than in the preceding month, while elsewhere the various divisions of the non-metallic mineral group showed little change on the whole. A combined working force of 5,322 persons was reported by the 68 employers making returns, who had employed 5,598 workers in the preceding month. During the corresponding period of last year the decreases recorded had been a good deal larger and the index number stood several points lower.

**Transportation**

**STREET RAILWAYS AND CARTAGE.**—Firms in this industry in Ontario and the prairie provinces registered considerable curtailment of operations. Their payrolls, aggregating 18,808 persons, were smaller by 5.6 per cent than in the last report. The index number stood slightly higher than at the beginning of February, 1923, when very little change in the situation had been shown.

**STEAM RAILWAYS.**—Mid-winter dullness in transportation affected employment on steam railways, particularly in the Prairie Provinces, but to some extent in the Maritime District and Quebec. In Ontario rather greater activity was indicated. Statements were tabulated from 106 concerns and divisional superintendents, employing 77,014 persons as compared with 79,362 workers on January 1. This decline of 3 per cent was very slightly larger than that recorded on February 1 of last year. The index number then, however, stood rather lower than at the present time.

**SHIPPING AND STEVEDORING.**—Slight reductions in employment were reported in water

transportation in Quebec, Ontario and British Columbia, while in the Maritime District additions to staffs were shown. The balance of employment was unfavourable, 134 men, or

1.4 per cent of the payroll having been released since the beginning of January. An aggregate working force of 9,326 persons was indicated by the 53 employers reporting. Contraction on a very much larger scale had been shown during the corresponding period of last year, but employment in this industry was then in rather greater volume.

#### Construction and Maintenance

**BUILDING.**—A continuation of the downward movement that employment in construction had shown since the beginning of October was apparent in the returns for the month under review. The reporting contractors, 301 in number, recorded a combined payroll of 17,190 persons as compared with 19,177 early in January. All provinces except Quebec shared in the contractions, which were particularly heavy in Ontario. The reductions during the month being surveyed affected slightly over 10 per cent of the payroll, whereas those indicated in February, 1923, affected 19 per cent. The index number then stood over 20 points lower than at the present time.

**HIGHWAYS.**—Employment on highways showed further seasonal curtailment, particularly in the Maritime Provinces, Quebec, Ontario and British Columbia. The declines, however, were substantially smaller than those recorded during the corresponding period of last year, when the index number was higher. Statements for February 1, 1924, were tabulated from 72 employers who employed 3,016 persons as against 4,386 in the month before. There was, therefore, a decrease of 31.2 per cent.

**RAILWAY CONSTRUCTION AND MAINTENANCE.**—For the first time since the beginning of September, employment in railway construc-

tion showed an increase. This occurred almost wholly in Quebec and the Prairie district, while in the Maritime Provinces and British Columbia the trend was unfavourable. An aggregate working force of 28,209 persons was reported by the 28 firms and divisional superintendents making returns; they had employed 26,450 workers at the beginning of January. Expansion on a much smaller scale had been registered at the beginning of February, 1923, but employment then was in very slightly greater volume than at the present time.

#### Trade

A very large reduction in personnel following holiday activity was reported by retail stores in all provinces. The declines were, however, heaviest in Ontario. Wholesale trade was also less fully employed than during the preceding month. Six hundred and four firms in the trade division recorded a combined sales force of 55,087 persons as compared with 60,006 in the last report. The difference represented a reduction of 8.2 per cent, of which approximately 95 per cent occurred in retail stores. The contractions registered during the corresponding period of last year affected a somewhat smaller number of persons and the index number then stood very slightly higher than on February 1, 1924.

The table on page 233 gives the index numbers of employment by industries as on February and January 1, 1924, and February 1, 1923, 1922 and 1921. The first column shows the proportion of employees in each industrial group in relation to the total number of workers reported in all groups for the month under review. (Number of workers employed in January, 1920=100).

### Proposed Joint Board on Canadian National Railways

The general grievance committee of the Canadian Brotherhood of Railway Employees on the Canadian National Railways recently approved proposals for the establishment of a joint board to adjudicate on grievances of employees on these railways who are members of their brotherhood in all cases in which a committee of the employees meeting with the railway officials directly fails to arrive at an adjustment. The proposed board would be composed of three representatives of the management and three of the employees, these six members of the board selecting a joint chairman when necessary. They would deal with

grievances arising out of matters coming under the schedule of working conditions and wages, but would not be concerned in revision of the schedule. Mr. A. R. Mosher, president of the Brotherhood, claims that this proposal would afford a solution of many difficulties of long standing. Similar boards are in existence on some railways in the United States. This Brotherhood is not represented on the Canadian Railway Board of Adjustment No. 1, which deals with matters similar to those that would come before the proposed joint board, and which has successfully disposed of all matters in dispute that have been brought before it.

**EMPLOYMENT OFFICE REPORTS FOR JANUARY, 1924**

A GREATER volume of business was transacted by the offices of the Employment Service of Canada during the month of January, 1924, as compared with the preceding month, although approximately the same level of business was maintained as during the same month of 1923. The early weeks of the year are ordinarily very difficult as far as employment is concerned and January of 1924 proved no exception to this rule. The work available was mainly of a temporary nature and registrations of applicants increased rapidly. The chart accompanying this article, which presents the returns from the offices on the basis of daily averages over half-month periods, shows a continued rise in the curves of vacancies and placements during the first half of January followed by a slight decline during the latter half of the month. The curve of applications also showed the characteristic rise during the early part of January, followed by a slight sag during the latter half of the period. A comparison with January, 1923, would indicate that, while the levels of vacancies and placements last year were slightly lower during the first half of the month they were maintained throughout the rest of the period, while during the latter half of January, 1924, a depression occurred. The reports from the offices show that the average number of applications reported during the first half of January was 1,917 daily as compared with 1,259 during the preceding period and with 1,919 daily during the same period in January, 1923. Registrations during the latter half of the month averaged 1,544 daily in contrast with 1,650 during the same period a year ago. The number of vacancies reported by employers to the Service averaged 1,388 and 1,209 daily during the first and second half of the month as compared with 1,298 and 1,273 reported daily during the same periods a year ago. The average number of vacancies reported by employers during the latter half of December was 972. Placements effected during the first half of January, 1924, averaged 1,276 daily in contrast with 914 daily during the preceding period and 1,142 daily during the same period in 1923. During the latter half of the period under review placements averaged 1,040 daily as compared with 1,159 daily during the corresponding period last year. The average number of placements in regular employment during January, 1924, was 619 and 558 daily during the first and second half of the month re-

spectively, while placements in casual work averaged 657 and 482 daily.

The following table gives the placements effected to date by the offices of the Employment Service:—

Year	Placements		
	Regular	Casual	Total
1919 (10 months).....	268,001	37,904	305,905
1920.....	366,547	79,265	445,812
1921.....	280,518	75,238	355,756
1922.....	297,827	95,695	393,522
1923.....	347,165	115,387	462,552
1924 (1 month).....	15,237	14,631	29,868

During the month of January references to employment totalled 31,409 while placements affected were 29,868. The reports from the offices show that the total placements in regular employment were 15,237, of which 12,459 were of men and 2,778 of women, while those affected in casual work were 14,631. Vacancies registered at the offices numbered 33,571, of which 26,587 were for men and 6,984 for women. The number of applications for employment was 44,613, of which 35,173 were for men and 9,440 from women.

Placements in regular employment by provinces were as follows:—Nova Scotia, 354 men, 84 women; New Brunswick, 282 men, 99 women; Quebec, 516 men, 389 women; Ontario, 5,947 men, 958 women; Manitoba, 1,523 men, 367 women; Saskatchewan, 1,127 men, 324 women; Alberta, 1,532 men, 302 women; British Columbia, 1,178 men, 255 women.

**MARITIME PROVINCES**

Curtaiment of all outside work was caused by the recent bad weather, the offices reporting an increased registration of unemployed workers. In an effort to improve conditions locally several municipalities had started sewer construction and repairs which offered employment to many, while in New Glasgow transmission line construction gave work to a few. A large percentage of workers were placed in casual work shovelling snow and clearing the streets. Better employment was afforded in the logging industries, orders for bushmen, choppers and sawyers being received at all the offices and a number of placements being effected in Northern New Brunswick.

**QUEBEC**

A general seasonal slackness was reported in the building industries with a few vacancies available for inside finishers and plasterers.

Temporary employment shovelling snow was afforded to a number of workers during the latter part of the month. Bush operations continued fairly active, although the demand was not so pressing as formerly, due to the fact that numbers of camps had their complement of workers. Sufficient applicants were registered to meet the majority of calls for women domestics and hotel and restaurant workers.

ONTARIO

Quietness characterized the farming group in this province, the offices at Chatham, Guelph, London and St. Thomas offering several positions for the remainder of the winter and for the spring months. A reduction in employment in outside trades was evidenced in most localities, the exception being in those centres where public works and sewer con-

of a revival, most centres reporting a marked shrinkage in the number of unemployed. Knitting mill operators were required at St. Catharines and St. Thomas, while riveters and iron moulders were in demand at Peterboro, Oshawa and St. Catharines. The women's sections report little change. Orders for day workers have increased considerably at Toronto, though a slight decline is shown at Hamilton. The vacancies for experienced generals and cooks were still greatly in excess of the supply.

MANITOBA

A substantial increase in the calls for farm workers was reported from Winnipeg and Brandon and this in some measure was responsible for an improvement in the local employment situation. No immediate prospects were evident of improved conditions in

EMPLOYMENT OFFICE ACTIVITIES BY HALF-MONTHS, 1922 TO 1924—DAILY AVERAGES

struction were under way as measures towards the alleviation of unemployment. Temporary work incident to recent snow storms gave work to many in the cities and on the railways, while many teamsters were employed cutting and drawing ice at Kingston, Ottawa, St. Thomas and other points. A few orders for railway construction workers were received at Fort William and Port Arthur. In the northern centres unemployment was not prevalent due to the continued demands for bushmen, teamsters, loggers and tie makers. While the calls were at no time too heavy, there has been a steady influx of workers to the camps. A recent survey of the manufacturing industry does not show any immediate prospects

the construction group, little work being available with the exception of a few casual jobs. The logging industry continued to form a large part of the business of the offices, with the majority of the placements effected being of experienced bushmen and tie makers destined to the lumber camps in Northern Ontario. A gradual falling off in the number required is noted, however. A decided improvement was reported in the supply of experienced women workers to satisfy the demand for household and hotel help.

SASKATCHEWAN

There was continued slackness in the agricultural group with indications at a number of the offices of an early demand for spring

workers. Operations in the building industry were confined mainly to inside work, with a few short-time jobs for carpenters, bridge workers and labourers. A slight decrease was shown in the logging group, although numbers of workers were transferred to the camps in the vicinity of Prince Albert. From Regina and Saskatoon was reported a fair demand for domestics with the supply of applicants more plentiful.

#### ALBERTA

The farming group showed indications of renewed activities with an increased number of vacancies registered at Calgary, Edmonton and Medicine Hat. No new developments were reported in the construction groups, the municipal relief departments employing a few men shovelling snow and repairing sewers. At Edmonton a number of bridge and elevator carpenters were required, while from Calgary the report showed prospects of a busy season. A decided improvement was noticed in logging, a steady demand being reported from Edmonton with many experienced workers available.

#### BRITISH COLUMBIA

Construction was suspended on account of the cold weather, numbers of carpenters and building labourers being registered as unemployed. Some bridge work near Fernie and Kamloops and rock work and dam construction near Nelson, and repair jobs at Prince Rupert and Vancouver gave employment to many carpenters, millwrights and labourers. Practically no demand was shown for railway construction workers, although at Kamloops and Vancouver a few placements were effected. A slackening in the demand in the logging group was evidenced although placements in this group continued to form a large part of the business of the offices. At Kamloops, Fernie, Nelson, Victoria and Vancouver, small orders for hookmen, sawyers, cordwood cutters and mill men were filled without difficulty, while at Prince George and Victoria a shortage of tie makers was felt. The mining industry was quiet, with a few local orders for loggers and machine miners at Cranbrook, Nelson and Prince Rupert. Longshore work was fairly brisk, but there was a large surplus of men registered for this work at Vancouver and Victoria. There was no change reported in conditions as regards domestic workers, a steady demand for houseworkers being reported with an unsatisfactory supply. A slight increase was shown in the number of calls for hotel and restaurant workers at Vancouver and Victoria.

#### Movement of Labour

During the month of January, 1924, the offices of the Employment Service made 15,237

placements in regular employment, of which 9,369 were of persons for whom the employment found was outside the immediate locality of the offices at which they were registered. Of the latter, 1,998 were granted the Employment Service reduced transportation rate, 1,272 going to points within the same province as the despatching office and 726 to other provinces.

The offices in Quebec issued 195 certificates, 109 to bushmen going from Montreal and Hull to the lumber camps in the vicinity of Sault Ste. Marie, Sudbury, Pembroke, and North Bay, Ont. Of the workers transferred to points within the province, 60 were bushmen from Montreal and 24 bushmen, one handyman and one labourer from Quebec going to points within the zone. The number of special transportation certificates granted by Ontario offices was 480, of which 8 were to bushmen going from Pembroke and Ottawa to camps in the Hull zone and two were to coal miners transferred from London to Moncton, N.B. The certificates issued to points within the province were granted to one blacksmith, 3 plasterers, one carpenter, one stationary engineer, 10 construction labourers, 6 riveters from Hamilton to Sudbury, 2 cooks, one machinist and the remainder to bushmen, axemen and tiemakers going to camps near Sudbury, Timmins, North Bay and Fort William. Transfers at the reduced rate from Manitoba offices numbered 661, of which 129 were to points within the province and 532 to other provinces. Of the ten transfers from Winnipeg to points in Saskatchewan one farm hand was sent to Yorkton, one coal miner, one blacksmith and one farm general to Estevan, and 3 farm hands and 3 domestic workers to Regina. To camps in the vicinity of Port Arthur, Ont., were transferred 521 workers, including pulp cutters, tiemakers, bushmen, teamsters, sawfilers, drill operators and an auto mechanic. From Winnipeg one kitchen girl was transferred to Timmins, Ont. Several bushmen, a few women workers, 13 teamsters and more than 70 farm hands were sent from Winnipeg to the districts near Dauphin, Brandon and Portage la Prairie. Workers benefiting by the Employment Service reduced rate in Saskatchewan numbered 250, of whom 29 were bushmen going from Moose Jaw to Cranbrook, B.C. Of the 221 provincial transfers more than 180 were of bushmen and tiemakers going to the camps near Prince Albert, 30 were farm hands, one was a rancher, a few were cooks and household workers going to the rural districts. Alberta offices granted 294 certificates, 44 to bushmen going from Edmonton to Prince George, B.C., and

64 Placements effected by offices since closed.

one to a farm hand going from Edmonton to Saskatoon. The remaining certificates were issued to workmen going to points within the province, the Edmonton office despatching 235, chiefly bushmen and a few farm hands, while from Calgary 6 farm hands and one bushman were sent to Drumheller, 3 farm hands to Edmonton and 4 bush workers to Lethbridge. From the office at Vancouver, B.C., one farm hand was transferred to the district near Moose Jaw, Sask. The provincial transfers numbered 117 and included 14 miners from Vancouver to Nelson, one miner to Revelstoke, one to Penticton and 4 to

Prince Rupert. More than 90 bushmen, tie-makers and sawyers were transferred to lumber camps near Prince George, Prince Rupert and Nelson and a few farm hands, cooks and unskilled labourers were sent to various districts within the province.

Of the 1,998 persons who benefited by the Employment Service reduced rate, 1,469 were carried by the Canadian National Railways, 493 by the Canadian Pacific Railway, 35 by the Temiskaming and Northern Ontario Railway and one by the Pacific Great Eastern Railway.

**BUILDING PERMITS ISSUED DURING JANUARY, 1924**

**T**HERE was a fairly large decline in the value of building permits issued during January, 1924, as compared with the preceding month, while as compared with January, 1923, there was a very slight reduction; the value of authorized building during the month under review was estimated at \$4,021,088, while in December, 1923, it was \$6,906,650 and in January, 1923, \$4,057,013. There was, therefore, a decrease of 41.8 per cent in the former comparison and of 0.9 per cent in the latter.

for dwellings valued at over \$1,600,000, and for more than 700 other buildings estimated to cost in excess of \$1,500,000. In addition, a permit was issued for a grain elevator at Port Arthur at a proposed cost of \$850,000.

As compared with December, 1923, Nova Scotia, New Brunswick, Manitoba, and Alberta recorded increases in the value of building permits issued, while in Prince Edward Island, Quebec, Ontario, Saskatchewan and British Columbia there were decreases. The actual increase in Manitoba of \$57,275, or 118.5 per cent, was largest, but the increase

Reports in some detail were received from 39 cities, which had issued some 400 permits

of \$29,835, or 148 per cent, in New Brunswick was the largest proportional gain. Quebec, with a decline of \$1,095,985, or 55 per cent, showed the most extensive reduction.

Nova Scotia, New Brunswick, Quebec, Manitoba and Saskatchewan recorded increases in the value of the building permits issued as compared with January, 1923, while elsewhere there were reductions. Quebec, with a gain of \$326,620, or 57 per cent, showed the largest actual increase in this comparison. Of the provinces that registered decreases in building permits issued, Ontario, where there was a falling-off of \$432,028, or 14.6 per cent, showed the most extensive decline.

Montreal recorded a decrease in the value of building permits issued as compared with the preceding month, but the total was higher than in January of last year. In Toronto and Vancouver there were reductions in both comparisons, while Winnipeg showed improvement as compared with December, and also with January, 1923. Other cities reporting increases in the value of authorized building in

both comparisons were Sydney, St. John, Quebec, Kitchener, London, Port Arthur, St. Catharines, St. Thomas, Brandon, Regina, Nanaimo and Point Grey.

The table on page 239 shows the value of the building permits issued during January, 1924, as compared with December, 1923, and with January, 1923. The 35 cities for which records are available since 1910 are marked by asterisks.

*Correction.*—The first sentence of the second paragraph of the article, "Building Permits issued in Canada during 1923" on page 165 of the LABOUR GAZETTE, February, 1924, should read as follows: "An analysis of the returns by provinces shows that the value of the building permits issued in Quebec was higher than in 1922, 1921 or 1920. This province, with a total of \$35,483,853, registered increases of 17 per cent, 23 per cent and 63 per cent, respectively, over those years. In Ontario, there was a decrease of nine per cent as compared with 1922 and increases of 24 per cent over 1921 and 27 per cent over 1920."

## FAIR WAGE CONTRACTS FEBRUARY, 1924

**D**URING February the Department of Labour received for insertion in the LABOUR GAZETTE the following information relative to twelve fair wage contracts nine of which were awarded by the Department of Public Works and three by the Department of Railways and Canals. All of these contracts contained the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour employed.

A statement was also received as to supplies ordered by the Post Office Department, subject to the regulations for the suppression of the sweating system and the securing of fair wages, etc.

### DEPARTMENT OF PUBLIC WORKS

New floor in armoury, Listowel, Ont. Name of contractor, Canadian Engineering and Contracting Company, Limited, Hamilton, Ont. Date of contract, January 27, 1924. Amount of contract, \$2,360.

Construction of pier, Dartmouth, N.S. Name of contractors, Halifax Dredging Company, Limited, and the Standard Construction Com-

pany, Limited, Halifax, N.S. Date of contract, January 23, 1924. Amount of contract, unit prices as set forth in contract.

Construction of maniac leper and attendant hut at Lazaretto, Bentinck Island, B.C. Name of contractor, Eli Hume, Victoria, B.C. Date of contract, January 28, 1924. Amount of contract, \$1,795.

Extension to headblock of wharf, Anse Tadoussac, Que. Name of contractors, J. E. Collin & T. Beaumont, Montmagny, Que. Date of contract, February 5, 1924. Amount of contract, \$2,800 for preparing bottom and filling pier site with stone and \$3.58 per cubic yard for cribwork completely filled, including fenders, coping, mooring posts, etc.

Office dwelling and boat landing, Schooner Passage, Skeena District, B.C. Name of contractor, James Currie, Prince Rupert, B.C. Date of contract, February 5, 1924. Amount of contract, unit prices as set forth in contract.

Reconstruction of public wharf, Lefaivre, Ont. Name of contractors, John A. McLaughlin and James McLaughlin, Ottawa, Ont. Date of contract, February 15, 1924. Amount of contract, unit prices as set forth in contract.

Alterations to public buildings known as "Postal Station K," Toronto, Ont. Name of

contractors, J. D. Young & Son, Toronto, Ont. Date of contract, February 12, 1924. Amount of contract, \$12,490.

Dredging at Burnham and Morrill wharf and International Coal Mining Company's pier, Pictou Harbour, N.S. Name of contractor, Atlantic Dredging Company, Limited, Louisburg, N.S. Date of contract, January 9, 1924. Amount of contract, Class "B" 65 cents per cubic yard, scow measure, and 68 cents per cubic yard for hard sand and mud, scow measure.

Dredging in berths between piers, Digby, N.S. Name of contractors, St. John Dry Dock and Shipbuilding Company, Limited, St. John, N.B. Date of contract, February 4, 1924. Amount of contract, \$1 per cubic yard, place measure.

DEPARTMENT OF RAILWAYS AND CANALS

Erection of two highway steel fixed bridges at upper entrance to Lachine Canal, at Lachine, Que. Name of contractors, Dominion Bridge Company, Limited, Montreal, Que. Date of contract, February 7, 1924. Amount of contract, \$5,275.

Repairs and alterations to Bascule Bridge over Lachine Canal at St. Pierre-aux-Liens (Rockfield), Que. Name of contractors, Dominion Bridge Company, Limited, Mont-

real, Que. Date of contract, February 18, 1924. Amount of contract, unit prices as set forth in contract.

Construction and completion of Section No. 8 of the Welland Ship Canal. Name of contractors, A. W. Robertson, Limited, Montreal, Que. Date of contract, February 27, 1924. Amount of contract, unit prices as set forth in contract.

POST OFFICE DEPARTMENT

The following is a statement of payments made in February, 1924, for supplies ordered by the Post Office Department subject to the regulation for the suppression of the sweating system, the securing of fair wages, and the performance of work under sanitary conditions:—

Nature of Order	Amount of Order
	\$
Making metal dating stamps and type and other hand stamps and brass crown seals.....	915 96
Making and repairing rubber stamps, daters, etc.....	271 09
Making up and supplying letter carriers' uniforms, etc.....	18,141 64
Scales, hampers, etc., repaired.....	101 25
Stamping pads, ink, etc.....	337 03

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received by the Department. Such agreements are summarized each month in the LABOUR GAZETTE. In the majority of cases the agreements are signed by both employers and employees. Verbal agreements, which are also included in the records, are schedules of rates of wages, hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In addition to these, important schedules of wages are summarized, including civic schedules. In the case of each agreement or schedule, the rates of wages for the principal classes of labour are given, with other information of general interest.

Manufacturing: Printing and Publishing

VANCOUVER, BRITISH COLUMBIA.—CERTAIN NEWSPAPER PUBLISHERS AND INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION LOCAL No. 69.—

Agreement in effect from September 1, 1923, until August 31, 1926, and notice of any amendment or

new contract, to become effective September 1, 1926, shall be given sixty days prior to date of expiration, otherwise agreement shall run from year to year.

Only union members shall be employed provided sufficient are furnished.

Questions regarding the contract or scale of prices shall be referred to a joint standing committee, and if not settled shall be submitted to arbitration under the arbitration agreement.

Scale: Morning newspapers—Journymen on night work, \$1 per hour. Hours: Not less than seven and one-half hours (excepting not more than one hour each night for lunch) per night, six nights per week. Evening newspapers—journymen on day work, 93½ cents per hour. Eight hours (excepting not more than one hour for lunch) per day, six days per week. No payment for holidays when no work is done. When a swing shift is worked, part day and part night, night scale is to be paid, except that on Saturday night for a regular edition fifty cents in addition to the night scale shall be paid. Overtime, time and one-half; foremen shall receive overtime at option of the employer. Work on Christmas Day, Labour Day and Dominion Day, double time. Work on Sunday, except for regular editions, double time. Certain other holidays, time and one-half, provided a full day's pay will be given for five and one-half hours' day and five hours' night work. Men may be required under certain conditions to get out regular editions at single price.

One apprentice is to be employed to each four journeymen, or major fraction, and one for each office; apprentices are to work on press and on duty

as assigned by foremen. Minimum scale for apprentices: third year, one-third of journeyman's wage; fourth year, one-half; last year, two-thirds. Hours per day, same as for journeyman, with no overtime unless journeymen are employed.

Employees called back thirty minutes or more after regular hours of work are to receive \$1 for the call, together with overtime rate for time employed. This is not to apply in case of accident or disaster in the office. Foreman may transfer men from night to day work or *vice versa*. If union cannot supply men as required, employees shall not be limited as to hours worked in one day; work to be done at regular rate up to 8½ hours day or 8 hours night.

Men not reporting when time is called are to be subject to dismissal at option of foreman. Foremen are to have right to employ and to discharge for specified reasons. Union members must give the office seven days' notice of quitting their situations. The employers are protected against walkouts, strikes or boycotts. Provision is made for healthful conditions in work rooms.

VANCOUVER, BRITISH COLUMBIA.—CERTAIN LOCAL EMPLOYING COMMERCIAL PRINTERS AND INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION OF NORTH AMERICA, LOCAL NO. 68.

Agreement to be effective from January 1, 1924, until December 31, 1924, and from year to year if arrangements can be made whereby wages and hours will be adjusted by local conciliation or arbitration.

Provided an arbitration agreement is later on arrived at, the employer signing same agrees to become a party to one arbitration proceeding representing the employers, and findings shall be binding.

Wages per week of 44 hours: Cylinder and offset—journeymen, \$42; feeders, \$25.45; platen—journeymen pressmen, \$38.90; feeders, \$23.35. Night work: Pressmen, 8 cents per hour over day rate; feeders and apprentices, 5 cents per hour over day rate. Apprentice pressmen on cylinder or platen presses, \$1 per week more than the respective feeders' scale, with an increase of \$1 per week each year thereafter until he becomes a journeyman.

Shops employing an apprentice pressman or one journeyman feeder, or more, shall be entitled to employ an apprentice press feeder, to be registered with the union. Wage per week, after one year, \$12; after eighteen months, \$14. After two years, if apprentice is eighteen years of age, he shall receive a journeyman feeder's card. Apprentice feeders shall be laid off before the last journeyman is laid off. Learners on cylinder presses shall be taken from platen presses and shall receive the platen scale. After one year a learner on cylinder presses shall receive the cylinder scale.

Hours per week, 44; between 7 a.m. and 6 a.m. Monday to Friday, and between 7 a.m. and 12.30 p.m. on Saturday. Overtime, first six hours, time and one-half; thereafter, double time until four hours' rest has been obtained. Sundays and holidays, double time.

A pressman is not to operate more than two cylinder presses, one cylinder and two platens, or four platens.

Four hours shall be shortest period for which a member can be paid in a day.

One apprentice may be employed to every four journeymen.

Provisions are made for healthful working conditions. All employees in pressrooms shall be under jurisdiction of the union provided help be furnished when required. Foreman shall have full charge of pressroom and of hiring and discharging.

Conciliation and arbitration shall govern adjustment of disputes.

VICTORIA, BRITISH COLUMBIA.—CERTAIN LOCAL EMPLOYING COMMERCIAL PRINTERS AND INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION, No. 79.

Agreement to be effective from January 1, 1924, until December 31, 1924, and from year to year if arrangements regarding wages and hours can be made. This agreement is similar in every respect to that in effect in Vancouver, as summarized above.

VICTORIA, BRITISH COLUMBIA.—LOCAL NEWS-PAPERS AND INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL NO. 201.

Agreement to be effective from January 1, 1924, to December 31, 1924, and thereafter until terminated by either party on sixty days' notice in writing.

Rate of wages on night work: \$1.08 per hour, or \$48.60 per week. Hours, per night, seven and one-half, between 6 p.m. and 6 a.m. Six nights per week.

Rate of wages on day work: \$1 per hour, or \$45 per week. Hours per day, seven and one-half, between 7 a.m. and 5 p.m. Six days per week. "Lobster" shift to be paid at 50 cents over night scale. One day to be the shortest period for which a union member shall accept pay. Foremen of morning and evening papers, not less than 75 cents per day over journeymen's scale. Head machinists, assistant foremen, head admen and machinist operators (linotype or monotype) not to receive less than 50 cents per day over journeymen's scale. Employees called back after one hour, \$1 for call backs in addition to rate of pay. Employees called back within one hour of quitting to be paid for the interval.

A member shifted for four days or less from night to day side is to receive night scale, this not to be construed as giving foreman right to force a member to accept day work. Overtime over seven and one-half hours in a day, time and one-half. Apprentices may not work overtime if a journeyman is available. Work on Sundays, Labour Day and Christmas Day, double price; on certain other holidays, price and one-half. Men on newspapers may work a five-hour day for a full day's pay on the holidays stated at price and one-half.

One apprentice to five or less journeymen; two to eight or more. A third may be taken on when the senior apprentice begins his last six months. Wages for apprentices: Third year, one-third of journeyman's scale; fourth year, one-half; fifth year, two-thirds. Apprentice must complete the International Typographical Union course in printing in a specified time in order to receive specified increases in wages. Apprentices must make application to become apprentice members of the union at end of second year. No apprentices to work more hours in a day nor in a week than as provided for journeymen printers. Apprentice is to be examined by a union committee on entering an office.

Beginners on typesetting machines are to be active members of the union, but one apprentice being allowed for each five machines, or fraction thereof. Scale of wages: First four weeks, thirty per cent of scale; second four weeks, forty per cent; third four weeks, fifty per cent; fourth four weeks, sixty per cent; fifth four weeks, seventy per cent; sixth four weeks, eighty per cent.

The agreement provides for a standard of competency and for heating, ventilation and sanitation of the work rooms.

VICTORIA, BRITISH COLUMBIA.—LOCAL JOB PRINTING SHOPS AND INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL NO. 201.

Agreement to be in effect from January 1, 1924, until December 31, 1924, and thereafter for another year, or until terminated by either party on two months' notice in writing.

Hours of labour, eight per day and four on Saturdays. Hours to be between 7 a.m. and 6 p.m.

Foremen of offices employing two or more compositors, not less than 75 cents, and assistant foremen not less than 50 cents per day above scale.

Journeyman, wages per week, \$44. Linotype operators, per week: day, \$44; night, \$47.52. Machinists and machinist-operators, not less than 50 cents per day above scale.

Machinist-operators must be capable of operating machines and of keeping them in running order, and shall be responsible for condition of the machines.

Overtime: After regular quitting time, time and one-half. After midnight (when men have worked through the day), double time. Holiday rate: Double time for Labour Day, Christmas Day and Sundays, and time and one-half for other holidays, provided job offices may work a five-hour day for a full day's pay on the latter holidays. All work in book and job offices to be time work; half a day to be the shortest period for which a union member shall accept pay. Nothing in the scale is to be construed to prevent superior workmen receiving a higher rate of wages. Apprentices must have a good school education. An office may employ one apprentice to from two to five journeymen; two to from six to ten journeymen; no more than two to an office at one time; age at commencing, at least 15½ years; period of apprenticeship, five years. Wages of apprentices per week: Third year, first six months, \$17.50; second six months, \$19.50; fourth year, first six months, \$21.75; second six months, \$24; fifth year, first six months, \$26.50; next six months, \$29.50. Apprentices must complete the International Typographical Union course in printing in a specified time in order to be given increases in wages. Apprentices at end of second year must make application to become apprentice members of the union. No apprentice is to work longer hours than those provided for journeymen. Apprentices in last six months may, if practicable, take a course on the machine.

#### VICTORIA, BRITISH COLUMBIA.—LOCAL NEWSPAPER PUBLISHERS AND INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION, LOCAL NO. 79.

Agreement to be effective from January 1, 1924, until December 31, 1926, and thereafter for another year unless terminated by either party by a previous two months' notice in writing prior to December 31.

In press room departments, only union mechanics and workmen to be employed.

Hours per week, on morning newspapers, 45; on evening newspapers, 48; one day to be the shortest period for which an employee shall accept pay.

Wages per week, journeymen: day work, \$45 for 48 hours; night work, \$45 for 45 hours. Overtime, time and one-half. Work on Labour Day and Christmas Day (and Sundays after the regular edition), double time. Certain other holidays, time and one-half, provided men on newspapers may work a 5-hour day for a full day's pay.

Apprentices: One apprentice and one packer boy to each press. Wages per week: 1st year, \$12; 2nd year, \$14; 3rd year, \$18; 4th year, \$24; 5th year, \$30. Foreman of pressroom to be judge of competency and to have control of employment and discharge. Crew on a press not to be less than a foreman, two journeymen and an apprentice. In case of a breakdown, men may be required to get out the regular edition at single price, although after regular hours, provided work is interrupted for more than one hour. Provisions are made in the agreement for having healthful conditions in the pressroom.

Questions regarding the agreement which cannot be settled by conciliation shall be decided by arbitration as provided for by the arbitration agreement between

the American Newspaper Publishers' Association and the union.

#### Manufacturing: Clothing

#### MONTREAL, QUEBEC.—THE UNITED CLOTHING MANUFACTURERS' ASSOCIATION OF MONTREAL, AND THE MONTREAL JOINT BOARD, AMALGAMATED CLOTHING WORKERS OF AMERICA.

This agreement and also one between the clothing contractors and the union are summarized in a special article on page 244.

#### Construction: Buildings and Structures

#### CALGARY, ALBERTA.—CALGARY CONTRACTORS AND CALGARY CARPENTERS' DISTRICT COUNCIL.—

Agreement to be in effect from May 1, 1924, until April 30, 1925. Negotiations for a new agreement to be carried on during January.

Minimum wage per hour, 80 cents. Hours, eight on five days and four on Saturdays. Time and one-half from 5 p.m. to midnight and on Saturdays from 12 noon until 5 p.m. Thereafter and Sundays and holidays, double time. No work on Labour Day except to save life and property. One hour's notice to be given by either side of dismissal or leaving work. No member of the union is to work for less than the above minimum wage.

Disputes are to be referred to an arbitration committee of three members of each party.

#### Transportation

#### ST. JOHN, NEW BRUNSWICK.—CANADIAN PACIFIC RAILWAY AND FREIGHT HANDLERS IN ITS EMPLOY AT WEST ST. JOHN.—

Agreement to be in effect from November 1, 1923, until November 1, 1924, and thereafter subject to thirty days' notice from either party after October 1, 1924.

Hours of work: Truckers, 7 a.m. to 12 noon; 1 p.m. to 5 p.m.; 7 p.m. to 12 midnight, and 1 a.m. to 5 a.m. Overtime, time and one-half. No work in meal hours or on holidays if it can be avoided. Hours for sealers, coopers and heaterns 7 a.m. to 6 p.m. and 7 p.m. to 6 a.m., with one hour allowed for meals without pay between 11 a.m. and 2 p.m. and 11 p.m. and 2 a.m. Work on Sundays and holidays, double time, with a minimum of three hours at straight time rate. Night gangs to be paid a minimum of three hours' straight time if required to start work.

Seniority list to be posted at the commencement of each season. Seniority to govern in reducing forces and in increasing same.

Foreman to determine number of gangs to be worked. Men to report in person or by letter to the general foreman by November 10 each year. Freight handlers must obtain leave of absence from the general foreman before leaving in the spring. Employees may present grievances before superiors and decisions may be appealed to a higher official. Prior to the final disposition, there will neither be a shutdown nor a suspension of work.

Members of adjustment committees to be granted necessary leave of absence and transportation.

Basic rate of wages for truckers, per hour, 50 cents.

#### ST. JOHN, NEW BRUNSWICK.—CANADIAN PACIFIC RAILWAY AND SUB-FOREMEN AND FREIGHT CHECKERS IN ITS EMPLOY AT WEST ST. JOHN.—

Agreement to be in effect from November 1, 1923, until November 1, 1924, and thereafter subject to thirty days' notice from either party after October 1, 1924.

Hours of work, 7 a.m. to 12 noon; 1 p.m. to 5 p.m.; 7 p.m. to 12 midnight; and 1 a.m. to 5 a.m. Overtime, time and one-half. No work during meal hours or on holidays if it can be avoided.

Arrangements are to be made so that as far as possible all may participate in night work. Three hours' pay to be the minimum for a call; employees not to be required to suspend work during regular hours to absorb overtime.

Sundays and holidays, double time, with a minimum of three hours at straight time.

In reduction of force, seniority to govern; in increase of force, employees to be taken on in order of seniority. Employees declining promotion will not

lose their seniority. Employees accepting promotion will be allowed from ten to thirty days to qualify, and in case of failure will not lose seniority.

Employees having grievances may have a hearing, and if not satisfied may appeal case, assisted by a committee of employees. Prior to final disposition of any grievance, there will neither be a shutdown nor a suspension of work. If charges are not sustained, employee's record will be cleared, and if employee has been dismissed he shall be returned and paid for time lost. Committee to be granted leave of absence and free transportation.

Rates of wages: Per hour—sub-foremen, 60 cents; checkers, 56 cents.

## AGREEMENTS IN THE SETTLEMENT OF DISPUTES IN THE CLOTHING MANUFACTURING INDUSTRY IN MONTREAL

IN January a cessation of work occurred in a number of establishments in Montreal, engaged in the manufacture of clothing, owing to a dispute as to prices paid for certain operations and as to wages and working conditions. In various shops there were stoppages of work between January 7 and February 21, but chiefly between January 21 and January 30. The organization of workers concerned was the Amalgamated Clothing Workers of America. The Montreal Joint Board, consisting of representatives of a number of locals of this union had an agreement with the Clothing Manufacturers' Association of Montreal, an organization of several large clothing manufacturers.\* Practically all of these employers had all work done in their own factories under this agreement with the union; A few, however, and a large number of other manufacturers of clothing sent out work to be made up in shops operated by "contractors." Some of the independent manufacturers had all their work done in their own factories. During the last three years when industry was depressed the wages and working conditions in establishments of these "independent" manufacturers and contractors were below the standards of the agreement between the union and the Clothing Manufacturers' Association. Some of the independent manufacturers had reduced the prices paid to contractors and proposed a further reduction. The contractors in turn proposed to the union that wages should be reduced in accordance with reductions in such prices. This the union refused and attempted to bring about an agreement between the manufacturers and the contractors but failed. The contractors, therefore, closed their shops on January 21, to compel the manufacturers to pay higher prices for work done. The union then announced that its members would not return to work in these shops until the con-

tractors had made agreements providing for the levelling up of wages and working conditions in accordance with the union scale for Montreal and called out on strike its members working for all manufacturers and contractors below the standard.

Negotiations were carried on between the three parties to the dispute and a basis for a settlement was reached at the end of January. A number of the independent manufacturers organized as the United Clothing Manufacturers of Montreal, and this body made an agreement on the one hand with the union and on the other hand with the United Clothing Contractors' Association. Work was resumed in these shops on January 31. These two associations of employers also entered into an agreement providing that all contractors working for members of the Manufacturers' Association should join the Contractors' Association, that changes in the agreement between the union and manufacturers should be parallel by changes in the agreement between the manufacturers and the contractors, that there should be arbitration of differences between the two associations, and that the contractors should arrange to contribute their share of the cost of maintaining the arbitral machinery in operation in the clothing industry in Montreal. The contractors' association undertook to be responsible for all wages and work done by its members.

The union also entered into agreements with individual manufacturers similar to that made with the association, while union members were called out on strike in shops which refused to enter into an agreement. By February 23 agreements had been reached with 21 independent concerns in addition to those included in the United Clothing Manufacturers organization and in the contractors' association, along the following lines:—

\*LABOUR GAZETTE, October, 1921.

AGREEMENT BETWEEN THE UNITED CLOTHING MANUFACTURERS' ASSOCIATION OF MONTREAL, THE "CLOTHIERS," AND THE MONTREAL JOINT BOARD AMALGAMATED CLOTHING WORKERS OF AMERICA, CALLED THE "UNION."

The agreement to be effective immediately and to remain in effect until May 1, 1925, and from year to year thereafter unless notice of abrogation or amendment given by either party 30 days prior to expiration; wages, established scale to be paid in shops of clothiers and contractors working for them; hours of work to be 44 per week, overtime work only with consent of union and at one and one-half times regular rates of pay; none but union members to be employed by the clothiers or contractors doing work for them. Matters in dispute to be dealt with by employer and shop committee; failing settlement, by representatives of the clothiers and union, and again failing settlement to be referred to the impartial Chairman provided for in the agreement between the

union and the Clothing Manufacturers' Association of Montreal, Inc., his decision to be binding; the clothiers to arrange for contributing their share of expense for maintenance of the machinery of arbitration. All garments to be made in union shops, the clothiers to place no obstacles in the way of the union, and to discipline its members in accordance with its rules and regulations; clothiers to change contractors as registered with union only for cause and with consent of union; clothiers to be responsible for contractors working for them, for union conditions in contractors' shops and for wages due by contractors to workers.

The agreement between the union and the contractors contained similar provisions for wages, working conditions, etc., and also provided that partnerships with more than two members should be dissolved by May 1, 1924; in these only one partner should engage in the actual process of manufacture, the other being engaged in the management.

## PRICES, RETAIL AND WHOLESALE, IN CANADA, FEBRUARY, 1924

### Cost of Living, Prices of Staple Articles and Index Numbers

NO decided movement in prices occurred during the month. Both the family budget in terms of retail prices and the index of wholesale prices calculated by the Bureau of Statistics stood at practically the same levels as in January. The departmental index of wholesale prices including 271 commodities and the special index of 50 commodities, however, were slightly higher.

The cost per week of a list of twenty-nine foods for an average family of five in terms of the average retail prices in some sixty cities was \$10.75 at the beginning of February as compared with \$10.78 for January; \$10.53 for February, 1923; \$10.61 for February, 1922; \$14.08 for February, 1921; \$16.92 for June, 1920 (the peak); \$15.77 for February, 1920; \$12.54 for February, 1918; and \$7.75 for February, 1914. Prices of fresh eggs were substantially lower while there were smaller declines in cooking eggs, lard, fresh pork, bacon, sugar and prunes. Advances occurred in the prices of butter, cheese, potatoes, evaporated apples, tea and coffee. Including the cost of fuel and rent with that of foods the total budget averaged \$21.18 for February as compared with \$21.23 for January; \$21.17 for February, 1923; \$21.07 for February, 1922; \$24.85 for February, 1921; \$26.92 for July, 1920 (the peak); \$24.71 for February, 1920; \$19.80 for February, 1918; and \$14.54 for February, 1914. Fuel was again slightly lower. Rent was unchanged. Compared with a year ago foods were somewhat higher while fuel was lower and rent showed little change.

In wholesale prices the index number calculated by the Dominion Bureau of Statis-

tics, based upon the average prices of 238 commodities in 1913 as 100, weighted according to the importance of the commodities, was practically unchanged at 156.6 for February as compared with 156.7 for January; 153.6 for February, 1923; 153.5 for February, 1922; 191.1 for February, 1921; 256.9 for May, 1920 (the peak); 238.3 for February, 1920; and 200.5 for February, 1919.

In the grouping according to chief component material three of the eight main groups were higher and four were lower. Grains were mainly responsible for the higher level reached by the vegetable group though flour and fruits were also higher. Non-ferrous metals and their products and non-metallic minerals and their products both advanced, the former because of higher prices for anti-mony, copper, lead, tin, and zinc, and the latter because of advances in the prices of coal oil and gasoline. Decreases in the prices of eggs, bacon, lard and cheese more than offset advances in livestock, meats, and hides, causing a decline in the animals group. The textile group declined because of lower prices on raw cotton. The wood group and the iron group also were lower while chemicals were unchanged.

In the grouping according to purpose both consumers' and producers' goods advanced. In the former group foods were higher, increases in the prices for beverages, bread-stuffs, fish and fruits being more than offset by lower prices for hogs, bacon, lard, and fresh eggs. In this group clothing and household equipment also advanced. In producers' goods the index for light, heat and power

equipment advanced because of higher prices for gasoline and coal oil. Building materials declined slightly. In manufacturers' materials the index was higher, prices of materials for the leather, the metal working, the meat packing and the milling industries having advanced. Materials for the textile and fur industries were lower.

In the grouping according to origin the indexes for field products, for articles of marine origin and of mineral origin advanced, while the indexes for animal products and for articles of forest origin declined.

The index number based upon prices of 271 commodities in 1890-1899 as 100 published by the Department of Labour since 1910 advanced to 224.9 for February as compared with 222.7 for January; 224.3 for February, 1923; 229.5 for February, 1922; 270.1 for February, 1921; 356.6 for May, 1920 (the peak); 343.5 for February, 1920; and 136.6 for February, 1914. Advances occurred in grains, cattle, beef, veal, sheep, mutton, evaporated apples, potatoes, onions, canned vegetables, flour, sugar, molasses, beaver cloth, hides, some metals, coke, gasoline, coal oil, cement, linseed oil and benzine. The chief declines were in hogs, live and dressed, bacon, hams, lard, butter, cheese, eggs, raw cotton, raw silk, jute, turpentine, raw furs, and raw rubber. Compared with a year ago grains and fodder, dairy products, miscellaneous foods, textiles, metals and implements, building materials, and drugs and chemicals were higher. All the other groups were lower.

The index number published by the Department since 1910 has been reconstructed back to 1913, by the Dominion Bureau of Statistics, the new index being weighted and based upon the prices of 238 commodities in 1913.\* Ultimately the reconstructed index will be carried back to an earlier date, but in the meantime the Department will continue to calculate and publish the old series in summary form in the *LABOUR GAZETTE* in order to afford comparisons with price levels prior to 1913. For the detailed analysis from month to month, however, the new index number of the Bureau of Statistics will be used.

The accompanying tables give the index numbers of the Dominion Bureau of Statistics by the principal groups in the three methods of classification and with those of the classification according to purpose or use in detail. The index number of the Department of Labour is given by the principal groupings, but the sub-groups in detail shown monthly since 1912 are omitted. The special index number of 50 commodities described in the following paragraph is also given for the purpose of continuing the record.

The special index number comprising fifty of the more important commodities selected from the 271 in the Department list, including twenty foods, fifteen raw materials and fifteen manufactured goods, based upon price levels in 1913 as 100 advanced slightly to 155.1 for February as compared with 154.4 for January; 155.2 for February, 1923; 148.4 for February, 1922; 182.2 for February, 1921; 260.5 for May, 1920 (the peak). The increase was due mainly to higher prices for sheep, mutton, beef, canned tomatoes, granulated sugar, beaver cloth, hides, lead, gasoline and linseed oil.

The index of wholesale prices in Canada published by the United States Federal Reserve Board, including thirty-three raw materials, twenty-eight semi-manufactured or producers' goods, and thirty-eight finished or consumers' goods, based upon price levels in 1913 as 100, continued to decline, being 143 for December as compared with 145 for November; 147 for October; and 147 for December, 1922. All groups were lower except goods imported which were unchanged. During 1923 this index advanced from 148 in January to the high point of 156 in April, since when it declined steadily to the December level of 143.

The Bank of Commerce index of imports advanced from 165.29 for January to 165.92 for February, while that for exports was up from 149.81 for January to 151.19 for February. The combined index of both imports and exports rose from 157.55 to 158.55.

The table of retail prices and rentals shows the prices at the beginning of February of seventy-two staple foodstuffs, groceries, coal, wood and coal oil, and the rent for six-roomed houses in some sixty cities throughout Canada. All prices are for delivered goods. The exact quality, for which the quotation is given, is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity, in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Department and to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. The prices of fuel and the rates for rent are reported by the correspondents of the *LABOUR GAZETTE*.

Statistics similar to these were published each month from 1910 to 1920, the figures during this period being secured at the middle of each month by the correspondents of the *LABOUR GAZETTE* resident in each locality from dealers doing a considerable business

\* *LABOUR GAZETTE*, June, 1923, pp. 689-695.

with workingmen's households. From 1910 to 1915 the table contained a list of only the twenty-nine foods included in the family budget, with laundry starch, coal, wood, coal oil and rent. In 1915, when monthly publication of the budget in the *LABOUR GAZETTE* was begun, it was decided to extend the list of foods to 40, and in 1920 the list of foods and groceries was still further extended to include over 100 items.

Beginning with October, 1922, a number of commodities were dropped from the list, and in the case of a number of articles the average prices of the grades most sold have been given, owing to the impossibility of securing prices for uniform grades for the various cities from month to month.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central, without modern conveniences.

The weekly budget of a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, these being the items for which statistics have been obtained each month and published in the *LABOUR GAZETTE* since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various classes of foods tends to be maintained. At times when the price of an article heavily weighted for this purpose rises (or falls) abnormally the increase (or decrease) in food prices so indicated is exaggerated, and this should be taken into account in using the budget as an indicator of changes in the cost of living. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. It was estimated, when

the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditures of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were adopted as affording a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruits, fresh, and canned vegetables, etc., so that comparative expenditure would be little changed.

#### Cost of Electric Current for Householders\*

With rates in 1913 as 100, index numbers of electric light rates were: 1900, 141.4; 1905, 135.6; 1910, 118.1; 1911, 113.4; 1912, 109.1; 1913, 100.0; 1914, 96.5; 1915, 90.8; 1916, 87.6; 1917, 87.2; 1918, 85.8; 1919, 85.8; 1920, 84.2; 1921, 84.9; 1922, 82.7; 1923, 79.5.

#### Retail Prices

Beef prices were steady for the most part. Sirloin steak averaged 27.1c. per pound in February and 27c. in January, round steak 22c. per pound in February and 21.8c. in January. Shoulder roast was unchanged in the average at 14.7c. per pound while stewing beef was 11.3c. per pound in February and 11.2c. in January. Veal was unchanged averaging 18.6c. per pound, increases in some localities being offset by declines in others. Mutton was slightly higher at 27c. per pound. Fresh pork roast was down from an average of 24.1c. per pound in January to 23.7c. in February. Mess pork was slightly higher, averaging 24c. per pound. Bacon fell 1c. per pound to 36.1c. Ham also was lower averaging 58.3c. in January and 57c. in February. In fresh fish, cod and whitefish were slightly lower. Salt herrings advanced somewhat in the average while finnan haddie were lower. Lard showed a general decline from an average of 23c. per pound in January to 22.5c. in February.

Eggs showed a general decline, fresh averaging 61.3c. per dozen in January and 56.7c. in February and cooking 46.9c. in January and 45.2c. in February. Milk advanced at Sorel, Brantford and Moose Jaw. Dairy butter averaged higher at 43.5c. per pound in Febru-

\* See article in *LABOUR GAZETTE*, December, 1923, page 1442.

ary as compared with 42.7c. in January and creamery to 49.1c. per pound in February as compared with 48.3c. in January. Slight increases were reported from most localities. Cheese declined from an average of 33.2c. per pound in January to 33c. in February.

Bread was unchanged in the average. Soda biscuits were up slightly at 17.9c. per pound. Flour and rolled oats were steady. Rice and tapioca showed little change. Canned tomatoes advanced in the average from 18.5c. per can in January to 19c. in February. Canned peas and corn also were slightly higher, the former at 18.2c. per can and the latter at 17.2c. per can. Onions rose from 6.1c. per pound to 6.3c. Potatoes advanced from an average of \$1.43 per 90 pounds in January to \$1.51 in February. Evaporated apples were steady. Prunes were slightly lower in the average at 16.7c. per pound. Raisins were down from 18.2c. per pound to 18c. and currants from 21.3c. per pound to 21c. Canned peaches rose from an average of 20.8c. per can in January to 21c. in February. Marmalade was up slightly at 81.9c. per four pound tin. Sugar declined, granulated from an average of 12.1c. per pound in January to 11.9c. in February and yellow from 11.6c. per pound in January to 11.4c. in February. Coffee was slightly higher at 54.5c. per pound. Tea also advanced, averaging 69.4c. per pound as compared with 68.8c. in January.

Anthracite coal declined from an average of \$17.84 per ton in January to \$17.75 in February. Lower prices were reported from Halifax, Oshawa, Guelph, Owen Sound and Cobalt. Bituminous coal also showed a small decline, averaging \$11.29 in January and \$11.20 in February. Hard wood, four feet long, was down from an average of \$12.65 per cord in January to \$12.55 in February. Soft wood also was slightly lower averaging \$9.20 per cord. Prices were down in Guelph and Winnipeg. Coal oil was up from an average of 30.1c. per gallon to 30.3c. No changes were reported in rent.

### Wholesale Prices

The following is a summary of a statement on prices changes during the month issued by the Dominion Bureau of Statistics:—

Grain prices continuing the movement which commenced in January rose to somewhat higher levels in February. Wheat, No. 1 Manitoba Northern, rose from 96½c. per bushel in January to 99¼c. in February. The lowest price for the month was 98¼c. per

bushel on the 15th and the highest \$1.00¾c. on the 22nd. Oats were up from 39¼c. per bushel to 40¼c. American corn was up from 89¼c. per bushel to 98c. and flaxseed from \$2.14 per bushel to \$2.29. Flour, reflecting the higher wheat prices, rose from \$6.20 per barrel to \$6.30. Raw rubber fell from 26c. per pound in January to 25½c. in February. Raw sugar at Montreal advanced from \$6.58 per hundred to \$7.13. A better demand was said to be the cause of the higher price. Coffee prices were higher, Santos advancing from 21c. per pound in January to 24c. in February and Rio from 18½c. per pound in January to 20c. in February. Ontario potatoes declined from \$1.60 per bag to \$1.30. Baled straw was up 50c. per ton reaching \$9.50. Cattle prices were higher, best butcher cattle at Winnipeg advancing from \$5.72 per 100 pounds to \$5.91 and best steers at Toronto from \$6.69 per 100 pounds to \$6.75. Choice sheep at Toronto advanced from \$6.25 per hundred to \$6.75. Bacon declined from 23½c. per pound in January to 23c. in February. Lard also was lower at 16c. per pound. Beef hindquarters in sympathy with the higher cattle prices rose from \$14.25 per 100 pounds to \$15.00. Mutton also was up from \$10.81 per 100 pounds to \$12.50. Fresh eggs continued to decline, being 54-57c. per dozen in February as compared with 60-65c. in January. Beef hides advanced from 9¼c. per pound to 10¼c. Raw cotton at New York continued to decline averaging 34¼c. per pound in January and 32c. in February. The market for finished goods was reported to be dull in both England and the United States with the result that the demand for raw materials fell off while at the same time large quantities of cotton were placed on the market. Jute declined from \$8.01 per 100 pounds to \$7.70. Raw silk was also 30c. per pound lower at \$7.70. Ground wood pulp declined from \$39.75 per ton to \$34.00. Oak lumber fell from \$140 per M. to \$130. A brisk demand for non-ferrous metals caused the prices of several of them to rise. Antimony was up from 8.75c. per pound in January to 10.5c. in February, copper from 14.70c. per pound in January to 15.35c. in February, lead from 7.75c. per pound to 8.30c., tin ingots from 51.5c. per pound to 58c., spelter from 8.05c. per pound to 8.60c. and solder from 30c. per pound to 33c. Coal oil and gasoline advanced, the former from 20c. per gallon to 22c. and the latter from 25½c. per gallon to 27¼c. Anthracite coal was up slightly at \$12.51 per ton.

company houses at \$20; others \$45 and \$60. fFor new tenant \$30 and \$35 and \$20 and \$25. s. Vinegar sold extensively in bot-  
tles at higher prices than in bulk. g. Higher price for semi-anthracite.

## PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes give the latest information available as to the movement of prices in other countries as compared with Canada. The index numbers of retail prices are from official sources unless otherwise stated. The authorities for the wholesale prices index numbers are named in all cases.

At the end of 1923 and early in 1924 wholesale prices and the cost of living in Great Britain and in continental Europe displayed rising tendencies. The only exceptions to this rule were Finland, for which the latest information available is for November when prices showed a slight decline below the October level, and Germany, where the peak of the enormous prices increase was reached at the end of November, after which time the index number exhibited a succession of weekly declines. In China, prices rose slightly during the last two months of 1923, and in New Zealand they declined for the last three months. Prices in the United States remained at about the same level early in the new year as at the end of the preceding year.

### Great Britain

**WHOLESALE PRICES.**—The *Statist* index number (in continuation of Sauerbeck's figures) showed an advance of 3 per cent in January for practically the sixth month in succession, standing at 137.2 at January 31, as against 133.2 at December 31. Foods advanced 5.7 per cent during the period and materials 1.4 per cent. Vegetable foods showed the sharpest increase of all the groups. Textiles declined, although wool rose in value. All other groups advanced except animal foods, which showed no change.

The Board of Trade index number, on the base 100 in 1913, rose for January to 165.4, or 1.2 per cent, above the December level. Foods advanced 2.5 per cent and materials 0.6 per cent. All groups advanced with the exception of cotton, which declined 2.5 per cent, and iron and steel, which declined 0.2 per cent. The greatest increases were in cereals (4.0 per cent) and "other textiles" (4.2 per cent).

The *Economist* index number, on the base 100 in 1901-05, was 211.9 for January, an increase of 1.3 per cent above the December level. The chief increase was one of 6.5 per cent in cereals and meat (due chiefly to the railway strike). Other foods showed an increase of 3.7 per cent. Textiles declined 2.4 per cent, silk and cotton having declined, while wool and flax advanced. Minerals advanced 2 per cent and the miscellaneous group 1.8 per cent.

The *Times* index number for January rose 2.8 per cent above the previous month's level to 173.8. Food rose 5.1 per cent and materials rose 1.4 per cent. There was a rise of 5.2 per cent in cereals, of 2.1 per cent in meat and fish, and of 7.1 per cent in other foods. Iron and steel showed no change and other metals and minerals advanced 2.8 per cent. Cotton declined 4.3 per cent and other textiles advanced 8.6 per cent. Miscellaneous materials rose 1.4 per cent.

### Austria

**WHOLESALE PRICES.**—The new index number of the Official Statistical Office, on the base 1st 6 months of 1914=1, rose 3.1 per cent to 18,748 in January. Foods rose 3.6 per cent to 16,792, and materials rose 2.4 per cent to 23,130.

**COST OF LIVING.**—The official index number of cost of living showed an increase of 4.4 per cent in January, reaching 13,527, on the base prices in July, 1914=1. Increases were shown by all items in the budget except rent, which remained unchanged at the level of the previous month.

### Belgium

**WHOLESALE PRICES.**—The official index number of the Ministry of Industry and Labour rose in December to 545, on the base 100 in April, 1914, 2.6 per cent above the November level. Increases were shown by the food, clay, glass, chemical, textile and resin products groups, and by fertilizer, fats, construction materials and hides and leather goods. Reductions were shown by tar and its products, metal products and petrol. Fuels, tobacco, paper products and rubber showed scarcely any change.

**RETAIL PRICES AND COST OF LIVING.**—The official index number of retail prices of 56 articles in 59 localities, on the base 100 in April, 1914, rose from 470 in December to 480 in January, an increase of 2.1 per cent. This as the highest point reached since the beginning of the computation of the index in January, 1920.

The new cost of living index number for a working class family in the lowest category, on the base 100 in 1921, rose slightly from 119.55 in December to 121.83 in January. Foods showed the chief increases; heat and light, clothing and sundries also advanced, and rent declined slightly. In the budget for a middle class family the cost of living index rose from 123.21 in December to 125.10 in January. Sundries showed the chief advance. Food, rent and clothing also advanced, and heat and light showed a very slight decline.

### Denmark

**COST OF LIVING.**—The official index number, compiled on the base 100 in July, 1914, issued every six months, rose from 204 in July, 1923, to 209 in January, 1924, an increase of 2.4 per cent. Foods rose 3.2 per cent; clothing, 6.3 per cent; fuel and light, 2.1 per cent. The other groups showed no change.

### France

**WHOLESALE PRICES.**—The official index number of *Statistique Générale* which is now calculated on the base 100 in July, 1914, after falling somewhat in October, rose from 429 in that month to 452, or 5.4 per cent, and again rose 3.5 per cent to 468 in December. In the last month foods rose 4.4 per cent and materials rose 2.2 per cent.

### Germany

**WHOLESALE PRICES.**—The official index number of the Federal Statistical Office showing the course of gold mark prices, on the base 1913 prices = 100, was 126.2 for all commodities for the monthly average in December. By January 22, 1924, the figure had declined to 115.7. Foods declined from 108.8 at the beginning of January to 100.6 on January 22; while materials declined only from 147.9 to 144.0. During the same period, German goods declined from 115.3 to 106.5, while imported goods rose from 156.0 to 162.7. The index for all commodities at January 22 was 115.7.

**COST OF LIVING.**—An additional change was made at the beginning of the calendar year in the publication of the official cost of living index numbers, in that they began to be calculated in gold mark prices. This calculation, still on the base prices in 1913-14 = 100, was carried back to November 26, 1923, and the indexes given by items of the budget for each week. For January 21 the cost of living index number was 108, a decline of 29.6 per cent from that of November 26. During the same period foods declined 38.9 per cent to 125; clothing declined 19.6 per cent to 149; heating and lighting declined 15.7 per cent to 161, while rent advanced 517 per cent to 29.

### Italy

**WHOLESALE PRICES.**—The index number of the Milan Chamber of Commerce, on the base average for 1913 = 100, rose 1.6 per cent from the December level to 543.09 for January. All groups advanced during the month with the exception of chemical products and minerals and metals, which declined slightly.

### Netherlands

**WHOLESALE PRICES.**—The official index number of the Central Bureau of Statistics, on

the base of 1913 = 100, rose 3.3 per cent to 153 in November. Foods alone rose 4.2 per cent to 148 during the month.

**RETAIL PRICES.**—The official index number of retail prices of 29 articles in six cities, on the base 1893 = 100, rose 2.4 per cent to 168 in November.

### Poland

**COST OF LIVING.**—The official index number of cost of living for Warsaw rose 132 per cent in November above the October level. All items in the budget were more than doubled in price, with the exception of clothing, which showed no change for the month.

### Sweden

**WHOLESALE PRICES.**—The official index number of the Swedish Department of Commerce remained almost stationary during the last quarter of 1923, and rose one point in January to 161, on the base 100 in 1913. Raw materials showed no change for January and manufactured goods rose one point.

### Switzerland

**COST OF LIVING.**—The official cost of living index number showed for January an increase of one point for each of the three categories, reaching 170 for non-manual workers, 169 for semi-skilled workers, and 167 for unskilled manual workers, on the base 100 in June, 1914. In each case foods rose slightly and fuel and light declined.

### India

**COST OF LIVING.**—The official index number of the Bombay Labour Office was one point or 0.6 per cent higher in January than in December, being 158 on the base 100 in July, 1914. This was the third successive monthly increase. Cereals, pulses and other articles of food all showed increases. Clothing rose 2.3 per cent, and fuel and lighting and house rent showed no change.

### New Zealand

**WHOLESALE PRICES.**—The official index number of the Census and Statistics Office showed successive monthly decreases during the last three months of 1923. On the base 1,000 in 1909-13 the index number was, in September, 1,824; in October, 1,814; in November, 1,803; and in December, 1,793. In December the "wool, hides, tallow, butter and cheese" group and the "general merchandise and crockery" group advanced and all other groups showed declines. The chief decline was one of 3.4 per cent in agricultural products.

**RETAIL PRICES.**—The official index number of retail prices of food showed increases dur-

ing the last five months of 1923, rising from 1,520 in July to 1,577 in December, the base being 1,000 in 1909-13. In December groceries showed an increase and meat a decline. Dairy produce showed no change from the previous month.

#### United States

WHOLESALE PRICES.—The index number of the Bureau of Labour Statistics, on the base 1913 = 100, showed no change in January from the previous month, remaining at 151. Farm products declined one point to 144; foods declined 4 points to 143; and cloths and clothing declined 3 points to 200. Fuel and lighting advanced 7 points to 169; building materials advanced 3 points to 181; chemicals

and drugs advanced 2 points to 132; and the miscellaneous group showed a slight advance. Metals and metal products and house furnishing goods showed no change.

The *Annalist* index number of wholesale prices of foods at the middle of February, on the base average 1890-99 = 100, was 185.967, an increase of 4.7 per cent on the level at the middle of January.

COST OF LIVING.—The official index number for Massachusetts, compiled by the Special Commission on the Necessaries of Life, fell 0.7 per cent in January to 160.1 on the base 1913 = 100. Foods fell 2.2 per cent, fuel and light fell 1.8 per cent, and clothing, shelter and sundries all advanced slightly.

### FATAL INDUSTRIAL ACCIDENTS IN CANADA IN 1923

THE present article contains tables regarding fatal industrial accidents in Canada in 1923 with comparative figures for the year 1922. While an effort has been made to have the record as complete as possible it should be understood that it does not necessarily include all the fatal industrial accidents that may have occurred in the course of the year. The sources from which information was received by the Department include: For Canada, the Board of Railway Commissioners and the Explosives Division of the Department of Mines, Ottawa, as well as the Department's correspondents in the various localities; for Nova Scotia, the Workmen's Compensation Board, and the Department of Public Works and Mines; for New Brunswick, the Workmen's Compensation Board; for Quebec, the Department of Public Works and Labour and the Bureau of Mines; for Ontario, the Factory Inspector, the Workmen's Compensation Board, the Ontario Railway and Municipal Board, the Algoma Central and Hudson Bay Railway, the Algoma Steel Corporation Limited, and the Lake Superior Paper Company; for Manitoba, the Bureau of Labour and the Workmen's Compensation Board; for Saskatchewan, the Bureau of Labour; for Alberta, the Workmen's Compensation Board; and for British Columbia, the Department of Mines and the Workmen's Compensation Board. Quarterly statements giving fuller details of the accidents appeared in the *LABOUR GAZETTE* for June, August and November, 1923, and February, 1924.

The records of the Department show 1,396 fatalities as the result of industrial accidents in 1923 as compared with 1,128 in 1922. There

were 16 deaths among Canadian workmen engaged in industry at points outside of Canada as shown in the footnote to Table III following. The highest record, 508 fatalities, was in the province of Ontario; British Columbia came next with 316; Quebec had 184; Nova Scotia, 111; Alberta, 81; Saskatchewan, 72; New Brunswick, 57; Manitoba, 56; Prince Edward Island, 9; and for the Yukon District and Northwest Territory only one was reported. In the quarters ending August and December the record was higher than for the first and second quarter of the year, the highest record being shown in the last quarter with 371 deaths reported which was but one more than in the previous quarter.

There were 367 deaths, or 26.2 per cent of the total fatalities reported for 1923, in the transportation and public utilities group. In 1922, 319 deaths or 28.6 per cent of the total industrial fatalities were reported in this group. Of the 367 deaths, 165 or 11.7 per cent occurred in the steam railway service and 100 or 7.2 per cent in water transportation. There were 97 deaths in the steam railway service through being struck by, run over, or crushed by or between cars and engines, 28 were due to derailments and collisions, and 24 to falls from cars and engines. On a basis of 155,887 employees in the steam railway service in 1922 as reported by the Dominion Bureau of Statistics the figures show a fatality record of slightly over one per thousand employees while in 1922 the record of 143 deaths was slightly below that ratio. (Maintenance-of-way men and car inspectors are included in the steam railway figures for

\* Including 6 fishermen drowned in North Atlantic on March 7, and 1 at Portland, Me. on Oct. 30.  
 † Including 1 fisherman drowned at Seward, Alaska, on May 31.  
 ‡ Including 1 railway fireman killed in a collision at Island Pond, Vt., U.S.A. on April 1.  
 § Including 3 firemen on steamer, Delaware River, U.S.A., killed by explosion of boiler on October 11 and 2 sailors drowned at sea, off New York, on October 5.  
 ¶ Including a deckhand and a watchman who fell into the hold of vessels at Buffalo, N.Y., on September 11, and November 1 respectively.

1923, but railway carpenters and car repairers in railway shops and on trains are included in the iron, steel and products section of the "Manufacturing" group, there being 14 of these workmen reported). In the manufacturing group there were 196 deaths, this being 14 per cent of the total reported as compared with 164 in the previous year, machinery and its parts accounting for 54 deaths and electricity for 15. In mining, non-ferrous smelting and quarrying there were 187 deaths, or 13.5 per cent of the total fatalities reported, of which 113 were in the coal mining industry, falls of rock, stone, etc., and cave-ins accounting for 48. There were 35 deaths in this group due to explosions, 33 fatalities being recorded as due to an explosion at a mine in Cumberland, British Columbia, on February 8; 19 deaths were caused by mine and quarry cars. In the logging industry 193 fatalities or 13.8

per cent of the total fatalities were reported, falling trees, branches, etc., being responsible for 78 and drownings for 39 in this group. In agriculture the fatalities reported numbered 129, or 9.2 per cent of the total fatalities reported, 46 being due to horses kicking, bolting, etc., and 9 to being gored by bulls. (For information regarding accidents in this group the Department depends almost entirely upon press clippings). The record of all the industries shows 90 deaths due to machinery and its parts, 55 to hoisting apparatus, 206 to dangerous substances among which are included steam escapes, boiler explosions and compressed air, 16; explosive substances, 84; electricity, 42; and gas, fumes, etc., 25. There were 218 deaths due to falling objects, 180 due to falls of persons, 147 to drowning, 66 were caused by animals, and 54 occurred while handling objects.

### IMMIGRATION TO CANADA DURING THE FISCAL YEAR ENDED MARCH 31, 1923

THE report of the Department of Immigration and Colonization for the fiscal year ended March 31, 1923, which has been recently issued, contains statistics of immigrants for that year according to nationalities, occupation and destination, with comparative figures for previous years. The number of British immigrant arrivals was 34,508, as compared with 39,020 in the preceding year, a decrease of 12 per cent, and the number of immigrants who arrived from the United States was 22,007, as against 29,345 in the previous year, a decrease of 25 per cent. The total immigration from other countries was 16,372 while for the year 1921-22 these numbered 21,634, a decrease of 20 per cent. In 1921-22 Chinese immigration was 1,746, and in the year under review it was only 711, a decrease of 59 per cent. Immigration from Japan decreased during the same period from 532 to 369, or 31 per cent. Only 21 Hindoos arrived during the fiscal year 1922-23. The greatest number of immigrant arrivals by months during the year occurred in May 1922 there being 11,199 arrivals, and the lowest number was shown in January, 1923, when there were 2,602 arrivals. In the year 1921-22 the arrivals

during the months of April, May and June exceeded the arrivals during May, 1922, the figures for these months being 15,052, 14,143 and 12,277 respectively, while the lowest figure during that year was shown in February, 1922, when the number was 2,183. The following table shows the number of immigrants with their families according to their occupation:—

IMMIGRANTS DURING FISCAL YEAR ENDED  
MARCH 31, 1923, CLASSIFIED BY OCCUPATION  
AND SEX

	Via ocean ports	From the United States	Totals
<i>Trade or occupation—</i>			
Farmers and farm labourers—			
Males.....	11,370	6,380	17,750

Females.....	7,359	2,414	9,773
Children.....	6,078	1,696	7,774

The following table shows the number of immigrants arranged according to their destination:—

Destination	Via ocean ports	From the United States	Totals
Nova Scotia.....	1,878	289	2,167
New Brunswick.....	458	558	1,016
Prince Edward Island.....	32	83	115
Quebec.....	6,163	3,180	9,343
Ontario.....	24,417	6,027	30,444
Manitoba.....	4,580	1,457	6,037
Saskatchewan.....	4,413	3,773	8,186
Alberta.....	4,113	4,685	8,798
British Columbia.....	4,819	1,833	6,562
Yukon Territory.....	7	122	129

Three reports dealing with immigration inspection are included in the report. With reference to border ports, it is stated that in the Eastern Division, extending from the Atlantic coast to Port Arthur, 23,535 persons sought admission as immigrants, and of this number 12,203, or 52 per cent, were rejected by the inspectors. In the Western Division stretching from Port Arthur to Kingsgate, 9,692 persons applied for admission of whom 854, or nearly 9 per cent, were rejected. In the Pacific Division, including border ports from Kingsgate westward and Pacific coast ports, 2,707 immigrants presented themselves for admission and 870, or 32 per cent were rejected. The number of rejections at ocean ports during the year was 632 of which 98 were British, 4 were American and 530 were from other countries.

The number of deportations after admission was 1,632 during the year 1922-23 as compared with 2,046 in 1921-22. Of the former number 888 were British, 520 were American and 224 were from other countries. On June 28, 1922, the Opium and Narcotic Drug Act was amended to provide for the deportation of aliens convicted under certain sections of the Act, irrespective of the acquisition of domicile under the Immigration Act. Subsequent to this date 33 aliens who had served terms of imprisonment as drug addicts, or peddlers, were deported. At the end of the year there were 22 aliens under orders for deportation and 25 persons were still under investigation.

The number of prosecutions undertaken by officers against infractions of the Immigration Act was 64, these including 43 prosecutions in the Western Division, 20 in the Pacific Division and one in the Eastern Division.

During the year 72 applications were filed by employers in the Pacific District for the admission of labour, which it was claimed could not be procured in Canada to fill vacancies occurring. These applications covered 451 positions. As a result of investigations by the Employment Service, 310 were refused and the positions filled by persons resident in Canada; admission was approved of in 141 cases. In the Western Division 4,120 farm labourers were admitted through border ports, as compared with 3,329 in the previous year. The large majority of these were admitted to furnish the necessary farm labourers for the southern part of Saskatchewan. There were 2,385 applications received from persons in Western Canada who desired their relatives to come to Canada from various countries. This was an increase of 585 over the previous year.

The commissioner of the Western Division claimed that there had been exaggerated reports circulated during the latter part of the year, that large numbers of persons were leaving Canada for the United States and Mexico. He pointed out that nearly every year as soon as building operations cease in the West, a number of artisans, mechanics and other labourers go to California, and other States in the Union, where the climate permits of all-year-round building operations, but that very few go with the intention of remaining. The lure of plentiful work and high wages induced a large number to the United States last winter during the building boom, he said, yet many found on arrival at their destination that work could not be found and they returned to their homes in Canada. During the spring and fall a number of Mennonites, because of their objection to comply with the Provincial School Act decided to emigrate to Mexico but these, he said, were begin-

ning to drift back again. They claimed that conditions were very different from what they had been led to believe were in existence. Also a number of farmers who had gone to the United States were found to be returning to Canada, having found "that while possibly in certain districts they were unfortunate in Canada in not getting good crops, yet the opportunities south of the line are no better than can be found here."

In the report of the Eastern Division, it was stated that a large number of deserters from ocean vessels seek employment during the summer as seamen on the Great Lakes and return to the ocean ports late in the fall and that a considerable number of these seamen remain in Canada, but it is impossible to check this traffic. A record of the crews lists submitted at the ocean ports and of the deserters is given as follows: Crews lists—St. John, 576; Quebec, 73; Halifax, 680; Montreal, 875; Sydney and Louisburg, 539; and North Sdney, 589. Deserters—Quebec and Montreal, 828; Halifax, 43; St. John, 84; Sydney and Louisburg, 69; and ports on the Great Lakes, 14, making a total of 1,038.

With regard to the immigration of women, there were 4,700 British houseworkers admitted during the year, of whom 2,129 were English, 542 were Irish, 1,967 were Scotch and 62 were Welsh. The provinces of Ontario and Saskatchewan have been advancing fares to houseworkers from Great Britain, and the results, it is claimed are most satisfactory. Each government has a woman officer in Great Britain who travels about interviewing and selecting suitable women. During the year. Saskatchewan had about 150 women come forward under this assisted passage scheme. In Great Britain there are six women officers, a principal woman emigration officer and an assistant at each of the ports of London, Liverpool and Glasgow, whose duty it is to interview women wishing to come to Canada. The report states that it is necessary that all women coming to this country should be most carefully interviewed by a Canadian woman in

order that we may secure good citizens; also there are certain classes, such as factory workers, that must be discouraged because we already have an adequate supply of these workers in Canada. During the year the Society for the Oversea Settlement of British women sent out 464 women to Canada. Since the war, 2,498 ex-service women are reported to have come to Canada, having been granted free passage by the British Government. They are not afraid of hard work and are making good settlers. Canada has received more of these women than any other Dominion, Australia coming second with 1,361. Canadian women's hostels are situated at the following points in Canada: Nova Scotia, 163 Young Ave., Halifax; New Brunswick, 35 Union St., St. John; Quebec, 31 Drummond Street, Montreal; Ontario, 72 Carlton Street, Toronto; Manitoba, 130 Austin Street, Winnipeg; Saskatchewan, 1839 Lorne Street, Regina; Alberta, 120 Fourth Avenue, West, Calgary; British Columbia, Y.W.C.A. at 997 Dunsmuir Street, West, Vancouver. Grants are given to these hostels by the Dominion and Provincial governments, and they are also given an allowance by the Dominion government to cover from twenty-four to forty-eight hours accommodation of immigrant girls coming seeking employment as houseworkers. The newly arrived girl is given first consideration but girls changing situations or in difficulties look upon them as homes and are encouraged to spend their evenings there. Monthly reports are furnished by these hostels to the Women's Division of the Department. The names of immigrant women who have not made good in Canada and with whom any organization is having trouble are also sent in to the Women's Division for investigation.

