### INTRODUCTORY REMARKS

1. The tables contained in the present report give principally statistics concerning the business of the Patent Office, and relating to industrial property rights in 1931. In general, calendar years are observed, except in tables XIX, XX and XXI where fiscal years (commencing on April 1st and ending on March 31st of the following year) are adopted.
2. Number of applications.  
The number of applications presented in table I indicates those received by the Patent Office, and the number of applications presented in the classification tables V, VI and VII shows the total applications received by the examiners.  
The number of applications for registrations of renewal of duration of trade mark rights is included in that of applications for registrations of trade marks.
3. Number of registrations.  
The number of registrations of renewal of duration of trade mark rights is included in that of registrations of trade marks, except in table VI.
4. The present report does not contain tables showing the number of rights existing and causes of their expiration, owing to the loss during the earthquake disaster on September 1st 1923, of materials necessary for use in that connection, some of these materials having not yet been recovered.
