# CLASSIFIED INDEX

## PREFACE

The classified index is designed to meet the needs of those who are searching for music for performance, or of special subject content or national characteristics. The headings have been selected and the list constructed on the principle of using specific headings in so far as possible, e. g., Operas, not Dramatic Music - Operas. However, headings of broad scope with sub-divisions for specific types have been used, when the headings are so closely related as otherwise to require numerous cross references or searching under widely separated headings, e. g., Chamber Music, and Choral Music.

The words "music" or "songs and music" should be understood to follow most of the headings, e. g.,

Guitar [music]  
Chile [songs and music]

The headings are arranged alphabetically. Cross-references are made from headings not used, and from sub-divisions of a general heading to the broad heading. Examples are:

Oratorios. See Choral music - Sacred choral works  
String quartets. See Chamber music - Quartets - String instruments

Cross-references are made from one heading to another when the second covers closely related material, e. g.,

Orchestra. See also String orchestra

Instructive material for particular instruments is under the name of each instrument, e. g., Violin instruction. Material which is predominantly textual, such as histories, biographies, program notes, and works on appreciation, theory, etc. will be found in a separate section at the end called Books and Pamphlets on Music.

The entries in the index constitute brief references to the alphabetical name list in this volume. Each entry consists of the name of the author, with forenames abbreviated, followed by the title-page title, or the filing title and the title-page title. Each entry in the index is represented by an entry under the composer in the name list, where other editions, some for different mediums of performance, may well be found also.

Since this index covers both semi-annual volumes, the double asterisk (\*\*) is used to indicate that the entry occurs only in the July-December number. A single and a double asterisk(\*/\*\*) indicate that the entry may be found in both

semi-annual numbers, and the absence of asterisks means that the entry will be found in the January-June number.

The abbreviations used are: acc.-accompaniment; unacc. - unaccompanied; arr. - arranged.

The table which follows contains the headings used in the classified index. All cross-references are also given in this table, and are not repeated in the index itself.

Choral music. <u>Note:</u> The term "Choral works" in the sub-headings below denotes works with orchestra accompaniment, whereas the term "Choruses" is used for works composed with piano accompaniment or unaccompanied.	
In determining the number of voices, consideration is given to divisi passages. For example, when the title-page describes the work as being for two equal voices, the work will be listed with four-part choruses if the parts divide.	
Under the sub-heading "Other combinations" are listed all works for ensembles with addition of one or more solo voices. <u>See also</u> Christmas Easter Thanksgiving

Half past seven.  
Hand in hand together.  
Hand me back my broken heart.  
Handle it with care.  
How can I go on.  
How did I know.  
I always dream of you.  
I am very lonely.  
I lost my song and you.  
I often wonder.  
I tho't I only wanted a pal in you.  
I wanna be a truckdriver's  
sweetheart.  
If this isn't love.