The number of employers applying for juvenile immigrants largely exceeded that of the previous year while the supply was but a small fraction of the demand. The number of children and juveniles migrated did not reach the desired total because of the high cost of transportation and not because

there was a shortage of available boys and girls for settlement in Canada. The following statement is given to show that there has been a limited migration of juveniles from Great Britain for a number of years:

Total number of children emigrated to Canada during the years 1900-1 to 1922-23 (inclusive).....	38,589
Total number of applications received for children from 1900-1 to 1922-23.....	451,680
Total number of children emigrated during the three years ending March 31, 1923.....	3,821
Total number of applications during same period.....	52,217

Inspections of the children during the fiscal year ended March 31, 1923, showed there were 1,426 wage earning, 37 adopted, 14 engaged in other occupations than farm work, 57 apprenticed to a trade and self-supporting and 103 restored to and residing with relatives. The total annual wage paid to these children was \$173,190, and the amount of money in their savings accounts, \$12,199. Six of the children were under five years of age, 765 were of school age (5 to 14 years) and 1,784 were over school age.

At the close of the fiscal year 1922-23 there were twelve provincial or district agencies in Great Britain and Ireland.

The Trades and Labour Council of Guelph, Ont., recently protested to the Provincial Government against the use of prison labour where it entered into competition with free labour. The deputation stated, as an instance of this practice, that beds manufactured at the Provincial Reformatory were being sold to private institutions, but the Provincial Secretary assured them that these beds were sent only to institutions in receipt of government grants. Objection was also taken by the labour men to the technical instruction given to prisoners. The minister, however, maintained that the prisoners had to be kept occupied and given a chance to secure work and become law-abiding citizens after their release. The Provincial Secretary promised to consider the question whether prisoners should be permitted to fire boilers at the institution, the delegates having claimed that only qualified men holding certificates should be employed for such work.

# THE LABOUR GAZETTE

PREPARED AND EDITED IN  
THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

VOLUME 24]

APRIL, 1924

[NUMBER 4

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

**I**N addition to the regular monthly articles this issue of the **LABOUR GAZETTE** contains a number of special articles relating to labour and industry. These include an article dealing with certain amendments recently made by Order in Council to the Fair Wages Policy of the Dominion Government, and an account of the circumstances leading up to a strike of coal miners in Alberta and British Columbia. There is also a review of the laws affecting labour which were passed at the recent session of the legislature of Quebec.

### Monthly summary

The offices of the Employment Service of Canada reported increased transactions during the month of February, 1924, the volume of applications, vacancies and placements being considerably larger than during January and during the corresponding period a year ago.

At the beginning of March the percentage of unemployment among members of trade unions was 7.8 as compared with 7.5 per cent at the beginning of February, and with 6.4 per cent at the beginning of March, 1923.

The average cost of a weekly family budget of twenty-nine staple foods was \$10.58 at the beginning of March as compared with \$10.75 for February; \$10.79 for March, 1923; \$10.54 for March, 1922; \$13.23 for March, 1921; \$16.92 for June, 1920 (the peak); \$15.98 for March 1920; \$12.66 for March, 1918; and \$7.68 for March, 1914. In wholesale prices the index number calculated by the Dominion Bureau of Statistics based upon prices in 1913 as 100 stood at 154.1 for March as compared with 156.6 for February; 155.9 for March, 1923; 153.6 for March, 1922; 186.4 for March, 1921; 256.9 for May, 1920 (the peak); and 241.1 for March, 1920.

The time loss due to industrial disputes during March was less than during either February, 1924, or March, 1923. Twelve disputes began or were in progress during the month, involving 765 employees and a time loss estimated at 11,056 working days. Corresponding figures for the previous month

were 16 disputes involving 11,518 workpeople and an estimated time loss of 101,968 working days, and for March, 1923, 19 disputes involving 1,533 employees and a time loss of 33,229 working days.

### Industrial Disputes Investigation Act

Two applications were received by the Department during March for the establishment of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act, 1907, and one Board was established during the month.

### Bill to amend Industrial Disputes Investigation Act, 1907

A bill to amend the Industrial Disputes Investigation Act, 1907, was introduced in the House of Commons on March 12 by the Minister of Labour. The amendments in question are identical with those which were before Parliament last Session and which were referred to in the July, 1923, issue of the **LABOUR GAZETTE**. They do not introduce any new features into the present statute but are intended simply to make clearer at one or two points what has been regarded, since the passing of the Act, as the obvious intent of these sections. The proposed amendments affect Sections 15, 57 and 58. The amendment to Section 15, relating to declarations by trade union officers, is designed to facilitate applications for Boards of Investigation. The amendment to Section 57 is designed to place clearly upon one of the parties to a dispute the responsibility of making an application under the Act for the appointment of a Board of Conciliation and Investigation, if the dispute is not otherwise disposed of. The amendment to Section 58, which is the penalty section of the Act, grows out of the proposed change in Section 57. Second reading was given to the bill on March 25, without division, and third reading on March 28. The bill was introduced in the Senate by Honourable Mr. Dandurand on April 1.

### Parliamentary committee on industrial and international relations

The Prime Minister announced in the House of Commons on March 24 that the government proposed to form a new select standing committee on industrial and international relations. This announcement was made in connection with a motion by Mr. J. S. Woodsworth, member for Centre Winnipeg, "that in the opinion of this House it is advisable to appoint a select standing committee to deal with all matters coming before the House which involve industrial relations." Mr. Woodsworth pointed out that Parliament was becoming more directly connected with the industrial life of the country and that full machinery should be set up for the consideration of labour questions. The Prime Minister agreed that such a committee was desirable, and proposed further that it should be broadened so as to make it a standing committee not only on industrial relations but also on international relations. The House had, he pointed out, been giving more time since the war to international questions, and industrial problems were becoming more international in their character. The government therefore proposed, with the approval of the House, to establish a select standing committee composed of members having a special interest in, and special knowledge of such questions. Mr. Woodsworth accepted the proposal as effectively carrying out his purpose and withdrew his resolution.

### Accident prevention in British Columbia

Methods adopted by the Workmen's Compensation Board of British Columbia to safeguard workers from accident are described in the March issue of *Industrial Canada* in an authorized review from information supplied by Mr. H. B. Gilmore, one of the three commissioners entrusted with the administration of the Workmen's Compensation Act. It is stated that a set, or projecting screw, on a revolving collar or wheel has caused the loss of more limbs than any other part of machinery. In 1917 these screws cost the Board \$35,000. Since then the Board has carried on a campaign to have all such screws made flush, with a result that the cost in 1922, under this head, amounted to only \$1,000. Open gears are forbidden and even a partly open gear is considered a source of danger. The Board insists that there shall be no exposed shaft ends in works or factories. A flat board up against them is claimed to be a simple and effective protection. All shafting less than six feet six inches from the floor, ground or

platform must be protected, and pulleys must be guarded. The Board seeks to guard against the men putting on belting while the machinery is in motion. Another frequent cause of injuries is the putting of dressing on belts while the wheels are running, which should be done at the point of the belt where it leaves the wheel and not at the point where it approaches contact with the wheel. Protective measures have been adopted to make the manipulation of a joiner or buzz planer less dangerous, and "now while a man may lose the very tip of a finger, he cannot lose the half of his hand, if the methods urged by the Workmen's Compensation Board are followed". Many precautions have been taken to protect workers handling rip saws and swing cut-off saws, and it is now necessary that all swing cut-off saws must have a safety chain. Edging machines must have guards to prevent chips flying. In certain classes of work where the hazard to the eyes from flying pieces of steel or stone is big, it is obligatory on the workmen to wear goggles. If an accident is sustained because this obligation has been ignored, compensation may be refused. Stairs must be provided with hand rails and in some cases with toe boards. Adequate lighting is demanded by the Board. Defective lighting it is said, is the most prolific and most costly of all accident causes. In blacksmith and engineering shops the Board insists that the burr or mushroom top on chisels and wedges be removed by frequent dressing, the reason for this being that pieces of the burr fly off, causing injury to workmen in the neighbourhood. In the year the Board was formed eleven arms were cut off by shingle machines in the province and it is pointed out that "such protection has now been provided that it is impossible for a man to lose an arm from such machinery". Special measures have been taken to guard passengers on elevators, and operators in laundries where "extractors" are considered a great source of danger; washing machines must be locked while being filled. Additional protection has been brought into effect for securing the maximum of safety from boilers. All boilers must now come under the Boiler Inspection Act, for purposes of inspection, and where there is no engineer in charge, they have to be equipped with two safety valves, one of which is locked by the boiler inspector. Automatic couplers and air brakes are now the order of things in logging railways, more than 50 per cent of the complete equipment of this sort in the province having been renovated to this extent within the last year or two. On railways so equipped there is a workmen's compensation assessment of 3 per cent on the employer, whereas on those with-

out it there is an assessment of  $4\frac{1}{2}$  per cent, or a difference of fifty per cent.

The review states "The Board's position coupled with that of government inspectors is that, while they have no control over the kind of machines that manufacturers may turn out, they do have a voice in saying whether these machines shall be operated or even tested out, if in any of those operations human lives or limbs are endangered. A statement prepared by the Board for the information of employers and others not familiar with the provisions of the workmen's compensation act was given in the *LABOUR GAZETTE* for January, 1924, page 30. In a recent circular to employers of the province, the Board points out the advantages of safety work but states that "To be of any real worth safety work must be thoroughly organized and kept keenly alive at all times. It has been our experience that the best results have been secured in those establishments in which the foremen have been made the keystone of the safety organization. We suggest that much may yet be done in organized safety work by utilizing the foreman in conjunction with the safety committee for the more strict enforcement of accident prevention regulations. Co-operation among the management, the foreman and the safety committee should be of the closest nature".

#### Prevention of accidents in coal mines

The safety engineer of the service bureau of a large insurance company in the United States, in a recent issue of *Coal Age*, outlined a plan for reducing accidents in a group of mines that had purchased group insurance from his company and of which he had made a special survey. An analysis of 575 accidents involving a loss of time of one day or more, in all the mines, for a period of fifteen months, showed an operating loss of about \$1,040,000 including a loss of 110,000 days, a coal production loss of 495,000 tons and an accident loss of about \$50,000. Forty per cent of the accidents involved miners, 35 per cent transportation men, and 25 per cent were machine men, timbermen and others in varying percentages from 5 to 1. A study of the causes indicated that a possible reduction of 75 per cent of all causes could be looked for with an immediate reduction of 50 per cent in the classification of slate and coal falls alone. The annual average monthly accident rate was 1.2 per 100 employees for all mines, the severity rate 30 days per 100 men employed, and the fatality rate 3.5 per 1,000 employees. Physical conditions of the properties both on the surface and underground were good ow-

ing to the efforts of a competent mine inspector. It is claimed, however, that physical conditions involve probably only 10 per cent of those factors which when corrected tend toward actual elimination. Accidents involving the negligence of the personnel composed a greater percentage of the total than those attributed to defective structural conditions of the property. It was suggested that a safety organization be developed, including formation of safety committees, holding of meetings, carrying on of efficient educational work in accident prevention through the use of bulletin boards, pay envelopes, etc. and the investigation of all accidents involving loss of time. The plan proposed includes the organization of a central safety committee, mine safety committees and, where feasible, sectional committees; the central committee to be made up of the general manager as chairman, safety engineer, general superintendent, chief engineer, maintenance engineer, claim man, and superintendents of the various mines; and the mine safety committees to consist of the mine superintendent as chairman, the safety engineer as secretary, the mine foreman, assistant mine foreman, mine electrician and workmen. The duties of the mine safety committees are outlined as follows: to report and review all accidents occurring in the particular mine; consider suggestions and recommendations submitted by members and others regarding accident prevention methods, sanitation and welfare; submit for approval to the central safety committee such recommendations as should become part of the company's standard practice; and initiate and arrange for the carrying on of educational work in accident prevention among employees of the mine concerned. The central committee's duties would be to keep in touch as far as practicable with all safety devices or methods developed for prevention of accidents in their particular industry, review the mine committees' recommendations with the idea of making them standard practices, assist in the development of general operating rules, consider accidents on a basis of loss in production and insurance cost, and every two months appoint a special committee to make a survey of at least one mine with an idea of promoting better safety conditions in that particular mine. It is also suggested that there should be a court of inquiry, a special committee appointed as accidents occur by the chairman of the mine safety committee to investigate the serious accidents and fatalities, this committee to comprise the mine superintendent as chairman, the camp doctor, the

safety engineer, the foreman in charge of the employee who was injured or killed, and witnesses to the accident. Its duties would be to determine the cause and responsibility for the accident. As the statistics indicated that a large percentage of the accidents happened to new employees, it was pointed out that it should be part of the duties of safety committees in various mines to instruct new men in the elements of the safety rules. The report states that it has been found practical to designate the members of the safety committee through the use of safety buttons or badges.

### Legislative programme of labour unions in Nova Scotia

The Nova Scotia executive of the Trades and Labour Congress of Canada presented to the Provincial Cabinet during March a programme of legislation containing the following proposals: (1) Enactment of an eight-hour day law for all industrial and commercial undertakings. (2) Amendment to Workmen's Compensation Act. (3) Amendments to Factories Act to make provision for the appointment of sufficient inspectors to allow thorough examination of all industries. (4) Enactment of legislation creating an office of fair wage officer, appointment to be made as soon as the law is in effect. (5) Enactment of legislation providing pensions for all persons over sixty-five years of age. (6) Enactment of legislation providing for the sale of beer and light wines, or as an alternative the matter to be decided by plebiscite on the local option basis. (7) Amendment of Public Instructions Act providing for supplying school books to pupils free of cost. (8) Enactment of legislation providing a license law for barbers, license to be granted applicants who are thoroughly qualified to conduct a sanitary establishment as guarantee of public health and comfort.

Premier Armstrong promised that the government would consider these proposals but pointed out to the delegates the urgent need of economy in public administration at the present time.

### Minimum wages in Ontario

The Department of Labour has received further information regarding the interpretation of the recently revised order of the Minimum Wage Board, governing the laundry industry, to which reference was made in the March issue of the *LABOUR GAZETTE*. This order combined the three previous orders without material change, but new phraseology was introduced. The revised order, according to the chairman of the Board, makes no change in the proportion of inexperienced

workers. Like the earlier order it provides that "not more than twenty-five per cent of the total female employees in any establishment shall be either inexperienced adults or young girls." The earlier orders of the Board accepted the hours in vogue in any plant, as at the time they were issued the Board had no authority over hours. No lengthening of hours was sanctioned under the new order, and no change was made as to the maximum charges allowed to be made for board and lodging.

### Chinese laundries in Ontario

The Ontario Department of Labour has conducted an investigation of 341 Chinese laundries in Toronto and various towns of Northern Ontario. In these laundries there were 408 employees whose wages ranged from \$5 to \$18 per week, the average being \$11.25. Room and board is given as well as wages. Thirty per cent of the laundries are operated without hired help. The hours of work are very irregular about 52 per cent working from 50 to 75 hours per week, 18 per cent from 55 to 75 hours, 18 per cent from 45 to 65 hours and 12 per cent from 60 to 70 hours. Only one laundry which is in Toronto is assessed under the Workmen's Compensation Act. This is also the only laundry where females are hired, five or more being employed. Twenty per cent of the laundries are said to have insanitary and unhealthy living quarters. The laundries in the country are said to be not so clean or sanitary as those in Toronto.

### Manitoba and Empire Settlement scheme

The Legislative Assembly of Manitoba, on March 17, passed the following resolution in reference to the Empire Settlement scheme:

Whereas it has been brought to our attention through a statement made by Mr. Smart, superintendent of immigrant children, that five thousand young children are being brought into the country annually, under "The Empire Settlement Scheme"; and whereas, there has lately been much prominence given to the treatment of immigrant children showing, apparently, some lack of supervision and inspection; and whereas, there are large numbers of children in Canadian institutions that should be placed in foster homes provided the homes were suitable for the child: therefore, be it resolved, that if the Dominion government wish to continue this scheme of bringing immigrant children into the country, that we request they be placed only in such homes as may be recommended through provincial child welfare organizations, or similar bodies, and proper provision made for periodical visitation to such homes after the child has been placed there; and be it further resolved, that copies of this resolution be sent to the Honourable Premier of Canada and the Honourable Minister of Immigration of Canada.

Some account of the proposals of the British Overseas Settlement Committee was given in the issue of the *LABOUR GAZETTE* for

February and May, 1922. An arrangement was subsequently made whereby organizations bringing children into Canada were assisted jointly by the British and Canadian governments. A Provincial Act of 1922 (chapter 2) respecting the welfare of children, provided for the establishment of a Department of Public Welfare, with a children's branch attached thereto, under control of a director of child welfare assisted by a medical officer and a board of selection composed of five or seven members. Special provision is made under this act for the treatment of neglected, dependent, delinquent and defective children and for immigrant children.

### Legislation desired by retail merchants in Saskatchewan

A deputation from the Saskatchewan Retail Merchants' Association recently interviewed the premier and other members of the provincial government in order to suggest various legislative changes in the interest of their members. They asked for an amendment to the act relating to garnishee which would reduce the limit of exemption to \$50. The Attachment of Debts act at present provides (Revised Statutes of Saskatchewan, 1920, chapter 59) that "no debt due or accruing due to a mechanic, workman, labourer, servant, clerk or employee, for or in respect of his wages or salary shall be liable to attachment unless such debt exceeds the sum of \$75 and then only to the extent of the excess." The government was of the opinion that the cost of living had not fallen sufficiently to justify a reduction, but promised to consider a proposal that "gratuitous items" should be classed as earnings. The government accepted a proposed amendment to the Hawkers' and Peddlers' Act requiring that these traders should be required to carry and display their licenses when asked to do so. Action may also be considered in the direction of a tax on fruit grown outside the province. It was considered that the act governing the inspection of meat and slaughter houses was sufficiently strong, if strictly administered, to meet the wishes of the Association for stricter inspections.

### Hamilton firemen's benefit fund

The chairman of the fire committee of the city council of Hamilton, Ontario, recently issued a statement on the Hamilton Firemen's Benefit Fund, in reply to criticisms appearing in the press. He stated that the existing firemen's pension fund owed its origin to the foresight of the firemen themselves. "In June, 1910, the city council ap-

proved a general readjustment of salaries which included city hall employees and members of the fire department. The same was to have become effective on December 1, 1910, in the case of firemen. In the period between June and December a committee of firemen worked out the plan of a pension scheme for their department and through their initiative succeeded in having the raises decided on in June increased sufficiently to form the nucleus of a fund. I think, when one considers that the scale of yearly salaries, with increases included, ranged from \$581 to \$865 at the end of four years' service, the fund is an outstanding credit to their foresight and initiative. In many cases the men who undertook to build up a fund from these small salaries were married and supporting families, and the sound position of their fund to-day is a credit to their perseverance. In 1910 the firemen were given a cash grant of \$500 to be paid into the fund at the beginning of 1911. The council of 1911 confirmed this grant, but decided against any grants in the future. Under the present regulations, men appointed since 1890 are required to retire at 60 years of age. Each year the fund is attaining a stronger financial position and it will not be a matter of many years until the rearrangement of pensions by government actuaries will permit the payment of increased pensions and gradually relieve the city of the necessity of making grants to retiring firemen."

### Agreement of bituminous coal operators and miners in United States

Representatives of the United Mine Workers of America and of bituminous mine operators of the States of Illinois, Indiana, Ohio and Western Pennsylvania met in joint conference at Jacksonville, Florida, on February 11, for the purpose of negotiating a new agreement. On February 19 a tentative agreement was entered into on the following terms:

1. This joint conference of operators and miners of Illinois, Indiana, Ohio and Western Pennsylvania, as now constituted, hereby reaffirms the wage scale contracts now existing between the United Mine Workers of America and the coal operators whose interests are represented in this conference, and hereby extends the same for a period of three years, from April 1, 1924, to March 31, 1927, in all of their terms, provisions and conditions. It is understood the execution of this inter-state agreement extends, without further negotiations, the district and sub-district agreements now in effect in the districts affected.

2. That an inter-state joint conference of the Central Competitive Field shall assemble the second Monday in February, 1927, at Miami, Florida, and the president of the United Mine Workers of America and the chairman of this joint inter-state conference are authorized and instructed to send out notices at the proper time as to the assembling of the conference.

Before the agreement became effective it had to be submitted to the general membership of the union for ratification. On March 25 it was announced that the agreement had been ratified by a vote of 164,858 to 26,253 against it.

The wage scale contracts which were renewed by this agreement were those that were in force in March, 1922, and that had been adopted in September of that year after the general strike and subsequently renewed.

**Organized credit for farmers in prairie provinces**

The total amount owing to the province of Manitoba under the Rural Credit Societies Act is \$2,593,836; under the Settlers' Animal Purchase Act, \$377,213; and under the Farm Loans Act, \$6,100,000. This information was supplied by the Government in reply to questions in the Provincial Legislature on March 11. It is of interest to labour in view of the recommendations adopted at the Third International Labour Conference, held at Geneva in 1921, to the effect that state encouragement should be given to joint action by workers in the farming industry. The Manitoba Rural Credits Act (chapter 73 of the Statutes of 1917) provided for the establishment of rural credit societies for the purpose of obtaining short term loans, purchasing seed and other supplies, implements, machinery and livestock, and to act as purchasing and selling agents for the members. The Settlers' Animal Purchase Act (chapter 3 of the Statutes of 1916) provided for the purchasing and raising of animals by the Manitoba government and for their conditional sale to "needy and worthy" settlers in certain defined portions of the province. The Manitoba Farm Loans Act (chapter 33 of Statutes of 1917) established the Manitoba Farm Loans Association as a corporate body, to make loans for the acquiring of land for agricultural purposes, for land clearing, building, purchase of livestock and implements, and for discharging liabilities incurred in increasing the productiveness of land. The affairs of the Association are managed by a Board consisting of five members appointed by the Lieutenant Governor in Council, one member being nominated by the Provincial Union of Municipalities and one by the Grain Growers' Association. Acts which extend to farmers the use of the credit of the province are in effect in Ontario, Alberta and British Columbia.

The Saskatchewan Debt Adjustment Bureau, according to an official statement in the Legislature in March, considered 3,500 cases of financial difficulties from September,

1921, to September, 1922, 5,000 cases from September, 1922, to September, 1923, and 2,495 cases from the latter date to March 12. The numbers of farmers assisted could not be given exactly, but the records indicated that 975 applicants had been assisted by the Bureau to a sound financial standing and at least 1,500 farmers were enabled to make satisfactory arrangements with their creditors by following the advice of the Bureau. Forty-three assignments, covering the 1923 crop only, were made to the Bureau. The value of the crop proceeds distributed by the Bureau since September, 1923, to March 12, was \$80,192.

**Mothers' allowances in Saskatchewan**

Some statistics in connection with the administration of the Mothers' Allowances Act of Saskatchewan in 1923 were given in reply to questions in the Provincial Legislature on March 3. It will be recalled that Saskatchewan remodelled its mothers' allowance legislation in 1922 the new act superseding the act of 1917 and being similar in its main provisions to the acts in Manitoba, Alberta, British Columbia and Ontario. The number of women in receipt of allowances under the act was 754 on December 31, 1923, as compared with 663 on the same date in 1922 and with 522 in 1921. Of the 754 women who benefited in 1923, 634 were widows, 91 were wives of men permanently incapacitated through illness or other causes, or of inmates of an institution or home, and seven were foster mothers. In 22 families the husband was the inmate of a gaol or penitentiary. The total number of children in the families relieved was 2,618. The amount paid in mothers' allowances was \$215,640 in 1923, \$185,390 in 1922, and \$144,090 in 1921.

**Civic liability for mothers' allowances**

The city council of Ottawa recently sent out the following letter to various municipalities throughout the province asking them to support a proposal to amend the Mothers' Allowance Act of Ontario:—

The council of this city considers The Mother's Allowance Act in its present form defective and subject to abuse and that in the result, municipalities and in particular cities, are obliged to contribute larger sums for the maintenance of dependent widows and wives than would be the case if these defects were removed.

The requirements of the Act as to residence are, that the person making application should have been resident (1) in Canada at the time of the death, or total disability of the father of the children, and in Canada for three years; (2) in Ontario for two years; and (3) in the municipality for one year, prior in each case to the time of making application for an allowance. These provisions permit widows, and wives whose husbands have been totally disabled, or who have deserted them, moving into Ontario from some province after such death, disability or desertion, and

having obtained the necessary residence in Ontario, obtaining an allowance under the Act. It does not seem just that municipalities in Ontario should thus be burdened by the upkeep of widows or deserted wives, whose husbands were or are residents of another province. It is suggested that, to overcome this defect, clause (b) of section 3 of the Act should be amended so as to read: "Was resident in Ontario at the time of the death, total disability or desertion of the father of the children on whose behalf the allowance is to be made, and was resident in Canada for a period of three years immediately prior to the application for an allowance."

It is considered that the term of one year's residence in the municipality chargeable, is also too short and that widows and dependent or deserted wives, realizing that the Act is more completely administered in cities, move from rural to urban centres for the purpose of qualifying for an allowance. It is suggested that the requirements of local residence be extended from one to two years.

A bill proposing amendments to the Act in accordance with the foregoing, will be submitted to the legislature at its present session, and the corporation of this city will greatly appreciate support from your council through your local member.

### "Save the Forest Week"

By a proclamation dated February 28, 1924, the week of April 27 to May 3 has been appointed as "Save the Forest Week," when all Canadians are asked to consider the disastrous losses both in life and resources that have recently resulted from forest fires. Loggers, saw-mill operators and others interested in timber operations are requested to see that all equipment and appliances designed to prevent the origin or spread of fires are overhauled and placed in a state of thorough repair, and to review with care the fire protection requirements of the legislation under which they operate; they should also see that all employees working under their direction are properly instructed as to the danger of fire. The proclamation further asks that settlers and others engaged in the clearing of land should fully observe the fire laws of the Dominion or province which have been enacted for their protection as well as for the preservation of our timber resources.

### Health supervision in industry

An analysis of reports received from twenty-eight manufacturing plants by a committee on health supervision in industry appointed during the summer of 1923 by the American Management Association gives the following data relative to methods, cost, organization and results of health supervision in American industry:

The average weekly persons on payroll was 108,087 and the separation or turnover rate was 55.2 per cent during the year 1922. Among 75,841 admissions to the service, 82 per cent were medically examined, 13 per cent were medically inspected, and 5 per cent were admitted without either medical inspection or examination.

Routine periodical medical examinations were made of 26 per cent of the personnel.

Three-fifths of the plants had full-time medical officers in direct supervision of health work. Where nurses were employed, the ratio was 1.1 per 1,000 of personnel.

Periodical medical examinations were conducted by more than one-half of the plants, and among these establishments one-quarter followed up the results of these examinations for the correction of physical impairments.

One-quarter of the firms owned or controlled hospitals for the care of sick or injured employees. Among the 21 firms not owning or controlling hospitals, 19 had arrangements with "outside" hospitals for the care of sick and injured.

Dispensary visits were also reported. This type of service was at the rate of 7.3 visits per person per year.

Health supervision in plants specifying cost items, was conducted at an annual per employee rate of \$6.89. Direct costs were \$5.81 per employee, salary expense amounted to \$4.21 and direct maintenance to \$1.98. Indirect charges, such as rent, light, and other indirect items amounted to 57 cents per employee per year.

The committee is continuing the study and hopes to have available before the completion of the work some four hundred schedules from leading large-scale industries of the country. Several important facts which this committee, under the chairmanship of Dr. Lee K. Frankel, hopes to place upon the sound foundation of fact and performance are: "the usefulness of medical examination at entrance as means for selection of persons physically fit to enter industry; the periodical medical examination as a means for detecting chronic disabling illness in its incipiency and for fitting the worker to his employment; plant medical supervision as a means for prompt, efficient treatment of minor injuries and illnesses; industrial visiting nurses as a wholesome check upon unnecessary absenteeism; and the supervision of plant hygiene as a means of reducing preventable illness."

### Health inspection in Alberta schools

The Calgary School Board has taken steps to limit the work of the school clinic which was established in 1915. The School Act (Revised Statutes of Alberta, 1922, chapter 51, section 139) enables school boards in the province to appoint physicians, dentists and nurses to care for the health of the pupils and advise parents and the board in respect thereto, and to make such expenditures as it may deem necessary to safeguard the health of such pupils. The clinic referred to was for the purpose of following up medical reports by practical treatment. In this connection it may be noted that the Town Act (Revised Statutes of Alberta, chapter 108, section 162) enables municipal councils to employ public health nurses to inspect the schools, to conduct child welfare stations, and to give instruction and advice on all matters of public health.

### Health teaching in schools of Saskatchewan

Reference was made in the last issue of the *LABOUR GAZETTE* to the work of the nurses employed by the school hygiene branch of the Department of Education of Saskatchewan. Thirteen such nurses were employed during 1923, visiting 1,535 schools and examining 45,737 pupils. They found that 69 per cent of the children had physical defects, 11,440 children having these defects corrected as a result of the nurses' work. The most common defects found among the children were decaying teeth, unhealthy throats, defective vision and malnutrition. Besides inspecting the children at school the nurses visited 1,296 homes during the year. Their duties include giving addresses on health subjects at trustees' and teachers' conventions, interesting women's organizations in the conservation of the health of the children, meeting as many mothers as possible in each district to discuss the same subject, and giving instruction in health teaching to normal school students.

### Decasualization among longshoremen at Seattle, Washington

A system for the decasualization of longshoremen at Seattle, Washington, was adopted in 1921 and has since then been in successful operation. This plan was devised by the joint employment committee of the Joint Organization of Longshoremen and Truckers and Waterfront Employers which was established early in 1921. The organization as described in various publications which it has forwarded to the Department of Labour was formed on a plan based on recommendations of the late President Wilson's second industrial conference, an account of which appeared in the *LABOUR GAZETTE* for April 1920 on page 425. The work of the organization is conducted by various joint committees on which both the employers and workers have equal voice, the men's representatives being elected by secret ballot and the employer's representatives being appointed. The joint executive committee is composed of fifteen representatives of the men and fifteen employers' representatives. The joint employment committee is one of three standing committees elected by the Joint Executive committee. The method of decasualization adopted was by the elimination of the surplus men, the existing central registration system being used as a means of preventing the return of the "floater" who had drifted away from the waterfront. The remainder, composed of the steady men, were further reduced by stringent tests, including length of service,

family status and skill. Of the longshoremen and truckers now employed two-thirds are married men, four-fifths are citizens, and a quarter own their own homes. The joint organization next turned to the problem of unequal earnings formerly prevalent in the industry, and succeeded in establishing the "gang" system of equalized earnings, which has been in operation for about a year. Two kinds of permanent gangs were formed, company gangs working for a single company, and hall gangs held in reserve and at the call of all companies. Each company has as many gangs as it can assure of steady work, the hall gangs being available in rushes. Among the advantages of the new system are the following: the men need not waste their time waiting for a job; the despatching hall is becoming the central pay station at a saving of time for the men; employers and employees develop mutual respect; pilferage is reduced, and, lastly, the men's earnings have increased.

### Instruction of aliens by employers

The economic advantage to employers of seeing that non-English speaking immigrants learn the language of the industry of their selection within a given period after their admission to America is discussed by Marian K. Clark, formerly director of the Division of Aliens, New York State Department of Labour, in *The Nation's Health*, February, 1924. This instruction would lead to the cutting down of the cost of industrial accidents, labour turnover and wastage of materials and would remove friction due to misunderstanding of work directions. It is pointed out that normal turnover is largely increased by industrial accidents and that a large percentage of such accidents are caused by inability of the worker to understand commands. "It is estimated," says the writer, "that the turnover in industries where aliens are employed runs from 15 to 400 per cent, and an exceedingly conservative estimate of the cost of such replacement graduates from fifty to four hundred dollars per man." The system of instruction advocated is one that would give the alien a vocabulary of idioms and words in common use in the industry in which he works, somewhat of the same order as "the *Lingua-franca* of the ports of China and Far East." The author does not believe that the obligation of the employer should be construed to be one entailing education in any but an industrial sense. Each industry constitutes a different and distinct problem as to the vocabulary necessary and essential to solving its industrial problem through language instruction, and the foreign language signs and instructions are but temporary makeshifts for one can-

not communicate thoughts to another except he be understood both by language and symbol. Sixty hours is given as the time necessary to acquire an industrial vocabulary, and the cost of such instruction for a minimum of four hundred employees, it is claimed, would not exceed twenty cents per man per hour for that period.

An address by Mary N. Winslow, editor of the **Married women in industry** Women's Bureau of the United States Department of Labour, on "married women in industry" has recently been issued by the Bureau as Bulletin No. 38. It is stated that according to the United States census the number of married women gainfully employed in that country is increasing. There were 515,000, or less than five of every hundred, married women, gainfully employed in 1890, while in 1920 the proportion of married women employed was nine out of every hundred, and the total number was nearly two million. In trade and transportation and manufacturing and mechanical industries the greatest increases were shown while in domestic and personal service occupations there was a decrease of 12 per cent employed in the years 1910 to 1920; in the manufacturing and mechanical industries group, although all women employed increased only 7 per cent, married women employed increased 41 per cent, and in occupations connected with trade there was an increase of 21 per cent for all women employed and of 88 per cent among married women. In Alabama 27 per cent of the women included in a State-wide survey of wages and hours were married; in Kentucky, 19 per cent; and in Missouri, 20 per cent. Many of the married women gainfully employed were found to be working at night and many more were working in very low paid and undesirable occupations. Because of the double demand on their time they are more irregular in attendance than other employees. In a study in one town 72 per cent of the bread-winning married women had children, and about three-fourths of these women had children who were less than six years old. In one study 95 per cent of the women who were wives or mothers contributed all of their earnings to their families, and although these earnings were not as a rule large, they often brought the family income up to a level which was adequate for the maintenance of a satisfactory standard of health and education for the children. "Whatever may be the extent of their earning capacity, whatever may be the irregularity of their employment," says the writer, "mar-

ried women are in industry for one purpose and, generally speaking, for one purpose only—to provide necessities for their families or to raise their standard of living." Infant mortality studies conducted by the Children's Bureau in some localities brought out what seemed to be a fairly definite relationship between infant mortality and the employment of mothers outside of the home, although in other localities where conditions were somewhat different, either the family income higher or the women employed in different industries, this relationship seemed to be much less marked.

#### **Classes in Toronto for physically-handicapped children**

The Child Welfare Council of Toronto report that there are known to be 1,017 children under 16 years of age, of Toronto residents, whose physical condition is such as to interfere with their ability to compete with their fellows. Of these 154 have two or more defects. The total disabilities include 424 defects of the bony or muscular system, 185 defects of vision, 166 cardiac conditions, 88 defects of hearing, 84 defects of speech, 82 chest disorders, 76 nervous disorders and 77 miscellaneous defects. Congenital disabilities numbered 203, accidents and injuries at birth 67, and injuries during the first year of life 376. About 78 per cent are Canadian born children and about half live in homes free from financial worry where the parents are intelligent and careful; 420 are of British parents, 333 of Canadian, 64 of Russian, 13 of American, 12 of Italian and 41 of other nationalities. In 110 cases the nationalities of the parents are not given. Only 113 of the disabilities were found in children under six years of age and 1,046 in children of school age. All except 12 of the children had at some time received treatment for their condition. In 105 cases further treatment was required but had been discontinued mainly from reasons of parental indifference and discouragement, and escort and transportation difficulties, the treatment required in many of these cases being of an educational nature. Free treatment is provided for children whose parents are unable to pay, the Department of Health furnishing medical, nursing and dental service.

The following special classes and teachers are maintained by the Toronto Board of Education for the benefit of disabled children: one ambulance class, three sight saving classes, three open air classes, two forest schools, one lip reading teacher, four extra-mural teachers, four classes in hospitals or in-

stitutions. In addition two open air classes are maintained by the Separate School Board. Admission is upon recommendation of the Department of Public Health after examination by the school medical officer. Transportation to and from classes, except under special circumstances is provided by the parents. Teachers in the auxiliary classes are chosen for their particular ability in the training of abnormal children and have all taken the auxiliary class course at the University of Toronto. For their special work they receive \$100 a year more in salary than the regular grade teachers. The ambulance class, which was started in September, 1920, had in June, 1923, twelve pupils in attendance. It has accommodation for fifteen pupils. Special adjustable desks, cots and blankets are provided by the school where the class is held. The handicaps of the children in attendance are: cardiac conditions, 4; infantile paralysis, 4; spinal curvature, 1; tubercular spine, 1; paralysis of arms and legs, 1; deformity of foot, 1. The children only work for four hours daily, mainly at the regular school work. Various arts and crafts are taught and the proceeds from the sale of the articles is used for lunches and other luxuries. For children handicapped by defective hearing or speech lessons in lip-reading and articulation are given twice weekly in eight schools throughout the city, the first class having been started in January, 1922. At the Queen Mary Hospital for consumptive children, Weston, the Hospital for Sick Children, the Home for Incurable Children and the Preventorium, children who are well enough attend school in regular classrooms and the remainder receive bedside instruction as they are able to cope with it. In homes where the disabilities preclude children from attending school, bedside or home instruction is given by four teachers maintained by the Board of Education, but as each teacher has about fifteen pupils she is only able to give from half an hour to one hour's attention twice a week to each pupil. For pupils who are progressive myopias and others whose eyesight is so defective that they are unable to manage the regular school work without further impairment of sight classes limited to fifteen pupils are conducted in three of the city's schools, the regular work period being frequently interspersed with manual and other occupations. For each class there is an eye-testing room under the supervision of an eye specialist appointed by the Department of Public Health. The two forest schools are in session throughout the summer months from May to October. The work of the regular grades is followed in open air class rooms. A hot

dinner is provided at noon and a lunch of milk or cocoa and biscuits in the morning and afternoon. After dinner each child is required to rest for two hours on a cot under the trees. The Department of Health supplies cots, clothing, food and kitchen staff and the medical, dental and nursing services for these schools.

With regard to vocational education, it is stated that one child with defective sight and one with defective hearing are attending high school; two with infantile paralysis are at the High School of Commerce; one boy is at the Technical School and one is receiving private tuition in preparation for an architect's career. With these exceptions, no attempt at vocational training is noted although it is claimed that the need for some special preparation is expressed in several cases.

**Civic employees under workmen's compensation** at Brandon, Man., met a committee of the city council last month to discuss the union's proposal that the city should supplement

the payments made by the Workmen's Compensation Board so that the employees should receive the full amount of their wages while disabled. The Workmen's Compensation Act in a case of total disability allows an amount equal to 66 $\frac{2}{3}$  per cent of the average earnings of the injured worker. The civic union representatives claimed that owing to the low civic wage scale injured employees could not keep their families on that proportion of their wages, and asked that the city add another 33 $\frac{1}{3}$  per cent of wages to the Board's payments. It was stated as against the employees' claim that the city of Brandon paid \$3,500 last year in premiums to the Board on behalf of the civic employees, and that only three or four slight accidents had occurred during the period covered. The employees also asked for a sick benefit of three weeks' full pay each year during sickness. Both requests were referred to the city council for consideration.

**Infant death rate reduced at Thetford Mines**

A pamphlet just issued by the Metropolitan Life Insurance Company of New York, entitled "Assuring Life by Insuring Life" contains the following paragraphs showing how the rate of infant mortality in a Canadian town was reduced as the result of an experiment conducted by the company during the past three years:

The high rate of infant mortality in French Canada caused the Company, in 1921, to undertake a demonstration in child welfare intended to prove that this

waste of child life was needless. After a careful survey, the town of Thetford Mines, an asbestos mining centre in the province of Quebec, was selected as the seat of the experiment. A French-speaking nurse with extensive experience in maternity centre work was placed in charge and assigned a staff of two other French-Canadian nurses and later a physician, all of whom were given special training in New York city. As a result of the three-year experiment, the infant death rate in Thetford Mines has been reduced from 333 per 1,000 to 96.4 per 1,000.

Another gratifying outcome of the experiment has been that because of the results obtained in Thetford Mines, the provincial government of Quebec has appropriated \$500,000 to be used during the next five years in child welfare work in the province.

### Great Britain and the eight hour day convention

In the course of an interview which a deputation from the League of Nations Union in Great Britain had with the Prime Minister and Lord Parmoor, Minister in charge of all League of Nations matters, the latter expressed his belief that the present British Government would ratify the Draft Convention which was adopted at the First Session of the International Labour Conference (1919) providing for an eight-hour day and forty-eight hour week in industrial employment.

### Social legislation in Brazil

A comprehensive bill providing for the regulation of conditions of labour in industry and commerce covering such questions as hours of labour, weekly rest and holidays, child labour, women's work, pensions, health and safety, factory inspection, etc., has been introduced in the Brazilian Parliament as the result of a special investigation which was made by a legislative committee which has been in progress since 1917. In putting forward their proposals, the committee state that they have sought to meet the essential needs of the Brazilian workers. The question, they add, is not one of innovation or rash experiment but of following on general lines the example set already by almost all civilized peoples, and of fulfilling the international obligations which have been assumed by Brazil. The bill in question comprises almost practically a complete code of labour legislation covering much of the same ground as the Conventions and Recommendations which have been adopted at the five annual sessions of the International Labour Conference and seemingly deriving much of its inspiration from them.

The thirteenth annual labour report of the Bureau of Census and Statistics of the Australian Commonwealth shows that 445 industrial disputes occurred in Australia in 1922, involving

116,332 workpeople, and entailing an estimated loss in wages of £751,507. From 1918 to 1922 there were 2,381 disputes, involving 651,029 workpeople, and the loss of 10,575,468 working days. The estimated loss in wages in this period was £7,056,331. The number of unemployed members of trade unions reporting to the bureau was high during the year and averaged 9.3 per cent.

The average cost of food, groceries, and house rent in the six capital cities was 5.7 per cent, less in 1922 than in the immediately preceding year. Compared with 1911, the index number for the year 1922 shows an increase of 60 per cent. Wholesale prices declined during the year by 7.6 per cent, but were still 75.8 per cent higher than in 1911.

The average nominal rate of wage for Australia fell during 1922 from 94/6 to 91/6, but as the result of the decrease in the cost of living as measured by the cost of food, groceries, and house rent, the effective or real wages were higher in 1922 than in 1921, and are now 12.6 per cent higher than in 1911.

The results of investigations concerning organization among employers are given, and show that there are 467 such organizations with 51,706 members. Another investigation made by the bureau discloses the fact that there are about 365 co-operative societies in Australia, and that the total loan and share capital of these societies amounted to approximately £5,500,000, and the total sales to over £40,000,000.

The Minister of Immigration and Colonization announced in the House of Commons on March 12 that by an arrangement with the Government the trans-Atlantic steamship companies had agreed to give a rebate of 20 per cent of the passage money to immigrants from Great Britain who declared their intention to settle in Canada. The immigrant pays his full fare at the point of embarkation and on reaching a Canadian port receives back from the company the amount of the rebate.

In the March Issue of the LABOUR GAZETTE (page 209) it was announced that a commission had been appointed to inquire into the causes of an accident in the Inverness coal mine of February 7 when four miners lost their lives while removing railroad pillars. The report of the commission shows that greater precautions could not have averted the accident, but while the fatality might have been unavoidable, the commissioners were in agreement with the opinion of the miners that the method in vogue in the Inverness mines in the removal of railroad pillars is attended with more hazards to the

workmen than safe mining practice would justify. Other phases of mining operations in these mines are dealt with in the report.

A proposed amendment to the Workmen's Compensation Act of Ontario reconstituting the Board by the appointment of an administrator and board of review, was mentioned in the last issue of the *LABOUR GAZETTE*. A bill to this effect was introduced as a government measure, but it was withdrawn on March 28, in deference to the expressed wishes of employees' organizations. Several other bills to amend the act will be outlined in a future issue in connection with the legislative work of the session. The administration of the Act was transferred on January 14 from the provincial Department of Labour to the Attorney-General's Department, the original conditions in this respect being thus restored.

According to press reports the commission which has been investigating the subject of Workmen's Compensation in the province of Quebec for the past six weeks will be ready to present a preliminary report next September. The appointment and inquiries of this commission have been noted in previous issues of the *LABOUR GAZETTE*. Investigations have already been held at Montreal, Three Rivers, Sherbrooke and Quebec, and the commission intend, it is stated, to visit Chicoutimi and other centres in the course of the coming summer.

The factory inspection branch of the province of Ontario report 1,346 industrial accidents for the quarter ending March 31, 1924. Of these 420 occurred in January, 429 in February, and 497 in March. There were 11 fatal accidents reported. In the metal trades there were 490 persons injured; in the pulp and paper trades, 409; in transportation, 146; and in the textile industry, 70. Machinery and its connections was responsible for 370 of the accidents, 7 of the fatalities being due to this cause. Falling substances caused injuries to 251 persons, death resulting in one instance. One fatality was caused by an elevator, one by being run over by a train, and one by being jammed between articles. Falls accounted for injuries to 169 persons, being crushed between articles for injuries to 101 persons, hand tools for injuries to 94 persons, burns and scalds for injuries to 94 persons, sprains and strains for injuries to 88 persons, and flying missiles for injuries to 51. There were 56 cases of infected wounds, and 21 injuries due to "foreign substances in eyes."

At a meeting of the Edmonton Trades and Labour Council on March 17, a communication was read from Mr. J. A. Kinney, com-

missioner of the Alberta Workmen's Compensation Board, with reference to recent complaints that reflected upon the administration of the Board in certain cases. The commissioner gave a complete report on all the cases, showing that the Board had fully carried out the provisions of the act, and maintained that the complaints referred to were unfounded. Mr. Kinney's statement was approved by the Council, and copies of it were ordered to be sent to all persons interested in the several cases.

The Laurentide Company, of Quebec, are allowing six days' vacation with pay during the present year to all their employees working by the hour who were in their employ for at least five years prior to January 1. The vacation must be taken continuously, subject to a mutual arrangement between the superintendents and the men. Holiday pay may be drawn in advance, a tour workman receiving 48 hours' pay and a day worker 54 hours' pay at the rate current at the time when the vacation is taken.

The General Council of the Trades Union Congress of Great Britain has organized a superannuation society to carry on the business of providing pensions, annuities and superannuation allowances for persons who are employed for full-time by trade unions. Contributions will be paid, half by the employing body and half by the employee. Annuities will be based on the average salary upon which contributions have been paid, and will be at the rate of one-sixtieth of such average salary multiplied by the number of years of service. Organizations which are already providing superannuation may arrange for the incorporation of their own systems in the Trade Union Congress Superannuation Society.

The city council of Edmonton, Alberta, lately refused to agree to a proposal to permit stores to remain open until 9 o'clock on Saturday nights. Some of the storekeepers had petitioned for permission to continue business after 6 p.m., the hour fixed for the closing of stores by a by-law under the Early Closing Act (Revised Statutes of 1922, chapter 127), on the ground that farmers during the busy season could not reach the city during the hours now prescribed, and that many working people were free only after 6 o'clock.

The city council of Victoria, British Columbia, is considering a by-law to alter the closing time of stores from 6 to 5 o'clock as a substitute for daylight saving. It is not proposed to pass the by-law unless the merchants of the city should favour it.

The Police Commission at St. Catharines, Ontario, recently declined to grant a request by members of the local police force for shorter hours on the ground that conditions were not favourable and that the present staff was insufficient to permit such a change.

The Calgary city council have fixed the amount of the annual license fee for master plumbers in the city at \$10, to be retroactive to the beginning of the present year. The master plumbers had proposed an initial license fee of \$25, with a subsequent annual fee of \$5.

A conference has been called by the provincial secretary of Ontario in order to obtain the opinion of various bodies in regard to a farm for boys which it is proposed to establish at Bowmanville, Ontario. The Toronto Trades and Labour Council is represented by two delegates.

A travelling scholarship of the value of \$1,500 has been offered by the Royal Canadian Academy of Arts to Canadian architects, with the object of encouraging an understanding by architects of mural decoration, sculpture, ornament and craftsmanship. The scholarship is restricted to Canadian citizens of at least six years residence in Canada and not over 30 years of age.

The number of creameries in operation in Saskatchewan in 1923 was 65, as compared with 59 in 1922, 55 in 1921, 48 in 1920 and 21 in 1914. The quantity of creamery butter manufactured was 10,867,010 pounds in 1923 and 2,716,400 in 1914. Four cheese factories were in operation at the close of the year, the production of cheese being 128,352 pounds. Three of these factories were opened during the year. The first cheese factory began work in 1918 with a production of 13,573 pounds in that year.

At a meeting of a committee of the Canadian Red Cross Society held at Toronto during March it was reported that the home nursing classes organized by the Society toward the close of 1923 had accomplished considerable work during the first two months of the present year. Thirty-two home nursing classes have been formed throughout Ontario and are now in operation, each class consisting of 15 or 20 young women and mothers of families.

The British Unemployment Insurance Act, 1924, passed both Houses of Parliament without amendment, and received the Royal

Assent on February 21. It came into force on the same day. The act abolishes from that date the three weeks' interval without benefit, which had previously been imposed in cases where twelve weeks' uncovenanted benefit had been drawn in the first benefit year.

The Chamber of Commerce of Los Angeles, California, conducts each year an "Industrial Safety School" for superintendents and foremen. This year the class began February 6 and weekly meetings were held every Wednesday afternoon up to March 26. The programme included the following subjects: "Industrial Safety" "Plant Sanitation and Personal Hygiene" "Guards and Safety Devices," "Eye Protection and Safe Clothing," "Fire Prevention in Relation to Industry," "Plant Arrangement and Safe Handling of Materials," "Electrical Hazards and Safe Practices," "The Foreman," "New Employee," and other practical topics.

The Association of Commerce, fire prevention section, Milwaukee, Wisconsin, conducted for the second year a school for watchmen in which was given practical instruction in the duties of building watchmen, including fire alarms, first aid, self protection and sprinkler systems, by means of addresses, demonstrations, exhibits, and otherwise. The school met on alternating Tuesdays from March 4 to April 15. It has been designed especially for watchmen, fire inspectors, stationary engineers, members of company fire departments, and others interested in the problem of fire prevention.

It is announced that through the generosity of the American Museum of Safety, the New York State Department of Labour is enabled to offer prizes to employers and workers throughout the state for successful participation in an industrial accident prevention campaign from March 1, 1924, to June 1, 1924. Ten prizes of \$25 each are offered to employers of factories or mercantile establishments for the best suggestion for the prevention of industrial accidents and disease; two prizes of \$50 each to foremen of factories who have initiated and conducted in their factories the most successful campaign for the prevention of industrial accidents and disease. In addition eight certificates are offered to employers of labour for the most successful accident campaign conducted in their factories. The data to be submitted shall be for a period of any three of the months, February, March, April and May, 1924.

## GENERAL REVIEW OF THE INDUSTRIAL SITUATION

### The Labour Situation, Strikes, Prices

#### The Labour Situation

VERY little change in employment on the whole was reported by employers of labour at the beginning of March; expansion in some industries tended to offset contractions in others with the result that the index number remained practically the same as at the beginning of the preceding month. The situation continued to be better than during the corresponding period of the three preceding years.

At the beginning of March the percentage of unemployment among members of trade unions stood at 7.8 as compared with 7.5 per cent at the beginning of February and 6.4 per cent at the beginning of March, 1923.

The offices of the Employment Service of Canada reported increased transactions during the month of February, 1924, the volume of applications, vacancies and placements being considerably larger than during January and during the corresponding period a year ago.

The following is a survey of employment conditions at the end of March, 1924, as reported by the superintendents of the offices of the Employment Service of Canada.

As yet, few opportunities in farming were reported to the Service in the Maritime Provinces. The spring activities in construction had not yet opened up, but improvement in this group was shown. However, large numbers of workers were registered as unemployed at the offices. Logging continued brisk, though with the approach of mild weather a slight slackening in demand may be expected. The manufacturing industries were quiet. Demand for women in institutional work has been active, with a decreasing number of calls for casual work.

In Quebec Province little activity was shown in the agricultural group, one office only reporting orders for farm help. The lumbering industry showed decreased employment, with no expansion anticipated until the opening of the river driving season. Manufacturing industries were quiet, especially in Montreal. Employment offered in the building and construction industries showed a slight increase, especially for plasterers and pipefitters and painters. Casual work on the city streets employed a number of men. A fair demand for domestic workers was reported, especially at Montreal, with little difficulty in supplying workers.

The superintendents in Ontario reported a large increase in the employment offered on farms, the orders calling for experienced work-

ers both married and single. A slight increase was shown latterly in the vacancies available in building and construction, with a further expansion in prospect as soon as warm weather approaches. Casual work was offered in less volume than formerly. The winter logging season was drawing to a close and further demands for workers were not expected until river driving commences. The mining industry was quiet. No material change was shown in manufacturing, the reports indicating a slight betterment within the next few weeks, especially in the auto, sheet metal and textile industries. Signs of the opening of navigation were apparent and a brisk season is anticipated.

In Manitoba the improved employment conditions were a reflection of the continued calls for farm workers. A nominal demand for bushmen for the spring cut was reported, but with the end of the season in view a decided shrinkage was shown. Little work was available in the construction group, with a good outlook for employment in the future. The demand for household help increased considerably, both for city and country employment, and a decided increase in placements resulted. There was a nominal call for hotel and restaurant help.

Saskatchewan offices showed an accelerated demand in the agricultural group with the number of applications and placements increasing accordingly. There was continued slackness in the construction group, although a preliminary survey would indicate that a considerable amount of work would start when the weather permits. Curtailment of logging operations was reported. The rural districts were insistent in the calls for household workers, while placements in regular and casual work in the cities continued in approximately the same volume as formerly.

In Alberta further increases were shown in farm requirements, this group forming a large part of the business of the offices. Activities in other groups were at a minimum. Temporary employment was available for a number of men on sewer work and alteration and repair jobs. Experienced loggers were found with difficulty to satisfy the small number of orders received.

In British Columbia only a small demand for farm workers was felt. The construction groups remained inactive, and numbers of skilled building mechanics and labourers were unemployed, especially at the larger centres. With the opening of spring construction the

majority of these will be employed. Lumbering operations showed a considerable expansion, owing to the milder weather, several workers being transferred from the prairie provinces to fill the vacancies. The manufacturing industries were steady, mining quiet, while work along shore was fairly brisk.

On the whole practically no change in the situation since the preceding month was reported by employers at the beginning of March. An almost stationary situation had also been indicated at the same period of last year. Manufacturing as a whole reported improvement on March 1, 1924. Communication, metallic ore mining, shipping and stevedoring, highway and railway construction also afforded increased employment. Logging showed seasonal declines; coal mining, steam railway transportation and building construction recorded further curtailment of operations. Employment in Quebec and British Columbia showed expansion, while in the remaining provinces the trend was downward. In the Maritime Provinces the greatest losses occurred in coal mining and logging, but rolling mills were decidedly busier and steam railways afforded increased employment. In Quebec manufacturing showed considerable improvement and railway construction employed a larger number of men than at the beginning of February. On the other hand, logging and building construction were decidedly slacker. Varying tendencies were evidenced in different divisions in Ontario; iron and steel and several other branches of manufacturing were more fully employed. Communication and railway construction also recorded larger working forces. On the other hand, textile factories, logging camps and steam railways reported the release of a large number of workers. Contraction in three industries principally caused the decline in the Prairie Provinces—coal mining, railway transportation and construction. In British Columbia there was an increase in employment of 4.6 per cent, of which the greater part was recorded in logging, shipping and stevedoring, highway and railway construction and maintenance. Three of the six cities for which separate tabulations are made, Montreal, Ottawa and Vancouver, reported moderate improvement, while Toronto, Hamilton and Winnipeg registered lessened activity. The textile, iron, steel and telephone industries in Montreal reported increased employment, but rubber, tobacco and building construction showed contractions. In Toronto the greater part of the decrease occurred in textile and printing establishments;

musical instrument works were also slacker and employment on street railways declined. On the other hand, telephones, iron, steel and non-ferrous metal works reported larger working forces than at the beginning of February. The only change of any size shown by the firms making returns in Ottawa was an increase in employment in pulp and paper mills; apart from this, a moderately downward tendency was in evidence. Considerable improvement was reported in iron and steel plants in Hamilton, but this increase in personnel was not sufficient to offset declines in textiles, tobacco and building construction. The changes in Winnipeg were not marked; printing works and construction reported the largest decreases, in each case affecting less than 100 workers. A pronounced increase in employment in shipping and stevedoring in Vancouver accounted for most of the improvement in that city. An analysis of the returns by industries shows that manufacturers increased their payrolls by practically 4,000 workers or 1 per cent. Sawmills, furniture, wooden vehicle, sugar, confectionery, rubber, rolling, forging, agricultural implement, automobile, steel shipbuilding, heating appliance, structural iron, sheet metal, lead, tin, zinc and copper works reported considerable expansion. On the other hand, musical instrument, garment, cloth, tobacco, brewing and electric current plants employed smaller payrolls than at the beginning of February. Logging showed considerable curtailment of a seasonal character, in which all provinces except British Columbia shared. Employment in coal mining in the Prairie and Maritime Provinces was reduced, repeating the movement indicated at the same time of last year. Other branches of mining, however, showed moderate improvement. Steam railway operations in Ontario and the Prairie Provinces registered substantial decreases; shipping and stevedoring in British Columbia was more active than in the preceding month. There were larger losses in building construction, but moderate increases in highway and railway construction and maintenance. Trade, both wholesale and retail, afforded slightly less employment.

An article elsewhere in this issue gives in some detail the employment situation as at the beginning of March, 1924.

The change in the trade union situation at the end of February was very slight according to reports received from 1,492 labour organizations with a membership of 155,546 persons, 7.8 per cent of the members being

TRADE  
UNION  
REPORTS

out of work compared with 7.5 per cent at the end of January. More unemployment was also shown than at the close of February, 1923, when the percentage of idle members stood at 6.4. (Unemployment as used here has reference to involuntary idleness due to economic causes. Persons engaged in work other than their own trades, or who are idle because of illness, or as a direct result of strikes or lockouts are not considered as unemployed. As the number of unions making the returns varies from month to month with consequent variation in membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.) Unions in Nova Scotia, New Brunswick, Quebec and Saskatchewan reported more employment than at the end of January, the largest percentage of gains being shown in Nova Scotia and Quebec. The improvement in Quebec was due mainly to increased work for road maintenance men and employees in the building group. In the remaining provinces small reductions were reported. In comparison with the returns for February of last year unions in Nova Scotia, Manitoba and Saskatchewan reported smaller percentages of idleness, but in the other provinces the situation was slightly less favourable. In the manufacturing industries, as reported by 413 organizations, with a membership of 46,584 persons, 7.0 per cent of the members were out of work as compared with 6.7 per cent at the end of January. Garment, leather, jewellery and glass workers and butchers were all more fully engaged, but employment for pulp and paper mill, furniture and iron and steel workers, metal polishers and printing tradesmen was on a lower level. A less favourable situation was shown by workers in the manufacturing group than in February of last year. Coal miners in Nova Scotia were busier than at the close of January, but miners in Alberta and British Columbia registered lessened activity. Quarry workers in Nova Scotia and asbestos miners in Quebec reported no idle members. In the building and construction group employment was on a slightly lower level than in January of this year and also than in February, 1923. Less work, than in January, was afforded steam shovel and dredgemen, bricklayers, masons and plasterers, plumbers and steamfitters, tile layers, lathers and roofers, but bridge and structural iron workers, electrical workers, granite and stone cutters, painters, decorators and paperhangers, hod carriers and building labourers and carpenters and joiners were better employed. The 568 unions in the transportation group, from which reports were re-

ceived, with a membership of 54,123 persons showed a slightly smaller percentage of their members out of work than in January, navigation workers, street and electric and steam railway employees all being more fully engaged. Retail shop clerks were not so busy. Fishermen reported increased employment. Lumber workers and loggers showed no idleness. Hotel and restaurant employees, theatre and stage employees, barbers and stationary engineers and firemen were not so active.

**EMPLOYMENT OFFICE REPORTS**

During the month of February, 1924, the offices of the Employment Service of Canada made 40,389 references to employment, and effected a total of 38,947 placements. The placements in regular employment during the period numbered 13,249, of which 10,641 were of men and 2,608 of women, while the number in casual work was 25,698. Applications for employment registered at the offices totalled 49,915, of which 41,669 were from men and 8,246 from women. Vacancies reported by employers totalled 41,016, of which 34,437 were for men and 6,579 for women. A comparison of the reports for this month with those of the preceding month shows a considerable expansion in business, particularly in the volume of casual work. In contrast with February, 1923, also, a very marked increase in business is shown. A report in detail of the work of the offices for the month of February, 1924, may be found elsewhere in this issue.

**BUILDING PERMITS AND CONTRACTS AWARDED**

According to the Dominion Bureau of Statistics, the value of building permits issued in 56 cities during February, 1924, showed a decline to \$3,657,525 from \$4,021,088 in the previous month and from \$5,599,821 in February, 1923.

According to the *MacLean Building Review*, issued by MacLean Building Reports, Limited, the value of the contracts awarded in Canada during March, 1924, amounted to \$11,584,500, of which \$10,282,800 was for building construction, as compared with \$21,249,000 in February, last, and \$19,954,000 in March, 1923. The following values are included in the total awards for March, 1924:—

Apartments . . . . .	\$ 273,000
Churches . . . . .	971,000
Factories . . . . .	576,500
Public garages . . . . .	199,300
Hospitals . . . . .	255,300
Hotels and clubs . . . . .	124,000
Office buildings . . . . .	671,000
Public buildings . . . . .	93,700
Residences . . . . .	4,251,900
Schools . . . . .	\$1,635,000
Stores . . . . .	463,700
Theatres . . . . .	10,000

Warehouses .. . . .	758,400
Bridges .. . . .	500,700
Dams and wharves .. . . .	88,800
Sewers and water mains .. . . .	260,100
Roads and streets .. . . .	96,700
General engineering .. . . .	265,400

The activity was distributed among the provinces as follows: Ontario, \$5,749,000; Quebec, \$4,356,500; British Columbia, \$750,400; New Brunswick, \$245,800; Alberta, \$201,400; Manitoba, \$150,100; Saskatchewan, \$77,500; and Nova Scotia, \$53,800.

#### PRODUCTION REPORTS.

The Dominion Bureau of Statistics reports that the production of pig-iron in Canada during February, 1924, was 60,288 long tons, a decline of 3,414 tons from the 63,702 tons produced in January. The output of basic pig-iron rose 32 per cent to 19,126 tons but there was no malleable iron produced. The production of ferro-silicon was 2,689 tons, a drop of 7.6 per cent from the 2,910 tons produced in January. During the month, two additional furnaces were blown in at Sydney, Nova Scotia, resulting in seven furnaces being in blast at the end of the month including two at Hamilton, Ontario, two at Sault Ste. Marie, Ontario, and three at Sydney, Nova Scotia.

The total production of steel ingots and castings in Canada during February was 70,953 tons, an advance of 72 per cent over the 41,309 tons produced in January. The increase was almost wholly in open-hearth basic steel ingots made for the use of the producers, the output of this grade amounting to 68,002 tons or 76 per cent over the 38,606 tons of January. In addition, 102 tons of alloy steel ingots was produced. The production of steel castings amounted to 2,489 tons as against 2,703 tons in January. While the production in February was slightly below the average monthly output for 1923, it marked a decided advance over the tonnages produced during the corresponding month of the last three years.

A report from the Department's correspondent at Cobalt states that fourteen cars of silver ore were shipped during March from the Cobalt camp, containing 1,088,620 pounds of ore, as compared with fourteen cars containing 975,792 pounds of silver ore in February. The Nipissing mine shipped 264 bars containing 301,738.06 ounces of silver, and The Mining Corporation of Canada shipped 152 bars containing 152,211.04 ounces of silver, making a total of 416 bars containing 453,949.10 ounces of silver shipped during March, as compared with 405 bars containing 456,784.59 ounces in the previous month.

A report from the British Columbia For-

estry Branch shows that 174,164,649 feet, board measure, of timber was scaled in the province during February. The total includes Douglas fir, 71,459,172 feet; red cedar, 43,809,403 feet; spruce, 14,371,494 feet; hemlock, 18,490,805 feet; balsam, 3,407,571 feet; yellow pine, 509,867 feet; white pine, 278,360 feet; jack pine, 9,566,675 feet; larch, 3,388,740 feet; cotton wood, 217,374 feet; birch, maple and cypress, 1,058,548 feet; and other species, 7,606,640 feet.

The gross earnings of the Canadian National Railways, including affiliated lines in the United States, according to a preliminary statement issued, amounted to \$17,784,518 in February, 1924, as compared with \$16,163,823 in February, 1923.

The gross earnings of the Canadian Pacific Railway for February were given in a preliminary statement as \$13,083,123 in comparison with \$11,159,865 in February, 1923.

#### FOREIGN TRADE.

A summary of Canadian Trade prepared by the Department of Customs and Excise shows that in February, 1924, the merchandise entered for consumption amounted to \$62,133,882 as compared with \$65,307,696 in February, 1923. There was an increase of \$9,597,382 in the value of domestic merchandise exported which amounted to \$67,274,543 in February, 1924, compared with \$57,656,161 in the corresponding month of the previous year. For the eleven months ending February, the grand total of Canadian trade was \$1,771,351,283 in 1924 as compared with \$1,578,162,778 in 1923. The chief imports in February, 1924, were fibres, textiles and textile products, \$14,723,974, iron and its products amounting to \$10,786,007, non-metallic minerals and products amounting to \$9,001,159, and agricultural and vegetable products, mainly foods, amounting to \$8,550,718. The chief exports during the same months were in the group of agricultural and vegetable products, mainly foods, which amounted to \$21,411,798, the next being wood, wood products and paper, amounting to \$19,825,505, followed by animals and animal products to the value of \$8,973,261 and non-ferrous metals and their products to the value of \$6,319,140. During the eleven months of the fiscal year ending with February, 1924, exports of agricultural and vegetable products, mainly foods were valued at \$365,760,622, exports of wood, wood products and paper amounted to \$246,107,591, exports of animals and animal products amounted to \$130,576,503, exports of iron and its products amounted to \$52,044,688, and non-ferrous metals and their products to \$57,032,481.

### Strikes

Time loss due to industrial disputes reported to the Department during March was less than during either February, 1924, or March, 1923. There were in existence at some time or other during the month 12 disputes, involving 765 employees and a time loss of 11,056 working days, as compared with 16 strikes in February, involving 11,518 workpeople and a time loss of 101,968 working days. In March, 1923, there were recorded 19 disputes involving 1,533 workpeople and a time loss of 33,229 working days. Two new strikes commenced during March with a time loss of 81 working days. One of the strikes commencing prior to March and both of the strikes commencing during March terminated during the month. At the end of the month, therefore, there were nine strikes involving 427 workpeople.

### Prices

Retail food prices were down somewhat from the levels reached in February. The decline was due mainly to a seasonal fall in the price of eggs. The cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average retail prices in some sixty cities was \$10.58 at the beginning of March as compared with \$10.75 for February; \$10.79 for March, 1923; \$10.54 for March, 1922; \$13.23 for March, 1921; \$16.92 for June, 1920 (the peak); \$15.98 for March, 1920; \$12.66 for March, 1918; and \$7.68 for March, 1914. Prices of eggs, cheese, pork, bacon, lard, beef roast, prunes and rolled oats were lower while prices of potatoes, sugar and mutton averaged higher. Including the cost of fuel and rent with that of foods the total budget averaged \$21.00 at the beginning of March as compared with \$21.18 for February; \$21.42 for March, 1923; \$20.96 for March, 1922; \$23.87 for March, 1921; \$26.92 for July, 1920 (the peak); \$25.01 for March, 1920; \$20.00 for March, 1918; and \$14.35 for March, 1914. Fuel and rent were steady.

The movement of wholesale prices as indicated by the index number of the Dominion Bureau of Statistics was downward. The figure for March was 154.1 as compared with 156.6 for February; 155.9 for March, 1923; 153.6 for March, 1922; 186.4 for March, 1921; 256.9 for May, 1920 (the peak); 241.1 for March, 1920; and 200.2 for March, 1919. In the grouping according to chief component material the Animals group and the Textiles group were both substantially lower while the Wood group and the Iron group showed smaller declines. The Vegetable group, the Non-Ferrous Metals group and the Chemicals group each advanced slightly while the Non-Metallic Minerals group was unchanged from the February level.

The index number based upon prices of 271 commodities in 1890-1899 as 100, published by the Department of Labour since 1910 declined slightly to 224.5 for March as compared with 224.9 for February; 225.7 for March, 1923; 225.6 for March, 1922; 263.1 for March, 1921; 356.3 for May, 1920 (the peak); 349.0 for March, 1920; 269.2 for March, 1918; and 137.0 for March, 1914. Declines occurred in dairy products, grains, fish, miscellaneous groceries, hides and leather, iron and steel, paints, oils and glass, and in chemicals while animals and meats, fruits and vegetables, textiles, metals and raw furs averaged higher. There were, however, substantial declines in the prices of dressed hogs, salt pork, beans, raw cotton and raw silk.

The special index of fifty commodities selected from the 271 in the Departmental list declined to 152.1 for March as compared with 155.1 for February; 156.2 for March, 1923; 148.1 for March, 1922; 174.3 for March, 1921; 260.5 for May, 1920 (the peak); 241.0 for March, 1920; and 101.9 for March, 1914.

Professor Michell's index of forty articles declined to 176.9 for March as compared with 180.1 for February; and 179.2 for March, 1923. Both foods and manufacturer's goods were lower.

## PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907, DURING THE MONTH OF MARCH, 1924

**D**URING the month of March the Department received two applications for the establishment of Boards of Conciliation and Investigation, as follows:—

(1) From employees of the cities of Fort William and Port Arthur in street railway service being members of Division 966, Amalgamated Association of Street and Electric Railway Employees of America. The two corporations declared they would offer no opposition to the appointment of a Board and a Board was established, the following members being appointed: Mr. Hugh M. Piper, Fort William, chairman, appointed on

the joint recommendation of the other two members, Messrs. J. P. Jones and J. R. Pattison, both of Fort William, nominees of the employers and employees respectively. The award of this Board covering the matters in dispute was received early in April. The text of the award is given below.

(2) From various shipping companies trading to the port of Montreal, members of the Shipping Federation of Canada, with reference to a dispute with certain of their employees, members of the Syndicated Longshoremen of the Port of Montreal.

### Award of Board in Dispute between the Cities of Port Arthur and Fort William, Ontario, and their Electric Railway Employees

An award was received from the Board established to deal with the dispute between the cities of Port Arthur and Fort William, Ont., and certain of their employees being members of the Amalgamated Association of Street and Electric Railway Employees of America, Division 966. The Board was composed of Mr. H. M. Piper, chairman, appointed on the joint recommendation of the other two members, Messrs. J. P. Jones and J. R. Pattison, nominees of the employers and employees respectively. The award, which was unanimous, was in the form of a draft agreement, the text of which is as follows:—

#### AGREEMENT

THIS AGREEMENT entered into (in duplicate) this fifth day of April, 1924, between the cities of Port Arthur and Fort William, Ontario, (hereinafter called the parties of the first part), and Division 966, Amalgamated Association of Street and Electric Railway Employees of America, and all other employees of the street railway department (hereinafter called the "employees" of the second part).

1. It is agreed between the parties of this agreement that the following clauses shall contain and define working conditions and wages of the cities of Port Arthur and Fort William street railway.

2. *Goodwill.*—The managers will be willing at all times upon reasonable notice being given by the employees to interview the employees or any committee of them duly appointed, on any subject or matter for the mutual benefit of the employees and the cities in its relation to the general public.

3. *Discrimination.*—That the management does not object to any employee being a member

of any street railway or other union, and will not discriminate against any employee because of his connection with the same. The employees, on the other hand, collectively or otherwise, will not in any way interfere with or limit the management's rights or the right of any officer so authorized to discharge or discipline any employee where sufficient cause can be shown.

4. *Disputes.*—Any employee who feels that he has been unjustly disciplined, suspended, superseded or discharged, shall have the right to have his case investigated, if he so desires, by a committee of the employees and the managers. In the event of disagreement between the employees as appointed and the manager, then shall the evidence of both these parties be put in writing and submitted to the Commission, whose decision shall be final. Should the employee so disciplined, suspended, superseded or discharged be exonerated by the Commission, then he shall be paid for lost time and reinstated forthwith.

5. *Reference.*—Any employee who has been six months or more in the service, on leaving of his own accord and giving reasonable notice prior to his leaving shall, upon application for same, be furnished with a reference as to length of service, character and ability while in the service. This reference shall be embodied on the department's official letter-heads and shall bear the signature of the manager or other authorized officer.

6. *Discharge.*—Any employee having been discharged shall be furnished, upon his request, with a letter stating why discharged and previous record to his having been discharged.

7. *Leave of Absence.*—Reasonable leave of absence will be granted any employee without remuneration. Any employee taking employment for wages during his leave of absence will forfeit his standing on the seniority list, unless permission has been given him on mutual agreement between the employees and the manager. Any service, however, that the employee may be called upon to render in a representative manner on behalf of his fellow employees shall not be considered as covered by the word "employment" as used herein and upon his return to the service such employee shall be entitled to his former position on the seniority list. It is understood that at no time leave of absence will be granted for a period exceeding three months except in case of sickness or other extenuating circumstances.

8. *Tickets and Change.*—Each operator, after approval, will be provided with the amount of thirty dollars (\$30) to cover tickets and change monies in the operation of the cars. Such advance of thirty dollars (\$30) to be returned to the department on notice or when operator leaves the service.

9. *Seniority.*—The seniority list shall be compiled such that each individual employee will be placed in accordance with his term of continuous service in the department. Each employee shall be entitled to choose his run in accordance with this seniority list, the preference of runs commencing with the oldest employee in the continuous service of the department. All runs shall be posted for employees to make their selection as to the run they desire once in every three months, commencing January 1, or at any time the management may desire. The proposed schedule shall, whenever possible, be posted up not less than four days before going into effect. Any run made vacant by sickness, leave of absence, suspension, resignation or discharge, for a period not exceeding three months shall be filled by the senior spare man. Should any employee fail to report for duty at the appointed time, the same not being his first offence, he shall at the discretion of the manager or other officer so authorized by him, be placed on the spare list for a period, this period to be graduated according to the nature of the offence, but in no case to exceed at any one time seven days.

10. *Extra Work.*—That all extra work be divided as evenly as possible amongst the spare men. In no case shall regular men be given extra runs when spare men are available, in so far as this does not interfere with the operation of the department as outlined in clause 9 of this agreement.

11. *Payment of Wages.*—Employees shall be paid for services semi-monthly on the tenth and twenty-fifth day of each month as far as ever possible. If, however, the above dates should fall on a Sunday or a holiday, payment may be made on the day previous to such date if proper arrangements can be made so to do.

12. *Working Hours.*—Working hours shall be in accordance with the requirements of the Ontario Statutes governing street railways.

13. *Wage Schedule, Transportation Department.*—

First six months.. . . .	45c. an hour
First 18 months spare.. . . .	48c. "
Over 2 years.. . . .	50c. "

Operators of one-man cars to receive, in addition to the above rates, 7½ cents per hour. Time will be paid from regulation time for reporting, and it is agreed that sufficient time will be allowed from time of reporting at car barns or head office to time of taking the car. It is further agreed that time and one-half will be paid all transportation employees on their regular day off, also the following legal holidays, if called to duty, namely, New Year's Day, Good Friday, 24th of May, Dominion Day, Civic Holiday, Labour Day, Christmas Day and Thanksgiving Day. Straight time will be paid for overtime. Operators taking out extra, special or work car shall not be paid for less than three hours. All time in excess of the afore-mentioned three hours to be paid as straight time. Should operators, after being requested to report for duty by the proper official and after reporting, be not required for that particular duty, they shall receive two hours' pay at the above rates.

CAR BARNS

Carpenter.. . . .	62c. per hour
Painter.. . . .	58c. "
Machinist.. . . .	62c. "
First-class pitman.. . . .	57c. "
Second-class pitman.. . . .	52c. "
New employees and car cleaners.. . . .	45c to 50c. per hour.

It is further agreed that time and one-half will be paid hourly rate employees on Sundays, also on the above quoted holidays. Also time and one-half for all hours over ten hours' work on regular working days. In case of emergency after regular working hours a minimum of not less than three hours will be paid.

TRACK MEN

Track bonder.. . . .	49c. per hour.
Track greaser and labourers.	42c. to 47c. per hour.

It is further agreed that time and one-half

will be paid hourly rate employees on Sundays, also on the above quoted holidays and all hours' work over ten hours on regular working days.

14. *Spare Men Operators.*—Spare men working less than five hours in any one day will be paid at the rate of 60 cents per hour.

15. *Transportation.*—Free transportation will be provided by pass or tickets to all employees covered by this agreement.

16. *Seats.*—Seats to be supplied to operators.

17. *Heaters.*—Operators' Vestibule to be fitted with heaters or such arrangements made as far as possible to maintain a temperature in conformity with the other portions of the car. Car to be equipped with sand, broom, switch bar, ash pan and shovel.

18. *Uniforms, Caps and Overcoats.*—Operators in the service and after three months' service shall be supplied with a uniform suit and cap each year, on or before 1st May, and with an overcoat every second year, on or before 1st November, all free of charge. In the event of employees leaving or being discharged, however, within six months after receiving any of the said uniforms or overcoats, they shall pay to the Department one-half the cost of such uniform or overcoat,

when same shall then become the property of the employee so leaving or being discharged.

19. This agreement when signed by the proper officers and a Committee duly appointed, representing a majority of the Street Railway Employees, will become retroactive to January 1st, 1924, and remain in operation and effect until the first day of January, 1926.

This agreement shall have full force and effect until a new agreement is entered into.

*Signed for the Cities*

for the Employees.

### STRIKES AND LOCKOUTS IN CANADA DURING MARCH, 1924

THE number of strikes and lockouts in Canada in existence at some time or other during the month of March, was twelve, four less than in February. The time loss for March was less than in March, 1923, being 11,056 working days as compared with 101,968 working days in the same month of the previous year.

printing compositors and pressmen, Halifax, and motormen and conductors at Niagara Falls.

Of the three strikes which terminated during the month two resulted in favour of the employers, while the third ended in a compromise. One of the new strikes was for increased wages, while the second was against the enforcing of new rules.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical tables, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting more than one working day. Disputes of only one day's duration or less, and disputes involving less than six employees are not included in the published record, unless at least ten day's time loss is caused, but a separate record of such disputes is maintained in the Department and the figures are given in the annual review.

The following notes give information in re-

Date	Number of disputes	Number of employees involved	Time loss in working days
March, 1924.....	12	755	11,056
February, 1924.....	16	11,518	101,968
March, 1923.....	19	1,533	33,229

Ten disputes involving 750 workpeople were carried over from February. One of the strikes commencing prior to March and two new strikes commencing during March terminated during the month. At the end of March, therefore, there were on record nine disputes: printing compositors, Hamilton; three strikes of printing compositors at Montreal; printing compositors, Ottawa; printing compositors, Toronto; printing compositors, Winnipeg;

gard to certain disputes additional to that shown in the tabular statement.

**LUMBER WORKERS, CRANBROOK AND GOLDEN DISTRICTS, B.C.**—The strike of lumber workers in the various camps throughout the neighbourhood of Cranbrook and Golden, which commenced on January 2, was called off by the union concerned on March 3. In nearly all of the different camps the strikers had been replaced by other workers. As the union, Industrial Workers of the World, had notified the employers concerned that they had "transferred the strike to the job," the employers announced that no men would be employed if known to belong to this union.

**PRINTING TRADES IN VARIOUS CITIES.**—The

strikes in the printing trades in six cities for the 44-hour week were still in progress at the end of March, involving 423 employees and resulting in a time loss of 10,575 working days.

**MOULDERS, SARNIA, ONT.**—A strike of moulders, on March 5, occurred in a metal manufacturing establishment at Sarnia for increased wages. After being on strike seven days an increase was granted to some classes and work was resumed March 14.

**TELEPHONE OPERATORS, MEAFORD, ONT.**—On March 1, 6 telephone operators ceased work on account of the enforcement of new rules. Four of the employees were replaced by other workers who began work March 5.

#### STRIKES AND LOCKOUTS DURING MARCH, 1924

Industry, occupation and locality	Number of employees involved	Time loss in working days	Remarks
<b>(a) Strikes and lockouts commencing prior to March, 1924.</b>			
<b>LOGGING.—</b>			
Lumber workers, Cranbrook and Golden district, B.C.	300	300	Commenced January 2, for increased wages and other changes. Majority of strikers replaced and strike called off by the Union March 3.
<b>MANUFACTURING.—</b>			
<i>Clothing—</i>			
Clothing workers, Winnipeg, Man.	23	.....	Commenced September 6, against reduction in wages. Termination— <i>indefinite.</i>
<i>Printing and Publishing—</i>			
Printing compositors, Hamilton, Ont.	10	250	Commenced May 2, 1921. Alleged violation by employers of 44-hour clause in agreement. <i>Un-terminated.</i>
Printing compositors, Montreal, Que.	8	200	Commenced June 14, 1921. Objection of men to perform work that came from shop where strike existed. <i>Un-terminated.</i>
Printing compositors, Montreal, Que.	86	2,150	Commenced July 1, 1921. For increased wages and 44-hour week. <i>Un-terminated.</i>
Printing compositors, Montreal, Que.	12	300	Commenced September 15, 1922. Employer refused to negotiate a new agreement with the union. <i>Un-terminated.</i>
Printing compositors, Ottawa, Ont.	23	575	Commenced June 1, 1921. For increased wages and 44-hour week. <i>Un-terminated.</i>
Printing compositors, Toronto, Ont.	223	5,575	Commenced June 1, 1921. For increased wages and 44-hour week. <i>Un-terminated.</i>
Printing compositors, Winnipeg, Man.	41	1,025	Commenced July 1, 1921. Alleged lockout following refusal of employers to renew agreement. <i>Un-terminated.</i>
Printing compositors and pressmen, Halifax, N.S.	20	500	Commenced May 2, 1921, for shorter hours with same weekly pay. <i>Un-terminated.</i>
<b>TRANSPORTATION.—</b>			
<i>Street and electric railways—</i>			
Motormen and conductors, Niagara Falls, Ont.	4	100	Commenced July 2, 1922. For recognition of union. <i>Un-terminated.</i>
<b>Strikes and lockouts commencing during March, 1924.</b>			
<b>MANUFACTURING.—</b>			
<i>Iron and steel products—</i>			
Moulders, Sarnia, Ont.....	9	63	Commenced March 5, for increased wages. Settled by negotiations and work resumed March 14. <i>Compromise.</i>
<b>TRANSPORTATION AND PUBLIC UTILITIES.—</b>			
<i>Telegraphs and Telephones—</i>			
Telephone operators, Meaford, Ont.	6	18	Commenced March 1, against enforcing of new rules. Settled March 5, by replacement of the strikers. In favour of employers.

## STRIKES AND LOCKOUTS IN GREAT BRITAIN AND NORTHERN IRELAND DURING FEBRUARY, 1924

THE British *Ministry of Labour Gazette* for March contains the following information respecting strikes and lockouts in Great Britain and Northern Ireland during February, 1924, based upon returns from employers and employees:—

**NUMBER, MAGNITUDE AND DURATION.**—The number of trade disputes involving a stoppage of work, reported to the Department as beginning in February in Great Britain and Northern Ireland, was 56, as compared with 37 in the previous month and 40 in February, 1923. In these new disputes about 136,000 workpeople were involved, either directly or indirectly (i.e., thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes). In addition about 8,000 workpeople were involved, either directly or indirectly, in 20 disputes which began before February, and were still in progress at the beginning of that month. The number of new and old disputes was thus 76, involving about 144,000 workpeople, and resulting in a loss during February of about 700,000 working days. The principal new dispute was that involving about 110,000 dock workers, etc., in ports throughout Great Britain, which was in progress from February 18 to 25.

**CAUSES.**—Of the 56 disputes beginning in February, 16, directly involving 121,000 workpeople, arose out of demands for advances of wages; 9, directly involving 3,000 workpeople, out of proposed reductions in wages; 6, directly involving 3,000 workpeople, on other wages questions; 13, directly involving 7,000 workpeople, on questions respecting the employment of particular classes or persons; and 12, directly involving 2,000 workpeople, on other questions.

**RESULTS.**—Settlements were effected in the case of 33 new disputes, directly involving 123,000 workpeople, and 11 old disputes, directly involving 4,000 workpeople. Of these new and old disputes, 13, directly involving 2,000 workpeople, were settled in favour of the workpeople; 8, directly involving 2,000 workpeople, in favour of the employers; and 23, directly involving 123,000 workpeople, were compromised. In the case of 9 disputes, directly involving 5,000 workpeople, work was resumed pending negotiations.

The following table analyses the disputes in progress in February in Great Britain and Northern Ireland, by groups of industries, and indicates the number of workpeople involved (whether directly or indirectly) at the establishments concerned, and the approximate time lost during the month in all disputes in progress:—

Groups of industries	Number of disputes in progress in February			Number of workpeople involved in all disputes in progress in Feb.	Aggregate duration in working days of all disputes in progress in Feb.
	Started before Feb. 1	Started in Feb.	Total		
Mining and quarrying.....	7	14	21	16,000	88,000
Metal, engineering and shipbuilding.....	1	11	12	10,000	61,000
Building, decorating, etc.....	3	6	9	1,000	7,000
Transport.....	.....	7	7	114,000	519,000
Other.....	9	18	27	3,000	24,000
Total, Feb., 1924..	20	56	76	144,000	699,000
Total, Jan., 1924..	11	37	48	83,000	629,000
Total, Feb., 1923..	36	40*	76*	37,000*	325,000*

### Manitoba and Draft Convention on Maternity

The Manitoba Legislature, during the session of 1923, passed a resolution which was intended to prepare the way for giving effect to the draft convention of the Washington Conference on maternity, as follows:—

Whereas the need for some regulation of the employment in industry of mothers in relation to childbirth is generally recognized; and whereas the International Labour Conference held at Washington in 1919, which conference was set up by the Peace Treaty, put forward a Draft Convention on this matter, recommending a period of abstention from work both before and after confinement, as well as making provision for the proper nursing of the child after the mother's return to work; therefore be it resolved that in the opinion of this House the Bureau of Labour of Manitoba should

investigate the conditions prevailing in this province in regard to the employment of mothers in industry, with a view to establishing what need there may be for the enactment of such protective legislation in Manitoba.

During the session of 1924 the provincial government announced that an investigation had been made as required by the resolution. The Bureau of Labour had reported, it was stated, that cases of mothers being employed in industry shortly before or after childbirth were so rare in Manitoba that no action at the present time was deemed necessary. The government accordingly had taken no further action in the matter.

## DISPUTE IN THE COAL MINES OF ALBERTA AND SOUTH EASTERN BRITISH COLUMBIA, DISTRICT 18, OF THE UNITED MINE WORKERS OF AMERICA

THE agreement as to wages and working conditions between the Western Canada Coal Operators' Association and District 18 of the United Mine Workers of America, covering operations in many of the coal mines in Alberta and South Eastern British Columbia, expired on March 31, 1924, and as no renewal had been agreed to, a strike began on April 1, about 8,000 miners ceasing work, of whom about 1,500 were in British Columbia near Fernie.

### Review of Previous Agreement

The agreement which expired on March 31 was one reached in 1920, and renewed with practically no changes from time to time.\* From April 1, to August 28, 1922, the miners were on strike owing to the failure to renew the agreement in the previous March, the operators having stood for a wage reduction of approximately 45 to 50 per cent. A similar dispute in the United States had resulted in a similar strike, involving most of the union bituminous coal mines in the country, or about 60 per cent of all. In Canada a Board was established under the Industrial Disputes Investigation Act, 1907, but neither party was willing to agree to the report of the Board, or to the minority report of the representative of the operators.

Following conferences which were held with representatives of the Department of Labour an agreement was reached in District 18 on August 28 under which work was resumed at a wage scale 15 per cent lower than that in force from October, 1920, to March 31, 1922, but it was arranged that if 75 per cent of the union miners in the "Central Competitive Field," comprising Western Pennsylvania, Ohio, Indiana, and Illinois, should before March 31, 1923, reach an agreement with the operators in that field, the wage scale in District 18 should be amended to bear the same relation to the scale prior to March 31, as the new scale in the Central Competitive Field should bear to the scale in that field prior to March 31, the Minister of Labour to be the judge as to the date and nature of any such agreement. On September 1, the Minister stated that an agreement had been reached in the Central Competitive Field, putting into effect the scale prior to March 31, and accordingly in District 18 the scale prior to March

31, 1922, was restored until March 31, 1923,\* to renew the agreement for another twelve months, that is to March 31, 1924.

### Changes in Wages during the War

During the war the wages of coal miners in District 18 were increased in certain percentages in 1916, and during 1917 and 1918, by a bonus which varied with changes in the cost of living. In 1919, the operators and the union agreed to changing the wage scale in accordance with changes in the wages of coal miners in the Central Competitive Field in the United States, and in 1920 and 1922, agreements continuing this policy were reached.

Between November, 1916, and December, 1918, the changes in the cost of living were ascertained every four months by a Commission and the bonus of 20 cents per day in April, 1917, increased to 92 cents per day by December, 1918. In 1919, wages were increased 14 per cent to correspond to a similar increase in the United States, and in April, 1920, another 13 per cent increase was made, making 27 per cent over the December, 1918, rates, the 92 cents bonus thus increasing by 27 per cent and becoming \$1.17 and being included in the wage scale for men on day wages. Contract workers were also paid \$1.17 per day in addition to their piece rate earnings. In October, 1920, a further increase in rates for miners on day wages was made in accordance with a similar increase made in the United States. The wage scale so determined has been in force since that date, except during the strike from April 1 to August 28 and for the remaining days of August at a reduction of 15 per cent as mentioned above.

### Negotiations for New Agreement

On February 19, 1924, the operators and union in the United States bituminous mines in the Central Competitive Field agreed to renew the existing agreement providing for the 1920 wage scale for another three years, that is until March 31, 1927. Negotiations between the Western Canada Coal Operators' Association and the United Mine Workers began at Calgary on March 4, 1924, the union proposing a renewal of the agreement for three years but with provision for the adjustment of the rates for dead work and supplies in certain localities, and with certain changes in other matters.

\* LABOUR GAZETTE, August, 1920, p. 1047, and November, 1920, p. 1547.

\*LABOUR GAZETTE, September, 1922, p. 955.

In the provisions for dealing with disputes which might arise during the term of the agreement, it was proposed by the union to omit the clause providing that when the Joint Committee of Six for the District could not agree on a decision regarding any dispute, or could not agree on an independent chairman the Minister of Labour should appoint the independent chairman of the committee whose decision should be final. Another change proposed was that a decision agreed upon by the pit committee and the mine manager should be final only if approved by the local union. There were also changes proposed as to eligibility of foremen and men engaged on construction work for membership, as to holidays, time for funerals, membership, pit committees, housing, and various matters.

The operators proposed to renew the former agreement for one year, except that the wage scales should be reduced by \$1.17 per day, the amount of the cost of living bonus during the war which had been added to the wage scale in 1920.

### Statement of Mine Operators

The reply of the operators to the demands of the union was in the form of the following:—

Whereas the demands of the United Mine Workers of America, presented on March 4th to the Western Canada Coal Operators' Association as a basis for a three years' agreement fail to take into consideration the conditions affecting coal mining operations in Alberta and Southeastern British Columbia; and

Whereas the miners' demands are based on conditions in the Central Competitive Field in the United States, which conditions are largely political, and

Whereas the wages in the Central Competitive Field, which the United Mine Workers of America propose to this field are comparatively lower by reason of the difference in the hours of labour, making a disadvantage in District 18 of practically 15 per cent, the existing wage scale with this disadvantage being the highest on the American continent; and

Whereas the conditions affecting the coal mining industry in District 18 are as follows:—

(a) The competition of non-union mines operating strip mines, which is taking away the markets from the union mines;

(b) The competition of American mines which are now supplying over 50 per cent of the market which could be supplied by the mines of District 18;

(c) The Railways formerly using coal mined in District 18 are now extending the use of fuel oil as well as extending the use of American coal. This condition is brought about through the high cost of coal;

(d) In addition, the market for coal mined in District 18 is further restricted by the imposition of a duty of 53 cents per ton on coal exported to the United States. This condition was brought about by the Fordney Tariff;

(e) The mines in District 18 cannot compete in their logical markets with coal mined in the State of Washington, on Vancouver Island, and Central British Columbia, because the latter mines are operated on a much lower wage scale;

(f) The curtailment of the markets for domestic coal due to the effect of competition with non-union mines which are operating on a much lower wage scale;

(g) The wages paid for carpenters, mechanics, engi-

neers, firemen, labourers, etc., are far in excess of those paid to similar workmen in other industries;

(h) The high rate of wages paid in the mines of District 18 tends to preclude the shipment of Alberta coal to Ontario;

(i) The High Cost of Living Bonus, or War Bonus, of \$1.17 per man per day is still being paid in the mines in District 18, as well as all other increases granted during the years of and after the war, although the war has been over for nearly six years; and

Whereas agreements in Nova Scotia and the State of Washington which were made by the United Mine Workers of America provide for the payment of wage scales from twenty to forty per cent lower than the present wage scale paid in District 18; and

Whereas the majority award of the Knowles' Conciliation Board in 1922 appointed under the Industrial Disputes Investigation Act to investigate conditions in District 18 stated as a result of their investigation that

"It would appear that at present the cost of living statistics are approximately where they were in the early part of the year 1917.

"The Board is not disposed to recommend a reduction of the employees' wages downward with mathematical sequence, such a reduction would be too drastic. We do not consider it either fair to the employee or in the interests of the industry generally that a reduction such as this would involve, which would be approximately 45 per cent or 50 per cent, be inflicted at one blow."

and recommended a reduction of about 27½ per cent below the present wage scale in District 18. This award was concurred in by the miners' representative on this Board, and there is no material difference in the Cost of Living since that time; and

Whereas the consuming public are reasonably demanding a reduction in the price of coal;

Therefore be it Resolved that this Association go into joint conference to negotiate a wage scale providing for such reduction as the conditions set out above justify, believing that the negotiation of such an agreement will greatly extend the markets for coal from union mines, and give steadier employment, which will in turn benefit the miners, the operators, the industry, and the consuming public."

That we cannot accept or accede to the demands made upon us by the United Mine Workers of America, but we propose that this Joint Conference of operators and miners of District 18, of the United Mine Workers of America, comprising Alberta and Eastern British Columbia, as now constituted hereby reaffirms the wage scale and contracts now existing between the United Mine Workers of America and the coal operators whose interests are represented in this conference, and hereby extends the same for a period of one year from April 1, 1924, to March 31, 1925, in all of their terms, general clauses, provisions and conditions with the exception that the War Bonus of \$1.17 per day be eliminated from the wages and contract earnings of all employees."

### Rejoinder of Coal Miners

A rejoinder to the operators' statement in the terms following was made on behalf of the United Mine Workers of District No. 18.

Gentlemen:—The miners' Conference Committee have given due and careful consideration to your counter-proposal for wage reduction as outlined in your demands of March 5th and have unanimously decided that such unwarranted proposals cannot be accepted by the Miners' Conference Committee.

Our reply to you must necessarily be brief due to the fact that the general preamble of your proposition contains practically all of the arguments submitted by your Association in past years while negotiating with representatives of the United Mine Workers' Organization, and in spite of your repeated assurances that

you could not operate your mines due to the reasons specified in your proposal, we find, however, that after settlements have been finally reached carrying with it no reduction that your mines have operated on an average as steady as those of your competitors. We note, however, your statement regarding competition of non-union strip mines which appears rather unduly exaggerated when we take into consideration the facts that the quality of coal produced at these strip mines is of an inferior quality to that which is produced in union mines in the northern part of our District, and the miners' representatives desire to point out that competitive conditions are much more favourable in the northern part of our District at the present time than they were when our present contract was negotiated due to the fact that many non-union mines which were operating in that Field on a low wage scale have since been organized and brought under the jurisdiction of the United Mine Workers with its recognized district scale of wages.

We have given careful consideration to your statement regarding competition of American mines which are now supplying over 50 per cent of the coal market in this country and we feel that the Western Canada Coal Operators' Association are adopting a very unjust view when they ask the union miners of this District to accept a lower standard of living due to a condition brought about by the apathy and lack of attention paid by our Dominion Government to the importation of American coal. We submit that this matter is strictly a question that should be taken up with the Dominion Government by the Operators' Association, and when it is pointed out that a 53c. per ton duty is placed on Canadian coal shipped in the United States the Government of this Country will readily see the necessity of placing such restrictions on American coal.\*

The Miners' Conference Committee desires to assure your Association that we are desirous of making a contract for a period of three years so that the danger of annual strikes may be eliminated and a condition of stability once more established in the industry.

We feel that the demands presented you by the Miners' Conference Committee on March 4th were in every sense just demands and we hereby confirm same, and suggest we adopt our past procedure and elect a sub-committee representing both parties so that the merits of same can be properly threshed out and recommendations brought forward in line with the general situation existing in the industry at the present.

Signed on behalf of the Miners' Conference Committee.

### Further Negotiations

In the discussion of these proposals it was stressed by the miners that owing to the short period of the year during which the mines were operated regularly it was necessary for the miners to have a high wage scale. It was advanced by the operators that the high cost of mining coal due to high wage rates made necessary such a high selling price that the natural consumers of District 18 coal, particularly the railways in the adjacent district of the United States and the Canadian railways, were using fuel oil and steam coal produced from the United States where mining costs were lower, not only in non-union mines where wages were lower but in the union mines where the hours of labour were eight

hours "at the face" whereas in District 18 the hours were eight hours "bank to bank," as required by the law of the province of Alberta and British Columbia. It was stated that as much as an hour a day was required for men to reach the face and return in some cases, and that this alone accounted for a difference of fifteen per cent in working costs which they proposed to offset by the \$1.17 per day reduction in wages. They also stated that they suffered considerable competition from non-union mines in Canada at lower wage rates. A reduction in costs they contended would increase the market for coal and provide much steadier operations of the mines and so greatly increase the annual incomes of the miners even at lower wage rates.

Mr. F. E. Harrison, an officer of the Labour Department, was in Calgary during the negotiations and offered the assistance of the Department. Negotiations were resumed on March 13 in a conference of a joint committee representing both parties, and this adjourned until March 15. On that day the Minister of Labour addressed the following letter to both parties, the text being telegraphed to Mr. Harrison at Calgary to place before them on March 17.

OTTAWA, March 15, 1924.

DEAR SIR,—You will have already been advised by our Mr. Harrison of the feeling of the undersigned, as Minister of Labour, that it is most important from all points of view that there should be no interruption of the mining industry of Alberta and British Columbia at the present time. Harmony and co-operation between the employer and workmen concerned have characterized working relations under the existing agreement with mutual advantage, and the public has, undoubtedly, derived substantial benefit therefrom.

I feel that the circumstances at present existing, as indicated in press despatches and advice from Mr. Harrison, warrant me in calling attention to the curtailment of operations which resulted from a controversy in the year 1922 involving a cessation of work during the months from April to August inclusive. It will be remembered that towards the end of August of that year the undersigned met the representatives of both parties at Calgary. Later an agreement was reached providing for a reduction in wage rates of fifteen per cent (15 per cent) below the scale in effect prior to March 31, 1922, and with the further understanding that the scale eventually made effective and accepted in the Central Competitive Region of the United States should be adopted when seventy-five per cent (75 per cent) of the union miners in that region and the operators had agreed thereto, the undersigned being, by agreement, authorized to notify the union miners and operators in District Eighteen when such condition in the Central Competitive Region had been maintained. Work in your district was resumed on August 28, 1922, and on September 1st the writer notified the parties concerned that seventy-five per cent (75 per cent) of the miners of the Central Competitive Field of the United States had reached an agreement with the operators to work on the 1921 rates. Accordingly, in District Eighteen the 1921 rates again came into effect.

I sincerely trust that the same consistent recognition as to comparative wage relations between coal mine territories may at this time be observed on the part of the operators and miners in a consistent effort to

\*It later appeared that this had reference to anthracite coal imported for use in Winnipeg. Anthracite coal is on the free list. EDITOR, LABOUR GAZETTE.

ensure that no interruption to coal mine operations in District Eighteen may be brought about by failure to reach agreement.

A similar communication is being addressed to Mr. R. M. Young, Secretary of the Western Canada Coal Operators' Association.

Yours truly,  
 JAMES MURDOCK,  
*Minister of Labour.*

A motion to appoint a provincial commission to investigate the coal mining industry in Alberta was made in the provincial legislature on March 13 by Mr. P. M. Christopher, Labour member for Rocky Mountain House, and was carried without opposition the following day.

The negotiations between the miners and the operators came to an end on March 17. Mr. Harrison asked the president of the operators' association if they would be prepared to consider a renewal of the agreement for one year without a change in wages, and he replied that they had already refused to renew the agreement for any length of time and could only consider a proposal for settlement coming from the miners direct. On March 28 the operators met and decided to pay the maintenance men who continued on duty during the strike the previous rates of pay in the expiring agreement. There were rumours that some of the operators intended to operate their mines with non-union labour, and at one camp the miners proposed that all maintenance men in the district should be called out. The district officers pointed out

that this was against the rules of the United Mine Workers. The district agreement also provided:—

“EMPLOYEES TO CARE FOR MINE: In case of either local or general suspension of mining, either at the expiration of this Agreement or otherwise, the Engineers, Fireman and Pumpmen shall not suspend work, but shall, when mining is suspended, fully protect all the Company's property under their care, and operate fans and pumps, and lower and hoist such men and supplies as may be required to protect the Company's property, and any and all coal required to keep up steam at the Company's plant; but it is understood and agreed that the Company will not ask them to hoist any coal for sale on the market.”

At one of the camps the closing down included the electric light and water works plant and deprived the miners' houses of light and water, resulting in a protest.

#### Result of Strike Ballot

The results of a ballot to authorize the strike showed 4,696 for the strike and 282 against with a few locals not reported. The miners were said to regard the ballot as a mere formality to comply with the constitution of the Union. It was stated that many miners had left the district particularly during the last few days before the strike and that there were 9,000 paid up members in February.

### STRIKE OF TRAMWAY AND OMNIBUS MEN IN LONDON, ENGLAND

AT midnight on Friday, March 21, there took place in London, England, a general strike involving about 17,000 tramway operators and 23,000 omnibus men. The cause of the dispute was the refusal of the employers to grant a demand of the tramway men for an advance in wages of 8 shillings a week. Prior to the calling of the strike various conferences were held, but no basis of agreement was reached. A committee of inquiry was immediately set up by the Minister of Labour to deal with this dispute and negotiations were resumed by the two parties at the Ministry of Labour. The employers offered an advance of five shillings a week leaving to arbitration the question of the additional three shillings demanded, but on March 25 this proposal was rejected by the men's representatives.

On March 27 the prime minister announced to the House of Commons that after several conferences he had succeeded in bringing the

two sides together and had impressed upon them the necessity of a settlement, which they admitted they were equally desirous of bringing about. On the following day a settlement was reached through the mediation of Premier MacDonald on the basis of an immediate advance of six shillings a week with the remaining two shillings demanded by the men fluctuating according to the cost of living index.

While the strike was in progress great inconvenience was caused to the several millions of workers living in the suburbs who are employed in London, as the 2,000 tram cars and 4,000 omnibuses that were out of service normally carried about five million people daily. Had the strike not been settled the London Tube and Underground men would have gone out, a strike order having been issued, and there was grave fear of other labour organizations declaring sympathetic strikes.

## LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

### Agenda of Sixth Session of the International Labour Conference

THE agenda for the sixth session of the International Labour Conference (League of Nations), which opens on June 16 in Geneva, proposes the following subjects for consideration by the delegates of the nations represented:—

- (1) Development of facilities for the utilization of workers' leisure.
- (2) Equality of treatment for national and foreign workers as regards workmen's compensation for accidents.
- (3) Weekly suspension of work for twenty-four hours in glass manufacturing processes where tank furnaces are used.
- (4) Night work in bakeries.

*Visit to Canada of Dr. W. A. Riddell.*—Dr. Riddell, Chief of the Agricultural Section of the International Labour Office, Geneva, is at present visiting Canada and during the past month has delivered addresses at various points on the work of the International Labour Organization. He has also conferred with representatives of the various provincial governments relative to the obligations of Canada arising under the Labour Sections of the Treaties of Peace.

### International Labour Office

*Industrial Hygiene and Safety.*—A report has been issued by the International Labour Office entitled "Industrial Hygiene and Safety and the International Labour Organization," containing the text of papers read at a conference on industrial health, organized by the League of Nations Union of Great Britain. The papers in question dealt respectively with the following: Safety and Protection in Industry, The Safeguarding of Industrial Machinery, International Co-operation in the Study of Industrial Fatigue, Industrial Diseases and Injurious Processes, Women Workers' Health.

*Protection of Eyesight in Industry.*—A report has been issued by the International Labour Office (League of Nations), Geneva, entitled "Protection of Eyesight in Industry" comprising a study of the problem of industrial lighting. The report in question aims at giving a general review of the existing knowledge of the subject. The chief objects in view are to encourage further research, to assist in disseminating knowledge of principles ascertained by science and applicable to industrial practice, and to enlist the co-opera-

tion of employers' and workers' organizations so that these principles may be observed in practice.

### Provincial Action on International Labour Conference Proposals

*Action taken in Saskatchewan.*—A resolution in the terms following was adopted by the Legislative Assembly of Saskatchewan on March 19 on motion of Honourable J. G. Gardiner, Minister in charge of the Bureau of Labour and Industries:—

"Resolved that this Legislature do endorse the principle of the following Draft Conventions and Recommendations and portions of Recommendations adopted by the General Conference of the International Labour Organization of the League of Nations, and do authorize the Dominion Government to inform the Secretary-General of the League of Nations of such endorsement, namely:—

A. Draft Conventions and Recommendations adopted by the said General Conference convened at Washington, U.S.A., by the Government of the United States of America, on the 29th day of October, 1919:

1. Articles numbered 1 and 4 of the Recommendation concerning unemployment;
2. Draft Convention fixing the minimum age for admission of children to industrial employment;
3. Draft Convention concerning the rights of association and combination of agricultural workers;
4. Draft Convention concerning the employment of women during the night.

B. Draft Conventions and Recommendations adopted by the said General Conference convened at Geneva by the Governing Body of the International Labour Office, on the 25th day of October, 1921:

1. Article 1: Sections 1, 2, 4 and 5 of the Recommendation concerning the prevention of unemployment in agriculture;
2. Draft Convention concerning the age of admission of children to agricultural employment;
3. Recommendation concerning the development of technical agricultural education."

Another resolution was passed as follows:—

"Resolved that a humble address be presented to His Honour the Lieutenant Governor praying that a copy of the Resolution passed this day by this Legislature respecting the endorsement of the principle of certain Conventions and Recommendations adopted by the General Conference of the International Labour Organization of the League of Nations be forwarded to the Secretary of State of Canada for transmission to His Excellency the Governor General in Council."

The contents of the Draft Conventions or Recommendations approved in the foregoing resolution may be briefly outlined:—

### A. CONFERENCE AT WASHINGTON, 1919.

1. The Recommendation concerning unemployment calls for (1) the prohibition of private employment agencies which charge fees, or permission only under government license; (2) recruiting of workers in one country for employment in another to be permitted only through mutual arrangement; (3) establishment of some form of unemployment insurance; (4) co-ordination of public work and re-

servicing work for periods of unemployment and for the districts most affected thereby.

2. The Draft Convention fixing the minimum age for admission of children to industrial employment would provide that children under 14 years of age shall not be employed or work in any public or private industrial undertaking, except those in which only members of the same family are employed.

3. The Draft Convention concerning the rights of Association and combination of agricultural workers\* would secure to workers in agriculture the same rights of association and combination as are enjoyed by other industrial workers.

4. The Draft Convention concerning the employment of women during the night would forbid such employment during a night period of at least 11 consecutive hours including the interval between 10 p.m. and 5 a.m.

#### B. CONFERENCE AT GENEVA IN 1921.

1. The Recommendation concerning the prevention of unemployment in agriculture is to the effect (1) that modern technical methods should be adopted in the industry; (2) more intensive use of land; (4) that transport facilities should be provided for agricultural workers so as to render temporary work accessible; and (5) that supplementary industries should be developed to counteract seasonal unemployment in industry.

\*This Draft Convention was adopted by the Third International Labour Conference held at Geneva in 1921.

2. The Draft Convention concerning the age of admission of children to agricultural employment would prohibit such employment of children under 14 years of age during hours fixed for school attendance.

3. The Recommendation concerning the development of vocational agricultural education calls for suitable action on these lines by the member states of the International Organization.

*Labour Proposals before Nova Scotia Legislature.*—The Speech from the Throne at the opening of the Nova Scotia Legislature included the following reference to the International Labour Conference:—

“The Government was represented at a Conference between the Dominion and Provincial Governments at Ottawa dealing with the obligations of Canada arising out of the Labour Sections of the Treaties of Peace. The resolutions adopted thereat will be presented for your consideration and such legislation as may be necessary to give effect to certain of these resolutions in so far as this Province is concerned will be submitted to you.”

The Dominion-Provincial Conference referred to was held in Ottawa in September last and the Agenda comprised consideration of various proposals for legislative action which have been adopted at the successive sessions of the International Labour Conference since 1919 and which are regarded as dealing with subject matters within Provincial jurisdiction. The text of the resolutions of this Conference appeared at pages 1107-1112 of the October, 1923, issue of the LABOUR GAZETTE.

## AMENDMENTS MADE IN FAIR WAGES ORDER IN COUNCIL

### Applicable to Fair Wages Policy of Dominion Government

AS a result of experience gained in the administration of the Fair Wages Policy of the Government of Canada, as set forth in the order in council of June 7, 1922 (see June, 1922, LABOUR GAZETTE), certain amendments were made in this order in council on April 9, 1924, on recommendation of the Minister of Labour, which, without altering the scope and intent of the policy, are intended to make its purpose clearer and more definite.

The amendments in question apply to the “A” conditions of the Fair Wages order in council which are observable in connection with all contracts for the construction or remodelling of public buildings of all kinds, railways, canals, roads, bridges, locks, dry docks, elevators, harbours, piers, wharves, lighthouses, and other works for the improve-

ment and safety of transportation and navigation, rifle ranges, fortifications, and other works of defence, dams, hydraulic works, slides, piers, booms, and other works for facilitating the transmission of timber, and all other works and properties constructed or remodelled for the Government of Canada; the like conditions are also observable as far as practicable in connection with all agreements made by the Government involving the grant of Dominion public funds in the form of subsidy, advance, loan, or guarantee for any of the purposes mentioned. The changes sanctioned by the amending order in council affect sections 2, 3, and 5 (a) of the “A” conditions. Under the Fair Wages Policy, as it has been administered during the past twenty-four years, the Minister of Labour has been authorized to render a final decision

in connection with any dispute arising as to wages or hours. The principal changes made in the Policy are intended to secure more effective provision for the enforcement of the labour provisions of Government contracts in this respect.

In the case of all contracts to which the "A" conditions apply, the department of the Government concerned is required to communicate to the Department of Labour the nature of the proposed contract and the classes of labour likely to be required in its execution. The Labour Department is charged with the preparation of schedules setting forth the rates of wages and hours of labour generally accepted as current, for competent workmen of the various classes required, in the district in which the work is to be performed. This fair wage schedule is thereupon embodied in the contract. In any cases where the Department of Labour is unable to furnish Fair Wage Schedules for the purpose aforesaid, authority is given for the insertion in the contract of a fair wage clause in the terms following:—

All mechanics, labourers, or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed for the character or class of work in which they are respectively engaged, and if there be no current rates in such district, then fair and reasonable rates, and shall work such hours as are customary in the trade in the district where the work is carried on, or if there be no custom of the trade as respects hours in the district, then fair and reasonable hours, unless for the protection of life and property, or for other cause shown to the satisfaction of the Minister of Labour, longer hours of service are required. The Minister of Labour may at any time and from time to time determine for the purposes of this contract, what are the current or fair and reasonable rates of wages, and the current or fair and reasonable hours, and may from time to time rescind, revoke, amend, or vary any such decision, provided that his determination and any amendment or variation shall not be operative prior to the period of three months immediately pre-

ceding the date thereof. Where there are special circumstances which in the judgment of the Minister of Labour make it expedient that he should do so, he may, in the manner and subject to the provisions hereinabove set forth, decide what are the current or fair and reasonable rates of wages for overtime, and what is the proper classification of any work for the purposes of wages and hours. Immediately upon receipt of notice of any decision of the Minister of Labour hereunder the contractor shall adjust the wages and hours and classification of work so as to give effect to such decision. In case the contractor shall fail so to do, or to pay to any employee or employees for any services performed or for any hours of labour, wages according to the rates fixed therefor by the Minister of Labour, the Minister of Labour may authorize and direct the Minister\* to pay such wages at the rates so fixed and to deduct the amount thereof from any moneys owing by the Government to the contractor and any such payment shall for all purposes as between the contractor and the Government be deemed and taken to be payment to the contractor, and the contractor shall be bound in every particular by any such authority, direction and payment as aforesaid. The powers of the Minister of Labour hereunder shall not be exercised as to any employee or employees where it is established to his satisfaction that an agreement in writing exists and is in effect between the contractor and the class of employees to which such employee or employees belong or the authorized representatives of such class of employees fixing rates of wages, overtime conditions and hours of labour.

In the course of a recent public hearing, Dr. J. W. MacMillan, chairman of the Minimum Wage Board of Ontario, stated that no employee need be deterred by fear of dismissal from informing the Board that her wages were at a rate less than the established minimum. The complaint would, he said, be treated confidentially, and the Board's inspectors would be directed to examine the wage sheets of the employer concerned with a view to the enforcements of the regulations.

\* NOTE.—The term "Minister" in this case refers to the Minister of the Department with which the contract is made.

## RECENT LABOUR LEGISLATION IN QUEBEC

### Summary of Laws affecting Labour enacted at the recent Session of the Legislature.

THE legislature of the province of Quebec was in session from December 17, 1923, to March 15, 1924. The opening speech by the Lieutenant Governor referred to the burden laid upon the people of Canada by the late war, and expressed the view of the government that so far as Quebec was concerned recovery could be best assisted by an increased assistance to colonization and agriculture, by prudent and far-sighted exploitation of the forests, by development of the provincial water-power and fisheries, by the spread of public education, by promotion of public health and by road construction. The Lieutenant Governor in anticipation of an "Act providing for the appointment of a director of Protestant education in the Province" said: "Our province has always considered it a point of honour to observe a strict impartiality between the two great religious bodies into which it is divided. As the superintendent of public education is a member of the larger body it seems fair that there should be an official possessed of wide authority to deal with questions affecting the protestant minority. Such an official must, of course, be under the superintendent who has the general control of public education in the province."

In regard to the Workmen's Compensation Commission appointed in accordance with an act of the previous session (Statutes of 1922, Second Session, chapter 38) the legislature was informed that the Commission was actively pursuing its labours "with a view to affording relief to workingmen as far as possible without fettering industries". The report of this Commission was not ready for presentation during the session, but was expected shortly. (See also page 284 of the present issue.)

*Incorporation of Trade Unions.*—Several acts were passed during the session having special reference to labour. Among these perhaps the most outstanding was "An Act respecting professional syndicates," authorizing the incorporation of unions of persons engaged in the same or similar occupations, having as their object "the study, defence and promotion of the economic, social and moral interests of the profession". Twenty or more persons engaged in the same occupation or in similar trades may petition the Lieutenant Governor in Council to incorporate them as a "professional syndicate," at the same time stating their purpose, and submitting draft bylaws. Official authorization must be gazetted, and

subsequent changes in the bylaws must be communicated to the Lieutenant Governor in Council. The directors and two-thirds of the members of a syndicate must be British subjects, a foreign membership of more than one-third of the whole involving dissolution. Minors sixteen years of age and married women, except when their husbands object, are eligible as members.

The rights and privileges of syndicates are as follows: they may acquire legal title to property; establish mutual benefit and pension funds; erect cheap dwellings or purchase grounds for workmen's gardens and physical and hygienic training; conduct offices for supplying information in regard to employment; establish provident institutions, laboratories, and educational undertakings; assist or subsidize co-operative societies for production or consumption; purchase, to re-sell to their members, all necessaries for family maintenance or materials for the exercise of their trade or profession; assist in the sale of the work of their members; deposit their mark or label; and enter into agreements with similar organizations for the furtherance of their common aims, "particularly such as relate to the collective conditions of labour".

The syndicates are required to keep separate accounts for each branch of their activity, as well as a general expense account. When a special fund ceases to be self-supporting it may be closed without affecting the civil existence of the syndicate. Special funds are liable only for their own debts, except in the event of a general liquidation. The funds of a special mutual benefit and pension account are unseizable save for payment of annuities and debts to members.

Three or more syndicates under the act may "concert in the study and defence of their economic, social and moral welfare, and for such purpose form a union or federation". Such federations or unions may form their own rules as to representation in a joint administrative council; they have the same rights and powers as individual syndicates under the act and may also institute councils of conciliation and arbitration between the syndicates which shall, at the request of the interested parties, render decisions on the disputes submitted to them. Such decisions shall be submitted to the Superior Court for confirmation, after which they shall have the force of a final judgment. Members of a syn-

dicade may resign voluntarily without prejudice to the syndicate's rights to claim three months' assessment.

The following sections of the act deal with collective labour agreements:—

15. The collective labour agreement is a contract respecting labour conditions made between the representatives of a professional syndicate, or of a union, or of a federation of syndicates, on the one hand, and one or more employers, or representatives of a syndicate, union or federation of syndicates of employers, on the other hand.

All agreements respecting the conditions of labour not prohibited by law may form the object of a collective labour agreement.

16. The following shall be bound by the collective labour agreement.

(1) The employees and employers who signed it either personally or by authorized attorney.

(2) Those who, at the time the agreement was made, are members of a group, a party to the agreement, if, within eight clear days from the deposit hereinafter provided for in section 17 of this Act, they have not resigned from such group and have not deposited a written notice in the office of the secretary of the group and with the Minister of Public Works and Labour of the province of Quebec.

(3) Those who are members of a group which later joins in such agreement, if, from the date of the notification of such adhesion, they have not withdrawn from the group in the manner and within the delay prescribed in the above paragraph 2.

(4) Those who after the deposit of the agreement join a group which was party to such agreement.

17. The collective labour agreement shall be in writing, under pain of nullity.

It shall take effect only after an authentic copy, or, in the case of a private writing, after a duplicate of the writing setting forth the terms of the agreement, has been deposited with the Minister of Public Works and Labour.

18. The collective labour agreement shall give rise to all the rights and recourses established by law for the sanction of obligations.

*Provincial School for Pulp and Paper Industry.*—A measure of considerable importance from the standpoint of technical education and apprentice training was "An Act to ratify the contract respecting the paper-making school of Three Rivers". This act transforms the technical school which was formerly conducted by the local commission at Three Rivers, into a provincial technical school for the pulp and paper industry. Such a school supported by public funds for the benefit of a particular industry is a new departure in technical education not only in Canada but on this continent. The contract mentioned in the title of the act is an agreement entered into between the provincial government and the Three Rivers technical school, which school was constituted a corporation by an act of 1918. The provincial Minister of Lands and Forests had been authorized by an act of 1922 (second session, chapter 31) to establish and organize complete instruction in paper making in the province "with a view to recruiting expert workmen as well as technical

men for the making of wood pulp, paper and similar products from fibre," the sum of \$30,000 being appropriated for the purpose. The government considered Three Rivers to be one of the best places for the new school as being one of the more important centres of the pulp and paper industry, especially as the local technical school offered suitable quarters. The agreement between the province and the school corporation authorizes the government to organize and maintain in this building a paper-making school to be operated simultaneously with the technical school under the same direction of studies, for the period of twenty years, subject to a termination of the agreement on six months' notice by the Government. The director of the paper-making school (who is also principal director of the technical school) will be appointed by the Minister of Lands and Forests, and the school equipment will be paid for by the government and remain the property of the province. The government moreover undertakes to pay the interest and sinking fund of the bonds issued by the school corporation, as well as the salaries of the director and principal, professors, foremen and other employees both for technical instruction and for instruction in the manufacture of pulp and paper, and other expenses in connection with the establishment. The government further assumes various debts incurred by the school, the latter body transferring to the province all the grants now received from the province, the city of Three Rivers or other sources.

*Licensing of Workmen.*—An Act was passed providing for the licensing and taxing of peddlers, supplementing the Quebec License Act. It is similar to acts in force in other provinces in Canada. Municipalities which are not already authorized to do so may by resolution impose a license fee between \$5 and \$100 on all peddlers, with certain exceptions, the amount of the fee varying according to the peddler's method of transporting his wares, whether on his person or by a vehicle. Peddlers must show their licenses if required to do so by municipal officials or constables. Peddlers not requiring licenses under the act include those selling moral and religious publications, documents published by authority, fish, fruit, fuel and provisions, except tea and coffee; goods, wares and merchandise other than drugs, when these are peddled and sold by the actual maker or worker, being a British subject resident in the province; tinkers, coopers, glaziers, harness repairers are also exempt; and hucksters having market stalls are not included if they comply with local police regulations.

Butter and cheese manufacturers in the province were required to engage a head butter or cheese-maker who holds a certificate as an expert tester as well as the diploma which is required under provision of 1921.

*Early Closing of Stores.*—The existing law (Revised Statutes of 1909, article 5885) enabling city and town councils to pass by-laws ordering the closing of particular classes of stores at seven o'clock or after in the evening of one or more days each week throughout the year or during a particular season, was amended by the substitution of 6 o'clock as the evening limit.

*Voting by Workmen.*—In an act amending the charter of the city of Levis provision is made that from 7 o'clock until 9 o'clock workmen, artisans and employees in factories shall have precedence in voting in municipal elections. The council may by bylaw fix a later hour than 6 o'clock, but not later than 8 o'clock p.m. for the closing of the voting.

*Workingmen's Dwellings at Quebec.*—An act to amend the charter of the city of Quebec authorized the city to borrow up to \$300,000 to assist in building workmen's dwellings within its territory. Advances which are not to exceed \$3,500, are only to be made to individuals to assist them in building dwellings in which they will themselves reside, and will be repayable in 20 years, with interest on the balance at 5 per cent. The borrower, however, may build a tenement house in which there may be two or three lessees. Plans for such houses are to be prepared without cost to the builders, by the city of Quebec. The city may advance 85 per cent of the value of the finished property, such value to include land, building and accessories, the

advance being upon an estimate by the city architect of the work remaining to be done.

*Other new measures.*—An amended section of the charter of the Montreal Metropolitan commission gives the commission the sole right to fix the salary and terms of engagement of its employees, no appointment or dismissal being effective without their approval.

Municipalities in the province were authorized to submit a referendum to the electors with regard to the observance of daylight saving within their boundaries, the voting following the same procedure as in municipal elections.

A bureau of inspector-auditors was created as a branch of the Department of Municipal Affairs, to superintend the affairs of municipal councils, except those of Quebec and Montreal.

Another act required that the security given by public officers should be a guarantee also of the action of any deputy appointed by them.

The charter of the Montreal Firemen's Benefit Association was amended in accordance with a petition from the Association, in certain matters affecting the administration of its affairs.

The director of the provincial Bureau of Health was required to take the necessary steps to establish anti-tuberculous and puericultural dispensaries for the purpose of more effectively combating tuberculosis and infant mortality in the province.

The borrowing powers of the commission in charge of the Hull Technical School were extended to the limit of \$365,000 from the previous limit of \$250,000 in order to enable the commission to complete the construction of a new school building.

## NOTES RELATIVE TO LABOUR UNION ACTIVITIES

THE executive council of the American Federation of Labour whose headquarters is Washington, D.C., will hold its regular quarterly meeting in Montreal, Que., the opening session commencing on Friday, May 9.

The regular convention of the Brotherhood of Locomotive Engineers, an organization well represented in Canada, will be held in Cleveland, Ohio, commencing June 2.

A congress of the International Federation of Trade Unions with which the Trades and Labour Congress of Canada is affiliated will be held at Vienna from June 2 to June 7, 1924. The agenda of the congress is as follows:—

(1) Opening speech by president; (2) election of commission for the verification of mandates, and other commissions; (3) bureau report on activities, financial report, and auditors' report; (4) revision of rules; (5) organizational relations between the International Federation of Trade Unions and the international trade secretariats; (6) discussion of proposals received; (7) the position of the International Federation of Trade Unions in the international labour movement; (8) international social legislation; (9) the international fight against war and militarism; (10) the eight-hour day question: (a) the attacks of the employers and governments, (b) the methods of defence of the working class, including the question of works councils; (11) elections: (a) election of countries which are to appoint representatives to the management committee, (b) election of members of management committee, (c) elections of members of bureau, (d) election of international secretaries, (12) designation of country in which the next congress is to be held.

The International Federation of Trade Unions has decided to designate the third Sunday in September, 1924, as an international "Anti-War Day" in order "to provide for the working classes of the whole world an opportunity to show at one and the same time their abhorrence of war and their desire for peaceful co-operation."

During the year 1923, the Brotherhood of Railroad Trainmen expended for death, disability and funeral benefits the sum of \$3,790,361. For the same period, the Brotherhood of Locomotive Engineers paid out a total of \$2,809,506, and the Order of Railway Conductors disbursed the sum of \$1,487,500. The organization reporting the largest combined expenditure in 1923 for benefits was the International Typographical Union with a total disbursement of \$6,109,547, followed by the Brotherhood of Railroad Trainmen with an expenditure of \$5,014,743, the Brotherhood of Locomotive Engineers being third with disbursements of \$3,138,558. The largest amount expended during the year by any labour organization in North America for any one class of benefits was \$4,997,462, this total representing the sum paid out in strike disbursements by the International Typographical Union in connection with the strike for the 44-hour week. It may be of interest to note that since the commencement of the strike in May, 1921, to February 20, 1924, the total amount raised for strike purposes by assessment of the members was \$17,036,591.45, while during the same period the total strike expenditure amounted to \$15,508,336.70, leaving a surplus of \$1,528,254.75. In addition to its other benefits, the International Typographical Union maintains an old age pension system, the disbursements during 1923 for this purpose being \$770,504, which amount represents the largest expenditure during the year among labour bodies for this form of benefit. At the present time, this union has 2,196 members on its pension roll, each pensioner drawing \$8 per week.

As a result of recent deliberations, the Dominion Legislative Board of the Brotherhood of Locomotive Engineers has instructed its legislative representative, Mr. Byron Baker, of Ottawa, to make representations to the proper authorities regarding the following matters: An improvement in the methods now employed for the protection of trains stopped upon main tracks; a limitation in the number of hours which men engaged in the operation of trains may be kept on duty; the requiring of all vehicles to stop at least 300 feet before crossing a railway track; the establishment of a pension for employees of all

railways in Canada; increased income tax exemption and the establishing of a mothers' allowance act in those provinces now without such legislation.

Because of alleged membership in the Trade Union Educational League, seven members (two of whom were business agents) of Los Angeles, branch No. 58 of the United Brotherhood of Carpenters and Joiners, were expelled from the Brotherhood. Their expulsion was ordered by William L. Hutcheson, president of the Brotherhood, following a police raid on March 1st of a T.U.E.L. meeting as a result of which 30 persons were arrested and the league records confiscated. These seven expelled ex-members claim that their expulsion was of a summary nature, without advance notice or trial, and they declare that an appeal will be made, if necessary, to the general executive board and to the national convention to be held next September in Indianapolis. Two others who were expelled were reinstated after proving non-membership in the league. It is stated that more expulsions are expected from three other locals of carpenters in Los Angeles county.

Mr. Silby Barrett, who was appointed provisional president of District 26 following the revocation of its charter on July 17, 1923, has recently tendered his resignation to Mr. John L. Lewis, president of the United Mine Workers of America. In a statement made to the press, Mr. Barrett stated that his resignation was not requested by any International officer and that he had resigned voluntarily. The present incumbent in the office is Mr. Wm. Hueston, who during his long career in the U.M. W. of A., was president of Districts 8 and 11, and provisional president of District 29. In District 18, Western Canada, he was a prominent opponent of the activities of the One Big Union.

An aftermath of the miners' strike in Kansas in February, 1921, which was declared to be in violation of Kansas Court of Industrial Relations Law, was the winning, in part, before the United States Supreme Court of the appeal of August Dorchy, formerly vice-president of District 14, United Mine Workers of America, who was sentenced to jail and fined \$500 for his part in the calling of the strike. In the decision handed down on March 10, 1924, the high court ordered the judgment of the Kansas Industrial Court vacated until the Kansas Supreme Court has opportunity to pass on the validity of a section of the law under which Dorchy was convicted. Associated with Dorchy in this strike was Alex Howat, formerly president of District 14. On September 30, 1921, both officials were committed to jail. As a sequel to the case, both

Howat and Dorchy were expelled from the union by the international headquarters, which body ruled that they had called an unauthorized strike and had violated a joint agreement between the executive board of the U.M.W. of A. and the mine operators.

The National Association of Marine Engineers of Canada, which is affiliated with the Trades and Labour Congress of Canada, held its regular convention at Ottawa on February 26 to 29. Delegates were present from branches on the Pacific Coast, the Great Lakes, the St. Lawrence River and the Atlantic Coast. The principal business was the compiling of changes desired in the Canada Shipping Act with a view to affording better conditions of employment to marine engineers and at the same time assuring greater safety in the operation of both ocean-going vessels and those plying on the Great Lakes and the St. Lawrence River. These proposals will be laid before the Dominion Government in co-operation with the executive council of the Trades and Labour Congress of Canada.

The following officers were elected for the ensuing year: president, Eugene Hamelin, Montreal; secretary-treasurer, W. A. MacDonald, Halifax, N.S.

The sixth annual convention of Division No.

4, Railway Employees' Department, American Federation of Labour, was held at Montreal on March 24. There were present 280 delegates from all parts of Canada representing international unions of the following trades: boilermakers and helpers, blacksmiths, carmen, machinists, electrical workers, tinsmiths, plumbers, steamfitters, and maintenance of way employees. Mr. R. J. Tallon, president of Division No. 4, occupied the chair. Resolutions were submitted in favour of fuller autonomy for Canadian branches of international unions and amalgamation of the standard railway organizations. The resolution on autonomy was defeated without a division. The one on amalgamation was also defeated by a large majority and a substituted amendment repeating a previous declaration of Division No. 4 was adopted. The principle of co-operation between management and employees which is in operation on the Baltimore and Ohio Railroad was approved, and at the conclusion of the convention of Division No. 4, a convention of the Canadian National System Federation was held, when plans were made to put it into operation on that road. The former officers were re-elected: Messrs. R. J. Tallon, president; Frank McKenna, vice-president, and Charles Dickie, secretary.

## ANNUAL CONVENTION OF THE NEW BRUNSWICK FEDERATION OF LABOUR

THE annual convention of the New Brunswick Federation of Labour was held at Fredericton on March 18, 19 and 20, with president J. E. Tighe of St. John in the chair. A delegation from the Federation waited upon members of the provincial government and submitted its legislative programme in which was reaffirmed the action of organized labour in its presentation to the Premier's conference held in St. John on January 10 and 11, an account of which was given in the LABOUR GAZETTE for February, 1924, on pages 135 to 137.

With reference to suggestions of the Premier for the fixing of a maximum limit on compensation payments and contributions by workmen to medical aid, the labour representatives contended that industry was quite able to carry its full obligations under the act and that fatalities and permanent disabilities should be compensated for without maximum limitations. Contributions by the workers to medical aid were held to be unfair to the injured worker or his dependants.

Amendments to the Workmen's Compensation Act asked by the delegation were as follows: In case of total disability continuing for seven days after the accident, payments equal to  $66\frac{2}{3}$  per cent of the average wage of the workman, but not less than \$10 per week or more than  $66\frac{2}{3}$  per cent of \$125 per month to continue during the life of the workman or the duration of disability; payments to a widow or invalid widower to be \$35 per month; where the dependants are a widow or invalid widower and one or more children, payments at the rate of \$35 per month with an addition of \$10 per month for each child; compensation for children to be continued at the discretion of the Board until they reach the age of 18 years for educational purposes; the minimum payment to widows and invalid widowers and children to be \$30 and \$7.50 per month respectively; compensation to be payable to an invalid child without regard to age of such child, and continue as long as in the opinion of the Board it might reasonably be expected to have received support from the workman if he had continued to live; to ex-

tend the powers of the Board to enforce the collection of assessments; and to allow no appeal from the decisions of the Board on questions of law or jurisdiction, except by leave of the Board itself.

The delegation also made a request for legislation to give effect to the conventions and recommendations, arising out of the labour sections of the Treaty of Peace, relating to the following subjects held to be within provincial jurisdiction, namely: limitation of the working hours in industrial undertakings to 8 hours per day and 48 hours per week; maintenance of employment service offices and the abolishment of private agencies; restriction of the employment of women immediately prior and subsequently to childbirth; prohibition of the employment of women and young persons during the night; establishment of a minimum age for young persons entering employment; provision for one day's rest in seven for all workers.

Opposition was expressed to Bill No. 18, which was before the Legislature, and which would extend the powers of the police magistrate of Moncton in committing certain persons to workhouses, as it was felt that this

would work out as a grave injustice to workmen when they were temporarily unemployed.

The action of the government in appointing a commission of enquiry on mothers' allowances and minimum wage Acts for women was commended, and it was recommended that the powers of the commission should be extended in order that they might report to the next session of the legislature along these lines.

Other requests for legislation were: that the Election Act be amended to provide for the Hare System of proportional representation, with single transferable vote, in provincial, municipal and civic elections; that legislation be enacted for the regulation and inspection of mines, to conform to the decisions of the Unification of Labour Laws Commission; that the Factories Act be amended in respect to the examining and licensing of stationary engineers, and that boiler inspectors be appointed as provided by the Act; and that the regulations respecting the examining and licensing of master and journeymen plumbers be adopted by the Government. The development of the Grand Falls and Petitcodiac power project was also urged upon the Government, as was also the need of free school books in all public schools.

## FACTORY INSPECTION IN NEW BRUNSWICK IN 1923

THE sixteenth annual report on the operation of the factory law of New Brunswick covers the twelve months' period ending September 30, 1923. The administration of the Factories Act of 1919 is in charge of the Workman's Compensation Board. Detailed statistics concerning accidents in factories are reserved for the report for the year on workmen's compensation but a large portion of the present report relates to the subject of accidents, their causes and prevention. The Board has secured valuable suggestions from injured workers by means of a question on the form on which the workers report accidents, "What useful suggestion can you give to prevent or avoid accidents like the one herein reported?" The workers' suggestions are submitted by the Board to the factories' inspector for his information. The number of establishments inspected during the year was 392.

The number of accidents in factories incapacitating workers for at least six days, during the year, was 1,422 as compared with 1,326 in the previous year. This number includes 9 fatalities. Among the injured were 38 women and girls. Twenty-four per cent of the total number of accidents were con-

nected with machinery. In some of the industries the machine accidents were about half of the total number, but in the steel industry this class of accidents formed only nine per cent of the total. Neglect of workmen to use the guards provided, or to replace the guard which was removed for some purpose, or the disregard of some safety rule, are given as causes for some of the accidents and persons in authority are asked to enforce proper discipline in safety matters. The inspector also urges that careless employers provide adequate safeguards, pointing out that it is manifestly unfair that an avoidable accident which happens in one factory should be a financial charge on the proprietor of a similar industry who has taken precautions to prevent just such an occurrence in his establishment. Of the nine fatal accidents, two happened in sawmills and seven in a steel works. The sawmill accidents showed an increase of thirty over the previous year, the total being 214; 36 accidents, one of which was fatal, and some others very severe, occurred on lath machinery making it necessary that the inspector require that special attention be given to this class of machinery; 30 acci-

dents happened on trimmer saws; and in connection with the carriage there were 18 accidents. A number of the carriage accidents were caused by workmen being jammed between the carriage and the log skids. Nine accidents happened about boilers and engines. There were 175 accidents in other wood working industries, 72 of which were machine accidents. In the building-material factories the buzz-planer with square head cutters was prominent as the cause of severe accidents, there being four accidents on this class of machine, but there were no accidents by planers equipped with cylinder-cutting heads, many of which are being used in the industry.

One hundred and thirty-nine accidents occurred in machine shops, foundries, etc., and 30 accidents in textile mills. In the report on car-building accidents it is stated that more than the usual number of disabilities were caused by infection, which leads to the conclusion that first aid treatment was neglected although modern first-aid accommodation is provided. In the steel works

there were 586 accidents of which seven were fatal as compared with 418 of which 4 were fatal in the previous year, the increase during the period under review being probably due to the increased activity in the industry. About 50 per cent of the persons injured in the steel works were disabled for more than three weeks, and about ten per cent of the total accidents were infected injuries. Of the seven fatal accidents, three were caused by rolling stock, one was due to a workman being struck by material being lowered in a crane, one to being caught in hoist while repairing a travelling crane, one occurred when a man's feet were caught in the table-rolls, while another was caused by contact with a live electric wire. There were two cases of lead poisoning and one disability caused by inhaling the fumes of a nickel-plating solution.

The report states that employers of labour are carefully respecting the law in regard to child labour and that children are not now being employed.

## MANITOBA ECONOMIC CONFERENCE

### Permanent Organization Formed to Develop Industry in Province

**E**ARLY in the present year the Winnipeg Board of Trade began to make arrangements for a conference of representatives of various interests, industrial, agricultural, municipal and educational, in the hope of developing a common purpose and joint action among all parties concerned in the economic welfare of the province. The conference was held at Winnipeg on March 12-13, and was attended by more than 300 delegates representing about 75 various provincial organizations. The Winnipeg Trades and Labour Council had previously debated the question of taking part in the conference, and had finally as its delegates named president James Leslie, secretary W. H. Hoop and Mr. Harry Kempster. Mr. J. Allison Glenn, former president of the Manitoba School Trustees' Association, was elected chairman of the conference, the secretaries being Messrs. J. H. Curle, C. F. Roland and W. H. Hoop.

The conference took the form of addresses by prominent speakers representing important interests in the province, followed by discussions. Resolutions were adopted later embodying the general lines of policy adopted by the conference, and a permanent committee was arranged for, to give effect to these resolutions.

The Honourable John Bracken, premier of Manitoba, who attended the conference, not

in his official capacity but as an interested private citizen, gave the opening address, his subject being "The necessity of good will in the problem of readjustment." The premier said he was impressed by the sight of men of all classes met together to discuss the welfare of the province, and hoped the conference would result in removing to some extent class suspicions among the economic groups. He described the province as standing at the mercy of the world market with a high cost of production against low prices, and with high standards of living against low standards among competitors. At the same time he considered that present conditions were more hopeful than at any time for the past twenty years.

The Honourable T. A. Crerar gave an address on "Economics from the standpoint of agriculture," advocating long term credits as one solution for the present difficulties of the farming industry. He also dealt with the subject of wages in relation to agricultural production, immigration, freight rates and other matters affecting farmers.

"Economics from the standpoint of industry" was the subject of an address by Mr. C. F. Roland, secretary of the Employers' Association of Manitoba. He claimed that the existing high wages and short hours of labour were main factors in increasing prices.

He also discussed methods of reducing the cost of production, co-operation of employers and employees, immigration and its relation to cost of production "socialistic" legislation, shorter hours and other factors in the economic situation.

Mr. W. H. Hoop speaking on "Economics from the standpoint of labour," defended the higher wages now paid for labour, claiming that with labour-saving machinery in every line of manufacture and consequent saving of time and effort in production it should be possible to reduce prices and still pay more to labour. Shorter hours, he affirmed, were more than offset by the modern volume of production. He also advocated collective bargaining as a means of promoting co-operation, efficiency and increased production.

Other speakers at the conference were Mr. A. E. Parker, on the expansion of trade; Professor R. C. Wallace, on the development of natural resources; Mr. J. W. Dafoe, on the Imperial Economic Conference; Dr. J. A. McLean, president of the Manitoba University, on education; and Professor A. B. Clarke, on taxation.

A number of resolutions were adopted by the conference during its two-days' session. One resolution called for definite action by the conference in the direction of an effort to improve agricultural, educational and general provincial conditions, the result of which would be shown at the next meeting.

A resolution was endorsed, giving representation on a permanent committee of the delegates from the following branches of activity in the province: agriculture, 4 members;

industry, 2 members; commerce, 2 members; labour, 2 members; professions, 2 members; education, 2 members; transportation, 2 members; financial, 2 members; building, 2 members; municipalities, 2 members. A provisional committee of ten members was named until this permanent organization should be formed, the provisional committee being composed of Messrs. J. W. Curle, William Iverach, C. F. Roland, W. H. Hoop, S. R. Henderson, A. B. McKenzie, A. C. Emmett, E. A. Weir, E. C. Gilliat and R. R. Ramsay, with J. A. Glenn as chairman.

The permanent organization, when it has been completed, will be charged among other duties with giving effect to the following suggestions for the relief of existing depression in the agricultural industry:—

1. The development of a community pride, loyalty and progress through local organizations.
2. Economy in production through individual and joint effort in crop and live stock improvement and efficient farm management.
3. Diversification of agriculture in order to lower costs of production, distribute risks and increase annual farm revenue.
4. Encouragement of agricultural education by further development of the investigational, experimental and extension work of the Manitoba agricultural college.
5. Standardization and improvement in the quality of farm products with a view to developing a greater demand for the products of Manitoba farms.
6. The encouragement of co-operation in marketing.
7. The development of wider markets for Manitoba's agricultural products.
8. Reduction of transportation costs.
9. The development of systems of long-term credits in order to aid economic and diversified production.
10. The encouragement of selective immigration and supervised land settlement in order to develop our vast natural resources.

## LABOUR AND WAGES IN VARIOUS INDUSTRIES IN CANADA

### Report from the Dominion Bureau of Statistics on the Manufactures of Non-Ferrous Metals in Canada, 1922

THE Dominion Bureau of Statistics has recently issued a report on the manufactures of non-ferrous metals in Canada in 1922. Previous reports in this series relating to various industries were outlined in the LABOUR GAZETTE for March, 1924, and previous issues.

According to the report there were, in 1922, 325 plants in Canada manufacturing products from metals other than iron and steel. These include 9 plants producing aluminium and aluminium-ware, 83 plants fabricating brass and copper products, 19 plants in the lead, tin and zinc groups, 97 plants manufacturing precious metals, 101 plants making electrical apparatus and supplies, and 16 plants making miscellaneous articles from non-ferrous metals.

In Ontario there were 218 plants operating their products aggregating \$49,902,387 in value; in Quebec, 65 plants produced commodities valued at \$18,345,266; in Manitoba, 15 plants operated with a production of \$1,352,984; in British Columbia there were 16 plants with production valued at \$495,828; in New Brunswick, 4 plants with a production of \$374,605; in Alberta 5 plants produced \$338,871 and in Nova Scotia 2 plants produced \$45,752 of non-ferrous metal products. The total selling value of the non-ferrous metals produced in Canada in 1922 was \$70,855,693, as compared with \$72,589,883 in 1921. Capital employed in 1922 amounted to a total of \$102,208,275, or about 1.8 per cent less than in 1921. The greatest amount of capital was

invested in the manufacture of electrical apparatus and supplies, in which industry \$62,436,282 was employed; the brass and copper products group used \$17,608,876; precious metal products, \$10,653,458; the aluminium industry, \$7,632,722; lead, tin and zinc products, \$3,213,867; and other non-ferrous metal goods, \$663,070.

The total number of employees engaged in the industry during 1922 was 18,222, an increase of 283 over the average number reported for the previous year, the total for 1922 including 4,201 salaried workers (3,161 males and 1,040 females) and 14,021 wage earners (11,245 males and 2,776 females). Nova Scotia and New Brunswick employed 235 employees; Quebec, 5,025; Ontario, 12,561; Manitoba, 224; Alberta, 51; and British Columbia, 126. There were 707 employees in the aluminium industry receiving salaries and wages totalling \$817,864; 3,457 in the brass and copper industry receiving \$4,079,825; 534 in the lead, tin and zinc industry receiving \$728,502; 2,725 in the precious metal products

group receiving \$3,464,613; 10,630 producing electrical supplies receiving \$12,162,607, and 169 producing miscellaneous non-ferrous metal goods with salaries amounting to \$198,218, making a total of \$21,451,629 paid in salaries and wages (\$7,426,358 for salaries and \$14,025,271 for wages) in all the industries in 1922 as compared with a total of \$22,692,784 paid to 17,939 (4,101 salaried and 13,838 wage earners) employees in 1921. In addition to the 18,222 employees engaged in 1922, as shown above, there were 53 persons employed part time on piece work, these receiving \$17,922 for their work. The distribution of the salaries and wages paid in 1922 (outside of amount paid for piece work) by provinces was as follows: Ontario, \$14,815,528; Quebec, \$5,944,498; Manitoba, \$294,745; Nova Scotia and New Brunswick, \$195,271; British Columbia, \$145,747, and Alberta, \$55,840. The trend in employment showed a gradual improvement from a minimum of 12,762 wage-earners on the rolls in January to the maximum for the year attained in December when 15,563 persons were employed.

## MINING IN NOVA SCOTIA IN 1923

### Report of Provincial Department of Public Works and Mines

THE report of the mines department of Nova Scotia, recently received, contains full information in respect to the mines and mining operations in the province during the twelve-months' period ending September 30, 1923. The report deals with coal mines and with metalliferous mining operations, including gold, iron, manganese, silver-lead, and salt, as well as with quarries.

The coal mines worked fairly steadily throughout the year, though a decided fall in the demand for coal was recorded at the close of the period. The number of men employed at the coal mines including surface and underground workers was 12,806, as compared with 12,248 in 1922. In addition to these colliery men, the daily average number employed in accessory occupations was 3,245, raising the total number of working men engaged in connection with mining operations to 16,051 during the year. Of the 12,806 colliery men, 2,493 worked on the surface while 4,586 were engaged in actual coal cutting and 5,726 in other labour underground. The total number of "colliery days" is given as 3,330,204, an increase of 713,204 days over 1922.

The production of coal per man was 545 short tons (482 long tons) in 1923, as compared with an average of 424 short tons in

1922. This amount is slightly below the average rate of production per man during the past 16 years, namely, 556 tons, the highest rate during these years having been reached with 665 short tons in 1916. The report attempts no explanation of the variation, whether due to difficulties in working experienced in some years, the improvement of machinery, the using up of reserves at the mine head or other causes. The average rate of production per man in Nova Scotia is below the normal rate in the United States, which averaged 723 short tons in a 15-year period. The United States figures for 1923, however, are not available, and the average production per man in the mines in the United States in 1922 was only 542 short tons.

A table is given showing the number and ages of the men employed in the mines, both in actual numbers and percentages. Of the total working force 11.4 per cent were between the ages of 14 and 20 years; 30.3 per cent between 21 and 30; 24.3 per cent between 31 and 40; 19.8 per cent between 41 and 50; 10 per cent between 51 and 60; 3.3 per cent between 61 and 70; and 1 per cent over 70 years of age.

The amount of coal produced during the year was 6,179,690 long tons (2,240 pounds),

an increase of 1,537,494 long tons over 1922. The question of supplying central Canada's coal requirements from the eastern and western coal producing provinces has lately been under close consideration, and in this connection the report states that "it is hoped that a scheme may be evolved whereby Nova Scotia coal may yet be coked somewhere on the St. Lawrence, where its by-products can be marketed, its gas utilized and the coke go west to replace anthracite; or better still, the waters between Montreal and Toronto sufficiently deepened so that our coal can reach Ontario and replace American bituminous, and by semi-coking, also replace anthracite."

A section of the report deals with accidents, their number, causes, and the means

adopted for their prevention. Twenty-seven fatalities occurred underground and five at the surface during the year, showing a ratio of 2.50 per 1,000 men employed and of 5.20 per 1,000,000 tons of coal mined. (Statistics of mine fatalities during the past year were given in the LABOUR GAZETTE for March on pages 260 to 268, and comparative figures of fatalities in coal mines in various countries are given elsewhere in this issue).

The gold production of the province for the fiscal year was 535 ounces, as compared with 865 ounces in the previous year. Owing, however, to the demand for white arsenic and its presence in the gold-bearing rocks of Nova Scotia, interest in the gold districts has been revived.

## STATISTICS OF ACCIDENTS IN COAL MINING

A REPORT has been issued by the Imperial Mineral Resources Bureau, London, dealing with coal mining accidents, 1912-1922, in the British Empire and foreign countries. The following tables show the number of deaths per 1,000 persons employed in the several coal fields of Canada and in the coal

mines of Great Britain, Australia, South Africa, New Zealand, Belgium, France, Germany and the United States, also the number of deaths per one million long tons of coal raised.

The report analyses also the accidents by causes and deals with statistics of non-fatal accidents insofar as these are available.

## ANNUAL CONFERENCE OF WESTERN OFFICIALS OF EMPLOYMENT SERVICE OF CANADA

THE fifth annual conference of the Western officials of the Employment Service of Canada was held in Edmonton, March 6th to 8th inclusive. Mr. W. Smitten, Commissioner of Labour and Director of Alberta Government Employment Offices, occupied the chair. Official representatives in attendance at the conference were: British Columbia, J. D. McNiven, Deputy Minister of Labour, J. H. McVety, General Superintendent Government Employment Offices, and J. E. Kennedy, superintendent of the Cranbrook office; Alberta, W. Smitten, Commissioner of Labour, W. Carnill, superintendent of the Calgary office; W. G. Patterson, superintendent of the Edmonton office, and Mrs. E. N. McKenzie, superintendent of the Women's Division of the Edmonton office; Saskatchewan, T. M. Molloy, Commissioner of Labour and Industries, and G. E. Tomsett, General Superintendent, Government Employment Offices; Manitoba, J. A. Bowman, General Superintendent, Government Employment Offices. R. A. Rigg, Director, Employment Service of Canada, L. F. Howard, Dominion Superintendent of Western Offices, Winnipeg, and F. E. Harrison, Federal Fair Wage Officer, Vancouver, represented the Federal Department of Labour.

The conference was opened by an address from the Director, who referred somewhat eulogistically to the work accomplished by the field force of the Employment Service of Canada during the past year, which had resulted in the placing in employment of nearly 70,000 more persons during 1923 than were placed during 1922.

Mr. Bowman dealt with the problem of the handling of handicapped applicants. Mrs. McKenzie submitted a paper in which she dealt with the problems involved in the placement of female workers. Various phases of the subject of harvest labour supply and distribution were presented through the medium of papers submitted by Mr. McVety, Mr. Carnill, Mr. Patterson and Mr. Molloy. General farm labour problems were introduced for discussion in a paper prepared by Mr. M. J. McGrath, superintendent of the Saskatoon office, and read by Mr. Tomsett in Mr. McGrath's absence, while the function of the Employment Service in the placing of immigrants, both farm labour and general, was discussed after introduction by Mr. Molloy.

For the purpose of assisting in the discussion of the questions affecting farmers,

there were present at the conference Mr. R. M. Johnson, representing the Saskatchewan United Grain Growers; Mr. Schofield, representing the United Farmers of Alberta; Mr. McCallum of Saskatoon, representing the Farmers' Union of Canada, and Mr. R. G. McNeillie, General Passenger Agent, Canadian Pacific Railway, Winnipeg. Mr. McNeillie and the representatives of the farmers contributed materially to a more thorough understanding of the difficulties associated with the recruiting and distribution of farm workers.

The subject of the relation of government employment offices to strikes and lockouts was treated in two papers, one submitted by Mr. Smitten and the other by Mr. Kennedy, the latter dealing with the history of the recent I. W. W. strike in the lumber camps of the Crow's Nest Pass district.

The following subjects dealing with the technique of Employment Service work were dealt with in papers: Function of a Provincial Clearing House, Mr. Tomsett; Employment Office Forms, Mr. R. W. Brewis, superintendent of the Regina office; Manual of Procedure, Mr. Bowman; and Interprovincial Clearance by Mr. Tomsett. In connection with the latter subject Mr. Charles Howarth, president of the Mountain Lumber Manufacturers' Association, British Columbia, was present for the purpose of discussing certain difficulties which it was claimed, the members of his organization had experienced in securing the necessary supply of labour. He expressed the opinion that more elastic regulations should apply to the transfer of bush workers from Alberta to the camps of Eastern British Columbia. For the purpose of fully discussing this problem, he invited representatives of British Columbia and Alberta to attend a conference of the Mountain Lumber Manufacturers' Association which would convene at Calgary on April 1. Mr. McNiven, on behalf of British Columbia, accepted the invitation and stated that both he and Mr. McVety would attend the conference. On behalf of Alberta, the invitation was accepted by Mr. Smitten.

Following a paper by Mr. Smitten on the subject "Desirability of Discontinuing Annual Western Conferences on the Ground of Economy" a general consensus of opinion was expressed in favour of discontinuing the conferences, as it was felt that the business of the officials of the Employment Service

of Canada was to keep expenditures at the lowest possible limit consistent with efficiency. It was also generally agreed that one of the principal reasons for the establishment of these conferences no longer existed, namely, that the conferences were necessary for the purpose of educating the local superintendents in the observance of the regulations laid down

for uniform observance in all offices throughout Canada. The staffs of the various offices, it was felt, are now sufficiently familiar with procedure regulations to make the continuance of the conferences unnecessary. A resolution in favour of the discontinuance of the annual Western conference was unanimously adopted.

## UNEMPLOYMENT INSURANCE IN GREAT BRITAIN

### Report by British Confederation of Employers' Organizations

**I**N November, 1922, the Minister of Labour in Great Britain, Sir Montague Barlow, addressed to the National Confederation of Employers' Organizations, and to the Trades Union Congress General Council, a letter inviting the co-operation of these two bodies in the consideration of the steps which might be taken with a view to establishing an improved system of unemployment insurance.

In response to this invitation the National Confederation of Employers' Organizations has prepared and issued a report setting forth its opinion and recommendations for the further development of unemployment insurance. The report is of particular interest, not only because it embodies the opinion of the representative organization of employers in a country most severely affected by unemployment, but also because the proposals contained fully affirm the principle of insurance and make some novel and constructive suggestions for its improvement. Students of the problem of insurance will find therein much interesting argument dealing with technical aspects, such as insurance by industry, amalgamation with other forms of insurance, relative contributions of the state, employers and workers, etc.

#### Unemployment Insurance by Industry

Dealing with the suggestion that compulsory unemployment insurance might be developed in such a way that each industry might have its own scheme, the report urges that this would lead to considerable loss of economy in administration. Compulsory insurance by industries, says the report, is, in any event, quite impracticable on any comprehensive scale. There would be considerable difficulty—in very many instances insurmountable—in the strict demarcation between industry and industry. A substantial proportion of workers move from industry to industry; there is also a substantial proportion of workers in respect of which there is

no trade organization either on the men's side or on the employers'; there are large numbers of workers in seasonal employments and casual employments.

The report further holds that from the financial point of view it would not be practicable for even every well organized industry to have a workable scheme. The industries which depend upon world markets suffer severer fluctuations than home trades. An industry having severe trade fluctuations could not offer the advantages given in an industry with low fluctuations. Disparity between contributions or benefits would create unrest. The segregation of industries has in addition, grave objection on the ground of general principle. Insurance is founded upon the principle of averaging. All industry is interdependent; while few can go on prospering indefinitely unaffected by every other, the incidence of depression and unemployment may fall very unequally. Unemployment insurance if it is to be compulsory should be universal and uniform.

The necessity for the whole industrial population standing together upon a uniform basis is considered to be paramount and it is held that even the policy of allowing industries to "contract out" of the general insurance scheme should be discredited. Supplementary schemes should, however, be encouraged. The opinion is furthermore stated that unemployment insurance is not in any way a preventive against the fact of unemployment but it is an expedient for making provision for the worker against the normal risk of industrial life.

The report urges the importance of discontinuing the emergency measures on which, it is understood, £75,000,000 have been expended during the past two and a half years, and of placing unemployment insurance once more on a permanent basis. The proposals for a future national scheme of compulsory

insurance contained a recommendation that the State's contribution instead of being a little over one-fourth of the total contribution, should equal that of the employer and worker.

### Development of Employment Exchanges

The report strongly urges the importance of further development of the employment exchange system, and that the administration of unemployment insurance should devolve entirely on these exchanges. The hope is expressed that the system of employment exchanges will have the effect of enabling, to some extent, the authorities to guide a new generation into the trades which are not overstocked and not declining.

The suggestion that unemployment insurance should be amalgamated with other social services such as health insurance, workmen's compensation or old age pensions, does not meet with approval. The report concludes that the National Confederation of Employers' Organizations expresses the view that whatever may have been the defects of the emergency measures, initiated by the British Government, the experiment of compulsory unemployment insurance, as initiated in 1911, cannot be adjudged a failure in itself. On the contrary, experience since 1911 has proved that it is practicable in normal times to make provision by way of insurance for assisting the bona fide workman over periods of temporary and unavoidable unemployment.

## RATES OF ASSESSMENT OF INDUSTRIES FOR WORKMEN'S COMPENSATION IN ONTARIO IN 1924

THE Workmen's Compensation Board of Ontario has recently issued a table of rates of assessment of each class of industry for the current year. The provisional rates in some of these industries for 1924, together with the adjusted rates for 1923 are given below, showing some advances in the new rates. (The rates of assessment under the Workmen Compensation Act of New Brunswick were given in the LABOUR GAZETTE for January, page 29). In a prefatory note the Board explains the method followed in the fixing of rates as follows:—

For assessment and compensation purposes under the Act the industries covered are divided into 24 classes. Each class stands upon its own footing and carries its own burden, except that a very small general fund, known as the Disaster Reserve, is set aside to assist in meeting any extraordinary call that may arise in any class. With the exception of this Disaster Reserve the moneys collected are just what are considered necessary to take care of the accidents that have actually happened. Separate accounts are kept of all assessments received and all compensation and medical aid awarded for each of these classes. Each of the 24 classes of industry is thus in effect a mutual insurance association of the employers in that class. The rates for each class are fixed and the assessments made much in the same way as a municipality levies its taxes. They are governed by the requirements. The rates fixed for the year are intended to cover the burden for that year. At the beginning of the year each employer is required to furnish the Board with an estimate of his probable payroll for the year and he is assessed provisionally upon that estimate. At the end of the year the actual amount of payroll is ascertained and the assessment is adjusted accordingly, the rate provisionally fixed being also altered where the accident experience shows this to be necessary.

The rates are fixed in accordance with the accident experience. The amount of compensation and medical aid and the amount of assessments in the class for the preceding year are ascertained, an estimate being made of the amount still remaining to be paid

for accidents which, by reason of continuing disability or for lack of reports, have not been finally disposed of before the end of the year, and allowance being also made for the difference between the estimates of payroll given by employers at the beginning of the year and the actual figures as ascertained and shown in their payroll statements at the end of the year. In this way the total expenditure and the total income of the class for the year are arrived at as nearly as possible, and the sufficiency or insufficiency of the rate charged determined.

If it is seen that the rate charged has produced just sufficient money, or if the surplus or deficit is small, the rate will be maintained. If there is any considerable difference, it will be increased or decreased accordingly. It is to be remembered always that any surplus to the credit of a class remains in the class funds, and this is also taken into consideration when fixing the rates.

All industries in the same class do not necessarily nor usually, bear the same rate. The classes are subdivided into groups, and even within the group the rates are different where this is shown to be justified. The experience is kept for the group as well as for the class. In fixing the rates, however, regard must always be had to the fact that each class is an insurance group and that all lines of industry in the class must share to some extent the good or ill fortune of the class as a whole. The rating for each separate line of industry cannot be made to depend upon the experience in that particular line alone. This is especially the case where the total amount of the payrolls in any line of industry is small. To charge that line of industry with its own cost might place a very excessive burden upon its employers for one year while perhaps relieving them almost wholly from assessment another year. This would destroy the underlying principle of collective liability or mutual insurance which is the basis of the system.

Individual distinction between employers even in the same line of industry is made according to their accident experience by a system of merit rating. Where the accident cost exceeds or falls short of the amount of assessment by a stated percentage a merit rating charge or a merit rating refund, within specified limits, is made accordingly. The next application of merit rating (for a three-year period) will be considered the latter part of the present year

TABLE OF RATES FOR CERTAIN INDUSTRIES PER \$100 OF PAYROLL

Class	Industry	1923 Ad- justed	1924 Pro- visional
		\$	\$
1	Logging, woods operations, river driving, rafting booming, or loading, as a business or in an industry in this class, n.o.s.	2.00	2.00
2	Pulp mills	1.70	1.75
3	Furniture manufacturing	.50	.60
	Canoes, skiffs, or small boats manufacturing	.50	.60
4	Planing or moulding mills or sash and door factories	1.30	1.50
5	Gold and silver mining	2.20	2.40
	Shaft sinking	3.50	4.00
	Iron smelting, as a business	1.80	2.00
6	Quarries, as a business; stone crushing	4.00	4.75
7	Rolling mills or steel works, with blast furnace	1.20	1.50
8	Foundries, steel	1.50	1.50
9	Structural steel, iron, or metal, fabrication of	1.25	1.40
	Locomotive manufacturing, including boiler making	1.80	2.00
10	Light machinery manufacturing, n.o.s., machine shops, blacksmith shops employing at least four workmen, manufacturing of cream separators and the like, sporting goods, firearms, and gas and electric light fixtures	.50	.70
11	Agricultural implement manufacturing	.40	.50
12	Petroleum products, manufacturing	.75	.90
	Ice business, natural ice, cutting and storing, as a business	2.00	2.50
13	Milling or manufacture of cereals	1.00	1.20
14	Packing houses or abattoirs employing at least four workers	.60	.70
15	Dairy products, manufacturing, employing at least six workers	.50	.70
	Bakeries, employing at least six workers, biscuit and confectionery manufacturing	.50	.60
16	Tanneries	.75	.75
	Boots, shoes, or gloves other than rubber manufacturing (except in immediate connection with a retail store)	.15	.15
17	Weaving manufactories, textiles, fabrics, cloth, blankets, canvas, bags, felt, felt hats, hair cloth or hair goods, manufacturing	.50	.60
18	Clothing, whitewear, shirts, collars, corsets, hats other than felt, caps, furs, robes, or neckties manufacturing (except in immediate connection with a retail business)	.05	.10
19	Printing and publishing, including incidental job work	.20	.30
20	Teaming or cartage, n.o.s.	1.50	1.60
21	Road or street making or repairing or culvert or small bridge construction	1.60	1.80
22	Electric power or transmission lines, construction of	1.25	1.75
23	Structural steel, erection of	2.50	4.00
24	Brickwork or stone masonry, n.o.s.	1.10	1.50

## THE EMPLOYMENT SITUATION AT THE BEGINNING OF MARCH, 1924, AS REPORTED BY EMPLOYERS

THE fluctuations in employment reported by employers in different divisions of industry on March 1 practically balanced each other and caused the index number to stand at 90.7 as compared with 90.6 at the beginning of February. During the corresponding period of last year the index was 89.9, in 1922, it was 81.9 and in 1921, 88.0. The curve in the accompanying chart reflects the steady employment situation recently indicated. It may also be seen that the curve continues to be on a higher level than during the same period of the two preceding years.

According to returns tabulated by the Dominion Bureau of Statistics, 5,886 firms employed an aggregate working force of 748,537 persons, which was substantially the same as that reported by the same employers at the beginning of February. Continued recovery was indicated in manufacturing as a whole; communication, metallic ore mining, shipping and stevedoring, highway and railway construction and maintenance also recorded improvement. On the other hand, the commencement of seasonal dullness in logging

caused the first decline in employment that has been reported in this division since the beginning of August, 1923. Coal-mining showed substantial reductions; steam railway transportation, building construction and trade also registered considerable curtailment of activity.

Quebec and British Columbia recorded increased activity, while in the remaining provinces employment was in less volume than at the beginning of February. In the Maritime District recovery in rolling and forging mills was largely offset by curtailment in logging and in coal-mining. Textile, iron, steel and some other factories in Quebec reported greater activity; telephones, railway transportation, and construction and maintenance also afforded increased employment. On the other hand, building construction was very much less fully employed, logging camps, tobacco factories and breweries were slacker. In Ontario iron, steel, non-ferrous metal, lumber, rubber and some other manufacturing concerns recorded larger working forces, which were also indicated in metallic ore mines, on

telephones and in railway construction. Textile works, logging camps, steam railway operation and building construction reported decidedly less employment than in the preceding month. The only marked changes in the Prairie Provinces were the heavy declines in coal mining, railway transportation, construction and maintenance. Considerable improvement was registered in logging in British Columbia and increased activity was also indicated in lumber mills, shipping and stevedoring, highway and railway construction and maintenance. The index numbers of employment by provinces are shown in the following table:—

District	Relative Weight	Mar. 1 1924	Feb. 1 1924	Mar. 1 1923	Mar. 1 1922	Mar. 1 1921
Maritime provinces.....	8.3	82.4	83.2	90.7	80.7	90.7
Quebec.....	27.5	93.5	92.8	87.9	80.6	88.7
Ontario.....	42.7	89.8	90.0	90.8	81.7	86.2
Prairie provinces.....	12.8	98.6	92.1	88.9	84.4	91.0
British Columbia.....	8.7	97.1	92.7	92.0	85.3	87.3
Canada.....	100	90.7	90.6	89.9	81.9	88.0

An analysis of the returns by cities shows that Montreal, Ottawa and Vancouver recorded increased activity, while in Toronto, Hamilton and Winnipeg curtailment was indicated. Reports were tabulated from 722 employers in Montreal, employing 100,253 persons, which was less than one per cent more than on February 1. Considerable improvement was reported in iron, steel and textile factories, and telephones also employed a slightly larger number of workers. Tobacco works, breweries and building construction, on the other hand recorded decidedly less activity. The largest declines in Toronto occurred in textile works and in printing establishments. Telephone operation, iron, steel and non-ferrous metal product works, however, registered increased activity. An aggregate payroll of 92,821 persons was reported by the 816 employers making returns in Toronto; at the beginning of February these same firms had 93,323 workers in their employ. The most pronounced change in Ottawa was an increase in employment in pulp and paper mills. The tendency, apart from this, was generally unfavourable, according to returns from 127 employers of labour. Their staffs, at 9,551 persons, were larger by 88 workers than in the preceding month. Iron and steel works in Hamilton reported considerable revival, but declines in textile and tobacco factories and in building construction offset this increase and caused a shrinkage of 1.3 per cent in the employment afforded by the reporting concerns. The payrolls of these employers, 202

in number, aggregated 25,361 persons as compared with 25,706 in the preceding month. The changes in Winnipeg were not pronounced; the reductions in printing shops and building construction, affecting slightly more than 50 persons in each case, were the largest. Statements were tabulated from 297 employers, having 23,923 persons in their employ at the beginning of March, as compared with 24,130 in the month before. Activity in shipping and stevedoring caused a fairly large increase in employment in Vancouver. The working forces of the 228 firms making returns totalled 20,505 persons during the period under review as compared with 19,920 in the month before. The following table shows the index numbers of employment in the six cities for which separate tabulations are made:—

City	Relative Weight	Mar. 1 1924	Feb. 1 1924	Mar. 1 1923	Mar. 1 1922
Montreal.....	13.4	87.7	87.1	85.9	80.5
Toronto.....	12.4	84.5	84.7	85.7	81.9
Ottawa.....	1.3	89.3	89.7	92.2	
Hamilton.....	3.4	83.0	84.3	89.2	
Winnipeg.....	3.2	83.8	84.7	86.4	82.6
Vancouver.....	3.7	94.2	91.1	90.4	91.1

**The Manufacturing Industries**

The volume of employment in manufacturing as a whole was slightly greater than at the beginning of February. Considerable improvement was shown by rolling and forging mills, in automobile, structural iron, agricultural implement, heating appliance, sheet metal, lumber, lead, tin, zinc and copper works. Sugar refineries, confectionery and rubber factories registered slight expansion. Musical instrument, textile, tobacco, brewing and electric current plants, on the other hand, were slacker. According to reports from 3,831 manufacturers, the number of persons employed in their factories was 425,376 as compared with 421,437 at the beginning of February. The difference represented an increase of about 1 per cent, which was considerably less than the expansion recorded at the beginning of March, 1923. The index number then, moreover, was slightly higher than at the present time, although employment in these industries continued to be better than at the same period of 1922 and 1921.

LUMBER AND PRODUCTS.—A further though smaller increase in employment was reported in the lumber industry at the beginning of March, when 844 persons were added to the working forces of the 703 reporting firms. Their payrolls stood at 41,197 as compared with 40,353 in the preceding month. This increase

of 2.1 per cent was fairly evenly divided among sawmills, furniture and vehicle factories. While all provinces shared to some extent in the improvement, the gains in Ontario and British Columbia were much the largest. A very slightly greater increase had been indicated during the same period of last year, when the index number stood somewhat higher.

**MUSICAL INSTRUMENTS.**—Factories turning out musical instruments in Ontario were less fully engaged than in the preceding month, and also than during the corresponding month of 1923. According to returns from 37 firms, they employed 2,519 persons as compared with 2,695 on February 1. The difference represented a decline of 6.5 per cent.

**PLANT PRODUCTS—EDIBLE.**—Sugar refineries and confectionery works were busier than at the beginning of February, while canneries and bakeries afforded rather less employment. Improvement was recorded in the Maritime Provinces and Quebec, while elsewhere the tendency was slightly unfavourable. Statements were received from 305 manufacturers with an aggregate payroll of 24,564 persons, or 1 per cent more than in the previous month. Additions to staff on a much larger scale had been indicated on March 1, 1923, but employment then was in practically the same volume as during the month being surveyed.

**PULP AND PAPER PRODUCTS.**—Employment in pulp and paper mills increased by over one per cent, but the improvement was largely offset by declines in printing and publishing shops. A combined working force of 51,097 persons was reported by the 460 firms making returns, who had employed 51,047 workers on February 1. Firms in Ontario and British Columbia recorded moderate gains, while elsewhere the general tendency was downward. Considerable additions to staffs had been indicated during the corresponding period of last year, but the index number then was lower than at the present time.

**RUBBER PRODUCTS.**—Rubber footwear plants in Quebec employed a smaller number of persons, partly owing to the closing of a large factory. In Ontario, however, increased activity was indicated in footwear and tire works. The number of persons employed by the 31 reporting firms was 10,561 as against 10,402 at the beginning of February. This increase of 1.5 per cent was very much smaller than that reported on March 1, 1923, when employment had been in greater volume.

**TEXTILE PRODUCTS.**—There was a decline of .3 per cent in the employment afforded in the textile division, largely on account of curtail-

ment in garment, personal furnishing and cotton factories. The production of lace, embroidery and narrow fabrics, however, showed an increase. Reports were tabulated from 578 textile manufacturers, employing 68,763 persons as compared with 68,952 at the beginning of February. There was a pronounced increase in employment in this division in Quebec, but in the Maritime Provinces and Ontario contractions were recorded. Considerable improvement had been indicated during the corresponding period of last year, when employment in textiles was in greater volume.

**TOBACCO, DISTILLED AND MALT LIQUORS.**—Contractions in employment were indicated in tobacco works and breweries, chiefly in Quebec and Ontario, 660 persons or 5.7 per cent of the payroll having been released by the 99 concerns making returns throughout Canada. They employed 10,987 persons as compared with 11,647 on February 1. Declines on a much smaller scale had been indicated on March 1, 1923, but the level of employment then was lower than at the present time.

**ELECTRIC CURRENT.**—Plants producing electric current in Quebec and British Columbia were not so busy as in the preceding month. A total payroll of 10,789 persons was indicated by the 88 reporting plants, which had employed 10,894 workers on February 1. A decline of practically the same size had been shown during the same period of last year, but the index number then was not as high as at the present time.

**IRON AND STEEL PRODUCTS.**—Rolling and forging mills, automobile, agriculture implement, steel shipbuilding, heating appliance, structural iron and steel and sheet metal works were decidedly more fully employed than in the last report. The greatest improvement occurred in the Maritime Provinces, Quebec and Ontario. During the corresponding period of last year the index number of employment had been somewhat higher, the increase recorded then exceeding that reported on March 1, 1924. Reports were compiled from 645 manufacturers, employing 124,747 persons as compared with 121,261 in the preceding month. The difference represented an increase of 2.9 per cent.

**NON-FERROUS METAL PRODUCTS.**—Lead, tin, zinc and copper plants in Quebec and Ontario reported larger payrolls than in the preceding month. There was an increase of 475 persons or 4.2 per cent in the payrolls of the 110 manufacturers of non-ferrous metal products making returns, whose staffs aggregated 11,721 persons on March 1. This increase is somewhat larger than that recorded at the

beginning of March, 1923, when conditions were not so good.

**MINERAL PRODUCTS.**—Factories producing mineral products, petroleum, baking powder, etc., were slightly less fully engaged than in the preceding month. The declines were recorded largely in Ontario. Reports were received from 72 manufacturers of mineral products, employing 8,931 persons, as compared with 9,070 on February 1. There was, therefore, a decline of 1.5 per cent. The situation continued to be more favourable than during the same period of last year, although additions to staff had been indicated at that time.

**Logging**

For the first time since the end of last July, the trend of employment in logging was downward. This movement repeats that indicated at the beginning of March, 1923; the decline then, however, was somewhat larger and the index number stood about two points lower than during the period under review. All provinces except British Columbia shared in the contractions indicated on March 1, 1924. In that district substantial improvement was recorded. The number of persons employed by the 226 logging concerns making returns was 34,926 as compared with 36,611 in the last report. This was a decline of 4.6 per cent.

**Mining**

**COAL MINING.**—The Maritime and Prairie coal fields reported considerable curtailment of operations at the beginning of March, when 2,231 persons were released from the staffs of the 94 operators making returns throughout the Dominion. As their working forces comprised 27,880 persons during the month under review as compared with 30,111 on February 1, there was a decrease of 7.4 per cent. Contractions, though on a somewhat smaller scale, had been registered at the beginning of March, 1923, but employment then was on a much lower level than at the present time.

**METALLIC ORES.**—The production of silver, gold, nickel and copper provided work for a larger number of workers than in the preceding month. The 49 mines making returns increased their personnel from 12,856 persons on February 1 to 13,085 at the beginning of March. Firms in Ontario reported the bulk of this increase of 1.8 per cent, but improvement was also indicated in British Columbia. Additions to staff had been recorded at the beginning of March of last year, when employment was in much smaller volume.

**Communication**

Increased activity was indicated in the

communication division as a whole, the improvement being recorded chiefly on telephones in Quebec and Ontario. One hundred and seventy-one concerns in the communica-

Industry	Relative Weight	Feb. 1, 1924	Jan. 1, 1924	Feb. 1, 1923	Feb. 1, 1922

tion group registered an aggregate payroll of 21,729 persons as compared with 21,411 in the last report. This increase of 1.5 per cent exceeded that recorded on March 1, 1923; employment then was on a considerably lower level during the month being surveyed.

**Transportation**

**STEAM RAILWAYS.**—The downward movement in employment on steam railways that began during December continued, though with abated force, at the beginning of March, when 1,248 persons were released by the 105 concerns and divisional superintendents making returns. They employed 75,837 persons as compared with 77,085 on February 1. Somewhat smaller declines had been recorded during the corresponding period of last year, the index number stood rather lower than during the month under review.

**SHIPPING AND STEVEDORING.**—Substantial improvement was indicated in shipping and stevedoring in British Columbia, while elsewhere little change was shown. Returns were compiled from 50 firms, employing 9,905 persons or 6.3 per cent more than in the preceding month. Contractions had been reported at the beginning of March, 1923, and the index number then was lower.

**Construction and Maintenance**

**BUILDING CONSTRUCTION.**—Further reductions in employment, affecting 1,751 persons or 10 per cent of the payroll, were reported by building contractors on March 1. Less extensive losses had been indicated on the same date of last year, but the situation then was not so favourable as at the present time. According to returns from 301 contractors, their staffs declined from 17,263 persons on February 1 to 15,512 on March 1. Firms in Quebec reported the bulk of this decline, but there was also a falling off in employment in Ontario.

**HIGHWAY CONSTRUCTION.**—Employment on public highways in British Columbia was more active than in the preceding month, while in the remaining provinces conditions

remained practically unchanged. Statements were received from 65 concerns, employing 3,206 persons as compared with 2,973 in the last report. At the beginning of March, 1923, a large number of men had been released from employment in this division.

**RAILWAY CONSTRUCTION AND MAINTENANCE.**—Further improvement was registered by the construction and maintenance departments of the railways, 952 persons having been added to these staffs since the beginning of February. As the 27 concerns and divisional superintendents making returns employed 29,160 persons, as compared with 28,208 on February 1, this was an increase of 3.4 per cent. The majority of the additionally employed men were reported in Quebec, Ontario and British Columbia, while in the Prairie Provinces there was a fair sized decline. Additions to staffs on a very much smaller scale had been indicated on March 1, 1923, and the level of employment then was slightly slower than at the present time.

**Trade**

Both wholesale and retail traders reported some curtailment of personnel at the beginning of March. Slight fluctuations were recorded in different districts, the largest declines occurring in the Prairie Provinces. An aggregate sales force of 55,147 persons was indicated by the 611 establishments making returns, who had employed 55,345 in the preceding month. This reduction was very much less extensive than that recorded during the corresponding period of last year, when employment was in smaller volume.

The table on page 319 gives the index numbers of employment by industries as on March and February 1, 1924, and March 1, 1923 and 1922. The first column, as usual, shows the proportion of employees in each industrial group in relation to the total number of workers reported in all groups for the month under review. (Number of workers employed in January, 1920, equals 100).

## EMPLOYMENT OFFICE REPORTS FOR FEBRUARY, 1924

THE offices of the Employment Service of Canada reported an increased volume of business during the month of February, 1924, as compared with the preceding month and with the corresponding period of last year. The accompanying chart, which presents the returns from the offices on the basis of daily averages over half month periods, shows a further marked expansion in applications, vacancies and placements, during the first half of the month, the curves rising to a level higher than at any time during the spring of 1922 and 1923. However, this level was fairly well maintained throughout the latter part of the month. The increased activity was due largely to the casual and temporary work available after the heavy snow storms in Eastern Canada. While this enlargement in business is most noticeable in the casual departments, it is evident from the accompanying table that placements in work of a more permanent nature were slightly more numerous in all the provinces than in the preceding year. A summary of the reports from the offices shows that the average number of applications reported during the first half of February was 2,058 daily as compared with 1,544 daily during the preceding period and with 1,484 daily during the same period of 1923. Applications during the latter half of the month averaged 1,930 daily as compared with 1,588 daily during the same period a year ago. The average number of vacancies reported daily to the offices during February was 1,657 during the first half and 1,623 during the latter half of the month as compared with 1,288 and 1,290 daily during the same periods in February 1923. During the latter half of January of this year vacancies averaged 1,209. Placements effected during the first half of February averaged 1,592 daily as compared with 1,040 daily during the preceding period and with 1,156 during the corresponding period a year ago. During the latter half of the month placements averaged 1,521 daily in contrast with 1,136 daily during the same period in 1923. The average number of placements in regular employment was 555 and 503 daily during the first and second half of the month respectively, while those in casual work averaged 1,037 and 1,018 daily.

The following table gives the placements effected to date by the offices of the Employment Service.

During February, 1924, the offices made 40,389 references to employment and effected a total of 38,947 placements. Of these the placements in regular employment numbered

Year	Regular	Casual	Total
1919 (10 months).....	268,001	37,904	305,905
1920.....	366,547	79,265	445,812
1921.....	280,518	75,238	355,756
1922.....	297,827	95,695	393,522

1924 (2 months).....	28,486	40,329	68,815

13,249, of which 10,641 were of men and 2,608 of women, while the placements in casual work totalled 25,698. Applicants registered for work numbered 49,915, of whom 41,669 were men and 8,246 were women, while the vacancies reported by employers were 34,437 for men and 6,579 for women, a total of 41,016.

Placements in regular employment by provinces were as follows: Nova Scotia 352 men, 65 women; New Brunswick 161 men, 74 women; Quebec 372 men, 404 women; Ontario 5,531 men, 909 women; Manitoba 978 men, 358 women; Saskatchewan 1,058 men, 291 women; Alberta 1,167 men, 302 women; British Columbia 1,022 men, 205 women.

## MARITIME PROVINCES

The seasonal slackness was maintained throughout the month. Construction work showed a slight improvement, while a decline was reported in employment in other industries. At Halifax, Chatham and Moncton, some building mechanics were placed at work on repairs and on municipal relief works. Owing to the continued mild weather the usual number of casual jobs on street cleaning, etc. was not available. Calls were received from operators in the logging districts for choppers, pulp wood cutters, sawyers and teamsters. At St. John and Moncton saw mill workers were in demand, while at Chatham, N.B. ice cutting and hauling employed a few workers. The mining industry was quiet with a few vacancies for experienced coal miners in Moncton, which were filled with difficulty.

## QUEBEC

Contractions were shown in the building and construction groups, the vacancies reported being for carpenters, plasterers and inside workers. The heavy snow storms throughout the province gave employment to numbers of men on railway lines and in the municipalities. A seasonal lull was noted in the logging group, the camps being fully supplied with workers. Little demand was anticipated until the calls for river men later in the season. Manufacturing industries were very quiet with an improvement anticipated for the month of March.

## ONTARIO

With seeding operations to be considered, farmers in Ontario were sending to the offices calls for experienced workers, a sufficient supply being registered. The offices in the Niagara Peninsula and near Toronto showed the largest expansions in this group. The peak of unemployment seems to have been reached during the month, the "out of work" being provided with temporary employment on city relief works. After the unusually heavy storms during the month large numbers of men were required for snow clearing by municipalities, railway companies and householders, and for a few days the registered unemployed at the offices was at a minimum for this season of the year. Very few permanent positions were offered for building and construction tradesmen, although the superintendents were unanimous in reporting brighter prospects for this group in the spring. At Chatham and Fort William a few vacancies were filled for railway section gangs and steel track layers. At some of the northern offices the bulk of the employment afforded was in the logging group, North Bay, Port Arthur, Fort William and Timmins, reporting an active call for experienced hookmen, teamsters, tie makers and cord wood cutters. The ice harvest was nearing completion and at Chatham, North Bay and Sarnia, workers were required for hauling and cutting. The temporary depression of the winter period in the manufacturing industries seemed to have reached its maximum during the early part of the month and latterly an expansion in business, especially in steel, rubber and textile industries was reported. At Chatham many workers were taken on for the sugar factories.

## MANITOBA

A normal seasonal slackness was shown in this province with a slight betterment in employment from the preceding month. A steadily increasing demand for farm workers was satisfied without difficulty from Winnipeg, Portage la Prairie and Brandon. This group together with the logging group formed the main sources of employment throughout the month. Calls for general bushmen, tie makers and cord wood cutters for the camps in Ontario and in Manitoba were received and filled from Winnipeg. Employment other than casual was not available in the construction groups and from Winnipeg and Brandon was reported a declining demand for casual labourers. Civic relief measures continued to provide many with work. The placement of women as housekeepers and domestics for rural districts increased considerably, while a steady demand for urban workers was reported.

## SASKATCHEWAN

An anticipated increase in the demand for agricultural workers was reported at most of the Saskatchewan offices, and experienced applicants were available in the majority of districts. A difficulty was felt in filling the calls for couples for farms, the restriction on these orders being "no children". Slackness was shown in activities in the construction group. In the logging industry numbers of orders remained unfilled, as owing to the lateness of the season few workers were willing to go to the woods. A number of men were transferred from Prince Albert, Regina and Saskatoon to camps in British Columbia.

## ALBERTA

The demand in the agricultural group showed little change, a steady call for farm workers being received at the offices. Some relief measures were in progress employing a number of building labourers near Calgary, Edmonton and Medicine Hat. A few section labourers and trackmen were placed at Calgary and the other offices. A brisk demand for the spring was anticipated. A continued call for loggers was shown with a decline in placements within the province, though a number of bush men were placed in camps in British Columbia. The mining industry was quiet, a few pick miners being required near Drumheller and Lethbridge.

## BRITISH COLUMBIA

A slight improvement in employment toward the latter part of the month was reported, due to the opening up of some construction, building and irrigation work. The number of vacancies available was not large, however, and at many of the offices a large number of unemployed were registered. A slight though persistent demand for tie makers was met with difficulty at Revelstoke, Vernon, Prince George and Vancouver. Only a few vacancies were listed in the mining group, the calls being registered at Vancouver, Cranbrook and Prince Rupert. Quietness prevailed along shore. The women's section reported a steady and normal demand for permanent household workers, with a decrease in the number of calls for charwomen and casuals.

**The Movement of Labour**

During February, 1924, the offices of the Employment Service made 13,249 placements in regular employment, of which 7,581 were of persons for whom the employment found was outside the immediate locality of the offices at which they were registered. Of the latter 1,724 were granted the Employment Service reduced transportation rate, 931 going to points within the same province as the dispatching office and 793 to other provinces

Quebec offices issued 63 certificates during the month, 29 of which were given to bushmen going from Hull and Montreal to points near North Bay, Pembroke and Sault Ste. Marie. From the office at Quebec one domestic was transferred to employment within the zone and from Montreal 33 bushmen were sent to the lumber camps in Quebec. Transportation vouchers granted by Ontario offices numbered 430. Of these 380 were bushmen, 4 were miners, 36 construction labourers, 2 moulders, 2 carpenters and the remainder domestic workers going to various points in the province. In Manitoba 421 persons benefited by the reduced rate, 98 going to points within the province and 323 to other provinces. More than 70 of the provincial transfers were of farm hands, 8 were housekeepers and generals for rural districts, 3 were waitresses, 7 were bushmen; and one sawyer, one teamster and one cook were transferred. From Winnipeg to points in Saskatchewan 13 farmers and 9 farm housekeepers were transferred to various points, one coal miner to Estevan, one hotel housekeeper to Regina and one stock tender to Prince Albert. To Edmonton the office at Winnipeg transferred one farm hand and to Cranbrook, B.C. one bushman was sent from Brandon. The transfers to Ontario totalled 291, including bushman, loggers, blacksmiths, machinists, sawyers and a few station workers going to points near Timmins and Port Arthur. Certificates issued by the Saskat-

chewan offices numbered 500, of which 411 were bushmen transferred to Cranbrook, Revelstoke and Prince George, B.C. Of the 89 provincial transfers 64 were of bushmen, 12 were farm hands, 8 women domestics, one teamster, one porter, one bridge labourer and one teacher and a cook. Of the 204 persons despatched to employment at a distance from the Alberta office 17 were bushmen going from Calgary to Cranbrook, B.C.; 10 were farm hands going from Edmonton and Calgary to Saskatoon. More than 100 were of bushmen going to lumber camps near North Bay and Edmonton, 48 were farm hands, 2 were miners going to Edmonton and one from Calgary to Lethbridge, the remainder included teamsters, dairy men, blacksmiths and mill labourers going to points in the Edmonton zone. From the Vancouver office were transferred one diamond driller to Calgary, one farm hand to Edmonton and one farm helper to Moose Jaw. The provincial transfers numbered 103, of which 60 were of bushmen, tiemakers and sawyers going to the camps near Prince George and Prince Rupert, 25 were miners and machine runners, the remainder being of labourers and unskilled workers.

Of the 1,724 persons benefiting by the Employment Service reduced rate 965 were carried by the Canadian National Railways, 743 by the Canadian Pacific Railway, 12 by the Pacific Great Eastern Railway and 4 by the Temiskaming and Northern Ontario Railway.

**BUILDING PERMITS ISSUED DURING FEBRUARY, 1924**

ACCORDING to reports from 56 cities tabulated by the Dominion Bureau of Statistics, the value of building permits issued declined from \$4,021,088 in January to \$3,657,525 in February, 1924. In February, 1923, these cities had authorized building to the value of \$5,599,821. There were, therefore, reductions of \$363,563 or 9 per cent during February as compared with the preceding month, and of \$1,942,296 or 35 per cent as compared with February of last year.

Thirty-six cities furnished detailed statements showing that they had issued approx-

Nova Scotia, with a gain of \$151,063 or 465 per cent, registered the most pronounced proportional increase. In New Brunswick, Quebec, Ontario and Manitoba there were declines in the value of building authorized in this comparison. The twenty-six Ontario cities reporting showed the most extensive actual decrease, of \$828,779 or 32.8 per cent. The percentage reduction of 84.1 per cent in New Brunswick, however, was the greatest proportional loss.

A comparison between the figures for February, 1924, and those for the same month of

Accumulative Total for 56 cities—first two months.....				Total—56 cities.....	3,637,525	4,021,088	5,599,821
					1924	1923	1922
				Total—35 cities.....	3,133,553	3,617,208	4,484,110
					7,678,613	9,656,834	7,966,002

imately 475 permits for dwellings estimated to cost some \$1,900,000 and for nearly 900 other buildings at a proposed cost of over \$1,600,000. The number of buildings to be erected is usually greater than the number of permits issued, since the construction of several buildings may be authorized by a single permit.

As compared with January, 1924, Nova Scotia, Saskatchewan, Alberta and British Columbia registered increases in the value of the building permits issued. British Columbia, where the total exceeded that for the preceding month by \$367,648 or 98.6 per cent, showed the largest actual increase, while

last year shows that Ontario and Saskatchewan recorded decreases in the estimated value of building. In the former there was a reduction of \$2,435,138 or 59 per cent and in the latter of \$38,950 or 51 per cent. Of the remaining provinces, Quebec, with an increase of \$291,895 or 59 per cent, recorded the largest actual gain, but Nova Scotia reported the greatest proportional increase.

Montreal and Winnipeg registered decreases in the value of the building permits issued as compared with January, 1924, but increases over February of last year. In Toronto there was a slight decline as compared with the preceding month and a large reduction in

comparison with the returns for February, 1923. Vancouver recorded substantial improvement as compared with January and a rather small contraction as compared with the corresponding month of last year. Halifax, Moncton, Three Rivers, Guelph, Kingston, Oshawa, Ottawa, Sault Ste. Marie, Welland, Windsor, St. Boniface, Regina, Edmonton, Nanaimo, New Westminster, Point Grey and South Vancouver reported increases in the value of estimated building as compared with January, 1924, and also as compared with February, 1923.

The value of the building permits issued

during the first two months of this year was \$7,678,613 as compared with \$9,656,834 in 1923, \$7,966,002 in 1922 and \$6,063,345 in 1921. There was, therefore, a decline of 20.5 per cent in comparison with the 1923 figures and of 3.6 per cent as compared with 1922 and an increase of 26.6 per cent as compared with 1921.

The table on page 325 shows the value of the building permits issued during February, 1924, as compared with January, 1924, and with February, 1923. The thirty-five cities for which records are available since 1910 are marked by asterisks.

## SETTLEMENT OF DISPUTE BETWEEN THE BROTHERHOOD OF MAINTENANCE-OF-WAY EMPLOYEES AND SHOP LABOURERS AND THE RAILWAY ASSOCIATION OF CANADA

### Supplement "A" to Wage Agreement No. 7

IN connection with a dispute as to changes of wages and working conditions between the maintenance-of-way employees and shop-labourers on the principal Canadian railways and the railway companies, members of the Railway Association of Canada, a Board was established under the Industrial Disputes Investigation Act on August 23, 1923, and a unanimous report was made on October 18, 1923. (LABOUR GAZETTE, November, 1923, p. 1198). The employees' claims were two: first that employees should be brought under the terms of the agreement after one month's service, instead of six months, as before; second, an increase in rates of pay of five cents per hour. The rates for labourers had been reduced from 48½ cents per hour (reached in May, 1920) to 40 cents per hour in July, 1921, and to 35 cents per hour in July, 1922, but they were raised to 37 cents on November 1, 1922. (LABOUR GAZETTE, April 1923, p. 403, and various preceding issues). The clause providing for the payment of punitive rates for overtime after eight hours was changed in 1922, to provide for *pro rata* rates for the 9th and 10th hours, and time and one half only after the tenth hour.

The Board recommended that the probationary term be one month as claimed by the

employees, instead of six months; that experience of one year elsewhere should be accepted as entitling a carpenter to the maximum rate instead of one year's experience on the railway only; and that all employees receiving less than forty cents per hour should be advanced two cents per hour.

The railway companies refused to accept the award of the Board and after the employees had taken a vote in favour of a strike, negotiations were resumed and an agreement was reached to be effective from April 1, 1924. The new agreement provides that four months, or six months' experience in similar work, shall entitle an employee to come under the terms of the agreement, instead of one month as claimed by the employees and recommended by the Board. No changes in wages were made, but punitive rates for overtime at time and one half after eight hours were restored for most classes of work, and there were minor adjustments in various working conditions and rules tending to provide better remuneration for employees. The recommendation of the Board that a year's experience elsewhere should entitle carpenters to maximum rates was adopted, except that it was provided that he should be able to give evidence of such experience.

## FAIR WAGE CONTRACTS, MARCH, 1924

**D**URING March, the Department of Labour received for insertion in the *Labour Gazette* the following information relative to nine fair wage contracts awarded by the Department of Public Works of Canada. All of these contracts contain the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour employed.

A statement was also received as to supplies ordered by the Post Office Department subject to the regulations for the suppression of the sweating system and the securing of fair wages, etc.

### DEPARTMENT OF PUBLIC WORKS

Supply and installation of machinery required for operation of dry dock now being constructed, Esquimalt, B.C. Name of contractors, Hodgson, King and Marble, Vancouver, B.C. Date of contract, February 13, 1924. Amount of contract, \$312,091.

Alterations to Detention Building (Savard Park), Quebec, Que. Name of contractors, A. Deslauriers, Limited, Quebec, Que. Date of contract, February 28, 1924. Amount of contract, \$61,000.

Alterations to Rockhead Hospital (minor infectious diseases), Halifax, N.S. Name of contractors, Keefe Construction Company, Halifax, N.S. Date of contract, March 11, 1924. Amount of contract, \$15,317.

Removal of damaged section of revetment wall in G. T. Basin, (Mission River), Fort William, Ont. Name of contractors, Canadian Dredging Company, Limited, Midland, Ont. Date of contract, March 1, 1924. Amount of contract, \$5,000.

Completion of third north jetty, Steveston (Fraser River), B.C. Name of contractors, N. E. Broley and H. F. Martin, Vancouver, B.C. Date of contract, February 23, 1924. Amount of contract, schedule of prices as set forth in contract.

Reconstruction of public wharf and dredging basin and boat channel, Pembroke, Ont. Name of contractor, William Bermingham, Kingston, Ont. Date of contract, March 5, 1924. Amount of contract, schedule of prices as set forth in contract.

Extension of frostproof warehouse at Berth No. 14, St. John West, N.B. Name of contractor, Parsons-Ed. Company, Limited,

Moncton, N.B. Date of contract, February 12, 1924. Amount of contract, schedule of prices as set forth in contract.

Reconstruction of damaged section known as revetment wall in G. T. Basin (Mission River) Fort William, Ont. Name of contractors, Thunder Bay Harbour Improvement Company, Limited, Port Arthur, Ont. Date of contract, February 29, 1924. Amount of contract, schedule of prices as set forth in contract.

Reconstruction of approach to pierhead of "Young Wharf", Caraquet, N.B. Name of contractor, Thomas B. Charleson, Ottawa, Ont. Date of contract, March 20, 1924. Amount of contract, schedule of prices as set forth in contract.

### POST OFFICE DEPARTMENT

The following is a statement of payments made in March, 1924, for supplies ordered by the Post Office Department subject to the regulations for the suppression of the sweating system, the securing of fair wages, and the performance of work under sanitary conditions:—

Nature of Order	Amount of Order
Making metal dating stamps and type and other hand stamps and brass crown seals.....	\$ 773 99
Making and repairing rubber stamps, daters, etc	229 85
Making up and supplying letter carriers' uniforms, etc.....	16,106 17
Scales, hampers, etc., repaired.....	64 75
Stamping pads, ink, etc.....	677 15
Mail bag fittings.....	1,290 51
Mail bagging.....	924 85
Letter carriers' satchels.....	4,145 95

The British Chancellor of the Exchequer in a recent statement in the House of Commons intimated that the Government had instituted an inquiry into the question of the provision of pensions for mothers in needy circumstances. It was hoped that as a result the Government would be able shortly to have before them the details of a practical scheme. The Chancellor declared that he would be very much disappointed if they were not able to produce a measure which would do justice to these deserving people whose claims, in his opinion, ought to have been recognized long ago. The question was raised by one of the labour members who had introduced a motion expressing the opinion that pensions adequate for the proper upbringing and maintenance of children should be paid to all widows with children or mothers whose breadwinners had become incapacitated. The motion in question carried unanimously.

## PRICES, RETAIL AND WHOLESALE, IN CANADA, MARCH, 1924

### Cost of Living, Prices of Staple Articles, and Index Numbers

PRICES moved to lower levels during the month both the family budget in terms of retail prices and the various index numbers of wholesale prices being down due largely to seasonal influences.

Retail food prices were lower mainly because of a fall in the price of eggs. The cost per week of a list of twenty-nine foods for an average family of five in terms of the average retail prices in some sixty cities was \$10.58 at the beginning of March as compared with \$10.75 for February; \$10.79 for March, 1923; \$10.54 for March, 1922; \$13.23 for March, 1921; \$16.92 for June, 1920 (the peak); \$15.98 for March, 1920; \$12.66 for March, 1918; and \$7.68 for March, 1914. Prices of eggs, cheese, pork, bacon, lard, beef roast, prunes and rolled oats were lower, while prices of potatoes, sugar and mutton averaged higher. As compared with a year ago meats, eggs, butter, cheese, bread, flour, evaporated apples and prunes were lower while milk, sugar, tea, and potatoes were higher. Including the cost of fuel and rent with that of foods the total averaged \$21 at the beginning of March as compared with \$21.18 for February; \$21.42 for March, 1923; \$20.96 for March, 1922; \$23.87 for March, 1921; \$26.92 for July, 1920, (the peak); \$25.01 for March, 1920; \$20 for March, 1918; and \$14.35 for March, 1914. Fuel and rent were practically unchanged but as compared with a year ago fuel was lower.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics, based upon the average prices of 238 commodities in 1913 as 100, weighted according to the importance of the commodities, was lower at 154.1 for March as compared with 156.6 for February; 155.9 for March, 1923; 153.6 for March, 1922; 186.4 for March, 1921; 256.9 for May, 1920 (the peak); 241.1 for March, 1920; and 200.2 for March, 1919.

In the grouping according to chief component material four of the main groups declined, three advanced while one was unchanged. The animals group and the textiles group both declined substantially, the former because of lower prices for milk products and eggs and the latter because of declines in the prices of raw cotton, cotton yarn and silk. In the animals group live stock, furs and leather advanced, but in the textiles group there were no advances of importance. Lower prices for oak lumber and pulp caused a slight decline in the wood products group. The iron group also was slightly lower. The vegetable group advanced slightly, declines in

grains and rubber being more than offset by advances in vegetables and sugar. The index for non-ferrous metals rose because of higher prices for copper, lead and tin. The chemicals group was slightly higher.

In the grouping according to purpose both consumers' goods and producers' goods declined. In the former group foods were lower, mainly because of declines in the prices of milk products, hog products and eggs, though vegetables, coffee, beef and fish advanced. In producers' goods the decline was due to lower prices for materials for the textile industry, the leather industry and the milling industry.

The index number based upon prices of 271 commodities in 1890-1899 as 100 published by the Department of Labour since 1910 declined slightly to 224.5 for March as compared with 224.9 for February; 226.0 for March, 1923; 225.6 for March, 1922; 263.1 for March, 1921; 356.6 for May, 1920 (the peak); 349.0 for March, 1920; 269.2 for March, 1918; and 137.0 for March, 1914. Advances occurred in cattle, beef, sheep, dressed lamb, bananas, potatoes, oranges, woollen yarn, coloured cottons, jute, hessians, antimony, lead, quicksilver, tin and white lead while the chief declines were in grains, veal, dressed hogs, butter, cheese, eggs, beans, sugar, raw cotton, raw silk, linseed oil, and glass.

The index number published by the Department since 1910 has been reconstructed back to 1913, by the Dominion Bureau of Statistics, the new index being weighted and based upon the prices of 238 commodities in 1913.\* Ultimately the reconstructed index will be carried back to an earlier date, but in the meantime the Department will continue to calculate and publish the old series in summary form in the LABOUR GAZETTE in order to afford comparisons with price levels prior to 1913. For the detailed analysis from month to month, however, the new index number of the Bureau of Statistics will be used.

The accompanying tables give the index numbers of the Dominion Bureau of Statistics by the principal groups in the three methods of classification and with those of the classification according to purpose or use in detail. The index number of the Department of Labour is given by the principal groupings, but the sub-groups in detail shown monthly since 1912 are omitted. The special index number of 50 commodities described in the following paragraph is also given for the purpose of continuing the record.

\* LABOUR GAZETTE, June, 1923, pp. 689-695.

The special index number comprising fifty of the more important commodities selected from the 271 in the Departmental list, including twenty foods, fifteen raw materials and fifteen manufactured goods, based upon price levels in 1913 as 100, declined to 152.1 for March as compared with 155.1 for February; 156.2 for March, 1923; 148.1 for March, 1922; 174.3 for March, 1921; and 241.0 for March, 1920. A seasonal decline in dairy products was mainly responsible for the change though raw cotton, leather, glass and linseed oil were substantially lower.

The index of wholesale prices in Canada published by the United States Federal Reserve Board including thirty-three raw materials, twenty-eight semi-manufactured or producers' goods and thirty-eight finished or consumers' goods, based upon price levels in 1913 as 100, advanced to 146 for January as compared with 144 for December, 1923; 145 for November; and 148 for January, 1923. Raw materials and consumers' goods both advanced, while producers' goods declined. Both domestic and imported goods advanced.

Professor Michell's index of wholesale prices based on forty articles, twenty foods and twenty manufacturers' goods, with prices during 1900 to 1909 as 100, declined to 176.9 for March as compared with 180.1 for February; 179.2 for March, 1923; 264.0 for March, 1920; and 116.3 for March, 1914. Foods were responsible for most of the decline, though manufacturers' goods were also lower.

The table of retail prices and rentals shows the prices at the beginning of March of seventy-one staple foodstuffs, groceries, coal, wood and coal oil, and the rent for six-roomed houses in some sixty cities throughout Canada. All prices are for delivered goods. The exact quality, for which the quotation is given, is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity, in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Department and to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. The prices of fuel and the rates for rent are reported by the correspondents of the *LABOUR GAZETTE*.

Statistics similar to these were published each month from 1910 to 1920, the figures during this period being secured at the middle of each month by the correspondents of the *LABOUR GAZETTE* resident in each locality from dealers doing a considerable business

with workingmen's households. From 1910 to 1915 the table contained a list of only the twenty-nine foods included in the family budget, with laundry starch, coal, wood, coal oil and rent. In 1915, when monthly publication of the budget in the *LABOUR GAZETTE* was begun, it was decided to extend the list of foods to 40, and in 1920 the list of foods and groceries was still further extended to include over 100 items.

Beginning with October, 1922, a number of commodities were dropped from the list, and in the case of a number of articles the average prices of the grades most sold have been given, owing to the impossibility of securing prices for uniform grades for the various cities from month to month.

Oleomargarine was dropped in March, the provision for its manufacture and sale since 1917, notwithstanding the Dairy Act, expired at the end of February, 1924

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central, without modern conveniences.

The weekly budget of a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, these being the items for which statistics have been obtained each month and published in the *LABOUR GAZETTE* since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various classes of foods tends to be maintained. At times when the price of an article heavily weighted for this purpose rises (or falls) abnormally the increase (or decrease) in food prices so indicated is exaggerated, and this should be taken into account in using the budget as an indicator of changes in the cost of living. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is

made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. It was estimated, when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditures of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light and rent would be perhaps two-thirds or about sixty-five per cent of the total income.

While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were adopted as affording a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruits, fresh and canned vegetables, etc., so that comparative expenditure would be little changed.

#### Cost of Electric Current for Householders\*

With rates in 1913 as 100, index numbers of electric light rates were: 1900, 141.4; 1905, 135.6; 1910, 118.1; 1911, 113.4; 1912, 109.1; 1913, 100.0; 1914, 96.5; 1915, 90.8; 1916, 87.6; 1917, 87.2; 1918, 85.8; 1919, 85.8; 1920, 84.2; 1921, 84.9; 1922, 82.7; 1923, 79.5.

#### Retail Prices

Beef prices showed little change. Sirloin steak averaged 27.1c. per pound in February and 27.2c. in March. Round steak averaged 22c. per pound in February and 22.1c. in March. Shoulder roast was down from an average of 14.7c. in February to 14.5c. per pound in March. Stewing beef was steady. Veal fell from an average of 18.6c. per pound to 18.3c. Mutton showed little change, averaging 26.9c. per pound. Pork, roast, was down to 23.1c. per pound in March as compared with 23.7c. in February and 24.1c. in January. Salt pork was also lower averaging 23.3c. per pound in March. Bacon declined 1½c. per pound averaging 34.9c. Ham also was somewhat lower at 56.4c. per pound. Fresh cod and halibut advanced slightly but salt herring and salt cod averaged somewhat lower. Lard fell from an average of 22½c. per pound in February to 21.8c. in March.

Eggs showed a general decline, fresh averaging 47.7c. per dozen in March, 56.7c. in

February and 61.3c. in January, and cooking 40.3c. in March, 45.2c. in February and 46.9c. in January. Milk was lower at Quebec, St. Thomas and Calgary. Butter was unchanged in the average, increases in some localities being offset by declines in others. Cheese was slightly lower at 32.2c. per pound in March as compared with 33c. in February.

No changes were reported in the prices of bread. Soda biscuits averaged 18.2c. per pound in March as compared with 17.9c. in February. Flour and rolled oats were steady. Rice and tapioca showed little change. Canned tomatoes were slightly higher averaging 19.2c. per tin. Canned corn also advanced ¼c. per tin averaging 17.4c. Beans were down from 8.7c. per pound in February to 8.5c. in March. Onions advanced slightly to 6.5c. per pound. Potatoes continued to advance, averaging \$1.61 per 90 pounds in March as compared with \$1.51 in February and \$1.43 in January. The increase was general. Evaporated apples rose from 18.6c. per pound in February to 18.9c. in March. Prunes declined from 16.7c. per pound to 16.3c. Raisins and currants showed little change. Marmalade was slightly lower, averaging 81c. per four-pound tin. Corn syrup fell from 49.9c. in February to 49.3c. in March. Sugar showed a general advance, granulated averaging 11.9c. per pound in February and 12.1c. in March and yellow 11.4c. in February and 11.6c. in March. Tea and coffee showed little change. Vinegar was slightly lower at an average of 15.2c. per quart. Cream of tartar fell from an average of 66.6c. per pound in February to 64.7c. in March.

Anthracite coal showed little change at an average of \$17.71 per ton in March, as compared with \$17.75 in February. Prices were lower in Hamilton, Woodstock and London. Bituminous coal fell from \$11.20 per ton in February to \$11.07 in March. Lower prices were reported from New Glasgow, London, Cobalt and Sault Ste. Marie. Hard wood showed little change averaging \$12.51 per cord. Soft wood also was steady at \$9.20 per cord. Coal oil advanced at Bathurst, St. Hyacinthe, Hull, Toronto, Brantford, Galt, Woodstock, Owen Sound, and Calgary.

No changes were reported in rent.

#### Wholesale Prices

The following is a summary of a statement on prices changes during the month issued by the Dominion Bureau of Statistics:—

Grain prices which had advanced somewhat during January and February turned downward in March. Number 1 Manitoba Northern wheat fell from an average of 99¾c. per bushel in February to 98c. in March. The price was as high as \$1 in the first week of

\* See article in LABOUR GAZETTE, December, 1923, page 1442.

the month and as low as 95c. towards the end. Poor export demand and large supplies on hand were said to be the cause of the decline. Oats were down from 40½c. per bushel to 34c. and flaxseed from \$2.29 per bushel to \$2.13½. Oatmeal fell from \$3.90 per bag to

\$3.75. Raw rubber continued to decline, being down from 25½c. per pound in February to 23c. in March. Prices of coffee advanced, Santos being up from 24c. per pound to 26c. and Rio from 20c. per pound to 22c. Potatoes at Montreal rose from \$1.39 per bag to \$1.58 and

at Toronto from \$1.30 per bag to \$1.70. Resin was up 25c. per barrel to \$10.50. Linseed oil was down from \$1.25 per gallon in February to \$1.20½ in March. Cattle prices advanced, Western choice butcher cattle were up from \$5.90 per cwt. to \$6.13 and choice steers at Toronto from \$6.75 per cwt. to \$6.88. Beef, fore-quarters, at Toronto, rose from \$7.75 per cwt. to \$8.50. Live hogs declined from an average of \$8.23 per cwt. in February to \$8 in March. Dressed hogs also were lower, being down 50c per cwt. to \$11.50. Bacon fell from 23c. per pound to 22½c. and mess pork from \$29 per barrel to \$27.50. Beef hides declined from 10c.-10½c. per pound to 9c.-9½c. Large stocks in storage and heavy current receipts were said to be the cause of the decline in butter prices. Finest creamery at Montreal fell from 44c. per pound to 39c. and creamery prints at Toronto from 48c. per pound to 46c. Cheese also declined, being down from 23c. per pound

to 21c. Eggs continued to show a seasonal decline, fresh specials and extras being 36c. and 34c. per dozen as compared with 57c. and 54c. in February. Raw cotton prices again reached lower levels, the average for upland middling at New York being 28½c. per pound as compared with 32c. in February. Dullness in the cotton goods trade and labour trouble in Britain were said to be the cause of the decline. Cotton yarn declined from 58c. per pound to 51½c. Raw silk fell from \$7.70 per pound to \$6.55. Oak lumber at Toronto declined \$10 per M to \$120. Pulp prices were again lower, unbleached sulphite being \$53.75 per ton as compared with \$55 in February. Steel bar at Hamilton was down from \$2.80 per cwt. to \$2.70. Copper, lead and tin were higher at the middle of March but toward the end of the month prices declined. White lead owing to advancing prices for pig lead rose from \$14.95 per cwt. to \$17.20.

DEPARTMENT OF LABOUR INDEX NUMBERS OF WHOLESALE PRICES BY PRINCIPAL GROUPS OF COMMODITIES FOR MARCH, 1924, FEBRUARY, 1924, MARCH, 1923, 1922, 1921, 1920, 1919, 1918, 1917, 1916, 1915, 1914 and 1913

houses as high as \$40 per month. s. Vinegar sold extensively in bottles at higher prices than in bulk. †Mining company houses \$20; others \$45-\$60. ‡For new tenants \$30-\$35 and \$20 to \$25.

## PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes and the accompanying tables give the latest information available as to the movement of prices in other countries as compared with Canada.

The index numbers of retail prices which are listed are from official sources unless otherwise stated. The authorities for the wholesale prices index numbers are named in all cases.

Of the countries for which statistics of prices for the opening months of the year were available wholesale prices showed slightly upward tendencies in Great Britain, Denmark, Netherlands, Italy, and Switzerland, and more marked increases in France and Austria. In Germany, by the new calculation of gold prices, the index number was downwards, as was the case in Sweden, Egypt, India, China and in Canada and the United States. Figures for the cost of living showed slight declines in Canada, Great Britain, Sweden, Switzerland and the United States, and advances in Austria, Bulgaria, Denmark, Germany, the Netherlands, and Norway, and in South Africa and India.

### Great Britain

WHOLESALE PRICES.—The Board of Trade index number on the base 100 in 1913 rose 0.9 per cent to 166.9 in February. Foods rose 1.9 per cent to 166.8, and materials rose 0.4 per cent to 166.9. The principal changes were increases in prices of cereals and "foods other than cereals, meat and fish," in metals and minerals other than iron and steel, and textiles other than cotton; and declines in prices of meat and fish, and cotton.

The *Economist* index number on the base of 100 in 1901-05 was 212.2 for February, an increase of 0.14 per cent on the January level. Cereals and meat declined slightly in price while other foods advanced. Textiles declined and minerals and the miscellaneous group showed fairly large increases.

The *Times* index number for February fell 0.7 per cent from January 31, to 172.5 on the base 100 in 1913. Foods fell 2.4 per cent during February and materials rose 0.3 per cent. There were rises shown by cereals, non-ferrous metals, and textiles other than cotton.

The *Statist* index number (in continuation of Sauerbeck's figures) showed an additional advance during February, to 138.8, or 1.2 per cent above the level of the previous month. Foodstuffs showed a fall of 0.7 per cent, animal foods falling 3.5 per cent. Materials advanced 2.3 per cent, the chief group to advance being minerals, which stood 4.9 per cent above their January price level. Textiles

advanced only 0.5 per cent, raw cotton declining again, while flax, hemp, wool and silk were higher.

COST OF LIVING.—The Ministry of Labour index number showed a decline of one point at March 1, reaching 178 on the base 100 in July, 1914. Foods declined one point to 176, clothing rose slightly to 225, and other items of the budget showed no change, rent remaining at 147 and sundries at 180.

### Austria

WHOLESALE PRICES.—The official index number published by Statistische Nachrichten, on the base 1 for the first six months of 1914, was 19,158, an increase of 2.2 per cent above the January level. Foods rose 2.5 per cent and materials 0.5 per cent.

COST OF LIVING.—The official index number on the base of 1 in July, 1914, was 11,940 for February, an increase of 1.7 per cent on the January level. Foods rose 2.2 per cent to 13,821; clothing rose 1.1 per cent, rentals rose 3.7 per cent and heating and lighting rose 0.3 per cent.

### Esthonia

RETAIL PRICES.—The index number of retail prices of foods at Reval, on the base 1921=100 is compiled by the Central Bureau of Statistics, and includes the prices of 24 articles. The index stood considerably higher in 1923 than in 1922, the level in December, 1922, being 92.6, and in December, 1923, 106.6.

### France

WHOLESALE PRICES.—The official index number of Statistique Générale, on the base 100 in July, 1914, rose 7.9 per cent to 505 in January. Foods rose 4.5 per cent and materials rose 10 per cent.

### Germany

WHOLESALE PRICES.—The official index number of the Federal Statistical Office for gold prices on the base 100 in 1913, was 117.3 for January, a decrease of 7.1 per cent from the December level. Foods declined 7.4 per cent and materials declined 6.4 per cent. Home-produced goods fell 9.2 per cent and imported goods rose in price 1.4 per cent.

COST OF LIVING.—The official index number on the base 100 in 1913-14 was 110 for January, the food index being 127; heat and light, 163; rent, 29; and clothing, 151.

### Hungary

COST OF LIVING.—The official index number of cost of living at Budapest (100 in 1913-14)

was 597,420 for January, an increase of 18.9 per cent on the December level, the figure for foods being \$99,600, or an increase of 16.3 per cent. During the year from January, 1923, to January, 1924, the cost of living increased by twenty times and the cost of foods alone by about twenty-four times.

#### Poland

**COST OF LIVING.**—The official index number rose 171 per cent during December. Food rose 187 per cent, clothing rose 145 per cent; fuel and light rose 173 per cent; lodging rose 718 per cent; and sundries rose 142 per cent. Starting in October, food prices were taken twice a month instead of once, and consequently the figures thereafter are not comparable with those before that date. The exceedingly sharp rise in prices late in the year is attributed to the failure of an attempt at currency reform.

#### China

**WHOLESALE PRICES.**—The index number of the Treasury Department's Bureau of Markets, showing the course of wholesale prices at Shanghai, on the base prices in February, 1913=100, fell 0.5 per cent in January. Foods, fuel, "other industrial materials" and sundries all declined, while metals and building materials advanced. Textiles which had reached a fairly high level at the end of the year, showed no change in January.

#### United States

**WHOLESALE PRICES.**—The index number of the Bureau of Labour Statistics, on the base

100 in 1913, showed a rise of one point to 152 in February. The greatest decline was one of four points in the cloths and clothing group, and the greatest increase was one of 11 points in fuel and lighting. Farm products, chemicals and drugs, and the miscellaneous group showed slight declines, and metals and metal products, and building materials showed slight increases. Foods and house furnishing goods showed no change.

The index number of the Federal Reserve Board stood at the same level for the six months, September—February inclusive. In February goods produced declined slightly from the January level and goods imported rose slightly. Goods exported fell 7 points. Raw materials showed no change; producers' goods rose two points, and consumers' goods fell three points.

**COST OF LIVING.**—The official index number for Massachusetts, compiled by the Special Commission on the Necessaries of Life fell 0.2 per cent to 159.7 for February. Foods fell 0.8 per cent; clothing rose 0.3 per cent, and fuel and light 0.1 per cent. Shelter and sundries showed no change from the previous month's level.

The index number of the National Industrial Conference Board showed no change for January as compared with the previous month. Foods showed a decline in price of 0.7 per cent, and fuel and light a decline of 0.6 per cent. Clothing advanced 0.6 per cent and shelter showed no change for the month under review.

## RECENT LEGAL DECISIONS AFFECTING LABOUR

THE legal decisions which are summarized below have reference to the interpretation of the Workmen's Compensation Act of

New Brunswick and to the right of creditors to garnishee the wages of salaries of employees of the Canadian National Railways.

### A New Brunswick Employer Cannot Escape by Default from jurisdiction of Workmen's Compensation Board

In the December, 1923, issue of the *LABOUR GAZETTE*, a summary was given of an action brought in the courts of New Brunswick by the Bathurst Company, Limited, against the Workmen's Compensation Board of New Brunswick. The plaintiff which carried on the business of logging, lumbering, etc., had refused to furnish to the Board any information with reference to its payroll for 1922, and notified the Board that it intended under section 61 to become an industry under Part II of the Act, in which case it would not be subject to assessment by the Board. Subsequently, however, the Board levied an assessment on this company on the basis of a payroll estimated by the Board. The company then obtained a permanent injunction against the Board restraining it from issuing a certificate in respect to this assessment or from signing any judgment against the company in respect of it. On appeal by the Board to the Supreme Court of the province the judgment of the Chancery Court in granting the injunction was sustained.

The Workmen's Compensation Board then appealed to the Supreme Court of Canada, which delivered its judgment on March 28.

It was declared by this court that if the judgment appealed from was maintained any company or employer could simply make default and would then only be liable as at common law as amended by Part II of the Act and all the evils of costly litigation would be restored, such evils as the statute was clearly enacted to remedy. There was nothing, the court held, in the language of the Act to point that the legislature really intended that employers should have the right to elect between two courses. The construction placed by the respondent on section 61 of the Act that it allows any employer to free himself from the obligations of Part I of the Act by his neglect or refusal to furnish information would nullify the whole policy of the Act and could not be reconciled with section 57, subsection 2, which empowers the Board to make its own estimate of the amount due by the employer and to levy and collect such amount, when the employer has failed to furnish any estimate or information as required by section 48.

The appeal was accordingly allowed and the action dismissed with costs.

(*New Brunswick—Bathurst Company, Limited, vs. Workmen's Compensation Board.*)

### Wages of Employees of Canadian National Railways may be Garnisheed for Debt.

The creditor of an employee of the Intercolonial Railway, now a part of the Canadian National Railways, sought to collect the debt by garnisheeing the employee's salary. After obtaining a judgment against the debtor, the creditor placed a writ of seizure in the hands of the company for the sum of \$353.69. The railway corporation made a declaration that the defendant was an employee of the Crown on the Intercolonial Railway at Levis, and added "That inasmuch as no writ of garnishment can be issued against the Crown, under the law, the said corporation hereby declares that they have no declaration to make under this writ of seizure of garnishment other than this present declaration." The creditor then made a motion in court that the corporation be ordered to declare the salary of the defendant as he intended to contest the declaration which it had made. The corporation claimed that the salary of its employee could not be garnisheed as judgment could not be executed against a possession of the Crown.

The court held that the laws and jurisprudence cited by the corporation were not applicable to the case, as the statutes constituting the corporation provided that the Railway Acts should apply to the Canadian government railways so long as they were administered by the company, unless special provision to the contrary were made. Another article provides that action can be instituted either by or against the company without the issue of a fiat.

For these reasons the court decreed that the corporation should make a complete declaration declaring what is the salary of the defendant, whether it is daily, monthly or yearly, and what was the amount owing him at the time of the issuance of the garnishee. The corporation was ordered to make such a declaration a fortnight after the delivery of this judgment.

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

**I**N addition to the regular monthly articles and quarterly articles on unemployment in trade unions, industrial accidents and immigration, this issue of the *LABOUR GAZETTE* contains an article on employees' superannuation plans in Canadian cities, the text of an important judgment in the First Divisional Court of Ontario respecting the validity of the Industrial Disputes Investigation Act, a review of mining legislation in Canada, and a summary of recent labour legislation in Manitoba, Saskatchewan and Alberta.

### Monthly summary

The offices of the Employment Service of Canada reported a decline in the daily business transacted in March as compared with the preceding period, the number of applications, vacancies and placements, however, being only slightly fewer than during the corresponding period in 1923.

The average cost of a weekly family budget of twenty-nine staple foods was \$10.16 at the beginning of April as compared with \$10.58 for March; \$10.64 for April, 1923; \$10.26 for April, 1922; \$12.68 for April, 1921; \$16.92 for June, 1920 (the peak); \$15.99 for April, 1920; \$12.57 for April, 1918; and \$7.51 for April, 1914. In wholesale prices the index number calculated by the Dominion Bureau of Statistics based upon prices in 1913 as 100 stood at 151.1 for April as compared with 154.3 for March; 156.9 for April, 1923; 153.7 for April, 1922; 180.8 for April, 1921; 256.9 for May, 1920 (the peak); 251.3 for April, 1920; and 198.2 for April, 1919.

The time loss due to industrial disputes during April was greater than during either March, 1924, or April, 1923. Fourteen disputes began or were in progress during the month, involving 9,286 employees and a time loss estimated at 215,234 working days. Corresponding figures for the previous month were 12 disputes involving 765 workpeople and a time loss of 11,056 working days, and for April, 1923, 27 disputes involving 2,561 employees and a time loss of 34,792 working days.

### Industrial Disputes Investigation Act

One Board of Conciliation and Investigation was established under the Industrial Disputes Investigation Act, 1907, in April, and a report from this Board was received by the Department.

### A Correction

The last issue of the *LABOUR GAZETTE* contained a review of the sixteenth annual report on factory inspection in Nova Scotia for 1923. In the title, and also in the first paragraph of this article, the words "New Brunswick" were erroneously printed instead of "Nova Scotia." The statement that the administration of the Factories Act is in charge of the Workmen's Compensation Board is true of the former but not of the latter province.

### Inquiry into Old Age Pensions

A special committee of the House of Commons was appointed on April 29 on motion of the Prime Minister to make an inquiry into an old age pension system for Canada. Power was given to the committee to send for persons, papers and records and to report from time to time. The following members compose the special committee: Messrs. Fontaine (Hull), Irvine (Calgary E. Riding), Logan (Cumberland), McConica (Battleford), Munro (Fraser Valley), Neill (Comox-Alberni), Preston (Lanark), Raymond (Brantford), Robichaud (Gloucester, N.B.), Sexsmith (Lennox and Addington), Spence (Parkdale), St. Pere (Hochelaga).

### Canadian National Railways and Empire Settlement scheme

The Prime Minister, answering a question in Parliament on April 16 as to the assistance given to the Empire Settlement scheme by the Canadian National Railways, stated that the arrangements entered into with the Overseas Settlement Committee of the Colonial Office

under the British Empire Settlement Act provided for the settlement of immigrants on lands owned by the railway in groups of twenty families. The extent of the financial obligations of the railway is to advance, or make arrangements to have advanced, an amount not more than £300 to enable a settler to purchase stock and equipment, and the British Secretary of State guarantees payment of the full amount of any loss incurred through such advances, the total guarantee however not to exceed 50 per cent of the total amount advanced to all settlers.

### Recent amendments to provincial compensation acts

A review of new labour legislation in the three prairie provinces is given in this issue of the LABOUR GAZETTE. Last month's issue contained a similar outline of legislation in Quebec, and next month a review will be given of the late sessions in Ontario and the maritime provinces. It will be noticed that workmen's compensation is one of the main subjects of legislation in nearly every province. This subject is now under investigation by a special commission in the province of Quebec. In Manitoba also a joint committee, composed of equal numbers of members of the legislature and of representatives of the workmen and their employers, has been formed to study every phase of compensation during the coming recess with a view to eliminating the need for yearly amendments to the act and placing it upon a permanent basis. In Alberta the scale of compensation for permanent disability was raised from 55 per cent to 62½ per cent of wages, the same proportion as is allowed under the British Columbia Act, but still below the level of compensation in Ontario and Manitoba, where 66½ per cent of wages is allowed to injured workmen or their dependents. Numerous other changes in the Alberta act are outlined in this issue. As already noted in the LABOUR GAZETTE a bill to establish in Ontario a board of review to consider more difficult cases on appeal was withdrawn by the government in deference to opposition which developed on the side of labour. Another Ontario amendment which contains a new feature in compensation legislation in Canada enables the Board to spend up to \$100,000 on the rehabilitation of injured workmen who are incapacitated from following their previous occupations. Amendments to the New Brunswick Act require the Board in that province to penalize further such employers as fail to submit their payrolls, and provide that the assessments under the act shall be a first lien on the property of an

employer. A bill is before the Nova Scotia legislature making certain additions to the schedule of industrial diseases provided for under the Act.

### Chinese steamship crews in Canada

Attention was called in the House of Commons during April to a report that a party of forty-nine Orientals had recently arrived at Halifax to work on the coal boats of the British Empire Steel Corporation. The incident was explained by the Minister of Immigration as follows:—

On the 3rd instant a telegram was received by the Department of Immigration and Colonization from Mr. J. R. McIsaac, of the Steel Corporation, stating that, owing to difficulty in getting Canadian crews to remain with their steamers after signing up, it was proposed to bring Chinese from England, a number to sail on the *Cedric* on the 5th instant, and the remainder, about nine, to come forward by a later boat to complete a crew now on this side.

The corporation gave the assurance that, except in the case of one vessel, the Chinese were to be confined to employment as firemen and cooks and that it was hoped to secure white men for the other classes of work on their steamers. The department consented to the request of the British Empire Steel Corporation on the understanding that arrangements were completed for guarding the Chinese and that the corporation would be responsible for all penalties under the Chinese Immigration Act until a bond, satisfactory to the department, was furnished.

A bond for \$105,000 has been deposited with the department, this bond to cover 105 Chinese who are to be engaged on the steamships *Rosecastle*, *Daghild*, *Wabana*, *Lingan*, *Hochelaga* and *Kamouraska*, plying between the ports of Sydney, Louisburg, Halifax, St. John and Montreal. While the bond is for \$105,000, it provides for a penalty of \$1,000 in case of each Chinaman engaged on the steamships mentioned. Only 76 Chinamen have come forward or are coming forward under this arrangement with the Steel Corporation, the bond covering also the cases of 29 Chinese who came forward last fall for employment on the *Kamouraska*. There are precedents in the department for action of this nature.

These Chinese are regarded as non-immigrants and the bond deposited by the British Empire Steel Corporation will be retained until the department is satisfied that all of the Chinese covered by the same have been checked out of Canada.

### Juvenile immigration into Canada

The subject of juvenile immigration into Canada was discussed in the House of Commons on April 16. The Department of Immigration, it was stated, does not attempt to send any children or domestics into a province if the provincial authorities do not agree that they should be sent. Two years ago there was a demand for over 5,000 young children below 14 years of age, from homes that were certified by the provincial authorities, but no child below the age of 14 years is brought into Canada to earn its livelihood. The age limit from 14 to 18 is in the nature of an experi-

ment. Such children are bound to a family for a period of years until they are old enough to take care of themselves. They are given a regular inspection and the usual recommendations must be supplied. Medical inspection of immigrant children has recently been made more stringent, and last year, when the government undertook to bring out a larger number of children, provision was made for medical inspection before the children started. Today the government asks for a history of each immigrant child, where he has sprung from, his environment, and other particulars. The Immigration Department has an arrangement with the British government whereby each government pays a subsidy of \$40 for each child under the age of 14 years. The Dominion reserves the right of inspection and also of investigation as to where the children should be placed. Many organizations have established children's homes in this country and some of them have been bringing in children for the past fifteen years.

#### **Locomotive employees' hours of service**

An order of the Board of Railway Commissioners of Canada was passed on April 7 refusing the Brotherhood of Locomotive Engineers and the Brotherhood of Locomotive Firemen and Enginemen's application for an order prescribing regulations in connection with limiting or regulating hours of duty of employees engaged in the operation of trains. This case was heard on June 21, 1922, the applicants asking that the Board should exercise the powers conferred upon it by the Railway Act to limit the hours during which the employees engaged in the operation of trains may remain on duty. The Commissioners in their judgment pointed out that the employees' application was based very largely upon the "Hours of Service Law" of the United States under which no employee engaged in train operation is allowed to work more than sixteen hours continuously. The railway companies contended that the present rules under which employees may book rest after a certain number of hours' service amply provided for the protection of both employees and the public, because it is largely in the hands of the employee himself to state whether or not he requires rest. Many cases were pointed out as to the difficulties in the operation of the positive "Hours of Service Law" because when the limitation of time arrives, the train must be tied up even if it were only a few miles from the terminal. Representatives of the conductors and trainmen's organizations all protested against the application on the ground that it was not necessary, that the

privilege of booking rest gave ample protection, and generally that it would necessitate very serious changes in the social relations of the employees represented. The Chief Commissioner in his judgment expressed himself of opinion that the Board would not be justified in granting the application. His opinion was concurred in by the Assistant Chief Commissioner, Deputy Chief Commissioner and Commissioner Boyce.

#### **Railway commission condemns deckless engines**

The LABOUR GAZETTE for June, 1923 (page 582), contained the substance of a ruling by the Board of Railway Commissioners for Canada forbidding the railways from placing more deckless engines in service, and ordering that those now in use be worked into the switching service as the opportunity offered. Subsequently the Board heard a complaint from the Brotherhood of Locomotive Firemen and Enginemen, to the effect that the Edmonton and Dunvegan, the Esquimalt and Nanaimo, and the Kettle Valley Railways had since the date of the ruling increased the number of locomotives of the deckless type. The union had taken up the matter with the railways, and were informed that these three railways operated as separate organizations under control of the Canadian Pacific Railway, and depended on that organization for their motive power, the number of engines leased to them from time to time fluctuating with the demands of traffic on the Canadian Pacific Railway. The Board ruled that all these subsidiary lines should be considered as part of the Canadian Pacific system, and that if that company was obliged to increase the switching power on its main system the company should withdraw one of the deckless engines from the road service even if operating on one of the subsidiary lines, and convert it to the switching type. Deckless engines are considered dangerous from having no foot-plate for the enginemen except that provided on the front of the tender.

#### **Summary of Canadian laws on child welfare**

The Canadian Council of Child Welfare of Ottawa has just published a useful summary in tabular form of the child labour laws of the several provinces of Canada. The various draft conventions and recommendations of the International Labour Conference (League of Nations), relating to child labour in its various aspects, are printed at the head of each column in the table, followed in order by the existing provincial legislation on the same subject. The subjects

treated in this manner are: compulsory school attendance; educational requirements for children entering employment; physical examination of children entering employment; minimum age for work in mines, and for work in factories, shops, etc.; hours per day and per week of working children; prohibition of night work; child labour in street trades; and prohibited child labour. Similar information has appeared in recent issues of the LABOUR GAZETTE (December, 1923, and previous issues), but the clear form in which it is presented in the new publication makes it easy of reference and likely to be of service to investigators and students of this subject.

### Health requirements in camps in Quebec

A series of provincial health by-laws was issued in Quebec early in April under the authority of the Quebec Public Health Act, chapter 29 of the Statutes of 1922 (LABOUR GAZETTE, April, 1922, pages 403-409). The new by-laws apply to lumber and pulp-wood camps, mining camps, lumber sawmills and pulp mills, railway construction, and brick manufacture. Employers are required each year to notify the director of the provincial Bureau of Health of the establishment of new camps, and to furnish all the information required. Every camp must be situated in a place sufficiently dry and exposed to sunlight. It must be not less than 200 feet from a lake or stream, and the water supply must be at least 100 feet from all cause of pollution. All dwelling places must be provided with ventilating flues and with windows sufficient in number and size to ventilate and light the interior. The floor must be raised one foot from the ground and extend to the walls, which must be at least seven feet high, and the beds must be raised sufficiently to allow ventilation. In camps where women or children are employed these employees must have a separate room conforming with equal standards of hygiene. Attached to the employees' dwellings there must be a completely separate room, well lighted and ventilated, to serve as a kitchen and dining room. Garbage and waste must be taken at least 50 feet from the camp and from the source of water supply. The stables and latrines of a camp must be constructed with regard to ground conditions so that they may not pollute the water supply or prove a nuisance to the employees. Employers must permit visits at any time from representatives of the Director of the Provincial Bureau of Health. Infractions of the new by-law render the offender liable to a fine of \$20 with an additional fine up to \$5 for each day the offence

continued. Each infraction, moreover, constitutes a "nuisance", and the Director of the Provincial Bureau may also require the employer concerned to remedy the faulty conditions, if necessary by construction work, and if this order is not complied with the Director may, through his representatives, take steps to have the remedy effected.

### Accidents in Ontario due to belting

Information as to the number of industrial accidents in Ontario in 1922, which were due to belting used for the transmission of power, was given officially in the Legislature of Ontario toward the end of the recent session. Similar information for 1923 is not yet complete. In the former year 409 industrial and other accidents caused by belts were reported to the Workmen's Compensation Board in the industries covered by Schedule 1 of the Act (Schedule 1 of the Workmen's Compensation Act covers all those industries in which the employers are individually liable to contribute to the Accident Fund, but excludes municipalities, railways, car shops, telegraphs and all employers who are individually liable to pay compensation). The total cost of these 409 accidents was \$120,574, all of which was contributed by the employers. There were 214 accidents resulting in temporary disability and costing \$14,600, of which \$10,412 was for compensation and \$4,157 for medical aid. The number of accidents resulting in permanent disability was 36, and the total cost of these accidents was \$73,302 of which \$66,527 was for compensation and \$6,775 for medical aid. Permanent total disability accidents have not been separately tabulated, but there were six death cases costing \$31,713, and 153 cases not causing as much as seven days' disability and so involving no compensation, but requiring medical attention which cost \$957.

### Alberta safety regulations

The Workmen's Compensation Board of Alberta has issued a new set of regulations in accordance with the provisions of the Workmen's Compensation Act (Accident Fund). Most of these regulations relate to the prevention of accidents, some being of a general character, containing safety rules for all the industries under the act, while other regulations have special reference to sawmills, lath mills, wood-working, laundries, elevators, fire and gas, explosives, electric furnaces and arc welders, rock crushers, candy manufacturing, building and excavations, theatres, and projecting booths in theatres. Every factory, camp or

other undertaking coming under the act, where ten or more workmen are employed, is required to have an accident prevention committee of not less than two members, its duties being to inspect the plant regularly, receive complaints, consider suggestions, and investigate all serious accidents, and make recommendations in writing to their employers. A full list is given of articles comprised in the first-aid kit which must be kept at plants, which are classified for this purpose according to the number of workmen employed. Employers are required to keep a full record of all their workers. In industries where no plan for providing medical aid has been approved by the Board in accordance with the act, employers coming within the scope of Schedule 1 of the act are to retain 4 cents from the earnings of each workman for each shift or part of shift worked; where no such plan exists, an employer in logging, sawmills and box factories coming under Schedule 2 is to deduct two cents for each shift, while other industries coming under Schedule 2 of the act are to deduct one cent for each shift.

**Alberta teachers and conciliation** The Alberta Teachers' Alliance at their annual convention held at Calgary during April are reported in the press to have passed a resolution that the provincial Department of Education "be again requested to put into operation the conciliation board previously agreed to", and that "all cases going to said board for consideration pass through the provincial executive of the Alliance, thus assuring that each case be authentic and worthy." The conciliation board asked for by the Alliance is apparently a permanent board which would deal with all disputes as they arise, and is distinct from the conciliation boards provided for under an amendment of 1921 to the School Ordinance Act. This amendment, which was noted in the issue of the LABOUR GAZETTE for December, 1921 (page 1445), enabled the Minister of Education to appoint a special board for each dispute arising between boards of trustees and their teachers in reference to the due fulfilment of existing contracts. Such boards consist of three members, one representing the trustees and one for the teachers, with an independent chairman. According to reports in the local press the minister informed the officials of the Alliance, in reply to their request for a board such as they desired, that their proposal would be considered if they could get the Trustees' Association to support their demand. The Alliance took this reply as a definite refusal.

### Working hours of nurses in hospitals

The Hospital Board at Hamilton, Ontario, recently appointed a committee to report upon the conditions under which nurses are working, and to devise means for shortening the hours of nurses in training. Attention had been called by local labour bodies to the long hours worked by nurses. According to reports in the press, the lady superintendent informed the Board that occasionally nurses worked from 7 a.m. until 8.30 p.m., a duty period of 13½ hours, but that the average time actually worked by nurses was 9½ hours in the day. She stated that the 8-hour day had been tried in a number of training schools and the results had differed widely; for example the system was stopped at Toronto General after a short trial, but it had given satisfaction at the Royal Victoria Hospital at Montreal.

A similar effort is being made by the Vancouver Trades and Labour Council to secure shorter hours for certain classes of nurses at the provincial mental hospital.

### Requisitioning of labour to fight forest fires

The Legislative Assembly of New Brunswick, on April 10, sanctioned a grant of \$20,000 to Mr. T. McLaughlin, a lumberman, on the ground of compassion, in consideration of the destruction of his logging camp by a fire which occurred at a time when McLaughlin's men had been called out by a provincial fire warden to fight another fire. On May 26, 1920, Mr. McLaughlin had a crew of fifteen or twenty men working around his mill, piling lumber, clearing land, and looking out to protect the mill from fire. Toward evening, there being no fire near the mill, a fire warden of the Provincial Department of Lands and Mines, acting under the authority of the Forest Act, summoned McLaughlin's men to leave their work and assist in putting out a fire on Crown lands some distance off. Next day fire broke out from close to McLaughlin's camp and as there were only four men available round the camp it quickly got beyond control and destroyed all his property, including the mill and machinery, and large quantities of lumber, the total losses being estimated at \$62,230. According to the evidence, Mr. McLaughlin could have saved his property if more men had been available to fight the fire. The legislature considered, however, that the action of the fire warden in taking away some of the men from the camp at a time when there was no immediate danger to the property imposed no liability on the Crown for compensating Mr. McLaughlin for

his loss, but as a large tract of valuable timber land, the property of the Crown, was saved by McLaughlin's men, while the latter's property was destroyed, it was held that some equitable compensation should be made.

### Programme of British trade unions

September, the following declaration of aims:—

The Trade Union Congress, as representing the organized workers of Great Britain, stands for the following changes in our social, economic and political system:—

- (1) Nationalization of land.
- (2) Nationalization of railways.
- (3) Nationalization of mines and minerals.
- (4) Hours of labour—a legal maximum working week of 44 hours.
- (5) Legal minimum wage for each industry or occupation.
- (6) Pensions for all at the age of 60.
- (7) Pensions for mothers with dependent children.
- (8) Adequate provisions for unemployment, with proper maintenance of the unemployed.
- (9) Establishment of training centres for unemployed boys and girls, with extension of training facilities for adults during periods of depression.
- (10) Provision of proper housing accommodation.
- (11) Improved facilities to be provided by the State from elementary schools to universities.
- (12) Extension of State and municipal employment for the purpose of promoting social necessities and service.

### Proposed British commission on minimum wages

That in view of the practically universal acceptance of the principle that a living wage for all workers should be the first charge upon industry, and in view of the large measure of agreement with respect to the advisability of fixing legal minimum time rates of wages reached at the National Industrial Conference, this House urges the Government to proceed without delay with the Bill introduced by the Government of the day in 1919 constituting a Commission to inquire into and report upon legal minimum time rates of wages.

The Bill referred to above was introduced by the Minister of Labour on August 18, 1919, upon the recommendation of a joint committee of employers and workers' representatives, but it was not proceeded with.

The Minister of Labour, Mr. Shaw, expressed the sympathy of the government with the principle of a minimum wage but in view of the congested state of parliamentary business he was unable to promise to proceed with the Bill without delay.

### Family allowances in France

Since 1916 an increasing number of industrial undertakings have been paying family allowances to their married workers which have for their object the remuneration of their employees in proportion to the number of dependent children in the family. The February issue of the *International Labour Review* contains an article by Professor Roger Picard in which the development of this plan is outlined.

In order to equalize expenditures for these family allowances, the employers have combined in various localities to establish compensation funds, of which there are at present 120 in France. Contributors to these funds number 7,000 employers, and out of the funds are paid nearly one hundred million francs a year to 800,000 workers.

The legal character of family allowances has not yet been settled, and it is doubtful whether they should be regarded as a supplementary wage or a grant freely made by the employer. The workers would prefer that family allowances and the funds from which they are paid should become state institutions. In public works the payment of family allowances is already required by law. The writer states that it is possible that the private system of family allowances may lead the way toward a national system of social insurance.

### Tendencies of employers' organizations

The *International Labour Review*, published by the International Labour Office (League of Nations), contains in its February issue a survey of some tendencies of employers' organizations in 1923. With regard to the hours of work the employers' group at the fourth session of the International Labour Conference in 1922 named three main objections to the particular forms of regulation of hours of work obtaining in their respective countries. They claimed that such regulations gave rise to excessive costs, that they resulted in deficient production, and that they did not make the necessary provision for adjusting the new régime to meet the particular requirements of each particular case. In some countries still suffering from industrial depression employers' associations were seeking to increase the working hours in order to reduce costs, but where the depression was passing away, the need of replenishing stocks was put forward as a further reason for increasing hours. In countries such as France, with a prospective scarcity of labour, employers' associations had an additional reason for wishing to increase hours of work.

The General Council of the British Trade Union Congress has prepared for submission to the Congress, when it meets at Hull next

September, the following declaration of

With regard to wages, it is stated that wage reductions have been comparatively rare and in the United States and in countries with a depreciating currency nominal wages have even risen. In countries with a rising price level in industries not greatly affected by foreign competition and as a temporary expedient wages are adjusted to the cost of living index. In countries with a prospective labour shortage and countries where many workers live near the border line of subsistence family allowances are approved. In Belgium family allowances are strongly approved by employers' associations.

A solution of the problem of reducing costs and increasing output has also been sought by employers' associations in various countries by means of the elimination of waste in production and the increase of the productivity of the workers. Special reference is made to the formation of an association for industrial standardization in Czecho-Slovakia, the Federation of Czechoslovak Manufacturers, and the campaign in the United States for the elimination of waste in industry.

**Hours of labour in Germany** The movement for the prolongation of hours of work in Germany is tending to become general. At the beginning of January it was chiefly noticeable in the mining and metal industries of the Ruhr; shortly afterwards it spread to the whole of Germany.

The measures taken in the two important industries named have brought about a more or less considerable extension of hours of work in other branches of industry. These prolongations, which are allowed under the Order of December 21, 1923, are in some cases fixed by direct agreement between the parties concerned, but more often by official arbitration boards after strikes or lockouts. On several occasions, when neither employers nor workers have been willing to accept the decisions of arbitration boards, the awards of the latter have been made compulsory by the Minister of Labour.

The majority of the agreements are concluded for a few months only. They maintain the principle of the eight-hour day but, according to the requirements of the industry concerned, allow hours of work to be extended in certain cases to nine a day, by agreement with accredited representatives of the workers. In other and rare cases, the nine-hour day is laid down as normal. Yet other agreements provide for longer working hours, subject to certain conditions.

Overtime is paid for at an increased rate which in some cases comes into force after the 43th hour, and in others after the 54th.

The hours fixed by these agreements represent maximum and the actual hours worked may in practice be fewer. In fact, it is stated, the existing timetable has been maintained in a number of industries, in spite of the formal sanctioning of longer hours by agreements.

**Control of trade union funds in Italy** On February 6, 1924, there came into force in Italy a decree, dated January 24, 1924, which places the control of administration of

the funds of workmen's associations under the local prefectures. All the associations and corporations which draw their funds from workers' contributions with a view to mutual benefit are covered by the decree. Where there is ground for suspicion that the public confidence is being abused, or that the funds are being appropriated to uses other than the economic or moral benefit of the workers, the prefect may order an inquiry; and in grave or urgent cases may suspend the managing committee and appoint a commissioner to carry on the administration for a period not exceeding one year. A month before the termination of his appointment the commissioner must submit a report on the organization of the association and on any irregularities which may have been discovered. The prefect, after interrogating such persons as he may think fit, shall decide whether to restore the control to the managing committee, or to appoint a commissioner for a further period, or to suppress the association. In the last case any assets of the association remaining after liquidation are to be used for the benefit of the members. The Socialist and Catholic press and the *Corriere della Sera* point out that the employment of trade union funds for political purposes will be illegal under the terms of the decree.

**Labour legislation in Hungary**

A number of acts of parliament and administrative decrees affecting labour have been enacted during the past two months in Hungary.

These include increases in compensation to war invalids, widows and orphans and the elimination of bonuses to civil servants, substituting a fixed salary scale therefor; the establishment of Government subsidies for certain agricultural and distributive co-operative societies; reduction in taxation on houses built between January 1, 1924, and November 1, 1926; regulating state mortgages on newly built dwelling houses; a further 20 per cent reduction in the civil service staff; and amending the social insurance laws to take account of the decreased value of Hungarian currency.

**Railway labour courts in Spain** A Royal Decree has recently been issued in Spain for the creation of special labour tribunals for the railways, to settle disputes between the company and their agents and workers.

A summary of this decree is contained in *Industrial and Labour Information*, the weekly publication of the International Labour Office (League of Nations). The decree provides: (a) District tribunals for each company or group of companies, if it is advisable to unite any companies either because they are operating lines situated in the same territory or because of the short distance they cover; and (b) A Central Higher Court for all districts. The district railway tribunals will consider all disputes between the railroads and their employees: if the disputes be of a general character or involve collective interests, and if they concern the staff as a whole or that of certain specified services; if they are not expressly reserved by law for the jurisdiction of the ordinary tribunals; if, though they are within the scope of the ordinary courts, the disputes are of a kind suitable to be brought before the railway labour tribunals with a view to a settlement; if they do not relate either to technical management or to the discipline which should prevail in all departments; and if 10 per cent at least of the personnel of any one service of any one company have made demands or complaints to the management without obtaining any satisfaction.

The Central Higher Court, which will have its seat in Madrid, will be competent to decide on appeal all questions which are within the jurisdiction of the district tribunals. Further, both tribunals will be equally competent to consider any question which the government may decide to submit to them. The members of the district tribunals and higher court will be subject to reappointment every two years.

**International Management Congress** An International Management Congress will be held at Prague, Czechoslovakia, July 21 to 24, for the purpose of presenting (1) the principles and methods developed by the most progressive American industrial management, and (2) the methods of management, the conditions, and the problems of certain American industries which are important basic, national industries of Czechoslovakia. In its general outlines this first International Management Congress was conceived and planned by the Government of the Republic of Czechoslovakia and the Masaryk Academy of Prague.

It was inspired in the minds of leaders of the progressive Czechoslovak people by realization that one basis of recovery from the material and moral ravages of war and of the restoration of a prosperous and enduring peace must be better international understanding of the principles and methods of utilization of economic resources. Americans are participating in the congress in response to a cordial invitation to the engineers and executives of the United States to attend and to particularly organize a programme for the Congress which would present the most advanced methods of management developed by American industry.

The Saskatchewan Minimum Wage Board is reconsidering the existing orders governing female workers in factories, shops and stores, laundries, hotels and restaurants.

Licensed hawkers or peddlers in Saskatchewan are required by a provincial order-in-council issued in April, during the year for which their license is issued, and while operating as hawkers and peddlers, to carry their licenses on their persons, or else a certificate from the provincial secretary to the effect that license has been issued. They must produce their licenses and certificates on the demand of any magistrate, police officer, or inspector for the provincial secretary's department. Section 57 of the Interpretation Act, under which this order is issued, enables the Lieutenant Governor in Council, for the purpose of carrying out the provisions of any act according to their true intent and of supplying any deficiency therein, to make regulations not inconsistent with the spirit of the act which shall have the same force and effect as if incorporated therein.

A lumbermen's safety association has been organized in New Brunswick as the "New Brunswick Lumbermen's Safety Association" in an effort to curtail accidents in the province. All lumbermen are included in the organization which is asking that the men in charge on the drives use every possible means toward preventing accidents. It is expected that many thousands of dollars in compensation costs will be saved as a result of the organization. Mr. F. C. Beattey, of the Stetson, Cutler Company, is president of the association.

The Douglas local of the United Farmers of Alberta last month petitioned the federal government to provide old age pensions for all persons of 65 years of age who are not in

receipt of an income of \$500, the amount of the pension to be sufficient to keep them in comfort the remainder of their lives, and that such pensions be financed by means of a special tax on incomes over \$5,000.

A committee of Canadian National Railway officials, to be known as the "St. John Terminal Safety First Committee", was organized at St. John, N.B., on April 22. It is stated that the best methods for accident prevention on leading railways will be put in force. The idea back of the movement is to have operators send in reports to officials at Moncton setting forth any conditions considered dangerous, and to have monthly meetings at St. John.

On February 20, last, the following motion was adopted without a division in the British House of Commons: "That in the opinion of this House pensions adequate for the proper upbringing and maintenance of children should be paid to all widows with children, or mothers whose family breadwinner has become incapacitated, such pensions to be provided by the State and administered by a Committee of the Municipal or County Council wholly unconnected with the Poor Law."

The industrial hygiene division of the New York State Department of Labour, recently organized, will formulate plans for a comprehensive and scientific study of hygienic conditions in industry. The advisory committee is composed of physicians and others interested in industrial hygiene. They will gather data through the medium of the Industrial Hygienic Clinic, where treatment will be furnished, diagnosis made and scientific research in the effects of industrial poison conducted. The clinic is operated under the joint auspices of the Industrial Hygiene Bureau, the Reconstruction Hospital and the College

of Physicians and Surgeons. Dr. W. Gilman Thompson, president of the Reconstruction Hospital, is chairman of the organization.

What is said to be the most rigid safety mining code in America has been adopted by the State Industrial Commission of Utah, as the result of a conference between state mining men and a committee representing the mining interest of the state, following an explosion at Castlegate No. 2 mine of the Utah Fuel Company, in which 171 men were killed, due to an attempt of a fireboss to relight his flame safety lamp. A summary of the requirements of the code, which is outlined in *Coal Age* for April 17, 1924, is as follows: (1) Use of permissible explosives only; (2) shotfiring by electricity; (3) the use of nothing but approved electric head lamps; (4) rock dusting in all mines; (5) the use of water for cutting and loading machines to reduce dust; (6) sprinkling at every face; (7) daily reports on sprinkling; (8) sprinkling to be done by men employed for no other duty; (9) shut-downs during removal of gas accumulations; (10) cleaning up of all abandoned workings. The orders contained in the code are to become effective between June 1 and September 30, 1924.

The Swiss Federal Council has issued a Decree, dated March 4, to the effect that on and from April 1, 1924, federal subsidies to unemployment relief works shall cease. It has also decreed, under date March 7, that from the middle of April, 1924, unemployment relief shall cease to be issued to part-time workers, that subsidies to private undertakings shall no longer be granted, that no further contributions toward unemployment relief shall be levied on employers, and that trade associations shall cease to participate in the administration of unemployment relief funds.

## GENERAL REVIEW OF THE INDUSTRIAL SITUATION

### The Labour Situation, Strikes, Prices.

#### The Labour Situation

**E**MPLOYMENT at the beginning of April showed a decline, which was chiefly due to seasonal curtailment of operations in logging. Contractions on a somewhat larger scale has been recorded at the same period of last year when employment was in slightly less volume than at the present time.

At the beginning of April the percentage of unemployment among members of trade unions was 6.7 as compared with 7.8 at the beginning of March, and 6.8 at the beginning of April, 1923.

The offices of the Employment Service of Canada reported a decline in the daily business transacted in March as compared with the preceding period, the number of applications, vacancies and placements, however, being only slightly fewer than during the corresponding period in 1923.

The following is a survey of employment conditions at the end of April, 1924, as reported by the superintendents of the offices of the Employment Service of Canada.

Continued bad weather in the Maritime Provinces deterred building operations. In some localities a start had been made but the work had been discontinued until more favourable conditions. A small demand for carpenters, paperhangers and painters was reported in the larger offices. Logging operations were suspended, no vacancies being offered until the ice is out of the river and log-driving commences. The mining industry was quiet with a few large orders for coal miners. Conditions in the Women's Department remained practically unchanged, the demand for experienced household help being slightly in excess of the supply.

The agricultural group in Quebec was quiet with signs of spring expansion at Sherbrooke and Montreal. Construction work on buildings and highways had not yet begun, but an early start is anticipated with a full programme for the season. There was a complete cessation of demand in the logging group, but the commencement of river driving will create considerable activity. Satisfactory employment conditions were anticipated for the coming months, as with the opening of navigation commerce and most of the manufacturing industries will expand rapidly. Demand and supply in the domestic and women's department show an easy adjustment, orders being filled fairly quickly.

The marked demand in the farming group in Ontario continued, the calls being regis-

tered mainly at the offices in the Western Peninsula and in Eastern Ontario. A shortage of steady, experienced farm hands is reported in some localities. A large building and highway programme is contemplated, indicating that an increasing number of opportunities for various classes of skilled and unskilled labour will be available next month. The supply of labour is more than adequate to meet the present and future demands for men for railroad improvements and maintenance. With warmer weather the unemployment situation should lessen considerably. Industry is quiet throughout the province, but it is thought that requirements for all classes of factory workers will be about equal to that experienced in 1923. The log-driving season has just begun and the first orders for boom men and river drivers were receiving the attention of the northern offices. A steady demand for domestic workers was met as adequately as possible, the larger offices showing a surplus of vacancies.

The demands in the farm group in Manitoba contributed in a large measure to the lessened unemployment, although the farm labourer was reluctant to hire for the entire summer season, preferring a contract for spring months only. The beginning of May will see a marked expansion in building and outdoor trades and many vacancies for labourers and skilled tradesmen will be offered as soon as the seasonal curtailment is lifted. Although the demand for household help remained steady there was a distinct decline in the number of placements effected in work of this nature, which fact may be attributed to the scarcity of experienced workers. The demand for casual and day workers was brisk, with sufficient applicants.

There was a continued scarcity of farm labour in Saskatchewan, the offices experiencing difficulty in filling the large numbers of calls for workers for the spring and summer. The unemployment problem showed signs of betterment with a few advance orders for building tradesmen and railway workmen. Requirements in the domestic section were about as formerly reported, a good demand for urban and rural districts being shown, with a shortage of trained workers.

In Alberta seeding operations were well under way and a brisk demand for farm workers occupied the larger part of the business of the offices. Quietness continued in the construction groups, but a slight improvement over the situation at the beginning of

last month is shown. The offices report a long list of applicants awaiting the opening of the building season, and of work on railways and highways. The mining industry was quiet.

Farm orders were increasing slightly in the province of British Columbia with sufficient applicants to meet the demand at present. A slackening was reported in the logging industry, with a number of tie and pole camps fairly active. Building and construction projects had opened up in the larger cities and will, without doubt, increase in volume during the coming month. The available supply of labour should be sufficient to take care of the continuation of all work in connection with highway improvement. Dullness was shown in metal and coal mining industries. A continual demand for domestic workers was reported, with comparatively few women registered for work. The usual calls were received for women for hotel and institutional work.

#### EMPLOYERS' REPORTS

The volume of employment at the beginning of April showed a contraction of over 1 per cent; this curtailment of operations was somewhat similar to that indicated by employers at the same period of 1923, although the shrinkage of last year affected a much larger percentage of the reported payroll. At the beginning of April, 1924, manufacturing showed further moderate improvement, while communication, water transportation and laundries also reported increased activity. On the other hand, logging camps recorded very pronounced seasonal contractions and the construction industry as a whole was slacker. Employers in the Maritime Provinces and British Columbia registered increases in their payrolls, but in the remaining provinces there was a downward tendency. In the Maritime Provinces the improvement occurred mainly in coal mining, shipping and stevedoring, while logging camps reported severe losses. Contractions in Quebec in logging and railway construction offset additions to staffs in a number of manufacturing industries, notably iron and steel, and in water transportation. In Ontario employment declined considerably, chiefly on account of very substantial seasonal reductions in logging. There were, however, gains in a number of industries, notably iron and steel, sawmills and construction. Heavy losses in employment in logging and in coal mining caused the bulk of the decrease in the Prairie Provinces; this was largely seasonal in character. In British Columbia, lumber mills, transportation and construction afforded more employment than in the last report. Employers in Montreal,

Toronto, Hamilton, Ottawa and Vancouver registered improvement, but in Winnipeg activity was somewhat curtailed. In Montreal, practically all industries except tobacco showed expansion. The largest increases occurred in iron and steel works, in shipping and in construction. The increases in Toronto were also fairly general, although they were on a much smaller scale. Improvement in textiles accounted for the bulk of the gain in Hamilton, the changes in other industries being small. A slightly upward trend in a number of industries was noted in Ottawa. Moderate declines in woodyards, on street railways and in retail trade, largely caused a one per cent reduction in employment in Winnipeg. In Vancouver, lumber mills were decidedly more active, as was also shipping and stevedoring and construction. An analysis of the returns by industrial groups shows that further moderate improvement was registered by manufacturers. This occurred largely in sawmills, carriage, rubber, cotton, brick, automobile and railway car works, in rolling mills, foundries and machine shops. Pulp, paper, biscuit and tobacco factories, on the other hand, were slacker. General and very heavy losses were recorded in logging at the beginning of April. Little change on the whole was shown in the mining group; large increases in coal mining in the Maritime Provinces were offset by declines in Alberta. Water transportation afforded more employment than in the preceding month, while steam railways and local electric railways were slacker. Building and road contractors were a good deal busier, but railroad contractors afforded less employment. Communication and services reported slight improvement, while the trade group showed very minor declines.

An article elsewhere in this issue gives in some detail the employment situation as at the beginning of April, 1924.

#### TRADE UNION REPORTS

The situation among organized labour as reported by 1,459 trade unions representing 150,129 persons was more favourable during March, the percentage out of work standing at 6.7 as compared with 7.8 in February and with 6.8 in March of last year. (Unemployment as used here has reference to involuntary idleness due to economic causes. Persons engaged in work other than their own trades, or who are idle because of illness, or as a direct result of strikes or lockouts, are not considered as unemployed. As the number of unions making returns varies from month to month with consequent variation in membership upon which the percentage of unemployment is

based, it should be understood that such figures have reference only to the organizations reporting.) Ontario, Manitoba, Alberta and British Columbia workers were more fully engaged than in February. In British Columbia the improvement is attributable to increased work for fishermen and employees in the manufacturing industries and the building trades. In the remaining provinces slight decreases were reported. In comparison with March of last year employment in all provinces with the exception of Manitoba, Alberta and British Columbia declined slightly. In the manufacturing division a higher level of employment was maintained than in February. Reports received from 409 unions with 46,772 members showed that 4.4 per cent of the members were out of work as compared with 7.0 per cent at the end of February. Considerable improvement was reported during the month by garment workers and more work was also afforded wood, iron and steel, brewery and jewellery workers and metal polishers and printing tradesmen. Cigar workers, paper-makers, glass and textile workers, however, were not so active. A better situation was shown in the manufacturing industries than in March of last year, partly due to greater employment for garment and leather workers. More activity than in February was registered by coal miners in Nova Scotia and Alberta, but they were not so busy in British Columbia. Several unions of coal miners in Alberta indicated that a number of their members were on strike. Asbestos miners in Quebec reported all members at work. An unemployment percentage of 26.4 was shown in the building trades as compared with 28.7 per cent in February and with 20.6 per cent in March of last year. The increase in comparison with February occurred chiefly among bricklayers, masons and plasterers, carpenters and joiners, painters, decorators and paperhangers, hod carriers and building labourers, tile layers, lathers and roofers and steam shovel and dredgemen. Employment for granite and stonecutters, plumbers and steamfitters and bridge and structural iron workers continued to be slack. Transportation workers reported a slightly larger percentage of inactivity than in February, due chiefly to less employment in the shipping division and for street and electric railway employees in Quebec. Road maintenance men were better employed but the situation was not quite so favourable for firemen and trainmen. Employment in the transportation industry was in lesser volume than in March, 1923, steam and street and electric railway employees and workers in the shipping division all reporting reduced activity. Retail clerks were hardly as fully engaged as in

February. Theatre and stage employees and stationary engineers and firemen were not so busy, but hotel and restaurant employees and barbers were more active. Fishermen and lumber workers and loggers reported no idle members.

#### EMPLOYMENT OFFICE REPORTS

During the month of March, 1924, the offices of the Employment Service of Canada made 24,194 references to positions and effected a total of 22,523 placements. Of the latter 14,388, of which 11,394 of men and 2,994 of women, were in regular employment and a total of 8,135 were in casual work. Vacancies notified by employers to the Service totalled 26,104, of which 18,200 were for men and 7,904 for women. Applications for employment numbered 25,877 from men and 9,020 from women, a total of 34,897 applications. A comparison of the reports for this period with the preceding month shows a very marked decline in the business transacted, this decrease being due largely to the fact that during February an abnormally large demand for casual workers was received. Comparison with March, 1923, however, shows that approximately the same volume of business was transacted during the month under review. A report in detail of the work of the offices for the month of March, 1924, and for the quarterly period January-March may be found elsewhere in this issue.

#### BUILDING PERMITS AND CONTRACTS AWARDED

According to the Dominion Bureau of Statistics, the value of building permits issued in 56 cities during March showed an increase of \$5,483,607, or 150 per cent. The total for March, 1924, was \$9,141,132 as compared with \$3,657,525 in February, 1924, and with \$9,432,350 in March, 1923.

According to the *MacLean Building Review*, issued by MacLean Building Reports, Limited, the value of the contracts awarded in Canada during April, 1924, amounted to \$30,198,800, compared with \$11,584,500 in March, 1924, and \$30,843,800 in April, 1923. Residential building accounted for 31.5 per cent of the April total, amounting to \$9,556,300; business building amounted to \$9,112,800, or 30 per cent; industrial building, \$3,641,100, or 12.2 per cent; and public works and utilities \$7,888,600, or 26.3 per cent. The activity was distributed among the provinces as follows: Ontario 48.8 per cent; Quebec, 21.9 per cent; British Columbia, 19.4 per cent; prairie provinces, 8.2 per cent, and the maritime provinces, 1.7 per cent. During the first

three months of the year the amount of contracts awarded was \$69,570,900 as compared with \$73,951,200, a decrease of slightly less than 6 per cent. The activity was distributed among the provinces as follows: Ontario, 59.7 per cent; Quebec, 22.2 per cent; British Columbia, 11 per cent; prairie provinces, 4.7 per cent, and the maritime provinces, 2.4 per cent.

#### PRODUCTION REPORTS

The Dominion Bureau of Statistics reports that the production of pig-iron in Canada during March amounted to 77,290 gross tons, an increase of 28 per cent over the 60,288 tons produced in February, 1924. The output of basic pig-iron rose 19 per cent to 49,173 tons and of foundry iron 47 per cent to 28,117 tons, the former being intended mostly for the use of the reporting firms and the latter for sale. The cumulative production for the first quarter of the current year amounted to 201,280 tons and the average monthly production was 67,000 tons as compared with an average monthly production of 50,000 tons for the corresponding period in 1923, of 36,000 tons in 1922, and of 53,000 tons in 1921. The March production of ferro-silicon was 2,888 tons, an advance of 7 per cent over the February output. During the month one additional furnace was blown in at Sault Ste. Marie and one furnace at Hamilton was closed down for the purpose of relining so that the number in blast remained at seven as in the previous month.

The total production of steel ingots and castings in Canada during March amounted to 94,962 gross tons, an increase of 24,009 tons, or 34 per cent over the output for February. The increase was general in all grades. The average monthly production for the first quarter of the year was 69,000 tons as compared with 61,000 tons in 1923, 35,000 tons in 1922 and 51,000 tons in 1921.

A report from the Department's correspondent at Cobalt states that fifteen cars of silver ore were shipped during April from the Cobalt camp, containing 1,159,881 pounds of ore, as compared with 14 cars containing 1,088,620 pounds in March. The Nipissing mine shipped 308 bars containing 353,007.24 ounces of silver, and The Mining Corporation of Canada shipped 109 bars containing 109,596.69 ounces of silver, making a total of 417 bars containing 462,603.93 ounces of silver shipped during April, as compared with 416 bars containing 453,949.10 ounces in the previous month.

A report from the Department's correspondent at New Glasgow shows an output of 45,624 long tons of coal from the Acadia Coal Company, Limited, and of 13,673 tons

from the Intercolonial Mining Company, Limited, during the month of March, making a total of output of 59,297 tons reported for the district. The shipments made during the month were 34,474 tons from the former and 11,235 from the latter company, or a total of 45,709 long tons.

A report from the British Columbia Forestry Branch shows that 237,326,874 feet, board measure, of timber was scaled in the province during March. The total includes Douglas fir, 106,840,400 feet; red cedar, 53,379,001 feet; spruce, 19,677,528 feet; hemlock, 26,301,247 feet; balsam, 4,882,228 feet; yellow pine, 2,599,206 feet; white pine, 2,159,409 feet; jack pine, 13,009,871 feet; larch, 3,541,082 feet; cottonwood, 583,213 feet; cypress, 21,888 feet; and species not specified, 4,331,801 feet.

The gross earnings of the Canadian National Railways, including affiliated lines in the United States, according to a preliminary statement issued, amounted to \$20,669,619 during March, 1924, as compared with \$19,032,683 in March, 1923. For the three months ending March 31, 1924, the gross earnings totalled \$56,782,628 as compared with \$53,991,964 for the corresponding period of 1923.

The gross earnings of the Canadian Pacific Railway for March, 1924, were given in a preliminary statement as \$14,812,928 in comparison with \$13,585,763 in February, 1923. For the three months ending March 31, 1924, the gross earnings amounted to \$41,288,483 as compared with \$37,894,542 in the corresponding period of 1923.

A summary of Canadian trade prepared by the Department of Customs and Excise shows that in March, 1924, the merchandise entered for consumption amounted to \$86,922,203 as compared with \$91,881,427 in March, 1923. There was an increase of \$15,872,175 in the value of domestic merchandise exported which amounted to \$92,429,774 in March, 1924, compared with \$76,557,599 in the corresponding month of the previous year. For the twelve months ending March, the grand total of Canadian trade was \$1,951,888,788 in 1924 as compared with \$1,747,830,880 in 1923. The chief imports in February, 1924, were fibres, textiles and textile products, \$17,184,769, iron and its products, \$17,016,935, non-metallic minerals and products, \$13,778,961, and agricultural and vegetable products, mainly foods, \$12,507,770. The chief exports during the same month were in the group of wood, wood products and paper, which amounted to \$27,745,298, the next being agricultural and vegetable products, mainly foods, amounting to \$26,135,976, animal and animal products, \$11,-

531,294, non-ferrous metals and their products, \$9,451,250, and iron and its products, \$8,276,771. During the fiscal year ending March, 1924, exports of agricultural and vegetable products, mainly foods, were valued at \$391,896,598; wood, wood products and paper at \$273,852,889; animal and animal products at \$142,107,797, and iron and its products at \$70,321,460, and non-ferrous metals and their products at \$66,483,731.

### Strikes

Time loss due to industrial disputes reported to the Department during April was greater than during either March, 1924, or April, 1923. There were in existence at some time or other during the month 14 disputes, involving 9,286 employees and a time loss of 215,234 working days, as compared with 12 strikes in March, involving 765 workpeople and a time loss of 11,056 working days. In April, 1923, there were recorded 27 disputes involving 2,561 workpeople and a time loss of 34,792 working days. Seven new strikes commenced during April with a time loss of 205,559 working days. Six of the strikes commencing during April terminated during the month. At the end of April, therefore, there were eight strikes involving 8,387 workpeople.

### Prices

Retail food prices continued downward due mostly to seasonal declines in the prices of dairy products and eggs, though other commodities also showed decreases. The cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average retail prices in some sixty cities was \$10.16 at the beginning of April as compared with \$10.58 for March; \$10.64 for April, 1923;

\$10.26 for April, 1922; \$12.68 for April, 1921; \$16.92 for June, 1920 (the peak); \$15.99 for April, 1920; \$12.57 for April, 1918; and \$7.51 for April, 1914. The most important decline was in eggs which showed a net fall of 27.6 cents for the two dozen included in the budget. Butter, cheese, and bacon were also substantially lower while there were smaller declines in the prices of milk, salt pork, lard, flour, sugar, rice, beans and prunes. Sirloin steak, shoulder roast of beef and mutton advanced slightly. Including the cost of fuel and rent with that of foods, the total budget averaged \$20.58 at the beginning of April as compared with \$21 for March; \$21.21 for April, 1923; \$20.66 for April, 1922; \$23.31 for April, 1921; \$26.92 for July, 1920 (the peak); \$25.34 for April, 1920; \$20 for April, 1918; and \$14.32 for April, 1914. Fuel was somewhat lower due to a slight decline in the price of coal. Rent showed little change.

The movement of wholesale prices as indicated by the index number of the Dominion Bureau of Statistics was again lower, the figure for April being 151.1 as compared with 154.3 for March; 156.9 for April, 1923; 153.7 for April, 1922; 180.8 for April, 1921; 256.9 for May, 1920 (the peak); 251.3 for April, 1923; \$20.66 for April, 1922; \$23.31 for the grouping according to the chief component material seven of the eight main groups were lower while the remaining one, the Iron group, advanced slightly. The Vegetables group, the Animals group, the Wood group, and the Non-Ferrous Metals group each showed substantial decreases, declines in the prices of flour, sugar, potatoes, dairy products, eggs, and non-ferrous metals being mainly responsible for the lower levels. The Textiles group, the Non-Metallic Minerals group and the Chemicals group each showed smaller declines.

## PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907, DURING THE MONTH OF APRIL, 1924

**D**URING the month of April one Board of Conciliation and Investigation was established to deal with a dispute between various shipping companies trading to the port of Montreal, members of the Shipping Federation of Canada, and certain of their employees, members of the Syndicated Longshoremen of the Port of Montreal. The following were appointed members of the Board: Mr. E. McG. Quirk, Montreal, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. Bernard Rose, K.C., and Cléophas Bujold, both of Montreal, nominees of the shipping companies and the men respectively.

### Report of Board in Dispute between various Shipping Companies at Montreal and certain of their Employees.

A report was received from the Board established to deal with the dispute between various shipping companies trading to the port of Montreal, Que., and certain of their employees, being members of the Syndicated Longshoremen of the port of Montreal. The report was signed by Mr. E. McG. Quirk, chairman of the Board, and Mr. Bernard Rose, K.C., representative of the employers. Mr. Cléophas Bujold, representative of the men submitted a minority report. The text of these reports is as follows:—

#### Report of Board

Honourable JAMES MURDOCK, M.P.,  
Minister of Labour,  
Ottawa.

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between Anchor-Donaldson Line Limited; Canada Line; Cairn Line; Canada Steamship Lines, Limited (Ocean Services); Canadian Government Merchant Marine, Limited; Canadian Pacific Steamships, Limited; Cunard Lines; Donaldson Lines, Limited; Ellerman-Bucknall Steamships, Limited; Furness Line; Head Line; Houston Line; Hudson's Bay Company; Leyland Line; Manchester Liners; T. R. McCarthy (Registered); New Zealand Shipping Co., Limited; South & West African Lines; Scandinavian-American Line; Thompson Line; Walford Shipping Co., Limited, and the White Star Dominion Line, Employers and The Association of Syndicated Longshoremen of the Port of Montreal, Employees.

A majority and a minority report were received from the Board, the text of which is given below. Both parties subsequently accepted the Board's award as to wages.

#### Other Proceedings under the Act

In the case of a dispute between the cities of Port Arthur and Fort William, Ontario, and their employees in street railway service, members of Division 966, Amalgamated Association of Street and Electric Railway Employees of America, advice was received by the Department that the award of the Board appointed to deal with the matter was acceptable to the parties concerned. The text of the award was given in the April issue of the LABOUR GAZETTE on pages 291 to 293.

DEAR SIR,—The Board appointed by you, under date of April 7th, composed of Mr. Bernard Rose, K.C., representing the Shipping Companies; Mr. Cléophas Bujold, representing the Syndicated Longshoremen, and Mr. Eugene McG. Quirk, Chairman (appointed by the Minister in the absence of a joint recommendation), has the honour to report.

The Board was established at the request of the employing companies. Meetings and open sessions were held at the Court House, Montreal.

Appearing on behalf of the employing companies were Colonel W. I. Gear, Captain J. T. Walsh, R.N.R., Mr. Thomas Robb, Secretary of the Shipping Federation, and Major Curry.

On behalf of the Syndicated Longshoremen appeared Mr. Pius Belanger, President, Mr. Karl Trolsaas, Mr. Salluste Lavery and Mr. Adelard Robert.

The dispute submitted to the Board was one of wages.

An agreement had been in effect covering the seasons of 1922 and 1923, which expired on December 31st, 1923. In order that an agreement covering wage rates for the season of 1924 might be reached prior to the opening of navigation, negotiations through correspondence and conference commenced early in March of the present year, but no satisfactory progress was made. The longshoremen through a committee finally presented to the shipping people a demand for an increase of 20 cents per hour over rates scheduled in the last agreement, informing the shipping people at the same time that the committee had no au-

thority to discuss anything less than the stipulated demand of 70 cents per hour for day work and 80 cents per hour for night work. These figures represent an increase of 40 per cent over rates paid in 1922 and in 1923. The Shipping Companies declined to consider the rates submitted, in return offering a renewal of the last agreement. This was refused by the men. The employing companies then made application for a Conciliation Board.

Before the Board the shipping interests contended that the increased rate of 20 cents per hour over the rates scheduled in the agreement which expired on December 31st, 1923, were not warranted for the following reasons:—

*First.*—Conditions in the shipping industry are in a very unsatisfactory condition and the prospects of them becoming brighter within the near future are remote, and if ships are to continue trading it is imperative that operating costs should be reduced to a minimum.

*Second.*—The rates paid by the Shipping Companies last season to longshoremen at Montreal were 50 cents per hour for day work and 60 cents per hour for night work, which are considerably higher than what is now paid by building contractors for unskilled and certain classes of skilled labour throughout the city.

*Third.*—The longshoremen employed at the Port of Montreal during the season of 1923 earned an average wage of \$26 per week.

*Fourth.*—That from 1914 to 1924 increases have been granted longshoremen amounting to 66 $\frac{2}{3}$  per cent, while the cost of living per family during the same period, compiled from figures quoted by the Department of Labour, amounts to 46 per cent.

These contentions were supported by argument and figures.

The longshoremen contended that the rates submitted in their demand, i.e., 70 cents per hour for day work and 80 cents per hour for night work, are not excessive, taking into consideration:

(a) The period of employment at the Port of Montreal covering the season of navigation is approximately thirty weeks. The remaining twenty-two weeks, i.e., from the beginning of December to the end of April, offer little opportunity for other steady employment. Married men residing in the city with their family depend on snow clearing, ice harvesting and odd jobs, some few obtaining inside work. Single men endeavour to secure work in the lumber camps.

(b) The work calls for both experience and skill and is accompanied by an element of danger.

(c) The rates paid during the past two seasons were insufficient to provide a longshoreman and family with the necessities and comforts to maintain a standard of living consistent with his status of Canadian citizenship.

These contentions were supported by argument and statements. Witnesses were called to give evidence as to the skill, qualifications and hazard of danger in connection with the work of one engaged in this class of occupation.

It was admitted before the Board by the parties to the dispute that the average earnings for men engaged in steady gangs during the past season was \$26 per week per man, representing earnings of \$780 for the season of thirty weeks.

It was also admitted by the parties that an experienced longshoreman was of greater value in service and to the industry, by reason of his experience, than one inexperienced in the work.

Efforts were made by the Board to bring the parties together with the object and hope that an agreement or understanding might be reached. This was not possible. Mr. Pius Belanger, President of the Syndicated Longshoremen, along with the other representatives informed the Chairman that their instructions were such that they could not depart or deviate in the slightest from the demands submitted,—a regrettable restriction, one seldom encountered by Boards of Conciliation.

With pleasure the Board records its observance of the friendly spirit and relations existing between the parties. For years past they have effected seasonal agreements, occasionally through the good offices of an intermediary, but in the majority of instances agreements were effected by direct negotiations. The Board is hopeful of the continuance of these relations.

The Board has given the most careful consideration to the arguments presented in support of the merits and contentions submitted by the respective parties, and recommends that the rate of wages for longshoremen for the season of 1924 shall be (62) sixty-two cents per hour for day work and (72) seventy-two cents per hour for night work, retroactive to the opening of navigation.

The Board regrets its recommendation is not unanimous. Sincere efforts were made to reach a common understanding. Though the difference between Mr. Bujold and his colleagues was one of only three cents on hourly rates, he found himself most reluctantly compelled to dissent from the joint recommendation of his colleagues.

Since no reference was made to working conditions the Board takes it for granted that the same will continue during the present season.

The Board recommends that in the event of difficulties arising between employees and their superiors that such difficulties be adjusted by representatives of the men and the employers. They believe that this would tend to maintain the good relations existing and diminish friction that might otherwise arise.

The whole respectfully submitted.

(Sgd.) E. McG. QUIRK,  
Chairman.

(Sgd.) BERNARD ROSE.

### Minority Report

The undersigned member of the Board dissents from the joint recommendation of my colleagues, Messrs. E. McG. Quirk and Bernard Rose, K.C. I was prepared, in order to make the report unanimous, to accept, on behalf of the men, 65 cents per hour for day work and 75 cents per hour for night work. My justification for these figures shall be transmitted to the Honourable the Minister of Labour.

(Sgd.) CLEOPHAS BUJOLD,  
Board Member.

Montreal, May 3, 1924.

## PROCEEDINGS OF THE CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

**T**WELVE new decisions of the Canadian Railway Board of Adjustment No. 1 have been received by the Department. (Summaries of earlier decisions of the Board appeared in the *LABOUR GAZETTE* for March, 1924, and in previous issues.)

The following is a brief summary of the new decisions of the Board.

### Case No. 195.—The Canadian Pacific Railway, Western Lines, and the Brotherhood of Railroad Trainmen.

**NATURE OF DISPUTE.**—Dismissal of a conductor on the charge of irregularities in the performance of his duties. The employees contended that the circumstances surrounding this case and the evidence produced did not warrant the action of the company in dismissing him.

**DECISION OF BOARD.**—The Board held the opinion that a railway company was fully justified in employing all legitimate means to check and uncover irregularities in collecting fares, but that dismissal from the service should not be made effective without complete and unquestionable evidence. The claim of the employees was sustained to the extent of reinstatement without pay for time lost.

### Cases Nos. 196, 197, 199, 200, 201, 202, 203, 204, 205 and 206.—The Canadian Pacific Railway, Western Lines, and the Order of Railway Conductors.

**NATURE OF DISPUTE.**—Dismissal of conductors on the charge of irregularities in the performance of their duties. The employees maintained that the action of the company

in dismissing these men was not warranted by the circumstances and the evidence produced.

**DECISION OF BOARD.**—The Board declared that in all of these cases the evidence reflected unfavourably on the employees directly concerned. "In the opinion of the Board a railway company, having reason to believe that it is not receiving complete returns for passengers carried upon its trains, is fully justified in employing all legitimate means to check and uncover such irregularities. On the other hand, the Board is of the opinion that the discipline of an employee by dismissal from the service should not be made effective without complete and unquestionable evidence." In cases 196, 199, 201, 205 and 206 the claims of the employees were sustained to the extent of reinstatement without pay for time lost. In cases 197, 200, 202, 203 and 204 the claims of the employees were denied.

### Case No. 198.—The Canadian National Railways, Central Region, and the Order of Railroad Telegraphers.

**NATURE OF DISPUTE.**—A telegraph operator was dismissed for failure to deliver a train order, although no accident occurred as a result. The employees contended that the discipline was too severe.

**DECISION OF BOARD.**—As the evidence showed that the operator had been offered a position in another class of service and the decision of the Board should not prejudice the exercise of such clemency, the contention of the employees was denied.

## STRIKES AND LOCKOUTS IN CANADA DURING APRIL, 1924

THE number of strikes and lockouts in Canada in existence at some time or other during the month of April, was fourteen, two more than in March. The time loss for April was greater than in April, 1923, being 215,234 working days as compared with 34,972 working days in the same month in the previous year.

Date	Number of disputes	Number of employees affected	Time loss in working days
April, 1924.....	14	9,286	215,234
March, 1924.....	12	765	11,056
April, 1923.....	27	2,561	34,972

Seven disputes involving 387 workpeople were carried over from March. Six of the new strikes commencing during April terminated during the month. At the end of April, therefore, there were on record eight disputes: coal miners, Alberta and British Columbia; three strikes of printing compositors at Montreal; printing compositors, Ottawa; printing compositors, Toronto; printing compositors, Winnipeg; and printing compositors and pressmen at Halifax.

Of the strikes which terminated during the month, one was in favour of the employers, one in favour of employees, and the remaining four ended in a compromise. Four of the new strikes were for increased wages, one was against a reduction in wages, another was against the employment of members of a rival union, and the seventh was against the suspension of an employee.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical tables, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting more than one working day. Disputes of only one day's duration or less, and disputes involving less than six employees are not included in the published record, unless at least ten days' time loss is caused, but a separate record of such disputes is maintained in the Department and the figures are given in the annual review.

The following notes give information in regard to certain disputes additional to that shown in the tabular statement.

**COAL MINERS, ALBERTA AND BRITISH COLUMBIA.**—On April 1, some 8,000 coal miners, of whom 1,500 were in British Columbia, went on strike against a proposed reduction in wages on the termination of the agreement, March 31. The negotiations regarding the renewal of the agreement were described in the April issue of the *LABOUR GAZETTE* on pages 296-299. On April 9, the Premier of Alberta stated that he would later announce the names of the Commission to be appointed to investigate the coal industry of Alberta, in accordance with the resolution of the Legislature on March 13. (*LABOUR GAZETTE*, April 1924, page 299.)

**COAL MINERS, NEW WATERFORD, N.S.**—A strike occurred at one of the collieries near New Waterford, Cape Breton Island, N.S., about 300 men being involved, owing to the suspension of one or two employees. Work was stopped for April 5th and 7th, being resumed on April 8th, the employees in question being reinstated.

**WEAVERS, ST. HYACINTHE, QUE.**—On April 3, a strike of 26 weavers occurred at St. Hyacinthe for an increase of 20 per cent in their wage rates. After being on strike nine days work was resumed April 14, at the same rates as prevailed prior to the strike.

**PRINTING TRADES IN VARIOUS CITIES.**—The strike of printing compositors and pressmen, for the 44-hour week, which began in the spring of 1921, was still on in seven cities. Information received from Hamilton indicates that employment conditions are no longer affected. At the end of the month there were still 387 employees affected in these seven cities.

**BRICKLAYERS AND STONEMASONS, GUELPH, ONT.**—Eleven bricklayers and stonemasons went on strike April 1, for an increase of 25 cents per hour in their wages. After negotiations an increase of 10 cents per hour was granted, and work was resumed April 12.

**BRICKLAYERS AND STONEMASONS, ST. JOHN, N.B.**—Bricklayers and stonemasons, to the number of 57, went on strike April 1, at St. John, for increased wages. The men had been receiving 90 cents per hour, and demanded an increase of 22½ cents per hour. Prior to the strike several conferences were held, and after the strike occurred negotiations were entered into which resulted in a compromise being effected, the men returning to work April 21, at an increase of 10 cents per hour.

CARPENTERS AND JOINERS, MONTREAL, QUE.—  
On April 1, a strike of 55 carpenters and joiners occurred at Montreal against the employment of members of a rival union. After being on strike seventeen days, work was resumed April 22, the men being successful in their demands.

PAINTERS AND GLAZIERS, MONTREAL, QUE.—  
Four hundred and fifty painters and glaziers in the employ of several firms at Montreal, went on strike April 7, for an increase in wages. The men demanded 75 cents an hour, but after negotiations had been carried on, accepted an offer of 70 cents per hour, and resumed work April 14.

## STRIKES AND LOCKOUTS DURING APRIL, 1924

Industry, occupation and locality	Number of employees involved	Time loss in working days	Remarks
<b>(a) Strikes and lockouts commencing prior to April, 1924.</b>			
<b>MANUFACTURING.—</b>			
<i>Printing and Publishing*:</i> —			
Printing compositors, Hamilton, Ont.	.....	.....	Commenced May 2, 1921. Alleged violation by employers of 44-hour clause in agreement. Information received indicates employment conditions no longer affected.
Printing compositors, Montreal, Que.	8	200	Commenced June 14, 1921. Objection of men to perform work that came from shop where strike existed. Underminated.
Printing compositors, Montreal, Que.	86	2,150	Commenced July 1, 1921. For increased wages and 44-hour week. Underminated.
Printing compositors, Montreal, Que.	12	300	Commenced September 15, 1922. Employer refused to negotiate a new agreement with the union. Underminated.
Printing compositors, Ottawa, Ont.	16	400	Commenced June 1, 1921. For increased wages and 44-hour week. Underminated.
Printing compositors, Toronto, Ont.	208	5,200	Commenced June 1, 1921. For increased wages and 44-hour week. Underminated.
Printing compositors, Winnipeg, Man.	40	1,000	Commenced July 1, 1921. Alleged lockout following refusal of employers to renew agreement. Underminated.
Printing compositors and pressmen, Halifax, N.S.	17	425	Commenced May 2, 1921, for shorter hours with same weekly pay. Underminated.
<b>TRANSPORTATION.—</b>			
<i>Street and Electric Railways:</i> —			
Motormen and conductors, Niagara Falls, Ont.	4	.....	Commenced July 2, 1922. For recognition of union. Information received indicates employment conditions no longer affected.
<b>(b) Strikes and lockouts commencing during April, 1924.</b>			
<b>MINING, NON-FERROUS SMELTING AND QUARRYING.—</b>			
Coal miners, Alberta and British Columbia.	8,000	200,000	Commenced April 1, against a reduction in wages. Underminated.
Coal miners, New Waterford, N.S.	300	600	Commenced April 5, against the suspension of an employee. Work was resumed April 8; compromise.
<b>MANUFACTURING.—</b>			
<i>Clothing—</i>			
Weavers, St. Hyacinthe, Que.	26	234	Commenced April 3, for increased wages. Men returned at same rates and work resumed April 14; in favour of employers.
<b>CONSTRUCTION.—</b>			
<i>Buildings and Structures:</i> —			
Bricklayers and masons, Guelph, Ont.	11	121	Commenced April 1, for increased wages. Settled by negotiations and work resumed April 12; compromise.
Bricklayers and masons, St. John, N.B.	57	969	Commenced April 1, for increased wages. Settled by negotiations and work resumed April 21; compromise.
Carpenters and joiners, Montreal, Que.	55	935	Commenced April 1, against the employment of members of a rival union. Terminated April 22, in favour of employees.
Painters and glaziers, Montreal, Que.	450	2,700	Commenced April 7, for increased wages. Settled by negotiations and work resumed April 14; compromise.

\* Reports indicate that strikers have been gradually replaced since the beginning of the strike.

## STRIKES AND LOCKOUTS IN GREAT BRITAIN AND NORTHERN IRELAND DURING MARCH, 1924

THE British *Ministry of Labour Gazette* for April contains the following information respecting strikes and lockouts in Great Britain and Northern Ireland during March, 1924, based upon returns from employers and employees:—

**NUMBER, MAGNITUDE AND DURATION.**—The number of trade disputes involving a stoppage of work, reported to the Department as beginning in March in Great Britain and Northern Ireland, was 59, as compared with 56 in the previous month and 52 in March, 1923. In these new disputes about 63,000 workpeople were involved, either directly or indirectly (i.e., thrown out of work at the establishments where the disputes occurred, though not themselves parties to the dispute). In addition, about 13,000 workpeople were involved, either directly or indirectly, in 21 disputes which began before March and were still in progress at the beginning of that month. The number of new and old disputes was thus 80, involving about 76,000 workpeople, and resulting in a loss during March of about 730,000 working days. The principal stoppage was that involving nearly 40,000 tramway and omnibus employees in London, which was in progress from March 22 to 31. (See April issue of the LABOUR GAZETTE, page 299.)

**CAUSES.**—Of the 59 disputes beginning in March, 19, directly involving 23,000 workpeople, arose out of demands for advances in wages; 4, directly involving 2,000 workpeople, were against proposed reductions in wages; 11, directly involving 3,000 workpeople, were due to other wages questions; 9, directly involving 4,000 workpeople, to details of working arrangements; 7, directly involving 2,000 workpeople, to questions respecting the employment of particular classes or persons; 6,

directly involving 3,000 workpeople, to questions of trade union principle; and 3, directly involving 25,000 workpeople, were in sympathy with workpeople involved in other disputes.

**RESULTS.**—Settlements were effected in the case of 34 new disputes, directly involving 47,000 workpeople, and 13 old disputes, directly involving 2,000 workpeople. Of these new and old disputes, 13, directly involving 4,000 workpeople, were settled in favour of the workpeople; 9, directly involving 3,000 workpeople, in favour of the employers; and 25, directly involving 42,000 workpeople, were compromised. In the case of 9 disputes, directly involving 8,000 workpeople, work was resumed pending negotiations.

The following table analyses the disputes in progress in March in Great Britain and Northern Ireland by groups of industries, and indicates the number of workpeople involved (whether directly or indirectly) at the establishments concerned, and the approximate time lost during the month in all disputes in progress:—

Groups of industries	Number of disputes in progress in March			Number of workpeople involved in all disputes in progress in Mar.	Aggregate duration in working days of all disputes in progress in Mar.
	Started before Mar.	Started in Mar.	Total		
Mining and quarrying.....	6	17	23	13,000	106,000
Metal, engineering and shipbuilding.....	5	12	17	10,000	201,000
Transport.....	.....	9	9	46,000	365,000
Other.....	10	21	31	7,000	58,000
<b>Total, Mar., 1924..</b>	<b>21</b>	<b>59</b>	<b>80</b>	<b>76,000</b>	<b>730,000</b>
<b>Total, Feb., 1924..</b>	<b>20</b>	<b>56</b>	<b>76</b>	<b>144,000</b>	<b>699,000</b>
<b>Total, Mar., 1923..</b>	<b>27</b>	<b>52*</b>	<b>79*</b>	<b>83,000*</b>	<b>762,000*</b>

\*Revised figures.

## LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

### Governing Body of the International Labour Office

THE Governing Body of the International Labour Office held its 22nd Session in Geneva, April 8-10. The Government of Canada was represented on this occasion by the Honourable Philippe Roy, Commissioner General of Canada in Paris. The Director of the International Labour Office presented a report dealing with the efforts which have been made to secure ratification in various countries of the Draft Conventions which have been adopted by the International Labour Conference at its successive annual meetings since 1919. A general exchange of information and views took place between the members of the Governing Body in which attention was directed more particularly to the Draft Convention which was adopted in Washington in 1919 proposing the application of the eight-hour working day in industrial undertakings. The representative of the British Government intimated that a bill had been prepared for introduction in the British parliament which was intended to ratify this Draft Convention on behalf of the United Kingdom. The bill in question had been examined by the British cabinet and accepted. The Workers' Group drew attention to the extension of working hours in Upper Silesia. When the Geneva agreement between Germany and Poland was signed, the negotiators, under the belief that industrial legislation in Poland was less favourable than German legislation, decided that in Polish Upper Silesia conditions of labour should not be inferior to those provided under the more advanced social legislation of Germany. At the present moment the opposite situation exists. The working day is longer in Germany than in Polish Upper Silesia. The Workers' Group in presenting this subject protested against departure from the principle of the Washington Eight-hour Day Convention. The German Workers' delegate stated that the departures from the eight-hour day in his country were exceptional and did not constitute a precedent for the competing foreign countries.

It was directed that a study which had been made by the International Labour Office of the principle of freedom of association should be continued and completed by a study of jurisprudence connected with this subject.

The resolutions adopted by the International Labour Conference of Labour Statisticians held in Geneva last November were

laid before the Governing Body. The Director was authorized to take the appropriate steps arising out of them, and to summon another Conference of Labour Statisticians to meet in February, 1925, to be devoted mainly to the classification of industries and to statistics of cost of living, unemployment and wages.

The Governing Body accepted the report of its Finance Committee and approved the budget for 1925.

### The New Home of the International Labour Office

On October 21, 1923, the three foundation stones of the new building now in course of erection for the International Labour Office in Geneva were laid by representatives of Governments, employers, and workers, on the site presented for the purpose by the Swiss Federal Council and the Councils of the Republic and Canton and the municipal of Geneva to the League of Nations.

In commemoration of this historic ceremony, an illustrated booklet of some thirty pages has been issued, containing full reports of the speeches made by Mr. Albert Thomas, Director of the International Labour Office; Mr. Chuard, Vice-President of the Federal Council of the Swiss Confederation; Sir Eric Drummond, Secretary-General of the League of Nations; Mr. Carlier, Vice-Chairman of the Governing Body of the International Labour Office, representing the employers' group; Mr. Jouhaux, Vice-Chairman of the Governing Body, representing the workers' group; and Mr. Fontaine, Chairman of the Governing Body, representing the government group.

Messages from various prominent men who were unable to be present including Mr. G. N. Barnes, Mr. Branting, Dr. Brauns, Viscount Burnham, Mr. Colliard, Mr. Samuel Gompers, Mr. Hanotiaux, Mr. Paul Hymans, Mr. Loucheur, and Mr. K. Otchiai, are reproduced.

The booklet also contains an account of the ceremony of the planting in the garden of the new premises, of a young tree—a Latvian oak, presented by the Government of Latvia.

### Sixth Session, International Labour Conference

The Honourable R. W. Craig, K.C., Attorney-General for Manitoba, has been designated by the Government of that province to

attend the Sixth Session of the International Labour Conference which opens in Geneva on June 16, 1924. The Government of Manitoba was also represented, by the former Attorney-General, at the sessions of the International Labour Conference which were held in Washington in 1919 and Geneva in 1921.

### Seventh Session, International Labour Conference

It has been decided that the Seventh Session of the International Labour Conference, to be held in 1925, shall be devoted to the consideration of social insurance questions. A proposal will be included in the Agenda for a Draft Convention on the subject of workmen's compensation for submission to the various Member States comprising the International Labour Organisation. A general report on social insurance is being prepared in the International Labour Office for submission to the Conference. It is not expected that the discussion of this report will lead to the adoption by the Conference of any Draft Conventions or Recommendations, but will comprise rather a preliminary examination of social insurance questions. It has also been suggested that arrangements should be made among the delegates and advisers who will be in attendance at the 1925 Conference for an unofficial exchange of information and views on the prevention of industrial accidents.

### Amendment of Article 393 of the Treaty of Versailles

At the Fourth Session of the International Labour Conference an amendment was adopted to Article 393 of the Treaty of Versailles and the corresponding Articles of the other Treaties of Peace, providing for the enlargement of the membership of the Governing Body of the International Labour Office from 24 persons to 32. This amendment can only take effect when it has been ratified by the States whose representatives compose the Council of the League of Nations and by three-quarters of the Members of the League of Nations. The following countries have already ratified this proposal: Great Britain, France, South Africa, New Zealand, Canada, Cuba, India, Australia, Norway, Siam, Poland, China and the British Empire. Steps looking to ratification have also been taken in Switzerland, Austria, Hungary and Holland.

### Action on Draft Conventions and Recommendations of International Labour Conference

An official bulletin issued by the International Labour Office under date of March 31, 1924, contains summarized information

concerning the action which has been taken in various countries looking to the acceptance of the proposals contained in Draft Conventions and Recommendations of the International Labour Conference. The number of ratifications of Draft Conventions registered by the Secretary-General of the League of Nations is given in this statement as 94. In addition thereto 13 countries have notified their adherence to the Berne Convention on white phosphorus since the First Session of the International Labour Conference in Washington. In 50 cases ratification of Draft Conventions has been authorized in various countries but has not yet been communicated to the League of Nations. In 122 other cases ratification has been recommended to the competent authority but approval has not yet been signified. In all 103 measures have been adopted by various legislative authorities and in measures of an administrative character giving effect partially or wholly to the provisions of Draft Conventions or Recommendations. Seventy-six other measures of various descriptions have been proposed but are not yet finally adopted.

### HOURS OF LABOUR CONVENTION

The referendum in Switzerland on the Act of July 1, 1922, for the revision of the existing law establishing the 48-hour week has resulted in the rejection of the Act by 431,341 votes to 314,009, a majority of 117,332 in favour of the maintenance of the present position.

The Sections of the Belgian Chamber of Deputies have decided by 136 votes to 20 against the bill presented by Mr. Deveze and his colleagues for the revision of the eight-hour act, and have also decided by 97 votes to 66 against the government bill for the same purpose.

The Austrian National Assembly has ratified the eight-hour convention conditionally, the ratification to be effective after the ratification of the convention by Belgium, France, Germany, Great Britain, Italy, Hungary, Poland, the Serb-Croat-Slovene Kingdom, Switzerland and Czechoslovakia.

The bill establishing an eight-hour day in Bolivia was passed by the senate by a large majority recently, according to information received by the International Labour Office.

In the British House of Commons on February 27, the Minister of Labour announced that he proposed to introduce legislation at an early date dealing with the hours of labour convention adopted at the International Labour Conference held in Washington in 1919. The Minister also stated that the Home Secretary hoped to introduce as soon as possible a bill designed to give effect to the convention concerning the use of white lead

in painting, and that if the bill passed into law without any amendment contrary to the provisions of the convention, it was proposed to ratify the convention.

#### RECOMMENDATION FOR PREVENTION OF ANTHRAX

At a meeting of the Permanent Health Committee of the League of Nations in Geneva on February 11 to 21, the appointment of a mixed sub-committee of six, three members representing the Health Committee and three the Advisory Committee on Indus-

trial Hygiene of the International Labour Office was approved. Professor Nocht of Hamburg, Professor Ottolenghi of Bologna and Professor Reynaud of Algiers were appointed by the Health Committee as its representatives. The work of the sub-committee will be to investigate the efficacy of the procedure of disinfection in regard to anthrax. It will direct and co-ordinate all research work undertaken through the medium of national committees in countries which take part in the enquiry.

## RECENT LABOUR LEGISLATION IN MANITOBA, SASKATCHEWAN AND ALBERTA

THE present article contains an outline of the laws relating to subjects of interest to labour which have recently been enacted by the provinces of Manitoba, Saskatchewan and Alberta.

### Manitoba

The third session of the seventeenth Legislature of Manitoba opened on January 12 and ended on April 5, 1924. Among the noteworthy measures of the session may be mentioned the repeal of the Mothers' Allowance Act of 1914, and the transfer of the duties of the Board under that Act to the Children's Welfare Bureau, this change, however, to take effect on its proclamation by the Lieutenant-Governor. Another act gave effect to the Draft Convention of the First International Labour Conference (League of Nations) held at Washington, D.C., in 1919, prohibiting the night employment of young persons under 18 years of age in industry. Further details of this legislation are given in the following paragraphs.

Of special interest to labour was the action taken by the Legislature on proposed amendments to the Workmen's Compensation Act. After protracted discussions, in which various amendments, mostly from the side of labour, were considered, a resolution was finally passed as follows:—

"That the whole subject of workmen's compensation be referred to a special committee during the recess with a view to making recommendations at the next session of the Legislature in regard to legislation on this subject, said committee to be appointed by the Government and to consist of five representatives of employers, five representatives of employees and five members of the Legislative Assembly."

This committee will consider, among other matters, the proposals contained in two bills which were withdrawn in view of the above resolution. The labour members objected to

the reference of this subject to a committee, as the Legislature had previously accepted the principle of increasing the present amount of allowances to widows and children and of providing vocational training for men permanently injured so as to fit them for other occupations. On behalf of the Government, however, it was stated that "it is a move to put workmen's compensation on a permanent and satisfactory basis and bring to an end the annual fight which is waged before this committee with the presentation of legislation by both employers and employees."

An important group of acts related to children, child labour, school attendance and the transfer of the functions of the Mothers' Allowance Commission. The Child Welfare Act of 1922 was amended so as to raise, from 14 to 18 years, the age of children whose employment during the night is forbidden. The Act, as now amended, provides that "it shall be unlawful to employ habitually any child under the age of 18 years between the hours of 9 p.m. and 6 a.m." Similarly, the age up to which it is forbidden to cause a child to be employed between 9 p.m. and 8 a.m. was raised from 16 to 18 years. The provision remains unaltered which prohibits the employment of any child under 16 years of age in any occupation liable to be injurious to his life, limbs, health, education or morals. The penalty for the ill-treatment of a child was raised from a fine of \$500, with 2 years' imprisonment, to imprisonment for five years with hard labour and without the option of a fine (a similar amendment was made in the Children's Act, Revised Statutes, 1913, chapter 30, Section 42). By another amending Act, which will take effect by proclamation, the Mother's Allowance Commission, established under the Mothers' Allowance Act, 1916, is to be incorporated with the

Child Welfare Board, the latter Act, with all its amendments, being repealed. At the same time a new part is inserted in the Child Welfare Act, relating to bereaved and dependent children of 14 years and under, such children including those deprived of both parents, or of their father, whether by death or disablement. The Child Welfare Board is authorized to frame a basis, subject to approval by the Lieutenant-Governor in Council, upon which allowances for the maintenance of a bereaved and dependent child may be granted to the mother, or if the mother is not living, to such person as the Board may entrust with the custody and care of the child. The duty of the Director of Child Welfare is to investigate all such cases that are brought to his notice, and report upon them to the Board. The Director may arrange with any relative of a child as to the apportionment of the cost of its maintenance. The Legislature may appropriate a certain amount each year for the maintenance of this class of children, and the Lieutenant-Governor may authorize the municipal commissioner to levy upon the respective municipalities the whole amount actually expended, or such portion of the amount as may recoup or partly recoup the province for its expense. If the child or its mother is the owner of real property, the official statement of the moneys expended under the Act will form a lien on such property.

Amendments in regard to the maximum age for compulsory school attendance were made in the School Attendance Act, children between the ages of 14 (the existing maximum age) and 16 years being required to attend school regularly when not actively and regularly employed in industry or in household duties, or farm work. Children coming under the 14-year limit are required to attend school to the close of the term during which they attain the age of 14, and not merely up to their fourteenth birthday. Several amendments were made in the Public Schools' Act; schools attended by five or fewer children are not to remain open. Teachers who have made only a verbal agreement with the school trustees are not debarred for that reason from recovering any salary due to them. The council of a rural municipality may make a grant to any school district maintaining a high school, collegiate department or collegiate institute in lieu of the non-resident fees payable by pupils resident in the municipality. These councils may also make special additional grants in districts where the average assessment per teacher is below a certain standard, the amount of such grants ranging from \$2.25 per teacher per teaching day in districts with a low assessment, to 25 cents for

those assessed at a higher amount. The Department of Education was authorized to make grants for boys' and girls' clubs in addition to the various other local institutions for which such assistance is permitted.

The Garnishment Act (Revised Statutes of 1913, Chapter 77, amended 1916, Chapter 46) was further amended in regard to the amount exempted from garnishment. Formerly the Act provided that any debt due or accruing due to a mechanic, workman, labourer, servant, clerk or employee, for wages or salary, should be exempt from seizure or attachment under court process to the extent of the sum of forty dollars. The new amendment substitutes for the words "forty dollars" the words "thirty dollars in the case of widows or widowers without dependent children, and unmarried persons who are not supporting dependent brothers or sisters under the age of 18 years, or a dependent parent or parents, grandparent or grandparents, and sixty dollars in the case of all other persons". The existing provision that "if at the time of the process taking effect upon the garnishee there is less than one month's salary or wages due to such employee, etc., the extent of the exemption shall be at the rate of forty dollars per month for the time such salary or wages are due or accruing due", was amended so that "forty dollars" is altered to "thirty or sixty dollars, as the case may be".

The Manitoba Election Act was amended so as to establish the alternative or preferential system of voting in the constituencies of the province outside of Winnipeg. Where two or more candidates are in the field in any constituency ballot papers are to be marked by numerals, indicating the order of the voter's preference. Winnipeg is not affected by this Act as the system of proportional representation is in existence in that area.

A new amendment to the Municipal Act repealed a provision of 1923 which fixed a limit of \$50 to the license fee which municipalities could impose under the Transient Traders' Act. Another amendment authorized councils of a town, village or rural municipality, by resolution or by-law, to allow the mayor and each member of the council a sum not over \$5 for each regular meeting, but not to exceed \$60 in one year. The indemnity for councillors of a rural municipality, including the reeve, was formerly limited to \$3 a day for each meeting, not exceeding \$45 in one year, while the mayor or reeve could receive up to \$200 a year.

The Municipal Assessment Act was amended in the sections relating to statute labour, one day's additional labour being required for every additional \$900 assessment over \$500,

instead of for every additional \$500 in excess of that amount, as formerly. The amount of the poll tax which is levied in lieu of statute labour upon male inhabitants of a municipality who are not subject to other municipal taxes was raised from \$2 to \$4 yearly.

The Winnipeg charter was amended to give special opportunity for voting to persons who are necessarily absent occasionally from their places of residence and who, for this reason, would otherwise be unable to cast their vote at a civic election. The city was given authority to pass by-laws not inconsistent with any Dominion or provincial statutes for licensing, regulating and governing the business of dry cleaners, dyers, cleaners and pressers, and persons engaged in these and similar businesses in which gasoline and other volatile or inflammable liquids or materials are used.

The Manitoba Farm Loans Act was amended in the sections relating to the provincial guarantee of the stock or securities issued by the Farm Loans Association. The Association was enabled, with the approval of the Lieutenant-Governor-in-Council to make an overdraft on a bank within fixed limits, the province guaranteeing the amount so borrowed, with interest. Further provisions were also made with reference to borrowing by the Association from the province, and the repayment of sums so borrowed. All funds of the Association, without exception, were declared free from all taxation. An Act was passed incorporating the "Manitoba Co-operative Wheat Producers, Limited" with full powers to buy and sell grain and produce. The Rural Credits Act was amended to facilitate the work of such societies. Amendments were made to the Agricultural Societies Act affecting provincial grants to societies.

The Soldiers' Taxation Relief Act was amended by redefining a dependent benefiting under the Act to include the widowed mother of a soldier who, during his service, or, if he is deceased, then at the time of his death, was either wholly or partially dependent upon him for her support.

### Saskatchewan

The legislature of the province of Saskatchewan was in session from January 31 to March 25, 1924, when several acts were passed which had special reference to labour.

A number of amendments were made in the Mechanics' Lien Act in regard to matters of procedure under the act, not however, affecting its main principles.

The Employment Agencies Act, which prohibited private persons or firms from conduct-

ing employment offices for gain, was amended by the addition of a section prohibiting all private agencies from using the word Saskatchewan as part of their designation.

The Attachment of Debts Act was amended, first, by the provision that the government of Saskatchewan may be garnished under the act with regard to moneys due or accruing due to any person employed by it, whether permanently or temporarily, but not to those employed by the day; secondly, by an amendment to the section of the original act which provided that wages or salary due to a workman could not be attached unless for a debt in excess of \$75 and then only to the extent of the excess; the amendment provides that the amount exempt from attachment shall be as follows: \$75 in the case of a married person; \$75 in the case of an unmarried person, widower or widow who is supporting one or more brothers or sisters, or one or more children under 16 years of age or otherwise unable to support themselves, or who is supporting dependent parents or grandparents; \$40 in the case of all other unmarried persons, widowers and widows. Where, in addition to wages or salary an employee receives board and lodging or the use of a house or any other thing of value, the judge may take that fact into account and the exemptions may be reduced accordingly. Those affected by this act are mechanics, workmen, labourers, servants, clerks and other employees.

An amendment to the Masters and Servants Act made provision for the hearing of complaints arising out of contracts for personal service in the remoter parts of the province. Difficulties over such contracts could formerly be taken only before a justice of the peace in the municipality in which the master resided, or in the same judicial district. The amendment provides that proceedings may also be taken before a justice residing in an adjoining rural municipality or district.

Landlords having rent due from a tenant were forbidden, by an amendment to the Landlord and Tenant Act, to seize by distress certain personal and other necessary belongings of the tenant. Such articles include beds and bedding, wearing apparel, stoves, cooking utensils, cups, knives, forks, etc., all necessary fuel and food for the family for 30 days, tools or implements used by the debtor in his occupation, to the value of \$300, and an axe and saw. Other amendments to the same act relate to the priority of the landlord's claim where the lessee makes an assignment under the Dominion Bankruptcy Act, the trustees being required, if there are sufficient assets, to give the landlord up to three months' rent accrued prior to the assignment. This amend-

ment follows an amendment to section 52 of the Bankruptcy Act, which was made by Parliament in 1923 (chapter 31, section 31) leaving to the provinces the right to legislate on the subject of the landlord's preferential claim for rent.

The Children's Protection Act was amended so as to avoid the indiscriminate committal of children to societies. No parent may surrender a child to a children's aid society without having first obtained the consent in writing of the Superintendent of Neglected and Dependent Children. The sections of the original act relating to the time after which children must not be in a public place and to the licensing of children in street trades, were repealed and were incorporated in the City Act and the Town Act. Other sections require notification to the superintendent of the establishment of maternity, nursing and other children's homes, and for their inspection. The transfer of any child to the care and custody of any person other than its parents is forbidden without the consent of the superintendent.

An act to provide for the education and maintenance of blind and deaf children gave statutory authority to certain provisions already made for these classes in the province. The powers of associations under the Agricultural Co-operative Associations Act were extended to include the mortgaging and leasing of their property, several other amendments also being made in the act.

A motion that the alternative vote method should be adopted for use in future provincial elections in all single member constituencies where more than two members are running for election was defeated by a vote of 12 for to 38 against the proposal.

### Alberta

The fourth session of the fifth legislature of Alberta was in session from January 28 to April 12, 1924, when several measures directly affecting labour were passed. Among these acts were the Fire Departments Two-Platoon Act and the Fire Departments Hours of Labour Act, containing provisions practically identical with the similar acts recently enacted in Ontario and British Columbia. (Similar measures were introduced in the Saskatchewan Legislature, but the bills were withdrawn). The second of these acts requires that employees of permanent fire departments shall be allowed one day off in seven, but it is not to be adopted in any particular city until the electors have voted in favour of it. The latter provision was added to the original bill owing to opposition from certain municipal representatives on the ground of alleged

undue interference by the legislature with municipal affairs. The "double platoon" system, which applies to cities and towns with not less than 10,000 inhabitants, was already in effect in Edmonton and Calgary.

*Workmen's Compensation.*—A number of important amendments were made in the Workmen's Compensation Act, the most important of these raising the percentage of payments in disability cases under the act from 55 to 62½, this being the proportion of average weekly earnings which is allowed in cases of permanent total disability, and, in cases of partial disability, the proportion of the difference between the worker's former and present earning capacity. Widow's benefits remain at \$55 per month, but with a sliding scale for children under 16 years of age, regardless of their number. In cases of permanent partial disability the Board may allow a lump sum or periodical payments, or both.

The Minister of Labour in introducing the bill explained that the amendments were intended to bring compensation in Alberta up to the level of the other Canadian provinces. The bill as originally drafted would have fixed the rate of disability payments at 66½ per cent, and raised the monthly payments to widows from \$35 to \$40; the unamended bill would further have increased the maximum amount to which an injured person is entitled from \$1,100 per year as at present, to \$1,200 per year. The principal changes contained in the amending act as passed may be outlined as follows:—

The term "child" was made to include an illegitimate child, any child of any child, and the child of a husband or wife by a former marriage.

The term "workmen" was made to include the employees of a contractor contracting for the performance of mining operations for another person engaged in the industry of mining, and also such contractor while actually working.

The section defining the powers of the Board in regard to assessment was redrafted; one of the new provisions enables the Board to establish a Disaster Fund to meet losses arising from an accident which could not fairly be placed upon the employers in any particular class. Another change, which affects chiefly the mining industry, permits the Board to assess the employer in respect to the wages of a workman engaged by his fellow-workmen as checkweigher, checker, or otherwise, but the employer may deduct this amount from the wages of the workmen.

New powers are conferred upon the Board in dealing with the recovery of assessment from employers, who may be required in

addition to the penalties already provided, to pay up to one-half the compensation payable, but not to exceed \$300 for an accident occurring during the period of default. An equal fine may be imposed on an employer whose failure to comply with the Board's orders has caused an accident.

The period within which claims must be made by an injured employee or his representatives was increased from three to twelve months from the happening of the accident, or in cases of death within twelve months from the date of the death.

The cost of special medical treatment is to be paid by the Board in all cases, instead of optionally, as formerly.

The new scale of compensation in cases of death is as follows: for a widow or invalid widower with one child under 16 years of age, \$35 monthly, with \$12 additional for such child; where there are two young children the additional allowance is \$12 in respect of the eldest and \$10 in respect of the other; where there are three young children, \$12 for the eldest, \$10 for the second, and \$9 for the youngest; where there are four or more, \$12 for the eldest, \$10 for the second; \$9 for the third, and \$8 for each of the others, without any limit as to their number.

The allowance in cases where the only dependents are children under 16 years was raised from \$12.50 to \$15, and the limit of \$50 per month was removed. Where any person entitled to compensation is committed to jail no payment is made while he is so confined, and the whole or any part of the compensation may be paid to a dependent. Where confinement is in an institution the compensation may be paid to the governing body of the institution.

The maximum amount of compensation payable yearly must in no case exceed \$1,140.

In regard to the average earnings upon which the amount of compensation is based, the Board, in its discretion, may accept a figure agreed upon by the employer and the workman as the average earnings of the injured workman. If the injured workman is under 21 years of age the Board may allow for the probable increase which would have been added to his earnings if he had not sustained injury.

Several new provisions were added to the act in regard to medical aid; the Board may fix the amount payable to the doctor, and may contract with doctors, nurses and hospitals. The injured workman may be permitted to select the doctor. Employers are required to provide immediate transportation to a hospital, with all necessary attention, for injured workmen.

Employers are required to keep posted up in their plants such notices as the Board may require to be so posted.

A physician is required to furnish the Board with a report within five days (instead of seven days as formerly) of his first attendance on an injured workman.

A few changes were made in the list of industries coming under Schedules 1 and 2, and a third schedule was added, including employment by the Dominion government, by the Provincial government, or by any permanent board or commission appointed thereunder.

*Minimum Wages.*—The Minimum Wage Act of 1922 was amended in several particulars. The powers of the Board in regard to fixing the periods of employment were enlarged to enable it temporarily to increase the working hours for any class of employees and determine the rate of pay for such overtime, and also to increase temporarily the number of apprentices in a particular trade or occupation. Employers were required to give an apprentice, on request, on leaving his employment, a written statement of the time he has served. Further penalties were provided for employers who disobey any order made by the Board, or hamper the Board's inspectors in his work.

*Engineers' Certificates.*—Several amendments respecting engineers' and firemen's certificates were made in the Boilers Act. A fireman's final certificate was stated to qualify for taking charge of a heating boiler "not exceeding 15 horse-power", the steam pressure allowed for remaining as formerly given, namely, 20 pounds per square inch and not more than 100 pounds. A holder of such a certificate, however, is authorized to act in the capacity of night watchman of a steam plant where the safety valves attached to the boiler are adjusted to discharge at a higher pressure than 20 pounds per square inch during a period when the fires are banked and no steam is used for the boilers excepting to supply water to the boilers, but he is allowed also to spread the fires and increase the steam pressure for the purpose of enabling the engineer to commence operation on his arrival. Holders of first, second and third class certificates may produce their examination certificates in lieu of proofs of length of service, etc. Holders of certificates are required to make regular application for their annual re-registration. Every person engaged in the operation of a steam boiler is required to speak the same language as the engineer in charge.

*Other Legislation.*—The jurisdiction of justices as to small debts was extended so as to cover debts up to \$100 instead of \$50, as formerly.

The time limit fixed under the Threshers' Lien Act for giving notice of the holding of grain by threshers for the purpose of securing payment, was raised from 30 to 60 days.

The Motor Vehicles Act was recast, under the title Vehicles and Highway Traffic Act, the new act containing many new features; no person under the age of sixteen years is allowed to drive or operate a motor vehicle on any highway; chauffeurs, that is, persons who drive a motor vehicle for hire by another person, are required to have their photograph affixed to their licenses.

The opening Speech from the Throne foreshadowed an extension of the principle of co-operative marketing to other kinds of farm produce than wheat, co-operative wheat marketing having met with much success. Accordingly, in addition to an act incor-

porating the Alberta Wheat Producers, Limited, for the purpose of the "wheat pool", the Co-operative Societies Act was enacted to create greater facilities for the work of such organizations; the Co-operative Marketing Associations Act allowed such organizations to incorporate on the basis of membership instead of capital share; the Co-operative Credit Act was amended to provide a sinking fund and closer supervision of local groups of credit issued; A Farm Loan Board was established, with local associations, borrowers being required to take capital shares on the basis of two five-dollar shares for each one hundred dollars borrowed, the rates of interest to be not less than rates paid on bonds issued to cover loans and cost of administration; only farmers or intending farmers may have loans for a period of 30 years, which are not to be more than 50 per cent of the appraised value of the land plus the estimated increase in value due to the loan, the rate of interest to be sufficient to pay the interest payable by the Board.

## MINING LEGISLATION IN CANADA

### Outline of Labour Provisions of Provincial Mine Regulation Acts

**A**N outline of the provisions of the several provincial laws governing labour in mines was given in the *LABOUR GAZETTE* for November, 1920. This was the last of a series of articles summarizing the provincial laws on several groups of subjects on which more uniform legislation had been recommended by the Dominion-Provincial Commission on Uniformity of Labour Laws, held at Ottawa in April, 1920.

#### Recent Amendments

Some important amendments have been made since 1920 in the mining acts of several of the provinces. In 1921, the British Columbia Act was amended to prohibit any light or lamp other than a locked safety lamp to be used underground in any mine, and the existing regulation as to the watering and treating of dusty places in a mine was extended to cover all mines without exception. A Yukon Ordinance, also of 1921, forbade the employment of any person underground in a shaft or tunnel in or upon any mineral claim for a longer period than eight hours in any day, except in connection with a "change over" of shifts, or in emergencies.

In 1922, the Nova Scotia Act was amended to permit the working of barriers in coal

mines when in the interest of safety. A Quebec amendment prohibited the employment of youths under 20 years of age on mine elevators or windlasses used for hoisting workmen, and of youths under 18 years on any machinery for hoisting, haulage, or drilling blasting holes in mines or quarries, or in immediate connection therewith. Mine managers in Alberta were required, as a condition to obtaining a provincial certificate, to have had two years' practical experience in a coal mine in Canada, out of the required total of three years of practical experience in a mine; owners or managers must not attempt to influence the miners in their choice of a checkweigher. Wages in the same province were required to be paid fortnightly and upon a Saturday, the period allowed for arrears being reduced from two weeks to one week, payments to include all unpaid wages earned before the Saturday preceding the date of payment instead of before an interval of two weeks.

In 1923, Nova Scotia raised the age limit for the employment of boys in mines from 12 to 16 years; boys under 16 could formerly be employed on securing school certificates, their working hours being limited to ten in the day and fifty-four in the week. In the

same province the rule providing that travelling roadways in mines shall be of reasonable height was enlarged to make provision that in the event of a dispute between the owners and the inspector as to the capacity of the roadway the matter shall be settled by arbitration; roadways must also be wide enough to permit draft animals to pass without rubbing the roof or sides; where mechanical hoisting or lowering appliances are used in a mine the brake straps or drums must be lined with asbestos or other non-inflammable material. Mine managers were by the same act declared to be competent to act as mine examiners, and a previous clause absolutely forbidding the use of electric lamps for the purpose of examination for the detection of noxious gas, was repealed; all such lamps, however, must still be of a type approved by the Commission of Public Works and Mines. Penalties for offences against the British Columbia Coal Mines Regulation Act were substantially increased, and notification was required of certain types of accident even where no loss of life has resulted therefrom.

The legislature of Nova Scotia, during the present session amended the Coal Mines Regulation Act so as to give statutory effect to the 8-hour day, already in force by custom in the mines of the province. Working hours are counted from the time the miner arrives at his place of work until he leaves, the usual provisions being added to permit of longer working hours in emergencies, or before the weekly change of shift.

An amendment of 1919 to the Coal Mines Regulation Act of British Columbia provided for the constitution of a Coal Miners' Minimum Wage Board, to consist of the chief inspector of mines as chairman, and two other members, one appointed by the owners and one by the men. No such Board, however, has so far been named.

The mining acts of Quebec, Ontario and Manitoba have no reference to coal mining, which is not carried on in these provinces.

#### Other Legislation Affecting Mining

No mining acts are on the statute books of Prince Edward Island or New Brunswick, but other acts of New Brunswick affect labour in mines more or less directly. Thus the age limit for the employment of boys is governed to some extent by the School Attendance Act which enables local authorities in the province to forbid the employment of children under 16 during school hours. Again, the New Brunswick Public Health Act of 1918 directly protects the health of employees in mining camps, making provision for regulations regarding the inspection of all houses and places connected therewith, and for the erection of permanent or temporary hospitals and for the services of duly qualified physicians. Similarly, the Public Health acts of all the other provinces safeguard the health of the workers in mining camps. In Yukon Territory, however, no such provision is made.

#### Rules and Regulations

All the mining acts contain general rules for maintaining the safety and health of the mine workers, dealing with ventilation, safety lamps, sanitation, protection of working places, shafts, etc., hoisting, the handling and storing of explosives, boilers, travelling roads and haulage, prevention of dust, shafts and winding, signalling, the use of electricity, the support of roof and sides of travelling roads, the condition of machinery, sale of intoxicating liquors near mines, and numerous other matters.

The principal provisions of the various provincial mining acts in so far as they affect labour conditions in the mines, are set forth in the accompanying table.

TABLE SHOWING PRINCIPAL LABOUR PROVISIONS OF

	Nova Scotia		Quebec	Ontario
	Coal Mines	Metalliferous Mines		
Acts	Coal Mines Regulation Act (Statutes of 1913, chapter 10)	Metalliferous Mines Regulation Act (Statutes of 1913, chapter 15)	Mines Regulation Act (Revised Statutes of 1909, Arts. 2177 to 2217) governs all classes of mines and quarries	Mining Act (Revised Statutes of 1914, chapter 32) governs all classes of mines, also smelters, crushing plants, etc.
Hours of Labour	8 hours at place of work, except in emergencies. Saturday extension permitted for change of shift	No limit for adults. 10 hours in day or 54 hours in week for boys 12 to 16 years of age except in emergencies	No limit for adults. Hours of boys aged 15 to 17 years not to exceed 48 hours weekly	8 hours at work place in mine for all underground workers except shift bosses, cage tenders, hoistmen, surveyors, etc., or where six or less workers in shift. Saturday extension permitted for change of shift
Employment of Women and Girls	No provision	No provision	Forbidden except in offices	Forbidden except in offices
Age limit for boys	16 in or about a mine. 18 for boys in charge of hoists for workmen on slope. 21 for same in shaft	12 years in or about a mine (School certificate required under 16)	15 years underground. 16 for transmitting signals. 18 for boys in charge of hoists for material. 20 for boys in charge of hoists for workmen	16 years above ground. 18 years below ground and for boys in charge of hoists for material. 20 for boys in charge of hoists for workmen
Payment of Wages	Weekly (except wages paid at monthly rates) To be paid in currency	No provision	No provision	Semi-monthly
Deductions from wages	May be made for payment of checkweighers, doctors, church, hospital and society dues, but not for local rates except by written consent of workman. Deductions for stone, etc., to be made by agreement, with provision for third party in case of disagreement	May not be made for local rates except by written consent of workman	No provision	No provision
Piece work	If wages paid by weight of coal, coal to be weighed near pit head and checked by checkweigher, or by other checker if wages based on other measurement.	No provision	No provision	No provision
Checkweighers	Must be working miners with 3 years' experience, certificated and employed at colliery. Elected by ballot of men for one year. Owners to furnish facilities, shelter and desk	No provision	No provision	No provision

## MINING ACTS OF VARIOUS PROVINCES

Manitoba	Saskatchewan	Alberta	British Columbia		Yukon
			Coal Mines	Metalliferous Mines	
Mines Act (Revised Statutes of 1913, chapter 128) governs all classes of mines, also smelters, roast yards, etc.	Mines Act, (Revised Statutes of 1920, chapter 178) governs all classes of mines and works connected with mines	Mines Act (Session of 1913, 1st session, chapter 4) governs coal mines and all other mines	Coal Mines Regulation Act (Revised Statutes of 1911, chapter 160)	Metalliferous Mines Inspection Act (Revised Statutes of 1911, chapter 164)	Miners' Protection Ordinance (Consolidated Ordinances, 1914, chapter 65) governs all classes of mines
No limit of hours	No limit of hours	8 hours underground from time of leaving surface, except in emergencies	8 hours underground from bank to bank, but 8½ hours for on-setters, cagers, pumpmen and engineers in charge of constantly running machinery where more than two shifts worked. Extra time for changes of shifts, 8 hours above ground, except for office, boarding-house employees, etc.	8 hours under or above ground (except office workers) except in emergencies	8 hours underground except on change of shift or in emergencies
No provision	Forbidden in mine workings	Forbidden except in offices	Forbidden except in clerical and domestic work.	Forbidden underground and those employed above ground to be registered	No provision
No provision (1)	14 years in workings of mine	14 above ground 16 below ground and for boys in charge of horse power hoists (school certificate required under 16) 15 for boys in charge of machine hoists	14 above ground 15 below ground. 16 on hoists for material. 22 on other hoists.	Boys under 16 to be registered	12 for work in or about mine (certificate required under 16)
No provision	No provision	Fortnightly	Semi-monthly (2) To be paid in currency (3)	No provision	No provision
No provision	May be agreed to by miner for payment of checkweigher	May be agreed to by miner for payment of checkweigher. Worker may request deductions for payment of debts. Employer may make deductions for coal, oil, rent, etc. Deductions for stone, etc., to be made by agreement, with provision for third party in case of disagreement	May be agreed to by miner for payment of checkweigher. Deductions for stone, etc., to be made by agreement, with provision for 3rd party in case of disagreement	No provision	No provision
No provision	If wages paid by weight of coal, coal to be weighed near pit head and checked by checkweigher, or by other checker appointed by men if wages based on other measurement	If wages paid by weight of coal, coal to be weighed near pit head and checked by checkweigher, or by other checker appointed by men if wages based on other measurement	If wages paid by weight of coal, coal to be weighed near pithead and checked by checkweigher, or by other checker appointed by men if wages based on other measurement	No provision	No provision
No provision	Must be miner with 3 years' experience, resident in Province. Elected by men, owners to furnish facilities, shelter, and desk	Must be working miner, with 3 years' experience, resident in Province. Elected by men, owners to furnish facilities, shelter, and desk	No special qualifications provided for. Elected by men. Owners to furnish every facility	No provision	No provision

Ventilating area units required	At least 100 cubic feet pure air per minute for each man or boy, and 300 cubic feet for each animal. Ventilating area units required		Adequate

## VALIDITY OF INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

### Judgment of Appellate Division of Supreme Court of Ontario

ON April 22, judgment was delivered in the Appellate Division of the Supreme Court of Ontario in the case of "Toronto Electric Commissioners *versus* Snider, O'Donaghue and McGuigan." The defendants were members of a Board of Conciliation and Investigation appointed last July under the Industrial Disputes Investigation Act, 1907, to deal with a dispute between the plaintiffs and certain of their employees.

In August of last year the Toronto Electric Commissioners applied for an interim injunction to restrain the Board from interfering with their business or from exercising the powers conferred on it by section 38 of the Act. The interim injunction was granted on August 31 by Mr. Justice Orde on the ground that the Act was *ultra vires* of the Dominion parliament. The text of his judgment was given in full in the October, 1923, issue of the LABOUR GAZETTE, on pages 1126 to 1130. Application for the issuing of a permanent injunction against the members of the Board was subsequently made, and it was heard by Mr. Justice Mowat. In his judgment, which was delivered on December 15, he refused to grant the injunction, holding that the act was within the powers of the Dominion parliament. He accordingly referred the matter to the appellate division of the Supreme Court. The text of Mr. Justice Mowat's judgment appeared in the issue of the LABOUR GAZETTE for December last, on pages 1452 to 1455.

The proceedings before the Divisional Court comprised a continuation of the trial on reference to this Court by Judge Mowat. The judgment of the Divisional Court was delivered by Mr. Justice Ferguson and dismissed the action with costs, including costs of injunction proceedings. The issue of the judgment and the order dissolving the injunction were, however, directed to be stayed for such time as was reasonably necessary to allow an appeal to be taken. The judgment of Mr. Justice Ferguson was concurred in by Chief Justice Mulock and by Mr. Justice Smith and Mr. Justice Magee. Mr. Justice Hodgins dissented and was of opinion that judgment should be entered for the Toronto Hydro Electric Commissioners.

The Attorney-General of Canada and the Attorney-General of Ontario, though not parties to the case, were represented by counsel, as the constitutional validity of an Act of the Parliament of Canada was in question.

#### Text of Divisional Court Judgment

The judgment prepared by Mr. Justice Ferguson of the Divisional Court was as follows:—

Continuation of the trial on a reference to this Court by Mowat, J., under section 32 of The Judicature Act, R.S.O., cap. 56, ss. 3 and 4, which read:—

"(3) If a Judge deems a decision previously given to be wrong and of sufficient importance to be considered in a higher court, he may refer the case before him to a Divisional Court.

"(4) Where a case is so referred, it shall be set down for hearing, and notice of hearing shall be given in like manner as in the case of an appeal to a Divisional Court."

The plaintiffs are a Board of Commissioners appointed under sections 16 and 17 of I George V, cap. 119 (Ontario), (An Act respecting the City of Toronto), to manage the municipal electric light, etc., of the city of Toronto. They are a body corporate and have the duties and powers of commissioners under The Public Utilities Act, R.S.O. (1914), cap. 104. The defendants are a Board of Conciliation and Investigation appointed under and pursuant to the Industrial Disputes Investigation Act (1907) with all the powers conferred by that Act upon commissioners appointed thereunder for the purpose of investigating, reporting upon and bringing about a settlement between the plaintiffs and their employees. The Attorney-General of Canada and the Attorney-General of Ontario are not parties but appear pursuant to notice served upon them under section 33 of The Judicature Act, which provides that, where, in any action or proceeding, the constitutional validity of any Act of the Parliament of Canada or the Legislature of Ontario is brought into question, the same shall not be adjudged invalid until after notice has been served upon the Attorney-General for Canada and the Attorney-General for Ontario; also that the Attorney-General for Canada and the Attorney-General for Ontario shall be entitled as of right to be heard either in person or by counsel, notwithstanding that the Crown is not a party to the action or proceeding.

The plaintiffs plead that the Industrial Disputes Investigation Act is not within the powers conferred on the Parliament of Canada by the British North America Act, because (1) it deals with property and civil rights in the province, subjects (Class 13) exclusively assigned to the Provincial Legislatures by sec. 92 of the British North America

Act; (2) it interferes with municipal institutions, one of the classes of subjects (Class 8) exclusively assigned to the Provincial Legislatures by sec. 92 of the British North America Act; (3) it is an interference with a local work or undertaking, subjects (Class 10) exclusively assigned to Provincial Legislatures by sec. 92 of the British North America Act.

The plaintiffs ask the following relief (1) a declaration that the defendants are, without lawful authority, acting as a Board of Conciliation and Investigation into alleged disputes between the plaintiffs and certain of their employees; (2) an injunction restraining the defendants and each of them from proceeding with the investigation or in the alternative for a perpetual injunction in the terms of an interim injunction granted herein by the Hon. Mr. Justice Orde.

Before pleading, the plaintiffs applied for and obtained from Mr. Justice Orde, sitting in Weekly Court, an interim injunction restraining the defendants, until the trial, from interfering with the business of the plaintiffs, from entering upon the premises of the plaintiffs; from examining the plaintiffs' work or employees upon the plaintiffs' premises, and from exercising any of the compulsory powers contained in section 30 to 38 of the Industrial Disputes Act, and from interfering in any way with the property and civil rights or the municipal rights of the plaintiffs.

The interim injunction was not granted merely because the learned Judge who made the order was of opinion that sufficient had been shown to entitle the plaintiffs to have the rights of the parties determined by a trial before the proposed investigation was proceeded with. His reasons for making the order make it clear that, after a careful review and consideration of the authorities, he was of opinion that the Industrial Disputes Investigation Act is *ultra vires* of the Parliament of Canada. The trial Judge, being of a different opinion, considered the interim injunction order granted by Mr. Justice Orde and his reasons therefor a decision previously given within the meaning of section 32 of The Judicature Act entitling and requiring him to refer the question raised to the Appellate Division for their decision.

It is not, I think, necessary for the decision of the case at bar to pass upon the constitutional validity of any sections or provision in this Act which do not deal with the powers of the Board, and consequently it is not necessary to consider the constitutional validity of sections 56 to 61 which deal with strikes and lock-outs prior to and pending a reference to a Board of Enquiry.

I am of opinion that, while sections 30, 36 and 37 of the Act confer on the Board compulsory powers which trench upon property and civil rights, and authorize the Board to inquire into industries that are in some cases local works carried on by municipalities, yet my opinion is that, according to the "true nature and effect of the enactment," "its pith and substance," the legislation is not law in relation to "municipal institutions" (8), local works (10), property and civil rights (13), matters purely local (16), as these words are used in subsecs. 8, 10, 13 and 16 of sec. 92 of the British North America Act, but is legislation to authorize, and provide machinery for conducting an inquiry and investigation into industrial disputes between certain classes of employers and their employees, which disputes in some cases may, and in other cases will, develop into disputes affecting not merely the immediate parties thereto, but the national welfare, peace, order and safety, and the national trade and business.

The purpose of the inquiry authorized by the Act is, I think, three-fold: (1) the regulation of trade and business by preventing the interruption of trade and commerce necessarily incident to delaying, hindering, interrupting or stopping the operation of mines or public utilities; (2) the promotion and protection of national public peace, order and safety by (a) confining the dispute to a limited district, or bringing about a settlement, (b) by informing the public in reference to the cause and nature of the dispute, (3) by bringing to bear upon the parties intelligent public opinion, and through that agency preventing the breaking out and spreading of strikes or lock-outs and the disturbances, rioting and breaches of the peace and criminal law which, it is common knowledge, frequently follow the stopping, by strike or lock-out, of the operation of mines, agencies of transportation or communication and public service utilities which furnish such necessities as light, heat and power.

Counsel for the defendants and the Attorney-General for the Dominion submitted that as, according to its "true nature and effect," its "pith and substance," and its title, the Act here in question is legislation in reference to industrial disputes, and as the Imperial Parliament, in the Australian Constitution Act, (63-64 Vic.), recognized and treated industrial disputes as presenting an aspect of peace, order and good government that required special legislative treatment (see sec. 51 of The Australian Act), we may and should hold that the legislation does not fall within any of the classes enumerated in sec. 92 of The British North America Act. Basing his argument on the foregoing submission, and on a

statement of the Judicial Committee in *Russell v. The Queen*, 7 A.C. at p. 836, and another statement in the *Alberta Insurance Case* (1916) 1 A.C. 588 at 595, counsel for the Dominion urges that the legislation here in question is valid because it is a class of legislation not covered by or included in any of the classes enumerated in section 92 of the *British North America Act*.

The statements of the Judicial Committee relied upon for this proposition, read (*Russell v. The Queen*, p. 836):—

The first question to be determined is, whether the Act now in question falls within any of the classes of subjects enumerated in section 92, and assigned exclusively to the Legislatures of the Provinces. If it does, then the further question would arise, viz., whether the subject of the Act does not also fall within one of the enumerated classes of subjects in section 91, and so does not still belong to the Dominion Parliament. But if the Act does not fall within any of the classes of subjects in section 92, no further question will remain, for it cannot be contended, and indeed was not contended at their Lordship's bar, that, if the Act does not come within one of the classes of subjects assigned to the Provincial Legislatures, the Parliament of Canada had not, by its general power 'to make laws for the peace, order and good government of Canada', full legislative authority to pass it.

(The *Alberta Case*, p. 595):—

It must be taken to be now settled that the general authority to make laws for the peace, order and good government of Canada, which the initial part of section 91 of the *British North America Act* confers, does not, unless the subject-matter of legislation falls within some of the enumerated heads which follow, enable the Dominion Parliament to trench on the subject-matters entrusted to the Provincial Legislatures by the enumeration in section 92. There is only one case, outside the heads enumerated in section 91, in which the Dominion Parliament can legislate effectively as regards a province, and that is where the subject-matter lies outside all of the subject-matters enumeratively entrusted to the province under section 92. *Russell vs. The Queen* is an instance of such a case.

Counsel for the plaintiffs and the Attorney-General for Ontario submit that the legislation here in question trenches upon the classes of legislation enumerated in sub-secs. 8, 10, 13 and 16 of section 92, and that the Dominion Parliament may not trench on any class enumerated in section 92 except to legislate in respect of a class enumerated in section 91, and for the later submission they rely upon the statements quoted by Mr. Justice Orde, from *Montreal v. Montreal* (1912) A.C. 333; the opinion of Mr. Justice Duff in the *Board of Commerce Case*, 60 S.C.R. 456 at 508; the statements in Attorney-General for Ontario v. Attorney-General for the Dominion (1896) A.C. 348 at 360; the first sentence I have quoted from the *Alberta Case* (supra). The plaintiffs and the Attorney-General for Ontario further submit that *Russell v. The Queen* is not now regarded as authority for the state-

ment that Dominion legislation which trenches upon any of the classes enumerated in section 92 can be supported on the peace, order and good government clause of section 91 without aid from one or more of the classes enumerated in section 91, and in support of this proposition they refer to a statement appearing at page XIX and XX Cameron's *Canadian Companies* in the Judicial Committee.

Though in the view I have taken it is not necessary to rest my judgment upon the meaning and effect of the authorities cited for and against the proposition stated by counsel for the defendants and the Attorney-General for the Dominion, I think it proper to say that I am not convinced that the point raised has been yet decided. As I read *Russell v. The Queen*, there is much in the reasons for the result in that case to support the view that the right of the Dominion to enact the legislation there in question could be and was supported by reference to and on the power of the Dominion to legislate in reference to public wrongs and Criminal law and trade and commerce, rather than on power to legislate in reference to an unenumerated subject. I am also of the opinion that the decision on this point was not necessary to the determination of the *Alberta Insurance Case* (supra), and as I read the *Montreal case*, it decided only that the power to regulate rates and traffic on connecting provincial lines was not necessarily incident to the regulation of rates and traffic on Dominion Railways. In the *Board of Commerce Case*, Mr. Justice Duff's statement does not take the form of a pronouncement on a point necessary to the decision of the case he was considering.

In the *Distillers and Brewers Case* (1896) A.C. at 360, the Committee states the proposition as it is stated by Mr. Justice Duff in the *Board of Commerce Case*, and yet in the same case accepts and treats *Russell v. The Queen* as rightly decided.

After a careful perusal of the authorities, I am unable to reconcile the cases or the two propositions in the statement I have quoted from the *Alberta Insurance Case*, unless it be that the legislation in *Russell v. The Queen* did not, in the opinion of the Judicial Committee, even trench upon any of the powers conferred upon the provinces by section 92, or unless it be that the opinions of the Judicial Committee in *Russell v. The Queen*, and in the *Fort Frances Case*, (1923) A.C. 695, are founded upon the proposition that, where a condition arises in which the peace, order and welfare of the Dominion as a whole is affected and that condition cannot be effectively met, controlled and regulated by provincial legis-

lation, the Dominion Parliament has power to legislate under the peace, order and good government clause of section 91 even if in so doing it trenches upon some of the classes enumerated in section 92. While there are statements in the reasons for judgments in the Russell case and the Fort Frances case which appear to support the last proposition, it is not, I think, clear that the proposition was necessary to the decision of either case or that it is laid down in either case.

In the absence of clear and binding authority requiring me to do so, I am not prepared to hold that such a wide and far reaching power must, can or should be implied in order to give effect to the agreement which the Imperial Parliament embodied in the British North America Act. I incline to the view that if the Russell case is not supported by reference to sub-section 27 of section 91, Criminal law, and ss. 2, Trade and Commerce then it must be taken to have been determined on a finding that the legislation did not in fact trench upon any class enumerated in section 92 and that the Fort Frances case is based upon a finding of such an abnormal condition that the necessities of the situation demanded, required and justified the implying of an overriding power to legislate so as to meet, regulate and control an abnormal condition amounting to a great national emergency, in which the safety of the nation as such was threatened.

For these reasons I am of opinion that the weight of authority is in favour of the proposition that, except in conditions involving the very safety of the Dominion as a political entity, the Parliament of Canada may not in its legislation trench upon any of the subjects enumerated in section 92, unless such legislation, according to its pith and substance, is legislation in relation to a class of legislation enumerated in section 91 of the British North America Act.

Counsel for the Attorney-General for the Dominion and the defendants submit that, if the legislation cannot be supported as not falling within or trenching upon any of the classes enumerated in section 92, it can and should be supported as legislation in respect of one or more of the classes enumerated in section 91 of the British North America Act.

The wording of section 91 of the British North America Act makes clear that legislation which comes within any of the enumerated classes of section 91 is within the power of the Dominion Parliament, and numerous cases, many of which are quoted in the latest pronouncement of the Judicial Committee in *re Reciprocal Insurance* (1924) 1 D.L.R.; 789

at 795, establish that the class of legislation is determined by reference to "its true nature and character," "its pith and substance," "its paramount purpose."

I have already expressed my opinion as to "the true nature and character of the legislation," "its pith and substance," "its paramount purpose," and that brings me to the inquiry; Does legislation of that nature fall within any of the enumerated classes of section 91? In such an inquiry, two classes suggest themselves. They are:

(1) The regulation of Trade and Commerce (Sec. 91, class 2).

(2) The Criminal law except the constitution of Courts of Criminal jurisdiction (Sec. 91, class 27).

The meaning of "trade and commerce" as used in the section has been considered in a number of cases. These cases are collected and discussed in Cameron's Canadian Constitution, pages 75 to 78, and while the scope of this power of the Dominion to regulate trade and commerce is not defined or determined by any of the cases considered, it was said in *Citizens v. Parsons*, 7 A.C. 96, that: "the words include the political arrangements in regard to trade requiring the sanction of Parliament, regulation of trade in matters of interprovincial concern, and it may be they would include general regulation of trade affecting the whole Dominion."

The scope of class 27 was considered in *Attorney-General for Ontario v. Hamilton Street Railway*, 1903, A.C. 524, and in that case the Judicial Committee said that the words "Criminal Law" meant "Criminal Law in its widest sense."

While it may be argued that regulations in reference to trade and commerce mean regulations defining how or in what manner articles or commodities shall be dealt or traded in rather than regulations in reference to the production thereof, and that the object of the investigation is to prevent the interruption of production rather than interruption of trading in commodities produced, I am of opinion that the "employers" named in subsection (c) of section 2 of The Industrial Disputes Act are dealers and vendors in articles of trade and commerce, as well as producers thereof, and that the legislation here in question may be read as being legislation to prevent the shutting down and the stopping of plants and industries which vend and deal in articles of trade and commerce, which, by reason of their very nature, are of national importance. It cannot be disputed that to deprive the City of Toronto of electric

power on which it depends for light, heat and power is to disturb and hinder the national trade and commerce and to endanger public peace, order and safety.

As to Criminal law, it may be argued that Criminal law means only law defining crimes and fixing punishments therefor. It is to be noted that section 91 of the British North America Act does not confine the power of the Dominion to making Criminal law, but that the power extends to making law *in relation* to the Criminal law. My view is that the power to make law *in relation* to the Criminal law in its widest sense, includes power to make laws a paramount purpose of which is the prevention of public wrongs and crime, and the maintenance of public safety, peace and order, and that the power of defining what shall constitute a crime, and providing for punishment, is only a part of the power conferred on the Dominion Parliament by class 27, sec. 91, of the British North America Act.

Industrial disputes are not now regarded as matters concerning only a disputing employer and his employees. It is common knowledge that such disputes are matters of public interest and concern, and frequently of national and international importance. This is so, not because the disputes may result in many plants being shut down, or tens, hundreds and even thousands of employees drawing strike pay instead of wages, but because experience has taught that such disputes not infrequently develop into quarrels wherein or by reason whereof public wrongs are done and crimes are committed, and the safety of the public and the public peace are endangered and broken, and the national trade and commerce is disturbed and hindered by strikes and lock-outs extending not only throughout the Dominion but frequently to the United States, where most of our trade unions have their headquarters. Being of opinion that the Act is not one to control or regulate contractual or civil rights, but one to authorize an enquiry into conditions or disputes, and that the prevention of crimes, the protection of public safety, peace and order and the protection of trade and commerce are of the "pith and substance and paramount purposes" of the Industrial Disputes Act and of the enquiry authorized and directed thereby, I think the legislation may and should be supported on the powers conferred upon the Dominion Parliament by sec. 91 B.N.A. Act to make laws "*in relation to*" "the regulation of trade and commerce," and to make laws "*in relation to*" "the Criminal law" "in its widest sense," even though it

does not enact a Criminal law or a law defining how or in what manner trade and commerce shall be carried on. See *Russell v. The Queen*, 7 A.C. 829, in which the Judicial Committee, referring to the Canada Temperance Act, said (p. 839):

Laws of this nature designed for the promotion of public order, safety or morals, and which subject those who contravene them to criminal procedure and punishment, belong to the subject of public wrongs rather than to that of civil rights. They are of a nature which fall within the general authority of Parliament to make laws for the order and good government of Canada, and have direct relation to criminal law, which is one of the enumerated classes of subjects assigned exclusively to the Parliament of Canada. . . . Few, if any laws, could be made by Parliament for the peace, order and good government of Canada which did not in some incidental way affect property and civil rights, and it could not have been intended, when assuring to the Province exclusive legislative authority on the subject of property and civil rights, to exclude the Parliament from the exercise of its general powers whenever any such incidental interference would result from it. The true nature and character of the legislation in the particular instance under discussion must always be determined in order to ascertain the class of subject to which it really belongs.

I would dismiss the action with costs including costs of injunction proceedings, but would stay the issue of the judgment and the order dissolving the injunction restraining the defendant from proceeding with the enquiry for such time as is reasonably necessary to allow an appeal to be taken.

SMITH, J. A.: I agree.

MAGEE, J. A.: I agree.

MULOCK, C. J. O.: I agree with my brother Ferguson that the impugned portion of the legislation in question is legislation within the competency of the Dominion Parliament under its powers to make laws for the peace, order and good government of Canada in relation to the regulation of trade and commerce, and therefore think the action should be dismissed with costs.

#### Dissenting Opinion of Mr. Justice Hodgins

In his dissenting opinion Mr. Justice Hodgins declared that it was necessary "to consider whether this statute can be supported (1) under emergency, (2) as dealing with a matter of general Canadian interest and importance, and (3) whether under any enumerated head of jurisdiction it has been validly enacted." The argument was limited to the effect of the act in relation to the respondents, a commission operating locally and formed by provincial authority.

With regard to emergency, it was held that the statute was based upon the normal working of industrial relations, as essentially a sedative measure, and was not in any way designed to meet serious emergencies.

With regard to the second consideration, as to whether it deals with a matter of general Canadian interest and importance, the case of "Attorney-General for Ontario *versus* Attorney-General for Canada (1896) A.C. 343," was cited, which, it was declared, while conceding to the Dominion matters of Canadian interest and importance, which would seem to include such a subject as industrial conditions and dangers, as affecting the "public order and safety" lays down as a qualification that legislation regarding such subjects "ought not to trench upon any of the classes specially confided to the provinces."

Various other decisions were cited, which were held to lay down a rule "to confine the powers of the Dominion Parliament in its action, under the provision as to the peace, order and good government of the Dominion, to such matters of Canadian interest and importance as can be dealt with, without trenching upon any of the subjects specially reserved to the provinces."

"So far as appears from the pleadings and evidence," the argument continued, "this Act affects the respondent Commission, which only operates in this province, and is constituted to carry out operations properly belonging to the spheres of municipal action. This forms another and important objection, as the act interferes with what is in effect the right of the province to form and control municipal institutions, and appears to trench upon what is of a local and private nature within the province. The legal remedy sought by this Commission, namely an injunction restraining the members of the Board from certain activities, may not involve all the matters referred to as important in considering the scope of the Act. But as the Act must 'be scrutinized in its entirety' (*Great West Saddlery Company v. The King* (1921), 2 A.C. 117), the considerations I have discussed must be given weight to in determining the real scope and effect of the Act. We are not called on to determine whether the Dominion jurisdiction as to railways, other than those under provincial control, or as to shipping and navigation, will preserve this Act in its relation to railway employees or those engaged in such shipping as may be considered a public utility."

With regard to whether the law had been validly enacted under any enumerated head of jurisdiction, namely "trade and commerce" or "criminal law," the opinion was expressed that the relations of employer and employee resulting in the production of articles which are the subjects of trade and

the use of property for that purpose were not meant to be included within the enumerated power of dealing with matters of trade and commerce conferred on the Dominion, which is directed to the "movement and interchange of commodities and their purchase and sale, but not to their production or manufacture, or any of the conditions dealt with by this Act, which result in that production."

In regard to the criminal law, the case of "*Ontario vs. Reciprocal Insurers*" was cited, and it was stated that the Judicial Committee of the Privy Council had rejected the argument "that if the true character of the section, 508 (c), was one regulating the exercise of civil rights, thus infringing the provincial jurisdiction, yet as the authority of Parliament in regard to criminal law being unlimited, it was valid as creating a crime. This device was rejected by the Judicial Committee on the ground earlier stated by Lord Haldane in the Board of Commerce case."

If, therefore, this legislation was one substantially in relation to property and civil rights, it was held that the case applied and governed here.

---

It is stated that next July there will be carried to the Judicial Committee of the Privy Council the appeal brought by the Lord's Day Alliance against the recent judgment of the Supreme Court of Manitoba upholding the validity of provincial legislation which had been challenged by the Alliance. The circumstances of this case were noted in the *LABOUR GAZETTE* for July, 1923 (page 713). The act in question amended the provincial Lord's Day Act so as to permit the operation of excursion trains from Winnipeg on Sundays. The chief point involved is whether the Dominion can delegate to the provinces the power to pass Sunday laws, the Alliance contending that only the Dominion law on this subject is valid.

---

The *Canada Gazette* of April 5 published revised regulations governing the granting of yearly licenses and permits to cut timber on Dominion lands in the three prairie provinces, within twenty miles of either side of the Canadian Pacific Railway in British Columbia, and in the tract of 3,500,000 acres controlled by the Dominion government which was established by an order in council of April, 1921, in the Peace River District in the same province.

## EMPLOYEES' SUPERANNUATION IN CANADA

### Provision for Retirement of Municipal Employees

**S**UPERANNUATION schemes for Provincial civil servants in Canada were described in a recent issue of the *LABOUR GAZETTE* (February, 1924.) The present article gives some particulars as to similar provisions in regard to the employees of Canadian municipalities. The information on which it is based is necessarily incomplete, but the schemes outlined may be regarded as typical. The practice in regard to public service retirement allowances or pensions is in a state of transition at the present time. Some of the principal municipalities, including Montreal, Toronto, Hamilton, Victoria and Vancouver, make no such provision for their employees, but have the matter of superannuation under present consideration. Other cities, including Regina, Edmonton and Calgary, have statutory power to establish superannuation funds, but so far have taken no definite action in the matter. The general tendency among public bodies is towards a definite system of superannuation based on principles similar to those of the schemes for provincial employees. These principles generally include joint equal contributions to a retirement fund by the employee and the employer, and a superannuation allowance based on length of service and average salary. Provision is generally made also to meet the contingency of sickness and other disability. On the other hand municipal schemes are often less favourable than those of the provinces, many of them including no provision for the widows and other dependents of a deceased employee.

The following paragraphs give particulars of superannuation or pension schemes which are in operation in various municipalities throughout Canada:—

#### Halifax

The Nova Scotia legislature in 1906 passed an act to provide a superannuation fund for the employees of the city of Halifax, excepting those of the fire and police departments. Contributions equal to 4 per cent of salary are made by all permanent employees under 55 years of age, and optionally by those over that age, the amount being deducted at each monthly salary payment. Employees who have contributed for at least ten years may retire on reaching the age of 65 years. The amount of allowance equals one-fiftieth of the average salary received during service, multiplied by the number of years served, with a

limit of thirty-fiftieths of the average salary. Special provision is made, however, that employees of 65 years who have served for thirty years and have contributed for ten years to the fund are to receive an allowance of thirty-fiftieths of their average salaries, the city making up the deficiency in the amount of their contributions. Employees who have become incapacitated, and who are retired from service by a two-thirds vote of the city council, may be similarly provided for if they have contributed to the fund for ten years; the allowance in such cases is paid until the amount of the employees' contributions, with interest at 3 per cent, has been exhausted, and thereafter it is continued out of general revenue as the city council determines. Employees retiring voluntarily receive back one-half the amount of their contributions without interest provided they have contributed for at least two years, while those whose positions has been abolished, receive back, subject to the same condition, the total amount of their contributions, also without interest. In no case does an employee who has contributed to the fund for less than two years receive any allowance or payment whatever. If an official dies before superannuation his wife or dependent child receives from the fund in one payment an amount equal to his total contribution without interest. Similarly, if a superannuated employee dies before he has received in superannuation allowance a sum equal to his contributions, the widow or child may continue to draw the allowance until the amount of the contributions has been exhausted. Where no widow or dependent child survives, the trustees may grant an allowance to other dependents.

#### Winnipeg

The City of Winnipeg established a pension fund for its employees in 1921 under the provisions of its charter. Contributions are compulsory for all permanent employees. The term "permanent employee" means any person employed for a full year whether working by the hour, day, week or month. The rate of contribution varies with the age of the contributor as follows:—

Below age 27, 3 per cent throughout future service.

Between the ages of 27 and 33, 3½ per cent.

Between the ages of 33 and 38, 4 per cent.

Between the ages of 38 and 42, 4½ per cent.

Between the ages of 42 and 45, 5 per cent.

Above age of 45, 5 per cent.

No person entering the service when over 45 years of age after the establishment of the fund may come under the scheme, while those already employed who had entered the service after reaching the age of 55 years, may remain out of the fund. Employees leaving the service or in case of death, their representatives, receive back the amount of their contributions with compound interest at 4 per cent. If a pensioner dies before receiving back the amount of his contributions by way of pension the balance becomes payable to his administrators. No employee who accepts compensation under the Workmen's Compensation Act for permanent total disability is entitled to a pension under the scheme, but his own contributions to the pension fund are returned to him together with compound interest at 4 per cent per annum, an equal amount being refunded to the city.

The city contributes to the fund monthly a sum equal to the total contributions made by the employees. Pensions are granted to employees under the following conditions:—

1. If they have served 15 years and have become unfit for further service, subject however to resumption of work on recovery. In computing the amount of the ultimate pension, credit is allowed only for periods of actual service. Persons claiming pensions under this head must be examined by a board of three doctors, one appointed by the city, another by the employee, these two appointing a third. The decision of any two doctors is final and binding upon both parties. It may be noted that difficulty has been experienced in regard to claims made by former employees of less than ten years' service. In September, 1923, the finance committee of the city council granted the application of a person who had been in civic employment for 14 years, recommending payment of a "gratuity" of \$50 per month.

2. If they have served for at least 40 years and are 60 years of age.

3. If they have served for at least 20 years and are 65 years of age. The city may demand the retirement of any employee of this age, but must give three months' notice of such compulsory retirement. An employee who at 65 years of age is entitled to the maximum pension of \$3,000 is not required to make further contributions.

The annual pension is a sum equal to one-fifth of the average yearly remuneration for the five consecutive years of service showing the highest maximum salary, multiplied by the number of years of service up to but not exceeding 40 years. However, the minimum annual pension payable is \$720 and the maximum pension is \$3,000.

An employee who is unfitted for duty, through injury received while on duty, receives while disabled, a pension equal to that which he would have been entitled to had he completed 15 years of service. Where an employee is thus retired, the city continues to pay the contributions which the employee would have made until the balance of 15 years' service has been completed.

Employees who were on active service (1914-1919) and who re-entered the city's service within six months from the date of their discharge, are given credit for the time of their absence on such service.

Members of the city police force joining after 1918, are included in the civic pension scheme, as well as older members who are not affected by the existing police pension scheme, and receive no gratuity or pension out of the police superannuation benefit fund maintained under the provisions of the Winnipeg charter. The city council, however, disclaims any responsibility in regard to members of the force, which is under control of the Board of Police Commissioners.

### British Columbia

The superannuation of civic employees in British Columbia is provided for under Part III of the Superannuation Act of 1921. This Act, as noted in the first section of the present series of articles, establishes a general system of superannuation which is compulsory for employees of the provincial government and optional for other public servants and for the employees in private industry. Any municipality may enter into an agreement with all or with any group of its employees to secure the benefits of the Act, the Civil Service Commission being notified of such agreement. The municipality may pay from its revenues all the contributions required from it as an "employer," that is, a sum equal in respect to each employee to the deduction of 4 per cent which is made from his wages at each payment. A superannuation allowance is payable to a fireman at the age of 50 years, to policemen at 55 years, to other male municipal employees at 60 and to female employees at 55 years, if such employees are retired from service by a competent authority, or at their own request. Allowances are payable also in case of retire-

ment due to disability. The amount of allowance is the amount which, according to the prescribed tables, could be purchased by the employee for the sum standing at his credit in the superannuation fund, arising from the deductions from his salary with accrued interest, together with a like amount taken from the account of the municipality in the same fund. Additional allowances may be paid to persons who were employees of the municipality prior to the date at which the provisions of the Superannuation Act became applicable to them, that is, before any sums were placed to their credit in the fund.

Following the enactment of the Superannuation Act in 1921, action was immediately taken by the cities of Victoria and Vancouver to secure the application of its provisions to their employees. In Vancouver, however, objection to the proposal was made at the time by certain classes of employees. The firemen desired a scheme that would include provision for disability sustained in course of employment; the policemen desired special consideration; while other civic employees offered objections chiefly connected with the question of salaries and the low purchasing power of money at that time. The scheme was dropped then but is was again brought forward early in the present year. Applications were made to the city council last March by the policemen, firemen and city hall employees for the establishment of a scheme. The latter class favoured a scheme under the Provincial Superannuation Act; the policemen proposed to put \$10,000 of their Benefit Association funds into a capitalization fund, each man also to contribute 4 per cent of his salary annually, in return for a pension of \$100 monthly after 25 years' service; while the firemen's organization made a similar proposal on behalf of their members. A joint conference was proposed to consider these various suggestions, but the outcome has not been ascertained at the time of publication of this issue of the LABOUR GAZETTE. The position in Victoria is similar to that in Vancouver, the question of adopting the provincial scheme being definitely revived this year after lying more or less dormant since 1921 when it was first proposed.

### Saskatoon

The only civic employees at Saskatoon for whom a superannuation fund has been established are the members of the Fire Department. All permanent members of the Fire Department (that is, those who are employed for the full period of each year, whether they are rated by the hour, day, week or month),

are required to contribute to the fund 4 per cent of their monthly wages. The city also contributes an amount equal to three and sixty-two one-hundredths per cent of the Department's monthly pay roll.

The amounts of the allowances and death benefits are as follows: employees resigning in good health after three years' service receive back 50 per cent of the amount of their contributions. (Those employed at the time of the passing of the by-law who served for one year subsequently also received back 50 per cent.) Employees worn out in the service after from one to ten years' employment receive back the whole amount of their contributions; after 10 to 15 years, an allowance of 20 days' pay for each year's service; after 15 to 20 years, one month's pay for each year's service; after 20 to 25 years, three-eighths of pay; after 25 years, one-half of pay. After thirty years' continuous service all employees, whether "worn out" or not, are eligible for annual compensation of half salary for life.

Firemen incapacitated in the course of duty from further employment in the Fire Department, but not from other employment, are compensated as follows: for 15 years' service and under, three-eighths of pay for life; and over 15 years' service, one-half pay for life. Those who are permanently incapacitated from further employment of any kind also receive a pension of half-pay for life. Employees accepting compensation under the Workmen's Compensation or any similar Act are not entitled to superannuation benefits, but they receive back the amount of their contributions, with compound interest.

If an employee dies in the service, having served 10 years and under, his representatives receive \$1,000; from 10 to 15 years, \$1,500; from 15 to 20 years, \$2,000; from 20 to 25 years, \$2,500; and 25 years and over, \$3,000. Similar amounts are paid to the representatives in cases where the deceased was killed or died from injuries received while on duty.

### Toronto

There was no provision of superannuation for civic employees in Toronto before the present month, but the question has been in the hands of a committee of the city council for some months, and it is reported that on May 9 the city council adopted the report of this committee. The plan fixes pension to be paid, upon retirement at the age of sixty years, or following twenty years' service, at a minimum of \$624 and a maximum of \$2,000 per annum. Pensions are to be graded according to length of service and average rate

of salary. All employees will contribute five per cent of their salaries, with the exception of heads of departments, who will contribute five per cent on \$4,500. For all moneys contributed by employees the city will contribute dollar for dollar. According to present plans the fund will not go into effect until January, 1926, and not for four years thereafter should a special committee, to be appointed as administrators, so decide.

The Toronto Firemen's Superannuation and Pension Fund receives an annual contribution from the city of \$27,300, and the firemen contribute from 7 to 9 per cent of their salaries, these contributions being sufficient to place the fund on a paying basis. The Toronto Police Benefit Fund is also practically self-sustaining, but the city occasionally comes to its aid, having contributed to the fund the sum of \$10,000 about two years ago. Each member of the police force pays into the fund 7 per cent of his salary. The chief constable is treasurer of the fund, which is controlled by a board composed of members elected each year from the police force.

### London

*Police Benefits.*—The London Police Benefit Fund Association dates from January, 1887, but its rules have been amended from time to time. The Association was incorporated under provincial law in 1922, with the approval of the City Police Commission, its objects including the provision of gratuities and pensions for long service, assisting members disabled in discharge of their duty, or incapacitated by sickness, and providing for the old age of members and for their families in cases of death. Membership in the Association is obligatory on all members of the force. The fund is in charge of a board of trustees consisting of one sergeant and three constables, with the chief constable (ex-officio), elected for one year by ballot. Applications for a pension, gratuity or aid are considered by a joint meeting of the City Police Commission and the Board of Trustees, and in case of disagreement a board of arbitration is formed of the Chairman of the Commission, the Chairman of the Board of Trustees, and two others, one nominated by each of the presidents; these four appoint a fifth member, and the findings of this board, so formed, are final. This Board received reports from the medical board on all applications, the latter board consisting of the medical officer of the Force, another appointed by the member interested; these two appointing a third if they disagree. Each member of the Association is required to contribute 6 per cent of the gross amount of his pay, twice

monthly, towards the fund. The early years of service during which no contributions were made are provided for by arrangement.

Any member resigning in good health (with the consent of the police commissioners in writing) after completing 10 years' service receives a gratuity of five days' pay for each full year's service up to 15 years; from 15 to 20 years, 10 days pay; from 20 to 25 years, a pension for life of one-fourth pay, provided the member is then 55 years of age or more, but if the member is less than that age then 15 days' pay for each year of service; from 25 years and upwards a pension for life of one-half pay, provided the member is 55 years of age or more, but if under 55 then 25 days' pay for each year's service.

Any member worn out in the service after 10 and up to 15 years' service receives a gratuity of 15 days' pay for each year's service completed; after 15 years' and up to 20 years', a gratuity of 25 days' pay for each year, provided the member is under 55, but if over that age he receives a pension for life of one-third pay.

Incapacity caused while on duty is compensated as follows: after 5 years' service and under, one month's pay for each year's service, but in no case less than \$200; after 10 years' service and under, one month's pay for each year, but in no case less than \$400; over 15 years', one month's pay for each year of service completed, but in no case less than \$1,000, provided the member is under 55 years of age, but if he is aged 55 years or over then a pension for life of one-third pay, the member having the option of electing which form of benefit he will choose, whether cash or pension.

If a member dies while in service his beneficiaries receive one month's pay for each year's service, provided that he has served five years, up to which period of service the amount is \$250. If, however, the deceased member was unmarried, the allowance granted to his beneficiaries is subject to the approval of the board of trustees and the City Police Commission, provided, however, that the beneficiaries receive back any portion of the contributions made by the deceased which has not been returned in the form of pension. The beneficiaries of a member who has been killed or dies from injuries received while on duty are entitled to two month's pay for each year of his service, but not less than \$800.

*Firemen's Benefits.*—The London Firemen's Superannuation and Benefit Fund differs from the Police Fund in being non-contributory, the fund being maintained by means of an annual grant by the city amounting to 6 per

cent of the total salaries of the fire brigade. The fund is managed directly by a standing committee of the city council, which considers all applications directly and makes recommendations thereon to the city council, whose decision is final. Disability is judged by the Chief of the Fire Department and the Medical Officer of Health. Members who were in the service prior to January 1, 1912, when the scheme became effective, are allowed for one-half the period of their service before that date.

The scale of allowances for superannuation and disability is based upon length of service, as follows:

For members worn out in the service, who have served 15 to 20 years, 25 days' pay for each year of service, and for 20 years and upwards, one month's pay for each year of service.

For permanent incapacity due to service, for 10 to 15 years' service, a life annuity equal to 15 per cent of salary or wages; for 15 to 20 years, to 20 per cent; and for 20 years and over, to 25 per cent.

The City Council may, however, commute any annuity on the basis of the legally recognized annuity tables, and at a rate of interest of 4 per cent per annum. Members incapacitated through their own fault, or who resign or are dismissed forfeit all claim to benefit.

### Windsor

The city council of Windsor, Ontario, passed a by-law in 1923 establishing a pension fund for civic employees. However, in March, 1924, the council rescinded the by-law on the recommendation of its finance committee, having found that employees were not paying their dues, and that the resulting deficit would have to be met at the expense of the general taxpayers. It was stated that the employees themselves were indifferent about the scheme, and the firemen positively declared against it by a vote.

### Hamilton

The City Council and Board of Control of Hamilton, Ontario, have a civic superannuation scheme under their consideration, but are not yet prepared to indicate its nature. A police pension fund has been in existence in this city since 1893. Each man on the force is required to contribute 7 per cent of his salary, and has the right to vote on withdrawals from the fund. The present rate of pension for those at the age of retirement is 40 per cent of the amount of the yearly salary, but a movement is in progress to have the proportion raised to 50 per cent.

### Montreal

Montreal makes no provision at the present time for the superannuation of its civic employees, but it is stated that consideration is being given to a scheme to establish a fund to which the employees and the city would make equal contributions. The City Council passed a by-law in 1917 providing that employees compelled through incapacity or illness to resign from the service after ten years' of employment should receive a pension amounting to one-fifth of their salary; after 20 years, one-third and after 35 years', one-half their salary, but the amount of the pension must in no case exceed \$3,000 in a year. The employees make no contributions to the pension fund, the expenses being defrayed entirely by the city. An amendment to the by-law is now under consideration which would establish a superannuation fund based on joint equal contributions by the employees and the city, but no decision in regard to such a scheme has yet been made public. Montreal also makes special provision for its policemen and firemen, and action has been taken towards organizing a system of group insurance and superannuation for firemen and policemen in the Province of Quebec outside the cities of Montreal and Westmount.

A pension scheme for policemen and firemen was adopted in 1922 by the city council of Westmount, Quebec. A pension fund commission was established, composed of the mayor, the commissioner of finance, the commissioner of police and fire, the chiefs of the police and fire departments, together with two additional members, one appointed by the city council, and the other representing the police and fire departments. The pension fund is made up of contributions from the employees and from the city. The city pays the sum of \$1,700 per year for a period of 20 years, and also pays monthly to the fund an additional sum equal to 1½ per cent of the salaries payable to the firemen and policemen. The employees' contributions equal seven per cent of their salaries, deducted from every monthly payment. The benefits received by employees under the scheme are as follows: After 25 years of service, on reaching the age of 50 years, an employee will receive an allowance equal to one-third of his average salary for the previous five years. After 30 years of service, on reaching the age of 55 years he will receive a pension equal to one-half of his average salary for the same period. The heirs of any employee who has been killed in the performance of his duties will receive the sum of all the deductions made from the salary of the deceased, together with his proportion of

the city's contribution, and of the gratuities received by the fund, with interest compounded annually at 5 per cent, the amount so paid to be not less than \$1,000. The heirs of an employee dying from other causes, will receive the amount contributed by the deceased with interest. For permanent incapacity an employee who has served 10 years or more will receive a pension of one-third of his average salary for the past five years of service; one who has served five years, but less than ten

years, receives one-quarter; while an employee with less than five years of service receives back all his contributions, with interest, together with the City's contribution, and the gratuities received by the fund. An employee who is incapacitated by illness after 10 years' service receives a refund and also a share of the city's contribution with interest at 5 per cent; or if he has served less than 10 years he will receive a refund, but not the city's contribution.

---

## JUVENILE MIGRANTS' APPRENTICESHIP ACT, NEW SOUTH WALES

AN act "to establish a system of apprenticing juvenile assisted migrants, to provide for the care and control of such migrants and their property and earnings, and for purposes connected therewith," was assented to in New South Wales on December 21, 1923. It is cited as the "Juvenile Migrants' Apprenticeship Act, 1923," the term "juvenile" as used in the act being defined as "a minor who comes to New South Wales with the assistance of the Government of the Commonwealth of Australia or of the State and who is over the age of fourteen years and under the age of nineteen years at the date of arrival in the State." The act applies to juveniles who have by a formal statement declared themselves desirous of coming under its provisions and as having had the requirements of the act explained to them. The act empowers the Minister of Labour and Industries of the State to have the care, management and control of the person of the juvenile before he is placed out even while in passage to the State when the indenture is made in the United Kingdom and at any time when he ceases to be placed out, and the supervision of him whilst placed out, as well as the care, management and control of his property. He may appoint institutions for the reception, control, education, and the employment of juveniles, and may make such provision as he deems necessary or as may be prescribed for their control, maintenance, education, and employment in such institutions, or in connection therewith. He may, by indenture of apprenticeship which may be made either in the State or in the United Kingdom, bind the juvenile to any person to be taught a trade or calling, including domestic service, provided the period of apprenticeship does not extend beyond the twenty-first birthday of the

juvenile, and when apprenticed on a farm it does not exceed three years. The Minister may also place the juvenile out to reside or board with any person for such period as he thinks proper, if he is satisfied that such person is able and willing to maintain and is a suitable person to be entrusted with the care, management and control of the juvenile, and provided the juvenile has not attained the age of twenty-one years. The Minister may in any indenture make provision that there shall be paid to him by the employer all or a portion of any wages to become due to the juvenile, and the money paid on account of any juvenile to the Minister may be expended by him for certain specified reasons. The money held by the Minister for the juvenile shall, however, bear interest at the rate of four pounds per centum per annum, and shall be paid to the juvenile on his attaining the age of twenty-one years. The wages or earnings due by any person to a juvenile under an indenture or contract of service, whether payable to such juvenile or not, may be sued for and recovered by and in the name of the Minister, or by and in the name of some person authorized by him. No employer shall have the power to assign or transfer any indenture, or to transfer or make over to any other person the service or care of the juvenile, or in any way to discharge or dismiss such juvenile without the consent in writing of the Minister. If the Minister is satisfied that a juvenile has been guilty of misbehaviour or of wilful neglect of duty he may forfeit all or part of the money held on behalf of such juvenile, and apply same in the payment of bonuses to juveniles whose behaviour and attention to duty are, in his opinion, deserving of reward, or he may apply it as he considers suitable for the carrying out of the act.

## TRADE UNION MEMBERSHIP IN CANADA

### Synopsis of the Information Contained in the Annual Departmental Report on Labour Organization

THE Thirteenth Annual Report on Labour Organization in Canada, covering the calendar year 1923, has just been issued by the department. This volume, besides showing the extent of organization among the wage-earners of the Dominion, contains information concerning some of the more important activities of the labour bodies with which the Canadian organized workers are affiliated. The figures published in the report indicate that the recession in trade union membership, which occurred during the three-year period from 1920 to 1922, has been apparently checked. Although the returns for 1923 show a loss of 25 in local branch unions of all classes, the number of members increased by 1,471, the total branches being reported at 2,487, and the combined membership at 278,092.

According to the information published in the report, there were at the close of the year, 94 international organizations operating in Canada, two more than the number recorded in 1922, and between them they comprised 2,079 local branches with a combined reported membership of 203,843. These figures indicate losses for 1923 of 29 branches and 2,307 members. The international organizations, although showing losses in branches and membership, remain the most numerously represented group in Canada.

The eighteen organizations comprising the non-international group had 278 local branches, a gain of five, and reported a membership of 34,315, an increase of 11,342.

There were 24 independent units (bodies not identified with any central organization), one less than the number recorded in 1922, of which 22 reported a combined membership of 9,934, an increase of 871.

There were 106 national and Catholic unions, the same number as reported in 1922, the majority of which are affiliated with the Federation of Catholic Workers of Canada, which body reported that the combined membership of the Catholic unions was 30,000, a decline of 8,335 as compared with the figures for the previous year.

The chart published herewith, as taken from the report, shows the fluctuations in Canadian trade union membership from 1911 to 1923, the period covered by these departmental annual reports on labour organization.

According to another chart published in the report, the 278,092 organized workers in the Dominion are divided by trade groups as follows: Railroad employees 76,519 members; building trades, 28,687; public employees, per-

sonal service and amusement trades, 26,222; mining and quarrying trades, 24,963; other transportation and navigation trades, 22,893; metal trades, 17,025; clothing, boot and shoe trades, 15,581; printing trades, 7,647, all other trades and general labour, 58,555.

The 2,487 local branch unions of the four groups discussed in the report are divided by provinces as follows: Ontario, 1,034; Quebec, 456; British Columbia, 236; Alberta, 208; Saskatchewan, 162; Nova Scotia, 134; Manitoba, 133; New Brunswick, 114; Prince Edward Island, 10.

There are 31 cities in the Dominion in which not less than 20 trade union branches of international and non-international organizations and independent units are operating, and between them they represent 56 per cent of the total of such branches, and 53 per cent when the national and Catholic unions are taken into account. Included in the 1,786 local branch unions which reported their membership are 22, each of which have 1,000 or more members, the largest having 3,986.

The report deals with the various classes of delegate bodies which have been established in Canada as a part of the plan of labour organization in North America, and through which local branch unions of kindred or particular trades are brought together to deal collectively with matters which are of like concern to all members of the unions represented.

Besides the information given in the report as to the membership of labour organizations in the Dominion figures are published showing the numerical standing of organized workers in 39 other countries, the total, including Canada, being 41,756,330, of which (though not all actually affiliated) 23,077,051 are sympathetic towards the principles of the International Federation of Trade Unions, with which body the Trades and Labour Congress of Canada, with its 122,844 members, is affiliated. The following are the figures for the various countries as taken from the report:

Argentina.. . . . .	143,000
Australia.. . . . .	702,938
Austria.. . . . .	1,128,054
Belgium.. . . . .	780,907
Bulgaria.. . . . .	54,103
Canada.. . . . .	278,092
Chili.. . . . .	200,000
China.. . . . .	300,000
Czecho-Slovakia.. . . . .	1,505,499
Denmark.. . . . .	307,574
Egypt.. . . . .	60,000
Estonia.. . . . .	20,000
Finland.. . . . .	47,653
France.. . . . .	1,395,847
Germany.. . . . .	11,263,920
Great Britain.. . . . .	4,369,268

Greece..	170,000
Holland..	639,925
Hungary..	249,146
India..	1,500,000
Italy..	3,443,444
Japan..	365,700
Latvia..	25,450
Lithuania..	40,000
Luxemburg..	12,600
Mexico..	1,030,000
New Zealand..	82,553
Norway..	83,600

Palestine..	8,250
Peru..	25,000
Poland..	1,232,567
Portugal..	150,000
Roumania..	81,822
Russia..	4,494,226
South Africa..	90,000
Spain..	582,180
Sweden..	324,917
Switzerland..	238,667
United States..	4,252,272
Yugo Slavia..	76,156

Considerable space is given in the report to a group of what are termed revolutionary labour bodies, and some of the incidents are related in connection with their operations during the year 1923. The organizations included in this category are (1) the Red International of Labour Unions, the protégé of the Communist International of Russia, (2) the Workers' Party of Canada, (3) the Young Communists' League, and (4) the Trade Union Educational League. The principles of these bodies, which include efforts "to organize the working class for the overthrow of capitalism and the establishment of the dictatorship of the proletariat," according to the information given in the report, are not viewed with favour by the old-established trade union organizations. One of the methods adopted by the advocates of the revolutionary bodies to secure support for their doctrines from the existing labour unions, is that known as "boring from within." To combat this proceeding some of the labour organizations have taken drastic action, in certain instances expelling those members who were known to be using the unions for revolutionary propaganda. The only Canadian trade union to have direct affiliation with the Red International of Labour Unions is the Lumber Workers' Industrial Union, an independent body, which since becoming identified with the Moscow organization has lost considerably in membership. Some of those who dissented against this affiliation subsequently joined the Industrial Workers of the World, a revolutionary industrial body, with headquarters in Chicago, which seeks the abolition of the wage-system. With this acquisition to its ranks the Industrial Workers of the World (to which a chapter in the report is devoted) was enabled to re-establish branches in the Dominion.

Under the title "Use of Troops in Industrial Disputes" the report discusses the strike of coal miners in the Cape Breton district to compel the withdrawal of troops which had been sent into the territory as a result of the strike of steel workers in Sydney. To the action of the miners, who were operating under a charter from the United Mine Workers, the international president took strong objection, and requested the district president and his associate officers to order the men back to work, declaring that the cessation of operations was a violation of the existing contract with the employing company. The district officers refused to comply with the instructions of the president, declaring that the strike had no connection with the contract with the company concerned, the only issue being the use of armed forces against the workers. The international president there-

upon revoked the charter of the district union and deposed the district executive officers. A provisional district was subsequently set up by the international executive board with the provisional officers working under direct instructions from the head office. One of the results of the strike was the indictment of the former president and secretary-treasurer of the district, first on a charge of circulating false information, and latterly on charges of misdemeanour and seditious libel. A number of other persons were also arrested on the latter charges. The deposed secretary-treasurer, as well as some of the others indicted were found guilty. The first-named was sentenced to two years' imprisonment, but was later given his liberty on parole. The trial of the deposed president is yet to take place. Although the striking miners originally refused to obey the instructions of the international president, they subsequently resumed work. Several trades and labour councils and local branch unions adopted resolutions protesting against the use of troops in connection with the steel workers' strike, and called upon the authorities to have them removed. The executive council of the Trades and Labour Congress of Canada also took action in regard to the sending of troops into the strike area, and suggested to the Dominion Prime Minister the appointment of a commission to investigate the circumstances under which the troops were called out. The annual convention of the Trades and Labour Congress later adopted a recommendation that amendments to the Militia Act should be sought "whereby the only authorities who could make requisition for the calling out of the militia in aid of the civil power should be either the municipal council of the district wherein riot may occur or be anticipated, or the government of a province, and that in either case those making the requisition should be absolutely responsible for the cost of such military aid." Subsequent to the above incidents the Dominion Government appointed a commission to investigate the cause of the unrest in the Cape Breton district and the calling out and the retention of the militia in aid of the civil power in connection therewith. On the subject of the presence of troops in the locality the commission agreed that their presence was necessary and beneficial, but suggested that the Militia Act should be amended so that the active militia could only be called out on the joint requisition of a judge and the attorney-general of a province with the institution of an inquiry, not later than one week thereafter, into the circumstances which necessitated such action.

The report also discusses the proposal for amalgamation of craft unions into industrial groups, particular reference being made to the amalgamation of the sixteen standard railway organizations, which include the operating employees and the shop mechanics. The chief agencies through which this proposition is being propagated are the Workers' Party of Canada and the Trade Union Educational League, whose adherents claim that the present system of organization is inadequate to meet the present day requirements. Charts are exhibited in the report showing the various stages leading to the ultimate amalgamation of the railroad workers. While a few of the old established labour organizations have expressed approval of the amalgamation proposal, the report states that the bulk of the labour bodies, including the Trades and Labour Congress of Canada and the American Federation of Labour, are opposed to any change in the present plan of organization, which it is claimed provides the necessary machinery for closer co-ordination of international craft unions, if such is desired.

A chapter in the report indicates the development of labour political parties in Canada and makes reference to some of the matters which were dealt with at their conventions. Mention is also made of the participation of labour candidates in the later parliamentary and municipal elections in the Dominion, and of the establishment of the Labour Government in Great Britain.

The beneficiary features of trade unions, the report states, has grown to considerable proportions, involving the collection and expenditure of huge sums, especially by the international organizations. Of the eighteen bodies classed as non-international five reported having made payments for benefit purposes during 1923, the total expenditure amounting to \$42,235, an increase of \$1,055 over the amount spent in the preceding year, the greater portion of which was for death benefits. Sixty-two of the 94 international organizations with branches in Canada reported disbursements for one or more benefits, payments on account of death benefits being paid by 52, unemployed and travelling by 8, strike by 38, sick and accident by 20 and old

age pensions by 6. The total expenditure in Canada and the United States for benefits paid by the central international organizations was \$24,176,941, a decrease of \$2,201,788 as compared with the disbursements for benefits by 58 reporting bodies in 1922. The expenditures for the various benefits were as follows:

Death benefits.. . . . .	\$11,853,222
Unemployed and travelling benefits.. . . . .	84,291
Strike benefits.. . . . .	8,542,000
Sick and accident benefits.. . . . .	1,328,633
Old age pensions and other benefits.. . . . .	2,338,795

Figures are also given in the report showing the amounts disbursed by many of the local branch unions in Canada for benefits to their own members, which sums were in some instances paid to augment the benefits received from headquarters, and in other cases covered benefits not provided for by the central organizations. The total sum expended by the local branches was \$333,209, a decrease of \$202,241 as compared with the amount expended in 1922. The expenditures for 1923 by the local branches for the various benefits were:

Death benefits.. . . . .	\$109,640
Unemployed benefits.. . . . .	22,976
Strike benefits.. . . . .	44,013
Sick and accident benefits.. . . . .	123,887
Other benefits.. . . . .	32,693

Included in the report is a chapter in which is discussed a group of associations which though not identified with the labour movement of the Dominion, are in the main composed of wage-earners. There are 61 bodies included in this non-trade union group, the principal associations being composed of school teachers, government employees and commercial travellers, the total reported membership of which is 85,562, an increase of 4,189, as compared with that recorded for this group in 1922.

The Thirteenth Annual Report on Labour Organization in Canada, like its predecessors, forms a complete labour directory, containing not only the names and addresses of the chief officers of local branch unions in the Dominion, but also those of the central organizations with which the Canadian organized workers are connected as well as of the various delegate bodies.

## NOTES RELATIVE TO LABOUR UNION ACTIVITIES

THE Toronto Branch No. 113 of the Amalgamated Association of Street and Electric Railway Employees, which for many years has maintained an office in the Labour Temple, has purchased a building at 60 Bond street, for the sum of \$31,000. When the contemplated alterations are completed at a cost of \$3,000, the Toronto branch of street railway employees will establish its headquarters in the newly-acquired property.

Mr. Joseph F. Valentine, for more than twenty years president of the International Moulders' Union, which body has a number of local branches in Canada, has been compelled, owing to ill-health, to retire from his official position in the organization. Mr. Valentine, who is sixty-seven years of age, has been succeeded by Vice-President Michael J. Keough. Mr. Valentine is the second vice-president of the American Federation of Labour, a position to which he has been successively elected since 1905.

The most numerously represented labour body in Canada is the United Mine Workers of America, which has 22,800 Canadian members, comprised in 72 local branches. The

Brotherhood of Railroad Trainmen is second as to membership in the Dominion, having 14,526 members, comprised in 95 local lodges.

The regular convention of the Brotherhood of Locomotive Engineers, which organization has 100 divisions in Canada, will meet in Cleveland, Ohio, commencing June 2. Other organizations holding conventions in June are the Dominion Postal Clerks' Association and the Saskatchewan Brotherhood of Steam and Operating Engineers.

According to a press despatch steps have been recently taken by the International Ladies' Garment Workers Union to organize a National Council for Child Development consisting of labour men and women, educators and parents. It is proposed to bring up the children of workmen in an atmosphere friendly to the labour movement and to "acquaint the growing generation with the social and economic problems that face mankind and prepare it to share intelligently in the work of bettering society". A meeting was held in New York on April 23 to organize a local branch of this Council, and it is proposed to establish similar local and state councils throughout the United States.

---

## JOINT CO-OPERATIVE MANAGEMENT IN CAR SHOPS OF CANADIAN NATIONAL RAILWAYS

THE principle of joint management of the railway shops was approved by Division No. 4, Railway Employees' Department, American Federation of Labour, on the occasion of their annual convention held at Montreal from March 24 to April 3 (LABOUR GAZETTE, April, 1924, page 307). The vote in favour of the joint management plan was 85 to 29. The System Federation of the Canadian National Railways, at a separate meeting, also approved the proposal, and authorized the taking of a survey with a view to the institution of joint management in the Canadian National shops. Subsequently a delegation representing the shop employees of the Canadian National Railways waited upon the president, Sir Henry Thornton, with a view to the institution of the co-operative plan. The delegation was composed of representatives of the shop crafts of the Canadian National Railways together with Messrs. B. M. Jewell, president of the Railway Employees' Department (A.F. of L.),

William H. Johnston, president of the International Association of Machinists, and O. S. Beyer, Jr., consulting engineer for the Canadian National Railways shopmen. It was agreed at this conference that a preliminary survey should be made of the main railway shop centres on the system, and a selection made of the centre which appeared the most suitable in which to apply a test of co-operative control. Accordingly a survey was made early in May at the carshops at Winnipeg by Mr. Beyer and officials of the Canadian National Railways Shop Federation, and similar inquiries will follow at other shop centres throughout Canada.

The form of joint management proposed for the Canadian National Railways car shops is the same as that which has been in operation in the Glenwood shops of the Baltimore and Ohio Railroad for about a year. Describing the new system, William H. Johnston, president of the International Association of

Machinists, stated in a recent address: "We have made an agreement for mutual co-operation and have worked out a concrete experiment in the shops with which both sides are pleased. I think we can now give points in efficiency and economy, in better shop service in improved morale, to any railroad which relies on piece work or other speeding-up devices, or seeks to circumvent genuine trade unionism. It is our purpose to align the locals, shop federations, district and system federations of the Baltimore and Ohio definitely behind a constructive programme of improved shop, yard and roundhouse operations, better maintenance service, increased production, safety and the elimination of waste. The management on the other hand has assured us that it will do what it can to make this improved maintenance economy count in the direction of steady work the year round".

The preamble to the agreement establishing co-operative management was as follows:—

The welfare of the Baltimore and Ohio Railroad and its employees is dependent on the service which the railroad renders the public. Improvements in this service and economy in operating and maintenance expenses result chiefly from willing co-operation between the railroad management and the voluntary organizations of its employees. When the groups responsible for better service and greater efficiency share fairly in the benefits which follow their joint efforts, improvements in the conduct of the railroads are greatly encouraged. The parties to this agreement recognize the foregoing principles and agree to be governed by them in their relations.

Mr. O. S. Beyer, Jr., writing in the *Railway Age* in October, 1923, on the morale of the railroad industry, declared that "the assumption of a measure of responsibility for the welfare of railroading implies the establishment of a Labour Service Bureau by these unions for the good of the industry. . . . No better administrative measure could therefore be adopted by organized labour than to establish a Service Bureau and retain individuals properly qualified by actual experience and knowledge to assume the tasks of adapting the union organization to constructive railroading in addition to its present task of conserving the well-being of the industry's soldiers".

The plan in its actual working on the Baltimore and Ohio Railroad is outlined in the *Company's Magazine*, April, 1924. It is to have local shop committees meet with a like number of local officers of the management for a frank discussion of questions relating to the planning and carrying on of the work. Local joint co-operative committees are organized for the purpose of giving effect to the policy agreed upon. (It is clearly understood that these committees do not meet for the

purpose of discussing or adjusting grievances). Local committees are composed of the Local Federated Committee representing the employees, and a like number of local supervising officers representing the management, the latter designated by the mechanical officer in charge at the point. The local mechanical officer acts as chairman of the joint committee. The joint local co-operative committees meet bi-weekly, and copies of the minutes are furnished to the general and district superintendents of motive power, the superintendent of shops, the master mechanic, the president of the System Federation and the chairman of the local federated committee. Local committees discuss such subjects as the following: co-operation between departments; proper storage and care of material; distribution of material and fuel; tool equipment and distribution of hand tools; grouping of machine tools; machine operation and crane service; scheduling work through shops; classification and handling of freight and passenger car repairs; methods of making repairs; method of handling and disposition of scrap; inspection of scrap and reclamation of usable material; condition of shops and grounds.

Besides the local committees a Joint System Co-operative Committee meets at least quarterly at the office of the general superintendent of motive power, being composed of the staff of the chief of motor power and the executive board of the System Federation. The purpose of the meetings of this general committee is to review and advise upon the recommendations of the several local Joint Co-operative Committees, and to develop more intensive co-operation.

The results of the whole plan, after trial of several months, are summed up by Mr. W. H. Johnston, at the conclusion of the address quoted above, which was delivered in November, 1923, as follows:—

In conclusion let me emphasize just two important things. First, although we have been intensively active on the Baltimore and Ohio for barely eight months and the surface so to speak has hardly been scratched, the effect of the new policy of co-operation on that road is clearly manifesting itself in the splendid service the road is rendering the public, the high economy with which it is being operated and the excellent morale which prevails throughout the rank and file. These facts are statistically demonstrable, especially when we compare the Baltimore and Ohio with some of its competitors who maintain a different labour policy. Second, I want to say that we, the legitimate, standard, genuine unions of the shopmen, are more than eager to offer the same positive co-operation to any railroad management which is intelligent enough and courageous enough to see the inevitable logic of events and on whose railroad conditions are ripe for such co-operation. I maintain that such a management would never again, as long as it retains its good senses, desire to see the affiliated shop crafts effaced from the scheme of things on its road.

## ANNUAL MEETINGS OF SAFETY ORGANIZATIONS

THE annual meeting of the Industrial Accident Prevention Association of Ontario and the joint meeting of the Canadian National Safety League and the Ontario Safety League were held in Toronto during April.

At the former meeting there were present about 400 delegates representing fifty cities and towns. Safety methods applied to industry were discussed. Mr. R. B. Morley, general manager of the Association, stated that the Association was authorized under Section 101 of the Workmen's Compensation Act, and that its work was divided mainly into two headings, namely, the inspection of physical hazards and safety education, there being a chief inspector and eight other inspectors on the staff of the Association which also distributes safety literature. He referred to the value of this work to employers and gave figures showing that information regarding 15,526 accidents had passed through his office in 1923. He also gave figures showing certain of the costs of compensation and asked for the full support of the employers in the work of the Association. Mr. Price, chairman of the Workmen's Compensation Board of Ontario, stated that in 1923 there had been reported to the Board 61,109 accidents of which 379 were fatal. This was the highest record of accidents ever reported to the Board, but the fatalities were the lowest since 1916. He did not think there was any reason for pessimism regarding compensation, however, as the serious injuries, including fatalities, were showing a steady decrease year by year. He said three tests had been applied to the Ontario Workmen's Compensation Act: (1) liberality of benefit, (2) cost to the employers, and (3) promptness of payment. He dealt with other compensation acts and showed that in the tests, Ontario held first place. About 450,000 workers are under the protection of the Act and in 1923 the total benefits awarded were over six million dollars. "First Aid" formed the subject of an address by Mr. W. J. Orr, of the Toronto, Hamilton and Buffalo Railway, Hamilton, in which was emphasized the necessity for providing facilities for treating

accidents in every industrial institution. He quoted a number of cases where immediate application of first-aid in accidents had averted disastrous results. Dr. R. M. Little, director of the Bureau of Rehabilitation of New York State Department of Education, Albany, N.Y., dealt with the progress of safety legislation in New York State. He said the people of the North American continent were of the pioneer type and, for this reason, were given to taking more chances than people of the older lands. It was his opinion that the safety movement would pay for itself in dollars and cents in increased production, in stabilized industry and in saving many from becoming physical wrecks. The following officers were elected: Chairman, George Valentine, Massey-Harris Company, Limited, Toronto; first vice-chairman, J. C. Callaghan, The Steel Company of Canada, Limited, Hamilton; and second vice-chairman, A. O. T. Beardmore, Beardmore and Company, Acton.

Sir John M. Gibson, Hamilton, president of both the Canadian National Safety League and the Ontario Safety League, was chairman of the joint meeting at which representatives were present from Toronto and several outside points. Mr. J. F. H. Wyse, general manager of the National League, presented the fifth annual report of that League as well as the tenth annual report of the Ontario League. He stated that the National League had received from the Dominion Government a grant for \$25,000 and that during the year safety leagues had been organized in Quebec and the Maritime Provinces. In regard to the Ontario League, he said that the league has now started its own record of accidents, which showed that in 1923 there occurred in Ontario 1,313 fatal accidents and 5,081 non-fatal accidents; drownings with 237 and motor accidents with 236 fatalities claimed the largest share. Falls, the most frequent cause of accidental death in Toronto, ranked third in the province with 157 deaths. Ninety-five of the fatalities were among children under 16 years of age. Sir John M. Gibson was re-elected president of both organizations.

## SAFETY REGULATIONS FOR MINES IN QUEBEC

**R**EGULATIONS to govern mine shafts were issued during April under the Mining Act of the province of Quebec, which provides (Article 2214, Revised Statutes of 1909) that "Regulations may be made by the Lieutenant Governor in Council respecting the sanitary condition and safety of the works in mines so as to protect the life and health of the workmen therein employed." The new regulations are as follows:—

1. Every shaft exceeding 100 feet in depth sunk after the putting into force of these regulations shall be divided into two or more compartments, one of which to be used exclusively as a passage-way.

This passage-way shall be closely boarded off from that part of the shaft in which material is hoisted.

Except in shafts inclined to less than 50 degrees from the horizontal, this passage-way shall be provided with strong securely fastened ladders inclined to not more than 80 degrees from the horizontal, in 25-foot lengths, with rest platforms. In each platform shall be left an opening large enough to permit the passage of a man's body and so placed as to prevent a man falling from going through.

2. The rungs of all ladders shall be regularly spaced to not more than twelve inches center to center. They shall not be in any case less than four inches from the wall. The ladder shall be extended to a height of three feet above each platform, except where strong hand-rails are provided.

3. It is strictly forbidden, while travelling in a ladderway, to carry, the lamp excepted, tools or any heavy objects which, by their fall, could cause an accident.

4. During the sinking of a shaft, the lower part shall be provided with a movable ladder, left in position during all the time men are working at the bottom.

5. Outside the period of preliminary work, no work can be carried on in a mine if there is not, with the surface, at least two passage-ways through which the men working in any section of the mine can travel freely to the surface.

In workings driven after these regulations are in force, these passage-ways shall be at least 100 feet apart, and their outlets at the surface must be in separate buildings.

6. Any building hereafter erected covering the mouth of a shaft shall be isolated and covered with incombustible materials.

7. In no case whatsoever should easily inflammable substances be left or stored in a building covering the mouth of a shaft.

8. The top collar of all shafts must be fenced in so as to prevent accidental falls of person or material into the shaft.

9. Each entrance to a shaft must be protected by a gate or a hand-rail to be opened only to permit loading or unloading of the cage or the skip. This gate or this

hand-rail must not be less than three and one half feet or more than four feet from the floor. During repair work or other operations, when necessary, the gate or hand-rail may be opened provided however that precautions be taken for the security of the workmen.

10. During shaft sinking operations the men at the bottom shall be protected from falls of rock or material by a securely constructed covering, with a door to be opened only for the passage of the bucket.

11. When in a vertical shaft or one inclined to more than 60 degrees from the horizontal, travelling is done in a bucket, a skip or a cage, this bucket, skip or cage shall be provided with rigid guides, guard rails, safety catches and a hood.

12. In shafts over 400 feet in vertical depth, only safety cages shall be used, which are provided with safety catches of a type approved by the Inspector of mines, and sufficiently strong to hold the loaded cage in case of rupture of the hoisting cable; with a hood made of two sheets of steel of sufficient thickness, covering the whole of the cage in such manner as to protect the men from falls of objects; and with a metallic side casing with doors.

13. In shafts, inclines, quarries and other excavations of more than 50 feet in depth, signal to set in motion any machinery used for hoisting material or for travelling, shall be transmitted to the hoistman by a signalling apparatus.

14. In signalling it is forbidden to use any other than the conventional signals given hereafter:  
[Code of signals omitted].

15. Special signals may be used with the written approval of the Inspector of Mines.

16. An easily legible copy of the code of signals shall be posted at the proper distance in front of the hoistman, at the top of the shaft and at all shaft stations.

17. The hoisting engine in producing mines must be provided with a reliable depth indicator. This indicator must be so placed as to be visible at all times by the hoistman.

18. Every hoisting engine used in a mine or in a quarry must be provided with an auxiliary brake independent of the power which runs the engine. This brake must work readily and be within easy reach from the hoistman's seat.

19. At least once in every week all parts of the hoisting equipment, more especially the hoisting engines and their brakes, the cables and their attachments, the cages, the skips, the guides, the safety catches and the signalling apparatus shall be carefully inspected by a competent person, and the observations noted in a special book.

20. No stopping shall be done within 20 feet of a shaft that is used for hoisting men or material; provided, however, that stopping may be done within twenty feet of such shaft, if said shaft is to be abandoned, and the Inspector of Mines has been so notified in writing.

## LABOUR AND WAGES IN VARIOUS INDUSTRIES IN CANADA

**Reports from Dominion Bureau of Statistics on (a) Cotton Textile Industry, 1922; (b) Leather Boot and Shoe Industry, 1922; (c) Macaroni and Vermicelli Industry, 1921 and 1922; (d) Cocoa and Chocolate Industry, 1921 and 1922; (e) Clothing Industry (Part I: Men's Wear), 1921; (f) Men's Furnishing Goods Industry, 1921.**

THE Dominion Bureau of Statistics has recently issued reports on the cotton textile industry and the leather boot and shoe industry in Canada for the calendar year 1922, and on the macaroni and vermicelli industry and the cocoa and chocolate industry for the calendar years 1921 and 1922, and on the clothing industry (Part I: men's wear) and the men's furnishing goods industry for the calendar year 1921. Previous reports in this series relating to various industries in Canada were outlined in the *LABOUR GAZETTE* for April, 1924, and in previous issues.

### The Cotton Textile Industry, 1922

The report of the cotton textile industry is made up in four sections each dealing with a separate phase of the industry, as follows: (1) cotton yarn and cloth; (2) cotton thread; (3) cotton batting and wadding; and (4) cotton and wool waste. The statistics of production for 1922, for the entire industry, show a considerable advance over 1921 in each section except cotton and wool waste. The increase in cotton yarn and cloth mills was \$6,196,132, in cotton thread mills \$993,645, in cotton batting factories \$62,435, whilst in cotton and wool waste factories there was a decrease of \$73,510. The capital investment showed an increase in the aggregate for the four sections of \$10,159,832, when compared with 1921. Mills manufacturing cotton cloths, yarns, etc., alone contributed \$10,152,551 of the above total. The number of persons employed in the entire cotton textile industry rose from 15,823 in 1921 to 19,941 in 1922, an increase of 26 per cent, whilst salaries and wages rose from \$12,142,394 in 1921 to \$14,635,249 in 1922 or 20.5 per cent. The cost of the raw and partly manufactured materials used in the cotton textile group of industries in 1922 was \$37,862,271, as compared with \$38,454,876 in 1921.

In the cotton yarns and cloth section the number of mills reporting during 1922 was 33, 16 being in Quebec, 13 in Ontario, 3 in New Brunswick and one in Nova Scotia. The value of production amounted to \$72,174,723, of which total Quebec contributed \$51,646,981; Ontario \$13,433,225 and the maritime provinces, \$7,094,522. The amount of capital in-

vested was \$76,099,980, and of this amount 67.7 per cent was invested in Quebec, 21.8 per cent in Ontario and 10.4 per cent in the maritime provinces. The total number at employment in the industry in 1922 was 19,012 of whom 10,565 were males and 8,447 females. Of these, the salaried employees numbered 508 (416 males and 92 females) and workers on wages were 18,504 (10,149 males and 8,355 females). Salaries totalled \$1,234,857 and wages \$12,529,766. The hours worked by employees per day or shift averaged 9.58, and per week 52.88. The number of days in operation on full time averaged 286.51 per plant, and on part time 9.51, while the number of days idle averaged 7.97 per plant.

In the cotton thread industry there were 7 plants in operation in 1922, as compared with 4 in 1921, five of the plants being in Ontario and 2 in Quebec. The value of the products manufactured was \$4,357,341, an increase of \$993,645 over the figures for 1921. The amount of capital invested in the industry in 1922 was \$3,342,060 as compared with \$3,292,363 in 1921. The total number employed in 1922 was 741 persons. Salaried employees numbered 82 (57 males and 25 females) with total salaries of \$151,329, while employees on wages numbered 659 (148 males and 511 females) with total wages amounting to \$514,747. Compared with 1921 the increases in the number of employees and in remuneration were general. In 1921 the number of salaried employees was 64 (41 males and 23 females) with salaries of \$139,457, and of wage earners 420 (128 males and 292 females) with total wages of \$269,707. The hours worked by employees per day or shift at each plant averaged 8.37, and per week 45.71. The number of days in operation during the year, on full time, averaged 264.28, and on part time 20.57, and the number of days idle 19.14.

In the batting and wadding industry there were three plants in operation, two of which were in Ontario and one in Quebec. The value of the products of the industry was \$515,247 and the amount of capital invested, \$690,823. As compared with 1921 there was a decrease in the capital investment of \$3,880 and an increase in the value of production of \$62,435. The total number employed during the year was 83 (72 males and 11 females), 71

being wage earners, as against 80 employees in the preceding year, whilst salaries and wages advanced from \$95,979 in 1921 to \$98,376 in 1922.

In the cotton and wool waste industry there were six plants in operation as compared with 8 in the previous year. There was a falling off in the capital investment of \$38,926 and in the value of production of \$926,490. The amount of capital invested during the year was \$872,703 and the value of the products \$1,331,562. The number of employees decreased from 126 in 1921 to 105 (84 males and 21 females) in 1922, 88 of the employees being wage earners. The amount paid in salaries and wages during 1922 was \$106,174, a decrease of \$20,840 from the previous year. The amount paid to wage-earners in 1922 was \$66,385. The average hours worked by the employees per day or shift was 9.5 and per week 55.5, the average days each plant was in operation on full time was 303.34, and the average days idle at each plant .66.

#### **The Leather Boot and Shoe Industry, 1922**

In the leather boot and shoe industry there were four more plants in operation during 1922 than in the previous year. Of the 181 plants operating, 100 were in Quebec, 67 in Ontario, 5 in British Columbia, 5 in New Brunswick and 4 in Nova Scotia. The amount of capital invested in the industry was \$29,881,921, a decrease of \$1,762,934 from the previous year, while the value of the products was \$45,503,858, or an increase of \$838,477 over the 1921 value. The number of persons employed during 1922 was 13,870 (9,071 males and 4,799 females). Male employees increased over 1921 by 575, while females showed a decrease in number of 194. In 1922 the number of salaried employees was 1,736 (1,343 males and 393 females) with salaries of \$3,607,463, and of wage earners 11,968 (7,666 males and 4,302 females) with salaries of \$10,237,400. There were also employed 166 outside piece-workers (62 male and 104 female) whose wages totalled \$57,932. Salaries and wages and payments to outside piece-workers showed an increase of \$1,827,767 over the year 1921, or 15 per cent. Salaries alone increased by \$110,376 and wages by \$1,818,568, whilst the payments made to outside piece-workers decreased by \$101,177. The average salary and wage payments, irrespective of sex, was \$2,077 and \$856 respectively in 1922, while for 1921 the average salary was \$2,124 and the average wage \$747. The report states that the high average for wage earners in 1922 over the preceding year is mainly due to the large increase in the number of males employed, amounting

to 665, as contrasted with the smaller increase of 35 in the number of female employees. Of the total persons employed in the industry in 1922 there were 8,562, or nearly 62 per cent. employed in Quebec and 4,495, or more than 32 per cent employed in Ontario. The month of December showed the highest employment, both for males and females (8,216 males and 4,694 females), whilst the lowest month of employment for males was March with 7,231, and for females July with 4,079. The average working time during the year was 284.61 days, 52.20 hours per week and 9.2 hours per day.

#### **Macaroni and Vermicelli Industry, 1921 and 1922**

During the calendar years 1921 and 1922 there were eight establishments engaged in the macaroni and vermicelli industry. Four of these were in Ontario, two in Manitoba and two in Quebec. A comparison of figures relating to production for the two years shows an increase from 13,134,019 pounds of macaroni in 1921 to 14,417,309 pounds in 1922, but there was a marked reduction in the value, from \$1,449,711 to \$1,318,037. The cost of material was less during 1922 than in the previous year, being \$738,501 in 1922, as against \$820,200 in 1921. The total capital invested in the industry in 1921 was \$1,105,095 and in 1922, \$1,054,717. There was very little variation in the two years in the number of persons employed or in the amounts of salaries and wages paid. In 1921, there were 31 salaried employees (25 males and 6 females) with salaries totalling \$39,231, and 119 wage earners (64 male and 55 female) with a pay roll of \$83,188. In 1922 there were 36 salaried workers employed (30 male and 6 female) their salaries amounting to \$51,940, and 140 wage earners with wages amounting to \$85,549. The average hours worked per day or shift, in the entire industry, in 1921 was 9.75 and per week 56.87, and the average days in operation on full time were 291.75; the days idle averaged 12.25. In 1922, the average hours worked per day were 9.87, and per week, 57.37; the days in operation on full time averaged 274.87, on part time 19, and the days idle, 10.12.

#### **The Cocoa and Chocolate Industry in Canada, 1921 and 1922**

The report on the cocoa and chocolate industry in Canada for the years 1921 and 1922 covers the operation of five plants, of which one was located in Nova Scotia, and two each in the provinces of Ontario and Quebec. The capital investment in 1922 was \$4,245,916 and in 1921, \$3,817,071. The production value for

1922 was \$3,982,145 and for 1921, \$3,561,833. In 1921 there were 86 salaried persons (64 male and 22 female) employed who received as salaries \$175,412, while in 1922 the salary list rose to 89 (68 male and 21 female) but the amount paid was less, being \$167,940. The number of employees on wages rose from 250 males and 214 females during 1921 to 295 males and 246 females for 1922, and the amounts paid in wages were \$420,663 for 1921 and \$465,850 for 1922. The average hours worked per day or shift in both years was 9, while the average per week was 50.20 in 1921 and 50.40 in 1922. The number of days in operation on full time in 1921 averaged 259.80 and the days idle, 44.20. In 1922 the number of days in operation on full time averaged 239.80, on part time, 26.40, and idle 37.80.

### The Clothing Industry (Part 1: Men's Wear), 1921

The report on the men's wear section of the clothing industry in Canada for 1921 deals with the industry under two heads, factory clothing and custom clothing. There were in operation during the year 1,501 custom clothing establishments and 162 factory clothing establishments. Of the former division 662 were in Ontario, 384 in Quebec, 110 in Manitoba, 107 in British Columbia and the Yukon, 82 in Nova Scotia, 59 in Alberta, 47 in Saskatchewan, 41 in New Brunswick, and 9 in Prince Edward Island. Of the factory clothing establishments, 93 were in Quebec, 62 in Ontario, 3 in Manitoba, 2 in New Brunswick, one in Nova Scotia and one in British Columbia and Yukon. The total value of production for the industry amounted to \$59,287,678, made up of factory clothing valued at \$43,766,569 and custom clothing valued at \$15,521,109. The capital invested in 1921 was \$37,441,945, of which factory-made clothing represented \$30,244,334 and custom made clothing \$7,197,561. The number of persons employed in the entire industry was 16,057, of whom 10,755 were employed in factories and 5,302 in custom or merchant tailor shops. In the clothing factories, 1,658 were employed on salaries (1,290 males and 368 females), whilst those on wages numbered 8,464 (4,044 males and 4,420 females). The total number of outside piece-workers was 633 (383 males and 250 females). The total amount paid for services and labour during the year to factory

workers was \$12,456,980 of which salaried employees received \$3,286,267, employees on wages, \$8,765,158 and outside piece-workers, \$405,555. The average salary paid to all employees in 1921 was \$1,982, the average wage paid was \$1,035 and the average payment to piece-workers was \$642. The total number employed in merchant and custom tailor shops was 5,302 and the average earnings for the year were approximately \$900. The average days in operation in custom shops was 282.6 and in factory establishments, 229.4. The average hours worked per day in the factories was 7.8 and per week, 42.1.

### Men's Furnishing Goods Industry, 1921

The report on the men's furnishing goods contains three separate sections, namely—furnishing goods, suspenders, and neckwear. Under the heading "furnishing goods" there were 82 establishments operating, 34 in Ontario, 33 in Quebec, 8 in Manitoba, 5 in British Columbia and one each in Alberta and Nova Scotia. There were 12 suspender establishments (7 in Ontario, 4 in Quebec, and one in New Brunswick), and 11 neckwear establishments (9 in Ontario and 2 in Quebec). The men's furnishing goods showed a production valued at \$17,946,293, the production of suspenders amounted to \$935,006, and neckwear to \$1,993,247, making a total of \$20,874,546 for the entire industry. The capital investment aggregated \$14,124,124. Salaried employees in the entire industry numbered 487 males and 221 females, with a total payroll for the year amounting to \$1,389,669. Wage-earning employees numbered 807 males and 3,974 females with a total payroll of \$2,699,525. Piece-workers employed outside the establishments numbered 3 males and 337 females with a payroll of \$65,125. In Ontario the number employed was 544 males and 1,482 females; in Quebec, 488 males and 1,916 females; and in the other provinces, 265 males and 1,134 females. In the furnishing goods establishments the days in operation during the year averaged 246.71, the hours per day 7.95 and the hours per week .44. In the establishments making suspenders, the days in operation during the year averaged 243.50, the hours per day 8.50, and the hours per week 46.35. In the establishments making neckwear the days in operation during the year averaged 252.63, the hours per day 7.27, and the hours per week 40.63.

## THE EMPLOYMENT SITUATION AT THE BEGINNING OF APRIL, 1924, AS REPORTED BY EMPLOYERS

**E**MPLOYMENT as indicated in reports from employers to the Dominion Bureau of Statistics showed a slightly downward trend, largely on account of heavy seasonal contractions in logging. Reductions in personnel on a considerably larger scale had been reported at the beginning of April, 1923, and 1922, when the situation was not so favourable as at the present time. The curve in the accompanying chart shows the comparatively slight decline recorded at the beginning of April, as well as the more steeply downward trend that it had shown at the beginning of April, 1923 and 1922.

Reports were received from 5,883 firms with a combined working force of 737,505 persons as compared with 749,048 at the beginning of March. Manufacturing as a whole showed further improvement; communication, shipping, stevedoring, highway and building construction and maintenance, and services employed a larger number of workers than in the preceding month. Logging camps showed very considerable curtailment of operations, owing to the completion of the season's cut. Street, electric and steam railways afforded less employment, and railway construction was slacker.

Firms in the maritime provinces and British Columbia increased their payrolls, but in the remaining provinces contraction was indicated. An aggregate working force of 63,536 persons was registered by the 510 firms making returns in the maritime provinces; this was 2.7 per cent more than on March 1. Recovery in coal mining, together with increased activity in shipping and stevedoring, rolling mills and railway construction, accounted for a large share of the increase. In Quebec statements were tabulated from 1,295 employers, whose staffs aggregated 202,174 persons, as compared with 206,210 in the last report. Contractions in logging and railway construction caused most of this decline of 2 per cent, although there was also a decrease in employment in tobacco, paper and electrical apparatus factories and in railway operation. On the other hand, railway car shops and other iron and steel works, sawmills, and textile factories were busier. The number of persons employed in shipping and stevedoring and construction also increased. The firms making returns in Ontario—2,718 in number—employed 312,007 persons on April 1, or 2.4 per cent less than in the preceding month. There were very heavy contractions in logging camps; steam railway transportation and con-

struction, pulp, paper, confectionery, non-ferrous metal product and textile plants also were slacker. Improvement, however, was indicated in iron, steel, automobile, sawmilling, clay, glass, stone, rubber and mineral products works and in building and highway construction, laundries and shipping. In the prairie provinces curtailment was indicated in logging and coal mining, in iron, steel and on street railways. Railway construction, on the other hand, absorbed more men than in the last report. According to returns from 768 firms, they employed 92,935 persons as compared with 95,815 in the last report; the difference was a 3 per cent decline. A large number of industries shared in the upward movement in British Columbia, where 1,509 persons were added to the payrolls of the 592 reporting concerns. They employed 66,853 workers on April 1 or 2.3 per cent more than in the preceding month. The greatest improvement was indicated in sawmills, construction and transportation. Paper mills afforded less employment and coal mines were also slacker. The following table gives the index numbers of employment in these provinces:—

District	Relative Weight	Apr. 1 1924	Mar. 1 1924	Apr. 1 1923	Apr. 1 1922	Apr. 1 1921
Maritime provinces.....	8.6	84.6	82.4	90.5	80.6	87.2
Quebec.....	27.4	91.5	93.5	85.5	77.5	80.4
Ontario.....	42.3	87.6	89.8	88.4	81.1	83.5
Prairie provinces.....	12.6	87.0	89.6	83.5	82.1	88.7
British Columbia.....	9.1	99.6	97.1	92.8	85.9	88.1
Canada.....	100.	89.3	90.7	87.6	80.6	84.1

Of the six cities for which special tabulations are made, only one, Winnipeg, showed reductions in employment, while a moderately upward tendency was reported in the remaining five. A combined working force of 103,045 persons was recorded by the 725 firms in Montreal making returns, who had employed 100,102 on March 1. Railway car and other iron and steel shops, textile, printing and biscuit factories, shipping and building construction registered the greater part of this increase of 2.9 per cent. In Toronto statements were compiled from 816 employers with a staff of 93,276 persons or .4 per cent more than on March 1. There was general but slight improvement in a number of industries, notably retail trade and laundering, but printing and non-ferrous metal product works were slacker. According to reports from 127 firms, employment in Ottawa increased by 1.5 per cent;

they employed 9,648 persons as compared with 9,510 in the preceding month. Small additions to staffs were recorded in a number of industries in that city. The working forces of the 203 firms making returns in Hamilton aggregated 25,952 persons, or 586 more than on March 1. The greater part of this increase of 2.3 per cent occurred in textile works. In Winnipeg there were declines in employment on street railways, in woodyards and retail trade. Statements were tabulated from 292 employers, having 23,394 persons on their payroll as compared with 23,788 in the preceding month. This was a decrease of 1.7 per cent. Sawmills, shipping, stevedoring, building and highway construction registered considerable improvement in Vancouver, where 1,213 persons were added to the payrolls of the 226 firms making returns. As they employed 21,738 persons on April 1 as against 20,525 at the beginning of March, there was increase of 5.9 per cent. Index numbers of employment by cities are given in the following table:—

City	Relative Weight	Apr. 1 1924	Mar. 1 1924	Apr. 1 1923	Mar. 1 1922
Montreal.....	14.0	90.1	87.7	83.3	76.0
Toronto.....	12.6	84.8	84.5	86.7	82.7
Ottawa.....	1.3	90.9	89.3	90.6	.....
Hamilton.....	3.5	85.2	83.0	88.4	.....
Winnipeg.....	3.2	82.3	83.8	85.7	83.6
Vancouver.....	2.9	99.8	94.2	86.9	87.8

### The Manufacturing Industries

Further though moderate improvement was indicated in the manufacturing industries as a whole at the beginning of April, when 2,713 persons were added to the payrolls of the 3,851 employers reporting. Their staffs increased from 426,340 persons on March 1 to 429,053 for the month under review. Sawmills, carriage factories, rubber, cotton, thread, brick, rolling, automobile, railway car, boiler, and heating appliance works, foundries and machine shops recorded increased activity. On the other hand, biscuit, flour, pulp, paper, tobacco, woolen and carpet factories afforded less employment than in the preceding month. Considerable curtailment had been indicated during the corresponding period of last year, largely on account of shutdowns over the Easter season, and the index number then was slightly lower than at the present time.

**ANIMAL PRODUCTS—EDIBLE.**—Dairies reported larger payrolls than in March, but meat slaughtering and packing establishments were slacker. The net result was an increase in employment in the edible animal products division of 19 persons. Returns were compiled from 140 employers, with an aggregate work-

ing force of 12,437 persons. A considerable decline had been recorded at the beginning of April, 1923, when the index number stood several points lower.

**LEATHER PRODUCTS.**—Practically no change in the situation was indicated in the leather industry as a whole; tanneries, boot and shoe factories were scarcely as fully employed as in the preceding month, while the production of miscellaneous leather goods showed improvement. A total working force of 17,672 persons was shown by the 203 manufacturers making returns in this group, who had 17,678 employees on March 1. Minor declines were recorded in all provinces. Contractions on a very much larger scale were registered at the same period of last year, but employment then was in slightly greater volume than at the present time.

**LUMBER AND PRODUCTS.**—Further improvement was shown in this group, all divisions of the industry sharing in the upward movement. The largest gains were indicated in lumber mills and in wooden vehicle plants. Firms in Quebec, Ontario and British Columbia reported additions to staffs, while, in the maritime and prairie provinces losses were registered. According to returns from 695 firms, they had 42,102 persons in their employ on April 1; this was 2.3 per cent more than at the beginning of March. Although the increase during the period under review was somewhat larger than that indicated early in April, 1923, employment in the lumber industries then was more plentiful, the index number standing between 4 and 5 points higher.

**MUSICAL INSTRUMENTS.**—The production of musical instruments in Ontario provided work for a slightly larger number of persons than at the beginning of March. Thirty-nine manufacturers employed 2,707 persons, or 73 more than in the last report. A large reduction in personnel had been indicated at the same period of last year, when the index number was a good deal higher.

**PLANT PRODUCTS—EDIBLE.**—Flour and other cereal mills and biscuit factories recorded decreased employment; canneries were rather busier in anticipation of the season's work, but the increases were not large enough to offset the reductions mentioned above. Employment declined in the maritime provinces, Ontario and the prairie provinces, while in Quebec and British Columbia improvement was noted. Statements were compiled from 317 employers with a total payroll of 24,615 persons as compared with 24,884 on March 1. Curtailment of operations on a large scale had been indicated on April 1, 1923, and the situation was less favourable.

**PULP AND PAPER.**—The volume of employment afforded in pulp and paper mills declined considerably and printing and publishing shops also were slacker. The production of miscellaneous paper goods, however, increased slightly. This downward movement repeats that indicated at the same period of last year; the index number then was slightly lower than at the present time. According to 464 firms in the pulp and paper products group, they employed 50,956 persons as compared with 51,550 on March 1. Most of this decline of 1.2 per cent was reported in Ontario and British Columbia.

**RUBBER PRODUCTS.**—Further expansion was noted in employment in rubber, mainly in Ontario. A combined working force of 10,749 persons was indicated by the 32 reporting firms, who had employed 10,586 workers on March 1. This increase of 1.5 per cent was slightly larger than that registered on April 1, 1923, but the level of employment then was higher than at the present time.

**TEXTILE PRODUCTS.**—Comparatively small additions to staffs were recorded by the 578 manufacturers of textile products making returns for April 1. They enlarged their working forces from 69,134 in the last report to 69,319 for the period under review. Cotton mills were decidedly busier and improvement was also reported by thread manufacturers. On the other hand, woollen and carpet works were slacker. Large declines had been recorded during the corresponding period of last year, but the index number then was several points higher than on April 1 of this year.

**TOBACCO, DISTILLED AND MALT LIQUORS.**—Tobacco factories in Quebec reported considerable curtailment of operations, but breweries in the same province were busier. Reports were compiled from 95 firms, employing 10,427 persons, as compared with 10,859 in the preceding month. The situation was better than at the corresponding period of last year, when declines had also been recorded.

**CLAY, GLASS AND STONE PRODUCTS.**—Brick factories and stone works were more fully employed than at the beginning of March, while glass factories reported a minor decline; 618 persons were added to the staffs of the 115 employers making returns, whose payrolls comprised 8,642 persons. A large share of this expansion of 7.7 per cent occurred in Ontario and Quebec. Increases in staff on a much smaller scale had been reported on April 1, 1923, and the index number then was lower.

**IRON AND STEEL PRODUCTS.**—Further improvement was shown in this industry on April 1, in

contrast with the heavy declines that had been recorded on the same date of last year which however, partly represented shutdowns over Easter. Employment then had been on a lower level. Rolling and forging mills, boiler, railway car, automobile, heating appliance and machine shops and foundries reported improvement, that in the land vehicle division being quite pronounced. Steel shipyards, on the other hand, reported some curtailment. Statements were tabulated from 651 manufacturers in the iron and steel division, employing 126,696 workers, which was 2,054 or 1.6 per cent more than on March 1.

**OTHER MANUFACTURING INDUSTRIES.**—Very little change in the situation was shown on the whole in the fur, wood distillate, chemical, electric current, electrical apparatus, non-ferrous metal and mineral product divisions.

### Logging

Heavy seasonal losses were recorded in logging at the beginning of April, when 14,099 persons or 40 per cent of the payroll were released by the 225 employers making returns. Their staffs declined from 34,947 on March 1 to 20,848 for the month under review. This contraction exceeded that indicated during the corresponding period of last year, when the index number stood about 3 points higher. The declines were widely distributed over the country; those in Ontario were the most extensive, while in British Columbia they were least pronounced.

### Mining

**COAL MINING.**—Marked fluctuations in employment in the different coal fields produced a net decline of 107 persons or .4 per cent. Decided improvement was registered in Nova Scotia, but in Alberta substantial curtailment was reported, and in British Columbia there was a slightly downward trend. According to the data received 27,739 persons were engaged in 92 coal mines on April 1, as compared with 27,846 in the preceding month. Very much larger reductions in personnel had been noted at the beginning of April, 1923, but the index number then was several points higher than at the present time.

**MINING OF METALLIC ORES AND OF NON-METALLIC MINERALS (OTHER THAN COAL).**—On the whole, little change in employment was indicated in these divisions. Metallic ore mining in Ontario employed a smaller number of workers than on March 1, but offsetting increases were recorded in British Columbia. The changes in non-metallic mineral mining were very small.

### Communication

Employment on telephones and telegraphs showed slight improvement at the beginning of April. Minor additions to staffs had also been recorded during the same period of 1923, but employment then was in smaller volume. A combined working force of 21,775 persons was reported by the 166 concerns making returns for April 1, 1924, who had employed 21,593 persons on March 1.

### Transportation

STREET AND ELECTRIC RAILWAYS.—Slight decreases in employment were indicated in this industry generally, those in the prairie provinces being the largest. Returns were received from 104 employers, whose staffs declined from 18,688 persons on March 1 to 18,323 at the beginning of April. This reduction of 2 per cent was slightly larger than that recorded on April 1, 1923.

STEAM RAILWAYS.—The working force of the 104 concerns and divisional superintendents making returns in this division was 74,983 as compared with 75,815 in the previous month. All provinces except British Columbia shared in the decline of 1.1 per cent. Slight improvement had been recorded at the beginning of April of last year, but the index number then stood rather lower than at the present time.

SHIPPING AND STEVEDORING.—Improvement in this industry was recorded; the largest increases occurred in the maritime provinces and Quebec. Additions to staffs on a much smaller scale had been indicated at the same period of last year, but the level of employment then was considerably lower than on April 1, 1924. Forty-nine employers in the shipping group reported a combined payroll of 11,574 persons as compared with 9,673 in the preceding month. The difference was an increase of 19.7 per cent.

### Construction and Maintenance

BUILDING CONSTRUCTION.—The commencement of seasonal activity in building resulted in an increase in employment of 5.5 per cent, which was somewhat larger than that recorded early in April, 1923. The situation then had been less favourable. The improvement during the present month was fairly generally distributed over the country. The largest increases occurred in British Columbia, Ontario and Quebec. Statements were compiled from 304 building contractors, with an aggregate working force of 16,453, whereas in the preceding month their staffs had numbered 15,588 persons.

HIGHWAY CONSTRUCTION.—The resumption of spring operations on roads and highways caused the 64 contractors making returns in this group to increase their payrolls by 15.9

## UNEMPLOYMENT IN TRADE UNIONS DURING THE QUARTER ENDING MARCH 31, 1924, AS REPORTED BY UNIONS MAKING RETURNS

THE present article on unemployment among members of trade unions deals with the situation reported during the quarter ending March 31, 1924. At the end of January the percentage of idleness stood at 7.5 or .3 per cent lower than in December. During the following month a slight decrease in employment was registered, but in March some improvement was shown, 6.7 per cent of the members being out of work at the end of that month. In the first month of the corresponding quarter of last year unemployment was in practically the same ratio as for January of this year, but improvement was registered during February and a slight decrease occurred in March when the percentage of idleness stood at 6.8. (Unemployment as used here has reference to involuntary idleness due to economic causes.) Persons engaged in work other than their own trades, or who are idle because of illness, or as a direct result of strikes or lockouts, are not considered as unemployed. As the number of unions making

returns varies from month to month with consequent variation in membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

The accompanying chart shows the curve of unemployment as reported by trade unions by quarters for 1916-17-18-19 and by months for 1920-21-22-23 and to March of this year. During the first two months of the quarter under review the curve followed in an upward course as in the preceding quarter, but in March the trend was downward. The curve in January followed a course similar to that of January of last year, but in February and in March the trend was in an opposite direction from that indicated in each of these months during the previous year, the position being approximately the same at the end of March for both years.

In January, New Brunswick, Quebec, Alberta and British Columbia all registered more employment than in December of last year,

but the improvement in these provinces was more than offset by the declines reported in the remaining provinces. Employment for workers in the manufacturing industries, especially in the garment trades, was on a higher level but building and transportation workers were slacker.

During February, less employment than in January was reported by unions in Ontario,

Manitoba, Alberta and British Columbia, but in the other provinces the situation was more favourable. Building tradesmen reported more idleness, and workers in the manufacturing division were also less fully engaged. Transportation workers, however, showed some improvement.

During March, a greater volume of employment than in February was shown in Ontario,

Manitoba, Alberta and British Columbia, but in the other provinces there were slight reductions. Workers in the manufacturing industries, and in the building trades were better employed but less work was afforded transportation workers.

TABLE I.—PERCENTAGE OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month		N.S. and Pr. Edw. Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Jan. 1921	.....	5.9	8.1	13.3	14.2	8.8	10.1	9.7	21.6	13.1

March 1924	.....	3.6	3.6	8.7	7.0	7.4	6.5	5.3	3.2	6.7

Table I on this page summarizes the returns by provinces and Table 3 on page 418 shows the percentages of unemployment reported in the different groups of industries.

Fishermen were much busier in January than in the corresponding month of last year. Miners reported a somewhat larger percentage of inactivity and employment for workers in the manufacturing industries declined slightly. Building tradesmen were slacker but the situation for transportation workers was slightly more favourable owing to greater activity in the shipping division.

In February, employment for workers in the manufacturing industries was in somewhat lesser volume than in the same month of last year, papermakers and garment workers reporting a large share of the unemployment. In the building and construction group declines were registered. Transportation workers were slightly better employed, but fishermen and retail clerks were not so busy.

During March, unions in the manufacturing division reported more employment than in the corresponding month of last year, due partly to increased work for garment and glass workers. Papermakers, textile and iron and steel workers however, were not so well employed. Building tradesmen reported considerably less activity and transportation workers were not quite so fully engaged. A better situation was shown by coal miners.

The accompanying tabulations (Table 2 show in detail the returns for the month ending March 31, 1924. Reports were received from 1,459 labour organizations with an aggregate membership of 150,129 persons, of whom 10,051 or a percentage of 6.7 were unemployed. The table also gives the general percentages of unemployment in the various trades and industries for all Canada for the months of January and February, 1924.

## EMPLOYMENT OFFICE REPORTS FOR MARCH, 1924

A DECLINE was reported during the month of March, 1924, in the business transacted by the offices of the Employment Service of Canada as compared with the preceding period and with the corresponding period of last year. The contrast from activities during the previous month is very marked but is explained by the fact that a large volume of work of a seasonal and casual nature was offered during February, approximately twice as many placements being effected in casual work as in permanent employment. The figures as during March indicate a return to the normal seasonal demand. It will be noted also in comparing the returns with those of March, 1923, that only a slight decline is recorded during March of this year. The accompanying chart, which presents the returns from the offices on the basis of daily averages over half-month periods, shows a decided fall in the curves of applications, vacancies and placements, during the first half of the month, followed by a pronounced upward curve at the end of the month. The curves reached approximately the same level at the end of March, 1924, as at the same time last year, while it may be noted that applications were in excess of a year ago. A summary of the reports from the offices shows that the average number of vacancies reported during the first half of March was 906 daily as compared with 1,623 during the previous period, and with 1,311 during the same period a year ago. Vacancies reported by employers during the latter half of the month averaged 1,102 daily in comparison with 1,138 daily during the same period in March, 1923. Applications for work averaged 1,273 and 1,411 daily during the first and second half of March, 1924, as compared with 1,572 and 1,337 daily during the same period last year. Applications during the latter half of February, 1924, averaged 1,930 daily. The average number of placements effected daily by the offices during the first half of March was 820 in contrast with 1,521 during the preceding period and with 1,158 during the corresponding period a year ago. Placements made during the latter half of the month averaged 912 daily as compared with 969 daily during the same period of 1923. During the first and second half of the month under review, placements in regular employment averaged 519 and 587 daily respectively, while those in casual work numbered 301 and 325 daily.

The following table gives the placements effected to date by the offices of the Employment Service of Canada:—

Year	Placements		
	Regular	Casual	Total
1919 (10 months).....	263,001	37,904	305,905
1920.....	366,547	79,265	445,812
1921.....	280,518	75,238	355,756
1922.....	297,827	95,695	393,522
1923.....	347,165	115,387	462,552
1924 (3 months).....	42,874	48,464	91,338

During March, 1924, references to employment made by the offices totalled 24,194, while placements effected numbered 22,523. Of the placements in regular employment, those of men numbered 11,394 and of women 2,994, a total of 14,388. Placements in casual work during the period were 8,135. The number of applications for work was 34,897, of which 25,877 were of men and 9,020 of women. The Service received a total of 26,104 vacancies from employers, of which 18,200 were for men and 7,904 for women workers.

Placements in regular employment by provinces were as follows: Nova Scotia, 272 men, 59 women; New Brunswick, 165 men, 73 women; Quebec, 453 men, 463 women; Ontario, 4,319 men, 1,003 women; Manitoba, 1,464 men, 436 women; Saskatchewan, 1,561 men, 353 women; Alberta, 1,601 men, 363 women; British Columbia, 1,559 men, 244 women.

## MARITIME PROVINCES

The employment situation in these provinces showed a slight betterment during March, due in part to improved weather conditions. A few municipal public works, repairs to dams and generating plants, as well as some excavation, offered work to many labourers but little reduction of the unemployment lists at the offices was expected until the opening of the building season in the latter part of April. A reduced demand for choppers and sawyers was reported, while at a few offices early orders for river drivers were received. Longshore work at the ports was fair. In the Women's Department, the demand for domestics and generals exceeded the supply, and spring cleaning caused an increase in the demand for day workers.

## QUEBEC

No material change has been effected in the employment of building tradesmen. It is an-

anticipated that the early part of next month will bring renewed activities in outdoor employment but during March a few orders for inside workers, painters and plasterers were the only requirements in the building trades. Slackening was shown in logging operations, the offices expecting little of this type of business until the commencement of the spring drive. The agricultural group and the manufacturing industry remained quiet. Demands for domestic workers and housekeepers were reported in increasing numbers, with a shortage of experienced applicants.

#### ONTARIO

A supply of farm labour sufficient to meet the demands was sometimes lacking throughout the month, nevertheless the farmers appeared to be approaching the season's work with expectations of a good year. Further expansion in this group may be anticipated also for the following month. Contractors and building tradesmen were preparing for a large building program, and if all the work contemplated throughout the province is set under way, labourers and skilled workmen will find employment without difficulty. At present, however, the number registered as out of work remains large, though by no means abnormal for this season of the year. Civic sewer work, surface drains and several repair jobs afforded employment to many in the larger centres, while a few advanced orders for rock men and section gangs for the railways were filled at Cobalt, Fort William and St. Thomas. A seasonal "let up" in the demand for loggers was shown at all the northern offices, a few calls being registered for teamsters, tie makers and skidders. The opening of the rivers for driving will doubtless create a heavy demand for men during the coming month. The mining industry was quiet. Slightly greater activities were shown in the manufacturing industries, a large number of orders being received at Oshawa, Kitchener and Toronto, for mechanics, sheet metal and auto workers. Difficulty was felt in placing women applicants having only shop, factory or clerical experience, as the greater number of vacancies available were in domestic employment. A slight increase was shown in the casual work offered.

#### MANITOBA

Farm labour was still scarce, there being a greater demand than supply, but, with the seasonal curtailment of logging activities, a number of men were available for farms. This section will without doubt show an increase

in placements during the coming weeks. From Winnipeg, however, despite the slackening in demand for bushmen, several placements of tie makers and skilled workers for the spring cut were effected. The construction groups were inactive and as yet reports showed no large schemes in contemplation either in building or highway work. In railway maintenance an active demand was anticipated for the next few weeks. A general decline in the volume of employment offered for women domestics and generals was evidenced, especially at Winnipeg.

#### SASKATCHEWAN

The central prairie province, as usual, showed an early and large demand for farm workers, increasing as the season advances. The response of applicants, however, has not been so well marked, experienced workers being secured with difficulty. The employment outlook on the whole was encouraging, although the slackening in building and construction work was reflected in the large lists of unemployed, including skilled tradesmen and carpenters, as well as the unskilled workers. Curtailment in logging operations added slightly to the number out of work, the offices, however, at The Pas and Saskatoon effecting a few placements of bushmen and teamsters in the camps. Calls for domestic workers for rural districts were received in increasing numbers, but the majority of applicants preferred work in the urban centres. There were a few requests for institutional workers, with a rising demand for casual help.

#### ALBERTA

Experienced farm labour was scarce, there being a large demand for workers. It was expected that with the decline in logging a number of men would be available for farms. Quietness characterized the construction groups, it being too early as yet for the spring expansion in building, while casual and temporary jobs incidental to the winter season had fallen off. A number of men were employed on repair work at Calgary, while in other districts several workers were placed in jobs on the railways. In spite of the lateness of the season the offices continued to supply a few workers to fill the demand for bushmen, skidders and loggers. A small demand for women domestics and institutional workers was reported with a shortage of experienced applicants.

#### BRITISH COLUMBIA

Conditions were quiet in the construction groups. Very few vacancies were available and large numbers of skilled tradesmen and

labourers were unemployed. Some excavation, repair jobs on bridges and buildings, gave employment to many, but the expansion in construction had not commenced. Although logging camps along the coast were active the demand for workers in this group was not up to expectations. The mining industry was quiet, with indications toward greater activity at Revelstoke, Prince Rupert and Cranbrook. Work along shore was brisk but far more men were applying for jobs than there was work available. Little change was shown in the demand in the domestic group, a slight increase being recorded in the institutional section.

linemen, structural workers, moulders and shoe lasters, going to various points in the province. Manitoba offices despatched 679 workers at the reduced rate, 263 of whom, chiefly bushmen, sawyers, station workers with a few maids and kitchen workers, were going to points near Timmins and Port Arthur, Ont. To the province of Saskatchewan the office at Winnipeg sent 88 farm workers, 8 maids and housekeepers, 1 gas tractor operator, 2 river drivers and 1 lath grader. One farm hand was transferred from Winnipeg to Calgary, Alta. Of the 315 provincial transfers 293 were granted to farm workers, the remainder being

### The Movement of Labour

During March, 1924, the offices of the Employment Service made 14,388 placements in regular employment, of which 9,038 were of persons for whom the employment found was outside the immediate locality of the offices at which they were registered. Of the latter 1,867 were granted the Employment Service reduced transportation rate, 1,158 going to points within the same province as the despatching office and 709 to other provinces.

The offices in Quebec province granted 149 certificates, of which 132 were to bushmen going to camps near Sault Ste. Marie, North Bay, Cobalt and Sudbury, Ont., and 17 were to bushmen going to points near Quebec and Montreal. The certificates issued by the Ontario offices numbered 338, of which 323 were to bushmen, loggers, construction and railroad labourers, going to points in Northern Ontario, the remainder including electricians,

waitresses, farm housekeepers, 3 teamsters and 1 hotel worker going from Winnipeg to Brandon, Dauphin and Portage la Prairie. Saskatchewan offices issued 178 certificates, 92 to workers going to points within the province and 86 to other provinces. Of the latter 1 farm hand was sent from Saskatoon to Calgary and 1 housekeeper from Regina to Edmonton, Alta. To Cranbrook and Revelstoke, B.C. were sent 84 bush workers. Farm hands transferred to points within the province numbered 69, while the remaining transfers consisted of housekeepers, a few bushmen, cooks and institutional workers. From Edmonton 41 farm hands and 3 farm domestics were sent at the reduced rate to points near Saskatoon and North Battleford. Of the 271 certificates issued by Alberta offices to points within the province, 132 were to farm hands, 55 to bushmen, 10 to miners, 63 to labourers and mill hands, the remainder waitresses, farm

\* 139 placements effected by offices since closed.

housekeepers and maids. British Columbia offices transferred 208 persons to employment at a distance, 42 being farm hands going from Vancouver and Victoria to Calgary, Drumheller and Edmonton, Alta., and 41 were farm hands and a few farm housekeepers to Moose Jaw, Swift Current and Saskatoon, Sask. From Vancouver were transferred 29 machine miners, 7 rockmen and 4 labourers to points near Cranbrook and Revelstoke, while to the district near Prince George were sent approximately

60 bushmen and tiemakers. Several of the offices showed farm workers transferred to the districts near Kamloops, Penticton, Nelson and Vernon, with a few domestic workers sent to various points within the province.

Of the 1,867 workers, who benefited by the Employment Service reduced rate, 989 were carried by the Canadian National Railways, 862 by the Canadian Pacific Railway, 12 by the Pacific Great Eastern and 4 by the Temiskaming and Northern Ontario Railway.

## REPORT OF THE EMPLOYMENT SERVICE OF CANADA DURING PERIOD JANUARY-MARCH, 1924

A REVIEW of employment conditions for the first quarter of 1924, as indicated from the reports of the offices of the Employment Service of Canada, shows a very considerable betterment from the same period of 1923, the gains in the volume of business transacted being more than seven per cent in applications reported and placements effected and approximately five per cent in the number of vacancies offered. The decrease from last year in placements effected in regular employment was .74 per cent, and in casual work the increase was 13.98 per cent. This advancement is attributable, chiefly, to the increase in opportunities in the logging group during January and to the expansion in the farming group during the latter part of February and March. A marked gain in the shipping and stevedoring group in British Columbia is explained by the fact that, since the settlement of the industrial dispute among the longshore workers in this province, hiring of labour for the docks has been done through the offices of the Employment Service. Owing to the unusually severe weather experienced in Ontario during February a slightly larger number of casual jobs of a seasonal nature was available. Manufacturing industries showed a decline, as did also trade and finance groups. Comparison with the last quarter of 1923 shows a decline in vacancies offered and placements made of approximately 19 per cent. However, placements in regular employment during the winter months declined more than 101 per cent, while placements in work of less than one week's duration increased approximately 110 per cent. All industries showed a reduction with the exception of the construction and maintenance groups, the gain here being in casual employment.

A chart on page 421, which accompanies the article on the work of the employment offices for March, 1924, shows the trend of employment for the period under review. The curves of applications, vacancies and placements fol-

lowed a course during the first half of January parallel to that of January, 1923. The decline during the latter part of the month was more than offset by the abrupt rise during February. In March, however, a further drop is shown, the curves falling to approximately the same level as at December, 1923. The peaks in the curves through the period under review in comparison with the even level of a year ago may be attributed mainly to the unusually severe weather in Ontario during February and to the large increase in the volume of casual work available. At the end of March the upward trend indicates the beginning of the usual spring expansion in industry.

During the period January to March the offices reported that they had made 95,992 references to positions and had effected a total of 91,338 placements, 42,874 of which were in regular employment and 48,464 in casual work. The placements in regular employment were 34,494 of men and 8,380 of women. During the same quarter in 1923 the placements made totalled 85,075, representing an increase during this year of more than seven per cent. Employers notified the service, during the quarter, of 100,691 vacancies for work, of which 79,224 were for men and 21,467 for women, as compared with a total of 96,154 vacancies during the corresponding period of a year ago. Applications for employment registered at the offices totalled 129,425, of which 102,719 were from men and 26,706 were from women, in contrast with a total of 120,817 during the first quarter of 1923.

The accompanying table gives the vacancies and placements by industries of the offices of the Employment Service of Canada in the various provinces during the period under review (January-March 1924). On another page in this issue will be found a full report of the transactions of the Employment offices for the month of March 1924.

## BUILDING PERMITS ISSUED DURING MARCH, 1924

A VERY large increase in the building authorized by 56 cities as compared with the preceding month was reported during March, when the value of the building permits issued exceeded that for February by \$5,483,607, or 150 per cent. In comparison with the returns for March, 1923, however, there was a slight decline of 3 per cent. The total for March, 1924, was \$9,141,132 as compared with \$3,657,525 in February, 1924, and with \$9,432,350 in March, 1923.

Detailed reports were furnished the Dominion Bureau of Statistics by 45 cities, which reported that they had issued over 1,000 permits for the construction or alteration of dwellings at an estimated cost of approximately \$4,500,000. The number of other buildings for which permits were issued was about 1,700, at a proposed cost of some \$4,450,000. The construction of several buildings may be authorized by a single permit; the number of buildings to be erected, therefore, is usually in excess of the number of permits issued.

All provinces except Nova Scotia recorded increases in the value of the building permits issued as compared with February. The increases of \$1,678,950 or 214 per cent in Quebec, of \$399,824 or 142 per cent in Ontario and of \$1,257,777 or 172 per cent in British Columbia were especially large.

In comparison with the returns for March, 1923, Nova Scotia recorded a negligible decrease, and Ontario reported a substantial decline. In the remaining provinces improvement was registered. The reduction of \$1,725,223 or 30 per cent in Ontario, however, was sufficiently large to offset the increases reported elsewhere, of which that of \$933,465 or 88.5 per cent in British Columbia was the largest.

The value of the building authorized during March in Montreal, Winnipeg and Vancouver exceeded that registered in February, 1924, and in March, 1923. In Toronto, the building permits issued had a considerably higher valuation than in the preceding month, but the total was less than during the corresponding month of last year. St. John, Quebec, Westmount, Brantford, Chatham, Galt, Kingston, Niagara Falls, Oshawa, Ottawa, Port Arthur, Stratford, St. Catharines, Sault Ste. Marie, Welland, St. Boniface, Moose Jaw, Calgary, Medicine Hat, Point Grey, Prince Rupert, South Vancouver and Victoria recorded increases in the estimated

value of building as compared with February of this year and also with March, 1923.

The value of the building permits issued during the first three months of 1924 was lower

by 11.9 and 8.4 per cent than in the first quarters of 1923 and 1922, respectively, but it was 27 per cent higher than during the first three months of 1921. The total for this year is \$16,819,745; for 1923, \$19,089,184; for 1922, \$18,261,798 and for 1921, \$13,231,827.

The table on page 426 shows the value of the building permits issued during March as compared with February, 1924, and with March, 1923. The 35 cities for which records are available since 1910 are marked with asterisks.

### FAIR WAGE CONTRACTS, APRIL, 1924

During April, the Department of Labour received for insertion in the *LABOUR GAZETTE* the following information relative to six fair wage contracts, five of which were awarded by the Department of Public Works, and one by the Department of Railways and Canals. All of these contracts contain the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour employed.

A statement was also received as to supplies ordered by the Post Office Department subject to the regulations for the suppression of the sweating system and the securing of fair wages, etc.

#### DEPARTMENT OF PUBLIC WORKS

Construction of wharf, Robichaud (Savoy) Landing, N.B. Name of contractor, Arcade and Frank T. Landry, Shippigan, N.B. Date of contract, April 1, 1924. Amount of contract, unit prices as set forth in contract.

Supply and installation of passenger elevator in Christie Street hospital, Toronto, Ont. Name of contractors, The Turnbull Elevator Company, Limited, Toronto, Ont. Date of contract, April 5, 1924. Amount of contract, \$5,495.

Renewal of storage battery in quarantine station, William Head, B.C. Name of contractors, Stapleton & Carter, Limited, Victoria, B.C. Date of contract, April 24, 1924. Amount of contract, \$1,370.

Supply and installation of new generator in quarantine station, William Head, B.C. Name of contractors, D. J. Laverock and M. H. Horie, Vancouver, B.C. Date of contract, April 24, 1924. Amount of contract, \$1,812.

Supply and installation of fittings in postal station "K", Toronto, Ont. Name of contractors, Art Furniture Company, Limited, Kitchener, Ont. Date of contract, April 10, 1924. Amount of contract, \$1,271.35.

#### DEPARTMENT OF RAILWAYS AND CANALS

Repairs to structural steel and machinery of Wellington Street Bridge over the Lachine Canal at Montreal, Que. Name of contractors, Dominion Bridge Company, Limited, Lachine, Que. Date of contract, April 5, 1924. Amount of contract, schedule rates.

#### POST OFFICE DEPARTMENT

The following is a statement of payments made in April, 1924, for supplies ordered by the Post Office Department subject to the regulations for the suppression of the sweating system, the securing of fair wages, and the performance of work under sanitary conditions:—

Nature of order	Amount of order
	\$
Making metal dating stamps and type and other hand stamps and brass crown seals.....	1,100 44
Making and repairing rubber stamps, daters, etc.	144 13
Making up and supplying letter carriers' uniforms, etc.....	1,742 03
Scales, hampers, etc., repaired.....	279 85
Stamping pads, ink, etc.....	359 46
Mail bag fittings.....	9,420 39
Letter carriers' satchels.....	975 94

## RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received by the Department. Such agreements are summarized each month in the LABOUR GAZETTE. In the majority of cases the agreements are signed by both employers and employees. Verbal agreements, which are also included in the records, are schedules of rates of wages, hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In addition to these, important schedules of wages are summarized, including civic schedules. In the case of each agreement or schedule, the rates of wages for the principal classes of labour are given, with other information of general interest.

### Manufacturing: Iron, Steel and Products

OTTAWA, ONTARIO.—OTTAWA MASTER SHEET METAL WORKERS' ASSOCIATION AND AMALGAMATED SHEET METAL WORKERS, No. 47.

Agreement to be effective from July 3, 1923, until April 30, 1925, and from year to year, unless three months' notice of change is given previous to April 30.

Wages per hour, October 1, 1923, to December 31, 1923, journeymen, 77½ cents; junior journeymen, 52½ cents; from January 1, 1924, journeymen, 80 cents; juniors, 55 cents.

Hours per day, eight; per week, forty-four. Overtime, time and one-half from 5 p.m. to midnight, and Saturday afternoons. After midnight, and Sundays and holidays, double time. No work on Labour Day.

Each party is to appoint a board of five to settle disputes.

Travelling expenses are to be paid for out-of-town work. Employees are not to charge more than eight hours out of twenty-four while travelling.

No member of the local is to do any jobbing while working for any employer.

Question of an apprenticeship plan is to be referred to the joint committee, but rules for same, if adopted, are to become part of the agreement.

Two apprentices are not to be allowed to work together unless under the supervision of a journeyman.

After four years' training an apprentice should become a junior journeyman for one year. Apprentices may not be admitted to the union before the expiration of the apprenticeship period.

Only union members are to be employed, if available.

Employers needing sheet metal workers agree to notify the business agent who will supply same, if possible. If not, non-union men may be employed until union men are available. Shop stewards may approach non-union men regarding joining the union after two weeks' employment.

### Manufacturing: Printing and Publishing

ST. CATHARINES, ONTARIO.—CERTAIN LOCAL FIRMS AND INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL No. 416.—

Agreement signed by one firm and verbally in effect in the case of others, from October 1, 1922, until October 1, 1924.

*Newspaper Agreement.*—Minimum wage scale: From October 1, 1923, to October 1, 1924: per week: advertisement, floor and make-up men and typesetting machine operators, day, \$35; night, \$37; machinist operators and foremen, day, \$37; night, \$39.

Wages to be paid on a set day each week in cash. Hours: day work, eight per day, between 7 a.m. and 6 p.m., forty-eight per week; night work, seven and one-half per night, between 6 p.m. and 6 a.m., forty-five per week. Overtime on day work, time and one-half until 11 p.m., double time thereafter; night work, time and one-half until 10 a.m., double time thereafter; Sundays and legal holidays, double time.

Newspapers operating more than six typesetting machines shall employ two machinist-operators to make repairs and adjustments.

Foremen are to be judges of competency; to select and employ help and supervise and control all employees of the composing room; and to discharge, in certain cases. In decreasing the force, the last employed is to be the first discharged, and persons reinstated to be taken on in reverse order.

When the discharge of a member is contested by the union, and the matter cannot be settled by a conference, the regular procedure outlined by the International Typographical Union shall be followed.

Apprentices: Each office employing one or more journeymen, exclusive of the proprietor, shall be entitled to one apprentice; term of apprenticeship to be not less than five years; apprentices to be not less than sixteen years of age at time of beginning and to have common school education. Apprentice shall be examined at the end of his first year by the apprentice committee, and if qualified he shall continue his term. No apprentice may move to another office without the consent of his first employer and the union president. Apprentice, beginning with third year, shall pay the chairman of the chapel 50 cents per week for sixty weeks, for a course of instruction approved by the International Typographical Union, apprentice to continue the course until he receives a certificate of graduation. Scale for apprentices: second year, one-third of journeymen's scale; third year, one-half; fourth year, two-thirds; fifth year, four-fifths. Each office shall be entitled to one apprentice for every five members or major fraction thereof. Apprentices to work six days per week, with time and one-half for overtime.

*Job Agreement.*—In effect October 1, 1922, until October 1, 1924.

Minimum scale, to run from October 1 of each year without interruption, provided either party shall give notice in writing 60 days previous to October 1 of any year of intention to open question of wages: Per week, hand and floor men, and typesetting machine operators, day work, \$33; night work, \$35; machinist operators and foremen, day work, \$35; night work, \$37. A superannuated scale of 66⅔ per cent of the day scale applies to old and incapacitated members, but not more than one member shall be allowed to any one office at this scale.

Wages to be paid in cash on a set day in each week. Hours for day work, between 7 a.m. and 6 p.m., and for night work, between 6 p.m. and 6 a.m. In either case, eight hours for five days and four on Saturday; forty-four hours per week. Overtime as in newspaper offices. Sundays and legal holidays, double time.

Other provisions of the job offices agreement are the same as those for newspaper offices.

**VANCOUVER, BRITISH COLUMBIA.—VANCOUVER PRINTING AND PUBLISHING COMPANY, LIMITED, AND INTERNATIONAL TYPOGRAPHICAL UNION No. 226.**

Agreement to be effective from January 1, 1923, until December 31, 1925, and up to thirty days thereafter, as may be required to negotiate a new agreement.

Only members of the above local may be employed if available, otherwise any members of the International Typographical Union may be employed.

A joint standing committee of two from each party is to be selected to settle questions regarding the agreement or any violation thereof. If they fail to settle a matter, the same is to be referred to a fifth person agreed on by them. If an arbitration contract is in existence disputes are to be arbitrated under the same.

The foreman is to be judge of competency.

If any different terms regarding wages, hours or conditions are allowed in Vancouver during the life of this agreement, members of this local are to have the benefit. Wages to be paid weekly. Wages per hour, morning newspapers, \$1.10, 7½ hours per night (excepting 30 minutes for lunch), six nights per week; evening newspapers, 96½ cents per hour, January 1, 1923, to June 30, 1923; and thereafter \$1 per hour, 7½ hours per day (excepting 30 minutes for lunch), six days per week.

Subs showing up regularly and getting less than four days' or nights' work in a week, to be paid 50 cents extra for each shift worked.

Overtime, and work on certain holidays: time and one-half. Work on Sundays and other holidays, double time.

Machinist-operators to receive 50 cents per shift above scale.

Employees called back after one hour will receive \$1 per call.

Apprentices: one to each six journeymen; apprentices are to be examined, and to serve five years.

Rates of wages: third year, at least one-third of journeymen's wage; fourth year, at least one-half; fifth year, two-thirds.

Learners on machines are to be journeymen members of the union and to serve seventeen weeks. Learner may work overtime only if there are no journeymen available.

Beginners' scale: first three weeks, 40 per cent of scale; second three weeks, 50 per cent; third three weeks, 66½ per cent; next four weeks, 75 per cent; last four weeks, 85 per cent.

Foreman may employ and discharge help.

**Construction: Buildings and Structures**

**HAMILTON, ONTARIO.—ASSOCIATION OF BUILDING AND CONSTRUCTION INDUSTRIES AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, HAMILTON DISTRICT COUNCIL.**

Verbal agreement to be effective in a radius of ten miles from Hamilton and along the highway of the western limits of Oakville, from May 1, 1924, to April 30, 1925.

Wages per hour, eighty cents. Hours, forty-four per week. Overtime, time and one-half; Sundays and holidays, double time. No work on Labour Day and Carpenters' Picnic Day. Transportation for travelling beyond the city limits is to be paid for by employers when in excess of ten cents per day, and travelling time one way from the city limits to the job. Trans-

portation charges from one job to another in working hours are to be paid by employer.

Wages are to be paid in cash every two weeks, in working hours or at quitting time; not more than two days' pay being kept back.

Only union carpenters are to be employed, and such workmen are not to work on jobs where labourers or other tradesmen are permitted to do carpenters' work or where non-union carpenters are employed. The latter part of the above will not be enforced without the consent of the contractor.

A contractor is to be allowed one apprentice to every four journeymen, at wages mutually agreeable to the employer and the union.

**ST. CATHARINES, ONTARIO.—MASTER HOUSE PAINTERS' AND DECORATORS' ASSOCIATION OF CANADA, AND INTERNATIONAL BROTHERHOOD OF PAINTERS, DECORATORS AND PAPER-HANGERS OF AMERICA, No. 407.**

Agreement to be in effect from April 1, 1924, until March 31, 1925, and thereafter from year to year unless notice of cancellation is given by either party on or before October 1.

Hours of labour, eight per day for five days and four on Saturday.

Minimum wages per hour, 75 cents.

Any member of the local union taking work for himself shall charge master painters' prices.

Any grievance is to be referred to a committee of three members of each party.

The union shall not order any strike against a member of the Master Painters' Association. Matter to be referred to a joint committee for settlement.

Overtime from 6 p.m. to midnight, time and one-half; thereafter and Sundays, double time. Holiday rate, time and one-half.

**EDMONTON, ALBERTA.—MASTER PLUMBERS' ASSOCIATION AND UNITED ASSOCIATION OF PLUMBERS, GAS AND STEAM FITTERS, LOCAL No. 488.**

Agreement to be in effect from May 1, 1924, to April 30, 1926. Notice of change must be given on or before January 31, 1926, and agreement is to be settled on or before February 28, 1926. Agreement is to be effective for another year if no notice is given.

Hours of labour, 8 a.m. to 5 p.m. with one hour off at noon, for five days, and 8 a.m. to 12 noon on Saturdays. Overtime until midnight and Saturday until 5, time and one-half; thereafter, double time. Holiday rate, double time.

Expenses of board and room are to be paid to a member working outside of the city, also single time for travelling, unless sleeper is provided, when members will be paid regular working hours.

Each shop is to be allowed one plumber's apprentice and one extra for each additional five journeymen, with not more than four apprentices to a shop. None to be over 18 years of age when starting work.

Apprentices are to serve five years and for the last year they may work with the tools and shall receive one dollar a day less than regular rate. No steamfitter is to be allowed more than one helper.

Only union members are to be employed by the Master Plumbers' Association, and union members are to work only for the Association.

Wages are to be paid weekly.

In case of any grievance, the business agent is to call on employer to settle same; or a committee of from two to four from each party is to be appointed to settle same within a week.

### Transportation and Public Utilities

#### ST. JOHN, NEW BRUNSWICK.—CANADIAN PACIFIC RAILWAY COMPANY AND ELEVATOR EMPLOYEES AT WEST ST. JOHN.

Rates of pay and rules to be effective from November 1, 1923, until November 1, 1924, and thereafter subject to 30 days' notice from either party on or after October 1, 1924.

Hours of work from 7 a.m. to 5 p.m. for day work and from 7 p.m. to 5 a.m. for night work. Overtime or work during meal periods, time and one-half. Work on Sundays and holidays, double time.

Basic rate of pay, 50 cents per hour.

### Service: Public and Municipal

#### MEDICINE HAT, ALBERTA.—CITY COUNCIL, REPRESENTATIVES OF THE CITY OF MEDICINE HAT, AND CIVIC EMPLOYEES' FEDERAL LABOUR UNION, No. 46.

Agreement to be in effect from January 1, 1924, until December 31, 1924, and thereafter, unless amended, cancelled or substituted, as agreed upon, after 30 days' notice.

City Council shall appoint a committee upon proper notice being given, to receive a grievance committee from the union. The City Council and Heads of Departments shall not discriminate against employees because of connection with a trade union. Heads of Departments shall not solicit donations from employees for any purpose.

Monthly employees are to be paid for holidays. Sick leave, not exceeding one month, is to be granted to employees in service for at least six months on production of medical certificate.

Union members appointed as union delegates will be granted leave of absence without pay.

The secretary is to be sent a copy of all resolutions affecting the employees adopted at meetings of the Council.

The agreement applies only to employees at present employed by the city, or to those who may fill positions on permanent staff rendered vacant during the year. Senior men are to be given preference for promotion if efficient, in case of increase of staff, former employees who are returned soldiers are to have preference if efficient.

Employees working out of town are to be allowed reasonable expense allowance.

Hours for outside labour, October 1 to May 1, 8 a.m. to 5 p.m.; May 1 to October 1, 7.30 a.m. to 5 p.m., and to 1 p.m. on Saturdays; one hour for lunch. Two weeks' holidays with pay each year to outside men after twelve months' service, except in case of men employed by hour or day, who shall have overtime pay at rate of time and one-half.

In case of alterations in hours, pay or conditions, contrary to agreement, Council to confer with a committee of the Civic Union.

*City Treasurer's Department:* Hours, 8.30 a.m. to 5.30 p.m., five days; 1½ hours for lunch. Saturday, 8.30 a.m.-12 noon. Wages—per month—machine operator, bookkeeper, \$120; clerk, meter readers, \$110; stenographers, etc., \$70-\$85. Cashier's cage to be closed at 4.30 p.m., five days a week, Saturday at noon.

Wages of temporary men, \$100 per month, or \$4.50 per day. Permanent staff, fourteen days' leave with pay per year, after one year's service. \$25 to be allowed for meter reader's equipment.

*Police Department:* Hours, eight per day, six days per week. Certain clothing and equipment to be supplied. Leave of absence per year with pay after one year's service, sergeants and detective, eighteen days. In case of sickness or injuries through accident resulting from their employment, all ranks to be granted pay, less compensation, for period not exceeding sixty days.

Wages per month, constables, 1st class, \$125; 2nd class, \$115; 3rd class, \$107; sergeants and detective, \$135 and \$140; clerks and desk officer, \$10 extra per month.

*Public Works and Engineer's Department:* Hours, eight per day. Teamsters' hours, ten per day and nine on Saturday. Wages: per month, sub-foremen, \$130 and \$135; pipe fitter, \$125; pipe layer, \$115; janitor, \$110; stableman, \$100; street cleaners, \$75. Per hour—labourers, first year, 40 cents; thereafter, 50 cents. Teamsters, first year, 45 cents; thereafter, 50 cents.

*Sanitary Department:* Two weeks' leave of absence per year after one year's service. Wages: caretaker, Isolation Hospital, \$80 per month.

*Gas Department:* Hours, eight per day. Wages per month—pipe fitters, lamp repairers, \$120.

*Parks Department:* Hours per day, eight. Wages per month—parks foreman, \$125; cemetery caretaker, \$115 (and overtime pay); market cleaner, \$75. Labourers, \$4 per day.

## PRICES, RETAIL AND WHOLESALE, IN CANADA, APRIL, 1924

### Cost of Living, Prices of Staple Articles, and Index Numbers

THE movement in prices during the month continued downward, both the family budget in terms of retail prices and the various index numbers of wholesale prices being considerably lower than for March. The chief decreases were seasonal, but in both retail and wholesale prices the downward tendency appeared to be general.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of the average retail prices in about sixty cities in Canada at the beginning of April was \$10.16 as compared with \$10.58 for March, \$10.64 for April, 1923; \$10.26 for April, 1922; \$12.68 for April, 1921; \$16.92 for June, 1920 (the peak); \$15.99 for April, 1920; \$12.57 for April, 1918; and \$7.51 for April, 1914. The most important decline was in eggs, which showed a net fall of 27.6c. for the two dozen included in the budget. Butter, cheese, and bacon were also substantially lower while there were slight declines in the prices of milk, salt pork, lard, flour, sugar, rice, beans and prunes. Sirloin steak, shoulder roast of beef, and mutton advanced somewhat. Including the cost of fuel and rent with that of foods, the total budget averaged \$20.58 at the beginning of April as compared with \$21 for March; \$21.21 for April, 1923; \$20.66 for April, 1922; \$23.31 for April, 1921; \$26.92 for July, 1920 (the peak); \$25.34 for April, 1920; \$20 for April, 1918, and \$14.32 for April, 1914. Fuel was slightly lower, due to a decline in the price of coal. Rent showed little change.

In wholesale prices the index number calculated by the Dominion Bureau of Statistics based upon the average prices of 238 commodities in 1913 as 100, weighted according to the importance of the commodities, was again lower at 151.1 for April as compared with 154.3 for March; 156.9 for April, 1923; 153.7 for April, 1922; 180.8 for April, 1921; 256.9 for May, 1920 (the peak); 251.3 for April, 1920; and 198.2 for April, 1919. Twenty-four price quotations were higher, seventy-one were lower and one hundred and forty-one were unchanged.

In the grouping according to chief component material seven of the eight main groups averaged lower. The iron group advanced slightly. The vegetables group, the animals group, the wood group, and the non-ferrous metals group each showed substantial decreases, declines in the prices of flour, sugar, potatoes, dairy products, eggs, and non-ferrous metals being mainly responsible for the lower levels. The textiles group showed a

smaller decline, due to lower prices on cotton textiles and silk in spite of increased prices for raw cotton. The non-metallic minerals group and the chemicals group each showed slight declines, the former due to decreases in the prices of anthracite coal, glass, and salt.

In the grouping according to purpose both consumers' goods and producers' goods were lower. In the former group the decline was due chiefly to a decline in the index for foods caused by a fall in the prices for flour, milk, butter, cheese, sugar, and eggs. In producers' goods building and construction materials fell because of lower prices for pine, fir, and spruce lumber, white lead, linseed oil, and glass. Manufacturers' materials were also lower, due to declines in the prices of materials for the textile, the fur, the leather, the metal working and the chemical industries.

In the grouping according to origin domestic farm products fell because of decreases in the prices of dairy products and eggs. Articles of forest origin fell because of lower prices for lumber and wood pulp; and articles of mineral origin because of declines in the prices for non-ferrous metals, coal and glass.

The index number based upon prices of 271 commodities in 1890-1899 as 100 published by the Department of Labour since 1910 declined to 222.7 for April as compared with 224.5 for March; 227.4 for April, 1923; 225.0 for April, 1922; 253.7 for April, 1921; 356.6 for May, 1920 (the peak); 353.1 for April, 1920; 269.4 for April, 1918; and 136.7 for April, 1914. The principal declines occurred in eggs, butter, cheese, milk, oats, corn, flax, bran, shorts, potatoes, bananas, flour, sugar, raw silk, jute, bar iron, lead, anthracite coal, copper wire, white lead, and linseed oil, while wheat, barley, cattle, lard, dressed lamb, lemons, oranges, molasses, woollen yarn, raw cotton, nickle, quicksilver, bar silver, and binder twine showed the most important advances.

The index number published by the Department since 1910 has been reconstructed back to 1913, by the Dominion Bureau of Statistics, the new index being weighted and based upon the prices of 238 commodities in 1913.\* Ultimately the reconstructed index will be carried back to an earlier date, but in the meantime the Department will continue to calculate and publish the old series in summary form in the LABOUR GAZETTE in order to afford comparisons with price levels prior to 1913. For the detailed analysis from month

\*LABOUR GAZETTE, June, 1923, pp. 689-695.

to month, however, the new index number of the Bureau of Statistics will be used.

The accompanying tables give the index numbers of the Dominion Bureau of Statistics by the principal groups in the three methods of classification and with those of the classification according to purpose or use in detail. The index number of the Department of Labour is given by the principal groupings, but the sub-groups in detail shown monthly since 1912 are omitted. The special index number of 50 commodities described in the following paragraph is also given for the purpose of continuing the record.

The special index number comprising fifty of the more important commodities selected from the 271 in the Department list, including twenty foods, fifteen raw materials and fifteen manufactured goods, based upon price levels in 1913 as 100, declined to 150.3 for April as compared with 152.1 for March; 155.9 for April, 1923; 147.8 for April, 1922; 164.9 for April, 1921; 249.8 for April, 1920; 195.0 for April, 1918, and 101.0 for April, 1914. A seasonal decline in dairy products was mainly responsible for the lower levels reached, though prices of sugar, oilcloth, anthracite coal, and glass were substantially lower.

The index of wholesale prices in Canada published by the United States Federal Reserve Board, including thirty-three raw materials, twenty-eight semi-manufactured or producers' goods and thirty-eight finished or consumers' goods, based upon price levels in 1913 as 100, advanced to 148 for February as compared with 146 for January; 144 for December, 1923; and 152 for February, 1923. All groups were higher.

Professor Michell's index of wholesale prices based on forty articles, twenty foods and twenty manufacturers' goods, with prices during 1900 to 1909 as 100, declined to 173.9 for April as compared with 176.9 for March; 176.2 for April, 1923; 161.2 for April, 1922; 190.0 for April, 1921; and 268.4 for April, 1920. Foods declined slightly but manufacturers' goods advanced slightly.

The Bank of Commerce index of both exports and imports declined, the former from 150.30 for March to 145.82 for April, and the latter from 166.04 to 163.87. The combined index of exports and imports declined from 158.17 for March to 154.84 for April.

The table of retail prices and rentals shows the prices at the beginning of April of seventy-one staple foodstuffs, groceries, coal, wood and coal oil, and the rent for six-roomed houses in some sixty cities throughout Canada. All prices are for delivered goods. The exact quality, for which the quotation is given, is set forth in the case of each com-

modity, and every effort has been made to ensure that the quotations, in each case refer to the same class of commodity, in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Department and to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. The prices of fuel and the rates for rent are reported by the correspondents of the *LABOUR GAZETTE*.

Statistics similar to these were published each month from 1910 to 1920, the figures during this period being secured at the middle of each month by the correspondents of the *LABOUR GAZETTE* resident in each locality from dealers doing a considerable business with workmen's households. From 1910 to 1915 the table contained a list of only the twenty-nine foods included in the family budget, with laundry starch, coal, wood, coal oil and rent. In 1915, when monthly publication of the budget in the *LABOUR GAZETTE* was begun, it was decided to extend the list of foods to 40, and in 1920 the list of foods and groceries was still further extended to include over 100 items.

Beginning with October, 1922, a number of commodities were dropped from the list, and in the case of a number of articles the average prices of the grades most sold have been given, owing to the impossibility of securing prices for uniform grades for the various cities from month to month.

Oleomargarine was dropped in March, the provision for its manufacture and sale since 1917, notwithstanding the Dairy Act, expired at the end of February, 1924.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central, without modern conveniences.

The weekly budget of a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, these being the items for which statistics have been obtained each month and published in the *LABOUR GAZETTE* since January, 1910. The quantities of each commodity included are modification of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same

class. For instance, the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various classes of foods tends to be maintained. At times when the price of an article heavily weighted for this purpose rises (or falls) abnormally the increase (or decrease) in food prices so indicated is exaggerated, and this should be taken into account in using the budget as an indicator of changes in the cost of living. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. It was estimated, when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditures of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light and rent would be perhaps two-thirds or about sixty-five per cent of the total income.

While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were adopted as affording a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruits, fresh and canned vegetables, etc., so that comparative expenditure would be little changed.

#### Cost of Electric Current for Householder\*

With rates in 1913 as 100, index numbers of electric light rates were: 1900, 141.4; 1905, 135.6; 1910, 118.1; 1911, 113.4; 1912, 109.1; 1913, 100.0; 1914, 96.5; 1915, 90.8; 1916, 87.6; 1917, 87.2; 1918, 85.8; 1919, 85.8; 1920, 84.2; 1921, 84.9; 1922, 82.7; 1923, 79.5.

#### Retail Prices

Sirloin steak advanced from an average of 27.2c per pound in March to 27.7c in April. Prices in all provinces averaged higher. Round steak also was slightly higher, averaging 22.4c per pound in April as compared

with 22.1c in March. Prime rib roast advanced ½c per pound in the average of 20.7c. Shoulder roast rose from 14.5c per pound to 14.8c, the increase being fairly general. Stewing beef was slightly higher, averaging 11c per pound. Shoulder roast of veal was down from an average of 18.3c per pound in March to 18c in April. Mutton rose from an average of 26.9c per pound to 27.8c. Prices in nearly all provinces averaged higher. Fresh pork roast was unchanged in the average, increases in some localities being offset by declines in others. Salt pork fell from an average of 23c per pound in March to 22.8c in April. Bacon also showed a general decline, averaging 33.6c per pound as compared with 34.9c in March. Boiled ham fell from 56.4c. per pound to 55.7c. In fresh fish, cod and halibut were lower. Salt herrings advanced slightly. Lard was down from an average of 28.1c per pound in March to 21.4c in April.

Eggs showed a general decline, fresh averaging 32.4c per dozen in April as compared with 47.7c in March, 56.7c in February, and 61.3c in January and cooking averaging 28c per dozen in April as compared with 40.3c in March. Milk prices declined in Brockville, Belleville, Peterborough, St. Catharines, Brandon and Medicine Hat. Butter showed a decline in practically all localities, dairy averaging 41.2c per pound in April and 43.5c in March and creamery 46.1c per pound in April as compared with 49.1c in March. Cheese also was lower at 31.4c per pound.

Bread was unchanged in the average. Flour was slightly lower, averaging 4.1c per pound. Rolled oats showed little change. Tapioca advanced slightly to an average of 15c per pound. Canned vegetables were steady. Beans fell somewhat, averaging 8.4c per pound. Potatoes showed little change at an average of \$1.62 per 90 pounds as compared with \$1.61 in March. Evaporated apples were unchanged. Prunes fell from 16.3c per pound to 15.9c. Raisins and currants were practically unchanged. Raspberry jam was slightly lower at 97.1c per four-pound tin as compared with 98.8c in March. Marmalade and corn syrup showed little change. Granulated sugar was down from an average of 12.1c per pound in March to 11.9c in April and yellow sugar from 11.6c per pound in March to 11.4c in April. Coffee and tea were steady. Cream of tartar was up from an average of 64.7c. per pound in March to 65.7c in April.

Anthracite coal averaged lower at \$17.41 per ton in April as compared with \$17.71 in March. Prices were lower in Fredericton, St.

\*LABOUR GAZETTE, December, 1923, page 1442.

Hyacinthe, Belleville, Orillia, Toronto, St. Catharines, Galt, Guelph, Kitchener, St. Thomas and Timmins. Bituminous coal also declined, averaging \$10.88 in April as compared with \$11.08 in March. Lower prices were reported from Kingston, Orillia, St. Catharines, Kitchener, St. Thomas, Windsor, and Timmins. Hard wood, four feet long, showed little change in the average at \$12.49 per cord, the only decrease being at Charlottetown. Soft wood also showed little change at an average of \$9.19 per cord. Coal oil advanced slightly from an average of 30.6c per gallon to 30.9c in April.

An increase in rent was reported from Niagara Falls, an upward tendency having appeared recently. The inclusion of an additional city, Sarnia, also raised the averages for the Dominion and for the province of Ontario.

### Wholesale Prices

The following is a summary of a statement on prices changes during the month issued by the Dominion Bureau of Statistics.

Grain prices were on the whole fairly steady during April. Manitoba Northern wheat averaged 98½c per bushel as compared with 98c in March. Prices advanced from a low level of 95½c per bushel early in the month to 99½c toward the end. With the opening of navigation grain began to move in considerable quantities, but large available supplies prevented any marked advance in price. Barley rose from 61½c per bushel to 62½c, while oats fell from 37½c per bushel to 37½c and flaxseed from \$2.13½ per bushel to \$2.09½. Rolled oats were down from \$3 per 90-pound sack to \$2.80. Flour fell from \$6.30 to \$6.10 per barrel. Shorts also were lower at \$28.50 per ton. Linseed oil fell from \$1.20½ per gallon to \$1.11½, the reasons reported being the competition of imported oil and the reduction in the sales tax. Raw sugar declined from \$6.88 per hundred to \$5.85 and granulated sugar from \$9.74 to \$9.03 due to accumulated supplies at producing centres. Potatoes at Montreal declined from \$1.57½

per bag to \$1.25, while at Winnipeg they declined from \$1 per bushel to 95c. Bananas were down from \$5 per bunch to \$4.25. Oranges were higher. In cattle, choice steers at Toronto advanced from \$6.75 per hundred to \$7.12½, and choice butchers' cattle at Winnipeg from \$6.12½ to \$6.53. Hogs declined somewhat at Toronto, being \$8 per hundred in March as compared with \$7.87 in April. Bacon was down slightly at 22½c per pound. Dressed fowl rose from 20c per pound to 24c. Butter, eggs, and cheese also showed seasonal declines. Finest creamery butter at Montreal was down from 39c per pound to 31c and dairy prints at Toronto from 36c per pound to 32c. Cheese was 17c per pound as compared with 21c in March. Fresh eggs were 30c per dozen as compared with 34c in March. Raw cotton at New York advanced from 28½c per pound in March to 30½c in April. A buying movement commenced early in the month which carried the prices higher, but toward the latter part of the month the tendency was again downward. Manufactured cottons were lower, denim being down from 81c per pound to 75c and Saxony from 95½c per pound to 91½c. Raw silk continued to decline, being \$6.10 per pound as compared with \$6.55 in March. Binder twine advanced from 11½c per pound to 13½c, but because of the new sales tax regulations declined later to 12½c. White pine lumber at Toronto was down from \$52 per M to \$50, and box boards from \$35 per M to \$34. British Columbia fir fell from \$55 per M to \$52. Spruce sidings at St. John declined \$2 per M to \$23. Ground wood pulp continued to decline, being \$28-\$35 per ton in April as compared with \$30-\$37.50 in March. Non-ferrous metals were generally lower. Copper fell from \$16.20 per hundred to \$15.50, lead from \$8.90 per hundred to \$7.45, spelter from \$8.30 per hundred to \$7.75, and tin from 60c. per pound to 54c. Anthracite coal declined from \$12.57 per ton to \$12. Window glass was lower at \$4.80 per box as compared with \$5.13 in March. White lead was down from \$17.20 per hundred to \$16.95.

company houses at \$20; others \$45 and \$60. fFor new tenant \$30 and \$35 and \$20 and \$25. s. Vinegar sold extensively in bottles at higher prices than in bulk. φScottish coal. \*Mining company houses \$10.00-\$20.00; others \$35.00-\$40.00

## PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes give the latest information available as to the movement of prices in other countries as compared with Canada. The index numbers of retail prices are from official sources unless otherwise stated. The authorities for the wholesale prices index numbers are named in all cases.

Statistics received up to the beginning of May showed falling tendencies in wholesale prices in Great Britain, France, Finland, China, and in both Canada and the United States. In other countries of Europe and in South Africa and New Zealand prices showed an upward trend during the early months of the year. The only countries where a decline in the cost of living was in evidence were Great Britain, Finland, Netherlands, Switzerland, India, New Zealand (February), Canada and the United States.

### Great Britain

**WHOLESALE PRICES.**—The Board of Trade index number for March stood 0.9 per cent below the February level, being 165.4, or the same as it was in January. During March all foods declined 3.1 per cent, owing to declines in cereals and in meat and fish. Industrial materials rose 0.18 per cent the most noticeable changes being a decline in cotton and increases in other textiles and in metals and minerals other than iron and steel.

The *Economist* index number, on the base 100 in 1901-05 was 210.9 in March, a decline of 0.6 per cent from the level of the previous month. This decline, the first since the end of July last, was attributed to the slackening in trade noticeable after the early days of the year. Cereals and meat declined 1.7 per cent, and other food declined 1.8 per cent. Textiles advanced 0.4 per cent, the principal changes in the group being a drop in silk and a rise in flax. Minerals declined 1.7 per cent and the miscellaneous group declined 0.3 per cent. Prices at the end of April were at the level 210.8, an increase of 3.8 per cent in textiles being offset by a decline of 4.8 per cent in "tea, sugar, etc."

The *Statist* index number (in continuation of Sauerbeck's figures) declined during March 1.3 per cent, or from 138.8 at the end of February to 137.0 at the end of March. Each of the foodstuffs declined, the figure for foodstuffs declining 3.1 per cent. Of industrial materials, minerals and sundries declined while textiles advanced 3.2 per cent. All materials remained practically unchanged, declining about 0.07 per cent.

The *Times* index number on the base 100 in 1913, fell 2 per cent during March, to 169.0 at the end of the month. The largest declines during the month were in the groups of cereals, meat and fish, other food, and miscellaneous materials. Metals and minerals declined slightly; cotton remained at practically the same level; and other textiles advanced 5.5 per cent.

**COST OF LIVING.**—The Ministry of Labour index number declined 5 points or 2.8 per cent at April 1 from the level of a month previous, reaching 173 on the base 100 in July, 1914. Food fell 5 per cent to 167; rent at 147, clothing at 225 and sundries at 180, all showed no change; and fuel and light advanced 2½ points to 190.

### Austria

**COST OF LIVING.**—The official index number, on the base July, 1914 = 1, rose from 11,940 in February to 11,996 in March, or 0.5 per cent. Foods rose 0.8 per cent, clothing rose 2.8 per cent, heating and lighting declined 3.5 per cent, and rentals showed no change.

### Belgium

**WHOLESALE PRICES.**—The official index number of the Ministry of Industry and Labour, of which the base is 100 in April, 1914, rose from 580 in January to 642 in February, an increase of 10.7 per cent. All groups advanced with the exception of fuels and tar and its products which declined.

**COST OF LIVING AND RETAIL PRICES.**—The official index number of the cost of living (compiled by the Ministry of Industry and Labour) for a working class family of the lowest of the three categories for which the records are kept, namely, a family spending less than 20 francs per *quet* in a fortnight was, on the base 100 in 1921, 128.43 for February and 131.95 for January, increases of 5.4 per cent and 2.7 per cent for the respective months. All items of the budget showed increases. The budget for a middle class family with a moderate income rose 2.6 per cent to 128.37 in February and 0.5 per cent to 129.0 in March.

The official index number of retail prices of 56 articles in 59 localities, on the base 100 in April, 1914, rose from 480 in January to 495 in February and 510 in March.

### France

**WHOLESALE PRICES.**—The official index number of Statistique Générale, on the base 100

in July, 1914, rose 9.9 per cent in February to 555 and fell again 8.1 per cent to the level 510 in March, with the recovery of the franc. These changes were noticeable in the index numbers of all groups. All foods rose 9.8 per cent and then fell 6 per cent, while all materials rose 10.1 per cent and then fell 9.5 per cent, or below the January level.

**COST OF LIVING.**—The cost of living for Paris according to the Commission of Studies on the Cost of Living, on the base 100 in 1914, rose from 345 in the last quarter of 1923 to 365 in the first quarter of 1924, an increase of nearly 6 per cent. Foods rose nearly 7 per cent; clothing rose 5.1 per cent; heat and light rose 1.7 per cent; sundries rose 10 per cent; and rent showed no change.

### Germany

**WHOLESALE PRICES.**—The official index number of the Federal Statistical Office showing the trend of gold prices on the base 100 in 1913, was 117.3 for January, 116.2 for February, and 120.7 for March. The weekly index number for all commodities showed a steady advance week by week from the beginning of February until the beginning of April, the only interruption being a slight decline at the end of March. The monthly figures showed a rise in this period from January to March of 3.3 per cent in foods and 2.3 per cent in industrial materials. Goods produced showed no change while imported goods rose 12.3 per cent.

**COST OF LIVING.**—The official index number was quoted for March as 1.07 billion times the pre-war level. This gives the cost of living index number as in paper marks, on the base 1 in 1913-14. This was an increase of 2.9 per cent above the February level. During the latter half of March there was no change registered by any item of the budget. For the month, the indexes in billions were as follows: food, 1.20; heat and light, 1.51; rent 0.38; clothing, 1.49. (A billion here means one million million, as in Germany).

### Italy

**WHOLESALE PRICES.**—The index number of wholesale prices compiled by the Chamber of Commerce at Milan, rose 1.1 per cent during March to 549.34 on the base 100 in 1913. All foods rose 2.0 per cent and materials rose 0.8 per cent. Textiles fell in value considerably, and animal foods and miscellaneous vegetable foods fell slightly in value. All other groups rose during the month.

**COST OF LIVING.**—The index number of cost of living at Milan (July, 1920=100) rose

from 114.20 in January, to 115.41 in February. Foods declined from 113.48 to 113.13; heat and light declined from 85.93 to 84.17; and sundries rose from 122.42 to 134.32. Clothing showed no change at 92.07 and rent at 283.30.

### India

**COST OF LIVING.**—The official index number of the Bombay Labour Office on the base 100 in July, 1914, fell 2 points in February and 3 points in March, reaching the level of 153. During the two months all foods declined 7 points or 4.5 per cent to 147; fuel and lighting advanced 2 points or 1.2 per cent to 163; clothing advanced 5 points or 2.2 per cent to 229; and house rent showed no change, remaining at 165.

### China

**WHOLESALE PRICES.**—The index numbers of the Treasury Department's Bureau of Markets, showing the trend of prices at Shanghai, on the base 100 in February, 1913, fell 2 points or 1.25 per cent in March to 157.5. All groups declined considerably except metals, which advanced, and sundries, which showed no change.

### Japan

**WHOLESALE PRICES.**—The index number compiled by the United States Federal Reserve Board was published recently for the latter half of 1923 for the first time since the disaster of September. The accompanying table gives the index numbers by groups twice yearly since its inception, and by months since July last. It will be seen that the peak of high prices consequent on the disaster was reached in December and January, a decline having been noticed in February in all groups. The highest point in gold prices was reached in November. The exchange began to decline in December, with the result that gold prices ceased to advance although currency prices continued upward.

### United States

**WHOLESALE PRICES.**—The index number of the Bureau of Labour Statistics, on the base 100 in 1913, fell again two points in March to 150. The most marked declines for the period under review were in farm products and cloths and clothing. Foods, chemicals and drugs and house furnishing goods also declined; fuel and lighting and metals and metal products advanced slightly and building materials and the miscellaneous group showed no change.

Gibson's index number of wholesale prices of 22 foods rose from 76.1 in February to 77.0 in March, and fell again to 76.5 in April.

Bradstreet's index number of wholesale prices for May 1, totalled \$12.5568, a decrease of 0.8 per cent from April 1, and of 6.5 per cent from the high point of December last. Seven groups declined in the month of April,

\*The base is price in December, 1913=100. The figures are based on the weighted averages of consumption at the various rates charged.

five advanced, and one, chemicals and drugs, was steady. The groups declining were live stock, provisions, hides and leather, metals, oils, naval stores and building materials. Those advancing were breadstuffs, fruits, textiles, coal and coke, and miscellaneous products.

COST OF LIVING.—The official index number of Massachusetts, compiled by the Special Commission on the Necessaries of Life on the base 100 in 1913 fell 0.3 per cent during March to 150.2. Foods fell 0.6 per cent, and clothing 0.6 per cent. Fuel and light advanced slightly and shelter and sundries showed no change.

### Child Labour Law in United States

A proposed child labour amendment to the United States constitution was passed by the House of Representatives on April 26, by a vote of 297 to 69. The resolution reads as follows:—

Section 1. The Congress shall have power to limit, regulate, and prohibit the labour of persons under eighteen years of age.

Section 2. The power of the several States is unimpaired by this article except that the operation of State laws shall be suspended to the extent necessary to give effect to legislation enacted by the Congress.

### Medical Examination of Young Factory Workers

The British Home Secretary has appointed a committee to inquire into the working of the provisions of the Factory and Workshop Acts for the medical examination of young

persons as to their fitness for employment in factories, and to consider—

(a) Whether the existing requirements of a certificate of fitness, limited to a particular factory, should be modified; whether any other changes should be made in the examination and certificate, and what arrangements should be adopted for the future.

(b) What measures should be taken for linking up the examination of young persons under the Factory and Workshop Acts with their examination under the school medical inspection service, and, if considered desirable, with other public health services of the country.

(c) What arrangements could best be made for providing medical supervision of young persons (where such supervision is considered necessary by the Department) during employment in factories or processes where the conditions of work are unfavourable to health or physique.

## FATAL INDUSTRIAL ACCIDENTS DURING THE FIRST QUARTER OF 1924

**D**URING the first quarter of 1924, the Department received reports of 275 fatalities in the industries and trades of Canada, 94 of which occurred in January, 84 in February and 89 in March. The remaining 8 were due to accidents which occurred in the previous year. There were, therefore, 267 fatalities during the first quarter of 1924 as compared with 374 in the previous quarter and 307 in the corresponding quarter of 1923. In the transportation and public utilities group there were 61 accidents reported, of which 27 occurred on the steam railways and 23 in water transportation. There were 49 deaths due to industrial accidents in the logging industry, 46 in the manufacturing industries, 47 in mining, and 13 in agriculture.

Nineteen deaths were caused by machinery, 6 of these being accounted for by falls on saws, machines, etc. Eight deaths were due to infection, 5 were due to falls into elevator

shafts and four to being struck by elevators. Four fatalities occurred through being struck by buckets while hoisting, 4 to being struck by material falling from hoisting apparatus, and one was due to the fall of a hoist. Five deaths were due to explosions and three to burns caused by inflammable substances.

In addition to the industrial accidents, there were reported to the Department during the quarter three deaths among workmen due to syncope of the heart, one to acute indigestion which it was thought might have been caused by overwork, and one case of general septicæmia believed to have resulted from bur-sitis due to constant kneeling.

The following table of industrial accidents has been prepared from information received from all sources available. It does not, however, necessarily include all the industrial accidents that may have occurred.

### FATAL INDUSTRIAL ACCIDENTS DURING THE FIRST QUARTER OF 1924

Trade or Industry	Locality	Date	Age	Cause of Fatality
<b>AGRICULTURE—</b>				
Farmer.....	Chesley, Ont.....	Jan. 11	.....	Thrown from car ladder when engine shunted unawares.
Farmer's son.....	Dublin, Ont.....	" 18	.....	Kicked by a colt.
Farmer.....	Near Baltimore, Ont.....	" 22	.....	Struck by rack. Sleigh upset in snow-blocked road.
Farmer.....	Lestock, Sask.....	" 26	.....	Kicked by a horse.
Farmer.....	Delia, Alta.....	Feb. 14	.....	Gored by a bull.
Thresher.....	Omemee, Ont.....	" 29	.....	Crushed under threshing machine.
Farmer.....	Morell, P.E.I.....	Mar. 1	52	Struck by falling tree.
Farmer.....	Almonte, Ont.....	" 3	33	Crushed under load which upset when support gave way.
Farmer.....	Rapide de l'Original Que.	" 10	over 21	Roof of covered way fell in.
Farmer.....	Near Lindsay, Ont.....	" 16	.....	Kicked by a horse.
Farmer.....	St. Boniface, Que.....	" 18	60	Clothing caught in machinery.
Farmer.....	Duck Lake, Sask.....	" 18	45	Fell on to blade of power saw.
Farmer.....	Wetaskiwin, Alta.....	" 25	60	Fell from load.
<b>FISHING AND HUNTING—</b>				
Fisherman.....	Chester Bay, N.S.....	Feb. 29	.....	Fell from motor boat.
Fisherman.....	Portlock Banks, Alaska.	Mar. 3	27	Drowned when boat swamped in storm.
Fishermen (2).....	Barrington, N.S.....	" 11	.....	Drowned when skiff overturned.
<b>LOGGING—</b>				
Employee.....	Bolkow, Ont.....	Jan. 2	.....	Struck thumb with axe—gangrene.
Employee.....	Dean Lake, Ont.....	" 8	17	Struck by log.
Feller.....	Liverpool, N.S.....	" 8	65	Crushed by falling tree.
Labourer.....	Huntsville, Ont.....	" 10	19	Struck by falling tree.
Labourer.....	Nairn Centre, Ont.....	" 10	40	Frozen in blizzard.
Brakeman.....	Union Bay, B.C.....	" 12	38	Struck by log while unloading.
Teamster.....	Tabon, Ont.....	" 15	30	Kicked by a horse.
Labourer.....	Minaki, Ont.....	" 19	.....	Struck by tree.
Employee.....	Lake Saguenay, Que.....	" 19	22	Burned. Fell into reservoir of boiling water.
Labourer.....	Flanders, Ont.....	" 20	.....	Struck by tree.
Labourer.....	Gravenhurst, Ont.....	" 21	.....	Struck by tree.
Logger.....	Jura, B.C.....	" 21	60	Struck by log falling from load.
Feller.....	Ste. Sophie de Lévrard, Que.	" 21	.....	Struck by falling tree.

## FATAL INDUSTRIAL ACCIDENTS DURING THE FIRST QUARTER OF 1924 (Continued)

Trade or Industry	Locality	Date	Age	Cause of Fatality
Brakeman	Knox Bay, B.C.	" 21	27	Load upset while releasing hand brake.
Woodsmen	Portneuf Co., Que.	" 22	25	Struck by falling tree.
Logger	Chisholm, Alta.	" 23	48	Sliver in finger—infection.
Woodsmen (2)	Lake Superior—between Beaver and Garden Islands.	" 29	.....	Drowned while crossing ice.
Woodsmen	Near Ingersoll, Ont.	" 30	73	Struck by limb of tree.
Tie maker	Alert Bay, B.C.	" 31	36	Struck by falling tree.
Logger	Ocean Falls, B.C.	Feb. 5	39	Drowned. Fell into water while pulling logs from float.
Chopper	Westchester, N.S.	" 6	.....	Struck by falling tree.
Labourer	Flanders, Ont.	" 6	40	Struck by tree.
Labourer	Blunden Harbour, B.C.	" 6	38	Struck by flying snag.
Tie maker	Yahk, B.C.	" 8	22	Struck by falling tree.
Bull cook	Alert Bay, B.C.	" 8	26	Drowned. Fell into water while sawing wood on float.
Woodsmen	Port Arthur, Ont.	" 13	.....	Struck by falling tree.
Logger	Blunden Harbour, B.C.	" 15	24	Struck by flying cable.
Loader	Duncan, B.C.	" 18	23	Struck by log while loading.
Woodsmen	Parkdale (Lunenburg Co.), N.S.	" 20	60	Struck by falling tree.
Sawyer	Swan River, Man.	" 20	60	Slipped and fell on saw.
Woodsmen	North Marysburg, Ont.	" 22	43	Struck by falling tree.
Logger	Waldo, B.C.	" 23	27	Struck by log while loading.
Feller	Lake Cowichan, B.C.	" 25	35	Struck by falling limb.
Employee	Buckley Bay, B.C.	" 26	.....	Drowned during storm while bringing boat from boom.
Employee	Vancouver, B.C.	" 28	.....	Struck by lumber when brake on winch slipped.
Signal man	Deep Bay, B.C.	" 28	18	Struck by falling snag.
Woodsmen	Le Pas, Man.	" 29	60	Crushed by falling tree.
Logger	Bainbridge, B.C.	" 29	40	Struck by falling limb.
Logger	Cumshewa Inlet, B.C.	Mar. 1	29	Crushed by rolling log.
Logger	Port Alberni, B.C.	" 1	.....	Struck by falling branch.
Woodsmen	Charlottetown, P.E.I.	" 7	.....	Struck by falling tree.
Woodsmen	Plymouth, N.S.	" 10	42	Fell while carrying timber—crushed.
Cook	Elmvale, Ont.	" 10	58	Sliver in thumb—infection.
Logger	Bowser, B.C.	" 20	.....	Struck by falling tree.
Labourer	Flanders, Ont.	" 24	29	Struck by tree.
Logger	East Wellington, B.C.	" 27	33	Struck by falling tree.
Log drivers (2)	Montmagny, Que.	" 30	16, 28	Drowned.
Logger	Courtney, B.C.	" 31	23	Struck by falling snag.
<b>MINING, NON-FERROUS SMELTING AND QUARRYING—</b>				
<i>Metalliferous Mining:</i>				
Miner	Cobalt, Ont.	Jan. 6	.....	Crushed between skip and shaft timbers when conveyance dumped, wrong signal being given.
Brakeman	Anyox, B.C.	" 7	35	Crushed between train and guard rail.
Timberman	Rossland, B.C.	" 9	43	Fell down slope when section of floor gave way.
Trammer	South Porcupine, Ont.	" 11	34	Struck by car.
Labourer	Creighton Mines, Ont.	" 17	.....	Explosion.
Labourer	South Porcupine, Ont.	" 22	.....	Struck by another workman.
Labourer	Silver Centre, Ont.	Feb. 15	.....	Fell down shaft.
Labourer	Indian Mine, near Stewart, B.C.	" 18	38	Struck by falling tree.
Miner	Schumacher, Ont.	Mar. 7	.....	Caught by skip.
Miner	Guibord, Ont.	" 13	26	Struck by bucket.
Miner	Matheson, Ont.	" 20	.....	Fell down shaft.
Driller	Garson, Ont.	" 28	34	Fell down mine shaft.
<i>Coal Mining:</i>				
Miner	East Wellington, B.C.	Jan. 17	37	Crushed by runaway trip of cars.
Stableman	East Wellington, B.C.	" 29	65	Struck by runaway trip of cars.
Shiftman	Joggins, N.S.	" 30	55	Fall of stone.
Machine runners (2)	Drumheller, Alta.	Feb. 6	.....	Asphyxiated—fall of rock from roof.
Miners (4)	Inverness, N.S.	" 7	.....	Crushed by fall of coal.*

\*See Labour Gazette, April, page 283.

## FATAL INDUSTRIAL ACCIDENTS DURING THE FIRST QUARTER OF 1924 (Continued)

Trade or Industry	Locality	Date	Age	Cause of Fatality
<b>MINING NON-FERROUS SMELTING AND QUARRYING—</b>				
<i>Concluded</i>				
Miner.....	Hillcrest, Alta.....	" 7	51	Struck by rock.
Miners (2).....	Louisburg, N.S.....	" 25	.....	Fall of coal.
Miner.....	Coleman, Alta.....	" 29	53	Fall of coal.
Miner.....	Canmore, Alta.....	Mar. 3	44	Fall of roof rock.
Miner.....	Wakesiah Mine, B.C.....	" 4	38	Caught by bar of machine.
Miners (2).....	Sterco, Alta.....	" 5	.....	Fall of coal.
Miner.....	Michel, B.C.....	" 14	over 21	Struck by falling coal.
Miner.....	Glace Bay, N.S.....	" 14	.....	Fall of stone—crushed.
Miner.....	Springhill, N.S.....	" 20	59	Fall of coal—crushed.
Miner.....	Westville, N.S.....	" 20	48	Fall of coal.
Pipemen's helper...	Lethbridge, Alta.....	" 24	26	Derailement of cars. Grip flew off when cable slackened then tightened.
Miner.....	Lantzville, B.C.....	" 27	23	Fall of roof rock.
Box car loader.....	Coalspur, Alta.....	" 29	.....	Crushed between cars.
<i>Non-metallic Mining and Quarrying:</i>				
Labourer at gravel pit.	Amos (Pontiac Co.), Que.	Jan. 1	.....	Premature explosion while blasting.
Labourer (municipal).	Near Fergus, Ont.....	" 7	19	Struck by pick.
Workman at gravel pit.	Maple Ridge, Ont.....	Feb. 16	21	Struck by falling frozen earth.
Workman at gravel pit.	Near Staynerville Station, Que.	" 19	26	Crushed under falling gravel.
Miner at soapstone quarry.	Pontbriand, Que.....	" 19	21	Struck by falling rock.
Workman at gravel pit.	North Easthope, Ont...	Mar. 3	.....	Cave in.
Loader at gravel pit	Near Leamington, Ont..	" 3	.....	Cave-in.
Teamster at gravel pit.	Tralee, Ont.....	" 12	21	Projected part of bank caved in.
Mine worker.....	Asbestos, Que.....	" 25	over 21	Died following operation (no further particulars).
<i>Clay Products and Structural Materials</i>				
Employee at cement plant.	Montreal East, Que.....	Jan. 30	40	Suffocated under rock slide.
Employee at cement plant.	Tod Inlet, B.C.....	Mar. 27	45	Crushed by truck when lifting tackle broke.
<b>MANUFACTURING—</b>				
<i>Vegetable foods, drink and tobacco:</i>				
Driver for bakery..	Quebec, Que.....	Jan. 25	.....	Thrown against pole when wagon overturned.
Baker.....	St. Thomas, Ont.....	Mar. 10	.....	Smothered. Fainted and fell into dough mixer.
<i>Animal edible products:</i>				
Dairyman.....	Edmonton, Alta.....	Jan. 3	61	Cut hand on can—infection.
Employee at butcher shop.	Montreal, Que.....	Mar. 11	23	Burned by explosion at artificial ice plant.
Night watchman at packing plant.	Toronto, Ont.....	" 28	42	Fell down elevator shaft.
<i>Textiles:</i>				
Foreman at blanket factory.	Dundas, Ont.....	Jan. 25	29	Cut finger—lockjaw.
Carder at wollen mill.	Arnprior, Ont.....	Mar. 10	46	Fell on head on machine.
<i>Pulp, paper and paper goods:</i>				
Employee at pulp mill.	Campbellford, Ont.....	Jan. 3	50	Struck by propellor while adjusting belt.
Labourer at paper mill.	Smooth Rock Falls, Ont.	" 10	20	Caught in shafting.
Labourer at pulp mill.	Ottawa, Ont.....	" 31	40	While clearing ice from flume rope broke and ice gave way—drowned.
Rigger at paper mill	Kenora, Ont.....	Feb. 25	.....	Struck by roll of paper.
Labourer at pulp-wood camp.	Near Lake Shebandowan, Ont.	" 12	45	Struck by falling tree.

## FATAL INDUSTRIAL ACCIDENTS DURING THE FIRST QUARTER OF 1924 (Continued)

Trade or Industry	Locality	Date	Age	Cause of Fatality
<i>MANUFACTURING—Con.</i>				
<i>Pulp, Paper, etc.—Con.</i>				
Labourer at paper mill.	Ottawa, Ont.....	Mar. 14	26	Thrown against post in attempt to stop water wheel.
Labourer.....	St. Casimir, Que.....	" 31	70	Caught under pile of pulpwood which had been loosened by dynamite.
<i>Saw and planing mills:</i>				
Employee.....	Stewiacke River, N.S..	Jan. 1	65	Coat belt caught in pulley.
Labour.....	Dollarton, B.C.....	" 3	45	Drowned. Fell off boom.
Employee.....	Vancouver, B.C.....	" 21	49	Struck by saw carriage and carried against rolls.
Proprietor.....	Fort William, Ont.....	" 22	24	Backed against machine and caught in revolving saw.
Mill worker.....	St. John, N.B.....	" 25	73	Log fell on foot—infection.
Edgerman.....	Advocate Harbour, N.S.	" 29	.....	Pulley burst. Struck by piece of flying wood.
Mechanic.....	St. Francois, Que.....	Feb. 11	27	Caught in belt.
Employee.....	St. Romuald, Que.....	" 11	17	Caught in belt.
Machine feeder.....	The Pas, Man.....	" 20	22	Shock from kick-back of wood when feeding rip saw.
Sawyer.....	Swan River, Man.....	" 20	52	Fell on circular saw.
Employee.....	Barrhead, Alta.....	Mar. 1	19	Caught between belt and shaft.
Employee.....	St. Jean de Dieu, Que..	" 6	.....	Clothing caught while placing belt on moving machinery.
Night watchman...	Port Greville, N.S.....	" 6	23	Scalded when blow-off of boiler loosened.
Proprietor.....	Alexandria, Ont.....	" 7	.....	Struck by board flung from saw.
Sawyer.....	Lachine, Que.....	" 12	19	Struck by piece of saw.
Employee.....	near Priceville, Sask...	" 21	.....	Fell against saw.
<i>Wood products:</i>				
Painter at sash factory.	Vancouver, B.C.....	Feb. 7	45	Fell from scaffold when jack plate broke.
Teamster for cooperage company.	Wallaceburg, Ont.....	" 28	25	Crushed by log which slipped from load.
<i>Iron, steel and products:</i>				
Employee at railway shop.	Montreal, Que.....	Jan. 21	56	Collapsed while at work.
Employee of sewing machine factory.	Highwater, Que.....	Feb. 1	35	Scalds and later blood poisoning. Fell with plank being dropped into vat of boiling water.
Blacksmith's helper	Algoma, Ont.....	" 4	24	Slipped while oiling shaft, caught lever and put machinery into gear. Crushed in machinery.
Labourer at steel plant.	Hamilton, Ont.....	" 13	58	Crushed between car and coal bucket when cable snapped.
Pipe fitter.....	Sydney, N.S.....	" 14	.....	Fell from ladder.
Employee at hardware factory.	Montreal, Que.....	" 14	64	Crushed when laden hoist tilted and fell.
Oilier at rolling mill	Montreal, Que.....	" 28	21	Caught in revolving shafting.
Labourer at steel plant.	Sault Ste. Marie, Ont..	Mar. 5	.....	Struck by train.
Boilermaker's helper.	Westmoreland Co., N.B.	" 8	55	Electrocuted while handling electric lamp.
Carman.....	Hamilton, Ont.....	" 10	31	Fell on machine.
Employee at iron works.	Toronto, Ont.....	" 13	.....	Crushed by falling boiler plate.
Labourer at steel plant	Toronto, Ont.....	" 15	.....	Crushed by elevator.
<i>Non-metallic mineral products:</i>				
Workman at lime kiln.	Montreal, Que.....	Mar. 15	41	Burned. Fell into kiln while putting stones in furnace.
<i>Chemical and allied products:</i>				
Pipefitter at oil works.	Sarnia, Ont.....	Feb. 11	59	Burned. Oil in pipe ignited.
<i>CONSTRUCTION—</i>				
<i>Building:</i>				
Plumber.....	St. Catharines, Ont....	Jan. 9	.....	Explosion while installing tank, believed due to mixture of air with gasoline used for cleaning tank.
Labourer.....	Quebec, Que.....	" 18	15	Fell down elevator shaft when elevator started unawares.
Elevator builder...	Montreal, Que.....	" 19	49	Struck by descending elevator.

## FATAL INDUSTRIAL ACCIDENTS DURING THE FIRST QUARTER OF 1924 (Continued)

Trade or Industry	Locality	Date	Age	Cause of Fatality
Foreman.....	Weston, Ont.....	" 29	43	Fell while removing hoisting tower.
Painter.....	Hamilton, Ont.....	Feb. 1	.....	Infection. Ran nail into foot.
Labourer.....	Montreal, Que.....	" 2	.....	Fell down elevator shaft. Misunderstood signal.
Painter.....	Toronto, Ont.....	" 19	72	Fell off trestle.
Builder.....	St. Catharines, Ont.....	Mar. 12	48	Fell when ladder slipped.
Slater.....	New Westminster, B.C.	" 18	60	Fell from scaffold.
House mover.....	Parkland, Alta.....	" 12	26	Struck by bricks from chimney.
<i>Railway construction:</i>				
Bridgeman.....	Montreal, Que.....	Feb. 11	55	Struck by bucket of coal elevator.
Bull cook.....	Glacier, B.C.....	" 13	57	Run over by engine.
Tunnel worker.....	Revelstoke, B.C.....	" 15	.....	Run over by engine.
<i>Shipbuilding:</i>				
Employee at ship repairing yard.	Vancouver, B.C.....	Jan. 23	.....	Run over by backing truck.
<i>Miscellaneous construction:</i>				
Bridgeman.....	near Cardinal, Man.....	Jan. 9	38	Thrown to ground when falling pile struck bridge scaffold.
Driller.....	Queenston, Ont.....	" 19	35	Fell off cliff.
Workmen at dam (2)	Roberval, Que.....	Feb. 2	40, 42	Explosion when thawing dynamite.
Employee of power company.	La Gabelle, Que.....	" 8	19	Slipped on crushed stone and fell from car.
Workman at dam ..	St. Joseph d'Alma, Que.	" 20	over 21	Premature explosion.
Workman at dam ..	St. Alban (Portneuf Co.) Que.	Mar. 6	over 21	Drowned. Fell from dam when struck by cable.
Foreman at bridge construction.	Aberdeen, Ont.....	" 5	65	Bridge collapsed.
Labourer.....	Hemming's Falls, Que..	" 20	40	Struck by derrick basket which descended unawares.
Labourer.....	St. Catharines, Ont.....	" 24	.....	Struck by falling ice.
Labourer.....	Thorold, Ont.....	" 24	.....	Struck on head by rod.
TRANSPORTATION AND PUBLIC UTILITIES—				
<i>Steam Railways:</i>				
Section labourer....	Rainy River, Ont.....	Jan. 3	36	Run over by train.
Brakeman.....	Undora, Sask.....	" 10	33	Fell in front of train.
Switchman.....	Redditt, Ont.....	" 21	56	Run over by train.
Sectionman.....	Matapédia Sd., Que.....	" 20	42	Train struck speeder.
Conductor.....	Cartier, Ont.....	" 26	51	Struck by engine.
Section foreman....	Washago, Ont.....	" 28	.....	Burned in wreck of snowplow.
Trainman.....	Stephen, B.C.....	Feb. 4	22	Fell from top of train while shunting.
Section labourer....	Labelle, Que.....	" 8	32	Run over.
Labourer.....	Montreal West, Que.....	" 13	19	Fell between cars and run over.
Conductor.....	Falding, Ont.....	" 14	45	Run over.
Trainman.....	Brampton, Ont.....	" 16	35	Fell off side of car.
Sectionman.....	Pickernel Landing, Ont..	" 16	29	Train struck velocipede.
Caretaker.....	Moulinette, Ont.....	" 20	68	Run over.
Brakeman.....	Mimico, Ont.....	" 21	23	Derailment.
<i>Steam Railways:</i>				
Snow shovellers (3)	Mimico, Ont.....	Feb. 23	29, 25, 40	Struck by shunting car which slipped on icy rails.
Yardman.....	Fort William, Ont.....	" 25..	30	Fell between cars.
Engineer.....	Kamloops, B.C.....	" 25..	.....	Engine overturned when it struck rock-slide.
Foreman.....	Montreal, Que.....	" 27..	42	Slipped and fell under wheels.
Car inspector.....	Hamilton, Ont.....	Mar. 12..	31	Crushed between drawbars.
Yardman.....	Windsor, Ont.....	" 12..	36	Crushed by cars while coupling.
Watchman.....	Shaunavon, Sask.....	" 14..	21	Stepped in front of engine during blizzard.
Conductor.....	Pyramid, B.C.....	" 14..	40	Run over.
Brakeman.....	Montreal, Que.....	" 14..	42	Fell when jumping from car ladder to platform—run over.
Sectionman.....	M. 50 Thompson Sd. B.C.	" 16..	44	Train struck velocipede.
Fireman.....	Waubaushe, Ont.....	" 28..	35	Struck by side rod when rerailing engine.
<i>Electric Railway:</i>				
Street car conductor	Sandwich, Ont.....	Mar. 22..	.....	Fell between cars—crushed.
Lineman.....	Grimsby, Ont.....	" 31..	.....	Struck by train.
<i>Water transportation:</i>				
Crew of schooner (8).	Between Louisburg, N.S. and Newfoundland.	Jan. 8..	.....	Left Dec. 31—missing, thought drowned.
Deckhand.....	Proctor Slip, B.C.....	" 17..	18	Drowned. Fell from barge.

## FATAL INDUSTRIAL ACCIDENTS DURING THE FIRST QUARTER OF 1924 (Continued)

Trade or Industry	Locality	Date	Age	Cause of Fatality
<b>TRANSPORTATION AND PUBLIC UTILITIES—</b>				
<i>Concluded</i>				
Longshoremen (2) ..	Vancouver, B.C. ....	" 18..	20, 45	Board sling caught and unshipped iron beam which fell on men below.
Longshoreman.....	Vancouver, B.C. ....	" 20..	33	Struck by sling load which was released by winchman.
Seaman.....	Off Liverpool, N.S. ....	" 21..	.....	Fell overboard, boat lurched as he let go of wheel during storm.
Seaman on oil tanker.	Esquimalt, B.C. ....	" 25..	.....	Drowned. Believed to have been overcome by gas and to have fallen through opening.
Longshoreman.....	St. John, N.B. ....	Feb. 6..	35	Struck by sling of deals.
Longshoreman.....	St. John, N.B. ....	" 16..	.....	Fell into hold of steamer when cross beam collapsed.
Labourer.....	Vancouver, B.C. ....	" 23..	29	Struck by lumber.
Longshoreman.....	Vancouver, B.C. ....	Mar. 1..	58	Fell off sugar pile.
Watchman.....	Vancouver, B.C. ....	" 2..	77	Fell through hatch hold.
Workman on scow..	Welland Canal, Ont. ....	" 3..	.....	Struck by snow and ice from deck and thrown to bottom of scow.
Longshoreman.....	St. John, N.B. ....	" 6..	28	Drowned. Knocked off staging when truck moved.
Longshoreman.....	St. John, N.B. ....	" 17..	46	Fell into hold of steamer when hatch cover collapsed.
Mate on dredge.....	Quebec, Que. ....	" 26..	40	Fell from arm of crane while doing repair work.
<i>Storage and Local Transportation:</i>				
Foreman with storage company.	Windsor, Ont. ....	Jan. 2..	.....	Arm caught in elevator.
Express driver.....	St. Catharines, Ont. ....	" 7..	67	Foot crushed by box.
Driver.....	Montreal, Que. ....	" 19..	48	Cut on leg—infection.
Driver of auto truck	Colborne, Ont. ....	" 23..	18	Train struck truck.
Driver.....	Montreal, Que. ....	Feb. 20..	14	Crushed under load of kindling when wagon upset.
Carter.....	Hereford, Que. ....	Mar. 15..	.....	Crushed under load of logs.
Delivery chauffeur.	Montreal, Que. ....	" 21..	18	Struck by train.
<i>Telegraph and Telephone:</i>				
Foreman with telephone company.	Sydney, N.S. ....	Jan. 26..	.....	Fell from pole.
<i>Public utilities, n.e.s.:</i>				
Employee with power commission.	Port Arthur, Ont. ....	Jan. 27..	.....	Struck by falling pole.
<b>SERVICE—</b>				
<i>Public and municipal, n.e.s.:</i>				
Fireman.....	Quebec, Que. ....	Jan. 4..	36	Wall collapsed while fighting fire.
Constable.....	Bull River, B.C. ....	" 11..	54	Fell on icy steps breaking leg—blood poisoning.
<i>Domestic and Personal:</i>				
Cook at hotel.....	Warton, Ont. ....	Jan. 6..	.....	Clothing ignited while singeing goose.
<b>TRADE—</b>				
<i>Wholesale:</i>				
Labourer.....	Toronto, Ont. ....	Jan. 18..	28	Hernia.
<i>Retail:</i>				
Automobile salesman.	Toronto, Ont. ....	Mar. 21..	.....	Struck by train.
<i>Recreational:</i>				
Fireman at theatre.	Toronto, Ont. ....	Feb. 15..	.....	Fell downstairs.
<b>MISCELLANEOUS—</b>				
Messenger.....	Vancouver, B.C. ....	Jan. 1..	39	Struck by automobile.
Labourer.....	Red Deer, Alta. ....	" 3..	40	Fell from bridge.
Labourer.....	Granite Falls, B.C. ....	" 3..	56	Struck by falling planks.
Night watchman...	Montreal, Que. ....	" 8..	50	Fell down elevator shaft.
Messenger.....	Montreal, Que. ....	" 10..	17	Crushed between wall and elevator floor.
Hospital employee.	Montreal, Que. ....	" 15..	65	Fell down elevator shaft.

## FATAL INDUSTRIAL ACCIDENTS DURING THE FIRST QUARTER OF 1924 (Concluded)

Trade or Industry	Locality	Date	Age	Cause of Fatality
Battery repairer....	Montreal, Que.....	" 16..	18	Burned. Explosion of plumber's gasoline torch.
Labourer.....	Vancouver, B.C.....	" 23..	56	Caught on truck wheel and run over.
Operator at electric plant.	Windsor, Ont.....	Feb. 2..	20	Cut finger—infection.
Superintendent....	Rosedale, Alta.....	" 12..	47	Stepped in front of train.
Labourer.....	Vancouver, B.C.....	" 29..	40	Clothing caught on winch.
Foreman.....	Chisholm, Alta.....	Mar. 1..	22	Crushed between engine and drum.
Workman.....	Hectanooga, N.S.....	" 8..	.....	Crushed by horse in stall.
Electrician.....	Sherbrooke, Que.....	" 22..	.....	Electrocuted.
Ice cutters (2).....	Rivière du Sud, Que....	" 31..	.....	Drowned. Carried adrift on block of ice.

## SUPPLEMENTARY LIST OF FATAL INDUSTRIAL ACCIDENTS OCCURRING DURING 1923

Trade or Industry	Locality	Date	Age	Cause of Fatality
Woodsman.....	Near Owen Sound, Ont.	Jan. 11..	35	Struck by falling tree. Died Jan. 7, 1924.
Section labourer.....	Brandon, Man.....	Mar.....	.....	Ruptured. Died following operation, March 9, 1924.
Chauffeur.....	Salmo, B.C.....	May 12..	41	Car upset when road gave way at sharp turn.
Cook.....	Montreal, Que.....	Aug. 20..	29	Clothing ignited while leaning against gas stove. Died March 29, 1924.
Carpenter.....	Brantford, Ont.....	Sept. 1..	55	Fell off derrick.
Employee of lumber company.	Sault Ste. Marie, Ont...	Oct. 5..	.....	Caught in shafting.
Section hand.....	Kwinitiza, B.C.....	Dec.....	.....	Body found in mud bank Feb. 23, 1924.
Bricklayer.....	Toronto, Ont.....	" 27..	77	Bruised knee—sepsis.

## IMMIGRATION TO CANADA DURING FIRST QUARTER OF 1924

THE following table compiled from information furnished by the Department of Immigration and Colonization gives some details respecting the total number of immigrants into Canada during the first quarter of 1924. For purposes of comparison the figures for the previous quarter and for the corresponding quarter of 1923 are also given.

The table on page 454 gives the nationality, sex, occupation and destination of all immigrants, who entered Canada during the quarter under review.

## IMMIGRATION TO CANADA DURING THE FIRST QUARTER OF 1924

Period 1924	Great Britain and Ireland	U.S.A.	Other Countries	Totals
January.....	1,044	852	2,446	4,342
February.....	1,865	999	3,242	6,106
March.....	5,883	1,423	6,126	13,432
First Quarter, 1924.....	8,792	3,274	11,814	23,880
Fourth Quarter, 1923.....	12,166	4,266	13,915	30,347
First Quarter, 1923.....	5,983	3,027	3,630	12,640

# THE LABOUR GAZETTE

PREPARED AND EDITED IN  
THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

VOLUME 24]

JUNE, 1924

[NUMBER 6

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

**I**N addition to the regular monthly articles this issue of the *LABOUR GAZETTE* contains a reprint of a Dominion Order in Council under which representatives of the provinces, municipalities, employers and workmen are invited to a conference at Ottawa next September on methods of reducing unemployment during the coming winter; an account of action taken in the House of Commons in reference to old age pensions, and in reference to the 8-hour working day and other subjects of draft conventions of the League of Nations International Labour Conference; an outline of recent legislation in Ontario and New Brunswick, and other special articles.

### Monthly summary

The offices of the Employment Service of Canada reported a considerable gain in the volume of business transacted during April as compared with the previous month, but the number of applications for work, vacancies and placements were less than in the corresponding period a year ago.

The average cost of a weekly family budget of twenty-nine staple foods was \$9.89 at the beginning of May as compared with \$10.16 for April; \$10.36 for May, 1923; \$10.22 for May, 1922; \$12.25 for May, 1921; \$16.65 for May, 1920; \$12.66 for May, 1918, and \$7.43 for May, 1914. In wholesale prices the index number calculated by the Dominion Bureau of Statistics based upon prices in 1913 as 100 stood at 150.6 for May as compared with 151.1 for April; 155.2 for May, 1923; 153.9 for May, 1922; 171.4 for May, 1921; 256.9 for May, 1920 (the peak), and 201.2 for May, 1919.

The time loss due to industrial disputes during May was greater than in the previous month or in the same month last year though the number of disputes was smaller. Eleven disputes began or were in progress during the month, affecting 8,531 employees and involving a time loss of 218,428 working days. Cor-

responding figures for the previous month were 14 disputes involving 9,286 employees and a time loss of 215,234 working days; and for May, 1923, 39 disputes, 4,767 employees, and 53,891 days.

### Industrial Disputes Investigation Act

The Department received

four applications during May for the establishment of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act, 1907.

### Industrial conditions in Nova Scotia coal mines

Reference was made in the February issue of the *LABOUR GAZETTE* to the agreement which was made on February 11, in Montreal, between representatives of the British Empire Steel Corporation, operating coal mines in Nova Scotia, and the coal miners in their employ who held membership in the United Mine Workers of America. The coal miners were represented in these negotiations by Messrs. Silby Barrett and Robert Baxter, provisional officers of District 26, U.M.W.A., Andrew Steele, personal representative of Mr. John Lewis, President of the U.M.W.A., and Mr. George Dalrymple, of the U.M.W.A. field force. A referendum vote on the foregoing agreement was taken in the month of March. The result showed a large majority vote against acceptance of the agreement. The increased wage rates provided for in the February agreement were put into effect and operations in the British Empire Steel Corporation's mines have continued since on this basis. In view, however, of the continuance of labour unrest Mr. J. C. Watters, of Caledonia Mine, C.B., former President of the Trades and Labour Congress of Canada, was appointed by the Minister of Labour in April to make a survey of the entire field of coal mining operations in Nova Scotia for the purpose

of ascertaining the existing conditions and to assist by advice or otherwise in reconciling any differences which were found to exist. Mr. Watters' investigation continued for a period of one month, during which time he visited the various coal fields both of Cape Breton and the Nova Scotia mainland, and consulted with the coal miners and officers representing the employers.

**Bill to amend Industrial Disputes Investigation Act**

The introduction in the House of Commons of a bill to amend the Industrial Disputes Investigation Act, 1907, was noted in the LABOUR GAZETTE for April (page 273). The bill, which had passed the House of Commons without a division, was introduced in the Senate on April 1 by the Honourable R. Dandurand, and passed the second reading on May 7. The bill was subsequently, on June 4, referred to the Senate's committee on Railways, Telegraphs and Harbours, on the suggestion of the Honourable G. D. Robertson, ex-minister of labour, who suggested that this course would enable parties interested in the proposed amendments to express their views. In support of his proposal he read a letter addressed to himself, and signed by representatives of 140,000 organized railway employees in Canada, with reference to the amending bill (number 7). This letter was in part as follows:—

Although you have on several occasions clearly set forth in the Senate the views of labour on the principles of this legislation, as well as on the proposed amendments in Bill 7, it may be of interest to you to have at hand the opinions of the representatives of labour in Canada affected by this legislation.

It is not necessary at this time to refer in detail to the history of the legislation or the chief reasons for its enactment. Suffice it to say that during the time the act has been in operation labour has generally accepted the principles of the Act and has co-operated in giving effect to its chief purpose "to aid in the prevention and settlement of strikes and lock-outs in industries connected with public utilities." Generally speaking, this co-operation has continued, notwithstanding the fact that for many years the measure did not find popular favour among a large number of the workers affected. However, believing that in the public interest some legislative machinery should operate to insure ample opportunity for investigation and conciliation in industrial disputes, labour has gradually adapted itself to the principles and legal process of the Act, and is further willing that it should be continued, provided that its operation is made equitable to all concerned.

It would seem that during the discussion on this subject there has not been sufficient emphasis placed upon one of the fundamental principles of the Act, namely, conciliation. In order to maintain this spirit of conciliation before a board there should be equality of treatment under the Act. It is the adoption and acceptance of this principle by all parties concerned, both in the application for and subsequent to the appointment of a board, which is essential to the

effective carrying out of, and wholesome respect for, the Act.

That the Act has not always been used equitably in the matter of disputes between employers and workmen, because of unfair advantage being taken by employers of an omission inadvertently made in section 58, thus enabling employers to force changed conditions of employment for reduction in wages, contrary to the spirit and intent of the Act, is a matter of common knowledge to those conversant with the operation of the Act, especially within the past four or five years.

All that Bill 7 contemplates is to insure equality of advantage, as well as responsibility, under the operation of the Act. It cannot be consistently contended that any injustice or burden will be imposed upon the employer by the proposed amendment, unless he violates the Act. The employer should not entertain any fear of referring to a Board of Conciliation and Investigation any proposed changes in wages or working conditions, before making them effective, especially in view of the fact that employees have accepted this obligation for the past fifteen years.

Trusting that the honourable the Senate will see the consistency of concurring in Bill No. 7 as it passed the House of Commons, we remain,

Yours respectfully,

BYRON BAKER, Legislative Representative,  
Brotherhood of Locomotive Engineers;  
L. L. PELLETIER, Legislative Representative,  
Order of Railway Conductors;  
W. L. BEST, Legislative Representative,  
Brotherhood of Locomotive Firemen and  
Engineers;  
T. J. COUGHLIN, Legislative Representative,  
Brotherhood of Railroad Trainmen;  
TOM MOORE, President, Trades and Labour  
Congress of Canada.

**Use of militia in aid of civil power**

Legislation giving effect to certain recommendations made by the Commission appointed in September, 1923, to inquire into the industrial unrest among the steel workers at Sydney, N.S., is now under consideration by the Parliament of Canada (The Commission's report was issued as a supplement to the LABOUR GAZETTE for February, 1924). The principles of the proposed legislation, which would amend the provisions of the Militia Act (Revised Statutes of Canada, 1906, chapter 41) relating to the calling out of the active militia in aid of the civil power, are contained in the following resolutions which were proposed by the Minister of National Defence and adopted by the House on June 6:—

(1) That the Attorney-General of a province upon receiving notification from a judge of a superior or county or district court, having jurisdiction in the place concerned, that the services of the Active Militia are required in aid of the civil power, may, upon being satisfied that the services of the Active Militia are so required, make a requisition whereby the District Officer Commanding is required to call out the Active Militia, or such portion thereof as he considers necessary for the purpose of suppressing or preventing any actual or anticipated riot or disturbance.

(2) That such requisition shall contain an unconditional undertaking that the province shall pay to His

Majesty all expenses and costs incurred by His Majesty in calling out the militia as aforesaid.

(3) That in every case the Attorney General who made the requisition shall within seven days thereafter cause an inquiry to be made into all the circumstances and send a report thereof to the Secretary of State.

(4) That all expenses incurred by His Majesty in so calling out the militia in aid of the civil power shall be paid to His Majesty by the province of which the Attorney General made the requisition and His Majesty may retain from any annual grant payable by Canada to such province and under the control of the Parliament of Canada, any unpaid balance of moneys due to His Majesty by such province under this provision.

(5) That the expenses and costs occasioned by the calling out of the militia shall, pending payment by the province, be advanced in the first instance out of the Consolidated Revenue Fund by the authority of the Governor in Council, but shall be payable by and recoverable from the province to and by His Majesty as moneys paid by the latter to and for the use of the province at the request of the latter.

### Chinese steamship crews in Canada

A statement by the Minister of Immigration in the House of Commons on April 28, on the subject of Chinese steamship crews in Canada, was noted in the last issue of the LABOUR GAZETTE. In reply to further questions in the House the Minister, on May 28, explained that the practice of allowing Chinese to be brought into Canada for temporary employment on steamships during the summer months had been followed for a number of years. Particulars were given regarding parties of orientals that had been brought in from 1912 to 1923, the reason being advanced in some cases that it was practically impossible to maintain native crews on the local steamers. For example, in June, 1917, the Dominion Steel Corporation wrote the Department to this effect, and 108 Chinese were brought from England for work on six of the company's steamers. In all cases a bond was furnished by the company desiring such help, as a guarantee that the Chinese would be returned from Canada on the conclusion of their employment. In no such case were Chinese admitted to Canada under any provision contained in the Immigration Act, their admission being of a temporary character.

### International Shipping Conference

An international shipping conference was held in London, England, on May 13, 14 and 15. Ship owners were present from fourteen maritime countries. The Conference was under the chairmanship of Sir Alan Anderson, President of the Chamber of Shipping. Resolutions on the following subjects were passed: endorsing the resolution passed by the International Mari-

time Committee last August, in accordance with which a committee was appointed to study the question of the compulsory insurance of passengers at sea; declaring that uniformity of regulations for the safety of life at sea was of the highest importance, and expressing the desirability that to this end the maritime governments should hold a diplomatic conference; recommending the adoption of the resolution of the International Taxation Committee passed on October 11, 1923; inviting the members of the Conference to take steps for the mutual exemption of shipping profits from taxation; inviting the League of Nations' committee of experts on multiple taxation to adopt the principle of "residence" to govern taxation of shipping profits; appointing a committee to consider international arrangements for uniform tonnage measurement; and appointing a committee to confer with the International Chamber of Commerce and other commercial organizations to complete the work of the Maritime Ports Convention in securing freedom of communications and transit and equitable treatment for commerce.

Minimum wage legislation again becomes prominent in Canada with the taking effect of the Nova Scotia Act on May 1 (LABOUR GAZETTE, March, 1924, page 223). An amending act became law toward the end of the late session of the legislature of that province, which enlarged the scope of the act of 1920 by making it applicable to the female employees working for wages in any occupation, instead of being limited, as formerly, to those employed in factories and shops. The provisions of the new act will be described in detail in a future article outlining recent legislation in the province. An enquiry into minimum wages during the past year by a commission in New Brunswick is noted elsewhere in the present issue. If the report of this commission should be favourable and if legislation should follow, New Brunswick would be in line with the other provinces of Canada in making provision for establishing minimum wage scales for female employees, and the only remaining exception among the provinces would then be Prince Edward Island, which, owing to the fact that its population is mainly agricultural, is not confronted with the same industrial problems as the other provinces. A new type of minimum wage legislation, practically unique in Canada in that it applies to male as well as female employees in the occupation affected, is also referred to in the

article in this issue above mentioned. This is the provision, made by the New Brunswick Schools Act of 1922, of minimum wages for school teachers. The only other Canadian application to men of the minimum wage principle, namely the British Columbia act of 1919 providing for trade boards for coal miners, has not so far been made operative.

Recent amendments to the Alberta Minimum Wage Act, passed at the late session (LABOUR GAZETTE, May, page 377) were subsequently criticized by labour representatives as tending to neutralize the benefits secured by the Act. The provision to which exception was taken was that enabling the Board to make special provision for longer hours and revised wage rates during the pressure of seasonal work, and for increasing the normal proportion of apprentices. Before the amendment was enacted the Board had authority only to fix periods of employment, but not to make provision for emergencies. The Board is now inviting an expression of opinion from the various parties interested, and if they so desire a conference will be held before regulations are issued in regard to the question of apprentices and of overtime wages and hours.

**Coal mining inquiry in Alberta**

The Alberta Legislature, at its late session, provided for the appointment of a commission under the Public Inquiries Act to inquire

into the coal industry of the province including reserves of coal, systems of mining, grading and inspection, costs of production, capitalization, profits and marketing, and such other matters as the Lieutenant Governor in Council may direct. The Commission is empowered to summon witnesses and require such witnesses to give evidence on oath or on solemn affirmation and to produce such documents and things as the Commission may deem requisite to a full investigation.

**Injured workmen's right to choose doctor**

Some dissatisfaction has recently been expressed by medical doctors in Alberta in connection with the operation of that section of the

Workmen's Compensation Act which provides for the examination of an injured workman by a medical referee. Section 43 of the Act requires that "a workman who claims compensation, or to whom compensation is payable under the act, shall, if so required by the Board, submit himself for examination by a medical referee." A delegation of doctors, including representatives of the Calgary Medi-

cal Association interviewed members of the Board on this subject during May. They alleged that the referee in some cases dealt in an arbitrary manner with the treatments and the proceedings followed by the medical man on the spot. The doctors protested also against a referee or his assistants being allowed to treat cases referred to them. They claimed that workmen could not be said to have exercised their right to choose their own doctor when only one doctor was available (this right was given under an amendment to the act at the recent session, as noted in the last issue of the LABOUR GAZETTE, page 377). They further mentioned that in cases where it was necessary to send an injured workman from the country to the city the workman should have the right to choose his doctor there. The Board undertook to give careful consideration to the representations of the doctors.

**Hospital fees for compensation patients**

The amount of the hospital fees that are paid by Workmen's Compensation Boards for their patients was under criticism during the past

month both in Ontario and British Columbia. By an existing arrangement a flat rate of \$2 per day is paid by the Ontario Board to hospitals in the province for the treatment of injured workers with a small additional fee for operating room and X-Ray charges. According to reports in the press hospital superintendents in Toronto were agreed that the average cost of such patients was at least \$3.50 per day. In addition to the \$2 received from the Board, each hospital receives a grant from the provincial government of 50 cents per day. It was claimed, therefore, that the hospitals had a deficit of \$1 per day on each patient, a condition which did not exist in other provinces, where boards were required to pay actual cost rates. It was admitted that the fee charged for indigent patients in public wards was only \$1.50 per day, but it was argued that that figure was not based on costs and had been arbitrarily fixed, and patients were expected to pay more if they could afford to do so. The claim was made on behalf of the hospitals that the patients for whom the Workmen's Compensation Board was responsible should be considered as belonging to the latter class. The chairman of the Workmen's Compensation Board contended, on the other hand, that the charges for the Board's patients should not be higher than those for public ward cases. Most of the patients placed in Toronto hospitals, he claimed, were duly qualified residents of the city and as such were entitled to treatment at

the fixed rate of \$1.50 per day. He further stated that the Board was paying more than the railways were formerly required to pay. The present rate applied generally throughout the province, no institutions receiving any special favours, and it had been fixed only after careful investigations had been made. The civic authorities later informed all hospitals that the city would not be responsible for deficits incurred by the hospitals through these patients. Subsequently, officials of the Toronto General Hospital intimated that they were prepared to refuse admittance to patients of the Ontario Workmen's Compensation Board unless the Board is willing to pay the full cost of the service to such patients. In reply the Board issued a statement which was partly as follows:—

"The board is bound by the provisions of the act which it is administering, and the act provides that the fees or charges for medical aid shall not be more than would be properly and reasonably charged to the workman if himself paying the bill. The Compensation Board is paying more for its cases than the city is paying for its own employees. It would seem that the chief reason for singling out the workmen's compensation board and saying nothing of the city's own employees or of railway and other workmen that are always taken in at public ward rates, or other residents of the city, is that a public body is often regarded as an object of exploitation. To guard against this was no doubt the purpose of the above quoted provision in the act."

A similar difficulty arose during the past month in British Columbia. The Board of the General Hospital at Prince Rupert has suggested that a conference should be held between the hospital authorities in the province and the Workmen's Compensation Board as to payment for the hospital treatment of compensation cases. It was stated that the Board pays \$2.50 a day for patients, whereas under the Act the Board may also furnish medical supplies. Section 21 of the Act gives authority to the Board

"to furnish or provide for the injured workman such medical, surgical and hospital treatment, transportation, nursing, medicines, crutches and apparatus, including artificial members, as it may deem reasonably necessary at the time of the injury, and thereafter during the disability to cure and relieve from the effects of the injury, and the Board shall have full power to adopt rules and regulations with respect to furnishing medical aid to injured workmen entitled thereto and for the payment thereof."

An amendment of 1922 added a new clause similar to the provision in the Ontario Act; that

"the fees or remuneration for medical aid furnished under the act shall not be more than would be properly and reasonably charged the workman if himself paying, and the amount thereof shall be fixed and determined by the board, and no action for any amount larger than that fixed by the board shall lie in respect to medical aid."

### Assessment of employers for compensation in Alberta

The Workmen's Compensation Board of Alberta has issued a circular explaining some of the amendments made in the act at the late session of the provincial legislature (LABOUR GAZETTE, May, page 376). The effect of one of the changes that were made in the section of the act relating to the power of the Board in regard to the assessment of employers, was to provide as follows: If the earnings of any workman amount to less than \$2,000 during a calendar year the whole of such earnings are assessable; if the earnings of any workman amount to more than \$2,000 in the same period, assessment is payable on \$2,000 and the amount earned above that figure is termed "excess" and is free from assessment. Earnings, as the word is used by the Board, means total remuneration for services rendered and includes cash, commissions, bonuses, overtime, and any deductions from the earnings of the workman for table board, medical fees, rent, water, light, dues of any kind, powder, fuse, detonators, and any other item deducted by the employer from a workman's earnings.

### Civic taxation of non-resident workmen

Action was taken recently by the town council of Sydney Mines, N.S., to obtain from the legislature of the Province authority to impose a head tax on all non-resident workers in the city. A movement in the same direction has been in progress for some time past in the province of Quebec. According to the *Montreal Gazette*, it began about ten years ago, its object being to prevent outside working men from seeking work in municipalities other than their own. The Longshoremen's Union at Montreal strongly favoured the proposal, which however was not embodied in the new city charter. A similar effort by the city of Quebec during the present year has not so far resulted in the passing of the necessary enabling legislation.

### Fisheries statistics of New Brunswick 1923

A preliminary report of the Dominion Bureau of Statistics of the fisheries industry in New Brunswick, 1923, shows a decrease in the value of production from the previous year of \$138,162 or three per cent, the total value for the year being \$4,547,498. The lobster and sardine fisheries together contributed over half of the total value of production in 1923, and the value of the lobsters canned and marketed in shell amounted to \$1,339,155, and of sardines canned

and marketed fresh and salted to \$1,016,655. Compared with the previous year lobsters show an increase of six per cent both in catch and in marketed value, and sardines show a decrease in catch of 45 per cent and an increase in marketed value of 44 per cent. Of the other chief commercial fishes, the quantities caught and landed in 1923 were as follows: cod, 286,751 cwt., a decrease of eight per cent; herring, 251,100 cwt., a decrease of 31 per cent; mackerel, 13,455 cwt., a decrease of 43 per cent; smelts, 43,210 cwt., a decrease of 31 per cent; salmon, 20,327 cwt., an increase of 21 per cent; and clams, 22,645, an increase of six per cent.

The amount of capital represented in the vessels, boats, nets, traps, piers and wharves, etc., employed in the primary operations of catching and landing the fish in 1923 was \$3,400,169, compared with \$3,316,479 in 1922. The number of men employed was 9,228, compared with 9,394 in 1922.

The number of fish canning and curing establishments in operation in 1923 was 228, comprising 167 lobster canneries, five clam canneries, one sardine cannery and 55 fish curing establishments. Compared with the previous year the number of lobster canneries decreased by six, and of fish curing establishments by three, a total decrease of nine in the number of establishments. The capital investment of the establishments in 1923 represented a total value of \$1,290,216, a decrease from the preceding year of \$7,313. The number of persons employed in the establishments was 2,325, compared with 2,736, in 1922.

### Health activities in New Brunswick

Testimony to the valuable work accomplished by the Department of Health of New Brunswick was given in a recent discussion in the provincial Legislature. A successful laboratory has been conducted at St. John, and emergency depots have been established at twenty-two places throughout the province. A staff of Public Health Nurses has been engaged in giving instruction to mothers as to the care of children during infancy, and other forms of child welfare service have been provided, including instruction in proper methods of sanitation, lighting, feeding, etc. The general death rate of the province has been reduced from 15.6 per thousand in 1921 to 13.1 in 1922, and a rate below 13 per thousand is anticipated for the past year. The decline in infant mortality has been from 134.9 in 1920 to 103.3 in 1922 per 1,000 living births.

### Alberta legislature and status of women

Resolutions affecting the civil rights of women in Canada were passed unanimously by the Legislature of Alberta at its recent session, copies being subsequently forwarded to the Prime Minister of Canada.

The first resolution proposed that the laws with respect to the naturalization of aliens should not operate either in the Dominion or in the provinces to deprive a woman of her right to vote in elections, who, being a British subject, has married an alien, and who has, excepting for the contract of marriage done no act to alienate her citizenship.

The other resolution asked that the Parliament of Canada should amend the divorce laws of the Dominion now in effect in the province of Alberta in such a way as to grant equal rights and privileges to husbands and wives with respect to the causes or acts which entitle them to remedy by way of divorce.

### American Telephone Co. benefits from high wages

In the annual report of the directors of the American Telephone and Telegraph Company to the stockholders the President of that company, Mr. H. B. Thayer, makes the interesting statement that "since the war there have been established new standards of wages and new standards of living. We must accept these standards as substantially normal now, as we accepted pre-war standards as normal then. The effect is a greater cost of plant, a greater expense of giving service, and yet, notwithstanding the necessarily higher charges for service, a greater demand for service. The direct beneficiaries of higher wages have become householders and applicants for telephone service. The habit of using the telephone steadily grows. There is no saturation anywhere. Our population increases about 1,500,000 annually. All indications point, therefore, to an increasing rather than an abating demand for our service."

### How labour legislation is enforced
